Grades for courses completed at other institutions are not included in computing the GPR. An official transcript from the university at which transfer courses are taken must be sent directly to the Office of Admissions.
Research Proposal

The general field of research to be used for the dissertation should be agreed on by the student and the advisory committee at their first meeting, as a basis for selecting the proper courses to support the proposed research.

As soon thereafter as the research project can be outlined in reasonable detail, the dissertation research proposal should be completed. The research proposal should be approved at a meeting of the student’s advisory committee, at which time the feasibility of the proposed research and the adequacy of available facilities should be reviewed. The approved proposal, signed by all members of the student’s advisory committee, the head of the student’s major department (or chair of the intercollegiate faculty, if applicable), must be submitted to the Office of Graduate and Professional Studies at least 20 working days prior to the submission of the Request for the Final Examination.

Compliance issues must be addressed if a graduate student is performing research involving human subjects, animals, infectious biohazards and recombinant DNA. A student involved in these types of research should check with the Office of Research Compliance and Biosafety at (979) 458-1467 to address questions about all research compliance responsibilities. Additional information can also be obtained on the website http://rcb.tamu.edu.

Examinations

Preliminary Examination

The student’s major department (or chair of the intercollegiate faculty, if applicable) and his or her advisory committee may require qualifying, cumulative or other types of examinations at any time deemed desirable. These examinations are entirely at the discretion of the department and the student’s advisory committee.

The preliminary examination is required. The preliminary examination for a doctoral student shall be given no earlier than a date at which the student is within 6 credit hours of completion of the formal coursework on the degree plan (i.e., all coursework on the degree plan except 681, 684, 690, 691, 5V98, 5V99 and 692 courses). The student is strongly encouraged to complete the Preliminary Examination no later than the end of the semester following the completion of the formal coursework on the degree plan. The Office of Graduate and Professional Studies must receive the results of the preliminary examination at least 14 weeks prior to the final examination date. The examination shall be oral and written unless otherwise recommended by the student’s advisory committee and approved by the Office of Graduate and Professional Studies. The written part of the examination will cover all fields of study included in the student’s degree plan. Each member of the advisory committee is responsible for administering a written examination in his or her particular field, unless he or she chooses to waive participation in this part of the examination. Two or more members of the advisory committee may give a joint written examination. One or more members may require a student to take a departmental or intercollegiate faculty examination to supplement or replace a written examination. Each written examination must be completed and reported as satisfactory to the chair of the advisory committee before the oral portion of the examination may be held. In case any written examination is reported unsatisfactory, the entire advisory committee must agree (1) to proceed with the oral portion of the preliminary examination, or (2) to adopt another course of action regarding the unsatisfactory written examination.

Prior to scheduling the preliminary examination with the other committee members, the committee chair will review the eligibility criteria with the student, using the Preliminary Examination Checklist to ensure the student is ready for the examination. The following list of eligibility requirements applies.

- Student is registered at Texas A&M University for the semester or summer term during which any portion of the preliminary examination may fall. If the entire examination falls between semesters, then the student must be registered for the term immediately preceding the examination.
- An approved degree plan was on file with the Office of Graduate and Professional Studies at least 90 days prior to the first written examination.
- Student’s cumulative GPR is at least 3.000.
- Student’s degree plan GPR is at least 3.000.
- All English language proficiency requirements have been satisfied.
- All committee members have scheduled or waived the written portion and agreed to attend the oral portion of the examination or have found a substitute. Only one substitution is allowed and it cannot be for the committee chair.
- At the end of the semester in which the exam is given, there are no more than 6 hours of coursework remaining on the degree plan (except 681, 684, 690, 691, 5V98, 5V99 and 692). The head of the student’s department (or Chair of the Intercollegiate Faculty, if applicable) has the authority to approve a waiver of this criterion.
- The time span from the first written examination to the oral is no more than three weeks. (In cases of department-wide written examinations, this criterion is not applicable.) The head of the student’s department (or chair of the intercollegiate faculty, if applicable) has the authority to approve a waiver of this criterion.

Once all requirements are met, departments or intercollegiate faculty may announce the schedule of the written and oral parts of the examination.

Credit for the preliminary examination is not transferable. If a departmental or intercollegiate faculty examination is used as part of the written portion of the preliminary examination, it must be the last examination offered prior to the date scheduled for the preliminary examination. In the schedule of the written portion, all members of the student’s advisory committee are to be included.

Through the preliminary examination, the student’s advisory committee should satisfy itself that the student has demonstrated the following qualifications:

1. a mastery of the subject matter of all fields in the program;
2. an adequate knowledge of the literature in these fields and an ability to carry out bibliographical research.

In case a student is required to take, as a part of the written portion of a preliminary examination, an examination administered by a department or intercollegiate faculty, the department or intercollegiate faculty must:

1. offer the examination at least once every six months. The departmental or interdisciplinary degree program examination should be announced at least 30 days prior to the scheduled examination date.
2. assume the responsibility for marking the examination satisfactory or unsatisfactory, or otherwise graded, and in the case of unsatisfactory, stating specifically the reasons for such a mark.
Steps for Completing the Preliminary Examination

1. Establish advisory committee.
   Submit a degree plan.  
   **When:** Prior to the deadline set by the student's college, and no later than 90 days prior to preliminary examination.  
   **Approved by:** Advisory committee, department or intercollegiate faculty chair, and Office of Graduate and Professional Studies (OGAPS).

2. Complete English language proficiency requirements (if applicable), and coursework detailed on degree plan.  
   **When:** Before preliminary examination.

3. Student and chair review eligibility requirements for the preliminary exam using the "Preliminary Examination Checklist."  
   **When:** Several weeks before the proposed date of the preliminary examination.  
   Checklist must be signed by chair and department head, or intercollegiate faculty chair.

4. Student checks the availability of committee members.  
   **When:** Several weeks before the proposed date of the preliminary examination.

5. Students prepares and submits any petitions found necessary by the review of the eligibility requirements.  
   **When:** At least three weeks before the proposed date of the preliminary examination.  
   **Approved by:** Advisory committee, department head or intercollegiate faculty chair, and OGAPS.

6. When exam date is determined, the department may announce the schedule.  
   **Approved by:** Committee chair, department head or intercollegiate faculty chair.

7. Chair submits the Report of the Preliminary Examination and the Preliminary Examination Checklist to OGAPS.  
   **When:** Within 10 working days of the date of the scheduled oral examination and no later than 14 weeks prior to the final defense date.  
   **Approved by:** Advisory committee.

8. Office of Graduate and Professional Studies notifies the student and chair of any actions necessary to rectify any deficiencies.  
   **When:** Upon receipt of the report of the doctoral Preliminary Examination.

Final Examination/Dissertation Defense

The candidate for the doctoral degree must pass a final examination by deadline dates announced in the "Office of Graduate and Professional Studies Calendar" each semester or summer term. The doctoral student is allowed only one opportunity to take the final examination. No student may be given a final examination unless his or her current official cumulative and degree plan GPAs are 3.000 or better and he or she has been admitted to candidacy. No unabsolved grades of D, F, or U for any course can be listed on the degree plan. To absolve a deficient grade, a student must repeat the course and achieve a grade of C or better. A student must have completed all coursework on his or her degree plan with the exception of 691, 5V98, or 5V99 (research) or 692 (Professional Study) hours. The student must be registered for all remaining hours; no hours remain to be taken on the degree plan. The preliminary examination results must have been submitted to the Office of Graduate and Professional Studies 14 weeks prior to the date of the defense. The research proposal must have been submitted to the Office of Graduate and Professional Studies (OGAPS).
of Graduate and Professional Studies 25 working days prior to the date of the final examination/defense. Any changes to the degree plan must be approved by the Office of Graduate and Professional Studies prior to the approval of the final examination. The request to hold and announce the final examination must be submitted to the Office of Graduate and Professional Studies a minimum of 10 working days in advance of the scheduled date. Examination/Defense results must be submitted to the Office of Graduate and Professional Studies within 10 working days of the scheduled examination/defense date. The Office of Graduate and Professional Studies must be notified in writing of any cancellations.

The student’s advisory committee will conduct this examination. The final examination is not to be administered until the dissertation or record of study is available in substantially final form to the student’s advisory committee, and all concerned have had adequate time to review the document. Additionally, all English Language Proficiency requirements must be satisfied prior to scheduling the examination. Whereas the final examination may cover the broad field of the candidate’s training, it is presumed that the major portion of the time will be devoted to the dissertation and closely allied topics. Persons other than members of the graduate faculty may, with mutual consent of the candidate and the chair of the advisory committee, be invited to attend a final examination for an advanced degree. A positive vote by all members of the graduate committee with at most one dissension is required to pass a student on his or her exam. A department can have a stricter requirement provided there is consistency within all degree programs within a department. Upon completion of the questioning of the candidate, all visitors must excuse themselves from the proceedings.

The advisory committee will submit its recommendations on the appropriate Report of the Final Examination for Doctoral Candidates form to the Office of Graduate and Professional Studies regarding acceptability of the candidate for the doctoral degree. A student must be registered in the University in the semester or summer term in which the final examination is taken.

The Report of the Final Examination Form must be submitted with original signatures of only the committee members approved by the Office of Graduate and Professional Studies. If an approved committee member substitution (1 only) has been made, his/her signature must be included on the form submitted to the Office of Graduate and Professional Studies.

Dissertation

The ability to perform independent research must be demonstrated by the dissertation, which must be the original work of the candidate. Whereas acceptance of the dissertation is based primarily on its scholarly merit, it must also exhibit creditable literary workmanship. The format of the dissertation must be acceptable to the Office of Graduate and Professional Studies. Guidelines for the preparation of the thesis are available in the Thesis Manual, which is available online at http://ogaps.tamu.edu.

After successful defense and approval by the student’s advisory committee and the head of the student’s major department (or chair of the intercollegiate faculty, if applicable), a student must submit his/her dissertation in electronic format as a single PDF file. The PDF file must be uploaded to the website, http://ogaps.tamu.edu. Additionally, a signed approval form must be brought or mailed to the Office of Graduate and Professional Studies. Both the PDF file and the signed approval form are required by the deadline.

Deadline dates for submitting are announced each semester or summer term in the Office of Graduate and Professional Studies Calendar (see Time Limit statement). These dates also can be accessed via the website http://ogaps.tamu.edu.

Before a student can be “cleared” by Thesis and Dissertation Services, a processing fee must be paid through Student Business Services. This processing fee is for the thesis/dissertation services provided. After commencement, dissertations are digitally stored and made available through the Texas A&M Libraries.

A dissertation that is deemed unacceptable by the Office of Graduate and Professional Studies because of excessive corrections will be returned to the student’s department head or chair of the intercollegiate faculty. The manuscript must be resubmitted as a new document, and the entire review process must begin anew. All original submittal deadlines must be met during the resubmittal process in order to graduate.

Additional Requirements

Additional Requirements

- Residence (p. 1100)
- Time Limit (p. 1101)
- Continuous Registration (p. 1101)
- Admission to Candidacy (p. 1101)
- Languages (p. 1101)
- 99-Hour Cap on Doctoral Degree (p. 1101)
- Application for Degree (p. 1101)

Residence

A student who enters the doctoral degree program with a baccalaureate degree must spend one academic year plus one semester in resident study at Texas A&M University. A student who holds master’s degree when he/she enters doctoral degree program must spend one academic year in resident study. One academic year may include two adjacent regular semesters or one regular semester and one adjacent 10-week summer semester. The third semester is not required to be adjacent to the one year. Enrollment for each semester must be a minimum of 9 credit hours each to satisfy the residence requirement.

To satisfy the residence requirement, the student must complete a minimum of 9 credit hours per semester or 10-week summer semester in resident study at Texas A&M University for the required period. A student who enters a doctoral degree program with a baccalaureate degree may fulfill residence requirements in excess of one academic year (18 credit hours) by registration during summer sessions or by completion of a less-than-full course load (in this context a full course load is considered 9 credit hours per semester).

Students who are employed full-time while completing their degree may fulfill total residence requirements by completion of less-than-full time course loads each semester. In order to be considered for this, the student is required to submit a Petition for Waivers and Exceptions along with verification of his/her employment to the Office of Graduate and Professional Studies. An employee should submit verification of his/her employment at the time he/she submits the degree plan. See Registration. (p. 25)

See Residence Requirements (p. 22).
Time Limit

All requirements for doctoral degrees must be completed within a period of ten consecutive calendar years for the degree to be granted. A course will be considered valid until 10 years after the end of the semester in which it is taken. Graduate credit for coursework more than ten calendar years old at the time of the final oral examination may not be used to satisfy degree requirements.

After passing the required preliminary oral and written examinations for a doctoral degree, the student must complete the final examination within four calendar years. Otherwise, the student will be required to repeat the preliminary examination. A final corrected version of the dissertation or record of study in electronic format as a single PDF file must be cleared by the Office of Graduate and Professional Studies no later than one year after the final examination or within the 10-year time limit, whichever occurs first. Failure to do so will result in the degree not being awarded.

Continuous Registration

A student in a program leading to a Doctor of Philosophy who has completed all coursework on his/her degree plan other than 691, 5V98 or 5V99 (research) are required to be in continuous registration until all requirements for the degree have been completed. See Continuous Registration Requirements (p. 25).

Admission to Candidacy

To be admitted to candidacy for a doctoral degree, a student must have:

1. completed all formal coursework on the degree plan with the exception of any remaining 681, 684, 690 and 691, or 5V98 and 5V99,
2. a 3.0 Graduate GPA and a Degree Plan GPA of at least 3.0 with no grade lower than C in any course on the degree plan,
3. passed the preliminary examination (written and oral portions),
4. submitted an approved dissertation proposal,
5. met the residence requirements. The final examination will not be authorized for any doctoral student who has not been admitted to candidacy.

Languages

A student is required to possess a competent command of English. For English language proficiency requirements, see the Admissions section of this catalog. The doctoral (PhD) foreign language requirement at Texas A&M University is a departmental option, to be administered and monitored by the individual departments of academic instruction.

99-Hour Cap on Doctoral Degrees

In Texas, public colleges and universities are funded by the state according to the number of students enrolled. In accordance with legislation passed by the Texas Legislature, the number of hours for which state universities may receive subvention funding at the doctoral rate for any individual is limited to 99 hours. Texas A&M University and other universities will not receive subvention for hours in excess of the limit.

Institutions of higher education are allowed to charge the equivalent of nonresident tuition to a resident doctoral student who has enrolled in 100 or more semester credit hours of doctoral coursework.

A doctoral student at Texas A&M has seven years to complete his/her degree before being charged out-of-state tuition. A doctoral student who, after seven years of study, has accumulated 100 or more doctoral hours will be charged tuition at a rate equivalent to out-of-state tuition. Please note that the tuition increases will apply to Texas residents as well as students from other states and countries who currently are charged tuition at the resident rate. This includes those doctoral students who hold GAT, GANT, and GAR appointments of 20 or more hours and recipients of competitive fellowships who receive more than $1,000 per semester. Doctoral students who, after seven years of study, have not accumulated 100 hours are eligible to pay in-state tuition if otherwise eligible.

For count purposes, a year is counted as three semesters, normally fall, spring and summer. Using this system, a student is allowed 21 semesters as a G8 student to complete the doctoral degree before being penalized with the higher tuition rate. Any semester in which a G8 student is enrolled for a doctoral level course is counted.

The following majors are exempt from the 99-Hour Cap on Doctoral Degrees:

- Biomedical Sciences
- Biochemistry
- Microbiology
- Genetics
- Toxicology
- Nutrition Sciences
- Community Clinical Psychology
- Counseling Psychology
- School Psychology
- Veterinary Pathology
- Clinical Psychology
- Counseling Psychology
- Medical Sciences
- Health Services Research
- Health Promotion and Community Health Sciences
- Epidemiology and Environmental Health

The hour limit for these majors is 130 doctoral hours.

Application for Degree

For information on applying for your degree, please visit the Graduation Application for Degree (p. 24) section.

College of Medicine

http://medicine.tamhsc.edu

Administrative Officers

Interim Dean - Paul E. Ogden, M.D.

For additional information on the college leadership, please visit http://medicine.tamhsc.edu/dean/leadership.html

About the College of Medicine

The Texas A&M Health Science Center College of Medicine offers five degree programs. The COM is committed to excellence in improving the health and well-being of the citizens of Texas and the nation through the
integrated education of humane and highly skilled physicians and the
development of knowledge in the biomedical and clinical sciences. It is
also committed to the important role of diversity in the training of future
medical professionals.

For detailed information about all the programs offered within the
College of Medicine, please visit http://medicine.tamhsc.edu/admissions/
index.html.

**Admission Information** (p. 35)

**Interdepartmental Programs**
- Education for Healthcare Professionals Certificate (p. 1125)
- Doctor of Philosophy in Medical Sciences (p. 1117)
- Combined Doctor of Medicine and Doctor of Philosophy (p. 1102)
- Master of Science in Education for Health Care Professionals
  (p. 1109)
- Master of Science in Medical Sciences (p. 1113)

**First Professional Doctoral**
- Doctor of Medicine in Medicine (p. 1123)

**Interdepartmental Degree Programs**

Graduate education in the College of Medicine is overseen by the Office
of Research and Graduate Studies. Our mission is to support and enhance
the graduate training activities of the college, and to facilitate achievement
of nationally recognized excellence by our faculty, staff, and trainees.
Functions of this office include:

- administrative support for the graduate programs
- development of policies and procedures pertaining to college graduate
  programs
- coordination of interdepartmental and intercollegiate graduate
  programs
- providing leadership for strategic planning efforts in graduate
  education
- advising the Dean and the college administration on graduate issues

There are currently two interdepartmental graduate programs residing in
the college, Medical Science and Education for Healthcare Professionals
(EDHP). The Medical Science program is available at our multiple
campuses (Bryan/College Station, Temple, Houston, and Dallas) with
distinct research strengths opportunities on each campus; while the
Education for Healthcare Professionals program is delivered fully online.
Our programs also have a flexible and interdisciplinary curriculum that
allows our students to have a highly personalized and individually
tailored training program. In addition to our own programs, our faculty
also participate in several interdisciplinary graduate programs, including
Genetics, Neuroscience, and Toxicology.

**Masters**
- Master of Science in Education for Health Care Professionals
  (p. 1109)
- Master of Science in Medical Sciences (p. 1113)

**Doctoral**
- Doctor of Philosophy in Medical Sciences (p. 1117)
- Combined Doctor of Medicine and Doctor of Philosophy (p. 1102)

**Certificates**
- Education for Healthcare Professionals Certificate (p. 1125)

**First Professional Doctoral**
- Doctor of Medicine in Medicine (p. 1123)

**Combined Doctor of Medicine and Doctor of Philosophy**

The Combined Doctor of Medicine (MD) and Doctor of Philosophy (PhD)

The College of Medicine offers a combined training program leading to
both MD and PhD degrees. The purpose of this program is to provide

The college also offers a Master of Science in Medical Science, though
students are normally admitted into the Ph.D. program in Medical Science
and admission for the M.S. degree requires special approval.

**Doctoral**

Our Medical Science program provides students with formal course work
and experimental research leading to a Ph.D. degree. The program
is organized into seven emphasis areas called Tracks. Each Track
responds to an area of scientific research strength in the College
where there are sufficient numbers of faculty to provide a robust training
experience. Each Track has a specific curriculum that outlines appropriate
coursework and activities which will provide the educational foundation
for research in that general area. Students are expected to demonstrate
professional level knowledge and research skills in their chosen area.
The first year curriculum is meant to provide a broad-based foundation
for students through course work in medical sciences and through
research rotations leading to the selection of a faculty research advisor.
Ultimately the student will conduct an independent research project that
will constitute a significant contribution to the field in general, should
be publishable in a peer-reviewed journal, and forms the basis for the
student’s dissertation.

The College of Medicine also offers an MD/PhD Combined Degree
Program and detailed information on this program can be found at http://
medicine.tamhsc.edu/md-phd. (http://medicine.tamhsc.edu/md-phd)

**Masters**
- Master of Science in Education for Health Care Professionals
  (p. 1109)
- Master of Science in Medical Sciences (p. 1113)

**Doctoral**
- Doctor of Philosophy in Medical Sciences (p. 1117)
- Combined Doctor of Medicine and Doctor of Philosophy (p. 1102)

**Certificates**
- Education for Healthcare Professionals Certificate (p. 1125)

**First Professional Doctoral**
- Doctor of Medicine in Medicine (p. 1123)
research training for highly motivated medical students planning careers in academic medicine.

To accomplish this, our program integrates the studies and requirements for both the MD and PhD degrees, providing students with many opportunities to relate their study of clinical medicine with basic biomedical science. Such training produces medical scientists with unique insights into human disease processes.

The MD/PhD program typically requires seven to nine years to complete the combined degree requirements. The program is flexible in many ways and is designed to meet the individual educational needs of the student. Students entering the program are enrolled in the summer semester eight weeks prior to medical school orientation. During this semester, students complete three credit hours of graduate research and, in consultation with the Program Director, a self-selected eight week rotation in a research lab. This rotation introduces students to the laboratories and potential research advisors.

Throughout training, all M.D./Ph.D. students are required to participate in MSCI 620/920 (The Scientific Basis of Medicine). This course, which grew out of the M.D./Ph.D. Journal Club, reviews recent papers in the medical literature and utilizes a group setting to further develop critical analysis skills as well as facilitate interaction and dialogue between peers and M.D./Ph.D. trained faculty. In addition, students are encouraged to attend at least one research seminar per week to assist in identifying a major discipline area for graduate training.

Lastly, this program is dedicated to developing outstanding physician-scientists who excel in their field and are competitive at the national level. The curriculum is designed to meet the individual educational needs of students while promoting excellence. To this end, M.D./Ph.D. students have two options for completing their training:

**Option 1**

Students follow the medical school curriculum and cover the basic medical sciences during their preclinical training period which extends through December of their second year. Next, students begin their Ph.D. training. During this period, students:

- Complete a second research rotation;
- Select a Ph.D. advisor;
- Finish required coursework, including electives in their specialized discipline area; and
- Finalize a meritorious research project and publish their work as well as write and defend their dissertation.

After completing the Ph.D. requirements, students finish their clinical clerkships and the fourth year of medical school.

**Option 2**

Students complete three years of medical school prior to Ph.D. training. However, sufficient research time is also integrated into clinical clerkships which allows students to complete a second research rotation. After completing their clinical clerkships students begin their formal Ph.D. training and:

- Select a Ph.D. advisor;
- Complete coursework requirements including electives in their specialized discipline area; and
- Finalize a meritorious research project and publish their work as well as write and defend their dissertation.

Following their dissertation defense, students complete their fourth year of medical school. The Ph.D. and M.D. degrees are awarded after the requirements for both degrees have been fulfilled.

**Steps to Fulfill Doctoral Degree Requirements**

1. Meet with departmental/intercollegiate graduate advisor to plan course of study for first semester.  
   **When:** Prior to the deadline imposed by the student’s college or intercollegiate programs, and no later than 90 days prior to preliminary examination.  
   **Approved by:** Advisory committee, department head or intercollegiate faculty chair, and Office of Graduate and Professional Studies (OGAPS).

2. Establish advisory committee. Submit a degree plan.  
   **When:** Prior to the deadline imposed by the student’s college or intercollegiate programs, and no later than 90 days prior to preliminary examination.  
   **Approved by:** Advisory committee, department head or intercollegiate faculty chair, and OGAPS.

3. Complete English Language Proficiency requirements (if applicable), and coursework detailed on degree plan.  
   **When:** Before preliminary examination.

4. Complete the preliminary examination.  
   **When:** See steps for completing the preliminary examination. The preliminary examination results must have been submitted to OGAPS 14 weeks prior to the date of the defense.  
   **Approved by:** Advisory committee, department head or chair of the intercollegiate faculty, and OGAPS.

5. Submit proposal for dissertation or record of study to the Office of Graduate and Professional Studies.  
   **When:** No later than 20 working days prior to the submission of the Request for the Final Examination.  
   **Approved by:** Advisory committee, department head or intercollegiate faculty chair, and OGAPS.
Complete residence requirement.

When: Before submitting request to schedule final oral examination.
Approved by: OGAPS

Apply for degree; pay graduate fee.

When: During the first week of the final semester; see OGAPS calendar for deadlines.

Submit request for permission to hold and announce final oral examination.

When: Must be received by OGAPS at least 10 working days before requested exam date. See OGAPS calendar for deadlines.
Approved by: Advisory committee, department head or intercollegiate faculty chair, and OGAPS.

Upload one approved final copy of the dissertation or record of study as a single pdf file (http://ogaps.tamu.edu) and submit a signed approval form to the Office of Graduate and Professional Studies.

When: See OGAPS calendar for deadlines.
Approved by: Advisory committee, department head or intercollegiate faculty chair, and Office of Graduate and Professional Studies.

Graduate; arrange for cap and gown.

For more information, visit http://graduation.tamu.edu.

Note: Once formal coursework is complete, you must be continuously registered until all degree requirements have been met. See Continuous Registration Requirements (p. 25).

More detailed information on the MD/PhD Combined Degree Program can be found at http://medicine.tamhsc.edu/md-phd/index.html.

Program Requirements

Program Requirements

- Student’s Advisory Committee (p. 1104)
- Degree Plan (p. 1104)
- Transfer of Credit (p. 1105)
- Research Proposal (p. 1105)
- Examinations (p. 1105)
  - Preliminary Examination (p. 1105)
  - Final Examination/Dissertation Defense (p. 1107)
- Dissertation (p. 1107)

Student’s Advisory Committee

After receiving admission to graduate studies and enrolling, the student will consult with the head of his or her major or administrative department (or chair of the intercollegiate faculty) concerning appointment of the chair of the advisory committee. The student’s advisory committee will consist of no fewer than four members of the graduate faculty representative of the student’s several fields of study and research, where the chair or co-chair must be from the student’s department (or intercollegiate faculty, if applicable), and at least one or more of the members must have an appointment to a department other than the student’s major department. The outside member for a student in an interdisciplinary degree program must be from a department different from the chair of the student’s committee.

The chair, in consultation with the student, will select the remainder of the advisory committee. Only graduate faculty members located on Texas A&M University campuses may serve as chair of a student’s advisory committee. Other Texas A&M University graduate faculty members located off-campus may serve as a member or co-chair (but not chair), with a member as the chair.

If the chair of a student’s advisory committee voluntarily leaves the University and the student wants the chair to continue to serve in this role, the student is responsible for securing a current member of the University Graduate Faculty, from her/his academic program and located on the respective Texas A&M University campus, to serve as the co-chair of the committee. If the committee chair is on an approved leave of absence, s/he can remain as chair without a co-chair for up to one year with written approval of the Department Head or chair of the intercollegiate faculty. Extensions beyond the one year period can be granted with additional approval of the Dean.

The committee members’ signatures on the degree plan indicate their willingness to accept the responsibility for guiding and directing the entire academic program of the student and for initiating all academic actions concerning the student. Although individual committee members may be replaced by petition for valid reasons, a committee cannot resign en masse. The chair of the committee, who usually has immediate supervision of the student’s research and dissertation or record of study, has the responsibility for calling all meetings of the committee. The duties of the committee include responsibility for the proposed degree plan, the research proposal, the preliminary examination, the dissertation or record of study and the final examination. In addition, the committee, as a group and as individual members, is responsible for counseling the student on academic matters, and, in the case of academic deficiency, initiating recommendations to the Office of Graduate and Professional Studies.

Degree Plan

The student’s advisory committee will evaluate the student’s previous education and degree objectives. The committee, in consultation with the student, will develop a proposed degree plan and outline a research problem which, when completed, as indicated by the dissertation, will constitute the basic requirements for the degree. The degree plan must be filed with the Office of Graduate and Professional Studies prior to the deadline imposed by the student’s college and no later than 90 days prior to the preliminary examination.

This proposed degree plan should be submitted through the online Document Processing Submission System located on the website https://ogsdpss.tamu.edu. A minimum of 64 hours is required on the degree plan for the Doctor of Philosophy for a student who has completed a master’s degree. A student who has completed a DDS/DMD, DVM or MD at a U.S. institution is also required to complete a minimum of 64 hours. A student who has completed a baccalaureate degree but not a master’s degree will be required to complete a 96-hour degree plan. Completion of a DDS/DMD, DVM or MD degree at a foreign institution requires completion of a minimum of 96 hours for the Doctor of Philosophy. A field of study may be primarily in one department or in a combination
of departments. A degree plan must carry a reasonable amount of 691 (Research).

Additional coursework may be added by petition to the approved degree plan by the student’s advisory committee if it is deemed necessary to correct deficiencies in the student’s academic preparation. No changes can be made to the degree plan once the student’s Request for Final Examination or Request for Final Examination Exemption is approved by the Office of Graduate and Professional Studies.

Approval to enroll in any professional course (900-level) should be obtained from the head of the department (or Chair of the intercollegiate faculty, if applicable) in which the course will be offered before including such a course on a degree plan.

No credit may be obtained by correspondence study, by extension or for any course of fewer than three weeks duration.

**Transfer of Credit**

Courses for which transfer credits are sought must have been completed with a grade of B or greater and must be approved by the student’s advisory committee and the Office of Graduate and Professional Studies. These courses must not have been used previously for another degree. Except for officially approved cooperative doctoral programs, credit for thesis or dissertation research or the equivalent is not transferable. Credit for “internship” coursework in any form is not transferable. Courses taken in residence at an accredited U.S. institution or approved international institution with a final grade of B or greater will be considered for transfer credit if, at the time the courses were completed, the courses would be accepted for credit toward a similar degree for a student in degree-seeking status at the host institution. Credit for coursework taken by extension is not transferable. Coursework in which no formal grades are given or in which grades other than letter grades (A or B) are earned (for example, CR, P, S, U, H, etc.) is not accepted for transfer credit. Credit for coursework submitted for transfer from any college or university must be shown in semester credit hours, or equated to semester credit hours.

Courses used toward a degree at another institution may not be applied for graduate credit. If the course to be transferred was taken prior to the conferral of a degree at the transfer institution, a letter from the Registrar at that institution stating that the course was not applied for credit toward the degree must be submitted to the Office of Graduate and Professional Studies.

Grades for courses completed at other institutions are not included in computing the GPR. An official transcript from the university at which transfer courses are taken must be sent directly to the Office of Admissions.

**Research Proposal**

The general field of research to be used for the dissertation should be agreed on by the student and the advisory committee at their first meeting, as a basis for selecting the proper courses to support the proposed research.

As soon thereafter as the research project can be outlined in reasonable detail, the dissertation research proposal should be completed. The research proposal should be approved at a meeting of the student’s advisory committee, at which time the feasibility of the proposed research and the adequacy of available facilities should be reviewed. The approved proposal, signed by all members of the student’s advisory committee, the head of the student’s major department (or chair of the intercollegiate faculty, if applicable), must be submitted to the Office of Graduate and Professional Studies at least 20 working days prior to the submission of the Request for the Final Examination.

Compliance issues must be addressed if a graduate student is performing research involving human subjects, animals, infectious biohazards and recombinant DNA. A student involved in these types of research should check with the Office of Research Compliance and Biosafety at (979) 458-1467 to address questions about all research compliance responsibilities. Additional information can also be obtained on the website http://rcb.tamu.edu.

**Examination**

**Preliminary Examination**

The student’s major department (or chair of the intercollegiate faculty, if applicable) and his or her advisory committee may require qualifying, cumulative or other types of examinations at any time deemed desirable. These examinations are entirely at the discretion of the department and the student’s advisory committee.

The preliminary examination is required. The preliminary examination for a doctoral student shall be given no earlier than a date at which the student is within 6 credit hours of completion of the formal coursework on the degree plan (i.e., all coursework on the degree plan except 681, 684, 690, 691 and 692 courses). The student is strongly encouraged to complete the Preliminary Examination no later than the end of the semester following the completion of the formal coursework on the degree plan. The Office of Graduate and Professional Studies must receive the results of the preliminary examination at least 14 weeks prior to the final examination date. The examination shall be oral and written unless otherwise recommended by the student’s advisory committee and approved by the Office of Graduate and Professional Studies. The written part of the examination will cover all fields of study included in the student’s degree plan. Each member of the advisory committee is responsible for administering a written examination in his or her particular field, unless he or she chooses to waive participation in this part of the examination. Two or more members of the advisory committee may give a joint written examination. One or more members may require a student to take a departmental or intercollegiate faculty examination to supplement or replace a written examination. Each written examination must be completed and reported as satisfactory to the chair of the advisory committee before the oral portion of the examination may be held. In case any written examination is reported unsatisfactory, the entire advisory committee must agree

1. to proceed with the oral portion of the preliminary examination, or
2. to adopt another course of action regarding the unsatisfactory written examination.

Prior to scheduling the preliminary examination with the other committee members, the committee chair will review with the student eligibility criteria, using the Preliminary Examination Checklist to ensure the student is ready for the examination. The following list of eligibility requirements applies.

- Student is registered at Texas A&M University for the semester or summer term during which any portion of the preliminary examination may fall. If the entire examination falls between semesters, then the student must be registered for the term immediately preceding the examination.
• An approved degree plan was on file with the Office of Graduate and Professional Studies at least 90 days prior to the first written examination.
• Student’s cumulative GPR is at least 3.000.
• Student’s degree plan GPR is at least 3.000.
• All English language proficiency requirements have been satisfied.
• All committee members have scheduled or waived the written portion and agreed to attend the oral portion of the examination or have found a substitute. Only one substitution is allowed and it cannot be for the committee chair.
• At the end of the semester in which the exam is given, there are no more than 6 hours of coursework remaining on the degree plan (except 681, 684, 690, 691 and 692). The head of the student’s department (or Chair of the Intercollegiate Faculty, if applicable) has the authority to approve a waiver of this criterion.
• The time span from the first written examination to the oral is no more than three weeks. (In cases of department-wide written examinations, this criterion is not applicable.) The head of the student’s department (or chair of the intercollegiate faculty, if applicable) has the authority to approve a waiver of this criterion.

Once all requirements are met, departments or interdisciplinary degree programs may announce the schedule of the written and oral parts of the examination.

Credit for the preliminary examination is not transferable. If a departmental or intercollegiate faculty examination is used as part of the written portion of the preliminary examination, it must be the last examination offered prior to the date scheduled for the preliminary examination. In the schedule of the written portion, all members of the student’s advisory committee are to be included.

Through the preliminary examination, the student’s advisory committee should satisfy itself that the student has demonstrated the following qualifications:

1. a mastery of the subject matter of all fields in the program;
2. an adequate knowledge of the literature in these fields and an ability to carry out bibliographical research.

In case a student is required to take, as a part of the written portion of a preliminary examination, an examination administered by a department or intercollegiate faculty, the department or intercollegiate faculty must:

1. offer the examination at least once every six months. The departmental or interdisciplinary degree program examination should be announced at least 30 days prior to the scheduled examination date.
2. assume the responsibility for marking the examination satisfactory or unsatisfactory, or otherwise graded, and in the case of unsatisfactory, stating specifically the reasons for such a mark.
3. forward the marked examination to the chair of the student’s advisory committee within one week after the examination.

The chair of the student’s advisory committee is responsible for making all written examinations available to the members of the advisory committee at or before the oral portion of the examination. A positive vote by all members of the graduate committee with at most one dissention is required to pass a student on his or her exam. A department or interdisciplinary degree program can have a stricter requirement provided there is consistency within all degree programs within a department or interdisciplinary program.

The chair of the advisory committee will promptly report the results of the Preliminary Examination to the Office of Graduate and Professional Studies, using the Report of Doctoral Preliminary Examination form and the Preliminary Examination checklist. Both forms must have the appropriate signatures. These forms should be submitted to the Office of Graduate and Professional Studies within 10 working days of the scheduled examination.

Exam results must be submitted with original signatures of only the committee members approved by the Office of Graduate and Professional Studies. If an approved committee member substitution (1 only) has been made, his/her signature must also be submitted to the Office of Graduate and Professional Studies. The original signature of the department head is also required for results for the preliminary examination.

After passing the required preliminary oral and written examinations for the doctoral degree, the student must complete the final examination for the degree within four calendar years. Otherwise, the student will be required to repeat the preliminary examination.

Upon approval of the student’s advisory committee, with no more than one member dissenting, and the approval by the Office of Graduate and Professional Studies, a student who has failed the preliminary examination may be given one re-examination, when adequate time has been given to permit the student to address the inadequacies emerging from the first examination (normally six months). The student and the advisory committee should jointly negotiate a mutually acceptable date for this purpose.

A student must be registered at Texas A&M University for a minimum of one semester credit hour in the semester or summer term in which they will take any portion of the Preliminary Examination.

Final Examination/Dissertation Defense

The candidate for the doctoral degree must pass a final examination by deadline dates announced in the “Office of Graduate and Professional Studies Calendar” each semester or summer term. The doctoral student is allowed only one opportunity to take the final examination. No student may be given a final examination unless his or her current official cumulative and degree plan GPAs are 3.000 or better and he or she has been admitted to candidacy. No unabsolved grades of D, F, or U for any course can be listed on the degree plan. To absolve a deficient grade, a student must repeat the course and achieve a grade of C or better. A student must have completed all coursework on his or her degree plan with the exception of 691 (Research) or 692 (Professional Study) hours. The student must be registered for all remaining hours; no hours remain to be taken on the degree plan. The preliminary examination results must have been submitted to the Office of Graduate and Professional Studies 14 weeks prior to the date of the defense. The research proposal must have been submitted to the Office of Graduate and Professional Studies 25 working days prior to the date of the final examination/defense. Any changes to the degree plan must be approved by the Office of Graduate and Professional Studies prior to the approval of the final examination. The request to hold and announce the final examination must be submitted to the Office of Graduate and Professional Studies a minimum of 10 working days in advance of the scheduled date. Examinations/Defenses that are not completed and reported as satisfactory to the Office of Graduate and Professional Studies within 10 working days of the scheduled examination/defense date will be recorded as failures. The Office of Graduate and Professional Studies must be notified in writing of any cancellations.

The student’s advisory committee will conduct this examination. The final examination is not to be administered until the dissertation or record of study is available in substantially final form to the student’s advisory committee, and all concerned have had adequate time to review the document. Additionally, all English Language Proficiency requirements must be satisfied prior to scheduling the examination. Whereas the final examination may cover the broad field of the candidate’s training, it is presumed that the major portion of the time will be devoted to the dissertation and closely allied topics. Persons other than members of the graduate faculty may, with mutual consent of the candidate and the major professor, be invited to attend a final examination for an advanced degree. A positive vote by all members of the graduate committee with at most one dissension is required to pass a student on his or her exam. A department can have a stricter requirement provided there is consistency within all degree programs within a department. Upon completion of the questioning of the candidate, all visitors must excuse themselves from the proceedings.

The advisory committee will submit its recommendations on the appropriate Report of the Final Examination for Doctoral Candidates form to the Office of Graduate and Professional Studies regarding acceptability of the candidate for the doctoral degree. A student must be registered in the University in the semester or summer term in which the final examination is taken.

Exam results must be submitted with original signatures of only the committee members approved by the Office of Graduate and Professional Studies. If an approved committee member substitution (1 only) has been made, his/her signature must also be submitted to the Office of Graduate and Professional Studies.

Dissertation

MD/PhD students must submit their final corrected and committee approved dissertation to the Office of Graduate and Professional Studies no later than the published deadline during their last semester – after which both the MD and PhD degrees will be conferred.

Additional Requirements

- Residence (p. 1108)
- Time Limit (p. 1108)
- Continuous Registration (p. 1108)
- Admission to Candidacy (p. 1108)
- 99-Hour Cap on Doctoral Degrees (p. 1108)
- Languages (p. 1108)
- Application for Degree (p. 1108)
Residence
A student who enters the doctoral degree program with a baccalaureate degree must spend one academic year plus one semester in resident study at Texas A&M University. A student who holds master's degree when he/she enters doctoral degree program must spend one academic year in resident study. One academic year may include two adjacent regular semesters or one regular semester and one adjacent 10-week summer semester. The third semester is not required to be adjacent to the one year. Enrollment for each semester must be a minimum of 9 credit hours each to satisfy the residence requirement.

To satisfy the residence requirement, the student must complete a minimum of 9 credit hours per semester or 10-week summer semester in resident study at Texas A&M University for the required period. A student who enters a doctoral degree program with a baccalaureate degree may fulfill residence requirements in excess of one academic year (18 credit hours) by registration during summer sessions or by completion of a less-than-full course load (in this context a full course load is considered 9 credit hours per semester).

Students who are employed full-time while completing their degree may fulfill total residence requirements by completion of less-than-full time course loads each semester. In order to be considered for this, the student is required to submit a Petition for Waivers and Exceptions along with verification of his/her employment to the Office of Graduate and Professional Studies. An employee should submit verification of his/her employment at the time he/she submits the degree plan.

See Residence Requirements (p. 22).

Time Limit
Students in the combined PhD/MD program must clear their dissertation no later than 2 years after the final examination or within the 10 year time limit whichever occurs first.

Continuous Registration
A student in a program leading to a Doctor of Philosophy who has completed all coursework on his/her degree plan other than 691 (Research) are required to be in continuous registration until all requirements for the degree have been completed. See Continuous Registration Requirements (p. 25).

Admission to Candidacy
To be admitted to candidacy for a doctoral degree, a student must have:

1. completed all formal coursework on the degree plan with the exception of any remaining 681, 684, 690 and 691,
2. a 3.0 Graduate GPA and a Degree Plan GPA of at least 3.0 with no grade lower than C in any course on the degree plan,
3. passed the preliminary examination (written and oral portions),
4. submitted an approved dissertation proposal,
5. met the residence requirements.

The final examination will not be authorized for any doctoral student who has not been admitted to candidacy.

99-Hour Cap on Doctoral Degrees
In Texas, public colleges and universities are funded by the state according to the number of students enrolled. In accordance with legislation passed by the Texas Legislature, the number of hours for which state universities may receive subvention funding at the doctoral rate for any individual is limited to 99 hours. Texas A&M University and other universities will not receive subvention for hours in excess of the limit.

Institutions of higher education are allowed to charge the equivalent of nonresident tuition to a resident doctoral student who has enrolled in 100 or more semester credit hours of doctoral coursework.

A doctoral student at Texas A&M has seven years to complete his/her degree before being charged out-of-state tuition. A doctoral student who, after seven years of study, has accumulated 100 or more doctoral hours will be charged tuition at a rate equivalent to out-of-state tuition. Please note that the tuition increases will apply to Texas residents as well as students from other states and countries who currently are charged tuition at the resident rate. This includes those doctoral students who hold GAT, GANT, and GAR appointments of 20 or more hours and recipients of competitive fellowships who receive more than $1,000 per semester. Doctoral students who, after seven years of study, have not accumulated 100 hours are eligible to pay in-state tuition if otherwise eligible.

For count purposes, a year is counted as three semesters, normally fall, spring and summer. Using this system, a student is allowed 21 semesters as a G8 student to complete the doctoral degree before being penalized with the higher tuition rate. Any semester in which a G8 student is enrolled for a doctoral level course is counted.

The following majors are exempt from the 99-Hour Cap on Doctoral Degrees:

- Biomedical Sciences
- Biochemistry
- Microbiology
- Genetics
- Toxicology
- Nutrition Sciences
- Community Clinical Psychology
- Counseling Psychology
- School Psychology
- Veterinary Pathology
- Clinical Psychology
- Counseling Psychology
- Medical Sciences
- Health Services Research
- Health Promotion and Community Health Sciences
- Epidemiology and Environmental Health

The hour limit for these majors is 130 doctoral hours.

Languages
A student is required to possess a competent command of English. For English language proficiency requirements, see the Admissions section of this catalog. The doctoral (PhD) foreign language requirement at Texas A&M University is a departmental option, to be administered and monitored by the individual departments of academic instruction.

Application for Degree
The MD and PhD degree are conferred in the same semester.
Master of Science in Education for Health Care Professionals

The Master of Science (MS) curriculum is designed to develop new understanding through research and creativity. Students have the option to pursue a thesis or non-thesis Master of Science degree.

Steps to Fulfill Master's Degree Requirements

1. Meet with departmental graduate advisor to plan course of study for first semester.  
   When: Before first semester registration.  
   Approved by: Graduate advisor or chair of the intercollegiate faculty.

2. Establish advisory committee.  
   Submit a degree plan.  
   When: Prior to the deadline imposed by the student's college and no later than 90 days prior to final oral or thesis defense.  
   Approved by: Advisory committee, department head or chair of the intercollegiate faculty, and Office of Graduate and Professional Studies (OGAPS).

3. If thesis is required, submit thesis proposal to the Office of Graduate and Professional Studies.  
   When: At least 20 working days prior to the submission of the Request for the Final Examination.  
   Approved by: Advisory committee, department head or chair of the intercollegiate faculty and OGAPS.

4. Apply for degree; pay graduation fee.  
   When: During the first week of the final semester, see OGAPS calendar.

5. Check to be sure degree program and advisory committee are up to date and all ELP requirements (if applicable) and coursework are complete.  
   When: Well before submitting request to schedule final examination.

6. Complete residence requirement.  
   When: If applicable, before or during final semester.  
   Approved by: OGAPS.

7. Submit request to schedule final examination.  
   When: Must be received by OGAPS at least 10 working days before exam date. See OGAPS calendar for deadlines.  
   Approved by: Advisory committee, department head or chair of the intercollegiate faculty, and OGAPS.

8. Successfully complete final examination.  
   When: The Report of the Final Examination Form should be submitted to OGAPS within 10 days following the exam.  
   Approved by: Advisory committee and OGAPS.

9. If required, upload one approved final copy of thesis as a single PDF file (http://ogaps.tamu.edu) and submit signed approval form to the Office of Graduate and Professional Studies.  
   When: See OGAPS calendar for deadlines.  
   Approved by: Advisory committee, department head or chair of the intercollegiate faculty and OGAPS.

10. Graduation; arrange for cap and gown.  
    For more information, visit http://graduation.tamu.edu.

1 The online Document Processing Submission System is located on the website https://ogsdpss.tamu.edu.

2 Complete the application for degree form via the student's Howdy portal.

For program specific information please visit the following website: http://medicine.tamhsc.edu/graduate-studies/prospective/edhp.

Program Requirements

Program Requirements

- Student's Advisory Committee (p. 1109)
- Degree Plan (p. 1110)
- Credit Requirements (p. 1110)
- Transfer of Credit (p. 1110)
- Limitations on the Use of Transfer, Extension and Certain Other Courses (p. 1111)
- Thesis Option (p. 1111)  
  - Thesis Proposal (p. 1111)  
  - Final Examination (p. 1111)
- Non-Thesis Option (p. 1112)

Student's Advisory Committee

After receiving admission to graduate studies and enrolling for coursework, the student will consult with the head of his or her major or administrative department (or intercollegiate faculty, if applicable) concerning appointment of the chair of his or her advisory committee. With the
exception of the Mays Business School non-thesis option, the Master of Science in Economics with a concentration in financial economics or financial econometrics, the Master of Science with a major in Educational Human Resource Development, HRD option, and the Master of Science in Nursing with a major in Nursing Education, the student’s advisory committee for the master’s degree will consist of no fewer than three members of the graduate faculty, representative of the student’s fields of study and research. The chair or the co-chair of the advisory committee must be from the student’s major department (or intercollegiate faculty, if applicable), and at least one or more of the members must have an appointment to a department other than the student’s major department. The outside member for students in an interdisciplinary program must have an appointment to a department different from the chair of the student’s committee.

The chair, in consultation with the student, will select the remainder of the advisory committee. The student will interview each prospective committee member to determine whether he or she is willing to serve. Only graduate faculty members located on Texas A&M University campuses may serve as chair of a student’s advisory committee. Other graduate faculty members located off campus may serve as a member or co-chair (but not chair) with a member as the chair. The chair of the committee, who usually has immediate supervision of the student’s research and thesis, has the responsibility for calling required meetings of the committee and for calling meetings at any other time considered desirable.

If the chair of a student’s advisory committee voluntarily leaves the University and the student is near completion of the degree and wants the chair to continue to serve in this role, the student is responsible for securing a current member of the University Graduate Faculty, from the student’s academic program and located near the Texas A&M University campus site, to serve as the co-chair of the committee. The Department Head or Chair of Intercollegiate faculty may request in writing to the Associate Provost for Graduate and Professional Studies that a faculty member who is on an approved leave of absence or has voluntarily separated from the university, be allowed to continue to serve in the role of chair of a student’s advisory committee without a co-chair for us to one year. The students should be near completion of the degree. Extensions beyond the one year period can be granted with additional approval of the Dean.

If the chair of the student’s advisory committee is unavailable for an extended time in any academic period during which the student is involved in activities relating to an internship, thesis or professional paper, and is registered for courses such as 5V98, 5V99, 684, 691, 692 or 693, the student may request, in writing, that the department head appoint an alternate advisory committee chair during the interim period.

The duties of the committee include responsibility for the proposed degree plan, the research proposal, the thesis and the final examination. In addition, the committee as a group and as individual members are responsible for advising the student on academic matters, and, in the case of academic deficiency, initiating recommendations to the Office of Graduate and Professional Studies.

The committee members’ approval on the degree plan indicate their willingness to accept the responsibility for guiding and directing the entire academic program of the student and for initiating all academic actions concerning the student. Although individual committee members may be replaced by petition for valid reasons, a committee cannot resign en masse.

Degree Plan

The student’s advisory committee, in consultation with the student, will develop the proposed degree plan. The degree plan must be completed and filed with the Office of Graduate and Professional Studies prior to the deadline imposed by the student’s college or interdisciplinary degree program, if applicable, and no later than 90 days prior to the date of the final oral examination or thesis defense.

A student should submit the degree plan using the online Document Processing Submission System (http://ogdps. tamu.edu).

A student submitting a proposed degree plan for a Master of Science degree should designate on the official degree plan the appropriate program option.

Additional coursework may be added to the approved degree plan by petition if it is deemed necessary by the advisory committee to correct deficiencies in the student’s academic preparation. No changes can be made to the degree plan once the student’s Request for Final Examination or Request for Final Examination Exemption is approved by the Office of Graduate and Professional Studies.

Credit Requirement

A minimum of 32 semester credit hours of approved courses and research is required for the thesis option Master of Science degree with the exception of the Master of Science in Visualization, which requires 48 hours and Master of Science in Athletic Training, which requires 60 hours. A minimum of 36 semester credit hours of approved coursework is required for the Non-Thesis Option.

Ordinarily the student will devote the major portion of his or her time to work in one or two closely related fields. Other work will be in supporting fields of interest.

Transfer of Credit

A student who has earned 12 hours of graduate credit in residence at Texas A&M University may be authorized to transfer courses in excess of the limits prescribed below upon the advice of the advisory committee and with the approval of the Office of Graduate and Professional Studies. Courses taken in residence at an accredited U.S. institution or approved international institution with a final grade of B or greater may be considered for transfer credit if, at the time the courses were completed, the courses would be accepted for credit toward a similar degree for a student in degree-seeking status at the host institution. Otherwise, the limitations stated in the following section apply. Coursework in which no formal grades are given or in which grades other than letter grades (A or B) are earned (for example, CR, P, S, U, H, etc.) is not accepted for transfer credit. Courses appearing on the degree plan with grades of D, F or U may not be absolved by transfer work. Credit for thesis research or the equivalent is not transferable. Credit for coursework submitted for transfer from any college or university must be shown in semester credit hours or equated to semester credit hours. An official transcript from the university at which the transfer coursework was taken must be sent directly to the Office of Admissions.

Courses used toward a degree at another institution may not be applied for graduate credit. If the course to be transferred was taken prior to the conferral of a degree at the transfer institution, a letter from the registrar at that institution stating that the course was not applied for credit toward
the degree must be submitted to the Office of Graduate and Professional Studies.

Grades for courses completed at other institutions are not included in computing the GPR.

**Limitations on the Use of Transfer, Extension and Certain Other Courses**

Some departments may have more restrictive requirements for transfer work. If otherwise acceptable, certain courses may be used toward meeting credit-hour requirements for the master’s degree under the following limitations.

1. The maximum number of credit hours which may be considered for transfer credit is the greater of 12 hours or one-third (1/3) of the total hours of a degree plan. The following restrictions apply:
   - Graduate and/or upper-level undergraduate courses taken in residence at an accredited U.S. institution, or approved international institution with a final grade of B or greater will be considered for transfer credit if, at the time the courses were completed, the student was in degree-seeking status at Texas A&M University, or the student was in degree-seeking status at the institution at which the courses were taken; and if the courses would be accepted for credit toward a similar degree for a student in degree-seeking status at the host institution.
   - Courses previously used for another degree are not acceptable for degree plan credit.

2. The maximum number of credit hours taken in post-baccalaureate non-degree (G6) classification at Texas A&M University which may be considered for application to the degree plan is 12.

3. Not more than 12 hours may be used in any combination of the following categories:
   - Not more than 8 hours in the combination of 5V98, 5V99, and 691 (research) or 684 (Professional Internship) may be used.
   - Not more than 8 hours of 685 (Directed Studies) may be used.
   - Not more than 3 hours of 690 (Theory of Research) may be used.
   - Not more than 3 hours of 695 (Frontiers in Research) may be used.

4. A maximum of 2 hours of Seminar (681).

5. A maximum of 9 hours of advanced undergraduate courses (300- or 400-level).

6. For graduate courses of three weeks’ duration or less, taken at other institutions, up to 1 hour of credit may be obtained for each five-day week of coursework. Each week of coursework must include at least 15 contact hours.

7. Continuing education courses may not be used for graduate credit.

8. Extension courses are not acceptable for credit.

9. For the Degree of Master of Science in Medical Science, students with a first professional degree (MD, DDS or DVM) may take up to 20 hours of 691 (research). For the remaining hours, a maximum of 2 hours can be Seminar (681) and a maximum of 3 hours can be Directed Studies (685).

Exceptions will be permitted only in unusual cases and when petitioned by the student’s advisory committee and approved by the Office of Graduate and Professional Studies.

**Thesis Option**

An acceptable thesis is required for the Master of Science degree for a student who selects the thesis option program. The finished work must reflect a comprehensive understanding of the pertinent literature and express in clear English, the problem(s) for study, the method, significance and results of the student’s original research. Guidelines for the preparation of the thesis are available in the Thesis Manual, which is available online at the Office of Graduate and Professional Studies website.

After successful defense (or exemption) and approval by the student's advisory committee and the head of the student’s major department (or chair of the intercollegiate faculty, if appropriate), the student must submit his/her thesis in electronic format as a single PDF file. The PDF file must be uploaded to the Office of Graduate and Professional Studies website. Additionally, a signed approval form must be brought or mailed to the Office of Graduate and Professional Studies. The PDF file and the signed approval form are required by the deadline.

Deadline dates for submitting the thesis are announced each semester or summer term in the “Office of Graduate and Professional Studies Calendar” (see Time Limit statement). These dates also can be accessed via the Office of Graduate and Professional Studies website.

Before a student can be “cleared” by Thesis and Dissertation Services, a processing fee must be paid through Student Business Services. This processing fee is for the thesis/dissertation services provided. After commencement, dissertations are digitally stored and made available through the Texas A&M Libraries.

A thesis that is deemed unacceptable by the Office of Graduate and Professional Studies because of excessive corrections will be returned to the student’s department head (or chair of the intercollegiate faculty, if applicable). The manuscript must be resubmitted as a new document, and the entire review process must begin again. All original submittal deadlines must be met during the resubmittal process to graduate that semester.

**Thesis Proposal**

For the thesis option Master of Science degree, the student must prepare a thesis proposal for approval by the advisory committee and the head of the major department or chair of the interdisciplinary faculty, if applicable. This proposal must be submitted to the Office of Graduate and Professional Studies at least 20 working days prior to the submission of the request for the final examination.

Compliance issues must be addressed if a graduate student is performing research involving human subjects, animals, infectious biohazards and recombinant DNA. A student involved in these types of research should check with the Office of Research Compliance and Biosafety at (979) 458-1467 to address questions about all research compliance responsibilities. Additional information can also be obtained on the Office of Research Compliance and Biosafety website.

**Thesis Defense/Final Examination**

A student must pass a final examination by dates announced each semester or summer term in the Office of Graduate and Professional Studies Calendar. The Office of Graduate and Professional Studies must be notified in writing of any cancellation. To be eligible to take the final examination, a student’s GPR must be at least 3.000 for courses on the degree plan and for all courses completed at Texas A&M.
which are eligible to be applied to a graduate degree, and there must be no unabsoled grades of D, F or U for any course listed on the degree plan. To absolve a deficient grade, the student must repeat the course at Texas A&M University and achieve a grade of C or better. All coursework on the degree plan must have been completed with the exception of those hours for which the student is registered. Additionally, all English Language Proficiency requirements must be satisfied prior to scheduling the examination. If applicable, an approved thesis proposal must be on file in the Office of Graduate and Professional Studies according to published deadlines.

A request to hold and announce the final examination must be submitted to the Office of Graduate and Professional Studies a minimum of 10 working days in advance of the scheduled date for the examination. Examinations which are not completed and reported as satisfactory to the Office of Graduate and Professional Studies within 10 working days of the scheduled examination date will be recorded as failures. A student may be given only one opportunity to repeat the final examination for the master’s degree and that must be within a time period that does not extend beyond the end of the next regular semester (summer terms are excluded).

For thesis option students, the final examination covers the thesis and all work taken on the degree plan and at the option of the committee may be written or oral or both. The final examination may not be administered before the thesis is available to all members of the student’s advisory committee in substantially final form, and all members have had adequate time to review the document. The examination is conducted by the student’s advisory committee as finally constituted. A thesis option student must be registered in the University in the semester or summer term in which the final examination is taken. Persons other than members of the graduate faculty may, with mutual consent of the candidate and the major professor, attend final examinations for advanced degrees. Upon completion of the questioning of the candidate, all visitors must excuse themselves from the proceedings. A positive vote by all members of the graduate committee with at most one dissension is required to pass a student on his or her exam. A department, or interdisciplinary degree program, may have a stricter requirement provided there is consistency within all degree programs within a department or interdisciplinary degree program.

A thesis option candidate may petition to be exempt from his/her final examination provided his/her degree plan GPR is 3.500 or greater and he/she has the approval of the advisory committee, the head of the student’s major department, or intercollegiate chair, if appropriate, and the Office of Graduate and Professional Studies. If an approved committee member substitution (1 only) has been made, his/her signature must also be submitted to the Office of Graduate and Professional Studies.

Exams results must be submitted with original signatures of only the committee members approved by the Office of Graduate and Professional Studies. If an approved committee member substitution (1 only) has been made, his/her signature must also be submitted to the Office of Graduate and Professional Studies.

Non-Thesis Option

For the non-thesis option, a thesis is not required. A final comprehensive examination is required for all non-thesis Master of Science programs except the Master of Science programs offered by the Mays Business School, the Master of Science in Economics with a concentration in financial economics or financial econometrics, the Master of Science with a major in Educational Human Resource Development, HRD option, and the Master of Science in Nursing with a major in Nursing Education. No exemptions are allowed. The requirements as to level of courses and examinations are the same as for the thesis option Master of Science degree. The final examination cannot be held prior to the mid point of the final semester if questions on the examination are based on courses in which the student is currently enrolled.

A student pursuing the non-thesis option is not allowed to enroll in 5V98, 5V99, or 691 (research) for any reason and 681 may not be used for credit toward a non-thesis option Master of Science degree. A maximum of 4 credit hours of 684 (Professional Internship), 8 credit hours of 685 (Directed Studies), and up to 3 credit hours of 690 (Theory of Research) or 695 (Frontiers in Research) may be used toward the non-thesis option Master of Science degree. In addition, any combination of 684, 685, 690 and 695 may not exceed 25 percent of the total credit hour requirement shown on the individual degree plan. All requirements for the non-thesis option Master of Science degree other than those specified above are the same as for the thesis option degree.

Additional Requirements

Additional Requirements

- Residence (p. 1112)
- Continuous Registration (p. 1113)
- Time Limit (p. 1113)
- Foreign Languages (p. 1113)
- Application for Degree (p. 1113)

Residence

In partial fulfillment of the residence requirement for the degree of Master of Science, the student must complete 9 resident credit hours during one regular semester or one 10-week summer semester in resident study at Texas A&M University. Upon recommendation of the student’s advisory committee, department head or Chair of the Interdisciplinary Program, if appropriate, and with approval of the Office of Graduate and Professional Studies, a student may be granted exemption from this requirement. Such a petition, however, must be approved prior to the student’s registration for the final 9 credit hours of required coursework.

Students who are employed full-time while completing their degree may fulfill total residence requirements by completion of less-than-full time course loads each semester. In order to be considered for this, the student is required to submit a Petition for Waivers and Exceptions along with verification of his/her employment to the Office of Graduate and Professional Studies.

See Residence Requirements (p. 22).
Continuous Registration

A student in the thesis option of the Master of Science program who has completed all coursework on his/her degree plan other than 5V98, 5V99, and 691 (research) is required to be in continuous registration until all requirements for the degree have been completed. See Continuous Registration Requirements (p. 25).

Time Limit

All degree requirements must be completed within a period of seven consecutive years for the degree to be granted. A course will be considered valid until seven years after the end of the semester in which it is taken. Graduate credit for coursework which is more than seven calendar years old at the time of the final examination (oral or written) may not be used to satisfy degree requirements.

A student who has chosen the thesis option must have the final corrected version of the thesis cleared by the Office of Graduate and Professional Studies no later than one year after the final examination, or approval of a petition for exemption from the final exam, or within the seven-year time limit, whichever occurs first. Failure to do so will result in the degree not being awarded.

Foreign Languages

No specific language requirement exists for the Master of Science degree.

Application for Degree

For information on applying for your degree, please visit the Graduation (p. 24) section.

Master of Science in Medical Sciences

The Master of Science (MS) curriculum is designed to develop new understanding through research and creativity. Students have the option to pursue a thesis or non-thesis Master of Science degree.

Steps to Fulfill Master's Degree Requirements

1. Meet with departmental graduate advisor to plan course of study for first semester.  
   When: Before first semester registration.  
   Approved by: Graduate advisor or chair of the intercollegiate faculty.

2. Establish advisory committee.  
   Submit a degree plan.  
   When: Prior to the deadline imposed by the student's college and no later than 90 days prior to final oral or thesis defense.  
   Approved by: Advisory committee, department head or chair of the intercollegiate faculty, and Office of Graduate and Professional Studies (OGAPS).

3. If thesis is required, submit thesis proposal to the Office of Graduate and Professional Studies.  
   When: At least 20 working days prior to the submission of the Request for the Final Examination.  
   Approved by: Advisory committee, department head or chair of the intercollegiate faculty and OGAPS.

4. Apply for degree; pay graduation fee.  
   When: During the first week of the final semester, see OGAPS calendar.

5. Check to be sure degree program and advisory committee are up to date and all ELP requirements (if applicable) and coursework are complete.  
   When: Well before submitting request to schedule final examination.

6. Complete residence requirement.  
   When: If applicable, before or during final semester.  
   Approved by: OGAPS.

7. Submit request to schedule final examination.  
   When: Must be received by OGAPS at least 10 working days before exam date. See OGAPS calendar for deadlines.  
   Approved by: Advisory committee, department head or chair of the intercollegiate faculty, and OGAPS.

8. Successfully complete final examination.  
   When: The Report of the Final Examination Form should be submitted to OGAPS within 10 days following the exam.  
   Approved by: Advisory committee and OGAPS.

9. If required, upload one approved final copy of thesis as a single PDF file (http://ogaps.tamu.edu) and submit signed approval form to the Office of Graduate and Professional Studies.  
   When: See OGAPS calendar for deadlines.  
   Approved by: Advisory committee, department head or chair of the intercollegiate faculty and OGAPS.

10. Graduation; arrange for cap and gown.  
    For more information, visit http://graduation.tamu.edu.

1 The online Document Processing Submission System is located on the website https://ogsdps.tamu.edu.
Complete the application for degree form via the student's Howdy portal.

Program Requirements

Program Requirements

- Student's Advisory Committee (p. 1114)
- Degree Plan (p. 1114)
- Credit Requirements (p. 1114)
- Transfer of Credit (p. 1114)
- Limitations on the Use of Transfer, Extension and Certain Other Courses (p. 1115)
- Thesis Option (p. 1115)
  - Thesis Proposal (p. 1115)
  - Final Examination (p. 1116)
- Non-Thesis Option (p. 1116)

Student's Advisory Committee

After receiving admission to graduate studies and enrolling for coursework, the student will consult with the head of his or her major or administrative department (or intercollegiate faculty, if applicable) concerning appointment of the chair of his or her advisory committee. With the exception of the Mays Business School non-thesis option, the Master of Science in Economics with a concentration in financial economics or financial econometrics, the Master of Science with a major in Educational Human Resource Development, HRD option, and the Master of Science in Nursing with a major in Nursing Education, the student’s advisory committee for the master’s degree will consist of no fewer than three members of the graduate faculty, representative of the student’s fields of study and research. The chair or the co-chair of the advisory committee must be from the student’s major department (or intercollegiate faculty, if applicable), and at least one or more of the members must have an appointment to a department other than the student’s major department. The outside member for students in an interdisciplinary program must have an appointment to a department different from the chair of the student’s committee.

The chair, in consultation with the student, will select the remainder of the advisory committee. The student will interview each prospective committee member to determine whether he or she is willing to serve. Only graduate faculty members located on Texas A&M University campuses may serve as chair of a student’s advisory committee. Other graduate faculty members located off campus may serve as a member or co-chair (but not chair) with a member as the chair. The chair of the committee, who usually has immediate supervision of the student’s research and thesis, has the responsibility for calling required meetings of the committee and for calling meetings at any other time considered desirable.

If the chair of a student’s advisory committee voluntarily leaves the University and the student is near completion of the degree and wants the chair to continue to serve in this role, the student is responsible for advising the student on academic matters, and, in the case of academic deficiency, initiating recommendations to the Office of Graduate and Professional Studies.

The duties of the committee include responsibility for the proposed degree plan, the research proposal, the thesis and the final examination. In addition, the committee as a group and as individual members are responsible for advising the student on academic matters, and, in the case of academic deficiency, initiating recommendations to the Office of Graduate and Professional Studies.

The committee members’ approval on the degree plan indicate their willingness to accept the responsibility for guiding and directing the entire academic program of the student and for initiating all academic actions concerning the student. Although individual committee members may be replaced by petition for valid reasons, a committee cannot resign en masse.

Degree Plan

The student’s advisory committee, in consultation with the student, will develop the proposed degree plan. The degree plan must be completed and filed with the Office of Graduate and Professional Studies prior to the deadline imposed by the student’s college or interdisciplinary degree program, if applicable, and no later than 90 days prior to the date of the final oral examination or thesis defense.

A student should submit the degree plan using the online Document Processing Submission System (http://ogsdpss.tamu.edu).

A student submitting a proposed degree plan for a Master of Science degree should designate on the official degree plan the appropriate program option.

Additional coursework may be added to the approved degree plan by petition if it is deemed necessary by the advisory committee to correct deficiencies in the student’s academic preparation. No changes can be made to the degree plan once the student’s Request for Final Examination or Request for Final Examination Exemption is approved by the Office of Graduate and Professional Studies.

Credit Requirement

A minimum of 32 semester credit hours of approved courses and research is required for the thesis option Master of Science degree with the exception of the Master of Science in Visualization, which requires 48 hours and Master of Science in Athletic Training, which requires 60 hours. A minimum of 36 semester credit hours of approved coursework is required for the Non-Thesis Option.

Ordinarily the student will devote the major portion of his or her time to work in one or two closely related fields. Other work will be in supporting fields of interest.

Transfer of Credit

A student who has earned 12 hours of graduate credit in residence at Texas A&M University may be authorized to transfer courses in excess of the limits prescribed below upon the advice of the advisory committee.

1. Complete the application for degree form via the student's Howdy portal.

2. Program Requirements

3. Student's Advisory Committee

4. Degree Plan

5. Credit Requirement

6. Transfer of Credit
and with the approval of the Office of Graduate and Professional Studies. Courses taken in residence at an accredited U.S. institution or approved international institution with a final grade of B or greater may be considered for transfer credit if, at the time the courses were completed, the courses would be accepted for credit toward a similar degree for a student in degree-seeking status at the host institution. Otherwise, the limitations stated in the following section apply. Coursework in which no formal grades are given or in which grades other than letter grades (A or B) are earned (for example, CR, P, S, U, H, etc.) is not accepted for transfer credit. Courses appearing on the degree plan with grades of D, F or U may not be absolved by transfer work. Credit for thesis research or the equivalent is not transferable. Credit for coursework submitted for transfer from any college or university must be shown in semester credit hours or equated to semester credit hours. An official transcript from the university at which the transfer coursework was taken must be sent directly to the Office of Admissions. Courses used toward a degree at another institution may not be applied for graduate credit. If the course to be transferred was taken prior to the conferral of a degree at the transfer institution, a letter from the registrar at that institution stating that the course was not applied for credit toward the degree must be submitted to the Office of Graduate and Professional Studies. Grades for courses completed at other institutions are not included in computing the GPR.

**Limitations on the Use of Transfer, Extension and Certain Other Courses**

Some departments may have more restrictive requirements for transfer work. If otherwise acceptable, certain courses may be used toward meeting credit-hour requirements for the master’s degree under the following limitations.

1. The maximum number of credit hours which may be considered for transfer credit is the greater of 12 hours or one-third (1/3) of the total hours of a degree plan. The following restrictions apply:
   - Graduate and/or upper-level undergraduate courses taken in residence at an accredited U.S. institution, or approved international institution with a final grade of B or greater will be considered for transfer credit if, at the time the courses were completed, the student was in degree-seeking status at Texas A&M University, or the student was in degree-seeking status at the institution at which the courses were taken; and if the courses would be accepted for credit toward a similar degree for a student in degree-seeking status at the host institution.
   - Courses previously used for another degree are not acceptable for degree plan credit.
2. The maximum number of credit hours taken in post-baccalaureate non-degree (G6) classification at Texas A&M University which may be considered for application to the degree plan is 12.
3. Not more than 12 hours may be used in any combination of the following categories:
   - Not more than 8 hours in the combination of 5V98, 5V99, and 691 (research) or 684 (Professional Internship) may be used.
   - Not more than 8 hours of 685 (Directed Studies) may be used.
   - Not more than 3 hours of 690 (Theory of Research) may be used.
   - Not more than 3 hours of 695 (Frontiers in Research) may be used.
4. A maximum of 2 hours of Seminar (681).
5. A maximum of 9 hours of advanced undergraduate courses (300- or 400-level).
6. For graduate courses of three weeks’ duration or less, taken at other institutions, up to 1 hour of credit may be obtained for each five-day week of coursework. Each week of coursework must include at least 15 contact hours.
7. Continuing education courses may not be used for graduate credit.
8. Extension courses are not acceptable for credit.
9. For the Degree of Master of Science in Medical Science, students with a first professional degree (MD, DDS or DVM) may take up to 20 hours of 691 (research). For the remaining hours, a maximum of 2 hours can be Seminar (681) and a maximum of 3 hours can be Directed Studies (685).

Exceptions will be permitted only in unusual cases and when petitioned by the student’s advisory committee and approved by the Office of Graduate and Professional Studies.

**Thesis Option**

An acceptable thesis is required for the Master of Science degree for a student who selects the thesis option program. The finished work must reflect a comprehensive understanding of the pertinent literature and express in clear English, the problem(s) for study, the method, significance and results of the student’s original research. Guidelines for the preparation of the thesis are available in the Thesis Manual, which is available online at the Office of Graduate and Professional Studies website.

After successful defense (or exemption) and approval by the student’s advisory committee and the head of the student’s major department (or chair of the intercollegiate faculty, if appropriate), the student must submit his/her thesis in electronic format as a single PDF file. The PDF file must be uploaded to the Office of Graduate and Professional Studies website. Additionally, a signed approval form must be brought or mailed to the Office of Graduate and Professional Studies. The PDF file and the signed approval form are required by the deadline. Deadline dates for submitting the thesis are announced each semester or summer term in the “Office of Graduate and Professional Studies Calendar” (see Time Limit statement). These dates also can be accessed via the Office of Graduate and Professional Studies website.

Before a student can be “cleared” by Thesis and Dissertation Services, a processing fee must be paid through Student Business Services. This processing fee is for the thesis/dissertation services provided. After commencement, dissertations are digitally stored and made available through the Texas A&M Libraries.

A thesis that is deemed unacceptable by the Office of Graduate and Professional Studies because of excessive corrections will be returned to the student’s department head (or chair of the intercollegiate faculty, if applicable). The manuscript must be resubmitted as a new document, and the entire review process must begin again. All original submittal deadlines must be met during the resubmittal process to graduate that semester.

**Thesis Proposal**

For the thesis option Master of Science degree, the student must prepare a thesis proposal for approval by the advisory committee and the head of the major department or chair of the interdisciplinary faculty, if applicable. This proposal must be submitted to the Office of Graduate and
Professional Studies at least 20 working days prior to the submission of the request for the final examination.

Compliance issues must be addressed if a graduate student is performing research involving human subjects, animals, infectious biohazards and recombinant DNA. A student involved in these types of research should check with the Office of Research Compliance and Biosafety at (979) 458-1467 to address questions about all research compliance responsibilities. Additional information can also be obtained on the Office of Research Compliance and Biosafety website.

**Thesis Defense/Final Examination**

A student must pass a final examination by dates announced each semester or summer term in the Office of Graduate and Professional Studies Calendar. The Office of Graduate and Professional Studies must be notified in writing of any cancellation. To be eligible to take the final examination, a student’s GPR must be at least 3.00 for courses on the degree plan and for all courses completed at Texas A&M which are eligible to be applied to a graduate degree, and there must be no unabsolved grades of D, F or U for any course listed on the degree plan. To achieve a deficient grade, the student must repeat the course at Texas A&M University and achieve a grade of C or better. All coursework on the degree plan must have been completed with the exception of those hours for which the student is registered. Additionally, all English Language Proficiency requirements must be satisfied prior to scheduling the examination. If applicable, an approved thesis proposal must be on file in the Office of Graduate and Professional Studies according to published deadlines.

A request to hold and announce the final examination must be submitted to the Office of Graduate and Professional Studies a minimum of 10 working days in advance of the scheduled date for the examination. Examinations which are not completed and reported as satisfactory to the Office of Graduate and Professional Studies within 10 working days of the scheduled examination date will be recorded as failures. A student may be given only one opportunity to repeat the final examination for the master’s degree and that must be within a time period that does not extend beyond the end of the next regular semester (summer terms are excluded).

For thesis option students, the final examination covers the thesis and all work taken on the degree plan and at the option of the committee may be written or oral or both. The final examination may not be administered before the thesis is available to all members of the student’s advisory committee in substantially final form, and all members have had adequate time to review the document. The examination is conducted by the student’s advisory committee as finally constituted. A thesis option student must be registered in the University in the semester or summer term in which the final examination is taken. Persons other than members of the graduate faculty may, with mutual consent of the candidate and the major professor, attend final examinations for advanced degrees. Upon completion of the questioning of the candidate, all visitors must excuse themselves from the proceedings. A positive vote by all members of the graduate committee with at most one disension is required to pass a student on his or her exam. A department, or interdisciplinary degree program, may have a stricter requirement provided there is consistency within all degree programs within a department or interdisciplinary degree program.

A thesis option candidate may petition to be exempt from his/her final examination provided his/her degree plan GPR is 3.50 or greater and he/she has the approval of the advisory committee, the head of the student’s major department, or intercollegiate chair, if appropriate, and the Office of Graduate and Professional Studies. It is required that the petition for exemption be submitted the same semester the student intends to submit the thesis.

For non-thesis option students, a final comprehensive examination is required. The Master of Science in Educational Human Resource Development, HRD option, the Master of Science in Nursing with a major in Nursing Education, the Master of Science Program in the Mays Business School and the Master of Science in Economics with a concentration in financial economics or financial econometrics do not have final examination requirements. Otherwise, exemptions from final examinations are not allowed. The final exam cannot be held prior to the mid point of the final semester if questions on the exam are based on courses in which the student is currently enrolled. If a student has completed all required degree plan coursework, the student is not required to be registered for classes in the semester the final examination is administered (unless he/she holds an assistantship).

Exam results must be submitted with original signatures of only the committee members approved by the Office of Graduate and Professional Studies. If an approved committee member substitution (1 only) has been made, his/her signature must also be submitted to the Office of Graduate and Professional Studies.

**Non-Thesis Option**

For the non-thesis option, a thesis is not required. A final comprehensive examination is required for all non-thesis Master of Science programs except the Master of Science programs offered by the Mays Business School, the Master of Science in Economics with a concentration in financial economics or financial econometrics, the Master of Science with a major in Educational Human Resource Development, HRD option, and the Master of Science in Nursing with a major in Nursing Education. No exemptions are allowed. The requirements as to level of courses and examinations are the same as for the thesis option Master of Science degree. The final examination cannot be held prior to the mid point of the final semester if questions on the examination are based on courses in which the student is currently enrolled.

A student pursuing the non-thesis option is not allowed to enroll in 5V98, 5V99, or 691 (research) for any reason and 691 may not be used for credit toward a non-thesis option Master of Science degree. A maximum of 4 credit hours of 684 (Professional Internship), 8 credit hours of 685 (Directed Studies), and up to 3 credit hours of 690 (Theory of Research) or 695 (Frontiers in Research) may be used toward the non-thesis option Master of Science degree. In addition, any combination of 684, 685, 690 and 695 may not exceed 25 percent of the total credit hour requirement shown on the individual degree plan. All requirements for the non-thesis option Master of Science degree other than those specified above are the same as for the thesis option degree.

**Additional Requirements**

**Additional Requirements**

- Residence (p. 1117)
- Continuous Registration (p. 1117)
- Time Limit (p. 1117)
- Foreign Languages (p. 1117)
- Application for Degree (p. 1117)
Residence

In partial fulfillment of the residence requirement for the degree of Master of Science, the student must complete 9 resident credit hours during one regular semester or one 10-week summer semester in resident study at Texas A&M University. Upon recommendation of the student’s advisory committee, department head or Chair of the Interdisciplinary Program, if appropriate, and with approval of the Office of Graduate and Professional Studies, a student may be granted exemption from this requirement. Such a petition, however, must be approved prior to the student’s registration for the final 9 credit hours of required coursework.

Students who are employed full-time while completing their degree may fulfill total residence requirements by completion of less-than-full time course loads each semester. In order to be considered for this, the student is required to submit a Petition for Waivers and Exceptions along with verification of his/her employment to the Office of Graduate and Professional Studies.

See Residence Requirements (p. 22).

Continuous Registration

A student in the thesis option of the Master of Science program who has completed all coursework on his/her degree plan other than 5V98, 5V99, and 691 (research) is required to be in continuous registration until all requirements for the degree have been completed. See Continuous Registration Requirements (p. 25).

Time Limit

All degree requirements must be completed within a period of seven consecutive years for the degree to be granted. A course will be considered valid until seven years after the end of the semester in which it is taken. Graduate credit for coursework which is more than seven calendar years old at the time of the final examination (oral or written) may not be used to satisfy degree requirements.

A student who has chosen the thesis option must have the final corrected version of the thesis cleared by the Office of Graduate and Professional Studies no later than one year after the final examination, or approval of a petition for exemption from the final exam, or within the seven-year time limit, whichever occurs first. Failure to do so will result in the degree not being awarded.

Foreign Languages

No specific language requirement exists for the Master of Science degree.

Application for Degree

For information on applying for your degree, please visit the Graduation (p. 24) section.

Doctor of Philosophy in Medical Sciences

Work leading to the degree of Doctor of Philosophy (PhD) is designed to give the candidate a thorough and comprehensive knowledge of his or her professional field and training in methods of research. The final basis for granting the degree shall be the candidate’s grasp of the subject matter of a broad field of study and a demonstrated ability to do independent research. In addition, the candidate must have acquired the ability to express thoughts clearly and forcefully in both oral and written languages.

The degree is not granted solely for the completion of coursework, residence and technical requirements, although these must be met.

For a student who has completed a master’s degree, a DDS/DMD, DVM or MD at a U.S. institution, a minimum of 64 hours is required on the degree plan for the degree of Doctor of Philosophy. For a student who has completed a baccalaureate degree but not a master’s degree or a U.S. DDS/DMD, DVM or MD, a minimum of 96 hours is required on the degree plan for the degree of Doctor of Philosophy.

Steps to Fulfill Doctoral Degree Requirements

1. Meet with departmental/intercollegiate graduate advisor to plan course of study for first semester.
   - **When:** Before first semester registration.
   - **Approved by:** Graduate advisor.

2. Establish advisory committee. Submit a degree plan.
   - **When:** Prior to the deadline imposed by the student’s college or intercollegiate programs, and no later than 90 days prior to preliminary examination.
   - **Approved by:** Advisory committee, department head or intercollegiate faculty chair, and Office of Graduate and Professional Studies (OGAPS).

3. Complete English Language Proficiency requirements (if applicable), and coursework detailed on degree plan.
   - **When:** Before preliminary examination.

4. Complete the preliminary examination.
   - **When:** See steps for completing the preliminary examination. The preliminary examination results must have been submitted to OGAPS 14 weeks prior to the date of the defense.
   - **Approved by:** Advisory committee, department head or chair of the intercollegiate faculty, and OGAPS.
5 Submit proposal for dissertation or record of study to the Office of Graduate and Professional Studies. **When:** No later than 20 working days prior to the submission of the Request for the Final Examination. **Approved by:** Advisory committee, department head or intercollegiate faculty chair, and OGAPS.

6 Complete residence requirement. **When:** Before submitting request to schedule final oral examination. **Approved by:** OGAPS

7 Apply for degree; pay graduate fee. **When:** During the first week of the final semester; see OGAPS calendar for deadlines.

8 Submit request for permission to hold and announce final oral examination. **When:** Must be received by OGAPS at least 10 working days before requested exam date. See OGAPS calendar for deadlines. **Approved by:** Advisory committee, department head or intercollegiate faculty chair, and OGAPS.

9 Successfully complete final examination. **When:** The Report of the Final Examination Form should be submitted to OGAPS within 10 days following the exam. **Approved by:** Advisory committee and OGAPS

10 Upload one approved final copy of the dissertation or record of study as a single pdf file (http://ogaps.tamu.edu) and submit a signed approval form to the Office of Graduate and Professional Studies. **When:** See OGAPS calendar for deadlines. **Approved by:** Advisory committee, department head or intercollegiate faculty chair, and Office of Graduate and Professional Studies.

11 Graduate; arrange for cap and gown. For more information, visit http://graduation.tamu.edu.

Note: Once formal coursework is complete, you must be continuously registered until all degree requirements have been met. See Continuous Registration Requirements (p. 25).

### Program Requirements

**Program Requirements**

- Student’s Advisory Committee (p. 1118)
- Degree Plan (p. 1119)
- Transfer of Credit (p. 1119)
- Research Proposal (p. 1119)
- Examinations (p. 1119)
  - Preliminary Examination (p. 1119)
  - Final Examination/Dissertation Defense (p. 1121)
- Dissertation (p. 1122)

### Student’s Advisory Committee

After receiving admission to graduate studies and enrolling, the student will consult with the head of his or her major or administrative department (or chair of the intercollegiate faculty) concerning appointment of the chair of the advisory committee. The student’s advisory committee will consist of no fewer than four members of the graduate faculty representative of the student’s several fields of study and research, where the chair or co-chair must be from the student’s department (or intercollegiate faculty, if applicable), and at least one or more of the members must have an appointment to a department other than the student’s major department. The outside member for a student in an interdisciplinary degree program must be from a department different from the chair of the student’s committee.

The chair, in consultation with the student, will select the remainder of the advisory committee. Only graduate faculty members located on Texas A&M University campuses may serve as chair of a student’s advisory committee. Other Texas A&M University graduate faculty members located off-campus may serve as a member or co-chair (but not chair), with a member as the chair.

If the chair of a student’s advisory committee voluntarily leaves the University and the student is near completion of the degree and wants the chair to continue to serve in this role, the student is responsible for securing a current member of the University Graduate Faculty, from the student’s academic program and located near the Texas A&M University campus site, to serve as the co-chair of the committee. The Department Head or Chair of Intercollegiate faculty may request in writing to the Associate Provost for Graduate and Professional Studies that a faculty member who is on an approved leave of absence or has voluntarily separated from the university, be allowed to continue to serve in the role of chair of a student’s advisory committee without a co-chair for us to one year. The students should be near completion of the degree. Extensions beyond the one year period can be granted with additional approval of the Dean.

The committee members’ signatures on the degree plan indicate their willingness to accept the responsibility for guiding and directing the entire academic program of the student and for initiating all academic actions concerning the student. Although individual committee members may be replaced by petition for valid reasons, a committee cannot resign en masse. The chair of the committee, who usually has immediate supervision of the student’s research and dissertation or record of study, has the responsibility for calling all meetings of the committee. The duties of the committee include responsibility for the proposed degree plan, the research proposal, the preliminary examination, the dissertation or record of study and the final examination. In addition, the committee, as a group and as individual members, is responsible for counseling the student on academic matters, and, in the case of academic deficiency, initiating recommendations to the Office of Graduate and Professional Studies.
Degree Plan

The student's advisory committee will evaluate the student's previous education and degree objectives. The committee, in consultation with the student, will develop a proposed degree plan and outline a research problem which, when completed, as indicated by the dissertation (or its equivalent for the degree of Doctor of Education or the degree of Doctor of Engineering), will constitute the basic requirements for the degree. The degree plan must be filed with the Office of Graduate and Professional Studies prior to the deadline imposed by the student's college and no later than 90 days prior to the preliminary examination.

This proposed degree plan should be submitted through the online Document Processing Submission System located on the website http://ogsdpps.tamu.edu. A minimum of 64 hours is required on the degree plan for the Doctor of Philosophy for a student who has completed a master's degree. A student who has completed a DDS/DMD, DVM or a MD at a U.S. institution is also required to complete a minimum of 64 hours. A student who has completed a baccalaureate degree but not a master's degree will be required to complete a 96-hour degree plan. Completion of a DDS/DMD, DVM or MD degree at a foreign institution requires completion of a minimum of 96 hours for the Doctor of Philosophy. A field of study may be primarily in one department or in a combination of departments. A degree plan must carry a reasonable amount of 691 or 5V98/5V99 (research).

Additional coursework may be added by petition to the approved degree plan by the student's advisory committee if it is deemed necessary to correct deficiencies in the student's academic preparation. No changes can be made to the degree plan once the student's Request for Final Examination is approved by the Office of Graduate and Professional Studies.

Approval to enroll in any professional course (900-level) should be obtained from the head of the department (or Chair of the intercollegiate faculty, if applicable) in which the course will be offered before including such a course on a degree plan.

No credit may be obtained by correspondence study, by extension or for any course of fewer than three weeks duration.

Transfer of Credit

Courses for which transfer credits are sought must have been completed with a grade of B or greater and must be approved by the student's advisory committee and the Office of Graduate and Professional Studies. These courses must not have been used previously for another degree. Except for officially approved cooperative doctoral programs, credit for thesis or dissertation research or the equivalent is not transferable. Credit for "internship" coursework in any form is not transferable. Courses taken in residence at an accredited U.S. institution or approved international institution with a final grade of B or greater will be considered for transfer credit if, at the time the courses were completed, the courses would be accepted for credit toward a similar degree for a student in degree-seeking status at the host institution. Credit for coursework taken by extension is not transferable. Coursework in which no formal grades are given or in which grades other than letter grades (A or B) are earned (for example, CR, P, S, U, H, etc.) is not accepted for transfer credit. Credit for coursework submitted for transfer from any college or university must be shown in semester credit hours, or equated to semester credit hours.

Courses used toward a degree at another institution may not be applied for graduate credit. If the course to be transferred was taken prior to the conferral of a degree at the transfer institution, a letter from the registrar at that institution stating that the course was not applied for credit toward the degree must be submitted to the Office of Graduate and Professional Studies.

Grades for courses completed at other institutions are not included in computing the GPR. An official transcript from the university at which transfer courses are taken must be sent directly to the Office of Admissions.

Research Proposal

The general field of research to be used for the dissertation should be agreed on by the student and the advisory committee at their first meeting, as a basis for selecting the proper courses to support the proposed research.

As soon thereafter as the research project can be outlined in reasonable detail, the dissertation research proposal should be completed. The research proposal should be approved at a meeting of the student's advisory committee, at which time the feasibility of the proposed research and the adequacy of available facilities should be reviewed. The approved proposal, signed by all members of the student's advisory committee, the head of the student's major department (or chair of the intercollegiate faculty, if applicable), must be submitted to the Office of Graduate and Professional Studies at least 20 working days prior to the submission of the Request for the Final Examination.

Compliance issues must be addressed if a graduate student is performing research involving human subjects, animals, infectious biohazards and recombinant DNA. A student involved in these types of research should check with the Office of Research Compliance and Biosafety at (979) 458-1467 to address questions about all research compliance responsibilities. Additional information can also be obtained on the website http://rcb.tamu.edu.

Examinations

Preliminary Examination

The student's major department (or chair of the intercollegiate faculty, if applicable) and his or her advisory committee may require qualifying, cumulative or other types of examinations at any time deemed desirable. These examinations are entirely at the discretion of the department and the student's advisory committee.

The preliminary examination is required. The preliminary examination for a doctoral student shall be given no earlier than a date at which the student is within 6 credit hours of completion of the formal coursework on the degree plan (i.e., all coursework on the degree plan except 681, 684, 690, 691, 5V98, 5V99 and 692 courses). The student is strongly encouraged to complete the Preliminary Examination no later than the end of the semester following the completion of the formal coursework on the degree plan. The Office of Graduate and Professional Studies must receive the results of the preliminary examination at least 14 weeks prior to the final examination date. The examination shall be oral and written unless otherwise recommended by the student's advisory committee and approved by the Office of Graduate and Professional Studies. The written part of the examination will cover all fields of study included in the student's degree plan. Each member of the advisory committee is responsible for administering a written examination in his or her particular field. Unless he or she chooses to waive participation in this part of the examination, two or more members of the advisory committee may give a joint written examination. One or more members may require a
student to take a departmental or intercollegiate faculty examination to supplement or replace a written examination. Each written examination must be completed and reported as satisfactory to the chair of the advisory committee before the oral portion of the examination may be held. In case any written examination is reported unsatisfactory, the entire advisory committee must agree (1) to proceed with the oral portion of the preliminary examination, or (2) to adopt another course of action regarding the unsatisfactory written examination.

Prior to scheduling the preliminary examination with the other committee members, the committee chair will review the eligibility criteria with the student, using the Preliminary Examination Checklist to ensure the student is ready for the examination. The following list of eligibility requirements applies.

- Student is registered at Texas A&M University for the semester or summer term during which any portion of the preliminary examination may fall. If the entire examination falls between semesters, then the student must be registered for the term immediately preceding the examination.
- An approved degree plan was on file with the Office of Graduate and Professional Studies at least 90 days prior to the first written examination.
- Student’s cumulative GPR is at least 3.000.
- Student’s degree plan GPR is at least 3.000.
- All English language proficiency requirements have been satisfied.
- All committee members have scheduled or waived the written portion and agreed to attend the oral portion of the examination or have found a substitute. Only one substitution is allowed and it cannot be for the committee chair.
- At the end of the semester in which the exam is given, there are no more than 6 hours of coursework remaining on the degree plan (except 681, 684, 690, 691, 5V98, 5V99 and 692). The head of the student’s department (or Chair of the Intercollegiate Faculty, if applicable) has the authority to approve a waiver of this criterion.
- The time span from the first written examination to the oral is no more than three weeks. (In cases of department-wide written examinations, this criterion is not applicable.) The head of the student’s department (or chair of the intercollegiate faculty, if applicable) has the authority to approve a waiver of this criterion.

Once all requirements are met, departments or intercollegiate faculty may announce the schedule of the written and oral parts of the examination.

Credit for the preliminary examination is not transferable. If a departmental or intercollegiate faculty examination is used as part of the written portion of the preliminary examination, it must be the last examination offered prior to the date scheduled for the preliminary examination. In the schedule of the written portion, all members of the student’s advisory committee are to be included.

Through the preliminary examination, the student’s advisory committee should satisfy itself that the student has demonstrated the following qualifications:

1. a mastery of the subject matter of all fields in the program;
2. an adequate knowledge of the literature in these fields and an ability to carry out bibliographical research.

In case a student is required to take, as a part of the written portion of a preliminary examination, an examination administered by a department or intercollegiate faculty, the department or intercollegiate faculty must:

1. offer the examination at least once every six months. The departmental or interdisciplinary degree program examination should be announced at least 30 days prior to the scheduled examination date.
2. assume the responsibility for marking the examination satisfactory or unsatisfactory, or otherwise graded, and in the case of unsatisfactory, stating specifically the reasons for such a mark.
3. forward the marked examination to the chair of the student’s advisory committee within one week after the examination.

The chair of the student’s advisory committee is responsible for making all written examinations available to the members of the advisory committee at or before the oral portion of the preliminary examination. A positive vote by all members of the graduate committee with at most one dissention is required to pass a student on his or her preliminary exam. A department or intercollegiate faculty can have a stricter requirement provided there is consistency within all degree programs within a department or an interdisciplinary degree program.

The chair of the advisory committee will promptly report the results of the Preliminary Examination to the Office of Graduate and Professional Studies, using the Report of Doctoral Preliminary Examination form and the Preliminary Examination checklist. Both forms must have the appropriate signatures. These forms should be submitted to the Office of Graduate and Professional Studies within 10 working days of the scheduled preliminary examination.

The Report of the Preliminary Examination form must be submitted with original signatures of the approved committee members. If an approved committee member substitution (1 only) has been made, his/her signature must also be included on the form submitted to the Office of Graduate and Professional Studies. The original signature of the department head is also required on the form.

After passing the required oral and written preliminary examinations for the doctoral degree, the student must complete the final examination for the degree within four calendar years. Otherwise, the student will be required to repeat the preliminary examination. Upon approval of the student’s advisory committee, with no more than one member dissenting, and approval of the Office of Graduate and Professional Studies, a student who has failed the preliminary examination may be given one re-examination. Adequate time must be given to permit the student to address the inadequacies emerging from the first examination (normally six months). The student and the advisory committee should jointly negotiate a mutually acceptable date for this purpose.

A student must be registered at Texas A&M University for a minimum of one semester credit hour in the semester or summer term in which they will take any portion of the Preliminary Examination.
### Steps for Completing the Preliminary Examination

<table>
<thead>
<tr>
<th>Step</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>Establish advisory committee. Submit a degree plan. <strong>When:</strong> Prior to the deadline set by the student’s college, and no later than 90 days prior to preliminary examination. <strong>Approved by:</strong> Advisory committee, department or intercollegiate faculty chair, and Office of Graduate and Professional Studies (OGAPS).</td>
</tr>
<tr>
<td>2</td>
<td>Complete English language proficiency requirements (if applicable), and coursework detailed on degree plan. <strong>When:</strong> Before preliminary examination.</td>
</tr>
<tr>
<td>3</td>
<td>Student and chair review eligibility requirements for the preliminary exam using the “Preliminary Examination Checklist”. <strong>When:</strong> Several weeks before the proposed date of the preliminary examination. Checklist must be signed by chair and department head, or intercollegiate faculty chair.</td>
</tr>
<tr>
<td>4</td>
<td>Student checks the availability of committee members. <strong>When:</strong> Several weeks before the proposed date of the preliminary examination.</td>
</tr>
<tr>
<td>5</td>
<td>Students prepares and submits any petitions found necessary by the review of the eligibility requirements. <strong>When:</strong> At least three weeks before the proposed date of the preliminary examinations. <strong>Approved by:</strong> Advisory committee, department head or intercollegiate faculty chair, and OGAPS.</td>
</tr>
<tr>
<td>6</td>
<td>When exam date is determined, the department may announce the schedule. <strong>Approved by:</strong> Committee chair, department head or intercollegiate faculty chair.</td>
</tr>
<tr>
<td>7</td>
<td>Chair submits the Report of the Preliminary Examination and the Preliminary Examination Checklist to OGAPS. <strong>When:</strong> Within 10 working days of the date of the scheduled oral examination and no later than 14 weeks prior to the final defense date. <strong>Approved by:</strong> Advisory committee.</td>
</tr>
<tr>
<td>8</td>
<td>Office of Graduate and Professional Studies notifies the student and chair of any actions necessary to rectify any deficiencies. <strong>When:</strong> Upon receipt of the report of the doctoral Preliminary Examination.</td>
</tr>
</tbody>
</table>

### Final Examination/Dissertation Defense

The candidate for the doctoral degree must pass a final examination by deadline dates announced in the “Office of Graduate and Professional Studies Calendar” each semester or summer term. The doctoral student is allowed only one opportunity to take the final examination. No student may be given a final examination unless his or her current official cumulative and degree plan GPAs are 3.000 or better and he or she has been admitted to candidacy. No unabsolved grades of D, F, or U for any course can be listed on the degree plan. To absolve a deficient grade, a student must repeat the course and achieve a grade of C or better. A student must have completed all coursework on his or her degree plan with the exception of 691, 5V98, or 5V99 (research) or 692 (Professional Study) hours. The student must be registered for all remaining hours; no hours remain to be taken on the degree plan. The preliminary examination results must have been submitted to the Office of Graduate and Professional Studies 14 weeks prior to the date of the defense. The research proposal must have been submitted to the Office of Graduate and Professional Studies 25 working days prior to the date of the final examination/defense. Any changes to the degree plan must be approved by the Office of Graduate and Professional Studies prior to the approval of the final examination. The request to hold and announce the final examination must be submitted to the Office of Graduate and Professional Studies a minimum of 10 working days in advance of the scheduled date. Examination/Defense results must be submitted to the Office of Graduate and Professional Studies within 10 working days of the scheduled examination/defense date. The **Office of Graduate and Professional Studies must be notified in writing of any cancellations.**

The student’s advisory committee will conduct this examination. The final examination is not to be administered until the dissertation or record of study is available in substantially final form to the student’s advisory committee, and all concerned have had adequate time to review the document. Additionally, all English Language Proficiency requirements must be satisfied prior to scheduling the examination. Whereas the final examination may cover the broad field of the candidate’s training, it is presumed that the major portion of the time will be devoted to the dissertation and closely allied topics. Persons other than members of the graduate faculty may, with mutual consent of the candidate and the chair of the advisory committee, be invited to attend a final examination for an advanced degree. A positive vote by all members of the graduate committee with at most one dissension is required to pass a student on his or her exam. A department can have a stricter requirement provided there is consistency within all degree programs within a department. Upon completion of the questioning of the candidate, all visitors must excuse themselves from the proceedings.

The advisory committee will submit its recommendations on the appropriate Report of the Final Examination for Doctoral Candidates form to the Office of Graduate and Professional Studies regarding acceptability of the candidate for the doctoral degree. A student must be registered in the University in the semester or summer term in which the final examination is taken.

The Report of the Final Examination Form must be submitted with original signatures of only the committee members approved by the Office of
Graduate and Professional Studies. If an approved committee member substitution (1 only) has been made, his/her signature must be included on the form submitted to the Office of Graduate and Professional Studies.

**Dissertation**

The ability to perform independent research must be demonstrated by the dissertation, which must be the original work of the candidate. Whereas acceptance of the dissertation is based primarily on its scholarly merit, it must also exhibit creditable literary workmanship. The format of the dissertation must be acceptable to the Office of Graduate and Professional Studies. Guidelines for the preparation of the thesis are available in the Thesis Manual, which is available online at http://ogaps.tamu.edu.

After successful defense and approval by the student’s advisory committee and the head of the student’s major department (or chair of the intercollegiate faculty, if applicable), a student must submit his/her dissertation in electronic format as a single PDF file. The PDF file must be uploaded to the website, http://ogaps.tamu.edu. Additionally, a signed approval form must be brought or mailed to the Office of Graduate and Professional Studies. Both the PDF file and the signed approval form are required by the deadline.

Deadline dates for submitting are announced each semester or summer term in the Office of Graduate and Professional Studies Calendar (see Time Limit statement). These dates also can be accessed via the website http://ogaps.tamu.edu.

Before a student can be “cleared” by Thesis and Dissertation Services, a processing fee must be paid through Student Business Services. This processing fee is for the thesis/dissertation services provided. After commencement, dissertations are digitally stored and made available through the Texas A&M Libraries.

A dissertation that is deemed unacceptable by the Office of Graduate and Professional Studies because of excessive corrections will be returned to the student’s department head or chair of the intercollegiate faculty. The manuscript must be resubmitted as a new document, and the entire review process must begin anew. All original submittal deadlines must be met during the resubmittal process in order to graduate.

**Additional Requirements**

**Additional Requirements**

- Residence (p. 1122)
- Time Limit (p. 1122)
- Continuous Registration (p. 1122)
- Admission to Candidacy (p. 1122)
- Languages (p. 1123)
- 99-Hour Cap on Doctoral Degree (p. 1123)
- Application for Degree (p. 1123)

**Residence**

A student who enters the doctoral degree program with a baccalaureate degree must spend one academic year plus one semester in resident study at Texas A&M University. A student who holds master’s degree when he/she enters doctoral degree program must spend one academic year in resident study. One academic year may include two adjacent regular semesters or one regular semester and one adjacent 10-week summer semester. The third semester is not required to be adjacent to the one year. Enrollment for each semester must be a minimum of 9 credit hours each to satisfy the residence requirement.

To satisfy the residence requirement, the student must complete a minimum of 9 credit hours per semester or 10-week summer semester in resident study at Texas A&M University for the required period. A student who enters a doctoral degree program with a baccalaureate degree may fulfill residence requirements in excess of one academic year (18 credit hours) by registration during summer sessions or by completion of a less-than-full course load (in this context a full course load is considered 9 credit hours per semester).

Students who are employed full-time while completing their degree may fulfill total residence requirements by completion of less-than-full time course loads each semester. In order to be considered for this, the student is required to submit a Petition for Waivers and Exceptions along with verification of his/her employment to the Office of Graduate and Professional Studies. An employee should submit verification of his/her employment at the time he/she submits the degree plan. See Registration. (p. 25)

See Residence Requirements (p. 22).

**Time Limit**

All requirements for doctoral degrees must be completed within a period of ten consecutive calendar years for the degree to be granted. A course will be considered valid until 10 years after the end of the semester in which it is taken. Graduate credit for coursework more than ten calendar years old at the time of the final oral examination may not be used to satisfy degree requirements.

After passing the required preliminary oral and written examinations for a doctoral degree, the student must complete the final examination within four calendar years. Otherwise, the student will be required to repeat the preliminary examination.

A final corrected version of the dissertation or record of study in electronic format as a single PDF file must be cleared by the Office of Graduate and Professional Studies no later than one year after the final examination or within the 10-year time limit, whichever occurs first. Failure to do so will result in the degree not being awarded.

**Continuous Registration**

A student in a program leading to a Doctor of Philosophy who has completed all coursework on his/her degree plan other than 691, 5V98 or 5V99 (research) are required to be in continuous registration until all requirements for the degree have been completed. See Continuous Registration Requirements (p. 25).

**Admission to Candidacy**

To be admitted to candidacy for a doctoral degree, a student must have:

1. completed all formal coursework on the degree plan with the exception of any remaining 681, 684, 690 and 691, or 5V98 and 5V99,
2. a 3.0 Graduate GPA and a Degree Plan GPA of at least 3.0 with no grade lower than C in any course on the degree plan,
3. passed the preliminary examination (written and oral portions),
4. submitted an approved dissertation proposal,
5. met the residence requirements. The final examination will not be authorized for any doctoral student who has not been admitted to candidacy.

Languages

A student is required to possess a competent command of English. For English language proficiency requirements, see the Admissions section of this catalog. The doctoral (PhD) foreign language requirement at Texas A&M University is a departmental option, to be administered and monitored by the individual departments of academic instruction.

99-Hour Cap on Doctoral Degrees

In Texas, public colleges and universities are funded by the state according to the number of students enrolled. In accordance with legislation passed by the Texas Legislature, the number of hours for which state universities may receive subvention funding at the doctoral rate for any individual is limited to 99 hours. Texas A&M University and other universities will not receive subvention for hours in excess of the limit.

Institutions of higher education are allowed to charge the equivalent of nonresident tuition to a resident doctoral student who has enrolled in 100 or more semester credit hours of doctoral coursework.

A doctoral student at Texas A&M has seven years to complete his/her degree before being charged out-of-state tuition. A doctoral student who, after seven years of study, has accumulated 100 or more doctoral hours will be charged tuition at a rate equivalent to out-of-state tuition. Please note that the tuition increases will apply to Texas residents as well as students from other states and countries who currently are charged tuition at the resident rate. This includes those doctoral students who hold GAT, GANT, and GAR appointments of 20 or more hours and recipients of competitive fellowships who receive more than $1,000 per semester. Doctoral students who, after seven years of study, have not accumulated 100 hours are eligible to pay in-state tuition if otherwise eligible.

For count purposes, a year is counted as three semesters, normally fall, spring and summer. Using this system, a student is allowed 21 semesters to complete 130 semester credit hours of doctoral coursework. The hour limit for these majors is 130 doctoral hours.

The following majors are exempt from the 99-Hour Cap on Doctoral Degrees:

- Biomedical Sciences
- Biochemistry
- Microbiology
- Genetics
- Toxicology
- Nutrition Sciences
- Community Clinical Psychology
- Counseling Psychology
- School Psychology
- Veterinary Pathology
- Clinical Psychology
- Counseling Psychology
- Medical Sciences
- Health Services Research
- Health Promotion and Community Health Sciences
- Epidemiology and Environmental Health

The Doctor of Medicine (MD) degree requires a minimum of four years of study. The focus of the medical curriculum is to prepare students for supervised medical practice through clinical integration of material throughout all four years of study. Students in the pre-clerkship portion of the curriculum (approximately 18 months) do not take separate courses in the traditional basic science disciplines of gross anatomy, biochemistry, genetics, physiology, histology, microbiology, immunology, pharmacology, pathology, and neuroscience. Rather, such content is appropriately organized into integrated blocks of instruction (3 to 19 weeks in duration depending upon the theme of the block). Students in the clerkship portion of the curriculum (approximately 30 months) rotate on clinical service in required clerkships (internal medicine, surgery, psychiatry, pediatrics, obstetrics/gynecology, family medicine, emergency medicine, critical care medicine, an acting internship, and neurology/neurosciences) and also have opportunities for rotations in elective clerkships and areas of interest. Grades are issued for individual blocks and clerkships on an honors/pass/fail basis. Students are required to take and pass and/or achieve a minimum score on National Board of Medical Examiners (NBME) customized comprehensive exams and subject exams at various points in the program.

The ethical and social aspects of medical practice receive special emphasis in the Humanities, Ethics, Altruism and Leadership (HEAL) courses, which provide lecture, discussion and small group case studies that focus on the humanistic concerns of the ethics of modern medicine.

During the third and fourth years, students receive clinical training in a variety of inpatient and outpatient settings associated with our main clinical teaching campuses located in Bryan/College Station (Family Medicine Residency, the College Station Medischy:cal Center, Baylor Scott & White Health and St. Joseph Regional Health Center), Dallas (Baylor Scott & White Health, Cook Children's Medical Center, and Timberlawn Mental Health System), Houston (Houston Methodist Hospital), Round Rock (Lone Star Circle of Care, Baylor Scott & White Health, and various facilities within St David's Healthcare and Seton Healthcare, including Dell Children's and the Austin State Hospital), and Temple (Baylor Scott & White Health and the Central Texas Veterans Health Care System, as well as nearby Carl R. Darnall Army Medical Center at Ft. Hood). Third-year clerkships in Internal Medicine, Surgery, Family Medicine, Psychiatry, Pediatrics and Obstetrics/Gynecology are required. Fourth-year clerkships in Emergency Medicine, Critical Care Medicine, an acting internship, and neurology/neurosciences are required. A wide variety of elective clinical experiences are available in the fourth year. Some third year rotations and many fourth year rotations can be completed at alternate locations around the state (e.g. Pediatrics at Driscoll Children's Hospital in Corpus Christi). Students may also design custom learning experiences for fourth-year electives or participate in offerings at other medical colleges on a limited basis.

Policies and Regulations
College of Medicine (COM) Student Handbook is published on the COM website under the Office of Student Affairs. This handbook is the official statement of rules and regulations that govern student conduct and student activities at the COM. A copy is available in the Office of Student Affairs on the Bryan/College Station campus. The handbook can also be viewed online on the following site: http://medicine.tamhsc.edu/student-affairs/docs/handbook.pdf.

**Professionalism**

Students entering a formal medical education program are expected to uphold and adhere to the ethical and behavioral standards of the profession of medicine. The development and maintenance of a professional attitude is an ongoing responsibility of each student. Evaluation of professional behavior is an integral part of the curriculum and will be a factor in assigning grades and determining promotion, retention or dismissal.

**College of Medicine Admission Information** (p. 35)

**Program Requirements**

**The Degree of Doctor of Medicine Core Curriculum**

The curriculum provides the basic science and clinical foundations that will prepare medical students for supervised medical practice in residency and beyond.

**Years One and Two**

The first 18 months of the curriculum (pre-clerkship portion) focus on the fundamentals of biomedical science and consist of two components, Foundations and Organ Systems.

**Pre-Clerkship Phase**

Students start the first year of medical school with the Foundations blocks, which continue through mid-April of the first calendar year. Foundations blocks emphasize the basic structure of the human body and basic principles of other medical science disciplines, i.e., gross anatomy, histology, basic principles of biochemistry, genetics, pharmacology, and cell physiology. Foundations blocks also include Neuroscience and Introduction to Disease, which cover basic pathophysiology, immunology, and bacteriology. In the addition to the instruction of these basic medical sciences, students take integrated courses which cover medical humanities, ethics, leadership, and other important professional development topics, as well as the Introduction to Clinical Skills course, which includes patient history-taking and doctor-patient communication skills and physical diagnosis. Further, students are introduced to Evidence-Based Medicine key principles, Scholarly Work foundations and Research principles.

By mid-April of the first calendar year, students transition into the Organ Systems blocks, which conclude the following winter. The Organ Systems blocks cover normal function, pathophysiology and disease-related aspects of the specific organ systems including the basic therapeutic approach to disease. The disciplines covered in Organ Systems blocks include organ-based physiology, organ system/disease-related biochemistry and genetics, pathology, microbiology, immunology, pharmacology, introductory pediatrics and introductory internal medicine. Students take a summer break after two Organ Systems blocks have been delivered, and this break provides opportunities to explore scholarly activities, service learning, and other educational activities. Throughout the Organ Systems blocks, students continue to build skills in Evidence-Based Medicine, Scholarly Work and Research principles.

**Pre-Clerkship (Foundations)**

**Blocks/Courses**

- Foundations of Medicine I
- Foundations of Medicine II
- Medical Gross Anatomy
- Neuroscience
- Introduction to Disease
- Humanities, Ethics, Altruism and Leadership (HEAL) I & II
- Evidence Based Medicine/Scholarship and Research I & II
- Introduction to Clinical Skills I & II

**Pre-Clerkship (Organ Systems)**

**Blocks/Courses**

- Hematology/Oncology Gastrointestinal/Metabolism/Nutrition
- Cardiovascular
- Renal/Genitourinary Respiratory
- Endocrinology/Reproductive Science
- Integument/Musculoskeletal
- Humanities, Ethics, Altruism and Leadership (HEAL) III
- Evidence Based Medicine / Scholarship & Research III
- Introduction to Clinical Skills Preceptorship

**Years Three and Four**

The Clerkship portion of the curriculum follows delivery of the Organ Systems blocks, begins in January of the second year of medical school and extends until graduation. During this 30-month period, students rotate on clinical service in required clerkships (internal medicine, surgery, psychiatry, pediatrics, obstetrics/gynecology, family medicine, emergency medicine, critical care medicine, an acting internship, and neurology/neurosciences) and also have opportunities for rotations in elective clerkships and areas of interest. During this time, students receive clinical training in several different patient care venues and locations, including private-practice, academic, and governmental institutions in Austin, Bryan-College Station, Corpus Christi, Dallas, Houston, Round Rock and Temple. Opportunities for rotations in other regions and states exist, as do opportunities for global medical mission work and service learning.

**Clerkship Phase (Phase III)**

**Phase III Clerkships/Courses**

**Required Clerkships:**

- Family Medicine (6 weeks)
- Internal Medicine (12 weeks)
- Obstetrics and Gynecology (6 weeks)
- Pediatrics (6 weeks)
- Psychiatry (6 weeks)
- Surgery (12 weeks)

**Required Course:**

- Principles of Radiology
Clerkship Phase (Phase IV)

Phase IV Rotations/Electives

Required Rotations/Courses:

- Acting Internship in Primary Care Medicine (4 weeks)
- Critical Care Medicine (4 weeks)
- Emergency Medicine (4 weeks)
- Alcohol and Drug Dependence Treatment Program (2 weeks)
- Becoming a Physician IV (2 weeks)

Electives:

- Fourth-year electives are offered on all COM campuses. Students may choose from pre-determined electives, design custom learning experiences, or participate in offerings at other medical colleges on a limited basis.

Requirements for Graduation for MD Degree

COM grants the MD degree after the completion of the four-year program to those students who have attained a grade of at least a “Pass” in the courses and clerkships in the medical curriculum, and who have satisfactorily demonstrated to the faculty the personal and professional qualities essential to the practice of medicine. In addition, passing scores on the USMLE Step 1 and USMLE Step 2-Clinical Knowledge exams must be obtained. Students are expected to complete requirements for the MD degree within six (6) years, not counting time on leave of absence or in pursuit of advanced degrees, e.g. an MD/PhD.

COM students who qualify for the MD degree and who attain a GPA of 3.50 or above in their professional medical curricula, are awarded a degree “With Honors.” Students who enter the curriculum with advanced standing are not eligible to be named honor graduates.

Commencement for COM students who have earned the MD degree takes place at the end of the spring semester.

Education for Healthcare Professionals - Certificate

The Certificate in Education for Healthcare Professionals is a 14 credit hour program for students who want to expand their knowledge of teaching and curriculum development. The Certificate program can be an intermediary step within the EDHP program and can be applied to the Master’s degree. The overarching goals of the Certificate in EDHP are to prepare students to: teach in a variety of settings with an interdisciplinary team; incorporate theory and practice in the development and implementation of education offerings in diverse settings and populations; integrate collective teaching strategies and delivery systems for today’s new learning environment; and effectively evaluate student performance with the necessary tools and strategies in clinical and/or classroom settings. The learning outcomes for students who complete the Certificate in EDHP require that students will: analyze educational pedagogies for a population of learners; apply best practices of curriculum development and evaluation methods in teaching environments; develop expertise in varied instructional methodologies; incorporate an interdisciplinary perspective into an educator role; and integrate the role of educator into current practice.

Program Requirements

Certificate Program Goals and Outcomes

The overarching goals of the Certificate in EDHP are to prepare students to:

- Teach in a variety of settings with an interdisciplinary team. Incorporate theory and practice in the development and implementation of educational offerings in diverse settings and populations.
- Integrate collective teaching strategies and delivery systems for today’s new learning environment.
- Effectively evaluate student performance with the necessary tools and strategies in clinical and/or classroom settings.
- Develop their skills as a new faculty member.

The learning outcomes for students who complete the Certificate in EDHP require that students will:

- Analyze educational pedagogies for a population of learners.
- Apply best practices of curriculum development and evaluation methods in teaching environments.
- Develop expertise in varied instructional methodologies.
- Incorporate an interdisciplinary perspective into an educator role.
- Integrate the role of educator into current practice.

EDHP 500 Teaching and Learning Theory 3
EDHP 501/ NURS 501 Curriculum Design 3
EDHP 502/ NURS 502 Assessment and Evaluation in Education 3
EDHP 503/ NURS 503 Teaching Strategies 3
EDHP 504 Teaching Practicum 1-2

For other specific program requirements regarding the EDHP certificate please review the EDHP website: http://medicine.tamhsc.edu/edhp.

College of Nursing

https://nursing.tamhsc.edu

Administrative Officers

Dean - Sharon A. Wilkerson, Ph.D., RN, CNE, ANEF
Associate Dean for Student Affairs - Kathryn W. Cochran, M.S.N., RN
Associate Dean for Finance and Administration - Shirley A. Ellison, M.B.A.
Assistant Dean for Research & Evidence Based Practice - Kevin Gosselin, Ph.D., M.Ed., M.S., B.A.
Assistant Dean for Academic Studies - Cathy E. Hansen, M.S.N., RN, CNE
Associate Dean for Academic Affairs - Debra W. Matthews, Ph.D., RN
Director of Nursing Education, Round Rock Campus - Robin L. Page, Ph.D., RN, CNM
About the College of Nursing

The College of Nursing is committed to addressing the critical nursing shortage across Texas by producing exceptionally prepared nurses and advanced nursing research. We are devoted to creating and implementing the most effective educational experience with cutting-edge classroom technologies and simulated experiences that include standardized patients and virtual clinical learning activities.

As leaders, our graduates are taught to question traditional methods and continually seek the best practices based on relevant clinical research. Through community service and leadership opportunities, the TAMHSC-College of Nursing fosters a sense of social responsibility and global citizenship. Likewise, we are developing research innovations to enhance the education and preparation of nurses, improving the delivery of patient care across an eclectic array of populations, and translating research evidence into practice.

The Degree of Master of Science in Nursing

Admission to the Master of Science in Nursing (MSN) program requires the student to have graduated with a Bachelor of Science in Nursing degree from an institution of higher education that is both accredited by the appropriate regional accrediting agency and either NLNAC or CCNE. The student must have an active, unencumbered Registered Nurse license to practice in the state of Texas (or show active licensure by the end of the first semester). The College does not require an entrance exam for admission to the MSN program.

The College of Nursing offers two (2) tracks leading to the MSN: Nursing Education and Family Nurse Practitioner. The Master of Science in Nursing (MSN) Education is a professional degree program which prepares the graduate to apply principles of education in the role of educator in various patient care settings and in institutions of higher education. The graduate develops expertise in the teaching of nursing students, patients, consumers and other individuals.

The Master of Science in Nursing (MSN) Family Nurse Practitioner program of study prepares students as advanced practice nurses for community-oriented primary care. Upon completion, graduates are eligible to sit for national certification examinations and to apply for approval to practice as FNP in Texas. Students will be expected to travel to campus for clinical or class activities approximately once per semester. Students will be responsible for obtaining their own preceptors.

Masters

- Master of Science in Nursing in Family Nurse Practitioner (p. 1126)
- Master of Science in Nursing in Nursing Education (p. 1130)

Master of Science in Nursing in Family Nurse Practitioner

The Master of Science (MS) curriculum is designed to develop new understanding through research and creativity. Students have the option to pursue a thesis or non-thesis Master of Science degree.

Steps to Fulfill Master’s Degree Requirements

1. Meet with departmental graduate advisor to plan course of study for first semester. When: Before first semester registration. Approved by: Graduate advisor or chair of the intercollegiate faculty.

2. Establish advisory committee. Submit a degree plan. When: Prior to the deadline imposed by the student's college and no later than 90 days prior to final oral or thesis defense. Approved by: Advisory committee, department head or chair of the intercollegiate faculty, and Office of Graduate and Professional Studies (OGAPS).

3. If thesis is required, submit thesis proposal to the Office of Graduate and Professional Studies. When: At least 20 working days prior to the submission of the Request for the Final Examination. Approved by: Advisory committee, department head or chair of the intercollegiate faculty and OGAPS.

4. Apply for degree; pay graduation fee. When: During the first week of the final semester, see OGAPS calendar.

5. Check to be sure degree program and advisory committee are up to date and all ELP requirements (if applicable) and coursework are complete. When: Well before submitting request to schedule final examination.

6. Complete residence requirement. When: If applicable, before or during final semester. Approved by: OGAPS.

7. Submit request to schedule final examination. When: Must be received by OGAPS at least 10 working days before exam date. See OGAPS calendar for deadlines. Approved by: Advisory committee, department head or chair of the intercollegiate faculty, and OGAPS.
Successfully complete final examination. When: The Report of the Final Examination Form should be submitted to OGAPS within 10 days following the exam. Approved by: Advisory committee and OGAPS.

If required, upload one approved final copy of thesis as a single PDF file (http://ogaps.tamu.edu) and submit signed approval form to the Office of Graduate and Professional Studies. When: See OGAPS calendar for deadlines. Approved by: Advisory committee, department head or chair of the intercollegiate faculty and OGAPS.

Graduation; arrange for cap and gown. For more information, visit http://graduation.tamu.edu.

The online Document Processing Submission System is located on the website https://ogsdpss.tamu.edu.

Complete the application for degree form via the student’s Howdy portal.

Program Requirements

Program Requirements

- Student’s Advisory Committee (p. 1127)
- Degree Plan (p. 1127)
- Credit Requirements (p. 1128)
- Transfer of Credit (p. 1128)
- Limitations on the Use of Transfer, Extension and Certain Other Courses (p. 1128)
- Thesis Option (p. 1128)
  - Thesis Proposal (p. 1129)
  - Final Examination (p. 1129)
- Non-Thesis Option (p. 1129)

Student’s Advisory Committee

After receiving admission to graduate studies and enrolling for coursework, the student will consult with the head of his or her major or administrative department (or intercollegiate faculty, if applicable) concerning appointment of the chair of his or her advisory committee. With the exception of the Mays Business School non-thesis option, the Master of Science in Economics with a concentration in financial economics or financial econometrics, the Master of Science with a major in Educational Human Resource Development, HRD option, and the Master of Science in Nursing with a major in Nursing Education, the student’s advisory committee for the master’s degree will consist of no fewer than three members of the graduate faculty, representative of the student’s fields of study and research. The chair or the co-chair of the advisory committee must be from the student’s major department (or intercollegiate faculty, if applicable), and at least one or more of the members must have an appointment to a department other than the student’s major department. The outside member for students in an interdisciplinary program must have an appointment to a department different from the chair of the student’s committee.

The chair, in consultation with the student, will select the remainder of the advisory committee. The student will interview each prospective committee member to determine whether he or she is willing to serve. Only graduate faculty members located on Texas A&M University campuses may serve as chair of a student’s advisory committee. Other graduate faculty members located off campus may serve as a member or co-chair (but not chair) with a member as the chair. The chair of the committee, who usually has immediate supervision of the student’s research and thesis, has the responsibility for calling required meetings of the committee and for calling meetings at any other time considered desirable.

If the chair of a student’s advisory committee voluntarily leaves the University and the student is near completion of the degree and wants the chair to continue to serve in this role, the student is responsible for securing a current member of the University Graduate Faculty, from the student’s academic program and located near the Texas A&M University campus site, to serve as the co-chair of the committee. The Department Head or Chair of Intercollegiate faculty may request in writing to the Associate Provost for Graduate and Professional Studies that a faculty member who is on an approved leave of absence or has voluntarily separated from the university, be allowed to continue to serve in the role of chair of a student’s advisory committee without a co-chair for us to one year. The students should be near completion of the degree. Extensions beyond the one year period can be granted with additional approval of the Dean.

If the chair of the student’s advisory committee is unavailable for an extended time in any academic period during which the student is involved in activities relating to an internship, thesis or professional paper, and is registered for courses such as 5V98, 5V99, 684, 691, 692 or 693, the student may request, in writing, that the department head appoint an alternate advisory committee chair during the interim period.

The duties of the committee include responsibility for the proposed degree plan, the research proposal, the thesis and the final examination. In addition, the committee as a group and as individual members are responsible for advising the student on academic matters, and, in the case of academic deficiency, initiating recommendations to the Office of Graduate and Professional Studies.

The committee members’ approval on the degree plan indicate their willingness to accept the responsibility for guiding and directing the entire academic program of the student and for initiating all academic actions concerning the student. Although individual committee members may be replaced by petition for valid reasons, a committee cannot resign en masse.

Degree Plan

The student’s advisory committee, in consultation with the student, will develop the proposed degree plan. The degree plan must be completed and filed with the Office of Graduate and Professional Studies prior to the deadline imposed by the student’s college or interdisciplinary degree program, if applicable, and no later than 90 days prior to the date of the final oral examination or thesis defense.

A student should submit the degree plan using the online Document Processing Submission System (http://ogsdpss.tamu.edu).
A student submitting a proposed degree plan for a Master of Science degree should designate on the official degree plan the appropriate program option.

Additional coursework may be added to the approved degree plan by petition if it is deemed necessary by the advisory committee to correct deficiencies in the student’s academic preparation. No changes can be made to the degree plan once the student’s Request for Final Examination or Request for Final Examination Exemption is approved by the Office of Graduate and Professional Studies.

Credit Requirement

A minimum of 32 semester credit hours of approved courses and research is required for the thesis option Master of Science degree with the exception of the Master of Science in Visualization, which requires 48 hours and Master of Science in Athletic Training, which requires 60 hours. A minimum of 36 semester credit hours of approved coursework is required for the Non-Thesis Option.

Ordinarily the student will devote the major portion of his or her time to work in one or two closely related fields. Other work will be in supporting fields of interest.

Transfer of Credit

A student who has earned 12 hours of graduate credit in residence at Texas A&M University may be authorized to transfer courses in excess of the limits prescribed below upon the advice of the advisory committee and with the approval of the Office of Graduate and Professional Studies. Courses taken in residence at an accredited U.S. institution or approved international institution with a final grade of B or greater may be considered for transfer credit if, at the time the courses were completed, the courses would be accepted for credit toward a similar degree for a student in degree-seeking status at the host institution. Otherwise, the limitations stated in the following section apply. Coursework in which no formal grades are given or in which grades other than letter grades (A or B) are earned (for example, CR, P, S, U, H, etc.) is not accepted for transfer credit. Courses appearing on the degree plan with grades of D, F or U may not be absolved by transfer work. Credit for thesis research or the equivalent is not transferable. Credit for coursework submitted for transfer from any college or university must be shown in semester credit hours or equated to semester credit hours. An official transcript from the university at which the transfer coursework was taken must be sent directly to the Office of Admissions.

Courses used toward a degree at another institution may not be applied for graduate credit. If the course to be transferred was taken prior to the conferral of a degree at the transfer institution, a letter from the registrar at that institution stating that the course was not applied for credit toward the degree must be submitted to the Office of Graduate and Professional Studies.

Grades for courses completed at other institutions are not included in computing the GPR.

Limitations on the Use of Transfer, Extension and Certain Other Courses

Some departments may have more restrictive requirements for transfer work. If otherwise acceptable, certain courses may be used toward meeting credit-hour requirements for the master’s degree under the following limitations.

1. The maximum number of credit hours which may be considered for transfer credit is the greater of 12 hours or one-third (1/3) of the total hours of a degree plan. The following restrictions apply:
   • Graduate and/or upper-level undergraduate courses taken in residence at an accredited U.S. institution, or approved international institution with a final grade of B or greater will be considered for transfer credit if, at the time the courses were completed, the student was in degree-seeking status at Texas A&M University, or the student was in degree-seeking status at the institution at which the courses were taken; and if the courses would be accepted for credit toward a similar degree for a student in degree-seeking status at the host institution.
   • Courses previously used for another degree are not acceptable for degree plan credit.

2. The maximum number of credit hours taken in post-baccalaureate non-degree (G6) classification at Texas A&M University which may be considered for application to the degree plan is 12.

3. Not more than 12 hours may be used in any combination of the following categories:
   • Not more than 8 hours in the combination of 5V98, 5V99, and 691 (research) or 684 (Professional Internship) may be used.
   • Not more than 8 hours of 685 (Directed Studies) may be used.
   • Not more than 3 hours of 690 (Theory of Research) may be used.
   • Not more than 3 hours of 695 (Frontiers in Research) may be used.

4. A maximum of 2 hours of Seminar (681).

5. A maximum of 9 hours of advanced undergraduate courses (300- or 400-level).

6. For graduate courses of three weeks’ duration or less, taken at other institutions, up to 1 hour of credit may be obtained for each five-day week of coursework. Each week of coursework must include at least 15 contact hours.

7. Continuing education courses may not be used for graduate credit.

8. Extension courses are not acceptable for credit.

9. For the Degree of Master of Science in Medical Science, students with a first professional degree (MD, DDS or DVM) may take up to 20 hours of 691 (research). For the remaining hours, a maximum of 2 hours can be Seminar (681) and a maximum of 3 hours can be Directed Studies (685).

Exceptions will be permitted only in unusual cases and when petitioned by the student’s advisory committee and approved by the Office of Graduate and Professional Studies.

Thesis Option

An acceptable thesis is required for the Master of Science degree for a student who selects the thesis option program. The finished work must reflect a comprehensive understanding of the pertinent literature and express in clear English, the problem(s) for study, the method, significance and results of the student’s original research. Guidelines for the preparation of the thesis are available in the Thesis Manual, which is available online at the Office of Graduate and Professional Studies website.

After successful defense (or exemption) and approval by the student’s advisory committee and the head of the student’s major department (or chair of the intercollegiate faculty, if appropriate), the student must submit his/her thesis in electronic format as a single PDF file. The PDF file must be uploaded to the Office of Graduate and Professional Studies website.
Additionally, a signed approval form must be brought or mailed to the Office of Graduate and Professional Studies. The PDF file and the signed approval form are required by the deadline.

Deadline dates for submitting the thesis are announced each semester or summer term in the “Office of Graduate and Professional Studies Calendar” (see Time Limit statement). These dates also can be accessed via the Office of Graduate and Professional Studies website.

Before a student can be “cleared” by Thesis and Dissertation Services, a processing fee must be paid through Student Business Services. This processing fee is for the thesis/dissertation services provided. After commencement, dissertations are digitally stored and made available through the Texas A&M Libraries.

A thesis that is deemed unacceptable by the Office of Graduate and Professional Studies because of excessive corrections will be returned to the student’s department head (or chair of the intercollegiate faculty, if applicable). The manuscript must be resubmitted as a new document, and the entire review process must begin again. All original submittal deadlines must be met during the resubmittal process to graduate that semester.

Thesis Proposal

For the thesis option Master of Science degree, the student must prepare a thesis proposal for approval by the advisory committee and the head of the major department or chair of the interdisciplinary faculty, if applicable. This proposal must be submitted to the Office of Graduate and Professional Studies at least 20 working days prior to the submission of the request for the final examination.

Compliance issues must be addressed if a graduate student is performing research involving human subjects, animals, infectious biohazards and recombinant DNA. A student involved in these types of research should check with the Office of Research Compliance and Biosafety at (979) 458-1467 to address questions about all research compliance responsibilities. Additional information can also be obtained on the Office of Research Compliance and Biosafety website.

Thesis Defense/Final Examination

A student must pass a final examination by dates announced each semester or summer term in the Office of Graduate and Professional Studies Calendar. The Office of Graduate and Professional Studies must be notified in writing of any cancellation. To be eligible to take the final examination, a student’s GPR must be at least 3.000 for courses on the degree plan and for all courses completed at Texas A&M which are eligible to be applied to a graduate degree, and there must be no unabsolved grades of D, F or U for any course listed on the degree plan. To absolve a deficient grade, the student must repeat the course at Texas A&M University and achieve a grade of C or better. All coursework on the degree plan must have been completed with the exception of those hours for which the student is registered. Additionally, all English Language Proficiency requirements must be satisfied prior to scheduling the examination. If applicable, an approved thesis proposal must be on file in the Office of Graduate and Professional Studies according to published deadlines.

A request to hold and announce the final examination must be submitted to the Office of Graduate and Professional Studies a minimum of 10 working days in advance of the scheduled date for the examination. Examinations which are not completed and reported as satisfactory to the Office of Graduate and Professional Studies within 10 working days of the scheduled examination date will be recorded as failures. A student may be given only one opportunity to repeat the final examination for the master’s degree and that must be within a time period that does not extend beyond the end of the next regular semester (summer terms are excluded).

For thesis option students, the final examination covers the thesis and all work taken on the degree plan and at the option of the committee may be written or oral or both. The final examination may not be administered before the thesis is available to all members of the student’s advisory committee in substantially final form, and all members have had adequate time to review the document. The examination is conducted by the student’s advisory committee as finally constituted. A thesis option student must be registered in the University in the semester or summer term in which the final examination is taken. Persons other than members of the graduate faculty may, with mutual consent of the candidate and the major professor, attend final examinations for advanced degrees. Upon completion of the questioning of the candidate, all visitors must excuse themselves from the proceedings. A positive vote by all members of the graduate committee with at most one dissension is required to pass a student on his or her exam. A department, or interdisciplinary degree program, may have a stricter requirement provided there is consistency within all degree programs within a department or interdisciplinary degree program.

A thesis option candidate may petition to be exempt from his/her final examination provided his/her degree plan GPR is 3.500 or greater and he/she has the approval of the advisory committee, the head of the student’s major department, or intercollegiate chair, if appropriate, and the Office of Graduate and Professional Studies. It is required that the petition for exemption be submitted the same semester the student intends to submit the thesis.

For non-thesis option students, a final comprehensive examination is required. The Master of Science in Educational Human Resource Development, HRD option, the Master of Science in Nursing with a major in Nursing Education, the Master of Science Program in the Mays Business School and the Master of Science in Economics with a concentration in financial economics or financial econometrics do not have final examination requirements. Otherwise, exemptions from final examinations are not allowed. The final exam cannot be held prior to the mid point of the final semester if questions on the exam are based on courses in which the student is currently enrolled. If a student has completed all required degree plan coursework, the student is not required to be registered for classes in the semester the final examination is administered (unless he/she holds an assistantship).

Exam results must be submitted with original signatures of only the committee members approved by the Office of Graduate and Professional Studies. If an approved committee member substitution (1 only) has been made, his/her signature must also be submitted to the Office of Graduate and Professional Studies.

Non-Thesis Option

For the non-thesis option, a thesis is not required. A final comprehensive examination is required for all non-thesis Master of Science programs except the Master of Science programs offered by the Mays Business School, the Master of Science in Economics with a concentration in financial economics or financial econometrics, the Master of Science with a major in Educational Human Resource Development, HRD option, and the Master of Science in Nursing with a major in Nursing Education. No exemptions are allowed. The requirements as to level of courses and examinations are the same as for the thesis option Master of Science
degree. The final examination cannot be held prior to the mid point of the final semester if questions on the examination are based on courses in which the student is currently enrolled.

A student pursuing the non-thesis option is not allowed to enroll in 5V98, 5V99, or 691 (research) for any reason and 691 may not be used for credit toward a non-thesis option Master of Science degree. A maximum of 4 credit hours of 684 (Professional Internship), 8 credit hours of 685 (Directed Studies), and up to 3 credit hours of 690 (Theory of Research) or 695 (Frontiers in Research) may be used toward the non-thesis option Master of Science degree. In addition, any combination of 684, 685, 690 and 695 may not exceed 25 percent of the total credit hour requirement shown on the individual degree plan. All requirements for the non-thesis option Master of Science degree other than those specified above are the same as for the thesis option degree.

**Additional Requirements**

**Additional Requirements**

- **Residence (p. 1130)**
- **Continuous Registration (p. 1130)**
- **Time Limit (p. 1130)**
- **Foreign Languages (p. 1130)**
- **Application for Degree (p. 1130)**

**Residence**

In partial fulfillment of the residence requirement for the degree of Master of Science, the student must complete 9 resident credit hours during one regular semester or one 10-week summer semester in resident study at Texas A&M University. Upon recommendation of the student’s advisory committee, department head or Chair of the Interdisciplinary Program, if appropriate, and with approval of the Office of Graduate and Professional Studies, a student may be granted exemption from this requirement. Such a petition, however, must be approved prior to the student’s registration for the final 9 credit hours of required coursework.

Students who are employed full-time while completing their degree may fulfill total residence requirements by completion of less-than-full time course loads each semester. In order to be considered for this, the student is required to submit a Petition for Waivers and Exceptions along with verification of his/her employment to the Office of Graduate and Professional Studies.

See Residence Requirements (p. 22).

**Continuous Registration**

A student in the thesis option of the Master of Science program who has completed all coursework on his/her degree plan other than 5V98, 5V99, and 691 (research) is required to be in continuous registration until all requirements for the degree have been completed. See Continuous Registration Requirements (p. 25).

**Time Limit**

All degree requirements must be completed within a period of seven consecutive years for the degree to be granted. A course will be considered valid until seven years after the end of the semester in which it is taken. Graduate credit for coursework which is more than seven calendar years old at the time of the final examination (oral or written) may not be used to satisfy degree requirements.

A student who has chosen the thesis option must have the final corrected version of the thesis cleared by the Office of Graduate and Professional Studies no later than one year after the final examination, or approval of a petition for exemption from the Office of Graduate and Professional Studies no later than one year after the final examination, or approval of a petition for exemption from the Office of Graduate and Professional Studies no later than one year after the final examination, or approval of a petition for exemption from the Office of Graduate and Professional Studies.

**Foreign Languages**

No specific language requirement exists for the Master of Science degree.

**Application for Degree**

For information on applying for your degree, please visit the Graduation Application for Degree (p. 24) section.

**Master of Science in Nursing in Nursing Education**

The Master of Science (MS) curriculum is designed to develop new understanding through research and creativity. Students have the option to pursue a thesis or non-thesis Master of Science degree.

**Steps to Fulfill Master's Degree Requirements**

1. Meet with departmental graduate advisor to plan course of study for first semester. **When:** Before first semester registration. **Approved by:** Graduate advisor or chair of the intercollegiate faculty.

2. Establish advisory committee. Submit a degree plan. **When:** Prior to the deadline imposed by the student's college and no later than 90 days prior to final oral or thesis defense. **Approved by:** Advisory committee, department head or chair of the intercollegiate faculty, and Office of Graduate and Professional Studies (OGAPS).

3. If thesis is required, submit thesis proposal to the Office of Graduate and Professional Studies. **When:** At least 20 working days prior to the submission of the Request for the Final Examination. **Approved by:** Advisory committee, department head or chair of the intercollegiate faculty and OGAPS.

4. Apply for degree; pay graduation fee. **When:** During the first week of the final semester, see OGAPS calendar.
Check to be sure degree program and advisory committee are up to date and all ELP requirements (if applicable) and coursework are complete. When: Well before submitting request to schedule final examination.

Complete residence requirement. When: If applicable, before or during final semester. Approved by: OGAPS.

Submit request to schedule final examination. When: Must be received by OGAPS at least 10 working days before exam date. See OGAPS calendar for deadlines. Approved by: Advisory committee, department head or chair of the intercollegiate faculty, and OGAPS.

Successfully complete final examination. When: The Report of the Final Examination Form should be submitted to OGAPS within 10 days following the exam. Approved by: Advisory committee and OGAPS.

Student’s Advisory Committee

After receiving admission to graduate studies and enrolling for coursework, the student will consult with the head of his or her major or administrative department (or intercollegiate faculty, if applicable) concerning appointment of the chair of his or her advisory committee. With the exception of the Mays Business School non-thesis option, the Master of Science in Economics with a concentration in financial economics or financial econometrics, the Master of Science with a major in Educational Human Resource Development, HRD option, and the Master of Science in Nursing with a major in Nursing Education, the student’s advisory committee for the master’s degree will consist of no fewer than three members of the graduate faculty, representative of the student’s fields of study and research. The chair or the co-chair of the advisory committee must be from the student’s major department (or intercollegiate faculty, if applicable), and at least one or more of the members must have an appointment to a department other than the student’s major department. The outside member for students in an interdisciplinary program must have an appointment to a department different from the chair of the student’s committee.

The chair, in consultation with the student, will select the remainder of the advisory committee. The student will interview each prospective committee member to determine whether he or she is willing to serve. Only graduate faculty members located on Texas A&M University campuses may serve as chair of a student’s advisory committee. Other graduate faculty members located off campus may serve as a member or co-chair (but not chair) with a member as the chair. The chair of the committee, who usually has immediate supervision of the student’s research and thesis, has the responsibility for calling required meetings of the committee and for calling meetings at any other time considered desirable.

If the chair of a student’s advisory committee voluntarily leaves the University and the student is near completion of the degree and wants the chair to continue to serve in this role, the student is responsible for securing a current member of the University Graduate Faculty, from the student’s academic program and located near the Texas A&M University campus site, to serve as the co-chair of the committee. The Department Head or Chair of Intercollegiate faculty may request in writing to the Associate Provost for Graduate and Professional Studies that a faculty member who is on an approved leave of absence or has voluntarily separated from the university, be allowed to continue to serve in the role of chair of a student’s advisory committee without a co-chair for us to one year. The students should be near completion of the degree. Extensions beyond the one year period can be granted with additional approval of the Dean.

If the chair of the student’s advisory committee is unavailable for an extended time in any academic period during which the student is involved in activities relating to an internship, thesis or professional paper, and is registered for courses such as 5V98, 5V99, 684, 691, 692 or 693, the student may request, in writing, that the department head appoint an alternate advisory committee chair during the interim period.

The duties of the committee include responsibility for the proposed degree plan, the research proposal, the thesis and the final examination. In addition, the committee as a group and as individual members are responsible for advising the student on academic matters, and, in the
The committee members’ approval on the degree plan indicate their willingness to accept the responsibility for guiding and directing the entire academic program of the student and for initiating all academic actions concerning the student. Although individual committee members may be replaced by petition for valid reasons, a committee cannot resign en masse.

Degree Plan

The student’s advisory committee, in consultation with the student, will develop the proposed degree plan. The degree plan must be completed and filed with the Office of Graduate and Professional Studies prior to the deadline imposed by the student’s college or interdisciplinary degree program, if applicable, and no later than 90 days prior to the date of the final oral examination or thesis defense.

A student should submit the degree plan using the online Document Processing Submission System (http://ogsdpss.tamu.edu).

A student submitting a proposed degree plan for a Master of Science degree should designate on the official degree plan the appropriate program option.

Additional coursework may be added to the approved degree plan by petition if it is deemed necessary by the advisory committee to correct deficiencies in the student’s academic preparation. No changes can be made to the degree plan once the student’s Request for Final Examination or Request for Final Examination Exemption is approved by the Office of Graduate and Professional Studies.

Credit Requirement

A minimum of 32 semester credit hours of approved courses and research is required for the thesis option Master of Science degree with the exception of the Master of Science in Visualization, which requires 48 hours and Master of Science in Athletic Training, which requires 60 hours. A minimum of 36 semester credit hours of approved coursework is required for the Non-Thesis Option.

Ordinarily the student will devote the major portion of his or her time to work in one or two closely related fields. Other work will be in supporting fields of interest.

Transfer of Credit

A student who has earned 12 hours of graduate credit in residence at Texas A&M University may be authorized to transfer courses in excess of the limits prescribed below upon the advice of the advisory committee and with the approval of the Office of Graduate and Professional Studies. Courses taken in residence at an accredited U.S. institution or approved international institution with a final grade of B or greater may be considered for transfer credit if, at the time the courses were completed, the courses would be accepted for credit toward a similar degree for a student in degree-seeking status at the host institution. Otherwise, the limitations stated in the following section apply. Coursework in which no formal grades are given or in which grades other than letter grades (A or B) are earned (for example, CR, P, S, U, H, etc.) is not accepted for transfer credit. Courses appearing on the degree plan with grades of D, F or U may not be absolved by transfer work. Credit for thesis research or the equivalent is not transferable. Credit for coursework submitted for transfer from any college or university must be shown in semester credit hours or equated to semester credit hours. An official transcript from the university at which the transfer coursework was taken must be sent directly to the Office of Admissions.

Courses used toward a degree at another institution may not be applied for graduate credit. If the course to be transferred was taken prior to the conferral of a degree at the transfer institution, a letter from the registrar at that institution stating that the course was not applied for credit toward the degree must be submitted to the Office of Graduate and Professional Studies.

Grades for courses completed at other institutions are not included in computing the GPR.

Limitations on the Use of Transfer, Extension and Certain Other Courses

Some departments may have more restrictive requirements for transfer work. If otherwise acceptable, certain courses may be used toward meeting credit-hour requirements for the master’s degree under the following limitations.

1. The maximum number of credit hours which may be considered for transfer credit is the greater of 12 hours or one-third (1/3) of the total hours of a degree plan. The following restrictions apply:
   • Graduate and/or upper-level undergraduate courses taken in residence at an accredited U.S. institution, or approved international institution with a final grade of B or greater will be considered for transfer credit if, at the time the courses were completed, the student was in degree-seeking status at Texas A&M University, or the student was in degree-seeking status at the institution at which the courses were taken; and if the courses would be accepted for credit toward a similar degree for a student in degree-seeking status at the host institution.
   • Courses previously used for another degree are not acceptable for degree plan credit.

2. The maximum number of credit hours taken in post-baccalaureate non-degree (G6) classification at Texas A&M University which may be considered for application to the degree plan is 12.

3. Not more than 12 hours may be used in any combination of the following categories:
   • Not more than 8 hours in the combination of 5V98, 5V99, and 691 (research) or 684 (Professional Internship) may be used.
   • Not more than 8 hours of 685 (Directed Studies) may be used.
   • Not more than 3 hours of 690 (Theory of Research) may be used.
   • Not more than 3 hours of 695 (Frontiers in Research) may be used.

4. A maximum of 2 hours of Seminar (681).

5. A maximum of 9 hours of advanced undergraduate courses (300- or 400-level).

6. For graduate courses of three weeks’ duration or less, taken at other institutions, up to 1 hour of credit may be obtained for each five-day week of coursework. Each week of coursework must include at least 15 contact hours.

7. Continuing education courses may not be used for graduate credit.

8. Extension courses are not acceptable for credit.

9. For the Degree of Master of Science in Medical Science, students with a first professional degree (MD, DDS or DVM) may take up to 20 hours of 691 (research). For the remaining hours, a maximum
Exceptions will be permitted only in unusual cases and when petitioned by the student’s advisory committee and approved by the Office of Graduate and Professional Studies.

**Thesis Option**

An acceptable thesis is required for the Master of Science degree for a student who selects the thesis option program. The finished work must reflect a comprehensive understanding of the pertinent literature and express in clear English, the problem(s) for study, the method, significance and results of the student’s original research. Guidelines for the preparation of the thesis are available in the Thesis Manual, which is available online at the Office of Graduate and Professional Studies website.

After successful defense (or exemption) and approval by the student’s advisory committee and the head of the student’s major department (or chair of the intercollegiate faculty, if applicable), the student must submit his/her thesis in electronic format as a single PDF file. The PDF file must be uploaded to the Office of Graduate and Professional Studies website. Additionally, a signed approval form must be brought or mailed to the Office of Graduate and Professional Studies. The PDF file and the signed approval form are required by the deadline.

Deadline dates for submitting the thesis are announced each semester or summer term in the “Office of Graduate and Professional Studies Calendar” (see Time Limit statement). These dates also can be accessed via the Office of Graduate and Professional Studies website.

Before a student can be “cleared” by Thesis and Dissertation Services, a processing fee must be paid through Student Business Services. This processing fee is for the thesis/dissertation services provided. After commencement, dissertations are digitally stored and made available through the Texas A&M Libraries.

A thesis that is deemed unacceptable by the Office of Graduate and Professional Studies because of excessive corrections will be returned to the student’s department head (or chair of the intercollegiate faculty, if applicable). The manuscript must be resubmitted as a new document, and the entire review process must begin again. All original submittal deadlines must be met during the resubmittal process to graduate that semester.

**Thesis Proposal**

For the thesis option Master of Science degree, the student must prepare a thesis proposal for approval by the advisory committee and the head of the major department or chair of the interdisciplinary faculty, if applicable. This proposal must be submitted to the Office of Graduate and Professional Studies at least 20 working days prior to the submission of the request for the final examination.

Compliance issues must be addressed if a graduate student is performing research involving human subjects, animals, infectious biohazards and recombinant DNA. A student involved in these types of research should check with the Office of Research Compliance and Biosafety at (979) 458-1467 to address questions about all research compliance responsibilities. Additional information can also be obtained on the Office of Research Compliance and Biosafety website.

**Thesis Defense/Final Examination**

A student must pass a final examination by dates announced each semester or summer term in the Office of Graduate and Professional Studies Calendar. The Office of Graduate and Professional Studies must be notified in writing of any cancellation. To be eligible to take the final examination, a student’s GPR must be at least 3.000 for courses on the degree plan and for all courses completed at Texas A&M which are eligible to be applied to a graduate degree, and there must be no unabsolved grades of D, F or U for any course listed on the degree plan. To absolve a deficient grade, the student must repeat the course at Texas A&M University and achieve a grade of C or better. All coursework on the degree plan must have been completed with the exception of those hours for which the student is registered. Additionally, all English Language Proficiency requirements must be satisfied prior to scheduling the examination. If applicable, an approved thesis proposal must be on file in the Office of Graduate and Professional Studies according to published deadlines.

A request to hold and announce the final examination must be submitted to the Office of Graduate and Professional Studies a minimum of 10 working days in advance of the scheduled date for the examination. Examinations which are not completed and reported as satisfactory to the Office of Graduate and Professional Studies within 10 working days of the scheduled examination date will be recorded as failures. A student may be given only one opportunity to repeat the final examination for the master’s degree and that must be within a time period that does not extend beyond the end of the next regular semester (summer terms are excluded).

For thesis option students, the final examination covers the thesis and all work taken on the degree plan and at the option of the committee may be written or oral or both. The final examination may not be administered before the thesis is available to all members of the student’s advisory committee in substantially final form, and all members have had adequate time to review the document. The examination is conducted by the student’s advisory committee as finally constituted. A thesis option student must be registered in the University in the semester or summer term in which the final examination is taken. Persons other than members of the graduate faculty may, with mutual consent of the candidate and the major professor, attend final examinations for advanced degrees. Upon completion of the questioning of the candidate, all visitors must excuse themselves from the proceedings. A positive vote by all members of the graduate committee with at most one dissension is required to pass a student on his or her exam. A department, or interdisciplinary degree program, may have a stricter requirement provided there is consistency within all degree programs within a department or interdisciplinary degree program.

A thesis option candidate may petition to be exempt from his/her final examination provided his/her degree plan GPR is 3.500 or greater and he/she has the approval of the advisory committee, the head of the student’s major department, or intercollegiate chair, if appropriate, and the Office of Graduate and Professional Studies. It is required that the petition for exemption be submitted the same semester the student intends to submit the thesis.

For non-thesis option students, a final comprehensive examination is required. The Master of Science in Educational Human Resource Development, HRD option, the Master of Science in Nursing with a major in Nursing Education, the Master of Science Program in the Mays Business School and the Master of Science in Economics with a concentration in financial economics or financial econometrics do not have final examination requirements. Otherwise, exemptions from final
examinations are not allowed. The final exam cannot be held prior to the mid point of the final semester if questions on the exam are based on courses in which the student is currently enrolled. If a student has completed all required degree plan coursework, the student is not required to be registered for classes in the semester the final examination is administered (unless he/she holds an assistantship).

Exam results must be submitted with original signatures of only the committee members approved by the Office of Graduate and Professional Studies. If an approved committee member substitution (1 only) has been made, his/her signature must also be submitted to the Office of Graduate and Professional Studies.

Non-Thesis Option

For the non-thesis option, a thesis is not required. A final comprehensive examination is required for all non-thesis Master of Science programs except the Master of Science programs offered by the Mays Business School, the Master of Science in Economics with a concentration in financial economics or financial econometrics, the Master of Science with a major in Educational Human Resource Development, HRD option, and the Master of Science in Nursing with a major in Nursing Education. No exemptions are allowed. The requirements as to level of courses and examinations are the same as for the thesis option Master of Science degree. The final examination cannot be held prior to the mid point of the final semester if questions on the examination are based on courses in which the student is currently enrolled.

A student pursuing the non-thesis option is not allowed to enroll in 5V98, 5V99, or 691 (research) for any reason and 691 may not be used for credit toward a non-thesis option Master of Science degree. A maximum of 4 credit hours of 684 (Professional Internship), 8 credit hours of 685 (Directed Studies), and up to 3 credit hours of 690 (Theory of Research) or 695 (Frontiers in Research) may be used toward the non-thesis option Master of Science degree. In addition, any combination of 684, 685, 690 and 695 may not exceed 25 percent of the total credit hour requirement shown on the individual degree plan. All requirements for the non-thesis option Master of Science degree other than those specified above are the same as for the thesis option degree.

Additional Requirements

Residence

In partial fulfillment of the residence requirement for the degree of Master of Science, the student must complete 9 resident credit hours during one regular semester or one 10-week summer semester in resident study at Texas A&M University. Upon recommendation of the student’s advisory committee, department head or Chair of the Interdisciplinary Program, if appropriate, and with approval of the Office of Graduate and Professional Studies, a student may be granted exemption from this requirement. Such a petition, however, must be approved prior to the student’s registration for the final 9 credit hours of required coursework.

Students who are employed full-time while completing their degree may fulfill total residence requirements by completion of less-than-full time course loads each semester. In order to be considered for this, the student is required to submit a Petition for Waivers and Exceptions along with verification of his/her employment to the Office of Graduate and Professional Studies.

See Residence Requirements (p. 22).

Continuous Registration

A student in the thesis option of the Master of Science program who has completed all coursework on his/her degree plan other than 5V98, 5V99, and 691 (research) is required to be in continuous registration until all requirements for the degree have been completed. See Continuous Registration Requirements (p. 25).

Time Limit

All degree requirements must be completed within a period of seven consecutive years for the degree to be granted. A course will be considered valid until seven years after the end of the semester in which it is taken. Graduate credit for coursework which is more than seven calendar years old at the time of the final examination (oral or written) may not be used to satisfy degree requirements.

A student who has chosen the thesis option must have the final corrected version of the thesis cleared by the Office of Graduate and Professional Studies no later than one year after the final examination, or approval of a petition for exemption from the final exam, or within the seven-year time limit, whichever occurs first. Failure to do so will result in the degree not being awarded.

Foreign Languages

No specific language requirement exists for the Master of Science degree.

Application for Degree

For information on applying for your degree, please visit the Graduation Application for Degree (p. 24) section.

Irma Lerma Rangel College of Pharmacy

Administrative Officers

Founding Dean - Indra K. Reddy, Ph.D.
Assistant Dean for Finance and Administration - Mr. Ramey A. Benfield
Assistant Dean for Experiential Education - Gary L. Frech, M.B.A., M.S., R.Ph.
Associate Dean for Academic Affairs - Steven L. Peterson, Ph.D.
Assistant Dean for Student Affairs - Gregory Sawyer, Ph.D.

About the College of Pharmacy

The Irma Lerma Rangel College of Pharmacy offers a Doctor of Pharmacy (Pharm. D.) degree program. The primary goal of the program is to provide a comprehensive pharmacy education in a stimulating environment to prepare students for the practice of pharmacy as competent, caring,
ethical professionals dedicated to the provision of optimal pharmaceutical care.

Students enrolled in this program are exposed to a core professional curriculum that includes coursework in the biomedical sciences; pharmaceutical sciences; social, behavioral and administrative pharmacy sciences; and pharmacy practice. The curriculum consists of 146 semester credit hours (SCH) and is organized so that students progress from didactic and laboratory coursework in pharmaceutical and clinical sciences to summative experiential rotations. This total includes 103 SCH of the core curriculum (required courses), six SCH of elective courses, 37 SCH of experiential education (hands-on clinical experiences) and one SCH of capstone. The fourth year focuses on Advanced Pharmacy Practice Experiences where students apply and further develop the knowledge and skills gained during the first three years of the program.

Only those students who are admitted into the Irma Lerma Rangel College of Pharmacy may enroll in courses. All pre-pharmacy coursework must be completed prior to the beginning of the first professional year (P1). Advancement to subsequent professional years (P2, P3 and P4) is determined by successful completion of all designated prerequisites and all prescribed coursework for that year. Students with unsatisfactory academic performance may not progress to the next year, may be required to remediate deficiencies, or repeat the year in which the deficiencies occurred.

Courses that comprise the core curriculum include both required and elective coursework and are described below.

Curricular Changes
The Irma Lerma Rangel College of Pharmacy program is subject to ongoing evaluation as mandated by the Accreditation Council for Pharmacy Education (ACPE). The Accreditation/Self-Study Committee follows the Guidelines for Self-Study from ACPE. It should be noted that these guidelines call for ongoing assessment rather than point-in-time assessment of program elements. This committee reports to the dean, who is responsible for taking action on the findings and recommendations of the committee. Proposals for curricular modification emanating from these self-study processes are carefully deliberated by the entire faculty. While the curriculum and program of study detailed within this document were accurate at the time of publication, the college reserves the right to make modifications without advance notice.

Course Credits
The learning format of the class governs the number of Semester Credit Hours (SCH) a particular course is given. The following guidelines were used to make these determinations:

- Didactic Courses: 1 x 50 minutes = 1 Semester Credit Hour
- Seminar Courses: 2 x 50 minutes = 1 Semester Credit Hour
- Laboratory Courses: 3-4 x 50 minutes = 1 Semester Credit Hour
- Recitation Courses: 3-4 x 50 minutes = 1 Semester Credit Hour (e.g., case studies)

* Experiential Courses: 8¹ x 50 minutes = 1 Semester Credit Hour

¹ For experiential courses, semester credit hours assigned are described in the course syllabus and typically 8 or more 50 minute sessions equals 1 semester credit hour.

**Total Semester Credit Hours**: 146

**Course Credits**

The learning format of the class governs the number of Semester Credit Hours (SCH) a particular course is given. The following guidelines were used to make these determinations:

- Didactic Courses: $1 \times 50 \text{ minutes} = 1 \text{ Semester Credit Hour}$
- Seminar Courses: $2 \times 50 \text{ minutes} = 1 \text{ Semester Credit Hour}$
- Laboratory Courses: $3-4 \times 50 \text{ minutes} = 1 \text{ Semester Credit Hour}$
- Recitation Courses: $3-4 \times 50 \text{ minutes} = 1 \text{ Semester Credit Hour}$ (e.g., case studies)

* Experiential Courses: $8 \times 50 \text{ minutes} = 1 \text{ Semester Credit Hour}$

For experiential courses, semester credit hours assigned are described in the course syllabus and typically 8 or more 50 minute sessions equals 1 semester credit hour.

**Requirements for Graduation**

A candidate for the Doctor of Pharmacy (Pharm. D.) degree must meet all of the following requirements to be eligible to graduate:

- Satisfactorily meeting all requirements for admission
- Satisfactorily complete all curriculum requirements including:
have received the prestigious designations of Regents Professors and two Distinguished Professors. Further, the research and practice links established by the faculty provide an extensive diversity of opportunities for students to work closely with professionals in applied public health settings.

Location

The School of Public Health’s administration and faculty are located in a state-of-the-art, three-building complex in College Station, on the Texas A&M University west campus. The nearly 100,000-square-foot complex includes classrooms fully equipped with videoconferencing technology to support the school’s innovative distance education programs that reach across the breadth of the state. The laboratory building provides a venue for the school’s internationally regarded toxicology group to engage in exemplary public health work and provides a vehicle for training tomorrow’s researchers. The administration building houses the administration and faculty. In addition, the school operates on-going regional instructional and research programs at the McAllen campus.

• Public Health Certificate (p. 1164)

Master of Science in Public Health in Biostatistics

The Master of Science in Public Health (MSPH) is considered an equivalent professional public health master’s degree and requires additional coursework in research methods and statistics. Students can choose among the variety of multi-disciplinary public health options to navigate their public health interest.

The degree is offered in all core disciplines of public health: epidemiology, biostatistics, environmental health, occupational safety and health, and health promotion and community health sciences. The MSPH is a thesis degree program that has culminating experiences as part of the degree requirements. Students will also participate in a practicum demonstrating overall public health problem solving skills.

An individual with a baccalaureate degree may apply for admission to the program. No coursework prerequisites exist for making a successful application to this degree program.

Program Requirements

Program Requirements
• Student’s Advisory Committee (p. 1138)
• Degree Plan (p. 1138)
• Credit Requirement (p. 1138)
• Transfer of Credit (p. 1138)
• Limitations on the Use of Transfer, Extension and Certain Other Courses (p. 1139)
• Thesis (p. 1139)
  • Thesis Proposal (p. 1139)
  • Final Examination (p. 1139)

Student’s Advisory Committee

After receiving admission to graduate studies and enrolling, the student will consult with the head of his or her department concerning appointment of the chair of the advisory committee. The student’s advisory committee for the Master of Science degree will consist of no fewer than three graduate faculty representatives of the student’s fields of study and research. The committee chair or one of the co-chairs must be a member of Graduate Faculty in the student’s department.

Committee members must be comprised of at least one principal faculty member within SPH but external to the relevant department(s), all voting members must be members of the graduate faculty. The chair, in consultation with the student, will select the remainder of the advisory committee. The committee composition must be approved by the relevant department head.

If the chair of a student’s advisory committee voluntarily leaves the University and the student is near completion of the degree and wants the chair to continue to serve in this role, the student is responsible for securing a current member of the University Graduate Faculty, from the student’s academic program and located near the Texas A&M University campus site, to serve as the co-chair of the committee. The Department Head or Chair of Intercollegiate faculty may request in writing to the Associate Provost for Graduate and Professional Studies that a faculty member who is on an approved leave of absence or has voluntarily separated from the university, be allowed to continue to serve in the role of chair of a student’s advisory committee without a co-chair for us to one year. The students should be near completion of the degree. Extensions beyond the one year period can be granted with additional approval of the Dean.

The committee members’ signatures on the degree plan indicate their willingness to accept the responsibility for guiding and directing the entire academic program of the student and for initiating all academic actions concerning the student. Although individual committee members can be replaced by petition for valid reasons, a committee cannot resign en masse. The chair of the committee, who usually has immediate supervision of the student’s research and dissertation or record of study, has the responsibility for calling all meetings of the committee. The duties of the committee include responsibility for the proposed degree plan, the research proposal, guidance and supervision of the thesis study/research and the final examination. In addition, the committee, as a group and as individual members, is responsible for counseling the student on academic matters and, in the case of academic deficiency, initiating recommendations to the Office of Graduate and Professional Studies.

Degree Plan

The student’s advisor, in consultation with the student, will develop the proposed degree plan. The final degree plan must be completed and filed with the Office of Graduate and Professional Studies prior to the deadlines imposed by the student’s college, and no later than 90 days prior to the date of the final oral examination.

The proposed/final degree plan should be submitted through the online Document Processing Submission System located on the website https://ogsdppss.tamu.edu.

Additional coursework may be added to the approved degree plan by petition if it is deemed necessary by the advisor to correct deficiencies in the student’s academic preparation. No changes can be made to the degree plan once the student’s Request for Final Examination or Request for Final Examination Exemption is approved by the Office of Graduate and Professional Studies.

Credit Requirement

A minimum of 45 hours of coursework is required for the MSPH degree. To demonstrate integration and application of subject matter learned and the development of written and oral communication skills, a student will be required to produce a thesis and participate in a Practicum. Concentration and elective courses vary among the core disciplines and will be addressed during advising and creation of the degree plan. Electives may be taken upon approval/advice from the student’s assigned advisor and will be listed by rubric, section, and description in the degree plan.

Transfer of Credit

A student may transfer up to 9 hours of graduate credit to the MSPH degree program on the advice and approval of the student’s advisory committee, department Chair, and school Academic Affairs Dean, and with the approval of the Office of Graduate and Professional Studies. Courses taken in residence at an accredited U.S. institution or
approved international institution with a final grade of B or greater may be considered for transfer credit if, at the time the courses were completed, the courses would be accepted for credit toward a similar degree for a student in degree-seeking status at the host institution. Otherwise, the limitations stated in the preceding section apply. **Coursework in which no formal grades are given or in which grades other than letter grades (A or B) are earned (for example, CR, P, S, U, H, etc.) is not accepted for transfer credit.** Courses appearing on the degree plan with grades of D, F, or U may not be absolved by transfer work. Credit for coursework submitted for transfer from any college or university must be shown in semester credit hours or equated to semester credit hours. An official transcript from the university at which the transfer coursework was taken must be sent directly to the Office of Admissions.

Courses used toward another degree at another institution may not be applied for graduate credit. If the course to be transferred was taken prior to the conferral of a degree at the transfer institution, a letter from the registrar at that institution stating that the course was not applied for credit toward the degree must be submitted to the Office of Graduate and Professional Studies.

Grades for courses completed at other institutions are not included in computing the GPR.

**Limitations on the Use of Transfer, Extensions, and Certain Other Courses**

If otherwise acceptable, certain courses may be used toward meeting credit-hour requirements for the master’s degree with the following limitations.

1. The maximum number of credit hours allowed toward the MSPH as transfer credit is 9.
2. Courses previously used for another degree are not acceptable for credit.
3. A maximum of 3 hours of 684 (Professional Internship/Practicum), and 9 hours of 685 (Directed Studies), if approved on the degree plan.
4. Undergraduate courses are not allowed to transfer to the MSPH degree program.
5. Continuing education courses may not be used for graduate credit.
6. Extension courses are not acceptable for credit.

Exceptions will be permitted only in unusual cases and when petitioned by the student’s advisor, department Chair, school Academic Affairs Office, and approved by the Office of Graduate and Professional Studies.

**Thesis**

An acceptable thesis is required for the Master of Science in Public Health degree. The finished work must reflect a comprehensive understanding of the pertinent literature and express in clear English, the problem(s) for study, the method, significance and results of the student’s original research. Guidelines for the preparation of the thesis are available in the Thesis Manual, which is available online at http://ogaps.tamu.edu.

After successful defense (or exemption) and approval by the student’s advisory committee and the head of the student’s department, the student must submit his/her thesis in electronic format as a single PDF file. The PDF file must be uploaded to the website, http://ogaps.tamu.edu. Additionally, a signed approval form must be brought or mailed to the Office of Graduate and Professional Studies. The PDF file and the signed approval form are required by the deadline.

Deadline dates for submitting the thesis are announced each semester or summer term in the Office of Graduate and Professional Studies Calendar (see Time Limit statement). These dates also can be accessed via the website https://ogsdpss.tamu.edu.

Before a student can be “cleared” by Thesis and Dissertation Services, a processing fee must be paid through Student Business Services. This processing fee is for the thesis/dissertation services provided. After commencement, dissertations are digitally stored and made available through the Texas A&M Libraries.

A thesis that is deemed unacceptable by the Office of Graduate and Professional Studies because of excessive corrections will be returned to the student’s department head. The manuscript must be resubmitted as a new document, and the entire review process must begin again. All submittal deadlines must be met during the resubmittal process to graduate that semester.

**Thesis Proposal**

The student must prepare a thesis proposal for approval by the student’s advisory committee and the head of the major department or chair of the intercollegiate faculty, if applicable. This proposal must be submitted to the Office of Graduate and Professional Studies at least 20 working days prior to the submission of the request for the final examination.

Compliance issues must be addressed if a graduate student is performing research involving human subjects, animals, infectious biohazards and recombinant DNA. A student involved in these types of research should check with the Office of Research Compliance and Biosafety at (979) 458-1467 to address questions about all research compliance responsibilities. Additional information can be also obtained on the website http://rcb.tamu.edu.

**Thesis Defense/Final Examination**

A student must pass a final examination by dates announced each semester or summer term in the Office of Graduate and Professional Studies Calendar. The Office of Graduate and Professional Studies must be notified in writing of any cancellation. To be eligible to take the final examination, a student’s GPR must be at least 3.00 for courses on the degree plan and for all courses completed at Texas A&M which are eligible to be applied to a graduate degree, and there must be no unabsolved grades of D, F, or U for any course listed on the degree plan. To absolve a deficient grade, the student must repeat the course at Texas A&M University and achieve a grade of C or better. All coursework on the degree plan must have been completed with the exception of those hours for which the student is registered. Additionally, all English Language Proficiency requirements must be satisfied prior to scheduling the examination. If applicable, an approved thesis proposal must be on file in the Office of Graduate and Professional Studies according to published deadlines.

A request to hold and announce the final examination must be submitted to the Office of Graduate and Professional Studies a minimum of 10 working days in advance of the scheduled date for the examination. Examinations which are not completed and reported as satisfactory to the Office of Graduate and Professional Studies within 10 working days of the scheduled examination will be recorded as failures. A student may be given only one opportunity to repeat the final examination for the master’s degree and that must be within a time period that does not extend beyond the end of the next regular semester (summer terms are excluded).
For thesis students, the final examination covers the thesis and all work taken on the degree plan and at the option of the committee may be written or oral or both. The final examination may not be administered before the thesis is available to all members of the student’s advisory committee in substantially final form, and all members have had adequate time to review the document. The examination is conducted by the student’s advisory committee as finally constituted. A thesis option student must be registered in the University in the semester or summer term in which the final examination is taken. Persons other than members of the graduate faculty may, with mutual consent of the candidate and the major professor, attend final examinations for advanced degrees. Upon completion of the questioning of the candidate, all visitors must excuse themselves from the proceedings. A positive vote by all members of the graduate advisory committee with at most one dissension is required to pass a student on his or her exam. A department, or interdisciplinary degree program, may have a stricter requirement provided there is consistency within all degree programs within a department or interdisciplinary program.

A thesis candidate may petition to be exempt from his/her final examination provided his/her degree plan GPR is 3.50 or greater and he/she has the approval of the advisory committee, the head of the student’s department, the Associate Dean for Academic Affairs, and Office of Graduate and Professional Studies. It is required that the petition for exemption be submitted the same semester the student submits the thesis.

**Additional Requirements**

**Additional Requirements**

- Residence (p. 1140)
- Time Limit (p. 1140)
- Scholastic Requirements (p. 1140)
- Foreign Languages (p. 1140)
- Internship or Practicum (p. 1140)
- Application for Degree (p. 1140)

**Residence**

No residence requirement exists; however, attention is directed to the rules regarding Limitations on the Use of Transfer, Extension and Certain Other Courses.

**Time Limit**

All degree requirements must be completed within a period of seven consecutive years for the degree to be granted. A course will be valid until seven years after the end of the semester in which it was taken. Graduate credit for coursework which is more than seven calendar years old at the time of the final examination (oral or written) may not be used to satisfy degree requirements.

A student who has a thesis must have the final corrected version of the thesis cleared by the Office of Graduate and Professional Studies no later than one year after the final examination, or approval of a petition for exemption from the final exam, or within the seven-year time limit, whichever occurs first. Failure to do so will result in the degree not being awarded.

**Scholastic Requirements**

To maintain good academic standing, a MSPH student must maintain a minimum cumulative 3.00 GPR. If a student fails to attain a cumulative 3.00 GPR, he or she is placed on academic probation. A student on academic probation must raise his/her cumulative GPR to 3.00 or above according to requirements to be set forth in the probation letter. Typically, this means raising the cumulative GPR to a 3.00 or higher by the end of the next long semester (fall/spring). If this requirement is not met, the School’s Academic Affairs Office will recommend that the Office of Graduate and Professional Studies block the student from further enrollment. If a student is blocked from further enrollment in the MSPH program, he or she shall not be permitted to enroll in other MSPH courses.

**Foreign Languages**

No specific language requirement exists for the Master of Science in Public Health degree program.

**Internship or Practicum**

Students in the MSPH are required to fulfill a practicum requirement. Specific course names and numbers by department are PHEB 684, PHEO 684, PHPM 684, and HPCH 684. Instructions on submission and successful completion of the practicum are posted on the School of Public Health practicum website as well as with the department’s practicum coordinator. Students are to work specifically with their department practicum coordinator on meeting this curriculum course requirement. Students must be in good academic standing, have completed all core public health courses, or be enrolled concurrently in no more than one core course at the time they enroll in the 684 course, and have no registration or university blocks related to enrollment.

**Application for Degree**

For information on applying for your degree, please visit the Graduation (p. 24) section.

**Master of Science in Public Health in Environmental Health**

The Master of Science in Public Health (MSPH) is considered an equivalent professional public health master’s degree and requires additional coursework in research methods and statistics. Students can choose among the variety of multi-disciplinary public health options to navigate their public health interest.

The degree is offered in all core disciplines of public health; epidemiology, biostatistics, environmental health, occupational safety and health, and health promotion and community health sciences. The MSPH is a thesis degree program that has culminating experiences as part of the degree requirements. Students will also participate in a practicum demonstrating overall public health problem solving skills.

An individual with a baccalaureate degree may apply for admission to the program. No coursework prerequisites exist for making a successful application to this degree program.

**Program Requirements**
Program Requirements

- Student’s Advisory Committee (p. 1141)
- Degree Plan (p. 1141)
- Credit Requirement (p. 1141)
- Transfer of Credit (p. 1141)
- Limitations on the Use of Transfer, Extension and Certain Other Courses (p. 1142)
- Thesis (p. 1142)
  - Thesis Proposal (p. 1142)
  - Final Examination (p. 1142)

Student’s Advisory Committee

After receiving admission to graduate studies and enrolling, the student will consult with the head of his or her department concerning appointment of the chair of the advisory committee. The student’s advisory committee for the Master of Science degree will consist of no fewer than three graduate faculty representatives of the student’s fields of study and research. The committee chair or one of the co-chairs must be a member of Graduate Faculty in the student’s department.

Committee members must be comprised of at least one principal faculty member within SPH but external to the relevant department(s), all voting members must be members of the graduate faculty. The chair, in consultation with the student, will select the remainder of the advisory committee. The committee composition must be approved by the relevant department head.

If the chair of a student’s advisory committee voluntarily leaves the University and the student is near completion of the degree and wants the chair to continue to serve in this role, the student is responsible for securing a current member of the University Graduate Faculty, from the student’s academic program and located near the Texas A&M University campus site, to serve as the co-chair of the committee. The Department Head or Chair of Intercollegiate faculty may request in writing to the Associate Provost for Graduate and Professional Studies that a faculty member who is on an approved leave of absence or has voluntarily separated from the university, be allowed to continue to serve in the role of chair of a student’s advisory committee without a co-chair for us to one year. The students should be near completion of the degree. Extensions beyond the one year period can be granted with additional approval of the Dean.

The committee members’ signatures on the degree plan indicate their willingness to accept the responsibility for guiding and directing the entire academic program of the student and for initiating all academic actions concerning the student. Although individual committee members can be replaced by petition for valid reasons, a committee cannot resign in masse. The chair of the committee, who usually has immediate supervision of the student’s research and dissertation or record of study, has the responsibility for calling all meetings of the committee. The duties of the committee include responsibility for the proposed degree plan, the research proposal, guidance and supervision of the thesis study/research and the final examination. In addition, the committee, as a group and as individual members, is responsible for counseling the student on academic matters and, in the case of academic deficiency, initiating recommendations to the Office of Graduate and Professional Studies.

Degree Plan

The student’s advisor, in consultation with the student, will develop the proposed degree plan. The final degree plan must be completed and filed with the Office of Graduate and Professional Studies prior to the deadlines imposed by the student’s college, and no later than 90 days prior to the date of the final oral examination.

The proposed/final degree plan should be submitted through the online Document Processing Submission System located on the website https://ogsdppss.tamu.edu.

Additional coursework may be added to the approved degree plan by petition if it is deemed necessary by the advisor to correct deficiencies in the student’s academic preparation. No changes can be made to the degree plan once the student’s Request for Final Examination or Request for Final Examination Exemption is approved by the Office of Graduate and Professional Studies.

Credit Requirement

A minimum of 45 hours of coursework is required for the MSPH degree. To demonstrate integration and application of subject matter learned and the development of written and oral communication skills, a student will be required to produce a thesis and participate in a Practicum. Concentration and elective courses vary among the core disciplines and will be addressed during advising and creation of the degree plan. Electives may be taken upon approval/advice from the student’s assigned advisor and will be listed by rubric, section, and description in the degree plan.

Transfer of Credit

A student may transfer up to 9 hours of graduate credit to the MSPH degree program on the advice and approval of the student’s advisory committee, department Chair, and school Academic Affairs Dean, and with the approval of the Office of Graduate and Professional Studies. Courses taken in residence at an accredited U.S. institution or approved international institution with a final grade of B or greater may be considered for transfer credit if, at the time the courses were completed, the courses would be accepted for credit toward a similar degree for a student in degree-seeking status at the host institution. Otherwise, the limitations stated in the preceding section apply. Coursework in which no formal grades are given or in which grades other than letter grades (A or B) are earned (for example, CR, P, S, U, H, etc.) is not accepted for transfer credit. Courses appearing on the degree plan with grades of D, F, or U may not be absorbed by transfer work. Credit for coursework submitted for transfer from any college or university must be shown in semester credit hours or equated to semester credit hours. An official transcript from the university at which the transfer coursework was taken must be sent directly to the Office of Admissions.

Courses used toward another degree at another institution may not be applied for graduate credit. If the course to be transferred was taken prior to the conferral of a degree at the transfer institution, a letter from the registrar at that institution stating that the course was not applied for credit toward the degree must be submitted to the Office of Graduate and Professional Studies.

Grades for courses completed at other institutions are not included in computing the GPR.
Limitations on the Use of Transfer, Extensions, and Certain Other Courses

If otherwise acceptable, certain courses may be used toward meeting credit-hour requirements for the master’s degree with the following limitations.

1. The maximum number of credit hours allowed toward the MSPH as transfer credit is 9.
2. Courses previously used for another degree are not acceptable for credit.
3. A maximum of 3 hours of 684 (Professional Internship/Practicum), and 9 hours of 685 (Directed Studies), if approved on the degree plan.
4. Undergraduate courses are not allowed to transfer to the MSPH degree program.
5. Continuing education courses may not be used for graduate credit.
6. Extension courses are not acceptable for credit.

Exceptions will be permitted only in unusual cases and when petitioned by the student’s advisor, department Chair, school Academic Affairs Office, and approved by the Office of Graduate and Professional Studies.

Thesis

An acceptable thesis is required for the Master of Science in Public Health degree. The finished work must reflect a comprehensive understanding of the pertinent literature and express in clear English, the problem(s) and results of the student’s original research. Guidelines for the preparation of the thesis are available in the Thesis Manual, which is available online at http://ogaps.tamu.edu.

After successful defense (or exemption) and approval by the student’s advisory committee and the head of the student’s department, the student must submit his/her thesis in electronic format as a single PDF file. The PDF file must be uploaded to the website, http://ogaps.tamu.edu. Additionally, a signed approval form must be brought or mailed to the Office of Graduate and Professional Studies. The PDF file and the signed approval form are required by the deadline.

Deadline dates for submitting the thesis are announced each semester or summer term in the Office of Graduate and Professional Studies Calendar (see Time Limit statement). These dates also can be accessed via the website https://ogsdpss.tamu.edu.

Before a student can be “cleared” by Thesis and Dissertation Services, a processing fee must be paid through Student Business Services. This processing fee is for the thesis/dissertation services provided. After commencement, dissertations are digitally stored and made available through the Texas A&M Libraries.

A thesis that is deemed unacceptable by the Office of Graduate and Professional Studies because of excessive corrections will be returned to the student’s department head. The manuscript must be resubmitted as a new document, and the entire review process must begin again. All submittal deadlines must be met during the resubmittal process to graduate that semester.

Thesis Proposal

The student must prepare a thesis proposal for approval by the student’s advisory committee and the head of the major department or chair of the intercollegiate faculty, if applicable. This proposal must be submitted to the Office of Graduate and Professional Studies at least 20 working days prior to the submission of the request for the final examination.

Compliance issues must be addressed if a graduate student is performing research involving human subjects, animals, infectious biohazards and recombinant DNA. A student involved in these types of research should check with the Office of Research Compliance and Biosafety at (979) 458-1467 to address questions about all research compliance responsibilities. Additional information can be also obtained on the website http://rcb.tamu.edu.

Thesis Defense/Final Examination

A student must pass a final examination by dates announced each semester or summer term in the Office of Graduate and Professional Studies Calendar. The Office of Graduate and Professional Studies must be notified in writing of any cancellation. To be eligible to take the final examination, a student’s GPR must be at least 3.00 for courses on the degree plan and for all courses completed at Texas A&M which are eligible to be applied to a graduate degree, and there must be no unabsolved grades of D, F, or U for any course listed on the degree plan. To absolve a deficient grade, the student must repeat the course at Texas A&M University and achieve a grade of C or better. All coursework on the degree plan must have been completed with the exception of those hours for which the student is registered. Additionally, all English Language Proficiency requirements must be satisfied prior to scheduling the examination. If applicable, an approved thesis proposal must be on file in the Office of Graduate and Professional Studies according to published deadlines.

A request to hold and announce the final examination must be submitted to the Office of Graduate and Professional Studies a minimum of 10 working days in advance of the scheduled date for the examination. Examinations which are not completed and reported as satisfactory to the Office of Graduate and Professional Studies within 10 working days of the scheduled examination will be recorded as failures. A student may be given only one opportunity to repeat the final examination for the master’s degree and that must be within a time period that does not extend beyond the end of the next regular semester (summer terms are excluded).

For thesis students, the final examination covers the thesis and all work taken on the degree plan and at the option of the committee may be written or oral or both. The final examination may not be administered before the thesis is available to all members of the student’s advisory committee in substantially final form, and all members have had adequate time to review the document. The examination is conducted by the student’s advisory committee as finally constituted. A thesis option student must be registered in the University in the semester or summer term in which the final examination is taken. Persons other than members of the graduate faculty may, with mutual consent of the candidate and the major professor, attend final examinations for advanced degrees. Upon completion of the questioning of the candidate, all visitors must excuse themselves from the proceedings. A positive vote by all members of the graduate advisory committee with at most one dissension is required to pass a student on his or her exam. A department, or interdisciplinary degree program, may have a stricter requirement provided there is consistency within all degree programs within a department or interdisciplinary program.

A thesis candidate may petition to be exempt from his/her final examination provided his/her degree plan GPR is 3.50 or greater and he/she has the approval of the advisory committee, the head of the student’s department, the Associate Dean for Academic Affairs, and Office of
Graduate and Professional Studies. It is required that the petition for exemption be submitted the same semester the student submits the thesis.

**Additional Requirements**

**Scholastic Requirements**

To maintain good academic standing, a MSPH student must maintain a minimum cumulative 3.00 GPR. If a student fails to attain a cumulative 3.00 GPR, he or she is placed on academic probation. A student on academic probation must raise his/her cumulative GPR to a 3.00 or above according to requirements to be set forth in the probation letter. Typically, this means raising the cumulative GPR to a 3.00 or above by the end of the next long semester (fall/spring). If this requirement is not met, the School’s Academic Affairs Office will recommend that the Office of Graduate and Professional Studies block the student from further enrollment. If a student is blocked from further enrollment in the MSPH program, he or she shall not be permitted to enroll in other MSPH courses.

**Foreign Languages**

No specific language requirement exists for the Master of Science in Public Health degree program.

**Internship or Practicum**

Students in the MSPH are required to fulfill a practicum requirement. Specific course names and numbers by department are PHEB 684, PHEQ 684, PHPM 684, and HPCH 684. Instructions on submission and successful completion of the practicum are posted on the School of Public Health practicum website as well as with the department’s practicum coordinator. Students are to work specifically with their department practicum coordinator on meeting this curriculum course requirement. Students must be in good academic standing, have completed all core public health courses, or be enrolled concurrently in no more than one core course at the time they enroll in the 684 course, and have no registration or university blocks related to enrollment.

**Time Limit**

All degree requirements must be completed within a period of seven consecutive years for the degree to be granted. A course will be valid until seven years after the end of the semester in which it was taken. Graduate credit for coursework which is more than seven calendar years old at the time of the final examination (oral or written) may not be used to satisfy degree requirements.

A student who has a thesis must have the final corrected version of the thesis cleared by the Office of Graduate and Professional Studies no later than one year after the final examination, or approval of a petition for exemption from the final exam, or within the seven-year time limit, whichever occurs first. Failure to do so will result in the degree not being awarded.

**Residence**

No residence requirement exists; however, attention is directed to the rules regarding Limitations on the Use of Transfer, Extension and Certain Other Courses.

**Application for Degree**

For information on applying for your degree, please visit the Graduation (p. 24) section.

**Doctor of Public Health in Epidemiology and Environmental Health**

The Doctor of Public Health (DrPH) is an advanced professional degree for those whose career goals are in the area of professional practice in public health, including current and potential leaders in public health practice. The DrPH prepares candidates for a career in high-level administration, teaching, or practice, where advance analytical and conceptual capabilities are requisite.

Applicants may choose a major in Health Promotion and Community Health Sciences or Epidemiology and Environmental Health. Applicants choosing the Epidemiology and Environmental Health may choose to focus on either epidemiology or environmental health concentration areas.

The programs are designed for the practitioner; a graduate may be expected to fill instructional, supervisory, and administrative positions in which educational services are to be rendered.

Applicants to the DrPH will hold a master’s degree. For further information regarding admission, please visit http://sph.tamhsc.edu/future.

Although substantively different from the PhD degree in education, the DrPH degree requires equivalent admission qualifications, standards of scholarship and breadth and depth of study. For additional requirements, see the department doctoral handbook.

Because graduates of the program are expected to demonstrate a high level of professional skill and educational statesmanship, only those candidates who show a consistently high level of professional performance in their academic studies, in their role-related studies, in their internship experience, and in the completion of their records of study will be recommended for the degree.

**Steps to Fulfill Doctoral Degree Requirements**

1. Meet with departmental/intercollegiate graduate advisor to plan course of study for first semester. **When:** Before first semester registration. **Approved by:** Graduate advisor.

Note: Once formal coursework is complete, you must be continuously registered until all degree requirements have been met. See Continuous Registration Requirements (p. 25).

For degree curriculum, see the Department of Environmental and Occupational Health (http://sph.tamhsc.edu/eoh) or Department of Epidemiology and Biostatistics (http://sph.tamhsc.edu/epi-bio).

**Program Requirements**

**Program Requirements**

- Student's Advisory Committee (p. 1144)
- Degree Plan (p. 1145)
- Transfer of Credit (p. 1145)
- Research Proposal (p. 1145)
- Examinations (p. 1146)
  - Preliminary Examination (p. 1146)
  - Final Examination/Dissertation Defense (p. 1147)
- Dissertation (p. 1148)

**Student's Advisory Committee**

After receiving admission to graduate studies and enrolling, the student will consult with the head of his or her major or administrative department
(or chair of the intercollegiate faculty) concerning appointment of the chair of the advisory committee. The student’s advisory committee will consist of no fewer than four members of the graduate faculty representative of the student’s several fields of study and research, where the chair or co-chair must be from the student’s department (or intercollegiate faculty, if applicable), and at least one or more of the members must have an appointment to a department other than the student’s major department. The outside member for a student in an interdisciplinary degree program must be from a department different from the chair of the student’s committee.

The chair, in consultation with the student, will select the remainder of the advisory committee. Only graduate faculty members located on the respective Texas A&M University campuses may serve as chair of a student’s advisory committee. Other Texas A&M University graduate faculty members located off-campus may serve as a member or co-chair (but not chair), with a member as the chair.

If the chair of a student’s advisory committee voluntarily leaves the University and the student is near completion of the degree and wants the chair to continue to serve in this role, the student is responsible for securing a current member of the University Graduate Faculty, from the student’s academic program and located near the Texas A&M University campus site, to serve as the co-chair of the committee. The Department Head or Chair of Intercollegiate faculty may request in writing to the Associate Provost for Graduate and Professional Studies that a faculty member who is on an approved leave of absence or has voluntarily separated from the university, be allowed to continue to serve in the role of chair of a student’s advisory committee without a co-chair for us to one year. The students should be near completion of the degree. Extensions beyond the one year period can be granted with additional approval of the Dean.

The committee members’ signatures on the degree plan indicate their willingness to accept the responsibility for guiding and directing the entire academic program of the student and for initiating all academic actions concerning the student. Although individual committee members may be replaced by petition for valid reasons, a committee cannot resign en masse. The chair of the committee, who usually has immediate supervision of the student’s research and dissertation or record of study, has the responsibility for calling all meetings of the committee. The duties of the committee include responsibility for the proposed degree plan, the research proposal, the preliminary examination, the dissertation or record of study and the final examination. In addition, the committee, as a group and as individual members, is responsible for counseling the student on academic matters, and, in the case of academic deficiency, initiating recommendations to the Office of Graduate and Professional Studies.

**Degree Plan**

The student’s advisory committee will evaluate the student’s previous education and degree objectives. The committee, in consultation with the student, will develop a proposed degree plan and outline a research problem which, when completed, as indicated by the dissertation will constitute the basic requirements for the degree. The degree plan must be filed with the Office of Graduate and Professional Studies prior to the deadline imposed by the student’s college and no later than 90 days prior to the preliminary examination.

This proposed degree plan should be submitted through the online Document Processing Submission System located on the website https://ogsdpss.tamu.edu. A minimum of 64 hours is required on the degree plan for the Doctor of Public Health for a student who has completed a master’s degree. A student who has completed a DDS/DMD, DVM or a MD at a U.S. institution is also required to complete a minimum of 64 hours. A student who has completed a baccalaureate degree but not a master’s degree will be required to complete a 96-hour degree plan. Completion of DDS/DMD, DVM or MD degrees at a foreign institution requires completion of a minimum of 96 hours for the Doctor of Public Health. A field of study may be primarily in one department or in a combination of departments. A degree plan must carry a reasonable amount of 691 (Research).

Additional coursework may be added by petition to the approved degree plan by the student’s advisory committee if it is deemed necessary to correct deficiencies in the student’s academic preparation. No changes can be made to the degree plan once the student’s Request for Final Examination or Request for Final Examination Exemption is approved by the Office of Graduate and Professional Studies.

Approval to enroll in any professional course (900-level) should be obtained from the head of the department (or Chair of the intercollegiate faculty, if applicable) in which the course will be offered before including such a course on a degree plan.

No credit may be obtained by correspondence study, by extension or for any course of fewer than three weeks duration.

**Transfer of Credit**

Courses for which transfer credits are sought must have been completed with a grade of B or greater and must be approved by the student’s advisory committee and the Office of Graduate and Professional Studies. These courses must not have been used previously for another degree. Except for officially approved cooperative doctoral programs, credit for thesis or dissertation research or the equivalent is not transferable. Credit for “internship” coursework in any form is not transferable. Courses taken in residence at an accredited U.S. institution or approved international institution with a final grade of B or greater will be considered for transfer credit if, at the time the courses were completed, the courses would be accepted for credit toward a similar degree for a student in degree-seeking status at the host institution. Credit for coursework taken by extension is not transferable. Coursework in which no formal grades are given or in which grades other than letter grades (A or B) are earned (for example, CR, P, S, U, H, etc.) is not accepted for transfer credit. Credit for coursework submitted for transfer from any college or university must be shown in semester credit hours, or equated to semester credit hours.

Courses used toward a degree at another institution may not be applied for graduate credit. If the course to be transferred was taken prior to the conferment of a degree at the transfer institution, a letter from the registrar at that institution stating that the course was not applied for credit toward the degree must be submitted to the Office of Graduate and Professional Studies.

Grades for courses completed at other institutions are not included in computing the GPR. An official transcript from the university at which transfer courses are taken must be sent directly to the Office of Admissions.

**Research Proposal**

The general field of research to be used for the dissertation should be agreed on by the student and the advisory committee at their first meeting, as a basis for selecting the proper courses to support the proposed research.
As soon thereafter as the research project can be outlined in reasonable detail, the dissertation research proposal should be completed. The research proposal should be approved at a meeting of the student’s advisory committee, at which time the feasibility of the proposed research and the adequacy of available facilities should be reviewed. The approved proposal, signed by all members of the student’s advisory committee, the head of the student’s major department (or chair of the intercollegiate faculty, if applicable), must be submitted to the Office of Graduate and Professional Studies at least 20 working days prior to the submission of the Request for the Final Examination.

Compliance issues must be addressed if a graduate student is performing research involving human subjects, animals, infectious biohazards or recombinant DNA. A student involved in these types of research should check with the Office of Research Compliance and Biosafety at (979) 458-1467 to address questions about all research compliance responsibilities. Additional information can also be obtained on the website http://rcb.tamu.edu.

Examinations

Preliminary Examination

The student’s major department (or chair of the intercollegiate faculty, if applicable) and his or her advisory committee may require qualifying, cumulative or other types of examinations at any time deemed desirable. These examinations are entirely at the discretion of the department and the student’s advisory committee.

The preliminary examination is required. The preliminary examination for a doctoral student shall be given no earlier than a date at which the student is within 6 credit hours of completion of the formal coursework on the degree plan (i.e., all coursework on the degree plan except 681, 684, 690, 691, 5V98, 5V99 and 692 courses). The student is strongly encouraged to complete the Preliminary Examination no later than the end of the semester following the completion of the formal coursework on the degree plan. The Office of Graduate and Professional Studies must receive the results of the preliminary examination at least 14 weeks prior to the final examination date. The examination shall be oral and written unless otherwise recommended by the student’s advisory committee and approved by the Office of Graduate and Professional Studies. The written part of the examination will cover all fields of study included in the student’s degree plan. Each member of the advisory committee is responsible for administering a written examination in his or her particular field, unless he or she chooses to waive participation in this part of the examination. Two or more members of the advisory committee may give a joint written examination. One or more members may require a student to take a departmental or intercollegiate faculty examination to supplement or replace a written examination. Each written examination must be completed and reported as satisfactory to the chair of the advisory committee before the oral portion of the examination may be held. In case any written examination is reported unsatisfactory, the entire advisory committee must agree (1) to proceed with the oral portion of the preliminary examination, or (2) to adopt another course of action regarding the unsatisfactory written examination.

Prior to scheduling the preliminary examination with the other committee members, the committee chair will review the eligibility criteria with the student, using the Preliminary Examination Checklist to ensure the student is ready for the examination. The following list of eligibility requirements applies.

- Student is registered at Texas A&M University for the semester or summer term during which any portion of the preliminary examination may fall. If the entire examination falls between semesters, then the student must be registered for the term immediately preceding the examination.
- An approved degree plan was on file with the Office of Graduate and Professional Studies at least 90 days prior to the first written examination.
- Student’s cumulative GPR is at least 3.000.
- Student’s degree plan GPR is at least 3.000.
- All English language proficiency requirements have been satisfied.
- All committee members have scheduled or waived the written portion and agreed to attend the oral portion of the examination or have found a substitute. Only one substitution is allowed and it cannot be for the committee chair.
- At the end of the semester in which the exam is given, there are no more than 6 hours of coursework remaining on the degree plan (except 681, 684, 690, 691, 5V98, 5V99 and 692). The head of the student’s department (or Chair of the Intercollegiate Faculty, if applicable) has the authority to approve a waiver of this criterion.
- The time span from the first written examination to the oral is no more than three weeks. (In cases of department-wide written examinations, this criterion is not applicable.) The head of the student’s department (or chair of the intercollegiate faculty, if applicable) has the authority to approve a waiver of this criterion.

Once all requirements are met, departments or intercollegiate faculty may announce the schedule of the written and oral parts of the examination.

Credit for the preliminary examination is not transferable. If a departmental or intercollegiate faculty examination is used as part of the written portion of the preliminary examination, it must be the last examination offered prior to the date scheduled for the preliminary examination. In the schedule of the written portion, all members of the student’s advisory committee are to be included.

Through the preliminary examination, the student’s advisory committee should satisfy itself that the student has demonstrated the following qualifications:

1. a mastery of the subject matter of all fields in the program;
2. an adequate knowledge of the literature in these fields and an ability to carry out bibliographical research.

In case a student is required to take, as a part of the written portion of a preliminary examination, an examination administered by a department or intercollegiate faculty, the department or intercollegiate faculty must:

1. offer the examination at least once every six months. The departmental or interdisciplinary degree program examination should be announced at least 30 days prior to the scheduled examination date.
2. assume the responsibility for marking the examination satisfactory or unsatisfactory, or otherwise graded, and in the case of unsatisfactory, stating specifically the reasons for such a mark.
3. forward the marked examination to the chair of the student’s advisory committee within one week after the examination.

The chair of the student’s advisory committee is responsible for making all written examinations available to the members of the advisory committee at or before the oral portion of the preliminary examination. A positive vote by all members of the graduate committee with at most one disapproval is required to pass a student on his or her preliminary exam. A department or intercollegiate faculty can have a stricter requirement provided there...
is consistency within all degree programs within a department or an interdisciplinary degree program.

The chair of the advisory committee will promptly report the results of the Preliminary Examination to the Office of Graduate and Professional Studies, using the Report of Doctoral Preliminary Examination form and the Preliminary Examination checklist. Both forms must have the appropriate signatures. These forms should be submitted to the Office of Graduate and Professional Studies within 10 working days of the scheduled preliminary examination.

The Report of the Preliminary Examination form must be submitted with original signatures of the approved committee members. If an approved committee member substitution (1 only) has been made, his/her signature must also be included on the form submitted to the Office of Graduate and Professional Studies. The original signature of the department head is also required on the form.

After passing the required oral and written preliminary examinations for the doctoral degree, the student must complete the final examination for the degree within four calendar years. Otherwise, the student will be required to repeat the preliminary examination. Upon approval of the student’s advisory committee, with no more than one member dissenting, and approval of the Office of Graduate and Professional Studies, a student who has failed the preliminary examination may be given one re-examination. Adequate time must be given to permit the student to address the inadequacies emerging from the first examination (normally six months). The student and the advisory committee should jointly negotiate a mutually acceptable date for this purpose.

A student must be registered at Texas A&M University for a minimum of one semester credit hour in the semester or summer term in which they will take any portion of the Preliminary Examination.

Steps for Completing the Preliminary Examination

1. Establish advisory committee. Submit a degree plan. When: Prior to the deadline set by the student’s college, and no later than 90 days prior to preliminary examination. Approved by: Advisory committee, department or intercollegiate faculty chair, and Office of Graduate and Professional Studies (OGAPS).

2. Complete English language proficiency requirements (if applicable), and coursework detailed on degree plan. When: Before preliminary examination.

3. Student and chair review eligibility requirements for the preliminary exam using the "Preliminary Examination Checklist". When: Several weeks before the proposed date of the preliminary examination. Checklist must be signed by chair and department head, or intercollegiate faculty chair.

4. Student checks the availability of committee members. When: Several weeks before the proposed date of the preliminary examination.

5. Students prepares and submits any petitions found necessary by the review of the eligibility requirements. When: At least three weeks before the proposed date of the preliminary examinations. Approved by: Advisory committee, department head or intercollegiate faculty chair, and OGAPS.

6. When exam date is determined, the department may announce the schedule. Approved by: Committee chair, department head or intercollegiate faculty chair.

7. Chair submits the Report of the Preliminary Examination and the Preliminary Examination Checklist to OGAPS. When: Within 10 working days of the date of the scheduled oral examination and not later than 14 weeks prior to the final defense date. Approved by: Advisory committee.

8. Office of Graduate and Professional Studies notifies the student and chair of any actions necessary to rectify any deficiencies. When: Upon receipt of the report of the doctoral Preliminary Examination.

Final Examination/Dissertation Defense

The candidate for the doctoral degree must pass a final examination by deadline dates announced in the “Office of Graduate and Professional Studies Calendar” each semester or summer term. The doctoral student is allowed only one opportunity to take the final examination. No student may be given a final examination unless his or her current official cumulative and degree plan GPAs are 3.000 or better and he or she has been admitted to candidacy. No unabsolved grades of D, F, or U for any course can be listed on the degree plan. To absolve a deficient grade, a student must repeat the course and achieve a grade of C or better. A student must have completed all coursework on his or her degree plan with the exception of 691 (Research) or 692 (Professional Study) hours. The student must be registered for all remaining hours; no hours remain to be taken on the degree plan. The preliminary examination results must have been submitted to the Office of Graduate and Professional Studies 14 weeks prior to the date of the defense. The research proposal must have been submitted to the Office of Graduate and Professional Studies 20 working days prior to the date of the final examination/defense. Any changes to the degree plan must be approved by the Office of Graduate and Professional Studies prior to the approval of the final examination. The request to hold and announce the final examination must be submitted to the Office of Graduate and Professional Studies a minimum of 10 working days in advance of the scheduled date. Examinations/Defenses results must be submitted to the Office of Graduate and Professional Studies within 10 working days of the scheduled examination/defense.
The ability to perform independent research must be demonstrated by the dissertation, which must be the original work of the candidate. Where acceptance of the dissertation is based primarily on its scholarly merit, it must also exhibit creditable literary workmanship. The format of the dissertation must be acceptable to the Office of Graduate and Professional Studies. Guidelines for the preparation of the thesis are available in the Thesis Manual, which is available online at http://ogaps.tamu.edu.

After successful defense and approval by the student’s advisory committee and the head of the student’s major department (or chair of the intercollegiate faculty, if applicable), a student must submit his/her dissertation in electronic format as a single PDF file. The PDF file must be uploaded to the website, http://ogaps.tamu.edu. Additionally, a signed approval form must be brought or mailed to the Office of Graduate and Professional Studies. Both the PDF file and the signed approval form are required by the deadline.

Deadline dates for submitting are announced each semester or summer term in the Office of Graduate and Professional Studies Calendar (see Time Limit statement). These dates also can be accessed via the website http://ogaps.tamu.edu.

Before a student can be “cleared” by Thesis and Dissertation Services, a processing fee must be paid through Student Business Services. This processing fee is for the thesis/dissertation services provided. After commencement, dissertations are digitally stored and made available through the Texas A&M Libraries.

A dissertation that is deemed unacceptable by the Office of Graduate and Professional Studies because of excessive corrections will be returned to the student’s department head or chair of the intercollegiate faculty. The manuscript must be resubmitted as a new document, and the entire review process must begin anew. All original submittal deadlines must be met during the resubmittal process in order to graduate.

### Additional Requirements

#### Residence

A student who enters the doctoral degree program with a baccalaureate degree must spend one academic year plus one semester in resident study at Texas A&M University. A student who holds master’s degree when he/she enters doctoral degree program must spend one academic year in resident study. One academic year may include two adjacent regular semesters or one regular semester and one adjacent 10-week summer semester. The third semester is not required to be adjacent to the one year. Enrollment for each semester must be a minimum of 9 credit hours each to satisfy the residence requirement.

To satisfy the residence requirement, the student must complete a minimum of 9 credit hours per semester or 10-week summer semester in resident study at Texas A&M University for the required period. A student who enters a doctoral degree program with a baccalaureate degrees may fulfill residence requirements in excess of one academic year (18 credit hours) by registration during summer sessions or by completion of a less-than-full course load (in this context a full course load is considered 9 credit hours per semester).

Students who are employed full-time while completing their degree may fulfill total residence requirements by completion of less-than-full time course loads each semester. In order to be considered for this, the student is required to submit a Petition for Waivers and Exceptions along with verification of his/her employment to the Office of Graduate and Professional Studies. An employee should submit verification of his/her employment at the time he/she submits the degree plan. See Registration (p. 25).

See Residence Requirements (p. 22).

#### Time Limit

All requirements for doctoral degrees must be completed within a period of 10 consecutive calendar years for the degree to be granted. A course will be considered valid until 10 years after the end of the semester in which it is taken. Graduate credit for coursework more than
10 calendar years old at the time of the final oral examination may not be used to satisfy degree requirements.

After passing the required preliminary oral and written examinations for a doctoral degree, the student must complete the final examination within 4 calendar years. Otherwise, the student will be required to repeat the preliminary examination.

A final corrected version of the dissertation or record of study in electronic format as a single PDF file must be cleared by the Office of Graduate and Professional Studies no later than one year after the final examination or within the 10-year time limit, whichever occurs first. Failure to do so will result in the degree not being awarded.

Continuous Registration
A student in a program leading to a Doctor of Public Health who has completed all coursework on his/her degree plan other than 691 (Research) are required to be in continuous registration until all requirements for the degree have been completed. See Continuous Registration Requirements (p. 25).

Admission to Candidacy
To be admitted to candidacy for a doctoral degree, a student must have:

1. completed all formal coursework on the degree plan with the exception of any remaining 681, 684, 690 and 691,
2. a 3.0 Graduate GPA and a Degree Plan GPA of at least 3.0 with no grade lower than C in any course on the degree plan,
3. passed the preliminary examination (written and oral portions),
4. submitted an approved dissertation proposal,
5. met the residence requirements.

The final examination will not be authorized for any doctoral student who has not been admitted to candidacy.

Foreign Languages
A student is required to possess a competent command of English. For English language proficiency requirements, see the Admissions section of this catalog. The doctoral (PhD) foreign language requirement at Texas A&M University is a departmental option, to be administered and monitored by the individual departments of academic instruction.

Internship or Practicum
Students in the DRPH are required to fulfill a practicum requirement. Specific course names and numbers by department are PHEB 684, PHEO 684, PHPM 684, and HPCO 684. Instructions on submission and successful completion of the practicum are posted on the School of Public Health practicum website as well as with the department’s practicum coordinator. Students are to work specifically with their department practicum coordinator on meeting this curriculum course requirement. Students must be in good academic standing, have completed all core public health courses, or be enrolled concurrently in no more than one core course at the time they enroll in the 684 course, and have no registration or university blocks related to enrollment.

130 Hour Cap (for DrPH)
There is a state mandated cap on number of hours a student can enroll in without penalty. The cap is currently 130 hours (approximately 5 and one-half years), and once students reach this cap, they are required to pay out-of-state tuition on all subsequent hours until they graduate.

Application for Degree
For information on applying for your degree, please visit the Graduation (p. 24) section.

Master of Science in Public Health in Epidemiology
The Master of Science in Public Health (MSPH) is considered an equivalent professional public health master’s degree and requires additional coursework in research methods and statistics. Students can choose among the variety of multi-disciplinary public health options to navigate their public health interest.

The degree is offered in all core disciplines of public health; epidemiology, biostatistics, environmental health, occupational safety and health, and health promotion and community health sciences. The MSPH is a thesis degree program that has culminating experiences as part of the degree requirements. Students will also participate in a practicum demonstrating overall public health problem solving skills.

An individual with a baccalaureate degree may apply for admission to the program. No coursework prerequisites exist for making a successful application to this degree program.

Program Requirements

Program Requirements

- Student’s Advisory Committee (p. 1149)
- Degree Plan (p. 1150)
- Credit Requirement (p. 1150)
- Transfer of Credit (p. 1150)
- Limitations on the Use of Transfer, Extension and Certain Other Courses (p. 1150)
- Thesis (p. 1150)
  - Thesis Proposal (p. 1151)
  - Final Examination (p. 1151)

Student’s Advisory Committee
After receiving admission to graduate studies and enrolling, the student will consult with the head of his or her department concerning appointment of the chair of the advisory committee. The student’s advisory committee for the Master of Science degree will consist of no fewer than three graduate faculty representatives of the student’s fields of study and research. The committee chair or one of the co-chairs must be a member of Graduate Faculty in the student’s department.

Committee members must be comprised of at least one principal faculty member within SPH but external to the relevant department(s), all voting members must be members of the graduate faculty. The chair, in consultation with the student, will select the remainder of the advisory committee. The committee composition must be approved by the relevant department head.

If the chair of a student’s advisory committee voluntarily leaves the University and the student is near completion of the degree and wants the chair to continue to serve in this role, the student is responsible for
securing a current member of the University Graduate Faculty, from the student’s academic program and located near the Texas A&M University campus site, to serve as the co-chair of the committee. The Department Head or Chair of Intercollegiate faculty may request in writing to the Associate Provost for Graduate and Professional Studies that a faculty member who is on an approved leave of absence or has voluntarily separated from the university, be allowed to continue to serve in the role of chair of a student’s advisory committee without a co-chair for us to one year. The students should be near completion of the degree. Extensions beyond the one year period can be granted with additional approval of the Dean.

The committee members’ signatures on the degree plan indicate their willingness to accept the responsibility for guiding and directing the entire academic program of the student and for initiating all academic actions concerning the student. Although individual committee members can be replaced by petition for valid reasons, a committee cannot resign in masse. The chair of the committee, who usually has immediate supervision of the student’s research and dissertation or record of study, has the responsibility for calling all meetings of the committee. The duties of the committee include responsibility for the proposed degree plan, the research proposal, guidance and supervision of the thesis study/research and the final examination. In addition, the committee, as a group and as individual members, is responsible for counseling the student on academic matters and, in the case of academic deficiency, initiating recommendations to the Office of Graduate and Professional Studies.

**Degree Plan**

The student’s advisor, in consultation with the student, will develop the proposed degree plan. The final degree plan must be completed and filed with the Office of Graduate and Professional Studies prior to the deadlines imposed by the student’s college, and no later than 90 days prior to the date of the final oral examination.

The proposed/final degree plan should be submitted through the online Document Processing Submission System located on the website https://ogsdps.tamu.edu.

Additional coursework may be added to the approved degree plan by petition if it is deemed necessary by the advisor to correct deficiencies in the student’s academic preparation. No changes can be made to the degree plan once the student’s Request for Final Examination or Request for Final Examination Exemption is approved by the Office of Graduate and Professional Studies.

**Credit Requirement**

A minimum of 45 hours of coursework is required for the MSPH degree. To demonstrate integration and application of subject matter learned and the development of written and oral communication skills, a student will be required to produce a thesis and participate in a Practicum. Concentration and elective courses vary among the core disciplines and will be addressed during advising and creation of the degree plan. Electives may be taken upon approval/advice from the student’s assigned advisor and will be listed by rubric, section, and description in the degree plan.

**Transfer of Credit**

A student may transfer up to 9 hours of graduate credit to the MSPH degree program on the advice and approval of the student’s advisory committee, department Chair, and school Academic Affairs Dean, and with the approval of the Office of Graduate and Professional Studies. Courses taken in residence at an accredited U.S. institution or approved international institution with a final grade of B or greater may be considered for transfer credit if, at the time the courses were completed, the courses would be accepted for credit toward a similar degree for a student in degree-seeking status at the host institution. Otherwise, the limitations stated in the preceding section apply. **Coursework in which no formal grades are given or in which grades other than letter grades (A or B) are earned (for example, CR, P, S, U, H, etc.) is not accepted for transfer credit.** Courses appearing on the degree plan with grades of D, F, or U may not be absolved by transfer work. Credit for coursework submitted for transfer from any college or university must be shown in semester credit hours or equated to semester credit hours. An official transcript from the university at which the transfer coursework was taken must be sent directly to the Office of Admissions.

Courses used toward another degree at another institution may not be applied for graduate credit. If the course to be transferred was taken prior to the conferral of a degree at the transfer institution, a letter from the registrar at that institution stating that the course was not applied for credit toward the degree must be submitted to the Office of Graduate and Professional Studies.

Grades for courses completed at other institutions are not included in computing the GPR.

**Limitations on the Use of Transfer, Extensions, and Certain Other Courses**

If otherwise acceptable, certain courses may be used toward meeting credit-hour requirements for the master’s degree with the following limitations.

1. The maximum number of credit hours allowed toward the MSPH as transfer credit is 9.
2. Courses previously used for another degree are not acceptable for credit.
3. A maximum of 3 hours of 684 (Professional Internship/Practicum), and 9 hours of 685 (Directed Studies), if approved on the degree plan.
4. Undergraduate courses are not allowed to transfer to the MSPH degree program.
5. Continuing education courses may not be used for graduate credit.
6. Extension courses are not acceptable for credit.

Exceptions will be permitted only in unusual cases and when petitioned by the student’s advisor, department Chair, school Academic Affairs Office, and approved by the Office of Graduate and Professional Studies.

**Thesis**

An acceptable thesis is required for the Master of Science in Public Health degree. The finished work must reflect a comprehensive understanding of the pertinent literature and express in clear English, the problem(s) for study, the method, significance and results of the student’s original research. Guidelines for the preparation of the thesis are available in the Thesis Manual, which is available online at http://ogaps.tamu.edu.

After successful defense (or exemption) and approval by the student’s advisory committee and the head of the student’s department, the student must submit his/her thesis in electronic format as a single PDF file. The PDF file must be uploaded to the website, http://ogaps.tamu.edu. Additionally, a signed approval form must be brought or mailed to the
Office of Graduate and Professional Studies. The PDF file and the signed approval form are required by the deadline.

Deadline dates for submitting the thesis are announced each semester or summer term in the Office of Graduate and Professional Studies Calendar (see Time Limit statement). These dates also can be accessed via the website https://ogsdpss.tamu.edu.

Before a student can be “cleared” by Thesis and Dissertation Services, a processing fee must be paid through Student Business Services. This processing fee is for the thesis/dissertation services provided. After commencement, dissertations are digitally stored and made available through the Texas A&M Libraries.

A thesis that is deemed unacceptable by the Office of Graduate and Professional Studies because of excessive corrections will be returned to the student’s department head. The manuscript must be resubmitted as a new document, and the entire review process must begin again. All submittal deadlines must be met during the resubmittal process to graduate that semester.

Thesis Proposal

The student must prepare a thesis proposal for approval by the student’s advisory committee and the head of the major department or chair of the intercollegiate faculty, if applicable. This proposal must be submitted to the Office of Graduate and Professional Studies at least 20 working days prior to the submission of the request for the final examination.

Compliance issues must be addressed if a graduate student is performing research involving human subjects, animals, infectious biohazards and recombinant DNA. A student involved in these types of research should check with the Office of Research Compliance and Biosafety at (979) 458-1467 to address questions about all research compliance responsibilities. Additional information can be also obtained on the website http://rcb.tamu.edu.

Thesis Defense/Final Examination

A student must pass a final examination by dates announced each semester or summer term in the Office of Graduate and Professional Studies Calendar. The Office of Graduate and Professional Studies must be notified in writing of any cancellation. To be eligible to take the final examination, a student’s GPR must be at least 3.00 for courses on the degree plan and for all courses completed at Texas A&M which are eligible to be applied to a graduate degree, and there must be no unsabsolved grades of D, F, or U for any course listed on the degree plan. To absolve a deficient grade, the student must repeat the course at Texas A&M University and achieve a grade of C or better. All coursework on the degree plan must have been completed with the exception of those hours for which the student is registered. Additionally, all English Language Proficiency requirements must be satisfied prior to scheduling the examination. If applicable, an approved thesis proposal must be on file in the Office of Graduate and Professional Studies according to published deadlines.

A request to hold and announce the final examination must be submitted to the Office of Graduate and Professional Studies a minimum of 10 working days in advance of the scheduled date for the examination. Examinations which are not completed and reported as satisfactory to the Office of Graduate and Professional Studies within 10 working days of the scheduled examination will be recorded as failures. A student may be given only one opportunity to repeat the final examination for the master’s degree and that must be within a time period that does not extend beyond the end of the next regular semester (summer terms are excluded).

For thesis students, the final examination covers the thesis and all work taken on the degree plan and at the option of the committee may be written or oral or both. The final examination may not be administered before the thesis is available to all members of the student’s advisory committee in substantially final form, and all members have had adequate time to review the document. The examination is conducted by the student’s advisory committee as finally constituted. A thesis option student must be registered in the University in the semester or summer term in which the final examination is taken. Persons other than members of the graduate faculty may, with mutual consent of the candidate and the major professor, attend final examinations for advanced degrees. Upon completion of the questioning of the candidate, all visitors must excuse themselves from the proceedings. A positive vote by all members of the graduate advisory committee with at most one dissension is required to pass a student on his or her exam. A department, or interdisciplinary degree program, may have a stricter requirement provided there is consistency within all degree programs within a department or interdisciplinary program.

A thesis candidate may petition to be exempt from his/her final examination provided his/her degree plan GPR is 3.50 or greater and he/she has the approval of the advisory committee, the head of the student’s department, the Associate Dean for Academic Affairs, and Office of Graduate and Professional Studies. It is required that the petition for exemption be submitted the same semester the student submits the thesis.

Additional Requirements

Additional Requirements

- Residence (p. 1151)
- Time Limit (p. 1151)
- Scholastic Requirements (p. 1152)
- Foreign Languages (p. 1152)
- Internship or Practicum (p. 1152)
- Application for Degree (p. 1152)

Residence

No residence requirement exists; however, attention is directed to the rules regarding Limitations on the Use of Transfer, Extension and Certain Other Courses.

Time Limit

All degree requirements must be completed within a period of seven consecutive years for the degree to be granted. A course will be valid until seven years after the end of the semester in which it was taken. Graduate credit for coursework which is more than seven calendar years old at the time of the final examination (oral or written) may not be used to satisfy degree requirements.

A student who has a thesis must have the final corrected version of the thesis cleared by the Office of Graduate and Professional Studies no later than one year after the final examination, or approval of a petition for exemption from the final exam, or within the seven-year time limit, whichever occurs first. Failure to do so will result in the degree not being awarded.
Scholastic Requirements

To maintain good academic standing, a MSPH student must maintain a minimum cumulative 3.00 GPR. If a student fails to attain a cumulative 3.00 GPR, he or she is placed on academic probation. A student on academic probation must raise his/her cumulative GPR to a 3.00 or above according to requirements to be set forth in the probation letter. Typically, this means raising the cumulative GPR to a 3.00 or higher by the end of the next long semester (fall/spring). If this requirement is not met, the School’s Academic Affairs Office will recommend that the Office of Graduate and Professional Studies block the student from further enrollment. If a student is blocked from further enrollment in the MSPH program, he or she shall not be permitted to enroll in other MSPH courses.

Foreign Languages

No specific language requirement exists for the Master of Science in Public Health degree program.

Internship or Practicum

Students in the MSPH are required to fulfill a practicum requirement. Specific course names and numbers by department are PHEB 684, PHEP 684, PHPM 684, and HPCH 684. Instructions on submission and successful completion of the practicum are posted on the School of Public Health practicum website as well as with the department’s practicum coordinator. Students are to work specifically with their department practicum coordinator on meeting this curriculum course requirement. Students must be in good academic standing, have completed all core public health courses, or be enrolled concurrently in no more than one core course at the time they enroll in the 684 course, and have no registration or university blocks related to enrollment.

Application for Degree

For information on applying for your degree, please visit the Graduation (p. 24) section.

Master of Health Administration in Health Administration

The Master of Health Administration (MHA) is a professional degree program intended for students pursuing administrative practice in health service related settings. The vision of the program is to develop health care managers who will provide leadership for their organizations and communities based on a strong commitment to public health, ethics, integrity, and service as well as demonstrate the ability to implement innovative ways of meeting health care needs of a diverse society.

Admission to the MHA requires prerequisites involving economics, statistics, and managerial accounting or finance. An interview is also a required element of the admission process.

The MHA program is a 57 credit hour program to be completed in either 21 months (full-time) or 33 months (part-time). The program builds upon the core disciplines in public health, preparing students for competitive opportunities post-graduation. The comprehensive curriculum includes an internship allowing students to apply classroom knowledge in a health services organization. The program embraces the ethic and philosophy that health services managers must provide leadership in attending to the interests of the populations their organizations serve.

The MHA is also offered in an Executive Master of Health Administration option. The Executive MHA is tailored to employed executives and mid-management professionals seeking to expand their educational knowledge and skill set. This 48-credit hour master's degree takes 24 months to complete, is taught one weekend a month, and is conveniently located at the Houston Campus of the Texas A&M Health Science Center.

For degree curricula see Department of Health Policy and Management (http://sph.tamhsc.edu/hpm)

Program Requirements

Program Requirements
- Student’s Advisory Committee (p. 1152)
- Degree Plan (p. 1152)
- Credit Requirements (p. 1152)
- Transfer of Credit (p. 1153)
- Limitations on the Use of Transfer, Extension and Certain Other Courses (p. 1153)

Student’s Advisory Committee

The Student Advisory Committee for the MHA consists of an assigned faculty advisor. After receiving admission to the program and before enrolling for coursework, the student will consult with their assigned faculty advisor to receive additional information related to curriculum and processing of the degree plan. The faculty advisor must have graduate faculty membership in the academic program. If at any point of the student’s time in pursuit of the degree the assigned advisor is no longer available, the department will assign a new advisor and require a comprehensive advisory session to ensure the student is making progress according to degree program requirements. Students in this degree program receive advising prior to all semesters.

Degree Plan

The student’s advisor, in consultation with the student, will develop the proposed degree plan. The degree plan must be completed and filed with the Office of Graduate and Professional Studies prior to the deadlines imposed by the student’s college, and no later than the dates announced in the Office of Graduate and Professional Studies calendar of deadlines for graduation.

The proposed/final degree plan should be submitted through the online Document Processing Submission System located on the website https://ogsdpss.tamu.edu.

Additional coursework may be added to the approved degree plan by petition if it is deemed necessary by the advisor to correct deficiencies in the student’s academic preparation.

Credit Requirement

A minimum of 57 hours of coursework is required for the Master of Health Administration degree. To demonstrate integration and application of subject matter learned and the development of written and oral communication skills, a student will be required to successfully complete a Capstone course and practicum as part of the culminating experience requirement to graduate.
Transfer of Credit

A student may transfer up to 9 hours of graduate credit to the Master of Health Administration degree program on the advice and approval of the student’s advisory committee, department Chair, and school Academic Affairs Dean, and with the approval of the Office of Graduate and Professional Studies. Courses taken in residence at an accredited U.S. institution or approved international institution with a final grade of B or greater may be considered for transfer credit if, at the time the courses were completed, the courses would be accepted for credit toward a similar degree for a student in degree-seeking status at the host institution. Otherwise, the limitations stated in the preceding section apply.

Coursework in which no formal grades are given or in which grades other than letter grades (A or B) are earned (for example, CR, P, S, U, H, etc.) is not accepted for transfer credit. Courses appearing on the degree plan with grades of D, F, or U may not be absolved by transfer work. Credit for coursework submitted for transfer from any college or university must be shown in semester credit hours or equated to semester credit hours. An official transcript from the university at which the transfer coursework was taken must be sent directly to the Office of Admissions.

Courses used toward another degree at another institution may not be applied for graduate credit. If the course to be transferred was taken prior to the conferment of a degree at the transfer institution, a letter from the Registrar at that institution stating that the course was not applied for credit toward the degree must be submitted to the Office of Graduate and Professional Studies.

Grades for courses completed at other institutions are not included in computing the GPR.

Limitations on the Use of Transfer, Extensions, and Certain Other Courses

If otherwise acceptable, certain courses may be used toward meeting credit-hour requirements for the master’s degree with the following limitations.

1. The maximum number of credit hours allowed toward the MHA as transfer credit is 9.
2. Courses previously used for another degree are not acceptable for credit.
3. A maximum of 6 hours of 684 (Professional Internship/Practicum), and 9 hours of 685 (Directed Studies), if approved on the degree plan.
4. Undergraduate courses are not allowed to transfer to the MHA degree program.
5. Continuing education courses may not be used for graduate credit.
6. Extension courses are not acceptable for credit.

Exceptions will be permitted only in unusual cases and when petitioned by the student’s advisor, department chair, school Academic Affairs Office, and approved by the Office of Graduate and Professional Studies.

Additional Requirements

• Residence (p. 1153)
• Time Limit (p. 1153)
• Scholastic Requirements (p. 1153)
• Foreign Languages (p. 1153)
• Internship or Practicum (p. 1153)

Residence

No residence requirement exists; however, attention is directed to the rules regarding Limitations on the Use of Transfer, Extension and Certain Other Courses.

See Residence Requirements (p. 22).

Time Limit

All degree requirements for a master’s degree must be completed within a period of seven consecutive years. Coursework which is over seven calendar years old may not be applied to master’s degree. Time limits for coursework on the degree plan may also apply to transfer coursework.

Scholastic Requirements

To maintain good academic standing, a MHA student must maintain a minimum cumulative 3.000 GPR. If a student fails to attain a cumulative 3.000 GPR, he or she is placed on academic probation. A student on academic probation must raise his/her cumulative GPR to a 3.000 or above according to requirements to be set forth in the probation letter. Typically, this means raising the cumulative GPR to a 3.000 or higher by the end of the next long semester (fall/spring). If this requirement is not met, the School’s Academic Affairs Office will recommend that the Office of Graduate and Professional Studies block the student from further enrollment. If a student is blocked from further enrollment in the MHA program, he or she shall not be permitted to enroll in other MHA courses.

Foreign Languages

No specific language requirement exists for the Master of Health Administration degree program.

Internship or Practicum

Students in the MHA are required to fulfill a practicum requirement (PHPM 684). Instructions on submission and successful completion of the practicum are posted on the School of Public Health practicum website as well as with the department’s practicum coordinator. Students are to work specifically with their department practicum coordinator on meeting this curriculum course requirement. The practicum is overseen by the School of Public Health Practicum Coordinator in conjunction with the school’s master’s curriculum committee. Students must be in good academic standing, have completed all core public health courses, or be enrolled concurrently in no more than one core course at the time they enroll in the PHPM 684 course, and have no registration or university holds related to enrollment.

Application for Degree

For information on applying for your degree, please visit the Graduation (p. 24) section.

Master of Science in Public Health in Health Policy and Management

The Master of Science in Public Health (MSPH) is considered an equivalent professional public health master’s degree and requires additional coursework in research methods and statistics. Students can
choose among the variety of multi-disciplinary public health options to navigate their public health interest.

The degree is offered in all core disciplines of public health; epidemiology, biostatistics, environmental health, occupational safety and health, and health promotion and community health sciences. The MSPH is a thesis degree program that has culminating experiences as part of the degree requirements. Students will also participate in a practicum demonstrating overall public health problem solving skills.

An individual with a baccalaureate degree may apply for admission to the program. No coursework prerequisites exist for making a successful application to this degree program.

Note: The School of Public Health will not be accepting new students for the MSPH program from the 2015-2016 school year forward.

Program Requirements

Program Requirements

- Student's Advisory Committee (p. 1154)
- Degree Plan (p. 1154)
- Credit Requirement (p. 1154)
- Transfer of Credit (p. 1154)
- Limitations on the Use of Transfer, Extension and Certain Other Courses (p. 1155)
- Thesis (p. 1155)
  - Thesis Proposal (p. 1155)
  - Final Examination (p. 1155)

Student’s Advisory Committee

After receiving admission to graduate studies and enrolling, the student will consult with the head of his or her department concerning appointment of the chair of the advisory committee. The student’s advisory committee for the Master of Science degree will consist of no fewer than three graduate faculty representatives of the student’s fields of study and research. The committee chair or one of the co-chairs must be a member of Graduate Faculty in the student’s department.

Committee members must be comprised of at least one principal faculty member within SPH but external to the relevant department(s), all voting members must be members of the graduate faculty. The chair, in consultation with the student, will select the remainder of the advisory committee. The committee composition must be approved by the relevant department head.

If the chair of a student’s advisory committee voluntarily leaves the University and the student is near completion of the degree and wants the chair to continue to serve in this role, the student is responsible for securing a current member of the University Graduate Faculty, from the student’s academic program and located near the Texas A&M University campus site, to serve as the co-chair of the committee. The Department Head or Chair of Intercollegiate faculty may request in writing to the Associate Provost for Graduate and Professional Studies that a faculty member who is on an approved leave of absence or has voluntarily separated from the university, be allowed to continue to serve in the role of chair of a student’s advisory committee without a co-chair for us to one year. The students should be near completion of the degree. Extensions beyond the one year period can be granted with additional approval of the Dean.

The committee members’ signatures on the degree plan indicate their willingness to accept the responsibility for guiding and directing the entire academic program of the student and for initiating all academic actions concerning the student. Although individual committee members can be replaced by petition for valid reasons, a committee cannot resign in masse. The chair of the committee, who usually has immediate supervision of the student’s research and dissertation or record of study, has the responsibility for calling all meetings of the committee. The duties of the committee include responsibility for the proposed degree plan, the research proposal, guidance and supervision of the thesis study/ research and the final examination. In addition, the committee, as a group and as individual members, is responsible for counseling the student on academic matters and, in the case of academic deficiency, initiating recommendations to the Office of Graduate and Professional Studies.

Degree Plan

The student’s advisor, in consultation with the student, will develop the proposed degree plan. The final degree plan must be completed and filed with the Office of Graduate and Professional Studies prior to the deadlines imposed by the student’s college, and no later than 90 days prior to the date of the final oral examination.

The proposed/final degree plan should be submitted through the online Document Processing Submission System located on the website https://ogsdpps.tamu.edu.

Additional coursework may be added to the approved degree plan by petition if it is deemed necessary by the advisor to correct deficiencies in the student’s academic preparation. No changes can be made to the degree plan once the student’s Request for Final Examination or Request for Final Examination Exemption is approved by the Office of Graduate and Professional Studies.

Credit Requirement

A minimum of 45 hours of coursework is required for the MSPH degree. To demonstrate integration and application of subject matter learned and the development of written and oral communication skills, a student will be required to produce a thesis and participate in a Practicum. Concentration and elective courses vary among the core disciplines and will be addressed during advising and creation of the degree plan. Electives may be taken upon approval/advice from the student’s assigned advisor and will be listed by rubric, section, and description in the degree plan.

Transfer of Credit

A student may transfer up to 9 hours of graduate credit to the MSPH degree program on the advice and approval of the student’s advisory committee, department Chair, and school Academic Affairs Dean, and with the approval of the Office of Graduate and Professional Studies. Courses taken in residence at an accredited U.S. institution or approved international institution with a final grade of B or greater may be considered for transfer credit if, at the time the courses were completed, the courses would be accepted for credit toward a similar degree for a student in degree-seeking status at the host institution. Otherwise, the limitations stated in the preceding section apply. Coursework in which no formal grades are given or in which grades other than letter grades (A or B) are earned (for example, CR, P, S, U, H, etc.) is not accepted for transfer credit. Courses appearing on the degree plan with grades of D, F, or U may not be absolved by transfer work. Credit for coursework submitted for transfer from any college or university must be shown in semester credit hours or equated to semester credit hours. An official
A thesis that is deemed unacceptable by the Office of Graduate and Professional Studies because of excessive corrections will be returned to the student’s department head. The manuscript must be resubmitted as a new document, and the entire review process must begin again. All submittal deadlines must be met during the resubmittal process to graduate that semester.

**Thesis Proposal**

The student must prepare a thesis proposal for approval by the student’s advisory committee and the head of the major department or chair of the intercollegiate faculty, if applicable. This proposal must be submitted to the Office of Graduate and Professional Studies at least 20 working days prior to the submission of the request for the final examination.

Compliance issues must be addressed if a graduate student is performing research involving human subjects, animals, infectious biohazards and recombinant DNA. A student involved in these types of research should check with the Office of Research Compliance and Biosafety at (979) 458-1467 to address questions about all research compliance responsibilities. Additional information can also be obtained on the website [http://rcb.tamu.edu](http://rcb.tamu.edu).

**Thesis Defense/Final Examination**

A student must pass a final examination by dates announced each semester or summer term in the Office of Graduate and Professional Studies Calendar. The Office of Graduate and Professional Studies must be notified in writing of any cancellation. To be eligible to take the final examination, a student’s GPR must be at least 3.000 for courses on the degree plan and for all courses completed at Texas A&M which are eligible to be applied to a graduate degree, and there must be no unabsolved grades of D, F, or U for any course listed on the degree plan. To absolve a deficient grade, the student must repeat the course at Texas A&M University and achieve a grade of C or better. All coursework on the degree plan must have been completed with the exception of those hours for which the student is registered. Additionally, all English Language Proficiency requirements must be satisfied prior to scheduling the examination. If applicable, an approved thesis proposal must be on file in the Office of Graduate and Professional Studies according to published deadlines.

A request to hold and announce the final examination must be submitted to the Office of Graduate and Professional Studies a minimum of 10 working days in advance of the scheduled date for the examination. Examinations which are not completed and reported as satisfactory to the Office of Graduate and Professional Studies within 10 working days of the scheduled examination will be recorded as failures. A student may be given only one opportunity to repeat the final examination for the master’s degree and that must be within a time period that does not extend beyond the end of the next regular semester (summer terms are excluded).

For thesis students, the final examination covers the thesis and all work taken on the degree plan and at the option of the committee may be written or oral or both. The final examination may not be administered before the thesis is available to all members of the student’s advisory committee in substantially final form, and all members have had adequate time to review the document. The examination is conducted by the student’s advisory committee as finally constituted. A thesis option student must be registered in the University in the semester or summer term in which the final examination is taken. Persons other than members of the graduate faculty may, with mutual consent of the candidate and the major professor, attend final examinations for advanced degrees.
Upon completion of the questioning of the candidate, all visitors must excuse themselves from the proceedings. A positive vote by all members of the graduate advisory committee with at most one dissension is required to pass a student on his or her exam. A department, or interdisciplinary degree program, may have a stricter requirement provided there is consistency within all degree programs within a department or interdisciplinary program.

A thesis candidate may petition to be exempt from his/her final examination provided his/her degree plan GPR is 3.50 or greater and he/she has the approval of the advisory committee, the head of the student’s department, the Associate Dean for Academic Affairs, and Office of Graduate and Professional Studies. It is required that the petition for exemption be submitted the same semester the student submits the thesis.

### Additional Requirements

#### Additional Requirements

- Residence (p. 1156)
- Time Limit (p. 1156)
- Scholastic Requirements (p. 1156)
- Foreign Languages (p. 1156)
- Internship or Practicum (p. 1156)
- Application for Degree (p. 1156)

#### Residence

No residence requirement exists; however, attention is directed to the rules regarding Limitations on the Use of Transfer, Extension and Certain Other Courses.

#### Time Limit

All degree requirements must be completed within a period of seven consecutive years for the degree to be granted. A course will be valid until seven years after the end of the semester in which it was taken. Graduate credit for coursework which is more than seven calendar years old at the time of the final examination (oral or written) may not be used to satisfy degree requirements.

A student who has a thesis must have the final corrected version of the thesis cleared by the Office of Graduate and Professional Studies no later than one year after the final examination, or approval of a petition for exemption from the final exam, or within the seven-year time limit, whichever occurs first. Failure to do so will result in the degree not being awarded.

#### Scholastic Requirements

To maintain good academic standing, a MSPH student must maintain a minimum cumulative 3.00 GPR. If a student fails to attain a cumulative 3.00 GPR, he or she is placed on academic probation. A student on academic probation must raise his/her cumulative GPR to a 3.00 or above according to requirements to be set forth in the probation letter. Typically, this means raising the cumulative GPR to a 3.00 or higher by the end of the next long semester (fall/spring). If this requirement is not met, the School’s Academic Affairs Office will recommend that the Office of Graduate and Professional Studies block the student from further enrollment. If a student is blocked from further enrollment in the MSPH program, he or she shall not be permitted to enroll in other MSPH courses.

### Foreign Languages

No specific language requirement exists for the Master of Science in Public Health degree program.

### Internship or Practicum

Students in the MSPH are required to fulfill a practicum requirement. Specific course names and numbers by department are PHEB 684, PHEO 684, PHPM 684, and HPCH 684. Instructions on submission and successful completion of the practicum are posted on the School of Public Health practicum website as well as with the department’s practicum coordinator. Students are to work specifically with their department practicum coordinator on meeting this curriculum course requirement. Students must be in good academic standing, have completed all core public health courses, or be enrolled concurrently in no more than one core course at the time they enroll in the 684 course, and have no registration or university blocks related to enrollment.

### Application for Degree

For information on applying for your degree, please visit the Graduation (p. 24) section.

### Doctor of Philosophy in Health Services Research

Work leading to the degree of Doctor of Philosophy (PhD) is designed to give the candidate a thorough and comprehensive knowledge of his or her professional field and training in methods of research. The final basis for granting the degree shall be the candidate’s grasp of the subject matter of a broad field of study and a demonstrated ability to do independent research. In addition, the candidate must have acquired the ability to express thoughts clearly and forcefully in both oral and written languages. The degree is not granted solely for the completion of coursework, residence and technical requirements, although these must be met.

For a student who has completed a master’s degree, a DDS/DMD, DVM or MD at a U.S. institution, a minimum of 64 hours is required on the degree plan for the degree of Doctor of Philosophy. For a student who has completed a baccalaureate degree but not a master’s degree or a U.S. DDS/DMD, DVM or MD, a minimum of 96 hours is required on the degree plan for the degree of Doctor of Philosophy.

### Steps to Fulfill Doctoral Degree Requirements

#### Meet with departmental/intercollegiate graduate advisor to plan course of study for first semester.

**When:** Before first semester registration.

**Approved by:** Graduate advisor.

Note: Once formal coursework is complete, you must be continuously registered until all degree requirements have been met. See Continuous Registration Requirements (p. 25).

For degree curriculum see Department of Health Policy and Management (http://sph.tamhsc.edu/hpm).

**Program Requirements**

**Program Requirements**

- Student's Advisory Committee (p. 1157)
- Degree Plan (p. 1158)
- Transfer of Credit (p. 1158)
- Research Proposal (p. 1158)
- Examinations (p. 1159) • Preliminary Examination (p. 1159) • Final Examination/Dissertation Defense (p. 1160)
- Dissertation (p. 1161)

**Student's Advisory Committee**

After receiving admission to graduate studies and enrolling, the student will consult with the head of his or her major or administrative department (or chair of the intercollegiate faculty) concerning appointment of the chair of the advisory committee. The student’s advisory committee will consist of no fewer than four members of the graduate faculty representative of the student’s several fields of study and research, where the chair or co-chair must be from the student’s department (or intercollegiate faculty,
if applicable), and at least one or more of the members must have an appointment to a department other than the student’s major department. The outside member for a student in an interdisciplinary degree program must be from a department different from the chair of the student’s committee.

The chair, in consultation with the student, will select the remainder of the advisory committee. Only graduate faculty members located on Texas A&M University campuses may serve as chair of a student’s advisory committee. Other Texas A&M University graduate faculty members located off-campus may serve as a member or co-chair (but not chair), with a member as the chair.

If the chair of a student’s advisory committee voluntarily leaves the University and the student is near completion of the degree and wants the chair to continue to serve in this role, the student is responsible for securing a current member of the University Graduate Faculty, from the student’s academic program and located near the Texas A&M University campus site, to serve as the co-chair of the committee. The Department Head or Chair of Intercollegiate faculty may request in writing to the Associate Provost for Graduate and Professional Studies that a faculty member who is on an approved leave of absence or has voluntarily separated from the university, be allowed to continue to serve in the role of chair of a student’s advisory committee without a co-chair for us to one year. The students should be near completion of the degree. Extensions beyond the one year period can be granted with additional approval of the Dean.

The committee members’ signatures on the degree plan indicate their willingness to accept the responsibility for guiding and directing the entire academic program of the student and for initiating all academic actions concerning the student. Although individual committee members may be replaced by petition for valid reasons, a committee cannot resign en masse. The chair of the committee, who usually has immediate supervision of the student’s research and dissertation or record of study, has the responsibility for calling all meetings of the committee. The duties of the committee include responsibility for the proposed degree plan, the research proposal, the preliminary examination, the dissertation or record of study and the final exam. In addition, the committee, as a group and as individual members, is responsible for counseling the student on academic matters, and, in the case of academic deficiency, initiating recommendations to the Office of Graduate and Professional Studies.

Degree Plan

The student’s advisory committee will evaluate the student’s previous education and degree objectives. The committee, in consultation with the student, will develop a proposed degree plan and outline a research problem which, when completed, as indicated by the dissertation (or its equivalent for the degree of Doctor of Education or the degree of Doctor of Engineering), will constitute the basic requirements for the degree. The degree plan must be filed with the Office of Graduate and Professional Studies prior to the deadline imposed by the student’s college and no later than 90 days prior to the preliminary examination.

This proposed degree plan should be submitted through the online Document Processing Submission System located on the website http://ogsdpss.tamu.edu. A minimum of 64 hours is required on the degree plan for the Doctor of Philosophy for a student who has completed a master’s degree. A student who has completed a DDS/DMD, DVM or MD degree at a U.S. institution is also required to complete a minimum of 64 hours. A student who has completed a baccalaureate degree but not a master’s degree will be required to complete a 96-hour degree plan. Completion of a DDS/DMD, DVM or MD degree at a foreign institution requires completion of a minimum of 96 hours for the Doctor of Philosophy. A field of study may be primarily in one department or in a combination of departments. A degree plan must carry a reasonable amount of 691 or 5V98/5V99 (research).

Additional coursework may be added by petition to the approved degree plan by the student’s advisory committee if it is deemed necessary to correct deficiencies in the student’s academic preparation. No changes can be made to the degree plan once the student’s Request for Final Examination is approved by the Office of Graduate and Professional Studies.

Approval to enroll in any professional course (900-level) should be obtained from the head of the department (or Chair of the intercollegiate faculty, if applicable) in which the course will be offered before including such a course on a degree plan.

No credit may be obtained by correspondence study, by extension or for any course of fewer than three weeks duration.

Transfer of Credit

Courses for which transfer credits are sought must have been completed with a grade of B or greater and must be approved by the student’s advisory committee and the Office of Graduate and Professional Studies. These courses must not have been used previously for another degree. Except for officially approved cooperative doctoral programs, credit for thesis or dissertation research or the equivalent is not transferable. Credit for “internship” coursework in any form is not transferable. Courses taken in residence at an accredited U.S. institution or approved international institution with a final grade of B or greater will be considered for transfer credit if, at the time the courses were completed, the courses would be accepted for credit toward a similar degree for a student in degree-seeking status at the host institution. Credit for coursework taken by extension is not transferable. Coursework in which no formal grades are given or in which grades other than letter grades (A or B) are earned (for example, CR, P, S, U, H, etc.) is not accepted for transfer credit. Credit for coursework submitted for transfer from any college or university must be shown in semester credit hours, or equated to semester credit hours.

Courses used toward a degree at another institution may not be applied for graduate credit. If the course to be transferred was taken prior to the conferral of a degree at the transfer institution, a letter from the registrar at that institution stating that the course was not applied for credit toward the degree must be submitted to the Office of Graduate and Professional Studies.

Grades for courses completed at other institutions are not included in computing the GPR. An official transcript from the university at which transfer courses are taken must be sent directly to the Office of Admissions.

Research Proposal

The general field of research to be used for the dissertation should be agreed on by the student and the advisory committee at their first meeting, as a basis for selecting the proper courses to support the proposed research.

As soon thereafter as the research project can be outlined in reasonable detail, the dissertation research proposal should be completed. The research proposal should be approved at a meeting of the student’s
the student's advisory committee.

The preliminary examination is required. The preliminary examination for a doctoral student shall be given no earlier than a date at which the student is within 6 credit hours of completion of the formal coursework on the degree plan (i.e., all coursework on the degree plan except 681, 684, 690, 691, 5V98, 5V99 and 692 courses). The student is strongly encouraged to complete the Preliminary Examination no later than the end of the semester following the completion of the formal coursework on the degree plan. The Office of Graduate and Professional Studies must receive the results of the preliminary examination at least 14 weeks prior to the final examination date. The examination shall be oral and written unless otherwise recommended by the student's advisory committee and approved by the Office of Graduate and Professional Studies. The written part of the examination will cover all fields of study included in the student's degree plan. Each member of the advisory committee is responsible for administering a written examination in his or her particular field, unless he or she chooses to waive participation in this part of the examination. Two or more members of the advisory committee may give a joint written examination. One or more members may require a student to take a departmental or intercollegiate faculty examination to supplement or replace a written examination. Each written examination must be completed and reported as satisfactory to the chair of the advisory committee before the oral portion of the examination may be held. In case any written examination is reported unsatisfactory, the entire advisory committee must agree (1) to proceed with the oral portion of the preliminary examination, or (2) to adopt another course of action regarding the unsatisfactory written examination.

Prior to scheduling the preliminary examination with the other committee members, the committee chair will review the eligibility criteria with the student, using the Preliminary Examination Checklist to ensure the student is ready for the examination. The following list of eligibility requirements applies.

- Student is registered at Texas A&M University for the semester or summer term during which any portion of the preliminary examination may fall. If the entire examination falls between semesters, then the student must be registered for the term immediately preceding the examination.
- An approved degree plan was on file with the Office of Graduate and Professional Studies at least 90 days prior to the first written examination.
- Student’s cumulative GPR is at least 3.000.
- Student’s degree plan GPR is at least 3.000.
- All English language proficiency requirements have been satisfied.
- All committee members have scheduled or waived the written portion and agreed to attend the oral portion of the examination or have found a substitute. Only one substitution is allowed and it cannot be for the committee chair.
- At the end of the semester in which the exam is given, there are no more than 6 hours of coursework remaining on the degree plan (except 681, 684, 690, 691, 5V98, 5V99 and 692). The head of the student’s department (or Chair of the Intercollegiate Faculty, if applicable) has the authority to approve a waiver of this criterion.
- The time span from the first written examination to the oral is no more than three weeks. (In cases of department-wide written examinations, this criterion is not applicable.) The head of the student’s department (or chair of the intercollegiate faculty, if applicable) has the authority to approve a waiver of this criterion.

Once all requirements are met, departments or intercollegiate faculty may announce the schedule of the written and oral parts of the examination.

Credit for the preliminary examination is not transferable. If a departmental or intercollegiate faculty examination is used as part of the written portion of the preliminary examination, it must be the last examination offered prior to the date scheduled for the preliminary examination. In the schedule of the written portion, all members of the student’s advisory committee are to be included.

Through the preliminary examination, the student’s advisory committee should satisfy itself that the student has demonstrated the following qualifications:

1. a mastery of the subject matter of all fields in the program;
2. an adequate knowledge of the literature in these fields and an ability to carry out bibliographical research.

In case a student is required to take, as a part of the written portion of a preliminary examination, an examination administered by a department or intercollegiate faculty, the department or intercollegiate faculty must:

1. offer the examination at least once every six months. The departmental or interdisciplinary degree program examination should be announced at least 30 days prior to the scheduled examination date. In cases of department-wide written examinations, this criterion is not applicable. The head of the student’s department (or chair of the intercollegiate faculty, if applicable) has the authority to approve a waiver of this criterion.
2. assume the responsibility of marking the examination satisfactory or unsatisfactory, or otherwise graded, and in the case of unsatisfactory, stating specifically the reasons for such a mark.
3. forward the marked examination to the chair of the student’s advisory committee within one week after the examination.

The chair of the student’s advisory committee is responsible for making all written examinations available to the members of the advisory committee at or before the oral portion of the preliminary examination. A positive vote by all members of the graduate committee with at most one dissertation is required to pass a student on his or her preliminary exam. A department or intercollegiate faculty can have a stricter requirement provided there...
is consistency within all degree programs within a department or an interdisciplinary degree program.

The chair of the advisory committee will promptly report the results of the Preliminary Examination to the Office of Graduate and Professional Studies, using the Report of Doctoral Preliminary Examination form and the Preliminary Examination checklist. Both forms must have the appropriate signatures. These forms should be submitted to the Office of Graduate and Professional Studies within 10 working days of the scheduled preliminary examination.

The Report of the Preliminary Examination form must be submitted with original signatures of the approved committee members. If an approved committee member substitution (1 only) has been made, his/her signature must also be included on the form submitted to the Office of Graduate and Professional Studies. The original signature of the department head is also required on the form.

After passing the required oral and written preliminary examinations for the doctoral degree, the student must complete the final examination for the degree within four calendar years. Otherwise, the student will be required to repeat the preliminary examination. Upon approval of the student’s advisory committee, with no more than one member dissenting, and approval of the Office of Graduate and Professional Studies, a student who has failed the preliminary examination may be given one re-examination. Adequate time must be given to permit the student to address the inadequacies emerging from the first examination (normally six months). The student and the advisory committee should jointly negotiate a mutually acceptable date for this purpose.

A student must be registered at Texas A&M University for a minimum of one semester credit hour in the semester or summer term in which they will take any portion of the Preliminary Examination.

### Steps for Completing the Preliminary Examination

<table>
<thead>
<tr>
<th>Step</th>

### Final Examination/Dissertation Defense

The candidate for the doctoral degree must pass a final examination by deadline dates announced in the “Office of Graduate and Professional Studies Calendar” each semester or summer term. The doctoral student is allowed only one opportunity to take the final examination. No student may be given a final examination unless his or her current official cumulative and degree plan GPAs are 3.000 or better and he or she has been admitted to candidacy. No unabsolved grades of D, F, or U for any course can be listed on the degree plan. To absolve a deficient grade, a student must repeat the course and achieve a grade of C or better. A student must have completed all coursework on his or her degree plan with the exception of 691, 5V98, or 5V99 (research) or 692 (Professional Study) hours. The student must be registered for all remaining hours; no hours remain to be taken on the degree plan. The preliminary examination results must have been submitted to the Office of Graduate and Professional Studies 14 weeks prior to the date of the defense. The research proposal must have been submitted to the Office of Graduate and Professional Studies 25 working days prior to the date of the final examination/defense. Any changes to the degree plan must be approved by the Office of Graduate and Professional Studies prior to the approval of the final examination. The request to hold and announce the final examination must be submitted to the Office of Graduate and Professional Studies a minimum of 10 working days in advance of the scheduled date. Examination/Defense results must be submitted to the Office of Graduate and Professional Studies within 10 working days of
The ability to perform independent research must be demonstrated by The Office of Graduate and Professional Studies must be notified in writing of any cancellations. 

The student’s advisory committee will conduct this examination. The final examination is not to be administered until the dissertation or record of study is available in substantially final form to the student’s advisory committee, and all concerned have had adequate time to review the document. Additionally, all English Language Proficiency requirements must be satisfied prior to scheduling the examination. Whereas the final examination may cover the broad field of the candidate’s training, it is presumed that the major portion of the time will be devoted to the dissertation and closely allied topics. Persons other than members of the graduate faculty may, with mutual consent of the candidate and the chair of the advisory committee, be invited to attend a final examination for an advanced degree. A positive vote by all members of the graduate committee with at most one dissension is required to pass a student on his or her exam. A department can have a stricter requirement provided there is consistency within all degree programs within a department. Upon completion of the questioning of the candidate, all visitors must excuse themselves from the proceedings.

The advisory committee will submit its recommendations on the appropriate Report of the Final Examination for Doctoral Candidates form to the Office of Graduate and Professional Studies regarding acceptability of the candidate for the doctoral degree. A student must be registered in the University in the semester or summer term in which the final examination is taken.

The Report of the Final Examination Form must be submitted with original signatures of only the committee members approved by the Office of Graduate and Professional Studies. If an approved committee member substitution (1 only) has been made, his/her signature must be included on the form submitted to the Office of Graduate and Professional Studies.

Dissertation
The ability to perform independent research must be demonstrated by the dissertation, which must be the original work of the candidate. Whereas acceptance of the dissertation is based primarily on its scholarly merit, it must also exhibit creditable literary workmanship. The format of the dissertation must be acceptable to the Office of Graduate and Professional Studies. Guidelines for the preparation of the thesis are available in the Thesis Manual, which is available online at http://ogaps.tamu.edu.

After successful defense and approval by the student’s advisory committee and the head of the student’s major department (or chair of the intercollegiate faculty, if applicable), a student must submit his/her dissertation in electronic format as a single PDF file. The PDF file must be uploaded to the website, http://ogaps.tamu.edu. Additionally, a signed approval form must be brought or mailed to the Office of Graduate and Professional Studies. Both the PDF file and the signed approval form are required by the deadline.

Deadline dates for submitting are announced each semester or summer term in the Office of Graduate and Professional Studies Calendar (see Time Limit statement). These dates also can be accessed via the website http://ogaps.tamu.edu.

Before a student can be “cleared” by Thesis and Dissertation Services, a processing fee must be paid through Student Business Services. This processing fee is for the thesis/dissertation services provided. After commencement, dissertations are digitally stored and made available through the Texas A&M Libraries.

A dissertation that is deemed unacceptable by the Office of Graduate and Professional Studies because of excessive corrections will be returned to the student’s department head or chair of the intercollegiate faculty. The manuscript must be resubmitted as a new document, and the entire review process must begin anew. All original submittal deadlines must be met during the resubmittal process in order to graduate.

Additional Requirements

Additional Requirements
- Residence (p. 1161)
- Time Limit (p. 1161)
- Continuous Registration (p. 1162)
- Admission to Candidacy (p. 1162)
- Languages (p. 1162)
- 99-Hour Cap on Doctoral Degree (p. 1162)
- Application for Degree (p. 1162)

Residence
A student who enters the doctoral degree program with a baccalaureate degree must spend one academic year plus one semester in resident study at Texas A&M University. A student who holds master’s degree when he/she enters doctoral degree program must spend one academic year in resident study. One academic year may include two adjacent regular semesters or one regular semester and one adjacent 10-week summer semester. The third semester is not required to be adjacent to the one year. Enrollment for each semester must be a minimum of 9 credit hours each to satisfy the residence requirement.

To satisfy the residence requirement, the student must complete a minimum of 9 credit hours per semester or 10-week summer semester in resident study at Texas A&M University for the required period. A student who enters a doctoral degree program with a baccalaureate degree may fulfill residence requirements in excess of one academic year (18 credit hours) by registration during summer sessions or by completion of a less-than-full course load (in this context a full course load is considered 9 credit hours per semester).

Students who are employed full-time while completing their degree may fulfill total residence requirements by completion of less-than-full time course loads each semester. In order to be considered for this, the student is required to submit a Petition for Waivers and Exceptions along with verification of his/her employment to the Office of Graduate and Professional Studies. An employee should submit verification of his/her employment at the time he/she submits the degree plan. See Registration. (p. 25)

See Residence Requirements (p. 22).

Time Limit
All requirements for doctoral degrees must be completed within a period of ten consecutive calendar years for the degree to be granted. A course will be considered valid until 10 years after the end of the semester in which it is taken. Graduate credit for coursework more
than ten calendar years old at the time of the final oral examination may not be used to satisfy degree requirements.

After passing the required preliminary oral and written examinations for a doctoral degree, the student must complete the final examination within four calendar years. Otherwise, the student will be required to repeat the preliminary examination.

A final corrected version of the dissertation or record of study in electronic format as a single PDF file must be cleared by the Office of Graduate and Professional Studies no later than one year after the final examination or within the 10-year time limit, whichever occurs first. Failure to do so will result in the degree not being awarded.

Continuous Registration

A student in a program leading to a Doctor of Philosophy who has completed all coursework on his/her degree plan other than 691, 5V98 or 5V99 (research) are required to be in continuous registration until all requirements for the degree have been completed. See Continuous Registration Requirements (p. 25).

Admission to Candidacy

To be admitted to candidacy for a doctoral degree, a student must have:

1. completed all formal coursework on the degree plan with the exception of any remaining 681, 684, 690 and 691, or 5V98 and 5V99,
2. a 3.0 Graduate GPA and a Degree Plan GPA of at least 3.0 with no grade lower than C in any course on the degree plan,
3. passed the preliminary examination (written and oral portions),
4. submitted an approved dissertation proposal,
5. met the residence requirements. The final examination will not be authorized for any doctoral student who has not been admitted to candidacy.

Languages

A student is required to possess a competent command of English. For English language proficiency requirements, see the Admissions section of this catalog. The doctoral (PhD) foreign language requirement at Texas A&M University is a departmental option, to be administered and monitored by the individual departments of academic instruction.

99-Hour Cap on Doctoral Degrees

In Texas, public colleges and universities are funded by the state according to the number of students enrolled. In accordance with legislation passed by the Texas Legislature, the number of hours for which state universities may receive subvention funding at the doctoral rate for any individual is limited to 99 hours. Texas A&M University and other universities will not receive subvention for hours in excess of the limit.

Institutions of higher education are allowed to charge the equivalent of nonresident tuition to a resident doctoral student who has enrolled in 100 or more semester credit hours of doctoral coursework.

A doctoral student at Texas A&M has seven years to complete his/her degree before being charged out-of-state tuition. A doctoral student who, after seven years of study, has accumulated 100 or more doctoral hours will be charged tuition at a rate equivalent to out-of-state tuition. Please note that the tuition increases will apply to Texas residents as well as students from other states and countries who currently are charged tuition at the resident rate. This includes those doctoral students who hold GAT, GANT, and GAR appointments of 20 or more hours and recipients of competitive fellowships who receive more than $1,000 per semester. Doctoral students who, after seven years of study, have not accumulated 100 hours are eligible to pay in-state tuition if otherwise eligible.

For count purposes, a year is counted as three semesters, normally fall, spring and summer. Using this system, a student is allowed 21 semesters as a G8 student to complete the doctoral degree before being penalized with the higher tuition rate. Any semester in which a G8 student is enrolled for a doctoral level course is counted.

The following majors are exempt from the 99-Hour Cap on Doctoral Degrees:

- Biomedical Sciences
- Biochemistry
- Microbiology
- Genetics
- Toxicology
- Nutrition Sciences
- Community Clinical Psychology
- Counseling Psychology
- School Psychology
- Veterinary Pathology
- Clinical Psychology
- Counseling Psychology
- Medical Sciences
- Health Services Research
- Health Promotion and Community Health Sciences
- Epidemiology and Environmental Health

The hour limit for these majors is 130 doctoral hours.

Application for Degree

For information on applying for your degree, please visit the Graduation (p. 24) section.

Master of Public Health in Occupational Safety and Health

The Master of Public Health (MPH) is a multi-disciplinary professional degree program designed to provide graduate level practical training in areas specializing in delivering public health practice. The degree is offered in all core disciplines of public health; epidemiology, biostatistics, environmental and occupational health, health policy and management, and health promotion and community health sciences. The Master of Public Health is a non-thesis degree program that has culminating experiences as part of the degree requirements. Students will participate in a practicum demonstrating overall public health problem solving skills and a capstone class.

An individual with a baccalaureate degree or a physician licensed to practice medicine in the United States may apply for admission to the program. No coursework prerequisites exist for making a successful application to this degree program.

For degree curriculum, see the Department of Environmental and Occupational Health (http://sph.tamhsc.edu/eoh).
Program Requirements

Program Requirements

- Student's Advisory Committee (p. 1163)
- Degree Plan (p. 1163)
- Credit Requirement (p. 1163)
- Transfer of Credit (p. 1163)
- Limitations on the Use of Transfer, Extension and Certain Other Courses (p. 1163)

Student Advisory Committee

The Student Advisory Committee for the MPH consists of an assigned faculty advisor. After receiving admission to the program and before enrolling for coursework, the student will consult with their assigned faculty advisor to receive additional information related to curriculum and processing of the degree plan. The faculty advisor must have graduate faculty membership in the academic program. If at any point of the student’s time in pursuit of the degree the assigned advisor is no longer available, the department will assign a new advisor and require a comprehensive advisory session to ensure the student is making progress according to degree program requirements.

Degree Plan

The student's advisor, in consultation with the student, will develop the proposed degree plan. The degree plan must be completed and filed with the Office of Graduate and Professional Studies prior to the deadlines imposed by the student's college, and no later than the dates announced in the Office of Graduate and Professional Studies calendar of deadlines for graduation.

The proposed/final degree plan should be submitted through the online Document Processing Submission System located on the website https://ogsdpp.tamu.edu.

Additional coursework may be added to the approved degree plan by petition if it is deemed necessary by the advisor to correct deficiencies in the student's academic preparation.

Credit Requirement

A minimum of 45 hours of coursework is required for the Master of Public Health degree. To demonstrate integration and application of subject matter learned and the development of written and oral communication skills, a student will be required to take SOPH 680 as part of the culminating experience requirement to graduate. Concentration and elective courses vary among the core disciplines and will be addressed during advising and creation of the degree plan. Electives may be taken upon approval/advice from the student’s assigned advisor and will be listed by rubric, section, and description in the degree plan.

Transfer of Credit

A student may transfer up to 9 hours of graduate credit to the Master of Public Health degree program on the advice and approval of the student’s advisory committee, department Chair, and school Academic Affairs Dean, and with the approval of the Office of Graduate and Professional Studies. Courses taken in residence at an accredited U.S. institution or approved international institution with a final grade of B or greater may be considered for transfer credit if, at the time the courses were completed, the courses would be accepted for credit toward a similar degree for a student in degree-seeking status at the host institution. Otherwise, the limitations stated in the preceding section apply. Coursework in which no formal grades are given or in which grades other than letter grades (A or B) are earned (for example, CR, P, S, U, H, etc.) is not accepted for transfer credit. Courses appearing on the degree plan with grades of D, F, or U may not be absolved by transfer work. Credit for coursework submitted for transfer from any college or university must be shown in semester credit hours or equated to semester credit hours. An official transcript from the university at which the transfer coursework was taken must be sent directly to the Office of Admissions.

Courses used toward another degree at another institution may not be applied for graduate credit. If the course to be transferred was taken prior to the conferral of a degree at the transfer institution, a letter from the registrar at that institution stating that the course was not applied for credit toward the degree must be submitted to the Office of Graduate and Professional Studies.

Grades for courses completed at other institutions are not included in computing the GPR.

Limitations on the Use of Transfer, Extensions, and Certain Other Courses

If otherwise acceptable, certain courses may be used toward meeting credit-hour requirements for the master’s degree with the following limitations.

1. The maximum number of credit hours allowed toward the MPH as transfer credit is 9.
2. Courses previously used for another degree are not acceptable for credit.
3. A maximum of 6 hours of 684 (Professional Internship/Practicum), and 9 hours of 685 (Directed Studies), if approved on the degree plan.
4. Undergraduate courses are not allowed to transfer to the MPH degree program.
5. Continuing education courses may not be used for graduate credit.
6. Extension courses are not acceptable for credit.

Exceptions will be permitted only in unusual cases and when petitioned by the student’s advisory committee, department Chair, school Academic Affairs Office, and approved by the Office of Graduate and Professional Studies.

Additional Requirements

Additional Requirements

- Residence (p. 1163)
- Time Limit (p. 1164)
- Scholastic Requirements (p. 1164)
- Foreign Languages (p. 1164)
- Internship or Practicum (p. 1164)
- Application for Degree (p. 1164)

Residence

No residence requirement exists; however, attention is directed to the rules regarding Limitations on the Use of Transfer, Extension and Certain Other Courses.
Time Limit
All degree requirements for a master's degree must be completed within a period of seven consecutive years. Coursework which is over seven calendar years old may not be applied to master's degree. Time limits for coursework on the degree plan may also apply to transfer coursework.

Scholastic Requirements
To maintain good academic standing, a MPH student must maintain a minimum cumulative 3.000 GPR. If a student fails to attain a cumulative 3.000 GPR, he or she is placed on academic probation. A student on academic probation must raise his/her cumulative GPR to a 3.000 or above according to requirements to be set forth in the probation letter. Typically, this means raising the cumulative GPR to a 3.000 or higher by the end of the next long semester (fall/spring). If this requirement is not met, the School of Public Health’s Academic Affairs Office will recommend that the Office of Graduate and Professional Studies block the student from further enrollment. If a student is blocked from further enrollment in the MPH program, he or she shall not be permitted to enroll in other MPH courses.

Foreign Languages
No specific language requirement exists for the Master of Public Health degree program.

Internship or Practicum
Students in the MPH are required to fulfill a practicum requirement. Specific course names and numbers by department are PHEB 684, PHEO 684, PHPM 684, and HPCH 684. Instructions on submission and successful completion of the practicum are posted on the School of Public Health practicum website as well as with the department’s practicum coordinator. Students are to work specifically with their department practicum coordinator on meeting this curriculum course requirement. Students must be in good academic standing, have completed all core public health courses, or be enrolled concurrently in no more than one core course at the time they enroll in the 684 course, and have no registration or university blocks related to enrollment.

Application for Degree
For information on applying for your degree, please visit the Graduation (p. 24) section.

Public Health - Certificate
The Public Health Certificate Program is designed as an academic program specifically for working professionals in the public health field and for those interested with a general overview of the core functions and disciplines of public health to provide the tools that are fundamental in serving Texas communities.

This certificate is best suited for individuals who may want to pursue a graduate degree in the future, but who want to experience coursework to determine the feasibility of such activity. Completed coursework may be applied to degree-seeking pathways depending on grade received.

Information about admission and application requirements can be found at: http://sph.tamhsc.edu/degrees/certificate.html

Course Requirements
Students must complete the following courses to earn the Public Health Certificate:

- PHEB 600 – Introduction to Epidemiology
- PHEB 602 – Biostatistics I
- PHEO 600 – Principles of Environmental and Occupational Health
- HPCH 603 – Social and Behavioral Determinants of Health
- PHPM 605 – Introduction to Health Policy and Management

Grading
Certificate students will have the flexibility of taking classes any given semester.

- Applicants must hold a Bachelor's degree from an accredited college or university with a minimum grade point average (GPA) of 3.0.
- All courses taken will be 600-level courses (for a letter grade)
- The Public Health Certificate is awarded upon achieving a "C" or better in all required courses
- Certificate-seeking students wishing to pursue a graduate degree will proceed through the application process as all other applicants
- 600-level coursework completed while a certificate-seeking student may be considered for inclusion on the student's degree plan (following the school's course petition process for approval) once admitted into a degree program within the school

Department of Environmental and Occupational Health

http://sph.tamhsc.edu/eoh/

Interim Head: Virender Sharma, PhD

The Department of Environmental and Occupational Health is concerned with the health effects of exposures to air and water pollution, pesticides, organic solvents, dusts and physical hazards, which occur in the environment, the home or the workplace.

The department draws from the knowledge generated from disciplines that contribute to recognizing, assessing, and controlling these risks that include epidemiology, toxicology, microbiology, safety engineering, industrial hygiene, medicine, nursing, law and labor economics. The department includes a multidisciplinary core faculty and a large adjunct faculty.

For degree curricula see http://sph.tamhsc.edu/eoh/.

Faculty

Benden, Mark, Associate Professor
Environmental & Occupational Health
PhD, Texas A&M University, 2006
MS, Texas A&M University, 1992

Cizmas, Leslie, Assistant Professor
Environmental & Occupational Health
PhD, Texas A&M University, 2003

Program Requirements
Student Advisory Committee

The Student Advisory Committee for the MPH consists of an assigned faculty advisor. After receiving admission to the program and before enrolling for coursework, the student will consult with their assigned faculty advisor to receive additional information related to curriculum and processing of the degree plan. The faculty advisor must have graduate faculty membership in the academic program. If at any point of the student's time in pursuit of the degree the assigned advisor is no longer available, the department will assign a new advisor and require a comprehensive advisory session to ensure the student is making progress according to degree program requirements.

Degree Plan

The student’s advisor, in consultation with the student, will develop the proposed degree plan. The degree plan must be completed and filed with the Office of Graduate and Professional Studies prior to the deadlines imposed by the student’s college, and no later than the dates announced in the Office of Graduate and Professional Studies calendar of deadlines for graduation.

The proposed/final degree plan should be submitted through the online Document Processing Submission System located on the website https://ogsdpss.tamu.edu.

Additional coursework may be added to the approved degree plan by petition if it is deemed necessary by the advisor to correct deficiencies in the student’s academic preparation.

Credit Requirement

A minimum of 45 hours of coursework is required for the Master of Public Health degree. To demonstrate integration and application of subject matter learned and the development of written and oral communication skills, a student will be required to take SOPH 680 as part of the culminating experience requirement to graduate. Concentration and elective courses vary among the core disciplines and will be addressed during advising and creation of the degree plan. Electives may be taken upon approval/advice from the student's assigned advisor and will be listed by rubric, section, and description in the degree plan.

Transfer of Credit

A student may transfer up to 9 hours of graduate credit to the Master of Public Health degree program on the advice and approval of the student’s advisory committee, department Chair, and school Academic Affairs Dean, and with the approval of the Office of Graduate and Professional Studies. Courses taken in residence at an accredited U.S. institution or approved international institution with a final grade of B or greater may be considered for transfer credit if, at the time the courses were completed, the courses would be accepted for credit toward a similar degree for a student in degree-seeking status at the host institution. Otherwise, the limitations stated in the preceding section apply. Coursework in which no formal grades are given or in which grades other than letter grades (A or B) are earned (for example, CR, P, S, U, H, etc.) is not accepted for transfer credit. Courses appearing on the degree plan with grades of D, F, or U may not be absolved by transfer work. Credit for coursework submitted for transfer from any college or university must be shown in semester credit hours or equated to semester credit hours. An official transcript from the university at which the transfer coursework was taken must be sent directly to the Office of Admissions.
Courses used toward another degree at another institution may not be applied for graduate credit. If the course to be transferred was taken prior to the conferral of a degree at the transfer institution, a letter from the registrar at that institution stating that the course was not applied for credit toward the degree must be submitted to the Office of Graduate and Professional Studies.

Grades for courses completed at other institutions are not included in computing the GPR.

**Limitations on the Use of Transfer, Extensions, and Certain Other Courses**

If otherwise acceptable, certain courses may be used toward meeting credit-hour requirements for the master’s degree with the following limitations.

1. The maximum number of credit hours allowed toward the MPH as transfer credit is 9.
2. Courses previously used for another degree are not acceptable for credit.
3. A maximum of 6 hours of 684 (Professional Internship/Practicum), and 9 hours of 685 (Directed Studies), if approved on the degree plan.
4. Undergraduate courses are not allowed to transfer to the MPH degree program.
5. Continuing education courses may not be used for graduate credit.
6. Extension courses are not acceptable for credit.

Exceptions will be permitted only in unusual cases and when petitioned by the student’s advisory committee, department Chair, school Academic Affairs Office, and approved by the Office of Graduate and Professional Studies.

**Additional Requirements**

**Additional Requirements**

- Residence (p. 1166)
- Time Limit (p. 1166)
- Scholastic Requirements (p. 1166)
- Foreign Languages (p. 1166)
- Internship or Practicum (p. 1166)
- Application for Degree (p. 1166)

**Residence**

No residence requirement exists; however, attention is directed to the rules regarding Limitations on the Use of Transfer, Extension and Certain Other Courses.

**Time Limit**

All degree requirements for a master’s degree must be completed within a period of seven consecutive years. Coursework which is over seven calendar years old may not be applied to master’s degree. Time limits for coursework on the degree plan may also apply to transfer coursework.

**Scholastic Requirements**

To maintain good academic standing, a MPH student must maintain a minimum cumulative 3.000 GPR. If a student fails to attain a cumulative 3.000 GPR, he or she is placed on academic probation. A student on academic probation must raise his/her cumulative GPR to a 3.000 or above according to requirements to be set forth in the probation letter. Typically, this means raising the cumulative GPR to a 3.000 or higher by the end of the next long semester (fall/spring). If this requirement is not met, the School of Public Health’s Academic Affairs Office will recommend that the Office of Graduate and Professional Studies block the student from further enrollment. If a student is blocked from further enrollment in the MPH program, he or she shall not be permitted to enroll in other MPH courses.

**Foreign Languages**

No specific language requirement exists for the Master of Public Health degree program.

**Internship or Practicum**

Students in the MPH are required to fulfill a practicum requirement. Specific course names and numbers by department are PHEB 684, PHEO 684, PHPM 684, and HPCH 684. Instructions on submission and successful completion of the practicum are posted on the School of Public Health practicum website as well as with the department’s practicum coordinator. Students are to work specifically with their department practicum coordinator on meeting this curriculum course requirement. Students must be in good academic standing, have completed all core public health courses, or be enrolled concurrently in no more than one core course at the time they enroll in the 684 course, and have no registration or university blocks related to enrollment.

**Application for Degree**

For information on applying for your degree, please visit the Graduation (p. 24) section.

**Master of Science in Public Health in Occupational Health**

The Master of Science in Public Health (MSPH) is considered an equivalent professional public health master’s degree and requires additional coursework in research methods and statistics. Students can choose among the variety of multi-disciplinary public health options to navigate their public health interest.

The degree is offered in all core disciplines of public health; epidemiology, biostatistics, environmental health, occupational safety and health, and health promotion and community health sciences. The MSPH is a thesis degree program that has culminating experiences as part of the degree requirements. Students will also participate in a practicum demonstrating overall public health problem solving skills.

An individual with a baccalaureate degree may apply for admission to the program. No coursework prerequisites exist for making a successful application to this degree program.

**Program Requirements**

**Program Requirements**

- Student’s Advisory Committee (p. 1167)
- Degree Plan (p. 1167)
- Credit Requirement (p. 1167)
- Transfer of Credit (p. 1167)
• Limitations on the Use of Transfer, Extension and Certain Other Courses (p. 1167)
  • Thesis (p. 1168)
    • Thesis Proposal (p. 1168)
    • Final Examination (p. 1168)

Student’s Advisory Committee

After receiving admission to graduate studies and enrolling, the student will consult with the head of his or her department concerning appointment of the chair of the advisory committee. The student’s advisory committee for the Master of Science degree will consist of no fewer than three graduate faculty representatives of the student’s fields of study and research. The committee chair or one of the co-chairs must be a member of Graduate Faculty in the student’s department.

Committee members must be comprised of at least one principal faculty member within SPH but external to the relevant department(s), all voting members must be members of the graduate faculty. The chair, in consultation with the student, will select the remainder of the advisory committee. The committee composition must be approved by the relevant department head.

If the chair of a student’s advisory committee voluntarily leaves the University and the student is near completion of the degree and wants the chair to continue to serve in this role, the student is responsible for securing a current member of the University Graduate Faculty, from the student’s academic program and located near the Texas A&M University campus site, to serve as the co-chair of the committee. The Department Head or Chair of Intercollegiate faculty may request in writing to the Associate Provost for Graduate and Professional Studies that a faculty member who is on an approved leave of absence or has voluntarily separated from the university, be allowed to continue to serve in the role of chair of a student’s advisory committee without a co-chair for us to one year. The students should be near completion of the degree. Extensions beyond the one year period can be granted with additional approval of the Dean.

The committee members’ signatures on the degree plan indicate their willingness to accept the responsibility for guiding and directing the entire academic program of the student and for initiating all academic actions concerning the student. Although individual committee members can be replaced by petition for valid reasons, a committee cannot resign in masse. The chair of the committee, who usually has immediate supervision of the student’s research and dissertation or record of study, has the responsibility for calling all meetings of the committee. The duties of the committee include responsibility for the proposed degree plan, the research proposal, guidance and supervision of the thesis study/research and the final examination. In addition, the committee, as a group and as individual members, is responsible for counseling the student on academic matters and, in the case of academic deficiency, initiating recommendations to the Office of Graduate and Professional Studies.

Degree Plan

The student’s advisor, in consultation with the student, will develop the proposed degree plan. The final degree plan must be completed and filed with the Office of Graduate and Professional Studies prior to the deadlines imposed by the student’s college, and no later than 90 days prior to the date of the final oral examination.

The proposed/final degree plan should be submitted through the online Document Processing Submission System located on the website https://ogsdpps.tamu.edu.

Additional coursework may be added to the approved degree plan by petition if it is deemed necessary by the advisor to correct deficiencies in the student’s academic preparation. No changes can be made to the degree plan once the student’s Request for Final Examination or Request for Final Examination Exemption is approved by the Office of Graduate and Professional Studies.

Credit Requirement

A minimum of 45 hours of coursework is required for the MSPH degree. To demonstrate integration and application of subject matter learned and the development of written and oral communication skills, a student will be required to produce a thesis and participate in a Practicum. Concentration and elective courses vary among the core disciplines and will be addressed during advising and creation of the degree plan. Electives may be taken upon approval/advice from the student’s assigned advisor and will be listed by rubric, section, and description in the degree plan.

Transfer of Credit

A student may transfer up to 9 hours of graduate credit to the MSPH degree program on the advice and approval of the student’s advisory committee, department Chair, and school Academic Affairs Dean, and with the approval of the Office of Graduate and Professional Studies. Courses taken in residence at an accredited U.S. institution or approved international institution with a final grade of B or greater may be considered for transfer credit if, at the time the courses were completed, the courses would be accepted for credit toward a similar degree for a student in degree-seeking status at the host institution. Otherwise, the limitations stated in the preceding section apply. Coursework in which no formal grades are given or in which grades other than letter grades (A or B) are earned (for example, CR, P, S, U, H, etc.) is not accepted for transfer credit. Courses appearing on the degree plan with grades of D, F, or U may not be absolved by transfer work. Credit for coursework submitted for transfer from any college or university must be shown in semester credit hours or equated to semester credit hours. An official transcript from the university at which the transfer coursework was taken must be sent directly to the Office of Admissions.

Courses used toward another degree at another institution may not be applied for graduate credit. If the course to be transferred was taken prior to the conferral of a degree at the transfer institution, a letter from the registrar at that institution stating that the course was not applied for credit toward the degree must be submitted to the Office of Graduate and Professional Studies.

Grades for courses completed at other institutions are not included in computing the GPR.

Limitations on the Use of Transfer, Extensions, and Certain Other Courses

If otherwise acceptable, certain courses may be used toward meeting credit-hour requirements for the master’s degree with the following limitations.

1. The maximum number of credit hours allowed toward the MSPH as transfer credit is 9.
2. Courses previously used for another degree are not acceptable for credit.
3. A maximum of 3 hours of 684 (Professional Internship/Practicum), and 9 hours of 685 (Directed Studies), if approved on the degree plan.
4. Undergraduate courses are not allowed to transfer to the MSPH degree program.
5. Continuing education courses may not be used for graduate credit.
6. Extension courses are not acceptable for credit.

Exceptions will be permitted only in unusual cases and when petitioned by the student’s advisor, department Chair, school Academic Affairs Office, and approved by the Office of Graduate and Professional Studies.

Thesis
An acceptable thesis is required for the Master of Science in Public Health degree. The finished work must reflect a comprehensive understanding of the pertinent literature and express in clear English, the problem(s) for study, the method, significance and results of the student’s original research. Guidelines for the preparation of the thesis are available in the Thesis Manual, which is available online at http://ogaps.tamu.edu.

After successful defense (or exemption) and approval by the student’s advisory committee and the head of the student’s department, the student must submit his/her thesis in electronic format as a single PDF file. The PDF file must be uploaded to the website, http://ogaps.tamu.edu. Additionally, a signed approval form must be brought or mailed to the Office of Graduate and Professional Studies. The PDF file and the signed approval form are required by the deadline.

Deadline dates for submitting the thesis are announced each semester or summer term in the Office of Graduate and Professional Studies Calendar (see Time Limit statement). These dates also can be accessed via the website https://ogsdpss.tamu.edu.

Before a student can be “cleared” by Thesis and Dissertation Services, a processing fee must be paid through Student Business Services. This processing fee is for the thesis/dissertation services provided. After commencement, dissertations are digitally stored and made available through the Texas A&M Libraries.

A thesis that is deemed unacceptable by the Office of Graduate and Professional Studies because of excessive corrections will be returned to the student’s department head. The manuscript must be resubmitted as a new document, and the entire review process must begin again. All submittal deadlines must be met during the resubmittal process to graduate that semester.

Thesis Proposal
The student must prepare a thesis proposal for approval by the student’s advisory committee and the head of the major department or chair of the intercollegiate faculty, if applicable. This proposal must be submitted to the Office of Graduate and Professional Studies at least 20 working days prior to the submission of the request for the final examination.

Compliance issues must be addressed if a graduate student is performing research involving human subjects, animals, infectious biohazards and recombinant DNA. A student involved in these types of research should check with the Office of Research Compliance and Biosafety at (979) 458-1467 to address questions about all research compliance responsibilities. Additional information can be also obtained on the website http://rcb.tamu.edu.

Thesis Defense/Final Examination
A student must pass a final examination by dates announced each semester or summer term in the Office of Graduate and Professional Studies Calendar. The Office of Graduate and Professional Studies must be notified in writing of any cancellation. To be eligible to take the final examination, a student’s GPR must be at least 3.000 for courses on the degree plan and for all courses completed at Texas A&M which are eligible to be applied to a graduate degree, and there must be no unabsolved grades of D, F, or U for any course listed on the degree plan. To absolve a deficient grade, the student must repeat the course at Texas A&M University and achieve a grade of C or better. All coursework on the degree plan must have been completed with the exception of those hours for which the student is registered.

Additionally, all English Language Proficiency requirements must be satisfied prior to scheduling the examination. If applicable, an approved thesis proposal must be on file in the Office of Graduate and Professional Studies according to published deadlines.

A request to hold and announce the final examination must be submitted to the Office of Graduate and Professional Studies a minimum of 10 working days in advance of the scheduled date for the examination. Examinations which are not completed and reported as satisfactory to the Office of Graduate and Professional Studies within 10 working days of the scheduled examination will be recorded as failures. A student may be given only one opportunity to repeat the final examination for the master’s degree and that must be within a time period that does not extend beyond the end of the next regular semester (summer terms are excluded).

For thesis students, the final examination covers the thesis and all work taken on the degree plan and at the option of the committee may be written or oral or both. The final examination may not be administered before the thesis is available to all members of the student’s advisory committee in substantially final form, and all members have had adequate time to review the document. The examination is conducted by the student’s advisory committee as finally constituted. A thesis option student must be registered in the University in the semester or summer term in which the final examination is taken. Persons other than members of the graduate faculty may, with mutual consent of the candidate and the major professor, attend final examinations for advanced degrees.

Upon completion of the questioning of the candidate, all visitors must excuse themselves from the proceedings. A positive vote by all members of the graduate advisory committee with at most one dissention is required to pass a student on his or her exam. A department, or interdisciplinary degree program, may have a stricter requirement provided there is consistency within all degree programs within a department or interdisciplinary program.

A thesis candidate may petition to be exempt from his/her final examination provided his/her degree plan GPR is 3.50 or greater and he/she has the approval of the advisory committee, the head of the student’s department, the Associate Dean for Academic Affairs, and Office of Graduate and Professional Studies. It is required that the petition for exemption be submitted the same semester the student submits the thesis.

Additional Requirements
Additional Requirements
- Residence (p. 1169)
- Time Limit (p. 1169)
- Scholastic Requirements (p. 1169)
Residence
No residence requirement exists; however, attention is directed to the rules regarding Limitations on the Use of Transfer, Extension and Certain Other Courses.

Time Limit
All degree requirements must be completed within a period of seven consecutive years for the degree to be granted. A course will be valid until seven years after the end of the semester in which it was taken. Graduate credit for coursework which is more than seven calendar years old at the time of the final examination (oral or written) may not be used to satisfy degree requirements.

A student who has a thesis must have the final corrected version of the thesis cleared by the Office of Graduate and Professional Studies no later than one year after the final examination, or approval of a petition for exemption from the final exam, or within the seven-year time limit, whichever occurs first. Failure to do so will result in the degree not being awarded.

Scholastic Requirements
To maintain good academic standing, a MSPH student must maintain a minimum cumulative 3.00 GPR. If a student fails to attain a cumulative 3.00 GPR, he or she is placed on academic probation. A student on academic probation must raise his/her cumulative GPR to a 3.00 or above according to requirements to be set forth in the probation letter. Typically, this means raising the cumulative GPR to a 3.00 or higher by the end of the next long semester (fall/spring). If this requirement is not met, the School’s Academic Affairs Office will recommend that the Office of Graduate and Professional Studies block the student from further enrollment. If a student is blocked from further enrollment in the MSPH program, he or she shall not be permitted to enroll in other MSPH courses.

Foreign Languages
No specific language requirement exists for the Master of Science in Public Health degree program.

Internship or Practicum
Students in the MSPH are required to fulfill a practicum requirement. Specific course names and numbers by department are PHEB 684, PHEO 684, PHPM 684, and HPCH 684. Instructions on submission and successful completion of the practicum are posted on the School of Public Health practicum website as well as with the department’s practicum coordinator. Students are to work specifically with their department practicum coordinator on meeting this curriculum course requirement. Students must be in good academic standing, have completed all core public health courses, or be enrolled concurrently in no more than one core course at the time they enroll in the 684 course, and have no registration or university blocks related to enrollment.

Application for Degree
For information on applying for your degree, please visit the Graduation (p. 24) section.

Department of Epidemiology and Biostatistics

Head: Dennis Gorman, PhD
The Department of Epidemiology and Biostatistics prepares students for research or practice in academia and numerous public and private health arenas. Students will acquire the expertise necessary to design and implement basic and applied research in disease etiology, control and prevention.

Epidemiological and biostatistical concepts, theories, and methods are fundamental building blocks upon which the public health sciences are built.

Students will become competent users of critical health related information, as well as proficient in the use of epidemiologic research methods applicable to various health and public health related settings.

For degree curricula see Department of Epidemiology and Biostatistics (http://sph.tamhsc.edu/epi-bio).

Masters
- Master of Public Health in Biostatistics (p. 1170)
- Master of Public Health in Epidemiology (p. 1171)
Master of Public Health in Biostatistics

The Master of Public Health (MPH) is a multi-disciplinary professional degree program designed to provide graduate level practical training in areas specializing in delivering public health practice. The degree is offered in all core disciplines of public health; epidemiology, biostatistics, environmental and occupational health, health policy and management, and health promotion and community health sciences. The Master of Public Health is a non-thesis degree program that has culminating experiences as part of the degree requirements. Students will participate in a practicum demonstrating overall public health problem solving skills and a capstone class.

An individual with a baccalaureate degree or a physician licensed to practice medicine in the United States may apply for admission to the program. No coursework prerequisites exist for making a successful application to this degree program.

For degree curriculum, see the Department of Epidemiology and Biostatistics (http://sph.tamhsc.edu/epi-bio).

Program Requirements

Program Requirements

- Student’s Advisory Committee (p. 1170)
- Degree Plan (p. 1170)
- Credit Requirement (p. 1170)
- Transfer of Credit (p. 1170)
- Limitations on the Use of Transfer, Extension and Certain Other Courses (p. 1170)

Student Advisory Committee

The Student Advisory Committee for the MPH consists of an assigned faculty advisor. After receiving admission to the program and before enrolling for coursework, the student will consult with their assigned faculty advisor to receive additional information related to curriculum and processing of the degree plan. The faculty advisor must have graduate faculty membership in the academic program. If at any point of the student’s time in pursuit of the degree the assigned advisor is no longer available, the department will assign a new advisor and require a comprehensive advisory session to ensure the student is making progress according to degree program requirements.

Degree Plan

The student’s advisor, in consultation with the student, will develop the proposed degree plan. The degree plan must be completed and filed with the Office of Graduate and Professional Studies prior to the deadlines imposed by the student’s college, and no later than the dates announced in the Office of Graduate and Professional Studies calendar of deadlines for graduation.

The proposed/final degree plan should be submitted through the online Document Processing Submission System located on the website https://ogsdpss.tamu.edu.

Additional coursework may be added to the approved degree plan by petition if it is deemed necessary by the advisor to correct deficiencies in the student’s academic preparation.

Credit Requirement

A minimum of 45 hours of coursework is required for the Master of Public Health degree. To demonstrate integration and application of subject matter learned and the development of written and oral communication skills, a student will be required to take SOPH 680 as part of the culminating experience requirement to graduate. Concentration and elective courses vary among the core disciplines and will be addressed during advising and creation of the degree plan. Electives may be taken upon approval/advice from the student’s assigned advisor and will be listed by rubric, section, and description in the degree plan.

Transfer of Credit

A student may transfer up to 9 hours of graduate credit to the Master of Public Health degree program on the advice and approval of the student’s advisory committee, department Chair, and school Academic Affairs Dean, and with the approval of the Office of Graduate and Professional Studies. Courses taken in residence at an accredited U.S. institution or approved international institution with a final grade of B or greater may be considered for transfer credit if, at the time the courses were completed, the courses would be accepted for credit toward a similar degree for a student in degree-seeking status at the host institution. Otherwise, the limitations stated in the preceding section apply. Coursework in which no formal grades are given in which grades other than letter grades (A or B) are earned (for example, CR, P, S, U, H, etc.) is not accepted for transfer credit. Courses appearing on the degree plan with grades of D, F, or U may not be absolved by transfer work. Credit for coursework submitted for transfer from any college or university must be shown in semester credit hours or equated to semester credit hours. An official transcript from the university at which the transfer coursework was taken must be sent directly to the Office of Admissions.

Courses used toward another degree at another institution may not be applied for graduate credit. If the course to be transferred was taken prior to the conferral of a degree at the transfer institution, a letter from the registrar at that institution stating that the course was not applied for credit toward the degree must be submitted to the Office of Graduate and Professional Studies.

Grades for courses completed at other institutions are not included in computing the GPR.

Limitations on the Use of Transfer, Extensions, and Certain Other Courses

If otherwise acceptable, certain courses may be used toward meeting credit-hour requirements for the master’s degree with the following limitations.

1. The maximum number of credit hours allowed toward the MPH as transfer credit is 9.
2. Courses previously used for another degree are not acceptable for credit.
3. A maximum of 6 hours of 684 (Professional Internship/Practicum), and 9 hours of 685 (Directed Studies), if approved on the degree plan.
4. Undergraduate courses are not allowed to transfer to the MPH degree program.
5. Continuing education courses may not be used for graduate credit.
6. Extension courses are not acceptable for credit.

Exceptions will be permitted only in unusual cases and when petitioned by the student’s advisory committee, department Chair, school Academic
Affairs Office, and approved by the Office of Graduate and Professional Studies.

**Additional Requirements**

**Residence**
No residence requirement exists; however, attention is directed to the rules regarding Limitations on the Use of Transfer, Extension and Certain Other Courses.

**Time Limit**
All degree requirements for a master’s degree must be completed within a period of seven consecutive years. Coursework which is over seven calendar years old may not be applied to master’s degree. Time limits for coursework on the degree plan may also apply to transfer coursework.

**Scholastic Requirements**
To maintain good academic standing, a MPH student must maintain a minimum cumulative 3.000 GPR. If a student fails to attain a cumulative 3.000 GPR, he or she is placed on academic probation. A student on academic probation must raise his/her cumulative GPR to a 3.000 or above according to requirements to be set forth in the probation letter. Typically, this means raising the cumulative GPR to a 3.000 or higher by the end of the next long semester (fall/spring). If this requirement is not met, the School of Public Health’s Academic Affairs Office will recommend that the Office of Graduate and Professional Studies block the student from further enrollment. If a student is blocked from further enrollment in the MPH program, he or she shall not be permitted to enroll in other MPH courses.

**Foreign Languages**
No specific language requirement exists for the Master of Public Health degree program.

**Internship or Practicum**
Students in the MPH are required to fulfill a practicum requirement. Specific course names and numbers by department are PHEB 684, PHEO 684, PHPM 684, and HPCH 684. Instructions on submission and successful completion of the practicum are posted on the School of Public Health practicum website as well as with the department’s practicum coordinator. Students are to work specifically with their department practicum coordinator on meeting this curriculum course requirement. Students must be in good academic standing, have completed all core public health courses, or be enrolled concurrently in no more than one core course at the time they enroll in the 684 course, and have no registration or university blocks related to enrollment.

**Application for Degree**
For information on applying for your degree, please visit the Graduation (p. 24) section.

**Master of Public Health in Epidemiology**
The Master of Public Health (MPH) is a multi-disciplinary professional degree program designed to provide graduate level practical training in areas specializing in delivering public health practice. The degree is offered in all core disciplines of public health; epidemiology, biostatistics, environmental and occupational health, health policy and management, and health promotion and community health sciences. The Master of Public Health is a non-thesis degree program that has culminating experiences as part of the degree requirements. Students will participate in a practicum demonstrating overall public health problem solving skills and a capstone class.

An individual with a baccalaureate degree or a physician licensed to practice medicine in the United States may apply for admission to the program. No coursework prerequisites exist for making a successful application to this degree program.

- Application for Degree (p. 1173)

Residence

No residence requirement exists; however, attention is directed to the rules regarding Limitations on the Use of Transfer, Extension and Certain Other Courses.

Time Limit

All degree requirements for a master’s degree must be completed within a period of seven consecutive years. Coursework which is over seven calendar years old may not be applied to master’s degree. Time limits for coursework on the degree plan may also apply to transfer coursework.

Scholastic Requirements

To maintain good academic standing, a MPH student must maintain a minimum cumulative 3.000 GPR. If a student fails to attain a cumulative 3.000 GPR, he or she is placed on academic probation. A student on academic probation must raise his/her cumulative GPR to a 3.000 or above according to requirements to be set forth in the probation letter. Typically, this means raising the cumulative GPR to a 3.000 or higher by the end of the next long semester (fall/spring). If this requirement is not met, the School of Public Health’s Academic Affairs Office will recommend that the Office of Graduate and Professional Studies block the student from further enrollment. If a student is blocked from further enrollment in the MPH program, he or she shall not be permitted to enroll in other MPH courses.

Foreign Languages

No specific language requirement exists for the Master of Public Health degree program.

Internship or Practicum

Students in the MPH are required to fulfill a practicum requirement. Specific course names and numbers by department are PHEB 684, PHEO 684, PHPM 684, and HPCH 684. Instructions on submission and successful completion of the practicum are posted on the School of Public Health practicum website as well as with the department’s practicum
coordinator. Students are to work specifically with their department practicum coordinator on meeting this curriculum course requirement. Students must be in good academic standing, have completed all core public health courses, or be enrolled concurrently in no more than one core course at the time they enroll in the 684 course, and have no registration or university blocks related to enrollment.

Application for Degree

For information on applying for your degree, please visit the Graduation (p. 24) section.

Department of Health Policy and Management

Head: Michael Morrisey, PhD

The degree programs in the Department of Health Policy and Management integrate instruction, research, and practice. The faculty and many of the students are engaged in substantial research and outreach efforts through several research and/or training focused centers and programs. Many other students are employed in hospitals, physician groups and other health organizations.

The School of Public Health offers state-of-the-art classrooms, labs, and offices that support the work of our department, students and faculty. The department’s talented faculty and several academic programs rely on these resources to serve a diverse student body at College Station and at several distance education sites across Texas.

For program curricula see Department of Health Policy and Management (http://sph.tamhsc.edu/hpm).

Masters

• Master of Public Health in Health Policy and Management (p. 1173)

Certificates

• Health Systems Management Certificate (p. 1175)

Master of Public Health in Health Policy Management

The Master of Public Health (MPH) is a multi-disciplinary professional degree program designed to provide graduate level practical training in areas specializing in delivering public health practice. The degree is offered in all core disciplines of public health; epidemiology, biostatistics, environmental and occupational health, health policy and management, and health promotion and community health sciences. The Master of Public Health is a non-thesis degree program that has culminating experiences as part of the degree requirements. Students will participate in a practicum demonstrating overall public health problem solving skills and a capstone class.

An individual with a baccalaureate degree or a physician licensed to practice medicine in the United States may apply for admission to the program. No coursework prerequisites exist for making a successful application to this degree program.

For degree curriculum see Department of Health Policy and Management (http://sph.tamhsc.edu/hpm)

Program Requirements

Program Requirements

• Student’s Advisory Committee (p. 1173)

• Degree Plan (p. 1174)

• Credit Requirement (p. 1174)

• Transfer of Credit (p. 1174)

• Limitations on the Use of Transfer, Extension and Certain Other Courses (p. 1174)

Student Advisory Committee

The Student Advisory Committee for the MPH consists of an assigned faculty advisor. After receiving admission to the program and before enrolling for coursework, the student will consult with their assigned faculty advisor to receive additional information related to curriculum and processing of the degree plan. The faculty advisor must have
graduate faculty membership in the academic program. If at any point of the student's time in pursuit of the degree the assigned advisor is no longer available, the department will assign a new advisor and require a comprehensive advisory session to ensure the student is making progress according to degree program requirements.

Degree Plan
The student's advisor, in consultation with the student, will develop the proposed degree plan. The degree plan must be completed and filed with the Office of Graduate and Professional Studies prior to the deadlines imposed by the student's college, and no later than the dates announced in the Office of Graduate and Professional Studies calendar of deadlines for graduation.

The proposed/final degree plan should be submitted through the online Document Processing Submission System located on the website https://ogsdpps.tamu.edu.

Additional coursework may be added to the approved degree plan by petition if it is deemed necessary by the advisor to correct deficiencies in the student's academic preparation.

Credit Requirement
A minimum of 45 hours of coursework is required for the Master of Public Health degree. To demonstrate integration and application of subject matter learned and the development of written and oral communication skills, a student will be required to take SOPH 680 as part of the culminating experience requirement to graduate. Concentration and elective courses vary among the core disciplines and will be addressed during advising and creation of the degree plan. Electives may be taken upon approval/advice from the student's assigned advisor and will be listed by rubric, section, and description in the degree plan.

Transfer of Credit
A student may transfer up to 9 hours of graduate credit to the Master of Public Health degree program on the advice and approval of the student's advisory committee, department Chair, and school Academic Affairs Dean, and with the approval of the Office of Graduate and Professional Studies. Courses taken in residence at an accredited U.S. institution or approved international institution with a final grade of B or greater may be considered for transfer credit if, at the time the courses were completed, the courses would be accepted for credit toward a similar degree for a student in degree-seeking status at the host institution. Otherwise, the limitations stated in the preceding section apply. Coursework in which no formal grades are given or in which grades other than letter grades (A or B) are earned (for example, CR, P, S, U, H, etc.) is not accepted for transfer credit. Courses appearing on the degree plan with grades of D, F, or U may not be absolved by transfer work. Credit for coursework submitted for transfer from any college or university must be shown in semester credit hours or equated to semester credit hours. An official transcript from the university at which the transfer coursework was taken must be sent directly to the Office of Admissions.

Courses used toward another degree at another institution may not be applied for graduate credit. If the course to be transferred was taken prior to the conferral of a degree at the transfer institution, a letter from the registrar at that institution stating that the course was not applied for credit toward the degree must be submitted to the Office of Graduate and Professional Studies.

Grades for courses completed at other institutions are not included in computing the GPR.

Limitations on the Use of Transfer, Extensions, and Certain Other Courses
If otherwise acceptable, certain courses may be used toward meeting credit-hour requirements for the master's degree with the following limitations.

1. The maximum number of credit hours allowed toward the MPH as transfer credit is 9.
2. Courses previously used for another degree are not acceptable for credit.
3. A maximum of 6 hours of 684 (Professional Internship/Practicum), and 9 hours of 685 (Directed Studies), if approved on the degree plan.
4. Undergraduate courses are not allowed to transfer to the MPH degree program.
5. Continuing education courses may not be used for graduate credit.
6. Extension courses are not acceptable for credit.

Exceptions will be permitted only in unusual cases and when petitioned by the student's advisory committee, department Chair, school Academic Affairs Office, and approved by the Office of Graduate and Professional Studies.

Additional Requirements

Additional Requirements
- Residence (p. 1174)
- Time Limit (p. 1174)
- Scholaristic Requirements (p. 1174)
- Foreign Languages (p. 1175)
- Internship or Practicum (p. 1175)
- Application for Degree (p. 1175)

Residence
No residence requirement exists; however, attention is directed to the rules regarding Limitations on the Use of Transfer, Extension and Certain Other Courses.

Time Limit
All degree requirements for a master's degree must be completed within a period of seven consecutive years. Coursework which is over seven calendar years old may not be applied to master's degree. Time limits for coursework on the degree plan may also apply to transfer coursework.

Scholastic Requirements
To maintain good academic standing, a MPH student must maintain a minimum cumulative 3.000 GPR. If a student fails to attain a cumulative 3.000 GPR, he or she is placed on academic probation. A student on academic probation must raise his/her cumulative GPR to a 3.000 or above according to requirements to be set forth in the probation letter. Typically, this means raising the cumulative GPR to a 3.000 or higher by the end of the next long semester (fall/spring). If this requirement is not met, the School of Public Health's Academic Affairs Office will recommend that the Office of Graduate and Professional Studies block the student from further enrollment. If a student is blocked from further enrollment in
the MPH program, he or she shall not be permitted to enroll in other MPH courses.

**Foreign Languages**

No specific language requirement exists for the Master of Public Health degree program.

**Internship or Practicum**

Students in the MPH are required to fulfill a practicum requirement. Specific course names and numbers by department are PHEB 684, PHEO 684, PHPM 684, and HPCH 684. Instructions on submission and successful completion of the practicum are posted on the School of Public Health practicum website as well as with the department’s practicum coordinator. Students must be in good academic standing, have completed all core public health courses, or be enrolled concurrently in no more than one core course at the time they enroll in the 684 course, and have no registration or university blocks related to enrollment.

**Application for Degree**

For information on applying for your degree, please visit the Graduation section.

**Health Systems Management - Certificate**

The Health Systems Management Certificate includes five courses and is intended primarily for those who are, or expect to be, in administrative or supervisory roles, but lack formal training in health management.

Information about admission and application requirements can be found at sph.tamhsc.edu/degrees/certificate.html.

**Program Requirements**

**Required**

- **PHPM 601** Foundations of Public Health 3
- **PHPM 605** Introduction to Health Policy and Management 3
- **PHPM 614** Strategic Planning And Marketing I 3
- **PHPM 616** Introduction to Management of Human Resources 3
- **PHPM 623** Health Care Financial Management I 3

**Substitution Options**

- **PHPM 617** Health Care Quality Evaluation and Utilization Management 3
- **PHPM 620** Operations Management 3
- **PHPM 631** Health Information Management Systems 3

1 You may substitute up to two of the following courses for PHPM 614 and/or PHPM 616.

**Department of Health Promotion and Community Health Sciences**

**Head:** John Spengler, JD, PhD

The Department of Health Promotion and Community Health Sciences prepares public health professionals to identify the role of biological, behavioral, environmental, and social forces on population health.

Students are expected to incorporate these elements when planning and evaluating programs, services and policies that will improve the health of individuals and communities.

Public health professionals with training in health promotion and community health will be able to operate under a wide variety of job titles and in a wide variety of different organizational contexts such as local or state health organizations, federal health agencies, and pharmaceutical companies.

The Department offers the following degree programs:

- Master of Public Health in Health Promotion and Community Health Sciences
- Master of Science in Public Health in Health Promotion and Community Health Sciences
- Doctor of Public Health in Health Promotion and Community Health Sciences

For degree curricula see Department of Health Promotion and Community Health Sciences (http://sph.tamhsc.edu/hpchs)

**Masters**

- Master of Public Health in Health Promotion and Community Health Sciences (p. 1175)
- Master of Science in Public Health in Health Promotion and Community Health Sciences (p. 1177)

**Doctoral**

- Doctor of Public Health in Health Promotion and Community Health Sciences (p. 1180)

**Master of Public Health in Health Promotion and Community Health Sciences**

The **Master of Public Health (MPH)** is a multi-disciplinary professional degree program designed to provide graduate level practical training in areas specializing in delivering public health practice. The degree is offered in all core disciplines of public health; epidemiology, biostatistics, environmental and occupational health, health policy and management, and health promotion and community health sciences. The Master of Public Health is a non-thesis degree program that has culminating experiences as part of the degree requirements. Students will participate in a practicum demonstrating overall public health problem solving skills and a capstone class.

An individual with a baccalaureate degree or a physician licensed to practice medicine in the United States may apply for admission to the program. No coursework prerequisites exist for making a successful application to this degree program.

For degree curriculum see Department of Health Promotion and Community Health Sciences (http://sph.tamhsc.edu/hpchs)

**Program Requirements**
Program Requirements

- Student's Advisory Committee (p. 1176)
- Degree Plan (p. 1176)
- Credit Requirement (p. 1176)
- Transfer of Credit (p. 1176)
- Limitations on the Use of Transfer, Extension and Certain Other Courses (p. 1176)

Student Advisory Committee

The Student Advisory Committee for the MPH consists of an assigned faculty advisor. After receiving admission to the program and before enrolling for coursework, the student will consult with their assigned faculty advisor to receive additional information related to curriculum and processing of the degree plan. The faculty advisor must have graduate faculty membership in the academic program. If at any point of the student’s time in pursuit of the degree the assigned advisor is no longer available, the department will assign a new advisor and require a comprehensive advisory session to ensure the student is making progress according to degree program requirements.

Degree Plan

The student’s advisor, in consultation with the student, will develop the proposed degree plan. The degree plan must be completed and filed with the Office of Graduate and Professional Studies prior to the deadlines imposed by the student’s college, and no later than the dates announced in the Office of Graduate and Professional Studies calendar of deadlines for graduation.

The proposed/final degree plan should be submitted through the online Document Processing Submission System located on the website https://ogsdpss.tamu.edu.

Additional coursework may be added to the approved degree plan by petition if it is deemed necessary by the advisor to correct deficiencies in the student’s academic preparation.

Credit Requirement

A minimum of 45 hours of coursework is required for the Master of Public Health degree. To demonstrate integration and application of subject matter learned and the development of written and oral communication skills, a student will be required to take SOPH 680 as part of the culminating experience requirement to graduate. Concentration and elective courses vary among the core disciplines and will be addressed during advising and creation of the degree plan. Electives may be taken upon approval/advice from the student’s assigned advisor and will be listed by rubric, section, and description in the degree plan.

Transfer of Credit

A student may transfer up to 9 hours of graduate credit to the Master of Public Health degree program on the advice and approval of the student’s advisory committee, department Chair, and school Academic Affairs Dean, and with the approval of the Office of Graduate and Professional Studies. Courses taken in residence at an accredited U.S. institution or approved international institution with a final grade of B or greater may be considered for transfer credit if, at the time the courses were completed, the courses would be accepted for credit toward a similar degree for a student in degree-seeking status at the host institution. Otherwise, the limitations stated in the preceding section apply. Coursework in which no formal grades are given or in which grades other than letter grades (A or B) are earned (for example, CR, P, S, U, H, etc.) is not accepted for transfer credit. Courses appearing on the degree plan with grades of D, F, or U may not be absolved by transfer work. Credit for coursework submitted for transfer from any college or university must be shown in semester credit hours or equated to semester credit hours. An official transcript from the university at which the transfer coursework was taken must be sent directly to the Office of Admissions.

Courses used toward another degree at another institution may not be applied for graduate credit. If the course to be transferred was taken prior to the conferral of a degree at the transfer institution, a letter from the registrar at that institution stating that the course was not applied for credit toward the degree must be submitted to the Office of Graduate and Professional Studies.

Grades for courses completed at other institutions are not included in computing the GPR.

Limitations on the Use of Transfer, Extensions, and Certain Other Courses

If otherwise acceptable, certain courses may be used toward meeting credit-hour requirements for the master’s degree with the following limitations.

1. The maximum number of credit hours allowed toward the MPH as transfer credit is 9.
2. Courses previously used for another degree are not acceptable for credit.
3. A maximum of 6 hours of 684 (Professional Internship/Practicum), and 9 hours of 685 (Directed Studies), if approved on the degree plan.
4. Undergraduate courses are not allowed to transfer to the MPH degree program.
5. Continuing education courses may not be used for graduate credit.
6. Extension courses are not acceptable for credit.

Exceptions will be permitted only in unusual cases and when petitioned by the student’s advisory committee, department Chair, school Academic Affairs Office, and approved by the Office of Graduate and Professional Studies.

Additional Requirements

Additional Requirements

- Residence (p. 1176)
- Time Limit (p. 1176)
- Scholastic Requirements (p. 1177)
- Foreign Languages (p. 1177)
- Internship or Practicum (p. 1177)
- Application for Degree (p. 1177)

Residence

No residence requirement exists; however, attention is directed to the rules regarding Limitations on the Use of Transfer, Extension and Certain Other Courses.

Time Limit

All degree requirements for a master’s degree must be completed within a period of seven consecutive years. Coursework which is over seven
calendar years old may not be applied to master’s degree. Time limits for coursework on the degree plan may also apply to transfer coursework.

Scholastic Requirements
To maintain good academic standing, a MPH student must maintain a minimum cumulative 3.000 GPR. If a student fails to attain a cumulative 3.000 GPR, he or she is placed on academic probation. A student on academic probation must raise his/her cumulative GPR to a 3.000 or above according to requirements to be set forth in the probation letter. Typically, this means raising the cumulative GPR to a 3.000 or higher by the end of the next long semester (fall/spring). If this requirement is not met, the School of Public Health’s Academic Affairs Office will recommend that the Office of Graduate and Professional Studies block the student from further enrollment. If a student is blocked from further enrollment in the MPH program, he or she shall not be permitted to enroll in other MPH courses.

Foreign Languages
No specific language requirement exists for the Master of Public Health degree program.

Internship or Practicum
Students in the MPH are required to fulfill a practicum requirement. Specific course names and numbers by department are PHEB 684, PHEO 684, PHPM 684, and HPCH 684. Instructions on submission and successful completion of the practicum are posted on the School of Public Health practicum website as well as with the department’s practicum coordinator. Students are to work specifically with their department practicum coordinator on meeting this curriculum course requirement. Students must be in good academic standing, have completed all core public health courses, or be enrolled concurrently in no more than one core course at the time they enroll in the 684 course, and have no registration or university blocks related to enrollment.

Application for Degree
For information on applying for your degree, please visit the Graduation (p. 24) section.

Master of Science in Public Health in Health Promotion and Community Health Sciences
The Master of Science in Public Health (MSPH) is considered an equivalent professional public health master’s degree and requires additional coursework in research methods and statistics. Students can choose among the variety of multi-disciplinary public health options to navigate their public health interest.

The degree is offered in all core disciplines of public health; epidemiology, biostatistics, environmental health, occupational safety and health, and health promotion and community health sciences. The MSPH is a thesis degree program that has culminating experiences as part of the degree requirements. Students will also participate in a practicum demonstrating overall public health problem solving skills.

An individual with a baccalaureate degree may apply for admission to the program. No coursework prerequisites exist for making a successful application to this degree program.

Note: The School of Public Health will not be accepting new students for the MSPH program from the 2015-2016 school year forward.

Program Requirements

Program Requirements

- Student’s Advisory Committee (p. 1177)
- Degree Plan (p. 1178)
- Credit Requirement (p. 1178)
- Transfer of Credit (p. 1178)
- Limitations on the Use of Transfer, Extension and Certain Other Courses (p. 1178)
- Thesis (p. 1178)
  - Thesis Proposal (p. 1179)
  - Final Examination (p. 1179)

Student’s Advisory Committee
After receiving admission to graduate studies and enrolling, the student will consult with the head of his or her department concerning appointment of the chair of the advisory committee. The student’s advisory committee for the Master of Science degree will consist of no fewer than three graduate faculty representatives of the student’s fields of study and research. The committee chair or one of the co-chairs must be a member of Graduate Faculty in the student’s department.

Committee members must be comprised of at least one principal faculty member within SPH but external to the relevant department(s), all voting members must be members of the graduate faculty. The chair, in consultation with the student, will select the remainder of the advisory committee. The committee composition must be approved by the relevant department head.

If the chair of a student’s advisory committee voluntarily leaves the University and the student is near completion of the degree and wants the chair to continue to serve in this role, the student is responsible for securing a current member of the University Graduate Faculty, from the student’s academic program and located near the Texas A&M University campus site, to serve as the co-chair of the committee. The Department Head or Chair of Intercollegiate faculty may request in writing to the Associate Provost for Graduate and Professional Studies that a faculty member who is on an approved leave of absence or has voluntarily separated from the university, be allowed to continue to serve in the role of chair of a student’s advisory committee without a co-chair for us to one year. The students should be near completion of the degree. Extensions beyond the one year period can be granted with additional approval of the Dean.

The committee members’ signatures on the degree plan indicate their willingness to accept the responsibility for guiding and directing the entire academic program of the student and for initiating all academic actions concerning the student. Although individual committee members can be replaced by petition for valid reasons, a committee cannot resign in masse. The chair of the committee, who usually has immediate supervision of the student’s research and dissertation or record of study, has the responsibility for calling all meetings of the committee. The duties of the committee include responsibility for the proposed degree plan, the research proposal, guidance and supervision of the thesis study/research and the final examination. In addition, the committee, as a group and as individual members, is responsible for counseling the student.
on academic matters and, in the case of academic deficiency, initiating recommendations to the Office of Graduate and Professional Studies.

Degree Plan

The student’s advisor, in consultation with the student, will develop the proposed degree plan. The final degree plan must be completed and filed with the Office of Graduate and Professional Studies prior to the deadlines imposed by the student’s college, and no later than 90 days prior to the date of the final oral examination.

The proposed/final degree plan should be submitted through the online Document Processing Submission System located on the website https://ogsdpss.tamu.edu.

Additional coursework may be added to the approved degree plan by petition if it is deemed necessary by the advisor to correct deficiencies in the student’s academic preparation. No changes can be made to the degree plan once the student’s Request for Final Examination or Request for Final Examination Exemption is approved by the Office of Graduate and Professional Studies.

Credit Requirement

A minimum of 45 hours of coursework is required for the MSPH degree. To demonstrate integration and application of subject matter learned and the development of written and oral communication skills, a student will be required to produce a thesis and participate in a Practicum. Concentration and elective courses vary among the core disciplines and will be addressed during advising and creation of the degree plan. Electives may be taken upon approval/advice from the student’s assigned advisor and will be listed by rubric, section, and description in the degree plan.

Transfer of Credit

A student may transfer up to 9 hours of graduate credit to the MSPH degree program on the advice and approval of the student’s advisory committee, department Chair, and school Academic Affairs Dean, and with the approval of the Office of Graduate and Professional Studies. Courses taken in residence at an accredited U.S. institution or approved international institution with a final grade of B or greater may be considered for transfer credit if, at the time the courses were completed, the courses would be accepted for credit toward a similar degree for a student in degree-seeking status at the host institution. Otherwise, the limitations stated in the preceding section apply. Coursework in which no formal grades are given or in which grades other than letter grades (A or B) are earned (for example, CR, P, S, U, H, etc.) is not accepted for transfer credit. Courses appearing on the degree plan with grades of D, F, or U may not be absolved by transfer work. Credit for coursework submitted for transfer from any college or university must be shown in formal grades are given or in which grades other than letter grades. An official transcript from the university at which the transfer coursework was taken must be sent directly to the Office of Admissions.

Courses used toward another degree at another institution may not be applied for graduate credit. If the course to be transferred was taken prior to the conferral of a degree at the transfer institution, a letter from the registrar at that institution stating that the course was not applied for credit toward the degree must be submitted to the Office of Graduate and Professional Studies.

Grades for courses completed at other institutions are not included in computing the GPR.

Limitations on the Use of Transfer, Extensions, and Certain Other Courses

If otherwise acceptable, certain courses may be used toward meeting credit-hour requirements for the master’s degree with the following limitations.

1. The maximum number of credit hours allowed toward the MSPH as transfer credit is 9.
2. Courses previously used for another degree are not acceptable for credit.
3. A maximum of 3 hours of 684 (Professional Internship/Practicum), and 9 hours of 685 (Directed Studies), if approved on the degree plan.
4. Undergraduate courses are not allowed to transfer to the MSPH degree program.
5. Continuing education courses may not be used for graduate credit.
6. Extension courses are not acceptable for credit.

Exceptions will be permitted only in unusual cases and when petitioned by the student’s advisor, department Chair, school Academic Affairs Office, and approved by the Office of Graduate and Professional Studies.

Thesis

An acceptable thesis is required for the Master of Science in Public Health degree. The finished work must reflect a comprehensive understanding of the pertinent literature and express in clear English, the problem(s) for study, the method, significance and results of the student’s original research. Guidelines for the preparation of the thesis are available in the Thesis Manual, which is available online at http://ogaps.tamu.edu.

After successful defense (or exemption) and approval by the student’s advisory committee and the head of the student’s department, the student must submit his/her thesis in electronic format as a single PDF file. The PDF file must be uploaded to the website, http://ogaps.tamu.edu. Additionally, a signed approval form must be brought or mailed to the Office of Graduate and Professional Studies. The PDF file and the signed approval form are required by the deadline.

Deadline dates for submitting the thesis are announced each semester or summer term in the Office of Graduate and Professional Studies Calendar (see Time Limit statement). These dates also can be accessed via the website https://ogsdpss.tamu.edu.

Before a student can be “cleared” by Thesis and Dissertation Services, a processing fee must be paid through Student Business Services. This processing fee is for the thesis/dissertation services provided. After commencement, dissertations are digitally stored and made available through the Texas A&M Libraries.

A thesis that is deemed unacceptable by the Office of Graduate and Professional Studies because of excessive corrections will be returned to the student’s department head. The manuscript must be resubmitted as a new document, and the entire review process must begin again. All submittal deadlines must be met during the resubmittal process to graduate that semester.
Thesis Proposal

The student must prepare a thesis proposal for approval by the student’s advisory committee and the head of the major department or chair of the intercollegiate faculty, if applicable. This proposal must be submitted to the Office of Graduate and Professional Studies at least 20 working days prior to the submission of the request for the final examination.

Compliance issues must be addressed if a graduate student is performing research involving human subjects, animals, infectious biohazards and recombinant DNA. A student involved in these types of research should check with the Office of Research Compliance and Biosafety at (979) 458-1467 to address questions about all research compliance responsibilities. Additional information can be also obtained on the website http://rcb.tamu.edu.

Thesis Defense/Final Examination

A student must pass a final examination by dates announced each semester or summer term in the Office of Graduate and Professional Studies Calendar. The Office of Graduate and Professional Studies must be notified in writing of any cancellation. To be eligible to take the final examination, a student’s GPR must be at least 3.000 for courses on the degree plan and for all courses completed at Texas A&M which are eligible to be applied to a graduate degree, and there must be no unabsolved grades of D, F, or U for any course listed on the degree plan. To absolve a deficient grade, the student must repeat the course at Texas A&M University and achieve a grade of C or better. All coursework on the degree plan must have been completed with the exception of those hours for which the student is registered. Additionally, all English Language Proficiency requirements must be satisfied prior to scheduling the examination. If applicable, an approved thesis proposal must be on file in the Office of Graduate and Professional Studies according to published deadlines.

A request to hold and announce the final examination must be submitted to the Office of Graduate and Professional Studies a minimum of 10 working days in advance of the scheduled date for the examination. Examinations which are not completed and reported as satisfactory to the Office of Graduate and Professional Studies within 10 working days of the scheduled examination will be recorded as failures. A student may be given only one opportunity to repeat the final examination for the master’s degree and that must be within a time period that does not extend beyond the end of the next regular semester (summer terms are excluded). For thesis students, the final examination covers the thesis and all work taken on the degree plan and at the option of the committee may be written or oral or both. The final examination may not be administered before the thesis is available to all members of the student’s advisory committee in substantially final form, and all members have had adequate time to review the document. The examination is conducted by the student’s advisory committee as finally constituted. A thesis option student must be registered in the University in the semester or summer term in which the final examination is taken. Persons other than members of the graduate faculty may, with mutual consent of the candidate and the major professor, attend final examinations for advanced degrees. Upon completion of the questioning of the candidate, all visitors must excuse themselves from the proceedings. A positive vote by all members of the graduate advisory committee with at most one dissension is required to pass a student on his or her exam. A department, or interdisciplinary degree program, may have a stricter requirement provided there is consistency within all degree programs within a department or interdisciplinary program.

A thesis candidate may petition to be exempt from his/her final examination provided his/her degree plan GPR is 3.50 or greater and he/ she has the approval of the advisory committee, the head of the student’s department, the Associate Dean for Academic Affairs, and Office of Graduate and Professional Studies. It is required that the petition for exemption be submitted the same semester the student submits the thesis.

Additional Requirements

Additional Requirements

- Residence (p. 1179)
- Time Limit (p. 1179)
- Scholastic Requirements (p. 1179)
- Foreign Languages (p. 1179)
- Internship or Practicum (p. 1180)
- Application for Degree (p. 1180)

Residence

No residence requirement exists; however, attention is directed to the rules regarding Limitations on the Use of Transfer, Extension and Certain Other Courses.

Time Limit

All degree requirements must be completed within a period of seven consecutive years for the degree to be granted. A course will be valid until seven years after the end of the semester in which it was taken. Graduate credit for coursework which is more than seven calendar years old at the time of the final examination (oral or written) may not be used to satisfy degree requirements.

A student who has a thesis must have the final corrected version of the thesis cleared by the Office of Graduate and Professional Studies no later than one year after the final examination, or approval of a petition for exemption from the final exam, or within the seven-year time limit, whichever occurs first. Failure to do so will result in the degree not being awarded.

Scholastic Requirements

To maintain good academic standing, a MSPH student must maintain a minimum cumulative 3.00 GPR. If a student fails to attain a cumulative 3.00 GPR, he or she is placed on academic probation. A student on academic probation must raise his/her cumulative GPR to a 3.00 or above according to requirements to be set forth in the probation letter. Typically, this means raising the cumulative GPR to a 3.00 or higher by the end of the next long semester (fall/spring). If this requirement is not met, the School’s Academic Affairs Office will recommend that the Office of Graduate and Professional Studies block the student from further enrollment. If a student is blocked from further enrollment in the MSPH program, he or she shall not be permitted to enroll in other MSPH courses.

Foreign Languages

No specific language requirement exists for the Master of Science in Public Health degree program.
Internship or Practicum

Students in the MSPH are required to fulfill a practicum requirement. Specific course names and numbers by department are PHEB 684, PHEO 684, PHPM 684, and HPCH 684. Instructions on submission and successful completion of the practicum are posted on the School of Public Health practicum website as well as with the department’s practicum coordinator. Students are to work specifically with their department practicum coordinator on meeting this curriculum course requirement. Students must be in good academic standing, have completed all core public health courses, or be enrolled concurrently in no more than one core course at the time they enroll in the 684 course, and have no registration or university blocks related to enrollment.

Application for Degree

For information on applying for your degree, please visit the Graduation (p. 24) section.

Doctor of Public Health in Health Promotion and Community Health Sciences

The Doctor of Public Health (DrPH) is an advanced professional degree for those whose career goals are in the area of professional practice in public health, including current and potential leaders in public health practice. The DrPH prepares candidates for a career in high-level administration, teaching, or practice, where advance analytical and conceptual capabilities are requisite.

Applicants may choose a major in Health Promotion and Community Health Sciences or Epidemiology and Environmental Health. Applicants choosing the Epidemiology and Environmental Health may choose to focus on either epidemiology or environmental health concentration areas.

The programs are designed for the practitioner; a graduate may be expected to fill instructional, supervisory, and administrative positions in which educational services are to be rendered.

Applicants to the DrPH will hold a master’s degree. For further information regarding admission, please visit http://sph.tamhsc.edu/future.

Although substantively different from the PhD degree in education, the DrPH degree requires equivalent admission qualifications, standards of scholarship and breadth and depth of study. For additional requirements, see the department doctoral handbook.

Because graduates of the program are expected to demonstrate a high level of professional skill and educational statesmanship, only those candidates who show a consistently high level of professional performance in their academic studies, in their role-related studies, in their internship experience, and in the completion of their records of study will be recommended for the degree.

Steps to Fulfill Doctoral Degree Requirements

Note: Once formal coursework is complete, you must be continuously registered until all degree requirements have been met. See Continuous Registration Requirements (p. 25).

For degree curriculum see Department of Health Promotion and Community Health Sciences (http://sph.tamhsc.edu/hpcs).

### Program Requirements

**Program Requirements**

- Student’s Advisory Committee (p. 1181)
- Degree Plan (p. 1181)
- Transfer of Credit (p. 1182)
- Research Proposal (p. 1182)
- Examinations (p. 1182)
  - Preliminary Examination (p. 1182)
  - Final Examination/Dissertation Defense (p. 1184)
- Dissertation (p. 1184)

**Student’s Advisory Committee**

After receiving admission to graduate studies and enrolling, the student will consult with the head of his or her major or administrative department (or chair of the intercollegiate faculty) concerning appointment of the chair of the advisory committee. The student’s advisory committee will consist of no fewer than four members of the graduate faculty representative of the student’s several fields of study and research, where the chair or co-chair must be from the student’s department (or intercollegiate faculty, if applicable), and at least one or more of the members must have an appointment to a department other than the student’s major department. The outside member for a student in an interdisciplinary degree program must be from a department different from the chair of the student’s committee.

The chair, in consultation with the student, will select the remainder of the advisory committee. Only graduate faculty members located on the respective Texas A&M University campuses may serve as chair of a student’s advisory committee. Other Texas A&M University graduate faculty members located off-campus may serve as a member or co-chair (but not chair), with a member as the chair.

If the chair of a student’s advisory committee voluntarily leaves the University and the student is near completion of the degree and wants the chair to continue to serve in this role, the student is responsible for securing a current member of the University Graduate Faculty, from the student’s academic program and located near the Texas A&M University campus site, to serve as the co-chair of the committee. The Department Head or Chair of Intercollegiate faculty may request in writing to the Associate Provost for Graduate and Professional Studies that a faculty member who is on an approved leave of absence or has voluntarily separated from the university, be allowed to continue to serve in the role of chair of a student’s advisory committee without a co-chair for us to one year. The students should be near completion of the degree. Extensions beyond the one year period can be granted with additional approval of the Dean.

The committee members’ signatures on the degree plan indicate their willingness to accept the responsibility for guiding and directing the entire academic program of the student and for initiating all academic actions concerning the student. Although individual committee members may be replaced by petition for valid reasons, a committee cannot resign en masse. The chair of the committee, who usually has immediate supervision of the student’s research and dissertation or record of study, has the responsibility for calling all meetings of the committee. The duties of the committee include responsibility for the proposed degree plan, the research proposal, the preliminary examination, the dissertation or record of study and the final examination. In addition, the committee, as a group and as individual members, is responsible for counseling the student on academic matters, and, in the case of academic deficiency, initiating recommendations to the Office of Graduate and Professional Studies.

### Degree Plan

The student’s advisory committee will evaluate the student’s previous education and degree objectives. The committee, in consultation with the student, will develop a proposed degree plan and outline a research problem which, when completed, as indicated by the dissertation will constitute the basic requirements for the degree. The degree plan must be filed with the Office of Graduate and Professional Studies prior to the deadline imposed by the student’s college and no later than 90 days prior to the preliminary examination.

This proposed degree plan should be submitted through the online Document Processing Submission System located on the website https://ogsdps.tamu.edu. A minimum of 64 hours is required on the degree plan for the Doctor of Public Health for a student who has completed a master’s degree. A student who has completed a DDS/DMD, DVM or a MD at a
U.S. institution is also required to complete a minimum of 64 hours. A student who has completed a baccalaureate degree but not a master’s degree will be required to complete a 96-hour degree plan. Completion of DDS/DMD, DVM or MD degrees at a foreign institution requires completion of a minimum of 96 hours for the Doctor of Public Health. A field of study may be primarily in one department or in a combination of departments. A degree plan must carry a reasonable amount of 691 (Research).

Additional coursework may be added by petition to the approved degree plan by the student’s advisory committee if it is deemed necessary to correct deficiencies in the student’s academic preparation. No changes can be made to the degree plan once the student’s Request for Final Examination or Request for Final Examination Exemption is approved by the Office of Graduate and Professional Studies.

Approval to enroll in any professional course (900-level) should be obtained from the head of the department (or Chair of the intercollegiate faculty, if applicable) in which the course will be offered before including such a course on a degree plan.

No credit may be obtained by correspondence study, by extension or for any course of fewer than three weeks duration.

Transfer of Credit

Courses for which transfer credits are sought must have been completed with a grade of B or greater and must be approved by the student’s advisory committee and the Office of Graduate and Professional Studies. These courses must not have been used previously for another degree. Except for officially approved cooperative doctoral programs, credit for thesis or dissertation research or the equivalent is not transferable. Credit for “internship” coursework in any form is not transferable. Courses taken in residence at an accredited U.S. institution or approved international institution with a final grade of B or greater will be considered for transfer credit if, at the time the courses were completed, the courses would be accepted for credit toward a similar degree for a student in degree-seeking status at the host institution. Credit for coursework taken by extension is not transferable. Coursework in which no formal grades are given or in which grades other than letter grades (A or B) are earned (for example, CR, P, S, U, H, etc.) is not accepted for transfer credit. Credit for coursework submitted for transfer from any college or university must be shown in semester credit hours, or equated to semester credit hours.

Courses used toward a degree at another institution may not be applied for graduate credit. If the course to be transferred was taken prior to the conferral of a degree at the transfer institution, a letter from the registrar at that institution stating that the course was not applied for credit toward the degree must be submitted to the Office of Graduate and Professional Studies.

Grades for courses completed at other institutions are not included in computing the GPR. An official transcript from the university at which transfer courses are taken must be sent directly to the Office of Admissions.

Research Proposal

The general field of research to be used for the dissertation should be agreed on by the student and the advisory committee at their first meeting, as a basis for selecting the proper courses to support the proposed research. As soon thereafter as the research project can be outlined in reasonable detail, the dissertation research proposal should be completed. The research proposal should be approved at a meeting of the student’s advisory committee, at which time the feasibility of the proposed research and the adequacy of available facilities should be reviewed. The approved proposal, signed by all members of the student’s advisory committee, the head of the student’s major department (or chair of the intercollegiate faculty, if applicable), must be submitted to the Office of Graduate and Professional Studies at least 20 working days prior to the submission of the Request for the Final Examination.

Compliance issues must be addressed if a graduate student is performing research involving human subjects, animals, infectious biohazards or recombinant DNA. A student involved in these types of research should check with the Office of Research Compliance and Biosafety at (979) 458-1467 to address questions about all research compliance responsibilities. Additional information can also be obtained on the website http://rcb.tamu.edu.

Examinations

Preliminary Examination

The student’s major department (or chair of the intercollegiate faculty, if applicable) and or his or her advisory committee may require qualifying, cumulative or other types of examinations at any time deemed desirable. These examinations are entirely at the discretion of the department and the student's advisory committee.

The preliminary examination is required. The preliminary examination for a doctoral student shall be given no earlier than a date at which the student is within 6 credit hours of completion of the formal coursework on the degree plan (i.e., all coursework on the degree plan except 681, 684, 690, 691, 5V98, 5V99 and 692 courses). The student is strongly encouraged to complete the Preliminary Examination no later than the end of the semester following the completion of the formal coursework on the degree plan. The Office of Graduate and Professional Studies must receive the results of the preliminary examination at least 14 weeks prior to the final examination date. The examination shall be oral and written unless otherwise recommended by the student’s advisory committee and approved by the Office of Graduate and Professional Studies. The written part of the examination will cover all fields of study included in the student’s degree plan. Each member of the advisory committee is responsible for administering a written examination in his or her particular field, unless he or she chooses to waive participation in this part of the examination. Two or more members of the advisory committee may give a joint written examination. One or more members may require a student to take a departmental or intercollegiate faculty examination to supplement or replace a written examination. Each written examination must be completed and reported as satisfactory to the chair of the advisory committee before the oral portion of the examination may be held. In case any written examination is reported unsatisfactory, the entire advisory committee must agree (1) to proceed with the oral portion of the preliminary examination, or (2) to adopt another course of action regarding the unsatisfactory written examination.

Prior to scheduling the preliminary examination with the other committee members, the committee chair will review the eligibility criteria with the student, using the Preliminary Examination Checklist to ensure the student is ready for the examination. The following list of eligibility requirements applies.

- Student is registered at Texas A&M University for the semester or summer term during which any portion of the preliminary examination
may fall. If the entire examination falls between semesters, then the student must be registered for the term immediately preceding the examination.

- An approved degree plan was on file with the Office of Graduate and Professional Studies at least 90 days prior to the first written examination.
- Student’s cumulative GPR is at least 3.000.
- Student’s degree plan GPR is at least 3.000.
- All English language proficiency requirements have been satisfied.
- All committee members have scheduled or waived the written portion and agreed to attend the oral portion of the examination or have found a substitute. Only one substitution is allowed and it cannot be for the committee chair.
- At the end of the semester in which the exam is given, there are no more than 6 hours of coursework remaining on the degree plan (except 681, 684, 690, 691, 5V98, 5V99 and 692). The head of the student’s department (or Chair of the Intercollegiate Faculty, if applicable) has the authority to approve a waiver of this criterion.
- The time span from the first written examination to the oral is no more than three weeks. (In cases of department-wide written examinations, this criterion is not applicable.) The head of the student’s department (or chair of the intercollegiate faculty, if applicable) has the authority to approve a waiver of this criterion.

Once all requirements are met, departments or intercollegiate faculty may announce the schedule of the written and oral parts of the examination.

Credit for the preliminary examination is not transferable. If a department or intercollegiate faculty examination is used as part of the written portion of the preliminary examination, it must be the last examination offered prior to the date scheduled for the preliminary examination. In the schedule of the written portion, all members of the student’s advisory committee are to be included.

Through the preliminary examination, the student’s advisory committee should satisfy itself that the student has demonstrated the following qualifications:

1. a mastery of the subject matter of all fields in the program;
2. an adequate knowledge of the literature in these fields and an ability to carry out bibliographical research.

In case a student is required to take, as a part of the written portion of a preliminary examination, an examination administered by a department or intercollegiate faculty, the department or intercollegiate faculty must:

1. offer the examination at least once every six months. The departmental or interdisciplinary degree program examination should be announced at least 30 days prior to the scheduled examination date.
2. assume the responsibility for marking the examination satisfactory or unsatisfactory, or otherwise graded, and in the case of unsatisfactory, stating specifically the reasons for such a mark.
3. forward the marked examination to the chair of the student’s advisory committee within one week after the examination.

The student must be registered at Texas A&M University for a minimum of one semester credit hour in the semester or summer term in which they will take any portion of the Preliminary Examination.

Steps for Completing the Preliminary Examination

1. Establish advisory committee. Submit a degree plan. When: Prior to the deadline set by the student’s college, and no later than 90 days prior to preliminary examination. Approved by: Advisory committee, department or intercollegiate faculty chair, and Office of Graduate and Professional Studies (OGAPS).

2. Complete English language proficiency requirements (if applicable), and coursework detailed on degree plan. When: Before preliminary examination.

3. Student and chair review eligibility requirements for the preliminary exam using the “Preliminary Examination Checklist.” When: Several weeks before the proposed date of the preliminary examination. Checklist must be signed by chair and department head, or intercollegiate faculty chair.
4  Student checks the availability of committee members.       **When:** Several weeks before the proposed date of the preliminary examination.

5  Students prepares and submits any petitions found necessary by the review of the eligibility requirements.  **When:** At least three weeks before the proposed date of the preliminary examinations.

   **Approved by:** Advisory committee, department head or intercollegiate faculty chair, and OGAPS.

6  When exam date is determined, the department may announce the schedule.  **Approved by:** Committee chair, department head or intercollegiate faculty chair.

7  Chair submits the Report of the Preliminary Examination and the Preliminary Examination Checklist to OGAPS.  **When:** Within 10 working days of the date of the scheduled oral examination and no later than 14 weeks prior to the final defense date.

   **Approved by:** Advisory committee.

8  Office of Graduate and Professional Studies notifies the student and chair of any actions necessary to rectify any deficiencies.  **When:** Upon receipt of the report of the doctoral Preliminary Examination.

---

**Final Examination/Dissertation Defense**

The candidate for the doctoral degree must pass a final examination by deadline dates announced in the “Office of Graduate and Professional Studies Calendar” each semester or summer term. The doctoral student is allowed only one opportunity to take the final examination. No student may be given a final examination unless he or her current official cumulative and degree plan GPAs are 3.000 or better and he or she has been admitted to candidacy. No unabsolved grades of D, F, or U for any course can be listed on the degree plan. To absolve a deficient grade, a student must repeat the course and achieve a grade of C or better. A student must have completed all coursework on his or her degree plan with the exception of 691 (Research) or 692 (Professional Study) hours. The student must be registered for all remaining hours; no hours remain to be taken on the degree plan. The preliminary examination results must have been submitted to the Office of Graduate and Professional Studies 14 weeks prior to the date of the defense. The research proposal must have been submitted to the Office of Graduate and Professional Studies 20 working days prior to the date of the final examination/defense. Any changes to the degree plan must be approved by the Office of Graduate and Professional Studies prior to the approval of the final examination. The request to hold and announce the final examination must be submitted to the Office of Graduate and Professional Studies a minimum of 10 working days in advance of the scheduled date. Examinations/Defenses results must be submitted to the Office of Graduate and Professional Studies within 10 working days of the scheduled examination/defense date. The Office of Graduate and Professional Studies must be notified in writing of any cancellations.

The student’s advisory committee will conduct this examination. The final examination is not to be administered until the dissertation or record of study is available in substantially final form to the student’s advisory committee, and all concerned have had adequate time to review the document. Additionally, all English Language Proficiency requirements must be satisfied prior to scheduling the examination. Whereas the final examination may cover the broad field of the candidate’s training, it is presumed that the major portion of the time will be devoted to the dissertation and closely allied topics. Persons other than members of the graduate faculty may, with mutual consent of the candidate and chair of the advisory committee, be invited to attend a final examination for an advanced degree. A positive vote by all members of the graduate advisory committee with at most one dissension is required to pass a student on his or her exam. A department can have a stricter requirement provided there is consistency within all degree programs within a department. Upon completion of the questioning of the candidate, all visitors must excuse themselves from the proceedings.

The advisory committee will submit its recommendations on the appropriate Report of the Final Examination for Doctoral Candidates form to the Office of Graduate and Professional Studies regarding acceptability of the candidate for the doctoral degree. A student must be registered in the University in the semester or summer term in which the final examination is taken.

The Report of the Final Examination Form must be submitted with original signatures of only the committee members approved by the Office of Graduate and Professional Studies. If an approved committee member substitution (1 only) has been made, his/her signature must be included on the form submitted to the Office of Graduate and Professional Studies.

**Dissertation**

The ability to perform independent research must be demonstrated by the dissertation, which must be the original work of the candidate. Whereas acceptance of the dissertation is based primarily on its scholarly merit, it must also exhibit creditable literary workmanship. The format of the dissertation must be acceptable to the Office of Graduate and Professional Studies. Guidelines for the preparation of the thesis are available in the *Thesis Manual*, which is available online at http://ogaps.tamu.edu.

After successful defense and approval by the student’s advisory committee and the head of the student’s major department (or chair of the intercollegiate faculty, if applicable), a student must submit his/her dissertation in electronic format as a single PDF file. The PDF file must be uploaded to the website, http://ogaps.tamu.edu. Additionally, a signed approval form must be brought or mailed to the Office of Graduate and Professional Studies. Both the PDF file and the signed approval form are required by the deadline.

Deadline dates for submitting are announced each semester or summer term in the Office of Graduate and Professional Studies Calendar (see Time Limit statement). These dates also can be accessed via the website http://ogaps.tamu.edu.

Before a student can be “cleared” by Thesis and Dissertation Services, a processing fee must be paid through Student Business Services. This processing fee is for the thesis/dissertation services provided. After
commencement, dissertations are digitally stored and made available through the Texas A&M Libraries.

A dissertation that is deemed unacceptable by the Office of Graduate and Professional Studies because of excessive corrections will be returned to the student’s department head or chair of the intercollegiate faculty. The manuscript must be resubmitted as a new document, and the entire review process must begin anew. All original submittal deadlines must be met during the resubmittal process in order to graduate.

Additional Requirements

**Additional Requirements**

- Residence (p. 1185)
- Time Limit (p. 1185)
- Continuous Registration (p. 1185)
- Admission to Candidacy (p. 1185)
- Foreign Languages (p. 1185)
- Internship or Practicum (p. 1185)
- 130 Hour Cap (for DrPH) (p. 1185)
- Application for Degree (p. 1186)

**Residence**

A student who enters the doctoral degree program with a baccalaureate degree must spend one academic year plus one semester in resident study at Texas A&M University. A student who holds master’s degree when he/she enters doctoral degree program must spend one academic year in resident study. One academic year may include two adjacent regular semesters or one regular semester and one adjacent 10-week summer semester. The third semester is not required to be adjacent to the one year. Enrollment for each semester must be a minimum of 9 credit hours each to satisfy the residence requirement.

To satisfy the residence requirement, the student must complete a minimum of 9 credit hours per semester or 10-week summer semester in resident study at Texas A&M University for the required period. A student who enters a doctoral degree program with a baccalaureate degrees may fulfill residence requirements in excess of one academic year (18 credit hours) by registration during summer sessions or by completion of a less-than-full course load (in this context a full course load is considered 9 credit hours per semester).

Students who are employed full-time while completing their degree may fulfill total residence requirements by completion of less-than-full time course loads each semester. In order to be considered for this, the student is required to submit a Petition for Waivers and Exceptions along with verification of his/her employment to the Office of Graduate and Professional Studies. An employee should submit verification of his/her employment at the time he/she submits the degree plan. See Registration. (p. 25)

See Residence Requirements (p. 22).

**Time Limit**

All requirements for doctoral degrees must be completed within a period of 10 consecutive calendar years for the degree to be granted. A course will be considered valid until 10 years after the end of the semester in which it is taken. Graduate credit for coursework more than 10 calendar years old at the time of the final oral examination may not be used to satisfy degree requirements.

After passing the required preliminary oral and written examinations for a doctoral degree, the student must complete the final examination within 4 calendar years. Otherwise, the student will be required to repeat the preliminary examination.

A final corrected version of the dissertation or record of study in electronic format as a single PDF file must be cleared by the Office of Graduate and Professional Studies no later than one year after the final examination or within the 10-year time limit, whichever occurs first. Failure to do so will result in the degree not being awarded.

**Continuous Registration**

A student in a program leading to a Doctor of Public Health who has completed all coursework on his/her degree plan other than 691 (Research) are required to be in continuous registration until all requirements for the degree have been completed. See Continuous Registration Requirements (p. 25).

**Admission to Candidacy**

To be admitted to candidacy for a doctoral degree, a student must have:

1. completed all formal coursework on the degree plan with the exception of any remaining 681, 684, 690 and 691,
2. a 3.0 Graduate GPA and a Degree Plan GPA of at least 3.0 with no grade lower than C in any course on the degree plan,
3. passed the preliminary examination (written and oral portions),
4. submitted an approved dissertation proposal,
5. met the residence requirements.

The final examination will not be authorized for any doctoral student who has not been admitted to candidacy.

**Foreign Languages**

A student is required to possess a competent command of English. For English language proficiency requirements, see the Admissions section of this catalog. The doctoral (PhD) foreign language requirement at Texas A&M University is a departmental option, to be administered and monitored by the individual departments of academic instruction.

**Internship or Practicum**

Students in the DrPH are required to fulfill a practicum requirement. Specific course names and numbers by department are PHEB 684, PHEO 684, PHPM 684, and HPCH 684. Instructions on submission and successful completion of the practicum are posted on the School of Public Health practicum website as well as with the department’s practicum coordinator. Students are to work specifically with their department practicum coordinator on meeting this curriculum course requirement. Students must be in good academic standing, have completed all core public health courses, or be enrolled concurrently in no more than one core course at the time they enroll in the 684 course, and have no registration or university blocks related to enrollment.

**130 Hour Cap (for DrPH)**

There is a state mandated cap on number of hours a student can enroll in without penalty. The cap is currently 130 hours (approximately 5 and one-

Departments

Department of Biology
http://www.bio.tamu.edu
Head: T. McKnight

Resources for Graduate Study
The Department of Biology offers graduate programs designed to prepare students for careers in academic institutions, government agencies and industry. The Biological Sciences Complex is centrally located on the campus of Texas A&M University. Graduate research is emphasized in over 50 laboratories that contain modern and sophisticated instrumentation for cellular, molecular, organismal and ecological studies. These laboratories provide opportunities for a broad spectrum of research specializations. The Microscopy Imaging Center, animal care facilities and a state-of-the-art DNA sequencing laboratory are among the many facilities housed in the Biological Sciences Complex.

The Department of Biology faculty has research interests that interface with those of faculty in the Colleges of Agriculture and Life Sciences, Geosciences, Medicine and Veterinary Medicine. Biology faculty participate in interdisciplinary programs in biological clocks, filamentous fungi, genetics, genomics, neuroscience and plant sciences. Cooperation is encouraged to broaden the research experience of graduate students.

Areas of Specialization in Graduate Research
PhD and MS degrees are offered in Biology and Microbiology. General areas of research interests within these degrees include:

Cellular and Developmental Biology
Plant protoplast and tissue culture, transformation and regeneration; molecular biology and genetics of development and differentiation; nuclear organization; developmental neurobiology; cell surface interactions; physiology of photosynthesis.

Evolutionary Biology
Modern and classical approaches to plant and animal systematics and evolution; genomic and biochemical evolution; cytogenetics.

Molecular Biology
DNA and RNA isolation, cloning and sequencing; gene isolation, characterization, transfer and expression; bacterial and phage genetics; molecular processes of differentiation and embryogenesis; molecular microbiology and virology; genomics and informatics.

Organismal Biology
Comparative endocrinology and physiology; neurobiology; invertebrate ecology and ethology; marine biology; biological clocks.

Entrance Requirements
Coursework taken at the baccalaureate level normally must include mathematics through calculus, statistics, chemistry including organic chemistry, biochemistry, physics, genetics and adequate preparation in a biological science. Any remedial work will be in addition to the semester hours required for the degree. Graduate admissions decisions are based on students’ academic record, research experience, letters of recommendation, GRE scores (verbal, quantitative and analytical) and suitability of students’ research interests for programs in the department. For information about admissions, contact the Graduate Advisor, Department of Biology or visit us on the website at http://www.bio.tamu.edu.

Language Requirement
The Department of Biology has no foreign language requirement for any graduate degree program.

Faculty
Aramayo, Rodolfo, Associate Professor
Biology
PhD, University of Georgia, 1992
Aufderheide, Karl, Associate Professor
Biology
PhD, University of Minnesota, 1974

Baumgardner, David, Senior Lecturer
Biology
PhD, Texas A&M University, 2008

Bell-Pedersen, Deborah, Professor
Biology
PhD, State University of New York at Albany, 1991

Benedik, Michael, Professor
Biology
PhD, Stanford University, 1982

Beremand, Phillip, Lecturer
Biology
PHD, Indiana University Bloomington, 1979

Bernardo, Joseph, Research Associate Professor
Biology
PhD, Duke University, 1991

Carney, Ginger, Associate Professor
Biology
PhD, University of Georgia, 1998

Cohn, William, Senior Lecturer
Biology
PHD, Texas A&M University, 2000

Criscione, Charles, Associate Professor
Biology
PhD, Oregon State University, 2005

Earnest, David, Professor
Biology
PhD, Northwestern University, Evanston, 1984

**Masters**

- Master of Science in Biology (p. 1188)
- Master of Science in Microbiology (p. 1199)

**Doctoral**

- Doctor of Philosophy in Biology (p. 1193)
- Doctor of Philosophy in Microbiology (p. 1203)

**Master of Science in Biology**

The Master of Science (MS) curriculum is designed to develop new understanding through research and creativity. Students have the option to pursue a thesis or non-thesis Master of Science degree.

**Steps to Fulfill Master's Degree Requirements**

1. Meet with departmental graduate advisor to plan course of study for first semester.  
   **When:** Before first semester registration.  
   **Approved by:** Graduate advisor or chair of the intercollegiate faculty.
Establish advisory committee. Submit a degree plan.\(^1\) When: Prior to the deadline imposed by the student's college and no later than 90 days prior to final oral or thesis defense. Approved by: Advisory committee, department head or chair of the intercollegiate faculty, and Office of Graduate and Professional Studies (OGAPS).

If thesis is required, submit thesis proposal to the Office of Graduate and Professional Studies. When: At least 20 working days prior to the submission of the Request for the Final Examination. Approved by: Advisory committee, department head or chair of the intercollegiate faculty and OGAPS.

Apply for degree; pay graduation fee. When: During the first week of the final semester, see OGAPS calendar.

Check to be sure degree program and advisory committee are up to date and all ELP requirements (if applicable) and coursework are complete. When: Well before submitting request to schedule final examination.

Complete residence requirement. When: If applicable, before or during final semester. Approved by: OGAPS.

Submit request to schedule final examination. When: Must be received by OGAPS at least 10 working days before exam date. See OGAPS calendar for deadlines. Approved by: Advisory committee, department head or chair of the intercollegiate faculty, and OGAPS.

Successfully complete final examination. When: The Report of the Final Examination Form should be submitted to OGAPS within 10 days following the exam. Approved by: Advisory committee and OGAPS.

If required, upload one approved final copy of thesis as a single PDF file (http://ogaps.tamu.edu) and submit signed approval form to the Office of Graduate and Professional Studies. When: See OGAPS calendar for deadlines. Approved by: Advisory committee, department head or chair of the intercollegiate faculty and OGAPS.

Graduation; arrange for cap and gown. For more information, visit http://graduation.tamu.edu.

The online Document Processing Submission System is located on the website https://ogsdpss.tamu.edu.

Complete the application for degree form via the student's Howdy portal.

Program Requirements

- Student's Advisory Committee (p. 1189)
- Degree Plan (p. 1190)
- Credit Requirements (p. 1190)
- Transfer of Credit (p. 1190)
- Limitations on the Use of Transfer, Extension and Certain Other Courses (p. 1190)
- Thesis Option (p. 1191)
  - Thesis Proposal (p. 1191)
  - Final Examination (p. 1191)
- Non-Thesis Option (p. 1192)

Student's Advisory Committee

After receiving admission to graduate studies and enrolling for coursework, the student will consult with the head of his or her major or administrative department (or intercollegiate faculty, if applicable) concerning appointment of the chair of his or her advisory committee. With the exception of the Mays Business School non-thesis option, the Master of Science in Economics with a concentration in financial economics or financial econometrics, the Master of Science with a major in Educational Human Resource Development, HRD option, and the Master of Science in Nursing with a major in Nursing Education, the student's advisory committee for the master's degree will consist of no fewer than three members of the graduate faculty, representative of the student's fields of study and research. The chair or the co-chair of the advisory committee must be from the student's major department (or intercollegiate faculty, if applicable), and at least one or more of the members must have an appointment to a department other than the student's major department. The outside member for students in an interdisciplinary program must have an appointment to a department different from the chair of the student's committee.

The chair, in consultation with the student, will select the remainder of the advisory committee. The student will interview each prospective committee member to determine whether he or she is willing to serve. Only graduate faculty members located on Texas A&M University campuses may serve as chair of a student's advisory committee. Other graduate faculty members located off campus may serve as a member or co-chair (but not chair) with a member as the chair. The chair of the committee, who usually
has immediate supervision of the student’s research and thesis, has the responsibility for calling required meetings of the committee and for calling meetings at any other time considered desirable.

If the chair of a student’s advisory committee voluntarily leaves the University and the student is near completion of the degree and wants the chair to continue to serve in this role, the student is responsible for securing a current member of the University Graduate Faculty, from the student’s academic program and located near the Texas A&M University campus site, to serve as the co-chair of the committee. The Department Head or Chair of Intercollegiate faculty may request in writing to the Associate Provost for Graduate and Professional Studies that a faculty member who is on an approved leave of absence or has voluntarily separated from the university, be allowed to continue to serve in the role of chair of a student’s advisory committee without a co-chair for us to one year. The students should be near completion of the degree. Extensions beyond the one year period can be granted with additional approval of the Dean.

If the chair of the student’s advisory committee is unavailable for an extended time in any academic period during which the student is involved in activities relating to an internship, thesis or professional paper, and is registered for courses such as 5V98, 5V99, 584, 691, 692 or 693, the student may request, in writing, that the department head appoint an alternate advisory committee chair during the interim period.

The duties of the committee include responsibility for the proposed degree plan, the research proposal, the thesis and the final examination. In addition, the committee as a group and as individual members are responsible for advising the student on academic matters, and, in the case of academic deficiency, initiating recommendations to the Office of Graduate and Professional Studies.

The committee members’ approval on the degree plan indicate their willingness to accept the responsibility for guiding and directing the entire academic program of the student and for initiating all academic actions concerning the student. Although individual committee members may be replaced by petition for valid reasons, a committee cannot resign en masse.

Degree Plan

The student’s advisory committee, in consultation with the student, will develop the proposed degree plan. The degree plan must be completed and filed with the Office of Graduate and Professional Studies prior to the deadline imposed by the student’s college or interdisciplinary degree program, if applicable, and no later than 90 days prior to the date of the final oral examination or thesis defense.

A student should submit the degree plan using the online Document Processing Submission System (http://ogspdss.tamu.edu).

A student submitting a proposed degree plan for a Master of Science degree should designate on the official degree plan the appropriate program option.

Additional coursework may be added to the approved degree plan by petition if it is deemed necessary by the advisory committee to correct deficiencies in the student’s academic preparation. No changes can be made to the degree plan once the student’s Request for Final Examination or Request for Final Examination Exemption is approved by the Office of Graduate and Professional Studies.

Credit Requirement

A minimum of 32 semester credit hours of approved courses and research is required for the thesis option Master of Science degree with the exception of the Master of Science in Visualization, which requires 48 hours and Master of Science in Athletic Training, which requires 60 hours. A minimum of 36 semester credit hours of approved coursework is required for the Non-Thesis Option.

Ordinarily the student will devote the major portion of his or her time to work in one or two closely related fields. Other work will be in supporting fields of interest.

Transfer of Credit

A student who has earned 12 hours of graduate credit in residence at Texas A&M University may be authorized to transfer courses in excess of the limits prescribed below upon the advice of the advisory committee and with the approval of the Office of Graduate and Professional Studies. Courses taken in residence at an accredited U.S. institution or approved international institution with a final grade of B or greater may be considered for transfer credit if, at the time the courses were completed, the courses would be accepted for credit toward a similar degree for a student in degree-seeking status at the host institution. Otherwise, the limitations stated in the following section apply. Coursework in which no formal grades are given or in which grades other than letter grades (A or B) are earned (for example, CR, P, S, U, H, etc.) is not accepted for transfer credit. Courses appearing on the degree plan with grades of D, F or U may not be absolved by transfer work. Credit for thesis research or the equivalent is not transferable. Credit for coursework submitted for transfer from any college or university must be shown in semester credit hours or equated to semester credit hours. An official transcript from the university at which the transfer coursework was taken must be sent directly to the Office of Admissions.

Courses used toward a degree at another institution may not be applied for graduate credit. If the course to be transferred was taken prior to the conferral of a degree at the transfer institution, a letter from the registrar at that institution stating that the course was not applied for credit toward the degree must be submitted to the Office of Graduate and Professional Studies.

Grades for courses completed at other institutions are not included in computing the GPR.

Limitations on the Use of Transfer, Extension and Certain Other Courses

Some departments may have more restrictive requirements for transfer work. If otherwise acceptable, certain courses may be used toward meeting credit-hour requirements for the master’s degree under the following limitations.

1. The maximum number of credit hours which may be considered for transfer credit is the greater of 12 hours or one-third (1/3) of the total hours of a degree plan. The following restrictions apply:
   • Graduate and/or upper-level undergraduate courses taken in residence at an accredited U.S. institution, or approved international institution with a final grade of B or greater will be considered for transfer credit if, at the time the courses were completed, the student was in degree-seeking status at Texas A&M University, or the student was in degree-seeking status at the institution at which the courses were taken; and if the courses
would be accepted for credit toward a similar degree for a student in degree-seeking status at the host institution.

- Courses previously used for another degree are not acceptable for degree plan credit.

2. The maximum number of credit hours taken in post-baccalaureate non-degree (G6) classification at Texas A&M University which may be considered for application to the degree plan is 12.

3. Not more than 12 hours may be used in any combination of the following categories:
- Not more than 8 hours in the combination of 5V98, 5V99, and 691 (research) or 684 (Professional Internship) may be used.
- Not more than 8 hours of 685 (Directed Studies) may be used.
- Not more than 3 hours of 690 (Theory of Research) may be used.
- Not more than 3 hours of 695 (Frontiers in Research) may be used.

4. A maximum of 2 hours of Seminar (681).

5. A maximum of 9 hours of advanced undergraduate courses (300- or 400-level).

6. For graduate courses of three weeks’ duration or less, taken at other institutions, up to 1 hour of credit may be obtained for each five-day week of coursework. Each week of coursework must include at least 15 contact hours.

7. Continuing education courses may not be used for graduate credit.

8. Extension courses are not acceptable for credit.

9. For the Degree of Master of Science in Medical Science, students with a first professional degree (MD, DDS or DVM) may take up to 20 hours of 691 (research). For the remaining hours, a maximum of 2 hours can be Seminar (681) and a maximum of 3 hours can be Directed Studies (685).

Exceptions will be permitted only in unusual cases and when petitioned by the student’s advisory committee and approved by the Office of Graduate and Professional Studies.

**Thesis Option**

An acceptable thesis is required for the Master of Science degree for a student who selects the thesis option program. The finished work must reflect a comprehensive understanding of the pertinent literature and express in clear English, the problem(s) for study, the method, significance and results of the student’s original research. Guidelines for the preparation of the thesis are available in the Thesis Manual, which is available online at the Office of Graduate and Professional Studies website.

After successful defense (or exemption) and approval by the student’s advisory committee and the head of the student’s major department (or chair of the intercollegiate faculty, if applicable), the student must submit his/her thesis in electronic format as a single PDF file. The PDF file must be uploaded to the Office of Graduate and Professional Studies website. Additionally, a signed approval form must be brought or mailed to the Office of Graduate and Professional Studies. The PDF file and the signed approval form are required by the deadline.

Deadline dates for submitting the thesis are announced each semester or summer term in the “Office of Graduate and Professional Studies Calendar” (see Time Limit statement). These dates also can be accessed via the Office of Graduate and Professional Studies website.

Before a student can be “cleared” by Thesis and Dissertation Services, a processing fee must be paid through Student Business Services. This processing fee is for the thesis/dissertation services provided. After commencement, dissertations are digitally stored and made available through the Texas A&M Libraries.

A thesis that is deemed unacceptable by the Office of Graduate and Professional Studies because of excessive corrections will be returned to the student’s department head (or chair of the intercollegiate faculty, if applicable). The manuscript must be resubmitted as a new document, and the entire review process must begin again. All original submittal deadlines must be met during the resubmittal process to graduate that semester.

**Thesis Proposal**

For the thesis option Master of Science degree, the student must prepare a thesis proposal for approval by the advisory committee and the head of the major department or chair of the intercollegiate faculty, if applicable. This proposal must be submitted to the Office of Graduate and Professional Studies at least 20 working days prior to the submission of the request for the final examination.

Compliance issues must be addressed if a graduate student is performing research involving human subjects, animals, infectious biohazards and recombinant DNA. A student involved in these types of research should check with the Office of Research Compliance and Biosafety at (979) 458-1467 to address questions about all research compliance responsibilities. Additional information can also be obtained on the Office of Research Compliance and Biosafety website.

**Thesis Defense/Final Examination**

A student must pass a final examination by dates announced each semester or summer term in the Office of Graduate and Professional Studies Calendar. The Office of Graduate and Professional Studies must be notified in writing of any cancellation. To be eligible to take the final examination, a student’s GPR must be at least 3.000 for courses on the degree plan and for all courses completed at Texas A&M which are eligible to be applied to a graduate degree, and there must be no unabsolved grades of D, F or U for any course listed on the degree plan. To absolve a deficient grade, the student must repeat the course at Texas A&M University and achieve a grade of C or better. All coursework on the degree plan must have been completed with the exception of those hours for which the student is registered. Additionally, all English Language Proficiency requirements must be satisfied prior to scheduling the examination. If applicable, an approved thesis proposal must be on file in the Office of Graduate and Professional Studies according to published deadlines.

A request to hold and announce the final examination must be submitted to the Office of Graduate and Professional Studies a minimum of 10 working days in advance of the scheduled date for the examination. Examinations which are not completed and reported as satisfactory to the Office of Graduate and Professional Studies within 10 working days of the scheduled examination date will be recorded as failures. A student may be given only one opportunity to repeat the final examination for the master’s degree and that must be within a time period that does not extend beyond the end of the next regular semester (summer terms are excluded).

For thesis option students, the final examination covers the thesis and all work taken on the degree plan and at the option of the committee may be written or oral or both. The final examination may not be administered before the thesis is available to all members of the student’s advisory committee in substantially final form, and all members have had adequate time to review the document. The examination is conducted by the Office of Graduate and Professional Studies website.
student’s advisory committee as finally constituted. A thesis option student must be registered in the University in the semester or summer term in which the final examination is taken. Persons other than members of the graduate faculty may, with mutual consent of the candidate and the major professor, attend final examinations for advanced degrees. Upon completion of the questioning of the candidate, all visitors must excuse themselves from the proceedings. A positive vote by all members of the graduate committee with at most one dissension is required to pass a student on his or her exam. A department, or interdisciplinary degree program, may have a stricter requirement provided there is consistency within all degree programs within a department or interdisciplinary degree program.

A thesis option candidate may petition to be exempt from his/her final examination provided his/her degree plan GPR is 3.500 or greater and he/she has the approval of the advisory committee, the head of the student’s major department, or intercollegiate chair, if appropriate, and the Office of Graduate and Professional Studies. It is required that the petition for exemption be submitted the same semester the student intends to submit the thesis.

For non-thesis option students, a final comprehensive examination is required. The Master of Science in Educational Human Resource Development, HRD option, the Master of Science in Nursing with a major in Nursing Education, the Master of Science Program in the Mays Business School and the Master of Science in Economics with a concentration in financial economics or financial econometrics do not have final examination requirements. Otherwise, exemptions from final examinations are not allowed. The final exam cannot be held prior to the mid point of the final semester if questions on the exam are based on courses in which the student is currently enrolled. If a student has completed all required degree plan coursework, the student is not required to be registered for classes in the semester the final examination is administered (unless he/she holds an assistantship).

Exam results must be submitted with original signatures of only the committee members approved by the Office of Graduate and Professional Studies. If an approved committee member substitution (1 only) has been made, his/her signature must also be submitted to the Office of Graduate and Professional Studies.

**Non-Thesis Option**

For the non-thesis option, a thesis is not required. A final comprehensive examination is required for all non-thesis Master of Science programs except the Master of Science programs offered by the Mays Business School, the Master of Science in Economics with a concentration in financial economics or financial econometrics, the Master of Science with a major in Educational Human Resource Development, HRD option, and the Master of Science in Nursing with a major in Nursing Education. No exemptions are allowed. The requirements as to level of courses and examinations are the same as for the thesis option Master of Science degree. The final examination cannot be held prior to the mid point of the final semester if questions on the examination are based on courses in which the student is currently enrolled.

A student pursuing the non-thesis option is not allowed to enroll in 5V98, 5V99, or 691 (research) for any reason and 691 may not be used for credit toward a non-thesis option Master of Science degree. A maximum of 4 credit hours of 684 (Professional Internship), 8 credit hours of 685 (Directed Studies), and up to 3 credit hours of 690 (Theory of Research) or 695 (Frontiers in Research) may be used toward the non-thesis option Master of Science degree. In addition, any combination of 684, 685, 690 and 695 may not exceed 25 percent of the total credit hour requirement shown on the individual degree plan. All requirements for the non-thesis option Master of Science degree other than those specified above are the same as for the thesis option degree.

### Additional Requirements

#### Additional Requirements

- **Residence (p. 1192)**
- **Continuous Registration (p. 1192)**
- **Time Limit (p. 1192)**
- **Foreign Languages (p. 1192)**
- **Application for Degree (p. 1193)**

#### Residence

In partial fulfillment of the residence requirement for the degree of Master of Science, the student must complete 9 resident credit hours during one regular semester or one 10-week summer semester in resident study at Texas A&M University. Upon recommendation of the student’s advisory committee, department head or Chair of the Interdisciplinary Program, if appropriate, and with approval of the Office of Graduate and Professional Studies, a student may be granted exemption from this requirement. Such a petition, however, must be approved prior to the student’s registration for the final 9 credit hours of required coursework.

Students who are employed full-time while completing their degree may fulfill total residence requirements by completion of less-than-full time course loads each semester. In order to be considered for this, the student is required to submit a Petition for Waivers and Exceptions along with verification of his/her employment to the Office of Graduate and Professional Studies.

See Residence Requirements (p. 22).

#### Continuous Registration

A student in the thesis option of the Master of Science program who has completed all coursework on his/her degree plan other than 5V98, 5V99, and 691 (research) is required to be in continuous registration until all requirements for the degree have been completed. See Continuous Registration Requirements (p. 25).

#### Time Limit

All degree requirements must be completed within a period of seven consecutive years for the degree to be granted. A course will be considered valid until seven years after the end of the semester in which it is taken. Graduate credit for coursework which is more than seven calendar years old at the time of the final examination (oral or written) may not be used to satisfy degree requirements.

A student who has chosen the thesis option must have the final corrected version of the thesis cleared by the Office of Graduate and Professional Studies no later than one year after the final examination, or approval of a petition for exemption from the final exam, or within the seven-year time limit, whichever occurs first. Failure to do so will result in the degree not being awarded.

#### Foreign Languages

No specific language requirement exists for the Master of Science degree.
Application for Degree
For information on applying for your degree, please visit the Graduation (p. 24) section.

Doctor of Philosophy in Biology
Work leading to the degree of Doctor of Philosophy (PhD) is designed to give the candidate a thorough and comprehensive knowledge of his or her professional field and training in methods of research. The final basis for granting the degree shall be the candidate's grasp of the subject matter of a broad field of study and a demonstrated ability to do independent research. In addition, the candidate must have acquired the ability to express thoughts clearly and forcefully in both oral and written languages. The degree is not granted solely for the completion of coursework, residence and technical requirements, although these must be met.

For a student who has completed a master's degree, a DDS/DMD, DVM or MD at a U.S. institution, a minimum of 64 hours is required on the degree plan for the degree of Doctor of Philosophy. For a student who has completed a baccalaureate degree but not a master's degree or a U.S. DDS/DMD, DVM or MD, a minimum of 96 hours is required on the degree plan for the degree of Doctor of Philosophy.

Steps to Fulfill Doctoral Degree Requirements

1. Meet with departmental/intercollegiate graduate advisor to plan course of study for first semester.  
   **When:** Before first semester registration.  
   **Approved by:** Graduate advisor.

2. Establish advisory committee. Submit a degree plan.  
   **When:** Prior to the deadline imposed by the student's college or intercollegiate programs, and no later than 90 days prior to preliminary examination.  
   **Approved by:** Advisory committee, department head or intercollegiate faculty chair, and Office of Graduate and Professional Studies (OGAPS).

3. Complete English Language Proficiency requirements (if applicable), and coursework detailed on degree plan.  
   **When:** Before preliminary examination.

4. Complete the preliminary examination.  
   **When:** See steps for completing the preliminary examination. The preliminary examination results must have been submitted to OGAPS 14 weeks prior to the date of the defense.  
   **Approved by:** Advisory committee, department head or chair of the intercollegiate faculty, and OGAPS.

5. Submit proposal for dissertation or record of study to the Office of Graduate and Professional Studies.  
   **When:** No later than 20 working days prior to the submission of the Request for the Final Examination.  
   **Approved by:** Advisory committee, department head or intercollegiate faculty chair, and OGAPS.

6. Complete residence requirement.  
   **When:** Before submitting request to schedule final oral examination.  
   **Approved by:** OGAPS

7. Apply for degree; pay graduate fee.  
   **When:** During the first week of the final semester; see OGAPS calendar for deadlines.

8. Submit request for permission to hold and announce final oral examination.  
   **When:** Must be received by OGAPS at least 10 working days before requested exam date. See OGAPS calendar for deadlines.  
   **Approved by:** Advisory committee, department head or intercollegiate faculty chair, and OGAPS.

9. Successfully complete final examination.  
   **When:** The Report of the Final Examination Form should be submitted to OGAPS within 10 days following the exam.  
   **Approved by:** Advisory committee and OGAPS
### Program Requirements

#### Program Requirements

- Student’s Advisory Committee (p. 1194)  
- Degree Plan (p. 1194)  
- Transfer of Credit (p. 1195)  
- Research Proposal (p. 1195)  
- Examinations (p. 1195)  
  - Preliminary Examination (p. 1195)  
  - Final Examination/Dissertation Defense (p. 1197)  
- Dissertation (p. 1197)

#### Student’s Advisory Committee

After receiving admission to graduate studies and enrolling, the student will consult with the head of his or her major or administrative department (or chair of the intercollegiate faculty) concerning appointment of the chair of the advisory committee. The student’s advisory committee will consist of **no fewer than four members of the graduate faculty** representative of the student’s several fields of study and research, where the chair or co-chair must be from the student’s department (or intercollegiate faculty, if applicable), and **at least one or more of the members must have an appointment to a department other than the student’s major department.** The outside member for a student in an interdisciplinary degree program must be from a department different from the chair of the student’s committee.

The chair, in consultation with the student, will select the remainder of the advisory committee. Only graduate faculty members located on Texas A&M University campuses may serve as chair of a student’s advisory committee. Other Texas A&M University graduate faculty members located off-campus may serve as a member or co-chair (but not chair), with a member as the chair.

If the chair of a student’s advisory committee voluntarily leaves the University and the student is near completion of the degree and wants the chair to continue to serve in this role, the student is responsible for securing a current member of the University Graduate Faculty, from the student’s academic program and located near the Texas A&M University campus site, to serve as the co-chair of the committee. The Department Head or Chair of Intercollegiate faculty may request in writing to the Associate Provost for Graduate and Professional Studies that a faculty member who is on an approved leave of absence or has voluntarily separated from the university, be allowed to continue to serve in the role of chair of a student’s advisory committee without a co-chair for us to one year. The students should be near completion of the degree. Extensions beyond the one year period can be granted with additional approval of the Dean.

The committee members’ signatures on the degree plan indicate their willingness to accept the responsibility for guiding and directing the entire academic program of the student and for initiating all academic actions concerning the student. Although individual committee members may be replaced by petition for valid reasons, a committee cannot resign en masse. The chair of the committee, who usually has immediate supervision of the student’s research and dissertation or record of study, has the responsibility for calling all meetings of the committee. The duties of the committee include responsibility for the proposed degree plan, the research proposal, the preliminary examination, the dissertation or record of study and the final examination. In addition, the committee, as a group and as individual members, is responsible for counseling the student on academic matters, and, in the case of academic deficiency, initiating recommendations to the Office of Graduate and Professional Studies.

#### Degree Plan

The student’s advisory committee will evaluate the student’s previous education and degree objectives. The committee, in consultation with the student, will develop a proposed degree plan and outline a research problem which, when completed, as indicated by the dissertation (or its equivalent for the degree of Doctor of Education or the degree of Doctor of Engineering), will constitute the basic requirements for the degree. **The degree plan must be filed with the Office of Graduate and Professional Studies prior to the deadline imposed by the student’s college and no later than 90 days prior to the preliminary examination.**

This proposed degree plan should be submitted through the online Document Processing Submission System located on the website http://ogsdss.tamu.edu. A minimum of 64 hours is required on the degree plan for the Doctor of Philosophy for a student who has completed a master’s degree. A student who has completed a DDS/DMD, DVM or a MD at a U.S. institution is also required to complete a minimum of 64 hours. A student who has completed a baccalaureate degree but not a master’s degree will be required to complete a 96-hour degree plan. Completion of a DDS/DMD, DVM or MD degree at a foreign institution requires completion of a minimum of 96 hours for the Doctor of Philosophy. A
field of study may be primarily in one department or in a combination of
departments. A degree plan must carry a reasonable amount of 691 or
5V98/5V99 (research).

Additional coursework may be added by petition to the approved degree
plan by the student’s advisory committee if it is deemed necessary to
correct deficiencies in the student’s academic preparation. No changes
can be made to the degree plan once the student’s Request for Final
Examination is approved by the Office of Graduate and Professional
Studies.

Approval to enroll in any professional course (900-level) should be
obtained from the head of the department (or Chair of the intercollegiate
faculty, if applicable) in which the course will be offered before including
such a course on a degree plan.

No credit may be obtained by correspondence study, by extension or for
any course of fewer than three weeks duration.

Transfer of Credit

Courses for which transfer credits are sought must have been completed
with a grade of B or greater and must be approved by the student’s
advisory committee and the Office of Graduate and Professional Studies.
These courses must not have been used previously for another degree.
Except for officially approved cooperative doctoral programs, credit for
thesis or dissertation research or the equivalent is not transferable. Credit
for “internship” coursework in any form is not transferable. Courses taken
in residence at an accredited U.S. institution or approved international
institutions with a final grade of B or greater will be considered for transfer
credit if, at the time the courses were completed, the courses would be
accepted for credit toward a similar degree for a student in degree-seeking
status at the host institution. Credit for coursework taken by extension
is not transferable. Coursework in which no formal grades are given
or in which grades other than letter grades (A or B) are earned (for
example, CR, P, S, U, H, etc.) is not accepted for transfer credit. Credit
for coursework submitted for transfer from any college or university must
be shown in semester credit hours, or equated to semester credit hours.

Courses used toward a degree at another institution may not be applied
for graduate credit. If the course to be transferred was taken prior to the
conferment of a degree at the transfer institution, a letter from the registrar
at that institution stating that the course was not applied for credit toward
the degree must be submitted to the Office of Graduate and Professional
Studies.

Grades for courses completed at other institutions are not included
in computing the GPR. An official transcript from the university at
which transfer courses are taken must be sent directly to the Office of
Admissions.

Research Proposal

The general field of research to be used for the dissertation should be
agreed on by the student and the advisory committee at their first meeting,
as a basis for selecting the proper courses to support the proposed
research.

As soon thereafter as the research project can be outlined in reasonable
detail, the dissertation research proposal should be completed. The
research proposal should be approved at a meeting of the student’s
advisory committee, at which time the feasibility of the proposed research
and the adequacy of available facilities should be reviewed. The approved
proposal, signed by all members of the student’s advisory committee,
the head of the student’s major department (or chair of the intercollegiate
faculty, if applicable), must be submitted to the Office of Graduate and
Professional Studies at least 20 working days prior to the submission of
the Request for the Final Examination.

Compliance issues must be addressed if a graduate student is performing
research involving human subjects, animals, infectious biohazards
and recombinant DNA. A student involved in these types of research
should check with the Office of Research Compliance and Biosafety
at (979) 458-1467 to address questions about all research compliance
responsibilities. Additional information can also be obtained on the website

Examinations

Preliminary Examination

The student’s major department (or chair of the intercollegiate faculty,
if applicable) and his or her advisory committee may require qualifying,
cumulative or other types of examinations at any time deemed desirable.
These examinations are entirely at the discretion of the department and
the student’s advisory committee.

The preliminary examination is required. The preliminary examination
for a doctoral student shall be given no earlier than a date at which the
student is within 6 credit hours of completion of the formal coursework
on the degree plan (i.e., all coursework on the degree plan except 681,
684, 690, 691, 5V98, 5V99 and 692 courses). The student is strongly
couraged to complete the Preliminary Examination no later than the
end of the semester following the completion of the formal coursework
on the degree plan. The Office of Graduate and Professional Studies must
receive the results of the preliminary examination at least 14 weeks prior
to the final examination date. The examination shall be oral and written
unless otherwise recommended by the student’s advisory committee
and approved by the Office of Graduate and Professional Studies. The
written part of the examination will cover all fields of study included in
the student’s degree plan. Each member of the advisory committee is
responsible for administering a written examination in his or her particular
field, unless he or she chooses to waive participation in this part of
the examination. Two or more members of the advisory committee may
give a joint written examination. One or more members may require a
student to take a departmental or intercollegiate faculty examination to
supplement or replace a written examination. Each written examination
must be completed and reported as satisfactory to the chair of the
advisory committee before the oral portion of the examination may be
held. In case any written examination is reported unsatisfactory, the entire
advisory committee must agree (1) to proceed with the oral portion of the
preliminary examination, or (2) to adopt another course of action regarding
the unsatisfactory written examination.

Prior to scheduling the preliminary examination with the other committee
members, the committee chair will review the eligibility criteria with the
student, using the Preliminary Examination Checklist to ensure the student
is ready for the examination. The following list of eligibility requirements
applies.

• Student is registered at Texas A&M University for the semester or
summer term during which any portion of the preliminary examination
may fall. If the entire examination falls between semesters, then the
student must be registered for the term immediately preceding the
examination.
• An approved degree plan was on file with the Office of Graduate and Professional Studies at least 90 days prior to the first written examination.
• Student’s cumulative GPR is at least 3.000.
• Student’s degree plan GPR is at least 3.000.
• All English language proficiency requirements have been satisfied.
• All committee members have scheduled or waived the written portion and agreed to attend the oral portion of the examination or have found a substitute. Only one substitution is allowed and it cannot be for the committee chair.
• At the end of the semester in which the exam is given, there are no more than 6 hours of coursework remaining on the degree plan (except 681, 684, 690, 691, 5V98, 5V99 and 692). The head of the student’s department (or Chair of the Intercollegiate Faculty, if applicable) has the authority to approve a waiver of this criterion.
• The time span from the first written examination to the oral is no more than three weeks. (In cases of department-wide written examinations, this criterion is not applicable.) The head of the student’s department (or chair of the intercollegiate faculty, if applicable) has the authority to approve a waiver of this criterion.

Once all requirements are met, departments or intercollegiate faculty may announce the schedule of the written and oral parts of the examination.

Credit for the preliminary examination is not transferable. If a departmental or interdisciplinary faculty examination is used as part of the written portion of the preliminary examination, it must be the last examination offered prior to the date scheduled for the preliminary examination. In the schedule of the written portion, all members of the student’s advisory committee are to be included.

Through the preliminary examination, the student’s advisory committee should satisfy itself that the student has demonstrated the following qualifications:

1. a mastery of the subject matter of all fields in the program;
2. an adequate knowledge of the literature in these fields and an ability to carry out bibliographical research.

In case a student is required to take, as a part of the written portion of a preliminary examination, an examination administered by a department or intercollegiate faculty, the department or intercollegiate faculty must:

1. offer the examination at least once every six months. The departmental or interdisciplinary degree program examination should be announced at least 30 days prior to the scheduled examination date.
2. assume the responsibility for marking the examination satisfactory or unsatisfactory, or otherwise graded, and in the case of unsatisfactory, stating specifically the reasons for such a mark.
3. forward the marked examination to the chair of the student’s advisory committee within one week after the examination.

The chair of the student’s advisory committee is responsible for making all written examinations available to the members of the advisory committee at or before the oral portion of the preliminary examination. A positive vote by all members of the graduate committee with at most one dissent is required to pass a student on his or her preliminary exam. A department or intercollegiate faculty can have a stricter requirement provided there is consistency within all degree programs within a department or an interdisciplinary degree program.

The chair of the advisory committee will promptly report the results of the Preliminary Examination to the Office of Graduate and Professional Studies, using the Report of Doctoral Preliminary Examination form and the Preliminary Examination checklist. Both forms must have the appropriate signatures. These forms should be submitted to the Office of Graduate and Professional Studies within 10 working days of the scheduled preliminary examination.

The Report of the Preliminary Examination form must be submitted with original signatures of the approved committee members. If an approved committee member substitution (1 only) has been made, his/her signature must also be included on the form submitted to the Office of Graduate and Professional Studies. The original signature of the department head is also required on the form.

After passing the required oral and written preliminary examinations for the doctoral degree, the student must complete the final examination for the degree within four calendar years. Otherwise, the student will be required to repeat the preliminary examination. Upon approval of the student’s advisory committee, with no more than one member dissenting, and approval of the Office of Graduate and Professional Studies, a student who has failed the preliminary examination may be given one re-examination. Adequate time must be given to permit the student to address the inadequacies emerging from the first examination (normally six months). The student and the advisory committee should jointly negotiate a mutually acceptable date for this purpose.

A student must be registered at Texas A&M University for a minimum of one semester credit hour in the semester or summer term in which they will take any portion of the Preliminary Examination.

**Steps for Completing the Preliminary Examination**

**Final Examination/Dissertation Defense**

The candidate for the doctoral degree must pass a final examination by deadline dates announced in the “Office of Graduate and Professional Studies Calendar” each semester or summer term. The doctoral student is allowed only one opportunity to take the final examination. No student may be given a final examination unless his or her current official cumulative and degree plan GPAs are 3.000 or better and he or she has been admitted to candidacy. No unsolved grades of D, F, or U for any course can be listed on the degree plan. To absolve a deficient grade, a student must repeat the course and achieve a grade of C or better. A student must have completed all coursework on his or her degree plan with the exception of 691, 5V98, or 5V99 (research) or 692 (Professional Study) hours. The student must be registered for all remaining hours; no hours remain to be taken on the degree plan. The preliminary examination results must have been submitted to the Office of Graduate and Professional Studies 14 weeks prior to the date of the defense. The research proposal must have been submitted to the Office of Graduate and Professional Studies 25 working days prior to the date of the final examination/defense. Any changes to the degree plan must be approved by the Office of Graduate and Professional Studies prior to the approval of the final examination. The request to hold and announce the final examination must be submitted to the Office of Graduate and Professional Studies a minimum of 10 working days in advance of the scheduled date. Examination/Defense results must be submitted to the Office of Graduate and Professional Studies within 10 working days of the scheduled examination/defense date. The ability to perform independent research must be demonstrated by the dissertation, which must be the original work of the candidate. Whereas acceptance of the dissertation is based primarily on its scholarly merit, it must also exhibit creditable literary workmanship. The format of the dissertation must be acceptable to the Office of Graduate and Professional Studies. Guidelines for the preparation of the thesis are available in the *Thesis Manual*, which is available online at [http://ogaps.tamu.edu](http://ogaps.tamu.edu).

After successful defense and approval by the student’s advisory committee and the head of the student’s major department (or chair of the intercollegiate faculty, if applicable), a student must submit his/her dissertation in electronic format as a single PDF file. The PDF file must be uploaded to the website, [http://ogaps.tamu.edu](http://ogaps.tamu.edu). Additionally, a signed approval form must be brought or mailed to the Office of Graduate and Professional Studies. Both the PDF file and the signed approval form are required by the deadline. Deadline dates for submitting are announced each semester or summer term in the Office of Graduate and Professional Studies Calendar (see Time Limit statement). These dates also can be accessed via the website [http://ogaps.tamu.edu](http://ogaps.tamu.edu).

Before a student can be “cleared” by Thesis and Dissertation Services, a processing fee must be paid through Student Business Services. This processing fee is for the thesis/dissertation services provided. After
Additional Requirements

Additional Requirements

- Residence (p. 1198)
- Time Limit (p. 1198)
- Continuous Registration (p. 1198)
- Admission to Candidacy (p. 1198)
- Languages (p. 1198)
- 99-Hour Cap on Doctoral Degree (p. 1198)
- Application for Degree (p. 1199)

Residence

A student who enters the doctoral degree program with a baccalaureate degree must spend one academic year plus one semester in resident study at Texas A&M University. A student who holds master’s degree when he/she enters doctoral degree program must spend one academic year in resident study. One academic year may include two adjacent regular semesters or one regular semester and one adjacent 10-week summer semester. The third semester is not required to be adjacent to the one year. Enrollment for each semester must be a minimum of 9 credit hours each to satisfy the residence requirement.

To satisfy the residence requirement, the student must complete a minimum of 9 credit hours per semester or 10-week summer semester in resident study at Texas A&M University for the required period. A student who enters a doctoral degree program with a baccalaureate degree may fulfill residence requirements in excess of one academic year (18 credit hours) by registration during summer sessions or by completion of a less-than-full course load (in this context a full course load is considered 9 credit hours per semester).

Students who are employed full-time while completing their degree may fulfill total residence requirements by completion of less-than-full time course loads each semester. In order to be considered for this, the student is required to submit a Petition for Waivers and Exceptions along with verification of his/her employment to the Office of Graduate and Professional Studies. An employee should submit verification of his/her employment to the Office of Graduate and Professional Studies because of excessive corrections will be returned to the student’s department head or chair of the intercollegiate faculty. The manuscript must be resubmitted as a new document, and the entire review process must begin anew. All original submittal deadlines must be met during the resubmittal process in order to graduate.

A dissertation that is deemed unacceptable by the Office of Graduate and Professional Studies because of excessive corrections will be returned to the student’s department head or chair of the intercollegiate faculty. The manuscript must be resubmitted as a new document, and the entire review process must begin anew. All original submittal deadlines must be met during the resubmittal process in order to graduate.

Continuous Registration

A student in a program leading to a Doctor of Philosophy who has completed all coursework on his/her degree plan other than 691, 5V98 or 5V99 (research) are required to be in continuous registration until all requirements for the degree have been completed. See Continuous Registration Requirements (p. 25).

Admission to Candidacy

To be admitted to candidacy for a doctoral degree, a student must have:

1. completed all formal coursework on the degree plan with the exception of any remaining 681, 684, 690 and 691, or 5V98 and 5V99,
2. a 3.0 Graduate GPA and a Degree Plan GPA of at least 3.0 with no grade lower than C in any course on the degree plan,
3. passed the preliminary examination (written and oral portions),
4. submitted an approved dissertation proposal,
5. met the residence requirements. The final examination will not be authorized for any doctoral student who has not been admitted to candidacy.

Languages

A student is required to possess a competent command of English. For English language proficiency requirements, see the Admissions section of this catalog. The doctoral (PhD) foreign language requirement at Texas A&M University is a departmental option, to be administered and monitored by the individual departments of academic instruction.

99-Hour Cap on Doctoral Degrees

In Texas, public colleges and universities are funded by the state according to the number of students enrolled. In accordance with legislation passed by the Texas Legislature, the number of hours for which state universities may receive subvention funding at the doctoral rate for any individual is limited to 99 hours. Texas A&M University and other universities will not receive subvention for hours in excess of the limit.

Institutions of higher education are allowed to charge the equivalent of nonresident tuition to a resident doctoral student who has enrolled in 100 or more semester credit hours of doctoral coursework.

A doctoral student at Texas A&M has seven years to complete his/her degree before being charged out-of-state tuition. A doctoral student who, after seven years of study, has accumulated 100 or more doctoral hours will be charged tuition at a rate equivalent to out-of-state tuition. Please note that the tuition increases will apply to Texas residents as well as students from other states and countries who currently are charged tuition at the resident rate. This includes those doctoral students who hold GAT,
GANT, and GAR appointments of 20 or more hours and recipients of competitive fellowships who receive more than $1,000 per semester. Doctoral students who, after seven years of study, have not accumulated 100 hours are eligible to pay in-state tuition if otherwise eligible.

For count purposes, a year is counted as three semesters, normally fall, spring and summer. Using this system, a student is allowed 21 semesters as a G8 student to complete the doctoral degree before being penalized with the higher tuition rate. Any semester in which a G8 student is enrolled for a doctoral level course is counted.

The following majors are exempt from the 99-Hour Cap on Doctoral Degrees:

- Biomedical Sciences
- Biochemistry
- Microbiology
- Genetics
- Toxicology
- Nutrition Sciences
- Community Clinical Psychology
- Counseling Psychology
- School Psychology
- Veterinary Pathology
- Clinical Psychology
- Counseling Psychology
- Medical Sciences
- Health Services Research
- Health Promotion and Community Health Sciences
- Epidemiology and Environmental Health

The hour limit for these majors is 130 doctoral hours.

**Application for Degree**

For information on applying for your degree, please visit the Graduation (p. 24) section.

**Master of Science in Microbiology**

The Master of Science (MS) curriculum is designed to develop new understanding through research and creativity. Students have the option to pursue a thesis or non-thesis Master of Science degree.

**Steps to Fulfill Master’s Degree Requirements**

1. Meet with departmental graduate advisor to plan semester registration. 
   
   **When:** Before first course of study for first semester.

   **Approved by:** Graduate committee of the intercollegiate faculty.

2. Establish advisory committee.  
   Submit a degree plan.  
   
   **When:** Prior to the deadline imposed by the student's college and no later than 90 days prior to final oral or thesis defense.

   **Approved by:** Advisory committee, department head or chair of the intercollegiate faculty, and Office of Graduate and Professional Studies (OGAPS).

3. If thesis is required, submit thesis proposal to the Office of Graduate and Professional Studies.  
   
   **When:** At least 20 working days prior to the submission of the Request for the Final Examination.

   **Approved by:** Advisory committee, department head or chair of the intercollegiate faculty and OGAPS.

4. Apply for degree; pay graduation fee.  
   
   **When:** During the first week of the final semester, see OGAPS calendar.

5. Check to be sure degree program and advisory committee are up to date and all ELP requirements (if applicable) and coursework are complete.  
   
   **When:** Well before submitting request to schedule final examination.

6. Complete residence requirement.  
   
   **When:** If applicable, before or during final semester.

   **Approved by:** OGAPS.

7. Submit request to schedule final examination.  
   
   **When:** Must be received by OGAPS at least 10 working days before exam date. See OGAPS calendar for deadlines.

   **Approved by:** Advisory committee, department head or chair of the intercollegiate faculty, and OGAPS.

8. Successfully complete final examination.  
   
   **When:** The Report of the Final Examination Form should be submitted to OGAPS within 10 days following the exam.

   **Approved by:** Advisory committee and OGAPS.
If required, upload one approved final copy of thesis as a single PDF file (http://ogaps.tamu.edu) and submit signed approval form to the Office of Graduate and Professional Studies. When: See OGAPS calendar for deadlines. Approved by: Advisory committee, department head or chair of the intercollegiate faculty and OGAPS.

Graduation; arrange for cap and gown. For more information, visit http://graduation.tamu.edu.

1. The online Document Processing Submission System is located on the website https://ogsdpss.tamu.edu.
2. Complete the application for degree form via the student's Howdy portal.

Program Requirements

Program Requirements

- Student's Advisory Committee (p. 1200)
- Degree Plan (p. 1200)
- Credit Requirements (p. 1201)
- Transfer of Credit (p. 1201)
- Limitations on the Use of Transfer, Extension and Certain Other Courses (p. 1201)
- Thesis Option (p. 1201)
  - Thesis Proposal (p. 1202)
  - Final Examination (p. 1202)
- Non-Thesis Option (p. 1202)

Student's Advisory Committee

After receiving admission to graduate studies and enrolling for coursework, the student will consult with the head of his or her major or administrative department (or intercollegiate faculty, if applicable) concerning appointment of the chair of his or her advisory committee. With the exception of the Mays Business School non-thesis option, the Master of Science in Economics with a concentration in financial econometrics, the Master of Science with a major in Educational Human Resource Development, HRD option, and the Master of Science in Nursing with a major in Nursing Education, the student's advisory committee for the master's degree will consist of no fewer than three members of the graduate faculty, representative of the student's fields of study and research. The chair or the co-chair of the advisory committee must be from the student's major department (or intercollegiate faculty, if applicable), and at least one or more of the members must have an appointment to a department other than the student's major department. The outside member for students in an interdisciplinary program must have an appointment to a department different from the chair of the student's committee.

The chair, in consultation with the student, will select the remainder of the advisory committee. The student will interview each prospective committee member to determine whether he or she is willing to serve. Only graduate faculty members located on Texas A&M University campuses may serve as chair of a student's advisory committee. Other graduate faculty members located off campus may serve as a member or co-chair (but not chair) with a member as the chair. The chair of the committee, who usually has immediate supervision of the student's research and thesis, has the responsibility for calling required meetings of the committee and for calling meetings at any other time considered desirable.

If the chair of a student's advisory committee voluntarily leaves the University and the student is near completion of the degree and wants the chair to continue to serve in this role, the student is responsible for securing a current member of the University Graduate Faculty, from the student's academic program and located near the Texas A&M University campus site, to serve as the co-chair of the committee. The Department Head or Chair of Intercollegiate faculty may request in writing to the Associate Provost for Graduate and Professional Studies that a faculty member who is on an approved leave of absence or has voluntarily separated from the university, be allowed to continue to serve in the role of chair of a student's advisory committee without a co-chair for us to one year. The students should be near completion of the degree. Extensions beyond the one year period can be granted with additional approval of the Dean.

If the chair of the student's advisory committee is unavailable for an extended time in any academic period during which the student is involved in activities relating to an internship, thesis or professional paper, and is registered for courses such as 5V98, 5V99, 684, 691, 692 or 693, the student may request, in writing, that the department head appoint an alternate advisory committee chair during the interim period.

The duties of the committee include responsibility for the proposed degree plan, the research proposal, the thesis and the final examination. In addition, the committee as a group and as individual members are responsible for advising the student on academic matters, and, in the case of academic deficiency, initiating recommendations to the Office of Graduate and Professional Studies.

The committee members' approval on the degree plan indicate their willingness to accept the responsibility for guiding and directing the entire academic program of the student and for initiating all academic actions concerning the student. Although individual committee members may be replaced by petition for valid reasons, a committee cannot resign en masse.

Degree Plan

The student's advisory committee, in consultation with the student, will develop the proposed degree plan. The degree plan must be completed and filed with the Office of Graduate and Professional Studies prior to the deadline imposed by the student's college or interdisciplinary degree program, if applicable, and no later than 90 days prior to the date of the final oral examination or thesis defense.

A student should submit the degree plan using the online Document Processing Submission System (http://ogsdpss.tamu.edu).

A student submitting a proposed degree plan for a Master of Science degree should designate on the official degree plan the appropriate program option.

Additional coursework may be added to the approved degree plan by petition if it is deemed necessary by the advisory committee to correct deficiencies in the student's academic preparation. No changes can be made to the degree plan once the student's Request for Final Examination or Request for Final Examination Exemption is approved by the Office of Graduate and Professional Studies.
Credit Requirement

A minimum of 32 semester credit hours of approved courses and research is required for the thesis option Master of Science degree with the exception of the Master of Science in Visualization, which requires 48 hours and Master of Science in Athletic Training, which requires 60 hours. A minimum of 36 semester credit hours of approved coursework is required for the Non-Thesis Option.

Ordinarily the student will devote the major portion of his or her time to work in one or two closely related fields. Other work will be in supporting fields of interest.

Transfer of Credit

A student who has earned 12 hours of graduate credit in residence at Texas A&M University may be authorized to transfer courses in excess of the limits prescribed below upon the advice of the advisory committee and with the approval of the Office of Graduate and Professional Studies. Courses taken in residence at an accredited U.S. institution or approved international institution with a final grade of B or greater may be considered for transfer credit if, at the time the courses were completed, the courses would be accepted for credit toward a similar degree for a student in degree-seeking status at the host institution. Otherwise, the limitations stated in the following section apply. Coursework in which no formal grades are given or in which grades other than letter grades (A or B) are earned (for example, CR, P, S, U, H, etc.) is not accepted for transfer credit. Courses appearing on the degree plan with grades of D, F or U may not be absolved by transfer work. Credit for thesis research or the equivalent is not transferable. Credit for coursework submitted for transfer from any college or university must be shown in semester credit hours or equated to semester credit hours. An official transcript from the university at which the transfer coursework was taken must be sent directly to the Office of Admissions.

Courses used toward a degree at another institution may not be applied for graduate credit. If the course to be transferred was taken prior to the conferral of a degree at the transfer institution, a letter from the registrar at that institution stating that the course was not applied for credit toward the degree must be submitted to the Office of Graduate and Professional Studies.

Grades for courses completed at other institutions are not included in computing the GPR.

Limitations on the Use of Transfer, Extension and Certain Other Courses

Some departments may have more restrictive requirements for transfer work. If otherwise acceptable, certain courses may be used toward meeting credit-hour requirements for the master’s degree under the following limitations.

1. The maximum number of credit hours which may be considered for transfer credit is the greater of 12 hours or one-third (1/3) of the total hours of a degree plan. The following restrictions apply:
   • Graduate and/or upper-level undergraduate courses taken in residence at an accredited U.S. institution, or approved international institution with a final grade of B or greater will be considered for transfer credit if, at the time the courses were completed, the student was in degree-seeking status at Texas A&M University, or the student was in degree-seeking status at the institution at which the courses were taken; and if the courses would be accepted for credit toward a similar degree for a student in degree-seeking status at the host institution.
   • Courses previously used for another degree are not acceptable for degree plan credit.

2. The maximum number of credit hours taken in post-baccalaureate non-degree (G6) classification at Texas A&M University which may be considered for application to the degree plan is 12.

3. Not more than 12 hours may be used in any combination of the following categories:
   • Not more than 8 hours in the combination of 5V98, 5V99, and 691 (research) or 684 (Professional Internship) may be used.
   • Not more than 8 hours of 685 (Directed Studies) may be used.
   • Not more than 3 hours of 690 (Theory of Research) may be used.
   • Not more than 3 hours of 695 (Frontiers in Research) may be used.

4. A maximum of 2 hours of Seminar (681).

5. A maximum of 9 hours of advanced undergraduate courses (300- or 400-level).

6. For graduate courses of three weeks’ duration or less, taken at other institutions, up to 1 hour of credit may be obtained for each five-day week of coursework. Each week of coursework must include at least 15 contact hours.

7. Continuing education courses may not be used for graduate credit.

8. Extension courses are not acceptable for credit.

9. For the Degree of Master of Science in Medical Science, students with a first professional degree (MD, DDS or DVM) may take up to 20 hours of 691 (research). For the remaining hours, a maximum of 2 hours can be Seminar (681) and a maximum of 3 hours can be Directed Studies (685). Exceptions will be permitted only in unusual cases and when petitioned by the student’s advisory committee and approved by the Office of Graduate and Professional Studies.

Thesis Option

An acceptable thesis is required for the Master of Science degree for a student who selects the thesis option program. The finished work must reflect a comprehensive understanding of the pertinent literature and express in clear English, the problem(s) for study, the method, significance and results of the student’s original research. Guidelines for the preparation of the thesis are available in the Thesis Manual, which is available online at the Office of Graduate and Professional Studies website.

After successful defense (or exemption) and approval by the student’s advisory committee and the head of the student’s major department (or chair of the intercollegiate faculty, if appropriate), the student must submit his/her thesis in electronic format as a single PDF file. The PDF file must be uploaded to the Office of Graduate and Professional Studies website. Additionally, a signed approval form must be brought or mailed to the Office of Graduate and Professional Studies. The PDF file and the signed approval form are required by the deadline.

Deadline dates for submitting the thesis are announced each semester or summer term in the “Office of Graduate and Professional Studies Calendar” (see Time Limit statement). These dates also can be accessed via the Office of Graduate and Professional Studies website.

Before a student can be “cleared” by Thesis and Dissertation Services, a processing fee must be paid through Student Business Services. This
A thesis that is deemed unacceptable by the Office of Graduate and Professional Studies because of excessive corrections will be returned to the student’s department head (or chair of the intercollegiate faculty, if applicable). The manuscript must be resubmitted as a new document, and the entire review process must begin again. All original submittal deadlines must be met during the resubmittal process to graduate that semester.

**Thesis Proposal**

For the thesis option Master of Science degree, the student must prepare a thesis proposal for approval by the advisory committee and the head of the major department or chair of the interdisciplinary faculty, if applicable. This proposal must be submitted to the Office of Graduate and Professional Studies at least 20 working days prior to the submission of the request for the final examination.

Compliance issues must be addressed if a graduate student is performing research involving human subjects, animals, infectious biohazards and recombinant DNA. A student involved in these types of research should check with the Office of Research Compliance and Biosafety at (979) 458-1467 to address questions about all research compliance responsibilities. Additional information can also be obtained on the Office of Research Compliance and Biosafety website.

**Thesis Defense/Final Examination**

A student must pass a final examination by dates announced each semester or summer term in the Office of Graduate and Professional Studies Calendar. The Office of Graduate and Professional Studies must be notified in writing of any cancellation. To be eligible to take the final examination, a student’s GPR must be at least 3.000 for courses on the degree plan and for all courses completed at Texas A&M which are eligible to be applied to a graduate degree, and there must be no unabsolved grades of D, F or U for any course listed on the degree plan. To absolve a deficient grade, the student must repeat the course at Texas A&M University and achieve a grade of C or better. All coursework on the degree plan must have been completed with the exception of those hours for which the student is registered. Additionally, all English Language Proficiency requirements must be satisfied prior to scheduling the examination. If applicable, an approved thesis proposal must be on file in the Office of Graduate and Professional Studies according to published deadlines.

A request to hold and announce the final examination must be submitted to the Office of Graduate and Professional Studies a minimum of 10 working days in advance of the scheduled date for the examination. Examinations which are not completed and reported as satisfactory to the Office of Graduate and Professional Studies within 10 working days of the scheduled examination date will be recorded as failures. A student may be given only one opportunity to repeat the final examination for the master’s degree and that must be within a time period that does not extend beyond the end of the next regular semester (summer terms are excluded).

For thesis option students, the final examination covers the thesis and all work taken on the degree plan and at the option of the committee may be written or oral or both. The final examination may not be administered before the thesis is available to all members of the student’s advisory committee in substantially final form, and all members have had adequate time to review the document. The examination is conducted by the student’s advisory committee as finally constituted. A thesis option student must be registered in the University in the semester or summer term in which the final examination is taken. Persons other than members of the graduate faculty may, with mutual consent of the candidate and the major professor, attend final examinations for advanced degrees. Upon completion of the questioning of the candidate, all visitors must excuse themselves from the proceedings. A positive vote by all members of the graduate committee with at most one dissension is required to pass a student on his or her exam. A department, or interdisciplinary degree program, may have a stricter requirement provided there is consistency within all degree programs within a department or interdisciplinary degree program.

A thesis option candidate may petition to be exempt from his/her final examination provided his/her degree plan GPR is 3.500 or greater and he/she has the approval of the advisory committee, the head of the student’s major department, or intercollegiate chair, if appropriate, and the Office of Graduate and Professional Studies. It is required that the petition for exemption be submitted the same semester the student intends to submit the thesis.

For non-thesis option students, a final comprehensive examination is required. The Master of Science in Educational Human Resource Development, HRD option, the Master of Science in Nursing with a major in Nursing Education, the Master of Science Program in the Mays Business School and the Master of Science in Economics with a concentration in financial economics or financial econometrics do not have final examination requirements. Otherwise, exemptions from final examinations are not allowed. The final exam cannot be held prior to the mid point of the final semester if questions on the exam are based on courses in which the student is currently enrolled. If a student has completed all required degree plan coursework, the student is not required to be registered for classes in the semester the final examination is administered (unless he/she holds an assistantship).

Exam results must be submitted with original signatures of only the committee members approved by the Office of Graduate and Professional Studies. If an approved committee member substitution (1 only) has been made, the student must also be submitted to the Office of Graduate and Professional Studies.

**Non-Thesis Option**

For the non-thesis option, a thesis is not required. A final comprehensive examination is required for all non-thesis Master of Science programs except the Master of Science programs offered by the Mays Business School, the Master of Science in Economics with a concentration in financial economics or financial econometrics, the Master of Science with a major in Educational Human Resource Development, HRD option, and the Master of Science in Nursing with a major in Nursing Education. No exemptions are allowed. The requirements as to level of courses and examinations are the same as for the thesis option Master of Science degree. The final examination cannot be held prior to the mid point of the final semester if questions on the examination are based on courses in which the student is currently enrolled.

A student pursuing the non-thesis option is not allowed to enroll in 5V98, 5V99, or 691 (research) for any reason and 691 may not be used for credit toward a non-thesis option Master of Science degree. A maximum of 4 credit hours of 684 (Professional Internship), 8 credit hours of 685 (Directed Studies), and up to 3 credit hours of 690 (Theory of Research) or 695 (Frontiers in Research) may be used toward the non-thesis option Master of Science degree. In addition, any combination of 684, 685, 690
and 695 may not exceed 25 percent of the total credit hour requirement shown on the individual degree plan. All requirements for the non-thesis option Master of Science degree other than those specified above are the same as for the thesis option degree.

**Additional Requirements**

**Residence**

In partial fulfillment of the residence requirement for the degree of Master of Science, the student must complete 9 resident credit hours during one regular semester or one 10-week summer semester in resident study at Texas A&M University. Upon recommendation of the student’s advisory committee, department head or Chair of the Interdisciplinary Program, if appropriate, and with approval of the Office of Graduate and Professional Studies, a student may be granted exemption from this requirement. Such a petition, however, must be approved prior to the student’s registration for the final 9 credit hours of required coursework.

Students who are employed full-time while completing their degree may fulfill total residence requirements by completion of less-than-full time course loads each semester. In order to be considered for this, the student is required to submit a Petition for Waivers and Exceptions along with verification of his/her employment to the Office of Graduate and Professional Studies.

See Residence Requirements (p. 22).

**Continuous Registration**

A student in the thesis option of the Master of Science program who has completed all coursework on his/her degree plan other than 5V98, 5V99, and 691 (research) is required to be in continuous registration until all requirements for the degree have been completed. See Continuous Registration Requirements (p. 25).

**Time Limit**

All degree requirements must be completed within a period of seven consecutive years for the degree to be granted. A course will be considered valid until seven years after the end of the semester in which it is taken. Graduate credit for coursework which is more than seven calendar years old at the time of the final examination (oral or written) may not be used to satisfy degree requirements.

A student who has chosen the thesis option must have the final corrected version of the thesis cleared by the Office of Graduate and Professional Studies no later than one year after the final examination, or approval of a petition for exemption from the final exam, or within the seven-year time limit, whichever occurs first. Failure to do so will result in the degree not being awarded.

**Foreign Languages**

No specific language requirement exists for the Master of Science degree.

**Application for Degree**

For information on applying for your degree, please visit the Graduation (p. 24) section.

**Doctor of Philosophy in Microbiology**

Work leading to the degree of Doctor of Philosophy (PhD) is designed to give the candidate a thorough and comprehensive knowledge of his or her professional field and training in methods of research. The final basis for granting the degree shall be the candidate’s grasp of the subject matter of a broad field of study and a demonstrated ability to do independent research. In addition, the candidate must have acquired the ability to express thoughts clearly and forcefully in both oral and written languages. The degree is not granted solely for the completion of coursework, residence and technical requirements, although these must be met.

For a student who has completed a master’s degree, a DDS/DMD, DVM or MD at a U.S. institution, a minimum of 64 hours is required on the degree plan for the degree of Doctor of Philosophy. For a student who has completed a baccalaureate degree but not a master’s degree or a U.S. DDS/DMD, DVM or MD, a minimum of 96 hours is required on the degree plan for the degree of Doctor of Philosophy.

**Steps to Fulfill Doctoral Degree Requirements**

1. Meet with departmental/intercollegiate graduate advisor to plan course of study for first semester.  
   **When:** Before first semester registration.  
   **Approved by:** Graduate advisor.

2. Establish advisory committee.  
   Submit a degree plan.  
   **When:** Prior to the deadline imposed by the student’s college or intercollegiate programs, and no later than 90 days prior to preliminary examination.  
   **Approved by:** Advisory committee, department head or intercollegiate faculty chair, and Office of Graduate and Professional Studies (OGAPS).

3. Complete English Language Proficiency requirements (if applicable), and coursework detailed on degree plan.  
   **When:** Before preliminary examination.

Note: Once formal coursework is complete, you must be continuously registered until all degree requirements have been met. See Continuous Registration Requirements (p. 25).

The PhD degree program in Biology is designed to provide the student with training in cellular, molecular and developmental and evolutionary biology, and to prepare the student for a leadership position in academic or industrial research. The Department of Biology offers a broad spectrum of research opportunities including plant molecular biology, molecular and cell biology of differentiation and development, gene structure and regulation in eukaryotic and prokaryotic organisms and their viruses, and cell structure and function. Students obtaining a degree in biology may also work closely with faculty in biochemistry, entomology, genetics, plant physiology, medicine and veterinary medicine.

Biology PhD students must demonstrate competence in their specific area of research and are expected to develop proficiency in four of the following seven areas at the time of the preliminary examination: biochemistry, cell biology, developmental biology, genetics, microbiology, computational/mathematical biology and molecular biology. An MS student must demonstrate competence in at least three of the above seven areas at the time of the final examination.

### Program Requirements

#### Program Requirements

- Student’s Advisory Committee (p. 1204)
- Degree Plan (p. 1205)
- Transfer of Credit (p. 1205)
- Research Proposal (p. 1205)
- Examinations (p. 1206)
  - Preliminary Examination (p. 1206)
  - Final Examination/Dissertation Defense (p. 1207)
- Dissertation (p. 1208)

#### Student’s Advisory Committee

After receiving admission to graduate studies and enrolling, the student will consult with the head of his or her major or administrative department (or chair of the intercollegiate faculty) concerning appointment of the chair of the advisory committee. The student’s advisory committee will consist of no fewer than four members of the graduate faculty representative of the student’s several fields of study and research, where the chair or co-chair must be from the student’s department (or intercollegiate faculty, if applicable), and at least one or more of the members must have an appointment to a department other than the student’s major department. The outside member for a student in an interdisciplinary
degree program must be from a department different from the chair of the student’s committee.

The chair, in consultation with the student, will select the remainder of the advisory committee. Only graduate faculty members located on Texas A&M University campuses may serve as chair of a student’s advisory committee. Other Texas A&M University graduate faculty members located off-campus may serve as a member or co-chair (but not chair), with a member as the chair.

If the chair of a student’s advisory committee voluntarily leaves the University and the student is near completion of the degree and wants the chair to continue to serve in this role, the student is responsible for securing a current member of the University Graduate Faculty, from the student’s academic program and located near the Texas A&M University campus site, to serve as the co-chair of the committee. The Department Head or Chair of Intercollegiate faculty may request in writing to the Associate Provost for Graduate and Professional Studies that a faculty member who is on an approved leave of absence or has voluntarily separated from the university, be allowed to continue to serve in the role of chair of a student’s advisory committee without a co-chair for us to one year. The students should be near completion of the degree. Extensions beyond the one year period can be granted with additional approval of the Dean.

The committee members’ signatures on the degree plan indicate their willingness to accept the responsibility for guiding and directing the entire academic program of the student and for initiating all academic actions concerning the student. Although individual committee members may be replaced by petition for valid reasons, a committee cannot resign en masse. The chair of the committee, who usually has immediate supervision of the student’s research and dissertation or record of study, has the responsibility for calling all meetings of the committee. The duties of the committee include responsibility for the proposed degree plan, the research proposal, the preliminary examination, the dissertation or record of study and the final examination. In addition, the committee, as a group and as individual members, is responsible for counseling the student on academic matters, and, in the case of academic deficiency, initiating recommendations to the Office of Graduate and Professional Studies.

**Degree Plan**

The student’s advisory committee will evaluate the student’s previous education and degree objectives. The committee, in consultation with the student, will develop a proposed degree plan and outline a research problem which, when completed, as indicated by the dissertation (or its equivalent for the degree of Doctor of Education or the degree of Doctor of Engineering), will constitute the basic requirements for the degree. The degree plan must be filed with the Office of Graduate and Professional Studies prior to the deadline imposed by the student’s college and no later than 90 days prior to the preliminary examination.

This proposed degree plan should be submitted through the online Document Processing Submission System located on the website http://ogsdpss.tamu.edu. A minimum of 64 hours is required on the degree plan for the Doctor of Philosophy for a student who has completed a master’s degree. A student who has completed a DDS/DMD, DVM or a MD at a U.S. institution is also required to complete a minimum of 64 hours. A student who has completed a baccalaureate degree but not a master’s degree will be required to complete a 96-hour degree plan. Completion of a DDS/DMD, DVM or MD degree at a foreign institution requires completion of a minimum of 96 hours for the Doctor of Philosophy. A field of study may be primarily in one department or in a combination of departments. A degree plan must carry a reasonable amount of 691 or 5V98/5V99 (research).

Additional coursework may be added by petition to the approved degree plan by the student’s advisory committee if it is deemed necessary to correct deficiencies in the student’s academic preparation. No changes can be made to the degree plan once the student’s Request for Final Examination is approved by the Office of Graduate and Professional Studies.

Approval to enroll in any professional course (900-level) should be obtained from the head of the department (or Chair of the intercollegiate faculty, if applicable) in which the course will be offered before including such a course on a degree plan.

No credit may be obtained by correspondence study, by extension or for any course of fewer than three weeks duration.

**Transfer of Credit**

Courses for which transfer credits are sought must have been completed with a grade of B or greater and must be approved by the student’s advisory committee and the Office of Graduate and Professional Studies. These courses must not have been used previously for another degree. Except for officially approved cooperative doctoral programs, credit for thesis or dissertation research or the equivalent is not transferable. Credit for “internship” coursework in any form is not transferable. Courses taken in residence at an accredited U.S. institution or approved international institution with a final grade of B or greater will be considered for transfer credit if, at the time the courses were completed, the courses would be accepted for credit toward a similar degree for a student in degree-seeking status at the host institution. Credit for coursework taken by extension is not transferable. Coursework in which no formal grades are given or in which grades other than letter grades (A or B) are earned (for example, CR, P, S, U, H, etc.) is not accepted for transfer credit. Credit for coursework submitted for transfer from any college or university must be shown in semester credit hours, or equated to semester credit hours.

Courses used toward a degree at another institution may not be applied for graduate credit. If the course to be transferred was taken prior to the conferral of a degree at the transfer institution, a letter from the registrar at that institution stating that the course was not applied for credit toward the degree must be submitted to the Office of Graduate and Professional Studies.

Grades for courses completed at other institutions are not included in computing the GPR. An official transcript from the university at which transfer courses are taken must be sent directly to the Office of Admissions.

**Research Proposal**

The general field of research to be used for the dissertation should be agreed on by the student and the advisory committee at their first meeting, as a basis for selecting the proper courses to support the proposed research.

As soon thereafter as the research project can be outlined in reasonable detail, the dissertation research proposal should be completed. The research proposal should be approved at a meeting of the student’s advisory committee, at which time the feasibility of the proposed research and the adequacy of available facilities should be reviewed. The approved proposal, signed by all members of the student’s advisory committee,
the head of the student’s major department (or chair of the intercollegiate faculty, if applicable), must be submitted to the Office of Graduate and Professional Studies at least 20 working days prior to the submission of the Request for the Final Examination.

Compliance issues must be addressed if a graduate student is performing research involving human subjects, animals, infectious biohazards and recombinant DNA. A student involved in these types of research should check with the Office of Research Compliance and Biosafety at (979) 458-1467 to address questions about all research compliance responsibilities. Additional information can also be obtained on the website http://rcb.tamu.edu.

Examinations

Preliminary Examination

The student’s major department (or chair of the intercollegiate faculty, if applicable) and his or her advisory committee may require qualifying, cumulative or other types of examinations at any time deemed desirable. These examinations are entirely at the discretion of the department and the student’s advisory committee.

The preliminary examination is required. The preliminary examination for a doctoral student shall be given no earlier than a date at which the student is within 6 credit hours of completion of the formal coursework on the degree plan (i.e., all coursework on the degree plan except 681, 684, 690, 691, 5V98, 5V99 and 692 courses). The student is strongly encouraged to complete the Preliminary Examination no later than the end of the semester following the completion of the formal coursework on the degree plan. The Office of Graduate and Professional Studies must receive the results of the preliminary examination at least 14 weeks prior to the final examination date. The examination shall be oral and written unless otherwise recommended by the student’s advisory committee and approved by the Office of Graduate and Professional Studies. The written part of the examination will cover all fields of study included in the student’s degree plan. Each member of the advisory committee is responsible for administering a written examination in his or her particular field, unless he or she chooses to waive participation in this part of the examination. Two or more members of the advisory committee may give a joint written examination. One or more members may require a student to take a departmental or intercollegiate faculty examination to supplement or replace a written examination. Each written examination must be completed and reported as satisfactory to the chair of the advisory committee before the oral portion of the examination may be held. In case any written examination is reported unsatisfactory, the entire advisory committee must agree (1) to proceed with the oral portion of the preliminary examination, or (2) to adopt another course of action regarding the unsatisfactory written examination. Prior to scheduling the preliminary examination with the other committee members, the committee chair will review the eligibility criteria with the student, using the Preliminary Examination Checklist to ensure the student is ready for the examination. The following list of eligibility requirements applies.

- An approved degree plan was on file with the Office of Graduate and Professional Studies at least 90 days prior to the first written examination.
- Student’s cumulative GPR is at least 3.000.
- Student’s degree plan GPR is at least 3.000.
- All English language proficiency requirements have been satisfied.
- All committee members have scheduled or waived the written portion and agreed to attend the oral portion of the examination or have found a substitute. Only one substitution is allowed and it cannot be for the committee chair.
- At the end of the semester in which the exam is given, there are no more than 6 hours of coursework remaining on the degree plan (except 681, 684, 690, 691, 5V98, 5V99 and 692). The head of the student’s department (or Chair of the Intercollegiate Faculty, if applicable) has the authority to approve a waiver of this criterion.
- The time span from the first written examination to the oral is no more than three weeks. (In cases of department-wide written examinations, this criterion is not applicable.) The head of the student’s department (or chair of the intercollegiate faculty, if applicable) has the authority to approve a waiver of this criterion.

Once all requirements are met, departments or intercollegiate faculty may announce the schedule of the written and oral parts of the examination.

Credit for the preliminary examination is not transferable. If a departmental or intercollegiate faculty examination is used as part of the written portion of the preliminary examination, it must be the last examination offered prior to the date scheduled for the preliminary examination. In the schedule of the written portion, all members of the student’s advisory committee are to be included.

Through the preliminary examination, the student’s advisory committee should satisfy itself that the student has demonstrated the following qualifications:

1. a mastery of the subject matter of all fields in the program;
2. an adequate knowledge of the literature in these fields and an ability to carry out bibliographical research.

In case a student is required to take, as a part of the written portion of a preliminary examination, an examination administered by a department or intercollegiate faculty, the department or intercollegiate faculty must:

1. offer the examination at least once every six months. The departmental or interdisciplinary degree program examination should be announced at least 30 days prior to the scheduled examination date.
2. assume the responsibility for marking the examination satisfactory or unsatisfactory, or otherwise graded, and in the case of unsatisfactory, stating specifically the reasons for such a mark.
3. forward the marked examination to the chair of the student’s advisory committee within one week after the examination.

The chair of the student’s advisory committee is responsible for making all written examinations available to the members of the advisory committee at or before the oral portion of the preliminary examination. A positive vote by all members of the graduate committee with at most one dissention is required to pass a student on his or her preliminary exam. A department or intercollegiate faculty can have a stricter requirement provided there is consistency within all degree programs within a department or an interdisciplinary degree program.
The chair of the advisory committee will promptly report the results of the Preliminary Examination to the Office of Graduate and Professional Studies, using the Report of Doctoral Preliminary Examination form and the Preliminary Examination checklist. Both forms must have the appropriate signatures. These forms should be submitted to the Office of Graduate and Professional Studies within 10 working days of the scheduled preliminary examination.

The Report of the Preliminary Examination form must be submitted with original signatures of the approved committee members. If an approved committee member substitution (1 only) has been made, his/her signature must also be included on the form submitted to the Office of Graduate and Professional Studies. The original signature of the department head is also required on the form.

After passing the required oral and written preliminary examinations for the doctoral degree, the student must complete the final examination for the degree within four calendar years. Otherwise, the student will be required to repeat the preliminary examination. Upon approval of the student’s advisory committee, with no more than one member dissenting, and approval of the Office of Graduate and Professional Studies, a student who has failed the preliminary examination may be given one re-examination. Adequate time must be given to permit the student to address the inadequacies emerging from the first examination (normally six months). The student and the advisory committee should jointly negotiate a mutually acceptable date for this purpose.

A student must be registered at Texas A&M University for a minimum of one semester credit hour in the semester or summer term in which they will take any portion of the Preliminary Examination.

Steps for Completing the Preliminary Examination

1. Establish advisory committee. Submit a degree plan. When: Prior to the deadline set by the student’s college, and no later than 90 days prior to preliminary examination. Approved by: Advisory committee, department or intercollegiate faculty chair, and Office of Graduate and Professional Studies (OGAPS).

2. Complete English language proficiency requirements (if applicable), and coursework detailed on degree plan. When: Before preliminary examination.

3. Student and chair review eligibility requirements for the preliminary exam using the "Preliminary Examination Checklist". When: Several weeks before the proposed date of the preliminary examination. Checklist must be signed by chair and department head, or intercollegiate faculty chair.

4. Student checks the availability of committee members. When: Several weeks before the proposed date of the preliminary examination.

5. Students prepares and submits any petitions found necessary by the review of the eligibility requirements. When: At least three weeks before the proposed date of the preliminary examinations. Approved by: Advisory committee, department head or intercollegiate faculty chair, and OGAPS.

6. When exam date is determined, the department may announce the schedule. Approved by: Committee chair, department head or intercollegiate faculty chair.

7. Chair submits the Report of the Preliminary Examination and the Preliminary Examination Checklist to OGAPS. When: Within 10 working days of the date of the scheduled oral examination and no later than 14 weeks prior to the final defense date. Approved by: Advisory committee.

8. Office of Graduate and Professional Studies notifies the student and chair of any actions necessary to rectify any deficiencies. When: Upon receipt of the report of the doctoral Preliminary Examination.

Final Examination/Dissertation Defense

The candidate for the doctoral degree must pass a final examination by deadline dates announced in the “Office of Graduate and Professional Studies Calendar” each semester or summer term. The doctoral student is allowed only one opportunity to take the final examination. No student may be given a final examination unless his or her current official cumulative degree plan GPAs are 3.00 or better and he or she has been admitted to candidacy. No unabsolved grades of D, F, or U for any course can be listed on the degree plan. To absolve a deficient grade, a student must repeat the course and achieve a grade of C or better. A student must have completed all coursework on his or her degree plan with the exception of 691, 5V98, or 5V99 (research) or 692 (Professional Study) hours. The student must be registered for all remaining hours; no hours remain to be taken on the degree plan. The preliminary examination results must have been submitted to the Office of Graduate and Professional Studies 25 working days prior to the date of the defense. The research proposal must have been submitted to the Office of Graduate and Professional Studies 14 weeks prior to the date of the defense. The research proposal must have been submitted to the Office of Graduate and Professional Studies 25 working days prior to the date of the final examination/defense. Any changes to the degree plan must be approved by the Office of Graduate and Professional Studies prior to the approval of the final examination. The request to hold and announce the final examination must be submitted to the Office of Graduate and Professional Studies a minimum of 10 working days in advance of the scheduled date. Examination/Defense results must be submitted to the Office of Graduate and Professional Studies within 10 working days of
the scheduled examination/defense date. The Office of Graduate and Professional Studies must be notified in writing of any cancellations.

The student’s advisory committee will conduct this examination. The final examination is not to be administered until the dissertation or record of study is available in substantially final form to the student’s advisory committee, and all concerned have had adequate time to review the document. Additionally, all English Language Proficiency requirements must be satisfied prior to scheduling the examination. Whereas the final examination may cover the broad field of the candidate’s training, it is presumed that the major portion of the time will be devoted to the dissertation and closely allied topics. Persons other than members of the graduate faculty may, with mutual consent of the candidate and the chair of the advisory committee, be invited to attend a final examination for an advanced degree. A positive vote by all members of the graduate committee with at most one dissension is required to pass a student on his or her exam. A department can have a stricter requirement provided there is consistency within all degree programs within a department. Upon completion of the questioning of the candidate, all visitors must excuse themselves from the proceedings.

The advisory committee will submit its recommendations on the appropriate Report of the Final Examination for Doctoral Candidates form to the Office of Graduate and Professional Studies regarding acceptability of the candidate for the doctoral degree. A student must be registered in the University in the semester or summer term in which the final examination is taken.

The Report of the Final Examination Form must be submitted with original signatures of only the committee members approved by the Office of Graduate and Professional Studies. If an approved committee member substitution (1 only) has been made, his/her signature must be included on the form submitted to the Office of Graduate and Professional Studies.

Dissertation

The ability to perform independent research must be demonstrated by the dissertation, which must be the original work of the candidate. Whereas acceptance of the dissertation is based primarily on its scholarly merit, it must also exhibit creditable literary workmanship. The format of the dissertation must be acceptable to the Office of Graduate and Professional Studies. Guidelines for the preparation of the thesis are available in the Thesis Manual, which is available online at http://ogaps.tamu.edu.

After successful defense and approval by the student’s advisory committee and the head of the student’s major department (or chair of the intercollegiate faculty, if applicable), a student must submit his/her dissertation in electronic format as a single PDF file. The PDF file must be uploaded to the website, http://ogaps.tamu.edu. Additionally, a signed approval form must be brought or mailed to the Office of Graduate and Professional Studies. Both the PDF file and the signed approval form are required by the deadline.

Deadline dates for submitting are announced each semester or summer term in the Office of Graduate and Professional Studies Calendar (see Time Limit statement). These dates also can be accessed via the website http://ogaps.tamu.edu.

Before a student can be “cleared” by Thesis and Dissertation Services, a processing fee must be paid through Student Business Services. This processing fee is for the thesis/dissertation services provided. After commencement, dissertations are digitally stored and made available through the Texas A&M Libraries.

A dissertation that is deemed unacceptable by the Office of Graduate and Professional Studies because of excessive corrections will be returned to the student’s department head or chair of the intercollegiate faculty. The manuscript must be resubmitted as a new document, and the entire review process must begin anew. All original submittal deadlines must be met during the resubmittal process in order to graduate.

Additional Requirements

Additional Requirements

- Residence (p. 1208)
- Time Limit (p. 1208)
- Continuous Registration (p. 1209)
- Admission to Candidacy (p. 1209)
- Languages (p. 1209)
- 99-Hour Cap on Doctoral Degree (p. 1209)
- Application for Degree (p. 1209)

Residence

A student who enters the doctoral degree program with a baccalaureate degree must spend one academic year plus one semester in resident study at Texas A&M University. A student who holds master’s degree when he/she enters doctoral degree program must spend one academic year in resident study. One academic year may include two adjacent regular semesters or one regular semester and one adjacent 10-week summer semester. The third semester is not required to be adjacent to the one year. Enrollment for each semester must be a minimum of 9 credit hours each to satisfy the residence requirement.

To satisfy the residence requirement, the student must complete a minimum of 9 credit hours per semester or 10-week summer semester in resident study at Texas A&M University for the required period. A student who enters a doctoral degree program with a baccalaureate degree may fulfill residence requirements in excess of one academic year (18 credit hours) by registration during summer sessions or by completion of a less-than-full course load (in this context a full course load is considered 9 credit hours per semester).

Students who are employed full-time while completing their degree may fulfill total residence requirements by completion of less-than-full time course loads each semester. In order to be considered for this, the student is required to submit a Petition for Waivers and Exceptions along with verification of his/her employment to the Office of Graduate and Professional Studies. An employee should submit verification of his/her employment at the time he/she submits the degree plan. See Registration. (p. 25)

See Residence Requirements (p. 22).

Time Limit

All requirements for doctoral degrees must be completed within a period of ten consecutive calendar years for the degree to be granted. A course will be considered valid until 10 years after the end of the semester in which it is taken. Graduate credit for coursework more
than ten calendar years old at the time of the final oral examination may not be used to satisfy degree requirements.

After passing the required preliminary oral and written examinations for a doctoral degree, the student must complete the final examination within four calendar years. Otherwise, the student will be required to repeat the preliminary examination.

A final corrected version of the dissertation or record of study in electronic format as a single PDF file must be cleared by the Office of Graduate and Professional Studies no later than one year after the final examination or within the 10-year time limit, whichever occurs first. Failure to do so will result in the degree not being awarded.

Continuous Registration

A student in a program leading to a Doctor of Philosophy who has completed all coursework on his/her degree plan other than 691, 5V98 or 5V99 (research) are required to be in continuous registration until all requirements for the degree have been completed. See Continuous Registration Requirements (p. 25).

Admission to Candidacy

To be admitted to candidacy for a doctoral degree, a student must have:

1. completed all formal coursework on the degree plan with the exception of any remaining 681, 684, 690 and 691, or 5V98 and 5V99,
2. a 3.0 Graduate GPA and a Degree Plan GPA of at least 3.0 with no grade lower than C in any course on the degree plan,
3. passed the preliminary examination (written and oral portions),
4. submitted an approved dissertation proposal,
5. met the residence requirements. The final examination will not be authorized for any doctoral student who has not been admitted to candidacy.

Languages

A student is required to possess a competent command of English. For English language proficiency requirements, see the Admissions section of this catalog. The doctoral (PhD) foreign language requirement at Texas A&M University is a departmental option, to be administered and monitored by the individual departments of academic instruction.

99-Hour Cap on Doctoral Degrees

In Texas, public colleges and universities are funded by the state according to the number of students enrolled. In accordance with legislation passed by the Texas Legislature, the number of hours for which state universities may receive subvention funding at the doctoral rate for any individual is limited to 99 hours. Texas A&M University and other universities will not receive subvention for hours in excess of the limit.

Institutions of higher education are allowed to charge the equivalent of nonresident tuition to a resident doctoral student who has enrolled in 100 or more semester credit hours of doctoral coursework.

A doctoral student at Texas A&M has seven years to complete his/her degree before being charged out-of-state tuition. A doctoral student who, after seven years of study, has accumulated 100 or more doctoral hours will be charged tuition at a rate equivalent to out-of-state tuition. Please note that the tuition increases will apply to Texas residents as well as students from other states and countries who currently are charged tuition at the resident rate. This includes those doctoral students who hold GAT, GANT, and GAR appointments of 20 or more hours and recipients of competitive fellowships who receive more than $1,000 per semester. Doctoral students who, after seven years of study, have not accumulated 100 hours are eligible to pay in-state tuition if otherwise eligible.

For count purposes, a year is counted as three semesters, normally fall, spring and summer. Using this system, a student is allowed 21 semesters as a G8 student to complete the doctoral degree before being penalized with the higher tuition rate. Any semester in which a G8 student is enrolled for a doctoral level course is counted.

The following majors are exempt from the 99-Hour Cap on Doctoral Degrees:

- Biomedical Sciences
- Biochemistry
- Microbiology
- Genetics
- Toxicology
- Nutrition Sciences
- Community Clinical Psychology
- Counseling Psychology
- School Psychology
- Veterinary Pathology
- Clinical Psychology
- Counseling Psychology
- Medical Sciences
- Health Services Research
- Health Promotion and Community Health Sciences
- Epidemiology and Environmental Health

The hour limit for these majors is 130 doctoral hours.

Application for Degree

For information on applying for your degree, please visit the Graduation (p. 24) section.

Department of Chemistry

http://chem.tamu.edu

Head: F. P. Gabbai

Graduate Advisor: S. W. North

The Department of Chemistry offers a program of study leading to a PhD degree in Chemistry.

The Ph.D. degree curriculum in chemistry is designed to 1) provide students with an understanding of chemical principles 2) train students to become independent chemical researchers, 3) teach students how to effectively communicate the results of chemical research, and 4) prepare students to become professional chemists. Upon completion of the PhD program in chemistry students are qualified to obtain jobs as senior scientists in industrial and government labs or as postdoctoral researchers or junior faculty members at academic institutions.

The Ph.D. degree program is designed to ensure that students receive extensive research experience. Opportunities for research are available to graduate students in all areas of modern chemistry including analytical, atmospheric, biological, catalysis, computational, energy, inorganic,
materials, nuclear, organic, organometallic, physical and polymer chemistry. Students are trained in state-of-the-art instrumentation facilities, laboratories and shops. In addition to research, graduate students in the Department of Chemistry are required to enroll in chemistry coursework, serve as teaching assistants for at least two semesters, present seminars, attend seminars and pass a series of cumulative exams.

Chemistry graduate students are generally admitted into the Ph.D program. However, with approval, a student may pursue a research-based M.S. degree with thesis. In addition to research, these graduate students in the Department of Chemistry are required to enroll in chemistry coursework, serve as teaching assistants for at least two semesters, present seminars and attend seminars.

For further details about programs, faculty, facilities and financial assistance, write to the Graduate Advisor of the Department of Chemistry, or send an email message to gradmail@chem.tamu.edu. Additional information may be found on the departmental website at http://chem.tamu.edu.

Masters

• Master of Science in Chemistry (p. 1212)

Doctoral

• Doctor of Philosophy in Chemistry (p. 1216)
## Master of Science in Chemistry

The Master of Science (MS) curriculum is designed to develop new understanding through research and creativity. Students have the option to pursue a thesis or non-thesis Master of Science degree.

### Steps to Fulfill Master’s Degree Requirements

**1. Meet with departmental graduate advisor to plan course of study for first semester.**

- **When:** Before first semester registration.
- **Approved by:** Graduate advisor or chair of the intercollegiate faculty.

**2. Establish advisory committee.**

- **When:** Prior to the deadline imposed by the student’s college and no later than 90 days prior to final oral or thesis defense.
- **Approved by:** Advisory committee, department head or chair of the intercollegiate faculty, and OGAPS.

**3. If thesis is required, submit thesis proposal to the Office of Graduate and Professional Studies.**

- **When:** At least 20 working days prior to the submission of the Request for the Final Examination.
- **Approved by:** Advisory committee, department head or chair of the intercollegiate faculty and OGAPS.

**4. Apply for degree; pay graduation fee.**

- **When:** During the first week of the final semester, see OGAPS calendar.

**5. Check to be sure degree program and advisory committee are up to date and all ELP requirements (if applicable) and coursework are complete.**

- **When:** Well before submitting request to schedule final examination.

**6. Complete residence requirement.**

- **When:** If applicable, before or during final semester.
- **Approved by:** OGAPS.

**7. Submit request to schedule final examination.**

- **When:** Must be received by OGAPS at least 10 working days before exam date. See OGAPS calendar for deadlines.
- **Approved by:** Advisory committee, department head or chair of the intercollegiate faculty, and OGAPS.

**8. Successfully complete final examination.**

- **When:**: The Report of the Final Examination Form should be submitted to OGAPS within 10 days following the exam.
- **Approved by:** Advisory committee and OGAPS.

**9. If required, upload one approved final copy of thesis as a single PDF file (http://ogaps.tamu.edu) and submit signed approval form to the Office of Graduate and Professional Studies.**

- **When:** See OGAPS calendar for deadlines.
- **Approved by:** Advisory committee, department head or chair of the intercollegiate faculty and OGAPS.

**10. Graduation; arrange for cap and gown.**

- **When:** For more information, visit http://graduation.tamu.edu.

---

1. The online Document Processing Submission System is located on the website https://ogsdpss.tamu.edu.

2. Complete the application for degree form via the student’s Howdy portal.

Chemistry graduate students are generally admitted into the Ph.D. program. However, with approval, a student may pursue a research-based M.S. degree with thesis. In addition to research, these graduate students in the Department of Chemistry are required to enroll in chemistry coursework, serve as teaching assistants for at least two semesters, present seminars and attend seminars.

For further details about programs, faculty, facilities and financial assistance, write to the Graduate Advisor of the Department of Chemistry, or send an email message to gradmail@chem.tamu.edu. Additional information may be found on the departmental website at http://www.chem.tamu.edu/.

### Program Requirements

**Program Requirements**

- Student’s Advisory Committee (p. 1213)
- Degree Plan (p. 1213)
- Credit Requirements (p. 1213)
- Transfer of Credit (p. 1213)
- Limitations on the Use of Transfer, Extension and Certain Other Courses (p. 1214)
- Thesis Option (p. 1214)
• Thesis Proposal (p. 1214)
• Final Examination (p. 1215)
• Non-Thesis Option (p. 1215)

Student’s Advisory Committee

After receiving admission to graduate studies and enrolling for coursework, the student will consult with the head of his or her major or administrative department (or intercollegiate faculty, if applicable) concerning appointment of the chair of his or her advisory committee. With the exception of the Mays Business School non-thesis option, the Master of Science in Economics with a concentration in financial economics or financial econometrics, the Master of Science with a major in Educational Human Resource Development, HRD option, and the Master of Science in Nursing with a major in Nursing Education, the student’s advisory committee for the master’s degree will consist of no fewer than three members of the graduate faculty, representative of the student’s fields of study and research. The chair or the co-chair of the advisory committee must be from the student’s major department (or intercollegiate faculty, if applicable), and at least one or more of the members must have an appointment to a department other than the student’s major department. The outside member for students in an interdisciplinary program must have an appointment to a department different from the chair of the student’s committee.

The chair, in consultation with the student, will select the remainder of the advisory committee. The student will interview each prospective committee member to determine whether he or she is willing to serve. Only graduate faculty members located on Texas A&M University campuses may serve as chair of a student’s advisory committee. Other graduate faculty members located off campus may serve as a member or co-chair (but not chair) with a member as the chair. The chair of the committee, who usually has immediate supervision of the student’s research and thesis, has the responsibility for calling required meetings of the committee and for calling meetings at any other time desired.

If the chair of a student’s advisory committee voluntarily leaves the University and the student is near completion of the degree and wants the chair to continue to serve in this role, the student is responsible for securing a current member of the University Graduate Faculty, from the student’s academic program and located near the Texas A&M University campus site, to serve as the co-chair of the committee. The Department Head or Chair of Intercollegiate faculty may request in writing to the Associate Provost for Graduate and Professional Studies that a faculty member who is on an approved leave of absence or has voluntarily separated from the university, be allowed to continue to serve in the role of chair of a student’s advisory committee without a co-chair for us to one year. The students should be near completion of the degree. Extensions beyond the one year period can be granted with additional approval of the Dean.

If the chair of the student’s advisory committee is unavailable for an extended time in any academic period during which the student is involved in activities relating to an internship, thesis or professional paper, and is registered for courses such as 5V98, 5V99, 684, 691, 692 or 693, the student may request, in writing, that the department head appoint an alternate advisory committee chair during the interim period.

The duties of the committee include responsibility for the proposed degree plan, the research proposal, the thesis and the final examination. In addition, the committee as a group and as individual members are responsible for advising the student on academic matters, and, in the case of academic deficiency, initiating recommendations to the Office of Graduate and Professional Studies.

The committee members’ approval on the degree plan indicate their willingness to accept the responsibility for guiding and directing the entire academic program of the student and for initiating all academic actions concerning the student. Although individual committee members may be replaced by petition for valid reasons, a committee cannot resign en masse.

Degree Plan

The student’s advisory committee, in consultation with the student, will develop the proposed degree plan. The degree plan must be completed and filed with the Office of Graduate and Professional Studies prior to the deadline imposed by the student’s college or interdisciplinary degree program, if applicable, and no later than 90 days prior to the date of the final oral examination or thesis defense.

A student should submit the degree plan using the online Document Processing Submission System (http://ogsdpss.tamu.edu).

A student submitting a proposed degree plan for a Master of Science degree should designate on the official degree plan the appropriate program option.

Additional coursework may be added to the approved degree plan by petition if it is deemed necessary by the advisory committee to correct deficiencies in the student’s academic preparation. No changes can be made to the degree plan once the student’s Request for Final Examination or Request for Final Examination Exemption is approved by the Office of Graduate and Professional Studies.

Credit Requirement

A minimum of 32 semester credit hours of approved courses and research is required for the thesis option Master of Science degree with the exception of the Master of Science in Visualization, which requires 48 hours and Master of Science in Athletic Training, which requires 60 hours. A minimum of 36 semester credit hours of approved coursework is required for the Non-Thesis Option.

Ordinarily the student will devote the major portion of his or her time to work in one or two closely related fields. Other work will be in supporting fields of interest.

Transfer of Credit

A student who has earned 12 hours of graduate credit in residence at Texas A&M University may be authorized to transfer courses in excess of the limits prescribed below upon the advice of the advisory committee and with the approval of the Office of Graduate and Professional Studies. Courses taken in residence at an accredited U.S. institution or approved international institution with a final grade of B or greater may be considered for transfer credit if, at the time the courses were completed, the courses would be accepted for credit toward a similar degree for a student in degree-seeking status at the host institution. Otherwise, the limitations stated in the following section apply. Coursework in which no formal grades are given or in which grades other than letter grades (A or B) are earned (for example, CR, P, S, U, H, etc.) is not accepted for transfer credit. Courses appearing on the degree plan with grades of D, F or U may not be absolved by transfer work. Credit for thesis research or the equivalent is not transferable. Credit for coursework submitted for transfer from any college or university must be shown in semester credit.
hours or equated to semester credit hours. An official transcript from the university at which the transfer coursework was taken must be sent directly to the Office of Admissions.

Courses used toward a degree at another institution may not be applied for graduate credit. If the course to be transferred was taken prior to the conferral of a degree at the transfer institution, a letter from the registrar at that institution stating that the course was not applied for credit toward the degree must be submitted to the Office of Graduate and Professional Studies.

Grades for courses completed at other institutions are not included in computing the GPR.

Limitations on the Use of Transfer, Extension and Certain Other Courses

Some departments may have more restrictive requirements for transfer work. If otherwise acceptable, certain courses may be used toward meeting credit-hour requirements for the master’s degree under the following limitations.

1. The maximum number of credit hours which may be considered for transfer credit is the greater of 12 hours or one-third (1/3) of the total hours of a degree plan. The following restrictions apply:
   • Graduate and/or upper-level undergraduate courses taken in residence at an accredited U.S. institution, or approved international institution with a final grade of B or greater will be considered for transfer credit if, at the time the courses were completed, the student was in degree-seeking status at Texas A&M University, or the student was in degree-seeking status at the institution at which the courses were taken; and if the courses would be accepted for credit toward a similar degree for a student in degree-seeking status at the host institution.
   • Courses previously used for another degree are not acceptable for degree plan credit.

2. The maximum number of credit hours taken in post-baccalaureate non-degree (G6) classification at Texas A&M University which may be considered for application to the degree plan is 12.

3. Not more than 12 hours may be used in any combination of the following categories:
   • Not more than 8 hours in the combination of 5V98, 5V99, and 691 (research) or 684 (Professional Internship) may be used.
   • Not more than 8 hours of 685 (Directed Studies) may be used.
   • Not more than 3 hours of 690 (Theory of Research) may be used.
   • Not more than 3 hours of 695 (Frontiers in Research) may be used.

4. A maximum of 2 hours of Seminar (681).

5. A maximum of 9 hours of advanced undergraduate courses (300- or 400-level).

6. For graduate courses of three weeks’ duration or less, taken at other institutions, up to 1 hour of credit may be obtained for each five-day week of coursework. Each week of coursework must include at least 15 contact hours.

7. Continuing education courses may not be used for graduate credit.

8. Extension courses are not acceptable for credit.

9. For the Degree of Master of Science in Medical Science, students with a first professional degree (MD, DDS or DVM) may take up to 20 hours of 691 (research). For the remaining hours, a maximum of 2 hours can be Seminar (681) and a maximum of 3 hours can be Directed Studies (685).

Exceptions will be permitted only in unusual cases and when petitioned by the student’s advisory committee and approved by the Office of Graduate and Professional Studies.

Thesis Option

An acceptable thesis is required for the Master of Science degree for a student who selects the thesis option program. The finished work must reflect a comprehensive understanding of the pertinent literature and express in clear English, the problem(s) for study, the method, significance and results of the student’s original research. Guidelines for the preparation of the thesis are available in the Thesis Manual, which is available online at the Office of Graduate and Professional Studies website.

After successful defense (or exemption) and approval by the student’s advisory committee and the head of the student’s major department (or chair of the intercollegiate faculty, if appropriate), the student must submit his/her thesis in electronic format as a single PDF file. The PDF file must be uploaded to the Office of Graduate and Professional Studies website. Additionally, a signed approval form must be brought or mailed to the Office of Graduate and Professional Studies. The PDF file and the signed approval form are required by the deadline.

Deadline dates for submitting the thesis are announced each semester or summer term in the “Office of Graduate and Professional Studies Calendar” (see Time Limit statement). These dates also can be accessed via the Office of Graduate and Professional Studies website.

Before a student can be “cleared” by Thesis and Dissertation Services, a processing fee must be paid through Student Business Services. This processing fee is for the thesis/dissertation services provided. After commencement, dissertations are digitally stored and made available through the Texas A&M Libraries.

A thesis that is deemed unacceptable by the Office of Graduate and Professional Studies because of excessive corrections will be returned to the student’s department head (or chair of the intercollegiate faculty, if applicable). The manuscript must be resubmitted as a new document, and the entire review process must begin again. All original submittal deadlines must be met during the resubmittal process to graduate that semester.

Thesis Proposal

For the thesis option Master of Science degree, the student must prepare a thesis proposal for approval by the advisory committee and the head of the major department or chair of the interdisciplinary faculty, if applicable. This proposal must be submitted to the Office of Graduate and Professional Studies at least 20 working days prior to the submission of the request for the final examination.

Compliance issues must be addressed if a graduate student is performing research involving human subjects, animals, infectious biohazards and recombinant DNA. A student involved in these types of research should check with the Office of Research Compliance and Biosafety at (979) 458-1467 to address questions about all research compliance responsibilities. Additional information can also be obtained on the Office of Research Compliance and Biosafety website.
Thesis Defense/Final Examination

A student must pass a final examination by dates announced each semester or summer term in the Office of Graduate and Professional Studies Calendar. The Office of Graduate and Professional Studies must be notified in writing of any cancellation. To be eligible to take the final examination, a student's GPR must be at least 3.000 for courses on the degree plan and for all courses completed at Texas A&M which are eligible to be applied to a graduate degree, and there must be no unabsolved grades of D, F or U for any course listed on the degree plan. To absolve a deficient grade, the student must repeat the course at Texas A&M University and achieve a grade of C or better. All coursework on the degree plan must have been completed with the exception of those hours for which the student is registered. Additionally, all English Language Proficiency requirements must be satisfied prior to scheduling the examination. If applicable, an approved thesis proposal must be on file in the Office of Graduate and Professional Studies according to published deadlines.

A request to hold and announce the final examination must be submitted to the Office of Graduate and Professional Studies a minimum of 10 working days in advance of the scheduled date for the examination. Examinations which are not completed and reported as satisfactory to the Office of Graduate and Professional Studies within 10 working days of the scheduled examination date will be recorded as failures. A student may be given only one opportunity to repeat the final examination for the master's degree and that must be within a time period that does not extend beyond the end of the next regular semester (summer terms are excluded).

For thesis option students, the final examination covers the thesis and all work taken on the degree plan and at the option of the committee may be written or oral or both. The final examination may not be administered before the thesis is available to all members of the student's advisory committee in substantially final form, and all members have had adequate time to review the thesis proposal. The examination is conducted by the student's advisory committee as finally constituted. A thesis option student must be registered in the University in the semester or summer term in which the final examination is taken. Persons other than members of the graduate faculty may, with mutual consent of the candidate and the major professor, attend final examinations for advanced degrees. Upon completion of the questioning of the candidate, all visitors must excuse themselves from the proceedings. A positive vote by all members of the graduate committee with at most one dissension is required to pass a student on his or her exam. A department, or interdisciplinary degree program, may have a stricter requirement provided there is consistency within all degree programs within a department or interdisciplinary degree program.

A thesis option candidate may petition to be exempt from his/her final examination provided his/her degree plan GPR is 3.500 or greater and he/she has the approval of the advisory committee, the head of the student's major department, or intercollegiate chair, if appropriate, and the Office of Graduate and Professional Studies. It is required that the petition for exemption be submitted the same semester the student intends to submit the thesis.

For non-thesis option students, a final comprehensive examination is required. The Master of Science in Educational Human Resource Development, HRD option, the Master of Science in Nursing with a major in Nursing Education, the Master of Science Program in the Mays Business School and the Master of Science in Economics with a concentration in financial economics or financial econometrics do not have final examination requirements. Otherwise, exemptions from final examinations are not allowed. The final exam cannot be held prior to the mid point of the final semester if questions on the exam are based on courses in which the student is currently enrolled. If a student has completed all required degree plan coursework, the student is not required to be registered for classes in the semester the final examination is administered (unless he/she holds an assistantship).

Exam results must be submitted with original signatures of only the committee members approved by the Office of Graduate and Professional Studies. If an approved committee member substitution (1 only) has been made, his/her signature must also be submitted to the Office of Graduate and Professional Studies.

Non-Thesis Option

For the non-thesis option, a thesis is not required. A final comprehensive examination is required for all non-thesis Master of Science programs except the Master of Science programs offered by the Mays Business School, the Master of Science in Economics with a concentration in financial economics or financial econometrics, the Master of Science with a major in Educational Human Resource Development, HRD option, and the Master of Science in Nursing with a major in Nursing Education. No exemptions are allowed. The requirements as to level of courses and examinations are the same as for the thesis option Master of Science degree. The final examination cannot be held prior to the mid point of the final semester if questions on the examination are based on courses in which the student is currently enrolled.

A student pursuing the non-thesis option is not allowed to enroll in 5V98, 5V99, or 691 (research) for any reason and 691 may not be used for credit toward a non-thesis option Master of Science degree. A maximum of 4 credit hours of 684 (Professional Internship), 8 credit hours of 685 (Directed Studies), and up to 3 credit hours of 690 (Theory of Research) or 695 (Frontiers in Research) may be used toward the non-thesis option Master of Science degree. In addition, any combination of 684, 685, 690 and 695 may not exceed 25 percent of the total credit hour requirement shown on the individual degree plan. All requirements for the non-thesis option Master of Science degree other than those specified above are the same as for the thesis option degree.

Additional Requirements

Additional Requirements

- Residence (p. 1215)
- Continuous Registration (p. 1216)
- Time Limit (p. 1216)
- Foreign Languages (p. 1216)
- Application for Degree (p. 1216)

Residence

In partial fulfillment of the residence requirement for the degree of Master of Science, the student must complete 9 resident credit hours during one regular semester or one 10-week summer semester in resident study at Texas A&M University. Upon recommendation of the student's advisory committee, department head or Chair of the Interdisciplinary Program, if appropriate, and with approval of the Office of Graduate and Professional Studies, a student may be granted exemption from this requirement. Such a petition, however, must be approved prior to the student's registration for the final 9 credit hours of required coursework.
Students who are employed full-time while completing their degree may fulfill total residence requirements by completion of less-than-full time course loads each semester. In order to be considered for this, the student is required to submit a Petition for Waivers and Exceptions along with verification of his/her employment to the Office of Graduate and Professional Studies.

See Residence Requirements (p. 22).

**Continuous Registration**

A student in the thesis option of the Master of Science program who has completed all coursework on his/her degree plan other than 5V98, 5V99, and 691 (research) is required to be in continuous registration until all requirements for the degree have been completed. See Continuous Registration Requirements (p. 25).

**Time Limit**

All degree requirements must be completed within a period of seven consecutive years for the degree to be granted. A course will be considered valid until seven years after the end of the semester in which it is taken. Graduate credit for coursework which is more than seven calendar years old at the time of the final examination (oral or written) may not be used to satisfy degree requirements.

A student who has chosen the thesis option must have the final corrected version of the thesis cleared by the Office of Graduate and Professional Studies no later than one year after the final examination, or approval of a petition for exemption from the final exam, or within the seven-year time limit, whichever occurs first. Failure to do so will result in the degree not being awarded.

**Foreign Languages**

No specific language requirement exists for the Master of Science degree.

**Application for Degree**

For information on applying for your degree, please visit the Graduation (p. 24) section.

**Doctor of Philosophy in Chemistry**

Work leading to the degree of Doctor of Philosophy (PhD) is designed to give the candidate a thorough and comprehensive knowledge of his or her professional field and training in methods of research. The final basis for granting the degree shall be the candidate’s grasp of the subject matter of a broad field of study and a demonstrated ability to do independent research. In addition, the candidate must have acquired the ability to express thoughts clearly and forcefully in both oral and written languages. The degree is not granted solely for the completion of coursework, residence and technical requirements, although these must be met.

For a student who has completed a master’s degree, a DDS/DMD, DVM or MD at a U.S. institution, a minimum of 64 hours is required on the degree plan for the degree of Doctor of Philosophy. For a student who has completed a baccalaureate degree but not a master’s degree or a U.S. DDS/DMD, DVM or MD, a minimum of 96 hours is required on the degree plan for the degree of Doctor of Philosophy.

### Steps to Fulfill Doctoral Degree Requirements

</tr>
</tbody>
</table>
7 Apply for degree; pay graduate fee. 

When: During the first week of the final semester; see OGAPS calendar for deadlines.

8 Submit request for permission to hold and announce final oral examination. 

When: Must be received by OGAPS at least 10 working days before requested exam date. See OGAPS calendar for deadlines. 

Approved by: Advisory committee, department head or intercollegiate faculty chair, and OGAPS.

9 Successfully complete final examination. 

When: The Report of the Final Examination Form should be submitted to OGAPS within 10 days following the exam. 

Approved by: Advisory committee and OGAPS

10 Upload one approved final copy of the dissertation or record of study as a single pdf file (http://ogaps.tamu.edu) and submit a signed approval form to the Office of Graduate and Professional Studies. 

When: See OGAPS calendar for deadlines. 

Approved by: Advisory committee, department head or intercollegiate faculty chair, and Office of Graduate and Professional Studies.

11 Graduate; arrange for cap and gown. 

For more information, visit http://graduation.tamu.edu.

Note: Once formal coursework is complete, you must be continuously registered until all degree requirements have been met. See Continuous Registration Requirements (p. 25).

The Ph.D. degree program is designed to ensure that students receive extensive research experience. In addition to research, graduate students in the Department of Chemistry are required to enroll in chemistry coursework, serve as teaching assistants for at least two semesters, present seminars, attend seminars and pass a series of cumulative exams.

For further details about programs, faculty, facilities and financial assistance, write to the Graduate Advisor of the Department of Chemistry, or send an email message to gradmail@chem.tamu.edu. Additional information may be found on the departmental website at http://www.chem.tamu.edu/.

Program Requirements

Program Requirements

- Student’s Advisory Committee (p. 1217)
- Degree Plan (p. 1217)
- Transfer of Credit (p. 1218)
- Research Proposal (p. 1218)

- Examinations (p. 1218)
  - Preliminary Examination (p. 1218)
  - Final Examination/Dissertation Defense (p. 1220)

- Dissertation (p. 1220)

Student’s Advisory Committee

After receiving admission to graduate studies and enrolling, the student will consult with the head of his or her major or administrative department (or chair of the intercollegiate faculty) concerning appointment of the chair of the advisory committee. The student’s advisory committee will consist of no fewer than four members of the graduate faculty representative of the student’s several fields of study and research, where the chair or co-chair must be from the student’s department (or intercollegiate faculty, if applicable), and at least one or more of the members must have an appointment to a department other than the student’s major department. The outside member for a student in an interdisciplinary degree program must be from a department different from the chair of the student’s committee.

The chair, in consultation with the student, will select the remainder of the advisory committee. Only graduate faculty members located on Texas A&M University campuses may serve as chair of a student’s advisory committee. Other Texas A&M University graduate faculty members located off-campus may serve as a member or co-chair (but not chair), with a member as the chair.

If the chair of a student’s advisory committee voluntarily leaves the University and the student is near completion of the degree and wants the chair to continue to serve in this role, the student is responsible for securing a current member of the University Graduate Faculty, from the student’s academic program and located near the Texas A&M University campus site, to serve as the co-chair of the committee. The Department Head or Chair of Intercollegiate faculty may request in writing to the Associate Provost for Graduate and Professional Studies that a faculty member who is on an approved leave of absence or has voluntarily separated from the university, be allowed to continue to serve in the role of chair of a student’s advisory committee without a co-chair for us to one year. The students should be near completion of the degree. Extensions beyond the one year period can be granted with additional approval of the Dean.

The committee members’ signatures on the degree plan indicate their willingness to accept the responsibility for guiding and directing the entire academic program of the student and for initiating all academic actions concerning the student. Although individual committee members may be replaced by petition for valid reasons, a committee cannot resign en masse. The chair of the committee, who usually has immediate supervision of the student’s research and dissertation or record of study, has the responsibility for calling all meetings of the committee. The duties of the committee include responsibility for the proposed degree plan, the research proposal, the preliminary examination, the dissertation or record of study and the final examination. In addition, the committee, as a group and as individual members, is responsible for counseling the student on academic matters, and, in the case of academic deficiency, initiating recommendations to the Office of Graduate and Professional Studies.

Degree Plan

The student’s advisory committee will evaluate the student’s previous education and degree objectives. The committee, in consultation with the student, will develop a proposed degree plan and outline a research problem which, when completed, as indicated by the dissertation (or
Grades for courses completed at other institutions are not included in computing the GPR. An official transcript from the university at which transfer courses are taken must be sent directly to the Office of Admissions.

### Research Proposal

The general field of research to be used for the dissertation should be agreed on by the student and the advisory committee at their first meeting, as a basis for selecting the proper courses to support the proposed research.

As soon thereafter as the research project can be outlined in reasonable detail, the dissertation research proposal should be completed. The research proposal should be approved at a meeting of the student’s advisory committee, at which time the feasibility of the proposed research and the adequacy of available facilities should be reviewed. The approved proposal, signed by all members of the student’s advisory committee, the head of the student’s major department (or chair of the intercollegiate faculty, if applicable), must be submitted to the Office of Graduate and Professional Studies at least 20 working days prior to the submission of the Request for the Final Examination.

Compliance issues must be addressed if a graduate student is performing research involving human subjects, animals, infectious biohazards and recombinant DNA. A student involved in these types of research should check with the Office of Research Compliance and Biosafety at (979) 458-1467 to address questions about all research compliance responsibilities. Additional information can also be obtained on the website http://rcb.tamu.edu.

### Examinations

#### Preliminary Examination

The student’s major department (or chair of the intercollegiate faculty, if applicable) and his or her advisory committee may require qualifying, cumulative or other types of examinations at any time deemed desirable. These examinations are entirely at the discretion of the department and the student’s advisory committee.

The preliminary examination is required. The preliminary examination for a doctoral student shall be given no earlier than a date at which the student is within 6 credit hours of completion of the formal coursework on the degree plan (i.e., all coursework on the degree plan except 681, 684, 690, 691, 5V98, 5V99 and 692 courses). The student is strongly encouraged to complete the Preliminary Examination no later than the end of the semester following the completion of the formal coursework on the degree plan. The Office of Graduate and Professional Studies must receive the results of the preliminary examination at least 14 weeks prior to the final examination date. The examination shall be oral and written unless otherwise recommended by the student’s advisory committee and approved by the Office of Graduate and Professional Studies. The written part of the examination will cover all fields of study included in the student’s degree plan. Each member of the advisory committee is responsible for administering a written examination in his or her particular field, unless he or she chooses to waive participation in this part of the examination. Two or more members of the advisory committee may give a joint written examination. One or more members may require a student to take a departmental or intercollegiate faculty examination to supplement or replace a written examination. Each written examination must be completed and reported as satisfactory to the chair of the advisory committee before the oral portion of the examination may be held. In case any written examination is reported unsatisfactory, the entire...
advisory committee must agree (1) to proceed with the oral portion of the preliminary examination, or (2) to adopt another course of action regarding the unsatisfactory written examination.

Prior to scheduling the preliminary examination with the other committee members, the committee chair will review the eligibility criteria with the student, using the Preliminary Examination Checklist to ensure the student is ready for the examination. The following list of eligibility requirements applies.

- Student is registered at Texas A&M University for the semester or summer term during which any portion of the preliminary examination may fall. If the entire examination falls between semesters, then the student must be registered for the term immediately preceding the examination.
- An approved degree plan was on file with the Office of Graduate and Professional Studies at least 90 days prior to the first written examination.
- Student’s cumulative GPR is at least 3.000.
- Student’s degree plan GPR is at least 3.000.
- All English language proficiency requirements have been satisfied.
- All committee members have scheduled or waived the written portion and agreed to attend the oral portion of the examination or have found a substitute. Only one substitution is allowed and it cannot be for the committee chair.
- At the end of the semester in which the exam is given, there are no more than 6 hours of coursework remaining on the degree plan (except 681, 684, 690, 691, 5V98, 5V99 and 692). The head of the student’s department (or Chair of the Intercollegiate Faculty, if applicable) has the authority to approve a waiver of this criterion.
- The time span from the first written examination to the oral is no more than three weeks. (In cases of department-wide written examinations, this criterion is not applicable.) The head of the student’s department (or chair of the intercollegiate faculty, if applicable) has the authority to approve a waiver of this criterion.

Once all requirements are met, departments or intercollegiate faculty may announce the schedule of the written and oral parts of the examination.

Credit for the preliminary examination is not transferable. If a departmental or interdisciplinary faculty examination is used as part of the written portion of the preliminary examination, it must be the last examination offered prior to the date scheduled for the preliminary examination. In the schedule of the written portion, all members of the student’s advisory committee are to be included.

Through the preliminary examination, the student’s advisory committee should satisfy itself that the student has demonstrated the following qualifications:

1. a mastery of the subject matter of all fields in the program;
2. an adequate knowledge of the literature in these fields and an ability to carry out bibliographical research.

In case a student is required to take, as a part of the written portion of a preliminary examination, an examination administered by a department or intercollegiate faculty, the department or intercollegiate faculty must:

1. offer the examination at least once every six months. The departmental or interdisciplinary degree program examination should be announced at least 30 days prior to the scheduled examination date.

2. assume the responsibility for marking the examination satisfactory or unsatisfactory, or otherwise graded, and in the case of unsatisfactory, stating specifically the reasons for such a mark.
3. forward the marked examination to the chair of the student’s advisory committee within one week after the examination.

The chair of the student’s advisory committee is responsible for making all written examinations available to the members of the advisory committee at or before the oral portion of the preliminary examination. A positive vote by all members of the graduate committee with at most one dissension is required to pass a student on his or her preliminary exam. A department or intercollegiate faculty can have a stricter requirement provided there is consistency within all degree programs within a department or an interdisciplinary degree program.

The chair of the advisory committee will promptly report the results of the Preliminary Examination to the Office of Graduate and Professional Studies, using the Report of Doctoral Preliminary Examination form and the Preliminary Examination checklist. Both forms must have the appropriate signatures. These forms should be submitted to the Office of Graduate and Professional Studies within 10 working days of the scheduled preliminary examination.

The Report of the Preliminary Examination form must be submitted with original signatures of the approved committee members. If an approved committee member substitution (1 only) has been made, his/her signature must also be included on the form submitted to the Office of Graduate and Professional Studies. The original signature of the department head is also required on the form.

After passing the required oral and written preliminary examinations for the doctoral degree, the student must complete the final examination for the degree within four calendar years. Otherwise, the student will be required to repeat the preliminary examination. Upon approval of the student’s advisory committee, with no more than one member dissenting, and approval of the Office of Graduate and Professional Studies, a student who has failed the preliminary examination may be given one re-examination. Adequate time must be given to permit the student to address the inadequacies emerging from the first examination (normally six months). The student and the advisory committee should jointly negotiate a mutually acceptable date for this purpose.

A student must be registered at Texas A&M University for a minimum of one semester credit hour in the semester or summer term in which they will take any portion of the Preliminary Examination.

Steps for Completing the Preliminary Examination

1. Establish advisory committee.
2. Submit a degree plan.

When: Prior to the deadline set by the student’s college, and no later than 90 days prior to preliminary examination.

Approved by: Advisory committee, department or interdisciplinary faculty chair, and Office of Graduate and Professional Studies (OGAPS).
Final Examination/Dissertation Defense

The candidate for the doctoral degree must pass a final examination by deadline dates announced in the “Office of Graduate and Professional Studies Calendar” each semester or summer term. The doctoral student is allowed only one opportunity to take the final examination. No student may be given a final examination unless his or her current official cumulative grade point average (GPA) allows only one opportunity to take the final examination. No student may be given a final examination unless his or her current official cumulative GPA is 3.000 or better and he or she has been admitted to candidacy. No unabsolved grades of D, F, or U for any course can be listed on the degree plan. To absolve a deficient grade, a student must repeat the course and achieve a grade of C or better. A student must have completed all coursework on his or her degree plan with the exception of 691, 5V98, or 5V99 (research) or 692 (Professional Study) hours. The student must be registered for all remaining hours; no hours remain to be taken on the degree plan. The preliminary examination results must have been submitted to the Office of Graduate and Professional Studies 14 weeks prior to the date of the dissertation. The research proposal must have been submitted to the Office of Graduate and Professional Studies 25 working days prior to the date of the dissertation. Any changes to the degree plan must be approved by the Office of Graduate and Professional Studies prior to the approval of the final examination. The request to hold and announce the final examination must be submitted to the Office of Graduate and Professional Studies a minimum of 10 working days in advance of the scheduled date. Examination/Defense results must be submitted to the Office of Graduate and Professional Studies within 10 working days of the scheduled examination/defense date. The Office of Graduate and Professional Studies must be notified in writing of any cancellations.

The student's advisory committee will conduct this examination. The final examination is not to be administered until the dissertation or record of study is available in substantially final form to the student's advisory committee, and all concerned have had adequate time to review the document. Additionally, all English Language Proficiency requirements must be satisfied prior to scheduling the examination. Whereas the final examination may cover the broad field of the candidate's training, it is presumed that the major portion of the time will be devoted to the dissertation and closely allied topics. Persons other than members of the graduate faculty may, with mutual consent of the candidate and the chair of the advisory committee, be invited to attend a final examination for an advanced degree. A positive vote by all members of the graduate committee with at most one dissension is required to pass a student on his or her exam. A department can have a stricter requirement provided there is consistency within all degree programs within a department. Upon completion of the questioning of the candidate, all visitors must excuse themselves from the proceedings.

The advisory committee will submit its recommendations on the appropriate Report of the Final Examination for Doctoral Candidates form to the Office of Graduate and Professional Studies regarding acceptability of the candidate for the doctoral degree. A student must be registered in the University in the semester or summer term in which the final examination is taken.

The Report of the Final Examination Form must be submitted with original signatures of only the committee members approved by the Office of Graduate and Professional Studies. If an approved committee member substitution (1 only) has been made, his/her signature must be included on the form submitted to the Office of Graduate and Professional Studies.

Dissertation

The ability to perform independent research must be demonstrated by the dissertation, which must be the original work of the candidate. Whereas acceptance of the dissertation is based primarily on its scholarly merit, it must also exhibit creditable literary workmanship. The format of the dissertation must be acceptable to the Office of Graduate and Professional Studies. Guidelines for the preparation of the thesis are available in the Thesis Manual, which is available online at http://ogaps.tamu.edu. After successful defense and approval by the student's advisory committee and the head of the student’s major department (or chair of the intercollegiate faculty, if applicable), a student must submit his/her dissertation in electronic format as a single PDF file. The PDF file must...
be uploaded to the website, http://ogaps.tamu.edu. Additionally, a signed approval form must be brought or mailed to the Office of Graduate and Professional Studies. Both the PDF file and the signed approval form are required by the deadline.

Deadline dates for submitting are announced each semester or summer term in the Office of Graduate and Professional Studies Calendar (see Time Limit statement). These dates also can be accessed via the website http://ogaps.tamu.edu.

Before a student can be “cleared” by Thesis and Dissertation Services, a processing fee must be paid through Student Business Services. This processing fee is for the thesis/dissertation services provided. After commencement, dissertations are digitally stored and made available through the Texas A&M Libraries.

A dissertation that is deemed unacceptable by the Office of Graduate and Professional Studies because of excessive corrections will be returned to the student’s department head or chair of the intercollegiate faculty. The manuscript must be resubmitted as a new document, and the entire review process must begin anew. All original submittal deadlines must be met during the resubmittal process in order to graduate.

**Additional Requirements**

**Additional Requirements**

- Residence (p. 1221)
- Time Limit (p. 1221)
- Continuous Registration (p. 1221)
- Admission to Candidacy (p. 1221)
- Languages (p. 1221)
- 99-Hour Cap on Doctoral Degree (p. 1221)
- Application for Degree (p. 1222)

**Residence**

A student who enters the doctoral degree program with a baccalaureate degree must spend one academic year plus one semester in resident study at Texas A&M University. A student who holds master’s degree when he/she enters doctoral degree program must spend one academic year in resident study. One academic year may include two adjacent regular semesters or one regular semester and one adjacent 10-week summer semester. The third semester is not required to be adjacent to the one year. Enrollment for each semester must be a minimum of 9 credit hours each to satisfy the residence requirement.

To satisfy the residence requirement, the student must complete a minimum of 9 credit hours per semester or 10-week summer semester in resident study at Texas A&M University for the required period. A student who enters a doctoral degree program with a baccalaureate degree may fulfill residence requirements in excess of one academic year (18 credit hours) by registration during summer sessions or by completion of a less-than-full course load (in this context a full course load is considered 9 credit hours per semester).

Students who are employed full-time while completing their degree may fulfill total residence requirements by completion of less-than-full time course loads each semester. In order to be considered for this, the student is required to submit a Petition for Waivers and Exceptions along with verification of his/her employment to the Office of Graduate and Professional Studies. An employee should submit verification of his/her employment at the time he/she submits the degree plan. See Registration. (p. 25)

See Residence Requirements (p. 22).

**Time Limit**

All requirements for doctoral degrees must be completed within a period of ten consecutive calendar years for the degree to be granted. A course will be considered valid until 10 years after the end of the semester in which it is taken. Graduate credit for coursework more than ten calendar years old at the time of the final oral examination may not be used to satisfy degree requirements.

After passing the required preliminary oral and written examinations for a doctoral degree, the student must complete the final examination within four calendar years. Otherwise, the student will be required to repeat the preliminary examination.

A final corrected version of the dissertation or record of study in electronic format as a single PDF file must be cleared by the Office of Graduate and Professional Studies no later than one year after the final examination or within the 10-year time limit, whichever occurs first. Failure to do so will result in the degree not being awarded.

**Continuous Registration**

A student in a program leading to a Doctor of Philosophy who has completed all coursework on his/her degree plan other than 691, 5V98 or 5V99 (research) are required to be in continuous registration until all requirements for the degree have been completed. See Continuous Registration Requirements (p. 25).

**Admission to Candidacy**

To be admitted to candidacy for a doctoral degree, a student must have:

1. completed all formal coursework on the degree plan with the exception of any remaining 681, 684, 690 and 691, or 5V98 and 5V99,
2. a 3.0 Graduate GPA and a Degree Plan GPA of at least 3.0 with no grade lower than C in any course on the degree plan,
3. passed the preliminary examination (written and oral portions),
4. submitted an approved dissertation proposal,
5. met the residence requirements. The final examination will not be authorized for any doctoral student who has not been admitted to candidacy.

**Languages**

A student is required to possess a competent command of English. For English language proficiency requirements, see the Admissions section of this catalog. The doctoral (PhD) foreign language requirement at Texas A&M University is a departmental option, to be administered and monitored by the individual departments of academic instruction.

**99-Hour Cap on Doctoral Degrees**

In Texas, public colleges and universities are funded by the state according to the number of students enrolled. In accordance with legislation passed by the Texas Legislature, the number of hours for which state universities may receive subvention funding at the doctoral rate for any individual is limited to 99 hours. Texas A&M University and other universities will not receive subvention for hours in excess of the limit.
Institutions of higher education are allowed to charge the equivalent of nonresident tuition to a resident doctoral student who has enrolled in 100 or more semester credit hours of doctoral coursework.

A doctoral student at Texas A&M has seven years to complete his/her degree before being charged out-of-state tuition. A doctoral student who, after seven years of study, has accumulated 100 or more doctoral hours will be charged tuition at a rate equivalent to out-of-state tuition. Please note that the tuition increases will apply to Texas residents as well as students from other states and countries who currently are charged tuition at the resident rate. This includes those doctoral students who hold GAT, GANT, and GAR appointments of 20 or more hours and recipients of competitive fellowships who receive more than $1,000 per semester. Doctoral students who, after seven years of study, have not accumulated 100 hours are eligible to pay in-state tuition if otherwise eligible.

For count purposes, a year is counted as three semesters, normally fall, spring and summer. Using this system, a student is allowed 21 semesters as a G8 student to complete the doctoral degree before being penalized with the higher tuition rate. Any semester in which a G8 student is enrolled for a doctoral level course is counted.

The following majors are exempt from the 99-Hour Cap on Doctoral Degrees:

- Biomedical Sciences
- Biochemistry
- Microbiology
- Genetics
- Toxicology
- Nutrition Sciences
- Community Clinical Psychology
- Counseling Psychology
- School Psychology
- Veterinary Pathology
- Clinical Psychology
- Counseling Psychology
- Medical Sciences
- Health Services Research
- Health Promotion and Community Health Sciences
- Epidemiology and Environmental Health

The hour limit for these majors is 130 doctoral hours.

Application for Degree

For information on applying for your degree, please visit the Graduation (p. 24) section.

Department of Mathematics

www.math.tamu.edu

Head: E. Straube

The Department of Mathematics offers graduate studies leading to the MS and PhD degrees in mathematics. Many of the course offerings are also suitable for graduate students pursuing degrees in engineering, science, geosciences, business, economics and education.

At the MS level, a student can be enrolled either in the campus program or in the distance (or “on-line” program). For the distance MS program, three tracks are available: computational math, math teaching, and math leadership. For the campus MS program, five tracks are available: traditional (generally, preparation to continue with a PhD), math teaching, computational math, industrial math, and math biology. Students in the campus MS program can pursue either a thesis or non-thesis degree.

Satisfactory completion of the departmental qualifying exams is required of all students pursuing a PhD.

Admission to the Department’s graduate programs is decided by the Graduate Programs Committee. Among the factors considered in admission decisions are: GRE General Test, undergraduate and graduate GPR, undergraduate academic background and achievement, letters of recommendation, GRE Subject Test in Mathematics (encouraged but not required).

Detailed information concerning programs and financial assistance may be obtained by writing the Graduate Programs Office, Department of Mathematics.

Faculty

Allen, Graham, Professor
Mathematics
PhD, University of Wisconsin-Madison, 1971
MS, University of Wisconsin, 1966

Anshelevich, Michael, Professor
Mathematics
PhD, University of California, Berkeley, 2000

Avsec, Stephen, Visiting Assistant Professor
Mathematics
PHD, University of Illinois, 2012

Bangerth, Wolfgang, Professor
Mathematics
PhD, University of Heidelberg, Germany, 2002

Baskin, Dean, Assistant Professor
Mathematics
PhD, Stanford University, 2010

Battle, Guy, Professor
Mathematics
PhD, Duke University, 1977

Baudier, Florent, Visiting Assistant Professor
Mathematics
PHD, Universite De Besancon, 2013

Benli, Mustafa, Visiting Assistant Professor
Mathematics
PHD, Texas A&M University, 2013

Berkolaiko, Gregory, Professor
Mathematics
PhD, University of Bristol, 2001

Biard, Severine, Visiting Assistant Professor
Mathematics
PHD, Universite Pierre et Marie Curie, 2013
Boas, Harold, Professor  
Mathematics  
PhD, Massachusetts Institute of Technology, 1980

Bonito, Andrea, Professor  
Mathematics  
PhD, Ecole Polytechnique Federale de Lausanne, 2006

Masters

- Master of Science in Mathematics (p. 1226)

Doctoral

- Doctor of Philosophy in Mathematics (p. 1230)

Master of Science in Mathematics

The Master of Science (MS) curriculum is designed to develop new understanding through research and creativity. Students have the option to pursue a thesis or non-thesis Master of Science degree.

Steps to Fulfill Master's Degree Requirements

1. Meet with departmental graduate advisor to plan course of study for first semester.  
   **When:** Before first semester registration.  
   **Approved by:** Graduate advisor or chair of the intercollegiate faculty.

2. Establish advisory committee.  
   Submit a degree plan.1  
   **When:** Prior to the deadline imposed by the student's college and no later than 90 days prior to final oral or thesis defense.  
   **Approved by:** Advisory committee, department head or chair of the intercollegiate faculty, and Office of Graduate and Professional Studies (OGAPS).
If thesis is required, submit thesis proposal to the Office of Graduate and Professional Studies.  
When: At least 20 working days prior to the submission of the Request for the Final Examination.  
Approved by: Advisory committee, department head or chair of the intercollegiate faculty and OGAPS.  

Apply for degree²; pay graduation fee.  
When: During the first week of the final semester, see OGAPS calendar.  

Check to be sure degree program and advisory committee are up to date and all ELP requirements (if applicable) and coursework are complete.  
When: Well before submitting request to schedule final examination.  

Complete residence requirement.  
When: If applicable, before or during final semester.  
Approved by: OGAPS.  

Submit request to schedule final examination.  
When: Must be received by OGAPS at least 10 working days before exam date. See OGAPS calendar for deadlines.  
Approved by: Advisory committee, department head or chair of the intercollegiate faculty, and OGAPS.  

Successfully complete final examination.  
When: The Report of the Final Examination Form should be submitted to OGAPS within 10 days following the exam.  
Approved by: Advisory committee and OGAPS.  

If required, upload one approved final copy of thesis as a single PDF file (http://ogaps.tamu.edu) and submit signed approval form to the Office of Graduate and Professional Studies.  
When: See OGAPS calendar for deadlines.  
Approved by: Advisory committee, department head or chair of the intercollegiate faculty and OGAPS.  

Graduation; arrange for cap and gown.  
For more information, visit http://graduation.tamu.edu.  

² Complete the application for degree form via the student’s Howdy portal.  

Program Requirements

Program Requirements

- Student’s Advisory Committee (p. 1227)  
- Degree Plan (p. 1228)  
- Credit Requirements (p. 1228)  
- Transfer of Credit (p. 1228)  
- Limitations on the Use of Transfer, Extension and Certain Other Courses (p. 1228)  
- Thesis Option (p. 1229)  
  - Thesis Proposal (p. 1229)  
  - Final Examination (p. 1229)  
- Non-Thesis Option (p. 1230)  

Student’s Advisory Committee

After receiving admission to graduate studies and enrolling for coursework, the student will consult with the head of his or her major or administrative department (or intercollegiate faculty, if applicable) concerning appointment of the chair of his or her advisory committee. With the exception of the Mays Business School non-thesis option, the Master of Science in Economics with a concentration in financial economics or financial econometrics, the Master of Science with a major in Educational Human Resource Development, HRD option, and the Master of Science in Nursing with a major in Nursing Education, the student’s advisory committee for the master’s degree will consist of no fewer than three members of the graduate faculty, representative of the student’s fields of study and research. The chair or the co-chair of the advisory committee must be from the student’s major department (or intercollegiate faculty, if applicable), and at least one or more of the members must have an appointment to a department other than the student’s major department. The outside member for students in an interdisciplinary program must have an appointment to a department different from the chair of the student’s committee.

The chair, in consultation with the student, will select the remainder of the advisory committee. The student will interview each prospective committee member to determine whether he or she is willing to serve. Only graduate faculty members located on Texas A&M University campuses may serve as chair of a student’s advisory committee. Other graduate faculty members located off campus may serve as a member or co-chair (but not chair) with a member as the chair. The chair of the committee, who usually has immediate supervision of the student’s research and thesis, has the responsibility for calling required meetings of the committee and for calling meetings at any other time considered desirable.

If the chair of a student’s advisory committee voluntarily leaves the University and the student is near completion of the degree and wants the chair to continue to serve in this role, the student is responsible for securing a current member of the University Graduate Faculty, from the student’s academic program and located near the Texas A&M University campus site, to serve as the co-chair of the committee. The Department Head or Chair of Intercollegiate faculty may request in writing to the Associate Provost for Graduate and Professional Studies that a faculty member who is on an approved leave of absence or has voluntarily separated from the university, be allowed to continue to serve in the role of chair of a student’s advisory committee without a co-chair for us to one year. The students should be near completion of the degree. Extensions
beyond the one year period can be granted with additional approval of the Dean.

If the chair of the student’s advisory committee is unavailable for an extended time in any academic period during which the student is involved in activities relating to an internship, thesis or professional paper, and is registered for courses such as 5V98, 5V99, 684, 691, 692 or 693, the student may request, in writing, that the department head appoint an alternate advisory committee chair during the interim period.

The duties of the committee include responsibility for the proposed degree plan, the research proposal, the thesis and the final examination. In addition, the committee as a group and as individual members are responsible for advising the student on academic matters, and, in the case of academic deficiency, initiating recommendations to the Office of Graduate and Professional Studies.

The committee members’ approval on the degree plan indicate their willingness to accept the responsibility for guiding and directing the entire academic program of the student and for initiating all academic actions concerning the student. Although individual committee members may be replaced by petition for valid reasons, a committee cannot resign en masse.

**Degree Plan**

The student’s advisory committee, in consultation with the student, will develop the proposed degree plan. The degree plan must be completed and filed with the Office of Graduate and Professional Studies prior to the deadline imposed by the student’s college or interdisciplinary degree program, if applicable, and no later than 90 days prior to the date of the final oral examination or thesis defense.

A student should submit the degree plan using the online Document Processing Submission System (http://ogsdpss.tamu.edu).

A student submitting a proposed degree plan for a Master of Science degree should designate on the official degree plan the appropriate program option.

Additional coursework may be added to the approved degree plan by petition if it is deemed necessary by the advisory committee to correct deficiencies in the student’s academic preparation. No changes can be made to the degree plan once the student’s Request for Final Examination or Request for Final Examination Exemption is approved by the Office of Graduate and Professional Studies.

**Credit Requirement**

A minimum of 32 semester credit hours of approved courses and research is required for the thesis option Master of Science degree with the exception of the Master of Science in Visualization, which requires 48 hours and Master of Science in Athletic Training, which requires 60 hours. A minimum of 36 semester credit hours of approved coursework is required for the Non-Thesis Option.

Ordinarily the student will devote the major portion of his or her time to work in one or two closely related fields. Other work will be in supporting fields of interest.

**Transfer of Credit**

A student who has earned 12 hours of graduate credit in residence at Texas A&M University may be authorized to transfer courses in excess of the limits prescribed below upon the advice of the advisory committee and with the approval of the Office of Graduate and Professional Studies. Courses taken in residence at an accredited U.S. institution or approved international institution with a final grade of B or greater may be considered for transfer credit if, at the time the courses were completed, the courses would be accepted for credit toward a similar degree for a student in degree-seeking status at the host institution. Otherwise, the limitations stated in the following section apply. Coursework in which no formal grades are given or in which grades other than letter grades (A or B) are earned (for example, CR, P, S, U, H, etc.) is not accepted for transfer credit. Courses appearing on the degree plan with grades of D, F or U may not be accepted by transfer work. Credit for thesis research or the equivalent is not transferable. Credit for coursework submitted for transfer from any college or university must be shown in semester credit hours or equated to semester credit hours. An official transcript from the university at which the transfer coursework was taken must be sent directly to the Office of Admissions.

Courses used toward a degree at another institution may not be applied for graduate credit. If the course to be transferred was taken prior to the conferral of a degree at the transfer institution, a letter from the registrar at that institution stating that the course was not applied for credit toward the degree must be submitted to the Office of Graduate and Professional Studies.

Grades for courses completed at other institutions are not included in computing the GPR.

**Limitations on the Use of Transfer, Extension and Certain Other Courses**

Some departments may have more restrictive requirements for transfer work. If otherwise acceptable, certain courses may be used toward meeting credit-hour requirements for the master’s degree under the following limitations.

1. The maximum number of credit hours which may be considered for transfer credit is the greater of 12 hours or one-third (1/3) of the total hours of a degree plan. The following restrictions apply:
   - Graduate and/or upper-level undergraduate courses taken in residence at an accredited U.S. institution, or approved international institution with a final grade of B or greater will be considered for transfer credit if, at the time the courses were completed, the student was in degree-seeking status at Texas A&M University, or the student was in degree-seeking status at the institution at which the courses were taken; and if the courses would be accepted for credit toward a similar degree for a student in degree-seeking status at the host institution.
   - Courses previously used for another degree are not acceptable for degree plan credit.

2. The maximum number of credit hours taken in post-baccalaureate non-degree (G6) classification at Texas A&M University which may be considered for application to the degree plan is 12.

3. Not more than 12 hours may be used in any combination of the following categories:
   - Not more than 8 hours in the combination of 5V98, 5V99, and 691 (research) or 684 (Professional Internship) may be used.
   - Not more than 8 hours of 685 (Directed Studies) may be used.
   - Not more than 3 hours of 690 (Theory of Research) may be used.
   - Not more than 3 hours of 695 (Frontiers in Research) may be used.

4. A maximum of 2 hours of Seminar (681).
5. A maximum of 9 hours of advanced undergraduate courses (300- or 400-level).

6. For graduate courses of three weeks’ duration or less, taken at other institutions, up to 1 hour of credit may be obtained for each five-day week of coursework. Each week of coursework must include at least 15 contact hours.

7. Continuing education courses may not be used for graduate credit.

8. Extension courses are not acceptable for credit.

9. For the Degree of Master of Science in Medical Science, students with a first professional degree (MD, DDS or DVM) may take up to 20 hours of 691 (research). For the remaining hours, a maximum of 2 hours can be Seminar (681) and a maximum of 3 hours can be Directed Studies (685).

Exceptions will be permitted only in unusual cases and when petitioned by the student’s advisory committee and approved by the Office of Graduate and Professional Studies.

**Thesis Option**

An acceptable thesis is required for the Master of Science degree for a student who selects the thesis option program. The finished work must reflect a comprehensive understanding of the pertinent literature and express in clear English, the problem(s) for study, the method, and significance and results of the student’s original research. Guidelines for the preparation of the thesis are available in the Thesis Manual, which is available online at the Office of Graduate and Professional Studies website.

After successful defense (or exemption) and approval by the student’s advisory committee and the head of the student’s major department (or chair of the intercollegiate faculty, if appropriate), the student must submit his/her thesis in electronic format as a single PDF file. The PDF file must be uploaded to the Office of Graduate and Professional Studies website. Additionally, a signed approval form must be brought or mailed to the Office of Graduate and Professional Studies. The PDF file and the signed approval form are required by the deadline.

Deadline dates for submitting the thesis are announced each semester or summer term in the “Office of Graduate and Professional Studies Calendar” (see Time Limit statement). These dates also can be accessed via the Office of Graduate and Professional Studies website.

Before a student can be “cleared” by Thesis and Dissertation Services, a processing fee must be paid through Student Business Services. This processing fee is for the thesis/dissertation services provided. After commencement, dissertations are digitally stored and made available through the Texas A&M Libraries.

A thesis that is deemed unacceptable by the Office of Graduate and Professional Studies because of excessive corrections will be returned to the student’s department head (or chair of the intercollegiate faculty, if applicable). The manuscript must be resubmitted as a new document, and the entire review process must begin again. All original submittal deadlines must be met during the resubmittal process to graduate that semester.

**Thesis Proposal**

For the thesis option Master of Science degree, the student must prepare a thesis proposal for approval by the advisory committee and the head of the major department or chair of the interdisciplinary faculty, if applicable. This proposal must be submitted to the Office of Graduate and Professional Studies at least 20 working days prior to the submission of the request for the final examination.

Compliance issues must be addressed if a graduate student is performing research involving human subjects, animals, infectious biohazards and recombinant DNA. A student involved in these types of research should check with the Office of Research Compliance and Biosafety at (979) 458-1467 to address questions about all research compliance responsibilities. Additional information can also be obtained on the Office of Research Compliance and Biosafety website.

**Thesis Defense/Final Examination**

A student must pass a final examination by dates announced each semester or summer term in the Office of Graduate and Professional Studies Calendar. The Office of Graduate and Professional Studies must be notified in writing of any cancellation. To be eligible to take the final examination, a student’s GPR must be at least 3.000 for courses on the degree plan and for all courses completed at Texas A&M which are eligible to be applied to a graduate degree, and there must be no unabsolved grades of D, F or U for any course listed on the degree plan. To absolve a deficient grade, the student must repeat the course at Texas A&M University and achieve a grade of C or better. All coursework on the degree plan must have been completed with the exception of those hours for which the student is registered. Additionally, all English Language Proficiency requirements must be satisfied prior to scheduling the examination. If applicable, an approved thesis proposal must be on file in the Office of Graduate and Professional Studies according to published deadlines.

A request to hold and announce the final examination must be submitted to the Office of Graduate and Professional Studies a minimum of 10 working days in advance of the scheduled date for the examination. Examinations which are not completed and reported as satisfactory to the Office of Graduate and Professional Studies within 10 working days of the scheduled examination date will be recorded as failures. A student may be given only one opportunity to repeat the final examination for the master’s degree and that must be within a time period that does not extend beyond the end of the next regular semester (summer terms are excluded).

For thesis option students, the final examination covers the thesis and all work taken on the degree plan and at the option of the committee may be written or oral or both. The final examination may not be administered before the thesis is available to all members of the student’s advisory committee in substantially final form, and all members have had adequate time to review the document. The examination is conducted by the student’s advisory committee as finally constituted. A thesis option student must be registered in the University in the semester or summer term in which the final examination is taken. Persons other than members of the graduate faculty may, with mutual consent of the candidate and the major professor, attend final examinations for advanced degrees. Upon completion of the questioning of the candidate, all visitors must excuse themselves from the proceedings. A positive vote by all members of the graduate committee with at most one dissension is required to pass a student on his or her exam. A department, or interdisciplinary degree program, may have a stricter requirement provided there is consistency within all degree programs within a department or interdisciplinary degree program.

A thesis option candidate may petition to be exempt from his/her final examination provided his/her degree plan GPR is 3.500 or greater and he/she has the approval of the advisory committee, the head of the student’s major department, or intercollegiate chair, if appropriate, and the Office
of Graduate and Professional Studies. It is required that the petition for exemption be submitted the same semester the student intends to submit the thesis.

For non-thesis option students, a final comprehensive examination is required. The Master of Science in Educational Human Resource Development, HRD option, the Master of Science in Nursing with a major in Nursing Education, the Master of Science Program in the Mays Business School and the Master of Science in Economics with a concentration in financial economics or financial econometrics do not have final examination requirements. Otherwise, exemptions from final examinations are not allowed. The final exam cannot be held prior to the mid point of the final semester if questions on the exam are based on courses in which the student is currently enrolled. If a student has completed all required degree plan coursework, the student is not required to be registered for classes in the semester the final examination is administered (unless he/she holds an assistantship).

Exam results must be submitted with original signatures of only the committee members approved by the Office of Graduate and Professional Studies. If an approved committee member substitution (1 only) has been made, his/her signature must also be submitted to the Office of Graduate and Professional Studies.

Non-Thesis Option

For the non-thesis option, a thesis is not required. A final comprehensive examination is required for all non-thesis Master of Science programs except the Master of Science programs offered by the Mays Business School, the Master of Science in Economics with a concentration in financial economics or financial econometrics, the Master of Science with a major in Educational Human Resource Development, HRD option, and the Master of Science in Nursing with a major in Nursing Education. No exemptions are allowed. The requirements as to level of courses and examinations are the same as for the thesis option Master of Science degree. The final examination cannot be held prior to the mid point of the final semester if questions on the examination are based on courses in which the student is currently enrolled.

A student pursuing the non-thesis option is not allowed to enroll in 5V98, 5V99, or 691 (research) for any reason and 691 may not be used for credit toward a non-thesis option Master of Science degree. A maximum of 4 credit hours of 684 (Professional Internship), 8 credit hours of 685 (Directed Studies), and up to 3 credit hours of 690 (Theory of Research) or 695 (Frontiers in Research) may be used toward the non-thesis option Master of Science degree. In addition, any combination of 684, 685, 690 and 695 may not exceed 25 percent of the total credit hour requirement shown on the individual degree plan. All requirements for the non-thesis option Master of Science degree other than those specified above are the same as for the thesis option.

Additional Requirements

- Residence (p. 1230)
- Continuous Registration (p. 1230)
- Time Limit (p. 1230)
- Foreign Languages (p. 1230)
- Application for Degree (p. 1230)

Residence

In partial fulfillment of the residence requirement for the degree of Master of Science, the student must complete 9 resident credit hours during one regular semester or one 10-week summer semester in resident study at Texas A&M University. Upon recommendation of the student's advisory committee, department head or Chair of the Interdisciplinary Program, if appropriate, and with approval of the Office of Graduate and Professional Studies, a student may be granted exemption from this requirement. Such a petition, however, must be approved prior to the student's registration for the final 9 credit hours of required coursework.

Students who are employed full-time while completing their degree may fulfill total residence requirements by completion of less-than-full time course loads each semester. In order to be considered for this, the student is required to submit a Petition for Waivers and Exceptions along with verification of his/her employment to the Office of Graduate and Professional Studies.

See Residence Requirements (p. 22).

Continuous Registration

A student in the thesis option of the Master of Science program who has completed all coursework on his/her degree plan other than 5V98, 5V99, and 691 (research) is required to be in continuous registration until all requirements for the degree have been completed. See Continuous Registration Requirements (p. 25).

Time Limit

All degree requirements must be completed within a period of seven consecutive years for the degree to be granted. A course will be considered valid until seven years after the end of the semester in which it is taken. Graduate credit for coursework which is more than seven calendar years old at the time of the final examination (oral or written) may not be used to satisfy degree requirements.

A student who has chosen the thesis option must have the final corrected version of the thesis cleared by the Office of Graduate and Professional Studies no later than one year after the final examination, or approval of a petition for exemption from the final exam, or within the seven-year time limit, whichever occurs first. Failure to do so will result in the degree not being awarded.

Foreign Languages

No specific language requirement exists for the Master of Science degree.

Application for Degree

For information on applying for your degree, please visit the Graduation (p. 24) section.

Doctor of Philosophy in Mathematics

Work leading to the degree of Doctor of Philosophy (PhD) is designed to give the candidate a thorough and comprehensive knowledge of his or her professional field and training in methods of research. The final basis for granting the degree shall be the candidate's grasp of the subject matter of a broad field of study and a demonstrated ability to do independent research. In addition, the candidate must have acquired the ability to express thoughts clearly and forcefully in both oral and written languages.
The degree is not granted solely for the completion of coursework, residence and technical requirements, although these must be met.

For a student who has completed a master’s degree, a DDS/DMD, DVM or MD at a U.S. institution, a minimum of 64 hours is required on the degree plan for the degree of Doctor of Philosophy. For a student who has completed a baccalaureate degree but not a master’s degree or a U.S. DDS/DMD, DVM or MD, a minimum of 96 hours is required on the degree plan for the degree of Doctor of Philosophy.

Steps to Fulfill Doctoral Degree Requirements

1. Meet with departmental/intercollegiate graduate advisor to plan course of study for first semester.  
   **When:** Before first semester registration.  
   **Approved by:** Graduate advisor.

2. Establish advisory committee.  
   Submit a degree plan.  
   **When:** Prior to the deadline imposed by the student's college or intercollegiate programs, and no later than 90 days prior to preliminary examination.  
   **Approved by:** Advisory committee, department head or intercollegiate faculty chair, and Office of Graduate and Professional Studies (OGAPS).

3. Complete English Language Proficiency requirements (if applicable), and coursework detailed on degree plan.  
   **When:** Before preliminary examination.

4. Complete the preliminary examination.  
   **When:** See steps for completing the preliminary examination. The preliminary examination results must have been submitted to OGAPS 14 weeks prior to the date of the defense.  
   **Approved by:** Advisory committee, department head or chair of the intercollegiate faculty, and OGAPS.

5. Submit proposal for dissertation or record of study to the Office of Graduate and Professional Studies.  
   **When:** No later than 20 working days prior to the submission of the Request for the Final Examination.  
   **Approved by:** Advisory committee, department head or intercollegiate faculty chair, and OGAPS.

6. Complete residence requirement.  
   **When:** Before submitting request to schedule final oral examination.  
   **Approved by:** OGAPS

7. Apply for degree; pay graduate fee.  
   **When:** During the first week of the final semester; see OGAPS calendar for deadlines.

8. Submit request for permission to hold and announce final oral examination.  
   **When:** Must be received by OGAPS at least 10 working days before requested exam date. See OGAPS calendar for deadlines.  
   **Approved by:** Advisory committee, department head or intercollegiate faculty chair, and OGAPS.

9. Successfully complete final examination.  
   **When:** The Report of the Final Examination Form should be submitted to OGAPS within 10 days following the exam.  
   **Approved by:** Advisory committee and OGAPS

10. Upload one approved final copy of the dissertation or record of study as a single pdf file (http://ogaps.tamu.edu) and submit a signed approval form to the Office of Graduate and Professional Studies.  
    **When:** See OGAPS calendar for deadlines.  
    **Approved by:** Advisory committee, department head or intercollegiate faculty chair, and Office of Graduate and Professional Studies.

11. Graduate; arrange for cap and gown.  
    For more information, visit http://graduation.tamu.edu.

Note: Once formal coursework is complete, you must be continuously registered until all degree requirements have been met. See Continuous Registration Requirements (p. 25).

Program Requirements

Program Requirements

- Student's Advisory Committee (p. 1232)
- Degree Plan (p. 1232)
• Transfer of Credit (p. 1232)
• Research Proposal (p. 1233)
• Examinations (p. 1233)
  • Preliminary Examination (p. 1233)
  • Final Examination/Dissertation Defense (p. 1235)
• Dissertation (p. 1235)

**Student’s Advisory Committee**

After receiving admission to graduate studies and enrolling, the student will consult with the head of his or her major or administrative department (or chair of the intercollegiate faculty) concerning appointment of the chair of the advisory committee. The student’s advisory committee will consist of no fewer than four members of the graduate faculty representative of the student’s several fields of study and research, where the chair or co-chair must be from the student’s department (or intercollegiate faculty, if applicable), and at least one or more of the members must have an appointment to a department other than the student’s major department. The outside member for a student in an interdisciplinary degree program must be from a department different from the chair of the student’s committee.

The chair, in consultation with the student, will select the remainder of the advisory committee. Only graduate faculty members located on Texas A&M University campuses may serve as chair of a student’s advisory committee. Other Texas A&M University graduate faculty members located off-campus may serve as a member or co-chair (but not chair), with a member as the chair.

If the chair of a student’s advisory committee voluntarily leaves the University and the student is near completion of the degree and wants the chair to continue to serve in this role, the student is responsible for securing a current member of the University Graduate Faculty, from the student’s academic program and located near the Texas A&M University campus site, to serve as the co-chair of the committee. The Department Head or Chair of Intercollegiate faculty may request in writing to the Associate Provost for Graduate and Professional Studies that a faculty member who is on an approved leave of absence or has voluntarily separated from the university, be allowed to continue to serve in the role of chair of a student’s advisory committee without a co-chair for us to one year. The students should be near completion of the degree. Extensions beyond the one year period can be granted with additional approval of the Dean.

The committee members’ signatures on the degree plan indicate their willingness to accept the responsibility for guiding and directing the entire academic program of the student and for initiating all academic actions concerning the student. Although individual committee members may be replaced by petition for valid reasons, a committee cannot resign en masse. The chair of the committee, who usually has immediate supervision of the student’s research and dissertation or record of study, has the responsibility for calling all meetings of the committee. The duties of the committee include responsibility for the proposed degree plan, the research proposal, the preliminary examination, the dissertation or record of study and the final examination. In addition, the committee, as a group and as individual members, is responsible for counseling the student on academic matters, and, in the case of academic deficiency, initiating recommendations to the Office of Graduate and Professional Studies.

**Degree Plan**

The student’s advisory committee will evaluate the student’s previous education and degree objectives. The committee, in consultation with the student, will develop a proposed degree plan and outline a research problem which, when completed, as indicated by the dissertation (or its equivalent for the degree of Doctor of Education or the degree of Doctor of Engineering), will constitute the basic requirements for the degree. The degree plan must be filed with the Office of Graduate and Professional Studies prior to the deadline imposed by the student’s college and no later than 90 days prior to the preliminary examination.

This proposed degree plan should be submitted through the online Document Processing Submission System located on the website [http://ogsdpss.tamu.edu](http://ogsdpss.tamu.edu). A minimum of 64 hours is required on the degree plan for the Doctor of Philosophy for a student who has completed a master’s degree. A student who has completed a DDS/DMD, DVM or a MD at a U.S. institution is also required to complete a minimum of 64 hours. A student who has completed a baccalaureate degree but not a master’s degree will be required to complete a 96-hour degree plan. Completion of a DDS/DMD, DVM or MD degree at a foreign institution requires completion of a minimum of 96 hours for the Doctor of Philosophy. A field of study may be primarily in one department or in a combination of departments. A degree plan must carry a reasonable amount of 691 or 5V98/5V99 (research).

Additional coursework may be added by petition to the approved degree plan by the student’s advisory committee if it is deemed necessary to correct deficiencies in the student’s academic preparation. No changes can be made to the degree plan once the student’s Request for Final Examination is approved by the Office of Graduate and Professional Studies.

Approval to enroll in any professional course (900-level) should be obtained from the head of the department (or Chair of the intercollegiate faculty, if applicable) in which the course will be offered before including such a course on a degree plan.

No credit may be obtained by correspondence study, by extension or for any course of fewer than three weeks duration.

**Transfer of Credit**

Courses for which transfer credits are sought must have been completed with a grade of B or greater and must be approved by the student’s advisory committee and the Office of Graduate and Professional Studies. These courses must not have been used previously for another degree. Except for officially approved cooperative doctoral programs, credit for thesis or dissertation research or the equivalent is not transferable. Credit for “internship” coursework in any form is not transferable. Courses taken in residence at an accredited U.S. institution or approved international institution with a final grade of B or greater will be considered for transfer credit if, at the time the courses were completed, the courses would be accepted for credit toward a similar degree for a student in degree-seeking status at the host institution. Credit for coursework taken by extension is not transferable. Coursework in which no formal grades are given or in which grades other than letter grades (A or B) are earned (for example, CR, P, S, U, H, etc.) is not accepted for transfer credit. Credit for coursework submitted for transfer from any college or university must be shown in semester credit hours, or equated to semester credit hours.

Courses used toward a degree at another institution may not be applied for graduate credit. If the course to be transferred was taken prior to the
conferral of a degree at the transfer institution, a letter from the registrar at that institution stating that the course was not applied for credit toward the degree must be submitted to the Office of Graduate and Professional Studies.

Grades for courses completed at other institutions are not included in computing the GPR. An official transcript from the university at which transfer courses are taken must be sent directly to the Office of Admissions.

**Research Proposal**

The general field of research to be used for the dissertation should be agreed on by the student and the advisory committee at their first meeting, as a basis for selecting the proper courses to support the proposed research.

As soon thereafter as the research project can be outlined in reasonable detail, the dissertation research proposal should be completed. The research proposal should be approved at a meeting of the student’s advisory committee, at which time the feasibility of the proposed research and the adequacy of available facilities should be reviewed. The approved proposal, signed by all members of the student’s advisory committee, the head of the student’s major department (or chair of the intercollegiate faculty, if applicable), must be submitted to the Office of Graduate and Professional Studies at least 20 working days prior to the submission of the Request for the Final Examination.

Compliance issues must be addressed if a graduate student is performing research involving human subjects, animals, infectious biohazards and recombinant DNA. A student involved in these types of research should check with the Office of Research Compliance and Biosafety at (979) 458-1467 to address questions about all research compliance responsibilities. Additional information can also be obtained on the website http://rcb.tamu.edu.

**Examinations**

**Preliminary Examination**

The student’s major department (or chair of the intercollegiate faculty, if applicable) and his or her advisory committee may require qualifying, cumulative or other types of examinations at any time deemed desirable. These examinations are entirely at the discretion of the department and the student’s advisory committee.

The preliminary examination is required. The preliminary examination for a doctoral student shall be given no earlier than a date at which the student is within 6 credit hours of completion of the formal coursework on the degree plan (i.e., all coursework on the degree plan except 681, 684, 690, 691, 5V98, 5V99 and 692 courses). The student is strongly encouraged to complete the Preliminary Examination no later than the end of the semester following the completion of the formal coursework on the degree plan. The Office of Graduate and Professional Studies must receive the results of the preliminary examination at least 14 weeks prior to the final examination date. The examination shall be oral and written unless otherwise recommended by the student’s advisory committee and approved by the Office of Graduate and Professional Studies. The written part of the examination will cover all fields of study included in the student’s degree plan. Each member of the advisory committee is responsible for administering a written examination in his or her particular field, unless he or she chooses to waive participation in this part of the examination. Two or more members of the advisory committee may give a joint written examination. One or more members may require a student to take a departmental or intercollegiate faculty examination to supplement or replace a written examination. Each written examination must be completed and reported as satisfactory to the chair of the advisory committee before the oral portion of the examination may be held. In case any written examination is reported unsatisfactory, the entire advisory committee must agree (1) to proceed with the oral portion of the preliminary examination, or (2) to adopt another course of action regarding the unsatisfactory written examination.

Prior to scheduling the preliminary examination with the other committee members, the committee chair will review the eligibility criteria with the student, using the Preliminary Examination Checklist to ensure the student is ready for the examination. The following list of eligibility requirements applies.

- Student is registered at Texas A&M University for the semester or summer term during which any portion of the preliminary examination may fall. If the entire examination falls between semesters, then the student must be registered for the term immediately preceding the examination.
- An approved degree plan was on file with the Office of Graduate and Professional Studies at least 90 days prior to the first written examination.
- Student’s cumulative GPR is at least 3.000.
- Student’s degree plan GPR is at least 3.000.
- All English language proficiency requirements have been satisfied.
- All committee members have scheduled or waived the written portion and agreed to attend the oral portion of the examination or have found a substitute. Only one substitution is allowed and it cannot be for the committee chair.
- At the end of the semester in which the exam is given, there are no more than 6 hours of coursework remaining on the degree plan (except 681, 684, 690, 691, 5V98, 5V99 and 692). The head of the student’s department (or Chair of the Intercollegiate Faculty, if applicable) has the authority to approve a waiver of this criterion.
- The time span from the first written examination to the oral is no more than three weeks. (In cases of department-wide written examinations, this criterion is not applicable.) The head of the student’s department (or chair of the intercollegiate faculty, if applicable) has the authority to approve a waiver of this criterion.

Once all requirements are met, departments or intercollegiate faculty may announce the schedule of the written and oral parts of the examination.

Credit for the preliminary examination is not transferable. If a departmental or intercollegiate faculty examination is used as part of the written portion of the preliminary examination, it must be the last examination offered prior to the date scheduled for the preliminary examination. In the schedule of the written portion, all members of the student’s advisory committee are to be included.

Through the preliminary examination, the student’s advisory committee should satisfy itself that the student has demonstrated the following qualifications:

1. a mastery of the subject matter of all fields in the program;
2. an adequate knowledge of the literature in these fields and an ability to carry out bibliographical research.
In case a student is required to take, as a part of the written portion of a preliminary examination, an examination administered by a department or intercollegiate faculty, the department or intercollegiate faculty must:

1. offer the examination at least once every six months. The departmental or interdisciplinary degree program examination should be announced at least 30 days prior to the scheduled examination date.

2. assume the responsibility for marking the examination satisfactory or unsatisfactory, or otherwise graded, and in the case of unsatisfactory, stating specifically the reasons for such a mark.

3. forward the marked examination to the chair of the student’s advisory committee within one week after the examination.

The chair of the student’s advisory committee is responsible for making all written examinations available to the members of the advisory committee at or before the oral portion of the preliminary examination. A positive vote by all members of the graduate committee with at most one dissent is required to pass a student on his or her preliminary exam. A department or intercollegiate faculty can have a stricter requirement provided there is consistency within all degree programs within a department or an interdisciplinary degree program.

The chair of the advisory committee will promptly report the results of the Preliminary Examination to the Office of Graduate and Professional Studies, using the Report of Doctoral Preliminary Examination form and the Preliminary Examination checklist. Both forms must have the appropriate signatures. These forms should be submitted to the Office of Graduate and Professional Studies within 10 working days of the scheduled preliminary examination.

The Report of the Preliminary Examination form must be submitted with original signatures of the approved committee members. If an approved committee member substitution (1 only) has been made, his/her signature must also be included on the form submitted to the Office of Graduate and Professional Studies. The original signature of the department head is also required on the form.

After passing the required oral and written preliminary examinations for the doctoral degree, the student must complete the final examination for the degree within four calendar years. Otherwise, the student will be required to repeat the preliminary examination. Upon approval of the student’s advisory committee, with no more than one member dissenting, and approval of the Office of Graduate and Professional Studies, a student who has failed the preliminary examination may be given one re-examination. Adequate time must be given to permit the student to address the inadequacies emerging from the first examination (normally six months). The student and the advisory committee should jointly negotiate a mutually acceptable date for this purpose.

A student must be registered at Texas A&M University for a minimum of one semester credit hour in the semester or summer term in which they will take any portion of the Preliminary Examination.

### Steps for Completing the Preliminary Examination

1. **Establish advisory committee.**
   - **When:** Prior to the deadline set by the student’s college, and no later than 90 days prior to preliminary examination.
   - **Approved by:** Advisory committee, department or intercollegiate faculty chair, and Office of Graduate and Professional Studies (OGAPS).

2. **Complete English language proficiency requirements (if applicable), and coursework detailed on degree plan.**
   - **When:** Before preliminary examination.

3. **Student and chair review eligibility requirements for the preliminary exam using the “Preliminary Examination Checklist.”**
   - **When:** Several weeks before the proposed date of the preliminary examination. Checklist must be signed by chair and department head, or intercollegiate faculty chair.

4. **Student checks the availability of committee members.**
   - **When:** Several weeks before the proposed date of the preliminary examination.

5. **Students prepares and submits any petitions found necessary by the review of the eligibility requirements.**
   - **When:** At least three weeks before the proposed date of the preliminary examinations.
   - **Approved by:** Advisory committee, department head or intercollegiate faculty chair, and OGAPS.

6. **When exam date is determined, the department may announce the schedule.**
   - **Approved by:** Committee chair, department head or intercollegiate faculty chair.

7. **Chair submits the Report of the Preliminary Examination and the Preliminary Examination Checklist to OGAPS.**
   - **When:** Within 10 working days of the date of the scheduled oral examination and no later than 14 weeks prior to the final defense date.
   - **Approved by:** Advisory committee.
Final Examination/Dissertation Defense

The candidate for the doctoral degree must pass a final examination by deadline dates announced in the “Office of Graduate and Professional Studies Calendar” each semester or summer term. The doctoral student is allowed only one opportunity to take the final examination. No student may be given a final examination unless his or her current official cumulative and degree plan GPAs are 3.000 or better and he or she has been admitted to candidacy. No unabsolved grades of D, F, or U for any course can be listed on the degree plan. To absolve a deficient grade, a student must repeat the course and achieve a grade of C or better. A student must have completed all coursework on his or her degree plan with the exception of 691, 598, or 599 (research) or 692 (Professional Study) hours. The student must be registered for all remaining hours; no hours remain to be taken on the degree plan. The preliminary examination results must have been submitted to the Office of Graduate and Professional Studies 14 weeks prior to the date of the defense. The research proposal must have been submitted to the Office of Graduate and Professional Studies 25 working days prior to the date of the defense. Any changes to the degree plan must be approved by the Office of Graduate and Professional Studies prior to the approval of the final examination. The request to hold and announce the final examination must be submitted to the Office of Graduate and Professional Studies a minimum of 10 working days in advance of the scheduled date. Examination/Defense results must be submitted to the Office of Graduate and Professional Studies within 10 working days of the scheduled examination/defense date. The Office of Graduate and Professional Studies must be notified in writing of any cancellations.

The student’s advisory committee will conduct this examination. The final examination is not to be administered until the dissertation or record of study is available in substantially final form to the student’s advisory committee, and all concerned have had adequate time to review the document. Additionally, all English Language Proficiency requirements must be satisfied prior to scheduling the examination. Whereas the final examination may cover the broad field of the candidate’s training, it is presumed that the major portion of the time will be devoted to the dissertation and closely allied topics. Persons other than members of the graduate faculty may, with mutual consent of the candidate and the chair of the advisory committee, be invited to attend a final examination for an advanced degree. A positive vote by all members of the graduate committee with at most one dissension is required to pass a student on his or her exam. A department can have a stricter requirement provided there is consistency within all degree programs within a department. Upon completion of the questioning of the candidate, all visitors must excuse themselves from the proceedings.

The advisory committee will submit its recommendations on the proper Report of the Final Examination for Doctoral Candidates form to the Office of Graduate and Professional Studies regarding acceptability of the candidate for the doctoral degree. A student must be registered in the University in the semester or summer term in which the final examination is taken.

The Report of the Final Examination Form must be submitted with original signatures of only the committee members approved by the Office of Graduate and Professional Studies. If an approved committee member substitution (1 only) has been made, his/her signature must be included on the form submitted to the Office of Graduate and Professional Studies.

Dissertation

The ability to perform independent research must be demonstrated by the dissertation, which must be the original work of the candidate. Whereas acceptance of the dissertation is based primarily on its scholarly merit, it must also exhibit creditable literary workmanship. The format of the dissertation must be acceptable to the Office of Graduate and Professional Studies. Guidelines for the preparation of the thesis are available in the Thesis Manual, which is available online at http://ogaps.tamu.edu.

After successful defense and approval by the student’s advisory committee and the head of the student’s major department (or chair of the intercollegiate faculty, if applicable), a student must submit his/her dissertation in electronic format as a single PDF file. The PDF file must be uploaded to the website, http://ogaps.tamu.edu. Additionally, a signed approval form must be brought or mailed to the Office of Graduate and Professional Studies. Both the PDF file and the signed approval form are required by the deadline.

Deadline dates for submitting are announced each semester or summer term in the Office of Graduate and Professional Studies Calendar (see Time Limit statement). These dates also can be accessed via the website http://ogaps.tamu.edu.

Before a student can be “cleared” by Thesis and Dissertation Services, a processing fee must be paid through Student Business Services. This processing fee is for the thesis/dissertation services provided. After commencement, dissertations are digitally stored and made available through the Texas A&M Libraries.

A dissertation that is deemed unacceptable by the Office of Graduate and Professional Studies because of excessive corrections will be returned to the student’s department head or chair of the intercollegiate faculty. The manuscript must be resubmitted as a new document, and the entire review process must begin anew. All original submittal deadlines must be met during the resubmittal process in order to graduate.

Additional Requirements

Additional Requirements

- Residence (p. 1235)
- Time Limit (p. 1236)
- Continuous Registration (p. 1236)
- Admission to Candidacy (p. 1236)
- Languages (p. 1236)
- 99-Hour Cap on Doctoral Degree (p. 1236)
- Application for Degree (p. 1237)

Residence

A student who enters the doctoral degree program with a baccalaureate degree must spend one academic year plus one semester in resident study at Texas A&M University. A student who holds master’s degree when he/she enters doctoral degree program must spend one academic year in resident study. One academic year may include two adjacent regular semesters or one regular semester and one adjacent 10-week
summer semester. The third semester is not required to be adjacent to the one year. Enrollment for each semester must be a minimum of 9 credit hours each to satisfy the residence requirement.

To satisfy the residence requirement, the student must complete a minimum of 9 credit hours per semester or 10-week summer semester in resident study at Texas A&M University for the required period. A student who enters a doctoral degree program with a baccalaureate degree may fulfill residence requirements in excess of one academic year (18 credit hours) by registration during summer sessions or by completion of a less-than-full course load (in this context a full course load is considered 9 credit hours per semester).

Students who are employed full-time while completing their degree may fulfill total residence requirements by completion of less-than-full time course loads each semester. In order to be considered for this, the student is required to submit a Petition for Waivers and Exceptions along with verification of his/her employment to the Office of Graduate and Professional Studies. An employee should submit verification of his/her employment at the time he/she submits the degree plan. See Registration. (p. 25)

See Residence Requirements (p. 22).

**Time Limit**

All requirements for doctoral degrees must be completed within a period of ten consecutive calendar years for the degree to be granted. A course will be considered valid until 10 years after the end of the semester in which it is taken. Graduate credit for coursework more than ten calendar years old at the time of the final oral examination may not be used to satisfy degree requirements.

After passing the required preliminary oral and written examinations for a doctoral degree, the student must complete the final examination within four calendar years. Otherwise, the student will be required to repeat the preliminary examination.

A final corrected version of the dissertation or record of study in electronic format as a single PDF file must be cleared by the Office of Graduate and Professional Studies no later than one year after the final examination or within the 10-year time limit, whichever occurs first. Failure to do so will result in the degree not being awarded.

**Continuous Registration**

A student in a program leading to a Doctor of Philosophy who has completed all coursework on his/her degree plan other than 681, 690, and 691, or 5V98 and 5V99 (research) are required to be in continuous registration until all requirements for the degree have been completed. See Continuous Registration Requirements (p. 25).

**Admission to Candidacy**

To be admitted to candidacy for a doctoral degree, a student must have:

1. completed all formal coursework on the degree plan with the exception of any remaining 681, 684, 690 and 691, or 5V98 and 5V99,
2. a 3.0 Graduate GPA and a Degree Plan GPA of at least 3.0 with no grade lower than C in any course on the degree plan,
3. passed the preliminary examination (written and oral portions),
4. submitted an approved dissertation proposal,
5. met the residence requirements. The final examination will not be authorized for any doctoral student who has not been admitted to candidacy.

**Languages**

A student is required to possess a competent command of English. For English language proficiency requirements, see the Admissions section of this catalog. The doctoral (PhD) foreign language requirement at Texas A&M University is a departmental option, to be administered and monitored by the individual departments of academic instruction.

**99-Hour Cap on Doctoral Degrees**

In Texas, public colleges and universities are funded by the state according to the number of students enrolled. In accordance with legislation passed by the Texas Legislature, the number of hours for which state universities may receive subvention funding at the doctoral rate for any individual is limited to 99 hours. Texas A&M University and other universities will not receive subvention for hours in excess of the limit.

Institutions of higher education are allowed to charge the equivalent of nonresident tuition to a resident doctoral student who has enrolled in 100 or more semester credit hours of doctoral coursework.

A doctoral student at Texas A&M has seven years to complete his/her degree before being charged out-of-state tuition. A doctoral student who, after seven years of study, has accumulated 100 or more doctoral hours will be charged tuition at a rate equivalent to out-of-state tuition. Please note that the tuition increases will apply to Texas residents as well as students from other states and countries who currently are charged tuition at the resident rate. This includes those doctoral students who hold GAT, GANT, and GAR appointments of 20 or more hours and recipients of competitive fellowships who receive more than $1,000 per semester. Doctoral students who, after seven years of study, have not accumulated 100 hours are eligible to pay in-state tuition if otherwise eligible.

For count purposes, a year is counted as three semesters, normally fall, spring and summer. Using this system, a student is allowed 21 semesters as a G8 student to complete the doctoral degree before being penalized with the higher tuition rate. Any semester in which a G8 student is enrolled for a doctoral level course is counted.

The following majors are exempt from the 99-Hour Cap on Doctoral Degrees:

- Biomedical Sciences
- Biochemistry
- Microbiology
- Genetics
- Toxicology
- Nutrition Sciences
- Community Clinical Psychology
- Counseling Psychology
- School Psychology
- Veterinary Pathology
- Clinical Psychology
- Counseling Psychology
- Medical Sciences
- Health Services Research
- Health Promotion and Community Health Sciences
• Epidemiology and Environmental Health

The hour limit for these majors is 130 doctoral hours.

Application for Degree
For information on applying for your degree, please visit the Graduation (p. 24) section.

Department of Physics and Astronomy

http://physics.tamu.edu

Head: G. R. Welch

Graduate Advisor: J. Ross

The physics curriculum provides classroom and research experience that prepares a graduate student for a career of either research and teaching at a university, or research and development at an industrial or government laboratory. The courses are well suited to graduate students in astronomy, astrophysics, chemistry, mathematics, geosciences or engineering, as well as those seeking a graduate degree in physics.

The faculty members of the department carry out theoretical and experimental research in the following areas: atomic/molecular, high-energy, low-temperature/condensed matter, materials, computational physics, nuclear physics, astronomy, cosmology and quantum optics. Research laboratories supporting the experimental programs are well-equipped with modern research apparatus. Special support facilities include an astronomical instrumentation laboratory, access to high-performance computing, a variable-energy cyclotron, as well as many other shared campus facilities.

Faculty

Abanov, Artem, Associate Professor
Physics And Astronomy
PhD, Texas A&M University, 1998

Adair, Thomas, Professor
Physics And Astronomy
PhD, Texas A&M University, 1965

Agnolet, Glenn, Professor
Physics And Astronomy
PhD, Cornell University, 1983

Allen, Roland, Professor
Physics And Astronomy
PhD, University of Texas, Austin, 1969

Bassichis, William, Professor
Physics And Astronomy
PhD, Case Western Reserve University, 1963

Becker, Katrin, Professor
Physics And Astronomy
PhD, University of Bonn, 1994

Becker, Melanie, Professor
Physics And Astronomy
PhD, University of Bonn, Germany, 1994

Belyanin, Alexey, Professor
Physics And Astronomy
PhD, Institute of Applied Physics, Russian Academy of Sciences, 1995

Bonasera, Aldo, Research Scientist
Physics and Astronomy
PhD, Dottorato di Ricerca-Italy, 1987

Chin, Siu, Professor
Physics And Astronomy
PhD, Massachusetts Institute of Technology, 1975

Depoy, Darren, Professor
Physics And Astronomy
PhD, University of Hawaii, 1987

Dhar, Barun, Lecturer
Physics And Astronomy
PhD, University of Minnesota, 2012

Dutta, Bhaskar, Professor
Physics And Astronomy
PhD, Oklahoma State University, 1995

Ene, Emanuela, Lecturer
Physics and Astronomy
PHD, Oklahoma State University, 2013

Erukhimova, Tatiana, Senior Lecturer
Physics and Astronomy
PhD, Institute of Applied Physics, Russian Academy of S, 1999

PhD, University of Rochester, 1979

Masters
- Master of Science in Physics (p. 1245)

Doctoral
- Doctor of Philosophy in Applied Physics (p. 1239)
- Doctor of Philosophy in Physics (p. 1250)

Doctor of Philosophy in Applied Physics

Work leading to the degree of Doctor of Philosophy (PhD) is designed to give the candidate a thorough and comprehensive knowledge of his or her professional field and training in methods of research. The final basis for granting the degree shall be the candidate's grasp of the subject matter of a broad field of study and a demonstrated ability to do independent research. In addition, the candidate must have acquired the ability to express thoughts clearly and forcefully in both oral and written languages. The degree is not granted solely for the completion of coursework, residence and technical requirements, although these must be met.

For a student who has completed a master's degree, a DDS/DMD, DVM or MD at a U.S. institution, a minimum of 64 hours is required on the degree plan for the degree of Doctor of Philosophy. For a student who has completed a baccalaureate degree but not a master's degree or a U.S. DDS/DMD, DVM or MD, a minimum of 96 hours is required on the degree plan for the degree of Doctor of Philosophy.

Steps to Fulfill Doctoral Degree Requirements

1. Meet with departmental/intercollegiate graduate advisor to plan course of study for first semester.

   When: Before first semester registration.

   Approved by: Graduate advisor.

</tbody>
</table>

Note: Once formal coursework is complete, you must be continuously registered until all degree requirements have been met. See Continuous Registration Requirements (p. 25).

The Applied Physics program offers students the opportunity to receive a PhD while focusing on areas of research outside of those covered by the traditional fundamental physics program. The interdisciplinary curriculum for this degree includes a core of foundation physics courses plus a selection of graduate courses in associated science and engineering fields relevant to a particular student’s area of research specialization.

PHYS 601, PHYS 603, PHYS 606, PHYS 607, PHYS 615, one graduate-level course in Classical or Quantum Physics (see graduate advisor for options) and four elective courses, chosen in consultation with the student's committee, with the exceptions of PHYS 666, undergraduate courses and PHYS 685 are required to complete the PhD in Applied Physics.

As part of the training of the graduate student pursuing the MS or PhD in physics, the Department of Physics recommends that all students serve as teaching assistants for at least two semesters.

**Program Requirements**

- Student's Advisory Committee (p. 1241)
- Degree Plan (p. 1241)
- Transfer of Credit (p. 1241)
- Research Proposal (p. 1242)
• Examinations (p. 1242)
• Preliminary Examination (p. 1242)
• Final Examination/Dissertation Defense (p. 1243)
• Dissertation (p. 1244)

Student’s Advisory Committee

After receiving admission to graduate studies and enrolling, the student will consult with the head of his or her major or administrative department (or chair of the intercollegiate faculty) concerning appointment of the chair of the advisory committee. The student’s advisory committee will consist of no fewer than four members of the graduate faculty representative of the student’s several fields of study and research, where the chair or co-chair must be from the student’s department (or intercollegiate faculty, if applicable), and at least one or more of the members must have an appointment to a department other than the student’s major department. The outside member for a student in an interdisciplinary degree program must be from a department different from the chair of the student’s committee.

The chair, in consultation with the student, will select the remainder of the advisory committee. Only graduate faculty members located on Texas A&M University campuses may serve as chair of a student’s advisory committee. Other Texas A&M University graduate faculty members located off-campus may serve as a member or co-chair (but not chair), with a member as the chair.

If the chair of a student’s advisory committee voluntarily leaves the University and the student is near completion of the degree and wants the chair to continue to serve in this role, the student is responsible for securing a current member of the University Graduate Faculty, from the student’s academic program and located near the Texas A&M University campus site, to serve as the co-chair of the committee. The Department Head or Chair of Intercollegiate faculty may request in writing to the Associate Provost for Graduate and Professional Studies that a faculty member who is on an approved leave of absence or has voluntarily separated from the university, be allowed to continue to serve in the role of chair of a student’s advisory committee without a co-chair for us to one year. The students should be near completion of the degree. Extensions beyond the one year period can be granted with additional approval of the Dean.

The committee members’ signatures on the degree plan indicate their willingness to accept the responsibility for guiding and directing the entire academic program of the student and for initiating all academic actions concerning the student. Although individual committee members may be replaced by petition for valid reasons, a committee cannot resign en masse. The chair of the committee, who usually has immediate supervision of the student’s research and dissertation or record of study, has the responsibility for calling all meetings of the committee. The duties of the committee include responsibility for the proposed degree plan, the research proposal, the preliminary examination, the dissertation or record of study and the final examination. In addition, the committee, as a group and as individual members, is responsible for counseling the student on academic matters, and, in the case of academic deficiency, initiating recommendations to the Office of Graduate and Professional Studies.

Degree Plan

The student’s advisory committee will evaluate the student’s previous education and degree objectives. The committee, in consultation with the student, will develop a proposed degree plan and outline a research problem which, when completed, as indicated by the dissertation (or its equivalent for the degree of Doctor of Education or the degree of Doctor of Engineering), will constitute the basic requirements for the degree. The degree plan must be filed with the Office of Graduate and Professional Studies prior to the deadline imposed by the student’s college and no later than 90 days prior to the preliminary examination.

This proposed degree plan should be submitted through the online Document Processing Submission System located on the website http://ogsdps.tamu.edu. A minimum of 64 hours is required on the degree plan for the Doctor of Philosophy for a student who has completed a master’s degree. A student who has completed a DDS/DMD, DVM or a MD at a U.S. institution is also required to complete a minimum of 64 hours. A student who has completed a baccalaureate degree but not a master’s degree will be required to complete a 96-hour degree plan. Completion of a DDS/DMD, DVM or MD degree at a foreign institution requires completion of a minimum of 96 hours for the Doctor of Philosophy. A field of study may be primarily in one department or in a combination of departments. A degree plan must carry a reasonable amount of 691 or 5V98/5V99 (research).

Additional coursework may be added by petition to the approved degree plan by the student’s advisory committee if it is deemed necessary to correct deficiencies in the student’s academic preparation. No changes can be made to the degree plan once the student’s Request for Final Examination is approved by the Office of Graduate and Professional Studies.

Approval to enroll in any professional course (900-level) should be obtained from the head of the department (or Chair of the intercollegiate faculty, if applicable) in which the course will be offered before including such a course on a degree plan.

No credit may be obtained by correspondence study, by extension or for any course of fewer than three weeks duration.

Transfer of Credit

Courses for which transfer credits are sought must have been completed with a grade of B or greater and must be approved by the student’s advisory committee and the Office of Graduate and Professional Studies. These courses must not have been used previously for another degree. Except for officially approved cooperative doctoral programs, credit for thesis or dissertation research or the equivalent is not transferable. Credit for “internship” coursework in any form is not transferable. Courses taken in residence at an accredited U.S. institution or approved international institution with a final grade of B or greater will be considered for transfer credit if, at the time the courses were completed, the courses would be accepted for credit toward a similar degree for a student in degree-seeking status at the host institution. Credit for coursework taken by extension is not transferable. Coursework in which no formal grades are given or in which grades other than letter grades (A or B) are earned (for example, CR, P, S, U, H, etc.) is not accepted for transfer credit. Credit for coursework submitted for transfer from any college or university must be shown in semester credit hours, or equated to semester credit hours.

Courses used toward a degree at another institution may not be applied for graduate credit. If the course to be transferred was taken prior to the conferral of a degree at the transfer institution, a letter from the registrar at that institution stating that the course was not applied for credit toward the degree must be submitted to the Office of Graduate and Professional Studies.
Grades for courses completed at other institutions are not included in computing the GPR. An official transcript from the university at which transfer courses are taken must be sent directly to the Office of Admissions.

Research Proposal

The general field of research to be used for the dissertation should be agreed on by the student and the advisory committee at their first meeting, as a basis for selecting the proper courses to support the proposed research.

As soon thereafter as the research project can be outlined in reasonable detail, the dissertation research proposal should be completed. The research proposal should be approved at a meeting of the student’s advisory committee, at which time the feasibility of the proposed research and the adequacy of available facilities should be reviewed. The approved proposal, signed by all members of the student’s advisory committee, the head of the student’s major department (or chair of the intercollegiate faculty, if applicable), must be submitted to the Office of Graduate and Professional Studies at least 20 working days prior to the submission of the Request for the Final Examination.

Compliance issues must be addressed if a graduate student is performing research involving human subjects, animals, infectious biohazards and recombinant DNA. A student involved in these types of research should check with the Office of Research Compliance and Biosafety at (979) 458-1467 to address questions about all research compliance responsibilities. Additional information can also be obtained on the website http://rcb.tamu.edu.

Examinations

Preliminary Examination

The student’s major department (or chair of the intercollegiate faculty, if applicable) and his or her advisory committee may require qualifying, cumulative or other types of examinations at any time deemed desirable. These examinations are entirely at the discretion of the department and the student’s advisory committee.

The preliminary examination is required. The preliminary examination for a doctoral student shall be given no earlier than a date at which the student is within 6 credit hours of completion of the formal coursework on the degree plan (i.e., all coursework on the degree plan except 681, 684, 690, 691, 5V98, 5V99 and 692 courses). The student is strongly encouraged to complete the Preliminary Examination no later than the end of the semester following the completion of the formal coursework on the degree plan. The Office of Graduate and Professional Studies must receive the results of the preliminary examination at least 14 weeks prior to the final examination date. The examination shall be oral and written unless otherwise recommended by the student’s advisory committee and approved by the Office of Graduate and Professional Studies. The written part of the examination will cover all fields of study included in the student’s degree plan. Each member of the advisory committee is responsible for administering a written examination in his or her particular field, unless he or she chooses to waive participation in this part of the examination. Two or more members of the advisory committee may give a joint written examination. One or more members may require a student to take a departmental or intercollegiate faculty examination to supplement or replace a written examination. Each written examination must be completed and reported as satisfactory to the chair of the advisory committee before the oral portion of the examination may be held. In case any written examination is reported unsatisfactory, the entire advisory committee must agree (1) to proceed with the oral portion of the preliminary examination, or (2) to adopt another course of action regarding the unsatisfactory written examination.

Prior to scheduling the preliminary examination with the other committee members, the committee chair will review the eligibility criteria with the student, using the Preliminary Examination Checklist to ensure the student is ready for the examination. The following list of eligibility requirements applies.

• Student is registered at Texas A&M University for the semester or summer term during which any portion of the preliminary examination may fall. If the entire examination falls between semesters, then the student must be registered for the term immediately preceding the examination.
• An approved degree plan was on file with the Office of Graduate and Professional Studies at least 90 days prior to the first written examination.
• Student’s cumulative GPR is at least 3.000.
• Student’s degree plan GPR is at least 3.000.
• All English language proficiency requirements have been satisfied.
• All committee members have scheduled or waived the written portion and agreed to attend the oral portion of the examination or have found a substitute. Only one substitution is allowed and it cannot be for the committee chair.
• At the end of the semester in which the exam is given, there are no more than 6 hours of coursework remaining on the degree plan (except 681, 684, 690, 691, 5V98, 5V99 and 692). The head of the student’s department (or Chair of the Intercollegiate Faculty, if applicable) has the authority to approve a waiver of this criterion.
• The time span from the first written examination to the oral is no more than three weeks. (In cases of department-wide written examinations, this criterion is not applicable.) The head of the student’s department (or chair of the intercollegiate faculty, if applicable) has the authority to approve a waiver of this criterion.

Once all requirements are met, departments or intercollegiate faculty may announce the schedule of the written and oral parts of the examination.

Credit for the preliminary examination is not transferable. If a departmental or intercollegiate faculty examination is used as part of the written portion of the preliminary examination, it must be the last examination offered prior to the date scheduled for the preliminary examination. In the schedule of the written portion, all members of the student’s advisory committee are to be included.

Through the preliminary examination, the student’s advisory committee should satisfy itself that the student has demonstrated the following qualifications:

1. a mastery of the subject matter of all fields in the program;
2. an adequate knowledge of the literature in these fields and an ability to carry out bibliographical research.

In case a student is required to take, as a part of the written portion of a preliminary examination, an examination administered by a department or intercollegiate faculty, the department or intercollegiate faculty must:

1. offer the examination at least once every six months. The departmental or interdisciplinary degree program examination should be announced at least 30 days prior to the scheduled examination date.
2. assume the responsibility for marking the examination satisfactory or unsatisfactory, or otherwise graded, and in the case of unsatisfactory, stating specifically the reasons for such a mark.

3. forward the marked examination to the chair of the student's advisory committee within one week after the examination.

The chair of the student’s advisory committee is responsible for making all written examinations available to the members of the advisory committee at or before the oral portion of the preliminary examination. A positive vote by all members of the graduate committee with at most one dissent is required to pass a student on his or her preliminary exam. A department or intercollegiate faculty can have a stricter requirement provided there is consistency within all degree programs within a department or an interdisciplinary degree program.

The chair of the advisory committee will promptly report the results of the Preliminary Examination to the Office of Graduate and Professional Studies, using the Report of Doctoral Preliminary Examination form and the Preliminary Examination checklist. Both forms must have the appropriate signatures. These forms should be submitted to the Office of Graduate and Professional Studies within 10 working days of the scheduled preliminary examination.

The Report of the Preliminary Examination form must be submitted with original signatures of the approved committee members. If an approved committee member substitution (1 only) has been made, his/her signature must also be included on the form submitted to the Office of Graduate and Professional Studies. The original signature of the department head is also required on the form.

After passing the required oral and written preliminary examinations for the doctoral degree, the student must complete the final examination for the degree within four calendar years. Otherwise, the student will be required to repeat the preliminary examination. Upon approval of the student’s advisory committee, with no more than one member dissenting, and approval of the Office of Graduate and Professional Studies, a student who has failed the preliminary examination may be given one re-examination. Adequate time must be given to permit the student to address the inadequacies emerging from the first examination (normally six months). The student and the advisory committee should jointly negotiate a mutually acceptable date for this purpose.

A student must be registered at Texas A&M University for a minimum of one semester credit hour in the semester or summer term in which they will take any portion of the Preliminary Examination.

Steps for Completing the Preliminary Examination

Final Examination/Dissertation Defense

The candidate for the doctoral degree must pass a final examination by deadline dates announced in the “Office of Graduate and Professional Studies Calendar” each semester or summer term. The doctoral student is allowed only one opportunity to take the final examination. No student may be given a final examination unless his or her current official cumulative and degree plan GPAs are 3.000 or better and he or she has been admitted to candidacy. No unabsolved grades of D, F, or U for any course can be listed on the degree plan. To absolve a deficient grade, a student must repeat the course and achieve a grade of C or better. A student must have completed all coursework on his or her
degree plan with the exception of 691, 5V98, or 5V99 (research) or 692 (Professional Study) hours. The student must be registered for all remaining hours; no hours remain to be taken on the degree plan. The preliminary examination results must have been submitted to the Office of Graduate and Professional Studies 14 weeks prior to the date of the defense. The research proposal must have been submitted to the Office of Graduate and Professional Studies 25 working days prior to the date of the final examination/defense. Any changes to the degree plan must be approved by the Office of Graduate and Professional Studies prior to the approval of the final examination. The request to hold and announce the final examination must be submitted to the Office of Graduate and Professional Studies a minimum of 10 working days in advance of the scheduled date. Examination/Defense results must be submitted to the Office of Graduate and Professional Studies within 10 working days of the scheduled examination/defense date. The Office of Graduate and Professional Studies must be notified in writing of any cancellations.

The student’s advisory committee will conduct this examination. The final examination is not to be administered until the dissertation or record of study is available in substantially final form to the student’s advisory committee, and all concerned have had adequate time to review the document. Additionally, all English Language Proficiency requirements must be satisfied prior to scheduling the examination. Whereas the final examination may cover the broad field of the candidate’s training, it is presumed that the major portion of the time will be devoted to the dissertation and closely allied topics. Persons other than members of the graduate faculty may, with mutual consent of the candidate and the chair of the advisory committee, be invited to attend a final examination for an advanced degree. A positive vote by all members of the graduate committee with at most one dissension is required to pass a student on his or her exam. A department can have a stricter requirement provided there is consistency within all degree programs within a department. Upon completion of the questioning of the candidate, all visitors must excuse themselves from the proceedings.

The advisory committee will submit its recommendations on the appropriate Report of the Final Examination for Doctoral Candidates form to the Office of Graduate and Professional Studies regarding acceptability of the candidate for the doctoral degree. A student must be registered in the University in the semester or summer term in which the final examination is taken.

The Report of the Final Examination Form must be submitted with original signatures of only the committee members approved by the Office of Graduate and Professional Studies. If an approved committee member substitution (1 only) has been made, his/her signature must be included on the form submitted to the Office of Graduate and Professional Studies.

Additional Requirements

Dissertation

The ability to perform independent research must be demonstrated by the dissertation, which must be the original work of the candidate. Whereas acceptance of the dissertation is based primarily on its scholarly merit, it must also exhibit creditable literary workmanship. The format of the dissertation must be acceptable to the Office of Graduate and Professional Studies. Guidelines for the preparation of the thesis are available in the Thesis Manual, which is available online at http://ogaps.tamu.edu.

After successful defense and approval by the student’s advisory committee and the head of the student’s major department (or chair of the intercollegiate faculty, if applicable), a student must submit his/her dissertation in electronic format as a single PDF file. The PDF file must be uploaded to the website, http://ogaps.tamu.edu. Additionally, a signed approval form must be brought or mailed to the Office of Graduate and Professional Studies. Both the PDF file and the signed approval form are required by the deadline.

Deadline dates for submitting are announced each semester or summer term in the Office of Graduate and Professional Studies Calendar (see Time Limit statement). These dates also can be accessed via the website http://ogaps.tamu.edu.

Before a student can be “cleared” by Thesis and Dissertation Services, a processing fee must be paid through Student Business Services. This processing fee is for the thesis/dissertation services provided. After commencement, dissertations are digitally stored and made available through the Texas A&M Libraries.

A dissertation that is deemed unacceptable by the Office of Graduate and Professional Studies because of excessive corrections will be returned to the student’s department head or chair of the intercollegiate faculty. The manuscript must be resubmitted as a new document, and the entire review process must begin anew. All original submittal deadlines must be met during the resubmittal process in order to graduate.

Additional Requirements

Additional Requirements

- Residence (p. 1244)
- Time Limit (p. 1245)
- Continuous Registration (p. 1245)
- Admission to Candidacy (p. 1245)
- Languages (p. 1245)
- 99-Hour Cap on Doctoral Degree (p. 1245)
- Application for Degree (p. 1245)

Residence

A student who enters the doctoral degree program with a baccalaureate degree must spend one academic year plus one semester in resident study at Texas A&M University. A student who holds master’s degree when he/she enters doctoral degree program must spend one academic year in resident study. One academic year may include two adjacent regular semesters or one regular semester and one adjacent 10-week summer semester. The third semester is not required to be adjacent to the one year. Enrollment for each semester must be a minimum of 9 credit hours each to satisfy the residence requirement.

To satisfy the residence requirement, the student must complete a minimum of 9 credit hours per semester or 10-week summer semester in resident study at Texas A&M University for the required period. A student who enters a doctoral degree program with a baccalaureate degree may fulfill residence requirements in excess of one academic year (18 credit hours) by registration during summer sessions or by completion of a less-than-full course load (in this context a full course load is considered 9 credit hours per semester).

Students who are employed full-time while completing their degree may fulfill total residence requirements by completion of less-than-full time course loads each semester. In order to be considered for this, the student is required to submit a Petition for Waivers and Exceptions along with verification of his/her employment to the Office of Graduate and Professional Studies. An employee should submit verification of his/her
employment at the time he/she submits the degree plan. See Registration. (p. 25)

See Residence Requirements (p. 22).

Time Limit
All requirements for doctoral degrees must be completed within a period of ten consecutive calendar years for the degree to be granted. A course will be considered valid until 10 years after the end of the semester in which it is taken. Graduate credit for coursework more than ten calendar years old at the time of the final oral examination may not be used to satisfy degree requirements.

After passing the required preliminary oral and written examinations for a doctoral degree, the student must complete the final examination within four calendar years. Otherwise, the student will be required to repeat the preliminary examination.

A final corrected version of the dissertation or record of study in electronic format as a single PDF file must be cleared by the Office of Graduate and Professional Studies no later than one year after the final examination or within the 10-year time limit, whichever occurs first. Failure to do so will result in the degree not being awarded.

Continuous Registration
A student in a program leading to a Doctor of Philosophy who has completed all coursework on his/her degree plan other than 691, 5V98 or 5V99 (research) are required to be in continuous registration until all requirements for the degree have been completed. See Continuous Registration Requirements (p. 25).

Admission to Candidacy
To be admitted to candidacy for a doctoral degree, a student must have:

1. completed all formal coursework on the degree plan with the exception of any remaining 681, 684, 690 and 691, or 5V98 and 5V99,
2. a 3.0 Graduate GPA and a Degree Plan GPA of at least 3.0 with no grade lower than C in any course on the degree plan,
3. passed the preliminary examination (written and oral portions),
4. submitted an approved dissertation proposal,
5. met the residence requirements. The final examination will not be authorized for any doctoral student who has not been admitted to candidacy.

Languages
A student is required to possess a competent command of English. For English language proficiency requirements, see the Admissions section of this catalog. The doctoral (PhD) foreign language requirement at Texas A&M University is a departmental option, to be administered and monitored by the individual departments of academic instruction.

99-Hour Cap on Doctoral Degrees
In Texas, public colleges and universities are funded by the state according to the number of students enrolled. In accordance with legislation passed by the Texas Legislature, the number of hours for which state universities may receive subvention funding at the doctoral rate for any individual is limited to 99 hours. Texas A&M University and other universities will not receive subvention for hours in excess of the limit.

Institutions of higher education are allowed to charge the equivalent of nonresident tuition to a resident doctoral student who has enrolled in 100 or more semester credit hours of doctoral coursework.

A doctoral student at Texas A&M has seven years to complete his/her degree before being charged out-of-state tuition. A doctoral student who, after seven years of study, has accumulated 100 or more doctoral hours will be charged tuition at a rate equivalent to out-of-state tuition. Please note that the tuition increases will apply to Texas residents as well as students from other states and countries who currently are charged tuition at the resident rate. This includes those doctoral students who hold GAT, GANT, and GAR appointments of 20 or more hours and recipients of competitive fellowships who receive more than $1,000 per semester. Doctoral students who, after seven years of study, have not accumulated 100 hours are eligible to pay in-state tuition if otherwise eligible.

For count purposes, a year is counted as three semesters, normally fall, spring and summer. Using this system, a student is allowed 21 semesters as a G8 student to complete the doctoral degree before being penalized with the higher tuition rate. Any semester in which a G8 student is enrolled for a doctoral level course is counted.

The following majors are exempt from the 99-Hour Cap on Doctoral Degrees:

- Biomedical Sciences
- Biochemistry
- Microbiology
- Genetics
- Toxicology
- Nutrition Sciences
- Community Clinical Psychology
- Counseling Psychology
- School Psychology
- Veterinary Pathology
- Clinical Psychology
- Counseling Psychology
- Medical Sciences
- Health Services Research
- Health Promotion and Community Health Sciences
- Epidemiology and Environmental Health

The hour limit for these majors is 130 doctoral hours.

Application for Degree
For information on applying for your degree, please visit the Graduation (p. 24) section.

Master of Science in Physics
The Master of Science (MS) curriculum is designed to develop new understanding through research and creativity. Students have the option to pursue a thesis or non-thesis Master of Science degree.
Steps to Fulfill Master’s Degree Requirements

1. Meet with departmental graduate advisor to plan course of study for first semester.  
   **When:** Before first semester registration.  
   **Approved by:** Graduate advisor or chair of the intercollegiate faculty.

2. Establish advisory committee. Submit a degree plan.  
   **When:** Prior to the deadline imposed by the student's college and no later than 90 days prior to final oral or thesis defense.  
   **Approved by:** Advisory committee, department head or chair of the intercollegiate faculty, and Office of Graduate and Professional Studies (OGAPS).

3. If thesis is required, submit thesis proposal to the Office of Graduate and Professional Studies.  
   **When:** At least 20 working days prior to the submission of the Request for the Final Examination.  
   **Approved by:** Advisory committee, department head or chair of the intercollegiate faculty and OGAPS.

4. Apply for degree; pay graduation fee.  
   **When:** During the first week of the final semester, see OGAPS calendar.

5. Check to be sure degree program and advisory committee are up to date and all ELP requirements (if applicable) and coursework are complete.  
   **When:** Well before submitting request to schedule final examination.

6. Complete residence requirement.  
   **When:** If applicable, before or during final semester.  
   **Approved by:** OGAPS.

7. Submit request to schedule final examination.  
   **When:** Must be received by OGAPS at least 10 working days before exam date. See OGAPS calendar for deadlines.  
   **Approved by:** Advisory committee, department head or chair of the intercollegiate faculty, and OGAPS.

8. Successfully complete final examination.  
   **When:** The Report of the Final Examination Form should be submitted to OGAPS within 10 days following the exam.  
   **Approved by:** Advisory committee and OGAPS.

9. If required, upload one approved final copy of thesis as a single PDF file (http://ogaps.tamu.edu) and submit signed approval form to the Office of Graduate and Professional Studies.  
   **When:** See OGAPS calendar for deadlines.  
   **Approved by:** Advisory committee, department head or chair of the intercollegiate faculty and OGAPS.

10. Graduation; arrange for cap and gown.  
    **For more information, visit http://graduation.tamu.edu.**

---

1. The online Document Processing Submission System is located on the website https://ogsdpss.tamu.edu.
2. Complete the application for degree form via the student’s Howdy portal.

PHYS 601, PHYS 603, PHYS 606, PHYS 607 and PHYS 615 and/or courses in mathematics and research in the field of the thesis will normally comprise the program of a candidate for the degree of Master of Science. A non-thesis option is also offered.

As part of the training of the graduate student pursuing the MS or PhD in physics, the Department of Physics recommends that all students serve as teaching assistants for at least two semesters.

Program Requirements

**Program Requirements**

- Student’s Advisory Committee (p. 1246)
- Degree Plan (p. 1247)
- Credit Requirements (p. 1247)
- Transfer of Credit (p. 1247)
- Limitations on the Use of Transfer, Extension and Certain Other Courses (p. 1248)
- Thesis Option (p. 1248)
  - Thesis Proposal (p. 1248)
  - Final Examination (p. 1248)
- Non-Thesis Option (p. 1249)

Student’s Advisory Committee

After receiving admission to graduate studies and enrolling for coursework, the student will consult with the head of his or her major or administrative department (or intercollegiate faculty, if applicable) concerning appointment of the chair of his or her advisory committee. With the exception of the Mays Business School non-thesis option, the Master of Science in Economics with a concentration in financial economics or financial econometrics, the Master of Science with a major in Educational Human Resource Development, HRD option, and the Master of Science in Nursing with a major in Nursing Education, the student’s advisory
committee for the master’s degree will consist of no fewer than three members of the graduate faculty, representative of the student’s fields of study and research. The chair or the co-chair of the advisory committee must be from the student’s major department (or intercollegiate faculty, if applicable), and at least one or more of the members must have an appointment to a department other than the student’s major department. The outside member for students in an interdisciplinary program must have an appointment to a department different from the chair of the student’s committee.

The chair, in consultation with the student, will select the remainder of the advisory committee. The student will interview each prospective committee member to determine whether he or she is willing to serve. Only graduate faculty members located on Texas A&M University campuses may serve as chair of a student’s advisory committee. Other graduate faculty members located off campus may serve as a member or co-chair (but not chair) with a member as the chair. The chair of the committee, who usually has immediate supervision of the student’s research and thesis, has the responsibility for calling required meetings of the committee and for calling meetings at any other time considered desirable.

If the chair of a student’s advisory committee voluntarily leaves the University and the student is near completion of the degree and wants the chair to continue to serve in this role, the student is responsible for securing a current member of the University Graduate Faculty, from the student’s academic program and located near the Texas A&M University campus site, to serve as the co-chair of the committee. The Department Head or Chair of Intercollegiate faculty may request in writing to the Associate Provost for Graduate and Professional Studies that a faculty member who is on an approved leave of absence or has voluntarily separated from the university, be allowed to continue to serve in the role of chair of a student’s advisory committee without a co-chair for us to one year. The students should be near completion of the degree. Extensions beyond the one year period can be granted with additional approval of the Dean.

If the chair of the student’s advisory committee is unavailable for an extended time in any academic period during which the student is involved in activities relating to an internship, thesis or professional paper, and is registered for courses such as 5V98, 5V99, 684, 691, 692 or 693, the student may request, in writing, that the department head appoint an alternate advisory committee chair during the interim period.

The duties of the committee include responsibility for the proposed degree plan, the research proposal, the thesis and the final examination. In addition, the committee as a group and as individual members are responsible for advising the student on academic matters, and, in the case of academic deficiency, initiating recommendations to the Office of Graduate and Professional Studies.

The committee members’ approval on the degree plan indicate their willingness to accept the responsibility for guiding and directing the entire academic program of the student and for initiating all academic actions concerning the student. Although individual committee members may be replaced by petition for valid reasons, a committee cannot resign en masse.

Degree Plan

The student’s advisory committee, in consultation with the student, will develop the proposed degree plan. The degree plan must be completed and filed with the Office of Graduate and Professional Studies prior to the deadline imposed by the student’s college or interdisciplinary degree program, if applicable, and no later than 90 days prior to the date of the final oral examination or thesis defense.

A student should submit the degree plan using the online Document Processing Submission System (http://ogsdpss.tamu.edu).

A student submitting a proposed degree plan for a Master of Science degree should designate on the official degree plan the appropriate program option.

Additional coursework may be added to the approved degree plan by petition if it is deemed necessary by the advisory committee to correct deficiencies in the student’s academic preparation. No changes can be made to the degree plan once the student’s Request for Final Examination or Request for Final Examination Exemption is approved by the Office of Graduate and Professional Studies.

Credit Requirement

A minimum of 32 semester credit hours of approved courses and research is required for the thesis option Master of Science degree with the exception of the Master of Science in Visualization, which requires 48 hours and Master of Science in Athletic Training, which requires 60 hours. A minimum of 36 semester credit hours of approved coursework is required for the Non-Thesis Option.

Ordinarily the student will devote the major portion of his or her time to work in one or two closely related fields. Other work will be in supporting fields of interest.

Transfer of Credit

A student who has earned 12 hours of graduate credit in residence at Texas A&M University may be authorized to transfer courses in excess of the limits prescribed below upon the advice of the advisory committee and with the approval of the Office of Graduate and Professional Studies. Courses taken in residence at an accredited U.S. institution or approved international institution with a final grade of B or greater may be considered for transfer credit if, at the time the courses were completed, the courses would be accepted for credit toward a similar degree for a student in degree-seeking status at the host institution. Otherwise, the limitations stated in the following section apply. Coursework in which no formal grades are given or in which grades other than letter grades (A or B) are earned (for example, CR, P, S, U, H, etc.) is not accepted for transfer credit. Courses appearing on the degree plan with grades of D, F or U may not be assigned by transfer work. Credit for thesis research or the equivalent is not transferable. Credit for coursework submitted for transfer from any college or university must be shown in semester credit hours or equated to semester credit hours. An official transcript from the university at which the transfer coursework was taken must be sent directly to the Office of Admissions.

Courses used toward a degree at another institution may not be applied for graduate credit. If the course to be transferred was taken prior to the conferral of a degree at the transfer institution, a letter from the registrar at that institution stating that the course was not applied for credit toward the degree must be submitted to the Office of Graduate and Professional Studies.

Grades for courses completed at other institutions are not included in computing the GPR.
Limitations on the Use of Transfer, Extension and Certain Other Courses

Some departments may have more restrictive requirements for transfer work. If otherwise acceptable, certain courses may be used toward meeting credit-hour requirements for the master’s degree under the following limitations.

1. The maximum number of credit hours which may be considered for transfer credit is the greater of 12 hours or one-third (1/3) of the total hours of a degree plan. The following restrictions apply:
   - Graduate and/or upper-level undergraduate courses taken in residence at an accredited U.S. institution, or approved international institution with a final grade of B or greater will be considered for transfer credit if, at the time the courses were completed, the student was in degree-seeking status at Texas A&M University, or the student was in degree-seeking status at the institution at which the courses were taken; and if the courses would be accepted for credit toward a similar degree for a student in degree-seeking status at the host institution.
   - Courses previously used for another degree are not acceptable for degree plan credit.

2. The maximum number of credit hours taken in post-baccalaureate non-degree (G6) classification at Texas A&M University which may be considered for application to the degree plan is 12.

3. Not more than 12 hours may be used in any combination of the following categories:
   - Not more than 8 hours in the combination of 5V98, 5V99, and 691 (research) or 684 (Professional Internship) may be used.
   - Not more than 8 hours of 685 (Directed Studies) may be used.
   - Not more than 3 hours of 690 (Theory of Research) may be used.
   - Not more than 3 hours of 695 (Frontiers in Research) may be used.

4. A maximum of 2 hours of Seminar (681).

5. A maximum of 9 hours of advanced undergraduate courses (300- or 400-level).

6. For graduate courses of three weeks’ duration or less, taken at other institutions, up to 1 hour of credit may be obtained for each five-day week of coursework. Each week of coursework must include at least 15 contact hours.

7. Continuing education courses may not be used for graduate credit.

8. Extension courses are not acceptable for credit.

9. For the Degree of Master of Science in Medical Science, students with a first professional degree (MD, DDS or DVM) may take up to 20 hours of 691 (research). For the remaining hours, a maximum of 2 hours can be Seminar (681) and a maximum of 3 hours can be Directed Studies (685).

Exceptions will be permitted only in unusual cases and when petitioned by the student’s advisory committee and approved by the Office of Graduate and Professional Studies.

Thesis Option

An acceptable thesis is required for the Master of Science degree for a student who selects the thesis option program. The finished work must reflect a comprehensive understanding of the pertinent literature and express in clear English, the problem(s) for study, the method, significance and results of the student’s original research. Guidelines for the preparation of the thesis are available in the Thesis Manual, which is available online at the Office of Graduate and Professional Studies website.

After successful defense (or exemption) and approval by the student’s advisory committee and the head of the student’s major department (or chair of the intercollegiate faculty, if applicable), the student must submit his/her thesis in electronic format as a single PDF file. The PDF file must be uploaded to the Office of Graduate and Professional Studies website. Additionally, a signed approval form must be brought or mailed to the Office of Graduate and Professional Studies. The PDF file and the signed approval form are required by the deadline.

Deadline dates for submitting the thesis are announced each semester or summer term in the “Office of Graduate and Professional Studies Calendar” (see Time Limit statement). These dates also can be accessed via the Office of Graduate and Professional Studies website.

Before a student can be “cleared” by Thesis and Dissertation Services, a processing fee must be paid through Student Business Services. This processing fee is for the thesis/dissertation services provided. After commencement, dissertations are digitally stored and made available through the Texas A&M Libraries.

A thesis that is deemed unacceptable by the Office of Graduate and Professional Studies because of excessive corrections will be returned to the student’s department head (or chair of the intercollegiate faculty, if applicable). The manuscript must be resubmitted as a new document, and the entire review process must begin again. All original submittal deadlines must be met during the resubmittal process to graduate that semester.

Thesis Proposal

For the thesis option Master of Science degree, the student must prepare a thesis proposal for approval by the advisory committee and the head of the major department or chair of the interdisciplinary faculty, if applicable. This proposal must be submitted to the Office of Graduate and Professional Studies at least 20 working days prior to the submission of the request for the final examination.

Compliance issues must be addressed if a graduate student is performing research involving human subjects, animals, infectious biohazards and recombinant DNA. A student involved in these types of research should check with the Office of Research Compliance and Biosafety at (979) 458-1467 to address questions about all research compliance responsibilities. Additional information can also be obtained on the Office of Research Compliance and Biosafety website.

Thesis Defense/Final Examination

A student must pass a final examination by dates announced each semester or summer term in the Office of Graduate and Professional Studies Calendar. The Office of Graduate and Professional Studies must be notified in writing of any cancellation. To be eligible to take the final examination, a student’s GPR must be at least 3.00 for courses on the degree plan and for all courses completed at Texas A&M which are eligible to be applied to a graduate degree, and there must be no unsolved grades of D, F or U for any course listed on the degree plan. To absolve a deficient grade, the student must repeat the course at Texas A&M University and achieve a grade of C or better. All coursework on the degree plan must have been completed with the exception of those hours for which the student is registered. Additionally, all English Language Proficiency requirements must be satisfied prior to scheduling the examination. If applicable, an approved
thesis proposal must be on file in the Office of Graduate and Professional Studies according to published deadlines.

A request to hold and announce the final examination must be submitted to the Office of Graduate and Professional Studies a minimum of 10 working days in advance of the scheduled date for the examination. Examinations which are not completed and reported as satisfactory to the Office of Graduate and Professional Studies within 10 working days of the scheduled examination date will be recorded as failures. A student may be given only one opportunity to repeat the final examination for the master's degree and that must be within a time period that does not extend beyond the end of the next regular semester (summer terms are excluded).

For thesis option students, the final examination covers the thesis and all work taken on the degree plan and at the option of the committee may be written or oral or both. The final examination may not be administered before the thesis is available to all members of the student’s advisory committee in substantially final form, and all members have had adequate time to review the document. The examination is conducted by the student’s advisory committee as finally constituted. A thesis option student must be registered in the University in the semester or summer term in which the final examination is taken. Persons other than members of the graduate faculty may, with mutual consent of the candidate and the major professor, attend final examinations for advanced degrees. Upon completion of the questioning of the candidate, all visitors must excuse themselves from the proceedings. A positive vote by all members of the graduate committee with at most one dissension is required to pass a student on his or her exam. A department, or interdisciplinary degree program, may have a stricter requirement provided there is consistency within all degree programs within a department or interdisciplinary degree program.

A thesis option candidate may petition to be exempt from his/her final examination provided his/her degree plan GPR is 3.500 or greater and he/she has the approval of the advisory committee, the head of the student’s major department, or intercollegiate chair, if appropriate, and the Office of Graduate and Professional Studies. It is required that the petition for exemption be submitted the same semester the student intends to submit the thesis.

For non-thesis option students, a final comprehensive examination is required. The Master of Science in Educational Human Resource Development, HRD option, the Master of Science in Nursing with a major in Nursing Education, the Master of Science in Economics with a concentration in financial economics or financial econometrics, the Master of Science with a major in Educational Human Resource Development, HRD option, and the Master of Science in Nursing with a major in Nursing Education. No exemptions are allowed. The requirements as to level of courses and examinations are the same as for the thesis option Master of Science degree. The final examination cannot be held prior to the mid point of the final semester if questions on the examination are based on courses in which the student is currently enrolled.

A student pursuing the non-thesis option is not allowed to enroll in 5V98, 5V99, or 691 (research) for any reason and 691 may not be used for credit toward a non-thesis option Master of Science degree. A maximum of 4 credit hours of 684 (Professional Internship), 8 credit hours of 685 (Directed Studies), and up to 3 credit hours of 690 (Theory of Research) or 695 (Frontiers in Research) may be used toward the non-thesis option Master of Science degree. In addition, any combination of 684, 685, 690 and 695 may not exceed 25 percent of the total credit hour requirement shown on the individual degree plan. All requirements for the non-thesis option Master of Science degree other than those specified above are the same as for the thesis option degree.

### Additional Requirements

#### Additional Requirements

- Residence (p. 1249)
- Continuous Registration (p. 1249)
- Time Limit (p. 1250)
- Foreign Languages (p. 1250)
- Application for Degree (p. 1250)

#### Residence

In partial fulfillment of the residence requirement for the degree of Master of Science, the student must complete 9 resident credit hours during one regular semester or one 10-week summer semester in resident study at Texas A&M University. Upon recommendation of the student’s advisory committee, department head or Chair of the Interdisciplinary Program, if appropriate, and with approval of the Office of Graduate and Professional Studies, a student may be granted exemption from this requirement. Such a petition, however, must be approved prior to the student’s registration for the final 9 credit hours of required coursework.

Students who are employed full-time while completing their degree may fulfill total residence requirements by completion of less-than-full time course loads each semester. In order to be considered for this, the student is required to submit a Petition for Waivers and Exceptions along with verification of his/her employment to the Office of Graduate and Professional Studies.

See Residence Requirements (p. 22).

#### Continuous Registration

A student in the thesis option of the Master of Science program who has completed all coursework on his/her degree plan other than 5V98, 5V99, and 691 (research) is required to be in continuous registration until
all requirements for the degree have been completed. See Continuous Registration Requirements (p. 25).

**Time Limit**

All degree requirements must be completed within a period of seven consecutive years for the degree to be granted. A course will be considered valid until seven years after the end of the semester in which it is taken. Graduate credit for coursework which is more than seven calendar years old at the time of the final examination (oral or written) may not be used to satisfy degree requirements.

A student who has chosen the thesis option must have the final corrected version of the thesis cleared by the Office of Graduate and Professional Studies no later than one year after the final examination, or approval of a petition for exemption from the final exam, or within the seven-year time limit, whichever occurs first. Failure to do so will result in the degree not being awarded.

**Foreign Languages**

No specific language requirement exists for the Master of Science degree.

**Application for Degree**

For information on applying for your degree, please visit the Graduation (p. 24) section.

**Doctor of Philosophy in Physics**

Work leading to the degree of Doctor of Philosophy (PhD) is designed to give the candidate a thorough and comprehensive knowledge of his or her professional field and training in methods of research. The final basis for granting the degree shall be the candidate's grasp of the subject matter of a broad field of study and a demonstrated ability to do independent research. In addition, the candidate must have acquired the ability to express thoughts clearly and forcefully in both oral and written languages. The degree is not granted solely for the completion of coursework, residence and technical requirements, although these must be met.

For a student who has completed a master's degree, a DDS/DMD, DVM or MD at a U.S. institution, a minimum of 64 hours is required on the degree plan for the degree of Doctor of Philosophy. For a student who has completed a baccalaureate degree but not a master's degree or a U.S. DDS/DMD, DVM or MD, a minimum of 96 hours is required on the degree plan for the degree of Doctor of Philosophy.

**Steps to Fulfill Doctoral Degree Requirements**

1. Meet with departmental/intercollegiate graduate advisor to plan course of study for first semester. **When:** Before first semester registration. **Approved by:** Graduate advisor.

2. Establish advisory committee. Submit a degree plan. **When:** Prior to the deadline imposed by the student's college or intercollegiate programs, and no later than 90 days prior to preliminary examination. **Approved by:** Advisory committee, department head or intercollegiate faculty chair, and Office of Graduate and Professional Studies (OGAPS).

3. Complete English Language Proficiency requirements (if applicable), and coursework detailed on degree plan. **When:** Before preliminary examination.

4. Complete the preliminary examination. **When:** See steps for completing the preliminary examination. The preliminary examination results must have been submitted to OGAPS 14 weeks prior to the date of the defense. **Approved by:** Advisory committee, department head or chair of the intercollegiate faculty, and OGAPS.

5. Submit proposal for dissertation or record of study to the Office of Graduate and Professional Studies. **When:** No later than 20 working days prior to the submission of the Request for the Final Examination. **Approved by:** Advisory committee, department head or intercollegiate faculty chair, and OGAPS.

6. Complete residence requirement. **When:** Before submitting request to schedule final oral examination. **Approved by:** OGAPS

7. Apply for degree; pay graduate fee. **When:** During the first week of the final semester; see OGAPS calendar for deadlines.
### Program Requirements

**Program Requirements**

- Student’s Advisory Committee (p. 1251)
- Degree Plan (p. 1251)
- Transfer of Credit (p. 1252)
- Research Proposal (p. 1252)
- Examinations (p. 1252)
  - Preliminary Examination (p. 1252)
  - Final Examination/Dissertation Defense (p. 1254)
- Dissertation (p. 1254)

### Student’s Advisory Committee

After receiving admission to graduate studies and enrolling, the student will consult with the head of his or her major or administrative department (or chair of the intercollegiate faculty) concerning appointment of the chair of the advisory committee. The student’s advisory committee will consist of no fewer than four members of the graduate faculty representative of the student’s several fields of study and research, where the chair or co-chair must be from the student’s department (or intercollegiate faculty, if applicable), and at least one or more of the members must have an appointment to a department other than the student’s major department. The outside member for a student in an interdisciplinary degree program must be from a department different from the chair of the student’s committee.

The chair, in consultation with the student, will select the remainder of the advisory committee. Only graduate faculty members located on Texas A&M University campuses may serve as chair of a student’s advisory committee. Other Texas A&M University graduate faculty members located off-campus may serve as a member or co-chair (but not chair), with a member as the chair.

If the chair of a student’s advisory committee voluntarily leaves the University and the student is near completion of the degree and wants the chair to continue to serve in this role, the student is responsible for securing a current member of the University Graduate Faculty, from the student’s academic program and located near the Texas A&M University campus site, to serve as the co-chair of the committee. The Department Head or Chair of Intercollegiate faculty may request in writing to the Associate Provost for Graduate and Professional Studies that a faculty member who is on an approved leave of absence or has voluntarily separated from the university, be allowed to continue to serve in the role of chair of a student’s advisory committee without a co-chair for us to one year. The students should be near completion of the degree. Extensions beyond the one year period can be granted with additional approval of the Dean.

The committee members’ signatures on the degree plan indicate their willingness to accept the responsibility for guiding and directing the entire academic program of the student and for initiating all academic actions concerning the student. Although individual committee members may be replaced by petition for valid reasons, a committee cannot resign en masse. The chair of the committee, who usually has immediate supervision of the student’s research and dissertation or record of study, has the responsibility for calling all meetings of the committee. The duties of the committee include responsibility for the proposed degree plan, the research proposal, the preliminary examination, the dissertation or record of study and the final examination. In addition, the committee, as a group and as individual members, is responsible for counseling the student on academic matters, and, in the case of academic deficiency, initiating recommendations to the Office of Graduate and Professional Studies.

### Degree Plan

The student’s advisory committee will evaluate the student’s previous education and degree objectives. The committee, in consultation with the student, will develop a proposed degree plan and outline a research problem which, when completed, as indicated by the dissertation (or its equivalent for the degree of Doctor of Education or the degree of Doctor of Engineering), will constitute the basic requirements for the degree. **The degree plan must be filed with the Office of Graduate**

**Student's Advisory Committee**

After receiving admission to graduate studies and enrolling, the student will consult with the head of his or her major or administrative department (or chair of the intercollegiate faculty) concerning appointment of the chair of the advisory committee. The student’s advisory committee will consist of no fewer than four members of the graduate faculty representative of the student’s several fields of study and research, where the chair or co-chair must be from the student’s department (or intercollegiate faculty, if applicable), and at least one or more of the members must have an appointment to a department other than the student’s major department. The outside member for a student in an interdisciplinary degree program must be from a department different from the chair of the student’s committee.

The chair, in consultation with the student, will select the remainder of the advisory committee. Only graduate faculty members located on Texas A&M University campuses may serve as chair of a student’s advisory committee. Other Texas A&M University graduate faculty members located off-campus may serve as a member or co-chair (but not chair), with a member as the chair.

If the chair of a student’s advisory committee voluntarily leaves the University and the student is near completion of the degree and wants the chair to continue to serve in this role, the student is responsible for securing a current member of the University Graduate Faculty, from the student’s academic program and located near the Texas A&M University campus site, to serve as the co-chair of the committee. The Department Head or Chair of Intercollegiate faculty may request in writing to the Associate Provost for Graduate and Professional Studies that a faculty member who is on an approved leave of absence or has voluntarily separated from the university, be allowed to continue to serve in the role of chair of a student’s advisory committee without a co-chair for us to one year. The students should be near completion of the degree. Extensions beyond the one year period can be granted with additional approval of the Dean.

The committee members’ signatures on the degree plan indicate their willingness to accept the responsibility for guiding and directing the entire academic program of the student and for initiating all academic actions concerning the student. Although individual committee members may be replaced by petition for valid reasons, a committee cannot resign en masse. The chair of the committee, who usually has immediate supervision of the student’s research and dissertation or record of study, has the responsibility for calling all meetings of the committee. The duties of the committee include responsibility for the proposed degree plan, the research proposal, the preliminary examination, the dissertation or record of study and the final examination. In addition, the committee, as a group and as individual members, is responsible for counseling the student on academic matters, and, in the case of academic deficiency, initiating recommendations to the Office of Graduate and Professional Studies.

**Degree Plan**

The student’s advisory committee will evaluate the student’s previous education and degree objectives. The committee, in consultation with the student, will develop a proposed degree plan and outline a research problem which, when completed, as indicated by the dissertation (or its equivalent for the degree of Doctor of Education or the degree of Doctor of Engineering), will constitute the basic requirements for the degree. **The degree plan must be filed with the Office of Graduate**
and Professional Studies prior to the deadline imposed by the student’s college and no later than 90 days prior to the preliminary examination.

This proposed degree plan should be submitted through the online Document Processing Submission System located on the website http://ogdpss.tamu.edu. A minimum of 64 hours is required on the degree plan for the Doctor of Philosophy for a student who has completed a master’s degree. A student who has completed a DDS/DMD, DVM or a MD at a U.S. institution is also required to complete a minimum of 64 hours. A student who has completed a baccalaureate degree but not a master’s degree will be required to complete a 96-hour degree plan. Completion of a DDS/DMD, DVM or MD degree at a foreign institution requires completion of a minimum of 96 hours for the Doctor of Philosophy. A field of study may be primarily in one department or in a combination of departments. A degree plan must carry a reasonable amount of 691 or 5V98/5V99 (research).

Additional coursework may be added by petition to the approved degree plan by the student’s advisory committee if it is deemed necessary to correct deficiencies in the student’s academic preparation. No changes can be made to the degree plan once the student’s Request for Final Examination is approved by the Office of Graduate and Professional Studies.

Approval to enroll in any professional course (900-level) should be obtained from the head of the department (or Chair of the intercollegiate faculty, if applicable) in which the course will be offered before including such a course on a degree plan.

No credit may be obtained by correspondence study, by extension or for any course of fewer than three weeks duration.

Transfer of Credit

Courses for which transfer credits are sought must have been completed with a grade of B or greater and must be approved by the student’s advisory committee and the Office of Graduate and Professional Studies. These courses must not have been used previously for another degree. Except for officially approved cooperative doctoral programs, credit for thesis or dissertation research or the equivalent is not transferable. Credit for “internship” coursework in any form is not transferable. Courses taken in residence at an accredited U.S. institution or approved international institution with a final grade of B or greater will be considered for transfer credit if, at the time the courses were completed, the courses would be accepted for credit toward a similar degree for a student in degree-seeking status at the host institution. Credit for coursework taken by extension is not transferable. Coursework in which no formal grades are given or in which grades other than letter grades (A or B) are earned (for example, CR, P, S, U, H, etc.) is not accepted for transfer credit. Credit for coursework submitted for transfer from any college or university must be shown in semester credit hours, or equated to semester credit hours.

Courses used toward a degree at another institution may not be applied for graduate credit. If the course to be transferred was taken prior to the conferral of a degree at the transfer institution, a letter from the registrar at that institution stating that the course was not applied for credit toward the degree must be submitted to the Office of Graduate and Professional Studies.

Grades for courses completed at other institutions are not included in computing the GPR. An official transcript from the university at which transfer courses are taken must be sent directly to the Office of Admissions.

Research Proposal

The general field of research to be used for the dissertation should be agreed on by the student and the advisory committee at their first meeting, as a basis for selecting the proper courses to support the proposed research.

As soon thereafter as the research project can be outlined in reasonable detail, the dissertation research proposal should be completed. The research proposal should be approved at a meeting of the student’s advisory committee, at which time the feasibility of the proposed research and the adequacy of available facilities should be reviewed. The approved proposal, signed by all members of the student’s advisory committee, the head of the student’s major department (or chair of the intercollegiate faculty, if applicable), must be submitted to the Office of Graduate and Professional Studies at least 20 working days prior to the submission of the Request for the Final Examination.

Compliance issues must be addressed if a graduate student is performing research involving human subjects, animals, infectious biohazards and recombinant DNA. A student involved in theses types of research should check with the Office of Research Compliance and Biosafety at (979) 458-1467 to address questions about all research compliance responsibilities. Additional information can also be obtained on the website http://rcb.tamu.edu.

Examinations

Preliminary Examination

The student’s major department (or chair of the intercollegiate faculty, if applicable) and his or her advisory committee may require qualifying, cumulative or other types of examinations at any time deemed desirable. These examinations are entirely at the discretion of the department and the student’s advisory committee.

The preliminary examination is required. The preliminary examination for a doctoral student shall be given no earlier than a date at which the student is within 6 credit hours of completion of the formal coursework on the degree plan (i.e., all coursework on the degree plan except 681, 684, 690, 691, 5V98, 5V99 and 692 courses). The student is strongly encouraged to complete the Preliminary Examination no later than the end of the semester following the completion of the formal coursework on the degree plan. The Office of Graduate and Professional Studies must receive the results of the preliminary examination at least 14 weeks prior to the final examination date. The examination shall be oral and written unless otherwise recommended by the student’s advisory committee and approved by the Office of Graduate and Professional Studies. The written part of the examination will cover all fields of study included in the student’s degree plan. Each member of the advisory committee is responsible for administering a written examination in his or her particular field, unless he or she chooses to waive participation in this part of the examination. Two or more members of the advisory committee may give a joint written examination. One or more members may require a student to take a departmental or intercollegiate faculty examination to supplement or replace a written examination. Each written examination must be completed and reported as satisfactory to the chair of the advisory committee before the oral portion of the examination may be held. In case any written examination is reported unsatisfactory, the entire advisory committee must agree (1) to proceed with the oral portion of the
preliminary examination, or (2) to adopt another course of action regarding the unsatisfactory written examination.

Prior to scheduling the preliminary examination with the other committee members, the committee chair will review the eligibility criteria with the student. Upon completion of the preliminary examination, the student’s advisory committee is to be included.

Once all requirements are met, departments or intercollegiate faculty may announce the schedule of the written and oral parts of the examination.

Credit for the preliminary examination is not transferable. If a departmental or intercollegiate faculty examination is used as part of the written portion of the preliminary examination, it must be the last examination offered prior to the date scheduled for the preliminary examination. In the schedule of the written portion, all members of the student’s advisory committee are to be included.

Through the preliminary examination, the student’s advisory committee should satisfy itself that the student has demonstrated the following qualifications:

1. a mastery of the subject matter of all fields in the program;
2. an adequate knowledge of the literature in these fields and an ability to carry out bibliographical research.

In case a student is required to take, as a part of the written portion of a preliminary examination, an examination administered by a department or intercollegiate faculty, the department or intercollegiate faculty must:

1. offer the examination at least once every six months. The departmental or interdisciplinary degree program examination should be announced at least 30 days prior to the scheduled examination date.

2. assume the responsibility for marking the examination satisfactory or unsatisfactory, or otherwise graded, and in the case of unsatisfactory, stating specifically the reasons for such a mark.
3. forward the marked examination to the chair of the student’s advisory committee within one week after the examination.

The chair of the student’s advisory committee is responsible for making all written examinations available to the members of the advisory committee at or before the oral portion of the preliminary examination. A positive vote by all members of the graduate committee with at most one dissent is required to pass a student on his or her preliminary exam. A department or intercollegiate faculty can have a stricter requirement provided there is consistency within all degree programs within a department or an interdisciplinary degree program.

The chair of the advisory committee will promptly report the results of the Preliminary Examination to the Office of Graduate and Professional Studies, using the Report of Doctoral Preliminary Examination form and the Preliminary Examination checklist. Both forms must have the appropriate signatures. These forms should be submitted to the Office of Graduate and Professional Studies within 10 working days of the scheduled preliminary examination.

The Report of the Preliminary Examination form must be submitted with original signatures of the approved committee members. If an approved committee member substitution (1 only) has been made, his/her signature must also be included on the form submitted to the Office of Graduate and Professional Studies. The original signature of the department head is also required on the form.

After passing the required oral and written preliminary examinations for the doctoral degree, the student must complete the final examination for the degree within four calendar years. Otherwise, the student will be required to repeat the preliminary examination. Upon approval of the student’s advisory committee, with no more than one member dissenting, and approval of the Office of Graduate and Professional Studies, a student who has failed the preliminary examination may be given one re-examination. Adequate time must be given to permit the student to address the inadequacies emerging from the first examination (normally six months). The student and the advisory committee should jointly negotiate a mutually acceptable date for this purpose.

A student must be registered at Texas A&M University for a minimum of one semester credit hour in the semester or summer term in which they will take any portion of the Preliminary Examination.

**Steps for Completing the Preliminary Examination**

1. Establish advisory committee. Submit a degree plan.  

   **When:** Prior to the deadline set by the student’s college, and no later than 90 days prior to preliminary examination.  

   **Approved by:** Advisory committee, department or intercollegiate faculty chair, and Office of Graduate and Professional Studies (OGAPS).
2
Complete English language proficiency requirements (if applicable), and coursework detailed on degree plan. **When:** Before preliminary examination.

3
Student and chair review eligibility requirements for the preliminary exam using the "Preliminary Examination Checklist". **When:** Several weeks before the proposed date of the preliminary examination. Checklist must be signed by chair and department head, or intercollegiate faculty chair.

4
Student checks the availability of committee members. **When:** Several weeks before the proposed date of the preliminary examination.

5
Students prepares and submits any petitions found necessary by the review of the eligibility requirements. **When:** At least three weeks before the proposed date of the preliminary examinations. **Approved by:** Advisory committee, department head or intercollegiate faculty chair, and OGAPS.

6
When exam date is determined, the department may announce the schedule. **Approved by:** Committee chair, department head or intercollegiate faculty chair.

7
Chair submits the Report of the Preliminary Examination and the Preliminary Examination Checklist to OGAPS. **When:** Within 10 working days of the date of the scheduled oral examination and no later than 14 weeks prior to the final defense date. **Approved by:** Advisory committee.

8
Office of Graduate and Professional Studies notifies the student and chair of any actions necessary to rectify any deficiencies. **When:** Upon receipt of the report of the doctoral Preliminary Examination.

---

**Final Examination/Dissertation Defense**

The candidate for the doctoral degree must pass a final examination by deadline dates announced in the “Office of Graduate and Professional Studies Calendar” each semester or summer term. The doctoral student is allowed only one opportunity to take the final examination. No student may be given a final examination unless his or her current official cumulative and degree plan GPAs are 3.000 or better and he or she has been admitted to candidacy. No unabsolved grades of D, F, or U for any course can be listed on the degree plan. To absolve a deficient grade, a student must repeat the course and achieve a grade of C or better. A student must have completed all coursework on his or her degree plan with the exception of 691, 5V98, or 5V99 (research) or 692 (Professional Study) hours. The student must be registered for all remaining hours; no hours remain to be taken on the degree plan. The preliminary examination results must have been submitted to the Office of Graduate and Professional Studies 14 weeks prior to the date of the defense. The research proposal must have been submitted to the Office of Graduate and Professional Studies 25 working days prior to the date of the final examination/defense. Any changes to the degree plan must be approved by the Office of Graduate and Professional Studies prior to the approval of the final examination. The request to hold and announce the final examination must be submitted to the Office of Graduate and Professional Studies a minimum of 10 working days in advance of the scheduled date. Examination/Defense results must be submitted to the Office of Graduate and Professional Studies within 10 working days of the scheduled examination/defense date. **The Office of Graduate and Professional Studies must be notified in writing of any cancellations.**

The student’s advisory committee will conduct this examination. The final examination is not to be administered until the dissertation or record of study is available in substantially final form to the student’s advisory committee, and all concerned have had adequate time to review the document. Additionally, all English Language Proficiency requirements must be satisfied prior to scheduling the examination. Whereas the final examination may cover the broad field of the candidate’s training, it is presumed that the major portion of the time will be devoted to the dissertation and closely allied topics. Persons other than members of the graduate faculty may, with mutual consent of the candidate and the chair of the advisory committee, be invited to attend a final examination for an advanced degree. A positive vote by all members of the graduate committee with at most one dissension is required to pass a student on his or her exam. A department can have a stricter requirement provided there is consistency within all degree programs within a department. Upon completion of the questioning of the candidate, all visitors must excuse themselves from the proceedings.

The advisory committee will submit its recommendations on the appropriate Report of the Final Examination for Doctoral Candidates form to the Office of Graduate and Professional Studies regarding acceptability of the candidate for the doctoral degree. A student must be registered in the University in the semester or summer term in which the final examination is taken.

The Report of the Final Examination Form must be submitted with original signatures of only the committee members approved by the Office of Graduate and Professional Studies. If an approved committee member substitution (1 only) has been made, his/her signature must be included on the form submitted to the Office of Graduate and Professional Studies.

**Dissertation**

The ability to perform independent research must be demonstrated by the dissertation, which must be the original work of the candidate. Whereas acceptance of the dissertation is based primarily on its scholarly merit, it must also exhibit creditable literary workmanship. The format of the dissertation must be acceptable to the Office of Graduate and Professional Studies. Guidelines for the preparation of the thesis are available in the *Thesis Manual*, which is available online at [http://ogaps.tamu.edu](http://ogaps.tamu.edu).

After successful defense and approval by the student’s advisory committee and the head of the student’s major department (or chair of the intercollegiate faculty, if applicable), a student must submit his/her dissertation in electronic format as a single PDF file. The PDF file must
be uploaded to the website, http://ogaps.tamu.edu. Additionally, a signed approval form must be brought or mailed to the Office of Graduate and Professional Studies. Both the PDF file and the signed approval form are required by the deadline.

Deadline dates for submitting are announced each semester or summer term in the Office of Graduate and Professional Studies Calendar (see Time Limit statement). These dates also can be accessed via the website http://ogaps.tamu.edu.

Before a student can be “cleared” by Thesis and Dissertation Services, a processing fee must be paid through Student Business Services. This processing fee is for the thesis/dissertation services provided. After commencement, dissertations are digitally stored and made available through the Texas A&M Libraries.

A dissertation that is deemed unacceptable by the Office of Graduate and Professional Studies because of excessive corrections will be returned to the student’s department head or chair of the intercollegiate faculty. The manuscript must be resubmitted as a new document, and the entire review process must begin anew. All original submittal deadlines must be met during the resubmittal process in order to graduate.

Additional Requirements

Additional Requirements

- Residence (p. 1255)
- Time Limit (p. 1255)
- Continuous Registration (p. 1255)
- Admission to Candidacy (p. 1255)
- Languages (p. 1255)
- 99-Hour Cap on Doctoral Degree (p. 1255)
- Application for Degree (p. 1256)

Residence

A student who enters the doctoral degree program with a baccalaureate degree must spend one academic year plus one semester in resident study at Texas A&M University. A student who holds master’s degree when he/she enters doctoral degree program must spend one academic year in resident study. One academic year may include two adjacent regular semesters or one regular semester and one adjacent 10-week summer semester. The third semester is not required to be adjacent to the one year. Enrollment for each semester must be a minimum of 9 credit hours each to satisfy the residence requirement.

To satisfy the residence requirement, the student must complete a minimum of 9 credit hours per semester or 10-week summer semester in resident study at Texas A&M University for the required period. A student who enters a doctoral degree program with a baccalaureate degree may fulfill residence requirements in excess of one academic year (18 credit hours) by registration during summer sessions or by completion of a less-than-full course load (in this context a full course load is considered 9 credit hours per semester).

Students who are employed full-time while completing their degree may fulfill total residence requirements by completion of less-than-full time course loads each semester. In order to be considered for this, the student is required to submit a Petition for Waivers and Exceptions along with verification of his/her employment to the Office of Graduate and Professional Studies. An employee should submit verification of his/her employment at the time he/she submits the degree plan. See Registration. (p. 25)

See Residence Requirements (p. 22).

Time Limit

All requirements for doctoral degrees must be completed within a period of ten consecutive calendar years for the degree to be granted. A course will be considered valid until 10 years after the end of the semester in which it is taken. Graduate credit for coursework more than ten calendar years old at the time of the final oral examination may not be used to satisfy degree requirements.

After passing the required preliminary oral and written examinations for a doctoral degree, the student must complete the final examination within four calendar years. Otherwise, the student will be required to repeat the preliminary examination.

A final corrected version of the dissertation or record of study in electronic format as a single PDF file must be cleared by the Office of Graduate and Professional Studies no later than one year after the final examination or within the 10-year time limit, whichever occurs first. Failure to do so will result in the degree not being awarded.

Continuous Registration

A student in a program leading to a Doctor of Philosophy who has completed all coursework on his/her degree plan other than 691, 5V98 or 5V99 (research) are required to be in continuous registration until all requirements for the degree have been completed. See Continuous Registration Requirements (p. 25).

Admission to Candidacy

To be admitted to candidacy for a doctoral degree, a student must have:

1. completed all formal coursework on the degree plan with the exception of any remaining 681, 684, 690 and 691, or 5V98 and 5V99,
2. a 3.0 Graduate GPA and a Degree Plan GPA of at least 3.0 with no grade lower than C in any course on the degree plan,
3. passed the preliminary examination (written and oral portions),
4. submitted an approved dissertation proposal,
5. met the residence requirements. The final examination will not be authorized for any doctoral student who has not been admitted to candidacy.

Languages

A student is required to possess a competent command of English. For English language proficiency requirements, see the Admissions section of this catalog. The doctoral (PhD) foreign language requirement at Texas A&M University is a departmental option, to be administered and monitored by the individual departments of academic instruction.

99-Hour Cap on Doctoral Degrees

In Texas, public colleges and universities are funded by the state according to the number of students enrolled. In accordance with legislation passed by the Texas Legislature, the number of hours for which state universities may receive subvention funding at the doctoral rate for any individual is limited to 99 hours. Texas A&M University and other universities will not receive subvention for hours in excess of the limit.
Institutions of higher education are allowed to charge the equivalent of nonresident tuition to a resident doctoral student who has enrolled in 100 or more semester credit hours of doctoral coursework.

A doctoral student at Texas A&M has seven years to complete his/her degree before being charged out-of-state tuition. A doctoral student who, after seven years of study, has accumulated 100 or more doctoral hours will be charged tuition at a rate equivalent to out-of-state tuition. Please note that the tuition increases will apply to Texas residents as well as students from other states and countries who currently are charged tuition at the resident rate. This includes those doctoral students who hold GAT, GANT, and GAR appointments of 20 or more hours and recipients of competitive fellowships who receive more than $1,000 per semester. Doctoral students who, after seven years of study, have not accumulated 100 hours are eligible to pay in-state tuition if otherwise eligible.

For count purposes, a year is counted as three semesters, normally fall, spring and summer. Using this system, a student is allowed 21 semesters as a G8 student to complete the doctoral degree before being penalized with the higher tuition rate. Any semester in which a G8 student is enrolled for a doctoral level course is counted.

The following majors are exempt from the 99-Hour Cap on Doctoral Degrees:

- Biomedical Sciences
- Biochemistry
- Microbiology
- Genetics
- Toxicology
- Nutrition Sciences
- Community Clinical Psychology
- Counseling Psychology
- School Psychology
- Veterinary Pathology
- Clinical Psychology
- Counseling Psychology
- Medical Sciences
- Health Services Research
- Health Promotion and Community Health Sciences
- Epidemiology and Environmental Health

The hour limit for these majors is 130 doctoral hours.

**Application for Degree**

For information on applying for your degree, please visit the Graduation (p. 24) section.

**Department of Statistics**

www.stat.tamu.edu

**Head:** V. Johnson

The Department of Statistics offers a graduate program leading to the degrees of Master of Science or Doctor of Philosophy. The department cooperates closely with all subject matter area departments in setting up flexible minor programs in statistics.

The Department of Statistics has two master’s degree programs, MS in Statistics and MS in Analytics.

**Faculty**

Akleman, Derya, Senior Lecturer
Statistics
PhD, Texas A&M University, 1996

Bhattacharya, Anirban, Assistant Professor
Statistics
PhD, Duke University, 2012

Calvin, James, Professor Emeritus
Statistics
PhD, Colorado State University, 1985

Carroll, Raymond, Distinguished Professor
Statistics
PhD, Purdue University, 1974

Chen, Willa, Professor
Statistics
PhD, New York University, 2000

Statistics
PhD, University of Chicago, 2005

Katzfuss, Matthias, Assistant Professor
Statistics
PhD, Ohio State University, 2011
Masters

• Master of Science in Analytics (p. 1258)
• Master of Science in Statistics (p. 1262)

Doctoral

• Doctor of Philosophy in Statistics (p. 1266)

Certificates

• Applied Statistics Certificate (p. 1257)

Applied Statistics - Certificate

This certificate is designed to meet the needs of students and the workforce. The student can choose from various areas of emphasis including, but not limited to, biostatistics, business analytics, statistical computations, and AP teacher training. To complete the certificate program the student must:

1. be admitted to the university and
2. successfully complete at least 12 semester credit hours from the list of graduate courses.

The specific courses will be chosen by the student, in consultation with the Associate Department Head or the Academic Director of Online Programs, so as to best meet the student’s career goals.

Total Semester Credit Hours: 12

1 Students must have a 3.00 GPA over the four courses in order to receive the statistics certificate.

Master of Science in Analytics

The Master of Science (MS) curriculum is designed to develop new understanding through research and creativity. Students have the option to pursue a thesis or non-thesis Master of Science degree.

Steps to Fulfill Master’s Degree Requirements

1 Meet with departmental graduate advisor to plan course of study for first semester.

2 Establish advisory committee.
Submit a degree plan. 1

3 If thesis is required, submit thesis proposal to the Office of Graduate and Professional Studies.

When: At least 20 working days prior to the submission of the Request for the Final Examination.

Approved by: Advisory committee, department head or chair of the intercollegiate faculty and OGAPS.

4 Apply for degree; pay graduation fee.

When: During the first week of the final semester, see OGAPS calendar.

5 Check to be sure degree program and advisory committee are up to date and all ELP requirements (if applicable) and coursework are complete.

When: Well before submitting request to schedule final examination.

6 Complete residence requirement.

When: If applicable, before or during final semester.

Approved by: OGAPS.

7 Submit request to schedule final examination.

When: Must be received by OGAPS at least 10 working days before exam date. See OGAPS calendar for deadlines.

Approved by: Advisory committee, department head or chair of the intercollegiate faculty, and OGAPS.

8 Successfully complete final examination.

When: The Report of the Final Examination Form should be submitted to OGAPS within 10 days following the exam.

Approved by: Advisory committee and OGAPS.

9 If required, upload one approved final copy of thesis as a single PDF file (http://ogaps.tamu.edu) and submit signed approval form to the Office of Graduate and Professional Studies.

When: See OGAPS calendar for deadlines.

Approved by: Advisory committee, department head or chair of the intercollegiate faculty and OGAPS.

10 Graduation; arrange for cap and gown.

For more information, visit http://graduation.tamu.edu.

1 The online Document Processing Submission System is located on the website https://ogsdpss.tamu.edu.
Please note that the thesis option does not apply to the MS in Analytics program.

Due to our cohort model, the MS in Analytics program does not accept transfer of credit or substitutions.

The MS in Analytics curriculum includes courses from the Mays Business School along with the courses from the Department of Statistics. The program is geared toward professionals with strong quantitative skills; that is, bachelor’s degree holders in the sciences, mathematics, business and engineering fields. The program revolves around a work-based capstone project where students apply what they have learned in their classes to solve a business problem within their organization. The student develops a hybrid of the most sought after skills in every industry: statistics, technological expertise and business analysis.

Program Requirements

Program Requirements

- Student’s Advisory Committee (p. 1259)
- Degree Plan (p. 1259)
- Credit Requirements (p. 1260)
- Transfer of Credit (p. 1260)
- Limitations on the Use of Transfer, Extension and Certain Other Courses (p. 1260)
- Thesis Option (p. 1260)
  • Thesis Proposal (p. 1261)
  • Final Examination (p. 1261)
- Non-Thesis Option (p. 1261)

Student’s Advisory Committee

After receiving admission to graduate studies and enrolling for coursework, the student will consult with the head of his or her major or administrative department (or intercollegiate faculty, if applicable) concerning appointment of the chair of his or her advisory committee. With the exception of the Mays Business School non-thesis option, the Master of Science in Economics with a concentration in financial economics or financial econometrics, the Master of Science with a major in Educational Human Resource Development, HRD option, and the Master of Science in Nursing with a major in Nursing Education, the student’s advisory committee for the master’s degree will consist of no fewer than three members of the graduate faculty, representative of the student’s fields of study and research. The chair or co-chair of the advisory committee must be from the student’s major department (or intercollegiate faculty, if applicable), and at least one or more of the members must have an appointment to a department other than the student’s major department. The outside member for students in an interdisciplinary academic program must have an appointment to a department different from the chair of the student’s committee.

The chair, in consultation with the student, will select the remainder of the advisory committee. The student will interview each prospective committee member to determine whether he or she is willing to serve. Only graduate faculty members located on Texas A&M University campuses may serve as chair of a student’s advisory committee. Other graduate faculty members located off campus may serve as a member or co-chair (but not chair) with a member as the chair. The chair of the committee, who usually has immediate supervision of the student’s research and thesis, has the responsibility for calling required meetings of the committee and for calling meetings at any other time considered desirable.

If the chair of a student’s advisory committee voluntarily leaves the University and the student is near completion of the degree and wants the chair to continue to serve in this role, the student is responsible for securing a current member of the University Graduate Faculty, from the student’s academic program and located near the Texas A&M University campus site, to serve as the co-chair of the committee. The Department Head or Chair of Intercollegiate faculty may request in writing to the Associate Provost for Graduate and Professional Studies that a faculty member who is on an approved leave of absence or has voluntarily separated from the university, be allowed to continue to serve in the role of chair of a student’s advisory committee without a co-chair for us to one year. The students should be near completion of the degree. Extensions beyond the one year period can be granted with additional approval of the Dean.

If the chair of the student’s advisory committee is unavailable for an extended time in any academic period during which the student is involved in activities relating to an internship, thesis or professional paper, and is registered for courses such as 5V98, 5V99, 684, 691, 692 or 693, the student may request, in writing, that the department head appoint an alternate advisory committee chair during the interim period.

The duties of the committee include responsibility for the proposed degree plan, the research proposal, the thesis and the final examination. In addition, the committee as a group and as individual members are responsible for advising the student on academic matters, and, in the case of academic deficiency, initiating recommendations to the Office of Graduate and Professional Studies.

The committee members’ approval on the degree plan indicate their willingness to accept the responsibility for guiding and directing the entire academic program of the student and for initiating all academic actions concerning the student. Although individual committee members may be replaced by petition for valid reasons, a committee cannot resign en masse.

Degree Plan

The student’s advisory committee, in consultation with the student, will develop the proposed degree plan. The degree plan must be completed and filed with the Office of Graduate and Professional Studies prior to the deadline imposed by the student’s college or interdisciplinary degree program, if applicable, and no later than 90 days prior to the date of the final oral examination or thesis defense.

A student should submit the degree plan using the online Document Processing Submission System (http://ogsdpss.tamu.edu).

A student submitting a proposed degree plan for a Master of Science degree should designate on the official degree plan the appropriate program option.

Additional coursework may be added to the approved degree plan by petition if it is deemed necessary by the advisory committee to correct deficiencies in the student’s academic preparation. No changes can be made to the degree plan once the student’s Request for Final Examination or Request for Final Examination Exemption is approved by the Office of Graduate and Professional Studies.
Credit Requirement

A minimum of 32 semester credit hours of approved courses and research is required for the thesis option Master of Science degree with the exception of the Master of Science in Visualization, which requires 48 hours and Master of Science in Athletic Training, which requires 60 hours. A minimum of 36 semester credit hours of approved coursework is required for the Non-Thesis Option.

Ordinarily the student will devote the major portion of his or her time to work in one or two closely related fields. Other work will be in supporting fields of interest.

Transfer of Credit

A student who has earned 12 hours of graduate credit in residence at Texas A&M University may be authorized to transfer courses in excess of the limits prescribed below upon the advice of the advisory committee and with the approval of the Office of Graduate and Professional Studies. Courses taken in residence at an accredited U.S. institution or approved international institution with a final grade of B or greater may be considered for transfer credit if, at the time the courses were completed, the courses would be accepted for credit toward a similar degree for a student in degree-seeking status at the host institution. Otherwise, the limitations stated in the following section apply. Coursework in which no formal grades are given or in which grades other than letter grades (A or B) are earned (for example, CR, P, S, U, H, etc.) is not accepted for transfer credit. Courses appearing on the degree plan with grades of D, F or U may not be absolved by transfer work. Credit for thesis research or the equivalent is not transferable. Credit for coursework submitted for transfer from any college or university must be shown in semester credit hours or equated to semester credit hours. An official transcript from the university at which the transfer coursework was taken must be sent directly to the Office of Admissions.

Courses used toward a degree at another institution may not be applied for graduate credit. If the course to be transferred was taken prior to the conferral of a degree at the transfer institution, a letter from the registrar at that institution stating that the course was not applied for credit toward the degree must be submitted to the Office of Graduate and Professional Studies.

Grades for courses completed at other institutions are not included in computing the GPR.

Limitations on the Use of Transfer, Extension and Certain Other Courses

Some departments may have more restrictive requirements for transfer work. If otherwise acceptable, certain courses may be used toward meeting credit-hour requirements for the master’s degree under the following limitations.

1. The maximum number of credit hours which may be considered for transfer credit is the greater of 12 hours or one-third (1/3) of the total hours of a degree plan. The following restrictions apply:
   - Graduate and/or upper-level undergraduate courses taken in residence at an accredited U.S. institution, or approved international institution with a final grade of B or greater will be considered for transfer credit if, at the time the courses were completed, the student was in degree-seeking status at Texas A&M University, or the student was in degree-seeking status at the institution at which the courses were taken; and if the courses would be accepted for credit toward a similar degree for a student in degree-seeking status at the host institution.
   - Courses previously used for another degree are not acceptable for degree plan credit.

2. The maximum number of credit hours taken in post-baccalaureate non-degree (G6) classification at Texas A&M University which may be considered for application to the degree plan is 12.

3. Not more than 12 hours may be used in any combination of the following categories:
   - Not more than 8 hours in the combination of 5V98, 5V99, and 691 (research) or 684 (Professional Internship) may be used.
   - Not more than 8 hours of 685 (Directed Studies) may be used.
   - Not more than 3 hours of 690 (Theory of Research) may be used.
   - Not more than 3 hours of 695 (Frontiers in Research) may be used.

4. A maximum of 2 hours of Seminar (681).

5. A maximum of 9 hours of advanced undergraduate courses (300- or 400-level).

6. For graduate courses of three weeks’ duration or less, taken at other institutions, up to 1 hour of credit may be obtained for each five-day week of coursework. Each week of coursework must include at least 15 contact hours.

7. Continuing education courses may not be used for graduate credit.

8. Extension courses are not acceptable for credit.

9. For the Degree of Master of Science in Medical Science, students with a first professional degree (MD, DDS or DVM) may take up to 20 hours of 691 (research). For the remaining hours, a maximum of 2 hours can be Seminar (681) and a maximum of 3 hours can be Directed Studies (685).

Exceptions will be permitted only in unusual cases and when petitioned by the student’s advisory committee and approved by the Office of Graduate and Professional Studies.

Thesis Option

An acceptable thesis is required for the Master of Science degree for a student who selects the thesis option program. The finished work must reflect a comprehensive understanding of the pertinent literature and express in clear English, the problem(s) for study, the method, significance and results of the student’s original research. Guidelines for the preparation of the thesis are available in the Thesis Manual, which is available online at the Office of Graduate and Professional Studies website.

After successful defense (or exemption) and approval by the student’s advisory committee and the head of the student’s major department (or chair of the intercollegiate faculty, if appropriate), the student must submit his/her thesis in electronic format as a single PDF file. The PDF file must be uploaded to the Office of Graduate and Professional Studies website. Additionally, a signed approval form must be brought or mailed to the Office of Graduate and Professional Studies. The PDF file and the signed approval form are required by the deadline.

Deadline dates for submitting the thesis are announced each semester or summer term in the “Office of Graduate and Professional Studies Calendar” (see Time Limit statement). These dates also can be accessed via the Office of Graduate and Professional Studies website.

Before a student can be “cleared” by Thesis and Dissertation Services, a processing fee must be paid through Student Business Services. This
A thesis that is deemed unacceptable by the Office of Graduate and Professional Studies because of excessive corrections will be returned to the student’s department head (or chair of the intercollegiate faculty, if applicable). The manuscript must be resubmitted as a new document, and the entire review process must begin again. All original submittal deadlines must be met during the resubmittal process to graduate that semester.

**Thesis Proposal**

For the thesis option Master of Science degree, the student must prepare a thesis proposal for approval by the advisory committee and the head of the major department or chair of the interdisciplinary faculty, if applicable. This proposal must be submitted to the Office of Graduate and Professional Studies at least 20 working days prior to the submission of the request for the final examination.

Compliance issues must be addressed if a graduate student is performing research involving human subjects, animals, infectious biohazards and recombinant DNA. A student involved in these types of research should check with the Office of Research Compliance and Biosafety at (979) 458-1467 to address questions about all research compliance responsibilities. Additional information can also be obtained on the Office of Research Compliance and Biosafety website.

**Thesis Defense/Final Examination**

A student must pass a final examination by dates announced each semester or summer term in the Office of Graduate and Professional Studies Calendar. The Office of Graduate and Professional Studies must be notified in writing of any cancellation. To be eligible to take the final examination, a student’s GPR must be at least 3.000 for courses on the degree plan and for all courses completed at Texas A&M which are eligible to be applied to a graduate degree, and there must be no unabsolved grades of D, F or U for any course listed on the degree plan. To absolve a deficient grade, the student must repeat the course at Texas A&M University and achieve a grade of C or better. All coursework on the degree plan must have been completed with the exception of those hours for which the student is registered. Additionally, all English Language Proficiency requirements must be satisfied prior to scheduling the examination. If applicable, an approved thesis proposal must be on file in the Office of Graduate and Professional Studies according to published deadlines.

A request to hold and announce the final examination must be submitted to the Office of Graduate and Professional Studies a minimum of 10 working days in advance of the scheduled date for the examination. Examinations which are not completed and reported as satisfactory to the Office of Graduate and Professional Studies within 10 working days of the scheduled examination date will be recorded as failures. A student may be given only one opportunity to repeat the final examination for the master’s degree and that must be within a time period that does not extend beyond the end of the next regular semester (summer terms are excluded).

For thesis option students, the final examination covers the thesis and all work taken on the degree plan and at the option of the committee may be written or oral or both. The final examination may not be administered before the thesis is available to all members of the student’s advisory committee in substantially final form, and all members have had adequate time to review the document. The examination is conducted by the student’s advisory committee as finally constituted. A thesis option student must be registered in the University in the semester or summer term in which the final examination is taken. Persons other than members of the graduate faculty may, with mutual consent of the candidate and the major professor, attend final examinations for advanced degrees. Upon completion of the questioning of the candidate, all visitors must excuse themselves from the proceedings. A positive vote by all members of the graduate committee with at most one dissension is required to pass a student on his or her exam. A department, or interdisciplinary degree program, may have a stricter requirement provided there is consistency within all degree programs within a department or interdisciplinary degree program.

A thesis option candidate may petition to be exempt from his/her final examination provided his/her degree plan GPR is 3.500 or greater and he/she has the approval of the advisory committee, the head of the student’s major department, or intercollegiate chair, if appropriate, and the Office of Graduate and Professional Studies. It is required that the petition for exemption be submitted the same semester the student intends to submit the thesis.

For non-thesis option students, a final comprehensive examination is required. The Master of Science in Educational Human Resource Development, HRD option, the Master of Science in Nursing with a major in Nursing Education, the Master of Science Program in the Mays Business School and the Master of Science in Economics with a concentration in financial economics or financial econometrics do not have final examination requirements. Otherwise, exemptions from final examinations are not allowed. The final exam cannot be held prior to the mid point of the final semester if questions on the exam are based on courses in which the student is currently enrolled. If a student has completed all required degree plan coursework, the student is not required to be registered for classes in the semester the final examination is administered (unless he/she holds an assistantship).

Exam results must be submitted with original signatures of only the committee members approved by the Office of Graduate and Professional Studies. If an approved committee member substitution (1 only) has been made, his/her signature must also be submitted to the Office of Graduate and Professional Studies.

**Non-Thesis Option**

For the non-thesis option, a thesis is not required. A final comprehensive examination is required for all non-thesis Master of Science programs except the Master of Science programs offered by the Mays Business School, the Master of Science in Economics with a concentration in financial economics or financial econometrics, the Master of Science with a major in Educational Human Resource Development, HRD option, and the Master of Science in Nursing with a major in Nursing Education. No exemptions are allowed. The requirements as to level of courses and examinations are the same as for the thesis option Master of Science degree. The final examination cannot be held prior to the mid point of the final semester if questions on the examination are based on courses in which the student is currently enrolled.

A student pursuing the non-thesis option is not allowed to enroll in 5V98, 5V99, or 691 (research) for any reason and 691 may not be used for credit toward a non-thesis option Master of Science degree. A maximum of 4 credit hours of 684 (Professional Internship), 8 credit hours of 685 (Directed Studies), and up to 3 credit hours of 690 (Theory of Research) or 695 (Frontiers in Research) may be used toward the non-thesis option Master of Science degree. In addition, any combination of 684, 685, 690...
and 695 may not exceed 25 percent of the total credit hour requirement shown on the individual degree plan. All requirements for the non-thesis option Master of Science degree other than those specified above are the same as for the thesis option degree.

### Additional Requirements

#### Additional Requirements

- Residence (p. 1262)
- Continuous Registration (p. 1262)
- Time Limit (p. 1262)
- Foreign Languages (p. 1262)
- Application for Degree (p. 1262)

#### Residence

In partial fulfillment of the residence requirement for the degree of Master of Science, the student must complete 9 resident credit hours during one regular semester or one 10-week summer semester in resident study at Texas A&M University. Upon recommendation of the student’s advisory committee, department head or Chair of the Interdisciplinary Program, if appropriate, and with approval of the Office of Graduate and Professional Studies, a student may be granted exemption from this requirement. Such a petition, however, must be approved prior to the student’s registration for the final 9 credit hours of required coursework.

Students who are employed full-time while completing their degree may fulfill total residence requirements by completion of less-than-full time course loads each semester. In order to be considered for this, the student is required to submit a Petition for Waivers and Exceptions along with verification of his/her employment to the Office of Graduate and Professional Studies.

See Residence Requirements (p. 22).

#### Continuous Registration

A student in the thesis option of the Master of Science program who has completed all coursework on his/her degree plan other than 5V98, 5V99, and 691 (research) is required to be in continuous registration until all requirements for the degree have been completed. See Continuous Registration Requirements (p. 25).

#### Time Limit

All degree requirements must be completed within a period of seven consecutive years for the degree to be granted. A course will be considered valid until seven years after the end of the semester in which it is taken. Graduate credit for coursework which is more than seven calendar years old at the time of the final examination (oral or written) may not be used to satisfy degree requirements.

A student who has chosen the thesis option must have the final corrected version of the thesis cleared by the Office of Graduate and Professional Studies no later than one year after the final examination, or approval of a petition for exemption from the final exam, or within the seven-year time limit, whichever occurs first. Failure to do so will result in the degree not being awarded.

#### Foreign Languages

No specific language requirement exists for the Master of Science degree.

### Application for Degree

For information on applying for your degree, please visit the Graduation (p. 24) section.

### Master of Science in Statistics

The Master of Science (MS) curriculum is designed to develop new understanding through research and creativity. Students have the option to pursue a thesis or non-thesis Master of Science degree.

The online Document Processing Submission System is located on the website https://ogsdpss.tamu.edu.

Complete the application for degree form via the student's Howdy portal.

The Master of Science in Statistics offers two options in its degree programs:

1. the MS (thesis option), which requires the preparation of a thesis and,
2. the MS (non-thesis option), which requires more formal coursework in lieu of the thesis.

Both programs provide a balanced training in statistical methods and statistical theory and are intended to prepare the student to adapt statistical methodologies to practical problems.

Program Requirements

Program Requirements

• Student's Advisory Committee (p. 1263)
• Degree Plan (p. 1264)
• Credit Requirements (p. 1264)
• Transfer of Credit (p. 1264)
• Limitations on the Use of Transfer, Extension and Certain Other Courses (p. 1264)
• Thesis Option (p. 1265)
  • Thesis Proposal (p. 1265)
  • Final Examination (p. 1265)

Student's Advisory Committee

After receiving admission to graduate studies and enrolling for coursework, the student will consult with the head of his or her major or administrative department (or intercollegiate faculty, if applicable) concerning appointment of the chair of his or her advisory committee. With the exception of the Mays Business School non-thesis option, the Master of Science in Economics with a concentration in financial economics or financial econometrics, the Master of Science with a major in Educational Human Resource Development, HRD option, and the Master of Science in Nursing with a major in Nursing Education, the student’s advisory committee for the master’s degree will consist of no fewer than three members of the graduate faculty, representative of the student's fields of study and research. The chair or the co-chair of the advisory committee must be from the student’s major department (or intercollegiate faculty, if applicable), and at least one or more of the members must have an appointment to a department other than the student’s major department. The outside member for students in an interdisciplinary program must have an appointment to a department different from the chair of the student’s committee.

The chair, in consultation with the student, will select the remainder of the advisory committee. The student will interview each prospective committee member to determine whether he or she is willing to serve. Only graduate faculty members located on Texas A&M University campuses may serve as chair of a student’s advisory committee. Other graduate faculty members located off campus may serve as a member or co-chair (but not chair) with a member as the chair. The chair of the committee, who usually has immediate supervision of the student’s research and thesis, has the responsibility for calling required meetings of the committee and for calling meetings at any other time considered desirable.

If the chair of a student’s advisory committee voluntarily leaves the University and the student is near completion of the degree and wants the chair to continue to serve in this role, the student is responsible for securing a current member of the University Graduate Faculty, from the student’s academic program and located near the Texas A&M University campus site, to serve as the co-chair of the committee. The Department Head or Chair of Intercollegiate faculty may request in writing to the Associate Provost for Graduate and Professional Studies that a faculty member who is on an approved leave of absence or has voluntarily separated from the university, be allowed to continue to serve in the role of chair of a student’s advisory committee without a co-chair for us to one year. The students should be near completion of the degree. Extensions beyond the one year period can be granted with additional approval of the Dean.

If the chair of the student’s advisory committee is unavailable for an extended time in any academic period during which the student is involved in activities relating to an internship, thesis or professional paper, and is registered for courses such as 5V98, 5V99, 684, 691, 692 or 693, the student may request, in writing, that the department head appoint an alternate advisory committee chair during the interim period.

The duties of the committee include responsibility for the proposed degree plan, the research proposal, the thesis and the final examination. In addition, the committee as a group and as individual members are responsible for advising the student on academic matters, and, in the case of academic deficiency, initiating recommendations to the Office of Graduate and Professional Studies.
The committee members’ approval on the degree plan indicate their willingness to accept the responsibility for guiding and directing the entire academic program of the student and for initiating all academic actions concerning the student. Although individual committee members may be replaced by petition for valid reasons, a committee cannot resign en masse.

**Degree Plan**

The student’s advisory committee, in consultation with the student, will develop the proposed degree plan. The degree plan must be completed and filed with the Office of Graduate and Professional Studies prior to the deadline imposed by the student’s college or interdisciplinary degree program, if applicable, and no later than 90 days prior to the date of the final oral examination or thesis defense.

A student should submit the degree plan using the online Document Processing Submission System (http://ogsdpss.tamu.edu).

A student submitting a proposed degree plan for a Master of Science degree should designate on the official degree plan the appropriate program option.

Additional coursework may be added to the approved degree plan by petition if it is deemed necessary by the advisory committee to correct deficiencies in the student’s academic preparation. No changes can be made to the degree plan once the student’s Request for Final Examination or Request for Final Examination Exemption is approved by the Office of Graduate and Professional Studies.

**Credit Requirement**

A minimum of 32 semester credit hours of approved courses and research is required for the thesis option Master of Science degree with the exception of the Master of Science in Visualization, which requires 48 hours and Master of Science in Athletic Training, which requires 60 hours. A minimum of 36 semester credit hours of approved coursework is required for the Non-Thesis Option.

Ordinarily the student will devote the major portion of his or her time to work in one or two closely related fields. Other work will be in supporting fields of interest.

**Transfer of Credit**

A student who has earned 12 hours of graduate credit in residence at Texas A&M University may be authorized to transfer courses in excess of the limits prescribed below upon the advice of the advisory committee and with the approval of the Office of Graduate and Professional Studies. Courses taken in residence at an accredited U.S. institution or approved international institution with a final grade of B or greater will be considered for transfer credit if, at the time the courses were completed, the student was in degree-seeking status at Texas A&M University, or the student was in degree-seeking status at the institution at which the courses were taken; and if the courses would be accepted for credit toward a similar degree for a student in degree-seeking status at the host institution.

Courses taken in residence at an accredited U.S. institution or approved international institution with a final grade of B or greater may be considered for transfer credit if, at the time the courses were completed, the courses would be accepted for credit toward a similar degree for a student in degree-seeking status at the host institution. Otherwise, the limitations stated in the following section apply. Coursework in which no formal grades are given or in which grades other than letter grades (A or B) are earned (for example, CR, P, S, U, H, etc.) is not accepted for transfer credit. Courses appearing on the degree plan with grades of D, F or U may not be absolved by transfer work. Credit for thesis research or the equivalent is not transferable. Credit for coursework submitted for transfer from any college or university must be shown in semester credit hours or equated to semester credit hours. An official transcript from the university at which the transfer coursework was taken must be sent directly to the Office of Admissions.

Courses used toward a degree at another institution may not be applied for graduate credit. If the course to be transferred was taken prior to the conferral of a degree at the transfer institution, a letter from the registrar at that institution stating that the course was not applied for credit toward the degree must be submitted to the Office of Graduate and Professional Studies.

Grades for courses completed at other institutions are not included in computing the GPR.

**Limitations on the Use of Transfer, Extension and Certain Other Courses**

Some departments may have more restrictive requirements for transfer work. If otherwise acceptable, certain courses may be used toward meeting credit-hour requirements for the master’s degree under the following limitations.

1. The maximum number of credit hours which may be considered for transfer credit is the greater of 12 hours or one-third (1/3) of the total hours of a degree plan. The following restrictions apply:
   - Graduate and/or upper-level undergraduate courses taken in residence at an accredited U.S. institution, or approved international institution with a final grade of B or greater will be considered for transfer credit if, at the time the courses were completed, the student was in degree-seeking status at Texas A&M University, or the student was in degree-seeking status at the institution at which the courses were taken; and if the courses would be accepted for credit toward a similar degree for a student in degree-seeking status at the host institution.
   - Courses previously used for another degree are not acceptable for degree plan credit.

2. The maximum number of credit hours taken in post-baccalaureate non-degree (G6) classification at Texas A&M University which may be considered for application to the degree plan is 12.

3. Not more than 12 hours may be used in any combination of the following categories:
   - Not more than 8 hours in the combination of 5V98, 5V99, and 691 (research) or 684 (Professional Internship) may be used.
   - Not more than 8 hours of 685 (Directed Studies) may be used.
   - Not more than 3 hours of 690 (Theory of Research) may be used.
   - Not more than 3 hours of 695 (Frontiers in Research) may be used.

4. A maximum of 2 hours of Seminar (681).

5. A maximum of 9 hours of advanced undergraduate courses (300- or 400-level).

6. For graduate courses of three weeks’ duration or less, taken at other institutions, up to 1 hour of credit may be obtained for each five-day week of coursework. Each week of coursework must include at least 15 contact hours.

7. Continuing education courses may not be used for graduate credit.

8. Extension courses are not acceptable for credit.

9. For the Degree of Master of Science in Medical Science, students with a first professional degree (MD, DDS or DVM) may take up to 20 hours of 691 (research). For the remaining hours, a maximum
of 2 hours can be Seminar (681) and a maximum of 3 hours can be Directed Studies (685).

Exceptions will be permitted only in unusual cases and when petitioned by the student’s advisory committee and approved by the Office of Graduate and Professional Studies.

**Thesis Option**

An acceptable thesis is required for the Master of Science degree for a student who selects the thesis option program. The finished work must reflect a comprehensive understanding of the pertinent literature and express in clear English, the problem(s) for study, the method, significance and results of the student’s original research. Guidelines for the preparation of the thesis are available in the Thesis Manual, which is available online at the Office of Graduate and Professional Studies website.

After successful defense (or exemption) and approval by the student’s advisory committee and the head of the student’s major department (or chair of the intercollegiate faculty, if appropriate), the student must submit his/her thesis in electronic format as a single PDF file. The PDF file must be uploaded to the Office of Graduate and Professional Studies website. Additionally, a signed approval form must be brought or mailed to the Office of Graduate and Professional Studies. The PDF file and the signed approval form are required by the deadline.

Deadline dates for submitting the thesis are announced each semester or summer term in the “Office of Graduate and Professional Studies Calendar” (see Time Limit statement). These dates also can be accessed via the Office of Graduate and Professional Studies website.

Before a student can be “cleared” by Thesis and Dissertation Services, a processing fee must be paid through Student Business Services. This processing fee is for the thesis/dissertation services provided. After commencement, dissertations are digitally stored and made available through the Texas A&M Libraries.

A thesis that is deemed unacceptable by the Office of Graduate and Professional Studies because of excessive corrections will be returned to the student’s department head (or chair of the intercollegiate faculty, if applicable). The manuscript must be resubmitted as a new document, and the entire review process must begin again. All original submittal deadlines must be met during the resubmittal process to graduate that semester.

**Thesis Proposal**

For the thesis option Master of Science degree, the student must prepare a thesis proposal for approval by the advisory committee and the head of the major department or chair of the interdisciplinary faculty, if applicable. This proposal must be submitted to the Office of Graduate and Professional Studies at least 20 working days prior to the submission of the request for the final examination.

Compliance issues must be addressed if a graduate student is performing research involving human subjects, animals, infectious biohazards and recombinant DNA. A student involved in these types of research should check with the Office of Research Compliance and Biosafety at (979) 458-1467 to address questions about all research compliance responsibilities. Additional information can also be obtained on the Office of Research Compliance and Biosafety website.

---

**Thesis Defense/Final Examination**

A student must pass a final examination by dates announced each semester or summer term in the Office of Graduate and Professional Studies Calendar. The Office of Graduate and Professional Studies must be notified in writing of any cancellation. To be eligible to take the final examination, a student’s GPR must be at least 3.000 for courses on the degree plan and for all courses completed at Texas A&M which are eligible to be applied to a graduate degree, and there must be no unabsolved grades of D, F or U for any course listed on the degree plan. To absolve a deficient grade, the student must repeat the course at Texas A&M University and achieve a grade of C or better. All coursework on the degree plan must have been completed with the exception of those hours for which the student is registered. Additionally, all English Language Proficiency requirements must be satisfied prior to scheduling the examination. If applicable, an approved thesis proposal must be on file in the Office of Graduate and Professional Studies according to published deadlines.

A request to hold and announce the final examination must be submitted to the Office of Graduate and Professional Studies a minimum of 10 working days in advance of the scheduled date for the examination. Examinations which are not completed and reported as satisfactory to the Office of Graduate and Professional Studies within 10 working days of the scheduled examination date will be recorded as failures. A student may be given only one opportunity to repeat the final examination for the master’s degree and that must be within a time period that does not extend beyond the end of the next regular semester (summer terms are excluded).

For thesis option students, the final examination covers the thesis and all work taken on the degree plan and at the option of the committee may be written or oral or both. The final examination may not be administered before the thesis is available to all members of the student’s advisory committee in substantially final form, and all members have had adequate time to review the document. The examination is conducted by the student’s advisory committee as finally constituted. A thesis option student must be registered in the University in the semester or summer term in which the final examination is taken. Persons other than members of the graduate faculty may, with mutual consent of the candidate and the major professor, attend final examinations for advanced degrees. Upon completion of the questioning of the candidate, all visitors must excuse themselves from the proceedings. A positive vote by all members of the graduate committee with at most one dissension is required to pass a student on his or her exam. A department, or interdisciplinary degree program, may have a stricter requirement provided there is consistency within all degree programs within a department or interdisciplinary degree program.

A thesis option candidate may petition to be exempt from his/her final examination provided his/her degree plan GPR is 3.500 or greater and he/she has the approval of the advisory committee, the head of the student’s major department, or intercollegiate chair, if applicable, and the Office of Graduate and Professional Studies. It is required that the petition for exemption be submitted the same semester the student intends to submit the thesis.

For non-thesis option students, a final comprehensive examination is required. The Master of Science in Educational Human Resource Development, HRD option, the Master of Science in Nursing with a major in Nursing Education, the Master of Science Program in the Mays Business School and the Master of Science in Economics with a concentration in financial economics or financial econometrics do not have final examination requirements. Otherwise, exemptions from final
examinations are not allowed. The final exam cannot be held prior to the mid point of the final semester if questions on the exam are based on courses in which the student is currently enrolled. If a student has completed all required degree plan coursework, the student is not required to be registered for classes in the semester the final examination is administered (unless he/she holds an assistantship).

Exam results must be submitted with original signatures of only the committee members approved by the Office of Graduate and Professional Studies. If an approved committee member substitution (1 only) has been made, his/her signature must also be submitted to the Office of Graduate and Professional Studies.

Non-Thesis Option

For the non-thesis option, a thesis is not required. A final comprehensive examination is required for all non-thesis Master of Science programs except the Master of Science programs offered by the Mays Business School, the Master of Science in Economics with a concentration in financial economics or financial econometrics, the Master of Science with a major in Educational Human Resource Development, HRD option, and the Master of Science in Nursing with a major in Nursing Education. No exemptions are allowed. The requirements as to level of courses and examinations are the same as for the thesis option Master of Science degree. The final examination cannot be held prior to the mid point of the final semester if questions on the examination are based on courses in which the student is currently enrolled.

A student pursuing the non-thesis option is not allowed to enroll in 5V98, 5V99, or 691 (research) for any reason and 691 may not be used for credit toward a non-thesis option Master of Science degree. A maximum of 4 credit hours of 684 (Professional Internship), 8 credit hours of 685 (Directed Studies), and up to 3 credit hours of 690 (Theory of Research) or 695 (Frontiers in Research) may be used toward the non-thesis option Master of Science degree. In addition, any combination of 684, 685, 690 and 695 may not exceed 25 percent of the total credit hour requirement shown on the individual degree plan. All requirements for the non-thesis option Master of Science degree other than those specified above are the same as for the thesis option degree.

Additional Requirements

Additional Requirements

- Residence (p. 1266)
- Continuous Registration (p. 1266)
- Time Limit (p. 1266)
- Foreign Languages (p. 1266)
- Application for Degree (p. 1266)

Residence

In partial fulfillment of the residence requirement for the degree of Master of Science, the student must complete 9 resident credit hours during one regular semester or one 10-week summer semester in resident study at Texas A&M University. Upon recommendation of the student’s advisory committee, department head or Chair of the Interdisciplinary Program, if appropriate, and with approval of the Office of Graduate and Professional Studies, a student may be granted exemption from this requirement. Such a petition, however, must be approved prior to the student’s registration for the final 9 credit hours of required coursework.

Students who are employed full-time while completing their degree may fulfill total residence requirements by completion of less-than-full time course loads each semester. In order to be considered for this, the student is required to submit a Petition for Waivers and Exceptions along with verification of his/her employment to the Office of Graduate and Professional Studies.

See Residence Requirements (p. 22).

Continuous Registration

A student in the thesis option of the Master of Science program who has completed all coursework on his/her degree plan other than 5V98, 5V99, and 691 (research) is required to be in continuous registration until all requirements for the degree have been completed. See Continuous Registration Requirements (p. 25).

Time Limit

All degree requirements must be completed within a period of seven consecutive years for the degree to be granted. A course will be considered valid until seven years after the end of the semester in which it is taken. Graduate credit for coursework which is more than seven calendar years old at the time of the final examination (oral or written) may not be used to satisfy degree requirements.

A student who has chosen the thesis option must have the final corrected version of the thesis cleared by the Office of Graduate and Professional Studies no later than one year after the final examination, or approval of a petition for exemption from the final exam, or within the seven-year time limit, whichever occurs first. Failure to do so will result in the degree not being awarded.

Foreign Languages

No specific language requirement exists for the Master of Science degree.

Application for Degree

For information on applying for your degree, please visit the Graduation (p. 24) section.

Doctor of Philosophy in Statistics

Work leading to the degree of Doctor of Philosophy (PhD) is designed to give the candidate a thorough and comprehensive knowledge of his or her professional field and training in methods of research. The final basis for granting the degree shall be the candidate’s grasp of the subject matter of a broad field of study and a demonstrated ability to do independent research. In addition, the candidate must have acquired the ability to express thoughts clearly and forcefully in both oral and written languages. The degree is not granted solely for the completion of coursework, residence and technical requirements, although these must be met.

For a student who has completed a master’s degree, a DDS/DMD, DVM or MD at a U.S. institution, a minimum of 64 hours is required on the degree plan for the degree of Doctor of Philosophy. For a student who has completed a baccalaureate degree but not a master’s degree or a U.S. DDS/DMD, DVM or MD, a minimum of 96 hours is required on the degree plan for the degree of Doctor of Philosophy.
### Steps to Fulfill Doctoral Degree Requirements

1. Meet with departmental/intercollegiate graduate advisor to plan course of study for first semester.  
   **When:** Before first semester registration.  
   **Approved by:** Graduate advisor.

2. Establish advisory committee. Submit a degree plan.  
   **When:** Prior to the deadline imposed by the student's college or intercollegiate programs, and no later than 90 days prior to preliminary examination.  
   **Approved by:** Advisory committee, department head or intercollegiate faculty chair, and Office of Graduate and Professional Studies (OGAPS).

3. Complete English Language Proficiency requirements (if applicable), and coursework detailed on degree plan.  
   **When:** Before preliminary examination.

4. Complete the preliminary examination.  
   **When:** See steps for completing the preliminary examination. The preliminary examination results must have been submitted to OGAPS 14 weeks prior to the date of the defense.  
   **Approved by:** Advisory committee, department head or chair of the intercollegiate faculty, and OGAPS.

5. Submit proposal for dissertation or record of study to the Office of Graduate and Professional Studies.  
   **When:** No later than 20 working days prior to the submission of the Request for the Final Examination.  
   **Approved by:** Advisory committee, department head or intercollegiate faculty chair, and OGAPS.

6. Complete residence requirement.  
   **When:** Before submitting request to schedule final oral examination.  
   **Approved by:** OGAPS

7. Apply for degree; pay graduate fee.  
   **When:** During the first week of the final semester; see OGAPS calendar for deadlines.

8. Submit request for permission to hold and announce final oral examination.  
   **When:** Must be received by OGAPS at least 10 working days before requested exam date. See OGAPS calendar for deadlines.  
   **Approved by:** Advisory committee, department head or intercollegiate faculty chair, and OGAPS.

9. Successfully complete final examination.  
   **When:** The Report of the Final Examination Form should be submitted to OGAPS within 10 days following the exam.  
   **Approved by:** Advisory committee and OGAPS.

10. Upload one approved final copy of the dissertation or record of study as a single pdf file (http://ogaps.tamu.edu) and submit a signed approval form to the Office of Graduate and Professional Studies.  
    **When:** See OGAPS calendar for deadlines.  
    **Approved by:** Advisory committee, department head or intercollegiate faculty chair, and Office of Graduate and Professional Studies.

11. Graduate; arrange for cap and gown.  
    **For more information, visit http://graduation.tamu.edu.**

---

Note: Once formal coursework is complete, you must be continuously registered until all degree requirements have been met. See Continuous Registration Requirements (p. 25).

The aim of the PhD program is to provide comprehensive and balanced training in statistical methods and statistical theory. Particular emphasis will be placed on training students to independently recognize the relevance of statistical methods to the solution of specific problems and to enable them to develop new methods when they are needed. The training will also aim at conveying a sound knowledge of existing statistical theory, including the mathematical facility to develop new results in statistical methodology. At the same time, the program will be kept sufficiently flexible to permit students to develop their specific interests.

The following courses are offered on an irregular basis:

### Program Requirements
Program Requirements

- Student's Advisory Committee (p. 1268)
- Degree Plan (p. 1268)
- Transfer of Credit (p. 1268)
- Research Proposal (p. 1269)
- Examinations (p. 1269)
  - Preliminary Examination (p. 1269)
  - Final Examination/Dissertation Defense (p. 1271)
- Dissertation (p. 1271)

Student's Advisory Committee

After receiving admission to graduate studies and enrolling, the student will consult with the head of his or her major or administrative department (or chair of the intercollegiate faculty) concerning appointment of the chair of the advisory committee. The student’s advisory committee will consist of no fewer than four members of the graduate faculty representative of the student’s several fields of study and research, where the chair or co-chair must be from the student's department (or intercollegiate faculty, if applicable), and at least one or more of the members must have an appointment to a department other than the student's major department. The outside member for a student in an interdisciplinary degree program must be from a department different from the chair of the student’s committee.

The chair, in consultation with the student, will select the remainder of the advisory committee. Only graduate faculty members located on Texas A&M University campuses may serve as chair of a student’s advisory committee. Other Texas A&M University graduate faculty members located off-campus may serve as a member or co-chair (but not chair), with a member as the chair.

If the chair of a student’s advisory committee voluntarily leaves the University and the student is near completion of the degree and wants the chair to continue to serve in this role, the student is responsible for securing a current member of the University Graduate Faculty, from the student’s academic program and located near the Texas A&M University campus site, to serve as the co-chair of the committee. The Department Head or Chair of Intercollegiate faculty may request in writing to the Associate Provost for Graduate and Professional Studies that a faculty member who is on an approved leave of absence or has voluntarily separated from the university, be allowed to continue to serve in the role of chair of a student’s advisory committee without a co-chair for us to one year. The students should be near completion of the degree. Extensions beyond the one year period can be granted with additional approval of the Dean.

The committee members’ signatures on the degree plan indicate their willingness to accept the responsibility for guiding and directing the entire academic program of the student and for initiating all academic actions concerning the student. Although individual committee members may be replaced by petition for valid reasons, a committee cannot resign en masse. The chair of the committee, who usually has immediate supervision of the student’s research and dissertation or record of study, has the responsibility for calling all meetings of the committee. The duties of the committee include responsibility for the proposed degree plan, the research proposal, the preliminary examination, the dissertation or record of study and the final examination. In addition, the committee, as a group and as individual members, is responsible for counseling the student on academic matters, and, in the case of academic deficiency, initiating recommendations to the Office of Graduate and Professional Studies.

Degree Plan

The student’s advisory committee will evaluate the student’s previous education and degree objectives. The committee, in consultation with the student, will develop a proposed degree plan and outline a research problem which, when completed, as indicated by the dissertation (or its equivalent for the degree of Doctor of Education or the degree of Doctor of Engineering), will constitute the basic requirements for the degree. The degree plan must be filed with the Office of Graduate and Professional Studies prior to the deadline imposed by the student’s college and no later than 90 days prior to the preliminary examination.

This proposed degree plan should be submitted through the online Document Processing Submission System located on the website http://ogdpsss.tamu.edu. A minimum of 64 hours is required on the degree plan for the Doctor of Philosophy for a student who has completed a master’s degree. A student who has completed a DDS/DMD, DVM or a MD at a U.S. institution is also required to complete a minimum of 64 hours. A student who has completed a baccalaureate degree but not a master’s degree will be required to complete a 96-hour degree plan. Completion of a DDS/DMD, DVM or MD degree at a foreign institution requires completion of a minimum of 96 hours for the Doctor of Philosophy. A field of study may be primarily in one department or in a combination of departments. A degree plan must carry a reasonable amount of 691 or 5V88/5V99 (research).

Additional coursework may be added by petition to the approved degree plan by the student’s advisory committee if it is deemed necessary to correct deficiencies in the student’s academic preparation. No changes can be made to the degree plan once the student’s Request for Final Examination is approved by the Office of Graduate and Professional Studies.

Approval to enroll in any professional course (900-level) should be obtained from the head of the department (or Chair of the intercollegiate faculty, if applicable) in which the course will be offered before including such a course on a degree plan. No credit may be obtained by correspondence study, by extension or for any course of fewer than three weeks duration.

Transfer of Credit

Courses for which transfer credits are sought must have been completed with a grade of B or greater and must be approved by the student’s advisory committee and the Office of Graduate and Professional Studies. These courses must not have been used previously for another degree. Except for officially approved cooperative doctoral programs, credit for thesis or dissertation research or the equivalent is not transferable. Credit for “internship” coursework in any form is not transferable. Courses taken in residence at an accredited U.S. institution or approved international institution with a final grade of B or greater will be considered for transfer credit if, at the time the courses were completed, the courses would be accepted for credit toward a similar degree for a student in degree-seeking status at the host institution. Credit for coursework taken by extension is not transferable. Coursework in which no formal grades are given or in which grades other than letter grades (A or B) are earned (for example, CR, P, S, U, H, etc.) is not accepted for transfer credit. Credit
for coursework submitted for transfer from any college or university must be shown in semester credit hours, or equated to semester credit hours.

Courses used toward a degree at another institution may not be applied for graduate credit. If the course to be transferred was taken prior to the conferment of a degree at the transfer institution, a letter from the registrar at that institution stating that the course was not applied for credit toward the degree must be submitted to the Office of Graduate and Professional Studies.

Grades for courses completed at other institutions are not included in computing the GPR. An official transcript from the university at which transfer courses are taken must be sent directly to the Office of Admissions.

Research Proposal

The general field of research to be used for the dissertation should be agreed on by the student and the advisory committee at their first meeting, as a basis for selecting the proper courses to support the proposed research.

As soon thereafter as the research project can be outlined in reasonable detail, the dissertation research proposal should be completed. The research proposal should be approved at a meeting of the student’s advisory committee, at which time the feasibility of the proposed research and the adequacy of available facilities should be reviewed. The approved proposal, signed by all members of the student’s advisory committee, the head of the student’s major department (or chair of the intercollegiate faculty, if applicable), must be submitted to the Office of Graduate and Professional Studies at least 20 working days prior to the submission of the Request for the Final Examination.

Compliance issues must be addressed if a graduate student is performing research involving human subjects, animals, infectious biohazards and recombinant DNA. A student involved in these types of research should check with the Office of Research Compliance and Biosafety at (979) 458-1467 to address questions about all research compliance responsibilities. Additional information can also be obtained on the website http://rcb.tamu.edu.

Examinations

Preliminary Examination

The student’s major department (or chair of the intercollegiate faculty, if applicable) and his or her advisory committee may require qualifying, cumulative or other types of examinations at any time deemed desirable. These examinations are entirely at the discretion of the department and the student’s advisory committee.

The preliminary examination is required. The preliminary examination for a doctoral student shall be given no earlier than a date at which the student is within 6 credit hours of completion of the formal coursework on the degree plan (i.e., all coursework on the degree plan except 681, 684, 690, 691, 5V98, 5V99 and 692 courses). The student is strongly encouraged to complete the Preliminary Examination no later than the end of the semester following the completion of the formal coursework on the degree plan. The Office of Graduate and Professional Studies must receive the results of the preliminary examination at least 14 weeks prior to the final examination date. The examination shall be oral and written unless otherwise recommended by the student’s advisory committee and approved by the Office of Graduate and Professional Studies. The written part of the examination will cover all fields of study included in the student’s degree plan. Each member of the advisory committee is responsible for administering a written examination in his or her particular field, unless he or she chooses to waive participation in this part of the examination. Two or more members of the advisory committee may give a joint written examination. One or more members may require a student to take a departmental or intercollegiate faculty examination to supplement or replace a written examination. Each written examination must be completed and reported as satisfactory to the chair of the advisory committee before the oral portion of the examination may be held. In case any written examination is reported unsatisfactory, the entire advisory committee must agree (1) to proceed with the oral portion of the preliminary examination, or (2) to adopt another course of action regarding the unsatisfactory written examination.

Prior to scheduling the preliminary examination with the other committee members, the committee chair will review the eligibility criteria with the student, using the Preliminary Examination Checklist to ensure the student is ready for the examination. The following list of eligibility requirements applies:

- Student is registered at Texas A&M University for the semester or summer term during which any portion of the preliminary examination may fall. If the entire examination falls between semesters, then the student must be registered for the term immediately preceding the examination.
- An approved degree plan was on file with the Office of Graduate and Professional Studies at least 90 days prior to the first written examination.
- Student’s cumulative GPR is at least 3.000.
- Student’s degree plan GPR is at least 3.000.
- All English language proficiency requirements have been satisfied.
- All committee members have scheduled or waived the written portion and agreed to attend the oral portion of the examination or have found a substitute. Only one substitution is allowed and it cannot be for the committee chair.
- At the end of the semester in which the exam is given, there are no more than 6 hours of coursework remaining on the degree plan (except 681, 684, 690, 691, 5V98, 5V99 and 692). The head of the student’s department (or Chair of the Intercollegiate Faculty, if applicable) has the authority to approve a waiver of this criterion.
- The time span from the first written examination to the oral is no more than three weeks. (In cases of department-wide written examinations, this criterion is not applicable.) The head of the student’s department (or chair of the intercollegiate faculty, if applicable) has the authority to approve a waiver of this criterion.

Once all requirements are met, departments or intercollegiate faculty may announce the schedule of the written and oral parts of the examination.

Credit for the preliminary examination is not transferable. If a departmental or intercollegiate faculty examination is used as part of the written portion of the preliminary examination, it must be the last examination offered prior to the date scheduled for the preliminary examination. In the schedule of the written portion, all members of the student’s advisory committee are to be included.

Through the preliminary examination, the student’s advisory committee should satisfy itself that the student has demonstrated the following qualifications:
1. a mastery of the subject matter of all fields in the program;
2. an adequate knowledge of the literature in these fields and an ability to carry out bibliographical research.

In case a student is required to take, as a part of the written portion of a preliminary examination, an examination administered by a department or intercollegiate faculty, the department or intercollegiate faculty must:

1. offer the examination at least once every six months. The departmental or interdisciplinary degree program examination should be announced at least 30 days prior to the scheduled examination date.
2. assume the responsibility for marking the examination satisfactory or unsatisfactory, or otherwise graded, and in the case of unsatisfactory, stating specifically the reasons for such a mark.
3. forward the marked examination to the chair of the student’s advisory committee within one week after the examination.

The chair of the student’s advisory committee is responsible for making all written examinations available to the members of the advisory committee at or before the oral portion of the preliminary examination. A positive vote by all members of the graduate committee with at most one dissent is required to pass a student on his or her preliminary exam. A department or intercollegiate faculty can have a stricter requirement provided there is consistency within all degree programs within a department or an interdisciplinary degree program.

The chair of the advisory committee will promptly report the results of the Preliminary Examination to the Office of Graduate and Professional Studies, using the Report of Doctoral Preliminary Examination form and the Preliminary Examination checklist. Both forms must have the appropriate signatures. These forms should be submitted to the Office of Graduate and Professional Studies within 10 working days of the scheduled preliminary examination.

The Report of the Preliminary Examination form must be submitted with original signatures of the approved committee members. If an approved committee member substitution (1 only) has been made, his/her signature must also be included on the form submitted to the Office of Graduate and Professional Studies. The original signature of the department head is also required on the form.

Steps for Completing the Preliminary Examination

1. Establish advisory committee. Submit a degree plan. When: Prior to the deadline set by the student’s college, and no later than 90 days prior to preliminary examination. Approved by: Advisory committee, department or intercollegiate faculty chair, and Office of Graduate and Professional Studies (OGAPS).

2. Complete English language proficiency requirements (if applicable), and coursework detailed on degree plan. When: Before preliminary examination.

3. Student and chair review eligibility requirements for the preliminary exam using the “Preliminary Examination Checklist”. When: Several weeks before the proposed date of the preliminary examination. Checklist must be signed by chair and department head, or intercollegiate faculty chair.

4. Student checks the availability of committee members. When: Several weeks before the proposed date of the preliminary examination.

5. Students prepares and submits any petitions found necessary by the review of the eligibility requirements. When: At least three weeks before the proposed date of the preliminary examinations. Approved by: Advisory committee, department head or intercollegiate faculty chair, and OGAPS.

6. When exam date is determined, the department may announce the schedule. Approved by: Committee chair, department head or intercollegiate faculty chair. When: Within 10 working days of the date of the scheduled oral examination and no later than 14 weeks prior to the final defense date. Approved by: Advisory committee.

A student must be registered at Texas A&M University for a minimum of one semester credit hour in the semester or summer term in which they will take any portion of the Preliminary Examination.
Office of Graduate and Professional Studies notifies the student and chair of any actions necessary to rectify any deficiencies. When: Upon receipt of the report of the doctoral Preliminary Examination.

Final Examination/Dissertation Defense

The candidate for the doctoral degree must pass a final examination by deadline dates announced in the “Office of Graduate and Professional Studies Calendar” each semester or summer term. The doctoral student is allowed only one opportunity to take the final examination. No student may be given a final examination unless his or her current official cumulative and degree plan GPAs are 3.00 or better and he or she has been admitted to candidacy. No unsolved grades of D, F, or U for any course can be listed on the degree plan. To absolve a deficient grade, a student must repeat the course and achieve a grade of C or better. A student must have completed all coursework on his or her degree plan with the exception of 691, 5V98, or 5V99 (research) or 692 (Professional Study) hours. The student must be registered for all remaining hours; no hours remain to be taken on the degree plan. The preliminary examination results must have been submitted to the Office of Graduate and Professional Studies 14 weeks prior to the date of the defense. The research proposal must have been submitted to the Office of Graduate and Professional Studies 25 working days prior to the date of the final examination. Any changes to the degree plan must be approved by the Office of Graduate and Professional Studies prior to the approval of the final examination. The request to hold and announce the final examination must be submitted to the Office of Graduate and Professional Studies a minimum of 10 working days in advance of the scheduled date. Examination/Defense results must be submitted to the Office of Graduate and Professional Studies within 10 working days of the scheduled examination/defense date. The Office of Graduate and Professional Studies must be notified in writing of any cancellations.

The student’s advisory committee will conduct this examination. The final examination is not to be administered until the dissertation or record of study is available in substantially final form to the student’s advisory committee, and all concerned have had adequate time to review the document. Additionally, all English Language Proficiency requirements must be satisfied prior to scheduling the examination. Whereas the final examination may cover the broad field of the candidate’s training, it is presumed that the major portion of the time will be devoted to the dissertation and closely allied topics. Persons other than members of the graduate faculty may, with mutual consent of the candidate and the chair of the advisory committee, be invited to attend a final examination for an advanced degree. A positive vote by all members of the graduate committee with at most one dissension is required to pass a student on his or her exam. A department can have a stricter requirement provided there is consistency within all degree programs within a department. Upon completion of the questioning of the candidate, all visitors must excuse themselves from the proceedings.

The advisory committee will submit its recommendations on the appropriate Report of the Final Examination for Doctoral Candidates form to the Office of Graduate and Professional Studies regarding acceptability of the candidate for the doctoral degree. A student must be registered in the University in the semester or summer term in which the final examination is taken.

The Report of the Final Examination Form must be submitted with original signatures of only the committee members approved by the Office of Graduate and Professional Studies. If an approved committee member substitution (1 only) has been made, his/her signature must be included on the form submitted to the Office of Graduate and Professional Studies.

Dissertation

The ability to perform independent research must be demonstrated by the dissertation, which must be the original work of the candidate. Whereas acceptance of the dissertation is based primarily on its scholarly merit, it must also exhibit creditable literary workmanship. The format of the dissertation must be acceptable to the Office of Graduate and Professional Studies. Guidelines for the preparation of the thesis are available in the Thesis Manual, which is available online at http://ogaps.tamu.edu.

After successful defense and approval by the student’s advisory committee and the head of the student’s major department (or chair of the intercollegiate faculty, if applicable), a student must submit his/her dissertation in electronic format as a single PDF file. The PDF file must be uploaded to the website, http://ogaps.tamu.edu. Additionally, a signed approval form must be brought or mailed to the Office of Graduate and Professional Studies. Both the PDF file and the signed approval form are required by the deadline.

Deadline dates for submitting are announced each semester or summer term in the Office of Graduate and Professional Studies Calendar (see Time Limit statement). These dates also can be accessed via the website http://ogaps.tamu.edu.

Before a student can be “cleared” by Thesis and Dissertation Services, a processing fee must be paid through Student Business Services. This processing fee is for the thesis/dissertation services provided. After commencement, dissertations are digitally stored and made available through the Texas A&M Libraries.

A dissertation that is deemed unacceptable by the Office of Graduate and Professional Studies because of excessive corrections will be returned to the student’s department head or chair of the intercollegiate faculty. The manuscript must be resubmitted as a new document, and the entire review process must begin anew. All original submittal deadlines must be met during the resubmittal process in order to graduate.

Additional Requirements

Additional Requirements

- Residence (p. 1271)
- Time Limit (p. 1272)
- Continuous Registration (p. 1272)
- Admission to Candidacy (p. 1272)
- Languages (p. 1272)
- 99-Hour Cap on Doctoral Degree (p. 1272)
- Application for Degree (p. 1273)

Residence

A student who enters the doctoral degree program with a baccalaureate degree must spend one academic year plus one semester in resident study at Texas A&M University. A student who holds master’s degree when he/she enters doctoral degree program must spend one academic year in resident study. One academic year may include two adjacent regular semesters or one regular semester and one adjacent 10-week
To be admitted to candidacy for a doctoral degree, a student must have:

1. completed all formal coursework on the degree plan with the exception of any remaining 681, 684, 690 and 691, or 5V98 and 5V99,
2. a 3.0 Graduate GPA and a Degree Plan GPA of at least 3.0 with no grade lower than C in any course on the degree plan,
3. passed the preliminary examination (written and oral portions),
4. submitted an approved dissertation proposal,
5. met the residence requirements. The final examination will not be authorized for any doctoral student who has not been admitted to candidacy.

Languages

A student is required to possess a competent command of English. For English language proficiency requirements, see the Admissions section of this catalog. The doctoral (PhD) foreign language requirement at Texas A&M University is a departmental option, to be administered and monitored by the individual departments of academic instruction.

99-Hour Cap on Doctoral Degrees

In Texas, public colleges and universities are funded by the state according to the number of students enrolled. In accordance with legislation passed by the Texas Legislature, the number of hours for which state universities may receive subvention funding at the doctoral rate for any individual is limited to 99 hours. Texas A&M University and other universities will not receive subvention for hours in excess of the limit.

Institutions of higher education are allowed to charge the equivalent of nonresident tuition to a resident doctoral student who has enrolled in 100 or more semester credit hours of doctoral coursework.

A doctoral student at Texas A&M has seven years to complete his/her degree before being charged out-of-state tuition. A doctoral student who, after seven years of study, has accumulated 100 or more doctoral hours will be charged tuition at a rate equivalent to out-of-state tuition. Please note that the tuition increases will apply to Texas residents as well as students from other states and countries who currently are charged tuition at the resident rate. This includes those doctoral students who hold GAT, GANT, and GAR appointments of 20 or more hours and recipients of competitive fellowships who receive more than $1,000 per semester. Doctoral students who, after seven years of study, have not accumulated 100 hours are eligible to pay in-state tuition if otherwise eligible.

For count purposes, a year is counted as three semesters, normally fall, spring and summer. Using this system, a student is allowed 21 semesters as a G8 student to complete the doctoral degree before being penalized with the higher tuition rate. Any semester in which a G8 student is enrolled for a doctoral level course is counted.

The following majors are exempt from the 99-Hour Cap on Doctoral Degrees:

- Biomedical Sciences
- Biochemistry
- Microbiology
- Genetics
- Toxicology
- Nutrition Sciences
- Community Clinical Psychology
- Counseling Psychology
- School Psychology
- Veterinary Pathology
- Clinical Psychology
- Counseling Psychology
- Medical Sciences
- Health Services Research
- Health Promotion and Community Health Sciences
• Epidemiology and Environmental Health

The hour limit for these majors is 130 doctoral hours.

Application for Degree

For information on applying for your degree, please visit the Graduation (p. 24) section.

College of Veterinary Medicine and Biomedical Sciences

http://vetmed.tamu.edu

Administrative Officers

Dean - Eleanor M. Green, B.S., D.V.M.

Associate Dean for Professional Programs - Kenita S. Rogers, D.V.M., M.S.

Associate Dean for Research and Graduate Studies - Robert C. Burghardt, Ph.D.

Associate Dean for Undergraduate Education - Evelyn Tiffany-Castiglioni, Ph.D.

Assistant Dean of Biomedical Sciences - Elizabeth Crouch, Ph.D.

Assistant Dean for Finance and Administration - Belinda S. Hale, M.B.A.

Director of Student Services for Professional Programs - Leslie A. Fiechtner, M.S.

Departments

Departments

• Department of Veterinary Integrative Biosciences (p. 1295)
• Department of Veterinary Large Animal Clinical Sciences (p. 1301)
• Department of Veterinary Pathobiology (p. 1302)
• Department of Veterinary Physiology and Pharmacology (p. 1311)
• Department of Veterinary Small Animal Clinical Sciences (p. 1312)

Interdepartmental Programs

• Doctor of Philosophy in Biomedical Sciences (p. 1278)
• Master of Science in Biomedical Sciences (p. 1273)
• Master of Science in Laboratory Animal Medicine (p. 1284)
• Master of Science in Science and Technology Journalism (p. 1288)

First Professional Doctoral

• Doctor of Veterinary Medicine in Veterinary Medicine (p. 1292)

Master of Science in Biomedical Sciences

The Master of Science (MS) curriculum is designed to develop new understanding through research and creativity. Students have the option to pursue a thesis or non-thesis Master of Science degree.

Steps to Fulfill Master’s Degree Requirements

1. Meet with departmental graduate advisor to plan course of study for first semester. [When: Before first semester registration.]
   [Approved by: Graduate advisor or chair of the intercollegiate faculty.]

2. Establish advisory committee. Submit a degree plan. [When: Prior to the deadline imposed by the student's college and no later than 90 days prior to final oral or thesis defense.]
   [Approved by: Advisory committee, department head or chair of the intercollegiate faculty, and Office of Graduate and Professional Studies (OGAPS).]

3. If thesis is required, submit thesis proposal to the Office of Graduate and Professional Studies. [When: At least 20 working days prior to the submission of the Request for the Final Examination.]
   [Approved by: Advisory committee, department head or chair of the intercollegiate faculty and OGAPS.]

4. Apply for degree; pay graduation fee. [When: During the first week of the final semester, see OGAPS calendar.]

5. Check to be sure degree program and advisory committee are up to date and all ELP requirements (if applicable) and coursework are complete. [When: Well before submitting request to schedule final examination.]
There are two MS options available from which a student may choose, the thesis concentration and the non-thesis concentration. The Master of Science in Biomedical Sciences with a Thesis concentration provides an academic and research experience that educates students within the context of cross-disciplinary knowledge and prepares students to excel in a research career in areas as diverse as academia, government, industry, and others. Additionally, a Master of Science in Biomedical Sciences with a Non-Thesis concentration has a curriculum designed for students who wish to gain academic preparation beyond the undergraduate degree before entering a professional program of study in healthcare or professional employment.

**Program Requirements**

**Program Requirements**

- Student's Advisory Committee (p. 1274)
- Degree Plan (p. 1275)
- Credit Requirements (p. 1275)
- Transfer of Credit (p. 1275)
- Limitations on the Use of Transfer, Extension and Certain Other Courses (p. 1275)
- Thesis Option (p. 1276)
  - Thesis Proposal (p. 1276)
  - Final Examination (p. 1276)
- Non-Thesis Option (p. 1277)

**Student's Advisory Committee**

After receiving admission to graduate studies and enrolling for coursework, the student will consult with the head of his or her major or administrative department (or intercollegiate faculty, if applicable) concerning appointment of the chair of his or her advisory committee. With the exception of the Mays Business School non-thesis option, the Master of Science in Economics with a concentration in financial economics or financial econometrics, the Master of Science with a major in Educational Human Resource Development, HRD option, and the Master of Science in Nursing with a major in Nursing Education, the student’s advisory committee for the master’s degree will consist of no fewer than three members of the graduate faculty, representative of the student’s fields of study and research. The chair or the co-chair of the advisory committee must be from the student’s major department (or intercollegiate faculty, if applicable), and at least one or more of the members must have an appointment to a department other than the student’s major department. The outside member for students in an interdisciplinary program must have an appointment to a department different from the chair of the student’s committee.

The chair, in consultation with the student, will select the remainder of the advisory committee. The student will interview each prospective committee member to determine whether he or she is willing to serve. Only graduate faculty members located on Texas A&M University campuses may serve as chair of a student’s advisory committee. Other graduate faculty members located off campus may serve as a member or co-chair (but not chair) with a member as the chair. The chair of the committee, who usually has immediate supervision of the student’s research and thesis, has the responsibility for calling required meetings of the committee and for calling meetings at any other time considered desirable.

If the chair of a student’s advisory committee voluntarily leaves the University and the student is near completion of the degree and wants the chair to continue to serve in this role, the student is responsible for
securing a current member of the University Graduate Faculty, from the student’s academic program and located near the Texas A&M University campus site, to serve as the co-chair of the committee. The Department Head or Chair of Intercollegiate faculty may request in writing to the Associate Provost for Graduate and Professional Studies that a faculty member who is on an approved leave of absence or has voluntarily separated from the university, be allowed to continue to serve in the role of chair of a student’s advisory committee without a co-chair for us to one year. The students should be near completion of the degree. Extensions beyond the one year period can be granted with additional approval of the Dean.

If the chair of the student’s advisory committee is unavailable for an extended time in any academic period during which the student is involved in activities relating to an internship, thesis or professional paper, and is registered for courses such as 5V98, 5V99, 684, 691, 692 or 693, the student may request, in writing, that the department head appoint an alternate advisory committee chair during the interim period.

The duties of the committee include responsibility for the proposed degree plan, the research proposal, the thesis and the final examination. In addition, the committee as a group and as individual members are responsible for advising the student on academic matters, and, in the case of academic deficiency, initiating recommendations to the Office of Graduate and Professional Studies.

The committee members’ approval on the degree plan indicate their willingness to accept the responsibility for guiding and directing the entire academic program of the student and for initiating all academic actions concerning the student. Although individual committee members may be replaced by petition for valid reasons, a committee cannot resign en masse.

**Degree Plan**

The student’s advisory committee, in consultation with the student, will develop the proposed degree plan. The degree plan must be completed and filed with the Office of Graduate and Professional Studies prior to the deadline imposed by the student’s college or interdisciplinary degree program, if applicable, and no later than 90 days prior to the date of the final oral examination or thesis defense.

A student should submit the degree plan using the online Document Processing Submission System (http://ogsdpss.tamu.edu).

A student submitting a proposed degree plan for a Master of Science degree should designate on the official degree plan the appropriate program option.

Additional coursework may be added to the approved degree plan by petition if it is deemed necessary by the advisory committee to correct deficiencies in the student’s academic preparation. No changes can be made to the degree plan once the student’s Request for Final Examination or Request for Final Examination Exemption is approved by the Office of Graduate and Professional Studies.

**Credit Requirement**

A minimum of 32 semester credit hours of approved courses and research is required for the thesis option Master of Science degree with the exception of the Master of Science in Visualization, which requires 48 hours and Master of Science in Athletic Training, which requires 60 hours. A minimum of 36 semester credit hours of approved coursework is required for the Non-Thesis Option.

Ordinarily the student will devote the major portion of his or her time to work in one or two closely related fields. Other work will be in supporting fields of interest.

**Transfer of Credit**

A student who has earned 12 hours of graduate credit in residence at Texas A&M University may be authorized to transfer courses in excess of the limits prescribed below upon the advice of the advisory committee and with the approval of the Office of Graduate and Professional Studies. Courses taken in residence at an accredited U.S. institution or approved international institution with a final grade of B or greater may be considered for transfer credit if, at the time the courses were completed, the courses would be accepted for credit toward a similar degree for a student in degree-seeking status at the host institution. Otherwise, the limitations stated in the following section apply. Coursework in which no formal grades are given or in which grades other than letter grades (A or B) are earned (for example, CR, P, S, U, H, etc.) is not accepted for transfer credit. Courses appearing on the degree plan with grades of D, F or U may not be absolved by transfer work. Credit for research or the equivalent is not transferable. Credit for coursework submitted for transfer from any college or university must be shown in semester credit hours or equated to semester credit hours. An official transcript from the university at which the transfer coursework was taken must be sent directly to the Office of Admissions.

Courses used toward a degree at another institution may not be applied for graduate credit. If the course to be transferred was taken prior to the conferral of a degree at the transfer institution, a letter from the registrar at that institution stating that the course was not applied for credit toward the degree must be submitted to the Office of Graduate and Professional Studies.

Grades for courses completed at other institutions are not included in computing the GPR.

**Limitations on the Use of Transfer, Extension and Certain Other Courses**

Some departments may have more restrictive requirements for transfer work. If otherwise acceptable, certain courses may be used toward meeting credit-hour requirements for the master’s degree under the following limitations.

1. The maximum number of credit hours which may be considered for transfer credit is the greater of 12 hours or one-third (1/3) of the total hours of a degree plan. The following restrictions apply:
   - Graduate and/or upper-level undergraduate courses taken in residence at an accredited U.S. institution, or approved international institution with a final grade of B or greater will be considered for transfer credit if, at the time the courses were completed, the student was in degree-seeking status at Texas A&M University, or the student was in degree-seeking status at the institution at which the courses were taken; and if the courses would be accepted for credit toward a similar degree for a student in degree-seeking status at the host institution.
   - Courses previously used for another degree are not acceptable for degree plan credit.
2. The maximum number of credit hours taken in post-baccalaureate non-degree (G6) classification at Texas A&M University which may be considered for application to the degree plan is 12.

3. Not more than 12 hours may be used in any combination of the following categories:
   - Not more than 8 hours in the combination of 5V98, 5V99, and 691 (research) or 684 (Professional Internship) may be used.
   - Not more than 8 hours of 685 (Directed Studies) may be used.
   - Not more than 3 hours of 690 (Theory of Research) may be used.
   - Not more than 3 hours of 695 (Frontiers in Research) may be used.

4. A maximum of 2 hours of Seminar (681).

5. A maximum of 9 hours of advanced undergraduate courses (300- or 400-level).

6. For graduate courses of three weeks’ duration or less, taken at other institutions, up to 1 hour of credit may be obtained for each five-day week of coursework. Each week of coursework must include at least 15 contact hours.

7. Continuing education courses may not be used for graduate credit.

8. Extension courses are not acceptable for credit.

9. For the Degree of Master of Science in Medical Science, students with a first professional degree (MD, DDS or DVM) may take up to 20 hours of 691 (research). For the remaining hours, a maximum of 2 hours can be Seminar (681) and a maximum of 3 hours can be Directed Studies (685).

Exceptions will be permitted only in unusual cases and when petitioned by the student’s advisory committee and approved by the Office of Graduate and Professional Studies.

**Thesis Option**

An acceptable thesis is required for the Master of Science degree for a student who selects the thesis option program. The finished work must reflect a comprehensive understanding of the pertinent literature and express in clear English, the problem(s) for study, the method, significance and results of the student’s original research. Guidelines for the preparation of the thesis are available in the Thesis Manual, which is available online at the Office of Graduate and Professional Studies website.

After successful defense (or exemption) and approval by the student’s advisory committee and the head of the student’s major department (or chair of the intercollegiate faculty, if applicable), the student must submit his/her thesis in electronic format as a single PDF file. The PDF file must be uploaded to the Office of Graduate and Professional Studies website. Additionally, a signed approval form must be brought or mailed to the Office of Graduate and Professional Studies. The PDF file and the signed approval form are required by the deadline.

Deadline dates for submitting the thesis are announced each semester or summer term in the “Office of Graduate and Professional Studies Calendar” (see Time Limit statement). These dates also can be accessed via the Office of Graduate and Professional Studies website.

Before a student can be “cleared” by Thesis and Dissertation Services, a processing fee must be paid through Student Business Services. This processing fee is for the thesis/dissertation services provided. After commencement, dissertations are digitally stored and made available through the Texas A&M Libraries.

A thesis that is deemed unacceptable by the Office of Graduate and Professional Studies because of excessive corrections will be returned to the student’s department head (or chair of the intercollegiate faculty, if applicable). The manuscript must be resubmitted as a new document, and the entire review process must begin again. All original submittal deadlines must be met during the resubmittal process to graduate that semester.

**Thesis Proposal**

For the thesis option Master of Science degree, the student must prepare a thesis proposal for approval by the advisory committee and the head of the major department or chair of the interdisciplinary faculty, if applicable. This proposal must be submitted to the Office of Graduate and Professional Studies at least 20 working days prior to the submission of the request for the final examination.

Compliance issues must be addressed if a graduate student is performing research involving human subjects, animals, infectious biohazards and recombinant DNA. A student involved in these types of research should check with the Office of Research Compliance and Biosafety at (979) 458-1467 to address questions about all research compliance responsibilities. Additional information can also be obtained on the Office of Research Compliance and Biosafety website.

**Thesis Defense/Final Examination**

A student must pass a final examination by dates announced each semester or summer term in the Office of Graduate and Professional Studies Calendar. The Office of Graduate and Professional Studies must be notified in writing of any cancellation. To be eligible to take the final examination, a student’s GPR must be at least 3.000 for courses on the degree plan and for all courses completed at Texas A&M which are eligible to be applied to a graduate degree, and there must be no unabsolved grades of D, F or U for any course listed on the degree plan. To absolve a deficient grade, the student must repeat the course at Texas A&M University and achieve a grade of C or better. All coursework on the degree plan must have been completed with the exception of those hours for which the student is registered. Additionally, all English Language Proficiency requirements must be satisfied prior to scheduling the examination. If applicable, an approved thesis proposal must be on file in the Office of Graduate and Professional Studies according to published deadlines.

A request to hold and announce the final examination must be submitted to the Office of Graduate and Professional Studies a minimum of 10 working days in advance of the scheduled date for the examination. Examinations which are not completed and reported as satisfactory to the Office of Graduate and Professional Studies within 10 working days of the scheduled examination date will be recorded as failures. A student may be given only one opportunity to repeat the final examination for the master’s degree and that must be within a time period that does not extend beyond the end of the next regular semester (summer terms are excluded).

For thesis option students, the final examination covers the thesis and all work taken on the degree plan and at the option of the committee may be written or oral or both. The final examination may not be administered before the thesis is available to all members of the student’s advisory committee in substantially final form, and all members have had adequate time to review the document. The examination is conducted by the student’s advisory committee as finally constituted. A thesis option student must be registered in the University in the semester or summer term in which the final examination is taken. Persons other than members of
the graduate faculty may, with mutual consent of the candidate and the major professor, attend final examinations for advanced degrees. Upon completion of the questioning of the candidate, all visitors must excuse themselves from the proceedings. A positive vote by all members of the graduate committee with at least one dissenision is required to pass a student on his or her exam. A department, or interdisciplinary degree program, may have a stricter requirement provided there is consistency within all degree programs within a department or interdisciplinary degree program.

A thesis option candidate may petition to be exempt from his/her final examination provided his/her degree plan GPR is 3.500 or greater and he/she has the approval of the advisory committee, the head of the student’s major department, or intercollegiate chair, if appropriate, and the Office of Graduate and Professional Studies. It is required that the petition for exemption be submitted the same semester the student intends to submit the thesis.

For non-thesis option students, a final comprehensive examination is required. The Master of Science in Educational Human Resource Development, HRD option, the Master of Science in Nursing with a major in Nursing Education, the Master of Science Program in the Mays Business School and the Master of Science in Economics with a concentration in financial economics or financial econometrics do not have final examination requirements. Otherwise, exemptions from final examinations are not allowed. The final exam cannot be held prior to the mid point of the final semester if questions on the exam are based on courses in which the student is currently enrolled. If a student has completed all required degree plan coursework, the student is not required to be registered for classes in the semester the final examination is administered (unless he/she holds an assistantship).

Exam results must be submitted with original signatures of only the committee members approved by the Office of Graduate and Professional Studies. If an approved committee member substitution (1 only) has been made, his/her signature must also be submitted to the Office of Graduate and Professional Studies.

Non-Thesis Option

For the non-thesis option, a thesis is not required. A final comprehensive examination is required for all non-thesis Master of Science programs except the Master of Science programs offered by the Mays Business School, the Master of Science in Economics with a concentration in financial economics or financial econometrics, the Master of Science with a major in Educational Human Resource Development, HRD option, and the Master of Science in Nursing with a major in Nursing Education. No exemptions are allowed. The requirements as to level of courses and examinations are the same as for the thesis option Master of Science degree. The final examination cannot be held prior to the mid point of the final semester if questions on the examination are based on courses in which the student is currently enrolled.

A student pursuing the non-thesis option is not allowed to enroll in 5V98, 5V99, or 691 (research) for any reason and 691 may not be used for credit toward a non-thesis option Master of Science degree. A maximum of 4 credit hours of 684 (Professional Internship), 8 credit hours of 685 (Directed Studies), and up to 3 credit hours of 690 (Theory of Research) or 695 (Frontiers in Research) may be used toward the non-thesis option Master of Science degree. In addition, any combination of 684, 685, 690 and 695 may not exceed 25% of the total credit hour requirement shown on the individual degree plan. All requirements for the non-thesis option Master of Science degree other than those specified above are the same as for the thesis option degree.

Additional Requirements

Additional Requirements

- Residence (p. 1277)
- Continuous Registration (p. 1277)
- Time Limit (p. 1277)
- Foreign Languages (p. 1277)
- Application for Degree (p. 1278)

Residence

In partial fulfillment of the residence requirement for the degree of Master of Science, the student must complete 9 resident credit hours during one regular semester or one 10-week summer semester in resident study at Texas A&M University. Upon recommendation of the student's advisory committee, department head or Chair of the Interdisciplinary Program, if appropriate, and with approval of the Office of Graduate and Professional Studies, a student may be granted exemption from this requirement. Such a petition, however, must be approved prior to the student’s registration for the final 9 credit hours of required coursework.

Students who are employed full-time while completing their degree may fulfill total residence requirements by completion of less-than-full time course loads each semester. In order to be considered for this, the student is required to submit a Petition for Waivers and Exceptions along with verification of his/her employment to the Office of Graduate and Professional Studies.

See Residence Requirements (p. 22).

Continuous Registration

A student in the thesis option of the Master of Science program who has completed all coursework on his/her degree plan other than 5V98, 5V99, and 691 (research) is required to be in continuous registration until all requirements for the degree have been completed. See Continuous Registration Requirements (p. 25).

Time Limit

All degree requirements must be completed within a period of seven consecutive years for the degree to be granted. A course will be considered valid until seven years after the end of the semester in which it is taken. Graduate credit for coursework which is more than seven calendar years old at the time of the final examination (oral or written) may not be used to satisfy degree requirements.

A student who has chosen the thesis option must have the final corrected version of the thesis cleared by the Office of Graduate and Professional Studies no later than one year after the final examination, or approval of a petition for exemption from the final exam, or within the seven-year time limit, whichever occurs first. Failure to do so will result in the degree not being awarded.

Foreign Languages

No specific language requirement exists for the Master of Science degree.
Application for Degree
For information on applying for your degree, please visit the Graduation (p. 24) section.

Doctor of Philosophy in Biomedical Sciences

Work leading to the degree of Doctor of Philosophy (PhD) is designed to give the candidate a thorough and comprehensive knowledge of his or her professional field and training in methods of research. The final basis for granting the degree shall be the candidate’s grasp of the subject matter of a broad field of study and a demonstrated ability to do independent research. In addition, the candidate must have acquired the ability to express thoughts clearly and forcefully in both oral and written languages.

The degree is not granted solely for the completion of coursework, residence and technical requirements, although these must be met.

For a student who has completed a master’s degree, a DDS/DMD, DVM or MD at a U.S. institution, a minimum of 64 hours is required on the degree plan for the degree of Doctor of Philosophy. For a student who has completed a baccalaureate degree but not a master’s degree or a U.S. DDS/DMD, DVM or MD, a minimum of 96 hours is required on the degree plan for the degree of Doctor of Philosophy.

Steps to Fulfill Doctoral Degree Requirements

1. Meet with departmental/intercollegiate graduate advisor to plan course of study for first semester.
   - When: Before first semester registration.
   - Approved by: Graduate advisor.

2. Establish advisory committee. Submit a degree plan.
   - When: Prior to the deadline imposed by the student's college or intercollegiate programs, and no later than 90 days prior to preliminary examination.
   - Approved by: Advisory committee, department head or intercollegiate faculty chair, and Office of Graduate and Professional Studies (OGAPS).

3. Complete English Language Proficiency requirements (if applicable), and coursework detailed on degree plan.
   - When: Before preliminary examination.

4. Complete the preliminary examination.
   - When: See steps for completing the preliminary examination. The preliminary examination results must have been submitted to OGAPS 14 weeks prior to the date of the defense.
   - Approved by: Advisory committee, department head or chair of the intercollegiate faculty, and OGAPS.

5. Submit proposal for dissertation or record of study to the Office of Graduate and Professional Studies.
   - When: No later than 20 working days prior to the submission of the Request for the Final Examination.
   - Approved by: Advisory committee, department head or intercollegiate faculty chair, and OGAPS.

6. Complete residence requirement.
   - When: Before submitting request to schedule final oral examination.
   - Approved by: OGAPS

7. Apply for degree; pay graduate fee.
   - When: During the first week of the final semester; see OGAPS calendar for deadlines.

8. Submit request for permission to hold and announce final oral examination.
   - When: Must be received by OGAPS at least 10 working days before requested exam date. See OGAPS calendar for deadlines.
   - Approved by: Advisory committee, department head or intercollegiate faculty chair, and OGAPS.

9. Successfully complete final examination.
   - When: The Report of the Final Examination Form should be submitted to OGAPS within 10 days following the exam.
   - Approved by: Advisory committee and OGAPS
### Program Requirements

**Program Requirements**

- **Student's Advisory Committee** (p. 1279)
- **Degree Plan** (p. 1279)
- **Transfer of Credit** (p. 1280)
- **Research Proposal** (p. 1280)
- **Examinations** (p. 1280)
  - Preliminary Examination (p. 1280)
  - Final Examination/Dissertation Defense (p. 1282)
- **Dissertation** (p. 1282)

**Student’s Advisory Committee**

After receiving admission to graduate studies and enrolling, the student will consult with the head of his or her major or administrative department (or chair of the intercollegiate faculty) concerning appointment of the chair of the advisory committee. The student’s advisory committee will consist of **no fewer than four members of the graduate faculty** representative of the student’s several fields of study and research, where the chair or co-chair must be from the student’s department (or intercollegiate faculty, if applicable), and at **least one or more of the members must have an appointment to a department other than the student’s major department.** The outside member for a student in an interdisciplinary degree program must be from a department different from the chair of the student’s committee.

The chair, in consultation with the student, will select the remainder of the advisory committee. Only graduate faculty members located on Texas A&M University campuses may serve as chair of a student’s advisory committee. Other Texas A&M University graduate faculty members located off-campus may serve as a member or co-chair (but not chair), with a member as the chair.

If the chair of a student’s advisory committee voluntarily leaves the University and the student is near completion of the degree and wants the chair to continue to serve in this role, the student is responsible for securing a current member of the University Graduate Faculty, from the student’s academic program and located near the Texas A&M University campus site, to serve as the co-chair of the committee. The Department Head or Chair of Intercollegiate faculty may request in writing to the Associate Provost for Graduate and Professional Studies that a faculty member who is on an approved leave of absence or has voluntarily separated from the university, be allowed to continue to serve in the role of chair of a student’s advisory committee without a co-chair for us to one year. The students should be near completion of the degree. Extensions beyond the one year period can be granted with additional approval of the Dean.

The committee members’ signatures on the degree plan indicate their willingness to accept the responsibility for guiding and directing the entire academic program of the student and for initiating all academic actions concerning the student. Although individual committee members may be replaced by petition for valid reasons, a committee cannot resign en masse. The chair of the committee, who usually has immediate supervision of the student’s research and dissertation or record of study, has the responsibility for calling all meetings of the committee. The duties of the committee include responsibility for the proposed degree plan, the research proposal, the preliminary examination, the dissertation or record of study and the final examination. In addition, the committee, as a group and as individual members, is responsible for counseling the student on academic matters, and, in the case of academic deficiency, initiating recommendations to the Office of Graduate and Professional Studies.

**Degree Plan**

The student’s advisory committee will evaluate the student’s previous education and degree objectives. The committee, in consultation with the student, will develop a proposed degree plan and outline a research problem which, when completed, as indicated by the dissertation (or its equivalent for the degree of Doctor of Education or the degree of Doctor of Engineering), will constitute the basic requirements for the degree. **The degree plan must be filed with the Office of Graduate and Professional Studies prior to the deadline imposed by the**
Research Proposal

The general field of research to be used for the dissertation should be agreed on by the student and the advisory committee at their first meeting, as a basis for selecting the proper courses to support the proposed research.

As soon thereafter as the research project can be outlined in reasonable detail, the dissertation research proposal should be completed. The research proposal should be approved at a meeting of the student’s advisory committee, at which time the feasibility of the proposed research and the adequacy of available facilities should be reviewed. The approved proposal, signed by all members of the student’s advisory committee, the head of the student’s major department (or chair of the intercollegiate faculty, if applicable), must be submitted to the Office of Graduate and Professional Studies at least 20 working days prior to the submission of the Request for the Final Examination.

Compliance issues must be addressed if a graduate student is performing research involving human subjects, animals, infectious biohazards and recombinant DNA. A student involved in these types of research should check with the Office of Research Compliance and Biosafety at (979) 458-1467 to address questions about all research compliance responsibilities. Additional information can also be obtained on the website http://rcb.tamu.edu.

Examinations

Preliminary Examination

The student’s major department (or chair of the intercollegiate faculty, if applicable) and his or her advisory committee may require qualifying, cumulative or other types of examinations at any time deemed desirable. These examinations are entirely at the discretion of the department and the student’s advisory committee.

The preliminary examination is required. The preliminary examination for a doctoral student shall be given no earlier than a date at which the student is within 6 credit hours of completion of the formal coursework on the degree plan (i.e., all coursework on the degree plan except 681, 684, 690, 691, 5V98, 5V99 and 692 courses). The student is strongly encouraged to complete the Preliminary Examination no later than the end of the semester following the completion of the formal coursework on the degree plan. The Office of Graduate and Professional Studies must receive the results of the preliminary examination at least 14 weeks prior to the final examination date. The examination shall be oral and written unless otherwise recommended by the student’s advisory committee and approved by the Office of Graduate and Professional Studies. The written part of the examination will cover all fields of study included in the student’s degree plan. Each member of the advisory committee is responsible for administering a written examination in his or her particular field, unless he or she chooses to waive participation in this part of the examination. Two or more members of the advisory committee may give a joint written examination. One or more members may require a student to take a departmental or intercollegiate faculty examination to supplement or replace a written examination. Each written examination must be completed and reported as satisfactory to the chair of the advisory committee before the oral portion of the examination may be held. In case any written examination is reported unsatisfactory, the entire advisory committee must agree (1) to proceed with the oral portion of the preliminary examination, or (2) to adopt another course of action regarding the unsatisfactory written examination.

Transfer of Credit

Courses for which transfer credits are sought must have been completed with a grade of B or greater and must be approved by the student’s advisory committee and the Office of Graduate and Professional Studies. These courses must not have been used previously for another degree. Except for officially approved cooperative doctoral programs, credit for thesis or dissertation research or the equivalent is not transferable. Credit for “internship” coursework in any form is not transferable. Courses taken in residence at an accredited U.S. institution or approved international institution with a final grade of B or greater will be considered for transfer credit if, at the time the courses were completed, the courses would be accepted for credit toward a similar degree for a student in degree-seeking status at the host institution. Credit for coursework taken by extension is not transferable. Coursework in which no formal grades are given or in which grades other than letter grades (A or B) are earned (for example, CR, P, S, U, H, etc.) is not accepted for transfer credit. Credit for coursework submitted for transfer from any college or university must be shown in semester credit hours, or equated to semester credit hours.

Courses used toward a degree at another institution may not be applied for graduate credit. If the course to be transferred was taken prior to the conferment of a degree at the transfer institution, a letter from the registrar at that institution stating that the course was not applied for credit toward the degree must be submitted to the Office of Graduate and Professional Studies.

Grades for courses completed at other institutions are not included in computing the GPR. An official transcript from the university at which transfer courses are taken must be sent directly to the Office of Admissions.
Prior to scheduling the preliminary examination with the other committee members, the committee chair will review the eligibility criteria with the student, using the Preliminary Examination Checklist to ensure the student is ready for the examination. The following list of eligibility requirements applies.

- Student is registered at Texas A&M University for the semester or summer term during which any portion of the preliminary examination may fall. If the entire examination falls between semesters, then the student must be registered for the term immediately preceding the examination.
- An approved degree plan was on file with the Office of Graduate and Professional Studies at least 90 days prior to the first written examination.
- Student’s cumulative GPR is at least 3.000.
- Student’s degree plan GPR is at least 3.000.
- All English language proficiency requirements have been satisfied.
- All committee members have scheduled or waived the written portion and agreed to attend the oral portion of the examination or have found a substitute. Only one substitution is allowed and it cannot be for the committee chair.
- At the end of the semester in which the exam is given, there are no more than 6 hours of coursework remaining on the degree plan (except 681, 684, 690, 691, 5V98, 5V99 and 692). The head of the student’s department (or Chair of the Intercollegiate Faculty, if applicable) has the authority to approve a waiver of this criterion.
- The time span from the first written examination to the oral is no more than three weeks. (In cases of department-wide written examinations, this criterion is not applicable.) The head of the student’s department (or chair of the intercollegiate faculty, if applicable) has the authority to approve a waiver of this criterion.

Once all requirements are met, departments or intercollegiate faculty may announce the schedule of the written and oral parts of the examination.

Credit for the preliminary examination is not transferable. If a departmental or intercollegiate faculty examination is used as part of the written portion of the preliminary examination, it must be the last examination offered prior to the date scheduled for the preliminary examination. In the schedule of the written portion, all members of the student’s advisory committee are to be included.

Through the preliminary examination, the student’s advisory committee should satisfy itself that the student has demonstrated the following qualifications:

1. a mastery of the subject matter of all fields in the program;
2. an adequate knowledge of the literature in these fields and an ability to carry out bibliographical research.

In case a student is required to take, as a part of the written portion of a preliminary examination, an examination administered by a department or intercollegiate faculty, the department or intercollegiate faculty must:

1. offer the examination at least once every six months. The departmental or interdisciplinary degree program examination should be announced at least 30 days prior to the scheduled examination date.
2. assume the responsibility for marking the examination satisfactory or unsatisfactory, or otherwise graded, and in the case of unsatisfactory, stating specifically the reasons for such a mark.

3. forward the marked examination to the chair of the student’s advisory committee within one week after the examination.

The chair of the student’s advisory committee is responsible for making all written examinations available to the members of the advisory committee at or before the oral portion of the preliminary examination. A positive vote by all members of the graduate committee with at most one dissent is required to pass a student on his or her preliminary exam. A department or intercollegiate faculty can have a stricter requirement provided there is consistency within all degree programs within a department or an interdisciplinary degree program.

The chair of the advisory committee will promptly report the results of the Preliminary Examination to the Office of Graduate and Professional Studies, using the Report of Doctoral Preliminary Examination form and the Preliminary Examination checklist. Both forms must have the appropriate signatures. These forms should be submitted to the Office of Graduate and Professional Studies within 10 working days of the scheduled preliminary examination.

The Report of the Preliminary Examination form must be submitted with original signatures of the approved committee members. If an approved committee member substitution (1 only) has been made, his/her signature must also be included on the form submitted to the Office of Graduate and Professional Studies. The original signature of the department head is also required on the form.

After passing the required oral and written preliminary examinations for the doctoral degree, the student must complete the final examination for the degree within four calendar years. Otherwise, the student will be required to repeat the preliminary examination. Upon approval of the student’s advisory committee, with no more than one member dissenting, and approval of the Office of Graduate and Professional Studies, a student who has failed the preliminary examination may be given one re-examination. Adequate time must be given to permit the student to address the inadequacies emerging from the first examination (normally six months). The student and the advisory committee should jointly negotiate a mutually acceptable date for this purpose.

A student must be registered at Texas A&M University for a minimum of one semester credit hour in the semester or summer term in which they will take any portion of the Preliminary Examination.

Steps for Completing the Preliminary Examination

| 1 | Establish advisory committee. Submit a degree plan. | When: Prior to the deadline set by the student’s college, and no later than 90 days prior to preliminary examination. Approved by: Advisory committee, department or interdisciplinary faculty chair, and Office of Graduate and Professional Studies (OGAPS). |

<p>| 1 | Complete English language proficiency requirements (if applicable), and coursework detailed on degree plan. | When: Before preliminary examination. |</p>
<table>
<thead>

<th>Text</th>
</tr>
</thead>
</table>
| 3 | **Student and chair review eligibility requirements for the preliminary exam using the "Preliminary Examination Checklist".**  
When: Several weeks before the proposed date of the preliminary examination. Checklist must be signed by chair and department head, or intercollegiate faculty chair. |
| 4 | **Student checks the availability of committee members.**  
When: Several weeks before the proposed date of the preliminary examination. |
| 5 | **Students prepares and submits any petitions found necessary by the review of the eligibility requirements.**  
When: At least three weeks before the proposed date of the preliminary examinations.  
**Approved by:** Advisory committee, department head or intercollegiate faculty chair, and OGAPS. |
| 6 | **When exam date is determined, the department may announce the schedule.**  
**Approved by:** Committee chair, department head or intercollegiate faculty chair. |
| 7 | **Chair submits the Report of the Preliminary Examination and the Preliminary Examination Checklist to OGAPS.**  
When: Within 10 working days of the date of the scheduled oral examination and no later than 14 weeks prior to the final defense date.  
**Approved by:** Advisory committee. |
| 8 | **Office of Graduate and Professional Studies notifies the student and chair of any actions necessary to rectify any deficiencies.**  
When: Upon receipt of the report of the doctoral Preliminary Examination. |

**Final Examination/Dissertation Defense**

The candidate for the doctoral degree must pass a final examination by deadline dates announced in the "Office of Graduate and Professional Studies Calendar" each semester or summer term. The doctoral student is allowed only one opportunity to take the final examination. No student may be given a final examination unless his or her current official cumulative and degree plan GPAs are 3.000 or better and he or she has been admitted to candidacy. No unabsolved grades of D, F, or U for any course can be listed on the degree plan. To absolve a deficient grade, a student must repeat the course and achieve a grade of C or better. A student must have completed all coursework on his or her degree plan with the exception of 691, 5V98, or 5V99 (research) or 692 (Professional Study) hours. The student must be registered for all remaining hours; no hours remain to be taken on the degree plan. The preliminary examination results must have been submitted to the Office of Graduate and Professional Studies 14 weeks prior to the date of the defense. The research proposal must have been submitted to the Office of Graduate and Professional Studies 25 working days prior to the date of the final examination/defense. Any changes to the degree plan must be approved by the Office of Graduate and Professional Studies prior to the approval of the final examination. The request to hold and announce the final examination must be submitted to the Office of Graduate and Professional Studies a minimum of 10 working days in advance of the scheduled date. Examination/Defense results must be submitted to the Office of Graduate and Professional Studies within 10 working days of the scheduled examination/defense date. The Office of Graduate and Professional Studies must be notified in writing of any cancellations.

The student’s advisory committee will conduct this examination. The final examination is not to be administered until the dissertation or record of study is available in substantially final form to the student’s advisory committee, and all concerned have had adequate time to review the document. Additionally, all English Language Proficiency requirements must be satisfied prior to scheduling the examination. Whereas the final examination may cover the broad field of the candidate’s training, it is presumed that the major portion of the time will be devoted to the dissertation and closely allied topics. Persons other than members of the graduate faculty may, with mutual consent of the candidate and the chair of the advisory committee, be invited to attend a final examination for an advanced degree. A positive vote by all members of the graduate committee with at most one dissension is required to pass a student on his or her exam. A department can have a stricter requirement provided there is consistency within all degree programs within a department. Upon completion of the questioning of the candidate, all visitors must excuse themselves from the proceedings.

The advisory committee will submit its recommendations on the appropriate Report of the Final Examination for Doctoral Candidates form to the Office of Graduate and Professional Studies regarding acceptability of the candidate for the doctoral degree. A student must be registered in the University in the semester or summer term in which the final examination is taken.

The Report of the Final Examination Form must be submitted with original signatures of only the committee members approved by the Office of Graduate and Professional Studies. If an approved committee member substitution (1 only) has been made, his/her signature must be included on the form submitted to the Office of Graduate and Professional Studies.

**Dissertation**

The ability to perform independent research must be demonstrated by the dissertation, which must be the original work of the candidate. Whereas acceptance of the dissertation is based primarily on its scholarly merit, it must also exhibit creditable literary workmanship. The format of the dissertation must be acceptable to the Office of Graduate and Professional Studies. Guidelines for the preparation of the thesis are available in the Thesis Manual, which is available online at http://ogaps.tamu.edu.

After successful defense and approval by the student’s advisory committee and the head of the student’s major department (or chair of the intercollegiate faculty, if applicable), a student must submit his/her dissertation in electronic format as a single PDF file. The PDF file must be uploaded to the website, http://ogaps.tamu.edu. Additionally, a signed approval form must be brought or mailed to the Office of Graduate and Professional Studies. Both the PDF file and the signed approval form are required by the deadline.
Deadline dates for submitting are announced each semester or summer term in the Office of Graduate and Professional Studies Calendar (see Time Limit statement). These dates also can be accessed via the website http://ogaps.tamu.edu.

Before a student can be “cleared” by Thesis and Dissertation Services, a processing fee must be paid through Student Business Services. This processing fee is for the thesis/dissertation services provided. After commencement, dissertations are digitally stored and made available through the Texas A&M Libraries.

A dissertation that is deemed unacceptable by the Office of Graduate and Professional Studies because of excessive corrections will be returned to the student’s department head or chair of the intercollegiate faculty. The manuscript must be resubmitted as a new document, and the entire review process must begin anew. All original submittal deadlines must be met during the resubmittal process in order to graduate.

Additional Requirements

Residence

A student who enters the doctoral degree program with a baccalaureate degree must spend one academic year plus one semester in resident study at Texas A&M University. A student who holds master’s degree when he/she enters doctoral degree program must spend one academic year in resident study. One academic year may include two adjacent regular semesters or one regular semester and one adjacent 10-week summer semester. The third semester is not required to be adjacent to the one year. Enrollment for each semester must be a minimum of 9 credit hours each to satisfy the residence requirement.

To satisfy the residence requirement, the student must complete a minimum of 9 credit hours per semester or 10-week summer semester in resident study at Texas A&M University for the required period. A student who enters a doctoral degree program with a baccalaureate degree may fulfill residence requirements in excess of one academic year (18 credit hours) by registration during summer sessions or by completion of a less-than-full course load (in this context a full course load is considered 9 credit hours per semester).

Students who are employed full-time while completing their degree may fulfill total residence requirements by completion of less-than-full time course loads each semester. In order to be considered for this, the student is required to submit a Petition for Waivers and Exceptions along with verification of his/her employment to the Office of Graduate and Professional Studies. An employee should submit verification of his/her employment at the time he/she submits the degree plan. See Registration. (p. 25)

See Residence Requirements (p. 22).

Time Limit

All requirements for doctoral degrees must be completed within a period of ten consecutive calendar years for the degree to be granted. A course will be considered valid until 10 years after the end of the semester in which it is taken. Graduate credit for coursework more than ten calendar years old at the time of the final oral examination may not be used to satisfy degree requirements.

After passing the required preliminary oral and written examinations for a doctoral degree, the student must complete the final examination within four calendar years. Otherwise, the student will be required to repeat the preliminary examination.

A final corrected version of the dissertation or record of study in electronic format as a single PDF file must be cleared by the Office of Graduate and Professional Studies no later than one year after the final examination or within the 10-year time limit, whichever occurs first. Failure to do so will result in the degree not being awarded.

Continuous Registration

A student in a program leading to a Doctor of Philosophy who has completed all coursework on his/her degree plan other than 691, 5V98 or 5V99 (research) are required to be in continuous registration until all requirements for the degree have been completed. See Continuous Registration Requirements (p. 25).

Admission to Candidacy

To be admitted to candidacy for a doctoral degree, a student must have:

1. completed all formal coursework on the degree plan with the exception of any remaining 681, 684, 690 and 691, or 5V98 and 5V99,
2. a 3.0 Graduate GPA and a Degree Plan GPA of at least 3.0 with no grade lower than C in any course on the degree plan,
3. passed the preliminary examination (written and oral portions),
4. submitted an approved dissertation proposal,
5. met the residence requirements. The final examination will not be authorized for any doctoral student who has not been admitted to candidacy.

Languages

A student is required to possess a competent command of English. For English language proficiency requirements, see the Admissions section of this catalog. The doctoral (PhD) foreign language requirement at Texas A&M University is a departmental option, to be administered and monitored by the individual departments of academic instruction.

99-Hour Cap on Doctoral Degrees

In Texas, public colleges and universities are funded by the state according to the number of students enrolled. In accordance with legislation passed by the Texas Legislature, the number of hours for which state universities may receive subvention funding at the doctoral rate for any individual is limited to 99 hours. Texas A&M University and other universities will not receive subvention for hours in excess of the limit.

Institutions of higher education are allowed to charge the equivalent of nonresident tuition to a resident doctoral student who has enrolled in 100 or more semester credit hours of doctoral coursework.
A doctoral student at Texas A&M has seven years to complete his/her degree before being charged out-of-state tuition. A doctoral student who, after seven years of study, has accumulated 100 or more doctoral hours will be charged tuition at a rate equivalent to out-of-state tuition. Please note that the tuition increases will apply to Texas residents as well as students from other states and countries who currently are charged tuition at the resident rate. This includes those doctoral students who hold GAT, GANT, and GAR appointments of 20 or more hours and recipients of competitive fellowships who receive more than $1,000 per semester. Doctoral students who, after seven years of study, have not accumulated 100 hours are eligible to pay in-state tuition if otherwise eligible.

For count purposes, a year is counted as three semesters, normally fall, spring and summer. Using this system, a student is allowed 21 semesters as a G8 student to complete the doctoral degree before being penalized with the higher tuition rate. Any semester in which a G8 student is enrolled for a doctoral level course is counted.

The following majors are exempt from the 99-Hour Cap on Doctoral Degrees:

- Biomedical Sciences
- Biochemistry
- Microbiology
- Genetics
- Toxicology
- Nutrition Sciences
- Community Clinical Psychology
- Counseling Psychology
- School Psychology
- Veterinary Pathology
- Clinical Psychology
- Counseling Psychology
- Medical Sciences
- Health Services Research
- Health Promotion and Community Health Sciences
- Epidemiology and Environmental Health

The hour limit for these majors is 130 doctoral hours.

### Application for Degree

For information on applying for your degree, please visit the Graduation (p. 24) section.

### Master of Science in Laboratory Animal Medicine

The Master of Science (MS) curriculum is designed to develop new understanding through research and creativity. Students have the option to pursue a thesis or non-thesis Master of Science degree.

1 The online Document Processing Submission System is located on the website https://ogsdpss.tamu.edu.

2 Complete the application for degree form via the student’s Howdy portal.

### Program Requirements

**Program Requirements**

- Student’s Advisory Committee (p. 1285)
- Degree Plan (p. 1285)
- Credit Requirements (p. 1286)
- Transfer of Credit (p. 1286)
- Limitations on the Use of Transfer, Extension and Certain Other Courses (p. 1286)
- Thesis Option (p. 1286)
  - Thesis Proposal (p. 1287)
  - Final Examination (p. 1287)
- Non-Thesis Option (p. 1287)

### Student’s Advisory Committee

After receiving admission to graduate studies and enrolling for coursework, the student will consult with the head of his or her major or administrative department (or intercollegiate faculty, if applicable) concerning appointment of the chair of his or her advisory committee. With the exception of the Mays Business School non-thesis option, the Master of Science in Economics with a concentration in financial economics or financial econometrics, the Master of Science with a major in Educational Human Resource Development, HRD option, and the Master of Science in Nursing with a major in Nursing Education, the student’s advisory committee for the master’s degree will consist of no fewer than three members of the graduate faculty, representative of the student’s fields of study and research. The chair or the co-chair of the advisory committee must be from the student’s major department (or intercollegiate faculty, if applicable), and at least one or more of the members must have an appointment to a department other than the student’s major department. The outside member for students in an interdisciplinary program must have an appointment to a department different from the chair of the student’s committee.

The chair, in consultation with the student, will select the remainder of the advisory committee. The student will interview each prospective committee member to determine whether he or she is willing to serve. Only graduate faculty members located on Texas A&M University campuses may serve as chair of a student’s advisory committee. Other graduate faculty members located off campus may serve as a member or co-chair (but not chair) with a member as the chair. The chair of the committee, who usually has immediate supervision of the student’s research and thesis, has the responsibility for calling required meetings of the committee and for calling meetings at any other time considered desirable.

If the chair of a student’s advisory committee voluntarily leaves the University and the student is near completion of the degree and wants the chair to continue to serve in this role, the student is responsible for securing a current member of the University Graduate Faculty, from the student’s academic program and located near the Texas A&M University campus site, to serve as the co-chair of the committee. The Department Head or Chair of Intercollegiate faculty may request in writing to the Associate Provost for Graduate and Professional Studies that a faculty member who is on an approved leave of absence or has voluntarily separated from the university, be allowed to continue to serve in the role of chair of a student’s advisory committee without a co-chair for us to one year. The students should be near completion of the degree. Extensions beyond the one year period can be granted with additional approval of the Dean.

If the chair of the student’s advisory committee is unavailable for an extended time in any academic period during which the student is involved in activities relating to an internship, thesis or professional paper, and is registered for courses such as 5V98, 5V99, 684, 691, 692 or 693, the student may request, in writing, that the department head appoint an alternate advisory committee chair during the interim period.

The duties of the committee include responsibility for the proposed degree plan, the research proposal, the thesis and the final examination. In addition, the committee as a group and as individual members are responsible for advising the student on academic matters, and, in the case of academic deficiency, initiating recommendations to the Office of Graduate and Professional Studies.

The committee members’ approval on the degree plan indicate their willingness to accept the responsibility for guiding and directing the entire academic program of the student and for initiating all academic actions concerning the student. Although individual committee members may be replaced by petition for valid reasons, a committee cannot resign en masse.

### Degree Plan

The student’s advisory committee, in consultation with the student, will develop the proposed degree plan. The degree plan must be completed and filed with the Office of Graduate and Professional Studies prior to the deadline imposed by the student’s college or interdisciplinary degree program, if applicable, and no later than 90 days prior to the date of the final oral examination or thesis defense.

A student should submit the degree plan using the online Document Processing Submission System (http://ogsdpss.tamu.edu).
A student submitting a proposed degree plan for a Master of Science degree should designate on the official degree plan the appropriate program option.

Additional coursework may be added to the approved degree plan by petition if it is deemed necessary by the advisory committee to correct deficiencies in the student’s academic preparation. No changes can be made to the degree plan once the student’s Request for Final Examination or Request for Final Examination Exemption is approved by the Office of Graduate and Professional Studies.

Credit Requirement

A minimum of 32 semester credit hours of approved courses and research is required for the thesis option Master of Science degree with the exception of the Master of Science in Visualization, which requires 48 hours and Master of Science in Athletic Training, which requires 60 hours. A minimum of 36 semester credit hours of approved coursework is required for the Non-Thesis Option.

Ordinarily the student will devote the major portion of his or her time to work in one or two closely related fields. Other work will be in supporting fields of interest.

Transfer of Credit

A student who has earned 12 hours of graduate credit in residence at Texas A&M University may be authorized to transfer courses in excess of the limits prescribed below upon the advice of the advisory committee and with the approval of the Office of Graduate and Professional Studies. Courses taken in residence at an accredited U.S. institution or approved international institution with a final grade of B or greater may be considered for transfer credit if, at the time the courses were completed, the courses would be accepted for credit toward a similar degree for a student in degree-seeking status at the host institution. Otherwise, the limitations stated in the following section apply. Coursework in which no formal grades are given or in which grades other than letter grades (A or B) are earned (for example, CR, P, S, U, H, etc.) is not accepted for transfer credit. Courses appearing on the degree plan with grades of D, F or U may not be absolved by transfer work. Credit for thesis research or the equivalent is not transferable. Credit for coursework submitted for transfer from any college or university must be shown in semester credit hours or equated to semester credit hours. An official transcript from the university at which the transferred coursework was taken must be sent directly to the Office of Admissions.

Courses used toward a degree at another institution may not be applied for graduate credit. If the course to be transferred was taken prior to the conferral of a degree at the transfer institution, a letter from the registrar at that institution stating that the course was not applied for credit toward the degree must be submitted to the Office of Graduate and Professional Studies.

Grades for courses completed at other institutions are not included in computing the GPR.

Limitations on the Use of Transfer, Extension and Certain Other Courses

Some departments may have more restrictive requirements for transfer work. If otherwise acceptable, certain courses may be used toward meeting credit-hour requirements for the master’s degree under the following limitations.

1. The maximum number of credit hours which may be considered for transfer credit is the greater of 12 hours or one-third (1/3) of the total hours of a degree plan. The following restrictions apply:
   • Graduate and/or upper-level undergraduate courses taken in residence at an accredited U.S. institution, or approved international institution with a final grade of B or greater will be considered for transfer credit if, at the time the courses were completed, the student was in degree-seeking status at Texas A&M University, or the student was in degree-seeking status at the institution at which the courses were taken; and if the courses would be accepted for credit toward a similar degree for a student in degree-seeking status at the host institution.
   • Courses previously used for another degree are not acceptable for degree plan credit.

2. The maximum number of credit hours taken in post-baccalaureate non-degree (G6) classification at Texas A&M University which may be considered for application to the degree plan is 12.

3. Not more than 12 hours may be used in any combination of the following categories:
   • Not more than 8 hours in the combination of 5V98, 5V99, and 691 (research) or 684 (Professional Internship) may be used.
   • Not more than 8 hours of 685 (Directed Studies) may be used.
   • Not more than 3 hours of 690 (Theory of Research) may be used.
   • Not more than 3 hours of 695 (Frontiers in Research) may be used.

4. A maximum of 2 hours of Seminar (681).

5. A maximum of 9 hours of advanced undergraduate courses (300- or 400-level).

6. For graduate courses of three weeks’ duration or less, taken at other institutions, up to 1 hour of credit may be obtained for each five-day week of coursework. Each week of coursework must include at least 15 contact hours.

7. Continuing education courses may not be used for graduate credit.

8. Extension courses are not acceptable for credit.

9. For the Degree of Master of Science in Medical Science, students with a first professional degree (MD, DDS or DVM) may take up to 20 hours of 691 (research). For the remaining hours, a maximum of 2 hours can be Seminar (681) and a maximum of 3 hours can be Directed Studies (685).

Exceptions will be permitted only in unusual cases and when petitioned by the student’s advisory committee and approved by the Office of Graduate and Professional Studies.

Thesis Option

An acceptable thesis is required for the Master of Science degree for a student who selects the thesis option program. The finished work must reflect a comprehensive understanding of the pertinent literature and express in clear English, the problem(s) for study, the method, significance and results of the student’s original research. Guidelines for the preparation of the thesis are available in the Thesis Manual, which is available online at the Office of Graduate and Professional Studies website.

After successful defense (or exemption) and approval by the student’s advisory committee and the head of the student’s major department (or chair of the intercollegiate faculty, if appropriate), the student must submit his/her thesis in electronic format as a single PDF file. The PDF file must be uploaded to the Office of Graduate and Professional Studies website.
Additionally, a signed approval form must be brought or mailed to the Office of Graduate and Professional Studies. The PDF file and the signed approval form are required by the deadline.

Deadline dates for submitting the thesis are announced each semester or summer term in the “Office of Graduate and Professional Studies Calendar” (see Time Limit statement). These dates also can be accessed via the Office of Graduate and Professional Studies website.

Before a student can be “cleared” by Thesis and Dissertation Services, a processing fee must be paid through Student Business Services. This processing fee is for the thesis/dissertation services provided. After commencement, dissertations are digitally stored and made available through the Texas A&M Libraries.

A thesis that is deemed unacceptable by the Office of Graduate and Professional Studies because of excessive corrections will be returned to the student’s department head (or chair of the intercollegiate faculty, if applicable). The manuscript must be resubmitted as a new document, and the entire review process must begin again. All original submittal deadlines must be met during the resubmittal process to graduate that semester.

**Thesis Proposal**

For the thesis option Master of Science degree, the student must prepare a thesis proposal for approval by the advisory committee and the head of the major department or chair of the interdisciplinary faculty, if applicable. This proposal must be submitted to the Office of Graduate and Professional Studies at least 20 working days prior to the submission of the request for the final examination.

Compliance issues must be addressed if a graduate student is performing research involving human subjects, animals, infectious biohazards and recombinant DNA. A student involved in these types of research should check with the Office of Research Compliance and Biosafety at (979) 458-1467 to address questions about all research compliance responsibilities. Additional information can also be obtained on the Office of Research Compliance and Biosafety website.

**Thesis Defense/Final Examination**

A student must pass a final examination by dates announced each semester or summer term in the Office of Graduate and Professional Studies Calendar. The Office of Graduate and Professional Studies must be notified in writing of any cancellation. To be eligible to take the final examination, a student’s GPR must be at least 3.000 for courses on the degree plan and for all courses completed at Texas A&M which are eligible to be applied to a graduate degree, and there must be no unabsolved grades of D, F or U for any course listed on the degree plan. To absolve a deficient grade, the student must repeat the course at Texas A&M University and achieve a grade of C or better. All coursework on the degree plan must have been completed with the exception of those hours for which the student is registered. Additionally, all English Language Proficiency requirements must be satisfied prior to scheduling the examination. If applicable, an approved thesis proposal must be on file in the Office of Graduate and Professional Studies according to published deadlines.

A request to hold and announce the final examination must be submitted to the Office of Graduate and Professional Studies a minimum of 10 working days in advance of the scheduled date for the examination. Examinations which are not completed and reported as satisfactory to the Office of Graduate and Professional Studies within 10 working days of the scheduled examination date will be recorded as failures. A student may be given only one opportunity to repeat the final examination for the master’s degree and that must be within a time period that does not extend beyond the end of the next regular semester (summer terms are excluded).

For thesis option students, the final examination covers the thesis and all work taken on the degree plan and at the option of the committee may be written or oral or both. The final examination may not be administered before the thesis is available to all members of the student’s advisory committee in substantially final form, and all members have had adequate time to review the document. The examination is conducted by the student’s advisory committee as finally constituted. A thesis option student must be registered in the University in the semester or summer term in which the final examination is taken. Persons other than members of the graduate faculty may, with mutual consent of the candidate and the major professor, attend final examinations for advanced degrees. Upon completion of the questioning of the candidate, all visitors must excuse themselves from the proceedings. A positive vote by all members of the graduate committee with at most one dissension is required to pass a student on his or her exam. A department, or interdisciplinary degree program, may have a stricter requirement provided there is consistency within all degree programs within a department or interdisciplinary degree program.

A thesis option candidate may petition to be exempt from his/her final examination provided his/her degree plan GPR is 3.500 or greater and he/she has the approval of the advisory committee, the head of the student’s major department, or intercollegiate chair, if appropriate, and the Office of Graduate and Professional Studies. It is required that the petition for exemption be submitted the same semester the student intends to submit the thesis.

For non-thesis option students, a final comprehensive examination is required. The Master of Science in Educational Human Resource Development, HRD option, the Master of Science in Nursing with a major in Nursing Education, the Master of Science Program in the Mays Business School and the Master of Science in Economics with a concentration in financial economics or financial econometrics do not have final examination requirements. Otherwise, exemptions from final examinations are not allowed. The final exam cannot be held prior to the mid point of the final semester if questions on the exam are based on courses in which the student is currently enrolled. If a student has completed all required degree plan coursework, the student is not required to be registered for classes in the semester the final examination is administered (unless he/she holds an assistantship).

Exam results must be submitted with original signatures of only the committee members approved by the Office of Graduate and Professional Studies. If an approved committee member substitution (1 only) has been made, his/her signature must also be submitted to the Office of Graduate and Professional Studies.

**Non-Thesis Option**

For the non-thesis option, a thesis is not required. A final comprehensive examination is required for all non-thesis Master of Science programs except the Master of Science programs offered by the Mays Business School, the Master of Science in Economics with a concentration in financial economics or financial econometrics, the Master of Science with a major in Educational Human Resource Development, HRD option, and the Master of Science in Nursing with a major in Nursing Education. No exemptions are allowed. The requirements as to level of courses and examinations are the same as for the thesis option Master of Science
degree. The final examination cannot be held prior to the mid point of the final semester if questions on the examination are based on courses in which the student is currently enrolled.

A student pursuing the non-thesis option is not allowed to enroll in 5V98, 5V99, or 691 (research) for any reason and 691 may not be used for credit toward a non-thesis option Master of Science degree. A maximum of 4 credit hours of 684 (Professional Internship), 8 credit hours of 685 (Directed Studies), and up to 3 credit hours of 690 (Theory of Research) or 695 (Frontiers in Research) may be used toward the non-thesis option Master of Science degree. In addition, any combination of 684, 685, 690 and 695 may not exceed 25 percent of the total credit hour requirement shown on the individual degree plan. All requirements for the non-thesis option Master of Science degree other than those specified above are the same as for the thesis option degree.

**Additional Requirements**

**Residence**

In partial fulfillment of the residence requirement for the degree of Master of Science, the student must complete 9 resident credit hours during one regular semester or one 10-week summer semester in resident study at Texas A&M University. Upon recommendation of the student’s advisory committee, department head or Chair of the Interdisciplinary Program, if appropriate, and with approval of the Office of Graduate and Professional Studies, a student may be granted exemption from this requirement. Such a petition, however, must be approved prior to the student’s registration for the final 9 credit hours of required coursework.

Students who are employed full-time while completing their degree may fulfill total residence requirements by completion of less-than-full time course loads each semester. In order to be considered for this, the student is required to submit a Petition for Waivers and Exceptions along with verification of his/her employment to the Office of Graduate and Professional Studies.

See Residence Requirements (p. 22).

**Continuous Registration**

A student in the thesis option of the Master of Science program who has completed all coursework on his/her degree plan other than 5V98, 5V99, and 691 (research) is required to be in continuous registration until all requirements for the degree have been completed. See Continuous Registration Requirements (p. 25).

**Time Limit**

All degree requirements must be completed within a period of seven consecutive years for the degree to be granted. A course will be considered valid until seven years after the end of the semester in which it is taken. Graduate credit for coursework which is more than seven calendar years old at the time of the final examination (oral or written) may not be used to satisfy degree requirements.

A student who has chosen the thesis option must have the final corrected version of the thesis cleared by the Office of Graduate and Professional Studies no later than one year after the final examination, or approval of a petition for exemption from the final exam, or within the seven-year time limit, whichever occurs first. Failure to do so will result in the degree not being awarded.

**Foreign Languages**

No specific language requirement exists for the Master of Science degree.

**Application for Degree**

For information on applying for your degree, please visit the Graduation (p. 24) section.

**Master of Science in Science and Technology Journalism**

The Master of Science (MS) curriculum is designed to develop new understanding through research and creativity. Students have the option to pursue a thesis or non-thesis Master of Science degree.

**Steps to Fulfill Master’s Degree Requirements**

1. Meet with departmental graduate advisor to plan semester registration. When: Before first course of study for first semester. Approved by: Graduate advisor or chair of the intercollegiate faculty.

2. Establish advisory committee. Submit a degree plan. When: Prior to the deadline imposed by the student's college and no later than 90 days prior to final oral or thesis defense. Approved by: Advisory committee, department head or chair of the intercollegiate faculty, and Office of Graduate and Professional Studies (OGAPS).

3. If thesis is required, submit thesis proposal to the Office of Graduate and Professional Studies. When: At least 20 working days prior to the submission of the Request for the Final Examination. Approved by: Advisory committee, department head or chair of the intercollegiate faculty and OGAPS.

4. Apply for degree; pay graduation fee. When: During the first week of the final semester, see OGAPS calendar.
The Master of Science in Science and Technology Journalism (MS/STJR) is a distinctive program to prepare students for careers as science and technology writers, reporters and editors in the public media, government, industry, academia and other sectors. It also can serve as a foundation for Professional Studies.

The core courses for the Master of Science in Science and Technology Journalism are as follows: VIBS 657; VIBS 658; VIBS 660; and 3 credit hours of VIBS 685 (Science Editing).

Program Requirements

- **Student’s Advisory Committee** (p. 1289)
- **Degree Plan** (p. 1290)
- **Credit Requirements** (p. 1290)
- **Transfer of Credit** (p. 1290)
- **Limitations on the Use of Transfer, Extension and Certain Other Courses** (p. 1290)
- **Thesis Option** (p. 1291)
  - Thesis Proposal (p. 1291)
  - Final Examination (p. 1291)
- **Non-Thesis Option** (p. 1292)

Student’s Advisory Committee

After receiving admission to graduate studies and enrolling for coursework, the student will consult with the head of his or her major or administrative department (or intercollegiate faculty, if applicable) concerning appointment of the chair of his or her advisory committee. With the exception of the Mays Business School non-thesis option, the Master of Science in Economics with a concentration in financial economics or financial econometrics, the Master of Science with a major in Educational Human Resource Development, HRD option, and the Master of Science in Nursing with a major in Nursing Education, the student’s advisory committee for the master’s degree will consist of **no fewer than three members of the graduate faculty**, representative of the student’s fields of study and research. The chair or the co-chair of the advisory committee must be from the student’s major department (or intercollegiate faculty, if applicable), and **at least one or more of the members must have an appointment to a department other than the student’s major department**. The outside member for students in an interdisciplinary program must have an appointment to a department different from the chair of the student’s committee.

The chair, in consultation with the student, will select the remainder of the advisory committee. The student will interview each prospective committee member to determine whether he or she is willing to serve. Only graduate faculty members located on Texas A&M University campuses may serve as chair of a student’s advisory committee. Other graduate faculty members located off campus may serve as a member or co-chair (but not chair) with a member as the chair. The chair of the committee, who usually has immediate supervision of the student’s research and thesis, has the responsibility for calling required meetings of the committee and for calling meetings at any other time considered desirable.

If the chair of a student’s advisory committee voluntarily leaves the University and the student is near completion of the degree and wants the chair to continue to serve in this role, the student is responsible for securing a current member of the University Graduate Faculty, from the student’s academic program and located near the Texas A&M University campus site, to serve as the co-chair of the committee. The Department Head or Chair of Intercollegiate faculty may request in writing to the Associate Provost for Graduate and Professional Studies that a faculty member who is on an approved leave of absence or has voluntarily separated from the university, be allowed to continue to serve in the role of chair of a student’s advisory committee without a co-chair for us to one year. The students should be near completion of the degree. Extensions beyond the one year period can be granted with additional approval of the Dean.

If the chair of the student’s advisory committee is unavailable for an extended time in any academic period during which the student is involved...
in activities relating to an internship, thesis or professional paper, and is registered for courses such as 5V98, 5V99, 684, 691, 692 or 693, the student may request, in writing, that the department head appoint an alternate advisory committee chair during the interim period.

The duties of the committee include responsibility for the proposed degree plan, the research proposal, the thesis and the final examination. In addition, the committee as a group and as individual members are responsible for advising the student on academic matters, and, in the case of academic deficiency, initiating recommendations to the Office of Graduate and Professional Studies.

The committee members’ approval on the degree plan indicate their willingness to accept the responsibility for guiding and directing the entire academic program of the student and for initiating all academic actions concerning the student. Although individual committee members may be replaced by petition for valid reasons, a committee cannot resign en masse.

Degree Plan

The student’s advisory committee, in consultation with the student, will develop the proposed degree plan. The degree plan must be completed and filed with the Office of Graduate and Professional Studies prior to the deadline imposed by the student’s college or interdisciplinary degree program, if applicable, and no later than 90 days prior to the date of the final oral examination or thesis defense.

A student should submit the degree plan using the online Document Processing Submission System (http://ogsdpss.tamu.edu).

A student submitting a proposed degree plan for a Master of Science degree should designate on the official degree plan the appropriate program option.

Additional coursework may be added to the approved degree plan by petition if it is deemed necessary by the advisory committee to correct deficiencies in the student’s academic preparation. No changes can be made to the degree plan once the student’s Request for Final Examination or Request for Final Examination Exemption is approved by the Office of Graduate and Professional Studies.

Credit Requirement

A minimum of 32 semester credit hours of approved courses and research is required for the thesis option Master of Science degree with the exception of the Master of Science in Visualization, which requires 48 hours and Master of Science in Athletic Training, which requires 60 hours. A minimum of 36 semester credit hours of approved coursework is required for the Non-Thesis Option.

Ordinarily the student will devote the major portion of his or her time to work in one or two closely related fields. Other work will be in supporting fields of interest.

Transfer of Credit

A student who has earned 12 hours of graduate credit in residence at Texas A&M University may be authorized to transfer courses in excess of the limits prescribed below upon the advice of the advisory committee and with the approval of the Office of Graduate and Professional Studies. Courses taken in residence at an accredited U.S. institution or approved international institution with a final grade of B or greater may be considered for transfer credit if, at the time the courses were completed, the courses would be accepted for credit toward a similar degree for a student in degree-seeking status at the host institution. Otherwise, the limitations stated in the following section apply. Coursework in which no formal grades are given or in which grades other than letter grades (A or B) are earned (for example, CR, P, S, U, H, etc.) is not accepted for transfer credit. Courses appearing on the degree plan with grades of D, F or U may not be absolved by transfer work. Credit for thesis research or the equivalent is not transferable. Credit for coursework submitted for transfer from any college or university must be shown in semester credit hours or equated to semester credit hours. An official transcript from the university at which the transfer coursework was taken must be sent directly to the Office of Admissions.

Courses used toward a degree at another institution may not be applied for graduate credit. If the course to be transferred was taken prior to the conferral of a degree at the transfer institution, a letter from the registrar at that institution stating that the course was not applied for credit toward the degree must be submitted to the Office of Graduate and Professional Studies.

Grades for courses completed at other institutions are not included in computing the GPR.

Limitations on the Use of Transfer, Extension and Certain Other Courses

Some departments may have more restrictive requirements for transfer work. If otherwise acceptable, certain courses may be used toward meeting credit-hour requirements for the master’s degree under the following limitations.

1. The maximum number of credit hours which may be considered for transfer credit is the greater of 12 hours or one-third (1/3) of the total hours of a degree plan. The following restrictions apply:
   • Graduate and/or upper-level undergraduate courses taken in residence at an accredited U.S. institution, or approved international institution with a final grade of B or greater will be considered for transfer credit if, at the time the courses were completed, the student was in degree-seeking status at Texas A&M University, or the student was in degree-seeking status at the institution at which the courses were taken; and if the courses would be accepted for credit toward a similar degree for a student in degree-seeking status at the host institution.
   • Courses previously used for another degree are not acceptable for degree plan credit.

2. The maximum number of credit hours taken in post-baccalaureate non-degree (G6) classification at Texas A&M University which may be considered for application to the degree plan is 12.

3. Not more than 12 hours may be used in any combination of the following categories:
   • Not more than 8 hours in the combination of 5V98, 5V99, and 691 (research) or 684 (Professional Internship) may be used.
   • Not more than 8 hours of 685 (Directed Studies) may be used.
   • Not more than 3 hours of 690 (Theory of Research) may be used.
   • Not more than 3 hours of 695 (Frontiers in Research) may be used.

4. A maximum of 2 hours of Seminar (681).

5. A maximum of 9 hours of advanced undergraduate courses (300- or 400-level).

6. For graduate courses of three weeks’ duration or less, taken at other institutions, up to 1 hour of credit may be obtained for each five-day
Thesis Proposal

For the thesis option Master of Science degree, the student must prepare a thesis proposal for approval by the advisory committee and the head of the major department or chair of the interdisciplinary faculty, if applicable. This proposal must be submitted to the Office of Graduate and Professional Studies at least 20 working days prior to the submission of the request for the final examination.

Compliance issues must be addressed if a graduate student is performing research involving human subjects, animals, infectious biohazards and recombinant DNA. A student involved in these types of research should check with the Office of Research Compliance and Biosafety at (979) 458-1467 to address questions about all research compliance responsibilities. Additional information can also be obtained on the Office of Research Compliance and Biosafety website.

Thesis Defense/Final Examination

A student must pass a final examination by dates announced each semester or summer term in the Office of Graduate and Professional Studies Calendar. The Office of Graduate and Professional Studies must be notified in writing of any cancellation. To be eligible to take the final examination, a student’s GPR must be at least 3.000 for courses on the degree plan and for all courses completed at Texas A&M which are eligible to be applied to a graduate degree, and there must be no unabsolved grades of D, F or U for any course listed on the degree plan. To absolve a deficient grade, the student must repeat the course at Texas A&M University and achieve a grade of C or better. All coursework on the degree plan must have been completed with the exception of those hours for which the student is registered. Additionally, all English Language Proficiency requirements must be satisfied prior to scheduling the examination. If applicable, an approved thesis proposal must be on file in the Office of Graduate and Professional Studies according to published deadlines.

A request to hold and announce the final examination must be submitted to the Office of Graduate and Professional Studies a minimum of 10 working days in advance of the scheduled date for the examination. Examinations which are not completed and reported as satisfactory to the Office of Graduate and Professional Studies within 10 working days of the scheduled examination date will be recorded as failures. A student may be given only one opportunity to repeat the final examination for the master’s degree and that must be within a time period that does not extend beyond the end of the next regular semester (summer terms are excluded).

For thesis option students, the final examination covers the thesis and all work taken on the degree plan and at the option of the committee may be written or oral or both. The final examination may not be administered before the thesis is available to all members of the student’s advisory committee in substantially final form, and all members have had adequate time to review the document. The examination is conducted by the student’s advisory committee as finally constituted. A thesis option student must be registered in the University in the semester or summer term in which the final examination is taken. Persons other than members of the graduate faculty may, with mutual consent of the candidate and the major professor, attend final examinations for advanced degrees. Upon completion of the questioning of the candidate, all visitors must excuse themselves from the proceedings. A positive vote by all members of the graduate committee with at most one dissension is required to pass a student on his or her exam. A department, or interdisciplinary degree program, may have a stricter requirement provided there is consistency within all degree programs within a department or interdisciplinary degree program.

A thesis option candidate may petition to be exempt from his/her final examination provided his/her degree plan GPR is 3.500 or greater and he/she has the approval of the advisory committee, the head of the student’s major department, or interdisciplinary chair, if appropriate, and the Office of Graduate and Professional Studies. It is required that the petition for exemption be submitted the same semester the student intends to submit the thesis.
For non-thesis option students, a final comprehensive examination is required. The Master of Science in Educational Human Resource Development, HRD option, the Master of Science in Nursing with a major in Nursing Education, the Master of Science Program in the Mays Business School and the Master of Science in Economics with a concentration in financial economics or financial econometrics do not have final examination requirements. Otherwise, exemptions from final examinations are not allowed. The final exam cannot be held prior to the mid point of the final semester if questions on the exam are based on courses in which the student is currently enrolled. If a student has completed all required degree plan coursework, the student is not required to be registered for classes in the semester the final examination is administered (unless he/she holds an assistantship).

Exam results must be submitted with original signatures of only the committee members approved by the Office of Graduate and Professional Studies. If an approved committee member substitution (1 only) has been made, his/her signature must also be submitted to the Office of Graduate and Professional Studies.

**Non-Thesis Option**

For the non-thesis option, a thesis is not required. A final comprehensive examination is required for all non-thesis Master of Science programs except the Master of Science programs offered by the Mays Business School, the Master of Science in Economics with a concentration in financial economics or financial econometrics, the Master of Science with a major in Educational Human Resource Development, HRD option, and the Master of Science in Nursing with a major in Nursing Education. No exemptions are allowed. The requirements as to level of courses and examinations are the same as for the thesis option Master of Science degree. The final examination cannot be held prior to the mid point of the final semester if questions on the examination are based on courses in which the student is currently enrolled.

A student pursuing the non-thesis option is not allowed to enroll in 5V98, 5V99, or 691 (research) for any reason and 691 may not be used for credit toward a non-thesis option Master of Science degree. A maximum of 4 credit hours of 684 (Professional Internship), 8 credit hours of 685 (Directed Studies), and up to 3 credit hours of 690 (Theory of Research) or 695 (Frontiers in Research) may be used toward the non-thesis option Master of Science degree. In addition, any combination of 684, 685, 690 and 695 may not exceed 25 percent of the total credit hour requirement shown on the individual degree plan. All requirements for the non-thesis option Master of Science degree other than those specified above are the same as for the thesis option degree.

**Additional Requirements**

**Additional Requirements**

- Residence (p. 1292)
- Continuous Registration (p. 1292)
- Time Limit (p. 1292)
- Foreign Languages (p. 1292)
- Application for Degree (p. 1292)

**Residence**

In partial fulfillment of the residence requirement for the degree of Master of Science, the student must complete 9 resident credit hours during one regular semester or one 10-week summer semester in resident study at Texas A&M University. Upon recommendation of the student’s advisory committee, department head or Chair of the Interdisciplinary Program, if appropriate, and with approval of the Office of Graduate and Professional Studies, a student may be granted exemption from this requirement. Such a petition, however, must be approved prior to the student’s registration for the final 9 credit hours of required coursework.

Students who are employed full-time while completing their degree may fulfill total residence requirements by completion of less-than-full time course loads each semester. In order to be considered for this, the student is required to submit a Petition for Waivers and Exceptions along with verification of his/her employment to the Office of Graduate and Professional Studies.

See Residence Requirements (p. 22).

**Continuous Registration**

A student in the thesis option of the Master of Science program who has completed all coursework on his/her degree plan other than 5V98, 5V99, and 691 (research) is required to be in continuous registration until all requirements for the degree have been completed. See Continuous Registration Requirements (p. 25).

**Time Limit**

All degree requirements must be completed within a period of seven consecutive years for the degree to be granted. A course will be considered valid until seven years after the end of the semester in which it is taken. Graduate credit for coursework which is more than seven calendar years old at the time of the final examination (oral or written) may not be used to satisfy degree requirements.

A student who has chosen the thesis option must have the final corrected version of the thesis cleared by the Office of Graduate and Professional Studies no later than one year after the final examination, or approval of a petition for exemption from the final exam, or within the seven-year time limit, whichever occurs first. Failure to do so will result in the degree not being awarded.

**Foreign Languages**

No specific language requirement exists for the Master of Science degree.

**Application for Degree**

For information on applying for your degree, please visit the Graduation (p. 24) section.

**Doctor of Veterinary Medicine in Veterinary Medicine**

**Professional Curriculum in Veterinary Medicine**

The professional curriculum seeks to deliver to the veterinary medical profession a student fully prepared to begin a medical career in the arts and sciences of animal health and disease. Emphasis on professional specialization is reserved for graduate programs.

Veterinary medicine encompasses the full scope of the technology of animal health and disease, including the arts and sciences of disease prevention, diagnosis, prognosis and therapy. The professional curriculum begins at the basic level and systematically moves to clinical application.
Graduates are qualified to formulate and implement programs for disease control and prevention in domestic farm animals, poultry, pet animals, zoo animals, fur-bearing animals, laboratory animals and wildlife. They are equipped to administer and advise in public health problems arising from intertransmission of diseases between humans and lower animals and are capable of performing animal disease regulatory duties for governmental agencies. They are also oriented for professional careers in the armed forces.

The degree of Doctor of Veterinary Medicine is awarded to the student upon successful completion of the professional curriculum in veterinary medicine. In addition to the DVM degree, the student must take and pass the NAVLE and state licensing examinations to practice clinical veterinary medicine.

**Academic Regulations**

Each professional student, upon registering, will receive a copy of the *College of Veterinary Medicine and Biomedical Sciences Professional Student Handbook* which contains the college’s policies on grading, promotion, dismissal, probation, grievance procedures, withdrawal, personal conduct and the honor code. Because matriculation in veterinary medicine is a privilege and not a right, the faculty retains the prerogative to request withdrawal of any student who does not attain adequate academic performance or who does not exhibit the personal qualifications prerequisite to the practice of veterinary medicine. These criteria shall apply at all times during the curriculum. Academic performance will not be the only factor in determining admission, promotion, graduation or request for withdrawal.

**Scholastic Deficiency**

An average grade of C and passing grades in all courses in the professional curriculum are the minimal scholastic achievements considered to be satisfactory. When a student’s scholastic performance falls below the minimal satisfactory level in any term, scholastic probation may be imposed or the student may be dropped from the professional curriculum or placed on scholastic suspension from the University.

Scholastic probation is conditional permission for a student to continue in the professional curriculum under the conditions of the probation while working to remove any deficiencies. A student’s failure to meet the conditions of scholastic probation may result in dismissal from the professional curriculum or suspension from the University at the end of any term for which scholastic probation is imposed. The terms of the probation are determined by the Academic Progress Committee for the year in which scholastic deficiency occurs. A student who fails any course prescribed in the professional curriculum or who otherwise fails to achieve satisfactory scholastic progress may be dropped from the curriculum for cause.

**Readmission**

A student in the professional curriculum who voluntarily withdraws, or who is dropped from the rolls of the University or from the professional veterinary curriculum for cause, forfeits his or her standing and must apply for readmission and be approved before being re-enrolled by policies and procedures of the College of Veterinary Medicine and Biomedical Sciences.

**NOTE:** While every effort is made to assure accuracy and timeliness of this publication, the College of Veterinary Medicine and Biomedical Sciences is not responsible for any misrepresentation which might arise through error in the preparation of this catalog, or through failure to give notice of changes in its requirements, policies, tuition and fees, course offerings and other matters affecting students or applicants. The provisions of this catalog do not constitute an irrevocable contract between any student or applicant for admission into the professional curriculum of the College of Veterinary Medicine and Biomedical Sciences.

**College of Veterinary Medicine and Biomedical Sciences Admission Information (p. 38)**

**Program Requirements**

The professional curriculum in veterinary medicine is a four-year program. During the first three years, classes are scheduled on a semester basis. The fourth-year curriculum consists of 24 weeks of Basic Core Rotations, 18 weeks of elective clinical rotations or career alternative electives, 4 weeks of externship and 2 weeks of vacation. The fourth-year curriculum allows students to choose a species directed career, i.e., large animal, small animal, mixed animal or a career alternative track.

**Term Semester Credit Hours:** 24

**Total Semester Credit Hours:** 126

---

1. There will be one 4-hour lab per week. This lab will be shared equally between the VLCS 954 and VSCS 954 courses.

2. Students will spend one month per semester in required clinical rotations. During that month, they will spend 8 hours per week for a total of 32 contact hours for the month. Additional elective clinic rotations (maximum of 2 additional) may be completed in the Veterinary Medical Teaching Hospital or with local practitioners on a space available basis.

3. Students will spend one month per semester in required skills modules (one each SA and LA). During that month, they will spend 4 hours multiplied by one day per week for a total of 16 contact hours.

4. 13 hours lecture–4 hours lab for a minimum of 17 core credit hours. Additional hours may be taken in the form of electives (1 credit hour each) or elective clinic rotations (1 credit hour each). A minimum of 14 hours of electives must be taken by the end of the third year.

5. Surgery II will run for half the semester with remaining time used for electives or clinic rotations.

6. 10 hours lecture–5 hours lab for a minimum of 15 core credit hours. Students are required to take VSCS 955. VLCS 930/ VLCS 931/ VLCS 932 are optional; if taken, these hours count toward the required minimum of 14 hours of electives.

### Fourth Year

The fourth-year curriculum consists of 24 weeks of basic core rotations, 18 weeks of elective clinical rotations or career alternative electives, 4 weeks of externship and 2 weeks of vacation for 46 credit hours. The fourth-year curriculum allows students to choose a species directed career, i.e., large animal, small animal, mixed animal or an alternative career elective.

#### Basic Core Rotations

- **Small Animal Clinic (8 weeks)**
  - Small Animal Internal Medicine
  - Primary Care Medicine
  - General Surgery
  - Small Animal Emergency/Critical Care

- **Large Animal Clinic (4 weeks)**
  - Food Animal Medicine/Ambulatory/Zoo
  - Equine Medicine

- **Anesthesiology (4 weeks)**
  - Community Connections (2 weeks)
  - Radiology (2 weeks)

- **Laboratory Services (2 weeks)**
  - Diagnostics
  - Houston SPCA (2 weeks)
  - Animal Welfare and Shelter Medicine

#### Available Rotations

- **Small Animal Medicine**
  - Dermatology
  - Dentistry
  - Cardiology
  - Oncology
  - Internal Medicine/Canine
  - Internal Medicine/Feline
  - Primary Care Medicine
  - Neurology/Neurosurgery
  - Zoological Medicine and Surgery

- **Small Animal Surgery**
  - General
  - Orthopedic
  - Soft Tissue
  - Ophthalmology
Large Animal Hospital
- Food Animal Medicine & Surgery/Ambulatory
- Equine Medicine/Ambulatory
- Equine Surgery
- Food Animal Theriogenology
- Equine Theriogenology
- TDCJ (Prison)

Anesthesiology

Radiology

Alternative Career Electives

Externship

Vacation

1 All rotations are two weeks.

Department of Veterinary Integrative Biosciences

Head: E. Tiffany-Castiglioni

The Department of Veterinary Integrative Biosciences (VIBS) offers graduate degree programs aimed at educating students to advance biomedical science through original research and to disseminate that knowledge for the protection and promotion of animal and human health. The department awards both MS and PhD degrees in Biomedical Sciences (with major specialty areas of cell/molecular biology, developmental biology/embryology, epidemiology, reproduction and neuroscience). MS degrees are also offered in Veterinary Public Health-Epidemiology and Science and Technology Journalism.

Many of the department faculty participate in University-wide graduate training programs in Neuroscience, Reproductive Biology, Food Science and Technology, Genetics, Toxicology and Biotechnology.

In addition to the specialty area research training, students have the opportunity to learn anatomy and public health practices in a variety of domestic species and wild, aquatic and laboratory animals. The training in microscopic anatomy includes histology, histochemistry, cytology and ultrastructure (transmission and scanning electron microscopy). The training in public health emphasizes epidemiology, food safety, food toxicology and control of zoonotic diseases.

The Master of Science in Veterinary Public Health-Epidemiology is designed to serve the needs of veterinarians wishing to go into some aspects of government service, military veterinary personnel seeking advanced training in public health and students with a career goal of academia or research.

The Master of Science in Science and Technology Journalism (MS/STJR) is a distinctive program to prepare students for careers as science and technology writers, reporters and editors in the public media, government, industry, academia and other sectors. It also can serve as a foundation for doctoral study.

Students prepare degree plans that fit their area of study and professional or research goals in consultation with a committee of graduate faculty members led by a faculty mentor/chairperson. The general procedural rules are those specified in this catalog. More detail on core course requirements, degree plans, and administrative matters is available in the department’s “Guidelines and Policies” manual.

Masters

• Master of Science in Veterinary Public Health - Epidemiology (p. 1297)

Master of Science in Veterinary Public Health Epidemiology

The Master of Science (MS) curriculum is designed to develop new understanding through research and creativity. Students have the option to pursue a thesis or non-thesis Master of Science degree.

Steps to Fulfill Master's Degree Requirements

1. Meet with departmental graduate advisor to plan course of study for first semester. When: Before first semester registration. Approved by: Graduate advisor or chair of the intercollegiate faculty.

2. Establish advisory committee. Submit a degree plan.¹ When: Prior to the deadline imposed by the student's college and no later than 90 days prior to final oral or thesis defense. Approved by: Advisory committee, department head or chair of the intercollegiate faculty, and Office of Graduate and Professional Studies (OGAPS).

3. If thesis is required, submit thesis proposal to the Office of Graduate and Professional Studies. When: At least 20 working days prior to the submission of the Request for the Final Examination. Approved by: Advisory committee, department head or chair of the intercollegiate faculty and OGAPS.

4. Apply for degree²; pay graduation fee. When: During the first week of the final semester, see OGAPS calendar.

5. Check to be sure degree program and advisory committee are up to date and all ELP requirements (if applicable) and coursework are complete. When: Well before submitting request to schedule final examination.

6. Complete residence requirement. When: If applicable, before or during final semester. Approved by: OGAPS.

7. Submit request to schedule final examination. When: Must be received by OGAPS at least 10 working days before exam date. See OGAPS calendar for deadlines. Approved by: Advisory committee, department head or chair of the intercollegiate faculty, and OGAPS.

8. Successfully complete final examination. When: The Report of the Final Examination Form should be submitted to OGAPS within 10 days following the exam. Approved by: Advisory committee and OGAPS.

9. If required, upload one approved final copy of thesis as a single PDF file (http://ogsdpss.tamu.edu) and submit signed approval form to the Office of Graduate and Professional Studies. When: See OGAPS calendar for deadlines. Approved by: Advisory committee, department head or chair of the intercollegiate faculty and OGAPS.

10. Graduation; arrange for cap and gown. For more information, visit http://graduation.tamu.edu.

¹ The online Document Processing Submission System is located on the website https://ogsdpss.tamu.edu.
² Complete the application for degree form via the student's Howdy portal.

The Department of Veterinary Integrative Biosciences offers, through its Epidemiology & Public Health Program, a thesis and non-thesis Master of Science in Veterinary Public Health-Epidemiology that prepare students for further epidemiologic research training and career opportunities centered on public health. These M.S. degree options in Veterinary Public Health-Epidemiology are offered with approval of a program faculty advisor.

Program Requirements

Program Requirements

• Student's Advisory Committee (p. 1298)
• Degree Plan (p. 1298)
• Credit Requirements (p. 1298)
• Transfer of Credit (p. 1298)
• Limitations on the Use of Transfer, Extension and Certain Other Courses (p. 1299)
• Thesis Option (p. 1299)
Student's Advisory Committee

After receiving admission to graduate studies and enrolling for coursework, the student will consult with the head of his or her major or administrative department (or intercollegiate faculty, if applicable) concerning appointment of the chair of his or her advisory committee. With the exception of the Mays Business School non-thesis option, the Master of Science in Economics with a concentration in financial economics or financial econometrics, the Master of Science with a major in Educational Human Resource Development, HRD option, and the Master of Science in Nursing with a major in Nursing Education, the student's advisory committee for the master's degree will consist of no fewer than three members of the graduate faculty, representative of the student's fields of study and research. The chair or the co-chair of the advisory committee must be from the student's major department (or intercollegiate faculty, if applicable), and at least one or more of the members must have an appointment to a department other than the student's major department. The outside member for students in an interdisciplinary program must have an appointment to a department different from the chair of the student's committee.

The chair, in consultation with the student, will select the remainder of the advisory committee. The student will interview each prospective committee member to determine whether he or she is willing to serve. Only graduate faculty members located on Texas A&M University campuses may serve as chair of a student's advisory committee. Other graduate faculty members located off campus may serve as a member or co-chair (but not chair) with a member as the chair. The chair of the committee, who usually has immediate supervision of the student's research and thesis, has the responsibility for calling required meetings of the committee and for calling meetings at any other time considered desirable.

If the chair of a student's advisory committee voluntarily leaves the University and the student is near completion of the degree and wants the chair to continue to serve in this role, the student is responsible for securing a current member of the University Graduate Faculty, from the student's academic program and located near the Texas A&M University campus site, to serve as the co-chair of the committee. The Department Head or Chair of Intercollegiate faculty may request in writing to the Associate Provost for Graduate and Professional Studies that a faculty member who is on an approved leave of absence or has voluntarily separated from the university, be allowed to continue to serve in the role of chair of a student's advisory committee without a co-chair for up to one year. The students should be near completion of the degree. Extensions beyond the one year period can be granted with additional approval of the Dean.

If the chair of the student's advisory committee is unavailable for any extended time in any academic period during which the student is involved in activities relating to an internship, thesis or professional paper, and is registered for courses such as 5V98, 5V99, 684, 691, 692 or 693, the student may request, in writing, that the department head appoint an alternate advisory committee chair during the interim period.

The duties of the committee include responsibility for the proposed degree plan, the research proposal, the thesis and the final examination. In addition, the committee as a group and as individual members are responsible for advising the student on academic matters, and, in the case of academic deficiency, initiating recommendations to the Office of Graduate and Professional Studies.

The committee members' approval on the degree plan indicate their willingness to accept the responsibility for guiding and directing the entire academic program of the student and for initiating all academic actions concerning the student. Although individual committee members may be replaced by petition for valid reasons, a committee cannot resign en masse.

Degree Plan

The student's advisory committee, in consultation with the student, will develop the proposed degree plan. The degree plan must be completed and filed with the Office of Graduate and Professional Studies prior to the deadline imposed by the student's college or interdisciplinary degree program, if applicable, and no later than 90 days prior to the date of the final oral examination or thesis defense.

A student should submit the degree plan using the online Document Processing Submission System (http://ogsdpss.tamu.edu).

A student submitting a proposed degree plan for a Master of Science degree should designate on the official degree plan the appropriate program option.

Additional coursework may be added to the approved degree plan by petition if it is deemed necessary by the advisory committee to correct deficiencies in the student's academic preparation. No changes can be made to the degree plan once the student's Request for Final Examination or Request for Final Examination Exemption is approved by the Office of Graduate and Professional Studies.

Credit Requirement

A minimum of 32 semester credit hours of approved courses and research is required for the thesis option Master of Science degree with the exception of the Master of Science in Visualization, which requires 48 hours and Master of Science in Athletic Training, which requires 60 hours. A minimum of 36 semester credit hours of approved coursework is required for the Non-Thesis Option.

Ordinarily the student will devote the major portion of his or her time to work in one or two closely related fields. Other work will be in supporting fields of interest.

Transfer of Credit

A student who has earned 12 hours of graduate credit in residence at Texas A&M University may be authorized to transfer courses in excess of the limits prescribed below upon the advice of the advisory committee and with the approval of the Office of Graduate and Professional Studies. Courses taken in residence at an accredited U.S. institution or approved international institution with a final grade of B or greater may be considered for transfer credit if, at the time the courses were completed, the courses would be accepted for credit toward a similar degree for a student in degree-seeking status at the host institution. Otherwise, the limitations stated in the following section apply. Coursework in which no formal grades are given or in which grades other than letter grades (A or B) are earned (for example, CR, P, S, U, H, etc.) is not accepted for transfer credit. Courses appearing on the degree plan with grades of D, F or U may not be absorbed by transfer work. Credit for thesis research or the equivalent is not transferable. Credit for coursework submitted for transfer from any college or university must be shown in semester credit.
hours or equated to semester credit hours. An official transcript from the university at which the transfer coursework was taken must be sent directly to the Office of Admissions.

Courses used toward a degree at another institution may not be applied for graduate credit. If the course to be transferred was taken prior to the conferral of a degree at the transfer institution, a letter from the registrar at that institution stating that the course was not applied for credit toward the degree must be submitted to the Office of Graduate and Professional Studies.

Grades for courses completed at other institutions are not included in computing the GPR.

Limitations on the Use of Transfer, Extension and Certain Other Courses

Some departments may have more restrictive requirements for transfer work. If otherwise acceptable, certain courses may be used toward meeting credit-hour requirements for the master’s degree under the following limitations.

1. The maximum number of credit hours which may be considered for transfer credit is the greater of 12 hours or one-third (1/3) of the total hours of a degree plan. The following restrictions apply:
   • Graduate and/or upper-level undergraduate courses taken in residence at an accredited U.S. institution, or approved international institution with a final grade of B or greater will be considered for transfer credit if, at the time the courses were completed, the student was in degree-seeking status at Texas A&M University, or the student was in degree-seeking status at the institution at which the courses were taken; and if the courses would be accepted for credit toward a similar degree for a student in degree-seeking status at the host institution.
   • Courses previously used for another degree are not acceptable for degree plan credit.

2. The maximum number of credit hours taken in post-baccalaureate non-degree (G6) classification at Texas A&M University which may be considered for application to the degree plan is 12.

3. Not more than 12 hours may be used in any combination of the following categories:
   • Not more than 8 hours in the combination of 5V98, 5V99, and 691 (research) or 684 (Professional Internship) may be used.
   • Not more than 8 hours of 685 (Directed Studies) may be used.
   • Not more than 3 hours of 690 (Theory of Research) may be used.
   • Not more than 3 hours of 695 (Frontiers in Research) may be used.

4. A maximum of 2 hours of Seminar (681).

5. A maximum of 9 hours of advanced undergraduate courses (300- or 400-level).

6. For graduate courses of three weeks’ duration or less, taken at other institutions, up to 1 hour of credit may be obtained for each five-day week of coursework. Each week of coursework must include at least 15 contact hours.

7. Continuing education courses may not be used for graduate credit.

8. Extension courses are not acceptable for credit.

9. For the Degree of Master of Science in Medical Science, students with a first professional degree (MD, DDS or DVM) may take up to 20 hours of 691 (research). For the remaining hours, a maximum of 2 hours can be Seminar (681) and a maximum of 3 hours can be Directed Studies (685).

Exceptions will be permitted only in unusual cases and when petitioned by the student’s advisory committee and approved by the Office of Graduate and Professional Studies.

Thesis Option

An acceptable thesis is required for the Master of Science degree for a student who selects the thesis option program. The finished work must reflect a comprehensive understanding of the pertinent literature and express in clear English, the problem(s) for study, the method, significance and results of the student’s original research. Guidelines for the preparation of the thesis are available in the Thesis Manual, which is available online at the Office of Graduate and Professional Studies website.

After successful defense (or exemption) and approval by the student’s advisory committee and the head of the student’s major department (or chair of the intercollegiate faculty, if appropriate), the student must submit his/her thesis in electronic format as a single PDF file. The PDF file must be uploaded to the Office of Graduate and Professional Studies website. Additionally, a signed approval form must be brought or mailed to the Office of Graduate and Professional Studies. The PDF file and the signed approval form are required by the deadline.

Deadline dates for submitting the thesis are announced each semester or summer term in the “Office of Graduate and Professional Studies Calendar” (see Time Limit statement). These dates also can be accessed via the Office of Graduate and Professional Studies website.

Before a student can be “cleared” by Thesis and Dissertation Services, a processing fee must be paid through Student Business Services. This processing fee is for the thesis/dissertation services provided. After commencement, dissertations are digitally stored and made available through the Texas A&M Libraries.

A thesis that is deemed unacceptable by the Office of Graduate and Professional Studies because of excessive corrections will be returned to the student’s department head (or chair of the intercollegiate faculty, if applicable). The manuscript must be resubmitted as a new document, and the entire review process must begin again. All original submittal deadlines must be met during the resubmittal process to graduate that semester.

Thesis Proposal

For the thesis option Master of Science degree, the student must prepare a thesis proposal for approval by the advisory committee and the head of the major department or chair of the interdisciplinary faculty, if applicable. This proposal must be submitted to the Office of Graduate and Professional Studies at least 20 working days prior to the submission of the request for the final examination.

Compliance issues must be addressed if a graduate student is performing research involving human subjects, animals, infectious biohazards and recombinant DNA. A student involved in these types of research should check with the Office of Research Compliance and Biosafety at (979) 458-1467 to address questions about all research compliance responsibilities. Additional information can also be obtained on the Office of Research Compliance and Biosafety website.
Thesis Defense/Final Examination

A student must pass a final examination by dates announced each semester or summer term in the Office of Graduate and Professional Studies Calendar. The Office of Graduate and Professional Studies must be notified in writing of any cancellation. To be eligible to take the final examination, a student’s GPR must be at least 3.000 for courses on the degree plan and for all courses completed at Texas A&M which are eligible to be applied to a graduate degree, and there must be no unabsolved grades of D, F or U for any course listed on the degree plan. To absolve a deficient grade, the student must repeat the course at Texas A&M University and achieve a grade of C or better. All coursework on the degree plan must have been completed with the exception of those hours for which the student is registered. Additionally, all English Language Proficiency requirements must be satisfied prior to scheduling the examination. If applicable, an approved thesis proposal must be on file in the Office of Graduate and Professional Studies according to published deadlines.

A request to hold and announce the final examination must be submitted to the Office of Graduate and Professional Studies a minimum of 10 working days in advance of the scheduled date for the examination. Examinations which are not completed and reported as satisfactory to the Office of Graduate and Professional Studies within 10 working days of the scheduled examination date will be recorded as failures. A student may be given only one opportunity to repeat the final examination for the master’s degree and that must be within a time period that does not extend beyond the end of the next regular semester (summer terms are excluded).

For thesis option students, the final examination covers the thesis and all work taken on the degree plan and at the option of the committee may be written or oral or both. The final examination may not be administered before the thesis is available to all members of the student’s advisory committee in substantially final form, and all members have had adequate time to review the document. The examination is conducted by the student’s advisory committee as finally constituted. A thesis option student must be registered in the University in the semester or summer term in which the final examination is taken. Persons other than members of the graduate faculty may, with mutual consent of the candidate and the major professor, attend final examinations for advanced degrees. Upon completion of the questioning of the candidate, all visitors must excuse themselves from the proceedings. A positive vote by all members of the graduate committee with at most one dissension is required to pass a student on his or her exam. A department, or interdisciplinary degree program, may have a stricter requirement provided there is consistency within all degree programs within a department or interdisciplinary degree program.

A thesis option candidate may petition to be exempt from his/her final examination provided his/her degree plan GPR is 3.500 or greater and he/she has the approval of the advisory committee, the head of the student’s major department, or intercollegiate chair, if appropriate, and the Office of Graduate and Professional Studies. It is required that the petition for exemption be submitted the same semester the student intends to submit the thesis.

For non-thesis option students, a final comprehensive examination is required. The Master of Science in Educational Human Resource Development, HRD option, the Master of Science in Nursing with a major in Nursing Education, the Master of Science Program in the Mays Business School and the Master of Science in Economics with a concentration in financial economics or financial econometrics do not have final examination requirements. Otherwise, exemptions from final examinations are not allowed. The final exam cannot be held prior to the mid point of the final semester if questions on the exam are based on courses in which the student is currently enrolled. If a student has completed all required degree plan coursework, the student is not required to be registered for classes in the semester the final examination is administered (unless he/she holds an assistantship).

Exam results must be submitted with original signatures of only the committee members approved by the Office of Graduate and Professional Studies. If an approved committee member substitution (1 only) has been made, his/her signature must also be submitted to the Office of Graduate and Professional Studies.

Non-Thesis Option

For the non-thesis option, a thesis is not required. A final comprehensive examination is required for all non-thesis Master of Science programs except the Master of Science programs offered by the Mays Business School, the Master of Science in Economics with a concentration in financial economics or financial econometrics, the Master of Science with a major in Educational Human Resource Development, HRD option, and the Master of Science in Nursing with a major in Nursing Education. No exemptions are allowed. The requirements as to level of courses and examinations are the same as for the thesis option Master of Science degree. The final examination cannot be held prior to the mid point of the final semester if questions on the exam are based on courses in which the student is currently enrolled.

A student pursuing the non-thesis option is not allowed to enroll in 5V98, 5V99, or 691 (research) for any reason and 691 may not be used for credit toward a non-thesis option Master of Science degree. A maximum of 4 credit hours of 684 (Professional Internship), 8 credit hours of 685 (Directed Studies), and up to 3 credit hours of 690 (Theory of Research) or 695 (Frontiers in Research) may be used toward the non-thesis option Master of Science degree. In addition, any combination of 684, 685, 690 and 695 may not exceed 25 percent of the total credit hour requirement shown on the individual degree plan. All requirements for the non-thesis option Master of Science degree other than those specified above are the same as for the thesis option degree.

Additional Requirements

Additional Requirements

- Residence (p. 1300)
- Continuous Registration (p. 1301)
- Time Limit (p. 1301)
- Foreign Languages (p. 1301)
- Application for Degree (p. 1301)

Residence

In partial fulfillment of the residence requirement for the degree of Master of Science, the student must complete 9 resident credit hours during one regular semester or one 10-week summer semester in resident study at Texas A&M University. Upon recommendation of the student’s advisory committee, department head or Chair of the Interdisciplinary Program, if appropriate, and with approval of the Office of Graduate and Professional Studies, a student may be granted exemption from this requirement. Such a petition, however, must be approved prior to the student’s registration for the final 9 credit hours of required coursework.
Students who are employed full-time while completing their degree may fulfill total residence requirements by completion of less-than-full time course loads each semester. In order to be considered for this, the student is required to submit a Petition for Waivers and Exceptions along with verification of his/her employment to the Office of Graduate and Professional Studies.

See Residence Requirements (p. 22).

**Continuous Registration**

A student in the thesis option of the Master of Science program who has completed all coursework on his/her degree plan other than 5V98, 5V99, and 691 (research) is required to be in continuous registration until all requirements for the degree have been completed. See Continuous Registration Requirements (p. 25).

**Time Limit**

All degree requirements must be completed within a period of seven consecutive years for the degree to be granted. A course will be considered valid until seven years after the end of the semester in which it is taken. Graduate credit for coursework which is more than seven calendar years old at the time of the final examination (oral or written) may not be used to satisfy degree requirements.

A student who has chosen the thesis option must have the final corrected version of the thesis cleared by the Office of Graduate and Professional Studies no later than one year after the final examination, or approval of a petition for exemption from the final exam, or within the seven-year time limit, whichever occurs first. Failure to do so will result in the degree not being awarded.

**Foreign Languages**

No specific language requirement exists for the Master of Science degree.

**Application for Degree**

For information on applying for your degree, please visit the Graduation (p. 24) section.

**Department of Veterinary Large Animal Clinical Sciences**

http://vetmed.tamu.edu/vlcs

**Head:** A. J. Roussel

**Graduate Advisor:** N. D. Cohen

The Department of Veterinary Large Animal Clinical Sciences (VLCS) has a strong commitment to scholarship and graduate education with an emphasis on research and training relevant to horses and other farm animals. Degrees offered include both the Master of Science (MS) and Doctor of Philosophy (PhD) in Biomedical Sciences. In addition, some faculty members participate in interdisciplinary programs of study such that it is possible to earn MS or PhD degrees in Genetics and Toxicology through VLCS.

The established areas of study in VLCS include equine infectious disease epidemiology, equine reproduction, and equine regenerative medicine. Other areas of research interest and activity are diagnostic imaging, ruminant gastroenterology, ruminant urolithiasis, and small ruminant reproduction. Prospective graduate students must first identify a VLCS faculty member willing to accept them as a graduate student before applying to a graduate degree offered through the Department. More information about faculty research interests, admission to graduate studies, and the department is available at http://vetmed.tamu.edu/vlcs.

Department of Veterinary Pathobiology

http://vetmed.tamu.edu/vtpb

Head: R. Smith III (interim)

Graduate Advisor: P. J. Holman

The Department of Veterinary Pathobiology (VTPB) offers programs of graduate instruction and research leading to the degrees of Master of Science (MS) in Biomedical Sciences, the Doctor of Philosophy (PhD) in Biomedical Sciences, and the PhD in Veterinary Pathobiology. Department faculty also contribute to the academic and research training of university-wide interdisciplinary programs of study to award MS and PhD degrees in Biotechnology, Genetics, and Toxicology. Major specialty areas include infectious diseases (virology, bacteriology, parasitology), biodefense and emerging infectious diseases, metabolic diseases, genetics/genomics, neuroscience, cardiovascular science and immunology and are options for students pursuing any graduate degree awarded by the Department.

The Department also offers post-doctoral (DVM) residency/graduate programs in anatomic pathology, clinical pathology and clinical microbiology. Residents are required to enroll in graduate courses and may pursue either a Master of Science or Doctor of Philosophy degree. Minimum qualifications for residency programs include an earned DVM/VMD degree from an accredited college of veterinary medicine and eligibility to obtain a license to practice in the state of Texas. Selection of residents is made on the basis of academic achievement, letters of recommendation and pertinent experience.

The College of Veterinary Medicine and Biomedical Sciences, Texas A&M University and the Comparative Medicine Program through the Department of Veterinary Pathobiology offer a three-year postdoctoral (DVM) residency/graduate program in Laboratory Animal Medicine (LAMD). A residency certificate and a Master of Science in Biomedical Sciences with a focus in Laboratory Animal Medicine are awarded following successful completion of the required coursework, scholarly research, and a master’s thesis. A student may opt to pursue a Doctor of Philosophy degree in a related field (pathology, microbiology, genetics) following completion of the LAMD residency. A primary objective of the program is to provide postdoctoral veterinary training in the management of clinical problems of laboratory animals with an emphasis on comparative and preventive medicine, both individual and population, for a wide variety of species used for teaching and research. The program offers training to support preparation toward American College of Laboratory Animal Medicine (ACLAM) board certification and to provide individuals with a broad foundation in laboratory animal medicine.
For further information regarding these programs, please contact Dr. Patricia Holman, Graduate Advisor, Department of Veterinary Pathobiology, (979) 845-4202, (pholman@cvm.tamu.edu). **Doctoral**
- Doctor of Philosophy in Veterinary Pathobiology (p. 1305)
**Doctor of Philosophy in Veterinary Pathobiology**

Work leading to the degree of Doctor of Philosophy (PhD) is designed to give the candidate a thorough and comprehensive knowledge of his or her professional field and training in methods of research. The final basis for granting the degree shall be the candidate’s grasp of the subject matter of a broad field of study and a demonstrated ability to do independent research. In addition, the candidate must have acquired the ability to express thoughts clearly and forcefully in both oral and written languages. The degree is not granted solely for the completion of coursework, residence and technical requirements, although these must be met.

For a student who has completed a master’s degree, a DDS/DMD, DVM or MD at a U.S. institution, a minimum of 64 hours is required on the degree plan for the degree of Doctor of Philosophy. For a student who has completed a baccalaureate degree but not a master’s degree or a U.S. DDS/DMD, DVM or MD, a minimum of 96 hours is required on the degree plan for the degree of Doctor of Philosophy.

Program Requirements

Program Requirements

- Student's Advisory Committee (p. 1306)
- Degree Plan (p. 1306)
- Transfer of Credit (p. 1307)
- Research Proposal (p. 1307)
- Examinations (p. 1307)
  - Preliminary Examination (p. 1307)
  - Final Examination/Dissertation Defense (p. 1309)
- Dissertation (p. 1309)

Student’s Advisory Committee

After receiving admission to graduate studies and enrolling, the student will consult with the head of his or her major or administrative department (or chair of the intercollegiate faculty) concerning appointment of the chair of the advisory committee. The student's advisory committee will consist of no fewer than four members of the graduate faculty representative of the student's several fields of study and research, where the chair or co-chair must be from the student's department (or intercollegiate faculty, if applicable), and at least one or more of the members must have an appointment to a department other than the student's major department. The outside member for a student in an interdisciplinary degree program must be from a department different from the chair of the student's committee.

The chair, in consultation with the student, will select the remainder of the advisory committee. Only graduate faculty members located on Texas A&M University campuses may serve as chair of a student's advisory committee. Other Texas A&M University graduate faculty members located off-campus may serve as a member or co-chair (but not chair), with a member as the chair.

If the chair of a student's advisory committee voluntarily leaves the University and the student is near completion of the degree and wants the chair to continue to serve in this role, the student is responsible for securing a current member of the University Graduate Faculty, from the student's academic program and located on the Texas A&M University campus site, to serve as the co-chair of the committee. The Department Head or Chair of Intercollegiate faculty may request in writing to the Associate Provost for Graduate and Professional Studies that a faculty member who is on an approved leave of absence or has voluntarily separated from the university, be allowed to continue to serve in the role of chair of a student's advisory committee without a co-chair for us to one year. The students should be near completion of the degree. Extensions beyond the one year period can be granted with additional approval of the Dean.

The committee members' signatures on the degree plan indicate their willingness to accept the responsibility for guiding and directing the entire academic program of the student and for initiating all academic actions concerning the student. Although individual committee members may be replaced by petition for valid reasons, a committee cannot resign en masse. The chair of the committee, who usually has immediate supervision of the student's research and dissertation or record of study, has the responsibility for calling all meetings of the committee. The duties of the committee include responsibility for the proposed degree plan, the research proposal, the preliminary examination, the dissertation or record of study and the final examination. In addition, the committee, as a group and as individual members, is responsible for counseling the student on academic matters, and, in the case of academic deficiency, initiating recommendations to the Office of Graduate and Professional Studies.

Degree Plan

The student's advisory committee will evaluate the student's previous education and degree objectives. The committee, in consultation with the student, will develop a proposed degree plan and outline a research problem which, when completed, as indicated by the dissertation (or its equivalent for the degree of Doctor of Education or the degree of Doctor of Engineering), will constitute the basic requirements for the degree. The degree plan must be filed with the Office of Graduate and Professional Studies prior to the deadline imposed by the student's college and no later than 90 days prior to the preliminary examination.

This proposed degree plan should be submitted through the online Document Processing Submission System located on the website http://ogsdpss.tamu.edu. A minimum of 64 hours is required on the degree plan for the Doctor of Philosophy for a student who has completed a master's degree. A student who has completed a DDS/DMD, DVM or a MD at a U.S. institution is also required to complete a minimum of 64 hours. A student who has completed a baccalaureate degree but not a master's degree will be required to complete a 96-hour degree plan. Completion of a DDS/DMD, DVM or MD degree at a foreign institution requires completion of a minimum of 96 hours for the Doctor of Philosophy. A field of study may be primarily in one department or in a combination of departments. A degree plan must carry a reasonable amount of 691 or 5V98/5V99 (research).

Additional coursework may be added by petition to the approved degree plan by the student's advisory committee if it is deemed necessary to correct deficiencies in the student's academic preparation. No changes can be made to the degree plan once the student's Request for Final Examination is approved by the Office of Graduate and Professional Studies.

Approval to enroll in any professional course (900-level) should be obtained from the head of the department (or Chair of the intercollegiate faculty, if applicable) in which the course will be offered before including such a course on a degree plan.

No credit may be obtained by correspondence study, by extension or for any course of fewer than three weeks duration.
Transfer of Credit

Courses for which transfer credits are sought must have been completed with a grade of B or greater and must be approved by the student’s advisory committee and the Office of Graduate and Professional Studies. These courses must not have been used previously for another degree. Except for officially approved cooperative doctoral programs, credit for thesis or dissertation research or the equivalent is not transferable. Credit for “internship” coursework in any form is not transferable. Courses taken in residence at an accredited U.S. institution or approved international institution with a final grade of B or greater will be considered for transfer credit if, at the time the courses were completed, the courses would be accepted for credit toward a similar degree for a student in degree-seeking status at the host institution. Credit for coursework taken by extension is not transferable. Coursework in which no formal grades are given or in which grades other than letter grades (A or B) are earned (for example, CR, P, S, U, H, etc.) is not accepted for transfer credit. Credit for coursework submitted for transfer from any college or university must be shown in semester credit hours, or equated to semester credit hours.

Courses used toward a degree at another institution may not be applied for graduate credit. If the course to be transferred was taken prior to the conferral of a degree at the transfer institution, a letter from the registrar at that institution stating that the course was not applied for credit toward the degree must be submitted to the Office of Graduate and Professional Studies.

Grades for courses completed at other institutions are not included in computing the GPR. An official transcript from the university at which transfer courses are taken must be sent directly to the Office of Admissions.

Research Proposal

The general field of research to be used for the dissertation should be agreed on by the student and the advisory committee at their first meeting, as a basis for selecting the proper courses to support the proposed research.

As soon thereafter as the research project can be outlined in reasonable detail, the dissertation research proposal should be completed. The research proposal should be approved at a meeting of the student’s advisory committee, at which time the feasibility of the proposed research and the adequacy of available facilities should be reviewed. The approved proposal, signed by all members of the student’s advisory committee, the head of the student’s major department (or chair of the intercollegiate faculty, if applicable), must be submitted to the Office of Graduate and Professional Studies at least 20 working days prior to the submission of the Request for the Final Examination.

Compliance issues must be addressed if a graduate student is performing research involving human subjects, animals, infectious biohazards and recombinant DNA. A student involved in these types of research should check with the Office of Research Compliance and Biosafety at (979) 458-1467 to address questions about all research compliance responsibilities. Additional information can also be obtained on the website http://rcb.tamu.edu.

Examinations

Preliminary Examination

The student’s major department (or chair of the intercollegiate faculty, if applicable) and his or her advisory committee may require qualifying, cumulative or other types of examinations at any time deemed desirable. These examinations are entirely at the discretion of the department and the student’s advisory committee.

The preliminary examination is required. The preliminary examination for a doctoral student shall be given no earlier than a date at which the student is within 6 credit hours of completion of the formal coursework on the degree plan (i.e., all coursework on the degree plan except 681, 684, 690, 691, 5V98, 5V99 and 692 courses). The student is strongly encouraged to complete the Preliminary Examination no later than the end of the semester following the completion of the formal coursework on the degree plan. The Office of Graduate and Professional Studies must receive the results of the preliminary examination at least 14 weeks prior to the final examination date. The examination shall be oral and written unless otherwise recommended by the student’s advisory committee and approved by the Office of Graduate and Professional Studies. The written part of the examination will cover all fields of study included in the student’s degree plan. Each member of the advisory committee is responsible for administering a written examination in his or her particular field. unless he or she chooses to waive participation in this part of the examination. Two or more members of the advisory committee may give a joint written examination. One or more members may require a student to take a departmental or intercollegiate faculty examination to supplement or replace a written examination. Each written examination must be completed and reported as satisfactory to the chair of the advisory committee before the oral portion of the examination may be held. In case any written examination is reported unsatisfactory, the entire advisory committee must agree (1) to proceed with the oral portion of the preliminary examination, or (2) to adopt another course of action regarding the unsatisfactory written examination.

Prior to scheduling the preliminary examination with the other committee members, the committee chair will review the eligibility criteria with the student, using the Preliminary Examination Checklist to ensure the student is ready for the examination. The following list of eligibility requirements applies.

- Student is registered at Texas A&M University for the semester or summer term during which any portion of the preliminary examination may fall. If the entire examination falls between semesters, then the student must be registered for the term immediately preceding the examination.
- An approved degree plan was on file with the Office of Graduate and Professional Studies at least 90 days prior to the first written examination.
- Student’s cumulative GPR is at least 3.000.
- Student’s degree plan GPR is at least 3.000.
- All English language proficiency requirements have been satisfied.
- All committee members have scheduled or waived the written portion and agreed to attend the oral portion of the examination or have found a substitute. Only one substitution is allowed and it cannot be for the committee chair.
- At the end of the semester in which the exam is given, there are no more than 6 hours of coursework remaining on the degree plan (except 681, 684, 690, 691, 5V98, 5V99 and 692). The head of the student’s department (or Chair of the Intercollegiate Faculty, if applicable) has the authority to approve a waiver of this criterion.
- The time span from the first written examination to the oral is no more than three weeks. (In cases of department-wide written examinations, this criterion is not applicable.) The head of the student’s department...
(or chair of the intercollegiate faculty, if applicable) has the authority to approve a waiver of this criterion.

Once all requirements are met, departments or intercollegiate faculty may announce the schedule of the written and oral parts of the examination.

Credit for the preliminary examination is not transferable. If a departmental or intercollegiate faculty examination is used as part of the written portion of the preliminary examination, it must be the last examination offered prior to the date scheduled for the preliminary examination. In the schedule of the written portion, all members of the student’s advisory committee are to be included.

Through the preliminary examination, the student’s advisory committee should satisfy itself that the student has demonstrated the following qualifications:

1. a mastery of the subject matter of all fields in the program;
2. an adequate knowledge of the literature in these fields and an ability to carry out bibliographical research.

In case a student is required to take, as a part of the written portion of a preliminary examination, an examination administered by a department or intercollegiate faculty, the department or intercollegiate faculty must:

1. offer the examination at least once every six months. The departmental or interdisciplinary degree program examination should be announced at least 30 days prior to the scheduled examination date.
2. assume the responsibility for marking the examination satisfactory or unsatisfactory, or otherwise graded, and in the case of unsatisfactory, stating specifically the reasons for such a mark.
3. forward the marked examination to the chair of the student’s advisory committee within one week after the examination.

The chair of the student’s advisory committee is responsible for making all written examinations available to the members of the advisory committee at or before the oral portion of the preliminary examination. A positive vote by all members of the graduate committee with at most one dissention is required to pass a student on his or her preliminary exam. A department or intercollegiate faculty can have a stricter requirement provided there is consistency within all degree programs within a department or an interdisciplinary degree program.

The chair of the advisory committee will promptly report the results of the Preliminary Examination to the Office of Graduate and Professional Studies, using the Report of Doctoral Preliminary Examination form and the Preliminary Examination checklist. Both forms must have the appropriate signatures. These forms should be submitted to the Office of Graduate and Professional Studies within 10 working days of the scheduled preliminary examination.

The Report of the Preliminary Examination form must be submitted with original signatures of the approved committee members. If an approved committee member substitution (1 only) has been made, his/her signature must also be included on the form submitted to the Office of Graduate and Professional Studies. The original signature of the department head is also required on the form.

After passing the required oral and written preliminary examinations for the doctoral degree, the student must complete the final examination for the degree within four calendar years. Otherwise, the student will be required to repeat the preliminary examination. Upon approval of the student’s advisory committee, with no more than one member dissenting, and approval of the Office of Graduate and Professional Studies, a student who has failed the preliminary examination may be given one re-examination. Adequate time must be given to permit the student to address the inadequacies emerging from the first examination (normally six months). The student and the advisory committee should jointly negotiate a mutually acceptable date for this purpose.

A student must be registered at Texas A&M University for a minimum of one semester credit hour in the semester or summer term in which they will take any portion of the Preliminary Examination.

Steps for Completing the Preliminary Examination

<table>
<thead>
<tr>

</table>
Final Examination/Dissertation Defense

The candidate for the doctoral degree must pass a final examination by deadline dates announced in the “Office of Graduate and Professional Studies Calendar” each semester or summer term. The doctoral student is allowed only one opportunity to take the final examination. No student may be given a final examination unless his or her current official cumulative and degree plan GPAs are 3.000 or better and he or she has been admitted to candidacy. No unabsolved grades of D, F, or U for any course can be listed on the degree plan. To absolve a deficient grade, a student must repeat the course and achieve a grade of C or better. A student must have completed all coursework on his or her degree plan with the exception of 691, 5V98, or 5V99 (research) or 692 (Professional Study) hours. The student must be registered for all remaining hours; no hours remain to be taken on the degree plan. The preliminary examination results must have been submitted to the Office of Graduate and Professional Studies 14 weeks prior to the date of the defense. The research proposal must have been submitted to the Office of Graduate and Professional Studies 25 working days prior to the date of the final examination/defense. Any changes to the degree plan must be approved by the Office of Graduate and Professional Studies prior to the approval of the final examination. The request to hold and announce the final examination must be submitted to the Office of Graduate and Professional Studies a minimum of 10 working days in advance of the scheduled date. Examination/Defense results must be submitted to the Office of Graduate and Professional Studies within 10 working days of the scheduled examination/defense date. The Office of Graduate and Professional Studies must be notified in writing of any cancellations.

The student’s advisory committee will conduct this examination. The final examination is not to be administered until the dissertation or record of study is available in substantially final form to the student’s advisory committee, and all concerned have had adequate time to review the document. Additionally, all English Language Proficiency requirements must be satisfied prior to scheduling the examination. Whereas the final examination may cover the broad field of the candidate’s training, it is presumed that the major portion of the time will be devoted to the dissertation and closely allied topics. Persons other than members of the graduate faculty may, with mutual consent of the candidate and the chair of the advisory committee, be invited to attend the final examination for an advanced degree. A positive vote by all members of the graduate committee with at most one dissension is required to pass a student on his or her exam. A department can have a stricter requirement provided there is consistency within all degree programs within a department. Upon completion of the questioning of the candidate, all visitors must excuse themselves from the proceedings.

The advisory committee will submit its recommendations on the appropriate Report of the Final Examination for Doctoral Candidates form to the Office of Graduate and Professional Studies regarding acceptability of the candidate for the doctoral degree. A student must be registered in the University in the semester or summer term in which the final examination is taken.

The Report of the Final Examination Form must be submitted with original signatures of only the committee members approved by the Office of Graduate and Professional Studies. If an approved committee member substitution (1 only) has been made, his/her signature must be included on the form submitted to the Office of Graduate and Professional Studies.

Dissertation

The ability to perform independent research must be demonstrated by the dissertation, which must be the original work of the candidate. Whereas acceptance of the dissertation is based primarily on its scholarly merit, it must also exhibit creditable literary workmanship. The format of the dissertation must be acceptable to the Office of Graduate and Professional Studies. Guidelines for the preparation of the thesis are available in the Thesis Manual, which is available online at http://ogaps.tamu.edu.

After successful defense and approval by the student’s advisory committee and the head of the student’s major department (or chair of the intercollegiate faculty, if applicable), a student must submit his/her dissertation in electronic format as a single PDF file. The PDF file must be uploaded to the website, http://ogaps.tamu.edu. Additionally, a signed approval form must be brought or mailed to the Office of Graduate and Professional Studies. Both the PDF file and the signed approval form are required by the deadline.

Deadline dates for submitting are announced each semester or summer term in the Office of Graduate and Professional Studies Calendar (see Time Limit statement). These dates also can be accessed via the website http://ogaps.tamu.edu.

Before a student can be “cleared” by Thesis and Dissertation Services, a processing fee must be paid through Student Business Services. This processing fee is for the thesis/dissertation services provided. After commencement, dissertations are digitally stored and made available through the Texas A&M Libraries.

A dissertation that is deemed unacceptable by the Office of Graduate and Professional Studies because of excessive corrections will be returned to the student’s department head or chair of the intercollegiate faculty. The manuscript must be resubmitted as a new document, and the entire review process must begin anew. All original submittal deadlines must be met during the resubmittal process in order to graduate.

Additional Requirements

Additional Requirements

- Residence (p. 1310)
- Time Limit (p. 1310)
- Continuous Registration (p. 1310)
- Admission to Candidacy (p. 1310)
- Languages (p. 1310)
- 99-Hour Cap on Doctoral Degree (p. 1310)
Residence

A student who enters the doctoral degree program with a baccalaureate degree must spend one academic year plus one semester in resident study at Texas A&M University. A student who holds master’s degree when he/she enters doctoral degree program must spend one academic year in resident study. One academic year may include two adjacent regular semesters or one regular semester and one adjacent 10-week summer semester. The third semester is not required to be adjacent to the one year. Enrollment for each semester must be a minimum of 9 credit hours each to satisfy the residence requirement.

To satisfy the residence requirement, the student must complete a minimum of 9 credit hours per semester or 10-week summer semester in resident study at Texas A&M University for the required period. A student who enters a doctoral degree program with a baccalaureate degree may fulfill residence requirements in excess of one academic year (18 credit hours) by registration during summer sessions or by completion of a less-than-full course load (in this context a full course load is considered 9 credit hours per semester).

Students who are employed full-time while completing their degree may fulfill total residence requirements by completion of less-than-full time course loads each semester. In order to be considered for this, the student is required to submit a Petition for Waivers and Exceptions along with verification of his/her employment to the Office of Graduate and Professional Studies. An employee should submit verification of his/her employment at the time he/she submits the degree plan. See Registration. (p. 25)

See Residence Requirements (p. 22).

Time Limit

All requirements for doctoral degrees must be completed within a period of ten consecutive calendar years for the degree to be granted. A course will be considered valid until 10 years after the end of the semester in which it is taken. Graduate credit for coursework more than ten calendar years old at the time of the final oral examination may not be used to satisfy degree requirements.

After passing the required preliminary oral and written examinations for a doctoral degree, the student must complete the final examination within four calendar years. Otherwise, the student will be required to repeat the preliminary examination.

A final corrected version of the dissertation or record of study in electronic format as a single PDF file must be cleared by the Office of Graduate and Professional Studies no later than one year after the final examination or within the 10-year time limit, whichever occurs first. Failure to do so will result in the degree not being awarded.

Continuous Registration

A student in a program leading to a Doctor of Philosophy who has completed all coursework on his/her degree plan other than 691, 5V98 or 5V99 (research) are required to be in continuous registration until all requirements for the degree have been completed. See Continuous Registration Requirements (p. 25).

Admission to Candidacy

To be admitted to candidacy for a doctoral degree, a student must have:

1. completed all formal coursework on the degree plan with the exception of any remaining 681, 684, 690 and 691, or 5V98 and 5V99,
2. a 3.0 Graduate GPA and a Degree Plan GPA of at least 3.0 with no grade lower than C in any course on the degree plan,
3. passed the preliminary examination (written and oral portions),
4. submitted an approved dissertation proposal,
5. met the residence requirements. The final examination will not be authorized for any doctoral student who has not been admitted to candidacy.

Languages

A student is required to possess a competent command of English. For English language proficiency requirements, see the Admissions section of this catalog. The doctoral (PhD) foreign language requirement at Texas A&M University is a departmental option, to be administered and monitored by the individual departments of academic instruction.

99-Hour Cap on Doctoral Degrees

In Texas, public colleges and universities are funded by the state according to the number of students enrolled. In accordance with legislation passed by the Texas Legislature, the number of hours for which state universities may receive subvention funding at the doctoral rate for any individual is limited to 99 hours. Texas A&M University and other universities will not receive subvention for hours in excess of the limit.

Institutions of higher education are allowed to charge the equivalent of nonresident tuition to a resident doctoral student who has enrolled in 100 or more semester credit hours of doctoral coursework.

A doctoral student at Texas A&M has seven years to complete his/her degree before being charged out-of-state tuition. A doctoral student who, after seven years of study, has accumulated 100 or more doctoral hours will be charged tuition at a rate equivalent to out-of-state tuition. Please note that the tuition increases will apply to Texas residents as well as students from other states and countries who currently are charged tuition at the resident rate. This includes those doctoral students who hold GAT, GANT, and GAR appointments of 20 or more hours and recipients of competitive fellowships who receive more than $1,000 per semester. Doctoral students who, after seven years of study, have not accumulated 100 hours are eligible to pay in-state tuition if otherwise eligible.

For count purposes, a year is counted as three semesters, normally fall, spring and summer. Using this system, a student is allowed 21 semesters as a G8 student to complete the doctoral degree before being penalized with the higher tuition rate. Any semester in which a G8 student is enrolled for a doctoral level course is counted.

The following majors are exempt from the 99-Hour Cap on Doctoral Degrees:

- Biomedical Sciences
- Biochemistry
- Microbiology
- Genetics
- Toxicology
- Nutrition Sciences
• Community Clinical Psychology
• Counseling Psychology
• School Psychology
• Veterinary Pathology
• Clinical Psychology
• Counseling Psychology
• Medical Sciences
• Health Services Research
• Health Promotion and Community Health Sciences
• Epidemiology and Environmental Health

The hour limit for these majors is 130 doctoral hours.

Application for Degree
For information on applying for your degree, please visit the Graduation (p. 24) section.

Department of Veterinary Physiology and Pharmacology

http://vetmed.tamu.edu/vtpp

Head: J. N. Stallone (interim)

The Department of Veterinary Physiology and Pharmacology is the only department of its kind in the state of Texas, and has a rich tradition of excellence in education, research and outreach with an emphasis on both veterinary and human medicine. The department houses the Michael E. DeBakey Institute for Comparative Cardiovascular Science and Biomedical Devices (http://vetmed.tamu.edu/debakeyinstitute), the Reproductive Sciences Laboratory (http://vetmed.tamu.edu/rsl), the Interdisciplinary Faculty of Toxicology (http://toxicology.tamu.edu), and the newest addition, the Center for Cell and Organ Biotechnology (http://ccobtexas.org).

The primary research focus areas within the department include cardiovascular sciences, reproductive sciences, regenerative medicine, pharmacology and toxicology. The department has a well-funded, well-published, and internationally renowned faculty who have extensive research collaborations with the Colleges of Agriculture & Life Sciences, Science, Engineering, Education & Human Development, the Texas A&M Health Science Center, the School of Public Health, Texas A&M AgriLife Research and the Texas A&M Engineering Experiment Station. Our faculty have achieved national and international recognition in teaching, research and service.

Graduate programs leading to the Master of Science (MS) and Doctor of Philosophy (PhD) degrees in Biomedical Sciences or Toxicology are designed to prepare the graduate for research, teaching and other related areas. Faculty specialty areas include cardiovascular sciences, reproductive sciences, regenerative medicine, pharmacology and toxicology. Several departmental faculty members serve on university intercollegiate faculties.

The Department of Small Animal Clinical Sciences has three major missions: education, patient care, and scholarship. Each of these activities is intended to improve the quality of life for companion animals and their owners. Faculty and staff in the department participate in all four years of the professional curriculum, although most interactions with students occur in the third and fourth years. The department offers a one-year internship program for the newly graduated veterinarians, and three-year residency programs in several clinical disciplines for veterinarians seeking advanced training and board certification. Faculty and staff frequently contribute to continuing education programs and may teach and mentor students earning the interdepartmental graduate degrees in Biomedical Sciences offered by the College of Veterinary Medicine & Biomedical Sciences.

Scholarly programs of the faculty are centered mainly on the study of the spontaneously occurring diseases of the patients presented to the Small Animal Hospital. Investigative programs are active in anesthesiology, animal behavior, cardiology, clinical nutrition, dermatology, feline internal medicine, gastroenterology, general surgery, G.I. Lab, internal medicine, neurology/ neurosurgery, oncology, and orthopedic and soft tissue surgery.

Approximately, 14,500 animals are presented to the Small Animal Hospital for advanced diagnostic procedures and state-of-the-art treatment methods. Faculty, staff, and fourth-year students participate as a team in the care of these patients. Many of these patients are referred from veterinarians throughout Texas and the region, so that they may receive the benefits of the unique expertise and diagnostic and therapeutic technology offered by the Small Animal Hospital.

DVM, Texas A&M University, 2001

Gordon, Sonya, Associate Professor
Vet Small Animal Clinical Sc
DVM, University of Guelph, 1994

Grayton, Jesse, Clinical Assistant Professor
Vet Small Animal Clinical Sc
DVM, Kansas State University, 2009

Griffin, Sarah, Lecturer
Vet Small Animal Clinical Sc
DVM, Texas A&M University, 2007

Heatley, Jennifer, Associate Professor
Vet Small Animal Clinical Sc
DVM, Texas A&M University, 1995

Heseltine, Johanna, Clinical Assistant Professor
Vet Small Animal Clinical Sc
DVM, University of Saskatchewan, 1998

Hoppes, Sharman, Clinical Associate Professor
Vet Small Animal Clinical Sc
DVM, Oklahoma State University, 1993

Howe, Lisa, Professor
Vet Small Animal Clinical Sc
PhD, Texas A&M University, 1993
DVM, Texas A&M University, 1987

Johnson, Derek, Lecturer
Vet Small Animal Clinical Sc
PHD, Texas A&M University, 2014

Kerwin, Sharon, Professor
Vet Small Animal Clinical Sc
DVM, Texas A&M University, 1988

Lidbury, Jonathan, Assistant Professor
Vet Small Animal Clinical Sc
DVM, University of Glasgow, 2002

Loria Lepiz, , Clinical Assistant Professor
Vet Small Animal Clinical Sc
DVM, Universidad Nacional de Costa Rica, 2000

Mankin, Joseph, Clinical Assistant Professor
Vet Small Animal Clinical Sc
DVM, University of Tennessee-Knoxville, 2007

Mankin, Kelley, Assistant Professor
Vet Small Animal Clinical Sc
DVM, University of Missouri, 2006

Miller, Matthew, Senior Professor
Vet Small Animal Clinical Sc
DVM, Ohio State University, 1984

Nelson, Whitney, Clinical Assistant Professor
Vet Small Animal Clinical Sc
DVM, Washington State University, 2008

Peycke, Laura, Clinical Associate Professor
Vet Small Animal Clinical Sc
DVM, Louisiana State University, 1998

Rogers, Kenita, Professor
Vet Small Animal Clinical Sc
DVM, Louisiana State University, 1982

Saunders, Ashley, Associate Professor
Vet Small Animal Clinical Sc
DVM, Texas A&M University, 2001

Saunders, William, Assistant Professor
Vet Small Animal Clinical Sc
PhD, Texas A&M University, 2005
DVM, Texas A&M University, 2001

Schilling, Bethany, Lecturer
Vet Small Animal Clinical Sc
DVM, Texas A&M University, 2010

Simon, Bradley, Clinical Assistant Professor
Vet Small Animal Clinical Sc
DVM, Ross University, 2007

Steiner, Joerg, Professor
Vet Small Animal Clinical Sc
PhD, Texas A&M University, 2000

Stickney, Mark, Clinical Associate Professor
Vet Small Animal Clinical Sc
DVM, Texas A&M University, 1997

Suchodolski, Jan, Clinical Associate Professor
Vet Small Animal Clinical Sc
PhD, Texas A&M University, 2005

Willard, Michael, Professor
Vet Small Animal Clinical Sc
DVM, Texas A&M University, 1975

Wilson-Robles, Heather, Associate Professor
Vet Small Animal Clinical Sc
DVM, University of Tennessee, 2003

Zoran, Debra, Professor
Vet Small Animal Clinical Sc
PhD, Texas A&M University, 1997
DVM, Kansas State University, 1984

Degrees and Programs Offered

Marine Engineering Technology

Department of Marine Sciences

Marine Resources Management BS

Marine Sciences BS

Ocean and Coastal Resources BS

Department of Maritime Administration

Maritime Administration BS

Maritime Administration and Logistics MMAL

Department of Maritime Systems Engineering

Offshore and Coastal Systems Engineering BS

Department of Maritime Transportation

Maritime Transportation BS

1 Joint program between Texas A&M University, Texas A&M University at Galveston and Texas A&M University – Corpus Christi.

Texas A&M University at Qatar

Degree Program Baccalaureate Masters Doctorate Professional

Dwight Look College of Engineering

Chemical Engineering BS MS, MEng

Electrical Engineering BS

Mechanical Engineering BS

Petroleum Engineering BS

Degree Programs Via Distance Education

Graduate Degree Programs Offered by Distance Education

Texas A&M University currently offers the following programs by distance education:

- Master of Education (EdD) in Agricultural Education
- Master of Education (EdD) in Curriculum and Instruction
- Master of Education (EdD) in Educational Administration
- Master of Education (EdD) in Educational Psychology
- Master of Education (EdD) in Educational Technology
- Master of Education (MEd) in Special Education
- Master of Engineering (MEng) in Aerospace
- Master of Engineering (MEng) in Biological and Agricultural Engineering (Food Engineering Emphasis)
- Master of Engineering (MEng) in Engineering
- Master of Engineering (MEng) in Industrial Engineering
- Master of Engineering (MEng) in Mechanical Engineering
- Master of Engineering (MEng) in Petroleum Engineering
- Master of Industrial Distribution (MID)
- Master of Maritime Administration and Logistics in Maritime Administration and Logistics
- Master of Natural Resource Development (MNRD)
- Master of Public Health (MPH) in Epidemiology
- Master of Public Service and Administration (MPSA) in Public Service and Administration
- Master of Recreation and Resources Development (MRRD)
- Master of Science (MS) in Agricultural Systems Management
- Master of Science (MS) in Analytics
- Master of Science (MS) in Bilingual Education
- Master of Science (MS) in Education for Health Care Professionals
- Master of Science (MS) in Educational Human Resource Development
- Master of Science (MS) in Educational Psychology
- Master of Science (MS) in Education Systems Management
- Master of Science (MS) in Health Education
- Master of Science (MS) in Mathematics
- Master of Science (MS) in Plant Breeding
- Master of Science (MS) in Safety Engineering
- Master of Science (MS) in Special Education
- Master of Science (MS) in Sport Management
- Master of Science (MS) in Statistics
- Master of Science in Nursing (MSN) in Family Nurse Practitioner
- Master of Science in Nursing (MSN) in Nursing Education
- Master of Wildlife Science (MWSC)

A limited number of graduate certificate programs are available by distance education. Please review Transcribed Graduate Certificate Programs.

The delivery platform differs among these programs. Most are available 100% online, some are web-supported with interactive video and others require periodic campus visits. The delivery platform in most programs changes depending on the course/program content, needs of the students and their geographic locations. Students should carefully consider distance education and address any specific questions to the department offering the program of interest.

Only a student who is admitted to Texas A&M University may enroll in these distance education programs and the associated courses. A student wishing to enroll in any of the distance education programs must be admitted as a degree-seeking graduate student or as a post-baccalaureate
non-degree seeking student. Please see http://admissions.tamu.edu for graduate admissions information.

A student may take up to 12 hours in non-degree-seeking post-baccalaureate status and apply these hours to a master’s program with the approval of the student’s advisory committee, the head of the department (or Chair of the Intercollegiate Faculty, if appropriate), and the Office of Graduate and Professional Studies if all admission requirements to the selected master’s program are fulfilled. Courses offered for extension credit may not be used on the student’s degree plan. Post-baccalaureate non-degree status does not establish eligibility for admission to degree-seeking status.

Texas A&M University provides students pursuing a graduate degree by distance a wide variety of student support services, including access to library resources, advising, technology support and course materials acquisition through the online bookstore. A complete listing of services, degree program descriptions, appropriate points of contact within each program, and costs are available through the distance education website at http://distance.tamu.edu. Additional distance education programs are in development. Interested students should check the website periodically for updates. Students should contact the department offering the program for any questions.

**Graduate Certificate Programs**

**Transcripted Graduate Certificate Programs**

- Advanced International Affairs Certificate (Bush School of Government and Public Service) (p. 958)
- Advertising Certificate (p. 509)
- Africana Studies Certificate (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/liberal-arts/interdepartmental-degree-programs/africana-studies-certificate)
- Agriculture eLearning Development Certificate (p. 178)
- Applied Behavior Analysis Certificate (p. 578)
- Applied Statistics Certificate (p. 1257)
- Business Management Certificate (p. 466)
- China Studies Certificate (Bush School of Government and Public Service) (p. 134)
- Community Development Certificate (p. 352)
- Computational Sciences Certificate (p. 774)
- Conservation Training Certificate (p. 969)
- Dietetic Internship Certificate (p. 302)
- Digital Humanities Certificate (p. 136)
- Education for Healthcare Professionals Certificate (p. 1125)
- Education and Social Sciences Advanced Research Methods (ARM) Certificate (p. 546)
- Energy Certificate (p. 134)
- Energy Sustainability Engineering Certificate (p. 882)
- Engineering Therapeutics Manufacturing Certificate (p. 704)
- Entrepreneurship Certificate (p. 498)
- Environmental Hazard Management Certificate (p. 417)
- Facility Management Certificate (p. 417)
- Film and Media Studies Certificate (p. 966)
- Food Safety Certificate (p. 216)
- Geographic Information Science (GIS) Certificate (p. 135)
- Health Systems and Design Certificate (p. 135)
- Health Systems Management Certificate (p. 1175)
- Hispanic Bilingual Education Certificate (p. 578)
- Historic Preservation Certificate (p. 420)
- Homeland Security (Bush School of Government and Public Service) Certificate (p. 961)
- Human Resource Management Certificate (p. 497)
- International Agriculture and Resource Management (IARM) Certificate (p. 140)
- International Business (Mays MBA Students Only) Certificate (p. 466)
- International Business (Mays MS Students Only) Certificate (p. 466)
- International Education Certificate (p. 546)
- International Petroleum Management Certificate (p. 136)
- Leadership Education, Theory and Practice Certificate (p. 178)
- Meat Science Certificate (p. 216)
- Military Land Sustainability Certificate (p. 140)
- National Security Affairs (Bush School of Government and Public Service) Certificate (p. 957)
- Nonprofit Management (Bush School of Government and Public Service) Certificate (p. 962)
- Ocean Observing Systems Certificate (p. 950)
- Petroleum Geoscience Certificate (p. 923)
- Prevention Science Certificate (p. 137)
- Public Health Certificate (p. 1164)
- Quality Engineering for Regulated Medical Technologies Certificate (p. 711)
- Regulatory Science in Food Systems Certificate (p. 400)
- Remote Sensing (RS) Certificate (p. 137)
- Retailing Certificate (p. 514)
- Safety Engineering Certificate (p. 689)
- Sales Certificate (p. 514)
- Supply Chain Management (Mays MBA and MS Students Only) Certificate (p. 491)
- Sustainable Urbanism Certificate (p. 448)
- Transportation Planning Certificate (p. 138)
- Women’s and Gender Studies Certificate (p. 967)

**Graduate Clinical Certificate Programs**

- Advanced Education in General Dentistry Certificate (p. 539)
- Dental Public Health Certificate (p. 544)
- Endodontics Certificate (p. 539)
- Maxillofacial Surgery Certificate (p. 541)
- Oral and Maxillofacial Pathology Certificate (p. 541)
- Oral and Maxillofacial Radiology Certificate (p. 541)
- Orthodontics Certificate (p. 542)
- Pediatric Dentistry Certificate (p. 542)
- Periodontics Certificate (p. 543)
- Prosthodontics Certificate (p. 545)

A graduate certification program represents an emphasis area within a particular field or it could be interdisciplinary and involve several fields. Other certificate programs may exist in the various colleges or schools. Inquiries should be addressed to these colleges.
Faculty

Abanov, Artem, Associate Professor
Physics And Astronomy
PhD, Texas A&M University, 1998

Abbott, Elton, Lecturer
Architecture
PhD, Texas A&M University, 1983

Abbott, Louise, Professor
Vet Integrative Biosciences
DVM, Washington State University, 1988
PhD, University of Washington, 1982

Abedi Mashhadi, Assistant Professor
Petroleum Engineering
PHD, University of Southern California, 2012

Abeygunawardena, Piyasena, Professor
Agricultural Economics
PhD, Texas A&M University, 1986

Acosta, Sandra, Assistant Professor
Educational Psychology
PhD, Texas A&M University, 2010

Acuff, Gary, Professor
Animal Science
PhD, Texas A&M University, 1985

Adair, Thomas, Professor
Physics And Astronomy
PhD, Texas A&M University, 1965

Adams, Clark, Professor
Wildlife & Fisheries Sciences
PhD, University of Nebraska, 1973

Adams, Leslie, Senior Professor
Veterinary Pathobiology
DVM, Texas A&M University, 1968

Adams, Marvin, Professor
Nuclear Engineering
PhD, University of Michigan, 1986

Adams, Ralph, Distinguished Professor
History
PhD, University of California, Santa Barbara, 1972

Agnolet, Glenn, Professor
Physics And Astronomy
PhD, Cornell University, 1983

Agrawal, Anupam, Associate Professor
Information & Operations Mgmt
PHD, INSEAD France, 2008

Aguilar, Julio, Lecturer
Hispanic Studies
PhD, Texas A&M University-College Station, 2014

Ahmed, Anwer, Professor
Accounting
PhD, University of Rochester, 1992

Altani, Koichi, Associate Professor
Architecture
MAR, Virginia Polytechnic Institute and State University, 1997

Aitkenhead, Jacqueline, Associate Professor
Soil and Crop Sciences
PhD, University of New Hampshire, 2000

Akabani, Gamal, Associate Professor
Nuclear Engineering
PhD, Texas A&M University, 1990

Akbulut, Mustafa, Associate Professor
Chemical Engineering
PhD, University of California, Santa Barbara, 2007

Akkutlu, Ibrahim, Associate Professor
Petroleum Engineering
PhD, University of Southern California, 2002

Akleman, Derya, Senior Lecturer
Statistics
PhD, Texas A&M University, 1996

Akleman, Ergun, Professor
Visualization
PhD, George Institute of Technology, 1992

Al-Hashimi, Ibtisam, Professor
Periodontics
PhD, State University of New York at Stony Brook, 1989

Alaniz, Robert, Assistant Professor
Chemical Engineering
PHD, University of Washington, 2015

Alexander, James, Associate Professor
Health Policy & Management
PhD, University of Houston, 1978

Alexander-Packard, Gerianne, Professor
Psychology
PHD, McGill University, 1991

Alfred, Mary, Professor
Edu Admn & Human Resource Dev
PhD, University of Texas, 1995

Alfriend, Kyle, Professor
Aerospace Engineering
PhD, Virginia Polytechnic Institute and State University, 1967

Alge, Daniel, Assistant Professor
Biomedical Engineering
PhD, Purdue University, 2010
Ali, Ahmed, Assistant Professor
Architecture
PHD, Virginia Polytechnic Institute, 2012

Ali, Dalia, Lecturer
Electrical & Computer Eng
PHD, Alexandria University, 1997

Alkon, Cynthia, Associate Professor
School of Law
JD, University of California, 1990

Allaire, Douglas, Assistant Professor
Mechanical Engineering
PHD, Massachusetts Institute of Technology, 2009

Allen, Graham, Professor
Mathematics
PhD, University of Wisconsin-Madison, 1971
MS, University of Wisconsin, 1966

Allen, Roland, Professor
Physics And Astronomy
PhD, University of Texas, Austin, 1969

Alred, Clinton, Associate Professor
Nutrition & Food Science
PhD, University of Illinois at Urbana-Champaign, 2002

Alonzo, Armando, Associate Professor
History
PhD, Indiana University, 1994

Alonzo, Juan, Associate Professor
English
PhD, University of Texas, 2003

Alperntarlow, Sara, Associate Professor
History
PhD, University of Maryland, 1978

Alton, Stephen, Professor
School of Law
JD, The University of Texas School of Law, 1981

Alvarado, Christine, Associate Professor
Poultry Science
PhD, Texas A&M University, 2001

Alvarado, Jorge, Associate Professor
Eng Tech & Ind Distribution
PhD, University of Illinois, 2004

Alvard, Michael, Associate Professor
Anthropology
PhD, University of New Mexico, 1993

Amato, Nancy, Professor
Computer Science & Engineering
PhD, University of Illinois, 1995

Ames, Aaron, Associate Professor
Mechanical Engineering
PhD, University of California, Berkeley, 2006

Amini, Noushin, Visiting Assistant Professor
Mechanical Engineering
PHD, Texas A&M University, 2011

Amrein, Hubert, Professor
Biochemistry And Biophysics
PHD, University of Zürich, 1989

Amstalden, Katia, Research Assistant Professor
Veterinary Pathobiology
DVM, Federal University of Mato Grosso do Sul, 1993

Amstalden, Marcel, Associate Professor
Animal Science
PHD, Texas A&M University, 2003

An, Yonghong, Assistant Professor
Economics
PhD, John Hopkins University, 2011

Anand, Nagamangala, Professor
Mechanical Engineering
PhD, Purdue University, 1983

Anderson, David, Professor & Extension Specialist
Agricultural Economics
PhD, Texas A&M University, 1994

Anderson, Richard, Professor
Economics
PhD, Purdue University, 1976

Anderson, Sammy, Executive Associate Professor
Landscape Arch & Urban Planning
PhD, Texas A&M University, 1993

Anderson, Stuart, Professor
Civil Engineering
PhD, University of Texas, 1989

Anderson, Terry, Professor
History
PhD, Indiana University, 1978

Anding, Jenna, Professor & Extension Specialist
Nutrition & Food Science
PHD, Texas A&M University, 1994

Angerer, Jay, Assistant Professor
Ecosystem Science & Mgmt
PHD, Texas A&M University, 2008

Annamalai, Kalyan, Professor
Mechanical Engineering
PhD, Georgia Institute of Technology, 1975

Annapareddy, Narasimha, Professor
Electrical & Computer Eng
PhD, University of Illinois, 1990

Anshelevich, Michael, Professor
Mathematics
PhD, University of California, Berkeley, 2000
Apostolopoulos, Yiorgos, Associate Professor
Health & Kinesiology
PHD, University of Connecticut, 1994

Appel, David, Professor & Extension Specialist
Plant Pathology & Microbiology
PHD, Virginia Tech, 1980

Applegate, Brian, Associate Professor
Biomedical Engineering
PHD, Ohio State University, 2000

Aramayo, Rodolfo, Associate Professor
Biology
PHD, University of Georgia, 1992

Araujo, Andre, Clinical Assistant Professor
Information & Operations Mgmt
PHD, The University of Oklahoma, 2004

Archer, Gregory, Assistant Professor & Extension Specialist
Poultry Science
PHD, Texas A&M University, 2005

Aregullin, Rosalinda, Assistant Lecturer
Hispanic Studies
PHD, Texas A&M University, 2010

Arenas, Angela, Assistant Professor
Veterinary Pathobiology
PHD, Texas A&M University, 2007
DVM, La Salle University, Columbia, 2002

Ariza Figueroa, Assistant Lecturer
Ecosystem Science & Mgmt
PHD, Texas A&M University, 2013

Arizpe, Norma, Senior Lecturer
Hispanic Studies
PHD, University of Michigan Ann Arbor, 1977

Arizpe, Victor, Professor
Hispanic Studies
PHD, University of Michigan, 1982

Armstrong, Carisa, Clinical Associate Professor
Health & Kinesiology
MFA, Case Western Reserve University, 2002

Arnold, Ashley, Research Assistant Professor
Animal Science
PHD, Texas A&M University, 2013

Arnold, Carolyn, Assistant Professor
Vet Large Animal Clinical Sc
DVM, Michigan State University, 1998

Arnold, Michael, Professor
Horticultural Sciences
PHD, North Carolina State University, 1990

Arosh, Joe, Associate Professor
Vet Integrative Biosciences
DVM, Universite Laval, 2004
PHD, Laval University, 2003

Arosh, Sakhila, Assistant Professor
Vet Integrative Biosciences
PHD, University of Madras, 2002

Arredondo, Kim, Adjunct Assistant Professor
Educational Psychology
PHD, Texas A&M University, 2002

Arreola-Risa, Antonio, Associate Professor
Information & Operations Mgmt
PHD, Stanford University, 1989

Arroyave, Raymundo, Associate Professor
Materials Science & Eng
PHD, Massachusetts Institute of Technology, 2004

Arthur, Schwab, Professor
Soil and Crop Sciences
PHD, Colorado State University, 1981

Arthur, Winfred, Professor
Psychology
PHD, University of Akron, 1988

Askew, Patricia, Adjunct Professor
School of Law
JD, Texas Wesleyan University, 2005

Athrey, Giridhar, Assistant Professor
Poultry Science
PHD, University of Louisiana at Lafayette, 2009

Athreya, Sheela, Associate Professor
Anthropology
PHD, Washington University in St. Louis, 2003

Aubeny, Charles, Professor
Civil Engineering
PHD, Massachusetts Institute of Technology, 1992

Aufderheide, Karl, Associate Professor
Biology
PHD, University of Minnesota, 1974

August, John, Professor
Vet Small Animal Clinical Sc
DVM, University of London, 1973

Austin, Scott, Senior Associate Professor
Philosophy & Humanities
PHD, The University of Texas - Austin, 1979

Autenrieth, Robin, Professor
Civil Engineering
PHD, Clarkson University, 1986

Avnet, Mark, Assistant Professor
Industrial & Systems Eng
PHD, Massachusetts Institute of Technology, 2009

Avsec, Stephen, Visiting Assistant Professor
Mathematics
PHD, University of Illinois, 2012
Awika, Joseph, Associate Professor
Soil and Crop Sciences
PhD, Texas A&M University, 2003

Ayari, Salah, Instructional Associate Professor
International Studies
PhD, University of Minnesota, 1998

Ayers, Walter, Visiting Professor
Petroleum Engineering
PhD, University of Texas, 1984

Ayres, Nicola, Lecturer
Biochemistry And Biophysics
PhD, University of Nebraska - Lincoln, 1987

Ayres, Pamela, Professor
School of Law
JD, BAYLOR UNIVERSITY, 1988

Aziz, Sahar, Associate Professor
School of Law
JD, The University of Texas School of Law, 2004

Babe, John, Assistant Professor Of The Practice
Architecture
PhD, University of Toronto, 1989

Bach, Damon, Lecturer
History
PHD, Texas A&M University, 2013

Baer, Judith, Professor
Political Science
PhD, University of Chicago, 1974

Baetge, Courtney, Clinical Assistant Professor
Vet Small Animal Clinical Sc
DVM, Texas A&M University, 2003

Bagavathiannan, Muthukumar, Assistant Professor
Soil and Crop Sciences
PhD, University of Manitoba, 2009

Bailey, Christopher, Professor
Poultry Science
PhD, Texas A&M University, 1982

Bailey, Don, Lecturer
Bush School of Government and Public Service
MS, National War College, 2001

Bailey, Everett, Professor
Vet Physiology & Pharmacology
PhD, Iowa State University, 1968
DVM, Texas A&M University, 1964

Bailey, Krista, Visiting Lecturer
Educ Admn & Human Resource Dev
PhD, Texas A&M University, 2011

Baluenga, Peria, Professor
Chemical Engineering
PhD, University of Texas, 1996

Balester, Valerie, Professor
English
PhD, University of Texas, 1998

Ball, Judith, Associate Professor
Veterinary Pathobiology
PhD, Louisiana State University, 1990

Ballouli, Khalid, Adjunct Assistant Professor
Health & Kinesiology
PhD, Texas A&M University, 2011

Balog, Robert, Associate Professor
Electrical & Computer Eng
PhD, University of Illinois at Urbana-Champaign, 2006

Balsis, Stephen, Associate Professor
Psychology
PhD, Washington University in St. Louis, 2008

Baltazar, Juan, Tees Research Engineer
Architecture
PHD, Texas A&M University, 2006

Bame, Sherry, Professor
Landscape Arch & Urban Planning
PhD, University of Michigan, 1985

Banerjee, Amarnath, Associate Professor
Industrial & Systems Eng
PhD, University of Illinois, 1999

Banerjee, Debiyoti, Professor
Mechanical Engineering
PhD, University of California, Los Angeles, 1999

Banerjee, Sarbajit, Professor
Chemistry
PhD, State University of New York at Stony Brook, 2004

Bangerth, Wolfgang, Professor
Mathematics
PhD, University of Heidelberg, Germany, 2002

Barbour, Joshua, Assistant Professor
Department Of Communication
PHD, University of Illinois at Urbana - Champaign, 2001

Bardenhagen, Eric, Assistant Professor
Landscape Arch & Urban Planning
PhD, Texas A&M University, 2011

Barge, James, Professor
Department Of Communication
PhD, University of Kansas, 1985

Barnes, Wayne, Professor
School of Law
JD, Texas Tech University School of Law, 1995

Barnhardt, Terrence, Instructional Associate Professor
Psychology
PhD, University of Arizona, 1993
Barondeau, David, Associate Professor
Chemistry
PhD, Texas A&M University, 1996

Barr, James, Assistant Professor
Vet Small Animal Clinical Sc
DVM, Louisiana State University, 2001

Barr, Kathleen, Lecturer
History
PhD, Texas A&M University, 2012

Barrett, Beverly, Lecturer
Bush School of Government and Public Service
PhD, University of Miami, 2013

Barrick, Murray, Distinguished Professor
Management
PhD, University of Akron, The, 1988

Barroso, Luciana, Associate Professor
Civil Engineering
PhD, Stanford University, 1999

Barrufet, Maria, Professor
Petroleum Engineering
PhD, Texas A&M University, 1987

Barry, Adam, Associate Professor
Health & Kinesiology
PhD, Texas A&M University, 2007

Barton, Claudia, Professor
Vet Small Animal Clinical Sc
DVM, University of Missouri, 1973

Baskin, Dean, Assistant Professor
Mathematics
PhD, Stanford University, 2010

Bassichis, William, Professor
Physics And Astronomy
PhD, Case Western Reserve University, 1963

Batchelor, Bill, Professor
Civil Engineering
PhD, Cornell University, 1976

Batista, Paul, Associate Professor
Health & Kinesiology
JD, Baylor University, 1976

Batteas, James, Professor
Chemistry
PhD, University of California, Berkeley, 1995

Battle, Guy, Professor
Mathematics
PhD, Duke University, 1977

Bauder, Florent, Visiting Assistant Professor
Mathematics
PhD, Universite De Besancon, 2010

Bauer, John, Senior Professor
Vet Small Animal Clinical Sc
PhD, University of Illinois, 1980

Baumann, Paul, Professor & Extension Specialist
Soil and Crop Sciences
PhD, Texas Tech University, 1981

Baumgardner, David, Senior Lecturer
Biology
PhD, Texas A&M University, 2008

Baumgartner, Lisa, Associate Professor
Educ Admn & Human Resource Dev
EdD, University of Georgia, 2000

Bayanpourtehrani, Ghazal, Lecturer
Economics
PhD, Southern Illinois University at Carbondale, 2011

Bayless, Kayla, Associate Professor
Biochemistry And Biophysics
PhD, Texas A&M University, 1999

Bazer, Fuller, Distinguished Professor
Animal Science
PhD, North Carolina State University, 1969

Bearfield, Domonic, Associate Professor
Public Service & Administration
PhD, Rutgers University, 2004

Beason, William, Associate Professor
Civil Engineering
PhD, Texas Tech University, 1980

Beauchamp, Michael, Visiting Assistant Professor
History
PhD, Texas A&M University, 2009

Beaudoin, Christopher, Professor
Department Of Communication
PhD, University of Missouri, 2001

Beaver, Bonnie, Professor
Vet Small Animal Clinical Sc
DVM, University of Minnesota, 1968

Becker, Aaron, Clinical Assistant Professor
Information & Operations Mgmt
PhD, University of Oklahoma, 2009

Becker, Katrin, Professor
Physics And Astronomy
PhD, University of Bonn, 1994

Becker, Melanie, Professor
Physics And Astronomy
PhD, University of Bonn, Germany, 1994

Bedford, Diane, Clinical Assistant Professor
Health & Kinesiology
MFA, The Florida State University, 2010
Bednarz, Robert, Professor
Geography
PhD, University of Chicago, 1974

Bednarz, Sarah, Professor
Geography
PhD, Texas A&M University, 1992

Begley, Tadhg, Distinguished Professor
Chemistry
PhD, California Institute of Technology, 1983

Begovic, Miroslav, Professor
Electrical & Computer Eng
DEN, Virginia Polytechnic Institute, 2014

Beheshti, Ali, Visiting Assistant Professor
Mechanical Engineering
DEN, Louisiana State University, 2013

Behmer, Spencer, Professor
Entomology
PhD, University of Arizona, 1998

Bell-Pedersen, Deborah, Professor
Biology
PhD, State University of New York at Albany, 1991

Bellows, Charles, Adjunct Professor
School of Law
JD, SMU Dedman School of Law, 1976

Beltran, Liliana, Associate Professor
Architecture
PhD, University of California, Berkeley, 1997

Belyanin, Alexey, Professor
Physics And Astronomy
PhD, Institute of Applied Physics, Russian Academy of Sciences, 1995

Benavides Iglesias., Lecturer
Geology & Geophysics
PHD, Texas A&M University, 2007

Benden, Mark, Associate Professor
Environmental & Occptnl Hlth
PhD, Texas A&M University, 2006
MS, Texas A&M University, 1992

Benedik, Michael, Professor
Biology
PhD, Stanford University, 1982

Benjamin, James, Professor
Accounting
PhD, Indiana University, 1972

Benli, Mustafa, Visiting Assistant Professor
Mathematics
PHD, Texas A&M University, 2013

Bennett, Gregg, Professor
Health & Kinesiology
EDD, Auburn University, 1997

Benson, Byron, Professor
Diagnostic Sciences
DDS, The University of Iowa, 1975

Benson, Monica, Adjunct Professor
School of Law
JD, Texas Wesleyan University School of Law, 2002

Bento, Pedro, Assistant Professor
Economics
PHD, University of Toronto, 2013

Benz, Michael, Professor
Educational Psychology
PHD, University of Oregon, 1983

Benzeraga, Amine, Associate Professor
Aerospace Engineering

Beremand, Phillip, Lecturer
Biology
PHD, Indiana Universit Bloomington, 1979

Bergbreiter, David, Professor
Chemistry
PHD, Massachusetts Institute of Technology, 1974

Berger, Harris, Professor
Performance Studies
PHD, Indiana University, 1995

Bergeron, Christine, Clinical Associate Professor
Health & Kinesiology
PHD, Florida State University, 1998

Berghman, Luc, Associate Professor
Poultry Science
PHD, University of Leuven, 1988

Bergman, Mindy, Professor
Psychology
PHD, University of Illinois at Urbana-Champaign, 2001

Berkolaiko, Gregory, Professor
Mathematics
PHD, University of Bristol, 2001

Bernal, Julio, Professor
Entomology
PHD, University of California, Riverside, 1995

Bernardo, Joseph, Research Associate Professor
Biology
PHD, Duke University, 1991

Berry, Leonard, Distinguished Professor
Marketing
PHD, Arizona State University, 1968

Berthold, Dennis, Professor
English
PHD, University of Wisconsin - madison, 1972
Bessler, David, Professor
Agricultural Economics
PhD, University of California, Davis, 1977

Bethel, Ryan, Lecturer
Chemistry
PHD, Texas A&M University, 2014

Bettati, Riccardo, Professor
Computer Science & Engineering
PhD, University of Illinois, 1994

Bevan, John, Professor
Chemistry
PhD, University of London, 1975

Beyerlein, Michael, Professor
Educ Admn & Human Resource Dev
PhD, Colorado State University, 1986

Bhattacharya, Anirban, Assistant Professor
Statistics
PhD, Duke University, 2012

Bhattacharya, Nandini, Professor
English
PhD, University of Rochester, 1992

Bhattacharya, Rakim, Associate Professor
Aerospace Engineering
PhD, University of Minnesota, 2003

Bhattacharyya, S, Professor
Electrical & Computer Eng
PhD, Rice University, 1971

Biard, Severine, Visiting Assistant Professor
Mathematics
PHD, Universite Pierre et Marie Curie, 2013

Bierman, Leonard, Professor
Management
JD, University of Pennsylvania, 1978

Bigelow, Ben, Assistant Professor
Construction Science
PhD, University of Colorado, 2012
MS, Arizona State University, 2008

Biggs, Douglas, Professor
Oceanography
PhD, Massachusetts Institute of Technology, 1976

Bilbo, David, Professor
Construction Science
EdD, Texas A&M University, 1977

Birely, Anna, Assistant Professor
Civil Engineering
PhD, University of Washington, 2012

Biscontin, Giovanna, Tees Research Associate Professor
Civil Engineering
PhD, University of California, Berkeley, 2001

Bishop, Michael, Professor
Geography
PhD, Indiana State University, 1987

Bissett, Wesley, Associate Professor
Vet Large Animal Clinical Sc
PhD, Texas A&M University, 2007
DVM, Texas A&M University, 1997

Black, Dorothy, Clinical Assistant Professor
Vet Small Animal Clinical Sc
DVM, UC Davis, 2003

Blackwell, James, Lecturer
George Bush School of Govern
PhD, Tufts University, 1984

Blackwell, Ronnie, Adjunct Professor
School of Law
DJ, Texas Wesleyan University School of Law, 2014

Blake, Jamilia, Associate Professor
Educational Psychology
PhD, University of Georgia, 2007

Blanchard, Terry, Professor
Vet Large Animal Clinical Sc
DVM, Kansas State University, 1976
MS, University of Missouri-Columbia, 1983

Blanson, Archie, Adjunct Assistant Professor
Educ Admn & Human Resource Dev
PHD, Texas A&M University, 2005

Blanton, Carlos, Associate Professor
History
PhD, Rice University, 1999

Blasingame, Thomas, Professor
Petroleum Engineering
PhD, Texas A&M University, 1989

Blasor, Tara, Lecturer
Accounting
MS, Texas A&M University, 2007

Bloomfield, Susan, Professor
Health & Kinesiology
EDD, Ohio State University, 1992

Blue McLendon,, Clinical Assistant Professor
Vet Physiology & Pharmacology
DVM, Texas A&M University, 1989

Bluemel, Janet, Professor
Chemistry
PhD, Technical University of Munich, Germany, 1989

Boadu, Fred, Professor
Agricultural Economics
PHD, University of Kentucky, 1981

Boas, Harold, Professor
Mathematics
PhD, Massachusetts Institute of Technology, 1980
Faculty

Bobbitt, Erica, Assistant Lecturer
Ag Leadership, Educ & Comm
PHD, The Pennsylvania State University, 2011

Boellstorff, Diane, Assistant Professor & Extension Specialist
Soil and Crop Sciences
PHD, University of California, 1991

Boenig, Robert, Professor
English
PhD, Rutgers University, 1978

Boettcher, Cynthia, Clinical Professor
Teaching, Learning & Culture
PhD, Texas A&M University, 1998

Bogue, Patty, Lecturer
Department Of Communication
PHD, Texas A&M University, 2014

Boeivie, Steven, Associate Professor
Management
PhD, University of Texas, Austin, 2006

Boleman, Christopher, Associate Professor & Extension Specialist
Ag Leadership, Educ & Comm
PHD, Texas A&M University, 2003

Bolin, Jane, Professor
Health Policy & Management
PHD, Pennsylvania State University, 2002

Bolouri, Ali, Professor
Restorative Sciences
DDS, University of Tennessee, 1976

Bonasera, Aldo, Research Scientist
Physics and Astronomy
PhD, Dottorato di Ricerca-Italy, 1987

Bond, Jon, Professor
Political Science
PHD, University of Illinois at Urbana-Champaign, 1978

Bondas, Sarah, Associate Professor
Biochemistry And Biophysics
PHD, University of Illinois - Urbana-Champaign, 1998

Bonito, Andrea, Professor
Mathematics
PhD, Ecole Polytechnique Federale de Lausanne, 2006

Bonner, Fred, Professor
Educ Admn & Human Resource Dev
EdD, University of Arkansas, 1997

Boone, Audra, Associate Professor
Finance
PHD, Pennsylvania State University, 2002

Boone, Edward, Lecturer
Information & Operations Mgmt
MS, Pennsylvania State University, 2000
MBA, University of Delaware, 1994

Booth, Geoffrey, Associate Professor
Landscape Arch & Urban Planning
MPA, University of Queensland, 1987

Borhani Haghighi,, Lecturer
Architecture
MAR, Virginia Tech, 2012

Borosh, Itshak, Senior Professor
Mathematics
PhD, Weizmann Institute of Science, 1966

Bosshard, John, Lecturer
Electrical & Computer Eng
PHD, Texas A&M University, 2012

Boswell, Wendy, Professor
Management
PhD, Cornell University, 2000

Boucher, Anthony, Clinical Associate Professor
Health & Kinesiology
PhD, Texas Women's University, 2008

Boudreau, Christen, Clinical Assistant Professor
Vet Small Animal Clinical Sc
DVM, Texas A&M University, 2010

Bourgeois, Anthony, Associate Professor
Psychology
PhD, Baylor University, 1967

Bouton, Cynthia, Professor
History
PHD, State University of New York at Binghamton, 1985

Bouton, Thomas, Professor
Ecosystem Science & Mgmt
PhD, Brigham Young University, 1979

Bouwman, Christa, Associate Professor
Finance
PHD, University of Michigan, 2005

Bowen, Daniel, Assistant Professor
Educ Admn & Human Resource Dev
PHD, University of Arkansas, 2013

Bowersox, Rodney, Professor
Aerospace Engineering
PhD, Virginia Tech, 1992

Bowman, Ann, Professor
Public Service & Administration
PHD, University of Florida, 1979

Bowman, Jean, TEES Research Scientist
Meteorology
PHD, Texas A&M University, 1999

Bowman, Kenneth, Professor
Atmospheric Sciences
PhD, Princeton University, 1984
Boyd, Barry, Associate Professor
Ag Leadership, Educ & Comm
PhD, Texas A&M University, 1991

Boyd, Dean, Visiting Assistant Professor
Landscape Arch & Urban Planning
PhD, Texas A&M University, 1995

Boyd, James, Associate Professor
Aerospace Engineering
PhD, Texas A&M University, 1994

Boyle, David, Visiting Associate Professor
Nuclear Engineering
PhD, Massachusetts Institute of Technology, 1980

Bozeman, Todd, Lecturer
Teaching, Learning & Culture
PHD, Texas A&M University, 2010

Braby, Leslie, Tees Research Professor
Nuclear Engineering
PhD, Oregon State University, 1972

Bracci, Joseph, Professor
Civil Engineering
PhD, University at Buffalo, State University of New York, 1992

Bracher, Nathan, Professor
International Studies
PhD, University of Texas, Austin, 1984

Bradford, James, Professor
History
PhD, University of Virginia, 1976

Braga Neto, Associate Professor
Electrical & Computer Eng
PHD, John Hopkins University, 2002

Bragg, Belinda, Lecturer
Political Science
PHD, Texas A&M University, 2006

Brannstrom, Christian, Professor
Geography
PhD, University of Wisconsin-Madison, 1998

Brewer, Maurice, Professor Of The Practice
Biomedical Engineering
MBA, Harvard Graduate School of Business Administration, 1984

Briaud, Jean-Louis, Professor
Civil Engineering
PhD, University of Ottawa, Canada, 1979

Briers, Gary, Professor
Ag Leadership, Educ & Comm
PhD, Iowa State University, 1978

Bright, Christina, Lecturer
Bush School of Government and Public Service
MA, University of Idaho, 1998

Bright, Elise, Professor
Landscape Arch & Urban Planning
PhD, Texas A&M University, 1980

Bright, Leonard, Associate Professor
Public Service & Administration
PhD, Portland State University, 2003

Brightsmith, Donald, Assistant Professor
Veterinary Pathobiology
PhD, Duke University, 1999

Briske, David, Professor
Ecosystem Science & Mgmt
PhD, Colorado State University, 1978

Brody, Samuel, Professor
Landscape Arch & Urban Planning
PhD, University of North Carolina, 2002

Brooks, Charles, Associate Professor
History
PhD, University at Buffalo, State University of New York, 1988

Brooks, David, Professor
Oceanography
PhD, University of Miami, 1975

Brooks, Sarah, Associate Professor
Atmospheric Sciences
PhD, University of Colorado, 2002

Brossart, Dan, Associate Professor
Educational Psychology
PhD, University of Missouri, 1996

Broussard, Albert, Professor
History
DVM, Duke University, 1977

Brower, Tracy, Lecturer
Psychology
PHD, Texas A&M University, 2010

Brown, Alexander, Associate Professor
Economics
PhD, California Institute of Technology, 2008

Brown, William, Professor
Public Service & Administration
PhD, Claremont Graduate School, 2000

Brumbelow, James, Associate Professor
Civil Engineering
PhD, Georgia Institute of Technology, 2001

Brundage, Adrienne, Assistant Lecturer
Entomology
PHD, Texas A&M University, 2012

Bryan, Kisha, Clinical Assistant Professor
Teaching, Learning & Culture
PHD, University of Florida, Gainesville, FL, 2012
Bryant, Henry, Research Associate Professor
Agricultural Economics
PhD, Texas A&M University, 2003

Bryant, John, Associate Professor
Construction Science
PhD, Texas A&M University, 1995

Bryant, Vaughn, Professor
Anthropology
PhD, University of Texas, Austin, 1969

Bryant, William, Professor
Oceanography
PhD, University of Chicago, 1961

Bryk, Mary, Associate Professor
Biochemistry And Biophysics
PhD, Albany Medical College, 1994

Buchanan, John, Professor
Health & Kinesiology
PhD, Florida Atlantic University, 1996

Buchanan, Walter, Professor
Eng Tech & Ind Distribution
PhD, Indiana University, 1993

Budke, Christine, Associate Professor
Vet Integrative Biosciences
PhD, Philosophisch-Naturwissenschaftliche Fakultat der Universitat Basel, 2005
DVM, Purdue University, 2001

Buenger, Victoria, Clinical Professor
Management
PhD, Texas A&M University, 1990

Buenger, Walter, Professor
History
PhD, Rice University, 1979

Buerg, Markus, Visiting Assistant Professor
Mathematics
Phd, Karlsruhe Institute of Technology, 2012

Bukkapatnam, Satish, Professor
Industrial & Systems Eng
PhD, Pennsylvania State University, 1997

Bullock, Justin, Assistant Professor
Public Service & Administration
PhD, University of Georgia, 2014

Burch, Robert, Professor
Philosophy & Humanities
PhD, Rice University, 1969

Burge, Mark, Associate Professor
School of Law
JD, The University of Texas School of Law, 1997

Burgess, Kevin, Professor
Chemistry
PhD, University of Cambridge, 1983

Burghardt, Robert, Professor
Vet Integrative Biosciences
PhD, Wayne State University, 1976

Burk, James, Professor
Sociology
PhD, University of Chicago, 1982

Burkart, Patrick, Professor
Department Of Communication
PhD, University of Texas, 2000

Burke, Adam, Lecturer
Eng Tech & Ind Distribution
BS, Texas A&M University, 1997

Burke, Mack, Associate Professor
Educational Psychology
PhD, University of Oregon, 2001

Burke, Shanna, Associate Professor
Educational Psychology
PhD, University of Oregon, 1998

Burlew, Lynn, Professor
Teaching, Learning & Culture
PhD, University of Texas, 1989

Burress, Cynthia, Assistant Professor
School of Law
DJ, Seattle University School of Law, 2003

Burris, Mark, Professor
Civil Engineering
PhD, University of South Florida, 2001

Busch, Paul, Systems Regent Professor
Marketing
PhD, Pennsylvania State University, 1974

Bustos, Isaac, Instructional Assistant Professor
Performance Studies
PhD, University of Texas, 2010

Butenko, Sergiy, Professor
Industrial & Systems Eng
PhD, University of Florida, 2003

Butler, Scott, Lecturer
Eng Tech & Ind Distribution
MS, Sam Houston State University, 1986

Butler-Purry, Karen, Professor
Electrical & Computer Eng
PhD, Howard University, 1994

Byram, Thomas, Assistant Professor
Ecosystem Science & Mgmt
PhD, Texas A&M, 2000

Byrne, David, Professor
Horticultural Sciences
PhD, Cornell University, 1980
Byrnes, William, Executive Professor
School of Law
JD, Loyola University School of Law, 1992

Byrnes, Glenda, Clinical Associate Professor
Educational Psychology
PhD, Texas A&M University, 2007

Cacic, Branimir, Visiting Assistant Professor
Mathematics
PHD, California Institute of Technology, 2013

Caffey, Stephen, Assistant Professor
Architecture
PhD, University of Texas, 2008

Cagin, Tahir, Professor
Materials Science & Eng
PhD, Clemson University, 1988

Cahill, Anthony, Associate Professor
Civil Engineering
PhD, John Hopkins University, 1998

Cai, Jing, Assistant Professor
Vet Integrative Biosciences
PhD, University of Hong Kong, 2006

Cairns, David, Professor
Geography
PhD, University of Iowa, 1995

Caldwell, David, Professor
Poultry Science
PhD, Texas A&M University, 1997

Caldwell, Heather, Lecturer
Teaching, Learning & Culture
PhD, Texas A&M University, 2009

Callahan, Jamie, Associate Professor
Educ Admn & Human Resource Dev
EdD, George Washington University, 1999

Callaway, Todd, Associate Professor
Animal Science
PHD, Cornell University, Ithaca, NY, 2014

Calvin, James, Professor Emeritus
Statistics
PhD, Colorado State University, 1985

Campagnol, Gabriela, Assistant Professor
Architecture
PhD, University of Sao Paulo, 2003

Campana, Lilia, Lecturer
Anthropology
PHD, Texas A&M University, 2014

Campbell, August, Instructional Assistant Professor
Health & Kinesiology
PHD, Texas State University, 2005

Campbell, Heidi, Associate Professor
Department Of Communication
PhD, University of Edinburgh, 2002

Campbell, Lisa, Professor
Oceanography
PhD, State University of New York at Stony Brook, 1985

Campbell, Mary, Associate Professor
Sociology
PhD, University of Wisconsin-Madison, 2004

Campbell, Patricia, Professor
Dental Hygiene
MS, Old Dominion University, 1989

Cantey, Samuel, Adjunct Professor
School of Law
JD, University of Tulsa College of Law, 2002

Cantrell, Emily, Clinical Assistant Professor
Teaching, Learning & Culture
PhD, Texas A&M University, 2008

Cantrell, Pierce, Associate Professor
Electrical & Computer Eng
PhD, Georgia Institute of Technology, 1981

Capar, Ismail, Associate Professor
Eng Tech & Ind Distribution
PhD, Mississippi State University, 2007

Capareda, Sergio, Associate Professor
Biological & Agricultural Eng
PhD, Texas A&M University, 1990

Capps, Oral, Executive Professor
Agricultural Economics
PhD, Virginia Tech, 1979

Capraro, Mary, Associate Professor
Teaching, Learning & Culture
PhD, University of Southern Mississippi, 2000

Capraro, Robert, Professor
Teaching, Learning & Culture
PhD, University of Southern Mississippi, 2000

Cardenas, Diana, Lecturer
English
PhD, Texas A&M University, 2000

Carey, John, Professor
Poultry Science
PhD, Kansas State University, 1982

Carley, Robert, Instructional Assistant Professor
Sociology
PHD, Texas A&M University, 2012

Carlson, Charles, Lecturer
Philosophy & Humanities
PHD, Texas A&M University, 2012
Carlson, David, Associate Professor
Anthropology
PhD, Northwestern University, 1979

Carlson, Deborah, Associate Professor
Anthropology
PhD, University of Texas, Austin, 2004

Carlson, Keely, Lecturer
Anthropology
PhD, Texas A&M University, 2014

Carlson, Kimberly, Senior Lecturer
Construction Science
MAR, Texas A&M University, 2002

Carlson, Richard, Professor
Geology & Geophysics
PhD, University of Washington, 1976

Carney, Ginger, Associate Professor
Biology
PhD, University of Georgia, 1998

Carpenter, Booker, Associate Professor
Teaching, Learning & Culture
PhD, Pennsylvania State University, 1996

Carpenter, Bruce, Associate Professor & Extension Specialist
Animal Science
PhD, Texas A&M University, 1993

Carpenter, Megan, Professor
School of Law
JD, WEST VIRGINIA UNIVERSITY, 1999

Carroll, Gwendolyn, Professor
Vet Small Animal Clinical Sc
DVM, University of Tennessee, 1981

Carroll, Raymond, Distinguished Professor
Statistics
PhD, Purdue University, 1974

Carstens, Gordon, Professor
Animal Science
PhD, Colorado State University, 1998

Carter Sowell., Assistant Professor
Psychology
PhD, Purdue University, 2010

Carter, Akilah, Assistant Professor
Health & Kinesiology
PhD, University of Georgia, 2008

Carter, Gerald, Professor
Vet Large Animal Clinical Sc
DVM, Colorado State University, 1979
MS, Utah State University, 1976
MS, Texas A&M University, 1982

Carter, Norvella, Professor
Teaching, Learning & Culture
PhD, Loyola University, 1990

Carter, Tamara, Instructional Assistant Professor
Mathematics
PhD, Texas A&M University, 2005

Casola, Claudio, Assistant Professor
Ecosystem Science & Mgmt
PhD, University of Pisa, Italy, 2006

Cassell, Edith, Clinical Associate Professor
Teaching, Learning & Culture
PhD, Purdue University, 2007

Castaneda-Lopez, Homero, Associate Professor
Materials Science & Eng
PhD, Penn State University, 2001

Castell-Perez, M, Professor
Biological & Agricultural Eng
PhD, Michigan State University, 1990

Castillo, Alejandro, Associate Professor
Animal Science
PhD, Texas A&M University, 1998

Castillo, Jasen, Associate Professor
International Affairs
PhD, University of Chicago, 2003

Castillo, Linda, Professor
Educational Psychology
PhD, University of Utah, 1999

Castor, Nicole, Assistant Professor
Anthropology
PhD, University of Chicago, 2009

Caton, Jerald, Professor
Mechanical Engineering
PhD, Massachusetts Institute of Technology, 1980

Caverlee, James, Associate Professor
Computer Science & Engineering
PhD, Georgia Institute of Technology, 2007

Cavinder, Clay, Associate Professor
Animal Science
PhD, Texas A&M University, 2006

Cerami, Joseph, Senior Lecturer
International Affairs
PhD, Pennsylvania State University, 2007

Cetinkaya, Sila, Professor
Industrial & Systems Eng
PhD, McMaster University, 1996

Chaffin, Morgan, Professor
Vet Large Animal Clinical Sc
DVM, North Carolina State University, 1985
MS, Texas A&M University, 1990

Chai, Jinxia, Associate Professor
Computer Science & Engineering
PhD, Carnegie Mellon University, 2006
Chaki, Sankar, Research Assistant Professor
Veterinary Pathobiology
PHD, National Institute of Health & Family Welfare (Vid, 2005

Chakrabarti, Mrinmoy, Lecturer
Chemistry
PHD, Carnegie Mellon University, 2010

Chakraborty, Suman, Associate Professor
Aerospace Engineering
PHD, University of Michigan, 2004

Chamberland-Tremblay, Jean-Francois, Associate Professor
Electrical & Computer Eng
PHD, University of Illinois, 2004

Chamitoff, Gregory, Professor Of The Practice
Aerospace Engineering
PHD, Massachusetts Institute of Technology, 1992

Chang, Kai, Professor
Electrical & Computer Eng
PHD, University of Michigan, 1976

Chang, Kuang-An, Professor
Civil Engineering
PHD, Cornell University, 1999

Chang, Liang, Visiting Assistant Professor
Mathematics
PHD, University of California, Santa Barbara, 2013

Chang, Ping, Professor
Oceanography
PHD, Princeton University, 1988

Chapkin, Robert, Distinguished Professor
Nutrition & Food Science
PHD, University of California, Davis, 1986

Chapman, Piers, Professor
Oceanography
PHD, University of Wales, UK, 1983

Charlton, William, Professor
Nuclear Engineering
PHD, Texas A&M University, 1999

Charoenphol, Phapanin, Research Assistant Professor
Mechanical Engineering
DEN, University of Michigan, 2012

Chen, Goong, Professor
Mathematics
PHD, University of Wisconsin-Madison, 1977

Chen, Haipeng, Associate Professor
Marketing
PHD, University of Minnesota, 2002

Chen, Hamn, Professor
Civil Engineering
PHD, University of Iowa, 1982

Chen, Jianer, Professor
Computer Science & Engineering
PHD, Columbia University, 1990

Chen, Lei-Shih, Associate Professor
Health & Kinesiology
PHD, Texas A&M University, 2007

Chen, Willa, Professor
Statistics
PHD, New York University, 2000

Chen, Yong, Associate Professor
Finance
PHD, Boston College, 2007

Chen, Zhilei, Assistant Professor
Chemical Engineering
PHD, University of Illinois, 2006

Cheng, Xing, Associate Professor
Electrical & Computer Eng
PHD, University of Michigan, 2005

Cheng, Yi-Shing, Associate Professor
Diagnostic Sciences
DDS, KAOHSIUNG MEDICAL COLLEGE, 1990

Chester, Frederick, Professor
Geology & Geophysics
PHD, Texas A&M University, 1988

Chester, Judith, Professor
Geology & Geophysics
PHD, Texas A&M University, 1992

Chew, Boon, Professor
Nutrition & Food Science
PHD, Purdue University, 1978

Chiaburu, Dan, Associate Professor
Management
PHD, Pennsylvania State University, 2009

Childs, Dara, Professor
Mechanical Engineering
PHD, University of Texas, 1968

Chin, Siu, Professor
Physics And Astronomy
PHD, Massachusetts Institute of Technology, 1975

Chirayath, Sunil, Visiting Assistant Professor
Nuclear Engineering
PHD, University of Madras, 2005

Chiu, Weihsueh, Professor
Vet Integrative Biosciences
PHD, Princeton University, 1998
Chlup, Dominique, Associate Professor
Educ Admn & Human Resource Dev
EdD, Harvard Graduate School of Education, 2004

Cho, Jae, Assistant Professor
Biochemistry And Biophysics
PhD, State University of New York at Stony Brook, 2006

Choe, Yoonsuck, Professor
Computer Science & Engineering
PhD, University of Texas, 2001

Choi, Kunhee, Assistant Professor
Construction Science
PhD, University of California, Berkeley, 2008

Choi, Seong, Associate Professor
Electrical & Computer Eng
PhD, University of Illinois at Urbana-Champaign, 1994

Choobineh, Joobin, Associate Professor
Information & Operations Mgmt
PhD, University of Arizona, 1985

Choudhury, Iftekharudd, Associate Professor
Construction Science
PhD, Texas A&M University, 1994

Chroust, David, Associate Professor
University Libraries
PhD, Texas A&M University, 2009

Chu Yew, Lecturer
Visualization
PHD, Texas A&M University, 2015

Chu, Kung-Hui, Associate Professor
Civil Engineering
PhD, University of California, Berkeley, 1998

Ciccolella, Federica, Professor
International Studies
PhD, Columbia University, 2004

Ciepluch, Michael, Lecturer
Vet Small Animal Clinical Sc
DVM, The Ohio State University, 2013

Cisneros-Zevallos, Lui, Associate Professor
Horticultural Sciences
PhD, University of California, Davis, 1998

Cizmas, Leslie, Assistant Professor
Environmental & Occptnl Hlth
PhD, Texas A&M University, 2003

Cizmas, Paul, Professor
Aerospace Engineering
PhD, Duke University, 1995

Claridge, David, Professor
Mechanical Engineering
PhD, Stanford University, 1976

Clark, Heather, Clinical Assistant Professor
Health & Kinesiology
PHD, Texas A&M University, 2014

Clark, Norman, Senior Lecturer
Eng Tech & Ind Distribution
MBA, Texas A&M University, 1972

Clark, Robert, Lecturer
Teaching, Learning & Culture
PHD, Texas A&M University, 2010

Clark, William, Professor
English
PhD, Louisiana State University, 1973

Clark, William, Professor
Political Science
PhD, Rutgers University, 1994

Clayton, Doug, Adjunct Professor
School of Law
JD, Harvard Law School, 1998

Clayton, Mark, Professor
Architecture
PhD, Stanford University, 1998
MAR, University of California-Los Angeles, 1987

Clayton, Mark, Professor
Architecture
PhD, Stanford University, 1998
MAR, University of California-Los Angeles, 1987

Clearfield, Abraham, Distinguished Professor
Chemistry
PhD, Rutgers University, 1954

Cleece, Jason, Associate Professor & Extension Specialist
Animal Science
PHD, Texas Tech University, 2002

Clemens, Nathan, Assistant Professor
Educational Psychology
PhD, Lehigh University, 2009

Clifford, Patrick, Lecturer
Psychology
PHD, Texas A&M University, 2013

Cline, Daren, Professor
Statistics
PhD, Colorado State University, 1983

Clubb, Fred, Clinical Professor
Veterinary Pathobiology
PhD, University of Alabama, 1983
DVM, Auburn University, 1971

Coates, Craig, Associate Professor
Entomology
PhD, Australian National University, 1996

Cobb, B, Associate Professor
Horticultural Sciences
PHD, University of Florida, 1982
Cohen, Noah, Professor  
Vet Large Animal Clinical Sc  
PhD, John Hopkins University, 1988  
VMD, University of Pennsylvania, 1983  
MPH, Johns Hopkins University, 1986

Cohn, Samuel, Professor  
Sociology  
PhD, University of Michigan, 1981

Cohn, William, Senior Lecturer  
Biology  
PhD, Texas A&M University, 2000

Cole, Bryan, Professor Emeritus  
Educ Admn & Human Resource Dev  
PhD, Texas A&M University, 1975

Collins, Donald, Professor  
Atmospheric Sciences  
PhD, California Institute of Technology, 2000

Collins, Michael, Associate Professor  
English  
PhD, Columbia University, 1999

Collopy, William, Lecturer  
History  
PhD, Texas A&M University, 2011

Comech, Andrew, Associate Professor  
Mathematics  
PhD, Columbia University, 1997

Conlee, Don, Instructional Professor  
Atmospheric Sciences  
PhD, Texas A&M University, 1994

Conner, James, Professor  
Agricultural Economics  
PhD, Texas A&M University, 1970

Conrad, Charles, Professor  
Department Of Communication  
MS, University of Kansas, 1980  
PhD, Kansas University, 1972

Contreras, Celestina, Clinical Professor  
School of Law  
JD, The University of Texas at Austin, 1989

Conway, Daniel, Professor  
Philosophy & Humanities  
PhD, University of California, San Diego, 1985

Conway, Kevin, Assistant Professor  
Wildlife & Fisheries Sciences  
PhD, Saint Louis University, 2010

Cook, Audrey, Associate Professor  
Vet Small Animal Clinical Sc  
DVM, University of Edinburgh, 1989

Cook, David, Adjunct Professor  
School of Law  
JD, Texas Wesleyan University School of Law, 2005

Cook, Krysta, Clinical Associate Professor  
Educational Psychology  
PhD, Texas A&M University, 2009

Cook, Scott, Assistant Professor  
Political Science  
PhD, University of Pittsburgh, 2014

Cook, Walter, Clinical Associate Professor  
Veterinary Pathobiology  
PhD, University of Wyoming, 1999  
DVM, University of California-Davis, 1994

Cooke, Leighton, Professor  
International Studies  
PhD, University of California, Berkeley, 1983

Cooke, Olga, Associate Professor  
International Studies  
PhD, University of London, 1982

Coombs, William, Professor  
Department Of Communication  
PhD, Purdue University, 1990

Cooper, John, Associate Professor Of The Practice  
Landscape Arch & Urban Planning  
PhD, University of North Carolina at Chapel Hill, 2004

Cooper, Rich, Lecturer  
English  
PhD, Louisiana State University, 2011

Coopersmith, Jonathan, Associate Professor  
History  
PhD, University of Oxford, 1985

Core, Brandon, Adjunct Assistant Professor  
Educ Admn & Human Resource Dev  
PhD, Texas A&M University, 2013

Cornwell, Brett, Lecturer  
Management  
MBA, Texas A&M University, 1991

Cortes, Kalena, Associate Professor  
Public Service & Administration  
PhD, University of California, Berkeley, 2002

Cosgriff-Hernandez, Elizabeth, Associate Professor  
Biomedical Engineering  
PhD, Case Western Reserve University, 2005

Cote, Gerard, Professor  
Biomedical Engineering  
PhD, University of Connecticut, 1990

Cote, Murray, Associate Professor  
Health Policy & Management  
PhD, Texas A&M University, 1996
Cothran, Ernest, Clinical Professor
Vet Integrative Biosciences
PhD, University of Oklahoma, 1982

Cothren, J, Professor
Soil and Crop Sciences
PhD, Oklahoma State University, 1971

Coufal, Craig, Associate Professor & Extension Specialist
Poultry Science
PhD, Texas A&M University, 2005

Coulson, Robert, Professor
Entomology
PhD, University of Georgia, 1969

Courtright, Stephen, Assistant Professor
Management
PhD, University of Iowa, 2012

Coverdale, Josie, Associate Professor
Animal Science
PhD, Iowa State University, 2003

Cowell, Robert, Visiting Assistant Professor
Landscape Arch & Urban Planning
MA, University of Tennessee, 1999

Craig, Thomas, Professor
Veterinary Pathobiology
PhD, Texas A&M University, 1975
DVM, Colorado State University, 1961

Cralle, Harry, Associate Professor
Soil and Crop Sciences
PhD, University of Minnesota, 1979

Creasy, Terry, Associate Professor
Materials Science & Eng
PhD, University of Delaware, 1997

Crick, Nathan, Associate Professor
Department Of Communication
PhD, University of Pittsburgh, 2005

Criscione, Charles, Associate Professor
Biology
PhD, Oregon State University, 2005

Criscione, John, Associate Professor
Biomedical Engineering
PhD, John Hopkins University, 2005

Criscitiello, Michael, Associate Professor
Veterinary Pathobiology
PhD, University of Miami, 2003

Crisman, Kevin, Professor
Anthropology
PhD, University of Pennsylvania, 1989

Crompton, John, Distinguished Professor
Recreation, Parks and Tourism Sciences
PhD, Texas A&M University, 1977

Crosby, Kevin, Associate Professor
Horticultural Sciences
PhD, Texas A&M University, 1999

Crouch, Elizabeth, Lecturer
College of Vet Med
PhD, Texas A&M University, 1996

Crouse, Stephen, Professor
Health & Kinesiology
PhD, University of New Mexico, 1984

Cruz-Reyes, Jorge, Associate Professor
Biochemistry And Biophysics
PhD, London School of Hygiene & Tropical Medicine, 1992

Cui, Shuguang, Professor
Electrical & Computer Eng
PhD, Stanford University, 2005

Culp, Charles, Professor
Architecture
PhD, Iowa State University, 1976

Cummings, Kevin, Assistant Professor
Vet Integrative Biosciences
PhD, Cornell University, 2010

Cummings, Scott, Professor & Extension Specialist
Ag Leadership, Educ & Comm
PhD, University of Texas Health Science Center at Houston, 1995

Cunningham, George, Professor
Health & Kinesiology
PhD, Ohio State University, 2002

Curley, Kevin, Instructional Assistant Professor
Vet Integrative Biosciences
PhD, Texas A&M University, 2012
DVM, Cornell University, 1996

Curry, Guy, Professor
Industrial & Systems Eng
PhD, University of Arkansas, 1971

Curry, Richard, Associate Professor
Hispanic Studies
PhD, Arizona State University, 1982

Curry, Tommy, Associate Professor
Philosophy & Humanities
PhD, Southern Illinois University, 2009

Da Silva., Professor
Computer Science & Engineering
PhD, Georgia Institute of Technology, 1997

Dabareiner, Robin, Associate Professor
Vet Large Animal Clinical Sc
DVM, University of Minnesota, 1988
PhD, Virginia/Maryland Regional College of Veterinary Medicine, 1998
MS, Virginia-Polytechnic Institute & State University, 1992

Gardner, Wilford, Professor
Oceanography
PhD, Massachusetts Institute of Technology, 1978

Garmuzo, Mariana, Instructional Assistant Professor
Performance Studies
PhD, University of Texas, 2005

Garritano, Carmela, Associate Professor
College of Liberal Arts
PhD, Michigan State University, 2001

Gaspar, Julian, Clinical Professor
Finance
PhD, Georgetown University, 1981

Gastel, Barbara, Professor
Vet Integrative Biosciences
MD, John Hopkins University, 1978

Gatlin, Delbert, Professor
Wildlife & Fisheries Sciences
PhD, Mississippi State University, 1983

Gatson, Sarah, Associate Professor
Sociology
PhD, Northwestern University, 1999

Gause, Francis, Professor
International Affairs
PhD, Harvard University, 1987

Gautam, Natarajan, Professor
Industrial & Systems Eng
PhD, University of North Carolina at Chapel Hill, 1997

Gay, Vergel, Visiting Lecturer
Construction Science
MAR, Texas A&M University, 1974

Gayhart, Rachel, Instructional Assistant Professor
Health & Kinesiology
PhD, Texas A&M University, 2009

Gaynanova, Irina, Associate Professor
Statistics
PhD, Cornell University, 2015

Gazi, Yakut, Visiting Assistant Professor
Educational Psychology
PhD, Texas A&M University, 2007

Ge, Yufeng, Research Assistant Professor
Biological & Agricultural Eng
PHD, Texas A&M University, 2007

Gehring, Kerri, Associate Professor
Animal Science
PhD, Texas A&M University, 1994

Geismar, Karen, Lecturer
Nutrition & Food Science
MS, Texas Woman's University, Denton, 1998

Geller, Sue, Professor
Mathematics
PhD, Cornell University, 1975
Gelwick, Frances, Associate Professor
Wildlife & Fisheries Sciences
PhD, University of Oklahoma, 1995

Gentry, Terry, Associate Professor
Soil and Crop Sciences
PhD, University of Arizona, 2003

George, James, Professor
School of Law
JD, The University of Tulsa, 1978

George, Theodore, Associate Professor
Philosophy & Humanities
PhD, Villanova University, 2000

Georghiades, Costas, Professor
Electrical & Computer Eng
DSc, Washington University in St. Louis, 1985

Geraci, Lisa, Associate Professor
Psychology
PhD, State University of New York at Stony Brook, 2001

Geva, Anat, Professor
Architecture
PhD, Texas A&M University, 1995

Geva, Nehemia, Associate Professor
Political Science
PhD, Ohio State University, 1977

Gharaibeh, Nasir, Associate Professor
Civil Engineering
PhD, University of Illinois, 1997

Ghosh, Aditi, Lecturer
Mathematics
PhD, Texas A&M University, 2013

Ghosh, Shubha, Adjunct Professor
School of Law
JD, Stanford University, 1994

Giardino, John, Professor
Geology & Geophysics
PhD, University of Nebraska, 1979

Gibbs, Brian, Visiting Lecturer
Construction Science
MAR, Texas A&M University, 2006

Gibbs, Holly, Lecturer
Biomedical Engineering
PHD, Texas A&M University, 2015

Gibson, Richard, Professor
Geology & Geophysics
PhD, Massachusetts Institute of Technology, 1991

Gibson, Tobias, Lecturer
George Bush School of Govern
PhD, Washington University in St. Louis, 2006

Giese, Benjamin, Professor
Oceanography
PhD, University of Washington, 1989

Gildin, Eduardo, Associate Professor
Petroleum Engineering
PhD, University of Texas, 2006

Gill, Clare, Professor
Animal Science
PhD, University of Adelaide, Australia, 2000

Gill, Jason, Assistant Professor
Animal Science
PhD, University of Guelph, 2006

Gilley, James, Professor
Biological & Agricultural Eng
PHD, University of Minnesota, 1971

Giroux, Gary, Professor
Accounting
DBA, Texas Tech University, 1979

Giusti, Cecilia, Associate Professor
Landscape Arch & Urban Planning
PhD, University of Texas, Austin, 2001

Gladysz, John, Distinguished Professor
Chemistry
PhD, Stanford University, 1974

Glasner, Margaret, Associate Professor
Biochemistry And Biophysics
PhD, Massachusetts Institute of Technology, 2003

Glass, Amy, Associate Professor
Economics
PhD, University of Pennsylvania, 1993

Glickman, Gerald, Professor
Endodontics
DDS, Ohio State University, 2014

Glover, Aaron, Instructional Assistant Professor
Performance Studies
MFA, University of Houston, 2010

Glover, Charles, Professor
Chemical Engineering
PhD, Rice University, 1975

Glowacki, Kevin, Associate Professor
Architecture
PhD, Bryn Mawr College, 1991

Goddard, Roger, Professor
Educ Admn & Human Resource Dev
PhD, Ohio State University, 1998
Goddard, Yvonne, Assistant Professor
Educational Psychology
PhD, Ohio State University, 1998

Godwin, Allen, Associate Professor Of The Practice
College of Engineering
PHD, Texas A&M University, 1997

Goebel, Frank, Professor
Anthropology
PhD, University of Alaska Fairbanks, 1993

Goenezen, Sevan, Assistant Professor
Mechanical Engineering
PHD, Rensselaer Polytechnic Institute, 2011

Goetz, Ernest, Professor Emeritus
Educational Psychology
PhD, University of Illinois at Urbana-Champaign, 1977

Gohil, Vishal, Assistant Professor
Biochemistry And Biophysics
PhD, Wayne State University, 2005

Goidel, Robert, Professor
Department Of Communication
PhD, University of Kentucky, 1993

Gold, Roger, Senior Professor
Entomology
PhD, University of California, Berkeley, 1974

Goldberg, Daniel, Assistant Professor
Geography
PhD, University of Southern California, 2010

Golding, Michael, Associate Professor
Vet Physiology & Pharmacology
PhD, Texas A&M University, 2003

Goldman, Michael, Adjunct Professor
School of Law
JD, South Texas College of Law, 1999

Goldsby, Dianne, Clinical Professor
Teaching, Learning & Culture
PhD, University of New Orleans, 1994

Goldsmith, Patrick, Associate Professor
Sociology
PhD, University Of Arizona, 1999

Golla, Michael, Senior Lecturer
Eng Tech & Ind Distribution
MBA, Texas A&M University, 2002

Gombojav, Ariunbold, Research Assistant Professor
Physics and Astronomy
PHD, Texas A&M University, 2011

Gomer, Richard, Professor
Biology
PhD, California Institute of Technology, 1983

Gomes, Carmen, Assistant Professor
Biological & Agricultural Eng
PhD, Texas A&M University, 2010

Gonzalez, Carlos, Professor
Plant Pathology & Microbiology
PhD, University of Nebraska, 1978

Gonzalez, Elsa, Adjunct Assistant Professor
Educ Admn & Human Resource Dev
PHD, Texas A&M University, 2004

Gonzalez, Jorge, Clinical Assistant Professor
Oral & Maxillofacial Surgery
DDS, University of Costa Rica, 1997

Gonzalez, Marianela, Assistant Professor
Oral & Maxillofacial Surgery
DDS, Universidad Central de Venezuela, 1991

Gooch, Bruce, Associate Professor
Computer Science & Engineering
PhD, University of Utah, 2003

Goodey, Joanna, Senior Lecturer
Chemistry
PhD, University of Houston, 2001

Goodine, Bradley, Lecturer
Political Science
PHD, Texas A&M University, 2013

Goodson, Patricia, Professor
Health & Kinesiology
PhD, University of Texas, 1996

Gordon, Sonya, Associate Professor
Vet Small Animal Clinical Sc
DVM, University of Guelph, 1999
DVM, University of Guelph, 1994

Gorman, Dennis, Professor
Epidemiology & Biostatistics
PhD, University of Essex, 1988

Gottlieb, Jessica, Assistant Professor
International Affairs
PhD, Stanford University, 2013

Goulart, Ana, Associate Professor
Eng Tech & Ind Distribution
PhD, Georgia Institute of Technology, 2005

Graf, Kelly, Assistant Professor
Anthropology
PhD, University of Nevada, Reno, 2008

Graham, Cole, Visiting Professor
Public Service & Administration
PhD, University of South Carolina, 1971
Graham, Lori, Clinical Assistant Professor
Teaching, Learning & Culture
PHD, Texas A&M University, 2007

Gramann, James, Professor
Recreation, Parks and Tourism Sciences
PHD, University of Illinois at Urbana-Champaign, 1980

Granados-Dieseldorff, Pablo, Professor
Geology & Geophysics
PHD, Texas A&M University, 2013

Grant, William, Professor
Wildlife & Fisheries Sciences
PhD, Colorado State University, 1974

Grasley, Zachary, Associate Professor
Civil Engineering
PhD, University of Illinois, 2006

Gratz, Paul, Associate Professor
Electrical & Computer Eng
PhD, University of Texas, 2008

Grau, James, Professor
Psychology
PHD, University of Pennsylvania, 1985

Graul, Michael, Lecturer
Industrial & Systems Eng
PHD, Texas A&M University, 1995

Grayton, Jesse, Clinical Assistant Professor
Vet Small Animal Clinical Sc
DVM, Kansas State University, 2009

Green, John, Clinical Professor
Health & Kinesiology
PHD, Texas A&M University, 1996

Green, Lisa, Adjunct Assistant Professor
Health & Kinesiology
PHD, Texas Women's University, 2001

Green, Martha, Lecturer
Teaching, Learning & Culture
PHD, Texas A&M University, 2011

Green, Micah, Associate Professor
Chemical Engineering
PHD, Massachusetts Institute of Technology, 2007

Green, Michael, Professor
School of Law
JD, Loyola University - Chicago, 1992

Green, Thomas, Associate Professor
Anthropology
PhD, University of Texas, 1974

Greenbaum, Ira, Professor
Biology
PHD, Texas Tech University, 1978

Greenwald, Michael, Professor
Performance Studies
PhD, University of California, Santa Barbara, 1981

Greenwood, Lori, Clinical Professor
Health & Kinesiology
PhD, Oregon State University, 1995

Greenwood, Mike, Clinical Professor
Health & Kinesiology
PHD, Texas Woman's University, 1990

Gregory, Sean, Assistant Professor
Health Policy & Management
MS, University of Minnesota, 2012
MBA, The Florida State University, 1999

Grenwelge, Cheryl, Assistant Professor & Extension Specialist
Educational Psychology
PHD, Texas A&M University, 2010

Gresham, Larry, Associate Professor
Marketing
PhD, University of South Carolina, 1982

Griffin, Davey, Professor & Extension Specialist
Animal Science
PhD, Texas A&M University, 1989

Griffin, James, Professor
Public Service & Administration
PHD, University of Pennsylvania, 1971

Griffin, John, Assistant Professor
Vet Large Animal Clinical Sc
DVM, Texas A&M University, 2004

Griffin, Ricky, Distinguished Professor
Management
PHD, University of Houston, 1978

Griffin, Robert, Associate Professor
English
PHD, Yale University, 1985

Griffin, Ronald, Professor
Agricultural Economics
PHD, University of Wisconsin, 1980

Griffin, Sarah, Lecturer
Vet Small Animal Clinical Sc
DVM, Texas A&M University, 2007

Griffing, Lawrence, Associate Professor
Biology
PhD, Stanford University, 1981

Griffith, Jennifer, Assistant Professor
Health Policy & Management
PhD, University of North Carolina at Chapel Hill, 2004

Grigorochuk, Rostislav, Distinguished Professor
Mathematics
PHD, Moscow State University, 1978
MS, Moscow State University, 1975
Grisham, Ray, Lecturer  
Construction Science  
JD, University of Texas at Austin, 1972

Gronberg, Timothy, Professor  
Economics  
PhD, Northwestern University, 1978

Gross, Dennis, Professor  
Plant Pathology & Microbiology  
PhD, University of California, Davis, 1976

Grossman, Ethan, Professor  
Geology & Geophysics  
PhD, University of Southern California, 1982

Grossman, Steven, Associate Professor  
Accounting  
PhD, Tufts University, 1972

Grunlan, Jaime, Professor  
Mechanical Engineering  
PhD, University of Minnesota, 2001

Grunlan, Melissa, Associate Professor  
Biomedical Engineering  
PhD, University of South Carolina, 2004

Gu, Guofei, Associate Professor  
Computer Science & Engineering  
PhD, Georgia Institute of Technology, 2008

Gu, Mengmeng, Assistant Professor & Extension Specialist  
Horticultural Sciences  
PhD, University of Arkansas, 2006

Guerin, Amy, Instructional Assistant Professor  
Performance Studies  
DVM, University of Houston, 2006

Guermond, Jean-Luc, Professor  
Mathematics  
PhD, University of Paris, 1985

Guertner, Gary, Lecturer  
George Bush School of Govern  
PhD, Claremont Graduate School, 1973

Guetersloh, Stephen, Assistant Professor  
Nuclear Engineering  
PhD, Colorado State University, 2003

Guidry, Jeffrey, Associate Professor  
Health & Kinesiology  
PhD, University of Texas Health Science Center at Houston, 1994

Guillemette, Renald, Research Professor  
Geology & Geophysics  
PhD, Stanford University, 1983

Gundy, Anna, Clinical Professor  
Educ Admn & Human Resource Dev  
PHD, Texas A&M University, 1999

Guneralp, Burak, Research Assistant Professor  
Geography  
PhD, University of Illinois at Urbana-Champaign, 2006

Guneralp, Inci, Associate Professor  
Geography  
PhD, University of Illinois at Urbana-Champaign, 2007

Gursky-Doyen, Sharon, Professor  
Anthropology  
PhD, State University of New York at Stony Brook, 1997

Gustafson, Robert, Associate Professor  
Mathematics  
PhD, Yale University, 1979

Gutierrez, Kristina, Lecturer  
English  
PHD, University Of Texas At San Antonio, 2012

Gutierrez-Osuna, Ricardo, Professor  
Computer Science & Engineering  
PhD, North Carolina State University, 1998

Haberl, Jeff, Professor  
Architecture  
PhD, University of Colorado, 1986

Haefeli, Evan, Associate Professor  
History  
PhD, Princeton University, 2000

Hagerty, Veronica, Lecturer  
Bush School of Government and Public Service  
PHD, Antioch University, 2012

Haglund, John, Lecturer  
Mechanical Engineering  
PhD, Texas A&M University, 2003

Hague, Steven, Associate Professor  
Soil and Crop Sciences  
PhD, Texas A&M University, 2000

Hailey, Camille, Senior Lecturer  
Management  
JD, South Texas College of Law, 1993

Haims, Marla, Visiting Associate Professor  
Mechanical Engineering  
PhD, University of Wisconsin - Madison, 1999

Hajash, Andrew, Senior Professor  
Geology & Geophysics  
PhD, Texas A&M University, 1975

Haliburton, James, Lecturer  
Architecture  
MAR, Texas A&M University, 2014

Hall, Charles, Professor  
Horticultural Sciences  
PhD, Mississippi State University, 1988

International Affairs
PhD, Northwestern University, 1995

Hernandez, Sonia, Associate Professor
History
PHD, University of Houston, 2006

Herring, Andy, Professor
Animal Science
PhD, Texas A&M University, 1994

Herrman, Timothy, Professor
Soil and Crop Sciences
PHD, University of Idaho, 1992

Herschbach, Dudley, Distinguished Professor
Physics And Astronomy
PhD, Harvard University, 1958

Heseltine, Johanna, Clinical Assistant Professor
Vet Small Animal Clinical Sc
DVM, University of Saskatchewan, 1998

Hester, Yvette, Instructional Assistant Professor
Mathematics
PHD, Texas A&M University, 2000

Hetland, Robert, Professor
Oceanography
PhD, Florida State University, 1999

Heuman, Joshua, Instructional Assistant Professor
Department Of Communication
PhD, University of Wisconsin-Madison, 2006

Hibbitts, Toby, Lecturer
Wildlife & Fisheries Sciences
PhD, University of the Witwatersrand, 2006

Hicks, Joshua, Associate Professor
Psychology
PhD, University of Missouri, 2009

Hilburn, Amy, Lecturer
Vet Large Animal Clinical Sc
DVM, Texas A&M University, 2006

Hilderbrand, Mary, Senior Lecturer
Public Service & Administration
PhD, Harvard University, 1992
Hill, Alfred, Professor
Petroleum Engineering
PhD, University of Texas, 1978

Hill, Kim, Professor
Political Science
PhD, Rice University, 1974

Hill, Rodney, Professor
Architecture
MAR, University of California, Berkeley, 1969

Hill-Jackson, Valerie, Clinical Professor
Teaching, Learning & Culture
PhD, St. Joseph's University, 2003

Hillhouse, Andrew, Research Assistant Professor
Veterinary Pathobiology
PHD, University of Missouri-Columbia, 2010

Hilty, Christian, Associate Professor
Chemistry
PhD, ETH Zurich, Germany, 2004

Hiney, Jill, Research Assistant Professor
Vet Integrative Biosciences
PHD, Texas A&M University, 1996

Hinojosa, Felipe, Associate Professor
History
PhD, University of Houston, 2009

Hinrichs, Katrin, Professor
Vet Physiology & Pharmacology
PhD, University of Pennsylvania, 1988

Hitt, Michael, Distinguished Professor
Management
PhD, Colorado University, 1974

Hoagwood, Terence, Professor
English
PhD, University of Maryland, 1979

Hodges, Lou, Associate Professor
Recreation, Parks and Tourism Sciences
DVM, Texas A&M University, 1971

Hodgson, Lucia, Assistant Professor
English
PhD, University of Southern California, 2009

Hoekstra, Mark, Associate Professor
Economics
PhD, University of Florida, 2006

Hoffman, Anton, Clinical Professor
Vet Integrative Biosciences
PhD, Texas A&M University, 1992
DVM, Texas A&M University, 1986

Hogan, Harry, Professor
Mechanical Engineering
PhD, Texas A&M University, 1984

Hogler, Joe, Lecturer
Bush School of Government and Public Service
PHD, University of Kent, 2011

Holditch, Stephen, Tees Distinguished Research Professor
Petroleum Engineering
PhD, Texas A&M University, 1976

Holland, Brian, Assistant Professor
College of Nursing
PHD, The University of Texas at Arlington, 2014

Holland, Hubert, Professor
School of Law
JD, American University Washington College of Law, 1998

Hollenbach, Florian, Assistant Professor
Political Science
PHD, Duke University, 2015

Holliday, Shelley, Senior Lecturer
Architecture
MEN, Texas A&M University, 2001

Holman, Patricia, Research Associate Professor
Veterinary Pathobiology
PhD, Texas A&M University, 1994

Holste, James, Professor
Chemical Engineering
PhD, Iowa State University, 1973

Holtzapple, Mark, Professor
Chemical Engineering
PhD, University of Pennsylvania, 1981

Holub, Glenn, Instructional Assistant Professor
Animal Science
PHD, Texas A&M University, 2002

Holzenburg, Andreas, Professor
Biology
PhD, University of Gottingen, 1987

Holzweiss, Robert, Visiting Assistant Professor
History
PHD, Texas A&M University, 2001

Honeyman, Allen, Associate Professor
Biomedical Sciences
PhD, University of Kansas, 1988

Hong, Traci, Associate Professor
Department Of Communication
PhD, University of Southern California, 2002

Hons, Frank, Professor
Soil and Crop Sciences
PhD, Texas A&M University, 1978

Hopf, Frank, Lecturer
Geography
PHD, Texas A&M University, 2011
Hoppes, Sharman, Clinical Associate Professor
Vet Small Animal Clinical Sc
DVM, Oklahoma State University, 1993

Horlen, Joseph, Associate Professor
Construction Science
JD, Baylor University, 1980

Horney, Jennifer, Associate Professor
Epidemiology & Biostatistics
PhD, University of North Carolina at Chapel Hill, 2009

Horrillo, Juan, Assistant Professor
Civil Engineering
PHD, University of Alaska at Fairbanks, 2006

Hou, I-Hong, Assistant Professor
Electrical & Computer Eng
PhD, University of Illinois, 2011

House, Felice, Assistant Professor
Visualization
MFA, University of Texas, Austin, 2011

Houser, Christopher, Associate Professor
Geography
PhD, University of Toronto, 2004

Houston, Mark, Professor
Marketing
PhD, Arizona State University, 1995

Hover, Matthew, Lecturer
Bush School of Government and Public Service
JD, Ohio State University, 2003

Howard, Michael, Assistant Professor
Management
PhD, University of Washington, 2012

Howard, Peter, Professor
Mathematics
PhD, Indiana University, 1998

Howe, Lisa, Professor
Vet Small Animal Clinical Sc
PhD, Texas A&M University, 1993
DVM, Texas A&M University, 1987

Howell, Jessica, Assistant Professor
English
PhD, University of California, Davis, 2008

Hoyos, Sebastian, Associate Professor
Electrical & Computer Eng
PhD, University of Delaware, 2004

Hsieh, Sheng-Jen, Professor
Eng Tech & Ind Distribution
PhD, Texas Tech University, 1995

Hsu, Wen-Hsing, TEES Research Scientist
Nuclear Engineering
PHD, Texas A&M University, 2002

Hu, James, Professor
Biochemistry And Biophysics
PhD, University of Wisconsin-Madison, 1987

Hu, Jiang, Professor
Electrical & Computer Eng
PhD, University of Minnesota, 2001

Hu, Xia, Assistant Professor
Computer Science & Engineering
PHD, Arizona State University, 2015

Hu, Xin Xin, Instructional Assistant Professor
Industrial & Systems Eng
PHD, University of Michigan, 2006

Huang, Chang, Associate Professor
Landscape Arch & Urban Planning
PhD, University of Pennsylvania, 1995

Huang, Garng, Professor
Electrical & Computer Eng
DSc, Washington University in St. Louis, 1980

Huang, Jianhua, Professor
Statistics
PhD, University of California, Berkeley, 1997

Huang, Reyko, Assistant Professor
International Affairs
PhD, Columbia University, 2012

Huang, Shaoming, Assistant Professor
Computer Science & Engineering
PhD, Hong Kong University of Science and Technology, 2012

Huang, Yongheng, Associate Professor
Biological & Agricultural Eng
PhD, University of Nebraska, 2002

Hudson, Angela, Associate Professor
History
PhD, Yale University, 2007

Hudson, David, Instructional Associate Professor
History
PhD, Texas A&M University, 1998

Hudson, Shane, Clinical Associate Professor
Health & Kinesiology
PhD, Texas A&M University, 2007

Hudson, Valerie, Professor
International Affairs
PhD, Ohio State University, 1983

Hueste, Marybeth, Professor
Civil Engineering
PhD, University of Michigan, 1997

Huff, Gregory, Associate Professor
Electrical & Computer Eng
PhD, University of Illinois, 2006
Hughbank, Richard, Lecturer
Bush School of Government and Public Service
PhD, Colorado Technical University, 2013

Hughbanks, Timothy, Professor
Chemistry
PhD, Cornell University, 1983

Hughes, Jan, Professor
Educational Psychology
PhD, University of Texas, Austin, 1976

Hugill, Peter, Professor
Geography
PhD, Syracuse University, 1977

Hull, Rachel, Instructional Associate Professor
Psychology
PhD, Texas A&M University, 2003

Humpal, David, Lecturer
Teaching, Learning & Culture
PhD, Texas A&M University, 2012

Humphrey, Daniel, Associate Professor
College of Liberal Arts
PhD, University of Rochester, 2006

Hung, Nguyen, Associate Professor
Eng Tech & Ind Distribution
PhD, University of California, Berkeley, 1987

Hur, Pilwon, Assistant Professor
Mechanical Engineering
DEN, University of Illinois at Urbana-Champaign, 2010

Hurlebaus, Stefan, Associate Professor
Civil Engineering
DEN, University of Stuttgart, Germany, 2002

Hurley, Joseph, Senior Lecturer
Computer Science & Engineering
PhD, Texas A&M University, 2002

Hurtado Clavijo, Assistant Professor
Wildlife & Fisheries Sciences
PhD, Rutgers, 2002

Hurtado, John, Professor
Aerospace Engineering
PhD, Texas A&M University, 1995

Hutchins, Nancy, Instructional Assistant Professor
Educational Psychology
PhD, Texas A&M University, 2014

Hwang, Haeshin, Professor
Economics
PhD, University of Minnesota, 1976

Hwang, Wonmuk, Associate Professor
Biomedical Engineering
PhD, Boston University, 2001

Hyland, David, Professor
Aerospace Engineering
DSc, Massachusetts Institute of Technology, 1974

Ibrahim, Amir, Professor
Soil and Crop Sciences
PhD, Colorado State University, 1998

Igumenova, Tatyana, Associate Professor
Biochemistry & Biophysics
PhD, Columbia University, 2003

Ikenmeyer, Christian, Visiting Assistant Professor
Mathematics
PhD, Universitat Paderborn, Germany, 2012

Imbrie, Peter, Associate Professor
College of Engineering
PhD, Texas A&M University, 2000

Imhoff, Brian, Associate Professor
Hispanic Studies
PhD, University of Illinois at Urbana-Champaign, 1996

Ing, Nancy, Associate Professor
Animal Science
PhD, University of Florida, 1988

Ioerger, Thomas, Associate Professor
Computer Science & Engineering
PhD, University of Illinois, 1996

Irby, Beverly, Professor
Educ Admn & Human Resource Dev
EdD, University of Mississippi, 1983

Ireland, Robert, Distinguished Professor
Management
PhD, Texas Tech University, 1977

Ishdorj, Ariun, Assistant Professor
Agricultural Economics
PhD, Iowa State University, 2008

Ivanov, Ivan, Clinical Associate Professor
Vet Physiology & Pharmacology
PhD, University of South Florida, 1999

Ives, Maura, Professor
English
PhD, University of Virginia, 1990

Jackson, Shona, Associate Professor
English
PhD, Stanford University, 2005

Jackson, Thomas, Clinical Associate Professor
Finance
PhD, Texas A&M University, 2000

Jacob, John, Professor & Extension Specialist
Recreation, Parks and Tourism Sciences
PhD, Texas A&M University, 1992
Jacobs, Timothy, Associate Professor
Mechanical Engineering
PhD, University of Michigan, 2005

Jain, Sanjay, Professor
Marketing
PhD, University of Arizona, 1995

Jamal, Tazim, Associate Professor
Recreation, Parks and Tourism Sciences
PhD, University of Calgary, 1997

James, Marlon, Assistant Professor
Teaching, Learning & Culture
PhD, Texas A&M University, 2008

James, Ray, Associate Professor
Civil Engineering
PhD, University of Texas, Austin, 1976

Jamieson, Thomas, Executive Professor
Information & Operations Mgmt
PhD, Texas A&M University, 1978

Janakiraman, Ramkumar, Associate Professor
Marketing
PhD, University of Southern California, 2006

Jansen, Dennis, Professor
Economics
PhD, University of North Carolina at Chapel Hill, 1983

Jarvi, Jaakko, Associate Professor
Computer Science & Engineering
PhD, University of Turku, Finland, 2000

Jasek, Mary, Continuing Education Assistant Professor
Educ Admn & Human Resource Dev
PHD, Texas A&M University, 2005

Jasperson, Jon, Clinical Associate Professor
Information & Operations Mgmt
PhD, Florida State University, 1999

Jayaraman, Arul, Professor
Chemical Engineering
PhD, University of California, Irvine, 1998

Jenks, Morgan, Lecturer
Visualization
MFA, Texas A&M University, 2014

Jennings, Daniel, Professor
Eng Tech & Ind Distribution
PhD, Texas A&M University, 1986

Jeong, Hae-Kwon, Associate Professor
Chemical Engineering
PhD, University of Minnesota, 2004

Jepson, Wendy, Associate Professor
Geography
PhD, University of California, Los Angeles, 2003

Jessup, Russell, Assistant Professor
Soil and Crop Sciences
PhD, Texas A&M University, 2005

Jewell, Joseph, Associate Professor
Sociology
PhD, University of California, Los Angeles, 1998

Ji, Jim, Associate Professor
Electrical & Computer Eng
PhD, University of Illinois, 2003

Jiang, Anxiao, Associate Professor
Computer Science & Engineering
PhD, California Institute of Technology, 2004

Jiang, Lin, Lecturer
Chemistry
PHD, Miami University, 2013

Jimenez, Daniel, Professor
Computer Science & Engineering
PhD, University of Texas, Austin, 2002

Jin, Bangti, Adjunct Professor
Mathematics
PHD, Chinese University of Hong Kong, 2008

Jinnai, Ryo, Assistant Professor
Economics
PhD, Princeton University, 2009

Jo, Javier, Associate Professor
Biomedical Engineering
PhD, University of Southern California, 2002

Jo, Young-Ki, Associate Professor & Extension Specialist
Plant Pathology & Microbiology
PhD, Ohio State University, 2005

Joh, Kenneth, Assistant Professor
Landscape Arch & Urban Planning
PhD, University of California, Irvine, 2009

Johansen, Emily, Assistant Professor
English
PHD, McMaster University, 2008

John, Eason, Assistant Professor
Sociology
PhD, University of Chicago, 2008

Johndroe, Mary, Adjunct Professor
School of Law
JD, Baylor Law School, 1986

Johnson, Andrew, Associate Professor
Industrial & Systems Eng
PhD, Georgia Institute of Technology, 2006

Johnson, Charles, Professor
Political Science
PhD, University of Kentucky, 1977

Kaiser, Ronald, Professor
Recreation, Parks and Tourism Sciences
JD, Thomas M. Cooley Law School, 1977

Kakosimos, Konstantinos, Assistant Professor
Chemical Engineering
PHD, Aristotle University, 2009

Kallendorf, Craig, Professor
English
PhD, University of North Carolina at Chapel Hill, 1982

Kallendorf, Hilaire, Professor
Hispanic Studies
PhD, Princeton University, 2000

Kameoka, Jun, Associate Professor
Electrical & Computer Eng
PhD, Cornell University, 2002

Kamon, Teruki, Professor
Physics And Astronomy
PhD, University of Tsukuba, 1986

Kamphoefner, Walter, Professor
History
PhD, University of Missouri, 1978

Kane, Tanya, Visiting Lecturer
Anthropology
PHD, University of Edinburgh, 2012

Kang, David, Assistant Professor
Oral & Maxillofacial Surgery
DDS, Columbia University, 2006

Kang, Ho-Yeong, Associate Professor
Construction Science
PhD, Texas A&M University, 2001

Kanta, Luthansa, Instructional Assistant Professor
Civil Engineering
PHD, Texas A&M University, 2009

Kao, Katy, Associate Professor
Chemical Engineering
PhD, University of California, Los Angeles, 2005

Kaplan, Craig, Associate Professor
Biochemistry And Biophysics
PhD, Harvard University, 2003

Kapler, Geoffrey, Professor
Biochemistry And Biophysics
PhD, Harvard University, 1989

Karaman, Ibrahim, Professor
Materials Science & Eng
PhD, University of Illinois at Urbana-Champaign, 2000

Karasipahi, Sena, Lecturer
Mechanical Engineering
PHD, Universiteit Leiden, 2006

Karbowski, Steve, Clinical Associate Professor
Restorative Sciences
DDS, University of Texas, 1972

Karim, Muhammad, Professor
Chemical Engineering
PhD, University of Manchester, 1977

Karpetis, Adonios, Associate Professor
Aerospace Engineering
PhD, Yale University, 1998

Karsilayan, Aydin, Associate Professor
Electrical & Computer Eng
PhD, Portland State University, 2000

Karhikeyan, Raghupathy, Associate Professor
Biological & Agricultural Eng
PhD, Kansas State University, 2001

Kash, Bita, Associate Professor
Health Policy & Management
PhD, Texas A&M University, 2007
MD, Uniformed Services University of the Health Sciences, 1981

Kattari, Kimberly, Assistant Professor
Performance Studies
PhD, University of Texas, Austin, 2011

Physics and Astronomy
PhD, Texas A&M University, 1964

Katz, Claire, Professor
Philosophy & Humanities
PhD, University of Memphis, 1999

Katzfuss, Matthias, Assistant Professor
Statistics
PhD, Ohio State University, 2011

Katzgraber, Helmut, Professor
Physics And Astronomy
PhD, University of California, Santa Cruz, 2001

Kaunas, Roland, Associate Professor
Biomedical Engineering
PhD, University of California, San Diego, 2003

Kavanagh, Kathleen, Professor
Ecosystem Science & Mgmt
PhD, Oregon State University, 1993

Keating, Peter, Associate Professor
Civil Engineering
PhD, Lehigh University, 1987

Kee, Ernie, Associate Professor Of The Practice
Nuclear Engineering
BS, University of Idaho, 1978

Keeney-Kennicutt, Wendy, Instructional Assistant Professor
Chemistry
PhD, Texas A&M University, 1982
Keiper, Paul, Clinical Associate Professor
Health & Kinesiology
EDD, Texas A&M University, 2002

Keith, Verna, Professor
Sociology
PhD, University of Kentucky, 1982

Kelessidis, Vassilios, Professor
Petroleum Engineering
PHD, University of Houston, 1986

Kellstedt, Paul, Professor
Political Science
PhD, University of Minnesota, 1996

Kelly, Brandy, Assistant Professor
Recreation, Parks and Tourism Sciences
PhD, Texas A&M University, 2013

Kelly, Howard, Instructional Associate Professor
School of Law
JD, Texas Tech University School of Law, 1981

Kelly, Larry, Clinical Professor
Teaching, Learning & Culture
PhD, University of Texas, Austin, 2002

Kemp, Walter, Professor
Biology
PhD, Tulane University of Louisiana, 1969

Kendall, Shari, Associate Professor
English
PhD, Georgetown University, 1999

Kenerley, Charles, Professor
Plant Pathology & Microbiology
PhD, North Carolina State University, 1983

Kepler, Tara, Adjunct Professor
School of Law
JD, Texas Wesleyan University School of Law, 2007

Kerne, Andrew, Associate Professor
Computer Science & Engineering
PhD, New York University, 2001

Kerns, David, Professor
Periodontics
DMD, Medical University of South Carolina, 1981

Kerr, David, Professor
Mathematics
PhD, University of Toronto, 2001

Kerr, Deborah, Associate Professor Of The Practice
Public Service & Administration
PhD, University of Texas, Austin, 1982

Kerth, Christopher, Associate Professor
Animal Science
PhD, Texas Tech University, 1999

Kerwin, Sharon, Professor
Vet Small Animal Clinical Sc
DVM, Texas A&M University, 1988

Kessler, Harvey, Professor
Diagnostic Sciences
DDS, University of Maryland at Baltimore, 1974

Ketzenberg, Michael, Associate Professor
Information & Operations Mgmt
PhD, University of North Carolina at Chapel Hill, 2000

Keyser, John, Professor
Computer Science & Engineering
PhD, University of North Carolina at Chapel Hill, 2000

Kezunovic, Mladen, Professor
Electrical & Computer Eng
PhD, University of Kansas, 1980

Khatri, Sunil, Professor
Electrical & Computer Eng
PhD, University of California, Berkeley, 1999

Kianfar, Kiavash, Associate Professor
Industrial & Systems Eng
PhD, North Carolina State University, 2007

Kier, Ann, Professor
Veterinary Pathobiology
DVM, Texas A&M University, 1974
PhD, University of Missouri - Columbia, 1979

Kiffe, Thomas, Associate Professor
Mathematics
PhD, University of Wisconsin-Madison, 1975

Killough, John, Professor
Petroleum Engineering
PhD, Rice University, 1986

Kim, Eun, Associate Professor
Computer Science & Engineering
PhD, Pennsylvania State University, 2003

Kim, Hoi-Eun, Associate Professor
History
PhD, Harvard University, 2006

Kim, Hwagyun, Assistant Professor
Finance
PhD, University of Chicago, 2003

Kim, Hwan, Visiting Assistant Professor
Landscape Arch & Urban Planning
PHD, Texas A&M University, 2013

Kim, Jihoon, Assistant Professor
Petroleum Engineering
PhD, Stanford University, 2010

Kim, Joung, Instructional Assistant Professor
Mathematics
PHD, State University of New York at Stony Brook, 2012
Kim, Jun, Assistant Professor
Landscape Arch & Urban Planning
PhD, Texas A&M University, 2010

Kim, Moo-hyun, Professor
Civil Engineering
PhD, Massachusetts Institute of Technology, 1988

Kim, Won-Jong, Associate Professor
Mechanical Engineering
PhD, Massachusetts Institute of Technology, 1997

Kim, Yang, Lecturer
Landscape Arch & Urban Planning
MLA, Texas A&M University, 2010

Kim, Yong-Joe, Associate Professor
 Mechanical Engineering
PhD, Purdue University, 2003

Kim, Yong-Jae, Lecturer
Landscape Arch & Urban Planning
PhD, Texas A&M University, 2014

Kincheloe, Faron, Visiting Professor
Statistics
MS, Baylor University, 2011

King, Maria, Tees Research Associate Professor
Mechanical Engineering
PhD, Akademie Der Wissenschaften Der DDR, 1986

King, Michael, Professor
Petroleum Engineering
PhD, Syracuse University, 1980

King-Metters, Kathryn, Executive Professor
Management
PhD, Capella University, 2007

Kingman, Douglas, Instructional Associate Professor
Biological & Agricultural Eng
PhD, Purdue University, 2002

Kinney, Michael, Associate Professor
Accounting
PhD, University of Arizona, 1990

Kinra, Vikram, Professor
Aerospace Engineering
PhD, Brown University, 1975

Kiral, Eren, Visiting Assistant Professor
Mathematics
PHD, Brown University, 2014

Kirkendall, Andrew, Professor
History
PhD, University of North Carolina at Chapel Hill, 1996

Kirkham, Ernest, Instructional Associate Professor
 Health & Kinesiology
PhD, Texas A&M University, 1981

Kiser, James, Adjunct Professor
School of Law
JD, Texas Wesleyan University School of Law, 2009

Kish, Laszlo, Professor
Electrical & Computer Eng
PhD, Uppsala University, Sweden, 1994

Kitajima, Hiroko, Assistant Professor
Geology & Geophysics
PhD, Texas A&M University, 2010

Klappenecker, Andreas, Professor
Computer Science & Engineering
PhD, Universitat Karlsruhe, 1998

Klein, Andrew, Professor
Geography
PhD, Cornell University, 1997

Klein, Nancy, Associate Professor
Architecture
PhD, Bryn Mawr College, 1991

Klein, Patricia, Associate Professor
Horticultural Sciences
PhD, Texas A&M University, 1989

Klemm, William, Senior Professor
Vet Integrative Biosciences
PhD, University of Notre Dame, 1963

Klinefelter, Danny, Professor & Extension Specialist
Agricultural Economics
PhD, University of Illinois at Urbana-Champaign, 1979

Klose, Steven, Professor & Extension Specialist
Agricultural Economics
PhD, Texas A&M University, 2001

Klughart, Kevin, Adjunct Professor
School of Law
JD, Franklin Pierce Law Center, 1999

Klutke, Georgia, Professor
Industrial & Systems Eng
PhD, Virginia Tech, 1986

Kluver, Alan, Associate Professor
Department Of Communication
PhD, University of Southern California, 1993

Knap, Anthony, Professor
Oceanography
PhD, University of Southampton, 1978

Knappett, Peter, Assistant Professor
Geology & Geophysics
PhD, University of Tennessee, 2010

Knight, Robert, Associate Professor
Ecosystem Science & Mgmt
PhD, Texas A&M University, 1980
Knutson, Allen, Professor & Extension Specialist
Entomology
PHD, Texas A&M University, 1987

Ke, Che-Ming, Professor
Physics And Astronomy
PHD, State University of New York at Stony Brook, 1973

Ke, Gladys, Associate Professor
Vet Integrative Biosciences
PHD, Kent State University, 1996

Koch, Michael, Associate Professor
Political Science
PHD, University of California, Davis, 2002

Kocharovsky, Vitaly, Professor
Physics And Astronomy
PHD, Institute of Applied Physics, Russian Academy of Sciences, 1998

Koiwa, Hisashi, Professor
Horticultural Sciences
PHD, Kyoto University, 1996

Kolari, James, Professor
Finance
PHD, Arizona State University, 1980

Kelasinski, Adam, Associate Professor
Finance
PHD, Massachusetts Institute of Technology, 2006

Kolodziej, Elizabeth, Senior Lecturer
Statistics
PHD, Texas A&M University, 2010

Kolomiets, Mikhailo, Professor
Plant Pathology & Microbiology
PHD, Iowa State University, 1998

Konrad, Christoph, Associate Professor
International Studies
PHD, University of North Carolina at Chapel Hill, 1985

Kontogiorgos, Dimitrios, Associate Professor
Restorative Sciences
PHD, Texas A&M University, 2010

Kornegay, Joe, Professor
Vet Integrative Biosciences
PHD, University of Georgia, 1982

Korty, Robert, Associate Professor
Atmospheric Sciences
PHD, Massachusetts Institute of Technology, 2005

Kothmann, Merwyn, Professor
Ecosystem Science & Mgmt
PHD, Texas A&M University, 1968

Koufteros, Beth, Senior Lecturer
Management
PHD, Bowling Green State University, 1992

Koufteros, Xenophon, Associate Professor
Information & Operations Mgmt
PHD, University of Toledo, 1995

Kraemer, Duane, Senior Professor
Vet Physiology & Pharmacology
PHD, Agricultural & Mechanical College (TAMU), 1966
DVM, Texas A&M University, 1966

Krajicek, John, Executive Professor
College of Business
MS, North Texas State University, 1982

Krammer, Arnold, Professor
History
PHD, University of Wisconsin - Madison, 1965

Krasteva, Silvana, Assistant Professor
Economics
PHD, Duke University, 2009

Kravaris, Costas, Professor
Chemical Engineering
PHD, California Institute of Technology, 1984

Krecek, Rosina, Visiting Professor
Veterinary Pathobiology
JD, University of Pretoria, 1985

Kreider, Richard, Professor
Health & Kinesiology
PHD, University of Southern Mississippi, 1987

Kreuter, Urs, Professor
Ecosystem Science & Mgmt
PHD, Utah State University, 1992

Krisiunas, Kevin, Lecturer
Physics And Astronomy
PHD, University of Washington, 2000

Krolkowski, Wieslaw, Professor
Physics and Astronomy
PHD, Institute of Physics, Polish Academy of Sciences, 1988

Kronenberg, Andreas, Professor
Geology & Geophysics
PHD, Brown University, 1983

Kubena, Karen, Professor
Nutrition & Food Science
PHD, Texas A&M University, 1982

Kuchment, Peter, Distinguished Professor
Mathematics
PHD, Kharkov State University, Russia, 1973

Kulatilaka, Waruna, Associate Professor
Mechanical Engineering
DEN, Purdue University, 2006
Kumar, Amit, Lecturer
George Bush School of Govern
PhD, American University, 2006

Kumar, Panganamala, Distinguished Professor
Electrical & Computer Eng
DSc, Washington University in St. Louis, 1977

Kumar, Subodha, Associate Professor
Information & Operations Mgmt
PhD, University of Texas, Dallas, 2001

Kundur, Deepa, Associate Professor
Electrical & Computer Eng
PhD, University of Toronto, 1999

Kunkel, Gary, Associate Professor
Biochemistry And Biophysics
PhD, University of California, Los Angeles, 1977

Kuo, Li-Jen, Associate Professor
Teaching, Learning & Culture
PhD, University of Illinois at Urbana-Champaign, 2006

Kuo, Yue, Professor
Chemical Engineering
PhD, Columbia University, 1980

Kurup, Priya, Clinical Assistant Professor
Educ Admn & Human Resource Dev
PHD, Texas A&M University, 2011

Kurwitz, Richard, Tees Associate Research Engineer
Nuclear Engineering
PhD, Texas A&M University, 2009

Kuttolamadom, Mathew, Assistant Professor
Eng Tech & Ind Distribution
PhD, Clemson University, 2012

Kwok, Oi-Man, Professor
Educational Psychology
PhD, Arizona State University, 2005

Kyle, Gerard, Professor
Recreation, Parks and Tourism Sciences
PhD, Pennsylvania State University, 2001

La Pastina,, Associate Professor
Department Of Communication
PHD, The University of Texas - Austin, 1999

Laane, Jaan, Professor
Chemistry
PhD, Massachusetts Institute of Technology, 1967

Lacey, Ronald, Professor
Biological & Agricultural Eng
PhD, University of Kentucky, 1992

Lacher, Thomas, Professor
Wildlife & Fisheries Sciences
PhD, University of Pittsburgh, 1980

Lackey, Katherine, Adjunct Professor
School of Law
JD, Texas Wesleyan University School of Law, 2005

Lafayette, Carol, Professor
Visualization
MFA, University at Buffalo, State University of New York, 1991

Lafon, Charles, Professor
Geography
PhD, University of Tennessee, 2000

Lagoudas, Dimitris, Professor
Aerospace Engineering
PhD, Lehigh University, 1986

Lahey, Joanna, Associate Professor
Public Service & Administration
PHD, Massachusetts Institute of Technology, 2005

Lahodny, Glenn, Instructional Assistant Professor
Mathematics
PHD, Texas Tech University, 2012

Laird, Carl, Associate Professor
Chemical Engineering
DVM, Carnegie Mellon University, 2006

Lake, Justin, Associate Professor
International Studies
PHD, Harvard University, 2008

Lakkimsetti, Chaitanya, Assistant Professor
Sociology
PHD, University of Wisconsin, 2010

Lalk, Thomas, Associate Professor
Mechanical Engineering
PHD, University of Wisconsin-Madison, 1972

Lamb, William, Associate Professor
Geology & Geophysics
PHD, University of Wisconsin-madison, 1987

Lamby, Philipp, Visiting Assistant Professor
Mathematics
PHD, RWTH Aachen, 2007

Lamoreaux, Jason, Lecturer
Philosophy & Humanities
PHD, Texas Christian University, 2011

Landmark, Leena, Adjunct Assistant Professor
Educational Psychology
PHD, Texas A&M University, 2009

Landry, Karen, Assistant Professor
College of Nursing
PHD, Texas Women's University, 2008

Landsberg, Joseph, Professor
Mathematics
PHD, Duke University, 1990
Lane, Robert, Professor
Petroleum Engineering
PHD, University of Florida, 1971

Lang, Peter, Associate Professor
Architecture
PHD, New York University, 2000

Langari, Gholamreza, Professor
Eng Tech & Ind Distribution
PHD, University of California, Berkeley, 1990

Langford, Candice, Research Assistant Professor
Vet Integrative Biosciences
PHD, Texas A&M University, 2006

Laporte, Catharina, Lecturer
Anthropology
PHD, Texas A&M University, 2013

Lara-Alecio, Rafael, Professor
Educational Psychology
PHD, University of Utah, 1991

Larios, Adam, Visiting Assistant Professor
Mathematics
PHD, University Of California-Irvine, 2011

Larke, Alvin, Professor
Ag Leadership, Educ & Comm
PHD, University of Missouri - Columbia, 1982

Larke, Patricia, Professor
Teaching, Learning & Culture
EdD, University of Missouri, 1984

Larson, David, Professor
Mathematics
PHD, University of California, Berkeley, 1976

Larson, Ruth, Associate Professor
International Studies
PHD, Yale University, 1991

Lasala, Phillip, Lecturer
Bush School of Government and Public Service
PHD, University of Nebraska - Lincoln, 2003

Lassila, Dennis, Professor
Accounting
PHD, University of Minnesota, 1981

Lau, Sai, Professor
Mechanical Engineering
PHD, University of Minnesota, 1980

Laub, James, Clinical Assistant Professor
Teaching, Learning & Culture
PHD, Texas A&M University, 2012

Lavy, Sarel, Associate Professor
Construction Science
PHD, Technion - Israel Institute of Technology, 2006

Lawhon, Sara, Associate Professor
Veterinary Pathobiology
PHD, North Carolina State University, 2003

Lawing, Anna, Assistant Professor
Ecosystem Science & Mgmt
PHD, Indiana University, 2012

Lawler, John, Professor
Health & Kinesiology
PHD, University of Florida, 1991

Lawley, Mark, Professor
Industrial & Systems Eng
PHD, University of Illinois at Urbana-Champaign, 1995

Lawo-Sukam, Alain, Associate Professor
Hispanic Studies
PHD, University of Illinois at Urbana-Champaign, 2005

Lawrence, Addison, Professor
Wildlife & Fisheries Sciences
PHD, University of Missouri, 1962

Lawrence, Frederick, Professor
Eng Tech & Ind Distribution
PHD, Texas A&M University, 1999

Laya Pereira, Research Assistant Professor
Geology & Geophysics
PHD, Durham University (UK), 2012

Lazarov, Raytcho, Professor
Mathematics
PHD, University of Moscow, Russia, 1972

Le Graverend, Assistant Professor
Aerospace Engineering
PHD, Ecole National Supérieure de Mécanique et d'Aérote, 2013

Leatham, David, Professor
Agricultural Economics
PHD, Purdue University, 1983

Leb, Cheryl, Adjunct Professor
School of Law
JD, SOUTHERN METHODIST UNIVERSITY, 1998

Lechuga, Vicente, Associate Professor
Educ Admn & Human Resource Dev
EdD, University of Southern California, 2005

Lee, Chanam, Professor
Landscape Arch & Urban Planning
PHD, University of Washington, 2004

Lee, David, Distinguished Professor
Physics And Astronomy
PHD, Yale University, 1959

Lee, Hyunyoung, Senior Lecturer
Computer Science & Engineering
PHD, Texas A&M University, 2001
Lee, Jason, Associate Professor  
Poultry Science  
PhD, Texas A&M University, 2006

Lee, Kyung, Lecturer  
Recreation, Parks and Tourism Sciences  
PhD, Texas A&M University, 2013

Lee, Sang, Visiting Assistant Professor  
Mathematics  
PhD, University of Oklahoma, 2012

Lee, Sungyon, Assistant Professor  
Mechanical Engineering  
PhD, Massachusetts Institute of Technology, 2010

Lee, William, Professor  
Petroleum Engineering  
PhD, Georgia Institute of Technology, 1963

Leggette, Holli, Assistant Professor  
Ag Leadership, Educ & Comm  
PhD, Texas A&M University, 2013

Lekven, Arne, Associate Professor  
Biology  
PhD, University of California, Los Angeles, 1996

Lemke, Michael, Clinical Assistant Professor  
Health & Kinesiology  
PhD, Wichita State University, 2013

Lemmon, Mark, Associate Professor  
Atmospheric Sciences  
PhD, University of Arizona, 1994

Lemmons, Kelly, Lecturer  
Geography  
PhD, Texas A&M University, 2013

Lench, Heather, Associate Professor  
Psychology  
PhD, University of California, Irvine, 2007

Lenihan, John, Associate Professor  
History  
PhD, University of Maryland, 1976

Lenox, Mark, Professor  
Nuclear Engineering  
PhD, University of Tennessee, 2009

Leon, Victor, Professor  
Eng Tech & Ind Distribution  
PhD, Lehigh University, 1991

Leonard, Matthew, Lecturer  
Eng Tech & Ind Distribution  
BS, Texas A&M University, 1987

Lester, Richard, Clinical Professor  
Management  
PhD, Texas A&M University, 2003

Leones, Arnold, Professor  
Psychology  
EdD, North Texas State University, 1969

Levine, Gwendolyn, Clinical Assistant Professor  
Veterinary Pathobiology  
DVM, Texas A&M University, 2006

Lewis, Chance, Associate Professor  
Teaching, Learning & Culture  
PhD, Colorado State University, 2001

Lewis, Jennifer, Lecturer  
Mathematics  
PhD, Ohio State University, 1980

Leyk, Teresa, Senior Lecturer  
Computer Science & Engineering  
PhD, Australian National University, 1998

Li, Jianrong, Associate Professor  
Vet Integrative Biosciences  
PhD, University of Hawaii, 1997

Li, Lin, Lecturer  
Information & Operations Mgmt  
PhD, Columbia University, 2006

Li, Ming-Han, Professor  
Landscape Arch & Urban Planning  
PhD, Texas A&M University, 2002

Li, Peng, Professor  
Electrical & Computer Eng  
PhD, Carnegie Mellon University, 2003

Li, Qi, Professor  
Economics  
PhD, Texas A&M University, 1991

Li, Qinglei, Assistant Professor  
Vet Integrative Biosciences  
PhD, Harbin Medical University, 2001

Li, Quan, Professor  
Political Science  
PhD, Florida State University, 1998

Li, Ying, Professor  
Teaching, Learning & Culture  
PhD, University of Pittsburgh, 1999

Li, Ying, Clinical Assistant Professor  
Information & Operations Mgmt  
PhD, University of Michigan, 2005

Li, Ying, Associate Professor  
Mechanical Engineering  
EdD, University of Florida, 2007

Liang, Faming, Professor  
Statistics  
PhD, The Chinese University of Hong Kong, 1997
Liang, Hong, Professor
Mechanical Engineering
PhD, Stevens Institute of Technology, 1992

Liang, Hwa, Senior Lecturer
Statistics
PHD, University of New Mexico, 2003

Liang, Jenn, Professor
Petroleum Engineering
PhD, University of Texas, Austin, 1988

Lidbury, Jonathan, Assistant Professor
Vet Small Animal Clinical Sc
DVM, University of Glasgow, 2002

Lieuwen, Peter, Professor
Performance Studies
PhD, University of California, Santa Barbara, 1984

Liew, Jeffrey, Professor
Educational Psychology
PhD, Arizona State University, 2005

Light, Jessica, Associate Professor
Wildlife & Fisheries Sciences
PhD, Louisiana State University, 2005

Lightfoot, John, Professor
Health & Kinesiology
PhD, University of Tennessee, 1986

Lillibridge, Robin, Professor
Epidemiology & Biostatistics
MD, Uniformed Services of the Health Sciences, 1981

Lim, Soon, Lecturer
Chemistry
PHD, Texas A&M University, 2006

Lima-Filho, Paulo, Professor
Mathematics
PhD, State University of New York at Stony Brook, 1989

Lin, Jiajing, Lecturer
Petroleum Engineering
PHD, Texas A&M University, 2011

Lin, Xiaorong, Associate Professor
Biology
PhD, University of Georgia, 2003

Lincoln, Yvonna, Distinguished Professor
Educ Admn & Human Resource Dev
EdD, Indiana University, 1977

Lindahl, Paul, Professor
Chemistry
PhD, Massachusetts Institute of Technology, 1985

Lindell, Michael, Professor
Landscape Arch & Urban Planning
PhD, University of Colorado, 1975

Lindner, James, Professor
Ag Leadership, Educ & Comm
PhD, Ohio State University, 2000

Lindo, Jason, Associate Professor
Economics
PhD, University of California, Davis, 2009

Lineberger, R, Professor
Horticultural Sciences
PhD, Cornell University, 1978

Linn, Brian, Professor
History
PhD, Ohio State University, 1985

Linneman, Judith, Instructional Assistant Professor
Sociology
PhD, Iowa State University, 1985

Lints, Robyn, Associate Professor
Biology
PhD, University of Melbourne, Australia, 1993

Lints, Thierry, Assistant Professor
Biology
PhD, The University of Melbourne, Australia, 1994

Little, Charles, Lecturer
George Bush School of Govern
PhD, University of North Texas, 1985

Little, Dallas, Professor
Civil Engineering
PhD, Texas A&M University, 1979

Litzenberg, Kerry, Professor
Agricultural Economics
PhD, Purdue University, 1979

Liu, Dongxiao, Assistant Professor
Sociology
PhD, Harvard University, 2007

Liu, Jyh, Professor
Computer Science & Engineering
PhD, University of Michigan, 1989

Liu, Li, Research Assistant Professor
Materials Science & Eng
PhD, Northwestern University, 2005

Liu, Rui, Visiting Assistant Professor
Mathematics
PHD, Nankai University, 2009

Liu, Tie, Associate Professor
Electrical & Computer Eng
PhD, University of Illinois, 2006

Liu, Wenshe, Associate Professor
Chemistry
PhD, University of California, Davis, 2005
Liu, Xinsheng, Lecturer
Bush School of Government and Public Service
PhD, Texas A&M University, 1999

Liu, Yan, Assistant Professor
Marketing
PhD, Purdue University, 2010

Livesay, Harold, Professor
History
PhD, John Hopkins University, 1970

Lockett, Landry, Senior Lecturer
Ag Leadership, Educ & Comm
EDD, Texas A&M University, 2007

Lockless, Steve, Assistant Professor
Biology
PhD, University of Texas, Dallas, 2002

Loeppert, Richard, Professor
Soil and Crop Sciences
PhD, University of Florida, 1976

Logan, Linda, Professor
Veterinary Pathobiology
PhD, University of California, Davis, 1987
DVM, Texas A&M University, 1976

Logan, Timothy, Lecturer
Meteorology
PHD, University of North Dakota, 2014

Loguinov, Dmitri, Professor
Computer Science & Engineering
PhD, City University of New York, 2002

Loh, Koushen, Senior Professor
Ecosystem Science & Mgmt
PhD, Texas A&M University, 1984

Lombard, Frederick, Visiting Professor
Statistics
PHD, University of Johannesburg, 1975

Lombardini, Leonardo, Professor
Horticultural Sciences
PhD, Michigan State University, 1999

Long, Charles, Associate Professor
Vet Physiology & Pharmacology
PhD, University of Massachusetts, 1996

Long, James, Assistant Professor
Statistics
PhD, University of California, Berkeley, 2013

Longnecker, Michael, Professor
Statistics
PhD, Florida State University, 1976

Loopstra, Carol, Associate Professor
Ecosystem Science & Mgmt
PhD, North Carolina State University, 1992

Lopez, Roel, Professor
Wildlife & Fisheries Sciences
PhD, Texas A&M University, 2001

Lord, Dominique, Associate Professor
Civil Engineering
PhD, University of Toronto, 2000

Lorenzo, Roger, Lecturer
Eng Tech & Ind Distribution
MS, University of Kansas, 1972

Lorja Lepiz, Clinical Assistant Professor
Vet Small Animal Clinical Sc
DVM, Universidad Nacional of Costa Rica, 2000

Louder, Martha, Professor
Accounting
PhD, Arizona State University, 1990

Love, Charles, Associate Professor
Vet Large Animal Clinical Sc
PhD, University of Pennsylvania, 1995
DVM, University of Missouri-Columbia, 1984

Love, Harold, Professor Emeritus
Agricultural Economics
PhD, University of California, Berkeley, 1998

Loving, Cathleen, Associate Professor
Teaching, Learning & Culture
PhD, University of Texas, 1990

Loving, Jerome, Distinguished Professor
English
PhD, Duke University, 1973

Lozano, Bethany, Lecturer
Sociology
PHD, Texas A&M University, 2010

Lozovskiy, Alexander, Visiting Assistant Professor
Mathematics
PHD, University of Pittsburgh, 2010

Lu, Mi, Professor
Electrical & Computer Eng
PhD, Rice University, 1987

Lu, Zhipeng, Lecturer
Architecture
PhD, Texas A&M University, 2009

Lucas, Gary, Professor
School of Law
JD, Tulane University, 2004

Lucchesi, Robert, Professor
Chemistry
PhD, California Institute of Technology, 1982

Luco Echeverria, Assistant Professor
Economics
PHD, Northwestern University, 2014

McDaniel, Louis, Lecturer
Eng Tech & Ind Distribution
PhD, Oklahoma State University, 1970

McDeavitt, Sean, Associate Professor
Nuclear Engineering
PhD, Purdue University, 1992

McDermott, John, Distinguished Professor
Philosophy & Humanities
PhD, Fordham University, 1959

McDonald, Alyson, Assistant Professor & Extension Specialist
Ecosystem Science & Mgmt
PHD, Texas A&M University, 2010

McDonald, Thomas, Professor
Environmental & Occpntl Hlth
PhD, Texas A&M University, 1988

McDougall, Mary, Associate Professor
Biomedical Engineering
PhD, Texas A&M University, 2004

McElroy, Audrey, Professor & Extension Specialist
Poultry Science
PhD, Texas A&M University, 1998

McFarland, Jacob, Visiting Assistant Professor
Mechanical Engineering
PhD, University of Minnesota, 2013

McFarland, Mark, Professor & Extension Specialist
Soil and Crop Sciences
PHD, Texas A&M University, 1988

McGowan, Annie, Associate Professor
Accounting
PhD, University of North Texas, 1994

McGrath, James, Professor
School of Law
JD, Howard University, 1997

McGuire, Richard, Lecturer
Mechanical Engineering
MA, Texas A&M University, 1996

McGuire, Sean, Associate Professor
Accounting
PhD, University of Georgia, 2008

McInnes, Kevin, Professor
Soil and Crop Sciences
PhD, Kansas State University, 1985

McInnis, Verity, Lecturer
History
PHD, Texas A&M University, 2012

McIntosh, William, Professor
Sociology
PhD, Iowa State University, 1975

McIntyre, David, Lecturer
Public Service & Administration
PhD, University of Maryland - College Park, 1999

McIntyre, Peter, Professor
Physics And Astronomy
PhD, University of Chicago, 1973

McKenzie, Kathryn, Associate Professor
Educ Admn & Human Resource Dev
PhD, University of Texas, 2001

McKim, Billy, Assistant Professor
Ag Leadership, Educ & Comm
PhD, Texas A&M University, 2010

McKnight, Thomas, Professor
Biology
PhD, University of Georgia, 1983

McLaughlin, Timothy, Associate Professor
Visualization
MS, Texas A&M University, 1994

McLeroy, Priscilla, Professor Of The Practice
Petroleum Engineering
MEN, Stanford University, 1986

McMahan, Uel, Professor
Biology
PhD, University of Tennessee, 1964

McMyler, Benjamin, Associate Professor
Philosophy & Humanities
PhD, University of Chicago, 2008

McNamara, Ann, Associate Professor
Visualization
PhD, University of Bristol, UK, 2000

McNeill, Elisa, Clinical Associate Professor
Health & Kinesiology
PHD, Texas A&M University, 2010

McPherson, Rebecca, Adjunct Assistant Professor
Educ Admn & Human Resource Dev
PHD, Texas A&M University, 2012
McShane, Michael, Professor
Biomedical Engineering
PhD, Texas A&M University, 1999

McTigue, Erin, Associate Professor
Teaching, Learning & Culture
PhD, University of Virginia, 2006

McVay, Duane, Professor
Petroleum Engineering
PhD, Texas A&M University, 1994

McVay, Matilda, Senior Lecturer
Mechanical Engineering
PhD, Texas A&M University, 1996

McWhirter, David, Associate Professor
English
PhD, University of Virginia, 1984

McWhorter, Alton, Professor
Pedicratic Dentistry
DDS, University of Tennessee Medical Units, 1979

Meagher, Mary, Professor
Psychology
PhD, University of North Carolina at Chapel Hill, 1989

Medina Cetina, Associate Professor
Civil Engineering
PhD, Johns Hopkins University, 2007

Medina, Raul, Associate Professor
Entomology
PhD, University of Maryland, 2005

Meek, Thomas, Professor
Biochemistry And Biophysics
PhD, Pennsylvania State University, 1981

Meer, Jonathan, Associate Professor
Economics
PhD, Stanford University, 2009

Mehta, Ranjana, Assistant Professor
Environmental & Occupational Health
PhD, Virginia Tech, 2011

Meier, Kenneth, Distinguished Professor
Political Science
PhD, Syracuse University, 1975

Meigs, Randyl, Adjunct Professor
School of Law
DJ, The University of Texas School of Law, 1985

Meissner, Kenith, Tees Research Professor
Biomedical Engineering
PhD, University of Arizona, 1994

Melchor, Nyria, Adjunct Professor
School of Law
JD, Harvard University, 1992

Melconian, Daniel, Associate Professor
Physics And Astronomy
PhD, Simon Fraser University, 2006

Melzow, Candice, Lecturer
English
PhD, Texas A&M University, 2012

Mendoza Diaz, Instructional Assistant Professor
Educ Admn & Human Resource Dev
EDD, Texas A&M University, 2006

Menet, Jerome, Assistant Professor
Biology
PhD, LOUIS PASTEUR UNIVERSITY, 2003

Mentzer, Ray, Senior Lecturer
Chemical Engineering
PhD, Purdue University, 1980

Menzel, Christopher, Professor
Philosophy & Humanities
PhD, University of Notre Dame, 1984

Merchant, Michael, Professor & Extension Specialist
Entomology
PhD, Texas A&M University, 1989

Mercieca, Jennifer, Associate Professor
Department Of Communication
PhD, University of Illinois at Urbana-Champaign, 2003

Mercier, Richard, Professor
Civil Engineering
PhD, Massachusetts Institute of Technology, 1985

Merlin, Christine, Assistant Professor
Biology
PhD, University Pierre and Marie Curie, 2006

Mestrovic, Stjepan, Professor
Sociology
PhD, Syracuse University, 1982

Metters, Richard, Professor
Information & Operations Mgmt
PhD, University of North Carolina at Chapel Hill, 1993

Metz, Bradley, Assistant Lecturer
Entomology
PhD, Texas A&M University, 2009

Meyer, Jack, Visiting Professor
Economics
PhD, Stanford University, 1976

Michalski, Krzysztof, Associate Professor
Electrical & Computer Eng
PhD, University of Kentucky, 1981

Mickelson, Kimberley, Visiting Associate Professor
Landscape Arch & Urban Planning
JD, University of Texas School of Law, 1986
Miles, Bryant, Senior Lecturer  
Biochemistry And Biophysics  
PHD, Texas A&M University, 1998

Miller, David, Lecturer  
International Affairs  
MA, Monterey Institute of Intl. Studies, 2004

Miller, Andrew, Adjunct Assistant Professor  
Educational Psychology  
PHD, Texas A&M University, 2005

Miller, Brent, Associate Professor  
Geology & Geophysics  
PhD, Dalhousie University, 1997

Miller, Gretchen, Assistant Professor  
Civil Engineering  
PhD, University of California, Berkeley, 2009

Miller, Jeremy, Lecturer  
Department Of Communication  
PHD, Texas A&M University, 2012

Miller, Julian, Visiting Professor  
Horticultural Sciences  
PHD, Michigan State University, 1972

Miller, Matthew, Senior Professor  
Vet Small Animal Clinical Sc  
DVM, Ohio State University, 1984

Miller, Paula, Clinical Professor  
Health & Kinesiology  
PHD, Texas A&M University, 1993

Miller, Rhonda, Professor  
Animal Science  
PhD, Colorado State University, 1983

Miller, Scott, Professor  
Electrical & Computer Eng  
PHD, University of California, San Diego, 1988

Miller, Stephen, Professor  
Hispanic Studies  
PHD, University of Chicago, 1976

Milstein, Slocane, Clinical Assistant Professor  
Health & Kinesiology  
EDD, Southern Connecticut State University, 2013

Miner-Rubino, Kathi, Assistant Professor  
Psychology  
PHD, University of Michigan, 2004

Mioduszewski, Saskia, Associate Professor  
Physics And Astronomy  
PHD, University of Tennessee, 1999

Mirabolfathi, Nader, Research Associate Professor  
Physics And Astronomy  
PHD, University of Paris, 2002  
MS, Shahid Beheshti University, Iran, 1997

Miranda, Rajesh, Professor  
Biochemistry And Biophysics  
PHD, University of Rochester, 1989

Miranda, Valerian, Associate Professor  
Architecture  
PhD, Texas A&M University, 1988

Mishra, Aashwin, Lecturer  
Aerospace Engineering  
PHD, Texas A&M University, 2014

Mitchell, J, Professor  
English  
PHD, The University of Iowa, 1971

Mize, Britt, Associate Professor  
English  
PHD, University of North Carolina at Chapel Hill, 2003

Mjelde, James, Professor  
Agricultural Economics  
PhD, University of Illinois at Urbana-Champaign, 1985

Moible, Benedict, Assistant Professor  
Aerospace Engineering  
PHD, University of Maryland, 2010

Mogilevsky, Mila, Instructional Assistant Professor  
Mathematics  
PHD, Rostov State University USSR, 1976

Mohanty, Binayak, Professor  
Biological & Agricultural Eng  
PhD, Iowa State University, 1992

Mohtarr, Rabi, Professor  
Biological & Agricultural Eng  
PHD, Michigan State University, 1994

Molina, Angel, Graduate Assistant Teaching  
Political Science  
BS, The University of Texas - El Paso, 2007

Monroe, James, Lecturer  
Mechanical Engineering  
PHD, Texas A&M University, 2013

Montague, Marcia, Adjunct Assistant Professor  
Educational Psychology  
PHD, Texas A&M University, 2009

Moore, Georgianne, Associate Professor  
Ecosystem Science & Mgmt  
PhD, Oregon State University, 2004

Moore, Kevin, Executive Professor  
Finance  
MBA, The Wharton School, 1994

Moore, Lori, Associate Professor  
Ag Leadership, Educ & Comm  
PhD, University of Florida, 2003

PHD, Duke University, 2014

Onica, Constantin, Instructional Assistant Professor
Mathematics
PHD, Texas A&M University, 2005

Ono, Hiroshi, Associate Professor
Sociology
PhD, University of Chicago, 1999

Orsi, Alejandro, Professor
Oceanography
PhD, Texas A&M University, 1993

Ortega, Luis, Tees Assistant Research Engineer
Nuclear Engineering
PHD, Texas A&M University, 2009

Ortega-Aguilar, Dionisio, Instructional Assistant Professor
Hispanic Studies
PHD, Stanford University, 1986

Orville, Richard, Research Professor
Atmospheric Sciences
PhD, University Arizona, 1966

Osburn, Wesley, Associate Professor
Animal Science
PhD, University of Nebraska, 1996

Ostrovskaya, Natela, Senior Lecturer
Nuclear Engineering
PHD, Texas A&M University, 2005

Oswald, John, Professor
Entomology
PhD, Cornell University, 1991

Outlaw, Joe, Professor & Extension Specialist
Agricultural Economics
PhD, Texas A&M University, 1992

Outley, Corliss, Associate Professor
Recreation, Parks and Tourism Sciences
PHD, Texas A&M University, 2000

Owen, Erica, Assistant Professor
Political Science
PhD, University of Minnesota, 2010

Ozerov, Oleg, Professor
Chemistry
PhD, University of Kentucky, 2000

Ozkan, Tanil, Visiting Assistant Professor
Mechanical Engineering
DEN, University of Illinois Urbana Champaign, 2014

Ozmetin, Ali, Research Assistant Professor
Materials Science & Eng
PHD, Texas A&M University, 2009

Paarlberg, Laurie, Associate Professor
Public Service & Administration
PhD, Indiana University, 2003

Pacek, Alexander, Professor
Political Science
PhD, University of Illinois at Urbana-Champaign, 1991

Packard, Jane, Associate Professor
Wildlife & Fisheries Sciences
PhD, University of Minnesota, 1980

Packard, Mark, Professor
Psychology
PhD, McGill University, 1991

Padron, Yolanda, Professor
Educational Psychology
EdD, University of Houston, 1985

Paetzold, Ramona, Professor
Management
JD, University of Nebraska, 1990
PhD, Indiana University, 1979

Page, Robin, Clinical Assistant Professor
College of Nursing
PHD, University of Texas at Austin, 2006

Pakhotina, Nataliya, Lecturer
Economics
PHD, University of Florida, 2010

Palacios, Jose, Assistant Lecturer
Hispanic Studies
MFA, University of Texas at El Paso, 2009

Palazzolo, Alan, Professor
Mechanical Engineering
PhD, University of Virginia, 1981

Palermo, Samuel, Associate Professor
Electrical & Computer Eng
PhD, Stanford University, 2007

Palma, Marco, Associate Professor & Extension Specialist
Agricultural Economics
PhD, University of Florida, 2005

Palmer, Clare, Professor
Philosophy & Humanities
PhD, University of Oxford, 1993
Pals, Heili, Assistant Professor
Sociology
PhD, Stanford University, 2006

Panetta, Richard, Professor
Atmospheric Sciences
PhD, University of Wisconsin, 1978

Panin, Vladislav, Professor
Biochemistry And Biophysics
PhD, Moscow State University, 1990

Panina, Daria, Clinical Associate Professor
Management
PhD, Rutgers University, 2002

Pantano, John, Research Professor
Geology & Geophysics
PhD, University of South Carolina, 1988

Paouris, Grigorios, Professor
Mathematics
PhD, University of Crete, 2004

Papanikolas, Matthew, Professor
Mathematics
PhD, Brown University, 1998

Papovich, Casey, Associate Professor
Physics And Astronomy
PhD, John Hopkins University, 2002

Pappas, Gregory, Professor
Philosophy & Humanities
PhD, University of Texas, Austin, 1990

Pappu, Madhav, Clinical Assistant Professor
Information & Operations Mgmt
PhD, University of Tennessee, 1999

Parish, Janet, Clinical Professor
Marketing
PhD, University of Alabama, 2002

Park, John, Professor & Extension Specialist
Agricultural Economics
PhD, Texas A&M University, 1996

Park, Philip, Assistant Professor
Civil Engineering
PhD, University of Michigan, 2012

Park, William, Professor
Biochemistry And Biophysics
PhD, University of Florida, 1977

Parke, Frederic, Professor
Visualization
PhD, University of Utah, 1974

Parker, Dawn, Clinical Professor
Teaching, Learning & Culture
PhD, Texas A&M University, 1997
Pearlstein, Gregory, Associate Professor
Mathematics
PhD, University of Massachusetts, 1999

Pearlstein, Rosanna, Lecturer
Mathematics
PhD, University of Massachusetts Amherst, 1998

Peck-Parrott, Kelli, Clinical Professor
Educ Adm & Human Resource Dev
PhD, Bowling Green State University, 2000

Peddicord, Kenneth, Professor
Nuclear Engineering
PhD, University of Illinois, 1972

Pedersen, Susan, Associate Professor
Educational Psychology
PhD, University of Texas, Austin, 2000

Pedraza, Francisco, Assistant Professor
Political Science
PhD, University of Washington, 2010

Pellois, Jean-Philippe, Associate Professor
Biochemistry And Biophysics
PhD, University of Houston, 2002

Penrose, Mary, Professor
School of Law
JD, Pepperdine University School of Law, 1993

Penson, John, Professor
Agricultural Economics
PhD, University of Illinois at Urbana-Champaign, 1973

Pepper, Alan, Associate Professor
Biology
PhD, University of California, Davis, 1990

Perez Nunez., Tees Associate Research Scientist
Nuclear Engineering
PhD, Texas A&M University, 2008

Perez, Stephanie, Lecturer
Biochemistry And Biophysics
PhD, Texas A&M University, 2012

Perez-Patron, Maria, Assistant Research Scientist
Sociology
PhD, Johns Hopkins University, Bloomberg School of Publ, 2012

Perrott, Lisa, Associate Professor
Educational Psychology
PhD, University of Virginia, 2001

Perry, Nandra, Associate Professor
English
PhD, University of North Carolina at Chapel Hill, 2003

Peters, Regina, Lecturer
English Language Institute
MFA, Purdue University, West Lafayette, IN, 2005

Petersen, Eric, Professor
Mechanical Engineering
PhD, Stanford University, 1998

Peterson, David, Professor
Biochemistry And Biophysics
PhD, Harvard University, 1978

Peterson, John, Lecturer
Finance
PhD, Texas A&M University, 2002

Peterson, Markus, Professor
Wildlife & Fisheries Sciences
PhD, Texas A&M University, 1994

Peterson, Tarla, Professor
Wildlife & Fisheries Sciences
PhD, Washington State University, 1986

Petrick, James, Professor
Recreation, Parks and Tourism Sciences
PhD, Clemson University, 1999

Petrova, Guergana, Professor
Mathematics
PhD, University of South Carolina, 1999

Pettersson, Martin, Professor
Philosophy & Humanities
PHD, KTH Royal Institute of Technology, 2003

Peycke, Laura, Clinical Associate Professor
Vet Small Animal Clinical Sc
DVM, Louisiana State University, 1998

Pfister, Henry, Associate Professor
Electrical & Computer Eng
PhD, University of California, San Diego, 2003

Pham, Le Huyen, Professor
School of Law
JD, Harvard Law School, 1996

Phillips, Glenn, Adjunct Assistant Professor
Teaching, Learning & Culture
PhD, Texas A&M University, College Station, 2014

Phillips, Susan, Professor
School of Law
JD, The Catholic University of America, 1990

Phillips, Timothy, Professor
Vet Integrative Biosciences
PhD, University of Southern Mississippi, 1975

Phinney, Theresa, Senior Lecturer
Accounting
MCS, Texas A&M University, 1984

Pickens, Adam, Assistant Professor
Environmental & Occptnl Hlth
PhD, Texas A&M University, 2008
Pierce, Tanya, Associate Professor
School of Law
JD, The University of Texas School of Law, 1996

Pierson, Elizabeth, Associate Professor
Horticultural Sciences
PhD, Washington State University, 1988

Pierson, Leland, Professor
Plant Pathology & Microbiology
PhD, Washington State University, 1986

Pietrantonio, Patricia, Professor
Entomology
PhD, University of California, Riverside, 1995

Pilant, Michael, Professor
Mathematics
PhD, New York University, 1982

Pillai, Suresh, Professor
Poultry Science
PhD, University of Arizona, 1989

Pina, Manuel, Associate Professor
Ag Leadership, Educ & Comm
PhD, Texas A&M University, 1978

Pine, Michelle, Clinical Associate Professor
Vet Integrative Biosciences
PhD, Texas A&M University, 2002
DVM, University of Missouri-Columbia, 1991

Pinedo, Pablo, Assistant Professor
Veterinary Pathobiology
PhD, University of Florida, 2008
DVM, University of Chile, 1993

Pishko, Michael, Professor
Chemical Engineering
PHD, University of Texas, 1992

Pisier, Gilles, Distinguished Professor
Mathematics
PhD, University of Paris, 1977

Pistikopoulos, Efstratios, Professor
Chemical Engineering
PhD, Carnegie Mellon University, 1988

Pittman, Andrew, Clinical Associate Professor
Health & Kinesiology
PhD, Texas A&M University, 1991

Pitts, Jon, Professor
Mathematics
PhD, Princeton University, 1974

Plankey Videla, Associate Professor
Sociology
PHD, University of Wisconsin - madison, 1998

Plotkin, Pamela, Research Associate Professor
Oceanography
PHD, Texas A&M University, 1994

Poirot, Kristan, Associate Professor
Department Of Communication
PhD, University of Georgia, 2004

Pokrovsky, Valery, Distinguished Professor
Physics And Astronomy
PhD, Tomsk State University, 1957

Pollock, Sara, Visiting Assistant Professor
Mathematics
PhD, University of California, 2012

Pollock, Thomas, Associate Professor
Aerospace Engineering
PhD, University of Virginia, 1977

Poltoratski, Alexei, Professor
Mathematics
PhD, California Institute of Technology, 1995

Polycarpou, Andreas, Professor
Mechanical Engineering
PhD, University at Buffalo, State University of New York, 1994

Polymenis, Michael, Professor
Biochemistry And Biophysics
PhD, Tufts University, 1994

Ponjuan, Luis, Associate Professor
Educ Admn & Human Resource Dev
PhD, University of Michigan, 2005

Pope, Christopher, Distinguished Professor
Physics And Astronomy
PhD, University of Cambridge, 1981

Pope, Michael, Professor
Geology & Geophysics
PhD, Virginia Tech, 1995

Popescu, Sorin, Professor
Ecosystem Science & Mgmt
PhD, Virginia Tech, 2002

Popov, Bojan, Professor
Mathematics
PhD, University of Southern Carolina, 1999

Portales, Marco, Professor
English
PhD, University of Buffalo, 1975

Porter, Brian, Clinical Associate Professor

Vet Integrative Biosciences
PhD, Indiana University, 2014

Russell, Karen, Professor
Veterinary Pathobiology
DVM, VA-MD Regional College of Veterinary Medicine, 1990
PhD, North Carolina State University, 1997

Russell, Leon, Senior Professor
Vet Integrative Biosciences
PhD, Texas A&M University, 1965
DVM, University of Missouri, 1956

Russell, Richard, Lecturer
George Bush School of Govern
PhD, University of Virginia, 1997

Rusyn, Ivan, Professor
Vet Integrative Biosciences
PhD, University of North Carolina at Chapel Hill, 2000
MD, Ukrainian State Medical University, 1994

Rutherford, Tracy, Professor
Ag Leadership, Educ & Comm
PhD, Texas A&M University, 1998

Ryan, Kathryn, Instructional Assistant Professor
Biology
PhD, Baylor College of Medicine, 1998

Rybkowski, Zofia, Assistant Professor
Construction Science
PhD, University of California, Berkeley, 2009

Rye, Chavela, Lecturer
Biochemistry And Biophysics
PhD, MIT, 2014

Rye, Hays, Associate Professor
Biochemistry And Biophysics
PhD, University of California, Berkeley, 1995

Ryoo, Boong, Associate Professor
Construction Science
PhD, University of Wisconsin-Madison, 1995

Saavedra, Abelardo, Clinical Professor
Educ Admn & Human Resource Dev
PhD, University of Michigan, Ann Arbor, 1976

Sacchettini, James, Professor
Biochemistry And Biophysics
PhD, Washington University in St. Louis, 1987

Sachdeva, Sonny, Lecturer
Chemical Engineering
PhD, Indian Institute of Technology, Kanpur, India, 2008
Sachs, Matthew, Professor
Biology
PhD, Massachusetts Institute of Technology, 1986

Safe, Stephen, Distinguished Professor
Vet Physiology & Pharmacology
PhD, University of Oxford, 1965

Safonov, Alexei, Professor
Physics And Astronomy
PhD, University of Florida, 2001

Sager, William, Assistant Professor
Oceanography
PhD, University of Hawaii manoa, 1983

Saint, James, Adjunct Professor
School of Law
JD, University of Houston Law Center, 2004

Sakamoto, Arthur, Professor
Sociology
PhD, University of Wisconsin-Madison, 1988

Sakhaei Far,, Assistant Professor
Civil Engineering
PHD, North Carolina State University, 2011

Salaga, Steven, Associate Professor
Health & Kinesiology
PHD, University of Michigan, 2012

Salin, Victoria, Professor
Agricultural Economics
PhD, Purdue University, 1996

Salter, Phia, Assistant Professor
Psychology
PhD, University of Kansas, 2010

Samollow, Paul, Professor
Vet Integrative Biosciences
PhD, Oregon State University, 1979

Samuelson, Charles, Associate Professor
Psychology
PhD, University of California, Santa Barbara, 1986

Sanandres, Luis, Professor
Mechanical Engineering
PhD, Texas A&M University, 1985

Sanchez Castilla,, Associate Professor
Civil Engineering
PHD, Universidad Politecnica de Catalunya (UPC), Barcel, 2004

Sanchez-Sinencio, E, Professor
Electrical & Computer Eng
PhD, University of Illinois, 1973

Sanders, James, Professor
Animal Science
PhD, Texas A&M University, 1977

Sanders, Joan, Senior Lecturer
Accounting
MS, Texas A&M University, 1990

Sandlin, Judy, Clinical Associate Professor
Educ Admin & Human Resource Dev
PhD, Texas A&M University, 1993

Sandlin, Michael, Clinical Associate Professor
Health & Kinesiology
PHD, Texas A&M University, 1992

Sang, Huiyan, Associate Professor
Statistics
PhD, Duke University, 2008

Sansom, Roger, Associate Professor
Philosophy & Humanities
PhD, University of North Carolina at Chapel Hill, 2002

Santander, Patricio, Senior Lecturer
Chemistry
PHD, Texas A&M University, 1987

Saravanan, Ramalingam, Professor
Atmospheric Sciences
PhD, Princeton University, 1990

Saric, William, Distinguished Professor
Aerospace Engineering
PHD, Illinois Institute of Technology, 1968

Sarin, Vivek, Associate Professor
Computer Science & Engineering
PHD, University of Illinois, 1997

Saroglou, Christos, Visiting Assistant Professor
Mathematics
PHD, University of Crete, 2011

Saslow, Wayne, Professor
Physics And Astronomy
PhD, University of California, Irvine, 1968

Satterfield, Michael, Associate Professor
Animal Science
PHD, Texas A&M University, 2008

Saunders, Ashley, Associate Professor
Vet Small Animal Clinical Sc
DVM, Texas A&M University, 2001

Saunders, William, Assistant Professor
Vet Small Animal Clinical Sc
PHD, Texas A&M University, 2005
DVM, Texas A&M University, 2001

Savari, Serap, Associate Professor
Electrical & Computer Eng
PHD, Massachusetts Institute of Technology, 1996

Savell, Jeffrey, Professor
Animal Science
PhD, Texas A&M University, 1978
Saving, Thomas, Professor
Economics
PhD, University of Chicago, 1960

Sawyer, Jason, Associate Professor
Animal Science
PhD, New Mexico State University, 2000

Scarborough, Sherry, Instructional Assistant Professor
Mathematics
PhD, Texas A&M University, 2001

Schade, Gunnar, Associate Professor
Atmospheric Sciences
PhD, Johannes Gutenberg Universitat, Germany, 1997

Schaefer, Amber, Lecturer
Chemistry
PhD, Rice University, 2007

Schaefer, Scott, Associate Professor
Computer Science & Engineering
PhD, Rice University, 2006

Schapiro, Michelle, Assistant Professor
Psychology
PhD, University of New England, 1998

Schechter, David, Associate Professor
Petroleum Engineering
PhD, Bristol University, United Kingdom, 1989

Scheiner, Justin, Assistant Professor & Extension Specialist
Horticultural Sciences
PhD, Cornell University, 2010

Schielack, Jane, Professor
Mathematics
PhD, Texas A&M University, 1988

Schielack, Vincent, Associate Professor
Mathematics
PhD, University of Texas, Austin, 1982

Schilling, Bethany, Lecturer
Vet Small Animal Clinical Sc
DVM, Texas A&M University, 2010

Schlegel, Rebecca, Associate Professor
Psychology
PhD, University of Missouri, 2009

Schleicher, Deidra, Associate Professor
Management
PhD, Pennsylvania State University, 1998

Schloss, Rebecca, Associate Professor
History
PhD, Duke University, 2003

Schlumprecht, Thomas, Professor
Mathematics
PhD, Ludwig Maximilians Universitat, Germany, 1988

Schmeichel, Brandon, Professor
Psychology
PhD, Florida State University, 2005

Schmeichel, Eden, Lecturer
Psychology
PhD, Case Western Reserve University, 2002

Schmidt, Matthew, Associate Professor
Oceanography
BS, University of California, Davis, 2003

Schmiediche, Henrik, Senior Lecturer
Statistics
PhD, Texas A&M University, 1993

Schmitz, David, Associate Professor
Vet Large Animal Clinical Sc
DVM, Kansas State University, 1976

Schneider, William, Professor Of The Practice
Mechanical Engineering
PhD, Rice University, 1972

Schnell, Ronnie, Assistant Professor & Extension Specialist
Soil and Crop Sciences
PhD, Texas A&M University, 2010

Schobeiri, Taher, Professor
Mechanical Engineering
PhD, Technische Universitat, Germany, 1979

Scholthof, Herman, Professor
Plant Pathology & Microbiology
PhD, University of Kentucky, 1990

Scholthof, Karenbeth, Professor
Plant Pathology & Microbiology
PhD, University of Kentucky, 1989

Schoolcraft, Ralph, Associate Professor
International Studies
PhD, Emory University, 1995

Schortgen, Alicia, Lecturer
Bush School of Government and Public Service
PhD, University of Texas at Dallas, 2006

Schroeder, Friedhelm, Professor
Vet Physiology & Pharmacology
PhD, Michigan State University, 1973

Schubert, Jerome, Associate Professor
Petroleum Engineering
PhD, Texas A&M University, 1999

Schuessler, Hans, Professor
Physics And Astronomy
PhD, Universitat Heidelberg, 1964

Schuett, Michael, Associate Professor
Recreation, Parks and Tourism Sciences
PhD, University of Illinois at Urbana-Champaign, 1991
Schuller, Michael, Visiting Associate Professor
Mechanical Engineering
DEN, Texas A&M University, 1985

Schulman, Craig, Visiting Associate Professor
Economics
PhD, Texas A&M University, 1990

Schumacher, Courtney, Professor
Atmospheric Sciences
PhD, University of Washington, 2003

Schumacher, Jay, Lecturer
Psychology
PHD, Texas A&M University, 1999

Schwartz, Christian, Assistant Professor
Mechanical Engineering
PHD, Iowa State University, 2006

Schwartz, Daniel, Assistant Professor
History
PhD, Princeton University, 2009

Schweikert, Emile, Professor
Chemistry
PhD, Universite de Paris, France, 1964

Schweitzer, Jordan, Associate Professor
Endodontics
DDS, Baylor College of Dentistry, 1986

Schwener, Lee, Adjunct Professor
School of Law
JD, Texas Tech University School of Law, 1972

Scott, David, Professor
Recreation, Parks and Tourism Sciences
PhD, Pennsylvania State University, 1990

Scott, Harvey, Professor
Veterinary Pathobiology
DVM, University of Saskatchewan, Canada, 1988
PhD, University of Guelph, Canada, 1998

Scott, Timothy, Associate Professor
Biology
PhD, Texas A&M University, 1996

Scully, Marlan, Distinguished Professor
Physics And Astronomy
PhD, Yale University, 1966

Seabury, Christopher, Associate Professor
Veterinary Pathobiology
PhD, Texas A&M University, 2004

Searcy, Stephen, Professor
Biological & Agricultural Eng
PhD, Oklahoma State University, 1980

Sears, James, Lecturer
Geology & Geophysics
PHD, Queen's University, Kingston, Ontario, 1979

Sears, Matthew, Lecturer
Physics and Astronomy
PHD, Texas A&M University, 2011

Segner, Robert, Professor
Construction Science
PhD, Texas A&M University, 1971

Seipp, Adam, Professor
History
PhD, University of North Carolina at Chapel Hill, 2005

Sekhposyan, Tatevik, Assistant Professor
Economics
PHD, University of North Carolina at Chapel Hill, 2010

Sell, Jane, Professor
Sociology
PhD, Washington State University, 1979

Seminario, Jorge, Professor
Chemical Engineering
PhD, Southern Illinois University, 1987
MS, Southern Illinois University, 1984

Sen, Arun, Professor
Information & Operations Mgmt
PhD, Pennsylvania State University, 1979

Sen, Ravi, Associate Professor
Information & Operations Mgmt
PhD, University of Illinois at Urbana-Champaign, 2003

Senarath Dharmasena, Instructional Assistant Professor
Agricultural Economics
PHD, Texas A&M University, 2010

Seo, Jinsil, Assistant Professor
Visualization
PhD, Simon Fraser University, 2011
MFA, School of Visual Arts, 2004

Serpedin, Erchin, Professor
Electrical & Computer Eng
PhD, University of Virginia, 1999

Sewell, Edward, Visiting Professor
Mathematics
PHD, Purdue University, 1972

Seymore, Malinda, Professor
School of Law
JD, Baylor University, 1986

Sezgin, Ergin, Professor
Physics And Astronomy
PhD, State University of New York at Stony Brook, 1980

Shafer, Carl, Professor
Recreation, Parks and Tourism Sciences
PhD, Clemson University, 1993

Shakottai, Srinivas, Associate Professor
Electrical & Computer Eng
PhD, University of Illinois, 2007

Shipley, Meagan, Clinical Assistant Professor
Health & Kinesiology
PHD, Indiana University, 2014

Shipman, Frank, Professor
Computer Science & Engineering
PHD, University of Colorado, 1993

Shipps, Eva, Associate Professor
Epidemiology & Biostatistics
PHD, University of Texas Health Science Center at Houston, 2005

Shippen, Dorothy, Professor
Biochemistry And Biophysics
PHD, University of Alabama, 1987

Shiu, Anne, Assistant Professor
Mathematics
PHD, University of California, Berkeley, 2010

Shlomo, Shalom, Senior Scientist
Physics and Astronomy
PHD, Weizmann Institute of Science-Rehovot Israel, 1973

Short, Aric, Professor
School of Law
JD, University of Texas Law School, 1996

Siebert, John, Professor
Agricultural Economics
PHD, University of California, Berkeley, 1978

Siegele, Deborah, Associate Professor
Biology
PHD, University of Wisconsin-Madison, 1989

Sievert, Ronald, Senior Lecturer
International Affairs
JD, University of Texas, Austin, 1977

Sigler, Dennis, Professor & Extension Specialist
Animal Science
PHD, Texas A&M University, 1981

Silva, Pauline, Visiting Assistant Professor
Educ Admn & Human Resource Dev
PHD, Virginia Tech, 2007

Silva-Martinez, Jose, Professor
Electrical & Computer Eng
PHD, Katholieke Universiteit Leuven, 1992

Silvas, Tammy, Adjunct Professor
School of Law
JD, Texas Wesleyan University, 2008

Silvy, Nova, Professor
Wildlife & Fisheries Sciences
PHD, Southern Illinois University, 1975

Simmons, Deborah, Professor
Educational Psychology
PHD, Purdue University, 1986

Simon, Bradley, Clinical Assistant Professor
Vet Small Animal Clinical Sc
DVM, Ross University, 2007

Simpson, Catherine, Assistant Lecturer
Horticultural Sciences
PHD, Texas A&M University, 2013

Simpson, Nancy, Clinical Professor
College of Business
PHD, Texas A&M University, 1992

Singer, John, Associate Professor
Health & Kinesiology
PHD, Ohio State University, 2002

Singh, Chanan, Professor
Electrical & Computer Eng

International Affairs
PHD, University of Cambridge, Trinity College, 2011
Snowden, Karen, Professor
Veterinary Pathobiology
PhD, North Carolina State University, 1988
DVM, Auburn University, 1979

Snyder, Douglas, Professor
Psychology
PhD, University of North Carolina at Chapel Hill, 1978

Snyder, Franklin, Professor
School of Law
JD, University of Missouri - Columbia, 1983

Sobel, Neil, Associate Professor
School of Law
JD, Southern Methodist University, 1988

Socolofsky, Scott, Associate Professor
Civil Engineering
PhD, Massachusetts Institute of Technology, 2001

Sokolov, Alexei, Professor
Physics And Astronomy
PhD, Stanford University, 2001

Son, Dong, Associate Professor
Chemistry
PhD, University of Texas, Austin, 2002

Song, Dezhen, Associate Professor
Computer Science & Engineering
PhD, University of California, Berkeley, 2004

Song, Hojun, Assistant Professor
Entomology
PHD, The Ohio State University Columbus, OH, 2006

Sorescu, Alina, Associate Professor
Marketing
PhD, University of Houston, 2002

Sorescu, Sorin, Professor
Finance
PhD, University of Florida, 1996

Sorg, Joseph, Assistant Professor
Biology
PhD, University of Chicago, 2006

Sottile, Frank, Professor
Mathematics
PhD, University of Chicago, 1994

Sparks, David, Associate Professor
Geology & Geophysics
PhD, Brown University, 1992

Sparvero, Emily, Adjunct Assistant Professor
Health & Kinesiology
PHD, University of Texas at Austin, 2008

Spaulding, Kathy, Clinical Professor
College of Vet Med
DVM, Purdue University, 1976

Speed, F, Professor
Statistics
PHD, Texas A&M University, 1969

Spence, Joseph, Adjunct Professor
School of Law
JD, Baylor Law School, 1983

Spiegelman, Clifford, Distinguished Professor
Statistics
PhD, Northwestern University, 1976

Sprintson, Alexander, Associate Professor
Electrical & Computer Eng
PhD, Israel Institute of Technology, 2003

Spurlock, Joe, Professor
School of Law
JD, The University of Texas School of Law, 1962

Srinivasa, Arun, Professor
Mechanical Engineering
PhD, University of California, Berkeley, 1991

Srinivasan, Raghavan, Professor
Ecosystem Science & Mgmt
PhD, Purdue University, 1992

Staack, David, Associate Professor
Mechanical Engineering
PhD, Drexel University, 2008

Stable, Susan, Associate Professor
English
PhD, University of Delaware, 1996

Stagner, Brian, Clinical Professor
Psychology
PhD, University of Massachusetts, 1982

Stallone, John, Professor
Vet Physiology & Pharmacology

Biochemistry And Biophysics
PhD, Colorado University, 2000

Stranges, Anthony, Associate Professor
History
PHD, University of Wisconsin-Madison, 1977

Straube, Emil, Professor
Mathematics
PHD, Swiss Federal Institute of Technology, Zurich, 1983

Strawser, Jerry, Professor
Accounting
PhD, Texas A&M University, 1985

Strawser, Robert, Professor
Accounting
DBA, University of Maryland, 1969

Street, Richard, Professor
Department Of Communication
PHD, Speech Communication, 1980

Striganac, Thomas, Professor
Aerospace Engineering
PhD, Virginia Tech, 1987

Strickland, Jack, Adjunct Professor
School of Law
JD, The University of Texas School of Law, 1971

Strigari, Louis, Assistant Professor
Physics And Astronomy
PHD, Ohio State University, 2014

Strong, Jennifer, Assistant Professor
Ag Leadership, Educ & Comm
PhD, Oklahoma State University, 2007

Strong, Jr., Assistant Professor
Ag Leadership, Educ & Comm
PhD, University of Florida, 2010

Strong, Michelle, Instructional Assistant Professor
Health & Kinesiology
MFA, Case Western Reserve University, 2011

Stronza, Amanda, Associate Professor
Recreation, Parks and Tourism Sciences
PhD, University of Florida, 2000

Strouboulis, Theofanis, Professor
Aerospace Engineering
PhD, University of Texas, Austin, 1986

Stroustrup, Bjarne, Tees Distinguished Research Professor
Computer Science & Engineering
PhD, Cambridge University, 1979

Strzelec, Andrea, Assistant Professor
Mechanical Engineering
PhD, University of Wisconsin-Madison, 2009
Stuessy, Carol, Associate Professor
Teaching, Learning & Culture
PhD, Ohio State University, 1984

Sturino, Joseph, Assistant Professor
Nutrition & Food Science
PhD, North Carolina State University, 2003

Su, Chin, Professor
Electrical & Computer Eng
PhD, Brandeis University, 1979

Su, Hung-Jue, Professor
Materials Science & Eng
PhD, University of Michigan, 1988

Subbarao, Suhasini, Associate Professor
Statistics
PhD, University of Bristol, 1999

Suchodolski, Jan, Clinical Associate Professor
Vet Small Animal Clinical Sc
PhD, Texas A&M University, 2005

Suddeth, Bonnie, Adjunct Professor
School of Law
JD, The University of Texas School of Law, 1985

Suh, Chi-Der, Associate Professor
Mechanical Engineering
PhD, Texas A&M University, 1997

Sukhishvili, Svetlana, Professor
Materials Science & Eng
PhD, Moscow State University, 1989

Sullivan, Harry, Adjunct Professor
School of Law
JD, LSU Law School, 1976

Sullivan, Ronald, Lecturer
Public Service & Administration
JD, University of Kansas, 2014

Sumpter, Randall, Associate Professor
Department Of Communication
PhD, University of Texas, 1996

Sun, Gang, Visiting Assistant Professor
Eng Tech & Ind Distribution
PhD, Iowa State University, 2010

Sun, Yuefeng, Professor
Geology & Geophysics
PhD, Columbia University, 1994

Sundqvist, Kyle, Visiting Assistant Professor
Electrical & Computer Eng
PHD, University of California - Berkeley, 2012

Sunik, Zoran, Professor
Mathematics
PhD, Binghampton University, 2000

Suntzeff, Nicholas, Professor
Physics And Astronomy
PhD, University of California, Santa Cruz, 1980

Suzuki, Kazuko, Assistant Professor
Sociology
PhD, Princeton University, 2003

Swanson, Edward, Professor
Accounting
PhD, University of Wisconsin, 1977

Swaroop, Dvahg, Professor
Mechanical Engineering
PHD, University of California, Berkeley, 1994

Swearingen, C, Professor
English
PHD, The University of Texas - Austin, 1978

Sweet, Kristi, Associate Professor
Philosophy & Humanities
PhD, Loyola University, 2006

Swim, Keith, Clinical Associate Professor
Management
JD, Texas Tech University, 1980

Sword, Gregory, Professor
Entomology
PhD, University of Texas, Austin, 1998

Sze, Sing, Associate Professor
Computer Science & Engineering
PhD, University of Southern California, 2000

Szunyogh, Istvan, Professor
Atmospheric Sciences
PhD, Hungarian Academy of Sciences, 1994

Tabaar, Mohammad, Assistant Professor
International Affairs
PhD, Georgetown University, 2012

Tabb, Phillip, Professor
Architecture
PhD, Architectural Association Graduate School of Architecture, 1990

Tabien, Rodante, Associate Professor
Soil and Crop Sciences
PhD, Texas A&M University, 1996

Tackett-Gibson, Melissa, Lecturer
Bush School of Government and Public Service
PhD, Northeastern University, 2001

Tag, Andrew, Lecturer
Biology
PhD, Texas A&M University, 2003
Tai, Li-Jung, Assistant Professor  
Mechanical Engineering  
PHD, University of Michigan Ann Arbor, 2011

Takhirov, Aziz, Visiting Assistant Professor  
Mathematics  
PHD, University of Pittsburgh, 2014

Talbot, Brent, Lecturer  
George Bush School of Govern  
PhD, University of Denver, 2003

Talcott, Stephen, Professor  
Nutrition & Food Science  
PhD, University of Arkansas, 2000

Talcott, Susanne, Associate Professor  
Nutrition & Food Science  
PhD, University of Florida, 2004

Taliaferro, Steven, Associate Professor  
Mathematics  
PhD, Stanford University, 1976

Talreja, Ramesh, Professor  
Aerospace Engineering  
PhD, The Technical University of Denmark, 1985

Tamamis, Phanourios, Assistant Professor  
Chemical Engineering  
PHD, University of Cyprus, 2010

Tamborindeuy, Cecilia, Associate Professor  
Entomology  
PhD, Institut National Polytechnique de Toulouse, 2004

Tarar, Ahmer, Associate Professor  
Political Science  
PhD, University of Rochester, 2003

Tarone, Aaron, Associate Professor  
Entomology  
PhD, Michigan State University, 2007

Tarpley, Lee, Associate Professor  
Soil and Crop Sciences  
PhD, Texas A&M University, 1993

Tarpley, Raymond, Senior Associate Professor  
Vet Integrative Biosciences  
DVM, Texas A&M University, 1971

Tanvin, David, Lecturer  
Department Of Communication  
PHD, Louisiana State University, 2013

Tassinari, Louis, Professor  
Visualization  
PhD, Dartmouth College, 1985  
JD, Boston College, 2003

Tayce, Jordan, Instructional Assistant Professor  
Vet Integrative Biosciences  
DVM, Texas A&M University, 2008

Taylor, Brandie, Assistant Professor  
Epidemiology & Biostatistics  
PhD, University of Pittsburgh, 2011

Taylor, Charles, Instructional Professor  
English  
PhD, Northern Illinois University, 1971

Taylor, Lathrop, Senior Lecturer  
Biology  
PhD, Texas A&M University, 1985

Taylor, Lori, Associate Professor  
Bush School of Government and Public Service  
PHD, University of Rochester, 1990

Taylor, Michelle, Professor  
Political Science  
PhD, Rice University, 1990

Taylor, Robert, Research Professor  
Vet Integrative Biosciences  
PhD, Texas A&M University, 1987

Taylor, Thomas, Associate Professor  
Animal Science  
PhD, University of Tennessee, 2006

Tchakerian, Vatche, Professor  
Geography  
PhD, University of California, Los Angeles, 1989

Tebeaux, Elizabeth, Professor  
English  
PhD, Texas A&M University, 1977

Tebeaux, William, Executive Professor  
Finance  
MBA, University of Houston, 1971

Tedeschi, Luis, Professor  
Animal Science  
PhD, Cornell University, 2001

Teel, Pete, Professor  
Entomology  
PhD, Oklahoma State University, 1978

Teizer, Winfried, Associate Professor  
Physics And Astronomy  
PhD, University of Massachusetts, 1998

Teodoriu, Catalin, Associate Professor  
Petroleum Engineering  
PHD, Technische Universitat Clausthal, 2003

Teodoro, Manuel, Associate Professor  
Political Science  
PhD, University of Michigan, 2007
Tevis, Noah, Adjunct Professor
School of Law
JD, Texas Wesleyan University School of Law, 2007

Thatte, Anupam, Lecturer
Electrical & Computer Eng
PHD, Texas A&M University, 2014

Thomas, Deborah, Professor
Oceanography
PHD, University of North Carolina at Chapel Hill, 2002

Thomas, Francis, Instructional Professor
Health & Kinesiology
PHD, Texas A&M University, 1980

Thomas, John, Lecturer
Recreation, Parks and Tourism Sciences
PHD, Texas A&M University, 1979

Thomas, Terry, Professor
Biology
PHD, University of Georgia, 1975

Thomasson, John, Professor
Biological & Agricultural Eng
PHD, University of Kentucky, 1997

Thompson, Bruce, Distinguished Professor
Educational Psychology
EdD, University of Houston, 1978

Thompson, Darrell, Lecturer
Construction Science
PHD, Texas A&M University, 2014

Thompson, James, Professor
Vet Large Animal Clinical Sc
DVM, University of Guelph, 1982
DVSc, University of Guelph, 1991

Thompson, Wesley, Professor
Biology
PHD, University of California, Berkeley, 1975

Thoms, Alston, Associate Professor
Anthropology
PHD, Washington State University, 1989

Thornton, Daniel, Associate Professor
Oceanography
PHD, Queen Mary Westfield College, University of London, 1996

Thornton, John, Executive Professor
Health & Kinesiology
PHD, Texas A&M University, 1997

Thornton, Michael, Clinical Assistant Professor
Health & Kinesiology
EDD, Texas A&M University, 2007

Threadgill, David, Professor
Veterinary Pathobiology
PHD, Texas A&M University, 1989

Threadgill, Deborah, Assistant Professor
Veterinary Pathobiology
PHD, Texas A&M University, 1990

Tian, Guoqiang, Professor
Economics
PHD, University of Minnesota, 1987

Tian, Yanan, Associate Professor
Vet Physiology & Pharmacology
PHD, Rutgers University, 1993

Graduate Faculty

- Graduate Teaching Faculty (p. 1409)
- Graduate Committee Faculty (p. 1410)
  - Possible Roles of Graduate Committee Faculty (p. 1410)
  - Members of Graduate Committee Faculty (p. 1410)
    - Tenured and Tenure-Track TAMU Faculty (p. 1410)
    - Academic Professional Track Faculty and Professional Staff of TAMU, TAMUS Agencies, and Affiliated Hospitals and Clinical Organizations (p. 1411)
    - Faculty and Professional Staff Employed By Other Institutions and Organizations (p. 1412)
  - Special Appointments (p. 1412)

The Graduate Faculty at Texas A&M University consists of the President, the Provost and Executive Vice President, the Associate Provosts, the Deans of all subject-matter colleges, selected Directors, and properly qualified academic groups.

The below outlines University policies and practices which Department Heads, Deans, and Intercollegiate faculties should use in nominating members to the Graduate Committee Faculty of Texas A&M University for participation on graduate student advisory committees, discusses the various roles of Graduate Committee Faculty, and describes the credentialing requirements for the Graduate Teaching Faculty. Departments, intercollegiate faculties, and colleges may have additional requirements that must be satisfied by individuals wishing to be recommended for appointment to the Graduate Committee Faculty. Additional requirements are subject to the review and approval of the Associate Provost for Graduate and Professional Studies.

Graduate Teaching Faculty

According to SACS guidelines, faculty teaching graduate and post-baccalaureate course work should have an earned doctorate or terminal degree in the teaching discipline or a related discipline. Other factors that may be considered include a master's degree or at least 18 semester credit hours of graduate-level coursework in the same or closely related field; professional licensure or certification in a related field or profession, or significant professional, research or teaching experience in the same or closely related field. Faculty members meeting these credentialing requirements for graduate courses are automatically members of the Graduate Teaching Faculty.

The office of the dean of faculties assumes responsibility for verifying the teaching qualifications for faculty. Colleges and departments oversee hiring of graduate assistants who serve as instructors-of-record for undergraduate courses. The guidelines for all instructional faculty, including graduate teaching assistants, who are instructors of record for graduate and undergraduate courses at Texas A&M University and its two
branch campuses, Texas A&M University at Galveston and Texas A&M University at Qatar are available at: http://dof.tamu.edu/sites/default/files/Faculty_Guidelines/Credentialing_Guidelines.pdf

In addition to meeting the credentialing requirements for teaching graduate courses, faculty teaching research courses such as 691 and other designated courses must also be members of the Graduate Committee Faculty.

**Graduate Committee Faculty**

Search [here](http://ogaps.tamu.edu/Buttons/Forms-Information/#1-GraduateFacultyMembershipandNominations) for current Graduate Committee Faculty members.

Appointees to the Graduate Committee Faculty participate in the graduate degree programs of the University by serving on graduate student advisory committees.

Members of the Graduate Committee Faculty are selected from qualified individuals of the faculty and professional staff of Texas A&M University; from employees of Texas A&M System agencies such as Texas A&M AgriLife Research, Texas A&M Forest Service, Texas A&M AgriLife Extension, TEES, TTI; from employees of affiliated research organizations (such as USDA) located near Texas A&M campus sites; and from affiliated hospitals and clinical organizations.

Nomination for membership on the Graduate Committee Faculty is always initiated by the head of the appropriate academic department, intercollegiate faculty, or dean of college (under special circumstances) of Texas A&M University and is processed as discussed in the following sections.

Appointment to membership on the Graduate Committee Faculty, although considered an honor, serves functional purposes. Appointment to membership is not for the purpose of conferring recognition upon an individual, but is designed to assure competence in the directing and advising of graduate students. Such competence is, in part, a function of experience and knowledge of operational procedures; it is also characterized by ability and motivation.

Membership on the Graduate Committee Faculty is maintained only by participating in graduate programs by directing or administering graduate work, by doing research and publishing, or by other direct and substantial contributions to the graduate programs of the University, such as by service on a Graduate Instruction Committee or by administrative assignments in graduate education. A member of the graduate committee faculty may not serve on the graduate committee faculty of an academic program in which the member is pursuing a graduate degree or certificate. Individuals who have not been appointed to the Graduate Committee Faculty may not serve on student advisory committees of master's and doctoral students. Such competence is, in part, a function of experience and knowledge of operational procedures; it is also characterized by ability and motivation.

Membership on the Graduate Committee Faculty is maintained only by participating in graduate programs by directing or administering graduate work, by doing research and publishing, or by other direct and substantial contributions to the graduate programs of the University, such as by service on a Graduate Instruction Committee or by administrative assignments in graduate education. A member of the graduate committee faculty may not serve on the graduate committee faculty of an academic program in which the member is pursuing a graduate degree or certificate. Individuals who have not been appointed to the Graduate Committee Faculty may not serve on student advisory committees of master's and doctoral students. Such competence is, in part, a function of experience and knowledge of operational procedures; it is also characterized by ability and motivation.

Appointment to membership on the Graduate Committee Faculty, from the student's academic program and located near the Texas A&M University campus site, to serve as the co-chair of the committee. The Department Head or Chair of intercollegiate faculty may request in writing to the Associate Provost for Graduate and Professional Studies that a faculty member who is on an approved leave of absence or has voluntarily separated from the university, be allowed to continue to serve in the role of chair of a student's advisory committee without a co-chair for up to one year. The student should be near completion of the degree. Extensions beyond the one year period can be granted with additional approval of the Dean.

The Department Head or Chair of intercollegiate faculty shall notify any faculty member who is non-voluntarily removed from the roles of the Graduate Committee Faculty, and the faculty member has the right to appeal his/her removal through University Rule 12.99.99.M2 (Faculty Grievances Procedures).

The two categories of membership are: 1) Member, and 2) Special Appointment.

**Members of Graduate Committee Faculty**

**A. Tenured and Tenure-Track TAMU Faculty**

Tenured and Tenure-track (T/TT) faculty members of Texas A&M University are eligible to participate as members of the Graduate Committee Faculty under criteria and guidelines as established by each college or department. Also academic professional track faculty members employed by Texas A&M University at Qatar (TAMUQ) with appropriate professorial rank (assistant professor, associate professor, or professor) are eligible to participate as members of the Graduate Committee Faculty. The aforementioned faculty members may serve as chair, co-chair, or member of advisory committees of master’s and doctoral students.

Appointment of a T/TT faculty member is accomplished through use of the Personal Record Form by the head of a department, chair of an intercollegiate faculty group, or dean of a college. Nominations of T/TT faculty members who are not adloc’d to a graduate degree-granting unit, to serve as chair or co-chair in a graduate degree-granting unit must come from the department head or chair of intercollegiate faculty for that graduate degree-granting unit. Appointment of an academic professional track faculty member employed by Texas A&M University at Qatar (TAMUQ) with appropriate professorial rank (assistant professor, associate professor, or professor) is accomplished through use of the Personal Record Form and letter from the TAMUQ Graduate Instruction...
Committee (the members of which shall be members of the Graduate Committee Faculty at TAMU) through the Dean/CEO of the TAMUQ campus and the appropriate administrative chain at TAMU.

B. Academic Professional Track Faculty and Professional Staff of TAMU, TAMUS Agencies, and Affiliated Hospitals and Clinical Organizations

An academic professional track faculty employed by TAMU, designated TAMUS agencies, or affiliated hospitals and clinical organizations is eligible to participate as a member of the Graduate Committee Faculty (if permitted by department or college guidelines), and may serve as chair, co-chair, or member of advisory committees of master’s and doctoral students with appropriate approval. Professional staff employed by TAMU, designated TAMUS agencies, or affiliated hospitals and clinical organizations are eligible to participate as a member of the Graduate Committee Faculty (if permitted by department or college guidelines), and may serve as co-chair or member of advisory committees of master’s and doctoral students with appropriate approval.

Appointments of these academic professional track individuals and professional staff are accomplished through use of the Personal Record Form and a letter, initiated by the head of the academic department, dean of college, or chair of intercollegiate faculty, through the College Graduate Instruction Committee and the College Dean. The letter must provide evidence that the nominee meets the qualifications for the desired role(s).

1. General qualifications for serving on advisory committees for master’s students only

Minimum qualifications for academic professional track faculty or professional staff employed by TAMU, designated TAMUS agencies, or affiliated hospitals and clinical organizations to serve in the various roles of the graduate committee faculty for master’s students only are described below each role in the following section.

Chair role:

The following minimum qualifications must be met for eligibility to serve in the chair role on advisory committees for master’s students.

a. qualifications (a)-(d) listed below for co-chair role
b. employment location near city of Texas A&M campus site (except for online programs).

Co-Chair role:

The following minimum qualifications must be met for eligibility to serve in the co-chair role on advisory committees for master’s students.

a. has an earned master’s or terminal degree
b. has actively served on a graduate student’s advisory committee, or held/holds an administrative assignment in a graduate program at Texas A&M or another university
c. has published a scholarly work as primary author or corresponding author, or appropriate evidence of professional accomplishments related to the discipline
d. employed by Texas A&M University; Texas A&M University System agencies such as Texas A&M AgriLife Research, Texas A&M Forest Service, Texas A&M AgriLife Extension, TEES, TTI; or affiliated hospitals and clinical organizations with professorial rank.

Member role:

The following minimum qualifications must be met for eligibility to serve in the member role on advisory committees for master’s students.

a. has an earned master’s or terminal degree, or an earned bachelor’s degree and appropriate evidence of professional accomplishments related to the discipline

Exceptions to the minimum qualifications of any of the various roles listed above may be requested as a part of the letter from heads of departments, deans of colleges, or chairs of intercollegiate faculty through the Graduate Instruction Committee and Dean of College.

2. General qualifications for serving on advisory committees for doctoral students

Minimum qualifications for academic professional track faculty or professional staff employed by TAMU, designated TAMUS agencies, or affiliated hospitals and clinical organizations to serve in the various roles of the graduate committee faculty for doctoral students are described below each role in the following section.

Chair role:

The following minimum qualifications must be met for eligibility to serve in the chair role on advisory committees for doctoral students.

a. qualifications (a)-(d) listed below for co-chair role
b. employment location near city of Texas A&M campus site (except for online programs).

Co-Chair role:

The following minimum qualifications must be met for eligibility to serve in the co-chair role on advisory committees for doctoral students.

a. has an earned doctoral or terminal degree
b. has actively served on a graduate student’s advisory committee, or held/holds an administrative assignment in a graduate program at Texas A&M or another university
c. has published a scholarly work as primary author or corresponding author, or appropriate evidence of professional accomplishments related to the discipline
d. employed by Texas A&M University; Texas A&M University System agencies such as Texas A&M AgriLife Research, Texas A&M Forest Service, Texas A&M AgriLife Extension, TEES, TTI; or affiliated hospitals and clinical organizations with professorial rank.

Member role:

The following minimum qualifications must be met for eligibility to be eligible to serve in the member role on advisory committees for doctoral students.

a. has an earned doctoral or terminal degree, or an earned master’s degree and appropriate evidence of professional accomplishments related to the discipline
Exceptions to the minimum qualifications of any of the various roles listed above may be requested by heads of departments, deans of colleges, or chairs of intercollegiate faculty through the Graduate Instruction Committee and Dean of College.

C. Faculty and Professional Staff Employed By Other Institutions and Organizations

Faculty and Professionals who are not employed by TAMU, TAMUS agencies listed in section B, or affiliated hospitals and clinical organizations are eligible to participate as a member of the Graduate Committee Faculty (if permitted by department or college guidelines), and may serve as co-chair or member of advisory committees of master’s and doctoral students with appropriate approval.

Appointments of the aforementioned individuals are accomplished through use of the Personal Record Form and a letter, initiated by the head of the academic department, dean of college, or chair of intercollegiate faculty, through the College Graduate Instruction Committee and the College Dean. The letter must provide evidence that the nominee meets the qualifications for the desired role(s).

1. General qualifications for serving on advisory committees for master’s students only

Minimum qualifications for individuals who are not employed by TAMU, TAMUS agencies listed in section B, or affiliated hospitals and clinical organizations are described below each role in the following section.

Co-Chair role:

The following minimum qualifications must be met for eligibility to serve in the co-chair role on advisory committees for master’s students.

a. has an earned master’s or terminal degree
b. has actively served on a graduate students’ advisory committee, or held/holds an administrative assignment in a graduate program at Texas A&M or another university
c. has published a scholarly work as primary author or corresponding author, or appropriate evidence of professional accomplishments related to the discipline

Member role:

The following minimum qualifications must be met for eligibility to serve in the member role on advisory committees for master’s students.

a. has an earned master’s or terminal degree, or an earned bachelor’s degree and appropriate evidence of professional accomplishments related to the discipline

Exceptions to the minimum qualifications of any of the various roles listed above may be requested by heads of departments, deans of colleges, or chairs of intercollegiate faculty through the Graduate Instruction Committee and Dean of College.

Special Appointments

There may be times when the head of an academic department or chair of intercollegiate faculty wishes to have qualified individuals serve [such as, from another university, government or industry] on a student’s Advisory Committee without being permanent members on the Graduate Committee Faculty. An individual serving as a Special Appointment on a student’s Advisory Committee is not counted toward the minimum number of Graduate Committee Faculty necessary to form the committee. These appointments are accomplished by use of the Personal Record Form, and a letter, initiated by the head of an academic department or chair of intercollegiate faculty to the Associate Provost for Graduate and Professional Studies with the individual’s resume attached. The letter should state the merits of the individual being nominated and a list of the specific student advisory committees on which the individual will serve.

Intercollegiate Faculty

Texas A&M University has established the concept of an intercollegiate faculty with expressed goals of

1. fostering development and communication in disciplinary fields represented by faculty members in different departments and colleges,
2. utilizing faculty expertise in specific areas to strengthen emerging disciplinary programs and
3. overseeing the academic administration of graduate degree programs in a particular discipline.

To have access to an intercollegiate faculty’s degree programs, a graduate student must be admitted to that program and a member of that faculty must serve as chair or co-chair of the student’s advisory committee.
Intercollegiate faculties have been formed in agribusiness, biotechnology, engineering systems management, genetics, molecular and environmental plant sciences, neuroscience, toxicology, reproductive biology, and water management and hydrological science.

Texas A&M University System Graduate Faculty

The Texas A&M University System (TAMUS) has established a System Graduate Faculty which enables and facilitates collaborations among System institutions. Membership on the TAMUS Graduate Faculty provides students with access to faculty expertise throughout the System. Membership also creates an edge in recruiting top students into individual programs and helps provide recruiting opportunities with an intellectually, geographically and ethnically diverse pool of students. Members of the TAMUS Graduate Faculty are granted Associate Member status on the Texas A&M University Graduate Faculty. As a result, these faculty may serve on graduate advisory committees as a member or a co-chair (but not as chair) with a member of the Texas A&M University Graduate Faculty or they may teach a graduate course.

System Graduate Faculty Guidelines

1. Purpose. The Texas A&M University System Graduate Faculty has been developed for the following purposes:
   a. To facilitate participation in graduate education for a student in the A&M System.
   b. To provide a graduate student access to the expertise of faculty members throughout the System.
   c. To increase inter-institutional faculty collaboration throughout the A&M System.
   d. To promote the development of multi-disciplinary educational and research programs and the capacity to study complex scientific and social issues.

2. Membership Background
   a. Membership on the A&M System Graduate Faculty provides the opportunity to participate in graduate education at the A&M System universities through serving on graduate committees, advising a graduate student, and teaching graduate courses.
   b. Appointment to membership on the A&M System Graduate Faculty is designed to assure rigor in the directing, counseling, and teaching of a graduate student.
   c. All of the A&M System Graduate Faculty members can serve as members of any graduate committee.
   d. The chair, or co-chair, of a graduate committee must be from the institution that is conferring the graduate degree.

3. Membership Qualifications. Consideration for membership on the A&M System Graduate Faculty requires meeting the following qualifications:
   a. The individual must hold the terminal degree, usually an earned doctorate. Exceptions will be considered only if justified in accordance with the “Southern Association of Colleges and Schools Commission on Colleges.”
   b. The individual must be a tenured or a tenure-track faculty member of a Texas A&M University System university and hold a professorial rank.
   c. A person holding the title of instructor or lecturer may not be considered for membership on the A&M System Graduate Faculty.
   d. Individuals holding professorial rank at an agency of the A&M System are eligible for membership.
   e. The individual must be a member of the graduate faculty at his/her home institution.
   f. The individual must be an active participant in his/her graduate program through teaching, directing or administering graduate work.
   g. The individual must show evidence of active research and scholarly work within the past five years. This should include publication as primary author of scholarly works in peer-reviewed journals, publication of scholarly books, presentations at professional meetings, or creative works, such as performances, work in juried exhibitions, or other creative works appropriate to the individual’s discipline.
   h. A graduate student at any A&M System institution may not be a member of the A&M System Graduate Faculty. Membership on the A&M System Graduate Faculty is forfeited upon a faculty or staff member’s admission to a graduate program at any institution in the A&M System.

4. Nomination, Appointment and Review Process
   a. Nomination for membership to the A&M System Graduate Faculty is made by submission of an official application by a faculty member and an accompanying letter of endorsement from the individual’s department head or chair and college dean. The application and letter of endorsement are sent to the graduate dean, who certifies institutional graduate faculty appointment status, and forwards the nomination to the A&M System Council of Graduate Deans for consideration and action.
   b. The application from the faculty member must identify the institutional graduate faculty of which he or she is a member, specify the graduate degree(s) that he or she is qualified to supervise under the conditions of the institutional appointment, and specify the graduate program(s) in which he or she wishes to participate as a System graduate faculty member. The application should be accompanied by a current curriculum vitae.
   c. The Council of Graduate Deans will appoint faculty from member institutions as needed to a Graduate Faculty Review Advisory Committee to consider applications and reappointments and to make recommendations to the Council of Graduate Deans.
   d. An A&M System Graduate Faculty member is appointed for a five-year term. At the end of the five-year term, the member will be re-evaluated for reappointment by the Council of Graduate Deans. Failure to maintain membership criteria will result in removal from the A&M System Graduate Faculty. The Council of Graduate Deans will notify by letter a faculty member who is non-voluntarily removed from membership on the A&M System Graduate Faculty. The faculty member’s department head, dean, provost and graduate dean will also receive notification.

5. Graduate Faculty Membership List. A list of current membership will be maintained in the Office of the Vice Chancellor for Academic and Student Affairs, the graduate office at each System university and on the Office of Graduate and Professional Studies (http://ogaps.tamu.edu) website.
International Opportunities for Students

University Locations Abroad

Many Texas A&M partner organizations offer international opportunities to students. Students can check the Study Abroad Programs Office search engine to locate such experiences or contact their academic departments about programs and locations they recommend. In addition, Texas A&M has a research and education center in Costa Rica. http://soltiscentercostarica.tamu.edu

On Campus Engagement in International Opportunities

You don’t have to go abroad to take advantage of international opportunities offered by Texas A&M. Students who remain on campus are encouraged to participate in many options available including the following:

- Academic certificates and minors with an international focus http://studyabroad.tamu.edu
- Center for International Business Studies http://mays.tamu.edu/center-for-international-business-studies
- Engineers without Borders-U.S.A. http://ewb.tamu.edu
- Global Business Brigades http://tamugbb.weebly.com
- MSC L.T. Jordan Institute for International Awareness http://ltjordan.tamu.edu
- Norman Borlaug Institute for International Agriculture http://borlaug.tamu.edu
- SCONA http://scona.tamu.edu
- Scowcroft Institute of International Affairs http://bush.tamu.edu/scowcroft
- Student Organizations http://studentactivities.tamu.edu/app/organization
  (To find internationally focused student organizations, please visit http://studentactivities.tamu.edu/app/search/index and search international.)

Academic Programs Abroad

Many graduate and professional students use study abroad programs as means of enhancing their foreign language and research skills. When considering study abroad, it is important for a student to consult with his/her committee chair early. Not all credits can be applied to a degree plan, so pre-trip planning and approval is very important.

Conducting Research Abroad

In some cases, graduate students are employed as part of a research project, and in others, they register for research hours at Texas A&M and go abroad independently. In all such cases, students should register their research experiences with the Study Abroad Programs Office to ensure emergency or other assistance while abroad.

- Research at Texas A&M University http://www.tamu.edu/research/
- Professional School Advising

Faculty-Led Programs

To find the most recent Texas A&M graduate or professional school course offerings abroad, visit the study abroad website. The Study Abroad Programs Office has a library that houses books and brochures on a variety of different opportunities abroad, including those for graduate students. The office is located on the first floor of Bizzell Hall West.

Internships/Work Abroad Options

- MSC L.T. Jordan Institute for International Awareness http://ltjordan.tamu.edu/fellows/
- Public Policy Internship Program http://ppip.tamu.edu/
- Study Abroad Programs Office http://studyabroad.tamu.edu/

Reciprocal Educational Exchange Programs (REEPs)

These programs give students the opportunity to enroll and pay tuition at Texas A&M but “switch places” with counterparts at foreign institutions. A complete listing of current exchanges are listed below.

- List of Departmental/College Exchange Programs http://studyabroad.tamu.edu/ – Click on Programs and search for exchange programs
- List of University Wide Exchange Programs http://studyabroad.tamu.edu/ – Click on Programs and search for exchange programs

“Non-Degree” Status at a Foreign Institution

Many foreign universities will accept non-degree-seeking students to study for a semester or year. In some cases, your faculty advisor or academic department may have an existing collaboration with a foreign university. If you wish to enroll at a foreign institution without seeking a degree, write directly to the school or schools of choice, asking for admission as a non-degree student. You may be able to receive credit for some of your coursework; it will depend on whether Texas A&M, the department, and your graduate advisory committee will accept the credit you earn overseas as transfer credit into your Texas A&M degree.

Degrees from Foreign Universities

Occasionally, a student may wish to receive an advanced degree from an international university. Of particular interest to many is the opportunity to receive a master’s degree in 12 months from the British University system or the Erasmus Mundus program, the European Union “Fulbright” for graduate students. While the experience would certainly be worthwhile, the student should be aware that a terminal degree is usually most valuable in the country from which it was granted. If you decide to pursue a degree in a foreign university, investigate whether they accept foreign students into their degree programs, and how that degree will fit into your long-term academic or career plans. You would then follow the foreign
university’s application guidelines. Generally, approximately a 12-month lead time is necessary.

**Funding to Go Abroad**

Federal and other financial aid may be adjusted to accommodate extra costs associated with research or study abroad. Students interested in exploring funding options should discuss this with your academic department, Office of Graduate and Professional Studies, and Scholarships & Financial Aid for additional funding opportunities to go abroad.

**Student Options Abroad**

**Study Abroad Programs Office**

[http://studyabroad.tamu.edu/](http://studyabroad.tamu.edu/)

There is an increasing need for qualified individuals who have first-hand intercultural experiences and global awareness. Many graduate and professional students pursue careers in academic, managerial or administrative positions that benefit from conducting research, attending conferences, working, living or studying abroad.

Regardless of the type or length of activity abroad, the Study Abroad Programs Office can assist graduate and professional students with pre-trip logistics, health insurance, obtaining passports, crisis management abroad, scholarships, and many other related matters. Faculty members who are interested in learning more about facilitating international opportunities for students, should contact the Study Abroad Programs Office at studyabroad@tamu.edu.

**University Locations Abroad**

**The Soltis Center for Research and Education in Costa Rica**

[http://soltiscentercostarica.tamu.edu/](http://soltiscentercostarica.tamu.edu/)

The Soltis Center for Research and Education in north-central Costa Rica was established in January 2009 to support research, education and outreach in Costa Rica and throughout Central America. The Center is located in San Juan de San Isidro de Pénas Blancas, about three hours northwest of San Jose. The modern facilities of the Center include dorms, a cafeteria, wet and dry labs, classrooms, a videoconference room and multiple use areas. The Center provides students and faculty with access to more than 250 acres of primary and second growth forests with an experimental watershed complete with a meteorological station, a canopy tower and weir dam. The Center is adjacent to more than 50,000 hectares of protected forest in the Children’s Eternal Rainforest and the Monteverde Conservation Area. The Zona Protectora Arenal-Monteverde extends to the Center through a forest corridor that descends in elevation from 1,800 meters at Monteverde to 450 meters above sea level at the Center. This natural reserve has four major tropical life zones and includes more than 3,000 species of vascular plants and more than 400 species of resident and migratory birds. At the regional level, the Center is located in the heart of the Peñas Blancas River Watershed, which extends over 40,000 hectares that transition from rainforest in the highlands to pastures and agricultural crops below the Center. The unique physical and cultural setting of the center provides students and faculty with research and educational opportunities in tropical ecology, civil engineering, ecosystem sciences, geosciences, public and rural health and agricultural economics.
Ombuds Services for Graduate Education

Ombuds Services for Graduate Education

The Ombuds Officer serves as an informal, neutral and confidential resource for graduate and professional students to discuss questions and concerns related to their graduate experience. The university is a large and complex institution and graduate and professional students often play multiple roles (e.g., student, research collaborator, teacher, technician, peer). Misunderstandings and conflicts can arise in any one of these roles. Having a safe, off-the-record conversation with an Ombuds Officer can be a first step if you do not know where to turn. The Ombuds Officer is here to help graduate and professional students identify options for addressing concerns and will promote a fair and impartial process for all parties involved.

The Graduate and Professional Student Ombuds Officer is guided and informed by the Code of Ethics and Standards of Practice of the International Ombudsman Association.

The Ombuds Officer can:

- Listen and help you achieve a greater understanding of the problem.
- Help you find information applicable to your situation and identify possible solutions to your problem.
- Explain University policies and procedures and how they apply to your specific case.
- Help you identify options for resolving conflicts with colleagues, staff, faculty, and advisors.
- Help you achieve fair and equitable solutions to problems.
- Facilitate communication among people in conflict.
- Provide other types of assistance to help you resolve a problem informally.
- Refer you to formal grievance or appeal procedures if you wish to engage in a formal process.

Contact information for Ombuds Services:

Office of Graduate and Professional Studies
ombuds@tamu.edu
http://ogaps.tamu.edu/
General Information

Educational expenses for the months of enrollment will vary according to course of study. For details on the basic budget for a particular graduate or professional program, please visit http://financialaid.tamu.edu. Scholarships and Financial Aid considers tuition and fees, books and supplies, transportation, room and board, incidental and living expenses in the cost of attendance for programs. All tuition and fee amounts provided herein represent the most accurate figures available at the time of publication and are subject to change without notice. University Rules in place at the time of publishing are reflected here. All are subject to change. The most current information available will be maintained on the Student Business Services website http://sbs.tamu.edu.

Payment of Tuition and Fees

A student must meet all financial obligations to the University by the due dates to avoid late penalties. Failure to pay amounts owed may result in cancellation of the student's registration and being barred from future enrollment and receiving official transcripts. A student who wishes to pay fees in installments can select the option on the website http://howdy.tamu.edu. The Emergency Tuition and Fees Loan is available to help students pay their Texas A&M University tuition and required fees. The Emergency Tuition and Fees Loans are for required tuition and fees only. The online process can be accessed at http://financialaid.tamu.edu.

Obligation to Pay Tuition, Required Fees, Other Fees and Charges for Optional Services

By registering for classes, a student agrees to pay all tuition and required fees associated with his/her registration, optional services and other fees, whether paying in full or utilizing the installment payment option. Failure to pay tuition, fees and other charges may result in penalties, late registration fees, and/or possible cancellation of classes.

Financial Obligation for Graduating Students

According to Texas A&M University Student Rules and Chapter § 54.007 (d) of the Texas Education Code, all financial obligations to the University must be paid by the end of the semester. Failure to settle all financial obligations will result in withholding a student's diploma at graduation. Additionally, a block will be placed on the student's account which will prohibit registration in subsequent semesters and receipt of official transcripts.

Citations:

Section 14.15 of the Texas A&M University Rules states, "The student must have settled all financial obligations to the University."

Chapter § 54.007 (d) of the Texas Education Code states, "A student who fails to make full payment of tuition and fees, including any incidental fees, by the due date may be prohibited from registering for classes until full payment is made. A student who fails to make full payment prior to the end of the semester or term may be denied credit for the work done that semester or term."

Scholarships, Grants and Loans

All scholarships, grants and loans are applied to any outstanding charges before installments are calculated.

Installments

Tuition, most required fees, room, board and parking are payable in full, or in four equal installments. A $15 per semester service charge to cover the cost of handling will be assessed to each student who chooses to use the installment plan. The service charge is not refundable once a payment is made under the installment plan or after the first installment due date.

Cancelling Your Registration

Once a student has registered for classes, he/she must select one course of action from the following to remain in good standing with the University:

- pay all amounts due by the specified due date;
- prior to the first day of classes, use the online registration system to drop all classes; or
- after the first day of classes, use the online withdrawal system to request official withdraw from the University; withdrawals must be approved through his/her college Dean’s office

Following this procedure is especially important for a student who has been awarded scholarships or financial aid since the aid may automatically pay tuition and fees and cause the registration to be held even though the student has decided not to attend. Failure to drop all classes or withdraw from unwanted registration may result in grades of F or I in all courses for the semester. The student will be required to reimburse the University for scholarships and other financial aid applied to his or her account and will be held responsible for paying all fees for the semester, regardless of whether he or she attended classes.

Cancellation for Nonpayment of Tuition or Fees

The University reserves the right to cancel a registration not paid by the due date, or the official census date for a semester or summer term, to comply with state laws requiring payment of tuition and fees, to free the classroom spaces for other students, and to ensure the most efficient use of University resources.

1. Distance Education Instruction: This group includes traditional off-campus classes, all university centers and telecommunications, video and other nontraditional Distance Education Instruction delivery models.
2. In Absentia: The traditional student who is performing individual research or completing degree requirements that do not require classroom instruction.
3. Cooperative Registration: Students participating in the Cooperative Education Program at Texas A&M University.
4. Texas A&M University Graduate Students–Galveston: Texas A&M graduate students who enrolled at College Station, but who are taking courses exclusively at Galveston.
5. Study Abroad: Students participating in the Texas A&M University Study Abroad Program.

### Payment Methods

Texas A&M utilizes online statements and electronic payments in its efforts to provide timely financial information to students and to control costs. Student account payment options include:

#### Electronic/Online

Students can view their account and make online payments using E-Checks, American Express, Discover Card or MasterCard by selecting “Pay Bill/Manage Account” on the My Finances tab in the Howdy portal. Payments made with credit cards will incur a convenience fee charged at the time of payment. Payments made with credit cards will incur a 2.25% convenience fee minimum charge of $3.00. Additional forms of payment accepted include: personal check, cashier’s check, wire transfer and Pin Debit. (Please Note: Once an online payment transaction has occurred, the convenience fee is non-refundable).

### Paper

- Checks – Students may still use paper checks for payments. The University reserves the right to utilize check conversion technology to convert paper checks into electronic format.
- Cashier checks
- Money orders

### Cash

- Cash is not accepted.

Any payment that is rejected for payment by the paying bank, credit card company or other financial institution is subject to returned item charges of $30 or more. Rejected payments may also result in cancellation of the student’s registration and additional late registration penalties if the student is required to re-register on or after the first day of classes.

### Penalties and Late Registration Fees

#### Late Payment Penalty

Severe penalties occur for failure to pay student account balances and installments by the specified due dates. If a payment is delinquent when a semester ends, the student will be blocked and may not receive credit for academic work performed. A student will not be readmitted to the University until all past due balances, including late charges, are paid. A late fee of $25 for Texas A&M students and $50 for HSC students will be assessed for each payment not received before it is due. If a student is removed from the rolls of the University or is withdrawn for failure to pay amounts owed the University, a reinstatement fee of $50 for Texas A&M students and $150 for HSC students will be assessed in addition to any other late fees or penalties already incurred and must be paid before the student will be reinstated.

#### Late Registration Fees

A student who registers on or after the first day of classes is assessed a late registration fee of $100 for Texas A&M students and $200 for HSC students. A student who registers after the official census date (12th class day for fall or spring and 4th class day for summer) is assessed a late registration fee of $200 for Texas A&M students and $250 for HSC students. A student who adds classes after the official census date is assessed a late add fee of $50 for Texas A&M students and $100 for HSC students. Note: Penalties, late registration and late add fees also apply to a student who is required to re-enroll because his/her registration was canceled for nonpayment.

### Use of Collection Agencies and Credit Bureau

If amounts become past due, the University reserves the right to report the account to the Credit Bureau. This will also initiate internal collection efforts and could cause the University to employ an outside collection agency to recover the debt. If any collection efforts must be made, the student will be required to pay all collection costs, including collection agency fees, legal fees and other costs incurred in collecting the amounts due.
Financial Assistance

Assistantships

- A graduate assistantship, teaching (GAT), research (GAR), and non-teaching (GANT), is available to a qualified student on a competitive basis. Students holding graduate assistantships work an average of 20 hours per week. Most assistantships are awarded through the applicant’s academic department. An applicant should contact the department head or graduate advisor concerning the availability of assistantships. The Student Employment Office posts assistantship opportunities via Jobs for Aggies.

- A graduate student (domestic or international) must register for the appropriate number of University semester credit hours to maintain full-time status during any semester (9 hours for spring and fall) or summer term (6 hours in any combination) in which they hold an assistantship. Colleges and departments may impose additional semester credit hour requirements for a student holding an assistantship which exceeds the minimum stated above.

- According to Texas Education Code, Sec. 54.212, a teaching assistant or research assistant of any institution of higher education and the spouse and children of such a teaching assistant or research assistant are entitled to register in a state institution of higher education by paying the tuition fees and other charges required for Texas residents under Section 54.051 of this code, without regard to the length of time the assistant has resided in Texas, if the assistant is employed at least one-half time in a teaching or research assistant position which relates to the assistant's degree program under rules and regulations established by the employer institution. Transferred and re-designated from Education Code, Section 54.063 by Acts 2011, 82nd Leg., R.S., Ch. 359, Sec. 1, eff. January 1, 2012.

- Termination of a student’s employment (voluntary or involuntary) during the semester may result in revocation of the non-resident waiver, recalculation of tuition at the nonresident or international rate, and immediate payment of the tuition due.

- Employment must be for the entire semester in which the student is enrolled and actual paid work must commence on or before the official census date for the term (12th class day for fall and spring, 4th class day for summer), to be eligible for a nonresident tuition waiver.

- Terms used to describe qualifying positions are intended to indicate an academic position, not a position title.

- Volunteer or unpaid work does not constitute employment.

- Student worker positions do not qualify for non-resident tuition waivers.

Fellowships

Ordinarily, graduate students holding fellowships are not required to perform any services. Therefore, a fellowship holder is not considered an employee and FICA regulations do not apply. A graduate student (domestic or international) holding a fellowship administered through the Office of Graduate and Professional Studies may concurrently hold an assistantship requiring service of 20 hours per week. A graduate student concurrently holding a fellowship with a one-quarter time assistantship normally has the same registration requirements as a student holding a one-half time assistantship.

Many competitive fellowships of $1,000 or greater per academic year also allow students to pay tuition at the in-state rate. Fellowships packages vary from $1,000 to over $30,000, and some include funds for insurance, tuition, and fees.

Scholarships & Financial Aid

The mission of Scholarships & Financial Aid is to provide students with information and financial resources to attend Texas A&M University, along with support programs that promote higher education and developmental opportunities. As a part of this commitment, we strive to provide financial solutions to students at all income levels and with varying academic, merit and leadership qualifications.

The need-based financial assistance program is designed for all students who have a demonstrated financial need, as defined by the Free Application for Federal Student Aid (FAFSA), in order to assist the student in paying college expenses. All financial aid is contingent upon student enrollment and making Satisfactory Academic Progress (SAP), as defined by Scholarships & Financial Aid or the specific aid program.

Financial aid has two forms: gift aid and self-help.

<table>
<thead>
<tr>
<th>Gift Aid</th>
<th>Self-Help</th>
</tr>
</thead>
<tbody>
<tr>
<td>Grants (Federal, State, Institutional)</td>
<td>Loans (Federal, State, Institutional Alternative)</td>

<td>Student Employment (Work Study, Part-time Employment, Internships, Assistantships)</td>
</tr>
<tr>
<td>Non-resident Tuition Waivers</td>
<td></td>
</tr>
</tbody>
</table>

Texas A&M University’s packaging philosophy for need-based financial aid is to provide the greatest amount of gift aid to those students with the highest demonstrated need and to keep loan liability to a minimum. Financial aid is awarded on a first-come, first-served basis with a published priority date of March 15 prior to the fall semester for which the student is seeking aid. Financial aid offers are made based on the assumption that students will enroll full-time in the fall and spring semesters. Cost of attendance and awards will be adjusted for graduate and professional students who are enrolled less than full-time at Texas A&M University (as defined by academic program/level).

To apply for financial assistance, a student must submit a FAFSA. Students are encouraged to submit their FAFSA on the Internet at https://fafsa.ed.gov as soon as possible. Only those students who have been accepted for enrollment and whose FAFSA results and other documents requested by Scholarships & Financial Aid are on file will be sent a financial aid offer. Financial aid offers will be sent beginning in June for the following academic year. Summer financial assistance is offered to students with a FAFSA on file who enroll in summer coursework at Texas A&M.

The FAFSA is available via the Internet at https://fafsa.ed.gov, most college or university student financial aid offices or by contacting:
Scholarships & Financial Aid
Texas A&M University
P. O. Box 30016
College Station, TX 77842-3016
(979) 845-3236
financialaid@tamu.edu
FAFSA School Code 003632

Please visit our website (http://financialaid.tamu.edu) for the most current information on programs and any associated deadlines.

Loan Programs
The Federal Direct Loan Programs are available to students who have submitted a FAFSA. Students will be notified of their eligibility for the Direct Loan program(s) through a financial aid offer.

Graduate and professional students seeking the Federal Direct Graduate PLUS (Grad PLUS) Loan may obtain information from our website (http://financialaid.tamu.edu). This program also requires the FAFSA to be on file with Scholarships & Financial Aid.

Short-term loans are available to provide assistance to students who experience temporary financial difficulties with educationally related expenses. Funding for this program is provided by The Association of Former Students, the Class of 1926 and other University resources. This program is not intended to provide long-term assistance or to replace other assistance available through Scholarships & Financial Aid. Students must be degree-seeking and enrolled at least half-time to be eligible for short-term loans.

The Emergency Tuition and Required Fees loan program is available to help students pay their Texas A&M University tuition and required fees. The loan is applied directly to the student’s tuition and fee account.

Please refer to our website (http://financialaid.tamu.edu) for detailed information on all of the aforementioned programs and more.

Scholarships
Continuing Student Scholarships
The Continuing Student Academic Excellence Award application is available to students with at least one semester completed at Texas A&M. Awards range in value from $500 to $1,500 and are available to undergraduate, graduate, and professional students currently enrolled at Texas A&M. Some awards are limited to certain fields of study and to individuals who have attained a necessary academic classification, while others are unrestricted. Awards are made to outstanding students based on a combination of academic achievement, campus/community involvement, campus leadership roles, and, for some scholarships, financial need. In addition to scholarships offered through the Scholarships & Financial Aid office, many colleges, departments, the Corps of Cadets, and the Texas A&M Foundation use the Continuing Student Academic Excellence application for award consideration. Students are encouraged to complete the Continuing Student Scholarship Application, beginning in October via the scholarships website. The deadline for submitting applications is February 1, prior to the academic year for which the student will be awarded.

Scholarship Recipients and Non-Resident Tuition Waivers
A student who is awarded a competitive University scholarship of at least $1,000 for the academic year or summer for which the student is enrolled and who is either a non-resident or a citizen of a country other than the United States of America may be entitled to pay the fees and charges required of Texas residents without regard to the length of time the student has resided in Texas. This scholarship must be awarded by a scholarship committee officially recognized by the Texas A&M University administration, and each waiver must be approved. For applicable recipients, selective service registration is required.

Other Scholarship Information
Students are encouraged to contact their college and major department for additional scholarship opportunities. Additionally, Scholarships & Financial Aid has information regarding scholarship resources available online.

Address requests for additional information to:
Texas A&M University
Scholarships & Financial Aid
P. O. Box 30016
College Station, TX 77842-3016
(979) 845-3236
scholarships@tamu.edu

Student Part-Time Employment
In addition to the assistantships and fellowships offered by academic departments and coordinated by OGAPS, the Student Employment Office in Scholarships & Financial Aid coordinates student part-time employment, both off- and on-campus in the Bryan/College Station area. Students may visit the online job database, Work Study, assistantships and other part-time positions are posted. Students secure their own employment through job leads provided by Scholarships & Financial Aid or through their own initiative.

On-campus student employees are paid minimum wage or higher and are paid bi-weekly along with regular University employees. University student employees are not eligible for paid holidays, retirement, vacation, nor sick leave.

Professional development workshops are also available for student employees and supervisors of student employees. These free workshops include topics ranging from communication skills to preventing sexual harassment in the workplace and from customer service to workplace etiquette. For more information or to register, please visit the Jobs for Aggies (http://jobsforaggies.tamu.edu) website or call (979) 845-0686.

Financial Literacy
The Money Wise Aggie, Texas A&M University’s personal finance advising and educational program, is designed to help students make smart personal finance decisions while pursuing their academic degrees and to lay a foundation for financial success throughout life.

The Money Wise Aggie is a free service to students that provides personal advising and presentations in the following areas:

- Money Management
- Credit Cards and Credit Scores
- Premarital Money Discussions
- Financial Challenges After College
- Debt Reduction Strategies
- Identity Theft
- Financial Aid
- Student Loan Repayment
• Saving and Investing
• Major Purchases (Cars and Homes)

Advisors participating in The Money Wise Aggie program are financial aid advisors who have been awarded the Accredited Financial Counselor™ or Certified Financial Planner™ designations. Each advisor provides objective, unbiased advice to help students make informed decisions about their finances. Advisors also provide scheduled presentations on-campus throughout the semester, as well as presentations to organizations upon request. Individual student advising is available by appointment. For more information, please visit the Money Wise Aggie website.

Texas A&M Tuition and Required Fees

All rates are the most current available at the time of printing and are subject to change.

Tuition—Residents of Texas

A resident student pays $240.93 per semester credit hour (includes state minimum and designated tuition).

Tuition—Nonresident and International

A non-resident and international student pays $637.92 per semester credit hour (includes state minimum and designated tuition).

Nonresident Tuition Exemption

If you have any questions concerning your eligibility for exemption from non-resident tuition, you may contact the Student Business Services at (979) 847-3337 or your department.

University Advancement Fee

The University Advancement Fee is a required fee charged to all Texas A&M University students. It is assessed at a rate of $240.02 for the first hour plus $83.27 per additional hour ($158.71 for the first hour plus $80.33 per additional hour for a 5-week summer term.) The University Advancement fee funds services such as advising, the Career Center, Writing Center, technology and libraries as well as administrative services such as ID services, the campus bus system, billing and refunds, access for students to discounted software and many of the services provided through the Division of Student Affairs.

Distance Education Administration Fee

This $30 per semester credit hour administrative fee is assessed to Non-Funded Out-of-State students taking distance education courses.

Distance Education Tuition & Fees

A student registering for distance education courses will be assessed Distance Education Differential Tuition per hour based on the course(s) being taken. Each course has a different Distance Education Differential Tuition based on the fees associated with that program. An administrative fee of $30 per hour and a Distance Education Teaching Fee of $577.55 per hour are assessed for those non-resident students taking distance education courses outside the State of Texas.

Distance Education Differential Tuition

The rate to be charged for distance education courses will range from a minimum of $40/SCH to a maximum of $550/SCH. Each academic department will have an individual rate that will be approved annually by the President of Texas A&M University. The following are the initial rates (only departments above the $40 minimum rate are listed):

Field Trip Fees
Field trip fees are assessed to cover the cost of providing trips and vary depending on the course taken and expected expenses.

Health Center Fee
This $72.50 per semester fee ($25 for a 5-week summer term) is required of all students for the purpose of operating, maintaining and equipping the University Health Center and entitles the student to its services. These services do not include surgical operations or charges for consultations with outside physicians requested by parents.

Identification Card (Aggie Card) Fee
Every student is required to have a student ID card. An ID card is permanent and a student is responsible for maintaining a working ID throughout his/her career at the University. The Aggie Card is used for residence hall access, registration, fee collection, financial aid disbursement, dining halls, athletic event and recreational sports admission and library privileges. Replacement ID cards are $12.

A student who loses his/her IDs should report the loss immediately online at https://myaggiecard.tamu.edu/ and deactivate the card or contact:

Student Business Services
Aggie Card Office
General Services Complex
(979) 845-4661
24 hours a day, seven days a week

International Student Fee
This $46 fee is required of all students who are not U.S. citizens or who are not U.S. lawful permanent residents to offset the cost of specialized services International Student Services provides to these students, such as immigration advising, certificate of eligibility document issuance (I-20/DS-2019), verification and monitoring of legal status, status changes, extensions of social/academic adjustment, administration of special scholarships and programs for these students.

International Orientation Fee
This $35 fee is a one-time charge to all students who are not U.S. citizens or who are not U.S. lawful permanent residents to offset the cost of orientation programming. Designed especially for international students, this orientation does not duplicate other graduate student orientation programs.

Laboratory Fees
The University is required to assess and collect a laboratory fee not to exceed $30 for each laboratory course to cover in general the cost of laboratory materials and supplies used by a student.

Late Penalties
A student who fails to pay fees and installments when due is assessed a $25 late payment fee for each payment or installment paid late.

Late Registration/Add Penalties
- A student who registers on or after the first day of classes, but before the 13th day of classes is assessed a $100 late registration fee.
- A student who registers after the 12th class day is assessed a $200 late registration penalty.
- A student who adds classes after the 12th class day that result in a net increase in hours enrolled is assessed a $50 late add fee.

Recreational Sports Fee
This $106.00 per semester fee ($53 for a 5-week summer term and $106 for a 10-week summer semester) is assessed to all students attending the University for use of the recreational sports center.

Reinstatement Fee
A student who fails to pay all fees by the last day of the semester will be administratively withdrawn from the University and charged a $50 reinstatement fee.

Student Center Complex Fee
This $100 fee ($50 for a 5-week summer term and $100 for a 10-week summer semester) is required of all students for operating, maintaining, improving and equipping the Student Center Complex.

HSC Tuition and Required Fees
Texas A&M University Health Science Center tuition and fees are approved by The Texas A&M University System Board of Regents within guidelines established by the Texas Legislature. Fees are subject to change by the Board of Regents.

Additional information regarding the HSC Student Business Services Office and its services may be found online at http://tamhsc.edu/education/student/index.html.

HSC Student Business Services may be reached at 979-847-3337 or at sbs@tamu.edu.

Optional Campus Services
Installment Payment Option
A student who chooses to pay using the four-payment installment plan pays a $15 installment payment service charge. This charge is non-refundable once a payment has been made. You may add the installment
plan by selecting the installment option through the online registration system at https://howdy.tamu.edu.

**Aggie Bucks Unlimited**

Show your Aggie Pride with the Aggie Bucks Unlimited debit card, designed just for the Texas A&M University community. Cardholders can make purchases everywhere Visa® debit cards are accepted—on campus and worldwide—and access their cash for free at more than 12,000 Wells Fargo® and Wachovia® ATMs, including 15 in Bryan-College Station. Plus, students can use the Aggie Bucks Unlimited debit card for the fastest available access to their financial aid or other refunds from the University when they sign up for Direct Deposit to a Wells Fargo checking or savings account. To get the card, speak to a Wells Fargo Banker at your New Student Conference or visit any of the six banking locations in Bryan-College Station, including the Wells Fargo Service Center in the General Services Complex on campus.

**Athletic Events**

**Maroon and White Football Packages**
- Student tickets for four home football games (fall only) $150
- All Sports (with football) Student tickets for all fall and spring home sports $290

For more information, please go to http://mysportspass.tamu.edu.

**Bus Service**

Fare-free off-campus shuttle bus service is provided to all students that present a valid student ID. Fare-free on-campus shuttle bus service is also provided to all students. For more information about routes, visit the Transportation Services website at http://mysportspass.tamu.edu.

**Campus Dining**

For Dining Plan rates, please access the University Dining webpage at http://dineoncampus.com, and click on Dining Plans. Please note that University Dining follows the University Tuition and Fee Adjustment schedule.

Freshmen (classified as U1s with less than 30 hours of college credit when they initially apply to live on campus) will be required to have a minimum dining plan for the full academic year (or remainder of the academic year for those that apply for housing after the beginning of the fall semester).

All Corps of Cadets members are required to have a dining plan, as designated by the Office of the Commandant.

Fees for the selected meal plan will be added to your TAMU student fee. They are NOT paid with the housing application fee and deposit.

You have the option to select a Dining Plan.

Dining Plans are designed to be flexible for an array of lifestyles and appetites.

The cash amount of the dining plan you select will be linked to your student ID card as Dining Dollars and can be used in all University Dining kiosks, coffee shops, food courts and dining centers. Each purchase is automatically deducted from your account balance—just like debit card.

You will receive a 10% discount on all Dining brand purchases and a reduced meal price at the all-you-care-to-eat dining centers on campus.

You are allowed to rollover your Dining Dollars each semester with the purchase of a dining plan (within the academic year).

Dining Dollars are only accepted on campus, assuring parents and guardians that this money is spent only on food and beverages.

Dining plan prices include tax; please note that Dining Dollars are not the same as Aggie Bucks.

**Housing**

Housing in residence halls may not be available for graduate students except during summer school. Summer school housing information is normally available in early March. However, many graduate students request to live in our University apartments all year long. For more information, please visit http://reslife.tamu.edu/apartments.

For more information please contact:

University Apartments
Department of Residence Life
Texas A&M University
3365 TAMU
College Station, TX 77843-3365
(979) 845-2261
Fax (979) 862-2605
university-apartments@tamu.edu
http://reslife.tamu.edu

For summer school housing please contact:

Housing Assignments Office
Department of Residence Life
Texas A&M University
1258 TAMU
College Station, TX 77843-1258
(979) 862-4744 or 1-888-451-3896
Fax (979) 862-3122

http://reslife.tamu.edu

**Parking Permit**

All vehicles parked on the Texas A&M University campus are required to have a parking permit, unless they are parked in a pay visitor area. Permits may be requested online at http://transport.tamu.edu/. Costs of permits are currently as follows, but are subject to change. For more information, visit the Transportation Services website at http://transport.tamu.edu/.

| Student Parking Permit including West Campus Garage (12-month permit) | $283 |
| Night Permit | $91 |
| Garage Non-Reserved Space | $457 |
| Motorcycle Permit including mopeds and scooters | $91 |

**Student Directory**

The cost is $4.00 and includes sales tax.
Tuition, Fees and Other Financial Information

Yearbook
The cost is $81.19 including shipping and sales tax.

Fees for Other Special Items or Services

Application Fees
Graduate: $50; Undergraduate: $75; International: $90.

Cooperative Education Fee
A fee of $75 is charged to all students participating in domestic or international Cooperative Education programs.

Diploma Fee
A non-refundable fee of $47.50 per degree sought is assessed the semester a student applies for graduation. This fee is payable each time a student applies for graduation. A late fee of $50, in addition to the diploma fee, is charged to those who apply for graduation after the set deadline.

Independent International Study Fee
The $100 fee covers services provided by Study Abroad Programs associated with students who elect to go abroad and transfer credit back to Texas A&M. Such services include advising students and departments on key issues and procedures before, during and after programs abroad; overseeing transfer credit paperwork; maintaining library and computer resources for those who want to pursue independent opportunities abroad; and overseeing issues related to affiliated programs abroad and emergency services to assist students as needed.

International Student Health Insurance
International students (students who are not U.S. citizens or Lawful Permanent Residents of the United States) enrolled at Texas A&M are required to have health insurance. International students will be automatically enrolled in and charged for the System Student Health Insurance Plan (SSHIP) unless they apply for, and are granted, a waiver. Individually purchased plans from vendors other than the Texas A&M University System provider will not be eligible for a waiver of automatic enrollment in the SSHIP. This is to ensure that medical treatment will be available in the event of injury or illness during enrollment at the University. This requirement includes students enrolled in extensive English language programs. Full-time English Language Institute (ELI) students should contact ELI for information about this requirement. All other International students can receive more detailed information about this requirement by visiting the website at http://iss.tamu.edu. Specific questions may be directed to International Student Services by emailing healthinsurance@tamu.edu.

Bush School Graduate Program Fee
The fee structure is $1,282.28 per semester to new admits, $1,258 (entering prior to 2015).

Master of Real Estate Program Fee
The fee structure is $2,000 per semester for each fall and spring semester. It will be used to further enhance the MRE program through the support of career services, student advising, curriculum development, and enrichment experiences.

Mays MBA Program Fee
The fee structure is $8,000 per semester to new admits, $6,424 (entering in 2013-2014), $5,424 (entering in 2010), $5,000 (entering in 2011), $4,000 (entering in 2009-2010). The fee is used to support the MBA Program office, Graduate Business Career Services, and the various activities of the Mays MBA Program.

Mays Masters’ Program Fee
The fee structure is $2,000 per semester to new admits, $1,700 (entering in 2013), $700 (entering in 2009-2012) for each fall and spring semester and $200 for each five week summer session. The fee supports the Graduate Business Career Services office and other placement and admission resources for Mays Masters students.

Master of Agribusiness Program Fee
The fee structure is $1,000 for each fall and spring. This fee supports all activities surrounding the Master of Agribusiness degree.

Master of Science in Economics Program Fee
The fee structure is $3,000 per semester for new admits, $2,000 (entering prior to 2015). This fee supports all activities surrounding the Master of Science in Economics degree.

College of Architecture Graduate Program Fee
The fee structure is $1,440.27 per semester for new admits, $1,413 (entering prior to 2015). The program fee will be applied to full-time College of Architecture graduate students enrolled for nine credit hours or more at Texas A&M University. The program will be pro-rated for part-time students. The fee will be charged for each of the colleges graduate degree programs.

Masters of Industrial Distribution Program Fee
The fee structure is $10,000 per year for new admits, $1,800/course (entering prior to 2015). This fee is used to support all program materials, residency week, Global Distribution Program, Capstone Project and Graduation as well as a program specialist to support the planning and logistics of all activities.

Master of Science Analytics Program Fee
The fee structure is $25,000 per year to support the program.

Law School Program Fee
The fee structure for full-time students taking 13-16 hours is $33,092.00 and for part-time students taking 9-12 hours is $24,069.00. Students taking 1-8 hours will be charged $1,472.00 for the first hour and $1,040.00 per additional hour. There will be an additional hourly charge for students taking more than 16 hours.
New Graduate Student Fee
A non-refundable new graduate student fee of $50 is charged to all new graduate students. This fee is assessed the first semester the student is registered.

Professional Program in Biotechnology Program Fee
This fee is $530 per semester.

Sponsored International Students
An administrative fee not to exceed $500 per semester or summer term (all or part thereof) will be required to support international sponsored students whose programs are coordinated through the Sponsoring Student Programs Office, unless these fees are waived as part of negotiated contractual agreements.

Thesis/Dissertation/Record of Study Fee (Processing Fee)
This fee includes the review, processing and archiving of each thesis/dissertation/record of study, along with other services provided by Thesis and Dissertation Services. Archival formats include microfilm or digital storage. The fee does not include binding of personal copies. Information on binding personal copies is available on the OGAPS website (http://ogaps.tamu.edu) in the applicable thesis/dissertation/record of study section.

Masters fee: $110, Doctoral fee: $170

Deposits

General Deposit
Every student must make a $100 deposit to protect the University from damage to or loss of University property. Failure to pay promptly will cause the student to be barred from re-admission and receiving an official transcript from the University. This deposit, less outstanding charges, will be returned upon the student graduating or withdrawing from school. Students leaving the University without graduating or withdrawing are subject to forfeiture of their property deposit refund if a request for the refund has not been received by Student Business Services. Deposits not refunded within four years from date of last attendance will be forfeited into a student deposit scholarship account.

Room Deposit
A deposit of $300 and a nonrefundable $50 application fee are required to apply for a room in a residence hall or one of our university apartments. The deposit will be retained to offset charges for damages or late cancellation, or to keep the application on an active waiting list. A reservation may be canceled and the deposit refunded upon request prior to signing a housing contract. After a housing contract has been signed for the next academic year, deposits are not refunded. Cancellations after the student has been assigned are subject to additional penalties.

College of Business Administration Masters Enrollment Deposit
The College of Business Administration requires a Masters enrollment deposit of $500, which is applied to first semester registration charges for students who complete enrollment. Deposit is forfeited for students who fail to enroll for classes.

Mays MIS Enrollment Deposit
Mays Business School requires a deposit of $500, which is applied to first semester registration charges for students who complete enrollment. Deposit is forfeited for students who fail to enroll for classes.

Refund Policy

Fee Adjustments for Courses Added and Dropped
A student may drop courses during the first five days of a fall or spring semester. Students also may drop classes with special permission of the dean between the 6th and 12th class days. Full refunds will be given for courses dropped during these periods. Refunds will not be issued for classes dropped after the 12th class day. As of the first day of the semester, a student may not drop all of his/her courses through the drop/add process, but instead must go to the office of his/her dean to officially withdraw. A student may add courses during the first five days of a fall or spring semester.

Withdrawal from the University
The federal government mandates that a student who officially and unofficially withdraws from all classes may only keep the financial assistance they have “earned” up to the time of withdrawal. Documentation for a student who unofficially withdraws from the University may be required. Title IV funds that were disbursed in excess of the earned amount must be returned by the University and/or the student financial aid programs. This situation could result in the student owing funds to the University, government or both. Scholarships & Financial Aid will also calculate a return of funds for state programs.

To determine the amount of aid the student has earned up to the time of withdrawal, Scholarships & Financial Aid will divide the number of calendar days the student attended classes by the total number of calendar days in the semester (less any scheduled breaks of five days or more). The resulting percentage is then multiplied by the total federal funds that were disbursed (either to the student’s University account or to the student directly by check or direct deposit) for the semester. This calculation determines the amount of aid earned by the student, which he or she may keep (for example, if the student attended 25 percent of the term, the student will have earned 25 percent of the aid disbursed). The unearned amount (total aid disbursed less the earned amount) must be returned. Scholarships & Financial Aid will notify and provide instructions to students who are required to return funds. In most cases, students who complete 60 percent of the semester are eligible for all of the financial aid disbursed to them.

Allocating Returned Title IV (Federal Aid)
Funds that are returned to the federal government are used to reduce the outstanding balances in individual federal programs.

Financial aid returned (by the University and/or the student or parent) must be allocated in the following order:
1. Unsubsidized Federal Direct Loan
2. Subsidized Federal Direct Loan
3. Federal Perkins Loan
Rent and Meal Plans.

Following refund schedule: Tuition and Required Fees, Residence Hall Rent/Deposit of refunds.

According to federal law, the university is required to return Title IV funds that have not been claimed (i.e., refund check that has not been cashed) within 240 days of issue. These funds will be returned to the appropriate federal financial aid program.

A student athlete should see his/her academic advisor in the Athletic Department before initiating the withdrawal process.

Refund Delivery

Texas A&M and Wells Fargo Bank have joined forces to deliver financial aid and other refunds to students faster through the University’s refund delivery process. You will receive information from Wells Fargo and the University at your new student conference and in your official University email account, which will explain the process for signing up for direct deposit of refunds.

Unclaimed Refunds

According to federal law, the university is required to return Title IV funds that have not been claimed (i.e., refund check that has not been cashed) within 240 days of issue. These funds will be returned to the appropriate federal financial aid program.

Tuition and Fee Adjustments

Tuition and fee adjustments shall be made to a student officially withdrawing from the University for charges listed below according to the following refund schedule: Tuition and Required Fees, Residence Hall Rent and Meal Plans.

1. If the student withdraws during a fall or spring semester or a summer term of 10 weeks or longer:
   - Prior to the first day of class: 100%
   - During the first five class days: 80%
   - During the second five class days: 70%
   - During the third five class days: 50%
   - During the fourth five class days: 25%
   - After the fourth five class days: None

2. If the student withdraws during a term or session of more than five weeks but less than 10 weeks:
   - Prior to the first day of class: 100%
   - During the first, second, or third class day: 80%
   - During the fourth, fifth, or sixth class day: 50%
   - Seventh day of class and thereafter: None

3. If the student withdraws from a term or session of five weeks or less:
   - Prior to the first day of class: 100%
   - During the first class day: 80%
   - During the second class day: 50%
   - During the third class day or thereafter: None

Residence Hall Rent/Deposit

If a student withdraws, moves off campus or in any other way terminates the housing contract, a refund of residence hall rent may be made according to the housing contract. Any changes to the rent refund schedule will be detailed in the housing contract. If a student cancels the academic year housing contract during the contract period, the $300 deposit is subject to forfeiture and a surcharge (per the housing contract). The academic year contract period is from the time the contract is signed to the end of the fourth week of classes in the spring semester. Exceptions to this policy may be made for students who cancel their contract for the following reasons: Texas A&M University co-op or student teaching assignment, academic restriction, graduation and medical withdrawal.

University Apartment Rent

Rent at the University Apartments is paid monthly along with any applicable electricity charges. Apartment contract terms are fully enforced for the 9 1/2 or 12-month term of the contract.

Department of University Dining Dining Plans Add/Change/Drop Policies

Texas A&M University’s dining plans and options listed are based on information available at time of printing and are subject to change. University Dining follows the University’s refund schedule for Tuition and Fee Adjustments. Refunds are given on the percentage basis listed for students dropping fee options or officially withdrawing from the University.

Students may purchase a dining plan, change to a larger plan or add on to a plan during registration for classes or at any time through University Dining. Changes to a smaller dining plan or requests to cancel/drop are permitted only through the fourth week of classes. The appropriate fee is to be paid to the Office of Student Business Services or by using Touchnet.

Dining plans are valid for one semester starting with the first day of campus move-in (as designated by the Department of Residence Life) and end after finals. Check with Dining for posted dates for dining plan access. Location hours may vary during class breaks and meal availability may exclude official University holidays.

Following University policy, no one is authorized to use or borrow a student’s identification card (Aggie Card); therefore, dining plans are not transferable between students. The Aggie Card must be presented to dining cashiers for dining plan participation. If an Aggie Card becomes lost, report it immediately using the 24-hour hotline at (979) 862-4884 or contact the Aggie Card Office.

For questions and assistance, please email dining@tamu.edu (include name, UIN and instructions if dining plan related) or contact our office at (979) 845-3005. Additional information on University Dining and dining plans can be found by visiting http://www.dineoncampus.com/tamu/.
Yearbook

Yearbook charges are refundable in full during the semester in which payment is made. Thereafter, no refunds will be made on canceled orders. Yearbooks must be picked up during the academic year in which they are published. Students who will not be on campus when the yearbooks are published must pay a mailing and handling fee. Yearbooks will not be held, nor will they be mailed, without payment of the mailing and handling fee. Refunds will not be made on books not picked up within one semester of the publication date. Refunds will not be made before 21 days from the date of payment. Refund policies contained herein reflect policies in effect at the time of publication and are subject to change.

Reductions in Rates for Late Entry to the University

No reduction will be made in the charge of room rent and board in case of entrance within 10 days after the opening of a semester or summer term, nor will a refund be made in case of withdrawal during the last 10 days of a semester or summer term, or the last days for which payment is made.
Mission Statement

Texas A&M University (Texas A&M) is dedicated to the discovery, development, communication and application of knowledge in a wide range of academic and professional fields. Its mission of providing the highest quality undergraduate and graduate programs is inseparable from its mission of developing new understandings through research and creativity. It prepares students to assume roles in leadership, responsibility and service to society. Texas A&M assumes as its historic trust the maintenance of freedom of inquiry and an intellectual environment nurturing the human mind and spirit. It welcomes and seeks to serve persons of all racial, ethnic and geographic groups, women and men alike, as it addresses the needs of an increasingly diverse population and a global economy. In the 21st century, Texas A&M University seeks to assume a place of preeminence among public universities while respecting its history and traditions.

History and Development

Texas A&M University, the first public institution of higher education in Texas, opened for classes in 1876. It is now one of a select few institutions in the nation to hold land grant, sea grant and space grant designations. The University owes its origin to the Morrill Act approved by the Congress on July 2, 1862. This act provided for donation of public land to the states. The land was to be sold at auction, and the proceeds were set aside in a perpetual fund. The act directed that interest from this fund be used to support a college whose “leading object shall be, without excluding other scientific and classical studies and including military tactics, to teach such branches of learning as are related to agriculture and mechanical arts...in order to promote the liberal and practical education of the industrial classes in the several pursuits and professions in life.”

By resolution of the Legislature of the State of Texas in November 1866, Texas agreed to provide for a college under the terms of the Morrill Act, but no such institution was organized until the establishment of the Agricultural and Mechanical College of Texas by act of April 17, 1871. The same act appropriated $75,000 for the erection of buildings and bound the state to defray all expenses of the college exceeding the annual interest from the endowment. Proceeds from the sale of the 180,000 acres of land scrip received under the Land Grant College Act were invested in $174,000 of gold frontier defense bonds of Texas, forming a perpetual endowment for the institution. A commission created to locate the institution accepted the offer of 2,416 acres of land from the citizens of Brazos County in 1871, and instruction began in 1876.

In 1888, twelve years after the opening of the Agricultural and Mechanical College of Texas, the faculty initiated programs of instruction at the graduate level. In 1890, two Master of Science degrees were conferred without any indication of the specialization of the recipients. Initially, the Agricultural and Mechanical College of Texas emphasized graduate programs in agriculture and engineering which were administered by a faculty committee for graduate studies. In 1898, a single Master of Science degree in horticulture was awarded, followed by a scattering of Master of Science degrees in agriculture over the next 22 years. The acceleration in the awarding of Master of Science degrees after 1920, however, prompted the Agricultural and Mechanical College of Texas to establish the Graduate School in 1924, with the dean of the college serving as graduate dean.

In keeping with the diversified and expanded character of the institution, the 58th Legislature of Texas, on August 23, 1963, changed the name of the Agricultural and Mechanical College of Texas to Texas A&M University. With the name change to Texas A&M University, the Graduate School was designated the Graduate College. It was renamed the Office of Graduate Studies in 1987, and later the Office of Graduate and Professional Studies in 2013, and is administered by the Provost for Graduate and Professional Studies under the Division of Academic Affairs.

In 1936, the Board of Directors of the Agricultural and Mechanical College of Texas approved “certain programs of study and research leading to the doctorate.” In the same year the Academic Council of the Agricultural and Mechanical College of Texas delineated qualifications required of the faculty for participation in graduate instruction, thereby establishing the graduate faculty. The first PhD degree was awarded in 1940. In the 1960s the Board of Regents envisioned a broader role for graduate studies and implemented changes that resulted in programs of graduate instruction in all of the academic colleges throughout the University.

As the State of Texas grew, so did its land grant institution. Texas A&M now has a physical plant valued at more than $1 billion. The campus in College Station includes 5,200 acres and is one of the largest campuses of any major institution of higher education in the nation.

On September 17, 1971, the designation “sea grant college” was assigned to Texas A&M University in recognition of its achievements in oceanographic and marine resources development. Texas A&M was one of the first four institutions nationwide to achieve this distinction. Patterned after the century-old land grant idea, sea grant colleges are federal-state partnerships for furthering marine work through practical research, education and advisory services. The designation clearly establishes the University’s leadership relative to marine affairs of the state.

Texas A&M added a third special designation to its credentials on August 31, 1989, when it was named a “space grant college.” This new designation, bestowed by the National Aeronautics and Space Administration, came to the University based on its continuing commitment to space research and its participation in the Texas Space Grant Consortium, a group of 24 higher education institutions, 22 corporations, two non-profit groups and three state agencies under the leadership of Texas A&M University and The University of Texas at Austin.

In addition to its traditional strengths in agriculture and engineering, Texas A&M has established itself as a leader in many newer technological areas such as the space, nuclear, computer, biotechnological, oceanographic and marine resources fields. It also has placed added emphasis on the arts and sciences and business, and continues to enhance its prominent role in these fields.

A mandatory military component was a part of the Land Grant designation until the 1950s, and the Corps of Cadets has played an important part in the history and development of Texas A&M. Even though membership in the Corps of Cadets became voluntary in 1965, Texas A&M historically has produced more officers than any other institution in the nation with the exception of the service academies. The University is one of only three institutions with a full-time corps of cadets including ROTC programs leading to commissions in all branches of service—Army, Air Force, Navy, Marine Corps and Coast Guard.
Texas A&M offers a variety of programs in undergraduate and graduate studies through its academic colleges and schools – Agriculture and Life Sciences, Architecture, the Bush School of Government and Public Service, Mays Business School, Education and Human Development, Dwight Look College of Engineering, Geosciences, Liberal Arts, Science, and Veterinary Medicine and Biomedical Sciences, as well as professional degree programs from the Texas A&M Health Science Center and the Texas A&M School of Law.

Texas A&M has two branch campuses. Texas A&M University at Galveston is the marine and maritime branch campus of Texas A&M University. Since 2003, Texas A&M has offered engineering degrees in the Middle East at Texas A&M University at Qatar. In addition, Texas A&M’s extensive research efforts in all fields, in conjunction with agricultural and engineering experiment stations, resulted in annual expenditures of more than $820 million in 2013, placing the university in the top 20 research institutions by the National Science Foundation.

Classified by the Carnegie Foundation as a Research Intensive University (very high research activity), Texas A&M embraces its mission of the advancement of knowledge and human achievement in all its dimensions. The research mission is a key to advancing economic development in both public and private sectors. Integration of research with teaching prepares students to compete in a knowledge-based society and to continue developing their own creativity, learning, and skills beyond graduation.

In 2001, Texas A&M University was admitted to the Association of American Universities (AAU) as one of only 62 invited members. The prestigious organization founded in 1900 restricts its ranks to the nation’s premier public and private institutions of higher learning. In 2004, the Kappa of Texas Chapter of Phi Beta Kappa was installed at Texas A&M University.

University Student Learning Objectives

Student learning outcomes articulate the knowledge and skills we expect students to gain during their educational experiences. These learning outcomes ask students to connect their course- and degree-level learning to overall goals determined to be critically important to a university’s graduates as they make their way in the world after graduation and prepared to engage in learning for a lifetime.

First and foremost, of course, we expect students to have learned the material presented in their individual courses. From entry-level general education courses required of all undergraduates to capstone courses restricted to seniors in a major to specialized graduate seminars, by the time of graduation students are expected to have learned the material assigned in all of their courses. We call this “content knowledge.”

The broader institutional student learning outcomes ask students to connect the pieces of their education into a whole that synthesizes what they have learned. Students graduate not only knowing facts and understanding basic concepts but also demonstrating an ability to apply and explain those facts and concepts creatively in new situations. Students gain the skills and knowledge that allows them to thrive in a complex world.

Master’s

A student who graduates from Texas A&M University with a master’s degree will:

- Master degree program requirements, including theories, concepts, principles, and practice; develop a coherent understanding of the subject matter through synthesis across courses and experiences.
- Apply subject matter knowledge in a range of contexts to solve problems and make decisions.
- Use a variety of strategies and tools, use a variety of sources and evaluate multiple points of view to analyze and integrate information and to conduct critical, reasoned arguments.
- Communicate effectively.
- Use appropriate technologies to communicate, collaborate, conduct research, and solve problems.
- Develop clear research plans and conduct valid (data-supported), theoretically consistent, and institutionally appropriate research.
- Choose ethical courses of action in research and practice.

Doctoral

A student who graduates from Texas A&M University with a doctoral degree will:

- Master degree program requirements, including theories, concepts, principles, and practice; develop a coherent understanding of the subject matter through synthesis across courses and experiences; and apply subject matter knowledge to solve problems and make decisions.
- Apply a variety of strategies and tools, use a variety of sources, and evaluate multiple points of view to analyze and integrate information and to conduct critical, reasoned arguments.
- Communicate effectively.
- Develop clear research plans, conduct valid, data-supported, theoretically consistent, and institutionally appropriate research and effectively disseminate the results of the research in appropriate venues to a range of audiences.
- Use appropriate technologies to communicate, collaborate, conduct research, and solve problems.
- Teach and explain the subject matter in their discipline.
- Choose ethical courses of action in research and practice.

University Statement on Harassment and Discrimination (p. 1433)
University Student Rules (p. 1433)

Academic Common Market

The purpose of the Academic Common Market (ACM) is to share specified academic degree programs between states located at southern public colleges and universities. This is accomplished through an exchange of students across borders at in-state rates. The motivation for this cooperation continues to be:

1. eliminating unnecessary duplication among the states, in that it is impractical for any institution or single state to develop or maintain degree programs in every field of knowledge,
2. to support existing degree programs that have the capacity to serve additional students, and
3. to provide access and encourage movement across state lines for programs not available in a student’s home state.

Texas A&M University is a member of the Academic Common Market/Electronic Campus (ACM/EC). The ACM/EC enables students to pursue eligible degree programs via distance or e-learning without leaving their home state, work, and other commitments.

For more information on the Academic Common Market, contact the Office of Graduate and Professional Studies at http://ogaps.tamu.edu.

Admission Statement and Policy on Individuals with Disabling Conditions

Texas A&M University has a strong institutional commitment to the principle of diversity in all areas. In that spirit, admission to Texas A&M University and any of its sponsored programs is open to all qualified individuals. Texas A&M does not discriminate on the basis of an individual’s disability and complies with Section 504 of the Rehabilitation Act of 1973, and the Americans with Disabilities Act (ADA) as amended in its admissions, accessibility, treatment and employment of students in its programs and activities.

Texas A&M provides academic accommodations and auxiliary aids to students with disabling conditions, as defined under the law, who are otherwise qualified to meet the institution’s academic requirements. Students with disabilities at the Texas A&M College Station campus, College of Nursing, Irma Lerma Rangel College of Pharmacy College Station campus, College of Medicine and School of Public Health should contact Disability Services (979) 845-1637 to request accommodations.

Students at the Texas A&M Baylor College of Dentistry should contact the Office of Academic Affairs (214) 828-8207 to request accommodations. Students at the School of Law should contact the Office of Student Affairs at (817) 212-4111 to request accommodations. Students at the Irma Lerma Rangel College of Pharmacy in Kingsville should contact the Disability Resource Center at Texas A&M Kingsville at (361) 593-3024 to request accommodations.

Individuals with a disability who believe they have experienced discrimination may contact the following based on your location:

Texas A&M University College Station campus or the School of Law should contact the ADA Coordinator at (979) 862-7737 or ADA.Coordinator@tamu.edu.

Texas A&M Baylor College of Dentistry (HSC), College of Medicine (HSC), College of Nursing (HSC), School of Public Health (HSC) and Irma Lerma Rangel College of Pharmacy (HSC) should contact the ADA Coordinator at (979) 436-9207 or ADA.Coordinator@tamhsc.edu.

Aggie Honor Code

Integrity is a fundamental core value of Texas A&M University. Academic integrity requires a commitment by all faculty, students, and administrators to:

- Remain constantly focused on the quality of the academic programs;
- Achieve and maintain academic excellence in all courses and programs to assure the value of Texas A&M University degrees;
- Demand high academic standards from all members of the Aggie community.

All Texas A&M University students, graduate and undergraduate, part-time or full-time, in residence or in distance education, are expected to follow the guiding rule of the Aggie Honor Code:

“An Aggie does not lie, cheat, or steal or tolerate those who do.”

Upon accepting admission to Texas A&M University, a student immediately assumes a commitment to uphold the Honor Code, to accept responsibility for learning, and to follow the philosophy and rules of the Honor System, which may be found at http://aggiehonor.tamu.edu. A student will be required to state his/her commitment on examinations, research papers, and other academic work. Ignorance of the rules does not exclude any member of the Texas A&M community from the requirements or the processes of the Honor System.

The Honor System Office is charged with promotion of the honor code and administration of academic misconduct cases. The Honor Council, comprised of students and faculty from colleges and offices across the University, will investigate all such infractions of the honor code and recommend appropriate sanctions. The office website, http://aggiehonor.tamu.edu, defines the types of infractions and the possible consequences. Students are urged to review this information.

In addition to adherence to the Honor Code, a student (graduate students in particular) who is completing a thesis, record of study, dissertation, and publication may fall under the additional federal requirements promulgated by the Office of Research Integrity (Scientific Misconduct Regulations – 42 CFR part 50), as well as Texas A&M System Regulations and Texas A&M University Rules (Texas A&M System Regulations – Ethics in Research...
and Scholarship – 15.99.03, and Texas A&M University rules and standard administrative procedures – Responsible Conduct in Research and Scholarship – 15.99.03.M1, 15.99.03.M1.01-06).

**Aggie Honor System Office**

http://aggiehonor.tamu.edu

All Texas A&M students, graduate and undergraduate, part-time or full-time, in residence or in distance education, are expected to follow the guiding rule of the Aggie Honor Code: “An Aggie does not lie, cheat, or steal or tolerate those who do.”

Upon accepting admission to Texas A&M University, a student immediately assumes a commitment to uphold the Honor Code, to accept responsibility for learning, and to follow the philosophy and rules of the Aggie Honor System Office (see http://aggiehonor.tamu.edu). Students will be required to state their commitment on examinations, research papers, and other academic work. Ignorance of the rules does not exclude any member of the Texas A&M community from the requirements or the processes of the Aggie Honor System Office.

**Cooperative Graduate Programs**

Texas A&M University has executed Memoranda of Agreement establishing cooperative graduate programs with the following universities: Texas A&M International University, Texas A&M University-Corpus Christi, and Texas A&M University-Kingsville. Details concerning the cooperative graduate programs are available from the graduate offices of the institutions involved.

Texas A&M University and The University of Texas System also have entered into an agreement relating to cooperative use of courses and facilities in graduate education. Visit the OGAPS web page for further information on the Cooperative/Consortium Program for Graduate Students (http://ogaps.tamu.edu/New-Current-Students/Cooperative-Consortium-Program) process.

**English Language Proficiency Requirement**

All international graduate students whose native language is not English must fulfill an English proficiency requirement through either English Proficiency Verification or English Proficiency Certification. This proficiency requirement should be met early in a student’s program, and it must be completed before scheduling either the final examination for the master’s degree or the preliminary examination for the doctoral degree. More information regarding the English Language Requirements may be found at http://ogaps.tamu.edu.

Two levels of English Proficiency Status for a graduate student include: English Proficiency Verified and English Proficiency Certified. English Proficiency Certification is required by the State of Texas before a graduate student is eligible to serve as a Graduate Assistant-Teaching or any other position considered to be a teaching position (e.g., instructor, lecturer, etc.). All other international graduate students must be either English Proficiency Verified or English Proficiency Certified.

English Proficiency Verification can be achieved by presenting:

- a TOEFL score of at least 80 on TOEFL iBT (550 paper-based), or
- an IELTS score of at least 6.0, or
- a GRE Verbal Reasoning score of at least 146 (400 on the old scale), or
- a GMAT Verbal score of at least 22, or
- a PTE Academic score of at least 53, or
- acquiring alternative verification from the Office of Graduate and Professional Studies via a departmental request. An international graduate student holding a master’s degree from an accredited U.S. institution qualifies for alternative verification.

Individual colleges may choose to establish minimum TOEFL standards that exceed the University minimum for English Proficiency Verification. Scores from TOEFL examinations administered more than two years before submission of the application for admission shall not be eligible for English Proficiency Verification.

English Proficiency Certification can be achieved by:

- scoring at least 80 on each of the sections (reading, listening, written composition, and oral skills) of the English Language Proficiency Examination (ELPE);
- obtaining grades of A or B in English Language Institute (ELI) courses (reading, listening, written composition, and oral skills) at the 300-level or higher, or
- acquiring alternative certification from the Office of Graduate and Professional Studies via a departmental request.

An international graduate student who has earned a baccalaureate degree following four years of study at an accredited U.S. institution or institutions qualifies for alternative certification. All other requests for alternative certification require strong departmental justification and review in compliance with Office of Graduate and Professional Studies policies and guidelines.

An international graduate student who has completed an equivalent English training program at an institution other than Texas A&M may request English Proficiency Verification or Certification.

Verification or Certification is requested through the Departmental Graduate Advisor. The student should provide the Departmental Graduate Advisor with documentation to support Verification or Certification. If the department concurs with the request, the Departmental Graduate Advisor will submit a letter recommending and requesting Verification or Certification (with documentation attached) to the Office of Graduate and Professional Studies. The Office of Graduate and Professional Studies will determine on a case-by-case basis whether Verification or Certification is granted.

**English Language Proficiency Examination**

An international graduate student who scores below 80 on TOEFL iBT (550 paper-based), or below 53 on the PTE Academic, or below 6.0 on the IELTS (or who has not submitted official TOEFL, PTE Academic or IELTS scores to Texas A&M) and has not obtained English Proficiency Verification or Certification by other means (GRE/GMAT scores, U.S. four-year baccalaureate degree or higher, or Office of Graduate and Professional Studies permission) must take the English Language Proficiency Examination (ELPE) prior to registering for Texas A&M courses in his/her first semester.

The ELPE evaluates English skills in the areas of reading, listening, written composition and oral communication.
Visit the Data and Research Services website (http://dars.tamu.edu/Testing/ELPE) for more information on upcoming exam dates and how to register for the English Language Proficiency Exam.

An international graduate student who takes the ELPE, but has not had his/her English Proficiency verified through the TOEFL, IELTS, PTE Academic, GRE Verbal, GMAT Verbal, or a four year U.S. baccalaureate degree or higher may be allowed to postpone some or all remaining English Proficiency requirements during the first semester of enrollment. He/she must begin to take ELI courses (in at least one of the areas not yet passed) no later than his/her second semester enrolled at Texas A&M. A graduate student will be allowed to take a combination of Texas A&M and ELI courses (up to a total of 15 hours in fall or spring semesters and up to a total of 12 hours for a 10-week summer semester.)

**Graduate Appeals Process**

Graduate or professional students who believe that decisions about unauthorized absences or final grades, the outcome of evaluation of performance on examinations, or decisions about separation (e.g., probation, suspension, dismissal, or termination) from a Department, Interdisciplinary Degree Program, and/or College for scholastic deficiency were made on an arbitrary, capricious, or prejudicial basis may appeal such decisions through the appeals process specified in the Texas A&M University Rules (59. Graduate Appeals Panel). In such appeals the burden of proof is upon the student to demonstrate that the decisions in question were arbitrary, capricious, or prejudiced.

For additional information see the Office of Graduate and Professional Studies webpage on Student Grievances and Appeals Procedures (http://ogaps.tamu.edu/New-Current-Students/Student-Grievances-and-Appeals-Procedures).

**Intellectual Property**

The ownership, management and commercialization of system-owned Intellectual Property and Tangible Research Property are set forth in System Policy 17.01 Intellectual Property Management and Commercialization. Intellectual Property will mean, collectively, all forms of intellectual property including, but not limited to, issued patents, patentable inventions, copyrightable works, trademarks, mask works, and trade secrets. The system recognizes and affirms the traditional academic freedom of its faculty and staff to publish pedagogical, scholarly or artistic works without restriction. In keeping with this philosophy, the system does not claim copyright to pedagogical, scholarly or artistic works, regardless of their form of expression, unless required by a funding or research contract. Such works include, but are not limited to, copyrightable works of students created in the course of their education, such as dissertations, papers and journal articles. Authors of copyrightable works that are not owned by the system, its members, or another party such as a research sponsor, own the copyright in their works and are free to publish them, register the copyright, and receive any revenues which may result.

Accordingly, copyrightable works may be owned by the student/author/creator, by multiple individuals (such as a research team or co-authors of a publication), by the System, by a System member, or by another party such as a research sponsor. Factors that require consideration in determining ownership include:

1. whether or not the intellectual property was conceived or developed as a result of activities related to an individual’s employment responsibilities and/or with support from University-administered funds, facilities or personnel;

2. whether or not the intellectual property was conceived or developed in the course of, or resulting from, research supported by a grant or contract with the federal government or state government or a nonprofit or for-profit nongovernmental entity; and,

3. the individual collaborators, relative contributions of each individual, and agreements among creators of the work.

It is recommended that the student identify in the thesis, dissertation or record of study any collaborators, contributors, and sources of financial support (unless prohibited through contractual agreements) in carrying out the research or in publications presented in the thesis/dissertation/record of study. It is also recommended that the student clearly indicate what the student’s independent contributions were to the work. The advisory committee is responsible for ensuring that the student’s independent contribution is sufficient to represent a thesis, dissertation, or record of study.

**Oak Ridge Associated Universities (ORAU)**

http://www.orau.org

Since 1950, students and faculty of Texas A&M University have benefited from its membership in Oak Ridge Associated Universities (ORAU). ORAU is a 115-member university consortium of major Ph.D.-granting academic institutions and is a contractor for the U.S. Department of Energy (DOE) located in Oak Ridge, Tennessee. ORAU cultivates collaborative partnerships that enhance the scientific research and education enterprise of our nation. ORAU works with its member institutions to help their students and faculty gain access to federal research facilities throughout the country; to keep its members informed about opportunities for fellowship, scholarship and research appointments; and to organize research alliances among its members.

Through the Oak Ridge Institute for Science and Education (ORISE), the DOE facility that ORAU operates, undergraduates, graduates, postgraduates, as well as faculty enjoy access to a multitude of opportunities for study and research. Students can participate in programs covering a wide variety of disciplines including business, Earth sciences, epidemiology, engineering, physics, geological sciences, pharmacology, ocean sciences, biomedical sciences, nuclear chemistry and mathematics. Appointment and program length range from one month to four years. Many of these programs are especially designed to increase the numbers of underrepresented minority students pursuing degrees in science- and engineering-related disciplines. A comprehensive listing of these programs and other opportunities, their disciplines, and details on locations and benefits can be found in the ORISE Catalog of Education and Training Programs, which is available at http://see.orau.org or by calling the contact below.

ORAU’s Office of Partnership Development seeks opportunities for partnerships and alliances among ORAU’s members, private industry, and major federal facilities. Activities include faculty development programs, such as the Ralph E. Powe Junior Faculty Enhancement Awards, the Visiting Industrial Scholars Program, consortium research funding initiatives, faculty research and support programs as well as services to chief research officers.

For more information about ORAU and its programs, visit http://www.orau.org or contact:

Glen A. Laine
Vice President for Research
ORAU Councilor for Texas A&M University
Pathways to the Doctorate

The Pathways to the Doctorate is a program dedicated to increasing the number, quality, and diversity of Master’s and doctoral graduates across all disciplines within the Texas A&M University System. Consisting of 11 universities, the System spans the State of Texas. This enables the System to recruit top students from a variety of geographical, socio-economic, racial, ethnic, and cultural environments. The Pathways to the Doctorate is one approach to Closing the Gaps Program in Texas. The goal of the Pathways to the Doctorate Program is to attract high achieving students within The Texas A&M University System to pursue careers in higher education. This program will help produce some of the next generation of faculty. Through a variety of activities such as seminars and workshops, inter-institutional exchange programs, a mentoring program and an annual Texas A&M University System Student Research Symposium with System-wide participation, the Pathways program aims to:

Create a pathway for talented students to pursue graduate education;
Foster opportunities for faculty, graduate students, and undergraduate students to collaborate and to foster innovative research and interpersonal communication skills;
Enlighten and encourage students and teachers (K-12 through college) to see that science and technology are essential to lead a life of discovery and fun;
Help meet faculty needs as postsecondary enrollment grows and current faculty retire.

Texas A&M University offers Pathways to the Doctorate fellowships for doctoral students who completed a bachelor’s degree at one of the other Texas A&M University System institutions. Pathways to the Doctorate Fellowships are awarded by the Office of Graduate and Professional Studies to qualified doctoral students mentored by faculty partners in the Program. Further details are available at http://ogaps.tamu.edu.

Requirements for Graduate Teaching Assistants

Requirements for Graduate Teaching Assistant (TA) training are in place to improve undergraduate teaching, enhance the classroom experiences of TAs, and respond to the need for systematic preparation and evaluation of Teaching Assistants. For international Teaching Assistants, training requirements will supplement programs already in place to evaluate and promote English language competency. New TAs’ attendance at the Center for Teaching Excellence (CTE) Teaching Assistant Institute (TAI) is mandatory. Discipline-specific training for new TAs will be provided at the college/department level. The nature of this training, while varying widely across different disciplines, will complement university-level training and will address the unique and specific needs of graduate students serving as TAs within their disciplines.

Responsible Conduct of Research

Students who will be involved in research involving human subjects (e.g., survey data; human tissue/cell lines, protected health information), animals (e.g., vertebrate animals, animal tissues/cell lines), and/or biosafety/ biohazards (e.g., recombinant DNA/transgenic animals, plants; agents infectious to humans, animals or plants) should obtain approval through the appropriate compliance office (or be included in existing research approvals) prior to engaging in the research. Engaging in unauthorized research can result in severe penalties for non-compliance. All students are urged to complete responsible conduct of research training early in their graduate programs to familiarize themselves with the issues of research integrity. Additional information, as well as online training, may be obtained from the office of Research Compliance and Biosafety website (http://rcb.tamu.edu).

University Statement on Harassment and Discrimination

Texas A&M University is committed to providing an educational and work climate that is conducive to the personal and professional development of each individual. To fulfill its multiple missions as an institution of higher learning, Texas A&M encourages a climate that values and nurtures collegiality, diversity, pluralism and the uniqueness of the individuals within our State, nation and world. The University also strives to protect the rights and privileges, and to enhance the self-esteem of all its members. Faculty, staff and students should be aware that any form of harassment and any form of illegal discrimination against any individual is inconsistent with the values and ideals of the University community.

Individuals who have questions or believe they have experienced discrimination or harassment are encouraged to contact:

- Texas A&M University College Station campus – Notice of Nondiscrimination and Abuse
- Texas A&M Baylor College of Dentistry (HSC), College of Medicine (HSC), College of Nursing (HSC), School of Public Health (HSC) and Irma Lerma Rangel College of Pharmacy (HSC) - Notice of Nondiscrimination and Abuse
- School of Law - Notice of Nondiscrimination and Abuse

Students who believe they have experienced discrimination based on sex, sexual harassment or sexual violence can choose to contact the designated Texas A&M University Title IX Coordinator directly at (979) 862-7737 or TitleIX.Coordinator@tamhsc.edu. HSC students may also directly contact the HSC Title IX Coordinator at (979) 436-9207 or TitleIX.Coordinator@tamhsc.edu.

University Student Rules

Each student enrolled at Texas A&M University is responsible for being fully acquainted with and complying with the Texas A&M University Student Rules. Specific rules, information and procedures may be found in publications pertaining to each particular service or department. These rules and guidelines were in effect as of the publishing of this catalog. Graduate students are encouraged to check the website (http://student-rules.tamu.edu) for any changes.
Course Descriptions

All graduate and professional courses offered in the University are described on each subject page. Some of the new courses and changes in courses are included in this catalog pending their approval by the Texas Higher Education Coordinating Board. The unit of credit is the semester hour, which involves one hour of theory or from two to four hours of practice per week for one semester of 15 weeks. Figures following the credit hours indicate the clock hours per week devoted to theory and practice, respectively. Theory includes recitations and lectures; practice includes work done in a clinical setting, laboratory, shop, drawing room, field or other. When courses are cross-listed, credit cannot be received for both courses. Any course may be withdrawn from the session offerings in case the number of registrations is too small to justify offering the course.

ACCT - Accounting

ACCT 603 Energy Accounting
Credits 3. 3 Lecture Hours.
Overview of the oil and gas industry and specialized financial accounting procedures associated with the industry; emphasis on accounting for exploration, development, production, depletion and amortization as well as joint operations, asset impairment and retirement obligation; includes reserve accounting/disclosure related to the above topics.
Prerequisites: ACCT 327 with C or better.

ACCT 607 Seminar in Auditing
Credits 3. 3 Lecture Hours.
Current issues and research in auditing, attestation and financial disclosures. Classification 6 students may not enroll in this course.
Prerequisite: ACCT 407 or equivalent.

ACCT 610 Financial Accounting
Credits 1 to 3. 1 to 3 Lecture Hours.
Develops a conceptual framework for understanding and using corporate financial statements. Oriented towards the user of financial accounting data (rather than the preparer) and emphasizes the reconstruction of economic events from published financial data. May be repeated for up to 3 hours credit. Classification 6 students may not enroll in this course.
Prerequisite: Enrollment is limited to BUAD classification 7 graduate students.

ACCT 611 Management of Taxation
Credits 3. 3 Lecture Hours.
Various income taxes on taxable entities. For business and other majors. Classification 6 students may not enroll in this course.

ACCT 612 Partnership and Real Estate Taxation
Credits 3. 3 Lecture Hours.
Concepts and principles of partnerships and real estate taxation; use of partnerships and real estate for tax planning. Classification 6 students may not enroll in this course.
Prerequisite: ACCT 405.

ACCT 615 Contemporary Tax Topics
Credits 3. 3 Lecture Hours.
Explores business tax topics that provide current/future significant professional tax service opportunities such as specialized applications of business taxation. Intended for graduate students in the Tax Track in the Professional Program in Accounting. May be taken two times for credit.
Prerequisite: ACCT 611.

ACCT 620 Management Accounting and Control
Credits 1 to 3. 1 to 3 Lecture Hours.
Applications of concepts useful to management, in the analysis of accounting data for the purposes of costing and income determination, decision making and control of various organizational activities. May be repeated for up to 3 hours credit. Classification 6 students may not enroll in this course.
Prerequisite: ACCT 610 or equivalent.

ACCT 621 Corporate Taxation I
Credits 3. 3 Lecture Hours.
Formation and capital structures, partial liquidations, S corporations, accumulated earnings tax, personal holding companies and other topics. Classification 6 students may not enroll in this course.
Prerequisite: ACCT 427 or equivalent.

ACCT 622 Business Application Modeling
Credits 3. 3 Lecture Hours.
Focuses on modeling application software commonly used in accounting and business; primary emphasis on Visual Basic for Applications in Microsoft Excel and Access; application exercises will deal with financial problem solving. Classification 6 students may not enroll in this course.
Prerequisite: ACCT 427 or equivalent.

ACCT 624 Controls and Audit Technology
Credits 3. 3 Lecture Hours.
Focuses on internal controls and their importance with regards to financial reporting and arrangement; topics include process walkthrough techniques, documentation, business processes, control frameworks, application controls, change management, operations management and security.
Prerequisite: ACCT 407.

ACCT 640 Accounting Concepts and Procedures I
Credits 3. 3 Lecture Hours.
Accounting concepts and relationships essential to administrative decisions; use of accounting statements and reports as policymaking and policy execution tools. Classification 6 students and non-business graduate students may enroll in this course.
Prerequisite: Graduate classification.

ACCT 644 Control and Audit of Information Systems
Credits 3. 3 Lecture Hours.
Focuses on the control, audit, and security of information systems; aimed at enhancing the ability of accounting professionals to deal with complex computer-based accounting systems as auditors of these systems; topics include general and application controls, audit software, and e-commerce security.
Prerequisite: ACCT 427; graduate classification.

ACCT 646/IBUS 646 International Accounting
Credits 3. 3 Lecture Hours.
Introduction and examination of accounting issues unique to multinational enterprises and international business activity; Classification 6 students may not enroll in this course.
Prerequisites: ACCT 328; FINC 341.
Cross Listing: IBUS 646/ACCT 646.
ACCT 647/FINC 647 Financial Statement Analysis
Credits 3. 3 Lecture Hours.
Analytical approach to financial statements; application of finance and
accounting principles relevant to the analysis of financial statements. 
Classification 6 students may not enroll in this course.
Prerequisites: ACCT 610 or 640; FINC 612 or 635.
Cross Listing: FINC 647/ACCT 647.

ACCT 648 Accounting Information Systems
Credits 3. 3 Lecture Hours.
Design, implementation, operation, control and audit techniques of
accounting information systems. Classification 6 students may not enroll in
this course.
Prerequisite: ACCT 642 or approval of instructor.

ACCT 650 Accounting Ethics
Credits 3. 3 Lecture Hours.
Integration of ethical reasoning, objectivity, independence and other core
values into the development of a professional accountant; critical analysis
of the ethical lapses which have occurred in business and the accounting
profession; explores ways to integrate ethical behavior into professional
life.
Prerequisite: ACCT 427 or equivalent.

ACCT 651 Development of Accounting Thought
Credits 3. 3 Lecture Hours.
Examination of contemporary financial reporting issues in terms of
institutional, ethical, and regulatory environment; framework for exercising
judgment when literature provides no direct prescription about correct
reporting. Tools used include unstructured cases and open-ended
research assignments. Course not open to classification 6 students.
Prerequisite: ACCT 642 or approval of instructor.

ACCT 660 Accounting Information and Financial Markets
Credits 3. 3 Lecture Hours.
Financial accounting research with emphasis on financial markets;
investigates major areas of financial accounting research, related
statistical techniques and the progress of research in a historical
perspective. Classification 6 students may not enroll in this course.
Prerequisite: ACCT 665 or approval of instructor.

ACCT 665 Research Methodology I
Credits 3. 3 Lecture Hours.
Nature and evaluation of accounting research; includes preparation and
evaluation of original research papers. Classification 6 students may not
enroll in this course.
Prerequisite: Doctoral classification.

ACCT 671 Contemporary Accounting Topics
Credits 1 to 3. 1 to 3 Lecture Hours.
Current issues and research in topical areas: financial data audit and
control; international accounting; accounting for natural resources; tax
planning, theory and structure of taxation. Classification 6 students may
not enroll in this course.
Prerequisite: Approval of instructor.

ACCT 680 Tax Research and Policy
Credits 3. 3 Lecture Hours.
Methodology and sources of tax research; tax analysis research, policy
implications, behavioral aspects and use of quantitative analysis.
Classification 6 students may not enroll in this course.
Prerequisite: ACCT 405 or 611.

ACCT 684 Professional Internship
Credits 1 to 6. 1 to 6 Other Hours.
A directed internship in an organization to provide students with on-the-
job training with professionals in organizational settings appropriate to the
student’s professional objectives. Classification 6 students may not enroll
in this course.
Prerequisites: Approval of committee chair and department head.

ACCT 685 Directed Studies
Credits 1 to 4. 1 to 4 Other Hours.
Directed individual study of selected problems using recent developments
in business research methods. Classification 6 students may not enroll in
this course.
Prerequisites: Graduate classification and approval of instructor.

ACCT 688 Doctoral Seminar
Credits 3. 3 Other Hours.
Historical development of the conceptual framework of accounting theory
and practices; analysis of current research and controversial issues in the
field. For doctoral students only. May be repeated for credit. Classification
6 students may not enroll in this course.

Prerequisite or
corequisite: ACCT 665.

ACCT 689 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours. 1 to 4 Lab Hours.
Selected topics in an identified area of accounting. May be repeated for
credit. Classification 6 students may not enroll in this course.

ACCT 691 Research
Credits 1 to 23. 1 to 23 Other Hours.
Research for thesis or dissertation. Classification 6 students may not enroll
in this course.

ADDM - Dental Materials

ADDM 5220 Advanced Dental Materials
Credits 2. 2 Lecture Hours.
Provides knowledge on contemporary dental materials; emphasis on
restorative and prosthodontic materials; understanding and overview of the
structure and properties of dental materials; specific detailed information
on the major categories of dental materials.

ADDT - Alcohol Drug Dep Trrtmnt

ADDT 800 Alcohol and Drug Dependency Treatment
Credits 1.25 to 10. 1.25 to 10 Other Hours.
The ADDT clerkship will expose students to clinical methods for detection,
diagnosis, triage, and intervention in a continuum of treatment settings
from specialized in-patient care to primary care to community based self-
help. It will introduce students to medication strategies for substance
abuse treatment while recognizing the primacy of behavioral treatment
for most addiction disorders. Students will review current understanding
of basic neurobiology common to all addictions along with clinical
presentation and specific management of different categories of addictive
drugs.

AEDH - Adv Ed Dental Hygiene

AEDH 5100 Advanced Dental Hygiene Clinical Skills
Credit 1. 1 Other Hour.
Includes self-assessment and development of advanced dental hygiene
clinical skills. Contains intramural and/or extramural rotations to further
advance clinical proficiency.
AEDH 5112 Faculty Responsibilities and Issues in Higher Education
Credit 1. 1 Other Hour.
This course exposes the prospective new faculty member to the functions and responsibilities that help meet their institution’s mission with respect to teaching, service and scholarly activity.

AEDH 5118 Hospital Administration Practicum II
Credit 1. 1 Other Hour.
This series of practicums prepares the student for an institutional administrative/management position. Topics include hospital organization and protocol, hospital dentistry organization, health care financing and the changing health care market, human resource issues, assessment, planning and interventions as they relate to patient care and managing a dental clinic.

AEDH 5130 Clinical Dental Hygiene Teaching Practicum
Credit 1. 1 Other Hour.
This practicum course is designed to provide the graduate student with experience in clinical teaching and evaluation of first- and/or second-year dental hygiene students in the areas of patient assessment, treatment planning, dental hygiene educational and clinical services, patient management, and professionalism. This course is offered in both the fall and spring semesters.

AEDH 5200 Educational Research
Credits 2. 2 Lecture Hours.
Students will develop the knowledge and skills necessary to be intelligent consumers and producers of educational research. A focus is on conducting survey research.

AEDH 5201 Teaching Strategies Dental Hygiene ED I
Credits 2. 2 Other Hours.
This course introduces the graduate student to a variety of clinical education philosophies. Cognitive, affective and psychomotor learning theories are addressed, and clinical teaching methodologies are emphasized. Evaluation mechanisms for assessing a novice student’s progress and development are explored.

AEDH 5202 Teaching Strategies Dental Hygiene ED II
Credits 2. 2 Other Hours.
This course will expose the student to a variety of principles and methods that will familiarize the student with the requirements of clinical teaching, including accreditation, scheduling, dispensary management, developing positive staff and faculty interactions, and mentoring undergraduate students on projects.

AEDH 5208 Hospital Administration Practicum I
Credits 2. 2 Other Hours.
This series of practicums prepares the student for an institutional administrative/management position. Topics include hospital organization and protocol, hospital dentistry organization, health care financing and the changing health care market, human resource issues, assessment, planning and interventions as they relate to patient care and managing a dental clinic.

AEDH 5210 Special Care Patient Seminar
Credits 2. 2 Other Hours.
Contemporary health care issues that affect the medical and dental needs of special care patients will be discussed. Students in the education track will develop a special-needs patient course for a fictitious dental or dental hygiene program and include curriculum content, goals and objectives that address patients who are mentally, medically or physically challenged. In addition, they will prepare a lecture on a special-needs patient and present it to the undergraduate dental hygiene or graduate students. Students in the health administration track will develop a fictitious health care facility or a mobile dental clinic for special-needs patients and include targeted population, objectives, policy statements, budget, personnel and equipment. Health administration tract students will also present a dental in-service to either the nurses or aids that care for patients with disabilities in a group or nursing home or hospital setting.

AEDH 5211 Clinical Case Study
Credits 2. 2 Other Hours.
This course helps the student develop and apply the knowledge and skills necessary to develop a formal presentation of a case study.

AEDH 5219 Hospital Administration Practicum III
Credits 2. 2 Other Hours.
This series of practicums prepares the student for an institutional administrative/management position. Topics include hospital organization and protocol, hospital dentistry organization, health care financing and the changing health care market, human resource issues, assessment, planning and interventions as they relate to patient care and managing a dental clinic.

AEDH 5301 Didactic Teaching Strategies
Credits 2. 1 Lecture Hour. 1 Lab Hour.
This course introduces the graduate student to the processes involved in the development of a course syllabus and a university-level classroom presentation. The student will develop a syllabus for a dental hygiene course and a classroom presentation that will include a lesson plan containing goals, learning objectives, examination items, a test blueprint, outline of material, evaluation mechanism and audiovisual materials. The student also will be introduced to item analyses and test blueprints. Academic integrity and evaluation of teaching performance also will be discussed.

AEDH 5314 Classroom Teaching Practicum
Credit 1. 1 Other Hour.
This course provides the graduate student with additional opportunities to enhance classroom teaching experiences. The student will work directly with the course director to identify a topic of interest and to develop a unit of instruction, which will include goals, learning objectives, lesson plans and examination items. The student will also determine the most appropriate teaching methodologies, audio-visual aids and evaluation mechanisms.

AEDH 5V88 Research for Practicum Project
Credits 1 to 3. 1 to 3 Other Hours.
Non-thesis Option: Administrative Track) Students assess the need for, plan, implement and evaluate a major project in their interest area.

AEDH 5V89 Practicum Project
Credits 1 to 3. 1 to 3 Other Hours.
Students prepare a written report of their project and formally present and orally defend this project to the faculty.

AEDH 5V98 Research for the Master’s Thesis
Credits 1 to 3. 1 to 3 Other Hours.
Conduct original research in chosen topic; literature review, data analysis.
AEDH 5V99 Thesis
Credits 1 to 3. 1 to 3 Other Hours.
Formal presentation of research literature review, objectives, methods, data analysis, results, discussion and conclusions in acceptable written form. Oral defense is also required.

AEGD - Adv Ed Gen Dentistry

AEGD 5000 Clinical Dentistry
Credits 0. 0 Other Hours.
Clinical diagnosis and treatment of advanced comprehensive multidisciplinary cases under faculty guidance and supervision.

AEGD 5201 Implant Dentistry
Credit 1.5. 1.5 Lecture Hour.
Diagnosis, management and treatment of both fixed and removable implant patients. Lecture, seminars and patient treatment.

AEGD 5205 Practice Management
Credits 0 to 1.5. 0 to 1.5 Lecture Hours.
All areas of practice and business management will be discussed, including office management, personnel management, professional ethics, financial planning, starting a practice, office design and legal responsibilities.

AEGD 5213 Advanced Removable Prosthodontics
Credit 1.5. 1.5 Other Hour.
Diagnosis, treatment planning and clinical treatment of complicated cases requiring advanced skills in removable prosthodontics.

AEGD 5214 Advanced Fixed Prosthodontics
Credit 1.5. 1.5 Other Hour.
Diagnosis, treatment planning and clinical treatment of complicated cases requiring advanced skills in fixed prosthodontics, including implant restoration.

AEGD 5215 Advanced Clinical Periodontology
Credit 1.5. 1.5 Other Hour.
Diagnosis, treatment planning, prognosis and instrumentation skills; basic surgical techniques.

AEGD 5216 Advanced Clinical Orthodontics
Credit 1.5. 1.5 Other Hour.
Diagnosis and evaluation of a variety of malocclusions; emphasis on minor tooth movement, interceptive treatment and maintenance of arch integrity.

AEGD 5217 Current Concepts in Operative Dentistry
Credit 1.5. 1.5 Other Hour.
Recent theories and techniques relating to restorative dental materials; emphasis on indications and contraindications for tooth-colored restorative materials; esthetic dentistry.

AEGD 5218 Advanced Pediatric Dentistry
Credit 1.5. 1.5 Other Hour.
Diagnosis, treatment planning and clinical treatment of complex pediatric patients; emphasis on medically compromised and behavior management cases.

AEGD 5219 Treatment Planning Conference
Credit 1.5. 1.5 Other Hour.
Diagnosis and treatment planning for comprehensive cases involving a multidisciplinary approach; student presentation of complex cases to a graduate faculty forum; defense of treatment plans using documented scientific or clinical evidence.

AEGD 5220 Current Literature Reviews
Credit 1.5. 1.5 Other Hour.
Detailed review of relevant literature on topics selected by the graduate faculty and presentation by graduate students; enhancement of student knowledge in selected subject areas and development of ability to critically evaluate scientific literature.

AEGD 5221 Clinical Pathology
Credits 1.50 to 2. 1.50 to 2 Other Hours.
Presentation and discussion of clinical cases representing various types of oral pathology of both hard and soft tissues; formulation of a logical differential diagnosis and appropriate treatment.

AEGD 5222 Clinical Endodontics
Credits 2. 2 Other Hours.
Diagnosis, management and treatment of patients with complex endodontic problems; surgical and nonsurgical treatment and retreatment of complicated cases.

AEGD 5224 Ethics in Dentistry
Credit 1.5. 1.5 Lecture Hour.
Ethical approach to practice promotion and professional interactions.

AEGD 5227 Advanced Geriatric Dentistry
Credit 1.5. 1.5 Other Hour.
Diagnosis, treatment planning and treatment of geriatric patients with special needs; emphasis on medically, physically and mentally compromised patients.

AEGD 5228 Advanced Dental for Special Care Patient
Credit 1.5. 1.5 Other Hour.
Clinical application and experience in the care and treatment of special care patients with medical, physical and mental handicaps.

AEGD 5303 Advanced Maxillofacial Surgery
Credits 2. 2 Other Hours.
Principles of oral surgery techniques and procedures in the outpatient clinic and operating room environments; demonstrations and clinical application.

AERO - Aerospace Engineering

AERO 601 Advanced Aerodynamics
Credits 3. 3 Lecture Hours.
Theoretical and approximate numerical solutions for incompressible and transonic flows and applications to airfoil, wing and whole-vehicle aerodynamics; approximate methods for boundary layers; introduction to aerodynamic design concepts; design of swept wings and delta wings, control surfaces, winglets, vortex generators and flow control.
Prerequisite: Approval of instructor.

AERO 602 The Theory of Fluid Mechanics
Credits 4. 3 Lecture Hours. 3 Lab Hours.
Enter-level graduate course on the theory of fluid mechanics, with emphasis on viscous subsonic flows; concepts of boundary layer theory, flow stability, transition and turbulence; laboratory includes elements of measurement techniques, numerical methods and physical modeling.
Prerequisite: MATH 601 or registration therein.
AERO 603/MEMA 602 Continuum Mechanics
Credits 3.3 Lecture Hours.
Development of field equations for analysis of continua (solids as well as fluids); conservation laws; kinematics, constitutive behavior of solids and fluids; applications to aerospace engineering problems involving solids and fluids.
Prerequisite: Graduate classification.
Cross Listing: MEMA 602/AERO 603.
AERO 605/MEEN 603 Theory of Elasticity
Credits 3.3 Lecture Hours.
Analysis of stress and strain in two- and three-dimensions, equilibrium and compatibility equations, strain energy methods; torsion of noncircular sections; flexure, axially symmetric problems.
Prerequisite: Graduate or senior undergraduate standing.
Cross Listing: MEEN 603/AERO 605.
AERO 606 Multifunctional Materials
Credits 3.3 Lecture Hours.
In-depth analysis of multifunctional materials and composites, and their novel applications.
Prerequisites: MEMA 602/AERO 603/AERO 603/MEMA 602, MSEN 601.
Cross Listing: MEMA 606 and MSEN 606.
AERO 608 Nanomechanics
Credits 3.3 Lecture Hours.
Application of mechanics concepts to nano-scale behavior of materials. Review of continuum mechanics; Extensions to generalized continua; Nonlocal elasticity; Nano-scale plasticity. Focus on multi-scale modeling: Dislocation Dynamics; Quasi-Continuum method; Molecular dynamics with introductions to quantum mechanics and statistical mechanics.
Prerequisite: AERO 603/MEMA 602.
Cross Listing: MEMA 608 and MSEN 608.
AERO 609 Sustainability Metrics and Life Cycle Assessment in Engineering
Credits 3.3 Lecture Hours.
Concepts of sustainability with associated metrics; application of systems engineering tools to facilitate assessment of viable options on products and processes; assessment of impact on the entire biosphere; product life cycle analysis.
Prerequisite: Graduate classification.
AERO 615 Numerical Methods for Internal Flow
Credits 3.3 Lecture Hours.
Methods for solving internal flow problems; viscous and inviscid compressible flow, Euler/Navier Stokes solvers, boundary conditions.
Prerequisite: MATH 601 or approval of instructor.
AERO 616 Damage and Failure in Composite Materials
Credits 3.3 Lecture Hours.
Mechanisms and models related to damage and failure in composite materials subjected to mechanical loads.
Prerequisite: Courses in composite materials, elasticity.
Cross Listing: MEMA 616 and MSEN 636.
AERO 617/MEMA 625 Micromechanics
Credits 3.3 Lecture Hours.
Eigenstrains; inclusions, and inhomogeneities; Eshelby’s solution for an ellipsoidal inclusion; Eshelby’s equivalent inclusion method. Effective elastic properties of composites; composite spheres and cylinders models; bounds on effective moduli; Hashin-Shtrikman bounds; applications to fiber, whisker and particulate reinforced composites; introduction to micromechanics ofinelastic composites and solids with damage.
Prerequisites: MEMA 602/AERO 603, or AERO 603/MEMA 602, AERO 605/MEEN 603.
Cross Listing: MEMA 625/AERO 617.
AERO 618/MEMA 626 Mechanics of Active Materials
Credits 3.3 Lecture Hours.
Introduction to coupled field theories: constitutive response of materials with thermal and electromagnetic coupling; microstructural changes due to phase transformations; shape memory alloys; piezoelectric and magnetostrictive materials; active polymers and solutions. Micromechanics of active composites.
Prerequisites: MEMA 602/AERO 603.
Cross Listing: MEMA 626/AERO 618.
AERO 620 Unsteady Aerodynamics
Credits 3.3 Lecture Hours.
Theoretical formulation of unsteady airfoil theory and techniques used for determining airloads on oscillating lift surfaces; exact solutions and various approximations presented and evaluated; application to problems of unsteady incompressible, subsonic and transonic flows about airfoils and wings.
Prerequisite: Approval of instructor.
AERO 621 Aeromechanics of Wind Turbines
Credits 3.3 Lecture Hours.
Solid and fluid mechanics concepts applied to aerodynamics and aeroelasticity of wind turbine blades; failure analysis and structural design; composites and hybrid materials.
Prerequisite: Graduate Classification.
AERO 622 Spacecraft Dynamics and Control
Credits 3.3 Lecture Hours.
Elements of analytical dynamics; modeling different types of spacecraft and control systems, sensors, and actuators; stability; control system design; effects of flexibility; attitude and orbital coupling; environmental effects.
Prerequisites: AERO 422 or ECEN 420.
AERO 623 Optimal Spacecraft Attitude and Orbital Maneuvers
Credits 3.3 Lecture Hours.
Application of optimization and optimal control techniques to spacecraft maneuver problems; computation of open loop and feedback controls for linear and nonlinear spacecraft dynamical systems; low-thrust and impulsive control, discretization methods, case studies.
Prerequisite: AERO 423 or equivalent.
AERO 624 Celestial Mechanics
Credits 3.3 Lecture Hours.
Analytical and numerical methods for computing spacecraft orbits under the influence of gravitational, aerodynamic, thrust and other forces: Keplerian two-body problem, perturbation methods, orbit determination, navigation and guidance for aerospace vehicles.
Prerequisite: AERO 423 or equivalent.
AERO 625 Modern Control of Aerospace Systems  
Credits 3.3 Lecture Hours.  
Linear and nonlinear controllers for aircraft and spacecraft; state and output feedback of sampled-data control systems; feedback linearization and dynamic inversion; direct sampled-data design using optimal MIMO techniques; sensing considerations, sources and modeling of uncertainties unique to aircraft and spacecraft; robustness analysis.  
Prerequisite: AERO 422 or equivalent.

AERO 626 Estimation of Dynamic Systems  
Credits 3.3 Lecture Hours.  
Traditional concepts and recent advances in estimation related to modern dynamic systems found in aerospace disciplines; least squares estimation, state estimation, nonlinear filtering, aircraft position and velocity tracking, attitude determination of spacecraft vehicles, gyro bias estimation and calibration.  
Prerequisites: AERO 310 or equivalent; STAT 211 or equivalent.

AERO 627 Principles of Structural Dynamics  
Credits 3.3 Lecture Hours.  
Examination of flexible structures through a review of single degree-of-freedom dynamical systems followed by an in-depth study of continuous and multiple degree-of-freedom systems; emphasis on discrete modeling of structures for vibration analysis and dynamic analysis, with minimal development of methods such as finite elements.  
Prerequisite: Graduate classification.

AERO 628 Advanced Spacecraft Dynamics and Control  
Credits 3.3 Lecture Hours.  
Review of fundamental principles; introduction to alternate and advanced methods of dynamics and control for aerospace systems; alternate methods for generating and analyzing equations of motion; techniques for complex multibody systems; variable speed control moment gyros; method of quadratic modes; focus on modeling techniques for aerospace systems.  
Prerequisite: AERO 622.

AERO 629 Experimental Aerodynamics  
Credits 3.3 Lecture Hours.  
Review of fundamental principles in aerodynamics; basics of instrumentation, electronics, data-acquisition; experimental techniques in aerodynamics/fluid mechanics; pressure, skin friction, force and velocity measurement techniques in wind and water-tunnel testing; conventional and novel techniques in data-processing and systems modeling; smart systems in experimental aerodynamics.  
Prerequisite: AERO 601.

AERO 630 Introduction to Random Dynamical Systems  
Credits 3.3 Lecture Hours.  
Building on basic probability theory, course covers theory and applications of discrete and continuous random processes. Particular attention shall be paid to the response of dynamical systems (discrete, linear and nonlinear), to random input processes and their application to Engineering Systems.  
Prerequisite: Graduate classification.

AERO 631 Model Predictive Control for Aerospace Systems  
Credits 3.3 Lecture Hours.  
Nonlinear optimal control and optimization, optimal control theory, dynamical systems stability and control, approximation theory, convex optimization; control of engineering systems with state and control constraints with parametric uncertainty; formulate optimal control problems, solve as nonlinear programming problems using available solvers; requires background in control theory.  
Prerequisites: Graduate classification and AERO 623 or comparable course.

AERO 632 Design of Advanced Flight Control Systems - Theory and Application  
Credits 3.3 Lecture Hours.  
Modeling, analysis, design and implementation of advanced flight control problems, specifically aerospace engineering applications; includes choice of controlled variables, reduction of controlled variables, design methodology, computational framework, implementation issues, and software environments using various toolboxes.  
Prerequisites: Graduate classification and approval of instructor.

AERO 633 Advanced Aerospace Multibody Dynamics  
Credits 3.3 Lecture Hours.  
Techniques for modeling, simulation, and analyzing multibody dynamical systems; includes development of kinematic expressions for articulating bodies, adding and constraining degrees of freedom through mappings; familiarization with industry codes, such as DISCOS; appreciation of learned techniques on various systems, including omni-directional vehicles, Stewart platforms, and gyroscopically-stabilized walking robots.  
Prerequisites: AERO 622 or graduate classification and approval of instructor.

AERO 640 Turbulence Processes  
Credits 3.3 Lecture Hours.  
Fundamentals of conservation, Lagrangian, transformation, variance properties; flow features: laminar, transition, turbulence regimes, characteristics, spectrum; statistical (filter/average) description: scales, Reynolds, arbitrary averaging, realizability; elementary turbulence processes: viscous, advective/inertial, role of pressure; elementary process models, viscous RDT, RDT for velocity gradients, equipartition of energy, restricted Euler equations; isotropic, homogeneous turbulence. May be taken 2 times for credit.

AERO 641 High-Speed Combustion for Propulsion  
Credits 3.3 Lecture Hours.  
Study topics in combustion relevant to high-speed subsonic/supersonic air-breathing propulsion; emphasis on the structure of detonations and the operation of combustors under supersonic conditions; structure of shock-waves and the mixing/chemical kinetics that take place in high speeds.  
Prerequisite: Graduate classification.

AERO 642 Laser Diagnostics for Combustion and Propulsion  
Credits 3.3 Lecture Hours.  
Laser diagnostics topics as applied to combustion and propulsion: brief exposition of fundamental electromagnetic theory; practice of basic experimental laser techniques used to measure thermochemistry; basic implementation of Raman and Rayleigh scatterings; Laser-Induced Fluorescence (LIF); detection methods, optical systems, noise contributions, and signal enhancement techniques will be discussed.  
Prerequisite: Graduate classification.

AERO 643 High-Performance Computational Fluid Dynamics  
Credits 3.3 Lecture Hours.  
Numerical simulations of fluid dynamics problems on massively parallel computers; focus on Direct Numerical Simulations (DNS) where all dynamically relevant scales are resolved; elements of both high-performance computing (HPC) and numerical methods to solve incompressible and compressible flows.  
Prerequisite: AERO 615 or approval of instructor.
AERO 649/MEMA 649 Generalized Finite Element Methods
Credits 3. 3 Lecture Hours.
Systematic introduction to the theory and practice of generalized finite element (FE) methods, including GFEM, the hp-cloud method, particle methods, and various meshless methods with similar character; precise formulation of the methods are presented; known theoretical results for convergence; important issues related to implementation, issues of numerical integration.
Prerequisite: Graduate classification.
Cross Listing: MEMA 649/AERO 649.

AERO 650 Spacecraft Attitude Determination
Credits 3. 3 Lecture Hours.
Spacecraft attitude determination systems; attitude and error parameterizations, attitude sensors, data processing and calibration; introduction to single- and three- axis attitude determination and to optimal attitude and error estimation: ECI motion and time definitions.
Prerequisite: AERO 423 or equivalent.

AERO 660 Nonlinear Flight Dynamics
Credits 3. 3 Lecture Hours.
Nonlinear equations of motion for coupled aircraft motions; coupled aerodynamic phenomena; application of the direct method of Lyapunov to nonlinear aircraft motions; elastic airplane equations of motion.
Prerequisite: AERO 421 or approval of instructor.

AERO 661 Optical Methods in Aerospace Engineering
Credits 3. 3 Lecture Hours.
Analysis and design of imaging and interferometric instruments for flight in and above the atmosphere and ground-based observation of orbiting objects; assessment of optical component and system performance.
Prerequisite: Graduate classification.

AERO 670 Turbulence Modeling
Credits 3. 3 Lecture Hours.
Identification of physical features that render Navier-Stokes equation difficult to compute or model; includes Reynolds-averaged and filtered Navier-Stokes equations for unresolved stresses; development of closure models for pressure-strain correlation, dissipation and turbulent transport Reynolds; algebraic Reynolds stress modeling, Large Eddy Simulations (LES) and hybrid methods; validation and prediction studies.
Prerequisites: AERO 640 and graduate classification or approval of instructor.

AERO 672 Perturbation Methods in Mechanics
Credits 3. 3 Lecture Hours.
Develop approximate solutions to algebraic, differential, and integral equations; analysis of nonlinear oscillations, nonlinear waves, and boundary-layers; emphasis on combined numerical/perturbations techniques and reducing Partial Differential Equation (PDE) to Ordinary Differential Equation (ODE).
Prerequisites: Graduate classification in aerospace, mechanical or civil engineering.

AERO 673 Boundary Layer Stability and Transition
Credits 3. 3 Lecture Hours.
Analytical, numerical, and experimental methods for the stability of bounded shear flows; includes techniques for estimating transition to turbulence and the control of transition through laminar flow control.
Prerequisites: Graduate classification and AERO 601, 602, or 603 or approval of instructor.

AERO 674 Hypersonic Flow
Credits 3. 3 Lecture Hours.
Theoretical formulation of hypersonic flow theory; techniques for hypersonic flowfield analysis; high temperature effects, including both equilibrium and nonequilibrium flows; classical and modern computational methods.
Prerequisite: AERO 303 or equivalent.

AERO 675 Aerothermodynamics
Credits 3. 3 Lecture Hours.
Fundamentals of kinetic theory, chemical thermodynamics and statistical mechanics; applications to high temperature chemically reacting equilibrium and nonequilibrium aerodynamic flows.
Prerequisite: AERO 303 or equivalent.

AERO 681 Seminar
Credit 1. 1 Lecture Hour.
Selected research topics presented by the faculty, students and outside speakers.
Prerequisite: Graduate classification.

AERO 684 Professional Internship
Credits 1 to 4. 1 to 4 Other Hours.
Engineering research and design experience at government or industry facilities away from the Texas A&M campus; design projects supervised by faculty coordinators and personnel at these locations; projects selected to match student’s area of specialization.
Prerequisites: Graduate classification and approval of committee chair and department head.

AERO 685 Directed Studies
Credits 1 to 12. 1 to 12 Other Hours.
Special topics not within scope of thesis research and not covered by other formal courses.
Prerequisite: Graduate classification in aerospace engineering.

AERO 689 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Selected topics in an identified area of aerospace engineering. May be repeated for credit.
Prerequisite: Approval of instructor.

AERO 691 Research
Credits 1 to 23. 1 to 23 Other Hours.
Technical research projects approved by department head.

AFST - Africana Studies

AFST 601 Methods of Inquiry Into Africana Studies
Credits 3. 3 Lecture Hours.
Familiarization with the methodological tradition of African-centered thinking and its relationship to the more popular term Afrocentricity; representation of the thoughts of notable African centered and Afrocentric scholars throughout history as a means to center African descended people throughout history, social analysis and theoretical accounts.
Prerequisite: Graduate classification.

AFST 685 Directed Studies
Credits 1 to 4. 1 to 4 Other Hours.
Directed individual study of problems in the Africana Studies field of research or scholarly activity not pertaining to thesis or dissertation, or selected instruction not covered by other courses.
Prerequisites: Approval of instructor and program director; graduate classification.
AFST 689 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours. 0 to 4 Lab Hours.
Selected topics in an identified area of Africana Studies.
Prerequisite: Graduate classification.

AGEC - Agricultural Economics

AGEC 601 Commodity Futures and Options Markets
Credits 3. 3 Lecture Hours.
Price risk management using agricultural commodity futures and options markets, theories of hedging and formulation of optimal hedging strategies, applied hedging strategies evaluated with emphasis on options relative to futures.
Prerequisites: One course in calculus and one course in statistics.

AGEC 603 Land Economics
Credits 3. 3 Lecture Hours.
Application of economic, financial, legal and related concepts and tools for decision making in land management, real estate development and appraisal of land and attendant resources; public and private property rights and current land and resource management issues emphasized; real estate valuation methods and use of electronic information systems studied.
Prerequisite: AGEC 422 or equivalent.

AGEC 604/PSAA 663 Natural Resource Economics
Credits 3. 3 Lecture Hours.
Critical evaluation of policies and procedures in natural resource development and use; identification of problems in resource development, the political-economic decision-making processes and analytical tools which can contribute to economic decisions.
Prerequisite: ECON 323.
Cross Listing: PSAA 663/AGEC 604.

AGEC 605 Rural Real Estate Appraisal and Organization
Credits 3. 3 Lecture Hours.
Concepts of property rights and their valuation; factors affecting the value of these rights are related to general economic theory to explain real estate market process; specific applications of appraisal techniques in valuing urban and rural real properties.
Prerequisite: AGEC 422.

AGEC 606 Water Resource Economics
Credits 3. 3 Lecture Hours.
Examination of economic concepts and tools contributing to the solution of water scarcity problems; development of working knowledge of water resource economics; policy options established and explored; analytical tools for performing policy and project assessment introduced and applied.
Prerequisite: MATH 142.

AGEC 607 Research Methodology
Credits 3. 3 Lecture Hours.
Scientific method in economic research: problem identification and selection, hypothesis testing, assumptions, model selection, data communication; evaluation of research studies and development of thesis prospectus or equivalent.
Prerequisite: MS or PhD graduate classification.

AGEC 610 Economics of Biosecurity
Credits 3. 3 Lecture Hours.
Economic and policy issues involved with decision making under risk of accidental or deliberate events of agricultural threats involved with animal diseases, food contamination, invasive species, infrastructure disruption, etc.; issues regarding assessments of damages, vulnerability and decision making regarding prevention, detection, response, and recovery.
Prerequisite: Graduate classification.

AGEC 614 Global Food and Agribusiness Policy
Credits 3. 3 Lecture Hours.
Public policies and programs affecting agriculture and agribusiness; development of policies and programs, identifying relevant issues, reviewing means to attain desired goals, and development of methods to evaluate the consequences of alternative farm policies on U.S. agriculture, agribusiness, trade and resources.
Prerequisites: AGEC 619 or ECON 607 and MATH 142.

AGEC 619 Managerial Economics in Agribusiness
Credits 3. 3 Lecture Hours.
Practical application of operational and strategic decision-making tools to agribusiness, focusing on important managerial and economic principles and understanding needed to carry out these functions.
Prerequisites: ECON 323, MATH 142 and STAT 303.

AGEC 621 Econometrics for Agribusiness
Credits 3. 3 Lecture Hours.
Econometric application and practice; analysis and interpretation of economic data for decision making and microcomputer implementation.
Prerequisites: MATH 142; STAT 303; corequisite: ECON 323; ECON 311 or AGEC 430.

AGEC 622 Agribusiness Analysis and Forecasting
Credits 3. 3 Lecture Hours.
Design, construction, use and evaluation of simulation, forecasting and optimization models to solve applied problems confronting decision makers in agribusiness.
Prerequisite: AGEC 621 or approval of instructor.

AGEC 625 Environment of Agribusiness
Credits 3. 3 Lecture Hours.
Analysis of the economic, social, political, technological and legal forces that impact the way in which global agribusiness firms compete; emphasis on intensive case study analysis.
Prerequisites: AGEC 619 and AGEC 621.

AGEC 629 Strategic Agribusiness Management
Credits 3. 3 Lecture Hours.
Practical application of operational and strategic decision-making tools to agribusiness; emphasis on problem recognition and economic analysis related to production, marketing and finance decisions facing agribusiness firms.
Prerequisites: AGEC 619, AGEC 621 and AGEC 625.

AGEC 630 Financial Analysis for Agribusiness Firms
Credits 3. 3 Lecture Hours.
Application of financial planning and analysis to agribusiness firms; capital budgeting and selection of investments; the role of debt structure and liquidity in firm growth and stability; alternatives for gaining control over financial resources, managing risk and maintaining business efficiency over time.
Prerequisites: ACCT 640 and FINC 635.
AGEC 633 Sustainability in World Development
Credits 3.3 Lecture Hours.
Economic development defined; economic structure, economic efficiency, equity, conservation and role of sustainability, characteristics of developing countries; problems facing development planners, policy makers, resource managers; role of local, regional and international institutions, policies, civil society, biodiversity, and climate change; economic foundation of project development, design, financing, and implementation issues.
Prerequisites: ECON 607 or equivalent.

AGEC 634 Rural Financial Markets and Financial Planning
Credits 3.3 Lecture Hours.
Organization, structure, conduct, and regulation of lending institutions serving commercial agriculture and rural borrowers; financial statement analysis; cash management; investment planning; loan portfolio analysis; management of the lending function of lenders serving rural businesses.
Prerequisite: Graduate classification.

AGEC 635 Consumer Demand Analysis for Food and Agricultural Products
Credits 3.3 Lecture Hours.
Analytical and empirical treatments of consumer behavior; use of neoclassical theory and modern adaptations in consumer demand analysis; specification, estimation, interpretation and evaluation of models of consumer behavior with emphasis on food commodities.
Prerequisites: ECMT 676, ECON 629 and AGEC 661.

AGEC 636 Agribusiness Markets and Applied Welfare Analysis
Credits 3.3 Lecture Hours.
Theory and practice of consumer and firm behavior in markets; the effects of various policies on markets; welfare measurement applied to problems related to the farm economy; food and resource processing; resource allocations decisions.
Prerequisites: AGEC 635 and 661; ECMT 676; ECON 629 and ECON 630.

AGEC 637 Production Economics and Dynamic Optimization in Agricultural Economics
Credits 3.3 Lecture Hours.
Production under certainty and uncertainty with emphasis on agribusiness firm behavior; economic theory and analytical and numerical methods related to dynamic optimization problems.
Prerequisites: AGEC 661; ECMT 675; ECON 629 and ECON 630.

AGEC 638 Managerial Economics for Regulatory Science
Credits 3.3 Lecture Hours.
Economic and business frameworks within which the regulations and standards governing the production of food operate; economic theories of the firm and fundamental calculations in finance as the foundation for cost/benefit analyses of existing and proposed regulations; applications to U.S. and global regulations and standards.

AGEC 639/SCSC 635 Comparative Global Standards in Food Systems
Credits 3.3 Lecture Hours.
Laws, regulations and standards governing the production, distribution, processing and marketing of food across regions of the world; international standard setting bodies and risk assessment committees; regulatory equivalency and harmonization; product approval procedures; cost/benefits of global standards and trade agreements.
Cross listing: SCSC 635/AGEC 639.

AGEC 641 Operations Research Methods in Agricultural Economics
Credits 3.3 Lecture Hours.
Theory and practice regarding the application of operations research tools to agricultural economics problem areas. Mainly concentrates on optimization approaches.
Prerequisite: AGEC 622.

AGEC 643 Applied Simulation in Agricultural Economics
Credits 3.3 Lecture Hours.
Design, construction, validation and use of Monte Carlo simulation models for risk analysis of economic systems; parameter estimation and simulation of multivariate probability distributions in econometric and behavioral models used for business and policy analysis under risk.
Prerequisites: AGEC 622 and AGEC 661 or approval of instructor.

AGEC 645 AGRI CONSUMPTION ANALY
Credits 3.3 Lecture Hours.

AGEC 652 International Agribusiness Trade Analysis
Credits 3.3 Lecture Hours.
Traditional trade theory encompassing the concepts of comparative advantage, the Heckscher-Ohlin-Samuelson model, the gain from specialization and trade, partial equilibrium analysis of free trade, violation of the free trade model, welfare effects of trade, trade creation and diversion, introduction to growth and development theories, the relationship between trade and development and related concepts.
Prerequisites: ECON 607 and MATH 142.

AGEC 659 Ecological Economics
Credits 3.3 Lecture Hours.
Study of the relationships between ecosystems and economic systems; understanding the effects of human economic endeavors on ecological systems and how the ecological benefits and costs of such activities can be quantified and internalized.
Prerequisite: Graduate classification.
Cross Listing: ESSM 671 and RENR 659.

AGEC 661 Applied Econometric Methods in Agriculture
Credits 3.3 Lecture Hours.
Application of econometric methods in a theoretical framework for the analysis of agricultural markets and farm firm behavior; emphasis on specifying and estimating agricultural production and demand functions and agricultural sector models; selected topics according to student needs.
Prerequisite: ECMT 676.

AGEC 671 Fundamentals in Agribusiness and Managerial Economics
Credits 3.3 Lecture Hours.
Economic theory and methods for analyzing operational and strategic problems facing managers of food, fiber and resource businesses; financial, marketing and management topics, including principal-agent, bargaining power, contract theory and business forecasting.
Prerequisites: ECON 629 and ECON 630.

AGEC 672 Fundamentals in Agricultural Markets and Information Economics
Credits 3.3 Lecture Hours.
Application of information economics theory for analysis of vertical and horizontal relationships between firms along the supply chain.
Prerequisites: AGEC 636 and 661; ECMT 676; ECON 629 and ECON 630.
AGEC 673 Fundamentals in Resource and Environmental Economics
Credits 3. 3 Lecture Hours.
Economic theories and empirical regularities related to the use and management of the environment and natural resources; valuation techniques, externalities, and intertemporal resource management.
Prerequisites: AGEC 635, AGEC 636, AGEC 637; ECON 629 and ECON 630.

AGEC 674 Food and Agricultural Trade and Policy Analysis
Credits 3. 3 Lecture Hours.
Trade policy, farm policy, macroeconomic policy, resource policy and development policy; analysis of policy impacts outside perfect competition and free trade assumptions.
Prerequisites: AGEC 614 and AGEC 652 or approval of instructor.

AGEC 676 Frontiers in Markets and Information Economics
Credits 3. 3 Lecture Hours.
Exploration of advanced topics in the field of markets and information economics. May be taken twice for credit.
Prerequisite: Graduate classification.

AGEC 677 Frontiers in Natural Resource and Environmental Economics
Credits 3. 3 Lecture Hours.
Exploration of advanced topics in the field of natural resource and environmental economics. May be taken twice for credit.
Prerequisite: Graduate classification.

AGEC 681 Seminar
Credit 1. 1 Lecture Hour.
Objectives are to define research problems, develop research problem statements with objectives and hypothesis and specify relevant models to accomplish the objectives and develop the skills in written communication.

AGEC 684 Professional Internship
Credits 1 to 3. 1 to 3 Other Hours.
Pre-professional experience within department guidelines conducted in the area of the student's field of interest.
Prerequisite: Graduate classification.

AGEC 685 Directed Studies
Credits 1 to 4. 1 to 4 Other Hours.
Directed individual study of a selected problem in the field of agricultural economics.

AGEC 689 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Selected topics in an identified area of agricultural economics. May be repeated for credit.

AGEC 691 Research
Credits 1 to 23. 1 to 23 Other Hours.
Thesis or dissertation research.

AGEC 693 Professional Study
Credits 1 to 9. 1 to 9 Other Hours.
Professional paper undertaken as a requirement for the Master of Science Non-Thesis or as an elective for the Master of Agribusiness. May be taken more than once, but not to exceed 3 hours of credit towards a degree.
Prerequisite: Approval of instructor.

AGEC 695 Frontiers in Agribusiness and Managerial Economics
Credits 3. 3 Lecture Hours.
Exploration of advanced topics in the field of agribusiness and managerial economics. May be taken twice for credit.
Prerequisite: Graduate classification.

AGLS - Ag. & Life Sciences

AGLS 600 Agriculture and Life Sciences Graduate Study Aboard
Credits 1 to 18. 1 to 18 Other Hours.
Approved study abroad student participation; reciprocal educational exchange programs. May be taken two times for credit.
Prerequisite: Admission to approved program.

AGLS 689 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Selected topics in an identified area of agriculture and life science. May be repeated for credit.
Prerequisites: Graduate classification and approval of instructor.

ALEC - Ag Leadersh, Ed. & Comm

ALEC 601 Advanced Methods in Agricultural Education
Credits 3. 3 Lecture Hours.
Learning theories; techniques and procedures to enhance the teaching-learning process; methods to evaluate learning.

ALEC 602 Advanced Instructional Design in Agricultural Science
Credits 3. 3 Lecture Hours.
Designing instruction to meet learning outcomes, motivate students, and evaluate objectives; learning theories and their impact on the teaching and learning process; choosing appropriate teaching methods for specific content; evaluating the teaching-learning process for improvement within the context of secondary agricultural science classrooms.
Prerequisites: Approval of instructor, graduate classification.

ALEC 603 Experiential Learning
Credits 3. 3 Lecture Hours.
Theory and practice in facilitating learning from experiences in formal, informal, and non-formal settings; experiential learning in classroom/laboratory settings, guided inquiry, internships/externships, service learning, project-based learning, and outdoor/adventure learning.
Prerequisite: Graduate classification.

ALEC 604 Writing for Professional Publication
Credits 3. 3 Lecture Hours.
Provides students in Agricultural and Extension Education with the skills necessary to compose research manuscripts, conference papers, and journal articles.
Prerequisites: Introductory research course and graduate classification.

ALEC 605 Facilitating Complete Secondary Agricultural Science Programs
Credits 3. 3 Lecture Hours.
Theory and practice in facilitating secondary agricultural science programs that include classroom instruction, supervised experience, and youth leadership development. Designed for students preparing to teach agricultural science in Texas public schools.

ALEC 606 Foundations of Leadership Theory
Credits 3. 3 Lecture Hours.
Theory and Practice of leadership theory foundational to leadership education. Focus on analysis of leadership theories and models; synthesis of leadership theory as a philosophy; and application of leadership theories in various professional settings. Stacked with ALED 340.

ALEC 607 Youth Leadership Programs
Credits 3. 3 Lecture Hours.
Methods and procedures of organizing and conducting youth leadership programs in school and non-school settings.
Prerequisite: Professional experience or approval of department head.
ALEC 608 Leadership of Volunteers
Credits 3.3 Lecture Hours.
Models of volunteerism; reasons for volunteers; assessment and evaluation techniques; task descriptions; organizational relationships.

ALEC 609 Learning Organizations
Credits 3.3 Lecture Hours.
Theory of instruction to support education in social systems language and archetypes; systems thinking theory including mental models; mastery, team learning, concept models of human organizations.
Prerequisites: ALED 340; graduate classification.

ALEC 610 Principles of Adult Education
Credits 3.3 Lecture Hours.
Identification of basic principles motivating adults to learn. Procedures to implement these principles in bringing about changes in adult behavior.
Prerequisite: Professional experience or approval of department head.

ALEC 611 Advanced Methods in Distance Education
Credits 3.3 Lecture Hours.
Course design theory for synchronous and asynchronous instructional methodology; teaching and training models for distance education.

ALEC 612 Advanced Instructional Design for Online Learning
Credits 3.3 Lecture Hours.
Emphasis on applying learning and teaching theory as the foundation for developing engaging online instruction; designed to pull together theory, concepts, and strategies for a broad understanding of the fundamentals of online learning from the conceptual stage to the development and delivery stages.
Prerequisites: Majors only and graduate classification.

ALEC 613 Techniques in eLearning Development and Delivery
Credits 3.3 Lecture Hours.
Provides the knowledge and skills necessary to develop and deliver effective online courses, training programs, and learning units; specific topics include: management of eLearning projects, needs assessment and audience analysis, creation and editing of documents, images, audio, and video.
Prerequisites: Majors only and graduate classification.

ALEC 615 Philosophy of Agricultural Education
Credits 3.3 Lecture Hours.
Historical and philosophical developments in education that brought about education in agriculture; ideas of individuals that culminated in agricultural education institutions and organizations.

ALEC 616 Facilitation of Leadership Programs
Credits 3.3 Lecture Hours.
Investigate models to design leadership education programs; incorporate strategies to enhance the leadership education process; critically analyze leadership education research and group leadership education processes.
Prerequisite: ALED 340 or ALEC 606.

ALEC 617 Leadership in Organizational Culture and Ethics
Credits 3.3 Lecture Hours.
Integration of organizational culture and ethical theories; implications and role of leaders in organizational culture and ethical situations; critical analysis of organizational culture and ethics in agricultural organizations.
Prerequisite: Graduate classification.

ALEC 620 Instrumentation and Survey Research Methods
Credits 3.3 Lecture Hours.
Principles, theories, techniques, and applications for developing survey questionnaires and conducting survey research in agriculture; developing questions; constructing instruments; implementing surveys; and reducing coverage and sampling errors.

ALEC 621 Methods of Online Survey Research in Agricultural Science
Credits 3.3 Lecture Hours.
Students explore the technical requirements necessary to correctly establish and administer online social science data collection instruments. Specific skills include writing *.asp code, database design and management, verification/permission sets, creating informational pop-ups, drop-down menus, and assorted graphics.
Prerequisite: ALEC 690 or similar Theory of Research course.

ALEC 622 Data Collection, Analysis, and Interpretation in Research in ALEC
Credits 3.3 Lecture Hours.
Data Collection, Analysis, and Interpretation in Research in Agricultural Leadership, Education, and Communications. Principles and techniques of data collection, analysis, and interpretation in agricultural leadership, education, and communications; interpretation and implications of finds/results in relation to current research; data analysis performed using statistical package software; collection, analysis, and interpretation to conform to published research in agricultural leadership, education, and communications.
Prerequisite: Research methods and basic statistics courses.

ALEC 623 Survey of Evaluation Strategies for Agriculture
Credits 3.3 Lecture Hours.
Designed to pull together theory, concepts, and strategies to give a broad understanding of the fundamentals of evaluation and to provide the knowledge and skills necessary to design and administer appropriate and effective evaluations.
Prerequisite: Graduate classification.

ALEC 624 Developing Funded Research Projects
Credits 3.3 Lecture Hours.
Students team with faculty mentor to develop a proposal for external funding from a federal agency; principles discussed to produce competitive proposals; proposal steps adapted to fit interests of the students and faculty.
Prerequisite: Approval of instructor.

ALEC 625 Program Evaluation and Organizational Accountability
Credits 3.3 Lecture Hours.
Examines the philosophy, methods, and issues of accountability and evaluation necessary to meet expectations of institutional mandates. Special emphasis on analytical tools and performance measures.
Prerequisite: Professional experience or approval of department head.

ALEC 630 Guidance and Counseling for Rural Youth
Credits 3.3 Lecture Hours.
Problems of youth with special attention given to rural youth; theories of vocational development reviewed and techniques and procedures developed to help youth make career choices.

ALEC 631 Development and Planning of Community Education Programs
Credits 3.3 Lecture Hours.
Focuses on the principles, theories, techniques, and applications for developing and planning educational program in a community setting; program development strategies, focusing educational programming in relation to issues identified citizens will be developed and enhanced in this course.
Prerequisite: Graduate classification.
ALEC 640 Methods of Technological Change  
Credits 3. 3 Lecture Hours.  
Dynamics of cultural change as theoretical framework for planned technological change; methods of planning and implementing change, its effects and how it can be predicted.  

ALEC 644 The Agricultural Advisor in Developing Nations  
Credits 3. 3 Lecture Hours.  
Trends, conditions, critical incidents, techniques, roles and preparation affecting the success of persons desiring to provide technical assistance in projects of agricultural development by serving as agricultural advisors in developing nations, especially in cross-cultural settings.  
Prerequisite: Approval of instructor.  

ALEC 645 Initiating, Managing and Monitoring Projects of International Agricultural Development  
Credits 3. 3 Lecture Hours.  
Origin of projects in agricultural development involving host governments; procedures in developing contracts with sponsors; duties and responsibilities of contract administrators, project leaders and the home institution; reporting systems, project reviews and evaluation procedures; procedures effective in managing projects.  
Prerequisite: ALEC 640 or approval of instructor.  

ALEC 646 Institutions Serving Agriculture in Developing Nations  
Credits 3. 3 Lecture Hours.  
Comparisons among programs and functions, strengths and weaknesses, organization, and relationships of institutions and agencies in public sectors serving agriculture in developing nations; includes those responsible for agricultural extension, agricultural research, agrarian reform, price stabilization, agricultural credit and agricultural cooperatives.  
Prerequisite: Approval of instructor.  

ALEC 652 Images of Agriculture: Visual Communication Research  
Credits 3. 3 Lecture Hours.  
Explore visual communication from theoretical, physiological, and interpretive perspectives as it applies to media images used to depict agriculture and agricultural issues; current research in visual communication and its application to agriculture; use of visual images in agricultural communication research.  
Prerequisite: ALEC 695 or introductory research methods.  

ALEC 681 Seminar  
Credit 1. 1 Lecture Hour.  
Group study and discussion of current developments in agricultural education; research and legislation as they affect programs in teacher education, agricultural science and related areas of education.  

ALEC 684 Professional Internship  
Credits 1 to 6. 1 to 6 Other Hours.  
On-the-job supervised experience program conducted in the area of the student's specialization.  
Prerequisites: Graduate classification.  

ALEC 685 Directed Studies  
Credits 1 to 4. 1 to 4 Other Hours.  
Studies related to classroom, laboratory, supervised activities in agriculture, work experience, extension education and adult educational activities in agricultural programs.  

ALEC 689 Special Topics in...  
Credits 1 to 4. 1 to 4 Lecture Hours.  
Selected topics in an identified area of agricultural education. May be repeated for credit.  

ALEC 690 Theory of Agricultural Education Research  
Credits 3. 3 Lecture Hours.  
Theory and design of research problems in agricultural education; communication of research proposal and results of research; evaluation of current research of faculty and students; review of current research literature. May be taken three times for credit.  
Prerequisite: Approval of major advisor.  

ALEC 691 Research  
Credits 1 to 23. 1 to 23 Other Hours.  
Initiation and completion of research for advanced degree.  
Prerequisite: Approval of department head.  

ALEC 692 Professional Study  
Credits 1 to 23. 1 to 23 Other Hours.  
Approved professional study of project undertaken as the terminal requirement for degree of Doctor of Education; preparation of a record of study summarizing the rationale, procedure and results of the completed project.  
Prerequisite: Approval of major advisor.  

ALEC 693 Professional Study in Agricultural Leadership Education and Communications  
Credits 1 to 3. 1 to 3 Other Hours.  
Approved professional paper undertaken as the requirement for the Master of Agriculture. May be taken more than once, but not to exceed 3 hours of credit toward a degree.  
Prerequisite: Graduate classification.  

ALEC 695 Frontiers in Research  
Credits 3. 3 Lecture Hours.  
Basic concepts of quantitative and qualitative research; understanding the social science research process; using appropriate methods to address research problems; enabling students to effectively evaluate, consume, and communicate research findings.  

ALEC 696 Qualitative Research Methods  
Credits 3. 3 Lecture Hours.  
Overview of qualitative research in agricultural education including conducting a literature review, writing a working hypothesis, keeping methodological and reflexive journals, developing data gathering tools, performing data analysis, ensuring trustworthiness measures, and writing a research manuscript.  
Prerequisites: ALEC 690 or ALEC 695 and graduate classification.  

ANES - Clinical Anesthesiology  

ANES 801 Clinical Anesthesiology  
Credits 1.25 to 10.  
This 2- or 4-week elective will introduce the student to the practice of anesthesiology.  
Prerequisite: Satisfactory completion of year three of the medical school curriculum.
ANES 802 Clinical Anesthesiology
Credits 1.25 to 10.
This 2- or 4-week elective will: 1) Provide an introductory experience in the practice of anesthesiology. All work will be under the supervision of a senior staff anesthesiologist or a resident. 2) Familiarize the student with the pharmacology and practical utilization of common general and local anesthetic agents. 3) Introduce the student to the preoperative evaluation, anesthetic management and post-op care of patients. 4) Teach the practical essentials of airway management including endotracheal intubation. 5) Teach the practical essentials of fluid and transfusion therapy. 6) Present the management concepts of patients requiring postoperative mechanical ventilation and specialized respiratory care. 7) Provide experience in arterial blood gas sampling, analysis, and interpretation.
Prerequisite: Satisfactory completion of year three of the medical school curriculum.

ANES 803 Clinical Anesthesiology
Credits 1.25 to 10.
This 4-week elective provides an introductory experience in the practice of anesthesiology.
Prerequisite: Satisfactory completion of year three of the medical school curriculum.

ANES 804 Clinical Anesthesiology
Credits 1.25 to 10.
This 4-week elective is designed for the students receive an introductory experience in the practice of anesthesiology under the supervision of faculty. Students will become familiar with the pharmacology and practice utilization of common general and local anesthetic agents, as well as, be introduced to the preoperative evaluation, anesthetic management and post-op care of patients.
Prerequisite: Satisfactory completion of year three of the medical school curriculum.

ANES 805 Obstetric Anesthesiology
Credits 1.25 to 10. 1.25 to 10 Other Hours.
This 2- or 4-week elective will provide the student with increasing responsibility for assessing and anesthetic planning for parturients admitted to labor and delivery. Students will become familiar with anesthetic agents used in obstetrics, managing anesthetic complications in obstetrics. This elective will also allow student to perform endotracheal intubations in the main operating room and start intravenous lines in Day Surgery.
Prerequisite: Satisfactory completion of year three of the medical school curriculum.

ANES 806 Clinical Anesthesiology
Credits 1.25 to 10. 1.25 to 10 Other Hours.
This 4-week elective will provide the student with an introduction to the scope and practice of Anesthesiology with emphasis on the multiple and varied roles performed by anesthesiologists in modern healthcare. Students will become familiar with study of Anesthesiology so as to enable a practical understanding of the principles of modern anesthesia care as they relate to a variety of clinical situations.
Prerequisite: Satisfactory completion of year three of the medical school curriculum.

ANES 807 Pain Clinic
Credits 1.25 to 10. 1.25 to 10 Other Hours.
This 4-week elective is designed to teach a broad spectrum of chronic pain conditions including, but not limited to, common causes of low back pain, thoracic pain, cervical pain, hip pain, shoulder pain, and neuropathic pain. It will increase the student’s familiarity and knowledge with the use of indications for common interventional management options for the above conditions.
Prerequisite: Satisfactory completion of year three of the medical school curriculum.

ANES 808 Anesthesiology
Credits 1.25 to 10. 1.25 to 10 Other Hours.
This 2- or 4-week elective will provide the student with an introductory experience in the practice of anesthesiology under the supervision of faculty. Student will become familiar with the pharmacology and practice utilization of common general and local anesthetic agents as well as be introduced to the preoperative evaluation, anesthetic management and post-op care of patients.
Prerequisite: Satisfactory completion of year three of the medical school curriculum.

ANES 809 Anesthesiology
Credits 1.25 to 10. 1.25 to 10 Other Hours.
This 2- or 4-week elective will provide the student with an introductory experience in the practice of anesthesiology under the supervision of faculty. Students will become familiar with the pharmacology and practice utilization of common general and local anesthetic agents, used in the practice of anesthesiology. This elective will also allow students to demonstrate basic airway management techniques, including airway evaluation, mask ventilation and direct laryngoscopy.
Prerequisite: Satisfactory completion of year three of the medical school curriculum.

ANES 985 Off Campus Student Initiated Elective
Credits 1.25 to 15. 1.25 to 15 Other Hours.
Formally described elective courses at another medical school or off-campus opportunities that are not formally approved electives. The College of Medicine requires that each of these electives be approved prior to the rotation.

ANES 999 On Campus Student Initiated Elective
Credits 1.25 to 12. 1.25 to 12 Other Hours.
This is an on-campus opportunity in the department of Anesthesiology in the College of Medicine that is not defined herein. Experiences may include clinical research, basic science research, library research, other basic science activities, and other clinical activities. Students interested in developing an elective of this type should contact the head of the appropriate department for additional details.

ANSC - Animal Science

ANSC 601/NUTR 601 General Animal Nutrition
Credits 3. 3 Lecture Hours.
Comparative nutrition of animal species contrasting digestive, metabolic and physiological functions involved in processing and using nutrients.
Prerequisite: ANSC 303/NUTR 303 or ANSC 318 or equivalent.
Cross Listing: NUTR 601/ANSC 601.
ANSC 602/NUTR 602 Energetics of Metabolism and Growth
Credits 3.3 Lecture Hours.
Current fundamental concepts in protein and energy metabolism relating to nutrients required for maintenance, growth and development of animals.
Prerequisite: BICH 410 or approval of department head.
Cross Listing: NUTR 602

ANSC 604 Ruminant Nutrition
Credits 3.3 Lecture Hours.
Current concepts in anatomy, physiology of digestion and metabolism in ruminant nutrition and their relationships to nutrition practice and research with emphasis on ruminants.
Prerequisites: ANSC 601/NUTR 601 or ANSC 602/NUTR 602; BICH 411 or BICH 603 and/or approval of department head.

ANSC 605 Advancements in Beef Cattle Production
Credits 3.3 Lecture Hours.
Current knowledge and concepts in production of lean beef; review of research in beef cattle production, breeding, nutrition, reproduction and economics.
Prerequisites: ANSC 305, ANSC 318 and ANSC 406 or approval of department head.

ANSC 607/FSTC 607 Physiology and Biochemistry of Muscle as a Food
Credits 3.3 Lecture Hours.
Biochemical, histological, anatomical and physical characteristics of muscle cells and factors associated with transformation of muscle cells into meat.
Prerequisite: BICH 410 or approval of department head.
Cross Listing: FSTC 607/ANSC 607.

ANSC 608 Beef Cattle Management
Credits 3.3 Lecture Hours.
Current knowledge of beef cattle ranch and feedlot production systems; nutrition, management, breeding, body composition, economics, health, pollution and sanitation control.
Prerequisite: ANSC 406 or ANSC 408.

ANSC 609 Physiology of Growth and Stress in Livestock
Credits 3.3 Lecture Hours.
Basic biochemical, physiological and endocrine mechanisms involved in processes regulating metabolism, growth and stress in livestock; current research and management principles/concepts useful to study growth and stress physiology; anabolic agents, anti-stress agents, immunoneutralization; transgenic livestock.
Prerequisites: BICH 410 and BICH 411 or approval of instructor.

ANSC 610 Applied Animal Ethology
Credits 3.2 Lecture Hours. 2 Lab Hours.
Review and evaluation of ethological research and principles as they relate to the management of animals; research principles and techniques used in studying animal behavior; psychological and physiological aspects of stress; topics of interest to students; visits to laboratories of researchers studying aspects of animal behavior/ethology.

ANSC 611 Equine Nutrition
Credits 3.3 Lecture Hours.
Review and evaluation of current research in equine nutrition; principles of digestive physiology and nutrition unique to equine species; comparative digestion; integration of scientific principles into feeding management systems to enhance productivity, health and longevity of the equine.
Prerequisite: ANSC 601/NUTR 601 or approval of department head.

ANSC 612 Equine Reproduction
Credits 3.3 Lecture Hours.
Review of current research relating to equine reproductive physiology and endocrinology; concepts from current research in equine reproduction to develop integrated reproductive management systems for horses.
Prerequisites: ANSC 433; graduate classification.

ANSC 613/NUTR 613 Protein Metabolism
Credits 3.3 Lecture Hours.
Basic concepts and recent advances in protein metabolism in animals with emphasis on physiological and nutritional significances; discussion of protein digestion; absorption of peptides; absorption, synthesis and degradation of amino acids; hormonal and nutritional regulation of protein turnover; determination of protein quality and requirements.
Prerequisite: BICH 411 or BICH 601 or equivalent or approval of instructor.
Cross Listing: NUTR 613/ANSC 613.

ANSC 614/GENE 614 Maximum Likelihood Estimation of Genetics
Credits 3.3 Lecture Hours.
Theoretical and analytical approaches to the application of maximum likelihood for the estimation of parameters under linear and nonlinear models; single and polygene genetic models including Hardy-Weinberg equilibrium, linkage analysis and quantitative trait loci detection.
Prerequisites: GENE 603; STAT 651 and STAT 652 or STAT 601.
Cross Listing: GENE 614/ANSC 614.

ANSC 615 Brazil: Comparative Ruminant Animal Nutrition
Credits 3.3 Lecture Hours.
Contrast two scenarios of ruminant production in Brazil; the effects of globalization on the two different production systems.
Prerequisites: ANSC 603 or ANSC 604, or approval of instructor.

ANSC 616 Equine Exercise Science
Credits 3.3 Lecture Hours.
Review and evaluation of current research in equine exercise science; physical, physiologic and metabolic adaptation to physical training in the horse; bioenergetics; nutritional requirements; problems in the hard-working horse; management and training approaches to delay fatigue in race/performance horses.
Prerequisites: ANSC 420; BICH 411; graduate classification.

ANSC 617/NUTR 617 Experimental Techniques in Meat Science
Credits 3.1 Lecture Hour. 6 Lab Hours.
Methods used in separating and identifying muscle proteins and fats; techniques for determining postmortem changes of muscle tissue as a result of ante-mortem treatments.
Prerequisites: ANSC 607/FSTC 607; BICH 411.
Cross Listing: NUTR 617/ANSC 617.

ANSC 618/NUTR 618 Lipids and Lipid Metabolism
Credits 3.3 Lecture Hours.
Chemical nature of various classes of lipids and lipid-derived hormones; absorption and metabolism of fatty-acids and lipids; regulation of lipid biosynthesis and obesity; relationship between lipid metabolism and cholesterol homeostasis; lipids as hormones.
Prerequisite: BICH 410 or approval of instructor.
Cross Listing: NUTR 618/ANSC 618.
ANSC 619 Physiological Chemistry of Livestock Species
Credits 3. 3 Lecture Hours.
Integration of biochemical concepts with physiological chemistry and intermediary metabolism of livestock species; unique aspects of absorption and cellular metabolism of carbohydrates, lipids and proteins in livestock species; regulation of cellular nutrient metabolism in livestock species.
Prerequisite: BICH 410 or approval of instructor.

ANSC 621 Issues in the Equine Industry
Credits 3. 3 Lecture Hours.
Integration of cumulative knowledge acquired in the equine science curriculum to demonstrate critical thinking and communication skills to address critical issues in the equine industry.
Prerequisite: Approval of instructor or enrollment in master of equine industry management program.

ANSC 622 Research Methods in Animal Science
Credits 2. 2 Lecture Hours.
Development of the conceptual framework of research; study of software programs for data recording, management, and analysis; evaluation of specific experimental designs historically used in animal experiments; discussion of interpretations found in peer-reviewed research publications; data presentation for scientific meetings and publication; the peer review process and publication in technical journals.
Prerequisite: STAT 651; or STAT 652.

ANSC 623/POSC 625 Precision Diet Formulation
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Theoretical and applied principles associated with precision feeding and diet formulation to optimize nutrient requirements; optimization using least-cost formulation, ingredient inventory, farm and feed mill management, and nutrient management of non-ruminants (poultry, swine, horse, and fish) and ruminant animals (beef and dairy).
Prerequisite: POSC 411 or ANSC 318.
Cross Listing: POSC 625/ANSC 623.

ANSC 624 Mammalian Developmental Genetics
Credits 3. 3 Lecture Hours.
Genetic control of developmental pathways responsible for pattern formation and morphogenesis in mammals; genetic networks and genome organization; significance of genetic regulatory networks as a source of evolutionary diversity.
Prerequisites: GENE 301 or GENE 320/BIMS 320; BICH 410/411 or equivalent.

ANSC 626/GENE 626 Analyses of Gene Expression
Credits 2. 1 Lecture Hour. 3 Lab Hours.
Proficiency in handling DNA and RNA gained during exercises used routinely in analyses of gene expression; RNA preparation and analysis on Northern blots; in vitro transcription and polyacrylamide gel analysis of nucleic acids; sub-cloning and mRNA quantitation using polymerase chain reaction.
Prerequisites: GENE 450 or approval of instructor; radiation safety training.
Cross Listing: GENE 626/ANSC 626.

ANSC 627 Carcass Composition and Quality
Credits 3. 3 Lecture Hours.
Survey of scientific literature regarding carcass composition; quality and palatability of meat animals; factors that affect differences among animals of the same specie; impact on value and usefulness.
Prerequisite: Graduate classification.

ANSC 628 Animal Breeding
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Concepts from Mendelian, population and quantitative genetics; heritability, selection response, selection criteria, selection index, genetic relationship, inbreeding, mating systems, hybrid vigor and genetic environmental interaction applied to livestock breeding and to production systems; interactions between genetics and nutrition, reproduction, production and management for both established concepts and recent trends emphasized according to special interests of students.
Prerequisite: ANSC 305 or POSC 414.

ANSC 629 Applied Animal Genomics
Credits 3. 3 Lecture Hours.
Theory and application of genomics by livestock industries; consideration of genetic markers, gene mapping methods, genome analysis and emerging technologies such as microarrays, transgenesis, cloning and marker assisted selection; exposure to bioinformatic tools for genomics.
Prerequisite: GENE 603.
Cross Listing: GENE 629 and POSC 630.

ANSC 630 Reproductive Biology I
Credits 4. 4 Lecture Hours.
Embryological, physiological, hormonal, cellular and molecular mechanisms involving the endocrine and reproductive systems of mammals; emphasis on domestic livestock, rodents and humans; current theories evaluated and discussed using information from recent scientific publications.
Prerequisites: ANSC 433; BICH 411 or equivalent.

ANSC 631 Reproductive Biology II
Credits 4. 4 Lecture Hours.
Embryological, physiological, hormonal, cellular and molecular mechanisms involving the endocrine and reproductive systems of mammals; emphasis on domestic livestock, rodents and humans; current theories evaluated and discussed using information from recent scientific publications.
Prerequisite: ANSC 630 or approval of instructor.

ANSC 633 Concepts in Reproduction
Credits 3. 3 Lecture Hours.
Concepts from current research in physiology of reproduction evaluated and applied for enhancement of livestock production efficiency; ovulation control, embryo transfer, multiple births and control of parturition.
Prerequisite: ANSC 433 or equivalent or approval of department head.

ANSC 636 Texas Panhandle Beef Production Tour
Credits 2. 2 Lecture Hours.
Covers all facets of beef production from cow/calf operation to retail product; experiential knowledge of technologies and practices to enhance efficiency; enlightens the array of career opportunities in the beef production industry.
Prerequisite: Approval of instructor.

ANSC 637 Food Safety: Policy, Regulations and Issues
Credits 3. 2 Lecture Hours. 1 Lab Hour.
Designed to explore the complexities of the regulations governing the production of foods of animal origin in the United States; requirements for countries importing products into the United States; federal, state and local requirement will be addressed.
Prerequisites: ANSC/FSTC 457/ANSC 457/657 or approval of instructor.
ANSC 638/GENE 638 Prediction of Genetic Merit
Credits 3. 3 Lecture Hours.
Mixed linear models and best linear unbiased prediction for genetic evaluation.
Prerequisite: GENE 613.
Cross Listing: GENE 638/ANSC 638.

ANSC 647/FSTC 647 Technology of Meat Processing and Distribution
Credits 3. 3 Lecture Hours.
Quantitative and qualitative characteristics of meat and meat products as related to food technology processing operations; manufacturing, preservation, packaging and merchandising.
Cross Listing: FSTC 647/ANSC 647.

ANSC 657/FSTC 657 Hazard Analysis and Critical Control Point System
Credits 3. 3 Lecture Hours.
Examination of the Hazard Analysis and Critical Control Point (HACCP) principles specifically related to meat and poultry; microbiological and process overviews; good manufacturing practices (GMP) and standard operating procedures (SOP) development; team-building and implementation into industry operations. This class is designed for the production of food and fulfills the training requirements of USDA’s HACCP regulation for meat and poultry (9 CFR Part 417), and FDA’s HACCP regulations for fish and fishery products (21 CFR Part 123 and 1240) and for juice (21 CFR Part 120).
Cross Listing: FSTC 657/ANSC 657.

ANSC 667/FSTC 667 Industrial Processed Meat Operations
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Application of scientific principles and business practices to manufactured meat products; interrelationships among marketing, manufacturing, product development, regulatory compliance and quality assurance in commercial processed meat operations.
Prerequisite: Approval of instructor.
Cross Listing: FSTC 667/ANSC 667.

ANSC 681 Seminar
Credit 1. 1 Lecture Hour.
Important current developments in field of animal science; review of current literature and presentation of papers on selected animal science topics.
Prerequisite: Graduate classification in animal science.

ANSC 684 Professional Internship
Credits 1 to 16. 1 to 16 Other Hours.
Experience in the application of formal training to a commercial operation under supervision of the operations manager and a designated faculty member. The student will investigate a matter of mutual interest to the enterprise manager and to Texas A&M University; will collect, analyze and interpret the data and report the results in a professional paper approved by his or her graduate committee.

ANSC 685 Directed Studies
Credits 1 to 4. 1 to 4 Other Hours.
Advanced studies in animal science problems and procedures. Problems assigned according to experience, interest and needs of individual student.
Prerequisite: Approval of department head.

ANSC 687/FSTC 687 Sensory Evaluation of Foods
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Application of sensory science principles and practices to food systems including an understanding of discriminative, descriptive and consumer sensory techniques.
Prerequisite: CHEM 222 or CHEM 228.
Cross Listing: FSTC 687/ANSC 687.

ANSC 689 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Special topics in an identified area of animal science. May be repeated for credit.
Prerequisite: Approval of department head.

ANSC 691 Research
Credits 1 to 23. 1 to 23 Other Hours.
Investigations leading to student's thesis or dissertation in fields of animal production, meats, wool and mohair, nutrition, inheritance of farm animals and physiology of reproduction.

ANSC 697/FSTC 697 Applied Microbiology for Foods of Animal Origin: Processing, Sanitation and Sanitary Design
Credits 3. 3 Lecture Hours.
Application of basic food microbiology knowledge and principles to food production processes and products: sources of microbiological contamination and their impact on food safety and spoilage; application of sanitary design and validation; testing and auditing to monitor and troubleshoot the process.
Prerequisites: DASC 326/FSTC 326, FSTC 326/DASC 326 or FSTC 606/DASC 606 or equivalent.
Cross Listing: FSTC 697/ANSC 697.

ANTH - Anthropology

ANTH 601 Biological Anthropology
Credits 3. 3 Lecture Hours.
Survey of the field of biological anthropology covering the principles of origin, processing, sanitary design and validation; testing and auditing to monitor and troubleshoot the process.

ANTH 602 Archaeological Methods and Theory
Credits 3. 3 Lecture Hours.
Development of archaeology as a discipline; methods and theories used in archaeology for reconstructing cultural history and cultural process.

ANTH 603 Seafaring Life and Maritime Communities
Credits 3. 3 Lecture Hours.
Employs primary and scholarly sources to examine the social organization, work routines, living conditions, and material culture of mariners between 1450 and 1950; broader trends in maritime communities and global seafaring are also investigated.
Prerequisite: Approval of instructor.

ANTH 604 Cultural Method and Theory
Credits 3. 3 Lecture Hours.
Survey of the theoretical concepts used in anthropology and how to construct models used in cultural and social anthropology.

ANTH 605 Conservation of Archaeological Resources I
Credits 4. 3 Lecture Hours. 3 Lab Hours.
Fundamentals and applications of artifact conservation techniques in archaeology.
Prerequisite: Knowledge of basic chemistry and physics recommended.

ANTH 606 Conservation of Archaeological Resources II
Credits 4. 3 Lecture Hours. 3 Lab Hours.
Comprehensive study of techniques used in the identification and conservation of metal and wooden artifacts.
Prerequisite: ANTH 605.
ANTH 607 Historical Archaeology  
Credits 3.3 Lecture Hours.  
Past and present theoretical positions and research strategies in historical archaeology.  
Prerequisite: ANTH 313 recommended.

ANTH 608 Skills in Maritime Archaeology  
Credits 3.3 Lecture Hours.  
Themes and tools of maritime archaeology; topics include remote sensing and mapping as well as interpreting, recording and storing data used in maritime archaeological surveys.  
Prerequisites: Graduate classification; approval of instructor.

ANTH 609 Culture and Evolution  
Credits 3.3 Lecture Hours.  
This seminar will seek to integrate the study of culture with the natural sciences. The foundation of the course is the assumption that culture is a biological adaptation and that we can examine it scientifically.

ANTH 610 Outfitting and Sailing the Wooden Ship 1400-1900  
Credits 3.3 Lecture Hours.  
Archaeological and historical sources to exam the outfitting and sailing of wooden ships between 1400 and 1900, a period popularly known as the "Age of Sail"; emphasis on two aspects that are of particular interest to the nautical archaeologist.  
Prerequisites: Approval of instructor; graduate classification.

ANTH 611 Nautical Archaeology  
Credits 3.3 Lecture Hours.  
Introduction to the history and theoretical basis of nautical archeology as a discipline; fundamental concepts in nautical science relevant to the history of seafaring; key developments in the history of seafaring.  
Prerequisites: Approval of instructor and graduate classification.

ANTH 612 Preclassical Seafaring  
Credits 3.3 Lecture Hours.  
Seafarers and watercraft of the ancient Near East and Mediterranean until ca. 700 B.C. Types of watercraft used, routes, cargoes, voyages of exploration and economics of maritime trade.

ANTH 613 Classical Seafaring  
Credits 3.3 Lecture Hours.  
Culture history of Mediterranean seafarers between ca. 700 B.C. and end of Byzantine Empire; types of ships and boats, sea law, naval tactics, harbor-works, routes, cargoes and economics of trade.

ANTH 614 Books and Treatises on Shipbuilding  
Credits 3.3 Lecture Hours.  
Examines a group of theoretical books of shipbuilding from the early 15th to the early 19th century; an overview of the theory and conceptual models with which ships were designed and built from the Renaissance to the 19th century.  
Prerequisite: ANTH 616.

ANTH 615 History of Shipbuilding Technology  
Credits 3.3 Lecture Hours.  
Design and construction of preserved and excavated sailing ships, the expertise of their builders and technology involved in ancient and early shipbuilding.  
Prerequisite: Approval of instructor.

ANTH 616 Research and Reconstruction of Ships  
Credits 3.2 Lecture Hours. 2 Lab Hours.  
Techniques of recording and interpreting excavated ships; preservation of hulls; ship drafting, modeling, lofting, testing and other methods used in the research and/or reconstruction of ships.  
Prerequisite: Approval of instructor.

ANTH 617 Conservation III--Preservation of Organic Materials  
Credits 3.3 Lecture Hours.  
Advanced and experimental methods of organic artifact conservation; emphasis on composite artifacts, gamma radiation polymerization, scanning electron microscope evaluation of artifacts and preservation of traditionally difficult to conserve artifacts.  
Prerequisite: ANTH 605.

ANTH 618 Medieval Seafaring in the Mediterranean  
Credits 3.3 Lecture Hours.  
Cultural history of seafaring in the Mediterranean region during medieval times; ship types and their uses, naval warfare, sea law, harbors, routes and cargoes, and maritime economic institutions and practices.  
Prerequisite: Approval of instructor.

ANTH 619 Indians of Texas  
Credits 3.3 Lecture Hours.  
Detailed study of diverse native/immigrant Texas Indian lifeways/cultures from late pre-European to contemporary times; ship types and their uses, naval warfare, sea law, harbors, routes and cargoes, and maritime economic institutions and practices.  
Prerequisite(s): Graduate classification, ANTH 602, or ANTH 604, or 620, or 650.

ANTH 620 Prehistory of Texas  
Credits 3.3 Lecture Hours.  
Survey of Texas prehistory from initial migration of human population 11,500 years ago to extermination or removal of Native American cultures by Europeans; processes of cultural adaptation and change to shifting environments and subsistence material correlates of world views and belief systems.

ANTH 622 Folklore Forms and Methods  
Credits 3.3 Lecture Hours.  
Introduction to major genres of folklore, various theories and approaches employed by researchers, and specialized resource materials in the humanities and social sciences.  
Prerequisites: Graduate classification in liberal arts and approval of instructor.

ANTH 623 Folk Narrative  
Credits 3.3 Lecture Hours.  
Theories and techniques used in the study of major folk narrative genres; folktale and legend; brief survey of other narrative forms, including tall tale, epic, myth, joke, personal and family narratives.  
Prerequisites: Graduate classification in liberal arts and approval of instructor.

ANTH 624/GEOG 687 Geoarchaeology  
Credits 3.3 Lecture Hours.  
Application of geological concepts and methods to archaeological research; history of geoarchaeology; site formation processes; modification of archaeological sites and sediments; landscape reconstruction and change and their effects on human behavior.  
Prerequisite: ANTH 602 or equivalent.  
Cross Listing: GEOG 687/ANTH 624.

ANTH 625 Zooarchaeology  
Credits 4.3 Lecture Hours. 3 Lab Hours.  
Analysis of animal bones from archaeological sites; inference of how prehistoric peoples hunted, domesticated and used animals.  
Prerequisite: Basic knowledge of zoology and archaeology.
ANTH 626 Human Paleopathology
Credits 3. 3 Lecture Hours.
Pathological lesions exhibited in prehistoric or early historic human remains; problems in diagnosing lesions in fossil skeletal remains, and evaluating the occurrence of these lesions in past populations.
Prerequisite: ANTH 425.

ANTH 627 Human Paleonutrition
Credits 3. 3 Lecture Hours.
Evaluation of past human diets and subsistence patterns from the perspective of research in archaeology, zooarchaeology, ethno-botany, bioarchaeology and cultural anthropology.
Prerequisite: 6 hours of advanced courses in anthropology or approval of instructor.

ANTH 628 New World Seafaring
Credits 3. 3 Lecture Hours.
Cultural history of seafaring in the Western Hemisphere from the fifteenth century to the present; ship types and their uses; harbors, commerce, naval warfare, sailing routes, maritime practices.
Prerequisites: ANTH 615 and ANTH 616 or approval of instructor.

ANTH 629 Post-Medieval Seafaring
Credits 3. 3 Lecture Hours.
Cultural history of European seafaring from the fifteenth century to the early twentieth century; ship types and their uses, shipping routes and cargoes, maritime technology and economic institutions, seafaring practices, and naval warfare.
Prerequisites: ANTH 615 and ANTH 616 or approval of instructor.

ANTH 630 Human Evolutionary Ecology
Credits 3. 3 Lecture Hours.
Evolutionary ecology of human behavior and culture, including habitat choice and use of space, time allocation, resource acquisition and allocation, sex and reproduction, altruism and cooperation and the coevolution of genes and culture.
Prerequisite: Graduate classification.

ANTH 631 Primate Behavioral Ecology
Credits 3. 3 Lecture Hours.
Survey the behavioral ecology of the nonhuman primates exploring topics such as their hunting behavior; sexual coercion; language capabilities; culture; tool use; homosexuality; dominance; parental care, ethics of field study and their conservation.
Prerequisite: Graduate classification.

ANTH 632 Archaeology of Death
Credits 3. 3 Lecture Hours.
Ethnographic and archaeological literature regarding human funerary behavior; emphasis on theoretical developments in the interpretation of burials for reconstructing social organization and social change; examine how mortuary practices and archaeological excavation define the burial assemblages studied by bioarchaeologists.
Prerequisite: Graduate classification.

ANTH 633 Deep Submergence Archaeology
Credits 3. 3 Lecture Hours.
Addresses issues in the new field of deep submergence archaeology by examining the discipline's history, technologies, specific case studies of ship wrecks in deep water and related topics. Students will interact with leaders in the field via video conferencing and visiting lecturers.
Prerequisite: Approval of instructor.

ANTH 634 Palynology
Credits 4. 3 Lecture Hours. 3 Lab Hours.
Principles and techniques used in palynology, pollen morphology, ontogeny, biochemistry, dispersion and preservation; role of palynology as a research tool in plant taxonomy agriculture, medicine, paleobotany and anthropology.

ANTH 635 Violence and Warfare
Credits 3. 3 Lecture Hours.
The anthropological study of violence and warfare and the place of these phenomena in cultural evolution, religion, economics, politics and social structure; particular attention paid to the rise of industrialized warfare and its impact on the pre-industrial world.
Prerequisite: Graduate classification.

ANTH 636 Computer Graphics in Archaeology
Credits 3. 3 Lecture Hours.
Focuses on the acquisition, manipulation, and presentation of archaeological data and images; a variety of state-of-the-art technologies will be employed to develop professional desktop publications, slide and digital presentations, electronic publications and images.
Prerequisite: Graduate classification.

ANTH 637 Paleoethnobotany
Credits 4. 3 Lecture Hours. 3 Lab Hours.
Interrelationship between plants and humans from prehistoric times to present, theoretical and methodological use of botany as a research tool for the understanding of cultural systems.

ANTH 638 Proposal Writing in Anthropology
Credits 3. 3 Lecture Hours.
Workshop class designed to assist advanced doctoral students in writing research grant proposals to fund their dissertation projects. Students will craft their own NSF-style Dissertation Improvement proposals, should be prepared to accept constructive criticism of their work, and to offer it on the work of their classmates.
Prerequisites: G8 standing and approval of instructor.

ANTH 639/WGST 639 Gender, Ethnicity, and Class in Archaeological Research
Credits 3. 3 Lecture Hours.
Explores theoretical and methodological issues in engendering archaeology; ideological biases in the interpretation of roles attributed to women, men and underrepresented groups in the past; the impact of cultural transformations on underrepresented groups and gender relations; and how to formulate research questions concerning these issues.
Prerequisite: Graduate classification.
Cross Listing: WGST 639/ANTH 639.

ANTH 640 Anthropological Ethics and Professionalism
Credits 3. 3 Lecture Hours.
Codes of professional ethics applicable to excavation and preservation of archaeological sites; ethnographic fieldwork and professional relationships with colleagues and informants; professional protocols for publication and presentation of research results.
Prerequisites: Graduate classification in anthropology and approval of instructor.

ANTH 641 Applied Anthropology
Credits 3. 3 Lecture Hours.
Theory, ethics and practical applications of anthropological methods and concepts as they relate to planned programs of socio-cultural change.
ANTH 642 Research Design in Anthropology  
Credits 3.3 Lecture Hours.  
Research design used by anthropologists to develop sampling strategies, test hypotheses and compile quantitative data.  
**Prerequisite:** ANTH 602.

ANTH 643 Australopithecine Paleoeecology  
Credits 3.3 Lecture Hours.  
Principles and techniques used in the reconstruction of paleoecology and paleoenvironments associated with the African australopithecines; including taphonomy, faunal evolution, climate forcing analysis, habitat preference and land-use patterns; detailed overview of the australopithecine fossil record from the Miocene to the Pleistocene.  
**Prerequisite:** Graduate classification.

ANTH 644 Classical Archaeology  
Credits 3.3 Lecture Hours.  
History of the discipline through the individuals, organizations, excavations, theoretical models and ethical issues that have shaped it.  
**Prerequisite:** Graduate classification.

ANTH 645 Cultural Resources Management  
Credits 3.3 Lecture Hours.  
History of cultural resources management (CRM): current federal and state laws and regulations; methods of determining site significance; the stages of CRM investigations; and the preparation of research designs and proposals; ethical issues such as curation and the treatment of human remains discussed.  
**Prerequisite:** Graduate classification.

ANTH 646 Ceramic Artifact Analysis  
Credits 3.2 Lecture Hours. 3 Lab Hours.  
The introduction of the basic concepts, methods, and approaches used in the analysis of archaeological pottery with a focus on the techniques and theories used to bridge the gap between the recovery of ceramic artifacts and their interpretation within various anthropological contexts.  
**Prerequisite:** Graduate classification.

ANTH 647 Lithic Artifact Analysis  
Credits 3.2 Lecture Hours. 3 Lab Hours.  
Laboratory-based course reviewing methods archaeologists use to analyze stone tools and debitage, including identification of tool-stone sources, reconstruction of technology, explanation of assemblage variability, and microscopic use-wear analysis.  
**Prerequisite:** Graduate classification and approval of instructor.

ANTH 648 Issues in Human Evolutionary Theory  
Credits 3.3 Lecture Hours.  
Examination of core concepts and theories in evolutionary biology and paleoanthropology, including human evolution, the species concept, and the role of the human fossil record.  
**Prerequisite:** Graduate classification.

ANTH 649 Origin and Evolution of the Genus Homo  
Credits 3.3 Lecture Hours.  
Survey of the human fossil record with a focus on Plio-Pleistocene specimens assigned to our own genus, Homo; provides an overarching picture of the evolutionary history of humans after the Australopithecines and reviews theoretical issues that have influenced our understanding of the evolution of Homo sapiens.  
**Prerequisite:** Graduate classification or approval of instructor.

ANTH 650 Ethnographic Field Methods  
Credits 3.3 Lecture Hours.  
Methods common to anthropology for the field collection of data on cultural behavior.  
**Prerequisites:** Graduate classification and approval of instructor.

ANTH 651 Pleistocene Prehistory of Northeast Asia and Alaska  
Credits 3.3 Lecture Hours.  
Survey of the Ice-Age paleoenvironments, prehistory and paleoanthropology of Siberia, China, Japan, and Bering Land Bridge area, especially in the context of human colonization of the region and origins of the first Americans.  
**Prerequisite:** Graduate classification.

ANTH 652 First American Archaeology  
Credits 3.3 Lecture Hours.  
Survey of past frontiers in First American studies important to the peopling of the Americas: review of the archaeology, geology, and dating of early sites in North, Middle, and South America; human migration hypotheses; biological evidence; and late Quaternary environmental factors.  
**Prerequisite:** Approval of instructor.

ANTH 653 Hunter-Gatherer Archaeology  
Credits 3.3 Lecture Hours.  
Overview of development of hunter-gatherer archaeology; current methodological and theoretical issues, especially use of ethnographic and environmental data; ecologically oriented case studies of late Pleistocene and Holocene hunter-gatherers; emphasis on land-use, site-structure, and site formation analyses, especially in North America.  
**Prerequisites:** ANTH 602 or ANTH 604 or approval of instructor.

ANTH 654 Archaeological Photography  
Credits 3.3 Lecture Hours.  
Instruction on how to better use cameras in the process of reporting archaeological sites and material culture by exploring old and new photographic technologies.  
**Prerequisite:** Graduate classification.

ANTH 655 Empires and World-System  
Credits 3.3 Lecture Hours.  
Application of the anthropological perspective to the problem of the rise of empires and the modern world-system over the last 600 years of world history; topics include ecocide, ethnocide, ethnogenesis and warfare.

ANTH 656 Ancient Foodways and Cooking Technology  
Credits 3.3 Lecture Hours.  
Study of ancient foodways and cooking technologies, particularly fire-based methods, especially in the context of human evolution, subsistence and settlement behavior, social organization, theoretical underpinnings, and archaeological manifestations thereof, with the focus on ancient hunter-gatherer populations, wild plants, terrestrial animals, and aquatic resources.  
**Prerequisite:** ANTH 602 or ANTH 604 or approval of Instructor.

ANTH 657 Topics in Technological Organization  
Credits 3.3 Lecture Hours.  
Review of current problems in the study of artifact assemblages; focus on theory explaining variability in artifact forms and technologies, especially in the contexts of subsistence and settlement behavior as well as exchange and social organization; alternating sections focus on lithic or ceramic technologies. May be taken two times for credit.  
**Prerequisite:** Graduate classification or approval of instructor.
ANTH 659 The Paleolithic World
Credits 3. 3 Lecture Hours.
(3-0). Survey of the Paleolithic archaeological record, beginning with the Oldowan and ending with the Upper Paleolithic and dispersal of modern humans to Australia and the Americas; review of major changes in technology, subsistence and land-use strategies that shaped the Paleolithic World.
Prerequisite: Graduate classification or approval of instructor.

ANTH 660 Field Archaeology
Credits 1 to 12. 1 to 12 Other Hours.
Field instruction in the methods of archaeological excavations; recovery and cataloging of cultural, floral and faunal remains; and interpretation of these data. Locations of the field course will vary according to site. Field trips required. May be taken more than once but not to exceed 8 hours of credit toward an MA degree and not to exceed 12 hours of credit toward a PhD degree.
Prerequisite: ANTH 602 or equivalent.

ANTH 661 Environmental Archaeology
Credits 3. 3 Lecture Hours.
Examination of the paleoecological context in which past humans interacted with the natural environment; review of advanced principles, method and theory, and practical applications used in paleoenvironmental reconstruction.
Prerequisite: Graduate classification or approval of instructor.

ANTH 662 Method and Theory in the Peopling of the Americas
Credits 3. 3 Lecture Hours.
Interdisciplinary review of current evidence from the fields of archaeology, genetics, biological anthropology and paleoecology for the dispersal of modern humans to the New World during the Pleistocene; understanding theory and method used to explain prehistoric human migration and colonization of empty lands.
Prerequisite: Graduate classification or approval of instructor.

ANTH 667 Human Variation
Credits 3. 3 Lecture Hours.
Biological basis of variation in the physical features of modern humans; details of anatomical and physiological differences of living populations to understand their adaptive and historical significance; history of human variation studies rooted in the historical notion of “race”.
Prerequisite: Graduate classification or approval of instructor.

ANTH 670 Bridging Theme Seminar in Anthropology
Credits 3. 3 Lecture Hours.
Examination of topics that bridge two or more subfields in anthropology, including studies of diasporas, dispersals and migration; evolution and ecology; material culture and technology; and food, nutrition, and culture. May be taken three times for credit.
Prerequisite: Graduate classification.

ANTH 684 Anthropology Internship
Credits 3 to 9. 3 to 9 Other Hours.
Opportunity to put anthropology learned in the classroom into practice; may be used to gain practical experience in a variety of settings including: local, state or federal agencies; museums; non-profit organizations; non-governmental organizations; and private firms.
Prerequisites: ANTH 601, ANTH 602, ANTH 604 or ANTH 602, ANTH 615, ANTH 616; approval of committee chair.

ANTH 685 Directed Studies
Credits 1 to 12. 1 to 12 Other Hours.
Directed individual study of selected problems in anthropology.
Prerequisite: Approval of instructor.

ANTH 689 Special Topics in...
Credits 1 to 12. 1 to 12 Lecture Hours.
Selected topics in an identified area of anthropology. May be repeated for credit.
Prerequisite: Approval of instructor.

ANTH 691 Research
Credits 1 to 23. 1 to 23 Other Hours.
Research for thesis.
Prerequisite: Approval of graduate advisor.

ARCH - Architecture

ARCH 600 Introduction to Architecture and Urban Design
Credits 2. 1 Lecture Hour. 1 Lab Hour.
Introductory seminar and studio on architecture and urban design; focus on topical readings, in-class discussions and short writing exercises; provides opportunity to learn or refine hand drawing, rendering, and model building, and to learn to be productive and creative within the studio context.
Prerequisite: Graduate classification in architecture or approval of instructor.

ARCH 601 Design Fundamentals I
Credits 6. 3 Lecture Hours. 9 Lab Hours.
Introduction to the development of verbal (design vocabulary), graphic, research and critical thinking skills through the design of small-scale projects, and investigation of typologies and precedents as the basis for architectural design.
Prerequisites: Graduate classification in architecture or approval of instructor; career change program, ARCH 600 and concurrent enrollment in ARCH 610.

ARCH 602 Design Fundamentals II
Credits 6. 3 Lecture Hours. 9 Lab Hours.
Further development of verbal, graphic, research and critical thinking skills through architectural design projects, with emphasis on basic understanding of major philosophical doctrines and their influence on architectural theory; studies of place-making, space, form and order; knowledge of world views, formal spatial manipulations and design vocabulary.
Prerequisites: ARCH 601, ARCH 610, ARCH 612 or approval of instructor.

ARCH 603 Design Fundamentals III
Credits 6. 3 Lecture Hours. 9 Lab Hours.
Theory and practice of architecture; methods and techniques used in the analysis and synthesis of concepts unique to spatial enclosure; developing responses to building systems; objects in a current cultural, physical or social context; complex building programs, site development and design solutions integrating formally expressive visual ideas and functional planning.
Prerequisite: ARCH 602.

ARCH 605 Architectural Design I
Credits 6. 2 Lecture Hours. 12 Lab Hours.
Application of verbal, graphic, research, critical thinking and fundamental design skills to architectural projects that emphasize design theory, systems of ordering in architecture and urban design, use of precedents, site and contextual issues; includes program development and concerns for public health, safety and welfare. Core design studio for professional degree candidates.
Prerequisite: Graduate classification in architecture or approval of instructor.*
ARCH 606 Architectural Design II
Credits 6. 2 Lecture Hours. 12 Lab Hours.
Application of verbal, graphic, research, critical thinking and fundamental design skills to architectural projects that emphasize the integration of structural, environmental, life safety, building envelope systems, and building service systems; includes code compliance, resource conservation, cost control and economic analysis. Core design studio for professional degree candidates.
Prerequisite: ARCH 605.*

ARCH 607 Architectural Design III
Credits 6. 2 Lecture Hours. 12 Lab Hours.
Application of verbal, graphic, research, critical thinking and comprehensive design skills to advanced architectural projects or design competitions that address cultural traditions, human behavior and diversity, the context of architecture, collaborative skills, ethics and professional judgement. Core design studio.
Prerequisite: ARCH 606.*

ARCH 610 Visual Communications
Credits 3. 2 Lecture Hours. 4 Lab Hours.
Investigation of the structural factors that influence the development of architectural space and form; introduction of the physical principles that govern statics and strength of materials through design of timber and steel components of architectural structures.
Prerequisite: ARCH 612 or approval of instructor.

ARCH 612 Structural and Environmental Technology Concepts
Credits 3. 3 Lecture Hours.
An introductory course which is intended to quickly and broadly develop the vocabulary base, visual understanding and familiarity with technological systems that architects deal with throughout their practice.
Prerequisites: Graduate classification or approval of instructor; ARCH 335 or ARCH 615 or equivalents.*

ARCH 614 Elements of Architectural Structures
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Investigation of the structural factors that influence the development of architectural space and form; introduction of the physical principles that govern statics and strength of materials through design of timber and steel components of architectural structures.
Prerequisite: ARCH 612 or approval of instructor.

ARCH 615 Elements of Environmental Control Systems
Credits 3. 3 Lecture Hours.
Theory and applications of building energy use, envelope design, shading analysis, heating and cooling systems, lighting design, building water supply plumbing and drainage systems, electrical, acoustical, fire and lightning protection, transportation systems and construction materials; design opportunities, calculations, equipment selection, and component sizing as they relate to design.
Prerequisite: ARCH 612 or approval of instructor.

ARCH 619 Applied Solar Energy
Credits 3. 3 Lecture Hours.
Technology behind applied solar energy design, including: calculating solar radiation, heat transfer related to solar design; active systems; FCHART and economics.
Prerequisites: Graduate classification or approval of instructor; ARCH 335 or ARCH 615 or equivalents.

ARCH 621 Energy Optimization in Building Design
Credits 3. 3 Lecture Hours.
Optimum energy use strategies for commercial buildings, hourly energy simulation methods, building envelope and HVAC system energy optimization by computer simulation techniques; life-cycle cost analysis of building energy systems; case studies in commercial building applications.
Prerequisites: Graduate classification or approval of instructor; ARCH 633 or ARCH 615 or equivalents.*

ARCH 622 Sustainable Building Design Technology
Credits 3. 3 Lecture Hours.
Fundamentals of sustainability in building, including social, political and economic issues—focusing particularly on conservation of natural resources; design and construction of earth integrated solar buildings, including cooling, heating, lighting and habitability assessments.
Prerequisite: Graduate classification or approval of instructor.

ARCH 623 Design Methods I
Credits 3. 3 Lecture Hours.
Importance of intuitive methods in design; meaning, symbolism and creativity in art and architecture; techniques to develop creative approaches to problem-solving.
Prerequisite: Graduate classification or approval of instructor.

ARCH 624 Theory of Placemaking
Credits 3. 3 Lecture Hours.
An introduction to and an exploration of the sources, principles, theories, and physical expressions of the phenomenon of place creation and its relationship to sustainable urbanism; investigates the origin of place theory and its meaning as expressed in the various forms, functions and scales of places applicable to architecture and planning.
Prerequisite: Graduate classification or approval of instructor.

ARCH 628 Tools for Green Building Design
Credits 3. 3 Lecture Hours.
Modeling tools and techniques to explore and support sustainable design; develop a deeper understanding of the relationship between architectural design and the environmental forces of sun, wind, and light; design-centered course; helps test the students architectural designs through the use of available modeling tools.
Prerequisite: Graduate classification or approval of instructor.

ARCH 631 Applied Architectural Structures
Credits 3. 3 Lecture Hours.
Structural analysis of building structural systems: components, frames, shapes; selection and economics of structural systems; survey of current structural design codes; supervision practices in structural construction.
Prerequisite: Graduate classification or approval of instructor.

ARCH 633 Applied Architectural Systems
Credits 3. 3 Lecture Hours.
Building energy consumption patterns and conservation strategies; natural and mechanical subsystems for environmental control; subsystem design criteria, economic considerations and selection methods.
Prerequisite: Graduate classification or approval of instructor; ARCH 335 or ARCH 615 or equivalents.*

ARCH 634 Architectural Lighting
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Attributes of the lighting environment, lighting and energy issues, daylight availability, building design for daylighting, heat loss control, solar shading, daylighting models, graphical analytical and computer methods of analysis, visual and lighting comfort evaluation, integration of daylight and electric light, energy analysis.
Prerequisite: Graduate classification or approval of instructor; ARCH 335 or equivalent.
ARCH 638 Architectural Theory—Renaissance Through 19th Century
Credits 3. 3 Lecture Hours.
Architectural Theory—Renaissance Through 19th Century. Review of
architectural theory and practice from the 15th to 19th centuries with
emphasis on the classical tradition, its transformations in France and in
Great Britain and Germany; aspects of this evolution.
Prerequisite: Graduate classification or approval of instructor.

ARCH 639 Twentieth Century Architecture: Theory and Practice
Credits 3. 3 Lecture Hours.
Background and exploration of Modern Architecture, including
consideration of region, materials, structure and style, as well as the
social and economic factors that influence architectural form and content;
discussion of the work and writings of 20th century architects and
architectural theorists.
Prerequisite: Graduate classification or approval of instructor.

ARCH 640 Morphology of Architectural Form
Credits 3. 3 Lecture Hours.
Forces influencing structure and form of architecture: climate, culture, site,
economics, construction methods.
Prerequisite: Graduate classification or approval of instructor.

ARCH 643 Software Analysis for HVAC Systems in Low Energy
Buildings
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Energy analysis (using Energy Plus software) with an emphasis on
developing strategies for low energy use; simulation of various heating
and cooling systems in low energy buildings; analysis of the mechanical
equipment (including air handling systems, chiller and boilers), the building
envelope, energy management control systems and indoor air quality.
Prerequisite: ARCH 633 or equivalent.

ARCH 644 Seminar in Art and Architectural History
Credits 3. 3 Lecture Hours.
Advanced topics in art and architectural history emphasizing methods
of analysis and development of theory, including case studies from both
western and non-western traditions; topics vary each semester.
Prerequisite: Graduate classification or approval of instructor.

ARCH 646 Historic Preservation Theory and Practice
Credits 3. 3 Lecture Hours.
History of the preservation movement in the U.S. Architectural and
regulatory techniques employed in building preservation; case study of
selected examples.
Prerequisite: Graduate classification or approval of instructor.

ARCH 647 Recording Historic Buildings
Credits 5. 2 Lecture Hours. 9 Lab Hours.
Techniques for recording historic buildings; measuring and drawing
to Historic American Building Survey Standards; field experience in
photography, field notes and record drawing preparation.
Prerequisites: Graduate classification or approval of instructor.

ARCH 648 Building Preservation Technology
Credits 3. 3 Lecture Hours.
Preservation technology related to the diagnosis and treatment of defects
in buildings; case studies of significant historic structures. Field study may
be required for which departmental fees may be assessed to cover costs.
Prerequisite: ARCH 646 or approval of instructor.

ARCH 649 Advanced History of Building Technology
Credits 3. 3 Lecture Hours.
Readings and discussion of current topics in history of building technology;
development of understanding the importance of materials of construction
to the creation of historical forms of sacred architecture across faith and
around the world.
Prerequisite: Graduate classification or approval of instructor.

ARCH 653 Building Information Modeling in Architecture
Credits 3. 3 Lecture Hours.
Building Information Modeling (BIM); principles, methods and applications
in the building lifecycle with a focus on the design process; includes
computer-aided design, parametric modeling, databases, web
technologies, design performance simulation and visualization.
Prerequisites: Graduate classification or approval of instructor.

ARCH 655 Parametric Modeling in Design
Credits 3. 3 Lecture Hours.
Parametric modeling principles, methods and applications in
environmental design and research; architectural geometry at basic and
advanced levels; parametric equations and models; visual programming
method; scripting method; constraints, rules and algorithms; elements and
patterns of parametric design; parametric simulation; modeling tools.
Prerequisite: Graduate classification or approval of instructor.

ARCH 657 Advanced Professional Practice and Ethics
Credits 3. 3 Lecture Hours.
Issues and relationships within the business, legal and political
environment; legal forms of practice; office organization, personnel
practices, policies and management; expanded services; economics
of practice, profit planning and accounting; client selection; standard
form agreements with consultants and for specialized services, risk
management.
Prerequisites: Graduate classification or approval of instructor.

ARCH 660 Design Programming
Credits 3. 3 Lecture Hours.
Study of successful programming approaches to meet user needs in
design projects; history and definition of programming, programming
techniques, documentation and case studies; applications to buildings,
landscape projects and urban design.
Prerequisite: Graduate classification or approval of instructor.

ARCH 663 Interior Architecture
Credits 3. 3 Lecture Hours.
Theory and application of design processes incorporating programming,
space planning, analysis and communication of interior requirements for
various building types with emphasis on spatial organization, selection of
components and materials to satisfy user needs; emphasis on design of
the workplace as the synthesis of human factors, organizational theory,
systems technology and communication.
Prerequisite: Graduate classification or approval of instructor.

ARCH 669 Foundations of Research in Architecture
Credits 3. 3 Lecture Hours.
Introduction to the research process and its application to problems in
architecture; survey of current literature on research design methods
relevant to diverse architectural problems; qualitative and quantitative
research strategies and techniques; communicating research results. May
be taken two times for credit.
Prerequisites: Graduate classification; concurrent enrollment in ARCH
681 and ARCH 690.
ARCH 673/LAND 632 Design for Active Living
Credits 3. 3 Lecture Hours.
Understanding the forms and characteristics of the built environment and the influence on human behaviors, lifestyles and health; theoretical and empirical insights into the issues of physical activity, obesity and automobile dependency; focus on how changes in the built environment help address these issues.
Prerequisite: Graduate classification or approval of instructor.

ARCH 674 Typologies of Contemporary Hospital Design
Credits 3. 3 Lecture Hours.
Introduction to the contemporary planning of hospitals; comparisons of hospital design by contemporary practitioners; best practice models, repetitive patterns, and innovative designs.
Prerequisite: Graduate classification or approval of instructor.

ARCH 675 Health Design and Research
Credits 3. 3 Lecture Hours.
Examination of health environments to include buildings, healthcare gardens and restorative landscapes, and urban design for home-based care and independent living; emphasis on research-informed approaches for patient-centered design that reduce stress and promote improved health outcomes.
Prerequisite: Graduate classification or approval of instructor.

ARCH 676 Survey of Human Behavior and Design
Credits 3. 3 Lecture Hours.
Examination of human behavior and attitudes that influence spatial decision making; includes sections on environment and behavior, real estate finance, urban design decision making.
Prerequisite: Graduate classification or approval of instructor.

ARCH 677 Foundations of Healthcare Design
Credits 3. 3 Lecture Hours.
Introduction to the theory of healthcare design over the course of time; exploration of the relationship of the medicine, science, art, and culture of each period with the design of buildings and environments for healthcare; emphasis on historic periods and the contemporary.
Prerequisite: Graduate classification or approval of instructor.

ARCH 681 Seminar
Credit 1. 1 Lecture Hour.
Discussion and review of current practice in architecture and environmental design.
Prerequisite: Graduate classification or approval of instructor.

ARCH 684 Professional Internship
Credits 1 to 8. 1 to 8 Other Hours.
Professional practice under approved arrangement with public or private agencies or in residence to complement academic coursework and to provide the basis for, and allow the preparation of, an appropriate report.
Prerequisite: Graduate classification or approval of instructor and department head.

ARCH 685 Directed Studies
Credits 1 to 6. 1 to 6 Other Hours.
Individual problems involving application of theory and practice in design and construction of buildings and groups of buildings.
Prerequisite: Graduate classification or approval of instructor and department head.

ARCH 689 Special Topics in...
Credits 1 to 6. 1 to 6 Lecture Hours. 0 to 4 Lab Hours.
Selected topics in an identified field of architecture. May be repeated for credit.
Prerequisite: Graduate classification or approval of instructor or department head.

ARCH 690 Research Ideologies for Architecture
Credits 3. 3 Lecture Hours.
Design of research in architecture; evaluation of research methodologies from current research literature.
Prerequisite: Graduate classification or approval of instructor and department head.

ARCH 691 Research
Credits 1 to 23. 1 to 23 Other Hours.
Research for and preparation of dissertation.
Prerequisite: Graduate classification or approval of instructor and department head.

ARCH 693 Professional Study
Credits 1 to 23. 1 to 23 Other Hours.
Application of verbal, graphic, research and critical thinking skills to an approved, individually selected architectural issue or design project that will advance the broad understanding of architecture and its impact on people. The terminal requirement for the Master of Architecture degree. May be taken more than once but not more than 6 hours used toward a degree.
Prerequisites: ARCH 605, ARCH 606, ARCH 607; proposal approval.

ASTR - Astronomy

ASTR 601/PHYS 641 Extragalactic Astronomy
Credits 3. 3 Lecture Hours.
Overview of observations of galaxies and large-scale structures in the Universe to understand their formation and evolution from theoretical and observational perspectives; galaxy luminosity functions; evolution of stellar populations and chemical enrichment; clusters and AGN.
Prerequisites: PHYS 601; or ASTR 314 and PHYS 302; or approval of instructor.
Cross Listing: PHYS 641/ASTR 601.

ASTR 602/PHYS 642 Astronomical Observing Techniques and Instrumentation
Credits 3. 3 Lecture Hours.
Theory and practice of obtaining and analyzing astrometric, photometric, spectroscopic, and interferometric measurements of astronomical sources across the electromagnetic spectrum; principles of design, fabrication, assembly, test, deployment, and use of astronomical instruments.
Prerequisites: PHYS 615 or equivalent; or approval of instructor.
Cross Listing: PHYS 642/ASTR 602.

ASTR 603/PHYS 643 Stellar Astrophysics
Credits 3. 3 Lecture Hours.
Theoretical and observational aspects of stellar astrophysics; thermodynamic properties of stellar interiors; energy sources; nuclear processes and burning stages; convective and radiative energy transport; evolutionary models; atmospheres; stability and pulsations; chemical enrichment processes; population synthesis.
Prerequisites: PHYS 606 and PHYS 607 or equivalents; or approval of instructor.
Cross Listing: PHYS 643/ASTR 603.
ATMO 601 Fundamentals of Atmospheric Dynamics
Credits 3. 3 Lecture Hours.
Basic concepts of fluid dynamics; meteorological approximations and coordinate systems; simple models and wave motion; barotropic models.
Prerequisite: Approval of instructor.
ATMO 602 Atmospheric Physics I
Credits 3. 3 Lecture Hours.
Integrated treatment of the dry and moist thermodynamics of the atmosphere, and cloud and precipitation microphysics.
ATMO 603 Quantitative Methods for the Atmospheric Sciences
Credits 3. 3 Lecture Hours.
Mathematical and numerical methods applied to ODE's, PDE's and statistical methods; methods of analysis and modeling of atmospheric phenomena.
Prerequisites: Concurrent registration in ATMO 601 and CSCE 203 or equivalents.
ATMO 604 General Circulation and Climate
Credits 3. 3 Lecture Hours.
Observed large scale circulation and climate of the earth; physical processes which maintain relevant budgets; models and theories explaining mean observations.
Prerequisite: ATMO 601.
ATMO 606 Atmospheric Chemistry I
Credits 3. 3 Lecture Hours.
Fundamentals of atmospheric chemistry; tropospheric ozone, NOx and HOx cycling, sulfur chemistry, stratospheric chemistry, and aerosol composition; analytical measurement methods; review of chemical basics as needed.
ATMO 611 Atmospheric Dynamics II
Credits 3. 3 Lecture Hours.
Continuation of ATMO 611; flow in planetary boundary layer; balanced flows; atmospheric instabilities; tropical dynamics.
Prerequisite: ATMO 601 or approval of instructor.
ATMO 612 Atmospheric Physics II
Credits 3. 3 Lecture Hours.
Continuation of ATMO 602. Radiative transfer into the atmosphere.
Prerequisite: ATMO 602.
ATMO 613 Advanced Atmospheric Chemistry
Credits 3. 3 Lecture Hours.
An advanced survey of fundamental atmospheric processes involving biogeochemical cycles, air pollution, tropospheric chemistry, atmospheric aerosols and stratospheric chemistry.
Prerequisite: ATMO 606.
ATMO 629 Climate Change
Credits 3. 3 Lecture Hours.
Climate of the geological and recent past; methods of assessing climate and climatic change; mechanisms, models, theories, impact and prediction of climatic change.
Prerequisites: ATMO 324 or equivalent; approval of instructor.
ATMO 631 Climate Modeling
Credits 3. 3 Lecture Hours.
A study of mathematical models used in the simulation of climate. Development and structure of selected members of the hierarchy of models ranging from energy balance models to general circulation models. Applications to paleoclimate and future climate scenarios.
Prerequisite: Approval of instructor.
ATMO 632 Statistical Methods in Climate Research
Credits 3. 3 Lecture Hours.
Advanced techniques especially applicable to climatology; space-time random field analysis applied to stochastic models, parameter estimation, statistical forecasting, data interpolation and signal detection; applications to real data and climate model output.
Prerequisites: STAT 601 or equivalent; approval of instructor.
ATMO 636 Dynamic Meteorology
Credits 3. 3 Lecture Hours.
General circulation; stratospheric dynamics; tropical systems.
Prerequisite: ATMO 611.
ATMO 638 Dynamics of Convective Clouds
Credits 3. 3 Lecture Hours.
Parcel, slice and entrainment concepts; bubble and plume theories; spherical vortex; the starting plume; one-dimensional models; selected topics of current interest.
Prerequisite: ATMO 611.

ATMO 645 Cloud and Precipitation Physics
Credits 3. 3 Lecture Hours.
Physics of atmospheric condensation nuclei, ice in the atmosphere; precipitation processes; artificial modification of clouds; precipitation.
Prerequisite: ATMO 612 or approval of instructor.

ATMO 655 Satellite Data in Meteorology
Credits 3. 3 Lecture Hours.
Meteorological satellite programs of the United States and other countries; theory of meteorological measurements from artificial satellites; applications of satellite data in determinations of atmospheric structure and in forecasting; recent and current research studies; future programs.
Prerequisite: ATMO251 or approval of instructor.

ATMO 656 Tropical Meteorology
Credits 3. 3 Lecture Hours.
Role of the tropics in global circulation; structure and dynamics of the tropical zone; local and diurnal phenomena; synoptic components; tropical cyclones; role of cumulus-scale convection; current topics.
Prerequisite: ATMO 251 or approval of instructor.

ATMO 657 Mesometeorology
Credits 3. 3 Lecture Hours.
Theory and structure of mesoscale weather systems and their relation to larger and smaller scale systems.
Prerequisite: ATMO 251 or approval of instructor.

ATMO 658 Synoptic Meteorology
Credits 3. 3 Lecture Hours.
Mechanism and energetics of general circulation. Structure of large-scale systems. Persons desiring practice in analysis techniques should enroll for 1 hour or more of ATMO 685.
Prerequisite: ATMO 251 or approval of instructor.

ATMO 659 Tropical Cyclones
Credits 3. 3 Lecture Hours.
Tropical climatology; structure evolution and motion of tropical cyclones; tropical cyclone hazards; large scale tropical phenomena.
Prerequisite: ATMO 251.

ATMO 661 Atmospheric Turbulence
Credits 3. 3 Lecture Hours.
Classical turbulence theories and statistical approaches; closure models; effects of rotation and stratification; interpretations of atmospheric observations.
Prerequisite: ATMO 611 or suitable background in fluid dynamics.

ATMO 664 Laboratory Methods in Atmospheric and Environmental Sciences
Credits 3. 2 Lecture Hours. 4 Lab Hours.
Classroom and laboratory course; introduction to chemical techniques used to monitor the atmosphere and environment; instrumentation, sampling strategies; survey of current literature focusing on development of new techniques.
Prerequisite: Graduate classification.

ATMO 677/OCNG 677 Geophysical Data Assimilation
Credits 4. 3 Lecture Hours. 2 Lab Hours.
Modern data assimilation methods applied to oceanic and atmospheric circulation models, as well as in other simple models; methods to interpolate one-, two-, and three-dimensional randomly spaced data to regular grids for use in numerical models of atmospheric and oceanic circulation.
Prerequisites: OCNG 657, ATMO 632, STAT 601.
Cross Listing: OCNG 677/ATMO 677.

ATMO 681 Seminar
Credit 1. 1 Other Hour.
Presented by students and faculty based upon their research work and upon surveys of the literature.

ATMO 685 Directed Studies
Credits 1 to 16. 1 to 16 Other Hours.
Offered to enable majors in meteorology to undertake and complete, with credit, in their particular fields of specialization, limited investigations not covered by any other courses in established curriculum.

ATMO 689 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours. 0 to 4 Lab Hours.
Special topics in an identified area of meteorology. May be repeated for credit.

ATMO 691 Research
Credits 1 to 23. 1 to 23 Other Hours.
For thesis or dissertation. Topic subject to approval of department head.

ATTR - Athletic Training

ATTR 651 Clinical Education I
Credits 2. 1 Lecture Hour. 8 Lab Hours.
Integration of clinical competencies with classroom instruction and a supervised field based experience in athletic training to link theory into practice.
Prerequisite: Enrollment in MS Athletic Training program.

ATTR 652 Clinical Education II
Credits 3. 1 Lecture Hour. 16 Lab Hours.
Integration of clinical competencies with classroom instruction and a supervised field based experience in athletic training to link theory into practice.
Prerequisite: ATTR 651, ATTR 660, ATTR 661 with grades of C or better.

ATTR 653 Clinical Education III
Credits 3. 1 Lecture Hour. 16 Lab Hours.
Integration of clinical competencies with classroom instruction and a supervised field based experience in athletic training to link theory into practice.
Prerequisite: ATTR 652, ATTR 662, ATTR 663, ATTR 668, ATTR 669 with grades of C or better.

ATTR 654 Clinical Education IV
Credits 2. 1 Lecture Hour. 8 Lab Hours.
Integration of clinical competencies with classroom instruction and a supervised field based experience in athletic training to link theory into practice.
Prerequisite: ATTR 653 with a grade of C or better.
ATTR 655 Clinical Education V  
Credits 3.1 Lecture Hour. 16 Lab Hours.  
Integration of clinical competencies with classroom instruction and a supervised field based experience in athletic training to link theory into practice.  
Prerequisite: ATTR 654, ATTR 664, ATTR 665, ATTR 671 with grades of C or better.

ATTR 656 Clinical Education VI  
Credits 3.1 Lecture Hour. 16 Lab Hours.  
Integration of clinical competencies with classroom instruction and a supervised field based experience in athletic training to link theory into practice.  
Prerequisite: ATTR 655, ATTR 666, ATTR 667, ATTR 670 with grades of C or better.

ATTR 660 Prevention and Care of Athletic Injuries  
Credits 3.3 Lecture Hours.  
Prevention strategies and procedures, recognition and care of common injuries and conditions; foundational concepts and principles of the athletic training profession.  
Prerequisite: Enrollment in MS Athletic Training program.

ATTR 661 Prevention and Care of Athletic Injuries Lab  
Credit 1.2 Lab Hours.  
Laboratory to accompany ATTR 660; application of theories and practice skills.  
Prerequisite: Concurrent enrollment in ATTR 660.

ATTR 662 Clinical Examination and Diagnosis-Lower Extremity  
Credits 3.3 Lecture Hours.  
Pathomechanics, clinical examination, diagnosis and appropriate medical referral of orthopedic injuries and other conditions to the lower extremity and spine.  
Prerequisite: Enrollment in MS Athletic Training program.

ATTR 663 Clinical Examination and Diagnosis-Lower Extremity Lab  
Credit 1.2 Lab Hours.  
Laboratory to accompany ATTR 662; application of theories and skill practice.  
Prerequisites: Concurrent enrollment in ATTR 662; enrollment in MS Athletic Training program.

ATTR 664 Clinical Examination and Diagnosis-Upper Extremity  
Credits 3.3 Lecture Hours.  
Pathomechanics, clinical examination, diagnosis and appropriate medical referral of orthopedic injuries and other conditions to the upper extremity, head and cervical spine.  
Prerequisite: ATTR 662.

ATTR 665 Clinical Examination and Diagnosis-Upper Extremity Lab  
Credit 1.0 Lecture Hours. 2 Lab Hours.  
Laboratory to accompany ATTR 664; application of theories and skill practice.  
Prerequisites: Concurrent enrollment in ATTR 664; enrollment in MS Athletic Training program.

ATTR 666 Physical Rehabilitation  
Credits 3.3 Lecture Hours.  
The study of physical rehabilitation theory and techniques used as a therapeutic intervention for orthopedic injuries and conditions.  
Prerequisite: Enrollment in MS Athletic Training program.

ATTR 667 Physical Rehabilitation Lab  
Credit 1.0 Lecture Hours. 2 Lab Hours.  
Laboratory to accompany ATTR 666; application of theories and skill practice.  
Prerequisites: Concurrent enrollment in ATTR 666; enrollment in MS Athletic Training program.

ATTR 668 Therapeutic Modalities  
Credits 3.3 Lecture Hours.  
A detailed study of modern therapeutic devices used in the treatment and rehabilitation of orthopedic injuries and conditions.  
Prerequisite: Enrollment in MS Athletic Training program.

ATTR 669 Therapeutic Modalities Lab  
Credit 1.0 Lecture Hours. 2 Lab Hours.  
Laboratory to accompany ATTR 668; application of theories and skill practice.  
Prerequisites: Concurrent enrollment in ATTR 668; enrollment in MS Athletic Training program.

ATTR 670 General Medical Conditions and Therapeutic Medication  
Credits 3.3 Lecture Hours.  
Pathophysiology, assessment, and appropriate intervention and referral for general medical conditions and disabilities; common diagnostic tests and imaging assessment tools including commonly used therapeutic medications.  
Prerequisite: Enrollment in MS Athletic Training program.

ATTR 671 Organization and Administration in Athletic Training  
Credits 3.3 Lecture Hours.  
Organization and administration of athletic training services including financial, human resources, facility, information technology and risk management.  
Prerequisite: Enrollment in MS Athletic Training program.

ATTR 672 Professional Preparation and Issues in Athletic Training  
Credits 3.3 Lecture Hours.  
Knowledge and skills for successful pursuit of athletic training credentials, employment and continuing professional competencies; emphasis on current topics and issues contributing to the professional preparation of athletic training.  
Prerequisite: Enrollment in MS Athletic Training program.

BAEN - Biological & Ag. Engr.

BAEN 601 Advanced Agricultural Systems Analysis  
Credits 3.3 Lecture Hours.  
Application of operations research tools and techniques to the analysis and management of technical systems in agriculture; optimization techniques applied to materials handling, supply chain logistics and other food and agricultural applications.  
Prerequisite: AGSM 301 or approval of instructor.

BAEN 614 Renewable Energy Conversions  
Credits 3.2 Lecture Hours. 1 Lab Hour.  
Managing energy/power systems through engineering and technical aspects of quantifying and designing the suitability of several types of renewable energy resources; providing new insights of vast resources that future engineers can harness to augment diminishing supplies of non-renewable energy.  
Prerequisites: BAEN 320, BAEN 366 or equivalent; or approval of instructor.
BAEN 617 Fundamentals of Nanoscale Biological Engineering
Credits 3. 3 Lecture Hours.
The course will primarily cover nanostructures, nanofabrication methods, instrumentaton and applications pertinent to Biological, Food and Bioenergy systems and will provide students an opportunity to identify and utilize key tools available for fabricating, manipulating and analysis of nanostructures used in Biological Engineering applications. **Prerequisite(s):** Graduate classification in engineering.

BAEN 620 Food Rheology
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Principles of elasticity, viscous flow and visco-elasticity applied to solid and liquid food materials; experimental determination of rheological properties using fundamental methods and empirical textural measurements; applications to food engineering research, textural measurement and quality control. **Prerequisites:** FSTC 315/AGSM 315; PHYS 201; graduate classification.

BAEN 622 Unit Operations in Food Processing
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Design of food process engineering systems; basic concepts of rheology and physical properties of foods; fundamentals of heat and mass transfer and process control. **Prerequisites:** Fluid Mechanics, Thermodynamics, Fluid Dynamics.

BAEN 625 Advances in Food Process Engineering
Credits 3. 3 Lecture Hours.
Application of engineering fundamentals to the design of novel/advanced food processing systems including food irradiation, advances in thermal process, food freezing, food dehydration. **Prerequisite:** Graduate classification.

BAEN 627 Engineering Aspects of Packaging
Credits 3. 3 Lecture Hours.
Introduction to properties and engineering aspects of materials for use as components of a package and/or packaging system; principles of design and development of packages; evaluation of product-package-environment interaction mechanisms; testing methods; environmental concerns; regulations. **Prerequisite:** Graduate classification.

BAEN 631 Bioprocesses and Separations in Biotechnology
Credits 3. 3 Lecture Hours.
Application of engineering principles to recovery and purification of biological compounds derived from cell grown in bioreactors, transgenic animals, and plants. Process development, design, and scale up of downstream processes used in biotechnology and pharmaceutical industry. Emphasis on extraction, sedimentation, membrane filtration, precipitation, and liquid chromatography. **Prerequisites:** Senior classification in engineering, G7, G8 or approval of instructor.

BAEN 651/ESSM 651 Geographic Information Systems for Resource Management
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Geographic Information System (GIS) approach to the integration of spatial and attribute data to study the capture, analysis, manipulation and portrayal of natural resource data; examination of data types/formats, as well as the integration of GIS with remote sensing and Global Positioning System; laboratory includes extensive use of GIS applications to conduct analyses of topics in natural resources. **Prerequisites:** Graduate classification. **Cross Listing:** ESSM 651/BAEN 651.

BAEN 652 Advanced Topics in Geographic Information Systems
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Advanced GIS topics with a focus on modeling actual GIS applications including relational and database theory, design and implementation and its connection to GIS; surface analysis with digital terrain models; and an introduction to spatial statistics. **Prerequisite:** BAEN 651/ESSM 651.

BAEN 653 Bioreactor Design
Credits 3. 3 Lecture Hours.
Kinetics of enzyme reactions and cell growth applied to bioreactor design, media formulation, cell culture conditions, oxygen transfer and sterilization. **Prerequisite:** CHEN 651 or approval of instructor.

BAEN 661 Experimental Methods in Biological and Agricultural Engineering
Credits 3. 3 Lecture Hours.
Planning and carrying out empirical research with appropriate application of statistical methods for experimental design and analysis; experimental design, data analysis, hypothesis testing, and experimental errors. **Prerequisites:** STAT 601 or STAT 651 and STAT 652 or equivalent with approval of instructor.

BAEN 662 Statistical Methods in Biological and Agricultural Engineering
Credits 3. 3 Lecture Hours.
Statistical methods applied to problems in biological and agricultural engineering; parameter estimation; probability distribution fitting; time-series analysis; random variable generation; uncertainty analysis. **Prerequisite:** Graduate classification.

BAEN 665 Design of Biological Waste Treatment Systems
Credits 3. 3 Lecture Hours.
Management and treatment of high organic content waste streams, with emphasis on agricultural; municipal, and agro-Industry wastewater; engineering design of biological waste treatment processes: resource recovery from waste streams: recycle and reuse of finished effluents. **Prerequisite:** Graduate classification.

BAEN 666 Design of Biological Waste Treatment Systems
Credits 3. 3 Lecture Hours.
Nonpoint source pollution processes including transport mechanisms and contaminant fate; design of best management practices for abating nonpoint source pollution. **Prerequisites:** AGEN 350 or equivalent; SCSC 301; ENGR 214; graduate classification.
BAEN 670 Air Pollution Engineering
Credits 3. 3 Lecture Hours.
Current topics in air pollution engineering including design and operation of air pollution abatement systems (cyclone, bag filters and scrubbers), emission factors, dispersion modeling, permitting, odor sensing and control, EPA/State Air Pollution Regulatory Agency (SAPRA), TSP, PM10, and PM2.5.
Prerequisites: AGEN 477 or MEEN 477; MEEN 328 and MEEN 344; or approval of instructor.

BAEN 672 Small Watershed Hydrology
Credits 3. 3 Lecture Hours.
Hydrology of small agricultural watersheds; precipitation frequency analysis; infiltration; runoff; erosion theory; sediment transport theory; evapotranspiration, and use of hydrological models.
Prerequisites: AGEN 350, SCSC 301 and MATH 308 or their equivalent; graduate classification.

BAEN 673 Modeling Small Watersheds
Credits 3.3 Lecture Hours.
Transport of water and chemicals in small agricultural watersheds; simulation using hydrologic models coupled with geographical information systems (GIS); impact of land use on the quality of surface water and groundwater evaluated.
Prerequisites: Basic hydrology course, BAEN 651/ESSM 651 or equivalent GIS course, and graduate classification.

BAEN 674 Vadose Zone Hydrology
Credits 3. 3 Lecture Hours.
Fundamental concepts and advanced mathematical and experimental techniques for quantifying water, chemical, microorganism, and heat transport in the vadose zone (between soil surfaces and groundwater); provides a common platform for addressing issues related to soil and water resources, hydrology, geochemistry, microbiology, ecology, hydrogeology, and environmental engineering.
Prerequisite: Graduate classification.

BAEN 675 Hydrology Across Scale
Credits 3. 3 Lecture Hours.
Advanced concepts of surface and subsurface hydrologic processes, measurements, and modeling techniques across different spatio-temporal scales; contemporary issues related to the soil and water resources, hydrogeology, geochemistry, microbiology, ecology, hydrology, and environmental engineering.
Prerequisite: Graduate classification in any engineering, agricultural science or geoscience program with environmental focus.

BAEN 681 Seminar
Credit 1. 1 Other Hour.
Reviews, reports and discussion of ideas, recent advances and current topics.

BAEN 683 Peer-Review Process and Publication
Credit 1. 1 Lecture Hour.
Techniques for communicating results of research that are defendable in a peer review process; student and advisor will select a research topic, identifying an appropriate target refereed journal; no thesis/dissertation preparation as a writing project accepted; critique other papers; prepare paper for review by instructor.
Prerequisite: Graduate classification in Biological and Agricultural Engineering only.

BAEN 684 Professional Internship
Credits 1 to 6. 1 to 6 Other Hours.
An on-the-job supervised experience program, conducted on an individual basis in the area of the student's specialization in mechanized agriculture.
Prerequisite: Graduate classification or approval of instructor.

BAEN 685 Directed Studies
Credits 1 to 4. 1 to 4 Other Hours.
Advanced laboratory or field problems not related to student's thesis.
Prerequisite: Graduate classification.

BAEN 689 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours. 0 to 4 Lab Hours.
Selected topics in an identified area of agricultural engineering. May be repeated for credit.

BAEN 690 Theory of Research
Credit 1. 1 Lecture Hour.
Development of research inquiry and discussion of applicable experimental design, theoretical techniques and methodological principles of conducting original research; evaluation of current research of faculty and students and in engineering and scientific literature. Communication of research proposals and results. May be repeated for credit.
Prerequisites: Graduate classification and approval of department head.

BAEN 691 Research
Credits 1 to 23. 1 to 23 Other Hours.
Research for thesis or dissertation.

BICH - Biochemistry

BICH 601 Fundamentals of Biochemistry I
Credits 3. 3 Lecture Hours.
Basic biochemical concepts pertaining to the structure of the major biomolecules (proteins, carbohydrates, lipids and nucleic acids); the relationship of structure to function of these molecules; structure and action of enzymes; principles of bioenergetics.
Prerequisite: One year of organic chemistry.

BICH 602 Fundamentals of Biochemistry II
Credits 3. 3 Lecture Hours.
Major metabolic pathways for carbohydrates, lipids, amino acids, proteins and nucleic acids, emphasizing oxidative processes and the biosynthesis of RNA, DNA and protein; regulation of cellular metabolism.
Prerequisite: BICH 601.

BICH 603 General Biochemistry I
Credits 3. 3 Lecture Hours.
The biochemical properties of macromolecules found in living matter; proteins, enzymes and nucleic acids.
Prerequisites: BICH 410 or BICH 601; CHEM 228 and CHEM 323.

BICH 605 Methods of Biochemical Analysis
Credits 3. 3 Lecture Hours.
Experimental techniques important in biochemistry including methodologies for data analysis.
Prerequisite: Graduate classification in biochemistry or approval of instructor.

BICH 608 Critical Analysis of the Biochemical Literature
Credits 2. 2 Lecture Hours.
Reading and presentation of original articles in biochemistry and related fields to enhance understanding of experimental logic and scientific communication.
Prerequisite: Graduate classification in biochemistry or approval of instructor.
BICH 609 Preparation of a Biochemical Research Proposal
Credit 2. 2 Lecture Hours.
Development and presentation of hypotheses, specific aims, significance and experimental approaches for a biochemical research proposal.
Prerequisite: Graduate classification in biochemistry.

BICH 624 Enzymes, Proteins and Nucleic Acids
Credits 3. 3 Lecture Hours.
Chemical and physical properties of enzymes, proteins and nucleic acids; thermodynamics, kinetics and mechanisms of enzyme-catalyzed reactions and protein-nucleic acid interactions.
Prerequisites: BICH 603; CHEM 324.

BICH 625/MCMD 625 Nucleic Acid--Protein Interactions
Credit 1. 1 Lecture Hour.
Mechanisms of nucleic acid-protein interactions involved in fundamental biochemical processes such as DNA replication and rearrangement, transposition, transcription, RNA splicing and translation; original research articles presented focusing on experimental approaches, interpretation of results and overall significance. Course may be taken 8 times for credit.
Prerequisites: BICH 431/GENE 431 or GENE 431/BICH 431 or equivalent; approval of instructor.
Cross Listing: MCMC 625/BICH 625.

BICH 626/CSCE 628 Computational Biology
Credits 3. 3 Lecture Hours.
Introduction to computational biology; formulations of biology problems as computational problems; computational approaches to solve problems in genomics and proteomics.
Prerequisite: Graduate classification or approval of instructor.
Cross Listing: CSCE 628/BICH 628.

BICH 631/GENE 631 Biochemical Genetics
Credits 3. 3 Lecture Hours.
Genetic control of cellular metabolism; mechanism of gene action; gene-enzyme relationships; regulation of gene expression; structure and organization of genomes; biochemical manipulation and characterization of genetic molecules.
Prerequisites: BICH 431/GENE 431 or GENE 431/BICH 431; BICH 603.
Cross Listing: GENE 631/BICH 631.

BICH 650/BIOL 650 Genomics
Credits 3. 3 Lecture Hours.
Modern genomics as a tool for understanding biological systems, gene structure, and organization as well as the history of sequencing technologies; focus on transcriptional, translational and functional genomics.
Prerequisite: Graduate classification or approval of instructor.
Cross Listing: BIOL 650/BICH 650.

BICH 654 Structural Biochemistry
Credits 3. 3 Lecture Hours.
Basic physics of X-ray diffraction, crystal structure methods, introduction to structural data bases, molecular geometry and molecular modeling.
Prerequisite: Approval of instructor.

BICH 655 Crystallography Methods
Credits 3. 2 Lecture Hours. 3 Lab Hours.
The practice of x-ray diffraction in the study of biomolecules; solving protein crystal structures.
Prerequisite: Graduate classification.

BICH 661 Advanced Genome Annotation with Ontologies
Credit 1. 2 Lab Hours.
Advanced topics in functional annotation using ontologies; usage issues and quality control for ontologies and annotations; mentoring annotation activities from BICH 460 and evaluation of annotations. May be taken three times for credit.
Prerequisite: Graduate classification or approval of instructor.

BICH 662 Eukaryotic Transcription
Credit 1. 1 Lecture Hour.
Intensive short course in molecular mechanisms of eukaryotic transcription, and its regulation.
Prerequisite: BICH 631/GENE 631 or GENE 631/BICH 631 or approval of instructor.

BICH 664 Fluorescence Spectroscopy
Credit 1. 1 Lecture Hour.
Theory underlying fluorescence spectroscopy as well as practical considerations that must be understood when utilizing fluorescence as an analytical tool; the use of both steady-state and time-resolved fluorescence measurements to evaluate fluorescence quantum yield, quenching, anisotropy, and energy transfer.
Prerequisite: Graduate classification.

BICH 665 Biochemical Kinetics
Credit 1. 1 Lecture Hour.
Theoretical principles and practical approaches to analysis of chemical kinetics with specific examples of applications to biochemistry and biochemical investigations.
Prerequisite: Graduate classification.

BICH 667 Molecular Probes
Credit 1. 1 Lecture Hour.
Function of biomolecules in the context of living cells (in cellulo as opposed to in vitro); chemical tools and analytical techniques; application in the investigation of cellular processes; identification of biological problems and design.
Prerequisite: Graduate classification.

BICH 671/MCMD 671 Macromolecular Folding and Design
Credit 1. 1 Lecture Hour.
Oral presentations and discussions in the general area of biomolecular structure, folding, function and design. May be taken 12 times.
Prerequisite: Approval of instructor.
Cross Listing: MCMC 671/BICH 671.

BICH 672/MCMD 672 Biological Membranes
Credit 1. 1 Lecture Hour.
Seminar-based course examining recent discoveries in the structure, function and assembly of biological membranes; oral presentation by students on current literature in molecular biology and biochemistry.
Prerequisite: Approval of instructor.
Cross Listing: MCMC 672/BICH 672.

BICH 673/GENE 673 Gene Expression
Credit 1. 1 Lecture Hour.
Oral presentations and discussions related to the biochemistry and molecular biology of gene expression in animal, plant and microbial systems. May be repeated for credit up to 12 times.
Prerequisite: Graduate classification in biochemistry or genetics or approval of instructor.
Cross Listing: GENE 673/BICH 673.
BICH 674/MCMD 674 Protein Folding and Stability
Credit 1. 1 Lecture Hour.
Selected topics from recent literature in the general areas of protein folding, structure, and stability.
Prerequisite: Approval of instructor.
Cross Listing: MCMD 674/BICH 674.

BICH 675 Plant Biochemistry and Genomics
Credit 1. 1 Lecture Hour.
Overview of current literature dealing with plant biochemistry/genomics; biochemistry topics will include the function of protein-protein interactions related to plant specific processes such as plant-pathogen interactions; genomics topics will focus on current analysis of plant genomes and how the derived information is being utilized to elucidate biochemical pathways.
Prerequisite: Graduate classification.

BICH 676 Bacteriophage Biology
Credit 1. 1 Lecture Hour.
Oral presentation and discussion in the general area of the viruses of microbes and bacteria; literature review with a broad scope, from basic molecular biology of phages to practical applications of microbial virus technology. May be taken 12 times for credit.
Prerequisite: Approval of instructor.

BICH 677 Chemical Genetics and Drug Discovery
Credit 1. 1 Lecture Hour.
Review, discuss and present scientific literature studies based on the usage of small molecules to alter protein function. May be repeated for credit.
Prerequisite: Graduate classification.

BICH 681 Seminar
Credit 1. 1 Lecture Hour.
Original articles in biochemistry and related fields designed to broaden understanding of problems in the field and to stimulate research.

BICH 685 Directed Studies
Credits 1 to 12. 1 to 12 Other Hours.
Biochemical laboratory procedures; preparations and instrumentation; problems assigned according to experience, interests and needs of individual student.
Prerequisite: Approval of instructor.

BICH 689 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours. 0 to 4 Lab Hours.
Selected topics in an identified area of biochemistry. May be repeated for credit.
Prerequisite: Approval of instructor.

BICH 690 Theory of Biochemical Research
Credits 2. 2 Lecture Hours.
State-of-the-art examination of modern trends in various subfields of modern biochemistry concentrating on the design of experiments, evaluation of research results and discussion of the current literature. May be repeated for credit.

BICH 691 Research
Credits 1 to 23. 1 to 23 Other Hours.
Research for thesis or dissertation. Laboratory facilities available for original investigations in various phases of biochemistry.
Prerequisite: Approval of major advisor.

BICH 697 Methods in Teaching Biochemistry Laboratory
Credit 1. 1 Lecture Hour.
Theory and practical aspects of teaching Biochemistry labs, with emphasis on content, grading, instructional methods and practical aspects of biochemistry labs. May be repeated for credit.
Prerequisite: Graduate classification in biochemistry.

BIED - Bilingual Education

BIED 610 Hispanic Bilingual Assessment and Monitoring Students
Credits 3. 3 Lecture Hours.
Assessing language ability; language assessment; evaluating and scoring different types of assessments; guided field based experiences.
Prerequisites: Graduate classification; approval of department head.

BIED 611 Dual Language Program Methodologies
Credits 3. 3 Lecture Hours.
Use of theory and effective teaching practice in promoting students’ development of strong social and academic skills; relationship of culture to language; guided field experiences.
Prerequisites: Graduate classification; approval of department head.

BIED 612 Content Area Instruction for Hispanic Bilingual Programs
Credits 3. 3 Lecture Hours.
Theories and approaches for integrating English as second language; learning strategies on how plan, procedures and units engage language teachers, students, and learning environment; guided filed experiences.
Prerequisites: Graduate classification; approval of department head.

BIED 613 Spanish/English Biliteracy
Credits 3. 3 Lecture Hours.
Social-linguistic characteristics of second language learners acquiring literacy skills; reading and literature instruction for second language learners; reading and writing process across the curriculum for Hispanic second language learners; guided field experiences.
Prerequisites: Graduate classification; approval of department head.

BIED 614 Bilingual Education Curriculum Development
Credits 3. 3 Lecture Hours.
Analysis of past and current trends in curriculum development in bilingual education; guided field experiences.
Prerequisites: Graduate classification; approval of department head.

BIED 615 Teacher Action Research in Bilingual Education
Credits 3. 3 Lecture Hours.
Philosophy of teacher action research in bilingual education settings using qualitative methods with educational issues related to English language learners; provide guided practice in data collection, analysis, and presentation of action research.

BIED 616 Spanish for Bilingual and Dual Language Programs
Credits 3. 3 Lecture Hours.
Understanding of dual language programs; literacy instruction through Spanish; socio-linguistic perspectives on literacy competence and effective instructional practices; guided field experiences.
Prerequisite: Graduate classification; approval of department head.

BIED 617 Evaluation of Programs with Bilingual and Language Minority Students K-12
Credits 3. 3 Lecture Hours.
Evaluation and research models and methodologies in education of bilingual/language minority students from K-12.
Prerequisites: EPSY 610 or approval of instructor.
BIED 685 Directed Studies
Credits 1 to 4. 1 to 4 Other Hours.
Directed individual study of selected problems.
Prerequisite: Approval of department head.

BIED 690 Theory of Educational Psychology Research
Credits 3. 3 Lecture Hours.
Theory and design of research problems and experiments in various subfields of educational psychology; communication of research proposals and results; evaluation of current research of faculty and students and review of current literature. May be repeated for credit.
Prerequisite: Approval of instructor and department head.

BIED 691 Research
Credits 1 to 23. 1 to 23 Other Hours.
Research for thesis or dissertation.
Prerequisite: Approval of department head.

BIMS - Biomedical Science

BIMS 5126 Responsible Conduct in Biomedical Research
Credit 1. 1 Lecture Hour.
A survey of topics required for research; utilizes outside reading assignments, online modules, class presentation and discussion of cases associated with topic; offered spring semester of odd years.

BIMS 5127 Microscopy
Credits 2. 2 Lecture Hours.
Principles and methods of scanning electron microscopy. Technical instruction includes tissue preparation and equipment maintenance. Includes the usage of scanning electron, light, fluorescent and confocal microscopes and computer imaging techniques. Offered spring semester.

BIMS 5128 Nanobiomaterials and Regenerative Medicine
Credit 1. 1 Lecture Hour.
This course will bring state-of-the-art knowledge of nanobiomaterials and regenerative medicine to students. Topics include nanobiomaterials design, synthesis and preparation, nanobiotechnology for scaffold fabrication, surface functionality of nanobiomaterials, nanobiomaterials for drug and gene delivery, stem cell and nanobiomaterials, and the applications of nanobiomaterials for various tissue regeneration (bone, cartilage, tooth, et. al.).

BIMS 5190 Seminar: Current Issues in Science
Credit 1. 1 Other Hour.
Guest lectures, workshop lectures and discussion includes topics of current interest to program faculty and students and of general interest in the biomedical sciences. Offered fall and spring semesters.

BIMS 5205 Oral Histology
Credits 3. 3 Lecture Hours.
Origin and development of the dental tissues and their related structures. Current publications and research reports are used to provide students with an opportunity to investigate some phase of active interest to them and their anticipated future interest in practice. Offered spring semester.

BIMS 5208 Microbiology
Credits 3. 3 Lecture Hours.
Introduction to basic microbiology with emphasis on oral and medical microbes, taxonomy and microbial physiology. Taught in conjunction with dental curriculum. Additional readings and discussion for graduate student. Offered fall and spring semesters.
BIMS 5214 Clinical Pharmacology
Credit 1.5. 1.5 Other Hour.
Selection and evaluation of dentally-related drugs and review of current literature; seminar format. Limited to clinical specialty students. Offered fall semester.

BIMS 5221 Research Design and Methodology
Credits 2. 2 Lecture Hours.
An introduction to the research process; sufficient background in research design and methodology is provided to enable students to critically evaluate literature and assist in the formulation of research projects. Also includes discussion of rules and regulations for human and animal research. Offered fall semester.

BIMS 5222 Applied Biostatistics
Credits 2. 2 Lecture Hours.
Overview of applied biostatistics with an emphasis on oral health research. Training includes computer-based instruction in data analysis using SPSS. Offered spring semester.

BIMS 5224 Teaching Practicum in Applied Biostatistics
Credits 1 to 4. 1 to 4 Lecture Hours. 1 to 4 Lab Hours.
This practicum is designed to engage the advanced student in all aspects of teaching applied biostatistics. Objective (1) of the practicum is to learn how to present biostatistics such that health professions graduate students can master it. Such mastery includes applying statistical concepts and methods to one's own research and to that published in the professional literature. Objective (2) is to learn about the creation and evaluation of fair assessments of student performance (tests, projects, etc. and grading them). Not available for distance learning.

BIMS 5244 Advanced Biology of Mineralized Tissues
Credits 2. 2 Lecture Hours.
Overview of the advanced biology of mineralized tissues and their roles in oral health and disease. The course will cover the basic molecular biology of teeth and the skeleton, including bone and cartilage and other aspects of systemic biology. Offered fall semester.

BIMS 5251 Immunology
Credits 1 to 2. 1 to 2 Lecture Hours.
Update on the principles of immunology with an emphasis on oral aspects and related diseases. Offered fall semester.

BIMS 5263 Sensory Neurobiology and Pain
Credit 1. 1 Lecture Hour.
An overview of the various sensory systems is explored with the primary emphasis on the processing of pain and temperature information from the craniofacial complex. Offered summer semester of odd years.

BIMS 5280 Introduction to Evidence-Based Dentistry and Clinical Research
Credits 3. 3 Lecture Hours.
This is a year-long course for graduate students consisting of lecture sessions, and small group discussions and seminars. A progress grade will be given at the end of the first semester followed by a final grade of record at the end of the year. The main goal of the EBD curriculum at Texas A&M Baylor College of Dentistry is to provide dental scientists and dentists-in-training with the knowledge and tools to take advantage of constantly increasing knowledge in clinical, material, and basic biomedical sciences. Taught in conjunction with dental curriculum. Additional readings and discussion for graduate students. Not available for distance learning.

BIMS 5301 Neuroscience
Credits 2. 1 Lecture Hour. 1 Lab Hour.
Lectures and laboratory sessions on gross and microscopic anatomy of the human central and peripheral nervous system. Neurophysiology of the central nervous system, peripheral nerves, special sense, autonoms and clinical mediation. Offered spring semester.

BIMS 5307 Cellular and Molecular Biology
Credits 2 to 3. 2 to 3 Lecture Hours.
Prerequisite: none. Intermediate metabolism of protein, protein synthesis, nucleic acid metabolism and biochemical endocrinology. Offered fall semester.

BIMS 5312 Applied Medical Physiology
Credits 2. 1 Lecture Hour. 1 Lab Hour.
Basic physiology of the cardiovascular, respiratory and renal systems. Each area is expanded to include physiology problems seen clinically as they relate to the dental intern. Offered summer semester.

BIMS 5324 Advanced Biostatistics
Credits 2. 2 Lecture Hours.
Advanced biostatistical methods, including multivariate and longitudinal analysis; computer simulations; applications in craniofacial biology.

BIMS 5341 Techniques in Cell and Molecular Biology
Credit 1. 1 Lecture Hour.
Principal methods of cellular/molecular investigation of proteins and nucleic acids including immunocy to chemistry, western blotting, northern/southern blotting, radioimmunoassay, in situ hybridization, polymerase chain reaction, intracellular recording and fluorescence confocal microscopy. Offered summer semester.

BIMS 5350 Oral Microbiology
Credits 2 to 3. 2 to 3 Lecture Hours.
The environment of the mouth is described and its relation to the endogenous and exogenous oral microbiota; relationship between disease and bacterial species; discussion of species differences; molecular mechanisms of bacterial pathogenesis; and host response to oral microbes. Offered spring semester.

BIMS 5360 Advanced Neuroscience
Credit 1. 1 Lecture Hour.
Advanced concepts of neuroscience are presented with an in-depth coverage of membrane and system function.

BIMS 5376 Evolutionary and Functional Morphology
Credit 1. 1 Lecture Hour.
Comparative anatomy and evolution of craniofacial structure, with emphasis on current techniques of electrophysiology, kinesiology, and musculoskeletal biomechanics of orofacial function. Offered fall semester.

BIMS 5402 General Histology
Credits 3. 3 Lab Hours.
General histology and microscopic anatomy of the four basic tissues. Laboratory study of electron micrographs and prepared slides is employed. Offered fall semester.
BIMS 5603 Gross Anatomy
Credits 4. 4 Lab Hours.
Conceptual and functional basis for understanding macroscopic structure of the human body utilizing laboratory dissection of human cadavers. Regional anatomy of the back, thorax, upper limb and head is emphasized. Offered fall semester.

BIMS 5611 Mammalian Physiology
Credits 4 to 5. 4 to 5 Lab Hours.
Basic physiology principles of cells, muscle, nerve, blood, heart, circulation, respiration, digestion, excretion and central nervous system in maintaining homeostasis. Classical laboratory experiments are used to demonstrate these principles. Offered spring semester.

BIMS 5V04 Head and Neck Anatomy
Credits 1 to 1.5. 1 to 1.5 Lab Hours.
Special emphasis on surgical anatomy and distribution of nerves and vasculature of particular interest in the field of dentistry. Offered summer semester.

BIMS 5V40 Cellular and Molecular Biology or Oral Craniofacial Tissues
Credits 1 to 10. 1 to 10 Lecture Hours.
A general survey intended to provide background information concerning the methods and theory of modern cellular/molecular biology. This lays the groundwork for more advanced study, aids those interested in incorporating cellular/molecular approaches into their research work and enables one to read, understand and evaluate current scientific literature. Offered spring semester.

Prerequisites: BIMS 5307 or equivalent.

BIMS 5V42 Cellular and Molecular Biology or Oral Craniofacial Tissues II
Credits 1 to 10. 1 to 10 Lecture Hours.
Processes of epithelial-mesenchymal interaction as related to odontogenesis; amelogenesis; dentinogenesis; collagen formation, intracellular and extracellular calcium homeostasis; plaque and calculus; and wound healing. Offered spring semester.

BIMS 5V69 Growth and Mechanisms of Development
Credits 0 to 2. 0 to 2 Lecture Hours.
Normal prenatal growth and development. Patterns and mechanisms of growth and maturation. Offered fall semester.

BIMS 5V73 Advanced Craniofacial Development and Craniofacial Anomalies
Credits 1 to 10. 1 to 10 Lecture Hours.
Detailed investigation of the basic processes and mechanisms of postnatal growth and adaptation of the craniofacial region. This course emphasizes the areas of controversy surrounding current understanding of the factors influencing postnatal craniofacial growth and form; the adaptive capabilities of growth and form; the adaptive capabilities of craniofacial tissues; the effect of altered function on craniofacial growth and form; and the influence of treatment on craniofacial growth and form. Also considered are theories of craniofacial growth. Offered fall semester.

BIMS 5V75 Physical Growth and Maturation
Credits 0.50 to 2. 0.50 to 2 Lecture Hours.
Pattern and mechanisms of postnatal growth and maturation. Offered spring semester.

BIMS 5V78 Teaching Practicum in Gross Anatomy
Credits 3. 3 Lab Hours.
Assist with laboratory dissection of human cadavers. Lead class study groups and prepare pro-sections for the D1 class. Regional anatomy of the back, thorax, upper limb and head is emphasized. Taught in conjunction with dental curriculum. Additional readings and exercises are designed to instruct graduate students in how to teach the subject.

BIMS 5V81 Seminar: Current Issues in Bone and Mineralized Tissue Biology
Credit 1. 1 Other Hour.
Topics of current importance in bone and mineralized tissue biology. Offered fall and spring semesters.

BIMS 5V91 Special Topics in Biomedical Sciences
Credits 0 to 10. 0 to 10 Other Hours.
Reading and discussion of current literature pertinent to topic of seminar. Presentation of papers on selected topics is required for all students. May be used for multiple courses in any one semester. Offered fall, spring and summer semesters.

BIMS 5V92 Special Topics in Biomedical Sciences
Credits 0 to 10. 0 to 10 Other Hours.
Reading and discussion of current literature pertinent to topic of seminar. Presentation of papers on selected topics is required for all students. May be used for multiple courses in any one semester. Offered fall, spring and summer semesters.

BIMS 5V93 Directed Readings
Credits 0 to 10. 0 to 10 Other Hours.
Individualized courses for single students involve in-depth study of specific topics in the biomedical sciences.

BIMS 5V94 Directed Readings
Credits 0 to 10. 0 to 10 Other Hours.
Individualized courses for single students involve in-depth study of specific topics in the biomedical sciences.

BIMS 5V95 Directed Readings
Credits 0 to 10. 0 to 10 Other Hours.
Individualized courses for single students involve in-depth study of specific topics in the biomedical sciences.

BIMS 5V96 Research and Special Problems
Credits 0 to 10. 0 to 10 Other Hours.
Concentrated investigation in any area of biomedical sciences. This course may be used for individualized laboratory rotations or research.

BIMS 5V97 Research and Special Problems
Credits 0 to 10. 0 to 10 Other Hours.
Concentrated investigation in any area of biomedical sciences. This course may be used for individualized laboratory rotations or research.

BIMS 5V98 Thesis Research and Preparation of Master’s Thesis
Credits 0 to 10. 0 to 10 Other Hours.
Original research on a problem related to oral biology as partial fulfillment of the degree requirements; search literature, establish a research problem, prepare a research proposal, have it approved by thesis committee, conduct necessary experimental and control procedures to test the established hypothesis, analyze the data and write thesis.

BIMS 5V99 Dissertation
Credits 0 to 10. 0 to 10 Other Hours.
Course used by students after achieving candidacy for research and preparation of Ph.D. dissertation.
BIOL - Biology

BIOL 601/NRSC 635 Biological Clocks
Credits 3. 3 Lecture Hours.
Introduction to the formal properties of biological rhythms; cellular and molecular bases for rhythmicity; temporal adaptations of organisms using clocks.
Prerequisite: Graduate classification or approval of instructor.
Cross Listing: NRSC 635/BIOl 601.

BIOL 602/MSEN 612 Fundamentals of Transmission Electron Microscopy
Credits 3. 2 Lecture Hours. 6 Lab Hours.
State-of-the-art fundamentals in transmission electron microscopy (TEM); theoretical background supporting a strong hands-on course component comprising specimen preparation and image acquisition/interpretation; practical experience to attain a proficiency level permitting independent operation of transmission electron microscopes in the Microscopy and Imaging Center.
Prerequisite: Students are required to write a half-page summary describing the specific problem they wish to resolve using transmission electron microscopy.
Cross Listing: MSEN 612/BIOl 602.

BIOL 603/MSEN 613 Advanced TEM Methodologies in Life and Material Sciences (TEM II)
Credits 3. 1 Lecture Hour. 6 Lab Hours.
Advanced TEM methodologies including specimen preparation and TEM imaging/analysis techniques as applicable to both biological and material samples; theory designed to support a strong hands-on component comprising specimen preparation, different imaging/diffraction/spectroscopic techniques and data interpretation.
Prerequisites: BIOl 602/MSEN 612; graduate classification.
Cross Listing: MSEN 613/BIOl 603.

BIOL 604/MSEN 614 Fundamentals of Scanning Electron Microscopy and Environmental Scanning Electron Microscopy
Credits 2. 1 Lecture Hour. 3 Lab Hours.
Fundamentals of Scanning Electron Microscopy (SEM) and Environmental Scanning Electron Microscopy (ESEM). Provides biologists, material scientists, and students from other disciplines with the techniques of operation of the scanning electron microscope (SEM) and the environmental SEM (ESEM) coupled with the appropriate theoretical background knowledge; individual instruction in support of their research endeavors involving SEM/ESEM.
Prerequisite: Graduate classification.
Cross Listing: MSEN 614/BIOl 604.

BIOL 606 Microbial Genetics
Credits 3. 3 Lecture Hours.
Basic understanding of microbial genetic systems and how genetic analyses can be used to investigate fundamental biological processes in bacteria.
Prerequisite: Approval of instructor.

BIOL 608 Theory and Applications of Light Microscopy
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Provides biologists, material scientists and students from other disciplines with the theoretical background and practical techniques of sample preparation, operation of light microscopes as well as image acquisition and processing; individual instruction which facilitates the completion of their research projects involving light microscopic techniques.
Prerequisite: half-page write-up describing how their graduate work will benefit.
BIOL 628/NRSC 602 Principles of Neuroscience II
Credits 3. 3 Lecture Hours.
Fully integrated overview of nervous system organization and systems-level neurobiology; broad topics include sensory systems and sensory systems function, motor systems and neuromuscular function, central pattern generation and locomotion, homeostatic regulation, motivation, emotions, learning and memory, and circadian rhythms.
Prerequisite: Graduate classification or permission of instructor.
Cross Listing: NRSC 602.

BIOL 634 Comparative Neurobiology
Credits 3. 3 Lecture Hours.
Cellular, molecular, and systems neurobiology, together with neuroethology. A comparative approach to subject matter is stressed. Topics such as evolution of nervous systems and their diverse structure and complex functions are dealt with.
Cross Listing: NRSC 634/BIOL 634.

BIOL 635 Plant Molecular Biology
Credits 3. 3 Lecture Hours.
Molecular aspects of plant growth, development, reproduction and evolution, emphasizing the structure, function, regulation, interaction and manipulation of plant genes; practical applications of plant molecular biology.
Prerequisite: GENE 431/BICH 431.

BIOL 644 Neural Development
Credits 3. 3 Lecture Hours.
Classical and current research literature to explore the major events in the development of a nervous system, including topics ranging from neurogenesis to synapse information.
Prerequisite: Graduate classification.
Cross Listing: NRSC 644/BIOL 644.

BIOL 650 Genomics
Credits 3. 3 Lecture Hours.
Modern genomics as a tool for understanding biological systems; review of gene structure and organization and the history of sequencing technologies; focus on transcriptional, translational and functional genomics.
Prerequisite: Graduate classification or approval of instructor.
Cross Listing: BICH 650/BIOL 650.

BIOL 651 Bioinformatics
Credits 3. 3 Lecture Hours.
Introduction to applications related to information processing in biological research with practical training exercises; includes internet databases, sequence alignment, motif prediction, gene and promoter prediction, phylogenetic analysis, protein structure classification, analysis and prediction, genome annotation, assembly and comparative analysis, and proteomics analysis.
Prerequisite: Graduate classification or approval of instructor.

BIOL 652 Epigenetic Mechanisms
Credits 3. 3 Lecture Hours.
Lectures and discussion of current research in epigenetic inheritance and its mechanisms in a variety of organisms. Structure of the course includes paper discussion and presentation, grant-writing, and grant-review.
Prerequisite: BICH 631/GENE 631.

BIOL 661 Antimicrobial Agents
Credit 1. 1 Lecture Hour.
Understanding of microbial agents, limitations of use, biosynthesis and regulation, and challenges in development as new therapeutics.
Prerequisite: Approval of instructor.

BIOL 663 Biology of the Crustacea
Credits 4. 3 Lecture Hours. 3 Lab Hours.
Classification, life history, morphology, physiology, ecology, diseases, parasites and predators of crustaceans; economic aspects of crustaceans; original literature emphasized.
Prerequisite: BIOL 335 or equivalent, or approval of instructor.

BIOL 665 Biology of Invertebrates
Credits 4. 3 Lecture Hours. 3 Lab Hours.
Morphology, biology and phylogeny of invertebrates. Topics may be either detailed discussions of specific organisms or comparative information on a process.
Prerequisite: BIOL 335 or equivalent.

BIOL 681 Seminar
Credit 1. 1 Lecture Hour.
Detailed reports on specific topics in field chosen. Students may register in up to but no more than three sections of this course in the same semester.

BIOL 682 Research Seminar
Credit 1. 1 Other Hour.
Seminars presented by students based upon their research projects.
Prerequisite: Graduate classification.

BIOL 685 Directed Studies
Credits 1 to 8. 1 to 8 Other Hours.
Limited investigations in fields other than those chosen for thesis or dissertation.

BIOL 689 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours. 0 to 4 Lab Hours.
Selected topics in an identified area of biology.

BIOL 691 Research
Credits 1 to 23. 1 to 23 Other Hours.
Research for thesis or dissertation.

BIOL 697 Methods in Teaching Biology Laboratory
Credit 1. 1 Lecture Hour.
Introduction to teaching methods associated with the teaching of undergraduate biology laboratories; emphasis on effective preparation and delivery of laboratory course content, clear instructions for procedures and laboratory safety.
Prerequisite: Graduate classification in a biological science.

BIOL 698/NRSC 698 Special Topics Behavior, Genes and Evolution
Credits 3. 3 Lecture Hours.
This literature and lecture-based course will introduce an integrative approach to the study of animal behavior, complementing evolutionary and ecological perspectives with molecular and genetic approaches and methodologies.
Prerequisite: Graduate classification.
Cross Listing: NRSC 698/BIOL 698.

BIOT - Biotechnology

BIOT 601 Biotechnology Principles and Techniques I
Credits 4. 0 Lecture Hours. 8 Lab Hours.
Basic theories and techniques essential to laboratory research in agricultural, environmental or medical biotechnology such as laboratory safety and records keeping, genome informatics, DNA analysis, RNA analysis, protein analysis and analysis of biological systems.
Prerequisite: Graduate classification and approval of instructor.
BIOT 602 Biotechnology Principles and Techniques II
Credits 4. 0 Lecture Hours. 8 Lab Hours.
Application of basic theories and principles of biotechnology to team and individual research problems in a laboratory setting.
Prerequisites: BIOT 601; graduate classification.

BIOT 603 Applied Principles of Biotechnology
Credits 4. 1 Lecture Hour. 9 Lab Hours.
Applied experience with biotechnology laboratory procedures and instrumentation in a research environment. May be repeated twice for credit.
Prerequisites: BIOT 601; graduate classification.

BIOT 635 Molecular Biotechnology
Credits 3. 3 Lecture Hours.
Theory and application of molecular biotechnology; consideration of the structure and function of cellular components and methods to characterize these components with reference to examples in industry.
Prerequisite: Approval of instructor.

BIOT 645 Biotechnology Writing
Credits 3. 3 Lecture Hours.
Development of biotechnology writing and editorial skills; communication of specialized information to the public and peers.
Prerequisite: Graduate classification and approval of instructor.

BIOT 681 Biotechnology Seminar
Credit 1. 1 Other Hour.
Review and discussion of current topics in biotechnology industries, with focus on skills essential to success in the corporate environment such as communication, interviewing and interpersonal skills.
Prerequisite: Graduate classification and approval of instructor.

BIOT 684 Directed Professional Internship
Credits 4. 4 Other Hours.
A directed internship in an organization that provides on-the-job training with professionals in organizational settings appropriate to the student's professional objectives. May be taken two times for credit.
Prerequisite: Approval of the Chair of the Faculty of Biotechnology.

BIOT 685 Directed Studies
Credits 1 to 4. 1 to 4 Other Hours.
Provides customized training and experience to students in the Biotechnology Program; topics can include laboratory research, scientific literature reviews, biotechnology market surveys, and training in technology commercialization.
Prerequisite: Approval of instructor.

BIOT 689 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Selected topics in an identified area of biotechnology. May be repeated for credit.
Prerequisite: Approval of instructor.

BMEN - Biomedical Engineering

BMEN 604 FDA Good Laboratory and Clinical Practices
Credits 3. 3 Lecture Hours.
Implementation of Good Laboratory Practices (GLP) for the submission of preclinical studies and use of Good Clinical Practices (GCP) in clinical trials in accordance with Food and Drug Administration (FDA) regulations; includes similarities and differences in GLP and GCP critical for the introduction of new drugs and medical devices.
Prerequisites: BMEN 430 or BMEN 630 and graduate classification, or approval of instructor.

BMEN 605 Virtual Instrumentation Design for Medical Systems
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Design of medical systems using graphics programming language of LabVIEW including the designing and programming of three virtual systems: cardiac monitor, electromyogram system for biomechanics, and sleep stage analyses for electroencephalograms.
Prerequisite: Approval of instructor.

BMEN 606 Medical Device Path to Market
Credits 3. 3 Lecture Hours.
Path to market for a medical device with specific attention to the regulatory affairs to enable the development of an appropriate regulatory strategy due to the highly regulated global environment.
Prerequisite: Graduate classification or approval of instructor.

BMEN 607 Clinical Engineering
Credits 3. 3 Lecture Hours.
Responsibilities, functions and duties of the hospital based biomedical engineer including program organization, management, medical equipment acquisition and use, preventive maintenance and repair and hospital safety.
Prerequisite: Approval of instructor.

BMEN 608 Optical Diagnostic and Monitoring Principles
Credits 3. 3 Lecture Hours.
Principles of optical spectroscopy, including absorption, fluorescence and scattering spectroscopy; emphasis on understanding how light interacts with biological samples and how these interactions can be optically measured, quantified and used for medical diagnosis and sensing.
Prerequisites: MATH 308; PHYS 208.

BMEN 609 Optical Therapeutic and Interventional Principles
Credits 3. 3 Lecture Hours.
Study of mechanical and thermal processes of radiation interaction with biological tissue; issues and objectives in therapeutic, surgical, and diagnostic applications; basic engineering principles used in developing therapeutic with a focus on the use of lasers and optical technology.
Prerequisites: MATH 308; PHYS 208.

BMEN 611 Biomedical Imaging Systems
Credits 3. 3 Lecture Hours.
The physics behind the major medical imaging systems including CT, MRI, Ultrasound and X-Ray will be introduced and described; a linear systems approach will be used along with basic diffraction theory.
Prerequisites: BMEN 322; MATH 308.

BMEN 620 Bio-Optical Imaging
Credits 3. 3 Lecture Hours.
Optical imaging techniques for detection of structures and functions of biological tissues; basic physics and engineering of each imaging technique.
Prerequisite: MATH 308.

BMEN 621 Microscale Bio-Optical Applications
Credits 3. 3 Lecture Hours.
Introduction to the biomedical application of lasers to manipulation, detection and visualization on (sub)cellular length scales, with emphasis on governing principles on which applications are founded; applications from recent literature (state-of-the-art) presented.
Prerequisites: Approval of instructor.
BMEN 622 Bioelectromagnetism  
Credits 3.3 Lecture Hours.  
Electric, magnetic and electromagnetic phenomena in association with biological tissues; source modeling based on physiological current including line and volume conductor models as well as electromagnetic-based stimulation, sensing and imaging.  
Prerequisite: Graduate classification or approval of instructor.

BMEN 624 Biomedical Sensing and Imaging at the Nanoscale  
Credits 3.3 Lecture Hours.  
Introduction to nanotechnology with an emphasis on biomedical techniques and medical applications; material covered ranges from the basic physics of contrast agents to the engineering of current sensing and imaging systems applied at the nanoscale.  
Prerequisites: PHYS 208, MATH 308.

BMEN 625 Biophotonics  
Credits 3.3 Lecture Hours.  
Theory and application of optical instrumentation, including light sources, lasers, detectors, and optical fibers; instrumentation and engineering in biomedical applications of optics in therapeutics, diagnostics, and biosensing.  
Prerequisite: Graduate classification or approval of instructor.

BMEN 626 Optical Biosensors  
Credits 3.3 Lecture Hours.  
Introduction to biosensing principles and detailed analysis of optical methods for transduction; fluorescence-based transduction; molecular recognition of targets; immobilization of sensing reagents; quantitative analysis of sensing systems; design and characterization of sensing assays and associated measurement systems; review of historical and current trends in optical biosensors.  
Prerequisite: Approval of instructor.

BMEN 627/Ecen 763 Magnetic Resonance Engineering  
Credits 3.2 Lecture Hours. 3 Lab Hours.  
Design, construction and application of instrumentation for MR imaging; fundamentals of the architecture of an MR spectrometer and the gradient subsystem used for image localization; emphasis on the radiofrequency sensors and systems used for signal generation and reception.  
Prerequisites: BMEN 420; ECEN 410, or ECEN 411, or approval of instructor; graduate classification.  
Cross Listing: ECEN 763/BMEN 627.

BMEN 630 Global Medical Device Regulation  
Credits 3.3 Lecture Hours.  
Overview of applicable U.S. and international regulations and regulatory processes for the design, approval and marketing of medical devices.  
Prerequisite: Approval of instructor.

BMEN 631 Thermodynamics of Biomolecular Systems  
Credits 3.3 Lecture Hours.  
Introduces equilibrium and non-equilibrium statistical mechanics and applies them to understand various bimolecular systems; including ensemble theory, reaction kinetics, nonlinear dynamics, and stochastic processes; with applied examples such as enzyme-ligand binding kinetics, conformational dynamic of proteins and nucleic acids, population dynamics, and noise in biological signals.  
Prerequisites: BMEN 240, PHYS 208 and MATH 308.

BMEN 632 Molecular and Cellular Biomechanics  
Credits 3.3 Lecture Hours.  
Introduces biomolecules and their assemblies that play structural and dynamical roles in subcellular to cellular level mechanics, with emphasis on quantitative/theoretical descriptions, and discussions of the relevant experiment approaches to probe these nano to micro-scale phenomena; including topics in (1) self-assembly of cytoskeleton and biomembranes, (2) molecular motors, (3) cell motility, and mechanotransduction.  
Prerequisites: BMEN 240 and MATH 308.

BMEN 635 Biomaterials Compatibility  
Credits 3.3 Lecture Hours.  
Relevance of mechanical and physical properties to implant selection and design; effect of the body environment on metallic, ceramic and plastic materials; tissue engineering; rejection mechanisms used by the body to maintain homeostasis regulatory requirements.  
Prerequisites: Approval of instructor.

BMEN 640 Design of Medical Devices  
Credits 3.3 Lecture Hours.  
Overview of the multiple issues in managing the design of a marketable medical device, including the design process from clinical problem definition through prototype and clinical testing to market readiness; includes FDA pre- and post-market regulation, human factors and system safety considerations, and medical product liability.  
Prerequisite: Approval of instructor.

BMEN 641 Numerical Methods in Biomedical Engineering  
Credits 3.3 Lecture Hours.  
Application of numerical analysis to analyze molecular, cellular and physiological systems; general techniques used to analyze steady and dynamic systems; techniques will be applied in a MATLAB programming environment.  
Prerequisites: BMEN 207, BIOL 213 and VTPP 435; graduate classification or approval of instructor.

BMEN 650 Biomedical Optics Laboratory  
Credits 3.2 Lecture Hours. 3 Lab Hours.  
Biomedical optics technology; basic engineering principles used in developing therapeutic and diagnostic devices; a series of hands-on labs will be performed including optical monitoring, diagnostic and therapeutic experiments.  
Prerequisites: MATH 308; PHYS 208.

BMEN 652 Cell Mechanobiology  
Credits 3.3 Lecture Hours.  
Focuses on how mechanical forces influence cell behavior through physical and biochemical mechanisms; objectives include integrating engineering and cell biology to solve biomedical problems, which includes developing models for applying forces to cultured cells and tissues and measuring changes in cell biochemistry, structure, and function.  
Prerequisites: BMEN 282/CHEN 282.

BMEN 657 Orthopedic Biomechanics  
Credits 3.3 Lecture Hours.  
Fundamental course in orthopedic biomechanics designed to develop competencies in biomechanical principles using practical examples and clinical case studies of how biomechanical knowledge is applied to the evaluation of musculoskeletal tissues and structures, and treatment options for musculoskeletal dysfunction.  
Prerequisite(s): Admitted into the major degree sequence in Biomedical Engineering and graduate classification. Stacked with BMEN 457.
BMEN 660 Vascular Mechanics
Credits 3. 3 Lecture Hours.
Application of continuum mechanics to the study of the heart arteries; on the measurement and quantification of material properties, and the calculation of vascular stresses; analysis of several cardiovascular devices to reinforce the need for careful analysis in the device design.
Prerequisites: BMEN 240 and BMEN 341 or equivalents.

BMEN 661 Cardiac Mechanics
Credits 3. 3 Lecture Hours.
Application of continuum mechanics and computational solid mechanics to the study of the mammalian heart; utilization of continuum mechanics and finite element analysis in solving non-linear boundary value problems in biomechanics.
Prerequisites: BMEN 240 and BMEN 602; MEMA 467; or equivalents.

BMEN 662 Vascular Fluid Mechanics
Credits 3. 3 Lecture Hours.
Bio-fluid mechanics of the human circulatory system including examination of disease development and medical treatments.
Prerequisites: BMEN 240 or equivalent.

BMEN 663 Soft Tissue Mechanics and Finite Element Methods
Credits 3. 3 Lecture Hours.
Application of continuum mechanics and finite element methods to the study of the mechanical behavior or soft tissues and associative applications in biomedicine.
Prerequisites: BMEN 240 or equivalent.

BMEN 669 Entrepreneurial Issues in Biomedical Engineering
Credits 3. 3 Lecture Hours.
Description and analysis of issues associated with initiating business ventures to transfer biomedical technologies into the health care sector, including intellectual engineering technology area; and utilizing recent case studies of previous ventures.
Prerequisite: Approval of instructor.

BMEN 672/NUEN 672 Introduction to Diagnostic Radiology Physics
Credits 3. 2 Lecture Hours. 3 Lab Hours.
This course presents the concepts of radiation physics used in diagnostic radiology by providing an introduction to the theory behind the different imaging modalities as it relates to mammography, planar X-ray imaging, computed tomography (CT), single photon emission tomography (SPECT), and positron emission tomography (PET).
Prerequisite(s): NUEN 611, NUEN 613 or approval from academic advisor.
Cross Listing: NUEN 672.

BMEN 674 Communications in Biomedical Engineering
Credits 3. 3 Lecture Hours.
General concepts for communicating the results of biomedical research including written papers, conference proceedings, proposals and grants, as well as oral presentations and basic ethics.
Prerequisite: Approval of instructor.

BMEN 675 Biomedical Case Studies
Credit 1. 1 Lecture Hour.
Introduction to the engineering design process for solving biomedical problems by using the case study method in biomedical instrument design.
Prerequisite: Approval of instructor.

BMEN 680 Biomedical Engineering of Tissues
Credits 3. 3 Lecture Hours.
Introduction to engineering strategies used to repair tissue; literature-grounded overview of current strategies using stem cells, 3D scaffolds and drug/gene delivery including ethical considerations of these therapies.
Prerequisite: BMEN 343 or approval of instructor.

BMEN 681 Seminar
Credit 1. 1 Lecture Hour.
Designed to permit student to broaden capability, performance and perspective in biomedical engineering via his or her own formal presentation and by presentations from other professionals.
Prerequisite: Approval of instructor.

BMEN 682 Polymeric Biomaterials
Credits 3. 3 Lecture Hours.
Preparation, properties, and biomedical applications of polymers including: polymerization; structure-property relationships; molecular weight and measurement; morphology; thermal transitions; network formation; mechanical behavior; polymeric surface modification; polymer biocompatibility and bioadhesion; polymers in medicine, dentistry, and surgery; polymers for drug delivery; polymeric hydrogels; and biodegradable polymers.
Prerequisites: BMEN 342, or approval of instructor.

BMEN 683 Polymeric Biomaterial Synthesis
Credits 3. 3 Lecture Hours.
Overview of polymer synthetic routes and key structure-property relationships with emphasis on the design of polymeric systems to achieve specific properties; tissue engineering and drug delivery applications will be used as model systems to explore the process of biomaterial design from synthesis to device evaluation.
Prerequisites: BMEN 343 or approval of instructor.

BMEN 684 Professional Internship
Credits 1 to 12. 1 to 12 Other Hours.
Training under the supervision of practicing engineers in settings appropriate to the student's professional objectives.
Prerequisites: Approval of chair of student's advisory committee and department head.

BMEN 685 Directed Studies
Credits 1 to 12. 1 to 12 Other Hours.
Allows students the opportunity to undertake and complete, for credit, limited investigations not included within thesis or dissertation research and not covered by other courses. May be repeated for credit.
Prerequisites: Approval of designated instructor and approved project proposal.

BMEN 686 Biomedical Nanotechnology
Credits 3. 3 Lecture Hours.
Introduction to nanotechnology applications in biomedicine; concepts of scale; unique properties at the nanoscale; biological interaction, transport, and biocompatibility of nanomaterials; current research and development of nanotechnology for medical applications, including sensors, diagnostic tools, drug delivery systems, therapeutic devices, and interactions of cells and biomolecules with nanstructured surfaces.
Prerequisites: BMEN 343, approval of instructor.
BMEN 687 Drug Delivery
Credits 3. 3 Lecture Hours.
Mechanisms for controlled release of pharmaceutically active agents and the development of useful drug delivery systems; controlled release mechanisms including diffusive, convective and erosive driving forces by using case studies related to oral, topical and parenteral release in a frontier interdisciplinary scientific research format.
Prerequisite: Graduate classification in biomedical engineering or approval of instructor.

BMEN 689 Special Topics in...
Credits 1 to 4. 0 to 4 Lab Hours.
Selected topics in an identified area of biomedical engineering. May be repeated for credit.
Prerequisite: Approval of instructor.

BMEN 691 Research
Credits 1 to 23. 1 to 23 Other Hours.
Research for thesis or dissertation.

BUAD - Business Administration

BUAD 620 Business Communication
Credits 1 to 3. 1 to 3 Lecture Hours.
Effective oral and written communication for corporate settings; communication theory and practice with core MBA and other courses; practice with oral presentation skills in corporate situations. Classification 6 students may not enroll in this course.
Prerequisite: Approval of instructor.

BUAD 679 Leadership Development
Credits 1 to 4. 1 to 4 Lecture Hours.
Focus on assignments and activities to develop self-awareness as a leader and encourage reflection; strategies to improve leadership and communication with emphasis on leading, influencing and team work in a business context; integration of core business knowledge and skills.
Prerequisite: Enrollment limited to BUAD Classification 7 MBA students.

BUAD 681 Seminar
Credit 1. 1 Lecture Hour.
One credit hour seminar focusing upon a variety of skills essential in a management career including communications, business and government relations and interpersonal skills. An Executive Lecture Series may form a component of this course. Classification 6 students may not enroll in this course.
Prerequisite: Enrollment is limited to BUAD classification 7 and 8 graduate students.

BUAD 684 Professional Internship
Credits 1 to 6. 1 to 6 Other Hours.
A directed internship in an organization to provide students with on-the-job training with professionals in organizational settings appropriate to the student's professional objectives. Classification 6 students may not enroll in this course.
Prerequisite: Approval of committee chair and department head.

BUAD 685 Directed Studies
Credits 1 to 4. 1 to 4 Other Hours.
Directed study of selected problems using recent developments in business research methods. Classification 6 students may not enroll in this course.
Prerequisite: Approval of instructor and department head.

BUAD 689 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Selected topics in an identified area of business administration.
Prerequisite: Approval of instructor.

BUAD 693 Professional Study
Credits 1 to 6. 1 to 6 Lecture Hours.
Approved professional study project as part of the Mays MBA Program. Enrollment limited to Business Administration G7 students.

BUSH - Geo. Bush School of Gov

BUSH 600 Bush School Graduate Study Abroad
Credits 1 to 12. 1 to 12 Other Hours.
For students in approved study abroad and reciprocal educational exchange programs.
Prerequisites: Graduate classification in the Bush School; approval of director.

BUSH 601 Leadership and Public Administration
Credits 3. 3 Lecture Hours.
Overview of the field of public administration; theory and practice of leadership.
Prerequisites: Graduate classification and approval of MPSA or MPIA director.

BUSH 631 Quantitative Methods in Public Management I
Credits 3. 3 Lecture Hours.
Introduction to the common methods for social and policy analysis with a focus on application of methods such as analysis of variance and regression, to tasks including policy analysis, evaluation and survey research; emphasis on the performance of social and policy analysis, although some statistical theory is introduced.
Prerequisites: Graduate classification and approval of MPSA or MPIA director; STAT 303 or equivalent.

BUSH 632 Quantitative Methods in Public Management II
Credits 3. 3 Lecture Hours.
Numerous formal aspects and methods of decision-making useful in public management including benefit-cost analysis, program evaluation and survey sampling; emphasis on theoretical foundation and practical application; collection and analysis of information, formulation of results and presentation of conclusions.
Prerequisites: Graduate classification and approval of MPSA or MPIA director.

BUSH 635 Quantitative Methods in Public Management II: Policy Analysis Emphasis
Credits 3. 3 Lecture Hours.
Continuation of BUSH 631. Advanced instruction in making useful policy recommendations based on regression analysis, survey design, data analysis, and techniques for interpreting statistical output from multiple disciplines; application of analysis software.
Prerequisites: BUSH 631; approval of MPSA or MPIA Director.

BUSH 636 Quantitative Methods II: Game Theory Emphasis
Credits 3. 3 Lecture Hours.
Continuation of BUSH 631; advanced instruction in quantitative social science research methods; designed to help understand influences and constraints on decision-makers, improve the ability to characterize and predict decisions and assess the validity of information presented, and analyze situations of relevance to making decisions as a public manager.
Prerequisites: BUSH 631; PSAA or INTA majors only.

BUSH 666 BUDGET IN PUBLIC SECTOR
Credits 3. 3 Lecture Hours.
**BUSH 685 Directed Studies**  
Credits 1 to 4. 1 to 4 Other Hours.  
Directed individual instruction in selected problems in government and public service.  
**Prerequisites:** Graduate classification and approval of program director.

**BUSH 691 Research**  
Credits 1 to 23. 1 to 23 Other Hours.  
Research for thesis or dissertation.

---

**CARC - College of Architecture**

**CARC 600 College of Architecture Graduate Study Abroad**  
Credits 1 to 16. 1 to 16 Other Hours.  
For students in approved study abroad programs participating in reciprocal educational exchange programs.  
**Prerequisite:** Admission to approved program.

**CARC 601 Foundations of Research in Planning and Design**  
Credits 3. 3 Lecture Hours.  
Introduction to the research process and its application to problems in planning and design; presentation of philosophy and logic underlying the scientific method; critical analysis of planning and design literature according to each step of the research process: problem definition, hypothesis development, study design, analysis and interpretation of the findings.

**CARC 602 Research Methods in Planning and Design**  
Credits 3. 3 Lecture Hours.  
Basic empirical research methods used in planning and design research: experimental, survey and case study designs; comparisons of the various methods; application of techniques in sample selection, data collection and analytic approaches. May be repeated for credit.  
**Prerequisite:** STAT 651 or equivalent.

**CARC 604 Advanced Field Studies in Design Innovation**  
Credits 1 to 18. 1 to 18 Other Hours.  
Advanced design innovation in international and domestic environments away from Texas A&M University campus; emphasis on the cultural, social economic, geographical, climatic and technological factors influencing design solutions for human needs.  
**Prerequisite:** Graduate classification.

**CARC 685 Directed Studies**  
Credits 1 to 6. 1-1 Other Hours.  
Individual problems involving application of theory and practice in architecture, construction science, landscape architecture and urban and regional planning in an international setting.  
**Prerequisites:** Approval of instructor and department head.

**CARC 689 Special Topics in...**  
Credits 1 to 6. 1 to 6 Lecture Hours.  
Selected topics in an identified field. May be repeated for credit.

**CARC 698 Writing for Publication**  
Credits 3. 3 Lecture Hours.  
Writing in academic disciplines and settings. Writing for different audiences and purposes. Style; planning and development of academic journal articles; grant proposals; correspondence; oral presentations; technical reports. Permission of departmental/college graduate advisor. Must be taken on a satisfactory/unsatisfactory basis.  
**Prerequisite:** Advanced standing in master's doctoral programs.

---

**CEHD - Coll. of Ed & Human Dev**

**CEHD 600 Education and Human Development Study Abroad**  
Credits 1 to 18. 1 to 18 Lecture Hours.  
For students in approved programs to study abroad. May be repeated for credit.  
**Prerequisite:** Approval of department head.

**CEHD 603 Writing for Publication in Education and Human Development Research**  
Credits 3. 3 Lecture Hours.  
Assists students with writing and submitting research findings for publication, and managing contingencies for becoming productive scholars in their field.  
**Prerequisite:** Graduate classification.

**CEHD 689 Special Topics in...**  
Credits 1 to 4. 1 to 4 Lecture Hours.  
Selected topics in an identified area of education and human development. May be repeated for credit.  
**Prerequisites:** Graduate classification and approval of instructor.

---

**CHEM - Chemistry**

**CHEM 601 Analytical Chemistry I**  
Credits 3. 3 Lecture Hours.  
Fundamentals of chemical instrumentation. Modular approach to instrumental methods of chemical analysis; modules to be covered include digital electronics, modern optics, basic quantification and signal-to-noise enhancements.  
**Prerequisite:** Graduate classification in chemistry or approval of instructor.

**CHEM 602 Analytical Chemistry II**  
Credits 3. 3 Lecture Hours.  
Modern analytical techniques, spectroscopies, chromatography, and "hyphenated" methods such as GC-FTIR, GC-MS, HPLC-MS, CE-LIF, and CE-MS are examined from the perspective of surface analysis, fundamentals of separation science and structural characterization of complex molecular systems.  
**Prerequisite:** CHEM 601.

**CHEM 603 Modern Chromatographic Separation Methods**  
Credits 3. 3 Lecture Hours.  
Intended for graduate students in chemistry, chemical engineering, and the life sciences.  
**Prerequisite:** Graduate standing.

**CHEM 610 Organic Reactions**  
Credits 3. 3 Lecture Hours.  
Introduction to mechanisms and scope of the basic organic reaction types as applied to major functional groups.  
**Prerequisite:** CHEM 646 or approval of instructor.

**CHEM 615 Organic Synthesis**  
Credits 3. 3 Lecture Hours.  
Application of organic reactions to synthesis of complex organic molecules. Synthesis design and methodology, scope and limitations of reactions and experimental design.  
**Prerequisite:** CHEM 610.
CHEM 616 Organometallic Transformations for Organic Synthesis
Credits 3. 3 Lecture Hours.
Introduction to transition and main group metal-mediated reactions in organic synthesis; organometallic mechanisms in the context of homogeneous catalytic systems currently employed in synthetic laboratories; emphasis on the properties of transition metal complexes and their interactions with organic substrates that promote useful chemical transformations.
Prerequisite: CHEM 646 recommended.

CHEM 618 NMR Spectroscopy
Credits 3. 3 Lecture Hours.
Theory and practice of modern nuclear magnetic resonance spectroscopy; Bloch equations, relaxation and relaxation mechanisms, chemical exchange, pulse and Fourier-transform methods, selective excitation, 2-D methods and solid-state nuclear magnetic resonance.
Prerequisite: Graduate classification in chemistry or approval of instructor.

CHEM 619 Analytical Spectroscopy
Credits 3. 3 Lecture Hours.
Modern analytical spectroscopic techniques; U.V., visible spectroscopy, atomic absorption, emission spectrometry, flame emission, fluorometry, X-ray methods and other new developments in analytical spectroscopy.
Prerequisite: CHEM 602 or approval of instructor.

CHEM 621 Chemical Kinetics
Credits 3. 3 Lecture Hours.
Present theories about chemical reaction rates and mechanisms.
Prerequisite: CHEM 328 or approval of instructor.

CHEM 623 Surface Chemistry
Credits 3. 3 Lecture Hours.
Nature, structure and chemistry of surfaces; characterization of surfaces from surface energy to structure; relation to chemical processes.
Prerequisite: Graduate classification in chemistry or approval of instructor.

CHEM 627 Principles of Biological Chemistry
Credits 3. 3 Lecture Hours.
General principles of biological chemistry with an emphasis on the structures and mechanisms of action for proteins, nucleic acids and lipids.
Prerequisite: Graduate classification.

CHEM 628 Coordination and Bioinorganic Chemistry
Credits 3. 3 Lecture Hours.
Structure and reactivity of coordination compounds; reactions of metal ions with small biomolecules and the reactions of toxic metal ions; role of metal ions in biological systems including the function of metal ions in enzymes.
Prerequisite: CHEM 633.

CHEM 629 Main Group Chemistry
Credits 3. 3 Lecture Hours.
Chemistry of the ns and np elements of the periodic table and the noble gases including the organometallic chemistry of these elements.
Prerequisite: CHEM 633.

CHEM 630 Bioorganic Chemistry
Credits 3. 3 Lecture Hours.
Biorganic Chemistry. Introduction to current research areas of biorganic chemistry and chemical genetic tools in exploring biological systems; DNA recombinant technology; histone chemical biology; protein glycosylation; protein engineering methods; gene transcription regulation; semi-synthesis of proteins with PTM analogs.
Prerequisites: CHEM 627 or approval of instructor.

CHEM 631 Statistical Thermodynamics
Credits 3. 3 Lecture Hours.
Methods of statistical mechanics based primarily on Boltzmann statistics; approach to thermodynamics through partition function; statistical concept of entropy.

CHEM 633 Principles of Inorganic Chemistry
Credits 3. 3 Lecture Hours.
General principles of inorganic chemistry treated with a view to applications in other subfields of chemistry.
Prerequisite: Graduate classification in chemistry or approval of instructor.

CHEM 634 Physical Methods in Inorganic Chemistry
Credits 3. 3 Lecture Hours.
Determination of the molecular structure of inorganic and organometallic species; modern aspects of diffraction, magnetic resonance and vibrational methods.
Prerequisite: CHEM 641 or CHEM 673.

CHEM 635 Introduction to X-ray Diffraction Methods
Credits 3. 3 Lecture Hours.
Fundamentals of diffraction theory by crystals and the solution of crystal structures using this methodology.
Prerequisite: BS in Chemistry, Physics, or Engineering.

CHEM 636 Mechanistic Inorganic Chemistry
Credits 3. 3 Lecture Hours.
Reaction pathways in both main group and transition-metal complexes; factors which influence the reaction rate including nature of the metal, the coordination sphere, reaction conditions and catalytic intermediates.
Prerequisite: CHEM 633.

CHEM 640 Laboratory Methods in Biological Chemistry
Credits 3. 1 Lecture Hour. 6 Lab Hours.
Application of chemical techniques to the investigation and/or manipulation of biological systems; laboratory methods provide a hands-on opportunity to gain an understanding and appreciation for chemical biology techniques.
Prerequisite: Graduate classification or approval of instructor.

CHEM 641 Structural Inorganic Chemistry
Credits 3. 3 Lecture Hours.
Introduction to chemical bonding; ionic, covalent, coordinate and hydrogen bonding; relationship of molecular orbital and ligand field theories to experimental studies of the electronic structure of inorganic molecules.
Prerequisites: CHEM 633 and CHEM 673.

CHEM 642 Organometallic Chemistry and Homogeneous Catalysis
Credits 3. 3 Lecture Hours.
Synthesis, structure and reactivity of organometallic compounds; elementary processes for general and radical reactions, mechanism of reactions at metal centers and applications to homogeneous catalysis.
Prerequisite: CHEM 633.

CHEM 644 Natural Products Biosynthesis
Credits 3. 3 Lecture Hours.
Survey of the chemical reactions occurring in living systems, describe the experimental methods used to study these reactions and examine the biosynthesis of the major families of natural products; emphasis on the mechanistic chemistry of the biosynthetic pathway.
Prerequisite: Graduate classification or approval of instructor.
CHEM 646 Physical Organic Chemistry  
Credits 3. 3 Lecture Hours.  
A detailed introduction to the theory and principles of organic chemistry; 
bonding and structure in organic chemistry, stereochemistry, reactive 
intermediates in organic chemistry and transition state theory; kinetics and 
thermodynamic approaches.  
Prerequisite: CHEM 228 or approval of instructor.

CHEM 647 Spectra of Organic Compounds  
Credits 3. 3 Lecture Hours.  
Correlations of molecular structure with spectroscopic and other physical 
properties; applications to modern problems in organic chemistry.  
Prerequisite: CHEM 646 or approval of instructor.

CHEM 648 Principles of Quantum Mechanics  
Credits 3. 3 Lecture Hours.  
Classical mechanics and development of wave mechanics; application of 
wave mechanics to special chemical problems.  
Prerequisite: Approval of instructor.

CHEM 658 Molecular Modeling  
Credits 2. 1 Lecture Hour. 3 Lab Hours.  
An introduction to molecular modeling with an emphasis on quantum 
level calculations. Lectures will cover the basic theory behind the 
calculations and lab work will focus on the practical application of modern 
computational chemistry codes.  
Prerequisite: Graduate classification or approval of instructor.

CHEM 660 Nuclear Chemistry  
Credits 3. 3 Lecture Hours. 0 Lab Hours.  
Radioactive decay, nuclear models, nuclear spectroscopy, nuclear 
reactions, fission and other topics of current interest in nuclear chemical 
research.  
Prerequisite: CHEM 464 or approval of instructor.

CHEM 670 Physical Methods in Biological Chemistry  
Credits 3. 3 Lecture Hours.  
Overview of current methods for the characterization of biological 
macromolecules, including protein structure, protein-ligand interactions, 
protein folding; techniques discussed include nuclear magnetic resonance, 
optical spectroscopy, calorimetry, electron paramagnetic resonance, 
Mössbauer spectroscopy, X-ray crystallography, electron microscopy, and 
mass spectrometry.  
Prerequisite: Graduate classification or approval of instructor.

CHEM 672 Bioorganic Reaction Mechanisms  
Credits 3. 3 Lecture Hours.  
Proposed mechanisms of action of various enzymes and coenzymes from 
the "model systems" approach; new developments, theory and established 
mechanisms.  
Prerequisites: CHEM 646; BICH 624.

CHEM 673 Symmetry and Group Theory in Chemistry  
Credits 3. 3 Lecture Hours.  
Applications of symmetry and group theory to various types of chemical 
systems; classification of molecules into symmetry point groups and use of 
character tables.  
Prerequisite: Bachelor's degree in chemistry.

CHEM 681 Seminar  
Credit 1. 1 Lecture Hour.  
Oral presentations and discussions of recent advances in chemistry.

CHEM 684 Professional Internship  
Credits 1 to 4. 1 to 4 Other Hours.  
Supervised practical experience in professional functions appropriate to 
career goals in chemical education. Students will be required to complete 
a scholarly report of these activities acceptable to graduate committee. 
Enrollment limited to students pursuing a non-thesis MS degree, with 
emphasis on chemical education. Requires approval of committee chair 
and department head with non-thesis MS degree plan filed.  
Prerequisite: Graduate classification in chemistry.

CHEM 685 Directed Studies  
Credits 1 to 6. 1 to 6 Other Hours.  
Special topics to suit small group requirements; more recent problems and 
results in various branches of chemistry; laboratory work or conference 
and discussion.  
Prerequisite: Graduate classification.

CHEM 686 Ethics in Chemical Research and Scholarship  
Credit 1. 1 Lecture Hour.  
Ethical issues in chemical research and scholarship and methods for 
resolution of such issues; includes Texas A&M University Policies and 
Procedures, ethics and scientific truth, ethics and other scientists and 
ethics and society; case studies.  
Prerequisite: Graduate classification in chemistry or biochemistry.

CHEM 689 Special Topics in...  
Credits 1 to 4. 1 to 4 Lecture Hours. 0 to 8 Lab Hours.  
Selected topics in an identified area of chemistry. May be repeated for 
credit.  
Prerequisites: Graduate classification and approval of instructor.

CHEM 690 Theory of Chemical Research  
Credits 3. 3 Lecture Hours.  
The design of research experiments in various subfields of chemistry and 
the evaluation of research results with the aid of examples taken from the 
current scientific literature. May be repeated for credit.

CHEM 691 Research  
Credits 1 to 23. 1 to 23 Other Hours.  
Research for thesis or dissertation.

CHEM 695 Frontiers in Chemical Research  
Credits 3. 3 Lecture Hours.  
Present status of research in a variety of significant chemical fields. 
Content will depend on the availability of visiting lecturers who will be 
selected because of distinguished international recognition in their fields of 
research. May be taken twice.  
Prerequisite: Graduate classification.

CHEM 697 Methods in Teaching Chemistry Laboratory  
Credit 1. 1 Lecture Hour. 1 Lab Hour.  
An introduction to teaching methods associated with the teaching of 
introductory chemistry laboratories using graduate teaching assistants. 
Emphasis placed on effective communication, preparation, record keeping, 
and safe and effective management of an instructional laboratory. May be 
repeated for credit.  
Prerequisite: Graduate classification in chemistry.
CHEN - Chemical Engineering

CHEN 601 Chemical Engineering Laboratory Safety and Health  
Credit 1.1 Lecture Hour.  
Control of hazards associated with chemical engineering research laboratories and the chemical process industry; causes and prevention of accidents, emergency procedures, safety codes, health effects of toxic substances and experimental design for safety.  
Prerequisite: Graduate classification.

CHEN 604 Chemical Engineering Process Analysis I  
Credits 3.3 Lecture Hours.  
Development and analysis of chemical process models that involve systems of algebraic equations, ordinary differential equations and partial differential equations.  
Prerequisite: MATH 308 or approval of instructor.

CHEN 605 Chemical Engineering Process Analysis II  
Credits 3.3 Lecture Hours.  
Formulation of mathematical models and solution of resulting mass and energy balance equations by modern computational techniques, applications to separation processes, chemical kinetics, reaction engineering, heat and mass transfer.  
Prerequisite: CHEN 320 or approval of instructor.

CHEN 614 Advanced Transport Phenomena I  
Credits 4.4 Lecture Hours.  
First part of a two-semester sequence covering advanced transport phenomena; emphasis is placed on momentum transfer or fluid mechanics applied to chemical engineering problems.  
Prerequisite: Approval of instructor.

CHEN 615 Advanced Transport Phenomena II  
Credits 3.3 Lecture Hours.  
Advanced energy and mass transfer in chemical engineering processes.  
Prerequisite: Approval of instructor.

CHEN 623 Applications of Thermodynamics to Chemical Engineering  
Credits 3.3 Lecture Hours.  
Application of thermodynamics to chemical engineering operations and processes.  
Prerequisite: CHEN 354 or approval of instructor.

CHEN 624 Chemical Engineering Kinetics and Reactor Design  
Credits 3.3 Lecture Hours.  
Rates and mechanisms of chemical reactions. Thermal and catalytic reactions both homogeneous and heterogeneous.  
Prerequisite: CHEN 464 or approval of instructor.

CHEN 629 Transport Phenomena  
Credits 3.3 Lecture Hours.  
Principles of transfer of momentum, energy and mass studied by application to advanced chemical engineering problems. Theoretical analogy of these three modes of transfer.  
Prerequisite: CHEN 424 or approval of instructor.

CHEN 631 Process Dynamics and Advanced Process Control  
Credits 3.3 Lecture Hours.  
Modeling, analysis, and simulation of linear and nonlinear process systems; model-based control techniques for achieving desired process dynamics.  
Prerequisite: CHEN 461 or approval of instructor.

CHEN 633 Thermodynamics and Kinetics of Confined Fluids  
Credits 3.3 Lecture Hours.  
Emphasis on fluids, adsorption phenomena (theory and applications), phase transitions in confined fluids (capillary condensation and freezing), the behavior of confined water, reactions in confinement, and applications.  
Prerequisite: CHEN 623 or approval of instructor.

CHEN 634 Catalysis and Multiphase Reactor Design  
Credits 3.3 Lecture Hours.  
Introduction and overview of catalyzed reactions; topics include heterogeneous catalysis and relevant surface science concepts, mass transport, and reactor design; discussion of industrially relevant chemistries.  
Prerequisite: CHEN 624 or approval of instructor.

CHEN 635 Advanced Nanostructured Materials  
Credits 3.3 Lecture Hours.  
Chemical synthesis and characterization of materials with structures and properties in the nano-scale; emphasis on the fundamental science and engineering of understanding and manipulating "bottom-up" material formation.  
Prerequisite: Approval of instructor.

CHEN 640 Rheology  
Credits 3.3 Lecture Hours.  
Principles of stress, deformation and flow; vector and tensor equations of fluid mechanics. Behavior of Newtonian, non-Newtonian and viscoelastic fluids.  
Prerequisite: MATH 601 or approval of instructor.

CHEN 641 Polymer Engineering  
Credits 3.3 Lecture Hours.  
Principles and practice of polymer structure, synthesis, reaction mechanisms and kinetics; polymer characterization, chemical and physical properties degradation and recycling, melt and solid mechanical and rheological properties. Technology of production and processing operations.  
Prerequisite: Graduate classification.

CHEN 642 Colloidal and Interfacial Systems  
Credits 3.3 Lecture Hours.  
Fundamental principles related to interactions, dynamic, and structure in colloidal and interfacial systems. Concepts covered include hydrodynamics, brownian motion, diffusion sedimentation, electrophoresis, colloidal forces, surface forces, polymeric forces, aggregation, deposition, equilibrium phase behavior, rheology, and experimental methods.

CHEN 643 Applied Statistical Mechanics of Fluids  
Credits 3.3 Lecture Hours.  
Application of molecular theories and computer simulation techniques to describe the thermodynamics and transport properties of fluids and fluid mixtures.  
Prerequisite: CHEN 623 or approval of instructor.

CHEN 644 Nanotechnology: The Physics, Chemistry, and Engineering of Nanotechnology  
Credits 3.3 Lecture Hours.  
Introduction to the basics and tools of nanotechnology; nanotechnology approaches and algorithms to analyze, design and simulate systems; focus on developing, modifying, adapting and creating tools to solve problems in the field.  
Prerequisite: Approval of instructor.
Course Descriptions

CHEN 650 Introduction to Microfabrication and Microfluidics Technology
Credits 3.3 Lecture Hours.
Micro Electro Mechanical Systems (MEMS Technology). To study the fundamentals of fluidics, heat and mass transfer, surface chemistry, and electrochemical interactions.

CHEN 651 Biochemical Engineering
Credits 3.3 Lecture Hours.
Integration of principles of engineering, biochemistry and microbiology; application to the design, development and improvement of industrial processes that employ biological materials. Engineering discipline directed toward creative application of interdisciplinary information to the economic processing of biological and related materials.

Prerequisite: Approval of instructor.

CHEN 653 Chemical Engineering in Tissue Engineering and Drug and Gene Delivery
Credits 3.3 Lecture Hours.
Application of chemical engineering principles to the examination of tissue engineering systems, metabolic engineering systems, drug design and delivery, and gene delivery.

Prerequisite: Approval of instructor.

CHEN 655/SENG 655 Process Safety Engineering
Credits 3.3 Lecture Hours.
Applications of engineering principles to process hazards analysis including source and dispersion modeling, emergency relief systems, fire and explosion prevention and mitigation, hazard identification, risk assessment, process safety management, etc.

Prerequisite: Approval of instructor.

Cross Listing: SENG 655/CHEN 655.

CHEN 658 Fundamentals of Environmental Remediation Processes
Credits 3.3 Lecture Hours.
Fundamental approach to various remediation technologies, topics in environmental thermodynamics and mass transfer, adsorption, desorption, ion exchange, air stripping, extraction, chemical oxidation, biodegradation.

Prerequisite: Graduate classification in engineering.

CHEN 660 Quantitative Risk Analysis
Credits 3.3 Lecture Hours.
Fundamental concepts, techniques, and applications of risk analysis and risk-informed decision making for engineering students. Practical uses of probabilistic methods are demonstrated in exercises and case studies from diverse engineering areas.

Prerequisites: Graduate or senior classification.

Cross Listing: SENG 660 and ISEN 660.

CHEN 661 Optimization of Chemical Engineering Processes
Credits 3.3 Lecture Hours.
Methods of optimization applied for the design and control of chemical engineering processes.

Prerequisite: Approval of instructor.

CHEN 662 Computational Chemistry and Molecular Modeling for Engineers
Credits 3.3 Lecture Hours.
Applications of computational chemistry and molecular modeling relevant to engineers, especially predictions for thermophysical properties and reaction rates; emphasis on the creative and intelligent use of commercial software to solve practical problems; problems relevant to process safety engineer.

Prerequisites: CHEN 623 and 624 or approval of instructor.

CHEN 663 Systems Biology
Credits 3.3 Lecture Hours.
Introduction to experimental and computational techniques in systems biology; includes high throughput experiments, data analysis, modeling and simulation; discussion in the context of specific applications such as signal transduction.

Prerequisite: Approval of instructor.

CHEN 664 Global Optimization of Chemical Engineering Problems
Credits 3.3 Lecture Hours.
Advances in global optimization and applications to chemical engineering systems; modeling and formulation of optimization problems, general theories and techniques of global optimization, and applications to problems on process design and integration.

Prerequisite: Approval of instructor.

CHEN 665 Sustainable Design of Chemical Processes
Credits 3.3 Lecture Hours.
Sustainability in chemical engineering; includes sustainable approaches to design and development of processes, products, energy usage; issues and roles of chemical engineers, service learning.

Prerequisite: Graduate and senior classification in engineering or approval of instructor.

CHEN 670 Computational Materials Science and Engineering
Credits 3.3 Lecture Hours.
Modern methods of computational modeling and simulation of materials properties and phenomena, including synthesis, characterization, and processing of materials, structures and devices; quantum, classical, and statistical mechanical methods, including semi-empirical atomic and molecular-scale simulations, and other modeling techniques using macroscopic input.

Prerequisites: Approval of instructor; graduate classification.

Cross Listing: MSEN 670 and MEMA 670.

CHEN 675 Microelectronics Process Engineering
Credits 3.3 Lecture Hours.
State-of-art process engineering principles on microelectronics, especially for the fabrication of very large scale integrated circuits (VLSICs); fundamental unit processes, such as thin film deposition, thermal growth, lithography, etching and doping, material structures and properties, and basic device operation principles.

Prerequisites: CHEN 623 and CHEN 624 or approval of instructor.

CHEN 677 Advanced Process Integration and Synthesis
Credits 3.3 Lecture Hours.
Systematic and state-of-the-art techniques of understanding the global insights of mass and energy flows within a process; use of integrated insights to optimize process performance; includes a variety of mathematical and visualization tools.

Prerequisite: Approval of instructor.

CHEN 681 Seminar
Credit 1.1 Lecture Hour.
Presentations and discussions covering problems of current importance in chemical engineering research.

CHEN 684 Professional Internship
Credit 1.1 Other Hour.
Engineering research experience in industrial setting away from Texas A&M campus; projects supervised jointly by faculty and industrial representative.

Prerequisites: Approval of student's advisory committee chair and department head.
CHEN 685 Directed Studies  
Credits 1 to 12. 1 to 12 Other Hours.  
Limited investigations in fields other than those chosen for thesis or dissertation research and not covered by other formal courses.  
Prerequisite: Approval of department head.

CHEN 689 Special Topics in...  
Credits 1 to 4. 1 to 4 Lecture Hours.  
Selected topics in particular areas of chemical engineering. May be repeated for credit.  
Prerequisites: Approval of department head and instructor.

CHEN 691 Research  
Credits 1 to 23. 1 to 23 Other Hours.  
Research for thesis or dissertation.  
Prerequisite: Approval of department head.

CHEN 695 Graduate Mentoring Seminar I  
Credit 1. 1 Lecture Hour.  
Development of skills to complement formal research and coursework training; includes improvement of communication and interaction skills; development of technical writing and presentation skills.  
Prerequisites: Four chemical engineering core graduate courses; graduate advisor approval.

CHEN 696 Graduate Mentoring Seminar II  
Credit 1. 1 Lecture Hour.  
Development of a variety of skills to compliment formal research and coursework training; includes improvement to communication/interaction with students in a classroom setting, and improvement and development of teaching skills. Must be taken on a satisfactory/unsatisfactory basis.  
Prerequisites: 4 CHEN core graduate courses, CHEN 695; graduate advisor approval.

COMM - Communication

COMM 610 Social Science Methods in Communication Research  
Credits 3. 3 Lecture Hours.  
Quantitative research methods in communication, including design, measurement and analysis for descriptive and experimental research; practice in evaluating and conducting research projects.  
Prerequisite: Graduate classification or approval of instructor.

COMM 615 Interpretive Methods in Communication Research  
Credits 3. 3 Lecture Hours.  
Introduction to interpretive and qualitative methods in communication research; underlying epistemologies, design issues, and explanation of knowledge claims; methods including participant observation and interviewing.  
Prerequisite: Graduate classification.

COMM 660 Communication Theory  
Credits 3. 3 Lecture Hours.  
The nature and role of communication theory; systems of ontology and epistemology in theory development; critical review of current theories concerning communication codes, functions and processes in various contexts.  
Prerequisite: Graduate classification or approval of instructor.

COMM 630 Interpersonal Communication  
Credits 3. 3 Lecture Hours.  
Major theories in interpersonal communication; critical examination of current research programs on communication in interpersonal influence, relational development and conflict management.  
Prerequisite: Graduate classification.

COMM 631 Group Communication  
Credits 3. 3 Lecture Hours.  
Major concepts and theories of communicative processes in task-oriented groups from a social scientific perspective; the role of group communication in (1) group decision processes, (2) decision development, (3) decision-making agendas, and (4) conflict and performance quality.  
Prerequisite: Graduate classification.

COMM 632 Communication and Conflict  
Credits 3. 3 Lecture Hours.  
Elements and central features of conflict theories and different approaches to communication in conflict management; analysis of communication research in interpersonal, family/marital, group, organizational, and public conflicts and the role of the media in social and international disputes.  
Prerequisite: Graduate classification.

COMM 634 Communication and Gender  
Credits 3. 3 Lecture Hours.  
Gender considered as a complex phenomenon constituted through communication; topics include femininities, masculinities, language, power, nonverbal behavior, gender in media, organizations, interpersonal relationships, and social movements.  
Prerequisite: Graduate classification.

COMM 636 Survey of Organizational Communication  
Credits 3. 3 Lecture Hours.  
Theoretical and empirical literature on human communication and complex organizations; the study of messages, interaction, and meaning in the process of organizing; topics include superior-subordinate communication, communication networks, and technologies, language, message flow, symbols and organizational culture, negotiation and conflict, and power and politics.  
Prerequisite: Graduate classification.

CLAS - Classics

CLAS 692 Readings  
Credits 3. 3 Lecture Hours.  
Readings in Greek or Latin literary texts in the original language.  
Prerequisite: Graduate classification.

CLEN - College of Engineering

CLEN 689 Special Topics In  
Credits 1 to 4. 1 to 4 Lecture Hours.  
0 to 4 Lab Hours.  
Selected topics in an identified area of engineering. May be repeated for credit.  
Prerequisite: Graduate classification.

CLSL - School of Law

CLSL 7600 Law School Study Abroad  
Credits 0 to 4. 0 to 4 Other Hours.  
For law students in an approved study abroad program. May be taken 3 times.  
Prerequisites: Professional law classification; approval of dean.
COMM 637 Organizational Communication Seminar  
Credits 3.3 Lecture Hours.  
Investigation of a subject important to the understanding of organizational communication, such as communication and organizational decision-making, group communication within organizations, communication and organizational culture, and organizational rhetoric and issue management. May be repeated for credit with different content up to a total of three times.  
Prerequisite: Graduate classification.

COMM 640 Rhetorical Theory  
Credits 3.3 Lecture Hours.  
Close reading of classical and contemporary systems of rhetoric; survey of principal applications to communication theory and research.  
Prerequisite: Graduate classification or approval of instructor.

COMM 645 Rhetorical and Textual Methods in Communication Research  
Credits 3.3 Lecture Hours.  
Comparative study of traditional and contemporary perspectives on the description, interpretation, and evaluation of public discourse, including textual analysis, neo-classical analysis, Burkean criticism, quantitative and semiotic approaches to content analysis, fantasy theme analysis, and qualitative analysis.  
Prerequisite: Graduate classification or approval of instructor.

COMM 649 American Public Discourse to 1865  
Credits 3.3 Lecture Hours.  
Public discourse and political rhetoric in America in colonial and pre-Civil War years; historical, conceptual, and practical examination of political campaign rhetoric, legislative rhetoric, judicial rhetoric, and advocacy group rhetoric.  
Prerequisite: Graduate classification.

COMM 650 American Public Discourse Since 1865  
Credits 3.3 Lecture Hours.  
Public discourse and political rhetoric in America in post-Civil War years; historical, conceptual, and practical examination of political campaign rhetoric, legislative rhetoric, judicial rhetoric, and advocacy group rhetoric.  
Prerequisite: Graduate classification.

COMM 651 Presidential Rhetoric  
Credits 3.3 Lecture Hours.  
Rhetorical discourse of American presidents, including principal genres of presidential communication, speechwriting and media strategies; case studies of presidential communication ranging from campaign oratory, to crisis rhetoric, and ceremonial addresses.  
Prerequisite: Graduate classification.

COMM 652 The Rhetoric of Social Movements  
Credits 3.3 Lecture Hours.  
Analysis of persuasive strategies used to build social identities and collectively agitate for social change; exploration of the history of social movements in the United States and abroad.  
Comm 653 Rhetoric and Public Culture  
Credits 3.3 Lecture Hours.  
Examination of how artifacts of public culture function rhetorically to transform public attitudes, opinion and memory; analysis of documents, artworks, images and histories from a humanities and social science perspective.

COMM 654/ENGL 654 Classical Rhetoric  
Credits 3.3 Lecture Hours.  
Origins of rhetoric in classical Greece and Rome; exploration of the relationship between philosophy, rhetoric and democratic political culture; the contemporary relevance of classical thought to contemporary problems.  
Cross Listing: ENGL 654/COMM 654.

COMM 655/ENGL 655 Contemporary Theories of Rhetoric  
Credits 3.3 Lecture Hours.  
Investigation of the major figures in rhetorical theory in the 20th and 21st centuries; analysis of the relationship between rhetoric and power; identifying new challenges for rhetoric in global, multicultural, technological age.  
Cross Listing: ENGL 655/COMM 655.

COMM 656/WGST 652 Feminism and Rhetoric  
Credits 3.3 Lecture Hours.  
Historical development of the ideology, theory and rhetorical practices of U.S. feminism; criticism of significant artifacts of women orators and writers from the 19th century to contemporary times.  
Cross Listing: WGST 652/COMM 656.

COMM 658 Seminar in Communication and Culture  
Credits 3.3 Lecture Hours.  
Investigation of the ways that culture, religion, identity, gender, popular culture, community, history, and related ideas are shaped through communication in order to understand the development of social norms, political values, and the human experience. May be repeated for credit with different content up to a total of three times.  
Prerequisite: Graduate classification.

COMM 659 Communication and Citizenship in the Public Sphere  
Credits 3.3 Lecture Hours.  
Theoretical examination of communication within democratic, republican, and liberal conceptions of citizenship: consideration of the ideal of the public sphere, and communication in global civil society; specific attention to the practices of American citizenship within the global civil society.  
Prerequisite: Graduate classification.

COMM 662 Survey of Telecommunication and Media Studies  
Credits 3.3 Lecture Hours.  
Survey of research and theory in media studies and telecommunication, review of literature on mass communication, media, culture, and society, media audiences, texts, industries, and technologies; provides an overview of the literature and theoretical orientation.  
Prerequisite: Graduate classification.

COMM 663 Seminar in Telecommunication and Media Studies  
Credits 3.3 Other Hours.  
Intensive work on selected topics of research in telecommunication and media studies; may address work in the areas of audience studies, media effects, industries, policy, international issues, media and culture, media history, or theory; may be repeated for credit with different content up to a total of three times.  
Prerequisite: Graduate classification.

COMM 665 Communication and Technology  
Credits 3.3 Lecture Hours.  
Examines the relationships between human communication and technology, investigating the social effects of communication technologies, the quality of messages, communicative practices, and rhetorical norms that typify effective communication in technological society.  
Prerequisite: Graduate classification.
COMM 669 Survey of Health Communication
Credits 3. 3 Lecture Hours.
Theories and research in health communication considering functions and outcomes of communication processes in various health contexts, ranging from interpersonal settings to public campaigns; emphasis on providing a framework for synthesizing and critically evaluating health communication research.
Prerequisite: Graduate classification.

COMM 670 Health Communication Seminar
Credits 3. 3 Lecture Hours.
Investigation of a subject important to the understanding of health communication, such as persuasion and public health campaigns, physician-patient communication, or communication in health care organizations. May be repeated for credit with different content up to a total of three times.
Prerequisite: Graduate classification.

COMM 671 Interdisciplinary Seminar in Prevention Science
Credit 1. 1 Lecture Hour.
Contemporary research programs that represent the interdisciplinary field of prevention science; strengths and limitations of diverse theoretical and conceptual bases of research in prevention science; application of research findings to issues related to the prevention of mental, emotional, and physical health problems and the promotion of well-being. May be taken 3 times for credit.
Prerequisite: Graduate standing and enrollment in the interdisciplinary graduate certificate in prevention science or approval of instructor.
Cross Listing: HLTH 671, RPTS 620 and SPSY 620.

COMM 681 Professional Seminar
Credit 1. 1 Other Hour.
Provides socialization to the profession of communication, focusing on graduate students’ roles as scholars and teachers; provides instruction on teaching communication, conducting and writing publishable research, and fulfilling responsibilities to one’s organization and profession. May be repeated up to three times.
Prerequisite: Graduate classification.

COMM 685 Directed Studies
Credits 1 to 6. 1 to 6 Other Hours.
Directed studies in specific problem areas in communication. Student may take up to two sections of directed studies in communication in the same semester, with a maximum of 6 credits.
Prerequisite: Approval of department head.

COMM 689 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Selected topics in an identified area of communication. May be repeated for credit.
Prerequisite: Approval of instructor.

COMM 691 Research
Credits 1 to 23. 1 to 23 Other Hours.
Research for thesis.

COSC - Construction Science

COSC 601 Construction Practices
Credits 3. 3 Lecture Hours.
Materials and methods of construction with emphasis on the design and construction process; includes structural steel and other metals, foundation materials, precast and tilt wall concrete, concrete reinforcement including pre-stressing, wood dimension lumber framing, and heavy timber framing.

COSC 602 Construction Cost Estimating
Credits 3. 3 Lecture Hours.
Determination of quantities for various types of construction materials and works including earthwork, foundations, structural systems, mechanical and electrical systems, and building finishes; methods used for pricing of construction works including labor, materials, equipment, sub-contractors, overhead and profit; use of various types of cost data catalogs available in the industry.

COSC 603 Construction Scheduling
Credits 3. 3 Lecture Hours.
Introduction to commonly used techniques and computer applications for the planning, scheduling, monitoring, and controlling of construction projects; includes key scheduling techniques such as Gantt Chart, CPM, PERT, LSM, and EVM; practical scheduling practices such as tracking, controlling, and forecasting trends of schedules, cost control, and reporting.
Prerequisite: COSC 602 or equivalent.

COSC 606 Mechanical and Electrical Construction
Credits 3. 3 Lecture Hours.
Building environmental systems with a major emphasis on the design and control of the heating, ventilation and cooling systems, plumbing and drainage systems, electrical, fire and lightning protection, and lighting; design opportunities, calculations, equipment selection and economics as they relate to design and construction.

COSC 608 Structural Principles and Practices
Credits 3. 3 Lecture Hours.
Investigations into practical applications of structural design including the analysis and design of structural members in steel and concrete; surveys and studies of various structural systems.

COSC 620 Construction Company Operations
Credits 3. 3 Lecture Hours.
Running a construction company; strategic planning; business planning; organizational theory; competitor analysis; risk management; financial analysis; human resources; management information systems; leadership; codes of ethics; best practices.

COSC 621 Advanced Project Management
Credits 3. 3 Lecture Hours.
Theoretical, practical, and strategic development in the management of contemporary construction projects; advanced techniques used in scheduling and evaluating progress in construction project control; exploration of state-of-the-art management principles and practices, and development of additional insights.
Prerequisite: COSC 603 or COSC 475.

COSC 622 Construction Economics
Credits 3. 3 Lecture Hours.
Foundation in Life Cycle Cost Analysis computation within the context of current issues in environmental sustainability and evidence-based thinking; lean construction as a strategy to overcome the hurdle of first cost.

COSC 624 Construction Business Development
Credits 3. 3 Lecture Hours.
Acquisition of new work in the construction industry; understanding available project delivery systems; competitor analyses; acquisition procedures including response techniques for complex requests for proposals; understanding concepts of sales and marketing, branding, backlog, and business development budgeting in construction.
COSC 628 Construction Contracts and Risk Management
Credits 3. 3 Lecture Hours.
Advanced construction law, contracts, and risk management applicable to construction management; identification of common disputes and construction risks among the owner, design professionals, and contractor; analysis of construction contracts with an emphasis on troublesome provisions and solutions; demonstration of tools of negotiation and dispute resolution; ethics in construction.

COSC 631 Advanced Productivity and Lean
Credits 3. 3 Lecture Hours.
Introduction to lean history, concepts and methods; deduction of basic training modules in lean project delivery; application of lean management in construction projects.

COSC 642 Construction Information Technology
Credits 3. 3 Lecture Hours.
Exploration of emerging technologies for the construction industry including hardware and software systems such as BIM, RFID, Wireless/Mobile, information systems, construction specific programs, and information strategy planning; using information strategy planning by owners and contractors to effectively enhance the management of business entities and projects in construction.

COSC 644 Advanced Construction Systems
Credits 3. 3 Lecture Hours.
Theoretical, practical, and strategic development in contemporary construction systems; exploration of state-of-the-art innovations in environmental control systems, structural principles and practices; integration of innovations with information technologies, and development of additional insights.

COSC 648 Graduate Capstone
Credits 3. 3 Lecture Hours.
For students preparing to enter the construction industry; project and program management of construction projects; winning new work; construction company creation, operations and change accommodation; leadership and management; risk management; managing people; using technology considering the environment; and the application of lean and target value construction.

COSC 650 Advanced Construction Visualization
Credits 3. 3 Lecture Hours.
Introduction to the theory and application of 3-D computer models in the design/build construction process; creation, positioning in 3-D space, and linking of building components to a database record; creation of a wide range of construction related information useful in controlling project quality.

COSC 663 Sustainable Construction
Credits 3. 3 Lecture Hours.
Contribution of materials and methods to meeting the needs of the present without compromising the ability of future generations to meet their own needs; overview of international, national and local programs promoting sustainable construction; characteristics of the components of successful sustainable construction projects; theories and practices through case studies.

COSC 670 Facilities Asset Management
Credits 3. 3 Lecture Hours.
Fundamentals of facility asset management and property management including concepts, theories, and principles of design, construction, accounting, finance, and management of the built environment; an overview of a project throughout its entire life cycle from various perspectives including the owner, users, designers, constructors and facility management personnel.

COSC 681 Seminar
Credit 1. 1 Lecture Hour.
Discussion and review of degree requirements, career opportunities, and current research activities in construction management.
Prerequisite: Graduate classification.

COSC 684 Professional Internship
Credits 3 to 6. 3 to 3 Other Hours.
Approximately 400-600 hours with a construction or construction-related company that exposes the student to construction-related activities; an initial report, monthly progress reports, a final report, and a final completion letter are required.
Prerequisites: Graduate classification; approval of graduate coordinator; approval of internship coordinator.

COSC 685 Directed Studies
Credits 1 to 6. 1 to 6 Other Hours.
Individual problems in the area of building construction involving the application of theory and practice.
Prerequisite: Approval of instructor.

COSC 688 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Selected topics in an identified field of construction management. May be repeated for credit.
Prerequisite: Approval of instructor.

COSC 690 Theory of Research in Construction Management
Credits 3. 3 Lecture Hours.
Introduction to research, research tools, proposal writing and research reports; emphasis on research planning and design, conducting a comprehensive review of literature, quantitative and qualitative research methodologies, defining research problems in construction science, and the development of research proposals.
Prerequisite: STAT 651 or concurrent enrollment.

COSC 691 Research
Credits 1 to 23. 1 to 23 Other Hours.
Research for thesis.
Prerequisites: COSC 690 or concurrent enrollment; approval of graduate coordinator.

COSC 693 Professional Study
Credits 1 to 6. 1 to 6 Other Hours.
Approved professional study of project undertaken as terminal requirement for Master of Science, non-thesis option. Preparation of a record of study summarizing the rationale, procedure and results of the completed study. May be repeated for credit.
Prerequisite: COSC 690 or concurrent enrollment; approval of graduate coordinator.

CPSY - Counseling Psychology

CPSY 601 Multicultural Counseling in Schools
Credits 3. 3 Lecture Hours.
Intersecting role of ethnicity, cultural background, gender and sexual orientation and how they shape the psychosocial development of children and adolescents and impact their educational trajectories; development and appreciation of cultural and ethnic differences among individuals, groups and families to enhance school counseling service delivery.
Prerequisites: Graduate classification; approval of department head.
CPSY 602 School Counseling Theories and Techniques
Credits 3.3 Lecture Hours.
Broad view of counseling theories and techniques using a microskills approach; modules include topics pertinent to the school counseling field; opportunities to observe and practice counseling techniques.
Prerequisites: CPSY 630; graduate classification; approval of department head.

CPSY 603 School Counseling Group Interventions
Credits 3.3 Lecture Hours.
Development of group counseling interventions for children and adolescents in school settings.
Prerequisites: Graduate classification; approval of department head.

CPSY 612 Planning and Organizing Comprehensive Guidance Programs
Credits 3.3 Lecture Hours.
Purposes and functions of a guidance program; components of a comprehensive guidance program; systems approach to implementing a comprehensive guidance program for elementary and secondary students and adults.
Prerequisite: Approval of department head.

CPSY 626 Psychopathology
Credits 3.3 Lecture Hours.
Causes, course, outcomes and treatment of abnormal and maladaptive behavior; degrees of variation possible from normal adaptive behavior; biological, developmental, social, cultural and psychological perspective on abnormal behavior.
Prerequisite: Graduate classification.

CPSY 630 Foundations of School Counseling
Credits 3.3 Lecture Hours.
Philosophical, psychological, and sociological concepts fundamental to counseling in schools.
Prerequisite: Graduate classification; Approval of department head.

CPSY 631 Techniques of Counseling
Credits 3.3 Lecture Hours.
Methods and procedures descriptive of the counseling process; dynamics of counselor-counselee relationship; interviewing techniques; use of test results in counseling.
Prerequisites: CPSY 630; approval of department head.

CPSY 632 Career Counseling
Credits 3.3 Lecture Hours.
Theories of career development; sources, classification and analysis of educational, occupational and social information including occupational trends, post-secondary programs and financial planning; use of occupational-educational information, appropriate psychological measures and computerized guidance systems.
Prerequisite: CPSY 679.

CPSY 633 Introduction to Group Process
Credits 3.2 Lecture Hours. 3 Lab Hours.
Principles, procedures and processes of group approaches to assisting individuals in their personal growth and development in education, public and mental health settings; participation as member of a personal growth required.
Prerequisites: CPSY 630; approval of department head.

CPSY 634 Group Counseling and Psychotherapy.
Credits 3.3 Lecture Hours.
Major contemporary approaches to group counseling and psychotherapy in mental and public health settings; experiential learning in a simulated group process; integration of theory and practical applications.
Prerequisites: CPSY 631; CPSY 633 or equivalent; approval of department head.

CPSY 635 Social Counseling Psychology Interface
Credits 3.3 Lecture Hours.
Provides a foundation in theory and research at the interface of social and counseling psychology; fundamentals of social psychology theories, methodologies and perspectives; understanding the relevance to counseling psychology practice; focus on social and cognitive theories, concepts, and processes rather than specific psychological disorders.
Prerequisite(s): Doctoral student in good standing in counseling, clinical, school or social psychology.

CPSY 636 Psychological Consultation to Organizations
Credits 3.3 Lecture Hours.
Focuses on organizations as the target of analysis, intervention, and change; established social science concepts and principles; consideration of concepts, intervention strategies, and skills that extend beyond those used in counseling and psychotherapy; highlights consultation as a mode of change agency; considerable attention given to putting theory into practice.
Prerequisites: Graduate classification; approval of department head; approval of instructor.

CPSY 637 Latino Psychology
Credits 3.3 Lecture Hours.
Examination of psychological research and literature related to Latino experience in the U.S. via readings, media and class discussion; introduction to various Latino groups with the primary focus on individuals of Mexican descent.
Prerequisites: Graduate classification; approval of department head.

CPSY 639 Counseling Practicum I
Credits 3.2 Lecture Hours. 3 Lab Hours.
Supervised experience in individual counseling; cases engaged in the counseling laboratory on campus; off-campus counseling in schools and various public and mental health settings also assigned at supervisor's discretion. May be taken for credit 2 times as content varies.
Prerequisites: CPSY 631 and CPSY 633; approval of instructor six weeks prior to registration; approval of department head.

CPSY 662 Professional Issues in Counseling Psychology
Credits 3.3 Lecture Hours.
Legal, ethical, economic and practical issues that impact the training, credentialing, placement and marketing of counseling psychologists and their services.
Prerequisite: Approval of department head.

CPSY 664 Counseling Practicum II
Credits 3.6 Lab Hours. 1 Other Hour.
Supervised experience in individual and group counseling requiring advanced technical skills; continuing counseling relationships with various, selected subjects.
Prerequisites: CPSY 639; approval of department head six weeks prior to registration.
CPSY 666 Practicum in Counselor Supervision  
Credits 3. 6 Lab Hours. 1 Other Hour.  
Supervised experience in directing counseling and guidance activities of students involved in practicum and field experiences; intended for individuals preparing to become counselor educators or supervisors.  
Prerequisites: CPSY 664; approval of department head; application six weeks prior to registration.

CPSY 671 Dying and Bereavement  
Credits 3. 3 Lecture Hours.  
Exposure to experiences of others on the topic of dying and loss both through readings and through class presentations and discussions; offers new ways to think about death in general, as well as one's own death and those of one's loved ones; provides mental health provider a foundation in concepts/process of death, loss and bereavement.  
Prerequisites: Graduate classification and approval of department head.

CPSY 672 Theories of Counseling and Psychotherapy  
Credits 3. 3 Lecture Hours.  
Comprehensive and intensive study of major theoretical positions in counseling and psychotherapy; implications for research and practice in public and mental health settings.  
Prerequisites: CPSY 631; approval of department head.

CPSY 673 Advanced Psychotherapeutic Skills  
Credits 3. 3 Lecture Hours.  
Didactic/experiential course, designed for students in professional psychology programs; variety of psychotherapeutic interventions in short and long term counseling with adults in public and mental health settings; ways to access affective process.  
Prerequisites: Practicum; approval of instructor and department head.

CPSY 676 Family Counseling and Psychotherapy  
Credits 3. 3 Lecture Hours.  
Basic concepts and techniques in marriage and family counseling in public and mental health settings; marital communication and growth relationships.  
Prerequisites: CPSY 631 and CPSY 633; approval of instructor and department head.

CPSY 677 Practicum in Clinical Geropsychology  
Credits 3. 1 Lecture Hour. 6 Other Hours.  
Practicum in theory and strategies for providing mental health services to the elderly; training and supervision of individual counseling and community mental health approaches in a variety of settings.  
Prerequisites: Human service experience; approval of instructor and department head.

CPSY 678/PSYC 678 Couples Therapy  
Credits 3. 3 Lecture Hours.  
Theory and practice of marital therapy emphasizing systems and communication approaches; effective strategies and techniques for use in public and mental health settings; therapy with specific marital problems and obstacles to effective therapy. Repeatable to 6 hours.  
Prerequisites: CPSY 631 and CPSY 639 or equivalent; approval of instructor.  
Cross Listing: PSYC 678/CPSY 678.

CPSY 679 Multicultural Counseling  
Credits 3. 3 Lecture Hours.  
Effective communication skills in cross-cultural counseling or helping relationships in public and mental health settings; integration of theoretical knowledge with experiential learning; psychosocial factors and lifestyles of cultural groups; effect on counseling relationships.  
Prerequisites: Graduate classification and approval of department head.

CPSY 683 Field Practicum in...  
Credits 1 to 15. 1 to 15 Other Hours.  
Supervised experience in professional public and mental health settings in counseling psychology. Wide range of practical experiences and activities that are closely supervised by departmental faculty. Repeatable to 15 hours.  
Prerequisite: Graduate classification; approval of department head.

CPSY 684 Professional Internship  
Credits 1 to 4. 1 to 4 Other Hours.  
Limited to advanced doctoral students; faculty supervised experience in approved professional public and mental health employment settings; application for September assignments must be approved the previous October. May be repeated up to 9 hours.  
Prerequisites: Completion of required coursework except CPSY 684 and CPSY 691; approval of department head.

CPSY 685 Directed Studies  
Credits 1 to 4. 1 to 4 Other Hours.  
Directed individual study of selected problems.  
Prerequisite: Approval of department head.

CPSY 688/EPSY 688 Research Proposal Development  
Credits 4. 3 Lecture Hours. 2 Lab Hours.  
This seminar models the processes of developing and defending research proposals.  
Prerequisites: EPSY 640 and EPSY 641 or approval of instructor; approval of department head.  
Cross Listing: EPSY 688/CPSY 688.

CPSY 689 Special Topics in...  
Credits 1 to 4. 1 to 4 Lecture Hours. 1 to 4 Lab Hours.  
Selected topic in an identified area of counseling psychology. May be repeated for credit.  
Prerequisite: Approval of department head.

CPSY 690 Theory of Counseling Psychology Research  
Credits 3. 3 Lecture Hours.  
Theory and design of research problems and experiments in counseling psychology; communication of research proposals and results; evaluation of current research of faculty and students and review of current literature. May be repeated for credit.  
Prerequisite: Approval of instructor and department head.

CPSY 691 Research  
Credits 1 to 23. 1 to 23 Other Hours.  
Research for thesis or dissertation.  
Prerequisite: Approval of department head.

CSCE - Computer Sci. & Engr.  

CSCE 601 Programming with C and Java  
Credits 3. 3 Lecture Hours.  
Survey of the C and Java programming languages, including principles of procedural and object-oriented languages; multi-disciplinary applications including business, Internet and engineering problems.  
Prerequisite: Graduate classification.
CSCE 602 Object-Oriented Programming, Development and Software Engineering  
Credits 3.3 Lecture Hours.  
Teaches Object-Oriented Programming in C++; software engineering techniques presented to teach how to build high quality software; semester project gives quasi-real-world experience with issues such as requirements capture and object-orient development.  
Prerequisites: CSCE 601 or approval of instructor; graduate classification.  

CSCE 603 Database Systems and Applications  
Credits 3.3 Lecture Hours.  
Introduction to the concepts and design methodologies of database systems for non-computer science majors; emphasis on E. F. Codd's relational model with hands-on design application. No credit will be given for both CSCE 310 and CSCE 603.  
Prerequisites: CSCE 601; graduate classification.  

CSCE 604 Programming Languages  
Credits 3.3 Lecture Hours.  
Study in the design space of programming languages, covering language processing, formalisms to describe semantics of programming languages, important concepts found in current programming languages, and programming paradigms.  
Prerequisite: Graduate classification.  

CSCE 605 Compiler Design  
Credits 3.3 Lecture Hours.  
Advanced topics in compiler writing; parser generators and compiler-compilers; dynamic storage and scope resolution; data flow analysis and code optimization.  
Prerequisite: CSCE 434.  

CSCE 606 Software Engineering  
Credits 3.3 Lecture Hours.  
Development of advanced concepts in software engineering; software development environments as a mechanism for enhancing productivity and software quality; the classification, evaluation and selection of methodologies for environments; rapid prototyping and reusability concepts; artificial intelligence techniques applied to software engineering.  
Prerequisite: CSCE 431 or approval of instructor.  

CSCE 608 Database Systems  
Credits 3.3 Lecture Hours.  
Database modeling techniques; expressiveness in query languages including knowledge representation; manipulation languages data models; physical data organization; relational database design theory; query processing; transaction management and recovery; distributed data management.  
Prerequisite: CSCE 310 or CSCE 603.  

CSCE 610 Hypertext/Hypermedia Systems  
Credits 3.3 Lecture Hours.  
Comprehensive coverage of Hypertext/Hypermedia; basic concepts and definitions; fundamental components, architectures and models; problems and current solutions; design and implementation issues; and research issues.  
Prerequisites: CSCE 310 or CSCE 603; CSCE 313.  

CSCE 611 Operating Systems and Applications  
Credits 3.3 Lecture Hours.  
Review of computer architecture hardware/software evolution leading to contemporary operating systems; basic operating systems concepts; methods of operating systems design and construction; algorithms for CPU scheduling memory and general resource allocation; process coordination and management; case studies of several operating systems; quality-of-services of operating systems and their impact on applications. No credit will be given for both CSCE 410 and CSCE 611.  
Prerequisites: CSCE 313; graduate classification.  

CSCE 612 Applied Networks and Distributed Processing  
Credits 3.3 Lecture Hours.  
Fundamentals, including network design and protocol analysis, in the context of computer communications; mixes fundamentals with both programming and pragmatic views of engineering issues; it includes network architecture as well as principles of network engineering; focus is on applying principles of layered architecture to analyzing real networks; lab exercises focus on protocol understanding and programming; knowledge of UNIX and C programming helpful, but not required. No credit will be given for both CSCE 463 and CSCE 612.  
Prerequisite: Graduate classification.  

CSCE 613 Operating Systems  
Credits 3.3 Lecture Hours.  
Analysis of algorithms in computer operating systems; sequencing and control algorithms supporting concurrent processes; scheduling algorithms to minimize execution times and mean flow times; algorithms for allocating tasks to processors; allocation of memory (virtual and real); direct access device schedules; auxiliary and buffer storage models.  
Prerequisite: CSCE 313 or CSCE 611.  

CSCE 614 Computer Architecture  
Credits 3.3 Lecture Hours.  
Reviews of von Neumann architecture and its limitations; parallel computer structures and concurrent computation; pipeline computers and vectorization methods; array processors, multiprocessor architectures and programming; dataflow computers.  
Prerequisite: CSCE 350/ECEN 350/ECEN 350/CSCE 350.  

CSCE 617 Co-Design of Embedded Systems (CODES)  
Credits 3.3 Lecture Hours.  
Co-design methodologies of hardware/software systems; models of computation (MOC), system specification, co-simulation, synthesis, and verification; hardware-software implementation; core-based systems and interfaces, performance analysis and optimization; system on chip, power aware design.  
Prerequisites: CSCE 462 or equivalent, CSCE 410 and graduate classification.  

CSCE 619 Networks and Distributed Computing  
Credits 3.3 Lecture Hours.  
Computer network concepts including network architecture, layering, protocols, packet switching and virtual circuits; performance evaluation and design considerations for local area networks; packet distributed networks; satellite networks.  
Prerequisite: CSCE 463 or CSCE 612.  

CSCE 620/VIZA 670 Computational Geometry  
Credits 3.3 Lecture Hours.  
Design and analysis of algorithms for solving geometrical problems; includes convex hull problems, Voronoi diagrams, range searching and proximity problems.  
Prerequisite: CSCE 311.  
Cross Listing: VIZA 670/CSCE 620.
CSCE 621 Language, Library, and Program Design Using C++

Credits 3. 3 Lecture Hours.
Exploration of the interactions among language design, library design, and program design in the context of ISO standard C++ and its proposed extensions; Novel features provided by C++ and the design and programming techniques supported.

Prerequisites: Graduate classification or approval of instructor; understanding of C++ and experience with software development projects helpful; knowledge of at least one programming language in addition to C and C++.

CSCE 622 Generic Programming

Credits 3. 3 Lecture Hours.
The generic programming approach to design and systematic classification of software components, techniques for achieving correctness, efficiency, and generality of algorithms, data structures, and memory management, methods of structuring a library of generic software components for maximum usability are practiced in a significant design and implementation project.

Prerequisite: CSCE 221.

CSCE 624 Sketch Recognition

Credits 3. 3 Lecture Hours.
Analysis, implementation, and comparison of sketch recognition algorithms, including feature-based, vision-based, geometrical, timing-based, and path-based recognition algorithms. Methods for combining these recognition methods for greater accuracy, using known AI techniques, are also examined.

Prerequisite: Graduate classification.

CSCE 625 Artificial Intelligence

Credits 3. 3 Lecture Hours.
Basic concepts and methods of artificial intelligence; Heuristic search procedures for general graphs; game playing strategies; resolution and rule based deduction systems; knowledge representation; reasoning with uncertainty.

Prerequisite: CSCE 221.

CSCE 626 Parallel Algorithm Design and Analysis

Credits 3. 3 Lecture Hours.
Design of algorithms for use on highly parallel machines; area-time complexity of problems and general lower bound theory; application (of these concepts) to artificial intelligence, computer vision and VLSI design automation.

Prerequisite: CSCE 221.

CSCE 627 Theory of Computability

Credits 3. 3 Lecture Hours.
Formal models of computation such as pushdown automata; Turing machines and recursive functions; unsolvability results; complexity of solvable results.

Prerequisite: CSCE 433.

CSCE 628/BICH 628 Computational Biology

Credits 3. 3 Lecture Hours.
Introduction to computational biology; formulations of biology problems as computational problems; computational approaches to solve problems in genomics and proteomics.

Prerequisite: Graduate classification or approval of instructor.

Cross Listing: BICH 628/CSCE 628.

CSCE 629 Analysis of Algorithms

Credits 3. 3 Lecture Hours.
Concrete algorithm design and analysis; abstract models to analyze the complexity of problems; NP-Completeness; approximation and probabilistic algorithms.

Prerequisite: CSCE 411.

CSCE 630 Speech Processing

Credits 3. 3 Lecture Hours.
Speech production and perception (speech apparatus, articulatory/auditory phonetics); mathematical foundations (sampling, filtering, probability, pattern recognition); speech analysis and coding (short-time Fourier analysis, linear prediction, cepstrum); speech recognition (dynamic time warping, hidden Markov models, language models); speech synthesis (front-end, back-end); speech modification (overlap-add, enhancement, voice conversion).

Prerequisites: ECEN 314 or equivalent or approval of instructor. Basic knowledge of signals and systems, linear algebra, probability and statistics. Programming experience in a high-level language is required.

CSCE 631 Intelligent Agents

Credits 3. 3 Lecture Hours.
On the design and implementation of Intelligent Agents and coordination mechanisms among multiple agents, ranging from theoretical principles to practical methods for implementation.

Prerequisite: CSCE 420 or CSCE 625.

CSCE 632 Intelligent User Interfaces

Credits 3. 3 Lecture Hours.
Machine learning is the study of self-modifying computer systems that can acquire new knowledge and improve their own performance; survey machine learning techniques, which include induction from examples, conceptual clustering, explanation-based learning, exemplar learning and analogy, discovery and genetic algorithms.

Prerequisite: CSCE 420 or CSCE 625.

CSCE 633 Machine Learning

Credits 3. 3 Lecture Hours.
On the design and implementation of Intelligent Agents and coordination mechanisms among multiple agents, ranging from theoretical principles to practical methods for implementation.

Prerequisite: CSCE 420 or CSCE 625.

CSCE 634 Intelligent User Interfaces

Credits 3. 3 Lecture Hours.
Intersection of artificial intelligence and computer-human interaction: emphasis on designing and evaluating systems that learn about and adapt to their users, tasks, and environments.

Prerequisites: Graduate classification and approval of instructor.

CSCE 635 AI Robotics

Credits 3. 3 Lecture Hours. 1 Lab Hour.
Introduction and survey of artificial intelligence methods for mobile robots (ground, aerial, or marine) for science and engineering majors; theory and practice of unmanned systems, focusing on biological and cognitive principles which differ from control theory formulations.

CSCE 636 Neural Networks

Credits 3. 3 Lecture Hours.
Basic concepts in neural computing; functional equivalence and convergence properties of neural network models; associative memory models; associative, competitive and adaptive resonance models of adaptation and learning; selective applications of neural networks to vision, speech, motor control and planning; neural network modeling environments.

Prerequisites: MATH 304 and MATH 308 or approval of instructor.
CSCE 637 Complexity Theory
Credits 3.3 Lecture Hours.
Deterministic, non-deterministic, alternating and probabilistic computations; reductions; P, NP and other complexity classes; abstract complexity; time, space and parallel complexity; and relativized computation.
Prerequisite: CSCE 627 or approval of instructor.

CSCE 639/MEEN 676 Fuzzy Logic and Intelligent Systems
Credits 3.3 Lecture Hours.
Introduces the basics of fuzzy logic and its role in developing intelligent systems; topics include fuzzy set theory, fuzzy rule inference, fuzzy logic in control, fuzzy pattern recognition, neural fuzzy systems and fuzzy model identification using genetic algorithms.
Prerequisite: CSCE 625 or approval of instructor.

Cross Listing: MEEN 676/CSCE 639.

CSCE 640 Quantum Algorithms
Credits 3.3 Lecture Hours.
Introduction to the design and analysis of quantum algorithms; basic principles of the quantum circuit model; gives a gentle introduction to basic quantum algorithms; reviews recent results in quantum information processing.
Prerequisite: CSCE 629 or approval of instructor.

CSCE 641/VIZA 672 Computer Graphics
Credits 3.3 Lecture Hours.
Representations of 3-dimensional objects, including polyhedral objects, curved surfaces, volumetric representations and CSG models; techniques for hidden surface/edge removal and volume rendering; illumination and shading; anti-aliasing; ray tracing; radiosity; animation; practical experience with state-of-the-art graphics hardware and software.
Prerequisite: CSCE 441.

Cross Listing: VIZA 672/CSCE 641.

CSCE 643 Seminar in Intelligent Systems and Robotics
Credits 3.3 Lecture Hours.
Problems, methods and recent developments in intelligent systems and robotics. May be taken at multiple times for credit as content varies.
Prerequisite: Approval of instructor.

CSCE 644 Cortical Networks
Credits 3.3 Lecture Hours.
The architecture of the mammalian cerebral cortex; its modular organization and its network for distributed and parallel processing; cortical networks in perception and memory; neuronal microstructure and cortical networks in perception and memory; neuronal microstructure and global illumination, shading, shadow determination, hidden surface elimination, texturing, raster graphics algorithms, transformations and projects.
Prerequisite: CSCE 625 or approval of instructor.

Cross Listing: VIZA 675/CSCE 645.

CSCE 645/VIZA 675 Geometric Modeling
Credits 3.3 Lecture Hours.
Geometric and solid modeling concepts. Freeform curves and surfaces (splines and Bezier) with their relational, intersectional and global mathematical properties. Parametric representation of solids, topology of closed curved surfaces, boundary concepts and Boolean/Euler operators. Construction and display of curves and surfaces, and solid models.
Prerequisites: CSCE 441 and CSCE 442 or equivalent.
Cross Listing: VIZA 675/CSCE 645.

CSCE 646/VIZA 654 The Digital Image
Credits 4.3 Lecture Hours. 2 Lab Hours.
Tools and techniques for generation, handling and analysis of two dimensional digital images; image representation and storage; display, media conversion, painting and drawing; warping; color space operations, enhancement, filtering and manipulation.
Prerequisite: Graduate classification or approval of instructor.

Cross Listing: VIZA 654/CSCE 646.

CSCE 647/VIZA 656 Image Synthesis
Credits 4.3 Lecture Hours. 2 Lab Hours.
Principles of image synthesis from 3-D scene descriptions; includes local and global illumination, shading, shadow determination, hidden surface elimination, texturing, raster graphics algorithms, transformations and projects.
Prerequisite: Approval of instructor.

Cross Listing: VIZA 656/CSCE 647.

CSCE 648/VIZA 657 Computer Aided Sculpting
Credits 3.2 Lecture Hours. 3 Lab Hours.
Mathematical and artistic principles of 3-D modeling and sculpting; includes proportions, skeletal foundation, expression and posture, line of action; curves, surfaces and volumes, interpolation and approximation, parametric and rational parametric polynomials, constructive solid geometry, and implicit representations.
Prerequisite: Approval of instructor.

Cross Listing: VIZA 657/CSCE 648.

CSCE 649/VIZA 659 Physically-Based Modeling
Credits 3.2 Lecture Hours. 2 Lab Hours.
Physical simulation as used in choreography, geometric modeling, and the creation of special effects in computer graphics: a variety of problems and techniques explored which may include particle-methods, modeling and simulation of flexible materials, kinematics and constraint systems.
Prerequisite: Approval of instructor.

Cross Listing: VIZA 659/CSCE 649.

CSCE 653 Computer Methods in Applied Sciences
Credits 3.3 Lecture Hours.
Classical and modern techniques for the computational solution of problems of the type that traditionally arise in the natural sciences and engineering; introductions to number representation and errors, locating roots of equations, interpolation, numerical integration, linear algebraic systems, spline approximations, initial-value problems for ordinary differential equations and finite-difference methods for partial differential equations.
Prerequisite: CSCE 442 or MATH 417; graduate classification.

CSCE 654 Supercomputing
Credits 3.3 Lecture Hours.
Principles of high-performance scientific computing systems, vectorization, programming on supercomputers, numerical methods for supercomputers, performance measuring of supercomputers, multitasking.
Prerequisite: CSCE 614.

CSCE 655 Human-Centered Computing
Credits 3.3 Lecture Hours.
A foundation course in human centered systems and information; understanding and conceptualizing interaction; design and prototyping methodologies; evaluation frameworks; visual design using color, space, layering, and media; information structuring and visualization; animation and games; individual and team programming projects.
Prerequisite: Graduate classification or CSCE 436 or 444 or approval of instructor.
CSCE 656 Computers and New Media  
Credits 3.3 Lecture Hours.  
This class investigates the potential and realized impact of computers in the design of new media, explores the variety of relationships between authors and readers of interactive materials, and explores the influence of media design and content expressed.  
Prerequisite: Graduate classification.

CSCE 657/PETE 657 High Performance Computing for Earth Science and Petroleum Engineering  
Credits 3.3 Lecture Hours.  
Numerical simulation of problems in Earth Sciences and Petroleum Engineering using high performance computing (HPC); development of a parallel reservoir simulator.  
Prerequisite: Graduate classification.  
Cross Listing: PETE 657/CSCE 657.

CSCE 658 Randomized Algorithms.  
Credits 3.3 Lecture Hours.  
Introduction to randomized algorithms; selected tools and techniques from probability theory and game theory are reviewed, with a view towards algorithmic applications; the main focus is a thorough discussion of the main paradigms, techniques, and tools in the design and analysis of randomized algorithms; a detailed analysis of numerous algorithms illustrates the abstract concepts and techniques.  
Prerequisite: Graduate classification.

CSCE 659/ECEN 659 Parallel/Distributed Numerical Algorithms and Applications  
Credits 3.3 Lecture Hours.  
A unified treatment of parallel and distributed numerical algorithms; parallel and distributed computation models, parallel computation of arithmetic expressions; fast algorithms for numerical linear algebra, partial differential equations and nonlinear optimization.  
Prerequisites: CSCE 653; MATH 304.  
Cross Listing: ECEN 659/CSCE 659.

CSCE 660/MATH 660 Computational Linear Algebra  
Credits 3.3 Lecture Hours.  
Techniques in matrix computation: elimination methods, matrix decomposition, generalized inverses, orthogonalization and least-squares, eigenvalue problems and singular value decomposition, iterative methods and error analysis.  
Prerequisite: CSCE 442 or equivalent or MATH 417 or equivalent.  
Cross Listing: MATH 660/CSCE 660.

CSCE 661 Integrated Systems Design Automation  
Credits 3.3 Lecture Hours.  
VLSI design systems and their levels of abstracting; algorithms for general VLSI design and implementation; computer aided design tools and principles; physical and logical models.  
Prerequisite: Graduate classification.

CSCE 662 Distributed Processing Systems  
Credits 3.3 Lecture Hours.  
Principles and practices of distributed processing; protocols, remote procedure calls; file sharing; reliable system design; load balancing; distributed database systems; protection and security; implementation.  
Prerequisite: CSCE 313 and CSCE 463 or CSCE 612.

CSCE 663 Real-Time Systems  
Credits 3.3 Lecture Hours.  
Taxonomy of real-time computer systems; scheduling algorithms for static and dynamic real-time tasks; hard real-time communications protocols; programming languages and environments for real-time systems; case studies of real-time operating systems.  
Prerequisites: CSCE 313, and CSCE 463 or CSCE 611, or approval of instructor.

CSCE 664 Wireless and Mobile Systems  
Credits 3.3 Lecture Hours.  
Wireless and mobile systems: wireless communication fundamentals; wireless medium access control design; transmission scheduling; network and transport protocols over wireless design, simulation and evaluation; wireless capacity; telecommunication systems; vehicular, adhoc, and sensor network systems; wireless security; mobile applications.  
Prerequisite: CSCE 463 or CSCE 464 or approval of instructor.

CSCE 665 Advanced Networking and Security  
Credits 3.3 Lecture Hours.  
Security aspects of various network protocols including investigation and tool development using "live" machines and networks.  
Prerequisites: Graduate classification and approval of instructor.

CSCE 666 Pattern Analysis  
Credits 3.3 Lecture Hours.  
Introduction to methods for the analysis, classification and clustering of high dimensional data in Computer Science applications. Course contents include density and parameter estimation, linear feature extraction, feature subset selection, clustering, Bayesian and geometric classifiers, non-linear dimensionality reduction methods from statistical learning theory and spectral graph theory, Hidden Markov models, and ensemble learning.  
Prerequisites: MATH 222, MATH 411 (or equivalent) and graduate classification.

CSCE 667 Seminar in Human-Centered Computing  
Credits 3.3 Lecture Hours.  
Problems, methods and recent developments in human-centered computing and information. May be repeated for credit as content varies.  
Prerequisites: Graduate classification.

CSCE 668 Distributed Algorithms and Systems  
Credits 3.3 Lecture Hours.  
Introduction to fundamental algorithmic results in distributed computing systems; leader election, mutual exclusion, consensus, logical time and causality, distributed snapshots, algorithmic fault tolerance, shared memory, clock synchronization.  
Prerequisites: CSCE 411 or equivalent or approval of instructor.

CSCE 669 Computational Optimization  
Credits 3.3 Lecture Hours.  
Combinatorial theory of polytopes as a tool for the solution of combinatorial optimization problems; applications to max flow, matching and matroids; geometric interpretation of the results indicating the profound role that polyhedral combinatorics play in the design and complexity of approximation algorithms.  
Prerequisite: CSCE 629.
CSCE 670 Information Storage and Retrieval
Credits 3. 3 Lecture Hours.
Representation, storage, and access to very large multimedia document collections; fundamental data structures and algorithms of information storage and retrieval systems; techniques to design and evaluate complete retrieval systems, including cover of algorithms for indexing, compressing, and querying very large collections.
Prerequisites: CSCE 310 or CSCE 603 or approval of instructor; graduate classification.

CSCE 671 Computer-Human Interaction
Credits 3. 3 Lecture Hours.
Comprehensive coverage of Computer-human Interaction (CHI) including history, importance, design theories and future direction; modeling computer users and interfaces, empirical techniques for task analysis and interface design, and styles of interaction.
Prerequisite: Graduate classification.

CSCE 672 Computer Supported Collaborative Work
Credits 3. 3 Lecture Hours.
Covers design, implementation and use of technical systems that support people working cooperatively; draws from the research area of Computer Supported Cooperative Work (CSCW) and includes current theoretical, practical, technical and social issues in CSCW and future directions of the field.
Prerequisite: CSCE 671 or CSCE 610 or approval of instructor.

CSCE 675 Digital Libraries
Credits 3. 3 Lecture Hours.
Surveys current research and practice in Digital Libraries, which seek to provide intellectual access to large-scale, distributed digital information repositories; current readings from the research literature which covers the breadth of this interdisciplinary area of study.
Prerequisite: Graduate classification in computer science.

CSCE 680/ECEN 680 Testing and Diagnosis of Digital Systems
Credits 3. 3 Lecture Hours.
The theory and techniques of testing VLSI-based circuits and systems, and design for testability.
Prerequisites: CSCE 321 or ECEN 350/CSCE 350 or equivalent; ECEN 220 or ECEN 248 or equivalent.
Cross Listing: ECEN 680/CSCE 680.

CSCE 681 Seminar
Credit 1. 1 Lecture Hour.
Reports and discussion of current research and of selected published technical articles. May not be taken for credit more than once in master's degree program nor twice in PhD program.

CSCE 684 Professional Internship
Credits 1 to 16. 1 to 16 Other Hours.
Training under the supervision of practicing computer professionals in settings appropriate to the student's professional objectives, away from the Texas A&M University campus.
Prerequisites: Approval of department head and one semester of graduate work completed.

CSCE 685 Directed Studies
Credits 1 to 12. 1 to 12 Other Hours.
Research problems of limited scope designed primarily to develop research technique.

CSCE 689 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours. 0 to 4 Lab Hours.
Selected topics in an identified area of computer science. May be repeated for credit.
Prerequisite: Approval of instructor.

CSCE 691 Research
Credits 1 to 23. 1 to 23 Other Hours.

CVEN - Civil Engineering

CVEN 601 Environmental Engineering Processes III
Credits 3. 3 Lecture Hours.
Biological processes that describe behavior of materials in natural and engineered environmental systems including fundamental theory of kinetics, bioenergetics, genetics and cellular functions.
Prerequisites: CVEN 301.

CVEN 603 Environmental Engineering Management
Credits 3. 3 Lecture Hours.
Federal and state regulatory framework for environmental engineering; techniques for environmental control; risk assessment; evaluation of critical environmental problems with multimedia aspects.
Prerequisite: CVEN 301 or approval of instructor.

CVEN 604 Engineering Analysis of Treatment Systems
Credits 3. 3 Lecture Hours.
Theory of processes used to treat water, wastewater and hazardous wastes; applications of theory to design and operation of treatment systems, including biological treatment, adsorption, coagulation, filtration and precipitation.
Prerequisites: CVEN 601, CVEN 619, CVEN 620.

CVEN 605 Environmental Measurement
Credits 3. 3 Lecture Hours.
Theory and practice of analytical methods used in the environmental engineering field; instrumental and wet chemical techniques used in measurement of environmental quality parameters and pollutants.
Prerequisite: CVEN 620 or approval of instructor.

CVEN 606 Environmental Engineering Design
Credits 3. 3 Lecture Hours.
Design of engineered environmental systems for water or wastewater treatment in domestic or industrial applications.
Prerequisite: CVEN 604 or approval of instructor.

CVEN 607 Engineering Aspects of Air Quality
Credits 3. 3 Lecture Hours.
Characterization of air contaminants; health effects and legal aspects; dispersion of pollutants in the atmosphere; technology for the control of gaseous and particulate emissions.
Prerequisite: CVEN 311.

CVEN 609 Environmental Control of Oil and Hazardous Materials
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Oil and hazardous material (OHM) spills in the engineering design process; evaluation of OHM properties and their behavior and impact to environmental systems; prevention programs and documents, technology for spill containment and removal; contingency planning cycle including administrative site-specific plans and resource acquisition; response organization; restoration and documentation.
Prerequisite: CVEN 301 or approval of instructor.
CVEN 610/PHEO 650 Environmental Risk Assessment
Credits 3.3 Lecture Hours.
Risk assessment of the environment and human exposure in a statistically-based approach to determine allowable levels of exposure without significant deleterious effects; the basic approach of hazard identification; data collection and analysis; toxicity assessment; risk characterization; applications in ecological and human risk assessment; risk analysis performed.
Prerequisite: CHEM 222 or equivalent.
Cross Listing: PHEO 650.

CVEN 612 Tools for Highway Materials and Pavement Design
Credits 3.3 Lecture Hours.
Theory and practice in pavement design; pavement performance; structural design of pavement layers; types of materials used in pavement layers; characterization of pavement layer materials; concepts of pavement management; hands-on application of pavement design computational tools.
Prerequisite: Graduate classification in civil engineering or approval of instructor.

CVEN 613 Micromechanics of Civil Engineering Materials
Credits 3.2 Lecture Hours. 2 Lab Hours.
Discrete-particle and continuum micromechanics energy principles; finite-element and discrete-element formulations for constitutive modeling of asphalt, concrete, and coarse and fine-grained soils; adhesive and cohesive fracture and healing; stress-dependent plasticity; principles and measurement of surface energy and pseudo-strain.
Prerequisite: CVEN 615, CVEN 616 or approval of instructor.

CVEN 614 Stabilization of Soil-Aggregate Systems
Credits 3.3 Lecture Hours.
Theory and practice of chemical stabilization of soils and aggregate systems with traditional methods of chemical stabilization including Portland cement, lime, fly ash and by products (kiln dusts, fly ash and slag materials); selected non-traditional methods including polymers, ionic systems, and enzymes; mechanisms and methods to avoid deleterious reactions.

CVEN 615 Structural Design of Pavements
Credits 3.3 Lecture Hours.
Characteristics of pavement loads, stress analysis in pavements, design practices, construction, rehabilitation and maintenance.
Prerequisite: CVEN 418.

CVEN 616 Systems Design of Pavements
Credits 3.2 Lecture Hours. 3 Lab Hours.
Optimization of the design of rigid and flexible pavement systems; empirical and mechanistic stochastic structural subsystems; utility theory, serviceability concept, cost studies, traffic delay, environmental deterioration, rehabilitation and maintenance optimization systems.
Prerequisite: CVEN 418.

CVEN 617 Traffic Engineering: Characteristics
Credits 3.2 Lecture Hours. 3 Lab Hours.
Human, vehicular and traffic characteristics as they relate to driver-vehicle-roadway operational systems; traffic studies and methods of analysis and evaluation.
Prerequisite: CVEN 457 or equivalent.

CVEN 618 Traffic Engineering: Operations
Credits 3.2 Lecture Hours. 3 Lab Hours.
Advanced theory and application of traffic control; signalization and freeway operations.
Prerequisite: CVEN 457 or equivalent.

CVEN 619 Environmental Engineering Processes I
Credits 3.3 Lecture Hours.
Physical processes that describe behavior of materials in natural and engineered environmental systems including transport phenomenon, sorption, desorption, flocculation and sedimentation.
Prerequisite: CVEN 301.

CVEN 620 Environmental Engineering Processes II
Credits 3.3 Lecture Hours.
Chemical processes that describe behavior of materials in natural and engineered environmental systems including neutralization, precipitation, complex formation, adsorption, oxidation-reduction, coagulation, volatilization and absorption.
Prerequisites: CVEN 301.

CVEN 621 Advanced Reinforced Concrete Design
Credits 3.3 Lecture Hours.
Reinforced concrete principles; analysis of rigid building frames, design of building frames, slabs, biaxially loaded columns, rectangular and circular tanks, and deep beams.
Prerequisite: CVEN 444 or equivalent.

CVEN 622 Properties of Concrete
Credits 3.3 Lecture Hours.
Materials, properties and behavior of concrete; cement, cement types, aggregate characteristics; properties of fresh concrete; structure of portland cement paste; mechanical properties of hardened concrete; durability and repair of concrete structures.
Prerequisites: CVEN 342.

CVEN 623 Nondestructive Pavement Evaluation
Credits 3.2 Lecture Hours. 2 Lab Hours.
Nondestructive measurements and analysis methods of pavement data collection to determine riding quality, vehicle dynamics, surface texture, layer thickness, stiffness, moisture and distress using seismic, laser, radar, infrared, impulse, image analysis, and wave propagation. Content applies to construction quality control and evaluation of risk, reliability and remaining life of pavements.
Prerequisite: CVEN 616 or approval of instructor.

CVEN 624 Infrastructure Engineering and Management
Credits 3.3 Lecture Hours.
Defines the infrastructure deterioration problems in the United States and describes the engineering and management approaches to arrest the deterioration.
Prerequisite: Graduate classification in engineering or approval of instructor.

CVEN 625 Traffic Engineering: Design
Credits 3.2 Lecture Hours. 3 Lab Hours.
Design of traffic control device installations with special emphasis on traffic signal design and installation, including the design features of detector placement and operation; national and state design standards and guidelines for traffic control device installation.
Prerequisite: CVEN 457.

CVEN 626 Highway Safety
Credits 3.3 Lecture Hours.
Fundamental concepts for performing traffic safety analyses; crash data collection and database management; safety improvement programs; accident data analysis; development of statistical models; before-after studies; economic analyses; accident risk.
CVEN 627 Engineering Surface Water Hydrology
Credits 3. 3 Lecture Hours.
Precipitation-runoff processes; watershed and streamflow modeling; frequency analysis; erosion and sedimentation engineering; hydrologic design of hydraulic structures and nonstructural stormwater management strategies.
Prerequisite: Graduate classification in engineering or approval of instructor.

CVEN 628 Advanced Hydraulic Engineering
Credits 3. 3 Lecture Hours.
Modeling of steady and unsteady flow in natural and constructed channels and hydraulic structures. Open channel hydraulics. Design and analysis of hydraulic structures, canals, and flood mitigation projects. Sediment and contaminant transport in river systems.
Prerequisite: CVEN 339 or approval of instructor.

CVEN 631 System Identification and Nondestructive Damage Evaluation of Civil Engineering Structures
Credits 3. 3 Lecture Hours.
Invasive assessment of civil structures; concepts of systems identification, damage detection, and safety evaluation; estimation of mass, damping, and stiffness properties; determination of load capacity and useful life.
Prerequisite: Graduate classification in Civil Engineering, Aerospace Engineering or Mechanical Engineering.

CVEN 632 Transportation Engineering: Economics
Credits 3. 3 Lecture Hours.
Engineering and economic principles for transportation systems; engineering evaluation using methods of travel demand, costs, equilibrium and pricing; use of economic principles for the finance, engineering, and management of transportation systems.
Prerequisite: CVEN 672 or approval of instructor.

CVEN 633 Advanced Mechanics of Materials
Credits 3. 3 Lecture Hours.
Stresses and strains at a point, torsion of noncircular cross sections, beams with combined axial and lateral loads, energy methods, thick walled pressure vessels, theories of failure, introduction to the theory of elasticity, theory of plates, theory of elastic stability and solution to elementary problems.
Prerequisite: MATH 308 or approval of instructor.

CVEN 635 Street and Highway Design
Credits 3. 3 Lecture Hours.
Advanced concepts of the design of streets and highways, design criteria, controls and standards for design alignment, cross section, intersections and interchanges and environmental impacts of surface transport facilities.
Prerequisite: CVEN 456 or equivalent.

CVEN 637 Rigid Pavement Analysis and Design
Credits 3. 3 Lecture Hours.
Introduction to mechanistic rigid pavement design concepts; development of mathematical pavement models and application of the models to design analysis; relationship of pavement response to performance and fatigue damage concepts in design; evaluation of pavement design practice and procedures for highways and airports; rigid pavement overlay design concept.
Prerequisite: CVEN 418.

CVEN 638 Computer Integrated Construction Engineering Systems
Credits 3. 3 Lecture Hours.
Modeling concepts, issues and techniques of computer integrated construction engineering systems; current research and practice in design and implementation of computer integrated construction systems, with emphasis on the integration of engineering, construction planning, monitoring and control through management information systems, decision support systems, knowledge based systems and discrete event simulation systems.
Prerequisite: CVEN 349.

CVEN 639 Methods Improvement for Construction Engineers
Credits 3. 3 Lecture Hours.
Application of work methods and measurements to civil engineering construction; examination of factors that affect productivity in construction; study of motivational factors; review of the principles of accident prevention.
Prerequisites: CVEN 405 and CVEN 473 or approval of instructor.

CVEN 640 Project Development: Methods and Models
Credits 3. 3 Lecture Hours.
Development of new projects; public-private partnerships; flexible design and stage-based construction; project risk analysis and management; estimating and budgeting; optimal project decisions; advanced techniques for modeling project performance.
Prerequisite: STAT 601 or approval of instructor.

CVEN 641 Construction Engineering Systems
Credits 4. 3 Lecture Hours. 2 Lab Hours.
Application of systems theory to project planning and control; probabilistic network diagramming, resource allocation, statistical bidding analysis, activity planning, financial management of construction projects and project control.
Prerequisite: CVEN 473 or approval of instructor.

CVEN 644 Project Risk Management
Credits 3. 3 Lecture Hours.
Identifies causes of risks in projects; discusses probabilistic description of risks and formulation of risk models; Bayesian methods for revising probabilities; qualitative and quantitative risk assessment; setting contingencies on budgets and schedules; risk mitigation and risk management; handling technological risk; Utility theory and game theory in management of risks.
Prerequisites: ISEN 644/CVEN 644; STAT 211, STAT 601 or equivalent.

CVEN 645 Geotechnical Site Investigation
Credits 2. 2 Lecture Hours.
Soil sampling techniques to obtain disturbed and undisturbed samples; in situ field tests including standard penetration test, cone penetration test, vane test, pressuremeter test and their use in practice; other recent advances in sampling, in situ testing and site investigation both onshore and offshore.
Prerequisites: CVEN 365; CVEN 435 or equivalent.

CVEN 646 Foundations on Expansive Soils
Credits 3. 3 Lecture Hours.
Properties of partially saturated soils, analysis of beams and plates on foundations, slab-subgrade friction, design of slabs and drilled piers, soil improvement techniques, risk analysis and foundation rehabilitation operations.
Prerequisites: CVEN 365 and MATH 308 or approval of instructor.
CVEN 647 Numerical Methods in Geotechnical Engineering
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Formulation and application of finite element and discrete element methods in solving geotechnical engineering problems related to seepage, diffusion, elasticity, plasticity, fracture and dynamic motion of soil masses, stability and convergence problems and use of existing computer programs in working applied problems.
Prerequisite: Degree in engineering or approval of instructor.

CVEN 648 Advanced Numerical Methods in Geotechnical Engineering
Credits 3. 3 Lecture Hours.
Formulation and application of finite difference and finite element methods in geotechnical problems related to elasticity, plasticity, seepage, consolidation, dynamic response, and pile analysis; constitutive models of soil behavior; and analysis of nonlinear systems.
Prerequisites: MEMA 646 or equivalent; CVEN 651 or registration therein.

CVEN 649 Physical and Engineering Properties of Soil
Credits 4. 3 Lecture Hours. 3 Lab Hours.
Introduction to physico-chemical properties of soils; soil structure; soil classification; permeability; principle of effective stress; stress-deformation and strength characteristics; partly saturated soils; testing procedures.
Prerequisites: CVEN 365 and CVEN 435 or approval of instructor.

CVEN 651 Geomechanics
Credits 3. 3 Lecture Hours.
Fundamentals of mechanics of deformable bodies; theory and application of elasticity, plasticity, viscoelasticity and approximate rheological models to soil mechanics problems.
Prerequisite: Approval of instructor.

CVEN 652 Soil Dynamics
Credits 3. 3 Lecture Hours.
Dynamic properties of soil; wave propagation in an elastic medium; analysis of dynamic soil-structure interaction and machine foundations; earthquake engineering; soil liquefaction; seismic design of foundations, dams, retaining walls and pipelines.
Prerequisite: MATH 308.

CVEN 653 Bituminous Materials
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Production, specifications and tests of bituminous materials; design and evaluation of asphaltic concrete for construction and maintenance; inspection control of street, parking and highway paving surfaces.
Prerequisite: Approval of instructor.

CVEN 654/ISEN 643 Strategic Construction and Engineering Management
Credits 3. 3 Lecture Hours.
Strategic and systems perspectives applied to construction and engineering management projects, organizations and industries; system dynamics methodology to model construction and engineering systems; understanding drivers of performance; feedback and high leverage points for performance improvement.
Prerequisite: Graduate classification or approval of instructor.
Cross Listing: ISEN 643/CVEN 654.

CVEN 655 Structural Reliability
Credits 3. 3 Lecture Hours.
Uncertainties in structural mechanics; probabilistic models for load and resistance variables, fundamentals of structural reliability theory, advanced first-order second moment methods and reliability of complex structural systems; applications to selected structures.
Prerequisites: CVEN 345 and CVEN 421.

CVEN 656 Bridge Engineering
Credits 3. 3 Lecture Hours.
Overview of design of highway bridges, and an introduction to maintenance of highway bridges; history of bridge engineering, types of bridges and materials of construction, design rules, loads, inspection, rating and preventive maintenance, esthetics.
Prerequisite: CVEN 345.

CVEN 657 Dynamic Loads and Structural Behavior
Credits 3. 3 Lecture Hours.
Dynamic modeling of single, multidegree of freedom and continuous systems; dynamic load factors; damping; node superpositions; numerical integration; dynamic behavior of structures and structural elements under action of dynamic loads resulting from wind, earthquake, blast, impact, moving loads and machinery.
Prerequisites: MATH 308 and MEMA 467 or approval of instructor.

CVEN 658 Civil Engineering Applications of GIS
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Use of geographic information system (GIS) concepts and methods to solve civil engineering problems; emphasis on different areas of civil engineering. Class presentations and laboratory sessions used to familiarize students with computer software.
Prerequisite: Graduate classification.

CVEN 659 Behavior and Design of Steel Structures
Credits 3. 3 Lecture Hours.
Buckling and post-buckling strength of stiffened and unstiffened plate elements and members; torsional behavior and design of beams; stability of frames; frames subject to sidesway; bracing design; non-destructive evaluation and application of fracture mechanics principles to welded structures.
Prerequisite: 3 credit hours of structural steel design or approval of instructor.

CVEN 662 Experimental Methods in Civil Engineering
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Introduction to experimental methods, instrumentation, data acquisition and data processing; experimental aspects of static and dynamic testing in the various areas of civil engineering; overview of laboratory work with several hands-on applications in the laboratory.
Prerequisite: Graduate classification in engineering.

CVEN 663 Structural Stability
Credits 3. 3 Lecture Hours.
Buckling of columns, frames, arches, rings, plates and shells, lateral and torsional buckling of beams, Newmark’s method, equilibrium method, Rayleigh-Ritz, variational principles; Galerkin method, Trefetl method, review of current literature.
Prerequisites: MATH 308; approval of instructor.

CVEN 664 Water Resources Engineering Planning and Management
Credits 3. 3 Lecture Hours.
Managing water resources; the planning process, systems analysis methods; institutional framework for water resources engineering; comprehensive integration of engineering, economic, environmental, legal and political considerations in water resources development and management.
Prerequisite: Graduate classification in engineering or approval of instructor.
CVEN 665 Water Resources Systems Engineering
Credits 3.3 Lecture Hours.
Linear and non-linear optimization models and simulation models for planning and management of water systems; single- and multi-objective analysis and deterministic and stochastic techniques.
Prerequisites: CVEN 339; CVEN 422 or equivalent.

CVEN 666 Foundation Structures
Credits 3.3 Lecture Hours.
Geological and soil mechanics principles: load bearing capacity, soil pressure and settlement; design of shallow foundation sub-structures: pedestals, spread footings, combined footings, mats and underream footings; design of deep foundations: piles and drilled piers; retaining walls, cofferdams and sheet piles.

CVEN 667 Slope Stability and Retaining Walls
Credits 3.2 Lecture Hours. 2 Lab Hours.
Slope stability; failure analysis including methods of slices; risk analysis; earthquake analysis; monitoring; remedial measures; retaining structures; basic theories; gravity walls; cantilever walls; tieback walls; mechanically stabilized walls; soil nailing; deflecting-based analysis.
Prerequisites: CVEN 365 or equivalent; graduate classification.

CVEN 668 Advanced EPC Project Development
Credits 3.3 Lecture Hours.
Examines the advanced project development process-business planning and pre-project planning for engineering, procurement and construction (EPC); a process approach is followed. Issues covered are project technical and economic feasibility; scope definition; project risks; preliminary budgeting; scheduling and parametric estimating; execution strategies; negotiations; organizational design and development.
Prerequisite: Graduate classification in engineering or approval of instructor.

CVEN 669 Design of Structures for Hazardous Environmental Loads
Credits 3.3 Lecture Hours.
Introduction to wind and earthquake engineering with focus on studying the characteristics and effects of various types of windstorms and earthquakes; development of tools that can be used in specifying wind and earthquake loads on structures.
Prerequisite: Approval of instructor.

CVEN 670 Behavior and Design of Composite Structures
Credits 3.3 Lecture Hours.
Design of composite structural systems comprising structural steel and reinforced concrete; composite slabs on steel beams; composite slabs on formed metal deck; columns; moment frame systems; shear wall systems; braced frame systems; dual systems; introduction to retrofitting applications.
Prerequisites: CVEN 444; CVEN 446 or equivalent; graduate classification.

CVEN 671 Behavior and Design of Prestressed Concrete Structures
Credits 3.3 Lecture Hours.
Introduction to the behavior and design of prestressed concrete structural members for several limit states; including flexure, shear, torsion and deflection; exposure to composite beams; indeterminate systems; bridge design and construction.
Prerequisites: CVEN 444; graduate classification in civil engineering or approval of instructor.

CVEN 672 Engineering and Urban Transportation Systems
Credits 3.3 Lecture Hours.
Characteristics of transportation engineering systems; transportation engineering data collection; modeling effects of engineering project planning, trip generation, trip distribution, mode choice and traffic assignment; use and interpretation of engineering modeling results; engineering project analysis.
Prerequisite: Graduate classification in engineering or urban and regional planning or approval of instructor.

CVEN 673 Transport Phenomena in Porous Media
Credits 3.3 Lecture Hours.
Transport phenomena in porous media with special emphasis on fundamentals and applications to various geo-environmental problems.
Prerequisites: CVEN 311 and MATH 308 or approval of instructor.

CVEN 674 Groundwater Engineering
Credits 3.3 Lecture Hours.
Groundwater hydrology, theory of groundwater movement, steady-state flow, potential flow, mechanics of well flow, multiple-phase flow, salt water intrusion, artificial recharge, groundwater contamination and models.
Prerequisite: CVEN 311 or approval of instructor.

CVEN 675 Stochastic Hydrology
Credits 3.3 Lecture Hours.
Analysis, simulation and forecasting of hydro-climatic variables.
Prerequisites: CVEN 421 and CVEN 463 or approval of instructor.

CVEN 676 Geostatistics in Engineering
Credits 3.3 Lecture Hours.
Graduate classification in engineering or approval of instructor.

CVEN 677 Experimental Fluid Mechanics Modeling
Credits 3.3 Lecture Hours.
Dimensional analysis; modeling laws; measurement techniques and instrumentation; experimental control and data acquisition; sampling theory and signal processing; applications to coastal, ocean, and hydraulic engineering models.
Prerequisite: Approval of instructor.

CVEN 678 Advanced Computation Methods for Fluid Flow
Credits 3.3 Lecture Hours.
Unsteady three-dimensional Navier-Stokes equations in general nonorthogonal curvilinear coordinates; algebraic and elliptic grid generation; turbulence modeling for complex flows; advanced numerical methods for unsteady incompressible turbulent flows; large-eddy simulations; Reynolds-averaged Navier-Stokes simulation; chimera domain decomposition and interactive zonal approach.
Prerequisite: CVEN 688 or approval of instructor.

CVEN 679 Experimental Fluid Mechanics Modeling
Credits 3.3 Lecture Hours.
Dimensional analysis; modeling laws; measurement techniques and instrumentation; experimental control and data acquisition; sampling theory and signal processing; applications to coastal, ocean, and hydraulic engineering models.
Prerequisite: Approval of instructor.

CVEN 680 Advanced Computation Methods for Fluid Flow
Credits 3.3 Lecture Hours.
Unsteady three-dimensional Navier-Stokes equations in general nonorthogonal curvilinear coordinates; algebraic and elliptic grid generation; turbulence modeling for complex flows; advanced numerical methods for unsteady incompressible turbulent flows; large-eddy simulations; Reynolds-averaged Navier-Stokes simulation; chimera domain decomposition and interactive zonal approach.
Prerequisite: CVEN 688 or approval of instructor.

CVEN 681 Seminar
Credit 1.2 Lab Hours.
Reports and discussion of current research and selected published technical articles.

CVEN 682 Environmental Remediation of Contaminated Sites
Credits 3.3 Lecture Hours.
Aspects of characterization and design of plans for remediation of sites contaminated with hazardous wastes; review of federal and state regulations; risk assessment; remedial technology screening and design of remedial plans.
Prerequisites: CVEN 601, CVEN 619, CVEN 620.
CVEN 683 Dynamic Soil Structure Interaction  
Credits 3.3 Lecture Hours.  
Introduction to basic concepts of wave propagation; soil dynamics; applications to the design of machine foundations; geotechnical earthquake engineering; soil effects on the characteristics of earthquake motions; liquefaction; dynamic stiffness of foundations; seismic soil structure interaction.  
Prerequisite: Graduate classification.  

CVEN 684 Professional Internship  
Credits 1 to 2. 1 to 2 Other Hours.  
Training under the supervision of practicing professional engineers in settings appropriate to the student's professional objectives, away from Texas A&M campus. May be taken two times for credit.  
Prerequisites: Approval of the department head and two semesters of graduate work completed.  

CVEN 685 Directed Studies  
Credits 1 to 12. 1 to 12 Other Hours.  
Enables majors in civil engineering to undertake and complete with credit in their particular fields of specialization limited investigations not within their thesis research and not covered by other courses in established curriculum.  

CVEN 686 Offshore and Coastal Structures  
Credits 3.3 Lecture Hours.  
Fundamental design and analysis techniques: offshore platforms for shallow and deep water, pile supported, gravity based and floating platforms; new design problems faced by offshore industry will be examined by class during the semester.  
Prerequisite: Approval of instructor.  

CVEN 687 Foundation Engineering  
Credits 3.3 Lecture Hours.  
Settlement and bearing capacity analysis of foundations; computer programs used to analyze axially-loaded piles, laterally-loaded piles and sheet-pile walls.  
Prerequisites: CVEN 365; approval of instructor.  

CVEN 688 Computational Fluid Dynamics  
Credits 3.3 Lecture Hours.  
Finite-difference and finite-element methods and basic numerical concepts for the solution of dispersion, propagation and equilibrium problems commonly encountered in real fluid flows; theoretical accuracy analysis techniques.  
Prerequisites: Undergraduate course in fluid mechanics; MATH 601 and/or basic course in linear algebra; knowledge of one programming language.  

CVEN 689 Special Topics in...  
Credits 1 to 4. 1 to 4 Lecture Hours. 0 to 6 Lab Hours.  
Selected topics in an identified area of civil engineering. May be repeated for credit.  
Prerequisites: Approval of instructor and department head.  

CVEN 691 Research  
Credits 1 to 23. 1 to 23 Other Hours.  
Research for thesis or dissertation.  

CVEN 695 Frontiers in Civil Engineering Research  
Credits 1 to 3. 1 to 3 Lecture Hours.  
The present status of investigative work in a variety of civil engineering fields; content selected based on visiting lecturers of distinguished international recognition in their fields of research.  
Prerequisite: Approval of instructor.  

CVEN 696 Urban Traffic Facilities  
Credits 3.3 Lecture Hours.  
Driver, vehicle and roadway characteristics related to design and operation of traffic facilities; selection and design of traffic control devices and information systems for streets and highways; accident analysis and tort liability related to traffic engineering.  
Prerequisite: Graduate classification.  

CVEN 699 Engineering Risk Analysis  
Credits 3.3 Lecture Hours.  
Introduction to applications of probability theory, statistics, and decision analysis to civil engineering problems; emphasis on probabilistic modeling and analysis of civil engineering problems, Bayesian statistics, risk analysis, and decision under uncertainty.  
Prerequisite: STAT 211 or approval of instructor.  

CVEN 710 Civil Engineering Project Finance  
Credits 3.3 Lecture Hours.  
Fundamentals of financing civil engineering projects; Public-Private Partnerships (PPPs); interdependencies between engineering and financing decisions; equity and debt markets; type of debt instruments: loans vs. bonds; risk identification, quantification, and management; engineering due-diligence; pricing risk premium; hedging using civil engineering design strategies.  

CVEN 717/ISEN 642 Engineering Project Control  
Credits 3.3 Lecture Hours.  
Project controls bridge from information-based to physical-based development processes; includes detailed design, testing of designs, design realization, and preparation of facilities for steady state operations; application of basic project control theories, tools, and methods to development projects.  
Prerequisite: Graduate classification in civil engineering or industrial and systems engineering or approval of instructor.  
Cross Listing: ISEN 642.  

CVEN 740 Advanced Constitutive Behavior of Cementitious Materials  
Credits 3.3 Lecture Hours.  
Advanced multi-scale constitutive behavior of cementitious materials, including composite behavior, elasticity, viscoelasticity, aging, free strains, poromechanical behavior, thermal and moisture strains, and thermal, moisture, and ionic transport; focus on experimental observation and analytical modeling.  
Prerequisite: CVEN 343 or CVEN 622 or approval of instructor.  

CVEN 741 Tools for Highway Materials and Pavement Design  
Credits 3.3 Lecture Hours.  
Theory and practice in pavement design; pavement performance; structural design of pavement layers; types of materials used in pavement layers; characterization of pavement layer materials; concepts of pavement management; hands-on application of pavement design computational tools.  
Prerequisite(s): Graduate classification in civil engineering or approval of instructor. Stacked with CVEN 418.  

CVEN 750 Finite Element Applications in Structural Engineering  
Credits 3.2 Lecture Hours. 2 Lab Hours.  
The role of the finite element method (FEM) in structural engineering; use of commercial finite element software; application of FEM method for various structural engineering problems; selection of appropriate FEM models; types of elements and mesh sizes; use and interpretation of FEM results.  
Prerequisite: CVEN 445 or approval of instructor.
CVEN 751 Advanced Dynamics and Control of Civil Engineering Structures
Credits 3.3 Lecture Hours.
Laplace transforms; nonlinear dynamics; base isolation; viscous dampers; classical control; state-space formulation; LQR controllers; estimator design; compensator design; advanced control techniques; emphasis on the issues and applications to bridges, buildings and other large civil structures.
Prerequisite(s): CVEN 657, MEMA 647 or equivalent, or approval of instructor.

CVEN 752 Smart Structures
Credits 3.3 Lecture Hours.
Fundamentals of smart structures including structural dynamics, damping, sensors, control concepts, smart materials, modeling of smart structures, and signal processing; semi-passive concepts, energy harvesting, semi-active concepts, active vibration control, active noise control, shape adaptation, and structural health monitoring.
Prerequisite: CVEN 363 or equivalent or graduate classification in CVEN or approval of instructor.

CVEN 753/MEMA 634 Damage Mechanics of Solids and Structures
Credits 3.3 Lecture Hours.
Damage mechanics; constitutive modeling of damage behavior of materials; application of thermodynamic laws; computational techniques for predicting progressive damage and failure; plasticity; viscoplasticity; viscoelasticity; cohesive zone modeling; fatigue and creep damage; damage in various brittle and ductile materials (e.g., metal, concrete, polymer, ceramic, asphalt, biomaterial, composites).
Prerequisite: CVEN 633 or approval of instructor.
Cross Listing: MEMA 634/CVEN 753.

CVEN 754 Advanced Structural Design Studio
Credits 3.1 Lecture Hour. 6 Lab Hours.
Comparative design, construction, and service-life performance analysis of integrated and complex structural systems, including design loads, load paths, and structural detailing requirements; comparison of alternative structural system solutions; investigation into new technologies and structural design and/or construction approaches; examples drawn from bridges, buildings and other large civil structures.
Prerequisites: CVEN 659 or registration therein, CVEN 671 or registration therein, CVEN 750 or registration therein, or approval of instructor.

CVEN 765 Advanced Civil Engineering Systems
Credits 3.3 Lecture Hours.
Formulation of decision making problems at different hierarchical levels: strategic, planning and operational; includes application problems in project selection, networks, allocation, routing/scheduling, distribution, and multi-objective; introduction to exact and approximate solving techniques; optimization, heuristics, simulation, and decision analysis; solution interpretation and sensitivity analyses.
Prerequisite: CVEN 322 or approval of instructor.

CVEN 766 Highway Design
Credits 3.2 Lecture Hours. 3 Lab Hours.
Theory and practice in highway design; highway classification and design criteria, location studies, design of vertical and horizontal alignment, cross section, intersections, environmental factors, and highway drainage elements.
Prerequisites: CVEN 307 or approval of instructor.

DASC - Dairy Science
DASC 606/FSTC 606 Microbiology of Foods
Credits 3.3 Lecture Hours.
Nature and function of beneficial and defect-producing bacteria in foods; food-borne illness, effects of processing, storage and distribution; techniques for isolation and identification from foods.
Cross Listing: FSTC 606/DASC 606.

DASC 685 Directed Studies
Credits 1 to 4. 1 to 4 Other Hours.
Research methods and review of scientific literature dealing with individually selected problems in production or manufacturing and not pertaining to thesis or dissertation.

DASC 691 Research
Credits 1 to 23. 1 to 23 Other Hours.
Research leading to thesis or dissertation in respective fields of dairy production and dairy manufacturing.

DDDS - Doctor Dental Surgery
DDDS 532 ORTHODONTICS
Credits 1 to 10. 1 to 10 Other Hours.

DDDS 554C PERIODONTICS
Credits 1 to 10. 1 to 10 Other Hours.

DDDS 556C FIXED PROSTHODON
Credits 1 to 10. 1 to 10 Other Hours.

DDDS 557C REMOVABLE PROSTH
Credits 1 to 10. 1 to 10 Other Hours.

DDDS 559C OPERATIVE DENTIS
Credits 1 to 10. 1 to 10 Other Hours.

DDDS 575 PAIN & ANXIETY CON
Credits 1 to 10. 1 to 10 Other Hours.

DDDS 576 FIXED PROSTHODONTI
Credits 1 to 10. 1 to 10 Other Hours.

DDDS 577 REM PROSTH
Credits 1 to 10. 1 to 10 Other Hours.

DDDS 578 ORTHODONTICS
Credits 1 to 10. 1 to 10 Other Hours.

DDDS 580 ORAL/MAXILLOFACIAL
Credits 1 to 10. 1 to 10 Other Hours.

DDDS 581 ORAL DIAGNOSIS
Credits 1 to 10. 1 to 10 Other Hours.

DDDS 583 PEDIATRIC DENTISTR
Credits 1 to 10. 1 to 10 Other Hours.

DDDS 584 PERIODONTICS
Credits 1 to 10. 1 to 10 Other Hours.

DDDS 586 PHARMACOLOGY
Credits 1 to 10. 1 to 10 Other Hours.

DDDS 589 ENDODONTICS
Credits 1 to 10. 1 to 10 Other Hours.

DDDS 591 PROFESSIONAL ETHIC
Credits 1 to 10. 1 to 10 Other Hours.
DDDS 6510 Biochemistry/Cell and Molecular Biology
Credits 3. 3 Lecture Hours.
Chemical, metabolic cellular and molecular processes in the human body with applications to the practice of dentistry. Also includes cellular and molecular mechanisms that control gene expression and metabolic processes in human cells and tissues with an emphasis on dental examples.

DDDS 6520 Cariology and Prevention
Credit 1.5. 1.5 Lecture Hour.
Cariology, identification, progress, prevention and management of dental decay and tobacco-related oral disease; oral hygiene index and clinical utilization of plaque removal materials and techniques.

DDDS 6540 Dental Anatomy
Credits 2. 2 Lecture Hours.
Form and function of the human dentition.

DDDS 6543 Dental Anatomy-C
Credits 2. 2 Lab Hours.
Drawing and carving teeth to scale; restoring tooth form in wax to normal relation with adjacent and opposing teeth; identification of extracted natural teeth.

DDDS 6580 Dental Materials
Credit 1. 0.5 Lecture Hours. 0.5 Lab Hours.
Introduction to the effects of physical, chemical and mechanical properties on the manipulation of materials used in dentistry; laboratory exercises to demonstrate clinical applications.

DDDS 6600 General Histology
Credits 3. 1.5 Lecture Hour. 1.5 Lab Hour.
Microscopic and ultrastructural characteristics of cells, tissues and organ systems of the human; a brief introduction to function; light- and electron-microscopic study of human tissues.

DDDS 6640 Gross Anatomy
Credits 6. 3 Lecture Hours. 3 Lab Hours.
Gross morphology of the human with special emphasis on the head and neck; dissection of the cadaver.

DDDS 6660 Growth and Development
Credit 1.5. 1.5 Lecture Hour.
Prenatal growth of craniofacial structures; postnatal physical growth and maturation; development of the dentition and malocclusion; postnatal craniofacial development.

DDDS 6690 Human Behavior in Dentistry
Credits 0.5. 0.5 Lecture Hours.
Application of principles of communication and motivation relevant to doctor-patient relations, patient compliance, stress management, and management of dental anxiety and fear.

DDDS 6724 Introduction to Clinical Practice I-C
Credits 0.5. 0.5 Other Hours.
Observation and assistance of students in delivering dental services in preventive dentistry, oral diagnosis, periodontics and general dentistry, dental health education, patient interviewing, history taking and record management.

DDDS 6730 Introductory Ethics and Academic Integrity
Credits 0.5. 0.5 Lecture Hours.
Contemporary introduction to ethics in the dental profession and academic integrity in dental education.

DDDS 6740 Immunology
Credit 1. 0.5 Lecture Hours. 0.5 Lab Hours.
A lecture course to teach the basic principles of immunology as it relates to the practice of dentistry and the process of infectious disease.

DDDS 6770 Neuroscience
Credit 1.5. 1.5 Lecture Hour.
Gross structural features and functions of the human nervous system; emphasis on physiology of nerve membrane and receptors, neural pathways for the major sensory and motor systems; the cranial nerves; and the autonomies of the head and neck.

DDDS 6800 Occlusion
Credit 1. 1 Lecture Hour.
Temporomandibular joint occlusal function; intercuspal relationships; mandibular movements; record transfer; use of a semi-adjustable articulator.

DDDS 6804 Occlusion - C
Credit 1. 1 Lab Hour.
Preclinical laboratory to accompany course 6800.

DDDS 6820 Oral Histology
Credits 2. 1 Lecture Hour. 1 Lab Hour.
Normal development and structure of tissues associated with the tooth proper, its adnexa and the oral cavity; light-, scanning electron-, and transmission electron-microscopy; emphasis on clinical aspects of oral histology.

DDDS 6840 Operative Dentistry
Credit 1. 1 Lecture Hour.
Introduction to the treatment of diseased and injured teeth; emphasis on principles of cavity preparation; principles and manipulation of restorative materials.

DDDS 6844 Operative Dentistry - C
Credits 2. 2 Lab Hours.
Preclinical laboratory to accompany course 6840.

DDDS 6850 Cultural Competence in Dental Health Care and Education
Credits 0.5. 0.5 Lecture Hours.
Explores cultural differences and similarities while increasing awareness of values and beliefs that impact health care and communication. Must be taken on a satisfactory/unsatisfactory basis.

DDDS 6860 Introduction to Evidence Based Dentistry and Clinical Research
Credits 2.5. 2.5 Lecture Hours.
Lecture and group sessions to introduce the functional principles of how to formulate a focused research question and how to search the literature to identify and evaluate evidence to answer that question.

DDDS 6870 Physiology
Credits 5.5. 2.8 Lecture Hours. 2.8 Lab Hours.
Theory and principles of human body function; detailed study of the cell membrane, skeletal muscle, blood, heart, lungs, gastrointestinal system, kidney and endocrine glands; demonstration of many principles in laboratory exercises.

DDDS 6880 General Pathology
Credits 4. 2 Lecture Hours. 2 Lab Hours.
This lecture course aimed at presenting the basic mechanisms on the organ systems of the body. It is also intended to provide an understanding of the more common diseases and, where appropriate, how they might impact the management of the dental patient.
DDDS 7010 Dental Auxiliary Utilization
Credits 0.5. 0.5 Lecture Hours.
Utilization of the chair-side dental assistant; self-study module.

DDDS 7020 Endodontics
Credit 1. 1 Lecture Hour.
Introduction to endodontics; technical and biological bases for nonsurgical root canal therapy; access, cleaning, shaping and filling of root canals.

DDDS 7024 Endodontics - C
Credit 1. 1 Lab Hour.
Preclinical laboratory; discussion and demonstrations of techniques for nonsurgical root canal therapy including access opening, cleaning, shaping and filling of root canals in models and extracted teeth.

DDDS 7040 Fixed Prosthodontics
Credits 3. 3 Lecture Hours.
Instruction in the design and fabrication of fixed partial dentures and crown restorations, implants, preparations, fabrication techniques and related dental materials.

DDDS 7044 Fixed Prosthodontics - C
Credits 4. 4 Lab Hours.
Laboratory to accompany course DDDS 7040.

DDDS 7080 Introduction to Clinical Practice II
Credit 1. 0.5 Lecture Hours. 0.5 Lab Hours.
Introduction to Clinical Practice II. Introduction, orientation to the various clinical disciplines; concepts and implementation of quality assurance issues in dental practice, aseptic techniques, patient communications, diversity ethics, instrument management, initial introductory endodontics information, dental patient record management, rotations patient assignments, and culturally sensitive patient interviewing information.

DDDS 7084 Introduction to Clinical Practice II-C
Credit 1.5. 1.5 Other Hour.
Clinic applications to accompany course 7080; including rotations through various discipline clinics, several simulations of clinical operative procedures using computer documentation, small group sessions where students participate in simulated culturally sensitive patient interviewing exercises.

DDDS 7100 Operative Dentistry
Credit 1. 1 Lecture Hour.
Treatment of diseased and injured teeth; emphasis on principles of cavity preparation; principles and manipulation of restorative materials.

DDDS 7104 Operative Dentistry - C
Credits 2. 2 Lab Hours.
Preclinical laboratory to accompany course 7100.

DDDS 7120 Basic Principles and Techniques of Dentalalveolar Surgery
Credit 1. 0.5 Lecture Hours. 0.5 Lab Hours.
Introduction to the basic principles and techniques of dentoalveolar surgery; presurgical patient evaluation, risk management and assessment; surgical instrument identification and vocabulary, principles of soft tissue surgery, sterile techniques and infection control; preprosthetic surgical techniques.

DDDS 7140 Preclinical Diagnostic Sciences II
Credit 1. 1 Lecture Hour.
Introduction to clinical diagnostic methods and its vocabulary that contribute to the assessment of the dental patient. Techniques of gathering diagnostic information from the patient history, the extraoral physical examination and clinical laboratory studies.

DDDS 7160 Oral Pathology
Credits 2. 2 Lecture Hours.
Etiology, pathogenesis and clinical aspect of oral disease and oral manifestations of systemic disease.

DDDS 7170 Oral Radiology
Credits 2. 2 Lecture Hours.
The basic concepts of radiation physics, the generation of X-rays; operation of the X-ray unit; the control factors involved in the production of radiographic images, intraoral, extraoral and specialized radiographic acquisition techniques; and the radiographic interpretation of normal anatomy, dental caries, periodontal disease and dental anomalies.

DDDS 7173 Oral Radiography - C
Credits 0.5. 0.5 Other Hours.
Supervised practical experience in the application of the principles of radiographic image formation.

DDDS 7190 Preclinical Diagnostic Sciences II
Credit 1. 1 Other Hour.
Techniques and vocabulary that contribute to the diagnosis of dental diseases, abnormalities of teeth and non-dental lesions of the orofacial region. Physical and radiographic examination of oral/perioral tissues and the application of findings to diagnostic decisions are emphasized. Also, includes clinical documentation and dental treatment planning.

DDDS 7210 Orthodontics
Credit 1. 1 Lecture Hour.
Introductory information regarding evaluation of tooth position problems, treatment planning for minor orthodontic problems, including primary, mixed and adult dentitions. Diagnosis will be emphasized.

DDDS 7214 Orthodontics - C
Credit 1. 1 Lab Hour.
Basic techniques of wire and acrylic manipulation, including soldering, welding, band fabrication and bonding in a laboratory setting.

DDDS 7230 Local Anesthesia / Nitrous Oxide-Oxygen Conscious Sedation
Credit 1. 0.5 Lecture Hours. 0.5 Other Hours.
Regional pain control; nitrous oxide-oxygen sedation and enteral conscious sedation, preanesthetic evaluation of patients, techniques of administration, pharmacology, side effects, complications and risk, and management of complications.

DDDS 7250 Pediatric Dentistry
Credits 2. 1 Lecture Hour. 1 Lab Hour.
An introductory course to pediatric dentistry presented in small-group seminars, preclinical laboratory basic operative skills, diagnosis and treatment planning, behavioral management strategies, an introductory patient experience activity, and observation of clinical treatment in preparation for the pediatric clinical courses.

DDDS 7270 Periodontics
Credits 2. 2 Lecture Hours.
Classification of periodontal disease, systemic and dysfunctional factors associated with periodontal disease, diagnosis and management of periodontal diseases, emphasis on specific therapeutic techniques.

DDDS 7274 Periodontics - C
Credit 1. 0.5 Lab Hours. 0.5 Other Hours.
Periodontics – C. Clinical applications of course DDDS 7270.

DDDS 7290 Dental Pharmacology
Credits 2. 2 Lecture Hours.
Terms and principles essential to understanding the rational use of drugs in dental practice; pharmacology of drugs used in dentistry; prescription writing techniques; evaluation of patient drug histories.
DDDS 7330 Patient Management
Credits 0.5. 0.5 Lecture Hours.
Scientific basis for oral disease assessment and strategies for prevention and/or management of oral diseases.

DDDS 7350 Removable Prosthodontics
Credits 2. 2 Lecture Hours.
Concepts and techniques for fabricating complete and partial dentures. Complete dentures fabricated on a manikin, theory of various denture occlusions; RPD design and construction, immediate dentures, restoration of implants, mouth preparation and laboratory communication.

DDDS 7353 Removable Prosthodontics - C
Credits 4. 4 Lab Hours.
Preclinical laboratory to accompany course DDDS 7350.

DDDS 7400 Application of Evidence Based Dentistry I
Credits 0.5. 0.5 Other Hours.
Small group sessions review clinically relevant articles using the foundational information from the first year evidence-based dentistry course.

DDDS 7410 National Dental Board Part I Review
Credit 1. 1 Lecture Hour.
Presents discipline-based and case-based review material on the four sections of the NBDE including experience in taking practice examinations.

DDDS 7420 Microbiology
Credits 3. 3 Lecture Hours.
Microorganism metabolism, genetics, bacteriology, virology, mycology, chemotherapy, sterilization, disinfection, and the microorganisms of oral diseases.

DDDS 8000 Summer Clinic - C
Credits 0. 0 Other Hours.
All phases of clinic practice; mandatory attendance for third-year students.

DDDS 8004 Clinical Preventive Dentistry - C
Credits 0.5. 0.5 Other Hours.
Clinical applications of disease detection, risk assessment, behavioral modification and needs-based preventative measures.

DDDS 8034 Comprehensive Care Program - C
Credits 4. 4 Other Hours.
A clinical instruction and mentoring system with seminars that allows the student-clinician to learn to provide and coordinate patient care, as defined by clinical competencies, in a setting that simulates effectively managed dental practices that are patient centered and quality assured. It includes patient management skills, professionalism, ethics, time management, record and patient audits, work habits, treatment planning and other facets consistent with complete and socially sensitive patient care.

DDDS 8044 Dental Auxiliary Utilization - C
Credit 1. 1 Other Hour.
Utilization of chairside dental assistant, clinical applications.

DDDS 8060 Endodontics
Credit 1. 1 Lecture Hour.
Clinical endodontic; diagnosis and management of pulpal and periradicular disease; integration of pulpal biology and clinical practice.

DDDS 8064 Endodontics – C
Credit 1. 1 Other Hour.
Clinical application of course DDDS 8060.

DDDS 8080 Fixed Prosthodontics
Credit 1.5. 1.5 Lecture Hour.
Biological, physiological, anatomical, and esthetic factors related to diagnosis, treatment planning and patient treatment.

DDDS 8084 Fixed Prosthodontics - C
Credits 3. 3 Other Hours.
Clinical application of course DDDS 8080.

DDDS 8140 Behavioral Dentistry/Dental Public Health
Credit 1. 1 Lecture Hour.
Behavioral management principles relevant to pain, anxiety, cultural background, etc. Management, treatment, prevention and disease control for geriatric patients. Motivational interviewing exercises for protection and management of oral health is taught. Dental public health and concepts of managing geriatric patients is included in the latter half of the course.

DDDS 8160 Anesthesia in Dentistry
Credits 0.5. 0.5 Lecture Hours.
Indications, contraindications, risks and techniques of enteral, parenteral and general anesthesia as applicable to dentistry.

DDDS 8180 Implant Dentistry
Credit 1. 0.5 Lecture Hours. 0.5 Lab Hours.
Indications and evidence-based rationale for dental implants, diagnosis and treatment planning, surgical concepts of placement, prosthodontic restorative treatment for single tooth, partially edentulous and completely edentulous patients, and maintenance procedures.

DDDS 8200 Occlusion
Credit 1. 1 Lecture Hour.
Diagnosis and treatment of potentially pathologic and clinically pathologic occlusal conditions; etiologic factors; effects of pathofunction on oral tissues; diagnostic aids and methods of treatment.

DDDS 8220 Operative Dentistry
Credit 1.5. 1.5 Lecture Hour.
Clinical principles of operative dentistry, the art and science of treating diseased teeth; restoration of proper tooth form, function and esthetics.

DDDS 8224 Operative Dentistry - C
Credits 3. 3 Other Hours.
Clinical application of course DDDS 8220.

DDDS 8240 Advanced Principles and Techniques of Dentoalveolar Surgery
Credit 1. 1 Lecture Hour.
Continuation of course DDDS 7120. Emphasis on more advanced principles and techniques of dentoalveolar surgery and patient management, advanced pre-prosthetic surgery, odontogenic infections and management, maxillary sinus conditions and disease, osseointegrated implants, and principles of biopsy.

DDDS 8241 Oral and Maxillofacial Surgery: Chronic Pain and Hospital Dentistry
Credit 1. 0.5 Lecture Hours. 0.5 Lab Hours.
Continuation of course DDDS 8240 with emphasis on more advanced surgical procedures and concepts; temporomandibular joint disease and chronic orofacial pain; peripheral nerve injuries; hospital dentistry; dentoalveolar and craniofacial trauma and management.

DDDS 8244 Oral and Maxillofacial Surgery - C
Credit 1. 1 Other Hour.
Clinical application of course DDDS 8240.
DDDS 8264 Oral Diagnosis - C  
Credit 1.5. 1.5 Other Hour.  
Provides the format for the student’s practical experience in the diagnosis and treatment planning for the dental patient; clinical rotations with patient screening; the diagnosis and treatment planning for assigned clinical patients.

DDDS 8280 Clinical Principles of Patient Evaluation  
Credits 2. 2 Lecture Hours.  
Diagnostic sciences and clinical principles of patient evaluation; interactive case-based, problem-solving course requiring the utilization of differential diagnosis skills of clinical oral signs and symptoms with an emphasis on oral pathology and a variety of head and neck diseases and conditions encountered in the practice of dentistry.

DDDS 8304 Oral Radiography - C  
Credits 0.5. 0.5 Other Hours.  
Application of basic principles, procedures and techniques of clinical radiology to patients.

DDDS 8320 Orthodontics  
Credit 1. 1 Lecture Hour.  
Introduction to orthodontic diagnosis and treatment; biological principles of tooth movement; cephalometric analysis; fundamentals of design, selection, and use of fixed and removable appliance systems and interdisciplinary interaction.

DDDS 8324 Orthodontics - C  
Credits 0.5. 0.5 Other Hours.  
Clinical application of course DDDS 8320.

DDDS 8340 Pediatric Dentistry  
Credit 1.5. 1.5 Lecture Hour.  
Lectures and small-group seminars covering treatment planning and child management; special problems in pediatric dentistry; emphasis on complete dental rehabilitation of patients.

DDDS 8344 Pediatric Dentistry - C  
Credit 1. 1 Other Hour.  
Clinical application of course DDDS 8340.

DDDS 8360 Periodontics  
Credit 1. 1 Lecture Hour.  
Introduction to advanced periodontal techniques; periodontics as it relates to general practice and comprehensive case analysis, and treatment planning emphasizing periodontal literature and interdisciplinary concerns.

DDDS 8364 Periodontics - C  
Credits 2. 2 Other Hours.  
Clinical application of course DDDS 8360.

DDDS 8370 Professional Ethics  
Credit 1. 1 Lecture Hour.  
Principles and theory; case analysis and decision-making; humanizing health care; general ethics; obligations of health professionals; bioethics; review of dental-specific ethics literature; includes small group sessions.

DDDS 8380 Medical Pharmacology  
Credit 1.5. 1.5 Lecture Hour.  
Pharmacology of drugs used in medicine impacting dental patient evaluation and management. Focus is on fundamental drug information necessary for patient evaluation, the drug history and understanding potential adverse events, mechanisms of action, pharmacokinetics pharmacodynamics, and drug interactions with medications prescribed for dental procedures.

DDDS 8400 Removable Prosthodontics  
Credit 1.5. 1.5 Lecture Hour.  
Fabrication delivery and management of removable complete dentures, partial dentures and immediate dentures.

DDDS 8404 Removable Prosthodontics - C  
Credits 3. 3 Other Hours.  
Clinical application of course DDDS 8400.

DDDS 8500 Office Medical Emergencies  
Credits 0.5. 0.5 Lecture Hours.  
Prevention, recognition and management of medical emergencies; management of medically compromised patients.

DDDS 8600 Advanced Removable Prosthodontics  
Credit 1. 1 Lecture Hour.  
Extension of course DDDS 8400 with emphasis on advanced concepts for removable complete dentures, partial dentures, immediate dentures and prosthetic restoration of implants.

DDDS 8610 Periodontics  
Credits 0.5. 0.3 Lecture Hours. 0.3 Lab Hours.  
Intended to reinforce the principles of non-surgical management of periodontal disease and to better prepare for first clinical experiences; a review of periodontal hand instrumentation, infection control in the clinic and hands-on set-up and use of the Cavitar ultrasonic instrument; includes the relationship of periodontics and restorative dentistry and the proper usage of radiosurgery in dentistry.  
Prerequisites: DDDS 7270 and DDDS 7274.

DDDS 9000 Summer Clinic  
Credits 0.  
All phases of clinical practice; mandatory attendance for fourth-year students.

DDDS 9004 Clinical Services Assignment - C  
Credits 4.5. 4.5 Other Hours.  
Clinical Services Assignment – C. Continuing clinical experience in selected specialties; emergency treatment in a practice setting; oral and maxillofacial surgery appropriate for general practice; oral diagnosis; treatment planning.

DDDS 9030 Diagnosis and Treatment Planning Seminar  
Credit 1. 1 Lecture Hour.  
Lecture and small group sessions familiarize students with “phase treatment planning,” interviewing patients, systemic disease issues, disease control, definitive treatment, maintenance and recall.

DDDS 9040 Advancements in Techniques and Materials  
Credit 1.5. 1.5 Lecture Hour.  
Innovations and advancements in dental materials and techniques; advantages and disadvantages; scientific basis for selection of materials and techniques.

DDDS 9044 General Dentistry - C  
Credits 20. 20 Other Hours.  
All phases of general dentistry performed as required for each assigned patient; seminars and student presentations. The General Dentistry program is inclusive of fixed prosthodontics, geriatrics, removable prosthodontics, operative dentistry, oral and maxillofacial surgery, oral diagnosis, orthodontics, pediatric dentistry, periodontics, endodontics, community health and preventive dentistry, oral radiography, and special care clinic.
DDD 9050 Selected Advanced Topics in Oral And Maxillofacial Surgery  
Credits 0.5. 0.3 Lecture Hours. 0.3 Lab Hours.  
Emphasis is on more advanced and complex oral and maxillofacial surgical concepts more typically performed by the specialist in oral and maxillofacial surgery; extending the student’s capability for patient evaluation. Topics include major facial trauma, bone grafting, reconstruction of head and neck defects, orthognathics, life threatening infections and others.

DDD 9070 Orthodontics  
Credit 1. 1 Lecture Hour.  
Comprehensive case analysis and treatment planning; role of the general dentist in detection, interception and treatment of orthodontic problems.

DDD 9080 Community Dentistry Externship  
Credits 0.5. 0.5 Other Hours.  
Clinical experiences with historically underserved populations throughout a community dental center, the juvenile justice center, and other public health facilities.

DDD 9090 Pediatric Dentistry  
Credit 1. 1 Lecture Hour.  
Lectures and small-group seminars, including child abuse, practice management, cleft lip/palate and case-based problem-solving exercises.

DDD 9110 Applied Pharmacology  
Credit 1. 1 Lecture Hour.  
Pharmacology in dental practice; therapeutic use of drugs; toxicology; practice in evaluating patient drug histories with special emphasis on drug interactions in patients receiving multiple drug therapy.

DDD 9120 Practice Administration  
Credit 1. 1 Lecture Hour.  
Associateships, other professional practice opportunities, purchasing existing practices; locating and financing a dental practice; taxes and insurance; management, staffing and delegation of duties marketing; Occupational Safety and Health Administration; stress management; third-party consideration.

DDD 9140 Professional Ethics and Dental Jurisprudence  
Credits 0.5. 0.5 Lecture Hours.  
Principles and theory, professional responsibility; case discussion and analysis/decision-making; humanizing health care; virtue ethics; legal aspects of dental practice; state board interactions and policies.

DDD 9160 Senior Seminar  
Credit 1. 1 Lecture Hour.  
Topics and issues of special concern to dental practitioners.

DDD 9190 Advanced Principles of Patient Evaluation  
Credit 1. 1 Lecture Hour.  
Advanced problem-solving for complex dental diagnostic issues; case presentations with focus on medically compromised patients, uncommon dental diseases and treatment planning.

DDD 9200 Comprehensive Care for the Medically Compromised and Special Needs Patients  
Credits 0.5.  
Reviews management and treatment issues relevant to medically compromised and special needs patients. Includes health history, medication issues, treatment planning, material and techniques, clinical management and needs assessment for sedation. The information enhances the students interactions in the special care clinic and the General Dentistry Clinic.

DDD 9210 Advanced Technologies in General Dentistry  
Credits 0.5.  
Utilization of advanced technologies such as radiosurgery, the dental operating microscope, soft tissue lasers, CAD/CAM systems, the Isolite retraction/illumination/aspiration system and the iTero Optical impression system in order to familiarize the students with the operation and use of this equipment prior to use in the clinic.

DDD 9220 Enteral Conscious Sedation and Emergency Protocols  
Credit 1.  
This course will provide information regarding Level 1 permit rules and regulations, physical assessment, pharmacology of enteral agents, local anesthesia/nitrous implications, pediatric assessment and clinical protocols related to the safe delivery of Enteral Conscious Sedation. This course satisfies the didactic requirements for a Level 1: Minimal Sedation Permit in the State of Texas. Must be taken on a satisfactory/unsatisfactory basis.

DDD 9230 Advanced Endodontics Concepts  
Credits 0.5. 6 Lecture Hours.  
Advanced course for senior dental students to broaden their understanding of clinical endodontic concepts including cleaning and shaping techniques, complex diagnoses, obturation systems, irrigation protocols, inter-relationship of endodontics with restorative and periodontal principles, resorption, and National Board review.

Prerequisites: ENDO 7020, ENDO 7024, ENDO 8060.

DDD 9240 National Board Dental Exam Part II Review  
Credit 1. 1 Lecture Hour.  
Formal establishment of a mandatory NBDE II review course in the fall semester of the D4 curriculum; intended outcome of this review is to increase the first-time pass rate on the NBDE II.

Prerequisite: DDDS 7410.

DDD 9250 Managing Cultural Issues in Patient Care  
Credits 0.5. 0.5 Lecture Hours.  
Allows student reflection on care provided to patients who identify with cultures that differ from their own to assess strengths and weaknesses in their ability to provide culturally sensitive care and recognize strategies that can be used to effectively manage similar encounters in the future. Must be taken on a satisfactory/unsatisfactory basis.

ECEN - Electrical & Comp Engr

ECEN 600 Experimental Optics  
Credits 4. 3 Lecture Hours. 2 Lab Hours.  
Hardware, electronic interfaces, and experimental techniques for optics including optical mechanics, component mounting techniques, passive optical components, interferometers and precision alignment, basic electronics including op amps, active optical elements such as acousto-optics, servos in optics, laser intensity stabilization, lock-in amplifier and frequency stabilization.

Prerequisite: Approval of instructor.

ECEN 601 Linear Network Analysis  
Credits 3. 3 Lecture Hours.  
Signal theory treatment of continuous and discrete signals and systems; vector spaces, projection and sampling theories, Fourier, Laplace and Z Transforms.
ECEN 602 Computer Communication and Networking  
Credits 3. 3 Lecture Hours.  
Computer communication and computer networks; use of the International Standards Organization (ISO) seven-layer Open Systems Interconnection model as basis for systematic approach; operational networks to be included in the study of each layer; homework assignments to make use of a campus computer network.  
Prerequisite: ECEN 646 or equivalent probability background.

ECEN 603 Time-frequency Analysis and Multirate Signal Processing  
Credits 3. 3 Lecture Hours.  
Basic functions; short-time Fourier transform; Gabor transform; linear time-scale/time-frequency analysis; time-frequency resolution; Wigner-Ville distribution; Ambiguity function; wavelet series; multi-rate filter bank; orthogonality and biorthogonality; subband coding and pattern recognition.

ECEN 604 Channel Coding for Communications Systems  
Credits 3. 3 Lecture Hours.  
Channel coding for error control, finite field algebra, block codes, cyclic codes; BCH codes; convolutional codes; Trellis coded modulation, including ungerboeck codes and coset codes; performance on gaussian and rayleigh channels; applications to communications systems.  
Prerequisites: Approval of instructor and graduate classification.

ECEN 605 Linear Control Systems  
Credits 4. 3 Lecture Hours. 3 Lab Hours.  
Application of state variable and complex frequency domain techniques to analysis and synthesis of multivariable control systems.  
Prerequisite: ECEN 420 or equivalent.

ECEN 606 Nonlinear Control Systems  
Credits 3. 3 Lecture Hours.  
Techniques available to analyze and synthesize nonlinear and discontinuous control systems. Modern stability theory, time-varying systems, DF, DIF, Lyapunov Theory, adaptive control, identification and design principles for using these concepts; examples from a variety of electronic and electromechanical systems.  
Prerequisite: ECEN 605.

ECEN 607 Advanced Analog Circuit Design Techniques  
Credits 4. 3 Lecture Hours. 2 Lab Hours.  
Design of analog circuits using conventional and non-conventional voltage techniques, including floating gate, bulk driven and enhanced wide swing structures.  
Prerequisite: ECEN 474 or approval of instructor.

ECEN 608/MEEN 674 Modern Control  
Credits 3. 3 Lecture Hours.  
Vector Norms; Induced Operator Norms; Lp stability; the small gain theorem; performance/robustness trade-offs; L1 and Hoo optimal P control as operator norm minimization; H2 optimal control.  
Prerequisite: ECEN 605 or equivalent.  
Cross Listing: MEEN 674/ECEN 608.

ECEN 609/MEEN 675 Adaptive Control  
Credits 3. 3 Lecture Hours.  
Basic principles of parameter identification and parameter adaptive control; robustness and examples of instability; development of a unified approach to the design of robust adaptive schemes.  
Prerequisite: ECEN 605 or approval of instructor.  
Cross Listing: MEEN 675/ECEN 609.

ECEN 610 Mixed-Signal Interfaces  
Credits 4. 3 Lecture Hours. 2 Lab Hours.  
Mixed - Signal Interfaces. Analog-to-digital and digital-to-analog converter architectures including Nyquist rate and oversampled converters; definition of basic data converter specifications and figures of merit; background and foreground calibration techniques to improve performance of data converters; low-power (green topologies) data converters design; state of the art mixed-signal interfaces such as transmitters and receivers front-ends in wireless and wireline communications transceivers; introduction to calibration techniques for digitally-assisted transceivers.  
Prerequisite: ECEN 474 or approval of instructor.

ECEN 611 General Theory of Electromechanical Motion Devices  
Credits 3. 3 Lecture Hours.  
Winding function theory; inductances of an ideal doubly cylindrical machine; inductances of salient-pole machines, reference frame and transformation theory; dynamic equations of electric machines; steady-state behavior of electric machines.  
Prerequisite: Approval of instructor or graduate classification.

ECEN 612 Computer Aided Design of Electromechanical Motion Devices  
Credits 4. 3 Lecture Hours. 3 Lab Hours.  
Magnetic circuits and field distribution of electric machines; main flux path calculation; calculation of magnetizing and leakage inductance; calculation of electric machine losses; principle of design of various electric machines; finite element design of electromechanical motion devices.  
Prerequisite: Approval of instructor or graduate classification.

ECEN 613 Rectifier and Inverter Circuits  
Credits 3. 3 Lecture Hours.  
Analysis/design of single phase, three phase rectifiers; phase control and PWM rectifiers; line harmonics; power factor; harmonic standards; passive and active correction methods; inverters; PWM methods; effect of blanking time; zero voltage switching and multilevel inverter; application of these systems in UPS and AC motor drives.  
Prerequisite: ECEN 438 or approval of instructor.

ECEN 614 Power System State Estimation  
Credits 3. 3 Lecture Hours.  
The large electric power system state estimation problem; issues of network observability; bad measurements detection/identification; sparse matrix vector techniques for computational efficiency.  
Prerequisite: ECEN 460.

ECEN 615 Methods of Electric Power Systems Analysis  
Credits 3. 3 Lecture Hours.  
Digital computer methods for solution of the load flow problem; load flow approximations; equivalents; optimal load flow.  
Prerequisite: ECEN 460 or approval of instructor.

ECEN 616 Power System Electromagnetic Transients  
Credits 3. 3 Lab Hours.  
Modeling of power system components for electromagnetic transient studies; digital computer methods for computation of transients.  
Prerequisites: ECEN 459 and ECEN 460.

ECEN 617 Advanced Signal Processing for Medical Imaging  
Credits 3. 3 Lecture Hours.  
This is a graduate-level course covering several advanced signal processing topics in medical imaging: multi-dimensional signal sampling and reconstruction, bio-signal generation and optimal detection, Fourier imaging, Radon transform-based tomographic imaging, multi-channel signal processing, as well as constrained reconstruction, rapid imaging, image segmentation, registration and analysis.  
Prerequisite: Approval of the instructor.
ECEN 619 Internet Protocols and Modeling
Credits 3.3 Lecture Hours.
Wide spectrum of Internet protocols that make it work; analytical capabilities to evaluate the performance of complex Internet protocols; aspects of the Internet protocols, including principles, design and implementation, and performance modeling and analysis; core components of Internet protocols such as transport (TCP, UDP), network and routing (IP, RIP, OSPF, EGP, BGP-4, etc.).
Prerequisite: Approval of instructor.

ECEN 620 Network Theory
Credits 3.3 Lecture Hours.
Development and application of advanced topics in circuit analysis and synthesis in both the continuous and discrete time and frequency domains.
Prerequisite: ECEN 326 or equivalent.

ECEN 621 Mobile Wireless Networks
Credits 3.3 Lecture Hours.
Foundations of advanced mobile wireless networks, how they are designed, and how well they perform. Topics include fundamentals on mobile wireless networks, TCP/IP over wireless links, fading-channel modeling, CDMA, OFDM, MIMO, error control, IEEE 802.11 protocols, cross-layer optimization, wireless QoS, mobile multicast, VANETs, wireless-sensor networks, wireless networks security.
Prerequisites: Basic-level "Computer Networks" class or consent of instructor.

ECEN 622 Active Network Synthesis
Credits 3.3 Lecture Hours.
Methods of analyzing and synthesizing active networks; sensitivity analysis, methods of rational fraction approximation, OP AMP modeling and stability.
Prerequisite: ECEN 457 or equivalent.

ECEN 625 Millimeter-wave Integrated Circuits
Credits 3.3 Lecture Hours.
Applications of millimeter-wave integrated circuits for wireless transceiver; principles of operation, modeling, design and fabrication of the most common millimeter-wave CMOS, SiGe and RF MEMS circuits.
Prerequisite: Graduate classification; approval of instructor.

ECEN 628 Linear System Theory
Credits 3.3 Lecture Hours.
Application of functional analysis and geometric concepts to the analysis and synthesis of control systems.
Prerequisite: ECEN 605.

ECEN 629 Convex Optimization for Electrical Engineering
Credits 3.3 Lecture Hours.
Introduction of convex optimization including convex set, convex functions, convex optimization problems, KKT conditions and duality, unconstrained optimization, and interior-point methods for constrained optimization; specific application examples in communication/information theory, signal processing, circuit design, and networking, which are based on state-of-art research papers.
Prerequisites: Linear Algebra (familiar with operations over vectors and matrices).

ECEN 630 Analysis of Power Electronic Systems
Credits 3.3 Lecture Hours.
Analysis and control of semiconductor switching power converters using specialized methods such as Fourier series, state-space averaging, time domain transfer functions, sliding mode, quadrometrics and other discontinuous orthogonal functions; application of the above techniques in practice; selected research publications.
Prerequisite: Approval of instructor.

ECEN 631 Fiber-Optic Devices
Credits 3.3 Lecture Hours.
Fiber optic waveguides; directional couplers; polarization; poincare sphere fractional wave devices; PM fiber; interferometric devices and sensors fiber gyroscope; faraday effect devices; multiplexing techniques.
Prerequisite: Approval of instructor.

ECEN 632 Motor Drive Dynamics
Credits 3.3 Lecture Hours.
Mathematical analysis of adjustable speed motor drive dynamics; direct torque control in dc and ac machines; the theory of field orientation and vector control in high performance ac motor drives; motion control strategies based on the above theories; microcomputer, signal and power circuit implementation concepts.
Prerequisite: Approval of instructor.

ECEN 633 Optimum Control Systems
Credits 3.3 Lecture Hours.
Variational approach to the development of algorithms for the solution of optimum control problems; necessary and sufficient conditions, numerical methods, and analysis and comparison of optimal control results to classical theory.
Prerequisite: ECEN 605.

ECEN 635 Electromagnetic Theory
Credits 3.3 Lecture Hours.
Maxwell's equations, boundary conditions, Poynting's theorem, electromagnetic potentials, Green's functions, Helmholtz's equation, field equivalence theorems; applications to problems involving transmission scattering and diffraction of electromagnetic waves.
Prerequisites: ECEN 322; ECEN 351 or equivalent.

ECEN 636 Phased Arrays
Credits 3.3 Lecture Hours.
Theory and application of phased array antennas, radiators and sensors; spatial and spectral domain analysis of phased arrays including element-by-element, infinite array and Fourier methods; applications will include phased arrays, adaptive arrays, and synthesis array antennas; for use in radar, imaging and biomedical treatment and diagnosis.
Prerequisite: ECEN 322 or equivalent.

ECEN 637 Numerical Methods in Electromagnetics
Credits 3.3 Lecture Hours.
Numerical techniques for solving antenna, scattering and microwave circuits problems; finite difference and finite element differential equation methods with emphasis on the method of moments integral equation technique.
Prerequisites: ECEN 351 or ECEN 635; CSCE 203 or equivalent.

ECEN 638 Antennas and Propagation
Credits 3.3 Lecture Hours.
Application of Maxwell's equations to determine electromagnetic fields of antennas; radiation, directional arrays, impedance characteristics, aperture antennas.
Prerequisite: ECEN 351.

ECEN 639 Microwave Circuits
Credits 3.3 Lecture Hours.
Introduction to high frequency systems and circuits; provides background information needed to understand fundamentals of microwave integrated circuits; includes usage of S-parameters, Smith Charts, stability considerations in designing microwave circuits; utilizes CAD program "Super Compact" demonstrating design synthesis optimization and analysis of monolithic devices and circuits.
Prerequisite: Graduate classification.
ECEN 640 Thin Film Science and Technology
Credits 3. 3 Lecture Hours.
Thin film technology in semiconductor industry; topics include the basic growth mechanisms for thin films (growth models, lattice matching epitaxy and domain matching epitaxy), the instrumental aspects of different growth techniques and advanced topics related to various applications.
Prerequisites: Graduate standing.

ECEN 641 Microwave Solid-State Integrated Circuits
Credits 3. 3 Lecture Hours.
Microwave two-terminal and three-terminal solid-state devices; waveguide and microstrip solid-state circuits; theory and design of microwave mixers, detectors, modulators, switches, phase shifters, oscillators and amplifiers.
Prerequisite: ECEN 351.

ECEN 642 Digital Image Processing
Credits 3. 3 Lecture Hours.
Digital Image Processing techniques; stresses filtering, transmission and coding; fast transform techniques; convolution and deconvolution of model noise.
Prerequisites: ECEN 447 and ECEN 601.

ECEN 643 Electric Power System Reliability
Credits 3. 3 Lecture Hours.
Design and application of mathematical models for estimating various measures of reliability in electric power systems.
Prerequisite: ECEN 460 or approval of instructor.

ECEN 644 Discrete-Time Systems
Credits 3. 3 Lecture Hours.
Linear discrete time systems analysis using time domain and transform approaches; digital filter design techniques with digital computer implementations.
Prerequisite: ECEN 601.

ECEN 646 Statistical Communication Theory
Credits 3. 3 Lecture Hours.
Concepts of probability and random process theory necessary for advanced study of communications, stochastic control and other electrical engineering problems involving uncertainty; applications to elementary detection and estimation problems.
Prerequisite: Registration in ECEN 601 or approval of instructor.

ECEN 647 Information Theory
Credits 3. 3 Lecture Hours.
Definition of information; coding of information for transmission over a noisy channel including additive gaussian noise channels and waveform channels; minimum rates at which sources can be encoded; maximum rates at which information can be transmitted over noisy channels.
Prerequisite: ECEN 646 or equivalent probability background.

ECEN 648 Principles of Magnetic Resonance Imaging
Credits 3. 3 Lecture Hours.
Introduction to the theory and design of magnetic resonance imaging systems; fundamental physical and mathematical introduction to image acquisition and reconstruction using magnetic resonance; overview of imaging system design, including magnets, imaging gradients and radio-frequency systems, contrast mechanisms, resolution.
Prerequisite: ECEN 314 or ECEN 322 or approval of instructor.

ECEN 649 Pattern Recognition
Credits 3. 3 Lecture Hours.
Introduction to the underlying principles of classification, and computer recognition of imagery and robotic applications.
Prerequisites: MATH 601 and/or STAT 601 and approval of instructor.

ECEN 650 High Frequency GaAs/SiGe Analog IC Design
Credits 4. 3 Lecture Hours. 3 Lab Hours.
High frequency integrated circuit design using non-conventional technologies such as GaAs and SiGe, with the emphasis on wireless and broadband communication circuits. Device operation, basic building blocks and typical applications.
Prerequisite: ECEN 474 or approval of instructor.

ECEN 651 Microprogrammed Control of Digital Systems
Credits 4. 3 Lecture Hours. 3 Lab Hours.
Hardware and software concepts involved in the design and construction of microprocessor-based digital systems; microprocessor architecture; bussing; interfacing; data input/output; memories; and software development for operation and testing; design projects with microprocessors and related components.
Prerequisites: ECEN 350/CSCE 350 and ECEN 449 or approval of instructor.

ECEN 653 Computer Arithmetic Unit Design
Credits 3. 3 Lecture Hours.
Digital computer arithmetic unit design, control and memory; microprocessor arithmetic logic unit (ALU) design. High-speed addition, subtraction, multiplication and division algorithms and implementations; design and simulation with integrated circuit components and VLSI circuits.
Prerequisite: ECEN 651.

ECEN 654 Very Large Scale Integrated Systems Design
Credits 4. 3 Lecture Hours. 3 Lab Hours.
Design and fabrication of microelectronic circuits such as registers, selectors, PLAs, sequential and microprogrammed machines via large scale integrated circuitry with emphasis on high-level, structured design methods for VLSI systems; design small to medium scale integrated circuits for fabrication by industry.
Prerequisites: ECEN 454 or equivalent undergraduate VLSI course.

ECEN 655 Advanced Topics in Channel Coding
Credits 3. 3 Lecture Hours.
Advanced topics in Channel Coding including turbo codes, low density parity check codes, iterative decoding and applications of iterative decoding principles.
Prerequisite: ECEN 604 or graduate classification.

ECEN 656 Low-Noise Electronic Design
Credits 3. 3 Lecture Hours.
Low-noise design; surveying the subject of handling electronic noise from theory to measurement, design, research and developments.
Prerequisite: Approval of instructor.

ECEN 657 Parallel/Distributed Numerical Algorithms and Applications
Credits 3. 3 Lecture Hours.
A unified treatment of parallel and distributed numerical algorithms; parallel and distributed computation models, parallel computation or arithmetic expressions; fast algorithms for numerical linear algebra, partial differential equations and nonlinear optimization.
Prerequisite: MATH 304 or equivalent.
Cross Listing: CSCE 659/ECEN 659.
ECEN 660 BioMEMS and Lab-on-a-Chip
Credits 3.3 Lecture Hours.
Introduction to lab-on-a-chip technology; microfabrication techniques commonly used in BioMEMs device fabrication; microfluidics miniaturized systems for chemical and biomedical applications such as separation, diagnosis tools, implantable devices, drug delivery, and microsystems for cellular studies and tissue engineering; will gain a broad perspective in the area of miniaturized systems for biomedical and chemical applications.
Prerequisite: Approval of instructor.

ECEN 661 Modulation Theory
Credits 3.3 Lecture Hours.
Optimum receiver principles and signal selection for communication systems with and without coding; system implementation, and waveform communication using realistic channel models.
Prerequisite: ECEN 646.

ECEN 662 Estimation and Detection Theory
Credits 3.3 Lecture Hours.
Probabilistic signal detection theory and parameter estimation theory; Neyman-Pearson, UMP, and locally optimal tests; discrete time Markov processes and the Kalman and Wiener filters; bayesian, maximum likelihood and conditional mean estimation methods.
Prerequisite: ECEN 646.

ECEN 663 Data Compression with Applications to Speech and Video
Credits 3.3 Lecture Hours.
Characterization and representation of waveforms; digital coding of waveforms including PCM, delta modulation, DPCM, tree/trellis coding, runlength coding, sub-band coding and transform coding; rate distortion theoretic performance bounds.
Prerequisites: ECEN 601 and ECEN 646.

ECEN 664 Nanotechnology Fabrication
Credits 3.3 Lecture Hours.
Cutting edge nanostructure fabrication techniques for both top-down and bottom up approaches.
Prerequisite: Approval of instructor.

ECEN 665 Integrated CMOS RF Circuits and Systems
Credits 4.3 Lecture Hours. 2 Lab Hours.
Introduction to wireless communication systems at the theoretical, algorithmic and circuit levels; emphasis on simulation at the architecture, transistor levels of the communication systems; focus on circuits implementable on CMOS and BiCMOS technologies.
Prerequisites: ECEN 453, ECEN 456, ECEN 474.

ECEN 666 Power System Faults and Protective Relaying
Credits 3.3 Lecture Hours.
Calculation of power system currents and voltages during faults; protective relaying principles, application and response to system faults.
Prerequisite: ECEN 460 or approval of instructor.

ECEN 667 Power System Stability
Credits 3.3 Lecture Hours.
Steady-state, dynamic and transient stability of power systems; solution techniques; effect of generator control systems.
Prerequisite: ECEN 460 or approval of instructor.

ECEN 668 High Voltage Direct Current (HVDC) Transmission
Credits 3.3 Lecture Hours.
Overview of HVDC systems; comparison of AC and DC power transmission; study of six-pulse and twelve-pulse power converters; analysis and control of HVDC systems; harmonics and power factor effects; system faults and misoperations; state of the art and future developments in HVDC technology; inspection trips.
Prerequisite: Approval of instructor.

ECEN 669 Engineering Applications in Genomics
Credits 3.3 Lecture Hours.
Tutorial introduction to the current engineering research in genomics. The necessary Molecular Biology background is presented and techniques from signal processing and control are used to (i) unearth intergene relationships (ii) model genetic regulatory networks and (iii) alter their dynamic behavior.
Prerequisite: ECEN 605 or approval of instructor.

ECEN 670 Fiber Optic Networks
Credits 3.3 Lecture Hours.
Components, topologies and architecture for communication networks based on the optical fiber transmission medium; examples based on recent publications in technical literature.
Prerequisite: Graduate classification.

ECEN 671 Solid State Devices
Credits 3.3 Lecture Hours.
Development of mathematical analysis and systematic modeling of solid state devices; relationships of measurable electrical characteristics to morphology and material properties of solid state devices, p-n junction, bipolar and unipolar transistors.
Prerequisite: ECEN 656 or approval of instructor.

ECEN 674/PHYS 674 Introduction to Quantum Computing
Credits 3.3 Lecture Hours.
Introduces the quantum mechanics, quantum gates, quantum circuits and quantum hardware of potential quantum computers; algorithms, potential uses, complexity classes, and evaluation of coherence of these devices.
Prerequisites: MATH 304, PHYS 208.
Cross Listing: PHYS 674/ECEN 674.

ECEN 675 Integrated Optoelectronics
Credits 3.3 Lecture Hours.
Light propagation and interactions in anisotropic media; electrooptic and acoustooptic effects; passive and active guided-wave devices; fabrication and characterization.
Prerequisite: ECEN 464 or equivalent.

ECEN 676/CSCE 676 Advanced Computer Architecture
Credits 3.3 Lecture Hours.
Design of advanced computers for parallel processing; emphasis on the overall structure; interconnection networks; including single-stage and multi-stage structures; shared memory and message passing architectures; control-flow and demand-driven programming; multithreaded architectures; fine-grain and coarse-grain parallelism; SIMD and MIMD; processor designs for parallel operation.
Prerequisite: ECEN 651 or CSCE 614 or approval of instructor.
Cross Listing: CSCE 676.

ECEN 677 Control of Electric Power Systems
Credits 3.3 Lecture Hours.
Modeling, analysis and real-time control of electric power systems to meet the requirements of economic dispatch of voltage and power.
Prerequisite: Approval of instructor.
ECEN 679 Computer Relays for Electric Power Systems  
Credits 3. 3 Lecture Hours.
Real-time digital computer application to protective relaying; extensive overview of digital protection algorithms; latest technological advancements as microprocessor-based relays, fiber-optic communication systems, unconventional instrument transformers, dynamic testing tools and methodologies.  
Prerequisite: Approval of instructor.

ECEN 680/CSCE 680 Testing and Diagnosis of Digital Systems  
Credits 3. 3 Lecture Hours.
The theory and techniques of testing VLSI-based circuits and systems, and design for testability.  
Prerequisites: ECEN 220 or ECEN 248 or equivalent; ECEN 350/CSCE 350 or CSCE 321 or equivalent.  
Cross Listing: CSCE 680/ECEN 680.

ECEN 681 Seminar  
Credit 1. 1 Lecture Hour.
Reports and discussion of current research and of selected published technical articles. May be taken four times for credit.  
Prerequisite: Graduate classification in electrical and computer engineering.

ECEN 683 Wireless Communication Systems  
Credits 3. 3 Lecture Hours.
Wireless applications, modulation formats, wireless channel models and simulation techniques, digital communication over wireless channels, multiple access techniques, wireless standards.  
Prerequisite: ECEN 646 or approval of instructor.

ECEN 684 Professional Internship  
Credits 1 to 4. 1 to 4 Other Hours.
Engineering research and design experience at industrial facilities away from the Texas A&M campus; design projects supervised by faculty coordinators and personnel at these locations; projects selected to match student's area of specialization.  
Prerequisites: Graduate classification and one semester of coursework completed.

ECEN 685 Directed Studies  
Credits 1 to 12. 1 to 12 Other Hours.
Research problems of limited scope designed primarily to develop research technique.  

ECEN 686 Electric and Hybrid Vehicles  
Credits 3. 3 Lecture Hours.
Fundamental concepts of electric and hybrid-electric vehicles introduced, component requirements and system design methodologies discussed; vehicle system analysis and simulation methods presented.  
Prerequisite: Graduate classification or approval of instructor.

ECEN 687 Introduction to VLSI Physical Design Automation  
Credits 3. 3 Lecture Hours.
Algorithms and techniques for VLSI design automation, including basic optimization techniques, high level synthesis, logic synthesis/verification, physical design, timing verification and optimization.  
Prerequisite: ECEN 248.

ECEN 688 IC MEMS and Sensor Fabrication  
Credits 4. 3 Lecture Hours. 3 Lab Hours.
Fundamental unit processes for the fabrication of silicon IC's and extension of these processes to the specialized micro-machining operations used for MEMS and sensor fabrication; basic process operations used in the laboratory to build simple IC structures; devices then characterized.  
Prerequisite: ECEN 325, ECEN 370, or approval of instructor.

ECEN 689 Special Topics in...  
Credits 1 to 4. 1 to 4 Lecture Hours. 0 to 4 Lab Hours.
Advanced topics of current interest in electrical engineering. May be repeated for credit.  
Prerequisite: Approval of instructor.

ECEN 691 Research  
Credits 1 to 23. 1 to 23 Other Hours.
Research for thesis or dissertation.

ECEN 694 Nanobiotechnology  
Credits 3. 3 Lecture Hours.
Introduction to advances in nanobiotechnology; includes fabrication of micro or nano structures, molecular manipulation, medical diagnostic and treatment options, nano scale machines such as molecular motors for drug delivery.  
Prerequisite: Graduate classification; approval of instructor.

ECEN 696 Erbium-Doped Amplifier: Technology and Applications  
Credits 3. 3 Lecture Hours.
Prerequisite: ECEN 370 or approval of instructor.

ECEN 699 Advances in VLSI Logic Synthesis  
Credits 3. 3 Lecture Hours.
Logic representation, manipulation, and optimization; combinational and sequential logic; Boolean function representation schemes; exact and heuristic two-level logic minimization; multi-valued logic representation and manipulation; multi-level logic representation and minimization; testing; technology mapping.  
Prerequisites: Approval of instructor and graduate classification.

ECEN 704 VLSI Circuit Design  
Credits 4. 3 Lecture Hours. 3 Lab Hours.
Analysis and design of monolithic analog and digital integrated circuits using NMOS, CMOS and bipolar technologies; device modeling; CAD tools and computer-aided design; design methodologies for LSI and VLSI scale circuits; yield and economics; test and evaluation of integrated circuits.

Prerequisites: Approval of instructor.

ECEN 710 Switching Power Supplies  
Credits 3. 3 Lecture Hours.
Operating principles of switching power supplies; analysis and in-depth design of several types of switching regulators including buck, boost, forward, flyback, half and full bridge switching regulator analysis; elements of transformer and magnetic design; state space analysis and feedback loop stabilization principles; application of these in the industry.  
Prerequisites: ECEN 438 or equivalent, approval of instructor.
ECEN 711 Sustainable Energy and Vehicle Engineering  
Credits 3.3 Lecture Hours.  
Forms of sustainable and unsustainable energy resources and the basic system engineering limits of each; specific problems of sustainable transportation energy on the bases of vehicle and power engineering; issues related to energy efficiency, life cycle analysis, global warming, pollution, economic and social considerations.  
Prerequisite: Graduate classification in engineering.

ECEN 712 Power Electronics for Photovoltaic Energy Systems  
Credits 3.3 Lecture Hours.  
Sustainable energy sources such as photovoltaic, fuel cell, wind, and others require power electronics to perform energy conversion and conditioning in order to convert their native form of electrical generation to a format compatible with the ac utility grid; exploration of the salient electrical characteristics of solar photovoltaic sources, the requirements for grid-connection and the power electronic circuits and controls needed to perform the interconnection and control.  
Prerequisite: ECEN 438 or instructor approval.

ECEN 714 Digital Integrated Circuit Design  
Credits 3.2 Lecture Hours. 2 Lab Hours.  
Analysis and design of digital devices and integrated using MOS and bipolar technologies and computer aided simulation.  
Prerequisite: Graduate classification.

ECEN 715 Physical and Economical Operations of Sustainable Energy Systems  
Credits 3.3 Lecture Hours.  
Operational issues for sustainable electric energy systems; basic relevant topics in engineering, optimization and economic concepts; modular view of individual electric energy processing components; physical and market operations in electricity industry in support of sustainable energy integration; computer simulations and demonstrations to create and evaluate examples of power systems.  
Prerequisite: ECEN 214, ECEN 420, ECEN 460 or approval of instructor.

ECEN 720 High-Speed Links Circuits and Systems  
Credits 4.3 Lecture Hours. 3 Lab Hours.  
System and circuit design of high-speed electrical and optical link systems; includes channel properties, communication techniques, and circuit design of drivers, receivers, equalizers, and synchronization systems; project consists of link design with a statistical bit error rate simulator and interface circuit design.  
Prerequisite: ECEN 474.

ECEN 730 CMOS RFIC Engineering  
Credits 3.3 Lecture Hours.  
Introduction to CMOS radio-frequency integrated circuits (RFICs) and wireless systems and networks; theory, analysis and design of RFICs using CMOS technologies; CMOS fundamentals (device, principle, models); scattering parameters, transmission lines, distributed structures, lumped elements, impedance matching, RFIC layout, processing, test, amplifiers, oscillators, mixers; CAD programs for CMOS RFIC design.  
Prerequisites: ECEN 322 and graduate classification.

ECEN 735 Electromagnetic Field Theory  
Credits 3.3 Lecture Hours.  
Methods in wave propagation, diffraction and scattering analysis, including surface waves, creeping waves, surface plasmons and complex environments; applications to macroscopic and nano technology such as optical wave propagation in materials and wireless device wave propagation.  
Prerequisite: ECEN 635 or equivalent.

ECEN 741 Electronic Motor Drives  
Credits 4.3 Lecture Hours. 3 Lab Hours.  
Application of semiconductor switching power converters to adjustable speed DC and AC motor drives; steady state theory and analysis of electric motion control in industrial, robotic and traction systems; laboratory experiments in power electronic motor drives and their control.  
Prerequisite: Graduate classification.

ECEN 749 Microprocessor Systems Design  
Credits 3.2 Lecture Hours. 2 Lab Hours.  
Introduction to microprocessors; 16/32 bit single board computer hardware and software designs; chip select equations for memory board design, serial and parallel I/O interfacing; ROM, static and dynamic RAM circuits for no wait-state design; assembly language programming, stack models, subroutines, and I/O processing.  
Prerequisite: Graduate classification.

ECEN 750 Design and Analysis of Communication Networks  
Credits 3.3 Lecture Hours.  
Analytical approach to understanding resource allocation on the Internet; study the system in a global sense, and use a deterministic approach to study congestion control protocols; study individual queues and routers, and use a stochastic approach to understanding system performance.  
Prerequisite: ECEN 646 or some probability background.

ECEN 751 Computational Methods for Integrated System Design  
Credits 3.3 Lecture Hours.  
Integrated circuit design in a computational standpoint; VLSI circuit simulation, interconnect modeling and analysis, design and analysis of IC subsystems, parallel computing techniques for complex system design.  
Prerequisite(s): ECEN 454, ECEN 474 or equivalent.

ECEN 752 Advances in VLSI Circuit Design  
Credits 3.3 Lecture Hours.  
Gate and wire delays, CMOS transistors, DC and AC characteristics, VLSI fabrication, Static, Dynamic, Pass-gate and PLA implementation styles, SOI and GaAs technology, DRAM, SRAM and FLASH memory design, leakage and dynamic power, sub-threshold computation, clocking, transmission lines, packaging, off-chip IO, process variation and compensation, radiation tolerance.  
Prerequisite(s): Graduate classification or Instructor approval.

ECEN 753 Theory and Applications of Network Coding  
Credits 3.3 Lecture Hours.  
Fundamentals of network coding: concepts, models, linear and non-linear codes, code design, random and deterministic codes; wireless network coding; network coding for storage; practical implementations; current research trends.  
Prerequisite: Graduate classification or approval of instructor.

ECEN 754 Optimization for Electrical and Computer Engineering Applications  
Credits 3.3 Lecture Hours.  
Principles of optimization including linear and nonlinear optimization as well as electrical and computer engineering applications in signal estimation, routing in communication networks, flows in wireless networks, wafer fabrication plants, and economic dispatch in power systems.  
Prerequisites: MATH 304 or MATH 309 or MATH 311; MATH 251 or graduate classification.
ECEN 755 Stochastic Systems
Credits 3. 3 Lecture Hours.
Prerequisites: Undergraduate level probability theory; basic programming skill in any programming language (C, C++, Python, Matlab, etc.).

ECEN 760 Introduction to Probabilistic Graphical Models
Credits 3. 3 Lecture Hours.
Broad overview of various probabilistic graphical models, including Bayesian networks, Markov networks, conditional random fields, and factor graphs; relevant inference and learning algorithms, as well as their application in various science and engineering problems will be introduced throughout the course.
Prerequisites: Approval of instructor.

ECEN 761 Biosensors Lab
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Biosensors Lab is a hands on experience in basic concepts of biosensing and how to make miniaturized biosensors; various application examples associated with these sensing principles.
Prerequisite: Approval of instructor.

ECEN 762 Ultrasound Imaging
Credits 3. 3 Lecture Hours.
Covers mathematical analysis of wave propagation, scattering of ultrasound in biological tissues, electronic transducer arrays for the beam forming, models of the received signals and signal processing methods for medical ultrasound imaging of tissues. Research papers related to fundamental ultrasound imaging concepts are discussed throughout the course.
Prerequisite: Approval of instructor.

ECEN 763/BMEN 627 Magnetic Resonance Engineering
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Design, construction and application of instrumentation for MR Imaging; fundamentals of the architecture if an MR spectrometer and the gradient subsystem used for image localization; emphasis on the radiofrequency sensors and systems used for signal generation and reception.
Prerequisite(s): ECEN 410, or ECEN 411, BMEN 420, or equivalent, or approval of instructor.
Cross Listing: BMEN 627/ECEN 763.

ECEN 774 Medical Imaging
Credits 4. 3 Lecture Hours. 2 Lab Hours.
Physics and signals in medical imaging systems; focus on magnetic resonance imaging, x-ray computer tomography, ultrasonography, nuclear medicine imaging and optical imaging; includes system architecture, source generation, energy-tissue interaction, image formation and clinical examples.
Prerequisite: ECEN 314 or equivalent, or approval of instructor.

ECEN 775/ECMT 670 Mathematical Economics I
Credits 3. 3 Lecture Hours.
Undergraduate level probability theory; basic programming skill in any programming language (C, C++, Python, Matlab, etc.).

ECEN 777 Fluctuations and Noise Electronics
Credits 3. 3 Lecture Hours.
Introduction to the research of Noise and Fluctuations; Noise and Fluctuations in electronics and other systems include virtually all scientific fields, including secure and non-secure communications, microprocessors, quantum information, mesoscopic systems, chemical sensing, corrosion diagnostics, neuro- and membrane-biology, biomedicine, etc.
Prerequisite: Approval of instructor.

ECEN 779 Introduction to Nanophotonics
Credits 3. 3 Lecture Hours.
Optical power and spectral measurements of singlemode and multimode optical fibers, hands-on arc fusion splicing, lasers, amplifiers, interferometrs, photodetectors, integrated optics, fiber-optics, fiber-optic devices, optical modulators.
Prerequisites: Equivalent of ECEN 322 and ECEN 370 or approval of instructor.

ECMT - Econometrics

ECMT 660 Mathematical Economics I
Credits 3. 3 Lecture Hours.
Use of selected types of mathematical tools in economic theory.

ECMT 669 Fundamental Mathematics for Economists
Credits 2. 2 Lecture Hours.
Mathematics of nonlinear programming; applications to micro-theoretic models of demand and production; fundamental results from matrix theory and multivariate differential calculus; systems of differential equations and stability analysis and their economic applications.

ECMT 670 Econometric Analysis of Financial Data
Credits 3. 3 Lecture Hours.
Predictability of asset returns, test of random walk hypothesis, the microstructure of securities markets, event analysis, the CAPM and arbitrage pricing theory, the term structure of interest rates, dynamic models of economic equilibrium and nonlinear financial models; provides an accessible combination of theory and practice.
Prerequisites: Graduate classification; must be enrolled in the department of economics master's program; approval of director of master's program.
ECMT 673 Economic Analytics
Credits 3. 3 Lecture Hours.
Analysis of large household, corporate and financial data involving empirical modeling and SAS programming for prediction of economic decisions and outcomes; lecture, discussion and team project presentation format.
Prerequisite: Graduate classification and enrollment in the master's program in economics.

ECMT 674 Economic Forecasting
Credits 3. 3 Lecture Hours.
Empirical application of econometric techniques to prediction in economics; model building and specification; examination of various modern forecasting techniques.
Prerequisites: Graduate classification; must be enrolled in the MS program in the department of economics; or approval of instructor.

ECMT 675 Econometrics I
Credits 3. 3 Lecture Hours.
Empirical distributions of economic variables; elementary discrete and continuous distributions expressing econometric hypotheses, distributions of estimators and test statistics.
Prerequisites: MATH 151 and MATH 152 or approval of instructor.

ECMT 676 Econometrics II
Credits 3. 3 Lecture Hours.
Use of statistics in economic theory as device for testing hypotheses, formulation of concepts and economic forecasting; regression analysis in economics problems, heteroskedasticity, autocorrelation, distributed lags, regressions with lagged dependent variable, dummy variables and in introduction to multi-equations economics models.
Prerequisite: ECMT 675 or equivalent.

ECMT 677 Applied Microeconometrics
Credits 3. 3 Lecture Hours.
Estimation methods applied to economic problems; techniques include single and simultaneous equations models; general linear model in matrix form; tests of linear restrictions; Wald, Likelihood Ratio and Lagrange Multiplier tests; seemingly unrelated regressions, simultaneous equations identification and estimation; missing observations, errors in variables and non-linear estimation in economics problems.
Prerequisites: ECMT 675 and ECMT 676; STAT 610 or approval of instructor.

ECMT 678 Nonparametric Econometrics
Credits 3. 3 Lecture Hours.
Continuation of ECMT 677. Estimation methods applied to economic problems; techniques include qualitative limited dependent variables; pooled time-series and cross-section data; instrumental variables in economics problems. May repeated for credit.
Prerequisite: ECMT 677.

ECMT 679 Time Series Econometrics
Credits 3. 3 Lecture Hours.
Advanced topics in time series econometrics, including ARMA models, unit roots and cointegration.
Prerequisite: ECMT 677.

ECMT 680 Financial Econometrics
Credits 3. 3 Lecture Hours.
Basic concepts of financial engineering and elementary theory of stochastic processes and continuous time models; selected topics related to current financial econometrics research.

ECON - Economics

ECON 603 Public Economics I
Credits 3. 3 Lecture Hours.
Economics of taxation and public spending; theoretical and empirical analysis of the shifting and incidence of income, commodity and property taxes; models of optimal taxation and public spending; analysis of taxation and spending in a federal system of government.
Prerequisite: Approval of instructor.

ECON 604 Public Economics II
Credits 3. 3 Lecture Hours.
Economics of collective action; theoretical and empirical analysis of externalities; externalities and public policy; the demand and supply of public goods; economic analysis of alternative systems of public choice; models of bureaucratic behavior.
Prerequisite: ECON 629 or approval of instructor.

ECON 607 Foundations of Microeconomic Theory
Credits 3. 3 Lecture Hours.
Examination of positive and normative analysis in economic theory; emphasis on policy applications of the theory.
Prerequisites: MATH 131 or equivalent; ECON 323 or equivalent; or approval of instructor.

ECON 609 Human Resource Economics I
Credits 3. 3 Lecture Hours.
Valuation and allocation of human resources; labor supply of households, labor supply over the life-cycle, determination of wages, human capital, migration, education, labor markets and population; use of the testable implications of theory and of evidence to explain observed labor market behavior.
Prerequisite: ECON 629 or equivalent.

ECON 610 Human Resource Economics II
Credits 3. 3 Lecture Hours.
Selected topics in labor markets; unemployment, earnings differentials, effects of occupational licensing, trade unions, income distribution, military manpower and the draft, effects of minimum wage and equal pay provisions, effects of welfare programs, the professional athlete's labor market and others; developing and analyzing empirical problems.
Prerequisite: ECON 629 or equivalent.

ECON 611 Foundations of Macroeconomic Theory
Credits 3. 3 Lecture Hours.
Development of modern static national income analysis from general equilibrium system; roles of fiscal and monetary policy in promoting economic stability.
Prerequisites: ECON 323 and ECON 410; MATH 131 or equivalent.

ECON 612 Money, Banking and Financial Markets
Credits 3. 3 Lecture Hours.
Role of financial markets and institutions in the allocation of resources in the real economy; the financial regulatory and policy infrastructure underlying financial activity to promote efficiency in asset valuation, risk management and economic growth.
Prerequisites: Graduate classification; enrolled in the department of economics master's program or approval of director of master's program.
ECON 614 Economics of Microfinance
Credits 3.3 Lecture Hours.
Analysis of recent research in financial markets in developing countries with a primary emphasis on microfinance; micro-asymmetries involved in lending; financial impact studies; the macro-economic literature on financial development and growth.
Prerequisites: ECON 607 or equivalent; graduate major in the Department of Economics’ master’s program or approval of director of master’s program.

ECON 617 Economics of the Multinational Firm
Credits 3.3 Lecture Hours.
Economics of the multinational firm, taking a firm-level approach to the study of international investment; structured around recent papers from the frontier of international trade research; examination of trends in multinational activity and exploration of the reasons behind decisions to invest abroad including understanding different types of foreign direct investment; the impact of multinational firms and how government policies impact foreign direct investment (FDI), including an overview of transfer pricing and the arm’s length principle.
Prerequisites: Graduate classification; enrolled in the department of economics master’s program.

ECON 618 Behavioral Financial Economics
Credits 3.3 Lecture Hours.
Describes how individuals and firms make financial decisions that deviate from those predicted by traditional financial or economic theory; examines how the insights of behavioral finance complement the traditional finance paradigm.
Prerequisites: Graduate classification; must be enrolled in the master’s program in the department of Economics.

ECON 629 Microeconomic Theory I
Credits 3.3 Lecture Hours.
Core ideas in theoretical microeconomics; theory of consumer and firm; theory of competitive output and factor markets.
Prerequisite: Approval of instructor.

ECON 630 Microeconomic Theory II
Credits 4.4 Lecture Hours.
Advanced treatment of consumer and production theory; game theory; general equilibrium and welfare analysis.
Prerequisites: ECON 629; ECMT 660.

ECON 631 Microeconomic Theory III
Credits 3.3 Lecture Hours.
Advanced theoretical microeconomics; comprehensive study of consumer and producer theory, general equilibrium and welfare, and failures of the competitive model.
Prerequisites: ECON 629 and ECON 630.

ECON 632 Microeconomic Theory IV
