Purpose of Catalogs

The Undergraduate and Graduate and Professional catalogs provide information about the academic programs of Texas A&M University to students, prospective students, faculty and staff of the University. Included is information concerning admissions, academic regulations and requirements, services available to students, academic offerings and a list of the administrative officers and faculty of the University. While every effort has been made to make this catalog as complete and accurate as possible, changes may occur at any time in requirements, deadlines, fees, curricula and courses listed in these catalogs.

Students should refer to Howdy, for course offerings in any given semester. For administrative reasons, because of insufficient enrollment or because of limited resources, any given course might not be offered in the announced semester.

This catalog was prepared in advance of its effective date; therefore, the course descriptions may vary from actual course content. The provisions of the catalogs do not constitute a contract, express or implied, between any applicant, student, faculty or staff member of Texas A&M University or The Texas A&M University System. These catalogs are for informational purposes only. The University reserves the right to change or alter any statement herein without prior notice. Neither catalog should be interpreted to allow a student who begins his or her education under either catalog to continue the program under the provisions in that catalog.

Accreditation

Texas A&M University is accredited by the Southern Association of Colleges and Schools Commission on Colleges to award degrees at the baccalaureate, masters, doctorate and professional levels. Contact the Commission on Colleges at 1866 Southern Lane, Decatur, Georgia, 30033-4097, or call 404-679-4500, for questions about the accreditation of Texas A&M University.

The agricultural journalism curricula is accredited by the Accrediting Council on Education in Journalism and Mass Communication.

The agricultural systems management curriculum is recognized by the American Society of Agricultural and Biological Engineers.

The dietetic track in the nutritional sciences curriculum and the dietetic internship program are accredited by the Commission on Accreditation for Dietetics Education.

The food science and technology curriculum is approved by the Institute of Food Technologists.

The forensics and investigative sciences program is accredited by the Forensic Science Education Programs Accreditation Commission (FEPAC).

The curriculum in forestry is accredited by the Society of American Foresters and the curriculum in rangeland ecology and management is accredited by the Society for Range Management.

The curriculum in recreation, park and tourism sciences is accredited by the National Recreation and Park Association.

The curriculum in architecture is accredited by the National Architectural Accrediting Board; the curriculum in urban and regional planning is accredited by the Planning Accreditation Board; the curriculum in landscape architecture is accredited by the Landscape Architectural Accreditation Board; and the curriculum in construction science is accredited by the American Council for Construction Education.

The business baccalaureate, master’s, and doctoral programs in Mays Business School are accredited by the Association to Advance Collegiate Schools of Business (AACSB).

Within the Dwight Look College of Engineering, the undergraduate programs in aerospace, biological and agricultural, biomedical, chemical, civil, computer, electrical, industrial, mechanical, nuclear, ocean, petroleum and radiological health engineering are accredited by the Engineering Accreditation Commission of ABET (http://www.abet.org).

The electronic systems engineering technology program and the manufacturing and mechanical engineering technology program are accredited by the Engineering Technology Accreditation Commission of ABET (http://www.abet.org).

The computer science program is accredited by the Computing Accreditation Commission of ABET (http://www.abet.org).

The Master of Public Service and Administration degree in the Bush School of Government and Public Service is accredited by the National Association of Schools of Public Affairs and Administration.

The degree programs in dentistry and dental hygiene and the certificate programs in the ten advanced dental graduate education programs are accredited by the Commission on Dental Accreditation. (CODA)

The medical education degree program is fully accredited by the Liaison Committee on Medical Education.

The nursing degree programs are accredited by the Commission on Collegiate Nursing Education and the Texas Board of Nursing.

The pharmacy professional degree program is accredited by the Accreditation Council for Pharmacy Education.

The School of Public Health degree programs are accredited by the Council on Education for Public Health and the Master of Health Administration is accredited by the Commission on Accreditation of Healthcare Management Education.

Texas A&M University School of Law is accredited by the Council of the Section of Legal Education and Admissions to the Bar of the American Bar Association, 321 N. Clark Street, Chicago, Illinois, 60610, 800-285-2221.

The English Language Institute is accredited by the Commission on English Language Program Accreditation (CEA) (http://cea-accredit.org).

Programs in professional education and degrees conferred by Texas A&M University are approved by the State Board of Educator Certification and the Texas Education Agency for certification purposes.

The clinical psychology program in the Department of Psychology and the counseling psychology and school psychology program in the Department of Educational Psychology are accredited by the American Psychological Association.

The veterinary medicine degree program is accredited by the American Veterinary Medical Association Council on Education.
Other accrediting agencies which have approved programs offered at the university are the American Chemical Society, and the American Society of Agricultural and Biological Engineers.
All dates are subject to change.

- Last day of first term classes.

July 4
- Independence Day.

July 5
- First term final examinations.

July 8
- First term final grades due in the Office of the Registrar, noon.

July 11
- Last day to apply for degrees to be awarded in August without a late fee.

2016 Summer Term II

May 18
- Graduation application opens for all students planning to graduate in August 2016.

July 5
- Last day to register for the second term semester classes, 5 p.m.
- Refer to http://sbs.tamu.edu for tuition and fee due dates.

July 6
- First day of second term classes.

July 11
- Last day for adding/dropping courses for the second term, 5 p.m.
- Last day to apply for degrees to be awarded in August without a late fee.
July 26
Last day for all students to drop courses with no penalty (Q-drop) for the second term, 5 p.m.
Last day to change Kinesiology 198/199 grade type for the second term, 5 p.m.
Last day to officially withdraw from the University for the second term, 5 p.m.

August 8
Last day of second term classes.
Last day to apply for all degrees awarded in August.

August 9
Second term final examinations for all students.

August 11
Grades for degree candidates from departments due in Office of the Registrar, noon.

August 12
Commencement and Commissioning.
Last day for August undergraduate degree candidates to apply for Tuition Rebate, 5 p.m.

August 13
Texas A&M University at Galveston Commencement.

August 15
Final grades for second term due in Office of the Registrar, noon.

2016 10-Week Summer Semester

May 18
Graduation application opens for all students planning to graduate in August 2015.

May 27
Last day to register for 10-week semester classes, 5 p.m.
Refer to http://sbs.tamu.edu for tuition and fee due dates.

May 30
Memorial Day. Faculty and Staff holiday.

May 31
First day of 10-week semester classes.

June 3
Last day for adding/dropping courses for the 10-week semester, 5 p.m.

July 4
Independence Day.

July 5
No 10-week semester classes.

July 11
Last day to apply for degrees to be awarded in August without a late fee.

July 20
Last day for all students to drop courses with no penalty (Q-drop) for the 10-week semester, 5 p.m.
Last day to officially withdraw from the University for the 10-week semester, 5 p.m.

August 8
Last day of 10-week semester classes.
Last day to apply for all degrees awarded in August.

August 9-10
10-week semester final examinations for all students.

August 11
Grades for degree candidates from departments due in Office of the Registrar, noon.

August 12
Commencement and Commissioning.

August 13
Texas A&M University at Galveston Commencement.

August 15
Final grades for 10-week semester due in Office of the Registrar, noon.

2016

June 8
Summer clinic begins.

June 9
QA/RM Program (D3-D4 and DH Sr.) – clinics closed from 1:00 p.m. – 4:00 p.m.

June 11
4th class day – census date – DDS and DH.

June 24
Graduate students – tuition and fee payment due by 5 p.m.

June 25-26
New Graduate Student Orientation.

June 26
15th class day – DDS and DH.

June 29
Summer graduate session begins.

June 30
Graduate Core Courses begin.

July 2
4th class day – census date - Graduates.

July 4
Independence Day. Holiday.

July 17
Summer clinic ends, Dental and Dental Hygiene.

July 20
15th class day – Graduates.

July 21
Summer session grades due by noon – Dental and Dental Hygiene courses.

August 12
DDS (D1,D2) DH1, DH2, Graduate students – tuition and fee payment due by 5 p.m.

August 10-14
Monday – Friday 8:30 a.m., Orientation, fall semester first year Dental and Dental Hygiene students.

August 10
First year dental registration.

August 14
Second year Dental DDS Instrument Distribution (ATTENDANCE MANDATORY).

August 14
Summer graduate session ends.

August 17
Fall semester begins, 8 a.m.

August 18
Summer graduate grades due by noon.

September 1
12th class day – census date – all students.

September 7
Labor Day. Holiday.

September 14
20th class day.

November 23-27
Fall semester recess.

November 26
Thanksgiving Day. Holiday.

December 11
Fall semester instruction ends.

December 14-18
Fall semester examination period.

December 18
Holiday recess begins, 5 p.m.

December 19
Award MS and PhD degrees.

December 25
Christmas Day. Holiday.

2015

June 3
DDS (D3, D4), DH2 students – tuition and fee payment due by 5 p.m.

Texas A&M Baylor College of Dentistry Academic Calendar

2015

June 3
DDS (D3, D4), DH2 students – tuition and fee payment due by 5 p.m.

January 1
New Year's Day. Holiday.

January 5
Fall semester grades due by noon.

January 6
DDS (All), DH1, DH2, Graduate students – tuition and fee payment due by 5 p.m.

January TBD
Faculty Retreat.

January 11
Spring semester begins, 8 a.m.

January 18
Martin Luther King Jr. Day. Holiday.

January 27
12th class day – census date – all students.

February TBD
Mock Boards – fourth year Dental (TBD).

February 8
20th class day.

March 14-18
Spring semester recess.

March 19
Last day to submit final approved copies of thesis.

April TBD
Scholars Day – clinic closed for DDS/DH.

April-May TBD
WREB Exam – fourth year and Senior Dental Hygiene (TBD).

Board of Regents and Administrative Officers

Board of Regents

Cliff Thomas, Chairman - Victoria
Elaine Mendoza, Vice Chairman - San Antonio
Phil Adams - Bryan/College Station
Robert L. "Bob" Albritton - Fort Worth
Anthony G. Buzbee - Houston
Morris E. Foster - Austin
William "Bill" Mahomes, Jr. - Dallas
Judy Morgan - Texarkana
Charles W. Schwartz - Houston
Alvaro "Gabe" Pereira (Student Regent) - College Station
Vickie Burt Spillers - Executive Secretary to the Board of Regents

Chancellor - John Sharp

Texas A&M University Administrative Officers

President - Michael K. Young
Provost and Executive Vice President - Karan L. Watson

Dean, College of Agriculture and Life Sciences - Mark A. Hussey
Dean, College of Architecture - Jorge A. Vanegas
Dean, Mays Business School - Eli Jones
Dean, Texas A&M Baylor College of Dentistry - Lawrence E. Wolinsky
Dean, College of Education and Human Development - Joyce M. Alexander
Dean, Dwight Look College of Engineering - M. Katherine Banks
Dean, College of Geosciences - Kate C. Miller
Dean, Bush School of Government and Public Service - Ryan C. Crocker
Dean, Texas A&M University School of Law - Andrew P. Morriss
Dean, College of Liberal Arts - Pamela R. Matthews
Dean, College of Medicine (interim) - Paul E. Ogden
Dean, College of Nursing - Sharon Wilkerson
Dean, Irma Lerma Rangel College of Pharmacy - Indra K. Reddy
Dean, School of Public Health - Jay Maddock
Dean, College of Science - Meigan C. Aronson
Dean, College of Veterinary Medicine and Biomedical Sciences - Eleanor M. Green
Dean, Texas A&M University Libraries - David H. Carlson
Dean, Texas A&M University at Qatar - Mark H. Weichold

Executive Vice President, Texas A&M Health Science Center (interim) - Paul E. Ogden
Vice Provost - Michael J. Benedik
Vice President and Associate Provost for Diversity - Christine A. Stanley
Vice President for Finance and Administration - Jerry R. Strawser
Vice President for Government Relations - Michael G. O’Quinn
Vice President for Marketing and Communications (interim) - Shane Hinckley
Vice President for Research - Glen A. Laine
Vice President for Student Affairs - Daniel J. Pugh, Sr.

Commandant of the Corps of Cadets - Joe E. Ramirez, Jr.
Vice President and CEO, Texas A&M University at Galveston - Robert Smith, III
Dean of Faculties and Associate Provost (interim) - Blanca Lupiani
Associate Provost for Graduate and Professional Studies - Karen Butler-Purry
Associate Provost for Undergraduate Studies - Ann L. Kenimer
Associate Provost for Academic Initiatives - Michael T. Stephenson
Associate Vice President for Academic Services - Joseph P. Pettibon, II

---

**History and Development**

**Mission Statement**
Texas A&M University (Texas A&M) is dedicated to the discovery, development, communication and application of knowledge in a wide range of academic and professional fields. Its mission of providing the highest quality undergraduate and graduate programs is inseparable from its mission of developing new understandings through research and creativity. It prepares students to assume roles in leadership, responsibility and service to society. Texas A&M assumes as its historic trust the maintenance of freedom of inquiry and an intellectual environment nurturing the human mind and spirit. It welcomes and seeks to serve persons of all racial, ethnic and geographic groups, women and men alike, as it addresses the needs of an increasingly diverse population and a global economy. In the twenty-first century, Texas A&M University seeks to assume a place of preeminence among public universities while respecting its history and traditions.

**History and Development**
Texas A&M University, the state’s first public institution of higher education, opened for classes in 1876. It is now one of a select few institutions in the nation to hold land grant, sea grant and space grant designations. It is also one of the few universities to host a presidential library. The George Bush Presidential Library and Museum opened in 1997 on a 90-acre tract of land on the west side of campus. The University owes its origin to the Morrill Act approved by the Congress on July 2, 1862. This act provided for donation of public land to the states. The land was to be sold at auction, and the proceeds were set aside in a perpetual fund. The act directed that interest from this fund be used to support a college whose “leading object shall be, without excluding other scientific and classical studies, and including military tactics, to teach such branches of learning as are related to agriculture and mechanic arts... in order to promote the liberal and practical education of the industrial classes in the several pursuits and professions in life.”

By resolution of the Legislature of the State of Texas in November 1866, Texas agreed to provide for a college under the terms of the Morrill Act, but no such institution was organized until the establishment of the Agricultural and Mechanical College of Texas by act of the Twelfth Texas Legislature on April 17, 1871. The same act appropriated $75,000 for the erection of buildings and bound the state to defray all expenses of the college exceeding the annual interest from the endowment. Proceeds from the sale of the 180,000 acres of land scrip received under the Land Grant College Act were invested in $174,000 of gold frontier defense bonds to Texas, forming a perpetual endowment for the institution. A commission
created to locate the institution accepted the offer of 2,416 acres of land from the citizens of Brazos County in 1871, and instruction began in 1876.

As the State of Texas grew, so did its land grant institution. Texas A&M now has a physical plant valued at more than $1 billion. The campus in College Station includes 5,200 acres and is one of the largest campuses of any major institution of higher education in the nation. The University also operates branch campuses at Galveston and Doha, Qatar, with the latter operating at no expense to the State of Texas. Additionally, the University operates the Soltis Center for Research and Education in San Isidro de Peñas Blancas, Costa Rica. The University also supports global activities for students at the Santa Chiara Study Center in Castiglion Fiorentino, Arezzo, Italy, and maintains an office in Mexico City.

In keeping with the diversified and expanded character of the institution, the 58th Legislature of Texas, on August 23, 1963, changed the name of the Agricultural and Mechanical College of Texas to Texas A&M University.

On September 17, 1971, the designation “sea grant college” was assigned to Texas A&M University in recognition of its achievements in oceanographic and marine resources development. Texas A&M was one of the first four institutions nationwide to achieve this distinction. Patterned after the century-old land grant idea, sea grant colleges are federal-state partnerships for furthering marine work through practical research, education and advisory services. The designation clearly establishes the University’s leadership relative to marine affairs of the state.

Texas A&M added a third special designation to its credentials on August 31, 1989, when it was named a “space grant college.” This new designation, bestowed by the National Aeronautics and Space Administration, came to the University based on its continuing commitment to space research and its participation in the Texas Space Grant Consortium, a group of 35 institutions that includes universities, industrial organizations, non-profit organizations and government agencies within Texas under the leadership of Texas A&M University, The University of Texas at Austin and the University of Houston.

In addition to its traditional strengths in agriculture and engineering, Texas A&M has established itself as a leader in such newer technological areas as the space, nuclear, computer, biotechnological, oceanographic and marine resources fields. It also has placed added emphasis on the arts and sciences and business and continues to enhance its prominent role in these fields.

A mandatory military component was a part of the Land Grant designation until the 1950s, and the Corps of Cadets has played an important role in the history and development of Texas A&M. Even though membership in the Corps of Cadets became voluntary in 1965, Texas A&M historically has produced more officers than any other institution in the nation with the exception of the service academies. The University is one of only three institutions with a full-time corps of cadets including ROTC programs leading to commissions in all branches of service — Army, Air Force, Navy, Marine Corps and Coast Guard.

Texas A&M offers a variety of programs in both undergraduate and graduate studies through its academic colleges and schools supported by the Texas A&M University Libraries — Agriculture and Life Sciences, Architecture, The Bush School of Government and Public Service, Mays Business School, Education and Human Development, Dwight Look College of Engineering, Geosciences, Liberal Arts, Science, and Veterinary Medicine and Biomedical Sciences. Texas A&M University at Galveston is the marine and maritime branch campus of Texas A&M University, and Texas A&M University at Qatar offers degrees in engineering. In addition, Texas A&M’s extensive research efforts in all fields, in conjunction with agricultural and engineering experiment stations, resulted in annual expenditures of approximately $630 million in 2009, which consistently rank in the top tier of research institutions by the National Science Foundation.

Classified by the Carnegie Foundation as a Research University (very high research activity), Texas A&M embraces its mission of the advancement of knowledge and human achievement in all its dimensions. The research mission is a key to advancing economic development in both public and private sectors. Integration of research with teaching prepares students to compete in a knowledge-based society and to continue developing their own creativity, learning, and skills beyond graduation.

In 2001, Texas A&M University was admitted to the Association of American Universities (AAU), the prestigious organization founded in 1900 that restricts its ranks to the nation’s premier public and private institutions of higher learning. In 2004, the Kappa of Texas Chapter of Phi Beta Kappa was installed at Texas A&M University.

**University Core Curriculum**

The Texas A&M Core Curriculum, in compliance with the Texas Core Curriculum, provides students with a foundation of knowledge of human cultures and the physical and natural world, develops principles of personal and social responsibility for living in a diverse world, and advances intellectual and practical skills that are essential for all learning. The Core Curriculum enhances the individual degree program and university graduation requirements, and all three areas must be met by every student.

Given the rapid evolution of necessary knowledge and skills and the need to take into account global, national, state, and local cultures, the core curriculum ensures that students will develop the essential knowledge and skills they need to be successful in college, in a career, in their communities, and in life. The core curriculum acts to enrich and broaden the University’s tradition of providing thorough preparation in each student’s academic major and preparing students for a lifetime of learning.

The University Core Curriculum requirements are described in the section that follows. These requirements must be met by every student entering Texas A&M University on or after the 2014 fall semester. Students entering earlier will be guided by the core curriculum in the catalog upon which they entered the university. Individual degree programs may require that specific courses from the core curriculum be used to satisfy core curriculum requirements. Please check with individual program advisors for details. Students transferring course credit to satisfy the Core Curriculum requirements should refer to the Texas Common Course Numbering System (p. 1094).

The core curriculum focuses on the development of six skills that have been shown to be effective in preparing students for the job market and their role in a diverse world and democratic society.

- **Critical Thinking Skills** – to include creative thinking, innovation, inquiry, and analysis, evaluation and synthesis of information.
- **Communication Skills** – to include effective development, interpretation and expression of ideas through written, oral and visual communication.
- **Empirical and Quantitative Skills** – to include the manipulation and analysis of numerical data or observable facts resulting in informed conclusions.
• **Teamwork** – to include the ability to consider different points of view and to work effectively with others to support a shared purpose or goal.

• **Personal Responsibility** – to include the ability to connect choices, actions and consequences to ethical decision-making.

• **Social Responsibility** – to include intercultural competence, knowledge of civic responsibility, and the ability to engage effectively in regional, national, and global communities.

Students develop and practice these skills in the context of 42 semester credit hours assigned to eight Foundational Component Areas, each made up of a selection of courses that meet the definition provided by the Texas Core Curriculum. For additional information, please reference http://core.tamu.edu.

### Communication - 6 SCH

- **COMM 203** Public Speaking
- **COMM 205** Communication for Technical Professions
- **COMM 243** Argumentation and Debate
- **ENGL 103** Introduction to Rhetoric and Composition
- **ENGL 104** Composition and Rhetoric
- **ENGL 203** Writing about Literature
- **ENGL 210** Technical and Business Writing
- **THAR 407** Performing Literature.

Courses in this category focus on developing ideas and expressing them clearly, considering the effective of the message, fostering understanding, and building the skills needed to communicate persuasively. Courses involve the command of oral, aural, written, and visual literacy skills that enable people to exchange messages appropriate to the subject, occasion, and audience. The following skills will be addressed in the courses that comprise this area: critical thinking, communication, team work, and personal responsibility.

### Mathematics – 6 SCH

- **MATH 131** Mathematical Concepts—Calculus
- **MATH 141** Business Mathematics I
- **MATH 142** Business Mathematics II
- **MATH 147** Calculus I for Biological Sciences
- **MATH 148** Calculus II for Biological Sciences
- **MATH 150** Functions, Trigonometry and Linear Systems
- **MATH 151** Engineering Mathematics I
- **MATH 152** Engineering Mathematics II
- **MATH 166** Topics in Contemporary Mathematics
- **MATH 167** For All Practical Purposes
- **MATH 171** Analytic Geometry and Calculus
- **MATH 172** Calculus
- **PHIL 240** Introduction to Logic

Courses in this category focus on quantitative literacy in logic, patterns, and relationships. Courses involve the understanding of key mathematical concepts and the application of appropriate quantitative tools to everyday experiences. The following skills will be addressed in the courses that comprise this area: critical thinking, communication, and empirical and quantitative.

### Life and Physical Sciences – 9 SCH

- **ANSC 107** General Animal Science
- **ANTH 225** Introduction to Biological Anthropology
- **ASTR 101** Basic Astronomy
- **ASTR 102** Observational Astronomy
- **ASTR 109/PHYS 109** Big Bang and Black Holes
- **ASTR 111** Overview of Modern Astronomy
- **ASTR 119/PHYS 119** Big Bang and Black Holes: Laboratory Methods
- **ATMO 201** Weather and Climate
- **ATMO 202** Weather and Climate Laboratory
- **BESC 201** Introduction to Bioenvironmental Sciences
- **BESC 204** Molds and Mushrooms: The Impact of Fungi on Society and the Environment
- **BIOC 101** Botany
- **BIOC 107** Zoology
- **BIOC 111** Introductory Biology I
- **BIOC 112** Introductory Biology II
- **BIOC 113** Essentials in Biology
- **CHEM 101** Fundamentals of Chemistry I
- **CHEM 102** Fundamentals of Chemistry II
- **CHEM 106** Molecular Science for Citizens
- **CHEM 107** General Chemistry for Engineering Students
- **CHEM 111** Fundamentals of Chemistry Laboratory I
- **CHEM 112** Fundamentals of Chemistry Laboratory II
- **CHEM 116** Molecular Science for Citizens Laboratory
- **CHEM 117** General Chemistry for Engineering Students Laboratory
- **ENGR 101** Energy: Resources, Utilization and Importance to Society
- **ENTO 322** Insects and Human Society
- **ESSM 309** Forest Ecology
- **FIVS 123** Forensic Investigations
- **GEOG 203** Planet Earth
- **GEOG 205** Environmental Change
- **GEOG 213** Planet Earth Lab
- **GEOL 101** Principles of Geology
- **GEOL 106** Historical Geology
- **GEOS 210** Climate Change
- **HORT 201** Horticultural Science and Practices
- **HORT 202** Horticultural Science and Practices Laboratory
- **KINE 120** The Science of Basic Health and Fitness
- **KINE 223** Introduction to the Science of Health and Fitness
- **NUTR 222** Nutrition for Health and Health Care
- **OCNG 251** Oceanography
- **OCNG 252** Oceanography Laboratory
- **PHYS 109/ASTR 109** Big Bang and Black Holes
- **PHYS 119/ASTR 119** Big Bang and Black Holes: Laboratory Methods
- **PHYS 201** College Physics
- **PHYS 202** College Physics
Courses in this category focus on describing, explaining, and predicting natural phenomena using the scientific method. Courses involve the understanding of interactions among natural phenomena and the implications of scientific principles on the physical world and on human experiences. The following skills will be addressed in the courses that comprise this area: critical thinking, communication, empirical and quantitative, and team work.

WGST 374/ ENGL 374 Women Writers 3

Courses in this category focus on how ideas, values, beliefs, and other aspects of culture express and affect human experience. Courses involve the exploration of ideas that foster aesthetic and intellectual creation in order to understand the human condition across cultures. The following skills will be addressed in the courses that comprise this area: critical thinking, communication, social responsibility, and personal responsibility.

</table>
Courses in this category focus on the appreciation and analysis of creative artifacts and works of the human imagination. Courses involve the synthesis and interpretation of artistic expression and enable critical, creative, and innovative communication about works of art. The following skills will be addressed in the courses that comprise this area: critical thinking, communication, team work, and social responsibility.

**American History – 6 SCH**

- AFST 300/ HIST 300  Blacks in the United States, 1607-1877
- AFST 301/ HIST 301  Blacks in the United States Since 1877
- HIST 105  History of the United States
- HIST 106  History of the United States
- HIST 226  History of Texas
- HIST 230  American Military History, 1609 to Present
- HIST 232  History of American Sea Power
- HIST 258  American Indian History
- HIST 300/ AFST 300  Blacks in the United States, 1607-1877
- HIST 301/ AFST 301  Blacks in the United States Since 1877
- HIST 304  Mexican-American Frontier to 1848

Courses in this category focus on the consideration of past events and ideas relative to the United States, with the option of including Texas History for a portion of this component area. Courses involve the interaction among individuals, communities, states, the nation, and the world, considering how these interactions have contributed to the development of the United States and its global role. The following skills will be addressed in the courses that comprise this area: critical thinking, communication, social responsibility, and personal responsibility.

**Government/Political Science – 6 SCH**

- POLS 206  American National Government
- POLS 207  State and Local Government

Courses in this category focus on consideration of the Constitution of the United States and the constitutions of the states, with special emphasis on that of Texas. Courses involve the analysis of governmental institutions, political behavior, civic engagement, and their political and philosophical foundations. The following skills will be addressed in the courses that comprise this area: critical thinking, communication, social responsibility, and personal responsibility.

**Social and Behavioral Sciences – 3 SCH**

- AGEC 105  Introduction to Agricultural Economics
- AGEC 350  Environmental and Natural Resource Economics
- ALEC 450  Global Social Justice Issues in Agriculture
- ANTH 201  Introduction to Anthropology

- SOCI 319/ SPMT 319  Sociology of Sport
- SOCI 327  Morality and Society
- SPMT 304  Sport Psychology Management and Practice
- SPMT 319/ SOCI 319  Sociology of Sport
- SPMT 336  Diversity in Sport Organizations
- SPMT 337  International Sport Business
- URPN 201  The Evolving City
- URPN 202  Building Better Cities
- URPN 361  Urban Issues
- WGST 207/ SOCI 207  Introduction to Gender and Society

Courses in this category focus on the application of empirical and scientific methods that contribute to the understanding of what makes us human. Courses involve the exploration of behavior and interactions among individuals, groups, institutions, and events, examining their impact on the individual, society, and culture. The following skills will be addressed in the courses that comprise this area: critical thinking, communication, empirical and quantitative, and social responsibility.

Applicable courses are listed in the Texas Higher Education Coordinating Board course inventory as meeting either the Mathematics or the Component Area Option Foundational Component Area.

Applicable courses are listed in the Texas Higher Education Coordinating Board course inventory as meeting either the Life and Physical Sciences or the Component Area Option Foundational Component Area.

2

Student Learning Outcomes

Student learning outcomes articulate the knowledge and skills we expect students to gain during their educational experiences. These learning outcomes ask students to connect their course- and degree-level learning to overall goals determined to be critically important to a university’s graduates as they make their way in the world after graduation and prepared to engage in learning for a lifetime.

First and foremost, of course, we expect students to have learned the material presented in their individual courses. From entry-level general education courses required of all undergraduates to capstone courses restricted to seniors in a major to specialized graduate seminars, by the time of graduation students are expected to have learned the material assigned in all of their courses. We call this “content knowledge.”

The broader institutional student learning outcomes ask students to connect the pieces of their education into a whole that synthesizes what they have learned. Students graduate not only knowing facts and understanding basic concepts but also demonstrating an ability to apply and explain those facts and concepts creatively in new situations. Students gain the skills and knowledge that allows them to thrive in a complex world.

Baccalaureate

A student who graduates from Texas A&M University with a baccalaureate degree will have acquired the knowledge and skills necessary to:

Master the depth of knowledge required for a degree, including the ability to:

- Articulate disciplinary and interdisciplinary theories, concepts, principles, skills, and practices;
- Synthesize knowledge across courses and other experiences; and
- Apply knowledge from core curriculum courses, discipline-based courses, and other experiences in a range of contexts to solve problems and make decisions.

Demonstrate critical thinking, including the ability to:

- Evaluate, analyze, and integrate information from a variety of sources;
- Use appropriate strategies and tools to represent, analyze, and integrate information; and
- Develop critical, reasoned positions.

Communicate effectively, including the ability to:

- Demonstrate effective oral communication skills (which could include the use of languages such as American Sign language for those who do not communicate orally);
- Demonstrate effective writing skills;
- Demonstrate effective nonverbal communication skills (which could include appropriate use of performance, design, or representations such as maps, tables, and graphs);
- Listen actively and critically;
- Present work effectively to a range of audiences; and
- Effectively communicate original and creative ideas.

Practice personal and social responsibility, including the ability to:

- Practice ethical leadership;
- Recognize an ethical dilemma and apply rational decision-making in order to address it;
- Choose ethical courses of action in research and practice;
- Acknowledge and address the consequences of one’s own actions; and
- Engage in local and global civic activities.

Demonstrate social, cultural, and global competence, including the ability to:

- Live and work effectively in a diverse and global society;
- Articulate the value of a diverse and global perspective; and
- Recognize diverse economic, political, cultural, and religious opinions and practices.

Prepare to engage in lifelong learning, including the ability to:

- Exhibit the skills necessary to acquire, organize, reorganize, and interpret new knowledge;
- Show proficiency in current technologies and the ability to adapt to emerging technologies;
- Recognize and participate in activities that enhance wellness of body, mind, and spirit;
- Formulate a plan of personal goals for continued professional growth; and
- Demonstrate intellectual curiosity.

Work collaboratively, including the ability to:

- Participate effectively in teams;
- Consider different points of view; and
- Work with others to support a shared purpose or goal.

Degree Information

Which Catalog to Follow

In meeting the requirements for a baccalaureate degree, a student is expected to complete the course and hour requirements as outlined in the catalog in effect at the time he or she first enrolls at Texas A&M. Normally, a student will not be granted a degree based upon completion of the requirements set forth in a catalog more than seven years old. Before changing catalogs, the student must consult his or her academic advisor. A student changes catalogs by filing a written notification with his or her dean. It is incumbent on the student to verify that the change has been made. Texas A&M University Student Rules (including periodic revisions) is the governing document in case of conflict between this catalog and Texas A&M University Student Rules. It is the responsibility of the individual student to read this information carefully and to use it as a reference. Please refer to the Student Rules for this information.
Whereas each college must retain the flexibility to improve its curriculum, course offerings may be changed during the student’s education. If a course required under a previous catalog is no longer offered, a student eligible to graduate according to that catalog should consult his or her academic advisor or dean to identify another course that may be used to fulfill the requirement. Course adjustments in the degree program are permitted only with the approval of the dean through the department head or program director. Furthermore, the University reserves the right to make any changes in requirements it may consider necessary and desirable by due notice in the catalog.

Students are required to take the courses listed in a curriculum; however, the display of a curriculum does not in any way indicate the length of time required to finish degree requirements. Rather, this display is intended as a guide to indicate the preferred order for completion of degree requirements. Exceptions to certain requirements may be petitioned through the department head to the dean of the college.

**Degrees Offered**

The following degrees are offered for the satisfactory completion of resident study in the appropriate curriculum:

- Bachelor of Arts (BA)
- Bachelor of Business Administration (BBA)
- Bachelor of Environmental Design (BED)
- Bachelor of Landscape Architecture (BLA)
- Bachelor of Science (BS)
- Bachelor of Science in Nursing (BSN)
- Master of Agribusiness (MAB)
- Master of Agriculture (MAgr)
- Master of Architecture (MArch)
- Master of Arts (MA)
- Master of Biotechnology (MBiot)
- Master of Business Administration (MBA)
- Master of Computer Science (MCS)
- Master of Education (MED)
- Master of Engineering (MENG)
- Master of Equine Industry Management (MEIM)
- Master of Financial Management (MFM)
- Master of Fine Arts (MFA)
- Master of Geoscience (MGSc)
- Master of Health Administration (MHA)
- Master of Industrial Distribution (MID)
- Master of International Affairs (MIA)
- Master of Land and Property Development (MLPD)
- Master of Landscape Architecture (MLA)
- Master of Natural Resources Development (MNRD)
- Master of Public Health (MPH)
- Master of Public Service and Administration (MPSA)
- Master of Real Estate (MRE)
- Master of Recreation and Resources Development (MRRD)
- Master of Science (MS)
- Master of Science in Nursing (MSN)
- Master of Science in Public Health (MSPH)
- Master of Urban Planning (MUP)
- Master of Water Management and Hydrological Science (MWM)
- Master of Wildlife Science (MWSC)
- Doctor of Dental Surgery (DDS)
- Doctor of Education (EdD)
- Doctor of Engineering (DEng)
- Doctor of Medicine (MD)
- Doctor of Pharmacy (PharmD)
- Doctor of Philosophy (PhD)
- Doctor of Public Health (DrPH)
- Doctor of Veterinary Medicine (DVM)
- Juris Master (JM)
- Juris Doctor (JD)

The buying, selling, creating, duplicating, altering, giving or obtaining the Texas A&M diploma or other academic record is prohibited by state law. A person who violates this statute or who aids another person in violation is guilty of a misdemeanor and is subject to a fine and/or confinement if convicted.

The University has the right to rescind a previously granted degree if the University becomes aware of information indicating that the degree never should have been granted.

**Requirements for a Baccalaureate Degree**

To be a candidate for a degree at the end of the semester, a student must:

1. Be registered for or have completed all degree requirements by the 60th class day of the fall or spring semester, or the 15th class day of the second summer term either in residence or at another college or university. Proof of enrollment in any courses taken at another college or university must be provided to the Office of the Registrar, Degree Audit, by the above deadlines. A student must be enrolled in his or her degree-granting college(s) at the beginning of the student’s last semester at Texas A&M to be a candidate for a degree from that college.

2. Complete a minimum of 120 credit hours.

3. Complete, with at least a 2.0 grade point average, all undergraduate coursework attempted at Texas A&M University.

4. Complete, with a 2.0 grade point average, all courses included in the major field of study.

5. Meet the Residence Requirement. A minimum of 36 semester hours of 300- and/or 400-level coursework must be successfully completed in residence at Texas A&M to obtain a baccalaureate degree. A minimum of 12 of these 36 semester hours must be in the major. A student participating in Texas A&M University off-campus study programs approved by the student’s college may apply upper division credits earned in the programs toward the residence requirement up to a maximum of 18 semester hours, including hours transferred from another institution as part of one of these programs. These Texas A&M University off-campus study programs may involve domestic or international institutions and may be taught by Texas A&M University faculty or faculty from other institutions. Students choosing to participate in such programs and wishing to apply credits earned from the programs toward the residence requirement must receive college approval prior to the student’s participation in the off-campus study program. Students participating in international programs must contact the Study Abroad Programs Office for details on how to obtain approval for courses taken outside the United States. Students...
participating in domestic off-campus programs must contact the dean's office of their college for approval procedures.

6. Complete the University Core Curriculum. Core Curriculum courses are listed on the University Core Curriculum (p. 19) page. For additional information, please reference http://core.tamu.edu.

7. Complete the citizenship requirement, which includes at least 6 credit hours in government/political science and at least 6 credit hours in American history. American National Government (POLS 206) and State and Local Government (POLS 207) fulfill the government/political science requirement.

Both the government/political science and American history requirements may be met, in whole or in part, by equivalent coursework satisfactorily completed at another accredited college or university.

State law permits the substitution of 3 hours of history and 3 hours of government/political science for a student in the program of an approved senior ROTC unit. With the approval of the dean of the appropriate college, students successfully completing the required 12 hours of upper-level ROTC courses will be deemed to have completed the equivalent of POLS 206 or POLS 207 plus HIST 105 or HIST 106 (or another appropriate course) for a total of 6 hours.

Students pursuing teacher certification are not allowed to substitute ROTC credits for this requirement.

8. Complete the Foreign Language requirement. A minimum of one year of foreign language is required in many degree programs at Texas A&M. This degree requirement can be satisfied by the satisfactory completion in high school of two units of the same foreign language or one year of the same language at the college level.

a. International students are not permitted to enroll in courses to satisfy this degree requirement.

b. Bachelor of Arts degrees from the College of Liberal Arts require an additional 6 semester hours at the 200-level.

c. Students who wish to demonstrate foreign language proficiency without taking acceptable high school or college courses may do so through the existing credit by examination process. In cases where students wish to demonstrate proficiency in a language not taught at Texas A&M, the following procedures shall apply. The student shall request an examination from the Head of the Department of Hispanic Studies or the Head of the Department of International Studies. This department will coordinate the administration of special examinations to demonstrate foreign language proficiency. This will include finding an appropriate examination to test the student's proficiency, informing the student how to arrange to take the examination and certifying the results to the student's advisor. All arrangements shall be made and fees paid by the student.

d. American Sign Language (ASL) may be used to fulfill the foreign language degree requirement unless otherwise specified by the student's college or department. Students may either transfer ASL credits or arrange to be tested at another institution. (Texas A&M does not offer courses in ASL.)

9. Complete the Writing requirement. The requirement may be met by passing two writing (W) courses or one writing (W) course and one oral communication (C) course. The requirement may not be met by any course listed as a University Core Curriculum communication requirement, nor may it be met through credit by examination. It may be met by a course transferred from another institution of higher learning, with the approval of the dean of the student's college and the Associate Provost for Undergraduate Studies. Upon request, students will provide their dean with a course description, syllabus or writing sample from the course being transferred.

10. Complete the International and Cultural Diversity requirement (6 credit hours). As individual and national destinies become progressively more interconnected, the ability to survive and succeed is increasingly linked to the development of a more pluralistic, diverse and globally-aware populace. Two courses from the list available on the International and Cultural Diversity Requirements (p. 34) page are to be taken by the student. For additional information, please reference http://icd.tamu.edu. If a course listed also satisfies a Core Curriculum requirement, it can be used to satisfy both requirements if the student wishes to do so.

11. Be formally recommended for graduation by the Faculty Senate after consideration of his or her complete record.

Undergraduate Minor Programs

A minor is a selection of courses that focus on a single area or an interdisciplinary perspective as developed by the department or program that offers the minor. The department or program offering the minor is responsible for setting enrollment limits and deciding which courses are used to meet the minor. Coursework consists of 15-18 hours with a minimum of 6 in residence at the 300-400 level.

If a minor is offered by a department or academic unit, then the minor is considered to be available to all students as resources permit. Students must declare a minor no later than the date on which they apply for graduation. A maximum of two minors per degree can be completed by students. A minor is displayed on the transcript after graduation but not displayed on the diploma.

Two Degrees

A student pursuing a second baccalaureate degree must have completed all the essential work of the second curriculum not covered in the first. In all such cases, the total semester hours required must be at least 30 hours additional to the greater number required for either degree. The student must have a minimum of 36 hours of 300- and 400-level courses, 12 hours of which must be in the major field of study, in residence at Texas A&M. The student must also meet the citizenship requirements for American history and government/political science.

Baccalaureate Degree Option for Students Granted Early Admission to Medical/Professional Programs

A minimum of 120 hours is required for a Texas A&M University undergraduate degree. Some degree programs require additional hours (see specific degree requirements for each major in this catalog). Students from undergraduate programs who are selected early into participating programs in medicine, dentistry, optometry or veterinary medicine must have satisfied all University Core Curriculum requirements as specified in this catalog. A student intending to use this baccalaureate degree option must coordinate early in his or her program with the appropriate undergraduate advisor in order to ensure that degree requirements are met. The degree candidate must complete at least half of the total hours required for the baccalaureate degree while in residence at Texas A&M University. This requirement includes a minimum of 24 hours of upper division courses in residence, of which a minimum of 12 must be in the major. A student will become eligible for the Texas A&M degree upon
completion of the total credit hours required by his or her undergraduate degree plan. Each undergraduate major specifies those professional courses that may be used to satisfy its degree plan.

A student then selected into an approved professional program will be required to successfully complete a minimum of one full year of acceptable work at an accredited school of medicine, dentistry, optometry, law, or veterinary medicine in the United States. The student will be responsible for submitting official transcripts to the Office of Admissions to verify completion of agreement requirements. The participating undergraduate department or program will complete the required degree audit, approve the necessary substitutions and clear the student to graduate.

Baccalaureate degrees will be awarded in May, August and December after the completion of the first year of the approved professional program or the necessary hours for the desired baccalaureate degree. Students must apply for graduation at Howdy. Check the academic calendar for deadlines and for commencement dates. Questions may be emailed to degree-audit@tamu.edu or call (979) 845-1089. For additional information about graduation, visit the graduation (http://graduation.tamu.edu) website.

Students who have received a baccalaureate degree are not eligible to participate in commencement. Individuals who would have been eligible to participate in this program had it been in effect when they were students at Texas A&M University may request the conferral of a baccalaureate degree. Although this is a University-wide policy, not all colleges choose to participate. The use of this baccalaureate option will remain a college initiative in that each individual college and/or program must clear each candidate for graduation.

**Graduation with Honors**

**Undergraduate Students**

To be eligible for graduation with Latin honors, a student seeking a baccalaureate degree must enroll in and complete a minimum of 60 semester hours at Texas A&M University, Texas A&M University at Galveston, or Texas A&M University at Qatar preceding graduation and have an institutional grade point average equal to or greater than that required for the appropriate category of honors. Course credit received by examination, and courses reserved for graduate credit only, are excluded from the calculation of the number of hours and the grade point average for graduation with Latin honors.

**Categories for Latin honors shall be designated as follows:**

- **Summa Cum Laude:** A student may be graduated Summa Cum Laude with a grade point average of 3.90 or above.
- **Magna Cum Laude:** A student may be graduated Magna Cum Laude with a grade point average range of 3.70 through 3.899.
- **Cum Laude:** A student may be graduated Cum Laude with a grade point average range of 3.50 through 3.699.

Grade point averages used to determine Latin honors designations are calculated during the final degree audit the day before the ceremonies and include hours and final grades in courses taken during the graduation semester. Latin honors designations will not be changed after the final graduation clearance deadline.

Information regarding other honors designations may be found on the Honors and Undergraduate Research (p. 92) page.

Please note:

- Students are not required to enroll in honors courses to graduate with Latin honors.
- Taking designated honors courses does not mean students will graduate with Latin honors.

No Upper Division student found guilty of academic misconduct may receive Cum Laude, Magna Cum Laude, or Summa Cum Laude honors at graduation. Upper Division status is defined as having earned 60 or more credit hours, including transfer hours, prior to the date of the violation. This sanction is automatic upon a finding of academic misconduct, and is imposed without regard to the severity of other sanctions imposed by the instructor or Honor Council.

For more information, please see the Aggie Honor System Office (p. 71) section in the catalog.

**First-Professional Students**

- Students who complete their entire course of study at the Texas A&M Health Science Center College of Medicine are eligible for academic honors. In the College of Medicine, students must obtain a grade point average of 3.50 or greater to graduate with honors.
- Students who complete their entire course of study at the Texas A&M College of Veterinary Medicine may qualify to graduate Summa Cum Laude by holding a final grade point average of 3.90 or above, Magna Cum Laude with a grade point average of 3.70 through 3.899 and Cum Laude with a grade point average of 3.50 through 3.699.

**Graduation Application, Diploma and Commencement**

Formal application for degrees must be submitted online in Howdy by the deadline stated in the academic calendar.

The diploma of the University, with the appropriate degree, will be granted to the student who has made formal application for the degree by the published official deadline, has all grades on record in the Office of the Registrar, including grades pertaining to graduation with honors, and has satisfied all degree requirements by no later than 5 p.m., Friday, the first week of classes of the succeeding semester or summer term following commencement.

Students must have settled all financial obligations to the university prior to receiving a diploma.

Graduate and undergraduate students who plan to attend a commencement ceremony must do so the semester they apply for graduation and complete their degree requirements.
Tuition Charged for Excess Credit Hours

The State of Texas will not provide funds to state institutions of higher education for excess semester credit hours earned by a resident student. Because funding will not be provided by the State, and as permitted by State law, Texas A&M University will charge tuition at the non-resident rate to all students who exceed the semester credit hour limit for their program. Excess semester credit hours are those which accrue after the student attempts more than 30 hours beyond the number of semester credit hours required for the completion of the degree program in which the student is enrolled. Thus, the student may accumulate up to 30 hours beyond those required for the chosen degree program and not exceed the limitation. The limitation on excess credit hours applies only to those undergraduate students who first enter higher education in the fall 1999 and thereafter. The semester credit hours counted toward the limitation include all hours attempted by the student except:

- Semester credit hours earned by the student before receiving a baccalaureate degree that has been previously awarded.
- Semester credit hours earned by the student by examination or other procedure by which credit is earned without registering for a course for which tuition is charged.
- Credit for remedial education courses, technical courses, workforce education courses funded according to contact hours, or other courses that would not generate academic credit that could be applied toward a degree program at Texas A&M University.
- Semester credit hours earned by the student at a private or an out-of-state institution.
- Semester credit hours earned by the student before graduating from high school and used to satisfy high school graduation requirements (Effective June 2009).

Supplementary Fee for Courses Attempted More than Twice

Certain courses that are attempted by a student more than twice at a public institution of higher education in Texas may not be reported for state funding. As a result, the institution must either pass the non-funded portion to all students, or charge a supplementary fee to the student who is repeating the course. Texas A&M has chosen to assess a supplementary fee to those students attempting a supplementary fee to those students attempting a course more than twice.

A student attempting certain courses more than twice at Texas A&M University will be subject to a supplementary fee of $125 per semester credit hour ($375 for a 3 hour course) for the repeated course, in addition to tuition and required fees associated with the course. The general criteria for determining which courses are subject to the supplementary fee are:

- Courses a student has completed twice at Texas A&M University with a grade of A, B, C, D, F, F* (academic dishonesty), S (satisfactory), U (unsatisfactory), I (incomplete), Q (authorized drop after the add/drop period) or X (no grade submitted) are subject to the fee.
- Courses identified by the University as repeatable for credit are not subject to the fee. The "3peat Exclusion" attribute is displayed under course attributes in the Schedule of Classes for each course identified as repeatable for credit.
- Courses dropped with no record (NR), no grade (NG) and withdrawals (W) are not subject to the fee.

Students will be notified at the time they register for a course that it has been taken twice at Texas A&M University and is subject to the supplementary fee.

Undergraduate Certificate Programs

For a list of approved undergraduate certificate programs, please visit the Office of the Registrar (http://curricularservices.tamu.edu/Our-Services/Curricular-Services/Curricular-Approvals/Program-Approvals/Approved-Certificate-Programs) website.

Application Information

Both Texas and non-Texas students can apply for undergraduate admission in the year 2016 to any Texas Public University for freshman, transfer and international admission by using the ApplyTexas Application. You may access the appropriate application from the ApplyTexas Application website (www.applytexas.org) or the Texas A&M University website (http://admissions.tamu.edu).

Texas A&M University has several conveniently located Prospective Student Centers throughout the state, staffed with regional advisors ready to serve you. Please contact the center nearest you to learn more about admissions, financial aid, academic programs and student services.

1 Se habla español.
An applicant who:
• is not a citizen or permanent resident of the United States (or applicant for permanent residency) and does not qualify for Texas residency based on Senate Bill 1528
• is an applicant seeking a bachelor’s degree
• has graduated from high-school or equivalent
• has enrolled in a post-secondary institution, and
• is not eligible for readmission (has never enrolled at Texas A&M University as an undergraduate degree-seeking student).

Readmission
An applicant who:
• is a former degree-seeking Texas A&M undergraduate student (including an international student)
• does not have a bachelor’s degree
• did not officially register for the previous semester (excluding summer sessions) at Texas A&M
Readmission does not include applicants whose only previous enrollment at Texas A&M has been as a non-degree student.

Postbaccalaureate Undergraduate
An applicant who:
• has a bachelor’s degree
• wishes to pursue a second undergraduate degree

Non-degree Undergraduate
An applicant who:
• has a bachelor’s degree
• wishes to take specific undergraduate coursework
• does not wish to pursue a degree at Texas A&M

High School Enrichment Program
An applicant who:
• is a high school junior or senior in the Bryan/College Station area
• has a minimum combined Verbal and Math SAT score of 1200 (plus writing component score), or an ACT score of 27 (plus a writing component score)
• has completed all levels of related coursework offered at their high school
Each student is eligible to take 1 (one) course per fall or spring semester, and course registration will be completed by the TAMU advisor. No summer classes are offered at this time. Classes will be held on the Texas A&M University campus. Students and their parents' guardians will be responsible for any lodging or transportation considerations. Admission for this program is on a space-available basis. The applicant pool is competitive, and admission into this program is not guaranteed.

1 An applicant who has enrolled in a post-secondary institution since high school graduation, with or without credit received, must apply as a transfer applicant.

### Items Necessary to Complete an Application File

Please see the Readmission, Postbaccalaureate or Non-degree sections for other items required to complete the transfer application for those types of admission. U.S. citizens completing a non-U.S. high school program should refer to International Admissions for questions concerning transcripts, examination results and foreign credentials.

An application is reviewed to make a decision about admission after all items listed below have been received. The items must be received by the appropriate closing date to assure consideration.

In addition, freshman applicants must show proof of meeting the State of Texas Uniform Admission Policy to qualify for review.

#### Application, preferably submitted electronically via ApplyTexas

- Completed and signed by applicant (if submitting paper application).
- Fax applications will not be accepted.

#### Application Fee (check, money order, Visa, MasterCard, Discover or American Express)—All fees are nonrefundable

- Domestic Undergraduate - $75
- Domestic Graduate - $50
- International - $90
- Checks and money orders should be made payable to Texas A&M University. International checks must be backed by a U.S. bank and be issued in U.S. dollars. The applicant's name and date of birth should be written on the face of checks and money orders.

### Guidelines for requesting application fee waivers:

- Fee waivers are not available for international students.

#### Freshman Waivers

Applicants requesting a fee waiver must submit an SAT/ACT fee waiver request form (must have an original signature from both the applicant and the counselor issuing the waiver), or submit documentation of need via a memo on school letterhead signed by the high school counselor. Typically, need is defined by qualification for free lunch programs. We recommend the correct form or letter be uploaded through the Applicant Information System (AIS) page. Copies, email attachments, or faxes of these forms will not be accepted. The original document is required, if it is not uploaded in AIS. **Checking the fee waiver box on the application does not satisfy the fee waiver requirement.** You must provide documentation of need as noted above. The application should be submitted prior to submitting fee waiver documents.

If the document is not uploaded, you may mail it to the following address:

Texas A&M University
Freshman Admissions
P. O. Box 30014
College Station, TX 77842-3014
Transfer or Readmit Waivers

To request a fee waiver, please provide a copy of an award letter from your current institution or your Student Aid Report (SAR), which you will find within your current FAFSA. Checking the fee waiver box on the application will not satisfy the fee waiver requirement.

The documents can be uploaded through the Applicant Information System (AIS) page. Documents will also be accepted by fax at (979)458-4302 or email at d-nichols@tamu.edu, as well as U.S. mail.

Essays

- Freshman applicants are required to complete Essay Topics A and B. Essay Topic C is strongly recommended for applicants to be considered in the holistic review process.
- Transfer applicants are required to complete Essay Topic A.

SAT or ACT Scores

- Required of all freshman applicants, including all international freshman applicants.
- SAT/ACT tests must be taken with the writing component in order to be considered.
- Scores should be sent directly from the testing agency.
- The SAT code is 6003; the ACT code is 4198.
- Test scores with the writing component must be from a test date within five years of the date of planned enrollment.
- The highest test score from one test date will be used. Texas A&M does not allow combined test scores from different test dates.

Official High School Transcripts

- Freshman applicants who have not graduated from high school at the time of application must submit an official transcript indicating coursework, credits earned, grades, graduation plan/ diploma type and a numerical class rank at least through their junior year. If admitted, the applicant will be required to submit a final transcript with graduation data.
- If the applicant’s high school does not rank its students, a school profile from the high school must be provided as part of the application file.
- Freshman and transfer applicants who have graduated from high school at the time of application should submit an official high school transcript that includes grades and credits for all completed coursework, a numerical class rank, date of graduation and graduation plan completed, or a certificate verifying completion of a GED program.
- Readmit and postbaccalaureate applicants are not required to submit a high school transcript as part of the application file.
- To be considered official, a transcript must bear an original signature of a school official or an original school seal.
- Transcripts in a language other than English must be accompanied by an official English translation. Applicants who have attended high school both in the U.S. and out of the U.S. should submit official transcripts from each school attended.
- For students enrolled in the U.S., copies of official transcripts from other countries will be accepted provided the copies are on file and verified by the U.S. institution.
- Faxed copies are not official and will not be accepted.

Official College Transcripts

- An official transcript is required from every post-secondary institution attended even if the applicant did not earn credit, receive a course grade or the course is not transferable. Coursework from one college posted on the transcript of another college will not satisfy this requirement. Failure to acknowledge attendance and provide transcripts from all schools attended may be considered a fraudulent admissions application resulting in a denial of the application. A college transcript for dual credit coursework earned in high school must also be provided.
- Official transcripts on paper are to be sent by the sending institution in a sealed envelope. The transcript will not be considered official if the student has had access to the actual transcript.
- Transcripts in a language other than English must be accompanied by an official English translation.
- Faxed copies are not official and will not be accepted.
- For students enrolled in the U.S., copies of official transcripts from other countries will be accepted provided the copies are on file and verified by the U.S. institution.

Lawful Permanent Residents of the United States

An applicant who has applied for or been granted Lawful Permanent Resident (LPR) status in the United States by the Department of Homeland Security (DHS) is eligible to submit an application as a Domestic Applicant. To qualify, you must include one of the following with the application:

- a copy of both sides of the DHS-issued Permanent Resident Card, or
- the I-551 Entry Stamp and Immigrant Visa in the passport, or
- an approved I-797 Notice of Action or I-797C Notice of Receipt.

If your parent is also a permanent resident, a copy of the parent’s proof of LPR status will be necessary to determine in-state residency for tuition purposes.

Note: If you have applied for adjustment of status to Lawful Permanent Residency and have not received your LPR card or Notice of Action that says Notice Type: Approval Notice, you are considered an international student once you are admitted to the University. There are certain requirements that international students must fulfill upon enrollment. Please contact International Student Services at iss@tamu.edu for more information about these requirements.

Required Immunizations

Texas Education Code (TEC) 51.9192 requires all entering students (under the age of 22) to provide evidence of vaccination against bacterial meningitis received within the last 5 years or a signed affidavit declining the vaccine at least 10 days prior to the start of classes for any given semester. Learn more about bacterial meningitis at http://admissions.tamu.edu/meningitis.aspx.

Notification of Application Status

Check the Applicant Information System (AIS) website in Howdy (http://howdy.tamu.edu). Applicant channel, to verify your application has been received and to determine if any credentials are missing. Please allow at least two weeks to process credentials.
The Office of Admissions will make every effort to inform applicants of incomplete files through AIS. If incomplete credentials are received within one month of the closing date, there may not be sufficient time for the Office of Admissions to notify applicants. All items necessary to complete an application must be received by the Office of Admissions by the closing date to assure consideration for admission.

Required Coursework

Applicants who graduate from an accredited Texas public or private high school applying to Texas A&M University must have completed either the State of Texas recommended or advanced/distinguished high school curriculum. Students graduating under the Foundation High School Program are encouraged to complete the Distinguished Level of Achievement with one or more endorsements. The high school curriculum should be noted on the official high school transcript. Please visit [http://admissions.tamu.edu/freshman/coursework](http://admissions.tamu.edu/freshman/coursework) for a complete description of coursework including information for home-schooled and out-of-state applicants.

State of Texas Uniform Admission Policy

Texas Education Code (TEC) 51.803-51.809 (State of Texas Uniform Admission Policy [http://admissions.tamu.edu/freshman/TexasUAP]) requires that all freshman applicants meet one of the following college readiness standards in order to be eligible to be considered for admission at a Texas four-year public institution:

- Satisfy the College Readiness Benchmarks on the SAT or ACT assessment; or
  - SAT – 1500 out of 2400 (Verbal + Math + Writing)
  - ACT – 18 English, 21 Reading, 22 Mathematics and 24 Science

- Successfully complete the State of Texas foundation, recommended or advanced/distinguished high school program or complete the portion of the program that was available to them; or

- Successfully complete a curriculum that is equivalent in content and rigor to the foundation, recommended or advanced/distinguished high school program at a high school that is exempt from offering such programs.

Additional Information for Freshman Applicants

1. Information Presented in the Application
   - Extracurricular activities including time commitment and duration of involvement
   - Leadership and/or exceptional talent as shown in extracurricular activities and/or work
   - Community/volunteer work including time commitment and duration of involvement
   - Awards and achievements earned while in high school
   - Employment and/or internships including dates of work and hours per week
   - Family educational background and household income
   - Number of people in household

2. Essay Topics A and B
   - Essay Topics A and B on the ApplyTexas Application are required for admission processing. Essay Topic C is recommended for applicants in the holistic review process. Scholarship review by departments may utilize Essay Topics A, B and C in award decisions. Those applying for the Terry Scholarship are required to complete Essay Topic C.

Freshman Admissions

When all credentials necessary to complete a freshman applicant’s file are received during the admission application period, one of the following criteria will be used to determine who will be offered admission:

1. Top 10% Applicants from Texas High Schools
   - Applicants who are Texas residents or who are enrolled in recognized public or private high schools in Texas with a rank in the top 10% of their high school graduating class will be automatically admitted to Texas A&M University if they have successfully met the State of Texas Uniform Admission Policy, but not necessarily to the major of choice. These applicants must submit all required credentials by the closing date in order to qualify for automatic admission.

2. Academic Admits
   - Applicants who rank in the top 25% of their high school graduating class, achieve a combined SAT math and SAT critical reading score of at least 1300, with a test score of at least 600 in each of these components of the SAT, or a composite ACT score of at least 30 with a test score of at least 27 in ACT math and ACT English, have successfully completed all recommended coursework and have successfully met the State of Texas Uniform Admission Policy will be automatically admitted to Texas A&M University, but not necessarily to the major of choice. These applicants must submit all required credentials by the closing date to qualify for automatic admission.

3. Other Applicants
   - Applicants not meeting the above requirements for automatic admission but who have met the state of Texas Uniform Admission Policy will have their complete application file reviewed in a holistic manner to make an admission decision.

Information for all Freshman Applicants

- All applicants should use the application questions and the essays to present their academic background and personal strengths as well as personal circumstances.
- Letters of recommendation are not required. If an applicant chooses to submit letters of recommendation, be sure they validate or certify leadership, exceptional talent or special circumstances. The most helpful letters are from individuals who know the applicant well and who can write about what distinguishes the individual from other applicants. Please submit no more than two letters of recommendation. Photocopies are acceptable.
- A competitive applicant who cannot be admitted to a major with restricted enrollment (Colleges of Architecture, Business, Engineering, Liberal Arts, and Public Health) will be offered admission to their second major choice. If the second major choice is full, then an alternate major must be chosen after admission to the university.

Notice of Admission Decision

Texas A&M University receives many more academically prepared applicants for admission than we can accommodate. Admission decisions are made throughout the application period and announced as soon as possible. A final decision may be not announced until early December for spring admission or late March for summer or fall admission. A limited number of applicants may be offered provisional admission that requires the successful completion of a summer school program at Texas A&M. In addition, some applicants may be considered for the Texas A&M Blinn
TEAM Program (http://blinnteam.tamu.edu), Texas A&M Engineering Academy at Blinn-Bryan (http://engineering.tamu.edu/academies/blinn-bryan), or participation in the Program for System Admission (http://admissions.tamu.edu/PSA).

**Suspected Fraudulent Admission Applications**

Applicants for admission to Texas A&M University should be aware that the information submitted will be relied upon by University officials to determine their status for admission and residency for tuition purposes. By signing and submitting an admission application, the applicant certifies that the information in, and submitted with, the application is complete and correct and may be verified by Texas A&M University.

All students applying to Texas A&M University are expected to follow the Aggie Code of Honor which states “An Aggie does not lie, cheat or steal nor tolerate those who do.” Applicants found to have misrepresented themselves or submitted false information on the application will receive appropriate disciplinary action which may include rejection of the application, withdrawal of any offer of acceptance, cancellation of enrollment or any other appropriate disciplinary action deemed necessary. In all instances of disciplinary action, the application fee is non-refundable.

Pursuant to the 2015-2016 undergraduate catalog and Texas A&M student rule 24.4.1 (http://student-rules.tamu.edu/rule24), acts of dishonesty include but are not limited to:

- Withholding material information from the University, misrepresenting the truth during a University investigation or student conduct conference, and/or making false statements to any University official.
- Furnishing false information to and/or withholding information from any University official, faculty member, or office.
- Forgery, alteration, or misuse of any University document, record, or instrument of identification.

For prospective undergraduate students (admitted but not enrolled), the initial determination of whether an individual has submitted a fraudulent application will be made by the Associate Director of Admissions, with a right of appeal to the Assistant Vice President for Academic Services and Director of Admissions for undergraduate students. All appeals will be considered by Admissions Decisions Appeals Committee and a recommendation made to the Assistant Vice President for Academic Services and Director of Admissions. For prospective graduate students, initial appeals will be made to the Dean of Graduate Studies.

For enrolled students, the initial determination of whether a student submitted a fraudulent application will be made by the Registrar, with a final right of appeal to the University Disciplinary Appeals Panel or to the Graduate Appeals Panel.

Any University official who suspects that a prospective student or enrolled student has submitted a fraudulent admission application must notify the Director of Admissions or the Office of the Registrar.

**Transfer Admissions**

Transfer applicants will be reviewed and receive a decision from the college/major to which they have applied. Prospective applicants are encouraged to follow the curriculum and guidelines outlined by that specific college/major.

With the changes to the 2014-2015 University Core Curriculum, the Degree Tracks previously used for transfer admission are no longer valid. Coursework for desired majors is available on the Transfer Course Sheets at http://admissions.tamu.edu/transfer/majors. It is to a student’s advantage to follow the guidelines and complete courses as outlined on the Transfer Course Sheets and in the catalog. Applicants who begin a set of courses which have a two-semester sequence are encouraged to complete both courses in the sequence before applying to transfer to Texas A&M.

**Admission Criteria**

- Transfer applicants must have at least a 2.5 grade point ratio (GPR) on at least 24 graded semester hours of transferable coursework at the time of application to be reviewed for admission.
- Students with less than a 2.5 GPR and/or less than 24 graded transferable hours will be denied admission.
- Transfer admission decisions are made by the college and major and are competitive; thus, admission standards are not known until the review for admission occurs. Preference is given to the applicant with the highest grade point ratio (GPR) and the most courses completed for the major designated on the application. See the College Specific Information for the college of the major for which you applied.
- Applicants who drop or withdraw from courses frequently and who do not routinely achieve satisfactory grades will be at a disadvantage in the review for admission.
- Spring grades may be used in the fall admission decision if requested by the Academic College or in instances where the student did not meet the university requirements for review. Spring transcripts must be received by June 1 for review with spring grades. A complete application must be on file by March 1, 2016, to be considered for fall admission. Spring grade review is not an option for students studying outside the U.S.
- The entire application, including essay topic A, is considered to identify admissible candidates.
- Some colleges consider second choice majors. While such admissions may be more competitive since they are made after applicants indicating that major as first choice, the admission decision follows the guidelines for that college presented in College Specific Information. Note that several colleges do not consider second choice majors.

**Automatic Transfer Admission through SB 175**

A transfer applicant who graduated from a Texas high school and ranked in the top 10% of the student’s high school qualifies for automatic transfer admission to a 4-year university under the provisions of SB 175 if they meet the following guidelines:

1. The applicant must have graduated in the top 10% of his or her high school graduating class from a Texas high school not more than 4 years prior to the semester for which the student is applying. The top 10% ranking must be stated on the final high school transcript, or the applicant must have been previously offered admission under the top 10% rule to the institution to which the applicant seeks admission as a transfer student.
2. The applicant must complete the core curriculum at a public junior college or other public or private lower-division institution with a 2.5 GPR on a four-point scale or equivalent.
3. Transcript should note core completion.
4. The applicant must expressly and clearly claim in the application that he or she is seeking admission under the transfer top 10% rule (SB 175).
5. The applicant must provide all of the documents required for transfer admission to Texas A&M by the posted deadline. Transfer requirements can be found at http://admissions.tamu.edu/transfer.

Applicants qualifying for transfer top 10% admission under SB 175 will be admitted to Texas A&M but the choice of major is not guaranteed. Students desiring admission to Business or Engineering are encouraged to select a second choice major of interest due to the limited enrollment capacity in these colleges.

For information concerning the Transfer Top 10% Admission, please see www.legis.state.tx.us/tlodocs/81R/billtext/doc/SB00175F.doc.

College Specific Information
College of Agriculture and Life Sciences

Admission requirements vary greatly across the College; therefore, it is highly recommended that prospective students contact the academic advisor for the major of interest. Admission decisions are made by major and are competitive. Most majors have a series of required and preferred coursework to be completed by the student prior to application. Students should refer to the Texas A&M University Admissions (http://admissions.tamu.edu) website to review the transfer guides for each major. Also note that transfer admission GPR requirements vary by major and several exceed the minimum 2.5 GPR. Completion of the essay indicating why the major was selected and how a degree in this major will help meet career goals is required. For more information on transfer guidelines, coursework and contact information for all academic advisors, refer to the College of Agriculture and Life Sciences (http://aglifesciences.tamu.edu) website.

College of Architecture

Applicants must have completed 24 hours of transferable coursework at the time of application, and it is recommended that these courses be selected from the degree program electives described elsewhere in this catalog. The essay is an important component in the review process and should explain why the applicant is interested in either the Construction Science, Environmental Design Architectural Studies, Landscape Architecture, Urban and Regional Planning or Visualization program. Applicants with less than a 3.0 GPR are rarely admitted. For more information, visit the College of Architecture (http://www.arch.tamu.edu) website.

Enrollment in Environmental Design Architectural Studies and Visualization is driven by available studio space. Additionally, there are eight sequential studios in those degree programs which make it difficult for students that transfer with more than 36 hours.

<sup>1</sup> In lieu of MATH 1324 and MATH 1325, Mays accepts MATH 2414 and MATH 2413, respectively.

Mays Business School

Mays Business School offers transfer admission to the most competitive applicants. The transfer admission process identifies applications that evidence outstanding accomplishments, including academic credentials using the following guidelines.

Transfer admission to Mays generally requires excellence in the following set of eight specific courses. Applicants desiring to major in business are encouraged to plan early, and incorporate this entire body of coursework into their curriculum prior to applying. It is especially important to have credit for both required math courses before applying.

No spring admissions are offered. Summer and fall applicants are expected to have completed and excelled in substantially all of the 24 semester hours of Priority Coursework. Due to the competitiveness of the applicant pool, successful applicants will have a combination of As and Bs in this coursework and a high overall GPR.

The entire application is reviewed. Successful applicants include carefully written essays that demonstrate clarity of purpose, creativity, and an advanced writing style. Applicants are encouraged to identify their intended upper-level major and to describe why they are well suited for that area of specialization. Applicants who have special circumstances they wish to discuss are urged to share all pertinent information, with appropriate documentation, in their essay(s).

Priority courses to be completed before transfer application to Mays Business School are:

<table>

</tr>
</tbody>
</table>

<sup>1</sup> MATH 1324 from some colleges will not be a direct equivalent to MATH 141 at Texas A&M University but will satisfy the core math requirement for this major.
College of Education and Human Development

The College of Education and Human Development (CEHD) is actively seeking qualified transfer students who are interested in teacher certification. There is a nationwide demand for teachers. In particular, the College is seeking students interested in high-need teaching fields: math, science, special education, bilingual, English as a Second Language, and foreign language. The College also offers a variety of non-certification programs.

To be competitive for admission, an applicant should, at the time of application, have a minimum 2.75 GPA on at least 24 hours of graded transferable coursework. It is preferred that MATH 141/MATH 1324, MATH 142/MATH 1325 and two science courses from the desired major be taken prior to application.

Students interested in certification at grades 8–12 should complete a baccalaureate degree in a discipline area and contact the College regarding certification. The College of Education and Human Development will consider second-choice majors with the exception of majors housed in the Department of Health and Kinesiology.

Recommended Courses. Prospective transfer students should refer to the College of Education and Human Development (http://education.tamu.edu) website to identify additional courses that will satisfy degree requirements. Any student applying for a degree in Allied Health or Kinesiology is encouraged to apply with under 60 total hours of transfer credit. Applicants should refer to the College website for more information.

The College of Education and Human Development evaluates performances in all courses and considers all parts of the application. If you have repeatedly dropped or withdrawn from courses or if you are taking courses that do not apply to the Core Curriculum or your major, they may have a negative impact when the application is reviewed. A well-written essay is a student’s opportunity to share information and experiences that could indicate success in a particular major.

The college has identified the following 31 hours of coursework as transferable for all CEHD majors:

1 MATH 1324 from some colleges will not be a direct equivalent to MATH 141 at Texas A&M University but will satisfy the core math requirement for this major.

Guidelines for Transfer Applicants by Program

Health. Applicants who are seeking transfer admission to this program should complete BIOL 1406, CHEM 1411, MATH 1324 and MATH 1325 for admission. Other prerequisite coursework that is recommended is SPCH 1315; and PHED 1304. Students may also take BIOL 2401 and BIOL 2402 to substitute for BIOL 319 and BIOL 320 for this option.

Kinesiology–Exercise Science. Students in this program are encouraged to complete at least 24 hours of the science coursework prior to the 60 completed hours. The Texas Common Course Numbers for the required science coursework on the exercise science degree plan (Applied Exercise Physiology, Basic Exercise Physiology and Motor Behavior options in the Kinesiology degree) are BIOL 1406, BIOL 1407, CHEM 1411, CHEM 1412, PHYS 1401 and PHYS 1402. The remaining 8 hours (Anatomy and Physiology I and II) must be taken at Texas A&M. Other coursework that students could complete include MATH 1324 and MATH 1325 (required for transfer); ENGL 2311 or SPCH 1315; and PHED 1301.

Kinesiology–Physical Education Teacher Certification. Applicants who are seeking transfer admission to this program should complete BIOL 1406, PHYS 1401, MATH 1324 and MATH 1325. Other prerequisite coursework that can be taken prior to admission to Texas A&M and the program and is recommended is ENGL 1301 or ENGL 2311; and PHED 1301. Students may also take BIOL 2401 and BIOL 2402 to substitute for BIOL 319 and BIOL 320 for this option.

Sport Management. Applicants who are seeking transfer admission to this program should complete two lab sciences that meet TAMU Core Curriculum which could consist of the following science courses: BIOL 1406, GEOL 1403, CHEM 1411 or PHYS 1401. Check with the Office of Admissions for specific courses that may meet this requirement. MATH 1324 and MATH 1325 are also required for admission. Other recommended coursework includes ENGL 1301 or ENGL 2311 and SPCH 1315; and ECON 2302.

For more information about admission to the College of Education and Human Development, please contact Casey Ricketts at cricketts@tamu.edu.

Dwight Look College of Engineering

Applicants should complete at least 24 hours of graded transferable coursework at the time of submitting their application, all with a grade of C or better. Transfer admission GPA requirements vary by major, with the majority exceeding the minimum requirements for transfer admission consideration to Texas A&M. Transfer admission course requirements also vary by major. Successful applicants for undergraduate engineering degree programs in the Dwight Look College of Engineering will have completed all or most of the coursework listed before applying for transfer admission. Prospective transfer students should review prospective student information accessed through the Dwight Look College of Engineering (http://engineering.tamu.edu) website for more information and details specific to each major.

2 MATH 1324 from some colleges will not be a direct equivalent to MATH 141 at Texas A&M University but will satisfy the core math requirement for this major.
### College of Geosciences

Prospective applicants are encouraged to refer to the College of Geosciences (http://geosciences.tamu.edu) website for details on appropriate coursework for their intended major which must be completed prior to the time of application. Applicants in Meteorology must have a B or better in all mathematics and science courses required for this major. Special attention is paid to performance in courses relevant to the student’s prospective major. Applicants are considered for fall and spring only. The College of Geosciences will consider second-choice majors.

Overall, the College of Geosciences requires prospective transfer students to be in the process of completing a minimum of 24 hours from the list of courses provided here with a minimum cumulative GPR of 3.0. Applicants are expected to have excelled in this body of coursework, to present evidence of success in a course in their selected major, and in the mathematics and science courses specified.

The entire application submitted by transfer students is reviewed. Successful applicants include carefully written essays that demonstrate clarity of purpose and an advanced writing style. In the essay, applicants are advised to identify their intended major within the College of Geosciences and to describe why they are committing to study that subject. Applicants who have special circumstances and wish to discuss them are urged to share all pertinent information, with appropriate documentation, in their essay(s).

Each major requires the courses as listed below:

<table>
<thead>
<tr>
<th>Applicable Majors</th>
<th>Courses</th>
</tr>
</thead>
<tbody>
<tr>
<td>Environmental Studies (ENST) B.S.</td>

### College of Liberal Arts

Applicants will be considered on their overall GPA on at least 24 hours of graded transferable coursework with a minimum GPA of 3.0 at the time of application. Applicants should complete the essay indicating why they are interested in admission into the selected major. Academic performance in courses relevant to the student’s prospective major may also be considered in admissions decisions. ECON, PSYC and INTS applicants have prerequisites that must be met prior to admission. Refer to
this catalog for all electives in each curriculum. For more information about majors, programs and curricular requirements, please refer to this catalog and the College of Liberal Arts (http://liberalarts.tamu.edu) website.

**College of Science**

Applicants should complete 24 hours, as appropriate to the choice of major, with a cumulative GPR of at least 3.00. Strength of schedule is a factor in determining admission. Applicants will not be admitted without the completion of the first two semesters of courses in their declared major with a grade of B or better. Chemistry and Physics majors must also complete 8 hours of Calculus I and II with a grade of B or better. Biology students must complete 8 hours of Chemistry I and II with a grade of B or better and Calculus I and II with a grade of C or better. The College of Science will consider second-choice majors. For more information, visit the College of Science (http://www.science.tamu.edu) website.

**College of Veterinary Medicine and Biomedical Sciences**

Applicants should have a 3.00 GPR on at least 45 hours of graded transferable coursework at the time of application and meet all Common Body of Knowledge (CBK) requirements for Biomedical Sciences in order to be considered for admission into Biomedical Sciences. Students who begin a set of courses which have a two-semester sequence are encouraged to complete both courses in the sequence before transferring to Texas A&M. No second-choice majors are considered. No summer admissions accepted. For more information, visit the College of Veterinary Medicine and Biomedical Sciences (http://vetmed.tamu.edu) website.

Transfer students with 45 or more hours completed at the time of application will be given preference in admission. The transfer into Biomedical Sciences must occur before the student reaches 75 completed hours.

Readmits will require a 3.0 at Texas A&M University and all CBK courses completed with at least a “C” in all courses. Any CBK courses transferred in from a community college must have a minimum grade of a “B”.

**CBK Requirements**

| MATH 131 | Calculus\(^1\) | }
Students may choose to take MATH 2413 or MATH 1325 as calculus for transfer. These are equivalent to TAMU course numbers MATH 151 and MATH 142, respectively.

Notification of Admission Decisions
Transfer admission decisions are made through a competitive review process. These applicants are notified of the admission decision on a rolling basis throughout the application season. For those applicants submitting spring grades for fall consideration, decisions should be announced by early July.

Additional Information for Transfer Applicants
1. Applicants to the Colleges of Architecture, Business and Veterinary Medicine and Biomedical Sciences—Biomedical Sciences should refer to the Upper Level Entry requirements. Applicants to the Dwight Look College of Engineering should refer to the Entry to a Major – Dwight Look College of Engineering requirements.

2. At least a 2.0 GPR on coursework in progress during the semester (excluding summer terms) immediately prior to enrollment at Texas A&M is a condition of admission.

3. Grades for all transferable courses are used in the computation of the GPR. This includes:
   - Failing grades, repeated courses, WF, Incomplete, etc.
   - Grades reported as Incomplete are computed as Fs.
   - Plus and minus grade designations are not used; C+ is computed as a C, B- as a B, etc.

4. Credit by examination courses which are transcripted from other colleges or universities may be transferred if sequential coursework with credit is also indicated. If there is evidence that the credit by examination courses are part of the student’s program of study at that institution, credit will be awarded for those courses that meet the transfer guidelines. Note: Credit by examination will not count toward the 24 hours required for consideration for admission.

5. Coursework taken as credit-by-exam must be listed as a specific course on an official college transcript to be considered in the admissions process and for transfer of credit.

Residence Requirement for Baccalaureate Degree
A minimum of 36 hours of 300- and/or 400-level coursework must be successfully completed in residence at Texas A&M University to obtain a baccalaureate degree. In all cases, a minimum of 12 of these 36 semester hours must be in the major.

</table>

1. See this catalog pertaining to your major for the specific science.
2. Choice available for transfer applicants only. Nursing and Dental Hygiene applicants must have completed or be enrolled in pre-requisite courses at the time of application. Courses may be completed at any accredited college or university.
3. All new students to the Colleges of Architecture, Business, and Public Health enter the lower level.
4. Requires CHEM 102; MATH 141, MATH 151.
5. The curriculum leading to a professional degree in Architecture begins in the four-year undergraduate Environmental Design Architectural Studies degree program. This degree provides entry to the Master of Architecture program.
6. No spring transfer admission.
7. Choice not available for transfer applicants.
All students seeking elementary teacher certification will complete a baccalaureate degree in Interdisciplinary Studies. There is no major in Secondary Teacher Education. All students seeking secondary certification (except those preparing to teach physical education or health) will major in an academic discipline other than education (i.e., mathematics, English, computer science, biology, etc.) and take appropriate coursework for teacher certification in the College of Education and Human Development.

Pre-veterinary medicine is not offered at Texas A&M. If you plan to apply to the Doctor of Veterinary Medicine (DVM) program, you should select a major that would be a good vocational choice if you do not later enter the DVM program. Any major may be selected; however, some curricula more closely parallel courses that must be completed before applying to the DVM program than others.

### Change of Curriculum to Another Campus
Texas A&M offers certain undergraduate degrees at two branch campuses in addition to the main campus. While enrolled as a student in residence at the Texas A&M location of admission, students may apply for a change of curriculum to another campus for the next future semester. Students must comply with the established change of major procedures and requirements of their desired college and department, and space must be available. Final approval is granted by the academic dean or departmental advisor for that major.

### Transfer Course Credit Policies
Transfer credit on coursework complete at the time of application to Texas A&M University is determined only when an official transcript from the originating institution is presented as part of the application for admission or readmission process.

The transfer of course credit will be determined by the Office of Admissions on a course-by-course basis. Credit submitted for transfer must be on an official transcript received by the Office of Admissions from the registrar of the institution where the credit was earned. Course content will be determined from the catalog description or the syllabus. The transfer of credit decision will be based on the following criteria. All criteria are to be considered together; for example, criteria 10 may be qualified by criteria 7.

#### Credit from Institutions Accredited by One of the Regional Accrediting Associations
1. A course that is normally considered as part of a bachelor's degree program (not including the bachelor of technology or similar terminal degree) may be transferred. The following criteria, taken together, are used:
   a. The course is applicable to a bachelor’s degree at Texas A&M.
   b. The course is similar to a course or courses offered for degree credit by Texas A&M.
   c. The course content is at or above the level of the beginning course in the subject matter offered by Texas A&M.

2. A course that is intended for use in a vocational, technical or occupational program will normally not transfer. In certain cases, credit for occupational skill courses will be considered. Transfer of this credit requires either that the student's Texas A&M major is engineering technology or industrial distribution or that the student’s major department and dean approve the course for use in the student’s degree program.

3. Credit for support courses such as Math, Science and English intended specifically for use in an occupational program will not be transferred.

4. Credit for the course must be shown on the official transcript in semester hours or in units that are readily converted to semester hours.

5. A graduate-level course will not be transferred for undergraduate credit unless approved for use in the student’s undergraduate degree program by the student’s major department and Dean. This also applies for a course offered in a professional degree program such as Nursing, Law or Medicine.

6. Credit by examination courses which are transcripted from other colleges or universities may be transferred if sequential coursework with credit is also indicated. If there is evidence that the credit by examination courses are part of the student’s program of study at that institution, credit will be awarded for those courses that meet the transfer guidelines.

7. Courses similar to ones offered by the Colleges of Agriculture and Life Sciences, Business, Engineering or Geosciences at the junior or senior level transfer by title only. Such courses may be used in the student’s degree program only if approved by the Department Head and Dean of the student’s major field. Validation of such credit, either by examination or the completion of a higher level course, may be required.

8. A field experience, internship or student teaching course may be transferred by title only.

9. Credit for cooperative education will not be transferred.

10. A course that is substantially equivalent to a Texas A&M course transfers as an equivalent course. Two or more courses may be combined to form one or more equivalent courses. If there is doubt about the equivalency of a course, the Texas A&M department offering the course subject matter is asked to determine if the course is equivalent.

11. As a general policy, credit for admission will be given for transfer work satisfactorily completed with a passing grade at another properly accredited institution.

12. Grade Point Ratio (GPR) for any period shall be computed by dividing the total number of semester hours of transferable courses for which the student received grades into the total number of grade points earned in that period. Credit hours to which grades equivalent to Texas A&M grades of W, WF, F, I or U are assigned shall be included; those having grades equivalent to Texas A&M grades of WP, Q, S, X and NG shall be excluded.

13. In any case where a decision cannot be made using the above criteria, the Office of Admissions will determine the transfer of credit based on University policy, previous actions of the University and prior experience.

### Resolution of Transfer Disputes for Lower Division Courses Between Public Institutions in Texas
The following procedures shall be followed by public institutions of higher education in the resolution of credit transfer disputes involving lower-division courses:

1. If an institution of higher education does not accept course credit earned by a student at another institution of higher education, the receiving institution shall give written notice to the student and to the sending institution that transfer of the course credit is denied. A
receiving institution shall also provide written notice of the reasons for denying credit for a particular course or set of courses at the request of the sending institution.

2. A student who receives notice as specified in subsection 1 may dispute the denial of credit by contacting a designated official at either the sending or the receiving institution.

3. The two institutions and the student shall attempt to resolve the transfer of the course credit in accordance with the rules and guidelines of the Texas Higher Education Coordinating Board (THECB).

4. If the transfer dispute is not resolved to the satisfaction of the student or the sending institution within 45 days after the date the student received written notice of denial, the institution that denies the course credit for transfer shall notify the Commissioner of its denial and the reasons for the denial.

The Commissioner of Higher Education or the Commissioner’s designee shall make the final determination about the dispute concerning the transfer of course credit and give written notice of the determination to the involved student and institutions.

Credit from Nonaccredited Schools

Students who transfer to Texas A&M from an institution of higher education that is not accredited by one of the regional accrediting associations may validate the work taken at the institution by one of the following methods:

1. Successful completion of a comprehensive departmental examination or nationally standardized examination that is approved by the department.
2. Successful completion of a higher level course in the same subject area when approved by the head of the department and the dean of the college.

Credit will be given to students transferring from nonaccredited public colleges in Texas for work completed with grades of C or better if they earn a grade point of 2.0 (C average) on the first 30 hours of residence work at Texas A&M.

Credit from Foreign Institutions

Transfer work from institutions following other than the United States educational system with instruction in English will be evaluated on an individual basis. A-level examinations with a grade of C or better will transfer. Baccalaureate II examinations will not transfer; however, these students may take placement and proficiency examinations to receive credit by examination. Credit will be given for work satisfactorily completed at international institutions offering programs recognized by Texas A&M. Official credentials submitted directly from the office of the registrar and a listing of courses completed and grades awarded must accompany any request for transfer credit. Transfer work will be awarded by course title unless previous arrangements have been made using the Texas A&M University Transfer Credit Study Abroad Pre-Approval Form. Courses must be equivalent in character and content to courses offered at Texas A&M. Credit will not be awarded from international institutions which are not academically accredited by the Ministry of Education or other appropriate authority in the home country.

No English composition courses will be transferred from institutions located in non-English speaking countries. American history and American political science (government) courses will not transfer from foreign institutions.

Courses taken at language training centers or institutes are generally not awarded transfer credit. A transcript from such an institution must be issued through the office of the registrar at a Texas A&M recognized university, institute or language training center. Credentials of all language training centers and institutes are carefully checked.

Credit for Military Experience

State law (Texas Education Code Section 51.3042) and Texas A&M University policy awards credit for military experience to eligible veterans. To receive credit, student veterans must submit proof of eligibility to the Office of Admissions and a request form through an academic advisor. Texas A&M University awards one credit hour each for physical education courses KINE 198 and KINE 199, and up to 12 credit hours for general electives, as needed for the student’s degree. Credit earned under this policy does not prohibit Texas A&M University from awarding additional credit for military experience based on military transcripts and recommendations contained within Guide to the Evaluation of Educational Experiences in the Armed Services published by the American Council on Education (ACE).

Proof of eligibility includes:

• Documentation of military service
• DD Form 214 showing 1 year active duty and an honorable discharge OR
• Military orders OR
• Disability discharge documentation
• Documentation of high school completion (final high school transcript or General Educational Development certificate)

Military Service Credits are irrevocable once awarded. Potential consequences should be identified and understood before a request is submitted. Students must consult their academic advisor for advice on the number of credits from military service that can be used in their degree program to avoid excessive credit accumulation and possible negative effects.

Extension and Correspondence Courses

Students may apply a maximum total of 30 semester hours of approved extension class work and correspondence study toward a degree. Students may apply up to 12 hours of correspondence credit earned through an accredited institution toward the requirements for an undergraduate degree, even though Texas A&M does not offer courses by correspondence.

Correspondence courses taken through the Defense Activity for Nontraditional Education Support (DANTES) may be accepted and included in the 12 hours allowed.

In order for a student in residence at Texas A&M to receive credit for correspondence work toward a bachelor’s degree, he or she should:

• obtain advance written permission from the dean of his or her college;
• present appropriate evidence of having completed the course.

Data and Research Services is authorized to act as an agent to receive correspondence courses.
International Admission Criteria

Transcripts/Examination Results
Official academic records (transcripts, marksheets, etc.) are required for all secondary and any university coursework completed. Records should include all courses taken in high school and every college or university the applicant has attended.

Official records require the original seal or original signature of the Registrar, Principal, Headmaster or Director of Student Records. Official records should be mailed from the school directly to Texas A&M University, Office of Admissions. Examination results should be sent directly from the examination agency. In addition to the original records in a language other than English, Texas A&M requires official translations in English. Translations sent directly from the institution attended or from a recognized translator will be accepted. Transcript evaluations that are performed by an evaluation service will not be accepted. For students enrolled in the United States, we will accept copies of official transcripts from other countries that are on file and verified by the U.S. institution. Unofficial photocopies, fax copies and notarized copies of records, examination results or translations will not be accepted.

Admission Criteria for International Applicants with U.S. Based Credentials
International applicants who are completing their education at an institution that is accredited by the U.S. will be reviewed in accordance with the guidelines determined for domestic admission. However, these applicants must still meet international deadlines and testing requirements. (See item 2 below.)

Admission Criteria for International Applicants with Foreign Credentials
International applicants who are completing their education at an institution that is not accredited by the U.S. will be reviewed based on the following criteria:

1. Academic Achievement
   • International applicants are expected to complete an educational program that will allow them to be considered for admission to a university in their home country. Examples include the completion of Grade 13, Form 6 or 3 A-level exams following the General Certificate of Secondary Education (GCSE). Predicted A-level exam results must be received by the application closing date.
   • Successful applicants will rank near the top of their country’s educational system (B average or better) and score well above average on national exams.
   • Secondary school courses: Appropriate college preparatory coursework is required.

2. Testing
   SAT or ACT scores (with writing component) will be considered in the review criteria for international freshman applicants. Additional English testing may be required after admission and before enrollment. Applicants whose native language is not English are required to demonstrate English proficiency by meeting any one of the following requirements:
   • TOEFL scores of 550 paper-based test or 80 internet-based test
   • IELTS with a 6.0 overall band score
   • SAT Critical Reading score of 500 or higher
   • ACT English score of 21 or higher
   • Completed all four years of high school within the U.S.

3. Individual Achievement and Recognition
   • Leadership positions held
   • Honors/awards received
   • Major national, state or Texas A&M scholarships received

Additional Requirements for International Applicants After Admission
If admitted, international applicants must fulfill the following additional requirements before enrollment:

1. International Student Services Channel
   Visit Howdy and click on the Applicant tab. Go to the International Student Services Channel, and click on New Students. At the new international student homepage, follow the instructions. For more information, please visit the International Student Services website.

2. English Verification/Certification
   Texas A&M requires international undergraduate students to demonstrate the ability to speak, write and understand the English language. Undergraduate students may meet this requirement in one of five ways:
   a. official TOEFL score of 600 paper-based test or 100 internet-based test;
   b. official IELTS score of 7.0 overall band;
   c. have an official SAT critical reading score of 500, or ACT English score of 21;
   d. transfer from an accredited U.S. institution of higher education with at least 30 semester credit hours including the equivalent to Texas A&M’s ENGL 103 or ENGL 104 with a grade of “C” or better; or
   e. achieve English Language Proficiency Verification by taking the English Language Proficiency Examination (ELPE) prior to registration for the first semester at Texas A&M University. If remedial English classes are necessary, it will extend the time required to complete a degree.

Scholarship Information for International Students
There are a limited number of scholarships, fellowships, grants and loans available to international students, both in the admission process and throughout their enrollment. Some of these come from academic departments, particularly for graduate applicants, but there are also forms of financial aid available through International Student Services and Scholarships & Financial Aid. International applicants with financial need are encouraged to complete the International Student Financial Aid Application (ISFAA) (http://financialaid.tamu.edu/Forms-%281%29.aspx). This form must be resubmitted annually for continued consideration.

One special opportunity that a student may be eligible for upon admission to Texas A&M University is the Texas/Mexico Education Scholarship. Texas law allows a limited number of admitted applicants who are citizens of Mexico, and who can document financial need, to pay the same tuition as the residents of the State of Texas. For more information regarding how to apply for this scholarship, please refer to International Student Services (http://iss.tamu.edu) website.

For additional information regarding financial assistance and other scholarships available to International Students, please contact:
**Admission Criteria for Other Application Types**

**Readmission Criteria**

Admission decisions for readmission are based on the following:

- GPA on Texas A&M coursework;
- GPA on coursework since leaving Texas A&M;
- desired major; and
- information presented in the application and essay/statement of purpose if provided.

If you were previously admitted but did not attend class through the official census date, you do not qualify as a readmit, and you must apply as either a freshman or transfer student.

If you were previously enrolled at Texas A&M but did not attend class through the official census date of the previous long semester, then you must apply for readmission.

Transcripts from institutions attended since the last enrollment at Texas A&M are required as follows:

<table>
<thead>
<tr>
<th>If Desired Readmission Term Is</th>
<th>Must Have Transcripts Through</th>
</tr>
</thead>
<tbody>
<tr>
<td>2016 Spring semester</td>
<td>2015 Summer session</td>
</tr>
<tr>
<td>2016 Summer semester</td>
<td>2015 Fall semester</td>
</tr>
<tr>
<td>2016 Fall semester</td>
<td>2016 Spring semester if applying after June 1</td>
</tr>
</tbody>
</table>

**Postbaccalaureate Undergraduate Criteria**

Admission is limited and is intended for applicants with a degree who wish to apply for further study at the undergraduate level to pursue a second bachelor’s degree.

Additional requirements to complete a postbaccalaureate application:

- official transcripts from all colleges attended (official high school transcript not required)

Admission decisions for postbaccalaureate undergraduates consider:

- GPA on transferable college coursework
- completion of prerequisite coursework
- information presented in the application

Priority is given to qualified applicants for their initial degree; therefore, postbaccalaureate undergraduate admission may be limited or may not be available. See the Classification section of this catalog for the enrollment rights and privileges of this classification.

**Undergraduate Non-degree Criteria**

Admission is limited and is intended for applicants with a high school diploma (with the exception of High School Enrichment Program participants) or for degree applicants who do not intend to pursue a baccalaureate degree at Texas A&M. This includes:

- local residents or University employees taking courses on a part-time basis
- applicants completing established Texas A&M University requirements for teacher or other certification
- applicants completing a prescribed set of courses as preparation for application to graduate study or professional programs (i.e., medical school, veterinary school, law school or CPA exam)
- others as deemed appropriate by the Office of Admissions and the college or program of admission

Additional requirements to complete an undergraduate non-degree application:

- a statement explaining why enrollment at Texas A&M is desired
- an official college transcript showing the latest collegiate coursework attempted or a complete, official high school transcript if no college work has been attempted after high school graduation
- additional information presented in the application may be considered

Priority is given to qualified applicants for their initial bachelor’s degree; therefore, non-degree admission may be limited or not available. The College of Liberal Arts limits enrollment to summer only and the College of Veterinary Medicine does not allow non-degree seeking admission. See the Classification section of this catalog for the enrollment rights and privileges of this classification.

**Transient Session Only Criteria**

Admission is considered for applicants who wish to attend one specific session only and who present appropriate credentials for the level of specified coursework and apply within the processing period for the specific session.

Additional requirements to complete transient session only application:

- a statement explaining why enrollment at Texas A&M is desired
- an official college transcript showing the latest collegiate coursework attempted or a complete, official high school transcript if no college work has been attempted after high school graduation

**High School Enrichment Program**

Texas A&M University is pleased to offer the High School Enrichment Program (HSEP) for qualified high school students in the Bryan/College
Station area that will provide college credit and may also provide credit toward high school graduation. Admission for this program is on a space-available basis. The applicant pool is competitive, and admission into this program is not guaranteed.

This program provides a chance to further your knowledge in a subject you have completed in high school and earn valuable credit for graduation at both levels. For example, if you are interested in Physics and you have completed all of the classes your high school offers, you may qualify to continue to study Physics at the college level.

To be considered for this program, students must have completed all levels of related coursework offered at their high school. Each student is eligible to take 1 (one) course per fall or spring semester, and course registration will be completed by the Texas A&M advisor. No summer classes are offered at this time. Classes will be held on the Texas A&M campus, and students and their parents/guardians will be responsible for any lodging or transportation considerations.

Eligibility requirements:

- You must have a minimum combined Verbal and Math SAT score of 1200 (plus a writing component score), or an ACT score of 27 (plus a writing component score).

**Academic Fresh Start Policy**

Applicants for admission or readmission to Texas A&M may choose to have academic coursework that was completed at least 10 years prior to their term of application removed from consideration in the admission decision (Texas residents only). All other admission requirements apply. Should a Fresh Start applicant be admitted, he or she will forfeit all credit earned prior to 10 years from the term of admission.

Admitted Fresh Start applicants have “Academic Fresh Start” indicated on their official Texas A&M transcript, are required to satisfy TSI/ THEA requirements, and will follow the academic requirements of the Undergraduate Catalog of record for the term of admission.

Forfeited coursework cannot be considered as prerequisites, but placement examinations are allowed for courses which were not considered for admission because of the Fresh Start Policy. Once admitted on Academic Fresh Start, the applicant or student cannot subsequently request that the Fresh Start policy restrictions be removed.

If an applicant has used the Academic Fresh Start Policy at a previous school, the Academic Fresh Start will remain in effect at Texas A&M upon transfer.

**Entry to a Major – Dwight Look College of Engineering**

Freshmen who meet the University and college entrance requirements are admitted into the Dwight Look College of Engineering with a preference to a major field of study and receive a designation of “ENCE”. Students can apply to a major degree granting program after completing at least one semester and after learning about the different engineering disciplines from professional engineers. Before applying for entry to a major, students must complete a minimum of three courses that are applicable to their intended major degree program. The three courses are defined as follows: one engineering course, one math course, and one science course that are in the intended degree plan. The application process is competitive.

Students must be accepted in a major by the end of their fourth semester or they will be blocked from further registration in the Dwight Look College of Engineering.

As an aid to making a decision, the freshman courses ENGR 111 and ENGR 112, Foundations of Engineering, introduce students to engineering problems from the various disciplines. In addition, students may attend departmental presentations, career fairs and other activities sponsored by student engineering professional societies. Academic Advisors at New Student Conferences will help students select courses to fit their preferences and abilities.

Transfer students will be admitted directly to a major degree granting program through the admissions process. Admissions decisions are made by the major degree granting programs after freshman entry-to-a-major decisions are made.

**Upper-Level Entry into Colleges of Architecture, Business and Veterinary Medicine and Biomedical Sciences–Biomedical Science**

**College of Architecture**

**Transfer Students**

Transfer students, who meet the University entrance requirements and who desire to enter a major field of study in the College of Architecture, will be admitted based on available space and current College of Architecture entrance criteria. Following admission, all transfer students are placed on a 2.5 GPR probation for a minimum of 12 credit hours to substantiate competency in required lower-level courses. Transfer students will be admitted into the college with a lower-level classification and may apply for upper-level status after at least one semester at Texas A&M University.

**Change of Major**

Students currently enrolled in another major at Texas A&M University with fewer than 60 hours who desire to change their major field of study into the College of Architecture must fill out a Change of Curriculum application. Deadlines for applications are as follows:

- March 1 for summer admittance (for Construction Science, Environmental Design Architectural Studies, Landscape Architecture, Urban and Regional Planning and Visualization students)
- June 15 for fall admittance (for Construction Science, Environmental Design Architectural Studies, Landscape Architecture, Urban and Regional Planning and Visualization students)
- October 1 for spring admittance (for Construction Science, Landscape Architecture, Urban and Regional Planning and Visualization students)

Students will be notified of action on their applications within 30 days of the deadline date. The college will admit the best-qualified applicants based on the number of spaces available in their program of choice.

**Mays Business School**

Students who meet the University and college entrance requirements enter Mays Business School in the BUAD (lower-level business) classification. Enrollment of Mays Business School students in junior- and senior-level business courses is limited to those who have been admitted to upper level (also referred to as upper division) in one of the seven majors (B.B.A.: accounting, business honors, finance,
management, management information systems, marketing, and supply chain management) in the college.

The B.B.A. (accounting, business honors, finance, management, management information systems, marketing and supply chain management) upper-level entry requirements and application procedures are as follows:

1. To be admitted to an upper-level major, a student must be admitted to Mays Business School and must have:
   a. Satisfactorily completed the following five courses:
      - ACCT 229 Introductory Accounting 3
      - ECON 202 Principles of Economics 3
      - ECON 203 Principles of Economics 3
      - MATH 141 Business Mathematics I 3
      - MATH 142 Business Mathematics II 3
   b. BUAD students apply for upper level before the last class day of the semester before they expect to enter upper level. To enter upper level in the summer, all requirements must be completed by the beginning of the first summer session.
   c. Unless satisfactorily completed prior to Upper-level entry business students must successfully complete these three remaining Lower-level Common Body of Knowledge (CBK) courses at Texas A&M during their first upper-level semester:
      - ACCT 230 Introductory Accounting 3
      - ISYS 210 Fundamentals of Information Systems 3
      - MGMT 211 Legal and Social Environment of Business 3
   d. Students are encouraged to complete the freshman and sophomore sequence of courses as listed under Curriculum in Business. BUAD students may pre-register for upper-level business courses in the semester for which they have applied for upper level. However, BUAD students who fail to meet upper-level requirements prior to the start of the semester shall not be permitted to remain registered in upper-level business classes.

2. Transfer students:
   Transfer students admitted to Mays Business School will be classified as BUAD (lower-level Business) students until they complete all requirements listed previously in item 1, at which time they may apply for admission to an upper-level major field of study in the business school. Transfer students may immediately apply for upper level when admitted to Mays Business School if, and only if, they meet all upper-level requirements at that time.

3. Change of curriculum students:
   Texas A&M students who change curriculum into Mays Business School from another college or department at the University will be classified as BUAD (lower-level Business) students until they complete all requirements listed previously in item 1. Change of curriculum students who, when admitted to the business school, qualify to apply for admission to the upper level may do so.

4. Preference for available seats in junior- and senior-level business courses will be given to students who have been admitted to a degree granting major in Mays Business School. All ineligible students who pre-register for upper-level business classes are subject to cancellation of their enrollment in these courses.

---

### College of Veterinary Medicine and Biomedical Sciences—Biomedical Sciences

1. A Biomedical Sciences (BIMS) major will be admitted into the upper-level courses according to the following criteria:
   a. Completion of a set of Common Body of Knowledge (CBK) courses with a grade of C or better in each course completed at Texas A&M. Normally, for admission to BIMS upper-level courses, a student may have attempted a CBK course no more than twice.
   b. Common Body of Knowledge (CBK) courses
      - BIOL 111 Introduction to Biology I 4
      - BIOL 112 Introduction to Biology II 4
      - CHEM 101 Fundamentals of Chemistry I 4
      - CHEM 102 Fundamentals of Chemistry II 4
      - CHEM 111 Fundamentals of Chemistry Laboratory I 4
      - CHEM 112 Fundamentals of Chemistry Laboratory II 4
      - CHEM 227 Organic Chemistry I 4
      - CHEM 228 Organic Chemistry II 4
      - PHYS 201 College Physics 4
      - PHYS 202 College Physics 4
      - MATH 131 Mathematical Concepts—Calculus 3

   **Total Semester Credit Hours** 35

   b. A minimum of 55 completed semester hours with a cumulative resident Grade Point Ratio (GPR) of 2.5 or better.
   c. Process: Each student upon completing 55–65 semester credit hours must have a degree audit to verify upper-level eligibility.

2. The Biomedical Sciences Program will continue to accept changes of major into BIMS according to current Texas A&M University policy, but restrict changes of major into the upper-level courses (BIMS) according to the criteria listed in item 1. Students in other majors requesting a change of major to the BIMS program must also fulfill the criteria in item 1. In addition, the dean must verify availability of resources necessary to insure the student’s full-time enrollment in required upper-level courses prior to admission to upper-level status. If such courses are not available, the student will be denied admission to Biomedical Sciences.

3. To enter BIMS upper-level courses, transfer students must have:
   a. A minimum GPR of 3.0 in CBK courses with a grade of B or better in each completed course if taken at a 2-year college. A grade of C or better is accepted from a 4-year college.
   b. Transfer students admitted under another major and wishing to change into BIMS must complete one semester of graded coursework at Texas A&M University with a cumulative resident GPR of 2.5.
   c. Texas A&M University change of majors must have at least 55 semester credit hours with a minimum cumulative GPR of 2.5.

4. Students seeking readmission will be considered on a case-by-case basis, according to current catalog policy. No quotas will be placed on readmission; however, the decision to readmit will be dependent on resource availability and University policy.
5. Any BIMS student admitted to upper-level courses who then falls below the 2.5 GPR requirement will not be considered in good academic standing in their major and will be placed on college probation. All Biomedical Sciences majors must follow established probation rules for the Biomedical Sciences Program.

6. The Dean, Director or Department Head will reserve the right to waive CBK or GPR requirements within the criteria established in Texas A&M University Student Rules.

7. No courses other than BIMS 481, BIMS 484, VIBS 310, VIBS 311, or research/directed studies courses can be taken S/U to be used in the degree plan.

8. BIMS probation is determined at the end of the Spring semester. Students not meeting acceptable GPR requirements (2.5 BIMS majors with 55 or more hours or 2.0 area of concentration (USVM) or BIMS majors with less than 55 hours) will be required to attend Texas A&M University that summer and repeat courses as needed to raise their GPR.

9. Students may only attempt CVM courses a total of three times.

**Course Credit**

**Data and Research Services**

Data and Research Services has primary responsibility for conducting research about students’ learning and development at Texas A&M and for management of testing programs. The unit serves as the center for credit by examination, placement testing and correspondence testing, as well as national standardized testing. Other services include publication of research reports about student characteristics and abilities, test validation studies and evaluation studies, scanning and scoring services, and student ratings of faculty.

**Credit by Examination**

Undergraduate students at Texas A&M may earn course credits by demonstrating superior achievement on tests offered through several examination programs. Credit by examination is available to freshmen who plan to enter the University and to students who are currently enrolled. Credit earned by examination does not contribute to a student’s grade point ratio. The University awards credit for scores on certain tests published by the Advanced Placement Program (AP), the College Level Examination Program Computer-Based Testing (CLEP CBT), the SAT Subject Tests, DANTES Subject Standardized Tests (DSST) and the International Baccalaureate (IB) Program. Texas A&M also offers qualified students opportunities to earn credits by taking departmental examinations prepared by the faculty. Information concerning credit by examination may be obtained from Data and Research Services (http://dars.tamu.edu), (979) 845-0532.

Please note these regulations concerning credit by examination:

1. Test scores and/or credit eligibility must be reported formally to Data and Research Services for credit by examination to be awarded. Credit is posted to the academic record on or hardship forms are received by Data and Research Services, the student has officially enrolled in the University and the student has accepted the credit. For information regarding current procedures for accepting credit, please visit the Data and Research Services (http://dars.tamu.edu) website.

2. Students may not receive credit by examination for courses that are prerequisites to courses for which they already have credit except with the approval of the department authorizing the examination.

3. A student may not have credit posted for credit by examination for a course in which he or she is currently registered. If a student has acquired a grade or exercised First-Year Grade Exclusion on a course, then the student will not be eligible to take the equivalent departmental exam. Eligibility will not be affected if a student has a Q, W or NG in a course.

**Advanced Placement Program (AP)**

Examinations offered by the AP Program are administered during late spring by high schools. Students usually take the examinations after completing Advanced Placement courses, although experience in an AP course is not required. Interested students should contact their high school counselors for information concerning registration and test sites. High school students must currently enrolled students should have the College Board forward their scores to Data and Research Services, institution code: 6003. Advanced Placement scores of entering freshmen are generally received in July. Students will need to log onto their Howdy portal under My Records and then Credit by Exam to accept the credit earned via AP tests. Data and Research Services suggests visiting with your advisor before you accept credit.

The following list includes all AP examinations currently accepted for credit.

1 Credit in MATH 151 may be substituted for MATH 131, MATH 142 or MATH 171. Credit in MATH 152 may be substituted for credit in MATH 172.

2 Credit in physics is based on the curriculum of a student’s intended major.

For instructions on accepting AP credit, please visit http://dars.tamu.edu.

### College Level Examination Program Computer-Based Testing (CLEP CBT)

CLEP CBT tests are designed to evaluate nontraditional college-level education such as independent study, correspondence work, etc. Both enrolled undergraduate students and entering freshmen may receive CLEP CBT credit for the courses which are listed below. Only examination titles below are currently accepted. The minimum scores listed below are based on the current version of CLEP CBT Examinations. Students will need to log onto their Howdy portal under My Records and then Credit by Exam to accept the credit earned via CLEP tests. Data and Research Services suggests visiting with your advisor before you accept credit.

International Baccalaureate (IB)
Texas A&M University, in compliance with SB111, will grant at least 24 semester credit hours of course-specific college credit in subject-appropriate areas on all International Baccalaureate (IB) exam scores of 4 or above as long as the incoming freshman has earned an IB diploma. While some course credit will be awarded regardless of a student’s IB diploma status, some course credit at Texas A&M University may be subject to the successful completion of the IB diploma.

Entering freshman students should submit their International Baccalaureate transcript to Texas A&M University, institution code: 01355, for review. Students should contact Data and Research Services regarding their eligibility for course credit. Students should work with an academic advisor to determine the use of the IB credits in their individual degree plan and the impact accepting the credit may have upon tuition rebate eligibility, tuition charges for excessive total hours, and preparedness for sequential coursework based on IB test scores. Students will need to log onto their Howdy portal under My Records and then Credit by Exam to accept the credit earned via IB tests. Data and Research Services suggests visiting with your advisor before you accept credit.

Texas A&M University will notify IB applicants of their eligibility to receive credit by posting information on the website, Data and Research Services, and by establishing links to other web pages.

The evaluation of IB courses in order to identify the appropriate course credit is continuing and will be posted as it becomes available. The following list includes all IB examinations currently accepted for credit.

The minimum score required is based on the recentered scale. Students who took tests before April 1, 1995, should contact Data and Research Services to determine the minimum score required. For instructions on accepting SAT Subject credit, please visit http://dars.tamu.edu.

**Departmental Examinations for Entering Freshmen and Currently Enrolled Students**

Qualified entering freshmen may take departmental tests after being officially admitted into Texas A&M University. Currently enrolled students can also take the exams throughout the year. Contact Data and Research Services (http://dars.tamu.edu) for registration information. The tests are prepared by participating Texas A&M departments. Current offerings include:

Foreign Language (up to four semesters of coursework in French, German, Italian, Japanese, Latin, Russian, Arabic and Mandarin Chinese)

**Texas Success Initiative (TSI)**

The Texas Success Initiative (TSI) was instituted to ensure that students enrolled in Texas public colleges and universities possess the necessary academic skills to perform effectively in college and to provide diagnostic information about reading, writing and mathematics skills of each student. All undergraduate students who did not meet one of the allowed exemptions must take the approved TSI Assessment test.

Students who do not meet established cutoff scores or other approved exemptions for the TSI Assessment test are required by Texas law to be enrolled in, and actively attend, an academic skills course and/or program each semester prior to completing all TSI requirements. Academic skills courses in each of the three TSI areas are offered by Texas A&M. Failure to meet the attendance requirements of the academic skills course will result in withdrawal from Texas A&M. The hours for these courses will not count toward any degree program but may count toward determining full-time status.

Students required to take the TSI Assessment test should have their scores sent by the testing agency to Texas A&M University.

More information can be obtained from testing centers at most Texas public colleges and universities or by contacting:

Texas Higher Education Coordinating Board
P. O. Box 12788
Austin, TX 78711-2788

or
Baylor College of Dentistry (Health Science Center) – Caruth School of Dental Hygiene

Basis For Acceptance

All applicants will be considered using the following criteria. In addition, the applicant must be able to perform the essential functions required in the curriculum. The quality of the applicant’s academic achievement is a prime consideration. A grade point average (GPA) is computed based on all courses taken in college.

Preference for admission is given to students with:

- A cumulative GPA and Science GPA indicating ability to succeed in the program.
- Attention given to detail when completing the application.
- A comprehensive biographical sketch that includes information that will help the Admissions Committee know the applicant better. Details about the dental hygiene procedures that have been observed, a description of the community service projects in which you have participated and information concerning your interests, abilities and attitudes that have motivated you to make the commitment required for a career in dental hygiene are examples of information that might be included.

The application deadline is January 5. The Office of Recruitment and Admissions encourages applicants to submit the online application forms by December 1. All materials related to the application must be received in the Office of Recruitment and Admissions by February 1.

- The following must be included with the application when it is submitted online:
  a. Application for Admission
  b. Secondary Application
  c. List of courses in progress and those planned prior to enrollment in the dental hygiene program
  d. Biographical sketch
- Other materials that should be sent to complete your application:
  a. Application Fee ($35.00)
  b. Photograph sized 2 X 2 (does not have to be a passport picture - can be regular photograph cut down)
  c. Transcripts from high school and all colleges attended (if you attended a foreign high school, you do not have to submit a copy)
  d. Scores from Texas Success Initiative (TSI). (Or if exempt, SAT/ACT or TAAS– usually scores are listed on high school transcript; you do not have to submit scores separately.)
  e. Observation Verification Form (minimum 16 hours required)
  f. Evaluation Forms (submitted by a science instructor, dental hygienist and personal friend)
- An application is valid for one academic year only.
- Official transcripts are required and will be accepted only when sent directly from each school the applicant has attended.

- Recommendations are required from a dentist or a dental hygienist, a biology or chemistry instructor and an individual who has known the applicant for some time; for example, an employer or supervisor.
- It is the responsibility of the applicant to keep the application file current. Failure to supply grades, transcripts or recommendations may be perceived as an indication that the applicant is no longer interested in admission.

Interviews

Processing of applications begins the year prior to entrance into the professional program and continues until the class is filled. The applications are evaluated, and an invitation for an interview may be extended. The purpose of the interview is to determine the applicant’s knowledge of the dental hygiene profession. It also provides an opportunity for the applicant to see the facility, meet with the Admissions Committee and to ask questions about the Caruth School of Dental Hygiene program.

All prospective students are encouraged to contact the college with questions regarding prerequisite courses or the program.

To Access the Dental Hygiene Application Forms:

The applicant will need to create an account on the Banner Admissions Management Framework (BAMF) website. The applicant will be required to complete and submit the Baylor College of Dentistry (BCD) Dental Hygiene Application, the BCD Secondary Application and the Ethnicity Form.

The application for the Dental Hygiene Program will be available on the BAMF website from July 15 to January 5.

Download Forms (Adobe PDF files):

The Evaluation Form and Observation Verification Form are available for download. You will need to print these forms and submit them with signatures through regular mail.

- Evaluation Form – top section to be filled in by applicant
- Observation Verification Form

For questions about the application process, please contact The Office of Recruitment and Admissions at (214) 828-8231 or by email at admissions-bcd@bcd.tamhsc.edu.

Mail forms and transcripts to:

Office of Recruitment and Admissions
Texas A&M Baylor College of Dentistry
3302 Gaston Avenue, Room 525
Dallas, TX 75246-2013
USA

Transfer Credit

Transfer credit will be determined by each component in conjunction with the staff of the college on a course-by-course basis from official transcripts submitted in the competitive admissions process. Course content will be determined by the catalog course description or course syllabus.

Course acceptability is guided by these criteria:

- Courses completed at regionally accredited institutions are considered for transfer if:
  a. They are directly linked to the applicant's dental hygiene program.
  b. They are equivalent to courses offered at Texas A&M College of Dentistry in terms of content and rigor.
  c. They are categorized as essential functions required in the dental hygiene program.
  d. They meet the academic standards and prerequisites set forth by the Texas A&M College of Dentistry.

The applicant will need to create an account on the Banner Admissions Management Framework (BAMF) website. The applicant will be required to complete and submit the Baylor College of Dentistry (BCD) Dental Hygiene Application, the BCD Secondary Application and the Ethnicity Form.

The application for the Dental Hygiene Program will be available on the BAMF website from July 15 to January 5.
a. They are acceptable as credit for a bachelor’s degree at a regionally accredited institution.

b. Course content is at or above the level of courses specified in the BCD requirements for admission.

- Courses intended for use in a vocational, technical or occupational program normally do not transfer; general courses within this type of program may transfer.
- Credit on the transcript must appear in semester hours or credits that may be converted to semester hours.
- Credit by examination courses may be transferred if accepted by another college and followed by sequenced coursework.
- Equivalency of coursework is determined by content found in catalog course descriptions or syllabi of courses. In case of doubt, departmental faculty will determine equivalency. The final determination is left to the director of the Department of Dental Hygiene.
- As a general policy, coursework with a passing grade may be transferred, but the applicant must keep in mind that admission to the hygiene program is on a competitive basis and grades of F are calculated into the grade point average.
- Course hours will be evaluated on a course-by-course basis but will be transferred as a block of hours, and the grades do not calculate into the GPA for the hygiene program.
- Credit will be given for correspondence courses on a select basis.
- Typically, credit will not be given for courses completed at institutions not accredited by a regional accrediting agency.
- The BCD does not accept non-credit coursework to be used in lieu of coursework taken for academic credit.

### College of Nursing (Health Science Center)

There are three different tracks leading to a baccalaureate degree in nursing. The traditional BSN track is for students seeking their first degree in college. The second degree BSN track (post baccalaureate) is for individuals who have already earned a bachelor’s degree in another field of study. The third option is an RN to BSN program for registered nurses who hold an associate degree in nursing. Students admitted to the BSN track with an interest in earning a Master’s Degree-Family Nurse Practitioner may interview to be chosen for the Select BSN/MSN track.

Prerequisite courses, which are the essential foundation for nursing, must be completed before entry into upper-division nursing courses. In addition, all students must meet the core curriculum requirements for Texas A&M University if not already completed at another institution.

The following documents are required for an application to be considered complete and ready for review:

- Apply Texas Application
- Application fee
- Official college transcript(s)
- Completion of prerequisite and core curriculum courses with a grade of C or better
- Personal essay (see website for specific information)
- Admissions Assessment Exam (HESI A2) required for traditional, second degree and select track BSN applicants only
- Reference required for RN to BSN applicants only
- RN to BSN applicants must provide proof of State of Texas RN licensure in good standing
- Copy of permanent resident card, if applicable
- Official TOEFL Scores required for international applicants and must be taken within the past two years. Test scores must be sent directly from the testing agency to be considered official.

### Additional Requirements for International Applicants and Applicants with Foreign Credentials

Applicants with foreign transcripts must also include an official World Education Services (WES) or Educational Credential Evaluations, Inc. (ECE) transcript evaluation report listing course-by-course U.S. grade point equivalencies and semester credits received. Applicants from an institution that does not issue a transcript in English must submit the native language transcript along with an official English translation. These documents must include all original seals and/or signatures.

Applicants whose native language is not English are required to submit proof of English proficiency, which is satisfied by:

- a minimum TOEFL score taken within the previous two years of: 587 for paper-based testing (p-BT), or 240 computer-based testing (c-BT), or 95 Internet-based testing (i-BT), or
- a minimum IELTS score of 6.0 overall band
- completing all four years of high school in a U.S. accredited school, or
- earning a baccalaureate degree following four years of study at a U.S. accredited institution.

The College of Nursing requires an official copy of test scores and/or other documentation in order to verify English proficiency requirements. The test must have been completed within two years of the date of intended enrollment. International applicants will be expected to present declaration of finances, F-1 travel documents and the immigration informational questionnaire upon acceptance to the College of Nursing and meet all deadlines required by the Office of International Student Services.

Applications must be received by the posted deadline. No late documents will be accepted. Admission to the college is competitive. At the time of application, students must be enrolled in or have completed all prerequisite course requirements. Admission offers may be made to students finalizing courses and will be contingent upon successful completion of all prerequisite requirements and students presenting a clear criminal background check.
Students applying to the College of Nursing must complete selected coursework as a condition of acceptance. If the student completed a core curriculum from another Texas public institution in a previous degree program, they are not required to complete the college’s Core Curriculum. Students transferring from out of state, from a private institution, those with an international degree or anyone with concerns about this requirement, please contact the Office of Student Affairs for more clarification. Students will not be considered for admission unless the required coursework will be completed by the time of enrollment.

**College of Nursing (Health Science Center) Traditional, Second Degree and RN to BSN**

Application Fee: • $75 Paid through Apply Texas Application

Admission Standards: • Admission is competitive. • Strongly recommended that applicants present a minimum overall grade point average of 3.0 (on a 4.0 scale) and required minimum grade of “C” in each of the prerequisite courses.

Use of High School Record: • Not used for admission purposes but required upon acceptance

Number of Articulation Agreements: • Two: Blinn College and Austin Community College

TOEFL: See website for additional information

Other Requirements: Entrance exam for pre-licensure applicants; Reference for RN to BSN applicants; Personal Statement for all applicants through Apply Texas

**Texas A&M University at Galveston**

Texas A&M University at Galveston offers ocean oriented undergraduate and graduate curricula leading to Texas A&M University degrees in Maritime Studies, Marine Biology, Marine Engineering Technology, Marine Fisheries, Marine Sciences, Marine Transportation, Maritime Administration, Offshore and Coastal Systems Engineering, Ocean and Coastal Resources and University Studies. Graduate curricula are offered in Marine Resource Management (master’s level), Marine Biology (master’s and doctorate levels) and Maritime Administration and Logistics (master’s level). Applicants who wish to enroll must meet all requirements for admission as specified in the online catalog for Texas A&M University at Galveston. Admission information for Texas A&M University at Galveston may be obtained from the Office of Student Relations in Galveston. Results of the Scholastic Aptitude Test (Code 6835) or American College Test (Code 6592) should be sent directly to Texas A&M University at Galveston. The Texas A&M Maritime Academy at Texas A&M University at Galveston offers a training program concurrently with four undergraduate programs. These programs lead to licensing as a merchant marine officer.

For further information, see the section on Texas A&M University at Galveston or www.tamug.edu.

**Graduate Admission**

For information or applications for graduate admission, please contact:

Office of Graduate Admissions
Texas A&M University
P. O. Box 40001
College Station, TX 77842-4001
(979) 845-1060
graduate-admission@tamu.edu
http://admissions.tamu.edu/graduate

Please reference the Texas A&M University Graduate and Professional Catalog on this website.

**Registration and Academic Status**

Registration for the fall and spring semesters is accomplished at several times. During the fall and spring semesters (in November and April), a preregistration period is held for currently enrolled and readmitted students to register for the next semester. There are periods of announced open registration for students who were unable to preregister during the scheduled preregistration period. New Student Conferences serve as an opportunity for new undergraduate students to register. Further information concerning registration may be obtained from the academic calendar published in this catalog or from the Office of the Registrar. The schedule of classes is available online.

**Full-Time Student**

A full-time undergraduate student is defined as one who is registered for 12 semester hours during a fall or spring semester or 8 hours in a summer semester. Full-time enrollment for federal financial aid is always defined as 12 semester hours, including the summer term. A Q grade or W grade does not count toward the certification of enrollment status. Only hours for which a student is currently enrolled at Texas A&M University can be used toward certification of enrollment.

**Undergraduates Registering for Graduate Courses**

A senior undergraduate student with a cumulative grade point average of at least 3.0 or approval of his/her academic dean, is eligible to enroll...
in a graduate course and reserve it for graduate credit by filing a petition obtained from the student’s undergraduate college and approved by the course instructor, the student’s major department head, the dean of the college offering the course, and the dean of the student’s undergraduate college.

An academically superior undergraduate student with a cumulative grade point average of at least 3.25 or approval of his/her academic dean, is eligible to apply graduate credit hours toward his/her undergraduate degree program by filing a petition obtained from the student’s undergraduate college and approved by the course instructor, the student’s major department head, the dean of the college offering the course, and the dean of the student’s undergraduate college. Graduate credit hours used to meet the requirements for a baccalaureate degree may not be used to meet the requirements for a graduate degree.

VA Benefits

Students who are military veterans should note that to receive full VA benefits they must be registered for enough hours to be considered full-time for their degree during each term they are seeking benefits. This number may differ between degrees and during the summer semester. For hour requirements, please visit Veterans Services.

Maximum Schedule

An undergraduate student with an overall grade point average of 3.0 or better may register for a course load in excess of 19 hours in a fall or spring semester with the approval of his or her advisor. An undergraduate student with an overall grade point average of less than 3.0 must obtain approval of his or her dean before registering for a course load in excess of 19 hours in a fall or spring semester.

Classification

Each student has a classification which indicates the type of degree program in which the student is enrolled, and reflects the student’s progress within that program. The classifications are:

<table>
<thead>
<tr>
<th>Code</th>
<th>Classification</th>
<th>Definition</th>
</tr>
</thead>
<tbody>
<tr>
<td>U0</td>
<td>Undergraduate Non-degree</td>
<td>Students with a high school diploma (with the exception of high school concurrent enrollment participants) who do not intend to pursue a baccalaureate degree at Texas A&amp;M University. This includes:</td>
</tr>
<tr>
<td></td>
<td></td>
<td>a. Summer session only students.</td>
</tr>
<tr>
<td></td>
<td></td>
<td>b. Local residents or university employees taking courses on a part-time basis.</td>
</tr>
<tr>
<td></td>
<td></td>
<td>c. Others as may be deemed appropriate by the Office of Admissions and the college or program of admission.</td>
</tr>
<tr>
<td>U1</td>
<td>Freshman 0-29 hours</td>
<td></td>
</tr>
<tr>
<td>U2</td>
<td>Sophomore 30-59 hours</td>
<td></td>
</tr>
<tr>
<td>U3</td>
<td>Junior 60-89 hours</td>
<td></td>
</tr>
<tr>
<td>U4</td>
<td>Senior 90+ hours</td>
<td></td>
</tr>
<tr>
<td>U5</td>
<td>Postbaccalaureate Undergraduate</td>
<td>Students with a recognized baccalaureate degree who wish to complete requirements for a second baccalaureate degree at Texas A&amp;M University or to complete established Texas A&amp;M University certification requirements.</td>
</tr>
</tbody>
</table>

Undergraduate non-degree students are not permitted to enroll in courses until all degree seeking students have had the opportunity to enroll. Undergraduate non-degree enrollment begins on the first day of open registration. Enrollment may be limited by college or program policies. Admitted students are not eligible for refund of the admission processing fee regardless of course availability.

An undergraduate non-degree student must maintain a 2.0 GPA on all coursework attempted to remain eligible to register. Enrollment is subject to review at the end of each semester of enrollment. Enrollment beyond two years of attendance will be approved only in exceptional cases.

Should an undergraduate non-degree student desire admission to a degree program, regular formal application is necessary, including: a complete application for admission, the required application processing fee, the submission of all required credentials, and the meeting of all admission requirements.

An undergraduate non-degree student may not take graduate-level coursework.

Undergraduate non-degree students are subject to TSI and English proficiency requirements.

An undergraduate non-degree student does not qualify for financial aid through the University.

With few exceptions, undergraduate non-degree status is not available to international students.

The postbaccalaureate undergraduate classification (U5) has all the privileges and responsibilities of a senior classification (U4).
Distinguished Student and Dean’s Honor Roll

An undergraduate student who completes a semester schedule of at least 15 graded hours or a summer session schedule of at least 12 graded hours with no grade lower than C and with a grade point average of not less than 3.5 for the semester or for a summer session shall be designated “distinguished student.” A student who, under the same circumstances, achieves a grade point average of at least 3.75 shall also be designated as a member of the “dean’s honor roll.” First semester freshmen must complete a semester schedule of at least 15 hours with no grade lower than C, no Q-drops and with a grade point average of not less than 3.5 for “distinguished student” designation and a 3.75 for “dean’s honor roll.”

Official notification of these designations will be issued to the student by the dean of the student’s college. The hours earned with a grade of S shall not be included in determining minimum hours required for the designation of “distinguished student” or “dean’s honor roll.” A grade of I or U disqualifies a student from being considered as a “distinguished student” or for the “dean’s honor roll.” Grades of Q, W, and NG may not be included in the 15 graded hours. Only undergraduate courses or graduate courses used for the undergraduate degree will be used in either calculation.

Scholastic Probation

Scholastic probation is conditional permission for an undergraduate student to continue in the University after he or she has become scholastically deficient. For university policy regarding scholastic deficiency and scholastic probation, see the Texas A&M University Student Rules (http://student-rules.tamu.edu).

Withdrawal from the University

A student wishing to withdraw from the University before the completion of a semester or summer term is required to comply with the official withdrawal procedure. This process is initiated by submitting a request through the Student Withdrawal channel on the My Record tab in the Howdy portal. Students may not withdraw after the Q-drop deadline. The student’s dean will retain the authority to support a student withdrawal after the deadline.

During the summer session, a student must withdraw from the University if the student decides to drop all in progress courses and does not intend to enroll in any subsequent summer session.

For university policy regarding withdrawal, see the Texas A&M University Student Rules (http://student-rules.tamu.edu).

Correct Addresses

It is necessary to have a correct residence address on file with the University. Students may change their address in Howdy. International students must have a correct physical and permanent address. International students must go to International Student Services to change their physical and the permanent addresses.

Texas A&M may also use email for official communications. It is each student’s responsibility to claim his/her Texas A&M University email account (http://gateway.tamu.edu) and to check that account on a frequent and consistent basis.

Grading System

Because students attend a college or university to extend their education, grades are usually given as an indication of the proficiency of their endeavors. The student’s semester grade in a course shall be based upon performance and/or participation in class, exercises and tests, laboratory work and final examination as applicable to the course. The proportionate weight assigned to each of the factors shall be determined by the department administering the course.

The basis upon which the final grade will be determined shall be distributed in written form to the class during the first class meeting.

There are five passing grades at the undergraduate level, A, B, C, D and S, representing varying degrees of achievement; these letters carry grade points and significance as follows:

<table>
<thead>
<tr>
<th>Letter</th>
<th>Description</th>
<th>Grade Points per Semester Hour</th>
</tr>
</thead>
<tbody>
<tr>
<td>A</td>
<td>Excellent</td>
<td>4</td>
</tr>
<tr>
<td>B</td>
<td>Good</td>
<td>3</td>
</tr>
<tr>
<td>C</td>
<td>Satisfactory</td>
<td>2</td>
</tr>
<tr>
<td>D</td>
<td></td>
<td></td>
</tr>
<tr>
<td>S</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>
There are two failing grades, F and U, indicating work of unsatisfactory quality.

**Repetition of a Course to Improve Grade**

Any undergraduate student who wishes to repeat a course must do so before he or she completes a more advanced course in the same subject. What constitutes a more advanced course will be determined by the head of the department offering the course.

Credit for a course failed may be obtained only by registering for and repeating the course. The original grade will remain on the student’s permanent record, and both grades will be used in computing the GPA. An F or U previously earned is not removed once the course is passed. Credit for each repeated course may only be used once toward degree requirements.

A student repeating a course completed at Texas A&M University in which a grade of B or better has been earned will not receive grade points for the repeated course, unless the catalog states the course may be repeated for credit.

**I and X Grades**

A temporary grade of I (incomplete) at the end of a semester or summer term indicates that the student has completed the course with the exception of a major quiz, final examination or other work. The instructor shall give this grade only when the deficiency is due to an authorized absence or other cause beyond the control of the student. When an instructor reports an incomplete grade to the Office of the Registrar, he or she will fill out an “Incomplete Grade Report,” which is filed with the department head. Copies are sent to the student and to the student’s academic dean. This report includes:

1. a statement of the instructor’s reason for awarding the incomplete grade and
2. a statement concerning the remaining work to be completed before the last day of scheduled classes of the next fall or spring semester in which the student enrolls in the University unless the student’s academic dean, with the consent of the instructor (in the absence of the instructor, the department head), grants an extension of time for good reason.

If the incomplete work is not completed within this time or if the student registers for the same course again, the I will be changed to an F by the Office of the Registrar.

The X notation is assigned to a course by the Office of the Registrar at the end of a semester or summer term only when a grade is not submitted by the instructor. The Office of the Registrar will notify the dean of the college in which the course is taught that an X notation has been made. The dean of the college offering the course will request, through the department head, that the instructor submit a Grade Change Report Form removing the X notation and assigning a letter grade. The instructor will have 30 days from the beginning of the succeeding semester or summer term to report a change of grade to the Office of the Registrar. If a Grade Change Report Form is not received during this time period, the Office of the Registrar will automatically remove the X notation and assign a grade of F.

**Q-Drop and Add and Drop**

1. A student may enroll in a class during the first five class days of a fall or spring semester or during the first four class days of a summer term. A student requesting to add a course after these deadlines must have the approval of the student’s dean or designee and department.
2. A student may drop a course with no record during the first 12 class days of a fall or spring semester and during the first four class days of a summer term. Following this period, if approved by the dean of the college or his or her designee, a student may drop a course without penalty through the 60th class day of a fall or spring semester, the 15th class day of a summer term or the 35th class day of a 10-week summer semester. The symbol Q shall be given to indicate a drop without penalty.

Under section 51.907 of the Texas Education Code, “an institution of higher education may not permit a student to drop more than six courses, including any course a transfer student has dropped at another institution of higher education.” This statute was enacted by the State of Texas in spring 2007 and applies to students who enroll in a Texas public institution of higher education as first-time freshmen in fall 2007 or later. Any course that a student drops is counted toward the six-course limit if: (1) the student was able to drop the course without receiving a grade or incurring an academic penalty; (2) the student’s transcript indicates or will indicate that the student was enrolled in the course; and (3) the student is not dropping the course in order to withdraw from the institution.” Some exemptions for good cause could allow a student to drop a course without having it counted toward this limit, but it is the responsibility of the student to establish that good cause.

Undergraduate students at Texas A&M University will normally be permitted four Q-drops during their undergraduate studies. However, in order to comply with this statute a student who has dropped courses at other Texas public institutions may not be permitted four Q-drops if the student’s total number of dropped courses would exceed the State limit of six.

3. Any course taught on a shortened format or between regularly scheduled terms will have add/drop, Q-drop and withdrawal dates.

</table>
proportionally the same as if the course were offered in a regular term. These dates will be determined by the Office of the Registrar.

4. A student who drops a course after the Q-drop period has elapsed will receive a grade of F unless unusual circumstances exist as determined by the student’s dean. A grade of W may be recorded by the dean of the student’s college if it is determined such circumstances do exist.

Satisfactory/Unsatisfactory

Undergraduate students may be permitted to take courses in their degree programs at Texas A&M University on a satisfactory/unsatisfactory (S/U) basis consistent with the requirements of the student’s college. The hours for which a student receives a grade of satisfactory shall not be included in the computation of the student’s semester or cumulative GPA; a grade of unsatisfactory shall be included in the computation of the student’s grade points per credit hour as an F. A grade of satisfactory (S) will be given only for grades of C and above; a grade of unsatisfactory (U) will be given for grades D and F. The hours earned on a satisfactory/unsatisfactory basis shall not be included in the designation of distinguished student or dean’s honor roll.

Students on probationary standing may be required to take KINE 199 or electives on an S/U basis as determined by published college policies. Students entering Texas A&M University in the fall 2001 semester and later must enroll in their first KINE 199 on an S/U basis. Effective fall 2003, Health and Kinesiology majors must enroll in KINE 199 as a graded course. Students registered for KINE 198 or additional classes of KINE 199 who wish to change the grade type from a graded course to S/U or from S/U to a graded course, may do so in Howdy. All requests for KINE 198 and KINE 199 changes must be completed on or before the Q-drop deadline for the fall, spring or summer semester.

Students must register for courses on an S/U basis during the official registration periods and shall not be permitted to change the basis on which their grades will be recorded on their official transcripts, except for unusual circumstances and with the approval of the student’s academic dean.

Semester Credit Hour

A lecture course which meets one hour per week for 15 weeks is worth 1 semester credit hour. Thus, a course worth 3 semester credit hours, meets three hours per week. Credit hours for laboratory courses are determined to be some fraction of the number of hours spent in class.

The State of Texas defines a semester credit hour in Rule 4.6 of the Texas Administrative Code, “Minimum Length of Courses and Limitation on the Amount of Credit that a Student May Earn in a Given Time Period”. For more information on Rule 4.6, please visit the State of Texas webpage.

Grade Point Average (GPA)

Only the grade earned in coursework for which the student was registered in this institution shall be used in determining his or her grade point average. Students anticipating graduating with honors should refer to that section of this catalog for information concerning the computation of grade point averages for that purpose.

A student’s grade point average for any period shall be computed by dividing the total number of semester hours for which he or she received grades into the total number of grade points earned in that period. Semester credit hours to which grades of F or U are assigned shall be included; those involving grades of W, Q, S, X, NG and I shall be excluded.

Classification

Classification for academic purposes shall be based solely on scholastic progress as shown by the official records in the Office of the Registrar. Sophomore, junior and senior classification will be granted students who have passed 30, 60 and 90 semester hours, respectively.

Grade Reports

Midsemester Report

Near the middle of the fall and spring semesters, a preliminary report, showing the current progress of all undergraduate students who have completed less than 30 semester credit hours of coursework at Texas A&M, and of a selected group of other undergraduate students that the academic deans/departments are monitoring, will be made available. Preliminary grades are not recorded on the student’s permanent record. Grades are available in Howdy.

Final Grade Report

End of semester final grades are available in Howdy. No student grade may be posted in a manner that is personally identifiable unless the student has given written consent in advance.

Parent/Guardian Access to Grades

A parent or guardian may access midterm and final grades in Howdy after the student sets the parent access password. The Office of the Registrar cannot access the passwords created by students for parental access.

Transcripts

Students applying for admission to Texas A&M are required to submit transcripts of previous academic work and in some cases, results of standardized tests. The submission of altered documents or the failure to furnish complete and accurate information on admission forms will be grounds for disciplinary action.

Individuals who have attended the University may obtain an official transcript of their completed work, provided they have no financial obligations to the University. A fee, which, according to state law must be paid in advance, will be charged for each copy. During grading and degree posting, official transcripts may be produced for enrolled students only if all courses for that semester or term are shown as in progress (IP) or have all final grades posted. Students and former students may submit a Transcript Request Order form in person, by mail, by email, by fax or by completing the transcript request form in the Howdy portal. Transcript requests will not be accepted over the phone. A faxed or emailed request must be paid using a credit card from a United States bank. A transcript request ordered through the Howdy portal must be paid either by electronic check (ECH) or by credit card from a United States bank. Requests made in person or by mail may only be paid with check, money order or a credit card.

Housing

Adult, Graduate and Off Campus Student Services

http://agoss.tamu.edu
AggieSearch provides students access to apartment and property listings, as well as roommate search options.

The Off Campus Survival Manual introduces students to the community and covers leases, transportation, security deposits, cost estimates, and more.

On-Campus Housing and White Creek Apartments
http://reslife.tamu.edu

Admission to the University is required prior to application for campus housing.

Undergraduate students can apply for campus housing online. Applications should be completed as soon as possible following admission since the date of application for housing is important in the housing assignment process. An application fee and housing deposit (or applicable waiver) are required at the time of application.

On-campus housing is assigned on a first-come, first-served basis. With the exception of the Corps of Cadets, students are not required to live on campus at Texas A&M.

University Apartments (The Gardens)
http://reslife.tamu.edu/apartments

Available for graduate students, married students, students with dependent children, international students, U.S. military veteran students, students who are at least 21 years old, or undergraduate students who have completed at least 30 credit hours.

Fully furnished one- and two-bedroom units are available. Rent for The Gardens can be monthly or by semester and includes furniture, parking, cable TV service and high-speed Internet. Students pay electricity. All leases are either 9- or 12-month leases.

Application forms, rental rates and additional information may be obtained online.

Orientation

Aggie Honor System Office
http://aggiehonor.tamu.edu

All Texas A&M students, graduate and undergraduate, part-time or full-time, in residence or in distance education, are expected to follow the guiding rule of the Aggie Honor Code: “An Aggie does not lie, cheat, or steal or tolerate those who do.”

Upon accepting admission to Texas A&M University, a student immediately assumes a commitment to uphold the Honor Code, to accept responsibility for learning, and to follow the philosophy and rules of the Aggie Honor System Office (http://aggiehonor.tamu.edu). Students will be required to state their commitment on examinations, research papers, and other academic work. Ignorance of the rules does not exclude any member of the Texas A&M community from the requirements or the processes of the Aggie Honor System Office.

ExCEL Program
http://excel.tamu.edu

Texas A&M University’s Excellence Uniting Culture, Education, and Leadership (ExCEL) is a student organization and student support program housed in the Department of Multicultural Services.

ExCEL focuses on freshman students by helping them discover the academic, social, and personal balance necessary to facilitate their success at Texas A&M University and beyond. Through Freshman involvement programs and peer mentor interactions during the Fall semester, ExCEL helps build a sense of community by assisting freshmen in making a smooth transition from high school to college.

ExCEL kicks-off the program with a two-day Orientation Conference held the week before fall classes begin, familiarizing participants with the program and life at Texas A&M University.

Fish Camp
http://fishcamp.tamu.edu

Fish Camp is an optional program intended to provide incoming students the opportunity to establish friendships, meet student leaders, become familiar with Aggie traditions and learn about Texas A&M campus life. Faculty and staff members speak on topics such as study habits, personal goals, Aggie traditions and history, involvement and campus services. Held during a three-week period preceding the fall semester, each four-day, three-night session is designed to aid students in the transition from high school to college and, particularly, to Texas A&M.

In addition to providing educational programs, group activities and small group discussions, the camp allows students to get to know each other through recreation, intramural sports and evening theme mixers. Fish Camp is not just a four-day activity in August; activities typically continue through the first month of the Fall semester. For more information on Fish Camp and how to register for a session, please visit our website.

Howdy Camp
http://atc.tamu.edu

Howdy Camp is a student-run, three-day, two-night extended orientation camp program for freshman and transfer students entering Texas A&M University in the spring semester.

Howdy Camp is the spring semester’s equivalent to Fish Camp and T-Camp. Held over a three-day period in January prior to spring classes, new Aggies are introduced to the many traditions, indescribable spirit, and customs of Aggieland. Additionally, Howdy Camp doesn't end when the bus leaves camp! Camp Counselors continue to be available and serve as resources during the semester as students complete their transition into Texas A&M. Howdy Camp is hosted by the student organization Aggie Transition Camps.

New Student Conferences
http://studentlife.tamu.edu/nsfp

• Held each year for undergraduate students entering Texas A&M University. New students are required to register for and attend a conference in order to accept their offer of admission and register for classes.
• During the conference, new students will meet with academic advisors for curriculum advisement and selection of their first semester courses.

• In addition to referral services for students during their first year, New Student and Family Programs coordinates the following programs: New Student Conferences (NSC); Gig ‘Em Week: Aggieland’s Week of Welcome, full of free events and opportunities for new and returning students.

• Resources:
  • Parent and Family Programs – resources and services for family members
  • New Aggie News newsletter
  • New Student Handbook
  • Family Calendar designed specifically for family members of newly admitted students
  • Aggie Connection Newsletter – provides family members information on campus events, issues facing first-year students, and updates on campus resources.

Transfer Camp (T-Camp)
http://atc.tamu.edu

Held in August each year, T-Camp is a three-day, two-night extended orientation camp experience for transfer students entering Texas A&M in the summer and fall semesters. Through staff presentations, student skits, and small group discussion time, new students will leave camp with knowledge about Texas A&M campus resources and many new friends.

Additionally, T-Camp doesn't end when the bus leaves camp! Your counselors will continue to be available and serve as resources as you complete your transition into Texas A&M. Counselors will be at the T-Camp Backyard Bash reunion, will show you around the MSC Open House, and will plan frequent camp hangouts. Counselors will also coordinate campus tours so that you are not lost on your first day! T-Camp is hosted by the student organization Aggie Transition Camps.

Academic Advising

• Academic advising is a collaboration between a student and an academic advisor. Through teaching and learning experiences, the student sets goals, acquires information and services, and makes decisions consistent with interests, goals, abilities and degree requirements.

• Academic advising at Texas A&M University is an important component of student learning, contributing to the success of all students through:
  • Supporting student achievement of the University Learning Outcomes and commitment to learning for a lifetime
  • Being responsible to and respectful of the individual student
  • Encouraging commitment to lifetime learning by directing students toward opportunities to interpret, reflect upon, and apply their classroom experiences in ways relevant to their careers and their lives
  • Interpreting and conveying Texas A&M University’s mission to students
  • Supporting the educational policies, procedures and values of the department, college and university; likewise, academic advising relies on the support and resources of the university, college and department
  • Involving other university programs, services and individuals, when appropriate in the advising process
  • Being responsible for professional academic advising, training, development and practices

Academic Success Center
http://successcenter.tamu.edu

• Academic Coaching
• Workshops and courses
• Supplemental Instruction (SI)
• Tutor Zones (TZs)/Peer Tutoring

Career Center
HireAggies.com

• The Texas A&M University Career Center provides comprehensive services to students in planning their careers, gaining work-related experience, and securing professional employment upon graduation. Our goal is to assist you every step of the way, from your freshman year through graduation, and after, as a Former Student. We offer a variety of programs, services and resources:
• Career Exploration, Assessment, and Planning
• Job Search Tools, Resume Writing, Interview Preparation
• Professional Networking Resources and Events
• Full-time positions, Internships, Externships, Cooperative Education and Work Abroad
• Presentations to Classes and Student Organizations, Workshops and Panel Discussions, Career Fairs, and Webinars
• Employer Contacts, Campus Recruiting
• Individual appointments, Walk-in Advising, Mock Interviews

One of the largest programs of its kind in the nation, the Career Center has been recognized nationally and regionally for our many Best Practices. In a Wall Street Journal survey, recruiters ranked Texas A&M as the second most preferred university in hiring college talent nationwide. The Career Center can be found online at HireAggies.com (http://HireAggies.com) and is located in the Koldus Building, Suite 209. You can also Like us on Facebook and Follow us Pinterest, Twitter, and YouTube.

Disability Services
http://disability.tamu.edu

• Reviews and maintains student disability documentation
• Determines appropriate accommodations
• Facilitates exam accommodations
• Provides sign language interpreting and transcription services
• Obtains course materials in alternative formats
• Consults on disability-related issues

Resource and Referral Center that Provides:
• Resource Library (Books, Periodicals, Brochures and Films)
• Programming
• Education
• Advocacy
• Leadership Development
• Visibility

George Bush Presidential Library and Museum
http://Bush41.org

The George Bush Presidential Library and Museum at Texas A&M University is dedicated to preserving and making available the records and artifacts of George H.W. Bush, 41st President of the United States. We promote civic literacy and increased historical understanding of our national experience, and foster a community of public service and volunteerism. We accomplish this mission by offering:
• Rich Educational and Public Programs
• Original Museum Exhibits
• Access to our Archival Holdings
• Research Opportunities
• Special Events
• Unique Volunteer and Internship Positions
• Foundation Memberships

The George Bush Presidential Library and Museum can be found online at http://Bush41.org and is located at 1000 George Bush Drive West, College Station, Texas 77845. For additional information on the resources the George Bush Presidential Library and Museum have to offer please call 979-691-4000 for all Museum inquiries or 979-862-2251 for all Foundation or Membership inquiries.

Health Promotion
http://studentlife.tamu.edu/hp

• Provide educational health information and consultation
• Presentations available upon request
• Body fat analysis
• Provide educational information regarding alcohol and other drugs
• Peer health educator training and outreach
• Resource tables or interactive programming available for student events

Human Resources
http://employees.tamu.edu

• Health Insurance and Benefits

The Corps Experience
http://corps.tamu.edu

• The Corps of Cadets is the largest and most visible student organization at Texas A&M. Known as the Keepers of the Spirit and the Guardians of Tradition, many of Texas A&M’s most cherished traditions grew out of the Corps, including Midnight Yell Practice, Aggie Muster and Silver Taps. Currently, over 2,400 young men and women are Corps members.
• Most cadet graduates pursue a career in the public and private sector; however, the Corps of Cadets consistently commissions more officers than any institution other than the service academies.
• Academic excellence is the top priority of the Corps of Cadets offering scholastic advising and cadet-led support programs as well as access to state-of-the-art academic facilities.
• Cadets who pursue non-military careers declare themselves candidates for the Academic Certificate in Leadership Studies – 12 credit hours of university-recognized leadership coursework noted on the student’s official university transcript.
• The Corps of Cadets offers cadet organizations (The Fightin’ Texas Aggie Band, a precision military band; the Ross Volunteers, the official honor guard for the governor of the state of Texas; the Fish Drill Team, a precision drill unit; and Parsons Mounted Cavalry, the only mounted ROTC unit in the United States), ROTC special units (Army’s Ranger Challenge Team and Rudder’s Rangers, Navy SEAL Platoon, Marine Recon Platoon and the Air Force’s Arnold Air Society) and advanced course ROTC contracts.

Department of Multicultural Services
http://dms.tamu.edu

• Home to several student organizations and learning experiences fostering environments for student engagement, development and learning. Our student organizations include Aggies 2 Aggies; Asian Presidents’ Council (APC); Black Student Alliance Council (BSAC); Hispanic Presidents’ Council (HPC); Excellence Uniting Culture, Education, and Leadership (ExCEL); and Southwestern Black Student Leadership Conference (SBSLC).
• Outside of student organizations, we offer additional developmental opportunities including African American Student Leadership Institute (AASLI), Community Conversations, Cultural Day Trips, Cultural Leadership Understanding and Exploration for Sophomores (CLUES), Diversity Training Institute (DTI) and Institute for the Development and Education of Asian American Leaders (IDEAAL). Our department is also home to a free tutorial service providing one-on-one and small group tutoring in specific courses.

Office of Fraternity and Sorority Life (OFSL)
http://aggiegreeks.tamu.edu

• Housed in the Department of Student Activities, the Office of Fraternity and Sorority Life’s mission is to build an inclusive fraternity and sorority community at Texas A&M and enhance the collegiate experience by supporting opportunities for leadership, academic success, civic engagement and the creation of fraternal bonds. Our office serves as a liaison among our collegiate chapters, parents, alumni, international organizations, and Texas A&M University to provide organizational
guidance, educational programs, and resources while challenging members to live their fraternal values.

- Fraternities and Sororities are a fundamental part of Texas A&M University. We are home to 58 internationally affiliated or local Greek-letter organizations governed by one of four councils: Collegiate Panhellenic Council (CPC), the InterFraternity Council (IFC), the Multicultural Greek Council (MGC), and the National Pan-Hellenic Council (NPHC). Our fraternities and sororities collectively constitute the largest membership-based and multi-faceted community on campus.

- Representing 10 percent of the undergraduate student population, fraternity and sorority members are committed to their academics, developing and strengthening their leadership skills, volunteering time in the community and continually forming a campus and cultural support network for current and incoming Aggies. Fraternities and sororities have enhanced the lives of more than 20,000 Aggies since their inception.

**Intercollegiate Athletics**

www.aggieathletics.com

- Texas A&M is a member of the National Collegiate Athletic Association (NCAA) and the prestigious Southeastern Conference (SEC), which also includes the University of Alabama, University of Arkansas, Auburn University, University of Florida, University of Georgia, University of Kentucky, Louisiana State University, University of Mississippi, Mississippi State University, University of Missouri, University of South Carolina, University of Tennessee and Vanderbilt University.

- Texas A&M sponsors 20 intercollegiate athletics teams. The nine men’s programs are football, basketball, baseball, golf, indoor track and field, outdoor track and field, cross country, swimming and diving, and tennis. The 11 women’s programs are basketball, cross country, golf, indoor track and field, outdoor track and field, softball, swimming and diving, tennis, volleyball, soccer and equestrian.

- Texas A&M brought home four national champion titles in 2011 as the women’s basketball team, the men’s and women’s outdoor track and field squads and the women’s western equestrian all won their respective national championships. The track and field program accomplished the double national titles for the third straight year, a historic accomplishment in NCAA history.

- Aggie athletes have earned more than 800 All-American citations and hundreds have gone on to successful professional careers in their respective sports. In addition, Texas A&M has produced a number of Olympic athletes, including a record number of Aggies who competed in the 2012 Summer Olympic Games.

- The mission of Texas A&M athletics is “Building Champions” and it at the heart of the athletic department’s Mission Statement: “Texas A&M Athletics commits to Building Champions through academic achievement, athletic excellence and national recognition of our student-athletes, teams and programs. We provide our student-athletes with all the necessary tools for them to be Champions in their sport and in life. The integrity of our program takes root in the tradition and spirit of Texas A&M, bringing honor and distinction to our University.”

**Memorial Student Center (MSC)**

http://msc.tamu.edu

- Programming at the MSC, Texas A&M’s student union, enriches the living and learning experience in Aggieland. The MSC’s student-managed program committees produce hundreds of programs each year in the arts, cultural and educational awareness and exploration, leadership development, and service projects on campus and in the community. Our programs include the OPAS performing arts series, art exhibitions in the MSC Reynolds Gallery, concerts, weekly films, lectures and speakers discussing current events and national affairs, the MLK Breakfast, Salsa Dance Night, and MSC Open House.

- MSC programs also offer students excellent academic, personal, and professional development opportunities. Student program committee members learn leadership and professional skills through the experience of managing their own organizations and producing programs for the campus community. Students can get practical experience in budgeting, communication, fund development, team development, program planning and logistics, meeting facilitation, public speaking, and even technical skills such as running sound for a concert or installing an art exhibit.

- The MSC Box Office provides students and organizations with convenient and affordable ticketing, cash handling, and sales services. The Box Office makes selling easier by eliminating the worry and risk of cash handling by providing online sales and by providing extensive reporting capabilities that take the hassle out of accounting tracking sales and cash flow.

**Music Activities (MUSA)**

http://musa.tamu.edu

**Band Opportunities**

- **Fightin’ Texas Aggie Band** – The Fightin’ Texas Aggie Band is nationally known for its precision military marching formations on the football gridiron and is the largest military marching band in the nation. This 400+ member, Corps of Cadets unit is the official marching band of Texas A&M University. Corps of Cadets membership is required as well as an audition with the directors. Please refer to our website (http://musa.tamu.edu) for more information.

- **University Concert Bands** – Wind Symphony, Symphonic Winds, Symphonic Band and Concert Band. These ensembles consist of outstanding wind and percussion players from all areas of the Texas A&M campus. Literature performed by the bands is chosen from the best of traditional and contemporary band works. The bands perform at least two concerts per semester and occasionally participate in off-campus concerts and tours. Students from all majors are welcome in the band, and Corps of Cadets membership is not required. An audition is required to participate in the bands. Please refer to our website (http://musa.tamu.edu) for more information.

- **University Jazz Ensembles** – These two groups utilize standard 17-piece, large jazz ensemble instrumentation for 13 winds and 4 rhythm section instruments. The bands perform select literature from the best traditional and contemporary big band jazz repertoire. The ensembles perform at least two concerts each semester, including campus and community performances. An audition is required to participate in the jazz ensembles. Please refer to our website (http://musa.tamu.edu) for more information.

- **Hullabaloo Band** – The Hullabaloo Band is housed in the Athletic Department and is a sponsored student organization, consisting of 100 student musicians that support Texas A&M Volleyball, and Men’s and Women’s Basketball. The band regularly travels to tournaments with the teams during postseason play. An audition is required to participate in the Hullabaloo Band. Please refer
Choral Opportunities

- Century Singers – The Century Singers is a close-knit family that connects through a shared passion for music. Members also have the opportunity to participate in events throughout the year including overnight retreats and activities such as ice-skating, movie nights, and group dinners. Involvement in both social gathering and formal rehearsals brings members together as Aggies, musicians, and friends. This creates a truly unique and rewarding experience that will be remembered for a lifetime. An audition is required to participate in the Century Singers. Please refer to our website (http://musa.tamu.edu) for more information.

- Singing Cadets – The purpose of the Singing Cadets is to enhance the public relations of Texas A&M University through musical presentations as deemed appropriate by the Director and to develop disciplined leaders of character as defined by the Singing Cadet Handbook. The four pillars of the Singing Cadets are Purpose, Unity, Spirit, and Honor. Together, these four pillars have formed the solid foundation that has inspired and enabled our organization to succeed in carrying out its purpose for over a century. An audition is required to participate in the Singing Cadets. Please refer to our website (http://musa.tamu.edu) for more information.

- Women's Chorus – The Texas A&M Women's Chorus is a recognized student organization that strives to promote excellence in the fine arts and to encourage cultural expansion at Texas A&M. They also aim to provide entertainment for the campus community, and to enhance the perception of the ensemble at all levels. The choir travels throughout Texas, beyond our state borders, and internationally, and performs a varied repertoire of sacred and secular classical selections. An audition is required to participate in the Women's Chorus. Please refer to our website (http://musa.tamu.edu) for more information.

Orchestral Opportunities

- University Orchestras – The orchestra program at Texas A&M consists of two orchestras; the Chamber Orchestra and the Philharmonic Orchestra. Both of these groups are comprised of students from all majors at the university. Both orchestras provide students with outstanding musical experiences while allowing time for academics and other interests. Students in the orchestras perform the best of both string and symphony orchestra literature at a high level of artistic achievement in a focused and supportive environment. An audition is required to participate in the orchestras. Please refer to our website (http://musa.tamu.edu) for more information.

Recreational Sports

http://recsports.tamu.edu

- Most Texas A&M students are automatically Rec Members. All you need is your student ID to utilize the Student Recreation Center (Rec Center) and other Rec Sports facilities. Persons with disabilities are invited to contact Member Services to inquire about accommodations.
- Drop-in recreation encompasses the use of recreational facilities such as swimming/diving pools, walking/jogging track, handball/raquetball courts, and indoor soccer, basketball, volleyball and badminton courts. The Rec Center also features a bouldering wall, an indoor rock climbing facility, outdoor basketball and sand volleyball courts, extensive weight and fitness areas, dance/activity rooms, and a world-class natatorium featuring indoor and outdoor pools and a diving well. Facilities may be used on a drop-in basis except when reserved for classes or university functions. Daily guest passes are available for visitors.
- Rec Sports also offers aquatics classes, group exercise classes, endurance programs/boot camps, personal training, specialty classes, massage therapy, intramural sports, the Texas A&M Sport Clubs program, Outdoor Adventures, CPR certification classes, and the Walk of Champions brick campaign.

Speech and Debate Team

http://speech.tamu.edu

- Compete at national level while impacting the community and the world at a grassroots level.
- Compete in debate, public address events, individual limited preparation events and oral interpretation events.
- Student-run, student-funded and student-oriented organization.

Student Activities

http://studentactivities.tamu.edu

- Student Activities is the premier hub for resources regarding the many leadership and involvement opportunities on campus. At Texas A&M, we care about helping Aggies develop skills both in and out of the classroom that will prepare them for life beyond Aggieland. Whatever it is that you love, Student Activities is here to help you practice your passion through involvement in one of our 1000+ student organizations. The perks of getting involved range from reaching your leadership potential to networking with administrators and potential employers to forming lasting friendships.
- The Department of Student Activities houses some key involvement opportunities through the 50+ fraternity and sorority chapters that can be found in our Center for Fraternity and Sorority Life. The Student Government Association is yet another opportunity for those who are passionate about representing the student voice on campus.
- At Texas A&M, Aggies are held to a high standard of leadership and selfless service. To promote and develop these qualities, our Leadership and Service Center offers a number of leadership programs to help you reach your leadership potential, and it also houses several service-based organizations such as The Big Event and Aggie Replant. We also provide a way for Aggies to connect and volunteer with local community agencies through our AggieServe database (http://aggieserve.tamu.edu).

Student Government (SGA)

http://sga.tamu.edu

- SGA is comprised of the executive, legislative and judicial branches. Members of these branches work to advocate for student needs and help better the Texas A&M campus.
- In addition, SGA has four commissions – Development, Election, Diversity and Legislative Relations. Each of these serve to carry out the goals of the Student Body President from fundraising money for all of SGA to advocating for students at the state level.
- Finally, SGA also houses 14 committees including CARPOOL. The BIG Event, Muster and more. These committees strive to enhance the student body through their leadership, programs, conferences and traditions, and they directly have an impact on the student body and community.
Student Life
http://studentlife.tamu.edu

- The Offices of the Dean of Student Life strive to enhance your opportunities as a student to participate fully in the University experience. We do this by providing you with information, services, programs and involvement opportunities that facilitate responsible life choices and promote awareness of yourself and of your community. Each of the program areas within the Offices of the Dean of Student Life has a specific mission, but one common goal: to provide education, outreach, and support to you.

- Additionally, the department advises the following student organizations: Aggie Orientation Leader Program (AOLP), Aggie Women in Leadership (AWIL), Graduate & Professional Student Council (GPSC), and Parents' Weekend Committee.

- Specific services and programs offered include:
  - Adult, Graduate and Off Campus Student Services
  - Gay, Lesbian, Bisexual, Transgender Resource Center
  - Health Promotion
  - New Student & Family Programs
  - Student Assistance Services
  - Student Conduct Office
  - Student Legal Services
  - Student Media (The Battalion, Aggieland yearbook, Campus Directory)
  - Women's Resource Center

Student Life Studies
http://studentlifestudies.tamu.edu

- Facilitates assessment and evaluation of services and programs and assists in expanding the knowledge base about Texas A&M students and their co-curricular experiences. Department staff can assist with the development of assessment instruments and the collection and analysis of data including web-based programs.

- Student Organization Assessment Center – serves as a resource to recognized student organizations interested in evaluation of their programs and services as well as in the development of missions, goals and strategic plans.

Student Media
http://studentmedia.tamu.edu

- Student Media produces national, award-winning publications; The Battalion newspaper; Aggieland yearbook; and the Campus Directory. All are written, edited and produced by students and offer excellent opportunities to gain valuable experience for journalistic and related careers.

- The Battalion is published Monday through Friday during fall and spring semesters and Tuesday and Thursday during the summer sessions. It is distributed to students, faculty and staff on campus and at many apartments and other high traffic areas in College Station. The Battalion also is available online and on mobile devices.

- The Aggieland is distributed in the fall but is a year-round project documenting school activities. It is one of the nation’s largest college yearbooks.

- The Campus Directory, published each fall, includes listings of departments, administrators, and other information.

University Art Galleries
http://uart.tamu.edu

- The University Art Galleries department provides and promotes cultural opportunities that augment the academic experiences of the Texas A&M community. It is responsible for visual art exhibitions at the J. Wayne Stark Galleries, the Forsyth Galleries and for art inventories at Texas A&M.

- The program organizes the major art exhibitions for the University; advises on the selection, display and management of visual art objects on the campus; handles all art and art-related gifts to the University; and provides guidance and support to all exhibitions and collections at the University. The department also maintains the outdoor sculpture collection for the university.

- In addition, the University Art Galleries department organizes programs to complement exhibitions; has a docent program, which provides guided tours of changing exhibitions on campus and the University’s permanent collections to interested community and school groups as well as other art education programs.

University Center and Special Events (UCEN)
http://ucenter.tamu.edu

- University Center and Special Events (UCEN) is a highly skilled team of professionals committed to creating extraordinary guest experiences. We provide exceptional event management and technical support in state-of-the-art facilities that are well maintained, safe and clean. Through our facilities and services, we enhance the educational, business, social and cultural experiences of students, faculty, staff and visitors of Texas A&M University.

- Event Services – located on the second floor of Rudder Tower, the Event Services team assists in the booking, coordination, setup and staffing of meetings and events held in the Memorial Student Center (MSC), J. Earl Rudder Conference Tower, John J. Koldus Building, All Faiths Chapel, and the surrounding outside event spaces.

- Special Events – located on the first floor of Rudder Theatre Complex, the Special Events team assists with the booking of space in Rudder Theatre Complex, which includes Rudder Auditorium, Rudder Theatre, Rudder Forum, and the Exhibit Hall. Additionally, our Special Events team provides AV technical support, event setup and support, equipment rental and event consultation for events held outside of UCEN facilities.

- University Center Guest Suites – located in the Memorial Student Center (MSC), the University Center Guest Suites are an ideal and convenient place for housing speakers, visitors, and out-of-town guests. With an offering of 800 square feet, each suite includes a living room, kitchenette, king bedroom, full bath and vanity. Individually decorated, each suite welcomes guests with tailored amenities, exemplary service and an experience which embraces university traditions and values.

Vice President for Student Affairs
http://studentaffairs.tamu.edu

- In support of the Texas A&M University mission, the Division of Student Affairs contributes to student learning and development.
The Division provides exceptional services, facilities, and programs that promote student success, embody the Aggie spirit, and foster a diverse and inclusive campus community to deepen the understanding and individual application of the Aggie Core Values - Loyalty, Integrity, Excellence, Leadership, Selfless Service and Respect.
Tuition, Fees and Other Financial Information

General Information

Educational expenses for nine months will vary according to personal needs and course of study. The Financial Aid Office’s basic budget for new undergraduate students including tuition and fees, books, supplies, transportation, on-campus room and board, incidental and living expenses comes to about $24,024. Total expenses for returning students during an academic year should be slightly less than those for new students. The cost for new nonresident or international students is about $43,144. All tuition and fee amounts provided herein represent the most accurate figures available at the time of publication and are subject to change without notice. University Rules in place at the time of publishing are reflected here. All are subject to change. The most current information available will be maintained on the Scholarship and Financial Aid (http://financialaid.tamu.edu) website. Student Business Services online tuition and fee estimate calculator can be found at the Student Business Services (http://sbs.tamu.edu) website.

Payment of Tuition and Fees

Students must meet all financial obligations to the University by their due dates to avoid late penalties. Failure to pay amounts owed may result in cancellation of the student’s registration and their being barred from future enrollment and receiving official transcripts. State law requires that tuition and fees be paid prior to the first day of classes. Students who wish to pay fees in installments can select the option on the My Finances tab on the Howdy (http://howdy.tamu.edu) Portal.

Tuition Rebates After Graduation

Certain undergraduate students who attempt no more than three hours in excess of the minimum number of semester credit hours required to complete the degree under the catalog under which they were graduated may be entitled to a $1,000 tuition rebate after graduation. Several conditions apply and students must meet all of the specified criteria. If you wish to try and qualify for this program, please see the Office of the Registrar (http://registrar.tamu.edu) website for a complete set of student and institutional responsibilities and other criteria.

Obligation to Pay Tuition, Required Fees, Other Fees and Charges for Optional Services

By registering for classes, students agree to pay all tuition and required fees associated with their registration, optional services and other fees, whether paying in full or utilizing the installment payment option. Failure to pay tuition, fees and other charges may result in penalties, late registration fees and/or possible cancellation.

Financial Obligation for Graduating Students

According to Texas A&M University Student Rules and Chapter § 54.007 (c) of the Texas Education Code, all financial obligations to the University must be paid by the end of the semester. Failure to settle all financial obligations will result in withholding a student’s diploma at graduation. Additionally, a block will be placed on the student’s account which will prohibit registration in subsequent semesters and receipt of official transcripts.

Citations

• Section 14.15 of the Texas A&M University Student Rules states “The student must have settled all financial obligations to the University.”

• Chapter § 54.007 (c) of the Texas Education Code states “A student who fails to make payment prior to the end of the semester may be denied credit for the work done that semester.”

Scholarships, Grants and Loans

All financial aid or loans must be accepted and requirements completed before it can be applied toward a student’s account.

Payment Methods

Texas A&M utilizes online statements and electronic payments in its efforts to provide timely financial information to students and to control costs. Student account payment options include:

Electronic/Online

Students can view their account and make online payments using E-Checks, American Express, Discover Card or MasterCard by selecting “Pay Bill/Manage Account” on the My Finances tab in the Howdy portal. Payments made with credit cards will incur a convenience fee charged at the time of payment. Payments made with credit cards will incur a 2.25% convenience fee minimum charge of $3.00. Additional forms of payment accepted include: personal check, cashier’s check, wire transfer and Pin Debit. (Please Note: Once online payment transaction has occurred, the Convenience Fee is non-refundable).

Paper

• Checks – Students may still use paper checks for payments. The University reserves the right to utilize check conversion technology to convert paper checks into electronic format.

• Cashier’s checks

• Money orders

Cash

• Cash is not accepted.

Any payment that is rejected for payment by the paying bank, credit card company or other financial institution is subject to returned item charges of $30 or more. Rejected payments may also result in cancellation of the student’s registration and additional late registration penalties if the student is required to re-register on or after the first day of classes.

Installments

Tuition, required fees, room, board and parking are payable in full, or in installments. A $15 per semester service charge, to cover the cost of handling, will be assessed to each student who chooses to use the installment plan. Students may pay their account in full any time during a semester; however, the service fee will not be refunded once a payment is made under the installment plan. See the Student Business Services (http://sbs.tamu.edu) website for information on installment plans.
Penalties and Late Registration Fees

Late Payment Penalty

There are severe penalties for failure to pay student account balances and installments by their specified due dates. If a payment is delinquent when a semester ends, the student will be blocked and may not receive credit for academic work performed. Students will not be readmitted to the University until all past due balances, including late charges, are paid. A late fee of $25 for A&M students and $50 for HSC students will be assessed for each payment not received on or before it is due. If a student is removed from the rolls of the University or is withdrawn for failure to pay amounts owed the University, a reinstatement fee of $50 for A&M students and $150 for HSC students will be assessed in addition to any other late fees or penalties already incurred and must be paid before the student will be reinstated. Current due dates can be found online at the Student Business Services website.

Late Registration Fees

Students who register on or after the first day of classes are assessed a late registration fee of $100 for A&M students and $200 for HSC students. Students who register after the official census date (12th class day for fall or spring and 4th class day for summer) are assessed a late registration fee of $200 for A&M students and $250 for HSC students. Students who add classes after the official census date are assessed a late add fee of $50 for A&M students and $100 for HSC students. Note: Penalties, late registration and late add fees also apply to students who are required to reenroll because their registrations were canceled for nonpayment. Registrations are subject to cancellation and/or financial penalties if sufficient payment is not received before 5:00 p.m. on the last business day before classes begin.

Use of Collection Agencies and Credit Bureau

If amounts become past due, the University reserves the right to report the account to the Credit Bureau. This will also initiate internal collection efforts and could cause the University to employ an outside collection agency to recover the debt. If any collection efforts must be made, the student will be required to pay all collection costs, including collection agency fees, legal fees and other costs incurred in collecting the amounts due.

Cancelling Registration

Once students have registered for classes, they must select one course of action from the following to remain in good standing with the University:

- pay all amounts due by the specified due date;
- use the online registration to drop all classes prior to the first day of classes; or
- contact the Dean’s office of their college to begin the withdrawal process from the University after the first day of classes; then contact the Registrar’s Office at (979) 845-7117 and request that their registration be canceled.

Following this procedure is especially important for students who have been awarded scholarships or financial aid since the aid may automatically pay tuition and fees and cause the registration to be held even though the student has decided not to attend. Failure to request cancellation of an unwanted registration may result in grades of F or I in all courses for the semester. The student will be required to reimburse the University for scholarships and other financial aid applied to his or her account and will be held responsible for paying all fees for the semester, regardless of whether he or she attended classes.

Cancellation for Nonpayment of Tuition or Fees

The University reserves the right to cancel registrations not paid by their due date, or the official census date for a semester or summer term, to comply with state laws requiring payment of tuition and fees, to free the classroom spaces for other students, and to ensure the most efficient use of university resources.

Texas A&M Tuition and Required Fees

All rates are the most current available at the time of printing and are subject to change. Please refer to the Student Business Services website for the latest tuition and fee information.

Nonresident Tuition Exemption

If you have any questions concerning your eligibility for exemption from nonresident tuition, you may contact the Student Accounts and Billing Services Office at (979) 847-3337 or by email at sbs@tamu.edu.

University Advancement Fee

The University Advancement Fee is a required fee charged to all Texas A&M University students. It is assessed at a rate of $240.02 for the first hour plus $83.27 per additional hour ($156.75 added for the first hour.) The University Advancement Fee funds services such as advising, the Career Center, University Writing Center, technology and libraries as well as administrative services such as ID services, the campus bus system, billing and refunds, access for students to discounted software and many of the services provided through the Division of Student Affairs.

Distance Education Administration Fee

This $30 per semester credit hour administrative fee is assessed to Non-Funded Out-of-State students taking distance education courses.
Tuition, Fees and Other Financial Information

**Distance Education Differential Tuition**

The rate to be charged for distance education courses will range from a minimum of $40/SCH to a maximum of $550/SCH. Each academic department will have an individual rate that will be approved annually by the President of Texas A&M University. The following are the initial rates (only departments above the $40 minimum rate are listed):

**Field Trip Fees**

Field trip fees are assessed to cover the cost of providing trips and vary depending on the course taken and expected expenses.

**Health Center Fee**

This $72.50 per semester fee ($25 for a 5-week summer term and $72.50 for a 10-week summer term) is required of all students for the purpose of operating, maintaining and equipping the University Health Center and entitles the student to its services. These services do not include surgical operations or charges for consultations with outside physicians.

**Identification Card (Aggie Card)**

Every student is required to have a student ID card. ID cards are permanent and students are responsible for maintaining a working ID throughout their career at the University. The Aggie Card is used for residence hall access, registration, fee collection, financial aid disbursement, dining halls, athletic event and recreational sports admittance and library privileges. Replacement ID cards are $12. Students who lose their IDs can report the loss immediately and deactivate their card online at [http://myaggiecard.tamu.edu](http://myaggiecard.tamu.edu) or by contacting:

Student Business Services
Aggie Card Office, General Services Complex
(979) 845-4661
8 a.m.–5 p.m., Monday through Friday

**International Student Orientation Fee**

This $35 fee is a one-time fee charged to cover the cost of orientation programming for international students during their first semester of enrollment.

**International Student Services Fee**

This $46 fee ($23 for a 5 week summer term and $46 for a 10 week-semester) is required of all students who are not U.S. citizens or Lawful Permanent Residents to offset the cost of specialized services International Student Services or the English Language Institute provides to these students, such as immigration advising, certificate of eligibility document issuance (I-20/DS-2019), verification and monitoring of legal status, status changes, extensions of legal status, approve or help with the approval of on and off campus work authorizations, social/academic adjustment, administration of special scholarships and programs for these students.

**Laboratory Fees**

The University is required to assess and collect a laboratory fee not to exceed $30 for each laboratory course to cover in general the cost of laboratory materials and supplies used by a student.

**Late Penalties**

Students who fail to pay fees and installments when due are assessed a late payment fee for each payment or installment paid late.

**Late Registration/Add Penalties**

- Students who register on or after the first day of classes, but before the 13th day of classes are assessed a $100 late registration fee.
- Students who register after the 12th class day are assessed a $200 late registration penalty.
- Students who add classes after the 12th class day that result in a net increase in hours enrolled are assessed a $50 late add fee.
Recreational Sports Fee
This $106 per semester fee ($53 for a 5-week summer term and $106 for a 10-week summer semester) is assessed to all students attending the University for use of the Student Recreation Center.

Reinstatement Fee
Students who fail to pay all fees by the last day of the semester will be administratively withdrawn from the University and charged a $50 reinstatement fee.

Student Center Complex Fee
This $100 fee ($50 for a 5-week summer term and $100 for a 10-week summer semester) is required of all students for operating, maintaining, improving and equipping the Student Center Complex.

Supplementary Fee for Courses Attempted More than Twice
A non-repeatable course that is attempted by a student more than twice at a public institution of higher education in Texas may not be reported for state funding. As a result, the institution must either pass the non-funded portion to all students, or charge a supplementary fee to the student who is attempting the course more than twice. Texas A&M has chosen to assess a supplementary fee to those students attempting a course more than twice.

A student attempting non-repeatable courses more than twice at Texas A&M University will be subject to a supplementary fee of $125 per semester credit hour ($375 for a 3 hour course) for the repeated course, in addition to tuition and required fees associated with the course. The general criteria for determining which courses are subject to the supplementary fee are:

• A course is subject to the fee if a student has completed it twice at Texas A&M University with a grade of A, B, C, D, F, F* (academic dishonesty), S (satisfactory), U (unsatisfactory), I (incomplete), Q (authorized drop after the add/drop period) or X (no grade submitted).
• Courses identified by the University as repeatable for credit are not subject to the fee. A schedule of repeatable courses can be found at this website (http://registrar.tamu.edu/Catalogs,-Policies-Procedures/State-Policies/Three-Peat).
• Courses dropped with no record (NR), no grade (NG) and withdrawals (W) are not counted as repeated courses.

Students will be notified at the time they register for a course that it has been taken twice at Texas A&M and is subject to the supplementary fee.

HSC Tuition and Required Fees
Texas A&M University Health Science Center tuition and fees are approved by The Texas A&M University System Board of Regents within guidelines established by the Texas Legislature. Fees are subject to change by the Board of Regents.

Additional information regarding the HSC Student Business Services Office and its services may be found online at the Student Business Services website.

HSC Student Business Services may be reached at 979-847-3337 or at sbs@tamu.edu.

Optional Campus Services

Installment Payment Option
Students who choose to pay using the installment plan pay a $15 installment payment service charge per semester (excluding the Summer term.) This charge is non-refundable once a payment has been made.

Aggie Bucks Unlimited
Show your Aggie Pride with the Aggie Bucks Unlimited debit card, designed just for the Texas A&M University community. Cardholders can make purchases everywhere Visa® debit cards are accepted—on campus and worldwide—and access their cash for free at more than 12,000 Wells Fargo® and Wachovia® ATMs, including 15 in Bryan- College Station. Plus, students can use the Aggie Bucks Unlimited debit card for the fastest available access to their financial aid or other refunds from the University when they sign up for Direct Deposit to a Wells Fargo checking or savings account. To get the card, speak to a Wells Fargo Banker at your New Student Conference or visit any of the six banking locations in Bryan-College Station, including the Wells Fargo Service Center in the General Services Complex on campus.

Athletic Events
• All Sports with Football—student tickets for all home sports (for all fall and spring sports) $290.

Campus Dining
For Dining Plan rates, please access the University Dining (http://dining.tamu.edu) website, and click on Dining Plans. Please note that University Dining follows the University Tuition and Fee Adjustment schedule.

Freshmen (classified as U1s with less than 30 hours of college credit when they initially apply to live on campus) will be required to have a minimum dining plan for the full academic year (or remainder of the academic year for those that apply for housing after the beginning of the fall semester).

All Corps of Cadets members are required to have a dining plan, as designated by the Office of the Commandant.

Upperclassmen and students who are not campus residents are not required to purchase a Dining Plan, but the option is available.

All Dining Plans are loaded onto the Student ID card to make access and use easy.

Fees for the selected meal plan will be added to your TAMU student fee, and are separate from housing fees. Any plan purchases or additions made after the ninth week of class cannot be charged to the TAMU student account and must be paid via credit card. Please visit our website for official dates as they may vary each semester based on the academic and billing calendars.

Students have the option to select a Dining Plan that fits their individual needs. Dining Plans are designed to be flexible for an array of lifestyles and appetites. Smaller Dining Plans are available for upperclassmen and students who live off campus. Most Dining Plans include 2 parts—“Meals,” which can be used at the all-you-care-to-eat dining halls, or in select retail locations as a “meal trade.” The second part of the dining plan consists of “Dining Dollars.” These declining balance dollars can be spent like cash or a debit card, and are accepted at all University Dining kiosks, coffee
shops, food courts and dining centers. Each purchase is automatically deducted from the account.

When paying with Dining Dollars, patrons will enjoy a discount on the door rate at both Duncan and Sbisa, the all-you-care-to-eat dining halls on campus.

Dining Dollars roll over from fall to spring with the purchase of a spring dining plan.

Dining Dollars are only accepted on campus, assuring parents and guardians that this money is spent only on food and beverages.

Prices on Dining Plans include tax; please note that Dining Dollars are not the same as Aggie Bucks.

**MSC OPAS Tickets**

Special Discounted Student OPAS tickets are available through the MSC Box office. For more information, please contact MSC OPAS at (979) 845-1661 or visit their website [http://mscopas.org](http://mscopas.org).

**Parking Permit**

All vehicles parked on the Texas A&M University campus are required to display a valid parking permit, unless they are parked in a pay visitor area. Costs of permits are prorated and subject to change. For more information or to purchase a permit, visit [http://transport.tamu.edu](http://transport.tamu.edu).

**Residence Hall Room Rates**

All students living in residence halls or apartments are required to pay room rent. Rooms are furnished with beds, mattresses, desks, chairs and dressers. Students are expected to furnish their own pillows, blankets and linens. Room rates include heat, air-conditioning, lights and cleaning of common areas. Rates are for the semester and are subject to change.

For more information, please see Residence Life [http://restlife.tamu.edu](http://restlife.tamu.edu).

**Yearbook**

The cost is $81.19 including shipping and sales tax.

**Fees for Other Special Items or Services**

**Application Fees**

Graduate: $50; Undergraduate: $75; International: $90

**Cooperative Education Fee**

A fee of $75 is charged to all participants of the Cooperative Education program.

**Diploma/Graduation Fee**

A non-refundable fee per degree sought is assessed the semester a student applies for graduation. This fee is payable each time a student applies for graduation. A late fee of $50, in addition to the diploma/graduation fee, may be charged to those who apply for graduation after the published deadline.

**International Student Health Insurance**

International students (students who are not U.S. citizens or Lawful Permanent Residents of the United States) who are pursuing their studies at Texas A&M are required to have health insurance. International students will be automatically enrolled in and charged for the Student Health Insurance Plan (SHIP). International students may be eligible to apply for a waiver of the SHIP and provide alternative health insurance coverage that meets the waiver guidelines. Guidelines can be located on the International Student Services webpage. This is to ensure that medical treatment will be available in the event of injury or illness during their studies at the University. This requirement includes students enrolled in extensive English language programs and non-degree seeking programs. Full-time English Language Institute (ELI) students should contact ELI for information about this. All other international students can receive more detailed information about this requirement by visiting the International Student Services website. Specific questions may be directed to International Student Services by emailing healthinsurance@tamu.edu.

**Microfilming, Binding and Collating**

Binding, collating, microfilming theses and dissertations—Masters: $110, Doctoral: $170

**New Student Orientation Fee**

A non-refundable new student orientation fee of $100 is charged to all students. An additional fee of $35 is required of all international students to cover additional costs associated with orientation programs.

**ROTC Uniform Rental**

Qualifying cadets enrolled in Army, Air Force or Naval ROTC will be reimbursed the cost of basic cadet uniforms. Cadets who are not enrolled in ROTC (Drills and Ceremonies Cadets) are required to pay for use of uniforms.

**Sponsored International Students**

An administrative fee not to exceed $500 per semester or summer session (all or part thereof) will be required to support international sponsored students whose programs are coordinated through International Student Services, Sponsored Student Programs, unless these fees are waived as part of negotiated contractual agreements.

**Distance Education and Other Nontraditional Course Offerings**

Residence Hall Deposit

A deposit of $300 and a nonrefundable $50 application fee are required to apply for a room in a residence hall. The deposit will be retained as a deposit against damage or late cancellation or to keep the application on file. A reservation may be canceled and the deposit refunded upon request prior to signing a housing contract. Housing contracts must be signed for the next academic year by May 1st. Any cancellations after May 1st will result in forfeiture of deposit. Additional penalties for later cancellation. The amount of the room deposit and the deposit refund schedule are subject to change per university administration approval.

Freshmen classified as U1 with less than 30 hours will be required to have a dining plan if they live on campus.

Refund Policy

Fee Adjustments for Courses Added and Dropped

A student may drop courses during the first four days of a fall or spring semester. Students also may drop classes with special permission of the dean between the 6th and 12th class days. Full refunds will be given for courses dropped during these periods. Refunds will not be issued for classes dropped after the 12th class day. As of the first day of the semester, students may not drop all of their courses through the drop/add process, but instead must go to the office of their dean to officially withdraw. A student may add courses during the first five days of a fall or spring semester.

Withdrawal from the University

Once a payment for tuition and fees has been accepted by the University, a student is considered officially enrolled unless otherwise restricted from enrollment. Stopping payment on a check for fees or allowing the check to be returned unpaid by the bank for any reason does not constitute withdrawal from the University. Students who wish to drop to zero (0) hours in a semester or term must request an official withdrawal (http://registrar.tamu.edu/Courses,-Registration,-Scheduling/Registration-Enrollment-Information/Withdrawing-From-the-University). This process is initiated by the student online via Howdy (https://howdy.tamu.edu) in the Student Withdrawal channel on the My Record tab. Failure to follow procedures for withdrawing from the University may result in financial penalties, forfeiture of any tuition and fee adjustments (http://sbs.tamu.edu/accounts-billing/tuition-fees/schedule/#REF_WITHDRAW), delays with future enrollment, and course work may be recorded as incomplete or failed. Refund percentages are applied to total fees assessed and not the amount paid. Students who withdraw before paying all installments may, receive a bill with a balance due rather than a refund.

International students must visit with an advisor in the International Student Services Office before withdrawing to determine if doing so will affect their visa status.

Recipients of financial assistance should talk with a Scholarships & Financial Aid advisor before withdrawing. Students receiving funds awarded by Scholarships & Financial Aid should be aware of policies regarding withdrawal from the University. Federal regulations require a return calculation for all students who receive Title IV student assistance at a post-secondary institution of higher education who withdraw during a payment period (semester). The length of time during which a return must be calculated is up to 60 percent of the payment period. Students withdrawing prior to 60 percent of the payment period

Deposits

General Deposit

Every student, unless registered in absentia, must make a property deposit in the amount of $100 to protect the University from damage to or loss of university property. Charges will be billed directly to the student or collected by the department upon reissue of supplies or property. Failure to pay the charges promptly will cause the student to be barred from re-admission and receiving an official transcript from the University. If a student withdraws from the University without paying the charges, the deposit will be held for 30 days after the close of the semester or a student’s withdrawal, so that all charges and fines may be totaled from the various departments. This deposit, less outstanding charges, will be returned upon request to the student graduating or withdrawing from school. Deposits not requested within four years from date of last attendance will be forfeited into a student deposit scholarship account.

1 Distance Education Instruction: This group includes traditional off-campus classes, all university centers and telecommunications, video and other nontraditional Distance Education Instruction delivery models.
2 In Absentia: The traditional student who is performing individual research or completing degree requirements that do not require classroom instruction.
3 Cooperative Registration: Students participating in the Cooperative Education Program at Texas A&M University.
4 Texas A&M University Graduate Students – Galveston: Texas A&M graduate students who enrolled at College Station, but who are taking courses exclusively at Galveston.
5 Study Abroad: Students participating in the Texas A&M University Study Abroad Program.
may be required to return disbursed funds not earned. Additionally, students who do not successfully complete courses for the semester may be considered unofficially withdrawn and may be subject to a return calculation or all disbursed funds being returned if attendance cannot be documented. Eligibility for state and institutional funds may also be impacted by withdrawing from the University. Drops and withdrawals are considered unsuccessfully completed coursework when determining Satisfactory Academic Progress (SAP) (http://financialaid.tamu.edu/Graduate/Maintaining-Eligibility/#1-SAPComponents) and will impact completion rate.

Student athletes should visit their academic advisor in the Department of Athletics before initiating the withdrawal process.

Refund Delivery
Texas A&M and Wells Fargo Bank have joined forces to deliver financial aid and other refunds to students faster through the University’s refund delivery process. You will receive information from Wells Fargo and the University at your new student conference and in your official University email account, which will explain the process for signing up for direct deposit of refunds.

Unclaimed Refunds
According to federal law, the university is required to return Title IV funds that have not been claimed (i.e., refund check that has not been cashed) within 240 days of issue. These funds will be returned to the appropriate federal financial aid program.

Tuition and Fee Adjustments
Tuition and fee adjustments shall be made to students officially withdrawing from the University for charges listed below according to the following refund schedule: Tuition and Required Fees, Residence Hall Rent, and Meal Plans (excluding Aggie Bucks).

Fall and Spring Semester and 10-Week Summer Semester
By 5 p.m. on the last business day before the first day of class 100%
During the first five class days 80%
During the second five class days 70%
During the third five class days 50%
During the fourth five class days 25%
After the fourth five class days None

Summer Term of More Than 5 Weeks But Less Than 10 Weeks
By 5 p.m. on the last business day before the first day of class 100%
During the first, second or third class 80% day
During the fourth, fifth or sixth class 50% day
Seventh day of class and thereafter None

Residence Hall Rent/Deposit
If a student withdraws, moves off campus or in any other way terminates the housing contract, a refund of residence hall rent may be made according to the stipulations in the housing contract. If a student cancels the academic year housing contract during the contract period, the $300 deposit is subject to forfeiture. Any cancellation made 7 days after the student has been assigned, will be subject to 25% of the fall semester’s room rent. Any cancellation for the spring semester not outlined as an exception in the housing contract will be subject to an additional charge equal to 50% of the spring semester’s room rent. Exceptions may be made for students who cancel their contract for the following reasons: co-op or student teaching assignment, academic restriction, graduation and medical withdrawal.

Athletic Refunds
Refunds are not allowed for individual games or games missed. A prorated refund is permitted if the option is used to pick up a ticket for any one game. Once a ticket option has been used, prorated refunds will be given only in the event of withdrawal from the University. For information on refunds, contact the Athletic Business Office at (979) 846-8892.

Department of University Dining—Dining Plan Options Add/Change/Drop Policies
Texas A&M University Dining’s dining plans and options listed are based on information available at time of printing and are subject to change. University Dining follows the University’s refund schedule for Tuition and Fee Adjustments. Refunds are given on the percentage basis listed for students dropping fee options or officially withdrawing from the University.

Students may purchase a dining plan, change to a larger plan or add on to a plan during registration for classes or at any time through University Dining. Dining Plans and additions to the plans may be charged to the student account through the ninth week of school. Any purchases after that point will require a credit card payment. Changes from a higher dining plan to a smaller dining plan or requests to cancel/drop are permitted only through the fourth week of classes. The appropriate fee is to be paid to the Office of Student Business Services.

Dining plans are valid for one semester starting with the first day of campus move-in (as designated by the Department of Residence Life) and end after the last final exam day. Check with Dining for posted dates for dining plan access. Location hours may vary during class breaks and meal availability may exclude official University holidays.

Following University policy, no one is authorized to use or borrow a student’s identification card (Aggie Card); therefore, dining plans are not transferable between students. The Aggie Card must be presented to Dining cashiers for dining plan participation. If an Aggie Card becomes lost, report it immediately by calling (979) 845-4661 or go to http://myaggiecard.tamu.edu to deactivate the card.

For questions and assistance, please email dining@tamu.edu (include name, UIN and instructions if dining plan related) or contact our office at (979) 845-3005. Additional information on University Dining and dining plans can be found on our website (http://dining.tamu.edu) or in this catalog under Campus Dining.

Yearbook
Yearbook charges are refundable in full during the semester in which payment is made. Thereafter, no refunds will be made on orders canceled in subsequent semesters. Yearbooks must be picked up during the academic year in which they are published. Students who will not be on campus when the yearbooks are published must pay a mailing and handling fee. Yearbooks will not be held, nor will they be mailed, without payment of the mailing and handling fee. Refunds will not be made on
Financial aid is awarded on a first-come, first-served basis with a published priority date of March 15, prior to the fall semester for which the student is seeking aid. Financial aid offers are made based on the assumption that students will enroll full-time in the fall and spring semesters. Cost of attendance and awards will be adjusted for students who are enrolled less than full-time at Texas A&M University or through the Texas A&M-Blinn TEAM Programs.

To apply for financial assistance, a student must submit a FAFSA. Students are encouraged to submit their FAFSA online at www.fafsa.ed.gov as soon as possible. Only students who have been accepted for enrollment and whose FAFSA results and other documents requested by Scholarships & Financial Aid are on file and processed will be sent a financial aid offer. Financial aid offers for the following academic year will be sent beginning in mid-March for incoming freshman and beginning in June for other undergraduate students. Summer financial assistance is offered to students with a FAFSA on file who enroll at least half-time in summer coursework at Texas A&M.

Student inquiries may be directed to:

Scholarships & Financial Aid

College Station, TX 77842-3016
(979) 845-3236
financialaid@tamu.edu
http://financialaid.tamu.edu
FAFSA School Code 003632

Please visit our website (http://financialaid.tamu.edu) for the most current information on programs and any associated deadlines.

Grants
The Federal Pell Grant is available to undergraduate students who have not received a baccalaureate degree and have demonstrated financial need as determined by the FAFSA. The Federal Pell Grant provides a foundation of financial assistance to which aid from other sources may be added.

The Federal Supplemental Educational Opportunity Grant (FSEOG), and the Texas Public Education Grant (TPEG) are available to students, provided the results of their financial aid application show evidence of financial need and funds are available. These funds are awarded on a first-come, first-served basis. The Towards EXcellence, Access and Success (TEXAS) grant is available to eligible Texas residents who have requisite levels of financial need according to the FAFSA and have met the remaining program criteria (http://financialaid.tamu.edu/Undergraduate/Types-of-Aid/#0-TEXASGrant); it is also subject to funds availability and eligibility guidelines as defined by the Texas Higher Education Coordinating Board. Additionally, Texas A&M University provides institutional grant aid to eligible students to assist with educational expenses.

Student Part-Time Employment
The Student Employment Office in Scholarships & Financial Aid coordinates student part-time employment, both off- and on-campus in the Bryan/College Station area. Students may visit the online job database. Work Study, assistantships and other part-time positions are posted. Students secure their own employment through job leads provided by Scholarships & Financial Aid or through their own initiative. Employment opportunities are available through the Student Employment Office in Scholarships & Financial Aid.
advising is available to students who have not had previous job seeking experience.

On-campus student employees are paid minimum wage or higher and are paid bi-weekly along with regular University employees. University student employees are not eligible for paid holidays, retirement, vacation, nor sick leave.

Professional development workshops are available for student employees and supervisors of student employees. These free workshops include topics ranging from communication skills to preventing sexual harassment in the workplace and from customer service to workplace etiquette. For more information or to register, please visit the Jobs for Aggies (http://jobsforaggies.tamu.edu) website or call (979) 845-0686.

The Federal/Texas College Work Study Programs

Federal and state programs provide part-time employment for U.S. citizens, permanent residents and eligible non-residents, within fund limitations, who have an established financial need and desire on-campus employment.

To qualify for the Federal/Texas College Work Study Programs, a student must have submitted a financial aid application, have financial need, be eligible to work in the Unites States, be enrolled at least half-time or accepted for enrollment and be making Satisfactory Academic Progress if enrolled.

The Community Service Program allows students who qualify for the Federal Work Study Program to work part-time with participating local non-profit, governmental and community-based organizations. This program is designed to improve the quality of life for community residents, particularly low-income individuals, or to solve problems related to community needs.

The Texas A&M University Reads and Counts program is a partner of the national No Child Left Behind initiative. It is based on the philosophy that children are our nation’s greatest asset. It calls all Americans to support teachers and help ensure that every child can read well by the end of the third grade. Eligible and dedicated college students are called to serve as reading and math tutors, as well as mentors and role models for area elementary and middle school students.

All Work Study students are paid minimum wage or higher, work an average of 20 hours per week, and are not eligible for paid holidays, retirement, vacation, nor sick leave. For more information on Federal/Texas College Work Study, the Community Service Program, or Texas A&M University Reads and Counts, visit the Student Employment Office on the second floor of the Pavilion or the Jobs for Aggies website.

Loan Programs

The Federal Direct Loan Programs are available to students who have submitted a FAFSA. Students will be notified of their eligibility for the Direct Loan program(s) through a financial aid offer. The Texas B-On-Time Loan program is available to Texas residents having completed the recommended or distinguished curriculum from an accredited public or private high school. Application information and/or promissory notes will be furnished with the financial aid offer, if applicable, and as funds are available.

Students and parents seeking the Parent Loan for Undergraduate Students (PLUS) may obtain information from the financial aid (http://financialaid.tamu.edu) website. This program requires the FAFSA to be on file with Scholarships & Financial Aid.

Short-term loans are available to provide assistance to students who experience temporary financial difficulties with educationally related expenses. Funding for this program is provided by The Association of Former Students, the Class of 1926 and other University resources. This program is not intended to provide long-term assistance or to replace other assistance available through Scholarships & Financial Aid. Students must be degree-seeking and enrolled at least half-time to be eligible for short-term loans. The Emergency Tuition and Required Fees loan program is available to help students pay their Texas A&M University tuition and required fees. The loan is applied directly to the student’s tuition and fee account.

Please refer to our website (http://financialaid.tamu.edu) for detailed information on all of the aforementioned programs and more.

Financial Literacy

The Money Wise Aggie, Texas A&M University’s personal finance advising and educational program, is designed to help students make smart personal finance decisions while pursuing their academic degrees and to lay a foundation for financial success throughout life.

The Money Wise Aggie is a free service to students that provides personal advising and presentations in the following areas:

- Money Management
- Credit Cards and Credit Scores
- Premarital Money Discussions
- Financial Challenges After College
- Debt Reduction Strategies
- Identity Theft
- Financial Aid
- Student Loan Repayment
- Saving and Investing
- Major Purchases (Cars and Homes)

Advisors participating in The Money Wise Aggie program are financial aid advisors who have been awarded the Accredited Financial Counselor™ or Certified Financial Planner™ designations. Each advisor provides objective, unbiased advice to help students make informed decisions about their finances. Advisors also provide scheduled presentations on-campus throughout the semester, as well as presentations to organizations upon request. Individual student advising is available by appointment. For more information, please visit the Money Wise Aggie website.

Scholarships

College/Departmental Level Scholarships

A number of colleges and departments at the University award scholarships on a merit basis to incoming freshmen interested in particular major fields of study. The value of the awards vary, and the term of scholarships range from one to four years. Selection criteria are determined by each awarding college and department based upon predetermined criteria. Completed scholarship applications must be received no later than specified deadlines. Awards are announced mid-spring for the following academic year.
Valedictorians

Highest ranking graduates from Texas high schools accredited by the Texas Education Agency are entitled to a tuition exemption during their freshman year at Texas A&M. To receive this award, the student must be certified as the highest ranking graduate and Texas A&M must be the first college or university of full-time enrollment. No formal application is required. Qualified students must present their official Texas Education Agency Highest Ranking High School Graduate declaration to Scholarships & Financial Aid at Texas A&M during the new student conferences or at the beginning of the fall semester.

Incoming Freshmen Scholarship Programs

The Opportunity Awards are awarded to first year freshmen based on academic achievement, leadership ability, extracurricular participation, and, in some cases, financial need. In addition to scholarships offered through the Scholarships & Financial Aid office, many colleges, departments, the Corps of Cadets, and the Texas A&M Foundation utilize the ApplyTexas (http://www.applytexas.org) freshmen scholarship application. In order to be considered, students must complete and submit this no later than December 1 of their senior year of high school.

The Achievement Scholarships are available to incoming freshmen who attended and graduated from targeted high schools in the State of Texas. Scholarships include the Academic Achievement Scholarship, President's Achievement Scholarship, Challenge Scholarship, and Century Scholarship. These high schools are designated as House Bill 400 schools, Engineering E12 schools, Early College High Schools, and Century Scholar Program Schools. Awards are based on academic achievement, leadership ability, and extracurricular participation. To be considered, students must complete and submit the ApplyTexas (http://www.applytexas.org) freshmen scholarship application no later than December 1 of their senior year of high school.

The Endowed Scholarships are available to incoming freshmen who meet the criteria of a 1300 SAT (Critical Reading and Math with at least a 600 on each) or a 30 ACT (composite with a minimum of 27 English and 27 Math). Scholarships include President's Endowed Scholarship, Lechner Scholarship, and McFadden Scholarship. Awards are based on academic achievement, leadership ability, and extracurricular participation. To be considered, students must complete and submit the ApplyTexas (http://www.applytexas.org) freshmen scholarship application no later than December 1 of their senior year of high school.

The Terry Foundation Scholarship is also administered through the Incoming Freshman Scholarship Program. It is available to students from the state of Texas. It requires three essays and three letters of recommendation. Awards are typically made to fund the cost of attendance; these are four year awards.

The Regents' Scholars Program is an institutional scholarship for eligible low-income, first generation college students. The scholarship is based on the results of the FAFSA and is awarded to entering freshmen for four years.

Continuing Student Scholarships

The Continuing Student Excellence Award application is available to students with at least one semester completed at Texas A&M. Awards range in value from $500 to $1,500 and are available to undergraduate, graduate, and professional students currently enrolled at Texas A&M. Some awards are limited to certain fields of study and to individuals who have attained a necessary academic classification, while others are unrestricted. Awards are made to outstanding students based on a combination of academic achievement, campus/community involvement, campus leadership roles, and, for some scholarships, financial need. In addition to scholarships offered through the Scholarships & Financial Aid office, many colleges, departments, the Corps of Cadets, and the Texas A&M Foundation use the Continuing Student Academic Excellence application for award consideration. Students are encouraged to complete the Continuing Student Scholarship Application, beginning in October via the scholarships website. The deadline for submitting applications is February 1, prior to the academic year for which the student will be awarded.

Transfer Student Scholarships

Aggie Transfer Student scholarships are designed to recognize outstanding students who will be transferring to Texas A&M University, both for domestic transfer students and for international transfer students. Scholarships are awarded based on a combination of academic achievement, extracurricular activities, campus involvement at their current institution, leadership, major and, in some instances, financial need. These award amounts can range from $500 to $3,000 and the application is available to students through the ApplyTexas (http://www.applytexas.org) application. In addition to scholarships offered through the Scholarships & Financial Aid office, many colleges, departments, the Corps of Cadets, and the Texas A&M Foundation use the ApplyTexas transfer scholarship application for award consideration. For more details, visit our website.

The Terry Foundation Transfer Scholarship is administered through the Aggie Transfer Scholarship Program. It is available to incoming transfer students in the fall. It requires letters of recommendations and essays. Awards are made by the Terry Foundation; these are two- to three-year awards.

Scholarship Recipients and Non-Resident Tuition Waivers

A student who is awarded a competitive University scholarship of at least $1,000 for the academic year or summer for which the student is enrolled and who is either a nonresident or a citizen of a country other than the United States of America may be entitled to pay the fees and charges required of Texas residents without regard to the length of time the student has resided in Texas. This scholarship must be awarded by a scholarship committee officially recognized by the Texas A&M University administration, and each waiver must be approved. For applicable recipients, selective service registration is required.

Miscellaneous Scholarship Information

Students are encouraged to contact their college and major department for additional scholarship opportunities. Most major libraries own scholarship information books. Additionally, Scholarships & Financial Aid has information regarding scholarship resources available online.

Address requests for additional information to:

Texas A&M University
Scholarships & Financial Aid

University Policies

Admission Statement and Policy on Individuals with Disabling Conditions

Texas A&M University has a strong institutional commitment to the principle of diversity in all areas. In that spirit, admission to Texas A&M University and any of its sponsored programs is open to all qualified individuals. Texas A&M does not discriminate on the basis of an individual's disability and complies with Section 504 of the Rehabilitation Act of 1973, and the Americans with Disabilities Act (ADA) as amended in its admissions, accessibility, treatment and employment of students in its programs and activities.

Texas A&M provides academic accommodations and auxiliary aids to students with disabling conditions, as defined under the law, who are otherwise qualified to meet the institution's academic requirements.

Students with disabilities who would like to request accommodations may contact the following based on your location:

- Texas A&M College Station campus, College of Nursing and School of Public Health should contact Disability Services (979) 845-1637.
- Baylor College of Dentistry should contact the Office of Academic Affairs (214) 828-8207.

Students with a disability who believe they have experienced discrimination may contact the following based on your location:

- Texas A&M University College Station campus or the School of Law should contact the ADA Coordinator at (979) 862-7737 or ADA.Coordinator@tamu.edu.
- Texas A&M Baylor College of Dentistry (HSC), College of Nursing (HSC), and School of Public Health (HSC) should contact the ADA Coordinator at (979) 436-9207 or ADA.Coordinator@tamhsc.edu.

Statement on Harassment and Discrimination

Texas A&M University provides equal opportunity to all employees, students, applicants for employment or admission, and the public regardless of race, color, religion, sex, national origin, disability, age, genetic information or veteran status. Texas A&M University will promptly investigate all complaints of discrimination, sexual harassment, and related retaliation in accordance with applicable federal and state laws. Furthermore, we aspire to maintain a work and educational environment free from discrimination on the basis of sexual orientation, gender identity or gender expression.

Faculty, staff and students should be aware that any form of harassment and any form of illegal discrimination against any individual is inconsistent with the values and ideals of the University community.

Students who have questions or believe they have experienced discrimination or harassment are encouraged to contact:

- Texas A&M College Station campus contacts - Notice of Nondiscrimination and Abuse (http://urc.tamu.edu/media/642261/NoticeOfNonDiscrimination.pdf)
- Texas A&M Baylor College of Dentistry (HSC), College of Nursing (HSC) and School of Public Health (HSC) contacts - Notice of
International Opportunities for Students

Student Options Abroad

Study Abroad Programs Office

http://studyabroad.tamu.edu

Texas A&M University is committed to providing access to high impact international opportunities for all students. The ability to engage successfully across cultures and the development of international leadership skills are crucial for success as graduates enter the work force and commit to lifelong learning.

The Study Abroad Programs Office provides access for all Texas A&M students to a broad range of high impact international experiences. Last year, over 4,000 students participated in academic, volunteer, service learning and research opportunities in 96 different countries. The Study Abroad Programs Office also contributes to the development of on-campus experiences that foster cultural awareness, including the Academy for Future International Leaders.

Conducting Research Abroad

Texas A&M University faculty engage in research in many foreign countries. Students who join faculty on research programs overseas, or who develop independent research opportunities, should register with the Study Abroad Programs Office to ensure emergency assistance as needed while abroad. Several other research options include the following:

• Fellows Program – MSC L.T. Jordan Institute for International Awareness (http://ljordan.tamu.edu/fellows)
• Honors and Undergraduate Research (http://honors.tamu.edu/research)
• Sconvcroft Institute of International Affairs (http://bush.tamu.edu/sconvcroft)

Internships/Work Abroad Options

Students have a variety of options for credit or non-credit work or internships abroad. In all such cases, students should register their work abroad experiences with the Study Abroad Programs Office to ensure emergency assistance as needed while abroad.

• Internship and Living Abroad Programs – MSC L.T. Jordan Institute for International Awareness (http://ljordan.tamu.edu/ilap)
• Public Policy Internship Program (http://ppip.tamu.edu)

University Locations Abroad

Many Texas A&M partner organizations offer international opportunities to students. Students can check the Study Abroad Programs Office search engine to locate such experiences or contact their academic departments about programs and locations they recommend. In addition, Texas A&M has a research and education center in Costa Rica.

The Soltis Center for Research and Education in Costa Rica

http://soltiscentercostarica.tamu.edu

The Soltis Center for Research and Education in north-central Costa Rica was established in January 2009 to support research, education and outreach in Costa Rica and throughout Central America. The Center is located in San Juan de San Isidro de Peñas Blancas, about three hours northwest of San Jose. The modern facilities of the Center include dorms, a cafeteria, wet and dry labs, classrooms, a videoconference room and multiple use areas. The Center provides students and faculty with access to more than 250 acres of primary and second growth forests with an experimental watershed complete with a meteorological station, a canopy tower and weir dam. The Center is adjacent to more than 50,000 hectares of protected forest in the Children’s Eternal Rainforest and the Monteverde Conservation Area. The Zona Protectora Arenal-Monteverde extends to the Center through a forest corridor that descends in elevation from 1,800 meters at Monteverde to 450 meters above sea level at the Center. This natural reserve has four major tropical life zones and includes more than 3,000 species of vascular plants and more than 400 species of resident and migratory birds. At the regional level, the Center is located in the heart of the Peñas Blancas River Watershed, which extends over 40,000 hectares that transition from rainforest in the highlands to pastures and agricultural crops below the Center. The unique physical and cultural setting of the center provides students and faculty with research and educational opportunities in tropical ecology, civil engineering, ecosystem sciences, geosciences, public and rural health and agricultural economics.

On Campus Engagement in International Opportunities

Students don’t have to go abroad to take advantage of international opportunities offered by Texas A&M. Students who remain on campus are encouraged to participate in many options available including the following:

• Academic certificates and minors with an international focus (http://studyabroad.tamu.edu)
• Academy for Future International Leaders (http://afil.tamu.edu)
• Center for International Business Studies (http://cibs.tamu.edu)
• Confucius Institute at Texas A&M University (http://confucius.tamu.edu)
• Corps Global Leadership Initiatives (http://corps.tamu.edu/global)
• MSC L.T. Jordan Institute for International Awareness (http://ljordan.tamu.edu)
• Norman Borlaug Institute for International Agriculture (http://borlaug.tamu.edu)
• SCONA (http://scona.tamu.edu)
• Sconvcroft Institute of International Affairs (http://bush.tamu.edu/sconvcroft)
• Student Organizations (http://studentactivities.tamu.edu/app/organization)
  • (To find internationally focused student organizations, please visit http://studentactivities.tamu.edu/app/search/index and search international.)

Students should consult their department and college advisers for additional opportunities to engage in global education on or off campus.
Honors and Undergraduate Research

Honors and Undergraduate Research provides high-impact educational experiences and challenges motivated students in all academic disciplines to graduate from an enriched, demanding curriculum. The programs administered by the office bring together outstanding students and faculty to build a community of knowledge-producers, life-long learners, nationally recognized scholars and world citizens. Through Honors and Undergraduate Research, motivated students have access to Honors courses, co-curricular enrichment activities and research programs that can be customized to enhance each student’s personal, professional and intellectual development.

Undergraduate Research

Honors and Undergraduate Research promotes, coordinates, creates and assesses undergraduate programs involving creative scholarship, inquiry and research in all academic disciplines at Texas A&M. As a recognized “high impact practice,” undergraduate research experiences increase undergraduate student learning and success, not only while students are at Texas A&M, but long after graduation.

In terms of professional and intellectual development, being involved in undergraduate research allows students to learn more about their future professional field, to participate in a scholarly community of like-minded students and to develop a close working relationship with acclaimed faculty. Research experiences make students more competitive for scholarships, internships, jobs, international opportunities and admission to top graduate and professional programs. Perhaps most importantly, engaging in undergraduate research allows students to experience the excitement of creating new knowledge, solving cutting-edge problems and developing new insights—life skills that are increasingly important in our world.

Campus-wide programs coordinated by Honors and Undergraduate Research include the Undergraduate Research Scholars program and the publication of Explorations: the Texas A&M Undergraduate Journal. The office offers workshops for students on obtaining summer research opportunities, starting out in research and thesis writing, as well as workshops for faculty and graduate students on mentoring undergraduate researchers. Honors and Undergraduate Research also works with groups across campus to promote and facilitate activities that support undergraduate research opportunities, such as summer Research Experience for Undergraduate (REU) programs and the HUR-Sigma Xi Research Expo. Lastly, the office provides assistance for developing externally funded proposals and implementation of funded projects that have undergraduate research involvement, such as National Science Foundation REU, Beckman Scholars, and Howard Hughes Medical Institute Education grants.

Undergraduate Research Scholars Program

Any junior or senior student with a cumulative Texas A&M GPR of 3.0 or above may apply to the Undergraduate Research Scholars program. In addition, groups of at least two to four students collaborating as a team on a single project may also apply. The Research Scholars program requires two long semesters of independent research supervised by a faculty advisor that culminate in a scholarly product. The scholarly product may be a research thesis, an accepted article in a professional journal, an exhibit, a performance, or other product as determined by the faculty advisor in collaboration with the Honors and Undergraduate Research Office. Participants are selected for this program based on the quality of their project proposal and their academic record.

Explorations: The Texas A&M Undergraduate Journal

Explorations is a student-run journal guided by faculty and administrators that selects and publishes student-authored articles of general interest in any area. Articles are submitted in a two-stage process: first, proposals for articles are reviewed by faculty-student teams; secondly, the resulting full-length articles undergo a second round of peer review. Acceptance to the journal is competitive—less than 20% of submitted proposals are accepted. Recently published articles have been from a wide range of academic fields: music, creative poetry, forensics, cancer biology, astrophysics, nanomedicine, computer algorithms, business, geosciences, sociology, aerospace engineering and cultural anthropology. To review recent issues and to find upcoming submission deadlines, visit the Honors and Undergraduate Research website.

Undergraduate Research Ambassadors

Undergraduate Research Ambassadors represent Honors and Undergraduate Research at research, recruiting, and outreach events. Juniors or seniors with an extensive background in research, a GPR of 3.0 or higher, outstanding oral communication skills and the ability to describe research to a general audience may apply to the program. A dozen Ambassadors from multiple disciplines are chosen each year, trained in presentation and leadership, and then participate in a variety of activities including meeting with highly placed members of the University Administration, distinguished faculty, outstanding alumni, prospective students, and parents.

Workshops and Events

Honors and Undergraduate Research offers informational workshops on undergraduate research for undergraduate students, graduate students, and faculty. Additionally, we coordinate numerous public events that celebrate and promote undergraduate research, providing venues for students to present their research projects, for faculty to recruit new student researchers, and for recognition of the research efforts of both students and faculty. Workshops and events are publicized through emails, newsletters, and the Honors and Undergraduate Research (http://hur.tamu.edu) website.

Grant, Proposal, and Project Assistance

Honors and Undergraduate Research provides faculty with a wide variety of support services for undergraduate research program and proposal development and implementation. Please contact the office directly for more information.

Other Capstones

Honors and Undergraduate Research offers additional one year Capstone experiences to any Junior or Senior with a cumulative Texas A&M GPR of 3.0 or above. The Undergraduate Teacher Scholars Program allows Scholars to create their own Honors seminar or to improve an existing course in collaboration with a faculty expert. The Undergraduate Service Scholars Program pairs students with community leaders to develop and carry out projects that benefit the greater community.
Undergraduate Leadership Scholars Program enables student leaders in various organizations to hone their skills as they plan and implement improvements to their organization’s programming and impact in collaboration with their faculty advisor. All participants for these programs are chosen based on the quality of their proposals, their academic record and the recommendation of their faculty or community advisor.

Admission to the University Honors Program

The university-level Honors distinction offered by the University Honors Program is Honors Fellows. Students are admitted to the Honors Fellows curriculum on a competitive basis. Incoming freshmen apply as part of their application for admission to the university. Continuing students may apply each Spring for entry in the Fall prior to completing 60 credit hours at Texas A&M.

Applications are evaluated on the basis of the student’s record of academic achievement and demonstrated potential for creativity, intellectual ability, imagination, curiosity, willingness to try new things and self-awareness. Once admitted to the Honors Fellows curriculum, students are designated as “Honors Students” and may then access specific privileges and resources, including additional academic advising, priority registration, contracting non-honors courses for Honors credit, Honors Independent Study and enrolling in graduate-level courses for undergraduate Honors credit. Honors Students also receive priority for the Honors Housing Community and advising for competitive national fellowships.

Freshmen admitted to the University Honors Program are required to live in the Honors Housing Community and participate in the Honors Freshman Learning Community course. To remain in the program, all students (freshman and continuing students) must make progress toward the Honors Fellows distinction and meet minimum co-curricular participation requirements. See the section on Maintaining Honors Status (p. 93).

Honors Fellows Curriculum

The Honors Fellows curriculum requires 30 credit hours of honors coursework (including 9 credit hours from the University Core Curriculum and 12 credit hours of upper-level coursework) and a “capstone experience.” The University Honors Program works with academic departments across the university to ensure that appropriate Honors courses are offered. Honors courses have limited enrollment and encourage participatory learning. In Honors classrooms, students work closely with many of the University’s most acclaimed faculty. Material in Honors courses is intended to provide increased complexity, not simply more work or greater difficulty. Small class size (usually not more than 25 students) also allows Honors courses to undertake activities and utilize facilities not readily available to undergraduate students. Honors courses may be special sections of regularly offered courses or courses developed specifically for Honors Students. Students are encouraged to visit regularly with University Honors Program advisors to ensure that their course selection meets both degree and Honors curriculum requirements.

To complete Honors Fellows curriculum requirements, Honors Students must complete a capstone experience. The requirement may be met by engaging in the Undergraduate Research Scholars Program, by preparing and teaching an Honors Seminar as part of the Undergraduate Teacher Scholars Program, by undertaking a community service project as a participant in the Undergraduate Service Scholars Program, by developing an enhancement project for a student organization through the Undergraduate Leadership Scholars Program or by completing a capstone project designated by their home department. Students should consult with a University Honors Program advisor in the planning stages to seek approval for their capstone experience.

Honors Students are afforded several avenues to earn Honors credit in addition to regularly offered Honors courses. Honors Students may contract for Honors credit, engage in Honors independent study or take graduate courses that count toward undergraduate degree requirements. Honors Students should consult with University Honors Program advisors about these opportunities.

Honors Students with unique intellectual interests and specific educational goals may also “major” in Honors by pursuing the innovative University Studies – Honors (USHN) degree. Students may combine a range of related academic areas into a coherent degree plan by designating an “area of concentration” in combination with two established minor fields of study. The formulation of the degree plan requires students to conceptually link their course selection to a specific “problem” that will be addressed in a capstone thesis.

Maintaining Honors Status

To remain in the Honors Fellows curriculum, Honors Students must:

1. Maintain a 3.5 cumulative GPR,
2. Maintain a 3.25 GPR in honors coursework,
3. Maintain full time enrollment status,
4. Make progress toward curriculum requirements by taking at least 6 Honors credits per year,
5. Fulfill annual co-curricular participation requirements,
   a. Freshmen: Live in Honors Freshman Housing (or obtain a waiver) and participate in the Learning Community Course, and
   b. Continuing Students: Participate in at least one Honors Student Council event each semester.
   c. All: Prepare or update an ePortfolio on an annual basis.

Honors Students who fail to meet any of these requirements will be given a semester of probation to correct any deficiencies. Honors Students who fail to meet requirements after a semester of probation will be dismissed from the program.

University Scholars

The University Scholars program identifies students who embody academic leadership and enhances the personal, professional and intellectual development of these students.

University Scholars receive a scholarship stipend and participate in a number of development activities, including University Scholar Exploration Series, which are intimate discussion-based seminars offered on a wide variety of topics. Additionally, University Scholars serve as ambassadors for Honors and Undergraduate Research at Texas A&M University, representing the office at outreach events and in our publicity materials.

Each spring semester, eligible students are invited to apply for the University Scholar program. The application process involves an extensive written application and, for the approximately 40 students selected as semi-finalists, an in-depth interview. In the end, approximately 12 students are invited to join the University Scholar program.

Freshmen who meet the eligibility criteria for the program will be contacted via their official Texas A&M University email accounts at the start of the
Spring semester. Students with questions about eligibility should contact Honors and Undergraduate Research.

**Honors Student Services**

Honors Students have access to numerous special services and programs. Throughout the academic year, Honors and Undergraduate Research coordinates several recreational and community-building events, lectures and workshops. Honors Students are invited to engage in leadership opportunities and contribute to the development of university-level Honors programming through the Honors Student Council and as Honors Housing Community leaders or University Scholars.

Honors Students also receive additional academic advising to help them complete the Honors curriculum; furthermore, specialized advising is available to help students prepare for major national fellowship competitions such as the Rhodes, Truman or Goldwater Scholarships, as well as the Fulbright Program for U.S. Students and the National Science Foundation Graduate Research Fellowship Program, among others. Information about services and opportunities for Honors Students is distributed regularly via weekly email bulletin.

**Services for All Students**

Honors and Undergraduate Research challenges all motivated and high-achieving Texas A&M students to explore their world, expand their horizons and excel academically. While some services of the office are exclusive to Honors Students, advisors are available to talk with any student who is interested in sampling the academic challenge of an Honors course, committing to an undergraduate research project, applying to the University Honors Program or engaging the process of self-discovery entailed in preparation for national fellowships.

Continuing students with a minimum 3.5 cumulative GPR who have not applied or not been accepted to the Honors Fellows program may enroll in honors coursework during their assigned registration time. Students who would like to meet with a University Honors Program advisor may sign up for an appointment through Sundial. All students interested in the services offered by Honors and Undergraduate Research are encouraged to sign up for the email bulletin.

**Graduation with Honors**

All Honors courses and participation in the Undergraduate Research Scholars program are designated on a student’s transcript, demonstrating to future employers or admissions committees that the student has engaged with an enriched, challenging curriculum. Honors Students who complete the Honors Fellows curriculum are further designated as Honors Fellows.

Undergraduates in some academic colleges and departments may pursue additional graduation distinctions. These graduation distinction requirements work in concert with the Honors Fellows plan, and many students graduate with multiple distinctions. In general, all Honors graduation distinctions require that the student complete a substantial body of Honors coursework, hold a minimum cumulative Texas A&M GPR of 3.5, and a cumulative Honors course GPR of 3.25 with no grade lower than a C in an Honors course.

These Honors graduation distinctions are separate from “Latin Honors” such as *cum laude*, *summa cum laude* or *magna cum laude*, which are conferred by the Office of the Registrar and are based upon cumulative GPR and residency requirements.
Transition Academic Programs

Transition Academic Programs provides academic advising services for students transitioning between majors and programming for students transitioning from high school to college. Campus-wide programs coordinated by Transition Academic Programs include Aggie Gateways to Success, the FOCUS Learning Communities, and the Texas A&M Blinn TEAM (Transfer Enrollment to A&M) Program.

Academic Advising for Students in Transition

Transition Academic Programs helps students changing majors develop a realistic academic plan, transition into a new degree-granting major, and progress toward timely graduation. Currently enrolled Texas A&M students who move into Transition Academic Programs are only guaranteed one semester to complete necessary requirements to move into a degree-granting major.

Aggie Gateways to Success

Students are selected during the admissions process to participate in Gateway during the summer prior to their first fall semester at Texas A&M University. Participating students are assigned courses for the second summer session (July-August). Students who pass all summer courses with at least a 2.0 grade point average can declare a major and enroll for the fall semester. Financial aid is available for students enrolled in Gateway. Participants must reside on campus during the summer.

The Texas A&M Blinn TEAM Program

The Texas A&M-Blinn TEAM Program ("TEAM") is a collaborative, co-enrollment partnership between Texas A&M University and Blinn College. To be considered for participation in the TEAM program, a prospective student must apply for regular freshman admission and meet all admission criteria. TEAM students must enroll in a minimum of 12 total credit hours per semester, three-to-five at Texas A&M and the remainder at Blinn College. At the conclusion of the sophomore year, students who have completed 45 Blinn and 15 Texas A&M credit hours, with a 3.0 or higher grade point average at each school, will be fully admitted to Texas A&M University without an additional application process. TEAM students may apply for full Texas A&M admission via the transfer admission process before completion of the two-year TEAM format. TEAM students are able to access most student services and programs on both campuses, to include participation in the Corps of Cadets and Greek Life. They may apply for on-campus housing at A&M, as well as financial aid (based upon their combined credit hours from both schools).

FOCUS Learning Community

FOCUS offers first-year Regents’ Scholarship recipients a learning community experience while they are building Foundations of Continued Undergraduate Success (FOCUS). During the fall and spring semesters of the first year, FOCUS students enroll in one core curriculum course taught in a small section with 25 or fewer students. Each course is linked to a weekly non-credit mentor-led In-FOCUS session during which the cohort delves into connection, achievement, respect, and exploration as guiding principles for personal development and responsibility in university life. FOCUS students benefit from professional staff guidance, peer mentoring, and monthly co-curricular activities. FOCUS students may apply to the optional FOCUS Living-Learning Community in Keathley Hall. Regents’ Scholars may register for FOCUS on the FOCUS (http://focus.tamu.edu) website during the spring/summer prior to enrolling at Texas A&M University. Students who are not eligible for Regents’ Scholarships may request placement on the wait list.
University Studies Degrees

The University Studies Degree provides students the flexibility to combine areas of study that are of special interest. The combination of courses may not be possible through existing degree plans. This flexibility may be attractive to students who have particular career paths or post-baccalaureate degree paths in mind.

A University Studies Degree consists of a concentration of 21-24 hours and two minors of 15-18 hours each and requires 120 hours for completion. A University Studies major will be considered a student in the college that offers the concentration and will receive academic advising services from that college. The student’s diploma will list Bachelor of Arts or Bachelor of Science in University Studies.

Information on specific University Studies degree programs is listed with individual colleges.

- University Studies - BA, Race, Gender, Ethnicity Concentration (p. 501)
- University Studies - BS, Environmental Business Concentration (p. 167)
- University Studies - BS, Leadership Studies Concentration (p. 122)
- University Studies - BS, Global Arts Planning, Design, and Construction Concentration (p. 204)
- University Studies - BS, Business Concentration (p. 240)
- University Studies - BS, Child Professional Services (non-certification program) Concentration (p. 256)
- University Studies - BS, Dance Concentration (p. 276)
- University Studies - BS, Sports Conditioning Concentration (p. 277)
- University Studies - BS, Sports Leadership Concentration (p. 278)
- University Studies - BS, Geography Concentration (p. 390)
- University Studies - BS, Geographic Information Science and Technology Concentration (p. 390)
- University Studies - BS, Journalism Studies Concentration (p. 501)
- University Studies - BS, Race, Gender, Ethnicity Concentration (p. 504)
- University Studies - BS, Mathematics for Business Concentration (p. 568)
- University Studies - BS, Mathematics for Teaching Concentration (p. 570)
- University Studies - BS, Mathematics for Pre-Professionals Concentration (p. 569)
- University Studies - BS, Mathematics for Secondary Teaching Concentration (p. 569)
- University Studies - BS, Biomedical Sciences Concentration (p. 581)
Interdisciplinary Programs

Texas A&M University offers interdisciplinary programs between the various colleges of the university.

Majors

College of Agriculture and Life Sciences
- Bachelor of Science in Agribusiness (p. 107)
- Bachelor of Science in Environmental Studies (p. 166)

College of Geosciences
- Bachelor of Science in Environmental Studies (p. 363)

Masters
- Master of Agribusiness in Agribusiness (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/interdisciplinary/mab)
- Master of Biotechnology in Biotechnology (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/interdisciplinary/mbiot)
- Master of Science in Engineering Systems Management (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/interdisciplinary/engineering-systems-management-ms)
- Master of Science in Genetics (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/interdisciplinary/genetics-ms)
- Master of Science in Marine Biology (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/interdisciplinary/marine-biology-ms)
- Master of Science in Molecular and Environmental Plant Sciences (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/interdisciplinary/molecular-environmental-plant-sciences-ms)
- Master of Science in Neuroscience (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/interdisciplinary/neuroscience-ms)
- Master of Science in Toxicology (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/interdisciplinary/toxicology-ms)
- Master of Science in Water Management and Hydrological Science (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/interdisciplinary/water-management-hydrological-science-ms)
- Master of Water Management and Hydrological Science in Water Management and Hydrological Science (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/interdisciplinary/mwm)

Doctoral
- Doctor of Philosophy in Agribusiness and Managerial Economics (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/interdisciplinary/agribusiness-managerial-economics-phd)
- Doctor of Philosophy in Ecology and Evolutionary Biology (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/interdisciplinary/ecology-evolutionary-biology-phd)
- Doctor of Philosophy in Genetics (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/interdisciplinary/genetics-phd)
- Doctor of Philosophy in Marine Biology (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/interdisciplinary/marine-biology-phd)
- Doctor of Philosophy in Molecular and Environmental Plant Sciences (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/interdisciplinary/molecular-environmental-plant-sciences-ms)

Neuroscience

Interdisciplinary Program in Neuroscience

Chair: J. Welsh

Neuroscience is a field devoted to the scientific study of the nervous system, from its molecular/cellular underpinnings to the organization of neural circuits, and the manifestation of this biological/neurochemical machinery as behavioral, physiological and psychological processes. It aims to detail both how the normal system operates and how alterations in function contribute to clinical diseases, such as mental illness, dementia, developmental disorders, neurodegenerative diseases, chronic pain, drug addiction, and the loss of function with aging or neural injury.

Minors

Neuroscience Minor (p. 97)

Certificates

Neuroscience Certificate (p. 98)

Neuroscience - Minor

A minor in Neuroscience is considered an interdisciplinary minor with course selections in the Departments of Biology, Psychology, Philosophy and Veterinary Integrative Biosciences. Please be aware that each course selection may have prerequisite requirements that must be met.

To apply for admission to the Minor in Neuroscience, students must complete the Minor Approval Form. It must be signed by the NRSC academic advisor and then submitted to your major advisor.

Program Requirements

The coursework listed represents various sub-disciplines within the field of Neuroscience and would give the student an overall knowledge base fitting a minor in Neuroscience. No grade below a C is acceptable to meet minor requirements.

NRSC 489 Special Topics in...  
PHIL 320  Philosophy of Mind  
VIBS 401  Developmental Neurotoxicology  

**Total Semester Credit Hours**  
15

The minor must be declared before the student has completed 95 credit hours.

Student must make a grade of C or better.

For Psychology students, no more than 6 credit hours can be counted toward both the Neuroscience Minor and the Psychology Major.

A total of 6 hours of directed research (485/491) may be counted toward the minor. Directed studies may be conducted with any member of the faculty of Neuroscience. Research experiences must be approved by the NRSC faculty mentor.

## Neuroscience - Certificate

The Neuroscience Certificate, offered by the Texas A&M Institute for Neuroscience (TAMIN), provides students with the opportunity to acquire enhanced training in research in various aspects of the nervous system of humans and other animals. Students in this Certificate Program will gain a broader understanding of how the nervous system functions during health and disease through enriched experiences in areas of molecular, structural, physiological, cognitive, behavioral, computational, or bioengineering neuroscience. The Neuroscience Certificate requires completion of 16 hours of course work in designated courses. Students must complete, prior to graduation, a combination of coursework and inquiry-based research (or an internship), which will be completed under the supervision of a TMIN faculty member.

**Steps:**

 Normally, students should apply to the Neuroscience Certificate program approximately two years before they plan to graduate. For the first two years of the program (Fall 2014-Spring 2016), students who are further along in the program may apply (and are expected to complete all requirements). To apply, students must:

1. Identify a faculty advisor who is willing to supervise Directed Studies in Research (NRSC 485/491). Working with the faculty advisor, the student must develop a brief (one paragraph) description of the proposed line of research.
2. Complete the Neuroscience Certificate Program form (http://tamin.tamu.edu/files/tamin/undergraduate/certificate/NeurosciCertificateApplication.docx) and have the faculty advisor sign it.
3. Submit the form to the TAMIN Coordinator in the Interdisciplinary Life Sciences Building, Room 3148.

Students must maintain the required GPA for their major.

Students must present their research at one TAMU Student Research Week and a poster at the Annual TAMIN Neuroscience Symposium held in the spring semester.

Students are expected to file a degree plan for their major within the administering department at the start of their junior year.

Students wishing to obtain an Honors Neuroscience Certificate must maintain a GPA of 3.5. Please visit the Honors Office in Henderson Hall to request honors credit and to complete any paperwork required by that office.

**Total Semester Credit Hours** 16

1. No more than six credits can be used towards the Neuroscience Certificate. This limit does not preclude students from taking additional hours. Those hours will not, however, count towards the 16 credit hours needed to complete the Neuroscience Certificate.

2. If a student takes more than one course, it can count towards their electives.
College of Agriculture and Life Sciences

Administrative Officers
Vice Chancellor and Dean - Mark Hussey, Ph.D.
Executive Associate Dean - Alan Sams, Ph.D.
Associate Dean for Academic Operations - Kim E. Dooley, Ph.D.
Associate Dean for Graduate Programs and Faculty Development - David W. Reed, Ph.D.
Associate Dean for Student Development - Chris L. Skaggs, Ph.D.
Assistant Dean for Student Success - Danielle A. Harris, Ph.D.

General Statement
Ensuring an adequate and safe food supply for a rapidly expanding world population, succeeding in a global economy, and maintaining our planet’s natural resources and biodiversity are some of the challenges that are being met by graduates from the College of Agriculture and Life Sciences. Our students apply knowledge to solve problems as scientists, business leaders, engineers, educators, physicians, and other professionals. Enthusiastic and competitive students, a distinguished faculty, innovative teaching methods, outstanding advisors, and abundant experiential learning opportunities, including undergraduate research, result in the College of Agriculture and Life Sciences being considered one of the top colleges of agriculture in the country.

Our 32 majors and 21 minors provide students technical expertise and a broad education so that they can meet the challenges of feeding the world, improving health, protecting the environment, and enriching youth. Abilities of thinking creatively and critically, solving problems, making decisions and communicating effectively are developed, along with learning how to work with people of varied backgrounds. Relating well with others, leadership and fellowship are vital to success in the “real world.” Faculty members who teach undergraduate classes include many who are recognized nationally and internationally for research and other accomplishments in their disciplines. Interested undergraduates also have a chance to be a part of research projects themselves.

There are many opportunities for high impact courses and programs, such as undergraduate research, international experiences, internships and field study. The college has study abroad programs in the Americas, Asia, Europe, Oceania, Africa, and the Caribbean. All students are encouraged to participate in at least one of these high impact activities before graduation. Honors programs or stand-alone honors programs are available in many of the college’s academic departments. There are numerous student organizations that are sponsored by departments or the college such as the Freshman Leadership Program and the Agricultural and Life Sciences Student Council. These organizations promote interaction among students who share interests, and foster leadership skills.

The College of Agriculture and Life Sciences and its departments offer a variety of scholarships to students on a competitive basis. Many are reserved for incoming freshmen or transfer students. Additional information and application forms for college-level scholarships for current students can be obtained from the Scholarships and Financial Aid Office. Information about departmental scholarships can be obtained from the departments directly.

College of Agriculture and Life Sciences Baccalaureate Degree Programs
Each major can be planned to prepare students for graduate study or admission to professional schools in medicine, dentistry, veterinary medicine, other health professions and law. Students in programs, such as biochemistry, genetics and nutritional sciences, are highly recruited for medicine, nursing, and other health professions. Animal science and wildlife and fisheries sciences are among several excellent choices for students interested in veterinary medicine. Students with a background in natural resources, the agricultural industry, forensics, or life sciences can use that knowledge well if they choose to enter law school. An environmental lawyer with a degree in a natural resource area is better equipped to incorporate the science with the law.

Advising is provided for each student in the college through offices in the individual academic departments. Departmental faculty and professional advisors provide assistance on course selection and other academic issues and serve as mentors for career planning and admission to graduate or professional school. Advisors serve as professional consultants for students in the College with the objective of avoiding problems if possible and solving problems if needed.

Requirements for Graduation
Requirements for graduation are listed in the Texas A&M University Student Rules and this catalog. With the exception of general elective requirements, courses taken to satisfy degree requirements must be taken for letter grades.

International and Cultural Diversity Requirement
Texas A&M University requires its students to meet an International and Cultural Diversity requirement as part of the Graduation requirements. Meeting this requirement will require the careful selection of courses. The student is directed to the Requirements for a Baccalaureate Degree (p. 24) section of this catalog for detailed information regarding this requirement and also is encouraged to seek the advice of the student’s academic advisor.

Internships and Cooperative Education
Internships provide real-world experience in industries related to a student’s education and professional career preparation. Students return to campus with a broader perspective and more intense interest in their education. The experiences are so valuable that many students complete more than one internship. Most departments in the College offer academic credit for the satisfactory completion of an internship. In fact, an internship is required for graduation in some degree programs.

The Agricultural and Natural Resources Policy (ANRP) Internship Program places students from the College of Agriculture and Life Sciences in policy-based internships in Austin, TX, Washington, D.C. and Rome, Italy for a semester or summer. Selection for the program is based upon factors such as academic performance, leadership, and a student’s general interest in learning the policy process.

Cooperative education is a program of work and study that allows students to gain practical experience in their chosen field while pursuing a degree.
Students interested in information should consult with their academic advisor.

**Graduate Study**

All departments in the College of Agriculture and Life Sciences offer graduate degrees at the master’s and doctoral levels. Every department offers courses and programs online.

Students are encouraged to contact the department in which they wish to major to obtain information about graduate study. Information on admission, programs available, etc., can be found in the *Texas A&M University Graduate and Professional Catalog*.

**Teacher Certification**

Texas teacher certification in agricultural science is available through the Department of Agricultural Leadership, Education, and Communications. Certification is granted through the State Board of Educator Certification (SBEC) upon a student’s completion of the course of study administered by the department. The undergraduate major in agricultural science includes all coursework required for our recommending a student to SBEC for teacher certification. The requirements can be completed with any major in the College of Agriculture and Life Sciences. See an advisor in Agricultural Science, Department of Agricultural Leadership, Education, and Communications, for more information.

**Majors**

**College of Agriculture and Life Sciences**

- Bachelor of Science in Renewable Natural Resources (p. 142)

**Department of Agricultural Economics**

- Bachelor of Science in Agribusiness (p. 107)
- Bachelor of Science in Agricultural Economics, Finance and Real Estate Option (p. 109)
- Bachelor of Science in Agricultural Economics, Food Marketing Systems Option (p. 110)
- Bachelor of Science in Agricultural Economics, Policy and Economic Analysis Option (p. 112)
- Bachelor of Science in Agricultural Economics, Rural Entrepreneurship Option (p. 113)
- Bachelor of Science in Agricultural Economics and Master of Public Service and Administration, 5-Year Degree Program (p. 115)

**Department of Agricultural Leadership, Education, and Communications**

- Bachelor of Science in Agricultural Communications and Journalism (p. 119)
- Bachelor of Science in Agricultural Leadership and Development (p. 120)
- Bachelor of Science in Agricultural Science (p. 121)
- Bachelor of Science in University Studies, Leadership Studies Concentration (p. 122)

**Department of Animal Science**

- Bachelor of Science in Animal Science, Production/Industry Option (p. 125)
- Bachelor of Science in Animal Science, Science Option (p. 127)

**Department of Biochemistry and Biophysics**

- Bachelor of Science in Biochemistry (p. 130)
- Bachelor of Science in Genetics (p. 131)

**Department of Biological and Agricultural Engineering**

- Bachelor of Science in Agricultural Systems Management (p. 134)
- Bachelor of Science in Biological and Agricultural Engineering (p. 135)—offered in conjunction with the Dwight Look College of Engineering

**Department of Ecosystem Science and Management**

- Bachelor of Science in Ecological Restoration (p. 138)
- Bachelor of Science in Forestry (p. 139)
- Bachelor of Science in Rangeland Ecology and Management, Ranch Management Option (p. 140)
- Bachelor of Science in Rangeland Ecology and Management, Rangeland Resources Option (p. 141)
- Bachelor of Science in Renewable Natural Resources (p. 142)
- Bachelor of Science in Spatial Sciences (p. 144)

**Department of Entomology**

- Bachelor of Science in Entomology (p. 146)
- Bachelor of Science in Forensic and Investigative Sciences, Pre-Law Emphasis (p. 149)
- Bachelor of Science in Forensic and Investigative Sciences, Science Emphasis (p. 150)

**Department of Horticultural Sciences**

- Bachelor of Arts in Horticulture (p. 153)
- Bachelor of Science in Horticulture (p. 154)

**Department of Nutrition and Food Science**

- Bachelor of Science in Food Science and Technology, Food Science Option (p. 158)
- Bachelor of Science in Food Science and Technology, Industry Option (p. 156)
- Bachelor of Science in Nutrition, Didactic Program in Dietetics Track (p. 160)
- Bachelor of Science in Nutrition, General Nutrition Track (p. 161)
- Bachelor of Science in Nutrition, Molecular and Experimental Track (p. 163)

**Department of Plant Pathology and Microbiology**

- Bachelor of Science in Bioenvironmental Sciences (p. 165)
- Bachelor of Science in Environmental Studies (p. 166)
- Bachelor of Science in University Studies, Environmental Business Concentration (p. 167)
Department of Poultry Science
- Bachelor of Science in Poultry Science, Industry Emphasis (p. 169)
- Bachelor of Science in Poultry Science, Technical Emphasis (p. 170)

Department of Recreation, Park and Tourism Sciences
- Bachelor of Science in Community Development (p. 173)
- Bachelor of Science in Recreation, Park and Tourism Sciences, Community Recreation and Park Administration Certificate (p. 174)
- Bachelor of Science in Recreation, Park and Tourism Sciences, Parks and Conservation Certificate (p. 175)
- Bachelor of Science in Recreation, Park and Tourism Sciences, Tourism Management Certificate (p. 176)
- Bachelor of Science in Recreation, Park and Tourism Sciences, Youth Development Certificate (p. 177)
- Bachelor of Science in Renewable Natural Resources (p. 142)

Department of Soil and Crop Sciences
- Bachelor of Science in Plant and Environmental Soil Science, Crops Emphasis (p. 181)
- Bachelor of Science in Plant and Environmental Soil Science, Soil and Water Emphasis (p. 182)
- Bachelor of Science in Turfgrass Science (p. 183)

Department of Wildlife and Fisheries Sciences
- Bachelor of Science in Renewable Natural Resources (p. 142)
- Bachelor of Science in Wildlife and Fisheries Sciences, Aquatic Ecology and Conservation Option (p. 185)
- Bachelor of Science in Wildlife and Fisheries Sciences, Vertebrate Zoology Option (p. 186)
- Bachelor of Science in Wildlife and Fisheries Sciences, Wildlife Ecology and Conservation Option (p. 187)

Minors
Minors consist of a group of specified courses totaling between 15 and 18 credit hours. Students who are eligible to enroll in a minor should contact an advisor in the department offering the minor. Minors available in the college are listed.

Department of Agricultural Economics
- Agricultural Economics Minor (p. 117)
- Financial Planning Minor (p. 117)

Department of Agricultural Leadership, Education, and Communications
- Agricultural Communications and Journalism Minor (p. 122)
- International Agricultural Development Minor (p. 123)
- Leadership Minor (p. 123)

Department of Animal Science
- Animal Science Minor (p. 128)

Department of Biochemistry and Biophysics
- Biochemistry Minor (p. 132)
- Genetics Minor (p. 133)

Department of Biological and Agricultural Engineering
- Agricultural Systems Management Minor (p. 137)

Department of Ecosystem Science and Management
- Forestry Minor (p. 144)
- Rangeland Ecology and Management Minor (p. 145)
- Spatial Sciences Minor (p. 145)

Department of Entomology
- Entomology Minor (p. 151)

Department of Horticultural Sciences
- Horticulture Minor (p. 155)

Department of Plant Pathology and Microbiology
- Bioenvironmental Sciences Minor (p. 169)

Department of Poultry Science
- Poultry Science Minor (p. 171)

Department of Recreation, Park and Tourism Science
- Park and Natural Resource Management Minor (p. 178)
- Tourism Management Minor (p. 178)

Department of Soil and Crop Sciences
- Agronomy Minor (p. 184)
- Environmental Soil Science Minor (p. 184)

Department of Wildlife and Fisheries Sciences
- Wildlife and Fisheries Sciences Minor (p. 189)

Certificates
Certificate programs document expertise in an area beyond a major or minor. Information on requirements for certificate programs is available from the advisor of the department offering the certificate. Certificate programs available in the college are listed.

Department of Agricultural Economics
- International Trade and Agriculture Certificate (p. 118)

Department of Animal Science
- Equine Science Certificate (p. 128)
- Meat Science Certificate (p. 128)
Department of Ecosystem Science and Management

- Watershed Certificate (p. 145)

Department of Entomology

- Public Health Entomology Certificate (p. 152)

Department of Recreation, Park and Tourism Science

- Community Recreation and Park Administration Certificate
- Parks and Conservation Certificate
- Professional Event Manager Certificate (p. 179)
- Tourism and Hospitality Management Certificate (p. 179)
- Tourism Management Certificate
- Youth Development Certificate

Masters

College of Agriculture and Life Sciences

- Master of Natural Resources Development in Natural Resources Development (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/agriculture-life-sciences/recreation-park-tourism-sciences/mnrd)
- Master of Science in Plant Breeding (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/agriculture-life-sciences/horticultural-sciences/plant-breeding-ms)

Department of Agricultural Economics

- Master of Agriculture in Agricultural Economics (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/agriculture-life-sciences/agricultural-economics/agriculture-masters)
- Master of Science in Agricultural Economics (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/agriculture-life-sciences/entomology/entomology-magr)

Department of Agricultural Leadership, Education, and Communications

- Master of Agriculture in Agricultural Development (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/agriculture-life-sciences/agricultural-leadership-education-communications/agricultural-development-agriculture-masters)
- Master of Education in Agricultural Leadership, Education and Communication—offered in conjunction with the College of Education and Human Development (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/agriculture-life-sciences/agricultural-leadership-education-communications/med)
- Master of Science in Agricultural Leadership, Education and Communication—offered in conjunction with the College of Education and Human Development (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/agriculture-life-sciences/agricultural-leadership-education-communications/ms)

Department of Animal Science

- Master of Science in Animal Breeding (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/agriculture-life-sciences/animal-science/animal-breeding-ms)

- Master of Agriculture in Animal Science (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/agriculture-life-sciences/animal-science/magr)
- Master of Science in Animal Science (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/agriculture-life-sciences/animal-science/ms)
- Master of Equine Industry Management in Equine Industry Management (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/agriculture-life-sciences/animal-science/equine-industry-reproduction-ms)
- Master of Science in Physiology of Reproduction (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/agriculture-life-sciences/animal-science/physiology-reproduction-ms)

Department of Biochemistry and Biophysics

- Master of Science in Biochemistry (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/agriculture-life-sciences/biochemistry-biophysics/biochemistry-ms)

Department of Biological and Agricultural Engineering

- Master of Agriculture in Agricultural Systems Management (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/agriculture-life-sciences/biological-agricultural-engineering/systems-management-magr)
- Master of Science in Agricultural Systems Management (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/agriculture-life-sciences/biological-agricultural-engineering/systems-management-ms)
- Master of Engineering in Biological and Agricultural Engineering—offered in conjunction with the Dwight Look College of Engineering (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/agriculture-life-sciences/biological-agricultural-engineering/engineering-meng)
- Master of Science in Biological and Agricultural Engineering—offered in conjunction with the Dwight Look College of Engineering (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/agriculture-life-sciences/biological-agricultural-engineering/biological-agriculture-engineering-ms)

Department of Ecosystem Science and Management

- Master of Agriculture in Ecosystem Science and Management (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/agriculture-life-sciences/ecosystem-science-management/magr)
- Master of Science in Ecosystem Science and Management (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/agriculture-life-sciences/ecosystem-science-management/ms)
- Master of Natural Resources Development in Natural Resources Development (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/agriculture-life-sciences/entomology/entomology-ms)

Department of Entomology

- Master of Science in Entomology (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/agriculture-life-sciences/entomology/ms)
Department of Horticultural Sciences
- Master of Agriculture in Horticulture (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/agriculture-life-sciences/horticultural-sciences/magr)
- Master of Science in Horticulture (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/agriculture-life-sciences/horticultural-sciences/horticulture-ms)
- Master of Science in Plant Breeding (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/agriculture-life-sciences/horticultural-sciences/plant-breeding-ms)

Interdepartmental Degree Programs

The Bachelor of Science in Renewable Natural Resources degree is an interdepartmental degree in the College of Agriculture and Life Sciences. It is offered in the Department of Ecosystem Science and Management (p. 137), the Department of Recreation, Parks and Tourism Sciences, (p. 171) and the Department of Wildlife and Fisheries Sciences (p. 184).

Majors

- Bachelor of Science in Renewable Natural Resources (p. 142)

Department of Agricultural Economics

The Department of Agricultural Economics offers a Bachelor of Science degree in Agricultural Economics. The BS degree in Agricultural Economics offers students four options: Finance and Real Estate, Food Marketing Systems, Policy and Economic Analysis, and Rural Entrepreneurship. The course requirements for the freshman and sophomore years are the same for all Agricultural Economics options. In conjunction with the Bush School of Government and Public Service, the department offers a five-year program that allows a student to receive a BS in AGEC and a Master’s of Public Service and Administration degree. In addition, in conjunction with the Mays Business School, the department also offers a BS in Agribusiness.

Department of Agricultural Economics Honors Plan

The Department of Agricultural Economics at Texas A&M University offers academically talented Agricultural Economics and Agribusiness majors an opportunity to study, experience, learn, and grow. This honors plan will enrich your college experience by offering curricular challenge and stimulating your interest in research. Through the Agricultural Economics departmental honors plan, you will have an opportunity to work closely with faculty members and have in-depth conversations about class topics as well their areas of research. You will develop the vital problem solving and critical thinking skills that are valued in today’s fast-paced business culture. Honors distinctions will demonstrate your ability to handle a challenging curriculum, which can be particularly useful if you are planning
to attend graduate school or law school. The challenging coursework and fascinating co-curricular activities offered through this program will enhance your academic success.

The Department of Agricultural Economics Honors Plan is administered through the Undergraduate Programs Office, located in Room 214 of the Agriculture and Life Sciences Building. For more information, contact the Undergraduate Programs Office, (979) 845-4911, or visit our website at http://agecon.tamu.edu/undergraduate/current-students/honors/ and select the Future or Current Students link.

Majors

Agribusiness
• Bachelor of Science in Agribusiness (p. 107)

Agricultural Economics
• Bachelor of Science in Agricultural Economics, Finance and Real Estate Option (p. 109)
• Bachelor of Science in Agricultural Economics, Food Marketing Systems Option (p. 110)
• Bachelor of Science in Agricultural Economics, Policy and Economic Analysis Option (p. 112)
• Bachelor of Science in Agricultural Economics, Rural Entrepreneurship Option (p. 113)

5-Year Degree Program
• Bachelor of Science in Agricultural Economics and Master of Public Service and Administration (p. 115)

Minors
• Agricultural Economics Minor (p. 117)
• Financial Planning Minor (p. 117)

Certificates
• International Trade and Agriculture Certificate (p. 118)

Graduate
• Master of Agriculture in Agricultural Economics
• Master of Science in Agricultural Economics
• Doctor of Philosophy in Agricultural Economics—offered as a joint program with Texas Tech University when offered by Distance Education

Agribusiness - BS

In conjunction with Mays Business School, the College of Agriculture and Life Sciences and the Department of Agricultural Economics offer a Bachelor of Science in Agribusiness.

Students pursuing the agribusiness degree must have a GPR of 2.0 in the courses included in the Common Body of Knowledge.

Curriculum in Agribusiness (BS)
The Bachelor of Science is offered in Agribusiness. The BS Agribusiness degree prepares students for careers in the nation’s growing agribusiness sector which provides the products and services for the production, processing and distribution of food and fiber. With the potential for expanded export opportunities, the need for graduates for agribusiness positions is increasing. The agribusiness program combines the common body of knowledge requirements of a degree in business with coursework emphasizing the understanding of the unique institutional and managerial challenges facing agribusiness firms. Students integrate business management principles with technical knowledge to develop practical decision-making skills.

Upper-Level Entry into Agribusiness
The requirements and procedures for consideration for upper level are as follows:

1. In order to be considered for upper-level and possible admission into the program of study in agribusiness, a student must have:
   a. Satisfactorily completed at least 60 semester credit hours.
   b. Satisfactorily completed all of the following eight courses:

   - ACCT 229 Introductory Accounting 3
   - ACCT 230 Introductory Accounting 3
   - AGEC 217 Fundamentals of Agricultural Economics Analysis 3
   - ECON 202 Principles of Economics 3
   - ECON 203 Principles of Economics 3
   - MGMT 211 Legal and Social Environment of Business 3
   - MATH 141 Business Mathematics I 3
   - MATH 142 Business Mathematics II 3
   c. Students should complete the freshman and sophomore sequence of courses as listed under Curriculum in Agribusiness. Following this sequence will allow the timely application for consideration for upper-level.
   d. Admission, if granted, will be effective upon successful completion of the in-process courses; however, if all requirements are not met prior to the start of the next semester, admission will be revoked.
2. Transfer students: Transfer students admitted to the Agribusiness degree will be classified as AGBL (lower-level Agribusiness) students until they complete all requirements listed previously in item 1.

3. Change of curriculum students: Texas A&M students who change curriculum into the Agribusiness degree from another college or department at the University will be classified as AGBL (lower-level Agribusiness) students until they complete all requirements listed in item 1.

Total Semester Credit Hours: 120

1 Satisfies the University Core Curriculum Social and Behavioral Sciences requirement.

2 For those students under ROTC contract, see Requirement 7 of the Requirements for a Baccalaureate Degree (p. 25).

3 Three hours must be selected from ENGL 103 or ENGL 104.

4 All undergraduate students must take at least two (2) specific courses in their major designated as writing intensive (W). This course is an approved W course.

5 Six hours required. Three hours of international coursework may be taken outside of the Mays Business School. A complete list of approved international electives is available in the college Undergraduate Program Office, Room 214 of the Agriculture and Life Sciences Building, or can be found on our website.

6 Three hours of technical agriculture electives to be selected from any course offered by the College of Agriculture and Life Sciences except 285s, 484s, 485s and agricultural economics courses. To be selected in consultation with an advisor.

7 Any Texas A&M or transfer course (except KINE 198 and KINE 199; STLC 001-STLC 003) not used to meet other requirements.

Agricultural Economics - BS, Finance and Real Estate Option

The Bachelor of Science degree in Agricultural Economics offers students four options: Finance and Real Estate, Food Marketing Systems, Policy and Economic Analysis, and Rural Entrepreneurship. The course requirements for the freshman and sophomore years are the same for all Agricultural Economics options.

Requirements for graduation are listed in the Texas A&M University Student Rules and this catalog. With the exception of physical activity and general elective requirements, courses taken to satisfy degree requirements must be taken for letter grades.

The curriculum in Agricultural Economics is designed to train graduates for a wide variety of jobs in agriculturally-oriented business firms and agencies. Flexibility is included in the curriculum so that a student, in consultation with an academic advisor, can develop a degree program which best fits personal career objectives.

While not required on the degree plan, students are strongly encouraged to participate in internships (AGEC 484) to broaden their knowledge base and gain real-world experience to greater enhance employability after graduation. Students also have an opportunity to work one-on-one with a faculty member in a directed studies project. Directed studies projects (AGEC 485) enable students to receive additional instruction in areas of their career choice. To receive credit for AGEC 484 and/or AGEC 485 coursework, the student must meet the following requirements:

1. For Students who have completed between 30 and 59 hours total:
   a. have completed a minimum of 12 of those hours at Texas A&M
   b. have completed AGEC 105, either ECON 202 or ECON 203, MATH 141, MATH 142, AGEC 217 and ACCT 209 or ACCT 229 (or their equivalents);
   c. have a minimum GPR of 2.75 (overall, in major, and in CBK classes if applicable); and
   d. obtain approval of the department head and supervising professor.

2. For students who have completed 60 or more hours, you must:
   a. have completed a minimum of 12 hours at Texas A&M;
   b. have completed AGEC 105, either ECON 202 or ECON 203, MATH 141, MATH 142, AGEC 217 and ACCT 229 or ACCT 229 (or their equivalents);
   c. have a minimum GPR of 2.5 (overall, in major, and in CBK classes if applicable); and
   d. obtain approval of the department head and supervising professor.

Note: Please see an advisor to determine where internship and/or directed studies credit may be used on your degree plan.

Students also have the opportunity to participate in the Agricultural and Natural Resources Policy Internship program. This internship allows students to work a semester in Washington, D.C. with a member of the Texas delegation. To receive credit for this experience, the student must meet the following requirements:

1. have completed AGEC 105 or 3 hours of economics;
2. have a minimum GPR of 2.25 (overall, in major, and in CBK classes, if applicable);
3. be classified as a junior or senior; and
4. obtain approval from the department head and supervising professor.

Note: Please see an advisor to determine where internship and/or directed studies credit may be used on your degree plan.

All sophomore (200) through senior (400) level agricultural economics courses have prerequisites which are strictly enforced. Prerequisites are shown in the agricultural economics course description portion of this catalog. You may also find a list of agricultural economic course prerequisites on our website (http://agecon.tamu.edu/undergraduate/current-students/curriculum/courses). Prerequisites are subject to change and students should review the prerequisite list on our website before registering each semester.

Finance and Real Estate Option

The Finance and Real Estate option is designed to provide a well-founded basis in principles, concepts and methods for students interested in finance and/or real estate professional careers in the agricultural industry and/or related professions.

Policy and Economic Analysis Option

The Policy and Economic Analysis Option is designed to provide a well-founded basis in principles, concepts and methods for students interested
in pursuing graduate study and/or law school following their graduation with a BS degree.

Total Semester Credit Hours: 120

1. Students under ROTC contract, see Requirement 7 of the Requirements for a Baccalaureate Degree. (p. 25)
2. Any course offered by the College of Agriculture and Life Sciences, except 285s, 484s, 485s and agricultural economics courses.
3. The 6 hours of international and cultural diversity courses, as required for graduation, may be met in the curriculum. Students may select Language, Philosophy and Culture and Creative Arts elective that also meet the international and cultural diversity requirement.
4. All undergraduate students must take at least two (2) specific courses in their major designated as writing intensive (W). This course is an approved W course.
5. Six hours to be selected in one or more departments outside of the Department of Agricultural Economics. A minimum of 3 of these hours must be at the 300- or 400-level. To be selected in consultation with an advisor.
6. To be selected in consultation with an advisor.
7. Any Texas A&M or transfer course (except KINE 198 and KINE 199; STLC 001 - STLC 003 (p. 993)) not used to meet other requirements.

Agricultural Economics - BS, Rural Entrepreneurship Option

The Bachelor of Science degree in Agricultural Economics offers students four options: Finance and Real Estate, Food Marketing Systems, Policy and Economic Analysis, and Rural Entrepreneurship. The course
requirements for the freshman and sophomore years are the same for all Agricultural Economics options.

Requirements for graduation are listed in the Texas A&M University Student Rules and this catalog. With the exception of physical activity and general elective requirements, courses taken to satisfy degree requirements must be taken for letter grades.

The curriculum in Agricultural Economics is designed to train graduates for a wide variety of jobs in agriculturally-oriented business firms and agencies. Flexibility is included in the curriculum so that a student, in consultation with an academic advisor, can develop a degree program which best fits personal career objectives.

While not required on the degree plan, students are strongly encouraged to participate in internships (AGEC 484) to broaden their knowledge base and gain real-world experience to greater enhance employability after graduation. Students also have an opportunity to work one-on-one with a faculty member in a directed studies project. Directed studies projects (AGEC 485) enable students to receive additional instruction in areas of their career choice. To receive credit for AGEC 484 and/or AGEC 485 coursework, the student must meet the following requirements:

1. For Students who have completed between 30 and 59 hours total:
   a. have completed a minimum of 12 of those hours at Texas A&M;
   b. have completed AGEC 105, either ECON 202 or ECON 203, MATH 141, MATH 142, AGEC 217 and ACCT 209 or ACCT 229 (or their equivalents);
   c. have a minimum GPR of 2.75 (overall, in major, and in CBK classes if applicable); and
   d. obtain approval of the department head and supervising professor.

2. For students who have completed 60 or more hours, you must:
   a. have completed a minimum of 12 hours at Texas A&M;
   b. have completed AGEC 105, either ECON 202 or ECON 203, MATH 141, MATH 142, AGEC 217 and ACCT 229 or ACCT 229 (or their equivalents);
   c. have a minimum GPR of 2.5 (overall, in major, and in CBK classes if applicable); and
   d. obtain approval of the department head and supervising professor.

Note: Please see an advisor to determine where internship and/or directed studies credit may be used on your degree plan.

Students also have the opportunity to participate in the Agricultural and Natural Resources Policy Internship program. This internship allows students to work a semester in Washington, D.C. with a member of the Texas delegation. To receive credit for this experience, the student must meet the following requirements:

1. have completed AGEC 105 or 3 hours of economics;
2. have a minimum GPR of 2.25 (overall, in major, and in CBK classes, if applicable);
3. be classified as a junior or senior; and
4. obtain approval from the department head and supervising professor.

Note: Please see an advisor to determine where internship and/or directed studies credit may be used on your degree plan.

All sophomore (200) through senior (400) level agricultural economics courses have prerequisites which are strictly enforced. Prerequisites are shown in the agricultural economics course description portion of this catalog. You may also find a list of agricultural economic course prerequisites on our website (http://agecon.tamu.edu/undergraduate/current-students/curriculum/courses). Prerequisites are subject to change and students should review the prerequisite list on our website before registering each semester.

Rural Entrepreneurship Option

The Rural Entrepreneurship Option is designed to provide a well-founded basis in principles, concepts and methods for students interested in owning and/or managing or otherwise being engaged in working with a rural business.

### College of Agriculture and Life Sciences

Agricultural Economics - 5-Year Bachelor of Science/Master of Public Service Administration

The Joint-Degree Program between the Department of Agricultural Economics and The Bush School of Government & Public Service allows undergraduate Agricultural Economics students to enter the Master of Public Service Program the beginning of their fourth year at Texas A&M University.

Agricultural Economics majors who have at least a 3.25 GPA and who will have completed all of their prerequisite courses and otherwise completed 94 hours by the fall of their fourth year will be eligible to apply for the five-year program during their junior year. Applicants to the five-year program will submit the same materials (including GRE scores) as other MPSA applicants, and those whose records are judged to be competitive by the mid-January deadline will be invited to attend the GBS Interview Conference Weekend in late February/early March. The admissions criteria for the five-year program will be the same as for other MPSA students.

Students who choose not to finish the MPSA degree after being admitted to the five-year program may exit the program at any time. Completed MPSA courses will be applied to their bachelor’s degree in Agricultural Economics, and students will select the Agricultural Economics option area that is most appropriate for their interest. Failure to complete the MPSA program will in no way impede their ability to attain a bachelor’s degree in Agricultural Economics when the requirements for that degree are completed.

Advising for the five-year program will involve a coordinated effort by the Undergraduate Program Office in the Department of Agricultural Economics and the Director of the MPSA program in the Bush School. Advising by the Department of Agricultural Economics will help ensure that interested students have satisfied the prerequisite course requirements for their bachelor’s degree by the beginning of their senior year. The MPSA director and GBS director of recruiting will also be available for agricultural economics students who wish to set up appointments to talk individually about the MPSA program’s curriculum and career opportunities available to its graduates.

Students admitted into the five-year program (having completed a minimum of 103 credit hours toward their bachelor’s degree) will be enrolled in Bush School graduate courses with an undergraduate classification (U4) for the fall of their fourth year and will be reclassified as degree-seeking master’s degree students (G7) upon completing 116 credit hours. This will normally occur at the beginning of the spring semester of their fourth year.

Students in the five-year program will be required to complete the same two-year, 48-hour curriculum as other students admitted to the Bush School’s MPSA program. The curriculum combines nine core courses in public management, policy analysis, economics and research methods with seven electives.

A professional internship is also required and must be completed in the summer between the first and second years at the Bush School for those without substantive professional experience.

### Agricultural Economics - Minor

The minor in Agricultural Economics is available to all students enrolled at Texas A&M University. The primary educational objective of this minor program is to provide students, majoring in other fields, with a fundamental knowledge of the fields of agricultural economics. The courses required for this minor will cover the major business elements of the agricultural industry.

#### Program Requirements

##### Core Courses

- **AGEC 105**  
Introduction to Agricultural Economics  
3  
- **AGEC 314**  
Marketing Agricultural and Food Products  
3  
- **AGEC 330**  
Financial Management in Agriculture  
3  
- **AGEC 340**  
Agribusiness Management  
3  

##### Electives

Upper-level AGEC courses (p. 605)  
6  

<table>
<thead>
<tr>
<th>Term</th>
<th>Semester Credit Hours</th>
</tr>
</thead>
</table>

| Total Semester Credit Hours | 18 |

1. The following courses will not count toward the 6 hours of electives:  
AGEC 481, AGEC 484, and AGEC 485. Students are encouraged to visit the Agricultural Economics advisors to select the elective courses based on their career interests.

Students must make a grade of "C" or better in all courses.

### Financial Planning - Minor

The minor in Financial Planning prepares students for leadership roles in this growing profession. Financial planners advise their clients about financial decisions, including budget management, insurance, investment, taxes, retirement and estate planning. Their goal is to assist clients in achieving their financial goals in an increasingly complex economy. The six-course curriculum (18 credit hours) also satisfies the educational requirements to be eligible to sit for the exam portion of the CERTIFIED FINANCIAL PLANNER™ (CFP®) designation conferred by the CFP Board of Standards (http://www.cfp.net). Professionals who have earned this designation are in high demand in the financial services sector.

The minor in Financial Planning is available to all junior or senior undergraduate students enrolled at Texas A&M University, who have completed an introductory finance course and have an overall GPA of 2.5 or higher. Successful completion of the minor requires the courses to be taken for academic credit with a grade of C or better for each course. Coursework is offered both online and in the classroom to meet students'
learning preferences. Visit our website (http://financialplanning.tamu.edu) for more information about this minor and the career opportunities in Financial Planning.

Students must make a grade of "C" or better in all courses.

Students must have completed an introductory finance course and have an overall GPA of 2.5 or higher.

International Trade and Agriculture - Certificate

Open to All Majors

The Certificate in International Trade and Agriculture (CITA), offered by the Department of Agricultural Economics, is designed to provide students with a complete knowledge and understanding of the global forces shaping change in agriculture. The CITA is available to all students provided that all prerequisites are met. The program requires a minimum of 15 credit hours in designated courses. Also, students must earn a grade of "C" or better in each course used to meet CITA requirements. Students who pursue the CITA must complete all requirements prior to graduation. Specific certificate requirements are available in the Undergraduate Programs Office, Room 214 of the Agriculture and Life Sciences Building, of the Department of Agricultural Economics or at http://agecon.tamu.edu/undergraduate/current-students/curriculum/certificate/

Total Semester Credit Hours 15

Study abroad, foreign languages, and international internships are encouraged and allowed to contribute toward the 15 hours required for the certificate. No more than three hours of foreign language or six hours of study abroad or six hours of international internship may be counted as credit toward the certificate.

Department of Agricultural Leadership, Education, and Communications

The Department of Agricultural Leadership, Education, and Communications (ALEC) includes a student-centered faculty and staff offering undergraduate and graduate degrees leading to professional careers. Undergraduate programs in ALEC offer a unique combination of practical, hands-on skills and the critical people skills required for success in today’s fast-moving careers. ALEC graduates are uniquely equipped for leadership, education, communications, and training roles in the broad field of agricultural sciences and human performance in both domestic and international settings. ALEC offers four Bachelor of Science degrees: Agricultural Communications and Journalism, Agricultural Leadership and Development, Agricultural Science, and University Studies-Leadership Studies; and three minors: Agricultural Communications and Journalism, International Agricultural Development, and Leadership.

PhD, Iowa State University, 1995

Majors

- Bachelor of Science in Agricultural Communications and Journalism (p. 119)
- Bachelor of Science in Agricultural Leadership and Development (p. 120)
- Bachelor of Science in Agricultural Science Teaching (p. 121)
- Bachelor of Science in University Studies, Leadership Studies Concentration (p. 122)

Minors

- Agricultural Communications and Journalism Minor (p. 122)
- International Agricultural Development Minor (p. 123)
- Leadership Minor (p. 123)

Agricultural Communications and Journalism - BS

Curriculum in Agricultural Communications and Journalism is administered by the Department of Agricultural Leadership, Education, and Communications. Graduates are employed by agricultural businesses, industries and associations; by agriculture-related organizations; by government agencies at all levels; and by all types of communication media: magazines, the Internet, television and radio stations, newspapers, and public relations and advertising agencies.

Students who wish to develop specific career plans may do so in consultation with their Agricultural Communications and Journalism advisor. With approval of the advisor and the dean’s office, substitutions may be made in the required scientific and technical agriculture courses to help meet the student’s goals.
Students are expected to be proficient in the use of computer keyboards for writing.

**Program Requirements**

**AGCJ 105** Introduction to Agricultural Communications 3

**AGCJ 281** Journalism Concepts for Agriculture 3

**AGCJ 307** Design for Agricultural Media 3

**AGCJ 312** Editing for Agricultural Audiences 3

**AGCJ 313** Agricultural Media Writing I 3

**AGCJ 314** Agricultural Media Writing II 3

**AGCJ 481** Senior Seminar 3

Agricultural Communications and Journalism Core electives 6

Select two of the following:

- **AGCJ 305** Theory and Practice of Agricultural Publishing
- **AGCJ 306** Theory and Practice of Agricultural Public Relations
- **AGCJ 308** Agricultural Photography
- **AGCJ 366** Radio Broadcasting
- **AGCJ 380** Workshop in Agricultural Communications and Journalism

Agricultural Communications and Journalism Professional Skills 9

Select three of the following:

- **AGCJ 404** Communicating Agricultural Information to the Public
- **AGCJ 405** Agricultural Publications Production
- **AGCJ 406** Agricultural Public Relations Methods
- **AGCJ 407** Web Authoring in Agricultural Communication
- **AGCJ 409** Television Production for Agricultural Journalists
- **AGCJ 485** Directed Studies
- **AGCJ 494** Internship

Agricultural business directed elective 3

Select one of the following:

- **AGEC 105** Introduction to Agricultural Economics
- **AGEC 314** Marketing Agricultural and Food Products
- **AGEC 315** Food and Agricultural Sales
- **AGEC 340** Agribusiness Management

Animal science directed elective 3

Select one of the following:

- **ANSC 107** General Animal Science
- **ANSC 108** General Animal Science
- **DASC 202** Dairying
- **ENTO 201** General Entomology
- **ENTO 208** Veterinary Entomology
- **POSC 201** General Avian Science
- **WFSC 301** Wildlife and the Changing Environment
- **WFSC 304** Wildlife and Fisheries Conservation

Plant science directed elective 3

Select one of the following:

- **SCSC 105** World Food and Fiber Crops
- **SCSC 302** Recreational Turf
- **HORT 301** Garden Science
- **PLPA 301** Plant Pathology
- **ESSM 203** Forest Trees of North America
- **ESSM 301** Wildland Watershed Management

**ESSM 302** Wildland Plants of North America

**ESSM 314** Principles of Rangeland Management Around the World

Human performance directed elective 3

Select one of the following:

- **ALEC 304** Survey of Leadership Theory
- **ALEC 440** Leading Change
- **NUTR 202** Fundamentals of Human Nutrition
- **NUTR 430** Community Nutrition
- **FSTC 201** Food Science

Agricultural electives 16

General electives 1

American history electives (p. 23) 6

POLS 206 American National Government 3

POLS 207 State and Local Government 3

Communication electives (p. 20) 6

Creative arts elective (p. 22) 3

Language, philosophy and culture elective (p. 21) 3

Life and physical sciences electives (p. 20) 9

Mathematics electives (p. 20) 6

Select one course from the following:

- **STAT 201-STAT 225** (p. 990)
- **STAT 301-STAT 415** (p. 990)

**Total Semester Credit Hours** 120

1 All agricultural electives will be used to develop a cohesive career emphasis and are to be selected in consultation with an advisor.

The Graduation requirements include a requirement for 6 hours of international and cultural diversity courses. A course satisfying a Core category, a college/department requirement, or a free elective can be used to satisfy this requirement.

**Agricultural Leadership and Development - BS**

Agricultural Leadership and Development is administered by the Department of Agricultural Leadership, Education, and Communications. It prepares students to work with people involved in agriculture and life sciences. The curriculum emphasizes the development of leadership capabilities, communication skills, and broad preparation in life sciences. The curriculum in agricultural leadership and development is multidisciplinary, designed to develop students for leadership positions in local, state, regional, and national groups, organizations, and agencies that are involved in the agricultural industry. The degree requires a 15-18 hour university approved minor that serves as a context for students to apply their leadership knowledge.

**Program Requirements**

**ALEC 201** Foundations of Agricultural Leadership, Education and Communications 2

**ALEC 202** Introduction to Leadership 3

**ALEC 301** Personal Leadership Education 3

**ALEC 340** Survey of Leadership Theory 3

**ALEC 424** Applied Ethics in Leadership 3
The Agricultural Science curriculum is designed to offer the student a combination of courses in scientific agriculture and in professional education that will meet requirements for employment and advanced study in different careers in which the emphasis is on formal and informal programs of education. Such careers may include teaching agricultural science in high schools, area career and technology schools and community colleges; working as an agricultural extension agent; working as an agricultural representative for a marketing agency, an agricultural supply company or other industries related to agriculture; and serving as an agricultural development consultant in an international program.

A student majoring in agricultural science will be counseled by an advisor in the Department of Agricultural Leadership, Education, and Communications to ensure that the program developed with the student will satisfy his or her unique interests, needs and professional aspirations. A combination of courses in scientific agriculture, education and general studies provides students with a knowledge of scientific agriculture and the ability to work with and influence people. Flexibility in course selection allows a student to place emphasis on a particular field of agriculture or to prepare broadly in agricultural studies. This flexibility might prepare a student to teach in a particular school setting, focusing upon a certain curriculum (e.g., horticulture, animal science and agricultural business).

Many aspects of the practice of agriculture are learned through experience. Enrollment in high school agricultural science and participation in FFA and/or 4-H are encouraged and recommended, but not required.

A student following this curriculum may be eligible to enter public schools as a teacher of agricultural science under the Texas Education Agency. Off-campus student teaching is required.

**Program Requirements**

**AGEC 105** Introduction to Agricultural Economics 3
or **ECON 202/203** Principles of Economics

Select one of the following:

- **AGEC 314** Marketing Agricultural and Food Products
- **AGEC 315** Food and Agricultural Sales
- **AGEC 325** Principles of Farm and Ranch Management
- **AGEC 340** Agribusiness Management

**AGLS 101** Modern Agricultural Systems and Renewable Natural Resources 1

**AGSC 301** Introduction to Agricultural Science Teaching 3

**AGSC 384** Clinical Professional Experience in AGSC 3

**AGSC 402** Designing Instruction for Secondary Agricultural Science Programs 3

**AGSC 405** Facilitating Complete Secondary Agricultural Science Programs 3

**AGSC 425** Learner Centered Instruction in Agricultural Science 3

**AGSC 436** Professional Teaching Internship in AGSC 6

**AGSC 481** Seminar 1

**AGSC 484** Field Experience 4

Select one of the following:

- **ANSC 107** General Animal Science
- **DASC 202** Dairying
- **POSC 201** General Avian Science
- **ANSC 320** Animal Nutrition and Feeding

**Total Semester Credit Hours**: 120

1. Professional development courses required for certification as a teacher of agricultural science.
2. In order to be eligible for student teaching, the AGSC major requires a 2.75 GPA.
3. Restricted electives in scientific agriculture are required for teacher certification by the Texas Education Agency. A minimum of 24 semester hours of scientific agriculture must be at the 300- and 400-level.

The Graduation requirements include a requirement for six hours of international and cultural diversity courses. A course satisfying a Core category, a college/department requirement, or a free elective can be used to satisfy this requirement.

---

### University Studies - BS, Leadership Studies Concentration

A University Studies Degree is an interdisciplinary major that consists of a concentration of 26 hours and two minors of 15-18 hours each. The University Studies Degree format was created to provide students the flexibility to combine areas of study that are of special interest.

University Studies - Leadership Studies is administered by the Department of Agricultural Leadership, Education, and Communications. In the leadership studies concentration, students learn theories and models of the leadership process and they use analysis and evaluation to synthesize multiple leadership theories. This interdisciplinary program allows you the ability to customize your higher educational experience to your future career goals unlike any other degree at Texas A&M University.

This innovative degree empowers you to develop an understanding of foundational leadership theory in your chosen context. The student, with support from the advisor, will choose minors to assist them in creating a degree plan that will allow students to gain the knowledge and skills required for their chosen career path.

---

### Agricultural Communications and Journalism - Minor

Students in the College of Agriculture and Life Sciences seeking a minor in Agricultural Communications and Journalism should begin the process by discussing the option with their academic advisor in their major.

Students should then make an appointment with an advisor in Agricultural Communications and Journalism to discuss their interests. An application is required for establishing a minor in Agricultural Communications and Journalism.

Agricultural Communications and Journalism is highly focused on written communication. Interested students should consider their interest in writing before beginning the minor.
Program Requirements

AGCJ 105 Introduction to Agricultural Communications 3
AGCJ 312 Editing for Agricultural Audiences 3
AGCJ 313 Agricultural Media Writing I 3
AGCJ 314 Agricultural Media Writing II 3
Select one of the following: 3
   AGCJ 305 Theory and Practice of Agricultural Publishing
   AGCJ 306 Theory and Practice of Agricultural Public Relations

Select one of the following: 3
   AGCJ 405 Agricultural Publications Production
   AGCJ 406 Agricultural Public Relations Methods
   AGCJ 407 Web Authoring in Agricultural Communication

Total Semester Credit Hours 18

Students must make a grade of "C" or better in all courses.

International Agricultural Development - Minor

The minor in International Agricultural Development provides students with formal instruction in international development concepts and practical experiences through language acquisition, study/research abroad, and/or international fieldwork. The 18-hour curriculum prepares students for successful post-baccalaureate international careers, or graduate studies, particularly aligned with the International Agriculture and Resource Management (IARM) Graduate Certificate Program, in partnership with the Norman Borlaug Institute for International Agriculture. Students critically examine current international agricultural issues and/or diversity and communications. Coursework includes 12 credits of foundational concepts and six hours of upper-division foreign languages or approved international experiences. Students must have a declared major, a GPR of 2.0 or higher, and have completed less than 75 hours at time of application. Before being accepted into the minor, students must meet with an IDAG advisor and complete an application.

Program Requirements

AGCJ 491 Research 3
Select three of the following: 9
   ALEC 350 Global Agricultural Issues
   ALEC 450 Global Social Justice Issues in Agriculture
   ALED 422 Cultural Pluralism in Agriculture
   ALED 442 Professional Communications in Agriculture and Life Sciences
Practical Skills/Experiences: Upper-division, university-level foreign languages; or IDAG advisor approved international experiences 6

Total Semester Credit Hours 18

1 Or other advisor approved ALED (p. 617) elective

Department of Animal Science

The curricula in Animal Science are designed to prepare students for rewarding careers in animal-oriented agribusiness. The millions of domestic animals that provide food, fiber and recreation for humans offer a variety of career opportunities for animal science graduates.

Students completing the Bachelor of Science degree in Animal Science are in demand by both the private and public sectors. Career paths include livestock production and the extensive infrastructure that provides the products and services required for management, marketing and processing of livestock and livestock products. Students receive training in nutrition, breeding, reproductive physiology, meat science, dairy products, wool and mohair, and the production and management of livestock. Extensive laboratory facilities and livestock operations located on or near campus in the Animal Science Teaching, Research and Extension Complex facilitate practical application of the scientific principles.

Leadership skills are developed through participation in a wide array of extracurricular activities, including departmental clubs, judging teams and continuing education/youth programs. A substantial number of students gain experience in a variety of disciplines through high impact learning experiences such as internships, research, study abroad and field trips.

- Master of Science in Physiology Reproduction
- Doctor of Philosophy in Animal Breeding
- Doctor of Philosophy in Animal Science
- Doctor of Philosophy in Physiology Reproduction

**Animal Science - BS, Production/Industry Option**

This curriculum prepares students for careers in animal-oriented agribusinesses. Other courses, in addition to animal science courses, include marketing, economics, genetics and management. A wide array of internships giving students invaluable experience in all phases of livestock production and related industries is available. Career opportunities include sales, management, public relations, marketing, quality control and education. Students may concentrate on an emphasis area within this option, including the following.

**Beef Cattle**

Students receive training that enables them to pursue careers in ranch management, feedlot management, pharmaceutical sales and other service-oriented livestock industries. Students are trained in all aspects of production, marketing and merchandising techniques for employment in the beef industry. The University Beef Cattle Center gives students hands-on experience.

**Dairy**

The focus of this emphasis area is to develop a well-rounded, knowledgeable student. Students have the opportunity to apply scientific principles, problem-solving methods, state-of-the-art techniques and information transfer to complex dairy production systems.

**Equine**

Designed for students with professional or vocational interests in horses and the horse industry. Coursework emphasizes equine nutrition, breeding, reproduction, health, management, training and judging. Lectures are reinforced with laboratories in which students work with horses. Graduates are well prepared for careers with horse production farms, stallion stations, performance and race training stables, breed associations, performance horse organizations, feed and pharmaceutical companies, county extension positions, and other industries and agencies related to the horse industry.

**Meat**

Students prepare for a career in the meats industry by taking meat science and processing and evaluation courses. Students also can conduct research through special problems courses and can gain valuable work experience on campus in the Meat Science Section or the Rosenthal Meat Science and Technology Center or off campus through internships or summer jobs. Job opportunities are available in packing, processing, retailing, purveying, food service, promotion, public relations and government regulatory agencies.
Sheep

Designed to prepare students for careers in the sheep and goat industries and in the associated wool and mohair industries, this emphasis gives students first-hand experience in sheep production and management practices, as well as procedures for processing and evaluating fleeces. Job opportunities are diverse and include flock management, marketing of lamb and fiber products, feed and pharmaceutical sales and county extension agent positions.

Swine

This emphasis area is designated for students planning to pursue a career in swine production or closely allied industries. Students are taught the principles of breeding and genetics, nutrition and feeding, animal health, environmental control and waste management as they relate to profitable swine production systems. These principles are reinforced by hands-on experience with the department’s swine herd. Career paths include management of swine production units and technical service or sales for feed, pharmaceutical and breeding stock companies.

Animal Science - BS, Science Option

This curriculum is designed to provide scientific expertise in chemistry, biological and physical sciences and mathematics and is recommended for students considering entry into the veterinary, medical or allied health field, or the graduate program of their choice. This option provides a strong background for graduate study in a wide variety of disciplines. Animal scientists graduating with a Bachelor of Science degree in this option who do not enter graduate or professional school find employment in rewarding careers in the pharmaceutical, clinical and food-related industries. Students may concentrate on an emphasis area within this option, including the following.

Pre-Professional

Students planning to pursue a career in veterinary medicine can complete all course requirements for admission to the professional curriculum in this emphasis. Students gain experience working with animals through direct contact in laboratory courses and directed field study. Students acquire knowledge of animal systems and animal behavior principles through coursework and interaction with livestock industry leaders. Students are also prepared to seek admission to the professional curricula in medicine, dentistry, pharmacy, optometry and physical therapy.

Pre-graduate Studies

This emphasis prepares students to pursue a Master of Science, Master of Agriculture or Doctor of Philosophy degree. Possible graduate programs include animal behavior, animal breeding, biochemistry, cellular and molecular biology, meats, dairy science, food science and technology, genetics, growth biology, nutrition and reproductive physiology. Experience gained through honors courses, internships, special problems courses and research laboratories helps the student identify specific disciplines of interest for graduate study. Students with advanced degrees are employed as university professors, research scientists or technicians, extension livestock specialists and technical representatives for industry.

Program Requirements

Animal Science Core Curriculum
- AGLS 101 Modern Agricultural Systems and Renewable Natural Resources
- ANSC 108 General Animal Science
- ANSC 303/ NUTR 303 Principles of Animal Nutrition
- ANSC 305 Animal Breeding
- ANSC 307/ FSTC 307 Meats
- ANSC 318 Feeds and Feeding
- ANSC 433 Reproduction in Farm Animals
- ANSC 481 Seminar

Animal science production requirement
Select one of the following:
- ANSC 406 Beef Cattle Production and Management
- ANSC 412 Swine Production and Management
- ANSC 414 Sheep and Goat Production and Management
- ANSC 420 Equine Production and Management
- ANSC 447 Advanced Meat Science and Technology
- DASC 418 Feeding and Management of Dairy Cattle

Science Option Curriculum
- BICH 410 Comprehensive Biochemistry I
- BICH 411 Comprehensive Biochemistry II
- BIOL 112 Introductory Biology II
- CHEM 102 Fundamentals of Chemistry II
- CHEM 112 Fundamentals of Chemistry Laboratory II
- CHEM 227 Organic Chemistry I
- CHEM 237 Organic Chemistry Laboratory
- CHEM 228 Organic Chemistry II
- CHEM 238 Organic Chemistry Laboratory
- PHYS 201 College Physics
- PHYS 202 College Physics
- Microbiology elective
  Select one of the following:
  - BIOL 206 Introductory Microbiology
  - BIOL 351 Fundamentals of Microbiology
  - VTPB 405 Biomedical Microbiology

Physiology elective
- VTPP 323 Physiology of Domestic Animals or BIOL 319 or Integrated Human Anatomy and Physiology I

General electives (electives may be chosen from the University Core Curriculum, if desired)
ANSC 107  General Animal Science 3
BIOL 111  Introductory Biology I 4
CHEM 101  Fundamentals of Chemistry I 4
& CHEM 111  and Fundamentals of Chemistry Laboratory I
ENGL 104  Composition and Rhetoric 3
ENGL 210  Technical and Business Writing 3
or COMM 203 or Public Speaking
Government/Political science electives (p. 23) 3
Social and Behavioral Science core course (p. 23) 4
American History elective (p. 23) 4
Language, Philosophy and Culture elective (p. 21) 4
Mathematics elective (p. 20) 6
Creative arts elective (p. 22) 4
Foreign language requirement (see Foreign Language table) 6
International and cultural diversity courses 5
Writing-intensive courses 6
Total Semester Credit Hours 120

1 Students are required to make a C or better for each of their courses in the major coursework area.
2 Students may choose to use general electives to complete a concentration in a pre-professional program, a pre-graduate study area, and/or a certificate program.
3 Credit by examination may be substituted for POLS 206 or POLS 207.
4 Certain courses in this University Core Curriculum category will fulfill credits toward the six-hour International and Cultural Diversity requirement.
5 Remaining international and cultural diversity (ICD) credits must be fulfilled if University Core Curriculum courses selected do not fulfill the six-hour ICD requirement.
6 All undergraduate students must take at least (2) specific courses in their major designated as writing intensive (W). To be chosen in consultation with your academic advisor.

Foreign Language

Option 1

Animal Science - Minor

The Department of Animal Science offers a minor in Animal Science.

Program Requirements
ANSC 305  Animal Breeding 3
ANSC 307/FSTC 307  Meats 3
ANSC 320  Animal Nutrition and Feeding 3
ANSC 433  Reproduction in Farm Animals 3
Select one of the following:
ANSC 406  Beef Cattle Production and Management
ANSC 412  Swine Production and Management
ANSC 414  Sheep and Goat Production and Management
ANSC 420  Equine Production and Management
ANSC 447  Advanced Meat Science and Technology
Total Semester Credit Hours 16

ANC 107 and ANC 108 are required with a grade of "C" or better before minor is approved.

Equine Science - Certificate

The Department of Animal Science offers a certificate in Equine Science for students who wish to obtain specialization in this area.

Program Requirements
ANSC 201  Introductory Equine Care and Use 2
ANSC 311  Equine Behavior and Training 3
ANSC 411  Equine Nutrition and Health 3
ANSC 420  Equine Production and Management 4
ANSC 423  Issues in the Equine Industry 3
ANSC 494  Animal Science Internship 3
VLCS 422  Equine Disease and Epidemiology 3
Total Semester Credit Hours 21

Meat Science - Certificate

The Department of Animal Science offers a certificate in Meat Science for students who wish to obtain specialization in this area. The certificate is designed to provide a knowledge base to those individuals who have an interest in pursuing a career that involves the meat industry. Students must complete a minimum of 18 credit hours by taking four required courses and selecting additional courses from the elective list to complete the minimum credit hour requirement.

Program Requirements
ANSC 307/FSTC 307  Meats 3
DASC 326/FSTC 326  Food Bacteriology 3
ANSC 447  Advanced Meat Science and Technology routes
ANSC 457/  Hazard Analysis and Critical Control Point System  3
FSTC 457

Select 5 semester credit hours from the following:  5

1 Students who have taken ANSC 489, Special Topics in Advanced Meat Technology, will be credited with ANSC 447.

2 Students who have taken ANSC 489, Special Topics in Meat Merchandising, will be credited with ANSC 337.

Department of Biochemistry/ Biophysics

Curriculum in Biochemistry is administered by the Department of Biochemistry and Biophysics.

Biochemists seek to understand life at the molecular level, including the detailed structures of biological molecules and the chemical reactions in which they participate. They study the molecules of living systems of all kinds, from the simplest viruses and bacteria to higher plants and animals. In their work, biochemists use experimental tools ranging from x-ray crystallography and nuclear magnetic resonance to bioinformatics and genetic engineering. Biochemistry is a dynamic and diverse field that has become the basic discipline for the life sciences, and biochemists have made significant discoveries that relate to medicine, agriculture, and the environment.

Faculty

Ayres, Nicola M, Senior Lecturer
Biochemistry And Biophysics
PhD, University of Nebraska, 1987

Bryk, Mary E, Associate Professor
Biochemistry And Biophysics
PhD, Albany Medical College, 1994

Cho, Jae H, Assistant Professor
Biochemistry And Biophysics
PhD, State University of New York at Stony Brook, 2006

Cruz-Reyes, Jorge A, Associate Professor
Biochemistry And Biophysics
PhD, London School of Hygiene & Tropical Medicine, 1992

Datta, Sumana, Professor
Biochemistry And Biophysics
PhD, University of California, San Diego, 1987

Deverene, Timothy P, Associate Professor
Biochemistry And Biophysics
PhD, University of Kentucky, 2000

Ellison, John R, Senior Lecturer
Biochemistry And Biophysics
PhD, University of Oregon, 1970

Glasner, Margaret E, Associate Professor
Biochemistry And Biophysics
PhD, Massachusetts Institute of Technology, 2003

Gohil, Vishal M, Assistant Professor
Biochemistry And Biophysics
PhD, Wayne State University, 2005

He, Ping, Associate Professor
Biochemistry And Biophysics
PhD, Kansas State University, 2003

Henderson, Michelle, Lecturer
Biochemistry And Biophysics
PhD, Texas A&M University, 2010

Herman, Jennifer K, Assistant Professor
Biochemistry And Biophysics
PhD, Indiana University, 2005

Hu, James C, Professor
Biochemistry And Biophysics
PhD, University of Wisconsin-Madison, 1987

Igumenova, Tatyana I, Associate Professor
Biochemistry And Biophysics
PhD, Columbia University, 2003

Kaplan, Craig D, Associate Professor
Biochemistry And Biophysics
PhD, Harvard University, 2003

Kunkel, Gary R, Associate Professor
Biochemistry And Biophysics
PhD, University of California, Los Angeles, 1977

Li, Pingwei, Associate Professor
Biochemistry And Biophysics
PhD, Peking University, 1996

Meek, Thomas D, Professor
Biochemistry And Biophysics
PhD, Pennsylvania State University, 1981

Miles, Bryant W, Senior Lecturer
Biochemistry And Biophysics
PhD, Texas A&M University, 1998

Mullet, John E, Professor
Biochemistry And Biophysics
PhD, University of Illinois at Urbana-Champaign, 1981

Mullins, Leisha H, Senior Lecturer
Biochemistry And Biophysics
PhD, Texas A&M University, 1989

Panin, Vladislav M, Professor
Biochemistry And Biophysics
PhD, Moscow State University, 1990
**Minors**

- Biochemistry Minor (p. 132)
- Genetics Minor (p. 133)

**Biochemistry - BS**

The undergraduate biochemistry curriculum is designed to provide a solid background in chemistry and the physical sciences, as well as in the biological sciences. Consequently, biochemistry is an especially versatile major giving undergraduates many options when they complete their BS degree. A biochemistry major provides a strong background for entering graduate school in a variety of fields, and the majority of biochemistry majors go on to graduate school or to professional schools such as medicine, veterinary medicine or dentistry. Biochemistry majors excel in biomedical professional schools because of their strong background in the basic sciences. In addition, a wide variety of job opportunities is open to biochemistry majors with a BS degree. Many find rewarding careers working in laboratories as research scientists, forensic scientists and technicians in clinical, governmental and university laboratories. Biochemists are also employed by diverse companies in the chemical, pharmaceutical, agricultural, food and scientific equipment industries.

Majors in Biochemistry must make a grade of C or better in CHEM 227, CHEM 237, CHEM 228 and CHEM 238 before registration in BICH 440. In addition, majors in Biochemistry must make a grade of C or better in all major coursework used to satisfy the degree plan.

**Total Semester Credit Hours:** 120

1. Often used for a minor degree. Students intending to pursue an advanced degree in biochemistry are strongly encouraged to use some free electives for additional upper division courses in BICH (p. 653), BIOL (p. 660), CHEM (p. 675), GENE (p. 793), MATH (p. 860), or STAT (p. 990).
2. To be selected from the University Core Curriculum (p. 19). Of the 21 hours shown as University Core Curriculum (p. 19) electives, 3 must be from language, philosophy and culture, 3 from creative arts, 3 from social and behavioral sciences, 6 from American history, 6 from POLS 206 and POLS 207. The Graduation requirements include a requirement for 6 hours of International and Cultural Diversity (p. 34) courses which may be met by courses satisfying the language, philosophy and culture, creative arts, social and behavioral sciences, government/political science and American history requirements if they are also on the approved list of international and cultural diversity courses.
3. Before registration in BICH 440, students must have attained a grade of C or better in each of these courses: CHEM 227, CHEM 228, CHEM 237, CHEM 238.
4. Hours to be selected from any 400-level course in BICH with approval of student’s academic advisor. BICH 414, BICH 432/GENE 432 or BICH 491 may not be used to satisfy this requirement.

Students must make a grade of C or better in all major coursework used to satisfy degree plan.

**Genetics - BS**

Curriculum in Genetics is administered by the Department of Biochemistry and Biophysics.

Genetics is one of the most exciting, rapidly expanding areas in the life sciences. More than an independent discipline, it has become the basis for understanding many aspects of medical and agricultural systems, animal and plant diseases, and even animal behavior. Developments in molecular genetics have provided biotechnologies that will dramatically affect our lives from the improved diagnosis of human disease, to the production of viral-resistant crops, to environmental cleanup.

The undergraduate curriculum in genetics allows the study of several different aspects of genetics, including population genetics, human genetics and genetic engineering. The genetics major is designed to develop the knowledge and skills necessary for advanced studies in all disciplines related to life sciences from medicine/veterinary medicine to genetic engineering. This basic science curriculum also has enough flexibility to allow a student to prepare for such diverse careers as forensics, medicine, business or law.

**Total Semester Credit Hours:** 120

1. Often used for a minor degree. Students intending to pursue an advanced degree in genetics are strongly encouraged to use some free electives for additional upper division courses in BICH (p. 653), BIOL (p. 660), CHEM (p. 675), GENE (p. 793), MATH (p. 860) or STAT (p. 990).

2. To be selected from the University Core Curriculum (p. 19). Of the 21 hours shown as University Core Curriculum (p. 19) electives, 3 must be from language, philosophy and culture, 3 from creative arts, 3 from social and behavioral sciences, 6 from American history, 6 from POLS 206 and POLS 207. The graduation requirements include a requirement for 6 hours of International and Cultural Diversity (p. 34) courses which may be met by courses satisfying the language, philosophy and culture, creative arts, social and behavioral sciences, government/political science and American history requirements if they are also on the approved list of international and cultural diversity courses.

3. Before registration in BICH 440, students must have attained a grade of C or better in each of these courses: CHEM 227, CHEM 228, CHEM 237, CHEM 238.

4. Hours to be selected from any 400-level course in GENE with approval of student’s academic advisor. GENE 432/BICH 432 or GENE 491 may not be used to satisfy this requirement.

Students must make a grade of C or better in all major coursework used to satisfy the degree plan.

**Biochemistry - Minor**

The Department of Biochemistry and Biophysics offers a minor in Biochemistry. Students seeking a minor must complete a minor form (http://biochemistry.tamu.edu/academics/undergraduate-programs/academic-requirements/minors) and have it approved and signed by the BICH/GENE undergraduate advisor and their major academic advisor.
Students are required to obtain a grade of ‘C’ or better in all minor courses and meet all minor course prerequisites.

Department of Biological and Agricultural Engineering

Biological and agricultural engineers apply their knowledge of physical and biological sciences, mathematics, engineering principles and engineering design to the production and processing of food and fiber, to the preservation of environmental quality, to biological systems and processes, and to machine systems that interface with all of these. Because of their broad general engineering background, biological and agricultural engineering graduates are sought by a wide variety of employers including environmental consulting firms, equipment manufacturers, crop storage and handling industries, the cotton and forest products industries, food and feed processing industries, animal production industries, biotechnology companies, electric utility companies, chemical companies, and governmental agencies. Biological and agricultural engineers make significant contributions to meeting many basic needs of society such as maintaining food quality, quantity and safety; improving environmental quality; and enhancing the quantity and quality of our water resources.

The Biological and Agricultural Engineering Department provides quality education, research and outreach in engineering and technology for the world’s agricultural, biological, environmental and food systems. Our undergraduate programs provide a high quality education for engineering and systems management students to fulfill the needs of industries we serve and advance our reputation as a world leader in engineering and systems management education.

PhD, University of Illinois at Urbana-Champaign, 1990
Agricultural Systems Management - BS

Graduates of the Agricultural Systems Management program manage people, money and machines in the food and agricultural industries. They are typically employed as production or processing operations managers, equipment managers, or in technical sales and services. Employers include farm and industrial equipment companies, food processing plants, cotton gins, grain and seed companies, livestock feeding operations, irrigation companies, construction companies, manufacturers, and a variety of other employers who need technical managers.

The technological courses are applications-oriented and focus on practical experience in food processing systems, water management, machinery and power systems, electrical systems and electronics. Business courses include accounting, economics, marketing, management, law and finance. A student may obtain a minor in business by taking one course in addition to the AGSM requirements. Management and systems science techniques such as linear programming, simulation, optimization, queuing theory, inventory models, PERT/CPM and expert systems are taught along with applications for solving realistic problems faced by agribusiness managers. Supporting courses provide a foundation of mathematics, chemistry, computer and communications skills. Technical electives are available to develop a degree program that meets personal career objectives.

The curriculum is administered by the Department of Biological and Agricultural Engineering and leads to the Bachelor of Science degree in Agricultural Systems Management.

**Total Semester Credit Hours**: 125

1 The six hours of international and cultural diversity courses, as required for graduation, may be met in the curriculum. Students may select Language, Philosophy and Culture, Creative Arts, Technical Electives, or American History Electives that also meet the ICD requirement.

2 A minor in BUAD may be obtained by completing the noted courses. Each of these courses must be completed with a C or better.

3 Technical electives must be selected in consultation with the student’s advisor and from the current list of approved electives published by the department.

4 All undergraduate students must take at least two (2) specific courses in their major designated as writing intensive (W). This course is an approved W course.

A grade of C or better is required for all Common Body of Knowledge (CBK) courses: ACCT 209, AGSM 301, CHEM 101, CHEM 111, ECON 202, MATH 141, MATH 142 and PHYS 201, or equivalents.

### Biological and Agricultural Engineering - BS

The biological and agricultural engineering program develops graduates who can pursue engineering careers in industry, academia, consulting or government. The curriculum is designed:

- to produce graduates who are prepared to become practicing biological and agricultural engineers, many of whom will become registered professional engineers;
- to produce graduates to serve the engineering needs of clientele in environmental and natural resources, machine systems, food processing, bioprocessing, and agricultural production and processing; and
- to produce graduates who continue to be engaged in professional development.

Students learn to apply fundamental knowledge of biological and physical sciences, mathematics, and engineering principles to formulate and solve engineering problems. Engineering design is integrated throughout the curriculum, along with opportunities to develop communication, learning, and teamwork skills, culminating in a capstone design experience. Electives in the curriculum allow the student to specialize in one of the following areas:

- **Environmental and Natural Resources Engineering**—design and management of systems affecting soil, water, and air resources.
- **Renewable Energy Engineering**—design and development of biomass, wind and solar energy systems.
- **Food and Bioprocess Engineering**—design and development of systems for processing and handling of food and agricultural products and processes involving cells, enzymes, or other biological components.
- **Machine Systems Engineering**—design and development of machines and machine systems for food, feed and fiber production and processing.
Students select courses with the assistance of faculty advisors in an individualized advising system. Faculty members also assist with professional development and job placement for students.

The biological and agricultural engineering program is jointly administered by the College of Agriculture and Life Sciences and the Dwight Look College of Engineering, and the curriculum is fully accredited by the Engineering Accreditation Commission of ABET, Inc., www.abet.org. The department is one of the largest in North America and is consistently ranked as one of the top programs in the nation.

For graduates to become successful practicing biological and agricultural engineers, students need to acquire a set of skills, knowledge, and behaviors as they progress through the curriculum. We have established the following program outcomes outlining what students are expected to know and be able to do upon completion of the curriculum. At the time of graduation, students should have:

1. an ability to apply knowledge of mathematics, science and engineering;
2. an ability to design and conduct experiments, as well as to analyze and interpret data;
3. an ability to design a system, component, or process to meet desired needs within realistic constraints such as economic, environmental, social, political, ethical, health and safety, manufacturability, and sustainability;
4. an ability to function on multidisciplinary teams;
5. an ability to identify, formulate, and solve engineering problems;
6. an understanding of professional and ethical responsibility;
7. an ability to communicate effectively;
8. the broad education necessary to understand the impact of engineering solutions in a global, economic, environmental, and societal context;
9. a recognition of the need for, and an ability to engage in life-long learning;
10. a knowledge of contemporary issues;
11. an ability to use the techniques, skills, and modern engineering tools necessary for engineering practice.

1. Entering students will normally be given a placement test in mathematics. Test results will be used in selecting the appropriate starting course which may be at a higher or lower level.
2. The six hours of international and cultural diversity courses, as required for graduation, may be met by courses that also satisfy a core curriculum course.
3. Engineering, mathematics and technical electives must be selected from a departmental approved list in consultation with an academic advisor.
4. All undergraduate students must take at least two (2) specific courses in their major designated as writing intensive.

A grade of C or better is required for all math, science, and engineering courses.

Agricultural Systems Management - Minor

The minor in Agricultural Systems Management is available to all students enrolled at Texas A&M University. The primary educational objective of this minor program is to provide students, majoring in other fields, with a fundamental knowledge of the fields of agricultural systems management.

Students must make a grade of "C" or better in all courses.

Department of Ecosystem Science and Management

The Department of Ecosystem Science and Management provides one of the most advanced educational opportunities available to prepare undergraduate students for leadership in the science and stewardship of rangeland, forest and wetland ecosystems across the rural-urban gradient. We offer Bachelors of Science degrees in Ecological Restoration, Forestry, Rangeland Ecology and Management, Renewable Natural Resources, and Spatial Sciences.

Faculty

Boutton, Thomas W, Professor
Ecosystem Science & Mgmt
PhD, Brigham Young University, 1979

Briske, David D, Professor
Ecosystem Science & Mgmt
PhD, Colorado State University, 1978

Casola, Claudio, Assistant Professor

Majors  

- Bachelor of Science in Ecological Restoration (p. 138)  
- Bachelor of Science in Forestry (p. 139)  
- Bachelor of Science in Rangeland Ecology and Management, Ranch Management Option (p. 140)  
- Bachelor of Science in Rangeland Ecology and Management, Rangeland Resources Option (p. 141)  
- Bachelor of Science in Renewable Natural Resources (p. 142)  
- Bachelor of Science in Spatial Sciences (p. 144)  

Minors  

- Forest Science Minor (p. 144)  
- Rangeland Ecology and Management Minor (p. 145)  
- Spatial Sciences Minor (p. 145)  

Certificates  

- Watershed Certificate (p. 145)  

Ecological Restoration - BS  

Ecological restoration is the process of repairing dysfunctional ecosystems to provide essential ecosystem goods and services important to society. The Ecological Restoration degree prepares students for a career that requires an understanding of the causes of land degradation and strategies for recovery of ecosystems damaged, degraded, or destroyed by natural or human causes.

The curriculum focuses on restoration of damaged ecosystems and landscapes, particularly terrestrial, wetland, and riparian systems in diverse settings that span the rural-urban spectrum. The discipline of ecological restoration requires a strong conceptual/theoretical foundation as well as a practical application component. This degree combines basic sciences, modern technologies, and contemporary ecological knowledge. Students will develop practical capabilities and gain critical understanding of the interaction of biophysical, socio-economic and political drivers that affect land degradation and restoration through a program that incorporates integrated coursework and an internship with ecological restoration practitioners.

Completion of this degree will prepare students to assess the causes of ecosystem degradation and to develop strategies for ecological restoration at multiple spatial scales. Graduates will be equipped for professional careers with environmental consulting companies, governmental and non-governmental land management organizations, and regulatory agencies. This degree program also provides a foundation for students planning to pursue advanced degrees in restoration ecology, disturbed land reclamation, natural resources conservation and management, or related fields. The total number of credit hours required for graduation is 120 hours.

The Department of Ecosystem Science and Management provides one of the most advanced educational opportunities available for developing leaders in the management, conservation and restoration of the world’s diverse forests. Students seeking to study forestry in this department are interested in solving problems related to protecting forest biodiversity, providing wood, water, recreation and wildlife for a growing society, and contributing to the advancement of knowledge about forests. Resolving today’s forest management issues requires a broad education in the biological, physical and social sciences, a solid understanding of the methods used to integrate information from many fields and to solve problems, and an in-depth knowledge of the sophisticated tools and techniques that are an essential part of modern forestry. Curriculum in the Department of Ecosystem Science and Management incorporates these ideas so that motivated and capable students can become competent forest and resource management professionals and scientists.

Forests cover one-third of the land area of the United States. The products and services derived from forests, and the scenic beauty they provide, have contributed to the well-being of the American people since the founding of this country. These benefits range from lumber and paper to recreation and biological diversity. Forests also are renewable. Under proper stewardship, they yield products and biodiversity indefinitely. Proper management of forests, which is the responsibility of the professional forester, results in healthy, productive forests that are capable of serving human needs and providing a quality environment in rural or urban settings.

The primary objective of the Department of Ecosystem Science and Management is to educate students in the scientific management of forest resources. Students select a course of study best suited to their educational and career goals. Students also receive help from faculty advisors in their areas of interest. The total number of credit hours required for a degree is 120.

### Program Requirements

#### Ecological Restoration Core Courses

Select one of the following: 3-4

- ESSM 203 Forest Trees of North America
- ESSM 303 Agrostology
- ESSM 304 Rangeland Plant Taxonomy
- ESSM 416 Fire Ecology and Natural Resource Management
- ESSM 420 Ecological Restoration of Wetland and Riparian Systems
- ESSM 430 Advanced Restoration Ecology

Directed electives 1 18

Free electives 8-9

Rangeland Ecology and Management - BS, Ranch Management Option

Students majoring in Rangeland Ecology and Management are taught to integrate knowledge and technology in a systems approach to manage land for sustainable utilization of natural resources. Emphasis is placed on conservation and maintenance of biological diversity in wet to arid environments and sustainable production, conservation and function of land. Rangelands comprise approximately 50% of the land area of the United States and the world. Natural resources on rangelands provide many products and values for society including: livestock grazing, habitat for game and non-game wildlife, water for urban and agricultural uses, recreational opportunities, minerals, oil and gas. The expansiveness and diversity of rangelands require that knowledge and technology be drawn from numerous disciplines.

Employment opportunities are diverse. They include all aspects of natural resource management, including ranch management, environmental consulting, conservation and natural resource planning on private lands and with state and federal agencies. Students also find employment in agribusiness sales, marketing, agricultural finance real estate, consulting and reclamation. Students can also pursue professional careers in teaching agricultural science.

Two options in the Rangeland Ecology and Management curriculum provide the opportunity for specialization in a minor field.

Ranch Management Option

Designed for students preparing for careers in ranch management and agribusiness. This option emphasizes management and utilization of rangeland for livestock and wildlife production. It provides excellent preparation for students desiring to obtain a Master of Agriculture degree in ranch management. Employment opportunities are available on private ranches, businesses, and industries supporting ranches and with state and federal agencies.

Emphasis Areas

Ecology

Designed for students to explore and specialize in a diverse array of ecological topics. They study plants and animals and the ecological principles essential for effective conservation, management and restoration of the land and associated natural resources. They are prepared for careers in resource monitoring, management and conservation with state and federal agencies and the private sector.

Environmental Science

Designed for students preparing for professional careers in environmental management. The coursework includes a basic foundation of ecological sciences, plant taxonomy and rangeland management with emphasis on plants, water and soils. Job opportunities are available in environmental consulting firms, public utility companies, municipalities and federal environmental agencies. The curriculum provides a good foundation for students planning to pursue graduate studies in watershed management, environmental sciences, pollution control or waste management.

Preventive Medicine

Prepares students for admission to the professional program in veterinary medicine. Students planning to work in large animal practice would benefit from studies in rangeland ecology and management.

Range/Soil Conservation

Designed to qualify students as range management specialists or soil conservationists with the federal government. The curriculum will provide students with competitive ratings with federal Civil Service for positions with the Natural Resources Conservation Service, Forest Service and Bureau of Land Management. Various electives and work experience may be used to increase the rating score. Job opportunities are also available in private and state organizations.

Teaching

For students majoring in rangeland ecology and management who wish to teach. Directed electives may be chosen so that, following this curriculum, the student is eligible to enter the induction year as a teacher of agricultural science under the Texas Education Agency Plan. Off-campus student teaching is required.

Watershed Resources

For students preparing for a professional career in watershed management. Graduates qualify for employment as range management specialists and soil conservationists or, with proper selection of electives, as hydrologists. Opportunities are also available in environmental consulting firms, public utility companies, land reclamation firms, municipalities, secondary school education and private land management.

Rangeland Ecology and Management - BS, Rangeland Resources Option

Students majoring in Rangeland Ecology and Management are taught to integrate knowledge and technology in a systems approach to manage land for sustainable utilization of natural resources. Emphasis is placed on conservation and maintenance of biological diversity in wet to arid environments and sustainable production, conservation and function of land. Rangelands comprise approximately 50% of the land area of the United States and the world. Natural resources on rangelands provide many products and values for society including: livestock grazing, habitat for game and non-game wildlife, water for urban and agricultural uses, recreational opportunities, minerals, oil and gas. The expansiveness and diversity of rangelands require that knowledge and technology be drawn from numerous disciplines.

Employment opportunities are diverse. They include all aspects of natural resource management, including ranch management, environmental consulting, conservation and natural resource planning on private lands and with state and federal agencies. Students also find employment in agribusiness sales, marketing, agricultural finance real estate, consulting and reclamation. Students can also pursue professional careers in teaching agricultural science.

Two options in the Rangeland Ecology and Management curriculum provide the opportunity for specialization in a minor field.

Rangeland Resources Option

Designed for students preparing for careers in the private, state and federal sectors in the area of natural resources conservation and management. It also provides good preparation for graduate study leading to positions in extension, teaching, research and consulting. It allows maximum flexibility to orient a degree program towards specific career interests. Students are encouraged to develop an emphasis area by selecting 15 hours of directed elective courses in related disciplines. Several suggested emphasis areas for the Rangeland Resources Option follow.

Emphasis Areas

Ecology

Designed for students to explore and specialize in a diverse array of ecological topics. They study plants and animals and the ecological principles essential for effective conservation, management and restoration of the land and associated natural resources. They are prepared for careers in resource monitoring, management and conservation with state and federal agencies and the private sector.

Environmental Science

Designed for students preparing for professional careers in environmental management. The coursework includes a basic foundation of ecological sciences, plant taxonomy and rangeland management with emphasis on plants, water and soils. Job opportunities are available in environmental consulting firms, public utility companies, municipalities and federal environmental agencies. The curriculum provides a good foundation for students planning to pursue graduate studies in watershed management, environmental sciences, pollution control or waste management.

Preveterinary Medicine

Prepares students for admission to the professional program in veterinary medicine. Students planning to work in large animal practice would benefit from studies in rangeland ecology and management.

Range/Soil Conservation

Designed to qualify students as range management specialists or soil conservationists with the federal government. The curriculum will provide students with competitive ratings with federal Civil Service for positions with the Natural Resources Conservation Service, Forest Service and Bureau of Land Management. Various electives and work experience may be used to increase the rating score. Job opportunities are also available in private and state organizations.
Teaching
For students majoring in rangeland ecology and management who wish to teach. Directed electives may be chosen so that, following this curriculum, the student is eligible to enter the induction year as a teacher of agricultural science under the Texas Education Agency Plan. Off-campus student teaching is required.

Watershed Resources
For students preparing for a professional career in watershed management. Graduates qualify for employment as range management specialists and soil conservationists or, with proper selection of electives, as hydrologists. Opportunities are also available in environmental consulting firms, public utility companies, land reclamation firms, municipalities, secondary school education and private land management.

Total Semester Credit Hours 120

1 Students must take this course for the Range/Soil Conservation Emphasis in the Rangeland Resources Option.
2 To be selected in consultation with an advisor.
3 The Graduation requirements include a requirement for 6 hours of international and cultural diversity courses. A course satisfying a Core category, a college/department requirement, or a free elective can be used to satisfy this requirement. See academic advisor.
4 Credit by examination may be used to substitute for 3 hours of POLS 206 or POLS 207.

Renewable Natural Resources - BS

Professional Fields of Study and Department Heads

Ecosystem Science and Management, Kathleen Kavanagh, Head
Recruitment, Park and Tourism Sciences, Gary D. Ellis, Head
Wildlife and Fisheries Sciences, John B. Carey, Interim Head

General Statement

Three departments offer degrees in specific areas of natural resources management and conservation. Students may select one of these degree programs or a broad approach to natural resource education by pursuing the multi-department degree in Renewable Natural Resources.

Renewable Natural Resources

Renewable Natural Resources (RENR) is for students desiring a rigorous education in the study and management of sustainable ecosystems for a wide variety of resource values. The RENR program of study is comprised of a core of courses and two emphases. The goal of this core/emphasis structure is to provide students with an identity as a renewable natural resources specialist, while, at the same time, affording the flexibility for preparation for a variety of career tracks. One emphasis focuses on management and the other on policy. Technical electives prepare the students in chosen educational and career directions. The underlying goal of the RENR degree is to integrate the scientific issues of renewable natural resources. Graduates of this program will be able to articulate these issues verbally and in writing in their chosen career. Therefore, the RENR degree emphasizes verbal presentations and major papers as well as field-oriented activities.

The RENR programs are designed to help students prepare for careers in public and private organizations associated with the planning and use of natural resources and the environment. Possible employment includes areas such as multi-use land management, environmental assessment,
resource inventory, natural resource planning, law, policy analysis and land remediation.

An emphasis may be selected in policy or management. The RENR degree consists of 120 credit hours: 42 university core, 42-45 common to both emphasis areas and 24-27 designated by the emphasis area and 9 free elective hours.

**RENR Areas of Emphasis**

The BS in Renewable Natural Resources includes two emphasis areas for students to select. The directed electives available from advisors are what differentiates the emphases.

**Management Emphasis**

Designed for an education in the scientific management of integrated natural resources. In today’s world, it is important to have college graduates prepared to deal with integrated systems, accounting for all of the separate aspects of the system. The management emphasis seeks to prepare the student to integrate concerns related to land, water, air, plants and wildlife into the management process. Students select 24 credit hours of directed electives from an approved list in consultation with their advisor. The remaining 9 credit hours are free electives.

**Policy Emphasis**

Designed for students desiring an education in natural resources policy. This emphasis incorporates knowledge from all renewable natural resources disciplines, which provides a foundation for decision-making related to the environment. Students will obtain an understanding of the behavior of institutions and organizations associated with natural resource management.

Professionals associated with natural resources need to consider legislative mandates, community interests, resource evaluation and competing uses, and conflict management techniques. This emphasis prepares the student for work in private industry, public and non-profit agencies, and graduate school. Students must select 24 hours of restricted electives from an approved list in consultation with their advisor. The remaining nine hours are free electives.

Mathematics electives (MATH prefix preferred) (p. 20) 6

**Total Semester Credit Hours** 120

1 Students will complete an internship, study abroad or independent research experience.

2 To be selected from an approved list in consultation with an advisor.
The graduation requirements include a requirement for 6 hours of international and cultural diversity courses. A course satisfying a core category, a college/department requirement, or a free elective can be used to satisfy this requirement. See academic advisor.

Credit by examination may be used to substitute for 3 hours of POLS 206 or POLS 207.

Spatial Sciences - BS

A degree in Spatial Sciences offers students the opportunity to obtain a career in a cutting-edge discipline at the intersection of environmental and spatial sciences. The spatial sciences combine multidisciplinary fields of scientific study with geospatial technologies including Geographic Information Systems (GIS), Global Positioning Systems (GPS), and Remote Sensing. A spatial sciences graduate will possess an advanced knowledge of these technologies, experience in interpretation of aerial photographs and processing of satellite images, as well as a broad understanding of computer applications and database management. Graduates are capable of working as environmental and natural resource managers and possess the necessary skills to map geographical features, patterns, and changes. Furthermore, these individuals will be able to lead and conduct modern environmental management activities.

Through core and supporting coursework, students will learn to utilize the full potential of the spatial sciences in real-world problem solving. From real-time wildfire risk assessment to crime analysis, habitat mapping for endangered species, and evaluating environmental damage from natural disasters, the spatial sciences are an integral part of modern resource management.

Students in this degree program receive guidance from faculty advisors in their areas of interest, and meet regularly to discuss courses and career opportunities. The total number of credit hours required for graduation is 120.

Total Semester Credit Hours 15

Students must complete a minimum of 6 hours in residence at the 300-400 level.

Students must maintain a 2.0 or above in minor curriculum.

Watershed - Certificate

The goal of the watershed certificate is to provide a rigorous and high quality program that will produce graduates capable of working as a professional in watersheds or hydrology fields, but with very solid scientific and ecological foundation. Graduates will be qualified to work in government or consulting or if they choose, be prepared to pursue graduate training in any watershed/hydrology science program. Training will be built on a solid foundation in watershed management and hydrology.

Department of Entomology

The Department of Entomology at Texas A&M University is one of the top entomology departments in the United States. We offer two undergraduate degrees, a Bachelor of Science degree in Entomology and a Bachelors of Science degree in Forensic and Investigative Sciences (FIVS). Our FIVS degree is the only bachelor's degree in the state of Texas that is nationally accredited by the Forensic Science Education Programs Accreditation Commission (FEPAC) of the American Academy of Forensic Sciences. Both undergraduate degrees provide students with the necessary curriculum requirements to pursue graduate study in entomology, as well as in other professional fields, such as law and medicine.

Faculty

Behmer, Spencer T, Professor
Entomology
PhD, University of Arizona, 1998
Bernal, Julio S, Professor
Entomology
PhD, University of California, Riverside, 1995

Brundage, Adrienne L, Assistant Lecturer
Entomology
PhD, Texas A&M University, 2012

Coates, Craig J, Associate Professor
Entomology
PhD, Australian National University, 1996

Coulson, Robert N, Professor
Entomology
PhD, University of Georgia, 1969

Eubanks, Micky D, Professor
Entomology
PhD, University of Maryland, 1997

Gold, Roger E, Senior Professor
Entomology
PhD, University of California, Berkeley, 1974

Hamer, Gabriel L, Assistant Professor
Entomology
PhD, Michigan State University, 2008

Heinz, Kevin M, Professor
Entomology
PhD, University of California, Riverside, 1989

Johnston, J S, Professor
Entomology
PhD, University of Arizona, 1972

Medina, Raul F, Associate Professor
Entomology
PhD, University of Maryland, 2005

Metz, Bradley N, Assistant Lecturer
Entomology
PhD, Texas A&M University, 2009

Oswald, John D, Professor
Entomology
PhD, Cornell University, 1991

Pietrantonio, Patricia, Professor
Entomology
PhD, University of California, Riverside, 1995

Ragsdale, David W, Professor and Head
Entomology
PhD, Louisiana State University, 1980

Rangel Posada, Juliana, Assistant Professor
Entomology
PhD, Cornell University, 2010

Slotman, Michel A, Associate Professor
Entomology
PhD, Yale University, 2003

Song, Hojun, Assistant Professor
Entomology
PhD, Ohio State University, 2006

Sword, Gregory A, Professor
Entomology
PhD, University of Texas, Austin, 1998

Tambrindeguy, Cecilia, Associate Professor
Entomology
PhD, Institut National Polytechnique de Toulouse, 2004

Entomology
PhD, University of Georgia, 2001

Vargo, Edward L, Professor
Entomology
PhD, University of Georgia, 1986

Vinson, S B, Professor
Entomology
PhD, Mississippi State University, 1965

Wilson, Lloyd T, Professor
Entomology
PhD, University of California, Davis, 1977

Woolley, James B, Professor
Entomology
PhD, University of California, Riverside, 1983

Zhu Salzman, Keyan, Professor
Entomology
PhD, Purdue University, 1994

Majors
• Bachelor of Science in Entomology (p. 146)
• Bachelor of Science in Forensic and Investigative Sciences, Pre-Law Emphasis (p. 149)
• Bachelor of Science in Forensic and Investigative Sciences, Science Emphasis (p. 150)

Minors
• Entomology Minor (p. 151)

Certificates
• Public Health Entomology Certificate (p. 152)

Entomology - BS

Entomology is a basic and applied science of insects and their relatives such as ticks and mites. Insects are the most numerous and diverse forms of life on earth; they are essential constituents of virtually every terrestrial and aquatic ecosystem. While society benefits from the many diverse
roles played by the vast majority of insects, some species may become limiting factors in the production, processing and storage of our food and fiber crops, and to the health and well being of humans and animals. The knowledge and skills possessed by entomologists are essential components of modern integrated pest management strategies designed to safely and efficiently produce adequate food supplies for a continuously expanding world population, and to impede the transmission of insect-borne diseases, while at the same time protecting our endangered species and fragile ecosystems.

The Bachelor of Science degree in Entomology leads to a wide array of career paths with strong employment demands among corporate and private agribusiness; urban pest management companies; scientific and technical organizations; public health agencies; local, state and federal governments; and international organizations. In addition, employment opportunities exist in areas such as forensic entomology, conservation biology, environmental quality, food quality, regulatory inspection, public health and many more. Our curriculum is sufficiently flexible such that a student, in consultation with the academic advisor, may tailor the degree to meet their individual academic goals, including requirements for graduate school, professional schools in the health career areas (medical, veterinary, dental) as well as providing the analytical skills needed for law school. Our department also participates in the Texas A&M accelerate online program for teaching certification, which is an innovative approach to training Texas secondary science teachers to gain the background education needed to prepare for certification to teach science grades 8–12.

Students majoring in related areas such as agronomy, animal science, horticulture, biology, genetics and biomedical sciences may wish to consider augmenting their knowledge base and broaden their career opportunities by electing to either double major or to minor in entomology. Interested students should contact the departmental Undergraduate Advisor for additional information on these options.

Total Semester Credit Hours: 120
To be selected in consultation with student’s academic advisor in the department. Six hours of international and cultural diversity electives are required for graduation; these courses may fulfill other degree requirements as well. See the list of approved courses.

Technical electives must be selected in consultation with the student’s advisor or from the current list of approved electives published by the department. See Technical Electives table.

### Additional Requirements for Baccalaureate Degree

- Foreign Language (two years same language in HS, one yr college)
- Writing Intensive Courses (two courses designated W in major or one W and one C course in major)
- International and Cultural Diversity Courses (two courses for six credit hours)

### Technical Electives

Forensic and Investigative Sciences - BS, Pre-Law Emphasis

Forensic and Investigative Sciences, an accredited program by the Forensic Science Education Programs Accreditation Commission (FEPAC), is a major offered by the Department of Entomology and is a growing area of interest for students seeking to gain entry into careers that deal with the collection, preservation, processing and use of evidentiary information to solve problems. A life sciences-based education, which develops skills in problem solving and critical thinking, is essential for career opportunities in this field. Forensic and investigative scientists rely upon state-of-the-art scientific discoveries and technologies as tools to seek answers to critical questions in a variety of settings. Molecular, organismal, environmental, and ecological sources of information are often analyzed and interpreted in industrial, regulatory, legal, medical and associated professions. Graduates will be competitive for employment opportunities in quality assurance laboratories, homeland security and investigative services at local, state and national levels. Graduates will also be well prepared for opportunities to enter post-graduate studies or professional schools including medicine, law, and veterinary medicine.

Interactions with and among plants, animals and microbes occur regularly. These interactions impact public and environmental health and require life science-based forensic and investigative science to improve the quality of life. Homeland security, criminal investigation, environmental quality, agricultural and public health offer careers for students with forensic and investigative skills. Students can also pursue avenues to forensic careers through degree programs in specialty areas such as chemistry, anthropology, physics, computer science and business.

Forensic and investigative sciences also operate at the crossroads of science and the legal profession, and provide opportunities for students to consider pre-law preparation. There are growing demands for attorneys with knowledge and understanding of science and research to address legal issues and cases where the interpretation of science and/or scientific data and analyses are pivotal. Law schools often seek candidates with diverse backgrounds and interests, and they look closely at curricula that stress analytical and problem-solving skills, critical reading abilities, writing skills, oral communication and listening abilities, general research skills, and task organization and management skills. The Forensic and Investigative Sciences program provides students with opportunities to build these essential skills and knowledge areas through a combination of required and elective courses.

The Forensic and Investigative Sciences program requires students to earn a grade of C or better in all courses within the program curriculum.

General elective 3
Total Semester Credit Hours 120

1 This course fulfills a writing requirement. See Requirement for a Baccalaureate Degree section.

Entomology - Minor

The minor in Entomology is available to all students enrolled at Texas A&M University. The courses listed constitute the minimum 17 hours required for a minor in Entomology.

1. Students must earn a grade of C or better in each course used for the minor.
2. Prerequisite Courses: All prerequisites for each core and elective course also must be met. Prerequisite courses will not be applied to the minor requirements and do not count toward the number of hours needed to complete the minor. Please refer to the Texas A&M University Undergraduate Catalog for a listing of course prerequisites.
3. Availability of courses and minor recognition: The Department of Entomology cannot guarantee the availability of the courses required to meet the minor requirements. Successful completion of the minor will be certified by a degree audit in Howdy during the semester of the student's graduation. The minor will be recognized after graduation on the student’s transcript, but not on the student’s diploma.

Students pursuing the Minor in Entomology are to complete the minor application form (https://insects.tamu.edu/futurestudents/minors/Minor_%20Entomology%20Form-FINAL.pdf) and submit the document to the Department of Entomology Advising Office in 404 Minnie Belle Heep Building (HPCT).

Total Semester Credit Hours 17

1 Substitutions are not allowed for core courses.

Students are encouraged to visit the Department of Entomology Advising Office in 404 Minnie Belle Heep Building (HPCT), West Campus, to select the appropriate directed elective courses based on their individual educational and career interests.

Public Health Entomology - Certificate

Population growth and distribution predicted over future decades pose increased risks of disease outbreaks and emergence of new diseases worldwide. Scientists from many disciplines, physicians, veterinarians, health-care practitioners, public health workers and policy makers are needed to provide public health surveillance, make new discoveries, and find solutions to address these risks.

This certificate offers a 15 credit-hour concentration in Public Health Entomology focused on insects and other arthropods that serve as vectors and reservoirs of disease pathogens, and are responsible for the direct and indirect causation of disease.

Employment opportunities in the public health sector include environmental and health service agencies, mosquito control districts, the Centers for Disease Control and Prevention (CDC), the Department of Defense, the World Health Organization, and the PanAmerican Health Organization.

Students completing this certificate will be competitive for employment upon graduation, for graduate programs in related disciplines, such as Master’s programs in Public Health, Epidemiology, and Entomology, as well as professional schools.

Eligibility Requirements for Entrance:

1. Completion of a minimum of one (1) course from Category I and/or II with a grade of “B” or better and a cumulative TAMU GPA of 2.0+
2. Students must complete application at least 2 long semesters prior to expected graduation.

Program Requirements

</table>

Total Semester Credit Hours 15

To Complete the Certification, Students Must:

- Successfully complete courses in Category I-III PRIOR to enrollment in Category IV ENTO 425 – Disease Ecology
- Complete all courses within the certification with a minimum grade of “C”
- Earn a cumulative 3.0+ GPA within the certificate courses
- Complete exit survey
- Meet the minimum qualifications for graduation as defined by Texas A&M University including a 2.0 cumulative GPA

For additional information and to discuss the scheduling of these courses upon successful completion of your entrance requirements, please contact a member of the Entomology Academic Advising Team to schedule an appointment to submit your Public Health Certificate Application (http://xy0w83avw2t3b0zf12evohjl.wpengine.netdna-cdn.com/wp-content/uploads/sites/12/2014/11/CERTIFICATE-IN-PUBLIC-HEALTH-ENTOMOLOGY-Application-New.pdf).
Department of Horticultural Sciences

Horticulture encompasses a unique blend of art, science and technology. Horticultural crops include trees, shrubs, tropical plants, ornamental grasses, herbs, flowers, fruits, vegetables and nuts which are grown and utilized throughout the world. The Department of Horticultural Sciences offers two undergraduate degrees: a Bachelor of Science in Horticulture and a Bachelor of Arts in Horticulture. Our flexible degree plans enable students opportunities to develop programs tailored to their unique career goals. The horticulture industry is one of the largest agricultural industries in the state and offers graduates a multitude of diverse career opportunities.

Majors

- Bachelor of Arts in Horticulture (p. 153)
- Bachelor of Science in Horticulture (p. 154)

Minors

- Horticulture Minor (p. 155)

Horticulture - BA

This degree blends traditional horticulture with the benefits derived from the human association with plants. This degree offers students the option of pairing a horticulture degree with electives in social sciences, business, education, art and design. Creative opportunities range from planning gala events, to designing tranquil gardens, to constructing educational programs for school gardens to pursuing advanced degrees. Graduates may find themselves working in exciting environments including botanical gardens, international flower markets or upscale resorts.

Total Semester Credit Hours 120

1 This course fulfills a writing requirement (see Requirements for a Baccalaureate Degree (p. 24)).
2 This course fulfills a communications requirement.
3 Hours to be selected based on the emphasis area chosen in consultation with the student’s academic advisor.
4 Student must successfully complete a course of a foreign language beyond that required by the university in general.
Any university approved minor or major is acceptable, except a minor or major in Horticulture as the intent is to provide a concentration in a second field of expertise.

Hours to be selected with approval by the student's academic advisor and the associate department head from 100-400-level courses in ACCT (p. 591), AGCJ (p. 603), AGEC (p. 605), AGLS (p. 610), SCSC (p. 968), ALEC (p. 614), ARTS (p. 640), BESC (p. 652), COMM (p. 688), ECON (p. 737), ENDS (p. 753), ENTO (p. 767), FINC (p. 781), ESSM (p. 772), GENE (p. 793), GEOG (p. 796), HLTH (p. 823), HORT (p. 827), INST (p. 836), ISYS (p. 843), KINE (p. 849), LAND (p. 854), MEPS (p. 878), MGMT (p. 879), MKTG (p. 886), NUTR (p. 950), RPTS (p. 959), RPTS (p. 960), SAED, SCMT (p. 966), SEFB (p. 974), SOCI (p. 976), SPAN (p. 982), SPED (p. 985), STAT (p. 990), WFSC (p. 1016).

Horticulture - BS

This degree is designed to provide students with the knowledge and skills needed for production, management and marketing of horticultural and floriculture crops. This degree also offers students with strong interests in science and/or technology opportunities in research related fields including preparation for graduate studies. Career prospects range from producing specially herb crops for upscale restaurants, to managing landscape businesses for growing communities, to marketing fruits and vegetables for healthier lifestyles. Many former students are self-employed, owning their own greenhouse, nursery or landscape operation. Others work in upper management of large corporations or travel the world developing future horticultural crops.

Social and behavioral science (p. 23)

Total Semester Credit Hours

120

1 This course fulfills a writing intensive course requirement.

2 This course fulfills a communications requirement.

3 Hours to be selected based on the emphasis area chosen in consultation with the student's academic advisor.
4 Hours to be selected with approval by the student's academic advisor and the associate department head from 100-400-level courses in ACCT (p. 591), AGEC (p. 605), AGSM (p. 612), ALEC (p. 614), BESC (p. 652), BICH (p. 653), BIOL (p. 660), CHEM (p. 675), COSC (p. 694), ECON (p. 737), ENTO (p. 763), FINC (p. 781), ESSM (p. 772), GENE (p. 793), HLTH (p. 823), HORT (p. 827), INST (p. 836), JOUR (p. 848), LAND (p. 854), MEPS (p. 878), MGMT (p. 879), MKTG (p. 886), NUTR (p. 910), PHYS (p. 934), PLPA (p. 938), RENE (p. 959), RPTS (p. 960), SCSC (p. 968), SPAN (p. 982), STAT (p. 990), WFSC (p. 1016).

Horticulture - Minor

An undergraduate minor in Horticulture provides students a concentration of courses that focus on areas of horticulture and floriculture. These may range from a broad based, comparative perspective to a narrower application within the field. Students may choose such diverse topics as fruit and vegetable production, enology, greenhouse and nursery management, floral and landscape design, science and biotechnology, urban and environmental horticulture and much more. Earning a minor in Horticulture provides students with the skills required to have a basic working knowledge in the field of Horticulture.

Program Requirements

HORT 201 Horticultural Science and Practices 3

Upper-level requirement

Select from HORT 300-499 (p. 827) 9

Electives

Select from HORT 100-499 (p. 827) 6

Total Semester Credit Hours 18

Students must make a grade of "C" or better in all courses and must be in good academic standing with a GPA of 2.250 or above.

Department of Nutrition and Food Science

Nutritional sciences prepares majors with a comprehensive knowledge of the biological and social sciences to understand the relationships between nutrients, food components and human health. Prevention of diseases that are related to lifestyle, particularly diet and nutrition, is a focus of the curriculum. Core courses emphasize the role of nutrients in biochemistry, genetics, physiology, microbiology and immunology that promotes wellness and enhances the quality of life. The major also provides an excellent background for those interested in pursuing graduate degrees in biological, nutritional or food sciences; professional degrees in human or veterinary medicine; degrees in dentistry, pharmacy, physical therapy, nursing, public health and other health professions; or dietetic internships.

The Didactic Program in Dietetics (DPD) and the Graduate Degree/Dietetic Internship Program are accredited by the Accreditation Council for Education in Nutrition and Dietetics (ACEND). Students who successfully complete the DPD and a dietetic internship are eligible to take the Registration Examination to become a Registered Dietitian (RD).

Three curriculum tracks are offered (General Nutrition, Didactic Program in Dietetics and Molecular and Experimental Nutrition) to provide flexibility in one’s chosen career path. The Nutrition major prepares one for graduate school, corporate wellness positions, health promotion programs, the food industry, public health programs, pharmaceutical sales, clinical dietetics, medical and research laboratories, biotechnology firms, government agencies and related fields. For more information, visit http://nfs.tamu.edu

PhD, Virginia Tech, 1989

Riaz, Mian N, Tees Senior Research Scientist And Director
Nutrition & Food Science
PhD, University of Maine, 1992

Talcott, Stephen T, Professor
Nutrition & Food Science
PhD, University of Arkansas, 2000

Talcott, Susanne U, Associate Professor
Nutrition & Food Science
PhD, University of Florida, 2004

Turner, Nancy D, Research Professor
Nutrition & Food Science
PhD, Texas A&M University, 1995

Wu, Chaodong, Associate Professor
Nutrition & Food Science
PhD, Beijing Medical University, 1998

Majors

- Bachelor of Science in Food Science and Technology, Food Industry Option (p. 156)
• Bachelor of Science in Food Science and Technology, Food Science Option (p. 158)
• Bachelor of Science in Nutrition, Didactic Program in Dietetics Track (p. 160)
• Bachelor of Science in Nutrition, General Nutrition Track (p. 161)
  • Teacher certification in Biology and Life Sciences, Chemistry and Science
• Bachelor of Science in Nutrition, Molecular and Experimental Track (p. 163)

Food Science and Technology -
BS, Food Industry Option

Food Science and Technology is an exciting multidisciplinary field that prepares majors with a comprehensive knowledge of the biological, physical and engineering sciences to develop new food products, design innovative processing technologies, improve food quality and nutritive value, enhance the safety of foods and ensure the wholesomeness of our food supply. Food Science majors apply the principles learned in the basic sciences such as food chemistry, biochemistry, genetics, microbiology, food engineering and nutrition to provide consumers with safe, wholesome and attractive food products that contribute to their health and well-being. For more information, visit http://nfs.tamu.edu

The undergraduate curriculum is approved by the Institute of Food Technologists (IFT) and offers two tracks, a Food Science Option and an Industry Option. These tracks provide promising career opportunities in areas such as food product/process design, technical service, research and development, quality assurance, food safety, food law, regulatory oversight, technological innovation, marketing, corporate sales, sensory evaluation and operations management. There are numerous opportunities available for corporate internships, scholarships and study abroad programs that provide real-world experience and enhance opportunities for employment after completing a baccalaureate degree. The major also provides an excellent background for those interested in professional schools, graduate studies, medicine, veterinary medicine, dentistry, pharmacy, physical therapy, nursing, occupational therapy and public health.

Food Industry Option

The Food Industry option integrates knowledge from the basic disciplines of chemistry, microbiology, physics and biology and applies scientific principles from food engineering, food processing operations, sensory evaluation, food safety, HACCP, quality assurance and management to produce foods that are wholesome, affordable and safe. The goal of the curriculum is to prepare Food Technologists for careers in the food and related industries. These careers may involve food processing, manufacturing, technical service, food product development, operations management, regulatory oversight and other technology based opportunities.

## Notes:
- FSTC 406/POSC 406: Poultry Further Processing
- FSTC 410/NUTR 410: Nutritional Pharmacometrics of Food
- FSTC 440/NUTR 440: Therapeutic Microbiology: Probiotics and Related Strategies
- FSTC 446/HORT 446: Commercial Fruit and Vegetable Processing
Food Science and Technology - BS, Food Science Option

Food Science and Technology is an exciting multidisciplinary field that prepares majors with a comprehensive knowledge of the biological, physical and engineering sciences to develop new food products, design innovative processing technologies, improve food quality and nutritive value, enhance the safety of foods and ensure the wholesomeness of our food supply. Food Science majors apply the principles learned in the basic sciences such as food chemistry, biochemistry, genetics, microbiology, food engineering and nutrition to provide consumers with safe, wholesome and attractive food products that contribute to their health and well-being. For more information, visit http://nfs.tamu.edu

The undergraduate curriculum is approved by the Institute of Food Technologists (IFT) and offers two tracks, a Food Science Option and an Industry Option. These tracks provide promising career opportunities in areas such as food product/process design, technical service, research and development, quality assurance, food safety, food law, regulatory oversight, technological innovation, marketing, corporate sales, sensory evaluation and operations management. There are numerous opportunities available for corporate internships, scholarships and study abroad programs that provide real-world experience and enhance opportunities for employment after completing a baccalaureate degree.

The major also provides an excellent background for those interested in professional schools, graduate studies, medicine, veterinary medicine, dentistry, pharmacy, physical therapy, nursing, occupational therapy and public health.

Food Science Option

The Food Science option provides a strong knowledge base and fundamental understanding of chemistry, biology, engineering, physics, statistics, genetics, biochemistry, microbiology and nutrition that is applied toward the preservation, processing, packaging and distribution on foods that are wholesome, affordable and safe. The goal of the curriculum is to prepare Food Scientists for career opportunities in the food and allied industries or for further studies in graduate or professional schools. See an academic advisor for specific course listings.

Students may earn a chemistry minor by taking 6 hours of additional chemistry courses. The Graduation requirements include a requirement for 6 hours in chemistry courses from an approved list as free electives. Selection can be courses that are related to lifestyle, particularly diet and nutrition, is a focus of the curriculum. Core courses emphasize the role of nutrients in biochemistry, genetics, physiology, microbiology and immunology that promotes wellness and enhances the quality of life. The major also provides an excellent background for those interested in pursuing graduate degrees in biological, nutritional or food sciences; professional degrees in human or veterinary medicine; degrees in dentistry, pharmacy, physical therapy, nursing, public health and other health professions; or dietetic internships.

The Didactic Program in Dietetics (DPD) and the Graduate Degree/Dietetic Internship Program are accredited by the Accreditation Council for Education in Nutrition and Dietetics (ACEND). Students who successfully complete the DPD and a dietetic internship are eligible to take the Registration Examination to become a Registered Dietitian (RD).

Three curriculum tracks are offered (General Nutrition, Didactic Program in Dietetics and Molecular and Experimental Nutrition) to provide flexibility in one's chosen career path. The Nutrition major prepares one for graduate school, corporate wellness positions, health promotion programs, the food industry, public health programs, pharmaceutical sales, clinical dietetics, medical and research laboratories, biotechnology firms, government agencies and related fields. For more information, visit http://nfs.tamu.edu

**Didactic Program in Dietetics Track**

Nutritional sciences prepares majors with a comprehensive knowledge of the biological and social sciences to understand the relationships between nutrients, food components and human health. Prevention of diseases that are related to lifestyle, particularly diet and nutrition, is a focus of the curriculum. Core courses emphasize the role of nutrients in biochemistry, genetics, physiology, microbiology and immunology that promotes wellness and enhances the quality of life. The major also provides an excellent background for those interested in pursuing graduate degrees in biological, nutritional or food sciences; professional degrees in human or veterinary medicine; degrees in dentistry, pharmacy, physical therapy, nursing, public health and other health professions; or dietetic internships.

1 The Graduation requirements include a requirement for 6 hours of international and cultural diversity courses. Selection must be from courses on the approved list. Selection can be courses that also satisfy the requirement for social and behavioral sciences; creative arts; language, philosophy and culture; or electives. For Core Curriculum requirements visit http://core.tamu.edu.

Creative Arts Elective (p. 22) and ANTH 205 satisfy both degree requirements as well as international and cultural diversity requirements.

A total of 120 hours is required for graduation; 36 hours of 300/400 level courses are required to meet the Texas A&M University residency requirement.

To be eligible to participate in the DPD program, students must maintain an overall GPR of 2.8 or above and have a grade of at least C in all non-nutrition courses and a grade of at least B in all nutrition courses. See academic advisor for information on specific course listings and eligibility requirements.

### Nutrition - BS, General Nutrition Track

Nutritional sciences prepares majors with a comprehensive knowledge of the biological and social sciences to understand the relationships between nutrients, food components and human health. Prevention of diseases that are related to lifestyle, particularly diet and nutrition, is a focus of the curriculum. Core courses emphasize the role of nutrients in biochemistry, genetics, physiology, microbiology and immunology that promotes wellness and enhances the quality of life. The major also provides an excellent background for those interested in pursuing graduate degrees in biological, nutritional or food sciences; professional degrees in human or veterinary medicine; degrees in dentistry, pharmacy, physical therapy, nursing, public health and other health professions; or dietetic internships.

The Didactic Program in Dietetics (DPD) and the Graduate Degree/Dietetic Internship Program are accredited by the Accreditation Council for Education in Nutrition and Dietetics (ACEND). Students who successfully complete the DPD and a dietetic internship are eligible to take the Registration Examination to become a Registered Dietitian (RD).

Three curriculum tracks are offered (General Nutrition, Didactic Program in Dietetics and Molecular and Experimental Nutrition) to provide flexibility in one’s chosen career path. The Nutrition major prepares one for graduate school, corporate wellness positions, health promotion programs, the food industry, public health programs, pharmaceutical sales, clinical dietetics, medical and research laboratories, biotechnology firms, government agencies and related fields. For more information, visit http://nfs.tamu.edu

### General Nutrition Track

The General Nutrition Track provides a wide range of approved electives in biochemistry, nutrition, food science, microbiology, immunology, genetics, and psychology in order to customize a degree suited to
research interests and career objectives. Through this program, students are prepared to work in community nutrition programs, sports nutrition, education, research, and as technical representatives in the nutrition and health industry. This is also an excellent program for students wanting to go to professional schools such as medicine, dentistry, physical therapy, physician assistant, or pharmacy.

**Teacher Certification**

The secondary Provisional Teaching Certificate may be obtained in conjunction with the Bachelor of Science degree in Nutritional Sciences, General Nutrition Track. There are three subject areas available for teacher certification through this degree: Biology/Life Science (grades 8-12), Chemistry (grades 8-12), and Science (grades 8-12).

Students must also complete the STEM (Science, Technology, Engineering, Mathematics) minor. Students interested in teacher certification should contact the teacher certification advisor in the Department of Teaching, Learning and Culture in the College of Education and Human Development for more information.

**Teacher certification in Chemistry**

- STEM minor
- No additional courses required

**Molecular and Experimental Track**

The Molecular and Experimental Track emphasizes a fundamental background in the biological and physical sciences that relate to human health and nutrition. This option offers students the opportunity to develop analytical and critical thinking skills through undergraduate research with department faculty, independent study and study abroad programs, and a science-based curricula that is essential for graduate studies and pre-professional schools. The goal of this track is to enable students to seek employment in specialized science-based fields in the biological or medical sciences, to pursue graduate degrees beyond the baccalaureate or to enter professional schools of medicine, veterinary medicine, dentistry, pharmacy or similar disciplines. See academic advisor for information on application procedures, GPR requirements, specific course listings and eligibility requirements.

• Bachelor of Science in Environmental Studies (p. 166)
• Bachelor of Science in University Studies, Environmental Business Option (p. 167)

Minors

• Bioenvironmental Sciences Minor (p. 169)

Bioenvironmental Sciences - BS

Major breakthroughs are taking place locally, regionally and globally concerning environmental awareness. Environmental hazards take many forms, including microbial threats, toxic wastes and the indirect impact of man’s activities on a fragile ecosystem. As a result, there is a growing recognition that the solutions to environmental problems require innovative multi-disciplinary perspectives and technologically-intensive approaches. The Bioenvironmental Sciences curriculum (BESC) was designed in consultation with numerous industry representatives in order to comply with the most current thinking on the talents needed for tomorrow’s environmental fields. Students will be prepared for a breadth of career choices in the environmental sciences. These choices include such areas as research and development, environmental consulting, remediation of wastes, site assessment and environmental sampling, and environmental law. Graduates from BESC find employment in federal, state and municipal environmental agencies; in industries concerned with the generation and clean-up of hazardous wastes; with environmental advocacy and educational groups. In addition, the strong science base in BESC prepares students for professional and graduate schools in a variety of disciplines.

The curriculum described combines a foundation of required courses of technical and free electives to allow the student the maximum flexibility to design a personalized course of study. Students are advised to
focus on an area of emphasis with those electives that come from such categories as conservation/ecology, policy/ethics/regulations, the physical environment, engineering, plant studies, genetics/biotechnology and general environmental. The Department of Plant Pathology and Microbiology also supports the extracurricular activities needed to support a successful environmental professional.

**Technical electives** 2  15
**Free electives** 9  
**Total Semester Credit Hours** 120

1  The Graduation requirements include a requirement for six hours of international and cultural diversity courses. A course satisfying a Core category, a college/department requirement, or a free elective can be used to satisfy this requirement. See academic advisor.

2  Courses may be selected from categories designed to reflect the professional aspirations of the student. Exact number of technical electives will depend on choice selections from other categories to achieve a minimum 120 hours.

**Environmental Studies - BS**

The BS degree in Environmental Studies in the College of Agriculture and Life Sciences provides students with the opportunity to learn about the major societal forces that influence environmental issues. These include political agreement supporting legal and regulatory requirements, economics and the marketplace, environmental values, and technology. Students gain technical background blended with a solid foundation in economics, political issues, environmental law, ethics, and communications. Technology and the environment are well supported in existing curricula and contribute to the multidisciplinary nature of the Environmental Studies degree. Technical courses focus on biological sciences, natural resources, and assessment of the environment and come from the Agricultural Economics; Bioenvironmental Sciences; Entomology; Forest Science; Rangeland Ecology and Management; Recreation, Park and Tourism Sciences; Soil and Crop Sciences; and Wildlife and Fisheries Sciences. It is the fusion of these courses with those from the Liberal Arts that make this a truly unique curriculum. This degree is housed within the Department of Plant Pathology and Microbiology.

WFSC 418  Ecology of the Coastal Zone
WFSC 420  Ecology and Society

Social and behavioral science elective (p. 23)  3
Free electives  10

Total Semester Credit Hours  120

1  The Graduation requirements include a requirement for 6 hours of international and cultural diversity courses. A course satisfying a Core category, a college/department requirement, or a free elective can be used to satisfy this requirement. See academic advisor.

A minimum of 120 semester hours will be required for a BS degree.

University Studies - BS, Environmental Business Concentration

A University Studies Degree differs from a traditional “major” in that it consists of a concentration of 21-24 hours and two minors of 15-18 hours each. The University Studies Degree format was created to provide students the flexibility to combine areas of study that are of special interest. Under the guidelines of the University Studies degree requirements, the student’s diploma will list “University Studies” in the place where the major is currently listed. The student’s area of concentration (Environmental Business) and the two minors (Rangeland Ecology & Management AND Business) will be indicated on the student’s transcript.

This new degree option features a blending of environmental science coursework and business coursework in a truly unique combination unlike any other degree at Texas A&M University. The Environmental Business concentration draws heavily from the established Bioenvironmental Sciences degree already offered at Texas A&M, but this concentration is significantly different in that it lacks the larger number of life science courses that serve as a necessary foundation in any environmental
science degree. The focus on environmental coursework (through the BESC and ESSM courses) coupled with core business coursework allows this University Studies concentration to provide a very well-rounded and marketable degree in a variety of arenas.

This interdisciplinary degree plan provides a highly-marketable focus from an already fast-rising, multi-faceted discipline. The coursework retains the “customizable” nature of the university studies degree within the concentration itself, allowing students a truly one-of-a-kind opportunity for their bachelor’s degree. The Environmental Business concentration provides a solid foundation of Bioenvironmental Sciences coursework that, when paired with the Rangeland Ecology & Management minor and the Business minor, provides students with a versatile, sound degree that is uniquely positioned in the job market and combines a general overview of both environmental issues/policies and business administration principals/content.

Students must make a grade of "C" or better in all courses.

Department of Poultry Science

Growth of the poultry industry has created the need for scientific, technical and business knowledge in the various fields important to successful poultry production. In few fields of science is an understanding of the basic sciences, nutrition, genetics, physiology, diseases, biotechnology, processing and marketing more rewarding than in the modern, intensive methods of poultry and food production. Students are trained in the necessary background, analytical skills, problem solving and leadership for complex production units, hatcheries, integrated feed mills, processing plants and research laboratories. Rapid industry growth provides many career opportunities for graduates. Students are given two emphasis areas in which to specialize their education toward their selected career goals. The University Core Curriculum courses and the Poultry Science Core courses are required for both emphases. Students then complete a BS degree in either emphasis area by completing the respective emphasis area courses. All students are strongly encouraged to get early and frequent academic counseling which is readily available.

Poultry Science - BS, Industry Emphasis

Growth of the poultry industry has created the need for scientific, technical and business knowledge in the various fields important to successful poultry production. In few fields of science is an understanding of the basic sciences, nutrition, genetics, physiology, diseases, biotechnology, processing and marketing more rewarding than in the modern, intensive
methods of poultry and food production. Students are trained in the necessary background, analytical skills, problem solving and leadership for complex production units, hatcheries, integrated feed mills, processing plants and research laboratories. Rapid industry growth provides many career opportunities for graduates. Students are given two emphasis areas in which to specialize their education toward their selected career goals. The University Core Curriculum courses and the Poultry Science Core courses are required for both emphases. Students then complete a BS degree in either emphasis area by completing the respective emphasis area courses. All students are strongly encouraged to get early and frequent academic counseling which is readily available.

Students completing a BS degree in the industry emphasis find employment with the poultry and food industries in positions such as corporate management, quality assurance, sales or technical support in live production, processing or marketing. Students in this emphasis also get positions with pharmaceutical and equipment companies, with industry trade publications and in various university and public service positions.

Students completing a BS degree in the technical emphasis are prepared for advanced study in biochemistry, nutrition, physiology, molecular genetics, reproduction, processing technology, microbiology or environmental science and for eventual professional employment in research, teaching or public service. This curriculum can be easily tailored to meet the veterinary medicine preprofessional requirements.

**Program Requirements**

**Poultry Science Core Courses**

- **POSC 302** Avian Science Laboratory 1
- **POSC 308** Avian Anatomy and Physiology 3

**Department of Recreation, Park and Tourism Sciences**

The undergraduate curriculum leading to a Bachelor of Science degree with a major in Recreation, Park and Tourism Sciences emphasizes problem-solving skills, development of an international perspective and the application of scientific principles to managerial problems. Students study both the social and life sciences to gain an understanding of how to manage and market organizations in the vast park, recreation and tourism industry. The curriculum provides the student with an introduction to the history and concepts of recreation, park and tourism sciences, followed by the knowledge and skills for both entry-level positions and for future professional growth in the field. In addition to core courses, students must fulfill requirements for at least one certificate, and may earn additional certificates. An education in recreation, park and tourism sciences prepares students to become leaders for the 21st century with the capacity to learn from life and throughout life.

Majors
- Bachelor of Science in Community Development (p. 173)
- Bachelor of Science in Recreation, Park and Tourism Sciences, Community Recreation and Park Administration Certificate (p. 174)
- Bachelor of Science in Recreation, Park and Tourism Sciences, Parks and Conservation Certificate (p. 175)
- Bachelor of Science in Recreation, Park and Tourism Sciences, Tourism Management Certificate (p. 176)
- Bachelor of Science in Recreation, Park and Tourism Sciences, Youth Development Certificate (p. 177)
- Bachelor of Science in Renewable Natural Resources (p. 142)

Minors
- Park and Natural Resource Management Minor (p. 178)
- Tourism Management Minor (p. 178)

Certificates
- Professional Event Manager Certificate (p. 179)
- Tourism and Hospitality Management Certificate (p. 179)
Community Development - BS

The Department of Recreation, Park and Tourism Sciences offers courses leading to a Bachelor of Science degree in Community Development. This major is an interdisciplinary program. The curriculum provides students with theoretical, statistical, decision-making and communication skills that they can effectively apply in federal and state governmental agencies, community planning firms, municipal departments, marketing firms, economic development organizations, non-profits and other professional settings. The program will enhance students’ abilities to: understand, collect and analyze different kinds of data; work with community leaders, groups and the public; identify and mobilize necessary resources for development processes; and assess outcomes and impacts of community change and development on local populations. Graduates with a Community Development major will be able to apply their knowledge and skills to issues including institutional development; human capacity building; economic development; youth development; poverty; welfare-to-work; water quality; land use planning; and other issues involving the mobilization of, and collaboration with, diverse community groups.

Students who select this major will participate in a common set of core courses in the Department of Recreation, Park and Tourism Sciences. These courses emphasize the importance of parks, recreation, tourism, and youth-oriented programs to community development processes and strategies. In addition, they will enroll in courses specifically required for the community development major. Finally, the program offers a variety of electives that cover a range of thematic areas which will allow students of this major to specialize in their preferred area of community development.

The department maintains links with other resource-management programs within the University as well as exchange programs with other academic entities. Supporting programs at Texas A&M include the resource management programs in Rangeland Ecology and Management, Wildlife and Fisheries Sciences, and the Sports Management Specialization in the Department of Health and Kinesiology.

Community Recreation and Park Administration Certificate

Management of recreation, park and leisure-service agencies requires expertise in problem-solving, decision-making, assessment of social and environmental impacts, personnel, public relations, volunteer management, financing and fund-raising, marketing of services, and needs assessments. Skills in working with people in the legal and political environment are necessary, as well as the ability to assess and work with other organizations for cooperative developments in recreation and tourism. Utilizing computer based decision-aids, students in this emphasis prepare for managerial careers with public recreation and park agencies, youth agencies, not-for-profit recreation agencies, and commercial recreation enterprises.

Total Semester Credit Hours 44

The undergraduate curriculum leading to a Bachelor of Science degree with a major in Recreation, Park and Tourism Sciences provides students with an education in recreation, park and tourism sciences, with an emphasis on problem-solving skills, development of an international perspective and the application of scientific principles to managerial problems. The first two years of studies build a foundation that spans a wide range of disciplines and bodies of knowledge in the arts and sciences and provide the student with an introduction to the history and concepts of recreation, park and tourism sciences. The second two years prepare students with the knowledge and skills for both entry-level positions and for future professional growth in the field. In addition to core courses, students must fulfill requirements for at least one certificate, but may earn additional certificates.

Through the curriculum, students develop the depth and breadth of knowledge needed to scientifically investigate and select among alternatives as well as the intellectual skills to organize and integrate their knowledge in new and more effective patterns. An education in recreation, park and tourism sciences prepares students to become professionals with the capacity to learn from life and throughout life.
The department maintains links with other resource-management programs within the University as well as exchange programs with other academic entities. Supporting programs at Texas A&M include the resource management programs in Rangeland Ecology and Management, Wildlife and Fisheries Sciences, and the Sports Management Specialization in the Department of Health and Kinesiology.

**Parks and Conservation Certificate**

This option focuses on management of natural and cultural resources associated with conserving parks, and other protected areas, while also providing for their use by people. Land managers and related professionals operate within a variety of forums that require the integration of concepts in the environmental, social and behavioral sciences, along with policy and administrative decision-making. Necessary skills include computer applications for natural resource management, planning and design related to natural and cultural resources. Students with an option in this field look forward to careers with both public and private employers in the recreation, park and tourism fields, including state and federal agencies and private enterprises, non-profit organizations, camps and environmental education programs.

Tourism Management Certificate

Tourism is one of the world’s largest and most diverse industries. To help students prepare for tourism careers, this option area introduces issues pertaining to the management, development, and promotion of places and events as tourism attractions. Courses in tourism are designed to collectively build understanding about the links that exist between local places, host populations, and various public, private and special interest groups. Students also develop competencies in assessing economic, environmental, social and political impacts of tourism, as well as in tourism marketing. Students in this option can pursue careers in private sector enterprises, government agencies, convention and visitor bureaus, and other tourism-related service organizations.

The Graduation requirements include a requirement for 6 hours of international and cultural diversity courses. A course satisfying a Core category, a college/department requirement, or a free elective can be used to satisfy this requirement.

Recreation, Park and Tourism Sciences - BS, Youth Development Certificate

The undergraduate curriculum leading to a Bachelor of Science degree with a major in Recreation, Park and Tourism Sciences provides students with an education in recreation, park and tourism sciences, with an emphasis on problem-solving skills, development of an international perspective and the application of scientific principles to managerial problems. The first two years of studies build a foundation that spans a wide range of disciplines and bodies of knowledge in the arts and sciences and provide the student with an introduction to the history and concepts of recreation, park and tourism sciences. The second two years prepare students with the knowledge and skills for both entry-level positions and for future professional growth in the field. In addition to core courses, students must fulfill requirements for at least one certificate, but may earn additional certificates.

Through the curriculum, students develop the depth and breadth of knowledge needed to scientifically investigate and select among alternatives as well as the intellectual skills to organize and integrate their knowledge in new and more effective patterns. An education in recreation, park and tourism sciences prepares students to become professionals with the capacity to learn from life and throughout life.

The department maintains links with other resource-management programs within the University as well as exchange programs with other academic entities. Supporting programs at Texas A&M include the resource management programs in Rangeland Ecology and Management, Wildlife and Fisheries Sciences, and the Sports Management Specialization in the Department of Health and Kinesiology.

Youth Development Certificate

This option focuses on programs and services that contribute to the development of young people’s personal, physical, social and educational abilities. Youth workers are program developers, leaders and managers who need to be able to work with youth, families, organizations and communities. Coursework in this option focuses on positive youth development, program planning and evaluation, methods for working with young people, and societal factors that both contribute to and inhibit the development of young people. Students with an option in this field look forward to careers with non-profit, public and for-profit agencies that supply youth development opportunities for young people. Settings include after-school programs, community programs, camps, outdoor adventure and church-related recreation programs.

Program Requirements
Youth Development Certificate
RPTS 304 Administration of Recreation Resource Agencies 3
RPTS 370 Youth Development Organizations and Services 3
RPTS 371 Understanding and Developing Effective Skills for Youth Development 3
RPTS 474 Management of Programs and Services for Youth 4
RPTS 478 Youth Development Practice 3
Departmental electives 3
Free electives 25

Total Semester Credit Hours 76

The department maintains links with other resource-management programs within the University as well as exchange programs with other academic entities. Supporting programs at Texas A&M include the resource management programs in Rangeland Ecology and Management, Wildlife and Fisheries Sciences, and the Sports Management Specialization in the Department of Health and Kinesiology.

### Total Semester Credit Hours

- **76**

The Graduation requirements include a requirement for 6 hours of international and cultural diversity courses. A course satisfying a Core category, a college/department requirement, or a free elective can be used to satisfy this requirement.

### Park and Natural Resource Management - Minor

An 18 credit hour minor in Park and Natural Resource Management provides a broad orientation of the following:

Management of natural and cultural resources associated with conserving parks and other protected areas. Land managers and related professionals integrate concepts in the bio-environmental sciences, social and behavioral sciences, and policy and administrative decision-making. Necessary skills include geographic information systems, impact assessment methodology, and heritage and natural resources planning techniques. Students with an emphasis in this field look forward to careers with both public and private employers in the recreation, park, and tourism fields, including state and federal agencies and private enterprises, nonprofit organizations, youth camps, and environmental education programs.

1 If you do not wish to take an online course, see RPTS Academic Advisor for course substitutions.

Students must make a grade of "C" or better in all courses.

All courses must be taken in residence at Texas A&M University.

An internship, RPTS 484, is available for minors above the required 18 hours.

### Tourism Management - Minor

An 18 credit hour minor in Tourism Management provides a broad orientation of the following:

Tourism is one of the world’s largest and most diverse industries. This option focuses on the planning, management, development, and promotion of places and events as tourism attractions. Courses in tourism are designed to collectively build understanding about the linkages that exist between local places and cultures, host populations, and various public, private, and special interest groups. Students in this emphasis can pursue careers in private sector enterprises, government agencies,

Students must make a grade of "C" or better in all courses.

Courses must be taken in residence at Texas A&M.

An internship (RPTS 484) is available for minors above required 18 hours.

Professional Event Manager - Certificate

Open to All Majors

The Professional Event Manager Certificate (PEMC), offered by the Department of Recreation, Park and Tourism Sciences, is designed to provide students with an understanding of and the ability to plan, implement, and evaluate festivals, fairs and special events in a variety of governmental, not-for-profit and commercial settings.

Class on Event Management Program Coordinating Committee elective courses list.

Total Semester Credit Hours 15

1 Students should review the list of electives prepared by the Event Management Program Coordinating Committee. The courses listed are included on the full list.

The PEMC program requires a minimum of 15 credit hours in designated courses. Also, students must earn a grade of "C" or better in each course used to meet the requirements. Students who pursue the PEMC must complete all requirements prior to graduation. Specific certificate requirements are available in the Undergraduate Programs Office of the Department of Recreation, Park and Tourism Sciences and of cooperating units. Details are also available on our website.

Tourism and Hospitality Management - Certificate

The Certificate in Tourism and Hospitality Management, offered by the Department of Recreation, Park and Tourism Sciences, is designed to provide students with an understanding of the planning, analysis, and decision-making techniques needed for management positions in the tourism and hospitality industries. Students will study and develop skills related to principles of management, sustainability, development, cultural tolerance, marketing, finance, and service quality as they apply to the hospitality and tourism industries.

Total Semester Credit Hours 15

Department of Soil and Crop Sciences

Undergraduate Students who complete the undergraduate course of study receive the degree of Bachelor of Science in Plant and Environmental Soil Science and Turfgrass Science.

The B.S. degrees require a minimum of 120 credit hours. Details of course requirements are given below and in the Texas A&M University Undergraduate Catalog. Information on undergraduate admissions, including how to order a catalog, can be obtained from the Office of Admissions (http://admissions.tamu.edu). We encourage prospective students to make an appointment with an academic advisor prior to applying.

Undergraduates are required to complete an internship, undergraduate research or study abroad. Soil and Crop Sciences offers a wide variety of experiential learning opportunities for students to achieve their graduation needs. Students are able to complete their experiential learning requirement regionally, nationally, or internationally. Information about undergraduate research and internship opportunities can be obtained from students’ academic advisors and professors.

Majors

• Bachelor of Science in Plant and Environmental Soil Science, Crops Emphasis (p. 181)
• Bachelor of Science in Plant and Environmental Soil Science, Soil and Water Emphasis (p. 182)
• Bachelor of Science in Turfgrass Science (p. 183)

Minors

• Agronomy Minor (p. 184)
• Environmental Soil Science Minor (p. 184)

Plant and Environmental Soil Science - BS, Crops Emphasis

Curriculum in Plant and Environmental Soil Science is administered by the Department of Soil and Crop Sciences. Students following this curriculum develop and utilize basic scientific knowledge to understand the most fundamental resources—plants, soils, and water—and the interaction of these resources in different environmental settings. The required courses provide an essential foundation in several disciplines, while the elective courses can be selected to meet the interests, needs and objectives of individual students.

Based on professional goals and objectives, students will select an emphasis in crops or soil and water. The crops emphasis focuses on the principles involved in the production, management, marketing and use of fiber, forage, grain, biofuel and oilcrops. In the soil and water emphasis, students will study the nature, properties, management, conservation, and use of soils and water. The graduate in Plant and Environmental Soil and Science may choose a career in: education—consulting, extension, or public relations; production agriculture—biofuel or seed production, farming, or farm management; soil and water resource management—soil surveying, land appraisal, land use planning, conservation and pollution abatement, or watershed management; environmental—pollution control and environmental protection as affected by plant-soil-water interactions.

Flexible curricula are provided so that each student, in consultation with their academic advisor, can design a degree program that best serves the student’s career objectives.

Program Requirements

Department of Soil and Crop Sciences Core Courses

CHEM 222 Elements of Organic and Biological Chemistry 3
SCSC 205 Problem Solving in Plant and Soil Systems 3
SCSC 301 Soil Science 4
SCSC 307 Crop Biology and Physiology 4
SCSC 309 Water in Soils and Plants 4
SCSC 481 Senior Seminar 2

Experiential requirement

GEOL 101 Principles of Geology  
PHYS 201 College Physics  
PHYS 218 Mechanics  
Mathematics elective (MATH prefix required) (p. 20) 6  

Total Semester Credit Hours 120 1

1 To be selected from soils emphasis courses.
2 The Graduation requirements include a requirement for six hours of international and cultural diversity courses. A course satisfying a Core category, a college/department requirement, or a free elective can be used to satisfy this requirement. See academic advisor.
3 Credit by examination may be used to substitute for courses.

Turfgrass Science - BS

Curriculum in Turfgrass Science is administered by the Department of Soil and Crop Sciences. Students following this curriculum develop and utilize basic scientific knowledge to understand the most fundamental resources—turfgrass, soils, and water—and the interaction of these resources in different environmental settings. The required courses provide an essential foundation, while the elective courses (i.e., ornamental horticulture, plant protection, business, landscape architecture) can be selected to meet the interests, needs and objectives of individual students.

Turfgrass Science prepares graduates for careers in: management—golf courses, athletic fields, public, private or commercial grounds; production agriculture—turfgrass production, or plant breeding; agribusiness—seed sales, turf equipment and supplies, landscape contractor, commercial or home lawn care specialists; education—consulting, extension, or public relations.

Program Requirements

PHYS 201  College Physics
PHYS 218  Mechanics
Life and physical sciences (p. 20)  1
Mathematics (MATH prefix required) (p. 20)  6
Total Semester Credit Hours  120

1 The Graduation requirements include a requirement for 6 hours of international and cultural diversity courses. A course satisfying a Core category, a college/department requirement, or a free elective can be used to satisfy this requirement. See academic advisor.

2 Credit by examination may be used to substitute for courses.

Agronomy - Minor

The Department of Soil and Crop Sciences offers a minor in Agronomy. SCSC 105, Food & Fiber or SCSC 205, Problem Solving in Plant and Soil Science and SCSC 301, Soil Science are required. Select an additional 8 hours of course work within Soil and Crop Sciences. Please speak with an advisor concerning courses prior to registering.

Program Requirements

Required Courses:
SCSC 105  World Food and Fiber Crops  3
SCSC 301  Soil Science  4
Select eight semester credit hours from the following:  8
SCSC 302  Recreational Turf
SCSC 303  Crop Ecology
SCSC 304  Plant Breeding and Genetics
SCSC 306  Grain, Fiber and Oilseed Crops
SCSC 308  Forage Crops
SCSC 310  Soil Morphology and Interpretations
SCSC 405  Soil and Water Microbiology
SCSC 410  International Agricultural Systems
SCSC 422  Soil Fertility and Plant Nutrient Management
SCSC 428  Advanced Turf Ecology and Physiology
SCSC 430  Turfgrass Maintenance
SCSC 432  Soil Fertility and Plant Nutrient Management Laboratory
SCSC 445  Soil Physics
SCSC 450  Chemical Weed Control
SCSC 452  Chemical Weed Control Laboratory
SCSC 455  Environmental Soil and Water Science
Total Semester Credit Hours  15

Students must make a grade of "C" or better in all courses.

Environmental Soil Science - Minor

The Department of Soil and Crop Sciences offers a minor in Environmental Soil Sciences. SCSC 301, Soil Science is required. You may select from the 11 hours of soil science courses. See an advisor in for more details.

Program Requirements

SCSC 301  Soil Science  4
Select from the following:  11
SCSC 310  Soil Morphology and Interpretations
SCSC 401/ FIVS 401  Forensic Soil Science
SCSC 405  Soil and Water Microbiology
SCSC 422  Soil Fertility and Plant Nutrient Management
SCSC 432  Soil Fertility and Plant Nutrient Management Laboratory
SCSC 445  Soil Physics
SCSC 455  Environmental Soil and Water Science
Total Semester Credit Hours  15

Students must make a grade of "C" or better in all courses.

University Studies Programs

The College of Agriculture and Life Sciences offers degrees in University Studies. A University Studies degree differs from a traditional “major” in that it consists of a concentration of 26 hours and two minors of 15-18 hours each. The University Studies degree format was created to provide students the flexibility to combine areas of study that are of special interest.

Majors

- Bachelor of Science in University Studies, Environmental Business Concentration (p. 167)
- Bachelor of Science in University Studies, Leadership Studies Concentration (p. 122)

Department of Wildlife and Fisheries Sciences

The Department of Wildlife and Fisheries Sciences uses the latest in the ecological and management disciplines to provide the most diverse and progressive education available in the conservation of the earth’s biodiversity. Students in this department are interested in making contributions to solving problems associated with the extinction of species, wildlife recreational uses, food production from aquaculture, environmental education, and urban wildlife and fisheries recreational activities. The conservation and management of wildlife and fisheries resources require resolution of increasingly complex issues that extend far beyond the bounds of classical biology. Contemporary wildlife and fisheries professionals must be well-versed in the life and physical sciences, mathematics, and the language, philosophy and culture. Today’s professionals must have a problem-solving orientation that accommodates animals and their habitats within a larger ecological and socio-economic system. In addition, modern students must be familiar with molecular genetics and the principles of conservation biology. Curricula in wildlife and fisheries sciences are designed to provide both the traditional and contemporary dimensions of academic instruction necessary to transform motivated and intellectually capable students into competent professionals.
Faculty

Adams, Clark E, Professor
Wildlife & Fisheries Sciences
PhD, University of Nebraska, 1973

Cathey, James C, Associate Professor & Extension Specialist
Wildlife & Fisheries Sciences
PhD, Texas Tech University, 1997

Conway, Kevin W, Assistant Professor
Wildlife & Fisheries Sciences
PhD, Saint Louis University, 2010

Dewitt, Thomas J, Associate Professor
Wildlife & Fisheries Sciences
PhD, State University of New York at Binghamton, 1996

Dronen, Norman O, Professor
Wildlife & Fisheries Sciences
PhD, New Mexico State University, 1974

Fitzgerald, Lee A, Professor
Wildlife & Fisheries Sciences
PhD, University of New Mexico, 1993

Fujiwara, Masami, Associate Professor
Wildlife & Fisheries Sciences
PhD, Massachusetts Institute of Technology, 2002

Gatlin, Delbert M, Professor
Wildlife & Fisheries Sciences
PhD, Mississippi State University, 1983

Gelwick, Frances I, Associate Professor
Wildlife & Fisheries Sciences
PhD, University of Oklahoma, 1995

Grant, William E, Professor
Wildlife & Fisheries Sciences
PhD, Colorado State University, 1974

Hurtado Clavijo, Luis A, Associate Professor
Wildlife & Fisheries Sciences
PhD, Rutgers University, 2002

Lacher, Thomas E, Professor
Wildlife & Fisheries Sciences
PhD, University of Pittsburgh, 1980

Lawrence, Addison L, Professor
Wildlife & Fisheries Sciences
PhD, University of Missouri, 1962

Light, Jessica E, Associate Professor
Wildlife & Fisheries Sciences
PhD, Louisiana State University, 2005

Lopez, Roel R, Professor
Wildlife & Fisheries Sciences
PhD, Texas A&M University, 2001

Masser, Michael P, Professor
Wildlife & Fisheries Sciences
PhD, Texas A&M University, 1986

Mateos, Mariana, Associate Professor
Wildlife & Fisheries Sciences
PhD, Rutgers University, 2002

Mora-Zacarias, Miguel A, Professor
Wildlife & Fisheries Sciences
PhD, University of California, Davis, 1990

Morrison, Mike L, Professor
Wildlife & Fisheries Sciences
PhD, Oregon State University, 1982

Packard, Jane M, Associate Professor
Wildlife & Fisheries Sciences
PhD, University of Minnesota, 1980

Peterson, Mark J, Professor
Wildlife & Fisheries Sciences
PhD, Texas A&M University, 1994

Peterson, Tarla R, Professor
Wildlife & Fisheries Sciences
PhD, Washington State University, 1986

Roelke, Daniel L, Professor
Wildlife & Fisheries Sciences
PhD, Texas A&M University, 1997

Silvy, Nova J, Professor
Wildlife & Fisheries Sciences
PhD, Southern Illinois University, 1975

Voelker, Gary A, Associate Professor
Wildlife & Fisheries Sciences
PhD, University of Washington, 1998

Winemiller, Kirk O, Professor
Wildlife & Fisheries Sciences
PhD, University of Texas, 1987

Majors

- Bachelor of Science in Renewable Natural Resources (p. 142)
- Bachelor of Science in Wildlife and Fisheries Sciences, (p. 185) Aquatic Ecology and Conservation Option (p. 185)
- Bachelor of Science in Wildlife and Fisheries Sciences, Vertebrate Zoology Option (p. 186)
- Bachelor of Science in Wildlife and Fisheries Sciences, Wildlife Ecology and Conservation Option (p. 187)

Minors

- Wildlife and Fisheries Sciences Minor (p. 189)

Wildlife and Fisheries Sciences - BS, Aquatic Ecology and Conservation Option

Graduates are well equipped for post-baccalaureate study in many life science fields (graduate school programs and human and veterinary medicine) or for direct entry into professions such as wildlife management, fisheries management, environmental impact assessment, aquaculture, natural history museum education, zoological park collection management, public school teaching and urban wildlife management. Employers of
recent graduates include state and federal resource agencies, scientific foundations, ranches, hunting and fishing clubs, fish farms, environmental consulting firms, museums and secondary schools.

Wildlife ecology, aquatic ecology, and vertebrate zoology curriculum options lead to the Bachelor of Science degree. At the end of the sophomore year, and after consultation with his or her advisor, each student will choose a course of study from among the options within the department's curricula. The chosen option is enhanced by a common departmental “core” of courses necessary for a sound education in the wildlife and fisheries conservation professions.

Students are encouraged to develop an emphasis area within their degree option. To build this emphasis area, students will choose directed electives, from related disciplines, in consultation with their academic advisor and faculty members.

This option is designed for both, students interested in the research and management of fish, other freshwater and marine organisms, and the ecosystems that sustain them as well as controlled production of organisms in aquatic systems. Careers are available in state and federal resource agencies; fisheries management companies; nongovernmental conservation organizations; environmental consulting firms; and private consultation. In addition careers may be available in supporting areas such as quality control, supply, marketing, distribution, finance, consultation as well as domestic and foreign resource development.

Total Semester Credit Hours  120

1 Students currently enrolled at Texas A&M who wish to transfer to a Wildlife and Fisheries Sciences major must have achieved a grade of C or higher in introductory biology and mathematics courses required in the University Core Curriculum. Enrollment in Wildlife and Fisheries Sciences (WFSC) option courses will be restricted to students who have achieved a grade of C or higher in prerequisite courses.

2 Directed electives to be chosen in areas related to fisheries, aquaculture and related topics.

3 The Graduation requirements include a requirement for 6 hours of international and cultural diversity courses. A course satisfying a Core category, a college/department requirement, or a free elective can be used to satisfy this requirement.

Students are required to make a C or better in all WFSC and RENR 205/RENR 215 courses.

A total of 120 semester hours will be required for a BS degree.

Wildlife and Fisheries Sciences - BS, Vertebrate Zoology Option

Graduates are well equipped for post-baccalaureate study in many life science fields (graduate school programs and human and veterinary medicine) or for direct entry into professions such as wildlife management, fisheries management, environmental impact assessment, aquaculture, natural history museum education, zoological park collection management, public school teaching and urban wildlife management. Employers of recent graduates include state and federal resource agencies, scientific
foundations, ranches, hunting and fishing clubs, fish farms, environmental consulting firms, museums and secondary schools.

Wildlife ecology, aquatic ecology, and vertebrate zoology curriculum options lead to the Bachelor of Science degree. At the end of the sophomore year, and after consultation with his or her advisor, each student will choose a course of study from among the options within the department’s curricula. The chosen option is enhanced by a common departmental “core” of courses necessary for a sound education in the wildlife and fisheries conservation professions.

Students are encouraged to develop an emphasis area within their degree option. To build this emphasis area, students will choose directed electives, from related disciplines, in consultation with their academic advisor and faculty members.

**Vertebrate Zoology Option**

This emphasis provides the rigorous training needed for careers in the various aspects of natural resources related to the fields of ichthyology, herpetology, mammalogy and ornithology, including behavior, ecology, evolution, genetics, molecular biology, physiology and systematics. It is a flexible program which permits the inclusion of courses specifically required by schools graduate programs as well as schools of dentistry, law, medicine and veterinary medicine.

1 Students currently enrolled at Texas A&M who wish to transfer to the Wildlife and Fisheries Sciences major must have achieved a grade of C or higher in introductory biology and mathematics courses required in the University Core Curriculum. Enrollment in Wildlife and Fisheries Sciences (WFSC) option courses will be restricted to students who have achieved a grade of C or higher in prerequisite courses.

2 Directed electives to be chosen to meet prerequisite requirements for admission to professional schools.

3 The Graduation requirements include a requirement for 6 hours of international and cultural diversity courses. A course satisfying a Core category, a college/department requirement, or a free elective can be used to satisfy this requirement.

Students are required to make a C or better in all WFSC and RENR 205/RENR 215 courses.

A total of 120 semester hours will be required for a BS degree.

**Wildlife and Fisheries Sciences - BS, Wildlife Ecology and Conservation Option**

Graduates are well equipped for post-baccalaureate study in many life science fields (graduate school programs and human and veterinary
(or for direct entry into professions such as wildlife management, fisheries management, environmental impact assessment, aquaculture, natural history museum education, zoological park collection management, public school teaching and urban wildlife management. Employers of recent graduates include state and federal resource agencies, scientific foundations, ranches, hunting and fishing clubs, fish farms, environmental consulting firms, museums and secondary schools.

Wildlife ecology, aquatic ecology, and vertebrate zoology curriculum options lead to the Bachelor of Science degree. At the end of the sophomore year, and after consultation with his or her advisor, each student will choose a course of study from among the options within the department's curricula. The chosen option is enhanced by a common departmental “core” of courses necessary for a sound education in the wildlife and fisheries conservation professions.

Students are encouraged to develop an emphasis area within their degree option. To build this emphasis area, students will choose directed electives, from related disciplines, in consultation with their academic advisor and faculty members.

Wildlife Ecology and Conservation Option

This option is designed for students interested in the research, management and conservation of wildlife and its ecosystems. This option provides considerable flexibility when designing a degree program and allows students to focus on both terrestrial and aquatic conservation management. Job opportunities are available with state and federal agencies; private land management individuals and companies; state, national and international organizations; environmental consulting firms; and as private consultants. Emphasis areas in this option include:

**Wildlife Ecology Emphasis**

The wildlife ecology emphasis is for students interested in research and management of terrestrial animals and ecosystems, including game, non-game, and endangered species. The ability to be certified is becoming increasingly important for employment. Courses taken meet course certification requirements of The Wildlife Society.

**Wildlife and Fisheries Management Emphasis**

This emphasis is for students interested in research and management of both aquatic and terrestrial habitats. Courses taken meet course certification requirements of both the American Fisheries Society and The Wildlife Society. The ability to be certified is becoming increasingly important for employment.

**Conservation Biology Emphasis**

This emphasis is for students interested in biodiversity and its conservation. This emphasis allows the student to focus on various aspects including urban and/or wetland conservation.

Students are required to make a C or better in all WFSC and RENR 205/RENR 215 courses.

A total of 120 semester hours will be required for a BS degree.

**Wildlife and Fisheries Sciences - Minor**

The Department of Wildlife and Fisheries Sciences offers a minor in Wildlife and Fisheries Sciences.

Graduates with a minor are going to take courses centered on wildlife management, fisheries management, habitat management, and differences among the different types of wildlife. Students will get an exposure to both terrestrial and aquatic wildlife and habitats.

Students must choose at least one terrestrial and one aquatic course.
College of Architecture

Administrative Officers
Dean - Jorge A. Vanegas, Ph.D.
Executive Associate Dean - Louis G. Tassinary, J.D., Ph.D.
Associate Dean for Outreach and Diversity - Cecilia Guisti, Ph.D.
Assistant Dean for Academic Affairs - Leslie H. Feigenbaum, M.S.
Assistant Dean for International Programs - Elton Abbott, D.E.D.

General Statement
The College of Architecture offers undergraduate and graduate professional programs to prepare individuals to enter the professions of architecture, landscape architecture, construction management, urban and regional planning and visualization. The planning, design and construction of the world’s buildings, cities and landscapes involve a variety of professional skills. The faculty of architects, urban planners, landscape architects, engineers, computer scientists, constructors, lawyers, historians and artists, in collaboration with educators in the language, philosophy and culture and natural and social sciences, help students develop an understanding of the physical, social, economic and political forces that shape our environment.

Undergraduate degree programs are offered in landscape architecture, construction science, environmental design architectural studies, visualization and urban and regional planning. Minors in art and architectural history; global art, design and construction; and sustainable architecture and planning are offered through the Department of Architecture. A minor in urban and regional planning is offered through the Department of Landscape Architecture and Urban Planning. A minor in facility management is offered through the Department of Construction Science. A minor in art is offered through the Department of Visualization. Master’s degree programs are offered in architecture, landscape architecture, urban planning, land and property development, construction management, fine arts and visualization. Doctor of Philosophy degrees are offered in architecture and urban and regional sciences.

Personal Computers
Because of the important role of computing in the disciplines housed within the College of Architecture, all entering students are required to possess a portable, network-ready personal computer capable of running software appropriate to their academic program. Financial aid is available to assist students in their computer purchases. No student will be denied admission to Texas A&M University based on an inability to purchase a computer. Additional information is available on the College of Architecture (http://www.arch.tamu.edu) website or the Department of Visualization (http://viz.arch.tamu.edu) website for Visualization students.

Enrollment Management Policy
Students that are admitted into the College of Architecture enter with a lower level classification in Construction Science (p. 196) (COSL), Environmental Design Architectural Studies (p. 191) (EDAL), Landscape Architecture (p. 199) (LANL), Urban and Regional Planning (p. 199) or Visualization (p. 204) (VISL). All students must comply with the guidelines in terms of coursework and process to be considered for upper level. Until students are accepted into upper level they are prohibited from taking 300 and 400 level courses in their major.

Admission will be effective upon successful completion of in-progress courses. If all requirements are not met prior to the start of the following semester, admission will not be granted and registration in all upper level coursework in the College of Architecture will be cancelled. Admission is not guaranteed. If there are more qualified applicants than there is space available, preference will be given to students based on their academic achievement.

Transfer Students
Transfer students, who meet the University entrance requirements and who desire to enter a major field of study in the College of Architecture, will be admitted based on available space and current College of Architecture entrance criteria. Following admission, all transfer students are placed on a 2.5 GPR probation for a minimum of 12 credit hours to substantiate competency in required lower-level courses. Transfer students will be admitted into the college with a lower-level classification and may apply for upper-level status after at least one semester at Texas A&M University.

Transfer students accepted into the Bachelor of Environmental Design degree program must submit a portfolio to the Department of Architecture to receive credit for drawing and design studio classes taken at another university or college, unless the course is listed as an equivalent under the Texas common course numbering system. The review of the portfolio will ensure appropriate studio placement. Additional information may be found on the Department of Architecture (http://dept.arch.tamu.edu/undergraduate/prospective-students) website.

Change of Major
Students currently enrolled in another major at Texas A&M University with fewer than 60 hours who desire to change their major field of study into the College of Architecture must fill out a Change of Curriculum application. Deadlines for applications are as follows:

- March 1 for summer admittance (for Construction Science, Environmental Design Architectural Studies, Landscape Architecture, Urban and Regional Planning, Visualization and University Studies students)
- June 15 for fall admittance (for Construction Science, Environmental Design Architectural Studies, Urban and Regional Planning, Visualization and University Studies students)
- October 1 for spring admittance (for Construction Science, Urban and Regional Planning, Visualization and University Studies students)

Students will be notified of action on their applications within 30 days of the deadline date. The college will admit the best-qualified applicants based on the number of spaces available in their program of choice.

Semester Away
The College of Architecture requires all upper-level undergraduate students to spend one semester studying abroad or at another university, or in a professional internship. Specific information on these programs is available through each department or the Texas A&M Study Abroad Office.
Academic Policies

For Construction Science, Environmental Design Architectural Studies, Landscape Architecture, Urban Planning and Visualization Majors: Students must make a grade of C or better in every College of Architecture course (ARCH, ARTS, CARC, COSC, ENDS, LAND, LDEV, URPN, VIST) used to satisfy degree requirements. Students must also make a grade of C or better in any course used as an equivalent substitution for College of Architecture courses that satisfy degree requirements.

Majors

College of Architecture

- Bachelor of Science in University Studies, Global Arts, Planning, Design and Construction Concentration (p. 204)

Department of Architecture

- Bachelor of Environmental Design in Environmental Design Architectural Studies (p. 194)

Department of Construction Science

- Bachelor of Science in Construction Science (p. 198)

Department of Landscape Architecture and Urban Planning

- Bachelor of Science in Urban and Regional Planning (p. 202)

Department of Visualization

- Bachelor of Science in Visualization (p. 206)

Minors

College of Architecture

- Global Culture and Society Minor (p. 196)

Department of Architecture

- Art and Architectural History Minor (p. 195)
- Global Art, Design and Construction Minor (p. 195)
- Sustainable Architecture and Planning Minor (p. 196)

Department of Construction Science

- Facility Management Minor (p. 199)

Department of Landscape Architecture and Urban Planning

- Urban and Regional Planning Minor (p. 203)

Department of Visualization

- Art Minor, New Media Emphasis or Traditional Media Emphasis (p. 206)

Certificates

- Diversity Program - Certificate (p. 207)

Masters

Department of Architecture

- Master of Science in Architecture (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/architecture/architecture/ms)
- Master of Architecture in Architecture (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/architecture/architecture/march)

Department of Construction Science

- Master of Science in Construction Management (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/architecture/construction-science/ms)

Department of Landscape Architecture and Urban Planning

- Master of Landscape Architecture in Landscape Architecture (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/architecture/landscape-architecture-urban-planning/mla)
- Master of Land and Property Development in Land and Property Development (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/architecture/landscape-architecture-urban-planning/land-property-development-masters)
- Master of Urban Planning in Urban and Regional Planning (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/architecture/landscape-architecture-urban-planning/ms-urban-planning)

Department of Visualization

- Master of Science in Visualization (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/architecture/visualization/ms)
- Master of Fine Arts in Visualization (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/architecture/visualization/mfa)

Doctoral

Department of Architecture

- Doctor of Philosophy in Architecture (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/architecture/architecture/phd)

Department of Landscape Architecture and Urban Planning

- Doctor of Philosophy in Urban and Regional Science (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/architecture/landscape-architecture-urban-planning/urban-regional-science-phd)

Department of Architecture

The undergraduate curriculum in Environmental Design Architectural Studies at Texas A&M University is offered through the Department of Architecture. The four-year Bachelor of Environmental Design (BED) degree prepares students for challenging careers in industries supporting the built environments. The program produces graduates who are prepared to influence society with informed and visionary designs—designs that ensure sustainability by responding to cultural, social, economic and ecological factors.

Students interested in professional registration as an architect must complete a National Architectural Accreditation Board (NAAB) accredited
Master of Architecture program in addition to the four-year undergraduate Bachelor of Environmental Design degree.

Enrollment in Environmental Design Architectural Studies Program

1. Students must have satisfactorily completed at least 54 hours of coursework with a minimum GPR of 2.5 for those courses completed at Texas A&M University.
2. Students must satisfactorily complete the following courses as part of the 54 hours of coursework with a minimum of a 2.5 GPR to apply for upper level.

Total Semester Credit Hours 45

3. Students must apply to the upper level through the department. The application is to be submitted by the following date:
   - March 1 for Summer and Fall admission
4. Students applying for upper level must submit a portfolio that provides documentation of the applicant’s design representation and creative problem solving ability. Portfolios will be reviewed as evidence supporting design ability. Guidelines are outlined on the application form and in the Student Services office. Students will be admitted according to available space.

Preparation for Professional Studies in Architecture

Although the four-year BED degree at Texas A&M University is a pre-professional degree and is not accredited by the National Architectural Accrediting Board (NAAB), those who have completed this pre-professional degree can apply to an accredited Master of Architecture program, which is offered at Texas A&M University.

In the United States, most state architectural registration boards require, as the prerequisites for licensure, a degree from a National Architectural Accrediting Board (NAAB) accredited professional degree program, the fulfillment of the National Council of Architectural Registration Board’s (NCARB) Internship Development Program (IDP), and the successful completion of NCARB’s Architectural Licensing Examination (ARE). The NAAB, which is the sole agency authorized to accredit U.S. professional degree programs in architecture, recognizes three types of degrees: the Bachelor of Architecture (BArch), the Master of Architecture (MArch), and the Doctor of Architecture (DArch). Students should consult the Texas A&M Master of Architecture, NAAB and NCARB websites for additional information.

Transfer and Change of Major Students

Transfer and change of major students (students currently enrolled in another major at Texas A&M University) who are admitted to the Department of Architecture are classified as lower level (EDAL). Transfer students who meet all the criteria for admittance to upper-level studies may immediately apply for admittance to upper level.

Transfer students who have completed at least 24 graded transferable hours, and change of major students who have completed at least 12 graded transferable hours are encouraged to participate in a 10-week summer module offered by the Department of Architecture. The summer module is designed to provide an intensive first-year design studio sequence along with support coursework that will enable change of major and transfer students to qualify for sophomore design studios the following semester. This summer module can enable Transfer and Change of Major students to complete the four-year degree in a more efficient and timely manner.

Transfer students accepted into the Bachelor of Environmental Design degree program must submit a portfolio to the Department of Architecture to receive credit for drawing and design studio classes taken at another university or college, unless the course is listed as an equivalent under the Texas common course numbering system. The review of the portfolio will ensure appropriate studio placement. Additional information may be found on the Department of Architecture website.

### Environmental Design Architectural Studies - BED

The degree in Environmental Design Architectural Studies requires study in the arts, humanities and sciences. The curriculum fosters creativity and problem-solving skills while providing a solid foundation in design, theory, architectural history, building and technology. Coursework encourages multidisciplinary and comparative perspectives that allow opportunities for communication and team-oriented methods of production. Global perspectives are encouraged by a mandatory semester-long study away experience that includes study abroad or internship opportunities.

Students develop skills and acquire knowledge through a studio-based experience with a variety of proposed or actual design-related projects. The studio projects place a shared emphasis on the technical and expressive content of design work; the processes by which student’s research, synthesize and document their design ideas; and the creation of tangible products that achieve a high quality of graphic and physical craft.

**Total Semester Credit Hours**
- 120

1. Study Away electives will be selected with approval of the Assistant Dean for International Programs & Initiatives.
2. Directed Electives are to be selected from an approved list; see the Department of Architecture Undergraduate Advisor (in Langford ARCA 219).
3. Select from any 100-499 course not used elsewhere (except MATH 100-103 (p. 860) and MATH 150).
4. Courses pertaining to solely Texas history may not comprise more than 3 hours of the American History core curriculum requirement.

All proposals for undergraduate independent study must be signed by the supervising faculty and submitted to the department for approval; forms are available from the Department of Architecture Undergraduate Advisor (in Langford ARCA 219) and on the department website.

A grade of C or better must be made in all College of Architecture courses (ARCH, ARTS, COSC, CARC, ENDS, LAND, LDEV, URPN, and VIST). Students must also make a grade of C or better in any course used as an equivalent substitution for College of Architecture courses satisfying degree requirements.
Art and Architecture History - Minor

The Minor in Art and Architecture History provides undergraduate students with an interdisciplinary, global, and multicultural approach to understanding visual arts and the built environment. The curriculum emphasizes an awareness of diverse global cultures and historical traditions, an appreciation of context, visual understanding, and critical thinking. The Minor in Art and Architectural History can serve as a complement to several major fields of study and is open to all Texas A&M undergraduates. The structure of the minor encourages students to gain a broad chronological understanding of art and architectural history before advancing to specialized areas of interest. Coursework includes six credit hours at the introductory level (100- and 200-level courses) and nine credit hours in specialized subjects at an advanced level (300- and 400-level courses) for a total of 15 credit hours.

The application form can be found on the Department of Architecture's website. Per university guidelines, the student's home college/department is responsible for advising students pursuing the Minor in Art and Architecture History.

1  Must be taken as international internship.
2  Must be taken as international studio.

Students must make a grade of C or better.

**Global Culture and Society - Minor**

The Global Culture and Society minor will combine a study abroad experience at a single Texas A&M University-affiliated facility abroad with the completion of an interdisciplinary undergraduate minor on a theme appropriate for the center that can be completed in one semester.

**Program Requirements**

Portfolio  
Select one of the following:  
- ARCH 250  Survey of World Architecture History II  
- ANTH 210  Social and Cultural Anthropology  
- GEOG 202  Geography of the Global Village  

Select one of the following:  
- ARTS 350  The Arts and Civilization  
- CARC 311  Field Studies in Design Communication  
- CARC 331  Field Studies in Design Philosophy  
- HIST 362  History of Science  
- Other Courses approved by student’s college  

Total Semester Credit Hours  16

Students must make a grade of C or better.

1  Portfolio in global culture and society. May be completed either during the long semester abroad or upon return to College Station.
2  Must be taken in a single fall or spring semester at a TAMU-affiliated facility such as Santa Chiara or Soltis Center.

**Sustainable Architecture and Planning - Minor**

The Minor in Sustainable Architecture and Planning (SARP) provides undergraduate students with a multidisciplinary approach to understanding sustainability of the built environment. The curriculum emphasizes an awareness of responsible practices at a variety of scales impacting the built environment: buildings, communities, architectural systems, global resource management, and social equity. Students will become aware of responsible architectural design and develop critical thinking skills to address the multifaceted issues facing the profession today.

The Minor in Sustainable Architecture and Planning can serve as a complement to several major fields of study and is open to all Texas A&M undergraduates. The structure of the minor encourages students to gain a broad understanding before advancing to specialized areas of interest. Coursework includes six credit hours at the introductory level (100- and 200-level courses) and nine credit hours in specialized subjects, three of which must be at an advanced level (300- and 400-level courses) for a minimum total of 15 credit hours. Per University guidelines, the student's home college/department is responsible for advising students pursuing the Minor in Sustainable Architecture and Planning.

Total Semester Credit Hours  15

1  At least three of the nine hours must be at the 300-400 level. Six of the nine hours may be in coursework taken outside of the College of Architecture.
2  BED majors may not use directed electives to satisfy both the minor and graduation requirements. USAR majors may not use coursework to satisfy both the minor and the concentration area.
3  Students must complete a minimum of 6 hours in residence at the 300-400 level.

Students must make a grade of "C" or better in all courses.

**Department of Construction Science**

The construction industry is the largest industry in the nation with more than 7.7 million employees who annually produce more than 5 percent of the nation's Gross Domestic Product. Managing the construction process requires a broad understanding of the principles of construction science as well as leadership skills in motivating teams and integrating a wide range of tasks to produce a completed project.

The primary mission of the Department of Construction Science is to prepare students for successful careers and future leadership roles in construction and construction-related industries. The program integrates principles of architecture, technology, engineering, business and project management preparing students to effectively manage the total construction process. Courses taught by the Department include construction materials and methods, fundamental design courses in soils...
and foundations, mechanical and electrical systems and structures, project control systems and management, construction law, labor and contracts, and industry emphasis courses. In addition, related courses from other colleges are included to ensure a broad base of knowledge in business, engineering and construction fundamentals.

**Enrollment in Construction Science Program**

1. Students must have satisfactorily completed at least 54 hours of coursework with a minimum GPR of 2.5 for those courses completed at Texas A&M University.

2. Students must satisfactorily complete the following courses as part of the 54 hours of coursework with a minimum of a 2.5 GPR to be considered to upper level:

ARCH 250 Survey of World Architecture History II
ARCH 350 History and Theory of Modern and Contemporary Architecture
ARTS 150 Art History Survey II
ENDS 101 Design Process
Language, philosophy and culture and ICD (p. 21) 3
Total Semester Credit Hours 120
A grade of C or better is required in all College of Architecture courses (ARCH, ARTS, CARC, COSC, ENDS, LAND, URPN and VIST) to satisfy Construction Science degree requirements.

Facility Management - Minor

The Department of Construction Science offers a minor in Facility Management. This minor will encompass multiple disciplines to ensure functionality of the built environment by integrating people, place, process and technology.

Program Requirements

COSC 450 Facility Management Principles and Practices 3
COSC 474 Facility Management Summer Internship 3
Select one of the following: 3
ACCT 209 Survey of Accounting Principles
ACCT 210 Survey of Managerial and Cost Accounting Principles
AGEC 422 Land Economics
FINC 409 Survey of Finance Principles
URPN 440 Urban and Regional Economic Development
Select one of the following: 3
ARCH 458 Cultural and Ethical Considerations for Global Practice
COMM 205 Communication for Technical Professions
COMM 315 Interpersonal Communication
COMM 324 Communication Leadership and Conflict Management
COSC 353 Construction Project Management
MGMT 309 Survey of Management
URPN 440 Urban and Regional Economic Development
Select one of the following: 3
ARCH 421 Energy and Sustainable Architecture
COSC 326 Mechanical, Electrical and Plumbing Systems in Construction II
COSC 353 Construction Project Management

URPN 330 Land Development I
URPN 469 Urban Infrastructure
Select one of the following: 3
COSC 461 Building Information Modeling System
GEOG 390 Principles of Geographic Information Systems
Total Semester Credit Hours 18
College of Architecture students can apply no more than six hours of coursework toward both the Facility Management Minor and their degree requirements.

At least two courses must be taken outside of the major area of study.

Must make a grade of C or better.

Department of Landscape Architecture and Urban Planning

Landscape Architecture

Landscape architecture is the profession providing landscape planning, design, and management services to enhance and protect natural and built environments. Landscape architecture as a discipline is devoted to understanding and managing the human and environmental forces that change the landscape. Landscape architects plan and design places for the health, safety, and welfare of citizens through systematic decision-making that integrates science, art, and technology. Individual and community quality of life are enhanced by a design process to improve, protect, and create ecologically sustainable, socially equitable, and economically feasible landscapes. Landscape architects work in urban, suburban and wilderness environments. Our graduates have gained distinction for projects as varied in scale as private gardens, residential communities, urban plazas, college campuses, park facilities and regional conservation plans.

The Bachelor in Landscape Architecture (BLA) program is nationally accredited as a professional degree program. The mission of the program is to prepare students to become professional landscape architects in private and public sector practice. Our educational goal is to produce graduates motivated to be leaders in the field and professionals who are intellectually active, broadly-educated citizens and life-long learners.

Urban and Regional Planning

The Bachelor of Science in Urban and Regional Planning degree program emphasizes the social, economic, cultural and natural factors that govern how communities and society are shaped. Coursework provides students with the knowledge and skills needed to develop solutions to community and regional growth and development issues that face our state and nation. Students have an opportunity to specialize in specific aspects of community and regional planning and development issues along with internship and service-learning experiences locally, nationally, and/or internationally.

Enrollment in Landscape Architecture and Urban and Regional Planning Programs

1. Students must have satisfactorily completed at least 54 hours of coursework with a minimum GPR of 2.5 for those courses completed at Texas A&M University to apply for upper level.
2. Students must satisfactorily complete the courses listed below as part of the 54 hours of coursework with a minimum of a 2.5 GPR to be considered to upper level.

3. Student must apply to the upper level through the department. The application is to be submitted the semester or summer session in which all of the above criteria are met.

- March 1 for Summer admission
- June 15 for Fall admission
- October 1 for Spring admission

Majors
- Bachelor in Landscape Architecture (p. 201)
- Bachelor of Science in Urban and Regional Planning (p. 202)

Minors
- Urban and Regional Planning Minor (p. 203)

Landscape Architecture - BLA

The Bachelor of Landscape Architecture (BLA) curriculum offers a sequence of courses to prepare students for entry into professional practice. By combining a broad general education and strong professional training, the curriculum emphasizes the acquisition and application of advanced knowledge to develop students’ critical thinking and creative problem-solving abilities. The program provides opportunities for students to develop special professional interests in a chosen area of concentration.

Graduates from the BLA program are prepared for employment with private practice firms in landscape architecture, engineering, architecture, or planning; and with federal, state, or local government agencies. Upon graduation students are qualified to pursue licensure in the profession or post graduate education in landscape architecture or a related field.

Because of the important role of computing in the disciplines housed within the College of Architecture, all entering students are required to possess a portable, network-ready personal computer capable of running software appropriate to their academic program. Financial aid is available to assist students in their computer purchases. No student will be denied admission to Texas A&M University based on an inability to purchase a computer. Additional information is available on the Department of Landscape Architecture and Urban Planning website.

Urban and Regional Planning - BS

The Bachelor of Science in Urban and Regional Planning degree program is based in the Department of Landscape Architecture and Urban Planning (LAUP) within the College of Architecture at Texas A&M University. The Urban and Regional Planning program equips students for entry-level positions in planning allied fields and prepares them for graduate studies in fields such as Urban Planning and Land Development. The core curriculum, designed to equip students with knowledge and skills to deal effectively with the opportunities and challenges inherent in the development, growth and culture of neighborhoods, cities, and regions, is based on theoretical training in the natural, physical, and social sciences. Students acquire skills that enable them to apply these theories to develop communities, cities, and regions which are safe, healthy, and sustainable.

Critical thinking and analytical skills are emphasized for problem-solving at the community and regional scale. Classroom service-learning experiences enable graduates to more reliably and realistically assess complex community problems, design solutions for overcoming those problems, and evaluate the outcomes of programs and policies in meeting community and regional needs. Specialized Emphasis Area electives are tailored to help students further specialize their career goals in:

- Environmental planning and analysis
- Housing and urban development

Total Semester Credit Hours: 128

1. Any approved university core curriculum history course
2. This course will be selected in consultation with the student’s advisor.
3. URPN 320 or URPN 325 or approval of BLA Program Coordinator
4. URPN 201 or URPN 330 or URPN 370
5. URPN 361 or URPN 460

A grade of C or better is required in College of Architecture courses (CARC, COSC, ENDs, ARCH, URPN, LAND, VIST, ARTS) to satisfy Landscape Architecture degree requirements.

Any student wishing to change majors into the Landscape Architecture program must have less than 60 total hours, including all transfer hours.

---

A grade of C or better is required in all courses to satisfy Urban and Regional Planning degree requirements.

### Urban and Regional Planning - Minor

By pursuing a minor in urban planning at Texas A&M, students will earn an education within a multi-disciplinary atmosphere where analytical skills and critical thinking are harvested. Students will then apply this acquired knowledge to address real-world issues which communities and regions face on a daily basis. Those earning a minor in urban planning can effectively solve problems related to a number of complex issues involving the built and natural environment, transportation, health, economic development, among others.

The minor in urban planning program will provide a solid educational basis for those students wishing to pursue a post-graduate education within the planning field. Also, because of its broad scope, the minor program may serve as an effective introduction to graduate studies in other social science disciplines such as economics, geography, political science, and public policy.

The minor program will prepare students for entry-level positions in a variety of fields including state and local government; advocacy, grant-making and civic organizations; real estate management; environmental science; social assistance services; and health care services.

### Program Requirements

**URPN 201**  The Evolving City  1
**URPN 202**  Building Better Cities  3
Select 9 hours from the following:
- URPN 340  Housing and Community  3
- URPN 361  Urban Issues  3
- URPN 370  Health Systems Planning  3
- URPN 460  Sustainable Communities  3
- URPN 471  Planning Healthier Communities  3

**Total Semester Credit Hours** 15
University Studies Programs

The College of Architecture offers a degree in University Studies. A University Studies degree differs from a traditional "major" in that it consists of a concentration and two minors of 15-18 hours each. The University Studies degree format was created to provide students the flexibility to combine areas of study that are of special interest.

Majors

• Bachelor of Science in University Studies, Global Arts, Planning, Design and Construction Concentration (p. 204)

University Studies - BS, Global Arts, Planning, Design and Construction Concentration

The Global Arts, Planning Design and Construction concentration is an interdisciplinary course of study that integrates multiple aspects of the built environment. The course offerings are from all of the professional undergraduate programs within the College of Architecture and are intended to give students an understanding of the interplay of professions that are required to work as a team in order to successfully complete built environment projects. These foundation courses are coupled with a required study abroad experience. All students in the College of Architecture are required to participate in a semester away experience that serves to expand the context of their education. The benefit of this experience is integrated into the concentration at a smaller scale.

Program Requirements

Concentration Requirements

Design
Select one of the following:
- ARCH 249 Survey of World Architecture History I
- ARCH 250 Survey of World Architecture History II
- ENDS 101 Design Process

Landscape
- LAND 240 History of Landscape Architecture

Construction
- COSC 153 Introduction to the Construction Industry
- or COSC 253 Construction Materials and Methods I

Leadership
- ALED 340 Survey of Leadership Theory

Urban Planning
- URPN 201 The Evolving City
- or URPN 202 Building Better Cities

Study Abroad
- CARC 481 Seminar
- CARC 300 College of Architecture Study Abroad (must be led by faculty)

Directed electives
Select one of the following:

Other courses may be used with approval of the major advisor and the Dean of the College of Architecture. A 2.0 GPA is required in all major field of study courses. Two writing-intensive courses are required. Two courses must meet the International and Cultural Diversity requirement, however, BUSN 289 cannot be used.

Department of Visualization

Visualization is the study of the art and science used in the creation of traditional and digital visual communication. The Bachelor of Science in Visualization is a four-year undergraduate degree requiring a minimum of 120 credit hours. The degree prepares students for the artistic and technical demands facing digital content creators. For those applicants interested in the design of the built environment, see the Bachelor of Environmental Design.

Enrollment in Visualization Program

Students enrolled in the Bachelor of Science in Visualization (VISL) program will be granted automatic admission to the Sophomore level art and visualization courses by obtaining a 3.6 GPR in category A courses and a 3.0 GPR in category B courses and completing 27 semester credit hours during the first two semesters in the Visualization Program (VISL).

Catagory A
- ARTS 115 Drawing for Visualization
- VIST 105 Principles of Design I
- VIST 106 Principles of Design II

Catagory B
- MATH 151 Engineering Mathematics I
- PHYS 201 College Physics
- VIST 170 Introduction to Visualization Computing Environments

If AP or Dual Credit courses are available as substitutions in any of the above courses, sequential or other art/visualization/math/science courses...
taken at Texas A&M University will be used to calculate the respective GPRs. For change of major and transfer students, equivalent transferable courses may be substituted for any of the above courses. In this case, courses taken at Texas A&M University in the same program area will be specified and used to calculate the respective GPRs.

Students not automatically admitted will be allowed on a space available basis into sophomore level art and visualization courses based on a ranking of the combined GPA of the Category A and Category B courses. An optional 500 word essay may be submitted to explain extenuating circumstances related to the 1st year academic experience and provide justification why the student should be allowed to take sophomore level courses. The essay may be used to adjust the overall student ranking.

Transfer and Change of Major Students

Transfer and change of major students (students currently enrolled in another major at Texas A&M University) who are admitted to the Department of Visualization are classified as lower level (VISL).

Minors
• Art Minor (p. 206)

Visualization - BS

The mission of the Bachelor of Science in Visualization program is to engage and develop the student’s visual, intuitive and analytical capabilities through the scientific and aesthetic issues surrounding the use of technology in visual communication. To fulfill its mission, the program requires both a creative spirit and the technical understanding to adapt to the changing demands of the visual industries served by the departmental programs.

The curriculum integrates elements of fine arts, three-dimensional design, scientific inquiry and digital technology to provide a broad, wide-ranging educational experience. The core of the program is the studio experience, which explores the relationship between theory and practice through a variety of exercises and projects using traditional and electronic media. A variety of directed electives allows the student to gain an in-depth understanding in an area of specialization.

Graduates of the program are prepared to be technically adept artists, designers and/or tool-makers capable of utilizing interactive and directed media. Employment may be found in such fields as graphic and web design, the entertainment industry (game design and development, animation and visual effects), as well as fields such as architectural presentation, modeling and simulation, and other fields where visualization contributes to understanding. Alternatively, graduates may enter graduate programs that emphasize digital media in either computer science or art/design. Two such programs, the Master of Science (MS) in Visualization and the Master of Fine Arts (MFA) in Visualization, are offered by the Department of Visualization at Texas A&M University.

Total Semester Credit Hours  120

1 Select from any 300-499 course not used elsewhere. If you do not participate in study abroad, 3 hours will come from ICD.

A grade of C or better must be made in all College of Architecture courses (ARCH, ARTS, CARC, COSC, ENDS, LAND, LDEV, VIST, URPN and VIZA). Students must also make a grade of C or better in any course used as an equivalent substitution for College of Architecture courses that satisfy degree requirements.

Art - Minor

Students pursuing other majors may minor in Art by taking a minimum of 18 hours. There are two emphases within the minor, traditional media and new media.

Students must have a minimum cumulative GPR of 2.75 and must maintain a “C” average or better in all courses completed as part of the minor in Art. The student’s home college/department may grant, with agreement from the Department of Visualization, transfer credit of no more than six credit hours. Transfer credit will not be accepted for any 300- or 400-level course.

Per University guidelines, the student’s home college/department is responsible for advising students pursuing a minor in Art.

Program Requirements

ARTS 349 The History of Modern Art  3
Select one of the following emphases:  15

Traditional Media Emphasis

VIST 374  Multimedia Design and Development
VIST 465  Art, Culture and Time Based Media
VIST 474  Designing for the Web

Total Semester Credit Hours 18

Minimum of 6 hours of 300- or 400-level courses are required.

Students must make a grade of "C" or better in all courses.

Diversity - Certificate

The College of Architecture offers a Diversity Certificate. The certificate program will provide students in the College of Architecture competencies to work in a diverse workplace.

Program Requirements

CARC 485  Directed Studies 1
  a. Orientation
  b. Co-curricular component
  c. Service learning component
  d. Capstone retreat

Prescribed electives 12

Total Semester Credit Hours 13
Mays Business School

Administrative Officers
Dean - Eli Jones, Ph.D.
Executive Associate Dean - Bala Shetty, Ph.D.
Associate Dean - Martha L. Loudder, Ph.D.
Director of Undergraduate Program - Peter K. Drysdale, M.S.

General Statement
A goal of Mays Business School is to help develop students to become effective managers, concerned citizens and life-long learners. Through challenging academic and enrichment programs, the business school provides students with numerous opportunities for intellectual, leadership and personal development.

In support of this student development goal, the curriculum in business has a dual emphasis—a broad-based education in the foundation disciplines of the liberal arts and the sciences, and a focused development of business knowledge and behavioral skills.

The program of study in business provides students a background in the basic academic areas—mathematics; language, philosophy and culture; life and physical, social and behavioral sciences; and, rhetoric and composition. Students simultaneously pursue introductory coursework in accounting, economics, business information systems and the legal environment of business. This broad educational foundation provides an enriching dimension to the university experience that cannot be attained in a more limited course of study.

Upon successful completion of this broad-based coursework, the student will begin to focus on a major field of study and a full range of business courses. The major field—chosen from the fields of accounting, finance, management, management information systems, marketing, and supply chain management— is designed to prepare students for an entry-level organizational position as well as subsequent career development. Each major has a set of required courses, as well as electives, from which students may gain additional depth in the chosen area. Students admitted to Mays Business Honors pursue an interdepartmental degree in business honors.

This combination of a broad educational foundation and more specialized study produces graduates uniquely qualified to deal with the rapidly changing and diverse global economy.

Requirements for Graduation
Requirements for graduation are listed in the Texas A&M University Student Rules and this catalog.

With the exception of general elective requirements, courses taken to satisfy degree requirements must be taken for letter grades.

In addition, students in Mays Business School must have a GPR of 2.0 in the courses included in the Common Body of Knowledge. Undergraduate business students must take two writing-designated (W) business courses. The requirement may be met by taking two writing (W) business courses or one W business course and one oral communication (C) business course. These W and C courses are major specific and are taken as part of the student’s upper-level coursework. See an academic advisor for additional information.

Transfer of Credits
Acceptance of transfer of credit for business courses will generally be limited to those courses taught in the freshman and sophomore years at this institution. Transfer credit is not offered for upper-level business courses.

Credit by Examination
Undergraduate students may receive credit for certain courses required in undergraduate business curricula by successfully completing Advanced Placement (AP), College Level Exam Program (CLEP) and departmental examination. Students should contact the Undergraduate Program Office (Room 238, Wehner Building) for information. Information concerning credit by examination may be obtained from the Data and Research Services (http://dars.tamu.edu) website or (979) 845-0532. A fee is charged for such an examination.

Students may not receive credit by examination for courses in which they are enrolled, which they have previously failed, or which are prerequisite to courses for which they already have credit.

Bachelor’s Degrees and Departments of Instruction
The academic program of Mays Business School is organized in the following majors: Accounting, Business Honors, Finance, Management, Management Information Systems, Marketing, and Supply Chain Management. Bachelor of Business Administration degrees are offered in each of these seven majors.

A Bachelor of Science in University Studies with concentration in business (USBU) is offered.

Bachelor of Business Administration
The degree of Bachelor of Business Administration is offered in these seven majors: accounting, business honors, finance, management, management information systems, marketing, and supply chain management. Each requires a minimum of 120 semester credit hours of study. The student elects one of these as a “major,” but is also required to study fundamental theory and procedure in each of the basic business functions. In addition, the student takes courses essential to a general liberal education.

The following is a representation of the curriculum requirements by major.

1 Selected from a list of approved international electives for business students. In the BBA curricula, the 6 hours of approved international elective courses simultaneously fulfill the University’s International and Cultural Diversity Graduation requirement. Management majors must take MGMT 450/IBUS 450.

2 Management majors are advised to take PSYC 107 or SOCI 205.

**BBA Common Body of Knowledge**

**Required Courses**
- ACCT 229 Introductory Accounting 3
- ACCT 230 Introductory Accounting 3

**Upper-Level Entry into Accounting, Business Honors, Finance, Management, Management Information Systems, Marketing and Supply Chain Management (BBA)**

Students who meet the University and college entrance requirements enter Mays Business School in the BUAD (lower-level business) classification. Enrollment of Mays Business School students in junior- and senior-level business courses is limited to those who have been admitted to upper-level (also referred to as upper division) in one of the seven BBA majors: accounting, business honors, finance, management, management information systems, marketing, and supply chain management.

**Cooperative Education**

Cooperative education is designed to augment the academic program of study with on-the-job training. To be eligible to participate, a business undergraduate must have completed 45 credit hours and have a minimum 2.5 GPA. Interested students should contact the Career Center at (979) 845-5139 or 209 Koldus.

**Restrictions on Two Degrees**

Mays Business School is enrollment managed; demand for admission to the undergraduate business program consistently exceeds available educational resources. Priority is given to qualified applicants for their initial bachelor’s degree.

**Double Major**

Only Business Honors majors may elect a second major field of study within the BBA degree. The first major must be business honors. The Business Honors student must satisfy all University and Business School requirements and complete all curriculum requirements for each major. This option leads to the granting of one BBA degree with two majors. Additional restrictions may apply.

**Double Degree**

Approval of double degrees (BBA with BA or BS) is granted by exception only. A written appeal for a double degree may be submitted; the appeal should reflect an excellent academic record, support from the BA or BS granting college, and a compelling justification.

**Second Degree**

Postbaccalaureate admission to Mays is severely restricted and granted by exception only. Applicants for a postbaccalaureate business degree
may present a case for an exception to this enrollment restriction in
the essay of a complete Texas A&M admission application. Generally,
eligible applicants are denied postbaccalaureate admission but may be
couraged to apply, instead, to an appropriate graduate degree program.

International Certificate Programs
To meet the challenges of increased business globalization Mays
Business School has created a variety of international certificate
programs. Each program offers BS—Agribusiness degree students the
opportunity to study international business, develop understanding of other
cultures and language knowledge to meet global business challenges.

Students who pursue any of the international certificate programs must
complete all requirements for the specific program prior to graduation.
Specific certificate requirements are available in the Undergraduate
Program Office, Room 238 Wehner, of Mays Business School or in the
Undergraduate Programs Office, Room 214 of the Agriculture and Life
Sciences Building, of the Department of Agricultural Economics.

Information regarding the following certificates can be found in the Mays
Business School (p. 208) section.

International and Cultural Diversity
Requirement
Texas A&M University requires its students to meet an International and
Cultural Diversity requirement as part of the University’s Graduation
requirement. Business students meet this requirement by taking six
(6) hours of coursework from an approved list of international elective
courses.

In the BBA curricula the 6 hours of approved international elective
coursework simultaneously fulfill the University’s International and Cultural
Diversity Graduation requirement.

Majors

Mays Business School
• Bachelor of Business Administration in Business Honors (p. 211)
• Bachelor of Science in University Studies, Business Concentration
  (p. 240)

Department of Accounting
• Bachelor of Business Administration in Accounting (p. 215)

Business Administration - Minor

Mays Business School offers a minor in Business Administration.

Students interested in pursuing a future MBA may find that when combined with appropriate statistics and economics coursework, the Mays minor in Business Administration provides the business foundation required by most MBA programs.

Program Requirements

The minor in business consists of six specific courses chosen to develop a foundational knowledge in the basic aspects of business, including accounting, finance, management information systems, management, and marketing.

The courses listed below constitute the 18 hours required for a minor in business.

<table>
<thead>
<tr>

</tr>
</tbody>
</table>

Total Semester Credit Hours: 18

1. MGMT 212 cannot be used to meet this requirement.
2. Course must be taken in residence at Texas A&M. No transfer courses will be accepted.

Students must earn a grade of "C" or better in each course listed above to be awarded the business minor and receive transcript recognition.

Business Honors - BBA

Selection through a separate application process is required to participate in Business Honors. Students apply to Business Honors as incoming freshmen or during the spring semester of their freshmen year. Both are competitive selection processes.

Bachelor of Business Administration

A Bachelor of Business Administration (BBA) in Business Honors is a degree available only to students admitted to Mays' Business Honors program. The Business Honors major is designed for students whose academic excellence is matched by strong character, leadership skills, and teamwork. The Business Honors major prepares students to begin careers in all fields or to continue on to a graduate program or professional school.

Students pursuing a BBA in Business Honors must maintain a cumulative GPA of 3.5 or higher. Students are required to complete a total of 30 hours of honors coursework plus an internship for credit. Other program requirements apply.

Business Honors majors work closely with an academic advisor to identify a set of courses to meet their academic goals. They may pursue a double major in Business Honors and one of the six other BBA majors (accounting, finance, management, management information systems, marketing and supply chain management).

Upper-level Entry Requirements and Application Procedures

Students who meet the University and college entrance requirements enter Mays Business School in the BUAD (lower-level business) classification. Enrollment of Mays Business School students in junior- and senior-level business courses is limited to those who have been admitted to upper-level (also referred to as upper division) in one of the seven majors (B.B.A.: accounting, business honors, finance,
management, management information systems, marketing, and supply chain management) in the college.

The B.B.A. (accounting, business honors, finance, management, management information systems, marketing, and supply chain management) upper-level entry requirements and application procedures are as follows:

1. To be admitted to an upper-level major, a student must be admitted to Mays Business School and must have:
   a. Satisfactorily completed the following five courses:
      - ACCT 229 Introductory Accounting 3
      - ECON 202 Principles of Economics 3
      - ECON 203 Principles of Economics 3
      - MATH 141 Business Mathematics I (or its equivalent) 3
      - MATH 142 Business Mathematics II (or its equivalent) 3
   b. BUAD students apply for upper level no later than the last class day of the semester before they expect to enter upper level. To enter upper level in the summer, all requirements must be completed by the beginning of the first summer session.
   c. Unless satisfactorily completed prior to upper-level entry, business students must successfully complete these three remaining lower-level Common Body of Knowledge (CBK) courses at Texas A&M during their first upper-level semester:
      - ACCT 230 Introductory Accounting 3
      - ISYS 210 Fundamentals of Information Systems 3
      - MGMT 211 Legal and Social Environment of Business 3
   d. Students are encouraged to complete the freshman and sophomore sequence of courses as listed under Curriculum in Business. BUAD students may pre-register for upper-level business courses in the semester for which they have applied for upper level. However, BUAD students who fail to complete upper-level requirements prior to the start of the semester shall not be permitted to remain registered in upper-level business classes.

2. Transfer students: Transfer students admitted to Mays Business School will be classified as BUAD (lower-level Business) students until they complete all requirements listed previously in item 1, at which time they may apply for admission to an upper-level major field of study. Transfer students may immediately apply for upper-level when admitted to Mays Business School if, and only if, they meet all upper-level requirements at that time.

3. Change of curriculum students: Texas A&M students who change curriculum into Mays Business School from another college or department at the University will be classified as BUAD (lower-level Business) students until they complete all requirements listed previously in item 1. Change of curriculum students who, when admitted to the business school, qualify to apply for admission to upper level may do so.

4. Preference for available seats in junior- and senior-level business courses will be given to students who have been admitted to a degree granting major in Mays Business School. All ineligible students who pre-register for upper-level business classes are subject to cancellation of their registration in these courses.

**Total Semester Credit Hours:** 54

1 Five of the nine Common Body of Knowledge classes listed must be taken as honors: ACCT 229, ACCT 230, FINC 341, ISYS 210, SCMT 303, SCMT 364, MGMT 211, MGMT 363, MKTG 321.

2 Elective courses are open to any course offered for University credit, except ACCT 209, ACCT 210, FINC 409, IBUS 301, ISYS 209, KINE 198, MGMT 209, MGMT 309, MKTG 409, SCMT 309. Additional restrictions may apply; see academic advisor for information. May be taken on a satisfactory/unsatisfactory basis.

3 Six hours required. A complete list of approved courses is available in the Undergraduate Program Office, Room 238, Wehner Building. In the BBA curricula, the 6 hours of approved international elective courses simultaneously fulfill the University’s International and Cultural Diversity Graduation requirement.

4 Any 300- or 400-level business elective selected in consultation with an academic advisor. At least one course must be designated as writing designated (W) or oral communication (C).

5 Must be taken as honors.

**Total Program Hours 120**

**Department of Accounting**

The accounting profession continues to be recognized as one of the world's leading professions and as one offering many opportunities for a challenging career. The major challenge confronting the accounting profession today is the continuous development of accounting and information systems that can be utilized by business firms operating in an increasingly complex global environment. Within this environment, businesses and government units are generating and utilizing information at an accelerating rate.

A degree in accounting provides the opportunity for entry into a career offering a variety of different and challenging paths. Many accounting graduates are employed by public accounting firms that provide assurance, tax and other services to all types of organizations. Other accounting graduates pursue careers with business firms and financial institutions, with all levels of government and as accounting educators. All of these careers provide an opportunity to earn the Certified Public Accountant (CPA) license and to serve society by maintaining the highest levels of integrity. The program listed in the following tables for the junior and senior years leads to the Bachelor in Business Administration (BBA) degree. This degree program provides the minimum credentials necessary for entry into most accounting careers. However, the BBA degree does not meet the requirements to sit for the CPA examination in Texas.

The American Institute of Certified Public Accountants (AICPA) recognizes the need for technically competent graduates entering the accounting profession. In response to the recommendations of the AICPA, other professional accounting organizations, and many professional accounting firms, the State of Texas requires candidates for the CPA certificate to have a minimum of 150 semester hours of college coursework, including at least 36 hours of accounting courses. As a consequence, highly motivated students are encouraged to give serious consideration to pursuing advanced studies at the graduate level to enhance their potential for a successful accounting career.

The Department of Accounting offers an integrated Professional Program that students enter during their junior year. The Professional Program offers a curriculum integrating undergraduate and graduate education. Graduates receive a BBA and a Master of Science degree (MS). This program offers opportunities for successful and motivated students to pursue academic coursework that challenges both their interests and abilities. The courses are taught by experienced faculty with superior teaching and professional credentials and are limited in class size.

The objectives of the Professional Program include developing sound conceptual, technical, analytical and communication skills that are required for success in the accounting profession. The program develops decision making and teamwork skills through extensive use of discussions and case studies. The program enables the student to select a specialization...
in assurance services/information management, information systems, financial management, marketing, entrepreneurship, or taxation. Each track offers the student an opportunity to participate in a professional accounting internship.

The department also offers a traditional Master’s Program (MS in Accounting) that students enter after completion of the Bachelor’s degree. For more details about the Professional Program or the Master’s Program, refer to the Texas A&M University Graduate and Professional Catalog or contact the director of the Professional Program in the Department of Accounting.

Accounting - BBA
Upper-level Entry Requirements and Application Procedures

Students who meet the University and college entrance requirements enter Mays Business School in the BUAD (lower-level business) classification. Enrollment of Mays Business School students in junior- and senior-level business courses is limited to those who have been admitted to upper-level (also referred to as upper division) in one of the seven majors (B.B.A.: accounting, business honors, finance, management, management information systems, marketing, and supply chain management) in the college.

The B.B.A. (accounting, business honors, finance, management, management information systems, marketing, and supply chain management) upper-level entry requirements and application procedures are as follows:

1. To be admitted to an upper-level major, a student must be admitted to Mays Business School and must have:
   a. Satisfactorily completed the following five courses:
      - ACCT 229 Introductory Accounting 3
      - ECON 202 Principles of Economics 3
      - ECON 203 Principles of Economics 3
      - MATH 141 Business Mathematics I (or its equivalent) 3
      - MATH 142 Business Mathematics II (or its equivalent) 3
   b. BUAD students apply for upper level no later than the last class day of the semester before they expect to enter upper level. To enter upper level in the summer, all requirements must be completed by the beginning of the first summer session.
   c. Unless satisfactorily completed prior to upper-level entry, business students must successfully complete these three remaining lower-level Common Body of Knowledge (CBK) courses at Texas A&M during their first upper-level semester:
      - ACCT 230 Introductory Accounting 3
      - ISYS 210 Fundamentals of Information Systems 3
      - MGMT 211 Legal and Social Environment of Business 3
   d. Students are encouraged to complete the freshman and sophomore sequence of courses as listed under Curriculum in Business. BUAD students may pre-register for upper-level business courses in the semester for which they have applied for upper level. However, BUAD students who fail to complete upper-level requirements prior to the start of the semester shall not be permitted to remain registered in upper-level business classes.

2. Transfer students: Transfer students admitted to Mays Business School will be classified as BUAD (lower-level Business) students until they complete all requirements listed previously in item 1, at which time they may apply for admission to an upper-level major field of study. Transfer students may immediately apply for upper-level when admitted to Mays Business School if, and only if, they meet all upper-level requirements at that time.

3. Change of curriculum students: Texas A&M students who change curriculum into Mays Business School from another college or department at the University will be classified as BUAD (lower-level Business) students until they complete all requirements listed previously in item 1. Change of curriculum students who, when
admitted to the business school, qualify to apply for admission to upper level may do so.

4. Preference for available seats in junior- and senior-level business courses will be given to students who have been admitted to a degree granting major in Mays Business School. All ineligible students who pre-register for upper-level business classes are subject to cancellation of their registration in these courses.

Management Information Systems: BUAD students intending to major in Management Information Systems must add ISYS 250 Business Programming Logic and Design (3 credits) to sophomore year curriculum in Business (lower level). The creative arts elective or a communication elective can be taken during the junior year.

Business Honors: BUAD students admitted to Business Honors must add (1) BUSN 125 Business Learning Community I (3 credits) to the freshman year curriculum and (2) BUSN 205 Integrated Worklife Competencies (3 credits) to the sophomore year curriculum in Business (lower level). The creative arts elective and a communication elective can be taken during the junior year.

Total Semester Credit Hours: 60

1. Six hours required. A complete list of approved courses is available in the Undergraduate Program Office, Room 238, Wehner Building. In the BBA curricula, the 6 hours of approved international elective courses simultaneously fulfill the University's International and Cultural Diversity Graduation requirement.

2. This course is an approved writing-designated (W) or oral communication (C) business course. See your academic advisor for additional information.

3. General elective courses are open to any course offered for University credit, except ACCT 209, ACCT 210, FINC 409, IBUS 301, ISYS 209, KINE 198, MGMT 209, MGMT 309, MKTG 409, SCMT 309. Additional restrictions may apply: see academic advisor for information. May be taken on a satisfactory/unsatisfactory basis.

No more than 33 hours of accounting courses may be applied toward the undergraduate degree.

See Department of Accounting advisors for more information on the requirements to sit for the CPA examination.

Professional Program students will follow the degree plan coordinated by the Professional Program office.

Professional Program students will substitute ACCT 321 to replace 2 hours of General electives.

**Energy Accounting - Certificate**

The Certificate in Energy Accounting offers Mays students seeking a BBA degree a chance to set themselves apart and find a place in an exciting, competitive industry that provides a wide variety of opportunities – including international experiences. This program is designed to give students high impact learning experiences related to the energy industry. All requirements for the program must be completed prior to graduation. A certificate program notation will be added to the official transcript upon graduation.

1. For a complete list of prescribed electives, please contact the Certificate in Energy Accounting coordinator.

**Department of Finance**

The business enterprise must raise capital, use it to maximum advantage, and reward investors. Finance is the set of management challenges (and career opportunities) concerned with succeeding at these tasks.

The finance major involves both required and elective courses in three areas. The area of **Corporate Finance** encompasses tools and techniques for valuing productive assets, choosing ways of funding them, and gauging financial success. In the area of **Investments**, theoretical and practical models help assess risks and rewards of stocks, bonds, derivatives, and other “financial assets” (individually and in portfolios), as well as the financial health of firms and institutions offering them to the investing public. The area of **Markets and Institutions** explores the ways in which bankers, brokers, and other financial institutions convert savings into productive capital.

Mays finance graduates with good academic records place well in all these areas, as well as in graduate and professional schools. They work in industry, on Wall Street, in major banking and consulting firms, and as wealth managers. Accordingly, the Department of Finance emphasizes scholarship in its faculty, professionalism in its programs, and innovation in its relationships with employers and mentors.

The Department of Finance offers three certificate programs for BBA business majors. Each program is designed to complement the student’s degree by providing a concentrated course of study and participation in experiential learning opportunities or internships in the selected area.

- Trading, Risk and Investments Certificate (p. 220)

**Finance - BBA**

**Upper-level Entry Requirements and Application Procedures**

Students who meet the University and college entrance requirements enter Mays Business School in the BUAD (lower-level business) classification. Enrollment of Mays Business School students in junior- and senior-level business courses is limited to those who have been admitted to upper-level (also referred to as upper division) in one of the seven majors (B.B.A.: accounting, business honors, finance, management, management information systems, marketing, and supply chain management) in the college.

The B.B.A. (accounting, business honors, finance, management, management information systems, marketing, and supply chain management) upper-level entry requirements and application procedures are as follows:

1. To be admitted to an upper-level major, a student must be admitted to Mays Business School and must have:
   a. Satisfactorily completed the following five courses:

      - ACCT 229 Introductory Accounting 3
      - ECON 202 Principles of Economics 3
      - ECON 203 Principles of Economics 3
      - MATH 141 Business Mathematics I (or its equivalent) 3
      - MATH 142 Business Mathematics II (or its equivalent) 3

   b. BUAD students apply for upper level no later than the last class day of the semester before they expect to enter upper level. To enter upper level in the summer, all requirements must be completed by the beginning of the first summer session.
c. Unless satisfactorily completed prior to upper-level entry, business students must successfully complete these three remaining lower-level Common Body of Knowledge (CBK) courses at Texas A&M during their first upper-level semester:

- ACCT 230 Introductory Accounting 3
- ISYS 210 Fundamentals of Information Systems 3
- MGMT 211 Legal and Social Environment of Business 3

d. Students are encouraged to complete the freshman and sophomore sequence of courses as listed under Curriculum in Business. BUAD students may pre-register for upper-level business courses in the semester for which they have applied for upper level. However, BUAD students who fail to complete upper-level requirements prior to the start of the semester shall not be permitted to remain registered in upper-level business classes.

2. Transfer students: Transfer students admitted to Mays Business School will be classified as BUAD (lower-level Business) students until they complete all requirements listed previously in item 1, at which time they may apply for admission to an upper-level major field of study. Transfer students may immediately apply for upper-level when admitted to Mays Business School if, and only if, they meet all upper-level requirements at that time.

3. Change of curriculum students: Texas A&M students who change curriculum into Mays Business School from another college or department at the University will be classified as BUAD (lower-level Business) students until they complete all requirements listed previously in item 1. Change of curriculum students who, when admitted to the business school, qualify to apply for admission to upper level may do so.

4. Preference for available seats in junior- and senior-level business courses will be given to students who have been admitted to a degree granting major in Mays Business School. All ineligible students who pre-register for upper-level business classes are subject to cancellation of their registration in these courses.

Department of Information and Operations Management

The Department of Information and Operations Management offers two undergraduate degrees: a BBA degree in Management Information Systems (MISY) and a BBA degree in Supply Chain Management (SCMT). In each degree program, students learn how to use technology to make businesses more efficient, effective, and competitive. Coursework includes both the technical and managerial aspects of MISY and SCMT to ensure that students are well-equipped for successful careers in the dynamic, global business environment.

A list of recommended courses for each degree is available from the Department of Information and Operations Management undergraduate advisors (Room 330, Wehner Building).

Majors

- Bachelor of Business Administration in Management Information Systems (p. 222)
- Bachelor of Business Administration in Supply Chain Management (p. 224)

Management Information Systems - BBA

The Management Information Systems major produces graduates who are both business analysts (i.e., professionals who understand accounting, marketing, finance, etc.) and information system specialists (i.e., professionals who can implement information systems strategies). Graduates of the program possess the business, technical, and leadership skills to meet the challenges presented by rapidly evolving information technology and the need to effectively incorporate this technology into business strategy and day-to-day operations.

Upper-level Entry Requirements and Application Procedures

Students who meet the University and college entrance requirements enter Mays Business School in the BUAD (lower-level business) classification. Enrollment of Mays Business School students in junior- and senior-level business courses is limited to those who have been admitted to upper-level (also referred to as upper division) in one of the seven majors (B.B.A.: accounting, business honors, finance, management, management information systems, marketing, and supply chain management) in the college.

The B.B.A. (accounting, business honors, finance, management information systems, marketing, and supply chain management) upper-level entry requirements and application procedures are as follows:

1. To be admitted to an upper-level major, a student must be admitted to Mays Business School and must have:
   a. Satisfactorily completed the following five courses:
      - ACCT 229 Introductory Accounting 3
      - ECON 202 Principles of Economics 3
      - ECON 203 Principles of Economics 3
      - MATH 141 Business Mathematics I (or its equivalent) 3
      - MATH 142 Business Mathematics II (or its equivalent) 3
   b. BUAD students apply for upper level no later than the last class day of the semester before they expect to enter upper level. To enter upper level in the summer, all requirements must be completed by the beginning of the first summer session.
   c. Unless satisfactorily completed prior to upper-level entry, business students must successfully complete these three remaining lower-level Common Body of Knowledge (CBK) courses at Texas A&M during their first upper-level semester:
      - ACCT 230 Introductory Accounting 3
      - ISYS 210 Fundamentals of Information Systems 3
      - MGMT 211 Legal and Social Environment of Business 3
   d. Students are encouraged to complete the freshman and sophomore sequence of courses as listed under Curriculum in Business. BUAD students may pre-register for upper-level business courses in the semester for which they have applied for upper level. However, BUAD students who fail to complete upper-level requirements prior to the start of the semester shall not be permitted to remain registered in upper-level business classes.

2. Transfer students: Transfer students admitted to Mays Business School will be classified as BUAD (lower-level Business) students until they complete all requirements listed previously in item 1, at which time they may apply for admission to an upper-level major field of study. Transfer students may immediately apply for upper-level when admitted to Mays Business School if, and only if, they meet all upper-level requirements at that time.

3. Change of curriculum students: Texas A&M students who change curriculum into Mays Business School from another college or department at the University will be classified as BUAD (lower-level Business) students until they complete all requirements listed previously in item 1. Change of curriculum students who, when
admitted to the business school, qualify to apply for admission to upper level may do so.

4. Preference for available seats in junior- and senior-level business courses will be given to students who have been admitted to a degree-granting major in Mays Business School. All ineligible students who pre-register for upper-level business classes are subject to cancellation of their registration in these courses.

Total Semester Credit Hours: 60

1. ISYS 281 and ISYS 481 are cross-listed courses. Students must take three semesters of ISYS 281/481 for a total of three credits.
2. This course is an approved writing-designated (W) or oral communication (C) business course. See your academic advisor for additional information.
3. A complete list of approved courses is available in the Undergraduate Program Office, 238 Wehner Building. The six required hours simultaneously fulfill the University’s International and Cultural Diversity Graduation requirement.
4. Select in consultation with an information and operations management academic advisor. A list of acceptable courses is available in the Undergraduate Program Office, Room 238, Wehner Building, or in the department academic advising office.
5. Elective courses are open to any course offered for University credit, except ACCT 209, ACCT 210, FINC 409, IBUS 301, ISYS 209, KINE 198, MGMT 209, MGMT 309, MKTG 409, SCMT 309. Additional restrictions may apply; see academic advisor for information. May be taken on a satisfactory/unsatisfactory basis.

Supply Chain Management - BBA

The Supply Chain Management major prepares students for careers in designing and managing the activities that deliver products and services to customers. Supply chain activities add direct value to the customer and leadership skills needed to meet the challenges of the rapidly evolving global marketplace.

Upper-level Entry Requirements and Application Procedures

Students who meet the University and college entrance requirements enter Mays Business School in the BUAD (lower-level business) classification. Enrollment of Mays Business School students in junior- and senior-level business courses is limited to those who have been admitted to upper-level (also referred to as upper division) in one of the seven majors (B.B.A.: accounting, business honors, finance, management, management information systems, marketing, and supply chain management) in the college.

The B.B.A. (accounting, business honors, finance, management, management information systems, marketing, and supply chain management) upper-level entry requirements and application procedures are as follows:

1. To be admitted to an upper-level major, a student must be admitted to Mays Business School and must have:
   a. Satisfactorily completed the following five courses:
      - ACCT 229 Introductory Accounting 3
      - ECON 202 Principles of Economics 3
      - ECON 203 Principles of Economics 3
      - MATH 141 Business Mathematics I (or its equivalent) 3
      - MATH 142 Business Mathematics II (or its equivalent) 3
   b. BUAD students apply for upper level no later than the last class day of the semester before they expect to enter upper level. To enter upper level in the summer, all requirements must be completed by the beginning of the first summer session.
   c. Unless satisfactorily completed prior to upper-level entry, business students must successfully complete these three remaining lower-level Common Body of Knowledge (CBK) courses at Texas A&M during their first upper-level semester:
      - ACCT 230 Introduction to Accounting 3
      - ISYS 210 Fundamentals of Information Systems 3
      - MGMT 211 Legal and Social Environment of Business 3
   d. Students are encouraged to complete the freshman and sophomore sequence of courses as listed under Curriculum in Business. BUAD students may pre-register for upper-level business courses in the semester for which they have applied for upper level. However, BUAD students who fail to complete upper-level requirements prior to the start of the semester shall not be permitted to remain registered in upper-level business classes.

2. Transfer students: Transfer students admitted to Mays Business School will be classified as BUAD (lower-level Business) students until they complete all requirements listed previously in item 1, at which time they may apply for admission to an upper-level major field of study. Transfer students may immediately apply for upper-level when admitted to Mays Business School if, and only if, they meet all upper-level requirements at that time.

3. Change of curriculum students: Texas A&M students who change curriculum into Mays Business School from another college or department at the University will be classified as BUAD (lower-level Business) students until they complete all requirements listed previously in item 1. Change of curriculum students who, when admitted to the business school, qualify to apply for admission to upper level may do so.

4. Preference for available seats in junior- and senior-level business courses will be given to students who have been admitted to a degree granting major in Mays Business School. All ineligible students who pre-register for upper-level business classes are subject to cancellation of their registration in these courses.

1. Elective courses are open to any course offered for University credit, except ACCT 209, ACCT 210, FINC 409, IBUS 301, ISYS 209, KINE 198, MGMT 209, MGMT 309, MKTG 409, SCMT 309. Additional restrictions may apply: see academic advisor for information. May be taken on a satisfactory/unsatisfactory basis.

2. Select in consultation with an information and operations management academic advisor. A list of acceptable courses is available in the Undergraduate Program Office, Room 238, Wehner Building, or in the department academic advising office.

Management Information Systems: BUAD students intending to major in Management Information Systems must add ISYS 250 Business Programming Logic and Design (3 credits) to sophomore year curriculum in Business (lower level). The creative arts elective or a communication elective can be taken during the junior year.

Business Honors: BUAD students admitted to Business Honors must add (1) BUSN 125 Business Learning Community I (3 credits) to the freshman year curriculum and (2) BUSN 205 Integrated Worklife Competencies (3 credits) to the sophomore year curriculum in Business (lower level). The creative arts elective and a communication elective can be taken during the junior year.
A complete list of approved courses is available in the Undergraduate Program Office, 238 Wehner Building. The six required hours simultaneously fulfill the University’s International and Cultural Diversity Graduation requirement.

This course is an approved writing-designated (W) or oral communication (C) business course. See your academic advisor for additional information.

Department of Management

The BBA in Management offers a broad range of career opportunities. A management student develops the ability to plan, organize, make decisions, communicate, and lead effectively in a variety of work settings. Written and verbal communication, teamwork, and problem solving are emphasized.

Through directed electives, students will focus their studies in one of the five following areas.

- **Consulting and General Management** - This track will appeal to students interested in problem-solving and helping individuals or organizations as they maneuver the business environment, whether the student anticipates working in the consulting industry or in any managerial role.

- **Entrepreneurial Leadership** - Designed for students interested in learning the entrepreneurial process, the role of creativity in identifying and/or developing entrepreneurial opportunities, the elements of a business plan, and the leadership practices associated with successful organizations.

- **Human Resource Management** - A career in human resources allows HR professionals to engage in the strategic management of an organization’s human capital. HR professionals develop and implement workplace policies and initiatives regarding employee recruiting, selection, compensation, training & development, performance management, career planning, and employee & labor relations.

- **Nonprofit Management** - For students seeking to invest themselves in a mission beyond profit-making and into the realm of social change for charitable, educational, religious, scientific, and other “public good” causes and organizations.

- **Pre-Law** - This track will expose students to opportunities that combine law and business, and could include careers in corporate law, international affairs, public policy, and conflict resolution, to name a few. Many students in this track will pursue a law or other advanced degree.

Combining theory and application both inside and outside the classroom allows the student to obtain the knowledge and competencies sought by and readily applied in organizations such as consulting firms, Fortune 500 companies, retail and services industries, nonprofit and charitable entities, governmental agencies, new ventures, and family businesses.

The Management major allows the student to select from a variety of jobs, organizations and industries. It also provides a solid foundation for pursuing graduate studies in business, law, and a variety of other disciplines.

**Upper-level Entry Requirements and Application Procedures**

Students who meet the University and college entrance requirements enter Mays Business School in the BUAD (lower-level business) classification. Enrollment of Mays Business School students in junior- and senior-level business courses is limited to those who have been admitted to upper-level (also referred to as upper division) in one of the seven majors (B.B.A.: accounting, business honors, finance, management, management information systems, marketing, and supply chain management) in the college.

The B.B.A. (accounting, business honors, finance, management, management information systems, marketing, and supply chain management) upper-level entry requirements and application procedures are as follows:

1. To be admitted to an upper-level major, a student must be admitted to Mays Business School and must have:
   a. Satisfactorily completed the following five courses:
      
      | Course       | Title                        | Credits |
      |--------------|------------------------------|---------|
      | ACCT 229     | Introductory Accounting      | 3       |
      | ECON 202     | Principles of Economics      | 3       |
      | ECON 203     | Principles of Economics      | 3       |
      | MATH 141     | Business Mathematics I (or its equivalent) | 3   |
      | MATH 142     | Business Mathematics II (or its equivalent) | 3   |
   b. BUAD students apply for upper level no later than the last class day of the semester before they expect to enter upper level. To enter upper level in the summer, all requirements must be completed by the beginning of the first summer session.
   c. Unless satisfactorily completed prior to upper-level entry, business students must successfully complete these three remaining lower-level Common Body of Knowledge (CBK) courses at Texas A&M during their first upper-level semester:
2. Transfer students: Transfer students admitted to Mays Business School will be classified as BUAD (lower-level Business) students until they complete all requirements listed previously in item 1, at which time they may apply for admission to an upper-level major field of study. Transfer students may immediately apply for upper-level when admitted to Mays Business School if, and only if, they meet all upper-level requirements at that time.

3. Change of curriculum students: Texas A&M students who change curriculum into Mays Business School from another college or department at the University will be classified as BUAD (lower-level Business) students until they complete all requirements listed previously in item 1. Change of curriculum students who, when admitted to the business school, qualify to apply for admission to upper level may do so.

4. Preference for available seats in junior- and senior-level business courses will be given to students who have been admitted to a degree granting major in Mays Business School. All ineligible students who pre-register for upper-level business classes are subject to cancellation of their registration in these courses.

Entreprenurial Leadership - Certificate

The Certificate in Entrepreneurial Leadership offers Mays Business School students seeking a BBA or BS (Agribusiness) degree the opportunity to study entrepreneurship in a focused set of courses. Students who pursue the certificate program must complete all requirements prior to graduation.

Designed to develop competencies needed to successfully create and manage new ventures or to be a driver of innovation within existing enterprises, emphasis is placed on leadership in three areas: conceiving, exploiting, and managing opportunities. Graduates of this program are provided with the tools to plan for new business start-ups, to become leaders in high growth firms, or to become corporate "intrapreneurs" capable of improving an organization’s ability to innovate.

Department of Marketing

Marketing involves developing goods and services to satisfy customers’ needs and then making them available at the right places, at the right times and at competitive prices. Marketing also provides information to help customers decide whether specific goods and services will meet their needs.

Recent changes in social and economic systems have created new challenges for marketing professionals. Increasingly, they must focus on both domestic and global opportunities and the explosive changes that new technology brings. They must also be continually responsive to cultural differences, quality concerns and ethical issues.

A career path in marketing typically begins in an entry-level position in advertising, retailing, marketing analytics, marketing consulting, or professional selling. Opportunities are available in manufacturing, wholesale and retail, as well as nonprofit organizations such as universities, government agencies, relief agencies and charitable organizations.

Success in marketing requires understanding a number of fundamental concepts, principles, theories, tools and techniques. Courses are designed to help students acquire this knowledge and to develop competencies needed throughout a marketing career.
Marketing Certifications
The Department of Marketing offers three certificate programs for BBA business and BS–Agribusiness majors. Each program is designed to complement the student’s degree by providing a concentrated course of study, participation in a designated student organization or competition, and an internship in the selected area.

Marketing Academic Advising
Academic advising and career guidance for upper division marketing majors is available in the Department of Marketing office, Suite 220 Wehner Building, (979) 845-2309.

Marketing - BBA

Upper-level Entry Requirements and Application Procedures

Students who meet the University and college entrance requirements enter Mays Business School in the BUAD (lower-level business) classification. Enrollment of Mays Business School students in junior- and senior-level business courses is limited to those who have been admitted to upper-level (also referred to as upper division) in one of the seven majors (B.B.A.: accounting, business honors, finance, management, management information systems, marketing, and supply chain management) in the college.

The B.B.A. (accounting, business honors, finance, management, management information systems, marketing, and supply chain management) upper-level entry requirements and application procedures are as follows:

1. To be admitted to an upper-level major, a student must be admitted to Mays Business School and must have:
   a. Satisfactorily completed the following five courses:
      - ACCT 229 Introductory Accounting 3
      - ECON 202 Principles of Economics 3
      - ECON 203 Principles of Economics 3
      - MATH 141 Business Mathematics I (or its equivalent) 3
      - MATH 142 Business Mathematics II (or its equivalent) 3
   b. BUAD students apply for upper level no later than the last class day of the semester before they expect to enter upper level.
      To enter upper level in the summer, all requirements must be completed by the beginning of the first summer session.
   c. Unless satisfactorily completed prior to upper-level entry, business students must successfully complete these three remaining lower-level Common Body of Knowledge (CBK) courses at Texas A&M during their first upper-level semester:
      - ACCT 230 Introductory Accounting 3
      - ISYS 210 Fundamentals of Information Systems 3
      - MGMT 211 Legal and Social Environment of Business 3
   Students are encouraged to complete the freshman and sophomore sequence of courses as listed under Curriculum in Business. BUAD students may pre-register for upper-level business courses in the semester for which they have applied for upper level. However, BUAD students who fail to complete upper-level requirements prior to the start of the semester shall not be permitted to remain registered in upper-level business classes.

2. Transfer students: Transfer students admitted to Mays Business School will be classified as BUAD (lower-level Business) students until they complete all requirements listed previously in Item 1, at which time they may apply for admission to an upper-level major field of study. Transfer students may immediately apply for upper-level when admitted to Mays Business School if, and only if, they meet all upper-level requirements at that time.

3. Change of curriculum students: Texas A&M students who change curriculum into Mays Business School from another college or department at the University will be classified as BUAD (lower-level Business) students until they complete all requirements listed previously in item 1. Change of curriculum students who, when admitted to the business school, qualify to apply for admission to upper level may do so.

4. Preference for available seats in junior- and senior-level business courses will be given to students who have been admitted to a degree granting major in Mays Business School. All ineligible students who pre-register for upper-level business classes are subject to cancellation of their registration in these courses.

1  Elective courses are open to any course offered for University credit, except ACCT 209, ACCT 210, FINC 409, IBUS 301, ISYS 209, KINE 198, MGMT 209, MGMT 309, MKTG 409, SCMT 309. Additional restrictions may apply: see academic advisor for information. May be taken on a satisfactory/unsatisfactory basis.

2  This course is an approved writing-designated (W) or oral communication (C) business course. See your academic advisor for additional information.

3  MKTG majors select a directed elective track and take courses as indicated from the chosen track.

4  Six hours required. A complete list of approved courses is available in the Undergraduate Program Office, 238 Wehner Building. The six hours of approved international elective courses simultaneously fulfills the University's International and Cultural Diversity Graduation requirement.

5  Any MKTG course (except required MKTG courses and MKTG 409) and IBUS 401-IBUS 403 (p. 832). A maximum of 6 hours of MKTG 402/IBUS 402, MKTG 403/IBUS 403, MKTG 484, MKTG 485, BUSN 392 may be used.

Marketing - BBA, Professional Selling and Sales Management Track

Students who are looking to expand their communication and relationship building skills should consider Professional Selling and Sales Management track. Students in this program will take four sales-related directed electives that provide real world scenarios and role-plays which help them build skills that are critical for a successful career in sales and marketing. Upon graduating in the sales track, students will have enhanced their interpersonal communication skills in a business environment which gives them a distinct advantage in the job market regardless of the planned career path.

Marketing - BBA, Advertising Strategy Track

The Department of Marketing offers students interested in advertising several opportunities for building skills specific to that career, and for networking with advertising professionals. In addition to taking advertising courses, students can attend professional conferences, participate in local, regional, and national advertising campaign competitions, and tour top advertising agencies.

The Advertising Strategy track supplements their degree by tailoring directed elective courses and building specific advertising skills. It also provides recruiters a means of identifying top students interested in advertising.

Students who complete the Advertising Strategy track are well-prepared for careers in advertising account services or brand management, or they may choose to specialize in related areas such as media planning, social and digital media, or public relations.

1 Elective courses are open to any course offered for University credit, except ACCT 209, ACCT 210, FINC 409, IBUS 301, ISYS 209, KINE 198, MGMT 209, MGMT 309, MKTG 409, SCMT 309. Additional restrictions may apply: see academic advisor for information. May be taken on a satisfactory/unsatisfactory basis.

2 This course is an approved writing-designated (W) or oral communication (C) business course. See your academic advisor for additional information.

3 Twelve hours required. Select from MKTG 345, MKTG 347, MKTG 445, MKTG 447 and MKTG 442.

4 Six hours required. A complete list of approved courses is available in the Undergraduate Program Office, 238 Wehner Building. The six hours of approved international elective courses simultaneously fulfill the University’s International and Cultural Diversity Graduation requirement.

5 Six hours required. Any MKTG course (except required MKTG courses and MKTG 409) and IBUS 401-IBUS 403 (p. 832). A maximum of 6 hours of MKTG 402/IBUS 402, MKTG 403/IBUS 403, MKTG 484, MKTG 485, BUSN 392 may be used.

Marketing - BBA, Retail Buying and Management Track

The Center for Retailing Studies is a nationally known and respected center that is part of the Department of Marketing in Mays Business School at Texas A&M University. The Center is a bridge between the academic and business community, and serves students, faculty, and partner firms in a variety of ways, one of which is the Retail Buying and Management track of the BBA in Marketing.

The Retail Buying and Management track requires four retailing related directed electives. Graduates who complete this track are well equipped for exciting careers in management, merchandising, retail financial planning, and marketing. Completion of the program provides tangible evidence of commitment to and expertise in retailing.

### Advertising Strategy - Certificate

The Department of Marketing offer students interested in advertising several opportunities for building skills specific to that career, and for networking with advertising professionals. In addition to taking advertising courses students can attend professional conferences, participate in local, regional, and national advertising campaign competitions, and tour top advertising agencies.

Of particular interest to students is the Certificate in Advertising, which supplements their degree by providing an opportunity to tailor elective course offerings and build specific advertising skills. It also provides recruiters a means of identifying top students interested in advertising. Students who earn the Certificate in Advertising are well-prepared for careers in advertising account services or brand management, or they may choose to specialize in related areas such as media planning, social and digital media, or public relations.

Open to all business majors, the Certificate in Advertising requires three approved advertising related classes, an internship, and active participation in the Aggie Advertising Club. For more information, contact...
Dr. Lisa Troy at ltroy@mays.tamu.edu or Hannah Cole, marketing academic advisor, at hcole@mays.tamu.edu.

Program Requirements

Requirements include 12 hours of specific coursework, completion of an internship, and 2 semesters in the Aggie Advertising Club.

Required Courses 12

Select four of the following:

- MKTG 345 Social Media and Public Relations
- MKTG 347 Advertising and Creative Marketing Communications
- MKTG 442 Innovation and Product Management
- MKTG 445 Account Planning and Research
- MKTG 447 Advanced Advertising: Case Competition

An internship in the advertising industry is required. The internship must be for a minimum of 300 hours over 15 weeks or fewer. Academic credit is not required for the internship. However, no more than 20% of work can be clerical or unrelated to the development of professional skills in marketing. The internship must offer meaningful, professional-level learning in areas of sales, advertising, retailing, sports marketing, event planning, or communication. The internship student must comply with all company regulations, health and safety conditions, and legal requirements.

Internship objectives:

- Apply academic knowledge in a supervised work environment
- Build contacts
- Develop professional competencies
- Increase understanding of marketing career paths

Active participation in the associated student organization, Aggie Advertising Club, is required. Participation points are earned through various programs and are verified by the organization advisor. Financial aid is available by application through the Department of Marketing.

Students must complete the 12 hours of specific coursework and earn a grade of 'B' or better in each certificate course, as well as have a minimum cumulative GPA of 3.0 by graduation.

Analytics and Consulting - Certificate

The Certificate in Analytics and Consulting complements the student’s degree and provides tangible evidence of rigorous academic and experiential preparation for a career in analytics or consulting. Students who earn this certificate can work in Marketing Analytics or Consulting positions for Marketing, Information Systems, or Organizational Structure.

The curriculum emphasizes Marketing Analytics and Marketing Consulting as well as a consulting project in Corporate Social Responsibility. The required internship teaches lessons the classroom cannot.

Through the American Marketing Association students refine professional skills including networking, leadership, and career preparation. The certificate is open to all BBA business majors and requires 12 hours of coursework, an internship, and active participation in the American Marketing Association’s student organization at Texas A&M. For more information, contact Hannah Cole, marketing academic advisor, at hcole@mays.tamu.edu.

Program Requirements

Requirements include 12 hours of specific coursework, completion of an internship, and 2 semesters in the American Marketing Association.

Required Courses 9

- MKTG 430 Marketing Consulting

University Studies Programs

Mays Business School offers a degree in University Studies with a concentration in business. A University Studies degree differs from a traditional major in that it consists of a concentration and two minors of 15-18 hours each. The University Studies degree format was created to provide students the flexibility to combine areas of study that are of special interest.

Majors

• Bachelor of Science in University Studies, Business Concentration (p. 240)

University Studies - BS, Business Concentration

The Bachelor of Science is offered in University Studies by Texas A&M University. The University Studies-Business degree consists of a 24 hour business concentration and two minors of 15-18 hours each. The degree program allows a student to tailor his or her undergraduate work to align with future personal and career objectives.

The business concentration encompasses a foundational knowledge in the basic aspects of business including accounting, finance, management, management information systems, marketing and supply chain management.

Careers pursued by University Studies-Business graduates include financial advisor, account manager, marketing coordinator, sales representative, web developer, public relations specialist, consultant, and human resource specialist.

Specific requirements, course offerings, and restrictions exist for the University Studies-Business degree.

1 The student is encouraged to identify minors that complement the business concentration and reflect the student’s individual interests and strengths. The two minors must be completed outside of Mays Business School.

2 Enrollment of University Studies majors in courses offered at Mays Business School is limited to the required business concentration courses plus the following courses to be used as electives: ACCT 210, BUSN 302, BUSN 403, FINC 201 and MGMT 212.
Texas A&M Baylor College of Dentistry

Administrative Officers
Dean - Lawrence E. Wolinsky, Ph.D., D.M.D.
Associate Dean, Academic Affairs - Charles W. Berry, Ph.D.
Associate Dean, Research and Graduate Studies - Larry L. Bellinger, Ph.D.
Executive Director, Facilities Services and Planning - Dale A. Christensen, M.B.A.
Associate Dean, Student Affairs - Jack L. Long, D.D.S.
Associate Dean, Clinical Affairs - Dean A. Hudson, D.D.S.
Executive Director, Communications, Institutional Advancement and Alumni Affairs - Susan Mitchell Jackson, M.A.
Associate Dean, Finance and Administration - Juanna S. Moore, C.P.A.
Executive Director, Institutional Research - Eric S. Solomon, D.D.S.

General Statement
The Baylor College of Dentistry has been a distinguished resource for dental education in Texas for more than 100 years and is dedicated to combining higher education and research with community service.

Known internationally for producing excellent clinicians, the college opened in 1905. Since then, it has graduated more than 8,000 dentists and dental hygienists. Nearly one-third of all dentists in Texas are Baylor College of Dentistry graduates. The college also graduates a large number of dental hygienists with bachelor's degrees in the state. In addition to a doctor of dental surgery and bachelor's degree in dental hygiene, postdoctoral certificate and degree programs are offered.

Today, the college works toward innovative treatments, leading-edge technology and better ways to deliver care. It not only ensures that Texas has qualified generations of dentists, dental hygienists and scientists, but also provides care for patients who have no other access to oral health care.

Location
The Baylor College of Dentistry is located in Dallas, Texas, adjacent to the rapidly expanding Baylor University Medical Center. The Dallas-Fort Worth metroplex is an area noted for the vigor, optimism and friendliness of its population. The ever-changing skyline reflects the continuing growth of the area.

Opportunities for educational, cultural and religious enrichment are numerous. Within a 100-mile radius of Dallas are more than 40 colleges and universities. Dallas has professional theater, opera, symphony and dance companies. Among the many museums and galleries in the area, the Dallas Museum of Art has received international acclaim for both its design and its exhibits.

For sports enthusiasts, Dallas has professional and college football, basketball, baseball, hockey and soccer teams. The metroplex annually hosts competitions in golf, tennis, bowling, soccer and running that attract many of the world's best athletes. Numerous lakes and parks provide recreational opportunities for boating, fishing, swimming, jogging, biking and horseback riding.

Dallas is served by a variety of transportation modes, including several interstate highways, the Amtrak rail system and the Dallas Area Rapid Transit system. The Dallas/Fort Worth International Airport, with many major and feeder airline connections, is one of the busiest air terminals in the nation. Airline connections also can be made at nearby Love Field, which is a 20-minute car ride from the college.

The Baylor College of Dentistry is centrally located in the city of Dallas, about one mile east of the downtown business district. This is an area where restored historic homes and varied types of new construction create diverse neighborhoods. The Texas State Fairgrounds and the downtown arts district, with its world-class performance halls and art museum, help make this part of Dallas an exciting place to live and work. Living accommodations are located as close as one block from the campus.

Caruth School of Dental Hygiene

The Caruth School of Dental Hygiene is an integral part of the Baylor College of Dentistry. The dental hygiene school was equipped in 1954 through a generous gift from the Caruth Foundation of Dallas and W.W. Caruth, Jr., in honor of W.W. Caruth, Sr., a pioneer Texas philanthropist.

The first dental hygiene students were accepted in fall 1955. At that time, there was no requirement for previous college experience. In 1964, the Caruth School of Dental Hygiene established prerequisite courses prior to professional study. During the same year, the Bachelor of Science degree was offered in addition to the traditional certificate program. All graduates since 1973 have received the degree of Bachelor of Science in Dental Hygiene. In 1997, the Master of Science degree was added.

Purpose

The purpose of the Caruth School of Dental Hygiene is to educate preventive oral health professionals, eligible for licensure as dental hygienists, who are capable of providing educational, clinical and therapeutic services that support total health through the promotion of optimal oral health.

Opportunities

The services of a dental hygienist are offered in private dental practices and clinics, public health agencies, school systems, hospitals, nursing homes and corporate health facilities. Dental hygienists also teach in dental and dental hygiene programs and participate in health research. The baccalaureate degree offered through the Caruth School of Dental Hygiene by Baylor College of Dentistry satisfies the educational requirement for eligibility for state licensure. Graduates are provided with diverse experiences to prepare for a variety of employment settings and to pursue graduate education. A Master of Science in Education for Healthcare Professionals with a focus in dental hygiene is also offered.

Faculty

Dewald, Janice P, Professor
Dental Hygiene
DDS, University of Iowa, 1980

Kading, Cherri L, Assistant Professor
Dental Hygiene

Dental Hygiene - BS

Length: 2 years
General Admissions Requirements: 60 semester hours college coursework including core courses for BS degree
Application Deadline: January 5 of the year of anticipated entrance into the program.
Start Term: Fall
Specialization, Program of Study: Dental Hygiene
Degree: BS

Program Requirements

Coursework totaling 60 semester credit hours, including core courses for BS degree.

Third Year

Fall
DDHS 3110 Introduction To Dentistry 1
DDHS 3120 Dental Anatomy 2
DDHS 3160 Preclinical Dental Hygiene 6
DDHS 3220 Oral Radiology 5
DDHS 3250 Biomedical Sciences I 5
DDHS 3425 Health Promotion and Disease Prevention 2.5

Term Semester Credit Hours 16.5

Spring
DDHS 3020 Theory of Dental Hygiene Practice I 2
DDHS 3220 Oral Radiology 2
DDHS 3340 Biomedical Sciences II 4
DDHS 3310 Health Education and Behavioral Science 1
DDHS 3410 Introduction to Pathology 1
DDHS 3325 Microbiology 2.5
DDHS 3530 Applied Dental Materials 3
DDHS 3830 Clinical Dental Hygiene I 3

Term Semester Credit Hours 18.5

Summer
DDHS 4110 Medical Emergencies 1
DDHS 4220 Comprehensive Care Seminar 1 2
DDHS 4310 Oral Radiography 1
DDHS 4510 Pediatric Dentistry 1
DDHS 4820 Clinical Dental Hygiene II 2

Term Semester Credit Hours 7

Fourth Year

Fall
DDHS 4015 Pharmacology 1.5
DDHS 4025 Oral Pathology 2.5
DDHS 4110 Medical Emergencies 1

1 Scheduled by course director
College of Education and Human Development

Administrative Officers

Dean - Joyce M. Alexander, Ph.D.

Executive Associate Dean for Faculty Affairs - Mary Alfred, Ph.D.

Associate Dean for Academic Affairs and Research - George B. Cunningham, Ph.D.

Assistant Dean for Finance and Administration - Becky Carr, Ph.D.

Assistant Dean for Undergraduate Academic Affairs - R. Christopher Cherry, Ph.D.

Assistant Dean for Organizational Development and Diversity Initiatives - Nancy T. Watson, Ph.D.

General Statement

Within Texas A&M University, the College of Education and Human Development plays a proactive role in shaping the state and national educational agenda. To this end, programs in the College of Education and Human Development attempt to:

1. develop thinking professionals whose research adds to the store of knowledge regarding teaching and learning,
2. produce exemplary teachers and administrators to serve in school systems of the state and nation, and
3. assist Texas and the nation in using up-to-date knowledge to improve educational practice in diverse settings.

In summary, the College of Education and Human Development has three key functions: research, teaching and service.

Production of knowledge is central to the College of Education and Human Development’s research role. The College of Education and Human Development supports both basic and applied research activities. Of particular interest is the effort to translate research findings into models and prescriptions that will result in substantive educational and health improvement in field settings.

In discharging its teaching function, the College of Education and Human Development seeks to prepare highly qualified professionals for a wide variety of professional settings. Teacher preparation programs are particularly committed to providing students with the ability to use sophisticated technologies in their instructional repertoires.

Service to the state and nation through teaching, supervising and assisting schools, state agencies, other institutions of higher education, and businesses and industries is a strong commitment of the College of Education and Human Development. Increasingly, these service efforts build on new knowledge generated through the College of Education and Human Development’s research activities.

The College of Education and Human Development is responsible for managing programs for the preparation of certified school personnel. Other programs in the college prepare students for specific human service roles in the private sector and within state and community agencies. College of Education and Human Development majors include interdisciplinary studies (certification) EC-6, middle school, bilingual and special education; technology management and human resource development; health (including school health education); community health; kinesiology (including physical education certification); and sport management. Students seeking middle school certification also have a choice of majoring in English (offered through the College of Liberal Arts). Students interested in any elementary, middle school or secondary certification programs are responsible for meeting with an advisor in the Department of Teaching, Learning and Culture’s Office of Undergraduate Advising. Advisors have available specific information regarding all program options.

Students seeking secondary certification in areas other than health or kinesiology must major in an academic discipline offered through the appropriate college. Professional education courses for secondary certification are offered by the College of Education and Human Development. Students interested in secondary certification must report to an advisor in the Department of Teaching, Learning and Culture’s Office of Undergraduate Advising to access additional information about the multiple routes to secondary certification at the post-baccalaureate level.

Teaching fields, specialization areas and endorsements/delivery systems may be chosen from the following:

- Agricultural Science
- Bilingual (EC-6)
- Chemistry
- Computer Science
- Early Childhood
- English Language Arts and Reading
- English as a Second Language
- Health (EC-12)
- History
- Kinesiology (EC-12)
- Languages other than English (Spanish, French, German, Latin, Chinese)
- Life Science
- Mathematics
- Middle School English/Language Arts and Reading
- Middle School Science/Mathematics
- Middle School Social Studies/English
- Language Arts and Reading
- Physical Science
- Science
- Social Studies
- Special Education
- Speech

The College of Education and Human Development carries out its mission of research, teaching and service through the following departments: Educational Administration and Human Resource Development, Educational Psychology, Health and Kinesiology, and Teaching, Learning and Culture. Other contributing entities include Agricultural Education, the Center for Mathematics, Science and Technology Education, and the Counseling and Assessment Clinic. Detailed descriptions of College of Education and Human Development departments are provided on the following pages. The College of Education and Human Development is required by Federal policy to make available the summary report of students’ scores on the TExES examination. This information is available...
from the Associate Dean for Academic Affairs in the College of Education and Human Development.

**General Requirements for Admission to Professional Programs**

The programs of study in the College of Education and Human Development are composed of two phases—the pre-professional phase and the professional phase. The pre-professional phase consists of basic University Core Curriculum requirements and introductory courses to the major field of study. The professional phase consists of advanced work in the major field of study, courses in the professional underlying disciplines and professional studies courses.

Upon entering the College of Education and Human Development, students are assigned a general College of Education and Human Development major that tracks the pre-professional phase of their chosen program. To advance to the professional phase of the chosen program and to be accepted into the professional major, students must meet the program entry requirements and be accepted by the program faculty. Students are responsible for contacting the departmental advisors to obtain information about specific requirements for their major and program areas.

**Requirements for Admission to the Professional Phase of Teacher Education Programs**

The State of Texas establishes standards for teacher education programs. All certification programs at Texas A&M are in compliance with these requirements. Students must meet state, University, College of Education and Human Development and department/program requirements for matriculation into a teacher education program. Students are responsible for contacting the departmental advisors to obtain information about specific requirements for their major and program areas.

**Teacher Education Retention Policy**

A student, after being admitted to teacher education, who fails to continue to meet all requirements, will be dropped from the program and may not continue in or register for any professional teacher education course. Any student removed from or who discontinues student teaching because of unsatisfactory performance will be dropped from the teacher education program. A student dropped from the teacher education program may apply through their respective department for readmission to the teacher education program.

**Requirements for Admission to Student Teaching**

Students are responsible for contacting the departmental advisors to obtain information about specific requirements for their major and program areas.

**NOTE:** As several of the College of Education and Human Development’s teacher education programs are undergoing change and are pending approval, the programs offered, admission to professional programs, admission to professional phase of teacher education, retention policy, and requirements for admission to student teaching are subject to change. Students should check with advisors in the appropriate departments to receive the most current policies and procedures.

**Requirements for Admission to the Professional Phase of Non-Certification Programs**

The following requirements must be met by students seeking admission to the professional phase of non-certification programs.

1. An approved degree plan and application for admission to the professional phase of non-certification programs.
2. Minimum GPR as stated in program requirements available from departmental advisor.
3. Satisfy the English proficiency requirement as stated in program requirements available from departmental advisor.
4. Pass the THEA, ACCUPLACER, ASSET or COMPASS test or show proof of exemption from the test with appropriate STAAR, SAT or ACT scores.
5. Have sophomore or junior classification with a minimum of 15 semester credit hours at Texas A&M, and completion of University Core Curriculum requirements applicable to the respective degree program.
6. Admission to professional phase of some programs may be competitive. See departmental advisor.
7. Students must meet departmental criteria before acceptance into an approved internship. See departmental advisor.

**International and Cultural Diversity Requirement**

Texas A&M University requires its students to meet an International and Cultural Diversity requirement as part of the Graduation requirements. Meeting this requirement will require the careful selection of courses. The student is directed to the Requirements for a Baccalaureate Degree (p. 24) section of this catalog for detailed information regarding this requirement and also is encouraged to seek the advice of the student's academic advisor.

**Curriculum in Agricultural Science**

(Teaching Option)

The Agricultural Science curriculum is designed to offer the student a combination of courses in scientific agriculture and in professional education that will meet requirements for employment and advanced study in different careers in which the emphasis is on formal and informal programs of education. Such careers may include teaching agricultural science in high schools, area career and technology schools and community colleges; working as an agricultural extension agent; working as an agricultural representative for a marketing agency, an agricultural supply company or other industries related to agriculture; and serving as an agricultural development specialist in an international program.

A student majoring in agricultural science will be counseled by an advisor in the Department of Agricultural Leadership, Education, and Communications to ensure that the program developed with the student will satisfy his or her unique interests, needs and professional aspirations. A combination of courses in scientific agriculture, education and general studies provides students with a knowledge of scientific agriculture and the ability to work with and influence people. Flexibility in course selection allows a student to place emphasis on a particular field of agriculture or to prepare broadly in agricultural studies. This flexibility might prepare
a student to teach in a particular school setting, focusing upon a certain
curriculum (e.g., horticulture, animal science and agricultural business).

Many aspects of the practice of agriculture are learned through
experience. Enrollment in high school agricultural science and participation
in FFA and/or 4-H are encouraged and recommended.

A student following this curriculum may be eligible to enter public schools
as a teacher of agricultural science under the Texas Education Agency.
Off-campus student teaching is required.

For further information, see the section on Agricultural Science under the
College of Agriculture and Life Sciences. The Department of Agricultural
Leadership, Education, and Communications administers the program in
Agricultural Science.

**Majors**

**Department of Educational Administration
and Human Resource Development**
- Bachelor of Science in Human Resource Development (p. 249)
- Bachelor of Science in Technology Management (p. 250)

**Department of Educational Psychology**

Department of Educational Administration and Human Resource Development

The Department of Educational Administration and Human Resource Development prepares people for many professional careers associated with the broad fields of corporate education. The Bachelor of Science in Human Resource Development and the Bachelor of Science in Technology Management are designed to encourage students to achieve a bachelor’s degree and to enter the profession in their area of specialty. The programs prepare graduates to assume responsibility for enhancing technology, developing workplace competence and strengthening student achievement in their career paths.

### Majors
- Bachelor of Science in Human Resource Development (p. 249)
- Bachelor of Science in Technology Management (p. 250)

### Minors
- Human Resource Development Minor (p. 251)

### Human Resource Development - BS

The curricula for Human Resource Development provides students with the content and course sequence to enter the workforce in either education, business or industry. The program stresses application in real settings as well as strong foundations in knowledge, and has strong field-based components. The following courses have been combined to give students a well-rounded foundation in the roles and responsibilities in education and business settings.

**Total Semester Credit Hours:** 120

1. To be chosen in consultation with academic advisor, if necessary
2. Writing or Communication Intensive course requirement
3. Professional Phase.
4. Online course offered

Students must have completed 60 hours to register for 300/400-level courses.

Six hours of International and Cultural Diversity (p. 34) are required. Selection must be from courses on the approved list. Selection can...
be courses that also satisfy the requirement for social and behavioral sciences, creative arts, language, philosophy and culture, or electives.

Foreign Language Requirement - 2 years same foreign language in high school OR 1 full year (2 semesters) of same foreign language in college.

## Technology Management - BS

The curricula for Technology Management provides students with the content and course sequence to enter the workforce in either education, business or industry. The program stresses application in real settings as well as strong foundations in knowledge and has strong field-based components. The courses have been combined to give students a well-rounded foundation in the roles and responsibilities in education and business settings.

1. To be selected from University Core Curriculum.
2. To be chosen in consultation with academic advisor, if necessary.
3. Writing or Communication Intensive course requirement.
4. Professional Phase.
5. Online course offered.

Students must have completed 60 hours to register for 300- to 400-level courses.

Six hours of international and cultural diversity are required. Selection must be from courses on the approved list. Selection can be courses that also satisfy the requirement for social and behavioral sciences, creative arts, language, philosophy and culture, or electives.
Foreign Language Requirement - two years same foreign language in high school OR one full year (two semesters) of same foreign language in college.

Human Resource Development - Minor

Human Resource Development (HRD) is the process of improving learning and performance in individual, group and organization contexts through domains of expertise such as lifelong learning, career development, training and development, and organization development. A minor in HRD allows for a wider range of potential employment and accommodation to a diverse education professional experience.

Students must submit an application for admission during the following periods:

• Summer/Fall - January 13 through March 10
• Fall Semester - May 15 through June 10
• Spring Semester - September 1 through October 10

Total Semester Credit Hours: 18

¹ EHRD 203 required with a grade of C or better.
² Writing or Communication Intensive course.

Students must make a grade of C or better.

Students must have completed 60 hours to register for 300/400-level courses.

At the graduate level, the department offers the Master of Science, Master of Education and Doctor of Philosophy degrees. At the master’s level, students may emphasize educational technology; bilingual education; cognition, creativity, intelligence, and development; research, measurement and statistics; school counseling; or special education. Doctoral specializations include counseling psychology; cognition, creativity, intelligence and development; bilingual education; learning and technology; research, measurement, and statistics; school psychology; and special education.

Requirements for Admission to Professional Phase

The undergraduate curricula in the Department of Educational Psychology are composed of two phases: the pre-professional phase and the professional phase. Upon acceptance into the department, all students enter the pre-professional phase and are assigned a lower-division classification (EDIS). The pre-professional phase consists of University Core Curriculum requirements and introductory courses to the major field of study. After successful completion of these requirements, students are eligible to apply for admission into the professional phase. Cohorts in bilingual and special education are limited in number and students are admitted on a competitive basis. The application process is competitive, and meeting the minimum program prerequisites does not guarantee admission to the professional phase. If admitted to the professional phase of the program, students will be assigned an upper-level classification (INST). The professional phase consists of advanced work in the major field of study and professional development courses, with field-based experiences.

Requirements for Admission to the Professional Phase of Teacher Education Programs

The State of Texas establishes standards for teacher education programs. All certification programs at Texas A&M are in compliance with these requirements. Students must meet state, University, College of Education and Human Development and department/program requirements for matriculation into a teacher education program. Below are the requirements for the traditional certification program. Students are responsible for contacting a departmental advisor to obtain information about specific requirements for majors and program areas, as some programs have requirements beyond those listed below. University-wide requirements for admission to teacher education include the following:

1. An approved degree plan or certification and teaching field plan(s).
2. Minimum GPR of 2.75 for the special education program and 2.75 for the bilingual education program based on all coursework completed at Texas A&M University. (See departmental advisor for additional grade requirements.)
3. Completion of all required University core courses.
4. A grade of B or higher in all certification courses. (See departmental advisor for additional grade requirements).
5. Satisfaction of English proficiency requirement by:
   a. Earning a grade of B or higher in ENGL 103 or ENGL 104 (or receiving credit by exam for the course); or
   b. Earning a grade of B or higher in ENGL 210, ENGL 235 or ENGL 241; and
   c. Earning no grade below C in any course taken in (a) or (b) above.
6. Pass the THEA, ACCUPLACER, ASSET or COMPASS test or show proof of exemption from the test with appropriate STAAR, SAT or ACT scores.
7. Oral interview required for admission to upper level for Hispanic Bilingual Education.
8. Documentation of foreign language and computer literacy requirements on file in the Texas A&M University Office of Admissions.
9. Transcripts from all institutions of higher education on file in the Texas A&M University Office of Admissions.

Requirements for Admission to Student Teaching
1. Successful admission to Professional Phase of Teacher Education.
2. Complete Application for Student Teaching by the given deadlines for each semester.
3. Completion of all courses listed on the degree plan. All coursework must have a grade of C or better. See departmental advisor for additional grade requirements.
4. A minimum GPR of 3.0 in upper-level courses in Special Education. See departmental advisor for additional grade requirements.
5. A minimum GPR of 2.5 on all coursework completed at Texas A&M. See departmental advisor for additional grade requirements.
6. Satisfaction of Spanish proficiency requirements (Hispanic Bilingual Education ONLY).
7. In addition to #6, satisfactory performance on the written and oral Spanish proficiency component of the Hispanic Bilingual Education program admission process.

Majors

- Bachelor of Science in Interdisciplinary Studies, Bilingual Education-EC-6 (p. 253)
- Bachelor of Science in Interdisciplinary Studies, Special Education-EC-12 (p. 255)
- Bachelor of Science in University Studies, Child Professional Services Concentration (p. 256)

Minors

- Creative Studies Minor (p. 257)

Certificates

Creative Studies Certificate (p. 257)

Interdisciplinary Studies - BS, Bilingual Education EC-6

The Department of Educational Psychology offers an undergraduate degree program in Interdisciplinary Studies that includes certification in bilingual education and general elementary education, grades EC
through 6. This program prepares teachers to instruct students who are served in bilingual classes at the elementary level. Students interested in certification in bilingual education should contact the EPSY undergraduate advisor in Heaton Hall.

**Program Requirements**

The following curriculum leads to the Bachelor of Science degree in Interdisciplinary Studies with certification in Bilingual Education, EC-6. Students are required to meet with their assigned academic advisor prior to registration each semester.

**Interdisciplinary Studies - BS, Special Education EC-12**

The Department of Educational Psychology offers an undergraduate degree program in Interdisciplinary Studies that includes certification in special education, EC through grade 12, within the constraints of Texas Certification and The Elementary and Secondary Education Act mandates. This program prepares teachers to instruct students who are served by special education services. Graduates will be prepared to work with students in a wide range of grade levels and settings, serving students with mild to severe disabilities. Students interested in certification in Special Education should contact the EPSY undergraduate advisor in Heaton Hall.

**Program Requirements**

The following curriculum leads to a Bachelor of Science degree in Interdisciplinary Studies with certification in Special Education K-12. Students are required to meet with their assigned academic advisor prior to registration each semester.

| First Year |
| Fall |
| ENGL 103 or ENGL 104 | Introduction to Rhetoric and Composition or Composition and Rhetoric | 3 |
| HIST 105 or HIST 106 | History of the United States or History of the United States | 3 |

| Semester Credit Hours | 3 |

| MATH 141 or MATH 166 | Business Mathematics I or Topics in Contemporary Mathematics II | 3 |
| POLS 206 | American National Government | 3 |
| Life and physical sciences elective | 4 |

Select one of the following:

- BIOL 101 | Botany |
- BIOL 107 | Zoology |
- BIOL 111 | Introductory Biology I |
- BIOL 113 | Essentials in Biology |

| Term Semester Credit Hours | 16 |

| Summer |
| ENGL 203 or ENGL 210 | Writing about Literature or Technical and Business Writing | 3 |

| Second Year |
| Fall |
| EPFB 210 | Family Involvement and Empowerment | 3 |
| EPSY 320 or EPSY 321 | Child Development or Adolescent Development | 3 |
| KINE 120 | The Science of Basic Health and Fitness | 1 |
| MATH 365 | Structure of Mathematics I | 3 |
| TEFB 273 | Introduction to Culture, Community, Society and Schools | 3 |
| Creative arts elective (p. 22) | 3 |

| Term Semester Credit Hours | 16 |

| Spring |
| EPSY 484 | Field Experiences | 1 |
| HLTH 214/KINE 214 | Health and Physical Activity for Children | 3 |
| INST 222 | Foundations of Education in a Multicultural Society | 3 |
| INST 362 | English as a Second Language Methods I | 3 |
| MATH 366 | Structure of Mathematics II | 3 |

| Term Semester Credit Hours | 16 |
### University Studies - BS, Child Professional Services Non-Certification Program

The Department of Educational Psychology offers an undergraduate non-certification degree program in University Studies with an area of concentration in Child Professional Services. This degree is a flexible 120-hour degree program that enables a student to combine a prescribed concentration, two minors, the core curriculum and electives to create a comprehensive degree that aligns with the student’s individual professional interest. The Child Professional Services non-certification concentration requires students to complete a minor in Human Resource Development or Creative Studies and Sociology. This concentration does not allow students to seek teacher certification; however, it offers study in upper level education courses that provides a strong foundation in child and adolescent development, instructional methods, educational psychology, kinesiology, human resource development, and sociology as a means of preparing graduates for careers in civic, social or religious organizations; hospitals or non-profit organizations; or family and community services. Students interested in University Studies - Child Professional Services should contact the EPSY undergraduate advisor located in Heaton Hall.

1. Free elective can be chosen from any 300-400 level course of student's choice.
2. Sociology minor elective to be selected from approved list of courses in the Department of Sociology (p. 493).

Creative Studies - Minor

The Creative Studies minor is provides knowledge and strategies to help you think more creatively within the area of your future profession. Everyone has the ability to think more creatively. Our job is to help you develop and grow your creative ability. Creativity changes the way you think about personal and professional situations.

Program Requirements

- EPSY 430 Creativity Theories and Research 3
- EPSY 433 Lateral Thinking 3
- Select one of the following options: 9
  - Option 1
    - Select three of the following:
      - ENDS 101 Design Process
      - EPSY 431 Personal Creativity and Giftedness
      - EPSY 432 Creativity and Creative Problem Solving
      - EPSY 485 Directed Studies
  - Option 2
    - Select two of the following:
      - ENDS 101 Design Process
      - EPSY 431 Personal Creativity and Giftedness
      - EPSY 432 Creativity and Creative Problem Solving
      - EPSY 485 Directed Studies
    - Select one of the following:
      - ARTS 111 Drawing I
      - ARTS 115 Drawing for Visualization
      - ENDS 115 Design Communication Foundations
      - ENGL 347 Writers' Workshop: Prose
      - ENGL 348 Writers' Workshop: Poetry
      - EPSY 459 Practicum in Educating the Gifted and Talented
      - HORT 203 Floral Design
      - MKTG 345 Social Media and Public Relations
      - MKTG 442 Innovation and Product Management

Total Semester Credit Hours: 15

Creative Studies - Certificate

The Department of Educational Psychology offers a certificate in Creative Studies.

Program Requirements

- Theory of Creativity
  - Select one of the following: 3
    - ENDS 101 Design Process
- PSYC 489 Special Topics in... (Creative Theory and Research)
- Personal Creativity
The Department of Health and Kinesiology offers degrees in Health, Kinesiology, Sport Management and University Studies. Several tracks are offered for students who are interested in a career in these fields. All students majoring in the Department of Health and Kinesiology are assigned an advisor in accordance with their career choice.

The curricula in Health, Kinesiology, Sport Management and University Studies offer opportunities to obtain professional preparation for careers as health and physical education teachers in public and private schools, coaches, sport administrators, community health educators, clinical and applied exercise physiologists, exercise scientists, recreational leaders (in non-school agencies), dance scientists, sports marketing professionals and athletic administrators. The department also provides academic preparation for students interested in allied health and medical related professional schools, e.g., physical therapy, occupational therapy, physicians’ assistant or medicine.

The Department of Health and Kinesiology also offers minors in coaching, dance and sport management. The coaching and dance minors consist of 18 credit hours. The sport management minor is 15 credit hours. A list of courses and enrollment information regarding the minor may be obtained from the Advising Office in the Department of Health and Kinesiology.

The Department of Health and Kinesiology also offers the Master of Education, Master of Science, Doctor of Education and Doctor of Philosophy degrees.

**Teacher Certification**

Students majoring in either Health or Kinesiology may qualify for a Provisional Teaching Certificate after being admitted to teacher education, completing the prescribed requirements, and being recommended by the department to the Texas Education Agency through the University’s Council for Teacher Education. Completion of this degree and other academic requirements does not automatically assure that the student will be recommended for a teaching certificate. Students interested in Texas certification for a teaching career must apply for, and be admitted to, the professional phase of teacher education. See the section entitled “Requirements for Admission to the Professional Phase of Teacher Education” for additional information. Students should see an academic advisor for specific courses. Additionally, all core curriculum courses must be completed before the student accrues 90 hours.

**Non-Teacher Certification Tracks**

Students may seek a career other than public school teaching. The department offers opportunities in allied health, community health, dance, exercise science, motor behavior and sport management. Students are encouraged to declare career intentions early so that appropriate coursework and field experiences may be planned. Students pursuing careers other than teaching are not eligible for teacher certification. These opportunities are briefly summarized in the descriptions of each track.

Students interested in obtaining a degree must apply for, and be admitted to, the professional phase of a specific track (i.e., exercise science, sport management, community health, allied health or dance science). See the section entitled “Requirements for Admission to the Professional Phase of Non-Certification Tracks (p. 244)” for additional information.

**Departmental Advising**

Because of the wide variety of careers in Health, Kinesiology and Sport Management and the difference in course requirements for each, it is essential for students to take advantage of the advising opportunities offered by the department. Students are assigned to an academic advisor in accordance with their degree choice. Students are encouraged to declare career intentions early so appropriate coursework may be planned. All undergraduate advising matters are handled by the advisors in the department’s Advising Office. Information concerning entrance to professional schools in health-related fields is available from the Office of Professional School Advising.

Students are encouraged to become involved in professional organizations and extracurricular activities that afford opportunities for becoming involved in their respective professions.

**General Requirements for Admission to Professional Phase**

The curricula in the Department of Health and Kinesiology are composed of two phases: the pre-professional phase and the professional phase. Upon acceptance into the department, all students enter the pre-professional phase and are assigned a lower-division classification in Health (EDHL), Kinesiology (EDKI) or Sport Management (EDSM). The pre-professional phase consists of University Core Curriculum requirements and introductory courses to the major field of study. After successful completion of these requirements, students may be accepted into the professional phase and assigned an upper-level classification in Health (HLTH), Kinesiology (KINE) or Sport Management (SPMT). The professional phase consists of advanced work in the major field of study and professional development courses. Students are not guaranteed automatic admission to the professional phase.

**Requirements for Admission to the Professional Phase of Teacher Education**

The State of Texas establishes standards for teacher education. All certification programs at Texas A&M University are in compliance with these requirements. Students must meet State, University, College of Education and Human Development and department/program requirements for matriculation into teacher education. Students are responsible for contacting the Advising Office in the Department of Health and Kinesiology to obtain information about specific requirements, which include the following.

1. Complete the following communication requirement:
   a. Physical Education: Complete ENGL 103 or ENGL 104 and ENGL elective with a grade combination of B/C or higher.
2. Complete the following courses with a grade of C or better:

a. **Physical Education**
   - BIOL 107 Zoology 4
   - KINE 121 Physical and Motor Fitness Assessment 2
   - KINE 213 Foundations of Kinesiology 3
   - KINE 199 Required Physical Activity (Majors) 2
   - KNFB 222/HEFB 222 Teaching and Schooling in Modern Society 3
   - MATH (p. 20) 3
   - PHYS 201 College Physics 4

b. **School Health**
   - BIOL 107 Zoology 4
   - or BIOL 111 or Introductory Biology I
   - CHEM 101 Fundamentals of Chemistry I 4
   - & CHEM 111 Fundamentals of Chemistry Laboratory I 4
   - HEFB 222/KNFB 222 Teaching and Schooling in Modern Society 3
   - HLTH 210 Introduction to the Discipline 3
   - HLTH 231 Healthy Lifestyles 3
   - MATH (p. 20) 3

3. GPR requirements:
   a. Overall 2.75 on all coursework taken at any institution of higher education.
   b. Once admitted into professional phase, students must maintain a minimum GPR of 2.5 or higher in the following areas: overall at Texas A&M University, on all degree plan coursework, on all professional development coursework and on major coursework.
   c. A grade of C or better must be made in each of the following: science, professional development, major and support field courses (those courses taken at Texas A&M and those taken elsewhere and transferred to Texas A&M).

4. A grade of C or better must be made in each of the following: science, professional development, major and support field courses (those courses taken at Texas A&M and those taken elsewhere and transferred to Texas A&M).

5. Pass the THEA, ACCUPLACER, ASSET or COMPASS test or show proof of exemption from the test with appropriate STAAR, SAT or ACT scores.

6. Complete application for the professional phase of teacher education before the deadline during the semester all above criteria are met (see academic advisor for date). Application for professional phase includes documentation of professional organizations and certificates, Code of Ethics, FERPA acknowledgement and Expectation for Professional Behavior form signed by student and program coordinator.

7. Demonstrate swimming proficiency (for KINE majors).

**NOTE:** Undergraduate students enrolled in professional phase of teacher preparation programs incur a differential tuition charge of $300 in each of the remaining semesters.

---

### Requirements for Admission to Student Teaching

1. Successful admission to Professional Phase of Teacher Education.
2. Complete Intent to Student Teach form at the time of application for professional phase.
3. Complete all degree plan coursework except KNFB 450/HEFB 450/KNFB 450.
4. **GPR requirements:**
   a. minimum of 2.5 on all coursework completed at Texas A&M.
   b. minimum of 2.5 on all coursework that applies to the degree plan.
   c. minimum of 2.5 computed for each: professional development and major courses.

5. A grade of C or better must be made in each of the following: science, professional development, major and support field courses (those courses taken at Texas A&M and those taken elsewhere and transferred to Texas A&M).

7. Successful completion of the English Language Learner and Ethics Training Module.

---

### Requirements for Admission to the Professional Phase of Non-Certification Tracks

The following requirements must be met by students seeking admission to the professional phase of non-certification tracks in Health and Kinesiology. Students are responsible for contacting the Advising Office in the Department of Health and Kinesiology to obtain information about specific requirements.

1. Complete the following courses with a grade combination of B/C or higher:
   a. **Kinesiology**
      - ENGL 103 Introduction to Rhetoric and Composition 3
      - or ENGL 104 Composition and Rhetoric
      - Second Communications/English course. 3
   
   b. **Health**
      - ENGL 103 Introduction to Rhetoric and Composition 3
      - or ENGL 104 Composition and Rhetoric
      - COMM 203 Public Speaking 3
      - or COMM 205 Communication for Technical Professions

   c. **Sport Management**
      - ENGL 103 Introduction to Rhetoric and Composition 3
      - or ENGL 104 Composition and Rhetoric
      - Select one of the following:
        - COMM 203 Public Speaking
        - COMM 205 Communication for Technical Professions
2. Complete the following courses with a grade of C or better:
   a. **Allied Health**
      - BIOL 107 Zoology 4
      - BIOL 111 Introductory Biology I 4
      - BIOL 319 Integrated Human Anatomy and Physiology I 4
      - BIOL 320 Integrated Human Anatomy and Physiology II 4
      - CHEM 101 Fundamentals of Chemistry I 4
      - CHEM 111 and Fundamentals of Chemistry Laboratory I 4
      - HLTH 210 Introduction to the Discipline 3
      - HLTH 231 Healthy Lifestyles 3
      - HLTH 240/ KINE 240 Computer Technology in Health and Kinesiology 3
      - MATH (p. 860) 3
   
   b. **Community Health**
      - BIOL 107 Zoology 4
      - BIOL 111 Introductory Biology I 4
      - BIOL 319 Integrated Human Anatomy and Physiology I 4
      - BIOL 320 Integrated Human Anatomy and Physiology II 4
      - CHEM 101 Fundamentals of Chemistry I 4
      - CHEM 111 and Fundamentals of Chemistry Laboratory I 4
      - HLTH 210 Introduction to the Discipline 3
      - HLTH 231 Healthy Lifestyles 3
      - HLTH 240/ KINE 240 Computer Technology in Health and Kinesiology 3
      - HLTH 331 Community Health 3
      - MATH (p. 860) 3
   
   c. **Kinesiology: Dance Science**
      - BIOL 107 Zoology 4
      - BIOL 319 Integrated Human Anatomy and Physiology I 4
      - BIOL 320 Integrated Human Anatomy and Physiology II 4
      - MATH 141 Business Mathematics I 3
      - PHYS 201 College Physics 4
      - KINE 213 Foundations of Kinesiology 3
      - PSYC 107 Introduction to Psychology 3
   
   d. **Kinesiology: Exercise Science**
      - BIOL 111 Introductory Biology I 4
      - BIOL 319 Integrated Human Anatomy and Physiology I 4
      - BIOL 320 Integrated Human Anatomy and Physiology II 4
      - CHEM 101 Fundamentals of Chemistry I 4
      - CHEM 111 and Fundamentals of Chemistry Laboratory I 4
      - KINE 121 Physical and Motor Fitness Assessment 2
      - KINE 213 Foundations of Kinesiology 3
      - MATH 131 Mathematical Concepts—Calculus 3
      - MATH 141 Business Mathematics I 3
      - PHYS 201 College Physics 4

3. Complete the following courses with a grade of B or better:
   a. **Dance Science**
      - DCED 160 Ballet I 2
      - DCED 171 Modern Dance I 2
      - KINE 260 Movement Lab: Ballet I 2
      - KINE 271 Movement Lab: Modern Dance I 2

4. Minimum of 2.5 on all coursework completed at Texas A&M except Sport Management which requires a 2.25. Dance Science requires a 2.5 on all dance science coursework for admission to the professional phase.

5. Applied Exercise Physiology and Sport Management have additional requirements. Please see your academic advisor for these.

6. Admission to the professional phase is competitive and not guaranteed. Students must meet with their advisor regarding admission to professional phase.

---

**Requirements for Admission to Internship**

1. Successful admission to Professional Phase of Non-Certification Track.
2. Submit the Application for Internship form prior to the deadline (March 1, July 1, October 1) the semester before enrolling in pre-intern courses.
3. Minimum 2.5 on all coursework completed at Texas A&M except Sport Management which requires a 2.00.
4. Health and Kinesiology requires a grade of C or better must be made in each of the following: science, professional development and major courses (those courses taken at Texas A&M and those taken elsewhere and transferred to Texas A&M).
5. Complete all degree plan courses prior to internship experience.
6. Approval of Application for Internship by program coordinator.

- Dance Minor (p. 280)
- Sports Management Minor (p. 280)

Community Health - BS
The Bachelor of Science in Community Health prepares and educates students to serve as community health educators and promoters in a variety of government and private health agencies, clinical settings, nonprofit organizations, volunteer agencies and other community organizations. This program is unique in that it offers a wide range of approved electives permitting the student to develop a program according to his or her needs and interests. Each graduate will have knowledge enabling them to communicate health and health education needs, concerns and resources.

In addition to classroom experience, the student is exposed to pre-professional training through a non-paid, full semester internship in the final semester. This internship program provides them with on-the-job experience and employment opportunities. Students are placed in a setting which best fits their professional goals.

Program Requirements
This degree plan has been laid out showing students the number of hours they must take each semester in order to complete the degree in four years without attending summer school. This is a suggested plan and does not have to be followed as laid out below. Students should use this information in conjunction with advising documents available from their advisor or the department website when scheduling courses each semester to ensure they are meeting all prerequisites, taking courses for admission to professional phase in a timely manner and meeting all grade requirements.

### Health - BS, Allied Health Track

The goals of the curriculum leading to a Bachelor of Science in Health are to more effectively develop literate, informed professionals capable of making the world healthier and more humane. Students receive a general education through a broad exposure to information. They also receive a specialized education through coursework designed to help them develop as a professional, expand their knowledge and skills related to health education and prepare them for professional practice. The curriculum in health offers two options: the Allied Health track and the School Health track.

The Allied Health concentration gives students a strong background in health that serves them well if they choose to pursue additional schooling in an allied health area. This concentration provides an opportunity for students to take prerequisite courses for professional allied health schools as electives while receiving a background in the health education field. Students select electives from a list of prerequisites for specific professional schools.

This program consists of two phases: pre-professional phase and professional phase. Students must meet program prerequisite requirements in order to advance to professional phase.

### Program Requirements

This degree plan has been laid out showing students the number of hours they must take each semester in order to complete the degree in four years without attending summer school. Health - BS, School Health Track

The goals of the curriculum leading to a Bachelor of Science in Health are to more effectively develop literate, informed professionals capable of making the world healthier and more humane. Students receive a general education through a broad exposure to information. They also receive a specialized education through coursework designed to help them develop as a professional, expand their knowledge and skills related to health education and prepare them for professional practice. The curriculum in health offers two options: the Allied Health track and the School Health track.

The School Health option provides a background in the basic health sciences and pedagogy and prepares educators to plan, implement and evaluate health education in a variety of settings with an emphasis on teaching health in school settings. Graduates have the ability to acquire K-12 teacher certification credentials enabling them to teach health only in public or private schools although students are encouraged to become certified in a support teaching field through the use of core curriculum and support field electives. Students frequently take support field electives that also serve as course pre-requisites for professional schools such as nursing, PA, PT or other medical fields of study. Each student completes appropriate course work in academic foundations and professional education as well as participates in several field experiences representing a variety of levels and types of instruction. The program consists of three phases in the development of their professional dispositions. All students will complete a full semester of student teaching in a school setting as a culminating experience.

Program Requirements
This degree plan has been laid out showing students the number of hours they must take each semester in order to complete the degree in four years without attending summer school. This is a suggested plan and does not have to be followed as laid out below. Students should use this information in conjunction with advising documents available from their advisor or the department website when scheduling courses each semester to ensure they are meeting all prerequisites, taking courses for admission to professional phase in a timely manner and meeting all grade requirements.

1 Course selection should meet the International and Cultural Diversity (p. 34) graduation requirement.  
2 To be chosen in consultation with academic advisor.  
3 Meets the University writing requirement.
Kinesiology - BS, All-Level
Physical Education Teacher Certification Track

The Bachelor of Science degree in Kinesiology offers several options designed to prepare students for a variety of careers in public school education, exercise science and dance science. Some options also provide academic preparation for students interested in professional schools, e.g., physical therapy, occupational therapy, physician’s assistant or medicine. There are some common course requirements for all kinesiology options. Additional hours for each option are specifically designed to prepare students for that field of study. The sequencing of courses should be determined in consultation with an appropriate academic advisor.

This option is offered to students wishing to teach physical education in public or private school. The all-level certification qualifies the recipient to teach in preschool–12th grades in physical education/wellness only. This degree plan includes a full semester of student teaching in a public school setting after the completion of coursework. This degree plan will provide a program that will lead to successful completion of the certification requirements outlined by the State of Texas. Additional program information is available on the Department of Health and Kinesiology website or by contacting the advising office in the department.

Program Requirements

This degree plan has been laid out showing students the number of hours they must take each semester in order to complete the degree in four years without attending summer school. This is a suggested plan and does not have to be followed as laid out below. Students should use this information in conjunction with advising documents available from their advisor or the department website when scheduling courses each semester to ensure they are meeting all prerequisites, taking courses for admission to professional phase in a timely manner and meeting all grade requirements.

1. Course selection should meet the International and Cultural Diversity graduation requirement if needed.
2. Must meet Core Curriculum requirements.
3. Participation in band or athletics cannot be used for KINE 199 credit. KINE 199 activities cannot be repeated for credit and must be taken for a grade. Must be a majors section.
4. To be chosen in consultation with your academic advisor.
5. Meets Creative Arts core curriculum requirement.

**Kinesiology - BS, Dance Science Track**

The Bachelor of Science degree in Kinesiology offers several options designed to prepare students for a variety of careers in public school education, exercise science and dance science. Some options also provide academic preparation for students interested in professional schools, e.g., physical therapy, occupational therapy, physician’s assistant or medicine. There are some common course requirements for all kinesiology options. Additional hours for each option are specifically designed to prepare students for that field of study. The sequencing of courses should be determined in consultation with an appropriate academic advisor.

This option is offered to prepare and educate students to enter the field of dance science. Dance Scientists are professionals who are employed by dance companies and dance training facilities throughout the world to devise effective training programs as well as advise the dancers regarding nutrition, injury prevention/care and dance psychology. Dance Scientists also become researchers, dance therapists, massage therapists and better informed dancers and teachers.

**Program Requirements**

This degree plan has been laid out showing students the number of hours they must take each semester in order to complete the degree in four years without attending summer school. This is a suggested plan and does not have to be followed as laid out below. Students should use this information in conjunction with advising documents available from their advisor or the department website when scheduling courses each semester to ensure they are meeting all prerequisites, taking courses for admission to professional phase in a timely manner and meeting all grade requirements.

### Kinesiology - BS, Exercise Science Track, Applied Exercise Physiology Concentration

The Bachelor of Science degree in Kinesiology offers several options designed to prepare students for a variety of careers in public school education, exercise science and dance science. Some options also provide academic preparation for students interested in professional schools, e.g., physical therapy, occupational therapy, physician’s assistant or medicine. There are some common course requirements for all kinesiology options. Additional hours for each option are specifically designed to prepare students for that field of study. The sequencing of courses should be determined in consultation with an appropriate academic advisor.

The three options in exercise science expose students to a strong science background making them excellent candidates for employment opportunities in exercise related areas (cardiac rehabilitation, corporate or private fitness), advanced graduate studies (motor behavior, exercise physiology) or professional school (medical, dental or physical therapy). Course prerequisites for medical, dental or physical therapy professional schools are included in the various programs under this track.

### Program Requirements

This degree plan has been laid out showing students the number of hours they must take each semester in order to complete the degree in four years without attending summer school. This is a suggested plan and does not have to be followed as laid out below. Students should use this information in conjunction with advising documents available from their advisor or the department website when scheduling courses each semester to ensure they are meeting all prerequisites, taking courses for admission to professional phase in a timely manner and meeting all grade requirements.

1 Course selection should meet the International and Cultural Diversity (p. 34) Graduation requirement, if needed.
2 Meets University writing requirement. Select writing intensive section of KINE 198.
3 To be chosen in consultation with your academic advisor.
4 Participation in band or athletics cannot be used for KINE 199 credit. KINE 199 activities cannot be repeated for credit and must be taken for a grade.

### Sport Management - BS, Internship Track

The Bachelor of Science degree in Sport Management is designed to prepare students for careers as administrators and managers in athletic, health and country clubs, as well as entry-level management positions in college and professional athletic organizations. Through this program, students are prepared for a diversity of roles in the areas of sport marketing and promotions, facility management and planning, activity programming and events management. Students may elect the option that requires completion of an internship or may select the non-internship option. The internship, following coursework, provides students with on-the-job experience and networking opportunities. Students in the internship option will have also completed a business minor. The non-internship option allows students to study sport management from a specific perspective with the goal of continued educational experiences in graduate or professional school, obtaining a post-baccalaureate internship or securing an entry-level position in a sport organization. Students in the non-internship option must complete 2 minors/cognates from a list of approved minors/cognates (i.e., business, journalism, speech communications, etc.). There are common course requirements for both tracks.

### Program Requirements

This degree plan shows students the number of hours they must take each semester in order to complete the degree in four years without attending summer school. This is a suggested plan and does not have to be followed as laid out below. Students should use this information in conjunction with advising documents available from their advisor or the department website when scheduling courses each semester to ensure they are meeting all prerequisites, taking courses for admission to professional phase in a timely manner, and meeting all grade requirements.

1. Must meet Core Curriculum requirements.
2. Course selection should meet the International and Cultural Diversity Graduation requirement.
3. Meets the Language, Philosophy and Culture core curriculum requirement.
4. Students select 2 minors/cognates which range between 24 and 36 credit hours. Directed Electives range from 4-16 credit hours. See your academic advisor for a list of acceptable minors and directed electives.
5. To be chosen in consultation with academic advisor.
6. Courses meets University writing requirement.

**University Studies - BS, Dance Concentration**

The dance concentration curriculum leads to a Bachelor of Science in University Studies. It is designed to serve students who are in good academic standing with the University (2.0+ GPR) and are specifically seeking an interdisciplinary degree plan which provides preparation in dance history and production. Students complete courses in the foundations of dance, dance production, and dance composition, and technique courses in various forms of dance. Students choose their minors. This concentration is housed in the Division of Kinesiology within the Department of Health and Kinesiology.

**Program Requirements**

This degree plan has been laid out showing students the number of hours they must take each semester in order to complete the degree in four years without attending summer school. This is a suggested plan and does not have to be followed as laid out below. Students should use this information in conjunction with advising documents available from their advisor or the department website when scheduling courses each semester to ensure they are meeting all prerequisites, taking courses for admission to professional phase in a timely manner and meeting all grade requirements.

## University Studies - BS, Sports Conditioning Concentration

The sports conditioning concentration curriculum leads to a Bachelor of Science degree in University Studies. It is designed to serve students who are in good academic standing with the University (2.0+ GPR) and are specifically seeking an interdisciplinary degree plan which provides preparation for further study in fields or careers in coaching high performance athletes and personal training. The focus is on adult performance at collegiate, professional or fitness industry levels. Students will receive a coaching minor and will choose a second minor of their choice. This concentration is housed in the Division of Kinesiology within the Department of Health and Kinesiology.

### Program Requirements

This degree plan has been laid out showing students the number of hours they must take each semester in order to complete the degree in four years without attending summer school. This is a suggested plan and does not have to be followed as laid out below. Students should use this information in conjunction with advising documents available from their advisor or the department website when scheduling courses each semester to ensure they are meeting all prerequisites, taking courses for admission to professional phase in a timely manner and meeting all grade requirements.

1  Must meet Core Curriculum requirements.  
2  Some electives should meet the International and Cultural Diversity graduation requirement.  
3  Must be a specific activity class. See advisor for appropriate course.  
4  Select electives in consultation with advisor.  
5  Meets Core Curriculum writing requirement.

University Studies - BS, Sports Leadership Concentration

The sports leadership concentration curriculum leads to a Bachelor of Science degree in University Studies. It is designed to serve students who are in good academic standing with the University (2.0+ GPR) and are specifically seeking an interdisciplinary degree plan which provides preparation for further study in a wide-variety of sport-related fields or careers such as nonprofit sports groups, youth sports institutions, and community agencies focused on sports. Curriculum will be designed to train and prepare students to become leaders, not managers, in sport-related agencies and businesses. Students choose their minors. This concentration is housed in the Division of Sport Management within the Department of Health and Kinesiology.

Program Requirements

This degree plan has been laid out showing students the number of hours they must take each semester in order to complete the degree in four years without attending summer school. This is a suggested plan and does not have to be followed as laid out below. Students should use this information in conjunction with advising documents available from their advisor or the department website when scheduling courses each semester to ensure they are meeting all prerequisites, taking courses for admission to professional phase in a timely manner and meeting all grade requirements.

1. Must meet Core Curriculum requirements.
2. Some electives should meet the International and Cultural Diversity graduation requirement.
4. Select electives in consultation with advisor.
5. Select sections to meet the Core Curriculum writing requirement.

**Coaching - Minor**

This minor is also useful to those who work with youth in sports leagues. Admission to this minor is by application only. Students should allow a minimum of three semesters to complete this minor.

**Total Semester Credit Hours:** 18
Students must make a grade of "C" or better in all courses.

**Dance - Minor**

A minor in dance can lead to numerous opportunities within the field of dance performance and education. Students can obtain the necessary tools to teach, choreograph and direct in high schools, private studios, performance groups, dance/drill teams, dance within community and/ or companies, or utilize their minor studies to pursue degrees in dance. Dance is considered to be an important part of the visual and performing arts educational experience. Studies of dance performance, education and history can enhance a student's academic experience.

Dance students are part of the Dance Program (http://tamudance.tamu.edu), and have the opportunity to participate in events throughout the year.

**Performance**

Performance opportunities include: an annual dance concert (Perpetual Motion), Faculty Arts Showcase, Choreographers' Showcase, Senior Concerts, informal performances, student organization concerts, performances throughout the community and on campus and state, regional, and national/international gala performances. Dance faculty often receive grants for other performances throughout the university in collaboration with faculty from other colleges. Students are also given the opportunity to attend various festivals and conferences.

The Dance Program also offers students the capability to work with guest artists (http://dance.tamu.edu/people/guest-artists) in master classes, watching performances and learning repertory. This not only gives students an unique opportunity to build their resumes, but to work with a variety of professionals in the field.

**Sport Management - Minor**

The minor provides a foundational understanding of the multifarious sport industry from the perspectives of management, marketing and other business principles. The minor provides an introductory understanding of the broadly defined sport management discipline and potential careers that can be leveraged in the sport industry.

1. Topics for the seminar classes include: Sport Sponsorship, Athletic Administration and Sport and the Media.
2. Courses meet International and Cultural Diversity requirement

Students must make a grade of "C" or better in all courses.

**Department of Teaching, Learning and Culture**

The Department of Teaching, Learning and Culture is responsible for undergraduate programs that lead to certification at the early childhood/elementary, middle and secondary levels. Note these exceptions:

1. students interested in teaching either health or physical education must major in the Department of Health and Kinesiology;
2. students interested in teaching agricultural science must major in the Department of Agricultural Education;
3. students interested in secondary certification can be certified through the secondary graduate certification program, the secondary accelerate certification program, the University Studies program or the Aggie Teach program.

**Early Childhood/Elementary or Middle Grades Certification**

Baccalaureate Degree Programs. Most students interested in early childhood/elementary (PreK-6) or middle school (4–8) certification pursue a program leading to the Bachelor of Science degree (BS) with a major in interdisciplinary studies (INST). The INST degree certification programs prepare students for the many diverse instructional roles assumed by public school teachers. A minimum of 123 credit hours is required for the INST degree. Within this program, students may focus on:

1. early childhood (PreK–grade 6);
2. middle school (grades 4–8 math and science); and
3. middle school (grades 4–8 English language arts and social studies).
Secondary Graduate Certification Program

Four routes leading to initial teacher certification at the secondary level are available. These include the Aggie Teach program, the University Studies program, the graduate certification program and Accelerate (an alternative certification program). Complete information is available from the TLAC advising office in Heaton Hall.

Requirements for Admission to Student Teaching

1. Complete a student teaching application by the given deadlines and complete all coursework prior to senior methods. Students must see their advisors for deadlines.
2. Admission to teacher education.
3. Completion of all courses listed on the degree plan. All Education/Interdisciplinary Studies and professional courses with a grade of C or better.
4. All certification coursework must be completed. Each emphasis/teaching field must have a grade of C or better in each course with a minimum GPR of 2.75 in teacher emphasis/teaching field.
5. ENGL 203 or ENGL 210 must be completed with a grade of C or better.
6. A minimum of 2.75 on all coursework completed at Texas A&M.
7. A minimum of 2.75 on all coursework that applies to the degree plan, taken at Texas A&M.
8. A minimum of 2.75 on all coursework that applies to the emphasis/teaching field, taken at Texas A&M.

Requirements for Admission to Teaching Education

Early Childhood/Elementary or Middle Grades Certification Programs

Please see an advisor in the Department of Teaching, Learning and Culture’s Office of Undergraduate Advising for current information.

Requirements for Admission to Teacher Education

Early Childhood/Elementary and Middle Grades Education Program

1. Pass the THEA, ACCUPLACER, ASSET or COMPASS test or show proof of exemption from the test with appropriate STAAR, SAT or ACT scores.
2. Completion of a minimum 42 hours of pre-professional coursework from degree program (includes University Core Curriculum courses).
3. Completion of a minimum of 32 hours of University Core Curriculum courses with no grade lower than a C.
4. Completion of TEFB 273 or INST 210 with a grade of B or higher (equivalent courses from a community college may be substituted).
5. Completion of English Proficiency grade requirement by earning a B/C grade combination in ENGL 103 or ENGL 104 and one of the following courses: ENGL 203 or ENGL 210.
6. A GPR of 2.75 on all coursework on a degree plan with no grade lower than a C.
7. Transcripts for all institutions of higher education on file in the Texas A&M University Office of the Registrar.
8. Approved and signed degree plan on file in the Advising Office of the Department of Teaching, Learning and Culture.

These requirements must be seen as minimum standards only. Successful fulfillment of all of the above requirements does not guarantee admission to the program. Admission also depends upon the number of places available and the number of applications received each year. If more qualified students apply than the available number of spaces, admission may be based on selection factors at the time of application, such as GPA in pre-professional courses, number of hours needed to complete the program, and enrollment in prerequisite courses.

For complete information, see an advisor in the Department of Teaching, Learning and Culture’s Office of Undergraduate Advising in Heaton Hall.

There is another baccalaureate elementary certification program available for students majoring in English. For information about this program, see an advisor in the Department of English, College of Liberal Arts.

Eligibility. Students must meet the requirements for a bachelor’s degree in the college and the department in which they are majoring. Further, they must meet specific admission and performance standards established by the Department of Teaching, Learning and Culture as well as requirements for professional education and certification established by the State of Texas. These requirements include admission to teacher education, admission to student teaching and qualification for initial certification.

It is the responsibility of the student to contact the Department of Teaching, Learning and Culture’s Office of Undergraduate Advising for specific information pertaining to program changes.

American history elective to be chosen from HIST 352, HIST 355, HIST 356, HIST 359, HIST 361, HIST 362, HIST 363, HIST 374, HIST 412, HIST 421, HIST 455, HIST 456, HIST 460, HIST 461, HIST 473.

Government/political science elective must be satisfied by 3 hours chosen from POLS 314, POLS 315, POLS 316, POLS 317 or POLS 319, and 3 hours chosen from POLS 229, POLS 231, POLS 347, POLS 369 or POLS 415.

### Secondary Graduate Certification Program

**Secondary Graduate Certification Program**

This program is designed for those candidates who have completed the baccalaureate degree and desire initial certification at the secondary level. Candidates are admitted upon recommendation of departmental advisors and progress through summer, fall and spring as a cohort. The certification program requires completion of 21 graduate semester credit hours and the successful completion of appropriate State examinations. A full public school year internship and the opportunity to apply all coursework toward the Master of Education degree are unique features of this program. The candidate may, upon approval by the department and a cooperating school district, serve as an intern in a full-time salaried teacher of record position, in a part-time salaried teaching position, or as a paid substitute teacher. All candidates will serve a full public school year internship whether in a salaried or non-salaried position.

**Prerequisites**

Completion of the following prior to the first summer session:

1. Baccalaureate degree from an accredited institution with a GPR of 2.75.
2. Nine (9) semester credit hours
   - INST 210 Understanding Special Populations 9
   - TEFB 322 Teaching and Schooling in Modern Society
   - TEFB 324 Teaching Skills II
3. Coursework for one teaching field as approved by the teaching field advisor.
4. Pass the appropriate content area TExES exam.

**Course of Study for Secondary Certification at the Post-Baccalaureate Level**

Enrollment in the following courses is limited to candidates pursuing initial secondary certification in the post-baccalaureate program.

**First Year**

Total Semester Credit Hours: 21-27

2 Candidates in a one-half time paid or non-paid internship may, with approval of an advisor, enroll in 3 credit hours of approved coursework, providing it does not interfere with the internship day.

Recommendation for Certification. Upon successful completion of the three prerequisite courses, the teaching field plan (minimum of 24 credit hours) during the summer, fall and spring semesters, a demonstrated competency in speech and technology, and passing scores on all State-required examinations, candidates will be recommended for certification.

NOTE: To complete the Master of Education degree, candidates will enroll in Teaching, Learning and Culture foundation courses and courses in their teaching field(s) as approved by their graduate advisory committee. The department also offers a “certification only” option for secondary certification. Contact the TLAC office for information about the accelerate option.

Secondary Certification Through Accelerate Online Program

This program is designed for those candidates who have completed the baccalaureate degree and desire initial certification at the secondary level. The program is designed to provide college graduates with a program of teacher preparation that can be completed in 12-18 months. The Accelerate Online program provides an individual with the flexibility of completing teacher certification through online instructional modules followed by a year-long paid internship in a secondary public school in Texas. Other information and additional program requirements can be obtained from Lynn Beason at lbeason@coe.tamu.edu or (979) 458-3968.

Secondary Certification Through the Aggie Teach Program

Contact the Aggie Teach advisor in the office of the Associate Dean, College of Science.

Secondary Certification Through the University Studies Program

Contact the TLAC Advising Office in Heaton Hall and the University Studies advisor in the Office of General Academic Programs in Hotard Hall.

University Studies Programs

The College of Education and Human Development offers degrees in University Studies. A University Studies degree differs from a traditional “major” in that it consists of a concentration and two minors of 15-18 hours each. The University Studies degree format was created to provide students the flexibility to combine areas of study that are of special interest.

Majors

- Bachelor of Science in University Studies, Child Professional Services Non-Certification Program (p. 256)
- Bachelor of Science in University Studies, Dance Concentration (p. 276)
- Bachelor of Science in University Studies, Sport Conditioning Concentration (p. 277)
- Bachelor of Science in University Studies, Sport Leadership Concentration (p. 278)
Dwight Look College of Engineering

Administrative Officers
Vice Chancellor and Dean of Engineering - M. Katherine Banks, Ph.D.
Executive Associate Dean - Nagamangala K. Anand, Ph.D.
Senior Associate Dean for Academic Affairs - Valerie E. Taylor, Ph.D.
Associate Dean for Undergraduate Programs - Prasad Enjeti, Ph.D.
Assistant Dean for Graduate Programs - John C. Criscione, Ph.D.
Senior Associate Dean for Research - Dimitris Lagoudas, Ph.D.
Associate Dean for Research - Costas Georghiades, D.Sc.
Assistant Dean for Finance - Michelle Mitchell, B.B.A.

General Statement
Engineering is the application of science and mathematics to the solution of relevant problems in our society. To a great extent, our current standard of living and high level of technology are due to the diligent and innovative efforts of engineers. In spite of the increasing expense of basic resources, modern engineers have succeeded in maintaining stable costs for a wide variety of goods, and at the same time have used their design and analysis abilities to introduce new products and technologies for the betterment of society.

The accelerating pace of industrial and technological developments has created an ever-increasing demand for highly qualified, professional engineers to maintain the momentum already achieved, and to extend and direct the course of these developments. The ever-expanding population and the increased demands for goods and services have imposed new challenges to provide effective solutions while minimizing unwanted side effects. Engineers recognize that all actions taken have their respective costs, and that solutions to long-standing societal problems are found in careful, thorough planning and study. With a pragmatic background in problem solving, engineers are perhaps best qualified to address society’s problems.

The complexities of the current environment are such that all resources must be used in the best possible manner. Thus, the Dwight Look College of Engineering, through its curricula, strives to educate and train engineers who have the breadth of vision to formulate and solve the problems of today and the future. It is expected that a student who conscientiously applies himself or herself and successfully completes an engineering program will be technically trained and socially educated, thereby being well prepared to make a significant contribution to the world in which he or she works.

The mission of the Dwight Look College of Engineering is to serve Texas, the nation and the global community by providing engineering graduates who are well founded in engineering fundamentals, instilled with the highest standards of professional and ethical behavior, and prepared to meet the complex technical challenges of society.

To achieve this mission the Dwight Look College of Engineering is committed to:

- ensuring an academic environment conducive to our faculties achieving the highest levels of academic and research excellence;
- building upon our traditional partnerships with industry, engineering practitioners and former students, to enhance our impact on the profession of engineering;
- encouraging excellence, innovation and cross-disciplinary initiatives in education and research;
- providing national and international leadership in undergraduate and graduate engineering education;
- becoming the engineering college of choice for the increasingly diverse citizenry of the state; and
- encouraging and supporting opportunities for our students to grow beyond their chosen disciplines by participation in ethics courses, leadership programs, study-abroad programs and research.

A student engineer can pursue any one of several degree plans, according to personal ambitions, interests and abilities. The student may choose the traditional BS degree and consider advanced research-oriented graduate programs leading to the MS and PhD degrees. Alternatively, the student may select the Doctor of Engineering program which is directed toward professional engineering.

Within the Dwight Look College of Engineering, the undergraduate programs in aerospace, biological and agricultural, biomedical, chemical, civil, computer, electrical, industrial, mechanical, nuclear, ocean, petroleum and radiological health engineering are accredited by the Engineering Accreditation Commission of ABET, www.abet.org. The electronic systems engineering technology program and the manufacturing and mechanical engineering technology program are accredited by the Engineering Technology Accreditation Commission of ABET, www.abet.org. The Computer Science program is accredited by the Computing Accreditation Commission of ABET, www.abet.org.

Entrance and Enrollment Requirements
The minimum requirements for entrance to the University are listed in the earlier pages of this catalog. Because of the importance of science and mathematics to engineering, high school students who aspire to a career in engineering are encouraged to take as many of these courses as possible. In particular, high school preparation should include four years of mathematics and four years of science emphasizing algebra, geometry, trigonometry, calculus, chemistry, physics and biology.

A critical step in an engineering education is proper individual placement in the first courses undertaken. The Dwight Look College of Engineering strongly recommends the following guidelines to students participating in the math advanced placement examinations in high school. Incoming engineering students can earn advanced placement (AP) credits for MATH 151 with a score of 4 on the Calculus AB exam or 3 on the BC exam, and for MATH 151 and MATH 152 by a score of 4 on the BC exam. While the student can accept these AP credits and enroll in the next course in the engineering mathematics sequence, the college recommends a more conservative decision about accepting advanced placement credits in math. Students who earn a 4 or 5 on the Calculus AB exam or a 3 or 4 on the BC exam are recommended to begin in MATH 151. Students who score a 5 on the Calculus BC exam are recommended to begin in MATH 151 or MATH 152. These conservative recommendations help ensure students have thoroughly mastered the content that is fundamental to the engineering curriculum. Students should discuss their choice with their assigned undergraduate academic advisor before registering for mathematics classes. New Student Conferences and associated Credit by
Examination tests provide information to advisors so that students begin at a level which may differ from the printed curriculum, but is appropriate to their aptitudes and background. All freshmen admitted into engineering are required to complete the Math Placement Exam (MPE) before the New Student Conferences and should review algebra, trigonometry and geometry prior to taking the MPE.

Because of the importance of computing in the disciplines housed within the Dwight Look College of Engineering, all entering students are required to possess a portable, network-ready personal computer capable of running software appropriate to their academic program, effective Fall 2014. Details about the personal computer needed to meet the requirement can be found on our website. No student will be denied admission to Texas A&M University based on an inability to purchase a computer.

Students who meet the University and college entrance requirements are admitted into the Dwight Look College of Engineering with a preference to a major field of study and receive a designation of “ENGE”. Students can apply to a major degree granting program after completing at least one semester and after learning about the different engineering disciplines from professional engineers. Before applying for entry to a major, students must complete a minimum of three courses that are applicable to their intended major degree program. The three courses are defined as follows: one engineering course, one math course, and one science course that are in the intended degree plan. The application process is competitive. Students must be accepted in a major by the end of their fourth semester or they will be blocked from further registration in the Dwight Look College of Engineering.

As an aid to making a decision, the freshman courses ENGR 111 and ENGR 112 introduce students to engineering problems from the various disciplines. In addition, students may attend departmental presentations, career fairs and other activities sponsored by student engineering professional societies. Academic Advisors at New Student Conferences will help students select courses to fit their preferences and abilities.

Transfer students will be admitted directly to a major degree granting program through the admissions process.

Freshman Curriculum

The freshman year is identical for degrees in aerospace engineering, biomedical engineering, civil engineering, computer engineering, electrical engineering, industrial engineering, mechanical engineering, nuclear engineering, ocean engineering, and petroleum engineering thus allowing a student with adequate grades to change majors within the Dwight Look College of Engineering. The freshman year is slightly different for chemical engineering and radiological health engineering in that students take CHEM 101/CHEM 111 and CHEM 102/CHEM 112 instead of CHEM 107/CHEM 117. Students pursuing degrees in biological and agricultural engineering, computer science, engineering technology, or industrial distribution should refer to the specific curriculum for these majors. It is recognized that many students will change the sequence and number of courses taken in any semester. Deviations from the prescribed course sequence, however, should be made with care to ensure that prerequisites for all courses are met.

Fast Track Program

Each participating department in the Dwight Look College of Engineering has streamlined its program for Fast Track participants by substituting specific graduate courses for selected undergraduate offerings. Academically qualified students take these 600-level courses during their senior year, earning graduate credit while fulfilling undergraduate requirements through “credit by exam.” The individual department sets its own grade and exam requirements for earning dual credit. The department also establishes the maximum number of credit hours allowed for acceleration, usually five to seven.

Industry-University Cooperative Education

Cooperative education is a study-work plan of education in which a student alternates periods of attendance in college or university with periods of employment in industry related to his or her major. Students who choose this degree plan must complete at least 12 months of experience in order to receive the cooperative education certificate. The practice of engineering is an art which is learned through practice as well as in the classroom. The cooperative education program provides the education that can be achieved from practice by having the student work with professional engineers on the job. Consequently, the student who graduates with the cooperative education certificate has both the academic background and the practical experience to qualify him or her for more meaningful employment in the profession of engineering. The cooperative education work periods also provide an income for students that allows them to pay for their school expenses.

Those who wish additional information concerning this program should contact the Associate Director of Cooperative Education.

Advanced Study

Students who rank in the upper half of their undergraduate class should give serious consideration to developing their full intellectual potential in engineering by continuing with advanced studies at the graduate level. Two routes are available for students. The traditional master of science and doctor of philosophy degrees should be considered by students who wish to go into research fields. For those students interested in the practice of professional engineering, the master of engineering and doctor of engineering degrees should be given serious consideration.

The professional doctor of engineering degree was established in the fall of 1974 to fill a need for better-educated engineers in the practice of engineering. Students may enter this program at any time after they receive the bachelor’s degree in engineering by applying and being accepted to a departmental graduate program within the Dwight Look College of Engineering. Master’s level degrees require a minimum of one year of coursework after the bachelor’s, and the doctoral degrees require a minimum of an additional two years of coursework. The doctor of philosophy also requires a dissertation based on research by the student, and the doctor of engineering requires at least one year of internship experience in industry or government.

For more information concerning these programs, please refer to the Texas A&M University Graduate and Professional Catalog or contact the Office of the Dean of Engineering.

The engineering programs also provide a foundation for further education in the fields of medicine, law or business. An engineering background will prepare the individual to understand, contribute to and embrace technical advances in these fields.

The Texas A&M Engineering Academies

The Texas A&M Engineering Academies are co-enrollment programs between Texas A&M University, Dwight Look College of Engineering and selected two-year institutions. The Engineering Academies provide talented students an opportunity to pursue their engineering degree and take courses previously reserved for students admitted to the Dwight
Look College of Engineering. The admission process for the Engineering Academies is unique to each partner institution. Ultimately, the final offer of admission to the Academy is made by Texas A&M University.

Texas A&M Engineering Academy students are able to progress in engineering courses offered by the college, which allows participants an opportunity to graduate with their peers in the Dwight Look College of Engineering. The Engineering Academies are two year programs. At the conclusion of the second year, students who successfully complete program requirements will be fully admitted to Texas A&M University without an additional application process. An option to apply for early matriculation is offered to Engineering Academy students who have satisfied the required course and GPA requirements identified for the respective institution. This option is available as early as the first year, second semester. Program students may also apply for transfer admission to Texas A&M University via the transfer admission process before completion of the two-year program, however additional application fees will be assessed.

Eligible students receive financial aid based upon their combined credit hours from both institutions.

For more information, including specific requirements for each of the partner institutions, visit Texas A&M Engineering Academies (https://engineering.tamu.edu/academies).

**Majors**

**Dwight Look College of Engineering**
- Bachelor of Science in Biological and Agricultural Engineering (p. 293)

**Department of Aerospace Engineering**
- Bachelor of Science in Aerospace Engineering (p. 297)

**Department of Biomedical Engineering**
- Bachelor of Science in Biomedical Engineering (p. 299)

**Artie McFerrin Department of Chemical Engineering**
- Bachelor of Science in Chemical Engineering (p. 303)

**Zachry Department of Civil Engineering**
- Bachelor of Science in Civil Engineering (p. 308)
- Bachelor of Science in Civil Engineering, Coastal and Ocean Engineering Track (p. 310)
- Bachelor of Science in Civil Engineering, Construction Engineering and Management Track (p. 311)
- Bachelor of Science in Civil Engineering, Environmental Engineering Track (p. 313)
- Bachelor of Science in Civil Engineering, General Civil Engineering Track (p. 315)
- Bachelor of Science in Civil Engineering, Geotechnical Engineering Track (p. 317)
- Bachelor of Science in Civil Engineering, Structural Engineering Track (p. 319)
- Bachelor of Science in Civil Engineering, Transportation Engineering Track (p. 321)
- Bachelor of Science in Civil Engineering, Water Resources Engineering Track (p. 323)
- Bachelor of Science in Ocean Engineering (p. 324)

**Department of Computer Science and Engineering**
- Bachelor of Science in Computer Engineering, Computer Science Track (p. 327)
- Bachelor of Science in Computer Science (p. 328)

**Department of Electrical and Computer Engineering**
- Bachelor of Science in Computer Engineering, Electrical Engineering Track (p. 332)
- Bachelor of Science in Electrical Engineering (p. 334)

**Department of Engineering Technology and Industrial Distribution**
- Bachelor of Science in Electronic Systems Engineering Technology (p. 337)
- Bachelor of Science in Engineering Technology, Manufacturing and Mechanical Engineering Option (p. 338)
- Bachelor of Science in Industrial Distribution (p. 339)

**Department of Industrial and Systems Engineering**
- Bachelor of Science in Industrial Engineering (p. 342)

**Department of Mechanical Engineering**
- Bachelor of Science in Mechanical Engineering (p. 348)

**Department of Nuclear Engineering**
- Bachelor of Science in Nuclear Engineering (p. 351)
- Bachelor of Science in Radiological Health Engineering (p. 353)

**Harold Vance Department of Petroleum Engineering**
- Bachelor of Science in Petroleum Engineering (p. 356)

**Minors**

**Department of Aerospace Engineering**
- Aerospace Engineering Minor (p. 298)

**Department of Biomedical Engineering**
- Biomedical Engineering Minor (p. 300)

**Artie McFerrin Department of Chemical Engineering**
- Chemical Engineering Minor (p. 305)

**Department of Computer Science and Engineering**
- Computer Science Minor (p. 329)
Department of Electrical and Computer Engineering
• Electrical Engineering Minor (p. 335)

Department of Engineering Technology and Industrial Distribution
• Embedded Systems Integration Minor (p. 341)

Department of Industrial and Systems Engineering
• Industrial Engineering Minor (p. 343)

Department of Materials Science and Engineering
• Materials Science and Engineering Minor (p. 345)

Department of Nuclear Engineering
• Nuclear Engineering Minor (p. 354)
• Radiological Health Engineering Minor (p. 354)

Harold Vance Department of Petroleum Engineering
• Petroleum Engineering Minor (p. 357)

Certificates
The Dwight Look College of Engineering has designed the following certificate programs to offer ambitious students the opportunity to go beyond the traditional curriculum and gain specific knowledge in a concentration area. Students are required to consult with their academic advisor prior to submitting an application for a certificate. Enrolling and being accepted into a certificate program does not guarantee registration into required courses. Each certificate, with the exception of the Business Management Certificate, will be recognized on the candidate’s transcript. A coordinator reviews each student’s coursework via a certificate worksheet and requirements met prior to certification. Certificate coordinators are given the discretion to determine the eligibility of students in other colleges and/or majors to pursue Dwight Look College of Engineering certificates. For specific information on each certificate available, visit the Dwight Look College of Engineering website.

Dwight Look College of Engineering
• Business Management Certificate for Engineering Students (http://catalog.tamu.edu/undergraduate/engineering/business-management-certificate)
• Engineering Honors Certificate (http://catalog.tamu.edu/undergraduate/engineering/honors-certificate)
• Engineering Project Management Certificate (http://catalog.tamu.edu/undergraduate/engineering/project-management-certificate)
• International Engineering Certificate (http://catalog.tamu.edu/undergraduate/engineering/international-certificate)
• Polymer Specialty Certificate (http://catalog.tamu.edu/undergraduate/engineering/polymer-specialty-certificate)
• Safety Engineering Certificate (http://catalog.tamu.edu/undergraduate/engineering/safety-certificate)

Department of Biomedical Engineering
• Engineering Therapeutics Manufacturing Certificate (p. 301)
• Quality Engineering for Regulated Medical Technologies Certificate (p. 301)

Department of Industrial and Systems Engineering
• Data Center Operations Engineering Certificate (p. 343)
• Engineering Systems Management Certificate (p. 343)

Harold Vance Department of Petroleum Engineering
• Energy Engineering Certificate (p. 357)

Masters
Dwight Look College of Engineering
• Master of Engineering in Engineering (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/engineering/interdepartmental-degree-programs/meng)

Biological and Agricultural Engineering - BS

The biological and agricultural engineering program develops graduates who can pursue engineering careers in industry, academia, consulting or government. The curriculum is designed:

- to produce graduates who are prepared to become practicing biological and agricultural engineers, many of whom will become registered professional engineers;
- to produce graduates to serve the engineering needs of clientele in environmental and natural resources, machine systems, food processing, bioprocessing, and agricultural production and processing; and
- to produce graduates who continue to be engaged in professional development.

Students learn to apply fundamental knowledge of biological and physical sciences, mathematics, and engineering principles to formulate and solve engineering problems. Engineering design is integrated throughout the curriculum, along with opportunities to develop communication, learning, and teamwork skills, culminating in a capstone design experience. Electives in the curriculum allow the student to specialize in one of the following areas:

- Environmental and Natural Resources Engineering—design and management of systems affecting soil, water, and air resources.
- Renewable Energy Engineering—design and development of biomass, wind and solar energy systems.
- Food and Bioprocess Engineering—design and development of systems for processing and handling of food and agricultural products and processes involving cells, enzymes, or other biological components.
- Machine Systems Engineering—design and development of machines and machine systems for food, feed and fiber production and processing.

Students select courses with the assistance of faculty advisors in an individualized advising system. Faculty members also assist with professional development and job placement for students.

The biological and agricultural engineering program is jointly administered by the College of Agriculture and Life Sciences and the Dwight Look College of Engineering, and the curriculum is fully accredited by the Engineering Accreditation Commission of ABET, Inc., www.abet.org. The department is one of the largest in North America and is consistently ranked as one of the top programs in the nation.

For graduates to become successful practicing biological and agricultural engineers, students need to acquire a set of skills, knowledge, and behaviors as they progress through the curriculum. We have established the following program outcomes outlining what students are expected to know and be able to do upon completion of the curriculum. At the time of graduation, students should have:
1. an ability to apply knowledge of mathematics, science and engineering;
2. an ability to design and conduct experiments, as well as to analyze and interpret data;
3. an ability to design a system, component, or process to meet desired needs within realistic constraints such as economic, environmental, social, political, ethical, health and safety, manufacturability, and sustainability;
4. an ability to function on multidisciplinary teams;
5. an ability to identify, formulate, and solve engineering problems;
6. an understanding of professional and ethical responsibility;
7. an ability to communicate effectively;
8. the broad education necessary to understand the impact of engineering solutions in a global, economic, environmental, and societal context;
9. a recognition of the need for, and an ability to engage in life-long learning;
10. a knowledge of contemporary issues;
11. an ability to use the techniques, skills, and modern engineering tools necessary for engineering practice.

1. Entering students will normally be given a placement test in mathematics. Test results will be used in selecting the appropriate starting course which may be at a higher or lower level.
A grade of C or better is required for all math, science, and engineering courses.

**Department of Aerospace Engineering**

Aerospace Engineering is a complex, rapidly changing field that includes aerodynamics, structures and materials, propulsion, dynamics and control, and astrodynamics. The primary application of aerospace engineering is to design and develop flight vehicles, such as aircraft, missiles, spacecraft and satellites. Aerospace engineering is also important and applicable to other vehicles and systems, such as rotorcraft, submarines, automobiles, wind turbines, advanced robotics, re-entry vehicles, exotic materials and computational simulations.

The mission of the Aerospace Engineering program is

1. to provide students with a quality undergraduate and graduate education for the State of Texas and the nation through an innovative educational program;
2. to advance the science and aerospace engineering knowledge base through basic and applied research, inventions, technologies and solutions to aerospace problems; and
3. to serve the aerospace engineering profession by preparing leaders for leadership in the creation, design and operation of the next generation aerospace systems.

To achieve this mission, the educational objectives established by the Aerospace Engineering undergraduate program are to produce graduates whose expected accomplishments within three to five years of graduation are

1. to have successful careers in industry, private practice, or government, or have pursued advanced graduate studies;
2. to be skilled practitioners who apply their knowledge and skills to solve relevant engineering problems in the aerospace or a related profession; and
3. to function well in teams, communicate well, continue enhancing their professional competence, and understand the impact of engineering solutions.

To carry out these educational objectives, the goals of the program are

1. using a high quality faculty, to provide a comprehensive aerospace engineering education that develops in students the fundamental skills necessary for the design, synthesis, analysis and research development of aircraft, spacecraft and other high technology flight systems; and
2. to prepare students for the aerospace engineering profession and related fields by developing the attributes needed, so that they can contribute successfully to society and to the engineering profession now and in the future.
Chamitoff, Gregory E, Professor Of The Practice
Aerospace Engineering
PhD, Massachusetts Institute of Technology, 1992

Cizmas, Paul G, Professor
Aerospace Engineering
PhD, Duke University, 1995

Donzis, Diego A, Associate Professor
Aerospace Engineering
PhD, Georgia Institute of Technology, 2007

Elmendorf, Harry M, Associate Professor Of The Practice
Aerospace Engineering
BS, Texas A&M University, 1979

Girimaji, Sharath S, Professor
Aerospace Engineering
PhD, Cornell University, 1990

Aerospace Engineering
PhD, Virginia Tech, 1983

Valasek, John L, Professor
Aerospace Engineering
PhD, University of Kansas, 1995

Whitcomb, John D, Professor
Aerospace Engineering
PhD, Virginia Tech, 1988

White, Edward B, Associate Professor
Aerospace Engineering
PhD, Arizona State University, 2000

**Majors**

- Bachelor of Science in Aerospace Engineering (p. 297)

**Minors**

- Aerospace Engineering Minor (p. 298)
**Aerospace Engineering - BS**

Coursework in aerodynamics, structures and materials, propulsion, and dynamics and control provide a strong fundamental basis for advanced study and specialization, while technical electives offer a concentration of study in fields of special interest. Design philosophy and practice are developed throughout the curriculum to relate analysis to aerospace engineering design. The design of aerospace system components is particularly emphasized in the junior- and senior-level courses. A senior-level two-semester design sequence, involving specific goals, objectives, and constraints, integrates analysis and design tools and requires students working in small teams to design, build, test, and even fly an aerospace system, such as an aircraft, rocket, or spacecraft. Application of modern engineering and computational tools is required and emphasized in all courses.

**Program Requirements**

The freshman year is identical for degrees in aerospace engineering, biomedical engineering, civil engineering, computer engineering, electrical engineering, industrial engineering, mechanical engineering, nuclear engineering, ocean engineering, and petroleum engineering thus allowing a student with adequate grades to change majors within the Dwight Look College of Engineering. The freshman year is slightly different for chemical engineering and radiological health engineering in that students take CHEM 101/111 and CHEM 102/112 instead of CHEM 107/117. Students pursuing degrees in biological and agricultural engineering, computer science, engineering technology, or industrial distribution should refer to the specific curriculum for these majors. It is recognized that many students will change the sequence and number of courses taken in any semester. Deviations from the prescribed course sequence, however, should be made with care to ensure that prerequisites for all courses are met. In addition to the freshman year curriculum listed below, students should refer to the specific curriculum for each major for other requirements. Before commencing course work in the major, students must be admitted to the major or have the approval of the department.

#### Additional Requirements

- Overall GPR > 2.50 when entering the minor field of study.
- Major GPR > 2.50 when entering the minor field of study.
- Must earn C or higher to count as a minor field of study.

#### Prerequisites

- Approval to pursue the minor from Aerospace; completion of CBKs with a C or better.

### Department of Biomedical Engineering

The objectives of the biomedical engineering program are to produce high-quality graduates with a broad-based education in engineering, life sciences and natural sciences; who:

1. are well prepared for further graduate studies, careers in the biomedical or biotechnology industries or entry into medical or other professional schools;
2. will make significant contributions in biomedical industries, medicine and other sectors;
3. will apply acquired knowledge appropriately, work professionally with others, effectively communicate ideas and technical information and continue to learn and improve their knowledge base and skills.

These objectives are met through a modern and comprehensive curriculum taught by a well-prepared, professionally active and dedicated faculty. In addition, the program actively supports professional development among the students through individual study and research opportunities, cooperative education and internships, and student society activities. These goals are measured by the success of the graduates in finding rewarding professional employment, and by admission to respected graduate and professional schools.

Design is an important part of biomedical engineering and design skills are emphasized throughout the curriculum, beginning in the freshman year, and culminating in the two-semester senior design course sequence that requires application of a wide range of engineering methods to a focused design project. Other courses in biomedical engineering and in supporting disciplines include examples of the application of the principles to design, as well as specific design exercises. The Biomedical Engineering curriculum is accredited by the Engineering Accreditation Commission of ABET, www.abet.org.

---

<sup>5</sup> Three design options are available - Aircraft, Rocket, or Spacecraft Design. A two-semester sequence is required.

### Total Program Hours 128
Before commencing course work in the major, students must be admitted to the major or have the approval of the department.

**Biomedical Engineering - BS**

The curriculum in biomedical engineering involves the development and application of engineering science and technology for living and medical systems. Although there have been individuals working in biomedical engineering for centuries, today's modern educational programs are specifically designed to prepare engineers for this challenging field. The curriculum described is broadly based around a basic core of courses developed to prepare students for team involvement with other engineers and with physicians and life scientists in working to solve a wide array of biological and medical problems. Elective courses are included to accommodate individual student specialty interests. Students interested in medical school can meet admission prerequisites through slight modifications and additions to the curriculum.

Select one of the following: 4

- CHEM 101 | Fundamentals of Chemistry I and Fundamentals of Chemistry Laboratory I | 4 |
- CHEM 107 | General Chemistry for Engineering Students and General Chemistry for Engineering Students Laboratory | 4 |
- ENGR 112 | Foundations of Engineering II | 2 |
- MATH 152 | Engineering Mathematics II | 4 |
- PHYS 208 | Electricity and Optics 1 | 4 |
- University Core Curriculum (p. 19) | 3 | 3 |

**Second Year**

**Fall**

- BMEN 101 | Introduction to Biomedical Engineering | 1 |
- BMEN 207 | Computing for Biomedical Engineering | 3 |
- CHEM 102 | Fundamentals of Chemistry II and Fundamentals of Chemistry Laboratory II | 4 |
- ENGL 203 or ENGL 210 | Writing about Literature or Technical and Business Writing | 3 |
- MATH 251 | Engineering Mathematics III | 3 |
- VTPP 434 | Physiology for Bioengineers I | 4 |

**Spring**

- BMEN 211 | Biomedical Applications of Circuits, Signals and Systems | 3 |
- BMEN 253 | Medical Device Design I | 1 |
- CHEM 227 | Organic Chemistry I | 3 |
- MATH 308 | Differential Equations | 3 |
- VTPP 435 | Physiology for Bioengineers II | 4 |
- University Core Curriculum (p. 19) | 3 | 3 |

**Third Year**

**Fall**

- BMEN 305 | Bioinstrumentation | 1 |
- BMEN 321 | Biomedical Electronics | 3 |
- BMEN 341 | Biofluid Mechanics | 3 |
- BMEN 343 | Introduction to Biomaterials | 3 |
- BMEN 350 | Statistics for Biomedical Engineering | 3 |
- University Core Curriculum (p. 19) | 3 | 3 |

**Spring**

- BMEN 344 | Biological Responses to Medical Devices | 3 |
- BMEN 345 | Biomaterials Lab | 1 |
- BMEN 353 | Medical Device Design II | 1 |
- BMEN 361 | Biosolid Mechanics | 3 |
- BMEN 420 | Medical Imaging | 3 |
- Technical elective 5 | | 3 |
- University Core Curriculum (p. 19) | 3 | 3 |

**Fourth Year**

**Fall**

- BMEN 453 | Analysis and Design Project I | 2 |
- BMEN 465 | Biomechanics Experiential Learning Lab | 1 |
- BMEN 468 | Advanced Biomechanics | 3 |
- Technical elective 5 | | 6 |
- University Core Curriculum (p. 19) | 3 | 3 |

**Spring**

- BMEN 450 | Case Studies | 1 |
- BMEN 454 | Analysis and Design Project II | 2 |
- ENGR 482/PHIL 482 | Ethics and Engineering | 3 |
- Technical elective 5 | | 6 |

**Biomedical Engineering - Minor**

The Department of Biomedical Engineering offers a minor in Biomedical Engineering.

**Program Requirements**

- BMEN 282/CHEN 282 | Engineering Biology | 3 |

Select 12 hours from one area: 1

**Bioinstrumentation Area**

- BMEN 207 | Computing for Biomedical Engineering | 1 |
- BMEN 321 | Biomedical Electronics | 3 |
- BMEN 420 | Medical Imaging | 3 |

1. A grade of C or better is required.
2. Entering students will be given a math placement exam. Test results will be used in selecting the appropriate starting course which may be at a higher or lower level.
3. Of the 18 hours shown as University Core Curriculum electives, 3 must be from creative arts, 3 from social and behavioral sciences, 6 from American history, and 6 from government/political science. The required 6 hours from international and cultural diversity may be met by courses satisfying the creative arts, social and behavioral sciences, and American history requirements if they are also on the approved list of international and cultural diversity courses.
4. Credit by examination for these courses also satisfies this requirement.
5. Technical electives are to be selected in consultation with student’s advisor from an approved list available from the departmental office.
Biomaterials Area
- BMEN 343 Introduction to Biomaterials
- BMEN 344 Biological Responses to Medical Devices
- Biomaterials technical electives

Biomechanics Area
- BMEN 341 Biofluid Mechanics
- BMEN 361 Biosolid Mechanics
- Biomechanics technical electives

Total Semester Credit Hours 15

1 Students must select courses exclusively from one of the three areas represented and not mixed.
2 See the departmental academic advisor for a complete list of technical electives.

Students must be admitted to a degree sequence in the Dwight Look College of Engineering or to the degree sequence in Biological and Agricultural Engineering.

**Engineering Therapeutics Manufacturing - Certificate**

The Engineering Therapeutics Manufacturing Certificate is intended to meet the requirements of industry by educating engineering BS graduates how to economically, ecologically and safely design and operate equipment used for the production and separation of biological materials. By the end of the certificate program, students will be able to:

1. understand the processing of biological materials
2. analyze functions and properties of biological materials
3. understand the impact of the use/misuse of biological materials
4. understand the life cycle and evolution of biological materials
5. design, operate and optimize biological process units

For additional information, contact the Engineering Therapeutics Manufacturing Certificate coordinator or Engineering Academic and Student Affairs, Room 129 Zachry Engineering Center, (979) 845-7200.

**Program Requirements**

**Required Course**
Select one of the following:

- BAEN 302 Biological and Agricultural Engineering Fundamentals II
- BAEN 601 Advanced Agricultural Systems Analysis
- CHEN 382 Bioprocess Engineering
- CHEN 651 Biochemical Engineering
- ISEN 360 Lean Thinking and Lean Engineering in the Process Industries
- ISEN 645 Lean Thinking and Lean Manufacturing
- VTPP 435 Physiology for Bioengineers II

**Prescribed Electives**
Select three of the following:

- BAEN 471/CHEN 471 Bioreactor Engineering
- BAEN 479 Biological and Agricultural Engineering Design I
- BAEN 489 Special Topics in... (Introduction to Separations)
- BAEN 631 Bioprocesses and Separations in Biotechnology
- BAEN 653 Bioreactor Design
- BMEN 430 Medical Device Regulation
- BMEN 440 Design of Medical Devices
- BMEN 486 Biomedical Nanotechnology
- BMEN 487 Drug Delivery
- BMEN 630 Global Medical Device Regulation
- BMEN 640 Design of Medical Devices
- BMEN 686 Biomedical Nanotechnology
- BMEN 687 Drug Delivery
- CHEN 440 Introduction to Transport Phenomena
- CHEN 463 Advanced Transport Phenomena I
- CHEN 464 Chemical Engineering Kinetics and Reactor Design
- CHEN 469 Process Dynamics and Advanced Process Control
- CHEN 471 Bioreactor Engineering
- CHEN 475 Process Safety Engineering
- CHEN 614 Advanced Transport Phenomena I
- CHEN 624 Chemical Engineering Kinetics and Reactor Design
- CHEN 629 Transport Phenomena
- CHEN 631 Process Dynamics and Advanced Process Control
- CHEN 655/SENG 655 Process Safety Engineering
- CHEN 663 Advanced Transport Phenomena I
- CHEN 665 Systems Biology
- ISEN 303 Engineering Economic Analysis
- ISEN 613 Engineering Data Analysis

Total Semester Credit Hours 12

**Quality Engineering for Regulated Medical Technologies - Certificate**

Quality engineering principles are mandated by federal and state regulations for clinical facilities and for the design, testing and manufacture of medical technologies (such as pharmaceuticals and imaging, diagnostic and therapeutic devices). Completion of this certificate requires specific instruction in quality engineering and regulation of medical technologies; moreover, candidates must go beyond understanding concepts and demonstrate appropriate usage of quality engineering principles in a medically related in medical care, candidates for this certificate are expected to be entering a high-growth job market for engineers.

For additional information, contact the Quality Engineering for Regulated Medical Technologies Certificate coordinator or Engineering Academic and Student Affairs, Room 129 Zachry Engineering Center, (979) 845-7200.

**Program Requirements**
Select one of the following:

BMEN 440  Design of Medical Devices  3
BMEN 640  Design of Medical Devices
BMEN 404  FDA Good Laboratory and Clinical Practices
BMEN 604  FDA Good Laboratory and Clinical Practices
BMEN 406  Medical Device Path to Market
BMEN 606  Medical Device Path to Market
BMEN 430  Medical Device Regulation
BMEN 630  Global Medical Device Regulation

Select one of the following:  3

ISEN 314  Statistical Control of Quality
ISEN 414  Total Quality Engineering
ISEN 614  Advanced Quality Control
XXEN 485 or 3
XXEN 684  Internship to be approved by certificate faculty to meet experience needs

Select one of the following:  3

BMEN 404  FDA Good Laboratory and Clinical Practices
BMEN 604  FDA Good Laboratory and Clinical Practices
BMEN 607  Clinical Engineering
BMEN 430  Medical Device Regulation
BMEN 630  Global Medical Device Regulation
BMEN 440  Design of Medical Devices
BMEN 640  Design of Medical Devices
ISEN 314  Statistical Control of Quality
ISEN 414  Total Quality Engineering
ISEN 614  Advanced Quality Control
ISEN 616  Design and Analysis of Industrial Experiments
MMET 418  Medical Manufacturing
VTMI 629/ 3
SCSC 629  Laboratory Quality Systems

Total Semester Credit Hours  12

1 Course cannot be used to satisfy the required courses, and both the undergraduate and graduate versions of the same course cannot be used. For example, BMEN 404 and BMEN 604 cannot both count toward fulfilling requirements.

Artie McFerrin Department of Chemical Engineering

Chemical engineering is a broad field of engineering and thus requires a diverse preparation in science and engineering. Distinguishing chemical engineering from other engineering disciplines is its use of chemical and biochemical reactions to produce products and materials for society. Traditionally, chemical engineers have provided leadership in the petrochemical, refining, chemical, polymer, and food processing industries. Because of strengths in the foundation sciences of mathematics, chemistry, physics and biology, as well as in engineering, this leadership role has now extended to the biochemical, biomedical, high-tech materials, semi-conductor and microelectronics, nanotechnology, environmental quality, safety, and a host of other areas. Chemical engineers have consistently commanded starting salaries among the highest of all college graduates because of the combined breadth and depth of their education.

The mission of the Artie McFerrin Department of Chemical Engineering at Texas A&M is to educate and prepare students for national and international leadership roles in industry, government, and academia; to attract top students to chemical engineering; to define and develop new directions in chemical engineering fundamentals and practices, and in chemical engineering education and curricula; to be a valuable resource and service base to the State and to industry; and to provide leadership in solving problems of social and economic importance.

Objectives of the chemical engineering program are that

1. graduates will have successful chemical engineering careers in industry, academia or government,
2. graduates will obtain, apply and transfer knowledge across disciplines and into emerging areas of chemical engineering and related fields,
3. graduates will communicate effectively, be leaders in their fields and work competently in interdisciplinary teams, and
4. graduates will be professionally responsible and ethical and engage in professional activities to impact the society on a global scale.

To supplement coursework, well-equipped laboratories provide our students with experiences in operating and analyzing a variety of unit operations and process control equipment and in the use of the modern computational tools and software used in chemical engineering. The department offers vibrant undergraduate research, co-op and study abroad programs that provide students with additional enrichment and experiential opportunities.

The undergraduate program in Chemical Engineering at Texas A&M University is accredited by the Engineering Accreditation Commission of ABET, www.abet.org, and compares favorably with the best in the nation.

Before commencing course work in the major, students must be admitted to the major or have the approval of the department.

Chemical Engineering - BS

The chemical engineering curriculum provides a balanced education in virtually all aspects of chemical engineering principles and practice and includes education in economics, language, philosophy and culture and communication. Chemical engineering courses emphasize fundamentals
and methods that are applicable to the analysis, development, design and operation of a wide variety of chemical engineering systems and processes, thereby providing the necessary background for entry into the wide array of activities described above. At the same time, specific example applications provide the student with insight into the ability of chemical engineers to work in such a variety of areas. The curriculum is structured to offer students an opportunity to extend and apply the fundamentals developed in the basic courses toward more focused areas of specialization. The sequence of courses converges in the senior year into a comprehensive capstone design course that includes elements of economics, safety and environmental issues. The course provides an experience much like that of an industry design project. It is this philosophy of fundamentals, applications and design that has enabled our chemical engineering graduates to adapt readily to a dynamic and rapidly changing world and to solve problems they have not previously experienced.

**Total Semester Credit Hours:** 128

1. A grade of C or better is required.
2. CHEM 107/117 may be used to fulfill this requirement.
3. Of the 18 hours shown as University Core Curriculum electives, 3 must be from creative arts, 3 from social and behavioral sciences, 6 from American history, and 6 from government/political science. The required 6 hours from international and cultural diversity may be met by courses satisfying the creative arts, social and behavioral sciences, and American history requirements if they are also on the approved list of international and cultural diversity courses.
The mission of the Zachry Department of Civil Engineering is to produce graduates:

1. who are prepared to enter civil engineering practice and/or continue their education through study in graduate and professional programs, and
2. most of whom will become practicing civil engineers with most of these becoming licensed professional engineers, and
3. many of whom will pursue advanced studies.

The undergraduate program in civil engineering within the Zachary Department of Civil Engineering at Texas A&M University is accredited by the Engineering Accreditation Commission of ABET, www.abet.org. The undergraduate program in civil engineering within the Zachary Department of Civil Engineering at Texas A&M University promotes the highest academic standards of excellence, quality, and ethics in both our undergraduate and graduate programs, and in doing so create both a culture of excellence and a community of scholars. Through our programs, our faculty and graduates provide local, state, national, and international leadership to a profession that must solve the civil and/or ocean engineering problems facing an increasingly complex society.

The undergraduate program in civil engineering within the Zachary Department of Civil Engineering at Texas A&M is accredited by the Engineering Accreditation Commission of ABET, www.abet.org. Graduate programs in civil engineering are also available. These programs allow further specialization and offer more in-depth study to address more complex technical and management issues. Graduate degrees also offer additional employment opportunities.

Before commencing course work in the major, students must be admitted to the major or have the approval of the department.

**Ocean Engineering**

Ocean engineering is the application of basic engineering principles to the analysis, design, construction, and management of systems that operate in the ocean environment or near shore. Typical ocean engineering application areas include: beach protection and nourishment, coastal structures, coastal erosion, development of ocean energy resources, instrumentation for coastal and offshore measurements, marine dredging and dredged material placement, moored and towed systems, ocean mining, offshore petroleum recovery, offshore structures, ports and harbors, search and salvage, suspended and dissolved constituent transport, subsea pipelines and cables, submersible vehicles, and underwater acoustics. Employment opportunities exist with private industry, defense contractors, consulting firms, and government agencies. Ocean engineering students are encouraged to pursue summer
Internships and may participate in the University cooperative education program. The curriculum leading to a Bachelor of Science degree in ocean engineering is administered by the Coastal and Ocean Engineering Division of the Zachry Department of Civil Engineering. The undergraduate program in ocean engineering within the Zachry Department of Civil Engineering at Texas A&M is accredited by the Engineering Accreditation Commission of ABET, www.abet.org.

The mission of the Ocean Engineering Program is to conduct research, serve the public, and educate students in a broad program of instruction encompassing traditional and emerging areas of ocean engineering. Graduates are prepared for entering engineering practice, continuing onto graduate study, life-long learning and professional development. Students develop a sense of professionalism and an appreciation for the obligations of a professional engineer. The Program offers ocean engineering continuing education activities for the people and marine industry of the state, nation and international community. The Program serves the public and engineering profession in Texas and the nation through participation of faculty and students in public and professional activities. Applied and fundamental research is conducted that contributes to the better understanding of ocean engineering and supports student educational development.

The objectives of the Ocean Engineering Program are to graduate students that are qualified to contribute to the ocean engineering profession and society, gain employment in ocean engineering and related engineering fields with private and government organizations, and advance to positions of increased responsibility. Some graduates become professional engineers and members of ocean engineering related professional societies, pursue company training and continuing education activities, and attend technical conferences. Some graduates pursue graduate studies in ocean engineering and related fields and receive post baccalaureate degrees.

The laboratory facilities for the Ocean Engineering Program are among the most comprehensive in the nation for testing offshore and coastal systems. The facilities are located in the Reta and Bill Haynes '46 Coastal Engineering Laboratory, Offshore Technology Research Center and the Civil Engineering Laboratory Building. These facilities include a large deep water wave basin, a towing tank, a wave channel, a shallow water wave basin and data acquisition systems. Additional information is available on the Zachry Department of Civil Engineering website.

Before commencing course work in the major, students must be admitted to the major or have the approval of the department.

PhD, John Hopkins University, 2007

Mercier, Richard S, Professor
Civil Engineering
PhD, Massachusetts Institute of Technology, 1985

Miller, Gretchen R, Assistant Professor
Civil Engineering
PhD, University of California, Berkeley, 2009

Niedzwecki, John M, Professor
Civil Engineering
PhD, The Catholic University of America, 1977

Noshadran, Arash, Research Assistant Professor
Civil Engineering
PhD, University of Southern California, 2011

Olivera, Francisco, Associate Professor
Civil Engineering
PhD, University of Texas, 1996

Otey, Jeffrey M, Instructional Assistant Professor
Civil Engineering
MEN, Texas A&M University, 1994

Park, Philip, Assistant Professor
Civil Engineering
PhD, University of Michigan, 2012

Quadrifoglio, Luca, Associate Professor
Civil Engineering
PhD, University of Southern California, 2005

Randall, Robert E, Professor
Civil Engineering
PhD, University of Rhode Island, 1972

Sakhaei Far, Maryam S, Assistant Professor
Civil Engineering
PhD, North Carolina State University, 2011
Sanchez Castilla, Marcelo Javier, Associate Professor
Civil Engineering
PhD, Universidad Politecnica de Catalunya (UPC), Barcelona, Spain, 2004

Scarfuto, Jessica C, Assistant Lecturer
Civil Engineering
MS, Texas A&M University, 2014

Shidlovskaya, Anna V, Visiting Professor
Civil Engineering
PhD, National Mineral Resources University, Russia, 2005

Socolofsky, Scott A, Associate Professor
Civil Engineering
PhD, Massachusetts Institute of Technology, 2001

Walewski, John A, Associate Professor Of The Practice
Civil Engineering
PhD, University of Texas, 2005

Wang, Binbin, Lecturer
Civil Engineering
PhD, University of Wisconsin-Milwaukee, 2013

Wang, Xiubin B, Associate Professor
Civil Engineering
PhD, University of California, Davis, 2004

Zhong, Yunlong, Associate Professor
Civil Engineering
PhD, Virginia Tech, 1996

Zollinger, Dan, Professor
Civil Engineering
PhD, University of Illinois at Urbana-Champaign, 1989

Majors

- Bachelor of Science in Civil Engineering (p. 308)
- Bachelor of Science in Civil Engineering, Coastal and Ocean Engineering Track (p. 310)
- Bachelor of Science in Civil Engineering, Construction Engineering and Management Track (p. 311)
- Bachelor of Science in Civil Engineering, Environmental Engineering Track (p. 313)
- Bachelor of Science in Civil Engineering, General Civil Engineering Track (p. 315)
- Bachelor of Science in Civil Engineering, Geotechnical Engineering Track (p. 317)
- Bachelor of Science in Civil Engineering, Structural Engineering Track (p. 319)
- Bachelor of Science in Civil Engineering, Transportation Engineering Track (p. 321)
- Bachelor of Science in Civil Engineering, Water Resources Engineering Track (p. 323)

Civil Engineering - BS

The first two years of the civil engineering curriculum build a solid foundation in mathematics, science and engineering science which are the necessary building blocks for a successful career in engineering. The third year provides an introduction to the various civil engineering disciplines and engineering principles, methods of analysis, and design. The fourth year provides the opportunity to pursue either a broad based program in general civil engineering or pursue more depth in an area of specialization by choice of one of eight tracks, described further below. The curriculum also includes courses in history, government/political science, social sciences, language, philosophy and culture and creative arts that help students:

1. understand the need for considering the global and societal context in which engineering solutions are completed,
2. understand professional and ethical responsibility, and
3. be knowledgeable of contemporary issues.

Students are encouraged to participate in cooperative education or to intern with civil engineering agencies during their undergraduate education.

All students must choose one of the eight tracks in the BS in Civil Engineering curriculum: construction engineering and management (p. 311), coastal and ocean (p. 310), environmental (p. 313), general (p. 315), geotechnical (p. 317), structural (p. 319), transportation (p. 321), and water resources (p. 323). The choice of track determines acceptable courses for technical electives listed in the general curriculum.

Program Requirements

The freshman year is identical for degrees in aerospace engineering, biomedical engineering, civil engineering, computer engineering, electrical engineering, industrial engineering, mechanical engineering, nuclear engineering, ocean engineering, and petroleum engineering thus allowing a student with adequate grades to change majors within the Dwight Look College of Engineering. The freshman year is slightly different for chemical engineering and radiological health engineering in that students take CHEM 101/111 and CHEM 102/112 instead of CHEM 107/117. Students pursuing degrees in biological and agricultural engineering, computer science, engineering technology, or industrial distribution should refer to the specific curriculum for these majors. It is recognized that many students will change the sequence and number of courses taken in any semester. Deviations from the prescribed course sequence, however, should be made with care to ensure that prerequisites for all courses are met. In addition to the freshman year curriculum listed below, students should refer to the specific curriculum for each major for other requirements. Before commencing course work in the major, students must be admitted to the major or have the approval of the department.

1. A grade of C or better is required.
2. Entering students will be given a math placement exam. Test results will be used in selecting the appropriate starting course which may be at a higher or lower level.
3. Of the 18 hours shown as University Core Curriculum electives, 3 must be from creative arts, 3 from social and behavioral sciences, 6 from American history, and 6 from government/political science. The required 6 hours from international and cultural diversity may be met by courses satisfying the creative arts, social and behavioral sciences, and American history requirements if they are also on the approved list of international and cultural diversity courses.
4. BMEN, CHEN and RHEN require 8 hours of freshman chemistry, which may be satisfied by CHEM 101/CHEM 111 or CHEM 107/CHEM 117 and CHEM 102/CHEM 112; Credit by Examination (CBE) for CHEM 101/CHEM 111 or CHEM 107/CHEM 117 plus CHEM 102/CHEM 112; or 8 hours of CBE for CHEM 101/CHEM 111 or CHEM 107/CHEM 117 and CHEM 102/CHEM 112.

| Total Semester Credit Hours: | 95 |

5. A total of 33 hours of technical electives is required. Technical electives are divided into four categories: science courses, breadth courses, focus courses, and capstone design courses. The choice of courses to be taken in each of the four categories depends on the track chosen and must be made in consultation with the student’s advisor and/or the Civil Engineering Undergraduate Student Services Office. Capstone design courses must include more than one civil engineering context.
6. All students must take at least two courses in their major that are designated as writing intensive (W). ENGR 482/PHIL 482 and CVEN 424 taken at Texas A&M satisfy this requirement. Other CVEN courses may be approved as W courses at a later date. A grade of C or better is required in these courses.

A grade of C or better is required in all science, mathematics and engineering courses taken to satisfy degree requirements.

**Total Program Hours 128**
Civil Engineering, BS - Coastal and Ocean Engineering Track

The Coastal and Ocean Engineering Track to fulfill the BS in Civil Engineering degree emphasizes breadth across civil engineering with a focus on coastal and offshore engineering. The focus electives prepare students to analyze and design systems for shallow and deep water environments. The track is appropriate for a career related to coastal and offshore engineering, and for those planning on further specialization in graduate studies.

Program Requirements

The freshman year is identical for degrees in aerospace engineering, biomedical engineering, civil engineering, computer engineering, electrical engineering, industrial engineering, mechanical engineering, nuclear engineering, ocean engineering, and petroleum engineering thus allowing a student with adequate grades to change majors within the Dwight Look College of Engineering. The freshman year is slightly different for chemical engineering and radiological health engineering in that students take CHEM 101/111 and CHEM 102/112 instead of CHEM 107/117. Students pursuing degrees in biological and agricultural engineering, computer science, engineering technology, or industrial distribution should refer to the specific curriculum for these majors. ### Spring Semester

Select one of the following:
- BAEN 320 Engineering Thermodynamics
- ECEN 215 Principles of Electrical Engineering
- MEEN 315 Principles of Thermodynamics
- Technical elective 5

**Term Semester Credit Hours:** 9

1. A grade of C or better is required.
2. Entering students will be given a math placement exam. Test results will be used in selecting the appropriate starting course which may be at a higher or lower level.
3. Of the 18 hours shown as University Core Curriculum electives, 3 must be from creative arts, 3 from social and behavioral sciences, 6 from American history, and 6 from government/political science. The required 6 hours from international and cultural diversity may be met by courses satisfying the creative arts, social and behavioral sciences, and American history requirements if they are also on the approved list of international and cultural diversity courses.
4. BMEN, CHEN and RHEN require 8 hours of freshman chemistry, which may be satisfied by CHEM 101/CHEM 111 or CHEM 107/CHEM 117 and CHEM 102/CHEM 112; Credit by Examination (CBE) for CHEM 101/CHEM 111 or CHEM 107/CHEM 117 plus CHEM 102/CHEM 112; or 8 hours of CBE for CHEM 101/CHEM 111 or CHEM 107/CHEM 112 and CHEM 102/CHEM 112.
Total Program Hours 128

Coastal and Ocean Engineering Track - Technical Electives

Technical electives for the BS in Civil Engineering, Coastal and Ocean Engineering Track are composed of a SCIENCE course (3 semester credit hours), BREADTH courses (13 semester credit hours), FOCUS courses (13 semester credit hours), and a CAPSTONE DESIGN course (4 semester credit hours), as delineated below, for a total of 33 semester credit hours. A substitution for any course in the track must be approved in writing by the Civil Engineering Undergraduate Student Services Office, CE Building, Room 140.

SCIENCE Course (3 Semester Credit Hours Required)

OCNG 401  Interdisciplinary Oceanography 
OCNG 410 or Introduction to Physical Oceanography 

BREADTH Courses (13 Semester Credit Hours)

CVEN 365  Introduction to Geotechnical Engineering 
CVEN 444  Structural Concrete Design 
or CVEN 446 or Structural Steel Design 

Choose 4 Semester Credit Hours From:

OCEN 336 Fluid Dynamics Laboratory 
OCEN 362 Hydromechanics 
OCEN 410 Ocean Engineering Laboratory 
CVEN 339 Water Resources Engineering 

FOCUS Courses (13 Semester Credit Hours Required)

OCEN 300 Ocean Engineering Wave Mechanics 
OCEN 481 Seminar 

Choose 9 Semester Credit Hours From: 

OCEN 400 Basic Coastal Engineering 
OCEN 401 Underwater Acoustics for Ocean Engineers 
OCEN 402 Principles of Naval Architecture 
OCEN 403 Dynamics of Offshore Structures 
OCEN 407 Design of Ocean Engineering Facilities 
OCEN 408 Underwater and Moored System Design 
OCEN 410 Ocean Engineering Laboratory 
OCEN 475 Environmental Fluid Mechanics 
CVEN 402 Engineered Environmental Systems 
CVEN 403 Applied Civil Engineering Surveying 
CVEN 405 Construction Management of Field Operations 
CVEN 406 Environmental Protection and Public Health 
CVEN 423 Geomatics for Civil Engineering 
CVEN 435 Geotechnical Engineering Design 
CVEN 445 Matrix Methods of Structural Analysis 
CVEN 458 Hydraulic Engineering of Water Distribution Systems 
CVEN 473 Engineering Project Estimating and Planning 

CAPSTONE DESIGN Course (4 Semester Credit Hours Required)

OCEN 407 Design of Ocean Engineering Facilities 

1  Among these 9 semester credit hours, students must take at least one of the following: OCEN 400, OCEN 402, OCEN 403.

2  CVEN 403 is a 2 semester credit hour course. Students must typically earn an additional 1 semester credit hour of Focus course credit and should consult with their advisors for guidance on appropriate courses with which to earn this credit.

Civil Engineering - BS, Construction Engineering and Management Track

The Construction Engineering and Management Track to fulfill the BS in Civil Engineering degree emphasizes specialized coursework in the fundamentals of construction engineering and project management. The
Track blends the principles of basic science, engineering, and technology with a strong component of business coursework. The Track is appropriate for students interested in a career in the construction industry.

**Program Requirements**

The freshman year is identical for degrees in aerospace engineering, biomedical engineering, civil engineering, computer engineering, electrical engineering, industrial engineering, mechanical engineering, nuclear engineering, ocean engineering, and petroleum engineering thus allowing a student with adequate grades to change majors within the Dwight Look College of Engineering. The freshman year is slightly different for chemical engineering and radiological health engineering in that students take CHEM 101/111 and CHEM 102/112 instead of CHEM 107/117. Students pursuing degrees in biological and agricultural engineering, computer science, engineering technology, or industrial distribution should refer to the specific curriculum for these majors. It is recognized that many students will change the sequence and number of courses taken in any semester. Deviations from the prescribed course sequence, however, should be made with care to ensure that prerequisites for all courses are met. In addition to the freshman year curriculum listed below, students should refer to the specific curriculum for each major for other requirements. Before commencing course work in the major, students must be admitted to the major or have the approval of the department.

**Civil Engineering - BS, Environmental Engineering Track**

The Environmental Engineering Track to fulfill the BS in Civil Engineering degree emphasizes specialized coursework in water and waste water treatment, air and water quality management, solid and hazardous wastes, ground water protection and remediation, and environmental policy. The track is appropriate for those wishing to pursue careers in protecting the natural environment from human activities, protecting human populations from the effects of adverse environmental factors and improving the environmental quality for human health and well-being.

**Program Requirements**

The freshman year is identical for degrees in aerospace engineering, biomedical engineering, civil engineering, computer engineering, electrical engineering, industrial engineering, mechanical engineering, nuclear engineering, ocean engineering, and petroleum engineering thus allowing a student with adequate grades to change majors within the Dwight Look College of Engineering. Total Program Hours 128

Environmental Engineering Track - Technical Electives

Technical electives for the BS in Civil Engineering, Environmental Engineering Track are composed of a SCIENCE course (3 semester credit hours), BREADTH courses (7-12 semester credit hours), FOCUS courses (15-20 semester credit hours), and a CAPSTONE DESIGN course (3 semester credit hours), as delineated below, for a total of 33 semester credit hours. A substitution for any course in the track must be approved in writing by the Civil Engineering Undergraduate Student Services Office, CE Building, Room 140.

Science 3
Select one of the following:
- ATMO 363 Introduction to Atmospheric Chemistry and Air Pollution
- BESC 201 Introduction to Bioenvironmental Sciences
- BIOL 113 Essentials in Biology
- GEOL 410 Hydrogeology
- GEOS 105 Introduction to Environmental Geoscience
- RENR 205 Fundamentals of Ecology

Breadth - 7 to 12 semester credit hours 1
CVEN 301 Environmental Engineering
CVEN 339 Water Resources Engineering
Select three to nine credit hours from the following:
- CVEN 342 Materials of Construction
- CVEN 349 or Portland Cement Concrete Materials for Civil Engineers
- CVEN 365 Introduction to Geotechnical Engineering
- CVEN 403 Applied Civil Engineering Surveying
- OCEN 336 Fluid Dynamics Laboratory

Select up to three credit hours from the following:
- CVEN 307 Transportation Engineering
- CVEN 349 Civil Engineering Project Management
- CVEN 444 Structural Concrete Design
- CVEN 446 Structural Steel Design

Focus Elective - 15 to 20 semester credit hours 1
Select 6 to 9 semester credit hours from the following:
- CVEN 402 Engineered Environmental Systems
- CVEN 406 Environmental Protection and Public Health
- CVEN 413 Natural Environmental Systems

Select 6 to 14 semester credit hours from the following:
- BAEN 465 Design of Biological Waste Treatment Systems
- BAEN 469 Water Quality Engineering
- BAEN 477 Air Pollution Engineering
- CVEN 423 Geomatics for Civil Engineering
- CVEN 451 Public Works Engineering
- CVEN 455 Urban Stormwater Management
- CVEN 458 Hydraulic Engineering of Water Distribution Systems
- CVEN 463 Engineering Hydrology

Capstone Design

CVEN 400 Design Problems in Civil Engineering 3

Total Semester Credit Hours 33

1 The sum of semester credit hours of Breadth and Focus courses must be at least 27.

Civil Engineering - BS, General Civil Engineering Track

The General Civil Engineering Track to fulfill the BS in Civil Engineering degree emphasizes breadth across the civil engineering field. Students take courses in all major sub-disciplines of civil engineering with an advanced focus elective allowing deeper learning in one area. The track is appropriate for a career in any area of civil engineering, with particular relevance for those interested in public works, land development, and general civil, and for those planning on further specialization in graduate studies.

Program Requirements

The freshman year is identical for degrees in aerospace engineering, biomedical engineering, civil engineering, computer engineering, electrical engineering, industrial engineering, mechanical engineering, nuclear engineering, ocean engineering, and petroleum engineering thus allowing a student with adequate grades to change majors within the Dwight Look College of Engineering. A grade of C or better is required in all science, mathematics and engineering courses taken to satisfy degree requirements.

**Total Program Hours 128**

**General Civil Engineering Track - Technical Electives**

Technical electives for the BS in Civil Engineering, General Civil Engineering Track are composed of a SCIENCE course (3 semester credit hours), BREADTH courses (24 semester credit hours), a FOCUS course (3 semester credit hours), and a CAPSTONE DESIGN course (3 semester credit hours), as delineated below, for a total of 33 semester credit hours. A substitution for any course in the track must be approved in writing by the Civil Engineering Undergraduate Student Services Office, CE Building, Room 140.

**SCIENCE Course (3 Semester Credit Hours Required)**

Choose 3 Semester Credit Hours From:

- ATMO 201 Weather and Climate

A total of 33 hours of technical electives is required. Technical electives are divided into four categories: science courses, breadth courses, focus courses, and capstone design courses. The choice of courses to be taken in each of the four categories depends on the track chosen and must be made in consultation with the student’s advisor and/or the Civil Engineering Undergraduate Student Services Office. Capstone design courses must include more than one civil engineering context.

All students must take at least two courses in their major that are designated as writing intensive (W). ENGR 482/PHIL 482 and CVEN 424 taken at Texas A&M satisfy this requirement. Other CVEN courses may be approved as W courses at a later date. A grade of C or better is required in these courses.

A grade of C or better is required in all science, mathematics and engineering courses taken to satisfy degree requirements.

**Total Program Hours 128**
Civil Engineering - BS, Geotechnical Engineering Track

The Geotechnical Engineering Track to fulfill the BS in Civil Engineering degree emphasizes specialized coursework in applied soil mechanics and foundation engineering, as well as civil engineering sub-disciplines with strong geotechnical engineering connections such as structures, water resources, construction, transportation, environmental, coastal and ocean engineering. The track is appropriate for those wishing to pursue careers in engineering design and management of infrastructure in a wide array of sectors that can include energy, transportation, and water resources.

Program Requirements

The freshman year is identical for degrees in aerospace engineering, biomedical engineering, civil engineering, computer engineering, electrical engineering, industrial engineering, mechanical engineering, nuclear engineering, ocean engineering, and petroleum engineering thus allowing a student with adequate grades to change majors within the Dwight Look College of Engineering. The freshman year is slightly different for chemical engineering and radiological health engineering in that students take CHEM 101/111 and CHEM 102/112 instead of CHEM 107/117. Students pursuing degrees in biological and agricultural engineering, computer science, engineering technology, or industrial distribution should refer to the specific curriculum for these majors. It is recognized that many students will change the sequence and number of courses taken in any semester. Deviations from the prescribed course sequence, however, should be made with care to ensure that prerequisites for all courses are met. In addition to the freshman year curriculum listed below, students should refer to the specific curriculum for each major for other requirements. Before commencing course work in the major, students must be admitted to the major or have the approval of the department.

1. A grade of C or better is required.
2. Entering students will be given a math placement exam. Test results will be used in selecting the appropriate starting course which may be at a higher or lower level.
3. Of the 18 hours shown as University Core Curriculum electives, 3 must be from creative arts, 3 from social and behavioral sciences, 6 from American history, and 6 from government/political science. The required 6 hours from international and cultural diversity may be met by courses satisfying the creative arts, social and behavioral sciences, and American history requirements if they are also on the approved list of international and cultural diversity courses.
4. BMEN, CHEN and RHEN require 8 hours of freshman chemistry, which may be satisfied by CHEM 101/CHEM 111 or CHEM 107/CHEM 117 and CHEM 102/CHEM 112; Credit by Examination (CBE) for CHEM 101/CHEM 111 or CHEM 107/CHEM 117 and CHEM 102/CHEM 112; or 8 hours of CBE for CHEM 101/CHEM 111 or CHEM 107/CHEM 117 and CHEM 102/CHEM 112.

Civil Engineering - BS, Structural Engineering Track

The Structural Engineering track to fulfill the BS in Civil Engineering degree provides coursework in the areas of structural mechanics and structural analysis that equip the student to analyze and design the frameworks that support buildings, bridges, offshore installations and civil infrastructure projects. This track is appropriate for those with strong analytical and computing skills wishing to apply them in the design of engineered facilities. Structural engineers create simulation models of structural systems and use them to properly proportion the beams, columns and floor systems found in buildings and other civil projects to safely resist the forces found in their environment.

---

5 A total of 33 hours of technical electives is required. Technical electives are divided into four categories: science courses, breadth courses, focus courses, and capstone design courses. The choice of courses to be taken in each of the four categories depends on the track chosen and must be made in consultation with the student’s advisor and/or the Civil Engineering Undergraduate Student Services Office. Capstone design courses must include more than one civil engineering context.

6 All students must take at least two courses in their major that are designated as writing intensive (W). ENGR 482/PHIL 482 and CVEN 424 taken at Texas A&M satisfy this requirement. Other CVEN courses may be approved as W courses at a later date. A grade of C or better is required in these courses.

A grade of C or better is required in all science, mathematics and engineering courses taken to satisfy degree requirements.

---

**Total Program Hours 128**

**Transportation Engineering Track - Technical Electives**

Technical electives for the BS in Civil Engineering, Transportation Engineering Track are composed of a SCIENCE course (3 semester credit hours), BREADTH courses (12-18 semester credit hours), FOCUS courses (9-15 semester credit hours), and a CAPSTONE DESIGN course (3 semester credit hours), as delineated below, for a total of 33 semester credit hours. A substitution for any course in the track must be approved in writing by the Civil Engineering Undergraduate Student Services Office, CE Building, Room 140.

**SCIENCE Course (3 Semester Credit Hours Required)**

Choose 3 Semester Credit Hours From:

- ATMO 201 Weather and Climate
- BESC 201 Introduction to Bioenvironmental Sciences
- GEOG 203 Planet Earth
- GEOL 320 Geology for Civil Engineers
- GEOS 105 Introduction to Environmental Geoscience

**BREADTH Courses (12-18 Semester Credit Hours Required)**

Choose 3-9 Semester Credit Hours From:

- CVEN 307 Transportation Engineering 3
- CVEN 342 Materials of Construction 3
- CVEN 343 or Portland Cement Concrete Materials for Civil Engineers
- CVEN 444 Structural Concrete Design 3
- CVEN 301 Environmental Engineering 3
- CVEN 339 Water Resources Engineering 3
- CVEN 349 Civil Engineering Project Management 3
- CVEN 365 Introduction to Geotechnical Engineering 3
- CVEN 446 Structural Steel Design 3

**FOCUS Courses (9-15 Semester Credit Hours Required)**

Choose 3-9 Semester Credit Hours From:

- CVEN 403 Applied Civil Engineering Surveying 2
- CVEN 417 Bituminous Materials
- CVEN 418 Highway Materials and Pavement Design
- CVEN 423 Geomatics for Civil Engineering
- CVEN 451 Public Works Engineering
- CVEN 455 Urban Stormwater Management
- ISEN 430 Human Factors and Ergonomics

**CAPSTONE DESIGN Course (3 Semester Credit Hours Required)**

CVEN 456 Highway Design 3

1 The sum of semester credit hours of Breadth and Focus courses must be at least 27.
Differential Equations

must be admitted to the major or have the approval of the department. Before commencing course work in the major, students should refer to the specific curriculum for each major for other courses are met. In addition to the freshman year curriculum listed below, however, should be made with care to ensure that prerequisites for all courses are met in any semester. Deviations from the prescribed course sequence, that many students will change the sequence and number of courses taken in any semester. Deviations from the prescribed course sequence, should refer to the specific curriculum for these majors. It is recognized that many students will change the sequence and number of courses taken in any semester. Deviations from the prescribed course sequence, however, should be made with care to ensure that prerequisites for all courses are met. In addition to the freshman year curriculum listed below, students should refer to the specific curriculum for each major for other requirements. Before commencing course work in the major, students must be admitted to the major or have the approval of the department.

Civil Engineering - BS, Water Resources Engineering Track

The Water Resources Engineering Track to fulfill the BS in Civil Engineering degree emphasizes specialized coursework in applied hydraulics and hydrology as well as civil engineering sub-disciplines with strong water resources connections such as environmental, transportation, geotechnical, and coastal engineering. The track is appropriate for those wishing to pursue careers in engineering design and management for water quantity and quality issues.

Program Requirements

The freshman year is identical for degrees in aerospace engineering, biomedical engineering, civil engineering, computer engineering, electrical engineering, industrial engineering, mechanical engineering, nuclear engineering, ocean engineering, and petroleum engineering thus allowing a student with adequate grades to change majors within the Dwight Look College of Engineering. The freshman year is slightly different for chemical engineering and radiological health engineering in that students take CHEM 101/111 and CHEM 102/112 instead of CHEM 107/117. Students pursuing degrees in biological and agricultural engineering, computer science, engineering technology, or industrial distribution should refer to the specific curriculum for these majors. It is recognized that many students will change the sequence and number of courses taken in any semester. Deviations from the prescribed course sequence, however, should be made with care to ensure that prerequisites for all courses are met. In addition to the freshman year curriculum listed below, students should refer to the specific curriculum for each major for other requirements. Before commencing course work in the major, students must be admitted to the major or have the approval of the department.

**Total Program Hours 128**

**Water Resources Engineering Track - Technical Electives**

Technical electives for the BS in Civil Engineering, Water Resources Engineering Track are composed of a SCIENCE course (3 semester credit hours), BREADTH courses (15 semester credit hours), FOCUS courses (12 semester credit hours), and a CAPSTONE DESIGN course (3 semester credit hours), as delineated below, for a total of 33 semester credit hours. A substitution for any course in the track must be approved in writing by the Civil Engineering Undergraduate Student Services Office, CE Building, Room 140.

**SCIENCE Course (3 Semester Credit Hours Required)**
Choose 3 Semester Credit Hours From:
- ATM 201  Weather and Climate
- BIOL 206  Introductory Microbiology

**BREADTH Courses (15 Semester Credit Hours Required)**
- CVEN 301  Environmental Engineering
- CVEN 307  Transportation Engineering
- CVEN 339  Water Resources Engineering
- CVEN 342  Materials of Construction
- CVEN 436  or CVEN 434  or Portland Cement Concrete Materials for Civil Engineers
- CVEN 365  Introduction to Geotechnical Engineering

**FOCUS Courses (12 Semester Credit Hours Required)**
Choose 6-9 Semester Credit Hours From:
- CVEN 455  Urban Stormwater Management
- CVEN 458  Hydraulic Engineering of Water Distribution Systems
- CVEN 463  Engineering Hydrology

Choose 3-6 Semester Credit Hours From:
- CVEN 402  Engineered Environmental Systems
- CVEN 403  Applied Civil Engineering Surveying
- CVEN 406  Environmental Protection and Public Health
- CVEN 413  Natural Environmental Systems
- CVEN 423  Geomatics for Civil Engineering
- CVEN 454  Urban Planning for Engineers
- OCEN 336  Fluid Dynamics Laboratory
- OCEN 400  Basic Coastal Engineering

**CAPSTONE DESIGN Course (3 Semester Credit Hours Required)**
- CVEN 400  Design Problems in Civil Engineering

1 CVEN 403 is a 2 semester credit hour course. Students must typically earn an additional 1 semester credit hour of Focus course credit and should consult with their advisors for guidance on appropriate courses with which to earn this credit.

**Ocean Engineering - BS**

The ocean engineering curriculum includes courses in written communication skills, language, philosophy and culture, social sciences and American heritage to ensure a well-rounded education. Courses that directly apply to ocean engineering include: coastal engineering, dynamics of ocean systems, engineering design of offshore and coastal systems, fluid mechanics, marine hydrodynamics, naval architecture, numerical methods, ocean engineering laboratory, ocean wave mechanics, oceanography, offshore and coastal structures, underwater acoustics, and underwater and moored system design.

**Program Requirements**

The freshman year is identical for degrees in aerospace engineering, biomedical engineering, civil engineering, computer engineering, electrical engineering, industrial engineering, mechanical engineering, nuclear engineering, ocean engineering, and petroleum engineering thus allowing
a student with adequate grades to change majors within the Dwight Look College of Engineering. The freshman year is slightly different for chemical engineering and radiological health engineering in that students take CHEM 101/111 and CHEM 102/112 instead of CHEM 107/117. Students pursuing degrees in biological and agricultural engineering, computer science, engineering technology, or industrial distribution should refer to the specific curriculum for these majors. It is recognized that many students will change the sequence and number of courses taken in any semester. Deviations from the prescribed course sequence, however, should be made with care to ensure that prerequisites for all courses are met. 1. A grade of C or better is required.
2. Entering students will be given a math placement exam. Test results will be used in selecting the appropriate starting course which may be at a higher or lower level.
3. Of the 18 hours shown as University Core Curriculum electives, 3 must be from creative arts, 3 from social and behavioral sciences, 6 from American history, and 6 from government/political science. The required 6 hours from international and cultural diversity may be met by courses satisfying the creative arts, social and behavioral sciences, and American history requirements if they are also on the approved list of international and cultural diversity courses.
4. BMEN, CHEN and RHEN require 8 hours of freshman chemistry, which may be satisfied by CHEM 101/CHEM 111 or CHEM 107/CHEM 117 and CHEM 102/CHEM 112; Credit by Examination (CBE) for CHEM 101/CHEM 111 or CHEM 107/CHEM 117 plus CHEM 102/CHEM 112; or 8 hours of CBE for CHEM 101/CHEM 111 or CHEM 107/CHEM 117 and CHEM 102/CHEM 112.

\(^5\) All students must take at least two courses in their major that are designated as writing intensive (W). ENGR 482/PHIL 482 and OCEN 410 taken at Texas A&M satisfy this requirement.

\(^6\) The technical elective program must be approved by the department head or the undergraduate advisor. Technical electives are chosen from the approved technical elective list, and at least 3 credit hours must be engineering design.

A grade of C or better is required in all science, mathematics and engineering courses taken to satisfy degree requirements.

**Total Program Hours 131**

**Department of Computer Science & Engineering**

**Computer Science**

The curriculum in computer science is designed to prepare students to enter the rapidly expanding computer field. Curricula and courses are based upon recommendations by the Institute of Electrical and Electronic Engineering Computer Society and the Association for Computing Machinery. The Computer Science program is accredited by the Computing Accreditation Commission of ABET, www.abet.org.

**Program Mission**

The mission of the computer science program at Texas A&M University is to prepare intellectual, professional, and ethical graduates, capable of meeting challenges in the field of Computer Science; and to coordinate with other parts of the university to facilitate the effective use of educational resources by sharing cross-disciplinary courses.

**Program Objectives**

1. Graduates who choose to enter the workforce will become productive and valuable professionals in their field.
2. Graduates who choose to pursue advanced degrees will be able to gain admission to graduate programs and will become successful graduate students.
3. Graduates will understand the importance of lifelong learning to adapt to new technologies, tools and methodologies with the ability to respond to a changing world.

The four-year undergraduate curriculum in computer science at Texas A&M provides a sound preparation in computing, as well as in science, mathematics, English, and statistics. Students take a broad set of core computer science courses in the first two years, which exposes them to the main concepts in computing. During the last two years, students take elective computer science courses drawn from four tracks (theory, computer systems, software, and information and intelligent systems) to provide both breadth and depth. The electives can be used to tailor the curriculum to match the student’s interests. Graduate courses may be taken by qualified students for some of the electives.

A major in computer science includes a 12-hour area of concentration. This allows students to design a course of study that complements their computer science coursework and takes advantage of opportunities offered by other departments across the University.

The Department of Computer Science and Engineering has significant computer resources of its own, shares resources with other departments and makes use of University systems. Departmental resources for students include modern workstations; large computer servers; disk servers; and massively parallel systems as well as network access to the University supercomputers.

Students must submit a formal degree plan during the first full semester in the department. Departmental advisors are available for assistance.

**Computer Engineering**

The Computer Engineering curricula provide a balanced view of hardware, software, hardware-software trade-offs, analysis, design, and implementation techniques. It is a dynamic and broadly interdisciplinary field that continues to experience rapid professional growth that impacts every area of human endeavor. The Computer Engineering program is accredited by the Engineering Accreditation Commission of ABET, www.abet.org.

**Program Mission**

The mission of the Computer Engineering program is to provide students with an education that ensures an excellent understanding of hardware and software systems and the necessary system design and development skills, and that fosters professional curiosity and imagination that drives them throughout their career.

The program will stimulate and challenge the students with an exceptional, highly motivated faculty that shares its knowledge and excitement about Computer Engineering, well designed undergraduate and graduate curricula, research opportunities at all levels, and a first-class educational infrastructure.

The program strives to produce graduates who are well prepared to excel in industry, academia and government, and who will take on leadership roles in shaping the technological landscape of the future.

**Program Objectives**

In support of this mission, the Computer Engineering program has defined the following educational objectives:

1. Graduates of the program will have the necessary knowledge, both in breadth and depth, to pursue the practice, or advanced study, of Computer Engineering.
2. Graduates of the program will understand the importance of life-long learning, and be prepared to learn and understand new technological developments in their field.
3. Graduates of the program will understand the technical, social and ethical context of their engineering contributions.
4. Graduates of the program will develop the communication, teamwork, and leadership skills necessary to carry on the legacy of excellence of an Aggie Engineer.

The program periodically evaluates these objectives and assesses the level at which they are met. Input in this ongoing effort is provided by alumni, employers and recruiters, the faculty, and by external advisors to the program. This feedback drives the continuous improvement both of
individual courses and of the overall curriculum. For more information on this process contact the Computer Engineering Program website.

Throughout this program, the student works with state-of-the-art computers and laboratory equipment and is exposed to the most recent analytical techniques and technological developments. Significant association with the program’s faculty, who are actively engaged in research and professional consulting activities, serves to acquaint the student with the opportunities and rewards available to the practicing Computer Engineering professional.

**Majors**

- Bachelor of Science in Computer Science (p. 328)
- Bachelor of Science in Computer Engineering, Computer Science Track (p. 327)

**Minors**

- Computer Science Minor (p. 329)

## Computer Engineering - BS, Computer Science Track

The curriculum is designed to cover the engineering aspects of both hardware and software—a total computer systems perspective. All computer engineering students take courses in the following areas: electrical circuits, electronics, digital circuits, computer architecture ranging from microcomputers to mainframes, interfacing, programming languages ranging from assembler to high level, data structures, analysis of algorithms, operating systems, software engineering and microcomputer systems. A solid foundation in the basic sciences of physics, chemistry and mathematics is used to support these courses.

There are two distinct tracks in this curriculum, the **Electrical Engineering Track** and the **Computer Science Track**, both culminating in the same Computer Engineering degree. The tracks are substantially similar, each providing a broad coverage of the computer engineering discipline, but each has a slightly different emphasis. Note that students in either track can take courses from the other as electives, or they can use their electives to further specialize within their own track. Although students are required to select a track immediately upon entering the Computer Engineering program, it is usually possible to change tracks as late as the junior year.

The Computer Science track of the Computer Engineering degree provides students the freedom to enhance their knowledge in the broad range of topics comprising Computer Engineering: computer networks, computer architecture, artificial intelligence, computer graphics, robotics, real-time computing, computer languages, microcomputers, VLSI, and large-scale hardware and software systems. The track is primarily administered by the Department of Computer Science and Engineering and encompasses nearly all of the core material of the Computer Science degree, but its greater emphasis on design and engineering fundamentals prepares the student for registration as a professional engineer.

### Program Requirements

The freshman year is identical for degrees in aerospace engineering, biomedical engineering, civil engineering, computer engineering, electrical engineering, industrial engineering, mechanical engineering, nuclear engineering, ocean engineering, and petroleum engineering thus allowing a student with adequate grades to change majors within the Dwight Look College of Engineering. The freshman year is slightly different for chemical engineering and radiological health engineering in that students take CHEM 101/111 and CHEM 102/112 instead of CHEM 107/117. Students pursuing degrees in biological and agricultural engineering, computer science, engineering technology, or industrial distribution should refer to the specific curriculum for these majors. It is recognized that many students will change the sequence and number of courses taken in any semester. Deviations from the prescribed course sequence, however, should be made with care to ensure that prerequisites for all courses are met. In addition to the freshman year curriculum listed below, students should refer to the specific curriculum for each major for other requirements. Before commencing course work in the major, students must be admitted to the major or have the approval of the department.

The required 6 hours from international and cultural diversity may be met by courses satisfying the creative arts, social and behavioral sciences, and American history requirements if they are also on the approved list of international and cultural diversity courses.
4. BMEN, CHEN and RHEN require 8 hours of freshman chemistry, which may be satisfied by CHEM 101/CHEM 111 or CHEM 107/CHEM 117 and CHEM 102/CHEM 112; Credit by Examination (CBE) for CHEM 101/CHEM 111 or CHEM 107/CHEM 117 plus CHEM 102/CHEM 112; or 8 hours of CBE for CHEM 101/CHEM 111 or CHEM 107/CHEM 117 and CHEM 102/CHEM 112.

**Computer Science - BS**

The four-year undergraduate curriculum in computer science at Texas A&M provides a sound preparation in computing, as well as in science, mathematics, English, and statistics. Students take a broad set of core computer science courses in the first two years, which exposes them to the main concepts in computing. During the last two years, students take elective computer science courses drawn from four tracks (algorithms and theory, computer systems, software, and information and intelligent systems) to provide both breadth and depth. The electives can be used to tailor the curriculum to match the student's interests. Graduate courses may be taken by qualified students for some of the electives.

A major in computer science includes a 12-hour area of concentration. This allows students to design a course of study that complements their computer science coursework and takes advantage of opportunities offered by other departments across the University.

Total Semester Credit Hours: 18

Students must make a grade of "C" or better in all courses.

Completion of lower-level courses with GPA of 2.75 or better required before application to the minor.

Department of Electrical & Computer Engineering

Electrical engineers develop and apply the theories of electricity, electronics and electromagnetics to analyze and design systems which generate or use electricity. Examples of such systems are those for power generation and transmission, computation, communication, automatic control and instrumentation. The devices that practicing engineers work with and design include integrated circuits (VLSI), waveguides, antennas, computers and other digital systems, rotating machines and motor drives, lasers and optical fibers.

The curriculum is designed to prepare the undergraduate for work in the highly diverse electrical engineering profession. A solid foundation in physics, chemistry and mathematics is used to support courses in the fundamentals of electrical engineering. The use of computers is integrated throughout the curriculum, and basic studies in circuits, electronics, electromagnetic fields and digital logic lead to a flexible program of electives in the junior and senior year. Electives may be chosen from the broad categories of controls/communications/signal processing, computer engineering, electronics, electro-physics/electro-optics/microwaves, power systems/power electronics, and biomedical imaging/sensing and systems.
Laboratory work is structured to first familiarize the student with the basic concepts and then to apply these concepts to engineering problems.

Students who expect to enroll in electrical engineering after attending another college or university should note that there is a five-semester sequence of electrical engineering courses in the curriculum. If the prerequisites are satisfied, transfer students may complete this sequence in two years and one summer session.

**Educational Program Objectives**

Activities of the Electrical and Computer Engineering Department including research, teaching, and professional and community service revolve around the threefold mission of the department:

- To create new knowledge and challenge young minds by participation in the process of discovery and invention;
- To educate electrical and computer engineers with a solid background of fundamentals, stretching their imagination and preparing them for an exciting future;
- To serve the society through research, education and outreach activities.

Undergraduate education plays a major part in helping the department to achieve its mission. As such, the department has established a set of undergraduate educational program objectives which will help to insure that the mission of the department is upheld. These program objectives represent a concise, measurable set of descriptions of what the department is trying to accomplish through its undergraduate program. Furthermore, these objectives are designed to be observable in our graduates in a time window of two to five years after graduation from the program.

The Department of Electrical and Computer Engineering’s three Undergraduate Educational Program Objectives are as follows:

1. Objective 1—Graduates who choose to pursue a career in industry or government will become productive and valuable engineers.
2. Objective 2—Graduates who choose to pursue advanced degrees will be able to gain admission to graduate programs and will become successful graduate students.
3. Objective 3—in keeping with the legacy of an Aggie Engineer, graduates will be successful in attaining positions of leadership in their professional careers.

The extent to which the department is meeting these objectives is periodically assessed through such instruments as alumni surveys, employer/recruiter surveys, graduating senior surveys and Fundamentals of Engineering exam results. Our goal is to continually improve the program’s ability to meet these educational objectives. The electrical engineering curriculum and individual course contents are periodically evaluated and adjusted in order to further support our ability to achieve the program objectives. The Electrical Engineering program is accredited by the Engineering Accreditation Commission of ABET, www.abet.org. More information on these efforts can be found at the Department of Electrical and Computer Engineering (http://engineering.tamu.edu/electrical) website by clicking on the link for ABET Accreditation. The department welcomes comments and suggestions from any interested individuals regarding the above program objectives and/or how the department can better meet these objectives.

Before commencing course work in the major, students must be admitted to the major or have the approval of the department.

Electrical & Computer Eng  
PhD, Stanford University, 2007  

Qian, Xiaoning, Assistant Professor  
Electrical & Computer Eng  
PhD, Yale University, 2005
The curriculum is designed to cover the engineering aspects of both hardware and software—a total computer systems perspective. All computer engineering students take courses in the following areas: electrical circuits, electronics, digital circuits, computer architecture ranging from microcomputers to mainframes, interfacing, programming languages ranging from assembler to high level, data structures, analysis of algorithms, operating systems, software engineering and microcomputer
systems. A solid foundation in the basic sciences of physics, chemistry and mathematics is used to support these courses.

There are two distinct tracks in this curriculum, the Electrical Engineering Track and the Computer Science Track, both culminating in the same Computer Engineering degree. The tracks are substantially similar, each providing a broad coverage of the computer engineering discipline, but each has a slightly different emphasis. Note that students in either track can take courses from the other as electives, or they can use their electives to further specialize within their own track. Although students are required to select a track immediately upon entering the Computer Engineering program, it is usually possible to change tracks as late as the junior year.

The Electrical Engineering track of the Computer Engineering degree places stronger emphasis on digital Very Large Scale Integrated (VLSI) circuits and systems, microprocessor interfacing and system design, and computer system architecture and design. The track is primarily administered by the Department of Electrical and Computer Engineering and is designed to encompass nearly all of the core material of the Electrical Engineering degree but provides much more depth in computing than is possible within the context of an Electrical Engineering degree.

Before commencing course work in the major, students must be admitted to the major or have the approval of the department.

Program Requirements

The freshman year is identical for degrees in aerospace engineering, biomedical engineering, civil engineering, computer engineering, electrical engineering, industrial engineering, mechanical engineering, nuclear engineering, ocean engineering, and petroleum engineering thus allowing a student with adequate grades to change majors within the Dwight Look College of Engineering. The freshman year is slightly different for chemical engineering and radiological health engineering in that students take CHEM 101/111 and CHEM 102/112 instead of CHEM 107/117. Students pursuing degrees in biological and agricultural engineering, computer science, engineering technology, or industrial distribution should refer to the specific curriculum for these majors. It is recognized that many students will change the sequence and number of courses taken in any semester. Deviations from the prescribed course sequence, however, should be made with care to ensure that prerequisites for all courses are met. In addition to the freshman year curriculum listed below, students should refer to the specific curriculum for each major for other requirements. Before commencing course work in the major, students must be admitted to the major or have the approval of the department.

| Total Semester Credit Hours | 18 |

Select course from ECEN 300-499 (p. 725) except ECEN 314, ECEN 325, ECEN 405, and ECEN 485.

Students must make a grade of "C" or better in all courses.

Further Requirements: A minimum grade point average of 2.75 is required for entering the minor. Prerequisite coursework includes the calculus sequence, MATH 308, and PHYS 208 or equivalents. Students majoring in Computer Engineering will not be permitted to minor in Electrical Engineering since the coursework prescribed for the minor is required coursework for the Computer Engineering degree.

Department of Engineering Technology and Industrial Distribution

The Department of Engineering Technology and Industrial Distribution offers baccalaureate degree programs in engineering technology and industrial distribution. These degrees are distinct from engineering and each other, but they share the features of building on a sound foundation of mathematics and basic sciences, including a strong core of technical courses, emphasizing written and oral communications and containing a significant education in the social sciences and the language, philosophy and culture. The curricula emphasize the latest state-of-the-art technologies, innovation and entrepreneurship. Established procedures for the development, production, installation, service and sales of technological products and systems are treated. Because these programs are highly applied and equipment/hardware oriented, most of the department’s courses have hands on laboratories to provide in-depth experience with equipment.
The mission of the Department of Engineering Technology and Industrial Distribution is to:

- maintain nationally recognized programs in engineering technology and industrial distribution
- focus on educating highly-qualified students with hands-on skills, providing them with experiences in advanced integration of both conventional and emerging technologies, a unique understanding of management and business practices, and an entrepreneurial point of view
- provide leadership within the COE and university in interdisciplinary applied research, to include the development and deployment of new technology
- promote and develop long term partnerships with industry and government that foster enhancements and interactions in education, research, and professional development

Department Academic Policies

The Department of Engineering Technology and Industrial Distribution (ETID) imposes the following academic requirements in addition to those imposed by the University (Texas A&M University Student Rules) and college. For complete details concerning these and other ENTC academic policies, students should contact the ETID Undergraduate Advising Office and are referred to the ETID (http://engineering.tamu.edu/etid) website.

The academic policies apply to any student who is identified as a major in an ETID program and to any student who seeks admission to an ETID program. Students are encouraged to use these academic policies, along with other important information sources, for guidance in their undergraduate programs. Official information sources include the Texas A&M University Undergraduate Catalog, the Texas A&M University Student Rules, the Texas A&M University online course schedule, Howdy (http://howdy.tamu.edu), departmental academic policies, academic advisors, program coordinators, faculty advisors, the ETID website, and University and departmental distribution lists.

Transfer students, regardless of transfer hours must meet the same standards and criteria for admission to a major degree sequence as shown above. Students currently enrolled in another major at Texas A&M University who desire to change their major field of study to a major in ETID must fill out a Change of Curriculum application. Students are encouraged to be advised at the earliest possible time and to meet the College of Engineering advising requirements. A student who registers for a course for which he/she lacks the necessary prerequisite course(s) and/or the prerequisite grade requirement will be required to drop the course. If a student is administratively dropped from a course, the student is responsible for all financial obligations associated with the drop.

A student is responsible for checking the prerequisites for each course to ensure the prerequisite requirements have been satisfied. A student who registers for a course for which he/she lacks the necessary prerequisite course(s) and/or the prerequisite grade requirement will be required to drop the course. A student who is told to drop a course and is still enrolled by the deadline set each semester may be administratively dropped by the department. If a student is administratively dropped from a course, the student is responsible for all financial obligations associated with the drop. An administrative drop may adversely impact (including, but not limited to): health insurance benefits, financial aid, athletic eligibility, INS status, veterans’ benefits, and eligibility to participate in extracurricular activities.

The department encourages students to participate in industrial internships or the Cooperative Education Program to acquire practical experience to complement their engineering technology education.

Before commencing course work in the major, students must be admitted to the major or have the approval of the department.

Electronic Systems Engineering Technology (ESET)

Electronic Systems Engineering Technology (ESET) prepares students for careers in electronic product and system development across a diverse range of industries that include the medical, power, computer networking, automotive, telecommunications, and quality of life sectors.

The Electronic Systems Engineering Technology program is accredited by the Engineering Technology Accreditation Commission of ABET, www.abet.org (http://www.abet.org). For more information about the Electronic Systems Engineering Technology (ESET) program including the mission and program educational objectives, please see the program requirements (p. 337).

Graduates are awarded the Bachelor of Science in Electronics Systems Engineering Technology.

Manufacturing and Mechanical Engineering Technology (MMET)

The Manufacturing and Mechanical Engineering Technology program is accredited by the Engineering Technology Accreditation Commission of ABET, www.abet.org (http://www.abet.org). For more information about the Manufacturing and Mechanical Engineering Technology (MMET) program including the mission and program educational objectives, please see the program requirements (p. 338).

Graduates of this program are awarded a Bachelor of Science in Engineering Technology.

Industrial Distribution (IDIS)

Industrial distribution prepares men and women for sales engineering, sales management and mid-management positions with manufacturers who sell through distributors and with wholesale distributors who purchase, warehouse, sell, distribute and service a wide variety of industrial products. Industry segments include: automation solutions; general line; building materials; chemical and petrochemical; electrical; electronics; semiconductor; fluid power; heating, ventilation and air conditioning; mechanical power; metals; plastics; plumbing; safety equipment; specialty tools; and welding; oil & gas; defense; material handling; healthcare; automotive; heavy equipment; packaging; and logistics. The day-to-day challenges faced by the industrial distributor or the manufacturer’s representative require the person to be a professional

- Bachelor of Science in Engineering Technology - Manufacturing and Mechanical Engineering Option (p. 338)
- Bachelor of Science in Industrial Distribution (p. 339)

Minors

- Embedded Systems Integration Minor (p. 341)

Masters

- Master of Industrial Distribution

Electronic Systems Engineering Technology - BS

Electronic Systems Engineering Technology (ESET) prepares students for careers in electronic product and system development across a diverse range of industries that include the medical, power, computer networking, automotive, telecommunications, and quality of life sectors. While graduates of the program receive a rigorous technical education and typically take engineering and technology positions within industry, they are also well prepared for positions in technical sales and project management. The ESET curriculum is based on a strong underpinning of engineering math and science courses followed by a core technical sequence. This core includes analog and digital electronics, embedded systems design, real-time software development using C and assembly language, wired/wireless data communications data communications, instrumentation and control. Throughout their curriculum, students work on multiple open-ended projects to design, implement, test, and evaluate hardware and software systems. One of the most unique aspects of the Electronic Systems Engineering Technology program is that almost every technical course provides a hands-on laboratory experience using facilities equipped with state-of-the-art computer systems, test equipment, and industry-standard computer-aided design and analysis packages. The technical curriculum is augmented with coursework in written and oral communications, product/system development, device/system testing and technical project management. A team-based industry-sponsored capstone design sequence provides a challenging opportunity to apply technical, managerial, and communications skills to solving a real-world problem.

ESET Program Mission

The Electronic Systems Engineering Technology Program at Texas A&M University prepares graduates for immediate impact and long-term career success by providing a real-world experiential education coupled with personalized undergraduate experiences in electronics product development, test, system integration, and engineering research.

ESET Program Educational Objectives

The Electronic Systems Engineering Technology Program at Texas A&M has as its primary educational objectives to produce graduates who, after three to five years:

- possess the technical skills to be immediately productive and have successful careers in regional, state or national electronic product and system development industries
- demonstrate increasing levels of leadership and responsibility during their careers
- exhibit a commitment to professional ethics in their professional career
- display a desire for life-long learning through continued education, technical training, and/or professional development

A continuous cycle of assessment and program improvement is used to ensure that these objectives are being met. Through interactions with industry and academic partners, the Electronic Systems Engineering Technology program continues to offer a state-of-the-art curriculum that produces successful graduates.

1 Completion of ENGL 104, MATH 151, MATH 152, CHEM 107/117, PHYS 218 with C or better required for degree sequence.
2 Course used to calculate in-major grade point ratio. Grade of C or better is required.
3 Entering students will be given a placement test in mathematics. Test results will be used in selecting the appropriate starting course which may be at a higher level or lower level.
4 Of the 18 hours shown as University Core Curriculum electives, 3 must be from creative arts, 3 from social and behavioral sciences, 6 from American history, and 6 from government/political science. The required 6 hours from international and cultural diversity may be met by courses satisfying the creative arts, social and behavioral sciences, and American history requirements if they are also on the approved list of international and cultural diversity courses.
5 See departmental advisor for a list of approved electives.

This curriculum lists the minimum number of classes required for graduation. Additional courses may be taken.

Engineering Technology - BS, Manufacturing and Mechanical Engineering Option

Manufacturing and mechanical engineering technology (MMET) prepares students for dynamic careers in industry. Graduates are versatile and effective in diverse areas that require understanding of the dependencies among material properties, product design, costs, manufacturing systems, and process technologies. The student views manufacturing from an enterprise and system perspective, recognizing the importance of customer and supplier interactions. To meet these diverse needs, this specialty provides a foundation of mathematics, science, and specialized technical courses, as well as preparation in oral and written communication. The three main areas of concentration are product design, manufacturing systems integration and automation, and manufacturing competitiveness. Studies in these areas are supported by a solid foundation in materials and manufacturing processes.

Program Mission

The mission of the Manufacturing and Mechanical Engineering Technology program at Texas A&M University is to provide a high-quality, application-oriented education producing professionals who can effectively contribute to leadership, the advancement of manufacturing and mechanical engineering technology, and improved performance of industrial endeavors. The educational mission is complemented by applied research and the development of new interdisciplinary technology that mutually benefits the university and its industrial, governmental, and academic collaborators. The people in the program are committed to providing service and leadership in the promotion and advancement of the University and the profession.

Program Educational Objectives

The MMET program prepares students who after a few years after graduation:

• Demonstrate manufacturing and mechanical technical knowledge, problem solving skills, and implementation skills for careers in design, installation, operations, technical sales, or service functions in industry;
• Demonstrate increasing level of leadership and responsibility;
• Exhibit both immediate and sustainable productivity in a dynamic work environment.

### Industrial Distribution - BS

Industrial distribution prepares men and women for sales engineering, sales management and mid-management positions with manufacturers who sell through distributors and with wholesale distributors who purchase, warehouse, sell, distribute and service a wide variety of industrial products. Industry segments include: automation solutions; general line; building materials; chemical and petrochemical; electrical; electronics; semiconductor; fluid power; heating, ventilation and air conditioning; mechanical power; metals; plastics; plumbing; safety equipment; specialty tools; and welding. The day-to-day challenges faced by the industrial distributor or the manufacturer's representative require the person to be a professional with many capabilities. To fulfill this demand, the curriculum provides study in business, communications, information technology, applied technology, engineering and human relations. This
knowledge is applicable to the graduate in relationships with executives, managers, engineers, scientists and craftsmen while assisting them in their manufacturing, plant maintenance or construction operations. The industrial distribution graduate assists them by direct application of operations, business and product knowledge. Essentially the industrial distribution graduate becomes a special assistant in the other person's business—a challenging and rewarding profession. Graduates receive the Bachelor of Science degree in Industrial Distribution.

1. Course used to calculate in-major grade point ratio. Grade of C or better is required.
2. Completion of ENGL 104, MATH 151, MATH 152, CHEM 107/117, and PHYS 218 with a C or better in each course are required for admission to upper level.
3. Entering students will be given a placement test in mathematics. Test results will be used in selecting the appropriate starting course which may be at a higher level or lower level.
Of the 18 hours shown as University Core Curriculum electives, 3 must be from creative arts, 3 from social and behavioral sciences, 6 from American history, and 6 from government/political science. The required 6 hours from international and cultural diversity may be met by courses satisfying the creative arts, social and behavioral sciences, and American history requirements if they are also on the approved list of international and cultural diversity courses.

**Embedded Systems Integration - Minor**

Our cars, cell phones, even every-day appliances operate based on small, one-chip “computers” that sense the environment, make decisions, and control operation; essentially making our devices “smart.” These “computers” or embedded processors/microcontrollers are a fundamental component in most modern products and systems and are used across a wide range of industries that include medical, oil/gas, process control, automotive, communications, and quality of life.

The Embedded Systems Integration minor offered by the Department of Engineering Technology and Industrial Distribution teaches students about embedded systems hardware and software development and how these systems are used in modern products. The minor requires five courses (18 hours) and is available to not only engineering students but also students outside the Dwight Look College of Engineering who are interested in studying technology and understanding the devices that power our lives.

Students interested in an Embedded Systems Integration minor should see an advisor in Engineering Technology and Industrial Distribution for more information.

**Department of Industrial and Systems Engineering**

Industrial engineering is an engineering discipline devoted to the design, installation, improvement and control of integrated systems of people, materials, and facilities in a wide range of organizations that produce goods or render services. Like other engineering fields, industrial engineering is concerned with solving problems through the application of specialized knowledge in mathematics and science, as well as the principles of engineering. An important characteristic of industrial engineering is its systems approach to integrate the basic resources of production and service systems and other relevant resources, such as information and energy, in such a way as to create a smooth, efficient and competitive operation within an enterprise. Industrial and systems engineers are needed in virtually all types of enterprises, ranging from industries such as manufacturing, distribution, logistics, transportation, and construction; service sectors such as health care, telecommunications, retail, banking, and engineering consulting to government agencies, military, and non-profit organizations.

The mission of the Industrial Engineering program is to serve the state, nation, and global community by educating industrial engineering students to be well founded in engineering fundamentals and to have the knowledge and skills required to design, develop, improve, implement and control sophisticated production and service systems in an environment characterized by complex technical and social challenges. Throughout this educational process, students will be instilled with the highest standards of professional and ethical behavior. It is the intent of the undergraduate industrial engineering program to equip its graduates to achieve the following accomplishments a few years after graduation:

1. Graduates will be successful in improving operations by solving complex industrial engineering problems.
2. Graduates will demonstrate professional leadership.
3. Graduates will be instilled with the motivation and ability to accomplish professional life-long learning.

The undergraduate program in Industrial Engineering at Texas A&M University is accredited by the Engineering Accreditation Commission of ABET, www.abet.org.

Industrial Engineering students may participate in the Undergraduate Minor Program offered by Texas A&M. This program is usually comprised of 15 to 18 hours, some of which may be substituted as technical electives. The most common minors are math, business and economics. The department also has a Fast Track Program for academically qualified students who want to take selected graduate courses and receive both graduate and undergraduate credit by meeting specific requirements. The department encourages students to participate in industrial internships or the Cooperative Education Program to acquire practical experience to complement their industrial engineering education. Internships are generally encouraged during the summer months only. Students who participate in the Co-op program during three academic semesters may count the three credit hours as a technical elective in their curriculum.

Graduate degrees including the Master of Science (MS), Master of Engineering (M.Eng.), and Doctor of Philosophy (PhD) are also offered by the department in addition to the Bachelor of Science in Industrial Engineering. For graduate degree information, please see the Texas A&M University Graduate Catalog.

Before commencing course work in the major, students must be admitted to the major or have the approval of the department.

Industrial Engineering - BS

The four-year curriculum in industrial engineering at Texas A&M is designed to provide students with a solid basis in mathematics and science, as well as in engineering economics, manufacturing systems, production and inventory control, operations research, quality engineering, reliability, facilities planning and materials handling. The program culminates with a senior design course in which students apply principles and knowledge acquired through the curriculum to an actual industrial problem.

Program Requirements

The freshman year is identical for degrees in aerospace engineering, biomedical engineering, civil engineering, computer engineering, electrical engineering, industrial engineering, mechanical engineering, nuclear engineering, ocean engineering, and petroleum engineering thus allowing a student with adequate grades to change majors within the Dwight Look College of Engineering. The freshman year is slightly different for chemical engineering and radiological health engineering in that students take CHEM 101/111 and CHEM 102/112 instead of CHEM 107/117. Students pursuing degrees in biological and agricultural engineering, computer science, engineering technology, or industrial distribution should refer to the specific curriculum for these majors. It is recognized that many students will change the sequence and number of courses taken in any semester. Deviations from the prescribed course sequence, however, should be made with care to ensure that prerequisites for all courses are met. In addition to the freshman year curriculum listed below, students should refer to the specific curriculum for each major for other requirements. Before commencing course work in the major, students must be admitted to the major or have the approval of the department.

1 A grade of C or better is required.
2 Entering students will be given a math placement exam. Test results will be used in selecting the appropriate starting course which may be at a higher or lower level.
3 Of the 18 hours shown as University Core Curriculum electives, 3 must be from creative arts, 3 from social and behavioral sciences, 6 from American history, and 6 from government/political science. The required 6 hours from international and cultural diversity may be met by courses satisfying the creative arts, social and behavioral sciences, and American history requirements if they are also on the approved list of international and cultural diversity courses.
4 BMEN, CHEN and RHEN require 8 hours of freshman chemistry, which may be satisfied by CHEM 101/CHEM 111 or CHEM 107/CHEM 117 and CHEM 102/CHEM 112; Credit by Examination (CBE) for CHEM 101/CHEM 111 or CHEM 107/CHEM 117 plus CHEM 102/CHEM 112; or 8 hours of CBE for CHEM 101/CHEM 111 or CHEM 107/CHEM 117 and CHEM 102/CHEM 112.

Total Semester Credit Hours: 93

5 A total of 12 hours of technical electives is required, of which 6 hours must be industrial engineering courses. The choice of courses to be taken must be made in consultation with the student's advisor and/or the Industrial Engineering Advising Office.

The Bachelor of Science degree in Industrial Engineering requires a grade of C or better for required industrial engineering (ISEN) courses. If a course is repeated, only the most recent grade is used in fulfilling this requirement.

Total Program Hours 126

Industrial Engineering - Minor

The Department of Industrial and Systems Engineering offers a minor in Industrial Engineering.

Program Requirements

ISEN 220  Introduction to Production Systems  3
ISEN 315  Production Systems Planning  3
ISEN 420  Operations Research I  3
Select two of the following: 6
ISEN 314  Statistical Control of Quality
ISEN 315  Production Systems Planning
ISEN 316  Production Systems Operations
ISEN 421  Operations Research II
ISEN 424  Systems Simulation

Total Semester Credit Hours 15

Students must make a grade of "C" or better in all courses.

Data Center Operations Engineering - Certificate

With the rapid acceleration of technology through innovation on a global basis, industries recognize the need for young engineers who possess base line knowledge in areas of data system management and an understanding of the system level of complex data center processing systems. In both government and industry there is a growing need for undergraduate engineering students that possess the requisite knowledge and skill sets pertaining to complex data systems management and this certificate program includes a set of courses to assure students develop this knowledge and skill set. Completion of this certificate requires completion of the following educational outcomes:

1. to know and apply principles of engineering management
2. to understand principles of systems level engineering and their application to specific data center system operations
3. to be able to go beyond understanding concepts and demonstrate appropriate usage of systems engineering principles in a design context

For additional information, contact the Data Center Operations Engineering Certificate coordinator or Engineering Academic and Student Affairs, Room 129 Zachry Engineering Center, (979) 845-7200.

Program Requirements

ISEN 440  Systems Thinking  3
Select one of the following: 4
CSCE 110  Programming I
CSCE 111  Introduction to Computer Science Concepts and Programming
CSCE 206  Structured Programming in C
Select two of the following: 6
CSCE 438  Distributed Objects Programming
CSCE 444  Structures of Interactive Information
CSCE 470  Information Storage and Retrieval
ECEN 455  Digital Communications
MEEN 421  Thermal-Fluids Analysis and Design
MEEN 436  Principles of Heating, Ventilating and Air Conditioning
MEEN 461  Heat Transfer
ISEN 314  Statistical Control of Quality
ISEN 411  Engineering Management Techniques
ISEN 414  Total Quality Engineering
ISEN 421  Operations Research II
ISEN 489  Special Topics in...

Total Semester Credit Hours 13

Engineering Systems Management - Certificate

In many areas of government and industry there is a significant need for undergraduate engineering students that possess the requisite knowledge and skill sets pertaining to engineering systems management in addition to their basic engineering discipline. With the rapid acceleration of technology through innovation on a global basis, industries recognize the need for young engineers who possess base line knowledge in areas of management and an understanding of the system level of complex engineered systems. This certificate program includes a set of courses to assure students develop this knowledge and skill set.

Program Requirements

ISEN 411  Engineering Management Techniques  3
ISEN 440  Systems Thinking  3
Select two of the following: 6
AERO 426  Space System Design
Materials science and engineering involves the characterization of the physical and chemical properties of solid materials—metals and alloys, ceramics, magnetic materials, polymers, optical materials, semiconductors, superconductors, and composites—for the purpose of using, changing, or enhancing inherent properties to create or improve end products. Materials science and engineering involves examining how the microstructure (crystalline or amorphous) of a material can be changed to influence the strength, electrical conductivity, optical, or magnetic properties of a material. This field is inherently multidisciplinary, encompassing mechanical, chemical, biomedical, civil, electrical, and aerospace engineering; physics; and chemistry.

Materials science comprises the study of materials from the macro to the atomic scale—from highway building materials to carbon nanotubes—but, independent of scale, the study of materials is concerned fundamentally with the effect of structure and chemistry on the properties of materials. Materials have historically been so important that different eras of civilization were named according to the materials from which tools were fabricated; for example, the Stone Age, the Bronze Age, and the Iron Age. The development of the semiconductor spawned the modern era of fabricated; for example, the Stone Age, the Bronze Age, and the Iron Age. The development of the semiconductor spawned the modern era of fabricated; for example, the Stone Age, the Bronze Age, and the Iron Age.

Other materials scientists are on the forefront of the revolution in biotechnology, developing materials for the components of artificial joints, heart valves, and other replacement body parts. Smart materials show a tremendous potential in medical and dental applications, such as compressible stents that reform to their intended shape upon contact with body heat once inserted into an artery, ceramic cement for bone repair, or shape-memory alloys to correct misplaced teeth or spine curvature. (Smart materials have one or more properties that can be dramatically altered, such as multiviscosity oil, with a viscosity that varies with temperature.)

Related research involves developing smaller and more reliable components, such as ferromagnetic activators acting as tiny machines in military and other applications. In aerospace engineering, materials scientists are developing airframe and fuselage materials with high strength-to-weight ratios, as well as developing smart materials into integrated sensors and actuators for reconfigurable wings and other adaptive structures.

For more information, visit the Department of Materials Science and Engineering (http://engineering.tamu.edu/materials) website.

Materials Science and Engineering - Minor

The Department of Materials Science & Engineering minor degree program is designed to provide a strong materials science educational program for undergraduate engineering majors and to integrate a materials focus into their undergraduate training. It is intended for students who are interested in broadening their undergraduate major program of study to incorporate a fundamental understanding of materials processing and structure–property relationships to complement their major degree. Students will have the flexibility to select relevant coursework in order to customize this program of study to best suit the particular student’s intended area of focus through consultation with an MSEN faculty advisor. The minor program in materials science and engineering consists of a minimum of five three-hour courses for a total of 15 credit hours, with up to six credit hours in materials courses within their major. All students are required to have completed a prerequisite, such as MSEN 201—Engineering Materials: From Structure to Properties (or an equivalent course)—prior to applying for the minor. Two three-hour courses (six credit hours) are selected from a list of core MSEN undergraduate courses. The remaining three courses (nine credit hours) are selected from upper-level materials focused technical electives. With the permission of the MSEN faculty advisor, students may substitute up to two technical electives with courses from their major department with a primary focus on materials science and engineering. Completion of the minor will be recorded on the student’s university transcript.

For more information, visit the Department of Materials Science and Engineering (http://engineering.tamu.edu/materials) website.

Program Requirements

Select at least two of the following:

- MSEN 310 Structure of Materials
- MSEN 420 Polymer Science
- MSEN 460 Electronic, Optical and Magnetic Properties of Materials
- MSEN 489 Special Topics In... (Mechanical Behavior of Materials)
- MSEN 489 Special Topics In... (Materials Corrosion)
- MSEN 489 Special Topics In... (Processing and Performance)
- MSEN 489 Special Topics In... (Nanoscience and Nanomaterials)
- MSEN 489 Special Topics In... (Fundamentals of Ceramics)
- MSEN 685/491 Directed Studies

Total Semester Credit Hours 15

1. Upon consultation with the materials science faculty advisor, up to 2 upper-level technical electives in the student's major department may be accepted in place of these courses.
2. Or additional courses from first list.
3. Maximum of 3 credit hours may be applied toward minor.

Students must make a grade of "C" or better in all courses.

Student must achieve an overall GPA of 2.5 in approved minor courses.

Department of Mechanical Engineering

Mechanical engineering is a highly diversified profession. The mechanical engineer designs machines, devices, various products and control systems, and works with the generation, conversion, transmission, and utilization of mechanical and thermal power. Assignments often include analysis and synthesis of mechanical, thermal, and fluid systems. Mechanical engineers are also responsible for characterization, specification, and analysis of materials used in design and manufacturing. Manufacturing systems, robotics, electromechanical devices, and control systems are also the purview of the mechanical engineer. Graduates in mechanical engineering are among the most versatile engineers and enjoy professional employment in industry, government, consulting, and research organizations. The undergraduate program in Mechanical Engineering at Texas A&M University is accredited by the Engineering Accreditation Commission of ABET, www.abet.org.

The work of mechanical engineers varies from general engineering to numerous, narrow specialties, as required by the wide variety of employers. A general list, though not in any way exhaustive, of the areas of professional employment opportunities available to mechanical engineers includes: design, construction, controls, materials specification and evaluation, analysis of thermal systems, fluid and solid mechanics, manufacturing, plant engineering, research and development, and technical sales. Many mechanical engineers are promoted to management and administrative positions as well.

The mission of the Department of Mechanical Engineering is to serve the students of Texas A&M University, the State of Texas, and the nation by:

- providing quality education that is well-grounded in the fundamental principles of engineering, fostering innovation and preparing students for leadership positions and successful careers in industry, government, and academia;
• advancing the knowledge base of mechanical engineering to support the competitiveness of existing industry and to spawn new economic development in Texas and the nation through active involvement in basic and applied research; and
• providing professional development opportunities for practicing engineers through continuing education, service, and outreach activities.

**Majors**

- Bachelor of Science in Mechanical Engineering (p. 348)

---

**Mechanical Engineering - BS**

The objectives of the Mechanical Engineering program are to produce graduates who will:

1. Have successful careers, and become leaders, in industry and the public sector.
2. Appropriately apply acquired knowledge, work well with other people, effectively communicate.
3. Successfully pursue advanced studies, if they so choose, and subsequently contribute to the development of advanced concepts and leading edge technologies.

The educational outcomes for the Mechanical Engineering program are that students will attain:

1. An ability to function on multi-disciplinary teams.
2. An ability to identify, formulate and solve engineering problems.
3. An understanding of professional and ethical responsibility.
4. An ability to communicate effectively.
5. The broad education necessary to understand the impact of engineering solutions in a global, economic, environmental, and societal context.
6. A recognition of the need for, and an ability to engage in life-long learning.
7. A knowledge of contemporary issues.
8. An ability to use the techniques, skills and modern engineering tools necessary for engineering practice.

Mechanical engineers should possess a thorough understanding of engineering science as well as analytical and practical skills in one of many basic mechanical engineering specialties. The mechanical engineering curriculum at Texas A&M requires students to develop and apply logical thinking, innovative approaches, and ethical standards as a prerequisite for professional competence.

The curriculum consists of basic theory courses complemented by laboratory experiences in dynamic systems and controls, design, experimentation, fluid mechanics, heat transfer, manufacturing, and materials. Elective courses are offered in numerous areas including air conditioning, automotive engineering, computer-aided design, control systems, corrosion, energy conversion, internal combustion engines, manufacturing, materials, mechanical design, polymers, mechatronics, metallurgy, power generation, robotics, stress analysis, fluid mechanics, turbomachinery, and others. The selection of elective courses is dictated by the interests and goals of the student, working with departmental advisors and within the curriculum guidelines. Many students enhance their education by participating in cooperative education and/or professional internships, which offer opportunities for employment in engineering positions while working toward a degree. Numerous study abroad programs are also available for gaining experience and perspectives in the international arena. Participation in student chapters of professional and honor societies provides leadership opportunities, collegial activities, and learning experiences outside the classroom. Many students also participate in research projects through individual directed studies courses with a professor. The mechanical engineering program culminates with a senior capstone design course sequence highlighted by real-life projects sponsored by various industries. Students benefit from the challenges and gratification that come through direct interaction with practicing engineers.

Before commencing course work in the major, students must be admitted to the major or have the approval of the department.

---

**Program Requirements**

The freshman year is identical for degrees in aerospace engineering, biomedical engineering, civil engineering, computer engineering, electrical engineering, industrial engineering, mechanical engineering, nuclear engineering, ocean engineering, and petroleum engineering thus allowing a student with adequate grades to change majors within the Dwight Look College of Engineering. The freshman year is slightly different for chemical engineering and radiological health engineering in that students take CHEM 101/111 and CHEM 102/112 instead of CHEM 107/117. Students pursuing degrees in biological and agricultural engineering, computer science, engineering technology, or industrial distribution should refer to the specific curriculum for these majors. It is recognized that many students will change the sequence and number of courses taken in any semester. Deviations from the prescribed course sequence, however, should be made with care to ensure that prerequisites for all courses are met. In addition to the freshman year curriculum listed below, students should refer to the specific curriculum for each major for other requirements. Before commencing course work in the major, students must be admitted to the major or have the approval of the department.

1 A grade of C or better is required.

2 Entering students will be given a math placement exam. Test results will be used in selecting the appropriate starting course which may be at a higher or lower level.

3 Of the 18 hours shown as University Core Curriculum electives, 3 must be from creative arts, 3 from social and behavioral sciences, 6 from American history, and 6 from government/political science. The required 6 hours from international and cultural diversity may be met by courses satisfying the creative arts, social and behavioral sciences, and American history requirements if they are also on the approved list of international and cultural diversity courses.

4 BMEN, CHEN and RHEN require 8 hours of freshman chemistry, which may be satisfied by CHEM 101/111 or CHEM 107/117 and CHEM 102/112; Credit by Examination (CBE) for CHEM 101/111 or CHEM 107/117 plus CHEM 102/112; or 8 hours of CBE for CHEM 101/111 or CHEM 107/117 and CHEM 102/112.

5 Stem courses and technical elective: See the Mechanical Engineering Academic Advisor’s Office for a list of approved courses.

This curriculum lists the minimum number of classes required for graduation. Additional courses may be taken.

### Total Program Hours 128
Department of Nuclear Engineering

Nuclear Engineering

Nuclear engineering deals with the application and utilization of nuclear processes and radiations. The use of nuclear energy for the production of electrical power is a mature industry. Nuclear engineers work on all aspects of the nuclear fuel cycle and for many different types of employers such as government and private labs, regulatory agencies, reactor vendors, utilities and architect engineers. In addition, nuclear energy for space applications is a rapidly expanding field. Radionuclide technology in industry and medicine requires a large number of well-trained radiological health engineers. To supply qualified engineers, the Department of Nuclear Engineering offers curricula leading to the Bachelor of Science degree in Nuclear Engineering and in Radiological Health Engineering. Both degrees are accredited by the Engineering Accreditation Commission of ABET, www.abet.org.

The missions of the Department of Nuclear Engineering are:

1. to produce high quality graduates from the undergraduate through the doctoral levels to help meet the technical manpower needs of our state, region, nation and the international community;
2. to conduct research, including collaboration with research in related fields, to advance the state of knowledge in these disciplines in support of the needs of society; and
3. to perform service in these disciplines for many constituencies including our College and University, industry, government and national laboratories, professional organizations, and the public.

In fulfilling these missions, the objective of the undergraduate program is to prepare students for success in their professional endeavors following the baccalaureate degree. These endeavors may include direct employment in the private or public sectors, graduate studies in engineering or science, professional studies in medicine, business, law or public administration, service in the military, or entrepreneurial activities. To achieve this purpose, four principal educational objectives are identified. Graduates of our Bachelor of Science program in Nuclear Engineering:

1. will work on the challenges of maintenance, improvement, innovation, education, and research in nuclear power and industrial utilization of nuclear radiation and radionuclides. In this work, they will fulfill independent assignments, engage in collaborations, and manage the work of others with effective communications characterizing all phases of their responsibilities;
2. will conduct their professional activities with full recognition of the choices and challenges implicit to their work, to its ethical dimensions, and to their implications for matters beyond their immediate tasks;
3. will take the local, global, historical, social, economic, and political settings into account in both their domestic and international endeavors; and
4. will recognize and utilize both the accumulated body of results from prior work and the continuing evolution of science and technology as essential resources for the effective conduct of their work.

The nuclear engineering baccalaureate degree programs stress engineering science fundamentals and mathematics. However, considerable numbers of elective hours are available in the curriculum to permit students to broaden their educations as desired.

Most of the facilities used in the MS and PhD programs are also used in the undergraduate degree programs. These facilities make the Department of Nuclear Engineering one of the best equipped in the United States. Texas A&M is now the only University in the United States with two nuclear reactors on its campus.

Before commencing course work in the major, students must be admitted to the major or have the approval of the department.

Radiological Health Engineering

The large number of operating nuclear power plants has created a strong demand for specialists in radiological health engineering. Well-educated individuals are, and will be, required in all aspects of the nuclear power industry from mining all the way to disposal of wastes from spent fuel. There are needs for radiological health specialists in government, hospitals, educational institutions and in private industry. This program at Texas A&M is designed to give students a broad background so they will be able to assume positions in any area of the nuclear industry. The Texas A&M Radiological Health Engineering degree is the only one in the United States that is accredited by the Engineering Accreditation Commission of ABET, www.abet.org.

The missions of the Nuclear Engineering Department are:

1. to produce high quality graduates from the undergraduate through the doctoral levels to help meet the technical manpower needs of our state, region, nation and the international community;
2. to conduct research, including collaboration with research in related fields, to advance the state of knowledge in these disciplines in support of the needs of society; and
3. to perform service in these disciplines for many constituencies including our College and University, industry, government and national laboratories, professional organizations, and the public.

In fulfilling these missions, the objective of the undergraduate program is to prepare students for success in their professional endeavors following the baccalaureate degree. These endeavors may include direct employment in the private or public sectors, graduate studies in engineering or science, professional studies in medicine, business, law or public administration, service in the military, or entrepreneurial activities. To achieve this purpose, four principal educational objectives are identified. Graduates of our Bachelor of Science program in Radiological Health Engineering:

1. will work on the challenges of maintenance, improvement, innovation, education, and research in the safe and environmentally responsible utilization of nuclear resources including, but not limited to, their occurrence in power production, industrial, and medical applications. In this work, they will fulfill independent assignments, engage in collaborations, and manage the work of others with effective communications characterizing all phases of their responsibilities.
2. will conduct their professional activities with full recognition of the choices and challenges implicit to their work, to its ethical dimensions, and to their implications for matters beyond their immediate tasks.
3. will take the local, global, historical, social, economic and political settings into account in both their domestic and international endeavors.
4. will recognize and utilize both the accumulated body of results from prior work and the continuing evolution of science and technology as essential resources for the effective conduct of their work.

The radiological engineering baccalaureate degree programs stress engineering science fundamentals and mathematics. However, considerable numbers of elective hours are available in the curriculum to permit students to broaden their educations as desired.

The radiological health engineering program is administered by the Department of Nuclear Engineering and has the same objectives and facilities that are stated under the curriculum in Nuclear Engineering. Before commencing course work in the major, students must be admitted to the major or have the approval of the department.

Faculty
Adams, Marvin L, Professor
Nuclear Engineering
PhD, University of Michigan, 1986

Akabani, Gamal, Associate Professor

- Bachelor of Science in Radiological Health Engineering (p. 353)

Minors
- Nuclear Engineering Minor (p. 354)
- Radiological Health Engineering Minor (p. 354)

Nuclear Engineering - BS
The Department of Nuclear Engineering offers a BS in Nuclear Engineering.

Program Requirements
The freshman year is identical for degrees in aerospace engineering, biomedical engineering, civil engineering, computer engineering, electrical engineering, industrial engineering, mechanical engineering, nuclear engineering, ocean engineering, and petroleum engineering thus allowing a student with adequate grades to change majors within the Dwight Look College of Engineering. The freshman year is slightly different for chemical engineering and radiological health engineering in that students take CHEM 101/111 and CHEM 102/112 instead of CHEM 107/117. Students pursuing degrees in biological and agricultural engineering, computer science, engineering technology, or industrial distribution should refer to the specific curriculum for these majors. It is recognized that many students will change the sequence and number of courses taken in any semester. Deviations from the prescribed course sequence, however, should be made with care to ensure that prerequisites for all courses are met. In addition to the freshman year curriculum listed below, students should refer to the specific curriculum for each major for other requirements. Before commencing course work in the major, students must be admitted to the major or have the approval of the department.

---

1. Credit by examination for these courses also satisfies this requirement.

5. Power Option alternative. Students who intend to work in the nuclear power industry immediately upon completion of the BS degrees have the option of substituting NUEN 460. If this choice is made, then the student must also select NUEN 418 as a technical elective.

6. As approved by departmental advisor.
2 Entering students will be given a placement test in mathematics. Test results will be used to select the appropriate starting course.

3 Of the 18 hours shown as University Core Curriculum electives, 3 must be from creative arts, 3 from social and behavioral sciences, 6 from American history, and 6 from government/political science. The required 6 hours from international and cultural diversity may be met by courses satisfying the creative arts, social and behavioral sciences, and American history requirements if they are also on the approved list of international and cultural diversity courses.

4 As approved by the departmental advisor.

**Nuclear Engineering - Minor**

The Department of Nuclear Engineering offers a minor in Nuclear Engineering.

**Program Requirements**

- NUEN 301 Nuclear Reactor Theory 3
- NUEN 302 Introduction to Nuclear Engineering II 3
- NUEN 303 Nuclear Detection and Isotope Technology Laboratory 3
- NUEN 304 Nuclear Reactor Analysis 3
- NUEN 405 Nuclear Engineering Experiments 3

**Total Semester Credit Hours** 15

Students must make a grade of "C" or better in all courses.

**Radiological Health Engineering - Minor**

The Department of Radiological Health Engineering offers a minor in Radiological Health Engineering.

**Program Requirements**

- NUEN 301 Nuclear Reactor Theory 3
- NUEN 302 Introduction to Nuclear Engineering II 3
- NUEN 303 Nuclear Detection and Isotope Technology Laboratory 3
- NUEN 309/ SENG 309 Radiological Safety 3
- Select one of the following: 3
  - NUEN 475 Environmental Nuclear Engineering
  - NUEN 479 Radiation Protection Engineering

**Total Semester Credit Hours** 15

Students must make a grade of "C" or better in all courses.

**Harold Vance Department of Petroleum Engineering**

Petroleum Engineering is concerned primarily with the economic extraction of oil, gas, and other natural resources from the earth. Oil and gas is produced through the design, drilling and operation of wells and well systems, and the integrated management of the underground reservoirs in which the resources are found.

The mission of the Petroleum Engineering Department is to create, preserve, integrate, transfer and apply petroleum engineering knowledge and to enhance the human capability of its practitioners. The Petroleum Engineering Program has two educational objectives:

- graduates will have the technical depth and breadth to be successful professionals early in their careers; and
- graduates will have the broad technical knowledge and soft skills needed to rise to positions of professional leadership.

In essence, the goal of the Petroleum Engineering curriculum is to provide a modern engineering education with proper balance between fundamentals and practice, and to graduate engineers capable of being productive contributors immediately who are also prepared for life-long learning. The curriculum includes study of:

- design and analysis of well systems and procedures for drilling and completing wells;
- characterization and evaluation of subsurface geological formations and their resources;
- design and analysis of systems for producing, injecting and handling fluids;
- application of reservoir engineering principles and practices for optimizing resource development and management; and
- use of project economics and resource valuation methods for design and decision making under conditions of risk and uncertainty.

There is a heavy emphasis on mathematics, computer applications, communication skills and interdisciplinary problem solving. As a result, Aggie petroleum engineers are in high demand in the industry, and their starting salaries are consistently among the top in the University and the nation.

The department is well known for its curriculum, facilities and faculty, and its undergraduate program was recognized as the best in the nation by U.S. News and World Report in their most recent evaluation. The faculty comprises more than 40 professors and lecturers, many of them widely known and globally involved in the petroleum industry. Three (3) of the faculty are members of the prestigious National Academy of Engineering, and 17 are Distinguished Members of the Society of Petroleum Engineers. The Bachelor of Science program is accredited by the Engineering Accreditation Commission of ABET, www.abet.org.

Students must work as interns during the summer months; a minimum of six weeks of approved experience is required for graduation. The department also participates in the Cooperative Education Program.

In addition to the Bachelor of Science degree in Petroleum Engineering, the department also offers both masters and doctoral degrees, including the Master of Science and Master of Engineering, and the Doctor of Philosophy and Doctor of Engineering (see the Texas A&M University Graduate and Professional Catalog).

Before commencing course work in the major, students must be admitted to the major or have the approval of the department.

Nasr-El-Din, Hisham A, Professor
Petroleum Engineering
PhD, University of Saskatchewan, 1984

Nasrabadi, Hadi, Assistant Professor
Petroleum Engineering
PhD, Imperial College, London, 2006

Noynaert, Samuel F, Assistant Professor
Petroleum Engineering
PhD, Texas A&M University, 2013

Reed, Teri K, Associate Professor
Petroleum Engineering
PhD, Arizona State University, 1999

Rodrigues De Paula Lima, Heitor, Professor Of The Practice
Petroleum Engineering
PhD, Texas A&M University, 1998

Schechter, David S, Associate Professor
Petroleum Engineering
PhD, Bristol University, United Kingdom, 1989

Schubert, Jerome J, Associate Professor
Petroleum Engineering
PhD, Texas A&M University, 1999

Silva, Catherine A, Senior Lecturer
Petroleum Engineering
BS, Texas A&M University, 1980
Sliva, Glenn M, Senior Lecturer
Petroleum Engineering
BS, Texas A&M University, 1981

Smith, Terri S, Lecturer
Petroleum Engineering
MA, California State University, 1993

Valko, Peter P, Professor
Petroleum Engineering
PhD, Institute of Catalysis, 1981

Voneiff, George W, Professor Of The Practice
Petroleum Engineering
MS, Texas A&M University, 1992

Weijermars, Rudy, Professor
Petroleum Engineering
PhD, University of Uppsala, Sweden, 1987

Wu, Kan, Assistant Professor
Petroleum Engineering
PhD, University of Texas, Austin, 2014

Zhu, Ding, Professor
Petroleum Engineering
PhD, University of Texas, 1992

**Majors**

- Bachelor of Science in Petroleum Engineering (p. 356)

**Minors**

- Petroleum Engineering Minor (p. 357)

**Certificates**

- Energy Engineering Certificate (p. 357)

**Petroleum Engineering - BS**

The Department of Petroleum Engineering offers a BS in Petroleum Engineering.

**Program Requirements**

The freshman year is identical for degrees in aerospace engineering, biomedical engineering, civil engineering, computer engineering, electrical engineering, industrial engineering, mechanical engineering, nuclear engineering, ocean engineering, and petroleum engineering thus allowing a student with adequate grades to change majors within the Dwight Look College of Engineering. The freshman year is slightly different for chemical engineering and radiological health engineering in that students take CHEM 101/111 and CHEM 102/112 instead of CHEM 107/117. Students pursuing degrees in biological and agricultural engineering, computer science, engineering technology, or industrial distribution should refer to the specific curriculum for these majors. It is recognized that many students will change the sequence and number of courses taken in any semester. Deviations from the prescribed course sequence, however, should be made with care to ensure that prerequisites for all courses are met. In addition to the freshman year curriculum listed below, students should refer to the specific curriculum for each major for other requirements. Before commencing course work in the major, students must be admitted to the major or have the approval of the department.

**Total Semester Credit Hours: 33**

1. A grade of C or better is required.
2. Entering students will be given a math placement exam. Test results will be used in selecting the appropriate starting course which may be at a higher or lower level.
3. Of the 18 hours shown as University Core Curriculum electives, 3 must be from creative arts, 3 from social and behavioral sciences, 6 from American history, and 6 from government/political science. The required 6 hours from international and cultural diversity may be met by courses satisfying the creative arts, social and behavioral sciences, and American history requirements if they are also on the approved list of international and cultural diversity courses.
4. BMEN, CHEN and RHEN require 8 hours of freshman chemistry, which may be satisfied by CHEM 101/111 or CHEM 107/117 and CHEM 102/112; Credit by Examination (CBE) for CHEM 101/111 or CHEM 107/117 plus CHEM 102/112; or 8 hours of CBE for CHEM 101/111 or CHEM 107/117 and CHEM 102/112.

Total Semester Credit Hours: 95

5 Independent study of a petroleum engineering problem, the solution of which will be documented by an oral presentation at the departmental student paper contest held during the same academic year.

6 As approved by the department head, see the Department of Petroleum Engineering website for a list of approved courses.

Total Program Hours 128

Petroleum Engineering - Minor

The Department of Petroleum Engineering offers a minor in Petroleum Engineering.

Program Requirements
GEOL 104  Physical Geology 4
PETE 225  Introduction to Drilling Systems 3
PETE 310  Reservoir Fluids 4
PETE 311  Reservoir Petrophysics 4
PETE 325  Petroleum Production Systems 3

Total Semester Credit Hours 18

Students must make a grade of "C" or better in all courses.

Energy Engineering - Certificate

The objective of the Energy Engineering Certificate program is to better prepare undergraduate students to face the challenges of world energy supply and demand and how to ensure a sustainable energy future. The program will educate engineering majors and suitably prepared science majors about all energy sources, their development, generation, conversion, transmission, and use; with an emphasis on the importance of improving the standard of living for all people while at the same time preserving and improving the environment. To earn the Energy Engineering Certificate, a student must complete a minimum of 12 semester credit hours which includes one required course and three additional courses to be selected from a specified list. Completion of the certificate will be recorded on the student’s University transcript.

For additional information, contact the Energy Engineering Certificate coordinator or Engineering Academic and Student Affairs, Room 129 Zachry Engineering Center, (979) 845-7200.

Program Requirements
ENGR 101  Energy: Resources, Utilization and Importance to Society 4
Select three of the following: 9
ARCH 421  Energy and Sustainable Architecture
CHEN 455/ SENG 455  Process Safety Engineering
MEEN 410  Internal Combustion Engines
MEEN 436  Principles of Heating, Ventilating and Air Conditioning
MEEN 437  Principles of Building Energy Analysis
NUEN 489  Special Topics in...
College of Geosciences

Administrative Officers

Dean - Kate C. Miller, Ph.D.

Executive Associate Dean and Associate Dean for Research - Jack G. Baldauf, Ph.D.

General Statement

Planet Earth is our home. Humans live on land which occupies only 29 percent of Earth’s surface. The remainder is covered by ocean. An envelope of air surrounds Earth. These realms—the lithosphere, hydrosphere, and atmosphere—form the environment for life on this planet. The study of these realms and their interactions with the biosphere and human systems, comprises the Geosciences—Atmospheric Sciences, Geography, Geology and Geophysics, and Oceanography.

The College of Geosciences is home to four academic departments in these disciplines and interdisciplinary academic offerings in Environmental Programs and Water Management and Hydrological Sciences. The mission of the College of Geosciences is to advance new understandings of the Earth system and apply them to the needs of society, to prepare the next generation of geoscientists to conduct research, to find and develop natural resources, and to measure and respond to environmental change. In doing this, the College of Geosciences intends to lead in establishing the geosciences as the most important and impactful scientific discipline of the 21st century. To sustain human society into the future will depend more on the innovation and application of discovery in the geosciences than in other disciplines. The interdisciplinarity of our field is essential to solving today’s grand challenges—understanding global climate change, maintaining air and water quality, and producing adequate energy and food supplies for all people.

Geography studies humans and their interactions with the environment from a spatial perspective using a range of methods and geospatial technologies. As an interdisciplinary field, it synthesizes knowledge from the other geosciences as well as from the social and biological sciences. Geology deals with the processes and forces acting at the surface and within Earth: with the materials of Earth, its forms and structures, and with the history of its development and the evolution of life on its surface and in its waters. Geophysics focuses on the physics of solid Earth. This includes the measurement and understanding of its internal structure, physical properties, and plate motions and their effect on continents and ocean basins. It also includes the detection of natural resources through remote sensing. Atmospheric Sciences includes studies of weather/meteorology, climate and climate change, and air quality through the disciplines of atmospheric dynamics, atmospheric physics, and atmospheric chemistry. Oceanography is the study of the marine environment and its inhabitants. The distribution and nature of marine life, the development of ocean basins, the chemistry of ocean waters, and the dynamics of water masses are the major elements of Oceanography.

Degrees in Oceanography are available only at the graduate level. Atmospheric Sciences, Geography, and Geology & Geophysics offer BS, MS, and PhD degrees; a BA is also available in Geology. The College offers two interdisciplinary BS degrees through Environmental Programs: a BS in Environmental Studies and a BS in Environmental Geosciences. In addition, Geography offers a BS in Geographic Information Science and Technology and a BS in University Studies with a concentration in Geography. The College hosts a graduate program leading to an MS and PhD in Water Management and Hydrological Sciences. A non-thesis Master of Geosciences degree is also offered.

College of Geosciences faculty members participate in research on a broad front of both basic and applied subjects. The College is the Science Operator for the International Ocean Discovery Program (http://iodp.tamu.edu), which is the largest geosciences research program in the world and explores the structure and history of sediments and crust beneath the sea floor. Other coordinated research programs in the College include the Geochemical and Environmental Research Group, the Center for Tectonophysics, Texas Sea Grant, the Berg-Hughes Center for Petroleum and Sedimentary Systems, the Center for Atmospheric Chemistry and the Environment and the Texas Center for Climate Studies. Field work takes both faculty and students around the world to learn about the wide range of environments and processes affecting Earth and its inhabitants. Consequently, faculty bring to their classes the excitement of discovery, state-of-the-art scientific equipment, a knowledge of useful applications to human problems, and good working relations with industry and governments, all of which can help the undergraduate prepare for a rewarding career.

Career opportunities for graduates in the Geosciences are evolving dynamically—in industry, business, education and government at all levels. Geosciences professionals conduct research essential to understanding an increasingly unpredictable Earth; search for sustainable energy, mineral, and water resources; work to predict and mitigate natural hazards; contribute to wise environmental policy development and decision-making; and teach in high schools, colleges, and universities.

Double Major

Students in the College of Geosciences may elect to have two major fields of study within the College, or they may elect to have a major in the College of Geosciences in conjunction with a major in another college provided that both majors lead to the same baccalaureate degree; that is, both must lead to a BA or to a BS. Approval is required by the Associate Dean for Academic Affairs in the College of Geosciences, the current major department, and the proposed major department. Additional permissions may be required if a student elects a double major in two different colleges. Students seeking to double major must have a 3.0 overall GPA and a 3.0 in the current major at the time of application. Students pursuing a double major must:

1. satisfy all University and College requirements;
2. successfully complete departmental requirements in each major, if both majors are in the College of Geosciences; and
3. in cases where one major is in the College of Geosciences and the other is in another college, the student must successfully meet the major field of study requirements for each area as determined by each college.

Minors

Students may choose to complete a minor in the College of Geosciences. All minors will require not less than 15 hours and not more than 18 hours in the discipline; at least 6 hours must be upper-division courses in the discipline. Each student choosing to complete a minor must contact the department offering the minor to determine if specific courses are required.
Change of Major and Transfer Students

Change of Major students are welcomed in the College of Geosciences. Students seeking entry from another major must be in good academic standing, meet approval of the Associate Dean and have shown interest in their new intended major by taking at least one course in the subject. To begin the Change of Major process, students should first contact the academic advisor in the department to which they wish to change. If the student meets minimum criteria, he or she will be referred to the Associate Dean for approval and processing.

Students are welcomed to transfer into the College of Geosciences from other universities and community colleges. Overall, the College of Geosciences requires a prospective student to have completed, or be in progress of completing, a minimum of 24 hours from a list of courses specific to each major outlined on page 56 of this catalog with a cumulative minimum GPR of 3.0. A B or better is required in certain courses if transferring into Meteorology. The College of Geosciences is also participating in the Program for Transfer Admission as well as the Program for System Admission in cooperation with Prairie View A&M University, Tarleton State University, Texas A&M International University, Texas A&M University-Commerce, Texas A&M University–Corpus Christi, Texas A&M University–Kingsville, West Texas A&M University and Texas A&M University–Texarkana.

Teacher Certification

The need for highly qualified teachers is high in the state of Texas. Students in the College of Geosciences are encouraged to consider pursuing a career in teaching. A number of pathways to certification are available. Interested students should consult with their advisors early in their programs and consult options outlined on the certification website. The college collaborates with the College of Science and the College of Education and Human Development on the aggieTEACH Program (http://aggieteach.tamu.edu) and in the University Studies degree program in secondary science teaching. Students in Geography may obtain composite social studies certification with a specialty in Geography through the Secondary Post-Baccalaureate Certification Program (8-12) or alternative certification options.

University Honors Programs

The College of Geosciences participates in the University Honors Programs, which is described in detail at Honors and Undergraduate Research (p. 92).

International and Cultural Diversity Requirement

Texas A&M University requires its students to meet an International and Cultural Diversity requirement as part of the Graduation requirements. Meeting this requirement will require the careful selection of courses. The student is directed to page 240 of this catalog for detailed information regarding this requirement and also is encouraged to seek the advice of the student’s academic advisor.

Curricula — College of Geosciences

- Environmental Geosciences
- Environmental Studies
- Geographic Information Science and Technology
- Geography
- Geology
- Geophysics
- Meteorology
- University Studies-Geography
- University Studies-GIST

Majors

College of Geosciences

- Bachelor of Science in Environmental Geosciences (p. 360)
- Bachelor of Science in Environmental Studies (p. 363)

Atmospheric Sciences

- Bachelor of Science in Meteorology (p. 372)
- Bachelor of Science in Meteorology and Master of Science in Oceanography, 5-Year Degree Program (p. 373)

Geography

- Bachelor of Science in Geographic Information Science and Technology, Computation, Design and Analysis Track (p. 376)
- Bachelor of Science in Geographic Information Science and Technology, Earth Systems and Analysis Track (p. 378)
- Bachelor of Science in Geographic Information Science and Technology, Human Systems and Society Track (p. 380)
- Bachelor of Science in Geography (p. 382)
- Bachelor of Science in Geography, Human Geography Track (p. 384)
- Bachelor of Science in Geography, Human Geography of the Natural Environment Track (p. 386)
- Bachelor of Science in Geography, Human-Environment Interactions Track (p. 388)
- Bachelor of Science in University Studies, Geographic Information Science and Technology Concentration (p. 390)
- Bachelor of Science in University Studies, Geography Concentration (p. 390)

Geology and Geophysics

- Bachelor of Arts in Geology (p. 393)
- Bachelor of Science in Geology, Environmental Geology Track (p. 394)
- Bachelor of Science in Geology, Petroleum Geology Track (p. 396)
- Bachelor of Science in Geophysics, Environmental Geophysics Track (p. 397)
- Bachelor of Science in Geophysics, Petroleum Geophysics Track (p. 398)
- Bachelor of Arts in Geology and Master of Science in Oceanography, 5-Year Degree Program (p. 399)
- Bachelor of Science in Geology and Master of Science in Oceanography, 5-Year Degree Program (p. 400)

Oceanography

- Bachelor of Science in Environmental Geosciences and Master of Science in Oceanography, 5-Year Degree Program (p. 366)

Minors
College of Geosciences

- Climate Change Minor (p. 369)
- Earth Sciences Minor (p. 369)
- Environmental Geosciences Minor (p. 370)

Department of Atmospheric Sciences

- Meteorology Minor (p. 373)

Department of Geography

- Geography Minor (p. 392)
- Geographic Information Science and Technology (GIST) Minor (p. 392)

Department of Geology and Geophysics

- Geology Minor (p. 402)
- Geophysics Minor (p. 402)

Department of Oceanography

- Oceanography Minor (p. 403)

Certificates

College of Geosciences

- Diversity Certificate in the College of Geosciences (p. 423)

Masters

College of Geosciences

- Master of Geoscience in Geoscience (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/geosciences/interdepartmental-degree-programs/mgsc)

Department of Atmospheric Sciences

- Master of Science in Atmospheric Sciences (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/geosciences/atmospheric-sciences/ms)

Department of Geography

- Master of Science in Geography (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/geosciences/geography/ms)

Department of Geology and Geophysics

- Master of Science in Geology (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/geosciences/geology-geophysics/geology-ms)
- Master of Science in Geophysics (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/geosciences/geology-geophysics/geophysics-ms)

Department of Oceanography

- Master of Science in Oceanography (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/geosciences/oceanography/ms)

Doctoral

Department of Atmospheric Sciences

- Doctor of Philosophy in Atmospheric Sciences (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/geosciences/atmospheric-sciences/phd)

Department of Geography

- Doctor of Philosophy in Geography (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/geosciences/geography/phd)

Department of Geology and Geophysics

- Doctor of Philosophy in Geology (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/geosciences/geology-geophysics/geology-phd)
- Doctor of Philosophy in Geophysics (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/geosciences/geology-geophysics/geophysics-phd)

Department of Oceanography

- Doctor of Philosophy in Oceanography (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/geosciences/oceanography/phd)

Environmental Geosciences - BS

The increasing demands that population growth and affluence put on the natural resources and the Earth’s environment require greater numbers of trained professionals and informed citizens. The BS degree in Environmental Geosciences embraces all the disciplines of geosciences to give the student a rigorous interdisciplinary education including issues associated with environmental policy. The degree trains students for employment by industry, environmental and engineering consulting firms, non-governmental organizations, and governmental regulatory agencies, among other entities. Students focus coursework in a particular environmental theme: coastal and marine environments, water, human impact on the environment, climate change, or biosphere.

1. Freshmen entering the program take a first year seminar, GEOS 101. The choice is not restricted. Students transferring or changing majors into the program, who have not taken GEOS 101, are required to take GEOS 481 in their junior or senior year.

2. It is recommended to select a course that also fulfills an International and Cultural Diversity requirement.

3. Choose one introductory College of Geosciences course in the first semester and an additional one in the second semester of the sophomore year. Seek guidance from the academic advisor for Environmental Programs in Geosciences (ENVP) or your faculty mentor.

4. Choose 18 hours of theme courses in your junior and senior years in consultation with your academic advisor or faculty mentor from the list below. GEOS 484 can be taken for up to 6 credits and will normally be used as an adjustment to theme electives, but depending on the content of the internship credit, it can be applied as an adjustment to your technical electives or policy electives. Seek guidance from the ENVP academic advisor.

5. Other courses which match the Environmental Programs' technical electives definition will be allowed by adjustment. Guidance about technical electives (including the definition used by the Environmental Programs in Geosciences) can be found on the programs' website. Seek guidance about choices from the ENVP academic advisor or faculty mentor.

6. Seek guidance about choices from the ENVP academic advisor or faculty mentor.

</tr>
</tbody>
</table>

Total Semester Credit Hours: 120
Select the remaining courses from the following:

- GEOG 331 Geomorphology 3
- GEOG 360 Natural Hazards 3
- GEOG 440 Engineering Geology 3
- GEOS 401 Polar Regions of the Earth: Science, Society and Discovery 3
- GEOS 484 Internship 6
- OCNG 401 Interdisciplinary Oceanography 3
- OCNG 425 Microbial Oceanography 3
- OCNG 440 Introduction to Chemical Oceanography 3
- SCSC 455 Environmental Soil and Water Science 3
- SCSC 458 Watershed and Water Quality Management 3

Biosphere

- GEG 335 Pattern and Process in Biogeography 3
- GEOL 305 Paleobiology 3
- OCNG 401 Interdisciplinary Oceanography 3
- OCNG 425 Microbial Oceanography 3
- SCSC 455 Environmental Soil and Water Science 3
- SCSC 458 Watershed and Water Quality Management 3

Select the remaining courses from the following:

- GEG 442 Past Climates 3
- GEG 433 Principles of Plant Geography 3
- GEG 401 Interdisciplinary Oceanography 3
- BIOL 214 Genes, Ecology and Evolution 3
- BIOL 357 Ecology 4
- & BIOL 358 and Ecology Laboratory 4
- GENE 302 Principles of Genetics 4
- & GENE 312 and Comprehensive Genetics Laboratory 4
- GENE 412 Population and Ecological Genetics 3
- SCSC 301 Soil Science 4
- MEPS 316 Introduction to Theory and Practice of Plant Physiology 3

1 Students who have taken OCNG 251 cannot take OCNG 401.

Two courses in the degree plan must be writing intensive courses designated by the Environmental Programs in the schedule of classes. Also, international and cultural diversity electives (6 hours) must be incorporated into the degree.

Environmental Studies - BS

The increasing demands that population growth and affluence put on the natural resources and the Earth’s environment require greater numbers of trained professionals and informed citizens. The Bachelor of Science
degree in Environmental Studies blends science and policy with an interdisciplinary understanding of Earth’s processes and policy aspects of human interactions with the environment. The degree is designed to educate students about our planet to enable them to be knowledgeable about the scientific, human-dimension and policy aspects of environmental issues facing our nation as they work in regulatory agencies, industry, and non-governmental organizations.

**Term Semester Credit Hours**: 15

**Total Semester Credit Hours**: 120

1. Freshman entering the program take a first year seminar, GEOS 101. The choice is not restricted. Students transferring or changing majors into the program, who have not taken GEOS 101, are required to take GEOS 481 in their junior or senior year.

2. It is recommended to select a course that also fulfills an international and cultural diversity requirement.

3. Seek guidance about choices from the ENVP academic advisor or faculty mentor.

4. Other courses which match the ENVP technical electives definition will be allowed by adjustment. Guidance about technical electives (including the definition used by the Environmental Programs in Geosciences) can be found on the programs’ website. Seek guidance about choices from the ENVP academic advisor or faculty mentor.

Environmental Geosciences - 5-Year Bachelor of Science/Master of Science in Oceanography

The Fast Track Program offers motivated and exceptional students the opportunity to achieve aspirations in an efficient program at Texas A&M, completing the Bachelor of Science (B.S.) degree in the Environmental Geosciences program and the Oceanography non-thesis M.S. degree in 5 years. There will be only two courses used for dual credit in this program. There is a total of 150 hours of coursework. The concurrent degree program will enable these motivated students to coordinate the required B.S. coursework (114 undergraduate credit hours plus 6 dual credit graduate courses) and non-thesis M.S. coursework (36 credit hours including the 6 dual credit graduate courses) to complete the required credit hours for each degree without diminishing scope or quality of work and within 5 years.

**Application and Eligibility:**

- Applications to the Fast Track program will be submitted by July 1 after the completion of the student’s junior year. Applications submitted after that time will be evaluated on a case by case basis.
- Applicants must have a minimum undergraduate GPR of 3.0. Applicants must also earn a C or better in all Chemistry, Calculus and Physics courses. Once admitted to the program, students must maintain a minimum 3.0 GPR.
- A faculty advisor will be assigned to each student. Students may seek additional mentors, but a formal committee is not required.
- Students admitted into the Fast Track program must finish the entire 150 credit hours to obtain both the Bachelor’s and Master’s degrees.
These students will be conferred with two degrees once they complete the 5th year of the concurrent program.

- Students admitted to the program will change from U4 to G7 status when they are admitted having completed at least 96 hours (end of spring semester, year 3).
- Students not accepted or not allowed to continue with the Fast Track Program will complete the 120 hour Bachelor's degree under the standard 4 year curriculum. These students may still apply to the traditional graduate program.
- Students will graduate at the completion of the 5th year in the Fast Track Program coursework (150 credit hours) with both Bachelor’s and Master’s degrees. Students will complete the coursework in May of the 5th year.

**Creative Arts (p. 22)** 3

**Term Semester Credit Hours** 16
1 Freshmen entering the program take a first year seminar, GEOS 101. The choice is not restricted. Students transferring or changing majors into the program, who have not taken GEOS 101, are required to take GEOS 481 in their junior or senior year.

2 It is recommended to select a course that also fulfills an International and Cultural Diversity (p. 34) requirement.

3 Select from course list below. If students use nine credits of allowed OCNG courses (e.g. OCNG 401, OCNG 350, OCNG 451, OCNG 485) as Coastal and Marine Environments theme electives, they will receive an OCNG minor with their BS in ENGS degree. If one of the Introductory Geoscience course and associated labs listed in Year Two is OCNG 251 with OCNG 252, then only two (six credits) of the theme electives needs to be from OCNG to still get the minor.

4 Students will not be permitted to receive credit for both the 400- and 600-level versions of certain courses because the content and learning outcomes are too similar (e.g. OCNG 440/OCNG 640; GEOS 470/OCNG 657).

5 These two graduate courses will be taken for dual undergraduate/graduate credit and will contribute to the minor.

Two courses in the degree plan must be writing intensive courses designated by the Environmental Programs in the schedule of classes. Also, international and cultural diversity electives (6 hours) must be incorporated into the degree.

Any of the required courses may be taken during the summer sessions to diminish the heavy semester loads during Years 2 and 3.

**Climate Change - Minor**

The College of Geosciences offers a minor in Climate Change. For specific program information, please reference the program requirements.

**Earth Sciences - Minor**

The purpose of the Earth Sciences minor is to study the different physical earth processes and systems.

Students choosing to complete a minor in Earth Sciences must meet the following requirements:

- A minimum of 6 hours must be taken in residence at either Texas A&M University/College Station or Galveston.
- A minimum cumulative GPR of 2.0 must be achieved for all courses in the minor.
- Take a minimum of 16 hours of coursework, of which 3 hours of GEOS 210 Climate Change are required.
- The remaining 13 hours must include at least 3 hours of 400-level coursework and another 3 hours of upper-level (300- or 400-level) coursework from the list.
- Students with majors in the College of Geosciences must select only courses outside of their home department.

**Program Requirements**

### Environmental Geosciences - Minor

The purpose of the Environmental Geosciences minor is to study the environmental impacts on the different earth systems.

Students in the Environmental Programs are not allowed to declare Environmental Geosciences as a minor.

Students of other disciplines choosing to complete a minor in Environmental Geosciences must meet the following requirements:

- A minimum of 6 hours must be taken in residence at either Texas A&M University/College Station or Galveston.
- A minimum cumulative GPR of 2.0 must be achieved for all courses in the minor.
- Take a minimum of 15 hours of coursework in the College of Geosciences, of which 3 hours of GEOS 105 is required.
- The remaining 12 hours must include at least 3 hours of 400-level coursework and another 3 hours of upper-level (300- or 400-level) coursework from the list.
- Students with majors in the College of Geosciences must select only courses outside of their home department.

### Program Requirements

Some of the courses have prerequisites so make sure to check the catalog before enrolling in the course.

**Group 5**

- OCNG 420 Introduction to Biological Oceanography

At least 6 hours must be upper level, 3 of which must be 400 level.

Students with majors in the College of Geosciences must select only courses outside of their home department.

Some of the courses have prerequisites, so make sure to check the catalog before enrolling in the course.
OCNG 440 Introduction to Chemical Oceanography

Total Semester Credit Hours 15

1 At least 6 hours must be upper level, 3 of which must be 400 level.

Diversity - Certificate

The College of Geosciences, in collaboration with the Department of Multicultural Services, offers a Diversity Certificate program for Geosciences majors. The goal of the program is two-fold:

1. to offer Geosciences students an opportunity to synthesize and integrate academic coursework with co-curricular and service learning experiences to demonstrate their preparedness to participate successfully in contemporary, highly diverse global societies; and
2. to promote diversity, multiculturalism, and internationalism in the College of Geosciences.

Program Requirements

Certificate requirements include nine semester hours of diversity-related courses, at least one of which must be from the College of Geosciences, and completion of a special section of GEOS 484 to fulfill the co-curricular, service learning and capstone component of the certificate. Students are encouraged to build the coursework into their degree plans as much as possible through careful planning. Information on the program is available from the Associate Dean for Academic Affairs, Room 202 Eller O&M Building and departmental academic advisors.

Department of Atmospheric Sciences

Students in the Department of Atmospheric Sciences enjoy low student-to-teacher ratios and small classes. Undergraduates have opportunities for individual study and for participation in faculty research projects, including regional, national and international field programs.

Lemmon, Mark T, Associate Professor
Atmospheric Sciences
PhD, University of Arizona, 1994

Logan, Timothy S, Lecturer
Atmospheric Sciences
PhD, University of North Dakota, 2014

Nasiri, Shaima L, Associate Professor
Atmospheric Sciences
PhD, University of Wisconsin-Madison, 2004

Nielsen-Gammon, John W, Professor
Atmospheric Sciences
PhD, Massachusetts Institute of Technology, 1990

North, Jerry R, Distinguished Professor
Atmospheric Sciences
PhD, University of Wisconsin, 1966

Nowotarski, Christopher J, Assistant Professor
Atmospheric Sciences
PhD, Pennsylvania State University, 2013

Orville, Richard E, Research Professor
Atmospheric Sciences
PhD, University Arizona, 1966

Panetta, Richard L, Professor
Atmospheric Sciences
PhD, University of Wisconsin, 1978

Rapp, Anita D, Assistant Professor
Atmospheric Sciences
PhD, Colorado State University, 2008

Saravanan, Ramalingam, Professor
Atmospheric Sciences
PhD, Princeton University, 1990

Schade, Gunnar W, Associate Professor
Atmospheric Sciences
PhD, Johannes Gutenberg Universitat, Germany, 1997

Schumacher, Courtney, Professor
Atmospheric Sciences
PhD, University of Washington, 2003

Szunyogh, Istvan, Professor
Atmospheric Sciences
PhD, Hungarian Academy of Sciences, 1994

Wilheit, Thomas T, Research Professor
Atmospheric Sciences
PhD, Massachusetts Institute of Technology, 1963

Winkley, Shel D, Visiting Lecturer
Atmospheric Sciences
BS, Texas A&M University, 2007
Yang, Ping, Professor
Atmospheric Sciences
PhD, University of Utah, 1995

Zhang, Renyi, Professor
Atmospheric Sciences
PhD, Massachusetts Institute of Technology, 1994

Majors

- Bachelor of Science in Meteorology (p. 372)
- Bachelor of Science in Meteorology and MS in Oceanography, 5-Year Degree Program (p. 373)

Minors

- Meteorology Minor (p. 373)

Facilities

The Department of Atmospheric Sciences occupies the upper floors of the 15-story Oceanography and Meteorology Building. The Doppler weather radar on the roof of the building is a campus landmark and is used for both research and teaching. The department also operates a mobile Doppler radar for use in research projects. The department has four state-of-the-art chemistry labs, in which phenomena from ozone to aerosols are studied, as well as facilities for modeling the chemical environment. A continuous, comprehensive stream of meteorological data is received from ground stations, balloons, aircraft, radars, and satellites around the world. Two well-equipped computer labs are regularly upgraded to provide state-of-the-art educational equipment.

Meteorology - BS

The Department of Atmospheric Sciences offers the Bachelor of Science degree in Meteorology. The undergraduate curriculum in meteorology emphasizes weather and weather forecasting, but also includes courses in climatology, atmospheric chemistry, cloud physics and remote sensing of the atmosphere with radar and satellites. As the curriculum makes clear, the study of these subjects relies on a foundation of physics, chemistry and mathematics. The atmospheric sciences also have close connections to oceanography and hydrology.

Students who receive BS degrees in Meteorology often obtain employment with the National Weather Service, private meteorological consulting and weather forecasting companies, air quality consulting firms, airlines, TV stations, energy trading companies, universities, state governments, agricultural firms and computer-related industries. Some students choose to enter the military services as weather officers. Positions in teaching and research normally require a graduate degree.

Students interested in cooperative educational arrangements and internships should contact the department’s academic advisor for information.

In the curriculum presented, students are advised to note carefully the prerequisites for many of the courses.

Program Requirements

First Year
Fall

| ATMO 201 | Weather and Climate | 3 |
| CHEM 101 | Fundamentals of Chemistry I | 4 |
| & CHEM 111 | and Fundamentals of Chemistry Laboratory I | |
| ENGL 104 | Composition and Rhetoric | 3 |
| MATH 151 or MATH 171 | Engineering Mathematics I or Analytic Geometry and Calculus | 4 |

| Term Semester Credit Hours | 14 |

Spring

| ATMO 203 | Weather Forecasting Laboratory | 1 |
| CHEM 102 | Fundamentals of Chemistry II | 4 |
| & CHEM 112 | and Fundamentals of Chemistry Laboratory II | |
| MATH 152 or MATH 172 | Engineering Mathematics II or Calculus | 4 |
| PHYS 218 | Mechanics | 4 |
| American history or Government/political science elective (p. 23) | |

| Term Semester Credit Hours | 16 |

Second Year
Fall

| ATMO 251 | Weather Observation and Analysis | 3 |
| ATMO 321 or CSCE 206 | Computer Applications in the Atmospheric Sciences or Structured Programming in C | 3 |
| ATMO 363 | Introduction to Atmospheric Chemistry and Air Pollution | 3 |
| MATH 251 | Engineering Mathematics III | 3 |
| American history or Government/political science elective (p. 23) | 3 |

| Term Semester Credit Hours | 15 |

Spring

| ATMO 324 | Physical and Regional Climatology | 3 |
| MATH 308 | Differential Equations | 3 |
| PHYS 208 | Electricity and Optics | 4 |
| American history or Government/political science elective (p. 23) | 3 |

| General Elective | |

| Term Semester Credit Hours | 3 |

Third Year
Fall

| ATMO 335 | Atmospheric Thermodynamics | 3 |
| ATMO 336 | Atmospheric Dynamics | 4 |
| STAT 211 | Principles of Statistics | 3 |
| American history or Government/political science elective (p. 23) | 3 |
| Atmospheric sciences or tech. elective (p. 644) | 1 |

| Term Semester Credit Hours | 16 |

Spring

| ATMO 435 | Synoptic-Dynamic Meteorology | 3 |
| Atmospheric sciences or tech. electives (p. 644) | 6 |
| COMM 203 or COMM 205 | Public Speaking or Communication for Technical Professions | 3 |

| Term Semester Credit Hours | 14 |
Language, philosophy and culture elective (p. 21) 3

**Term Semester Credit Hours** 15

### Fourth Year

**Fall**
- ATMO 446 Physical Meteorology 3
- ATMO 441 or Satellite Meteorology and Remote Sensing 3
- ATMO 443 or Radar Meteorology 3
- Atmospheric sciences or tech. electives (p. 644) 3
- General elective 1, 4, 5 3
- Social and behavioral science elective (p. 23) 3

**Term Semester Credit Hours** 15

### Spring
- Atmospheric sciences or tech. electives (p. 644) 9
- Creative arts elective (p. 22) 3
- General elective 4, 5 3

**Term Semester Credit Hours** 15

Total Semester Credit Hours: 120

1. A grade of C or better is required.
2. All students enter as Lower Level Meteorology (METL) until completion of ATMO 335 and ATMO 336 and the associated prerequisite courses. Once students have completed these courses, their major will be changed to Upper Level Meteorology (METR), and they will be eligible to take upper-level electives. This change should occur following Fall of the junior year.
3. Select in consultation with faculty academic advisor.
4. General electives may not include CAEN 101-499; CAEX 101-499; DEVS 101-499; ENGL 103; KINE 198-199 (p. 849); MATH 102, MATH 131, MATH 141-142 (p. 860), MATH 150-152 (p. 860), MATH 171-172 (p. 860), MATH 221, MATH 251, MATH 253; PHYS 101, PHYS 201-202 (p. 934), PHYS 208, PHYS 218-219 (p. 934); AERS 100-499 (p. 600); MLSC 100-499 (p. 889); NVSC 100-499 (p. 914); SOMS 100-499 (p. 982).
5. MLSC, NVSC and AERS courses can be used as general electives if a minor is completed in Military Science. See an academic advisor for more information.

**Meteorology - Minor**

Students of other disciplines, such as chemistry or mathematics, may complete a minor in meteorology by taking a minimum of 16 hours in Atmospheric Sciences or upper division geosciences. GEOS courses may comprise no more than 6 of these hours, with the remainder being ATMO. At least 9 of the 16 hours must be in courses 300-level or above, including at least three 400-level hours. The selection of courses must be made in agreement with an advisor from the Atmospheric Sciences faculty.

### Program Requirements

**300-level requirement**
Select from the following: 6
- ATMO 300-ATMO 399 (p. 644)
- GEOS 300-ATMO 399 (p. 808)

**400-level requirement**
Select from the following: 3
- ATMO 400-ATMO 499 (p. 644)

- GEOS 400-ATMO 499 (p. 808)

**Electives**
Select from the following: 7
- ATMO 100-ATMO 499 (p. 644)
- GEOS 300-ATMO 499 (p. 808)

**Total Semester Credit Hours** 16

Must maintain a minimum GPR of 2.000 in order to pursue this minor.

At least 9 hours of ATMO courses are required and a minimum of 3 hours at the 400 level.

**Meteorology - 5-Year Bachelor of Science/Master of Science in Oceanography**

The Fast Track Program offers motivated and exceptional students the opportunity to achieve aspirations in an efficient program at Texas A&M, completing the Bachelor of Science degree in the Department of Atmospheric Sciences Meteorology Program and the Oceanography non-thesis M.S. degree in 5 years. There will be only two courses used for dual credit in this program. There is a total of 150 hours of coursework. The concurrent degree program will enable these motivated students to coordinate the required B.S. coursework (114 undergraduate credit hours plus 6 dual credit graduate courses) and non-thesis M.S. coursework (36 credit hours including the 6 dual credit graduate courses) to complete the required credit hours for each degree without diminishing scope or quality of work and within 5 years.

### Application and Eligibility

- Applications to the Fast Track program will be submitted by July 1 after the completion of the student’s junior year. Applications submitted after that time will be evaluated on a case by case basis.
- Applicants must have a minimum undergraduate GPR of 3.0. Applicants must also earn a C or better in all Chemistry, Calculus and Physics courses. Once admitted to the program, students must maintain a minimum 3.0 GPR.
- A faculty advisor will be assigned to each student. Students may seek additional mentors, but a formal committee is not required.
- Students admitted into the Fast Track program must finish the entire 150 credit hours to obtain both the Bachelor’s and Master’s degrees. These students will be conferred with two degrees once they complete the 5th year of the concurrent program.
- Students admitted to the program will change from U4 to G7 status when they are admitted having completed at least 99 hours (end of spring semester, year 3).
- Students not accepted or not allowed to continue with the Fast Track Program will complete the 120 hour Bachelor’s degree under the standard 4 year curriculum. These students may still apply to the traditional graduate program.

* Students will graduate at the completion of the 5th year in the Fast Track Program coursework (150 credit hours) with both Bachelor’s and
Master’s degrees. Students will complete the coursework in May of the 5th year.

Fifth Year

Fall

| Semester Credit Hours | Advanced specialized OCNG graduate course | 9 |

Spring

| Semester Credit Hours | Advanced specialized OCNG graduate course | 6 |
|-----------------------| Capstone Experience II | 3 |

Total Semester Credit Hours: 135

Third Year

Fall

| Semester Credit Hours | Advanced specialized OCNG graduate course | 9 |

Spring

| Semester Credit Hours | Advanced specialized OCNG graduate course | 6 |
|-----------------------| Capstone Experience II | 3 |

Total Semester Credit Hours: 18
Any of the required courses may be taken during the Summer Sessions to diminish the heavy semester loads during Years Two and Three.

If students use nine credits of allowed OCNG courses (e.g. OCNG 251 or OCNG 401, OCNG 252, OCNG 350, OCNG 451, OCNG 485) as technical electives and general electives, they will receive an OCNG minor with their BS in METR degree.

Graduate courses will be taken for dual undergraduate/graduate credit and will contribute to the minor.

Students will not be permitted to receive credit for both the 400- and 600-level versions of certain courses because the content and learning outcomes are too similar (e.g. OCNG 440/OCNG 640; GEOS 470/OCNG 657).

A grade of C or better is required.

All students enter as Lower Level Meteorology (METL) until completion of ATMO 335 and ATMO 336 and the associated prerequisite courses. Once students have completed these courses, their major will be changed to Upper Level Meteorology (METR), and they will be eligible to take upper-level electives. This change should occur following Fall of the junior year.

Select in consultation with faculty academic advisor.

General electives may not include CAEN 101-499; CAEX 101-499; DEVS 101-499; ENGL 103; KINE 198-199 (p. 849); MATH 102, MATH 131, MATH 141-142 (p. 860), MATH 150-152 (p. 860), MATH 171-172 (p. 860), MATH 221, MATH 251, MATH 253; PHYS 101, PHYS 201-202 (p. 934), PHYS 208, PHYS 218-219 (p. 934); AERS 100-499 (p. 600); MLSC 100-499 (p. 889); NVSC 100-499 (p. 914); SOMS 100-499 (p. 982)

MLSC, NVSC and AERS courses can be used as general electives if a minor is completed in Military Science. See an academic advisor for more information.

Total undergraduate credit hours: 120

Total graduate credit hours: 36 (36 credits required for non-thesis MOST)

Total credits actually taken: 150

Department of Geography

Geography is the study of the relationships between people and their environments, relationships that vary from place to place over the Earth. Students inquire into those factors responsible for the variable and changing character of Earth's surface, which over time has been transformed into the human habitat. Geography integrates physical science, social science and the humanities. The Department requires that students understand both physical and human systems and develop the spatial analytical skills to do so.

Physical geography emphasizes a systematic and interdisciplinary approach to the study of landforms, climate, soils and vegetation. Human geography seeks to describe and explain the spatial patterns of human activities on Earth. These range from such economic activities as the distribution of retail sales and industrial production to cultural landscapes, which often have strong historic roots. Both physical and human geography use a set of analytic techniques that includes cartography, Geographic Information Science (GiSci), quantitative methods and remote sensing.

• Geography Minor (p. 392)
• Geographic Information Science and Technology (GIST) Minor (p. 392)

Geographic Information Science and Technology - BS, Computation, Design and Analysis Track

The BS in Geographic Information Science and Technology (GIST) requires semester credit hours for completion in the Computation, Design and Analysis (CDA), Earth Systems Analysis (ESA) or the Human Systems and Society (HSS) tracks.

The Computation, Design and Analysis (CDA) track will attract students interested in the computational, analysis and software development aspects of GIST. This track is more computational and information technology centered and focuses on addressing technical issues, algorithm development and performance, and software tool development.

Students will receive a rigorous and modern-day education and training in GIST with application knowledge in physical and human geography. Employers require problem solvers, not button pushers, to address problems in various application domains. The BS in GIST is designed to:

• Provide modern-day exposure to the rapidly changing field of GIST
• Balance education and training with a focus on competency
• Provide application and problem-solving experiences
• Support student activities and research
• Provide students with professional experience
• Produce high-quality geographers with strong GIST knowledge and skills

Geospatial technology graduates are in extremely high demand and according to the US Department of Labor (USDL), one of the highest growth areas in the federal government, particularly in homeland security activities, as well as in energy, software and engineering firms, and biomedical and biohazard research, among many others. A 35% annual rate of growth in Geospatial Technology related degrees are projected by the United States Department of Labor. Specifically, students have employment opportunities with the following corporate and government entities:

• Government agencies (federal, state, county and city): management and planning of urban infrastructure, inventory and assessment of natural resources including agriculture, forestry, and water resources.
• Energy industry: assessing biofuel production, and identifying locations suitable for renewable energy resources and mineral exploration.
• Health Science Industry: determine hotspots of health events and to explore for causative influences.
• Military and intelligence community: numerous opportunities exist in military branches, and agencies such as CIA, NAS and other intelligence organizations.
• Commercial industries: business analytics and marketing, as spatial information can be used to target marketing campaigns, and assess suitable sites to locate companies.
• Geospatial Industries: Software development, geotechnical engineering, and technology development.

Students select courses with the assistance of faculty advisors and academic advisor in an individualized advising system.

Geographic Information Science and Technology - BS, Earth Systems Analysis Track

The BS in Geographic Information Science and Technology (GIST) requires semester credit hours for completion in the Computation, Design and Analysis (CDA), Earth Systems Analysis (ESA) or the Human Systems and Society (HSS) tracks.

The Earth Systems Analysis (ESA) track will attract students interested in studying the Earth sciences and assessing the natural resources of the Earth through a foundation in biogeography, climate, geomorphology, soil science, geology and ecosystem science.

Students will receive a rigorous and modern-day education and training in GIST with application knowledge in physical and human geography. Employers require problem solvers, not button pushers, to address problems in various application domains. The BS in GIST is designed to:

- Produce high-quality geographers with strong GIST knowledge and skills

Geospatial technology graduates are in extremely high demand and according to the US Department of Labor (USDL), one of the highest growth areas in the federal government, particularly in homeland security activities, as well as in energy, software and engineering firms, and biomedical and biohazard research, among many others. A 35% annual rate of growth in Geospatial Technology related degrees are projected by the United States Department of Labor. Specifically, students have employment opportunities with the following corporate and government entities:

- Government agencies (federal, state, county and city): management and planning of urban infrastructure, inventory and assessment of natural resources including agriculture, forestry, and water resources.
- Energy industry: assessing biofuel production, and identifying locations suitable for renewable energy resources and mineral exploration.
- Health Science Industry: determine hotspots of health events and to explore for causative influences.
- Military and intelligence community: numerous opportunities exist in military branches, and agencies such as CIA, NAS and other intelligence organizations.
- Commercial industries: business analytics and marketing, as spatial information can be used to target marketing campaigns, and assess suitable sites to locate companies.
- Geospatial Industries: Software development, geotechnical engineering, and technology development.

Students select courses with the assistance of faculty advisors and academic advisor in an individualized advising system.

### Geographic Information Science and Technology - BS, Human Systems and Society Track

The BS in Geographic Information Science and Technology (GIST) requires semester credit hours for completion in the Computation, Design and Analysis (CDA), Earth Systems Analysis (ESA) or the Human Systems and Society (HSS) tracks.

The Human Systems and Society (HSS) track will attract students interested in social sciences, human/environment relationships, and the planning and management of human resources and urban environments.

Students will receive a rigorous and modern-day education and training in GIST with application knowledge in physical and human geography. Employers require problem solvers, not button pushers, to address problems in various application domains. The BS in GIST is designed to:

- Provide modern-day exposure to the rapidly changing field of GIST
- Balance education and training with a focus on competency
- Provide application and problem-solving experiences
- Support student activities and research
- Provide students with professional experience
- Produce high-quality geographers with strong GIST knowledge and skills

Geospatial technology graduates are in extremely high demand and according to the US Department of Labor (USDL), one of the highest growth areas in the federal government, particularly in homeland security activities, as well as in energy, software and engineering firms, and biomedical and biohazard research, among many others. A 35% annual rate of growth in Geospatial Technology related degrees are projected by the United States Department of Labor. Specifically, students have employment opportunities with the following corporate and government entities:

- Government agencies (federal, state, county and city): management and planning of urban infrastructure, inventory and assessment of natural resources including agriculture, forestry, and water resources.
- Energy industry: assessing biofuel production, and identifying locations suitable for renewable energy resources and mineral exploration.
- Health Science Industry: determine hotspots of health events and to explore for causative influences.
- Military and intelligence community: numerous opportunities exist in military branches, and agencies such as CIA, NAS and other intelligence organizations.
- Commercial industries: business analytics and marketing, as spatial information can be used to target marketing campaigns, and assess suitable sites to locate companies.
- Geospatial Industries: Software development, geotechnical engineering, and technology development.

**Total Semester Credit Hours:** 120

1. 8 hours required. Department requires that you take two in the same discipline to meet this requirement.
2. Track electives comprise 6 hours of focused coursework. The track and specific courses within the track are to be chosen in consultation with the advisor and/or faculty mentor.
3. 19-20 hours required. To be selected from the following or chosen in consultation with Advisor.

Two courses in the degree plan must be Writing Intensive courses designated by the department in the schedule of classes. Also, International and Cultural Diversity Electives (6 hours) must be incorporated into the degree.

**Geography - BS**

A student seeking a Bachelor of Science degree in Geography is expected to complete a minimum curriculum of 56 hours in geography, while 18 of those hours will be chosen from one of the following selected tracks of focus: Human Geography, Geography of the Natural Environment, Human-Environment Interactions, or Geography. The Department of Geography also administers the Bachelor of Science degree program in
Environmental Studies for the College of Geosciences. Students must pass two Writing-Intensive courses within their major. This includes any geography course with a 9xx section number. Geography courses may include field trips outside scheduled class hours. Students are required to defray some or all of the expenses incurred on such trips.

Graduates with the BS degree may be able to qualify for a variety of jobs using their analytic skills in locational and environmental analysis for business or industry, or for a variety of positions in local, state or federal agencies. Advanced degrees provide greater opportunities.

For students interested in a career in education, the Department of Geography works closely with the Department of Teaching, Learning and Culture. Geography is part of a Social Studies composite degree program that prepares students to teach at middle and high school levels.

1. 8 hours required. Department requires that you take two in the same discipline to meet this requirement.
2. Courses to be approved by advisor.
3. Track electives comprise 18 hours of focused coursework beyond the Geography core. The track and the specific courses within the track are to be chosen in consultation with the academic advisor from the list below.
4. At most, one of these courses may be chosen from GEOG 301, GEOG 305.

---

**Geography - BS, Human Geography Track**

A student seeking a Bachelor of Science degree in Geography is expected to complete a minimum curriculum of 56 hours in geography, while 18 of those hours will be chosen from one of the following selected tracks of focus: Human Geography, Geography of the Natural Environment, Human-Environment Interactions, or Geography. The Department of Geography also administers the Bachelor of Science degree program in Environmental Studies for the College of Geosciences. Students must pass two Writing-Intensive courses within their major. This includes any geography course with a 9xx section number. Geography courses may include field trips outside scheduled class hours. Students are required to defray some or all of the expenses incurred on such trips.

Graduates with the BS degree may be able to qualify for a variety of jobs using their analytic skills in locational and environmental analysis for business or industry, or for a variety of positions in local, state or federal agencies. Advanced degrees provide greater opportunities.

For students interested in a career in education, the Department of Geography works closely with the Department of Teaching, Learning and Culture. Geography is part of a Social Studies composite degree program that prepares students to teach at middle and high school levels.

**Geography - BS, Human-Environment Interactions Track**

A student seeking a Bachelor of Science degree in Geography is expected to complete a minimum curriculum of 56 hours in geography, while 18 of those hours will be chosen from one of the following selected tracks of focus: Human Geography, Geography of the Natural Environment, or Geography. The Department of Geography also administers the Bachelor of Science degree program in Environmental Studies for the College of Geosciences. Students must pass two Writing-Intensive courses within their major. This includes any geography course with a 9xx section number. Geography courses may include field trips outside scheduled class hours. Students are required to defray some or all of the expenses incurred on such trips.

Graduates with the BS degree may be able to qualify for a variety of jobs using their analytic skills in locational and environmental analysis for business or industry, or for a variety of positions in local, state or federal agencies. Advanced degrees provide greater opportunities.

For students interested in a career in education, the Department of Geography works closely with the Department of Teaching, Learning and Culture. Geography is part of a Social Studies composite degree program that prepares students to teach at middle and high school levels.

### Program Requirements

#### First Year

**Fall**

**Total Semester Credit Hours:**

1 8 hours required. Department requires that you take two in the same discipline to meet this requirement.
2 Courses to be approved by advisor.
3 Track electives comprise 18 hours of focused coursework beyond the Geography core. The track and the specific courses within the track are to be chosen in consultation with the academic advisor.
4 At most, one of these courses may be chosen from GEOG 301, GEOG 305.
5 Two courses in the degree plan must be Writing Intensive courses designated by the department in the schedule of classes. Also, International and Cultural Diversity Electives (6 hours) must be incorporated into the degree.
University Studies - BS, Geographic Information Science and Technology Concentration

The broad objective of the academic discipline of geography is to understand and improve the human environment: Earth. Understanding the Earth's surface requires a consideration of both natural and social processes, hence geography is by nature interdisciplinary. Human-environment interactions are of particular interest in geography. The area of concentration in geography offers students a broad perspective on the Earth as human habitat, while permitting them to complete two supporting minors in other disciplines. The area of concentration is flexible in that numerous courses are included to permit a student to build a course of study in geography that is tailored to his or her interests. Ideally, the minors would be in related fields to build depth and breadth around themes that the student wishes to emphasize.

**General Electives**<sup>2</sup> 18-24

**Total Semester Credit Hours** 120

---

1. GEOG 301 and GEOG 305 cannot be used in combination to meet this requirement.

2. Any 100-499 course not used elsewhere.

Two courses that meet the writing requirement are required.

A total of six semester credit hours must include courses that meet the International and Cultural Diversity (p. 34) requirements, except sections of BUSN 289 that meet the university writing requirement.

### Geographic Information Science and Technology (GIST) - Minor

Geographic Information Science and Technology (GIST) is used to solve problems associated with land administration, environment and natural resource management, planning and population studies, as well as traditional surveying and mapping applications. GIST uses GIS, remote sensing, and global positioning mapping to collect, analyze and display spatial information.

#### General Requirements

1. Geography Minor: minimum of 16 credits in the discipline with at least 6 hours in upper-division courses, 3 hours of which must be at the 400 level.

2. Geographic Information Science and Technology (GIST): minimum of 15 credits in the discipline at 300-400 level.

3. Minimum of 6 credits must be taken in residence at either Texas A&M University or Texas A&M at Galveston.

4. Students must meet with the department’s advisor for minor programs for approval of courses selected (any substitutions must be approved by the department head).

5. Minimum cumulative GPR of 2.0 must be achieved for all courses in the minor.

**Total Semester Credit Hours** 15

1. Fall semester course

2. Spring semester course

### Geography - Minor

#### General Requirements

1. Geography Minor: minimum of 16 credits in the discipline with at least 6 hours in upper-division courses, 3 hours of which must be at the 400 level.

2. Geographic Information Science and Technology (GIST): minimum of 15 credits in the discipline at 300-400 level.

3. Minimum of 6 credits must be taken in residence at either Texas A&M University or Texas A&M at Galveston.

4. Students must meet with the department’s advisor for minor programs for approval of courses selected (any substitutions must be approved by the department head).

5. Minimum cumulative GPR of 2.0 must be achieved for all courses in the minor.

#### Program Requirements

| GEOG 201 | Introduction to Human Geography | 3 |
| GEOG 203 & GEOG 213 | Planet Earth and Planet Earth Lab | 4 |
| Select one of the following: | 3 |
| GEOG 202 | Geography of the Global Village |
| GEOG 205 | Environmental Change |
| 300-level GEOG courses (p. 796) | 3 |
| Select one of the following: | 3 |
| 300-level GEOG courses (p. 796) | 3 |
The selection of courses must be made in agreement with the geography department advisor for minor programs.

Department of Geology and Geophysics

Geology

The field of geology includes the scientific study of all aspects of the solid Earth, from fundamental processes that shape it to knowledge that benefits society. The undergraduate curricula in geology foster critical thinking, and the application of scientific skills to the study of Earth materials (rocks, minerals, fossils, structures, landforms and subsurface fluids) and geologic processes. Courses provide a broad background in geology, emphasize knowledge transfer from other sciences to geologic problems and promote application to practical problems in petroleum exploration, environmental management and civil engineering.

The Department of Geology and Geophysics offers two undergraduate programs in geology, the Bachelor of Arts and the Bachelor of Science. The BS program is appropriate for students seeking careers as geologists or preparing for graduate school in geology, whereas the BA program is designed for students wishing to combine geology with other disciplines, and includes less rigorous mathematics and physics. Details of the two programs are given below along with specialty options and tracks.

Graduates must pass two Writing Intensive courses within their major. This requirement is described in Requirements for a Baccalaureate Degree (p. 24). GEOL 311 and any geology or geophysics class with a 9xx section number meets the requirement. To remain in satisfactory academic standing, students must maintain a 2.0 or better GPR in all technical courses (geology, geophysics, chemistry, math and physics). Some courses in geology require field trips. Students are required to pay expenses incurred on such trips.

Geophysics

Geophysics includes all areas of scientific inquiry that deal with the physical state of Earth and other planets and the dynamic processes, which act on and within planetary bodies. The Department of Geology and Geophysics offers the Bachelor of Science in Geophysics for students who wish to combine a proficiency in mathematics with an interest in Earth. The objective of this program is to develop a physically-motivated approach to the study of Earth phenomena, through treatment of physical and geological principles and development of mathematical tools. Graduates will be well-prepared for careers in the energy and environmental industries, and for advanced study at top-ranked graduate programs.

Minors in Geology and Geophysics

The Department of Geology and Geophysics offers minors in three separate programs: Geology, Geophysics and Earth Sciences. Minors provide opportunities for broadening a student’s background and tailoring the curriculum to specific career goals. For example, a minor in Geology or Geophysics may be especially beneficial to students majoring in fields that deal directly or indirectly with geological processes. These include agriculture, anthropology, archaeology, architecture, business, law, biology, chemistry, recreation and parks and soil science, to name a few.

The Departments of Geology and Geophysics, and Geography offer a minor in Geographic Information Science and Technology (GIST). GIST is concerned with the collection, analysis and display of spatial information using geographic information systems, remote sensing, global positioning satellites and field mapping. The minor combines courses in computer science, mapping, geodesy, geographical information systems and remote sensing. GIST is used to solve problems associated with land administration, environment and natural resource management, planning and population studies in addition to traditional surveying and mapping applications. This minor represents a focused course of study, which can be combined with traditional areas of study in geology and geophysics, geography, and other areas of science and policy studies.

Majors

- Bachelor of Arts in Geology (p. 393)
- Bachelor of Science in Geology, Environmental Geology Track (p. 394)
- Bachelor of Science in Geology, Petroleum Geology Track (p. 396)
- Bachelor of Science in Geophysics, Environmental Geophysics Track (p. 397)
- Bachelor of Science in Geophysics, Petroleum Geophysics Track (p. 398)
- Bachelor of Arts in Geology and MS in Oceanography, 5-Year Degree Program (p. 399)
- Bachelor of Science in Geology and MS in Oceanography, 5-Year Degree Program (p. 400)

Minors

- Geology Minor (p. 402)
- Geophysics Minor (p. 402)

Geology - BA

The Bachelor of Arts in Geology provides a foundation in geology for students who are not planning a career as a geologist. This program provides a basis for science-related careers, such as environmental law, pre-college teaching, science journalism, and resource management and marketing. Graduates will supplement their curriculum in geology with a minor designed around their career goals. The minor requires a minimum of 15 credit hours in one discipline, to be chosen in consultation with an advisor.

The BA program has less rigorous mathematics and physics requirements and less comprehensive geology requirements than the BS in Geology; therefore, the BS is the more appropriate option for students considering graduate study in geology.

GEOL 330 Geologic Field Trips 3

Total Semester Credit Hours: 120

1. Fifteen hours of electives must be selected in a minor. Electives must be chosen in consultation with advisor.
2. Any 300- or 400-level geology or geophysics course not already required.
3. Any science, math, engineering or social science course that augments the degree with the approval of the advisor.
4. Six hours must be selected from courses that also satisfy the international and cultural diversity requirement.
5. General electives may not include STLC 100-499 (p. 993); SLCX 100-499; DEV 100-109; ENGL 103; GEOL 101-104 (p. 802); KINE 198, KINE 199; MATH 102, MATH 131, MATH 141, MATH 142, MATH 150, MATH 166, MATH 171; AERS 100-499 (p. 600); MLSC 100-499 (p. 889); NVSC 100-499 (p. 914); SOMS 100-499 (p. 982).

Geology - BS, Environmental Geology Track

The BS in Geology is considered the preparatory degree in the field of geology. Graduates will be prepared for careers in the energy and environmental industries, and for advanced study at top-ranked graduate programs. The first two years of the BS program in Geology provide students with the basics of geology and geophysics and the allied fields of chemistry, physics and mathematics. The junior and senior years involve more advanced study in the field of geology and the opportunity to concentrate study in specific disciplines through the selection of technical and geology electives. GEOL 300, during the summer following the junior year, serves as a capstone course in which students apply their geologic knowledge to solving real problems and collecting data during a six-week field season. Students are also encouraged to become involved in research problems with faculty members and can receive course credit for this activity through research hours (GEOL 291 and GEOL 491).

The BS is the appropriate degree for students intending to pursue graduate study in geology. Students desiring employment in industry are
encouraged to pursue an MS degree. Students planning a research or university teaching career should pursue a PhD degree.

The Environmental and Petroleum tracks use particular selections of electives to refine the degree.

Environmental Geology Track

This track is designed to provide a strong foundation in geology coupled with specialized training in work on some of society’s most pressing problems, including groundwater contamination and remediation, non-point-source pollution, water resources, and geologic hazards such as earthquakes, landslides, flooding, volcanism and surface deformation. Students completing the Environmental track of the BS in Geology are prepared to go on to graduate school for an advanced geoscience degree, or for employment in the environmental industry. Environmental geoscientists typically find careers with environmental and engineering consulting companies and other industrial corporations, governmental agencies or academia. Students are well-prepared for the Association of State Boards of Geology (ASBOG) Fundamentals of Geology exam, which is required for appointment as a Professional Geologist in the State of Texas.

Geology - BS, Petroleum Geology Track

The BS in Geology is considered the preparatory degree in the field of geology. Graduates will be prepared for careers in the energy and environmental industries, and for advanced study at top-ranked graduate programs. The first two years of the BS program in Geology provide students with the basics of geology and geophysics and the allied fields of chemistry, physics and mathematics. The junior and senior years involve more advanced study in the field of geology and the opportunity to concentrate study in specific disciplines through the selection of technical and geology electives. GEOL 300, during the summer following the junior year, serves as a capstone course in which students apply their geologic knowledge to solving real problems and collecting data during a six-week field season. Students are also encouraged to become involved in research problems with faculty members and can receive course credit for this activity through research hours (GEOL 291 and GEOL 491).

The BS is the appropriate degree for students intending to pursue graduate study in geology. Students desiring employment in industry are encouraged to pursue an MS degree. Students planning a research or university teaching career should pursue a PhD degree.

The Environmental and Petroleum tracks use particular selections of electives to refine the degree.

Petroleum Geology Track

This track provides students with the technical preparation for eventual employment in the field of petroleum exploration and extraction. The petroleum geology track is intended to prepare students for graduate study, as well as provide training for those who may be interested in service jobs in the oil and gas industry between their undergraduate and graduate education.

¹ Any approved 400-level geology or geophysics course not already required.
² Any science, math or engineering course that augments the degree with the approval of the advisor.
³ Six hours must be selected from courses that also satisfy the International and Cultural diversity requirement.

Many of the required geology classes prepare students for this track. Additional recommended classes include GEOL 400, GEOL 404, PETE 311, PETE 321, PETE 324 and PETE 402. Qualified students (GPR of 3.0 or higher with dean’s permission) may also take related graduate courses during the senior year. Such classes include GEOL 619, GEOL 622, GEOL 623, GEOL 624, GEOL 668, and GEOP 629.

Geophysics - BS, Environmental Geophysics Track

The first two years of the BS in Geophysics are similar to the BS in Geology, providing students with the fundamentals of geology, chemistry, physics, mathematics and computer science. Courses in geophysics during the junior and senior years emphasize knowledge transfer from the fields of math and physics to techniques and problems in both theoretical and applied geophysics. Technical electives allow students to focus on specific career objectives. The Environmental and Petroleum tracks prepare students for the most common career paths for geophysicists. Students are also encouraged to become involved in research problems with faculty members and can receive course credit for this activity through research hours (GEOP 291 and GEOP 491).

Whereas graduates from the Geophysics program will have employment opportunities in industry, the rigor of this degree is designed to prepare students for advanced study. The MS degree is generally considered to be the entry degree for professionals in the petroleum industry. Students interested in teaching in a university or research in an academic, government or industrial laboratory should seek the PhD.

Students must pass two Writing Intensive courses within their major. This requirement is described on page 24 of this catalog. GEOL 311 and any geology or geophysics class with a 9xx section number meet the requirement. To remain in satisfactory academic standing, students must maintain a 2.0 or better GPR in all technical courses (geology, geophysics, chemistry, math and physics). Some courses in geophysics require field trips. Students must pay expenses incurred on such trips.

Environmental Geophysics Track

This track focuses the geophysics degree on traditional and emerging methods used for hydrogeological, structural and stratigraphic characterization of the uppermost 100 meters, with applications to shallow resource and groundwater assessment and the solution of environmental and engineering problems. Students completing the Environmental track of the BS in Geophysics are prepared for graduate school, or for employment in the environmental industry. Environmental geophysicists typically work as independent environmental consultants or with industrial corporation or government agencies.

GEOP 413 and GEOP 435 provide the necessary grounding in seismic, electromagnetic, radar and other techniques used in environmental geophysics. Other recommended classes include GEOL 410, GEOL 420 and GEOL 440.

Courses in geophysics during the junior and senior years emphasize knowledge transfer from the fields of math and physics to techniques and problems in both theoretical and applied geophysics. Technical electives allow students to focus on specific career objectives. The Environmental and Petroleum tracks prepare students for the most common career paths for geophysicists. Students are also encouraged to become involved in research problems with faculty members and can receive course credit for this activity through research hours (GEOP 291 and GEOP 491).

Whereas graduates from the Geophysics program will have employment opportunities in industry, the rigor of this degree is designed to prepare students for advanced study. The MS degree is generally considered to be the entry degree for professionals in the petroleum industry. Students interested in teaching in a university or research in an academic, government or industrial laboratory should seek the PhD.

Students must pass two Writing Intensive courses within their major. This requirement is described on page 24 of this catalog. GEOL 311 and any geology or geophysics class with a 9xx section number meet the requirement. To remain in satisfactory academic standing, students must maintain a 2.0 or better GPR in all technical courses (geology, geophysics, chemistry, math and physics). Some courses in geophysics require field trips. Students must pay expenses incurred on such trips.

**Term Semester Credit Hours** 15

- Applications to the Fast Track program will be submitted by July 1 after the completion of the student’s junior year. Applications submitted after that time will be evaluated on a case by case basis.
- Applicants must have a minimum undergraduate GPR of 3.0. Applicants must also earn a C or better in all Chemistry, Calculus and Physics courses. Once admitted to the program, students must maintain a minimum 3.0 GPR.
- A faculty advisor will be assigned to each student. Students may seek additional mentors, but a formal committee is not required.
- Students admitted into the Fast Track program must finish the entire 150 credit hours to obtain both the Bachelor’s and Master’s degrees. These students will be conferred with two degrees once they complete the 5th year of the concurrent program.
- Students admitted to the program will change from U4 to G7 status when they are admitted having completed at least 102 hours (end of spring semester, year 3).
- Students not accepted or not allowed to continue with the Fast Track Program will complete the 120 hour Bachelor's degree under the standard 4 year curriculum. These students may still apply to the traditional graduate program.

* Students will graduate at the completion of the 5th year in the Fast Track Program coursework (150 credit hours) with both Bachelor's and Master’s degrees. Students will complete the coursework in May of the 5th year.

**Geology - 5-Year Bachelor of Arts/Master of Science in Oceanography**

The Fast Track Program offers motivated and exceptional students the opportunity to achieve aspirations in an efficient program at Texas A&M, completing the Bachelor of Arts (B.A.) degree in the Department of Geology and Geophysics Geology Program and the Oceanography non-thesis M.S. degree in 5 years. There will be only two courses used for dual credit in this program. There is a total of 150 hours of coursework. The concurrent degree program will enable these motivated students to coordinate the required B.A. coursework (114 undergraduate credit hours plus 6 dual credit graduate courses) and non-thesis M.S. coursework (36 credit hours including the 6 dual credit graduate courses) to complete the required credit hours for each degree without diminishing scope or quality of work and within 5 years.

**Application and Eligibility:**

- Applications to the Fast Track program will be submitted by July 1 after the completion of the student’s junior year. Applications submitted after that time will be evaluated on a case by case basis.
- Applicants must have a minimum undergraduate GPR of 3.0. Applicants must also earn a C or better in all Chemistry, Calculus and Physics courses. Once admitted to the program, students must maintain a minimum 3.0 GPR.

### Spring
- Advanced specialized OCNG graduate course
  - Term Semester Credit Hours: 3
- Advanced specialized OCNG graduate course
  - Term Semester Credit Hours: 3
- Capstone Experience II
  - Term Semester Credit Hours: 3

### Total Semester Credit Hours: 18

1. Any of the required courses may be taken during the summer sessions to diminish the heavy semester loads during Years Two and Three.
2. If students use six credits of allowed OCNG courses (e.g. OCNG 251 or OCNG 401, OCNG 252, OCNG 350, OCNG 451, OCNG 485) as minor or free electives, they will receive an OCNG minor with their BA in GEOL.
3. A second W course is required. GEOL 312 is offered as a W option when taught by Dr. Julie Newman, and other GEOL electives also fulfill the W requirement (including GEOL 491 when arranged with the permission of the instructor).
4. Students will not be permitted to receive credit for both the 400- and 600-level versions of certain courses because the content and learning outcomes are too similar (e.g. OCNG 410/OCNG 608, OCNG 440/OCNG 640; GEOS 470/OCNG 657).
5. Graduate courses will be taken for dual undergraduate/graduate credit and may contribute to the minor.

### Admission Process
Apply: End of junior year after 6 semesters; minimum GPR = 3.0.

Decision: August prior to starting graduate course work in Fall of Senior Year.

Change to graduate status (G7).

Apply for graduate degree plan upon approval of G7 status

Total undergraduate credit hours: 120

Total graduate credit hours: 36 (36 credits required for non-thesis MOST)

Total credits actually taken: 150

### Geology - 5-Year Bachelor of Science/Master of Science in Oceanography

The Fast Track Program offers motivated and exceptional students the opportunity to achieve aspirations in an efficient program at Texas A&M, completing the Bachelor of Science (B.S.) degree in the Department of Geology and Geophysics Geology Program and the Oceanography non-thesis M.S. degree in 5 years. There will be only two courses used for dual credit in this program. There is a total of 150 hours of coursework. The concurrent degree program will enable these motivated students to coordinate the required B.S. coursework (114 undergraduate credit hours plus 6 dual credit graduate courses) and non-thesis M.S. coursework (36 credit hours including the 6 dual credit graduate courses) to complete the
required credit hours for each degree without diminishing scope or quality of work and within 5 years.

Application and Eligibility

- Applications to the Fast Track program will be submitted by July 1 after the completion of the student’s junior year. Applications submitted after that time will be evaluated on a case by case basis.
- Applicants must have a minimum undergraduate GPR of 3.0. Applicants must also earn a C or better in all Chemistry, Calculus and Physics courses. Once admitted to the program, students must maintain a minimum 3.0 GPR.
- A faculty advisor will be assigned to each student. Students may seek additional mentors, but a formal committee is not required.
- Students admitted into the Fast Track program must finish the entire 150 credit hours to obtain both the Bachelor’s and Master’s degrees. These students will be conferred with two degrees once they complete the 5th year of the concurrent program.

Students will graduate at the completion of the 5th year in the Fast Track Program coursework (150 credit hours) with both Bachelor’s and Master’s degrees. Students will complete the coursework in May of the 5th year.

Geology - Minor

The Department of Geology and Geophysics offers a minor in Geology.

Program Requirements

1. Minimum of 15 credit hours in Geology or Geophysics. May not include GEOL 308.
2. Minimum of 6 credits must be taken in residence at either Texas A&M in College Station or Texas A&M in Galveston.
3. Must include one of GEOL 101, GEOL 104 or GEOL 320.
4. Maximum of 4 credits may be from selected courses in Geography or Oceanography, with approval of advisor (any substitutions must be approved by the department head).
5. Minimum of 6 credits at the 300-400 level.
6. Minimum of 2.0 cumulative GPA for all courses in the minor.

Geophysics - Minor

The Department of Geology and Geophysics offers a minor in Geophysics.

Program Requirements

1. Minimum of 15 credit hours in Geology or Geophysics. May not include GEOL 308.
2. Minimum of 6 credits must be taken in residence at either Texas A&M in College Station or Texas A&M in Galveston.
3. Minimum of 9 credit hours in Geophysics.
4. Maximum of 4 credits may be from selected courses in Geography or Oceanography, with approval of advisor (any substitutions must be approved by the department head).
5. Minimum of 6 credits at the 300-400 level.
6. Minimum of 2.0 cumulative GPA for all courses in the minor.

Department of Oceanography

Studies in Oceanography

Oceanography is an interdisciplinary science that focuses on the oceans, their contents and their boundaries. Degree programs are offered at the graduate level, leading to the Master of Science and the Doctor of Philosophy degrees in oceanography. In addition, various undergraduate courses are offered, and qualified undergraduate students may participate in a 15-credit minor in Oceanography. In addition, the department is initiating a 3+2 Program.

Oceanography is unusual as a graduate discipline. Whereas graduate programs in most disciplines lead to progressively greater degrees of specialization, oceanography as an interdisciplinary field takes graduates of biology, chemistry, geology, mathematics, physics, geophysics, meteorology or engineering and initially generalizes and broadens their education with a core of required courses. These core courses include the four subject areas of the oceanography program (biological, chemical, geological/geophysical and physical oceanography) and a seminar covering the state of the science. The student then refocuses in a particular subject area to pursue research and further study.

Effective study of oceanography requires a thorough undergraduate training in one of the pertinent undergraduate sciences, mathematics or engineering. During the undergraduate years, a student should consult with the oceanography faculty while enrolled in an appropriate undergraduate curriculum.

Faculty

Baldauf, Jack G, Professor
Oceanography
PhD, University of California, Berkeley, 1985

Biggs, Douglas C, Professor
Oceanography
PhD, Massachusetts Institute of Technology, 1976
Oceanography is an interdisciplinary science that focuses on the oceans, their contents and their boundaries. Degree programs are offered at the graduate level, leading to the Master of Science and the Doctor of Philosophy degrees in oceanography. In addition, various undergraduate courses are offered, and qualified undergraduate students may participate in a 15-credit minor in Oceanography. A minor consists of at least 15 hours from any of the undergraduate OCNG courses. However, only one of OCNG 251 or OCNG 401 can be used for the minor. At least 6 hours must be upper division courses in the minor. In addition, the department is initiating a 3+2 program.

Oceanography is unusual as a graduate discipline. Whereas graduate programs in most disciplines lead to progressively greater degrees of specialization, oceanography as an interdisciplinary field takes graduates of biology, chemistry, geology, mathematics, physics, geophysics, meteorology, or engineering and initially generalizes and broadens their education with a core of required courses. These core courses include the four subject areas of the oceanography program (biological, chemical, geological/geophysical and physical oceanography) and a seminar covering the state of the science. The student then refocuses in a particular subject area to pursue research and further study.

Effective study of oceanography requires a thorough undergraduate training in one of the pertinent undergraduate sciences, mathematics or engineering. During the undergraduate years, a student should consult with the oceanography faculty while enrolled in an appropriate undergraduate curriculum.

**Program Requirements**

Select 15 semester credits from the following:

- OCNG 251 Oceanography
- OCNG 252 Oceanography Laboratory
At least 6 hours must be upper division courses in the minor.

University Studies Programs

The College of Geosciences offers degrees in University Studies. A University Studies degree differs from a traditional “major” in that it consists of a concentration of 26 hours and two minors of 15-18 hours each. The University Studies degree format was created to provide students the flexibility to combine areas of study that are of special interest.

Majors

- Bachelor of Science in University Studies, Geographic Information Science and Technology Concentration (p. 390)
- Bachelor of Science in University Studies, Geography Concentration (p. 390)
College of Liberal Arts

Administrative Officers
Dean - Pamela R. Matthews, Ph.D.
Associate Dean - Patricia A. Hurley, Ph.D.
Associate Dean - Steven M. Oberhelman, Ph.D.
Associate Dean - Srividya Ramasubramanian, Ph.D.
Associate Dean - Gerianne Alexander, Ph.D.
Associate Dean - Paul Wellman, Ph.D.
Assistant Dean - Cheryl L. Hanks, M.A.

General Statement
The College of Liberal Arts offers students an opportunity to explore the intellectual achievements of humankind through a disciplined and responsible study of issues that have been of enduring importance to people. Thus, courses in liberal arts help students develop a sensitivity to the questions and values that confront them in their daily lives. At the same time, skills are built which can be put to use in solving complex problems. One of the program's principal objectives is to achieve the hallmark of an educated person: a fundamental knowledge of the forces that have shaped and continue to direct our cultural identity.

The purpose of the undergraduate program in the College of Liberal Arts is to foster independent thinking by offering students a broad education. To achieve this, the college supports the aims of the University Core Curriculum, which requires all students to engage in specific studies intended to promote an awareness of their heritage, their culture, and their environment. Students who choose to major in one of the Liberal Arts disciplines will complete a curriculum designed to promote this breadth of understanding while providing a focus through concentration in one specific area of study.

The first two years of undergraduate study in The College of Liberal Arts introduce students to the full range of arts, humanities, science, mathematics and social science areas that are established in the University Core Curriculum. During the last two years, students concentrate on their major and minor fields of study and complete their program with appropriate elective hours. Throughout the program, skills in critical thinking and in communication are developed, strengthened and polished.

Many graduates with bachelor's degrees in liberal arts continue their study at the graduate level in an academic discipline or in a profession such as medicine or law. The majority go directly into the job market. Studies have shown that liberal arts graduates are very successful in a variety of activities in commerce, business, or public service because the knowledge and skills they have developed are valuable in today's world. Many businesses actively recruit liberal arts majors.

Thus, whether as a foundation for further study or as a broad education preparatory to positions in business, industry, and the public domain, a liberal arts degree has intrinsic worth and enduring value.

General Degree Requirements
Degree requirements for Liberal Arts majors are organized into:

1. General Requirements, including University Core Curriculum requirements and College of Liberal Arts requirements
2. Requirements of the Major Field of Study
3. Requirements of the Minor Field of Study
4. Electives

A minimum of 120 acceptable hours of coursework is required for the baccalaureate degree. A minimum of 36 hours of 300- or 400-level coursework must be completed at Texas A&M University.

General Requirements
The areas listed below include University Core Curriculum requirements and College of Liberal Arts requirements. The completion of requisite hours in these areas will thus satisfy both University Core Curriculum and college requirements.

Bachelor of Arts Requirements

Communication
ENGL 104 Composition and Rhetoric
Select one of the following: 3
- ENGL 203 Writing about Literature
- ENGL 210 Technical and Business Writing
- COMM 203 Public Speaking
- COMM 205 Communication for Technical Professions
- COMM 243 Argumentation and Debate

Literature in English
Select two of the following: 6
- ENGL 202 Environmental Literature
- ENGL 203 Writing about Literature
- ENGL 204 Introduction to African-American Literature
- AFST 204
- ENGL 205 Introduction to Africana Literature
- AFST 205
- ENGL 206 Twenty-first Century Literature and Culture
- ENGL 212 Shakespeare
- ENGL 219 Literature and the Other Arts
- ENGL 221 World Literature
- MODL 221
- ENGL 222 World Literature
- MODL 222
- ENGL 227 American Literature: The Beginnings to Civil War
- ENGL 228 American Literature: Civil War to Present
- ENGL 231 Survey of English Literature I
- ENGL 232 Survey of English Literature II
- ENGL 313 Medieval English Literature
- ENGL 314 The English Renaissance
- ENGL 315 Seventeenth-Century Literature

Total Semester Credit Hours

1. Students must demonstrate the ability to express themselves in acceptable written English. The College requirement is satisfied if a student earns a grade of C or better in ENGL 203. Students who do not meet this standard must repeat the course prior to completing 60 hours and earn a grade of C or better or must immediately arrange with the director of the writing laboratory to be certified as competent in writing.

2. ENGL 203 will count toward the Communication requirement or the Literature in English requirement, but will not count toward both requirements.

3. Students must take a foreign language placement test if they:
   - intend to enroll for the first time in a college Spanish, French, German, Russian, Arabic, Chinese, Japanese, Classical Greek, Italian, or Latin course
   - have knowledge of the language acquired in any way
   - have no college credit in the language

   The placement test serves as a basis for credit by examination. Placement tests are offered throughout the calendar year by the Department of Hispanic Studies for Spanish and by the Department of International Studies for all other languages. Students who have taken the Advanced Placement (AP) test or the Reading Achievement test in their foreign language of choice may substitute the test results for the placement exam.

4. No course used to fulfill this requirement may fulfill any other college of University requirement except in the minor field of study.

5. Minimum of 3 and maximum of 6 semester credit hours in Creative Arts.

6. Courses in military, air or naval science may not be substituted for required courses.

7. The list of approved courses is available in the degree audit for each major.

### Computing Science, Mathematics, Science, Statistics
Prescribed courses by major department 6

**Total Semester Credit Hours** 74

---

1. Students must demonstrate the ability to express themselves in acceptable written English. The College requirement is satisfied if a student earns a grade of C or better in ENGL 203. Students who do not meet this standard must repeat the course prior to completing 60 hours and earn a grade of C or better or must immediately arrange with the director of the writing laboratory to be certified as competent in writing.

2. ENGL 203 will count toward the Communication requirement or the Literature in English requirement, but will not count toward both requirements.

3. No course used to fulfill this requirement may fulfill any other college of University requirement except in the minor field of study.

4. Minimum of 3 and maximum of 6 semester credit hours in Creative Arts.

5. Courses in military, air or naval science may not be substituted for required courses.

6. The list of approved courses is available in the degree audit for each major.

### Major Field of Study
Each department sets its own requirements for the major, including no fewer than 27 hours of coursework and no more than 33 hours (except for the BA in Music). At least 12 semester hours in the major must be completed in advanced courses (300- and 400-level), and at least 12 semester hours in the major field must be completed in residence at Texas A&M. A grade of C or higher is required in a course to be counted toward the major.

### Minor Field of Study
Completion of a minor is not a requirement of the College of Liberal Arts; however, individual departments may require their majors to have a minor. Students should consult with an advisor in their major department to determine if a minor is required. The minor program comprises 15–18 hours with a minimum of 6 hours in residence at the 300- to 400-level. Minor programs are recognized on the transcript after graduation, but not on the diploma. A grade of C or higher is required if a course is to be counted toward the minor field. Each student who is required to complete a minor, or who chooses to do so, should contact the department that offers the minor to determine which specific courses are mandated. The student’s college and/or major department determines the number of minor programs a student may seek and shall be responsible for advising after the student receives signed approval from the department, program, or college granting the minor program.

### Electives
To enhance the traditionally broad background of the liberal arts graduate, undergraduate students are allowed to include in their degree program a minimum of 9 semester hours of free elective courses. These courses may be chosen from any field within the University except from a student’s major field. (See section on “Requirements for a Baccalaureate Degree” in this catalog.) All other elective hours must be selected with the approval of the student’s advisor and dean.

- STLC 101, STLC 102 and STLC 289 may only be taken on an S/U basis.
- Lower level (100 and 200 level) military science coursework (AERS, MLSC, NVSC) does not apply to degree requirements in the College of Liberal Arts.
• No more than 14 semester credit hours combined of KINE 199 and upper-level Military Science or SOMS courses may be used as electives.
• Any undergraduate student may take up to four semester credit hours of KINE 199 on an S/U basis.
• In the College of Liberal Arts, students who have less than a 2.0 GPR and who enroll in KINE 199 must enroll in the course on an S/U basis.
• Juniors and seniors in the College of Liberal Arts whose cumulative GPR is 2.50 or above may take up to 12 semester credit hour hours of “free electives” on an S/U basis.
• Transfer students must take at least 12 semester credit hours of regular coursework at Texas A&M before enrolling in a course on an S/U basis.
• Courses offered only on an S/U basis may be taken by freshmen and sophomores. These courses count toward the 12 semester credit hour limit.

Combined Degree Plan, Double Degree and Double Major
Students may pursue a program to qualify for two bachelor’s degrees, either a Bachelor of Arts and a Bachelor of Science degree from different departments, or two Bachelor of Arts or two Bachelor of Science degrees, with the second degree from another college. Alternatively, instead of a major and a minor field, students in the College of Liberal Arts may elect to have two Liberal Arts major fields of study. Both majors may be within the college, or one major may be outside the college, provided both majors lead to the same baccalaureate degree.

Students must declare the double degree no later than the semester in which they will complete 90 hours. Students must have and maintain at least a 3.0 GPR cumulative and in the majors (or the minimum departmental GPR requirement in the major, whichever is higher), with at least a 3.0 GPR in at least 9 hours in the second field of study at the time of declaration. Before declaring the double degree, students should consult with the appropriate advisors to formulate the combined degree plan. The following requirements must be met: the student must
1. satisfy all University and college requirements
2. complete all required courses in each major, if both majors are in the College of Liberal Arts (i.e., take all courses that are specifically listed in each regular degree program)
3. in cases where one major is in the College of Liberal Arts and the other major is in another college, the student shall take in his or her liberal arts major field of study the same number of credit hours required of regular majors in that field and also satisfy whatever conditions are set by the other college for its major field

Candidates for a double bachelor’s degree must have been in residence at least two academic years and must complete all essential work of the second curriculum not covered in the first. To qualify for the double degree, the student must complete a minimum of 30 semester credit hours more than the higher number of semester credit hours required for either degree.

Curricular Options
International and Intercultural Experiences
The International and Cultural Diversity requirement encourages all students to learn about attitudes and cultures different from their own. All students are required to select from a list of approved courses that foster greater awareness of our interdependent and diverse world.

Students also may select, as free electives, courses which address cultural diversity issues in the United States. Courses in this area encourage students to focus on issues of race, ethnicity and gender and to develop a broader understanding of the diverse cultures and traditions in the United States.

Further opportunity to increase international and national intercultural awareness can be accomplished through study abroad and internship programs. More information on these programs is available through the Undergraduate Programs Office in the College of Liberal Arts.

Liberal Arts Honors Program
The College of Liberal Arts encourages qualified majors to participate in its Honors Program, which is designed for academically talented high school graduates who have distinguished secondary school records (top 10%) and high scores on achievement tests (1250 SAT or 28 ACT). Students accepted into the program take courses that foster an interdisciplinary outlook characteristic of the Liberal Arts and that synthesize knowledge from other courses. Participants work in small classes with some of the most distinguished faculty at Texas A&M University. Students develop their own interests and have the option to write an honors thesis under the direct supervision of a professor with whom they have chosen to work. For information about Texas A&M Honors Program and Fellows Program (i.e., the senior thesis), see the Honors and Undergraduate Research (http://honors.tamu.edu) website. Individual departments may have their own Honors program for their majors.

Interdisciplinary Minors
Interdisciplinary minors are offered in Africana Studies, Asian Studies, Comparative Cultural Studies, Film Studies, Hispanic Studies, Journalism Studies, Latino/a Mexican American Studies, Religious Studies, and Women’s and Gender Studies. Specific course requirements and options are available from each interdisciplinary program director.

Cooperative Education Program
Cooperative education enables students to gain practical work experience and a salary while completing academic requirements. During the four-year academic program, co-op students complete two to four periods of work away from campus, gaining experience through on-the-job training and thus improving their opportunities for future employment. An advisor in the cooperative education office provides additional information about this program.

Government Service (MPA Programs)
Most graduate programs in public administration recommend a broad background of knowledge and skills in the following areas: the political, social, economic and legal context of administration; analytical tools; individual, group and organizational dynamics; policy analysis; administrative/management processes; and arts and science foundation skills. Students are best prepared for an MPA program if their undergraduate programs are multidisciplinary in nature, drawing upon political science, economics, the behavioral sciences, the quantitative sciences, and administrative and managerial sciences.

Law
Most law school admissions committees require a student to have a baccalaureate degree, or equivalent, as well as an acceptable score on
the Law School Admissions Test (LSAT). In general, law schools prefer that a student seek a diverse college education rather than one which is narrowly specialized. They favor thorough learning in some broad cultural field of a student’s choice, such as history, economics, political science, philosophy, mathematics, science, literature, or the classics. Admissions committees rarely favor concentration in specialized, technical curricula unless such study is adequately supplemented by advanced work in the social sciences and humanities. The Law School Admissions Test Council and the Council of the Section on Legal Education and Admissions of the American Bar Association both advise against the taking of satisfactory/unsatisfactory courses by students intending to go to law school.

Advising for pre-law students regardless of major, including application forms for taking the Law School Admissions Test, may be obtained from the Office of Professional School Advising.

**Medicine**

Advising for all pre-health students, including medical and dental students, may be obtained from the Office of Professional School Advising. Students are urged to stop by the office to pick up information on professional schools and talk with an advisor very early in their collegiate career.

**Teacher Certification**

Students majoring in one of the departments of the College of Liberal Arts and working toward a teaching certificate must meet the minimum requirements described in the College of Education and Human Development section under secondary teacher certification. Because many certification requirements are determined by the State of Texas and thus are subject to periodic change, students working toward certification should maintain frequent contact with advisors in the College of Education and Human Development.

**Theology**

The American Association of Theological Schools recommends that students planning to enter a theological seminary include in their undergraduate curriculum the following subjects.

- English (6 semesters)
- History (3 semesters)
- Philosophy (3 semesters)
- Natural science (2 semesters)
- Social science (6 semesters)
- Foreign language (4 semesters): Latin, German or French
- Religion (3 semesters).

Courses taught at Texas A&M in religion include:

For more information, see the Director of the Religious Studies Program in the college.

**The English Language Institute**

The English Language Institute (ELI) offers a comprehensive program designed to help international students improve their English language ability. The goal of the English Language Institute is to provide the necessary language and cultural skills for international students to enter and participate in academic programs at Texas A&M. This intensive English program facilitates international students’ participation in technology, science and management. Enriched by the arts and humanities, the program serves current and future University students and emphasizes diversity and excellence.

Full-time ELI admitted students receive 25 hours of instruction per week, while part-time admitted students take from 3 to 12 or more hours per week. ELI classes meet on a regular University semester schedule in classrooms on the Texas A&M campus.

The ELI uses the most current textbooks, supplementary materials, language learning equipment and instructional techniques in the field of language learning. Courses emphasize listening and reading comprehension, fluency in speaking and writing, and the development of pronunciation skills, vocabulary and grammar. Courses are offered at beginning (100), intermediate (200), and advanced (300) levels. In addition, 500-level courses in oral skills prepare graduate students to serve as teaching assistants, while 500-level courses in composition teach preparation for thesis and dissertation writing. For more information, contact the ELI Office at (979) 845-7936.

**Majors**

**College of Liberal Arts**

- Bachelor of Arts in Economics, 5-Year Degree Program (p. 440)

**Department of Anthropology**

- Bachelor of Arts in Anthropology, General Track (p. 455)
- Bachelor of Arts in Anthropology, Archaeology Track (p. 427)

**Department of Communication**

- Bachelor of Arts in Communication (p. 430)
- Bachelor of Arts in Telecommunication Media Studies (p. 431)
- Bachelor of Science in Telecommunication Media Studies (p. 432)

**Department of Economics**

- Bachelor of Arts in Economics (p. 437)
- Bachelor of Science in Economics (p. 438)
- Bachelor of Science in Economics and Master of Science in Economics, 5-Year Degree Program (p. 440)
• Bachelor of Arts in Economics (p. 437) and Master of International Affairs, 5-Year Degree Program (p. 439)
• Bachelor of Arts in Economics (p. 437) and Master of Public Service and Administration, 5-Year Degree Program (p. 439)
• Bachelor of Science in Economics (p. 438) and Master of International Affairs, 5-Year Degree Program (p. 441)
• Bachelor of Science in Economics (p. 438) and Master of Public Service and Administration, 5-Year Degree Program (p. 442)

Department of English
• Bachelor of Arts in English (p. 447)
• Bachelor of Arts in English, Middle School Teaching Certification (p. 448)

Department of Hispanic Studies
• Bachelor of Arts in Spanish (p. 451)

Department of History
• Bachelor of Arts in History (p. 455)

Department of International Studies
• Bachelor of Arts in Classics, Classical Civilization Track (p. 456)
• Bachelor of Arts in Classics, Language and Literature Track (p. 457)
• Bachelor of Arts in International Studies, International Commerce Track (p. 458)
• Bachelor of Arts in International Studies, International Communication and Media Track (p. 459)
• Bachelor of Arts in International Studies, International Environmental Studies Track (p. 461)
• Bachelor of Arts in International Studies, International Geographic Information Systems Track (p. 463)
• Bachelor of Arts in International Studies, Global Cultural Studies Track (p. 464)
• Bachelor of Arts in International Studies, International Politics and Diplomacy Track (p. 466)
• Bachelor of Arts in International Studies and Master of Public International Affairs, 5-Year Degree Program (p. 467)
• Bachelor of Arts in Modern Languages, French Option (p. 469)
• Bachelor of Arts in Modern Languages, German Option (p. 470)
• Bachelor of Arts in Modern Language, Russian Option (p. 471)

Department of Performance Studies
• Bachelor of Arts in Music (p. 475)
• Bachelor of Arts in Theatre Arts (p. 476)

Department of Philosophy and Humanities
• Bachelor of Arts in Philosophy (p. 479)

Department of Political Science
• Bachelor of Arts in Political Science (p. 483)
• Bachelor of Science in Political Science (p. 483)
• Bachelor of Arts in Political Science and Master of Public Service and Administration, 5-Year Degree Program (p. 484)
• Bachelor of Science in Political Science and Master of Public Service and Administration, 5-Year Degree Program (p. 484)

Department of Psychology
• Bachelor of Arts in Psychology (p. 492)
• Bachelor of Science in Psychology (p. 492)

Department of Sociology
• Bachelor of Arts in Sociology (p. 495)
• Bachelor of Science in Sociology (p. 496)
• Bachelor of Arts in Sociology and Master of Public Service and Administration, 5-Year Degree Program (p. 497)
• Bachelor of Science in Sociology and Master of Public Service and Administration, 5-Year Degree Program (p. 497)

Women’s and Gender Studies - BA
Women’s and Gender Studies is a flexible interdisciplinary program devoted to the critical analysis of gender and the pursuit of knowledge about women throughout history and around the world. Combining the methods and insights of traditional liberal arts disciplines with the special insights of scholarship on women’s and gender studies, our courses yield fresh perspectives on the nature of gender as it intersects with race, ethnicity, class, religion, and nation, and encourage students to look beyond their own culture and era in examining gender’s role in shaping society. Through interdisciplinary breadth and an emphasis on critical thinking, women’s and gender studies prepares students to employ critical learning in their private lives as well as in public roles as citizens and members of a diverse and complex workforce.

Majors in women’s and gender studies receive training in both humanities and social sciences approaches and are required to complete coursework that focuses on material beyond dominant U.S. culture; core courses have both theoretical and applied focuses. In addition, majors pursue a strong liberal arts education and complete a minor in another disciplinary or interdisciplinary area, enhancing career options and enabling students to complement their work in the major and further their educational objectives by gaining detailed knowledge of a second area.

Since gender has far-reaching influence on daily life, world culture, and public policy, this major equips students to enter a wide range of fields. As a liberal arts degree, women’s and gender studies is attractive to employers looking for recruits trained in critical thinking, organizational skills, reading, writing, and presenting in a wide range of subject areas. Expertise in women’s and gender issues is increasingly important to businesses, governmental agencies, and other organizations dealing with matters such as sexual harassment, flex-time, parental leave, and pay equity, just as specialists in women’s and gender studies find opportunities in education, law, health care, social work, counseling, media, public policy, and a wide range of other fields.

### College and University Requirements

#### Communication

- **ENGL 104 Composition and Rhetoric**
- **ENGL 203 Writing about Literature**
- **ENGL 210 Technical and Business Writing**
- **COMM 203 Public Speaking**
- **COMM 243 Argumentation and Debate**

- Literature in English (p. 405)
- Foreign language (p. 405)
- Mathematics (p. 20)
- Life and physical sciences (p. 20)
- Creative arts (p. 22)
- Language, philosophy and culture (p. 21)
- Language, philosophy and culture course or Creative arts course (p. 21)
- Social and behavioral sciences (p. 23)
- Government/political science (p. 23)
- American history (p. 23)
- International and cultural diversity (p. 34)

#### Electives

- 7-10 for 120 total semester credit hours.
Courses may be applied both toward the WGST international and cultural diversity requirement and toward the WGST humanities and/or social sciences requirements.

Only students who are double majoring do not need to complete a minor. See the Minor Requirements section below.

A minimum grade of C is required.

See Literature in English table below for college approved list of courses.

WGST course may not be used to fulfill this requirement.

Completion of four semesters of upper-level ROTC may be substituted for 3 hours of American history or political science.

No more than one course may be in Texas history.

Students are required to complete 6 hours of International and Cultural Diversity courses. These courses may also be used to satisfy other requirements.

Minimum of 7 hours if 18-hour minor; minimum of 10 hours if 15-hour minor.

27 hours of WGST coursework required for the BA degree.

A minimum 2.0 GPR and a minimum grade of C for a course to count in the major. Completion of a minor in another field and completion of distribution requirements in the major as outlined.

At least 12 semester hours in the major must be completed in advanced courses (300- and 400-level), and at least 12 semester hours in the major field must be completed in residence at Texas A&M.

Minor Requirements

All Women's and Gender Studies majors, with the exception of those who are double-majoring, must complete a minor chosen from other departments or divisions within or outside the College of Liberal Arts. The minor will consist of 15–18 hours of coursework with a minimum of 6 hours in residence at the 300- to 400-level. A grade of C or higher is required if a course is to count in the minor. Courses taken toward the minor may also be used to satisfy University Core Curriculum requirements. Students should consult the advisor for the minor or the Undergraduate Student Services Office in the College of Liberal Arts for details about how to satisfy minor requirements.

College and University Requirements

Other courses may qualify. Students should consult the approved lists of courses available in the Undergraduate Student Services Office in the College of Liberal Arts. Students must complete a minimum of 36 hours of 300- or 400-level course work at Texas A&M University.
