Disciplines and topics that define modern polar science in the north and south; includes history of the Polar Regions, polar geosciences, major polar scientific projects, and special topics; participate as individuals and teams in education, outreach and science projects.
Prerequisite: Graduate classification.

GEOS 642/GEOG 642 Past Climates
Credits 3. 3 Lecture Hours.
Terrestrial and marine proxy records of past climate variability, including tree rings, coral, and sediments; past climate change events such as the Little Ice Age and Medieval Warm Period; greenhouse gases and global temperature; insight into the nature of climate change and challenges humankind faces in the next few centuries.
Prerequisite: Graduate Classification.
Cross Listing: GEOG 642/GEOS 642.

GEOS 677 Science, Technology, Engineering and Mathematics (STEM) Teaching Professional Development
Credit 1. 1 Lecture Hour.
Center for Teaching Excellence (CTE) consultation and faculty mentoring in STEM teaching; course topic and syllabus design; learning outcomes and assessment; teaching methodology; reflection on teaching philosophy; reflection on teaching as research. Must be taken on satisfactory/unsatisfactory basis.
Prerequisites: Graduate classification and approval of instructor.
Cross Listing: ENGR 677 and SCEN 677.

GEOS 689 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Selected topics in an identified area of geosciences. May be repeated for credit.
Prerequisites: Graduate classification and approval of instructor.

GERM - German

Courses

GERM 101 Beginning German I
Credits 4. 3 Lecture Hours. 2 Lab Hours.
(GERM 1411, 1511) Beginning German I. Elementary language study with oral, written and reading practice. Preparation for conversation. Part of class preparation will be done in language laboratory.

GERM 102 Beginning German II
Credits 4. 3 Lecture Hours. 2 Lab Hours.
(GERM 1412, 1512) Beginning German II. Continuation of GERM 101. Part of class preparation will be done in language laboratory.
Prerequisite: GERM 101.
GERM 201 Intermediate German I
Credits 3.3 Lecture Hours.
Prerequisite: GERM 102.

GERM 202 Intermediate German II
Credits 3.3 Lecture Hours.
(GERM 2312) Intermediate German II. Continuation of GERM 201 with more advanced material. Some literary selections included in class readings.
Prerequisite: GERM 201.

GERM 221 Field Studies I
Credits 3.3 Other Hours.
German language and culture taught in Germany; supervised travel of cultural interest; living with local families; participation in the activities and courses of a German university or institute; written and oral reports, exams; to be taken concurrently with GERM 222.
Prerequisite: GERM 102 with a grade of B or higher.

GERM 222 Field Studies II
Credits 3.3 Other Hours.
German language and literature taught in Germany in cooperation with a German university or institute; exams, written reports; to be taken concurrently with GERM 221.
Prerequisite: GERM 102 with a grade of B or higher.

GERM 285 Directed Studies
Credits 1 to 4, 1 to 4 Other Hours.
Individual supervision of readings or assigned projects in German, selected for each student individually.
Prerequisite: Approval of instructor and department head.

GERM 289 Special Topics in...
Credits 1 to 4, 1 to 4 Lecture Hours.
Selected topics in an identified area of German. May be repeated for credit.
Prerequisite: Approval of instructor.

GERM 301 Composition
Credits 3.3 Lecture Hours.
Development of writing skills in German; emphasis on grammatical construction; taught in German.
Prerequisite: GERM 202 or GERM 222.

GERM 311 Conversation
Credits 3.3 Lecture Hours.
Development of effective communication skills in spoken German, with emphasis on language appropriate to various social context; taught in German.
Prerequisite: GERM 202 or GERM 222.

GERM 315 Literary Investigations: German Short Fiction
Credits 3.3 Lecture Hours.
Readings of selected works of short prose from the early 20th century to the present with emphasis on principles of literary analysis; conducted in German.
Prerequisite: GERM 202 or GERM 222.

GERM 316 Advanced Business German
Credits 3.3 Lecture Hours.
Continuation of GERM 203; reading and oral practice of German pertinent to business, trade and international commerce.
Prerequisite: GERM 202 or GERM 222.

GERM 321 German Culture and Civilization I
Credits 3.3 Lecture Hours.
German culture and civilization from classical antiquity to 1830; major stylistic periods in literature and the fine arts; conducted in German.
Prerequisite: GERM 202 or GERM 222.

GERM 322 German Culture and Civilization II
Credits 3.3 Lecture Hours.
German culture and civilization from 1830 to the present; conducted in German.
Prerequisite: GERM 202 or GERM 222.

GERM 331 German Literary Expression I
Credits 3.3 Lecture Hours.
Readings of selected drama, poetry, and prose works of German literature from the Middle Ages through Romanticism; problems involved in defining dramatic, lyric, and epic genres considered; structural and aesthetic elements of literary works; conducted in German.
Prerequisite: GERM 310 or GERM 315, or registration therein.

GERM 332 German Literary Expression II
Credits 3.3 Lecture Hours.
Readings of selected drama, poetry, and prose works of German literature of the modern era; problems involved in defining dramatic, lyric, and epic genres considered; structural and aesthetic elements of literary works; conducted in German.
Prerequisite: GERM 310 or GERM 315, or registration therein.

GERM 333 Contemporary Germany
Credits 3.3 Lecture Hours.
Social, political, and economic debates and issues in Germany from 1945 to the present through the arts (literature, film, video, music); focus on post-war reconstruction, divided Germany, and post-reunification periods; conducted in German.
Prerequisites: GERM 310 or GERM 315, or registration therein.

GERM 334 German Drama
Credits 3.3 Lecture Hours.
Study, analysis and public presentation in German of a major German dramatic work; literary theory and intensive conversational practice combined with skills of language acquisition within a performance setting.
Prerequisite: GERM 310 or GERM 315, or registration therein.

GERM 336 German Fairy Tales
Credits 3.3 Lecture Hours.
Introduction to and study of fairy tales and children's literature through German tradition in these forms; reception of fairy tales through adaptation and modernization; taught in German.
Prerequisite: GERM 310 or GERM 315, or registration therein.

GERM 362 The Weimar Republic: Literature and Culture
Credits 3.3 Lecture Hours.
Film, theater and poetry in the turbulent era prior to the Nazi terror; conducted in German.
Prerequisite: GERM 310 or GERM 315, or registration therein.

GERM 410 Seminar in German Literature and Culture
Credits 3.3 Lecture Hours.
Survey of major literary and intellectual landmarks of a period in German history (Enlightenment, Romanticism, High Modernism, post-1945); study of literary works in context of social and cultural history, with attention to Germany's particular place in Europe and the world; taught in German. May be taken two times.
Prerequisite: 6 hours in GERM at 300-level, or approval of instructor.
GERM 411 German Author and Genre Studies
Credits 3. 3 Lecture Hours.
Examination of the work of a specific author, such as Goethe, Schiller, Kafka, Brecht, Frisch, or Grass, or the diachronic study of a specific genre, e.g., poetry, drama, prose; taught in German. May be taken two times.
Prerequisite: 6 hours in GERM at 300-level, or approval of instructor.

GERM 432/EURO 432 Music in German Culture
Credits 3. 3 Lecture Hours.
Examination of the role of music in German cultural and national self-definition from the 18th century to the present; the political and ideological role of music; study of genres and media including opera, art song, Singspiel, protest songs and film.; taught in English.
Prerequisite: GERM 202 or registration therein or approval of instructor.
Cross Listing: EURO 432/GERM 432.

GERM 434 Martin Luther and the Reformation in Germany
Credits 3. 3 Lecture Hours.
The life and thought of Martin Luther; study of the Protestant Reformation in Germany from theological, political, and social perspectives; taught in English.
Prerequisite: GERM 202 or registration therein or approval of instructor.

GERM 435/FILM 435 German Film
Credits 3. 3 Lecture Hours.
Consideration and analysis of major works and directors of German film; interpretation of culture through film; relationship of film to history, literature, and other arts; taught in English. May be repeated for credit.
Prerequisites: Junior or senior classification, or approval of instructor.
Cross Listing: FILM 435/GERM 435.

GERM 437 German Romanticism: Literature, Theory, Philosophy
Credits 3. 3 Lecture Hours.
From Goethe's "Faust" to the romantic exaltation of poetry; influence of the romantic movement on European literary theory and philosophy; taught in English.
Prerequisite: GERM 202 or registration therein, or approval of instructor.
Cross Listing: EURO 437/GERM 437.

GERM 485 Directed Studies
Credits 1 to 4. 1 to 4 Other Hours.
Individual supervision of readings or assigned projects, selected for each student individually; written and oral reports.
Prerequisite: Approval of instructor and department head.

GERM 489 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Selected topics in an identified area of German. May be repeated for credit.
Prerequisite: Approval of instructor.

GERM 491 Research
Credits 1 to 3. 1 to 3 Other Hours.
Research conducted under the direction of faculty member in German. May be taken three times for credit.
Prerequisites: Junior or senior classification and approval of department head.

GERM 603 Introduction to Scientific German
Credits 3. 3 Lecture Hours.
Intensive course to prepare graduate students to read scientific material; technical vocabulary and translation. May not count for hours in a supporting field.
Prerequisite: Graduate classification.

GERM 685 Directed Studies
Credits 1 to 4. 1 to 4 Other Hours.
Directed individual study of selected problems in the field of German.
Prerequisite: Approval of department head.

GERM 692 Readings
Credits 3. 3 Lecture Hours.
Readings in German literary texts in the original language.
Prerequisite: Graduate classification.

HBRW - Hebrew

Courses

HBRW 101 Elementary Modern Hebrew I
Credits 4. 3 Lecture Hours. 2 Lab Hours.
Elementary language study with oral, written and reading practice; preparation for conversation; part of class preparation to be done in the language laboratory.

HBRW 102 Elementary Modern Hebrew II
Credits 4. 3 Lecture Hours. 2 Lab Hours.
Continuation of HBRW 101; part of class preparation to be done in the language laboratory.
Prerequisite: HBRW 101.

HBRW 285 Directed Studies
Credits 0 to 3. 0 to 3 Other Hours.
Individual supervision of readings or assigned projects in Hebrew, selected for each student individually.
Prerequisites: Approval of instructor and department head.

HBRW 289 Special Topics In...
Credits 3. 3 Lecture Hours.
Selected topics in an identified area of Hebrew studies. May be repeated for credit.
Prerequisite: Approval of instructor.

HEFB - Health Ed Field Based

Courses

HEFB 222/KNFB 222 Teaching and Schooling in Modern Society
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Developing an understanding of students in multiple settings and levels; development, structure, history, finance, and management of schools in a democratic society; philosophical, ethical and moral dimensions of teaching; professional role of teacher.
Prerequisites: Junior or senior classification; majors only.
Cross Listing: KNFB 222/HEFB 222.

HEFB 324 Technology and Teaching Skills for the 21st Century Learner
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Preparation of future Health and Physical Education teachers with practical skills related to: technology in the classroom/gymnasium, strategies for addressing urban education and English language learners, liability, management and classroom discipline, development of professional communication skills and time management; includes field based experiences in diverse classroom settings.
Prerequisites: HEBF 222/KNFB 222; junior or senior classification; admission to professional phase of program.
HEFB 325/KNFB 325 Introduction to Secondary School Teaching  
Credits 3. 2 Lecture Hours. 2 Lab Hours.  
Introduce fundamental teaching skills and theories necessary for preparing  
reflective teachers; examine classroom management, learning strategies  
and assessment techniques; classroom lectures combined with field- 
based experiences to link theory into practice.  
Prerequisites: HEFB 324; admission to the professional phase of  
program; junior or senior classification.  
Cross Listing: KNFB 325/HEFB 325.

HEFB 450/KNFB 450 Supervised Student Teaching  
Credits 6. 0 Lecture Hours. 6 Other Hours.  
Observation and participation in an accredited public school classroom;  
techniques of teaching student’s teaching fields, and appropriate  
instructional strategies for assigned student population.  
Prerequisites: Admission to professional phase of program and to student  
teaching; junior or senior classification.  
Cross Listing: KNFB 450.

**HISP - Hispanic Studies**

**Courses**

**HISP 201 Current Issues in Hispanic Studies**  
Credit 1. 1 Lecture Hour.  
Exploration of current issues and concerns in Hispanic Studies through  
attendance and participation in Hispanic Studies-related events and  
lectures by noted academics and professionals in Hispanic Studies; in-  
class discussions. May be taken three times for credit. Must be taken on a  
satisfactory/unsatisfactory basis.  
Prerequisite: ENGL 104.

Credit 1. 1 Lecture Hour.  
Introduction to contemporary Mexican social, cultural, and political  
institutions; discussion of Mexican university system; readings and  
discussion in Spanish and English. For preparation for study abroad  
program in Mexico.  
Prerequisite: SPAN 101 or equivalent.

**HISP 285 Directed Studies**  
Credits 0 to 3. 0 to 3 Other Hours.  
Individual supervision of readings or assigned projects in Hispanic studies,  
selected for each student individually.  
Prerequisites: Approval of instructor and department head.

**HISP 289 Special Topics In...**  
Credits 3. 3 Lecture Hours.  
Selected topics in an identified area of Hispanic studies. May be taken  
three times for credit.  
Prerequisites: ENGL 104; freshman or sophomore classification;  
approval of department head.

**HISP 291 Research**  
Credits 0 to 3. 0 to 3 Other Hours.  
Research in Hispanic studies conducted under the direction of faculty  
member. May be taken two times for credit.  
Prerequisites: freshman or sophomore classification and approval of  
instructor.

**HISP 352 Hispanic Literature and Film**  
Credits 3. 3 Lecture Hours.  
The language of film, and film as fiction; the relationship between film and  
literature; films as expressions of cultural realities through the adaptation  
of Hispanic literary works; readings and lectures in English.

**HISP 362/ENGL 362 Latino/a Literature**  
Credits 3. 3 Lecture Hours.  
Literature by U.S.-based Latino/a authors writing mostly in English;  
examination of historical and social contexts of cultural production; may  
include novels, poetry, short stories, plays, and films to gain understanding  
of aesthetic expression of diverse Latino/a authors, including but not  
limited to Mexican Americans, Puerto Ricans, Cuban Americans and  
Dominican Americans.  
Prerequisite: Junior or senior classification.  
Cross Listing: ENGL 362/HISP 362.

**HISP 363 Borderlands: U.S. and Mexico**  
Credits 3. 3 Lecture Hours.  
Multiple images of the U.S./Mexico border, their creation, their evolution,  
and their conflicting representations in filmic, literary and musical texts.  
Prerequisites: ENGL 104 and junior or senior classification.

**HISP 364/RELS 364 Diversity Lessons from Medieval Spain**  
Credits 3. 3 Lecture Hours.  
Crucible of cultures--Christian, Jewish, and Muslim--that was medieval  
Spain and modern implications of that experience in diversity.  
Prerequisites: ENGL 104 and junior or senior classification.  
Cross Listing: RELS 364/HISP 364.
HISP 371/RELS 371 Hispanic Religions  
Credits 3.3 Lecture Hours.  
Exploration of the history and practice of Hispanic religion, including spirit possession, evil eye, consumption of sacred substances, healing traditions, ex-votos, relics, prophecy, omens, monsters, astrology, witchcraft, the Inquisition, festivals, pilgrimage, mystics and religious contributions of diverse ethnic groups.  
Prerequisite: Junior or senior classification or approval of instructor.  
Cross Listing: RELS 371/HISP 371.  

HISP 485 Directed Studies  
Credits 0 to 3. 0 to 3 Other Hours.  
Individual supervision of readings or assigned projects in Hispanic studies, selected for each student individually.  
Prerequisites: Junior or senior classification; approval of instructor and department head.  

HISP 489 Special Topics in...  
Credits 1 to 4. 1 to 4 Lecture Hours. 0 to 4 Lab Hours.  
Selected topics in an identified area of hispanic studies. May be taken three times for credit.  
Prerequisites: ENGL 104; junior or senior classification; approval of department head.  

HISP 600 Introduction to Hispanic Studies  
Credits 3.3 Lecture Hours.  
Interdisciplinary review of linguistic, literary, theoretical, cultural, historical and socio-economic issues of the Hispanic world; study of the mechanics and ethics of scholarly procedure and bibliographical guidance on original research; Spanish-language writing practicum.  
Prerequisite: Graduate classification.  

HISP 602 Spanish Applied Linguistics  
Credits 3.3 Lecture Hours.  
Current linguistic research that investigates real-world issues related to Spanish language use and the acquisition of Spanish as a second language.  
Prerequisite: HISP 600.  

HISP 603 Development of the Spanish Language  
Credits 3.3 Lecture Hours.  
The origin and development of the Spanish language from pre-Roman to modern period with emphasis on the socio-historical contexts; analysis of literary and documentary evidence of linguistic evolution.  
Prerequisite: HISP 602 or approval of instructor.  

HISP 605 Spanish for Reading and Translation  
Credits 3.3 Lecture Hours.  
Lexical and grammatical study and practice for the acquisition of research-practical reading and translation competence in Spanish; for graduate students needing foreign language reading competence; taught in English.  
Prerequisite: Graduate classification.  

HISP 606 Spanish in the United States  
Credits 3.3 Lecture Hours.  
In-depth description and analysis of Spanish varieties spoken in the United States, by both traditional and new immigrant populations, including New Mexico and Louisiana Spanish, Mexican, Cuban, Puerto Rican, Dominican, Central and South American dialects; topics include accommodation, koinéization, borrowing, code-switching, attitudes and policies related to language maintenance and shift.  
Prerequisite: Graduate classification.  

HISP 607 Seminar in Spanish Linguistics  
Credits 3.3 Lecture Hours.  
Intensive investigation of an issue important to understanding historical linguistics, dialectology, sociolinguistics, developments in theoretical and applied linguistics. May be taken three times for credit as content varies.  
Prerequisite: Graduate classification.  

HISP 614 Spanish Dialectology  
Credits 3.3 Lecture Hours.  
Analysis of regional linguistic variation from a synchronic and diachronic perspective; topics include varieties spoken in Spain, the Americas, and worldwide; dialect diversification, contact varieties, Spanish-based pidgins and creoles.  
Prerequisite: Graduate classification.  

HISP 618 Hispanic Traditional and Popular Culture and Religion  
Credits 3.3 Lecture Hours.  
Comprehensive examination of theories of criticism and their application to the study of literature and culture.  
Prerequisite: Graduate classification.  

HISP 620 Studies in Critical Theory  
Credits 3.3 Lecture Hours.  
Study of the literary production of Latin America from colonial times to the present; topics may include colonial literature, Romanticism, Modernism, the novel of the Mexican Revolution, contemporary trends in the Latin American novel, Afro-Hispanic literature, Hispanic Caribbean literature. May be taken three times for credit.  
Prerequisite: Graduate classification.  

HISP 625 U.S. Hispanic Literature and Culture  
Credits 3.3 Lecture Hours.  
Study of the origins and evolution of U.S. Hispanic literature, culture and folklore, and U.S. Hispanic regional dialects.  
Prerequisite: Graduate classification.  

HISP 630 Seminar in Latin American Literature  
Credits 3.3 Lecture Hours.  
Study of cultural and ideological currents as reflected in Spanish literature; topics may include Spain and European culture, European thought in Latin America, the Renaissance in Spanish literature and society, Spain and Western tradition, national identity, U.S. Hispanic nationalism. May be taken three times for credit.  
Prerequisite: Graduate classification.  

HISP 640 Seminar in History of Ideas in the Hispanic World  
Credits 3.3 Lecture Hours.  
Study of cultural and ideological currents as reflected in Spanish literature; topics may include Spain and European culture, European thought in Latin America, the Renaissance in Spanish literature and society, Spain and Western tradition, national identity, U.S. Hispanic nationalism. May be taken three times for credit as content varies.  
Prerequisite: Graduate classification.  

HISP 645 Hispanic Women Writers  
Credits 3.3 Lecture Hours.  
A study of the development of writing by women in the Hispanic world, including Spain, Latin America, and the United States. Topics include identity and nation, building of a feminine aesthetics, the reception of women writers, literary canons and exclusion, women and/in the Latin American boom, Latina writers in the United States.  
Prerequisite: Graduate classification.
HISP 646 Seminar in Cultural Encounters and Borders
Credits 3. 3 Lecture Hours.
Study of cultural encounters across borders in geography, language, society, gender and genre. May be taken three times for credit as content varies.
Prerequisite: Graduate classification.

HISP 650 Research Methods in Linguistics
Credits 3. 3 Lecture Hours.
Examination of various methods of linguistics research and their application to issues in Hispanic linguistics; quantitative data collection (questionnaires, surveys, corpora) and statistical analysis; qualitative methods (ethnographic interviews, focus groups) and discourse analysis; mixed methods and triangulation.
Prerequisite: Graduate classification.

HISP 653 Don Quixote and the Hispanic Novel
Credits 3. 3 Lecture Hours.
Don Quixote and the development of modern fiction, its influence in the Hispanic narrative tradition, from Fernández de Avellaneda to Pérez Galdós, G. García Márquez, and Carlos Fuentes, and presence in the U.S. Hispanic novel.
Prerequisite: Graduate classification.

HISP 660 Seminar in Hispanic Cultural Studies
Credits 3. 3 Lecture Hours.
Intensive study and research on specialized subjects in cultural studies. May be taken three times for credit as content varies.
Prerequisite: Graduate classification.

HISP 664 Seminar in Hispanic Theater
Credits 3. 3 Lecture Hours.
Study of Peninsular, Latin American, U.S. Hispanic, Afro-Hispanic theater and performance. May be taken three times for credit as content varies.
Prerequisite: Graduate classification.

HISP 665 Seminar in Spanish Literature
Credits 3. 3 Lecture Hours.
Study of Peninsular literary periods, genres and authors from medieval to contemporary times. May be taken three times for credit as content varies.
Prerequisite: Graduate classification.

HISP 667 Seminar in Hispanic Genre Studies
Credits 3. 3 Lecture Hours.
Study of selected topics in the works, characteristics and classifications of a given genre cultivated by Hispanic writers. May be taken three times for credit as content varies.
Prerequisite: Graduate classification.

HISP 668 Modern Latin American Poetry from 1850-2010
Credits 3. 3 Lecture Hours.
Study of poetry in Latin America between 1850 and 2010 with particular emphasis on "poesía gauchesca," Romanticism, Modernism and avant-garde, along with neobaroque, barrococó, language poetry and cybertextual poetry.
Prerequisite: Graduate classification.

HISP 670 Seminar in U.S. Hispanic Literature
Credits 3. 3 Lecture Hours.
Study of the literary production of U.S. Hispanic authors; topics may include bilingual literature, Nuyorican literature, Cuban American literature, Chicano literature, the immigrant novel, ethnic autobiography, U.S. Hispanic theater, Chicano theater. May be taken three times for credit as content varies.
Prerequisite: Graduate classification.

Credits 3.3 Lecture Hours.
Introduction to the history of Islam, from the origins of the religion to the present; development of Islamic law; gender issues; expansion of Islam to Sub-Saharan Africa and South Asia; globalized Islam.

Cross Listing: RELS 221/HIST 221.

HIST 226 History of Texas
Credits 3.3 Lecture Hours.
(HIST 2301) History of Texas. History of Texas from Spanish period to present day. Stress placed upon period of Anglo-American settlement, revolution, republic and development of modern state.

HIST 230 American Military History, 1609 to Present
Credits 3.3 Lecture Hours.
Main events, personalities and technologies related to American military history.

HIST 232 History of American Sea Power
Credits 3.3 Lecture Hours.
Development of American sea power from the 18th century to the present.

HIST 234 European Military History, 1630-1900
Credits 3.3 Lecture Hours.
European military history from Gustavus Adolphus to the Boer War including especially societal involvement as well as roles of classic commanders.

HIST 238 American Indian History
Credits 3.3 Lecture Hours.
Survey of American Indian history; Pre-Columbian, First Contact, Colonial Conquest, Differentiation between cultural groups; Reservation period, twentieth-century self-determination, and Pan-Indianism.

HIST 280 The Historian’s Craft
Credits 3.3 Lecture Hours.
The Historian’s Craft. The world of the professional historian; meanings and uses of history; current debates; archival research; evidence and argumentation; principles and methods of the analytical narrative.

HIST 300/AFAST 300 Blacks in the United States, 1607-1877
Credits 3.3 Lecture Hours.
Blacks in the United States from the colonial period to 1877; the slave trade, slavery, free blacks and the impact of the Civil War and Reconstruction on blacks.

Prerequisite: Junior or senior classification.

Cross Listing: AFST 300/HIST 300.

HIST 301/AFAST 301 Blacks in the United States Since 1877
Credits 3.3 Lecture Hours.
Blacks in the United States from the end of Reconstruction to the present; the ideologies of black leaders, disfranchisement, lynching and the quest for equality in the 1950s and 1960s.

Prerequisite: Junior or senior classification.

Cross Listing: AFST 301/HIST 301.

HIST 302 Women and War in the African Diaspora
Credits 3.3 Lecture Hours.
Case studies of women and war in the African diaspora in a wide historical and comparative context; social, economic, and cultural influence of war on women’s lives; women as victims, combatants, and refugees; historical construction of race, ethnic and gender identity during times of conflict.

Prerequisite: Junior or senior classification.

HIST 304 Mexican-American Frontier to 1848
Credits 3.3 Lecture Hours.
Origins and development of Spanish and Mexican history of Greater Southwest; exploration and conquest; Spanish entradas into Southwest; rise of institutions and colonial society; economic history; Mexican independence; Mexico’s far northern frontier, 1821-1848.

Prerequisite: Junior or senior classification.

HIST 305 Mexican-American History 1848-Present
Credits 3.3 Lecture Hours.
Social, economic and political evolution of Mexican Americans from 1848 to present; adaptation to a harsh and isolated frontier; land tenure systems; conflict in the new Southwest; change and continuity in society; immigration and settlement of Mexicans; emergence of various political movements; current issues.
HIST 307 Latino Communities of the U.S.
Credits 3.3 Lecture Hours.
Hispanic or “Latino” communities of 20th century U.S.: Mexican Americans, Puerto Ricans, Cubans and Central Americans; differences in historical experiences; role of race, class, and gender; cultural identity as expressed in art, literature, folklore and religion; contemporary social, political, and economic issues.

Prerequisite: Junior or senior classification.

Credits 3.3 Lecture Hours.
Examination of the role of indigenous populations in the history and formation of the U.S. South; cultural values and social practices; impact of European exploration and African slavery; trade patterns, imperial wars, and removal policies.

Prerequisite: Junior or senior classification.

HIST 319 U.S. Immigration and Ethnicity
Credits 3.3 Lecture Hours.
The sources and persistence of ethnic identity in 19th and 20th century America; its interaction with religion, politics, languages, education and social mobility; various nativist and anti-immigrant movements; contrasts and continuities between contemporary immigration patterns and those of earlier eras.

Prerequisite: Junior or senior classification.

HIST 320 History of the Atlantic World
Credits 3.3 Lecture Hours.
Introduction to the comparative study of the civilizations and cultures that bordered on the Atlantic Ocean; examination of culture and economic exchanges and adaptations, migrations, empire-building, and the emergence of new societies and cultures.

Prerequisite: Junior or senior classification.

HIST 321 The Age of Revolution in the Atlantic World
Credits 3.3 Lecture Hours.
Origins and events of the revolutions that transformed the Atlantic empires of Great Britain, France, and Spain in the late eighteenth and nineteenth centuries; disruption of old political and economic orders; creation of independent states in the Americas.

Prerequisite: Junior or senior classification.

HIST 322 History of the Iberian World
Credits 3.3 Lecture Hours.
Introduction to the people and places of the Iberian World, ca. 1500-1900; social, political and economical relations between Spain, Portugal, Asia and the Americas; emergence of a shared culture and cross-cultural exchange.

Prerequisite: Junior or senior classification.

HIST 325 Texas Cultural History
Credits 3.3 Lecture Hours.
The image of Texas history, tradition and popular culture from the 19th century to the present.

Prerequisite: HIST 226 or ANTH 201, ANTH 210 or ANTH 229.

HIST 326 History of the Caribbean to Emancipation
Credits 3.3 Lecture Hours.
History of the Caribbean region from human settlement to the late nineteenth century; indigenous peoples; European colonization; colonial societies; challenges to the imperial plantation model.

Prerequisite: Junior or senior classification.

HIST 327 History of the Caribbean Since Emancipation
Credits 3.3 Lecture Hours.
History of the Caribbean region from the late nineteenth century to the present; links to earlier plantation societies; economic, cultural, social, and political developments.

Prerequisite: Junior or senior classification.

HIST 330 Women in Ancient Greece and Rome
Credits 3.3 Lecture Hours.
Survey of women in classical Greece and Rome; emphases on female occupations and family relationships, legal and political status, traditional values, notorious women, how women were viewed and how they viewed themselves.

Prerequisite: Junior or senior classification.

Cross Listing: CLAS 330 and WGST 330.

Credits 3.3 Lecture Hours.
European political and diplomatic history from Constantine to Philip the Fair; emergence of medieval institutions; the influence of Plato and Aristotle upon Augustine, Abelard and Thomas Aquinas, and the origins of European education and law.

HIST 332 Renaissance and Reformation Europe, 1300 to 1660
Credits 3.3 Lecture Hours.
Renaissance politics and diplomacy; political ideas of Erasmus and Machiavelli; art and humanism of the Renaissance; religious views of Luther, Calvin and Zwingli; the “new” economics.

HIST 333 Europe in the Age of Absolutism, 1660-1815
Credits 3.3 Lecture Hours.
Europe from the “Age of Louis XIV” to the Congress of Vienna; Russia, Austria and Prussia. Mercantilism, capitalism and the rise of the middle class. Origins and consequences of the Enlightenment.

HIST 334 History of Europe in the Nineteenth Century
Credits 3.3 Lecture Hours.
Cultural, economic, and political processes that shaped European civilization (east and west); the Napoleon era; industrialization and urbanization; liberalism and socialism; empire and revolution; cultural developments.

Prerequisite: Junior or senior classification.

HIST 335 Europe, 1890-1932
Credits 3.3 Lecture Hours.
A political, diplomatic, social and cultural history of Europe prior to, during and shortly after World War I.

HIST 336 Europe Since 1932
Credits 3.3 Lecture Hours.
A political, diplomatic, military, social and cultural history of Europe prior to, during and since World War II.

HIST 337 War and European Society in the Twentieth Century
Credits 3.3 Lecture Hours.
War and social change in Europe during the twentieth century; relationships between front lines and home fronts; government and civil society; gender and war; ethnic and national identities in Eastern, Central, and Western Europe.

Prerequisite: Junior or senior classification.

HIST 338 The Rise of the European Middle Class
Credits 3.3 Lecture Hours.
Survey of European society and social classes from the origins of capitalism in the Middle Ages to the triumph of the “middle class world” in the 19th century; rise of the middle class, development of bourgeois ideology and culture, and creation of the working class.
HIST 339 Eastern Europe Since 1453
Credits 3. 3 Lecture Hours.
Eastern Europe from the fall of the Byzantine Empire to the present; the
Ottoman, Habsburg, Russian and Soviet Empires; the origins of modern
East European states.
Prerequisite: Junior or senior classification.

HIST 341 Latin America to 1810
Credits 3. 3 Lecture Hours.
Political history of South America from exploration and settlement to
independence; colonial institutions; commercial systems.
Prerequisite: Junior or senior classification.

HIST 342 Latin America Since 1810
Credits 3. 3 Lecture Hours.
Political history of independent South American nations since
independence with emphasis upon ABC countries; economic, social and
cultural development; foreign relations.
Prerequisite: Junior or senior classification.

HIST 343 Inter-American Relations
Credits 3. 3 Lecture Hours.
Cultural, diplomatic and economic relations in the Western Hemisphere in
historical perspective.
Prerequisite: Junior or senior classification or approval of instructor.

HIST 344/AFST 344 History of Africa to 1800
Credits 3. 3 Lecture Hours.
Origins of humankind in Africa; development and spread of pastoralism,
agriculture and iron-working; formation of states and empires; impact of
Christianity and Islam; rise of international trade in gold, ivory and slaves;
African diaspora.
Prerequisite: Junior or senior classification.
Cross Listing: AFST 344/HIST 344.

HIST 345/AFST 345 Modern Africa
Credits 3. 3 Lecture Hours.
Survey of Africa since 1800; pre-colonial African states and societies;
establishment and impact of European colonial rule; rise of nationalist
movements; achievement of independence; problems of political stability
and economic development in contemporary Africa; South Africa's
apartheid regime and its opponents.
Prerequisite: Junior or senior classification.
Cross Listing: AFST 345/HIST 345.

HIST 346/AFST 346 History of South Africa
Credits 3. 3 Lecture Hours.
Selected themes in the history of South Africa from the African Iron Age
to the Apartheid regime; history of race relations in the 19th and 20th
centuries and the rise of a modern industrial state.
Cross Listing: AFST 346/HIST 346.

HIST 347/RELS 347 Rise of Islam, 600-1258
Credits 3. 3 Lecture Hours.
Introduction to Islamic civilization from the rise of Islam to the Mongol
conquests; examination of pre-Islamic poetry, the Qur'an, early Islamic
laws on prayer, the ethical conventions of jihad, the lives of Muslim
women, and the relation of Islam to Judaism and Christianity.
Prerequisite: Junior or senior classification.
Cross Listing: RELS 347/HIST 347.

HIST 348 Modern Middle East
Credits 3. 3 Lecture Hours.
Survey of the Middle East since 1800; introduction to Islam and Islamic
civilization; decline of the Ottoman Empire; European imperialism; rise of
nationalist movements; Zionism and the emergence of Israel; Arab-Israeli
conflict; impact of oil; revolution in Iran and Islamic resurgence.
Prerequisite: Junior or senior classification.

HIST 349/ASIA 349 The Vietnam War/The American War
Credits 3. 3 Lecture Hours.
Vietnam's relations with the West; French colonialism; origins and
development of Vietnamese nationalism; Cold War and American
involvement; wartime societies in North and South Vietnam; expansion of
the war to Cambodia and Laos; anti-war movements in the United States;
reasons for American defeat; consequences and lessons of the war.
Prerequisite: Junior or senior classification.
Cross Listing: ASIA 349/HIST 349.

HIST 350/ASIA 350 Asia During World War II
Credits 3. 3 Lecture Hours.
The origins and development of Japanese imperialism; Japan's expansion
into East and Southeast Asia; wartime societies; collaboration and
resistance; effects of the war in the United States upon Japanese-
Americans; the outcomes of the war; remembrance of the war.
Prerequisite: Junior or senior classification.
Cross Listing: ASIA 350/HIST 350.

HIST 351/ASIA 351 Traditional East Asia
Credits 3. 3 Lecture Hours.
History and culture of China and Japan from earliest times to the coming
of the West; impact of Confucianism and Buddhism; development of
social, political and economic systems.
Cross Listing: ASIA 351/HIST 351.

HIST 352/ASIA 352 Modern East Asia
Credits 3. 3 Lecture Hours.
Impact of the West on traditional China and Japan; the response through
modernization; rise of nationalism and formation of modern nation states.
Prerequisite: Junior or senior classification.
Cross Listing: ASIA 352/HIST 352.

HIST 353 Modern South Asia
Credits 3. 3 Lecture Hours.
Survey of the modern nation states of South Asia, including India,
Pakistan, Bangladesh, Afghanistan, Nepal, Ceylon, Bhutan, and Burma,
ca., 1600 to the present; major political events; economic, social, and
cultural developments.
Prerequisite: Junior or senior classification.

HIST 354/ASIA 354 Imperial China
Credits 3. 3 Lecture Hours.
History of imperial China from the earliest dynasties through the mid-19th
century, including major political events, the structure of Chinese
government, economic development, philosophies and religion, wars and
military and culture and daily life.
Prerequisite: Junior or senior classification.
Cross Listing: ASIA 354/HIST 354.

HIST 355/ASIA 355 Modern China
Credits 3. 3 Lecture Hours.
History of China from the coming of the West to the present; social,
economic and political changes which have taken place during that period.
Cross Listing: ASIA 355/HIST 355.
HIST 356/ASIA 356 Twentieth Century Japan
Credits 3. 3 Lecture Hours.
Industrialization and modernization of Japan; its rise from an isolated nation to a major world power and economic giant.
Cross Listing: ASIA 356/HIST 356.

HIST 357/AFST 357 Out of Africa: The Black Diaspora and the Modern World
Credits 3. 3 Lecture Hours.
History and cultures of the peoples of the African Diaspora from the fourteenth through the nineteenth centuries; social, political, and economic impact on Africa, the Americas, Europe, and the Arab World; emphasis on race, gender, identity, and migration.
Prerequisite: Junior or senior classification.
Cross Listing: AFST 357/HIST 357.

HIST 358/ASIA 358 Chinese Cultural History
Credits 3. 3 Lecture Hours. 0 Lab Hours.
Examination of Chinese culture and its evolution over the last 4,000 years; customs, art, literature, festivals, folklore, religion, architecture, medicine, and everyday life.
Prerequisite: Junior or senior classification.
Cross Listing: ASIA 358/HIST 358.

HIST 359 American Environmental History
Credits 3. 3 Lecture Hours.
History of American attitudes toward nature: use of land, water, timber, oil, coal, wildlife and other natural resources in the United States; conservation movement and significant conflicts over resources; changing perception of the physical environment.

HIST 360 History of Energy in America
Credits 3. 3 Lecture Hours.
Impact of energy upon industrial America; emphasis on relationship between energy and industrial development, emergence of state and federal energy policies, role of energy in foreign policy, growth of energy-oriented industries and impact of energy development on the environment.

HIST 361 Technology and Engineering in Western Civilization, 1400-Present
Credits 3. 3 Lecture Hours.
Man's material culture and his understanding of the physical world since the 15th century; role of the Renaissance and the Scientific, Agricultural and Industrial Revolutions in Europe; the resulting transformations in western civilization.

HIST 362 History of Science
Credits 3. 3 Lecture Hours.
The ideas of the great scientists and their impact on society; the Newtonian Revolution; Lavoisier and the new chemistry; Darwin and evolutionary thought; Enrico Fermi, Robert Oppenheimer and the development of nuclear energy.

HIST 363 History of Science in America
Credits 3. 3 Lecture Hours.
The major developments in the physical and life sciences from colonial times to the present; the lives and scientific contributions of such famous American scientists as Benjamin Franklin, Joseph Henry, Thomas Edison and J. Robert Oppenheimer.

HIST 364 History of Technology and Engineering in America, 1607-Present
Credits 3. 3 Lecture Hours.
American technological development from the colonial times to the present; technology in society, factors affecting technological development, changing attitudes toward technological accomplishments and the effects of technology upon society.

HIST 365/RELS 365 History of Religion in America to 1860
Credits 3. 3 Lecture Hours.
Religion in America from European origins through New England Puritanism. U. S. Constitutional issues, immigration, revivalism and the Civil War; relationship between dissenters, utopians and visionaries versus mainstream counterparts.
Cross Listing: RELS 365/HIST 365.

HIST 366/RELS 366 History of Religion in America from 1860 to the Present
Credits 3. 3 Lecture Hours.
Religion in America from the Civil War; relationship of religion and science, ethnic assimilation, emergence of fundamentalism, mass evangelism, cults and criticisms of contemporary culture; examination of social and racial problems by the major religious traditions.
Cross Listing: RELS 366/HIST 366.

HIST 367 Colonization of North America
Credits 3. 3 Lecture Hours.
Geographic setting; early English, French, Dutch, Swedish discovery, conquest and settlement, 1497-1763; colonial administration; colonial life; inter-colonial wars.

HIST 368 The Birth of the Republic, 1763-1820
Credits 3. 3 Lecture Hours.
Impact of French and Indian War; British colonial policy 1763-1775; War for Independence; Confederation crisis; Constitution-making and ratification; development of political parties; problem of foreign entanglements; War of 1812; conflict of nationalist and sectionalist tendencies; historiography and interpretation.

HIST 369 The United States, 1820-1860
Credits 3. 3 Lecture Hours.
Jacksonian democracy; impact of nationalism and sectionalism; manifest destiny and Mexican War; slavery controversy; expansion.

HIST 370 Civil War and Reconstruction
Credits 3. 3 Lecture Hours.
Survey of background and causes of the war; military, political, economic, and diplomatic aspects of the war; life behind the lines; Reconstruction and post-war adjustments, 1861-1877.

HIST 371 America in the Gilded Age, 1877-1901
Credits 3. 3 Lecture Hours.
The United States from 1877 to 1901; political, cultural and economic developments.

HIST 372 Reform, War and Normalcy: The United States, 1901-1929
Credits 3. 3 Lecture Hours.
Emergence of Progressivism; reform in the cities and states; reforms and foreign policies of the Theodore Roosevelt, William Howard Taft and Woodrow Wilson administrations; World War I and aftermath; Harding-Coolidge normalcy; the Jazz Age; Hoover and the Great Crash.

HIST 373 The Great Depression and World War II
Credits 3. 3 Lecture Hours.
The United States, 1929-1945; cultural, social, economic, and political developments in the nation; global diplomacy and military strategy.
HIST 374 The United States After World War II
Credits 3.3 Lecture Hours.
The United States since World War II; political, economic, cultural and social changes and role as a world leader.

HIST 376 Great Scientists in History
Credits 3.3 Lecture Hours.
History of fundamental scientific principles through biography; Galileo, Newton, Darwin, Mendel, Curie, Einstein, Pauling, and others.
Prerequisite: Junior or senior classification.

HIST 401 Slavery in World History
Credits 3.3 Lecture Hours.
Comparative history of human slavery; slavery in the Ancient World, Asia, Africa; varieties of political, social, cultural, and economic life in divided and occupied Germany; abolition of slavery and continuing forms of human bondage in the contemporary world.
Prerequisite: Junior or senior classification.
Cross Listing: AFST 401 and ASIA 401.

HIST 402 Germany Since 1815
Credits 3.3 Lecture Hours.
A survey of the unification of Germany; creation of the German Empire; Weimar Republic; rise and fall of Nazi Germany; and the role of Germany in international diplomacy.

HIST 403 History of Nazi Germany
Credits 3.3 Lecture Hours.
Inner workings of the Third Reich from inception in 1933 to collapse at the end of World War II in 1945; leadership and structure of the Nazi party; family life, religion and business.

HIST 404 Post 1945 Germanies
Credits 3.3 Lecture Hours.
Examines Germany from the end of World War II to the end of the 20th century; includes political, social, cultural, and economic life in divided and occupied Germany; covers Germany since reunification in 1990.
Prerequisite: Junior or senior classification.

HIST 405 History of the Holocaust
Credits 3.3 Lecture Hours.
History of the Nazi Holocaust; Third Reich; Jewish Ghetto life and concentration camps; role of the military, S.S. and German business; lessons and legacies.

HIST 406 The Era of the French Revolution and Napoleon, 1715-1815
Credits 3.3 Lecture Hours.
Origins and events of the French Revolution; Napoleon Bonaparte and the First Empire; social, economic, political and military developments in France and Europe.

HIST 407 History of France Since 1815
Credits 3.3 Lecture Hours.
Nineteenth century Bourbon, Orleanist, Bonapartist and Republican regimes; France in World Wars I and II; De Gaulle and the role of France in the 20th century.

HIST 410 Russian History to 1801
Credits 3.3 Lecture Hours.
Origins and Christianization of Russia; establishment and decline of Kievan Rus’ state; Mongol conquest and domination of Russia; rise of Moscow, establishment of tsardom, expansion of state in sixteenth and seventeenth centuries; Peter the Great’s reforms; emergence of Russian Empire as a major power; era of Catherine the Great.

HIST 411 Imperial Russia 1801-1917
Credits 3.3 Lecture Hours.
The last century of the autocratic Romanov dynasty and the social, intellectual, economic and political forces that ended it; political culture, society in transition, international affairs and revolutionary groups in an era of reform, counter-reform, reaction and industrialization.

HIST 412 Soviet Union 1917-1991
Credits 3.3 Lecture Hours.

HIST 416 Texas Since 1845
Credits 3.3 Lecture Hours.
History of Texas since annexation; social, cultural, economic and political developments and the place of Texas in national affairs.

HIST 418 European Intellectual History from Ancient Greece to the Early Middle Ages
Credits 3.3 Lecture Hours.
Political and social history of selected major figures and important movements in political theory, literature, sociology, art, economics and philosophy from Pre-Socratic Greece through the formative stages of the Christian Middle Ages.
Prerequisite: Junior or senior classification.
Cross Listing: CLAS 418 and RELS 418.

HIST 419/RELS 419 European Intellectual History from the High Middle Ages to the 17th Century
Credits 3.3 Lecture Hours.
Political and social history of selected major figures and important movements in political theory, literature, sociology, art, economics and philosophy from the founding of Scholasticism and the University System to the New Philosophy and science of 17th century.
Prerequisite: Junior or senior classification.
Cross Listing: RELS 419/HIST 419.

HIST 420 European Intellectual History from the Enlightenment to 1900
Credits 3.3 Lecture Hours.
(3-0). Political and social history of selected major figures and important movements in political theory, literature, sociology, art, economics and philosophy in the 18th and 19th centuries.

HIST 421 European Intellectual History in the Twentieth Century
Credits 3.3 Lecture Hours.
Political and social history of selected major figures and important movements in political theory, literature, sociology, art, economics and philosophy from the turn of the century to the present.

HIST 426/CLAS 426 The Ancient Greeks
Credits 3.3 Lecture Hours.
Greek History and civilization from the Archaic Age to Alexander the Great (8th-late 4th century B.C.).
Prerequisite: Junior or senior classification, or approval of instructor.
Cross Listing: CLAS 426/HIST 426.
HIST 427/CLAS 427 The Roman Republic I: The Empire Builders
Credits 3.3 Lecture Hours.
Roman history and civilization from the beginnings of the Republic (6th/5th century B.C.) to the late 2nd century B.C.
Prerequisite: Junior or senior classification, or approval of instructor.
Cross Listing: CLAS 427/HIST 427.

HIST 428/CLAS 428 The Roman Republic II: The Civil Wars
Credits 3.3 Lecture Hours.
Roman history and civilization from the late 2nd century B.C. to the 1st century A.D.
Prerequisite: Junior or senior classification, or approval of instructor.
Cross Listing: CLAS 428/HIST 428.

HIST 429/CLAS 429 The Roman Empire
Credits 3.3 Lecture Hours.
Roman History and civilization of the Imperial Period (1st century B.C.-6th century A.D.).
Prerequisite: Junior or senior classification.

HIST 431 The Kingdom of Ireland, 1541-1800
Credits 3.3 Lecture Hours.
History of Ireland from the mid sixteenth century through the end of the eighteenth century; impact of religion, politics, warfare, land disputes, famine, and international developments; creation of the United Kingdom.
Prerequisite: Junior or senior classification.

HIST 432 The Nation of Ireland, 1800 to the Present
Credits 3.3 Lecture Hours.
History of Ireland from the creation of the United Kingdom through the end of the twentieth century; British-Irish relations; agrarian unrest and violence; famine; political, cultural, and religious developments.
Prerequisite: Junior or senior classification.

HIST 435 Sixteenth-Century Britain
Credits 3.3 Lecture Hours.
Changes in social, cultural, economic, political and religious institutions and organization; growth of the nation state; the "new monarchy": Reformation and religious settlement; international relations; inflation and social dislocation; the role of Parliament.

HIST 436 Seventeenth-Century Britain
Credits 3.3 Lecture Hours.
Social, political, economic, cultural and religious developments, Puritanism and the Revolution of the 1640s, the Restoration, establishment of constitutional monarchy after 1688, Great Britain's rise as an imperial power.

HIST 437 Eighteenth Century Britain
Credits 3.3 Lecture Hours.
Political, social, economical, intellectual, cultural, and imperial history of Britain in the eighteenth century.
Prerequisite: Junior or senior classification.

HIST 438 Nineteenth Century England
Credits 3.3 Lecture Hours.
Political, social, economic and intellectual history of England from 1815 to 1914.

HIST 439 Twentieth Century England
Credits 3.3 Lecture Hours.
Constitutional, political, economic, military and social history of England since 1910.

HIST 440 Latin American Cultural and Intellectual History
Credits 3.3 Lecture Hours.
Main currents of culture and thought as shaped by historical circumstances.

HIST 441 History of Mexico, 1821 to the Present
Credits 3.3 Lecture Hours.
Political, economic and social development of Mexico since independence and her relation to other world powers.

HIST 442 World War II
Credits 3.3 Lecture Hours.
Origins; military campaigns in Europe, North Africa, Asia, and the Pacific; European, Japanese, Asian, and American home fronts; collapse of Germany; atomic warfare; legacies.
Prerequisite: Junior or senior classification.

HIST 443 American Military History to 1901
Credits 3.3 Lecture Hours.
American military experience from colonial days to 1901; causes, nature and effect of the wars in which the United States has participated.

HIST 444 American Military History Since 1901
Credits 3.3 Lecture Hours.
American military experience from 1901 to present; causes, nature and effect of wars in which the United States has participated; effect of war on American history.

HIST 445 History of Modern Military Thought
Credits 3.3 Lecture Hours.
Military thought and theory, 1700 to the present.

HIST 447 Law and Society in the United States
Credits 3.3 Lecture Hours.
How political and social conditions in American history have produced fundamental constitutional principles, changes and practices; historical evolution of written and unwritten Constitution.

HIST 449 History of Brazil, 1822 to the Present
Credits 3.3 Lecture Hours.
Political, cultural and economic development of Brazil since independence; slavery and race relations; relation to other world powers.
Prerequisite: Junior classification.

HIST 450 The Old South
Credits 3.3 Lecture Hours.
History of antebellum South; physical bases of Southern regionalism; Southern alignments on national issues; slavery-plantation economy and society of Old South; secession and formation of Confederacy.

HIST 451 The New South
Credits 3.3 Lecture Hours.
Political, economic, social and intellectual developments in the South since Reconstruction.

HIST 453 The American Frontier
Credits 3.3 Lecture Hours.
Westward movement; patterns of westward expansion, pioneer settlement, the West in diplomacy and influence of frontier on American life and institutions.

HIST 455 History of the American City
Credits 3.3 Lecture Hours.
History of American Cities: a social, economic and political study of industry, labor and immigration; development of a metropolitan society.
HIST 456 American Agricultural History
Credits 3.3 Lecture Hours.
History of American agricultural development from the Revolutionary period to the present; technological developments, major farm industries, labor, regional development, farm movements and farm programs.

HIST 459 American Society and Culture to 1877
Credits 3.3 Lecture Hours.
Century of social and political thought, religion, science, scholarship and education in the United States.

HIST 460 American Society and Culture Since 1877
Credits 3.3 Lecture Hours.
Continuation of HIST 459 from 1877 to the present.

HIST 461/WGST 461 History of American Women
Credits 3.3 Lecture Hours.
Cultural, political, legal and religious factors that helped shape the role and character of women in American society from colonial times to the present; historical role of women in the development of the nation.
Cross Listing: WGST 461/HIST 461.

HIST 462 American Foreign Relations
Credits 3.3 Lecture Hours.
History of U.S. foreign relations and policies to 1913.

HIST 463 American Foreign Relations
Credits 3.3 Lecture Hours.
History of U.S. foreign relations and policies since 1913.

HIST 464 International Developments Since 1918
Credits 3.3 Lecture Hours.
General survey of world politics since close of World War I; problems and ideologies of great powers of Europe and factors and conditions which explain present political tendencies and policies.

HIST 469 History of Collective Protest and Violence
Credits 3.3 Lecture Hours.
Examination of collective protest and violence on a case study basis and in comparative and historical context; emphasis on causes, the nature of participation, assumptions and goals, and the character of repression.
Prerequisite: Junior or senior classification.

HIST 470 American Business History
Credits 3.3 Lecture Hours.
Management strategy and structure of the modern corporation in 19th and 20th century America and the corporation's changing roles in American society.

HIST 473/WGST 473 History of Modern American Women
Credits 3.3 Lecture Hours.
Emergence of modern American women in the 1890s; examination of their history from the 1890s to the present; women as organizers, innovators, political reformers, workers, social activists, housewives, mothers, consumers and feminists.
Cross Listing: WGST 473/HIST 473.

HIST 475 Empire and History
Credits 3.3 Lecture Hours.
Survey of empire in a wide historical and comparative framework using a case study approach; themes of a given case study include changing social, economic, and cultural politics of imperialism, resistance in colonial environments, colonial and post-colonial identities, and race and gender relations. May be taken 3 times for credit.
Prerequisite: Junior or senior classification.

HIST 476/WGST 476 Sex and Sexuality in History
Credits 3.3 Lecture Hours.
Changing ideas about sex and sexuality over time; includes their interaction with ideas about gender, race, class, religion, science, technology, medicine, politics and popular culture; historical and cultural processes creating modern concerns about sex and sexuality.
Prerequisite: Junior or senior classification.
Cross Listing: WGST 476/HIST 476.

HIST 477/WGST 477 Women in Modern European History
Credits 3.3 Lecture Hours.
Women in Europe from the 18th century to the present: women's contributions to their societies; realities of their daily lives and their responses; perceptions of women; role of institutions in defining women's roles; significance for women of industrialization, revolution, warfare, scientific discoveries; interaction of class, race and gender.
Cross Listing: WGST 477/HIST 477.

HIST 481 Seminar in History
Credits 3.3 Lecture Hours.
Literature of an issue, event, period or people in history; use of primary source materials connected with the field of the seminar; problems of bibliography, historiography and historical method; and experience in writing.
Prerequisite: 21 credits of history, 9 of which must be 300-level or above. Open to senior history majors or with instructor's approval.

HIST 485 Directed Studies
Credits 3.0 to 3.0 to 3.0 Other Hours.
Selected fields of history not covered in depth by other courses. Reports and extensive reading required.
Prerequisite: Approval of department head.

HIST 489 Special Topics in...
Credits 1 to 4.1 to 4 Lecture Hours.
Selected topics in an identified area of history.

HIST 491 Research
Credits 0 to 3.0 to 3.0 Other Hours.
Research conducted under the direction of faculty member in history.
Prerequisites: 24 hours if history, with 12 or more at 300-level or above; junior or senior classification and approval of instructor.

HIST 497 Independent Honors Studies
Credits 1 to 3.1 to 3 Other Hours.
Directed independent studies for upper division Honors students, regardless of academic major, in selected aspects of history.
Prerequisites: Junior or senior classification either as Honors student or with overall GPR of 3.25 and letter of approval from head of student's major department and approval of head, Department of History.

HIST 601 Colonial North America
Credits 3.3 Lecture Hours.
The 17th- and 18th-century settlement of European North American colonies; slavery; comparisons of colonial administrations; interactions of Native Americans, Europeans, and African Americans across racial, ethnic, and cultural borders. May be taken two times for credit as content varies.
Prerequisite: Graduate classification.
HIST 604 The Early Republic
Credits 3. 3 Lecture Hours.
War for Independence; organizing the new government; the Constitutions; Federalists and Jeffersonians; Wars of 1812 and 1846; race, class, and gender in Jacksonian society; political, social, cultural, economic and territorial changes. May be taken two times for credit as content varies.
Prerequisite: Graduate classification.

HIST 613 Twentieth Century United States Diplomacy
Credits 3. 3 Lecture Hours.
U.S. foreign policies from end of Spanish-American War to present; scope, principles, practices, objectives, dangers and lessons learned.
Prerequisite: Approval of department head.

HIST 615 Colonial America
Credits 3. 3 Lecture Hours.
Social, ethnic, political, economic, religious, military, and cultural institutions in colonial Latin America, including attention to ethnohistory, women, and comparative colonial systems.
Prerequisite: Graduate classification.

HIST 617 Latin America: The National Period
Credits 3. 3 Lecture Hours.
Social, ethnic, cultural, religious, political, and economic history of Latin America.
Prerequisite: Graduate classification.

HIST 620 Sectionalism, Civil War and Reconstruction
Credits 3. 3 Lecture Hours.
Antebellum sectional divisions; causes of the Civil War; military campaigns and political and military leadership; the changing status of African Americans; social, political, economic, cultural and diplomatic developments; Reconstruction.
Prerequisite: Graduate classification.

HIST 621 The Emergence of Modern America
Credits 3. 3 Lecture Hours.
Social, political, economic and cultural developments in the late 19th and early 20th centuries; industrialization; labor and farmer unrest; immigration; frontier transitions, imperialism.
Prerequisite: Graduate classification.

HIST 623 America since World War II
Credits 3. 3 Lecture Hours.
The Cold War; wars in Korea, Vietnam, and the Persian Gulf; the Civil Rights and Women's Rights Movements; immigration; social, cultural, and gender controversies.
Prerequisite: Graduate classification.

HIST 624 Readings in Race, Ethnicity, and Migration
Credits 3. 3 Lecture Hours.
Selected topics and themes in the history of race, ethnicity, and migration; individual and community identity-formation; colonization, slavery, and empire; migration and immigration; social movements; borders and nation-building. May be taken three times for credit as content varies.
Prerequisite: Graduate classification.

HIST 625 Research Seminar in Race, Ethnicity, and Migration
Credits 3. 3 Lecture Hours.
Topics and issues in the study of race, ethnicity, and migration history. May be taken three times for credit as content varies.
Prerequisite: Graduate classification.

HIST 628 Historiography
Credits 3. 3 Lecture Hours.
Analysis of historical writing and philosophy of history; works of important historians from Herodotus to present; schools, theories and function of history.
Prerequisite: Approval of department head.

HIST 629 Research Methods and Professional Development
Credits 3. 3 Lecture Hours.
Prepares for a career in history by exploring the practical side of the profession; includes life as a graduate student, teaching, research methods, ethics, grant-writing, conference papers, publishing, non-academic alternatives, and the job market.
Prerequisite: Approval of instructor.

HIST 630 Quantitative Methods in Historical Research
Credits 3. 3 Lecture Hours.
Introduction to formal methods of analysis in historical research using computers; and applying quantitative methods to research problems.
Prerequisite: Approval of instructor.

HIST 631 Reading Seminar in United States History to 1877
Credits 3. 3 Other Hours.
Prerequisite: Approval of department head.

HIST 632 Reading Seminar in United States History after 1876
Credits 3. 3 Lecture Hours.
Prerequisite: Approval of department head.

HIST 633 The American West
Credits 3. 3 Lecture Hours.
Immigrants and settlement patterns; international conflicts; social, racial, ethnic and cultural interactions across frontiers and borders; economic developments; politics and admission of new states into the United States; women's and gender issues; environmental concerns. May be taken two times as content varies.
Prerequisite: Graduate classification.

HIST 634 Maritime History and Sea Power
Credits 3. 3 Lecture Hours.
Examines the maritime and naval history of the world with emphasis on the Western World since 1600; trade and communication, exploration, technology, maritime communities and naval warfare.
Prerequisite: Graduate classification.

HIST 635 Writing History
Credits 3. 3 Lecture Hours.
Development of writing skills for graduate students in history; preparation of publishable-quality article-length essays based on primary sources; peer review and criticism.
Prerequisites: Graduate classification; approval of instructor.

HIST 639 Readings in Asian History
Credits 3. 3 Lecture Hours.
Social and cultural transformation of modern Asia; politics and government; wars and military; imperialism and foreign relations; economic development, society, and culture. May be taken three times for credit as content varies.
Prerequisite: Graduate classification.
HIST 640 Readings in Atlantic World and Caribbean History  
Credits 3. 3 Lecture Hours.  
Selected topics and themes in the history of the Atlantic World and Caribbean; revolutions, European colonialism in Africa and the Americas; transatlantic slave trade; growth of plantation societies; abolition of slavery; post-emancipation period. May be taken three times for credit as content varies.  
Prerequisite: Graduate classification.  

HIST 641 Research Seminar in Atlantic World and Caribbean History  
Credits 3. 3 Lecture Hours.  
Topics and issues in the history of the Atlantic World and the Caribbean. May be taken three times for credit as content varies.  
Prerequisite: Graduate classification.  

HIST 643 Reading Seminar in European History from Renaissance to French Revolution  
Credits 3. 3 Lecture Hours.  
Reading seminar in European history from the Renaissance to the French Revolution, classic and current themes, debates and methodologies in European history from the Renaissance to the French Revolution.  
Prerequisite: Approval of department head.  

HIST 644 Reading Seminar in European History from French Revolution to Present  
Credits 3. 3 Lecture Hours.  
Reading seminar in European history from the French Revolution to the present; classic and current themes, debates and methodologies in European history from the French Revolution to the present.  
Prerequisite: Approval of department head.  

HIST 645 Research Seminar in War and Society  
Credits 3. 3 Lecture Hours.  
Research and writing seminar focusing on issues and topics in war and society. May be taken four times for credit as content varies.  

HIST 646 Readings in War and Society  
Credits 3. 3 Lecture Hours.  
Reading seminar focusing on methodological issues related to the study of war and society; impact of organized violence and warfare on social structures; military organizations and operations; the experience of non-combatants. May be taken four times for credit as content varies.  
Prerequisite: Approval of instructor and director of graduate studies; graduate classification.  

HIST 648 Readings on Topics in Modern European History  
Credits 3. 3 Lecture Hours.  
Readings on topics covering the history of the political, social, cultural, intellectual, and diplomatic development of modern Europe as a whole or in part, or that of individual nations, empires, or regions. May be taken three times for credit as content varies.  
Prerequisite: Graduate classification.  

HIST 666 History of Technology  
Credits 3. 3 Lecture Hours.  
Origins of the subfield; historiography; industrial development and labor relations; impact on the military; gender, class, and other social aspects.  
Prerequisite: Graduate classification.  

HIST 674 Readings in Chicano-Latino History  
Credits 3. 3 Lecture Hours.  
Selected topics and themes related to Chicano-Latino history; race/ethnicity, gender/sexuality, labor adaption and resistance movements; colonialism, transnationalism, immigration; identity, and citizenship. May be taken three times for credit as content varies.  
Prerequisite: Graduate classification.  

HIST 675 Research Seminar in Chicano-Latino History  
Credits 3. 3 Lecture Hours.  
Seminar focuses on researching and writing, core skills for historians; conduct primary source research in a subfield Chicano-Latino history and compose an article-length paper. May be taken three times for credit.  
Prerequisite: Graduate classification.  

HIST 677 Modern Britain  
Credits 3. 3 Lecture Hours.  
Political, social, cultural, economic and diplomatic development of the United Kingdom in the 20th Century. May be taken for credit two times as content varies.  
Prerequisite: Graduate classification.  

HIST 678 Readings in the Southwest and its Borders  
Credits 3. 3 Lecture Hours.  
Reading seminar focusing on how groups in the American Southwest articulate, enforce and challenge difference; brings together disparate historiographies to consider a variety of theoretical and methodological approaches used in understanding borders; examines contact, conflict and change across various kinds of historical and cultural boundaries. May be taken two times for credit as content varies.  
Prerequisite: Graduate classification.  

HIST 679 Research Seminar in the Southwest and its Borders  
Credits 3. 3 Lecture Hours.  
Research and writing seminar focusing on selected topics and themes in an identified area of Southwest Border Studies. May be taken two times for credit as content varies.  
Prerequisite(s): Graduate classification.  

HIST 685 Directed Studies  
Credits 1 to 6. 1 to 6 Other Hours.  
Individual problems of research or scholarly activity not pertaining to thesis or dissertation, or selected instruction not covered by other courses.  
Prerequisite: Approval of instructor and department head.  

HIST 689 Special Topics in...  
Credits 1 to 4. 1 to 4 Lecture Hours.  
Selected topics in an identified area of American or European history. May be repeated for credit.  

HIST 691 Research  
Credits 1 to 23. 1 to 23 Other Hours.  
Thesis research.  
Prerequisite: Approval of department head.  

HLTH - Health  

Courses  

HLTH 210 Introduction to the Discipline  
Credits 3. 3 Lecture Hours.  
Concepts essential to understanding the discipline: competencies and career opportunities for professional health educators in school and community settings.  
Prerequisites: Current health major; HLTH 231 or concurrent enrollment.  

HLTH 214/KINE 214 Health and Physical Activity for Children  
Credits 3. 3 Lecture Hours.  
Coordinated school health and physical activity programs appropriate for elementary aged children; focus on the content of the curriculum and the philosophical underpinnings of programming related to health and physical activity.  
Prerequisite: KINE 198.  
Cross Listing: KINE 214/HLTH 214.
HLTH 216 First Aid
Credits 2. 1 Lecture Hour. 2 Lab Hours.
(PHED 1206, 1306) First Aid. Basic first aid instruction leading to National Safety Council, University Level, first aid course completion recognition.

HLTH 221 Safety
Credits 3. 3 Lecture Hours.
The magnitude of the accident problem as it relates to individual and community well-being; promotion of safe behavior. No credit will be given for both HLTH 221 and SAED 301.

HLTH 222 Concepts in Peer Health Education
Credits 3. 3 Lecture Hours.
Preparation as peer educators and campus community leaders; experiential learning; includes various health topics, program development, presentation and public speaking, communication and group facilitation.

HLTH 231 Healthy Lifestyles
Credits 3. 3 Lecture Hours.
(PHED 1304) Healthy Lifestyles. Health issues relevant to students; included are mental health, use and abuse of drugs, human sexuality, communicable diseases, environmental and consumer health.

HLTH 236 Race, Ethnicity and Health
Credits 3. 3 Lecture Hours.
Explore in-depth the racial, ethnic, and cultural dimensions that underlie health and health disparities; emphasis on culture, social economic status and governmental policies as they influence the adaptation of health practices.

HLTH 240/KINE 240 Computer Technology in Health and Kinesiology
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Application of current technology in the areas of health and kinesiology; fundamentals of computers and their use; application of commercial software to health and kinesiology settings; use of computer networks for communications and research.
Prerequisite: Freshman or sophomore classification in health or kinesiology.
Cross Listing: KINE 240/HLTH 240.

HLTH 285 Directed Studies
Credits 0 to 4. 0 to 4 Other Hours.
Work on a specified topic with the intent of promoting independent reading, research and study; supplement existing course offerings or subjects not presently covered.
Prerequisites: Freshman or sophomore classification; approval of instructor.

HLTH 291 Research
Credits 0 to 4. 0 to 4 Other Hours.
Research conducted under the direction of faculty member in health. May be repeated 4 times for credit.
Prerequisites: Freshman or sophomore classification and approval of instructor.

HLTH 311 Community Health
Credits 3. 3 Lecture Hours.
Aspects of the community that relate to health; identification and analysis of community health programs; organizational pattern and functions of voluntary and governmental health agencies; organizing the community for health action; and coordination of school and community health programs.
Prerequisite: HLTH 231 or concurrent enrollment.

HLTH 322 School Health Program
Credits 3. 3 Lecture Hours.
Background, development, administration and framework of the school health program; role of the school health team; nature and function of school health services and healthful school living.
Prerequisite: HLTH 231 or concurrent enrollment.

HLTH 334/WGST 334 Women's Health
Credits 3. 3 Lecture Hours.
A broad range of health issues that are either unique to women or of special importance to women; information for the health consumer; preparation as an advocate of healthy lifestyles; awareness of the role health plays in the life of all women.
Prerequisite: Junior or senior classification.
Cross Listing: WGST 334/HLTH 334.

HLTH 335 Human Diseases
Credits 3. 3 Lecture Hours.
Causes of disease, course of communicable disease, body's defense against disease and classification and description of diseases.
Prerequisite: BIOL 319, BIOL 320; admission to professional phase of program.

HLTH 342 Human Sexuality
Credits 3. 3 Lecture Hours.
Many aspects of human sexuality; physiology and function of human reproductive system, factors involved in learning sex roles, biological and emotional motivations associated with the sexual aspects of life and their relationship to marriage and family planning.
Prerequisite: Admission to the professional phase of program.

HLTH 353 Drugs and Society
Credits 3. 3 Lecture Hours.
Use and abuse of drugs in today's society; physiological, sociological and psychological factors involved.
Prerequisite: BIOL 319, BIOL 320; admission to professional phase of program.

HLTH 354 Medical Terminology for the Health Professions
Credits 3. 3 Lecture Hours.
Designed for students interested in pursuing a career in a health, medical, scientific or other helping profession; develop medical word power skills combined with related health and disease knowledge.
Prerequisite: Junior or senior classification.

HLTH 403 Consumer Health
Credits 3. 3 Lecture Hours.
Selection, evaluation and understanding of health information, medical services, advertising of products and sociocultural factors in consumer health protection.
Prerequisite: Junior or senior classification.

HLTH 405 Rural Health
Credits 3. 3 Lecture Hours.
Issues facing rural health care; emphasis on understanding the geographical characteristics of rural communities and their affect on health care delivery.
Prerequisites: HLTH 331; junior or senior classification.
HLTH 407 Global Health  
**Credits 3.3 Lecture Hours.**  
Overview of global health issues; synthesis of historical, cultural, environmental, economic and political perspectives; gathering and understanding international health statistics; cultural, social and political impacts on health and health care behaviors; clinical and population-based approaches to health management and illness resolution; ethical issues implicit in conducting health research; private and public agency relief strategies; opportunities for employment in international health.  
**Prerequisites:** Admission to the professional phase of program; junior or senior classification or approval of instructor.

HLTH 410 Exercise and Health Programs in the Workplace  
**Credits 3.3 Lecture Hours.**  
Careful examination of strategies to design, implement and evaluate exercise and health programs in worksites; including health risk assessment, marketing protocol, needs assessment, corporate culture issues, policy development and cost-benefit analysis.  
**Prerequisite:** Junior or senior classification.

HLTH 415 Health Education Methodology  
**Credits 3.3 Lecture Hours.**  
Theory and practice in the development and use of creative and traditional health education strategies in secondary schools and community settings; emphasis is given to cognitive, affective and behavioral teaching strategies.  
**Prerequisites:** Senior classification and approved acceptance to field experience.

HLTH 421 Elementary School Health Instruction  
**Credits 3.3 Lecture Hours.**  
Modern issues, trends, content and material in elementary school health programs; research and instructional strategies essential for reading in content areas with an emphasis on developing the coordinated school health education for health and kinesiology teacher certification majors.  
**Prerequisite:** Junior or senior classification in health or kinesiology; admission to professional phase of program.

HLTH 425 Health Program Evaluation  
**Credits 3.3 Lecture Hours.**  
Theory and practice in evaluation of health programs in school and community; analysis of test results; evaluation of standardized health tests.  
**Prerequisites:** Senior classification and approved acceptance to field experience.

HLTH 429 Environmental Health  
**Credits 3.3 Lecture Hours.**  
Health aspects of environments; health problems related to water, air and noise pollution; pesticides; population and radiation; examination of various micro-environments which either promote or hinder human health and well-being and their implications for community planning and utilization of human resources.  
**Prerequisite:** Junior or senior classification.

HLTH 440 Contemporary Issues for Community Health Interns  
**Credits 3.3 Lecture Hours.**  
Preparatory course for advanced students in the community health internship program.  
**Prerequisite:** Acceptance to internship program.

HLTH 445 Professional Practice in Health Education  
**Credits 2.2 Lecture Hours.**  
Information, perspectives and skills to promote health and quality of life effectively in community, school, workplace and health-care settings; boundary-crossing partnerships across health disciplines; the role of collaborative efforts to better meet community health needs.  
**Prerequisites:** Admission to professional phase of program; junior or senior classification.

HLTH 481 Seminar in Allied Health  
**Credit 1.1 Lecture Hour. 1 Lab Hour.**  
Admission to allied health professional school and/or careers; research on selected allied health fields; discussion of transition from college environment to professional school/career environment including professional development. Must be taken on a satisfactory/unsatisfactory basis.  
**Prerequisites:** Junior or senior classification.

HLTH 482 Grant Writing in Health  
**Credit 1.1 Lecture Hour.**  
A writing intensive course focused on grant writing in the field of health education and health promotion; grant application written by student on a health-related topic using a recursive writing process. May be taken two times for credit. Must be taken on a satisfactory/unsatisfactory basis.  
**Prerequisite:** Admission to professional phase of program.

HLTH 484 Community Health Internship  
**Credits 0 to 12.0 to 12 Other Hours.**  
Supervised internship at selected community, public or private health agencies.  
**Prerequisites:** HLTH 415, HLTH 425 and HLTH 440; completion of all coursework.

HLTH 485 Directed Studies  
**Credits 0 to 4.0 to 4 Other Hours.**  
Directed study of special problems within the discipline.  
**Prerequisites:** Junior or senior classification; approval of instructor.

HLTH 489 Special Topics in...  
**Credits 0 to 4.0 to 4 Lecture Hours.**  
Selected topics in an identified area of the discipline. May be repeated for credit.

HLTH 491 Research  
**Credits 0 to 4.0 to 4 Other Hours.**  
Research conducted under the direction of faculty member in health. May be repeated 4 times for credit.  
**Prerequisites:** Junior or senior classification and approval of instructor.

HLTH 605 Health Research Methods  
**Credits 3.3 Lecture Hours.**  
Designing and conducting health education and health promotion research including survey design, sampling, data collection, management and analysis.  
**Prerequisite:** Graduate classification.

HLTH 607 International Health  
**Credits 3.3 Lecture Hours.**  
Health and health care delivery around the world; how various organizations are addressing global health concerns; includes emerging diseases, eradication of disease, global nutrition, family planning; emphasis on providing health information on a cross cultural environment.  
**Prerequisite:** Graduate classification.
HLTH 609 Applied Epidemiology
Credits 3. 3 Lecture Hours.
Principles and methods of epidemiology; epidemiologic investigation and research are discussed with emphasis on application of epidemiological methods to health promotion and disease prevention.
Prerequisite: Graduate classification.

HLTH 610 Health Assessment
Credits 3. 3 Lecture Hours.
Concepts and procedures of health assessment; interpretation of health appraisal instruments; function of health assessment in health education, health promotion and wellness programs.
Prerequisite: HLTH 425 or course in statistics.

HLTH 611 Organization and Administration of Health
Credits 3. 3 Lecture Hours.
Organizing and management of public health education and health promotion programs; public health administration issues and management skills emphasized.
Prerequisite: Graduate classification.

HLTH 622 Issues and Trends in Health Education
Credits 3. 3 Lecture Hours.
Background and development of health education as an applied science; current issues and trends in health education and their implications for health education.

HLTH 629 Environmental Health
Credits 3. 3 Lecture Hours.
Examination of environments that threaten health and implications for human health and community health planning; emphasis on planning and implementing health education and promotion strategies to promote a healthy environment.
Prerequisite: Graduate classification.

HLTH 630 Health Program Planning
Credits 3. 3 Lecture Hours.
Public health education and promotion program planning including educational diagnosis, selection of educational strategies, program implementation and evaluation; using planning models.
Prerequisite: Graduate classification.

HLTH 631 Community and Public Health
Credits 3. 3 Lecture Hours.
Community health problems; public health laws; national, state and local health agencies.

HLTH 632 Health Program Evaluation
Credits 3. 3 Lecture Hours.
Evaluation of public health education and promotion programs; overview of theory of program evaluation, methodology and application.
Prerequisite: Graduate classification.

HLTH 634 Women’s Health
Credits 3. 3 Lecture Hours.
Women’s Health. Health and health care concerns of women; emphasis on importance of women’s health issues to public health; identification of special concerns for planning and implementation of women’s health programs.
Prerequisite: Graduate classification.

HLTH 635 Race, Ethnicity and Health
Credits 3. 3 Lecture Hours.
Explore racial, ethnic, and cultural dimensions that underlie health and health disparities; special attention to culture, social economic status, and governmental policies as they influence the adaptations of health practices.
Prerequisite: Graduate classification.

HLTH 639 Behavioral Foundations of Health Education
Credits 3. 3 Lecture Hours.
Theoretical and historical foundations of health behavior research: emphasis placed on understanding and predicting behavior, as well as facilitating behavior change programs through health education.

HLTH 640 Health Intervention and Wellness
Credits 3. 3 Lecture Hours.
Wellness as a concept and a process; systematic planning, implementation and evaluation of wellness programs and review of research relating to the efficacy of wellness programs and methods.
Prerequisite: HLTH 415 or equivalent.

HLTH 641 Foundations in Health Education
Credits 3. 3 Lecture Hours.
Introduction to the profession of Health Education; basic history, philosophy, theory, and standards; responsibilities and competencies of the health educator; methods of practice.
Prerequisites: Graduate classification; admission to E-Master's program in Health Education.

HLTH 642 Health Education Ethics
Credit 1. 1 Lecture Hour.
Basic concepts in health education ethics; ethical dilemmas faced by health educators; articulated ethics framework; includes fairness, justice, and the reduction of unjust disparities in the health education practice.
Prerequisites: Graduate classification; admission to E-Master's program in Health Education.

HLTH 643 Introduction to Epidemiology
Credits 2. 2 Lecture Hours.
Principles and methods of epidemiology; epidemiologic investigations and research; emphasis on application of epidemiological methods for health promotion and disease prevention.
Prerequisites: Graduate classification; admission to E-Master's program in Health Education.

HLTH 644 Health Education Theory
Credits 3. 3 Lecture Hours.
Theory in the practice of Health Education; selected theories and their structure, function, and value to health professionals.
Prerequisites: Graduate classification; admission to E-Master’s program in Health Education.

HLTH 645 Health Education Research and Program Evaluation
Credits 3. 3 Lecture Hours.
Design and conduct health education and health promotion research and evaluation; provide an overview of program evaluation and research theory, methodology, and application.
Prerequisite: Graduate classification; admission to E-Master's program in Health Education.
HLTH 646 Health Education Training
Credits 3. 3 Lecture Hours.
Designing, implementing, and evaluating workforce training for professional health educators; emphasis on evidence-based workforce training.
Prerequisites: Graduate classification; admission to E-Master's program in Health Education.

HLTH 649 Advanced Health Behavior Theory
Credits 3. 3 Lecture Hours.
Examine the nature of theoretical thinking and its application to health research design, analysis, and program development; explore new theoretical trends in health education sciences research and education; exposed to an informed critique of current health behavior theories and their uses.
Prerequisite: HLTH 639 or approval of instructor.

HLTH 659 Writing for Health Educators
Credits 3. 3 Lecture Hours.
Practical application activities to enhance writing appropriate for entry level PhD trained professionals in their field; taught in a seminar format.
Prerequisite: Graduate classification.

HLTH 660 Health Issues in Aging, Dying and Death
Credits 3. 3 Lecture Hours.
Health issues related to aging, dying and death including: health problems of aging individuals; community response to health problems of aging individuals; issues regarding definitions of death; bereavement, grief and mourning and educational implications of aging, dying and death.
Prerequisite: Approval of instructor.

HLTH 669 Professional Skills Development for Health Educators
Credits 3. 3 Lecture Hours.
Provides the tools necessary to become an effective health education professional; issues will be discussed that will be critical to the success of a future university faculty member.
Prerequisite: Graduate classification.

HLTH 671 Interdisciplinary Seminar in Prevention Science
Credit 1. 1 Lecture Hour.
Contemporary research programs that represent interdisciplinary field of prevention science; strengths and limitations of diverse theoretical and conceptual bases of research in prevention science, application of research findings to issues related to the prevention of mental, emotional, and physical health problems and the promotion of well-being. May be taken 3 times for credit.
Prerequisite: Graduate classification and enrollment in the interdisciplinary graduate certificate in prevention science or approval of instructor.
Cross Listing: COMM 671, RPTS 620 and SPSY 620.

HLTH 681 Seminar
Credit 1. 1 Lecture Hour.
Reports and discussions of topics of current interest in the discipline.

HLTH 684 Professional Internship
Credits 1 to 6. 1 to 6 Other Hours.
Designed to permit students the opportunity for on-the-job training with professionals in schools and public and institutional health agencies.
Prerequisites: 12 semester hours of selected graduate work; approval of department head.

HLTH 685 Directed Studies
Credits 1 to 12. 1 to 12 Other Hours.
Directed study of selected problems within the discipline. May be repeated for credit.
Prerequisite: Approval of department head.

HLTH 689 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Selected topics in an identified area of the discipline. May be repeated for credit.
Prerequisite: Approval of department head.

HLTH 690/KINE 690 Theory of Research in the Discipline
Credits 3. 3 Lecture Hours.
Theory and design of research problems and experiments in various subfields of the discipline; communication of research proposals and results; evaluation of current research of faculty and students and review of current literature. May be repeated for credit.
Cross Listing: KINE 690/HLTH 690.

HLTH 691 Research
Credits 1 to 23. 1 to 23 Other Hours.
Research for thesis or dissertation.
Prerequisite: Approval of committee chair.

Horticulture - Horticultural Sciences

Courses

HORT 101 Concepts of Horticultural Science
Credit 1. 1 Lecture Hour.
Introduction to the many facets of horticulture in Texas and the United States including organization, history and nature of the industry; discussion of professional development and identification of career opportunities.

HORT 201 Horticultural Science and Practices
Credits 3. 3 Lecture Hours.
(AGRI 1315, 1415, HORT 1301, 1401) Horticultural Science and Practices. Structure, growth and development of horticultural plants from a practical and scientific approach; environmental effects, basic principles of propagation, greenhouse and outdoor production, nutrition, pruning and chemical control of growth, pest control and branches of horticulture.

HORT 202 Horticultural Science and Practices Laboratory
Credit 1. 3 Lab Hours.
Methods and practices related to production of horticultural crops; practical exercises in greenhouse and field.
Prerequisite: HORT 201 or registration therein.

HORT 203 Floral Design
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Principles of design illustrated with the use of floral materials; floral design elements and techniques including color, form, line and texture; history and utilization of floral art in society.

HORT 225 Horticulture Learning Community
Credit 1. 1 Lecture Hour.
Understanding the personal and professional competencies that should develop during college career; determine learning style; develop oral and written communication skills, teamwork and leadership characteristics, analytical and critical thinking, research and problem solving skills; exposure to current critical issues in horticulture and science.
Prerequisite: Horticulture or floriculture major.*
HORT 281 Horticulture as a Profession.
Credit 1. 1 Lecture Hour.
Comprehensive view of the opportunities in the art and science of horticulture; sub-disciplines by crop (fruit, vegetable, ornamental, floral) and approach (landscaping, production, sales, management, floral design, research); examination of the national and international scope of horticulture including the major horticultural regions in Texas; construction of a professional e-portfolio.

HORT 291 Research
Credits 1 to 3. 1 to 3 Other Hours.
Research conducted under the direction of faculty member in horticulture. May be repeated 2 times for credit.
Prerequisites: Freshman or sophomore classification and approval of instructor.

HORT 301 Garden Science
Credits 3. 3 Lecture Hours.
Identification, propagation, soil management, fertilization, growth control and protection of common garden plants: indoor ornamentals, landscape ornamentals, fruits and vegetables; special topics include home landscaping, container gardens, bonsai, herbs and medicinal plants and hobby greenhouse management. The effects of organic and non-organic practices on the garden ecosystem.

HORT 302 Garden Science Lab
Credit 1. 3 Lab Hours.
Practical activities in identification, propagation, fertilization, media preparation, soil management, irrigation and protection of indoor ornamentals, landscape ornamentals, fruits and vegetables common in gardens in Texas. Organic and non-organic methods.

HORT 306 Woody Ornamental Plants
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Better known woody ornamental trees and shrubs; identification, morphology, classification, nomenclature and adaptability for use in landscape environments.
Prerequisite: BIOL 101 or HORT 201 or approval of instructor.

HORT 308 Landscape Plant Materials
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Identification and use of indigenous and introduced landscape plants; plants for special uses in urban environments; emphasis on plants’ ornamental attributes, cultural requirements, and adaptability in urban and suburban environments.
Prerequisite: HORT 201 or HORT 306 or BIOL 101 or approval of instructor.

HORT 309 Interior Plants
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Identification, selection and maintenance of interior foliage plants; emphasis on design solutions for commercial and private facilities.
Prerequisites: HORT 201; junior or senior classification.

HORT 311/FSTC 311 Principles of Food Processing
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Principles and practices of canning, freezing, dehydration, pickling and specialty food manufacture; fundamental concepts of various techniques of preparation, processing, packaging and use of additives; processing plants visited.
Prerequisites: FSTC 201; junior or senior classification or approval of department head or instructor.
Cross Listing: FSTC 311/HORT 311.

HORT 315 Issues in Horticulture
Credits 3. 3 Lecture Hours.
Analysis of contemporary economic, technological, environmental, human resource, and regulatory issues that impact the way global horticultural firms compete; emphasis on problem recognition and analysis of managerial decisions by firms throughout the entire horticultural supply chain.
Prerequisites: HORT 201 and HORT 202.

HORT 319 Fruit and Nut Production
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Rootstocks, cultivars, identification, site selection, pollination, pruning, fruit thinning, dormancy, orchard culture management, irrigation, pest control, harvesting and post harvest physiology of temperate fruit and nut species.
Prerequisite: HORT 201.

HORT 325 Vegetable Crop Production
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Origin, nutritive value, economic importance, botany and cultural practices of the major vegetable crops. Lab activities include organic and non-organic production of major vegetable crops.

HORT 326 Plant Propagation
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Principles, practices and techniques followed in the sexual and asexual propagation of horticultural plants: seed technology and seed propagation, rooting and propagation of cuttings, graftage and budding systems, layering and propagation by specialized plant structures, biotechnology and tissue culture systems for micropropagation.

HORT 332 Horticulture Landscape Graphics
Credits 2. 1 Lecture Hour. 2 Lab Hours.
Graphic representation of landscape design; demonstrations of technique; examination of drawing examples and drawing production; basic hand graphics techniques for visual-thinking and presentation-quality landscape drawings.
Prerequisite: Junior or senior classification.

HORT 335 Sociohorticulture
Credits 3. 3 Lecture Hours.
Horticulture as it relates to humans through people-plant interactions; use of horticulture to improve quality of life; awareness and appreciation of the economic, environmental, social and health benefits of plants.
Prerequisite: Junior classification.

HORT 400 Field Studies in Horticulture
Credits 1 to 3. 1 to 9 Other Hours.
Field trip to observe operation of horticultural businesses, governmental agencies affecting horticultural programs, and public and private institutions active in horticulture in the U.S. and other countries; usually arranged during spring break, between semesters or during the summer; may be repeated for credit.
Prerequisites: HORT 201 or HORT 301 and approval of instructor.

HORT 404/GENE 404 Plant Breeding
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Application of genetics and other sciences to breeding and improvement of horticultural crops; methods and special techniques employed. Offered in even numbered years.
Prerequisite: GENE 301.
Cross Listing: GENE 404.
HORT 418 Nut Culture
Credits 3. 3 Lecture Hours.
Orchard management, native grove development, cultivars, fruit setting, soils, nutrition, propagation, pest control, harvesting, shelling, storage and marketing of temperate tree nut crops grown in the U.S. with major emphasis on pecans. Offered in odd numbered years.
Prerequisite: HORT 319 or approval of instructor.*

HORT 419 Viticulture and Small Fruit Culture
Credits 3. 3 Lecture Hours.
Classic winegrape culture in Europe and U.S. are taught; influence of climate, soil, cultivar, rootstock, canopy and management is presented; nutrition, water, spacing, trellis, pruning, IPM and harvest are integrated for quality yields; culture of muscadines, berries, figs and persimmons are taught. Offered in even numbered years.
Prerequisite: HORT 319 or approval of instructor.

HORT 420 Concepts of Wine Production
Credits 3. 3 Lecture Hours.
Classic wine grapes of the world and where they are produced; evaluation of wine style and quality through formal laboratory tastings.
Prerequisites: HORT 201, HORT 319, HORT 419 or HORT 446/FSTC 446 or FSTC 201; must be 21 years of age; junior or senior classification.

HORT 421 Enology
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Provides a basic understanding of each step of the wine making process; emphasis on home and small scale commercial wine production as related to Texas conditions.
Prerequisites: Must be 21 years of age; junior or senior classification.*

HORT 423 Tropical Horticulture
Credits 3. 3 Lecture Hours.
Production, processing and marketing of coffee, bananas, cacao, mango, cashew, pineapple, coconut and root and tuber crops; recent significant developments in plant breeding and cultural practices. Offered in odd numbered years.
Prerequisites: HORT 201 or approval of instructor.

HORT 425 Landscape Maintenance and Construction
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Principles and practices of grading, drainage and construction of residential and small commercial landscapes; cost and bid estimation; soil preparation; transplanting operations; control of landscape diseases and pests; maintenance of landscape areas.
Prerequisite: HORT 201 or approval of instructor.

HORT 426 International Floriculture Marketing
Credits 3. 2 Lecture Hours.
Importance, cost, and opportunities in marketing floral products, fresh cut flowers, flowering potted plants, foliage plants, and bedding/garden plants; topics include: world production areas, economic value, species grown, marketing channels, retail environments, current/future consumers, postharvest handling, promotion/advertising, perceived/added value, marketing trends and employment opportunities.
Prerequisites: HORT 201; junior or senior classification.

HORT 427 Fall Greenhouse Crops
Credit 1. 2 Lab Hours.
Hands-on lab for growing and managing fall greenhouse crops including fall bedding plants, cut flowers, foliage, poinsettias and other flowering potted plants.

HORT 428 Greenhouse Operation and Management
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Principles of greenhouse operation and management for production of horticultural crops; construction and operation of greenhouse structures and systems; regulating and controlling the environment and applying cultural practices as they affect plant physiological processes and influence plant growth and development; management of a greenhouse business.
Prerequisite: HORT 201.*

HORT 429 Floriculture Crop Production
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Production of floriculture crops in the greenhouse environment; scheduling and controlling crop growth for target market periods; specific flowering crops will be used as models to demonstrate potted flowering plant, cut flower, and garden plant production systems; hands-on crop production experience in lab.
Prerequisite: HORT 201.*

HORT 431 Nursery Production and Management
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Container, field and protected culture production of ornamental nursery plants (shrubs, trees, ground covers, bedding plants and herbaceous perennials); retail and wholesale nursery-site selection and development, financing, niche-marketing, personnel and labor management; wholesale nursery production cycles and systems, storage and shipping.*

HORT 432 Horticulture Landscape Design
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Application of the principles and elements of design to planning and developing both exterior residential landscape designs and interior commercial designs.
Prerequisites: HORT 203; HORT 332; HORT 306 or HORT 308 or approval of instructor.

HORT 435 Urban Horticulture
Credits 3. 3 Lecture Hours.
Introduction to urban horticulture and its role in community development and well-being; emphasis on career opportunities and the roles of the urban horticulture programmer. Offered in odd numbered years.
Prerequisite: Junior or senior classification.

HORT 440 International Horticulture
Credits 3. 3 Lecture Hours.
Examines the source of horticultural commodities; shows how geography, culture, politics, and history influence our markets, gardens and refrigerators; educates students on interpreting different garden styles; offered in even number years.
Prerequisite: Junior or senior classification.

HORT 442 Horticulture Landscape Design II
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Introduce computer-aided-drafting (CAD) to produce site layout, grading and planting plan, and construction details for small-scale landscape design; advanced design principles and practices in their historical context, includes design and drafting of hardscape details, manipulation of earth forms, ecological urban park design to traditional garden design.
Prerequisites: HORT 203, HORT 308 and HORT 432 or approval of instructor; junior or senior classification.
HORT 446/FSTC 446 Commercial Fruit and Vegetable Processing  
Credits 3. 2 Lecture Hours. 3 Lab Hours.  
Pilot plant and laboratory operations pertaining to processed fruits, vegetables and beverages; new product development emphasized via individual laboratory projects. Offered in even numbered years.  
Prerequisite: FSTC 311/HORT 311.  
Cross Listing: FSTC 446/HORT 446.  

HORT 451 Retail Floristry  
Credits 3. 2 Lecture Hours. 3 Lab Hours.  
Principles of floral design in a commercial shop enterprise; aspects of design in vase arrangements, personal flowers, sympathy flowers and flowers for special occasions; production costs and profit analysis, selling techniques and customer relations; term project required.  
Prerequisite: HORT 203 or approval of instructor.  

HORT 452 Floral Design: Weddings and Personal Flowers  
Credits 3. 2 Lecture Hours. 3 Lab Hours.  
Basic principles of floral design as applied to wedding work; design principles and mechanics as applied to corsages, headdresses, hand bouquets and ceremony and reception decorations; history of wedding traditions; selling and pricing weddings.  
Prerequisite: HORT 203 or HORT 451 or approval of instructor.  

HORT 453 Floral Art  
Credits 2. 1 Lecture Hour. 2 Lab Hours.  
Advanced study of floral design as an art form in contrast to a commercial florist operation; interpretive expression of design principles and color stressed along with international design styles.  
Prerequisites: HORT 203, HORT 451 and/or HORT 452.  

HORT 454 Special Event Design and Production  
Credits 2. 1 Lecture Hour. 2 Lab Hours.  
The role of event planners, production managers, designers, and decorators within traditional event management practices; analyze how artistic components are used in visual styling to achieve a specific purpose; impact of collaborative planning, effective research, and strong communication skills, social psychological and economic influences as they relate to event planning.  
Prerequisite: Junior or senior classification.  

HORT 481 Seminar  
Credits 2. 2 Lecture Hours.  
Advanced preparation for the transition from college to the work environment including career investigation, presentation techniques and practice, resume and e-portfolio preparation, and professional development and career advancement; required of all senior students in horticulture.  
Prerequisite: Junior or senior classification.  

HORT 484 Internship  
Credits 1 to 9. 1 to 9 Other Hours.  
On-the-job experience program in the student's area of horticultural specialization. May be taken three times for credit.  
Prerequisites: Sophomore, junior or senior classification; approval of instructor; 2.0 GPR in major and overall.  

HORT 485 Directed Studies  
Credits 1 to 4. 1 to 4 Other Hours.  
Special problems and projects in any area of horticulture.  
Prerequisite: Junior or senior classification or approval of department head.  

HORT 489 Special Topics in...  
Credits 1 to 4. 0 to 4 Lecture Hours. 0 to 4 Lab Hours.  
Selected topics in an identified area of horticultural science. May be repeated for credit.  
Prerequisite: Approval of instructor.*  

HORT 491 Research  
Credits 1 to 3. 1 to 3 Other Hours.  
Research conducted under the direction of faculty member in horticulture. May be repeated 2 times for credit. Registration in multiple sections of this course are possible within a given semester provided that the per semester credit hour limit is not exceeded.  
Prerequisites: Junior or senior classification and approval of instructor.  
NOTE: Undergraduate floriculture courses are taught under the horticulture designation.  

HORT 604 Applied Physiology of Horticultural Crops  
Credits 3. 3 Lecture Hours.  
Chemical, biological and environmental factors in growth and differentiation and their application to ornamental, fruit and vegetable crops; growth kinetics; sink-source relations; fruit development; seed development and germination; juvenility; apical dominance; growth retardants; pruning; photoperiodism; flowering; sex expression; and senescence.  
Prerequisites: MEPS 313 or approval of instructor.  

HORT 605 Internet Applications for Horticulture  
Credits 3. 2 Lecture Hours. 2 Lab Hours.  
Internet applications for horticulture presents the theory and practice of computer networks and networking so that the information and educational content (not the hardware) is the key; the focus is on the World Wide Web and creating Web materials for teaching, research and extension applications.  
Prerequisite: Graduate classification.  

HORT 608 Plants for Landscape Design  
Credits 4. 3 Lecture Hours. 2 Lab Hours.  
Identification and use of indigenous and introduced plants in landscape designs; plants for special uses in commercial and residential developments; emphasis on ornamental attributes, identification, cultural requirements, limitations and adaptability in urban and suburban environments for important taxa; discussion of current issues, research, and trends in selection, marketing, and utilization of plants for landscape design.  
Prerequisite: HORT 201 or HORT 308 or BIOL 101, or approval of instructor, not open to students with previous credit for HORT 306.*  

HORT 609 Plants for Landscape Design II  
Credits 4. 3 Lecture Hours. 2 Lab Hours.  
Identification and use of indigenous and introduced landscape plants; plants for special uses in urban environments; emphasis on plants' ornamental attributes, cultural requirements, and adaptability in urban and suburban environments. Not open to students who have completed HORT 308.  
Prerequisites: BOTN 101, HORT 201, HORT 306, HORT 608, or approval of instructor.
HORT 610/MEPS 610 Physiological and Molecular Basis for Plant Stress Response
Credits 3. 3 Lecture Hours.
Provide the tools to understand the molecular and physiological consequences caused by environmental factors (abiotic and biotic) on plant growth and development and the mechanisms of stress adaptation to stress.
Prerequisite: MEPS 313 or equivalent.
Cross Listing: MEPS 610/HORT 610.

HORT 611 Ecology of Urban Landscape
Credits 3. 3 Lecture Hours.
Basic concepts and current topics in ecology or urban landscapes; role of plants in urban and fragmented ecosystems ranging from individual plant responses to changes in ecosystem function; discuss recent literature in the field of urban plant ecology.
Prerequisite: An undergraduate or graduate class in plant biology or plant ecology is recommended.

HORT 618/MEPS 618 Root Biology
Credits 3. 3 Lecture Hours.
Basic concepts and current topics in root-soil ecology; managed and natural ecosystems including grasslands, cropping systems and forests; role of roots in the rhizosphere, the effects of soil, nutrient and water stress and climate change in C and N cycling and carbon sequestration; participate in discussions and critique recent literature.
Prerequisite: Approval of instructor.
Cross Listing: MEPS 618/HORT 618.

HORT 619 Plant-Associated Microorganisms
Credits 3. 3 Lecture Hours.
Basic concepts and current topics in plant-microbe interactions including the diversity of plant-associated microorganisms; the plant as a microbial environment; endophytes; microbial roles in plant nutrition and fitness; uses of microorganisms for improved plant health and sustainable agriculture; microbial roles in food safety and future challenges; discussion of current literature.
Prerequisites: Basic plant biology or plant ecology is recommended; microbiology is helpful, but not required. Cross listed with PLPA 619 and MEPS 619.

HORT 626 International Floriculture Marketing
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Importance, cost and opportunities in marketing floral products, fresh cut flowers, flowering potted plants, foliage plants, and bedding/garden plants; topics include world production areas, economic value, species grown, marketing channels, retail environments, current/future consumers, postharvest handling, promotion/advertising, perceived/added value, marketing trends and employment opportunities.
Prerequisite: Graduate classification.

HORT 630 Post-Harvest Biology, Physiology and Genetics of Plants
Credits 3. 3 Lecture Hours.
Overview of biological, physiological and genetic mechanisms which impart phenotypes associated with quality and value of plant products; current emphasis in areas of ripening, senescence, fruit and flower development, and relevant applications of biotechnology will be focus of course.
Prerequisite: Approval of instructor.

HORT 640 Phytochemicals in Fruits and Vegetables to Improve Human Health
Credits 3. 3 Lecture Hours.
Current scientific knowledge about the role of phytochemicals in their diet; increase the knowledge and awareness of successful, cost effective, public and private integrated approaches to reduce the health and economic burden of chronic diseases; provide instructional curricular resources media for dissemination through conventional and distance education technology.
Prerequisite: Approval of instructor.

HORT 641 Science of Foods for Health
Credits 3. 3 Lecture Hours.
Recent scientific advances on knowledge of foods for health using evidence based research justification; includes interdisciplinary topics emphasizing horticultural science, nutrition and biochemistry.
Prerequisite: Approval of instructor.

HORT 645/SCSC 645 World Agriculture and International Plant Breeding
Credit 1. 1 Lecture Hour.
Evolution of world agriculture; plant breeding and improved varieties; international agricultural research centers and green revolution; population growth; environmental challenges; IPR; role of plant breeding and biotechnology in meeting world food needs.
Prerequisite: SCSC 304, HORT 404/GENE 404 or approval of instructor.
Cross Listing: SCSC 645/HORT 645.

HORT 681 Seminar
Credit 1. 1 Lecture Hour.
Student and staff participation in review of literature and reporting on current developments in research on production and processing of horticultural crops. Required of all graduate students in horticulture and floriculture. May be taken more than once but not exceed 3 hours of credit.
Prerequisite: Graduate classification.

HORT 684 Professional Internship
Credits 1 to 4. 1 to 4 Other Hours.
Program planned to provide professional training in student's particular field of interest. Faculty and employer will supervise the activity. Work-study planned as a part of the Master of Agriculture degree program in fruit, ornamentals or vegetable production, processing and handling or landscape or garden design and maintenance.
Prerequisite: Approval of instructor.

HORT 685 Directed Studies
Credits 1 to 4. 1 to 4 Other Hours.
Individual problems of research or scholarly activity not pertaining to thesis or dissertation, or selected instruction not covered by other courses. Final documentation of directed study is required.
Prerequisite: Approval of instructor.

HORT 689 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours. 1 to 4 Lab Hours.
Selected topics in an identified area of horticulture. May be repeated for credit.
Prerequisite: Approval of department head.

HORT 690 Theory of Research
Credit 1. 1 Lecture Hour.
Design of research experiments in various fields of horticulture and floriculture and evaluation of results with the aid of examples taken from the current scientific literature. May be repeated for credit.
HORT 691 Research
Credits 1 to 23. 1 to 23 Other Hours.
Research in horticultural problems for thesis or dissertation.

HORT 693 Professional Study
Credits 1 to 9. 1 to 9 Other Hours.
Approved professional paper undertaken as the requirement for the Master of Agriculture. May be taken more than once, but not to exceed 3 hours of credit towards a degree.
Prerequisite: Graduate classification.

HUMA - Humanities

Courses

HUMA 211/RELS 211 Hebrew Scriptures
Credits 3. 3 Lecture Hours.
Philosophical concepts of the Hebrew Scriptures as they relate to the development of religious and ethical ideas.
Cross Listing: RELS 211/HUMA 211.

HUMA 213/RELS 213 New Testament
Credits 3. 3 Lecture Hours.
The origin and development of the religious and philosophical concepts of the New Testament.
Cross Listing: RELS 213/HUMA 213.

HUMA 303/RELS 303 Near Eastern Religions
Credits 3. 3 Lecture Hours.
Beliefs and practices of Judaism, Zoroastrianism, Christianity and Islam with particular attention to their philosophical presuppositions.
Cross Listing: RELS 303/HUMA 303.

HUMA 304/RELS 304 Indian and Oriental Religions
Credits 3. 3 Lecture Hours.
Beliefs and practices of Hinduism, Jainism, Sikhism, Buddhism, Confucianism, Taoism and Shinto with particular attention to their philosophical presuppositions.
Cross Listing: RELS 304/HUMA 304.

HUMA 321 Political Islam and Jihad
Credits 3. 3 Lecture Hours.
Interaction between Islamic movements and politics in various Middle Eastern countries; the meaning and evolution of jihad; the role of Islam as a tool for political and social mobilization.
Prerequisite: Junior or senior classification or approval of instructor.
Cross Listing: INTS 321 and RELS 321.

HUMA 485 Directed Studies
Credits 1 to 6. 1 to 6 Other Hours.
Directed Studies in humanities. May be repeated for credit.
Prerequisite: Approval of department head.

HUMA 489 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Selected topics in an identified area of humanities. May be repeated for credit.
Prerequisite: Approval of instructor.

IBUS - International Business

Courses

IBUS 285 Directed Studies
Credits 1 to 3. 1 to 3 Other Hours.
Directed study of selected problems in international business not covered in other courses. May be taken two times for credit.
Prerequisites: Freshman or sophomore classification in business.

IBUS 289 Special Topics in...
Credits 1 to 3. 1 to 3 Lecture Hours. 0 to 3 Lab Hours.
Selected topics in an identified area of international business. May be taken two times for credit.
Prerequisites: Freshman or sophomore classification in business.

IBUS 301 Business Study Abroad
Credits 1 to 18. 1 to 18 Lecture Hours.
For students in approved programs abroad. May be repeated for credit.
Prerequisites: Admission to upper division in Mays Business School and selected for program; approval of study abroad coordinator and academic dean.

IBUS 401/MKTG 401 Global Marketing
Credits 3. 3 Lecture Hours.
I Survey of the aspects involved in marketing products and services in the international market; tariffs, cultural restrictions, business environment and legal restrictions.
Prerequisite: MKTG 321.
Cross Listing: MKTG 401/IBUS 401.

IBUS 402/MKTG 402 International Marketing: Study Abroad
Credits 3. 3 Lecture Hours.
Introduces marketing students to the facets of designing and implementing a marketing strategy in an international setting; provides a traditional classroom experience along with personal exposure to a variety of European cultures; facilitates understanding of the international marketplace in which these students will function.
Prerequisites: Junior classification; MKTG 321 or MKTG 409.
Cross Listing: MKTG 402/IBUS 402.

IBUS 403/MKTG 403 International Market Entry Strategies
Credits 3. 3 Lecture Hours.
A research-based course in which students prepare an analysis of a country, or region outside the U.S., and use it in the preparation of a marketing plan for a good or service to be introduced and marketed in that country.
Prerequisites: MKTG 321; concurrent registration in IBUS 402/MKTG 402 or MKTG 102; junior or senior classification.
Cross Listing: MKTG 403/IBUS 403.

IBUS 445/ACCT 445 International Accounting
Credits 3. 3 Lecture Hours.
Introduction and examination of accounting issues unique to multinational enterprises and international business activity. Does not count towards the accounting requirement for the CPA exam.
Prerequisites: ACCT 315 or ACCT 327; FINC 341.

IBUS 446/FINC 445 International Finance
Credits 3. 3 Lecture Hours.
International business transactions, balance of payments and exchange rate systems, exchange rate risk and hedging techniques, sources of funding, relation to international financial institutions and capital instruments; foreign direct investment; international asset and liability management.
Prerequisites: FINC 351 and FINC 361.
Cross Listing: FINC 445/IBUS 446.
IBUS 450/MGMT 450 International Environment of Business
Credits 3. 3 Lecture Hours.
Broad survey of international business issues; analyzes the environment in which international businesses operate; introduces multinational enterprises, global competition, international organizations, treaties and international law, national trade policies and the determinants of competitiveness of firms in international markets.
Prerequisites: Admitted to upper division in Mays Business School.
Cross Listing: MGMT 450/IBUS 450.

IBUS 452/MGMT 452 International Management
Credits 3. 3 Lecture Hours.
An overview of international management to include international dimensions of organizational behavior, theory, strategy and human resource management; application of theoretical ideas to real-world situations through case analyses, presentations, projects and interactive class discussion.
Prerequisite: MGMT 450/IBUS 450 or IBUS 450/MGMT 450, or concurrent enrollment.
Cross Listing: MGMT 452/IBUS 452.

IBUS 453/MGMT 453 Emerging Economies: Brazil, Russia, India, China
Credits 3. 3 Lecture Hours.
Examination of present and future dynamics of the emerging economies of Brazil, Russia, India and China and their impact on the developing and developed worlds; importance of BRIC countries and their position in the world; history and development of these countries and the current business environment in each.
Prerequisite: MGMT 363.
Cross Listing: MGMT 453/IBUS 453.

IBUS 455 Asian Business Environment
Credits 3. 3 Lecture Hours.
The scope of business environments of Asia; geographical, demographic and cultural makeup; economic integration; human and cultural elements; financial and communication infrastructures; risk and market analysis; trade and investment patterns; Asian MNC’s.
Prerequisite: Admission to upper division in Mays Business School.

IBUS 456 European Integration and Business
Credits 3. 3 Lecture Hours.
History and institutional structure of the European Union; its regional cultures, values, economies and rifts; challenges faced by corporations and people in the region, including issues involving doing business with the European Union.
Prerequisite: Admission to upper division in Mays Business School.

IBUS 457/MGMT 457 Global Entrepreneurship
Credits 3. 3 Lecture Hours.
Practical issues associated with taking small- and medium-size business global; includes importing and exporting, developing global strategies, evaluating market opportunities, regional impact on economies and people.
Prerequisite: Admission to upper division in Mays Business School.
Cross Listing: MGMT 457/IBUS 457.

IBUS 458 International Negotiations
Credits 3. 3 Lecture Hours.
Skill building strategies and exercises in communication, listening and issue identification; how to negotiate globally; importance of knowing people and cultures; practice and theory of effective negotiation; awareness of diverse constructions of reality and communicating across different groups.
Prerequisite: Admission to upper division in Mays Business School.

IBUS 459 Latin American Markets
Credits 3. 3 Lecture Hours.
Comparing and contrasting the Latin American, Canadian and U.S. markets across different variables, including culture, economics, social and legal aspects.
Prerequisite: MKTG 321.

IBUS 460 Academy for Future International Leaders
Credits 3. 3 Lecture Hours.
A practical orientation to international business and cultural issues to prepare selected Texas A&M students for the international marketplace; joint effort among all colleges at Texas A&M; designed to complement any academic major by helping students gain a global perspective of their chosen field of study.
Prerequisite: Junior or senior classification and selection for the Academy for Future International Leaders.

IBUS 484 International Business Internship
Credits 1 to 4. 1 to 4 Other Hours.
International business internship with practicing professionals under the direction of a faculty member.
Prerequisites: Admission to upper division in Mays Business School; approval of department head.

IBUS 485 Directed Studies
Credits 1 to 6. 1 to 6 Other Hours.
Directed study on selected problems in the area of international business.
Prerequisites: Admission to upper division in Mays Business School and approval of instructor.

IBUS 489 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Selected topics in an identified area of international business. May be repeated for credit.
Prerequisites: Admission to upper division in Mays Business School and approval of instructor.

IBUS 645/FINC 645 International Finance
Credits 3. 3 Lecture Hours.
Problems confronted by financial managers of firms with international business operations; international money and capital markets; exchange rate risks and political risks. May be repeated for up to 3 hours credit.
Classification 6 students may not enroll in this course.
Prerequisite: FINC 612 or FINC 629 or FINC 635.
Cross Listing: FINC 645/IBUS 645.

IBUS 646/ACCT 646 International Accounting
Credits 3. 3 Lecture Hours.
Introduction and examination of accounting issues unique to multinational enterprises and international business activity. Classification 6 students may not enroll in this course.
Prerequisites: ACCT 328; FINC 341.
Cross Listing: ACCT 646/IBUS 646.

IBUS 667/MGMT 667 Multinational Enterprises
Credits 3. 3 Lecture Hours.
Graduate seminar in international business; multinational enterprises (MNEs) are studied from various perspectives including economics, management, entry and expansion strategies, contractual agreements, transfer pricing, impacts on home and host countries, MNE-state relations, regional integration, public policies towards MNEs.
Prerequisite: Graduate classification.
Cross Listing: MGMT 667/IBUS 667.
IBUS 677/MKTG 677 Multinational Marketing Management
Credits 3. 3 Lecture Hours.
Theoretical and empirical materials on multinational marketing; nature and justification of international trade, analysis of environments faced by multinational firms and formulation of multinational marketing strategy. Classification 6 students may not enroll in this course.
Prerequisite: MKTG 613 or 621 or equivalent.
Cross Listing: MKTG 677/IBUS 677.

IBUS 678/MGMT 678 International Management
Credits 3. 3 Lecture Hours.
Survey of the issues, problems, challenges, and opportunities facing organizations competing in a global economy; includes: the environment of international management, international strategies, forms of organization design used by multinational firms, managing human resources in an international context, and cultural and control issues facing the international manager.
Prerequisite: Graduate classification.
Cross Listing: MGMT 678/IBUS 678.

IBUS 679/MGMT 679 International Business Policy
Credits 3. 3 Lecture Hours.
Determinants of U.S. competitiveness in international markets; the international environment of business; introduction to multinational enterprises, global competition, international organizations, protection of intellectual property; international trade regulations; strategic trade theory.
Prerequisite: Graduate classification.
Cross Listing: MGMT 679/IBUS 679.

IBUS 685 Directed Studies
Credits 1 to 4. 1 to 4 Other Hours.
Directed study of selected international business problems using recent developments in business research methods. Classification 6 students may not enroll in this course.
Prerequisite: Graduate classification and approval of instructor.

IBUS 689 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Selected topics in an identified area of international business. May be repeated for credit. Classification 6 students may not enroll in this course.
Prerequisite: Approval of instructor.

IBUS 692 International Professional Study II
Credits 1 to 12. 1 to 12 Lecture Hours.
Approved professional studies abroad on international business issues and organizations. May be taken to meet requirements for the MBA or MS degrees in business. Course to be taken for a grade. May be taken 3 times for credit.
Prerequisite: Admission to approved program.

IBUS 693 International Professional Study
Credits 1 to 12. 1 to 12 Other Hours.
Approved professional studies abroad on international business issues and organizations. May be taken to meet requirements for the MBA or MS degrees in business. To be taken on a satisfactory/unsatisfactory basis.
Prerequisites: Admission to approved program; approval of program coordinator.

IDIS - Industrial Distribution

Courses

IDIS 240 Introduction to Industrial Distribution
Credits 3. 3 Lecture Hours.
Definition, history, types of industrial distribution; range of products; line of distribution; function of and services provided by distributors; distributor operational and financial analyses; measures of organizational effectiveness; employment and advancement opportunities in the field of industrial distribution.

IDIS 300 Industrial Electricity
Credits 4. 3 Lecture Hours. 3 Lab Hours.
Industrial applications of electrical theory, codes, circuitry, wiring devices, motors and controllers, switch gear and solid state controls.
Prerequisite: Industrial distribution or engineering technology major, junior or senior classification, PHYS 208 or PHYS 219; completion of ENGL 104, MATH 151, MATH 152, CHEM 107 and CHEM 117, and PHYS 218 with a grade of C or better.

IDIS 303 Mechanical Power Transmission
Credits 3. 3 Lecture Hours. 2 Lab Hours.
Overview of the engineering concepts of mechanical power and the components within a system to provide transmission of that power into useful work; experimental application of the related theory as it relates to the industrial distributor; "real world" knowledge learned for application in industry.
Prerequisite: Industrial distribution major, junior or senior classification; completion of ENGL 104, MATH 151, MATH 152, CHEM 107 and CHEM 117, and PHYS 218 with a grade of C or better.

IDIS 330 Sales Engineering
Credits 4. 3 Lecture Hours. 2 Lab Hours.
Sales and sales management techniques for analyzing distribution challenges and providing solutions through effective communication; establishing credibility, effective questioning techniques, developing solutions, presenting solutions, anticipating objections and gaining a commitment, plus techniques for building, developing and compensating an effective sales organization.
Prerequisites: IDIS 240; industrial distribution major, junior or senior classification; completion of ENGL 104, MATH 151, MATH 152, CHEM 107 and CHEM 117, and PHYS 218 with a grade of C or better.

IDIS 340 Manufacturer Distributor Relations
Credits 3. 3 Lecture Hours.
Approaches and procedures for developing and maintaining effective manufacturer distributor relations: marketing channel design, channel roles, managing uncertainty, legal and ethical imperatives, conflict resolution, decision support and strategic marketing.
Prerequisites: IDIS 240; industrial distribution major, junior or senior classification; completion of ENGL 104, MATH 151, MATH 152, CHEM 107 and CHEM 117, and PHYS 218 with a grade of C or better.

IDIS 343 Distribution Logistics
Credits 3. 3 Lecture Hours.
Study of concepts, issues and techniques used to plan, analyze and control the logistics network; examination of three key logistical decision-making areas: inventories, facilities and transportation; particular interest will be the study of techniques and technologies for managing and optimizing the logistical (supply) chain.
Prerequisites: STAT 201, STAT 211, or STAT 303; industrial distribution major, junior or senior classification; completion of ENGL 104, MATH 151, MATH 152, CHEM 107 and CHEM 117, and PHYS 218 with a grade of C or better.
IDIS 344 Distributor Information and Control Systems
Credits 4. 3 Lecture Hours. 3 Lab Hours.
Industrial distribution systems including hardware and software operations; inventory management, vendor evaluation; physical distribution systems; use of bar codes, radio frequency and other automated data entry techniques; purchasing operations.
Prerequisites: IDIS 343; industrial distribution major, junior or senior classification; completion of ENGL 104, MATH 151, MATH 152, CHEM 107 and CHEM 117, and PHYS 218 with a grade of C or better.

IDIS 400 Industrial Automation
Credits 4. 3 Lecture Hours. 3 Lab Hours.
Industrial applications of electronic devices; instrumentation; AC and DC drives; local area networks; cell and area controllers and advanced applications of programmable controllers.
Prerequisites: IDIS 300; industrial distribution major, junior or senior classification; completion of ENGL 104, MATH 151, MATH 152, CHEM 107 and CHEM 117, and PHYS 218 with a grade of C or better.

IDIS 403 Fluid Power Transmission
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Overview of the engineering concepts of hydraulics and pneumatic power and its components within a system to provide transmission of that power into useful work; experimental application of the related theory as it relates to the industrial distributor; "real world" knowledge learned for application in industry.
Prerequisites: IDIS 303; PHYS 208 or PHYS 219; industrial distribution major, junior or senior classification; completion of ENGL 104, MATH 151, MATH 152, CHEM 107 and CHEM 117, and PHYS 218 with a grade of C or better.

IDIS 420 Contemporary Topics in Electronics Distribution: Going Green
Credits 3. 3 Lecture Hours.
Study of concepts, issues, and techniques used to plan and analyze supply chain for new generation of green products; utilize interdisciplinary approach combining team projects, individual research, case study analysis, and interaction with industry executives; creation of marketing and distribution roadmaps for growth opportunities.
Prerequisites: IDIS 300; IDIS 343; industrial distribution major, junior or senior classification; completion of ENGL 104, MATH 151, MATH 152, CHEM 107 and CHEM 117, and PHYS 218 with a grade of C or better.

IDIS 421 Healthcare Distribution Networks
Credits 3. 3 Lecture Hours.
Examination of the value chain in the health care supply chain; emphasis on distributors in terms of competitive strategy, market power, distinctive capabilities and strategic alliances.
Prerequisites: IDIS 343; industrial distribution major, junior or senior classification; completion of ENGL 104, MATH 151, MATH 152, CHEM 107 and CHEM 117, and PHYS 218 with a grade of C or better.

IDIS 424 Purchasing Applications in Distribution
Credits 3. 3 Lecture Hours.
Applications of purchasing systems, specifically for the distribution industry; emphasis on supplier relations, strategic purchase planning, supplier evaluation, global purchasing techniques, cost analysis, life cycle costing, value analysis; case studies and procurement modeling for distributors.
Prerequisites: IDIS 340; IDIS 343; industrial distribution major, junior or senior classification; completion of ENGL 104, MATH 151, MATH 152, CHEM 107 and CHEM 117, and PHYS 218 with a grade of C or better.

IDIS 434 The Quality Process in Distribution
Credits 3. 3 Lecture Hours.
Application of the "Deming" principles specifically for distributors, including customer needs analysis, research and data collection methodology, employee involvement techniques, team building, statistical methods and data analysis; solutions to quality problems for distributors, lean and six-sigma principles.
Prerequisites: IDIS 344; industrial distribution major, junior or senior classification; completion of ENGL 104, MATH 151, MATH 152, CHEM 107 and CHEM 117, and PHYS 218 with a grade of C or better.

IDIS 444 Ethics and Leadership in Distribution
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Managing change in a dynamic environment in industrial distribution including key success factors involved in firm profitability, issues of a strategic nature; negotiation processes; ethical behavior in achieving economic and social performance.
Prerequisites: IDIS 330; industrial distribution major, junior or senior classification; completion of ENGL 104, MATH 151, MATH 152, CHEM 107 and CHEM 117, and PHYS 218 with a grade of C or better.

IDIS 445 International Sales and Marketing
Credits 3. 3 Lecture Hours.
Principles, cultural aspects of selling in the Latin American market, business-to-business selling environment, and marketing products, services and solutions in Latin America; local/country market analysis, strategic marketing, sales planning, alliances and partnerships, and operational support.
Prerequisite: Junior or senior classification.

IDIS 454 New Directions in Distributor Competitiveness
Credits 3. 3 Lecture Hours.
Investigation of new research in distributor competitiveness; focus on defining distribution strategy in changing market places; exploration of the latest applied findings and how companies are successfully implementing initiatives; project management approach to demonstrate the development of competitive advantage and design strategies for implementation.
Prerequisites: Junior or senior classification; completion of ENGL 104, MATH 151, MATH 152, CHEM 107 and CHEM 117, and PHYS 218 with a grade of C or better.

IDIS 455 Humanitarian Distribution Networks
Credits 3. 3 Lecture Hours.
Humanitarian logistics; essential knowledge to model distribution systems in humanitarian environments; supplemented by case studies and a project.
Prerequisites: IDIS 343; junior or senior classification; completion of ENGL 104, MATH 151, MATH 152, CHEM 107 and CHEM 117, and PHYS 218 with a grade of C or better.

IDIS 464 Distributor Operations and Financial Management
Credits 3. 3 Lecture Hours.
Assessment of firm performance utilizing financial statement analysis and industry studies; methods for planning, implementing and monitoring profitability from distributor operations; procedures for controlling cash flow; credit, receivables, inventory, personnel and productivity; and related financial operations.
Prerequisites: ACCT 209; IDIS 343; industrial distribution major, junior or senior classification; completion of ENGL 104, MATH 151, MATH 152, CHEM 107 and CHEM 117, and PHYS 218 with a grade of C or better.
IDIS 481 Seminar - Internship Preparation
Credit 1. 1 Lecture Hour.
Develop an understanding of the distribution industry and its opportunities; prepare students for summer internships; provide students with opportunities to network with industry and companies that will be hiring summer interns.
Prerequisite: Minimum of 60 credit hours.

IDIS 484 Professional Internship
Credits 2. 2 Other Hours.
Independent study and on-the-job supervised experience related to a professional area of interest in industrial distribution.
Prerequisites: IDIS 481; junior or senior classification.

IDIS 485 Directed Studies
Credits 1 to 6. 1 to 6 Other Hours.
Permits work in a special problem area on an individual basis with the intent of promoting independent reading, research and study; to supplement existing course offerings or subjects not presently covered.
Prerequisites: Senior classification and approval of instructor.

IDIS 489 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Selected topics in an identified area of industrial distribution.
Prerequisite: Approval of instructor.

IDIS 611 Current Issues in Industrial Distribution
Credits 3. 3 Lecture Hours.
Contemporary issues and trends affecting participants in the industrial distribution industry; opportunities and challenges for leaders identified and explored from the perspective of industrial distributors, manufacturers and end users.
Prerequisite: Enrollment in the MID program.

IDIS 614 Industrial Distributor Networks
Credits 3. 3 Lecture Hours.
Industrial distributor's network channel in distribution centers, warehouse management systems, hot-shot and standard truck fleets, forecasting and purchasing strategies for technical products; an examination of the integration of the field and inside sales force into distributor network strategy.
Prerequisite: Enrollment in the MID program.

IDIS 621 Industrial Distributor Processes I
Credits 3. 3 Lecture Hours.
Industrial distributor processes with an emphasis on assessing the value added effectiveness of specific industrial distributor initiatives.
Prerequisite: IDIS 644.

IDIS 622 Industrial Distributor Processes II
Credits 3. 3 Lecture Hours.
Continuation of IDIS 621.
Prerequisite: IDIS 621.

IDIS 624 Strategic Relationships for Industrial Distributors
Credits 3. 3 Lecture Hours.
Issues related to establishing and maintaining a beneficial relationship between distributors and manufacturers; developing effective buyer-seller relationships in the industrial distribution sector.
Prerequisite: Enrollment in the MID program.

IDIS 634 Quality Concepts in Industrial Distribution
Credits 3. 3 Lecture Hours.
Concepts, issues and techniques used to plan, analyze, control, and improve the quality of industrial distribution products and processes for increased consumer satisfaction.
Prerequisite: IDIS 655.

IDIS 644 Industrial Distributor Information and Technology Management
Credits 3. 3 Lecture Hours.
Industrial distributor's use of information systems to manage operations; combination of information systems and automation to achieve increased cross docking drop ships and automated tracking of industrial distributor operations metrics.
Prerequisite: IDIS 614.

IDIS 655 Global Distribution
Credits 3. 3 Lecture Hours.
Issues in global distribution on a small to large scale; emphasis on competitive global business strategies, cultural and exchange issues, distribution practices of other countries, global distribution networks, and transportation issues across the globe; an optional one week international trip to solidify foundation in international distribution concepts and strategies.
Prerequisite: IDIS 611.

IDIS 664 Distribution Profitability Analysis
Credits 3. 3 Lecture Hours.
Integrating advanced financial and accounting analysis useful to distribution executives in assessing the financial performance of distribution operations. Concepts and techniques in using financial statements and industrial distribution industry studies to manage cash flow, debt, working capital risk, capital budgeting, credit, receivables, inventory, personnel and profitability.
Prerequisite: IDIS 624.

IDIS 674 Industrial Distribution Enterprise
Credits 3. 3 Lecture Hours.
Explore changing environment of industrial distribution from globalization effects, environmental conditions, industrial distribution culture and organizational factors; focus on building, achieving and sustaining a competitive advantage.
Prerequisite: IDIS 664.

IDIS 685 Directed Studies
Credits 1 to 6. 1 to 6 Other Hours.
Individual and group problems dealing with application of industrial distribution theory and practice; foreign and domestic projects of special interest. May be repeated for credit.
Prerequisites: Enrollment in the MID program and approval of program director.

IDIS 689 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Selected topics in an identified area of industrial distribution. May be repeated for credit.
Prerequisite: Approval of MID program director.

IDIS 693 Professional Study
Credits 1 to 6. 1 to 6 Other Hours.
Approved professional study project in industrial distribution; preparation of a record of study summarizing the rationale, procedure and results of the completed study.
Prerequisite: Approval of MID program director.

INST-Interdisciplinary Studies
Courses

INST 210 Understanding Special Populations
Credits 3. 3 Lecture Hours.
Referral, assessment and categorization of special populations including physical, cognitive and affective characteristics; cultural, ethnic, economic and linguistic differences; giftedness; special education and compensatory programs; awareness of legislative history that results in rights for special populations.
Prerequisite: Sophomore classification or above.

INST 222 Foundations of Education in a Multicultural Society
Credits 3. 3 Lecture Hours.
Historical, philosophical and cultural foundations of education emphasizing education for a multicultural society.

INST 291 Research
Credits 1 to 4. 1 to 4 Other Hours.
Research conducted under the direction of faculty member in teaching, learning and culture. May be repeated 2 times for credit.
Prerequisites: Freshman or sophomore classification and approval of instructor.

INST 301 Educational Psychology
Credits 3. 3 Lecture Hours.
Application of psychology to problems of teaching. Nature and operation of principles of learning, transfer of training; nature, measurement and significance of individual differences; conditions influencing efficiency of learning.
Prerequisite: Junior or senior classification.

INST 332 Second Language Instruction and Assessment
Credits 3. 3 Lecture Hours.
Techniques and methods of intensive English instruction for Limited English Proficient students; lesson planning and instructional modification; use of instructional strategies and appropriate assessment practices.
Prerequisite: Admission to teacher education.

INST 334 Assessment of English Language Learners
Credits 3. 3 Lecture Hours.
Theoretical and practical aspects of ESL/EFL testing, including formal and informal assessment procedures and instruments, assessments and referral and processes of ESL with special needs, and gifted ESL learners.
Prerequisites: INST 322 and INST 332.

INST 362 English as a Second Language Methods I
Credits 3. 3 Lecture Hours.
Basic principles of language acquisition, multiple approaches to second language acquisition; individual differences and second language acquisition; stages of second language development; multiple approaches to assessment.

INST 363 English as a Second Language Methods II
Credits 3. 3 Lecture Hours.
Strategies and techniques for teaching English language learners; curriculum design and material development, instruction of English language learners, content area instruction, and language assessment instruments; a historical perspective of the education of English language learners in United States' schools.
Prerequisite: INST 362.

INST 491 Research
Credits 1 to 4. 1 to 4 Other Hours.
Research conducted under the direction of faculty member in teaching learning and culture. May be repeated 2 times for credit.
Prerequisites: Junior or senior classification and approval of instructor.

INTS - International Studies

INTS 201 Introduction to International Studies
Credits 3. 3 Lecture Hours.
Introduction to the basic concepts and frameworks for analyzing global events and understanding the current international situation; for freshman and transfer international studies majors.

INTS 205 Current Issues in International Studies
Credit 1. 1 Lecture Hour.
Exploration of current issues and problems in International Studies through attendance of events, lectures by noted international academics and professionals, and in-class discussions. May be taken three times for credit.
Prerequisite: International studies major.

INTS 211/ENGL 211 Foundations in Cultural Studies
Credits 3. 3 Lecture Hours.
Introduction to history, influence and major ideas of Cultural Studies; use of culture as a means to critique social problems and understand social forces; analysis of culture in its relationship to power; participation in project investigating contemporary U.S. youth subcultures.
Cross Listing: ENGL 211/INTS 211.

INTS 251 Contemporary Issues in the Middle East
Credits 3. 3 Lecture Hours.
Exploration of current political and cultural issues in the Middle East.

INTS 285 Directed Studies
Credits 0 to 3. 0 to 3 Other Hours.
Individual supervision of readings or assigned projects in international studies. May be taken two times for credit.
Prerequisites: Approval of instructor and department head.

INTS 289 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Introduction to the broad range of disciplines and issues explored in the international studies curriculum. May be repeated for credit.
Prerequisite: Freshman or sophomore classification.

INTS 301 Theories of Globalization
Credits 3. 3 Lecture Hours.
Diverse global and international cultural processes in their economic and political contexts; analyses of theoretical lenses on transnationalism including diaspora, hybridity, liminality, marginality, cyborgism, nomadism, scapes and flows and others; case studies of global cultures.
Prerequisite: Junior or senior classification or approval of instructor.

INTS 321 Political Islam and Jihad
Credits 3. 3 Lecture Hours.
Interaction between Islamic movements and politics in various Middle Eastern countries; the meaning and evolution of jihad; the role of Islam as a tool for political and social mobilization.
Prerequisite: Junior or senior classification, or approval of instructor.
Cross Listing: HUMA 321 and RELS 321.

INTS 401 Urbanism and Modernism
Credits 3. 3 Lecture Hours.
Interdisciplinary examination of the transition from rural traditions to urban alienation, covering modernist currents in culture, history, politics, and society; exploration of the problems of urbanism as represented by the most renowned twentieth-century artists; study of such topics as modernist urban design, urban alienation, modernist cities, dystopia, and urbanism.
Prerequisites: International studies major; INTS 201.
INTS 403 Nations and Nationalisms
Credits 3. 3 Lecture Hours.
Interdisciplinary approach where nation is understood as modern political
entity distinct from country; examination of historical and philosophical
origins of idea of nationalism; theories on nationhood, national identity and
rise of nationalism; global variety of concrete test cases to highlight actual
origins of idea of nationalism; theories on nationhood, national identity and
entity distinct from country; examination of historical and philosophical
principles of human interaction in the face of cultural diversity.
Prerequisites: International studies major; INTS 201.

INTS 405 War and Memory
Credits 3. 3 Lecture Hours.
Examination of world wars, colonial wars, genocides, and historical crimes
from the late nineteenth century until the present; analysis of the changing
memory of those traumatic events as evident in historical accounts,
commemorations, film, and literature.
Prerequisites: International studies major; INTS 201.

INTS 407 Diversity in a Globalized World
Credits 3. 3 Lecture Hours.
Examination of the cultural constructs that arise through the encounters
with colonialism from the conquest of the Americas to the present; cultural
studies and literary analysis to identify and interrogate the common
principles of human interaction in the face of cultural diversity.
Prerequisites: International studies major; INTS 201.

INTS 409 Culture, Neoliberalism and Globalism
Credits 3. 3 Lecture Hours.
Examination of largely North Atlantic cultural forms and meanings that
arise in the context of neoliberalism from the late 1970’s to the present; cultural
studies and broad-based social analysis to identify and interrogate the many relational contexts where power circulates through cultural
objects and meanings.
Prerequisites: INTS 201; international studies major; junior or senior
classification.

INTS 410 Gender and the Global Modern
Credits 3. 3 Lecture Hours.
Relationship of the concepts of gender and modernity in the 20th and the
21st centuries from an international perspective; global theories of gender
and sex across genres.
Prerequisites: INTS 201; junior or senior classification or approval of
instructor.

INTS 481 Senior Seminar in International Studies
Credits 3. 3 Lecture Hours.
Capstone course designed to produce in-depth research projects; based
on student's international experience and specific area of expertise
acquired in major.
Prerequisites: International Studies major; INTS 201; senior
classification; completed international experience.

INTS 484 Directed Internship
Credits 3. 3 Other Hours.
Directed internship in a private firm, government or non-profit agency
outside the United States; provide on-the-job experience appropriate to
the student's program of work and career objectives. To be taken on a
satisfactory/unsatisfactory basis. Maximum of 3 credit hours may count
towards degree.
Prerequisites: Completion of 100- and 200-level language requirement;
junior or senior classification; approval of internship coordinator.

INTS 485 Directed Studies
Credits 0 to 3. 0 to 3 Other Hours.
Research problems and readings for students majoring in international studies; directed independent study of an international issue related to
student's area of interest.
Prerequisite: Junior or senior classification or approval of instructor.

INTS 489 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Selected topics in an identified area of international studies. May be
repeated for credit.
Prerequisites: INTS 201; junior or senior classification and approval of
instructor.

INTS 491 Research
Credits 0 to 3. 0 to 3 Other Hours.
Research conducted under the direction of faculty member in international
studies.
Prerequisites: INTS 201; junior or senior classification and approval of
instructor.

INTS 497 Independent Honors Study
Credits 3. 3 Other Hours.
Directed independent studies designed to produce a senior honors thesis;
based on international experience and interdisciplinary expertise acquired
in major.
Prerequisites: INTS major; honors candidate; completed international
experience.

ISEN - Indus & Systems Engr

Courses

ISEN 101 Introduction to Industrial Engineering
Credit 1. 1 Lecture Hour.
Introduction to industrial engineering; overview of the curriculum;
presentations by faculty and industry to familiarize with the department
and the scope of industrial engineering applications.

ISEN 220 Introduction to Production Systems
Credits 3. 3 Lecture Hours.
Introduction to manufacturing and production systems; overview of various
aspects of manufacturing systems; includes using Excel and VBA in
coding and evaluating models related to production systems and other
industrial engineering applications.
Co-requisites: MMET 181; STAT 211.
Prerequisite: CSCE 206.

ISEN 285 Directed Studies
Credits 1 to 4. 1 to 4 Other Hours.
Problems of limited scope in industrial engineering approved on an
individual basis intended to promote independent study.
Prerequisite: Approval of department head.

ISEN 302 Economic Analysis of Engineering Projects
Credits 2. 2 Lecture Hours.
Principles of economic equivalence; time value of money; analysis of
single and multiple investments; comparison of alternatives; capital
recovery and after-tax analysis of economic projects.
Prerequisite: MATH 152.
ISEN 303 Engineering Economic Analysis  
Credits 3.3 Lecture Hours.  
Principles of economic equivalence; time value of money; analysis of single and multiple investments; comparison of alternatives; capital recovery and tax implications; certainty; uncertainty; risk analysis; public sector analysis and break-even concepts.  
Prerequisite: MATH 152.

ISEN 314 Statistical Control of Quality  
Credits 3.2 Lecture Hours. 3 Lab Hours.  
Quality control with statistical principles applied to quality problems, including statistical analysis, density and distribution functions, control chart concepts, and process capability analysis; laboratory exercises for exposure to basic metrology and applied statistics for quality control applications in discrete-item manufacturing systems; introduction to six-sigma principles including DMAIC and variance reduction strategies.  
Prerequisite: STAT 212.

ISEN 315 Production Systems Planning  
Credits 3.3 Lecture Hours.  
Principles, models, and techniques for planning, analysis, and operation of integrated production and distribution systems; application of non-linear optimization and linear, integer, and dynamic programming models and solution methods as appropriate to capacity planning, aggregate planning, inventory planning and control under deterministic and stochastic demands, push (MRP) and pull (JIT) material flow management, production lot sizing, supply chain planning, assembly line balancing, and scheduling.  
Prerequisites: ISEN 220; MATH 304.  
Corequisite: ISEN 420.

ISEN 316 Production Systems Operations  
Credits 3.3 Lecture Hours.  
Analytical principles of manufacturing systems design, analysis and control; emphasis on stochastic analysis; role of variability and impact on cycle time; push versus pull production strategies including Kanban and constant wip control; probability, queuing theory, Little’s Law, heavy traffic approximations, queuing networks, and lean engineering principles.  
Prerequisites: ISEN 220, ISEN 424; MATH 304.

ISEN 333 Project Management for Engineers  
Credits 3.3 Lecture Hours.  
Basic project management for engineering undergraduates; project development and economic justification; estimating; scheduling; network methods; critical path analysis; earned value management; recycling and rework; project organizational structures; project risk assessment; resource allocation; ethics; characteristics of project managers.  
Prerequisite: Junior or senior classification in Dwight Look College of Engineering.  
Cross Listing: CVEN 333 and MEEN 333.

ISEN 360 Lean Thinking and Lean Engineering in the Process Industries  
Credits 3.3 Lecture Hours.  
Philosophical, managerial, and operational principles of lean thinking within the context, tools, and practices of lean engineering; emphasis on the pharmaceutical and process industry; design of lean systems, lean cell design, modeling of lean manufacturing systems, and operation of manufacturing cells; queuing network theory for the analysis of lean systems.  
Prerequisites: STAT 211; junior or senior classification for students other than INEN majors.

ISEN 411 Engineering Management Techniques  
Credits 3.3 Lecture Hours.  
Techniques relating to managing engineering activities; engineer’s transition into management; engineering managerial functions; motivation of individual and group behavior; productivity assessment/improvement; managing the quality function and communications.  
Prerequisite: Senior classification in industrial engineering.

ISEN 414 Total Quality Engineering  
Credits 3.2 Lecture Hours. 3 Lab Hours.  
Principles of total quality engineering; total quality management philosophy, engineering approaches for designing quality into products and processes; off-line experimentation methods for the robust design; emphasis on teamwork and continuous quality improvement.  
Prerequisite: STAT 211; junior or senior classification.

ISEN 416 Facilities Location, Layout and Material Handling  
Credits 4.3 Lecture Hours. 3 Lab Hours.  
Analytical treatment of facilities location, physical layout, material flow and handling, combined with heuristic algorithms to assist in the design of production/service facilities; fundamental concepts applied through a sequence of design projects.  
Prerequisites: ISEN 315; ISEN 316 or registration therein.

ISEN 420 Operations Research I  
Credits 3.3 Lecture Hours.  
Development and application of fundamental deterministic analytical methods including linear programming, integer programming, dynamic programming and nonlinear optimization.  
Prerequisite: MATH 304 or equivalent.

ISEN 421 Operations Research II  
Credits 3.3 Lecture Hours.  
Development and application of probabilistic analytical methods including Markov chains, queuing systems and digital simulation modeling.  
Prerequisites: MATH 304 or equivalent; STAT 212.

ISEN 424 Systems Simulation  
Credits 3.2 Lecture Hours. 3 Lab Hours.  
Systems simulation structure, logic and methodologies; generation of random numbers and random variates; system simulation languages, models and analysis; applications to a variety of systems such as transportation, supply chain modeling, manufacturing and service systems.  
Prerequisite: STAT 212.

ISEN 425 Design and Analysis of Industrial Systems with Simulation  
Credits 3.2 Lecture Hours. 3 Lab Hours.  
In-depth study into the design-modeling and subsequent analysis of contemporary production/service systems; factory/service systems are modeled using the ARENA/SIMAN V simulation-animation language; emphasis is placed on the critical analysis of alternative flow designs of modeled systems using flow and economic parameters to assess system improvement.  
Prerequisites: ISEN 303 and ISEN 424.

ISEN 430 Human Factors and Ergonomics  
Credits 3.3 Lecture Hours.  
Human biological, ergonomic, and psychological capabilities and limitations; techniques and procedures for developing and applying the principles of human factors engineering to systems design; stresses interdisciplinary nature of the subject.  
Prerequisite: Junior or senior classification.
ISEN 440 Systems Thinking  
Credits 3.3 Lecture Hours.  
Systems thinking process, systems of systems and the fundamental considerations associated with the engineering of large-scale systems, or systems engineering including systems modeling, design and the system development process.  
Prerequisites: MATH 304 or approval of instructor; junior or senior classification.

ISEN 450 Healthcare Systems Engineering  
Credits 3.3 Lecture Hours.  
Explores components of healthcare system, existing problems in healthcare systems; need for engineering to analyze healthcare system problems; application of industrial engineering tools in improving healthcare system; role of industrial engineering in addressing healthcare policy issues.  
Prerequisites: ISEN 314, ISEN 420, ISEN 424, or approval of instructor; junior or senior classification.

ISEN 459 Industrial Engineering Systems Design  
Credits 3.1 Lecture Hour. 6 Lab Hours.  
Capstone design course emphasizing modeling, analysis and design of industrial, manufacturing, and service systems; integrates knowledge gained from all required industrial engineering courses in a comprehensive design project, to be taken in the final semester of undergraduate studies.  
Prerequisites: ISEN 314, ISEN 316, ISEN 416.

ISEN 485 Directed Studies  
Credits 1 to 6.1 to 6 Other Hours.  
Permits work on special project in industrial engineering. Project must be approved by department head.  
Prerequisite: Senior classification in industrial engineering.  
ISEN 489 Special Topics in...  
Credits 1 to 5.1 to 5 Lecture Hours. 0 to 5 Lab Hours.  
In-depth study of areas of current student interest and recent advances; normally used for first time offering of new courses.  
Prerequisite: Approval of instructor.

ISEN 601 Location Logistics of Industrial Facilities  
Credits 3.3 Lecture Hours.  
Selection of the optimal locations of industrial plants and distribution centers through analytical modeling of the costs of inventory storage, transportation, utilities, labor supply and other cost components.  
Prerequisites: ISEN 620.

ISEN 602 Applications of Random Processes  
Credits 3.3 Lecture Hours.  
Introduction to probability and random processes as a basis for studying topics in industrial engineering and operations research.  
Prerequisites: ISEN 609; STAT 212 or STAT 601.

ISEN 603 Advanced Logistics  
Credits 3.3 Lecture Hours.  
Topics in logistics including measures of logistical systems performance, facilities location—allocation, production/distribution system design, transportation network design, vehicle routing; emphasis on mathematical modeling based on large scale integer programs and solution approaches for general network design problems.  
Prerequisites: ISEN 601, ISEN 622, ISEN 623, ISEN 668 or approval of instructor.

ISEN 605 Material Handling Systems  
Credits 3.3 Lecture Hours.  
Analysis and design of integrated material handling systems; automatic storage and retrieval of unit loads, and identifying and establishing boundary conditions on key parameters required to specify the desired system required for equipment vendors to design appropriate hardware.  
Prerequisites: ISEN 420; ISEN 416.

ISEN 608 Industrial Case Analysis  
Credits 3.3 Lecture Hours.  
Practice in applications of principles to the solution of actual case problems involving broad management decisions.  
Prerequisite: Approval of instructor.

ISEN 609 Probability for Engineering Decisions  
Credits 3.3 Lecture Hours.  
Introduction to probability and stochastic processes for characterization of uncertainty in engineering decisions.  
Prerequisite: Approval of instructor.

ISEN 611 Foundations of Technology Evaluation and Assessment  
Credits 3.3 Lecture Hours.  
Quantifying gambles arising in engineering activities associated with the design, deployment, and operations of technology; analytical foundations of technology evaluation and assessment from an engineering perspective; focus on examination of probability models supporting quantification of value and risk.  
Prerequisites: ISEN 609 or approval of instructor.

ISEN 612 Design by Reliability  
Credits 3.3 Lecture Hours.  
Quantitative reliability analysis in engineering design. Reliability methods applicable to risk based design, component reliability and degradation, static and dynamic system reliability modeling and analysis, life testing, stress/strength analysis, and fault tree analysis.  
Prerequisites: ISEN 609; STAT 414.

ISEN 613 Engineering Data Analysis  
Credits 3.3 Lecture Hours.  
Selected topics in probability and data analysis for quality in engineering problems; measurement principles, data collection and data analysis to solve quality engineering problems. Introduction to courses in the assurance sciences-reliability, maintainability, quality control and robust design.

ISEN 614 Advanced Quality Control  
Credits 3.3 Lecture Hours.  
Advanced methods applied to quality control and anomaly detection; classical treatments and recent developments in statistical process control; evaluation, design and maintenance of quality control programs; focus on monitoring and root cause identification.  
Prerequisite: STAT 212 or STAT 601.

ISEN 615 Production and Inventory Control  
Credits 3.3 Lecture Hours.  
Model development for inventory management and for production planning; production control models for line balancing, lot sizing, dispatching, scheduling, releasing, kitting, MRP and just-in-time with treatment of flexible manufacturing and assembly.  
Prerequisites: ISEN 620; ISEN 609.
ISEN 616 Design and Analysis of Industrial Experiments
Credits 3.3 Lecture Hours.
Fundamental theory, concepts and procedures required for industrial experimental design, statistical data analysis, and model building, with emphasis on engineering formulations and applications. One-factor experiments with and without restrictions on randomization, treatment comparison procedures, Latin and other squares, factorial experiments, full and fractional two-level factorial experiments, blocking in factorial designs, response surface methodologies and introduction to Taguchi methods.
Prerequisite: STAT 212 or STAT 601.

ISEN 617 Quantitative Models for Supply Chain Coordination
Credits 3.3 Lecture Hours.
Concepts, complexities, and models pertaining to supply chain management and relate these to recent practical initiatives; includes channel coordination models, supply chain contracting, and vendor-managed, inventory models.
Prerequisites: ISEN 615, ISEN 623, and ISEN 609 or STAT 615 or approval of instructor.

ISEN 618 Stochastic Processes in the Assurance Sciences
Credits 3.3 Lecture Hours.
Stochastic processes necessary to deal with advanced problems in reliability, maintainability and other related areas.
Prerequisite: ISEN 602.

ISEN 619 Analysis and Prediction
Credits 3.3 Lecture Hours.
Data-mining methods and data-driven models; statistical model building and parameter estimation for Markov processes; sampling of dynamic systems with random disturbances; on-line identification algorithms; design of time-series control charts for process monitoring; multivariate analysis; applications using real data.
Prerequisite: ISEN 609.

ISEN 620 Survey of Optimization
Credits 3.3 Lecture Hours.
Theory and numerical methods for deterministic linear and nonlinear optimization; topics include linear programming, unconstrained-nonlinear optimization, constrained-nonlinear optimization, Lagrange and K-K-T conditions, and numerical algorithms.
Prerequisite: MATH 304 or MATH 311.

ISEN 621 Heuristic Optimization
Credits 3.3 Lecture Hours.
Focus on heuristic optimization methods that search beyond local optima; includes neighborhood search methods and advanced search strategies such as genetic algorithms, simulated annealing, neural networks, tabu search, and greedy randomized adaptive search procedures.
Prerequisites: ISEN 620 or ISEN 622 or approval of instructor.

ISEN 622 Linear Programming
Credits 3.3 Lecture Hours.
Development of the mathematics and algorithms associated with linear programming; convex sets and cones, polyhedral sets, duality theory, sensitivity analysis, simplex, revised simplex and dual simplex methods; also covered are bounded variables, column generation, decomposition, integer programming; computer assignment.
Prerequisite: MATH 304.

ISEN 623 Nonlinear and Dynamic Programming
Credits 3.3 Lecture Hours.
Understanding of algorithms for nonlinear optimization; development of optimality conditions and different types of algorithms for unconstrained and constrained problems; formulation and solution of many types of discrete dynamic programming problems.
Prerequisite: MATH 304.

ISEN 624 Applied Distribution and Queueing Theory
Credits 3.3 Lecture Hours.
Queueing theory and its applications; single and multiple channels, priorities, balking, batch arrivals and service, and selected non-Markovian topics.
Prerequisite: ISEN 609 or ECEN 646.

ISEN 625 Simulation Methods and Applications
Credits 3.2 Lecture Hours. 3 Lab Hours.
Fundamental methodologies of simulation modeling; random number and variate generation, statistical analysis of model output, and discrete event modeling using a commercial simulation language.
Prerequisite: STAT 212 or STAT 601.

ISEN 627 Engineering Analysis for Decision Making
Credits 3.3 Lecture Hours.
Principles and application of techniques in analysis of decision processes involving engineering systems under uncertainty. Areas of utility and information theory as related to quantification of information for decision-making.
Prerequisites: ISEN 609; STAT 601 or approval of instructor.

ISEN 629 Engineering Optimization
Credits 3.3 Lecture Hours.
Develops a modern framework for studying nonlinear programming problems using convex analysis; convex sets and cones, separating hyperplanes, sub-differentiability, conjugate transforms, duality theory and parametric analysis; applications of the principles and methods will be studied.
Prerequisite: ISEN 623; corequisite: MATH 409.

ISEN 630 Human Operator in Complex Systems
Credits 3.3 Lecture Hours.
Basic understanding of the theory and practice of human factors engineering. Topics are presented within the framework of humans as functioning systems and their requirements when incorporated in hardware and software systems.

ISEN 631 Cognitive Systems Engineering
Credits 3.3 Lecture Hours.
Analyze how artifacts, displays, social interaction and factors such as stress, time pressure, competing demands and uncertainty affect human cognitive functions such as perception, attention, memory, decision-making and problem-solving in joint human-machine systems; user-centered design techniques, research and evaluation methods introduced and applied to a design project.
Prerequisites: ISEN 635, ISEN 430/ISEN 630, or approval of instructor.

ISEN 635 Human Information Processing
Credits 3.3 Lecture Hours.
Perceptual and cognitive issues as related to the design of man-machine systems; perception, central processes, decision making and other performance aspects of the human component as an information processor.
Prerequisite: ISEN 430 or approval of instructor.
ISEN 636 Large-Scale Stochastic Optimization
Credits 3.3 Lecture Hours.
Introduction to models, theory and computational methods for large-scale stochastic optimization including decomposition-coordination algorithms for stochastic programming such as generalized Benders decomposition and resource-price directive methods; emphasis on practical algorithm implementation and computational experimentation.
Prerequisites: ISEN 620 or ISEN 622, STAT 610 and CSCE 602 or approval of instructor.

ISEN 637 Stochastic Dynamic Programming
Credits 3.3 Lecture Hours.
Methodologies for stage-wise stochastic-decision processes; includes finite-horizon models, infinite-horizon discounted total cost models, and average cost models; applications of methods to various situations.
Prerequisites: ISEN 609 and ISEN 622, or approval of the instructor.

ISEN 638 Polyhedral Theory and Valid Inequalities
Credits 3.3 Lecture Hours.
Advanced knowledge of polyhedral theory and valid inequalities for (mixed) integer programming; introduction to fundamental concepts in polyhedral theory and several approaches to generation of valid inequalities; includes state-of-the-art advancements and current avenues of research.
Prerequisite: ISEN 668.

ISEN 640 Systems Thinking and Analysis
Credits 3.3 Lecture Hours.
Introduction to the systems thinking process and the fundamental considerations associated with the engineering of large-scale systems, or systems engineering.
Prerequisite: MATH 304 or approval of instructor.

ISEN 641 Systems Engineering Methods and Frameworks
Credits 3.3 Lecture Hours.
Concepts, methodology, methods and tools for discovery, definition, analysis, design, creation, and sustainment of systems involving information, physical, and human elements; architecture modeling methods include IDEF/UPDM; systems engineering frameworks include DoDAF/MoDAF, and Zachman; analysis tools include executable methodologies to assess consistency, interoperability and performance.
Prerequisites: MATH 304 or approval of instructor.

ISEN 643/CVEN 654 Strategic Construction and Engineering Management
Credits 3.3 Lecture Hours.
Strategic and systems perspectives applied to construction and engineering management projects, organizations, and industries; system dynamics methodology to model construction and engineering systems; understanding drivers of performance; feedback and high leverage points for performance improvement.
Prerequisite: Graduate classification or approval of instructor.
Cross Listing: CVEN 654/ISEN 643.

ISEN 644/CVEN 644 Project Risk Management
Credits 3.3 Lecture Hours.
Identifies causes of risks in projects; discusses probabilistic description of risks and formulation of risk models; Bayesian methods for revising probabilities; qualitative and quantitative risk assessment; setting contingencies on budgets and schedules; risk mitigation and risk management; handling technological risk; Utility theory and game theory in management of risks.
Prerequisite(s): STAT 601 or equivalent; graduate status in Engineering, approval of instructor.
Cross Listing: CVEN 644.

ISEN 645 Lean Thinking and Lean Manufacturing
Credits 3.3 Lecture Hours.
Introduces the principles of lean thinking in modern manufacturing systems; philosophical, managerial and organizational requirements studied; lean manufacturing quantitative modeling methodologies, lean manufacturing cell design and case study analysis.
Prerequisites: ISEN 609 or approval of instructor.

ISEN 650 Healthcare Delivery Systems Modeling and Analysis
Credits 3.3 Lecture Hours.
Challenges in modeling and analysis of healthcare systems; deterministic and stochastic approaches to model and analyze healthcare systems; existing and emerging policies in healthcare and effects on healthcare system models.
Prerequisite: ISEN 609, ISEN 620, or approval of instructor.

ISEN 654/MEEN 648 Manufacturing Systems Planning and Analysis
Credits 3.3 Lecture Hours.
The systems perspective of a computer integrated manufacturing system; manufacturing and its various levels and the planning and control of product movement through the production system in the context of using realtime control, multiprocessor systems, network architectures and databases.
Prerequisite: ISEN 420.
Cross Listing: MEEN 648/ISEN 654.

ISEN 655/MEEN 650 Control Issues in Computer Integrated Manufacturing
Credits 3.3 Lecture Hours.
Examines the nature of computer aided manufacturing systems with emphasis on control; an architecture for control of CAM systems is presented; control issues, problems and procedures to control CAM systems are studied and developed.
Prerequisite: Approval of instructor.
Cross Listing: MEEN 650/ISEN 655.

ISEN 656 Virtual Manufacturing
Credits 3.3 Lecture Hours.
Focus on principles of virtual reality and 3-D graphics and their application in manufacturing, automation and simulation; virtual reality modeling, motion, collision detection and networking issues studied and developed.
Prerequisite: Approval of instructor.

ISEN 659 Modeling and Analysis of Manufacturing Systems
Credits 3.3 Lecture Hours.
Analytical models applied to the description, design operation and control of manufacturing processes and systems; includes serial assembly, jobshops, FMS and cellular manufacturing configurations.
Prerequisites: ISEN 609.

ISEN 660 Quantitative Risk Analysis
Credits 3.3 Lecture Hours.
Fundamental concepts, techniques, and applications of quantitative risk analysis and risk-informed decision making for students in all engineering fields. Practical uses of probabilistic methods are demonstrated in exercises and case studies from diverse engineering areas.
Prerequisites: Graduate or senior classification.
Cross Listing: CHEN 660 and SENG 660.
ISEN 661 Network-Based Planning and Scheduling Systems
Credits 3. 3 Lecture Hours.
Fundamental theory, mathematical modeling, and algorithms of network flow models including shortest path models, maximum flow and cost minimization models; out-of-kilter algorithm; pure and generalized network specializations of the primal simplex method; introduction to multi-commodity networks.
Prerequisite: ISEN 620 or 622.
ISEN 662 Production Economics
Credits 3. 3 Lecture Hours.
Develop an understanding of the analytical and empirical techniques required to conduct an analysis of the magnitude and the sources of productivity change; programming and regression approaches to analyze industries include manufacturing, energy, and service systems.
Prerequisites: ISEN 303 and ISEN 620 or approval of instructor.
ISEN 663 Engineering Management Control Systems
Credits 3. 3 Lecture Hours.
Integration of human relations, planning and control concepts, systems analysis and design, and principles of management oriented toward engineering functions within an organization; organizational design and administration as they impact along the product life cycle, i.e., research, design, development, production and use.
ISEN 664 Principles of Scheduling
Credits 3. 3 Lecture Hours.
Scheduling and sequencing for production, assembly, supply chain, logistics and service operations; relevant solution methods including algebraic, branch and bound, Lagrangian relaxation, facet generation, branch and price, heuristics and simulation; computational complexity issues.
Prerequisite: ISEN 620 or ISEN 622 or approval of instructor.
ISEN 667 Engineering Economy
Credits 3. 3 Lecture Hours.
Fundamental concepts and advanced techniques of engineering economic analysis; evaluation of alternative capital investments considering income taxes, depreciation and inflation; discounted cash flow analysis of competing projects, break-even analysis and determination of rate of return on investment. Risk and uncertainty in engineering analysis.
Prerequisite: ISEN 303 or approval of instructor.
ISEN 668 Integer Programming
Credits 3. 3 Lecture Hours.
Formulation principles and general approaches for solving integer (and mixed, integer linear) programs including preprocessing, cutting plane methods, branch and bound, branch and cut, branch and price, and Lagrange relaxation; classical problem structures with special-purpose solution algorithms; fundamental theory of polyhedra, methods to generate valid inequalities and computational complexity.
Prerequisite: ISEN 620 or ISEN 622.
ISEN 669 Software Tools for Stochastic Decision Support Analysis
Credits 3. 3 Lecture Hours.
Overview of stochastic decision analysis; focus on Palisade Corporation’s Decision Tools Suite of Excel add-in macros; topics include sensitivity analysis of Excel models, decision tree construction and analysis, and simulation within Excel.
Prerequisite: STAT 630 or equivalent and ISEN 667.
ISEN 681 Seminar
Credit 1. 1 Lecture Hour.
Opportunity to present research in a professional atmosphere. Presentations are not restricted to thesis or problem research. Acquaints the student with departmental research activities and procedures in documenting research.
ISEN 684 Professional Internship
Credits 1 to 16. 1 to 16 Other Hours.
On-the-job training under supervision of practicing engineers in settings appropriate to professional objectives. May be repeated for credit.
Prerequisite: Approval of committee chair and department head.
ISEN 685 Directed Studies
Credits 1 to 12. 1 to 12 Other Hours.
Special topics not within scope of thesis research and not covered by other formal courses.
Prerequisite: Graduate classification in industrial engineering.
ISEN 689 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours. 0 to 4 Lab Hours.
Selected topics in an identified area of industrial engineering. May be repeated for credit.
Prerequisite: Approval of instructor.
ISEN 691 Research
Credits 1 to 23. 1 to 23 Other Hours.
Research in industrial engineering field; content and credit dependent upon needs of individual student.
ISEN 692 Professional Study
Credits 1 to 9. 1 to 9 Other Hours.
Approved professional study or project. May be taken more than once, but not to exceed 4 hours of credit toward a degree. Must be taken on a satisfactory/unsatisfactory basis.
Prerequisite: Approval of instructor.
ISYS - Mgmt Info Systems
Courses
ISYS 209 Business Information Systems Concepts
Credits 3. 3 Lecture Hours.
Introduction to the use of computers in data and document management and as a problem-solving tool for business; fundamental concepts of information technology and theory; opportunities to use existing application software to solve various business information systems oriented problems. May not be used to satisfy degree requirements for majors in business.
Prerequisite: For students other than business and agribusiness majors.
ISYS 210 Fundamentals of Information Systems
Credits 3. 3 Lecture Hours.
Introduction to information systems concepts; study of information systems in the functional areas of business; overview of hardware, software and popular operating systems; study of problem solving tools; human factors.
Prerequisite: For business majors.
ISYS 250 Business Programming Logic and Design
Credits 3. 3 Lecture Hours.
Development of structured and object-oriented program logic and design in solving business programming problems; writing, documenting, debugging and testing computer code; emphasis on good coding techniques and logical thinking.
Prerequisite: ISYS 210 or approval of instructor.
ISYS 281 Professional Development Information Systems Seminar  
Credit 1.1 Other Hour.  
Exposure to professional issues, contemporary information systems topics, potential MIS careers and employers. May be taken three times for credit.  
Prerequisite: Admission to Mays Business School; intend to major in management information systems.  

ISYS 300/SCMT 300 Business Communications I  
Credit 1.1 Lecture Hour.  
Proper techniques for writing major-specific business communications; progress report, memorandum, letter, executive summary; verbal communications via phone call and person-to-person communications; critiques of personal and peer writing.  
Prerequisites: ISYS 250; admission to upper division in Mays Business School.  
Cross Listing: SCMT 300/ISYS 300.  

ISYS 310 Network Communications and Infrastructure  
Credits 3.3 Lecture Hours.  
Concepts, technologies and applications of on-line and network-based systems; analysis and design of data communications; requirements in an information system environment; impact on business organizations; installation, configuration and management of virtual servers.  
Prerequisite: ISYS 250; admission to upper division in Mays Business School.  

ISYS 315 Database Programming  
Credits 3.3 Lecture Hours.  
Use and application of Structured Query Language (SQL); Database Management Systems (DBMS) in the solution of business problems; database programming.  
Prerequisites: ISYS 310; ISYS 320; or approval of instructor.  

ISYS 320 Business Systems Analysis and Design  
Credits 3.3 Lecture Hours.  
Techniques and methods currently used in system analysis and design including object oriented methods; use of automated tools to support systems development.  
Prerequisite: ISYS 250; admission to upper division in Mays Business School.  

ISYS 325 Business Object Oriented Programming with Java  
Credits 3.3 Lecture Hours.  
Introduction of abstract data types, inheritance, object identity, polymorphism as they relate to building business objects and business classes; use of Java programming language depicting the object orientation concepts; use of class libraries and Java packages for business object construction.  
Prerequisites: Admission to upper division in Mays Business School; ISYS 250.  

ISYS 400/SCMT 400 Business Communications II  
Credit 1.1 Lecture Hour.  
Development of critical interpersonal and oral communication skills; strategies for positive team development; conflict resolution; oral presentations and information elicitation; production of effective visual aids.  
Prerequisites: Senior classification; MISY majors only.  
Cross Listing: SCMT 400/ISYS 400.  

ISYS 410 Management of Information Systems  
Credits 3.3 Lecture Hours.  
Strategic management of information systems; change and risk management processes during information systems implementation; role of information systems to support business goals; writing business cases for request for proposals and responses; project management techniques.  
Prerequisite: ISYS 310; ISYS 320; or approval of instructor.  

ISYS 415 Information Systems Capstone Project  
Credits 3.3 Lecture Hours.  
Design and development of information system software based on technical specifications; multi-platform environment; database server and web server software deployment.  
Prerequisites: ISYS 315; ISYS 410; or approval of instructor.  

ISYS 420 Web-Enabled Applications  
Credits 3.3 Lecture Hours.  
Distributed business applications using the World Wide Web; advanced discussions of the concepts of internet, intranet, extranet; different methods to design web-enabled applications; active web applications; cutting edge website design; legacy to web integration; use of web-oriented languages.  
Prerequisites: ISYS 315.  

ISYS 425 Complex Business Application Design  
Credits 3.3 Lecture Hours.  
Business application development alternatives; COM and CORBA object models; use of Visual Basic; use of ActiveX controls, ActiveX Servers and ActiveX Documents.  
Prerequisites: ISYS 250; senior classification.  

ISYS 450 Business Intelligence and Data Mining  
Credits 3.3 Lecture Hours.  
Rationale for Business Intelligence and data mining through business case studies; lab training using data mining software; and process of data mining by using commercial data mining software on large data sets.  
Prerequisites: Grade of “C” or better in SCMT 303 or equivalent; junior or senior classification.  

ISYS 455 Business Information Security and Risk Management  
Credits 3.3 Lecture Hours.  
Examines the deployment and utilization of information technologies by businesses, governments and not for profit organizations to deliver services, with applications in banking and financial advisory services, healthcare, and federal, state and local governments.  
Prerequisite: ISYS 310.  

ISYS 460 E-Services  
Credits 3.3 Lecture Hours.  
Examines the deployment and utilization of information technologies by businesses, governments and not for profit organizations to deliver services, with applications in banking and financial advisory services, healthcare, and federal, state and local governments.  
Prerequisite: Senior classification in business or approval of instructor.  

ISYS 481 Information Systems Seminar  
Credit 1.1 Other Hour.  
Exposure to professional issues, contemporary information systems topics, potential MIS careers and employers. May be taken three times for credit.  
Prerequisite: Admission to upper division in Mays Business School; or approval of instructor.
ISYS 484 Management Information Systems Internship
Credits 1 to 4. 1 to 4 Other Hours.
A directed internship in an organization to provide students with a
learning experience supervised by professionals in organizational settings
appropriate to the student's professional objectives. Must be taken on a
satisfactory/unsatisfactory basis.
Prerequisites: Management Information Systems major and approval of academic advisor and instructor.

ISYS 485 Directed Studies
Credits 1 to 4. 1 to 4 Other Hours.
Directed study of selected problems in an area of management information
systems not covered in other courses.
Prerequisites: Admission to upper division in Mays Business School and approval of academic advisor and instructor.

ISYS 489 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours. 0 to 4 Lab Hours.
Selected topic in an identified field of management information systems.
Prerequisites: Admission to upper division in Mays Business School and approval of academic advisor and instructor.

ISYS 601 Fundamentals of Business Programming
Credits 3. 3 Lecture Hours.
Business Application Development using both procedural and object-
oriented programming techniques; use of component based software
design and development for distributed business software systems.
Prerequisite: Graduate business classification or approval of instructor.

ISYS 610 Business Data Communications
Credits 3. 3 Lecture Hours.
Concepts and technology of on-line and network-based systems in
business; analysis of data communication requirements, design, selection
and application of network technologies including wide and local area
networks, distributed processing, network architecture, and systems
management and control; software simulation projects emphasized.
Classification 6 students may not enroll in this course.
Prerequisites: Graduate classification.

ISYS 612 Management Information Systems
Credits 1 to 3. 1 to 3 Lecture Hours.
Concepts, theories, and the strategic role of information systems as
applied to business organizations; highly integrative/ crossed functional in
nature. Classification 6 students may not enroll in this course.
Prerequisite: Enrollment is limited to MBA students.

ISYS 615 Business Database Systems
Credits 3. 3 Lecture Hours.
Information processing and management involving applications and
user orientation in a business environment using commercially available
database management systems.
Prerequisite: Knowledge of one programming language.

ISYS 620 Systems Analysis and Design
Credits 3. 3 Lecture Hours.
Methodologies, techniques, and tools for information systems analysis
and design; the analysis and logical design of business processes and
management information systems focusing on the systems development
life cycle; techniques for logical system design.
Prerequisite: ISYS 615 or concurrent enrollment.

ISYS 622 Advanced Data Management
Credits 3. 3 Lecture Hours.
Data/database management and advanced SQL techniques; issues of
data security, backup and recovery, large scale databases, master data
management, concurrent user data access, scalability, and policies.
Prerequisites: ISYS 615 or equivalent; graduate classification in business.

ISYS 624 Advanced Systems Analysis and Design
Credits 3. 3 Lecture Hours.
Advanced topics in business systems analysis and design; alternative
methodologies such as agile development, extreme programming,
Rational Unified Process; Unified Modeling Language; bench marking and
best practices for systems development; cost/benefit analysis, estimation
and budgeting for business information systems; testing; patterns, domain-
driven design; process modeling; service-oriented architecture and cloud
computing.
Prerequisite: ISYS 620 or equivalent; graduate classification in business.

ISYS 630 MIS Project Management and Implementation
Credits 3. 3 Lecture Hours.
Advanced coverage of systems development topics with emphasis on the
management and implementation of business computing systems; group
project orientation to include feasibility analysis, alternative evaluation and
selection, and management approval; use of software engineering tools
where appropriate. Classification 6 students may not enroll in this class.
Prerequisite: ISYS 620.

ISYS 631 Information Systems Design and Development Project
Credits 3. 3 Lecture Hours.
Design and delivery of functional, multi-platform application system using
current technologies; user interface design emphasized; issues of mobile
device forms, software delivery, and development.
Prerequisites: Graduation classification; ISYS 622; ISYS 630.

ISYS 635 Business Information Security
Credits 3. 3 Lecture Hours.
Explores the business, managerial, and technological aspects of
information security; analysis, design, and implementation issues
surrounding effective information security; authentication, authorization,
availability, business continuity planning, confidentiality, disaster recovery,
encryption, firewalls, fraud protection, security policy development,
integrity, risk management, virus protection, VPNs and wireless security.
Classification 6 students may not enroll in this course.
Prerequisite: ISYS 610.

ISYS 637 Data Warehousing
Credits 3. 3 Lecture Hours.
Provides an understanding of the process by which a data warehouse
system is designed and developed along with the underlying concepts
and software systems; includes OLAP models and their differences with
standard OLTP models.
Prerequisite: ISYS 615 or approval of instructor.

ISYS 640 Information Systems Sourcing
Credits 3. 3 Lecture Hours.
Identify the challenges of information systems sourcing, as well as the
costs, risks, rewards, and strategies involved in sourcing situations; focus
on global sourcing of professional services, including IT, business process,
and knowledge process outsourcing; issues such as vendor management,
legal issues, distributed work teams, and comparing alternative sourcing
strategies.
Prerequisites: ISYS 624 or equivalent or approval of instructor; graduate classification in business.
ISYS 643 Corporate Information Planning  
Credits 3.3 Lecture Hours.  
Concepts regarding the design and use of computer-based management information and decision support systems; combinations of computing hardware and software and design concepts evaluated to meet managers' information needs. Classification 6 students may not enroll in this course.  
Prerequisites: ISYS 615 or equivalent or approval of instructor.

ISYS 645 IT Security Controls  
Credits 3.3 Lecture Hours.  
Familiarization with planning, design, and implementation of controls to minimize risks to business information; focus on the importance of managing business information security; introduction to the tools, concepts and theories to safeguard an organization's information systems and IT assets; understanding of cryptography and application, operations, and physical security.  
Prerequisite: ISYS 635.

ISYS 646 E-Services  
Credits 3.3 Lecture Hours.  
Examines the deployment and utilization of information technologies by businesses, governments and not-for-profit organizations to deliver services, with applications in banking and financial advisory services, healthcare, and federal, state and local governments.  
Prerequisite: ISYS 620.

ISYS 650 Business Data Mining  
Credits 3.3 Lecture Hours.  
Rationale for business Data Mining through case studies of business applications; process of data mining by using commercial Data Mining software on very large data sets; half of the course devoted to lab training in the use of Data Mining software including SAS Enterprise Miner and SPSS Clementine.  
Prerequisite: STAT 652 or approval of instructor.

ISYS 652 Customer Relationship Management and Technologies  
Credits 3.3 Lecture Hours.  
Theory and application of information technology in customer relationship management, construction of CRM infrastructures in organizations.  
Prerequisite: ISYS 615.

ISYS 654 E-Commerce Technologies  
Credits 3.3 Lecture Hours.  
Theory and application of constructing E-Commerce sites, including n-tier architecture and technologies, web servers, server interactions with databases, and transaction managers.  
Prerequisite: ISYS 615 or equivalent.

ISYS 655 Security Management and Compliance  
Credits 3.3 Lecture Hours.  
Familiarization with managerial and legal aspects of business information security; focus on importance of managing business information security and theories to help safeguard an organization's information systems and IT assets; understanding of Security Architecture and Design, Business Continuity and Disaster Recovery Planning, Laws Investigation and Ethics.  
Prerequisite: ISYS 635.

ISYS 656 Global Information Systems  
Credits 3.3 Lecture Hours.  
Impact and the central role of Information Systems (IS) on globalization of business; issues of deployment of information systems and technology in international commerce, global IS environmental variables such as technology, legal, political, economic, social and cultural. Classification 6 students may not enroll in this course.  
Prerequisite: ISYS 610 or equivalent, or approval of instructor.

ISYS 670 IT Consulting  
Credits 3.3 Lecture Hours.  
Concerns with the practice of IT consulting; and develops an understanding of consulting practices, business development and revenue management, client relationships, team-based knowledge, knowledge services, technology evaluation, selection and integration, collaboration tools, business process and organizational change, and large application implementations; involves a full semester client-based project.  
Prerequisites: ISYS 615, ISYS 620, and SCMT 660, and approval of instructor.

ISYS 684 Professional Internship  
Credits 1 to 6.1 to 6 Other Hours.  
A directed internship in an organization to provide students with on-the-job training with professionals in organizational settings appropriate to the student's professional objectives. May be repeated for credit. Classification 6 students may not enroll in this course.  
Prerequisite: Approval of committee chair and department head.

ISYS 685 Directed Studies  
Credits 1 to 4.1 to 4 Other Hours.  
Directed study on selected problems using recent developments in business research methods. Classification 6 students may not enroll in this course.  
Prerequisite: Approval of instructor and graduate advisor.

ISYS 686 Theory and Research in Management Information Systems  
Credits 3.3 Lecture Hours.  
Theory, applications and human and organizational issues of Management Information Systems (MIS); current academic research into the analysis, design and implementation of computer information systems. Classification 6 students may not enroll in this course.  
Prerequisites: Doctoral classification and approval of instructor.

ISYS 689 Special Topics in...  
Credits 1 to 4. 1 to 4 Lecture Hours. 0 to 4 Lab Hours.  
Selected topics in identified area of information systems, operations management or management science. Classification 6 students may not enroll in this course. May be repeated for credit.

**ITAL - Italian**

**Courses**

ITAL 101 Beginning Italian I  
Credits 4.3 Lecture Hours. 2 Lab Hours.  
(ITAL 1411, 1511) Beginning Italian I. Elementary language study with oral, written and reading practice; preparation for conversation; part of class preparation will be done in language laboratory.

ITAL 102 Beginning Italian II  
Credits 4.3 Lecture Hours. 2 Lab Hours.  
(ITAL 1412, 1512) Beginning Italian II. Continuation of ITAL 101; part of class preparation will be done in the language laboratory.  
Prerequisite: ITAL 101.

ITAL 201 Intermediate Italian I  
Credits 3.3 Lecture Hours.  
(ITAL 2311) Intermediate Italian I. Readings of average difficulty; review of grammar; practice in conversation and composition.  
Prerequisite: ITAL 102.
ITAL 202 Intermediate Italian II  
Credits 3. 3 Lecture Hours.  
(ITAL 2312) Intermediate Italian II. Continuation of ITAL 201 with more advanced material.  
Prerequisite: ITAL 201.  
ITAL 285 Directed Studies  
Credits 1 to 4. 1 to 4 Lecture Hours.  
Individual supervision of readings or assigned projects in Italian, selected for each student individually.  
Prerequisite: Approval of instructor and department head.  
ITAL 289 Special Topics In...  
Credits 1 to 4. 1 to 4 Lecture Hours.  
Selected topics in an identified area of Italian studies. May be repeated for credit.  
Prerequisite: Approval of instructor.  
ITAL 303 Composition and Conversation  
Credits 3. 3 Lecture Hours.  
Readings of contemporary Italian prose; intensive review of grammar and syntax; development of written and oral skills; expansion of vocabulary; translations, compositions and short presentation.  
Prerequisite: ITAL 202 or equivalent.  
ITAL 451/EURO 451 Introduction to Italian Culture  
Credits 3. 3 Lecture Hours.  
Introduction to the culture of the Italian Peninsula, from Middle Ages to present; study of major works of literature, political science, visual arts, music and cinema, to set Italy’s culture in its social and historical context; taught in English.  
Prerequisite: ITAL 201 or registration therein, or approval of instructor.  
Cross Listing: EURO 451/ITAL 451.  
ITAL 452/WGST 452 Women and Gender in Italian Literature  
Credits 3. 3 Lecture Hours.  
The historical and cultural dynamics forging the notion of woman and gender in Italian society and literature; discussion of films and theoretical texts concerning subjectivity and language, body and culture; taught in English.  
Prerequisite: ITAL 201 or registration therein or approval of instructor.  
Cross Listing: WGST 452/ITAL 452.  
ITAL 453/EURO 453 Italian Literature  
Credits 3. 3 Lecture Hours.  
Survey of Italian literature; focus on literary portrayal of reality in modern and contemporary Italian culture, the dialogue with the classical tradition, and literature's potential to affect and be affected by social critique; taught in English.  
Prerequisite: ITAL 201 or registration therein or approval of instructor.  
Cross Listing: EURO 453/ITAL 453.  
ITAL 454/EURO 454 Italian Drama  
Credits 3. 3 Lecture Hours.  
Study of Italian dramatic literature from the origins of Italian theater to the contemporary stage; analysis of the link between theater, opera, and film; taught in English.  
Prerequisite: ITAL 201 or registration therein or approval of instructor.  
Cross Listing: EURO 454/ITAL 454.  
ITAL 455/FILM 455 Italian Cinema  
Credits 3. 3 Lecture Hours.  
Survey of Italian cinema from Neorealism to the present; taught in English.  
Prerequisite: Junior or senior classification, or approval of instructor.  
Cross Listing: FILM 455/ITAL 455.  
ITAL 456/EURO 456 Contemporary Italy  
Credits 3. 3 Lecture Hours.  
Examination of changes in Italian society and culture since World War II, with focus on their narration and interpretation by representative authors and filmmakers, and on multicultural literary production in present-day Italy; taught in English.  
Prerequisite: ITAL 201 or registration therein or approval of instructor.  
Cross Listing: EURO 456/ITAL 456.  
ITAL 485 Directed Studies  
Credits 1 to 4. 1 to 4 Other Hours.  
Individual supervision of readings or assigned projects, selected for each student individually; written and oral reports.  
Prerequisite: Approval of instructor and department head.  
ITAL 692 Readings  
Credits 3. 3 Lecture Hours.  
Readings in Italian literary texts in the original language.  
Prerequisite: Graduate classification.  

JAPN - Japanese  

Courses  
JAPN 101 Beginning Japanese I  
Credits 4. 4 Lecture Hours. 2 Lab Hours.  
(JAPN 1411, 1511) Beginning Japanese I. Elementary language study with oral, written and reading practice; preparation for conversation; part of class preparation to be done in the language laboratory.  
JAPN 102 Beginning Japanese II  
Credits 4. 4 Lecture Hours. 2 Lab Hours.  
(JAPN 1412, 1511) Beginning Japanese II. Continuation of JAPN 101; part of class preparation to be done in the language laboratory.  
Prerequisite: JAPN 101.  
JAPN 110 Functional Japanese: History and Culture  
Credits 3. 3 Lecture Hours.  
Designed to complement beginning Japanese courses; emphasis on oral production and ability to function in a variety of real-life situations; includes survey of Japanese history.  
Prerequisite: Ability to read Hiragana and Katakana.  
JAPN 201 Intermediate Japanese I  
Credits 4. 4 Lecture Hours.  
(JAPN 2311) Intermediate Japanese I. Readings of average difficulty; review of grammar; practice in conversation and composition.  
Prerequisite: JAPN 102.  
JAPN 202 Intermediate Japanese II  
Credits 4. 4 Lecture Hours.  
(JAPN 2312) Intermediate Japanese II. Continuation of JAPN 201 with more advanced material.  
Prerequisite: JAPN 201.  
JAPN 285 Directed Studies  
Credits 1 to 4. 1 to 4 Other Hours.  
Individual supervision of readings or assigned projects in Japanese, selected for each student individually; written or oral reports.  
Prerequisite: Approval of instructor and Director of AALO.
JAPN 289 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Selected topics in an identified area of Japanese studies. May be repeated for credit.
Prerequisite: Approval of instructor.

JAPN 301 Upper Level Japanese I
Credits 3. 3 Lecture Hours.
Reading and listening practice using authentic and near-authentic materials; conversation practice in different levels of formality; composition and grammar; conducted in Japanese.
Prerequisite: JAPN 202.

JAPN 302 Upper Level Japanese II
Credits 3. 3 Lecture Hours.
Continuation of JAPN 301 with more advanced material.
Prerequisite: JAPN 301.

JAPN 401 Advanced Japanese I
Credits 3. 3 Lecture Hours.
Readings with selected grammar and kanji lessons; focus on Japanese traditional and popular culture, religion, and history; taught in Japanese.
Prerequisite: JAPN 302 or equivalent.

JAPN 402 Advanced Japanese II
Credits 3. 3 Lecture Hours.
Readings with selected grammar and kanji lessons; focus on Japanese private and business life, education, politics, and contemporary culture; taught in Japanese.
Prerequisite: JAPN 302 or equivalent.

JAPN 485 Directed Studies
Credits 1 to 4. 1 to 4 Other Hours.
Individual supervision of readings or assigned projects selected for each student individually; written or oral reports.
Prerequisite: Approval of instructor and Director of AALO.

JAPN 489 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Selected topics in an identified area of Japanese studies. May be repeated for credit.
Prerequisite: Approval of instructor.

JAPN 491 Research
Credits 1 to 4. 1 to 4 Other Hours.
Research in Japanese studies conducted under the direction of faculty member approved by the Director of AALO. May be taken 2 times for credit.
Prerequisites: Junior or senior classification and approval of instructor.

JOUR 102 American Mass Media
Credits 3. 3 Lecture Hours.
(COMM 1307) American Mass Media. Introductory survey of mass communication media, their history and social role, to provide an understanding of the development and importance of mass communication media in modern society.
Prerequisite: Freshman or sophomore classification, or approval of program director.

JOUR 200 Mass Media Information
Credits 3. 3 Lecture Hours.
Strategies and procedures in identifying, gathering, analyzing and organizing information for the mass media; sources and methods; evaluation and validation of evidence; legal and ethical considerations.
Prerequisites: JOUR 102 with a grade of B or better, 80 percent on the GSP test or SAT or ACT equivalent, 2.5 GPR or higher, and freshman or sophomore classification; or approval of program director.

JOUR 203 Media Writing I
Credits 3. 2 Lecture Hours. 3 Lab Hours.
(Comm 2311) Media Writing I. Basic journalistic techniques common to all media; integration of news gathering, writing and editing; ethics. Limited to minors in journalism, or with approval of program director.
Prerequisites: JOUR 102 and JOUR 200, freshman or sophomore classification and enrollment in journalism minor; or approval of program director.*

JOUR 215/COMM 215 Interviewing: Principles and Practices
Credits 3. 3 Lecture Hours.
Theory and practice of methods in selected interview settings; emphasis on communication between two persons, questioning techniques, and the logical and psychological bases of interpersonal persuasion.

JOUR 230/COMM 230 Communication Technology Skills
Credits 3. 3 Lecture Hours.
Introduction to interactive media and media literacy skills in the digital domain; survey of technology histories, standards, and markets for industries such as multichannel TV, digital radio, video games, streaming media, epublishing, teleconferencing, and social networking.
Prerequisites: Communication or telecommunication media studies majors.
Cross Listing: COMM 230/JOUR 230.

JOUR 250/COMM 250 New Media and the Independent Voice
Credits 3. 3 Lecture Hours.
Examination of new media as independent voices for cultural and political movements; principles governing the design, presentation, and evaluation of blogs as a persuasive medium in society.
Cross Listing: COMM 250/JOUR 250.

JOUR 291 Research
Credits 0 to 3. 0 to 3 Other Hours.
Research conducted under the direction of a chosen faculty member in Journalism Studies. May be repeated for a maximum of 3 hours total credit.
Prerequisites: Freshman or sophomore classification and approval of instructor.

JOUR 301/COMM 307 Mass Communication, Law and Society
Credits 3. 3 Lecture Hours.
Mass media as social institutions; social responsibility and ethics of the press; history, constitutional development, and law of the First Amendment.
Prerequisites: JOUR 102 and JOUR 200, junior or senior classification and enrollment in journalism minor; or approval of program director.
Cross Listing: COMM 307/JOUR 301.*

JOUR 303 Media Writing II
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Interpretative news gathering and writing for various media; basic communication law and ethics; assigned practice on campus or other publications.
Prerequisites: JOUR 203, junior or senior classification and enrollment in journalism minor; or approval of program director.*
JOUR 304 Editing for the Mass Media
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Principles and practice of editing including: improving and tightening print and broadcast copy; writing headlines, titles and subheads; photo editing and cutlines; graphics and layout.
**Prerequisites:** JOUR 203, junior or senior classification and enrollment in journalism minor; or approval of program director.*

JOUR 365/COMM 365 International Communication
Credits 3. 3 Lecture Hours.
Mass media, international, and cross-cultural audiences, theoretical, pragmatic, political and ethical issues; including cultural differences, comparative media systems, development, communication, patterns of world news flow, political propaganda, impact of international advertising and other issues.
**Prerequisite:** Junior or senior classification.
**Cross Listing:** COMM 365/JOUR 365.

JOUR 450 Political Reporting
Credits 3. 3 Lecture Hours.
Interviewing; reporting; and writing various types of political stories and commentary; exploration of ethical principles and issues in political reporting including role of free press in a democracy.
**Prerequisite:** Junior or senior classification or approval of instructor.

JOUR 451 Arts & Entertainment Journalism
Credits 3. 3 Lecture Hours.
Arts & Entertainment Journalism. Journalistic coverage of arts and entertainment issues and events; examination of reviews and feature stories; feature writing and criticism; extensive workshop experience; emphasis on the value of research, self-editing and revision.
**Prerequisite:** Junior or senior classification or approval of instructor.

JOUR 455 Literary Nonfiction
Credits 3. 3 Lecture Hours.
Explores the art of writing literary nonfiction, a major trend in 21st century journalism; examines several forms of literary nonfiction, including personal essay, memoir, historical biography and modern narrative: to be written in each form; provides extensive workshop experience; emphasizes the value of critiques, self-editing and revision.
**Prerequisite:** Junior or senior classification or approval of instructor.

JOUR 458/COMM 458 Global Media
Credits 3. 3 Lecture Hours.
Study of globalization through media ownership; content, flow, cultural values, political power and technological impact; implications of globalization for local economies and audiences.
**Prerequisite:** Junior or senior classification or approval of instructor.
**Cross Listing:** COMM 458/JOUR 458.

JOUR 484 Internship
Credits 0 to 3. 0 to 3 Other Hours.
Directed internship in a private firm or public agency to provide on-the-job experience appropriate to the student's degree program and career objectives. To be taken on a satisfactory/unsatisfactory basis. Maximum of 3 credits may apply toward degree.
**Prerequisites:** Enrollment in journalism minor, completion of most other journalism courses and approval of instructor.*

JOUR 485 Directed Studies
Credits 0 to 4. 0 to 4 Other Hours.
Research problems related to communication field. Individual work, fitted to special needs of specific student as determined by his or her interests and aptitude.
**Prerequisites:** Enrollment restricted to students completing the journalism minor and approval of the program director.*

JOUR 489 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Selected topics in an identified area of journalism and mass communication. May be repeated for credit.
**Prerequisites:** Enrollment restricted to students completing the journalism minor and approval of the program director.*

JOUR 490 Journalism as a Profession
Credits 3. 3 Lecture Hours.
Exit-level course for interdisciplinary minor in Journalism; requires students to produce publication-quality projects; includes seminars in contemporary news media issues and practices.
**Prerequisites:** Enrollment in journalism minor, completion of most other journalism courses; or approval of the program director.*

JOUR 491 Research
Credits 0 to 3. 0 to 3 Other Hours.
Research conducted under the direction of a chosen faculty member in Journalism Studies. May be repeated for a maximum of 3 hours total credit.
**Prerequisites:** Junior or senior classification and approval of instructor.

**KINE - Kinesiology**

**Courses**

**KINE 120 The Science of Basic Health and Fitness**
Credit 1. 1 Lecture Hour. 1 Lab Hour.
Overview of the human body; scientific fundamentals of stress, fitness, nutrition, disease and drug use; interdisciplinary focus on wellness and longevity; integrated physical activity experiences centering on principles and applications of the scientific basis of conditioning; not open to students who have taken KINE 223.

**KINE 121 Physical and Motor Fitness Assessment**
Credits 2. 1 Lecture Hour. 2 Lab Hours.
Assessment of individual physical fitness and motor ability profiles for students majoring in kinesiology.
**Prerequisite:** Kinesiology major.

**KINE 167 Visual and Performing Arts—Jazz Dance II**
Credit 1. 2 Lab Hours.
(DANC 1148) Visual and Performing Arts—Jazz Dance II. Intermediate study of jazz dance; review of historical background and cultural heritage; includes several jazz styles; proper body mechanics and alignment; placement exam required on the second day of class.
**Prerequisite:** Beginning jazz dance or approval of instructor.

**KINE 175 Gender Neutral Partnering**
Credit 1. 2 Lab Hours.
Explores the fundamental principles of partnering; explores the properties of momentum, weight sharing, contact improvisation, breath, timing and trust; develops movement phrases on the principles of impromptu and partnering.
**Prerequisite:** DCED 172 or approval of instructor.

**KINE 198 Health and Fitness Activity**
Credit 1. 2 Lab Hours.
(PHED 1164, 1238) Health and Fitness Activity. (0-2) Half lecture; half activity; student choice of designated fitness or strength related activities; lecture portion covers current health topics.
KINE 199 Required Physical Activity  
Credit 1. 2 Lab Hours.  
(Any 1-hour PHED activity course) Required Physical Activity. (0-2)  
Selection from a wide variety of activities designed to increase fitness and/or encourage the pursuit of lifetime activity.

KINE 201 Pilates Apparatus  
Credits 2. 2 Lecture Hours.  
Study of Pilates apparatus work as designed by Joseph H. Pilates; basic principles of Pilates including breathing, pelvic and ribcage placement, scapulae stabilization, head and cervical alignment; uses apparatuses such as reformer, cadillac, chair, and barrel; incorporates the use of props such as rollers, mini balls, physioballs, blocks, therabands and pinky balls into apparatus work. May be taken 2 times for credit.  
Prerequisites: KINE 198--Pilates Mat I; dance science track majors only or approval of instructor.

KINE 213 Foundations of Kinesiology  
Credits 3. 3 Lecture Hours.  

KINE 214/HLTH 214 Health and Physical Activity for Children  
Credits 3. 3 Lecture Hours.  
(PHED 1331) Health and Physical Activity for Children. Coordinated school health and physical activity programs appropriate for elementary aged children; focus on the content of the curriculum and the philosophical underpinnings of programming related to health and physical activity.  
Prerequisite: KINE 198.  
Cross Listing: HLTH 214/KINE 214.

KINE 215 Fundamentals of Coaching  
Credit 1. 1 Lecture Hour.  
(PHED 1321,1322) Fundamentals of Coaching. Study modern theories and applications related to coaching; philosophies, styles, techniques, team organization, liability and administration.  
Prerequisite: Kinesiology majors and coaching minors only.

KINE 223 Introduction to the Science of Health and Fitness  
Credits 3. 2 Lecture Hours. 2 Lab Hours.  
Overview of the human body systems; interdisciplinary focus on wellness, fitness, nutrition, disease, drug use; integrated physical activity centering on principles and applications of conditioning; collect data, evaluate information, formulate plans based on findings; experience with pedometers, heart rate monitors, bioelectrical impedance devices, software and other technology. Not open to students who have taken KINE 120.

KINE 240/HLTH 240 Computer Technology in Health and Kinesiology  
Credits 3. 2 Lecture Hours. 2 Lab Hours.  
Application of current technology in the areas of health and kinesiology; fundamentals of computers and their use; application of commercial software to health and kinesiology settings; use of computer networks for communications and research.  
Prerequisite: Freshman or sophomore classification in health or kinesiology.  
Cross Listing: HLTH 240/KINE 240.

KINE 260 Movement Lab: Ballet I  
Credits 2. 0 Lecture Hours. 5 Lab Hours.  
Understand body alignment through ballet technique; assess individual muscular and skeletal imbalances during a ballet technique class; video references of proper body alignment; anatomical explanation and assessment of individual's use of lateral rotation in ballet technique. May be taken 3 times for credit.  
Prerequisites: DCED 160; dance science majors, dance concentration majors and dance minors; or approval of instructor.

KINE 271 Movement Lab: Modern Dance I  
Credits 2. 0 Lecture Hours. 5 Lab Hours.  
Understand body alignment through modern dance; assess individual muscular and skeletal body imbalances during a modern dance class; introduction of how to work with imbalances in the body while executing proper dance technique; understand the structural and muscular alignment of parallel versus lateral rotation. May be taken 3 times for credit.  
Prerequisites: DCED 171; dance science majors, dance concentration majors and dance minors; or approval of instructor.

KINE 285 Directed Studies  
Credits 0 to 4. 0 to 4 Other Hours.  
Work on a specified topic with the intent of promoting independent reading, research and study; supplement existing course offerings or subjects nor presently covered.  
Prerequisites: Freshman or sophomore classification; approval of instructor.

KINE 289 Special Topics in...  
Credits 0 to 4. 0 to 4 Lecture Hours.  
Selected topics in an identified area of kinesiology. May be repeated for credit.

KINE 291 Research  
Credits 0 to 4. 0 to 4 Other Hours.  
Research conducted under the direction of faculty member in kinesiology. May be repeated 4 times for credit.  
Prerequisites: Freshman or sophomore classification and approval of instructor.

KINE 302 Applied Exercise Physiology for Coaches  
Credit 1. 1 Lecture Hour.  
Survey of the physiology of exercise with an emphasis on topics in applied physiology that coaches should understand in working with student athletes of both genders and different ages.  
Prerequisites: KINE 306; junior or senior classification or approval of instructor.

KINE 305 Sport Nutrition  
Credits 3. 3 Lecture Hours. 0 Lab Hours.  
Optimal nutritional intake in support of peak performance in sport and dance; food as fuel and which fuels are most important to specific sport/dance activities; the role nutritional supplements can play; fluid balance; weight management for athletes and dancers.  
Prerequisites: NUTR 202 or equivalent or approval of instructor; junior or senior classification.

KINE 306 Functional Anatomy for Coaches  
Credit 1. 2 Lab Hours.  
Introduction to musculoskeletal anatomy and movement analysis and the applications of these topics to basic sport skills.  
Prerequisite: Junior or senior classification or approval of instructor.
KINE 307 Lifespan Motor Development
Credits 3. 3 Lecture Hours.
Developmental characteristics and contemporary issues associated with motor behavior across the lifespan.
Prerequisite: Junior or senior classification or approval of instructor.

KINE 308 Integrated Adventure Education
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Philosophy of outdoor education in a physical education program; designing and implementing outdoor adventure activities in an experiential and interdisciplinary manner for reinforcing the Texas Essential Knowledge and Skills.
Prerequisites: Junior or senior classification or instructor approval.

KINE 311 Fundamental Rhythms and Dance
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Theory and practice in fundamental rhythms and dance as appropriate for elementary and secondary school curricula.
Prerequisite: Approval of instructor.

KINE 312 Coaching of Baseball
Credits 2. 1 Lecture Hour. 2 Lab Hours.
Theory and practice of coaching fundamentals in baseball.
Prerequisite: KINE 215.

KINE 317 Coaching of Football
Credits 2. 1 Lecture Hour. 2 Lab Hours.
Theory and practice of coaching fundamentals in football.
Prerequisite: KINE 215.

KINE 318 Athletic Injuries
Credits 3. 3 Lecture Hours.
Introduction to the profession of athletic training; comprehensive analysis of the theories and practices in preventing, recognizing and treating common athletic injuries.
Prerequisites: HLTH 216; BIOL 319; BIOL 320; junior or senior classification.

KINE 320 Advanced Athletic Injuries
Credits 3. 3 Lecture Hours.
Principles and procedures of therapeutic modalities, therapeutic exercise and rehabilitation as they relate to physical education, athletic training and physical therapy.
Prerequisites: KINE 318 and approval of instructor.

KINE 321 Coaching of Volleyball
Credits 2. 1 Lecture Hour. 2 Lab Hours.
Coaching fundamentals in volleyball.
Prerequisites: KINE 215 and KINE 199-Volleyball or approval of instructor.

KINE 351 Coaching of Basketball
Credits 2. 1 Lecture Hour. 2 Lab Hours.
Theory of fundamental skills needed to coach basketball with emphasis on knowledge of rules, strategies and skill analysis.
Prerequisites: KINE 215 and KINE 199-Basketball or approval of instructor.

KINE 355 Coaching of Track
Credits 2. 1 Lecture Hour. 2 Lab Hours.
Theory and practice of coaching fundamentals in track and field events.
Prerequisite: KINE 215.

KINE 356 Advanced Coaching
Credits 2. 1 Lecture Hour. 2 Lab Hours.
Self evaluation of correct body alignment and imbalances while executing proper ballet technique; observation and assessment of the student's progression throughout the semester in regards to proper alignment and technique. May be taken 3 times for credit.
Prerequisite: DCED 161; dance science majors, dance concentration majors and dance minors; or approval of instructor.

KINE 372 Movement Lab: Modern Dance II
Credits 2. 0 Lecture Hours. 5 Lab Hours.
Self evaluation of correct body alignment and imbalances while executing proper modern dance technique; observation and assessment of the student's progression throughout the semester in regards to proper alignment and technique. May be taken 3 times for credit.
Prerequisite: DCED 172; dance science majors, dance concentration majors and dance minors; or approval of instructor.

KINE 386 Sport Physiology
Credits 3. 3 Lecture Hours.
Scientific physiological principles as they relate to sport and exercise in the preparation of current and future coaches; emphasis on cognitive, physiological knowledge and practical applications necessary to earn a creditable national certification; safely and effectively train athletic, fitness and general populations.
Prerequisites: KINE 121, KINE 213 and KINE 302; junior or senior classification.

KINE 403 Dance Wellness
Credits 3. 3 Lecture Hours.
Using scientific methods to evaluate the dancer's body; implementation of dance screening process and creation of programs to address specific dance related injuries, imbalances or misalignments; study of current research in dance medicine/science and application of this knowledge to increase longevity of movement.
Prerequisites: BIOL 319, BIOL 320; dance science track majors only; admittance into the professional phase or approval of instructor; junior or senior classification.

KINE 404 Coaching Psychology
Credits 3. 3 Lecture Hours.
Mental aspects of coaching for performance improvement in athletic and exercise settings; focus on coaching applications of theoretical concepts including individual differences, motivation, team and group dynamics, leadership, performance enhancement, positive and negative health behaviors and youth development.
Prerequisite: Junior or senior classification, or approval of instructor.

KINE 406 Motor Learning and Skill Performance
Credits 3. 3 Lecture Hours.
Learning in psychomotor domain; motor learning theories, physiological bases of skill behavior, motor and skill learning, state of performer and application of instructional techniques in motor learning and skill performance.
Prerequisites: Junior or senior classification; admission to professional phase of program or approval of instructor for non-kinesiology majors.

KINE 425 Tests and Measurements
Credits 3. 3 Lecture Hours.
Comprehensive examination of the conceptual and theoretical aspects of measurement and evaluation in the field of kinesiology; emphasis on the application of statistical techniques germane to measurement and evaluation.
Prerequisites: Junior or senior classification; or approval of instructor for non-majors.
KINE 426 Exercise Biomechanics
Credits 4. 3 Lecture Hours. 3 Lab Hours.
An integrated, mechanistic study of biomechanics of human motion during physical activity and exercise; biology and mechanical properties of the human movement system including bones, tendons, ligaments, cartilage, skeletal muscles, joints and whole body systems investigated.
Prerequisites: PHYS 201, BIOL 319, BIOL 320; junior or senior classification; admission to the professional phase of program or approval of instructor for non-majors.

KINE 427 Therapeutic Principles
Credits 3. 3 Lecture Hours.
Examination of human tissue types, characteristics, and physiology pertaining to injury, pain transmission, and the healing process; study of common therapeutic modalities such as ultrasound and electricity with emphasis on physiological mechanisms of effect.
Prerequisites: Junior or senior classification; admission to the professional phase of program or approval of instructor for non-kinesiology majors.

KINE 429 Adapted Physical Activity
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Kinesiology for individuals with handicapping conditions; emphasis on cognitive recognition of such handicaps as postural deviations, emotional disturbances, convulsive disorders, vision and auditory problems, and other learning disability conditions.
Prerequisite: Admission to professional phase of program or approval of instructor for non-majors.

KINE 431 Ropes Course and Group Process
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Techniques of group facilitation for initiatives of ropes/challenge course events; activity presentation and sequencing, safety techniques and construction principles, and processing experiences for transfer of learning.
Prerequisite: Junior or senior classification; approval of instructor.

KINE 433 Physiology of Exercise
Credits 3. 3 Lecture Hours.
Physiological bases of exercise and physical conditioning; measurement of metabolic efficiency during exercise, neuromuscular efficiency and body composition.
Prerequisites: BIOL 319, BIOL 320, junior or senior classification; admission to the professional phase of program or approval of instructor for non-majors.

KINE 434 Advanced Exercise Physiology
Credits 3. 3 Lecture Hours.
Investigates mechanisms responsible for skeletal muscle power production during exercise and the energetic support for the muscles through intermediary metabolism and oxygen flux from the lungs to the muscle mitochondria; examines the effects of training on these processes.
Prerequisites: KINE 433; junior or senior classification.

KINE 439 Exercise Evaluation and Prescription
Credits 4. 3 Lecture Hours. 3 Lab Hours.
Prerequisites: KINE 433; senior classification; admission to the professional phase of program or approval of instructor for non-kinesiology majors.

KINE 462 Movement Lab: Ballet III
Credits 2. 0 Lecture Hours. 5 Lab Hours.
Peer evaluation of body alignment, imbalances and biomechanics of movement; explanation of kinesthetic principles and injury prevention through ballet technique; conditioning programs for a peer’s imbalances and improper technique in a ballet class. May be taken 3 times for credit.
Prerequisites: DCED 162; dance science majors, dance concentration majors and dance minors; or approval of instructor.

KINE 473 Movement Lab: Modern Dance III
Credits 2. 0 Lecture Hours. 5 Lab Hours.
Peer evaluation of body alignment, imbalances and biomechanics of movement; explanation of kinesthetic principles and injury prevention through modern dance technique; develop conditioning program for a peer’s imbalances and improper technique in a modern dance class. May be taken 3 times for credit.
Prerequisites: DCED 173; dance science majors, dance concentration majors and dance minors; or approval of instructor.

KINE 482 Seminar
Credit 1. 1 Lecture Hour.
Acquaint students with current research and the research process in their chosen field of study (kinesiology). May be taken four times for credit. Must be taken on a satisfactory/unsatisfactory basis.
Prerequisites: Admission to professional phase of program or approval of instructor; junior or senior classification.

KINE 483 Practicum in Kinesiology
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Participation and study in the areas of fitness assessment, exercise and/or sport programming, and fitness/sport administration; acquisition and practice of professional and/or clinical skills in kinesiology.
Prerequisites: KINE 199 (Aerobic Movement); senior classification; admission to the professional phase; approval of instructor.

KINE 484 Internship in Kinesiology
Credits 0 to 12. 0 to 12 Other Hours.
Supervised internship with corporate fitness centers, rehabilitation centers, hospitals, recreation centers and similar agencies and organizations.
Prerequisites: KINE 483; completion of all coursework.

KINE 485 Directed Studies
Credits 0 to 4. 0 to 4 Other Hours.
Special problems in kinesiology assigned to individual students or to groups.
Prerequisites: Junior or senior classification; approval of instructor.

KINE 489 Special Topics in...
Credits 0 to 4. 0 to 4 Lecture Hours.
Selected topics in an identified area of kinesiology. May be repeated for credit.

KINE 491 Research
Credits 0 to 4. 0 to 4 Other Hours.
Research conducted under the direction of faculty member in kinesiology. May be repeated 4 times for credit.
Prerequisites: Junior or senior classification and approval of instructor.

KINE 601 Reading Research Publications in Kinesiology
Credits 3. 3 Lecture Hours.
Instruction in, and development of, research skills through the study of published reports and readings in kinesiology.
KINE 606 Motor Neuroscience I  
Credits 3.3 Lecture Hours.  
Neurophysiology of the neuromuscular system with emphasis on motor control; topics include organization of the CNS; reflexes; integration of sensory information; experimental approaches to study neuromuscular control and neurophysiology of contemporary motor control theories.  
Prerequisite: KINE 406 or equivalent.

KINE 622 Supervision of Health and Kinesiology  
Credits 3.3 Lecture Hours.  
Principles and processes of supervision; in-service training of personnel.

KINE 623 Administration of Health and Kinesiology  
Credits 3.3 Lecture Hours.  
Administration of comprehensive programs of kinesiology in higher education settings.

KINE 624 Pedagogical Research in Teaching/Physical Education  
Credits 3.3 Lecture Hours.  
Examine pedagogical research in education and relate to the specialty area of physical education; study key research paradigms that now influence inquiry in physical education and link to current practices in effective teaching.

Prerequisites: Graduate classification and approval of instructor.

KINE 626 Exercise for Clinical Population  
Credits 3.3 Lecture Hours.  
Principles relevant to exercise programming for persons with chronic disease/disability; includes information for each condition: pathophysiology, effect on exercise response, effects of exercise on disease process, and recommendation for exercise testing and programming.

Prerequisite: KINE 433 or instructor approval.

KINE 628 Nutrition in Sport and Exercise  
Credits 3.3 Lecture Hours.  
Interaction between nutrition, exercise, and athletic performance; including: biochemical and physiological aspects of nutrition and exercise; nutrition for training and competition; exercise and oxidant stress; nutritional supplements and ergogenic acids; and nutritional aspects of body composition and weight control.

Prerequisite: Graduate classification; BIOL 320; KINE 433 or approval of instructor.

KINE 629 Physiology of Strength and Conditioning  
Credits 3.3 Lecture Hours.  
Physiological, bio-mechanical, and metabolic aspects of muscular strength and conditioning programs for various athletic and non-athletic populations; review of resistance training based on scientific literature; promote the use of a structured scientific approach in the prescription of progressive resistance training.

Prerequisite: Graduate classification; BIOL 320; KINE 433 or approval of instructor.

KINE 631 Specialized Strength and Conditioning Techniques  
Credits 3.3 Lecture Hours.  
Research based physiological responses and adaptations associated with power, speed, quickness, flexibility and mobility; laboratory demonstration/implementation and specific practical experiences based on available scientific research. Practical mastery as well as theoretical understanding required.

Prerequisite: KINE 629 or approval of instructor.

KINE 637 Exercise Physiology I  
Credits 3.3 Lecture Hours.  
Functional changes brought about by acute and chronic exercise; topics include muscle structure/function, energy transduction, biochemistry of exercise, muscle mechanics, fatigue and adaptation.

Prerequisite: KINE 433 or equivalent.

KINE 638 Exercise Physiology II  
Credits 3.3 Lecture Hours.  
Functional changes brought about by acute and chronic exercise; topics include pulmonary and cardiovascular physiology, training and detraining, and special topics.

Prerequisite: KINE 433 or equivalent.

KINE 639 Exercise Electrocardiography  
Credits 3.3 Lecture Hours.  
Electrocardiography (ECG) for the exercise scientist; emphasis on recognition and interpretation of normal and aberrant ECG patterns encountered during the graded exercise test; physiologic mechanisms underlying the normal and abnormal ECG.

Prerequisites: KINE 638 and 648 or approval of instructor.

KINE 640 Motor Neuroscience II  
Credits 3.3 Lecture Hours.  
Contemporary theories of motor learning that link behavioral analysis to underlying neural correlates of control; topics include memory; physical, mental and observational practice; internal models, motor planning-programming; and self-organization in perception-action systems; emphasis on cognitive and behavioral neuroscience.

Prerequisite: KINE 406 or equivalent.

KINE 641 Motor Neuroscience: Development Issues  
Credits 3.3 Lecture Hours.  
Explores the contemporary developmental issues associated with motor behavior (perception to action) across the lifespan; topics include physical and neurological growth, perception, motor control, and environmental influence.

Prerequisite: KINE 307 or equivalent.

KINE 642 Self-organization in Motor Neuroscience  
Credits 3.3 Lecture Hours.  
Application of the concepts of non-linear dynamical systems theory and self-organization to the study of biological motion and learning; topics include perception-action coupling, phrase transitions and stability, sensori-motor transformations.

Prerequisites: KINE 406 and KINE 641.

KINE 646 Fundamentals of Space Life Sciences  
Credits 3.3 Lecture Hours.  
Integrates nutrition, physiology, and radiation biology to define major biological problems in long duration space flight; provide an overview of the problems of bone loss, muscle wasting, and radiation-enhanced carcinogenesis along with potential countermeasures; focus on nutritional interventions and exercise protocols.

Cross Listing: NUTR 646 and NUEN 646.

KINE 647 Instrumentation and Techniques in Exercise Physiology I  
Credits 2.1 Lecture Hour. 3 Lab Hours.  
Theory, experiments and demonstrations in exercise physiology; laboratory experience in the use of metabolic and biochemical instrumentation commonly found in a modern exercise physiology laboratory.

Prerequisite: Concurrent enrollment in KINE 637.
KINE 648 Instrumentation and Techniques in Exercise Physiology II
Credits 2. 1 Lecture Hour. 3 Lab Hours.
Theory, experiments and demonstrations in exercise physiology; laboratory experience in the use of metabolic and biochemical instrumentation commonly found in a modern exercise physiology laboratory. A continuation of KINE 647.
Prerequisite: KINE 637 or concurrent enrollment.

KINE 649 Applied Exercise Physiology
Credits 3. 3 Lecture Hours.
Investigate how the acute physiological responses to exercise and the chronic physiological adaptations to exercise training are altered by environmental factors--heat, cold, altitude, and microgravity, and by age and sex; addresses the physiological bases for reducing the risk of cardiovascular, metabolic and bone disease through physical activity.
Prerequisite: KINE 433 or equivalent.

KINE 681 Seminar
Credit 1. 1 Lecture Hour.
Reports and discussions of topics of current interest in kinesiology.

KINE 682 Seminar in...
Credit 1. 1 Other Hour.
Reports and discussions of topics of current interest in kinesiology. Students may register in up to but not more than four sections of this course in the same semester.

KINE 683 Practicum in Kinesiology
Credits 3. 3 Other Hours.
Observation and study of rehabilitation and kinesiology programs in schools and other institutions. May be repeated twice for credit.
Prerequisite: Approval of department head.

KINE 684 Professional Internship
Credits 1 to 6. 1 to 6 Other Hours.
Supervised experiences in application of formal training to performing professional functions consistent with career goals.
Prerequisites: 12 semester hours of selected graduate work; approval of department head.

KINE 685 Directed Studies
Credits 1 to 12. 1 to 12 Other Hours.
Directed study of selected problems in kinesiology not related to thesis. May be repeated for credit.
Prerequisite: Approval of department head.

KINE 689 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours. 0 to 4 Lab Hours.
Selected topics in an identified area of kinesiology. May be repeated for credit.
Prerequisite: Approval of department head.

KINE 690/HLTH 690 Theory of Research in Discipline
Credits 3. 3 Lecture Hours.
Theory and design of research problems and experiments in various subfields of the discipline; communication of research proposals and results; evaluation of current research of faculty and students and review of current literature. May be repeated for credit.
Cross Listing: HLTH 690/KINE 690.

KINE 691 Research
Credits 1 to 23. 1 to 23 Other Hours.
Research for thesis or dissertation.
Prerequisite: Approval of committee chair.

Courses

KNFB 222/HEFB 222 Teaching and Schooling in Modern Society
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Developing an understanding of students in multiple settings and levels; development, structure, history, finance, and management of schools in a democratic society; philosophical, ethical and moral dimensions of teaching; professional role of teacher.
Prerequisite: Majors only; junior or senior classification.
Cross Listing: HEBF 222/KNFB 222.

KNFB 315 Elementary School Physical Activities
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Physical activities, materials and curriculum in elementary schools.
Prerequisite: Junior or senior classification; admission to the professional phase of program.

KNFB 324 Technology and Teaching Skills for the 21st Century Learner
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Preparation of future Health and Physical Education teachers with practical skills related to: technology in the classroom/gymnasium, strategies for addressing urban education and English language learners, liability, management and classroom discipline, development of professional communication skills and time management; includes field based experiences in diverse classroom settings.
Prerequisites: KNFB 222/HEFB 222; junior or senior classification; admission to the professional phase of program.

KNFB 325/HEFB 325 Introduction to Secondary School Teaching
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Introduce fundamental teaching skills and theories necessary for preparing reflective teachers; examine classroom management, learning strategies and assessment techniques; classroom lectures combined with field-based experiences to link theory into practice.
Prerequisites: KNFB 324, admission to professional phase of program; junior or senior classification.
Cross Listing: HEFB 325/KNFB 325.

KNFB 416 Middle and Secondary School Physical Activities
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Physical activities, teaching strategies, media techniques and curriculum in middle and secondary schools.
Prerequisites: Admission to professional phase of program; approved acceptance to field experience.

KNFB 450 Supervised Student Teaching
Credits 6. 6 Other Hours.
Observation and participation in an accredited public school classroom; techniques of teaching student's teaching fields, and appropriate instructional strategies for assigned student population.
Prerequisites: Admission to professional phase of program and to student teaching.

LAND - Landscape Architecture
Courses

LAND 200/URPN 200 Introduction to Landscape Architectural Practice
Credit 1. 1 Lecture Hour.
Explores and evaluates the diversity of landscape architectural practice; defines the traditional practice forms and examines evolving and boundary expanding opportunities for future practice; introduces the departmental curriculum and faculty.
Cross Listing: URPN 200/LAND 200.*

LAND 240 History of Landscape Architecture
Credits 3. 3 Lecture Hours.
Introduction to history of land use, urban design and planning, and site design from prehistory to the present in Europe, Asia, Africa and Australia; contemporary issues in landscape architecture such as sustainability, ecological design, and professional roles, both historically and at present, with comparisons to American examples.
Prerequisite: Sophomore classification or higher.*

LAND 254 Landscape Architecture Communications I
Credits 3. 2 Lecture Hours. 4 Lab Hours.
Introduction to basic drafting and drawing required for landscape architecture projects, introduction to basic concepts, principles of graphic composition and pencil sketching techniques.

LAND 255 Landscape Architectural Communications II
Credits 3. 2 Lecture Hours. 4 Lab Hours.
Advanced study in traditional and computer-based communication techniques in landscape architecture including studio explorations in concept and analysis graphics, color sketching, perspective drawing and rendering, desktop publishing, image capturing and manipulation, and compilation of graphic presentations; lecture, demonstrations and studio assignments.
Prerequisite: LAND 254 or approval of instructor.*

LAND 291 Research
Credits 1 to 4. 1 to 4 Other Hours.
Research conducted under the direction of faculty member in landscape architecture. May be repeated 2 times for credit.
Prerequisites: Freshman or sophomore classification and approval of instructor.

LAND 301 Landscape Architecture
Credits 3. 3 Lecture Hours.
Relevant theoretical discourse in landscape architecture, urban planning and urban design; urban theory, social and cultural theory; critical and creative thinking; ecological planning and design; design process and sustainable development; environmental philosophy and environmental aesthetics.
Prerequisite: Junior classification or approval of instructor.

LAND 318 Landscape Design I
Credits 4. 2 Lecture Hours. 7 Lab Hours.
Beginning studio course in land design; forces that produce useable three-dimensional site-space relationships; problems presented to give a basic knowledge, scope and application of landscape architecture design principles. Overnight field trip required.
Prerequisites: LAND 255; junior or senior classification or approval of instructor.

LAND 319 Landscape Design II
Credits 4. 2 Lecture Hours. 7 Lab Hours.
Continuation of LAND 318; basic design principles that combine natural systems (such as landform, water, vegetation, wildlife habitat, soils, climate) and human-built systems (such as roads, building utilities).
Prerequisites: LAND 318 and LAND 329.

LAND 320 Landscape Design III
Credits 5. 2 Lecture Hours. 9 Lab Hours.
Design process, synthesis and design refinement; problems to stimulate highly creative self-motivated results, design thinking to integrate behavioral settings into natural and/or built landscape systems.
Prerequisites: LAND 319 and LAND 330; junior or senior classification.*

LAND 321 Landscape Design IV
Credits 5. 2 Lecture Hours. 9 Lab Hours.
Continuation of LAND 320; land design projects of increased complexity with site scale problems used to demonstrate complete design thought. One or more field trips may be required as part of the course.
Prerequisite: LAND 320.*

LAND 329 Landscape Construction I
Credits 4. 2 Lecture Hours. 4 Lab Hours.
First construction studio course; aspects of site engineering and consideration of earth bound elements in land development; contours, landform, grading design, drainage principles, cut and fill computations, basic hydraulics and hydrology, stormwater management.
Prerequisite: Junior or senior classification or approval of instructor.

LAND 330 Landscape Construction II
Credits 3. 2 Lecture Hours. 4 Lab Hours.
Second construction studio course; essential construction materials and systems applied in landscape development; topics include statics and mechanics of simple structures; properties and procedures of wood, masonry and concrete construction; construction sequencing and material costs; development of a construction document package required. Construction observation field trips required.
Prerequisites: LAND 318 and LAND 329; junior or senior classification.*

LAND 331 Landscape Construction III
Credits 4. 2 Lecture Hours. 4 Lab Hours.
Third construction studio course; sustainable water management techniques in landscape development; theory, principles and techniques of low impact development; construction document preparation, working drawings, project layout and design; theory and principles of irrigation and lighting design. Field trips required.
Prerequisites: LAND 320 and LAND 330; junior or senior classification.*

LAND 340 Development of Landscape Architecture in North America
Credits 3. 3 Lecture Hours.
Interaction between people and the land in North America from first settlement to the present; settlement patterns, sustainable land use, urban design and plan, and site design in context of cultural, social, and technological factors; current issues in landscape architecture, landscape urbanism, and land-use planning.
Prerequisite: Junior and senior classification or approval of instructor.

LAND 421 Landscape Design VI
Credits 5. 2 Lecture Hours. 9 Lab Hours.
Advanced study and research designed to take the student beyond the core design experience; introduction of issues, methodologies, tools and techniques developing in professional practice.
Prerequisite: LAND 321.*
LAND 442 Professional Practice
Credits 3. 3 Lecture Hours.
Procedures, management and ethical frameworks in which professional landscape architectural practice occurs; topics include forms of practice, employment, proposal preparation, fee and contract structures, project management, roles of the landscape architect, presentations and public participation, legal and ethical responsibilities.
Prerequisites: Senior classification; approval of instructor.*

LAND 484 Summer Internship
Credits 0. 0 Lecture Hours.
Practical experience in an office of design allied professionals; 10 week internship with a minimum of 400 hours; continuous employment; departmental pre-approval through the department internship coordinator required. Must be taken on a satisfactory/unsatisfactory basis.
Prerequisites: Upper level classification and approval of internship coordinator; LAND 321.

LAND 485 Directed Studies
Credits 1 to 6. 1 to 6 Other Hours.
Special problems in various phases of landscape architecture assigned to individual students or to groups. Consultation and assigned collateral reading.
Prerequisite: Approval of department head.*

LAND 489 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Selected topics in an identified field of landscape architecture. May be repeated for credit.*

LAND 491 Research
Credits 1 to 4. 1 to 4 Other Hours.
Research conducted under the direction of faculty member in landscape architecture. May be repeated 2 times for credit.

LAND 494 Internship
Credits 6. 6 Lecture Hours.
An internship (15 week, 600 hours) with a landscape architecture or landscape architecture-related company that exposes the student to landscape architectural professional practice; monthly reports, final internship portfolio and internship supervisor assessment letter required; distance education course with non-resident status.
Prerequisites: Junior or senior classification and approval of instructor.

LAND 493 Directed Study
Credits 5. 2 Lecture Hours. 9 Lab Hours.
Special problems in various phases of landscape architecture assigned to individual students or to groups. Consultation and assigned collateral reading?
Prerequisite: Approval of department head.*

LAND 494 Internship
Credits 6. 6 Lecture Hours.
An internship (15 week, 600 hours) with a landscape architecture or landscape architecture-related company that exposes the student to landscape architectural professional practice; monthly reports, final internship portfolio and internship supervisor assessment letter required; distance education course with non-resident status.
Prerequisites: Junior or senior classification and approval of instructor.

LAND 601 Landscape Architectural Design Theory and Application I
Credits 5. 2 Lecture Hours. 9 Lab Hours.
First design studio course for career-change students; basic theories, principles, applications of landscape architectural design; design process; context-sensitive design; evidence based design; form-making skills; form-function-meaning relationships; spatial scale and dimensions; elements of natural and built environments; behavioral, psychosocial, policy and ecological factors in design; communication of design ideas.
Prerequisites: Graduate classification and approval of instructor.

LAND 602 Landscape Architectural Design Theory and Application II
Credits 5. 2 Lecture Hours. 9 Lab Hours.
Application of ecological concepts to site planning and site design, form and space making using natural features, and practical issues including social and political, technological and economic influences on ecological design.
Prerequisites: LAND 601.

LAND 603 Principle, Procedures and Techniques of Land Use
Credits 6. 2 Lecture Hours. 12 Lab Hours.
A continuation of LAND 601-602 sequence for career-change students; resolution of land problems that typically occur on a site; exploration of land use planning concepts and landscape ecology techniques; application of knowledge and skills acquired during the first year to a complex land development studio project.
Prerequisites: LAND 602 and approval of instructor.

LAND 612 Landscape Architectural Site Engineering and Development
Credits 4. 2 Lecture Hours. 6 Lab Hours.
First construction studio course; concepts, theories and techniques of site development; aspects of site engineering and consideration of earth bound elements in land development; contours, landform, grading design, drainage principles, cut and fill computations, basic hydraulics and hydrology, stormwater management, landscape construction materials.
Prerequisite: Approval of instructor.

LAND 613 Landscape Architectural Site Engineering and Development
Credits 4. 2 Lecture Hours. 6 Lab Hours.
Second construction studio course; sustainable water management techniques in landscape development; theory, principles and techniques of low impact development; basic elements of landscape architectural construction; construction document preparation, working drawings, project layout and design; theory and principles of irrigation and lighting design. Field trips required.
Prerequisite: LAND 612.

LAND 620 Open Space and Land Use Planning I
Credits 5. 2 Lecture Hours. 9 Lab Hours.
Creation of land use planning strategies for large land parcels; site inventory, analysis program formulation and design detailing sequenced into the production of a comprehensive master plan; consideration of issues in sustainability, environmental protection, growth management and resource utilization.
Prerequisite: LAND 601, LAND 602, LAND 603 or approval by instructor.

LAND 621 Open Space and Land Use Planning II
Credits 5. 2 Lecture Hours. 9 Lab Hours.
Projects with various scales; site selection, program formulation, theory, master planning and detailed design applied to topics of community design and development, and healthy communities; evidence based design methodology, techniques of professional design documentation and presentation.
Prerequisite: LAND 620 or approval by instructor.

LAND 630 Development of Landscape Architecture
Credits 3. 3 Lecture Hours.
Overview of the history of human settlement, land use and landscape architecture outside of North America.
Prerequisite: Graduate classification.

LAND 632/PLAN 632 Design for Active Living
Credits 3. 3 Lecture Hours.
(3-0). Understanding the forms and characteristics of the built environment and the influence on human behaviors, lifestyles and health; theoretical and empirical insights into the issues of physical activity, obesity, and automobile dependency; focus on how changes in the built environment help address these issues.
Prerequisite: Graduate classification or approval of instructor.
Cross Listing: PLAN 632/LAND 632.
LAND 635/PLAN 635 Concepts in Ecological Planning and Design
Credits 3. 3 Lecture Hours.
Reviews selected ecological concepts and explores integration into ecological/landscape planning, design using a historical perspective; historical and contemporary approach to provide and in-depth understanding of how they can better mediate between human actions and natural process.
Prerequisite(s): Graduate classification.
Cross Listing: PLAN 635/LAND 635.

LAND 640 Research Methods in Landscape Architecture
Credits 3. 3 Lecture Hours.
Research methods including theory, hypothesis formulation, design, data collection, measurement and report writing; equates research activity to landscape architecture and the interaction between people and their physical environment.
Prerequisite: LAND 603 or equivalent.

LAND 645 Practice Diversity in Landscape Architecture
Credits 3. 3 Lecture Hours.
An exploration of the diversity of practice opportunities within the profession of Landscape Architecture; individual roles within those areas of practice and the skills required to function successfully within them.
Prerequisites: Graduate classification and approval of instructor.

LAND 646 Professional Practice
Credits 3. 3 Lecture Hours.
Introduction to the procedures, management and ethical frameworks in which professional landscape architectural practice occurs; topics include forms of practice, employment issues, proposal preparation, fee and contract structures, project management, roles of the landscape architect, presentations and public participation, legal and ethical responsibilities.
Prerequisite: Graduate classification and approval of instructor.

LAND 655 Landscape Architectural Communication
Credits 3. 2 Lecture Hours. 4 Lab Hours.
Graphic communication techniques required to expand landscape architectural concepts and designs including plan graphics, analysis and inventory graphics, perspective drawings, sketch composition, rendering media, color scanning, use of software and desktop.

LAND 661 Visual Quality for Design and Planning
Credits 3. 3 Lecture Hours.
Emphasis on social science perspectives for analyzing visual quality in built and natural landscapes, and effects of visual surroundings on human well-being and health; the content reflects a balance of theory, scientific research evidence and practical applications in areas of landscape architecture, architecture, urban planning and park design.
Prerequisite: Graduate classification.

LAND 681 Seminar
Credit 1. 1 Lecture Hour.
Analysis and criticism of selected landscape architectural projects. Lectures, reports and discussions.
Prerequisite: Graduate classification in landscape architecture.

LAND 684 Professional Internship
Credits 1 to 8. 1 to 8 Other Hours.
LAND 684 is sequenced for graduation; must be completed prior to the final year of advanced study in the summer; student is required to take a work position in an approved office for a minimum of ten weeks at forty hours/week.
Prerequisite: Approval of faculty.

LAND 685 Directed Studies
Credits 1 to 6. 1 to 6 Other Hours.
Advanced study in an individual landscape architecture course with a selected faculty member; focus on a topic mutually derived by the student and faculty member; requires the production of a professional response solution.
Prerequisite: Approval of faculty.

LAND 689 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Selected topics in an identified area of landscape architecture. May be repeated for credit.
Prerequisite: Approval of instructor.

LAND 691 Research
Credits 1 to 23. 1 to 23 Other Hours.
Research for and preparation of dissertation.
Prerequisite: Doctoral classification.

LAND 693 Professional Study
Credits 1 to 23. 1 to 23 Other Hours.
Terminal studio to be taken by the qualified master of landscape architecture candidate; requires preparation of a proposal describing the topic, an outlined method, procedures and timeline to be submitted to committee; approved and completed study requires a defense and separate public presentation.
Prerequisite: Approval of a professional response solution.

LBAR - College of Liberal Arts

Courses

LBAR 181 First-Year Seminar in the Liberal Arts
Credits 1 to 3. 1 to 3 Lecture Hours.
First-year seminar on interdisciplinary topics of interest in the humanities and social sciences. May be taken on a satisfactory/unsatisfactory basis. May be repeated for credit.
Prerequisites: Freshman or sophomore classification; approval of the dean of liberal arts.

LBAR 200 Topics in Liberal Arts I
Credits 3. 3 Lecture Hours.
Introduction to the program, development of critical thinking skills and international perspectives; introductory course for the Liberal Arts Cornerstone Honors Learning Community.
Prerequisite: Admission to College of Liberal Arts Cornerstone Program Learning Community.

LBAR 203 Foundations of the Liberal Arts: Humanities
Credits 3. 3 Lecture Hours.
The intellectual roots and characteristic values and methods of liberal arts studies with emphasis on humanities disciplines.
Prerequisite: Approval of the dean of liberal arts.

LBAR 204 Foundations of the Liberal Arts: Social Sciences
Credits 3. 3 Lecture Hours.
The intellectual roots and characteristic values and methods of liberal arts studies with emphasis on social science disciplines.
Prerequisite: Approval of the dean of liberal arts.

LBAR 285 Directed Studies
Credits 0 to 3. 0 to 3 Other Hours.
Readings for specific needs of major or minor in departments in Liberal Arts.
LBAR 289 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Selected topics in an identified area of liberal arts. May be repeated for credit.
Prerequisite: Freshman or sophomore classification in liberal arts or approval of instructor.

LBAR 291 Research
Credits 0 to 3. 0 to 3 Other Hours.
Research conducted under the direction of a faculty member in Liberal Arts.
Prerequisites: 3 hours of 200-level courses in any department in the College of Liberal Arts; freshman or sophomore classification and approval of instructor.

LBAR 300 Liberal Arts Study Abroad
Credits 1 to 18. 1 to 18 Other Hours.
For students in approved programs abroad. May be repeated for credit.
Prerequisites: Admission to approved program; approval of study abroad coordinator and academic dean.

LBAR 330 Introduction to International Study
Credits 1 to 3. 1 to 3 Lecture Hours.
Readings and research preparatory to participation in a summer or semester at an international site.
Prerequisite: Approval of the dean of liberal arts.

LBAR 331 Studies in European Civilization and Culture I
Credits 1 to 6. 1 to 6 Lecture Hours.
European civilization and culture as seen especially through literature, history, philosophy and the arts. To be taught only at an overseas site.
Prerequisite: LBAR 330 or approval of instructor.

LBAR 332 Studies in European Civilization and Culture II
Credits 1 to 6. 1 to 6 Lecture Hours.
European civilization and culture as seen especially through political, social and economic developments. To be taught only at an overseas site.
Prerequisite: LBAR 330 or approval of instructor.

LBAR 392 Cooperative Education: Liberal Arts
Credit 1. 1 Other Hour.
Educational work assignment for a student in a career-related field; supervision by the employer, co-op coordinator and course instructor; technical report approved by the course instructor required. To be taken on a satisfactory/unsatisfactory basis.
Prerequisite: Approval of college co-op coordinator.

LBAR 400 Topics in Liberal Arts II
Credits 3. 3 Lecture Hours.
Emphasis on developed critical thinking, international perspectives and scholarly research; capstone course in the Liberal Arts Cornerstone Program Honors Learning Community. May be taken 3 times for credit as topics will vary each semester.
Prerequisites: LBAR 200 and admission to College of Liberal Arts Cornerstone Learning Program Community.

LBAR 484 Internship
Credits 0 to 12. 0 to 12 Other Hours.
Directed internship in a private firm, government or non-profit agency; provides experiential learning appropriate to the student's major and career objectives. Must be taken on a satisfactory/unsatisfactory basis. May be repeated for credit.
Prerequisites: Junior or senior classification and approval of major advisor.

LBAR 485 Directed Studies
Credits 0 to 3. 0 to 3 Lecture Hours. 0 to 3 Other Hours.
Readings for specific needs of major or minor in departments in Liberal Arts.

LBAR 489 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Selected topics in an identified area of liberal arts. May be repeated for credit.

LBAR 491 Research
Credits 1 to 3. 1 to 3 Other Hours.
Research conducted under the direction of a faculty member in Liberal Arts. May be repeated 2 times for credit.
Prerequisites: 12 credits in courses in departments in the College of Liberal Arts, including 3 at 300-level; junior or senior classification and approval of instructor.

LBAR 600 Liberal Arts Study Abroad
Credits 1 to 9. 1 to 9 Lecture Hours.
For students in approved programs to study abroad.
Prerequisites: Graduate classification; approval of department head.

LBAR 689 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Selected topics in an identified area of liberal arts. May be repeated for credit.

LBAR 698 Writing for Publication
Credits 3. 3 Lecture Hours.
Writing in academic disciplines and settings. Writing for different audiences and purposes. Style; planning and development of journal articles; grant proposals; correspondence; oral presentations; technical reports. Permission of departmental/college graduate advisor.
Prerequisite: Advanced standing in master's/doctoral programs.

LDEV - Land Development

Courses

LDEV 485 Directed Studies
Credits 1 to 6. 1 to 6 Other Hours.
Individual instruction in selected aspects of land development not adequately covered by other courses with stress on reports and readings in selected areas of land development.
Prerequisite: Junior classification or approval of instructor.

LDEV 489 Special Topics in...
Credits 1 to 6. 1 to 6 Lecture Hours.
Selected topics in an identified area of land and real estate development. May be repeated for credit.
Prerequisite: Junior classification or approval of instructor.

LDEV 661 Development and the Environment
Credits 3. 3 Lecture Hours.
Land development in the context of environment sustainability, human well being and business profitability to foster a restorative economy; environmental easement and site analysis; state, federal and international regulatory issues; and human ecology and the future of land development.
Prerequisite: Graduate classification.

LDEV 663 Introduction to Project Management
Credits 3. 3 Lecture Hours.
Project management processes for planning, scheduling, cost estimating resource leveling, cost control and post-completion evaluation; issues in project organizational environments, documentation, quality control safety.
Prerequisite: Graduate classification.
LDEV 644 Market Analysis for Development
Credits 3. 3 Lecture Hours.
Techniques and data sources for market analysis for development; analysis for housing development; trade area analysis and market analysis for retail development; analysis for office, industrial parks and for specialized development.
Prerequisite: Graduate classification.

LDEV 665 Land Development Trends
Credits 3. 3 Lecture Hours.
Exploration of a variety of specialized topics associated with emerging trends in the land development industry.
Prerequisite: Graduate classification.

LDEV 667 Design and Development Economy
Credits 3. 3 Lecture Hours.
Interface between the physical and financial dimensions in the design and development process to achieve building and project economics; creating a physical product and a financial venture that responds to social and environmental concerns and to market economy and feasibility analysis.
Prerequisite: Graduate classification.

LDEV 668 Land Development Practice
Credits 3. 3 Lecture Hours.
Strategies, methods and techniques of land development including: site selection criteria, urban infrastructure; market evaluation; conceptual arrangement of land uses and structures; conceptual design and regulatory considerations; lending institutions; location theory; value theories; regulatory agencies.
Prerequisite: LDEV 667.

LDEV 669 Income Property Land Development
Credits 3. 3 Lecture Hours.
Exploration of the characteristics of real estate as an investment, venture and capital structures, the development process, site and financial feasibility, and project funding; strategies, methods and technologies for investment property development utilizing current developments.
Prerequisite: Graduate classification.

LDEV 671 Sustainable Development
Credits 3. 3 Lecture Hours.
Sustainability perspectives about values, rights, property and what constitutes an optimum human environment; sustainability principles and case studies emphasizing on-the ground, incentive-based land development that balances economic growth with environmental quality.
Prerequisite: Graduate classification.

LDEV 672 Public-Private Project Funding
Credits 3. 3 Lecture Hours.
Financing and related issues in public-private development projects; explores structuring, valuing and managing projects and investigates the interaction between suppliers, operators, lenders and contractors; introduction to financial tools: loans, credit, interest rates and financial models.

LDEV 673 International Development Planning
Credits 3. 3 Lecture Hours.
International variations in urban growth and land development strategies: savings, aid and trade policy options for cities and regions; international co-development programs; application of planning and urban land development professions in contemporary global context.
Prerequisite: Graduate classification.

LDEV 681 Seminar
Credit 1. 1 Lecture Hour.
College of Architecture research activities pertaining to land and real estate development; preparation and presentation of required final paper for MS in Land Development examination.
Prerequisite: Graduate classification in land development.

LDEV 684 Professional Internship
Credits 1 to 12. 1 to 12 Other Hours.
Professional practice under approved arrangement with public or private land or real estate development agencies in the United States or abroad.
Prerequisites: Approval of committee chair and program coordinator.

LDEV 685 Directed Studies
Credits 1 to 12. 1 to 12 Other Hours.
Individual and group problems dealing with application of strategic plan development theory in practice: opportunities to select international or domestic development projects of special interest.
Prerequisite: Approval of instructor.

LDEV 687 Development Feasibility and Design
Credits 3. 1 Lecture Hour. 6 Lab Hours.
Selected residential and non-residential development projects of varying size analyzed by teams with respect to the following: economic feasibility and cash flow; site analysis; and design concept.
Prerequisite: Approval of instructor.

LDEV 688 Development Feasibility and Design II
Credits 3. 1 Lecture Hour. 6 Lab Hours.
Plans and venture structures for selected residential and non-residential development projects of varying size analyzed by multidisciplinary teams with respect to the following: economic feasibility and cash flow and site and design plans and costs.
Prerequisite: LDEV 687 or approval of instructor.

LDEV 689 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Selected topics in an identified area of land development. May be repeated for credit.
Prerequisite: Approval of instructor.

LDEV 691 Research
Credits 1 to 23. 1 to 23 Other Hours.
PhD research and preparation of dissertation.
Prerequisite: Doctoral classification.

LDEV 693 Professional Study
Credits 1 to 6. 1 to 6 Other Hours.
Approved professional case study of project organization in the USA or abroad undertaken as terminal requirement for the Master of Science in land development degree, non-thesis option.
Prerequisites: Approval of committee chair and associate department head.

LING -Linguistics

Courses

LING 209/ENGL 209 Introduction to Linguistics
Credits 3. 3 Lecture Hours.
Nature of human language and of linguistics; includes an introduction to phonology, syntax, semantics and morphology and the role of spoken and written discourse in sustaining societal arrangements.
Cross Listing: ENGL 209/LING 209.
LING 291 Research
Credits 1 to 3. 1 to 3 Other Hours.
Research conducted under the direction of faculty member in linguistics.
Prerequisites: LING 209/ENGL 209; freshman or sophomore classification and approval of instructor.

LING 307 Language and Culture
Credits 3. 3 Lecture Hours.
Language and its correlations with other aspects of culture; nature and definition of language; non-technical overview of linguistic science and language as it is related to other behavior.
Prerequisite: LING 209/ENGL 209 or ENGL 209/LING 209.

LING 310/ENGL 310 History of the English Language
Credits 3. 3 Lecture Hours.
Phonological, grammatical and lexical history of the English language; brief discussion of some other Indo-European languages; principles of linguistic change, as reflected in English.
Prerequisite: LING 209/ENGL 209 or ENGL 209/LING 209.

LING 310/ENGL 310 History of the English Language
Credits 3. 3 Lecture Hours.
Phonological, grammatical and lexical history of the English language; brief discussion of some other Indo-European languages; principles of linguistic change, as reflected in English.
Prerequisite: LING 209/ENGL 209 or ENGL 209/LING 209.

LING 403 Language and Gender
Credits 3. 3 Lecture Hours.
Language and gender from a sociolinguistic perspective; gender in the words and structures of language; gender representation and gendered language use in the media; and a variety of sociocultural contexts; language use in intimate relationships; computer-mediated discourse; language, sexuality, and sexual orientation.
Prerequisite: Junior or senior classification.
Cross Listing: ENGL 403 and WGST 403.

LING 481 Senior Seminar
Credits 3. 3 Lecture Hours.
Seminar on significant figures, movements and issues in linguistics or rhetoric, with special attention to the methods and materials of scholarship.
Prerequisites: Junior or senior classification; 6 credits in linguistics.

LING 485 Directed Studies
Credits 1 to 3. 1 to 3 Other Hours.
Directed individual study of topics in linguistics. May be repeated for credit.

LING 489 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Selected topics in an identified area of linguistics. May be repeated for credit.

LING 491 Research
Credits 1 to 3. 1 to 3 Other Hours.
Research conducted under the direction of faculty member in linguistics. May be repeated 2 times for credit.
Prerequisites: 6 credits of linguistics; junior or senior classification and approval of instructor.

LING 602 Topics in Sociolinguistics
Credits 3. 3 Lecture Hours.
Topics in the study of language and society; may focus on language use and change; how social variable affect language use and change; different theoretical approaches; issues and controversies. May be taken three times for credit as content varies.

LING 610/ENGL 610 Topics in the History of the English Language
Credits 3. 3 Lecture Hours.
Topics in the development of the English language; may include phonological, grammatical and lexical histories; study of social and political contexts; relationships between English and other languages.
Cross Listing: ENGL 610/LING 610. May be taken three times for credit as content varies.

LING 670 Topics in Discourse Analysis
Credits 3. 3 Lecture Hours.
Topics in linguistic and discourse analysis; possible topics include discourse and identity, language and gender, register studies, ethnography of communication, linguistics and literature. May be taken three times for credit as content varies.

LING 685 Directed Studies
Credits 1 to 6. 1 to 6 Other Hours.
Readings to supplement the student's knowledge of English language and linguistics in areas not studied in other courses.
Prerequisites: Graduate classification and approval of department head.

MASC - Integrated Math & Sci

Courses

MASC 351 Problem Solving in Mathematics
Credits 3. 3 Lecture Hours.
Problem solving strategies in math and science; evaluate conjectures and arguments; writing and collaborating on problem solutions; posing problems and conjectures; constructing knowledge from data; developing relationships from empirical evidence; connecting mathematics concepts; readings, discussions, and analyses will model and illustrate mathematics problems solving and proofs.
Prerequisites: 6 hours of mathematics.

MASC 371 Inquiries in Life and Earth Sciences
Credits 3. 3 Lecture Hours.
Integration and connections among topics in the life and earth sciences--diversity, natural selection, ecosystem development, earth's features, and weather systems; inquiry emphasizing experimental design, data analysis and collection; use of models in the life and earth sciences.
Prerequisites: BIOL 111 or BIOL 113 and BIOL 123, CHEM 106 and CHEM 116, GEOL 101 or GEOG 203, ASTR 101 and ASTR 102, and PHYS 205; junior or senior classification; admission to teacher certification.

MASC 450 Integrated Mathematics
Credits 3. 3 Lecture Hours.
Integration and connections among topics and ideas in mathematics and other disciplines; connections between algebra and geometry and statistics and probability; focus for integration with authentic problems requiring various branches of mathematics.
Prerequisites: MASC 351; admission to teacher education; junior classification.

MASC 475 Inquiries in Physical Science
Credits 3. 3 Lecture Hours.
Integration and connections among topics in physical sciences--matter, energy, force, motion, scientific cycles; focuses on inquiry emphasizing experimental design, data analysis and collection, and use of models in the physical sciences.
Prerequisites: BIOL 111, BIOL 113 and BIOL 123, CHEM 106 and CHEM 116, GEOL 101 or GEOG 203, ASTR 101 and ASTR 102, and PHYS 205; junior or senior classification; admission to teacher certification.

MATH - Mathematics
Courses

MATH 102 Algebra
Credits 3. 3 Lecture Hours.
(MATH 1314, 1414) Algebra. Sets, structure of number system; absolute values, solution sets of linear and nonlinear equations, of systems of equations, and of inequalities; relations and functions, graphical representations, graphical representations, progressions, mathematical induction, determinants.

MATH 131 Mathematical Concepts—Calculus
Credits 3. 3 Lecture Hours.
Mathematical Concepts—Calculus. Limits and continuity; rates of change, slope; differentiation: the derivative, maxima and minima; integration: the definite and indefinite integral techniques; curve fitting. No credit will be given for more than one of MATH 131, MATH 142, MATH 147, MATH 151 and MATH 171.
Prerequisites: High school algebra I and II and geometry.

MATH 141 Business Mathematics I
Credits 3. 3 Lecture Hours.
Linear and quadratic equations and applications; functions and graphs, systems of linear equations, matrix algebra and applications, linear programming, probability and applications, statistics. No credit will be given for more than one of MATH 141 and MATH 166.
Prerequisites: High school algebra I and II and geometry.

MATH 142 Business Mathematics II
Credits 3. 3 Lecture Hours.
(MATH 1325) Business Mathematics II. Derivatives, curve sketching and optimization, techniques of derivatives, logarithms and exponential functions with applications, integrals, techniques and applications of integrals, multivariate calculus. No credit will be given for more than one of MATH 131, MATH 142, MATH 147, MATH 151 and MATH 171.
Prerequisites: High school algebra I and II and geometry or satisfactory performance on a qualifying examination.

MATH 147 Calculus I for Biological Sciences
Credits 4. 3 Lecture Hours. 2 Lab Hours.
Introduction to differential calculus in a context that emphasizes applications in the biological sciences. No credit will be given for more than one of MATH 131, MATH 142, MATH 147, MATH 151 and MATH 171.
Prerequisite: MATH 150 or equivalent or acceptable score on TAMU Math Placement Exam.

MATH 148 Calculus II for Biological Sciences
Credits 4. 3 Lecture Hours. 2 Lab Hours.
Introduction to integral calculus in a context that emphasizes applications in the biological sciences; ordinary differential equations and analytical geometry. No credit will be given for more than one of MATH 148, MATH 152 and MATH 172.
Prerequisite: MATH 147 or approval of instructor.

MATH 150 Functions, Trigonometry and Linear Systems
Credits 4. 3 Lecture Hours. 2 Lab Hours.
(MATH 2412) Functions, Trigonometry and Linear Systems. Graphs, functions, college algebra and trigonometry, linear systems and vectors.

MATH 151 Engineering Mathematics I
Credits 4. 3 Lecture Hours. 2 Lab Hours.
(MATH 2413, 2513) Engineering Mathematics I. Rectangular coordinates, vectors, analytic geometry, functions, limits, derivatives of functions, applications, integration, computer algebra. MATH 171 designed to be a more demanding version of this course. No credit will be given for more than one of MATH 131, MATH 142, MATH 147, MATH 151 and MATH 171.
Prerequisite: MATH 150 or equivalent or acceptable score on TAMU Math Placement Exam.

MATH 152 Engineering Mathematics II
Credits 4. 3 Lecture Hours. 2 Lab Hours.
(MATH 2414) Engineering Mathematics II. Differentiation and integration techniques and their applications (area, volumes, work), improper integrals, approximate integration, analytic geometry, vectors, infinite series, power series, Taylor series, computer algebra. MATH 172 designed to be a more demanding version of this course. No credit will be given for more than one of MATH 148, MATH 152 and MATH 172.
Prerequisite: MATH 151 or equivalent.

MATH 166 Topics in Contemporary Mathematics II
Credits 3. 3 Lecture Hours.
Finite mathematics, matrices, probability and applications. No credit will be given for more than one of MATH 141 and MATH 166.
Prerequisites: High school algebra I and II and geometry.

MATH 167 For All Practical Purposes
Credits 3. 3 Lecture Hours.
Application of mathematics to real world situations using quantitative methods; includes urban services and elements of management science (optimal routes, planning and scheduling), elements of statistics (sampling/polling methods, analyzing data to make decisions), codes used by stores, credit cards, internet security, cryptography.
Prerequisite: High school algebra I and II.

MATH 170 Freshman Mathematics Laboratory
Credit 1. 2 Lab Hours.
Computing and problem solving laboratory; introduction to the various mathematical disciplines; development of skills in mathematical problem solving and skills in teamwork. May be taken two times for credit.
Prerequisites: Concurrent enrollment in MATH 171 or MATH 172; admission to College of Science.

MATH 171 Analytic Geometry and Calculus
Credits 4. 4 Lecture Hours.
Vectors, functions, limits, derivatives, Mean Value Theorem, applications of derivatives, integrals, Fundamental Theorem of Calculus. Designed to be more demanding than MATH 151. No credit will be given for more than one of MATH 131, MATH 142, MATH 147, MATH 151 and MATH 171.
Prerequisite: MATH 150 or equivalent or acceptable score on TAMU Math Placement Exam.

MATH 172 Calculus
Credits 4. 4 Lecture Hours.
Techniques of integration, applications of integrals, improper integrals, sequences, infinite series, vector algebra and solid analytic geometry. Designed to be more demanding than MATH 152. No credit will be given for more than one of MATH 148, MATH 152 and MATH 172.
Prerequisite: MATH 147, MATH 151 or MATH 171 or equivalent with a grade of C or better.
MATH 220 Foundations of Mathematics  
Credits 3. 3 Lecture Hours.  
Foundations of mathematics including logic, set theory, combinatorics, and number theory.  
**Prerequisite:** MATH 148, MATH 152 or MATH 172 or equivalent with a grade of C or better.

MATH 221 Several Variable Calculus  
Credits 4. 4 Lecture Hours.  
Vector algebra and solid analytic geometry; calculus of functions of several variables; Lagrange multipliers; multiple integration, theory, methods and application; line and surface integrals, Green’s and Stokes’ theorems; Jacobians. Designed to be more demanding than MATH 251 and MATH 253. No credit will be given for more than one of MATH 221, MATH 251 and MATH 253.  
**Prerequisite:** MATH 148, MATH 152, or MATH 172.

MATH 225 Advanced Spreadsheet Techniques  
Credit 1. 1 Lecture Hour.  
Advanced commands, formatting and functionality of spreadsheets, with Excel being the particular example.  
**Prerequisite:** MATH or APMS major.

MATH 251 Engineering Mathematics III  
Credits 3. 3 Lecture Hours.  
(MATH 2316) Engineering Mathematics III. Vector algebra, calculus of functions of several variables, partial derivatives, directional derivatives, gradient, multiple integration, line and surface integrals, Green’s and Stokes’ theorems. MATH 221 designed to be a more demanding version of this course. No credit will be given for more than one of MATH 221, MATH 251 and MATH 253.  
**Prerequisite:** MATH 148, MATH 152, or MATH 172.

MATH 253 Engineering Mathematics III  
Credits 4. 3 Lecture Hours.  
(MATH 2415) Engineering Mathematics III. Vector algebra; calculus of functions of several variables, partial derivatives, directional derivatives, gradient, multiple integration, line and surface integrals, Green’s and Stokes’ theorems, computer algebra. MATH 221 designed to be a more demanding version of this course. No credit will be given for more than one of MATH 221, MATH 251 and MATH 253.  
**Prerequisite:** MATH 148, MATH 152, or MATH 172.

MATH 281 Seminar in Mathematics  
Credit 1. 1 Lecture Hour.  
Designed to familiarize students with mathematics pertaining to real world applications in such areas as biology, signal processing, quantum computation and robotics. May be taken four times for credit.

MATH 285 Directed Studies  
Credits 1 to 4. 1 to 4 Other Hours.  
Special problems not covered by any other lower-division course in the curriculum; intended for freshman and sophomore students.  
**Prerequisite:** Approval of department head.

MATH 289 Special Topics in...  
Credits 1 to 4. 1 to 4 Lecture Hours.  
Selected topics in an identified area of mathematics. May be repeated for credit.  
**Prerequisite:** Approval of instructor.

MATH 291 Research  
Credits 0 to 4. 0 to 4 Other Hours.  
Research conducted under the direction of faculty member in mathematics. May be repeated 2 times for credit.  
**Prerequisites:** Freshman or sophomore classification and approval of instructor.

MATH 302 Discrete Mathematics  
Credits 3. 3 Lecture Hours.  
Formal structures for describing data, algorithms and computing devices; theory and applications of sets, graphs and algebraic structures.  
**Prerequisite:** MATH 148, MATH 152, or MATH 172.

MATH 304 Linear Algebra  
Credits 3. 3 Lecture Hours.  
Introductory course in linear algebra covering abstract ideas of vector space and linear transformation as well as models and applications of these concepts, such as systems of linear equations, matrices and determinants. MATH 323 designed to be a more demanding version of this course. No credit will be given for more than one of MATH 304, MATH 309, MATH 311 and MATH 323.  
**Prerequisite:** MATH 148, MATH 152, or MATH 172; junior or senior classification.

MATH 308 Differential Equations  
Credits 3. 3 Lecture Hours.  
**Prerequisites:** MATH 221, MATH 251, or MATH 253, or concurrent enrollment; knowledge of computer algebra system.

MATH 309 Linear Algebra for Differential Equations  
Credits 3. 3 Lecture Hours.  
Systems of linear equations, matrices, determinants, vector spaces, linear transformations, eigenvalues and eigenvectors, diagonalization, inner product spaces, orthogonal functions, separation of variables, Fourier series, Bessel functions. No credit will be given for more than one of MATH 304, MATH 309, MATH 311 and MATH 323.  
**Prerequisites:** MATH 221, MATH 251, or MATH 253; MATH 308 or concurrent enrollment; junior or senior classification or approval of instructor.

MATH 311 Topics in Applied Mathematics I  
Credits 3. 3 Lecture Hours.  
Systems of linear equations, matrices, determinants, vector spaces, linear transformations, eigenvalues and eigenvectors, diagonalization, inner product spaces, orthogonal functions; vector analysis, including gradient, divergence, curl, line and surface integrals, Gauss’, Green’s and Stokes’ theorems. No credit will be given for more than one of MATH 304, MATH 309, MATH 311 and MATH 323.  
**Prerequisites:** MATH 221, MATH 251, or MATH 253; MATH 308 or concurrent enrollment; junior or senior classification or approval of instructor.

MATH 323 Linear Algebra  
Credits 3. 3 Lecture Hours.  
Linear equations and matrices; real vector spaces, linear transformations, change of bases, determinants, eigenvalues and eigenvectors, diagonalization, inner products. Designed to include more theory and be more demanding than MATH 304. No credit will be given for more than one of MATH 304, MATH 309, MATH 311 and MATH 323.  
**Prerequisites:** MATH 148, MATH 152 or MATH 172; MATH 220; junior or senior classification or approval of instructor.
MATH 325 The Mathematics of Interest
Credits 3. 3 Lecture Hours.
The mathematical theory associated with interest; annuities; internal rate of return; coupon bonds; valuation of noncallable bonds; yield of maturity; interest rate sensitivity; duration and convexity; reinvestment risk; total return; compound return; STRIPS; yield curve; short selling; hedge ratio; bond swaps.
Prerequisites: MATH 142, MATH 147, MATH 151 or MATH 171; junior classification.

MATH 365 Structure of Mathematics I
Credits 3. 3 Lecture Hours.
Informal logic, sets, relations, functions, whole numbers, numeration systems, binary operations, integers, elementary number theory, modular systems, rational numbers and the system of real numbers. Designed primarily for elementary teacher certification. Others must have consent of instructor.
Prerequisites: Must have completed University Core Curriculum mathematics requirements with a grade of C or better.

MATH 366 Structure of Mathematics II
Credits 3. 3 Lecture Hours.
Geometry, measurement and coordinate geometry. Designed primarily for elementary teacher certification. Others must have consent of instructor.
Prerequisite: MATH 365 or equivalent with a grade of C or better.

MATH 367 Basic Concepts of Geometry
Credits 3. 3 Lecture Hours.
Formal development of geometry: finite [Euclidean and non-Euclidean]. Designed primarily for elementary mathematics teacher certification. Others must have consent of instructor.
Prerequisite: MATH 366 or equivalent with a grade of C or better.

MATH 368 Introduction to Abstract Mathematical Structures
Credits 3. 3 Lecture Hours.
Mathematical proofs, sets, relations, functions, infinite cardinal numbers, algebraic structures, structure of the real line; designed primarily for elementary teacher certification.
Prerequisite: MATH 366 or equivalent with a grade of C or better.

MATH 375 Intermediate Real Analysis
Credits 3. 3 Lecture Hours.
Development of the real numbers, limits, foundations and major theorems of calculus. Designed primarily for mathematics teacher certification. Others must have consent of instructor.
Prerequisite: MATH 220 or equivalent.

MATH 376 Intermediate Abstract Algebra
Credits 3. 3 Lecture Hours.
Relations, functions, binary operators, rings, homomorphisms, integral domains and fields. Designed primarily for mathematics teacher certification. Others must have consent of instructor.
Prerequisites: MATH 220 or MATH 302; MATH 304 or equivalent.

MATH 396 Communications in Mathematics
Credit 1. 1 Lecture Hour.
Electronic, written, and oral communications in mathematics.
Prerequisites: MATH 220, junior or senior classification, and mathematics major.

MATH 401 Advanced Engineering Mathematics
Credits 3. 3 Lecture Hours.
Engineering mathematics including Perturbation Theory, Fourier series and partial differential equations. Designed primarily for engineering majors. Others must have consent of instructor.
Prerequisite: MATH 308.

MATH 403 Mathematics and Technology
Credits 3. 3 Lecture Hours.
Mathematical problem-solving and communication through the use of various technologies (both hardware and software). Intended primarily, but not limited to, students working toward teacher certification.
Prerequisite: MATH 367 or MATH 467 with a grade of C or better.

MATH 407 Complex Variables
Credits 3. 3 Lecture Hours.
Fundamental theory of analytic functions, including residues and their applications.
Prerequisite: MATH 221, MATH 251, or MATH 253.

MATH 409 Advanced Calculus I
Credits 3. 3 Lecture Hours.
Axioms of the real number system; point set theory of R1; compactness, completeness and connectedness; continuity and uniform continuity; sequences, series; theory of Riemann integration.
Prerequisites: MATH 220; MATH 221, MATH 251 or MATH 253.

MATH 410 Advanced Calculus II
Credits 3. 3 Lecture Hours.
Differential and integral calculus of functions defined on Rm including inverse and implicit function theorems and change of variable formulas for integration; uniform convergence.
Prerequisites: MATH 304 or MATH 323; MATH 409.

MATH 411 Mathematical Probability
Credits 3. 3 Lecture Hours.
Probability spaces, discrete and continuous random variables, special distributions, joint distributions, expectations, law of large numbers, the central limit theorem.
Prerequisite: MATH 148, MATH 152, or MATH 172.

MATH 412 Theory of Partial Differential Equations
Credits 3. 3 Lecture Hours.
Formulation and solution of partial differential equations of mathematical physics; Fourier series and transform methods, complex variable methods, methods of characteristics and first order equations.
Prerequisite: MATH 308 or approval of instructor.

MATH 414 Fourier Series and Wavelets
Credits 3. 3 Lecture Hours.
Fourier series and wavelets with applications to data compression and signal processing.
Prerequisite: MATH 304, MATH 309, MATH 311, or MATH 323.

MATH 415 Modern Algebra I
Credits 3. 3 Lecture Hours.
A study of groups, rings, fields with emphasis on the theoretical aspects and proofs.
Prerequisite: MATH 220; MATH 304 or MATH 323.

MATH 416 Modern Algebra II
Credits 3. 3 Lecture Hours.
Continuation of topics introduced in MATH 415 including Galois Theory and the Sylow Theorems with emphasis on the theoretical aspects.
Prerequisite: MATH 415; junior or senior classification.
MATH 417 Numerical Methods
Credits 4. 3 Lecture Hours. 3 Lab Hours.
Numerical methods for applications; qualitative discussion of convergence and stability properties; computer implementation; interpolation and quadrature, initial value problems, matrix decompositions, interactive solution of linear and non-linear systems, least squares approximation, boundary value problems for ordinary differential equations.
Prerequisites: MATH 304, MATH 309, MATH 311, or MATH 323; MATH 308; ability to program; junior or senior classification.

MATH 419 Applications of Actuarial Science
Credits 2. 2 Lecture Hours.
Applications of actuarial science using mathematical and statistical methods to assess risk in the insurance and finance industries; emphasis on probability, statistics, finance and economics; focus on using probabilistic models in the estimation of insurance premiums.
Prerequisite: MATH 411 or STAT 414 or approval of math advisor.

MATH 420 Application of Actuarial Science II
Credits 2. 2 Lecture Hours.
Use of mathematical and statistical methods to price various financial instruments, such as bonds; understanding how the term structure of interest rates affect the price of these instruments.
Prerequisite: MATH 325 or concurrent enrollment, or approval of instructor.

MATH 423 Linear Algebra II
Credits 3. 3 Lecture Hours.
Eigenvalues, similarity and canonical forms, advanced topics to be chosen by the instructor.
Prerequisite: MATH 304 or MATH 323, or approval of instructor.

MATH 425 The Mathematics of Contingent Claims
Credits 3. 3 Lecture Hours.
The mathematical theory associated with asset price dynamics; binomial pricing models; Black-Scholes analysis; hedging; volatility smile; implied volatility trees; implied binomial trees.
Prerequisites: MATH 172 or equivalent; MATH 308 or equivalent; basic probability.

MATH 427 Introduction to Number Theory
Credits 3. 3 Lecture Hours.
Prime and composite integers; Euclidean algorithm; modular arithmetic; Chinese remainder theorem; unique factorization; quadratic reciprocity; Riemann zeta function; representation of numbers as a sum of squares.
Prerequisites: MATH 220; MATH 304 or MATH 323.

MATH 431 Structures and Methods of Combinatorics
Credits 3. 3 Lecture Hours.
Enumerative techniques generating functions, partially ordered sets, elementary graph theory, elementary Ramsey theory.
Prerequisite: MATH 220 or MATH 302 or approval of instructor.

MATH 433 Applied Algebra
Credits 3. 3 Lecture Hours.
An introduction to groups, rings, fields with emphasis on modular arithmetic; applications to number theory, coding theory, and other areas.
Prerequisites: MATH 220 or MATH 302; MATH 304 or MATH 323.

MATH 436 Introduction to Topology
Credits 3. 3 Lecture Hours.
Metric spaces; continuity of metric spaces; topological spaces; basic notions; separation axioms; compactness; local compactness; connectedness; basic notions in homotopy theory; quotient spaces, paracompactness and topological manifolds.
Prerequisites: MATH 220; MATH 221, MATH 251, or MATH 253.

MATH 437 Principles of Numerical Analysis
Credits 4. 3 Lecture Hours. 3 Lab Hours.
Mathematical principles of numerical analysis and their application to the study of particular methods; fixed-point iteration, Newton’s method; normed vector spaces and operators, Schur decomposition, convergent matrices, minimization methods, conjugate gradient method; polynomial interpolation of Lagrange and Hermite; best approximation, Bernstein and Weierstrass Theorems, numerical quadrature.
Prerequisites: MATH 304, MATH 309, MATH 311, or MATH 323; MATH 308; MATH 409; ability to program; junior or senior classification.

MATH 446 Principles of Analysis I
Credits 3. 3 Lecture Hours.
Construction of the real and complex numbers; topology of metric spaces, compactness and connectedness; Cauchy sequences, completeness and the Baire Category Theorem; Continuous Mappings; introduction to Point-Set Topology.
Prerequisites: MATH 409; junior or senior classification.

MATH 447 Principles of Analysis II
Credits 3. 3 Lecture Hours.
Riemann-Stieltjes integration; sequences and series of functions; the Stone-Weierstrass and Arzela-Ascoli Theorems; introduction to Lebesgue measure theory and integration.
Prerequisites: MATH 446 or approval of instructor; junior or senior classification.

MATH 460 Tensors and General Relativity
Credits 3. 3 Lecture Hours.
Vectors and tensors in special relativity, curvature, manifolds, covariant differentiation, Einstein field equations, Schwarzschild geometry and black holes, cosmology, gauge field theories.
Prerequisites: MATH 308; PHYS 331 or MATH 323 or MATH 311; junior or senior classification.

MATH 467 Modern Geometry
Credits 3. 3 Lecture Hours.
Rigorous development of Euclidean Geometry; Classic non-Euclidean models; Matrix representations of transformations in R3; Isometries; Transformation and symmetric groups; Similarity and Affine transformations.
Prerequisite: MATH 304 or MATH 323.
MATH 469 Introduction to Mathematical Biology
Credits 3. 3 Lecture Hours.
Introduction to mathematical modeling techniques in the biological sciences; continuous versus discrete models; deterministic versus stochastic models; includes population dynamics and ecology, spread of infectious diseases, population genetics and evolution, spatial pattern formation.
Prerequisites: MATH 304 or MATH 323; MATH 308 or equivalent.

MATH 470 Communications and Cryptography
Credits 3. 3 Lecture Hours.
Introduction to coded communications, digital signatures, secret sharing, one-way functions, authentication, error control and data compression.
Prerequisites: MATH 304 or MATH 309 or MATH 311 or MATH 323; CSCE 110 or CSCE 111 or CSCE 121 or CSCE 206 or ENGR 112; approval of instructor.

MATH 471 Communications and Cryptography II
Credits 3. 3 Lecture Hours.
Additional topics in coded communications; information and entropy, elliptical curves, error corrections, quantum methods.
Prerequisites: MATH 470 or consent of instructor.

MATH 482 Research Seminar
Credits 3. 3 Lecture Hours.
Problems, methods and recent developments in mathematics, with emphasis on projects, and written and oral presentations. May be repeated for credit.
Prerequisites: MATH 409 or MATH 415 (may be taken concurrently); junior or senior classification; approval of instructor.

MATH 485 Directed Studies
Credits 1 to 8. 1 to 8 Other Hours.
Special problems in mathematics not covered by any other course in the curriculum. Work may be in either theory or laboratory.
Prerequisite: Approval of department head.

MATH 489 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Selected topics in an identified area of mathematics. May be repeated for credit.
Prerequisite: Approval of instructor.

MATH 490 The Putnam Challenge
Credit 1. 1 Lecture Hour.
Intensive individualized training for preparation for the Putnam Exam, a national contest for mathematics majors. May be taken four times for credit.
Prerequisites: Approval of instructor; junior or senior classification.

MATH 491 Research
Credits 0 to 3. 0 to 3 Other Hours.
Active research of basic nature under supervision of Department of Mathematics or affiliated department graduate faculty member; a maximum of 6 hours of credit can be used in degree plans. Registration in multiple sections of this course is possible within a given semester provided that the per semester credit hour limit is not exceeded.
Prerequisites: Mathematics or applied mathematical sciences major; junior or senior classification or approval of mathematics advisor.

MATH 601 Methods of Applied Mathematics I
Credits 3. 3 Lecture Hours.
Methods of linear algebra, vector analysis and complex variables.
Prerequisite: MATH 308 or equivalent.

MATH 602 Methods and Applications of Partial Differential Equations
Credits 3. 3 Lecture Hours.
Classification of linear partial differential equations of the second order; Fourier series, orthogonal functions, applications to partial differential equations; special functions, Sturm-Liouville theory, application to boundary value problems; introduction to Green's functions; finite Fourier transforms.
Prerequisites: MATH 601 or MATH 308 and MATH 407.

MATH 603 Methods of Applied Mathematics II
Credits 3. 3 Lecture Hours.
Tensor algebra and analysis; partial differential equations and boundary value problems; Laplace and Fourier transform methods for partial differential equations.
Prerequisite: MATH 601 or MATH 311.

MATH 604 Mathematical Foundations of Continuum Mechanics
Credits 3. 3 Lecture Hours.
Mathematical description of continuum mechanics principles, including: tensor analysis, generalized description of kinematics and motion, conservation laws for mass and momentum; invariance and symmetry principles; application to generalized formulation of constitutive expressions for various fluids and solids.
Prerequisites: MATH 410; MATH 451 or equivalent.

MATH 605 Mathematical Fluid Dynamics
Credits 3. 3 Lecture Hours.
Derivation of basic equations of motion; Navier-Stokes equations; potential equations; some exact solutions in two and three dimensions; equations of boundary layer theory; vorticity-stream function formulation and vortex dynamics; introduction to hydrodynamic stability; introduction to equations of turbulence.
Prerequisite: MATH 601 or equivalent.

MATH 606 Theory of Probability I
Credits 3. 3 Lecture Hours.
Measure and integration, convergence concepts, random variables, independence and conditional expectation, laws of large numbers, central limit theorems, applications.
Prerequisite: MATH 607 or approval of instructor.

MATH 607 Real Variables I
Credits 3. 3 Lecture Hours.
Lebesgue measure and integration theory, differentiation, Lp-spaces, abstract integration, signed measures; Radon-Nikodym theorem, Riesz representation theorem, integration on product spaces.
Prerequisite: MATH 447 or equivalent.

MATH 608 Real Variables II
Credits 3. 3 Lecture Hours.
Banach spaces, theorems of Hahn-Banach and Banach-Steinhaus, the closed graph and open mapping theorems, Hilbert spaces, topological vector spaces and weak topologies.
Prerequisite: MATH 607.

MATH 609 Numerical Analysis
Credits 4. 3 Lecture Hours. 3 Lab Hours.
Interpolation, numerical evaluation of definite integrals and solution of ordinary differential equations; stability and convergence of methods and error estimates.
Prerequisite: Knowledge of computer programming (C or FORTRAN).
MATH 610 Numerical Methods in Partial Differential Equations  
Credits 3. 3 Lecture Hours.  3 Lab Hours.  
Introduction to finite difference and finite element methods for solving partial differential equations; stability and convergence of methods and error bounds.  
Prerequisite: MATH 417 or MATH 609 or equivalent; knowledge of computer programming.

MATH 611 Introduction to Ordinary and Partial Differential Equations  
Credits 3. 3 Lecture Hours.  
Prerequisite: MATH 410 or equivalent or instructor’s approval.

MATH 612 Partial Differential Equations  
Credits 3. 3 Lecture Hours.  
Theory of linear partial differential equations; Sobolev spaces; elliptic equations (including boundary value problems and spectral theory); linear evolution equations of parabolic and hyperbolic types (including initial and boundary value problems). As time permits, additional topics might be included.  
Prerequisite: MATH 611 and MATH 607 or MATH 641, or approval of instructor.

MATH 613 Graph Theory  
Credits 3. 3 Lecture Hours.  
One or more broad areas of graph theory or network theory, such as planarity, connectivity, Hamiltonian graphs, colorings of graphs, automorphisms of graphs, or network theory.  
Prerequisite: MATH 431 or equivalent or approval of instructor.

MATH 614 Dynamical Systems and Chaos  
Credits 3. 3 Lecture Hours.  
Discrete maps; continuous flows; dynamical systems; Poincaré maps; symbolic dynamics; chaos, strange attractors; fractals; computer simulation of dynamical systems.  
Prerequisites: MATH 308; MATH 601 or equivalent.

MATH 615 Introduction to Classical Analysis  
Credits 3. 3 Lecture Hours.  
Set-theoretic preliminaries; Cantor-Schröder-Bernstein Theorem; review of sequences; limit inferior and limit superior; infinite products; metric spaces; convergence of functions; Dini’s Theorem, Weierstrass Approximation Theorem; monotone functions; bounded variation; Helly’s Selection Theorem; Riemann-Stieltjes integration; Fourier series; Fejer’s Theorem; Parseval’s Identity; Bernstein’s Theorem on absolutely convergent Fourier series.  
Prerequisite: MATH 409 or equivalent.

MATH 617 Theory of Functions of a Complex Variable I  
Credits 3. 3 Lecture Hours.  
Holomorphic functions, complex integral theorems, Runge’s theorem, residue theorem, Laurent series, conformal mapping, harmonic functions.  
Prerequisite: MATH 410.

MATH 618 Theory of Functions of a Complex Variable II  
Credits 3. 3 Lecture Hours.  
Infinite products, Weierstrass factorization theorem, Mittag-Leffler’s theorem, normal families, Riemann mapping theorem, analytic continuation, Picard’s theorems and selected topics.  
Prerequisite: MATH 617.

MATH 619 Applied Probability  
Credits 3. 3 Lecture Hours.  
Measure Theory; Lebesgue integration; random variables; expectation; condition expectation martingales and random walks; designed for beginning graduate students in mathematics, statistics, the sciences and engineering and students in economics and finance with a strong mathematical background.  
Prerequisites: MATH 409 and MATH 411.

MATH 620 Algebraic Geometry I  
Credits 3. 3 Lecture Hours.  
Affine and projective varieties; sheaves; cohomology; Riemann-Roch Theorem for curves.  
Prerequisite: MATH 653 or approval of instructor.

MATH 622 Differential Geometry I  
Credits 3. 3 Lecture Hours.  
Surfaces in 3-D space and generalizations to submanifolds of Euclidean space; smooth manifolds and mappings; tensors; differential forms; Lie groups and algebras; Stokes’ theorem; deRham cohomology; Frobenius theorem; Riemannian manifolds.  
Prerequisites: MATH 304 or equivalent; approval of instructor.

MATH 623 Differential Geometry II  
Credits 3. 3 Lecture Hours.  
Curvature of Riemannian manifolds; vector bundles; connections; Maurer-Cartan Form; Laplacian; geodesics; Chern-Gauss-Bonnet theorem; additional topics to be selected by the instructor.  
Prerequisites: MATH 622 or approval of instructor.

MATH 625 Applied Stochastic Differential Equations  
Credits 3. 3 Lecture Hours.  
Stochastic integration, Ito Calculus and applications of stochastic differential equations to finance and engineering.  
Prerequisite: MATH 619.

MATH 626 Analytic Number Theory  
Credits 3. 3 Lecture Hours.  
Analytic properties of the Riemann zeta function and Dirichlet L-functions; Dirichlet characters; prime number theorem; distribution of primes in arithmetic progressions; Siegel’s theorem; the large sieve inequalities; Bombieri-Vinogradov theorem.  
Prerequisite: MATH 617.

MATH 627 Algebraic Number Theory  
Credits 3. 3 Lecture Hours.  
Algebraic number fields and rings of algebraic integers; arithmetic in algebraic number fields; ideals; unique factorization of ideals; ideal classes and the class group; finiteness of the class number; Minkowski’s theorem; Dirichlet’s unit theorem; quadratic and cyclotomic number fields; splitting of primes in extension fields.  
Prerequisite: MATH 653 or approval of instructor.

MATH 628 Mathematics of Finance  
Credits 3. 3 Lecture Hours.  
Pricing of financial derivatives in different market models; discrete models: Arrow-Debreu, Binomial model, Hedging; Stochastic calculus; Brownian Motion, stochastic integrals, Ito formula; continuous model: Black-Scholes formula for pricing European and American options; equivalent Martingale Measures, pricing of exotic options.  
Prerequisite: MATH 606 or MATH 619 or approval of instructor.
MATH 629 History of Mathematics
Credits 3. 3 Lecture Hours.
Major events in the evolution of mathematical thought from ancient
times to the present, the development of various important branches of
mathematics, including numeration, geometry, algebra, analysis, number
theory, probability, and applied mathematics.
Prerequisite: MATH 304 or equivalent.

MATH 630 Combinatorics
Credits 3. 3 Lecture Hours.
This is an introduction at the graduate level to the fundamental ideas
and results of combinatorics, including enumerative techniques, sieve
methods, partially ordered sets and generating functions.
Prerequisite: undergraduate discrete math course or permission of
instructor.

MATH 636 Topology I
Credits 3. 3 Lecture Hours.
Set theory, topological spaces, generalized convergence, compactness,
meterization, connectedness, uniform spaces, function spaces.
Prerequisite: Approval of instructor.

MATH 637 Topology II
Credits 3. 3 Lecture Hours.
Continuation of MATH 636.
Prerequisite: MATH 636 or approval of instructor.

MATH 638 Hyperbolic Conservation Laws
Credits 3. 3 Lecture Hours.
Introduction to basic theory and numerical methods for first order nonlinear
partial differential equations; basic existence-uniqueness theory for
scalar conservation laws; special equations and systems of interest in
various applications and Riemann problem solutions for such systems;
design of numerical methods for general hyperbolic systems; stability and
convergence properties of numerical methods.
Prerequisite: MATH 610 or MATH 612 or approval of instructor.

MATH 639 Iterative Techniques
Credits 4. 3 Lecture Hours. 3 Lab Hours.
Numerical methods for solving linear and nonlinear equations and systems
of equations; eigenvalue problems.
Prerequisites: Elementary linear algebra and knowledge of computer
programming (C or FORTRAN).

MATH 640 Linear Algebra for Applications
Credits 3. 3 Lecture Hours.
Review of linear algebra; spectral theory in inner product spaces;
decomposition theorems; duality theory and multilinear algebra; tensor
products; applications. May be taken concurrently with MATH 641.
Prerequisite: MATH 304 or equivalent.

MATH 641 Analysis for Applications I
Credits 3. 3 Lecture Hours.
Review of preliminary concepts; sequence and function spaces; normed
linear spaces, inner product spaces; spectral theory for compact
operators; fixed point theorems; applications to integral equations and the
calculus of variations.
Prerequisites: MATH 447 and MATH 640 or approval of instructor.

MATH 642 Analysis for Applications II
Credits 3. 3 Lecture Hours.
Distributions and differential operators; transform theory; spectral theory
for unbounded self-adjoint operators; applications to partial differential
equations; asymptotics and perturbation theory.
Prerequisite: MATH 641.

MATH 643 Algebraic Topology I
Credits 3. 3 Lecture Hours.
Fundamental ideas of algebraic topology, homotopy and fundamental
group, covering spaces, polyhedra.
Prerequisite: Approval of instructor.

MATH 644 Algebraic Topology II
Credits 3. 3 Lecture Hours.
Homology and cohomology theory.
Prerequisite: MATH 643.

MATH 645 A Survey of Mathematical Problems I
Credits 3. 3 Lecture Hours.
A survey of problems in various branches of mathematics, such as logic,
probability, graph theory, number theory, algebra and geometry.
Prerequisites: MATH 409, MATH 415, MATH 423 or approval of
instructor.

MATH 646 A Survey of Mathematical Problems II
Credits 3. 3 Lecture Hours.
A survey of problems in various branches of mathematics such as algebra,
geometry, differential equations, real analysis, complex analysis, calculus
of variations.
Prerequisite: MATH 645 or approval of instructor.

MATH 647 Mathematical Modeling
Credits 3. 3 Lecture Hours.
The process and techniques of mathematical modeling; covers a variety
of application areas and models such as ordinary and partial differential
equations, stochastic models, discrete models and problems involving
optimization.
Prerequisite: MATH 442 or approval of instructor.

MATH 648 Computational Algebraic Geometry
Credits 3. 3 Lecture Hours.
Broad introduction to algorithmic algebraic geometry, including numerical
and complexity theoretic aspects; theory behind the most efficient modern
algorithms for polynomial system solving and the best current quantitative/
geometric estimates on algebraic sets over various rings is derived.
Prerequisite: MATH 653 or approval of instructor.

MATH 650 Several Complex Variables
Credits 3. 3 Lecture Hours.
Introduction to function theory in several complex variables with an
emphasis on the analytic and partial differential equations aspects of the
subject.
Prerequisites: MATH 608 and MATH 618 or equivalents.

MATH 651 Optimization I
Credits 3. 3 Lecture Hours.
Fundamentals of mathematical analysis underlying theory of constrained
optimizations for a finite number of variables, necessary and sufficient
conditions for constrained extrema of equality constraint problems,
sufficient conditions for fulfillment of constraint qualification, computational
methods for concave programming problems and applications.
Prerequisite: MATH 410 or approval of instructor.

MATH 652 Optimization II
Credits 3. 3 Lecture Hours.
Necessary conditions of calculus of variations, elementary theory of
games, formulation of basic control problem, Hestenes' necessary
conditions for optimal control, transformations, methods of computation
and applications.
Prerequisite: MATH 651.
MATH 653 Algebra I  
Credits 3. 3 Lecture Hours.  
Survey of groups, rings, ideals.  
Prerequisite: MATH 415 or approval of instructor.

MATH 654 Algebra II  
Credits 3. 3 Lecture Hours.  
Survey of modules, field extensions, Galois theory.  
Prerequisite: MATH 653 or approval of instructor.

MATH 655 Functional Analysis I  
Credits 3. 3 Lecture Hours.  
Normed linear spaces, duality theory, reflexivity, operator theory. Banach algebras, spectral theory, representation theory.  
Prerequisite: MATH 608.

MATH 656 Functional Analysis II  
Credits 3. 3 Lecture Hours.  
Topological linear spaces, locally convex spaces, duality in locally convex spaces, ordered topological vector spaces, distribution theory, applications to analysis.  
Prerequisite: MATH 655.

MATH 658 Applied Harmonic Analysis  
Credits 3. 3 Lecture Hours.  
Fourier series and Fourier Transform; discrete (fast) Fourier transform; discrete cosine transform; local cosine transform; Radon transform; filters; harmonic analysis on the sphere; radial, periodic and spherical basis functions; applications.  
Prerequisites: MATH 304; MATH 308 or equivalent.

MATH 660/CSCE 660 Computational Linear Algebra  
Credits 3. 3 Lecture Hours.  
Techniques in matrix computation: elimination methods, matrix decomposition, generalized inverses, orthogonalization and least-squares, eigenvalue problems and singular value decomposition, iterative methods and error analysis.  
Prerequisite: MATH 417 or equivalent or CSCE 442 or equivalent.  
Cross Listing: CSCE 660/MATH 660.

MATH 661 Mathematical Theory of Finite Element Methods  
Credits 3. 3 Lecture Hours.  
Will develop basic mathematical theory of finite element method; construction of finite element spaces and piece-wise polynomial approximation; Ritz-Galerkin methods and variational crimes; energy and error analysis.  
Prerequisite: MATH 410; ENGR finite element class on MATH 419 or MATH 415 or approval of instructor.  
Knowledge of C++.

MATH 662 Seminar in Algebra  
Credits 3. 3 Lecture Hours.  
Problems, methods and recent developments in algebra. May be repeated for credit.  
Prerequisite: Approval of instructor.

MATH 663 Seminar in Analysis  
Credits 3. 3 Lecture Hours.  
Problems, methods and recent developments in analysis. May be repeated for credit.  
Prerequisite: Approval of instructor.

MATH 664 Seminar in Applied Mathematics  
Credits 3. 3 Lecture Hours.  
Problems, methods and recent developments in applied mathematics. May be repeated for credit.  
Prerequisite: Approval of instructor.

MATH 666 Seminar in Geometry  
Credits 3. 3 Lecture Hours.  
Problems, methods and recent developments in geometry. May be repeated for credit.  
Prerequisite: Approval of instructor.

MATH 667 Foundations and Methods of Approximation  
Credits 3. 3 Lecture Hours.  
Existence, uniqueness and characterization of best approximations; polynomial and rational approximants; Bernstein polynomials; Bernstein and Markov inequalities; ridge functions; approximation from shift-invariant subspaces; orthogonal polynomials; neural networks, radial basis functions, scattered-data surface fitting; subdivision analysis.  
Prerequisites: MATH 407 and MATH 409.

MATH 669 Seminar in Mathematical Biology  
Credits 3. 3 Lecture Hours.  
Problems, methods and recent developments in Mathematical Biology. May be repeated for credit.  
Prerequisite: Approval of instructor.

MATH 670 Applied Mathematics I  
Credits 3. 3 Lecture Hours.  
Mathematical tools of applied mathematics; Fredholm alternative; integral operators; Green's functions; unbounded operators; Stone's theorem; distributions; convolutions; Fourier transforms; applications.  
Prerequisite: MATH 642 or equivalent.

MATH 671 Applied Mathematics II  
Credits 3. 3 Lecture Hours.  
Advanced mathematical tools of applied mathematics; Fredholm alternative; integral operators; Green's functions; unbounded operators; Stone's theorem; distributions; convolutions; Fourier transforms; applications.  
Prerequisites: MATH 642 or equivalent.

MATH 672 Hydrodynamic Stability  
Credits 3. 3 Lecture Hours.  
Instability mechanisms; instability of interfacial and free surface flows; thermal instability, centrifugal instability, instability of inviscid and viscous parallel shear flows; fundamental concepts and applications of nonlinear instability; the onset of turbulence; various transitions to turbulence.  
Prerequisites: MATH 601 or equivalent; MATH 605 or equivalent.

MATH 673 Information, Secrecy and Authentication I  
Credits 3. 3 Lecture Hours.  
Preliminaries; probability, information, entropy, signals, channels: group-theoretic view of messages: contemporary secrecy and digital signature systems; one-time pads, DES, RSA, DSS, wheels, LFSR-based systems; analog scramblers; key exchange, key management, secret sharing, access structures; measures of security.  
Prerequisites: Graduate classification and approval of instructor.

MATH 674 Information, Secrecy and Authentication II  
Credits 3. 3 Lecture Hours.  
Advanced information theory, cryptography, authentication, and access control.  
Prerequisites: MATH 673 or approval of instructor.

MATH 675 Information, Secrecy and Authentication III  
Credits 3. 3 Lecture Hours.  
Advanced information theory, cryptography, authentication, and access control.  
Prerequisites: MATH 674 or approval of instructor.

MATH 676 Finite Element Methods in Scientific Computing  
Credits 3. 3 Lecture Hours.  
Basic finite element methods; structure of finite element codes; assembling linear systems of equations and algorithmic aspects; linear iterative solvers; adaptive mesh refinement; vector-valued and mixed problems; nonlinear problems; visualization; parallelization aspects. Additional topics may be chosen by instructor.  
Prerequisites: MATH 610; ENGR finite element class on MATH 419 or MATH 609; approval of instructor. Knowledge of C++.

MATH 684 Professional Internship  
Credits 1 to 6. 1 to 6 Other Hours.  
Directed internship in an organization to provide students with professional experience in organization settings appropriate to the student's career objectives.  
Prerequisite: Approval of department head.
MATH 685 Directed Studies
Credits 1 to 6. 1 to 6 Other Hours.
Offered to enable students to undertake and complete, with credit, limited investigations not within their thesis research and not covered by any other courses in the curriculum.
Prerequisite: Approval of instructor.

MATH 689 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Selected topics in an identified area of mathematics. May be repeated for credit.
Prerequisite: Approval of instructor.

MATH 691 Research
Credits 1 to 23. 1 to 23 Other Hours.
Research for thesis or dissertation.

MATH 695 Frontiers in Mathematical Research
Credits 3. 3 Lecture Hours.
This course is designed to acquaint the graduate student with the present status of investigative work in a variety of mathematical fields. Content will depend on the availability of visiting lecturers who will be selected because of distinguished international recognition in their fields of research. May be taken two times for credit.
Prerequisite: Graduate classification.

MATH 696 Mathematical Communication and Technology
Credits 3. 3 Lecture Hours.
Techniques of oral, written and electronic communication of mathematics; effective classroom and seminar presentation; \LaTeX, HTML and Javascript; developing Internet applications; Maple and Matlab; classroom use of computer graphics.
Prerequisite: Approval of instructor.

MEEN - Mechanical Engineering

Courses

MEEN 210 Geometric Modeling for Mechanical Design
Credits 2. 1 Lecture Hour. 2 Lab Hours.
Foundations of geometric modeling as applied to mechanical design through use of modern computer-aided design (CAD) and physical prototyping tools; basics of systematic design methodology; geometric visualization concepts: multiview orthographic, isometric, oblique, perspective; three-dimensional representations, surface and solid modeling; dimensioning and tolerancing; rapid prototyping using 3D printing.
Prerequisites: Mechanical engineering major; ENGR 111.

MEEN 221 Statics and Particle Dynamics
Credits 3. 3 Lecture Hours.
Application of the fundamental principles of Newtonian mechanics to the statics and dynamics of particles; equilibrium of trusses, frames, beams and other rigid bodies.
Prerequisites: For non-mechanical engineering majors; admission to an engineering major; MATH 251 or MATH 253 or registration therein; PHYS 218.

MEEN 222 Materials Science
Credits 3. 3 Lecture Hours.
Mechanical, optical, thermal, magnetic and electrical properties of solids; differences in properties of metals, polymers, ceramics and composite materials in terms of bonding and crystal structure.
Prerequisites: CHEM 102, or CHEM 104 and CHEM 114, or CHEM 107 and CHEM 117; PHYS 218.

MEEN 225 Engineering Mechanics
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Application of the laws of classical mechanics to simplified, plausibly real world problems or interest to mechanical engineering, including the analysis of cables, frames, trusses, beams, machines and mechanisms.
Prerequisites: Mechanical engineering major; MATH 251 or MATH 253 or registration therein; PHYS 218.

MEEN 260 Mechanical Measurements
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Introduction to the basic principles of engineering experimentation including: instrumentation and measurement techniques, signal processing and data acquisition, statistical data analysis, and interpretation and reporting of results.
Prerequisites: MEEN 225, ECEN 215, MATH 308 and MEEN 315 or registration therein.

MEEN 289 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Selected topics in an identified area of mechanical engineering. May be repeated for credit.
Prerequisite: Approval of instructor.

MEEN 291 Research
Credits 1 to 4. 1 to 4 Other Hours.
Research conducted under the direction of faculty member in mechanical engineering. May be repeated 2 times for credit.
Prerequisites: Freshman or sophomore classification and approval of instructor.

MEEN 315 Principles of Thermodynamics
Credits 3. 3 Lecture Hours.
Principles of Thermodynamics.
Prerequisites: MEEN 225; MATH 251 or MATH 253; junior or senior classification.

MEEN 333 Project Management for Engineers
Credits 3. 3 Lecture Hours.
Basic project management for engineering undergraduates; project development and economic justification; estimating; scheduling; network methods; critical path analysis; earned value management; recycling and rework; project organizational structures; project risk assessment; resource allocation; ethics; characteristics of project managers.
Prerequisite: Junior or senior classification in Dwight Look College of Engineering.
Cross Listing: CVEN 333 and ISEN 333.

MEEN 344 Fluid Mechanics
Credits 3. 3 Lecture Hours.
Application of laws of statics, buoyancy, stability, energy and momentum to behavior of ideal and real fluids; dimensional analysis and similitude and their application to flow through ducts and piping; lift and drag and related problems.
Prerequisites: MEEN 225 and MEEN 315.

MEEN 345 Fluid Mechanics Laboratory
Credit 1. 3 Lab Hours.
Introduction to basic fluid mechanics instrumentation; experimental verification and reinforcement of the analytical concepts introduced in MEEN 344.
Prerequisites: MEEN 260; MEEN 344 or registration therein.
MEEN 357 Engineering Analysis for Mechanical Engineers  
Credits 3. 3 Lecture Hours.  
Practical foundation for the use of numerical methods to solve engineering problems: Introduction to Matlab, error estimation, Taylor series, solution of non-linear algebraic equations and linear simultaneous equations; numerical integration and differentiation; initial value and boundary value problems; finite difference methods for parabolic and elliptic partial differential equations.  
Prerequisites: ENGR 112 and MATH 308.

MEEN 360 Materials and Manufacturing Selection in Design  
Credits 3. 3 Lecture Hours.  
Selecting materials and manufacturing processes in design; emphasis on material mechanical properties; microstructure production and control; manufacturing processes for producing various shapes for components and structures; use of design methodology.  
Prerequisites: MEEN 222, MEEN 260; CVEN 305; junior or senior classification; or approval of instructor.

MEEN 361 Materials and Manufacturing in Design Laboratory  
Credit 1. 3 Lab Hours.  
Experiments in materials characterization and manufacturing processes; emphasis on material mechanical properties; microstructure production and control; manufacturing processes for producing various shapes for components and structures.  
Prerequisites: MEEN 222, MEEN 260; CVEN 305 or MEEN 360 or registration therein; junior or senior classification or approval of instructor.

MEEN 363 Dynamics and Vibrations  
Credits 3. 2 Lecture Hours. 2 Lab Hours.  
Dynamics and Vibration. Application of Newtonian and energy methods to model dynamic systems (particles and rigid bodies) with ordinary differential equations; solution of models using analytical and numerical approaches; interpreting solutions; linear vibrations.  
Prerequisites: MEEN 225; MATH 308; MEEN 357 or CVEN 302, or registration therein; CVEN 305 or registration therein.

MEEN 364 Dynamic Systems and Controls  
Credits 3. 2 Lecture Hours. 3 Lab Hours.  
Mathematical modeling, analysis, measurement and control of dynamic systems; extensions of modeling techniques of MEEN 363 to other types of dynamic systems; introduction to feedback control, time and frequency domain analysis of control systems, stability, PID control, root locus; design and implementation of computer-based controllers in the lab.  
Prerequisites: MEEN 260 and MEEN 363; ECEN 215.

MEEN 368 Solid Mechanics in Mechanical Design  
Credits 3. 2 Lecture Hours. 2 Lab Hours.  
Stress analysis of deformable bodies and mechanical elements; stress transformation; combined loading; failure modes; material failure theories; fracture and fatigue; deflections and instabilities; thick cylinders; curved beams; design of structural/mechanical members; design processes.  
Prerequisites: CVEN 305; MEEN 357 and MEEN 360 or registration therein; junior or senior classification.

MEEN 381 Seminar  
Credit 1. 2 Other Hours.  
Presentations by practicing engineers and faculty addressing: effective communications, engineering practices, professional registration, ethics, career-long competence, contemporary issues, impact of technology on society and being informed; preparation of a resume, a lifelong learning plan, two papers, two oral presentations and complete an online assessment of the mechanical engineering program.  
Prerequisite: Upper-level classification in mechanical engineering.

MEEN 401 Introduction to Mechanical Engineering Design  
Credits 3. 2 Lecture Hours. 3 Lab Hours.  
The design innovation process; need definition, functional analysis, performance requirements and evaluation criteria, conceptual design evaluation, down-selected to an embodiment; introduction to systems and concurrent engineering; parametric and risk analysis, failure mode analysis, material selection, and manufacturability; cost and life cycle issues, project management.  
Prerequisites: MEEN 360, MEEN 361, MEEN 364, MEEN 368, MEEN 461.

MEEN 402 Intermediate Design  
Credits 3. 2 Lecture Hours. 3 Lab Hours.  
Product detail design and development process including case studies; project management, marketing considerations, manufacturing, detailed design specifications; failure modes, application of codes and standards, selection of design margins; product (component) development guidelines; intellectual property, product liability and ethical responsibility.  
Prerequisites: MEEN 401; junior or senior classification.

MEEN 404 Engineering Laboratory  
Credits 3. 2 Lecture Hours. 3 Lab Hours.  
Systematic design of experimental investigations; student teams identify topics and develop experiment designs including: establishing the need; functional decomposition; requirements; conducting the experiment; analyzing and interpreting the results and written and oral reports documenting the objectives, procedure, analysis, and results and conclusion of two or three experiments.  
Prerequisites: MEEN 260, MEEN 360, MEEN 361, MEEN 364; MEEN 461; MEEN 401 or registration therein; junior or senior classification.

MEEN 408 Introduction to Robotics  
Credits 3. 3 Lecture Hours.  
Forward and inverse kinematics of robot manipulators, path planning, motion planning for mobile robots, dynamics of robot manipulators, control algorithms; computed torque algorithm, adaptive control algorithms and current topics in mobile robots; cooperative motion planning of mobile robots and formation control.  
Prerequisites: MEEN 364 or equivalent; junior or senior classification.

MEEN 410 Internal Combustion Engines  
Credits 3. 3 Lecture Hours.  
Thermodynamics of cycles for internal combustion engines and gas turbines, including fuels and combustion; performance characteristics of various types of engines.  
Prerequisite: MEEN 344 or equivalent or approval of instructor.

MEEN 411 Mechanical Controls  
Credits 3. 3 Lecture Hours.  
Application of classical and modern control theory techniques to modeling, analysis and synthesis of linear, mechanical control systems.  
Prerequisite: MEEN 364.

MEEN 414 Principles of Turbomachinery  
Credits 3. 3 Lecture Hours.  
Aero-therodynamic and mechanical design of turbomachinery components including steam and gas turbine stages, compressor stages, and inlet and exhaust systems, and their integration into power and thrust generation units; design and off-design behaviors of turbine and compressor stages and units; design with SolidWorks.  
Prerequisites: MEEN 421 or approval of instructor; junior or senior classification.
MEEN 417/NUEN 417 Basics of Plasma Engineering and Applications
Credits 3.3 Lecture Hours.
Basic plasma properties and confinement techniques; single particle orbits in electric and magnetic fields, moments of Boltzmann equation and introduction to fluid theory; wave phenomena in plasmas and introduction to plasma kinetic theory; analysis of laboratory plasmas and plasma applications including fusion, electric propulsion, materials processing and plasmas enhanced chemistry.
Prerequisites: PHYS 208 or equivalent; senior classification in nuclear, mechanical or aerospace engineering, physics, or approval of instructor.
Cross Listing: NUEN 417/MEEN 417.

MEEN 421 Thermal-Fluids Analysis and Design
Credits 3.3 Lecture Hours.
Integration of thermodynamics, fluid mechanics and heat transfer through application to the design of various thermal systems comprised of several components requiring individual analyses; analysis of the entire system; representative applications of thermal-fluids analysis with a design approach.
Prerequisites: MEEN 461; MEEN 315; junior or senior classification.

MEEN 430 Nanomaterials
Credits 3.3 Lecture Hours.
Fundamentals of nanotechnology, including nanomaterials, types of nanomaterials, fabrication, characterization methods, and applications; explore current roles in technology and future impact on such systems on industry.
Prerequisites: Junior or senior classification and approval of instructor.

MEEN 431 Advanced System Dynamics and Controls
Credits 3.3 Lecture Hours.
Unified framework for modeling, analysis, synthesis, design and simulation of mechanical systems with energy exchange across multiple domains; study of mechanical, electrical, hydraulic and thermal subsystems; Newtonian mechanics, rigid body dynamics, multiple degrees of freedom vibrations and control system design.
Prerequisites: MEEN 364; junior or senior classification.

MEEN 432 Automotive Engineering
Credits 3.3 Lecture Hours.
Introduction to vehicle dynamics; application of engineering mechanics principles to analysis of acceleration and braking, cornering and handling; analysis and design of drive train, suspension, brakes, and tires to achieve desired performance.
Prerequisite: MEEN 363.

MEEN 433 Mechatronics
Credits 3.2 Lecture Hours. 3 Lab Hours.
Basic principles of digital logic and analog circuits in mechanical systems; electrical-mechanical interfacing; sensors and actuators; digital control implementation; precision design and system integration.
Prerequisite: MEEN 364 or equivalent.

MEEN 434 Dynamics and Modeling of Mechatronic System
Credits 3.3 Lecture Hours.
Mechatronic interactions in lumped parameter and continuum systems; review of integral and differential electromagnetic laws, including motions; lumped elements and dynamic equations of motion; linear and nonlinear actuators and transducers; field transformation and moving media; electromagnetic force densities and stress tensors.
Prerequisite: MEEN 364.

MEEN 436 Principles of Heating, Ventilating and Air Conditioning
Credits 3.3 Lecture Hours.
Application of thermodynamics fluid mechanics, and heat transfer to the design of HVAC equipment; selection of equipment, piping and duct layouts.
Prerequisite: MEEN 461 or equivalent.

MEEN 437 Principles of Building Energy Analysis
Credits 3.3 Lecture Hours.
Analysis of building energy use by applying thermodynamics and heat transfer to building heating and cooling load calculations; heat balance and radiant time series calculation methods; psychrometric analysis, indoor air quality, effect of solar radiation on heating and cooling of buildings. Required design project.
Prerequisites: MEEN 315 or equivalent; junior or senior classification.

MEEN 441 Design of Mechanical Components and Systems
Credits 3.3 Lecture Hours.
Design of machine elements, characteristics of prime movers, loads and power transmission elements as related to mechanical engineering design.
Prerequisite: MEEN 368 or approval of instructor.

MEEN 442 Computer Aided Engineering
Credits 3.3 Lecture Hours.
Effective and efficient use of modern computer hardware and software in modeling, design, and manufacturing; simulation of a broad spectrum of mechanical engineering problems.
Prerequisites: MEEN 363 and MEEN 368.

MEEN 444 Finite Element Analysis in Mechanical Engineering
Credits 3.3 Lecture Hours.
Introduction to basic theory and techniques; one- and two-dimensional formulations for solid mechanics applications; direct and general approaches; broader aspects for field problems; element equations, assembly and solution schemes; computer implementation, programming and projects; error sources and application consideration.
Prerequisites: MEEN 357 and 368 or equivalents.

MEEN 445 Engineering Applications of Solid Mechanics
Credits 3.3 Lecture Hours.
Mechanical and mathematical basis for modeling response of solid bodies undergoing coupled mechanical and non-mechanical effects, analysis of stress and deformation for structural members subjected to axial, torsional and bending loads, design of multifunctional systems.
Prerequisites: CVEN 305, MEEN 368.

MEEN 451 Viscoelastic Materials
Credits 3.3 Lecture Hours.
Mechanical and mathematical basis for modeling linear viscoelastic materials which focus on polymeric solid materials; characterization of viscoelastic material properties from experimental tests; applications of stress and deformation relationships for viscoelastic structural members subjected to axial, torsional, and bending loads.
Prerequisites: CVEN 305; junior or senior classification.

MEEN 455 Engineering with Plastics
Credits 3.3 Lecture Hours.
Polymer structure, processing, property characterization at the molecular, microscopic and macroscopic dimensional levels for thermosets, thermoplastics, elastomers, fibers and advanced fibrous nanoparticle filled composites and smart multi-performance structures.
Prerequisite: MEEN 222 or approval of instructor.
MEEN 458 Processing and Characterization of Polymers
Credits 3.3 Lecture Hours.
Introduction of flow behavior in polymers; structure-property-process relationship; mixing rules for polymer blends; mechanical properties; laboratory demonstrations: injection molding, extrusion, melt mixing, and study of morphology using OM, SEM, and TEM.
Prerequisite: MEEN 222.

MEEN 459 Sound and Vibration Measurements
Credits 3.3 Lecture Hours.
Basic acoustics, review of vibration theory, wave propagation in vibrating systems, sound radiation from vibrating systems, sound and vibration sensors and instrumentation, data acquisition systems, measurement techniques, spectral analysis, spatial FFT analysis, design of experiments with vibro-acoustic systems, applications.
Prerequisites: MEEN 363, MATH 308.

MEEN 460 Corrosion Engineering
Credits 3.3 Lecture Hours.
Basic corrosion phenomena are described, including mixed potential theory, types of corrosion, experimental methods, and prevention techniques.
Prerequisite: MEEN 360 and MEEN 361, or equivalent.

MEEN 461 Heat Transfer
Credits 3.3 Lecture Hours.
Heat transfer by conduction, convection and radiation: steady and transient conduction, forced and natural convection, and blackbody and gray body radiation; multi-mode heat transfer; boiling and condensation; heat exchangers.
Prerequisites: MEEN 344; MATH 308.

MEEN 463 Cogeneration Systems
Credits 3.3 Lecture Hours.
Design and analysis of cogeneration system; selection of the prime mover, matching power and thermal needs, institutional factors, economic evaluations, financial options and the study of actual and hypothetical systems.
Prerequisite: MEEN 421 or equivalent.

MEEN 464 Heat Transfer Laboratory
Credit 1.3 Lab Hours.
Basic measurement techniques in conduction, convection, and radiation heat transfer; experimental verification of theoretical and semi-empirical results; uncertainty analysis.
Prerequisite: MEEN 345, MEEN 461 or registration therein.

MEEN 467 Mechanical Behavior of Materials
Credits 3.3 Lecture Hours.
Fundamentals of flow and fracture in metals, emphasizing safe design by anticipating response of materials to complex stress and environmental service conditions; micromechanisms of flow, fatigue, creep and fracture; fracture mechanics approach to design. Special emphasis given to microstructure-mechanical property relationship and damage tolerant design.
Prerequisite: MEEN 360 and MEEN 361.

MEEN 471 Elements of Composite Materials
Credits 3.3 Lecture Hours.
Fundamentals concerned with relating structure of multiphase materials to physical properties; plastic, metallic and ceramic matrices reinforced with continuous and discontinuous fibers, whiskers and particulates.
Prerequisites: MEEN 360, MEEN 361, and MEEN 368 or approval of instructor.

MEEN 472 Gas Dynamics
Credits 3.3 Lecture Hours.
Fundamental analysis of compressible flows and its application to supersonic airfoils/projectiles, jet and rocket nozzles, normal and oblique shock waves, explosion waves, shock tubes, supersonic wind tunnels, and compressible pipe flows.
Prerequisite: MEEN 344.

MEEN 475 Materials in Design
Credits 3.3 Lecture Hours.
The heuristics of synthesis of material properties, configuration and processing in the optimization of material selection in the design process; product design and development overview, failure mode effects analysis, design margin establishment; role of the generic failure modes and codes and standards; fundamental characteristics of process methods.
Prerequisites: MEEN 360 and MEEN 361; CVEN 305.

MEEN 476 Nanoscale Issues in Manufacturing
Credits 3.3 Lecture Hours.
Fundamentals of manufacturing techniques at the nanoscale and larger length scales; design approaches and issues; direct fabrication of nanostructures; nanomanufacturing as a building block to larger objects; fabrication of composites and devices utilizing nanoscale components.
Prerequisites: MEEN 222 or approval of instructor; junior or senior classification.

MEEN 477 Air Pollution Engineering
Credits 3.3 Lecture Hours.
Design of air pollution abatement equipment and systems to include cyclones, bag filters, and scrubbers; air pollution regulations; permitting; dispersion modeling; National Ambient Air Quality Standards.
Prerequisite: ENGR 214 or equivalent.
Cross Listing: BAEN 477 and SENG 477.

MEEN 485 Directed Studies
Credits 1 to 6.1 to 6 Other Hours.
Special problems relating to a specific project in some phase of mechanical engineering. A commitment of two semesters with 6 hours 485 credit is required.
Prerequisites: Approval of department head and senior classification.

MEEN 489 Special Topics in...
Credits 1 to 4.1 to 4 Lecture Hours.
Selected topics in an identified area of mechanical engineering.
Prerequisite: Approval of instructor.

MEEN 491 Research
Credits 1 to 4.1 to 4 Other Hours.
Research conducted under the direction of faculty member in mechanical engineering. May be repeated 2 times for credit. Registration in multiple sections of this course is possible within a given semester provided that the per semester credit hour limit is not exceeded.
Prerequisites: Junior or senior classification and approval of instructor.

MEEN 601 Advanced Product Design
Credits 3.3 Lecture Hours.
Design methodology, functional design, innovation, parameter analysis, design for reliability, manufacturability and strength; design project.
Prerequisite: MEEN 402 or equivalent.
MEEN 603/AERO 605 Theory of Elasticity
Credits 3. 3 Lecture Hours.
Analysis of stress and strain in two and three dimensions, equilibrium and compatibility equations, strain energy methods; torsion of noncircular sections; flexure; axially symmetric problems.
Cross Listing: AERO 605/MEEN 603.

MEEN 606/MSEN 626 Polymer Laboratories
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Introduction to basic experimental skills relating to polymers; experiments include polymerization, molecular weight determination, FTIR, tensile test, NMR, DSC, swelling index, viscosity, x-ray diffraction.
Cross Listing: MSEN 626/MEEN 606.

MEEN 607/MSEN 607 Polymer Physical Properties
Credits 3. 3 Lecture Hours.
Macromolecular concepts; molecular weight characterization; solubility parameters; phase diagrams; viscoelasticity; rheology; thermal behavior; damage phenomena, morphology; crystallization; liquid crystallinity; nanocomposites.
Prerequisite: MEEN 222 or equivalent.
Cross Listing: MSEN 607/MEEN 607.

MEEN 608/MEMA 602 Continuum Mechanics
Credits 3. 3 Lecture Hours.
Development of field equations for analysis of continua (solids as well as fluids); conservation laws: kinematics, constitutive behavior of solids and fluids; applications to aerospace engineering problems involving solids and fluids.
Prerequisite: Graduate classification.
Cross Listing: MEMA 602/AERO 603.

MEEN 609 Materials Science
Credits 3. 3 Lecture Hours.
Structure and properties of solid materials.
Prerequisites: Undergraduate level Materials, Science and Engineering course.

MEEN 610 Applied Polymer Science
Credits 3. 3 Lecture Hours.
Macromolecular concepts, molecular weight, tacticity, theory of solutions, rubber elasticity, thermal transitions, rheology, crystallinity, heterogeneous systems and relation of mechanical and physical characteristics to chemical structure; applications to polymer blends, thermosetting resins, structural adhesives and composites; design and processing of fibrous composites.
Prerequisite: Graduate classification; ENGR 213.

MEEN 612 Mechanics of Robot Manipulators
Credits 3. 3 Lecture Hours.
Kinematics, dynamics and control of industrial robot manipulators.
Prerequisites: MEEN 364 and MEEN 411 or approval of instructor.

MEEN 613 Engineering Dynamics
Credits 3. 3 Lecture Hours.
Three dimensional study of dynamics of particles and rigid bodies and application to engineering problems; introduction to Lagrange equations of motion and Hamilton’s principle.
Prerequisites: MEEN 363; MATH 308.

MEEN 614 Design and Modeling of Viscoelastic Structures
Credits 3. 3 Lecture Hours.
To provide the mechanical and mathematical basis for modeling linear viscoelastic materials.
Prerequisite: CVEN 305 or equivalent.

MEEN 615 Advanced Engineering Thermodynamics
Credits 3. 3 Lecture Hours.
Theories of thermodynamics and their application to more involved problems in engineering practice and design; equilibrium, Gibbs’ function, nonideal gases and various equations of state; second law analysis and statistical theory.
Prerequisite: MEEN 421 or equivalent.

MEEN 616/MSEN 616 Surface Science
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Properties of surfaces, principles of classic and contemporary surface characterization techniques, recent development and roles of surface science in advanced technology.
Prerequisite: Graduate classification.
Cross Listing: MSEN 616/MEEN 616.

MEEN 617 Mechanical Vibrations
Credits 3. 3 Lecture Hours.
Prerequisites: MEEN 364; MATH 308.

MEEN 618 Energy Methods
Credits 3. 3 Lecture Hours.
Principles of virtual work, minimum total potential energy and extremum mixed variational principles; energy theorems of structural mechanics; Hamilton’s principle for dynamical systems; Rayleigh-Ritz Galerkin, and weighted-residual methods; applications to linear and nonlinear problems in mechanics (bars, beams, frames, plates and general boundary value problems).
Prerequisites: MATH 601 or registration therein.

MEEN 619 Conduction and Radiation
Credits 3. 3 Lecture Hours.
Solutions of steady and transient problems with method of separation of variables, finite difference numerical methods, Duhane’s Theorem, Green’s function, and Laplace transform, the phase change problems. View factors; radiative properties of surfaces and participating media, radiative exchange; gas radiation; and advanced solution methods for thermal radiation.
Prerequisite: MEEN 461.

MEEN 620/MSEN 620 Kinetic Processes in Materials Science
Credits 3. 3 Lecture Hours.
Atomistic and mesoscale levels; foundation for microstructural evolution and behavior of materials; basic and irreversible thermodynamics; diffusion equations solutions; atomistic diffusion, nucleation; phase transformations: gas-solid, liquid-solid and solid-solid reactions; FiPy (finite volume solver for PDE) to simulate kinetic processes.
Prerequisites: MEEN 222 or equivalent materials science course; preliminary general thermodynamics course is not necessary.
Cross Listing: MSEN 620/MEEN 620.

MEEN 621 Fluid Mechanics
Credits 3. 3 Lecture Hours.
Dynamics of two-dimensional incompressible and compressible fluids: viscous flow in laminar and turbulent layers, the Navier-Stokes equations and boundary layer theory.
Prerequisite: MEEN 344 or equivalent.
MEEN 622 Advanced Fluid Mechanics
Credits 3.3 Lecture Hours.
Laminar viscous flows; hydrodynamic stability; transition to turbulence; special topics include atomization, two-phase flows and non-linear theories.
Prerequisites: MEEN 621 or equivalent; MATH 601 or equivalent.

MEEN 624 Two-Phase Flow and Heat Transfer
Credits 3.3 Lecture Hours.
Current status of two-phase flow and heat transfer for application to design; basic one dimensional treatment of two-phase flows and the current state of the art in liquid-vapor phase change heat transfer.
Prerequisite: Undergraduate courses in fluid mechanics and heat transfer.

MEEN 625/MSEN 625 Mechanical Behavior of Materials
Credits 3.3 Lecture Hours.
Examination of deformation and microstructure mechanisms responsible for deformation and failure in metals; fatigue, creep, and fracture mechanisms of materials; emphasis on microstructural-mechanical property relationship.
Prerequisite: Undergraduate-level materials science course.
Cross Listing: MSEN 625/MEEN 625.

MEEN 626 Lubrication Theory
Credits 3.3 Lecture Hours.
Development of Reynolds equation from Navier-Stokes equation for study of hydrodynamic lubrication theory as basis for bearing design; application to simple thrust and journal bearings and pads of various geometries; hydrostatic lubrication, floating ring bearing, compressible fluid (gas) lubrication, grease lubrication, dynamically loaded bearings, half speed whirl and stability.
Prerequisites: MEEN 344 or equivalent; MATH 308.

MEEN 627 Heat Transfer-Conduction
Credits 3.3 Lecture Hours.
Mathematical theory of steady-state and transient heat conduction; solution of the governing differential equations by analytical and numerical methods; applications to various geometric configurations.
Prerequisites: MEEN 461; MATH 601 or registration therein.

MEEN 628 Heat Transfer-Convection
Credits 3.3 Lecture Hours.
Mathematical theory of convection energy transport; applications to the design of heat transfer apparatus.
Prerequisites: MEEN 461; MATH 601 or registration therein.

MEEN 629 Heat Transfer-Radiation
Credits 3.3 Lecture Hours.
Mathematical theory of thermal radiation with design applications; ideal and nonideal radiating surfaces, heat transfer in enclosures, solar radiation; analytical, numerical and analogical methods stressed in problem solving.
Prerequisites: MEEN 461; MATH 601 or registration therein.

MEEN 630 Intermediate Heat Transfer
Credits 3.3 Lecture Hours.
Application of basic laws to the analysis of heat and mass transfer; exact and approximate solutions to conduction, convection and radiation problems; current status of single and two-phase heat transfer for application to design.
Prerequisites: Undergraduate courses in fluid mechanics and heat transfer.

MEEN 631 Microscale Thermodynamics
Credits 3.3 Lecture Hours.
An understanding of thermodynamics and transport properties from a microscopic viewpoint; principles of quantum mechanics; atomic and molecular contribution to thermodynamic properties; kinetic theory and transport properties.
Prerequisite: Graduate classification.

MEEN 632 Advanced Computer-Aided Engineering
Credits 3.3 Lecture Hours.
An integrated learning environment that is responsive to industrial need for mechanical engineers with multi-disciplinary design skills; three essentials emphasized in strong teamwork environment; design concept development, design optimization and effective communication via engineering drawings.
Prerequisite: Graduate classification in mechanical engineering.

MEEN 633 Combustion Science and Engineering
Credits 3.3 Lecture Hours.
Fuels and combustion, mass transfer, transport properties, conservation laws, droplet, particle and slurry combustion, sprays, combustion in flow systems flammability, ignition, extinction, flame stability, laminar and detonation waves, premixed flames, application to burners--residential, utility and transportation, fluidized bed combustors, and fire and flame spread of modern building materials.
Prerequisites: MEEN 421, MEEN 344, MEEN 461 or equivalents.

MEEN 634 Dynamics and Modeling of Mechatronic Systems
Credits 3.3 Lecture Hours.
Mechatronic interactions in lumped-parameter and continuum systems.
Prerequisites: MEEN 364, MATH 308, MEEN 357.

MEEN 635 Flow and Fracture of Polymeric Solids
Credits 3.3 Lecture Hours.
Relationship of molecular structure to flow and fracture in polymeric materials; introduction of viscoelastic fracture mechanics; micromechanisms of fracture including crazing; fatigue behavior of polymeric materials.

MEEN 636 Turbulence: Theory and Engineering Applications
Credits 3.3 Lecture Hours.
Characteristics, concepts, and relationships of detailed turbulent flow analysis and measurement; turbulence origin, energy production, cascade and dissipation; correlation functions, spectra and length scales; closure modeling of the Reynolds-averaged governing equations.
Prerequisites: MEEN 621.

MEEN 637 Turbulence Measurement and Analysis
Credits 3.3 Lecture Hours.
Instrumentation and measurement techniques used in turbulent flow field analysis with emphasis on understanding the characteristics of the turbulence. Pressure probes, hot-wire/hot-film anemometry, laser anemometry, spectral and temporal analysis techniques, conditional sampling and computer applications.
Prerequisite: MEEN 344.

MEEN 638 Mechanics of Non-Linear Fluids
Credits 3.3 Lecture Hours.
Introduction to classifications of flows, constitutive theory, fluids of the differential type.
Prerequisites: Graduate classification and approval of instructor.
MEEN 639 Dynamics of Rotating Machinery
Credits 3.3 Lecture Hours.
Dynamic stability, critical speeds and unbalanced response of rotor-bearing systems; special problems encountered in modern applications operating through and above critical speeds.
Prerequisites: MEEN 363 or equivalent and graduate classification or approval of the instructor.

MEEN 640/MSEN 640 Thermodynamics in Materials Science
Credits 3.3 Lecture Hours.
Use of thermodynamic methods to predict behavior of materials; codification of thermodynamic properties into simplified models; principles, methods, and models to generate accurate equilibrium maps through computational thermodynamics software; applications to bulk metallic, polymeric and ceramic materials, defects, thin films, electrochemistry, magnetism.
Prerequisites: MEEN 222 or equivalent; graduate classification. Cross Listing: MSEN 640/MEEN 640.

MEEN 641 Quantitative Feedback Theory
Credits 3.3 Lecture Hours.
Benefits of feedback and cost of feedback; understanding extent to which available design theories meet realistic design constraints; treating the synthesis problem from a quantitative viewpoint; quantitative feedback theory as an effective tool for realistic feedback design problems for multivariable systems having both minimum and non-minimum phase zeros.
Prerequisite: MEEN 651 or equivalent.

MEEN 642 Gas Turbine Heat Transfer and Cooling Technology
Credits 3.3 Lecture Hours.
Focus on the range of gas turbine heat transfer issues and associated cooling technologies; fundamentals, turbine heat transfer, turbine film cooling, turbine internal cooling with rotation, experimental methods, numerical modeling and final remarks; provide solid background for research and design in turbomachinery heat transfer.
Prerequisites: MEEN 344, MEEN 461, and graduate standing.

MEEN 643 Experimental Methods in Heat Transfer and Fluid Mechanics
Credits 3.3 Lecture Hours.
Experimental methods including experiment planning and design, mechanics of measurements, error and uncertainty analysis, standards and calibration, temperature measurement, interferometry, flow rate measurement, hot wire anemometry, subsonic and supersonic flow visualization and data analysis; selected experiments conducted.
Prerequisite: Graduate classification.

MEEN 644/NUEN 644 Numerical Heat Transfer and Fluid Flow
Credits 3.3 Lecture Hours.
Convection-diffusion, up-wind, exponential, exact solution, power law schemes, false diffusion; staggered grid concept; development of simple and simpler algorithms; periodically developed flows.
Prerequisites: MEEN 357 and MEEN 461; NUEN 430 or equivalent. Cross Listing: NUEN 644/MEEN 644.

MEEN 645 Engineering Applications of Solid Mechanics
Credits 3.3 Lecture Hours.
Mechanical and mathematical basis for modeling response of solid bodies undergoing coupled mechanical and non-mechanical effects, analysis of stress and deformation for structural members subjected to axial, torsional and bending loads, design of multifunctional systems.
Prerequisites: CVEN 305, MEEN 368, or equivalent.

MEEN 646 Aerothermodynamics of Turbomachines
Credits 3.3 Lecture Hours.
Fluid mechanics and thermodynamics as applied to the design of rotating systems; development of turbomachinery equations; detailed aerodynamic design of compressors and turbines.
Prerequisites: MEEN 414 and MEEN 472; MATH 601 or approval of instructor.

MEEN 648/ISEN 654 Manufacturing Systems Planning and Analysis
Credits 3.3 Lecture Hours.
The system perspective of a computer integrated manufacturing system; manufacturing and its various levels and the planning and control of product movement through the production system in the context of using real-time control, multiprocessor systems, network architectures and databases.

MEEN 649 Nonlinear Vibrations
Credits 3.3 Lecture Hours.
Exact and approximate solutions to nonlinear differential equations in mechanical vibrations; application of classical methods in nonlinear analysis such as the Method of Perturbations and Variation of Parameters; virtual Work Technique and the Modified Galerkin Method; applications to selected nonlinear problems.
Prerequisites: Course in differential equations; graduate classification.

MEEN 650/ISEN 655 Control Issues in Computer Integrated Manufacturing
Credits 3.3 Lecture Hours.
Examines the nature of computer aided manufacturing systems with emphasis in control; presentation of architecture for control of CAM systems; control issues; study and development of problems and procedures to control CAM systems.
Prerequisite: ISEN 654/MEEN 648 or approval of instructor. Cross Listing: ISEN 655/MEEN 650.

MEEN 651 Control System Design
Credits 3.3 Lecture Hours.
Frequency domain design of SISO systems for performance and sensitivity reduction; applications of Kalman filter and LQG/LTR techniques; design of sample-data systems; active control of vibration in distributed parameter systems; describing function and relay controls; application of control principles to engineering design.
Prerequisite: MEEN 411.

MEEN 652 Multivariable Control System Design
Credits 3.3 Lecture Hours.
Advanced issues relevant to the design of multivariable control systems using hybrid (time and frequency domain) design methodologies; design using the LQG/LTR method and advanced practical applications using various robust control system design techniques.
Prerequisite: MEEN 651 or ECEN 605.

MEEN 653 Scientific Writing
Credits 3.3 Lecture Hours.
Topics include origin and development of scientific writing, research methods, outlines, paper organization, journal selection, strategies to build a productive personal writing culture, effective communication, critical reviews and submission; preparation of an original manuscript for submission to a peer-reviewed journal by the end of the semester.
Prerequisites: Graduate classification and approval of instructor.
MEEN 655 Design of Nonlinear Control Systems  
Credits 3.3 Lecture Hours.  
Design controllers for nonlinear and uncertain systems; apply the designs to mechanical systems.  
Prerequisite: Graduate classification, MEEN 651 or equivalent.

MEEN 656/MSEN 656 Mechanical and Physical Properties of Thin Films  
Credits 3.3 Lecture Hours.  
Mechanical properties (hardness, stress, strain, delamination, fracture) of films; nanomechanical testing techniques; electrical properties of thin films; electrical properties measurement techniques; magnetic properties of films; magnetic properties measurement techniques; laboratory includes (1) thin film fabrication (sputtering, PVD); (2) nanomechanical testing; (3) electrical/magnetic measurement.  
Prerequisite: MEEN 222, MSEN 601, or basic materials science background.  
Cross Listing: MSEN 656/MEEN 656.

MEEN 657 Viscoelasticity of Solids and Structures I  
Credits 3.3 Lecture Hours.  
Linear, viscoelastic mechanical property characterization methods, time-temperature equivalence, multiaxial stress-strain equations; viscoelastic stress analysis; the correspondence principle, approximate methods of analysis and Laplace transform inversion, special methods; static and dynamic engineering applications; nonlinear behavior.  
Prerequisite: Mechanics of Materials (CVEN 305 or equiv).

MEEN 658/MSEN 658 Fundamentals of Ceramics  
Credits 3.3 Lecture Hours.  
Atomic bonding; crystalline and glassy structure; phase equilibria and ceramic reactions; mechanical, electrical, thermal, dielectric, magnetic, and optical properties; ceramic processing.  
Prerequisite: MEEN 222 or equivalent or approval of instructor.  
Cross Listing: MSEN 658/MEEN 658.

MEEN 659 Vibration Measurement in Rotating Machinery and Machine Structures  
Credits 3.3 Lecture Hours.  
Transducers, instruments, measurement techniques, data acquisition methods, data reduction methods for modal analysis, applications to rotating machines, turbomachinery rotordynamics, bearings, gears and machine foundations.  
Prerequisites: MEEN 459, MEEN 617 or MEEN 639; graduate classification.

MEEN 661/MEMA 613 Principles of Composite Materials  
Credits 3.3 Lecture Hours.  
Classification and characteristics of composite materials; micromechanical and macromechanical behavior of composite laminae; macromechanical behavior of laminates using classical laminate theory; interlaminar stresses and failure modes; structural design concepts, testing and manufacturing techniques.  
Prerequisites: CVEN 305 or equivalent.  
Cross Listing: MEMA 613.

MEEN 662 Energy Management in Industry  
Credits 3.3 Lecture Hours.  
Energy systems and components frequently encountered in industrial environments; application of basic principles of thermodynamics, heat transfer, fluid mechanics and electrical machinery to the analysis and design of industrial system components and systems. Improved energy utilization.  
Prerequisites: MEEN 421 and MEEN 461 or approval of instructor.

MEEN 663 Cogeneration Systems  
Credits 3.3 Lecture Hours.  
Design and analysis of cogeneration systems; selection of prime mover-steam turbine, gas turbine, or reciprocating engine; environmental assessments; economic and financial evaluations; legal and institutional considerations; case studies.  
Prerequisite: MEEN 421 or equivalent.

MEEN 664 Energy Management in Commercial Buildings  
Credits 3.3 Lecture Hours.  
Basic heating, ventilating and air conditioning system design/selection criteria for air conditioning and heat system and design/selection of central plant components and equipment.  
Prerequisites: MEEN 661 and MEEN 461 or approval of instructor.

MEEN 665 Application of Energy Management  
Credits 3.3 Lecture Hours.  
Continuation of MEEN 662 and 664; case studies by students of energy conservation opportunities using energy audits and building load computer simulation.  
Prerequisites: MEEN 662 and MEEN 664 or approval of instructor.

MEEN 666 Plasticity Theory  
Credits 3.3 Lecture Hours.  
Theory of plastic yield and flow of two and three-dimensional bodies; classical plasticity theories, unified viscoplastic theories, numerical considerations; applications and comparisons of theory to experiment.  
Prerequisite: MEMA 602/AERO 603, MEEN 689 or equivalent.  
Cross Listing: MSEN 641 and MEMA 641.

MEEN 667 Mechatronics  
Credits 3.2 Lecture Hours. 3 Lab Hours.  
Mechatronics; logic circuits in mechanical systems; electrical-mechanical interfacing; analysis and applications of computerized machinery.  
Prerequisite: Graduate classification in engineering.

MEEN 668 Rotordynamics  
Credits 3.3 Lecture Hours.  
Teaches the phenomena which occur in rotordynamics of turbomachinery, modeling techniques for turbomachines, and analysis techniques for rotordynamics analysis of real machines.  
Prerequisite: Graduate classification.

MEEN 672 Introduction to Finite Element Method  
Credits 3.3 Lecture Hours.  
Weak or variational formulation of differential equations governing one- and two-dimensional problems of engineering; finite element model development and analysis of standard problems of solid mechanics (bars, beams, and plane elasticity), heat transfer and fluid mechanics; time-dependent problems; computer implementation and use of simple finite element codes in solving engineering problems.  
Prerequisite: Senior or graduate classification.

MEEN 673/MEMA 648 Nonlinear Finite Element Methods in Structural Mechanics  
Credits 3.3 Lecture Hours.  
Tensor definitions of stress and strain, finite strain, geometric and material nonlinearities; development on nonlinear finite element equations from virtual work; total and updated Lagrangian formulations; solution methods for nonlinear equations; computational considerations; applications using existing computer programs.  
Prerequisites: MEMA 647/MEEN 670.  
Cross Listing: MEMA 648.
MEEN 674/ECEN 608 Modern Control
Credits 3. 3 Lecture Hours.
Vector Norms, Induced Operator Norm; Lp stability; the small gain theorem; performance/robustness tradeoffs; H1 and H00 optimal control as operator norm minimization; H2 optimal control.
Prerequisite: ECEN 605 or equivalent.
Cross Listing: ECEN 608/MEEN 674.

MEEN 675/ECEN 609 Adaptive Control
Credits 3. 3 Lecture Hours.
Basic principles of parameter identification and parameter adaptive control; robustness and examples of instability; development of a unified approach to the design of robust adaptive schemes.
Prerequisite: ECEN 605 or equivalent.
Cross Listing: ECEN 609/MEEN 675.

MEEN 676/CSCE 639 Fuzzy Logic and Intelligent Systems
Credits 3. 3 Lecture Hours.
Introduces the basics of fuzzy logic and its role in developing intelligent systems; topics include fuzzy set theory, fuzzy rule inference, fuzzy logic in control, fuzzy pattern recognition, neural fuzzy systems, and fuzzy model identification using genetic algorithms.
Prerequisite: CSCE 625 or approval of instructor.
Cross Listing: CSCE 639/MEEN 676.

MEEN 677/NUEN 677 Aerosol Science
Credits 3. 3 Lecture Hours.
Multidisciplinary survey of methods for describing aerosol particles and systems: gas kinetics and transport theory, formation and growth thermodynamics, electrical properties, coagulation, light scattering; selected topics from current literature.
Prerequisite: Graduate classification in engineering or approval of instructor.
Cross Listing: NUEN 677/MEEN 677.

MEEN 678 Aerosol Mechanics
Credits 3. 3 Lecture Hours.
Provides the basis for understanding and modeling aerosol behavior; mechanical, fluid dynamical, electrical, optical and molecular effects are considered; applications include sprays and atomization, aerosol collection, aerosol sampling and visibility.
Prerequisite: Graduate classification in engineering or approval of instructor.

MEEN 679 Spectral Methods in Heat Transfer and Fluid Flow
Credits 3. 3 Lecture Hours.
Introduces theoretical and applications aspects of spectral and multi-domain spectral methods for computational heat transfer and fluid flow problems.
Prerequisites: MEEN 357, MEEN 344, MEEN 461; graduate classification.

MEEN 681 Seminar
Credit 1. 1 Lab Hour.
Current research in a wide range of fields described by guest lecturers who are prominent in their fields. Discussion period at the end of each lecture will permit the students to learn more about the lecturer and his/her work.
Prerequisite: Graduate classification in mechanical engineering.

MEEN 684 Professional Internship
Credits 1 to 16. 1 to 16 Other Hours.
Supervised work in an area closely related to the specialized field of study undertaken by a Master of Engineering candidate.
Prerequisite: Admission to a specialized Master of Engineering program in mechanical engineering.

MEEN 685 Directed Studies
Credits 1 to 12. 1 to 12 Other Hours.
Content will be adapted to interest and needs of group enrolled.

MEEN 686/MSEN 618 Composite Materials Processing and Performance
Credits 3. 3 Lecture Hours.
Fundamental science and design; processing and design interaction regarding multiphase composites; processing science, experimental characterization, laminate analysis; design structure and process.
Prerequisite: Elasticity, continuum mechanics, or equivalent.
Cross Listing: MSEN 618/MEEN 686.

MEEN 688 Advanced Solid Mechanics
Credits 3. 3 Lecture Hours.
Derive approximate solutions of engineering mechanics problems by using suitable assumptions; understand the nature of the approximations and their effects on the accuracy of the resulting mechanics-of-materials solutions; apply the principles of advanced mechanics of materials to analyze deformation and failure problems common in engineering design and materials science; prepare for success in more advanced mechanics courses such as elasticity, energy methods, continuum mechanics and plasticity.
Prerequisite: Mechanics of materials, advanced calculus, differential equations.

MEEN 689 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Special topics in an identified area of mechanical engineering. May be repeated for credit.
Prerequisite: Approval of instructor.

MEEN 691 Research
Credits 1 to 23. 1 to 23 Other Hours.
Methods and practice in mechanical engineering research for thesis or dissertation.

MEEN 692 Professional Study
Credits 1 to 9. 1 to 9 Other Hours.
Approved professional study or project; may be taken more than once, but not to exceed 6 hours of credit toward a degree. Must be taken on a satisfactory/unsatisfactory basis.
Prerequisite: Approval of instructor.

MEFB - Mid Grds Ed Field Based

Courses

MEFB 351 Introduction to Middle Grades: Adolescent Development, Philosophy and Organization
Credits 3. 2 Lecture Hours. 6 Lab Hours.
Study of young adolescents in domains of physical, social, emotional, cognitive, interpersonal, moral growth and development; organizational structure of middle schools supporting development of young adolescents through teaming and interdisciplinary work; investigates roles and responsibilities of middle level teachers.
Prerequisite: Junior classification.
MEFB 450 Social Studies Methods in the Middle Grades
Credits 3. 2 Lecture Hours. 6 Other Hours.
Trends and issues related to middle grades curriculum development and instruction in social studies and humanities; integration of content, planning, teaching-learning experiences; evaluation of teaching and learning in social studies.
Prerequisites: MEFB 352; admission to teacher education; senior classification.
Corequisites: RDNG 470 and RDNG 490.

MEFB 452 Curriculum and Instruction for Middle Grades
Credits 3. 2 Lecture Hours. 6 Other Hours.
Study of educational theory and instructional strategies appropriate to middle grades education including planning and development of interdisciplinary and multidisciplinary curricula; student centered learning and methodologies.
Prerequisites: Admission to teacher education; senior classification.
Corequisites: MEFB 452, MEFB 470, RDNG 490.

MEFB 460 Math Methods in Middle Grades
Credits 3. 2 Lecture Hours. 6 Other Hours.
Examines theories, provides practice in teaching methods essential to successful mathematics learning; focuses on content and criteria central to teaching mathematics for understanding, skill development, and problem solving; readings, discussions, analyses; modeling and practicing mathematics teaching and learning.
Prerequisites: MASC 351 and MASC 450; admission to teacher education; senior classification.
Corequisites: MEFB 452, MEFB 470, RDNG 490.

MEFB 470 Science Methods in Middle Grades
Credits 3. 2 Lecture Hours. 6 Other Hours.
Problems-based-learning course integrating science content, scientific inquiry skills and field-based instruction; technology-mediated teaching, learning, and assessment.
Prerequisites: MEFB 352; admission to teacher education; senior classification.
Corequisites: MEFB 460; MASC 450.

MEFB 497 Supervised Clinical Teaching
Credits 6. 30 Other Hours.
Culmination of teaching education program; integrate and apply knowledge and skills learned from program of study while observing and participating in accredited schools with university supervision. Must be taken on a satisfactory/unsatisfactory basis.
Prerequisites: Admission and retention in teacher education program; successful completion of all coursework.

MEPS 316 Introduction to Theory and Practice of Plant Physiology
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Theory of plant physiology related to purposeful practices for improving plant adaptation, productivity and quality and for protecting and remediating environments in agriculture; laboratory experiments of physiology of plant structure, components and culture; water relations and stress; nitrogen and mineral nutrition; gas exchange; hormonal regulation.
Prerequisites: BIOL 101; CHEM 101; junior or senior classification.

MEFB 411/GENE 411 Biotechnology for Crop Improvement
Credits 3. 3 Lecture Hours.
Use of biotechnology to improve agricultural, horticultural and forest crops; techniques and methods used and case studies where biotechnology has been used to alter traits such as pathogen resistance, protein or oil consumption, ripening, fertility and wood properties.
Prerequisite: BIOL 113 or equivalent.
Cross Listing: GENE 411/MEPS 411.

MEFS 485 Directed Studies
Credits 1 to 4. 1 to 4 Other Hours.
Individual problems or research not covered by other coursework. Report required.
Prerequisites: Junior or senior classification and prior approval of instructor or department head.

MEFS 489 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Selected topics in an identified area of plant physiology. May be repeated for credit.

MEFS 491 Research
Credits 1 to 4. 1 to 4 Other Hours.
Research conducted under the direction of faculty member in molecular and environmental plant sciences. May be repeated 3 times for credit. Registration in multiple sections of this course are possible within a given semester provided that the per semester credit hour limit is not exceeded.
Prerequisites: Junior or senior classification and approval of instructor.

MEFS 601 Physiology of Plants
Credits 3. 3 Lecture Hours.
Advanced physiology of higher plants, includes water relations, mineral metabolism, biochemistry, growth, development, hormones, environmental signals and stress physiology. Emphasis on current literature and research trends; cellular and sub-cellular mechanisms related to whole plant behavior.
Prerequisites: BICH 410 and MEFS 313 or approval of instructor.

MEFS 605 Plant Biochemistry
Credits 3. 3 Lecture Hours.
Major metabolic pathways in plant metabolism; emphasis on biochemistry unique to plants.
Prerequisites: BICH 410; MEFS 313.

MEFS 610/HORT 610 Physiological and Molecular Basis for Plant Stress Response
Credits 3. 3 Lecture Hours.
Provide the tools to understand the molecular and physiological consequences caused by environmental factors (abiotic and biotic) on plant growth and development and the mechanisms of stress adaptation to stress.
Prerequisite: MEFS 313 or equivalent.
Cross Listing: HORT 610/MEFS 610.
MEPS 618/HORT 618 Root Biology
Credits 3. 3 Lecture Hours.
Basic concepts and current topics in root-soil ecology; managed and natural ecosystems including grasslands, cropping systems and forests; role of roots in the rhizosphere, the effects of soil, nutrient and water stress and climate change in C and N cycling and carbon sequestration; participate in discussions and critique recent literature.
Prerequisite: Approval of instructor.
Cross Listing: HORT 618/MEPS 618.

MEPS 619 Plant-Associated Microorganisms
Credits 3. 3 Lecture Hours.
Basic concepts and current topics in plant-microbe interactions including the diversity of plant-associated microorganisms; the plant as a microbial environment; endophytes; microbial roles in plant nutrition and fitness; uses of microorganisms for improved plant health and sustainable agriculture; microbial roles in food safety and future challenges; discussion of current literature.
Prerequisites: Basic plant biology or plant ecology is recommended; microbiology is helpful, but not required. Cross listed with HORT 619 and MEPS 619.

MEPS 620 Plant Cell Structure and Function
Credits 3. 3 Lecture Hours.
Overview of plant cell organization, function and physiology to incorporate whole-plant processes with sub-cellular, molecular and genetic mechanisms; origin of eukaryotic cells, nuclear organization and processes, cell cycle, organelle biogenesis and inheritance, photosynthesis, endomembrane system, cell trafficking, symplast, cytoskeleton, extracellular matrix, cell wall, disease, plant microbe interaction, development and differentiation.
Prerequisites: MEPS 313 or equivalent, graduate classification, or permission of the instructor.

MEPS 650 Plant Cell Culture for Crop Improvement
Credits 3. 3 Lecture Hours. 1 Lab Hour.
Focus on techniques in plant cell culture which can be applied to all crop plants, including agronomic crops, horticulture and forestry crops for germplasm improvement.
Prerequisites: MEPS 313; CHEM 101; graduate classification.

MEPS 654 Analysis of Complex Genomes
Credits 3. 3 Lecture Hours.
History and current status of genetic and molecular analysis of higher eukaryotic genomes; coverage of techniques for dissection of genomes into manageable parts; investigations in genetics, breeding and evolution; emphasis on quantitative inheritance, genetic mapping, physical mapping, map-based cloning, with examples drawn from a wide range of organisms.
Prerequisite: GENE 603.
Cross Listing: GENE 654 and SCSC 654.

MEPS 655 Analysis of Complex Genomes—Lab
Credits 3. 7 Lab Hours.
Analysis of Complex Genomes—Lab. Laboratory methods in molecular genetic techniques for genetic mapping, physical mapping, and map-based cloning of both qualitative and quantitative phenotypes.
Prerequisite: GENE 603 or equivalent or approval of instructor.
Cross Listing: SCSC 655 and GENE 655.

MEPS 671/SCSC 671 Plant Growth and Development
Credits 3. 3 Lecture Hours.
Comprehensive analysis of plant development primarily focused on the molecular and cellular processes underlying morphogenesis, vegetative growth and reproduction; role of the major phytohormones as coordinators of development will be analyzed; plastic development responses to conditioning environmental signals.
Prerequisites: MEPS 601 or approval of instructor.
Cross Listing: SCSC 671/MEPS 671.

MEPS 681 Seminar
Credit 1. 1 Other Hour.
Professional development for students pursuing careers in plant physiology; oral and poster presentations, writing skills, grantsmanship, job search and the promotion and tenure process.

MEPS 685 Directed Studies
Credits 1 to 4. 1 to 4 Other Hours.
Individual problems or research not pertaining to thesis or dissertation.
Prerequisite: MEPS 313.

MEPS 689 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours. 1 to 4 Lab Hours.
Selected topics in an identified area of plant physiology. May be repeated for credit.
Prerequisite: Approval of instructor.

MEPS 691 Research
Credits 1 to 23. 1 to 23 Other Hours.
Original investigations in support of thesis or dissertation.

MGMT - Management

Courses

MGMT 105 Introduction to Business
Credits 3. 3 Lecture Hours.
(BUSI 1301) Introduction to Business. Survey of economic systems, forms of business ownership and running the small business; organizing and managing businesses; managing human resources; managing production and information; managing marketing; introducing financial issues and processes to small businesses; consumer and social responsibility; contemporary public policies confronting business persons examined including antitrust law, employment and discrimination law, product safety regulation, consumer protection and ethics. May not be used to satisfy degree requirements for majors in business.
Prerequisites: Sophomore classification; for students other than business and agribusiness majors.

MGMT 209 Business, Government and Society
Credits 3. 3 Lecture Hours.
Impact of the external environment—legal, political, economic and international-on business behavior; market and non-market solutions to contemporary public policies confronting business persons examined including antitrust law, employment and discrimination law, product safety regulation, consumer protection and ethics. May not be used to satisfy degree requirements for majors in business.
Prerequisites: Sophomore classification; for students other than business and agribusiness majors.
MGMT 211 Legal and Social Environment of Business
Credits 3.3 Lecture Hours.
Role of government in business and society; analysis of social policy and legal institutions; ethical problems in management decisions; administrative law; antitrust law; employment and discrimination law; regulation of business transactions; protection of property rights; regulation of information in markets including securities and product safety; international business law.
Prerequisite: Sophomore classification.

MGMT 212 Business Law
Credits 3.3 Lecture Hours.
(BUSI 2301) Business Law. Legal principles of business; legal reasoning; dispute resolution and procedure; contract law; bankruptcy law; property law; Uniform Commercial Codes sections concerning contracts, security interests, negotiable instruments and sales.
Prerequisite: Sophomore classification.

MGMT 289 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours. 0 to 4 Lab Hours.
Selected topics in an identified area of business and management. May be repeated for credit.
Prerequisite: Approval of instructor.

MGMT 309 Survey of Management
Credits 3.3 Lecture Hours.
Survey for non-business majors of the basic functions and responsibilities of managers; includes the environmental context of management, planning and decision making, organization structure and design, leading and managing people, and the controlling process; issues of globalization, ethics, quality and diversity integrated throughout the course. May not be used to satisfy degree requirements for majors in business.
Prerequisites: Junior classification; for students other than business and agricbusiness majors.

MGMT 363 Managing People in Organizations
Credits 3.3 Lecture Hours.
The role and importance of human behavior in organizations; models for understanding individual, group, and team dynamics, including individual differences, motivation, and leadership; managing organizational change; ethical issues in organizations; cross-cultural issues in managing people in organizations; the organizational context as determined by human resource management and organization design.
Prerequisite: MGMT 211 and admission to upper division in Mays Business School.

MGMT 372 Advanced Concepts in Organizational Behavior
Credits 3.3 Lecture Hours.
Builds on the survey of organizational behavior in MGMT 363; review of core concepts and their application in organizational settings; includes personality and individual differences, job design, group and team dynamics, leadership and decision-making, conflict and cooperation, cross-cultural aspects of behavior in organizations.
Prerequisite: MGMT 363.

MGMT 373 Managing Human Resources
Credits 3.3 Lecture Hours.
Strategic issues in managing human resources; shared responsibilities of line managers and human resource staff for developing and implementing human resource policies and procedures; human resource planning; job design, analysis and evaluation; staffing; compensation; performance appraisal; training and development; career management; labor relations; legal, ethical and international issues.
Prerequisite: MGMT 363.

MGMT 422 Management Consulting
Credits 3.3 Lecture Hours.
The field of management consulting from the perspective of both the individual consultant and the consulting firm; fundamentals of diagnosing situations, planning and executing assignments, client management, common mistakes and ethical issues in consulting including a variety of diagnostic and problem-solving methodologies.
Prerequisite: MGMT 363.

MGMT 424 Organizational Design, Change and Development
Credits 3.3 Lecture Hours.
Aspects of effectively planning for and introducing changes in organizational structures and procedures based on environmental demands; examination of the successful management of organizational and behavioral changes, focusing on planned and unplanned changes, and emphasizing development of change strategies and measurement of change effectiveness.
Prerequisite: MGMT 363.

MGMT 425 Human Resource Selection
Credits 3.3 Lecture Hours.
Theory and application of methods for the recruitment and selection of managerial, non-professional and professional employees; exposure to scientific issues such as reliability and validity, legal issues such as equal opportunity and affirmative action, and selection techniques such as interviews and testing.
Prerequisite: MGMT 373.

MGMT 427 Human Resource Compensation
Credits 3.3 Lecture Hours.
Theories and techniques of designing and managing programs of direct compensation and benefits, including the role of rewards in motivation, job evaluation, pay discrimination and comparable worth, internal and external equity comparisons and benefit plans.
Prerequisite: MGMT 373.

MGMT 429 Labor and Industry
Credits 3.3 Lecture Hours.
Brief review of the history of organized labor; critical study of labor-management relations; analysis of fundamentals of labor contracts and administration of contract parts.
Prerequisite: Admission to upper division in Mays Business School.

MGMT 430/WGST 430 Employment Discrimination Law
Credits 3.3 Lecture Hours.
Legal issues surrounding employment discrimination, including disparate treatment and impact; intent; affirmative action; sexual harassment; pregnancy, sex, race, religious, salary, disability, age, and ethnic discrimination; policy issues and perspectives to aid human resource specialists and managers.
Prerequisites: Admission to upper division in Mays Business School and senior classification.
Cross Listing: WGST 430/MGMT 430.

MGMT 432 Managing the Nonprofit Organization
Credits 3.3 Lecture Hours.
Broad trends shaping the nonprofit sector, a primary driver of social change and key player in society and the economy that provides an array of goods and services; complex management challenges that confront nonprofits as they balance their mission and values against the requirements of effective management with limited resources.
Prerequisite: MGMT 363.
MGMT 435 Labor Law and Policy
Credits 3.3 Lecture Hours.
Federal and state public policy and laws regulating human resource management including National Labor Relations Act, Railway Labor Act, Fair Labor Standards Act, employment discrimination statutes, statutes regarding public sector unionization, and other relevant legal authorities; various forms of dispute settlement including litigation, mediation, fact finding and arbitration; legal ramifications of strategic human resource management decision making.
Prerequisites: Admission to upper division in Mays Business School and senior classification.

MGMT 439 Negotiations
Credits 3.3 Lecture Hours.
Overview of the various theories and processes of negotiation relevant to the broad spectrum of negotiation problems faced by employees and managers, and in situations outside of organizations; discovery of optimal solutions to problems and means to implement solutions through classroom simulations, role playing and case studies.
Prerequisite: MGMT 363.

MGMT 440 Creativity and Innovation in Business
Credits 3.3 Lecture Hours.
Examines factors that may foster or stifle individual, team, organizational creative performance; presents techniques that may improve creative thinking skills.
Prerequisite: MGMT 363.

MGMT 450/IBUS 450 International Environment of Business
Credits 3.3 Lecture Hours.
Broad survey of international business issues; analyzes the environment in which international businesses operate; examines international economic issues including trade theory, investment theory, foreign exchange and capital markets, and balance of payments; introduces multinational enterprises, global competition, international organizations, treaties and international law, national trade policies and the determinants of competitiveness of firms in international markets.
Prerequisite: Admission to upper division in Mays Business School. Cross Listing: IBUS 450/MGMT 450.

MGMT 452/IBUS 452 International Management
Credits 3.3 Lecture Hours.
An overview of international management to include international dimensions of organizational behavior, theory, strategy and human resource management; application of theoretical ideas to real-world situations through case analyses, presentations, projects and interactive class discussion.
Prerequisite: MGMT 450/IBUS 450 or IBUS 450/MGMT 450, or concurrent enrollment. Cross Listing: IBUS 452/MGMT 452.

MGMT 453/IBUS 453 Emerging Economies: Brazil, Russia, India, China
Credits 3.3 Lecture Hours.
Examination of present and future dynamics of the emerging economies of Brazil, Russia, India and China and their impact on the developing and developed worlds; importance of BRIC countries and their position in the world; history and development of these countries and the current business environment in each.
Prerequisite: MGMT 363. Cross Listing: IBUS 453/MGMT 453.

MGMT 457/IBUS 457 Global Entrepreneurship
Credits 3.3 Lecture Hours.
Practical issues associated with taking small- and medium-size business global; includes importing and exporting, developing global strategies, evaluating market opportunities, regional impact on economies and people.
Prerequisite: Admission to upper division in Mays Business School. Cross Listing: IBUS 457/MGMT 457.

MGMT 460 Managing Projects
Credits 3.3 Lecture Hours.
Application of management processes to complex interdisciplinary organizational environments through the study of program and project management; adoptions of traditional management theories to the project environment; master typical project management microcomputer software for project planning; resource allocation; project budgeting; and control of project cost, schedule and performance.
Prerequisite: MGMT 363.

MGMT 461 Entrepreneurship and New Ventures
Credits 3.3 Lecture Hours.
The entrepreneurial process from conception of a business idea to the actual start up of the venture; environmental scanning for new opportunities; matching individual skills and attributes with the requirements of the venture; evaluating the viability, growth potential and markets for the venture; securing financing; beginning operations.
Prerequisites: Admission to upper division in Mays Business School and senior classification.

MGMT 464 The Political Environment of Business
Credits 3.3 Lecture Hours.
Role of business in contemporary society; the large corporation and its external environment; ownership and control controversy; private and collective choice processes; role of regulation; social issues including pollution, discrimination, consumer protection, corporate social and ethical responsibilities, corporate political activity; international business relations.
Prerequisites: MGMT 363 and senior classification.

MGMT 465 Corporate Governance
Credits 3.3 Lecture Hours.
Overview of the theories and practice of corporate governance; history of corporations, role and relationship of boards of directors, shareholders and management; concepts of agency cost, shareholder activism, executive compensation and international corporate governance in globalized markets; ethical issues and corporate social responsibility.
Prerequisite: MGMT 363.

MGMT 466 Strategic Management
Credits 3.3 Lecture Hours.
Strategic issues facing organizations, including top management decision making and social responsibility; environmental and industry analysis; establishing organizational mission and objectives; corporate, business and functional level strategy formulation; global and multidomestic strategies; strategic implementation and control; integrating operations, finance, marketing and human resource strategies; case analysis.
Prerequisites: MGMT 363; FINC 341; SCMT 364; MKTG 321; senior classification.
MGMT 470 Entrepreneurial Small Business  
Credits 3. 3 Lecture Hours.  
Exploration of practical approaches to growing a small business, evaluating and projecting financial performance, raising capital, legal formations and issues, human resource management, business plan development, franchising and family business; networking opportunities with local business leaders, successful former student entrepreneurs and current student entrepreneurs operating at the student incubator.  
Prerequisites: Admission to upper division in Mays Business School and senior classification.

MGMT 475 Leadership Development  
Credits 3. 3 Lecture Hours.  
Explores the evolution of leadership theory and practice with an emphasis on effective and ineffective leaders' traits, behaviors, and styles in profit and not-for-profit work organizations; reviews critical aspects of leader role behavior from theoretical and practical perspectives; examines leader effectiveness at the individual, group, and strategic level.  
Prerequisite: MGMT 363.

MGMT 481 Seminar in Management  
Credit 1. 1 Other Hour.  
Discussions and observation of current management practice in the public and private sectors of the nation; reading and discussion of current events and changes taking place in management theory and/or its application and practice in actual business and government situations. May be repeated for credit.  
Prerequisites: Admission to upper division in Mays Business School; management major or approval of instructor.

MGMT 484 Management Internship  
Credits 1 to 4. 1 to 4 Other Hours.  
Internship in management: staffing; planning; organizing; leading and controlling. Enrollment is limited to those who have managerial responsibilities for the resources used by a business firm or the like.  
Prerequisites: Management major; MGMT 363; approval of instructor prior to internship.

MGMT 485 Directed Studies  
Credits 1 to 3. 1 to 3 Other Hours.  
Directed study on selected problems in the area of management not covered in other courses.  
Prerequisites: Admission to upper division in Mays Business School; senior classification and approval of department head.

MGMT 489 Special Topics in...  
Credits 1 to 4. 1 to 4 Lecture Hours. 0 to 4 Lab Hours.  
Selected topics in an identified area of management. Consult the professor offering a particular special topics course for details. May be repeated for credit.  
Prerequisites: Admission to upper division in Mays Business School and approval of instructor.

MGMT 602 Markets and Public Policy  
Credits 3. 3 Lecture Hours.  
Theoretical underpinnings of business decision making; function and structure of markets; effects of public policy on business activities; includes: antitrust; securities; labor discrimination; products liability.  
Prerequisite: Graduate classification.

MGMT 610 Business and Public Policy  
Credits 3. 3 Lecture Hours.  
Role of business organizations in the United States and other countries; topics pertaining to the external political and social environment of business and the implications for business managers including market failures and political failures as well as equity and ethical issues; case studies with business/government problems.  
Prerequisite: Graduate classification.

MGMT 611 Microfoundations of Business Behavior  
Credits 1 to 3. 1 to 3 Lecture Hours.  
A multi-disciplinary analysis of the foundations of business behavior discussing business interaction with customers under alternative market conditions and interaction with suppliers, investors, employees and other stakeholders, considered in the context of alternative legal, political and social institutional arrangements. Classification 6 students may not enroll in this course.  
Prerequisites: Enrollment is limited to BUAD classification 7.

MGMT 612 Business Applications of Price Theory  
Credits 3. 3 Lecture Hours.  
Application of price theory framework to decisions facing managers. Topics include political, legal and regulatory environments of business; corporate governance and antitakeover regulations; principal-agent problems in large corporations.  
Prerequisite: Doctoral classification.

MGMT 613 Managerial Macroeconomics  
Credits 1 to 3. 1 to 3 Lecture Hours.  
Analysis of domestic and global macroeconomic issues from a managerial perspective; analysis of current and historical macroeconomic events at the national and global levels; analysis of business cycles and monetary and fiscal policies; managerial decisions in the context of changing macroeconomic environment.  
Prerequisite: Enrollment is limited to BUAD classification 7.

MGMT 614 Managing People in Organizations  
Credits 1 to 3. 1 to 3 Lecture Hours.  
Procurement and management of people in organizations including human resource management principles and analysis of how organizations function; performance appraisal, compensation, training, leadership, group dynamics, decision-making, control mechanisms and organizational change processes. Classification 6 students may not enroll in this course.  
Prerequisite: Enrollment is limited to BUAD classification 7.

MGMT 618 Corporate Strategy and the Political Environment of Business  
Credits 1 to 3. 1 to 3 Lecture Hours.  
Formulation and implementation of corporate strategy with consideration of the political environment of business. Classification 6 students may not enroll in this course.  
Prerequisites: Enrollment is limited to BUAD classification 7.

MGMT 620 Managing Human Resources  
Credits 3. 3 Lecture Hours.  
Survey of human resource management; formulation and implementation of human resource strategy addressed for areas including planning, recruitment, selection, job choice, training, development, appraisal, compensation, benefits, labor relations, international human resource issues and legal compliance.  
Prerequisite: Graduate classification.
MGMT 621 Research Methods for HR Professionals
Credits 3.3 Lecture Hours.
Direct experience in formulation of HRM issues as hypotheses and selection and implementation of appropriate research designs and statistical tools to evaluate such hypotheses; properties of appropriate criteria, measures, designs and statistical tests in context of contemporary HRM issues; ethical issues in HRM research.
Prerequisites: STAT 651 or equivalent; graduate classification.

MGMT 622 Organizational Staffing
Credits 3.3 Lecture Hours.
Foundations and operating aspects of recruitment, selection and placement in various types of organizations; coverage of scientific and legal issues affecting human resource selection decisions from a managerial perspective; examination of the usefulness of various methods used in job analysis, selection, and performance appraisal; introduction to “job match” from various perspectives.
Prerequisite: Graduate classification.

MGMT 623 Compensation Management
Credits 3.3 Lecture Hours.
Strategic and technical considerations in the management of employee compensation in organizations; including job evaluation systems, legal issues, comparable worth, rewards as a consideration in motivation and satisfaction, wage levels and structures, merit ratings, individual and group incentives and benefit plans.
Prerequisite: Graduate classification.

MGMT 624 Seminar in Human Resources
Credits 3.3 Other Hours.
Seminar on theory and research in human resource management; includes: planning, search and decision theory, organizational entry and socialization, staffing theories, validity generalization, utility theory, performance measurement and evaluation, reward systems, organizational justice and employee rights, employee development and employee withdrawal.
Prerequisite: Graduate classification or approval of instructor.

MGMT 625 Human Resource Development
Credits 3.3 Lecture Hours.
Examination of training, education and development within organizations from both a strategic and operational perspective; analysis of needs, program design and methods, program implementation and evaluation, including transfer or learning issues; legal and ethical human resource development issues; implications and practices of human resource development for enhancing global competitiveness.
Prerequisite: Graduate classification.

MGMT 626 Teams in Organizations
Credits 3.3 Lecture Hours.
Cutting edge thinking on leading in team-based organizations including the organizational changes required to move to a team-based structure and the organizational factors required to create successful work teams.
Prerequisite: Graduate classification.

MGMT 628 Contemporary Human Resource Management Issues
Credits 3.3 Lecture Hours.
Application of human resource theory to contemporary human resource management issues; impact of these issues for the organization and on the strategic role of the human resource professional; guest speakers; student projects.
Prerequisite: Second-year enrollment in the Master of Science in management program or approval of instructor.

MGMT 630 Behavior in Organizations
Credits 3.3 Lecture Hours.
Organizational behavior theory, research and applications; focuses on the individual and group levels of analysis; includes: learning principles, perceptions, attitudes and job satisfaction, work motivation, job design, group properties and processes, leadership, conflict, communication, personality influences on work attitudes and behaviors, work-life issues and job stress.
Prerequisite: Graduate classification.

MGMT 632 Technology Commercialization
Credits 3.3 Lecture Hours.
Focus on technology, process of evaluating raw technology viability, converting raw technology into commercially viable products and services; includes model on Small Business Innovation Research (SBIR) grant program; develops competencies skills to evaluate technology’s commercial viability; brings viable technologies to commercial success.
Prerequisite: Graduate classification.

MGMT 633 Organizational Change and Development
Credits 3.3 Lecture Hours.
Organizational change theory, processes and models; the role of change agents; organizational diagnosis and intervention; culture, process, strategy, structure and technology changes in organizations; evaluation research on organizational change; problems and issues in organizational change.
Prerequisite: Graduate classification.

MGMT 634 Seminar in Organizational Behavior
Credits 3.3 Other Hours.
Theory and research in organizational behavior; includes: operant and social learning theories, work motivation, job satisfaction and affect at work, task design, absenteeism and turnover, prosocial behavior, leadership, group properties and processes and work linkages and job stress.
Prerequisites: MGMT 630 or equivalent; doctoral classification or approval of instructor.

MGMT 635 Employment Regulation
Credits 3.3 Lecture Hours.
Overview of regulatory environment of human resource management; topics include: equal employment opportunity and affirmative action, benefits regulation, workplace safety, workers’ compensation, labor relations, and international aspects of employment regulation.
Prerequisite: Graduate classification.

MGMT 636 Seminar in Organization Theory
Credits 3.3 Lecture Hours.
Research literature in organization theory focusing on major theoretical perspectives and content areas; includes: design of organizational structure and control systems; analysis or organization-environment relations, including interorganizational relationships; managing organizational technology and innovation; information processing and decision making; and organizational culture, conflict and power.
Prerequisite: Doctoral classification or approval of instructor.

MGMT 637 Foundations of Entrepreneurship
Credits 3.3 Lecture Hours.
Process of launching a new venture; process by which opportunities can be discovered and selected; attributes of entrepreneurs and new venture teams; process of developing business plan; core entrepreneurial strategies--business level, organizational design, marketing, financial; strives to develop competencies, concepts, operational tools relevant to creating, implementing new ventures.
Prerequisite: Graduate classification.
MGMT 638 Strategic Entrepreneurship
Credits 1 to 3. 1 to 3 Lecture Hours.
Emphasis on a firm's need to be both entrepreneurial (identifying opportunities in the market) and strategic (taking actions to gain a competitive advantage) in order to create value for stakeholders; includes: developing an entrepreneurial mindset; building an entrepreneurial culture; managing resources (building a resource portfolio, bundling resources to create capabilities and leveraging the capabilities to exploit the opportunities identified); creating innovations.
Prerequisite: Graduate classification.

MGMT 639 Negotiations in Competitive Environments
Credits 1 to 3. 1 to 3 Lecture Hours.
Understanding prescriptive and descriptive negotiation theory as it applies to dyadic and multi-party negotiations, to buyer-seller transactions, dispute resolution, development of negotiation strategy and management of integrative and distributive aspects of the negotiation process.
Prerequisite: Graduate classification.

MGMT 640 Managing for Creativity and Innovation
Credits 3. 3 Lecture Hours.
Examines factors that may foster or stifle individual, team, or organizational creative performance, and presents techniques that may improve the student's creative thinking skills.
Prerequisite: Graduate classification.

MGMT 643 Foundations of Managerial Law
Credits 3. 3 Lecture Hours.
Basic legal relationships and issues encountered by managers and organizations; American legal system, administrative law, alternative dispute resolution and selected substantive areas of law (e.g., environmental protection, discrimination, negotiable instruments).
Prerequisite: Graduate classification.

MGMT 645 Legal and Ethical Issues in Business
Credits 1 to 3. 1 to 3 Lecture Hours.
An overview of legal compliance programs, business ethics and social responsibility issues.
Prerequisite: Approval of instructor.

MGMT 650 Human Relations and Collective Bargaining in Industry
Credits 3. 3 Lecture Hours.
Labor management relationship and human relations problems encountered during union administration; labor history; basic construction of the National Labor Relations Act; alternative dispute resolution; contemporary labor relations issues; international labor relations issues.
Prerequisite: Graduate classification.

MGMT 655 Survey of Management
Credits 3. 3 Lecture Hours.
Management concepts and applications important to managers in all types and sizes of organizations; includes: strategic planning, goal setting, control and managerial ethics; decision making, organizing, human resource management, including staffing, performance appraisal and compensation; leadership, motivation, communication and group processes; achieving organizational quality and managing in a global environment.
Prerequisite: Graduate classification. Note: Course may not be used for elective credit by a master's candidate in business administration.

MGMT 658 Managing Projects
Credits 3. 3 Lecture Hours.
Application of management processes to complex interdisciplinary organizational environments through the study of program and project management; adoptions of traditional management theories to the project environment; master typical project management microcomputer software for project planning; resource allocation; project budgeting; and control of project cost, schedule and performance.
Prerequisite: Graduate classification.

MGMT 660 Global Human Resource Management
Credits 3. 3 Lecture Hours.
Examine HRM in a global context; emphasis given to global HR functions such as international staffing, training, and compensation; focus on global HRM trends and challenges; addresses issues and choices HR managers face in multinational enterprises.
Prerequisite: Graduate classification.

MGMT 663/INTA 663 International Transfer Pricing
Credits 3. 3 Lecture Hours.
Valuation of cross-border transactions between units of a multinational enterprise; includes internal and external motivations for transfer pricing, managerial and economic approaches, estimates of transfer manipulation, arm's length standard, U.S. and OECD rules and procedures, tax court cases, and ethical dilemmas.
Prerequisite: Graduate classification.
Cross Listing: INTA 663/MGMT 663.

MGMT 667/IBUS 667 Multinational Enterprises
Credits 3. 3 Lecture Hours.
Graduate seminar in international business; multinational enterprises (MNEs) are studied from various perspectives including economics, management, entry and expansion strategies, contractual agreements, transfer pricing, impacts on home and host countries, MNE-state relations, regional integration, public policies towards MNEs.
Prerequisite: Graduate classification.
Cross Listing: IBUS 667/MGMT 667.

MGMT 673 Advanced Research Methods in Management
Credits 3. 3 Lecture Hours.
Introduces PhD students in Management to the multivariate methods commonly used in management research. Applications emphasized; journal publications; projects and critiques required.
Prerequisite: STAT 608.

MGMT 675 Leadership in Organizations
Credits 1 to 3. 1 to 3 Lecture Hours.
Review of research on procedures, styles and methods of leadership, supervision, management and administration; all aspects of leader role behavior, both in practice and in research; areas in need of further research. May be repeated for up to 3 hours credit.
Prerequisite: Graduate classification.

MGMT 676 Strategic Management Survey
Credits 3. 3 Lecture Hours.
Management concepts and applications important to strategy; includes: concept of strategy; the environment, and performance; the role of top management teams; business-level strategies; competitive strategy and dynamics; corporate strategy formulation and implementation; mergers; acquisitions; governance and control systems; international strategies; cooperative strategies; technology strategies; corporate entrepreneurship.
Prerequisite: Doctoral classification or approval of instructor.
MGMT 677 Strategy Implementation
Credits 3. 3 Lecture Hours.
Concepts, research and applications regarding issues central to strategy implementation; includes: the nature of managerial work; inertia, organizational change and adaptation; innovation; strategic leadership; power; top management teams in implementation roles; organizational cultures; the relationship between strategy and structure; executive succession; institutional contexts; governance; agency theory; boards of directors; executive compensation; use of leverage and cash flow; implementation of mergers, acquisitions, and restructuring.
Prerequisite: Doctoral classification or approval of instructor.

MGMT 678/IBUS 678 International Management
Credits 3. 3 Lecture Hours.
Survey of the issues, problems, challenges and opportunities facing organizations competing in a global economy; includes: the environment of international management, international strategies, forms of organization design used by multinational firms, managing human resources in an international context, and cultural and control issues facing the international manager.
Prerequisite: Graduate classification.
Cross Listing: IBUS 678/MGMT 678.

MGMT 679/IBUS 679 International Business Policy
Credits 3. 3 Lecture Hours.
Determinants of U.S. competitiveness in international markets; the international environment of business; introduction to multinational enterprises, global competition, international organizations, protection of intellectual property; international trade regulation; strategic trade theory.
Prerequisite: Graduate classification.
Cross Listing: IBUS 679/MGMT 679.

MGMT 680 Business and Corporate Strategy
Credits 3. 3 Lecture Hours.
Prerequisite: Graduate classification.

MGMT 681 Seminar
Credit 1. 1 Lecture Hour.
Critical examination of subject matter presented in current journals, monographs and bulletins in field of management. Classification 6 students may not enroll in this course.
Prerequisite: Graduate classification.

MGMT 684 Professional Internship
Credits 1 to 6. 1 to 6 Other Hours.
Directed internship in an organization to provide students with on-the-job training with professionals in organizational settings appropriate to the students' professional objectives. Classification 6 students may not enroll in this course.
Prerequisites: Approval of MS program coordinator and department head.

MGMT 685 Directed Studies
Credits 1 to 6. 1 to 6 Other Hours.
Directed study on selected problems using recent developments in business research methods. Classification 6 students may not enroll in this course.
Prerequisites: Graduate classification and approval of instructor.

MGMT 686 Research Methods in Organizational Science II
Credits 3. 3 Lecture Hours.
Continuation of topics introduced in Management 687; additional topics include survey research methodology, quantitative and qualitative field methods; archival data collection; measurement and methods across time; issues in peer review and publication.
Prerequisites: Doctoral classification and MGMT 687 or approval of instructor.

MGMT 687 Research Methods in Organizational Science I
Credits 3. 3 Lecture Hours.
Philosophy of science, theory development; survey of research methodology applicable to the study of organizational phenomena; research strategy and design; measurement and sampling issues; data collection methods; problems and issues in organizational research.
Prerequisites: Doctoral classification or approval of instructor; STAT 651 or equivalent.

MGMT 689 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours. 0 to 4 Lab Hours.
Selected topics in an identified area of management. May be repeated for credit.
Prerequisite: Graduate classification.

MGMT 690 Theory of Research in Management
Credits 3. 3 Lecture Hours.
Research practicum; application of research methodology learned in MGMT 687; advanced readings in research methods; fundamental skills and concepts needed to design and conduct dissertation research. Classification 6 students may not enroll in this course.
Prerequisites: Doctoral classification or approval of instructor; MGMT 687 or equivalent.

MGMT 691 Research
Credits 1 to 23. 1 to 23 Other Hours.
Research for thesis or dissertation. Classification 6 students may not enroll in this course.
Prerequisite: Graduate classification.

MICR - Microbiology

Courses
MICR 289 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Selected topics in an identified area of microbiology. May be repeated for credit.
Prerequisite: Approval of instructor.

MICR 291 Research
Credits 1 to 4. 1 to 4 Other Hours.
Active research of basic nature under the supervision of a Department of Biology faculty member.
Prerequisites: Freshman or sophomore classification and approval of instructor.

MICR 489 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Selected topics in an identified area of microbiology. May be repeated once for credit.

MICR 491 Research
Credits 1 to 4. 1 to 4 Other Hours.
Active research of basic nature under the supervision of a Department of Biology faculty member.
Prerequisites: Junior or senior classification and approval of instructor.
MICR 681 Seminar
Credit 1. 1 Other Hour.
Detailed reports on specific topics in field chosen. Students may register in up to but no more than three sections of this course in the same semester.

MICR 685 Directed Studies
Credits 1 to 6. 1 to 6 Other Hours.
Limited investigations in fields other than those chosen for thesis or dissertation.

MICR 689 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Selected topics in an identified area of microbiology.

MICR 691 Research
Credits 1 to 12. 1 to 12 Other Hours.
Research for thesis or dissertation.

MKTG - Marketing

Courses

MKTG 321 Marketing
Credits 3. 3 Lecture Hours.
Exploration of the activities and managerial decisions involved in the provision of products to customers; includes strategic marketing fundamentals, buyer behavior, market segmentation, managerial issues related to the marketing mix (product, pricing, distribution, and promotion) decision variables, and social and ethical issues.
Prerequisite: Admission to upper division in Mays Business School.

MKTG 322 Consumer Behavior
Credits 3. 3 Lecture Hours.
Application of behavioral science designed to provide in-depth knowledge of the fundamental theories and concepts of consumer behavior, with an emphasis on consumers in the marketplace as individuals, as decision makers, and as influenced by culture.
Prerequisite: MKTG 321.

MKTG 323 Marketing Research
Credits 3. 3 Lecture Hours.
Nature and uses of marketing research in business; methods of collecting, analyzing and interpreting data needed for business decisions, with specific application to problems in marketing.
Prerequisites: MKTG 321; SCMT 303 or AP STAT 301 or AP STAT 302 or AP STAT 303.

MKTG 325 Retailing Concepts and Policies
Credits 3. 3 Lecture Hours.
Survey of the concepts, policies, theories, and practices for managing a retail firm in a competitive environment; topics include functions of retailers, retail customers, supply chain, legal and ethical behavior, location analysis, pricing, promotion, customer services, and layout.
Prerequisite: MKTG 321.

MKTG 326 Strategic Retailing
Credits 3. 3 Lecture Hours.
Retail strategies such as channels of distribution, private labels, customer service levels, visual presentation, pricing, and marketing mix that influence a retail business model.
Prerequisite: MKTG 321.

MKTG 335 Professional Selling
Credits 3. 3 Lecture Hours.
General principles of personal selling in both consumer and industrial markets plus specialty selling.
Prerequisite: MKTG 321.

MKTG 345 Social Media and Public Relations
Credits 3. 3 Lecture Hours.
Marketing and promotional strategy related to social media, the internet and interactive media; managing publicity and public relations with a wide variety of stakeholders.
Prerequisite: MKTG 321.

MKTG 347 Advertising and Creative Marketing Communications
Credits 3. 3 Lecture Hours.
Advertising and integrated marketing communications; market segmentation and targeting; development of multi-media campaigns; emphasis on enhancing creativity, critical thinking, and communication skills.
Prerequisite: MKTG 321.

MKTG 401/IBUS 401 Global Marketing
Credits 3. 3 Lecture Hours.
Survey of the aspects involved in marketing goods and services in a global marketplace; social, political, legal, and economic issues associated with conducting business globally.
Prerequisite: MKTG 321.
Cross Listing: IBUS 401/MKTG 401.

MKTG 402/IBUS 402 International Marketing: Study Abroad
Credits 3. 3 Lecture Hours.
Introduction to the facets of doing business in an international setting; provides exposure to a variety of foreign cultures; facilitates understanding of the international marketplace in which these students will function.
Prerequisites: MKTG 321 or MKTG 409; junior classification; 2.5 GPR overall.
Cross Listing: IBUS 402/MKTG 402.

MKTG 403/IBUS 403 International Market Entry Strategies
Credits 3. 3 Lecture Hours.
A research-based course in which students prepare an analysis of a country, or region outside the U.S., and use it in the preparation of a marketing plan for a good or service to be introduced and marketed in that country.
Prerequisites: MKTG 321 or MKTG 409; concurrent registration in IBUS 402/MKTG 402 or MKTG 402/IBUS 402; junior or senior classification.
Cross Listing: IBUS 403/MKTG 403.

MKTG 404 Advanced Excel for Marketing Managers
Credit 1. 1 Lecture Hour.
Hands-on practice and application of the Excel skills needed for marketing decision-making.
Prerequisites: MKTG 323.

MKTG 409 Principles of Marketing
Credits 3. 3 Lecture Hours.
Survey of the basic concepts and decisions associated with product, promotion, distribution, and pricing; focuses on developing marketing strategies that contribute to building long-term customer relationships and achieving the organization’s objectives. May not be used to satisfy degree requirements for a major in business.
Prerequisites: Junior classification; for students other than business and agribusiness majors.

MKTG 425 Retail Merchandising
Credits 3. 3 Lecture Hours.
Theories, concepts and practices relating to the merchandising of products for enhancing sales and profit growth of retail businesses; emphasis on retail math, purchasing decisions, vendor negotiations, communications skills, assortment planning and competitive analysis.
Prerequisite: MKTG 321.
MKTG 426 Advanced Retail Case Study
Credits 3.3 Lecture Hours.
Problems and opportunities faced by retailing organizations; development of an effective strategy through application-oriented seminars and activities, interaction with industry guest speakers and executives; analysis of retail strategies in field settings and completion of a semester-long retail audit; participation in a national case competition.
Prerequisites: Admission to upper division in Mays Business School and approval of instructor.

MKTG 430 Marketing Consulting
Credits 3.3 Lecture Hours.
Consulting tools and techniques, managing client relationships, preparing reports and presentations, problem-solving processes; semester-long client project.
Prerequisites: MKTG 323.

MKTG 431 Marketing Analytics
Credits 3.3 Lecture Hours.
Data driven marketing strategy, data handling and management techniques, use of statistical software to estimate marketing models, project-based course focused on marketing decision making.
Prerequisite: MKTG 321.

MKTG 432 Corporate Social Responsibility
Credits 3.3 Lecture Hours.
Study of the role of corporate social responsibility, corporate governance and business ethics with an emphasis on the marketing perspective.
Prerequisites: MKTG 321.

MKTG 435 Advanced Selling
Credits 3.3 Lecture Hours.
In-depth strategic account planning, extensive role-play and team selling exercises, sales analytics, networking and prospecting, strategic goal setting and time management.
Prerequisites: MKTG 355.

MKTG 436 Sales Management
Credits 3.3 Lecture Hours.
Ethical planning, organizing, staffing, training, motivating and evaluating salespeople.
Prerequisite: MKTG 321.

MKTG 438 Strategic Digital Marketing
Credits 3.3 Lecture Hours.
Implications of the internet and related digital technologies for marketing; evolution of the digital marketplace and impact on firms' marketing mix decisions; competitive advantage; public policy issues; future trends and developments.
Prerequisite: MKTG 321.

MKTG 440 Services Marketing
Credits 3.3 Lecture Hours.
Focuses on the unique challenges of managing a service-based business; delivering quality service to customers and building strong customer relationships; applicable to for-profit and not-for-profit organizations that depend on service excellence for competitive advantage.
Prerequisite: MKTG 321.

MKTG 442 Innovation and Product Management
Credits 3.3 Lecture Hours.
Opportunity identification, concept generation, concept and program evaluation, development and launch of the various types of new products; specific topics include creativity, design, launch and management of new products.
Prerequisite: MKTG 321.

MKTG 444 Account Planning and Research
Credits 3.3 Lecture Hours.
Concepts in account planning; gathering and analyzing data (database analysis, focus groups, interviews, surveys); compilation of research into a situation analysis and creative brief for use in a national advertising case competition.
Prerequisites: MKTG 321, approval of instructor.

MKTG 447 Advanced Advertising: Case Competition
Credits 3.3 Lecture Hours.
Development of a fully integrated, multi-million dollar budgeted advertising campaign plan; participation in a national case competition.
Prerequisite: MKTG 321; approval of instructor.

MKTG 448 Marketing Strategy
Credits 3.3 Lecture Hours.
Marketing decision-making and strategies in case situations; integration of product, pricing, distribution, and promotion considerations for the purposes of determining and evaluating the optimal marketing strategy.
Prerequisite: MKTG 323; graduating marketing senior.

MKTG 448 Marketing Internship
Credits 3.3 Other Hours.
Directed internship of at least 300 hours of work under the supervision of a marketing professional providing students with on-the-job training that advances their career objectives; emphasis on business communication and personal professional development.
Prerequisites: Marketing major; MKTG 321; approval of instructor prior to internship.

MKTG 485 Directed Studies
Credits 1 to 3.1 to 3 Other Hours.
Directed study of selected problems in the area of marketing not covered in other courses.
Prerequisites: MKTG 321; approval of department head; 2.5 GPR in major and overall.

MKTG 489 Special Topics in...
Credits 1 to 4.1 to 4 Lecture Hours.1 to 4 Lab Hours.
Selected topics in an identified area of marketing. May be repeated once for credit.
Prerequisites: Admission to upper division in Mays Business School and approval of instructor.

MKTG 613 Marketing Management
Credits 1 to 3.1 to 3 Lecture Hours.
Core MBA marketing class examines history of marketing, environment that impacts marketing decisions of firms and consumers, buyer behavior, marketing ethics, marketing research, market segmentation, product positioning, new product management, and strategic challenges associated with integrating major marketing mix decision elements; product, price, distribution, and promotion. May be repeated for up to 3 hours of credit. Classification 6 students may not enroll in this course.
Prerequisite: Enrollment is limited to BUAD classification 7.

MKTG 621 Survey of Marketing
Credits 3.3 Lecture Hours.
Marketing concepts and decisions associated with developing marketing strategies; topics include product, pricing, distribution, and promotion. Note: Course may not be used for elective credit by a master's candidate in business administration.
MKTG 625 Marketing Engineering
Credits 3. 3 Lecture Hours.
Analysis and management of popular statistical packages for the purpose of enhanced data-based and empirically-driven marketing decisions. Application of statistical software to marketing-related data sets.
Prerequisite: MKTG 621 or equivalent.

MKTG 635 Marketing Analytics and Pricing
Credits 3. 3 Lecture Hours.
Advanced quantitative techniques and analytical tools that provide insights into the nature of consumer demand and its response to changes in the marketing mix, with a focus on pricing.
Prerequisite: MKTG 625.

MKTG 638 Strategic Foundations of E-Commerce
Credits 3. 3 Lecture Hours.
Implications of increasing electronic interactivity between consumers and firms; migration of products to the electronic marketplace and its effects on the marketing channel; Internet's impact on marketing mix decisions; competitive advantage; public policy issues.
Prerequisite: MKTG 613 or MKTG 621 or equivalent.

MKTG 650 Analyzing Consumer Behavior
Credits 3. 3 Lecture Hours.
Concepts, theories, and techniques applicable to obtaining a sophisticated and empirically-based understanding of consumer motivation, attitudes, decision-making processes, and responses to marketers' actions; application of consumer psychology and behavioral decision making to managerial and public policy insights.
Prerequisite: MKTG 613 or MKTG 621 or equivalent.

MKTG 656 Branding and Marketing Communication
Credits 3. 3 Lecture Hours.
Customer-based brand equity and positioning, brand objectives, communication processes, customer decision stages, creative and media strategies including traditional, grassroots, and social media, measuring advertising effectiveness and return on marketing investment.
Prerequisite: MKTG 613 or MKTG 621 or equivalent.

MKTG 660 Marketing Consulting
Credits 3. 1 Lecture Hour. 4 Lab Hours.
Application of marketing knowledge through the planning and execution of marketing projects for businesses. May be repeated one time for credit.
Prerequisite: MKTG 621 or equivalent.

MKTG 665 Research for Marketing Decisions
Credits 3. 3 Lecture Hours.
Methodology for generating and using information related to problems in marketing decision-making; primary and secondary research methodology and analytical techniques; guidelines for designing and conducting research projects. Classification 6 students may not enroll in this course.
Prerequisites: MKTG 613 or MKTG 621 or equivalent; basic statistics course.

MKTG 670 Marketing Leadership
Credit 1. 1 Lecture Hour.
Seminar on the application of marketing concepts and theories through guest lectures and discussions with marketing-thought leaders in business and academia. May be repeated one time for credit.
Prerequisite: MKTG 621 or equivalent.

MKTG 671 Product Innovation
Credits 3. 3 Lecture Hours.
Strategy and management of the new product development process, portfolio management and innovation charters for new products; topics include creativity, trade-off analysis, concept testing, design and launch.
Classification 6 students may not enroll in this course.
Prerequisite: MKTG 613 or MKTG 621 or equivalent.

MKTG 673 Services Marketing
Credits 3. 3 Lecture Hours.
Marketing concepts and strategy as applied to service organizations, unique characteristics of services, marketing challenges posed by those characteristics and ways to meet those challenges effectively. Special emphasis on service quality. Classification 6 students may not enroll in this course.
Prerequisite: MKTG 613 or MKTG 621 or equivalent, or approval of instructor.

MKTG 675 Marketing Strategy
Credits 1 to 3. 1 to 3 Lecture Hours.
Marketing management as it relates to overall organizational goals: marketing strategy concepts and interdependencies with strategy at the corporate and business unit levels and in other functional areas; impact of digital technologies and environmental sustainability on marketing strategy. Classification 6 students may not enroll in this course.
Prerequisites: MKTG 613 or MKTG 621 or equivalent.

MKTG 677/IBUS 677 Multinational Marketing Management
Credits 3. 3 Lecture Hours.
Theoretical and empirical materials on multinational marketing; nature and justification of international trade, analysis of environments faced by multinational firms and formulation of multinational marketing strategy. Classification 6 students may not enroll in this course.
Prerequisite: MKTG 613 or MKTG 621 or equivalent.
Cross Listing: IBUS 677/MKTG 677.

MKTG 680 Seminar in Buyer Behavior
Credits 3. 3 Lecture Hours.
Detailed examination of the literature in consumer and industrial buyer behavior with emphasis on conceptual and empirical issues; critical analysis of buyer behavior theory. Classification 6 students may not enroll in this course.
Prerequisites: MKTG 650 or equivalent; doctoral classification.

MKTG 682 Seminar in Marketing Strategy Research
Credits 3. 3 Lecture Hours.
Review of research on marketing strategy content; formulation process and implementation related issues; includes antecedents, outcomes, mediators and moderators of the relationship between marketing strategy and performance; strategic marketing alliances; market pioneering; multimarket competition; global competitive strategy; interdependencies between marketing, business and corporate strategy. Classification 6 students may not enroll in this course.
Prerequisite: Doctoral classification.

MKTG 684 Professional Internship
Credits 1 to 6. 1 to 6 Other Hours.
Directed internship in an organization to provide students with on-the-job training with professionals in organizational settings appropriate to the students' professional objectives. Classification 6 students may not enroll in this course.
Prerequisite: Approval of committee chair and department head.
MKTG 685 Directed Studies
Credits 1 to 4. 1 to 4 Other Hours.
Directed study of selected problems using recent developments in business research methods. Classification 6 students may not enroll in this course.
Prerequisite: Approval of instructor.

MKTG 687 Seminar in Marketing Models
Credits 3. 3 Lecture Hours.
Review and discussion of the foundations of modeling and recent developments in research using marketing models. The seminar is designed to provide participants with new ways to think about modeling marketing phenomena and enable them to generate new ideas, research topics, and modeling applications for marketing problems.
Prerequisite: Doctoral classification.

MKTG 688 Doctoral Seminar
Credits 3. 3 Other Hours.
Historical development of the conceptual framework of marketing theory and practices; analysis of current research and controversial issues in the field. May be repeated for credit three times. Students may take up to two sections of this course in the same semester. Classification 6 students may not enroll in this course.
Prerequisite: Doctoral classification.

MKTG 689 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours. 0 to 4 Lab Hours.
Selected topics in an identified area of marketing. Classification 6 students may not enroll in this course. May be repeated for credit.

MKTG 691 Research
Credits 1 to 23. 1 to 23 Other Hours.
Research for thesis or dissertation. Classification 6 students may not enroll in this course.

MLSC - Military Science

Courses

MLSC 121 Introduction to the United States Army I
Credits 2. 1 Lecture Hour. 3 Lab Hours.
Introduction to the United States Army and the Army Reserve Officer Training Corps (ROTC); its purpose in the Army and its advantages; Army customs, courtesies, traditions, and Army values; Army history and individual soldier skills with an emphasis on leadership; includes a leadership laboratory.

MLSC 122 Introduction to the United States Army II
Credits 2. 1 Lecture Hour. 3 Lab Hours.
The second half of an introductory two-semester survey of the United States Army; principles of leadership, Army history, management theory and individual soldier skills; emphasis on critical thinking and problem solving skills; foundation for tactical and leadership concepts; includes a leadership laboratory.

MLSC 221 Tactics and Leadership Theory I
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Dimensions of creative and innovative leadership strategies through team dynamics and leadership theories that form the basis of the Army leadership framework (trait and behavior theories); infantry tactics, techniques and procedures; includes a leadership laboratory.

MLSC 222 Tactics and Leadership Theory II
Credits 3. 2 Lecture Hours. 3 Lab Hours.
The second half of a two-semester survey on leadership theory and infantry tactics; emphasis on leading tactical teams in a complex environment; Army planning and orders process; adaptive leadership styles in the context of military operations; case studies on the importance of teamwork and tactics in real-world scenarios; includes a leadership laboratory.

MLSC 321 Adaptive Leadership and Tactical Operations I
Credits 3. 3 Lecture Hours. 1 Lab Hour.
Theoretical and practical application of adaptive leadership as it relates to planning, executing and evaluating complex tactical operations; ability to assess risk, ethical decision-making, managing people and critical thinking skills in a tactical environment; includes a leadership laboratory.

MLSC 322 Adaptive Leadership and Tactical Operations II
Credits 3. 3 Lecture Hours. 1 Lab Hour.
The second half of a two-semester survey on adaptive leadership and tactical operations; ethical decision-making, planning, executing and evaluating military operations at a tactical level; preparation to attend the Leadership, Development and Assessment Course (LDAC) for the Army's commissioning process; includes a leadership laboratory.

MLSC 421 The Army Officer and the Profession of Arms I
Credits 3. 3 Lecture Hours. 1 Lab Hour.
Advanced study, research and practical application of Army training, operations and doctrine; the military as a profession, functioning as a member of a staff, and officership; law of land warfare, principles of war, and rules of engagement and their application; duties and responsibilities of a Second Lieutenant in the United States Army; includes a leadership laboratory.

MLSC 422 The Army Officer and the Profession of Arms II
Credits 3. 3 Lecture Hours. 1 Lab Hour.
The second half of a two-semester survey on adaptive leadership and tactical operations; ethical decision-making, planning, executing and evaluating military operations at a tactical level; preparation to attend the Leadership, Development and Assessment Course (LDAC) for the Army's commissioning process; includes a leadership laboratory.

MLSC 485 Directed Studies
Credits 1 to 3. 1 to 3 Other Hours.
Directed study of problems in the field of military science.
Prerequisite: Junior or senior classification with approval of department head.

MLSC 489 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Selected topics in an identified field of military science. May be repeated for credit.

MLSC 491 Research
Credits 1 to 4. 1 to 4 Lecture Hours.
Research conducted under the direction of a faculty member in military science. May be taken three times for credit.
Prerequisite: Junior or senior classification or approval of instructor.

MMET - Mfg & Mech Engr Tech

Courses

MMET 181 Manufacturing and Assembly Processes I
Credits 3. 2 Lecture Hours. 3 Lab Hours.
A survey of metal manufacturing processes; traditional machining, non-traditional machining, welding, fabrication, casting and assembly.
Prerequisite: Grade of C or better in ENGR 111 and ENGR 112.
Corequisite: ENDG 105.

MMET 206 Nonmetallic Materials
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Introduction to structure, properties and application of forest products, plastics, ceramics and composites; laboratory includes processing, physical and mechanical testing, applications, surface treatment and material identification.
Prerequisite: CHEM 102 or CHEM 107 with a grade of C or better; manufacturing and mechanical engineering technology or industrial distribution major or approval of department.

MMET 207 Metallic Materials
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Introduction to structure, properties and engineering application of ferrous and nonferrous materials; beneficition, production of ferrous and nonferrous metals, destructive and nondestructive testing, protective coatings, strengthening and heat treatment; laboratory includes metallurgical procedures, mechanical testing, heat treatment, surface treatment, corrosion testing, recrystallization and failure analysis.
Prerequisite: CHEM 102 or CHEM 107 with a grade of C or better; manufacturing and mechanical engineering technology or industrial distribution major or approval of department.

MMET 275 Mechanics for Technologists
Credits 4. 4 Lecture Hours.
Forces, moments and couples in 2-D and 3-D systems; equilibrium of rigid bodies; friction and applications; centroids and moments of inertia; review of particle dynamic principles; kinematics and kinetics of rigid bodies; principles of impulse-momentum and workenergy; computer use in selected areas.
Prerequisites: Grade of C or better in MATH 152 and PHYS 218; manufacturing and mechanical engineering technology major or approval of department.

MMET 281 Manufacturing and Assembly Processes II
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Continuation of MMET 181. Economics and manufacturability in polymer molding processes; assembly (fits and tolerances); compatibility of metallic and non-metallic discrete parts.
Prerequisites: Grade of C or better in MMET 181 and MMET 206; manufacturing and mechanical engineering technology major or approval of department.

MMET 303 Fluid Mechanics and Power
Credits 4. 3 Lecture Hours. 2 Lab Hours.
Fluid mechanics and fluid power applications for technologists; fluid properties; conservation of energy and momentum; incompressible flow in pipes; standard symbols: components and control of hydraulic systems and pneumatic systems.
Prerequisites: MMET 275, ENGL 104, MATH 151, MATH 152, CHEM 107 and CHEM 117, PHYS 218 with a grade of C or better.

MMET 313 Industrial Welding Processes
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Theory and practical applications of industrial welding and cutting processes; experience in operation of various machines and processes.
Prerequisites: Grade of C or better in MMET 181 and MMET 207 and MMET 376; grade of C or better in ENGL 104, MATH 151, MATH 152, CHEM 107 and CHEM 117, and PHYS 218; junior or senior classification in manufacturing and mechanical engineering technology major.

MMET 320 Quality Assurance
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Applied statistical process control and design-of-experiment techniques for quality improvement and process characterization; emphasis on organizations operating in a continuous-improvement, customer-driven environment; statistical thinking; control charts; capability analysis of product, process and measurement system; experimental process characterization, prediction models and input variable control.
Prerequisites: STAT 211 with a grade of C or better; completion of ENGL 104, MATH 151, MATH 152, CHEM 107 and CHEM 117, and PHYS 218 with a grade of C or better; junior or senior classification in manufacturing and mechanical engineering technology.

MMET 361 Product Design and Solid Modeling
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Design processes and methodologies including quality function deployment, materials and process selection, and design for manufacturing and assembly; fundamentals of modeling part geometry and mechanical assembly using parametric CAD software.
Prerequisites: Grade of C or better in MMET 181, MMET 206, MMET 207 and MMET 275; completion of ENGL 104, MATH 151, MATH 152, CHEM 107 and CHEM 117, and PHYS 218 with a grade of C or better; junior or senior classification in manufacturing and mechanical engineering technology.

MMET 363 Mechanical Design Applications I
Credits 3. 3 Lecture Hours.
Principles of design of mechanical components; theories of failure; Soderberg and Goodman diagrams; fatigue and fracture design criteria; materials and their selection to engineering applications; component assembly aspects; design of fasteners and springs as examples.
Prerequisites: MMET 376 with a grade of C or better; completion of ENGL 104, MATH 151, MATH 152, CHEM 107 and CHEM 117, and PHYS 218 with a grade of C or better; junior or senior classification in manufacturing and mechanical engineering technology.

MMET 370 Thermodynamics for Technologists
Credits 4. 3 Lecture Hours. 2 Lab Hours.
Thermal and mechanical energy transformations; relationships applied to flow and non-flow processes in power and refrigeration cycles; devices include compressors, turbines, heat exchangers, nozzles, diffusers, pumps and piston-cylinder models; computer modeling.
Prerequisites: PHYS 218 with a grade of C or better; completion of ENGL 104, MATH 151, MATH 152, CHEM 107 and CHEM 117; and PHYS 218 with a grade of C or better; junior or senior classification in manufacturing and mechanical engineering technology.

MMET 376 Strength of Materials
Credits 4. 3 Lecture Hours. 2 Lab Hours.
Stress and strain; elastic moduli Poisson's ratio; torsion, bending, unsymmetrical bending; design of beams and shafts; deflection of beams; buckling of columns; material and strength characterization laboratory tests.
Prerequisites: Grade of C or better in MMET 207 and MMET 275; completion of ENGL 104, MATH 151, MATH 152, CHEM 107 and CHEM 117, and PHYS 218 with a grade of C or better; junior or senior classification in manufacturing and mechanical engineering technology.
MMET 380 Computer-Aided Manufacturing
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Basic concepts in computer-aided manufacturing with emphasis on a
system approach to manufacturing activities; use of numerical control
machine tools and other computer based software as applied to different
industries.
Prerequisites: Grade of C or better in MMET 181 and MATH 152;
completion of ENGL 104, MATH 151, CHEM 107 and CHEM 117, and
PHYS 218 with a grade of C or better; junior or senior classification in
manufacturing and mechanical engineering technology.

MMET 383 Manufacturing Information Systems
Credits 4. 3 Lecture Hours. 3 Lab Hours.
Use of information technology for manufacturing enterprise applications,
including computer-integrated manufacturing, database, computer
networking, web-technology and enterprise resource planning.
Prerequisites: MMET 380 with a grade of C or better; completion of
ENGL 104, MATH 151, MATH 152, CHEM 107 and CHEM 117, and
PHYS 218 with a grade of C or better; junior or senior classification in
manufacturing and mechanical engineering technology.

MMET 402 Inspection Methods and Procedures
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Methods and procedures in nondestructive inspection of materials
and industrial products; ultrasonics, dye penetrants, magnetic particle,
radiography and supportive evaluation methods such as weld sectioning,
polishing, etching and macroscopic analysis.
Prerequisites: Grade of C or better in MMET 281 and MMET 376;
completion of ENGL 104, MATH 151, MATH 152, CHEM 107 and
CHEM 117, and PHYS 218 with a grade of C or better; junior or senior classification in
manufacturing and mechanical engineering technology.

MMET 405 Weldability of Ferrous Metals
Credits 3. 3 Lecture Hours.
Applied principles of metallurgy with reference to weldability of ferrous
metals.
Prerequisites: MMET 207 or MEEN 340; MMET 313 or approval of
instructor; admitted to major degree sequence (upper-level) in engineering
technology.

MMET 410 Manufacturing Automation and Robotics
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Hardware for automated work handling, conveyors, loaders, robots,
storage devices; power sources and methods of control, electric motors,
controllers, program logic controllers, robot programming; interfacing of
equipment controls; and manufacturing work cells.
Prerequisites: Grade of C or better in MMET 361, MMET 376, MMET
380, MMET 383 and IDIS 300; completion of ENGL 104, MATH 151,
MATH 152, CHEM 107 and CHEM 117, and PHYS 218 with a grade of C
or better; junior or senior classification in manufacturing and mechanical
engineering technology.

MMET 412 Production and Inventory Planning
Credits 3. 2 Lecture Hours. 2 Lab Hours.
An introductory treatment of models and techniques for the planning of
production and inventory systems.
Prerequisites: Grade of C or better in MMET 320, MMET 380, MMET 383
and ISEN 302; completion of ENGL 104, MATH 151, MATH 152, CHEM
107 and CHEM 117, and PHYS 218 with a grade of C or better; senior
classification in manufacturing and mechanical engineering technology.

MMET 414 Micro/Nano Manufacturing
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Product miniaturization and impact; review of atomic structure,
electrical and physical properties of materials; ultraprecision machining;
microlithography; dry and wet etching/sputtering techniques; isotropic and
anisotropic processes; pattern transfer with additive processes; surface
micromachining; microreplication processes; introduction to packaging
technology and nanometrology; manufacturing of selected microsystems
(MEMS) and their applications.
Prerequisites: CHEM 107; PHYS 208; senior or graduate in engineering
or science; admitted to major degree sequence (upper-level) in
engineering technology for ENTC majors.

MMET 418 Medical Manufacturing
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Surveys relevant regulations, biocompatibility of engineering materials,
and emphasizes suitable techniques for medical device manufacturing.
Prerequisites: MMET 181, junior or senior level classification or approval
of instructor.

MMET 422 Manufacturing Technology Projects
Credits 2. 1 Lecture Hour. 3 Lab Hours.
A capstone projects course utilizing a team approach to an analysis and
solutions of manufacturing problems.
Prerequisites: MMET 429 with a grade of C or better; completion of
junior-level courses; must be taken semester of graduation; approval
of instructor; completion of ENGL 104, MATH 151, MATH 152, CHEM
107 and CHEM 117, and PHYS 218 with a grade of C or better; senior
classification in manufacturing and mechanical engineering technology.

MMET 429 Managing People and Projects in a Technological Society
Credits 3. 3 Lecture Hours.
Supervisory and project management duties and responsibilities in
technology based organizations and the methods required to fulfill these
functions.
Prerequisites: ISEN 302 with a grade of C or better, or approval of
instructor; must be taken during long semester prior to MMET 422;
completion of ENGL 104, MATH 151, MATH 152, CHEM 107 and CHEM
117, and PHYS 218 with a grade of C or better; senior classification in
manufacturing and mechanical engineering technology.

MMET 463 Mechanical Design Applications II
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Applications of principles of analysis and design of machines and machine
elements including linkages, robots, cam and follower systems, shafts,
gears, clutches, belt and chain drives; introduction to the mathematical
tools for the analysis and design of these machines and machine
elements.
Prerequisites: Grade of C or better in MMET 361 and MMET 363;
completion of ENGL 104, MATH 151, MATH 152, CHEM 107 and CHEM
117, and PHYS 218 with a grade of C or better; senior classification in
manufacturing and mechanical engineering technology.

MODL - Modern Languages

Courses

MODL 221/ENGL 221 World Literature
Credits 3. 3 Lecture Hours.
Survey of world literature from the ancient world through the sixteenth
century in relation to its historical and cultural contexts; texts selected from
a diverse group of authors, traditions and genres.
Cross Listing: ENGL 221/MODL 221.
MODL 222/ENGL 222 World Literature
Credits 3. 3 Lecture Hours.
Survey of world literature from the seventeenth century to the present in relation to its historical and cultural contexts; texts selected from a diverse group of authors, tradition and genres.
Cross Listing: ENGL 222/MODL 222.

MODL 289 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Selected topics in an identified area of modern languages. May be repeated for credit.
Prerequisite: Approval of department head.

MODL 485 Directed Studies
Credits 0 to 4. 0 to 4 Other Hours.
Individual supervision of readings or assigned projects, selected for each student individually. Written and oral reports. No class meetings.
Prerequisite: Approval of department head.

MODL 489 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Selected topics in an identified area of modern languages. May be repeated for credit.
Prerequisite: Approval of department head.

MSEN -Materials Science & Engr

Courses

MSEN 201 Introduction to Materials Science
Credits 3. 3 Lecture Hours.
Processing, structure, properties and performance in materials; materials structure and defects over many orders of scale; mechanical, thermal, electrical, magnetic and optical properties.
Prerequisites: CHEM 102 or CHEM 104 or CHEM 107; PHYS 218.

MSEN 285 Directed Studies
Credits 1 to 4. 1 to 4 Other Hours.
Directed study of selected problems in the area of materials science and engineering. May be taken for credit 4 times.
Prerequisite: Approval of instructor.

MSEN 289 Special Topics In...
Credits 1 to 3. 1 to 3 Lecture Hours. 0 to 3 Lab Hours.
Selected topics in an identified area of materials science and engineering. May be repeated for credit.
Prerequisite: Approval of instructor.

MSEN 310 Structure of Materials
Credits 3. 3 Lecture Hours.
Symmetry, unit cell and the atomic structure of crystalline and non-crystalline materials; the bonding forces and energy for van der Waals, metallic, ionic and covalent crystals.
Prerequisites: MSEN 201 or approval of instructor; junior or senior classification.

MSEN 410 Materials Processing
Credits 3. 3 Lecture Hours.
Synthesis, properties and processing of technologically important inorganic materials (metals and ceramics); includes thermodynamics and kinetics of different materials processing methods, casting, deformation processing, heat treatments, powder processing and sintering, coating and thin films processing, etc.
Prerequisites: MSEN 201 or approval of instructor; junior or senior classification.

MSEN 420 Polymer Science
Credits 3. 3 Lecture Hours.
Polymer structure, processing, property characterization at the molecular, microscopic and macroscopic dimensional levels for thermosets, thermoplastics, elastomers, fibers and advanced non-particle filled composites and smart multi-performance structures.
Prerequisites: MSEN 201 or MEEN 222 or AERO 213 or CHEN 313; junior or senior classification.

MSEN 460 Electronic, Optical and Magnetic Properties of Materials
Credits 3. 3 Lecture Hours.
Prerequisites: MSEN 201 or approval of instructor; junior or senior classification.

MSEN 485 Directed Studies
Credits 1 to 4. 1 to 4 Other Hours.
Directed study of selected problems in the area of materials science and engineering. May be taken four times for credit.
Prerequisite: Approval of instructor.

MSEN 489 Special Topics In...
Credits 1 to 4. 1 to 4 Lecture Hours. 0 to 4 Lab Hours.
Selected topics in an identified area of materials science and engineering. May be repeated for credit.
Prerequisite: Approval of instructor.

MSEN 491 Research
Credits 1 to 4. 1 to 4 Other Hours.
Research conducted under the direction of a faculty member in materials science and engineering. May be taken four times for credit.
Prerequisites: Junior or Senior classification or approval of instructor.

MSEN 601 Fundamental Materials Science and Engineering
Credits 4. 4 Lecture Hours.
Fundamentals of microstructure - properties and relationship of materials. Topics will include: electronic and atomic structure of solids, structure of crystalline materials, imperfections in crystalline materials, introduction to dislocation theory, mechanical properties, fundamental thermodynamics of materials, phase equilibria and diagrams, diffusion, and kinetics of phase transformations.
Prerequisite: Graduate classification.
MSEN 602 Advanced Materials Science and Engineering
Credits 4. 4 Lecture Hours.
Fundamentals of quantum mechanics, physics of solid state, and physical electronics and photonics for advanced materials. Topics will include: basic quantum mechanical problems, quantum basis for structural and physical properties of solids, lattice vibrational effects in solids, free electron model for magnetism in solids, semiconductor materials and devices, nanostructures and mesoscopic phenomena, superconductivity, recent advances in new types of materials.
Prerequisite: MSEN 604, undergraduate quantum mechanics course, or approval of instructor.

MSEN 603 Fundamentals of Soft and Biomaterials
Credits 3. 3 Lecture Hours.
Introductory graduate-level survey on the general areas of soft materials and biomaterials; includes basic concepts of colloidal particle physics, polymer physics and chemistry, and general concepts in biomaterials.
Prerequisites: Undergraduate general chemistry course; graduate classification.

MSEN 604 Quantum Mechanics for Materials Scientists
Credits 3. 3 Lecture Hours.
Provides a background in quantum mechanics for graduate materials scientists or engineers with little or no quantum mechanics background. The following topics will be covered: origins of quantum theory, interpretation, Schroedinger equation and its applications, operator mechanics, approximation methods, angular momentum, the hydrogen atom, and quantum statistics.
Prerequisites: MATH 601, MATH 311 or approval of instructor; graduate classification.

MSEN 606 Multifunctional Materials
Credits 3. 3 Lecture Hours.
In-depth analysis of multifunctional materials and composites, and their novel applications.
Prerequisites: MEMA 602/AERO 603/AERO 603/MEMA 602, MSEN 601.
Cross Listing: AERO 606 and MEMA 606.

MSEN 607/MEEN 607 Polymer Physical Properties
Credits 3. 3 Lecture Hours.
Macromolecular concepts; molecular weight characterization; solubility parameters; phase diagrams; viscoelasticity; rheology; thermal behavior; damage phenomena; morphology; crystallization; liquid crystallinity; nanocomposites.
Prerequisites: MEEN 222 (or other intro to materials science course).
Cross Listing: MSEN 607/MEEN 607.

MSEN 608 Nanomechanics
Credits 3. 3 Lecture Hours.
Application of mechanics concepts to nano-scale behavior of materials. Review of continuum mechanics; Extensions to generalized continua; Nonlocal elasticity; Nano-scale plasticity. Focus on multi-scale modeling: Dislocation Dynamics; Quasi-Continuum method; Molecular dynamics with introductions to quantum mechanics and statistical mechanics.
Prerequisite: AERO 603/MEMA 602.
Cross Listing: AERO 608 and MEMA 608.

MSEN 612/BIOL 602 Fundamentals of Transmission Electron Microscopy
Credits 3. 2 Lecture Hours. 6 Lab Hours.
(2-6) State-of-the-art fundamentals in TEM; theoretical background supporting a strong hands-on course component comprising specimen preparation and image acquisition/interpretation; practical experience to attain a proficiency level permitting independent operation of one of the transmission electron microscopes in the Microscopy and Imaging Center.
Prerequisite: Graduate classification or approval of instructor.
Cross Listing: BIOL 602/MSEN 612 or MSEN 612/BIOL 602.

MSEN 613/BIOL 603 Advanced Transmission Electron Microscope (TEM) Methodologies in Life and Materials Science (TEM II)
Credits 3. 1 Lecture Hour. 6 Lab Hours.
Advanced TEM methodologies, including specimen preparation and TEM imaging/analysis techniques as applicable to both biological and material samples; theory designed to support a strong hands-on component comprising specimen preparation, different imaging/diffraction/ spectroscopic techniques and data interpretation.
Prerequisite: BIOL 602/MSEN 612 or MSEN 612/BIOL 602.
Cross Listing: BIOL 603/MSEN 613.

Credits 2. 1 Lecture Hour. 3 Lab Hours.
Fundamentals of Scanning Electron Microscopy (SEM) and Environmental Scanning Electron Microscopy (ESEM). Provides biologists, material scientists and students from other disciplines with the techniques of operation of the scanning electron microscope (SEM) and the environmental SEM (ESEM) coupled with the appropriate theoretical background knowledge; individual instruction in support of their research endeavors involving SEM/ESEM.
Prerequisite: Graduate classification.
Cross Listing: BIOL 604/MSEN 614.

MSEN 616/MEEN 616 Surface Science
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Properties of surfaces, principles of classic and contemporary surface characterization techniques, recent development and roles of surface science in advanced technology.
Prerequisite: Graduate classification.
Cross Listing: MEEN 616/MSEN 616.

MSEN 618/MEEN 686 Composite Materials Processing and Performance
Credits 3. 3 Lecture Hours.
Fundamental science and design; processing and design interaction regarding multiphase composites; processing science, experimental characterization, laminate analysis; design structure and processing.
Prerequisite: Elasticity, continuum mechanics, or equivalent; graduate classification.
Cross Listing: MEEN 686/MSEN 618.

MSEN 619 Materials Modeling of Phase Transformation and Microstructural Evolution
Credits 3. 3 Lecture Hours.
Computer modeling and simulation of microstructural evolution during various phase transformation processes in solid materials, including spinodal decomposition, ordering, martensitic transformation, ferroelectric and ferromagnetic domain evolution, dislocation dynamics, and crack propagation.
Prerequisites: Graduate classification and approval of instructor.
MSEN 620/MEEN 620 Kinetic Processes in Materials Science
Credits 3. 3 Lecture Hours.
Atomistic and mesoscale levels; foundation for microstructural evolution and behavior of materials; basic and irreversible thermodynamics; diffusion equations solutions; atomistic diffusion, nucleation; phase transformations: gas-solid, liquid-solid and solid-solid reactions; FiPy (finite volume solver for PDE) to simulate kinetic processes.
Prerequisites: MEEN 222 or equivalent materials science course; preliminary general thermodynamics course is not necessary.
Cross Listing: MEEN 620/MSEN 620.

MSEN 625/MEEN 625 Mechanical Behavior of Materials
Credits 3. 3 Lecture Hours.
Examination of deformation and microstructure mechanisms responsible for deformation and failure in metals; fatigue, creep, and fracture mechanisms of materials; emphasis on microstructural-mechanical property relationship.
Prerequisite: Undergraduate-level materials science course.
Cross Listing: MEEN 625/MSEN 625.

MSEN 626/MEEN 606 Polymers Laboratories
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Introduction to basic experimental skills relating to polymers; experiments include polymerization, molecular weight determination, FTIR, tensile test, NMR, DSC, swelling index, viscosity, x-ray diffraction.
Prerequisite: Graduate classification.
Cross Listing: MEEN 606/MSEN 626.

MSEN 636 Damage Mechanics and Failure in Composite Materials
Credits 3. 3 Lecture Hours.
Mechanisms and models related to damage and failure in composite materials subjected to mechanical loads.
Prerequisites: Courses in composite materials, elasticity; graduate classification.
Cross Listing: AERO 616 and MEMA 616.

MSEN 640/MEEN 640 Thermodynamics in Materials Science
Credits 3. 3 Lecture Hours.
Use of thermodynamic methods to predict behavior of materials; codification of thermodynamic properties into simplified models; principles, methods, and models to generate accurate equilibrium maps through computational thermodynamics software; applications to bulk metallic, polymeric and ceramic materials, defects, thin films, electrochemistry, magnetism.
Prerequisites: MEEN 222 or equivalent; graduate classification.
Cross Listing: MEEN 640/MSEN 640.

MSEN 641 Plasticity Theory
Credits 3. 3 Lecture Hours.
Theory of plastic yield and flow of two and three-dimensional bodies; classical plasticity theories, unified viscoplastic theories, numerical considerations; applications and comparisons of theory to experiment.
Prerequisite: MEMA 602/AERO 603.
Cross Listing: MEEN 666 and MEMA 641.

MSEN 656/MEEN 656 Mechanical and Physical Properties of Thin Films
Credits 3. 3 Lecture Hours.
Mechanical properties (hardness, stress, strain, delamination, fracture) of films; nanomechanical testing techniques; electrical properties of thin films; electrical properties measurement techniques; magnetic properties of films; magnetic properties measurement techniques; laboratory includes (1) thin film fabrication (sputtering, PVD); (2) nanomechanical testing; (3) electrical/magnetic measurement.
Prerequisite: MEEN 222, MSEN 601, or basic materials science background.
Cross Listing: MSEN 656/MSEN 656.

MSEN 658/MEEN 658 Fundamentals of Ceramics
Credits 3. 3 Lecture Hours.
Atomic bonding; crystalline and glassy structure; phase equilibria and ceramic reactions; mechanical, electrical, thermal, dielectric, magnetic, and optical properties; ceramic processing.
Prerequisite: MEEN 222 or equivalent or approval of instructor.
Cross Listing: MSEN 658/MSEN 658.

MSEN 670 Computational Materials Science and Engineering
Credits 3. 3 Lecture Hours.
Modern methods of computational modeling and simulation of materials properties and phenomena, including synthesis, characterization, and processing of materials, structures and devices; quantum, classical, and statistical mechanical methods, including semi-empirical atomic and molecular-scale simulations, and other modeling techniques using macroscopic input.
Prerequisites: Approval of instructor; graduate classification.
Cross Listing: CHEN 670 and MEMA 670.

MSEN 681 Seminar
Credit 1. 1 Lecture Hour.
Selected research topics in materials science and engineering presented by faculty, students, and outside speakers.
Prerequisite: Graduate classification.

MSEN 684 Professional Internship
Credits 1 to 9. 1 to 9 Other Hours.
Directed internship in an industrial or laboratory setting under the supervision of successful, experienced personnel; work related to the student's career aspirations and areas of specialization. May be taken 2 times for credit.
Prerequisite: Graduate classification.

MSEN 685 Directed Studies
Credits 1 to 12. 1 to 12 Other Hours.
Special topics not within the scope of thesis research and not covered by other formal courses.
Prerequisite: Graduate classification.

MSEN 689 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Selected topics in an identified area of materials science and engineering. Potential topics include: advanced phase transformations, advanced materials and processing, nanomaterials and nanotechnologies, computational modeling of materials, advanced techniques of spectroscopy, surface and interface phenomena, thin film processing, ceramic engineering, organic materials for electronic and photonic devices, biomedical microdevices, materials fabrication, processing and fabrication of semiconductors, and materials and processing for MEMS. May be repeated for credit.
Prerequisite: Approval of instructor.
MSEN 691 Research
Credits 1 to 23. 1 to 23 Other Hours.
Research toward thesis or dissertation.

MUSC - Music

Courses

MUSC 102 Fundamentals of Music
Credits 3. 3 Lecture Hours.
(MUSI 1300, 1301, 1030, 1304) Fundamentals of Music. Introduction to the basic elements of music (pitch, rhythm, scales, intervals and triads) and how these elements interrelate to form musical compositions; the application of musical understanding to particular instruments such as the guitar, keyboard, recorder and voice.

MUSC 200 Topics in Music
Credits 3. 3 Lecture Hours.
The study of a circumscribed musical topic in its sociohistorical context; emphasis on the aesthetic, social and cultural issues affecting music rather than on technical analysis. May be repeated for credit.

MUSC 204 Music Theory I
Credits 2. 2 Lecture Hours. 1 Lab Hour.
(MUSI 1211) Music Theory I. Basic concepts of harmonic and contrapuntal structures in diatonic tonal music, musical analysis of these structures, and musical composition; using these structures for piano solo, voice and piano and other small ensembles; includes harmonic progression, root/first/second inversion harmonies, cadences and 2v 1st-, 2nd-, and 4th-species counterpoint.
Prerequisites: MUSC 102 or placement exam and music major or minor status; concurrent enrollment in MUSC 205.

MUSC 204 Music Theory II
Credits 2. 2 Lecture Hours. 1 Lab Hour.
(MUSI 1212) Music Theory II. Continuation of harmonic and contrapuntal principles in chromatic tonal music, musical analysis of these structures, and musical composition using these structures for small ensembles; includes secondary functions, common-chord modulation, basic reductive techniques and compound melody, phrase structure, 2v imitative counterpoint, and 2v 3rd- and 5th-species.
Prerequisites: MUSC 204 and 208 and music major or minor status; concurrent enrollment in MUSC 210.

MUSC 206 Music Theory III
Credits 2. 2 Lecture Hours. 1 Lab Hour.
(MUSI 2211, 2212, 2311, 2312) Music Theory III. Continued study of harmonic, contrapuntal and set-theoretical principles, composition and analysis of highly chromatic tonal music and twentieth-century music; includes mode mixture, Neapolitans, augmented sixths, "tall" chords, substitute chords, passing harmonies, enharmonicism, extended chromaticism, modes, artificial scales, impressionism, pandiatonicism, atonality, serialism, aleatory, sound mass, minimalism and electronic music.
Prerequisites: MUSC 205 and MUSC 210, and music major or minor status; concurrent enrollment in MUSC 212.

MUSC 207 Form and Analysis
Credits 2. 2 Lecture Hours. 1 Lab Hour.
Focus on phrase structure, traditional small and large forms in full score, Baroque compositional procedures, reductive (pre-Shenkerian) analytical techniques and Schoenberger composition theory; extensive listening, reading and analysis; includes binary, ternary, rondo, variation, sonata and fugue; musicianship studies from earlier courses.
Prerequisites: MUSC 206 and MUSC 212 and music major or minor status.

MUSC 208 Musicianship I
Credit 1. 2 Other Hours.
(MUSI 1116, 1216) Musicianship I. Application of concepts taught in MUSC 204; focus on ear training, aural analysis, sight singing, rhythm and rudimentary keyboard skills.
Prerequisites: MUSC 102, and music major or minor status; concurrent enrollment in MUSC 204.

MUSC 210 Musicianship II
Credit 1. 2 Other Hours.
(MUSI 1117, 1217) Musicianship II. Application of concepts taught in corequisite course MUSC 205; focus on ear training, aural analysis, sight singing, rhythm and rudimentary keyboard skills.
Prerequisites: MUSC 204 and MUSC 208 and music major or minor status; concurrent enrollment in MUSC 205.

MUSC 212 Musicianship III
Credit 1. 2 Other Hours.
Application of concepts taught in MUSC 206; focus on ear training, aural analysis, sight singing, rhythm and rudimentary keyboard skills.
Prerequisites: MUSC 205 and MUSC 210 and music major or minor status; concurrent enrollment in MUSC 204.

MUSC 214 Perspectives on World Music
Credits 3. 3 Lecture Hours.
A thematic overview of basic issues in ethnomusicology; provides an appreciation for the diversity of ways in which music sound and music making are organized in world cultures; includes music making and the performance event, music and identity, music and nationalism, and music and globalization.
Prerequisites: MUSC 204, ENGL 104 and ANTH 201, or approval of instructor.

MUSC 215 Fieldwork in World Music
Credits 3. 3 Lecture Hours.
Hands-on experience with readings in and critical analysis of ethnographic musical research; philosophies and practices of fieldwork on the world's music.
Prerequisite: MUSC 214 or approval of instructor.

MUSC 221 Guitar Heroes
Credits 3. 3 Lecture Hours.
Survey of social, cultural and aesthetic transformations of music history centered on important classical guitarists; exploration of their performance and compositional/musical styles; analysis of how their contributions gave rise to and revived the guitar's popularity as a concert-level instrument in both the classical and folk idioms.

MUSC 222 Music of the Americas
Credits 3. 3 Lecture Hours.
Evolution of music of the Americas and the Caribbean; influence of natives, people of forced relocation and people from European communities; the syncretic process of music making.
MUSC 225 History of Jazz  
Credits 3.3 Lecture Hours.  
Non-technical survey of jazz as America’s classical music, from the earliest recorded blues through the most recent trends; examination of how jazz has broadly expressed issues of modern life.

MUSC 226 History of Rock  
Credits 3.3 Lecture Hours.  
Examination of the development of rock music; emphasis on how the sounds and meaning of music reflects culture, ideology and history.

MUSC 227 Popular Music of India  
Credits 3.3 Lecture Hours.  
Introduction to Indian popular musics and society; focus on musical, cultural and aesthetic features of “Bollywood” films and film songs; overview of Indian social, cultural and religious expression.

MUSC 228 History of Electronic Music  
Credits 3.3 Lecture Hours.  
Historical survey of electronic music, including key technological advancements, people and musical works; exploration of electronic music from different genres and countries.

MUSC 235 Introduction to Composition  
Credits 3.3 Lecture Hours.  
Significant styles and techniques in contemporary music including classical, jazz and popular trends; contemporary sonic design achieved through written exercises, reading and critical listening.  
Prerequisite: MUSC 204.

MUSC 245 Composition I  
Credit 1.2 Other Hours.  
(MUSI 1286) Composition I. Instruction in composition; the writing of small-form musical compositions employing contemporary styles; techniques in writing for instrumental, vocal, electronic and mixed-media resources. May be taken 2 times for credit.  
Prerequisite: MUSC 207 or approval of instructor.

MUSC 253 Individual Performance: Guitar I  
Credit 1.0 Lecture Hours. 3 Lab Hours.  
(MUSI 1192) Individual Performance: Guitar I. Instruction in guitar performance; broad range of literature with special emphasis on the historical and theoretical aspects that reveal the performance practices of specific periods; individual and group laboratory instruction. May be taken six times for credit.  
Prerequisite: Approval of instructor.

MUSC 254 Individual Performance--Voice I  
Credit 1.2 Other Hours.  
(MUSI 1183, 1184, 2182, 2184) Individual Performance--Voice I. Instruction in vocal performance; broad range of literature with special emphasis on the historical and theoretical aspects that reveal the performance practices of specific periods; individual and group laboratory instruction. May be repeated for credit.  
Prerequisite: Approval of instructor.

MUSC 255 Individual Performance—Keyboard I  
Credit 1.2 Other Hours.  
(MUSI 1114, 1115, 1181, 1182, 2115, 2181, 2182) Individual Performance—Keyboard I. Instruction in keyboard performance; broad range of literature with special emphasis on the historical and theoretical aspects that reveal the performance practices of specific periods; individual and group laboratory instruction. May be repeated for credit.  
Prerequisite: Approval of instructor.

MUSC 256 Individual Performance: String I  
Credit 1.0 Lecture Hours. 3 Lab Hours.  
(MUSI 1195) Individual Performance: String I. Instruction in string performance; broad range of literature with special emphasis on the historical and theoretical aspects that reveal the performance practices of specific periods; individual and group laboratory instruction. May be taken six times for credit.  
Prerequisite: Approval of instructor.

MUSC 259 Individual Performance via Classroom Instruction  
Credit 1.0 Lecture Hours. 3 Lab Hours.  
Individual performance skills studied in a classroom setting; broad range of literature with special emphasis on the historical and theoretical aspects that reveal the performance practices of specific periods. May be taken six times for credit.

MUSC 270 Individual Performance: Woodwind I  
Credit 1.3 Lab Hours.  
(MUSI 1166) Individual Performance: Woodwind I. Instruction in woodwind performance; broad range of literature with special emphasis on the historical and theoretical aspects that reveal the performance practices of specific periods; individual and group laboratory instruction. May be taken six times for credit.  
Prerequisite: Approval of instructor.

MUSC 271 Individual Performance: Brass I  
Credit 1.3 Lab Hours.  
(MUSI 1178) Individual Performance: Brass I. Instruction in brass performance; broad range of literature with special emphasis on the historical and theoretical aspects that reveal the performance practices of specific periods; individual and group laboratory instruction. May be taken six times for credit.  
Prerequisite: Approval of instructor.

MUSC 272 Individual Performance: Percussion I  
Credit 1.3 Lab Hours.  
(MUSI 1188) Individual Performance: Percussion I. Instruction in percussion performance; broad range of literature with special emphasis on the historical and theoretical aspects that reveal the performance practices of specific periods; individual and group laboratory instruction. May be taken six times for credit.  
Prerequisite: Approval of instructor.

MUSC 280 Ensemble Performance--Symphonic Band  
Credit 1.3 Lab Hours.  
Three select musical performing ensembles (symphonic, concert and campus bands) composed of 65 to 100 members each and devoted to learning the extensive literature written for wind band; activities include at least two concerts per semester; annual tours during spring for the symphonic band. Students may register in up to but no more than two different sections of this course. May be repeated for credit.  
Prerequisite: Satisfactory audition.

MUSC 281 Ensemble Performance--Small Ensembles  
Credit 1.3 Lab Hours.  
Participation in small ensemble performance; the study and performance of small ensemble repertoire from all historical periods and styles. May be repeated for credit.  
Prerequisite: Satisfactory audition.
**MUSC 282 Ensemble Performance--Jazz Ensemble**  
**Credit 1. 3 Lab Hours.**  
A select musical performing ensemble of 18 to 25 members devoted to performing all styles and periods of jazz music from big band to modern jazz; activities include at least 2 performances each semester. May be repeated for credit.  
**Prerequisite:** Satisfactory audition.  

**MUSC 283 University Student Orchestra**  
**Credit 1. 3 Lab Hours.**  
The rehearsal and performance of orchestra literature of various historical backgrounds; full ensemble rehearsal, individual practice, and public performances; development of knowledge, understanding, and appreciation for aspects of music ranging from the Renaissance to the Modern Era. May be repeated 10 times for credit.  
**Prerequisites:** Previous orchestral experience; successful audition with Conductor.  

**MUSC 285 Directed Studies**  
**Credits 0 to 9. 0 to 3 Other Hours.**  
Directed Studies in specific problems in identified areas of music. May be repeated for credit up to 9 hours.  
**Prerequisites:** Approval of instructor and department head; MUSC majors and minors only.  

**MUSC 286 Ensemble Performance--Symphony Orchestra**  
**Credit 1. 3 Other Hours.**  
Participation in the Brazos Valley Symphony Orchestra, a community/university ensemble; includes rehearsals off campus and varying course requirements depending on the setting and needs of the student. May be repeated for credit.  
**Prerequisite:** Satisfactory audition.  

**MUSC 289 Special Topics in...**  
**Credits 1 to 4. 1 to 4 Lecture Hours.**  
Selected topics in an identified area of music. May be repeated for credit.  
**Prerequisite:** Approval of instructor.  

**MUSC 290 Ensemble Performance--Choir**  
**Credit 1. 1 Other Hour.**  
A select musical performing ensemble composed of 40 to 70 members devoted to learning and performing works from the vast repertory of choral music from all historical periods and styles; several performances, occasionally with orchestra, each semester on and off campus. Students may register in up to but no more than two different sections of this course. May be repeated for credit.  
**Prerequisite:** Satisfactory audition.  

**MUSC 301 Performance in World Cultures**  
**Credits 3. 3 Lecture Hours.**  
Application of the tools of performance studies to explore the enactment of the arts in world cultures and the ways the people of every society express themselves in performance; examination of different genres of performance through music, theatre, verbal art and dress.  
**Prerequisite:** Junior or senior classification or approval of instructor.  
**Cross Listing:** PERF 301 and THAR 301.  

**MUSC 311 Music in Early Western Culture**  
**Credits 3. 3 Lecture Hours.**  
Survey of styles, genres, and forms in Western music, focusing on the lives and works of the principal composers from Greek antiquity to the end of the Baroque period within the context of political, social and cultural developments.  
**Prerequisite:** MUSC 202, MUSC 205, or approval of instructor.  

**MUSC 312 Music in Modern Western Culture**  
**Credits 3. 3 Lecture Hours.**  
Survey of styles, genres, and forms in Western music, focusing on the lives and works of the principal composers from the middle of the eighteenth century to the present within the context of political, social and cultural developments.  
**Prerequisite:** MUSC 202, MUSC 205, or approval of instructor.  

**MUSC 315 Music in the 20th Century**  
**Credits 3. 3 Lecture Hours.**  
The understanding and enjoyment of twentieth century music; survey of the broad panorama of the contemporary scene and an assessment of the forces that have shaped the musical climate we inhabit.  
**Prerequisite:** MUSC 206 or approval of instructor.  

**MUSC 316 Music and Technology**  
**Credits 3. 3 Lecture Hours. 1 Lab Hour.**  
Study of music produced with the aid of electronic and computer technologies; critical listening and analysis of music literature; understanding of technical concepts; required laboratory provides creative practical experience in studio and live performance applications.  
**Prerequisite:** Junior or senior classification and MUSC 206, PERF 202, or approval of instructor.  

**MUSC 317 Recording and the Producer**  
**Credits 3. 3 Lecture Hours.**  
Tools and techniques of studio recording; the studio as compositional tool; recorded literature examining the creative and ideological impact of the producer; recording projects applying course techniques and exploring aesthetic concepts.  
**Prerequisite:** MUSC 316 or approval of instructor.  

**MUSC 318/PERF 318 Electronic Composition**  
**Credits 3. 3 Lecture Hours.**  
Project-based study of techniques for creating electronic and mixed-media performance; critical analysis of important electronic and interactive works; interactive media programming techniques for sound and video synthesis, sampling, digital signal processing.  
**Prerequisites:** Junior or senior classification and MUSC 316, PERF 202, or approval of instructor.  
**Cross Listing:** PERF 318/MUSC 318.  

**MUSC 321 The Symphony Orchestra and Its Music**  
**Credits 3. 3 Lecture Hours.**  
The development of the symphony orchestra with particular attention to its vast musical repertory, and the colorful personalities associated with it; the organization and management of this musical institution including local arts support and volunteerism.  
**Prerequisite:** Approval of instructor.  

**MUSC 324/ANTH 324 Music in World Cultures**  
**Credits 3. 3 Lecture Hours.**  
Examination of music from an ethnomusicological perspective focusing on musical performance and the complex interrelationship of music to culture, society and daily life; examination of music from a variety of cultures through a series of case studies.  
**Prerequisite:** Junior or senior classification or approval of instructor.  
**Cross Listing:** ANTH 324/MUSC 324.
MUSC 325/PERF 325 Dance and World Cultures
Credits 3. 3 Lecture Hours.
Examination of international relationships between dance, culture, identity, gender, youth and politics; relationships between dancing, gender and politics in specific cultures and in globalization; variety of dance practices around the globe.
Prerequisite: Junior or senior classification.
Cross Listing: PERF 325/MUSC 325.

MUSC 326 Dance and Identity in the United States
Credits 3. 3 Lecture Hours.
Analysis of dance events as complex sites for social action; examines dances performed by diverse groups of people; considers such issues as identity, community, diversity, gender and representation in the United States.
Prerequisite: Junior or senior classification.

MUSC 327 Popular Musics in the African Diaspora
Credits 3. 3 Lecture Hours.
Examination of a range of popular musics from the twentieth century that have emerged in conjunction with the historical global spread of peoples and cultures from the African continent; technical knowledge about music is not required; focus on social and cultural contexts for popular music.
Prerequisite: Junior or senior classification or approval of instructor.
Cross Listing: AFST 327 and PERF 327.

MUSC 328/THAR 328 Japanese Traditional Performing Arts
Credits 3. 3 Lecture Hours.
Study of various genres of Japanese performing arts from the 7th century to the present; understanding the genres in their historical and cultural contexts and recognizing shared aesthetic values.
Prerequisite: Junior or senior classification or approval of instructor.
Cross Listing: THAR 328/MUSC 328.

MUSC 345 Composition II
Credit 1. 2 Other Hours.
Advanced instruction in composition; the writing of large-form musical compositions employing contemporary styles; techniques in writing for instrumental, vocal, electronic and mixed-media resources. May be repeated for credit.
Prerequisite: MUSC 245 or approval of instructor.

MUSC 352 IND PERF-BAND & ORCH II
Credit 1. 2 Other Hours.

MUSC 353 Individual Performance: Guitar II
Credit 1. 3 Lab Hours.
Advanced instruction in guitar performance; broad range of literature with special emphasis on the historical and theoretical aspects that reveal the performance practices of specific periods; individual and group laboratory instruction. May be taken six times for credit.
Prerequisites: Junior or senior classification and approval of instructor.

MUSC 354 Individual Performance--Voice II
Credit 1. 2 Lab Hours.
Advanced instruction in voice performance; broad range of literature with special emphasis on the historical and theoretical aspects that reveal the performance practices of specific periods; individual and group laboratory instruction. May be repeated for credit.
Prerequisite: Junior or senior classification and approval of instructor.

MUSC 355 Individual Performance—Keyboard II
Credit 1. 2 Lab Hours.
Advanced instruction in keyboard performance; broad range of literature with special emphasis on the historical and theoretical aspects that reveal the performance practices of specific periods; individual and group laboratory instruction. May be repeated for credit.
Prerequisites: Junior or senior classification and approval of instructor.

MUSC 356 Individual Performance: String II
Credit 1. 3 Lab Hours.
Advanced instruction in string performance; broad range of literature with special emphasis on the historical and theoretical aspects that reveal the performance practices of specific periods; individual and group laboratory instruction. May be taken six times for credit.
Prerequisites: Junior or senior classification and approval of instructor.

MUSC 357 Individual Performance: Woodwind II
Credit 1. 3 Lab Hours.
Advanced instruction in woodwind performance; broad range of literature with special emphasis on the historical and theoretical aspects that reveal the performance practices of specific periods; individual and group laboratory instruction. May be taken six times for credit.
Prerequisites: Junior or senior classification and approval of instructor.

MUSC 365 Composition II
Credit 1. 3 Lab Hours.
Advanced instruction in composition; the writing of large-form musical compositions employing contemporary styles; techniques in writing for instrumental, vocal, electronic and mixed-media resources. May be repeated for credit.
Prerequisite: MUSC 245 or approval of instructor.

MUSC 366/THAR 366 Evolution of the American Musical
Credits 3. 3 Lecture Hours.
Examination of the American musical from its heterogeneous origins to a thriving and diverse expression of the human condition; analysis and critical discourse on the development of the American musical through text, audio and visual recordings.
Prerequisite: Junior or senior classification or approval of instructor.
Cross Listing: THAR 366/MUSC 366.

MUSC 400 Senior Seminar and Project
Credits 3. 3 Other Hours.
Culminating senior project on an individually-chosen research topic, presentation of a recital, or lecture-demonstration.
Prerequisites: Senior classification (completion of all 300- and 400-level coursework required for the B.A. in Music); music major status; approval of instructor, advisor, and department head.

MUSC 402 Intermedia Performance
Credits 3. 3 Lecture Hours.
Study of theory, history, literature and techniques of intermedia composition and design for film, theatre, dance, interactive media, and other forms of performance; examination of the collaborative creative process; projects in interdisciplinary performance.
Prerequisites: Junior or senior classification and MUSC 316, PERF 202, or approval of instructor.
Cross Listing: FILM 402 and PERF 402.
MUSC 424 TOPICS ETHNOMUSICOLOGY
Credits 3.3 Lecture Hours.
Topics in Ethnomusicology. Study and application of ethnomusicological theory, method, and literature in a variety of historical and geographical contexts. May be taken four times for credit.
Prerequisite: Junior or senior classification.

MUSC 485 Directed Studies
Credits 0 to 3.0 to 3 Other Hours.
Advanced directed study of identified topic in music. May be repeated for credit up to 6 credit hours.
Prerequisites: Approval of instructor and department head; 24 hours of music; MUSC majors and minors only.

MUSC 489 Special Topics in...
Credits 1 to 4.1 to 4 Lecture Hours.
Selected topics in an identified area of music. May be repeated for credit.
Prerequisite: Approval of instructor.

MUSC 491 Research
Credits 0 to 3.0 to 3 Other Hours.
Research conducted under the direction of a faculty member in music. May be taken up to two times for credit.
Prerequisites: Junior or senior classification and approval of instructor.

NRSC - Neuroscience

Courses

NRSC 277/VIBS 277 Introduction to Neuroscience
Credits 3.3 Lecture Hours.
Neuroscience from the molecular to system levels; fundamental principles and knowledge of neuroscience; current research information on neuroscience.
Prerequisites: Freshman or sophomore classification and approval of instructor.
Cross Listing: VIBS 277/NRSC 277.

NRSC 289 Special Topics in...
Credits 1 to 4.1 to 4 Lecture Hours. 0 to 4 Lab Hours.
Selected topics in an identified area of neuroscience. May be repeated for credit.
Prerequisite: Approval of instructor.

NRSC 311/PSYC 311 Comparative Psychology
Credits 3.3 Lecture Hours.
Survey of problems, principles, and methods of animal psychology; animal learning, motivation discriminative processes, and abnormal, social, and instinctual behaviors.
Prerequisites: PSYC 107; PSYC 203 and 204 or junior or senior classification.
Cross Listing: PSYC 311/NRSC 311.

NRSC 320/PSYC 320 Sensation-Perception
Credits 3.3 Lecture Hours.
Review of sensory physiology, sensory and perceptual phenomena and the major perceptual theories; current research in the field.
Prerequisites: PSYC 107; PSYC 203 and PSYC 204 or junior or senior classification.
Cross Listing: PSYC 320/NRSC 320.

NRSC 331/PSYC 331 Social Neuroscience
Credits 3.3 Lecture Hours.
Integration of biological and psychological explanations of social behavior; recent research and theories in social neuroscience; emotion, motivation, aggression, face processing, empathy, social cognition, and social relationships.
Prerequisites: PSYC 107 or approval of instructor; junior or senior classification.
Cross Listing: PSYC 331/NRSC 331.

NRSC 332/PSYC 332 Neuroscience of Learning and Memory
Credits 3.3 Lecture Hours.
Brain mechanisms of learning and memory from molecular to behavioral levels; synaptic plasticity, model systems, multiple memory systems, diseases of learning and memory.
Prerequisites: PSYC 107 or approval of instructor; junior or senior classification.
Cross Listing: PSYC 332/NRSC 332.

NRSC 333/PSYC 333 Biological Psychology
Credits 3.3 Lecture Hours.
Neurobiology and clinical explanation of molecular mechanisms underlying psychiatric disorders and their drug treatments; depression and bipolar, anxiety disorders, mood disorders, psychosis and schizophrenia.
Prerequisites: PSYC 107, PSYC 335/NRSC 335 or one year of biology; junior or senior classification.
Cross Listing: PSYC 333/NRSC 333.

NRSC 335/PSYC 335 Physiological Psychology
Credits 3.3 Lecture Hours.
Physiological bases of sensation, motor functions, emotion motivation, and complex psychological processes.
Prerequisites: 6 hours of biology; PSYC 203 and PSYC 204 or junior or senior classification.
Cross Listing: PSYC 335/NRSC 335.

NRSC 336/PSYC 336 Drugs and Behavior
Credits 3.3 Lecture Hours.
Physiological, pharmacological and behavioral effects of psychoactive drugs, including short-term and long-term effects of psychoactive drugs, properties of addictive drugs, etiology of addiction, and treatments of drug addiction and withdrawal.
Prerequisites: PSYC 335/NRSC 335 or NRSC 335/PSYC 335; junior or senior classification.
Cross Listing: PSYC 336/NRSC 336.

NRSC 340/PSYC 340 Psychology of Learning
Credits 3.3 Lecture Hours.
Survey of significant concepts, experimental methods and principles of learning.
Prerequisites: PSYC 107 or INST 301; PSYC 203 and PSYC 204 or junior or senior classification.

NRSC 360/PSYC 360 Health Psychology and Behavioral Medicine
Credits 3.3 Lecture Hours.
Survey of health psychology emphasizing behavioral and lifestyle factors in health and illness, prevention and modification of health-compromising behaviors, health care utilization, and psychological management of chronic disorders and terminal illness.
Prerequisite: PSYC 107.
Cross Listing: PSYC 360/NRSC 360.
NRSC 401/VIBS 401 Developmental Neurotoxicology
Credits 2. 2 Lecture Hours.
Efforts of exposure to toxic substances on the developing nervous system; content to include mechanisms of toxicity of substances potentially devastating to the developing nervous system including lead, mercury and other heavy metals, alcohol, nicotine (smoking), pesticides, flame retardants and others.
Prerequisite: Junior or senior classification.
Cross Listing: VIBS 401.

NRSC 407/VIBS 407 Core Ideas in Neuroscience
Credit 1. 1 Lecture Hour.
General overview of selected core ideas across the full spectrum of neuroscience.
Prerequisite: Junior or senior classification; background in science courses recommended.
Cross Listing: VIBS 407/NRSC 407.

NRSC 434/BIOL 434 Regulatory and Behavioral Neuroscience
Credits 3. 3 Lecture Hours.
Bioelectricity, nerve cell functions, brain functions; physiologic basis of behavior.
Prerequisites: BIOL 319 or BIOL 388.
Cross Listing: BIOL 434/NRSC 434.

NRSC 450/VIBS 450 Mammalian Functional Neuroanatomy
Credits 4. 3 Lecture Hours. 2 Lab Hours.
Functional morphology of the domestic animal and human brain using gross specimens, microscopic sections, interactive computer-, DVD-, and video-assisted instructional programs supplemented with clinical case studies.
Prerequisites: Junior or senior classification; BIMS, biology, biochemistry, or psychology majors, or neuroscience minors with overall 3.5 TAMU GPA; or approval of instructor.
Cross Listing: VIBS 450/NRSC 450.

NRSC 485 Directed Studies
Credits 1 to 3. 1 to 3 Other Hours.
Directed readings or research problems in selected areas designed to supplement existing course offerings. Individual report required.
Prerequisite: Approval of instructor.

NRSC 489 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Special Topics in... Selected topics in an identified area of neuroscience. May be repeated for credit.
Prerequisite: Approval of instructor.

NRSC 491 Research
Credits 1 to 4. 1 to 4 Other Hours.
Research conducted under the direction of a faculty member in neuroscience. May be repeated 3 times for credit.
Prerequisites: Junior or senior classification and approval of instructor.

NRSC 601/BIOL 627 Principles of Neuroscience I
Credits 3. 3 Lecture Hours.
Detailed introduction to the basic fundamentals of cellular and molecular neuroscience; topics include membrane potentials, action potential generation, and the mechanisms underlying synaptic transmission, as well as their molecular basis.
Prerequisites: Graduate classification or approval of instructor.
Cross Listing: BIOL 627/NRSC 601.

NRSC 602 Principles of Neuroscience II
Credits 3. 3 Lecture Hours.
Fully integrated overview of nervous system organization and systems-level neurobiology; broad topics include sensory systems and sensory systems function, motor systems and neuromuscular function, central pattern generation and locomotion, homeostatic regulation, motivation, emotions, learning and memory, and circadian rhythms. 
Prerequisites: Graduate classification or approval of instructor.
Cross Listing:: BIOL 628/NRSC 602.

NRSC 603/VIBS 603 Neuroanatomy
Credits 4. 2 Lecture Hours. 6 Lab Hours.
Gross, developmental and microscopic anatomy of nervous system of selected laboratory and domestic animals.
Prerequisite: Approval of instructor.
Cross Listing: VIBS 603/NRSC 603.

NRSC 604/VIBS 604 Biomedical Neuroendocrinology and Endocrine Disorders
Credits 3. 3 Lecture Hours.
Prerequisite: Approval of instructor.
Cross Listing: VIBS 604/NRSC 604.

NRSC 605/VIBS 605 Neuroanatomical Systems
Credits 3. 3 Lecture Hours.
Emphasis on major neural systems that govern identifiable physiological functions, behavior and neurodegenerative disease; whole-brain anatomy is approached from a “systems” perspective, wherein components of defined functional systems are described in terms of their location, inputs and outputs, and physiological/behavioral significance in health and disease.
Prerequisite: Approval of instructor.
Cross Listing: VIBS 605/NRSC 605.

NRSC 606/PSYC 606 Learning
Credits 3. 3 Lecture Hours.
Procedural and theoretical issues in study of basic learning mechanisms in animals and humans, including Pavlovian and instrumental conditioning. Application of this work to other domains and relevant biological mechanisms also discussed.
Prerequisites: PSYC 340/NRSC 340 or approval of instructor.
Cross Listing: PSYC 606/NRSC 606.

NRSC 609/PSYC 609 Physiological Psychology
Credits 3. 3 Lecture Hours.
Current research and methodological procedures on physiological bases of sensation-perception, memory and learning, arousal-sleep attention, emotions and motivation.
Prerequisite: PSYC 335/NRSC 335.
Cross Listing: PSYC 609/NRSC 609.

NRSC 611 Molecular Biology of Differentiation and Development
Credits 3. 3 Lecture Hours.
Major paradigms of eukaryotic gene regulation in terms of the role of gene expression during ontogeny and the effect of dysfunction in these processes on the neoplastic state.
NRSC 615/PSYC 615 Perceptual Processes
Credits 3. 3 Lecture Hours.
Perpetual Processes. Complex sensory and perceptual phenomena with emphasis on the relationship between perception and motivation, cognition, creativity and instinctive/ethological; learning/experiential factors in higher level perceptual processes.
Cross Listing: PSYC 615/NRSC 615.

NRSC 616/VIBS 616 Advanced Developmental Neurotoxicology
Credits 3. 3 Lecture Hours.
(3-0) Study of mechanisms of toxicity of substances potentially devastating to the developing brain and spinal cord including lead, mercury and other heavy metals, alcohol, nicotine (smoking), pesticides, flame retardants and others.
Prerequisite: Graduate classification or approval of instructor.
Cross Listing: VIBS 616.

NRSC 621/VIBS 621 Functional Neuroanatomy
Credits 4. 4 Lecture Hours.
A comprehensive review of the neuroanatomical determinants of function; rigorous neuroanatomical foundation relevant for research investigating changes in neural pathways and/or networks involved in sensory and motor functions, learning and memory, perception, selective attention, as well as recovery of function following brain damage.
Cross Listing: VIBS 621/NRSC 621.

NRSC 633 Neuropsychopharmacology
Credits 4. 4 Lecture Hours.
Interaction of drugs and toxins with neurotransmitter systems with primary emphasis on mechanisms involving receptor function that impacts central nervous system integration.
Prerequisite: Approval of course coordinator.

NRSC 634/BIOL 634 Comparative Neurobiology
Credits 3. 3 Lecture Hours.
Cellular, molecular and systems neurobiology, together with neuroethology. A comparative approach to subject matter is stressed. Topics such as evolution of nervous systems and their diverse structure and complex functions are dealt with.
Cross Listing: BIOL 634/NRSC 634.

NRSC 635/BIOL 601 Biological Clocks
Credits 3. 3 Lecture Hours.
Introduction to the formal properties of biological rhythms; cellular and molecular bases for rhythmicity; temporal adaptations of organisms using clocks.
Prerequisites: Graduate classification or approval of instructor.
Cross Listing: BIOL 601/NRSC 635.

NRSC 636/BIOL 615 Signaling in Behavior and Development
Credits 3. 3 Lecture Hours.
Will focus on signaling pathways used in multicellular animals. In each lecture, major signaling pathways used in behavior, physiology, and development will be introduced at the molecular level, and then be discussed in the context of organismal biology.
Prerequisite: Graduate classification.
Cross Listing: BIOL 615/NRSC 636.

NRSC 640/VIBS 640 Neurobiology
Credits 1 to 5. 1 to 5 Lecture Hours.
Biological of the mammalian central nervous system with emphasis on cellular and molecular interactions; contemporary research topics in areas such as neuron-glia interactions, neuroimmunology, neuroendocrinology, developmental neurobiology and neurogenetics; extensive readings from primary literature.
Prerequisites: Undergraduate or graduate cell biology, genetics and biochemistry or approval of instructor.
Cross Listing: VIBS 640/NRSC 640.

NRSC 641 Principles of Neuropsychology
Credits 3. 3 Lecture Hours.
Review of major areas of cognitive functioning including concentration, memory, language, visuospatial/construction skills and executive functions; review of neurobehavioral syndromes including dementia, epilepsy, head injury, stroke, drug toxicity, etc.; assessment of deficits associated with disorders.
Prerequisites: PSYC 624 or PSYC 627 or equivalent as approved by instructor.

NRSC 644/BIOL 644 Neural Development
Credits 3. 3 Lecture Hours.
Classical and current research literature to explore the major events in the development of a nervous system, including topics ranging from neurogenesis to synapse information.
Prerequisite: Graduate classification.
Cross Listing: BIOL 644/NRSC 644.

NRSC 649/PSYC 649 Seminar in Behavioral Neuroscience
Credits 3. 3 Lecture Hours.
Behavioral neuroscience; including behavioral pharmacology, neuropsychopharmacology, methods and techniques, drug reinforcement, behavioral toxicology, pain-perception and ingestive behavior. May be repeated up to three times for credit.
Prerequisite: PSYC 606/NRSC 606 or equivalent; PSYC 609/NRSC 609; graduate classification.
Cross Listing: PSYC 649/NRSC 649.

NRSC 650/PSYC 650 Clinical Psychopharmacology
Credits 3. 3 Lecture Hours.
Survey of topics in clinical psychopharmacology, including pharmacodynamics, major neurotransmitter systems, and therapeutic applications and limitations.
Prerequisite: Graduate classification or approval of instructor.
Cross Listing: PSYC 650/NRSC 650.

NRSC 671/PSYC 671 Experimental Design for Behavioral Scientists
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Intensive practical study of designs of special interest to behavioral scientists; repeated measures designs.
Prerequisites: STAT 652 or equivalent.
Cross Listing: PSYC 671/NRSC 671.

NRSC 681 Seminar
Credits 1 to 3. 1 to 3 Other Hours.
Presentation of current research in neuroscience and related areas. May be taken 4 times for credit.
Prerequisite: Graduate classification.

NRSC 685 Directed Studies
Credits 1 to 4. 1 to 4 Other Hours.
Directed individual study of selected problems in the field of neuroscience.
Prerequisites: Graduate classification and approval of department head.
NRSC 689 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Selected topics in an identified area of neuroscience. May be repeated for credit.
Prerequisite: Graduate classification.

NRSC 691 Research
Credits 1 to 23. 1 to 23 Other Hours.
Research in neuroscience for thesis or dissertation credit.
Prerequisite: Graduate classification.

NRSC 698/BIOL 698 Behavior, Genes, and Evolution
Credits 3. 3 Lecture Hours.
Introduces an integrative approach to the study of animal behavior, complementing evolutionary and ecological perspectives with molecular and genetic approaches and methodologies.
Prerequisite: Graduate classification.
Cross Listing: BIOL 698/NRSC 698.

NUEN - Nuclear Engineering

Courses

NUEN 101 Principles of Nuclear Engineering
Credit 1. 1 Lecture Hour.
Introduction to nuclear engineering including global and national energy requirements, radioactivity, radiation protection, and fission and fusion reactor concepts.

NUEN 201 Introduction to Nuclear Engineering I
Credits 3. 3 Lecture Hours.
Atomic and nuclear physics discoveries that have led to the development of nuclear engineering, atomic models, relativity, x-rays, types of nuclear reactors; problem solving techniques.
Prerequisite: MATH 251 or registration therein; PHYS 208.

NUEN 265 Materials Science for Nuclear Energy Applications
Credits 3. 3 Lecture Hours.
Materials science fundamentals with an emphasis on nuclear applications; topics will include bonding, crystal structures crystalline defects, mechanical properties and radiation effects in metal, ceramic and polymer materials.
Prerequisites: CHEM 102, or CHEM 104 and CHEM 114, or CHEM 107; PHYS 218.

NUEN 289 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Special Topics in... Selected topics in an identified area of nuclear engineering. May be repeated for credit.
Prerequisite: Approval of department head.

NUEN 301 Nuclear Reactor Theory
Credits 3. 3 Lecture Hours.
An introduction to neutron diffusion theory, neutron moderation, conditions for criticality of nuclear reactors.
Prerequisites: NUEN 302.

NUEN 302 Introduction to Nuclear Engineering II
Credits 3. 3 Lecture Hours.
Basic radioactivity, nuclear and neutron physics as applied to nuclear engineering.
Prerequisites: NUEN 201; MATH 308 or registration therein.

NUEN 303 Nuclear Detection and Isotope Technology Laboratory
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Interaction of radiation with matter; behavior of various nuclear radiation detectors studied both theoretically and experimentally in laboratory; properties of radionuclides useful to industry considered and evaluated from engineering point of view; writing intensive course.
Prerequisites: NUEN 309/SENG 309; ECEN 215.

NUEN 304 Nuclear Reactor Analysis
Credits 3. 3 Lecture Hours.
The group diffusion method, multi-region reactors, heterogeneous reactors, reactor kinetics, changes in reactivity.
Prerequisite: NUEN 301; MATH 309.

NUEN 309/SENG 309 Radiological Safety
Credits 3. 3 Lecture Hours.
Interactions of nuclear radiations with matter and biological systems; theory and practice of radiation dosimetry as applied to radiation protection; design and application of radiation dosimetry systems for personnel monitoring, area radiation monitoring and accident situation; includes external and internal dosimetry as well as long-term risk analysis.
Prerequisite: NUEN 302.
Cross Listing: SENG 309/NUEN 309.

NUEN 329 Analytical and Numerical Methods
Credits 3. 3 Lecture Hours.
Introduction to use of numerical analysis and advanced analytical techniques for obtaining nuclear reactor flux distributions, temperatures and transients; use of digital computer in obtaining nuclear reactor design information.
Prerequisites: MATH 309 and NUEN 301.

NUEN 405 Nuclear Engineering Experiments
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Experimental measurements of basic nuclear reactor parameters; reactor operation and reactor safety.
Prerequisites: NUEN 303; NUEN 304 or senior classification.

NUEN 406 Nuclear Engineering Systems and Design
Credits 3. 3 Lecture Hours.
Nuclear plant systems; conventional and advanced generation power reactors, nuclear simulators, transient analysis using available software for reactor simulators; nuclear engineering design methodology; problem formulation, criteria, trade-off decisions and design optimization; case studies.
Prerequisite: NUEN 304; MEEN 461 or approval of instructor.

NUEN 410 The Design of Nuclear Reactors
Credits 4. 4 Lecture Hours.
Application of reactor theory and other engineering disciplines in fundamental and practical design of nuclear reactor systems for power applications; use of computer in design operations.
Prerequisites: NUEN 304 and NUEN 406; MEEN 461.

NUEN 417/MEEN 417 Basics of Plasma Engineering and Applications
Credits 3. 3 Lecture Hours.
Basic plasma properties and confinement techniques; single particle orbits in electric and magnetic fields, moments of Boltzmann equation and introduction to fluid theory; wave phenomena in plasmas and introduction to plasma kinetic theory; analysis of laboratory plasmas and plasma applications including fusion, electric propulsion, materials processing and plasma enhanced chemistry.
Prerequisite: PHYS 208 or equivalent; senior classification in nuclear, mechanical, or aerospace engineering, physics, or approval of instructor.
Cross Listing: MEEN 417/NUEN 417.
NUEN 418 Fuel Assembly and 3-D Reactor Core Design and Modeling Credits 3. 3 Lecture Hours.
Application of state-of-the-art engineering-grade codes in the neutronic design, analysis and modeling of nuclear fuel assembly and core.
Prerequisites: NUEN 304 and junior or senior classification.

NUEN 430 Computer Applications in Nuclear Engineering Credits 3. 3 Lecture Hours.
Applications of digital computers to solve nuclear engineering problems; nuclear data and cross-section libraries; deterministic methods for linear and non-linear nuclear systems, and Monte Carlo methods for linear nuclear systems.
Prerequisites: NUEN 304, NUEN 329.

NUEN 431 Technical Communications Issues in the Nuclear Industries Credit 1. 1 Lecture Hour.
Introduction to a variety of topics that present communication challenges; opportunities to learn from a variety of visiting experts concerning the nuances and challenges of, as well as successful methods for, communicating with concerned audiences about technically challenging topics.
Prerequisite: Junior or senior classification or approval of instructor.

NUEN 432 Nuclear Power Plant Fundamentals Credits 3. 3 Lecture Hours.
Understanding the operation of a nuclear electric general station; includes reactor water chemistry, material science, electrical science; mechanical science, civil engineering for nuclear power plant engineers, and digital process control systems.
Prerequisite: Junior or senior classification in the college of engineering; non-NUEN majors.

NUEN 433 Nuclear Power Plant Systems – Pressurized Water Reactor Credits 3. 3 Lecture Hours.
Principal elements of pressurized water reactor nuclear power systems; overview of reactor physics, thermodynamics, and heat transfer; focus on systems with both function and interfaces stressed throughout; includes basic reactor physics, reactor heat generation, reactor plant systems; support systems, and reactor safety.
Prerequisites: NUEN 431 and junior or senior classification in the college of engineering; non-NUEN majors.

NUEN 434 Nuclear Power Plant Systems – Boiling Water Reactor Credits 3. 3 Lecture Hours.
Principal elements of boiling water reactor nuclear power systems; overview of reactor physics, thermodynamics, and heat transfer; focus on systems with both function and interfaces stressed throughout; includes basic reactor physics, reactor heat generation, reactor plant systems; support systems, and reactor safety.
Prerequisites: NUEN 431 and junior or senior classification in the college of engineering; non-NUEN majors.

NUEN 435 Nuclear Power Plant Operations Credits 4. 3 Lecture Hours. 3 Lab Hours.
Overview of mass, momentum and energy conservation as it relates to nuclear power plants; includes coupled neutron/thermal models to study plant operations semi-quantitatively achieving an integrated plant understanding.
Prerequisites: NUEN 431, and NUEN 432 or NUEN 433; junior or senior classification in the college of engineering, non-NUEN majors.

NUEN 436 Human Performance for Nuclear Power Plant Engineers Credits 2. 2 Lecture Hours.
Six modules: human performance fundamentals, the organization and the processes, the individual worker, the engineer, corrective action programs and root cause analysis, and case studies including TMI-2, Chernobyl, Davis-Besse, and Fukushima Daiichi.
Prerequisites: NUEN 432; junior or senior classification in the college of engineering.

NUEN 451 Nuclear Security System Design Credits 3. 3 Lecture Hours.
The science and engineering associated with the design, evaluation and implementation of systems to secure nuclear and radiological materials; adversary characterization, categorization of nuclear and radiological targets, calculation of consequences associated with failure to protect targets, detection and delay technologies, and mathematical methods for evaluation and managing risk.
Prerequisites: NUEN 303 and NUEN 309/SENG 309 or equivalent, or approval of instructor.

NUEN 460 Nuclear Plant Systems and Transients Credits 3. 3 Lecture Hours.
Use of engineering principles to elucidate the nuclear, mechanical, electrical and functional interactions among nuclear plant components and systems; reactor protection systems, alarm and trip setpoints, normal and accident transients. Components studied in detail include: core, control rod drive mechanism, neutron source, neutron detectors, primary coolant system, and emergency core cooling system.
Prerequisites: NUEN 301, NUEN 302, NUEN 304, NUEN 406, NUEN 430 or equivalents; MEEN 315, MEEN 344, MEEN 461 or equivalents; junior or senior classification.

NUEN 465 Nuclear Materials Engineering Credits 3. 3 Lecture Hours.
Explore applications of materials science principles in nuclear energy systems; includes crystal structures and defects, metallurgy, and materials thermochemistry; emphasis on nuclear fuel performance, structural material changes, and waste materials; laboratory demonstrations on materials behavior.
Prerequisites: NUEN 265, MEEN 222 or equivalent and NUEN 302.

NUEN 475 Environmental Nuclear Engineering Credits 3. 3 Lecture Hours.
Environmental aspects of nuclear power; natural radiation environment and the distribution of radioactivity added to the environment by human activities; evaluation of effects of radiation and radioactivity on the environment and on humans.
Prerequisite: NUEN 309/SENG 309.

NUEN 479 Radiation Protection Engineering Credits 3. 2 Lecture Hours. 3 Lab Hours.
Analysis of radiation hazard situations and design of nuclear facilities from a safety standpoint.
Prerequisite: NUEN 475.

NUEN 481 Seminar Credit 1. 1 Lecture Hour.
Designed to broaden the student's capability, performance and perspective in nuclear engineering through faculty, student and guest presentations.
Prerequisite: NUEN 410 or registration therein or NUEN 479 or registration therein.
NUEN 485 Directed Studies  
Credits 1 to 6. 1 to 6 Other Hours.  
Problems of limited scope approved on an individual basis intended to promote independent study; program enrichment for capable students; results presented in writing to staff.  
**Prerequisites:** Junior or senior classification and approval of department head.

**NUEN 489 Special Topics in...**  
Credits 1 to 4. 1 to 4 Lecture Hours. 0 to 4 Lab Hours.  
Selected topics in an identified area of nuclear engineering. May be repeated for credit.  
**Prerequisite:** Approval of instructor.

**NUEN 491 Research**  
Credits 1 to 4. 1 to 4 Other Hours.  
Research conducted under the direction of a faculty member in Nuclear Engineering. May be repeated 2 times for credit. Registration in multiple sections of this course is possible within a given semester provided that the per semester credit hour limit is not exceeded.  
**Prerequisites:** Junior or senior classification and approval of instructor.

**NUEN 601 Nuclear Reactor Theory**  
Credits 3. 3 Lecture Hours.  
Neutron-nucleus interactions; neutron energy spectra; transport and diffusion theory; multigroup approximation; criticality calculations; cross-section processing; buildup and depletion calculations; modern reactor analysis methods and codes.  
**Prerequisite:** Approval of instructor.

**NUEN 604 Radiation Interactions and Shielding**  
Credits 3. 3 Lecture Hours.  
Basic principles of radiation interactions and transport, especially as related to the design of radiation shields. Radiation sources, nuclear reactions, radiation transport, photon interactions, dosimetry, buildup factors and fast neutron shielding.  
**Prerequisites:** NUEN 302 or equivalent; MATH 308; BS in engineering or physical sciences.

**NUEN 605 Radiation Detection and Nuclear Materials Measurement**  
Credits 3. 2 Lecture Hours. 3 Lab Hours.  
Laboratory-based course studying the fundamentals of nuclear materials measurements; advanced radiation detection instrumentation with a specific focus on measuring nuclear materials (uranium, plutonium, and other actinides); nuclear material measurements include detection, identification, and quantification of the materials in a fuel cycle facility and in the field.  
**Prerequisite:** Graduate classification.

**NUEN 606 Reactor Analysis and Experimentation**  
Credits 4. 3 Lecture Hours. 3 Lab Hours.  
Perturbation theory; delayed neutrons and reactor kinetics; lattice physics calculations; full core calculations; analysis and measurement of reactivity coefficients; analysis and measurement of flux distribution; analysis and measurement of rod worths; critical and subcritical experiments.  
**Prerequisite:** Approval of instructor.

**NUEN 609 Nuclear Reactor Safety**  
Credits 3. 3 Lecture Hours.  
Analysis and evaluation applied to reactor design for accident prevention and mitigation; protective systems and their reliability, containment design, emergency cooling requirements, reactivity excursions and the atmospheric dispersion of radioactive material; safety problems associated with light-water power reactors and proposed fast reactor systems.  
**Prerequisites:** NUEN 601 and NUEN 623 or approval of instructor.

**NUEN 610 Design of Nuclear Reactors**  
Credits 4. 4 Lecture Hours.  
Application of fundamentals of nuclear physics and reactor theory with engineering fundamentals to design of nuclear reactors.  
**Prerequisites:** NUEN 602 or registration therein; NUEN 410 or approval of instructor.

**NUEN 611 Radiation Detection and Measurement**  
Credits 3. 2 Lecture Hours. 3 Lab Hours.  
Interactions of radiation with matter behavior of various nuclear radiation detectors studied both theoretically and experimentally in the laboratory; properties of radionuclides useful to industry and medicine considered and evaluated from an engineering point of view.  
**Prerequisite:** Graduate classification, enrollment in NUEN 613 or instructor approval.

**NUEN 612 Radiological Safety and Hazards Evaluation**  
Credits 3. 3 Lecture Hours.  
State and Federal regulations concerning radioactive materials; radiation safety as applied to accelerators, nuclear reactors, medical therapy and diagnostic devices, and radioactive byproducts; rigorous methods of analysis applied to computation of biological radiation dose and dose rates from various sources and geometries; radiation effects on physical systems.  
**Prerequisites:** NUEN 613; MATH 308.

**NUEN 613 Principles of Radiological Safety**  
Credits 3. 3 Lecture Hours.  
Rigorous mathematical and physical approach to various aspects of radiological safety; derivation of equations involving radiation absorption, radiation dosimetry and calculations of radiation dose due to internal emitters; mathematical models relating to radionuclide concentrations in tumor, normal tissue, air or water to whole body dose.  
**Prerequisite:** NUEN 409.

**NUEN 614 Probabilistic Risk Assessment Techniques in Nuclear Systems**  
Credits 3. 3 Lecture Hours.  
Current and proposed techniques for determining the reliability of nuclear plant systems and the risk associated with the operation of these advanced technology systems.  
**Prerequisites:** NUEN 612 and NUEN 613.

**NUEN 615 Theory and Applications of Microdosimetry**  
Credits 3. 3 Lecture Hours.  
Theory, measurement, and calculation of microdosimetric spectra; practical applications of microdosimetry in the determination of absorbed dose distribution within tissue, the statistical fluctuations of absorbed dose at the cellular and subcellular level, and the impact of microdosimetry on radiation protection guidelines.  
**Prerequisite:** NUEN 613.

**NUEN 618 Multiphysics Computations in Nuclear Science and Engineering**  
Credits 3. 3 Lecture Hours.  
Tightly coupled multiphysics simulation techniques and application to typical problems arising in nuclear science and engineering (reactor dynamics and safety transients, conjugate heat transfer, radiative transfer, fluid structure interaction).  
**Prerequisites:** MATH 609 and NUEN 606.
NUEN 623 Nuclear Engineering Heat Transfer and Fluid Flow
Credits 3.3 Lecture Hours.
Thermodynamics and unified treatment of mass, momentum and energy transport with applications to nuclear engineering systems; velocity and temperature distributions in laminar and turbulent flow; flow and thermal stability.
**Prerequisites:** MEEN 334, MATH 346 or MATH 461 and MATH 601 or registration therein or approval of instructor.

NUEN 624 Nuclear Thermal Hydraulics and Stress Analysis
Credits 3.3 Lecture Hours.
Unified treatment of advanced heat transport in solids and fluids including boiling phenomena; thermal stress phenomena with applications to nuclear sources; isothermal elasticity; thermoelasticity; viscoelasticity; plasticity.
**Prerequisites:** NUEN 623 or equivalent; MATH 601 or registration therein.

NUEN 625 Neutron Transport Theory
Credits 4.4 Lecture Hours.
Analytical treatment of neutron transport theory; solution methods of integrodifferential and integral Boltzmann equations, adjoints; energy dependent methods using singular eigenfunctions, variational methods, orthogonal polynomials and thermalization; current analytical techniques in transport theory.
**Prerequisites:** NUEN 606; MATH 602.

NUEN 627 Radiation-Hydrodynamics
Credits 3.3 Lecture Hours.
Coupling of the Euler equations of compressible fluid dynamics with the equations of thermal radiation transport; the equilibrium-diffusion limit; radiative shock waves; and numerical methods for one-dimensional calculations.
**Prerequisite:** MATH 602.

NUEN 629 Numerical Methods in Reactor Analysis
Credits 4.4 Lecture Hours.
Solution of variable dimension multigroup discrete representation problems including Sn, Pn, An, variational and Monte Carlo techniques; techniques in reactor kinetics, fuel cycle and optimization.
**Prerequisites:** NUEN 430; NUEN 606 or equivalent.

NUEN 630 Monte Carlo Methods for Particle Transport
Credits 3.2 Lecture Hours. 2 Lab Hours.
Principles of Monte Carlo method; random number generation; random variable sampling; particle tracking; statistical error estimation; ACE format cross-sections; introduction to MCNP code; MCNP applied to radiation shielding, criticality safety, reactor physics and detector modeling; MCNP output analysis, statistical tests, and tallying procedures; variance reduction techniques; Monte Carlo algorithm development.
**Prerequisites:** Approval of Instructor, MCNP/MCNPX code single user license from RSICC, ORNL, USA.

NUEN 633 Radiation Measurements and Calibrations
Credits 3.3 Lecture Hours.
Measurement of radiation dose and protection quantities in realistic radiation fields will be studied; specific characteristics of radiation sources will be discussed in the context of accurate measurement and radiation protection; examples from a wide variety of radiation environments will illustrate radiation measurement requirements for medical, industrial, and research sources.
**Prerequisite:** NUEN 613.

NUEN 640 Severe Accident Analysis of Nuclear Facilities
Credits 3.3 Lecture Hours.
Severe accident phenomena from initial fuel heat up to the source term; complexity of accident progression and safety issues; severe accident codes with respect to the modeling philosophy, techniques, assumptions and limitations; development of skills in analysis methodologies/techniques.
**Prerequisite:** Graduate classification in the college of engineering or approval of instructor.

NUEN 644/MEEN 644 Numerical Heat Transfer and Fluid Flow
Credits 3.3 Lecture Hours.
Convection-diffusion, up-wind, exponential, exact solution, power law schemes, false diffusion; staggered grid concept; development of simple and simpler algorithms; periodically developed flows.
**Prerequisites:** NUEN 430 or equivalent; MEEN 357 and MEEN 461.
**Cross Listing:** MEEN 644/NUEN 644.

NUEN 646 Fundamentals of Space Life Sciences
Credits 3.3 Lecture Hours.
Integrates nutrition, physiology, and radiation biology to define major biological problems in long duration space flight; provide an overview of the problems of bone loss, muscle wasting, and radiation-enhanced carcinogenesis along with potential countermeasures; focus on nutritional interventions and exercise protocols.
**Cross Listing:** NUTR 646 and KINE 646.

NUEN 650 Nuclear Nonproliferation and Arms Control
Credits 3.3 Lecture Hours.
Studies the political and technological issues associated with nuclear proliferation and arms control; history of arms control treaties and verification, proliferation resistance in the nuclear fuel cycle, international and domestic safeguards, material accountancy, containment and surveillance, and physical protection.
**Prerequisite:** NUEN 601.

NUEN 651 Nuclear Fuel Cycles and Nuclear Material Safeguards
Credits 3.3 Lecture Hours.
Study of civilian and military nuclear fuel cycles and application of nuclear material safeguards to secure these cycles; topics include the physics of the fundamental fuel cycle components; the application of nuclear material measurements systems; and the technical and legal basis for material protection, control and accounting systems.
**Prerequisite:** NUEN 601 or equivalent.

NUEN 655 Critical Analysis of Nuclear Security Data
Credits 4.4 Lecture Hours.
A project-based course studying the analysis of nuclear security events, threats, and data; assigned project requires an analysis of data for a hypothetical case of interest to U.S. national security; focuses on detailed technical analysis using diverse datasets and country/organization profiles.
**Prerequisites:** NUEN 650, NUEN 601 or equivalent.

NUEN 661 Nuclear Fuel Performance
Credits 3.3 Lecture Hours.
Reviews basic phenomena that govern nuclear fuel performance; includes structural changes and rate controlling phenomena for oxide and metal fuels as well as cladding and other structural materials.
**Prerequisites:** Graduate classification or consent of the instructor.
NUEN 662 Nuclear Materials Under Extreme Conditions
Credits 3.3 Lecture Hours.
Fundamentals of materials degradation under reactor environments; linkage from radiation induced microstructure changes to materials thermal properties, mechanical properties, corrosion resistance, swelling, creep, and overall integrities; materials issues of nuclear fuel, cladding, out-core structural components and waste storage managements.
Prerequisite: Graduate classification or approval of instructor.

NUEN 663 Fundamentals of Ion Solid Interactions
Credits 3.3 Lecture Hours.
Fundamentals of neutron and ion interactions with solid state materials, and subsequent damage cascade formation, defect clustering, and structural changes; electronic stopping and nuclear stopping mechanisms based on classic and quantum mechanics treatments; development of basic modeling capabilities to carry out simulations for relevant research topics.
Prerequisite: Graduate classification or approval of instructor.

NUEN 669/INTA 669 Nuclear Terrorism Threat Assessment and Analysis
Credits 3.3 Lecture Hours.
Study the manner in which we conduct threat assessments and the analysis of non-state actors in the fields of nuclear and radiological security; examine the history of threats and security issues in an effort to better understand terrorist groupings, their motivations and attack methodologies.
Prerequisite: Graduate classification.
Cross Listing: INTA 669/NUEN 669.

NUEN 670 Introduction to Radiotherapy Physics
Credits 4.3 Lecture Hours. 4 Lab Hours.
Examination of radiation physics necessary for understanding modern radiation therapy; perform theoretical foundations of physical dose calculation for megavoltage energy photons and electrons, biological predictions of therapy outcomes, and brachytherapy; methods of modeling and implementing radiation therapy treatment includes planning, evaluation, and delivery; emphasis on intensity modulated radiation therapy and TomoTherapy.
Prerequisites: Graduate classification; NUEN 613 or approval from academic advisor.

NUEN 671/BMEN 672 Introduction to Diagnostic Radiology Physics
Credits 3.2 Lecture Hours. 3 Lab Hours.
Concepts of radiation physics used in diagnostic radiology; introduction to the theory behind the different imaging modalities as it relates to mammography, planar X-ray imaging, computed tomography (CT), single photon emission tomography (SPECT), and positron emission tomography (PET).
Prerequisite: NUEN 611, NUEN 613 or approval of academic advisor.
Cross Listing: BMEN 672/NUEN 672.

NUEN 673 Radiation Biology
Credits 3.3 Lecture Hours.
Response of biological systems to ionizing radiation at the molecular, cellular, tissue and organismal levels; effects of different doses and dose rates with emphasis on the underlying mechanisms relevant to accidental, environmental and medical exposures.
Prerequisite: NUEN 409 or graduate classification.

NUEN 674 Radiation Carcinogenesis
Credits 3.3 Lecture Hours.
Examines the experimental models and mathematical simulations for the investigation of radiation-induced cancer, the current scientific literature concerning the intersection of risk analysis and the interpretation of disparate data from varied biological systems.
Prerequisite: Graduate classification.

NUEN 675 Internal Dose Techniques
Credits 3.3 Lecture Hours.
Current and proposed techniques for assessing the absorbed dose due to internally deposited radionuclides; techniques recommended for international and national bodies, as well as those used in nuclear medicine.
Prerequisites: NUEN 612 and NUEN 613.

NUEN 676 Radiation Physics Instrumentation
Credits 3.1 Lecture Hour. 6 Lab Hours.
Advanced course in instrumentation intended for radiation professionals and researchers; provides an in-depth knowledge of the components of radiation monitoring and measurement systems; includes quality assurance and quality control concepts for the safe and efficient use of radiation sources.
Prerequisite: NUEN 402.

NUEN 677/MEEN 677 Aerosol Science
Credits 3.3 Lecture Hours.
Multidisciplinary survey of methods for describing aerosol particles and systems: gas kinetics and transport theory, formation and growth thermodynamics, electrical properties, coagulation, light scattering; selected topics from current literature.
Prerequisite: Graduate classification in engineering or approval of instructor.
Cross Listing: MEEN 677/NUEN 677.

NUEN 678 Waste Management in the Nuclear Industry
Credits 3.3 Lecture Hours.
Management of radioactive, hazardous and mixed waste generated by all segments of the nuclear fuel cycle and users of radioisotopes; includes treatment, storage and disposal technologies and the political and socioeconomic issues; evaluation of current practices and regulations using a holistic approach.
Prerequisites: Graduate classification and approval of instructor.

NUEN 681 Seminar
Credit 1.1 Lecture Hour.
Topics in nuclear engineering and health/medical physics not covered by formal coursework; whenever possible, guest lectures will discuss topics which they have personally investigated.
Prerequisite: Graduate classification.

NUEN 684 Professional Internship
Credits 1 to 6. 1 to 6 Other Hours.
Training under the supervision of practitioners in settings appropriate to the student’s professional objectives.
Prerequisites: Approval of chair of student’s advisory committee and department head.

NUEN 685 Directed Studies
Credits 1 to 12. 1 to 12 Other Hours.
Offered to enable students to undertake and complete limited investigations not within their thesis research and not covered by any other courses in curriculum.
Prerequisite: Graduate classification.
NUEN 689 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours. 0 to 4 Lab Hours.
Selected topics in an identified area of nuclear engineering. May be repeated for credit.
Prerequisite: Approval of instructor.

NUEN 691 Research
Credits 1 to 23. 1 to 23 Other Hours.
Research toward thesis or dissertation.

NURS - Nursing

Courses

NURS 301 Nursing Foundation
Credits 2. 1 Lecture Hour. 1 Lab Hour.
Introduction to nursing skills including such activities as safety, assessment of vital signs, comfort measures, assistance with daily living activities, environmental concerns, positioning and transporting. We will become familiar with the nursing process, communication and documentation tools. An introduction to the simulation center is highlighted in this class. Orientation to clinical sites and expectations for clinical rotation, as well as mandatory clinical site requirements will be completed.
Prerequisites: Admission to the BSN program or approval from the Associate Dean for Academic Affairs.

NURS 305 Nursing Dimensions and Informatics
Credits 3. 3 Lecture Hours.
This course explores the concepts of informatics and professional dynamics in nursing. Basic computer competencies essential to nursing are introduced, along with skills required to locate and evaluate information (info literacy), and process and communicate findings (info management) related to evidence-based nursing practice. The roles and behaviors of the professional nurse are also introduced. The influence of ethics and cultural/society issues on the nursing profession are explored as well as opportunities for personal and professional development.
Prerequisites: Admission to the BSN program or approval from the Associate Dean for Academic Affairs.

NURS 312 Introduction to Pathophysiology
Credits 3. 3 Lecture Hours.
An introduction to pathophysiological alterations in major regulatory mechanisms of the body. Provides a foundation for understanding general nursing practice, various diagnostic procedures and selected therapeutic regimens.

NURS 313 Nursing Fundamentals
Credits 5. 3 Lecture Hours. 2 Lab Hours.
(3-2) An introduction to the scope of human needs, utilization of the nursing process as a systematic approach to meeting those needs and the role of the professional nurse in assisting individuals toward optimal health. Clinical settings are utilized in the application of fundamental concepts, principles of nursing and communication skills that are employed in providing basic client care.
Prerequisite: Admission to the BSN Program.

NURS 314 Health Assessment
Credits 3. 1 Lecture Hour. 2 Lab Hours.
Concepts and principles underlying assessment of the health status of individuals are presented. Emphasis is placed on interviewing skills, health histories, and the physical and psychosocial findings in the well person. Development of communication in the nurse-client relationship and assessment skills are included. Students implement the nursing process by obtaining health histories, performing physical and psychosocial assessments, establishing a database, and formulating initial nursing plans.

NURS 315 Nursing and the Aged
Credits 3. 2 Lecture Hours. 1 Lab Hour.
This course presents an overview of age-related changes including physical, emotional, social and environmental transitions in the aging family. Emphasis is placed on developmental patterns and health promotion in the population.

NURS 316 Pharmacology Principles
Credits 3. 3 Lecture Hours.
Focuses on the basic drug classifications, concepts and principles of pharmacology, with special consideration for the nursing role in developing a comprehensive approach to the clinical application of drug therapy through the use of the nursing process. Nursing implications relative to the utilization of drug therapy are examined.

NURS 320 Adult Nursing I
Credits 6. 3 Lecture Hours. 3 Lab Hours.
This course introduces the student to the use of the nursing process in the care of adults with chronic or non-complex illness. The course uses a systems approach to discuss the effects of illness on individual and family, and to examine the disruption of growth and development patterns across the lifespan from young adult to senior years, emphasizing the nursing process to assist adults in reaching their optimal level of wellness. The course includes clinical laboratory to allow the student the opportunity to apply theoretical concepts to clinical practice in diverse adult populations.

NURS 323 Nursing Care of Women, Families and Newborns
Credits 4. 2 Lecture Hours. 2 Lab Hours.
A study of childbearing families and women’s health in normal and high-risk situations. The role of the nurse in meeting health needs of women, families and their newborns is analyzed. Supervised clinical experiences and/or simulation experiences in the application of the nursing process in meeting these health needs are offered. This course promotes acquisition of skills in caring for women, families and newborns during uncomplicated and/or complicated health experiences in a variety of settings.
Prerequisites: NURS 312, NURS 313, NURS 314, NURS 316.

NURS 385 Directed Studies
Credits 1 to 3. 1 to 3 Other Hours.
Individually supervised study in subject matter to be arranged with faculty.
Prerequisite: Admission to the TAMHSC-CON or approval from the associate dean of academic affairs.

NURS 386 Directed Clinical Studies
Credits 1 to 3. 1 to 3 Other Hours.
Individually supervised study focusing on clinical skills in focused areas to be arranged with faculty.
Prerequisite: Admission to the TAMHSC-CON or approval from the associate dean of academic affairs.

NURS 405 Selected Topics in Nursing
Credit 1. 1 Lecture Hour.
A broad introduction to selected topics of current interest in the role of professional nursing.
The purpose of this course is to introduce health professions students to professional and ethical/legal issues in everyday practice in health care, develop self-awareness skills about their own values, and those of others, and provide them with tools to engage in self-reflective practice leading to enhancement of patient-centered care and collaborative team work. 

Prerequisites: Admission to the TAMHSC.
NURS 460 Nursing Dimensions and Informatics for the RN
Credits 3.3 Lecture Hours.
This course is designed to build on the informatics knowledge and skills of the practicing nurse. Emphasis is placed on the application of the ANA Standards for Nursing Informatics and Professional Practice and incorporation of information technology to support patient care and clinical decision-making. The course will assist the students to develop the professional role by incorporation of the philosophy of nursing, nursing theory, and clinical reasoning. The nurse’s role in interprofessional practice will be explored. The influence of ethics and cultural/society issues on the nursing profession are explored as well as opportunities for personal and professional development.

NURS 461 Application of Evidence Based Practice for the RN
Credits 3.3 Lecture Hours.
In this course, the concepts and principles underlying assessment of the health status of culturally diverse individuals are presented. An emphasis is placed on reviewing and renewing cognitive, affective, and psychomotor skills to obtain health histories and discover physical and psychosocial findings in the well person. The role of genetics in family histories is examined. Successful completion of the course requires students to successfully complete a head-to-toe health assessment examination with accurate documentation of the findings.

NURS 462 Pathophysiology and Pharmacology for the RN
Credits 4.4 Lecture Hours.
Students will demonstrate the ability to incorporate the principles of pathophysiology and pharmacology in planning healthcare for individuals across the lifespan.

NURS 463 Health Assessment for the RN
Credits 3.3 Lecture Hours.
In this course, the concepts and principles underlying assessment of the health status of culturally diverse individuals are presented. An emphasis is placed on reviewing and renewing cognitive, affective, and psychomotor skills to obtain health histories and discover physical and psychosocial findings in the well person. The role of genetics in family histories is examined. Successful completion of the course requires students to successfully complete a head-to-toe health assessment examination with accurate documentation of the findings.

NURS 464 Health Promotion Across the Lifespan for the RN
Credits 3.2 Lecture Hours. 1 Lab Hour.
This course emphasizes the role of the nurse in health promotion across multiple settings with diverse populations. The student will apply principles of teaching/learning, case management, and genetics/genomics to improve the health of general and vulnerable populations.

NURS 465 Care of the Older Adult for the RN
Credits 2.2 Lecture Hours.
The student will develop competencies and knowledge necessary for providing care and promote health aging in the older adult.

NURS 466 Community Health for the RN
Credits 5.4 Lecture Hours. 1 Lab Hour.
In this course, students are introduced to community-based health care of culturally diverse populations. The role of the professional nurse as part of an interprofessional team in health promotion, disease prevention, and management of chronic health problems in community settings is explored. Students apply critical reasoning and information technology skills to develop and implement evidence-based projects that positively impact the quality of life of populations. Practicum experiences are individualized.

NURS 466 Community Health for the RN
Credits 5.3 Lecture Hours. 2 Lab Hours.
In this course, theories and principles of human behavior in organizations are examined, including an exploration of leadership roles in professional nursing practice. The role of regulatory agencies in the provision of quality health care is explored. Students will participate in the evaluation and planning for quality improvement using nurse sensitive indicators. The students will discern the nurse’s role in reducing the financial cost of health care. Practicum experiences are individualized.

NURS 467 Leadership and Management for the RN
Credits 5.3 Lecture Hours. 2 Lab Hours.
In this course, theories and principles of human behavior in organizations are examined, including an exploration of leadership roles in professional nursing practice. The role of regulatory agencies in the provision of quality health care is explored. Students will participate in the evaluation and planning for quality improvement using nurse sensitive indicators. The students will discern the nurse’s role in reducing the financial cost of health care. Practicum experiences are individualized.

NURS 468 Professional Practice Issues for the RN
Credits 2.2 Lecture Hours.
Professional practice issues such as those related to political action, socio-legal concerns, cultural diversity, and ethics are explored with an emphasis on the advocacy role of the nurse. The importance of the nurse leader as a role model for continued professional growth through lifelong learning is emphasized.

NURS 469 Special Topics In...
Credits 1 to 4.1 to 4 Lecture Hours. 0 to 4 Lab Hours.
Selected topics in an identified area of nursing. May be repeated for credit.
Prerequisites: Admission to the BSN program or approval from the Associate Dean for Academic Affairs.

NURS 501/EDHP 501 Curriculum Design
Credits 3.3 Lecture Hours.
Various models of curriculum development and design based on educational philosophy and professional standards will be investigated. Students will demonstrate knowledge of program development including scope and sequence, curriculum alignment, and mapping. Program development through topic identification and generation of content outlines/syllabi, objectives, and outcome measures are included in this course.

NURS 502/EDHP 502 Assessment and Evaluation in Education
Credits 3.3 Lecture Hours.
Practical and theoretical issues involved in evaluating student performance, teacher performance and educational programs will be explored. Students will explore various means of performance-based assessments applicable to didactic, simulated and clinical learning environments. Students will examine a variety of assessment instruments and strategies and the role each has in the evaluation process. The course will enable students to plan, execute and interpret educational assessments.

NURS 503/EDHP 503 Teaching Strategies
Credits 3.3 Lecture Hours.
Best practices research on instructional pedagogy and adult learning will be examined. The course focuses on recommended principles, concepts and theories used in practice that create effective learning environments. Teaching strategies responsive to diverse learning styles and needs of learners will be explored as well as reflective practices and self-assessment. A variety of practical classroom, simulation and clinical teaching strategies consistent with current evidence will be discussed emphasizing teaching methods using technology.
Cross Listing: EDHP 503/NURS 503.
NURS 504 Teaching Practicum  
**Credits 2. 2 Lab Hours.**  
This course allows the student to synthesize knowledge gained in the education track courses by working with a faculty mentor to actualize the faculty role. The student will implement effective teaching strategies in content/curriculum development, test construction and clinical supervision in a variety of settings. Interprofessional collaborative teaching strategies will be evidence based and promote critical thinking scholarship and innovation.

NURS 508 Advanced Clinical Practicum and Project  
**Credits 4. 4 Lab Hours.**  
This course provides the opportunity for the student to develop advanced clinical proficiency in a population interest or professional role. Using direct or indirect care approaches, the student will develop and implement a plan to improve patient outcomes, utilizing a variety of advanced skills and knowledge including health promotion, wellness management, quality improvement, health care finance, leadership, policy and evidence based practice and informatics. This course will include 105 hours of clinical practice.

NURS 512 Advanced Pathophysiology  
**Credits 3. 3 Lecture Hours.**  
Advanced concepts of pathophysiology of health problems across the lifespan, preparing the student at the level of advanced nursing practice will be emphasized.

NURS 516 Advanced Pharmacology  
**Credits 3. 3 Lecture Hours.**  
Advances Pharmacology. Advanced pharmacotherapeutic principles related to the management of health problems will be presented. The focus is on pharmacologic treatments utilized by the advanced practice nurse.

NURS 520 Advanced Practice Nursing Roles  
**Credits 3. 3 Lecture Hours.**  
Analysis and synthesis of multi-dimensional role and responsibilities of advanced practice nursing.  
**Prerequisite:** NURS 556/HCPI 556.

NURS 521 Diagnostics and Procedures  
**Credits 2. 2 Lecture Hours.**  
Development of knowledge and skills associated with common procedures and diagnostics in primary care; focus on diagnostics and procedures appropriate to the role of the advanced practice nurse including collaborative, ethical, legal and regulatory considerations.

NURS 522 Primary Care of Families I  
**Credits 6. 3 Lecture Hours. 9 Lab Hours.**  
First course of three; advanced knowledge of acute and chronic health problems in the context of family; emphasis on epidemiology, pathology, assessment, diagnosis, therapeutic modalities and evaluation related to health promotion and health problems of adults across the lifespan.  
**Prerequisites:** NURS 512, NURS 553.  
**Corequisite:** NURS 516.

NURS 523 Primary Care of Families II  
**Credits 6. 3 Lecture Hours. 9 Lab Hours.**  
Second course of three; advanced knowledge of acute and chronic health problems in the context of family; emphasis on epidemiology, pathology, assessment, diagnosis, therapeutic modalities and evaluation related to health promotion and health problems of women and children.  
**Prerequisite:** NURS 522.

NURS 524 Primary Care of Families III  
**Credits 6. 3 Lecture Hours. 9 Lab Hours.**  
Third course of three; advanced knowledge of acute and chronic health problems in the context of family; emphasis on epidemiology, pathology, assessment, diagnosis, therapeutic modalities and evaluation related to health promotion and health problems of adults and older adults.  
**Prerequisite:** NURS 523.

NURS 525 Primary Care of Families Practicum  
**Credits 4. 12 Other Hours.**  
Culmination and integration of all previous course work; opportunity to continue to master domains and competencies of the family nurse practitioner; addresses professional practice issues needed for transition to the advanced practice nurse role and workforce.  
**Prerequisites:** NURS 524, NURS 554, NURS 521, NURS 520.

NURS 551/HCPI 551 Healthcare Quality Improvement and Informatics  
**Credits 3. 3 Lecture Hours.**  
Overview of health care from the viewpoint of quality improvement and health care informatics; using the science of quality measurement and improvement in conjunction with information science to propose a quality improvement initiative; legal and ethical implications of current trends in information technology and safety.  
**Cross Listing:** HCPI 551.

NURS 552/HCPI 552 Scholarship: Integration and Application  
**Credits 3. 3 Lecture Hours.**  
Integrate theory, evidence, clinical judgment, research and interprofessional perspectives using translational processes to improve patient outcomes; application of available evidence to interdisciplinary clinical practice; identification of gaps in knowledge and development of a spirit of inquiry and lifelong scholarship.  
**Cross Listing:** HCPI 552/NURS 552.

NURS 553 Advanced Health Assessment  
**Credits 3. 2 Lecture Hours. 1 Lab Hour.**  
This course will focus on the application of advanced assessment techniques and skills for comprehensive evaluation of patients across the life span using a common symptom approach. Emphasis will be placed on common deviations from normal assessment findings within the context of holistic practice. The course includes 45 hours of clinical practice.

NURS 554 Clinical Prevention and Population Health  
**Credits 3. 3 Lecture Hours.**  
Leadership skills will be developed in the design of clinical prevention interventions and population based care that promotes health and reduces the risk of chronic illness and disease. The student will plan care that is responsive to unique cultural and ethnic identities, socioeconomic conditions and the needs and values of individuals and populations.

NURS 556/HCPI 556 Leadership and Health Policy II  
**Credits 3. 3 Lecture Hours.**  
The development of skills essential to leadership and policy processes, including communication, collaboration, negotiation, delegation and coordination by applying systems theory and complexity science will be promoted. The student will be prepared to assume a leadership role in the management and evaluation of human, fiscal and physical health resources. Students will develop skills in political efficacy and the ability to improve the systems and population outcomes through the development of health policy.  
**Cross Listing:** HCPI 556/NURS 556.

**NUTR - Nutrition**
Courses

NUTR 202 Fundamentals of Human Nutrition
Credits 3. 3 Lecture Hours.
(BIOL 1322, HECO 1322) Fundamentals of Human Nutrition. Principles of nutrition with application to the physiologic needs of individuals; food sources and selection of an adequate diet; formulation of Recommended Dietary Allowances; nutritional surveillance; for non-nutrition majors only.

NUTR 203 Scientific Principles of Human Nutrition
Credits 3. 3 Lecture Hours.
Chemistry and physiology of proteins, carbohydrates, lipids, vitamins and minerals; their ingestion, digestion, absorption, transport and metabolism. Prerequisite: CHEM 101 and CHEM 111. Majors only.

NUTR 210/FSTC 210 Horizons in Nutrition and Food Science
Credits 2. 2 Lecture Hours.
Introduction to nutrition and food science career opportunities through presentations by nutrition and food science researchers and industry professionals; addresses issues of professionalism including portfolio development, teamwork, and critical thinking skills. Cross Listing: FSTC 210/NUTR 210.

NUTR 211 Scientific Principles of Foods
Credits 4. 3 Lecture Hours. 3 Lab Hours.
Basic principles underlying selection, preparation and preservation of food in relation to quality standards, acceptability and aesthetics. Introduction to composition, nutritive value, chemical and physical properties of foods; introduction to experimental study of foods. Prerequisites: CHEM 101, CHEM 111; NUTR 202 or NUTR 203; sophomore classification or above.

NUTR 222 Nutrition for Health and Health Care
Credits 3. 3 Lecture Hours.
Analysis of nutrition with emphasis on providing a basic understanding of nutrition and its role in disease prevention and treatment. Prerequisites: Approval of instructor; 2.0 GPR in major and overall.

NUTR 285 Directed Studies
Credits 0 to 4. 0 to 4 Other Hours.
Directed study of selected problems in the area of nutrition. Prerequisites: Approval of instructor; 2.0 GPR in major and overall.

NUTR 289 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Selected topics in an identified area of nutrition. May be repeated for credit. Prerequisite: Approval of department head.

NUTR 291 Research
Credits 0 to 4. 0 to 4 Other Hours.
Research conducted under the direction of faculty member in nutrition. May be repeated 2 times for credit. Prerequisites: Freshman or sophomore classification and approval of department head.

NUTR 300/FSTC 300 Religious and Ethnic Foods
Credits 3. 3 Lecture Hours.
Understanding religious and ethnic foods with application to product development, production, and nutritional practices; emphasis on different food rules and priorities with attention given to different religious and ethnic groups within the US and around the world. Prerequisites: Junior or senior classification or approval of instructor; basic knowledge of food science and nutrition helpful. Cross Listing: FSTC 300/NUTR 300.

NUTR 301 Nutrition Through Life
Credits 3. 3 Lecture Hours.
Analysis of nutrition with emphasis on human biological needs through stages of the life cycle; biochemical, physiological and anthropometric aspects of nutrition. Prerequisites: NUTR 203; junior classification or approval of department head.

NUTR 303/ANSC 303 Principles of Animal Nutrition
Credits 3. 3 Lecture Hours.
Scientific approach to nutritional roles of water, carbohydrates, proteins, lipids, minerals, vitamins, and other dietary components; emphasis on the comparative aspects of gastrointestinal tracts and on digestion, absorption, and metabolism of nutrients. Prerequisites: ANSC 107 and ANSC 108; CHEM 222 or CHEM 227 or equivalent. Cross Listing: ANSC 303/NUTR 303.

NUTR 304 Food Service Systems Management
Credits 4. 3 Lecture Hours. 3 Lab Hours.
Principles of food service management used in selecting, storing, preparing and serving food in quantity; emphasis on menu planning, quality control, purchasing, equipment and layout/design; application of basic food service systems management principles, including financial planning and personnel issues. Prerequisites: NUTR 203 and NUTR 211, junior or senior classification.

NUTR 365 Nutritional Physiology of Vitamins and Minerals
Credits 3. 3 Lecture Hours.
Fundamental nutritional significance of fat soluble and water soluble vitamins and minerals to human metabolism, cell biology and physiology; micro-nutrient groups as per metabolic function or biochemical and physiological actions; important dietary sources, absorption, storage, metabolism, (bio)chemistry, deficiency and toxicity of individual nutrients in this context and basis of DRIs. Prerequisites: NUTR 203 and NUTR 301; junior or senior classification.

NUTR 404 Nutrition Assessment and Planning
Credits 4. 3 Lecture Hours. 3 Lab Hours.
Methods of determining the nutritional status of individuals; dietary techniques; planning nutritional care including diet modification and/or nutrition support; nutrition counseling. Prerequisites: NUTR 203; NUTR 301; junior classification or approval of department head.

NUTR 405 Nutritional Treatment of Disease
Credits 3. 3 Lecture Hours.
Nutritional intervention in pathological conditions, based on biochemical, physiological and psychological effects of disease state; current research in clinical nutrition. Prerequisites: NUTR 203, NUTR 444; BIOL 319; BICH 410 or concurrent enrollment; senior classification or approval of instructor.

NUTR 410/FSTC 410 Nutritional Pharmacometrics of Food Compounds
Credits 3. 3 Lecture Hours.
Nutritional pharmacokinetics and pharmacodynamics of food compounds; specific examples of toxicological and pharmacological effects of food compounds. Prerequisites: NUTR 202 or NUTR 203 or FSTC 201 or CHEM 222 or CHEM 227 or approval of instructor; junior or senior classification. Cross Listing: FSTC 410/NUTR 410.
NUTR 430 Community Nutrition
Credits 3. 3 Lecture Hours.
Health and nutrition programs, food labeling, cultural food practices, consumer education and marketing.
Prerequisite: NUTR 203.

NUTR 440/FSTC 440 Therapeutic Microbiology: Probiotics and Related Strategies
Credits 3. 3 Lecture Hours.
Topics relevant to alimentary (gastrointestinal) microbiology including: (i) the "normal" intestinal microbiota; (ii) probiotic and prebiotic nutritional supplements; (iii) recombinant pharmabiotics; (iv) gut-associated lymphoid tissue and mucosal immunity; (v) foodborne gastrointestinal pathogens; and (vi) fermented products as functional foods.
Prerequisites: Undergraduate survey course in microbiology or approval of instructor; junior or senior classification.
Cross Listing: FSTC 440/NUTR 440.

NUTR 450 Nutrition and Metabolism of Minerals
Credits 3. 3 Lecture Hours.
The role of minerals in living systems and the exploration of their multitude of functions; chemical properties of minerals and how that relates to function in cells and tissues; consequences of mineral deficiencies based on known functions; insight into experimental approaches used to assess minerals in a living environment.
Prerequisite: NUTR 203. BICH 303 or BICH 410 or approval of instructor.

NUTR 469/FSTC 369 Experimental Nutrition and Food Science Laboratory
Credits 4. 1 Lecture Hour. 6 Lab Hours.
Investigation of nutritional intervention in animal models of metabolic and psychological disorders (e.g. obesity and depression); investigational approaches: behavioral analyses; RNA and protein analyses; reverse transcription PCR.
Prerequisites: CHEM 227; CHEM 237; junior or senior classification or approval of instructor.
Cross Listing: FSTC 369.

NUTR 470 Nutrition and Physiological Chemistry
Credits 3. 3 Lecture Hours.
Fundamentals of physiology, biochemistry and nutrition and their relationship to the organismic and cellular metabolism of animals; biochemical basis of hormonal action.
Prerequisites: NUTR 203; NUTR 301; BICH 410; senior classification or approval of department head.

NUTR 471/FSTC 471 Critical Evaluation of Nutrition and Food Science Literature: Evidence Based Reviews
Credits 3. 3 Lecture Hours.
Evaluation of scientific literature, research methods within the literature, and the quality of scientific studies to produce an evidence-based review in areas specific to nutrition and food science.
Prerequisites: NUTR 202 or NUTR 203 and STAT 302; junior or senior classification; knowledge of technical writing helpful.
Cross Listing: FSTC 471/NUTR 471.

NUTR 481 Seminar
Credit 1. 1 Lecture Hour.
Review of current literature and research in nutrition; oral presentations and critical discussions.
Prerequisite: NUTR 203; NUTR 301; senior classification or approval of department head.

NUTR 485 Directed Studies
Credits 0 to 4. 0 to 4 Other Hours.
Directed study on selected problems in the area of nutrition.
Prerequisites: Junior or senior classification in scientific nutrition or allied area; approval of instructor; 2.0 GPR in major and overall.

NUTR 489 Special Topics in...
Credits 1 to 4. 0 to 4 Lecture Hours. 0 to 4 Lab Hours.
Selected topics in an identified area of nutrition. May be repeated for credit.
Prerequisite: Junior or senior classification.

NUTR 491 Research
Credits 0 to 4. 0 to 4 Other Hours.
Research conducted under the direction of faculty member in nutrition. May be repeated 3 times for credit. Registration in multiple sections of this course are possible within a given semester provided that the per semester credit hour limit is not exceeded.

NUTR 601/ANSC 601 General Animal Nutrition
Credits 3. 3 Lecture Hours.
Comparative nutrition of animal species contrasting digestive, metabolic and physiological functions involved in processing and using nutrients.
Prerequisite: ANSC 303 or 318 or equivalent.
Cross Listing: ANSC 601/NUTR 601.

NUTR 602/ANSC 602 Energetics of Metabolism and Growth
Credits 3. 3 Lecture Hours.
Current fundamental concepts in protein and energy metabolism relating to nutrients required for maintenance, growth and development of animals.
Prerequisite: BICH 410 or approval of instructor.
Cross Listing: ANSC 602/NUTR 602.

NUTR 610/FSTC 610 Nutritional Pharmacometrics of Food Compounds
Credits 3. 3 Lecture Hours.
Introduction into nutritional pharmacokinetics and pharmacodynamics of food compounds; specific examples of toxicological and pharmacological effects of food compounds.
Prerequisite: NUTR 202 or NUTR 203 or FSTC 201 or CHEM 227 or CHEM 222 or approval of instructor.
Cross Listing: FSTC 610/NUTR 610.

NUTR 613/ANSC 613 Protein Metabolism
Credits 3. 3 Lecture Hours.
Basic concepts and recent advances in protein metabolism in animals with emphasis on physiological and nutritional significances; discussion of protein digestion; absorption of peptides; absorption, synthesis and degradation of amino acids; hormonal and nutritional regulation of protein turnover; determination of protein quality and requirements.
Prerequisite: BICH 411 or BICH 601 or equivalent or approval of instructor.
Cross Listing: ANSC 613/NUTR 613.

NUTR 614 Fermentation and Gastrointestinal Microbiology
Credits 3. 3 Lecture Hours.
Fermentation and gastrointestinal ecosystems in terms of microorganisms present, their activities and requirements and their interactions in a dynamic system.
Prerequisite: Beginning microbiology and/or biochemistry or approval of instructor.
Cross Listing: POSC 614 and VTMI 614.
NUTR 617/ANSC 617 Experimental Techniques in Meat Science
Credits 3. 1 Lecture Hour. 6 Lab Hours.
Methods used in separating and identifying muscle proteins and fats; techniques for determining postmortem changes of muscle tissue as a result of antemortem treatments.
Prerequisite: ANSC 607/FSTC 607; BICH 411.
Cross Listing: ANSC 617/NUTR 617.

NUTR 618/ANSC 618 Lipids and Lipid Metabolism
Credits 3. 3 Lecture Hours.
Chemical nature of various classes of lipids and lipid-derived hormones; absorption and metabolism of fatty-acids and lipids; regulation of lipid biosynthesis and obesity; relationship between lipid metabolism and cholesterol homeostasis; lipids as hormones.
Prerequisite: BICH 410 or approval of instructor.

NUTR 630 Nutrition in Disease
Credits 3. 3 Lecture Hours.
Human nutritional requirements in health and disease, emphasizing effects of disease states on intake, digestion, absorption, metabolism and excretion of nutrients; relationship of diet to development of certain diseases.
Prerequisites: NUTR 202; BICH 410 or equivalent.

NUTR 640/FSTC 640 Therapeutic Microbiology I
Credits 3. 3 Lecture Hours.
Alimentary (gastrointestinal) microbiology including: (i) the "normal" intestinal microbiota; (ii) probiotic and prebiotic nutritional supplements; (iii) recombinant pharambioics; (iv) gut-associated lymphoid tissue and mucosal immunity; (v) foodborne gastrointestinal pathogens; and (vi) fermented products as functional foods.
Prerequisite: Undergraduate survey course in microbiology (or instructor's consent).
Cross Listing: FSTC 640/NUTR 640.

NUTR 641 Nutritional Biochemistry I
Credits 3. 3 Lecture Hours.
Integration of the intermediary metabolism of glucose, amino acids and lipids with nutrition, physiology and pathophysiology in animals; regulation of metabolic pathways in cells, tissues and the whole body under normal and disease conditions; functions of vitamins and minerals in nutrient metabolism and health.
Prerequisite: BICH 411 or BICH 604. Offered during the fall semester.

NUTR 642 Nutritional Biochemistry II
Credits 3. 3 Lecture Hours.
Mechanisms through which specific nutrients modulate intracellular signal transduction and gene expression; molecular mechanisms by which nutrition modulates disease states such as atherosclerosis, cancer and arthritis.
Prerequisites: BICH 411; BICH 431/GENE 431 or equivalent.

NUTR 645/POSC 645 Nutrition and Metabolism of Vitamins
Credits 3. 3 Lecture Hours.
Chemistry and metabolism of the fat soluble and water soluble vitamins and their roles in animals; integrates cellular biochemistry and metabolism of the vitamins in vertebrate animal.
Prerequisites: POSC 411 or ANSC 303/NUTR 303; BICH 410 or BICH 603.
Cross Listing: POSC 645/NUTR 645.

NUTR 646 Fundamentals of Space Life Sciences
Credits 3. 3 Lecture Hours.
Integrates nutrition, physiology, and radiation biology to define major biological problems in long duration space flight; provide an overview of the problems of bone loss, muscle wasting, and radiation-enhanced carcinogenesis along with potential countermeasures; focus on nutritional interventions and exercise protocols.
Cross Listing: NUEN 646 and KINE 646.

NUTR 647/WFSC 647 Nutritional Biochemistry of Fishes
Credits 3. 3 Lecture Hours.
Principles of nutritional biochemistry including nutrient metabolism and biochemical energetics with special emphasis on finfish and shell fish.
Prerequisite: BICH 410 or equivalent.
Cross Listing: WFSC 647/NUTR 647.

NUTR 650/POSC 650 Nutrition and Metabolism of Minerals
Credits 3. 3 Lecture Hours.
Nutritional significance of minerals in animal metabolism; chemical, biochemical and physiological role of minerals and homeostatic control in animal metabolism.
Prerequisites: POSC 411 or ANSC 303/NUTR 303; BICH 410 or BICH 603.
Cross Listing: POSC 650/NUTR 650.

NUTR 669/FSTC 669 Experimental Nutrition & Food Science Laboratory
Credits 4. 1 Lecture Hour. 6 Lab Hours.
Experimental Nutrition & Food Science Laboratory. Nutritional intervention in animal models of metabolic or emotional disorders; genetic modifications or pathogens in foods products; analyses of gene expression and behavior.
Prerequisite: BICH 432/GENE 432/GENE 432/BICH 432 recommended; graduate classification in nutrition or related major.
Cross Listing: FSTC 669/NUTR 669.

NUTR 671/FSTC 671 Critical Evaluation of Nutrition and Food Science Literature: Evidence Based Reviews
Credits 3. 3 Lecture Hours.
Evaluation of scientific literature, research methods within the literature, and the quality of scientific studies to produce an evidence-based review in areas specific to nutrition and food science.
Prerequisites: NUTR 202 or NUTR 203 and STAT 302; knowledge of nutrition, statistics, and technical writing helpful.
Cross Listing: FSTC 671/NUTR 671.

NUTR 681 Seminar
Credit 1. 1 Lecture Hour.
Current developments in the field of nutrition; review of current literature and oral presentation of scientific papers on selected nutrition topics.
Prerequisite: Graduate classification.

NUTR 684 Professional Internship
Credits 1 to 16. 1 to 16 Other Hours.
Experience in application of formal training to applied nutrition under supervision of nutritionists, dietitians and faculty member. Student will investigate matter of mutual interest and report results in a professional paper approved by the graduate committee.
Prerequisite: Graduate classification.

NUTR 685 Directed Studies
Credits 1 to 4. 1 to 4 Other Hours.
Nutrition problems and procedures; problems assigned according to experience, interest and need of individual student.
Prerequisite: Approval of instructor prior to registration.
NVSC 689 Special Topics in...
Credits 1 to 4. 0 to 4 Lecture Hours. 0 to 4 Lab Hours.
Special topics in an identified area of nutrition. May be repeated for credit.
Prerequisites: Graduate classification and approval of instructor.

NVSC 691 Research
Credits 1 to 23. 1 to 23 Other Hours.
Investigations leading to thesis or dissertation in various areas of nutrition.
Prerequisite: Graduate classification.

NVSC - Naval Science

Courses

NVSC 101 Introduction to Naval Science
Credits 2. 2 Lecture Hours. 2 Lab Hours.
Seapower and the naval service; mission, organization, regulations, and broad warfare components of the Navy; overview of officer and enlisted rank and rating structures, procurement and recruitment, training and education, promotion and advancement, and retirement policies. Basic tenets of naval courtesy and customs, discipline, naval leadership, and ship's nomenclature. Major challenges facing Naval officers; areas of equal opportunity, fraternization and drug/alcohol abuse.

NVSC 205 Naval Sea Power and Maritime Affairs
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Naval history survey emphasizing major developments in strategy, tactics, technology, and effects of political climate; significant naval engagements and officers; includes an introduction to the role of seapower in national policy and diplomacy. Mahan’s naval strategy and the affects of maritime policy on global stability.

NVSC 210 Leadership and Management I
Credits 3. 3 Lecture Hours. 1 Lab Hour.
Principles of leadership and management and their application to duties and responsibilities for Junior Naval Officers; management theory, professional responsibility and human resource management programs; skills in leadership and management, communication, counseling, evaluations; administration of discipline developed through participation in case studies, experiential exercises and situational problems.

NVSC 301 Navigation
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Theory, principles and procedures of ship navigation in coastal and open ocean environments; piloting, ocean and tidal currents, weather, introduction to USN electronic and satellite navigational systems, guided participation in case studies involving maritime accidents.

NVSC 303 Evolution of Warfare
Credits 3. 3 Lecture Hours.
Art and concepts of land warfare; its evolution from the beginning of recorded history to present day; influence that leadership, political, economic, sociological and technological development have had on warfare throughout history.

NVSC 320 Naval Ships Systems I: Engineering
Credits 3. 3 Lecture Hours. 1 Lab Hour.
Study of engineering concepts and their application in U.S. Naval vessels: basic ship design, hydrodynamic forces, fluid dynamics, stability, propulsion, closed thermodynamic systems, electrical systems, shipboard power generation and distribution, shipboard safety, organization and firefighting.
Prerequisites: Junior or senior classification.

NVSC 401 Naval Ships Systems II: Weapons
Credits 3. 3 Lecture Hours. 1 Lab Hour.
Types and purpose of major weapons systems and platforms of the U.S. Naval forces; theory and operational principles of radar, sonar and communication circuits; fire control problem geometry, principles of ballistics, propulsion, launching and guidance of weapons; principles of electronic warfare and nuclear weapons.

NVSC 402 Leadership and Ethics
Credits 3. 3 Lecture Hours. 1 Lab Hour.
Theoretical concepts of Western moral traditions and ethical philosophy; topics include leadership, values, military ethics, Just War Theory, Uniform Code of Military Justice and Naval regulations; examination of ethical foundation for the development of leadership and communication skills; should be taken the semester of graduation.

NVSC 404 Naval Operations and Seamanship
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Relative motion, formation tactics, ship maneuvering behavior and characteristics, applied aspects of ship handling, afloat communications and ship employment; naval warfare, operations concepts, command and control, and joint warfare; review and analysis of case studies involving moral, ethical and leadership issues.
Prerequisite: NVSC 301; junior or senior classification.

NVSC 410 Amphibious Warfare
Credits 3. 3 Lecture Hours.
Historical survey of the projection of seapower ashore; background of military history with emphasis on Marine Corps contributions; selected amphibious operations and the evolution of current amphibious doctrine. Development of concepts, principles and techniques of amphibious operations.
Prerequisite: NVSC 303.

NVSC 485 Directed Studies
Credits 1 to 4. 1 to 4 Other Hours.
Directed study in problems in the field of naval science not covered by other courses in department.
Prerequisite: Approval of department head.

OCEN - Ocean Engineering

Courses

OCEN 201 Introduction to Ocean Engineering
Credits 3. 3 Lecture Hours.
Survey of ocean engineering; concepts and theories of wave-structure interaction; sources of technical information; coastal and ocean structures, moorings, laboratory models; underwater systems; naval architecture; ocean instrumentation; materials and corrosion; hydrographic surveying and positioning, recent developments in ocean engineering.
Prerequisite: CVEN 221 or registration therein.

OCEN 300 Ocean Engineering Wave Mechanics
Credits 3. 3 Lecture Hours.
Physical and mathematical fundamentals of ocean wave behavior; mechanics of wave motion; use of statistics and probability to develop design wave criteria.
Prerequisite: CVEN 311, OCEN 201 or registration therein.
OCEN 336 Fluid Dynamics Laboratory
Credit 1. 2 Lab Hours.
Introduction to laboratory techniques, calibration principles, reports and fluid measurements; determination of fluid properties; visualization of types of flow; experiments in closed conduit flow of air, water and oil; fluid drag and turbomachinery tests; open channel and gravity wave demonstrations.
Prerequisite: CVEN 311 or registration therein.

OCEN 362 Hydromechanics
Credits 3. 3 Lecture Hours.
Kinematics of fluids; differential analysis of fluid flow; incompressible, irrotational and turbulent flow; Navier-Stokes equations; flow of viscous fluids; open-channel flow.
Prerequisites: CVEN 311; MATH 308; junior or senior classification.

OCEN 400 Basic Coastal Engineering
Credits 3. 3 Lecture Hours.
Mechanics of wave motion; wave refraction, diffraction and reflection; wave forecasting; shore processes; planning of coastal engineering projects; design of seawalls, breakwaters, beach nourishment, and fixed and floating installations; dredging; risk analysis.
Prerequisites: OCEN 300 or approval of instructor; CVEN 311; junior or senior classification.

OCEN 401 Underwater Acoustics for Ocean Engineers
Credits 3. 3 Lecture Hours.
Fundamentals of underwater acoustics, SONAR equations, propagation of underwater sound, acoustic transducers and arrays, noise in the ocean environment, design and prediction of SONAR systems, ocean engineering applications of underwater sound.
Prerequisite: CVEN 311.

OCEN 402 Principles of Naval Architecture
Credits 3. 3 Lecture Hours.
Elementary principles of naval architecture; ship geometry and hydrostatics; load line and classification regulations; concept of intact and damaged stability; resistance and propulsion of water-borne vehicles; applications to the design consideration of semi-submersibles, catamarans and drilling rigs.
Prerequisite: CVEN 311.

OCEN 403 Dynamics of Offshore Structures
Credits 3. 3 Lecture Hours.
Prediction of loads due to wind, current and waves; introduction to concepts of linear structural dynamics and to the design of ocean structures; mooring and towing analysis; fluid-structure interactions; vibration of submerged structures; offshore pipelines; introduction to risk analysis.
Prerequisites: OCEN 300 or approval of instructor; CVEN 345, CVEN 363 or registration therein.

OCEN 407 Design of Ocean Engineering Facilities
Credits 4. 1 Lecture Hour. 6 Lab Hours.
Design of structures, equipment and systems for the ocean; environmental, logistical and reliability requirements; complete design process followed through group design project; delineation of alternatives, constraints, economics and environmental consequences included to strengthen real-life problem solving skills.
Prerequisites: OCEN 400, OCEN 402, OCEN 403 or approval of instructor.

OCEN 408 Underwater and Moored System Design
Credits 3. 3 Lecture Hours.
Basic principles of thermodynamics, fluid dynamics and human respiration physiology applied to design of underwater habitats, submersibles and diving bells; breathing gas supply for diving systems; heat transfer for underwater systems; pressure vessel design; remotely operated vehicles; subsea flowlines and manifold systems; and design of towed and moored systems.
Prerequisites: CVEN 311; MEEN 315 or approval of instructor.

OCEN 410 Ocean Engineering Laboratory
Credit 1. 3 Lab Hours.
Fundamental techniques and instrumentation for field and laboratory measurements pertaining to ocean engineering experiment planning; data analysis and data presentation; written reports describing planning, analysis and results of experiments.
Prerequisites: OCEN 400, OCEN 402, OCEN 403; junior or senior classification.

OCEN 475 Environmental Fluid Mechanics
Credits 3. 3 Lecture Hours.
Examines fluid and mass transport in naturally occurring flows; topics include molecular and turbulent diffusion; dispersion; river, estuary, and ocean mixing; dissolution boundary layers; tidal mixing; offshore wastewater outfalls; introduction to environmental quality numerical modeling.
Prerequisite: CVEN 311.

OCEN 481 Seminar
Credit 1. 1 Lecture Hour.
Responsible for new ocean engineers; professional ethics, membership in professional societies and professional registrations; case studies and lectures presented by staff and practicing engineers. Must be taken on a satisfactory/unsatisfactory basis.
Prerequisite: OCEN 300.

OCEN 485 Directed Studies
Credits 1 to 6. 1 to 6 Other Hours.
Special problems in various areas of ocean engineering assigned to individual students or to groups; readings and assignments given and frequent consultations held.
Prerequisite: Approval of program head.

OCEN 489 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Selected topics in an identified field of ocean engineering. May be repeated for credit.
Prerequisite: Approval of instructor.

OCEN 491 Research
Credits 1 to 4. 1 to 4 Other Hours.
Research conducted under the direction of faculty member in ocean engineering. May be repeated 2 times for credit. Registration in multiple sections of this course is possible within a given semester provided that the per semester credit hour limit is not exceeded.
Prerequisites: Junior or senior classification and approval of instructor.

OCEN 630 Dynamics of Ocean Vehicles
Credits 3. 3 Lecture Hours.
Dynamics and stability of motion of immersed and floating structures and ocean vehicles; maneuverability and control; behavior of ocean vehicles and stationary platforms in waves. Design considerations leading to motion reduction; applications to surface vessels, submersibles and drilling rigs.
Prerequisites: CVEN 311, MEEN 459 or equivalent, or approval of instructor.
**OCEN 671 Ocean Wave Mechanics**  
**Credits 3.3 Lecture Hours.**  
Wave theory and applications to engineering problems; linear and non-linear theories of regular gravity waves; wave properties and transformation in shoaling water; spectral analysis of irregular waves; forecasting, hindcasting and theoretical spectra.  
**Prerequisite:** Prerequisite: CVEN 311 or equivalent.

**OCEN 672 Coastal Engineering**  
**Credits 3.3 Lecture Hours.**  
Effects of waves on coastal structures; design of seawalls breakwaters, jetties, harbors, ship channels and pipelines; intentional and accidental discharge of pollutants; diffusion and spreading; oil spill containment and collection.  
**Prerequisite:** OCEN 671.

**OCEN 673 Nonlinear Hydrodynamic Problems in Ocean Engineering**  
**Credits 3.3 Lecture Hours.**  
Nonlinear hydrodynamic problems involved with the complex offshore structures in high sea environment; nonlinear waves application of Volterra model to weakly nonlinear systems; generation of nonlinear model waves; nonlinear hydrodynamic interaction between waves and structure; dynamic analysis of nonlinear response of integrated offshore structures.  
**Prerequisites:** OCEN 671 and OCEN 678.

**OCEN 674 Ports and Harbors**  
**Credits 3.3 Lecture Hours.**  
Basic port planning including site selection, environmental factors and economic conditions; design of wharves, quays, jetties, breakwaters, terminals, navigational channels and fenders; harbor sedimentation and maintenance dredging; design of fishing, small craft and recreation boat harbors.  
**Prerequisite:** Approval of instructor.

**OCEN 675 Nonlinear Wave Dynamics**  
**Credits 3.3 Lecture Hours.**  
Nonlinear wave-wave interactions in steep ocean waves significantly affect wave properties and long-term wave evolution. Strong and weak wave interactions and their respective effects on waves are studied, using various perturbation methods. Applications are shown through using Hybrid Wave Models to analyze wave measurements and predict wave loads on structures.  
**Prerequisite:** OCEN 671.

**OCEN 676 Dynamics of Offshore Structures**  
**Credits 3.3 Lecture Hours.**  
Review of concepts of linear structural dynamic analysis for time and frequency domain simulations, functional design of off-shore platforms, pipelines, floating structures and moorings; environmental loading problems; hydrodynamic phenomena including wind and current interaction, vortex shedding and wave forces; structure-fluid interaction models.  
**Prerequisites:** OCEN 671 or approval of the instructor.

**OCEN 677 Environmental Fluid Mechanics**  
**Credits 3.3 Lecture Hours.**  
Introduction to fluid and mass transport in naturally occurring flows; topics include molecular and turbulent diffusion; dispersion; river, estuary, and ocean mixing; dissolution boundary layers; tidal mixing; offshore wastewater outfalls; introduction to environmental quality numerical modeling.  
**Prerequisite:** CVEN 311 or equivalent.

**OCEN 678 Fluid Dynamics for Ocean and Environmental Engineering**  
**Credits 3.3 Lecture Hours.**  
General conservation laws; Navier-Stokes equations; steady and unsteady Bernoulli's equation; potential flow theory and basics of panel methods; laminar and turbulent boundary layer; dispersion and diffusion processes in laminar and turbulent flow; flow past a body of any shape.  
**Prerequisite:** Prerequisite: CVEN 311 or equivalent.

**OCEN 681 Seminar**  
**Credit 1.2 Lab Hours.**  
Reports and discussion of current research and selected published technical articles.

**OCEN 682 Coastal Sediment Processes**  
**Credits 3.3 Lecture Hours.**  
Sediment properties and size distribution, fluvial sediment transport equations, movement of material by the sea, review of pertinent wave theories, littoral drift, inlet stability, coastal protection structures, similarity in sediment transport, movable bed models, sediment tracing, Aeolian sand transport, case studies.  
**Prerequisite:** OCEN 671 or approval of instructor.

**OCEN 683 Estuary Hydrodynamics**  
**Credits 3.3 Lecture Hours.**  
Development of applicable equations for tidal dynamics applied to real estuaries; technology for determination of mean velocities, circulation patterns, water depths, turbulent dispersion patterns, etc. for solution of environmental problems in estuaries; physical and mathematical models.  
**Prerequisites:** OCEN 678 or approval of instructor.

**OCEN 685 Directed Studies**  
**Credits 1 to 12.1 to 12 Other Hours.**  
Special topics not within scope of thesis research and not covered by other formal courses.

**OCEN 688 Marine Dredging**  
**Credits 3.3 Lecture Hours.**  
Dredge pump selection; pump and system characteristics; cavitation; types of dredges; continental shelf and deep-ocean dredging; head loss in horizontal and vertical pipes for two and three-phase flow; design of disposal methods for dredged material; environmental effects of dredging.  
**Prerequisite:** Approval of instructor.

**OCEN 689 Special Topics in...**  
**Credits 1 to 4.1 to 4 Lecture Hours.**  
Selected topics in an identified area of ocean engineering. May be repeated for credit.

**OCEN 691 Research**  
**Credits 1 to 23.1 to 23 Other Hours.**  
Research for thesis or dissertation.

**OCNG - Oceanography**

**Courses**

**OCNG 251 Oceanography**  
**Credits 3.3 Lecture Hours.**  
Overview of the ocean environment; interrelation of the subdisciplines of ocean sciences; importance of the oceans to human beings; human impact on the oceans.  
**Prerequisite:** Concurrent registration in ONCG 252 if necessary for meeting the 8 credit hour science core curriculum requirement.
OCNG 252 Oceanography Laboratory  
Credit 1. 2 Lab Hours.  
Hands-on laboratory experiments and exercises demonstrating principles of ocean sciences; emphasis on the unique interdisciplinary nature of the ocean and current ocean issues relevant to today’s society; tailored for the non-scientist. Honors sections are also available.

OCNG 291 Research  
Credits 0 to 4. 0 to 4 Other Hours.  
Research conducted under the direction of faculty member in oceanography. May be repeated 2 times for credit. Registration in multiple sections of this course is possible within a given semester provided that the per semester credit hour limit is not exceeded.  
Prerequisites: Freshman or sophomore classification and approval of instructor.

OCNG 350 Marine Pollution  
Credits 3. 3 Lecture Hours.  
Sources and fates of marine pollutants; types of pollutants including plastics, oil and sound; impact of pollution on society.  
Prerequisite: Junior or senior classification or approval of instructor.

OCNG 401 Interdisciplinary Oceanography  
Credits 3. 3 Lecture Hours.  
Quantitative survey of interdisciplinary relationships between biological, chemical, geological/geophysical and physical aspects of the ocean. Honors section also available.  
Prerequisites: CHEM 101 or CHEM 107; MATH 131, MATH 151, or MATH 171.

OCNG 404 Ocean Observing Systems  
Credits 3. 3 Lecture Hours.  
Investigate the rationale behind ocean observing systems; familiarize with the relevant social, scientific design, technology and policy issues associated with observing systems.  
Prerequisite: OCNG 251 or OCNG 401 or approval of instructor.

OCNG 410 Introduction to Physical Oceanography  
Credits 3. 3 Lecture Hours.  
Elements of the physics of the sea; descriptive aspects as well as cause and effect relations in respect to currents, thermal structure and waves. Intended for majors in the physical sciences or engineering.  
Prerequisites: MATH 308; junior or senior classification.

OCNG 420 Introduction to Biological Oceanography  
Credits 3. 3 Lecture Hours.  
Biological aspects of the marine environment; marine organisms; productivity of the sea; marine pollution and fouling; use of the sea.  
Prerequisites: BIOL 112 or OCNG 251; junior or senior classification.

OCNG 425 Microbial Oceanography  
Credits 3. 3 Lecture Hours.  
Diversity and ecology of microorganisms in the ocean; role in the Earth system both in the contemporary ocean and the geological past.  
Prerequisites: Junior or senior classification, OCNG 251, or OCNG 401, or approval of instructor.

OCNG 430 Introduction to Geological Oceanography  
Credits 3. 3 Lecture Hours.  
History of Oceanography; physiographic provinces of the oceans, their origins and sediments; geological sampling techniques and geophysical methods; coasts and beaches, paleoceanography; global tectonics.  
Prerequisites: OCNG 251 or OCNG 401 or GEOL 101 or GEOL 104 or GEOG 203; junior or senior classification.

OCNG 440 Introduction to Chemical Oceanography  
Credits 3. 3 Lecture Hours.  
Chemical aspects of the marine environment; biogeochemical cycles of organic and inorganic constituents; primary productivity, the carbon dioxide system, nutrient cycles, stable and radioactive isotopes in the sea.  
Prerequisites: CHEM 102 or CHEM 104; junior or senior classification; sophomore with approval of instructor.

OCNG 451 Mathematical Modeling of Ocean Climate  
Credits 4. 3 Lecture Hours. 2 Lab Hours.  
Problem-based course in theoretical and computer techniques applied to mathematical solutions of ocean climate, including ocean circulation, climate variability, El Niño.  
Prerequisite: MATH 308 or MATH 451.

OCNG 485 Directed Studies  
Credits 1 to 4. 1 to 4 Other Hours.  
Special reading assignments, problems and discussion on oceanographic topics of mutual interest to student and instructor.  
Prerequisites: OCNG 251 or OCNG 401 or approval of instructor. An honors section is also available.

OCNG 489 Special Topics in...  
Credits 1 to 4. 1 to 4 Lecture Hours. 0 to 4 Lab Hours.  
Selected topics in an identified area of oceanography. May be taken two times for credit.  
Prerequisite: OCNG 251 or OCNG 401 or approval of instructor. An honors section is also available.

OCNG 491 Research  
Credits 0 to 9. 0 to 9 Other Hours.  
Research conducted under the direction of faculty member in oceanography. Registration in multiple sections of this course is possible within a given semester provided that the per semester credit hour limit is not exceeded.  
Prerequisites: Junior or senior classification and approval of instructor. An honors section is also available.

OCNG 600 Survey of Oceanography  
Credits 3. 3 Lecture Hours.  
General survey of the scientific framework of oceanographic study; applications of ocean research to social and economic problems; interrelations between the ocean disciplines and other fields of study.  
Prerequisite: Approval of instructor.

OCNG 603 Communicating Ocean Science  
Credits 3. 3 Lecture Hours.  
Instruction and practice with presenting scientific information on the ocean to a variety of audiences under different time constraints; critical components for any presentation; knowing your audience; designing effective visual aids and graphics; leading your audience through complex concepts; and communication with non-scientists.

OCNG 604 Ocean Observing Systems  
Credits 3. 3 Other Hours.  
Investigate the rationale behind ocean observing systems; familiarize with the relevant social, scientific design, technology, and policy issues associated with observing systems.  
Prerequisite: Approval of instructor.
OCNG 605 Oceanography Cruise
Credits 2.2 Other Hours.
Specialized experience in research methods and analysis in oceanography via preparation for and participation in a research cruise of at least two weeks duration under the supervision of a Texas A&M oceanography faculty member. May be taken up to two times for MS candidates and four times for PhD candidates.
Prerequisite: Approval of instructor.

OCNG 608 Physical Oceanography
Credits 3.3 Lecture Hours.
Observations, instruments; physical properties of seawater; property distributions; characteristics of water masses; heat budget; kinematics; gravity, pressure, hydrostatics, stability; horizontal flow; Coriolis force, geostrophy; friction, wind drift; general circulation; wave motions; tides.
Prerequisite: MATH 172 or equivalent; PHYS 219.

OCNG 609 Dynamical Oceanography
Credits 3.3 Lecture Hours.
Systematic treatment of the kinematics, dynamics and thermodynamics of the ocean; integral conservation relations; solenoidal versus conservative vector fields; potential vorticity; geostrophic adjustment; inertial and buoyancy modes; Bernoulli-Montgomery potential; energetics in a rotating system; available potential energy; natural temporal and spatial scales.
Prerequisites: OCNG 608 or ATMO 435; MATH 601.

OCNG 610 Mathematical Modeling of Marine Ecosystems
Credits 4.3 Lecture Hours. 2 Lab Hours.
Theory and technique of model development for marine ecosystems; mathematical representation of interactions among nutrients, phytoplankton, zooplankton, fish and the physical environment; scrutiny of biological concepts and mathematical structure of existing models; laboratory segment to focus on computational techniques applicable to classroom problems.
Prerequisites: OCNG 608 and OCNG 620, calculus or approval of instructor.

OCNG 611 Global Scale Oceanography
Credits 3.3 Lecture Hours.
A balanced description of the ocean's large-scale circulation and water mass structure based on the interpretation of modern observations, with emphasis on the ocean's role in global climate, and physical-chemical property fluxes in basin to global scale budgets.

OCNG 612 Elements of Ocean Wave Theory
Credits 3.3 Lecture Hours.
Theories of simple harmonic surface gravity, capillary and internal waves. Wave propagation, dispersion and energy; modifications due to rotation, variable depth and finite amplitude.
Prerequisites: OCNG 608 and MATH 601 or approval of instructor.

OCNG 615 Numerical Modeling of Ocean Circulation I
Credits 4.3 Lecture Hours. 2 Lab Hours.
Mathematical theory and numerical technique of model development for ocean circulation; concepts of numerical consistency and stability; Lax equivalence theorem; commonly used finite difference schemes in ocean modeling; finite element and spectral methods as alternative means of discretisation; positivity and CFT method; relaxation and direct methods for solving elliptic equations.
Prerequisite: OCNG 608.

OCNG 616 Numerical Modeling of Ocean Circulation II
Credits 4.3 Lecture Hours. 2 Lab Hours.
Quasigeostrophic ocean circulation models; Arakawa's energy and enstrophy conserving scheme; spectral barotropic vorticity model on sphere; shallow water primitive equation models; geostrophic adjustment on different numerical grids; boundary conditions in numerical models; introduction to ocean general circulation models; mixed models and sub-gridscale parameterization; oceanic data assimilation.
Prerequisite: OCNG 615.

OCNG 617 Theories of Ocean Circulation
Credits 3.3 Lecture Hours.
Theories of wind-driven circulation, Sverdrup solution, frictional and inertial boundary regimes; instabilities, meanders and mesoscale features; role of stratification, topography and time dependence; Thermohaline circulation.
Prerequisite: Graduate classification.

OCNG 620 Biological Oceanography
Credits 3.3 Lecture Hours.
Critical analysis of contribution of biological science to our understanding of sea; discernible interrelationships between organisms and physicochemical parameters.
Prerequisites: General prerequisites for oceanography.

OCNG 625 Current Topics in Biological Oceanography
Credit 1.1 Lecture Hour.
Areas of current research: plankton processes; microbial food web; benthic communities; fisheries; global change. May be taken up to three times.
Prerequisite: OCNG 620 or approval of instructor.

OCNG 627 Ecology of the Continental Shelf
Credits 3.3 Lecture Hours.
Environments, populations and communities of the continental shelf. Interactions of the shelf with the estuaries and the deep sea; man's impact on the shelf ecosystems.
Prerequisite: Approval of instructor.

OCNG 630 Geological Oceanography
Credits 3.3 Lecture Hours.
Survey of marine geology, structure and composition of ocean basins and continental margins, properties of marine sediments.
Prerequisites: General prerequisites for oceanography.

OCNG 632 Sea-Level Change
Credits 3.3 Lecture Hours.
Modern sea level: topography, measurement, meteorologic and oceanographic contributions, periodic and non-periodic changes; long-term changes: determination, Cenozoic history, Quaternary glacial-interglacial fluctuations; changes during the past century and decade; observations, natural and anthropogenic influences; estimates of future changes and societal implications.
Prerequisite: Graduate classification; approval of instructor.

OCNG 640 Chemical Oceanography
Credits 3.3 Lecture Hours.
Prerequisites: General prerequisites for oceanography.
OCNG 641 Inorganic Aquatic Geochemistry
Credits 3. 3 Lecture Hours.
Chemical composition and properties of waters in the near Earth surface environment and their interactions with sedimentary minerals; major topics: thermochemical properties of natural waters, equilibrium and kinetic controlling ion speciation; geochemical processes at mineral surfaces; kinetics of mineral-water interactions; applications to modeling early diagenesis.
Prerequisite: Approval of instructor.

OCNG 644 Isotope Geochemistry
Credits 3. 3 Lecture Hours.
Stable and radioactive isotope variations in natural materials; applications to geochronometric, geothermometric and paleoclimatologic studies of the marine environment.
Prerequisite: Approval of instructor.

OCNG 645 Marine Organic Geochemistry
Credits 3. 3 Lecture Hours.
Origins, fates and distribution of organic compounds in contemporary marine environments and in recent and ancient sediments. Specific analytical techniques.
Prerequisite: Approval of instructor.

OCNG 646 Dynamics of Colloids in the Environment
Credits 3. 3 Lecture Hours.
Equilibrium and dynamic aspects of the physics and chemistry of such colloidal particles and macromolecules and the implications for environmental systems, relevant for organic carbon flux and cycling, fate and transport of pollutants, bioavailability of pollutants, or mobility of pollutants in groundwater.
Prerequisites: Physical Chemistry, Thermodynamics, Aquatic and Organic Chemistry.

OCNG 649 Estuarine Biogeochemistry
Credits 3. 3 Lecture Hours.
Geomorphology; physical oceanography and sedimentation dynamics of estuaries; chemistry of nutrients; trace metals and organic matter; major controls in estuarine productivity and interactions among estuaries, marshes and coastal waters.
Prerequisites: OCNG 620 and OCNG 640.

OCNG 650 Aquatic Microbial Ecology
Credits 3. 3 Lecture Hours.
Microbes in natural environments, including both water and sediment habitats in marine, fresh and ground water systems; process studies of microbial foodwebs and biogeochemical cycling; current methods and research directions.
Prerequisites: OCNG 620 and WFSC 414 or approval of instructor.

OCNG 651 Meteorological Oceanography
Credits 3. 3 Lecture Hours.
Interaction between the ocean and atmosphere; major features of the two systems; heat budget, teleconnections between ocean and atmosphere, El Niño and related phenomena.
Prerequisite: OCNG 608.

OCNG 652 Sedimentary Biogeochemistry
Credits 3. 3 Lecture Hours.
An interdisciplinary approach to understanding complex processes that occur near the marine sediment-water interface in marine and estuarine environments. Composition of marine sediments, pore water chemistry, role of organisms in chemical transformations and pelagic-benthic coupling. Carbon, nitrogen and sulfur cycling in sediments. Modeling biogeochemical processes at the sediment-water interface and during early burial diagenesis.
Prerequisites: OCNG 620 and OCNG 640 or approval of instructor.

OCNG 654 Plankton Ecology
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Elective course, overview of phytoplankton and zooplankton; taxonomy; physiology; ecology; sampling design; current methods of investigation.
Prerequisite: OCNG 620.

OCNG 657 Data Methods and Graphical Representation in Oceanography
Credits 3. 3 Lecture Hours.
Provide the basic tools and techniques to process, analyze, and visualize oceanographic data sets; multi-disciplinary approach; real-world applications to physical, biological, chemical and geological oceanographic data; basic instruction in the MATLAB programming language.
Prerequisite: Knowledge of vector calculus and basic statistics.

OCNG 658 Ocean Computational Analysis Lab
Credit 1. 4 Lab Hours.
Laboratory course designed to train in computational techniques using modern (Python) and classic (FORTRAN) programming languages and scientific software packages (Generic Mapping Tools and MATLAB); labs focus on real oceanographic applications.
Prerequisites: Encourage concurrent with OCNG 657.

OCNG 659 Ocean Observing Applications
Credits 3. 3 Lecture Hours.
Conceptualization, design, and construction of oceanographic observing systems; practical experience with the Texas Automated Buoy System including system design, instrumentation setup and calibration, telecommunication systems, and data management.
Prerequisites: Master or doctoral classification in OCNG or related field by approval of instructor.

OCNG 662 Coastal and Marine Sedimentary Processes
Credits 4. 3 Lecture Hours. 2 Lab Hours.
Sedimentary processes (erosion, transport and deposition) from the coastline to the deep sea; development of estuaries, deltas, continental shelves, submarine canyons, fans; behavior of fluids and particles in boundary layers. Lab: recirculating flume, field and lab instrumentation.
Prerequisite: Approval of instructor.

OCNG 666 Principles of Geodynamics
Credits 4. 4 Lecture Hours.
Geological and geophysical methods and phenomena pertinent to geodynamics; plate tectonics; seismicity and seismology; magnetics; gravity; heat flow; igneous, metamorphic and sedimentary petrology; paleontology; and rock mechanics.
Prerequisite: Approval of instructor.

OCNG 668 Geology and Geophysics of Small Ocean Basins
Credits 3. 3 Lecture Hours.
Geology and geophysics of the Gulf of Mexico, Caribbean, Mediterranean, Arctic Ocean, Red Sea and Philippine Sea; the regional geology, sediment distribution, general structure and origin of each basin.
Prerequisite: OCNG 630.
OCNG 670 Deep Sea Sediments  
Credits 3.3 Lecture Hours. 0 Lab Hours.  
Formation process, core description, physical properties, lithostratigraphy, seismic stratigraphy and paleoceanographic significance of deep marine sediments.

OCNG 673 High-Resolution Marine Geophysics  
Credits 3.2 Lecture Hours. 2 Lab Hours.  
Introduction to the geophysical nature of the seafloor and marine subbottom to 1.5 seconds two-way travel time; generation, use and interpretation of reflection and side-scan sonar records and magnetic anomalies of various marine environments and seafloor features.  
Prerequisite: Approval of instructor.

OCNG 674 Paleoceanography  
Credits 3.3 Lecture Hours.  
History of oceans through geologic time; marine paleontological, geochemical, sedimentological and geophysical evidence; inferred changes in seawater properties, ocean circulation and sea level; relation to climate, tectonic processes, atmospheric chemistry and evolution of life.  
Prerequisite: OCNG 630 or approval of instructor.

OCNG 677/ATMO 677 Geophysical Data Assimilation  
Credits 4.3 Lecture Hours. 2 Lab Hours.  
Modern data assimilation methods applied to oceanic and atmospheric circulation models, as well as in other simple models; methods to interpolate one-, two- and three-dimensional randomly spaced data to regular grids for use in numerical models of atmospheric and oceanic circulation.  
Prerequisites: OCNG 657, ATMO 632, STAT 601.  
Cross Listing: ATMO 677/OCNG 677.

OCNG 678 Coastal Dynamics  
Credits 3.3 Lecture Hours.  
Surveys dynamical processes that determine estuarine and continental shelf circulation; geophysical scale flow where Earth’s rotation and buoyancy effects are important; analytical and numerical methods used to isolate and study these processes.  
Prerequisite: OCNG 609.

OCNG 679 Proxy Reconstruction of Late Cenozoic Climate: Calibrations and Applications  
Credits 3.3 Lecture Hours.  
Paleo-proxy calibration and application in reconstructing Late Cenozoic climate history; issues related to geochemical and sedimentological proxies used in the field of paleoclimatology/paleoceanography.  
Prerequisite: Graduate classification.

OCNG 681 Seminar  
Credit 1.1 Lecture Hour.  
Presented by faculty, students, staff and visiting scientists; based on recent scientific research.  
Cross Listing: MARB 681 and MARS 681.

OCNG 684 Professional Internship  
Credits 1 to 6.1 to 6 Other Hours.  
A directed internship in a professional setting to provide on-the-job training in ocean observing systems skills appropriate to the student’s professional objectives.  
Prerequisites: Approval of student's committee chair; OCNG 684, OCNG 657.

OCNG 685 Directed Studies  
Credits 1 to 6.1 to 6 Other Hours.  
Special topics to suit small group requirements. Problems not within thesis research and not covered by any other course in established curriculum.  
Prerequisites: General prerequisites for oceanography.

OCNG 689 Special Topics in...  
Credits 1 to 4.1 to 4 Lecture Hours. 0 to 4 Lab Hours.  
Selected topics in an identified area of oceanography. May be repeated for credit.  
Prerequisite: Approval of instructor.

OCNG 691 Research  
Credits 1 to 23.1 to 23 Other Hours.  
For thesis or dissertation.

PERF - Performance Studies

Courses

PERF 101 Introduction to Performance Studies  
Credits 3.3 Lecture Hours.  
Survey of topics in the interdisciplinary field of performance studies, including forms of performance, performance in everyday life and performance in global and intercultural contexts; in-class performance exercises and discussions; major writing component.

PERF 202 Introduction to Performance Technology  
Credits 3.3 Lecture Hours. 1 Lab Hour.  
Basic hardware, software, and aesthetic concepts of technology-based artistic performance; basic electricity, electronics, troubleshooting, audio and video design software, study of significant works, and participation in a departmental production.

PERF 284 Performance Studies Internship  
Credits 0 to 4.0 to 4 Lecture Hours.  
Supervised experience program conducted in the area of the student's interest in performance studies. May be taken three times for credit.  
Prerequisite: PERF 101.

PERF 292 Cooperative Education in Performance Studies  
Credits 0 to 3.0 to 3 Other Hours.  
Educational work assignment by a student in the field of his or her career interest and course of study; supervision of the student by the cooperating employer and the instructor; technical report on a related subject area approved by the instructor. May be taken two times for credit.  
Prerequisite: PERF 101.

PERF 301 Performance in World Cultures  
Credits 3.3 Lecture Hours.  
Application of the tools of performance studies to explore the enactment of the arts in world cultures and the ways the people of every society express themselves in performance; examination of different genres of performance through music, theatre, verbal art and dress.  
Prerequisite: Junior or senior classification or approval of instructor.  
Cross Listing: MUSC 301 and THAR 301.

PERF 318/MUSC 318 Electronic Composition  
Credits 3.3 Lecture Hours.  
Project-based study of techniques for creating electronic and mixed-media performance; critical analysis of important electronic and interactive works; interactive media programming techniques for sound and video synthesis, sampling, digital signal processing.  
Prerequisites: Junior or senior classification and MUSC 316, PERF 202, or approval of instructor.  
Cross Listing: MUSC 318/PERF 318.
PERF 325/MUSC 325 Dance and World Cultures
Credits 3. 3 Lecture Hours.
Examination of international relationships between dance, culture, identity, gender, youth and politics; relationships between dancing, gender and politics in specific cultures and in globalization; variety of dance practices around the globe.
Prerequisite: Junior or senior classification.
Cross Listing: MUSC 325/PERF 325.

PERF 326 Dance and Identity in the United States
Credits 3. 3 Lecture Hours.
Analysis of dance events as complex sites for social action; examines dances performed by diverse groups of people; considers such issues as identity, community, diversity, gender and representation in the United States.
Prerequisite: Junior or senior classification.

PERF 327 Popular Musics in the African Diaspora
Credits 3. 3 Lecture Hours.
Examination of a range of popular musics from the twentieth century that have emerged in conjunction with the historical global spread of peoples and cultures from the African continent; technical knowledge about music is not required; focus on social and cultural contexts for popular music.
Prerequisite: Junior or senior classification or approval of instructor.
Cross Listing: AFST 327 and MUSC 327.

PERF 402 Intermedia Performance
Credits 3. 3 Lecture Hours.
Study of theory, history, literature and techniques of intermedia composition and design for film, theatre, dance, interactive media, and other forms of performance; examination of the collaborative creative process; projects in interdisciplinary performance.
Prerequisites: Junior or senior classification and MUSC 316, PERF 202, or approval of instructor.
Cross Listing: FILM 402 and MUSC 402.

PERF 481 Senior Project
Credits 3. 1 Lecture Hour. 5 Lab Hours.
Capstone senior project on an individually-chosen research topic, presentation of a performance or interdisciplinary project; major writing and oral communication components.
Prerequisites: Performance studies major; completion of all performance studies coursework or taken concurrently with this course; approval of instructor, advisor and department head.

PERF 483 Performance Practicum
Credits 1 to 3. 1 to 3 Other Hours.
Faculty-supervised performance experience in a public setting as part of a department production or an approved external production. May be taken four times for credit.
Prerequisite: Junior or senior classification and approval of instructor.

PERF 484 Performance Studies Internship
Credits 0 to 4. 0 to 4 Other Hours.
Supervised experience program conducted in the area of the student's interest in performance studies. May be taken three times for credit.
Prerequisites: PERF 101; junior or senior classification.

PERF 489 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours. 0 to 4 Lab Hours.
Selected topics in performance studies. May be repeated for credit.
Prerequisite: Approval of instructor.

PERF 491 Research
Credits 0 to 3. 0 to 3 Other Hours.
Research conducted under the direction of faculty member in performance studies. May be repeated 1 time for credit.
Prerequisites: Junior or senior classification and approval of instructor.

PERF 492 Cooperative Education in Performance Studies
Credits 0 to 3. 0 to 3 Other Hours.
Educational work assignment by a student in the field of his or her career interest and course of study; supervision of the student by the cooperating employer and the instructor; technical report on a related subject area approved by the instructor. May be taken two times for credit.
Prerequisites: PERF 101; junior or senior classification.

PERF 600 Graduate Scholarship in Performance Studies
Credits 3. 3 Lecture Hours.
Overview of history, key issues, and major arguments in performance studies.
Prerequisites: Admission to the MA in Performance Studies or approval of instructor.

PERF 601 Theories of Performance Studies
Credits 3. 3 Lecture Hours.
Overview of major theories of performance studies and related disciplines; also includes major critical and cultural theories that contribute to the field.
Prerequisites: Admission to the MA in Performance Studies or approval of instructor.

PERF 602 Research Methods in Performance Studies
Credits 3. 3 Lecture Hours.
Examination and assessment of primary research methods in performance studies; emphasis on post-positivist methods; includes examination of ethical imperatives in research.
Prerequisite: Admission to the MA in Performance Studies or approval of instructor.

PERF 603 Performance, Power, and Identity
Credits 3. 3 Lecture Hours.
Issues in, and production of, power and identity in expressive culture, examines how forms of power and varieties of social identity shape, and are shaped by, performance.
Prerequisites: PERF 600 or approval of instructor.

PERF 604 Performing Vernacular Culture
Credits 3. 3 Lecture Hours.
Examines populist and counter-traditions in expressive culture; emphasis on contemporary cultures of performance and/as practices of everyday life.
Prerequisites: PERF 600 or approval of instructor.

PERF 605 Topics in Globalization and Performance Studies
Credits 3. 3 Lecture Hours.
Examines expressive cultures in global contexts; theoretical and methodological approaches to globalization and/in performance. May be taken two times for credit.
Prerequisites: PERF 600 or approval of instructor.

PERF 610 Graduate Studies in Dance Research
Credits 3. 3 Lecture Hours.
Examines key theoretical and methodological issues in dance studies from a performance studies perspective.
Prerequisite: PERF 602 or approval of instructor.
PERF 611 Contemporary Religions and Performance
Credits 3.3 Lecture Hours.
Examines the intricate relationship between religious traditions and performance. Focus on contemporary religious movements.
Prerequisite: Graduate classification.

PERF 612 Music Capitalism
Credits 3.3 Lecture Hours.
Explores the production, distribution, and consumption of music genres as a performance of capitalism.
Prerequisite: Graduate classification.

PERF 613 Performing Texas
Credits 3.3 Lecture Hours.
Explores "Texas" as a set of complex performances that construct specific identities and communities.
Prerequisite: Graduate classification.

PERF 614 Soundscape
Credits 3.3 Lecture Hours.
Explores sound in social life; sound as performative of identity; sound performance.
Prerequisite: Graduate classification.

PERF 615 Spectacle, Performance, and Politics
Credits 3.3 Lecture Hours.
Interdisciplinary and international exploration of spectacle as political performance.
Prerequisite: Graduate classification.

PERF 616 Sport as Performance
Credits 3.3 Lecture Hours.
Explores sport as manifold modes of cultural performance; focus on embodiment, gender, race, nationalism, spectacle, politics, warfare, and media.
Prerequisite: Graduate classification.

PERF 620 Critical Ethnographic Methods in Performance Studies
Credits 3.3 Lecture Hours.
Critical methods in performance ethnography; emphasis on political dimensions of field encounter. May be taken two times for credit.
Prerequisites: PERF 600, PERF 602.

PERF 621 Topics in Popular Music Studies
Credits 3.3 Lecture Hours.
Examination of context, politics, and political economy of specific popular music forms. May be repeated for a total of 9 credits.
Prerequisites: PERF 600, PERF 601, PERF 602, or approval of instructor.

PERF 622 Performance and the Construction of American Identity
Credits 3.3 Lecture Hours.
Role of performance in construction of national identity; special emphasis on post-Civil War US.
Prerequisites: PERF 600, PEF 601, PERF 602, or approval of instructor.

PERF 623 Phenomenology and Music
Credits 3.3 Lecture Hours.
Theoretical and methodological potentials of phenomenology in analyses of music; special emphasis on use of phenomenology to examine multiple aspects of music production, including embodiment.
Prerequisites: PERF 600, PERF 601, PERF 602, or approval of instructor.

PERF 625 Latino/a Expressive Culture
Credits 3.3 Lecture Hours.
Explores how issues concerning Latinos, including race and ethnicity, religion, border politics, immigration, the drug war, family, gender and sexuality, and class, are reflected and debated through expressive forms of performance such as theater, comedy music, folklore and performance art.
Prerequisite: Acceptance into the MA in Performance Studies program or approval of instructor.

PERF 682 American Theatre: Gender on the U.S. Stage
Credits 3.3 Lecture Hours.
Focuses on 18th-21st century texts and performers in order to account for transformations in representations as well as lived experiences of gender.
Prerequisite: Enrollment in the MA in Performance Studies or approval of instructor.

PERF 685 Directed Studies
Credits 1 to 3.1 to 3 Other Hours.
Directed studies in specific areas of performance studies. Student may take up to two sections of directed studies in the same semester, with a maximum of 6 credits.
Prerequisites: PERF 600, PERF 601, PERF 602, or approval of instructor.

PERF 689 Special Topics in Performance Studies
Credits 3.3 Lecture Hours.
Selected topics in an identified area of performance studies. May be repeated for a total of 9 credits.
Prerequisites: PERF 600, PERF 601, PERF 602, or approval of instructor.

PERF 691 Research
Credits 1 to 3.1 to 3 Other Hours.
Research for thesis.
Prerequisites: Approval of department head.

PETE - Petroleum Engineering

Courses

PETE 201 Introduction to Petroleum Engineering
Credit 1.1 Lecture Hour.
Overview and history of the petroleum industry and petroleum engineering; nature of oil and gas reservoirs, exploration and drilling, formation evaluation, well completions and production, surface facilities, reservoir mechanics, improved oil recovery; impact of ethical, societal, environmental considerations; career development resources, including professional society.
Prerequisite: Approval of department head.

PETE 225 Introduction to Drilling Systems
Credits 3.2 Lecture Hours.3 Lab Hours.
Introduction to petroleum drilling systems, including fundamental petroleum engineering concepts, quantities and unit systems, drilling rig components, drilling fluids, pressure loss calculations, casing, well cementing, and directional drilling.
Prerequisites: Grade of C or better in ENGR 112, MATH 152 and PHYS 218.

PETE 285 Directed Studies
Credits 1 to 4.1 to 4 Other Hours.
Special problems in various areas of petroleum engineering assigned to individual students or to groups.
Prerequisites: Approval of department head.
PETE 289 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Selected topics in an identified area of petroleum engineering. May be repeated for credit. 
Prerequisite: Approval of instructor.

PETE 291 Research
Credits 1 to 4. 1 to 4 Other Hours.
Research conducted under the direction of a faculty member in petroleum engineering. May be taken two times for credit. Registration in multiple sections of this course is possible within a given semester. 
Prerequisites: Freshman or sophomore classification and approval of instructor.

PETE 300 Summer Practice
Credits 0.
Required. No Credit. Industry practice to familiarize the petroleum engineering student with practices and equipment of the petroleum industry. Approval of advisor required.

PETE 301 Petroleum Engineering Numerical Methods
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Use of numerical methods in a variety of petroleum engineering problems; numerical differentiation and integration; root finding; numerical solution of differential equations; curve fitting and interpolation; computer applications; introduction to the principles of numerical simulation methods. 
Prerequisites: MATH 308, junior or senior classification, petroleum engineering majors only; or approval of instructor.

PETE 310 Reservoir Fluids
Credits 4. 3 Lecture Hours. 3 Lab Hours.
Thermodynamic behavior of naturally occurring hydrocarbon mixtures; evaluation and correlation of physical properties of petroleum reservoir fluids including laboratory and empirical methods. 
Prerequisites: Grade of C or better in CHEM 107 and CHEM 117; MATH 251, MEEN 315, PETE 311. Corequisite: MATH 308.

PETE 311 Reservoir Petrophysics
Credits 4. 3 Lecture Hours. 3 Lab Hours.
Systematic theoretical and laboratory study of physical properties of petroleum reservoir rocks; lithology, porosity, elastic properties, strength, acoustic properties, electrical properties, relative and effective permeability, fluid saturations, capillary characteristics and rock-fluid interactions such as adsorption and absorption. 
Prerequisites: MATH 251; PHYS 208 with a grade of C or better. Corequisite: GEOL 104.

PETE 314 Transport Processes in Petroleum Production
Credits 3. 3 Lecture Hours.
Basics and applications of fluid mechanics (statics; mass, energy, momentum balances; laminar and turbulent flow, Reynolds number, Moody diagram; non-Newtonian fluid flow; multi-phase flow; flow in porous media, non-Darcy flow); heat transfer (heat conduction, convection, heat exchangers); emphasis on analogies and similarities within mass, energy and momentum transport. 
Prerequisites: MEEN 315, junior or senior classification, petroleum engineering majors only; or approval of instructor.

PETE 321 Formation Evaluation
Credits 4. 3 Lecture Hours. 3 Lab Hours.
Well-log interpretation for formation evaluation of hydrocarbon-bearing reservoirs; basic rock physics principles; theory of tool operation; analysis of open hole logs and core measurements to estimate hydrocarbon reserves and petrophysical properties of the formation such as porosity, net pay thickness, water/hydrocarbon saturation, permeability and saturation-dependent capillary pressure; formation evaluation of clay-free and shaly-sand formations as well as basic introduction to formation evaluation of organic-shale formations.

PETE 322 Geostatistics
Credits 3. 3 Lecture Hours.
Introduction to geostatistics; basic concepts in probability and univariate statistics; bivariate statistics and spatial relationship; covariance and correlation; second order stationarity; variogram estimation and modeling; spatial estimation and reservoir modeling; simple and ordinary kriging; uncertainty analysis; estimation versus conditional simulation; sequential Gaussian simulation. 
Prerequisites: Senior classification, petroleum engineering majors only; or approval of instructor.

PETE 323 Fundamentals of Reservoir Engineering
Credits 3. 3 Lecture Hours.
Determination of reserves; material balance methods; aquifer models; fractional flow and frontal advance; displacement, pattern and vertical sweep efficiencies in waterfloods; enhanced oil recovery processes; design of optimal recovery processes; introduction and performance analysis of unconventional reservoirs. 
Prerequisites: PETE 301, PETE 310, PETE 311; GEOL 404, junior or senior classification, petroleum engineering majors only; or approval of instructor.

PETE 324 Well Testing
Credits 3. 3 Lecture Hours.
Analysis of well performance under varied reservoir conditions including evaluation of unsteady, pseudo-steady and steady state flow; well testing methods used to determine well and reservoir parameters; applications to conventional and unconventional wells producing gas and/or liquids; fundamentals of preparing and operating well test equipment to monitor, measure and gather samples for evaluating well performance. 
Prerequisites: PETE 301, PETE 310, PETE 311; GEOL 404, junior or senior classification, petroleum engineering majors only; or approval of instructor.

PETE 325 Petroleum Production Systems
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Petroleum operation and oil field equipment including onshore and offshore production systems; wellbore inflow and outflow and backpressure analysis; downhole completion and sand control equipment; artificial lift equipment and design; stimulation, workover/completion nomenclature; flow assurance; produced fluids, fluid separation and metering, safety systems, pressure boosting and monitoring. 
Prerequisites: PETE 301, PETE 310, PETE 314, junior or senior classification, petroleum engineering majors only; or approval of instructor.
PETE 335 Technical Presentations I  
Credit 1. 1 Lecture Hour.  
Preparation of a written technical paper proposal on a subject related to petroleum technology and an oral presentation of the proposal in a formal technical conference format; oral presentations are judged by petroleum industry professionals at the departmental student paper contest held during the same academic year.  
Prerequisites: COMM 203, COMM 205 or ENGL 210; junior or senior classification.

PETE 353 Petroleum Project Evaluation  
Credits 3. 3 Lecture Hours.  
Economic analysis and investment decision methods in petroleum and mineral extraction industries; depletion, petroleum taxation regulations, and projects of the type found in the industry; mineral project evaluation case studies.  
Corequisites: PETE 301, PETE 310.

PETE 355 Drilling Engineering  
Credits 3. 3 Lecture Hours.  
Design and evaluation of well drilling systems; identification and solution of drilling problems; wellbore hydraulics, well control, casing design; well cementing directional drilling, offshore drilling.  
Prerequisites: PETE 225 with a grade C or better, PETE 314; PETE 321, PETE 325.

PETE 401 Reservoir Simulation  
Credits 2. 1 Lecture Hour. 3 Lab Hours.  
Solution of production and reservoir engineering problems using state-of-the-art commercial reservoir simulation software, using data commonly available in industry; emphasis on reservoir description, reservoir model design and calibration, production forecasting and optimization, economic analysis and decision making under uncertainty.  
Prerequisites: PETE 310, PETE 321, PETE 323, PETE 324, PETE 353.

PETE 402 Integrated Asset Development  
Credits 3. 1 Lecture Hour. 6 Lab Hours.  
Capstone design encompassing previously acquired skills; project teams formed to solve practical petroleum engineering problems using current tools; technical content of the projects may include any combination of drilling and completion, formation evaluation, inflow/outflow design and analysis, and application of reservoir engineering principles.  
Prerequisites: PETE 355, PETE 401, PETE 404, PETE 410.

PETE 404 Integrated Reservoir Modeling  
Credits 3. 3 Lecture Hours.  
Geophysical, geological, petrophysical and engineering data with geostatistical methods to create reservoir descriptions for dynamic reservoir modeling (simulation); geostatistical concepts such as variogram modeling, kriging and sequential Gaussian simulation; combines several techniques to quantify uncertainty in a realistic dynamic reservoir simulation.  
Corequisite: PETE 401.

PETE 406 High Performance Drilling Design and Operational Practices  
Credits 3. 3 Lecture Hours.  
Preparation in achieving differentiating drilling performance in the most complex wells; includes training in the underlying physics of each type of performance limiter and real time and engineering practices to address the limitation; performance management workflows and change models required to effectively change the way organizations conduct work essential in achieving higher performance.  
Prerequisite: PETE 355.

PETE 410 Production Engineering  
Credits 3. 3 Lecture Hours.  
Fundamental production engineering design, evaluation and optimization for oil and gas producing wells; well deliverability; formation damage and skin analysis; well completion selection; technologies that improve oil and gas well performance including artificial lift and well stimulation.  
Prerequisites: PETE 321, PETE 323, PETE 324, PETE 325.

PETE 416 Solving Common Production Engineering Problems  
Credits 3. 3 Lecture Hours.  
Application of petroleum engineering tools, methods and techniques to solve real problems that petroleum engineers encounter in producing individual wells; focus primarily on problems associated with single-phase gas wells and uses Microsoft Excel to solve many of these problems.  
Prerequisite: PETE 410.

PETE 435 Technical Presentations II  
Credit 1. 1 Lecture Hour.  
Preparation of a written technical paper on a subject related to petroleum technology and an oral presentation of the paper in a formal technical conference format; oral presentations are judged by petroleum industry professionals at the departmental student paper contest held during the same academic year.  
Prerequisites: PETE 335; satisfactory performance in junior student paper contest.

PETE 458 Energy and Sustainability  
Credits 3. 3 Lecture Hours.  
Energy resources and use with emphasis on long-term sustainability; considers fossil, nuclear and alternative energy sources, electricity and transportation, energy conversions, energy efficiency, energy security, energy policy and environmental impact.

PETE 485 Directed Studies  
Credits 1 to 5. 1 to 5 Other Hours.  
Special problems in various phases of petroleum engineering assigned to individual students or to groups.  
Prerequisites: Junior or senior classification and approval of department head.

PETE 489 Special Topics in...  
Credits 1 to 4. 1 to 4 Lecture Hours.  
Selected topics in an identified field of petroleum engineering. Approval of instructor. May be repeated for credit.

PETE 491 Research  
Credits 1 to 4. 1 to 4 Other Hours.  
Research conducted under the direction of a faculty member in petroleum engineering. May be taken two times for credit. Registration in multiple sections of this course is possible within a given semester.  
Prerequisites: Junior or senior classification and approval of instructor.

PETE 602 Well Stimulation  
Credits 3. 3 Lecture Hours.  
Design and analysis of well stimulation methods, including acidizing and hydraulic fracturing; causes and solutions to low well productivity.

PETE 603 Advanced Reservoir Engineering I  
Credits 3. 3 Lecture Hours.  
Petroleum reservoir simulation basics including solution techniques for explicit problems.

PETE 604 Advanced Reservoir Engineering II  
Credits 3. 3 Lecture Hours.  
Advanced petroleum reservoir simulation with generalized methods of solution for implicit problems.  
Prerequisite: PETE 603.
PETE 605 Phase Behavior of Petroleum Reservoir Fluids
Credits 3. 3 Lecture Hours.
Pressure, volume, temperature, composition relationships of petroleum reservoir fluids.

PETE 606 EOR Methods--Thermal
Credits 3. 3 Lecture Hours.
Fundamentals of enhanced oil recovery (EOR) methods and applications of thermal recovery methods.
Prerequisite: PETE 323.

PETE 608 Well Logging Methods
Credits 3. 3 Lecture Hours.
Well logging methods for determining nature and fluid content of formations penetrated by drilling. Development of computer models for log analysis.

PETE 609 Enhanced Oil Recovery Processes
Credits 3. 3 Lecture Hours.
Fundamentals and theory of enhanced oil recovery; polymer flooding, surfactant flooding, miscible gas flooding and steam flooding; application of fractional flow theory; strategies and displacement performance calculations.
Prerequisite: PETE 323.

PETE 611 Application of Petroleum Reservoir Simulation
Credits 3. 3 Lecture Hours.
Use of simulators to solve reservoir engineering problems too complex for classical analytical techniques.
Prerequisites: PETE 400 and PETE 401.

PETE 612 Unconventional Oil and Gas Reservoirs
Credits 3. 3 Lecture Hours.
As conventional oil and gas resources are depleted, unconventional resources, including heavy oil and gas from low-permeability sandstones, fractured shales, coal bed, and hydrates, will assume greater roles in meeting USA and world energy demands; this course emphasizes resources, geologic and geographic occurrences, recovery technology and economics of unconventional hydrocarbon resources.
Prerequisite: Graduate classification in petroleum engineering, geology or geophysics.

PETE 613 Natural Gas Engineering
Credits 3. 3 Lecture Hours.
Flow of natural gas in reservoirs and in wellbores and gathering systems; deliverability testing; production forecasting and decline curves; flow measurement and compressor sizing.
Prerequisites: PETE 323 and PETE 324.

PETE 616 Engineering Near-Critical Reservoirs
Credits 3. 3 Lecture Hours.
Identification of reservoir fluid type; calculation of original gas in place, original oil in place, reserves and future performance of retrograde gas and volatile oil reservoirs.
Prerequisites: PETE 323, PETE 400, PETE 401.

PETE 617 Petroleum Reservoir Management
Credits 3. 3 Lecture Hours.
The principles of reservoir management and application to specific reservoirs based on case studies presented in the petroleum literature.

PETE 618 Modern Petroleum Production
Credits 3. 3 Lecture Hours.
An advanced treatment of modern petroleum production engineering encompassing well deliverability from vertical, horizontal and multilateral/multibranch wells; diagnosis of well performance includes elements of well testing and production logging; in this course the function of the production engineer is envisioned in the context of well design, stimulation and artificial lift.

PETE 619 Naturally Fractured Reservoirs
Credits 3. 3 Lecture Hours.
Explore all relevant subject matter in naturally fractured reservoirs; naturally fractured reservoirs are commonplace throughout the world, however there is a general lack of understanding of such reservoirs; provides the background for all relevant topics such as characterization, fluid flow, simulation and enhanced oil recovery.
Prerequisite: Approval of instructor.

PETE 620 Fluid Flow in Petroleum Reservoirs
Credits 3. 3 Lecture Hours.
Analysis of fluid flow in bounded and unbounded reservoirs, wellbore storage, phase redistribution, finite and infinite conductivity fractures; dual-porosity systems.
Prerequisite: PETE 323.

PETE 621 Petroleum Development Strategy
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Applications of the variables, models and decision criteria used in modern petroleum development; case approach used to study major projects such as offshore development and assisted recovery. Both commercial and student-prepared computer software used during the lab sessions to practice methods.

PETE 622 Exploration and Production Evaluation
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Selected topics in oil industry economic evaluation including offshore bidding, project ranking and selection, capital budgeting, long-term oil and gas field development projects and incremental analysis for assisted recovery and acceleration.

PETE 623 Waterflooding
Credits 3. 3 Lecture Hours.
Design, surveillance and project management of waterfloods in reservoirs.
Prerequisite: PETE 323.

PETE 624 Rock Mechanic Aspects of Petroleum Reservoir Response
Credits 3. 3 Lecture Hours.
Reservoir rocks and their physical behavior; porous media and fracture flow models; influence of rock deformability, stress, fluid pressure and temperature.
Prerequisite: PETE 604.

PETE 625 Well Control
Credits 3. 3 Lecture Hours.
Theory of pressure control in drilling operations and during well kicks; abnormal pressure detection and fracture gradient determination; casing setting depth selection and advanced casing design; theory supplemented on well control simulators.
Prerequisites: PETE 411.

PETE 626 Offshore Drilling
Credits 3. 3 Lecture Hours.
Offshore drilling from fixed and floating drilling structures; directional drilling including horizontal drilling; theory of deviation monitoring and control.
Prerequisite: PETE 411.
PETE 627 Well Completion and Workover
Credits 3.3 Lecture Hours.
Development of design options, systems and procedures to meet deliverability, safety and integrity requirements for completions and workover equipment; overview of methods in the oil and gas industry; function and design criteria of well components.
Prerequisite: Graduate classification.

PETE 628 Horizontal Drilling
Credits 3.3 Lecture Hours.
Changing a wellbore from vertical to horizontal; long- and short-radius horizontal wells; bottomhole assemblies for achieving and maintaining control of inclination and direction; drilling fluids; torque and drag calculations; transport of drilled solids.
Prerequisite: PETE 411.

PETE 629 Advanced Hydraulic Fracturing
Credits 3.3 Lecture Hours.
Physical principles and engineering methods involved in hydraulic fracturing; an advanced treatise integrating the necessary fundamentals from elasticity theory, fracture mechanics and fluid mechanics to understand designs, optimization and evaluate hydraulic fracturing treatments including special topics such as high permeability fracturing and deviated well fracturing.

PETE 630 Geostatistics
Credits 3.3 Lecture Hours.
Introductory and advanced concepts in geostatistics for petroleum reservoir characterization by integrating static (cores/logs/seismic traces) and dynamic (flow/transport) data; variograms and spatial correlations; regionalized variables; intrinsic random functions; kriging/cokriging; conditional simulation; non-Gaussian approaches.
Prerequisite: Introductory course in statistics or PETE 322.

PETE 631 Petroleum Reservoir Description
Credits 3.3 Lecture Hours.
Engineering and geological evaluation techniques to define the extent and internal character of a petroleum reservoir; estimate depositional environment(s) during the formation of the sedimentary section and resulting effects on reservoir character.
Prerequisites: PETE 324 and PETE 620.

PETE 632 Physical and Engineering Properties of Rock
Credits 4.3 Lecture Hours. 3 Lab Hours.
Physical and engineering properties of rock and rock masses including strength, deformation, fluid flow, thermal and electrical properties as a function of the subsurface temperature, in-situ stress, pore fluid pressure and chemical environment; relationship of rock properties to logging, sitting and design of wells and structures in rock.

PETE 633 Data Integration for Petroleum Reservoirs
Credits 3.3 Lecture Hours.
Introduction and application of techniques that can be used to incorporate dynamic reservoir behavior into stochastic reservoir characterizations; dynamic data in the form of pressure transient tests, tracer tests, multiphase production histories or interpreted 4-D seismic information.
Prerequisites: PETE 620; STAT 601.

PETE 635 Underbalanced and Managed Pressure Drilling
Credits 3.3 Lecture Hours.
This course provides an introduction and application of techniques utilized in underbalanced and managed pressure drilling; includes equipment, types of drilling fluids used (air, mist foam, etc.), flow drilling, mud cap drilling and hydraulics calculations.
Prerequisite: Graduate classification.

PETE 636 Horizontal, Multilateral and Intelligent Wells
Credits 3.3 Lecture Hours.
Advanced well architectures, primarily horizontal, multilateral and intelligent wells, all aspects of these types of wells, including well completions, reservoir flow, and wellbore flow conditions, and well deliverability; optimization of well design and field applications will be demonstrated with field cases.
Prerequisites: PETE 662; graduate classification.

PETE 637 Streamline Simulation
Credits 3.3 Lecture Hours.
Introductory and advanced concepts in streamline simulation and its applications; theory of streamlines/streamtubes in multidimensions; topics include: streamline, streamtubes, streamfunctions, transport along streamlines, spatial discretization and material balance, time stepping and transverse fluxes, impact of cell geometry, history matching and production data integration, comparison with finite difference.
Prerequisite: Graduate classification.

PETE 638 Production Logging
Credits 3.3 Lecture Hours.
Well logging methods concerned with problem well diagnosis and reservoir surveillance; includes fluid flow in pipes, understanding fluid dynamics in a wellbore, theoretical basis of production logging techniques, production log interpretation techniques, and operational considerations.
Prerequisite: Graduate classification.

PETE 639 High Performance Drilling Design and Operational Practices
Credits 3.3 Lecture Hours.
Achieving differentiating drilling performance in most complex wells; includes physics of each type of performance limiter, real time operational practices, engineering redesign practices, and effective workflows to achieve the required change in engineering and operational practices.
Prerequisites: Graduate classification, PETE 355 or PETE 661 or approval of instructor.

PETE 640 Models for Simulation of Flow and Transport of Fluids and Heat in Porous Media
Credits 4.3 Lecture Hours. 3 Lab Hours.
Design and develop numerical simulators that describe flow of reservoir fluids and transport of heat through porous media; develop multi-dimensional models capable of handling single mass components (gas, oil or water) in single phases (liquid or vapor).
Prerequisites: PETE 603 or approval of instructor; experience in FORTRAN or another programming language; solid understanding of physical processes of flow and transport through porous media, numerical analysis and linear algebra; graduate classification.

PETE 641 Models for Simulation of Advanced Coupled Processes in Geologic Media
Credits 4.3 Lecture Hours. 3 Lab Hours.
Design and develop advanced multi-phase flow processes and complex geologic media (porous and fractured, with matrix-fracture interactions); structured and unstructured grids, multiple mass components (gas, oil and water) in multi-phase states (liquid, vapor and/or liquid-vapor), and phase changes.
Prerequisites: PETE 640 and graduate classification; experience in FORTRAN95, C, C++ or another programming language; solid understanding of physical processes of flow and transport through porous media, numerical analysis and linear algebra.
PETE 642 Formation Damage: Mechanisms and Remediation
Credits 3.3 Lecture Hours.
Identification and development of solutions for mechanisms of formation damage that can occur during drilling, completion, and following chemical treatments; includes interaction of cleaning fluids with the formation brines, rock and oil.
Prerequisites: Graduate classification.

PETE 643 Oil Field Chemistry
Credits 3.3 Lecture Hours.
The role of chemistry in well stimulation, water shut-off treatments, scale removal, mitigation, downhole corrosion issues, organic deposition, dewatering, drilling fluids and various aspects of formation damage; includes problem identification as the first step in designing chemical treatment to remove formation damage.
Prerequisites: Graduate classification.

PETE 644 CO2 Capture and Uses: Sequestration, Enhanced Oil Recovery (EOR)
Credits 3.3 Lecture Hours.
Understanding the need and potential of CO2 captures and uses, including sequestration and Enhanced Oil Recovery (CCS-EOR), the scientific, technological and economic aspects of identifying and implementing a CCS-EOR; overview of safety, environmental and legal aspects.
Prerequisites: Graduate classification.

PETE 645 Upscaling of Geologic Models for Flow Simulation
Credits 3.3 Lecture Hours.
In-depth understanding of current approaches to upscaling of 3D geologic models for reservoir flow simulation; includes development of upscaling solvers.
Prerequisites: Graduate classification.

PETE 646 Reservoir Characterization and Forecasting
Credits 3.3 Lecture Hours.
Emphasis on geostatistical estimation/simulation and advanced mathematical inversion methods; integration of three important aspects of reservoir development and management: i) stochastic reservoir description, ii) reservoir model updating; and iii) model-predictive reservoir control and management.
Prerequisites: Graduate classification; basic familiarity with linear algebra, probability, statistics, differential and integral calculus and general reservoir engineering.

PETE 648 Pressure Transient Testing
Credits 3.3 Lecture Hours.
Diffusivity equation and solutions for slightly compressible liquids; dimensionless variables; type curves; applications of solutions to buildup, drawdown, multi-rate, interference, pulse and deliverability tests; extensions to multiphase flow; analysis of hydraulically fractured wells.
Prerequisites: PETE 324 and PETE 620.

PETE 650 Advanced Drilling Engineering
Credits 3.3 Lecture Hours.
Underbalanced drilling techniques, offshore drilling; horizontal, extended reach and multilateral drilling and fishing operations; geothermal drilling and high pressure, high temperature drilling.
Prerequisite: Graduate classification; PETE 405 or equivalent basic drilling engineering.

PETE 656 Advanced Numerical Methods for Reservoir Simulation
Credits 3.3 Lecture Hours.
Numerical simulation of flow in porous media based on numerical methods for partial differential equations; supplemented by published papers and research topics; development of a reservoir simulator.
Prerequisites: Graduate classification; basic reservoir simulation or equivalent course; linear algebra and matrix computations or equivalent course; advanced calculus or equivalent course; programming experience.

PETE 657/CSCE 657 High Performance Computing for Earth Science and Petroleum Engineering
Credits 3.3 Lecture Hours.
Numerical simulation of problems in Earth Sciences and Petroleum Engineering using high performance computing (HPC); development of a parallel reservoir simulator.
Prerequisite: Graduate classification.
Cross Listing: CSCE 657/PETE 657.

PETE 658 Energy and Sustainability
Credits 3.3 Lecture Hours.
Overview of energy resources and use with emphasis on long-term sustainability; considers fossil, nuclear, and alternative energy sources, electricity and transportation, energy conversions, energy efficiency, energy security, energy policy, and environmental impact.
Prerequisite: Graduate classification.

PETE 661 Drilling Engineering
Credits 3.3 Lecture Hours.
Introduction to drilling systems: wellbore hydraulics; identification and solution of drilling problems; well cementing; drilling of directional and horizontal wells; wellbore surveying abnormal pore pressure, fracture gradients, well control; offshore drilling, underbalanced drilling.

PETE 662 Production Engineering
Credits 3.3 Lecture Hours.
Development of fundamental skills for the design and evaluation of well completions, monitoring and management of the producing well, selection and design of article lift methods, modeling and design of surface facilities.

PETE 663 Formation Evaluation and the Analysis of Reservoir Performance
Credits 3.3 Lecture Hours.
Current methodologies used in geological description-analysis, formation evaluation (the analysis/interpretation of well log data), and the analysis of well performance data (the design/analysis/interpretation of well test and production data); specifically, the assessment of field performance data and the optimization of hydrocarbon recovery by analysis/interpretation/ integration of geologic, well log, and well performance data.
Prerequisite: Approval of instructor or graduate classification.

PETE 664 Petroleum Project Evaluation and Management
Credits 3.3 Lecture Hours.
Introduction to oil industry economics, including reserves estimation and classification-, building and using reservoir models, developing and using reservoir management processes, managing new and mature fields, and investment ranking and selections.

PETE 665 Petroleum Reservoir Engineering
Credits 3.3 Lecture Hours.
Reservoir description techniques using petrophysical and fluid properties; engineering methods to determine fluids in place, identify production-drive mechanisms, and forecast reservoir performance; implementation of pressure-maintenance schemes and secondary recovery.
Prerequisite: Approval of instructor or graduate classification.
PETE 667 Petroleum Engineering Reserves and Evaluation  
Credits 3. 3 Lecture Hours.  
Estimation and valuation of hydrocarbon reserves and resources, with emphasis on probabilistic methods, technically challenging reservoirs, and unconventional resources.  
Prerequisite: PETE 664, approval of instructor.

PETE 681 Seminar  
Credit 1. 1 Lecture Hour.  
Study and presentation of papers on recent developments in petroleum technology.

PETE 684 Professional Internship  
Credits 1 to 4. 1 to 4 Other Hours.  
Training under the supervision of practicing professional engineers in settings appropriate to the student's professional objectives. May be taken four times for credit.  
Prerequisite: Graduate classification and one semester of graduate work completed.

PETE 685 Directed Studies  
Credits 1 to 12. 1 to 12 Other Hours.  
Students undertake and complete limited investigations not within their thesis research and not covered in established curricula.  
Prerequisites: Graduate classification; approval of instructor.

PETE 689 Special Topics in...  
Credits 1 to 4. 1 to 4 Lecture Hours.  
Special topics in an identified area of petroleum engineering. May be repeated for credit.

PETE 691 Research  
Credits 1 to 23. 1 to 23 Other Hours.  
Advanced work on some special problem within field of petroleum engineering. Thesis course.

PETE 692 Professional Study  
Credits 1 to 12. 1 to 12 Other Hours.  
Approved professional study or project. May be taken more than once but not to exceed 6 hours of credit towards a degree.

PHIL - Philosophy

Courses

PHIL 111 Contemporary Moral Issues  
Credits 3. 3 Lecture Hours.  
(PHIL 2306) Contemporary Moral Issues. Representative ethical positions and their application to contemporary social problems.

PHIL 205 Technology and Human Values  
Credits 3. 3 Lecture Hours.  
Interaction of personal and societal values with technology and man's self-image, the future and value change.

PHIL 208 Philosophy of Education  
Credits 3. 3 Lecture Hours.  
Basic social ideas and concepts of human nature in Western civilization; their implications for theories of education.

PHIL 240 Introduction to Logic  
Credits 3. 3 Lecture Hours.  
(PHIL 2303) Introduction to Logic. Introduction to formal methods of deductive and inductive logic including, but not limited to, truth-tables, formal deduction and probability theory.

PHIL 251 Introduction to Philosophy  
Credits 3. 3 Lecture Hours.  
(PHIL 1301) Introduction to Philosophy. Perennial problems of philosophy such as the existence of God, the mind/body relationship, the limits of knowledge, the foundations of moral judgment, man and the state.

PHIL 252/AFST 252 Introduction to Hip-Hop Philosophy  
Credits 3. 3 Lecture Hours.  
Introduction to philosophy by way of the major themes and subjects of Hip-Hop: critical advocacy of various philosophical ideals.  
Cross Listing: AFST 252/PHIL 252.

PHIL 283 Latin American Philosophy  
Credits 3. 3 Lecture Hours.  
Major philosophers in the history of Latin American philosophy, such as Unamuno, Ortega y Gasset, Vasconcelos, Caso and Gutiérrez.

PHIL 285 Directed Studies  
Credits 0 to 4. 0 to 4 Other Hours.  
Directed studies in specific problem areas of philosophy.  
Prerequisite: Approval of department head.

PHIL 289 Special Topics in...  
Credits 1 to 4. 1 to 4 Lecture Hours.  
Selected topics in an identified area of philosophy. May be repeated for credit.  
Prerequisite: Approval of instructor.

PHIL 291 Research  
Credits 3. 3 Other Hours.  
Research conducted under the direction of faculty member in the department of philosophy and humanities. May be repeated for credit.  
Prerequisites: Freshman or sophomore classification and approval of department head.

PHIL 305 Philosophy of the Natural Sciences  
Credits 3. 3 Lecture Hours.  
Critical analysis of scientific methods and achievements; the nature and types of explanation, discovery and confirmation, models and theories.  
Prerequisite: 3 hours of philosophy other than PHIL 240.

PHIL 307 Philosophy of the Social Sciences  
Credits 3. 3 Lecture Hours.  
Nature and objectivity of the social sciences, their paradigms and patterns of explanation.  
Prerequisite: 3 hours of philosophy other than PHIL 240.

PHIL 314 Environmental Ethics  
Credits 3. 3 Lecture Hours.  
Moral basis of duties to preserve or protect plants, animals and environmental systems; foundations of environmental law and policy; the idea of nature in philosophy; critique of social and economic analyses of environmental values.  
Prerequisite: Sophomore classification or approval of instructor.

PHIL 315 Military Ethics  
Credits 3. 3 Lecture Hours.  
Major ethical issues in modern military practice: ethics of leadership, just war theory, killing of the innocent and the moral status of the rules of war.

PHIL 320 Philosophy of Mind  
Credits 3. 3 Lecture Hours.  
Relation of mind to body, nature of thought and knowing, the free will problem, death and immortality.  
Prerequisite: 3 hours of philosophy other than PHIL 240.
PHIL 330 Philosophy of Art
Credits 3. 3 Lecture Hours.
Theories of artistic creation and aesthetic response as exemplified in art forms such as painting, music, poetry, architecture, dance, theater, sculpture and motion pictures.

PHIL 331/RELS 331 Philosophy of Religion
Credits 3. 3 Lecture Hours.
Philosophical problems of Western religion such as the existence of God, the problem of evil, types of theism, rational, empirical and mystical approaches to God.
Cross Listing: RELS 331/PHIL 331.

PHIL 332 Social and Political Philosophy
Credits 3. 3 Lecture Hours.
Metaphysical commitments and political theory, the nature and proper ends of the state, freedom, equality, authority, and justice, considering such writers as Plato, Aristotle, Machiavelli, Locke, Rousseau, Marx, Dewey.
Prerequisite: 3 hours of philosophy other than PHIL 240.

PHIL 334 Philosophy of Law
Credits 3. 3 Lecture Hours.
Traditional legal issues such as definitions of law, relationship between law and morality, and punishment considered from a legal perspective.
Prerequisite: Junior or senior classification.

PHIL 341 Symbolic Logic
Credits 3. 3 Lecture Hours.
Elementary symbolic logic beginning with propositional calculus and first order predicate logic, and their applications.
Prerequisite: PHIL 240.

PHIL 342 Symbolic Logic II
Credits 3. 3 Lecture Hours.
Advanced topics in logic such as the theory of identity, higher order logics, logic of sets, elements of modal logic.
Prerequisite: PHIL 240 or PHIL 341, or approval of instructor.

PHIL 351 Theory of Knowledge
Credits 3. 3 Lecture Hours.
Major topics in epistemology such as the problem of induction, perception theory, memory and the problem of other minds.
Prerequisites: 3 hours of philosophy.

PHIL 352/AFST 352 Africana Philosophy
Credits 3. 3 Lecture Hours.
Presentation of the seminal ideas of several influential Africana thinkers; recovery of the neglected traditions in which these thinkers locate themselves. May be taken three times for credit.
Prerequisite: Junior or senior classification or approval of instructor.

PHIL 353/AFST 353 Radical Black Philosophies of Race and Racism
Credits 3. 3 Lecture Hours.
Critical evaluation of white supremacy, colonialism, and the modern construction of race; examination of the historical background for contemporary theories of race.
Prerequisite: Junior or senior classification or approval of instructor.
Cross Listing: AFST 352/PHIL 353.

PHIL 361 Metaphysics
Credits 3. 3 Lecture Hours.
Topics concerning the fundamental nature of reality such as what exists, the mental and the physical, universals and individuals, space and time, God.
Prerequisites: PHIL 240 and 3 hours of philosophy.

PHIL 371 Philosophy of Literature
Credits 3. 3 Lecture Hours.
Philosophical analysis of the major recurrent themes in world literature including fate, the meaning of tragedy, death, odyssey, good and evil, time and eternity, hope and salvation; works selected from a variety of cultures and historical periods.

PHIL 375 Philosophy of the Visual Media
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Aesthetic, ethical and epistemological issues of photography, cinema and video.

PHIL 376/FILM 376 Philosophy, Film and Evil
Credits 3. 3 Lecture Hours.
Application of philosophical methods and analyses to the medium of film; survey of various depictions and treatments of evil within the genre of science fiction; investigation of depictions and treatments of evil arising from consideration of human encounters with alien others.
Prerequisite: Junior or senior classification.
Cross Listing: FILM 376/PHIL 376.

PHIL 381 Ethical Theory
Credits 3. 3 Lecture Hours.
Values and conduct such as moral relativism, self-interest, utilitarianism, rules, nature of valuation, ethical language and argumentation.
Prerequisite: 3 hours of Philosophy other than PHIL 240.

PHIL 409/WGST 409 Studies in Gender and Philosophy
Credits 3. 3 Lecture Hours.
Analysis, from a gender-studies perspective, of a single figure or concept in the history of philosophy. May be repeated 1 time for credit with a different focus.
Prerequisites: 3 hours in philosophy and women's and gender studies; junior or senior classification.
Cross Listing: WGST 409/PHIL 409.

PHIL 410 Classical Philosophy
Credits 3. 3 Lecture Hours.
Major philosophers from 600 B.C. to the end of the third century A.D. including the Pre-Socratics, Socrates, Plato, Aristotle, Hellenistic and Roman philosophy and the Neo-Platonists.

PHIL 411 Medieval Philosophy
Credits 3. 3 Lecture Hours.
Major philosophers from the early Christian centuries through the 14th century, emphasizing such writers as Augustine, Aquinas, Duns Scotus and William of Ockham.

PHIL 412 Seventeenth-Century Philosophy
Credits 3. 3 Lecture Hours.
Significant seventeenth-century texts in metaphysics, epistemology, moral psychology, and political philosophy; authors such as Descartes, Hobbes, Spinoza, Leibniz, and Locke.
Prerequisite: Junior or senior classification or approval of instructor.

PHIL 413 Eighteenth-Century Philosophy
Credits 3. 3 Lecture Hours.
Significant eighteenth-century texts from philosophers such as Berkeley, Rousseau, Hume, and Kant.

PHIL 414 Nineteenth Century Philosophy
Credits 3. 3 Lecture Hours.
Contributions of such philosophers as Hegel, Marx, Kierkegaard, Nietzsche, Husserl, Mill and Bradley.
Prerequisite: 3 hours of philosophy.
PHIL 415 American Philosophy  
Credits 3.3 Lecture Hours.  
The thought of philosophers such as Peirce, James, Royce, Santayana, Mead, Dewey and Whitehead.  
Prerequisite: 3 hours of philosophy other than PHIL 240.

PHIL 416 Recent British and American Philosophy  
Credits 3.3 Lecture Hours.  
Major philosophers in contemporary Anglo-American thought such as Moore, Russell, Wittgenstein, Ayer, Quine, Austin and Ryle.  
Prerequisites: PHIL 240.

PHIL 417 Phenomenology  
Credits 3.3 Lecture Hours.  
Phenomenology from its nineteenth-century origins to the present; authors such as Brentano, Husserl, Scheler, Heidegger, Merleau-Ponty, Levinas, Henry, Marion.  
Prerequisites: Junior or senior classification.

PHIL 418 Existentialism  
Credits 3.3 Lecture Hours.  
Existentialism from its nineteenth-century origins to the present; philosophers such as Kierkegaard, Nietzsche, Buber, Rosenzweig, Sartre, de Beauvoir, and Camus.  
Prerequisite: PHIL 412 or 413; junior or senior classification or approval of instructor.

PHIL 419 Current Continental Philosophy  
Credits 3.3 Lecture Hours.  
Major thinkers concerned with "postmodern" topics in hermeneutics, poststructuralism, critical theory, deconstructionism, contemporary Marxist strategies, semiotics and feminist theory.  
Prerequisite: Junior classification or approval of instructor.

PHIL 424 Philosophy of Language  
Credits 3.3 Lecture Hours.  
The nature of language; the various uses of language and their philosophical import; the nature of meaning, truth, reference and issues surrounding formal representations of natural languages.  
Prerequisite: Junior classification or approval of instructor. Prerequisite: PHIL 240 and 3 additional hours of philosophy; junior or senior classification or approval of instructor.

PHIL 464/RELS 464 Modern Jewish Thought and Philosophy  
Credits 3.3 Lecture Hours.  
An overview of modern Jewish thought and philosophy spanning Jewish European thinkers from the 18th century to the 20th century.  
Prerequisite: Junior or senior classification.  
Cross Listing: RELS 464/PHIL 464.

PHIL 480 Medical Ethics  
Credits 3.3 Lecture Hours.  
Critical analysis of major ethical issues in medicine including truth telling, confidentiality, paternalism, genetics, abortion, infanticide, euthanasia and social justice in health care.

PHIL 482/ENGR 482 Ethics and Engineering  
Credits 3.2 Lecture Hours. 2 Lab Hours.  
Development of techniques of moral analysis and their application to ethical problems encountered by engineers, such as professional employee rights and whistle blowing; environmental issues; ethical aspects of safety, risk and liability; conflicts of interest; emphasis on developing the capacity for independent ethical analysis of real and hypothetical cases.  
Prerequisite: Junior classification.  
Cross Listing: ENGR 482/PHIL 482.

PHIL 484 Professional Internship  
Credits 0 to 6.0 to 6 Other Hours.  
Practical experience in an institutional or organizational setting appropriate to analysis and understanding of issues in some area of applied philosophy.  
Prerequisite: Approval of instructor and department head.

PHIL 485 Directed Studies  
Credits 0 to 6.0 to 6 Other Hours.  
Directed studies in specific problem areas of philosophy.  
Prerequisite: Approval of department head.

PHIL 489 Special Topics in...  
Credits 1 to 4.1 to 4 Lecture Hours.  
Selected topics in an identified area of philosophy. May be repeated for credit.

PHIL 491 Research  
Credits 3.3 Other Hours.  
Research conducted under the direction of faculty member in the department of philosophy and humanities. May be repeated for credit.  
Prerequisites: Junior or senior classification and approval of department head.

PHIL 497 Independent Honors Studies  
Credits 1 to 3.1 to 3 Other Hours.  
Directed independent studies in specific philosophical problems.  
Prerequisites: Junior or senior classification either as Honors students or with overall GPR of 3.25; letter of approval from head of student's major department.

PHIL 611 Ancient Philosophy  
Credits 3.3 Lecture Hours.  
Greek and Roman philosophy from 600 B.C. to 300 A.D.; emphasis on Plato and Aristotle.  
Prerequisite: Approval of instructor.

PHIL 616 Modern Philosophy  
Credits 3.3 Lecture Hours.  
Developments in philosophy from the Renaissance through the Enlightenment: Renaissance humanism and natural science, 17th- and 18th-century empiricism and rationalism, idealism; major thinkers including Descartes, Hume, Kant, Hegel.  
Prerequisite: Approval of instructor.

PHIL 620 Contemporary Philosophy  
Credits 3.3 Lecture Hours.  
19th- and 20th-century philosophical movements: phenomenology, existentialism, positivism, pragmatism, analysis, process thought. May be repeated for credit as content varies.  
Prerequisite: Approval of instructor.

PHIL 623 American Philosophy  
Credits 3.3 Lecture Hours.  
The genesis of American philosophical thought from the seventeenth century until the work of Emerson; subsequent concentration on the philosophies of Pierce, James, Royce, Dewey, Mead, Santayana and Whitehead.  
Prerequisite: Approval of instructor.

PHIL 624 Latin American Philosophy  
Credits 3.3 Lecture Hours.  
Reading and examination of the philosophical writings of some of the most important Latino/as (or Hispanic) contributors to the history of philosophy.
PHIL 630 Aesthetics
Credits 3.3 Lecture Hours.
Metaphor, the ontology of artworks, art and artifactuality, aesthetic attitudes, concepts of aesthetic appraisal such as beauty and sublimity and theory of tropes.
Prerequisite: Approval of instructor.
PHIL 631 Philosophy of Religion
Credits 3.3 Lecture Hours.
Investigation of metaphysical and epistemological issues concerning religious claims, beliefs and experiences.
Prerequisite: Approval of instructor.
PHIL 632 Social and Political Philosophy
Credits 3.3 Lecture Hours.
Theories of justice, equality, liberty and authority in social and political institutions; individualism and the social contract; political philosophy of writers such as Plato, Aristotle, Machiavelli, Locke, Rousseau, Marx, Dewey and Rawls.
Prerequisite: Approval of instructor.
PHIL 635 Ethical Theory
Credits 3.3 Lecture Hours.
Theories of moral value and conduct, moral language and argumentation; consequentialist and deontological approaches to ethics; ethical naturalism; theories of virtue.
Prerequisite: Approval of instructor.
PHIL 640 Epistemology
Credits 3.3 Lecture Hours.
Nature and origin of knowledge, skepticism, belief, truth, rationality, justification and reliability and knowledge of necessary truths.
Prerequisite: Approval of instructor.
PHIL 641 Mathematical Logic I
Credits 3.3 Lecture Hours.
The metatheory of propositional and first-order logic.
Prerequisite: Graduate classification or approval of instructor.
PHIL 642 Mathematical Logic II
Credits 3.3 Lecture Hours.
Continuation of PHIL 641: Compactness, The Lowenheim-Skolem Theorems, computability theory and Church's thesis, formal arithmetic, Godel's Incompleteness Theorems, Tarski's Theorem, and Church's Theorem. Other topics covered in the course might include systems of modal logic, intuitionistic logic, and more advanced issues in set theory.
Prerequisite: 641 or approval of instructor.
PHIL 643 History and Philosophy of Logic
Credits 3.3 Lecture Hours.
Selected topics on the historical development of logic; philosophical views of the nature of logical theory; the role of logical metatheory in the development of logic. May be repeated for credit as content varies.
Prerequisite: PHIL 341 or 641 or approval of instructor.
PHIL 645 Philosophy of Science
Credits 3.3 Lecture Hours.
Philosophy of the natural and social sciences, including the nature of theories and laws, the notion of causation, probability and determinism and the nature of theoretical change.
Prerequisite: Approval of instructor.
PHIL 646 Philosophy of a Particular Science
Credits 3.3 Lecture Hours.
Focus on methodological, epistemological and ontological issues in physics, or one of the special sciences, such as biology, psychology, cognitive science, economics. Application of philosophical methods to theoretical issues in the particular science. Relationships between theories and explanations of the particular science more basic sciences or other special sciences. May be repeated for credit for courses focusing on different sciences.
Prerequisite: Approval of instructor.
PHIL 650 Metaphysics
Credits 3.3 Lecture Hours.
Classical and contemporary treatments of the nature of reality, God, the existence of universals, space, time, causality; realism and antirealism, the existence and nature of abstract entities, the nature of events, the nature and logic of time and modality, freedom and determinism, and personal identity.
Prerequisite: Approval of instructor.
PHIL 655 Philosophy of Mind
Credits 3.3 Lecture Hours.
The mind-body problem, personal identity, thought and intentionality, action and responsibility; materialism, behaviorism, functionalism. May be repeated for credit as content varies.
Prerequisite: Approval of instructor.
PHIL 658 Philosophy of Language
Credits 3.3 Lecture Hours.
The nature of language, the various uses of language and their philosophical import, the nature of meaning, truth, reference and issues surrounding formal representations of natural languages. May be repeated for credit as content varies.
Prerequisite: Approval of instructor.
PHIL 661 Seminar in the History of Philosophy
Credits 3.3 Lecture Hours.
Intensive study of a current issue in the history of philosophy. May be repeated for credit with variation in topic.
Prerequisite: Approval of instructor.
PHIL 662 Seminar in Ethics and Value Theory
Credits 3.3 Lecture Hours.
Intensive study of current issue in ethics, ethical theory, applied ethics, aesthetics, or the work of particular philosophers in one of these areas. May be repeated for credit with variation in topic.
Prerequisite: Approval of instructor.
PHIL 663 Seminar in Metaphysics and Epistemology
Credits 3.3 Lecture Hours.
Seminar in Metaphysics or Epistemology. Intensive study of a current issue in metaphysics, epistemology, or other core areas of philosophy. May be repeated for credit with variation in topic.
Prerequisite: Approval of instructor.
PHIL 664 Seminar in Applied Philosophy
Credits 3.3 Lecture Hours.
Intensive study of a topic involving the application of philosophical concepts and theories to an issue arising in another scientific or academic field. May be repeated for credit with variation to topic.
Prerequisite: Approval of instructor.
PHIL 682 Philosophical Authors
Credits: 3. 3 Lecture Hours.
Intensive study of works of an individual important philosopher, their historical context, and criticisms and interpretations of them. May be repeated for credit with different authors.
Prerequisites: Appropriate background in history of philosophy and approval of instructor.

PHIL 683 Philosophical Pedagogy
Credit: 1. 1 Lecture Hour.
Teaching practicum for PhD students in philosophy; detailed examination of all aspects of teaching philosophy to university- and college-level students.
Prerequisite: Enrollment in PhD program in Philosophy or approval of instructor.

PHIL 684 Professional Internship
Credits: 1 to 6. 1 to 6 Other Hours.
Practical experience in an institutional or organizational setting appropriate to analysis and understanding of issues in some area of applied philosophy.
Prerequisite: Approval of committee chair and department head.

PHIL 685 Directed Studies
Credits: 1 to 6. 1 to 6 Other Hours.
Directed studies in specific problem areas in philosophy.

PHIL 689 Special Topics in...
Credits: 1 to 4. 1 to 4 Lecture Hours.
Selected topics in an identified area of philosophy. May be repeated for credit.
Prerequisite: Approval of instructor.

PHIL 691 Research
Credits: 1 to 15. 1 to 15 Other Hours.
Research for thesis.
Prerequisites: Approval of department head and committee chair.

PHLT - Public Health

Courses

PHLT 301 Orientation to Public Health
Credit: 1. 1 Lecture Hour.
Familiarization with public health including aspects such as different disciplines within the profession; local, national and international agencies that have interest in public health and public health code of ethics.
Prerequisites: Public health major; junior or senior classification; approval of instructor.

PHLT 302 Foundations of Public Health
Credits: 3. 3 Lecture Hours.
History, philosophy, development and careers of public health; core values, ethics, concepts, functions and essential services of public health; population health and health improvement.
Prerequisites: Public health major; junior or senior classification; or approval of instructor.

PHLT 303 Social Context of Population Health
Credits: 3. 3 Lecture Hours.
Exploration of social determinants of population health and the sociocultural roots of health improvement; socio-economic, behavioral and other factors that impact human health and contribute to health improvement and health disparities.
Prerequisites: Public health major; junior or senior classification; or approval of instructor.

PHLT 304 Biological Basis of Public Health
Credits: 3. 3 Lecture Hours.
Biological mechanisms in individuals and populations affecting human health and disease; adverse health events including diseases, exposure to pathogens and toxins, and nutritional deficiencies.
Prerequisites: Public health major; junior or senior classification; or approval of instructor.

PHLT 305 Epidemiology in Public Health
Credits: 3. 3 Lecture Hours.
Principles of epidemiology, a systematic approach to collecting and evaluating information on distributions of health outcomes in populations; history of epidemiology, descriptive epidemiology, epidemiologic methods, association and causation, evidence-based public health and applications.
Prerequisites: Public health major; junior or senior classification; or approval of instructor.

PHLT 306 Border Health
Credits: 3. 3 Lecture Hours.
United States-Mexico border public health system; includes issues important to public health at the border; addresses health challenges.
Prerequisite: Public health major; junior or senior classification; or approval of instructor.

PHLT 307 Public Health in the Global Context
Credits: 3. 3 Lecture Hours.
Frameworks for understanding population health on a global scale; physical, social, cultural, geographic, political and economic interactions and interdependencies that influence global population health status.
Prerequisite: Public health major; junior or senior classification; or approval of instructor.

PHLT 308 Comparative Global Health Systems
Credits: 3. 3 Lecture Hours.
Public health issues from population health and comparative perspectives at the global level; exploration of different public health systems in developing and developed countries.
Prerequisites: Public health major; junior or senior classification; or approval of instructor.

PHLT 309 Population Health Promotion
Credits: 3. 3 Lecture Hours.
Major issues in population health promotion, including applying the concept of social determinants of health: the socio-economic, behavioral, and other factors that impact human health to address population health issues.
Prerequisites: Public health major; junior or senior classification; or approval of instructor.

PHLT 310 Public Health Writing
Credit: 1. 1 Lecture Hour.
Strategies to become more familiar with types of writing required as public health students or public health professionals; strengthens and increases general writing skills; establishes a foundation for continued development in writing. Must be taken on a satisfactory/unsatisfactory basis.
Prerequisites: Public health major; junior or senior classification; approval of instructor.
PHLT 311 Narrative Approach to Public Health  
Credit 1. 1 Lecture Hour.  
Familiarization with the writing style required for public health; instruction in writing styles and narrative techniques to increase and strengthen writing abilities in public health disciplines such as environmental and occupational health, health promotion and community health sciences, health policy and management, epidemiology and biostatistics.  
Prerequisites: Public health major; junior or senior classification; or approval of instructor.

PHLT 313 Health Care and Public Health System  
Credits 3. 3 Lecture Hours.  
Two distinct systems – health care system: an individual and medical services model and the public health system: population level disease prevention and health education.  
Prerequisites: Public health major; junior or senior classification; or approval of instructor.

PHLT 314 Public Health Data Management and Assessment I  
Credits 2. 2 Lecture Hours.  
Familiarization with using the CDC software Epi-Info for managing, analyzing and assessing population health data; focus on using Epi-Info to produce descriptive data reports including tables and graphs.  
Prerequisite: Public health major; junior or senior classification; or approval of instructor.

PHLT 315 Public Health Data Management and Assessment II  
Credits 2. 2 Lecture Hours.  
Continuation of PHLT 314; familiarization with using the CDC software Epi-Info for managing, analyzing and assessing population health data; focus on using Epi-Info to generate inferential statistics such as confidence intervals and p-values.  
Prerequisite: Public health major; PHLT 314; or approval of instructor.

PHLT 330 The Environment and Public Health  
Credits 3. 3 Lecture Hours.  
Environmental exposures and population health; public health core knowledge; includes methods for defining environmental contamination; identifying contaminants, pathogens and toxins; assessing risks and causality; determining health impact; methods to decrease exposures.  
Prerequisites: Public health major; junior or senior classification; or approval of instructor.

PHLT 331 Occupational Safety and Health I  
Credits 3. 3 Lecture Hours.  
Regulations and topics of relevance to occupational health professionals; includes legislation and regulations, workers' compensation, accident investigation, industrial hygiene, ergonomics and fire prevention with an emphasis on the health professionals' role.  
Prerequisites: Public health major; junior or senior classification; or approval of instructor.

PHLT 332 Occupational Safety and Health II  
Credits 3. 3 Lecture Hours.  
Occupational safety and health topics including behavior-based safety, workplace violence, preparedness, hazardous materials, construction, transportation, required written programs and professional resources.  
Prerequisites: Public health major; PHLT 331; or approval of instructor.

PHLT 333 Accident Investigation  
Credits 3. 3 Lecture Hours.  
Principles of accident investigation and how accidents happen in the workplace; integrates procedural, systematic, corrective and formative applications for the occupational health professional.  
Prerequisite: Public health major; junior or senior classification; or approval of instructor.

PHLT 334 Fire Safety and Workplace Hazards  
Credits 3. 3 Lecture Hours.  
Principles of fire safety and other workplace hazards such as electrical hazards, chemical hazards, respiratory hazards, falls, confined spaces, bloodborne pathogens, hearing loss, ergonomics and machine hazards.  
Prerequisite: Public health major; junior or senior classification; or approval of instructor.

PHLT 335 Hazardous Materials  
Credits 3. 3 Lecture Hours.  
Principles of managing materials in the workplace; role of the health and safety professional in hazardous material management and hazard communication.  
Prerequisite: Public health major; junior or senior classification; or approval of instructor.

PHLT 410 Public Health Communication  
Credits 3. 3 Lecture Hours.  
Exploration of different communication approaches for addressing public health challenges; basic concepts of public health-specific communication, including risk communication, the use of mass media and evaluation of public health communication programs.  
Prerequisites: PHLT 310; public health major; or approval of instructor.

PHLT 411 Project Management in Public Health  
Credits 3. 3 Lecture Hours.  
Exploration of successful project management and administration in public health settings; includes project development, budgeting and implementation.  
Prerequisites: Public health major; junior or senior classification; or approval of instructor.

PHLT 412 Health Advocacy and Policy  
Credits 3. 3 Lecture Hours.  
Concepts of legal, ethical, economic and regulatory dimensions of public health policy; the roles, influences and responsibilities of the different agencies and branches of government; advocacy for the public's health at all levels of society.  
Prerequisites: Public health major; junior or senior classification; or approval of instructor.

PHLT 413 Public Health Informatics  
Credits 3. 3 Lecture Hours.  
Broad range of knowledge and skills encompassed by PHI; bridging public health data/information needs, information technology and stakeholders; creating user requirements to guide system design; evidence-based public health; electronic health records.  
Prerequisite: PHLT 302 or approval of instructor.

PHLT 414 Applications of Epidemiology in Public Health  
Credits 3. 3 Lecture Hours.  
Application of the concept of distribution, determinants and measurement of health and disease outcomes in populations in real life situations through lectures, case studies and presentations.  
Prerequisites: Public health major; PHLT 305; or approval of instructor.

PHLT 415 Emergency Management in Public Health  
Credits 3. 3 Lecture Hours.  
Principles and practices of emergency management at the local, state, national and international levels; explores stages of emergency management such as preparedness, response and recovery; includes population health and the basic processes, approaches and interventions; emergency management systems in the United States; actors in emergency management.  
Prerequisites: Public health major; junior or senior classification; or approval of instructor.
PHLT 416 Public Health Leadership and Ethics  
**Credits 3. 3 Lecture Hours.**  
Overview of major leadership and ethical theories, current leadership and ethical issues and their impact on public health practice.  
**Prerequisite:** Public health major; junior or senior classification; or approval of instructor.

PHLT 441 Strategies for Population Health Improvement  
**Credits 3. 3 Lecture Hours.**  
The three core functions of public health and strategies for improving population health; case studies exploring multiple types of interventions; involves class discussion, break-out groups and group assignments.  
**Prerequisite:** PHLT 302; PHLT 411 or concurrent enrollment; public health major; junior or senior classification; or approval of instructor.

PHLT 445 Population Health Culminating Experience  
**Credits 3. 3 Lecture Hours.**  
Combines knowledge and skills related to public health experience and coursework to address public health issues; process of developing, implementing and evaluating public health interventions; role assignment and responsibilities in group assignments and presentations.  
**Prerequisite:** PHLT 441 or concurrent enrollment; public health major; junior or senior classification; or approval of instructor.

PHLT 485 Directed Studies  
**Credits 1 to 4. 1 to 4 Other Hours.**  
Directed study of selected problems in the area of public health studies. May be taken four times for credit.  
**Prerequisite:** Approval of instructor.  

PHLT 489 Special Topics In...  
**Credits 1 to 4. 1 to 4 Lecture Hours. 0 to 4 Lab Hours.**  
Selected topics in an identified area of public health. May be repeated for credit.  
**Prerequisites:** PHLT major; junior or senior classification or approval of instructor.

**PHYS - Physics**

**Courses**

**PHYS 101 Freshman Physics Orientation**  
**Credit 1. 1 Lecture Hour.**  
Critical thinking skills and problem solving in physics; time management and teaming skills. For physics majors. Registration by non-majors requires approval of instructor.  
**Prerequisite:** PHYS 218 or registration therein; MATH 171 or registration therein; or approval of instructor.

**PHYS 102 Freshman Physics Orientation II**  
**Credit 1. 1 Lecture Hour.**  
Critical thinking skills and problem solving in physics; time management and teaming skills. For physics majors. Registration by non-majors requires approval of instructor.  
**Prerequisites:** PHYS 101, PHYS 208 or registration therein; MATH 172 or registration therein; or approval of instructor.

**PHYS 109/ASTR 109 Big Bang and Black Holes**  
**Credits 3. 3 Lecture Hours.**  
Designed to give an intuitive understanding of the Big Bang and Black Holes, without mathematics, and de-mystify them for the non-scientist.  
**Cross Listing:** ASTR 109/PHYS 109.

**PHYS 119/ASTR 119 Big Bang and Black Holes: Laboratory Methods**  
**Credit 1. 2 Lab Hours.**  
Hands-on understanding of the concepts surrounding the Big Bang and Black Holes; emphasis on the evidence-based decision making process, methods and presentation; for non-scientists. Companion course for ASTR 109/PHYS 109/ASTR 109.  
**Prerequisite:** ASTR/PHYS 109/ASTR 109 or registration therein.

**PHYS 201 College Physics**  
**Credits 4. 3 Lecture Hours. 3 Lab Hours.**  

**PHYS 202 College Physics**  
**Credits 4. 3 Lecture Hours. 3 Lab Hours.**  
(PHYS 1302 and 1102, 1402*) College Physics. Continuation of PHYS 201. Fundamentals of classical electricity and light; introduction to contemporary physics.  
**Prerequisite:** PHYS 201.

**PHYS 205 Concepts of Physics**  
**Credits 4. 3 Lecture Hours. 3 Lab Hours.**  
General survey physics course for K-8 preservice teachers integrating physics content and laboratory activities relevant to physics-related subject matter included in the current Texas and national standards for elementary school science; includes aspects of mechanics, waves, electricity, magnetism and modern physics.  
**Prerequisite:** Major in interdisciplinary studies or interdisciplinary technology or approval of instructor.

**PHYS 208 Electricity and Optics**  
**Credits 4. 3 Lecture Hours. 3 Lab Hours.**  
Continuation of PHYS 218. Electricity, magnetism, and introduction to optics. Primarily for students in science and engineering.  
**Prerequisites:** PHYS 218; Electricity, magnetism, and introduction to optics. Primarily for students in science and engineering.

**PHYS 218 Mechanics**  
**Credits 4. 3 Lecture Hours. 3 Lab Hours.**  
(PHYS 2325 and 2125, 2425*) Mechanics. Mechanics for students in science and engineering.  
**Prerequisite:** MATH 151 or MATH 171 or registration therein.

**PHYS 221 Optics and Thermal Physics**  
**Credits 3. 3 Lecture Hours.**  
Wave motion and sound, geometrical and physical optics, kinetic theory of gases, laws of thermodynamics.  
**Prerequisites:** PHYS 208; MATH 152 or MATH 172; registration in MATH 221, MATH 308.

**PHYS 222 Modern Physics for Engineers**  
**Credits 3. 3 Lecture Hours.**  
Atomic, quantum, relativity and solid state physics.  
**Prerequisites:** PHYS 208 or PHYS 219; MATH 308 or registration therein.

**PHYS 225 Electronic Circuits and Applications**  
**Credits 4. 3 Lecture Hours. 3 Lab Hours.**  
Linear circuit theory and applications of solidstate diodes, bipolar and field-effect transistors, operational amplifiers and digital systems.  
**Prerequisites:** PHYS 208; MATH 308.
PHYS 285 Directed Studies
Credits 1 to 4. 1 to 4 Other Hours.
Special work in laboratory or theory to meet individual requirements in cases not covered by regular curriculum; intended for use as lower-level credit.
Prerequisite: Approval of department head.

PHYS 289 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours. 0 to 4 Lab Hours.
Selected topics in an identified area of physics. May be repeated for credit.
Prerequisite: Approval of instructor.

PHYS 291 Research
Credits 0 to 4. 0 to 4 Other Hours.
Research conducted under the direction of faculty member in physics. May be repeated 2 times for credit.
Prerequisites: Freshman or sophomore classification and approval of instructor.

PHYS 302 Advanced Mechanics I
Credits 3. 3 Lecture Hours.
Classical mechanics of particles and rigid bodies, both by direct application of Newton's equations and by Lagrangian methods; applications to gravity and other central forces, coupled oscillators, non-inertial reference frames, and the statics and dynamics of fluids with and without viscosity; introduction to statics of structures.
Prerequisites: MATH 221 or MATH 251 or MATH 253; MATH 308; PHYS 208, PHYS 218, PHYS 222, and PHYS 331; concurrent enrollment in PHYS 332; for students with other backgrounds, approval of instructor.

PHYS 303 Advanced Mechanics II
Credits 3. 3 Lecture Hours.
Classical mechanics of particles and rigid bodies with an emphasis on Lagrangian and Hamiltonian methods; applications to chaos, scattering, coupled oscillations, and continua, including sound in fluids; mechanical implications of special relativity; introduction to drag and turbulence in fluids; introduction to elasticity in solids; Euler buckling instability.
Prerequisites: PHYS 302 and PHYS 332.

PHYS 304 Advanced Electricity and Magnetism I
Credits 3. 3 Lecture Hours.
Electrostatics; dielectrics; electrical current and circuits; magnetic fields and materials; induction; Maxwell's equations.
Prerequisites: PHYS 221; PHYS 331; concurrent enrollment in PHYS 332; junior or senior classification.

PHYS 305 Advanced Electricity and Magnetism II
Credits 3. 3 Lecture Hours.
Radiation and optics. Electromagnetic waves; radiation; reflection and refraction; interference; diffraction; special relativity applied to electrodynamics.
Prerequisite: PHYS 304.

PHYS 309 Modern Physics
Credits 3. 3 Lecture Hours.
Special relativity; concepts of waves and particles; introductory quantum mechanics.
Prerequisites: PHYS 221; MATH 221; MATH 308.

PHYS 327 Experimental Physics
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Laboratory experiments in modern physics and physical optics with an introduction to current, state-of-the-art recording techniques.
Prerequisites: PHYS 225; PHYS 309.

PHYS 331 Theoretical Methods for Physicists I
Credits 3. 3 Lecture Hours.
Applications involving vectors; vector and additional methods for advanced electricity and magnetism; relationship and solutions of classical wave equation, heat equation, and Schrödinger equation; harmonic motion on finite or periodic lattice and in continuum; tensor and matrix notation in classical mechanics and electricity and magnetism.
Prerequisites: MATH 221 or MATH 251 or MATH 253; MATH 308; PHYS 208 or PHYS 219, PHYS 218, and PHYS 221; restricted to physics majors.

PHYS 332 Theoretical Methods for Physicists II
Credits 3. 3 Lecture Hours.
Methods to solve the important equations of theoretical physics, emphasizing the effects of boundary conditions and quantization on their solutions and restricted to the essential physical symmetries associated with free space, spheres, cylinders, and rectangles; if time permits, introduction to symmetries in physics and to asymptotic methods.
Prerequisites: PHYS 222 or PHYS 309; PHYS 331; restricted to physics majors.

PHYS 401 Computational Physics
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Introduction to computational and simulation techniques widely used in physics applications and research, including trajectory integration, wave motion analysis, molecular dynamics, Monte Carlo methods, statistical mechanics of spin systems, phase transitions, quantum evolution, bound state problems, and variational methods.
Prerequisites: PHYS 302; PHYS 309; PHYS 331; PHYS 332; knowledge of a high level language such as FORTRAN or C (This prerequisite can be obtained by taking CSCE 206 or the equivalent.); junior or senior classification.

PHYS 408 Thermodynamics and Statistical Mechanics
Credits 4. 4 Lecture Hours.
Statistical method, macroscopic thermodynamics, kinetic theory, black body radiation, Maxwell-Boltzmann, Bose-Einstein, and Fermi-Dirac statistics.
Prerequisites: PHYS 331; PHYS 412; junior or senior classification.

PHYS 412 Quantum Mechanics I
Credits 3. 3 Lecture Hours.
Postulates of wave mechanics; wave packets; harmonic oscillator; central field problem; hydrogen atom; approximation methods.
Prerequisites: PHYS 302; PHYS 309; PHYS 332; junior or senior classification.

PHYS 414 Quantum Mechanics II
Credits 3. 3 Lecture Hours.
Continuation of PHYS 412. Electron spin; addition of angular momenta; atomic structure; time dependent perturbations; collision theory; application of quantum mechanics to atomic, solid state, nuclear or high energy physics.
Prerequisite: PHYS 412.

PHYS 420 Concepts, Connections, and Communication
Credit 1. 1 Lecture Hour.
Stars and atoms; new physics; post-Newtonian universe.
Prerequisite: Junior or senior classification.

PHYS 425 Physics Laboratory
Credits 2. 6 Lab Hours.
Experiments in nuclear, atomic, and molecular physics using modern instrumentation and equipment of current research.
Prerequisite: PHYS 327 or equivalent.
PHYS 426 Physics Laboratory
Credits 2. 6 Lab Hours.
Experiments in solid state and nuclear physics. Modern instrumentation and current research equipment are employed.
Prerequisite: PHYS 327 or equivalent.

PHYS 444 Art of Communication in Physics I: Communicating Science to Scientists
Credits 2. 2 Lecture Hours.
Communication in physics, communicating physics to scientists, scientific presentations; scientific writing; information retrieval; reading technical publications.
Prerequisite: Knowledge of oral and written English; junior or senior classification.

PHYS 445 Art of Communication in Physics II: Communicating Science to Non-Scientists
Credit 1. 1 Lecture Hour.
Communication in physics, communicating physics to scientists, scientific presentations; scientific writing; job and graduate school application; job interview.
Prerequisites: PHYS 444; knowledge of oral and written English; junior or senior classification.

PHYS 485 Directed Studies
Credits 1 to 12. 1 to 12 Other Hours.
Special work in laboratory or theory to meet individual requirements in cases not covered by regular curriculum.
Prerequisite: Approval of department head.

PHYS 489 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours. 0 to 4 Lab Hours.
Selected topics in an identified field of physics. May be repeated for credit.
Prerequisite: Approval of instructor.

PHYS 491 Research
Credits 0 to 4. 0 to 4 Other Hours.
Research conducted under the direction of faculty member in physics. May be repeated 2 times for credit. Registration in multiple sections of this course is possible within a given semester provided that the per semester credit hour limit is not exceeded.
Prerequisites: Junior or senior classification and approval of instructor.

PHYS 601 Analytical Mechanics
Credits 3. 3 Lecture Hours.
Hamilton approaches to dynamics; canonical transformation and variational techniques; central force and rigid body motions; the mechanics of small oscillations and continuous systems.
Prerequisites: PHYS 302 or equivalent; MATH 311 and MATH 412 or equivalents; concurrent registration in PHYS 615.

PHYS 603 Electromagnetic Theory
Credits 3. 3 Lecture Hours.
Boundary-value problems in electrostatics; basic magnetostatics; multipoles; elementary treatment of ponderable media; Maxwell's equations for time-varying fields; energy and momentum of electromagnetic field; Poynting's theorem; gauge transformations.
Prerequisites: PHYS 304 or equivalents; PHYS 615.

PHYS 606 Quantum Mechanics
Credits 3. 3 Lecture Hours.
Schroedinger wave equation, bound states of simple systems, collision theory, representation and expansion theory, matrix formulation, perturbation theory.
Prerequisites: PHYS 412 or equivalent; MATH 311 and MATH 412 or equivalents; concurrent registration in PHYS 615.

PHYS 607 Statistical Mechanics
Credits 3. 3 Lecture Hours.
Classical statistical mechanics, Maxwell-Boltzmann distribution, and equipartition theorem; quantum statistical mechanics, Bose-Einstein distribution and Fermi-Dirac distribution; applications such as polyatomic gases, blackbody radiation, free electron model for metals, Debye model of vibrations in solids, ideal quantum mechanical gases and Bose-Einstein condensation; if time permits, phase transitions and nonequilibrium statistical mechanics.
Prerequisites: PHYS 408 and PHYS 412 or equivalents; PHYS 615.

PHYS 611 Electromagnetic Theory
Credits 3. 3 Lecture Hours.
Continuation of PHYS 603. Propagation, reflection and refraction of electromagnetic waves; wave guides and cavities; interference and diffraction; simple radiating systems; dynamics of relativistic particles and fields; radiation by moving charges.
Prerequisite: PHYS 603.

PHYS 615 Methods of Theoretical Physics I
Credits 3. 3 Lecture Hours.
Orthogonal eigenfunctions with operator and matrix methods applied to solutions of the differential and integral equations of mathematical physics; contour integration, asymptotic expansions of Fourier transforms, the method of stationary phase and generalized functions applied to problems in quantum mechanics.
Prerequisites: MATH 311, MATH 407 and MATH 412 or equivalents.

PHYS 616 Methods of Theoretical Physics II
Credits 3. 3 Lecture Hours.
Green's functions and Sturm-Liouville theory applied to the differential equations of wave theory; special functions of mathematical physics; numerical techniques are introduced; conformal mapping and the Schwarz Christoffel transformation applied to two-dimensional electrostatics and hydrodynamics.
Prerequisites: PHYS 615.

PHYS 617 Physics of the Solid State
Credits 3. 3 Lecture Hours.
Crystalline structure and symmetry operations; electronic properties in the free electron model with band effects included; lattice vibrations and phonons; thermal properties; additional topics selected by the instructor from: scattering of X-rays, electrons, and neutrons, electrical and thermal transport, magnetism, superconductivity, defects, semiconductor devices, dielectrics, optical properties.
Prerequisites: PHYS 606 and PHYS 607.

PHYS 619 Modern Computational Physics
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Modern computational methods with emphasis on simulation such as molecular dynamics and Monte Carlo; applications to condensed matter and nuclear many-body physics and to lattice gauge theories.
Prerequisites: PHYS 408 and PHYS 412 or equivalents; knowledge of any programming language.

PHYS 624 Quantum Mechanics
Credits 3. 3 Lecture Hours.
Continuation of PHYS 606. Scattering theory, second quantization, angular momentum theory, approximation methods, application to atomic and nuclear systems, semi-classical radiation theory.
Prerequisite: PHYS 606.
PHYS 625 Nuclear Physics
Credits 3.3 Lecture Hours.
Nuclear models, nuclear spectroscopy, nuclear reactions, electromagnetic properties of nuclei; topics of current interest.
Prerequisite: PHYS 606.

PHYS 627 Elementary Particle Physics
Credits 3.3 Lecture Hours.
Fundamentals of elementary particle physics; particle classification, symmetry principles, relativistic kinematics and quark models; basics of strong, electromagnetic and weak interactions.
Prerequisite: PHYS 606.

PHYS 631 Quantum Theory of Solids
Credits 3.3 Lecture Hours.
Second quantization, and topics such as plasmons; many-body effects for electrons; electron-phonon interaction; magnetism and magnons; other elementary excitations in solids; BCS theory of superconductivity; interactions of radiation with matter; transport theory in solids.
Prerequisites: PHYS 617 and PHYS 624.

PHYS 632 Condensed Matter Theory
Credits 3.3 Lecture Hours.
Prerequisites: PHYS 601, PHYS 617 and PHYS 624.

PHYS 634 Relativistic Quantum Field Theory
Credits 3.3 Lecture Hours.
Classical scalar, vector and Dirac fields; second quantization; scattering matrix and perturbation theory; dispersion relations; renormalization.
Prerequisite: PHYS 624.

PHYS 638 Quantum Field Theory II
Credits 3.3 Lecture Hours.
Functional integrals; divergences, regularization and renormalization; non-abelian gauge theories; other topics of current interest.
Prerequisite: PHYS 634.

PHYS 641/ASTR 601 Extragalactic Astronomy
Credits 3.3 Lecture Hours.
Overview of observations of galaxies and large-scale structures in the Universe to understand their formation and evolution from theoretical and observational perspectives; galaxy luminosity functions; evolution of stellar populations and chemical enrichment; clusters and AGN.
Prerequisites: PHYS 601; or ASTR 314 and PHYS 302; or approval of instructor.
Cross Listing: ASTR 601/PHYS 641.

PHYS 642/ASTR 602 Astronomical Observing Techniques and Instrumentation
Credits 3.3 Lecture Hours.
Theory and practice of obtaining and analyzing astrometric, photometric, spectroscopic, and interferometric measurements of astronomical sources across the electromagnetic spectrum; principles of design, fabrication, assembly, test, deployment, and use of astronomical instruments.
Prerequisites: PHYS 615 or equivalent; or approval of instructor.
Cross Listing: ASTR 602/PHYS 642.

PHYS 643/ASTR 603 Stellar Astrophysics
Credits 3.3 Lecture Hours.
Theoretical and observational aspects of stellar astrophysics; thermodynamical properties of stellar interiors; energy sources; nuclear processes and burning stages; convective and radiative energy transport; evolutionary models; atmospheres; stability and pulsations; chemical enrichment processes; population synthesis.
Prerequisites: PHYS 606 and PHYS 607 or equivalents; or approval of instructor.
Cross Listing: ASTR 603/PHYS 643.

PHYS 644/ASTR 604 Cosmology
Credits 3.3 Lecture Hours.
Basic principles of modern cosmology and particle physics; general relativity; cosmic inflation; Big Bang nucleosynthesis; expansion of the universe; cosmic microwave background; large-scale structure of the Universe; properties of particles; dark matter; dark energy.
Prerequisites: PHYS 615 or equivalent; or approval of instructor.
Cross Listing: ASTR 604/PHYS 644.

PHYS 645/ASTR 605 Galactic Astronomy
Credits 3.3 Lecture Hours.
Basic nature and structure of constituents of Milky Way galaxy; distribution and motions of stars and gas; origin evolution and distribution of large-scale chemical abundances and kinematic patterns across populations; models of galaxy formation and implications of modern observations.
Prerequisites: PHYS 601 and PHYS 607 or equivalents; or approval of instructor.
Cross Listing: ASTR 605/PHYS 645.

PHYS 646/ASTR 606 Radiative Transfer
Credits 3.3 Lecture Hours.
Fundamental radiative processes in stellar and planetary atmospheres; radiative fields; Stokes parameters; Mueller matrix formalism; radiation from moving charges; Compton scattering; plasma effects; atomic structure and radiative transitions; molecular structure and spectra; multiple scattering.
Prerequisites: PHYS 302, PHYS 304, PHYS 408, and PHYS 412 or equivalents; or approval of instructor.
Cross Listing: ASTR 606/PHYS 646.

PHYS 647 Gravitational Physics
Credits 3.3 Lecture Hours.
Special relativity; equivalence principle; theory of gravitation; Einstein’s theory of general relativity; classic tests of general relativity; simple black hole and cosmological solutions; global aspects; penrose diagrams; stationary black holes; Hawking radiation.
Prerequisites: PHYS 611 and PHYS 615.

PHYS 648 Quantum Optics and Laser Physics
Credits 3.3 Lecture Hours.
Line widths of spectral lines; laser spectroscopy; optical cooling; trapping of atoms and ions; coherence; pico- and femto-second spectroscopy; spectroscopic instrumentation.
Prerequisite: Approval of instructor.
PHYS 649 Physics of Optoelectronic Devices
Credits 3. 3 Lecture Hours.
Overview of basic concepts: laser physics, optics of semiconductors, heterostructures with quantum confinement and their interaction with light; physical principles of state of the art optoelectronic devices; emerging concepts and technologies: integrated photonics, nanophotonics, plasmonics, metamaterials, terahertz optoelectronics, quantum information processing, etc.  
Prerequisites: Quantum mechanics (PHYS 412 and PHYS 414 or PHYS 606 or equivalent).

PHYS 651 Superstring Theory I
Credits 3. 3 Lecture Hours.
Basics of string theory, including bosonic string, conformal field theory, strings with worldsheet and space-time supersymmetry, as well as the higher dimensional extended objects called D-branes.  
Prerequisites: PHYS 634 and PHYS 653; PHYS 647 recommended.

PHYS 652 Superstring Theory II
Credits 3. 3 Lecture Hours.
M-theory unification of superstring theories into a single eleven-dimensional theory; duality symmetries relating string theories; string geometry; Calabi-Yau manifolds and exceptional holonomy manifolds; flux compactifications; black holes in string theory; AdS/CFT correspondence; string and M-theory cosmology.  
Prerequisites: PHYS 651; PHYS 647 recommended.

PHYS 653 Introduction to Supersymmetry and Supergravity
Credits 3. 3 Lecture Hours.
Core material on supersymmetric field theories and their coupling to supergravity theories.  
Prerequisite: PHYS 634.

PHYS 654 The Standard Model and Beyond
Credits 3. 3 Lecture Hours.
The standard model of particle physics in detail; general principles of gauge theories, including spontaneous breaking and applications to Electro-Weak Interactions and Quantum Chromodynamics; extension of the standard model involving Grand Unified Theories (GUT), Supersymmetry (SUSY) and Supergravity (SUGRA).  
Prerequisites: PHYS 624 and PHYS 634.

PHYS 655 String Phenomenology
Credits 3. 3 Lecture Hours.
Physical applications of string theory; rudiments of string theory; compactification of extreme dimensions in string theory; free-fermionic formulation; dualities, M-theory, Intersection D-Branes, and D-Brane phenomenology; model building.  
Prerequisites: PHYS 634 and PHYS 651.

PHYS 666 Scientific Instrument Making
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Theory and techniques for designing and constructing advanced scientific instruments such as spectrometers, cryostats, vacuum systems, etc.; mechanical and electronic shop procedures utilizing the lathe and mill; welding and soldering; drafting and print reading; circuit design.  
Prerequisite: Approval of instructor.

PLPA - Plant Pathology

Courses

PLPA 291 Research
Credits 1 to 4. 1 to 4 Other Hours.
Research conducted under the direction of faculty member in plant pathology. May be repeated 3 times for credit.  
Prerequisites: Freshman or sophomore classification and approval of instructor.

PLPA 301 Plant Pathology
Credits 3. 3 Lecture Hours.
Introduction to fundamental principles of plant pathology; diagnosis, cause and control of plant diseases.  
Prerequisites: BIOL 113 or BIOL 101; concurrent registration in PLPA 303.

PLPA 303 Plant Pathology Laboratory
Credit 1. 2 Lab Hours.
Isolation, identification of plant pathogens and clinical diagnosis and control of plant diseases.  
Prerequisite: PLPA 301 or registration therein.*

PLPA 334 Turfgrass Pathology
Credits 3. 3 Lecture Hours. 0 Lab Hours.
Recognizing turfgrass problems and understanding biological mechanisms in the disease process; principles of disease management strategies.  
Prerequisite: Junior or senior classification.

PLPA 485 Directed Studies
Credits 1 to 4. 1 to 4 Other Hours.
Special problems for advanced undergraduates to permit study of subject matter not available in existing courses.  
Prerequisites: PLPA 301 and prior approval of instructor or department head.

PLPA 489 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Selected topics in an identified area of plant pathology. May be repeated for credit.  
Prerequisite: PLPA 301 or approval of instructor.
PLPA 491 Research
Credits 1 to 4. 1 to 4 Other Hours.
Research conducted under the direction of faculty member in plant pathology. May be repeated 3 times for credit. Registration in multiple sections of this course are possible within a given semester provided that the per semester credit hour limit is not exceeded.
Prerequisite: Junior or senior classification and approval of instructor.

PLPA 601 Fundamentals of Plant Pathology
Credits 3. 3 Lecture Hours.
Increase the understanding of the underlying mechanisms in the disease process; apply that understanding to reduce losses caused by disease; nature of disease causing agents; the outcomes of the interaction between plants and pathogens.
Prerequisite: Graduate classification.

PLPA 603 Plant Disease Management
Credits 3. 3 Lecture Hours.
Online course designed to provide a strong foundation in the principles and practices of management of plant diseases; analysis of disease cycles and epidemiological parameters to develop and evaluate efficient control strategies and forecasting models.
Prerequisites: PLPA 301 or equivalent, approval of instructor.

PLPA 604 Plant Bacterial Diseases
Credit 1. 1 Lecture Hour.
Bacterial diseases of fruit and vegetable crops, field crops and ornamental plants; structure and function of plant pathogenic bacteria; dissemination of bacterial pathogens and methods of control.
Prerequisite: PLPA 301 or PLPA 601.

PLPA 605 Molecular Plant Virology
Credit 1. 1 Lecture Hour.
Focus on biology and molecular genetics of plant viruses; historical information and recent developments discussed to illustrate how viruses establish an infection; control measures presented; uses as tools in biotechnology.
Prerequisite: PLPA 301 or PLPA 601.

PLPA 606 Fungal Biology
Credit 1. 1 Lecture Hour.
Morphological and molecular systematic survey of kingdom of Fungi; emphasis on modern concepts and disease control.
Prerequisite: PLPA 301 or PLPA 601.

PLPA 607 Pathogen Strategies
Credit 1. 1 Lecture Hour.
Molecular mechanisms that pathogens use to overcome innate immunity of the host plant; molecular events associated with the disease cycles of pathogens; pathogen-host-coevolution; pathogen virulence factors; pathogen countermeasures to plant defense mechanisms.
Prerequisites: PLPA 301 or PLPA 601.

PLPA 608 Pathogen Perception and Signaling
Credit 1. 1 Lecture Hour.
Molecular and biochemical basis of pathogen recognition; pathogen signaling initiation and transduction in hosts.
Prerequisite: PLPA 301 or PLPA 601.

PLPA 609 Defense Hormone Signals
Credit 1. 1 Lecture Hour.
Molecular and biochemical mechanisms of plant hormone-mediated defense responses to pathogen invasion; major classes of defense-related proteins, phytoalexins and antibacterial secondary metabolites and signal transduction pathways.
Prerequisite: PLPA 301 or PLPA 601.

PLPA 610 Host Plant Resistance
Credits 3. 3 Lecture Hours.
Host plant resistance programs from the standpoint of the plant breeder, plant pathologist and entomologist; team taught with each discipline represented; roundtable discussions of assigned readings and lectures.
Prerequisite: Approval of instructor.

PLPA 611 Advanced Plant Pathology
Credits 3. 3 Lecture Hours.
Principles and concepts of plant pathogenesis, plant disease epidemiology, and plant disease management at the level of the whole plant and in plant populations; impact and control of significant plant diseases.
Prerequisites: PLPA 301 or equivalent; approval of instructor.

PLPA 613 Advanced Plant Pathology Laboratory
Credit 1. 3 Lab Hours.
A laboratory course designed to demonstrate key components of the host-pathogen interaction and modern diagnostic and research techniques. Concurrent enrollment in PLPA 611 recommended.
Prerequisite: PLPA 301 or approval of instructor.

PLPA 614 Pathogens, the Environment, and Society
Credits 3. 3 Lecture Hours.
Survey the impact of microorganisms on development of modern culture and society; emphasize role pathogens have played in history of mankind; influence of changing environment on emerging diseases.
Prerequisite: Graduate classification.

PLPA 616 Methods in Molecular Biology of Plant-Microbe Interactions
Credits 2. 2 Lecture Hours.
Concepts and techniques used in molecular plant pathology to study the interactions between hosts and pathogens; focus on understanding the rationale for implementing certain procedures and the theoretical concepts underlying the methodology.
Prerequisite: Graduate classification.

PLPA 617 Molecular Plant Pathogen Interactions
Credits 4. 3 Lecture Hours. 3 Lab Hours.
Critical review of the current literature on molecular and biochemical mechanisms of plant responses to pathogen invasion; overview of disease resistance genes, major classes of defense-related proteins, antimicrobial compounds and signal-transduction pathways.
Prerequisite: Graduate classification in any life sciences departments.

PLPA 618 Bacterial Plant Diseases
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Bacterial diseases of fruit and vegetable crops, field crops and ornamental plants; nature of the disease, dissemination of the pathogen and methods of control.
Prerequisite: Approval of instructor.

PLPA 619 Plant-Associated Microorganisms
Credits 3. 3 Lecture Hours.
Basic concepts and current topics in plant-microbe interactions including the diversity of plant-associated microorganisms; the plant as a microbial environment; endophytes; microbial roles in plant nutrition and fitness; uses of microorganisms for improved plant health and sustainable agriculture; microbial roles in food safety and future challenges; discussion of current literature.
Prerequisites: Basic plant biology or plant ecology is recommended; microbiology is helpful, but not required. Cross listed with HORT 619 and MEPS 619.
PLPA 620 Plant Virology
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Overview of plant virology with emphasis on molecular biology of host-virus interactions; topics will include virus replication, gene expression, movement, symptoms, transmission and control; current literature and techniques important to virology presented.
Prerequisite: Approval of instructor.

PLPA 623 Diseases of Field Crops
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Fundamental and practical aspects of more important and representative diseases of field crops; plant disease problems peculiar to extensive cultivation methods.
Prerequisites: PLPA 301 and PLPA 303.*

PLPA 626 Diagnosis of Plant Diseases
Credits 2. 1 Lecture Hour. 3 Lab Hours.
Techniques employed in field diagnosis of plant diseases; histological and microbiological studies to verify initial diagnosis.
Prerequisite: PLPA 625 or approval of instructor.*

PLPA 630 Fungi: Physiology and Genetics
Credits 2. 2 Lecture Hours.
Exploration of genetic networks, and genome evolution; physiology of fungal development and plant pathogenesis.
Prerequisites: Graduate classification or approval of instructor and concurrent enrollment in PLPA 631.

PLPA 631 Fungi Laboratory
Credit 1. 3 Lab Hours.
Demonstration of key modern concepts in the Kingdom Fungi; experiments with current research methodologies using fungi.
Prerequisites: Graduate classification or approval of instructor and concurrent enrollment in PLPA 630 and/or PLPA 632.

PLPA 632 Fungi Cell Biology and Taxonomy
Credits 2. 2 Lecture Hours.
Fungi: Cell Biology and Taxonomy. Morphological and molecular phylegetic survey of the Kingdom Fungi; cell biology of fungal form and function.
Prerequisites: Graduate classification or approval of instructor and concurrent enrollment in PLPA 631.

PLPA 634 Turfgrass Pathology
Credits 3. 3 Lecture Hours.
Recognizing turfgrass problems and understanding biological mechanisms in the disease process; principles of disease management strategies.

PLPA 657 Biotechnology for Biofuels and Bioproducts
Credits 3. 3 Lecture Hours.
Biotechnology issues in developing bioenergy as a renewable energy source; emphasis on the three generations of bioenergy and enabling technologies; special topics include recent advances in bioenergy research, government policy, and industrial development.
Prerequisite: Graduate classification.

PLPA 665 Viral Vectors and Gene Therapy
Credits 3. 3 Lecture Hours.
Describes various viral vector systems, their development, their use as research tools, and their use in biotechnology and gene therapy; consists of a mixture of short lectures and discussion of papers from the literature.
Prerequisites: VMTI 663/MPIM 663, VMTI 647, PLPA 616, or PLPA 620 or approval of instructor.
Cross Listing: MPIM 665 and VMTI 665.

PLPA 681 Seminar
Credit 1. 1 Lecture Hour.
Reports and discussions of topics of current interest in plant pathology; review of literature on selected subjects.

PLPA 684 Professional Internship
Credits 1 to 4. 1 to 4 Other Hours.
Work-study program for on-the-job training. The student’s major professor and job training supervisor will grade the individual.
Prerequisite: Graduate classification in Department of Plant Pathology and Microbiology.

PLPA 685 Directed Studies
Credits 1 to 4. 1 to 4 Other Hours.
Individual problems or research not pertaining to thesis or dissertation.
Prerequisites: PLPA 301 and PLPA 303; approval of instructor.

PLPA 689 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Special topics in an identified area of plant pathology. May be repeated for credit.
Prerequisite: Approval of instructor.

PLPA 690 Theory of Research
Credit 1. 1 Lecture Hour.
Design and development of research theory, inquiry and methodology in various subfields of plant pathology and microbiology; includes examination of modern trends and advances, the analysis of research approaches, and the evaluation and interpretation of data using examples from current research literature. May be repeated for credit.
Prerequisite: Approval of instructor.

PLPA 691 Research
Credits 1 to 23. 1 to 23 Other Hours.
Original investigations in support of thesis or dissertation.

POLS - Political Science

Courses

POLS 203 Introduction to Political Theory
Credits 3. 3 Lecture Hours.
Introduction to the study of political theory, with attention to major themes in the history of political thought; discussion of the nature of politics; examination of method in political theory and its relation to the discipline of political science.

POLS 206 American National Government
Credits 3. 3 Lecture Hours.

POLS 207 State and Local Government
Credits 3. 3 Lecture Hours.
(GOV 2306) State and Local Government. Survey of state and local government and politics with special reference to the constitution and politics of Texas.

POLS 209 Introduction to Political Science Research
Credits 3. 3 Lecture Hours.
Introduction to the philosophy and practice of social science and to modes of research in major subfields of political science.
Prerequisite: Political science majors must have completed POLS 209 before they enroll in their last 18 hours of 300- and 400-level POLS courses. This means a student may take no more than 6 hours of upper division (300- and 400-level courses) before completing POLS 209. Enrollment is restricted to political science majors.
POLS 229 Introduction to Comparative Politics  
**Credits 3.3 Lecture Hours.**  
A comparison of political institutions, processes and issues across a wide variety of political systems.

POLS 231 Introduction to World Politics  
**Credits 3.3 Lecture Hours.**  
Analysis of contemporary world from point of view of nation-state; political problems, factors involved in foreign policies and relations of nations.

POLS 291 Research  
**Credits 0 to 6. 0 to 6 Other Hours.**  
Research conducted under the direction of a faculty member in political science. May be taken up to 3 times for credit.  
**Prerequisites:** Freshman or sophomore classification and approval of instructor.

POLS 300 Foundations of Political Science  
**Credits 3.3 Lecture Hours.**  
Survey of the scholarly discipline of political science, the subfields of the discipline, the major research questions and the modes of scholarship in the latter subfields, and the character of the discipline as a profession.  
**Prerequisites:** POLS 206, POLS 207, POLS 209; junior classification.

POLS 302 The Mass Media and Politics  
**Credits 3.3 Lecture Hours.**  
Examination of mass media impact on politics and political behavior, and governmental impact on the mass media.  
**Prerequisite:** POLS 206 or approval of department head.

POLS 304 Latino Politics in the United States  
**Credits 3.3 Lecture Hours.**  
Survey of historical and contemporary issues in Latino politics in the U.S.; race and ethnicity in the context of U.S. politics; comparisons of racial and ethnic group experiences in the U.S. with those experienced by racial and ethnic groups elsewhere; Latino access to the political system through political participation.  
**Prerequisite:** Junior or senior classification.

POLS 306 Contemporary Political Problems and Issues  
**Credits 3.3 Lecture Hours.**  
Major contemporary political problems and issues with primary emphasis on the U.S. Each term one to three problems or issues will be examined in some depth. Students may register in up to but no more than two different sections of this course. May be repeated for credit.  
**Prerequisite:** POLS 206 or approval of department head. NOTE: POLS 306 courses taken in a study abroad program may not count toward this limit; please consult with the undergraduate advisor.

POLS 307 The Texas Legislature  
**Credits 3.3 Lecture Hours.**  
Examination of contemporary political problems and issues in the Texas Legislature.  
**Prerequisites:** POLS 206 and POLS 207; junior or senior classification.

POLS 308 Game Theoretic Methods in Political Science  
**Credits 3.3 Lecture Hours.**  
Core concepts of game theory to study strategic interaction in politics; game theory using simple mathematical models to describe social situations, understand political and social phenomena; emphasis on model building skills and problem solving.  
**Prerequisites:** POLS 206 and junior or senior classification or approval of department head.

POLS 309 Polimetrics  
**Credits 3.3 Lecture Hours.**  
Theory, techniques, and application of quantitative analysis in political science; focus on quantitative techniques commonly used to evaluate empirical theories of politics.  
**Prerequisites:** POLS 209 or equivalent and 9 additional hours of political science or approval of instructor.

POLS 312 Ethnic Conflict  
**Credits 3.3 Lecture Hours.**  
Examination of government institutions designed to structure ethnic relations; source of ethnic conflict; mechanisms to facilitate the peaceful resolution of ethnic conflict.  
**Prerequisite:** Junior or senior classification.

POLS 313 Public Opinion  
**Credits 3.3 Lecture Hours.**  
Role of public opinion in a democratic political system–its formation, properties and patterns, with special attention to problems of linking public opinion to public policy.  
**Prerequisite:** POLS 206 or approval of department head.

POLS 314 Interest Groups  
**Credits 3.3 Lecture Hours.**  
Role of interest groups in politics; types of groups and resources; internal dynamics; group strategies/tactics (including PACs); forms of indirect and direct lobbying; influence of groups in political arena.  
**Prerequisite:** POLS 206 or approval of department head.

POLS 315 Political Parties  
**Credits 3.3 Lecture Hours.**  
Organization, history, and activities of political parties and functions they serve in national, state and local politics in the United States and elsewhere.  
**Prerequisite:** POLS 206 or approval of department head.

POLS 316 Urban Politics  
**Credits 3.3 Lecture Hours.**  
Politics at the community level; urban and metropolitan political systems.  
**Prerequisites:** POLS 206 and POLS 207 or approval of department head.

POLS 317/WGST 317 Women in Politics  
**Credits 3.3 Lecture Hours.**  
Role of women in the political system; treatment of women in political theory; effect of law on women's status; women as political leaders; current policy issues of concern to women.  
**Prerequisite:** POLS 206.

**Cross Listing:** WGST 317/POLS 317.

POLS 318 Theories of International Relations  
**Credits 3.3 Lecture Hours.**  
Examination of major paradigms of international relations; focus on theory development and application to cases.  
**Prerequisites:** POLS 206, POLS 209, and junior or senior classification or approval of department head.

POLS 319 The American Presidency  
**Credits 3.3 Lecture Hours.**  
The American Presidency and the primary relationships and responsibilities of the office, dealing with the public, decision making, influencing Congress, and implementing policy.  
**Prerequisite:** POLS 206 or approval of department head.
POLS 320 Race and Politics in the United States  
Credits 3.3 Lecture Hours.  
The politics of race in the United States: contrast of the political experiences of racial groups with the ideals and realities of democratic political systems.  
Prerequisites: POLS 206 and POLS 207 and junior or senior classification.  

POLS 322 Western European Government and Politics  
Credits 3.3 Lecture Hours.  
Political institutions and ideas of major European countries. Prospects for political integration.  
Prerequisite: POLS 206 or approval of department head.  

POLS 323 Political Systems of Latin America  
Credits 3.3 Lecture Hours.  
Survey of the major features of the political process in Latin America; key political groups and sources and characteristics of their political power; studies of selected countries.  
Prerequisite: POLS 206 or approval of department head.  

POLS 324 Politics of Global Inequality  
Credits 3.3 Lecture Hours.  
Examination of the causes and consequences of economic inequality between rich and poor states; evaluation of competing explanations for poverty of less-developed countries; development strategies employed by poor states; and structure of global economic relations.  
Prerequisite: Junior or senior classification.  

POLS 325 AFRICAN POLITICS  
Credits 3.3 Lecture Hours.  
Survey of African politics from pre-colonial period to contemporary era; examination of local experience of democracy, governance, economic development in light of varied colonial experiences, independence movements, international political economy, informal sources of political power.  
Prerequisites: POLS 206 and POLS 207; junior or senior classification.  

POLS 326 Government and Politics of Eastern Europe  
Credits 3.3 Lecture Hours.  
Political, social and economic transformations in the post-Communist Eastern and Southern European countries; examination of the interrelations between political, economic and social issues that impact the building of new governments and institutions in these countries.  
Prerequisites: POLS 206 and POLS 207; junior or senior classification.  

POLS 327 Congressional Politics  
Credits 3.3 Lecture Hours.  
Prerequisite: POLS 206 or approval of department head.  

POLS 328 Globalization and Democracy  
Credits 3.3 Lecture Hours.  
Examination of the political and economic origins of globalization; effects of globalization on advanced industrial democracies; effect on less developed nations; evaluation of the economic, social, cultural and political consequences of globalization.  
Prerequisite: Junior or senior classification.  

POLS 333 International Cooperation  
Credits 3.3 Lecture Hours.  
Contemporary issues, problems, and solutions in international cooperation.  
Prerequisites: POLS 206; junior or senior classification or approval of department head.  

POLS 335 International Conflict  
Credits 3.3 Lecture Hours.  
Examination of major theoretical explanations of war and conflict resolution.  
Prerequisites: POLS 206; junior or senior classification or approval of department head.  

POLS 338 Government and Politics of the Former Soviet Union  
Credits 3.3 Lecture Hours.  
Major political issues of the post-communist transition in the former Soviet Union.  
Prerequisite: POLS 206 or approval of department head.  

POLS 340 Introduction to Public Administration  
Credits 3.3 Lecture Hours.  
American public administration; development of public service; the political and constitutional context; organization theory; leadership and decision-making; personnel and resource staff functions; administrative law and regulation; ethics and administrative accountability.  
Prerequisite: POLS 206 or approval of department head.  

POLS 341 Urban Administration  
Credits 3.3 Lecture Hours.  
Practices and problems of city government. Organization, administration, and planning and their relation to political processes and structure.  
Prerequisites: POLS 206 and 207 or approval of department head.  

POLS 342 Politics and Bureaucracy  
Credits 3.3 Lecture Hours.  
Public bureaucracy in the context of a political environment; role of experts, the use of political power and problems of bureaucratic accountability and responsibility.  
Prerequisite: POLS 206 or approval of department head.  

POLS 347 Politics of Energy and the Environment  
Credits 3.3 Lecture Hours.  
U.S. energy and environmental problems and politics and the political, legal, and institutional factors influencing their development and implementation.  
Prerequisites: POLS 206 or approval of department head. Junior or senior classification or approval of instructor.  

POLS 349 Early Political Thought  
Credits 3.3 Lecture Hours.  
Political thought from Greek antiquity to Renaissance.  

POLS 350 Modern Political Thought  
Credits 3.3 Lecture Hours.  
Political thought from Machiavelli to Marx.  
Prerequisite: POLS 206 or approval of department head.  

POLS 351 Law and Legislation  
Credits 3.3 Lecture Hours.  
Legal, political and institutional factors that influence the passage of legislation in American legislative bodies.  
Prerequisites: POLS 206 and POLS 207; junior or senior classification.
POLS 352 Empirical Democratic Theory
Credits 3.3 Lecture Hours.
Examination of empirical political science theory about the nature and consequences of democratic government in the modern era; study of scientific theory that accounts for the rise, characteristics and behavior of democratic political systems.
Prerequisites: POLS 206, POLS 207, and POLS 209; junior or senior classification.

POLS 353 Constitutional Rights and Liberties
Credits 3.3 Lecture Hours.
Legal issues, controversies and significant developments in constitutional rights and liberties, and the impact of these developments upon American politics, culture and social institutions.
Prerequisite: POLS 206 or approval of department head.

POLS 354 United States Constitutional Development
Credits 3.3 Lecture Hours.
Leading decisions of the Supreme Court. Trends in our constitutional development since 1789; expansion through judicial interpretation of powers delegated to national government.
Prerequisites: POLS 206 and HIST 105 or approval of department head.

POLS 355 Law, Politics and Policy
Credits 3.3 Lecture Hours.
An introduction to the American legal system, its development and structure: the role of lawyers, law enforcement agencies, and interest groups in its operation; the dynamics of civil litigation and criminal processes of courts; the impact of legal policies on society, politics and the economy.
Prerequisite: POLS 206 or approval of department head.

POLS 356 National Judicial Politics
Credits 3.3 Lecture Hours.
Political factors that influence judicial selection; decision making and policy-making roles and impact of the U.S. Supreme Court and Federal Court System.
Prerequisites: POLS 206, POLS 209, and junior or senior classification or approval of department head.

POLS 357 Comparative Judicial Politics
Credits 3.3 Lecture Hours.
Survey of the major features of court systems of the world; examination of the role played by courts in the politics of selected nations of the world; comparison of judicial decision making in selected counties; the impact of courts in developing democracies.
Prerequisites: POLS 206 and 207; junior or senior classification.

POLS 358 American Political Thought
Credits 3.3 Lecture Hours.
American political thought from colonial times to the present.
Prerequisite: POLS 206 or approval of department head.

POLS 360 American State Politics
Credits 3.3 Lecture Hours.
American state governments; comparative state policies and politics.
Prerequisite: POLS 207 or approval of department head.

POLS 362 Latin American Political Thought
Credits 3.3 Lecture Hours.
Survey of various traditions in the history of Latin American political thought; key texts in the history of political theory in the Spanish-American continent.
Prerequisites: POLS 206; junior or senior classification or approval of instructor.

POLS 364 Global Political Thought
Credits 3.3 Lecture Hours.
Global perspective on the history of political ideas and contemporary political philosophy; confrontation and conversion of East Asia and Middle Eastern concepts of political problems and Western perspectives; impact of culture on the shaping of political ideas.
Prerequisite: Junior or senior classification.

POLS 365/ASIA 365 Asian Governments and Politics
Credits 3.3 Lecture Hours.
Contemporary political systems of Asia, political institutions, actors and processes.
Prerequisite: POLS 206 or approval of department head.
Cross Listing: ASIA 365/POLS 365.

POLS 367/WGST 367 Women in Government in Comparative Perspective
Credits 3.3 Lecture Hours.
Examination of women's representation in government based on comparison across multiple nation-states; focus on legislative and executive branches of democratic governments.
Prerequisites: POLS 206; junior or senior classification or approval of department head.
Cross Listing: WGST 367/POLS 367.

POLS 368 Latin American Legislatures
Credits 3.3 Lecture Hours.
Survey of the major features of the legislative branch in Latin America; examination of the role played by legislatures in the politics of selected countries; studies of executive-legislative relations in selected countries; participation by traditionally excluded groups in legislatures.
Prerequisites: POLS 206, junior or senior classification or approval of department head.

POLS 369 Theories of Democracy
Credits 3.3 Lecture Hours.
Definitions and justifications of democratic political systems; criticisms of democratic legitimacy, difficulties encountered by actual democratic regimes; methodological problems of assessing the fulfillment of democratic goals.
Prerequisite: POLS 206 or approval of instructor.

POLS 375 Campaigns and Elections
Credits 3.3 Lecture Hours.
Theories of voter choice; effects of mass media and campaign finance regulations on the conduct and outcome of elections; effects of elections on policy; emphasis on U.S. national elections.
Prerequisite: POLS 206 or approval of department head.

POLS 412 International Political Economy
Credits 3.3 Lecture Hours.
Politics of international economic relations; interactions between political and economic realms in the contemporary world.
Prerequisites: POLS 206; junior or senior classification or approval of department head.

POLS 413 American Foreign Policy
Credits 3.3 Lecture Hours.
Evolution of U.S. foreign policies since World War II. Policy process; role of executive, legislative, bureaucratic and private institutions; current foreign policy issues and problems.
Prerequisite: POLS 206 or approval of department head.
POLS 415 Contemporary Issues in American Foreign Policy
Credits 3. 3 Lecture Hours.
Detailed analysis of a selected aspect of American foreign policy.
Prerequisite: POLS 206 or approval of department head.

POLS 423 U.S.-Latin American Relations
Credits 3. 3 Lecture Hours.
Political, economic and social relations between the United States and Latin American nations from independence to the present.
Prerequisites: POLS 206, POLS 207, POLS 323; junior or senior classification.

POLS 424 Comparative Governmental Institutions
Credits 3. 3 Lecture Hours.
Study of the politics and structure of governmental institutions in a comparative venue; examination of the building blocks by which patterns of governments and institutions can be identified across various political systems of the world; role of institutions across different types of political systems and how they are affected by global economic factors.
Prerequisites: POLS 322, POLS 323, POLS 326, or POLS 365/ASIA 365; junior or senior classification.

POLS 429 Issues in World Politics
Credits 3. 3 Lecture Hours.
Selected topics of issues in contemporary world politics. May be repeated for credit.
Prerequisite: POLS 206 or approval of department head.

POLS 432 The Politics of European Union
Credits 3. 3 Lecture Hours.
Examination of the institutional, economic and political forces that led to the development of the European Economic Union; impact of the European Union on world affairs.
Prerequisites: POLS 206 and POLS 207; junior or senior classification.

POLS 435 Voting Behavior
Credits 3. 3 Lecture Hours.
Voting decisions, electoral behavior and consequences for the political system.
Prerequisite: POLS 206 or approval of department head.

POLS 439 Foreign Policy Decision Making
Credits 3. 3 Lecture Hours.
Examination of decision processes in contemporary world politics; individual, group and organizational aspects of decision making in the context of world events.
Prerequisites: POLS 206, POLS 209, and junior or senior classification or approval of department head.

POLS 440 Public Policies and Policymaking
Credits 3. 3 Lecture Hours.
Socio-economic, political, and institutional factors as they affect the development, implementation and impact of public policies. Strategies of choice by political regimes in the formation of public policies.
Prerequisite: POLS 206 or approval of department head.

POLS 441 State and Local Financial Administration
Credits 3. 3 Lecture Hours.
Financial management practices in state and local governments including the impact of management practices and political factors on revenues, expenditures, budgeting and debt financing.
Prerequisite: POLS 207.

POLS 442 Social Welfare Policy
Credits 3. 3 Lecture Hours.
Political and social issues involved in social welfare and income security policies; problems of poverty and public welfare in the United States.
Prerequisite: POLS 206 or approval of department head.

POLS 447 National Security Policy
Credits 3. 3 Lecture Hours.
Need for national security policy, the factors involved in determining defense policy and the resulting problems; special attention to the United States.
Prerequisite: POLS 206 or approval of department head.

POLS 454 Controversial Political Issues
Credits 3. 3 Lecture Hours.
Contemporary political issues such as liberalism, socialism, communism and fascism; role of ideology in political change.
Prerequisite: POLS 206 or approval of department head.

POLS 455 Traditions of Political Theory
Credits 3. 3 Lecture Hours.
Survey of particular schools or historical periods of normative political theory. May be taken three times.
Prerequisites: POLS 206 and POLS 207; junior or senior classification.

POLS 456 Environmental Political Theory
Credits 3. 3 Lecture Hours.
Examination of classical and contemporary theories of politics and the environment, overview of main lines of thought on how human beings should interact with and manage the physical environment, with attention to the particular problems raised by these issues for political theory.
Prerequisites: POLS 206; junior or senior classification.

POLS 461 Jurisprudence
Credits 3. 3 Lecture Hours.
History of legal philosophy from the ancient Greeks to the present; exploration of recurring themes such as natural law, legal positivism, legal realism, sociological jurisprudence and Marxist jurisprudence; exposure to various issues, such as liberty, privacy, obedience, responsibility and punishment.
Prerequisite: POLS 206 or approval of department head.

POLS 462/WGST 462 Women and the Law
Credits 3. 3 Lecture Hours.
The legal status of American women from the adoption of the Constitution to the present: constitutional developments; the 19th Amendment and the proposed Equal Rights Amendment; employment; family law; reproductive rights; education; sexual equality in context of other claims to equality; law and social norms.
Prerequisite: POLS 206 or approval of department head.
Cross Listing: WGST 462/POLS 462.

POLS 475 Government and the Economy
Credits 3. 3 Lecture Hours.
Constitutional and legal framework of governmental involvement in economy; governmental budget in management of business cycle; regulation of business activities; governmental economic planning in democratic societies.
Prerequisite: POLS 206 or approval of department head.
POLS 481 Research Seminar
Credits 3. 3 Other Hours.
In-depth study of topics associated with particular sub-field of political science; experience designing and implementing major, original research project.
Prerequisites: POLS 206, POLS 207, POLS 209, 12 credits in POLS at or above 300 level; junior or senior political science major or approval of instructor.

POLS 484 Internship
Credits 0 to 6. 0 to 6 Other Hours.
Directed internship in a public organization to provide students with on-the-job training and applied research experience with professionals in settings appropriate to the student's degree plan and career objectives.
Prerequisite: Approval of department head. Must be taken on a satisfactory/unsatisfactory basis.

POLS 485 Directed Studies
Credits 0 to 6. 0 to 6 Other Hours.
Individual instruction in selected aspects of political science not adequately covered by other courses.
Prerequisite: Approval of department head.

POLS 489 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Selected topics in an identified area of political science and public policy. May be repeated for credit.
Prerequisite: POLS 206 or approval of department head.

POLS 491 Research
Credits 0 to 6. 0 to 6 Other Hours.
Research conducted under the direction of a faculty member in political science. May be taken up to three times for credit.
Prerequisites: Junior or senior classification and approval of instructor.

POLS 497 Independent Honors Studies
Credits 0 to 4. 1 to 4 Other Hours.
Directed independent studies for upper division Honors students, regardless of academic major, in selected aspects of political science.
Prerequisites: Junior or senior classification either as Honors student or with overall GPR of 3.25; letter of approval from head of student’s major department.

POLS 601 Components of Political Inquiry
Credits 3. 3 Lecture Hours.
Elements of empirical research design, techniques of data collection and data analysis. The evolution of political science as a scientific discipline. Required for political science majors.
Prerequisite: Completion of or concurrent enrollment in STAT 303 or equivalent.

POLS 602 Quantitative Political Analysis
Credits 3. 3 Lecture Hours.
Theory, techniques and applications of quantitative analysis in political science. Required for political science majors.
Prerequisite: POLS 601 or equivalent.

POLS 603 Quantitative Political Analysis II
Credits 3. 3 Lecture Hours.
Introduction to advanced applications of quantitative analysis in political science; critical evaluation of the use of several advanced statistical techniques in political analysis.
Prerequisite: POLS 602 or equivalent.

POLS 604 Conceptualization and Theory in Political Analysis
Credits 3. 3 Lecture Hours.
Exploration of the function of general theoretical assumptions in social scientific research and a critical analysis of some of the most influential general conceptualizations of political phenomena.
Prerequisite: POLS 601 or equivalent.

POLS 606 Advanced Research Methods for Political Scientists
Credits 3. 3 Lecture Hours.
Advanced techniques for specialized problems in empirical political analysis, including voter choice models, longitudinal data, elite interviewing, problems of formal theory and others. May be taken three times.
Prerequisites: POLS 601 and POLS 602 or equivalents.

POLS 607 Advanced Research Methods for Political Scientists II
Credits 3. 3 Lecture Hours.
Advanced techniques for specialized problems in empirical political analysis, including voter choice models, longitudinal data, elite interviewing, problems of formal theory and others. May be taken up to three times as content varies.
Prerequisites: POLS 601 and POLS 602.

POLS 620 Comparative Political Systems
Credits 3. 3 Lecture Hours.
Comparative study of national political systems; cross-national relationships and comparative analysis.

POLS 621 Theory and Method in Comparative Politics
Credits 3. 3 Lecture Hours.
Introduction to methods for conducting research in comparative politics, including approaches to theory development and overcoming obstacles to comparative politics research.
Prerequisites: Graduate classification or approval of instructor.

POLS 623 Seminar in Cross-National Topics
Credits 3. 3 Lecture Hours.
Cross-cultural investigation of the manner in which selected political processes manifest themselves in various political systems. May be taken for credit up to three times as content varies.

POLS 624 Seminar in Regional Studies
Credits 3. 3 Lecture Hours.
Political behavior or institutions within a specified country, region or cultural area. May be taken for credit up to three times as content varies.

POLS 625 Seminar in Comparative Race and Ethnic Politics
Credits 3. 3 Other Hours.
Significant themes in comparative study of race and ethnic politics; includes racial and ethnic identities, government and diversity, racial and ethnic violence, managing conflict. May be taken three times for credit.
Prerequisite: Graduate classification.

POLS 630 International Politics
Credits 3. 3 Lecture Hours.
Survey of international politics; security politics, the development of nations, international law, organization and integration.

POLS 631 Conflict Studies
Credits 3. 3 Lecture Hours.
The study of international conflict, especially factors pertaining to the causes of war.
Prerequisite: Graduate classification or approval of instructor.
POLS 632 Theory and Method in International Relations  
Credits 3.3 Lecture Hours.  
Theory, techniques and applications of quantitative analysis in international relations.  
Prerequisites: POLS 602 and POLS 630 or approval of instructor.

POLS 633 Seminar in Foreign and Security Policy  
Credits 3.3 Lecture Hours.  
Selected aspects of the formation and conduct of foreign and defense policy. May be taken for credit up to three times as content varies.

POLS 634 International Institutions  
Credits 3.3 Lecture Hours.  
Current theoretical and empirical debates in the field of international institutions; includes the value and limitations for understanding the creation, design, behavior, change and impact of international institutions in world politics.  
Prerequisite: POLS 630.

POLS 635 International Political Economy  
Credits 3.3 Lecture Hours.  
The study of international political economy, focusing on the economic and political causes and consequences of international trade, foreign direct investment, capital mobility, exchange rate, monetary policy, migration, and development.  
Prerequisite: Graduate classification or approval of instructor.

POLS 641 Seminar in Public Administration  
Credits 3.3 Other Hours.  
Literature and research problems of a selected aspect of public administration. May be taken three times.

POLS 642 Seminar in Public Policy  
Credits 3.3 Other Hours.  
Literature and research problems of a selected aspect of public policy. May be taken three times.

POLS 643 Theory and Practice of Public Administration  
Credits 3.3 Lecture Hours.  
Theory, process and structure of management in the public sector. Internal management and behavior in federal, state or local agencies in a political setting.

POLS 644 Seminar in Politics of Race, Ethnicity and Public Policy  
Credits 3.3 Other Hours.  
Examines race, ethnicity, and public policy; emphasizes how policy process considers race and ethnicity, and differential impact of policy on racial groups. May be taken three times for credit.  
Prerequisite: Graduate classification.

POLS 645 Politics, Policy and Administration  
Credits 3.3 Lecture Hours.  
The relationship of politics and administration with reference to the influence of administration and bureaucracy, legislative bodies, parties, interest groups and other forces in the formation and execution of public policy in various levels of, primarily, American government.

POLS 646 Public Policy Theory  
Credits 3.3 Lecture Hours.  
Major theories and classifications of public policies, and general explanations of policy formation and impact; recent research testing major theories.

POLS 650 Normative Political Theory  
Credits 3.3 Lecture Hours.  
Examination of the most influential approaches, concepts and political arguments of classical and contemporary political theory. May be taken for credit up to three times as content varies.

POLS 654 Seminar in Theories of Political Legitimacy, Order and Obligation  
Credits 3.3 Lecture Hours.  
Intensive examination of contending theories of political authority, obligation and justice. May be taken up to three times for credit as content varies.  
Prerequisites: Graduate classification and approval of instructor.

POLS 660 Gateway Seminar in the Politics of Race and Ethnicity  
Credits 3.3 Lecture Hours.  
Overview of the race and ethnicity literature in four different subfields: comparative politics, international relations, American politics, and public administration/policy; emphasis on four themes across the subfields: identity participation (including non-traditional participation such as violence), representation, and institutions/structure.

POLS 670 American Political Institutions  
Credits 3.3 Lecture Hours.  
Explores the major issues and controversies in the study of American political institutions; topics include executive, legislative and judicial branches of government, as well as formal organizations such as parties and interest groups. May be taken for credit up to three times as content varies.

POLS 671 American Political Behavior  
Credits 3.3 Lecture Hours.  
An introduction to core theories and controversies about American mass political behavior; topics include public opinion, political culture, political socialization, party identification and political participation. May be taken for credit up to three times as content varies.

POLS 672 Seminar in American Political Institutions  
Credits 3.3 Lecture Hours.  
Relevant literature and research problems of selected aspects of American political institutions at the national level; emphasis on original student research. May be taken for credit up to three times as content varies.  
Prerequisite: Approval of instructor.

POLS 674 Seminar in Race, Ethnicity and American Politics  
Credits 3.3 Other Hours.  
This seminar examines social science theories of race, ethnicity and politics in the United States; highlights the political behavior of Latinos, African-Americans, and Asian Americans. May be taken three times for credit.  
Prerequisite: Graduate classification.

POLS 675 Seminar in American Political Processes and Behavior  
Credits 3.3 Lecture Hours.  
Relevant literature and research problems of selected aspects of mass political behavior in the United States; emphasis on original student research. May be taken for credit up to three times as content varies.  
Prerequisites: Approval of instructor.

POLS 681 Seminar  
Credit 1.1 Lecture Hour.  
Topics of interest to political scientists with emphasis on professional norms, opportunities and teaching strategies.  
Prerequisite: Approval of graduate advisor.

POLS 685 Directed Studies  
Credits 1 to 6.1 to 6 Other Hours.  
Individual instruction in selected fields of political science.  
Prerequisite: Approval of instructor.
POLS 689 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Selected topics in an identified area of political science or public policy. May be repeated for credit.
Prerequisite: Approval of instructor.

POLS 691 Research
Credits 1 to 23. 1 to 23 Other Hours.
The thesis research.
Prerequisite: Approval of graduate advisor.

PORT - Portuguese

Courses

PORT 101 Beginning Portuguese I
Credits 4. 4 Lecture Hours. 1 Lab Hour.
(PORT 1411, 1511) Beginning Portuguese I. Elementary language study with aural, oral, written, and reading practice; preparation for conversation; part of class preparation done in language laboratory. Students with prior knowledge of or instruction in Portuguese are required to take a placement test before enrolling for the first time in a college Portuguese course.

PORT 102 Beginning Portuguese II
Credits 4. 4 Lecture Hours. 1 Lab Hour.
(PORT 1412, 1512) Beginning Portuguese II. Continuation of PORT 101; part of class preparation done in language laboratory. Students with prior knowledge of or instruction in Portuguese are required to take a placement test before enrolling for the first time in a college Portuguese course.
Prerequisite: PORT 101 with a grade of C or better.

PORT 201 Intermediate Portuguese I
Credits 3. 3 Lecture Hours.
(PORT 2311) Intermediate Portuguese I. Readings of average difficulty; review of grammar, practice in conversation and composition. Students with prior knowledge of or instruction in Portuguese are required to take a placement test before enrolling for the first time in a college Portuguese course.
Prerequisite: PORT 102 with a grade of C or better.

PORT 202 Intermediate Portuguese II
Credits 3. 3 Lecture Hours.
(PORT 2312) Intermediate Portuguese II. Continuation of PORT 201 with more advanced material. Students with prior knowledge of or instruction in Portuguese are required to take a placement test before enrolling for the first time in a college Portuguese course.
Prerequisite: PORT 201 with a grade of C or better.

POSC - Poultry Science

Courses

POSC 201 General Avian Science
Credits 3. 3 Lecture Hours.
(AGRI 1327) General Avian Science. Introduction to the poultry industry to include past, present and future industry dynamics; avian anatomy/physiology as they impact commercial production; management principles and practices of breeding, incubation, brooding, nutrition, disease control and marketing technology.

POSC 285 Directed Studies
Credits 1 to 4. 1 to 4 Other Hours.
Directed studies in specific problem areas of poultry science.
Prerequisite: Approval of instructor.

POSC 289 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Selected topics in an identified area of poultry science. May be repeated for credit.
Prerequisite: Approval of instructor.

POSC 291 Research
Credits 1 to 2. 1 to 2 Other Hours.
Research conducted under the direction of faculty member in poultry science. May be repeated 2 times for credit.
Prerequisites: Freshman or sophomore classification and approval of instructor and department head.

POSC 302 Avian Science Laboratory
Credit 1. 2 Lab Hours.
Field trips and application of basic skills in production of poultry meat and eggs. Recommended supplement to POSC 201.
Prerequisite: Junior or senior classification or approval of instructor.*

POSC 304 Judging
Credits 3. 6 Other Hours.
Intensive, individualized training in selection standards for meat and egg strains of poultry, grading standards for egg and live and ready-to-cook poultry, and organizing and managing poultry shows. Practice requires visits to processing plants.
Prerequisite: Junior or senior classification or approval of instructor.*

POSC 308 Avian Anatomy and Physiology
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Anatomy and physiology of the major body systems of the bird, including the cardiovascular, gastrointestinal, respiratory, endocrine and reproductive systems; influence of the environment on bird physiology, including effects of stress. Laboratory exercises include dissection and microscopic analysis of the major body system and assessment of environmental conditions.
Prerequisites: BIOL 111; POSC 201; junior or senior classification or approval of instructor.

POSC 309 Poultry Meat Production
Credits 4. 3 Lecture Hours. 2 Lab Hours.
Modern integrated broiler and turkey production; housing and equipment, nutrition, flock health, pest control, grower relations, marketing and financial management; lab involves blood testing, growth trials, posting birds, processing, and observation of a local integrated poultry operation.
Prerequisite: Junior or senior classification or approval of instructor.*

POSC 313 Game Birds and Ornamental Fowl
Credits 3. 3 Lecture Hours.
Commercial game bird production; nutrition, incubation, rearing, breeder care, diseases, marketing, housing requirements and economic considerations; management of rare and ornamental fowl.
Prerequisite: Junior or senior classification or approval of instructor.

POSC 319 Breeder and Hatchery Management
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Housing and equipment, incubation technology, embryology, nutrition and flock health; lab involves hatchery management, blood testing, semen evaluation, artificial insemination, basic embryology and observation of a local hatchery.
Prerequisite: Junior or senior classification or approval of instructor.

POSC 326 Commercial Egg Industry
Credits 3. 3 Lecture Hours.
Production, management, marketing, economics and integration of commercial laying hen operations.
Prerequisite: Junior or senior classification or approval of instructor.
POSC 333 Instincts and Behavior
Credits 3. 3 Lecture Hours.
Investigation of the reasoning behind evolved reproductive strategies with integration of veterinary and avian science perspectives; examination of individual differences in behavior and their development in particular environments.
Prerequisite: Junior or senior classification or approval of instructor.

POSC 381 Investigation of Professional Development in Poultry Science
Credits 2. 2 Other Hours.
An investigation of career options and the research process as applied to poultry science.
Prerequisite: Junior or senior classification or approval of instructor.

POSC 402 Skills in Poultry Evaluation
Credit 1. 2 Lab Hours.
Practical application of judging and husbandry skills used in poultry exhibition and production. Primarily designed for preservice vocational agriculture teachers.
Prerequisite: Junior or senior classification or approval of instructor.

POSC 405/FSTC 405 Egg and Poultry Meat Processing
Credits 3. 3 Lecture Hours.
Principles of egg and poultry meat processing, understanding egg and poultry meat markets, egg and meat grading, product safety, packaging and consumer acceptance of shell eggs and poultry meat; specifically turkey and broilers.
Prerequisite: Junior or senior classification or approval of instructor.

Cross Listing: FSTC 405/POSC 405.

POSC 406/FSTC 406 Poultry Further Processing
Credits 4. 3 Lecture Hours. 2 Lab Hours.
Science and practice of value-added products; physical, chemical, microbiological and functional characteristics of value-added poultry products as they affect consumer acceptance, efficiency of production and regulatory approval.
Prerequisites: CHEM 222; DASC 326/FSTC 326/FSTC 326/DASC 326; POSC 309; POSC 405/FSTC 405; junior or senior classification or approval of instructor.

Cross Listing: FSTC 406/POSC 406.

POSC 411 Poultry Nutrition
Credits 3. 3 Lecture Hours.
Principles of poultry nutrition with emphasis on all major nutrient classes and their relationships with the avian digestive system.
Prerequisites: CHEM 222 or equivalent; junior or senior classification or approval of instructor.

POSC 412 Poultry Feed Formulation
Credit 1. 1 Lecture Hour.
Practical feeding of poultry with emphasis on specific nutrient requirements of various species and computer least cost diet formulations.
Prerequisites: POSC 411; junior or senior classification or approval of instructor.

POSC 414 Avian Genetics and Breeding
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Basic concepts of avian genetics and breeding principles, inheritance of economically important qualitative and quantitative traits; statistical analysis of breeding results; application of molecular genetics, mating systems analyses, breeder management; and incubation of hatching eggs.
Prerequisite: Junior or senior classification or approval of instructor.

POSC 425 Environmental Physiology
Credits 3. 3 Lecture Hours.
Environmental influences on the physiology of animals and humans; review of shelter engineering to promote animal welfare and production during stressful climatic conditions. Chronic and acute stress in a variety of birds and animals.
Prerequisite: Junior or senior classification or approval of instructor.

POSC 427 Animal Waste Management
Credits 3. 3 Lecture Hours.
An applied approach to current and emerging issues relating to responsible management of animal waste; the role of biological aspects of production management decisions evaluated in an examination of regulatory and environmental requirements; current case studies and exposure to field situations. Field trips may be required for which departmental fees may be assessed.
Prerequisite: Junior or senior classification or approval of instructor.

POSC 429 Advanced Food Bacteriology
Credits 4. 3 Lecture Hours. 2 Lab Hours.
Microbiology of foodborne human pathogens of food animals, raw and processed food, and human disease; methods to control incidence of pre- and post-harvest contamination.
Prerequisites: DASC 326/FSTC 326 or FSTC 326/DASC 326 or BIOL 351 or VTPB 405; junior or senior classification.

POSC 481 Poultry Science Systems
Credits 2. 1 Lecture Hour. 2 Lab Hours.
Individual and team approaches for the collection, interpretation, synthesis and presentation of information on integration of all aspects of the poultry industry to address issues facing it; emphasis on oral and written communication.
Prerequisite: Senior classification.

POSC 484 Internship
Credits 1 to 5. 1 to 5 Other Hours.
A supervised internship in the poultry industry to provide practical experience in a real world setting that is consistent with the student's professional interests.
Prerequisites: Junior or senior classification and approval of department head.

POSC 485 Directed Studies
Credits 1 to 4. 1 to 4 Other Hours.
Directed study of selected problems not covered by other courses in the department. Content of course will be adapted to interest and needs of students.
Prerequisites: Junior or senior classification and approval of instructor.

POSC 489 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Selected topics in an identified area of poultry science. May be repeated for credit.
Prerequisites: Junior or senior classification and approval of instructor.

POSC 491 Research
Credits 1 to 4. 1 to 4 Other Hours.
Research conducted under the direction of faculty member in poultry science. May be repeated 3 times for credit. Registration in multiple sections of this course are possible within a given semester provided that the per semester credit hour limit is not exceeded.
Prerequisites: Junior or senior classification and approval of instructor and department head.
POSC 609 Avian Physiology
Credits 4. 3 Lecture Hours. 3 Lab Hours.
Basic physiological principles pertaining specifically to avian species; cardiovascular, neural, respiratory, digestive, endocrine and reproductive systems; physiological experiments use various avian species as laboratory animals.
Prerequisite: Approval of instructor.

POSC 611/FSTC 611 Poultry Further Processing
Credits 3. 3 Lecture Hours.
Egg and poultry meat processing; egg markets, egg processing, grading, packaging, safety, quality and consumer acceptance of shell eggs; poultry meat processing (specifically turkey and broilers), meat quality, markets, consumer acceptance of poultry meat and safety.
Cross Listing: FSTC 611/POSC 611.

POSC 614 Fermentation and Gastrointestinal Microbiology
Credits 3. 3 Lecture Hours.
Fermentation and gastrointestinal ecosystems in terms of microorganisms present, their activities and requirements and their interactions in a dynamic system.
Prerequisite: Beginning microbiology and/or biochemistry or approval of instructor.
Cross Listing: NUTR 614 and VTMI 614.

POSC 615 Avian Nutrition
Credits 3. 3 Lecture Hours.
Metabolism and nutritional requirements of domestic fowl including proteins, carbohydrates, fats, minerals, vitamins and related feed additives.
Prerequisites: POSC 411 and CHEM 228 or approval of instructor.

POSC 619 Molecular Methods for Microbial Characterization
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Underlying principles of molecular methods for microbial detection and characterization in natural and man-made ecosystems; emphasis on method application and data interpretation; emphasis on microbial pathogens and indicator organisms in foods and environment; laboratory covers select protocols.
Prerequisites: POSC 429; SCSC 405; FSTC 326/DASC 326; approval of instructor.
Cross Listing: SCSC 619, FSTC 619 and VTMI 619.

POSC 625/ANSC 623 Precision Diet Formula
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Theoretical and applied principles associated with precision feeding and diet formulation to optimize nutrient requirements; optimization using least-cost formulation, ingredient inventory, farm and feed mill management, and nutrient management of non-ruminants (poultry, swine, horse, and fish) and ruminant animals (beef and dairy).
Prerequisite: POSC 411 or ANSC 318.
Cross Listing: ANSC 623/POSC 625.

POSC 628 Advanced Poultry Meat Further Processing
Credits 3. 3 Lecture Hours.
The science and practice of value added products; physical, chemical, microbiological and functional characteristics of value-added poultry products as they affect consumer acceptance, efficiency of production and regulatory approval.
Prerequisite: Graduate classification.

POSC 629/FSTC 629 Microbiology of Food Irradiation
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Lecture plus laboratory overview of electron beam and x-ray based food irradiation principles; provides a working knowledge of using electronic pasteurization as a means of destroying microbial pathogens or retarding microbial spoilage in foods.
Cross Listing: FSTC 629/POSC 629.

POSC 630 Applied Animal Genomics
Credits 3. 3 Lecture Hours.
Theory and application of genomics by livestock industries; consideration of genetic markers, gene mapping methods, genome analysis and emerging technologies such as microarrays, transgenesis, cloning and marker assisted selection; exposure to bioinformatic tools for genomics.
Prerequisite: GENE 603 or approval of instructor.
Cross Listing: ANSC 629 and GENE 629.

POSC 634 Diseases of Poultry
Credits 3. 3 Lecture Hours.
Introduction to Poultry Biosecurity and Diseases. Basic understanding of infectious diseases of poultry; control and prevention of infectious diseases.
Prerequisites: BIOL 113/ BIOL 123.

POSC 645/NUTR 645 Nutrition and Metabolism of Vitamins
Credits 3. 3 Lecture Hours.
Chemistry and metabolism of the fat soluble and water soluble vitamins and their roles in animals; integrates cellular biochemistry and metabolism of the vitamins in the vertebrate animals.
Prerequisites: POSC 411 or ANSC 303/NUTR 303; BICH 410 or BICH 603.
Cross Listing: NUTR 645/POSC 645.

POSC 649/VTMI 649 Immunology
Credits 3. 3 Lecture Hours.
Cellular basis of the immune response; relationships between inflammation and acquired immunity, MHC and cell activation; the role of cytokines in immunoregulation and hypersensitivity, vaccines, and the mechanism of immunity to viruses, bacteria and parasites.
Prerequisite: VTPB 409 or equivalent.
Cross Listing: VTMI 649/POSC 649.

POSC 650/NUTR 650 Nutrition and Metabolism of Minerals
Credits 3. 3 Lecture Hours.
Nutritional significance of minerals in animal metabolism; chemical, biochemical and physiological role of minerals and homeostatic control in animal metabolism.
Prerequisites: POSC 411 or ANSC 303/NUTR 303; BICH 410 or BICH 603.
Cross Listing: NUTR 650/POSC 650.

POSC 660/VTMI 650 Experimental Immunology
Credits 4. 3 Lecture Hours. 3 Lab Hours.
Familiarization, development and integration of techniques into experimental design of immunologic investigation; antibody production, protein purification, immunofluorescence, agar-gel diffusion, immunoelectrophoresis and specialized serologic tests.
Prerequisites: BICH 410 or equivalent; 8 hours of microbiology.
Cross Listing: VTMI 650/POSC 660.
PSYC 209/AFST 209 Psychology of Culture and Diversity
Credits 3. 3 Lecture Hours.
Introduction to various issues surrounding an increasingly interconnected and globalized world by critically examining the dynamic relationship between psychological processes and diverse (e.g., motivation, memory, self, prejudice) socio-cultural contexts.
Prerequisite: PSYC 107.
Cross Listing: AFST 209/PSYC 209.

PSYC 210 Psychological Aspects of Human Sexuality
Credits 3. 3 Lecture Hours.
Interface between human sexuality, reproductive development, and gender roles across the lifespan; theoretical and research literature promotes understanding of hormonal influences, learning processes, cultural differences, sexual response, and love and attraction.
Prerequisite: PSYC 107.

PSYC 251 Survey of Industrial/Organizational Psychology
Credits 3. 3 Lecture Hours.
Literature and research in the basic theories and practices of I/O psychology including selection, testing, job analysis, performance appraisal, training, employee motivation, job satisfaction, leadership, and group processes within organizations. Students may not receive credit for both PSYC 251 and PSYC 352 or PSYC 251 and PSYC 353.

PSYC 289 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours. 0 to 4 Lab Hours.
Selected topics in an identified area of psychology. May be repeated for credit.
Prerequisite: PSYC 107.

PSYC 300/WGST 300 Psychology of Women
Credits 3. 3 Lecture Hours.
Theoretical and research literature relevant to psychological assumptions about the female personality. How these assumptions are being questioned or verified by recent experimental studies.
Prerequisite: PSYC 107.
Cross Listing: WGST 300/PSYC 300.

PSYC 303 Psychology of Women of Color
Credits 3. 3 Lecture Hours.
Interdisciplinary theories to study the unique yet intersectional experiences of women from different racial groups, ethnicities, nationalities and cultural backgrounds; scholarly research from the diversity science field; contemporary topics that have developed in a global context; examination of complex issues, which affect women of color across the lifespan.
Prerequisite: Grade of C or better in AFST 201 or PSYC 107 or WGST 200, or approval of instructor.
Cross Listing: AFST 303 and WGST 303.

PSYC 304 Psychology of Sport and Physical Activity
Credits 3. 3 Lecture Hours.
The relationship of psychology to sport; topics include history, application of learning principles, social psychology, personality variables, psychological assessment, youth sport, women in sport, the psychology of coaching, sports law and ethics.
Prerequisite: Junior or senior classification.

PSYC 305 Psychology of Adjustment
Credits 3. 3 Lecture Hours.
Adjustment problems of normal people; application of psychological principles to family, school and community life.
PSYC 306 Abnormal Psychology  
**Credits**: 3.3 **Lecture Hours.**  
Survey of behavior pathology; functional and organic psychoses, psychoneurosis, character disorders, psychophysiological disorders, alcohol and drug addiction and mental retardation; therapeutic and diagnostic methods.  
**Prerequisites**: PSYC 107; PSYC 203 and PSYC 204 or junior or senior classification.

PSYC 307 Developmental Psychology  
**Credits**: 3.3 **Lecture Hours.**  
Growth and development of normal child from infancy to adolescence with emphasis on elementary school years.  
**Prerequisites**: PSYC 107; PSYC 203 and PSYC 204 or junior or senior classification.

PSYC 311/NRSC 311 Comparative Psychology  
**Credits**: 3.3 **Lecture Hours.**  
Survey of problems, principles, and methods of animal psychology; animal learning, motivation, discriminative processes and abnormal, social and instinctual behaviors.  
**Prerequisites**: PSYC 107; PSYC 203 and PSYC 204 or junior or senior classification.  
**Cross Listing**: NRSC 311/PSYC 311.

PSYC 315 Social Psychology  
**Credits**: 3.3 **Lecture Hours.**  
Social psychological variables operating on the individual; results of experimental laboratory findings; interaction of personality and social behavior.  
**Prerequisites**: PSYC 107; PSYC 203 and PSYC 204 or junior or senior classification.

PSYC 319 History and Systems of Psychology  
**Credits**: 3.3 **Lecture Hours.**  
Historical analysis of pre-scientific psychology in philosophy and physiology through the period of the psychological "schools."  
**Prerequisite**: PSYC 107.

PSYC 320/NRSC 320 Sensation-Perception  
**Credits**: 3.3 **Lecture Hours.**  
Review of sensory physiology, sensory and perceptual phenomena and the major perceptual theories; current research in the field.  
**Prerequisites**: PSYC 107; PSYC 203 and PSYC 204 or junior or senior classification.  
**Cross Listing**: NRSC 320/PSYC 320.

PSYC 323 Psychology of Adolescence  
**Credits**: 3.3 **Lecture Hours.**  
Psychological problems of normal teenage individual; ways and means of aiding youth to meet these problems constructively.  
**Prerequisites**: PSYC 107; PSYC 203 and PSYC 204 or junior or senior classification.

PSYC 330 Personality  
**Credits**: 3.3 **Lecture Hours.**  
Review of personality theories, techniques of assessment and research relevant to understanding individual differences.  
**Prerequisites**: PSYC 107; PSYC 203 and PSYC 204 or junior or senior classification.

PSYC 331/NRSC 331 Social Neuroscience  
**Credits**: 3.3 **Lecture Hours.**  
Integration of biological and psychological explanations of social behavior; recent research and theories in social neuroscience; emotion, motivation, aggression, face processing, empathy, social cognition, and social relationships.  
**Prerequisites**: PSYC 107 or approval of instructor; junior or senior classification.  
**Cross Listing**: NRSC 331/PSYC 331.

PSYC 332/NRSC 332 Neuroscience of Learning and Memory  
**Credits**: 3.3 **Lecture Hours.**  
Brain mechanisms of learning and memory from molecular to behavioral levels; synaptic plasticity, model systems, multiple memory systems, diseases of learning and memory.  
**Prerequisites**: PSYC 107 or approval of instructor; junior or senior classification.  
**Cross Listing**: NRSC 332/PSYC 332.

PSYC 333/NRSC 333 Biology of Psychological Disorders  
**Credits**: 3.3 **Lecture Hours.**  
Neurobiology and clinical explanation of molecular mechanisms underlying psychiatric disorders and their drug treatments; depression and bipolar, anxiety disorders, mood disorders, psychosis and schizophrenia.  
**Prerequisites**: PSYC 107, PSYC 335/NRSC 335 or one year of biology and junior or senior classification.  
**Cross Listing**: NRSC 333/PSYC 333.

PSYC 335/NRSC 335 Physiological Psychology  
**Credits**: 3.3 **Lecture Hours.**  
Physiological bases of sensation, motor functions, emotion, motivation and complex psychological processes.  
**Prerequisites**: 6 hours of biology; PSYC 203 and PSYC 204 or junior or senior classification.  
**Cross Listing**: NRSC 335/PSYC 335.

PSYC 336/NRSC 336 Drugs and Behavior  
**Credits**: 3.3 **Lecture Hours.**  
Physiological, pharmacological and behavioral effects of psychoactive drugs, including short-term and long-term effects of psychoactive drugs, properties of addictive drugs, etiology of addiction, and treatments of drug addiction and withdrawal.  
**Prerequisites**: PSYC 335/NRSC 335 or NRSC 335/PSYC 335; junior or senior classification.  
**Cross Listing**: NRSC 336/PSYC 336.

PSYC 340/NRSC 340 Psychology of Learning  
**Credits**: 3.3 **Lecture Hours.**  
Survey of significant concepts, experimental methods and principles of learning.  
**Prerequisites**: PSYC 107 or INST 301; PSYC 203 and PSYC 204 or junior or senior classification.  
**Cross Listing**: NRSC 340/PSYC 340.

PSYC 345 Human Cognitive Processes  
**Credits**: 3.3 **Lecture Hours.**  
Human cognition and information processing: perception, attention, memory, reasoning and problem solving; experimental methods and data, and contemporary theories of human cognition.  
**Prerequisites**: PSYC 107; PSYC 203 and PSYC 204; or junior or senior classification.
PSYC 346 Psychology of Language  
Credits 3. 3 Lecture Hours.
Examines theories of how language is acquired, comprehended, produced, stored and used in normal and brain-impaired individuals.  
Prerequisites: PSYC 107; or junior or senior classification.

PSYC 352 Organizational Psychology  
Credits 3. 3 Lecture Hours.
Literature and research in basic theories and practices of organizational psychology including employee motivation, leadership, job satisfaction, counterproductive work behaviors, organizational commitment, culture, climate, communication, and group processes within organizations.  
Prerequisites: PSYC 203 and PSYC 204.

PSYC 353 Personnel Psychology  
Credits 3. 3 Lecture Hours.
Literature and research in basic theories and practices of personnel psychology including job analysis, testing and validation, selection, performance appraisal, training, and legal issues in employment decision making.  
Prerequisites: PSYC 203 and PSYC 204.

PSYC 354 Conflict and Negotiation  
Credits 3. 3 Lecture Hours.
Examination of the field of conflict and negotiation, including the structure and causes of common interpersonal, intragroup, and intergroup conflicts, effective negotiation strategies, ethics, mediation, and the development of negotiating skills.  
Prerequisite: PSYC 107.

PSYC 360/NRSC 360 Health Psychology and Behavioral Medicine  
Credits 3. 3 Lecture Hours.
Survey of health psychology emphasizing behavioral and lifestyle factors in health and illness, prevention and modification of health-compromising behaviors, health care utilization, and psychological management of chronic disorders and psychological management of chronic disorders and terminal illnesses.  
Prerequisite: PSYC 107.  
Cross Listing: NRSC 360/PSYC 360.

PSYC 365 Psychology of Aging  
Credits 3. 3 Lecture Hours.
Examination of the psychological aspects of the aging process including physiology and health, memory and intellectual functioning, personality and social relationships, emotional health and late life transition.  
Prerequisite: PSYC 107.

PSYC 371 Forensic Psychology  
Credits 3. 3 Lecture Hours.
Interface between psychology and the legal system; role of psychological theories and data, as well as mental health expertise, in the resolution of criminal trials and civil disputes; legal system's impact on the practice of psychology.  
Prerequisite: PSYC 203 and PSYC 204 or junior or senior classification.

PSYC 405/RELS 405 Psychology of Religion  
Credits 3. 3 Lecture Hours.
Review of world's religions and the psychological study of the religious experience; religion within the context of personality; religious development through social interactions; religion in psychological research and therapy.  
Prerequisites: PSYC 306 and PSYC 330 or approval of instructor.  
Cross Listing: RELS 405/PSYC 405.

PSYC 407 Behavioral Disorders of Children  
Credits 3. 3 Lecture Hours.
Behavior problems related to childhood; psychological aspects of mental retardation, emotional disturbance, physical handicaps and other disorders; causative factors, preventative and therapeutic methods explored; where feasible, practical experience included as requirement.  
Prerequisites: PSYC 306; PSYC 307 or equivalent.

PSYC 411 Psychology of Self  
Credits 3. 3 Lecture Hours.
Brief review of Freud's psychology and an in-depth coverage of Jung's psychology.  
Prerequisite: PSYC 306 or PSYC 330 or approval of instructor.

PSYC 414 Behavior Principles  
Credits 3. 3 Lecture Hours.
Behavioral analysis of humans' complex interactions with their environments: how behavioral repertories are constructed during maturation process; how existent behaviors are strengthened, weakened or eliminated; and how features of environment exercise control over behavioral components within a repertory.  
Prerequisites: 9 hours of psychology; PSYC 203 and PSYC 204 or junior or senior classification.

PSYC 450 Clinical Psychology  
Credits 3. 3 Lecture Hours.
Analysis of the field of clinical psychology with a particular focus on the theoretical and scientific bases for the practice of clinical psychology.  
Prerequisites: PSYC majors only; grade of C or better in PSYC 203, PSYC 204 and PSYC 306.

PSYC 470 Psychological Testing and Measurement  
Credits 3. 3 Lecture Hours.
Theories and techniques of measurement of psychological concepts; a range of measurement models and procedures; critical tasks of evaluating strategies for measuring psychological concepts and drawing inferences and interpretations from commonly used psychological assessments.  
Prerequisites: PSYC 203; junior or senior classification or approval of instructor.

PSYC 484 Field Experiences  
Credits 3. 7 Other Hours.
Participation in an approved mental health, mental retardation, school, industrial or experimental setting; field experiences supervised by an appropriate professor within an area of student interest; course requirements vary with the setting, the supervising professor and the needs of the individual student.  
Prerequisites: PSYC 203 and PSYC 204; 12 hours of psychology; GPR of 2.5 or better in all psychology courses; approval of instructor; major in psychology.

PSYC 485 Directed Studies  
Credits 0 to 3. 0 to 3 Other Hours.
Directed readings or research problems in selected areas designed to supplement existing course offerings. Individual report required.  
Prerequisites: 12 hours of psychology including completion of PSYC 204; GPR of 2.5 or better in all psychology courses; approval of instructor; major in psychology.

PSYC 489 Special Topics in...  
Credits 1 to 4. 1 to 4 Lecture Hours.
Selected topics in an identified area of psychology. May be repeated for credit.  
Prerequisites: PSYC 107 and approval of instructor.
PSYC 491 Research
Credits 0 to 3. 0 to 3 Other Hours.
Research conducted under the supervision of a chosen faculty member in the department of psychology; involves discussion and weekly presentation of student research projects. May be repeated for credit.
Prerequisite: PSYC 484 or PSYC 485; junior or senior classification.

PSYC 602 MEMORY & CONSCIOUSNESS
Credits 3. 3 Lecture Hours.

PSYC 603 Motivation and Cognitive Processes
Credits 3. 3 Lecture Hours.
Selected topics in areas of motivation and higher mental processes; symbolic processes in perceptual organization; learning and remembering, reasoning and creativity.

PSYC 604 Memory and Consciousness
Credits 3. 3 Lecture Hours.
Research on consciousness and memory; all levels of conscious awareness associated with memory retrieval from detailed personal experiences of remembering to unaware uses of memory; implicit and explicit memory; automatic and controlled processes; metacognitive explorations of consciousness.
Prerequisite: Graduate classification or approval of instructor.

PSYC 605 Learning and Cognitive Processes
Credits 3. 3 Lecture Hours.
Procedural and theoretical issues in study of basic learning mechanisms in animals and humans, including Pavlovian and instrumental conditioning. Application of this work to other domains and relevant biological mechanisms also discussed.
Prerequisite: PSYC 340/NRSC 340 or approval of instructor.
Cross Listing: NRSC 606/PSYC 606.

PSYC 606 Experimental Psychology
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Experimental methods; developing a general frame of reference for approaching experimental research problems.

PSYC 607 Introduction to Clinical Ethics and Techniques
Credits 3. 3 Lecture Hours.
Ethical and legal issues in clinical practice; development of listening and interpretation skills; supervised practicum in interviewing non-clinical subjects; structured role-play of clinical situations.
Prerequisite: Approval of instructor.

PSYC 609/ NRSC 609 Physiological Psychology
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Current research and methodological procedures on physiological bases of sensation-perception, memory and learning, arousal-sleep-attention, emotions and motivation.
Prerequisite: PSYC 335/NRSC 335.
Cross Listing: NRSC 609/PSYC 609.

PSYC 610 Organizational Psychology
Credits 3. 3 Lecture Hours.
Current literature and research in employee motivation, satisfaction, leadership, communication, group conflict and other group processes.

PSYC 611 Personnel Psychology
Credits 3. 3 Lecture Hours.
Application of psychological principles and research methods to the areas of selection, placement, job analysis, performance appraisal and training.
Prerequisite: PSYC 351 or equivalent and graduate classification or approval of instructor.

PSYC 613 Practicum in Psychological Assessment
Credits 1 to 4. 1 to 4 Other Hours.
Application of psychological assessment across the life-span; assessment of cognitive, intellectual, academic, and memory abilities and adaptive behavior; assessment of personality, behavioral style, and systems/environment; integration of assessment measures in comprehensive psychological evaluations; attendance required at Practicum Seminar designed to integrate research, coursework, and applied training and supervisory instruction from a faculty supervisor; at least 3 credits and no more than 18 credits applied to degree plan.
Prerequisite: PSYC 623 and PSYC 624, or approval of instructor.

PSYC 614 Practicum in Psychology
Credits 1 to 6. 1 to 6 Other Hours.
Practical on-the-job experience for graduate students. Activities will be guided by psychologists in the following areas: behavior modification, social, clinical, experimental and industrial. Supervision will be provided by members of University staff. May be taken more than once but not to exceed 18 hours of credit toward a graduate degree.
Prerequisite: Approval of instructor.

PSYC 615/NRSC 615 Perceptual Processes
Credits 3. 3 Lecture Hours.
Complex sensory and perceptual phenomena with emphasis on the relationship between perception and motivation, cognition, creativity and instinctive/ethological; learning/experiential factors in higher level perceptual processes.

PSYC 616 Treatment of Problem Behavior in Children and Families
Credits 3. 3 Lecture Hours.
Current methods of treating families with children displaying aggressive, hyperactive, underachieving and other problem behaviors in natural settings; behavior of children and adolescents at home, school and at play.
Prerequisite: Approval of instructor.

PSYC 617 Analytical Psychology
Credits 3. 3 Lecture Hours.
Survey emphasizing Jungian psychology but including coverage of Freudian psychology; application of analytical principles and concepts to a variety of clinical issues and situations.
Prerequisite: Approval of instructor.

PSYC 618 Psychology of Persuasion
Credits 3. 3 Lecture Hours.
Theory and scientific evidence regarding strategies and tactics of persuasion; explores theoretical controversies and presents potential integrations.

PSYC 619 History and Systems of Psychology
Credits 3. 3 Lecture Hours.
Historical examination of scientific psychology's antecedents in philosophy and physiology; early systems of psychology including structuralism, functionalism, behaviorism, Gestalt psychology and psychoanalysis.
Prerequisite: Graduate classification.

PSYC 620 Theories of Social Psychology
Credits 3. 3 Lecture Hours.
Current theories of social psychology and a review of related studies to these theories; theories of attitude change, prosocial behavior, aggression, equity, coalition formation, social learning and S-R theory applied to social behavior.
Prerequisite: PSYC 315 or SOCI 411.
PSYC 621 Seminar in Social Psychology
Credits 3.3 Other Hours.
Attitudes and persuasion; small group interaction and performance; prosocial behavior; aggression; self concept; applied social problems; gender differences in social interaction; and social cognition. May be repeated up to three times for credit.
Prerequisite: Approval of instructor.

PSYC 622 Emotions: Neuroscience, Cognitive, & Social Approaches
Credits 3.3 Lecture Hours.
Emotions: Neuroscience, Cognitive, & Social Approaches. Overview of the issues in the scientific study of emotions; focus on neuroscience, cognitive, and social approaches; introduction to theory and research in major areas of emotions research.
Prerequisite: Graduate classification.

PSYC 623 Psychological Assessment I
Credits 3.3 Lecture Hours.
Principles of psychological testing; uses and critical evaluation of tests of achievement, intelligence, aptitude and personality.

PSYC 624 Psychological Assessment II
Credits 3.3 Lecture Hours.
Theory and application of psychological assessment of children, adolescents, and adults; assessment of cognitive, intellectual, academic, and memory abilities and adaptive behavior; integration of assessment measures in comprehensive psychological evaluations.
Prerequisite: PSYC 623 or approval of instructor.

PSYC 625 Psychopathology
Credits 3.3 Lecture Hours.
Various symptom categories in psychopathology including differing theoretical conceptualizations of these symptom categories, and theories and research concerning etiology and treatment.

PSYC 626 Psychological Assessment of Children and Adolescents
Credits 3.3 Lecture Hours.
Theory and application of psychological assessment of children, adolescents, and adults; assessment of cognitive, intellectual, academic, and memory abilities and adaptive behavior; assessment of personality, behavioral style, family functioning, and child-focused systems; integration of assessment measures in comprehensive psychological evaluations.
Prerequisite: PSYC 624 or approval of instructor.

PSYC 628 Behavior Disorders in Children
Credits 3.3 Lecture Hours.
Different systems of classification including research and theory about the origins and anticipated outcomes of various emotional disorders; families of disturbed children; major treatment approaches and community resources for intervention.
Prerequisites: PSYC 407 or equivalent and graduate classification or approval of instructor.

PSYC 629 Seminar in Clinical/Community Psychology
Credits 3.3 Other Hours.
Assessment and treatment of specific clinical disorders such as depression, sexual dysfunctions and deviations, anxiety-based disorders, autism, marital distress and psychophysiological disorders. May be repeated up to three times for credit.
Prerequisites: PSYC 608 and PSYC 626; PSYC 623 or equivalent.

PSYC 630 Health Psychology and Behavioral Medicine
Credits 3.3 Lecture Hours.
Theory, research and practice of health psychology emphasizing the prevention and modification of health compromising behaviors; psychological management of stress, pain and chronic/terminal illness; effective interventions for specific health behaviors/disorders.
Prerequisite: Graduate classification.

PSYC 633 Gender and Minority Issues in Clinical Psychology
Credits 3.3 Lecture Hours.
Human behavior and mental health as a function of culture, gender and sexual orientation; discussion of absolutist, relativist and universalist perspectives in cross-cultural psychology; psychology of stereotype and prejudice; adjustment through acculturation and biculturalism; learning about our own and other cultures.

PSYC 634 Principles of Human Development
Credits 3.3 Lecture Hours.
Biological, psychological and cultural interrelationships in human development; principles and methods as illustrated in research and theoretical contributions; experiences in procedures of child study.
Prerequisite: Graduate classification.

PSYC 635 Behavioral and Cellular Research Seminar
Credits 2.2 Other Hours.
Expose graduate students to neuroscience research, theory, and proposal development; research presentations by guest speakers, faculty, and graduate students; Discussions, readings and presentations on issues related to research design, statistics, methodology, ethics, IACUC, grant writing, presentation skills, job talks, and other relevant topics. May be taken four times for credit.
Prerequisite: Graduate classification.

PSYC 636 Seminar in Developmental Psychology
Credits 3.3 Other Hours.
Cognitive development; social and emotional development; developmental abnormalities in connection with social/emotional and cognitive development; language acquisition; family processes; and development during infancy; recent developments in these fields. Topics will vary from semester to semester; may be repeated for credit up to three times as topics change.
Prerequisite: Graduate classification.

PSYC 637 Clinical Interventions I
Credits 3.3 Lecture Hours.
Theory, research and techniques related to evidence-based behavioral and cognitive-behavioral approaches to clinical interventions; ethical, professional, multicultural and history/systems issues in therapeutic psychological interventions.
Prerequisite: Enrollment in Clinical Psychology Graduate Program or approval of instructor.

PSYC 638 Clinical Interventions II
Credits 3.3 Lecture Hours.
Theory, research, and techniques related to evidence-based interpersonal, psychodynamic, group therapy, and family therapy approaches to clinical interventions; ethical, professional, multicultural, and history/systems issues in therapeutic psychological interventions.
Prerequisite: Enrollment in Clinical Psychology Graduate Program or approval of instructor.
PSYC 639 Pediatric Psychology
Credits 3. 3 Lecture Hours.
Application of clinical/counseling/school psychology to children and adolescents with chronic illnesses or disabilities and their families; theoretical foundations and models for consultation, assessment and intervention strategies; unique ethical and professional issues associated with research and service delivery in child health psychology/pediatric behavioral medicine.
Prerequisite: Approval of instructor.

PSYC 649/NRSC 649 Seminar in Behavioral Neuroscience
Credits 3. 3 Lecture Hours.
Behavioral neuroscience; including behavioral pharmacology, neuropharmacology, methods and techniques, drug reinforcement, behavioral toxicology, pain perception and ingestive behavior. May be repeated up to three times for credit.
Prerequisites: PSYC 606/NRSC 606 or equivalent; PSYC 609/NRSC 609; graduate classification.
Cross Listing: NRSC 649/PSYC 649.

PSYC 650/NRSC 650 Clinical Psychopharmacology
Credits 3. 3 Lecture Hours.
Survey of topics in clinical psychopharmacology, including pharmacodynamics, major neurotransmitter systems, and therapeutic applications and limitations.
Prerequisite: Graduate classification or approval of instructor.
Cross Listing: NRSC 650/PSYC 650.

PSYC 670 Professional Seminar in Social Psychology
Credits 2. 1 Lecture Hour. 2 Lab Hours.
Survey of recent theoretical, methodological and empirical developments in social psychology; different topics each semester will include theory and research on attitudes and persuasion, social cognition, interpersonal relationships, group processes, social development, and personality and social behavior. May be taken for credit up to eight times.
Prerequisite: Enrollment in the psychology PhD program.

PSYC 671/NRSC 671 Experimental Design for Behavioral Scientists
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Intensive practical study of designs of special interest to behavioral scientists; repeated measures designs.
Prerequisite: STAT 652 or equivalent.
Cross Listing: NRSC 671/PSYC 671.

PSYC 678/CPSY 678 Couples Therapy
Credits 3. 3 Lecture Hours.
Theory and practice of marital therapy emphasizing systems and communication approaches; effective strategies and techniques; therapy with specific marital problems and obstacles to effective therapy.
Prerequisites: CPSY 631; CPSY 639 or equivalent.
Cross Listing: CPSY 678/PSYC 678.

PSYC 680 Seminar in Organizational Psychology
Credits 3. 3 Other Hours.
Areas of organizational psychology: job stress, socialization processes, motivation, leadership, person perception in organizations, conflict management. May be repeated up to five times for credit; content will vary by semester.
Prerequisite: PSYC 610 or approval of instructor.

PSYC 681 Industrial/Organizational Psychology
Credits 1 to 3. 1 to 3 Lecture Hours.
Both research and applied colloquia provided by I/O psychologists and individuals in related disciplines.
Prerequisite: Graduate classification.

PSYC 682 Seminar in Personnel Selection and Placement
Credits 3. 3 Other Hours.
Personnel selection and placement including job analysis and evaluation, psychological testing, test development, psychometric theory, theories of test fairness, validity generalization, utility theory, performance appraisal and selection/placement decision models. May be repeated up to five times for credit; content will vary by semester.
Prerequisite: PSYC 611 or approval of instructor.

PSYC 684 Professional Internship
Credits 1 to 12. 1 to 12 Other Hours.
Full-time clinical experience in a departmentally-approved internship training facility. Limited to advanced doctoral students specializing in clinical psychology. May be taken up to 12 hours total.

PSYC 685 Directed Studies
Credits 1 to 4. 1 to 4 Other Hours.
Directed individual study of selected problem in psychology or special topics to fit small group requirements.
Prerequisite: Approval of instructor.

PSYC 689 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Selected topics in an identified area of psychology. May be repeated for credit.
Prerequisite: Graduate classification.

PSYC 690 Cognoscenti: Professional Issues in Cognitive Psychology
Credits 2. 2 Lecture Hours.
Introduction to current themes in research, theory and practice in cognitive psychology; presentations by guest speakers from within and outside the University.
Prerequisite: Graduate enrollment in psychology.

PSYC 691 Research
Credits 1 to 23. 1 to 23 Other Hours.
Research for thesis.

PSYC 697 Seminar in the Teaching of Introductory Psychology
Credits 3. 3 Lecture Hours.
Introductory methods relevant to teaching psychology; for graduate students assisting in the teaching of PSYC 107.
Prerequisite: Graduate classification.

RDNG - Reading

Courses
RDNG 291 Research
Credits 1 to 4. 1 to 4 Other Hours.
Research conducted under the direction of faculty member in reading. May be repeated two times for credit.
Prerequisites: Freshman or sophomore classification and approval of instructor.

RDNG 351 Reading in the Elementary School
Credits 3. 3 Lecture Hours.
Recent trends, issues, materials and procedures considered essential for effective teaching of reading, such as comprehension, word analysis, study skills, motivation, grouping, etc.
Prerequisites: Concurrent enrollment in RDNG 361; junior classification or approval of department head.
RDNG 361 Assessment in Reading Instruction
Credits 3.3 Lecture Hours.
Evaluation and use of commonly used achievement tests, development of criterion referenced tests and interpretation and construction of informal measures for assessing reading skills.
Prerequisites: Concurrent enrollment in RDNG 351; junior classification or approval of department head.

RDNG 371 Multicultural and Interdisciplinary Literature for Middle Grades
Credits 3.3 Lecture Hours.
Focuses on multicultural and interdisciplinary literature appropriate for middle grades students; implements and evaluates effective multicultural, interdisciplinary instruction through selection, use and development of literature in middle grades classroom.
Prerequisite: RDNG 351, RDNG 361.
Corequisite: INST 322 recommended.

RDNG 372 Reading and Writing across the Middle Grades Curriculum
Credits 3.3 Lecture Hours.
Acquaints middle-grade educators to reading and writing instruction in content area education; focuses on development of grade-appropriate reading/writing competencies and educational techniques appropriate to student development in various subjects.
Prerequisite: RDNG 351.

RDNG 450 Language and Reading
Credits 3.3 Lecture Hours.
Relationship between language and reading, dialect and reading, and linguistics.

RDNG 461 Teaching Reading Through Children’s Literature
Credits 3.3 Lecture Hours.
Use of past and contemporary literature for the motivation of wide leisure reading in the elementary grades.
Prerequisites: RDNG 351, RDNG 361.

RDNG 465 Reading in the Middle and Secondary Grades
Credits 3.3 Lecture Hours.
Reading needs of middle and secondary school students with emphasis upon curriculum organization for reading development and assessment of student progress in content area reading.

RDNG 467 Reading and the Language Arts
Credits 3.2 Lecture Hours. 3 Lab Hours.
Recent trends, issues and research on the impact of listening, oral language, process writing, grammar, spelling and handwriting on the development of reading strategies and communicative competence. Application of research in field settings.
Prerequisites: RDNG 351 and RDNG 361; admission to teacher education. Must be taken concurrently with TEFB 410, TEFB 412 and TEFB 413.

RDNG 468 Essential Foundations of Language and Literacy for All Learners
Credits 3.3 Lecture Hours.
Relationship among literacy, language, dialect and linguistics; role of the child, community and school through stages of literacy and second language learning; literacy instructional procedures for all learners including dyslexia.
Prerequisites: RDNG 351 or RDNG 372 or SPED 412.

RDNG 469 Assessment in Reading Instruction in Middle Grades
Credits 3.2 Lecture Hours. 6 Other Hours.
Evaluation of middle grades students reading performance; selection, understanding, and implementation of formal and informal evaluation procedures in classroom reading assessment, diagnosis, and instruction.
Prerequisites: RDNG 352; admission to teacher education; senior classification.
Corequisites: RDNG 470; MEFB 450.

RDNG 470 Reading/Language Arts Methods in Middle Grades Education
Credits 3.2 Lecture Hours. 6 Other Hours.
Investigate current trends and issues in teaching listening, oral language, process writing, spelling, grammar and handwriting; explores relationships among the development of various language arts and the development of reading strategies and communicational competencies of middle school learners; application of best instructional practices informed by research.
Prerequisites: MEFB 352; admission to teacher education; senior classification.
Corequisites: RDNG 490; MEFB 450.

RDNG 472 Teaching Writing in Elementary and Middle Grade Classrooms
Credits 3.3 Lecture Hours.
Focuses on effective methods of writing instruction and assessment for the middle grades; reviews and reinforces sound writing practices; exposes students to theory and research in the area of writing instruction.
Prerequisite: RDNG 351.

RDNG 473 Teaching Writing Across the Grades
Credits 3.3 Lecture Hours.
Evaluates and implements effective teaching and assessment of writing for all learners; analysis of issues influencing writing instruction.
Prerequisites: RDNG 351, RDNG 361.
Corequisites: RDNG 470; MEFB 450.

RDNG 490 Assessment in Reading Instruction
Credits 3.2 Lecture Hours. 6 Other Hours.
Evaluation of middle grades students reading performance; selection, understanding, and implementation of formal and informal evaluation procedures in classroom reading assessment, diagnosis, and instruction.
Prerequisites: RDNG 352; admission to teacher education; senior classification.
Corequisites: RDNG 470; MEFB 450.

RDNG 491 Research
Credits 1 to 4. 1 to 4 Other Hours.
Research conducted under the direction of faculty member in reading. May be repeated 2 times for credit.
Prerequisites: Junior or senior classification and approval of instructor.

RDNG 604 Reading Diagnosis
Credits 3.2 Lecture Hours. 3 Lab Hours.
Appraisal and diagnosis of reading problems; practicum in administration and interpretation of individual reading inventories.
Prerequisite: RDNG 649 or RDNG 674 recommended.

RDNG 610 Elementary Literacy Instruction for Facilitating STEM Learning
Credits 3.3 Lecture Hours.
Evidenced based instruction of literacy skills and strategies facilitating student learning of STEM content and processes; traditional literacy and new literacies.
Prerequisite: Graduate classification.

RDNG 612 Children’s Literature and Literacy
Credits 3.3 Lecture Hours.
Children’s Literature and Literacy. Critical selection and evaluation of various children’s literature genres; comparative studies of children’s literature; development, implementation and evaluation of research in children’s literature and literacy; integration of reading and response theory into the study of literature.
Prerequisite: Graduate classification.

RDNG 613 Multicultural Children’s Literature and Literacy
Credits 3.3 Lecture Hours.
Multicultural Children’s Literature and Literacy. Analysis and evaluation of Native American, Black and Hispanic children’s literature; development, implementation and evaluation of research in multicultural literature and literacy; analysis of issues influencing multicultural literature and literacy.
Prerequisites: RDNG 612; graduate classification.
RDNG 614 Reading Research and Trends  
Credits 3. 3 Lecture Hours.  
Exploration of recent research in reading; identification of trends and patterns in issues attached, research designs employed and consistent findings; generation of new research hypotheses and guidelines for improving current practice.  
Prerequisites: Doctoral classification or approval of instructor.

RDNG 615 Theories of the Reading Process  
Credits 3. 3 Lecture Hours.  
Seminar for doctoral students and advanced master's students to study and critique major theories of the reading process that have been influential in the fields of reading, language arts, educational psychology, and related fields.  
Prerequisite: Doctoral status or approval of instructor.

RDNG 616 Organization and Supervision of Reading Programs  
Credits 3. 3 Lecture Hours.  
Organization of school reading programs; role of reading supervisor in program implementation, staff development, program evaluation.  
Coordination of reading services with total curriculum.  
Prerequisites: Doctoral classification; approval of instructor.

RDNG 620 Literacy and Language  
Credits 3. 3 Lecture Hours.  
Orthography of different languages and its relation to literacy acquisition and failure to acquire basic literacy skills. This is a seminar course in reading, language arts, bilingual education, psychology, linguistics, and related fields.  
Prerequisite: Graduate classification.

RDNG 630 Writing: Development, Assessment and Instruction  
Credits 3. 3 Lecture Hours.  
Examines the nature of writing development and how to assess both formally and informally; includes successful instructional techniques based on empirical evidence.  
Prerequisite: Graduate classification.

RDNG 642 Clinic Teaching in Reading  
Credits 3. 1 Lecture Hour. 6 Lab Hours.  
Practicum in recognition, diagnosis, remediation and corrective procedures of reading-study problems; demonstration and laboratory analysis of physiological and psychological factors related to reading disabilities.  
Prerequisite: RDNG 649 or RDNG 674.

RDNG 649 Reading Instruction in High School and College  
Credits 3. 3 Lecture Hours.  
Basic principles of reading instruction; nature and scope of total reading program; methods, materials and organization of developmental, corrective and speed-reading programs in high school and college.  

RDNG 650 Foundations of Reading Instruction  
Credits 3. 3 Lecture Hours.  
Psychological, linguistic and physical factors related to reading performance; implications for content and teaching methods; appraisal of current research and related reading for teachers, supervisors and reading specialists.  
Prerequisites: RDNG 649 and RDNG 674 or approval of instructor.

RDNG 674 Developmental Reading in the Elementary School  
Credits 3. 3 Lecture Hours.  
Methods and materials of reading instruction in the elementary grades; past, present and emerging programs; organization and administration of programs and classroom management; teaching reading to special groups; issues in reading.  

RDNG 689 Special Topics in...  
Credits 1 to 4. 1 to 4 Lecture Hours.  
Selected topics in an identified area of reading. May be repeated for credit.

**RELS - Religious Studies**

**Courses**

RELS 211/HUMA 211 Hebrew Scriptures  
Credits 3. 3 Lecture Hours.  
Philosophical concepts of the Hebrew Scriptures as they relate to the development of religious and ethical ideas.  
Cross Listing: HUMA 211/RELS 211.

RELS 213/HUMA 213 New Testament  
Credits 3. 3 Lecture Hours.  
The origin and development of the religious and philosophical concepts of the New Testament.  
Cross Listing: HUMA 213/RELS 213.

RELS 220 History of Christianity: Origins to the Reformation  
Credits 3. 3 Lecture Hours.  
History of Christian doctrine, ecclesiastical organization, and religious practice, origins through Reformation, with emphasis on religion and society; life and teachings of Jesus; apostolic church; patristic period; Christianization of Roman Empire and northern Europe; monasticism; medieval church; Gregorian reform; heresy; papal monarchy; schism and conciliarism; reformations of the sixteenth century.  
Cross Listing: CLAS 220 and HIST 220.

RELS 221/HIST 221 History of Islam  
Credits 3. 3 Lecture Hours.  
Introduction to the history of Islam, from the origins of the religion to the present; development of Islamic law; gender issues; expansion of Islam to Sub-Saharan Africa and South Asia; globalized Islam.  
Cross Listing: HIST 221/RELS 221.

RELS 251/CLAS 251 Classical Mythology  
Credits 3. 3 Lecture Hours.  
Introduction to the most important myths of Greeks and Romans; ancient and modern methods of interpreting myths; the role of myths in ancient literature; readings in English.  
Cross Listing: CLAS 251/RELS 251.

RELS 289 Special Topics in...  
Credits 1 to 4. 1 to 4 Lecture Hours.  
Selected topics in an identified area of religious studies. May be repeated for credit.  
Prerequisite: Approval of instructor.

RELS 302 Women and Religion  
Credits 3. 3 Lecture Hours.  
Investigation of women's position in religious institutions historically and/or currently, religion's influence on women's roles and status, and women's attempts to define their own religious perspectives; draws on sociological and philosophical insights and methods.  
Prerequisite: Junior or senior classification or approval of instructor.  
Cross Listing: SOCI 302 and WGST 302.

RELS 303 Near Eastern Religions  
Credits 3. 3 Lecture Hours.  
Beliefs and practices of Judaism, Zoroastrianism, Christianity, and Islam with particular attention to their philosophical presuppositions.  
Cross Listing: HUMA 303/RELS 303.
RELS 364/HISP 364 Diversity Lessons from Medieval Spain
Credits 3.3 Lecture Hours.
Crucible of cultures—Christian, Jewish, and Muslim—that was medieval Spain and modern implication of the experience in diversity.
Prerequisites: ENGL 104 and junior or senior classification or approval of instructor.
Cross Listing: HISP 364/RELS 364.

RELS 365/HIST 365 History of Religion in America to 1860
Credits 3.3 Lecture Hours.
Religion in America from European origins through New England Puritanism, U. S. Constitutional issues, immigration, revivalism, and the Civil War; relationship between dissenters, utopians, and visionaries versus mainstream counterparts.
Cross Listing: HIST 365/RELS 365.

RELS 366/HIST 366 History of Religion in America from 1860 to the Present
Credits 3.3 Lecture Hours.
Religion in America from the Civil War; relationship of religion and science, ethnic assimilation, emergence of fundamentalism, mass evangelism, cults and criticisms of contemporary culture; examination of social and racial problems by the major religious traditions.
Cross Listing: HIST 366/RELS 366.

RELS 371/HISP 371 Hispanic Religions
Credits 3.3 Lecture Hours.
Exploration of the history and practice of Hispanic religion, including spirit possession, evil eye, consumption of sacred substances, healing traditions, ex-votos, relics, prophecy, omens, monsters, astrology, witchcraft, the Inquisition, festivals, pilgrimage, mystics and religious contributions of diverse ethnic groups.
Prerequisite: Junior or senior classification or approval of instructor.
Cross Listing: HISP 371/RELS 371.

RELS 392/ENGL 392 Studies in Literature, Religion, and Culture
Credits 3.3 Lecture Hours.
Exploration of literature treating significant religious topics in the context of cultural setting; features current faculty research on such topics as Tolkien and the making of myth, C. S. Lewis, texts and cultures of the Middle East and Victorian women writers and religion.
Prerequisites: 3 credits of literature at 200-level or above; junior or senior classification.
Cross Listing: ENGL 392/RELS 392.

RELS 403/ANTH 403 Anthropology of Religion
Credits 3.3 Lecture Hours.
Anthropological theories of the relationship of religious behavior to social structure and cultural change, with particular reference to non-Western, pre-industrial societies.
Cross Listing: ANTH 403/RELS 403.

RELS 405/PSYC 405 Psychology of Religion
Credits 3.3 Lecture Hours.
Review of world's religions and the psychological study of the religious experience; religion within the context of personality; religious development through social interactions; religion in psychological research and therapy.
Prerequisites: PSYC 306 and PSYC 330 or approval of instructor.
Cross Listing: PSYC 405/RELS 405.
RELS 418 European Intellectual History from Ancient Greece to the Early Middle Ages
Credits 3. 3 Lecture Hours.
Political and social history of selected major figures and important movements in political theory, literature, sociology, art, economics and philosophy from Pre-Socratic Greece through the formative stages of the Christian Middle Ages.
Prerequisite: Junior or senior classification or approval of instructor.
Cross Listing: CLAS 418 and HIST 418.

RELS 419/HIST 419 European Intellectual History from the High Middle Ages to the 17th Century
Credits 3. 3 Lecture Hours.
Political and social history of selected major figures and important movements in political theory, literature, sociology, art, economics and philosophy from the founding of Scholasticism and the University System to the New Philosophy and science of 17th century.
Prerequisite: Junior or senior classification or approval of instructor.
Cross Listing: HIST 419/RELS 419.

RELS 464/PHIL 464 Modern Jewish Thought and Philosophy
Credits 3. 3 Lecture Hours.
An overview of modern Jewish thought and philosophy spanning Jewish European thinkers from the 18th century to the 20th century.
Prerequisite: Junior or senior classification.
Cross Listing: PHIL 464/RELS 464.

RELS 480/COMM 480 Religious Communication
Credits 3. 3 Lecture Hours.
The role of religious communication as manifested in speeches, sermons, debates, campaigns, and social movements throughout history. May be taken two times for credit.
Prerequisite: Junior or senior classification or approval of instructor.
Cross Listing: COMM 480/RELS 480.

RELS 485 Directed Studies
Credits 0 to 6. 0 to 6 Other Hours.
Readings and/or assigned projects for specific needs of students minoring in religious studies; directed independent or individual study in an identified area of religious studies.
Prerequisite: Approval of coordinator of religious studies.

RELS 489 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Selected topics in an identified area of religious studies. May be repeated for credit.
Prerequisite: Approval of instructor.

RENR-Renewable Natural Resources

Courses

RENR 201 Computer Applications in Agriculture
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Fundamentals of computer use and the application of agricultural software; computer use in decision making and problem solving in agriculture.
Prerequisite: MATH 102.

RENR 205 Fundamentals of Ecology
Credits 3. 3 Lecture Hours.
Principles of ecology using a holistic approach treating plants, animals and humans as one integrated whole; composition, structure, nutrient cycles and energetics of biotic communities; adaptations to environmental factors; biotic relationships; and problems of environmental quality and resource use.

RENR 215 Fundamentals of Ecology--Laboratory
Credit 1. 3 Lab Hours.
Sampling and estimating plant-animal populations, measuring environmental factors and recognizing and studying morphological, physiological and behavioral adaptations of plants and animals to biotic or abiotic influences.*

RENR 345 Park Ecology and Management
Credits 3. 1 Lecture Hour. 4 Lab Hours.
Classroom and hands-on exposure to outdoor recreation resources management in a major national park facing complex challenges; interactive problem-solving to understand natural resources, management strategies and issues related to a park's broader region; includes one intensive week in Smoky Mountains National Park. May be taken two times for credit.
Prerequisites: Junior or senior classification; or approval of instructor.

RENR 375 Conservation of Natural Resources
Credits 3. 3 Lecture Hours.
Principles and philosophies associated with the development, management and use of natural resources; ecological and social implications inherent in management alternatives involving the natural environment and use of renewable natural resources.

RENR 400 Study Abroad in Natural Resources
Credits 2 to 12. 2 to 12 Lecture Hours.
Provides students with an opportunity to gain first-hand experience in natural resource management in foreign countries; focus on the interaction of public, communal and private land tenure systems with the ecological and human dimensions of rangeland management, wildlife conservation and nature-based tourism. May be taken two times for credit.
Prerequisite: Junior or senior classification.

RENR 405 GIS for Environmental Problem Solving
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Interdisciplinary approach to train students to integrate GIS and relevant technologies for environmental problem solving; helps students relate learning to real world situations; students conceptualize, develop and manage projects using real data; one term project required.
Prerequisite: RENR 201 or equivalent or approval of instructor.

RENR 410 Ecosystem Management
Credits 4. 3 Lecture Hours. 3 Lab Hours.
Concepts and practices relevant to the development of landscape/regional level ecosystem management plans; an ecosystem management plan will be developed utilizing a strategic management/COORDRATED resources approach to establish resource goals, ecosystem resource analysis and impact evaluation, and implementation compatible with societal and individual concerns.
Prerequisite: Senior classification or approval of instructor.*

RENR 460/RPTS 460 Nature, Values, and Protected Areas
Credits 3. 3 Lecture Hours.
Writing-intensive discussion of the ways in which protected areas reflect human values about nature; identify stakeholders in and around protected areas, exploring how interests either conflict or coincide; evaluate social, economic, cultural, and ecological trade-offs of different approaches to conservation.
Prerequisite: RPTS 307 or RPTS 316; or 9 hours of credit in natural resource courses.
Cross Listing: RPTS 460/RENR 460.*
RENR 470 Environmental Impact Assessment  
Credits 3. 3 Lecture Hours.  
The evolution of natural resources regulatory policies and how this influences current procedures for environmental/natural resources assessment and management; demonstration of the environmental impact assessment procedures and policy issues associated with environmental impacts.  
Prerequisite: Senior classification or approval of instructor.

RENR 489 Special Topics in...  
Credits 1 to 4. 1 to 4 Lecture Hours.  
Selected topics in an identified field of renewable natural resources. May be repeated for credit.  
Prerequisite: Approval of instructor.*

RENR 650/ESSM 676 Leadership Development and Management of Environmental NGOs  
Credits 3. 3 Lecture Hours.  
Trends and increasing power of NGOs in environment and sustainable development; understanding of the organizational structures, functions, planning and management processes of environmental NGOs; technical skills and leadership qualities for careers with environmental NGOs.  
Prerequisite: Graduate classification.  
Cross Listing: ESSM 676/RENR 650.

RENR 659 Ecological Economics  
Credits 3. 3 Lecture Hours.  
Study of the relationships between ecosystems and economic systems; understanding the effects of human economic endeavors on ecological systems and how the ecological benefits and costs of such activities can be quantified and internalized.  
Prerequisite: Graduate classification.  
Cross Listing: AGEC 659 and ESSM 671.

RENR 660/ESSM 672 Environmental Impact Analysis for Renewable Natural Resources  
Credits 3. 3 Lecture Hours.  
Analysis and critique of contemporary environmental analysis methods in current use; environmental impact statements; national policies; political, social and legal ramifications as related to development and use of renewable natural resources.  
Cross Listing: ESSM 672/RENR 660.

RENR 662 Environmental Law and Policy  
Credits 3. 3 Lecture Hours.  
Analysis of the legal theories used to allocate and protect environmental resources; common law, federal and state statutes, and international treaties dealing with the environment; policies and laws for controlling air, water, solid waste, toxic waste and water pollution; species protection and natural resource use.

RLEM-Rangeland Ecology & Mgmt  

Courses  

RLEM 324 Application of Rangeland Management Principles  
Credits 1. 2 Lab Hours.  
An opportunity to experience and visualize rangeland management practices under field conditions and to develop a practical understanding of rangeland planning and principles in an integrated fashion.  
Prerequisite: Junior or senior classification or approval of instructor.

RLEM 401 Plant-Herbivore Dynamics  
Credits 3. 3 Lecture Hours.  
Evaluates the effects of herbivory at the plant population and community levels; developmental plant morphology and plant resistance to grazing; foraging strategies of herbivores relating to landscape/plant attributes along with animal nutritional needs; manipulation of the grazing process to meet management objectives.  
Prerequisite: ESSM 314.*

RPTS - Rec, Park & Tourism Sci  

Courses  

RPTS 201 Foundations of Recreation, Parks and Tourism  
Credits 3. 3 Lecture Hours.  
(PLHD 1336) Foundations of Recreation, Parks and Tourism. Analysis of the elements comprising a community, community assessment techniques and community development processes engaged by stakeholders and residents to improve living conditions; definitions and principles associated with community development.

RPTS 209 Park and Tourism Operations  
Credits 3. 2 Lecture Hours. 2 Lab Hours.  
Planning, execution and supervision of field maintenance and operations.

RPTS 291 Research  
Credits 1 to 3. 1 to 3 Other Hours.  
Research conducted under the direction of faculty member in recreation park and tourism sciences.  
Prerequisites: Freshman or sophomore classification and approval of instructor.

RPTS 300 Supervised Field Studies  
Credits 3. 3 Other Hours.  
Survey and application of principles of recreation and parks; selected aspects of park and recreation management in an operational setting under the supervision of an approved agency; preparation and presentation of a comprehensive analysis of a specific problem; offered on an individual basis. May be repeated for credit.  
Prerequisites: RPTS 307; 12 hours of credit in recreation and parks.

RPTS 301 Leisure and Outdoor Recreation in American Culture  
Credits 3. 3 Lecture Hours.  
Introduction to the fundamental concepts of leisure and outdoor recreation and how they influence us as individuals, groups and society; critical factors such as self, family, lifespan, ecology, health, work patterns, communications, diversity, popular culture, and consumption are studied in relationship to past, present and future leisure patterns.

RPTS 302 Application of Tourism Principles  
Credits 3. 3 Lecture Hours.  
Tourism principles applied at local, regional and international levels; examination of the scale, scope and organization of the industry including marketing destinations and experiences; issues related to the economic, technological and political aspects of tourism.  
Prerequisite: Junior or senior classification.
RPTS 304 Administration of Recreation Resource Agencies
Credits 3. 3 Lecture Hours.
Contemporary issues and related administrative practices associated with the provision of recreation services and settings; addresses principles associated with recreation resource agency administration; personnel and customer-related administrative issues in recreation resource agencies; concepts and principles relevant to commercial and non-profit recreation resource agencies.
Prerequisites: RPTS 201 and RPTS 209; RENR 201.

RPTS 307 Methods of Environmental Interpretation
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Communication processes and practices between resource managers and publics using or affected by natural, cultural and tourism resource places; principles and techniques of gathering, analyzing and disseminating information through various media, such as exhibits, presentations, publications and programs.*

RPTS 308 Foundations of Community and Community Development
Credits 3. 3 Lecture Hours.
Analysis of the elements comprising a community, community assessment techniques and community development processes engaged by stakeholders and residents to improve living conditions; definitions and principles associated with community development.
Prerequisite: Junior or senior classification.

RPTS 311 Planning and Implementation of Events and Programs
Credits 3. 3 Lecture Hours.
Planning, operations, administration and evaluation; includes creation and implementation of programs and special events with budgeting, operational and venue logistics, marketing, fund raising, hospitality training and participant satisfaction.
Prerequisite: Junior or senior classification.*

RPTS 316 Recreational Management of Wildlands
Credits 3. 3 Lecture Hours.
Management and recreational use of wild and wilderness areas and multiple use management areas; systems and techniques for dealing with management problems in outdoor recreation.
Prerequisite: Junior or senior classification.*

RPTS 320 Event Management and Operations I
Credits 3. 3 Lecture Hours.
Principles and applications for effective planning and management of events; planning, promotion, operational logistics, sponsorship and evaluation.
Prerequisite: RPTS 311.

RPTS 321 Event Management and Operations II
Credits 3. 3 Lecture Hours.
Advanced principles and applications of event management, including practical knowledge relating to contracting, media, fund raising, compliance and oversight, risk management, site logistics, sponsorships and vendor management.
Prerequisites: RPTS 311 and RPTS 320.

RPTS 331 Tourism Marketing
Credits 3. 3 Lecture Hours.
Application of basic tourism marketing principles and concepts in government, business, and social-cause contexts; situation analysis and operational evaluation; decision making in terms of product, place, price, and channel of distribution mixes for tourism attractions and services.
Prerequisite: RPTS 302 and junior or senior classification.

RPTS 336 Research and Analysis in Recreation and Tourism
Credits 3. 3 Lecture Hours.
Examination of current tourism and recreation research emphasizing specialized research methodology, adaptive techniques and methods of research useful to the recreation and tourism professional; analysis of the methods of problems identification, formulation and solution.
Prerequisites: RENR 201 and STAT 201 or equivalents; all mathematics requirements satisfied.*

RPTS 340 Recreation, Parks, Tourism and Diverse Populations
Credits 3. 3 Lecture Hours.
Review of major judicial decisions and civil rights laws on provision and distribution of leisure services in society; influence of age, disability, ethnicity, national origin, race, religion and gender on individual’s preferences for particular experiences; implications of individual differences for the provision of services.
Prerequisite: Junior or senior classification.*

RPTS 360 Ecotourism: Principles and Practices
Credits 3. 3 Lecture Hours.
Principles and practices related to ecotourism; analyzes outcomes of ecotourism for conservation and development; ecotourism as a strategy to protect culture and the physical environment.
Prerequisite: RPTS 302.

RPTS 370 Youth Development Organizations and Services
Credits 3. 3 Lecture Hours.
Changing views of adolescence and youth culture in the United States; developmental assets and principles of developing positive youth development supports, opportunities and services; mentoring and staff development for youth serving agencies; goals, program emphases, administrative methods and membership of major youth serving organizations.

RPTS 371 Understanding and Developing Effective Skills for Youth Development
Credits 3. 3 Lecture Hours.
Development of skills needed to effectively work with youth; issues such as youth participation, conflict resolution, youth-adult collaboration, leadership development, youth empowerment and youth voice; connection of theoretical concepts to practice.
Prerequisites: RPTS 370 and junior or senior classification.

RPTS 401 Tourism and Recreation Enterprises
Credits 4. 3 Lecture Hours. 2 Lab Hours.
Market and financial feasibility analysis; resource characteristics, location and market aspects of tourism and recreation enterprises; sources of funding for facility development; approaches to marketing recreation, park and tourism services; applying knowledge to case study situations.
Prerequisites: RPTS 304 or RPTS 423 and senior classification.*

RPTS 402 Park Planning and Design
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Classification of areas according to primary function, location and clientele served; basic park planning principles involving scale, circulation, function and spatial relationships; methodology for establishing planning goals, objectives and planning strategies.
Prerequisites: Junior or senior classification.*

RPTS 403 Financing and Marketing Recreation, Park and Tourism Resources
Credits 4. 3 Lecture Hours. 2 Lab Hours.
Public sources of funding for facility development and of approaches to marketing recreation, park, and tourism services; applying knowledge to case study situations.
Prerequisites: RPTS 304 or RPTS 423; senior classification.
RPTS 404/SOCI 404 Sociology of the Community
Credits 3.3 Lecture Hours.
Organization of American communities examining the bases of community, types of communities and the changes faced by communities.
Prerequisite: SOCI 205; Junior or senior classification.
Cross Listing: SOCI 404/RPTS 404.

RPTS 408 Community Development and Supporting Institutions
Credits 3.3 Lecture Hours.
Scope, function and mission of domestic and international organizations that support community development efforts.
Prerequisites: RPTS 308 or approval of instructor; junior or senior classification.

RPTS 411 Cruise Tourism
Credits 3.3 Lecture Hours.
Overview of cruise tourism; management of service sectors; understanding of cultural aspects of places traveled; cruise marketing/decision making; geography of cruising; youth programming; agri-tourism; identification of issues related to the economic, technological and political aspects of cruise tourism.
Prerequisite: Junior or senior classification.

RPTS 421 Planning and Implementation of Events in Resorts and Hotels
Credits 3.3 Lecture Hours.
Principles and applications for effective planning and management of events in resorts and hotels; planning, promotion, operational logistics, sponsorship and evaluation.
Prerequisite: Junior or senior classification.

RPTS 423 Tourism Management
Credits 3.3 Lecture Hours.
Management issues and tools related to the travel and tourism industry; history, planning, operations, leading, directing and controlling tourism businesses; complexity and scope of tourism systems; issues related to ethics and sustainability; managing tourism in different environments; roles of technology and information technology; future of tourism.
Prerequisite: RPTS 302.*

RPTS 426 Tourism Impacts
Credits 3.3 Lecture Hours.
Consequences and impacts of various kinds of tourism development for host communities and regions; read and evaluate case studies from Texas, other areas in the United States and internationally; economic, environmental, social, cultural and political impacts associated with tourism proposals, project development, tourist activity, industry expansion and industry decline.
Prerequisite: RPTS 302.

RPTS 441 Tourism Experience
Credits 3.3 Lecture Hours.
Theoretical foundation of tourism experiences from an interdisciplinary perspective, including the role of humans, nature/landscapes, built environments and technologies in staging tourism-experiences; draws implications for the design/planning, management and marketing of tourism venues such as events, festivals, museums, hotels/resorts, cruise ships, cities, theme parks, and websites.
Prerequisite: Junior or senior classification or approval of instructor.*

RPTS 444 Service Quality for Hospitality Organizations
Credits 3.3 Lecture Hours.
Application of SERVQUAL concepts with focus on implementing measures to enhance customer service; in-depth study of planning and administering hospitality service strategies, measurement of service delivery, repair and recovery of service delivery gaps, and management and training of employees; practical applications of research in the field.
Prerequisite: Junior or senior classification.

RPTS 445 Sustainability in International Tourism
Credits 3.3 Lecture Hours.
International tourism with a focus on the diversity of tourism practices and policies around the world and approaches scholars use to study tourism planning, management, marketing, sustainability and impacts; includes a required international field trip during spring break.
Prerequisite: Junior or senior classification or approval of instructor.*

RPTS 446 Information Technology Adoption and Use in Recreation, Park and Tourism Organizations
Credits 3.3 Lecture Hours.
Theories of technology adoption and diffusion in recreation, park and tourism organizations; use of technology for knowledge management, benchmarking, and collaboration within leisure and tourism organizations.
Prerequisite: RENR 201.

RPTS 454 Amazon Field School
Credits 4.4 Lecture Hours.
Investigation of social and ecological complexities of biodiversity conservation in tropical ecosystems; biological and social science approaches to evaluate causes, consequences and solutions to biodiversity loss through ecology, culture and governance.
Prerequisite: Junior or senior classification with a minimum GPA of 2.0 and approval of instructor.
Cross Listing: VTPB 404 and WFSC 454.

RPTS 460/RENR 460 Nature, Values, and Protected Areas
Credits 3.3 Lecture Hours.
Writing-intensive discussion of the ways in which protected areas reflect human values about nature; identify stakeholders in and around protected areas, exploring how interests either conflict or coincide; evaluate social, economic, cultural, and ecological trade-offs of different approaches to conservation.
Prerequisite: RPTS 307 or RPTS 316; or 9 hours of credit in natural resource courses.
Cross Listing: RENR 460/RPTS 460.*

RPTS 474 Management of Programs and Services for Youth
Credits 4.3 Lecture Hours. 2 Lab Hours.
Organizational behavior, administration and management of public, non-profit and commercial youth programs and agencies; strategic planning, marketing, financial resource development, budgeting and fiscal management; contemporary issues facing youth development field; international perspective on youth agencies.
Prerequisite: RPTS 304, RPTS 370 and RPTS 371.

RPTS 476 Leadership for Outdoor Recreation
Credits 3.3 Lecture Hours.
Leadership principles related to outdoor recreation; classroom instruction and experiential learning; skills training through field trips; risk management planning, environmental education, group facilitation, and trip planning.
Prerequisite: RPTS 370.
RPTS 478 Youth Development Practice
Credits 3. 3 Lecture Hours.
Application of youth development philosophy in community settings; principles and practices of community youth development and existing youth development models; local efforts related to community youth development.
Prerequisite: RPTS 370, RPTS 371 and junior or senior classification.

RPTS 481 Seminar
Credit 1. 1 Lecture Hour.
Development of knowledge and skills necessary for employment in the recreation, park and tourism fields; focus on career preparation and job search strategies, professionalism, networking and opportunities for advanced education.
Prerequisite: Junior or senior classification.

RPTS 484 Internship
Credits 1 to 6. 1 to 6 Other Hours.
Practical experience working in a professional recreation, park or tourism setting. Offered on an individual basis. May be repeated for credit.
Prerequisite: Approval of department head.

RPTS 485 Directed Studies
Credits 1 to 4. 1 to 4 Other Hours.
For individual research by advanced undergraduates upon a broad range of subjects not included in established courses.
Prerequisite: Junior classification or approval of department head.

RPTS 489 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours. 0 to 9 Lab Hours.
Selected topics in an identified field of recreation and parks. May be repeated for credit.*

RPTS 491 Research
Credits 1 to 3. 1 to 3 Other Hours.
Research conducted under the direction of faculty member in recreation park and tourism sciences. Registration in multiple sections of this course are possible within a given semester provided that the per semester credit hour limit is not exceeded.
Prerequisites: Junior or senior classification and approval of instructor.

RPTS 601 Interrelationships of Recreation and Leisure Concepts
Credits 3. 3 Lecture Hours.
History and philosophy of the field of recreation and parks; fundamentals of planning, development and management of resources allocated for recreation, parks and tourism purposes; development of the recreation movement with broad treatment of the role of recreation and parks in contemporary society.

RPTS 602 Social Science Foundations of Recreation, Parks and Tourism
Credits 3. 3 Lecture Hours.
Sociological and social psychological dimensions of leisure, recreation and related behavior; nature and function of leisure for individuals and for society; implications for development and management of recreation resources.
Prerequisite: RPTS 601 or previous academic background in recreation and parks.

RPTS 603 Financing and Marketing Park and Recreation Resources
Credits 3. 3 Lecture Hours.
Positioning park and recreation services; traditional and non-traditional sources of financing for developing services and facilities; philosophy and techniques of marketing services and facilities.

RPTS 604 Principles of Community and Community Development
Credits 3. 3 Lecture Hours.
Examines different theories about community development as well as the concept of community; explores measurement and other methodological issues in the conduct of basic and applied community research.
Prerequisite: Graduate classification.

RPTS 605 Community Organization
Credits 3. 3 Lecture Hours.
Examines how community organization and institutions differ and result from diverse social, cultural and demographic factors; explores how these factors restructure communities over time and community responses to restructuring.
Prerequisite: Graduate classification.

RPTS 606 Overview of Tourism
Credits 3. 3 Lecture Hours.
Theoretical introduction to the field of tourism sciences; the cooperative and dynamic nature of decision-making in tourism; the contributions made by various disciplines towards understanding the consequences of tourism trade and activity; and identification of critical issues in the study of travel and tourism.

RPTS 609 Social, Economic and Cultural Issues in Outdoor Recreation and Natural Resources
Credits 3. 3 Lecture Hours.
Survey of socio-economic and cultural characteristics impinging on provision of outdoor recreation opportunities in urban and non-urban settings; implications of social and cultural factors on recreation resource use patterns, resource development and policy issues.

RPTS 615 Analytic Techniques in Recreation, Parks and Tourism
Credits 3. 3 Lecture Hours.
Analysis of current research; instruments and analytic techniques used in the selection and formulation of research problems.

RPTS 616 Tourism Economics
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Introduction to tourism economics including: tourism consumption and demand analysis; operating and capital budgeting; measurement of economic impacts through input/output analysis; forecasting; project management through PERT/CPM; decision making under uncertainty; benefit/cost analysis.
Prerequisites: RPTS 606 and STAT 651 or approval of instructor.

RPTS 620 Interdisciplinary Seminar in Prevention Science
Credit 1. 1 Lecture Hour.
Contemporary research programs that represent the interdisciplinary field of prevention science; strengths and limitations of diverse theoretical and conceptual bases of research in prevention science; application of research findings to issues related to the prevention of mental, emotional, and physical health problems and the promotion of well-being. May be taken 3 times for credit.
Prerequisite: Graduate standing and either admission to the interdisciplinary graduate certificate in prevention science program or approval of instructor.
Cross Listing: COMM 671, HLTH 671 and SPSY 620.
RPTS 626 Social Impacts of Tourism
Credits 3.3 Lecture Hours.
Analysis of social, cultural and political impacts associated with travel behavior and tourism development, emphasizing a case study approach; theories and methods for assessing individual, community and organization impacts at local and regional levels; host/guest interactions; evaluation of processes of tourism planning and decision-making; and qualitative and quantitative measures for assessing social impacts.
Prerequisite: RPTS 606 or approval of instructor.

RPTS 636 Philosophy of Social Research
Credits 3.3 Lecture Hours.
Overview of the history and development of the philosophy of social science; Relationships science; issues in social research; Sociology of Knowledge; related debates in various disciplines and fields of study. May be taken 3 times for credit.
Prerequisite: Doctoral classification.

RPTS 641 Tourism Experience
Credits 3.3 Lecture Hours.
Discusses the theoretical foundations of tourism experiences from an interdisciplinary perspective, including the role of humans, nature/landscapes, built environments and technologies in staging tourism-experiences; draws implications for the design/planning, management and marketing of tourism venues such as events, festivals, museums, hotels/resorts, cruise ships, cities, theme parks as well as websites.

RPTS 646 Heritage Tourism
Credits 3.3 Lecture Hours.
Comprises a transdisciplinary examination of contemporary research and practice in heritage tourism and public culture; encourages to deploy a variety of disciplinary outlooks to explore the representation of peoples, places and pasts in a range of settings from the indigenous/sacred to the post industrial/post colonial.

RPTS 654 AMAZON FIELD SCHOOL
Credits 4.4 Lecture Hours.
Investigation of social and ecological complexities of biodiversity conservation in tropical ecosystems; biological and social science approaches to evaluate causes, consequences and solutions to biodiversity loss through ecology, culture and governance.
Cross Listing: VTMI 604 and WFSC 654.

RPTS 655/WFSC 655 Applied Biodiversity Science I
Credits 3.3 Lecture Hours.
Students will study in the areas of Conservation genetics, metapopulations, landscape ecology, and ecosystem management.
Prerequisite(s): Graduate classification.
Cross Listing: WFSC 655/RPTS 655.

RPTS 666 Parks, Tourism and the Natural Environment
Credits 3.3 Lecture Hours.
Parks, Tourism and the Natural and Cultural Environment. Analysis of natural and cultural resource management in the United States; emphasis on federal policy and the influence by political processes at the national, regional, and local levels; case studies to illustrate conceptual and legal frameworks in real world contexts, including the policy and politics of tourism and recreation, endangered species, contested history, and Native American traditions and sovereignty.
Prerequisite: RPTS 602 or approval of instructor.

RPTS 670 Youth Development Programs and Services
Credits 3.3 Lecture Hours.
Principles and practices of youth development supports, opportunities, programs and services; emphasis on the role of out-of-school time settings in youth development; programming considerations related to gender, disability and culture; introduction to evaluation and financing of youth development programs.

RPTS 678 Latent Variable Model Applications in the Leisure Sciences
Credits 3.3 Lecture Hours.
Introduction to structural equation modeling (SEM); background on conceptual issues, application of the method, and insight on SEM software; measurement theory, missing data analysis, non-normal data; confirmatory factor analysis, path analysis, multi-group models.
Prerequisites: STAT 636 or approval of instructor.

RPTS 684 Professional Internship
Credits 1 to 4.1 to 4 Other Hours.
Survey and application of principles of recreation and resources development; selected aspects of park and recreation management in professional setting within an approved recreation/park agency under the supervision of a member of the graduate faculty.

RPTS 685 Directed Studies
Credits 1 to 4.1 to 4 Other Hours.
Investigations not included in student's research for thesis or dissertation; problems selected in administration or management, recreation or planning.

RPTS 689 Special Topics in...
Credits 1 to 4.1 to 4 Lecture Hours. 0 to 9 Lab Hours.
Selected topics in an identified area of recreation and resources development. May be repeated for credit.
Prerequisite: Approval of department head.

RPTS 691 Research
Credits 1 to 23.1 to 23 Other Hours.
Research in recreation and resources development for thesis or dissertation.

RPTS 693 Professional Study
Credits 1 to 9.1 to 9 Other Hours.
Approved research or professional paper undertaken as the terminal requirement for the Master of Science Non-Thesis or Natural Resources Development. May be taken more than once, but not to exceed 3 hours credit towards a degree.
Prerequisite: Approval of instructor.

RUSS - Russian

Courses

RUSS 101 Beginning Russian I
Credits 4.3 Lecture Hours. 2 Lab Hours.
(RUSS 1411, 1511) Beginning Russian I. Elementary language study with oral, written and reading practice. Attention given to background for conversation. Part of class preparation will be done in language laboratory.

RUSS 102 Beginning Russian II
Credits 4.3 Lecture Hours. 2 Lab Hours.
(RUSS 1412, 1512) Beginning Russian II. Continuation of RUSS 101. Part of class preparation will be done in language laboratory.
Prerequisite: RUSS 101.
RUSS 201 Intermediate Russian I
Credits 3. 3 Lecture Hours.
(RUSS 2311) Intermediate Russian I. Continuation and review of
grammar, selected readings; material to develop conversational and
reading ability.
Prerequisite: RUSS 102.

RUSS 202 Intermediate Russian II
Credits 3. 3 Lecture Hours.
(RUSS 2312) Intermediate Russian II. Continuation of RUSS 201.
Readings taken from standard works.
Prerequisite: RUSS 201.

RUSS 211 Russian Conversation
Credits 3. 3 Lecture Hours.
Development of conversational skills in Russian; building of active
vocabulary; exercises with emphasis on correct diction; oral presentations;
skits; dialogues; discussion of current events; conducted in Russian.
Prerequisite: RUSS 102 or equivalent.

RUSS 221 Field Studies I
Credits 3. 3 Lecture Hours.
Russian language and culture, taught in the former Soviet Union;
supervised travel of cultural interest; participation in courses and activities
at a Russian university or institute; exams, written and oral reports; to be
taken concurrently with RUSS 222.
Prerequisite: RUSS 102 with a grade of B or higher.

RUSS 222 Field Studies II
Credits 3. 3 Lecture Hours.
Russian language and literature taught in the former Soviet Union in
cooperation with a Russian university or institute; exams, written and oral
reports; to be taken concurrently with RUSS 221.
Prerequisite: RUSS 102 with a grade of B or higher.

RUSS 285 Directed Studies
Credits 1 to 4. 1 to 4 Other Hours.
Individual supervision of readings or assigned projects in Russian,
selected for each student individually.
Prerequisite: Approval of instructor and department head.

RUSS 289 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Selected topics in an identified area of Russian. May be repeated for
credit.
Prerequisite: Approval of instructor.

RUSS 301 Advanced Grammar and Composition I
Credits 3. 3 Lecture Hours.
Review of grammar at an advanced level; readings of literary texts for
analysis and emulation; development of oral and written skills; required for
modern languages majors in Russian; conducted in Russian.
Prerequisite: RUSS 202 or RUSS 222 or registration therein.

RUSS 302 Advanced Grammar and Composition II
Credits 3. 3 Lecture Hours.
Continuation of RUSS 301; literary interpretation of longer works;
particular emphasis on the short stories of Chekhov and other major
authors; required for modern languages majors in Russian; conducted in
Russian.
Prerequisite: RUSS 202 or RUSS 222 or registration therein.

RUSS 322 Masterpieces of Russian Literature
Credits 3. 3 Lecture Hours.
Selected works of Russian literature, representative of its major authors
and most important literary movements; literary analysis and evaluation of
each work's cultural background; conducted in Russian.
Prerequisite: RUSS 202 or RUSS 222 or registration therein. May be
retaken with approval of department head.

RUSS 410 Seminar in Russian Studies
Credits 3. 3 Lecture Hours.
Exploration of a significant topic, event, or period in Russian literature and
culture; taught in Russian.
Prerequisite: RUSS 202 or RUSS 222.

RUSS 441/EURO 441 The Russian Novel I: Tolstoy and Dostoevsky
Credits 3. 3 Lecture Hours.
Study of the major works of Tolstoy and Dostoevsky; discussion of the
literary nature and purpose of novels, especially in the context of Russian
culture; taught in English.
Prerequisite: RUSS 201 or registration therein, or approval of instructor.
Cross Listing: EURO 441/RUSS 441.

RUSS 442/EURO 442 The Russian Novel II: The Twentieth Century
Credits 3. 3 Lecture Hours.
Study of major Russian novels from ca. 1900 to the end of Stalinism;
exploration of topics relevant to Russia's experience in the 20th century;
taught in English.
Prerequisite: RUSS 201 or registration therein, or approval of instructor.
Cross Listing: EURO 442/RUSS 442.

RUSS 443/EURO 443 Contemporary Russian Prose
Credits 3. 3 Lecture Hours.
Study of Russian and Soviet 20th century prose literature, with emphasis
on post-Stalinist and post-glasnost writers; taught in English.
Prerequisite: RUSS 201 or registration therein, or approval of instructor.
Cross Listing: EURO 443/RUSS 443.

RUSS 444/EURO 444 Russian Drama
Credits 3. 3 Lecture Hours.
Introduction to the masterpieces of Russian drama from the 19th century
to the present; includes such authors as Pushkin, Chekhov, Gorky,
Arbuzov, Rozov and Petrushevskaya; taught in English.
Prerequisite: RUSS 201 or registration therein, or approval of instructor.
Cross Listing: EURO 444/RUSS 444.

RUSS 446/EURO 446 Russian Artistic Culture I: Beginnings to 1900
Credits 3. 3 Lecture Hours.
Masterpieces of Russian art, including architecture, dance, theater, music,
and literature, from its beginnings until ca. 1900; taught in English.
Prerequisite: RUSS 201 or registration therein, or approval of instructor.
Cross Listing: EURO 446/RUSS 446.

RUSS 447/EURO 447 Russian Artistic Culture II: 1890 to Present
Credits 3. 3 Lecture Hours.
Masterpieces of Russian art, including architecture, dance, theater, music,
film, and literature, from ca. 1890 to the present; taught in English.
Prerequisite: RUSS 201 or registration therein, or approval of instructor.
Cross Listing: EURO 447/RUSS 447.

RUSS 485 Directed Studies
Credits 1 to 4. 1 to 4 Other Hours.
Individual supervision of readings or assigned projects, selected for each
student individually; written and oral reports.
Prerequisite: Approval of instructor and department head.
RUSS 489 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Selected topics in an identified area of Russian language, literature and civilization.
Prerequisite: Approval of instructor.

RUSS 491 Research
Credits 1 to 3. 1 to 3 Other Hours.
Research conducted under the direction of faculty member in Russian.
May be taken three times for credit.
Prerequisites: Junior or senior classification and approval of department head.

RUSS 692 Readings
Credits 3. 3 Lecture Hours.
Readings in Russian literary texts in the original language.
Prerequisite: Graduate classification.

SCEN - College of Science

Courses

SCEN 201 Self-Directed Experiences with Adolescents
Credit 1. 1 Lecture Hour. 3 Lab Hours.
Study of adolescents in diverse school and community settings; issues in physical, mental, social and emotional development; issues related to racism, sexism, and cultural diversity; development, presentation, and defense of portfolio required. Attendance at all seminars and scheduled observations required.
Prerequisite: Major in mathematics, biology, chemistry or physics, or approval of instructor.

SCEN 289 Special Topics in...
Credits 1 to 3. 1 to 3 Lecture Hours. 0 to 3 Lab Hours.
Special Topics in... Selected topics in an identified area of science. May be repeated for credit.
Prerequisites: Freshman or sophomore classification and approval of instructor.

SCEN 292 Cooperative Education in Science
Credits 2. 20 Other Hours.
Educational work assignment by a student in the field of his or her career interest and course of study. Supervision of the student will be by the cooperating employer and the instructor. A technical report, approved by the instructor, on a related subject area will be required.
Prerequisite: Approval of the college coordinator of cooperative education.

SCEN 301 College of Science Study Abroad
Credits 0 to 18. 0 to 18 Other Hours.
For student in approved programs abroad. May be repeated for credit.
Prerequisites: Admission to approved program and approval of academic dean.

SCEN 392 Cooperative Education in Science
Credits 2. 20 Other Hours.
Educational work assignment by a student in the field of his or her career interest and course of study. Supervision of the student will be by the cooperating employer and the instructor. A technical report, approved by the instructor, on a related subject area will be required.
Prerequisite: Approval of the college coordinator of cooperative education.

SCEN 489 Special Topics in...
Credits 1 to 4. 0 to 4 Lecture Hours. 0 to 8 Lab Hours.
Special Topics in... Selected topics in an identified area of science. May be repeated for credit.
Prerequisites: Junior or senior classification and approval of instructor.

SCEN 492 Cooperative Education in Science
Credits 2. 20 Other Hours.
Educational work assignment by a student in the field of his or her career interest and course of study. Supervision of the student will be by the cooperating employer and the instructor. A technical report, approved by the instructor, on a related subject area will be required.
Prerequisite: Approval of the college coordinator of cooperative education.

SCEN 600 Science Graduate Study Abroad
Credits 1 to 18. 1 to 18 Other Hours.
Approved study abroad student participation; reciprocal educational exchange programs. May be taken two times for credit.
Prerequisite: Admission to approved program.

SCEN 677 Science, Technology, Engineering and Mathematics (STEM) Teaching Professional Development
Credit 1. 1 Lecture Hour.
Center for Teaching Excellence (CTE) consultation and faculty mentoring in STEM teaching; course topic and syllabus design; learning outcomes and assessment; teaching methodology; reflection on teaching philosophy; reflection on teaching as research. Must be taken on satisfactory/unsatisfactory basis.
Prerequisites: Graduate classification and approval of instructor.
Cross Listing: GEOS 677 and ENGR 677.

SCEN 689 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Selected topics in an identified area of science. May be repeated for credit.
Prerequisites: Graduate classification and approval of instructor.

SCEN 698 Writing for Publication
Credits 3. 3 Lecture Hours.
Writing in academic disciplines and settings. Writing for different audiences and purposes. Style; planning and development of journal articles; grant proposals; correspondence; oral presentations; technical reports. Permission of departmental/college graduate advisor.
Prerequisite: Advanced standing in master's/doctoral programs.

SCMT - Supply Chain Mgmt

Courses

SCMT 300/ISYS 300 Business Communications I
Credit 1. 1 Lecture Hour.
Proper techniques for writing major-specific business communications; progress report, memorandum, letter, executive summary; verbal communications via phone call and person-to-person communications; critiques of personal and peer writing.
Prerequisites: Junior or senior classification; SCMT majors only.
Cross Listing: ISYS 300/SCMT 300.

SCMT 303 Statistical Methods
Credits 3. 3 Lecture Hours.
Collection, tabulation and presentation of numerical data; sampling, estimation of averages and variation, probability and error, hypothesis testing and correlation.
Prerequisite: Admission to upper division in Mays Business School.
SCMT 305 Intermediate Business Statistics
Credits 3.3 Lecture Hours.
Selected topics in statistical analysis; practical applications to functional problems in accounting, finance, marketing and management; applications of existing computer programs minimize computations.
Prerequisite: SCMT 303 or STAT 301, STAT 302, or STAT 303.

SCMT 309 Supply Chain Management Principles
Credits 3.3 Lecture Hours.
Integrated management of the make, buy and delivery processes in firms; emphasis on issues specific to the procurement, manufacturing, and logistics disciplines; requirements for operating in a global marketplace; includes cultural, functional and strategic aspects of global business.
Prerequisite: ISYS 209; junior classification; University Studies Business Concentration students only.

SCMT 335 Sourcing and Procurement
Credits 3.3 Lecture Hours.
Processes to identify and manage suppliers for goods and services to support operations; including sourcing, contracting, negotiations, buying procedures, cost and price analysis, vendor relations, auditing and inspection, supplier relations, and applications to information technology systems.
Prerequisite: SCMT 364 with a grade of C or better; SCMT 340 and SCMT 361; or approval of instructor.

SCMT 336 Decision Support Systems
Credits 3.3 Lecture Hours.
Application of quantitative decision-making techniques to management decision problems; focus on model development, solution and implementation of results.
Prerequisites: SCMT 364; junior or senior classification.

SCMT 340 Supply Chain Management
Credits 3.3 Lecture Hours.
Focus on the integrated management of the total product delivery system; purchasing, inventory management and distribution functions, with emphasis on materials and information flows.
Prerequisite: SCMT 364 with a grade of C or better.

SCMT 345 Business Process Design
Credits 3.3 Lecture Hours.
Design, implementation and improvement of the processes by which a firm sources, makes, and delivers products and services to meet customer requirements; includes six-sigma, process flow charting, computer simulation, and other techniques to document, analyze, design and improve business processes.
Prerequisite: SCMT 364 with a grade of C or better; SCMT 340 and SCMT 361; or approval of instructor.

SCMT 361 Operations Planning and Control
Credits 3.3 Lecture Hours.
Planning and controlling the conversion of materials, labor, capital, and information into goods and services for both manufacturing and service organizations; emphasis on managerial and technical aspects of planning and controlling operating systems.
Prerequisite: SCMT 364 with a grade of C or better; or approval of instructor.

SCMT 364 Operations Management
Credits 3.3 Lecture Hours.
Concepts, issues and techniques used to plan, analyze, and control systems of production; operational problems in producing goods and services.
Prerequisite: SCMT 303 or STAT 301, STAT 302, or STAT 303 or concurrent enrollment; admission to upper division in Mays Business School.

SCMT 375 Supply Chain Security
Credits 3.3 Lecture Hours.
Security of global supply chains; selection of appropriate technologies utilized in securing global supply chains; planning responses to disaster events in relation to the delivery and receipt of goods and services; designing draft security policies for an organization’s supply chain.
Prerequisite: SCMT 364.

SCMT 380 Lean Business Systems
Credits 3.3 Lecture Hours.
Analysis of real world business challenges using an operational framework to identify and solve problems; provides a route map to sustain results; exploration of lean strategies such as root cause analysis, batch to pull processes, value stream mapping, level loading, line balancing.
Prerequisite: Admission to upper division in Mays Business School.

SCMT 400/ISYS 400 Business Communication II
Credit 1.1 Lecture Hour.
Development of critical interpersonal and oral communication skills; strategies for positive team development; conflict resolution; oral presentations and information elicitation; production of effective visual aids.
Prerequisites: Junior or senior classification; SCMT majors only.
Cross Listing: ISYS 400/SCMT 400.

SCMT 464 Advanced Supply Chain Management
Credits 3.3 Lecture Hours.
Advanced contemporary topics in supply chain and operations management; developing analytical insights into the operation of selected methodologies.
Prerequisites: SCMT 340 and senior classification.

SCMT 465 Information Technology for Supply Chain Management
Credits 3.3 Lecture Hours.
Overview of information technology applications for planning and controlling the design, manufacture and distribution of goods and services; managerial and technical aspects of information technology for product design, shop floor, factory, enterprise and supply chain management.
Prerequisite: SCMT 340 with a grade of C or better; SCMT 361; or approval of instructor.

SCMT 466 Enterprise Resource Planning
Credits 3.3 Lecture Hours.
Application of advanced information technology for integrating business functions through distributed databases; applications for planning, scheduling, purchasing and costing to multiple layers of the organization.
Prerequisite: SCMT 364.

SCMT 484 Supply Chain Management Internship
Credits 1 to 4.1 to 4 Other Hours.
A directed internship in an organization to provide students with a learning experience supervised by professionals in organizational settings appropriate to the student’s professional objectives. Must be taken on a satisfactory/unsatisfactory basis.
Prerequisite: SCMT major and approval of academic advisor and instructor.
SCMT 485 Directed Studies
Credits 1 to 4. 1 to 4 Other Hours.
Directed study of selected problems in an area of supply chain management not covered in other courses.
Prerequisites: Admission to upper division in Mays Business School and approval of academic advisor and instructor.

SCMT 489 Special Topics In...
Credits 1 to 4. 1 to 4 Other Hours.
Selected topic in an identified field of supply chain management two times for credit.
Prerequisites: Admission to upper division in Mays Business School and approval of academic advisor and instructor.

SCMT 610 Quantitative Analysis for Business Decisions
Credits 1 to 3. 1 to 3 Lecture Hours.
Formulation and structuring of business problems using selected quantitative techniques; modeling and statistical analysis stress computer applications. May be repeated for up to 3 hours credit. Classification 6 students may not enroll in this course.
Prerequisite: SCMT 610 or equivalent; enrollment is limited to MBA students.

SCMT 614 Operations Management
Credits 1 to 3. 1 to 3 Lecture Hours.
Theory and applications of designing, analyzing and controlling productive systems in the allocation and use of resources to produce goods and services. May be repeated for up to 3 hours credit. Classification 6 students may not enroll in this course.
Prerequisites: SCMT 610 or equivalent; enrollment is limited to MBA students.

SCMT 616 Supply Chain Management
Credits 3. 3 Lecture Hours.
Focus on the integrated management of the total product delivery system; purchasing, inventory management and distribution functions with emphasis on physical and information flows.
Prerequisites: SCMT 614 and MBA student classification.

SCMT 636 Decision Support Systems
Credits 3. 3 Lecture Hours.
Use of decision support systems in business-related decision making, business environment, use of models, user interface with decision support systems and decision support systems examples. Classification 6 students may not enroll in this course.
Prerequisite: SCMT 303 or equivalent.

SCMT 638 Information Technology in Supply Chain Management
Credits 3. 3 Lecture Hours.
Review, evaluate, and contribute to the existing knowledge base regarding the management of information flows from automatic identification systems such as RFID.
Prerequisites: ISEN 615 and PhD students or Masters students with a thesis degree plan or approval of instructor.

SCMT 645 Business Process Design
Credits 3. 3 Lecture Hours.
Introduction to business process design and analysis; tools and techniques to document, analyze and improve business processes; Six Sigma process design and improvement; process metrics; computer simulation of processes; aligning business process with organizational goals and objectives; and case study of real world business problems.
Prerequisites: Graduate classification or approval of instructor; SCMT 614, SCMT 660 or approval of instructor.

SCMT 667 Logistics and Distribution Management
Credits 3. 3 Lecture Hours.
Contemporary logistics activities including inbound and outbound materials and service flows, with special emphasis on their relationships to the firm’s manufacturing function. Classification 6 students may not enroll in this course.
Prerequisite: SCMT 614 or SCMT 660 or equivalent.

SCMT 665 Directed Studies
Credits 1 to 4. 1 to 4 Other Hours.
Directed study on selected problems using recent developments in business research methods.
Prerequisites: Approval of instructor and graduate advisor.

SCMT 688 Doctoral Seminar in...
Credits 3. 3 Lecture Hours.
Evaluation of current research and controversial issues in management information systems, production/operations management or management science. May be repeated for credit five times as content varies. For doctoral students only.
Prerequisite: Approval of department head.

SCMT 689 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours. 0 to 4 Lab Hours.
Selected topics in identified areas of operations and supply chain management.

SCMT 690 Theory of Research in Information and Operations Management
Credits 3. 3 Lecture Hours.
Design of research and the evaluation of research results using examples from the current research literature. Classification 6 students may not enroll in this course.
Prerequisite: Approval of instructor.

SCMT 691 Research
Credits 1 to 23. 1 to 23 Other Hours.
Research for thesis or dissertation. Classification 6 students may not enroll in this course.

SCSC - Soil and Crop Sciences

Courses

SCSC 101 Introduction to Soil and Crop Science
Credit 1. 1 Lecture Hour.
Brief summary of sciences of agronomic crops, soils and water; management, production and processing of various crops; education, employment and research pertaining to respective professions.

SCSC 105 World Food and Fiber Crops
Credits 3. 2 Lecture Hours. 2 Lab Hours.
(AGRI 1307, 1407) World Food and Fiber Crops. Plant relationships, structure and development; environmental factors affecting plants; technological aspects of agricultural practices; food production for an increasing population.*

SCSC 201 Great Plains Settlement and Farming
Credits 3. 3 Lecture Hours.
American Indian hunting and farming; transformation by Manifest destiny, Homestead Act, railroads, Indian Wars, U.S. Army, crops and farm families; effects of World Wars, Great Depression, Dust Bowl, irrigation, fertilization, pest controls, precision farming.
SCSC 205 Problem Solving in Plant and Soil Systems
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Problems in management of soils, crops, and natural resources; problem solving skills including collecting, interpreting, using and communicating scientific and nonscientific data.

SCSC 291 Research
Credits 1 to 3. 1 to 3 Lecture Hours.
Research conducted under the direction of faculty member in agronomy. May be repeated 2 times for credit.
Prerequisites: Freshman or sophomore classification and approval of instructor.

SCSC 301 Soil Science
Credits 4. 3 Lecture Hours. 2 Lab Hours.
Evaluation of the nature and properties of soils; explanation of the various soils, their components and roles in the environment using the scientific methods and technology.
Prerequisite: Junior or senior classification, or approval of instructor.*

SCSC 302 Recreational Turf
Credits 3. 3 Lecture Hours.
Principles underlying construction and maintenance practices for turf facilities including athletic fields, golf courses, parks and home lawns; aesthetic, safety and economic aspects of turf varieties, soil conditions, plant protectants and maintenance equipment.
Prerequisite: Biology or approval of instructor.

SCSC 303 Crop Ecology
Credits 4. 3 Lecture Hours. 2 Lab Hours.
Ecology of species adaptation and selection and management principles; crop establishment, growth and development, mineral nutrition, productivity and sustainability.
Prerequisite: SCSC 105.*

SCSC 304 Plant Breeding and Genetics
Credits 3. 3 Lecture Hours. 0 Lab Hours.
Genetic improvement of crops by hybridization and selection; special breeding methods and techniques applicable to naturally self-pollinated, cross-pollinated and asexually reproduced plants.
Prerequisite: SCSC 105.*

SCSC 305 Production Agronomy Experiences
Credit 1. 2 Lab Hours.
Agronomy industry practices related to crop production; site visits in Texas and in the Mississippi Delta include a review of farming equipment, conservation agriculture practices, agro-chemical distribution and sales, grain product processing and distribution and on-farm management techniques.
Prerequisites: Junior or senior classification or approval of instructor.

SCSC 306 Grain, Fiber and Oilseed Crops
Credits 4. 3 Lecture Hours. 2 Lab Hours.
Geographical distribution, classification, physiology, principles of production, use of grain, fiber and oilseed crops and marketing.
Prerequisites: SCSC 105 and SCSC 301.*

SCSC 307 Crop Biology and Physiology
Credits 4. 3 Lecture Hours. 2 Lab Hours.
Emphasis on seed biology, germination, development of cells and tissues, anatomy, and growth and development of crop plants; plant hormones and tropisms, membranes and membrane transport, water absorption and transport through plants, photosynthesis, respiration and carbohydrate metabolism, and flowering; environmental effects on crop adaptation, growth, development, and productivity.
Prerequisites: SCSC 205, junior or senior classification, or approval of instructor.

SCSC 308 Forage Crops
Credits 3. 3 Lecture Hours.
Description, analysis and evaluation of forage systems in relation to livestock and wildlife production and environmental conservation; principles of selection and management of establishment, weeds, nutrients, grazing and harvest for introduced species.
Prerequisite: Junior or senior classification or approval of instructor.*

SCSC 309 Water in Soils and Plants
Credits 4. 3 Lecture Hours. 2 Lab Hours.
Fundamentals of plant water use, and water movement and storage in soils; evapotranspiration, plant water requirements and irrigation scheduling; issues impacting irrigation and water quality; techniques for measuring soil and plant water relations.
Prerequisite: Junior or senior classification, or approval of instructor.

SCSC 310 Soil Morphology and Interpretations
Credits 2. 1 Lecture Hour. 3 Lab Hours.
Field study of morphological features of soil profiles and the morphological characterization of important soils of Texas in relation to soil use and management.
Prerequisite: SCSC 301 or registration therein.*

SCSC 311 Principles of Crop Production
Credits 3. 3 Lecture Hours.
Review of plant physiology and crop adaptation to mesoclimates; crop management factors of planting, pest control, plant nutrition, irrigation, GIS, and harvesting techniques; special units on organic farming, conservation agriculture, farming in low-rainfall climates, and bioenergy crops; influence of markets, government policies, and the global economy on cropping strategies.
Prerequisites: SCSC 307, junior or senior classification, or approval of instructor.

SCSC 312 Introductory Turfgrass Management Laboratory
Credit 1. 1 Lab Hour.
Fundamentals of turfgrass anatomy, growth habit, identification and characteristics of cool- and warm-season turfgrass species; understanding of seed quality and labeling, pesticide safety, handling, and application, and fertilizer sources, safety, and application; specialized equipment used in the turfgrass industry.
Prerequisite: SCSC 302 or registration therein.

SCSC 314 Life and Physical Environment
Credits 3. 3 Lecture Hours.
Description of physical environments in which living organisms reside: interaction and adaptation of plants, animals and humans to their physical environments; survival in extreme environments; creating livable artificial environments on earth and in space.
Prerequisite: Junior or senior classification.
SCSC 330 Social and Ethical Aspects of International Cropping Systems
Credits 3. 3 Lecture Hours. 0 Lab Hours.
Philosophical basis of ethical decisions; includes slavery, war, population growth, migration, farm workers, chemical inputs, genetically modified organisms, soil and water conservation and protection of wild species.
Prerequisite: Junior or senior classification.

SCSC 401/FIVS 401 Forensic Soil Science
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Examination of soils biology, chemistry and physical attributes to solve crimes; soil and geologic characteristics associated with crime scene examination; physical, biological and chemical characteristics and use of trace evidence.
Prerequisite: Junior or senior classification or approval of instructor.
Cross Listing: FIVS 401/SCSC 401.

SCSC 402 Crop Stress Management
Credits 4. 3 Lecture Hours. 2 Lab Hours.
Identification, measurement, biology, physiology and management of crop stress; limitations of specific environments to crop productivity; morphological and physiological crop stress response mechanisms.
Prerequisites: SCSC 307, junior or senior classification, or approval of instructor.

SCSC 405 Soil and Water Microbiology
Credits 4. 3 Lecture Hours. 2 Lab Hours.
Roles of soil and water microorganisms in the sustainability and productivity of various ecosystems with specific emphasis on plant-microbial interactions, nutrient cycling, degradation of pesticides and other xenobiotics, generation of trace gases, and soil and water quality; hands-on laboratory experience with current techniques in soil and water microbiology.
Prerequisites: Junior or senior classification, or approval of instructor.

SCSC 410 International Agricultural Systems
Credits 3. 3 Lecture Hours.
Contrast modern agriculture systems with those in developing countries; emphasis on natural resources and technologies interacting with economic and social development on a global scale.
Prerequisite: Junior or senior classification, or approval of instructor.

SCSC 420 Brazilian Agriculture and Food Production Systems
Credits 3 to 6. 3 to 6 Lecture Hours.
Comparison and study of Brazilian and U.S. agriculture and culture related to soil, water, and forest conservation and management in Brazil; tour and learn about Amazon River, rain forest, Brasilia, farm, ranch, and floral production systems, agricultural cooperatives and research, sugar and alcohol production, phosphate mining and production; visit points of interest.
Prerequisite: Junior or senior classification or approval of instructor.

SCSC 421 International Agricultural Research Centers - Mexico
Credits 3. 3 Lecture Hours.
International agricultural research; CIMMYT interaction; modern and underdeveloped tropical agricultural systems; introduction to Mexican culture; critical evaluation of complex and international agricultural issues and research programs.
Prerequisites: Junior or senior classification and approval of instructor.

SCSC 422 Soil Fertility and Plant Nutrient Management
Credits 3. 3 Lecture Hours.
Chemical and biological reactions in soils that influence nutrient availability to plants; environmental aspects associated with nutrient availability and fertilization, especially for nitrogen (N) and phosphorus (P).
Prerequisites: SCSC 301, junior or senior classification, or approval of instructor.

SCSC 423 Natural Resources and Agricultural Sustainability in UK
Credits 3. 3 Lecture Hours.
Environmental impacts and sustainability of United Kingdom and U.S. agriculture compared; soil, water, crop, and environmental management; conservation of watersheds; production of hydropower; sustainable use of water resources; cultural immersion.
Prerequisites: Junior or senior classification and approval of instructor.

SCSC 425 Biofuels and the Environment
Credits 2. 2 Lecture Hours.
Biofuel crop use and disposal; production systems; conversion technologies; impacts of bioenergy production on sustainability, environment, and soil and water quality; carbon and energy budgets.
Prerequisites: SCSC 301 or approval of instructor; junior or senior classification.

SCSC 427 Sports Field Construction
Credits 4. 3 Lecture Hours. 3 Lab Hours.
Development of knowledge, skills, and experiences for the design and construction of a turfgrass-based sports field; case studies and visits to model fields, guest lectures from sports field owners, designers, and construction company managers; hands-on construction of a small-scale sand-based sports field.
Prerequisites: SCSC 309, junior or senior classification, or approval of instructor.

SCSC 428 Advanced Turf Ecology and Physiology
Credits 3. 3 Lecture Hours.
Examination of how environmental stresses, genetics, and cultural management practices influence the growth, development, and physiology of turfgrasses; exploration of how turf communities function within urban landscapes; introduction to environmental, social, and political issues encountered when managing these areas.

SCSC 429 Turf Management Systems
Credits 4. 3 Lecture Hours. 2 Lab Hours.
Development of turf management plans for large turfgrass sites including parks, golf courses and sports facilities; use of case studies to critically analyze turf management programs.
Prerequisite: SCSC 428.

SCSC 430 Turfgrass Maintenance
Credits 4. 3 Lecture Hours. 2 Lab Hours.
Activities in a day-to-day turfgrass maintenance operation; decision-making in culture, equipment, irrigation systems, budgets, records and labor management. Laboratory includes principles and actual mechanical procedures involved in maintaining turfgrass.
Prerequisite: SCSC 428 or approval of instructor.*

SCSC 432 Soil Fertility and Plant Nutrient Management Laboratory
Credit 1. 3 Lab Hours.
Methods used in soil testing, fertilizer recommendations, chemical and physical properties of soils, and determination of specific characteristics of a collected and analyzed soil sample.
Prerequisites: SCSC 301; SCSC 422 or registration therein, junior or senior classification, or approval of instructor.*
SCSC 435 Ecology of Agrichemicals in Field Crops and Turf
Credits 3. 3 Lecture Hours.
History, rationale, and ecological consequences of irrigation, fertilization, and pesticide applications in crop production; methods to determine the fate of agrichemicals in water, soil, and food; assessment of the risks and benefits of agrichemical use to human health, farm economy and natural habitats.
Prerequisite: CHEM 101.

SCSC 441 Crop Production Systems
Credits 3. 3 Lecture Hours.
Integration of crop production and management concepts through a systems approach; application of concepts using case studies and team projects.
Prerequisite: Senior classification or approval of instructor.

SCSC 444 Forage Ecology and Management
Credits 3. 3 Lecture Hours.
Investigation of multidisciplinary approaches toward the development of integrated forage, livestock, and wildlife production systems that are economically feasible and environmentally sustainable.
Prerequisite: Junior or senior classification or approval of instructor.

SCSC 445 Soil Physics
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Fundamentals of soil physics; soil texture, structure, water, air and thermal relations and their relations to the solution of problems in crop production, irrigation, pollution and engineering.
Prerequisite: 9 hours of soils and physics with minimum of 3 hours of each, or approval of instructor.*

SCSC 446 Weed Management and Ecology
Credits 4. 3 Lecture Hours. 2 Lab Hours.
Practical information related to weed management and ecology for various vegetative systems to include turf and agronomic crops; calibration of applicators, herbicide labels, mode of action of herbicides, herbicide-resistant weed management.
Prerequisites: CHEM 222, SCSC 307, junior or senior classification, or approval of instructor.

SCSC 450 Chemical Weed Control
Credits 3. 3 Lecture Hours.
Fundamentals of chemical weed control; relationships of families of herbicides, basis for selectivity of herbicides, fate of herbicides in plants and soils and effect of herbicidal additives.
Prerequisites: CHEM 222 or CHEM 227 and CHEM 237; approval of instructor.

SCSC 452 Chemical Weed Control Laboratory
Credit 1. 0 Lecture Hours. 2 Lab Hours.
Important weed problems in Texas; herbicides and equipment used for herbicidal application.
Prerequisite: SCSC 450 or registration therein.*

SCSC 455 Environmental Soil and Water Science
Credits 3. 3 Lecture Hours.
Discussion of physical, chemical, and biological properties of soil and water and the impact on productivity and sustainability of various ecosystems; application of the knowledge of properties and soil processes to develop and evaluate strategies for protecting and/or improving soil and water quality.
Prerequisite: SCSC 301 or approval of instructor.

SCSC 458 Watershed and Water Quality Management
Credits 3. 3 Lecture Hours.
Land use impact on surface and ground water chemistry; legislation impacting water quality; surface and groundwater impairment and restoration.
Prerequisite: CHEM 101 or equivalent or approval of instructor; junior or senior classification.

SCSC 460 Problems in Agronomy - Plants
Credit 1. 1 Lecture Hour.
Development of writing skills in the plant science aspect of agronomy; instruction in drafting, editing, and revising technical and popular reports for specific audiences; critical thinking, analytical reading, peer review, and discussion are emphasized.
Prerequisite: Junior or senior classification.

SCSC 461 Problems in Agronomy - Soils
Credit 1. 1 Lecture Hour.
Development of writing skills in the soil science aspect of agronomy: instruction in drafting, editing, and revising technical and popular reports for specific audiences; critical thinking, analytical reading, peer review, and discussion are emphasized.
Prerequisite: Junior or senior classification.

SCSC 465 Directed Studies
Credits 1 to 4. 1 to 4 Lecture Hours.
For advanced undergraduates to permit field or laboratory investigation or study of subject matter not included in established courses.
Prerequisite: 10 hours of junior and senior agronomy or approval of instructor.

SCSC 468 Internship
Credits 1 to 3. 1 to 3 Lecture Hours.
Practical on-the-job experience in the student's area of specialization.
Prerequisites: Junior or senior classification; approval of instructor; 2.0 or better GPR in major and overall.

SCSC 481 Senior Seminar
Credits 2. 2 Lecture Hours.
Capstone course bringing together student experiences, exams, and exercises necessary for completing and assessing curriculum program learning outcomes.
Prerequisite: Senior classification.

SCSC 484 Internship
Credits 1 to 3. 1 to 3 Lecture Hours.
For advanced undergraduates to permit field or laboratory investigation or study of subject matter not included in established courses.
Prerequisite: 10 hours of junior and senior agronomy or approval of instructor.

SCSC 485 Directed Studies
Credits 1 to 4. 1 to 4 Lecture Hours.
For advanced undergraduates to permit field or laboratory investigation or study of subject matter not included in established courses.
Prerequisite: 10 hours of junior and senior agronomy or approval of instructor.

SCSC 489 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours. 0 to 4 Lab Hours.
Selected topics in an identified area of agronomy. May be repeated for credit.
Prerequisite: Approval of department head.*

SCSC 491 Research
Credits 1 to 3. 1 to 3 Lecture Hours.
Research conducted under the direction of faculty member in agronomy. May be repeated 2 times for credit. Registration in multiple sections of this course are possible within a given semester provided that the per semester credit hour limit is not exceeded.
Prerequisites: Junior or senior classification and approval of instructor.

SCSC 603 Cytological and Histological Principles in Plant Breeding
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Modern concepts and recent developments for advanced students in plant and soil sciences and related fields employing microscopic evaluation; specimen preparation, stain technology, theory and use of microscopes, micromanipulators, microtomes, the microtome cryostat, use of equipment in modern cytological research.
Prerequisite: Graduate classification.
SCSC 605 Pedology
Credits 3. 3 Lecture Hours.
Soil genesis, morphology and classification; development of a working knowledge of soil taxonomy and diagnostic horizons used in placement of soils.
Prerequisites: SCSC 301 or equivalent; or approval of instructor. Two 2-day field trips for which departmental fees may be assessed to cover costs.

SCSC 607 Crop Physiology
Credits 3. 3 Lecture Hours.
Growth and productivity of major agronomic crops as related to plant physiological processes and environmental parameters, including manipulation of crop growth for enhanced production.
Prerequisites: SCSC 303; MEPS 313.

SCSC 609 Integrated Farming Systems
Credits 3. 3 Lecture Hours.
System-oriented course that stimulates critical thinking and debate regarding the strength and weakness of modern crop and livestock production systems within the context of ecological and economic sustainability; evaluates conservation tillage, integrated nutrient and pest management and multiple cropping systems.
Prerequisite: Approval of instructor.

SCSC 610 Host Plant Resistance
Credits 3. 3 Lecture Hours.
Host plant resistance programs from the standpoint of the plant breeder, plant pathologist and entomologist; team taught with each discipline represented; roundtable discussion of assigned readings and lectures.
Prerequisite: Approval of instructor.
Cross Listing: ENTO 610 and PLPA 610.

SCSC 611 Introduction to Environmental Biophysics
Credits 4. 3 Lecture Hours. 2 Lab Hours.
Theoretical and experimental analysis of interactions between living organisms and their environments; measurement and modeling of the physical environment; measurement and modeling of energy and mass transfer between organisms and their environments, and of organism response to fluxes of mass and energy.
Prerequisites: Graduate classification and approval of instructor.

SCSC 613 Ethical Aspects of International Agricultural Systems
Credits 3. 3 Lecture Hours. 0 Lab Hours.
Diverse theories of morality; ethical dimensions of population growth, high yielding crop production systems, genetic engineering, and use of land, soil, and water.
Prerequisite: Approval of instructor.

SCSC 615 Reclamation of Drastically Disturbed Lands
Credits 3. 3 Lecture Hours.
Theoretical and practical aspects of reclamation of lands disturbed during mining of lignite, uranium, phosphorous, oil shale and other minerals and disturbances due to industrial activities; emphasis on physical and chemical characteristics of disturbed materials and their impact on establishment of permanent vegetation.
Prerequisite: SCSC 301 or approval of instructor.

SCSC 618 Analysis of Environmental Systems
Credits 2. 1 Lecture Hour. 2 Lab Hours.
Classical and contemporary methods for analyzing chemical components of environmental systems, soil, water, plants and gases; environmental chemistry coupled with experiential.
Prerequisite: Graduate classification.

SCSC 619 Molecular Methods for Microbial Characterization
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Underlying principles of molecular methods for microbial detection and characterization in natural and man-made ecosystems; emphasis on method application and data interpretation; emphasis on microbial pathogens and indicator organisms in foods and environment; laboratory covers select protocols.
Prerequisites: SCSC 405; FSTC 326/DASC 326; POSC 429; approval of instructor.
Cross Listing: FSTC 619, POSC 619, VTMI 619.

SCSC 620 Brazilian Agriculture and Food Production Systems
Credits 3. 3 Lecture Hours.
Compare Brazilian and U.S. agriculture and culture related to soil, water, and forest conservation and management in Brazil; tour and learn about Amazon River, rain forest, Brasilia, farm, ranch, and floral production systems, agricultural cooperatives and research, sugar and alcohol production, phosphate mining and production; visit points of interest.
Prerequisite: Approval of instructor.

SCSC 621 International Agricultural Research Centers - MX
Credits 3. 3 Lecture Hours.
Introduction to international agricultural research, Consultative Group on International Agriculture activity; modern and underdeveloped tropical agricultural systems; introduction to Mexican culture; critical evaluation of complex and international agricultural issues and research programs.
Prerequisites: Approval of instructor; graduate classification.

SCSC 623 Natural Resources and Agricultural Sustainability in UK
Credits 3. 3 Lecture Hours.
Environmental impacts and sustainability of United Kingdom and U.S. agriculture compared; soil, water, crop, and environmental management; conservation of watersheds; production of hydropower; sustainable use of water resources; cultural immersion.
Prerequisite: Approval of instructor.

SCSC 624 Soil Chemistry
Credits 3. 3 Lecture Hours.
Chemistry of clay minerals, inorganic solid phases, and organic colloids in soil; mass transfer reactions in soils: absorption/desorption, precipitation/dissolution, gas/liquid phase exchange; principles of soil acidity and salinity; introduction to application of equilibrium concepts in soils.
Prerequisites: SCSC 301 or approval of instructor.

SCSC 625 Biofuels and the Environment
Credits 2. 2 Lecture Hours.
Biofuel crop use and disposal; production systems; conversion technologies; impacts of bioenergy production on sustainability, environment, and soil and water quality; carbon and energy budgets.
Prerequisite: SCSC 301 or approval of instructor.

SCSC 626 Soil Mineralogy
Credits 5. 3 Lecture Hours. 4 Lab Hours.
Crystal structures and properties of important minerals in soils and sediments especially clay minerals and oxides combined with identification techniques involving theory and practice with x-ray diffraction, electron microscopy, infrared and chemical methods.

SCSC 627 Soil Chemistry and Fertility
Credits 3. 3 Lecture Hours.
Chemical and biological behavior of nitrogen, phosphorus and potassium in soils; secondary nutrients, micronutrients and soil acidity and liming; interpretation of soil chemical/biochemical research from historical and current literature and relationships with nutrient availability, plant uptake, and environmental quality.
Prerequisites: SCSC 422; MEPS 313.
SCSC 629/VTMI 629 Laboratory Quality Systems  
Credits 3. 3 Lecture Hours.  
Quality systems and method development used within a laboratory; ensuring the integrity of procedures used in lab processes, chain of custody, information management, and international laboratory standards; regulatory requirements for laboratory operation; bio-security precautions; laboratory management.  
Cross Listing: VTMI 629/SCSC 629.

SCSC 630/FSTC 630 Cereal Grains for Human Food  
Credits 4. 3 Lecture Hours. 3 Lab Hours.  
Fundamental concepts of dry milling, wet milling, oil extraction, baking, malting, brewing, storage, sanitation, and quality evaluation and control interrelated with physical and biochemical properties of cereals and their products; use of instruments and techniques to evaluate cereal quality.  
Prerequisite: Approval of instructor.  
Cross Listing: FSTC 630/SCSC 630.

SCSC 631 Prerequisite Programs for Feed Industry HACCP  
Credit 1. 1 Lecture Hour.  
Development of preliminary science-based risk management decision factors in feed industry; understanding and complying with FDA regulatory requirements for animal feed; application of international standards; prerequisite programs for Feed Industry Hazard Analysis and Critical Control Point (HACCP); module one of three. Prerequisite: Graduate classification.

SCSC 632 Feed Industry HACCP - Principles and Plan Development  
Credit 1. 1 Lecture Hour.  
Principles of Feed Industry Hazard Analysis and Critical Control Point (HACCP) plan development; science-based risk analysis of decision factors; regulatory requirements of HACCP; module two of three. Prerequisite: SCSC 631.

SCSC 633 Feed Industry HACCP - Advanced Plan Development  
Credit 1. 1 Lecture Hour.  
Principles of Feed Industry Hazard Analysis and Critical Control Point (HACCP) advanced plan development; case studies of HACCP principles; HACCP plan development for feed industry companies; module three of three. Prerequisites: SCSC 631 and SCSC 632.

SCSC 634 Regulatory Science: Principles & Practices in Food Systems  
Credits 3. 3 Lecture Hours.  
Regulatory Science: Principles & Practices in Food Systems. Regulatory tools, standards and approaches in production, processing and distribution of agricultural goods; development and implementation of regulations; interdependence of federal and state agencies, use of risk analysis.

SCSC 635/AGEC 639 Comparative Global Standards in Food Systems  
Credits 3. 3 Lecture Hours.  
Laws, regulations and standards governing the production, distribution, processing and marketing of food across regions of the world; international standard setting bodies and risk assessment committees; regulatory equivalency and harmonization; product approval procedures; cost/benefits of global standards and trade agreements.  
Cross Listing: AGEC 639/SCSC 635.

SCSC 636 Regulatory Science: Methodology in Food Systems  
Credits 3. 3 Lecture Hours.  
Risk management methodology including investigation of food and feed firms, conducting internal compliance audits; sample collection, chain-of-custody, trace-back and trace-forward, recalls, label review, data interpretation, risk ranking, resource prioritization, incident command and rapid response.  
Prerequisite: SCSC 634.

SCSC 637 Environmental Microbiology  
Credits 3. 3 Lecture Hours.  
Microbial diversity and interactions in various environments with emphasis on soil and freshwater systems. Molecular methods for detection and characterization of indigenous and introduced microorganisms. Environmental sources and fate of pathogens. Biotechnological applications of environmental microorganisms.

SCSC 640 Intellectual Property in the Plant Sciences  
Credits 3. 3 Lecture Hours.  
Introduction to major foci of intellectual property (IP) impacting plant sciences, including: 1) traditional vs. emerging knowledge economies, 2) governing statutes and treaties, 3) forms of IP, and 4) IP asset identification, valuation, capture and deployment towards understanding the best practices for IP strategy development and IP portfolio management.

SCSC 641 Plant Breeding I  
Credits 3. 3 Lecture Hours.  
Theoretical and practical aspects of plant breeding including genetic basis; application of breeding methods and interdisciplinary considerations in breeding problems.  
Prerequisites: SCSC 304 or HORT 404/GENE 404; GENE 301; STAT 651.

SCSC 642 Plant Breeding II  
Credits 3. 3 Lecture Hours.  
Expectations of genetic improvement for different plant breeding methods; relative efficiency for crops of different reproductive mechanisms; genetic variances, covariances and genotype-environment interaction components of variance used in planning selection procedures.  
Prerequisites: SCSC 641; GENE 613; STAT 619.

SCSC 643/GENE 643 Molecular Quantitative Genetics and Plant Breeding  
Credits 3. 3 Lecture Hours.  
Classical, applied and molecular aspects of quantitative genetics in plant breeding; genetic relationships; genetic diversity; genetic phenomena (linkage, heterosis and epistasis); genotype by environment interaction; mapping quantitative trait loci (QTL); genomic and marker-assisted selection; application of statistical software.  
Prerequisites: STAT 651, SCSC 642 or GENE 613; or approval of instructor.  
Cross Listing: GENE 643/SCSC 643.

SCSC 644 Forage Ecology and Management  
Credits 3. 3 Lecture Hours.  
Investigation of multidisciplinary approaches toward the development of integrated forage, livestock, and wildlife production systems that are economically feasible and environmentally sustainable.  
Prerequisites: Approval of instructor and graduate classification.
SCSC 645/HORT 645 World Agriculture and International Plant Breeding
Credit 1. 1 Lecture Hour.
Evolution of world agriculture; plant breeding and improved varieties; international agricultural research centers and green revolution; population growth; environmental challenges; IPR; role of plant breeding and biotechnology in meeting world food needs. 
Prerequisite: SCSC 304, HORT 404/GENE 404 or approval of instructor.
Cross Listing: HORT 645/SCSC 645.

SCSC 646 Advanced Studies in Cotton Fiber Quality and Its Measurements
Credits 3. 3 Lecture Hours.
Advanced studies in cotton fiber quality and its measurement will explore the morphology of cotton fiber growth, the instruments used to determine fiber quality, and the interpretation of quality measurements.

SCSC 650 Mode of Action and Environmental Fate of Herbicides
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Relationships between physical-chemical characteristics of herbicides and their biological activity, selectivity, environmental fate in soil, water, and plants. Laboratory includes practical applications of gas and liquid chromatography, liquid scintillation counting and plant bioassays.
Prerequisite: SCCS 450 or approval of instructor.

SCSC 651 Weed Biology and Ecology
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Fundamentals of weed invasion, development, persistence and competition with agronomic crops; consideration of ecological concepts important to weed-crop relationships as influenced by weed control and other cultural practices. Practical consideration of integrated weed management systems and weed identification.
Prerequisites: SCSC 303; MEPS 313.

SCSC 654 Analysis of Complex Genomes
Credits 3. 3 Lecture Hours.
History and current status of genetic and molecular analysis of higher eukaryotic genomes; coverage of techniques for dissection of genomes into manageable parts; investigations in genetics, breeding and evolution; emphasis on quantitative inheritance, genetic mapping, physical mapping, map-based cloning, with examples drawn from a wide range of organisms.
Prerequisite: GENE 603 or GENE 431/BICH 431.
Cross Listing: GENE 654 and MEPS 654.

SCSC 655 Analysis of Complex Genomes--Lab
Credits 3. 0 Lecture Hours. 7 Lab Hours.
Laboratory methods in molecular genetic techniques for genetic mapping, physical mapping, and map-based cloning of both qualitative and quantitative phenotypes.
Prerequisite: GENE 603 or equivalent or approval of instructor.
Cross Listing: GENE 655 and MEPS 655.

SCSC 657 Environmental Soil and Water Science
Credits 3. 3 Lecture Hours.
Discussion of physical, chemical, and biological properties of soil and water and the impact on productivity and sustainability of various ecosystems; application of the knowledge of properties and soil processes to develop and evaluate strategies for protecting and/or improving soil and water quality.
Prerequisite: SCSC 301. Stacked with SCSC 455.

SCSC 658 Watershed and Water Quality Management
Credits 3. 3 Lecture Hours.
Land use impact on surface and ground water chemistry; legislation impacting water quality; surface and groundwater impairment and restoration; case studies in best management practices.
Prerequisite: Graduate classification.

SCSC 660 Experimental Designs in Agriculture
Credits 3. 3 Lecture Hours.
Fundamental principles and procedures of experimental designs in agricultural sciences; emphasis includes factorial designs, predicting outputs, use of covariance, balanced and unbalanced experimental designs as related to common agricultural research projects under field, greenhouse or growth chamber culture; familiarization with computer programming of common statistical software.
Prerequisite: STAT 651.

SCSC 663/ESSM 663 Applied Spatial Statistics
Credits 4. 3 Lecture Hours. 2 Lab Hours.
An introduction to the theory and practice of spatial statistics as applied to the natural resources. Spatial analyses focusing primarily on ordinary kriging, point processes, and lattice data.
Prerequisites: MATH 141, MATH 142, STAT 651, or equivalents; ESSM 651/BAEN 651 preferred.
Cross Listing: ESSM 663/SCSC 663.

SCSC 671/MEPS 671 Plant Growth and Development
Credits 3. 3 Lecture Hours.
Comprehensive analysis of plant development primarily focused on the molecular and cellular processes underlying morphogenesis, vegetative growth and reproduction; role of the major phytohormones as coordinators of development will be analyzed; plastic developmental responses to conditioning environmental signals.
Prerequisites: MEPS 601 or approval of instructor.
Cross Listing: MEPS 671/SCSC 671.

SCSC 681 Seminar
Credit 1. 1 Lecture Hour.
For graduate students and staff members in soils and crops; presentation and discussion of special topics and research data; participation required of all graduate students in agronomy.

SCSC 684 Professional Internship
Credits 1 to 16. 1 to 16 Lecture Hours.
Program planned to provide professional training in student's particular field of interest. Faculty and employer will supervise the activity.
Prerequisite: Approval of instructor.

SCSC 685 Directed Studies
Credits 1 to 4. 1 to 4 Lecture Hours.
Advanced problems in some phase of agronomy not directly related to thesis or dissertation.

SCSC 689 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours. 0 to 4 Lab Hours.
Selected topics in an identified area of agronomy. May be repeated for credit.
Prerequisite: Approval of department head.

SCSC 691 Research
Credits 1 to 23. 1 to 23 Other Hours.
Investigations leading to thesis or dissertation.

SEFB - Special Ed Field Based
Courses

SEFB 420 Education and Employment Issues in Secondary Special Education
Credits 3. 2 Lecture Hours. 3 Other Hours.
Field-based course involving psychological, social, physical and cognitive development of secondary-age students; career assessment; programmatic options within educational and employment settings; transition models from school to adult settings.
Prerequisites: Admission to professional phase of program.

SEFB 425 Student Teaching in Special Education
Credits 6. 24 Other Hours.
(0-24) Observation and participation in an accredited special education classroom; techniques of teaching special education and appropriate instructional strategies for students with exceptionalities. Must be taken on a satisfactory/unsatisfactory basis.
Prerequisites: Admission to professional phase of program and to student teaching.

SEFB 426 Effective Instruction of Students of Diverse Abilities
Credits 3. 2 Lecture Hours. 3 Other Hours.
Field-based application of effective instructional strategies for teaching students of diverse abilities; analysis of teaching style and strategies for improving ability to work with diverse populations. To be taken concurrently with SEFB 425. Must be taken on a satisfactory/unsatisfactory basis.
Prerequisites: Senior classification; 2.5 GPA in teaching field; approval of department head.

SEFB 430 Practicum in Applied Behavior Analysis
Credits 3. 9 Other Hours.
University-supervised experience related to specializations in special education and behavior analysis. May be taken 8 times for credit.
Prerequisites: Junior or senior classification; approval of instructor; approval of department head.

SEFB 431 Intensive Practicum in Applied Behavior Analysis
Credits 3. 9 Other Hours.
University-supervised intensive experience related to specializations in special education and behavior analysis. May be taken 8 times for credit.
Prerequisites: Junior or senior classification; approval of instructor; approval of department head.

SEFB 499 SPECIAL ED FIELD BASE
Credits 15. 15 Lecture Hours.

SEFB 618 Applied Behavior Management in the Classroom
Credits 3. 3 Lecture Hours.
Field-based course related to effective management of challenging behavior problems in the classroom using proactive classroom strategies, effective instruction and planned behavior interventions; discussion and applications of methods for observing, assessing and analyzing challenging behaviors.
Prerequisites: Graduate classification and approval of department head.

SEFB 630 Practicum in Applied Behavior Analysis
Credits 3. 9 Other Hours.
University-supervised experience related to specializations in special education and behavior analysis. May be taken eight times for credit.
Prerequisites: Graduate classification; SEFB 618; approval of department head.

SEFB 631 Intensive Practicum in Applied Behavior Analysis
Credits 3. 9 Other Hours.
University-supervised intensive experience related to specializations in special education and behavior analysis. May be taken eight times for credit.
Prerequisites: Graduate classification; SEFB 618; approval of department head.

SEFB 684 Internship in Special Education
Credits 1 to 4. 1 to 16 Other Hours.
University-directed experience in a professional employment setting; full-time teaching and responsibility in a classroom with students with disabilities. May be taken 4 times.
Prerequisites: Graduate classification and approval of department head.

SENG - Safety Engineering

Courses

SENG 309/NUEN 309 Radiological Safety
Credits 3. 3 Lecture Hours.
Interactions of nuclear radiations with matter and biological systems; theory and practice of radiation dosimetry as applied to radiation protection; design and application of radiation dosimetry systems for personnel monitoring, area radiation monitoring and accident situation; includes external and internal dosimetry as well as long-term risk analysis.
Prerequisite: NUEN 302.
Cross Listing: NUEN 309/SENG 309.

SENG 310 Industrial Hygiene Engineering
Credits 3. 3 Lecture Hours.
Application of scientific and engineering principles in the selection and design of control systems related to chemical, physical and ergonomic exposures in the process and manufacturing industries; relationships of criteria, analysis and specifications for the assessment and control of occupational related illnesses.
Prerequisites: CHEM 107; MATH 308; PHYS 208; or approval of instructor.

SENG 312 System Safety Engineering
Credits 3. 3 Lecture Hours.
Application of system safety analytical techniques to the design process; emphasis on the management of a system safety or product safety program; relationship with other disciplines such as reliability, maintainability, human factors and product liability applications.
Prerequisite: Junior classification.

SENG 321 Industrial Safety Engineering
Credits 3. 3 Lecture Hours.
Application of scientific and engineering principles in the selection and design of control systems related to chemical, physical and ergonomic exposures in the process and manufacturing industries; relationships of criteria, analysis and specifications for the assessment and control of occupational related illnesses.
Prerequisites: CHEM 107; MATH 308; PHYS 208; or approval of instructor.

SENG 322 Fire Protection Engineering - Facilities Design
Credits 3. 3 Lecture Hours.
Design of facilities from a fire protection engineering viewpoint including fire detection and fire control systems; materials, equipment, exposures, occupancies and processes; both public and industrial occupancies studied to determine fire protection design specifications.
Prerequisite: SENG 322 or approval of instructor.
SENG 430/CHEN 430 Risk Analysis in Safety Engineering  
Credits 3. 3 Lecture Hours.  
Concepts of risk and risk assessment, which uses all available information to provide a foundation for risk-informed and cost-effective engineering practices; examples and exercises are drawn from a variety of engineering areas.  
Prerequisite: Junior or senior classification.  
Cross Listing: CHEN 430/SENG 430.  

SENG 455/CHEN 455 Process Safety Engineering  
Credits 3. 3 Lecture Hours.  
Applications of engineering principles to process safety and hazards analysis, mitigation, and prevention, with special emphasis on the chemical process industries; includes source modeling for leakage rates, dispersion, analysis, relief valve sizing, fire and explosion damage analysis, hazards identification, risk analysis, accident investigations.  
Prerequisite: Senior classification in any engineering major.  
Cross Listing: CHEN 455/SENG 455.  

SENG 460/CHEN 460 Quantitative Risk Analysis in Safety Engineering  
Credits 3. 3 Lecture Hours.  
Fundamental concepts, techniques, and applications of risk analysis and risk-informed decision making for engineering students; practical uses of probabilistic methods are demonstrated in exercises and case studies from diverse engineering areas.  
Prerequisite: Senior or graduate classification.  
Cross Listing: CHEN 460/SENG 460.  

SENG 477 Air Pollution Engineering  
Credits 3. 3 Lecture Hours.  
Design of air pollution abatement equipment and systems to include cyclones, bag filters and scrubbers; air pollution regulations; permitting; dispersion modeling; National Ambient Air Quality Standards.  
Prerequisite: ENGR 214 or equivalent.  
Cross Listing: BAEN 477 and MEEN 477.  

SENG 485 Directed Studies  
Credits 1 to 4. 1 to 4 Other Hours.  
Permits students to develop special projects in industrial hygiene engineering, safety engineering or fire protection engineering. Project must be approved by department head.  

SENG 489 Special Topics in...  
Credits 1 to 4. 1 to 4 Lecture Hours.  
Selected topics in industrial hygiene engineering, safety engineering or fire protection engineering of specific student interest. May be repeated for credit.  
Prerequisite: Approval of instructor.  

SENG 655/CHEN 655 Process Safety Engineering  
Credits 3. 3 Lecture Hours.  
Applications of engineering principles to process hazards analysis including source and dispersion modeling, emergency relief systems, fire and explosion prevention and mitigation, hazard identification, risk assessment, process safety management, etc.  
Prerequisite: Approval of instructor.  
Cross Listing: CHEN 655/SENG 655.  

SENG 660 Quantitative Risk Analysis  
Credits 3. 3 Lecture Hours.  
Fundamental concepts, techniques, and applications of quantitative risk analysis and risk-informed decision making for students in all engineering fields. Practical uses of probabilistic methods are demonstrated in exercises and case studies from diverse engineering areas.  
Prerequisite: Graduate or Senior status.  
Cross Listing: CHEN 660 and ISEN 660.  

SENG 670 Industrial Safety Engineering  
Credits 3. 3 Lecture Hours.  
General concepts and techniques of safety engineering upon which more detailed and advanced applications may be based; applications of safety engineering principles to industrial and commercial systems; the concept of designing optimally safe systems.  

SENG 674 System Safety Engineering  
Credits 3. 3 Lecture Hours.  
Current system safety engineering analysis techniques; failure mode and effect and fault tree analysis. Engineering economic analysis is reviewed to develop skills for the safety engineer in presenting alternate solutions to management.  

SENG 677 Fire Protection Engineering  
Credits 3. 2 Lecture Hours. 3 Lab Hours.  
Theory of combustion, characteristics of flammables, fire resistance, fire spread, fire protection principles, public and private fire service organization and equipment; automatic extinguishing systems. Fire protection analysis and design projects.  

SENG 680 Industrial Hygiene  
Credits 3. 3 Lecture Hours.  
Recognition of environmental stresses present in man-machine-environment systems and the effect of these stresses on human performance, safety and health; chemical, physical, ergonomic and biological exposures, manufacturing systems, materials and operations.  

SENG 681 Seminar  
Credit 1. 1 Other Hour.  
Formal presentations in industrial hygiene and safety engineering by students and professional industrial representatives.  

SENG 684 Professional Internship  
Credits 1 to 6. 1 to 6 Other Hours.  
Training under the supervision of practicing engineers in settings appropriate to the student’s professional objectives.  
Prerequisites: Approval of chair of student’s advisory committee and department head.  

SENG 685 Directed Studies  
Credits 1 to 12. 1 to 12 Other Hours.  
Investigation of topics not within the scope of thesis or dissertation research and not covered by other formal courses.  

SENG 689 Special Topics in...  
Credits 1 to 4. 1 to 4 Lecture Hours.  
Selected topics in an identified area of safety engineering and industrial hygiene. May be repeated for credit.  
Prerequisite: Approval of instructor.  

SENG 691 Research  
Credits 1 to 23. 1 to 23 Other Hours.  
Research in industrial hygiene, safety engineering or related topics for thesis or dissertation.  

SOCl - Sociology
Courses

SOCI 203 U.S.-Mexico Border
Credits 3. 3 Lecture Hours.
Understanding of the U.S.-Mexico border from different theoretical perspectives, including structural violence, identity, power and demography.

SOCI 205 Introduction to Sociology
Credits 3. 3 Lecture Hours.
(SOCI 1301) Introduction to Sociology. Sociological perspectives including concepts and methods; social class and social status, the family, minorities, crime, religion, power, urbanization and population.

SOCI 206 Global Social Trends
Credits 3. 3 Lecture Hours.
Long-term trends in world societies from ancient times to the present and to the foreseeable future; emphasis on contemporary international issues and problems, techniques of analysis and future projections.

SOCI 207/WGST 207 Introduction to Gender and Society
Credits 3. 3 Lecture Hours.
Similarities and differences between females and males in a number of cultures throughout the world; sociological analysis of gender in relation to social structure.
Cross Listing: WGST 207/SOCI 207.

SOCI 210 Sociology of Technology and Science
Credits 3. 3 Lecture Hours.
Examination of technology and science from a variety of theoretical perspectives; process by which engineered products are influenced by social factors as well as how they in turn, impact society; exploration and critique of classic and contemporary theories of technological development.

SOCI 211 Sociology of Deviance
Credits 3. 3 Lecture Hours.
Perspectives on non-normative behavior; theories of deviance.

SOCI 212 Sociology of Popular Culture
Credits 3. 3 Lecture Hours.
Examination of the classic and contemporary social scientific definitions and theories of culture, and popular versus “high” or elite culture(s), various forms and arenas of popular culture, such as television, film, and music, institutions and popular culture, identity (race, class, gender and sexuality) and popular culture.

SOCI 217 Introduction to Race and Ethnicity
Credits 3. 3 Lecture Hours.
Introduction to the sociological examination of race and ethnicity in U.S. society; overview of theories and methods in the study of race and ethnicity, an understanding of how they function as individual and group-level identities, and organizing principles in social institutions.

SOCI 220 Methods of Social Research
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Relationships between sociological theory, research, qualitative evaluation of data; construction and use of analytical procedures and research techniques, and participant observation.

SOCI 229 Qualitative Methods
Credits 3. 3 Lecture Hours.
Methodologies in social research with emphasis on qualitative dimensions of inquiry; topics include in-depth interviewing, observation, unobtrusive measures, analysis of documents, fieldwork issues, ethics, note-taking, preliminary data analysis, and an overview of writing research reports based on qualitative research.

SOCI 230 Classical Sociological Theory
Credits 3. 3 Lecture Hours.
Role of theory in sociological study; the development of classical theoretical perspectives providing the foundation for contemporary theory.

SOCI 289 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours. 0 to 4 Lab Hours.
Selected topics in an identified area of sociology. May be repeated for credit.
Prerequisite: Approval of instructor.

SOCI 302 Women and Religion
Credits 3. 3 Lecture Hours.
Investigation of women’s position in religious institutions historically and/or currently, religion’s influence on women’s roles and status, and women's attempts to define their own religious perspectives; draws on sociological and philosophical insights and methods.
Prerequisite: Junior or senior classification or approval of instructor.
Cross Listing: RELS 302 and WGST 302.

SOCI 304 Criminology
Credits 3. 3 Lecture Hours.
Criminal law and crime rates; explanations of criminal behavior; criminal careers, police, adult courts and prisons.
Prerequisite: Junior classification.

SOCI 306/ASIA 306 Society and Population of Modern China
Credits 3. 3 Lecture Hours.
Major trends and current topics in social and demographic aspects of the society of modern China, including Taiwan.
Prerequisite: Junior or senior classification.
Cross Listing: ASIA 306/SOCI 306.

SOCI 310/WGST 310 Motherhood in Society
Credits 3. 3 Lecture Hours.
Examines expectations and/or practices relating to motherhood, with consideration of their cultural impact; taught from a social science perspective.
Prerequisites: Junior or senior classification or approval of instructor.
Cross Listing: WGST 310/SOCI 310.

SOCI 312 Population and Society
Credits 3. 3 Lecture Hours.
The causes and implications of major population trends.

SOCI 313 Military, War and Society
Credits 3. 3 Lecture Hours.
Major trends and current topics in military organization; the experience and conduct of war; civil-military relations.

SOCI 314 Social Problems
Credits 3. 3 Lecture Hours.
Survey and exploration of causes and consequences of major social problems in American society such as poverty, unemployment, energy, alcohol, other drugs and sexual abuse.

SOCI 315/WGST 315 The Marriage Institution
Credits 3. 3 Lecture Hours.
Courtship, engagement, marriage, family formation, personal adjustment, conflict, financing and child rearing.
Cross Listing: WGST 315/SOCI 315.
SOCI 316/WGST 316 Sociology of Gender
Credits 3.3 Lecture Hours.
Sociological explanations of status differences between men and women; cross-cultural comparisons; gender role socialization, cultural stereotypes, discrimination; gender roles and status in the family, economy, religion, science, other social institutions; deviance, victimization and gender; recent social changes.
Cross Listing: WGST 316/SOCI 316.

SOCI 317/AFST 317 Racial and Ethnic Relations
Credits 3.3 Lecture Hours.
Status of racial and ethnic groups such as Native Americans, African Americans, Latino Americans, Asian Americans, European Americans, and other groups in the political, economic, legal and social systems of the United States.
Cross Listing: AFST 317/SOCI 317.

SOCI 320 Demographic Methods
Credits 3.3 Lecture Hours.
Procedures and techniques of demographic analysis; examination of demographic data; calculation of rates; construction of life tables; population estimates and projections.
Prerequisite: Junior or senior classification or approval of instructor.

SOCI 322 Industrial Sociology
Credits 3.3 Lecture Hours.
Work relations in jobs; social relations of groups and occupations and the social organization of small work groups, bureaucracies and modern large corporations.

SOCI 323/AFST 323 Sociology of African Americans
Credits 3.3 Lecture Hours.
Major elements of the Afro-American subculture in relation to white American society and its major social institutions.
Prerequisite: SOCI 205.
Cross Listing: AFST 323/SOCI 323.

SOCI 325/ASIA 325 International Business Behavior
Credits 3.3 Lecture Hours.
Theoretical models of Asian cultures and practical protocol/etiquette related to business and work in China, Thailand, South Korea, Japan, Australia, and other Pacific Rim nations; discussions of national character, managerial behavior and values.
Cross Listing: ASIA 325/SOCI 325.

SOCI 326/RELS 326 Sociology of Religion
Credits 3.3 Lecture Hours.
Institution of religion and religious-related behavior; relationship between dynamic and structural religion and contemporary society.
Prerequisite: SOCI 205.
Cross Listing: RELS 326/SOCI 326.

SOCI 327 Morality and Society
Credits 3.3 Lecture Hours.
Examination of how moral beliefs arise, how they change, how the moral order is maintained, and how that order affects the social structure; use of case-study method.

SOCI 328 Environmental Sociology
Credits 3.3 Lecture Hours.
A comprehensive overview of environmental sociology, including major sociological theories, concepts and policy issues affecting our understanding of environmental changes; emphasizes social factors that impact environmental quality.
Prerequisite: SOCI 205 or approval of instructor.

SOCI 329/ASIA 329 Pacific Rim Business Behavior
Credits 3.3 Lecture Hours.
Theoretical models of Asian cultures and practical protocol/etiquette related to business and work in China, Thailand, South Korea, Japan, Australia, and other Pacific Rim nations; discussions of national character, managerial behavior and values.
Cross Listing: ASIA 329/SOCI 329.

SOCI 330 Sociology of Nutrition
Credits 3.3 Lecture Hours.
Social factors affecting the kind and amount of food consumed around the world; social consequences of nutritional status for family functioning and for international development.

SOCI 332/WGST 332 Alternative Genders
Credits 3.3 Lecture Hours.
Examination of theories and case studies involving alternative genders and sexualities, studies in their cultural contexts and including the role of factors such as race, class, ethnicity, age, and physical characteristics.
Prerequisites: 3 credits in SOCI or WGST; junior or senior classification.
Cross Listing: WGST 332/SOCI 332.

SOCI 335 Sociology of Organizations
Credits 3.3 Lecture Hours.
How people act in organizations; structures in organizations; the relationship between organizations and their environments.

SOCI 337 International Migration
Credits 3.3 Lecture Hours.
Survey of theories and trends in international migration.
Prerequisite: Junior or senior classification, or approval of instructor.

SOCI 402 Sociology of Latin America
Credits 3.3 Lecture Hours.
Latin American society; integration of viewpoints from the humanities, arts and social sciences.
Prerequisite: Junior or senior classification or approval of instructor.

SOCI 403 Sociology of Latinos
Credits 3.3 Lecture Hours.
Exploration of social characteristics and acculturation problems of Mexican Americans in the United States; styles of life and cultural variability, social mobility, the struggle for advancement and identity through social movements.

SOCI 404/RPTS 404 Sociology of the Community
Credits 3.3 Lecture Hours.
Organization of American communities examining the bases of community, types of communities and the changes faced by communities.
Prerequisite: SOCI 205.
Cross Listing: RPTS 404/SOCI 404.

SOCI 411 Social Psychology
Credits 3.3 Lecture Hours.
Effects of social experience and groups on the development of personality, attitudes, values and behavior.
Prerequisite: 3 hours of sociology or psychology.
SOCI 412 Political Sociology  
Credits 3.3 Lecture Hours.  
Survey of social bases of power; state formation in advanced industrial societies; origins of welfare state; interrelation of nationalism; culture and class formation.  
Prerequisite: Junior or senior classification or approval of instructor.

SOCI 413 Social Movements  
Credits 3.3 Lecture Hours.  
Survey of social movements; emphasis on social movement participation, emergence and outcomes; analysis of revolutions and movements in the developing world; theory and methods of social movement research.  
Prerequisite: Junior or senior classification or approval of instructor.

SOCI 415 Sociology of Education  
Credits 3.3 Lecture Hours.  
Relationship of social structure and change to education; social background and student performance; teachers and their careers; bureaucracy and change in education.  
Prerequisite: SOCI 205.

SOCI 419 Social Class in Contemporary Society  
Credits 3.3 Lecture Hours.  
Composition and consequences of social class structure; social class explanations for lifestyle patterns, educational and occupational achievements.  
Prerequisite: SOCI 205.

SOCI 420 Advanced Methods of Social Research  
Credits 3.2 Lecture Hours.  
2 Lab Hours.  
Philosophy and methods of social research, including research design; methods of observation; questionnaires, interviews and other sources of social data; qualitative and quantitative techniques of inference, analysis and research report writing.  
Prerequisite: SOCI 220.

SOCI 423 Globalization and Social Change  
Credits 3.3 Lecture Hours.  
Examines the effects of globalization on social structure including politics, governments, corporations, work and inequality.  
Prerequisite: Junior or senior classification or approval of instructor.

SOCI 424/WGST 424 Women and Work in Society  
Credits 3.3 Lecture Hours.  
Social context of women's work; work patterns, labor force participation, occupational destinations and occupational mobility; alternatives to the conventional division of labor by sex in society.  
Cross Listing: WGST 424/SOCI 424.

SOCI 425 Medical Sociology  
Credits 3.3 Lecture Hours.  
Organization, value systems and practice of medicine and the provision of health care in the U.S.; role of physicians, health occupations and patients; marginal and folk medicine.  
Prerequisite: SOCI 205.

SOCI 426 Sociology of Work  
Credits 3.3 Lecture Hours.  
Overview of classical and contemporary theories of work, changes in labor market structure; contemporary work place organization; occupational stratification by race, class, and gender.  
Prerequisite: Junior or senior classification or approval of instructor.

SOCI 430 Contemporary Sociological Theory  
Credits 3.3 Lecture Hours.  
Basic ideas of contemporary sociological theory: structuralism, functionalism, conflict, symbolic interaction, exchange and their application to current research.  
Prerequisite: SOCI 230.

SOCI 445 Sociology of Law  
Credits 3.3 Lecture Hours.  
Introduction to the sociology of law; the relation of law to general social control and to organizational dynamics.

SOCI 463 Gender in Asia  
Credits 3.3 Lecture Hours.  
Gender dynamics in Asia; changes in gender roles; women's movements; women and the economy; women and politics; men's and women's private lives.  
Prerequisite: Junior or senior classification or approval of instructor.  
Cross Listing: ASIA 463 and WGST 463.

SOCI 478 Professional Development in Sociology I  
Credit 1.1 Lecture Hour.  
Career fields available to sociology majors, including the nature of the work, professional expectations, and the credentials for entry in the fields.  
Prerequisite: Sociology major; junior or senior classification.

SOCI 479 Professional Development in Sociology II  
Credits 2.2 Lecture Hours.  
Preparation for careers in sociology-related professionals by in-depth research of prospective career fields, development of oral, written, and media skills, formation of professional networks, and training in professional ethics, cultural diversity, and leadership.  
Prerequisite: Sociology major; junior or senior classification.

SOCI 484 Field Practicum  
Credits 0 to 4.0 to 4 Other Hours.  
Participation in an approved agency. Field experience will be supervised by selected agency personnel and appropriate faculty. Experiences and requirements will vary slightly according to placement and student interests.  
Prerequisites: Major in sociology; 12 hours of sociology; approval of undergraduate advisor.

SOCI 485 Directed Studies  
Credits 0 to 3.0 to 3 Other Hours.  
Special problems not covered by other courses. Course depends upon needs and interest of the student and upon the number of credit hours.  
Prerequisite: Senior classification in sociology.

SOCI 489 Special Topics in...  
Credits 1 to 4.1 to 4 Lecture Hours.  
Selected topics in an identified area of sociology. May be repeated for credit.  
Prerequisite: Approval of instructor.

SOCI 491 Research  
Credits 0 to 3.0 to 3 Other Hours.  
Research conducted under the direction of a chosen faculty member in sociology. May be repeated for a maximum of 3 hours total credit.  
Prerequisites: Junior or senior classification and approval of instructor.

SOCI 603/WGST 603 The Contemporary Family  
Credits 3.3 Lecture Hours.  
Review and criticism of theories developed for study of the family; family formation, dynamics, conflicts, power, dissolution; subcultural family forms and responses to social change.  
Cross Listing: WGST 603.
SOCI 604 Comparative Historical Methods
Credits 3.3 Lecture Hours.
Surveys key methodological issues, including the logic of comparative
design and analysis of primary and secondary sources. Exemplars of
important comparative historical research—both classics and more recent
publications—will be reviewed.
Prerequisite: Graduate classification.

SOCI 605 Social Movements
Credits 3.3 Lecture Hours.
Surveys the literature on social movements including the topics of
movement emergence, movement outcomes, state repression, and
revolutions; reviews contemporary debates in the theories of social
movement and new developments in research.
Prerequisite: Graduate classification.

SOCI 606 War and Democracy
Credits 3.3 Lecture Hours.
Sociological approaches to the study of war’s effects on democracy and
democratic control of the military and the use of force, in comparative-
historical context.

SOCI 607 Seminar in Social Organizations
Credits 3.3 Lecture Hours.
Relevant conceptual and empirical approaches to the study of selected
aspects of social organization. May be taken up to two times for credit as
content varies.
Prerequisite: Graduate classification.

SOCI 608 Social Organization
Credits 3.3 Lecture Hours.
Theoretical and conceptual bases of patterned human behavior; structural,
processual and functional aspects of human groups from simplest informal
to the most complex formal types: small groups, associations, institutions,
complex organizations, bureaucracies, societies.

SOCI 611 Classical Sociological Theory
Credits 3.3 Lecture Hours.
Critical analysis of the writings of the principal founders of modern
sociology; Marx, Durkheim and Weber and their influence on current
theoretical issues.
Prerequisite: SOCI 430 or equivalent or approval of instructor.

SOCI 615 Contemporary Sociological Theory
Credits 3.3 Lecture Hours.
Critical analysis of current sociological perspectives, their logic of inquiry,
substantive claims and application to empirical research.
Prerequisite: SOCI 611.

SOCI 616 Political Sociology
Credits 3.3 Lecture Hours.
Survey of the principal social and organizational bases of politics; the
institutionalization of political power; explanation of political change and
movements of social protest.
Prerequisite: Graduate classification or approval of instructor.

SOCI 617 Comparative Racial-Ethnic Relations
Credits 3.3 Lecture Hours.
Cross-cultural variations in racial-ethnic relations and structures of
inequality; assessment of systems and power-conflict frameworks in
diverse settings such as South America, Mexico, South Africa, Caribbean
Regions and United States.
Prerequisite: Approval of instructor.

SOCI 618 Sociology of Education
Credits 3.3 Lecture Hours.
The school system and the democratic way of life; relationship of
education to social organization, social change and social control. Role of
education in society.
Prerequisite: SOCI 205.

SOCI 621 Social Psychology
Credits 3.3 Lecture Hours.
Personality, social and cultural systems; development and
interrelationships; cognitive activities, motivational determinants and
selectivity; goals, structures, coordination and related factors influencing
complex social groupings.
Prerequisites: SOCI 205; 12 additional hours of social science.

SOCI 622 Social Demography
Credits 3.3 Lecture Hours.
Survey of methods, theories and problems of contemporary demographic
phenomena.
Prerequisite: Approval of department head.

SOCI 623 Measurement of Sociological Parameters
Credits 3.3 Lecture Hours.
Sociological research including scaling, scale analysis and experimental
design.
Prerequisites: Graduate classification; three hours of statistics.

SOCI 624 Qualitative Methodology
Credits 3.3 Lecture Hours.
Exposure to and critical assessment of qualitative approaches to data
gathering in social science; topics include naturalistic observation, field
research skills, unobtrusive measures and grounded theory construction.

SOCI 627 Seminar in Law, Deviance and Social Control
Credits 3.3 Lecture Hours.
Relevant literature and research in selected aspects of law, deviance and
social control. May be taken up to three times for credit as content varies.
Prerequisite: Graduate classification.

SOCI 628 Deviant Behavior
Credits 3.3 Lecture Hours.
Contemporary sociological approaches to deviance; theoretical and
empirical studies of major types of deviant behavior.

SOCI 629 Sociology of Law
Credits 3.3 Lecture Hours.
Critical survey of the social sources of law, the role of law in social
organizations and problems of law enforcement.
Prerequisite: Graduate classification.

SOCI 631 Seminar in Sociological Research
Credits 3.3 Other Hours.
Critical analysis of research procedures used by sociologists.
Prerequisite: SOCI 623.

SOCI 633 Demographic Methods
Credits 3.3 Lecture Hours.
Procedures and techniques for the collection, evaluation and analysis of
demographic data; measures of population growth, composition, fertility,
mortality and migration.
Prerequisite: SOCI 622.

SOCI 635 Sociology of Complex Organizations
Credits 3.3 Lecture Hours.
Comparative structures; contingency models; micro- and macro-theoretical
perspectives.
SOCI 640 Sociology of Development
Credits 3. 3 Lecture Hours.
Survey of sociology of development; review of major classical and contemporary approaches to development including but not limited to modernization theory, world systems theory, comparative nationalism, demographic theories, feminist approaches; contradictions of development including K-Cycles, social movements and ecological constraints. 
Prerequisite: Graduate classification or approval of instructor.

SOCI 647 Seminar in Demography and Human Ecology
Credits 3. 3 Lecture Hours.
Relevant literature and research problems of a selected aspect of demography and human ecology, such as fertility and mortality, migration, international demography. May be taken up to three times for credit as content varies.
Prerequisite: Graduate classification.

SOCI 651 Sociology of Culture
Credits 3. 3 Lecture Hours.
Theoretical developments and methodological issues relevant to studying culture through classical, modern and postmodern sociological perspectives; includes background concerning the conditions under which theories develop and discussion of controversies in the definition of and research agendas within the sociology of culture.
Prerequisite: Graduate classification.

SOCI 657 Seminar in Culture
Credits 3. 3 Lecture Hours.
Relevant literature and research in selected aspects of culture and cultural processes. May be taken up to three times for credit as content varies.
Prerequisite: Approval of instructor.

SOCI 660 Theories of Race and Ethnic Group Relations
Credits 3. 3 Lecture Hours.
Sociological theories of intergroup assimilation, conflict and adaptation; includes examination and analysis of three major contemporary perspectives; assimilation and social fusion theory, conflict models and models of ethnic pluralism; theories of melioration of social discrimination also examined.
Prerequisite: Graduate classification.

SOCI 661/WGST 661 Sociology of Gender
Credits 3. 3 Lecture Hours.
Overview of the Sociology of Gender; historical development, primary concepts, contemporary issues, theory, methods, and applications.
Prerequisite: Graduate classification.
Cross Listing: WGST 661/SOCI 661.

SOCI 662 Racism and Anti-Racism
Credits 3. 3 Lecture Hours.
This seminar focuses on racism and anti-racism issues, including social science research on slavery, anti-Black discrimination and Black resistance, anti-Asian discrimination and Asian American resistance, anti-Latino discrimination and Latino resistance, and white anti-racist groups. We assess empirical research on these topics and explore important theoretical frameworks.
Prerequisite: Graduate classification.

SOCI 663 Black and Latino Americans
Credits 3. 3 Lecture Hours.
This seminar focuses social science theory and research about African Americans and Latinos. We will emphasize historical backgrounds, social science theories applied to these groups, patterns of immigration, cognitive framing, patterns of racial-ethnic discrimination, and racial/class/gender intersections. We will review critically important research books dealing with these and related U.S. racial-ethnic issues.
Prerequisite: Graduate classification.

SOCI 667 Seminar in Race and Ethnic Relations
Credits 3. 3 Lecture Hours.
Origins, extent, consequences of racial and ethnic differences on key demographic variables such as fertility, mortality, migration and population size, growth, distribution and composition; how demographic variables affect and are affected by racial and ethnic differences in family structure, social mobility and socioeconomic stratification. May be taken up to three times for credit as content varies.
Prerequisite: Graduate classification.

SOCI 666 Seminar in Social Psychology
Credits 3. 3 Lecture Hours.
Relevant literature and research problems of a selected aspect of social psychology. May be taken for credit up to three times as content varies.
Prerequisite: Graduate classification.

SOCI 668 Professional Seminar in Sociology
Credit 1. 1 Lecture Hour.
Provides socialization to the profession of sociology; focuses on the role of the graduate student in sociology departments and other areas of professionalization; systematically introduces students to faculty members and their work; and provides instruction on how to write and publish research. Repeatable to 6 hours total.

SOCI 685 Directed Studies
Credits 1 to 4. 1 to 4 Other Hours.
Directed individual study of selected problem in field of sociology.
Prerequisite: Approval of instructor.

SOCI 687 Seminar in Rural Sociology
Credits 3. 3 Lecture Hours.
Develop sociological understanding of agriculture and natural resources; includes people involved in production, rural communities and agribusiness; focus on causes of social change and social organizations in agriculture and consequences. May be taken up to three times for credit as content varies.
Prerequisite: Graduate classification.

SOCI 689 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Selected topics in an identified area of sociology. May be repeated for credit.

SOCI 691 Research
Credits 1 to 23. 1 to 23 Other Hours.
Initiation and completion of research project of approved scope for an advanced degree.
Prerequisite: Approval of instructor.
SOMS-Schl of Military Sciences

Courses

SOMS 111 Principles of Academic and Personal Development
Credit 1. 1 Lecture Hour.
Identification of personal goals and learning skills promoting academic and career success; development of personal leadership strengths, styles, motivation and values; personal development planning for self-improvement.
Prerequisite: Freshman classification or approval of instructor.

SOMS 180 Survey of Performance Based Training Methods
Credit 1. 1 Lecture Hour.
Introduction to performance oriented training methods and techniques; key concepts and generalizations of training and identification of training needs; study of representative theories of workplace training, performance evaluation, and experiential training techniques.
Prerequisite: Freshman classification or approval of instructor.

SOMS 280 Fundamentals of Peer Leadership
Credit 1. 1 Lecture Hour.
Introduction to theories of peer leadership when applied to a specific context; fundamentals and techniques of small group communication; performance evaluation; survey of basic supervisory skills.
Prerequisite: Sophomore classification or approval of instructor.

SOMS 289 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Selected topics in an identified area of leadership theory and practice. May be repeated for credit.
Prerequisites: Freshman or sophomore classification; approval of instructor.

SOMS 380 Workshop in Leadership Education
Credit 1. 1 Lecture Hour.
The study of leadership theory, intra group relationships, assessment tools for skills development, and techniques for achieving group goals.
Prerequisite: Junior or senior classification; approval of instructor.

SOMS 381 Workshop in Leadership Education II
Credit 1. 1 Lecture Hour.
Continuation of SOMS 380. Fundamentals of small group dynamics; interpersonal communication; application of selected leadership theories; interpretation of individual assessments to include personality traits, values, and signature strengths.
Prerequisites: SOMS 380; junior or senior classification.

SOMS 382 Seminar in Executive Leadership
Credit 1. 1 Lecture Hour.
The study of contemporary leadership issues, organizational effectiveness, problem solving, and decision making.
Prerequisite: Senior classification or approval of instructor.

SOMS 481 Seminar in Executive Leadership II
Credit 1. 1 Lecture Hour.
Continuation of SOMS 481. Discussion of ethical dilemmas in leadership roles; ethical decision-making; personal accountability in organizational settings.
Prerequisite: SOMS 481 or approval of instructor.

SOMS 485 Directed Studies
Credits 1 to 4. 1 to 4 Lecture Hours.
Individual supervision of special readings or assigned projects to promote independent study; program enrichment for capable students; written and oral reports required.
Prerequisite: Approval of instructor.

SOMS 489 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Selected topics in an identified area of leadership theory and practice. May be repeated for credit.
Prerequisites: Junior or senior classification; approval of instructor.

SPAN - Spanish

Courses

SPAN 101 Beginning Spanish I
Credits 4. 3 Lecture Hours. 2 Lab Hours.
(SPAN 1411, 1511) Beginning Spanish I. Elementary language study with oral, written and reading practice. Preparation for conversation. Part of class preparation will be done in language laboratory and online. Students with prior instruction are required to take the Spanish Placement Test before enrolling for the first time in a college Spanish course.

SPAN 102 Beginning Spanish II
Credits 4. 3 Lecture Hours. 2 Lab Hours.
(SPAN 1412, 1512) Beginning Spanish II. Continuation of SPAN 101. Part of class preparation will be done in language laboratory and online. Students with prior instruction are required to take the Spanish Placement Test before enrolling for the first time in a college Spanish course.

SPAN 140 Alternate Beginning Spanish
Credits 4. 4 Lecture Hours. 1 Lab Hour.
Accelerated review of grammatical structures covered in SPAN 101, followed by study of material covered in SPAN 102. Students with prior instruction in Spanish are required to take the Spanish Placement Test before enrolling for the first time in a college Spanish course.

SPAN 201 Intermediate Spanish I
Credits 3. 3 Lecture Hours.
Prerequisite: Placement by examination or transfer credit for SPAN 101 with a grade of C or better.

SPAN 202 Intermediate Spanish II
Credits 3. 3 Lecture Hours.
(SPAN 2312) Intermediate Spanish II. Continuation of SPAN 201 with more advanced material.
Prerequisite: SPAN 201 with a grade of C or better. Students with prior instruction in Spanish are required to take the Spanish Placement Test before enrolling for the first time in a college Spanish course.

SPAN 203 Intermediate Spanish for Heritage Speakers
Credits 3. 3 Lecture Hours.
Study of grammar and continued development of the four skills (writing, reading, speaking, listening) with an emphasis on literacy in a dynamic cultural context centered on Hispanics in the U.S. Conducted in Spanish.
Prerequisites: SPAN 201 with a grade of C or better; students with prior knowledge of Spanish are required to take the Spanish Placement Test before enrolling for the first time in a college Spanish course.
SPAN 221 Field Studies Abroad I
Credits 1 to 6. 1 to 6 Lecture Hours.
Spanish language and culture taught in Spanish in a Spanish-speaking country; participation in academic and cultural activities of a host university or study abroad institute/center; written and oral reports and exams in Spanish.
Prerequisite: SPAN 102 with a grade of B or higher.

SPAN 222 Field Studies Abroad II
Credits 1 to 6. 1 to 6 Lecture Hours.
Spanish language, culture, cultural history, or literature taught in Spanish in a Spanish-speaking country; participation in academic and cultural activities of a host university or study abroad institute/center; written and oral reports and exams in Spanish.
Prerequisite: SPAN 102 with a grade of B or higher.

SPAN 285 Directed Studies
Credits 0 to 4. 0 to 4 Other Hours.
Individual supervision of readings or assigned projects in Spanish, selected for each student individually.
Prerequisite: Approval of instructor and department head.

SPAN 289 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Selected topics in an identified area of Spanish. May be repeated for credit.
Prerequisite: Approval of instructor.

SPAN 302 Advanced Grammar
Credits 3. 3 Lecture Hours.
Study and practice of Spanish grammar, focusing on grammatical features of particular concern to English speakers. Conducted in Spanish.
Prerequisites: SPAN 202, SPAN 203, SPAN 222 or equivalent.

SPAN 303 Composition and Conversation
Credits 3. 3 Lecture Hours.
Development of writing skills in Spanish with emphasis on grammatical constructions; structural analysis of representative texts and their imitation; organization of short compositions and term papers; discussion and conversation over multiple topics; conducted in Spanish.
Prerequisites: SPAN 202, SPAN 203, SPAN 222 or approval of instructor.

SPAN 304 Advanced Grammar for Heritage Speakers
Credits 3. 3 Lecture Hours.
A continuation of SPAN 203. Study of grammar and further development of the four skills (writing, reading, speaking, listening) with an emphasis on literacy in a dynamic cultural context centered on Hispanics in the U.S. Conducted in Spanish.
Prerequisites: SPAN 202, SPAN 203, SPAN 222 or approval of instructor.

SPAN 306 Business Spanish
Credits 3. 3 Lecture Hours.
Continuation of language skill acquisition with advanced material drawn from business and related fields; study of and practice with Spanish business language in the context of Hispanic economic and business systems; conducted in Spanish.
Prerequisite: SPAN 202, SPAN 203, SPAN 222 or approval of instructor.

SPAN 307 Spanish for the Sciences
Credits 3. 3 Lecture Hours.
Development of written and oral scientific communication in Spanish, including listening, speaking, reading and writing, with a focus on general and specialized scientific discourse; field-specific vocabulary and review of structures necessary for academic registers.
Prerequisites: SPAN 202, SPAN 203, or equivalent.

SPAN 310 Oral Expression
Credits 3. 3 Lecture Hours.
Development of oral skills in Spanish through pronunciation practice, discussion of current events, skits, interviews, conversations, role play, impromptu debates and public speaking; conducted in Spanish.
Prerequisite: SPAN 202 or SPAN 203.

SPAN 311 Hispanic Culture and Civilization to the 18th Century
Credits 3. 3 Lecture Hours.
Survey of the Hispanic world with emphasis on its history and cultural patterns from pre-Roman times to the 18th century; description and analysis of artistic, historical, literary, political topics. Taught in Spanish.
Prerequisite: SPAN 202, 203, 222 or approval of instructor.

SPAN 312 Hispanic Culture and Civilization: 18th Century to Present
Credits 3. 3 Lecture Hours.
Overview of the Hispanic world, including the United States, from independence in the Americas to present; description and analysis of artistic, historical, literary, political, sociolinguistic topics. Taught in Spanish.
Prerequisite: SPAN 202, SPAN 203, SPAN 222 or approval of instructor.

SPAN 320 Introduction to Hispanic Literature
Credits 3. 3 Lecture Hours.
Readings in Spanish poetry and prose with emphasis on methods of analysis for imagery, prosody, rhetorical figures, thematic composition and narrative structure; application of those techniques in oral and written reports; required for modern languages majors in Spanish; conducted in Spanish.
Prerequisite: SPAN 202 or SPAN 203 or approval of instructor.

SPAN 331 Spanish Literature to 1700
Credits 3. 3 Lecture Hours.
Origins and evolution of Spanish literature from the Medieval to the Golden Age traditions; epic, drama, novel, picaresque and satire as reflected in works by Berceo, Cervantes, Garcilaso de la Vega, Lope de Vega, Calderón de la Barca and others; conducted in Spanish.
Prerequisites: SPAN 202, SPAN 203, SPAN 222 or approval of instructor.

SPAN 332 Spanish Literature from 1700 to 1936
Credits 3. 3 Lecture Hours.
Representative works of Spanish Neoclassicism, Romanticism, realism, naturalism, modernism, and Avant-Garde movements; overview of historical background, cultural and philosophical tendencies; socio-political movements in modern Spain until the Civil War; conducted in Spanish.
Prerequisites: SPAN 202, SPAN 203, SPAN 222 or approval of instructor.

SPAN 341 Spanish-American Literature from 1492 to 1821
Credits 3. 3 Lecture Hours.
Themes, styles and authors from the meeting of Old and New Worlds through the final days of the Colony; overview of cultural and historical background; conducted in Spanish.
Prerequisites: SPAN 202, SPAN 203, SPAN 222 or approval of instructor.

SPAN 342 Spanish-American Literature from 1821 to 1935
Credits 3. 3 Lecture Hours.
Themes, styles and authors from Independence to Modernity; overview of cultural and historical background; conducted in Spanish.
Prerequisites: SPAN 202, SPAN 203, SPAN 222 or approval of instructor.
SPAN 350 Phonetics
Credits 3.3 Lecture Hours.
Sound system of Spanish with special reference to pronunciation and contrast with sounds of American English; development and description of phonology of principal dialects of American and Peninsular Spanish. Especially for native speakers of English, future teachers of Spanish and bilingual education majors; conducted in Spanish.
Prerequisite: SPAN 202, SPAN 203, SPAN 222 or equivalent.

SPAN 352 Hispanic Linguistics
Credits 3.3 Lecture Hours.
Study of Hispanic linguistics, including phonetics and phonology, morphology, syntax, change and variation.
Prerequisite: SPAN 202, SPAN 203, SPAN 222 or approval of instructor.

SPAN 403 Advanced Writing in Spanish
Credits 3.3 Lecture Hours.
Building on established skills, practice in and reflection on writing in professional, public, academic, and literary genres; evaluation of a variety of models and development of abilities in audience analysis, critical research, review and revision. Taught in Spanish.
Prerequisites: Junior or senior classification and SPAN 303, or approval of instructor.

SPAN 409 Photography in the Hispanic World
Credits 3.3 Lecture Hours.
Study of the work produced by major photographers and/or in different countries in the Hispanic world, from mid-19th century origins of photography to present; theoretical, historical and critical readings; analysis of various genres, modes, and formats. Taught in Spanish.
Prerequisites: Junior or senior classification and SPAN 203 SPAN 222 (p. 982), SPAN 203 SPAN 222, or approval of instructor.

SPAN 410 Hispanic Film
Credits 3.3 Lecture Hours.
Examination of major works and directors of contemporary Hispanic film; interpretation of culture through film; relationship of literature and film; conducted in Spanish.
Prerequisites: SPAN 202, SPAN 203, SPAN 222 or approval of instructor.

SPAN 411 Contemporary Hispanic Society and Culture
Credits 3.3 Lecture Hours.
Cultural, economic, and political aspects of present-day Hispanic societies, and the treatment of these issues in the media; conducted in Spanish.
Prerequisites: SPAN 202, SPAN 203, SPAN 222 or approval of instructor.

SPAN 412 Hispanic Writers in the U.S.
Credits 3.3 Lecture Hours.
Contemporary literature by monolingual/bilingual Hispanic authors in the United States; analysis of representative works from major Hispanic communities in the United States; conducted in Spanish.
Prerequisites: SPAN 202, SPAN 203, SPAN 222 or approval of instructor.

SPAN 413 Hispanic Culture through Art
Credits 3.3 Lecture Hours.
Examination of the works of a major artist and/or artistic movement as a vehicle for intensive analysis of elements of Hispanic culture; study of artists such as El Greco, Velazquez, Goya, Picasso, Dali, and Diego Rivera. Conducted in Spanish.
Prerequisites: SPAN 202, SPAN 203, SPAN 222 or approval of instructor.

SPAN 421 Spanish Language Poetry
Credits 3.3 Lecture Hours.
Development of Spanish lyric poetry from the Jarchas to the present; analysis of metrics, imagery, language and style in the different periods; may include poems by Berceo, Garcilaso de la Vega, Góngora, Sor Juana, Bécquer, Rosalía, Dario, Machado, Lorca, Neruda, Vallejo, Paz and others; course conducted in Spanish.
Prerequisites: SPAN 202, SPAN 203, SPAN 222 or approval of instructor.

SPAN 445 Cervantes
Credits 3.3 Lecture Hours.
Analysis of Cervantes' life, cultural milieu and works; emphasis on Don Quixote, its significance in Spanish literature and in the development of the modern novel; conducted in Spanish.
Prerequisites: SPAN 202, SPAN 203, SPAN 222 or approval of instructor.

SPAN 450 Contemporary Spanish and Spanish-American Literature
Credits 3.3 Lecture Hours.
Representative works of authors from both sides of the Atlantic; similarities and differences as regional literature give way to cosmopolitan styles, themes and movements; conducted in Spanish.
Prerequisites: SPAN 202, SPAN 203, SPAN 222 or approval of instructor.

SPAN 452 Hispanic Sociolinguistics
Credits 3.3 Lecture Hours.
Exploration of language varieties and language use in different social contexts within the Hispanic society; introduction to the theoretical foundations of sociolinguistic variation. Taught in Spanish.
Prerequisites: Junior or senior classification; SPAN 352 or approval of instructor.

SPAN 461 Topics in Hispanic Culture
Credits 3.3 Lecture Hours.
Exploration of significant topics, author, movement, genre or period in Hispanic literature. May be taken three times for credit.
Prerequisite: SPAN 202, SPAN 203, SPAN 222 or approval of instructor.

SPAN 462 Topics in Hispanic Linguistics
Credits 3.3 Lecture Hours.
Exploration of significant socio-cultural issues or the sociocultural influences derived from or exerted on expressive forms within Hispanic Society. May be taken three times for credit.
Prerequisites: SPAN 202, SPAN 203, SPAN 222 or approval of instructor.

SPAN 466 Topics in Hispanic Linguistics
Credits 3.3 Lecture Hours.
Exploration of significant topics in Hispanic linguistics from different theoretical and applied perspectives. May be taken three times for credit.
Prerequisites: SPAN 202, SPAN 203, SPAN 222 or approval of instructor.

SPAN 484 Internship
Credits 3.3 Lecture Hours.
Directed internship in a Spanish-speaking public or private organization to provide students with on-the-job training or applied research experience appropriate to career objectives. Must be taken satisfactory/unsatisfactory. May be taken two times for credit.
Prerequisites: Approval of department head; junior or senior classification.
SPED 485 Directed Studies
Credits 0 to 4. 0 to 4 Other Hours.
Individual supervision of readings or assigned projects selected for each student individually; written and oral reports.
Prerequisite: Approval of instructor and department head.

SPED 489 Special Topics in... Credits 1 to 4. 1 to 4 Lecture Hours.
Selected topics in an identified area of Spanish. May be repeated for credit.
Prerequisite: Approval of department head.

SPED 491 Research Credits 0 to 4. 0 to 4 Other Hours.
Research conducted under the direction of faculty member in hispanic studies. May be repeated 2 times for credit.
Prerequisites: Junior or senior classification and approval of instructor.

SPED - Special Education

Courses

SPED 291 Research Credits 0 to 4. 0 to 4 Other Hours.
Research conducted under the direction of faculty member in special education. May be repeated 2 times for credit.
Prerequisites: Freshman or sophomore classification and approval of instructor.

SPED 302 Instructional Design for Students with Disabilities Credits 3. 3 Lecture Hours.
Familiarizes pre-service teachers with research associated with effective teaching; designing and implementing of instruction for students including those with mild to moderate disabilities; designing and managing environments and materials.
Prerequisites: INST 210; junior classification.

SPED 302 Instructional Strategies for Students with Disabilities Credits 3. 3 Lecture Hours.
Research-based strategies and techniques in teaching students who are at-risk academically or students with disabilities in a variety of general and special education settings; addresses teaching of academics, teacher strategies for engagement and incorporating the use of technology.
Prerequisite: Admission to professional phase of program.

SPED 311 Assessment of Students with Disabilities Credits 3. 3 Lecture Hours.
Instruction in formal and informal assessment techniques used with students with disabilities, including progress monitoring; development of Individualized Educational Program plans and the IEP process.
Prerequisite: Admission to professional phase of program.

SPED 311 Effective Mathematics Strategies for Students with Disabilities Credits 3. 3 Lecture Hours.
Information and competencies through instruction in effective mathematics instruction for students P-12 with academic learning problems and/or disabilities; effective instruction design and teaching techniques, implementation of research-based methods relevant for active authentic learning; considers state and national standards related to teaching and learning mathematics.
Prerequisites: Admission to professional phase of program.

SPED 414 Methods and Issues in Low-Incidence Disabilities Credits 3. 3 Lecture Hours.
Overview of learning and behavioral characteristics of individuals with low-incidence disabilities such as intellectual disability, autism, physical disabilities, traumatic brain injury, sensory impairments, and multiple disabilities; research-based practices in assessment and education and designing educational environments that facilitate active participation, self-advocacy and independence.
Prerequisites: Admission to professional phase of program.

SPED 442 Teaching Students with Emotional Disturbances and Behavior Disorders Credits 3. 3 Lecture Hours.
Research-based techniques and materials used in the instruction of students who have emotional and behavioral disorders across a variety of classroom and other educational environments; includes identification and assessment issues, placements, family involvement, and historical and legal issues.
Prerequisites: Admission to professional phase of program.

SPED 471 Classroom Management and Behavioral Interventions Credits 3. 3 Lecture Hours.
Effective management of classrooms; includes research-based models of classroom discipline, proactive strategies that prevent misbehavior, interventions that decrease problem behaviors, and management systems appropriate for students with disabilities.
Prerequisites: Admission to professional phase of program.

SPED 491 Research Credits 0 to 4. 0 to 4 Lecture Hours.
Research conducted under the direction of faculty member in special education. May be repeated 2 times for credit.
Prerequisites: Junior or senior classification and approval of instructor.

SPED 601 Assessment in School Settings Credits 3. 3 Lecture Hours.
Formal and informal assessment; state assessment and alternatives; techniques used with students with disabilities; using data to make educational decisions.
Prerequisite: Graduate classification; approval of department head; approval of instructor.

SPED 602 Ethics and Professional Conduct in Special Education and Applied Behavior Analysis Credits 3. 3 Lecture Hours.
Focus on ethical and professional conduct required for special educators and behavior analysts; information required for certified behavior analysts; ethics required by the Behavior Analyst Certification Board; highly relevant for those working with children or adults with disabilities in any capacity.
Prerequisite(s): approval of department head; graduate classification.
SPED 603 Foundations of Special Education  
Credits 3.3 Lecture Hours.  
Build a knowledge base to understand the historical and conceptual foundations of special education; familiarization with special education literature; overview of current issues and trends impacting special education.  
Prerequisites: Graduate classification or approval of instructor; approval of department head.

SPED 609 Educating Individuals with Autism Spectrum Disorders  
Credits 3.3 Lecture Hours.  
Study of the incidence, prevalence, and characteristics of individuals with autism spectrum disorders, particularly for teachers, counselors, and related fields; research and best practices in assessment, treatment, and education; includes treatment of social, communication, academic, and behavior deficits with emphasis on behavior analysis.  
Prerequisite: Graduate classification.

SPED 610 Special Education and the Family  
Credits 3.3 Lecture Hours.  
Overview of issues in special education interpreted within the context of the family; relationships among the school, the families, and the community; impact of relationships on service provisions; field experiences working with families with special needs.  
Prerequisite: Approval of department head.

SPED 611 Multicultural Special Education  
Credits 3.3 Lecture Hours.  
Multicultural perspectives in special education; foundations of multicultural special education; cultural responsive teaching; methods for teaching culturally and linguistically diverse learners in special education.  
Prerequisite: Graduate classification.

SPED 612 Special Education Law and Policy  
Credits 3.7 Lab Hours.  
Legal development of the discipline of special education; current requirements for providing free and appropriate education to students with disabilities; assessment and performance of research with legal information.  
Prerequisites: Graduate classification and approval of department head.

SPED 614 Issues in Moderate and Severe Disabilities  
Credits 3.3 Lecture Hours.  
Psychological, social, physical and cognitive aspects of moderate to severe disabilities; service delivery systems; biomedical issues community programming; transition programming; adult service program; programs for the elderly; all in relation to individuals with moderate to severe disabilities.  
Prerequisites: Graduate classification and approval of department head.

SPED 615 Special Education Assessment: Technical and Legal Aspects  
Credits 3.3 Lecture Hours.  
Teaches skills to critically examine assessment tools and procedures in special education; technical and legal issues in pre-referral evaluation, eligibility assessment, IEP writing and program evaluation; emphasizes test validity and test sensitivity to growth; mastery of knowledge base and realistic scenarios.  
Prerequisites: Graduate classification or approval of instructor; approval of department head.

SPED 617 Adolescent Literacy for Students with Diverse Instructional Needs  
Credits 3.3 Lecture Hours.  
Research-based strategies to teach reading and writing to 4th through 12th grade students with disabilities and other diverse instructional needs; emphasis on current issues, assessment, motivation, intervention, and content area issues and strategies.  
Prerequisite: Graduate classification.

SPED 618 Induction and Preparation for the Special Education Professoriate  
Credits 3.3 Lecture Hours.  
Orientation to full-time doctoral studies; understanding historical and contemporary issues in the field of special education; familiarization with special education literature and systematic reviews of research literature.  
Prerequisite: Admission into special education doctoral program.

SPED 619 Critical Research and Practice Issues in Special Education  
Credits 3.3 Lecture Hours.  
Examination of the historical, conceptual/theoretical and empirical basis of special education research and practice; understanding special education as a field and specific areas for in-depth knowledge.  
Prerequisite: Approval of department head.

SPED 620 Bilingual Special Education  
Credits 3.3 Lecture Hours.  
Topics concerning bilingual special education will be covered including history of the field; language acquisition and assessment; general assessment, individual education plans (IEPs); curriculum development; mainstreaming; consultation services; and parental involvement.  
Prerequisite: Approval of department head.

SPED 621 Overview of Exceptional Students  
Credits 3.3 Lecture Hours.  
Overview of historical foundations for special education practice; definitions of disabilities, relevant educational characteristics of students with disabilities; assessment procedures associated with the identification of students’ disabilities; intervention procedures related to education of students with disabilities.  
Prerequisites: Graduate classification and approval of department head.

SPED 623 Self-Determination and Advocacy  
Credits 3.3 Lecture Hours.  
Conceptualization and theoretical framework of self-determination for students with disabilities; the role of self-determination in improving student outcomes; and best practices in promoting self-determination among students with disabilities.  
Prerequisites: Graduate classification.

SPED 624 Professional Development in Research  
Credits 3.3 Lecture Hours.  
Development and refinement of skills needed to be productive scholars with particular focus on disseminating research through manuscript preparation and conference presentations.  
Prerequisites: SPED 618; SPED 619; Graduate classification; approval of department head.

SPED 628 Consultation in Special Education  
Credits 3.3 Lecture Hours.  
Rationale, strategies, procedures and resources for providing consultation as systematic problem-solving to school procedures, and resources for improving services for children with disabilities, and those who are at-risk of school failure.  
Prerequisites: Graduate classification and approval of department head.
SPED 630 Early Literacy for Students with Diverse Instructional Needs
Credits 3.3 Lecture Hours.
Research-based strategies to teach beginning reading and writing to pre-K through 4th grade students with disabilities and other diverse instructional needs; emphasis on current issues, assessment, prevention, and intervention.
Prerequisite: Graduate classification.

SPED 632 Transition from School to Work
Credits 3.3 Lecture Hours.
Current issues and practices related to the transition of students from school to work; partnerships with business and industry; secondary and postsecondary education linkages; work-based training.
Prerequisite: Approval of department head.

SPED 641 Low-Incidence Instruction for Individuals with Significant Support Needs
Credits 3.3 Lecture Hours.
Examination of how particular types of low-incidence disabilities; including mental retardation, autism, physical disabilities, traumatic brain injury, deafness, blindness, multiple disabilities, and other health impairments, affect academic and job performance. Current methods for teaching individuals with low-incidence disabilities, including an overview of Adaptive/Assistive Technology (AT) solutions.
Prerequisites: Graduate classification and approval of department head.

SPED 642 Program Development for Students with Behavior Problems
Credits 3.3 Lecture Hours.
Field-based course relating to effective management of challenging and severe behavior problems in the classroom using proactive strategies; effective instruction and planned behavioral interventions; methods for observing, assessing and analyzing challenging and severe behaviors; includes a 20-hour field based component.
Prerequisites: Graduate classification and approval of department head.

SPED 683 Field Practicum
Credits 1 to 15.1 to 15 Other Hours.
Faculty supervised experience in professional practice settings in Special Education. May be repeated for credit.
Prerequisite: Approval of instructor and department head.

SPED 684 Professional Internship.
Credits 1 to 6.1 to 6 Other Hours.
Supervised experience in professional functions appropriate to career goals in special education.
Prerequisite: Approval of instructor and department head.

SPED 685 Directed Studies
Credits 1 to 6.1 to 6 Other Hours.
Directed individual study of selected problems in special education.
Prerequisite: Approval of instructor and department head.

SPED 689 Special Topics in...
Credits 1 to 4.1 to 4 Lecture Hours.
Selected topics in an identified area of special education. May be repeated for credit.
Prerequisite: Approval of department head.

SPED 699 Advanced Applied Behavior Analysis
Credits 3.3 Lecture Hours.
Rigorous repertoire of knowledge and skill in behavior analysis; comprehensive and contemporary description of applied behavior analysis; application of principles and paradigms of theoretical and experimental aspects of behavior.
Prerequisites: SEFB 618 and graduate classification.

SPMT - Sport Management

Courses

SPMT 217 Foundations of Sport Management
Credits 3.3 Lecture Hours.
History, principles, and objectives of the sport management profession; an overview of the structure of the sport industry; introduction to the scope and variety of career opportunities in sport.

SPMT 220 Olympic Studies
Credits 3.3 Lecture Hours.
History of the Olympic Games and their development over time; analyze, compare and contrast the relationship between the Olympics, cultures and societies; examination of central problems, accomplishments and collaborations revolving around the Olympics from a variety of viewpoints.

SPMT 225 Practical Skills for Sport Professionals
Credits 3.3 Lecture Hours.
Introduction to the writing, communication and technical skills required to succeed in the sport industry; segmented into units based on different professions within the sport industry such as journalism, marketing, technology, public relations, organizational communication and law.

SPMT 285 Directed Studies
Credits 0 to 4.0 to 4 Other Hours.
Work on a specified topic with the intent of promoting independent reading, research and study; supplement existing course offerings or subjects not presently covered. May be repeated for credit.
Prerequisites: Freshman or sophomore classification; approval of instructor.

SPMT 289 Special Topics in...
Credits 0 to 4.0 to 4 Lecture Hours.
Special Topics in... Selected topics in an identified area of sport management. May be repeated for credit.

SPMT 291 Research
Credits 0 to 4.0 to 4 Other Hours.
Research conducted under the direction of a faculty member in sport management. May be repeated 4 times for credit.
Prerequisites: Freshman or sophomore classification; approval of instructor.

SPMT 304 Sport Psychology Management and Practice
Credits 3.3 Lecture Hours.
The relationship of psychology to sport and exercise; topics include history, application of learning principles, social psychology, personality variables, psychological assessment, youth sport, and diversity issues in sport and exercise.
Prerequisite: Junior classification.
SPMT 319/SOCI 319 Sociology of Sport
Credits 3.3 Lecture Hours.
Social institution of sport and its consequences for American society; social organization from play to professional sport; violence, discrimination, women in sport; socialization implications from participation in sports.
Prerequisite: Junior or senior classification.
Cross Listing: SOCI 319/SPMT 319.

SPMT 333 Sport Management
Credits 3.3 Lecture Hours.
Introduction to techniques for proper management of programs in physical activities and athletics including the basic physical education instructional program, intercollegiate and interscholastic athletics, intramural and club programs, and alternative athletic programs such as health clubs, corporate fitness centers and YMCA/YWCAs.
Prerequisites: Junior or senior classification; admission to professional phase of program.

SPMT 334 Sport Communication
Credits 3.3 Lecture Hours.
(3-0) Communications from the interorganizational level to mass media specific within the unique setting of sport industry.
Prerequisites: Junior or senior classification; sport management majors only or approval of instructor.

SPMT 336 Diversity in Sport Organizations
Credits 3.3 Lecture Hours.
Examine an encompassing perspective of diversity within North American and international sport organizations.
Prerequisite: Junior or senior classification.

SPMT 337 International Sport Business
Credits 3.3 Lecture Hours.
The magnitude of global expansion and development of sport familiarity with major firms and organizations on the global scene, major issues in global sports; emphasis on business opportunities available internationally; underlying thesis focuses on the contrasts from the U.S. sport industry to foreign markets.
Prerequisite: Junior or senior classification.

SPMT 340 Sport Governance
Credits 3.3 Lecture Hours.
Governance and policy development in sport management; managerial activities related to governance, strategic management, ethics in sport, governance and policy development in specific sport contexts.
Prerequisite: Junior or senior classification.

SPMT 402 Pre-Internship Field Experiences
Credit 1.2 Lab Hours.
Orientation, observations and experiences in preparation for professional internships.
Prerequisites: Senior classification; approved acceptance to field experience.

SPMT 420 Sports Facility Planning
Credits 3.3 Lecture Hours.
Examination of the principles involved in planning and managing sports and recreational facilities.
Prerequisites: Junior or senior classification; admission to professional phase of program or approval of instructor for non-sport management majors.

SPMT 421 Legal Aspects of Sport
Credits 3.3 Lecture Hours.
Explores the relationship between sport and law, and the fundamentals of law used by sport managers, including contract law, tort law, Constitutional issues, employment and discrimination law, the effect of state and federal statutes on recreational activities and sport, and current legal issues in sports.
Prerequisites: Junior or senior classification; admission to professional phase of program or approval of instructor for non-sport management majors.

SPMT 422 Financing Sport Operations
Credits 3.3 Lecture Hours.
Study of financial theories and practical application as they impact sport revenues and expenditures; familiarization with current issues and trends in financing sport organizations.
Prerequisites: Junior or senior classification; admission to professional phase of program.

SPMT 423 Marketing Aspects of Sport
Credits 3.3 Lecture Hours.
Investigation of the rapidly developing sports industry from a marketing perspective; familiarization of marketing terms and tools needed in the sports industry; introduction to the various aspects of marketing that make up the marketing plan.
Prerequisites: Junior or senior classification; admission to professional phase of program.

SPMT 450 Professional Practice in Sport Management
Credits 3.3 Lecture Hours.
Information, perspectives and skills to promote the management of sports in the community, school, workplace and sport business settings; boundary-crossing partnerships across sport disciplines; the role of collaborative efforts to improve the needs of the sport community.
Prerequisite: Admission to professional phase of program; senior classification.

SPMT 482 Seminar
Credit 1.1 Lecture Hour.
Acquaint students with current research and the research process in their chosen field of study (sport management). May be taken 4 times for credit.
Prerequisites: Admission to professional phase of program or approval of instructor; junior or senior classification.

SPMT 483 Practicum in Sport Management
Credits 3.3 Lecture Hours.
Participation and study in sport management and administration; acquisition and practice of professional and/or clinical skills in sport management. Must be taken on a satisfactory/unsatisfactory basis.
Prerequisites: Admission to professional phase of program; approval of instructor; junior or senior classification.

SPMT 484 Internship in Sport Management
Credits 0 to 12.0 to 12 Other Hours.
Supervised internship with sport management organizations; acquisition and practice of professional and/or clinical skills in sport management.
Prerequisites: SPMT 402; completion of all coursework.

SPMT 485 Directed Studies
Credits 0 to 4.0 to 4 Other Hours.
Special problems in sport management assigned to individual students or to groups. May be repeated for credit. Must be taken on a satisfactory/unsatisfactory basis.
Prerequisites: Junior or senior classification; approval of instructor.
SPMT 489 Special Topics in...
Credits 0 to 4. 0 to 4 Lecture Hours.
Special Topics in... Selected topics in an identified area of sport management. May be repeated for credit.

SPMT 491 Research
Credits 0 to 4. 0 to 4 Other Hours.
Research conducted under the direction of a faculty member in sport management. May be repeated 4 times for credit. 
Prerequisites: Junior or senior classification; approval of instructor.

SPMT 601 Research Methods for Sport Organizations
Credits 3. 3 Lecture Hours.
Methodology and application of social science research in sport organizations; including the research process, research designs, sampling procedures, measurement, survey research, hypothesis testing, application and interpretation of appropriate statistics, and the research presentation.

SPMT 610 Administration of Sport Organizations
Credits 3. 3 Lecture Hours.
Issues related to the administration of sport and fitness organizations; includes interschool athletics and corporate organizations.

SPMT 611 Revenue Generation in Sport
Credits 3. 3 Lecture Hours.
Examine the basic financial, accounting, and revenue generation principles central to the management of sport organizations.
Prerequisites: Graduate classification.

SPMT 612 Personnel Management in Sport
Credits 3. 3 Lecture Hours.
Examine the service orientation of sport organizations, individual differences in employees and clients, personnel management practices, and expected outcomes of effective personnel management.
Prerequisite: Graduate classification.

SPMT 613 Diversity in Sport Organizations
Credits 3. 3 Lecture Hours.
Examines an encompassing perspective of diversity within North American and international sport organizations; analysis and understanding of the various ways that people within sport organizations can differ; treats issues of the non-dominant, historically under-represented elements of U.S. society with an emphasis placed on racial and gender issues.
Prerequisite: Graduate classification.

SPMT 615 Sport Marketing
Credits 3. 3 Lecture Hours.
Explores and examines the elements of planning, organizing and prompting sporting events.
Prerequisite: Graduate classification.

SPMT 623 Athletics Administration
Credits 3. 3 Lecture Hours.
Principles and processes of managing intercollegiate athletic organizations and properties.
Prerequisite: Graduate classification.

SPMT 655 Sport Law
Credits 3. 3 Lecture Hours.
Legal principles affecting sponsors and users of sports programs; liability concepts in tort, contract, civil rights and property law in program planning, development, marketing and management.
Prerequisite: Graduate classification or approval of instructor.

SPMT 661 Seminar
Credit 1. 1 Lecture Hour.
Reports and discussions of research and the research process in sport management. May be taken 4 times for credit.
Prerequisite: Graduate classification.

SPMT 682 Seminar in...
Credit 1. 1 Lecture Hour.
Discussions of current topics and issues impacting sport management and administration. May be taken 8 times for credit.
Prerequisite: Graduate classification.

SPMT 683 Practicum in Sport Management
Credits 3. 3 Lecture Hours.
Participation and study in sport management and administration; acquisition and practice of professional and/or clinical skills in sport management.
Prerequisites: Graduate classification and approval of instructor.

SPMT 684 Internship in Sport Management
Credits 1 to 6. 1 to 6 Lecture Hours.
Supervised internship with sport management organization; application of formal training to performing professional functions consistent with career goals.
Prerequisites: Graduate classification; approval of instructor.

SPMT 685 Directed Studies
Credits 1 to 12. 1 to 12 Lecture Hours.
Directed study of special problems in sport management not related to thesis. May be repeated for credit.
Prerequisites: Graduate classification; approval of instructor; approval of department head.

SPMT 689 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Special Topics in ... Selected topics in an identified area of sport management. May be repeated for credit.
Prerequisite: Graduate classification.

SPMT 690 Theory of Research in Sport Management
Credits 3. 3 Lecture Hours.
Theory and design of research problems and experiments in various fields of sport management. May be taken 2 times for credit.
Prerequisite: Graduate classification.

SPMT 691 Research
Credits 1 to 18. 1 to 18 Other Hours.
Research for thesis or dissertation.
Prerequisites: Graduate classification and approval of committee chair.

SPSC - Spatial Sciences

Courses

SPSC 102 Introduction to Spatial Sciences
Credit 1. 1 Lecture Hour.
Provides an understanding of spatial sciences; how it is applied for problem solving in a wide variety of fields; and survey of the field and what opportunities are available to professionals in spatial sciences.
SPSC 461/AGSM 461 Geographic Information Systems for Resource Management
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Geographic Information System (GIS) approach to the integration of spatial and attribute data to study the capture, analysis, manipulation and portrayal of natural resource data; examination of data types/formats, as well as the integration of GIS with remote sensing and Global Positioning System; laboratory includes extensive use of GIS applications to conduct analyses of topics in natural resources.
Prerequisite: Approval of instructor.
Cross Listing: AGSM 461/SPSC 461.

STAT - Statistics

Courses

STAT 201 Elementary Statistical Inference
Credits 3. 3 Lecture Hours.
(MATH 1342, 1442) Elementary Statistical Inference. Data collection, tabulation and presentation; elementary description of the tools of statistical inference; probability, sampling and hypothesis testing; applications of statistical techniques to practical problems. May not be taken for credit after or concurrently with any other course in statistics or SCMT 303.

STAT 211 Principles of Statistics I
Credits 3. 3 Lecture Hours.
Introduction to probability and probability distributions; sampling and descriptive measures; inference and hypothesis testing; linear regression, analysis of variance.
Prerequisite: MATH 152 or MATH 172.

STAT 212 Principles of Statistics II
Credits 3. 3 Lecture Hours.
Design of experiments, model building, multiple regression, nonparametric techniques and contingency tables.
Prerequisite: STAT 211.

STAT 301 Introduction to Biometry
Credits 3. 3 Lecture Hours.
Intended for students in animal sciences. Introduces fundamental concepts of biometry including measures of location and variation, probability, tests of significance, regression, correlation and analysis of variance which are used in advanced courses and are being widely applied to animal-oriented industry.
Prerequisite: MATH 141 or MATH 166 or equivalent.

STAT 302 Statistical Methods
Credits 3. 3 Lecture Hours.
Intended for undergraduates in the biological sciences. Introduction to concepts of random sampling and statistical inference; estimation and testing hypotheses of means and variances; analysis of variance; regression analysis; chi-square tests.
Prerequisite: MATH 141 or MATH 166 or equivalent.

STAT 303 Statistical Methods
Credits 3. 3 Lecture Hours.
Intended for undergraduates in the social sciences. Introduction to concepts of random sampling and statistical inference, estimation and testing hypotheses of means and variances, analysis of variance, regression analysis, chi-square tests.
Prerequisite: MATH 141 or MATH 166 or equivalent.

STAT 307 Sample Survey Techniques
Credits 3. 3 Lecture Hours.
Concepts of population and sample; the organization of a sample survey; questionnaire design. Basic survey designs and computation of estimates and variances.
Prerequisite: STAT 301 or STAT 302 or STAT 303 or SCMT 303.

STAT 407 Principles of Sample Surveys
Credits 3. 3 Lecture Hours.
Principles of sample surveys and survey design; techniques for variance reduction; simple, stratified and multi-stage sampling; ratio and regression estimates; post-stratification; equal and unequal probability sampling.
Prerequisite: STAT 212.

STAT 408 Introduction to Linear Models
Credits 3. 3 Lecture Hours.
Introduction to the formulation of linear models and the estimation of the parameters of such models, with primary emphasis on least squares. Application to multiple regression and curve fitting.
Prerequisites: STAT 212; MATH 304.

STAT 414 Mathematical Statistics I
Credits 3. 3 Lecture Hours.
Introduction to the mathematical theory of statistics, including random variables and their distributions, expectation and variance, point estimation, confidence intervals and hypothesis testing.
Prerequisite: STAT 212; MATH 221, MATH 251 or MATH 253.

STAT 415 Mathematical Statistics II
Credits 3. 3 Lecture Hours.
Continuation of the mathematical theory of statistics, including sampling and limiting distributions, principles for statistical inference and inference for bivariate and categorical data.
Prerequisite: STAT 414.

STAT 485 Directed Studies
Credits 1 to 6. 1 to 6 Other Hours.
Special problems in statistics not covered by another course in the curriculum. Work may be in either theory or methodology.
Prerequisite: Approval of instructor.

STAT 489 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Special Topics in... Selected topics in an identified area of statistics. May be repeated for credit.
Prerequisite: Junior or senior classification or approval of department head.

STAT 491 Research
Credits 1 to 4. 1 to 4 Lecture Hours. 0 to 4 Lab Hours.
Research conducted under the direction of faculty members in statistics. May be taken four times for credit. Registration in multiple sections of this course is possible within a given semester provided that the per semester credit hour limit is not exceeded.
Prerequisite: Junior or senior classification or approval of instructor.

STAT 601 Statistical Analysis
Credits 4. 3 Lecture Hours. 2 Lab Hours.
For students in engineering, physical and mathematical sciences. Introduction to probability, probability distributions and statistical inference; hypotheses testing; introduction to methods of analysis such as tests of independence, regression, analysis of variance with some consideration of planned experimentation.
Prerequisite: MATH 152 or MATH 172.
STAT 604 Topics in Statistical Computations
Credits 3.3 Lecture Hours.
Efficient uses of existing statistical computer programs (SAS, R, etc.); generation of random numbers; using and creating functions and subroutines; statistical graphics; programming of simulation studies; and data management issues.
Prerequisite: MATH 221, MATH 251, or MATH 253.

STAT 605 Advanced Statistical Computations
Credits 3.3 Lecture Hours.
Programming languages, statistical software and computing environments; development of programming skills using modern methodologies; data extraction and code management; interfacing lower-level languages with data analysis software; simulation; MC integration; MC-MC procedures; permutation tests; bootstrapping.
Prerequisite: STAT 612 and STAT 648.

STAT 607 Sampling
Credits 3.3 Lecture Hours.
Planning, execution and analysis of sampling from finite populations; simple, stratified, multistage and systematic sampling; ratio estimates.
Prerequisite: STAT 601 or STAT 652 or concurrent enrollment in STAT 641.

STAT 608 Regression Analysis
Credits 3.3 Lecture Hours.
Multiple, curvilinear, nonlinear, robust, logistic and principal components regression analysis; regression diagnostics, transformations, analysis of covariance.
Prerequisite: STAT 601 or STAT 641.

STAT 610 Theory of Statistics - Distribution Theory
Credits 3.3 Lecture Hours.
Brief introduction to probability theory; distributions and expectations of random variables, transformations of random variables and order statistics; generating functions and basic limit concepts.
Prerequisite: MATH 409 or concurrent enrollment in MATH 409.

STAT 611 Theory of Statistics - Inference
Credits 3.3 Lecture Hours.
Theory of estimation and hypothesis testing; point estimation, interval estimation, sufficient statistics, decision theory, most powerful tests, likelihood ratio tests, chi-square tests.
Prerequisite: STAT 610 or equivalent.

STAT 612 Theory of Linear Models
Credits 3.3 Lecture Hours.
Matrix algebra for statisticians; Gauss-Markov theorem; estimability; estimation subject to linear restrictions; multivariate normal distribution; distribution of quadratic forms; inferences for linear models; theory of multiple regression and AOV; random- and mixed-effects models.
Prerequisite: Course in linear algebra.

STAT 613 Statistical Methodology I
Credits 3.3 Lecture Hours.
Elements of likelihood inference; exponential family models; group transformation models; survival data; missing data; estimation and hypotheses testing; nonlinear regression models; conditional and marginal inferences; complex models-Markov chains, Markov random fields, time series, and point processes.
Prerequisite: STAT 612.

STAT 614 Probability for Statistics
Credits 3.3 Lecture Hours.
Probability and measures; expectation and integrals, Kolmogorov's extension theorem; Fubini's theorem; inequalities; uniform integrability; conditional expectation; laws of large numbers; central limit theorems
Prerequisite: STAT 610 or its equivalent.

STAT 615 Stochastic Processes
Credits 3.3 Lecture Hours.
Survey of the theory of stochastic processes; includes countable-state Markov processes, birth-death processes, Poisson point processes, renewal processes, Brownian motion and diffusion processes and covariance-stationary processes; theoretical development and applications to real world problems.
Prerequisites: STAT 610; MATH 409.

STAT 616 Statistical Aspects of Machine Learning I: Classical Multivariate Methods
Credits 3.3 Lecture Hours.
Core methods from traditional multivariate analysis and various extensions; probability distributions of random vectors and matrices, multivariate normal distributions, model assessment and selection in multiple regression, multivariate regression, dimension reduction, linear discriminant analysis, logistic discriminant analysis, cluster analysis, multidimensional scaling and distance geometry, and correspondence analysis.
Prerequisites: STAT 612, STAT 613.

STAT 618 Statistical Aspects of Machine Learning II: Modern Techniques
Credits 3.3 Lecture Hours.
Second course in statistical machine learning; recursive partition and tree-based methods, artificial neural networks, support vector machines, reproducing kernels, committee machines, latent variable methods, component analysis, nonlinear dimensionality reduction and manifold learning, matrix factorization and matrix completion, statistical analysis of tensors and multi-indexed data.
Prerequisites: STAT 612, STAT 613, and STAT 616.

STAT 620 Asymptotic Statistics
Credits 3.3 Lecture Hours.
Review of basic concepts and important convergence theorems; elements of decision theory; delta method; Bahadur representation theorem; asymptotic distribution of MLE and the LRT statistics; asymptotic efficiency; limit theory for U-statistics and differential statistical functionals with illustrations from M.-L.-R-estimation; multiple testing.
Prerequisite: STAT 614.

STAT 621 Advanced Stochastic Processes
Credits 3.3 Lecture Hours.
Conditional expectation; stopping times; discrete Markov processes; birth-death processes; queueing models; discrete semi-Markov processes; Brownian motion; diffusion processes, Ito integrals, theorem and limit distributions; differential statistical functions and their limit distributions; M.-L.-R-estimation.
Prerequisite: STAT 614 or STAT 615.

STAT 623 Statistical Methods for Chemistry
Credits 3.3 Lecture Hours.
Chemometrics topics of process optimization, precision and accuracy; curve fitting; chi-squared tests; multivariate calibration; errors in calibration standards; statistics of instrumentation.
Prerequisite: STAT 601, STAT 641 or STAT 652 or approval of instructor.
STAT 626 Methods in Time Series Analysis
Credits 3.3 Lecture Hours.
Introduction to statistical time series analysis; autocorrelation and spectral characteristics of univariate, autoregressive, moving average models; identification, estimation and forecasting.
Prerequisite: STAT 601 or STAT 642 or approval of instructor.

STAT 627 Nonparametric Function Estimation
Credits 3.3 Lecture Hours.
Nonparametric function estimation; kernel, local polynomials, Fourier series and spline methods; automated smoothing methods including cross-validation; large sample distributional properties of estimators; recent advances in function estimation.
Prerequisite: STAT 611.

STAT 630 Overview of Mathematical Statistics
Credits 3.3 Lecture Hours.
Basic probability theory including distributions of random variables and expectations. Introduction to the theory of statistical inference from the likelihood point of view including maximum likelihood estimation, confidence intervals, and likelihood ratio tests. Introduction to Bayesian methods.
Prerequisites: MATH 221, MATH 251, and MATH 253.

STAT 631 Statistical Methods in Finance
Credits 3.3 Lecture Hours.
Regression and the capital asset pricing model, statistics for portfolio analysis, resampling, time series models, volatility models, option pricing and Monte Carlo methods, copulas, extreme value theory, value at risk, spline smoothing of term structure.
Prerequisites: STAT 610, STAT 611, STAT 608.

STAT 632 Statistical Methodology II-Bayesian Modeling and Inference
Credits 3.3 Lecture Hours.
Decision theory; fundamentals of Bayesian inference; single and multi-parameter models; Gaussian model; linear and generalized linear models; Bayesian computations; asymptotic methods; non-iterative MC; MCMC; hierarchical models; nonlinear models; random effect models; survival analysis; spatial models.
Prerequisite: STAT 613.

STAT 633 Advanced Bayesian Modeling and Computation
Credits 3.3 Lecture Hours.
Bayesian methods in their research; methodology; and applications of Bayesian methods in bioinformatics, biostatistics, signal processing, machine learning, and related fields.
Prerequisite: STAT 608, STAT 613, STAT 632.

STAT 636 Applied Multivariate Analysis
Credits 3.3 Lecture Hours.
Multivariate extension of the chi-square and t-tests, discrimination and classification procedures; applications to diagnostic problems in biological, medical, anthropological and social research; multivariate analysis of variance, principal component and factor analysis, canonical correlations.
Prerequisites: MATH 304, STAT 608.

STAT 638 Introduction to Applied Bayesian Methods
Credits 3.3 Lecture Hours.
Uncertainty regarding parameters and how they can be explicitly described as a posterior distribution which blends information from a sampling model and prior distribution; emphasis on modeling and computations under the Bayesian paradigm; includes prior distributions, Bayes Theorem, conjugate and non-conjugate models, posterior simulation via the Gibbs sampler and MCMC, hierarchical modeling.
Prerequisites: STAT 604, STAT 608, STAT 630.

STAT 641 The Methods of Statistics I
Credits 3.3 Lecture Hours.
An application of the various disciplines in statistics to data analysis, introduction to statistical software; demonstration of interplay between probability models and statistical inference.
Prerequisite: Concurrent enrollment in STAT 610 or approval of instructor.

STAT 642 The Methods of Statistics II
Credits 3.3 Lecture Hours.
Design and analysis of experiments; scientific method; graphical displays; analysis of nonconventional designs and experiments involving categorical data.
Prerequisite: STAT 641.

STAT 643 Biostatistics I
Credits 3.3 Lecture Hours.
Bio-assay for quantiative and quantal responses: statistical analysis of contingency, including effect estimates, matched samples and misclassification.
Prerequisites: STAT 608, STAT 630, and STAT 642 or STAT 610.

STAT 644 Biostatistics II
Credits 3.3 Lecture Hours.
Generalized linear models; survival analysis with emphasis on nonparametric models and methods.
Prerequisite: STAT 643 or approval of instructor.

STAT 645 Applied Biostatistics and Data Analysis
Credits 3.3 Lecture Hours.
Survey of crucial topics in biostatistics; application of regression in biostatistics; analysis of correlated data; logistic and Poisson regression for binary or count data; survival analysis for censored outcomes; design and analysis of clinical trials; sample size calculation by simulation; bootstrap techniques for assessing statistical significance; data analysis using R.
Prerequisites: STAT 651, STAT 652, and STAT 659, or equivalent or prior approval of instructor.

STAT 646 Statistical Bioinformatics
Credits 3.3 Lecture Hours.
An overview of relevant biological concepts and technologies of genomic/proteomic applications; methods to handle, visualize, analyze, and interpret genomic/proteomic data; exploratory data analysis for genomic/proteomic data; data preprocessing and normalization; hypotheses testing; classification and prediction techniques for using genomic/proteomic data to predict disease status.
Prerequisites: STAT 604, STAT 651, STAT 652 or prior approval of instructor.

STAT 647 Spatial Statistics
Credits 3.3 Lecture Hours.
Spatial correlation and its effects; spatial prediction (kriging); spatial regression; analysis of point patterns (tests for randomness and modelling patterns); subsampling methods for spatial data.
Prerequisite: STAT 601 or STAT 611 or equivalent.

STAT 648 Applied Statistics and Data Analysis
Credits 3.3 Lecture Hours.
Background to conduct research in the development of new methodology in applied statistics. Topics covered will include: exploratory data analysis; sampling; testing; smoothing; classification; time series; and spatial data analysis.
Prerequisite: Approval of instructor.
STAT 651 Statistics in Research I
Credits 3.3 Lecture Hours.
For graduate students in other disciplines; non-calculus exposition of the concepts, methods and usage of statistical data analysis; T-tests, analysis of variance and linear regression.
Prerequisite: MATH 102 or equivalent.

STAT 652 Statistics in Research II
Credits 3.3 Lecture Hours.
Continuation of STAT 651. Concepts of experimental design, individual treatment comparisons, randomized blocks and factorial experiments, multiple regression, Chi-squared tests and a brief introduction to covariance, non-parametric methods and sample surveys.
Prerequisite: STAT 651.

STAT 653 Statistics in Research III
Credits 3.3 Lecture Hours.
Advanced topics in ANOVA; analysis of covariance and regression analysis including analysis of messy data; non-linear regression; logistic and weighted regression; diagnostics and model building; emphasis on concepts; computing and interpretation.
Prerequisite: STAT 652.

STAT 656 Applied Analytics Using SAS Enterprise Miner
Credits 3.3 Lecture Hours.
Introduction to data mining and will demonstrate the procedures: Optimal prediction decisions; comparing and deploying predictive models; neural networks; constructing and adjusting tree models; the construction and evaluation of multi-stage models.
Prerequisite: STAT 657, STAT 659.

STAT 657 Advanced Programming Using SAS
Credits 3.3 Lecture Hours.
Programming with SAS/IML, programming in SAS Data step, advanced use of various SAS procedures.
Prerequisites: STAT 604 and STAT 642.

STAT 658 Transportation Statistics
Credits 3.3 Lecture Hours.
Design of experiments, estimation, hypothesis testing, modeling, and data mining for transportation specialists.
Prerequisite: STAT 211 or STAT 651.

STAT 659 Applied Categorical Data Analysis
Credits 3.3 Lecture Hours.
Introduction to analysis and interpretation of categorical data using ANOVA, regression analogs; includes contingency tables, loglinear models, logistic regression; use of computer software such as SAS, GLIM, SPSSX.
Prerequisite: STAT 601, STAT 641 or STAT 652 or equivalent.

STAT 661 Statistical Genetics I
Credits 3.3 Lecture Hours.
Basic concepts in human genetics, sampling designs, gene frequency estimation, Hardy-Weinberg equilibrium, linkage disequilibrium, association and transmission disequilibrium test studies, linkage and pedigree analysis, segregation analysis, polygenic models, DNA sequence analysis.
Prerequisites: STAT 610 and STAT 611.

STAT 667 Statistics for Advanced Placement Teachers
Credits 1 to 3.1 to 3 Lecture Hours.
Review of the fundamental concepts and techniques of statistics; topics included in Advanced Placement Statistics; exploring data, planning surveys and experiments, exploring models, statistical inference.
Prerequisite: Approval of instructor.

STAT 673 Time Series Analysis I
Credits 3.3 Lecture Hours.
Introduction to diverse modes of analysis now available to solve for univariate time series; basic problems of parameter estimation, spectral analysis, forecasting and model identification.
Prerequisite: STAT 611 or equivalent.

STAT 674 Time Series Analysis II
Credits 3.3 Lecture Hours.
Continuation of STAT 673. Multiple time series, ARMA models, test of hypotheses, estimation of spectral density matrix, transfer function and forecasting.
Prerequisites: STAT 673.

STAT 681 Seminar
Credit 1.1 Lecture Hour.
Oral presentations of special topics and current research in statistics. May be repeated for credit.
Prerequisite: Graduate classification in statistics.

STAT 684 Professional Internship
Credits 1 to 3.1 to 3 Other Hours.
Practicum in statistical consulting for students in PhD program. Students will be assigned consulting problems brought to the Department of Statistics by researchers in other disciplines.
Prerequisite: STAT 642 or its equivalent.

STAT 685 Directed Studies
Credits 1 to 6.1 to 6 Other Hours.
Individual instruction in selected fields in statistics; investigation of special topics not within scope of thesis research and not covered by other formal courses.
Prerequisites: Graduate classification and approval of department head.

STAT 689 Special Topics in...
Credits 1 to 4.1 to 4 Lecture Hours.
Selected topics in an identified area of statistics. Open to non-majors. May be repeated for credit.
Prerequisite: Approval of instructor.

STAT 691 Research
Credits 1 to 23.1 to 23 Other Hours.
Research for thesis or dissertation.
Prerequisite: Graduate classification.

STLC - Student Learning Center

Courses

STLC 001 Basic Mathematical Skills
Credits 1 to 3.1 to 3 Lecture Hours.
Developmental instruction in mathematics; includes the integers and rational numbers and applications, exponents, polynomials, solution of equations, graphing, elementary geometry and reasoning skills. May not be used for credit toward a degree.

STLC 002 Basic Writing Skills
Credits 1 to 3.1 to 3 Lecture Hours.
Individualized instruction in English composition based on an analysis of the student's proofreading, revision and editing skills; a programmed sequence of study and practice designed for improvement of writing performance through mastery of basic skills at word, sentence, paragraph and multiparagraph levels. May not be used for credit toward a degree.
STLC 003 Basic Reading Skills
Credits 1 to 3. 1 to 3 Lecture Hours.
Individualized instruction in reading based on an analysis of the student's reading comprehension skills; study and practice of reading strategies designed to increase reading comprehension skills. May not be used for credit toward a degree.

STLC 101 Application of Learning Theories to College Studies
Credits 2. 2 Lecture Hours.
The study of critical theories of learning with application to academic performance; designated as the university's learning framework course, this course is designed to help students understand learning theory and develop strategies for successful completion of college level studies.

STLC 102 Career Awareness
Credits 2. 2 Lecture Hours.
Encourages planning career and life goals early in academic career for timely decision-making related to academics, acquiring marketable skills, pursuing relevant experiential education, and participating in student/professional organizations; acquaints students with realities of early career, emphasizes utilization of resources on a timely basis for competitiveness in job market.

STLC 289 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours. 1 to 4 Lab Hours.
Selected topics in academic development and improvement.
Prerequisite: Approval of coordinator.

TCMG - Technology Management

Courses

TCMG 272 Technology and End-User Support
Credits 3. 3 Lecture Hours.
Upgrading, setup, configuration, troubleshooting of computer systems; development of skills to work with end-users; technology needs assessment; escalation and defusing strategies; service learning and community engagement.
Prerequisite: Sophomore classification.

TCMG 274 Distance Networking for Training and Development
Credits 3. 3 Lecture Hours.
Development of knowledge towards application of telecommunication networking in public education and corporate training settings; technical alternatives for delivery of subject matter for educators and trainers.
Prerequisites: Sophomore classification and approval of instructor.

TCMG 285 Directed Studies
Credits 0 to 12. 0 to 12 Lecture Hours.
Directed readings or research problems in industrial technology.

TCMG 289 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours. 0 to 4 Lab Hours.
Selected topics in an identified area of industrial technology. May be repeated for credit.

TCMG 291 Research
Credits 0 to 4. 0 to 4 Lecture Hours.
Research conducted under the direction of faculty member in technology management. May be repeated 3 times for credit.
Prerequisites: Junior or sophomore classification and approval of instructor.

TCMG 303 Unix System Administration Practices
Credits 4. 3 Lecture Hours. 3 Lab Hours.
Development and system administration of the Unix operating system; technical alternatives for proactive and reactive maintenance of system health.
Prerequisites: TCMG 272 and TCMG 274 with a grade of C or better; junior or senior classification or approval of instructor.

TCMG 308 Security and Ethics in the Digital World
Credits 3. 3 Lecture Hours.
Introduction to cybersecurity; analysis of threats and risks from the environment; development of appropriate strategies to mitigate impact; ethics of extraordinary administrative access; ethics of digital forensics and implications to society.
Prerequisites: TCMG 272 and TCMG 274 with a grade of C or better; junior or senior classification or approval of instructor.

TCMG 316 Database Systems Administration and Application
Credits 4. 3 Lecture Hours. 3 Lab Hours.
Database administration and application use techniques; database structures, modeling, configuration, development, security, topologies and access; focus on system administration of Unix-based database systems.
Prerequisite: TCMG 303 with a grade of C or better.

TCMG 402 Instructional Technology and Design
Credits 3. 3 Lecture Hours.
Design principles; development of instruction; contemporary issues and trends; foundations in learning research; requirements for instruction, task and needs analysis; learning situations and instructional models; hardware and software innovations; assessing instructional outcomes; factors affecting utilization.
Prerequisites: EHRD 371 with a grade of C or better; junior or senior classification or approval of instructor.

TCMG 412 Contemporary Issues in Technology Management
Credits 3. 3 Lecture Hours.
Specific innovation or practices nascent to the professional information technology industry; discovery of practical applications and analytics of new innovation.
Prerequisites: TCMG 272 and TCMG 274 with a grade of C or better; junior or senior classification.

TCMG 476 Managing Technical Networks
Credits 4. 3 Lecture Hours. 3 Lab Hours.
Development of knowledge and skills towards the application of technical network management in public education and corporate training settings; focus on practices, techniques and tools for managers of technical networks.
Prerequisites: TCMG 272 and TCMG 274 with a grade of C or better; junior or senior classification.

TCMG 484 Professional Internship
Credits 6. 6 Other Hours.
Directed internship in an organization to provide students with a learning experience supervised by professionals in organizational settings appropriate to the student's professional objectives; must be in good standing with the University.
Prerequisites: EHRD 481 and EHRD 490 with a grade of C or better; approval of instructor.

TCMG 485 Research
Credits 0 to 12. 0 to 12 Other Hours.
Directed Studies. Directed readings or research problems in industrial technology.
Prerequisites: Junior or senior classification; approval of directed studies application.
TEED - Teacher Education

Courses

TEED 302 Teaching/Learning Processes: Psychological Perspectives on Education
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Psychological perspectives on instruction; examines learning processes, learner motivation, home and cultural influences, learning strategies; design and delivery of instruction; controversies regarding learning and instruction.
Prerequisites: Junior classification; admission to teacher education.

TEED 425 Supervised Clinical Teaching
Credits 12. 36 Other Hours.
Supervised Student Teaching. Culmination of teacher education program; integrate and apply knowledge and skills learned from program of study while observing and participating in accredited schools with university supervision. Must be taken on a satisfactory/unsatisfactory basis.
Prerequisites: Admission and retention in teacher education program; successful completion of all coursework.

TEED 602 Contemporary Perspectives on Education
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Current issues in American public education concerning sociological, curricular, political and legal perspectives.
Prerequisite: Admission to Post-Baccalaureate Teacher Certification Program.

TEED 649 Instructional Strategies in Academic Specialties in Middle and Senior HS: Principles & Applications
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Instructional Strategies in Academic Specialties in Middle and Senior High School: Principles and Applications. Relation of information processing models to theory and practice of planning, delivering and evaluating instruction in public school settings. Subject matter and generic competencies required for teacher certification in Texas.

TEED 662 Seminar
Credits 3. 2 Lecture Hours.
Reports of research, discussions and analysis of problems and issues in teaching/learning with first year of teaching in public schools. May be repeated for credit.
Prerequisites: TEED 602 and TEED 649.

TEED 684 Professional Internship
Credits 3 to 9. 3 to 27 Other Hours.
Supervised experiences in performing professional functions in classroom settings.
Prerequisite: Approval of program coordinator.

Courses

TEFB 273 Introduction to Culture, Community, Society and Schools
Credits 3. 2 Lecture Hours. 3 Other Hours.
Field-based course that introduces the culture of schooling and classrooms for analysis within the lens of language, gender, racial, socio-economic, ethnic and academic diversity; the family as a partner in education and educational equality discussed.

TEFB 322 Teaching and Schooling in Modern Society
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Development, structure, management and finance of secondary schools; historical, philosophical, ethical and moral dimensions of teaching; role of school in a democratic society; teaching as a profession.
Prerequisite: Junior or senior classification.

TEFB 323 Teaching Skills I
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Study and development of teaching skills necessary for reflective problem solving, managing classroom learning environments, motivating students to learn, and making ethical decisions; emphasis given to models and theories of human behavior, informal and formal data collection techniques, and diversity of learners. Phase III of the secondary program.
Prerequisites: Successful completion of TEFB 322; admission to teacher education.

TEFB 324 Teaching Skills II
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Study and development of teaching skills necessary for applying instructional strategies; teaching general strategies, assessing student learning, and analyzing and synthesizing multiple source data; emphasis given to adolescent development and cultures and to teacher and child cultures.
Prerequisites: Successful completion or concurrent enrollment in TEFB 322; junior or senior classification.

TEFB 371 Dynamics and Management in Multicultural/Inclusionary Learning Environments
Credits 3. 2 Lecture Hours. 4 Lab Hours.
Field-based course focusing on communication, methodology and management perspectives that lead to democratic classrooms; organizational structures that focus on transformative, inclusionary learning; interventions for students with disabilities; analysis of systemic conditions placing children from diverse backgrounds and representing diverse abilities in positions of "risk" for incomplete success in school.
Prerequisites: Junior classification; admission to teacher education; concurrent enrollment in EDCI 454.

TEFB 401 Language Arts in the Middle and Senior School
Credits 3. 2 Lecture Hours. 6 Lab Hours.
Methodology of teaching language arts-related content with specific reference to language, literature, journalism, drama and speech interactions among these areas; development of oral competence; coordination with other subjects. Phase IV, Practicum I.
Prerequisites: Completion of Phases I, II and III of the secondary program; admission to teacher education; enrollment in language arts-related teaching field.

TEFB 404 Social Studies in the Middle and Senior High School
Credits 3. 2 Lecture Hours. 6 Lab Hours.
Features of social studies instruction in grades 6-12; approaches, methods and instructional materials. Phase IV, Practicum I.
Prerequisites: Completion of Phases I, II and III of the secondary program; admission to teacher education; enrollment in history and/or social science teaching field.
TEFB 406 Science in the Middle and Secondary School
Credits 3. 2 Lecture Hours. 6 Lab Hours.
Methods course for the prospective secondary teacher in the physical and biological sciences; implementation of contemporary curricula. Phase IV, Practicum I.
Prerequisites: Completion of Phases I, II and III of the secondary program; admission to teacher education; enrollment in science-related teaching field.

TEFB 407 Mathematics in the Middle and Senior School
Credits 3. 2 Lecture Hours. 6 Lab Hours.
Design and teach selected topics from middle and secondary school mathematics. Content, materials and methodology. Phase IV, Practicum I.
Prerequisites: Completion of Phases I, II and III secondary program; admission to teacher education; enrollment in mathematics teaching field.

TEFB 410 Social Studies and the Humanities in the Elementary School
Credits 3. 2 Lecture Hours. 6 Lab Hours.
Recent trends, issues and procedures related to curriculum development and instruction in the social studies and humanities; integration of content, planning, design of appropriate teaching/learning experiences and evaluation; preparation of prototype materials.
Prerequisites: Admission to teacher education; concurrent enrollment in RDNG 467, TEFB 412 and TEFB 413.

TEFB 412 Mathematics in the Elementary School
Credits 3. 2 Lecture Hours. 6 Lab Hours.
Introduction to understanding of modern mathematics; integration of content, history and application of discovering techniques using problem solving approach; developing an understanding of four fundamental procedures--structure, measurement, sets, fractions--and communication of important mathematical concepts to elementary children.
Prerequisites: MATH 365 and MATH 366; admission to teacher education; concurrent enrollment in RDNG 467, TEFB 410 and TEFB 413.

TEFB 413 Science in the Elementary School
Credits 3. 2 Lecture Hours. 6 Lab Hours.
Designed to help elementary teachers understand basic concepts of science and scientific methods; content relates to natural phenomena involving physical, chemical and biological processes; elementary students appreciation and interest in science.
Prerequisites: TEFB 273; admission to teacher education; concurrent enrollment in RDNG 467, TEFB 410 and TEFB 412 required.

TEFB 423 Supervised Student Teaching
Credits 3. 12 Other Hours.
Observation and participation in an accredited public school classroom; techniques of teaching student's teaching fields, and appropriate instructional strategies for assigned student population in fulfillment of endorsement requirements. May be repeated for credit. Must be taken on a satisfactory/unsatisfactory basis.
Prerequisites: Admission to teacher education program and to student teaching.

TEFB 426 Supervised Clinical Teaching
Credits 6. 24 Other Hours.
Culmination of teacher education program; integrate and apply knowledge and skills learned from program of study while observing and participating in accredited schools with university supervision. Must be taken on a satisfactory/unsatisfactory basis.
Prerequisites: Admission and retention in teacher education program; successful completion of all coursework.

TEFB 429 Supervised Clinical Teaching
Credits 9. 36 Other Hours.
Culmination of teacher education program; integrate and apply knowledge and skills learned from program of study while observing and participating in accredited schools with university supervision. Must be taken on a satisfactory/unsatisfactory basis.
Prerequisites: Admission and retention in teacher education program; successful completion of all coursework.

TEFB 484 Internship
Credits 5. 40 Other Hours.
Directed internship in a public school classroom.
Prerequisites: Senior classification; TEFB 483.

TEFB 499 TEACHING METHODS CLASSES
Credits 15. 39 Lecture Hours.

THAR - Theatre Arts

Courses

THAR 101 Introduction to Western Theatre and Drama
Credits 3. 2 Lecture Hours. 3 Lab Hours.
(DRAM 1310) Introduction to Western Theatre and Drama. Survey of the styles and genres of dramatic literature, theatrical production and tasks of the actor, director and designer.

THAR 102 Script Analysis
Credits 3. 3 Lecture Hours.
Introduction in analyzing dramatic structure as represented in European and American plays; focus on the art of the playwright.

THAR 110 Acting I: Fundamentals
Credits 3. 2 Lecture Hours. 4 Lab Hours.
(DRAM 1351) Acting I: Fundamentals. A Stanislavsky-based approach to the fundamentals of acting, which may include sensory exercises, relaxation, concentration, imagination, improvisation, character analysis and scene work.

THAR 115 Voice and Articulation
Credits 3. 3 Lecture Hours.
(SPCH 1342, 2336) Voice and Articulation. Voice mechanism and use of phonetic alphabet to determine sound placement and production for speech and voice improvement. Analysis and practice of relaxation, pitch, rate, resonance, quality, and volume through class exercise and performance.

THAR 135 Theatre Technology I
Credits 3. 2 Lecture Hours. 4 Lab Hours.
(DRAM 1330) Theatre Technology I. Survey of theatre performance spaces, basic tools and set construction, basic scenic, lighting, sound and properties design and construction; participation on departmental production crews required.

THAR 155 History of Western Dress
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Evolution of dress in Western civilization; consideration of influences of politics, religion, economics, visual arts and social mores on choices of dress.

THAR 156 Dress, Culture and Society
Credits 3. 3 Lecture Hours.
Relationship of dress to humans as biological, aesthetic and social beings; dress as cultural performance.
THAR 201 Introduction to World Theatre
Credits 3. 3 Lecture Hours.
Non-Western theatre, its origins and continuing influence on society and Western theater; emphasis on the theaters of India, China, Japan, Africa, the Caribbean and Latin America.

THAR 210 Acting II: Characterization
Credits 3. 2 Lecture Hours. 4 Lab Hours.
(DRAM 1352) Acting II: Characterization. Continuation of THAR 110; intermediate course which focuses on improvisation, voice, movement, scene study, ensemble, with emphasis on character development and analysis.
Prerequisite: THAR 110. Majors and minors only or approval of instructor.

THAR 245 Basic Theatrical Design
Credits 3. 3 Lecture Hours.
Elements and principles of design for the theatre; role of the designer within the production team, theoretical and practical applications in the visual interpretation of plays; participation in departmental productions.

THAR 250 Stage Makeup
Credits 3. 2 Lecture Hours. 4 Lab Hours.
(DRAM 1341) Stage Makeup. An analytical approach to the visualization of characters focusing on research and design, application techniques and media.
Prerequisites: THAR 102, THAR 110 or approval of instructor.

THAR 255 Costume Technology I
Credits 3. 2 Lecture Hours. 4 Lab Hours.
(DRAM 1342) Costume Technology I. Survey of the costume process from concept to realization; basic hand and sewing machine techniques; basic patterning and fitting methods; and crafts techniques; participation on departmental production crews required.

THAR 280 History of the Theatre I
Credits 3. 3 Lecture Hours.
(DRAM 2361) History of the Theatre I. Survey of the history of Western theatre from primitive times to the closing of the theatres in England in 1642. For non-theatre majors and minors only.

THAR 281 History of the Theatre II
Credits 3. 3 Lecture Hours.
(DRAM 2362) History of the Theatre II. Survey of the history of Western theatre from the closing of the theatres in England in 1642 to the present; brief introduction to the theatre of the East. For non-theatre majors and minors only.

THAR 282 American Theatre
Credits 3. 3 Lecture Hours.
Surveys American theatrical production and drama from colonial times to the present; focus on various theatre artists and movements which have shaped, and been shaped by, American culture.

THAR 285 Directed Studies
Credits 0 to 4. 0 to 4 Other Hours.
Individual study of identified topics in the theatre for specific needs of theatre arts majors; formal report required.
Prerequisites: Six hours of theatre arts and approval of instructor and department head; THAR majors and minors only.

THAR 289 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Selected topics in an identified area of theatre production, technology, history or criticism. May be repeated for credit.

THAR 290 Theatre Practicum: Crew
Credit 1. 4 Other Hours.
(DRAM 1120, 1121, 1220, 1221, 1320, 1321, 2120, 2121, 2220) Theatre Practicum: Crew. Participation in the run crew for a departmental theatre production under supervision of theatre arts faculty; audition or application may be required. May be taken two times for credit.

THAR 301 Performance in World Cultures
Credits 3. 3 Lecture Hours.
Application of the tools of performance studies to explore the enactment of the arts in world cultures and the ways the people of every society express themselves in performance; examination of different genres of performance through music, theatre, verbal art and dress.
Prerequisite: Junior or senior classification or approval of instructor.
Cross Listing: MUSC 301 and PERF 301.

THAR 302 Dramaturgy
Credits 3. 3 Lecture Hours.
Exploration of literary, production and theoretical dramaturgy in a classroom setting; script analysis, theatre criticism, theories of theatre, research techniques and dramaturgy in the production process, advancing thought about the art form in all its complexity; research methods for theatre.
Prerequisites: THAR 102; majors and minors only or approval of instructor.

THAR 308 Stage Management and Arts Administration
Credits 3. 3 Lecture Hours.
Planning and managing artistic events and performances; basic concepts of management theories, creating budgets, stage and production management, and grant applications; attendance of departmental events required.
Prerequisite: Approval of instructor.

THAR 310 Acting III: Period Styles
Credits 3. 2 Lecture Hours. 4 Lab Hours.
Exploration of acting techniques associated with various periods and non-realistic styles of theatre; scene work emphasized.
Prerequisites: THAR 110 and THAR 210 or approval of instructor.

THAR 328/MUSC 328 Japanese Traditional Performing Arts
Credits 3. 3 Lecture Hours.
Study of various genres of Japanese performing arts from the 7th century to the present; understanding the genres in their historical and cultural contexts and recognizing shared aesthetic values.
Prerequisite: Junior or senior classification or approval of instructor.
Cross Listing: MUSC 328/THAR 328.

THAR 335 Theatre Technology II
Credits 3. 2 Lecture Hours. 4 Lab Hours.
Planning, design and execution of scenic, lighting, sound and properties design construction; participation in departmental crews required. May be repeated once for credit.
Prerequisites: THAR 135; participation in departmental productions.

THAR 345 Scene Design
Credits 3. 2 Lecture Hours. 4 Lab Hours.
Drafting techniques as applied to scenic design; scenic construction techniques; design projects to include perspective rendering, ground plans, elevations, working drawings and models.
Prerequisites: THAR 102, THAR 135 and THAR 245, or approval of the instructor.
THAR 355 Costume Design
Credits 3. 2 Lecture Hours. 4 Lab Hours.
Role and responsibilities of costume designer; design projects to include rendering techniques, stylistic choices and alternative analytical approaches.
Prerequisites: THAR 102, THAR 245, or approval of instructor.

THAR 360 Lighting Design
Credits 3. 2 Lecture Hours. 4 Lab Hours.
Basic electricity; theatre lighting instrumentation and maintenance; color theory and color media; stage lighting theory and technique; preparation of light plot, instrumentation schedule and cue sheets; operation of lighting equipment; laboratory practice and participation on departmental productions crews is required.
Prerequisites: THAR 102, THAR 135 and THAR 245, or approval of instructor.

THAR 381 Theatre History and Dramatic Literature I
Credits 3. 3 Lecture Hours.
Survey of the history of theatre and drama from ancient times to c. 1700; examination of the evolution of theatre and drama from primitive rituals to highly stylized writing and performance in Europe and Asia.
Prerequisites: THAR 102; majors and minors only; junior or senior classification.

THAR 382 Theatre History and Dramatic Literature II
Credits 3. 3 Lecture Hours.
Continuation of THAR 381. Survey of the history of theatre and drama from 1700 to the present; examines the evolution of theatre and drama in Africa, the Americas, Asia and Europe.
Prerequisites: THAR 381; majors and minors only; junior or senior classification.

THAR 386/MUSC 386 Evolution of the American Musical
Credits 3. 3 Lecture Hours.
Examination of the American musical from its heterogeneous origins to a thriving and diverse expression of the human condition; analysis and critical discourse on the development of the American musical through text, audio and visual recordings.
Prerequisite: Junior or senior classification or approval of instructor.
Cross Listing: MUSC 386/THAR 386.

THAR 390 Theatre Practicum: Performance
Credit 1. 4 Other Hours.
Participation as a performer in a departmental theatre production under supervision of theatre arts faculty; audition or application may be required. May be taken two times for credit.
Prerequisite: Junior or senior classification or approval of instructor.

THAR 391 Theatre Practicum: Production
Credit 1. 4 Other Hours.
Participation in the production team for a departmental theatre production under supervision of theatre arts faculty; audition or application may be required. May be taken two times for credit.
Prerequisite: Junior or senior classification or approval of instructor.

THAR 392 Theatre Practicum: Design
Credit 1. 4 Other Hours.
Participation in the design team for a departmental theatre production under supervision of theatre arts faculty; audition or application may be required. May be taken two times for credit.
Prerequisite: Junior or senior classification or approval of instructor.

THAR 407 Performing Literature.
Credits 3. 3 Lecture Hours.
Analysis and performance of poetry, prose and drama; emphasis on translating analytical decisions into performance; solo performance, readers theatre, chamber theatre, and technology in/as performance.
Prerequisite: Junior or senior classification.

THAR 410 Acting IV - Advanced Problems in Acting
Credits 3. 3 Lecture Hours.
Solving advanced dramatic problems using acting, voice, movement, and style techniques; writing, development and performance of an autobiographical monologue; includes audition preparation and rehearsal techniques.
Prerequisites: THAR 310; junior or senior classification.

THAR 420 Directing
Credits 3. 2 Lecture Hours. 4 Lab Hours.
Theatre forms and styles; director's function and responsibility in producing plays; script analysis; directing laboratory scenes; participation in departmental productions.
Prerequisites: THAR 102, THAR 110, THAR 245, THAR 381, or approval of instructor.

THAR 435 New Technology for Designers
Credits 3. 3 Lecture Hours.
Fundamentals of design software including sound editing, video editing, and rendering for theatre; multi-media installation.
Prerequisites: PEFR 202 or THAR 135; THAR 245; junior or senior classification; or approval of instructor.

THAR 445 Design as Performance
Credits 3. 3 Lecture Hours.
Design as performance using research methods and the production of new work; disciplines of design, performance, installation and performance as research.
Prerequisites: THAR 245 and junior or senior classification; or approval of instructor.

THAR 482 Topics in American Theatre and Performance
Credits 3. 3 Lecture Hours.
Exploration of significant issues in American theatre and performance; emphasis on the aesthetic, social, and cultural issues affecting theatre and performance. May be taken two times for credit.
Prerequisites: THAR 102 and THAR 382 or approval of instructor; junior or senior classification.

THAR 485 Directed Studies
Credits 0 to 3. 0 to 3 Other Hours.
I, II, S Advanced individual study of identified topics in theatre for specific needs of theatre arts majors; formal report required. May be repeated for credit up to 6 hours.
Prerequisites: 24 hours of theatre arts; THAR majors and minors only or permission of instructor.

THAR 489 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Selected topics in an identified area of theatre production, technology, history, or criticism. May be repeated for credit.
Prerequisite: Approval of instructor.

THAR 491 Research
Credits 0 to 3. 0 to 3 Other Hours.
Research conducted under the direction of a faculty member in theatre arts. May be taken up to two times for credit.
Prerequisites: Junior or senior classification and approval of instructor.
UGST - Undergraduate Studies

Courses

UGST 181 First Year Seminar
Credits 0 to 3. 0 to 3 Lecture Hours.
Seminar on various contemporary topics; introduction to high quality college instruction and research; focus on writing, speaking, discussion and research; open to all majors; restricted to first-time-in-college students and limited in size to provide small class experience. May be taken two times for credit.

UGST 182 Topics in Undergraduate Studies
Credits 0 to 3. 0 to 3 Lecture Hours.
Selected interdisciplinary topics related to specific programs as identified by the office of undergraduate studies; for students in approved first year programs. May be taken two times for credit.
Prerequisite: Freshman classification or approval of instructor.

UGST 285 Directed Studies
Credits 0 to 4. 0 to 4 Other Hours.
Directed individual study on selected topics in undergraduate studies. May be taken six times for credit.

UGST 484 Internship
Credits 0 to 3. 0 to 3 Other Hours.
Directed internship in a community, public or private organization to provide students with on-the-job training and/or applied research experience appropriate to career objectives. May be taken three times for credit.
Prerequisites: Junior or senior classification and approval of instructor.

UGST 485 Directed Studies
Credits 0 to 4. 0 to 4 Other Hours.
Directed individual study on selected topics in undergraduate studies. May be taken six times for credit.

UGST 491 Research
Credits 0 to 4. 0 to 4 Other Hours.
Research conducted under the direction of a faculty member in undergraduate studies. May be taken three times for credit.
Prerequisites: Junior or senior classification and approval of instructor.

UGST 492 Cooperative Education in Public Policy
Credits 0 to 3. 0 to 3 Lecture Hours.
Educational work assignment in public policy setting related to student’s career interest and course of study; supervision of the student will be by the cooperating employer and the instructor; reports, approved by course instructor, will be required. May be taken two times for credit.
Prerequisites: Junior or senior classification and participation in Public Policy Internship Program.

URPN - Urban & Reg Planning

Courses

URPN 201 The Evolving City
Credits 3. 3 Lecture Hours.
Introduction to the history of contemporary urban and regional planning and how the evolving forms of cities and regions pose opportunities and/or challenges for planners; understanding key social, economic, political and technological forces that shape city form and function and its ramification for urban and regional planning.

URPN 202 Building Better Cities
Credits 3. 3 Lecture Hours.
Determinants of land use patterns; classification of uses; idealized conceptual alternatives; location and size criteria; mapping; comprehensive planning process, relationship to circulation planning.

URPN 210 Urban Analytical Methods I
Credits 3. 3 Lecture Hours.
Study of various analytical techniques used in urban and regional decision making; quantitative approaches to analyze and manipulate data; utilization of statistical packages for data, analysis and communication to enhance urban planning modeling.
Prerequisite: URPN majors only or approval of instructor.

URPN 220 Digital Communication I
Credits 3. 3 Lecture Hours.
Applications of computer graphics, rendering, and visualization software in urban design, landscape architecture, and environmental analysis; introduction to basic concepts and principles of graphic composition; rendering, visualization, and linkages to landscape-referenced data.
Prerequisite: Landscape Architecture and Urban Planning majors only or approval of instructor.

URPN 291 Research
Credits 1 to 4. 1 to 4 Other Hours.
Research conducted under the direction of faculty member in landscape architecture and urban planning. May be taken 2 times for credit.
Prerequisites: Freshman or sophomore classification.

URPN 301 Urban Analytical Methods II
Credits 3. 3 Lecture Hours.
Focuses on research conducted by planners, sociologists, anthropologists, political scientists and a variety of applied social scientists; examines variety of procedures employed when conducting research in urban areas; furthers understanding and knowledge of statistical methods employed in social research and elements of geographical analysis.
Prerequisite: Upper division College of Architecture; URPN 210 or approval of instructor, URPN majors only.

URPN 302 Planning Law
Credits 3. 3 Lecture Hours.
Familiarization with the fundamental principles of planning law and legislation; legal foundation for the urban planning process; alternative methods of plan implementation; emphasis on legal issues as they impact land use planning and development at the municipal level of government; participation in mock advocacy trials and public hearings.
Prerequisites: URPN 301; URPN majors only.

URPN 310 Urban Analytical Methods II
Credits 3. 3 Lecture Hours.
Focuses on research conducted by planners, sociologists, anthropologists, political scientists and a variety of applied social scientists; examines variety of procedures employed when conducting research in urban areas; furthers understanding and knowledge of statistical methods employed in social research and elements of geographical analysis.
Prerequisite: Upper division College of Architecture; URPN 210 or approval of instructor, URPN majors only.

URPN 320 Digital Communication II
Credits 3. 3 Lecture Hours.
Advanced applications of computer graphics, rendering, and visualization software in urban design, landscape architecture, and environmental analysis; introduction to basic concepts and principles of graphic composition, rendering, visualization, and linkages to landscape-referenced data.
Prerequisites: URPN 220; department majors only.
URPN 325 Introduction to GIS in Urban and Regional Planning
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Provides an understanding of GIS fundamentals; basic concepts, principles and functions; essential skills for applying GIS in various fields such as urban planning, landscape architecture, land development, environmental studies, transportation and hazard management; based on learning through class projects.
Prerequisite: Upper division College of Architecture; department majors only or approval of instructor.

URPN 326 Advanced GIS in Urban and Regional Planning
Credits 3. 3 Lecture Hours.
Advanced instruction in applications of spatial tools for urban planning, landscape architecture, land development, hazard management, and related problems; GIS applications through review of literature and practice; data quality, uncertainty, the integration of GPS, remote sensing and information technology within the context of urban and regional planning.
Prerequisite: URPN 325 or approval of instructor, department majors only.

URPN 330 Land Development I
Credits 3. 3 Lecture Hours.
Interface between the physical and financial dimensions in design and development to achieve building and project economies; creating a physical product and a financial venture that are responsive to social and environmental concerns and to market economy and finance.
Prerequisite: Department majors only or approval of instructor.

URPN 331 Public and Private Infrastructure Funding
Credits 3. 3 Lecture Hours.
An introduction to issues of financing public and public-private development project; exploring the difference between raising revenue, including the trade offs associated with establishing a sustainable tax base, and raising capital through capital markets; illustration of the range of decisions with financing public and public-private partnerships.
Prerequisite: Department majors only or approval of instructor.

URPN 340 Housing and Community
Credits 3. 3 Lecture Hours.
Housing, its development, planning, marketing, designing, financing and production; social and design history and contemporary issues of American housing development, urban renewal, neighborhood structure and community facilities.
Prerequisite: Department majors and minors only or approval of instructor.

URPN 360 Issues in Environmental Quality
Credits 3. 3 Lecture Hours.
Issues in environmental quality; focus on stormwater and ecosystem qualities influenced by land development; and planning principles and techniques (e.g. low impact development) for sustainable stormwater management in urban and suburban watersheds.
Prerequisite: Junior or senior classification or approval of instructor.

URPN 361 Urban Issues
Credits 3. 3 Lecture Hours.
Issues pertaining to the evolution and development of cities and urban regions; examines the socio-economic, cultural and physical development of urban areas; addresses contemporary problems such as racial tension, unemployment and poverty, housing, pollution and environmental sustainability, traffic and congestion, land use, crime, public health, and other quality of life issues.
Prerequisite: Junior or senior classification or approval of instructor.

URPN 369 Transportation and Urban Form
Credits 3. 3 Lecture Hours.
Examination of the interrelated nature of transportation, land use and urban design; familiarization with the role of transportation in contemporary society; understanding the interrelationships between transportation and urban form at both the regional and community levels.
Prerequisite: Junior or senior classification or approval of instructor.

URPN 370 Health Systems Planning
Credits 3. 3 Lecture Hours.
Introduction to planning in the health care system at both institutional and community levels.
Prerequisite: Junior or senior classification or approval of instructor.

URPN 371 Environmental Health Planning and Policy
Credits 3. 3 Lecture Hours.
Philosophical and historical relationships of human-environment-disease; environmental health domains and associated planning and policy organizations and initiative for monitoring, intervention, and prevention; interdisciplinary approaches for risk analysis of environmental health.
Prerequisite: Junior or senior classification or approval of instructor.

URPN 401 Policy Implementation
Credits 3. 3 Lecture Hours.
Techniques of implementing major urban development programs and plans; capital improvements programming and budgeting; overview of regulatory measures including zoning and subdivision regulations; public involvement process; and fiscal planning.
Prerequisite: URPN majors only.

URPN 440 Urban and Regional Economic Development
Credits 3. 3 Lecture Hours.
Examines economic development processes in urban and regional planning; issues explored include theoretical, the economic development planning process, ethics, location factors, intergovernmental relations, budgeting, and private sector revenue generation.
Prerequisite: URPN majors only or approval of instructor.

URPN 441 Neighborhood Revitalization
Credits 3. 3 Lecture Hours.
Examination of the causes of decline of central cities, with the goal of developing a realistic view of who is affected, and why, so that a realistic foundation can be laid for successful redevelopment projects; topics and case studies on downtown decline and redevelopment, older city neighborhood problems and retrofitting.
Prerequisite: URPN majors only or approval of instructor.

URPN 450 Emergency Management Principles and Practices
Credits 3. 3 Lecture Hours.
Introduction to the fundamental principles of emergency management.
Prerequisite: Upper division College of Architecture or approval of instructor.

URPN 451 Hazard and Vulnerability Analysis for Planners
Credits 3. 3 Lecture Hours.
Tools and techniques used by city planners and emergency managers to determine their jurisdictions' hazard risk and social vulnerability to disaster impacts.
Prerequisite: Junior or senior classification, URPN 450 or approval of instructor.
URPN 460 Sustainable Communities  
**Credits 3. 3 Lecture Hours.**  
Focuses on sustainable community with applications in public policy/ design including societal organization, disciplinary bound design and policy, and empowered approaches to design, social ecology and public policy; reading and review of relevant literature on sustainability, complemented with exercises to illustrate underlying principles.  
**Prerequisite:** Department majors and minors only or approval of instructor.

URPN 469 Urban Infrastructure  
**Credits 3. 3 Lecture Hours.**  
Foundation of planning and managing infrastructure and public services; utilization of life-cycle method of infrastructure planning and delivery, research theory and tools to perform basic infrastructure planning.  
**Prerequisite:** URPN majors only or approval of instructor.

URPN 470 Health Systems Planning and Policy  
**Credits 3. 3 Lecture Hours.**  
Analyzes health needs at community, regional and national levels; organization and supply of health services at community, regional and national levels; medical technology and its impact on health needs and system organization; medical care financing and its effects on health need and system organization; health planning for natural and human-made disasters; and service-learning for applying planning theories and methods.  
**Prerequisite:** Junior or senior classification or approval of instructor.

URPN 471 Planning Healthier Communities  
**Credits 3. 3 Lecture Hours.**  
Planning for the creation of healthier cities/communities; emphasis on the impact of global paradigmatic shifts regarding community health, stakeholder participation, coalition building, leadership, visioning the planning process, and the need for more systemic and process orientation in community building.  
**Prerequisite:** Junior or senior classification or approval of instructor.

URPN 481 Seminar  
**Credits 3. 3 Lecture Hours.**  
Seminar discussion of current topics in urban planning.  
**Prerequisite:** Senior classification.

URPN 483 Studio in Urban and Regional Science  
**Credits 1 to 6. 1 to 6 Lecture Hours.**  
Studio introduces the confluence of ecological, environmental, economic, social, cultural, and political forces impacting the planning, design, and development of complex urban environments; site planning, design process, sustainability.  
**Prerequisite:** URPN majors only or approval of instructor.

URPN 484 Internship  
**Credits 3. 3 Other Hours.**  
Practical experience in an office of design allied professionals; 12 week internship with a minimum of 480 hours; continuous employment; departmental pre-approval through the department internship coordinator required. May not be repeated for credit.  
**Prerequisites:** URPN majors only or approval of internship coordinator.

URPN 485 Directed Studies  
**Credits 1 to 5. 1 to 5 Other Hours.**  
Individual instruction in selected aspects of urban planning not adequately covered in other courses. May be taken 3 times for credit.  
**Prerequisite:** Upper level classification.

URPN 489 Special Topics in...  
**Credits 1 to 4. 1 to 4 Lecture Hours. 0 to 4 Lab Hours.**  
Selected topics in an identified field of urban studies. May be repeated for credit.

URPN 491 Research  
**Credits 1 to 4. 1 to 4 Other Hours.**  
Research conducted under the direction of faculty member in landscape architecture and urban planning. May be taken 2 times for credit.  
**Prerequisites:** Junior or senior classification.

URPN 493 Urban and Regional Studies Capstone Course  
**Credits 5. 5 Lecture Hours.**  
Syntheses and application of skills and knowledge gained through coursework applied to the development of creative solutions to real-world projects.  
**Prerequisites:** URPN 310, URPN 331, URPN 410, URPN 469; LAND 494; senior classification; URPN majors only.

URPN 494 Internship  
**Credits 6. 6 Other Hours.**  
Practical experience in public, private, non-profit and for profit organizations of design allied professionals; 18 week internship with a minimum of 720 hours; continuous employment; departmental pre-approval through the department internship coordinator required. May not be repeated for credit.  
**Prerequisites:** Upper level classification and approval of internship coordinator.

VIBS - Vet Integrative Biosci Courses

VIBS 204 Fundamentals of Food Toxicology and Safety  
**Credits 3. 3 Lecture Hours.**  
Toxicity and safety of various foods and food additives, ingredients and contaminants; occurrence, control and prevention of food transmitted diseases.  
**Prerequisite:** Sophomore classification and CHEM 101.

VIBS 222 Great Poisonings of the World  
**Credits 3. 3 Lecture Hours.**  
Exploration of the effect of intentional and accidental man-made and natural poisonings on humans and the environment and their impact on public policy.  
**Prerequisite:** Freshman or sophomore classification.

VIBS 277/NRSC 277 Introduction to Neuroscience  
**Credits 3. 3 Lecture Hours.**  
Neuroscience from the molecular to system levels; fundamental principles and knowledge of neuroscience; current research information on neuroscience.  
**Prerequisites:** Freshman or sophomore classification and approval of instructor.  
**Cross Listing:** NRSC 277/VIBS 277.

VIBS 285 Directed Studies  
**Credits 0 to 4. 0 to 4 Other Hours.**  
Directed studies in specific problem areas of veterinary anatomy and public health.  
**Prerequisites:** Freshman or sophomore classification and approval of department head.
VIBS 289 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours. 0 to 4 Lab Hours.
Selected topics in an identified area of veterinary anatomy or topics not covered in other courses. May be repeated for credit.
Prerequisites: Freshman or sophomore classification and approval of instructor.

VIBS 305 Biomedical Anatomy
Credits 4. 2 Lecture Hours. 4 Lab Hours.
Comprehensive mammalian gross anatomy, using the dog as the model species; laboratory dissection, veterinary nomenclature with human correlates and the application of anatomy to clinical situations.
Prerequisites: BIOL 114 and BIOL 124; junior or senior classification; BIMS major with a minimum overall 2.5 Texas A&M GPA.

VIBS 310 Biomedical Writing
Credit 1. 1 Lecture Hour.
Mechanisms by which knowledge is shared among researchers, clinicians and other science professionals, then disseminated to the general public; an assortment of written assignments to develop writing skills specific for communicating scientific concepts to a variety of audiences. Must be taken on a satisfactory/unsatisfactory basis.
Prerequisite: Junior or senior classification.

VIBS 311 Biomedical Explorations through Narrative
Credit 1. 1 Lecture Hour.
Familiarization with the writing style required for biomedical and health science; instruction in writing styles and appropriate techniques to increase and strengthen writing abilities. Must be taken on a satisfactory/unsatisfactory basis.
Prerequisite: VIBS 310 or approval of instructor.

VIBS 343 Histology
Credits 4. 3 Lecture Hours. 3 Lab Hours.
Normal tissues of vertebrates including histogenesis of some; histogenesis and organography of mammalian tissues.
Prerequisites: BIOL 114 and BIOL 124; CHEM 228; junior or senior classification; BIMS major with a minimum overall 2.5 Texas A&M GPA.

VIBS 401 Developmental Neurotoxicology
Credits 2. 2 Lecture Hours.
Effects of exposure to toxic substances on the developing nervous system; content to include mechanisms of toxicity of substances potentially devastating to the developing nervous system including lead, mercury and other heavy metals, alcohol, nicotine (smoking), pesticides, flame retardants, and others.
Prerequisite: Junior or senior classification.

VIBS 404 Food Toxicology and Safety
Credits 3. 3 Lecture Hours.
Toxicity and safety of various foods and food additives, ingredients, and contaminants; occurrence, control and prevention of food transmitted diseases.
Prerequisite: Junior or senior classification.

VIBS 407/NRSC 407 Core Ideas in Neuroscience
Credit 1. 1 Lecture Hour.
General overview of selected core ideas across the full spectrum of neuroscience.
Prerequisite: Junior or senior classification; background in science courses recommended.

VIBS 408 Neuroscience and Religion
Credits 3. 3 Lecture Hours.
Emphasis on the biology of the human mind in the context of religious implications.
Prerequisites: Junior or senior classification; concurrent enrollment in NRSC 407/VIBS 407 or VIBS 407/NRSC 407.

VIBS 411 Tumor Cell Biology and Carcinogenesis
Credits 3. 3 Lecture Hours.
(3-0) Principles of tumor biology; role of gene-environment interactions; molecular mechanisms regulating cancer initiation and progression; therapeutic treatment of cancer.
Prerequisites: BIMS 320/GENE 320 or equivalent; junior or senior classification.

VIBS 413 Introduction to Epidemiology
Credits 3. 3 Lecture Hours.
Study and measurement of disease and health in populations; examples from literature and current events; emphasizes concepts and appreciation for epidemiologic approaches and applications in life.
Prerequisite: Junior or senior classification.

VIBS 420 Computer Applications in Public Health Research
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Introduction to the use of computers for public health research applications, including word processing, spreadsheets, data base management and telecommunications.
Prerequisites: Senior classification or approval of instructor; BIMS major with a minimum overall 2.5 Texas A&M GPA.

VIBS 422 Endocrine Toxicology
Credits 4. 4 Lecture Hours.
Impacts of endocrine toxicology on endocrine system; prevalence, environmental and occupational use and disposal of environmental endocrine disrupting chemicals (EDCs); structure, toxicokinetics and mechanism of action of EDCs; effects of EDCs on the development and function, disorders and diseases of the endocrine and reproductive organs.
Prerequisites: Senior classification; approval of instructor.

VIBS 424/VTPP 424 Biomedical Neuroendocrinology and Endocrine Disorders
Credits 3. 3 Lecture Hours.
Neuroendocrine (hypothalamus-pituitary) control of puberty, menstruation, ovulation, pregnancy, labor, lactation, female reproductive cycles, male reproductive functions, thyroid and parathyroid, adrenal and kidney, diabetes, obesity, sleep, memory, learning and aging and their endocrine disorders; overview on biosynthesis, transport and signaling of peptide and neuropeptide hormones, steroids and prostaglandins.
Prerequisites: Honors, junior or senior classification, or approval of instructor.
Cross Listing: VTPP 424/VIBS 424.

VIBS 432 Public Health Practices
Credits 3. 3 Lecture Hours.
Study of various diseases, causes and methods of prevention; epidemiology of disease; social and behavioral sciences; health policy and management; environmental and occupational health.
Prerequisites: Junior or senior classification; BIMS major with a minimum overall 2.5 Texas A&M GPA.
VIBS 443 Biology of Mammalian Cells and Tissues  
Credits 4. 3 Lecture Hours. 3 Lab Hours.  
Molecular phenomena placed in context with tissues, organs and organ systems; cell and tissue structures visualized by light microscopy and electron micrographs for functional relationships; clinical correlations reveal relevance of histology in specific disease states; conceptual thinking exercises facilitate problem-solving skills.  
Prerequisites: Junior or senior classification in life sciences and interest in health related careers.

VIBS 450/NRSC 450 Mammalian Functional Neuroanatomy  
Credits 4. 3 Lecture Hours. 3 Lab Hours.  
Functional morphology of the domestic animal and human brain using gross specimens, microscopic sections, interactive computer-, DVD- and video-assisted instructional programs supplemented with clinical case studies.  
Prerequisites: Junior or senior classification; BIMS, biology, biochemistry, or psychology majors, or neuroscience minors with overall 3.5 Texas A&M GPA; or approval of instructor.  
Cross Listing: NRSC 450/VIBS 450.

VIBS 485 Directed Studies  
Credits 0 to 4. 0 to 4 Other Hours.  
Directed individual study of a selected problem in veterinary anatomy (with emphasis on neuroscience, cell biology, reproduction, developmental biology, marine mammal anatomy) approved by instructor or selected problems in veterinary public health (with emphasis on food safety, toxicology, epidemiology, informatics, zoonoses).  
Prerequisites: Junior or senior classification and approval of instructor.

VIBS 489 Special Topics in...  
Credits 1 to 4. 0 to 4 Lecture Hours. 0 to 4 Lab Hours.  
Selected topics in an identified area of veterinary anatomy (with emphasis on neuroscience, cell biology, genetics, reproduction, developmental biology, marine mammal anatomy) or selected topics in veterinary public health, epidemiology, zoonoses, food hygiene, food toxicology and mycotoxicology. May be repeated for credit.  
Prerequisites: Junior or senior classification and approval of instructor; BIMS major with a minimum overall 2.5 Texas A&M GPA.

VIBS 601 Anatomy  
Credits 4. 2 Lecture Hours. 6 Lab Hours.  
Topographical dissection of one of the following domestic animals: horse, ox, dog or cat. May be taken more than once but not to exceed 12 hours of credit toward a graduate degree.  
Prerequisite: VIBS 912 or 305 or equivalent.

VIBS 602 Histology  
Credits 4. 2 Lecture Hours. 6 Lab Hours.  
Molecular phenomena placed in context with tissues, organs and organ systems; cell and tissue structures visualized by light microscopy and electron micrographs for functional relationships; clinical correlations reveal relevance of histology in specific disease states; conceptual thinking exercises facilitate problem-solving skills.  
Prerequisite: Graduate classification.

VIBS 603/NRSC 603 Neuroanatomy  
Credits 4. 2 Lecture Hours. 6 Lab Hours.  
Gross, developmental and microscopic anatomy of nervous system of selected laboratory and domestic animals.  
Prerequisite: Approval of instructor.  
Cross Listing: NRSC 603/VIBS 603.

VIBS 604/NRSC 604 Biomedical Neuroendocrinology and Endocrine Disorders  
Credits 3. 3 Lecture Hours.  
Prerequisite: Approval of instructor.  
Cross Listing: NRSC 604/VIBS 604.

VIBS 605 Chemical Hazard Assessment  
Credits 3. 3 Lecture Hours.  
Chemical and biological methods for testing hazardous chemicals and complex mixtures; chemical analysis; microbial bioassays; developmental toxicity; enzyme induction; mammalian cell culture.  
Prerequisite: Graduate classification.

VIBS 606/NRSC 605 Neuroanatomical Systems  
Credits 3. 3 Lecture Hours.  
Emphasis on major neural systems that govern identifiable physiological functions, behavior and neurodegenerative disease; whole-brain anatomy is approached from a “systems” perspective, wherein components of defined functional systems are described in terms of their location, inputs and outputs, and physiological/behavioral significance in health and disease.  
Prerequisite: Approval of instructor.

VIBS 607 Applied Epidemiology  
Credits 4. 3 Lecture Hours. 3 Lab Hours.  
An introductory course of the application of epidemiological concepts to the study of disease occurrence in populations of lower animals and man. The purpose of epidemiology is to identify the host, agent and environmental determinants and dynamics of disease spread that provide the basis for successful preventive medicine and public health programs.

VIBS 608 Epidemiology Methods I  
Credits 4. 3 Lecture Hours. 3 Lab Hours.  
Epidemiology concepts and methods used in the investigation of determinants of health or disease in populations; stressing basic methods for experimental design, conduct and analysis of both observational and experimental studies.  
Prerequisite: STAT 651 or equivalent.

VIBS 609 Anatomy of Reproductive Systems  
Credits 4. 2 Lecture Hours. 6 Lab Hours.  
Gross and microscopic anatomy of the reproductive systems of domestic animals.  
Prerequisite: VIBS 601 or VIBS 602 or VIBS 910 or equivalent. (Offered in alternate years.)

VIBS 610 Epidemiologic Methods II and Data Analysis  
Credits 4. 3 Lecture Hours. 3 Lab Hours.  
Principles and methods for the analysis of data from epidemiologic studies including the purpose of data analysis and role of statistics, sampling distributions, probability distributions, analysis of crude, stratified and matched data, and the use of linear and logistic regression methods.  
Prerequisites: VIBS 608 and STAT 651 or approval of instructor.
VIBS 611 Tumor Cell Biology and Carcinogenesis  
Credits 3.3 Lecture Hours.  
Basic principles of tumor biology; role of gene-environment interactions; molecular mechanisms regulating cancer initiation and progression; therapeutic treatment of cancer.  
**Prerequisites:** BIMS 320/GENE 320 or equivalent; graduate classification.

VIBS 612 Mammalian Embryology  
Credits 3.3 Lecture Hours.  
Embryology of domestic mammals; gametogenesis, fertilization, cell proliferation and differentiation, and organogenesis; selected commonly occurring congenital defects of domestic animals used to emphasize embryologic sequences and processes.  
**Prerequisite:** Approval of instructor.

VIBS 613 Evolutionary Bioinformatics  
Credits 3.2 Lecture Hours.  
Principles and concepts in molecular evolution, population genetics, and evolutionary genomics; applications of quantitative approaches (computation, statistics, and mathematics) in analyzing large and complex biological data sets; algorithm design and development of scientific software using high-level high-performance computer languages; emerging techniques for integrative data analysis, and the assumptions, advantages, and limitations of these techniques.  
**Prerequisites:** BIOL 451 or GENE 320/BIMS 320/BIMS 320/GENE 320 or equivalent; or approval of instructor.

VIBS 615 Food Hygiene  
Credits 4.3 Lecture Hours. 4 Lab Hours.  
Clinical description, pathogenesis, diagnosis, source, epidemiology and prevention or control of food borne diseases caused by biological, chemical and natural hazards.  
**Prerequisite:** Graduate classification.

VIBS 616 Advanced Developmental Neurotoxicology  
Credits 3.3 Lecture Hours.  
Study of mechanisms of toxicity of substances potentially devastating to the developing brain and spinal cord including lead, mercury and other heavy metals, alcohol, nicotine (smoking), pesticides, flame retardants, and others.  
**Prerequisite:** Approval of instructor.

VIBS 617 Cell Biology  
Credits 1 to 5. 1 to 5 Lecture Hours.  
Series of five 1-hour credit modules focusing on selected aspects of structure, function, and signal transduction in eukaryotic cells through critical analysis of recent literature in the field. Each module listed as separate course section; students may enroll in up to five 1-hour module sections per semester.  
**Prerequisite:** Approval of instructor.

VIBS 619 Food Toxicology II  
Credits 3.3 Lecture Hours.  
Public health implications of toxic factors in foods, their source, nature, occurrence and distributions; emphasis on mycotoxins including their isolation, detection, identification and toxicology; study of state-of-the-art food safety research techniques.  
**Prerequisite:** Graduate classification.

VIBS 620/GENE 620 Cytogenetics  
Credits 3.3 Lecture Hours.  
Examination and analysis of variation in chromosome structure, behavior and number; developmental and evolutionary effects of this variation.  
**Prerequisite:** GENE 603.  
**Cross Listing:** GENE 620.

VIBS 621/NRSC 621 Fundamental Neuroanatomy  
Credits 4.4 Lecture Hours.  
A comprehensive review of the neuroanatomical determinants of function; rigorous neuroanatomical foundation relevant for research investigating changes in neural pathways and/or networks involved in sensory and motor functions, learning and memory, perception, selective attention, as well as recovery of function following brain damage.  
**Cross Listing:** NRSC 621/VIBS 621.

VIBS 622 Endocrine Toxicology  
Credits 4.4 Lecture Hours.  
Impacts of endocrine toxicology on endocrine system; prevalence, environmental and occupational use and disposal of environmental endocrine disrupting chemicals (EDCs); structure, toxicokinetics and mechanism of action of EDCs; effects of EDCs on the development and function, disorders and diseases of the endocrine and reproductive organs.  
**Prerequisite:** Graduate classification; approval of instructor.

VIBS 624/VTTP 624 Endocrinology  
Credits 4.3 Lecture Hours. 3 Lab Hours.  
Neuroendocrine control of puberty menstruation, ovulation, pregnancy, labor, lactation, female reproductive cycles, male reproductive functions, thyroid and parathyroid, adrenal and kidney, diabetes, obesity, sleep, memory, learning and aging, and their endocrine disorders; overview on biosynthesis, transport and signaling of peptide and neuropeptide hormones, steroids and prostaglandins.  
**Prerequisite:** Graduate classification.  
**Cross Listing:** VTTP 624/VIBS 624.

VIBS 627 Optical Microscopy and Live Cell Imaging  
Credits 3.2 Lecture Hours. 3 Lab Hours.  
Principles and practice of optical microscopy for life sciences; applications with fixed samples and live cells using digital microscopy, confocal and multiphoton microscopy, TIRF and laser capture microscopy equipment; applications with fluorescence probes of cellular function.  
**Prerequisite:** Approval of instructor.

VIBS 633 Animal Diseases in Comparative Medicine  
Credits 3.3 Lecture Hours.  
Study of major zoonotic diseases, including frequency of occurrence, clinical signs, diagnosis, epidemiology, bioterrorism concerns and the prevention or control in animals and humans.  
**Prerequisite:** Graduate classification.

VIBS 640/NRSC 640 Neurobiology  
Credits 1 to 5. 1 to 5 Lecture Hours.  
Biologic of the mammalian central nervous system with emphasis on cellular and molecular interactions; contemporary research topics in areas such as neuron-glia interactions, neuroimmunology, neuroendocrinology, developmental neurobiology and neurogenetics; extensive readings from primary literature.  
**Prerequisites:** Undergraduate or graduate cell biology, genetics and biochemistry or approval of instructor.  
**Cross Listing:** NRSC 640/VIBS 640.

VIBS 650 Education in a Veterinary Medical and Biomedical Environment  
Credits 1 to 3. 1 to 3 Lecture Hours.  
Philosophical, stylistic and methodological consideration for designing, planning implementing and evaluating effective veterinary medical and biomedical teaching and learning. Orientation for graduate school.  
**Prerequisite:** Graduate classification.
VIBS 655 Methods of Specialized Journalism  
Credits 3. 3 Lecture Hours.  
Writing and placement of magazine and journal articles in specialized areas of media content such as agriculture, ecology, science, business, education, natural resources; individual projects directed to student's field of interest.

VIBS 657 Issues in Science and Technology Journalism  
Credits 3. 3 Lecture Hours.  
Current issues, fundamental concepts in science and technology journalism, communication theory, science and journalism components, philosophy and literature of the field.

VIBS 658 Research Methods in Science and Technology Journalism  
Credits 3. 3 Lecture Hours.  
Research methods including theory, hypothesis formulation, design, data collection, data analysis, measurement and report writing. Qualitative and quantitative methods. Research topics.

VIBS 660 Reporting Science and Technology  
Credits 3. 3 Lecture Hours.  
Gathering, writing and editing complex information, translation techniques, interpretation and analysis, literary and organizational devices and measurement of readability.

VIBS 663 Biomedical Reporting  
Credits 3. 3 Lecture Hours.  
Sources of biomedical information, specialized information-gathering skills, key biomedical vocabulary/concepts, audiences, outlets, translation/interpretation, research, ethical issues.

VIBS 664 Risk and Crisis Reporting  
Credits 3. 3 Lecture Hours.  
Assessment and analysis of environmental and health risk, analytical procedures, interpretation of risk factors, reporting science crisis events.

VIBS 670 Basic Environmental Toxicology  
Credits 3. 3 Lecture Hours.  
Introduction to general principles of toxicology; test methods, target organs, toxicity of major classes of toxins/toxicants, and risk assessment for engineers and other non-toxicologists; risk assessment methodology.  
Prerequisite: VIBS 602 or approval of instructor.

VIBS 681 Seminar  
Credit 1. 1 Lecture Hour.  
Review and discussion of current scientific work in one of the department's areas of specialization (anatomy, cellular and molecular biology, epidemiology, food safety, genetics, informatics, neuroscience, public health concepts, reproduction/developmental biology, toxicology, zoonoses).

VIBS 684 Professional Internship  
Credits 1 to 4. 1 to 4 Other Hours.  
A directed internship in an organization to provide students with on-the-job training with professionals in settings appropriate to the student's professional objectives.  
Prerequisite: Approval by committee chair.

VIBS 685 Directed Studies  
Credits 1 to 4. 1 to 4 Other Hours.  
Research problem in one of the department's areas of specialization (anatomy, cellular and molecular biology, epidemiology, food safety, genetics, informatics, neuroscience, public health concepts, reproduction/developmental biology, toxicology, zoonoses, science and technology journalism).

VIBS 688 Epidemiological Modeling of Infectious Diseases  
Credits 3. 2 Lecture Hours. 2 Lab Hours.  
Concepts of mathematical modeling of infectious diseases; steps and methods for the development and analysis of models.  
Prerequisite: Graduate classification.

VIBS 689 Special Topics in...  
Credits 1 to 4. 1 to 4 Lecture Hours. 0 to 4 Lab Hours.  
Selected topics in one of the department's areas of specialization (anatomy, cellular and molecular biology, epidemiology, food safety, genetics, informatics, neuroscience, public health concepts, reproduction/developmental biology, toxicology, zoonoses, science and technology journalism).

VIBS 690 Theory of Research  
Credits 3. 3 Lecture Hours.  
Theory and design of research related to current biomedical problems especially those involving study of animal disease; philosophical perspectives underlying historical advances in research pertaining to the study, prevention and treatment of disease.  
Prerequisite: Graduate classification.

Cross Listing: VTPP 690 and VPAT 690.

VIBS 691 Research  
Credits 1 to 23. 1 to 23 Other Hours.  
Research reported by writing of thesis or dissertation as partial requirement for MS or PhD degree.  
Prerequisite: Approval of department head.

VIBS 910 Gross Anatomy I  
Credits 4. 2 Lecture Hours. 6 Lab Hours.  
Topographical dissection of the dog and comparative aspects of the domestic cat.  
Prerequisite: Enrollment in first year of professional curriculum.

VIBS 911 Microscopic Anatomy I  
Credits 4. 2 Lecture Hours. 6 Lab Hours.  
Microscopic study of cells, tissues and organ systems of domestic animals.  
Prerequisite: Enrollment in first year of professional curriculum.

VIBS 912 Gross Anatomy II  
Credits 4. 1 Lecture Hour. 8 Lab Hours.  
Comparative anatomy of farm animals; topographic dissection of common farm species.  
Prerequisite: Enrollment in first year of professional curriculum.

VIBS 913 Microscopic Anatomy II  
Credits 4. 2 Lecture Hours. 6 Lab Hours.  
Developmental anatomy of domestic animals with special emphasis on structural congenital defects; functional neuroanatomy and clinical neurology of domestic animals; essential clinical skills for the theory and practice of veterinary neurology.  
Prerequisite: Enrollment in first year of professional curriculum.

VIBS 926 Introduction to Public Health Concepts  
Credit 1. 1 Lecture Hour.  
Basic concepts and issues of public health as they relate to the veterinary medical profession.  
Prerequisite: Enrollment in first year of the professional curriculum.
VIIBS 930 Public Health
Credits 4. 4 Lecture Hours.
Principles and applications of epidemiology in veterinary medicine and the literature; history, epidemiology, symptoms, prevention and control of diseases transmitted between animals and humans; emphasis on emerging zoonotic diseases presenting occupational hazards for veterinary medicine; safety of foods of animal origin including foodborne illnesses.
Prerequisite: Enrollment in third year of professional curriculum or enrollment in graduate studies with approval of instructor.

VIIBS 948 Didactic Electives in Veterinary Anatomy
Credits 1 to 12. 1 to 12 Lecture Hours.
Elective course in veterinary anatomy (with emphasis on neuroscience, cell biology, genetics, reproduction, developmental biology, marine mammal anatomy) for professional students who wish to supplement required curriculum. May be repeated for credit.
Prerequisite: Enrollment in third year of professional curriculum.

VIIBS 985 Directed Studies
Credits 1 to 4. 1 to 4 Other Hours.
Directed individual study of a selected problem in veterinary anatomy (with emphasis on neuroscience, cell biology, genetics, reproductive biology, developmental biology, or marine mammal anatomy) or directed individual study of advanced topics in veterinary public health or epidemiology (with emphasis on food safety, toxicology, informatics, or zoonoses). May be repeated for credit.
Prerequisite: Matriculation in veterinary professional curriculum.

VIIBS 989 Special Topics in...
Credits 1 to 4. 1 to 4 Other Hours.
Selected topics in an identified area of veterinary anatomy (with emphasis on neuroscience, cell biology, genetics, reproductive biology, developmental biology or marine mammal anatomy) or selected topics in veterinary public health, epidemiology, zoonoses, food hygiene and food toxicology.
Prerequisite: Matriculation in veterinary professional curriculum.

VIST - Visual Studies

Courses

VIST 105 Principles of Design I
Credits 4. 2 Lecture Hours. 6 Lab Hours.
Survey of principles and theory of design and visual communication; elements and organizational structure of the visual language; sign, symbol, and meaning; visual perception; problem solving and the creative process; design in terms of value as well as color; emphasis on two-dimensional design.*

VIST 106 Principles of Design II
Credits 4. 2 Lecture Hours. 6 Lab Hours.
Fundamentals of spatial design; theory of form; transformations, additive/subtractive techniques as process; 3D composition; traditional modeling and construction techniques; formal visual analysis and critique.
Prerequisite: VIST 105.*

VIST 170 Introduction to Visualization Computing Environments
Credit 1. 2 Lab Hours.
Procedures, practices and environments useful for visual problem solving using programmatic languages; setup and use of the computing environment; useful system tools and commands; basic programming concepts and constructs.
Prerequisite: Visualization majors only or approval of instructor.

VIST 201 Writing for Design
Credit 1. 2 Lab Hours.
Writing as a discipline for the development, conceptualization, critique and presentation of visual works; emphasis on portfolio and narrative development.
Prerequisite: Major in visualization.

VIST 205 Principles of Design III
Credits 4. 2 Lecture Hours. 6 Lab Hours.
Introduction to the creative processes, workflows and methodologies used in the field of visualization including graphic design, interactivity and animation.
Prerequisites: ARTS 115; VIST 106; VIST 170.

VIST 206 Visual Studies Studio I
Credits 4. 2 Lecture Hours. 6 Lab Hours.
Theory and practice of traditional techniques for visual communication and visualization; the camera model; principles of physically based motion; time based media and animation; development of narrative and storytelling in the creative process.
Prerequisite: VIST 205.*

VIST 270 Computing for Visualization I
Credits 3. 3 Lecture Hours.
Introduction to the theory and practice of visual computer based problem solving; system tools; problem solving principles and practice; basics of software interaction and interface organization; development concepts and principles useful in digital art and visualization production.
Prerequisite: MATH 151; VIST 170.

VIST 271 Computing for Visualization II
Credits 3. 3 Lecture Hours.
Continuation of Computing for Visualization I; concepts of object oriented programming; emphasis on principles and techniques useful for three dimensional visualization and real time graphic display.
Prerequisite: MATH 152; VIST 270.

VIST 275 Introduction to Visualization
Credits 3. 3 Lecture Hours.
Introduction to visualization concepts, techniques and applications; introduction to significant visualization topics including cultural context, visual perception, the digital image, visual language, geometric modeling, animation, image creation, image compositing; application areas, ethical issues in visualization and the future of visualization.
Prerequisites: MATH 150 or equivalent; non-majors only.

VIST 284 Visualization Techniques
Credit 1. 2 Lab Hours.
Introduction to software used in the visual arts including 2D raster and vector systems, modeling, rendering, animation, post production and multimedia. Specific course content will vary based upon curriculum requirements. May be repeated for up to 3 credit hours.
Prerequisite: Major in visualization or minor in art.

VIST 289 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours. 0 to 4 Lab Hours.
Selected topics in an identified area of visualization. May be repeated for credit.
Prerequisite: Approval of instructor.
VIST 305 Visual Studies Studio II  
Credits 3. 1 Lecture Hour. 5 Lab Hours.  
Theory and practice of visual communication employing digital and conventional media; development of artistic concepts, proposal development and related implementation techniques; introduction to digital painting, 3D modeling, animatics and post production.  
Prerequisites: VIST 206; upper level classification in visualization.*

VIST 310 Photography for Visualization  
Credits 3. 2 Lecture Hours. 3 Lab Hours.  
Advanced aesthetic and thematic control of the digital image; exposure refinement; advanced lighting techniques and digital compositing; digital work-flow; image conversion and control; color management; digital forensics; printing technology, processes and presentation.  
Prerequisites: Visualization major or approval of instructor; junior or senior classification.

VIST 370 Interactive Virtual Environments  
Credits 3. 3 Lecture Hours.  
Languages and techniques useful for the creation of real time virtual environments; definition of formal scene description structures; modeling and transformation techniques; simulation techniques; behaviors and message passing; user interaction and animation; multiuser environments; creating virtual interfaces; scripting techniques.  
Prerequisite: Visualization majors; junior or senior classification; VIST 271.

VIST 372 Creating Digital Environments  
Credits 3. 2 Lecture Hours. 2 Lab Hours.  
Terminology, principles and practices in the creation of 3D models; mathematical principles of geometrical modeling theory and application of modeling techniques; boolean operations; parametric modeling; modeling; particle systems; L-Systems; nurbs and/or grammar based techniques; lighting setup and control.  
Prerequisite: Visualization majors; junior or senior classification; VIST 271.

VIST 374 Multimedia Design and Development  
Credits 3. 2 Lecture Hours. 4 Lab Hours.  
Concepts and techniques for integrating multimedia with user control and interactivity; production of computer presentations and interactive mobile devices; computer animation, graphics, production and use of digital images; scripting techniques; projects for stand-alone computers and mobile devices.  
Prerequisite: Junior or senior classification or approval of instructor and undergraduate program coordinator.

VIST 375 Foundations of Visualization  
Credits 3. 3 Lecture Hours.  
A comprehensive introduction to visualization concepts, techniques and applications; major topic areas include cultural context, application areas, visual perception, the digital image, visual language, coordinate systems, geometric representation, modeling animation, image synthesis, image composing, ethics and the future of visualization.  
Prerequisites: MATH 152; VIST 271; junior or senior classification.

VIST 405 Visual Studies Studio III  
Credits 3. 1 Lecture Hour. 5 Lab Hours.  
Theory and practice in the art and science of the visual image; scientific and mathematical principles as process; information theory and sensorial design; interactivity and user integration; integration of real and virtual environments including lighting design and material definition.  
Prerequisites: VIST 305; CARC 301 or VIST 494.*

VIST 406 Visual Studies Studio IV  
Credits 3. 1 Lecture Hour. 5 Lab Hours.  
Theory and practice in the development of the digital image; non-traditional modeling methods; camera control and animation techniques; special effects; creative lighting methods; non-photorealistic rendering; integration of traditional and digital media in the creation of visual works.  
Prerequisites: VIST 305; CARC 301 or VIST 494.*

VIST 441 Scientific and Technological Developments in Visual Arts  
Credits 3. 3 Lecture Hours.  
Advanced level course focusing on the relationship between art, science and technology; visual arts before the digital revolution; the development of computer graphic arts.  
Prerequisite: Upper level classification or approval of the undergraduate program coordinator.

VIST 442 Digital Characters: Art, Technology, Uses and Meaning  
Credits 3. 3 Lecture Hours.  
Examination of the art and technology employed in the creation of digital characters; exploration of the reasons for, and impact of, their use in popular media and science; digital character creation techniques; estimating performance requirements; visual examples and written work used to illustrate topics and application areas.  
Prerequisite: Junior or senior classification.

VIST 455 Art, Culture and Time Based Media  
Credits 3. 2 Lecture Hours. 4 Lab Hours.  
Exploration of perception, vision and self-expression for communication through time based media; investigation of expression, vision, and visual language as a process; practice of visual communication strategies.  
Prerequisites: Junior or senior classification or approval of instructor.

VIST 470 Digital Rendering  
Credits 3. 3 Lecture Hours.  
Creation of photorealistic images; rendering techniques and control; perceptual and physical principles related to creating realistic images; lighting and environmental effects; properties of materials; rendering models and techniques for adding visual detail; shading languages.  
Prerequisite: Visualization majors; junior or senior classification; VIST 271.

VIST 472 Digital Compositing  
Credits 3. 3 Lecture Hours.  
History, mathematical foundations, techniques and applications used in combining two dimensional images for film, video and multimedia; includes theoretical foundations of the digital image, color spaces and corrections, matte techniques, keying, rotoscoping, camera and object tracking, stereo compositing and process workflow.  
Prerequisite: VIST 271, junior or senior classification.

VIST 474 Designing for the Web  
Credits 3. 2 Lecture Hours. 4 Lab Hours.  
Principles of web page and site creation; elements of visual design; typography for the web; web technologies; controlling the page real estate through cascading style sheets (CSS); imaging for the web; creation and use of color and graphics; web standards; building complete web sites.  
Prerequisite: Junior or senior classification or approval of instructor and undergraduate program coordinator.
VIST 484 Summer Internship
Credits 3. 3 Lecture Hours.
Practical experience in a visualization related company; 10-week internship with a minimum of 400 hours continuous employment; departmental pre-approval through the departmental internship coordinator required; post evaluation conducted following the internship. May not be repeated for credit.
Prerequisites: Upper level classification in visualization and approval of visualization intern coordinator.

VIST 485 Directed Studies
Credits 1 to 6. 1 to 6 Other Hours.
Special problems in visual studies. May be repeated for up to 9 credit hours.
Prerequisite: Approval of instructor and undergraduate program coordinator.

VIST 486 Introduction to Game Design
Credits 3. 3 Lecture Hours.
Computer game design; emphasis on interactive storytelling, game play and interface design; history of computer games, review of selected games; analysis of rules of play and simple game prototype development.
Prerequisite: Junior or senior classification.

VIST 487 Game Development
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Aesthetic and technical aspects of computer game development, including game mechanics, story development, content creation and game programming; includes game design, interface design, 3D modeling and animation, graphics algorithms, shader programming and artificial intelligence; group project includes the design and development of a game from start to finish.
Prerequisite: VIST 486 or CSCE 441 or approval of instructor; junior or senior classification.

VIST 489 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours. 0 to 4 Lab Hours.
Special Topics in... Selected topics in an identified field of visual studies. May be repeated for up to 9 credit hours.
Prerequisite: Approval of instructor and undergraduate program coordinator.

VIST 491 Research
Credits 1 to 4. 1 to 4 Other Hours.
Research conducted under the direction of faculty members in visualization; emphasis on visual studies. May be repeated 2 times for credit.
Prerequisites: Upper level classification; approval of instructor and undergraduate program coordinator.

VIST 494 Internship
Credits 6. 6 Other Hours.
Practical experience in a visualization related company; equivalent of 600 hours over at least 15 weeks; departmental pre-approval through the departmental internship coordinator required; post evaluation conducted following the internship. May not be repeated for credit.
Prerequisites: Upper level classification in visualization and approval of visualization intern coordinator.

VLCS-Vet Large Animal Clin Sc

Courses

VLCS 422 Equine Disease and Epidemiology
Credits 3. 3 Lecture Hours.
Principles and methods of epidemiology applied to equine health and prevention and control of selected equine infectious diseases.
Prerequisite: Enrollment in equine certificate and junior or senior classification, or approval of instructor.

VLCS 485 Directed Studies
Credits 0 to 4. 0 to 4 Other Hours.
Directed individual study of selected problems in biomedical sciences approved by instructor. May be repeated for credit.
Prerequisites: Senior classification in biomedical science and approval of department head.

VLCS 622 Equine Epidemiology and Infectious Diseases
Credits 3. 3 Lecture Hours.
Principles and methods of epidemiology applied to equine health and prevention and control of selected equine infectious diseases.
Prerequisites: Enrollment in equine certificate and graduate classification, or approval of instructor.

VLCS 681 Seminar
Credit 1. 1 Lecture Hour.
Oral communication of current research and selected topics in large animal veterinary medicine and clinical research methodology to include lectures, presentations, interviews, and discussions.
Prerequisite: Approval of instructor.

VLCS 685 Directed Studies
Credits 1 to 8. 1 to 8 Other Hours.
Original investigations of problems in the field of large animal surgery, therapeutics, preventive veterinary medicine or radiology. May be repeated for credit.
Prerequisites: Approval of instructor.

VLCS 930 Advanced Equine Medicine and Surgery
Credits 3. 3 Lecture Hours.
Advanced diagnostic techniques and management strategies for species specific disorders of horses.
Prerequisite: Enrollment in the third year of professional curriculum.

VLCS 931 Advanced Ruminant Medicine and Surgery
Credits 2. 2 Lecture Hours.
Advanced diagnostic techniques and management strategies for species specific disorders of ruminant species.
Prerequisite: Enrollment in the third year of professional curriculum.

VLCS 932 Advanced Ruminant Herd Health and Production
Credits 2. 2 Lecture Hours.
Principles needed to provide veterinary services to populations of ruminants including preventive health programs, record keeping and approaches to controlling herd/flock disease outbreak or production shortfalls.
Prerequisite: Third year veterinary student.

VLCS 940 Large Animal Clinics I
Credits 2. 35 Lab Hours.
Student participation with clinical cases in the large animal medicine services of the Veterinary Teaching Hospital. Must be taken two times.
Prerequisite: Fourth year classification in veterinary medicine or approval of department head.
Prerequisite: Therapeutics or Radiology.

Original investigations of problems in the field of small animal surgery. Repeated for credit.

**Prerequisite:** Fourth year classification.

**VLCS 945 Advanced Large Animal Clinical Elective**

Credits 2. 35 Lab Hours.

Student participation with clinical cases for advanced study in selected services from the large animal medicine, surgery, theriogenology, and field services of the Veterinary Teaching Hospital. May be taken 12 times.

**Prerequisite:** Fourth year classification.

**VLCS 948 Large Animal Medicine and Surgery Elective**

Credits 1 to 12. 1 to 12 Lecture Hours.

In-depth study of selected disease processes in the various disciplines of large animal medicine and surgery will be conducted emphasizing management, diagnostics, and medical or surgical treatment. May be repeated for credit.

**Prerequisite:** Third year classification in veterinary medicine or approval of department head.

**VLCS 953 Large Animal Clinical Skills**

Credit 1. 4 Lab Hours.

Acquisition of basic technical skills useful in the diagnosis and treatment of large animals in general veterinary practice. Modular one-month course.

**Prerequisite:** Third year classification in veterinary medicine in good standing.

**VLCS 954 Large Animal Medicine**

Credits 6. 5 Lecture Hours. 4 Lab Hours.

Medical disease of large animals; pathophysiology, diagnosis, and therapy of diseases in large animals.

**Prerequisite:** Third year classification in veterinary medicine in good standing.

**VLCS 956 Directed Studies**

Credits 1 to 4. 1 to 4 Other Hours.

Directed individual study of a selected problem in large animal medicine, surgery, or radiology. May be repeated for credit.

**Prerequisite:** Enrollment in veterinary medicine and approval of the department head.

**VSCS-Vet Small Animal Clin Sc**

**Courses**

**VSCS 485 Directed Studies**

Credits 0 to 4. 0 to 4 Other Hours.

Directed individual study of a selected problem in biomedical sciences approved by instructor. May be repeated for credit.

**Prerequisites:** Junior or senior classification and approval of department head and instructor.

**VSCS 681 Seminar**

Credit 1. 1 Other Hour.

Current scientific work in medical and surgical fields in and related to small animal medicine and surgery. May be repeated for credit.

**Prerequisite:** DVM degree or approval of department head.

**VSCS 685 Directed Studies**

Credits 1 to 8. 1 to 8 Other Hours.

Original investigations of problems in field of small animal surgery, therapeutics or radiology.

**Prerequisite:** DVM degree or approval of instructor and department head.

**VSCS 691 Research**

Credits 1 to 23. 1 to 23 Other Hours.

Research for thesis.

**VSCS 940 Small Animal Clinics I**

Credits 2. 35 Lab Hours.

Student participation with clinical cases in the small animal medicine services of the Veterinary Teaching Hospital. Must be taken two times.

**Prerequisite:** Fourth year classification in veterinary medicine or approval of department head.

**VSCS 941 Small Animal Clinics II**

Credits 2. 35 Lab Hours.

Student participation with clinical cases in the small animal medicine services of the Veterinary Teaching Hospital. Must be taken two times.

**Prerequisite:** VSCS 940 or approval of department head.

**VSCS 945 Advanced Small Animal Clinical Elective**

Credits 2. 35 Lab Hours.

Student participation with clinical cases for advanced study in the small animal medicine and surgery sections of the Veterinary Teaching Hospital. May be taken 12 times.

**Prerequisite:** VSCS 940 or approval of department head.

**VSCS 948 Small Animal Medicine and Surgery Elective**

Credits 1 to 12. 1 to 12 Lecture Hours.

In-depth study of selected disease processes in the various disciplines of small animal medicine and surgery will be conducted emphasizing management, diagnostics, and medical or surgical treatment. May be repeated for credit.

**Prerequisite:** Third year classification in veterinary medicine or approval of department head.

**VSCS 949 Small Animal Medicine II**

Credits 1 to 4. 1 to 4 Lecture Hours. 0 to 6 Lab Hours.

Continuation of Small Animal Medicine I; medical disease of dogs and cats; pathophysiology, diagnosis, and therapy of diseases prevalent in small animals.

**Prerequisite:** Third year classification in veterinary medicine in good standing.

**VSCS 953 Small Animal Clinical Skills**

Credit 1. 1 Lecture Hour.

Acquisition of basic technical skills useful in the diagnosis and treatment of small animals in general veterinary practice. Modular one-month course.

**Prerequisite:** Third year classification in veterinary medicine in good standing.

**VSCS 954 Small Animal Medicine I**

Credits 6. 5 Lecture Hours. 2 Lab Hours.

Medical disease of dogs and cats; pathophysiology, diagnosis, and therapy of diseases prevalent in small animals.

**Prerequisite:** Third year classification in veterinary medicine in good standing.

**VSCS 955 Small Animal Medicine II**

Credits 6. 6 Lecture Hours. 2 Lab Hours.

Continuation of Small Animal Medicine I; medical disease of dogs and cats; pathophysiology, diagnosis, and therapy of diseases prevalent in small animals.

**VSCS 985 Directed Studies**

Credits 1 to 4. 1 to 4 Other Hours.

Directed individual study of a selected problem in small animal medicine, surgery, or radiology. May be repeated for credit.

**Prerequisites:** Matriculation in veterinary professional curriculum and approval of department head.
VTPB - Veterinary Pathobiology

Courses

VTPB 212 Genetics in the News
Credits 3. 3 Lecture Hours.
Use of contemporary news articles from the popular press to delve into the science of genetics and genomics and their methodologies to gain a deeper understanding of how data is analyzed and interpreted leading to news headlines.
Prerequisites: Sophomore classification or approval of instructor; high school or college course in biology recommended.

VTPB 221 Great Diseases of the World
Credits 3. 3 Lecture Hours.
Great infectious and parasitic diseases; introduction to the major diseases affecting humans and other mammals including plague, tuberculosis, AIDS and malaria.
Prerequisite: Freshman or sophomore classification.

VTPB 285 Directed Studies
Credits 0 to 4. 0 to 4 Other Hours.
Directed individual study of selected problems in microbiology, parasitology, immunology, genetics or pathology as approved by instructor.
Prerequisites: Approval of department head; freshman or sophomore classification.

VTPB 289 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Selected topics in an identified area of veterinary pathobiology. May be repeated for credit.
Prerequisite: Freshman classification.

VTPB 301/WFSC 327 Wildlife Diseases
Credits 3. 3 Lecture Hours.
Basic mechanisms of diseases as they occur in wildlife populations; interplay of habitat requirements, individual physiological requirements and disease producing mechanisms of varied wildlife species.
Prerequisite: Junior classification or approval of department head.
Cross Listing: WFSC 327/VTPB 301.

VTPB 303 Medical Communication in the International Community
Credits 2. 2 Lecture Hours.
To develop an awareness that there is a culture associated with the practice of veterinary and human medicine in other countries.
Prerequisite: Junior or senior classification.

VTPB 334 Poultry Diseases
Credits 4. 3 Lecture Hours. 2 Lab Hours.
Poultry sanitation and diseases. Prevention and control of environmental, nutritional, parasitic and contagious diseases.
Prerequisites: BIOL 113 and BIOL 123; junior or senior classification.

VTPB 404 Amazon Field School
Credits 4. 4 Lecture Hours.
Investigation of social and ecological complexities of biodiversity conservation in tropical ecosystems; biological and social science approaches to evaluate causes, consequences and solutions to biodiversity loss through ecology, culture and governance.
Prerequisites: Junior or senior classification with a minimum GPA of 2.0 and approval of instructor.
Cross Listing: RPTS 454 and WFSC 454.

VTPB 405 Biomedical Microbiology
Credits 5. 3 Lecture Hours. 5 Lab Hours.
Fundamentals of bacteriology, mycology, virology, infectious diseases, immunology and identification of pathogenic microorganisms.
Prerequisite: Junior classification in a biological science.

VTPB 407 Advanced Veterinary Microbiology Laboratory
Credits 1 to 3. 1 to 4 Lab Hours.
Modular course (one credit per module) that covers immunological and molecular techniques used with bacteria, parasites and viruses in animals for diagnostic and identification purposes.
Prerequisites: VTPB 405. VTPB 409 and VTPB 438 or concurrent enrollment; junior or senior classification.

VTPB 408 Clinical Microbiology
Credits 4. 2 Lecture Hours. 5 Lab Hours.
Practical application of clinical bacteriology and mycology; laboratory identification of pathogenic organisms.
Prerequisites: VTPB 405; junior or senior classification.

VTPB 409 Introduction to Immunology
Credits 3. 3 Lecture Hours.
Diverse concepts relative to immunologic mechanisms inherent to domestic and laboratory animals.
Prerequisite: Advanced classification.

VTPB 410 Cell Mechanisms of Disease
Credits 3. 3 Lecture Hours.
Mechanisms, morphologic manifestations and clinical signs of disease processes at the cellular level.
Prerequisites: VTPP 423 or registration therein; junior or senior classification.

VTPB 412 Techniques of Clinical Pathology
Credits 4. 3 Lecture Hours. 3 Lab Hours.
Theory and pathophysiologic principles underlying laboratory evaluation of disease states; principles of analytical methods with applications in the contemporary biomedical laboratory considered, using selected hematology and clinical chemistry techniques as examples.
Prerequisites: CHEM 228 and CHEM 238; VTPP 423; senior classification in biomedical science or approval of instructor.

VTPB 415 Immunogenetics and Comparative Immunology
Credits 3. 3 Lecture Hours.
Genetic mechanisms used to diversify immune receptors; immunoglobulins, T cell receptors, major histocompatibility complex, natural killer cell receptors, toll-like receptors and many others; selected comparative and veterinary examples of different immune recognition systems; evolution of the immune system.
Prerequisites: Junior or senior classification, GENE 320/BIMS 320 and VTPB 409 or approval of instructor.

VTPB 421 Bacterial Diseases of Humans and Animals
Credits 3. 3 Lecture Hours.
Pathogenesis of selected bacterial pathogens of humans and animals; bacterial virulence factors, host immune responses; current concepts of extracellular, facultative intracellular and obligate intracellular bacterial diseases.
Prerequisites: VTPB 405 and VTPB 409; junior or senior classification.

VTPB 438 Biomedical Virology
Credits 3. 3 Lecture Hours.
Fundamental study of nature and characteristics of human and animal viruses; classification, morphology, chemical structure, ability to cause disease and nature of resulting disease.
Prerequisite: 3 hours of microbiology or approval of instructor.
VTPB 452 Clinical Veterinary Mycology  
**Credits 3. 2 Lecture Hours. 2 Lab Hours.**  
Practical application of clinical mycology; laboratory identification of important fungal and actinomycotic organisms.  
**Prerequisites:** Junior or senior classification; VTPB 405 or approval of instructor.

VTPB 454/MARB 454 Ornamental Fish Health Management  
**Credits 3. 3 Lecture Hours.**  
Maintenance and health care of ornamental fish in closed recirculating systems; aquariology, anatomy and physiology, nutrition, immunology, infectious and noninfectious diseases, checklists, quarantine procedures and health maintenance of ornamental fish.  
**Prerequisites:** VTPB 405 or BIOL 351; BICH 410 or MARS 360; junior or senior classification.  
**Cross Listing:** MARB 454.

VTPB 485 Directed Studies  
**Credits 0 to 4. 0 to 4 Other Hours.**  
Directed individual study of selected problems in microbiology, parasitology, immunology, genetics or pathology as approved by instructor.  
**Prerequisites:** Approval of department head; junior or senior classification.

VTPB 487/BIOL 487 Biomedical Parasitology  
**Credits 4. 3 Lecture Hours. 2 Lab Hours.**  
Helminth and protozoan parasites of medical and veterinary importance; life cycles, morphology, taxonomic classification, economic and public health aspects and current topics in parasitic diseases.  
**Prerequisites:** BIOL 107 or BIOL 114; junior classification or approval of instructor.  
**Cross Listing:** BIOL 487/VTPB 487.

VTPB 489 Special Topics in...  
**Credits 1 to 4. 1 to 4 Lecture Hours. 0 to 4 Lab Hours.**  
Selected topics in an identified area of microbiology, pathology, genetics, immunology, parasitology, or physiological chemistry. May be repeated for credit.  
**Prerequisites:** Junior or senior classification and approval of department head.

VTPB 910 Veterinary Immunology  
**Credits 2. 2 Lecture Hours.**  
Introduction to veterinary immunology; mechanisms of resistance of infectious diseases and tumors; tissue injury caused by the immune system, including hypersensitivitiy reactions and autoimmunity; immunization theory and practices; immunologic methods for diagnosis of disease.  
**Prerequisite:** Enrollment in the first year of professional curriculum.

VTPB 911 Veterinary Microbiology  
**Credits 4. 3 Lecture Hours. 2 Lab Hours.**  
Introduction to veterinary microbiology; bacterial, viral, and mycotic agents of veterinary significance; mechanisms of host injury by pathogenic microorganisms; principles of disinfection, antisepsis, and sterilization; classes and mechanisms of mechanisms of action of antibacterial, antifungal, and antiviral drugs; diagnostic procedures and methods of sample collection.  
**Prerequisite:** Enrollment in the first year of professional curriculum.

VTPB 913 Infectious Diseases  
**Credits 2. 2 Lecture Hours.**  
Case-based approach to infectious diseases of animals; includes infectious diseases of major body systems; etiologic agents include viruses, bacteria, fungi, protozoa, helminths, and arthropods; differential diagnosis of infectious agents, diagnostic approaches, prevention, and treatment emphasized; management practices to control infectious diseases covered by host species.  
**Prerequisite:** Enrollment in second year of the professional curriculum.

VTPB 920 Parasitology  
**Credits 5. 3 Lecture Hours. 4 Lab Hours.**  
Taxonomy, biological and clinical aspects of the commonly occurring helminth, protozoan and arthropod parasites of domestic and laboratory animals. Signs, pathogenesis, diagnosis, treatment, prevention, and control, public health and economic importance of parasitic diseases.  
**Prerequisite:** Enrollment in the second year of professional curriculum.

VTPB 922 Pathology I  
**Credits 6. 5 Lecture Hours. 2 Lab Hours.**  
Structural and functional changes in cells, tissues and organ systems of animals; pathogenesis, mechanisms and morphologic features of diseases and their relationship to clinical signs; laboratory consists of studies of gross and microscopic pathology.  
**Prerequisite:** Enrollment in the second year of professional curriculum.

VTPB 923 Pathology II  
**Credits 6. 5 Lecture Hours. 2 Lab Hours.**  
Pathogenesis, mechanisms, laboratory analysis and structural features of animal diseases; structural and functional changes in cells, tissues, body fluids and organ systems that cause or are caused by disease. Laboratory consists of studies in gross and microscopic pathology, cytology and laboratory analysis of body fluids and tissues.  
**Prerequisite:** Enrollment in the second year of professional curriculum.

VTPB 940 Diagnostics  
**Credits 2. 35 Lab Hours.**  
Student group participation on a rotating schedule in applied clinical activities in the area of diagnostic medicine including clinical pathology, necropsy, microbiology, parasitology, and serology.  
**Prerequisite:** Enrollment in the fourth year professional curriculum.

VTPB 941 Clinical Microbiology and Parasitology I  
**Credits 2. 35 Lab Hours.**  
Clinical rotation in microbiology and parasitology with emphasis on performance and interpretation of diagnostic procedures.  
**Prerequisite:** Enrollment in the fourth year of professional curriculum.

VTPB 948 Didactic Elective  
**Credits 1 to 12. 1 to 12 Lecture Hours.**  
Elective course in veterinary microbiology, pathology, genetics, immunology or parasitology for professional students who wish to supplement required curriculum. May be repeated for credit.  
**Prerequisite:** Enrollment in the third year of professional curriculum.

VTPB 985 Directed Studies  
**Credits 1 to 4. 1 to 4 Other Hours.**  
Problems in various subdisciplines.  
**Prerequisite:** Approval of instructor.

VTPB 989 Special Topics in...  
**Credits 1 to 4. 1 to 4 Lecture Hours.**  
Selected topics in an identified area of microbiology, pathology, genetics, immunology or parasitology. May be repeated for credit.  
**Prerequisite:** Approval of department head.
VTPP - Vet Physiology & Pharm

Courses

VTPP 123 Foundations of Physiology
Credits 3. 3 Lecture Hours.
Introduction to fundamental concepts in physiology and the practice of physiology research through exploration of mathematical models used in physiology research; emphasis on prediction of complex adaptive behavior in health and disease from elementary math, physics, chemistry and biology.

Prerequisites: Seminar presentations.

VTPP 223 Design of Experiments for Physiology Research
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Team or group formulation and refinement of novel hypotheses and design of controlled in vitro experiments; emphasis on production of publishable research in physiology.
Prerequisite: VTPP 123 or approval of instructor.

VTPP 224 In Vitro Experimentation in Physiology Research
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Team or group collection, analysis and interpretation of data from in vitro experiments; emphasis on production of publishable research in physiology.
Prerequisite: VTPP 223 or approval of instructor.

VTPP 234 Design of Models for Physiology Research
Credits 3. 3 Lecture Hours.
Team or group design of novel models of physiological systems to predict homeostatic behavior arising from the interaction of subsystems; emphasis on production and formal presentation of basic research in physiology.
Prerequisite: VTPP 123 or approval of instructor.

VTPP 235 Analysis and Validation of Models for Physiology Research
Credits 3. 3 Lecture Hours.
Team or group analysis and validation of models of physiological systems to explain disease states and design potential clinical interventions; emphasis on production of publishable applied research in physiology.
Prerequisite: VTPP 234 or approval of instructor.

VTPP 281 Seminar
Credits 4. 4 Other Hours.
Exposure to scientists from a variety of biomedical disciplines through attendance at seminars followed by review and discussion of current scientific work in physiology and related subjects, and subsequent student seminar presentations.
Prerequisites: Freshman or sophomore classification; approval of instructor.

VTPP 285 Directed Studies
Credits 0 to 4. 0 to 4 Other Hours.
Course for freshman and sophomore students who desire additional laboratory work in physiology to supplement required courses.
Prerequisites: Freshman or sophomore classification; approval of department head.

VTPP 289 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours. 0 to 4 Lab Hours.
Selected topics in an identified area of veterinary physiology and pharmacology. May be repeated for credit.

VTPP 291 Research
Credits 0 to 4. 0 to 4 Other Hours.
Laboratory and/or field research supervised by a faculty member
Prerequisites: Freshman or sophomore classification; approval of instructor.

VTPP 323 Physiology of Domestic Animals
Credits 3. 3 Lecture Hours.
Physiology essential to understanding of life processes. For students in agriculture and related fields.
Prerequisite: Junior classification.

VTPP 401 History of Human and Veterinary Medicine in Europe
Credits 4. 4 Lecture Hours.
Addresses the major developments in human and veterinary medicine in Europe from the Middle Ages to the present; explores key events and figures in medical history and analyzes issues of current biomedical concern in an historical context; for example, animal rights, ethics of human experimentation, euthanasia.

VTPP 423 Biomedical Physiology I
Credits 4. 3 Lecture Hours. 2 Lab Hours.
Physiological principles, review of cellular physiology, and development of an understanding of the nervous system and muscle, cardiovascular, and respiratory physiology; clinical applications related to organ systems.
Prerequisites: VIBS 305; junior or senior classification.

VTPP 424/VIBS 424 Biomedical Neuroendocrinology and Endocrine Disorders
Credits 3. 3 Lecture Hours.
Neuroendocrine (hypothalamus-pituitary) control of puberty, menstruation, ovulation, pregnancy, labor, lactation, female reproductive cycles; male reproductive functions, thyroid and parathyroid, adrenal and kidney, diabetes, obesity, sleep, memory, learning and aging and their endocrine disorders; overview on biosynthesis, transport and signaling of peptide and neuropeptide hormones, steroids and prostaglandins.
Prerequisites: Honors, junior or senior classification, or approval of instructor.
Cross Listing: VIBS 424/VTPP 424.

VTPP 425 Pharmacology
Credits 3. 3 Lecture Hours.
Introduction to pharmacokinetics and pharmacodynamics; survey of major pharmaceutical classes; uses, mechanisms of action and adverse reactions of selected agents.
Prerequisites: VTPP 423 or approval of instructor; junior or senior classification.

VTPP 427 Biomedical Physiology II
Credits 3. 3 Lecture Hours.
Continuation of VTPP 423. Fluid balance and acid-base balance; development of an understanding of renal, gastrointestinal, endocrine and reproductive physiology using human and other mammalian models; clinical applications related to organ systems.
Prerequisites: VTPP 423; junior or senior classification.

VTPP 429 Introduction to Toxicology
Credits 3. 3 Lecture Hours.
An overview of toxicology with emphasis on environmental, human and animal health issues.
Prerequisite: Junior or senior classification.

VTPP 434 Physiology for Bioengineers I
Credits 4. 3 Lecture Hours. 1 Lab Hour.
Cellular anatomy, cellular physiology and biochemistry; systems analysis of digestive, endocrine and musculoskeletal system function including information related to gross anatomy, histology and disease states; quantitative aspects of physiology and engineering applications to clinical medicine.
Prerequisites: Junior or senior classification; biomedical engineering major or approval of instructor.
VTTP 435 Physiology for Bioengineers II
Credits 4.3 Lecture Hours. 1 Lab Hour.
A systems analysis of nervous, cardiovascular, respiratory and urinary function including information related to gross anatomy, histology and disease states; quantitative aspects of physiology and engineering applications to clinical medicine.
Prerequisites: VTTP 434; junior or senior classification.

VTTP 438 Analysis of Genomic Signals
Credits 3.2 Lecture Hours. 2 Lab Hours.
Overview of current high throughput technology for data acquisition and analysis of genomic signals (e.g. mRNA or proteins); emphasis on the microarray technology, methods for analyzing microarray data, and approaches to model the underlying phenomena from the systems biology perspective.
Prerequisites: Junior or senior classification; BIMS 320/GENE 320 or GENE 320/BIMS 320 and BIOL 111, BIOL 112 or BIOL 213 or equivalent; STAT 302 or equivalent.

VTTP 439 Non-Coding RNA's
Credits 3.3 Lecture Hours.
Advanced topics in noncoding RNA's in gene regulation; investigation of the role of noncoding RNAs and epigenetic regulatory factors in modulating gene expression, physiological functions and disease development.
Prerequisite: Junior or senior classification or approval of instructor.

VTTP 444 Practicum in Biomedical Research
Credits 3.3 Other Hours.
Team or group development of sustainable collaborations that include biomedical research, high-impact educational practices and community service; focus on connecting research experience to future career goals.
Prerequisites: VTTP 423 and VTTP 427 or VTTP 434 and VTTP 435; junior or senior classification.

VTTP 450 Stem Cell Physiology
Credits 3.3 Lecture Hours.
Advanced topics in stem cell biology; exploration of mammalian stem cells, stem cell characteristics, cell differentiation potency, molecular basis of stem cell signaling, regulatory pathways, research tools and experimental models.
Prerequisite: Junior or senior classification or approval of instructor.

VTTP 452 Fetal and Embryo Physiology
Credits 3.3 Lecture Hours.
Introduction to the physiologic processes driving embryonic development and pregnancy; focus on embryo implantation, establishment of the placenta, development of the fetal circulatory systems and the molecular processes governing embryo differentiation and development; special emphasis on the major organ systems affected by pediatric disease and on the actions of teratogens.
Prerequisite: BICH 410 or equivalent, or approval of instructor.

VTTP 481 Seminar
Credits 4.4 Other Hours.
Exposure to scientists from a variety of biomedical disciplines through attendance at seminars followed by review and discussion of current scientific work in physiology and related subjects, and subsequent student seminar presentations.
Prerequisites: Junior or senior classification; approval of instructor.

VTTP 485 Directed Studies
Credits 0 to 4.0 to 4 Other Hours.
Course for junior and senior students who desire additional laboratory work in physiology to supplement required courses.
Prerequisites: Junior or senior classification and approval of department head.

VTTP 489 Special Topics in...
Credits 1 to 4.1 to 4 Lecture Hours. 0 to 4 Lab Hours.
Selected topics in an identified area of physiology, pharmacology, endocrinology or toxicology. May be repeated for credit.
Prerequisite: Junior or senior classification.

VTTP 491 Research
Credits 0 to 4.0 to 4 Other Hours.
Laboratory and/or field research supervised by a faculty member.
Prerequisites: Junior or senior classification; approval of instructor.

VTTP 605 Systemic Veterinary Physiology I
Credits 5.5 Lecture Hours.
Aspects of cellular physiology, physiology of excitable membranes, physiology of body fluids, neurophysiology, and the physiology of smooth, cardiac and skeletal muscle; provides a basic understanding of mammalian physiology essential as a framework for advanced graduate studies.
Prerequisite: Graduate classification.

VTTP 606 Systemic Veterinary Physiology II
Credits 5.5 Lecture Hours.
In-depth study covering cardiovascular, respiratory, renal physiology, gastrointestinal and endocrine physiology; provides a basic understanding of mammalian physiology essential as a framework for advanced graduate studies.
Prerequisite: VTTP 605.

VTTP 610 Physiology I
Credits 6.5 Lecture Hours. 2 Lab Hours.
Introduction to physiology: cell physiology, cell signaling, cell cycle, body fluids, translocation of materials, membrane potentials, neurophysiology, autonomic nervous system, thermoregulation, cardiovascular, and muscle physiology.
Prerequisites: Enrollment in MS/PhD program in Veterinary Physiology and Pharmacology; approval of instructor.

VTTP 612 Physiology II
Credits 6.5 Lecture Hours. 2 Lab Hours.
Blood and lymph, respiration, renal physiology, and acid-based balance, gastrointestinal physiology, metabolism, endocrinology, and reproduction.
Prerequisites: Enrollment in MS/PhD program in Veterinary Physiology and Pharmacology; approval of instructor.

VTTP 623 Biomedical Physiology I
Credits 4.3 Lecture Hours. 2 Lab Hours.
Physiological principles, review of cellular physiology, and development of an understanding of the nervous system and muscle, cardiovascular, and respiratory physiology; clinical applications related to organ systems.
Prerequisites: Graduate classification; BICH 410 and VIBS 305 recommended.
VTTP 624/VIBS 624 Endocrinology
Credits 4. 3 Lecture Hours. 3 Lab Hours.
Neuroendocrine control of puberty; menstruation, ovulation; pregnancy, labor, lactation; female reproductive cycles, male reproductive functions, thyroid and parathyroid, adrenal and kidney; diabetes, obesity, sleep, memory, learning and aging, and their endocrine disorders; overview on biosynthesis, transport and signaling of peptide and neuropeptide hormones, steroids and prostaglandins.
Prerequisite: Graduate classification.
Cross Listing: VIBS 624.

VTTP 625 Pharmacology
Credits 3. 3 Lecture Hours.
Introduction to pharmacokinetics and pharmacodynamics; survey of major pharmaceutical classes; uses, mechanisms of action and adverse reactions of selected agents.
Prerequisites: Graduate classification; VTTP 423 or approval of instructor.

VTTP 627 Biomedical Physiology II
Credits 3. 3 Lecture Hours.
Continuation of VTTP 623 Fluid balance and acid-base balance; development of an understanding of renal, gastrointestinal, endocrine and reproductive physiology using human and other mammalian models; clinical applications related to organ systems.
Prerequisites: Graduate classification; VTTP 623.

VTTP 628 Pharmacology I
Credits 5. 4 Lecture Hours. 2 Lab Hours.
Pharmacokinetics, pharmacodynamics, CNS pharmacology, autonomic pharmacology, antineoplastic agents, immunopharmacology, recombinant products, fluid and electrolyte therapy, diuretics, pharmacology of the integument.
Prerequisite: Approval of instructor.

VTTP 629 Pharmacology II
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Antimicrobials, endocrine pharmacology, eicosanoids, anti-inflammatory agents, respiratory pharmacology, anticoagulants and hematinics, GI pharmacology, cardiovascular pharmacology.
Prerequisite: Approval of instructor.

VTTP 630 Pharmacology/Toxicology
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Management and treatment of toxicosis, antidotal pharmacology, toxic plants, mycotoxins, chemical toxicants, metals, euthanasia.
Prerequisite: Approval of instructor.

VTTP 634 Physiology for Bioengineers I
Credits 4. 3 Lecture Hours. 3 Lab Hours.
Cellular anatomy, cellular physiology and biochemistry; systems analysis of digestive, endocrine and musculoskeletal system function including information related to gross anatomy, histology and disease states; quantitative aspects of physiology and engineering applications to clinical medicine.
Prerequisite: Biomedical Engineering major or approval of instructor.

VTTP 635 Physiology for Bioengineers II
Credits 4. 3 Lecture Hours. 3 Lab Hours.
A systems analysis of nervous, cardiovascular, respiratory and urinary function including information related to gross anatomy, histology and disease states; quantitative aspects of physiology and engineering applications to clinical medicine.
Prerequisite: VTTP 634.

VTTP 638 Analysis of Genomic Signals
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Overview of current high throughput technology for data acquisition and analysis of genomic signals (e.g., mRNA or proteins); emphasis on microarray technology, methods for analyzing microarray data, and approaches to model the underlying phenomena from the systems biology perspective.
Prerequisites: BIOL 451 or GEN 320/BIMS 320/BIMS 320/GEN 320 or equivalent; STAT 651 or equivalent; or approval of instructor.

VTTP 639 Non-Coding RNAs
Credits 3. 3 Lecture Hours.
Roles of non-coding RNAs in regulating gene expression for physiological functions, development and diseases; includes a brief history of the field, various categories and definitions of non-coding RNAs, research methodologies and animal models, and break-through advances in clinical applications.
Prerequisite: Approval of instructor.

VTTP 650 Stem Cell Biology
Credits 3. 3 Lecture Hours.
Wide-range of topics related to stem cells and tissue engineering, including a brief history of the field, various categories and definitions of stem cells, research methodologies and animal models, as well as break-through advances in the area of engineered stem cells.
Prerequisite: Approval of instructor.

VTTP 651 Epigenetics & Systems Physiology
Credits 3. 3 Lecture Hours.
Epigenetics & Systems Physiology. Journal club format focusing on epigenetic regulation of physiological systems; assignment of papers from primary literature and weekly oral presentations detailing opinions on research; emphasis on fundamental concepts in epigenetics, physiology and the molecular techniques employed to address research hypotheses, discussions of scientific ethics and fraud.
Prerequisite: Graduate classification.

VTTP 652 Fetal and Embryo Physiology
Credits 3. 3 Lecture Hours.
Introduction to the physiologic processes driving embryonic development and pregnancy; focus on embryo implantation, establishment of the placenta, development of the fetal circulatory systems and the molecular processes governing embryo differentiation and development; special emphasis on the major organ systems affected by pediatric disease and on the actions of teratogens.
Prerequisites: Graduate classification.

VTTP 653 Endocrinology
Credits 4. 3 Lecture Hours. 3 Lab Hours.
Physiology, biochemistry and pharmacology of the endocrines. Laboratory emphasizes a number of classical experiments with clinical application.
Prerequisite: Approval of instructor.

VTTP 654 Molecular Endocrinology
Credits 3. 3 Lecture Hours.
Structure-function relationships of hormones, their receptors and biologic activities.
Prerequisites: VTTP 653 or BIOL 649 and BICH 410 or equivalent approval of instructor.
Prerequisite: Evaluation, and communication of rationales to other scientists.

VTTP 655 Vascular Physiology
Credits 4.4 Lecture Hours.
Structure and function of blood vessels and vascular beds; molecular and cell biology of endothelium and vascular smooth muscle; microcirculation; capillary exchange; regulation of blood flow by local, neural and humoral signals.
Prerequisite: MPHY 901 or approval of department head.

VTTP 656 Physiology of the Heart
Credits 4.4 Lecture Hours.
Structure and function of the heart; molecular and cell biology of cardiac myocytes; electrophysiology of myocardium, pacemaker cells and conducting tissue; cardiac mechanics; control of cardiac performance; coronary circulation.
Prerequisite: MPHY 901 or MPHY 604 or approval of department head.

VTTP 657 Cardiovascular Physiology
Credits 4.3 Lecture Hours. 3 Lab Hours.
Physiological considerations of the circulatory system including general and integrative aspects of the heart and blood vessels.
Prerequisites: Approval of instructor.

VTTP 659 Gamete and Embryo Physiology
Credits 3.2 Lecture Hours. 2 Lab Hours.
Physiology of gametes and preimplantation embryos in livestock and laboratory animals; oocyte growth and maturation in-vivo and in-vitro, fertilization in-vivo and in-vitro, embryo transfer, cryopreservation, nuclear transfer, chimera formation, gene transfer.

VTTP 667 Current Topics in Pharmacology
Credits 3.3 Lecture Hours.
Discussions of literature regarding topics of current research interest; physiochemical or physiologic effects of drugs at sites from molecular to whole body.
Prerequisite: Approval of instructor.

VTTP 673 Metabolic and Detoxication Mechanisms
Credits 3.3 Lecture Hours.
Fate of foreign compounds; their inhibitory and antagonistic action toward normal metabolic processes of the animal body.
Prerequisites: BICH 603; approval of instructor and department head.

VTTP 675 Industrial and Environmental Toxicology
Credits 3.3 Lecture Hours.
Fundamentals of toxicology and risk assessment; effects of selected classes of hazardous chemicals encountered in the workplace or environment on human health will be considered.
Prerequisite: Approval of instructor.

VTTP 676 Genetic and Molecular Toxicology
Credits 3.3 Lecture Hours.
Mechanisms of toxicant-induced target organ toxicity with emphasis on molecular control of mammalian and cell growth differentiation.
Prerequisite: Graduate course in cell biology and biochemistry.

VTTP 677 Fluorescence Detection: Steady State, Time Resolved and Imaging
Credits 4.4 Lecture Hours.
Fluorescence spectroscopy and confocal/multiphoton microscopy in research; intro of pharmacology, life science, and physical science students to fluorophores, anisotropy, ligand binding, energy transfer, cytometry, lifetime imaging, correlation spectroscopy, immunocytochemistry, and image analysis with an emphasis on instrumental/sample artifacts, fluorescence application, literature evaluation, and communication of rationales to other scientists.
Prerequisite: General chemistry and biology course.

VTTP 681 Seminar
Credit 1.1 Lecture Hour.
Review and discussion of current scientific work in physiology and related subjects.
Prerequisite: Approval of department head.

VTTP 685 Directed Studies
Credits 1 to 4. 1 to 4 Other Hours.
Problems in physiology, pharmacology or toxicology.
Prerequisite: Approval of instructor.

VTTP 689 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours. 0 to 4 Lab Hours.
Selected topics in an identified area of veterinary physiology and pharmacology. May be repeated for credit.
Prerequisite: Approval of instructor.

VTTP 690 Theory of Research
Credits 3.3 Lecture Hours.
Theory and design of research related to current biomedical problems especially those involving study of animal disease; philosophical perspectives underlying historical advances in research pertaining to the study, prevention and treatment of disease.
Prerequisite: Graduate classification.
Cross Listing: VIBS 690 and VPAT 690.

VTTP 691 Research
Credits 1 to 23. 1 to 23 Other Hours.
Original investigations in veterinary physiology, pharmacology or toxicology to be submitted by writing of thesis or dissertation as partial fulfillment for MS or PhD degree.
Prerequisite: Approval of department head.

VTTP 910 Physiology I
Credits 6.5 Lecture Hours. 2 Lab Hours.
Introduction to physiology: cell physiology, cell signaling, cell cycle, body fluids, translocation of materials, membrane potentials, neurophysiology, autonomic nervous system, thermoregulation, cardiovascular, and muscle physiology.
Prerequisite: Enrollment in first year of professional curriculum.

VTTP 912 Physiology II
Credits 6.5 Lecture Hours. 2 Lab Hours.
Blood and lymph, respiration, renal physiology, and acid-base balance, gastrointestinal physiology, metabolism, endocrinology, and reproduction.
Prerequisite: Enrollment in the first year of professional curriculum.

VTTP 924 Pharmacology/Toxicology I
Credits 5.4 Lecture Hours. 2 Lab Hours.
Pharmacokinetics, pharmacodynamics, CNS pharmacology, autonomic pharmacology, antineoplastic agents, immunopharmacology, recombinant products, fluid and electrolyte therapy, diuretics, pharmacology of the integument.
Prerequisite: Enrollment in the second year of professional curriculum.

VTTP 925 Pharmacology/Toxicology II
Credits 3.5 Lecture Hours. 2 Lab Hours.
Antimicrobials, endocrine pharmacology, eicosanoids, antiinflammatory agents, respiratory pharmacology, anticoagulants and hematinics, GI pharmacology, cardiovascular pharmacology.
Prerequisite: Enrollment in the second year of professional curriculum.
VTTP 926 Pharmacology/Toxicology III
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Management and treatment of toxicooses, antidotal pharmacology, toxic plants, mycotoxins and mycotoxicoses, chemical toxicants, metals, euthanasia.
Prerequisite: Enrollment in the second year of professional curriculum.
VTTP 948 Didactic Elective in Veterinary Physiology and Pharmacology
Credits 1 to 12. 1 to 12 Lecture Hours.
Elective course in physiology and pharmacology for professional students who wish to supplement required curriculum. May be repeated for credit.
Prerequisite: Enrollment in the fourth year of professional curriculum.
VTTP 985 Directed Studies
Credits 1 to 4. 1 to 4 Other Hours.
Directed, individual study of selected problems in physiology, pharmacology or toxicology. May be repeated for credit.
Prerequisite: Approval of instructor and department head.

WFSC-Wildlife & Fisheries Sci

Courses

WFSC 101 Introduction to Wildlife and Fisheries
Credit 1. 1 Lecture Hour.
Introduction to the wildlife and fisheries profession and to alternatives for study in the department.
Prerequisite: Open only to students with less than 36 hours at Texas A&M University. Registration through the Department of Wildlife and Fisheries Sciences only.
WFSC 291 Research
Credits 1 to 4. 1 to 4 Other Hours.
Research conducted under the direction of faculty member in wildlife and fisheries sciences. May be repeated 3 times for credit.
Prerequisites: Freshman or sophomore classification and approval of instructor.
WFSC 300/ENTO 300 Field Studies
Credits 3. 3 Other Hours.
Integration of principles of animal and plant ecology with environmental factors to characterize wildlife populations. Intensive analysis of specific areas will emphasize either the development of a wildlife management plan or a general vertebrate natural history survey.
Prerequisite: Prior approval of instructor.
Cross Listing: ENTO 300/WFSC 300.*
WFSC 301 Wildlife and the Changing Environment
Credits 3. 3 Lecture Hours.
Using an ecosystem approach, analyzes changes in the North American environment; effects of these changes on wildlife populations; and reviews areas of major, current concern.
Prerequisites: Junior or senior classification; restricted to non-majors.
WFSC 302 Natural History of the Vertebrates
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Introduction to life histories of fishes, amphibians, reptiles, birds and mammals; lecture covers vertebrate groups on a worldwide scale and emphasizes a comparative approach to the study of adaptation to the environment; lecture topics include behavior, reproduction, feeding specializations, evolutionary history, locomotion, hibernation, migration, endangered species, zoogeography and importance to man; laboratory emphasizes the recognition of Texas vertebrates. Designed for both science and non-science majors.
Prerequisites: BIOL 111 and BIOL 112 or BIOL 101 and BIOL 107 or equivalent.*
WFSC 303 Fish and Wildlife Laws and Administration
Credits 3. 3 Lecture Hours.
Review and analysis of state and federal laws and international treaties and conventions affecting fish and wildlife; their application and administration; organizational structure of state, federal and international agencies; their objectives, policies and practices.
Prerequisite: RENR 205 or BIOL 357; junior classification. Prerequisite: Junior classification.
WFSC 304 Wildlife and Fisheries Conservation
Credits 3. 3 Lecture Hours.
Ecological principles used to conserve and manage wildlife and fisheries resources at the individual, population and community levels; topics include conservation biology, species interactions, animal-habitat relationships, population dynamics and harvesting, habitat management and restoration and human dimensions of fish and wildlife conservation.
Prerequisites: RENR 205 and junior or senior classification or approval of instructor.*
WFSC 311 Ichthyology
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Introduction to the study of fishes, their biology, classification, evolution, distribution, ecology and economic importance.
Prerequisite: WFSC 302 or BIOL 318.*
WFSC 315 Herpetology
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Evolutionary ecology of reptiles and amphibians and conservation biology of the major groups; labs concentrate on the global diversity of herps and the herpetofauna of Texas; foundation for students in wildlife science and biology.
Prerequisites: WFSC 302 or approval of instructor; WFSC 302 or BIOL 318.*
WFSC 316 Field Herpetology
Credits 3. 3 Lecture Hours.
Field work involving collection and preservation of herpetological specimens; natural history, ecological relations. Available for students enrolled in WFSC 315 who would like to have field trips.
Prerequisite: WFSC 315 or registration therein.*
WFSC 327/VTPB 301 Wildlife Diseases
Credits 3. 3 Lecture Hours.
Basic mechanisms of diseases as they occur in wildlife populations; interplay of habitat requirements, individual physiological requirements and disease producing mechanisms of varied wildlife species.
Prerequisite: Junior classification or approval of department head.
Cross Listing: VTPB 301/WFSC 327.*
WFSC 335 Natural History of the Invertebrates  
Credits 4. 3 Lecture Hours. 3 Lab Hours.  
A phylogenetic survey of the invertebrate phyla including their taxonomy, morphology, life histories, ecology, ethology and zoogeography. Field trips may be required for which departmental fees may be assessed to cover costs.

WFSC 401 General Mammalogy  
Credits 3. 2 Lecture Hours. 3 Lab Hours.  
Mammalian biology; evolution, classification, biogeography, reproduction, physiology, ecology, and behavior; focuses on basic concepts necessary for a foundation in both wildlife science and biology.  
Prerequisites: WFSC 302 or BIOL 318; junior classification.*

WFSC 402 General Ornithology  
Credits 3. 2 Lecture Hours. 3 Lab Hours.  
Introduction to study of birds, their structure, classification, geographic distribution, ecological relations and economic status; foundation of wildlife science, also for museum work.  
Prerequisites: WFSC 302 or BIOL 318; junior classification.*

WFSC 403 Animal Ecology  
Credits 3. 2 Lecture Hours. 3 Lab Hours.  
Concepts of animal ecology which emerge at various levels of organization; the ecosystem, the community, the population and the individual; laboratories emphasis on the quantitative analysis of field data and the simulation of population dynamics.  
Prerequisites: WFSC 201 and RENR 205 or approval of instructor; junior classification.*

WFSC 404 Aquatic Ecosystems  
Credits 3. 3 Lecture Hours.  
Inland and coastal zone aquatic ecosystems, lower foodweb structure, functioning and influence on living resources; lakes, rivers, estuaries, open bay systems, factors impacting ecosystem health and fisheries; harmful algal blooms, reduced water inflows, eutrophication and hypoxia formation as they affect foodwebs, recruitment of commercially and recreationally important fisheries.  
Prerequisite: Junior or senior classification or approval of instructor.

WFSC 405 Urban Wildlife and Fisheries  
Credits 3. 3 Lecture Hours.  
Urban wildlife and fisheries trains students to establish and maintain diverse, self-sustaining urban wildlife and fish populations at levels in harmony with ecological, social, and economic values of the human community and to develop optimal levels of public appreciation and use of urban wildlife and fish resources and associated habitats.  
Prerequisites: RENR 205; junior or senior classification.

WFSC 406 Conservation Biology and Wildlife Habitat Management  
Credits 3. 3 Lecture Hours.  
Designed to acquaint the student with major land use practices on lands that produce wildlife, how these influence wildlife production and alterations or manipulations of habitat used to achieve specific wildlife management goals.  
Prerequisites: WFSC 201 and WFSC 403; WFSC 401 or WFSC 402; senior classification; wildlife and fisheries sciences major or approval of instructor; concurrent registration in WFSC 407 required.

WFSC 407 Field Wildlife Habitat Management  
Credit 1. 2 Lab Hours.  
Field and laboratory studies of specific wildlife habitat management practices with special emphasis on those used in Texas; attendance required at four weekend field trips to study wildlife habitat operations.  
Prerequisite: Concurrent registration in WFSC 406 required.*

WFSC 408 Techniques of Wildlife Management  
Credits 3. 2 Lecture Hours. 3 Lab Hours.  
Techniques available to directly and indirectly manipulate wild animal populations to achieve balance between socioeconomic and aesthetic values.  
Prerequisites: Senior classification; WFSC 403 and WFSC 406 or registration therein or approval of instructor.*

WFSC 409 NATURE in the Classroom: Needed Activities To Understand Resource Ecology  
Credit 1. 3 Lab Hours.  
Integration of natural resources through conservation ecology programs, utilization of research techniques adaptable for classroom use; field trips to community facilities, gaming strategies and computer simulations.  
Prerequisites: WFSC 420 or RENR 205 or concurrent enrollment; junior or senior classification.

WFSC 410 Principles of Fisheries Management  
Credits 4. 3 Lecture Hours. 3 Lab Hours.  
Basic knowledge from ichthyology, biology of fishes and limnology related to applied aspects of freshwater and marine fishery science. Management techniques applicable to streams, ponds, reservoirs, estuaries and the oceans.  
Prerequisites: WFSC 311 and WFSC 414; STAT 302 or concurrent enrollment; or approval of instructor.*

WFSC 414 Ecology of Lakes and Rivers  
Credits 4. 3 Lecture Hours. 3 Lab Hours.  
Biological, physical, chemical and geological characteristics of fresh waters; human impacts, which include influence of industrial, domestic, conservation and restoration activities.  
Prerequisites: CHEM 101 and CHEM 222; PHYS 201; junior or senior classification.*

WFSC 417 Biology of Fishes  
Credits 4. 3 Lecture Hours. 3 Lab Hours.  
Fishes’ physiological and morphological adaptations for life in aquatic systems; physiological and behavioral responses of fish to environmental variation. Laboratory emphasizes design, conduct and analysis of virtual experiments featuring “EcoFish,” a simulation model of fish autecology.  
Prerequisites: WFSC 302 or WFSC 311; WFSC 414; or approval of instructor.

WFSC 418 Ecology of the Coastal Zone  
Credits 3. 3 Lecture Hours.  
Introduction to the ecosystems that comprise the coastal zone with an emphasis on the role of freshwater inflows; open bay systems are the focus of lectures, but fringing habitats are also discussed; human components of the coastal zone are also discussed including industrial, commercial domestic, conservation and restoration issues.  
Prerequisite: Junior or senior classification.

WFSC 419 Wildlife Restoration  
Credits 3. 2 Lecture Hours. 3 Lab Hours.  
Study of the fundamentals of the restoration of animal populations and the resources they require; factors that control the distribution and abundances of animals in relation to restoration; and how restoration plans for wildlife are developed.  
Prerequisite: RENR 205 or equivalent; junior or senior classification or approval of instructor; WFSC 406 and WFSC 407 and ESSM 320 preferred.
WFSC 420 Ecology and Society  
Credits 3. 3 Lecture Hours.  
Study and compare human and natural ecosystems using diversity, interrelations, cycles, and energy as the conceptional organization; central themes are sustainability, stewardship and science.  
Prerequisite: Junior or senior classification.

WFSC 422 Ethology  
Credits 3. 3 Lecture Hours.  
Survey of the control, ontogeny, function and natural selection of behavior in a variety of vertebrate and invertebrate species; interaction between the organism and its environment with regard to the mechanisms and adaptive significance of behavior; evolution of anti-predator, feeding, reproductive and cooperative traits.  
Prerequisite: BIOL 112 or equivalent.*

WFSC 423 Aquaculture  
Credits 4. 3 Lecture Hours. 3 Lab Hours.  
Principles of fish production for stock enhancement and human food. Species of fish used for production, cross-breeding and selection; feeds and feeding of fishes and nutritional and environmental requirements for optimum productivity; effects of fish production on land and water uses as related to conservation.*

WFSC 425 Marine Fisheries  
Credits 3. 3 Lecture Hours.  
Survey of fisheries for marine vertebrates and invertebrates primarily in the Gulf of Mexico and South Atlantic with special emphasis being directed to their biology, economics and management.*

WFSC 426/MARB 426 Aquatic Animal Nutrition  
Credits 3. 3 Lecture Hours.  
Chemistry, digestion, absorption and intermediary metabolism of nutrient classes with special emphasis on their relationship to warmwater fish nutrition; determination of nutrient requirements, feed evaluation, feed processing, ration formulation and feeding practices.  
Prerequisites: CHEM 222; CHEM 227 or equivalent. Taught even years.  
Cross Listing: MARB 426.*

WFSC 427 Disease Management in Fisheries and Aquaculture  
Credits 3. 2 Lecture Hours. 2 Lab Hours.  
Fish and invertebrates of economic importance; factors influencing the maintenance of health for each species group; problems and solutions unique to each phase of aquaculture from breeding to growout; application of routine diagnosis and other management tools.  
Prerequisite: Junior classification.*

WFSC 428 Wetland Ecosystem Management  
Credits 4. 3 Lecture Hours. 3 Lab Hours.  
Ecosystem approach to the ecology and management of wetlands; emphasis on factors controlling wetland structure and function, characteristics of different wetland types, and applied issues of wetland restoration, creation and delineation.  
Prerequisite: Junior or senior classification.*

WFSC 433 Molecular Ecology in Wildlife and Fisheries  
Credits 3. 3 Lecture Hours.  
Fundamentals of molecular ecology applied to conservation and management of wildlife and fisheries; presentation and discussion of scientific papers on wildlife and fisheries molecular ecology; topics in conservation, management and aquaculture.  
Prerequisites: BIOL 112 or equivalent; junior or senior classification.

WFSC 444 Aquaculture I: Principles and Practices  
Credits 4. 3 Lecture Hours. 3 Lab Hours.  
Scientific perspectives concerning major principles associated with fish production under controlled conditions; production techniques associated with prominent species produced via aquaculture throughout the world with emphasis on those cultured in the United States.  
Prerequisite: Junior or senior classification or approval of instructor.

WFSC 447 Aquaculture II: Aquatic Animal Nutrition, Feeding and Disease Management  
Credits 4. 3 Lecture Hours. 3 Lab Hours.  
Review of scientific perspectives on major aspects of nutrition, diet formulation and feeding of aquatic species in aquaculture; major disease-causing organisms encountered in aquaculture and means of disease prevention and control.  
Prerequisite: Junior or senior classification or approval of instructor.

WFSC 448 Fish Ecophysiology  
Credits 3. 3 Lecture Hours.  
Ecological domains and demands placed on physiological performance; physiological mechanisms and control in fishes, interaction of physiological mechanisms with environment, emphasis in adaptive value of physiological traits; analysis of physiology and adaptation with models; process and functional modeling.  
Prerequisite: WFSC 311 or concurrent enrollment, junior or senior classification or approval of instructor.

WFSC 449 Professional Aspects of Aquatic Ecology  
Credits 3. 3 Lecture Hours.  
Discipline of aquatic sciences through oral presentation and written documentation; job market expectations, resume preparation, job application, and preparation for and giving an interview.  
Prerequisite: Junior or senior classification or approval of instructor.

WFSC 450/ENTO 450 Caribbean Conservation  
Credits 2. 6 Lab Hours.  
Provide experience in and appreciation for diverse tropical habitats and the problems associated with conserving these habitats; design and conduct individual research projects on topics of their choice with approval from the instructors on project design and feasibility.  
Prerequisites: Concurrent enrollment in ENTO 300/WFSC 300 and ENTO 451/WFSC 451; junior or senior classification.  
Cross Listing: ENTO 450/WFSC 450.

WFSC 451/ENTO 451 Caribbean Research Seminar  
Credit 1. 1 Other Hour.  
Document research activities; keep a journal of activities and research methods during study abroad trips.  
Prerequisites: Concurrent enrollment in ENTO 300/WFSC 300 and ENTO 450/WFSC 450; junior or senior classification.  

WFSC 454 Amazon Field School  
Credits 4. 4 Lecture Hours.  
Investigation of social and ecological complexities of biodiversity conservation in tropical ecosystems; biological and social science approaches to evaluate causes, consequences and solutions to biodiversity loss through ecology, culture and governance.  
Prerequisites: Junior or senior classification with a minimum GPA of 2.0 and approval of instructor.  
Cross Listing: RPTS 454 and VTPB 404.
WFSC 481 Seminar
Credit 1. 1 Lecture Hour.
Oral discussion of selected topics from technical literature on recent advances in the field.
Prerequisites: Senior classification in wildlife and fisheries sciences; 6 hours of 300- or 400-level wildlife and fisheries sciences courses. May be repeated for credit.

WFSC 484 Internship
Credits 1 to 9. 1 to 9 Other Hours.
Practical experience working in a professional wildlife or fisheries facility.
Prerequisite: Approval of department head.

WFSC 485 Directed Studies
Credits 1 to 3. 1 to 3 Other Hours.
Individual study and research on selected problem approved by instructor and academic advisor.
Prerequisites: Junior or senior classification; approval of department head.

WFSC 489 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours. 0 to 4 Lab Hours.
Selected topics in an identified area of wildlife and fisheries sciences. May be repeated for credit.
Prerequisite: Approval of department head.*

WFSC 491 Research
Credits 1 to 6. 1 to 6 Other Hours.
Laboratory and/or field research supervised by a faculty member in wildlife and fisheries sciences. Registration in multiple sections of this course are possible within a given semester provided that the per semester credit hour limit is not exceeded.
Prerequisites: Junior or senior classification; approval of department head.

WFSC 602 Field Herpetology
Credit 1. 3 Lab Hours.
Field work involving collection and preservation of herpetological specimens; natural history, ecological relations.
Prerequisites: Graduate classification.*

WFSC 603 History of Ecological Thought and Conservation Practice
Credits 3. 3 Lecture Hours.
Survey of the philosophical roots and evolution of ecological thought and conservation practice; emphasis on theoretical foundations, seminal concepts, classic papers, and historic trends.
Prerequisites: Course in general ecology and graduate classification or instructor approval.

WFSC 604 Ecological Modeling
Credits 3. 3 Lecture Hours.
Philosophical basis, theoretical framework, and practical application of systems analysis and simulation within the context of ecology and natural resource management; emphasis placed on development, evaluation and use of simulation models by students.
Prerequisite: Approval of instructor.

WFSC 605 Community Ecology
Credits 3. 3 Lecture Hours.
Overview and in-depth knowledge of community ecology; historical development; current issues, methodologies, and practical applications in natural resource management, biological conservation, agriculture, and human health; practice critical thinking, communication skills, and professionalism.
Prerequisite: Graduate classification.

WFSC 607 Environmental Conflict Management
Credits 3. 3 Lecture Hours.
Understand environmental conflict systemically, understand how communication contributes to environmental conflict and develop increased capacity as managers of environmental conflict.
Prerequisite: Graduate classification or approval of instructor.

WFSC 608 Public Participation in Conservation Policy
Credits 3. 3 Lecture Hours.
Students will have the opportunity to become familiar with and critique theories and constructs as well as strategies and techniques for enhancing public participation in environmental conservation policy.
Prerequisite: Graduate classification or approval of instructor.

WFSC 609 Wildlife Research Methods
Credits 3. 3 Lecture Hours.
Research methods for ecology and conservation; become familiar with the philosophy of natural science and develop skill in study design, grantsmanship, presentation techniques, critical evaluation of others’ work, and publication in refereed journals.
Prerequisites: Courses in general ecology and statistics and graduate classification or approval of instructor.

WFSC 610 Evolutionary Ecology
Credits 3. 3 Lecture Hours.
Survey the development of paradigms in evolutionary ecology; incorporates phylogenies into comparative analysis and macroecology; evaluates the roles of historical and local processes in determining species diversity.
Prerequisite: Graduate classification.

WFSC 611 Estuarine Ecology
Credits 4. 3 Lecture Hours. 3 Lab Hours.
Principles governing the relationships of estuarine organisms to their environment; productivity, adaptations to environment, community structure and factors affecting the distribution and abundance of biota.
Prerequisite: Invertebrate zoology and ichthyology or approval of instructor.

WFSC 613 Animal Ecology
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Concepts of animal ecology which emerge at various levels or organization; the ecosystem, the community, the population and the individual; laboratories emphasis on the quantitative analysis of field data and the simulation of population dynamics.
Prerequisite: Graduate classification or approval of instructor.*

WFSC 617 Biology of Fishes
Credits 4. 3 Lecture Hours. 3 Lab Hours.
Fishes' physiological and morphological adaptations for life in aquatic systems; physiological and behavioral responses of fish to environments; molecular, cellular, and physiological mechanisms discussed in an evolutionary context that emphasizes the ontogeny of adaptive responses among vertebrates from basic biochemical and biophysical constraints.
Prerequisite: Graduate classification or approval of instructor.

WFSC 618 Wildlife Study Design and Analysis
Credits 3. 3 Lecture Hours.
Fundamental and advanced aspects of study design applicable to terrestrial animals; analysis and review of the scientific literature related to study design; and the development of study design for written and oral presentations.
Prerequisite: Graduate classification or approval of instructor.
WFSC 619 Wildlife Restoration
Credits 3.2 Lecture Hours. 3 Lab Hours.
Study of the fundamentals of the restoration of animal populations and the resources they require; factors that control the distribution and abundances of animals in relation to restoration; and how restoration plans for wildlife are developed.
Prerequisite: Graduate classification or approval of instructor.

WFSC 620 Vertebrate Ethology
Credits 4.3 Lecture Hours. 2 Lab Hours.
Mechanisms and control of vertebrate behavior in an ecological context, as shaped by natural selection; classical and current theories regarding the genetic basis, development, specialized sensory systems and organization of responses in changing environment; laboratory emphasizes observational skills and quantitative analysis of behavior occurring in natural settings.*

WFSC 622 Behavioral Ecology
Credits 3.3 Lecture Hours.
Integration of animal behavior with ecological and evolutionary principles; includes mating, predation, foraging ecology, social behavior, game theory and behavioral genetics; emphasis on quantification of behavior and strategy modeling.
Prerequisites: Undergraduate ecology course; graduate classification.

WFSC 623 Aquaculture
Credits 4.3 Lecture Hours. 3 Lab Hours.
Principle of fish production for stock enhancement and human food. Species of fish used for production, cross-breeding and selection; feeds and feeding of fish and nutritional and environmental requirements for optimum productivity; effects of fish production on land and water uses as related to conservation.
Prerequisite: Graduate classification or approval of instructor.

WFSC 624 Dynamics of Populations
Credits 4.3 Lecture Hours. 2 Lab Hours.
Principles, models and methods for analysis of population dynamics; analysis of contemporary research emphasizing theory and its uses in evaluation and management of animal populations. Laboratory emphasizes mathematical, statistical and computer modeling of population phenomena.

WFSC 628 Wetland Ecology and Pollution
Credits 3.3 Lecture Hours.
Wetlands as ecological systems that are prime habitats for wildlife and fish; geomorphology, hydrology, limnology, plant and animal communities, and humans use and management; wetlands as ultimate reservoirs of environmental pollutants; distribution, fate and effects of environmental pollutants on aquatic and terrestrial wildlife.
Prerequisite: Graduate classification or approval of instructor.

WFSC 630 Ecology and Society
Credits 3.3 Lecture Hours.
Study and compare human and natural ecosystems using diversity, interrelations, cycles, and energy as the conceptual organization; central themes of the course are sustainability, stewardship and science.
Prerequisite: Graduate classification or approval of instructor.

WFSC 632 Ethology
Credits 3.3 Lecture Hours.
Survey of the control, ontogeny, function and natural selection of behavior in a variety of vertebrate and invertebrate species; interaction between the organism and its environment with regard to the mechanisms and adaptive significance of behavior; evolution of anti-predator, feeding, reproductive and cooperative traits.
Prerequisites: BIOL 112 or equivalent; graduate classification.

WFSC 633/GENE 633 Conservation Genetics
Credits 3.3 Lecture Hours.
Genetic concepts and techniques relevant to management and conservation of biological diversity, research and conservation strategies within a conservation genetics framework.
Prerequisite: Introductory courses in genetics and ecology or biological conservation.
Cross Listing: GENE 633/WFSC 633.

WFSC 635 Urban Wildlife and Fisheries
Credits 3.3 Lecture Hours.
Urban wildlife and fishery students to establish and maintain diverse, self-sustaining urban wildlife and fish populations at levels in harmony with ecological, social, and economic values of the human community and to develop optimal levels of public appreciation and use of urban wildlife and fish resources and associated habitats.
Prerequisite: Graduate classification or approval of instructor.

WFSC 636 Wildlife Habitat Management
Credits 3.3 Lecture Hours.
Designed to acquaint with major land use practices on lands that produce wildlife, how these influence wildlife production and alterations or manipulations of habitat used to achieve specific wildlife management goals.
Prerequisite: Graduate classification or approval of instructor.*

WFSC 638 Techniques of Wildlife Management
Credits 3.2 Lecture Hours. 3 Lab Hours.
Techniques available to directly and indirectly manipulate wild animal populations to achieve balance between socioeconomic and aesthetic values.
Prerequisite: Graduate classification or approval of instructor.*

WFSC 639 Wildlife Ecotoxicology
Credits 3.3 Lecture Hours.
Distribution, fate, and effects of environmental pollutants on wildlife behavior and reproduction. Global distribution of pollutants and effects on near and remote ecosystems. Field studies, biomarkers, stable isotope and various techniques for evaluating pollutant hazards on wildlife.
Prerequisites: Courses in CHEM and BICH and graduate classification or approval of instructor.

WFSC 640 Human Dimensions of Wildlife and Fisheries Management
Credits 3.3 Lecture Hours.
Theory and applications for considering human dimensions in an integrated approach to wildlife and fisheries management; a social science perspective with emphasis to diversity of human values, role of constituency groups, wildlife and fisheries policy development, conflict management, management decision-making, research methods and management case studies.

WFSC 641 Sustainable Military Land Management
Credits 3.3 Lecture Hours.
Overview of the Department of Defense (DOD) lands within a temporal, geographic, and environmental context and perspective; major policies/ laws impacting military land use and areas critical to mission sustainment; management strategies important to sustaining installations and ranges.
Prerequisite: Graduate classification or approval of instructor.

WFSC 642 Field Military Land Management
Credit 1.0 Lecture Hours. 2 Lab Hours.
Review of land management practices and challenges on military and adjacent private lands through field visits of select military installations. Field trips required during Spring Semester.
Prerequisite: Graduate classification or approval of instructor. Previous or concurrent registration in WFSC 636 is strongly encouraged.
WFSC 643 Geospatial Technology in Military Land Management
Credits 3. 3 Lecture Hours.
Tools for visualizing, creating, managing and analyzing geographic data on military lands and outside areas critical to mission sustainment; familiarity with ArcMap and ArcCatalog in military-related land management scenarios.
Prerequisites: Graduate classification or approval of instructor; previous experience with ArcMap and ArcCatalog helpful.

WFSC 646 Quantitative Phylogenetics
Credits 3. 2 Lecture Hours. 1 Lab Hour.
Designed to provide the theory and tools required for inference of phylogenetic (evolutionary) relationships among biological taxa using various types of comparative data including morphological characters, biochemical and molecular characters, and DNA sequences; hands-on analysis of data using contemporary tools.
Prerequisites: ENTO 601 or approval of instructor.
Cross Listing: ENTO 606 and GENE 660.

WFSC 647/NUTR 647 Nutritional Biochemistry of Fishes
Credits 3. 3 Lecture Hours.
Principles of nutritional biochemistry including nutrient metabolism and biochemical energetics with special emphasis on finfish and shellfish.
Prerequisite: BICH 410 or equivalent.
Cross Listing: NUTR 647/WFSC 647.

WFSC 648/GENE 648 Molecular Evolution
Credits 3. 2 Lecture Hours. 1 Lab Hour.
Theory and tools used in the analysis of molecular evolutionary patterns of DNA and protein sequences; format combines lecture presentations by instructor discussion of relevant scientific literature, computer exercises, preparation of research proposal or independent research project, and practice in peer-review process.
Prerequisite: Basic courses in general Genetics and Evolution.
Cross Listing: GENE 648/WFSC 648.

WFSC 649 Principles of Fisheries Management
Credits 4. 4 Lecture Hours.
Basic knowledge of ichthyology, biology of fishes and limnology related to applied aspects of freshwater and marine fishery science; management techniques applicable to streams, ponds, reservoirs, estuaries and the oceans.
Prerequisite: Graduate classification.

WFSC 654 Amazon Field School
Credits 4. 4 Lecture Hours.
Investigation of social and ecological complexities of biodiversity conservation in tropical ecosystems; biological and social science approaches to evaluate causes, consequences and solutions to biodiversity loss through ecology, culture and governance.
Cross Listing: RPTS 654 and VTMI 604.

WFSC 655/RPTS 655 Applied Biodiversity Science I
Credits 3. 3 Lecture Hours.
Applied Biodiversity Science. Students will study in the areas of Conservation genetics, metapopulations, landscape ecology, and ecosystem management.
Prerequisite(s): Graduate classification.
Cross Listing: RPTS 655/WFSC 655.

WFSC 670 Excel Biometry
Credits 3. 3 Lecture Hours.
Rational and mathematics behind upper level biometrical methods; construct spreadsheets and analyze a common data set; topics include multiple regressions, principle components analysis, multivariate analysis of variance and others.
Prerequisites: Graduate classification; STAT 651 or equivalent.

WFSC 681 Seminar
Credit 1. 1 Lecture Hour.
Important current developments in wildlife or fisheries fields with special reference to literature. Students may register up to but no more than two sections of this course in the same semester.

WFSC 684 Professional Internship
Credits 1 to 16. 1 to 16 Other Hours.
On-the-job training in fields of wildlife and fisheries sciences.
Prerequisite: Graduate classification in Wildlife and Fisheries Sciences.

WFSC 685 Directed Studies
Credits 1 to 6. 1 to 6 Other Hours.
Individual study and research on selected problem approved by instructor and graduate advisor.
Prerequisite: Approved proposal.

WFSC 689 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours. 0 to 4 Lab Hours.
Special topics in wildlife ecology, fisheries ecology, vertebrate systematics, evolutionary biology of vertebrates and conservation education. May be repeated for credit.*

WFSC 691 Research
Credits 1 to 23. 1 to 23 Other Hours.
Original research on selected wildlife and/or fisheries problem to be used in thesis or dissertation.

WGST -Women's & Gender Studies

Courses

WGST 200 Introduction to Women's and Gender Studies
Credits 3. 3 Lecture Hours.
Historical and cross-cultural perspectives on women's roles in culture, the workplace, the family and other socio-political institutions; the social construction of gender; sexuality and racism; social control mechanisms and ideologies.

WGST 207/SOCI 207 Introduction to Gender and Society
Credits 3. 3 Lecture Hours.
Similarities and differences between females and males in a number of cultures throughout the world; sociological analysis of gender in relation to social structure.
Cross Listing: SOCI 207/WGST 207.

WGST 289 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours. 0 to 4 Lab Hours.
Selected topics in an identified area of women's/gender studies. May be repeated for credit.
Prerequisite: Approval of director.
WGST 291 Research
Credits 0 to 3. 0 to 3 Other Hours.
Research conducted under the direction of faculty member in women's and gender studies. May be repeated 3 times for credit.
Prerequisites: 3 credits in WGST; freshman or sophomore classification and approval of instructor.

WGST 300/PSYC 300 Psychology of Women
Credits 3. 3 Lecture Hours.
Theoretical and research literature relevant to psychological assumptions about the female personality; challenges to and verification of these assumptions by recent experimental studies.
Prerequisite: PSYC 107.
Cross Listing: PSYC 300/WGST 300.

WGST 302 Women and Religion
Credits 3. 3 Lecture Hours.
Investigation of women's position in religious institutions historically and/or currently, religion's influence on women's roles and status, and women's attempts to define their own religious perspectives; draws on sociological and philosophical insights and methods.
Prerequisite: Junior or senior classification or approval of instructor.
Cross Listing: RELS 302 and SOCI 302.

WGST 303 Psychology of Women of Color
Credits 3. 3 Lecture Hours.
Interdisciplinary theories to study the unique yet intersectional experiences of women from different racial groups, ethnicities, nationalities and cultural backgrounds; scholarly research from the diversity science field; contemporary topics that have developed in a global context; examination of complex issues, which affect women of color across the lifespan.
Prerequisite: Grade of C or better in AFST 201 or PSYC 107 or WGST 200, or approval of instructor.
Cross Listing: AFST 303 and PSYC 303.

WGST 307 Gender and Education
Credits 3. 3 Lecture Hours.
Overview of gender and education; role of feminism and feminist theory; intersections of gender, race, class, ethnicity, and sexuality.
Prerequisite: Junior or senior classification.

WGST 308 Gender and International Education
Credits 3. 3 Lecture Hours.
Exploration of the intersection of formal and informal education and understandings of gender in countries beyond the United States.
Prerequisites: WGST 307; junior or senior classification.

WGST 309 Feminist Pedagogy
Credits 3. 3 Lecture Hours.
Exploration of educational systems' and institutions' regard for women historically and contemporarily; practical and theoretical writings on feminist pedagogy.
Prerequisites: WGST 307; junior or senior classification.

WGST 310/SOCI 310 Motherhood in Society
Credits 3. 3 Lecture Hours.
Examines expectations and/or practices relating to motherhood, with consideration of their cultural impact; taught from a social science perspective.
Prerequisite: Junior or senior classification or approval of instructor.
Cross Listing: SOCI 310/WGST 310.

WGST 315/SOCI 315 The Marriage Institution
Credits 3. 3 Lecture Hours.
Courtship, engagement, marriage, family formation, personal adjustment, conflict, financing and child rearing.
Prerequisite: Junior or senior classification.
Cross Listing: SOCI 315/WGST 315.

WGST 316/SOCI 316 Sociology of Gender
Credits 3. 3 Lecture Hours.
Sociological explanations of status differences between men and women; cross-cultural comparisons; gender role socialization, cultural stereotypes, discrimination; gender roles and status in the family, economy, religion, science, other social institutions; deviance, victimization and gender; recent social changes.
Cross Listing: SOCI 316/WGST 316.

WGST 317/POLS 317 Women in Politics
Credits 3. 3 Lecture Hours.
Role of women in the political system; treatment of women in political theory; effect of law on women's status; women as political leaders; current policy issues of concern to women.
Prerequisite: POLS 206.
Cross Listing: POLS 317/WGST 317.

WGST 318/ECON 318 The Economics of Gender and Race
Credits 3. 3 Lecture Hours.
Theories and evidence on gender and race differences in labor market outcomes; labor supply and the role of family formation; the effect of human capital and discrimination on earnings; analysis of government policies; international comparisons.
Prerequisites: 6 hours drawn from the following: ECON 202, STAT 303, 3 hours in WGST above 200 level; junior or senior classification.
Cross Listing: ECON 318/WGST 318.

WGST 330 Women in Ancient Greece and Rome
Credits 3. 3 Lecture Hours.
Survey of women in classical Greece and Rome; emphases on female occupations and family relationships, legal and political status, traditional values, notorious women, how women were viewed and how they viewed themselves.
Prerequisite: Junior or senior classification.
Cross Listing: CLAS 330 and HIST 330.

WGST 332/SOCI 332 Alternative Genders
Credits 3. 3 Lecture Hours.
Examination of theories and case studies involving alternative genders and sexualities, studied in their cultural contexts and including the role of factors such as race, class, ethnicity, age, and physical characteristics.
Prerequisites: 3 credits in SOCI or WGST; junior or senior classification.
Cross Listing: SOCI 332/WGST 332.

WGST 333/ENGL 333 Gay and Lesbian Literature
Credits 3. 3 Lecture Hours.
Gay and lesbian literature from classical times to present, studied in its historical and cultural context.
Prerequisite: Junior or senior classification. Prerequisite: Junior or senior classification.
Cross Listing: ENGL 333/WGST 333.
WGST 334/HLTH 334 Women's Health
Credits 3. 3 Lecture Hours.
A broad range of health issues that are either unique to women or of special importance to women; information for the health consumer; preparation as an advocate of healthy lifestyles; awareness of the role health plays in the life of all women.
Prerequisite: Junior or senior classification.
Cross Listing: HLTH 334/WGST 334.

WGST 343/FILM 343 Sex, Gender and Cinema
Credits 3. 3 Lecture Hours.
Exploration of a significant topic at the intersection of women's/gender studies and film, such as cinema and sexuality studies, cinema and women, and cinema and masculinity; may include discussion of production, film content, and/or reception.
Prerequisites: 3 hours in FILM or WGST; junior or senior classification or approval of instructor.
Cross Listing: FILM 343/WGST 343.

WGST 367/POLS 367 Women in Government in Comparative Perspective
Credits 3. 3 Lecture Hours.
Examination of women's representation in government based on comparison across multiple nation-states; focus on legislative and executive branches of democratic governments.
Prerequisites: POLS 206; junior or senior classification or approval of political science department head.
Cross Listing: POLS 367/WGST 367.

WGST 374/ENGL 374 Women Writers
Credits 3. 3 Lecture Hours.
History of literature by women in English; emphasis on continuity of ideas and on literary contributions; study of a variety of genres with particular attention to the significance of gender in the racial, social, sexual and cultural contexts of women writing in English.
Prerequisite: Junior or senior classification.
Cross Listing: ENGL 374/WGST 374.

WGST 391 Studies in Gender and Diversity
Credits 3. 3 Lecture Hours.
Exploration of a significant topic in gender studies, emphasizing the interplay of gender with one or more races, ethnicities, and/or cultures beyond the Anglo-American.
Prerequisite: Junior or senior classification.

WGST 401 Feminist Theory
Credits 3. 3 Lecture Hours.
Inquiry-based examination of feminist theory from various periods and disciplinary perspectives, with application to societal debates and controversies.
Prerequisites: WGST 200 or approval of instructor; junior or senior classification.

WGST 403 Language and Gender
Credits 3. 3 Lecture Hours.
Language and gender from a sociolinguistic perspective; gender in the words and structures of language; gender representation and gendered language use in the media, and a variety of sociocultural contexts; language use in intimate relationships; computer-mediated discourse; language, sexuality, and sexual orientation.
Prerequisite: Junior or senior classification.
Cross Listing: ENGL 403 and LING 403.

WGST 404/ANTH 404 Women and Culture
Credits 3. 3 Lecture Hours.
Examines women's lives in evolutionary and cross-cultural perspective; women's roles in subsistence, politics, religion and economics in traditional cultures; women's roles in international development; the cultural and social construction of women's biology cross-culturally including circumcision, menstruation, pregnancy, childbirth and motherhood.
Cross Listing: ANTH 404/WGST 404.

WGST 407/COMM 407 Women, Minorities and the Mass Media
Credits 3. 3 Lecture Hours.
The contributions of women and ethnic groups to the evolution of the media; the portrayal of women and ethnic groups in the mass media; issues resulting from the recognition of women and ethnic groups as media audiences.
Prerequisite: Junior classification or approval of instructor.

WGST 409/PHIL 409 Studies in Gender and Philosophy
Credits 3. 3 Lecture Hours.
Analysis, from a gender-studies perspective, of a single figure or concept in the history of philosophy. May be repeated 1 time for credit with a different focus.
Prerequisites: 3 hours in philosophy and women's and gender studies; junior or senior classification.
Cross Listing: PHIL 409/WGST 409.

WGST 411/COMM 411 Representations of Motherhood
Credits 3. 3 Lecture Hours.
Examination of understandings of motherhood from a humanities perspective and over a variety of cultures and time periods, as reflected in written, media and/or oral texts.
Prerequisites: Junior or senior classification or approval of instructor.
Cross Listing: COMM 411/WGST 411.

WGST 420/COMM 420 Gender and Communication
Credits 3. 3 Lecture Hours.
Survey of the role of gender in communication processes; focus on communication differences between men and women in contexts such as the family, school and work organizations; discussion of media influence in gender stereotypes.
Cross Listing: COMM 420/WGST 420.

WGST 422/FREN 422 Studies in Gender and French Literature
Credits 3. 3 Lecture Hours.
The role of gender in production, dissemination, reception and interpretation of literary texts in the French tradition, including continental France as well as the Francophone literatures of West Africa, Canada, and elsewhere; taught in English.
Prerequisite: Junior or senior classification or approval of instructor.
Cross Listing: FREN 422/WGST 422.

WGST 424/SOCI 424 Women and Work in Society
Credits 3. 3 Lecture Hours.
Social context of women's work; work patterns, labor force participation, occupational destinations and occupational mobility; alternatives to the conventional division of labor by sex in society.
Cross Listing: SOCI 424/WGST 424.
WGST 428/COMM 428 Women’s Rhetoric
Credits 3.3 Lecture Hours.
Examination of the historical imbrication of masculinity and rhetoric in relation to women’s participation in political life, reception of women’s rhetoric in the public sphere, and remembrance and representation of women as rhetorical agents throughout history; consideration of women’s rhetoric in various cultural arenas.
Prerequisite: Junior or senior classification.
Cross Listing: COMM 428/WGST 428.

WGST 430/MGMT 430 Employment Discrimination Law
Credits 3.3 Lecture Hours.
Legal issues surrounding employment discrimination, including disparate treatment and impact; intent; affirmative action; sexual harassment; pregnancy, sex, race, religious, salary, disability, age, and ethnic discrimination; policy issues and perspectives to aid human resource specialists and managers.
Prerequisite: Junior or senior classification.
Cross Listing: MGMT 430/WGST 430.

WGST 439/ANTH 439 Gender, Ethnicity and Class in Archaeological Research
Credits 3.3 Lecture Hours.
Exploration of theoretical and methodological issues in engendering archaeology; ideological biases in the interpretation of roles attributed to women, men, and underrepresented groups in the past; the impact of cultural transformation on underrepresented groups and gender relations; and the formulation of research questions concerning these issues.
Prerequisites: ANTH 202, ANTH 210, WGST 200 or WGST 207/SOCI 207; junior or senior classification or approval of instructor.
Cross Listing: ANTH 439/WGST 439.

WGST 445 Queer Theory
Credits 3.3 Lecture Hours.
Examines origins of theories of gender and sexual diversity and their intersections with feminist theories; considers foundational and contemporary texts that address queer theory.
Prerequisites: 6 hours in Women’s and Gender Studies; senior classification or approval of instructor.

WGST 452/ITAL 452 Women and Gender in Italian Literature
Credits 3.3 Lecture Hours.
The historical and cultural dynamics forging the notion of woman and gender in Italian society and literature; discussion of films and theoretical texts concerning subjectivity and language, body and culture; taught in English.
Prerequisite: Junior or senior classification or approval of instructor.
Cross Listing: ITAL 452/WGST 452.

WGST 461/HIST 461 History of American Women
Credits 3.3 Lecture Hours.
Cultural, political, legal and religious factors that helped shape the role and character of women in American society from colonial times to the present; historical role of women in the development of the nation.
Cross Listing: HIST 461/WGST 461.

WGST 462/POLS 462 Women and the Law
Credits 3.3 Lecture Hours.
The legal status of American women from the adoption of the Constitution to the present; constitutional developments; the 19th Amendment and the proposed Equal Rights Amendment; employment; family law; reproductive rights; education; sexual equality in context of other claims to equality; law and social norms.
Prerequisite: POLS 206 or approval of department head.
Cross Listing: POLS 462/WGST 462.

WGST 463 Gender in Asia
Credits 3.3 Lecture Hours.
Gender dynamics in Asia; changes in gender roles; women’s movements; women and the economy; women and politics; men’s and women’s private lives.
Prerequisite: Junior or senior classification or approval of instructor.
Cross Listing: ASIA 463 and SOCI 463.

WGST 473/HIST 473 History of Modern American Women
Credits 3.3 Lecture Hours.
Emergence of modern American women in the 1890s; examination of their history from the 1890s to the present; women as organizers, innovators, political reformers, workers, social activists, housewives, mothers, consumers and feminists.
Cross Listing: HIST 473/WGST 473.

WGST 474/ENGL 474 Studies in Women Writers
Credits 3.3 Lecture Hours.
A different topic each term examining women’s writing through historical period, genre, cross-cultural study and/or feminist literary theory. May be repeated for credit.
Prerequisites: 3 credits of literature at the 300-level; junior or senior classification.
Cross Listing: ENGL 474/WGST 474.

WGST 476/HIST 476 Sex and Sexuality in History
Credits 3.3 Lecture Hours.
Changing ideas about sex and sexuality over time; includes their interaction with ideas about gender, race, class, religion, science, technology, medicine, politics and popular culture; historical and cultural processes creating modern concerns about sex and sexuality.
Prerequisite: Junior or senior classification.
Cross Listing: HIST 476/WGST 476.

WGST 477/HIST 477 Women in Modern European History
Credits 3.3 Lecture Hours.
Women in Europe from the 18th century to the present: women’s contributions to their societies; realities of their daily lives and their responses; perceptions of women; role of institutions in defining women’s roles; significance for women of industrialization, revolution, warfare, scientific discoveries; interaction of class, race and gender.
Cross Listing: HIST 477/WGST 477.

WGST 481 Senior Seminar
Credits 3.3 Lecture Hours.
Inquiry-based investigation of an issue, problem, or question, using gender or feminism as the organizing principle for analysis; methods and materials of scholarship in the field; includes opportunities for student research.
Prerequisite: Senior classification or approval of instructor.

WGST 484 Internship in Women’s and Gender Studies
Credits 0 to 4.0 to 4 Other Hours.
Directed internship in a public or private organization to provide students with on-the-job training and applied research experience; opportunity to observe firsthand issues and problems covered in women’s and gender studies courses; designed to enhance and clarify the student’s career objectives.
Prerequisites: 6 hours in women’s and gender studies, junior.

WGST 485 Directed Studies
Credits 0 to 4.0 to 4 Other Hours.
Readings and/or research for specific needs of students majoring or minoring in women’s and gender studies.
Prerequisites: Approval of women’s and gender studies director and faculty supervisor.
WGST 489 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours. 0 to 4 Lab Hours.
Selected topics in an identified area of women's and gender studies. May be repeated for significant credit.

WGST 491 Research
Credits 0 to 3. 0 to 3 Other Hours.
Research conducted under the direction of faculty member in women's and gender studies. May be repeated 3 times for credit.
Prerequisites: 12 credits in WGST including 6 at 300-level; junior or senior classification and approval of instructor.

WGST 603 The Contemporary Family
Credits 3. 3 Lecture Hours.
Review and criticism of theories developed for study of the family; family formation, dynamics, conflicts, power, dissolution; subcultural family forms and responses to social change.
Prerequisite: Graduate classification or approval of instructor.
Cross Listing: SOCI 603/WGST 603.

WGST 634/EHRD 634 Introduction to Gender and Education
Credits 3. 3 Lecture Hours.
Major discussions and debates in the area of gender and education, with particular attention to the role that feminism and feminist theory have played and on the intersections of gender, race, class, ethnicity, and sexuality.
Prerequisite: Graduate classification.
Cross Listing: EHRD 634/WGST 634.

WGST 639/ANTH 639 Gender, Ethnicity, and Class in Archaeological Research
Credits 3. 3 Lecture Hours.
Explores theoretical and methodological issues in engendering archaeology; ideological biases in the interpretation of roles attributed to women, men and underrepresented groups in the past; the impact of cultural transformations on underrepresented groups and gender relations; and how to formulate research questions concerning these issues.
Prerequisite: Graduate classification.
Cross Listing: ANTH 639/WGST 639.

WGST 645 Queer Theory
Credits 3. 3 Lecture Hours.
Examines origins of theories of gender and sexual diversity and their intersections with feminist theories; considers foundational and contemporary texts that address queer theory.
Prerequisite: Graduate classification.

WGST 649/EHRD 649 Feminist Pedagogy
Credits 3. 3 Lecture Hours.
Explores how educational systems and institutions have regarded women historically and contemporarily; considers practical and theoretical writings on feminist pedagogy.
Prerequisite: EHRD/WGST 634/EHRD 634 Introduction to Gender and Education.
Cross Listing: EHRD 649/WGST 649.

WGST 650/EHRD 650 Gender and International Education
Credits 3. 3 Lecture Hours.
Explores the intersection of formal and informal education and understandings of gender in countries beyond the United States.
Prerequisites: EHRD/WGST 634/EHRD 634 Introduction to Gender and Education.
Cross Listing: EHRD 650/WGST 650.

WGST 652/COMM 656 Feminism and Rhetoric
Credits 3. 3 Lecture Hours.
Historical development of the ideology, theory and rhetorical practices of U.S. feminism; criticism of significant artifacts of women orators and writers from the 19th century to contemporary times.
Cross Listing: COMM 656/WGST 652.

WGST 661/SOCI 661 Sociology of Gender
Credits 3. 3 Lecture Hours.
Overview of the Sociology of Gender, historical development, primary concepts, contemporary issues. Theory, methods, and applications.
Prerequisite: Graduate classification.
Cross Listing: SOCI 661/WGST 661.

WGST 680/ENGL 680 Theories of Gender
Credits 3. 3 Lecture Hours.
Theories of gender, sexualities, feminism, embodiment, and difference with particular focus on their relationship to literary and cultural studies; emphasis on contemporary theoretical positions, discourses, and debates.
Cross Listing: ENGL 680/WGST 680.

WGST 685 Directed Studies
Credits 1 to 4. 1 to 4 Other Hours.
Directed individual study of selected problems in the field of women's and gender studies.
Prerequisite: Approval of instructor.

WGST 689 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours. 0 to 4 Lab Hours.
Selected topics in an identified area of women's and gender studies. May be repeated for credit.
Prerequisite: Approval of instructor.

ZOOL - Zoology

Courses

ZOOL 289 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Selected topics in an identified area of zoology. May be repeated for credit.
Prerequisite: Approval of instructor.

ZOOL 291 Research
Credits 1 to 4. 1 to 4 Other Hours.
Active research of basic nature under the supervision of a Department of Biology faculty member.
Prerequisites: Freshman or sophomore classification and approval of instructor.

ZOOL 489 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Selected topics in an identified area of zoology. May be repeated once for credit.

ZOOL 491 Research
Credits 1 to 4. 1 to 4 Other Hours.
Active research of basic nature under the supervision of a Department of Biology faculty member.
Prerequisites: Junior or senior classification and approval of instructor.
Faculty

Please visit http://facultycatalog.tamu.edu for a current list of faculty.

Abanov, Artem G, Associate Professor. Physics And Astronomy. PhD, Texas AM University, 1998.

Abbey, James D, Assistant Professor. Information Operations Mgmt. PhD, Pennsylvania State University, 2013.

Abedi Mashhadimighani, Sara, Assistant Professor. Petroleum Engineering. PhD, University of Southern California, 2012.

Abouassi, Khalid, Assistant Professor. Public Service Administration. PhD, Syracuse University, 2012.

Abraham, Celeste M, Associate Professor. Periodontics. DDS, Howard University, 1988.

Acosta, Sandra T, Assistant Professor. Educational Psychology. PhD, Texas AM University, 2010.

Adams, Leslie G, Senior Professor. Veterinary Pathobiology. DVM, Texas AM University, 1968.

Adams, Ralph J, Distinguished Professor. History. PhD, University of California, Santa Barbara, 1972.

Agnolet, Glenn, Professor. Physics And Astronomy. PhD, Cornell University, 1983.

Agnor, Dottiedee, Instructional Associate Professor. Health Kinesiology. MS, Texas AM University, 1992.

Ahlgren, Angela K, Lecturer. Performance Studies. PhD, University of Texas, Austin, 2011.

Aitani, Koichiro, Associate Professor. Architecture. MAR, Virginia Polytechnic Institute and State University, 1997.

Akabani, Gamal, Associate Professor. Nuclear Engineering. PhD, Texas AM University, 1990.

Akbulut, Mustafa, Associate Professor. Chemical Engineering. PhD, University of California, Santa Barbara, 2007.

Akleman, Derya G, Senior Lecturer. Statistics. PhD, Texas AM University, 1996.

Alajlouni, Khalid, Clinical Professor. Restorative Sciences. DDS, Marquette University, 2011.

Alge, Daniel L, Assistant Professor. Biomedical Engineering. PhD, Purdue University, 2010.

Alkon, Cynthia J, Professor. School of Law. JD, University of California, 1990.

Allen, Angela J, Instructional Assistant Professor. Mathematics. MS, Texas AM University, 2005.

Allen, Natalie L, Senior Lecturer. Accounting. MS, Texas AM University, 1988.
Allen, Roland E, Professor. Physics And Astronomy. PhD, University of Texas, Austin, 1969.

Allred, Clinton D, Associate Professor. Nutrition Food Science. PhD, University of Illinois at Urbana-Champaign, 2002.

Alonzo, Juan J, Associate Professor. English. DSc, Washington University in St. Louis, 1991.

Alperntarlow, Sara, Associate Professor. History. PhD, University of Maryland, 1978.

Alton, Stephen R, Professor. School of Law. JD, University of Texas School of Law, 1981.

Alvard, Michael S, Associate Professor. Anthropology. PhD, University of New Mexico, 1993.

Ames, Aaron D, Associate Professor. Mechanical Engineering. PhD, University of California, Berkeley, 2006.

Amini, Noushin, Visiting Assistant Professor. Mechanical Engineering. PhD, Texas AM University, 2011.

An, Yonghong, Assistant Professor. Economics. PhD, John Hopkins University, 2011.

Anand, Nagamangala, Professor. Mechanical Engineering. PhD, Purdue University, 1983.

Anders, Katherine C, Assistant Professor. TAMU Libraries. MLIS, University of Pittsburgh, 2005.

Anderson, Richard K, Professor. Economics. PhD, Purdue University, 1976.

Anderson, Sammy K, Executive Associate Professor. Landscape Arch Urban Planning. PhD, Texas AM University, 1993.

Anderson, Stuart, Professor. Civil Engineering. PhD, University of Texas, 1989.

Annamalai, Kalyan, Professor. Mechanical Engineering. PhD, Georgia Institute of Technology, 1975.

Appiah, Bernard, Instructional Assistant Professor. School of Public Health. DrPH, Texas AM University, 2013.

Applegate, Brian E, Associate Professor. Biomedical Engineering. PhD, Ohio State University, 2000.

Archer, Gregory S, Assistant Professor Extension Specialist. Poultry Science. PhD, Texas AM University, 2005.

Archer, Holli R, Assistant Professor. Ag Leadership, Educ Comm. PhD, Texas AM University, 2013.

Arenas, Angela M, Assistant Professor. Veterinary Pathobiology. PhD, Texas AM University, 2007; DVM, La Salle University, Columbia, 2002.

Armstrong, Beth E, Lab Instructor. Biology. MS, Texas AM University, 2006.

Armstrong, Carisa L, Clinical Associate Professor. Health Kinesiology. MA, Case Western Reserve University, 2002.

Arnold, Carolyn E, Associate Professor. Vet Large Animal Clinical Sc. DVM, Michigan State University, 1998.

Arora, Rashi, Lecturer. Mathematics. MS, Texas AM University, 2011.

Arosh, Joe A, Associate Professor. Vet Integrative Biosciences. DVM, University Laval, 2004; PhD, Laval University, 2003.

Arosh, Sakhila Banu, Assistant Professor. Vet Integrative Biosciences. PhD, University of Madras, 2002.

Askew, Patricia J, Adjunct Professor. School of Law. JD, Texas Wesleyan University School of Law, 2005.

Aurispa, Benjamin, Instructional Assistant Professor. Mathematics. MS, Texas AM University, 2006.

Austin, Amy L, Instructional Assistant Professor. Mathematics. MS, Texas AM University, 1994.

Autenrieth, Robin L, Professor. Civil Engineering. PhD, Clarkson University, 1986.

Avnet, Mark S, Assistant Professor. Industrial Systems Eng. PhD, Massachusetts Institute of Technology, 2009.

Awika, Joseph M, Associate Professor. Soil Crop Sciences. PhD, Texas AM University, 2003.

Ayres, Pamela S, Professor. School of Law. JD, BAYLOR UNIVERSITY, 1988.

Aziz, Sahar F, Associate Professor. School of Law. JD, University of Texas School of Law, 2004.

Babe, John C, Assistant Professor Of The Practice. Architecture. PhD, University of Toronto, 1989.

Baetge, Courtney L, Clinical Assistant Professor. Vet Small Animal Clinical Sc. DVM, Texas AM University, 2003.

Bagavathiannan, Muthukumar V, Assistant Professor. Soil Crop Sciences. PhD, University of Manitoba, 2009.

Bailey, Gregory T, Clinical Assistant Professor. TAMU Libraries. MLIS, Indiana University, 2010.

Balbuena, Perla B, Professor. Chemical Engineering. PhD, University of Texas, 1996.

Baldwin, John T, Senior Lecturer. Chemical Engineering. PhD, Texas AM University, 1968.

Bales, Stephen E, Associate Professor. TAMU Libraries. PhD, University of Tennessee, 2008.

Ball, Judith M, Associate Professor. Veterinary Pathobiology. PhD, Louisiana State University, 1990.

Ballard, Danny J, Adjunct Professor. Health Kinesiology. PhD, Oklahoma State University, 1982.

Ballestro, John J, Clinical Associate Professor. TAMU Libraries. MS, University of Illinois at Urbana-Champaign, 2003.

Ballouli, Khalid W, Adjunct Assistant Professor. Health Kinesiology. PhD, Texas AM University, 2011.

Balog, Robert S, Associate Professor. Electrical Computer Eng. PhD, University of Illinois at Urbana-Champaign, 2006.

Baltazar, Juan Carlos, Tees Research Engineer. Architecture. PhD, Texas AM University, 2006.

Baltensperger, David D, Professor. Soil Crop Sciences. PhD, New Mexico State University, 1981.

Banta, Jason P, Associate Professor Extension Specialist. Animal Science. BS, Texas AM University, 1999.

Bardenhagen, Eric K, Assistant Professor. Landscape Arch Urban Planning. PhD, Texas AM University, 2011.

Barnes, Wayne R, Professor. School of Law. JD, Texas Tech University, 1995.

Barnhardt, Terrence M, Instructional Associate Professor. Psychology. PhD, University of Arizona, 1993.

Barondeau, David P, Associate Professor. Chemistry. PhD, Texas AM University, 1996.

Barr, Andrew, Assistant Professor. Economics. PhD, University of Virginia, 2015.

Barrett, Jeannie, Senior Lecturer. Accounting. MBA, Sam Houston State University, 2002.

Barrington, Jennifer J, Clinical Associate Professor. General Dentistry. DDS, University of Texas Health Science Center at Houston, 1996.

Barry, Adam, Associate Professor. Health Kinesiology. PhD, Texas AM University, 2007.

Bartlett, Leeanna, Assistant Professor. Public Health Sciences. BA, Texas AM University-Commerce, 1966.

Bastian, Peter A, Professor Of The Practice. Petroleum Engineering. MS, Texas AM University, 1983.

Batista, Paul J, Associate Professor. Health Kinesiology. JD, Baylor University, 1976.

Baumann, Paul A, Professor Extension Specialist. Soil Crop Sciences. PhD, Texas Tech University, 1981.

Baumgardner, David E, Senior Lecturer. Biology. PhD, Texas AM University, 2008.

Baxter, Jerry D, Executive Professor. Management. MBA, Georgia State University, 1996.

Bearfield, Domonic A, Associate Professor. Public Service Administration. PhD, Rutgers University, 2004.

Beason, William L, Associate Professor. Civil Engineering. PhD, Texas Tech University, 1980.

Beathard, Karen M, Senior Lecturer. Nutrition Food Science. MS, Texas Women's University, 1990.

Beaver, Bonnie V, Professor. Vet Small Animal Clinical Sc. DVM, University of Minnesota, 1968.

Bedford, Diane C, Clinical Assistant Professor. Health Kinesiology. MFA, Florida State University, 2010.

Bednarz, Sarah W, Professor. Geography. PhD, Texas AM University, 1992.

Beheshti, Ali, Visiting Assistant Professor. Mechanical Engineering. DEN, Louisiana State University, 2013.

Bellows, Charles T, Adjunct Professor. School of Law. JD, SMU Dedman School of Law, 1976.

Belmonte, Arthur P, Instructional Assistant Professor. Mathematics. MS, Texas AM University, 1986.

Benden, Mark E, Associate Professor. Environmental Occpnl Hlth. PhD, Texas AM University, 2006; MS, Texas AM University, 1992.

Benefiel, Candace, Associate Professor. TAMU Libraries. MS, University of Texas, 1981.

Beninger, Christine K, Associate Professor. Restorative Sciences. DDS, University of Southern California, 1978.

Bennett, George K, Senior Professor. Industrial Systems Eng. PhD, Texas Tech University, 1970.

Bennett, Gregg R, Professor. Health Kinesiology. EDD, Auburn University, 1997.

Benson, Monica A, Adjunct Professor. School of Law. JD, Texas Wesleyan University School of Law, 2002.

Bento, Pedro, Assistant Professor. Economics. PhD, University of Toronto, 2013.

Benz, Michael R, Professor. Educational Psychology. PhD, University of Oregon, 1983.

Bergbreiter, David E, Professor. Chemistry. PhD, Massachusetts Institute of Technology, 1974.

Bernard, Jessica A., Assistant Professor. Psychology. PhD, University of Michigan, 2012.

Berthot, Patricia A, Instructional Associate Professor. Health Kinesiology. MEd, Stephen F. Austin State University, 1990.

Bessler, David A, Professor. Agricultural Economics. PhD, University of California, Davis, 1977.

Birely, Anna C, Assistant Professor. Civil Engineering. PhD, University of Washington, 2012.

Bissett, Wesley T, Associate Professor. Vet Large Animal Clinical Sc. PhD, Texas AM University, 2007; DVM, Texas AM University, 1997.

Bitouni, Annetta, Assistant Professor. Public Health Sciences. DDS, National and Capodistrian University of Athens, 2004.

Blake, Jamilia J, Associate Professor. Educational Psychology. PhD, University of Georgia, 2007.

Blanchard, Terry L, Professor. Vet Large Animal Clinical Sc. DVM, Kansas State University, 1976; MS, University of Missouri-Columbia, 1983.

Blanton, Carlos K, Associate Professor. History. PhD, Rice University, 1999.

Bloomfield, Susan A, Professor. Health Kinesiology. EDD, Ohio State University, 1992.

Blue-Mclendon, Alice, Clinical Assistant Professor. Vet Physiology Pharmacology. DVM, Texas AM University, 1989.

Bluemel, Janet F, Professor. Chemistry. PhD, Technical University of Munich, Germany, 1989.

Boadu, Frederick O, Professor. Agricultural Economics. PhD, University of Kentucky, 1981.

Boellstorff, Diane E, Assistant Professor Extension Specialist. Soil Crop Sciences. PhD, University of California, 1991.

Boivie, Steven R, Associate Professor. Management. PhD, University of Texas, Austin, 2006.

Bokelmann, Annamarie D, Assistant Professor. Environmental Occptnl Hlth. MS, Texas AM University, 1999.

Bollinger, Kathryn L, Instructional Assistant Professor. Mathematics. MS, Texas AM University, 1998.

Bologan, Anatol, Professor. Restorative Sciences. DDS, University of Tennessee, 1976.

Booth, Geoffrey J, Associate Professor. Landscape Arch Urban Planning. MPA, University of Queensland, 1987; MS, University of Queensland, 1987.

Bosquez, Janet M, Instructional Assistant Professor. Health Kinesiology. MS, Texas AM University, 1986.

Boucher, Anthony M, Clinical Associate Professor. Health Kinesiology. PhD, Texas Women's University, 2008.

Boudreau, Christen E, Clinical Assistant Professor. Vet Small Animal Clinical Sc. DVM, Texas AM University, 2010; PhD, Baylor College of Medicine, 2001.

Bouton, Thomas W, Professor. Ecosystem Science Mgmt. PhD, Brigham Young University, 1979.

Bouwman, Christa, Associate Professor. Finance. PhD, University of Michigan, 2005.

Boyd, Dean L, Visiting Assistant Professor. Landscape Arch Urban Planning. PhD, Texas AM University, 1995.

Boyd, James G, Associate Professor. Aerospace Engineering. PhD, Texas AM University, 1994.

Brannan, Michael P, Assistant Professor. Mathematics. PhD, Queen's University, 2006.

Breken, Kirstin L, Instructional Professor. Health Kinesiology. MS, Texas AM University, 1982.

Brett, Jeremy W, Assistant Professor. TAMU Libraries. MLS, University of Maryland, 1999.

Brewer, Maurice A, Professor Of The Practice. Biomedical Engineering. PhD, Texas AM University, 1977.

Bridges, Cheryl H, Adjunct Professor. Marketing. BA, Texas Women's University, 1968.

Bright, Elise M, Professor. Landscape Arch Urban Planning. PhD, Texas AM University, 1980.

Bright, Leonard A, Associate Professor. Public Service Administration. PhD, Portland State University, 2003.

Brooks, Charles E, Associate Professor. History. PhD, University at Buffalo, State University of New York, 1988.

Brooks, Sarah D, Associate Professor. Atmospheric Sciences. PhD, University of Colorado, 2002.

Brossart, Dan F, Associate Professor. Educational Psychology. PhD, University of Missouri, 1996.

Brown, Lawrence S, Instructional Assistant Professor. Chemistry. PhD, Princeton University, 1983.

Brundage, Adrienne L, Assistant Lecturer. Entomology.
PhD, Texas AM University, 2012.

Bryan, Kisha C, Clinical Assistant Professor. Teaching, Learning Culture.
PhD, University of Florida, 2012.

Bryant, Henry L, Research Associate Professor. Agricultural Economics.
PhD, Texas AM University, 2003.

Bryant, John A, Associate Professor. Construction Science.
PhD, Texas AM University, 1995.

Bryant, Vaughn M, Professor. Anthropology.
PhD, University of Texas, Austin, 1969.

Bryk, Mary E, Associate Professor. Biochemistry And Biophysics.
PhD, Albany Medical College, 1994.

Buchanan, John J, Professor. Health Kinesiology.
PhD, Florida Atlantic University, 1996.

Buchanan, Walter W, Professor. Eng Tech Ind Distribution.
PhD, Indiana University, 1993.

Buckner, Sean M, Clinical Assistant Professor. TAMU Libraries.
MS, University of Michigan, 2012.

Budke, Christine M, Associate Professor. Vet Integrative Biosciences.
PhD, Philosophisch-Naturwissenschaftliche Fakultät der Universität Basel, 2005; DVM, Purdue University, 2001; DVM, Purdue University, 2001.

Budzise-Weaver, Tina M, Assistant Professor. TAMU Libraries.
MS, University of North Texas, 2012.

Buenger, Victoria L, Clinical Professor. Management.
PhD, Texas AM University, 1990.

Buenger, Walter L, Professor. History.
PhD, Rice University, 1979.

Bukkapatnam, Satish T, Professor. Industrial Systems Eng.
PhD, Pennsylvania State University, 1997.

Bukur, Dragomir B, Professor. Chemical Engineering.
PhD, University of Minnesota, 1974.

Bullock, Justin B, Assistant Professor. Public Service Administration.
PhD, University of Georgia, 2014.

Burch, Robert W, Professor. Philosophy Humanities.
PhD, Rice University, 1969.

Burdine, James S, Professor. Sociology.
PhD, University of Chicago, 1982.

Burr, Michael E, Professor. Vet Integrative Biosciences.
PhD, University of Pennsylvania, 1985.

Burford, Nancy G, Associate Professor. TAMU Libraries.
MS, University of North Texas, 1999.

Burke, Adam J, Lecturer. Eng Tech Ind Distribution.
BS, Texas AM University, 1997.

Burke, John A, Associate Professor. Educational Psychology.
PhD, University of Oregon, 2001.

Burke, Shanna H, Associate Professor. Educational Psychology.
PhD, University of Oregon, 1998.

Burk, James S, Professor. Sociology.
PhD, University of Chicago, 1982.

Burkart, Patrick C, Professor. Department Of Communication.
PhD, University of Texas, 2000.

Burke, Adam J, Lecturer. Eng Tech Ind Distribution.
BS, Texas AM University, 1997.

Burk, John A, Associate Professor. Educational Psychology.
PhD, University of Oregon, 2001.

Burkert, Patrick C, Professor. Department Of Communication.
PhD, University of Texas, 2000.

Burkhead, Robert L, Professor. History.
PhD, Texas AM University, 1975.

Burkhead, Robert L, Professor. History.
PhD, Texas AM University, 1975.

Burke, John A, Associate Professor. Educational Psychology.
PhD, University of Oregon, 2001.

Burk, James S, Professor. Sociology.
PhD, University of Chicago, 1982.

Burkert, Patrick C, Professor. Department Of Communication.
PhD, University of Texas, 2000.

Burk, James S, Professor. Sociology.
PhD, University of Chicago, 1982.

Burkert, Patrick C, Professor. Department Of Communication.
PhD, University of Texas, 2000.

Burkhead, Robert L, Professor. History.
PhD, Texas AM University, 1975.

Burkhard, Robert C, Professor. Vet Integrative Biosciences.
PhD, Wayne State University, 1976.
Cairns, David M, Professor. Geography. 
PhD, University of Iowa, 1995.

Caldwell, David J, Professor. Poultry Science. 
PhD, Texas AM University, 1997.

PhD, Texas AM University, 2009.

Campagnol, Gabriela, Assistant Professor. Architecture. 
PhD, University of Sao Paulo, 2003.

Campana, Lilia, Lecturer. Anthropology. 
PhD, Texas AM University, 2014.

Campbell, Heidi A, Associate Professor. Department Of Communication. 
PhD, University of Edinburgh, 2002.

Campbell, Lisa, Professor. Oceanography. 
PhD, State University of New York at Stony Brook, 1985.

Campbell, Mary E, Associate Professor. Sociology. 

Campbell, Phillip M, Associate Professor. Orthodontics. 
DDS, Baylor University College of Dentistry, 1971.

Camp-Estes, Monica H, Lecturer. Hlth Promotion Comm Hlth Sci. 
DrPH, University Of North Texas Health Science Center, 2008.

Cannaday, Rania A, Assistant Professor. Institute of Biosciences Tec. 
MD, University of Texas Health Science Center at Houston, 2014.

Cannon, Marvin, Senior Professor. Vet Integrative Biosciences. 
PhD, Texas AM University, 2005; DVM, Texas AM University, 1996.

Cantey, Samuel B, Adjunct Professor. School of Law. 
JD, University of Tulsa, 2002.

Cantrell, Emily S, Clinical Assistant Professor. Teaching, Learning Culture. 
PhD, Texas AM University, 2008.

Cantrell, Pierce E, Associate Professor. Electrical Computer Eng. 
PhD, Georgia Institute of Technology, 1981.

Capar, Ismail, Associate Professor. Eng Tech Ind Distribution. 
PhD, Mississippi State University, 2007.

Capareda, Sergio C, Associate Professor. Biological Agricultural Eng. 
PhD, Texas AM University, 1990.

Capps, Oral, Executive Professor. Agricultural Economics. 

Capraro, Mary M, Associate Professor. Teaching, Learning Culture. 
PhD, University of Southern Mississippi, 2000.

Capraro, Robert M, Professor. Teaching, Learning Culture. 
PhD, University of Southern Mississippi, 2000.

PhD, Texas AM University, 1998.

Castillo, Jasen J, Associate Professor. International Affairs. 
PhD, University of Chicago, 2003.
Castillo, Linda G, Professor. Educational Psychology.
PhD, University of Utah, 1999.

Castor, Nicole M, Assistant Professor. Anthropology.
PhD, University of Chicago, 2009.

Cathey, James C, Associate Professor Extension Specialist. Wildlife Fisheries Sciences.
PhD, Texas Tech University, 1997.

Caton, Jerald A, Professor. Mechanical Engineering.
PhD, Massachusetts Institute of Technology, 1980.

Caverlee, James B, Associate Professor. Computer Science Engineering.
PhD, Georgia Institute of Technology, 2007.

Cecchini, Fabiana, Instructional Assistant Professor. International Studies.

Ceen, Richard F, Clinical Professor. Orthodontics.
DDS, University of Tennessee, 1966.

Cerami, Joseph R, Senior Lecturer. International Affairs.
PhD, Pennsylvania State University, 2007.

PhD, Italian Institute for Human Sciences, 2013.

Chaffin, Morgan K, Professor. Vet Large Animal Clinical Sc.
DVM, North Carolina State University, 1985; MS, Texas AM University, 1990; BS, North Carolina State, 1981.

Chai, Jinxian, Associate Professor. Computer Science Engineering.

Chakravorty, Suman, Associate Professor. Aerospace Engineering.
PhD, University of Michigan, 2004.

Chamberland-Tremblay, Jean-Francois, Associate Professor. Electrical Computer Eng
PhD, University of Illinois, 2004.

Chamitoff, Gregory E, Professor Of The Practice. Aerospace Engineering.
PhD, Massachusetts Institute of Technology, 1992.

Chang, Jiang, Associate Professor. Institute of Biosciences Tec.
PhD, Texas AM University, 1999.

Chang, Kai, Professor. Electrical Computer Eng.
PhD, University of Michigan, 1976.

Chang, Kuang-An, Professor. Civil Engineering.
PhD, Cornell University, 1999.

Chang, Liang, Visiting Assistant Professor. Mathematics.
PhD, University of California, Santa Barbara, 2013.

Chang, Ping, Professor. Oceanography.
PhD, Princeton University, 1988.

Chapkin, Robert S, Distinguished Professor. Nutrition Food Science.
PhD, University of California, Davis, 1986.

Chapman, Denise D, Instructional Assistant Professor. Health Kinesiology.
MS, University of Central Missouri, 2000.

Choi, Kunhee, Assistant Professor. Construction Science. PhD, University of California, Berkeley, 2008.

Choi, Seong G, Associate Professor. Electrical Computer Eng. PhD, University of Illinois at Urbana-Champaign, 1994.

Choobineh, Joobin, Associate Professor. Information Operations Mgmt. PhD, University of Arizona, 1985.

Chowdhury, Shahla, Assistant Lecturer, Mechanical Engineering. MS, University of Illinois at Urbana-Champaign, 2013.

Chroust, David Z, Associate Professor. TAMU Libraries. PhD, Texas AM University, 2009.

Chu, Kung-Hui, Associate Professor. Civil Engineering. PhD, University of California, Berkeley, 1998.

Chubaryan, Tatyan, Clinical Associate Professor. TAMU Libraries. MA, Texas AM University, 1997.

Cizmas, Leslie H, Assistant Professor. Environmental Occpnl Hlth. PhD, Texas AM University, 2003.

Clark, Heather R, Clinical Assistant Professor. Health Kinesiology. PhD, Texas AM University, 2014.

Clark, Norman L, Senior Lecturer, Eng Tech Ind Distribution. MBA, Texas AM University, 1972.

Clearfield, Abraham, Distinguished Professor. Chemistry. PhD, Rutgers University, 1954.

Clemens, Nathan H, Assistant Professor. Educational Psychology. PhD, Lehigh University, 2009.

Coady, William J, Instructional Associate Professor. Health Kinesiology. MS, Texas AM University, 1992.

Coates, Craig J, Associate Professor. Entomology. PhD, Australian National University, 1996.

Cobb, Stanton W, Associate Professor. Restorative Sciences. DDS, Baylor College of Dentistry, 1983.

Cohn, Samuel R, Professor. Sociology. PhD, University of Michigan, 1981.

Cohn, William B, Senior Lecturer. Biology. PhD, Texas AM University, 2000.

Cole, Christopher W, Instructional Assistant Professor. Performance Studies. MFA, Old Dominion University, 2011.

Conlee, Don T, Instructional Professor. Atmospheric Sciences. PhD, Texas AM University, 1994.
Conner, James R, Professor. Agricultural Economics. PhD, Texas AM University, 1970.

Cook, Scott J, Assistant Professor. Political Science. PhD, University of Pittsburgh, 2014.
Coombs, W. Timothy, Professor. Department Of Communication. PhD, Purdue University, 1990.
Cooper, Brandon D, Lecturer. English Language Institute. MA, Sam Houston State University, 2009.
Cooper, John T, Associate Professor Of The Practice. Landscape Arch Urban Planning. PhD, University of North Carolina at Chapel Hill, 2004.
Core, Brandon H, Adjunct Assistant Professor. Educ Admn Human Resource Dev. PhD, Texas AM University, 2013.
Cortes, Kalena E, Associate Professor. Public Service Administration. PhD, University of California, Berkeley, 2002.
Cosgriff-Hernandez, Elizabeth M, Associate Professor. Biomedical Engineering. PhD, Case Western Reserve University, 2005.

Cruz-Reyes, Jorge A, Associate Professor. Biochemistry And Biophysics. PhD, London School of Hygiene Tropical Medicine, 1992.

Cummings, Scott R, Professor Extension Specialist. Ag Leadership, Educ Comm. PhD, University of Texas Health Science Center at Houston, 1995.

Cunningham, George B, Professor. Health Kinesiology. PhD, Ohio State University, 2002.

Curley, Kevin O, Instructional Assistant Professor. Vet Integrative Biosciences. PhD, Texas AM University, 2012; DVM, Cornell University, 1996.

Dabareiner, Robin M, Associate Professor. Vet Large Animal Clinical Sc. DVM, University of Minnesota, 1988; PhD, Virginia/Maryland Regional College of Veterinary Medicine, 1998; MS, Virginia-Polytechnic Institute State University, 1992.

Dague, Laura A, Assistant Professor. Public Service Administration. PhD, University of Wisconsin, 2012.

Dahm, Paul F, Professor. Statistics. DVM, Iowa State University, 1979; PhD, Iowa State University, 1977.

Damnjanovic, Ivan, Associate Professor. Civil Engineering. PhD, University of Texas, 2006.

Dangoudoubiyam, Sriveny, Assistant Professor. Veterinary Pathobiology. PhD, Purdue University, 2009; DVM, Pondicherry University, India, 2000.

Dannenbaum, Joseph H, Instructional Associate Professor. Health Kinesiology. MA, Oklahoma State University, 2005.

Darcey, Louise W, Senior Lecturer. Information Operations Mgmt. MS, Texas AM University, 1974.

Darensbourg, Donald J, Distinguished Professor. Chemistry. PhD, University of Illinois at Urbana-Champaign, 1968.

Darensbourg, Marcetta, Distinguished Professor. Chemistry. PhD, University of Illinois at Urbana-Champaign, 1967.

Darnell, Gayden S, Instructional Associate Professor. Health Kinesiology. MS, Texas AM University, 1997.

Davidson, Emily S, Associate Professor. Psychology. PhD, State University of New York at Stony Brook, 1975.

Davies, Peter J, Professor. Institute of Biosciences Tec. PhD, University of Miami, 1975.

Davis, Donald S, Associate Professor. Veterinary Pathobiology. PhD, Texas AM University, 1979.

Davis, Sue E, Lecturer, English Language Institute. MS, Texas AM University, 1978.

Davis, Tim D, Professor. Horticultural Sciences. PhD, Oregon State University, 1983.

Davis, Trina J, Associate Professor. Teaching, Learning Culture. PhD, Texas AM University, 2005.

De La Garza, John, Adjunct Assistant Professor. Educ Admn Human Resource Dev. PhD, Texas AM University, 2011.

Dechow, Paul C, Professor. Biomedical Sciences. PhD, University of Chicago, 1980.

Deng, Youjun, Associate Professor. Soil Crop Sciences. PhD, Texas AM University, 2001.

Dengo, Carlos A, Executive Professor. Geology Geophysics. PhD, Texas AM University, 1982.

Dere, Ruhee J, Assistant Professor. Institute of Biosciences Tec. PhD, Texas AM University, 2006.

Deveau, Michael A, Clinical Assistant Professor. Vet Small Animal Clinical Sc. DVM, Kansas State University, 2005.

Devers, Cynthia, Associate Professor. Management. PhD, Michigan State University, 2003.

Dewald, Janice P, Professor. Dental Hygiene. DDS, University of Iowa, 1980.

Dexter, Rayna M, Instructional Assistant Professor. Performance Studies. MA, Kent State University, 2009.

Diaz, Michelle C, Clinical Assistant Professor. Accounting. PhD, Texas AM University, 2005.

Dickson, Donald R, Professor. English. PhD, University of Illinois at Urbana-Champaign, 1981.

Diesel, Alison B, Clinical Assistant Professor. Vet Small Animal Clinical Sc. DVM, Kansas State University, 2005.

Dietrich, Katheryn A, Instructional Associate Professor. Sociology. PhD, Texas AM University, 1994.

Dimarco, Steven F, Professor. Oceanography. PhD, University of Texas, Dallas, 1991.

Dindot, Scott V, Associate Professor. Veterinary Pathobiology. PhD, Texas AM University, 2003.

Dinges, Lewis R, Clinical Assistant Professor. Vet Large Animal Clinical Sc. DVM, Texas AM University, 1995.

Dirani, Khalil M, Associate Professor. Educ Admn Human Resource Dev. PhD, University of Illinois at Urbana-Champaign, 2007.

Dixon, Mary O, Visiting Assistant Professor. Health Kinesiology. PhD, Texas AM University, 2011.

Dodd, Courtney F, Assistant Professor Extension Specialist. Ag Leadership, Educ Comm. PhD, Texas AM University, 2013.

Dominguez, Brandon J, Clinical Assistant Professor. Vet Large Animal Clinical Sc. DVM, Texas AM University, 2005; MS, Texas AM University, 2007; BS, Texas AM University, 2001.
Donganokkar, Ranjeet M, Assistant Professor. Vet Physiology Pharmacology. PhD, Texas AM University, 2008.

Donkor, David A, Assistant Professor. Performance Studies. PhD, Northwestern University, 2008.

Donnell, James M, Professor Of The Practice. Mechanical Engineering. BS, Texas AM University, 1982.

Doron, Yuval, Lecturer. Mechanical Engineering. MS, Texas AM University, 2009.

Dou, Fugen, Assistant Professor. Soil Crop Sciences. PhD, Texas AM University, 2005.

Douglass, April G, Clinical Assistant Professor. Teaching, Learning Culture. PhD, Texas AM University, 2011.

Dowbell, Tiffany E, Assistant Professor Extension Specialist. Agricultural Economics. JD, University of New Mexico, 2009.

Downey, Mike L, Lecturer. College of Liberal Arts. MA, Angelo State University, 1981.

Dox, Donnaee, Associate Professor. Performance Studies. PhD, University of Minnesota, 1995.

Drew, Katherine A, Adjunct Professor. School of Law. JD, Southern Methodist University, 1977.

Dromgoole, Darrell A, Associate Professor Extension Specialist. Ag Leadership, Educ Comm. EDD, Texas AM University, 2007.

Dryden, Joseph W, Adjunct Professor. School of Law. JD, California Western School of Law, 1990.

Duan, Benchun, Associate Professor. Geology Geophysics. PhD, University of California, Riverside, 2006.

Dubriwny, Tasha N, Associate Professor. Department Of Communication. PhD, University of Georgia, 2005.

Dubuissin, Lydia M, Instructional Associate Professor. Health Kinesiology. MS, Texas AM University, 1999.

Dudensing, Rebekka M, Assistant Professor Extension Specialist. Agricultural Economics. PhD, Clemson University, 2008.

Dunbar, Kim R, Distinguished Professor. Chemistry. PhD, Purdue University, 1984.

Dunsford, Deborah W, Senior Lecturer. Ag Leadership, Educ Comm. PhD, Texas AM University, 1993.

Duong, Tri, Associate Professor. Poultry Science. PhD, North Carolina State University, 2008.

Duplessis, Anton R, Clinical Assistant Professor. TAMU Libraries. MA, Texas AM University, 2003.

Dupriest, Fred E, Professor Of The Practice. Petroleum Engineering. BS, Texas AM University, 1977.

Dutta, Bhaskar, Professor. Physics And Astronomy. PhD, Oklahoma State University, 1995.

Ferris, Thomas K, Assistant Professor. Industrial Systems Eng. MS, University of Michigan, 2006.

Fiechtner, Susan B, Clinical Associate Professor. Accounting. PhD, University of Oklahoma, 1982.

Fields, Sherecce A, Assistant Professor. Psychology. PhD, University of South Florida, 2008.

Fields, Steven D, Adjunct Professor. School of Law. JD, University of Oklahoma, 1986.

Filippi, Anthony M, Associate Professor. Geography. PhD, University of South Carolina, 2003.

Finch, Sherman S, Assistant Professor. Visualization. MA, Maryland Institute, 1998; MFA, Maryland Institute College of Art, 1997.

Fink, Rainer J, Associate Professor. Eng Tech Ind Distribution. PhD, Texas AM University, 1995.

Flagg, James C, Associate Professor. Accounting. PhD, Texas AM University, 1988.

Fianagan, Gerald P, Assistant Professor. School of Law. JD, University of Houston, 2003.

Fleischman, Forrest D, Assistant Professor. Ecosystem Science Mgmt. PhD, Indiana University, 2012.

Flint, Gerald D, Clinical Associate Professor. Management. PhD, Texas AM University, 1997.

Ford, Albert L, Professor. Physics And Astronomy. PhD, University of Texas, Austin, 1972.

Ford, David N, Associate Professor. Civil Engineering. PhD, Massachusetts Institute of Technology, 1995.

Fossett, Mark A, Professor. Sociology. PhD, University of Texas, Austin, 1983.

Foster, Christine L, Associate Professor. TAMU Libraries. MLS, Indiana University, 1981.

Foster, Courtney E, Lecturer. Accounting. MS, Texas AM University, 2008.

Foster, Margaret J, Associate Professor. TAMU Libraries. MS, University of North Texas, 1991.

Fragiadakis, Daniel, Assistant Professor. Economics. PhD, Stanford University, 2014.

Francique, Akihla R, Assistant Professor. Health Kinesiology. PhD, University of Georgia, 2008.
Frank-Cannon, Tamy C, Clinical Assistant Professor. Vet Integrative Biosciences. PhD, Texas AM University, 2005; DVM, Texas AM University, 1996.

Frauenfeld, Oliver W, Assistant Professor. Geography. PhD, University of Virginia, 2003.

Fries, Rainer J, Associate Professor. Physics And Astronomy. PhD, University of Regensburg, Germany, 2001.

Fry, Erin K, Lecturer. Mathematics. MS, University of Illinois at Urbana-Champaign, 1990.

Fry, Gary T, Associate Professor. Civil Engineering. PhD, University of Illinois, 1995.

Fuhrmann, Matthew C, Associate Professor. Political Science. PhD, University of Georgia, 2008.

Fullerton, Tracy L, Lecturer. Mechanical Engineering. PhD, Texas AM University, 2011.

Fulton, Sarah A, Associate Professor. Political Science. PhD, University of California, Davis, 2006.

Fuqua, Amy M, Adjunct Professor. School of Law. JD, University of Houston, 1997.

Furubotten, Lisa M, Associate Professor. TAMU Libraries. MLS, University of Pittsburgh, 1997.

Gabriel, Eleanor L, Adjunct Professor. School of Law. JD, Texas Tech School of Law, 1980.

Gaddis, Keith D, Visiting Assistant Professor. Geography. PhD, University of California, Los Angeles, 2014.

Gagliardi, Carl A, Professor. Physics And Astronomy. PhD, Princeton University, 1982.

Gaharwar, Akhilesh K, Assistant Professor. Biomedical Engineering. PhD, Purdue University, 2011.

Galanter, Philip, Associate Professor. Visualization. MFA, School of Visual Arts, 1999.

Galdo, Juan, Associate Professor. Hispanic Studies. PhD, University of Colorado, 2003.

Gamez, Roberto C, Lab Instructor. Chemistry. PhD, Texas AM University, 2014.

Gammon, Angelique C, Assistant Lecturer. College of Liberal Arts. BA, Texas AM University, 1982.

Gan, Jianbang, Professor. Ecosystem Science Mgmt. PhD, Iowa State University, 1990.

Gannaway, Mark E, Associate Professor. Restorative Sciences. DDS, Baylor College of Dentistry, 1981.

Ganz, Jennifer, Professor. Educational Psychology. PhD, University of Kansas, 2002.

Gao, Huilin, Assistant Professor. Civil Engineering. PhD, Princeton University, 2005.

Garcia, Luis R, Clinical Assistant Professor. Restorative Sciences. PhD, University of Texas, Austin, 1996.

Garcia, Tanya P, Assistant Professor. Epidemiology Biostatistics. PhD, Texas AM University, 2011.

Gariazzo, Mariana S, Instructional Assistant Professor. Performance Studies. PhD, University of Texas, 2005.

Gaspar, Julian, Clinical Professor. Finance. PhD, Georgetown University, 1981.

Gatson, Sarah N, Associate Professor. Sociology. PhD, Northwestern University, 1999.

Gehring, Kerri B, Associate Professor. Animal Science. PhD, Texas AM University, 1994.

Geismar, Harry N, Associate Professor. Information Operations Mgmt. PhD, University of Texas, Dallas, 2003.

George, James P, Professor. School of Law. JD, University of Tulsa, 1978.

George, Theodore D, Associate Professor. Philosophy Humanities. PhD, Villanova University, 2000.

German, Elizabeth M, Assistant Professor. TAMU Libraries. MS, University of Illinois at Urbana-Champaign, 2009.

Geva, Nehemia, Associate Professor. Political Science. PhD, Ohio State University, 1977.

Ghosh, Shubha, Adjunct Professor. School of Law. JD, Stanford University, 1994.

Gibbons, Philippa M, Clinical Assistant Professor. Vet Large Animal Clinical Sc. MS, Texas AM University, 2012; BVETMED, Vet Med-Royal Veterinary College, United Kingdom, 2008; BS, University of Reading, United Kingdom, 2005.

Gilmour, Lindsey J, Clinical Assistant Professor. Vet Large Animal Clinical Sc. DVM, Texas AM University, 2009.

Giusti, Cecilia H, Associate Professor. Landscape Arch Urban Planning. PhD, University of Texas, Austin, 2001.

Glasner, Margaret E, Associate Professor. Biochemistry And Biophysics. PhD, Massachusetts Institute of Technology, 2003.

Glickman, Gerald N, Professor. Endodontics. DDS, Ohio State University, 2014.

Glover, Aaron C, Instructional Assistant Professor. Performance Studies. MFA, University of Houston, 2010.

Gold, Roger E, Senior Professor. Entomology. PhD, University of California, Berkeley, 1974.

Goldberg, Daniel W, Assistant Professor. Geography. PhD, University of Southern California, 2010.

Goldman, Michael R, Adjunct Professor. School of Law. JD, South Texas College of Law, 1999.

Golla, Michael R, Senior Lecturer. Eng Tech Ind Distribution. MBA, Texas AM University, 2002.

Gomes, Carmen L, Assistant Professor. Biological Agricultural Eng. PhD, Texas AM University, 2010.

Gomez, Daniel, Instructional Assistant Professor. Health Kinesiology. MEd, Texas AM University, 2010.

Gomez, Lorinda B, Instructional Associate Professor. Health Kinesiology. MS, Texas AM University, 2006.

Gonezen, Sevan, Assistant Professor. Mechanical Engineering. PhD, Rensselaer Polytechnic Institute, 2011.

Goodson, Patricia, Professor. Health Kinesiology. PhD, University of Texas, 1996.

Gopalakrishnan, Ganesh, Senior Lecturer. Chemistry. PhD, University of Madras, 1977.

Gosselin, Kevin, Assistant Dean for Research and Evidence Based Practice. College of Nursing. PhD, Texas Tech University, 2009.

Goulart, Ana E, Associate Professor. Eng Tech Ind Distribution. PhD, Georgia Institute of Technology, 2005.

Graf, Kelly E, Assistant Professor. Anthropology. PhD, University of Nevada, Reno, 2008.

Gramann, James H, Professor. Recreation, Park Tourism Sc. PhD, University of Illinois at Urbana-Champaign, 1980.

Grant, Melinda L, Instructional Professor. Health Kinesiology. MS, West Virginia University, 1976.

Grasley, Zachary C, Associate Professor. Civil Engineering. PhD, University of Illinois, 2006.

Gratz, Paul V, Associate Professor. Electrical Computer Eng. PhD, University of Texas, 2008.

Graves, Stephanie J, Associate Professor. TAMU Libraries. MS, University of Illinois at Urbana-Champaign, 2004.

Grayton, Jesse E, Clinical Assistant Professor. Vet Small Animal Clinical Sc. DVM, Kansas State University, 2009.

Green, John S, Clinical Professor. Health Kinesiology. PhD, Texas AM University, 1996.

Green, Lisa L, Adjunct Assistant Professor. Health Kinesiology. PhD, Texas Women's University, 2001.

Green, Micah, Associate Professor. Chemical Engineering. PhD, Massachusetts Institute of Technology, 2007.

Green, Michael Z, Professor. School of Law. JD, Loyola University, 1992.
Green, Thomas A, Associate Professor. Anthropology. PhD, University of Texas, 1974.

Greenwood, C Michael, Clinical Professor. Health Kinesiology. PhD, Texas Woman's University, 1990.

Gregory, Sean T, Assistant Professor. Health Policy Management. MS, University of Minnesota, 2012; MBA, The Florida State University, 1999.

Greiner, Katharine, Lecturer. English Language Institute. MEd, Texas AM University, 2008.

Grenwelge, Cheryl H, Assistant Professor Extension Specialist. Educational Psychology. PhD, Texas AM University, 2010.

Gresham, Larry G, Associate Professor. Marketing. PhD, University of South Carolina, 1982.

Griffin, Cleet E, Clinical Associate Professor. Vet Large Animal Clinical Sc. DVM, Texas AM University, 1990.

Griffin, John F, Assistant Professor. Vet Large Animal Clinical Sc. DVM, Texas AM University, 2004.

Griffin, Robert J, Associate Professor. English. PhD, Yale University, 1985.

Griffin, Ronald C, Professor. Agricultural Economics. PhD, University of Wisconsin, 1980.

Grigorchuk, Rostislav, Distinguished Professor. Mathematics. PhD, Moscow State University, 1978; MS, Moscow State University of Lomonosov, 1975.

Grogan, David M, Associate Professor. Oral Maxillofacial Surgery. DDS, Baylor College of Dentistry, 1981.

Grossman, Steven D, Associate Professor. Accounting. PhD, Tufts University, 1972.

Gruben, Darla, Clinical Assistant Professor. College of Nursing. MS, University of Texas Health Science Center, San Antonio, 1999.

Grunlan, Melissa A, Associate Professor. Biomedical Engineering. PhD, University of South Carolina, 2004.

Gu, Guofei, Associate Professor. Computer Science Engineering. PhD, Georgia Institute of Technology, 2008.

Gu, Mengmeng, Assistant Professor Extension Specialist. Horticultural Sciences. PhD, University of Arkansas, 2006.

Guidry, Jeffrey J, Associate Professor. Health Kinesiology. PhD, University of Texas Health Science Center at Houston, 1994.

Guneralp, Burak, Research Assistant Professor. Geography. PhD, University of Illinois at Urbana-Champaign, 2006.

Guneralp, Inci, Associate Professor. Geography. PhD, University of Illinois at Urbana-Champaign, 2007.

Gunnels, Emily E, Lecturer. Health Kinesiology. MS, Texas AM University, 2005.

Gutierrez, Kristina A, Lecturer. English.
PhD, University Of Texas, San Antonio, 2012.

Gutierrez-Osuna, Ricardo, Professor. Computer Science Engineering.
PhD, North Carolina State University, 1998.

Guyton, Sally C, Senior Lecturer. Finance.
MBA, University of Texas, 1982.

Haberl, Jeff, Professor. Architecture.
PhD, University of Colorado, 1986.

Haefeli, Evan P, Associate Professor. History.
PhD, Princeton University, 2000.

Haglund, John S, Lecturer. Mechanical Engineering.
PhD, Texas AM University, 2003.

Hague, Steven S, Associate Professor. Soil Crop Sciences.
PhD, Texas AM University, 2000.

Hailey, Camille E, Senior Lecturer. Management.
JD, South Texas College of Law, 1993.

Hajash, Andrew, Senior Professor. Geology Geophysics.
PhD, Texas AM University, 1975.

Hajash, Donna J, Instructional Associate Professor. Visualization.
MA, Siena Heights College, 1981.

Haliburton, James T, Lecturer. Architecture.
MAR, Texas AM University, 2014.

Hall, Charles R, Professor. Horticultural Sciences.
PhD, Mississippi State University, 1988.

Hall, Kenneth R, Professor. Chemical Engineering.
PhD, University of Oklahoma, 1967.

Hall, Michael B, Professor. Chemistry.
PhD, University of Wisconsin-Madison, 1971.

Hall, Robert J, Associate Professor. Educational Psychology.
PhD, University of California, Los Angeles, 1979.

Hall, Timothy C, Senior Distinguished Professor. Biology.
PhD, University of Nottingham, 1965.

Hallermann, Detlef, Clinical Associate Professor. Finance.
PhD, Colorado School of Mines, 1999.

Halling, Thomas D, Associate Professor. TAMU Libraries.
BS, Texas AM University, 1994.

Hambleton, James E, Professor. School of Law.
JD, George Washington University, 1978.

Hamer, Gabriel L, Assistant Professor. Entomology.
PhD, Michigan State University, 2008.

Hamer, Sarah A, Assistant Professor. Vet Integrative Biosciences.
DVM, Michigan State University, 2011; PhD, Michigan State University, 2010.

Hamie, Christine S, Lecturer. International Affairs.
PhD, University of York, 2007.
Harding, Kenn E, Professor. Chemistry. PhD, Stanford University, 1968.

Hardy, Joanne, Clinical Associate Professor. Vet Large Animal Clinical Sc. PhD, Ohio State University, 1996; DVM, University of Montreal, 1982.

Harlin, Julie F, Associate Professor. Ag Leadership, Educ Comm. PhD, Oklahoma State University, 1999.

Harness, Nathaniel J, Instructional Associate Professor. Agricultural Economics. PhD, Texas Tech University, 2007.

Harrell, Eugenia E, Associate Professor. TAMU Libraries. MLS, University of Oklahoma, 1982.

Harrington, Maxine M, Professor. School of Law. JD, George Washington University, 1977.

Harris, Britt, Executive Professor. Finance. BA, Texas AM University, 1980.

Harris, Harlan R, Associate Professor. Electrical Computer Eng. PhD, Texas Tech University, 2003.

Harris, Isaac, Visiting Assistant Professor. Mathematics. PhD, University of Delaware, 2015.

Harris, Stefanie, Associate Professor. International Studies. PhD, Emory University, 1999.

Harrist, Christopher J, Assistant Professor Extension Specialist. Recreation, Park Tourism Sc. PhD, Texas AM University, 2009.

Hart, Jeffrey D, Professor. Statistics. PhD, Southern Methodist University, 1981.

Hartnack, Amanda K, Assistant Professor. Vet Large Animal Clinical Sc. DVM, Colorado State University, 2010; MS, Colorado State University, 2004; MS, Colorado State University, 2006.

Harvey, Idethia S, Associate Professor. Health Kinesiology. PhD, University of Pittsburgh, 2014.

Hasan, M M Faruque, Assistant Professor. Chemical Engineering. PhD, National University of Singapore, 2010.

Hasnakir, Berna, Assistant Professor. Petroleum Engineering. PhD, Middle East Technical University, 2008.

Hatala, Jeffrey J, Temporary Instructor. Health Policy Management. PhD, University of South Carolina, 2013.

Hatch, Stephan L, Professor. Ecosystem Science Mgmt. PhD, Texas AM University, 1975.

Hatfield, April L, Associate Professor. History. PhD, John Hopkins University, 1997.

Hatfield, Lloyd K, Lecturer. Statistics. MBA, University of North Texas, 1980.

Hawkins, Harvey E, Associate Professor. Civil Engineering. PhD, Texas AM University, 1993.

He, Ping, Associate Professor. Biochemistry And Biophysics. PhD, Kansas State University, 2003.

Heaney, Michael J, Instructional Assistant Professor. Geology Geophysics. PhD, Texas AM University, 1998.

Heath, Amy K, Adjunct Assistant Professor. Educational Psychology. PhD, Texas AM University, 2012.

Heidari, Zoya, Assistant Professor. Petroleum Engineering. PhD, University of Texas, Austin, 2011.

Heilmann, James L, Professor. Soil Crop Sciences. PhD, Kansas State University, 1977.

Heim, Gregory R, Associate Professor. Information Operations Mgmt. PhD, University of Minnesota, 2000.

Heinz, Kevin M, Professor. Entomology. PhD, University of California, Riverside, 1989.

Helge, Terri L, Professor. School of Law. JD, South Texas College of Law, 2001.

Hentorne, Mary B, Instructional Assistant Professor. Health Kinesiology. MS, Texas AM University, 2008.

Heo, Jinmoo, Assistant Professor. Recreation, Park Tourism Sc. PhD, Indiana University, 2007.

Herbert, Bruce E, Professor. TAMU Libraries. PhD, University of California, Riverside, 1992; PhD, University of California, Riverside, 1991.

Herman, Cheryl L, Clinical Associate Professor. Vet Integrative Biosciences. DVM, University of Saskatchewan, Canada, 1987.

Herman, James D, Clinical Professor. Vet Physiology Pharmacology. PhD, Texas AM University, 1995; DVM, Texas AM University, 1989.

Herman, Jennifer K, Assistant Professor. Biochemistry And Biophysics. PhD, Indiana University, 2005.

Hernandez, Sonia, Associate Professor. History. PhD, University of Houston, 2009.

Hester, Yvette C, Instructional Associate Professor. Mathematics. PhD, Texas AM University, 2000.

Hetland, Robert D, Professor. Oceanography. PhD, Florida State University, 1999.

Hicks, Joshua A, Associate Professor. Psychology. PhD, University of Missouri, 2009.

Highsmith, Anne L, Clinical Associate Professor. TAMU Libraries. MLS, University of Arizona, 1979.

Kalhatu, James M, Associate Professor. Civil Engineering. PhD, University of Delaware, 1994.

Kalantar Mehrjardi, Negar, Assistant Professor. Architecture. MS, Virginia Tech, 2014; MAR, Shahid Beheshti University, 2005.

Kamon, Teruki, Professor. Physics And Astronomy. PhD, University of Tsukuba, 1986.

Kanipe, David B, Associate Professor Of The Practice. Aerospace Engineering. MS, Texas AM University, 1971.

Kao, Katy C, Associate Professor. Chemical Engineering. PhD, University of California, Los Angeles, 2005.

Karpetsis, Adonis N, Associate Professor. Aerospace Engineering. PhD, Yale University, 1998.

Karthikeyan, Raghupathy, Associate Professor. Biological Agricultural Eng. 
PhD, Kansas State University, 2001.

Kash, Bita A, Associate Professor. Health Policy Management. 
PhD, Texas AM University, 2007; MD, Uniforim Services University of the Health Sciences, 1981.

Kaspar, Wendi A, Professor. TAMU Libraries. 
MS, Texas AM University, 2010.

Kattari, Kimberly A, Assistant Professor. Performance Studies. 
PhD, University of Texas, Austin, 2011.

Katz, Claire E, Professor. Philosophy Humanities. 
PhD, University of Memphis, 1999.

Katzfuss, Matthias S, Assistant Professor. Statistics. 
PhD, Ohio State University, 2011.

Katzgraber, Helmut G, Professor. Physics And Astronomy. 
PhD, University of California, Santa Cruz, 2001.

Kaunas, Roland R, Associate Professor. Biomedical Engineering. 
PhD, University of California, San Diego, 2003.

Kavanagh, Kathleen L, Professor. Ecosystem Science Mgmt. 
PhD, Oregon State University, 1993.

Keating, Peter B, Associate Professor. Civil Engineering. 
PhD, Lehigh University, 1987.

Kee, Ernie J L, Associate Professor Of The Practice. Nuclear Engineering. 
BS, University of Idaho, 1978.

Keefe, Lisa M, Instructional Assistant Professor. Vet Integrative Biosciences. 
MS, Purdue University, 2008.

Keener-Kennicutt, Wendy, Instructional Assistant Professor. Chemistry. 
PhD, Texas AM University, 1982.

Keiper, Paul, Clinical Associate Professor. Health Kinesiology. 
EDD, Texas AM University, 2002.

Keith, Verna M, Professor. Sociology. 
PhD, University of Kentucky, 1982.

Kellstedt, Paul M, Professor. Political Science. 
PhD, University of Minnesota, 1996.

Kelly, Brandy N, Assistant Professor. Recreation, Park Tourism Sc. 
PhD, Texas AM University, 2013.

Kelly, Howard D, Instructional Associate Professor. School of Law. 
JD, Texas Tech University School of Law, 1981.

Kelly, Larry J, Clinical Professor. Teaching, Learning Culture. 
PhD, University of Texas, Austin, 2002.

Kemp, Walter M, Professor. Biology. 
PhD, Tulane University of Louisiana, 1969.

Kendall, Shari E, Associate Professor. English. 
PhD, Georgetown University, 1999.

Kenerley, Charles M, Professor. Plant Pathology Microbiology. 
PhD, North Carolina State University, 1983.

Kenimer, Ann L, Professor. Biological Agricultural Eng. 
PhD, University of Illinois at Urbana-Champaign, 1990.

Kerekes, Angela M, Assistant Lecturer. Teaching, Learning Culture. 
MEd, Texas AM University, 2011.

Kerins, Carolyn A, Associate Professor. Pediatric Dentistry. 
PhD, Texas AM University, 2004; DDS, Baylor College of Dentistry, 2002.

Kerne, Andrew, Associate Professor. Computer Science Engineering. 

Kerr, David G, Professor. Mathematics. 
PhD, University of Toronto, 2001.

Kerr, Deborah L, Associate Professor Of The Practice. Public Service Administration. 
PhD, University of Texas, Austin, 1982.

Kerth, Christopher R, Associate Professor. Animal Science. 
PhD, Texas Tech University, 1999.

Kerwin, Sharon C, Professor. Vet Small Animal Clinical Sc. 
DVM, Texas AM University, 1988.

Ketzenberg, Michael E, Associate Professor, Information Operations Mgmt. 
PhD, University of North Carolina at Chapel Hill, 2000.

Keyser, John C, Professor. Computer Science Engineering. 
PhD, University of North Carolina at Chapel Hill, 2000.

Kezunovic, Mladen, Professor. Electrical Computer Eng. 
PhD, University of Kansas, 1980.

Khatri, Sunil P, Professor. Electrical Computer Eng. 
PhD, University of California, Berkeley, 1999.

Khazaal, Natalie M, Assistant Professor. International Studies. 
PhD, University of California, Los Angeles, 2007.

Kianfar, Kiavash, Associate Professor. Industrial Systems Eng. 
PhD, North Carolina State University, 2007.

Kier, Ann B, Professor. Veterinary Pathobiology. 
DVM, Texas AM University, 1974; PhD, University of Missouri - Columbia, 1979; DVM, Texas AM University, 1974.

Kiffe, Thomas R, Associate Professor. Mathematics. 
PhD, University of Wisconsin-Madison, 1975.

Killough, John E, Professor. Petroleum Engineering. 
PhD, Rice University, 1986.

Kilmer, Kendra R, Instructional Assistant Professor. Mathematics. 
MS, Texas AM University, 2003.

Kim, Eun J, Associate Professor. Computer Science Engineering. 
PhD, Pennsylvania State University, 2003.

Kim, Haejune, Research Assistant Professor. Mechanical Engineering. 
MS, Texas AM University, 2007.
Kim, Hoi-Eun, Associate Professor. History. PhD, Harvard University, 2006.

Kim, JoungDong, Instructional Assistant Professor. Mathematics. PhD, State University of New York at Stony Brook, 2012.

Kim, Jun H, Assistant Professor. Landscape Arch Urban Planning. PhD, Texas AM University, 2010.

Kim, Won-Jong, Associate Professor. Mechanical Engineering. PhD, Massachusetts Institute of Technology, 1997.

Kim, Yang M, Lecturer. Landscape Arch Urban Planning. MLA, Texas AM University, 2010.

Kim, Young-Joe, Associate Professor. Mechanical Engineering. PhD, Purdue University, 2003.

Kimball, Rustin A, Associate Professor. TAMU Libraries. MS, University of Texas, Arlington, 1999.

Kincheloe, Faron, Visiting Professor. Statistics. MS, Baylor University, 2011.

King, Maria D, Tees Research Associate Professor. Mechanical Engineering. PhD, Akademie Der Wissenschaften Der DDR, 1986.

Kingman, Douglas M, Instructional Associate Professor. Biological Agricultural Eng. PhD, Purdue University, 2002.

Kinkead, April L, Lecturer. English. MA, University of Texas, Austin, 2013.

Kirkendall, Andrew J, Professor. History. PhD, University of North Carolina at Chapel Hill, 1996.

Kirkham, Ernest P, Instructional Associate Professor. Health Kinesiology. MS, Texas AM University, 1981.

Kiser, James S, Adjunct Professor. School of Law. JD, Texas Wesleyan University School of Law, 2009.

Kitajima, Hiroko, Assistant Professor. Geology Geophysics. PhD, Texas AM University, 2010.

Kitchens, Joel D, Associate Professor. TAMU Libraries. MLS, University of Alabama, 1996.

Klein, Gregory S, Instructional Assistant Professor. Mathematics. MS, Texas AM University, 1992.

Klein, Patricia E, Associate Professor. Horticultural Sciences. PhD, Texas AM University, 1989.

Klinefelter, Danny A, Professor Extension Specialist. Agricultural Economics. PhD, University of Illinois at Urbana-Champaign, 1979.

Knappett, Peter S, Assistant Professor. Geology Geophysics. PhD, University of Tennessee, 2010.

Kniffen, Daniel A, Instructional Associate Professor. Health Kinesiology. MEd, University of Texas, Austin, 1987.

Knight, Robert W, Associate Professor. Ecosystem Science Mgmt. PhD, Texas AM University, 1980.

Ko, Gladys Y, Associate Professor. Vet Integrative Biosciences. PhD, Kent State University, 1996.

Koch, Michael T, Associate Professor. Political Science. PhD, University of California, Davis, 2002.

Kocharovsky, Olga A, Distinguished Professor. Physics And Astronomy. PhD, Gorky State University (Russia), 1986.

Kodatt, Stephanie, Assistant Professor. School of Public Health. PhD, Lady of the Lakue University, 2007.

Koewa, Hisashi, Professor. Horticultural Sciences. PhD, Kyoto University, 1996.

Kolari, James, Professor. Finance. PhD, Arizona State University, 1980.

Kolasinski, Adam C, Associate Professor. Finance. PhD, Massachusetts Institute of Technology, 2006.

Kolodziej, Elizabeth Y, Senior Lecturer. Statistics. PhD, Texas AM University, 2010.

Kontogiorgos, Dimitrios I, Associate Professor. Restorative Sciences. PhD, Texas AM University, 2010; DMD, National and Capodistrian University of Athens, 2003.

Korty, Robert L, Associate Professor. Atmospheric Sciences. PhD, Massachusetts Institute of Technology, 2005.

Kothmann, Merwyn M, Professor. Ecosystem Science Mgmt. PhD, Texas AM University, 1968.

Koufteros, Xenophon, Associate Professor. Information Operations Mgmt. PhD, University of Toledo, 1995.

Kraemer, Duane C, Senior Professor. Vet Physiology Pharmacology. PhD, Agricultural Mechanical College (TAMU), 1966; DVM, Texas AM University, 1966.

Kraguljac, Igor, Assistant Professor Of The Practice. Visualization. MS, Texas AM University, 2008.

Krajicek, John C, Executive Professor. College of Business. MBA, North Texas State University, 1982.

Kreuter, Urs P, Professor. Ecosystem Science Mgmt. PhD, Utah State University, 1992.

Kuchment, Peter, Distinguished Professor. Mathematics. PhD, Kharkov State University, Russia, 1973.

Kulatiflaka, Waruna D, Associate Professor. Mechanical Engineering. DEN, Purdue University, 2006.

Kumar, Amit, Lecturer. George Bush School of Govern. PhD, American University, 2006.

Kumar, Subodha, Associate Professor. Information Operations Mgmt. PhD, University of Texas, Dallas, 2001.

Kuo, Li-Jen, Associate Professor. Teaching, Learning Culture. PhD, University of Illinois at Urbana-Champaign, 2006.

Kuo, Yue, Professor. Chemical Engineering. PhD, Columbia University, 1980.

Kwok, Ol-Man, Professor. Educational Psychology. PhD, Arizona State University, 2005.

Lacey, Ronald E, Professor. Biological Agricultural Eng.  
PhD, University of Kentucky, 1992.

Lacher, Thomas E, Professor. Wildlife Fisheries Sciences.  
PhD, University of Pittsburgh, 1980.

Lackey, Katherine L, Adjunct Professor. School of Law.  
JD, Texas Wesleyan University School of Law, 2005.

Lacy, Ernestine S, Professor. Restorative Sciences.  

Lafayette, Carol J, Professor. Visualization.  
MFA, University at Buffalo, State University of New York, 1991.

Lafon, Charles W, Professor. Geography.  
PhD, University of Tennessee, 2000.

Laganowsky, Arthur D, Assistant Professor. Institute of Biosciences Tec.  
PhD, University of California, Los Angeles, 2011.

Lagoudas, Dimitris C, Professor. Aerospace Engineering.  
PhD, Lehigh University, 1986.

Lahey, Joanna N, Associate Professor. Public Service Administration.  
PhD, Massachusetts Institute of Technology, 2005.

Lahodny, Glenn E, Instructional Assistant Professor. Mathematics.  
PhD, Texas Tech University, 2012.

Lai Hing, Ebony L, Lab Instructor. Biology.  
MS, Texas AM University, 2010.

Laine, Glen A, Professor. Vet Physiology Pharmacology.  
PhD, Texas AM University, 1979.

Lake, Justin, Associate Professor. International Studies.  
PhD, Harvard University, 2008.

Lakimsetti, Chaitanya, Assistant Professor. Sociology.  
PhD, University of Wisconsin, 2010.

Lalk, Thomas R, Associate Professor. Mechanical Engineering.  
PhD, University of Wisconsin-Madison, 1972.

Lamb, Lauren D, Clinical Assistant Professor. Vet Large Animal Clinical Sc.  
DVM, Texas AM University, 2007.

Lamb, William M, Associate Professor. Geology Geophysics.  
PhD, University of Wisconsin-madison, 1987.

Lamoreaux, Jason T, Lecturer. Philosophy Humanities.  
PhD, Texas Christian University, 2011.

Landsberg, Joseph M, Professor. Mathematics.  
PhD, Duke University, 1990.

Langari, Gholamreza, Professor. Eng Tech Ind Distribution.  
PhD, Clemson University, 2012.

Langford, Candice L, Research Assistant Professor. Vet Integrative Biosciences.  
PhD, Texas AM University, 2006.

Laporte, Catharina M, Lecturer. Anthropology.  
PhD, Texas AM University, 2013; MA, Texas AM University, 2011.

Lara Ruiz, Jorge Horacio J, Senior Lecturer. College of Engineering.  
PhD, Texas AM University, 2005.

Lara-Alecio, Rafael, Professor. Educational Psychology.  
PhD, University of Utah, 1991.

Larke, Patricia J, Professor. Teaching, Learning Culture.  
EdD, University of Missouri, 1984.

Larsen, Terry R, Associate Professor. Visualization.  
MS, Cornell University, 1975.

PhD, University of California, Berkeley, 1976.

Larson, Ruth E, Associate Professor. International Studies.  
PhD, Yale University, 1991.

Lassila, Dennis R, Professor. Accounting.  
PhD, University of Minnesota, 1981.

Lau, Sai C, Professor. Mechanical Engineering.  
PhD, University of Minnesota, 1980.

Laub, James D, Clinical Assistant Professor. Teaching, Learning Culture.  
PhD, Texas AM University, 2012.

Lavy, Sarel, Associate Professor. Construction Science.  
PhD, Technion - Israel Institute of Technology, 2006.

Law, Wendy N, Associate Professor. School of Law.  
JD, Texas Wesleyan University School of Law, 2003.

Lawhon, Sara D, Associate Professor. Veterinary Pathobiology.  
PhD, North Carolina State University, 2003; DVM, Texas AM University, 1997.

Lawing, Anna M, Assistant Professor. Ecosystem Science Mgmt.  
PhD, Indiana University, 2012.

Lawler, John, Professor. Health Kinesiology.  

Lawley, Mark A, Professor. Industrial Systems Eng.  
PhD, University of Illinois at Urbana-Champaign, 1995.

Lawo-Sukam, Alain, Associate Professor. Hispanic Studies.  
PhD, University of Illinois at Urbana-Champaign, 2005.

Lawrence, Addison L, Professor. Wildlife Fisheries Sciences.  
PhD, University of Missouri, 1962.

Lawrence, Frederick B, Professor. Eng Tech Ind Distribution.  
PhD, University of California, Berkeley, 1991.

Laya Pereira, Juan Carlos, Research Assistant Professor. Geology Geophysics.  
PhD, Durham University (UK), 2012.

Layne, Christopher, Professor. International Affairs.  
PhD, University of California, Berkeley, 1981.

Lazarov, Raytcho D, Professor. Mathematics.  
PhD, University of Moscow, Russia, 1972.

Le Graverend, Jean-Briac B, Assistant Professor. Aerospace Engineering.  
Le Mire, Sarah Y, Assistant Professor. TAMU Libraries.
MS, University of Michigan, 2012; MA, University of Utah, 2009.

Leatham, David J, Professor. Agricultural Economics.
PhD, Purdue University, 1983.

Leb, Cheryl P, Adjunct Professor. School of Law.
JD, SOUTHERN METHODIST UNIVERSITY, 1998.

Lechuga, Vicente M, Associate Professor. Educ Admn Human Resource Dev.
EdD, University of Southern California, 2005; PhD, University of Southern California, 2005.

Lee, Chanam, Professor. Landscape Arch Urban Planning.
PhD, University of Washington, 2004.

Lee, Christopher P, Lecturer. Biology.
BS, Texas AM University, 1993.

Lee, David M, Distinguished Professor. Physics And Astronomy.
PhD, Yale University, 1959.

Lee, Hyunyoung, Senior Lecturer. Computer Science Engineering.
PhD, Texas AM University, 2001.

Lee, Jason T, Associate Professor. Poultry Science.
PhD, Texas AM University, 2006.

Lee, Sang Rae, Visiting Assistant Professor. Mathematics.
PhD, University of Oklahoma, 2012.

Lee, Sungyon, Assistant Professor. Mechanical Engineering.
PhD, Massachusetts Institute of Technology, 2010.

Lei, Jun, Assistant Professor. International Studies.
PhD, University of California, 2015; MA, Seton Hall University, 2006; MA, Wuhan University, 2003.

Lekven, Arne C, Associate Professor. Biology.
PhD, University of California, Los Angeles, 1996.

Lemke, Michael K, Clinical Assistant Professor. Health Kinesiology.
PhD, Wichita State University, 2013.

Lemmon, Mark T, Associate Professor. Atmospheric Sciences.
PhD, University of Arizona, 1994.

Lench, Heather C, Associate Professor. Psychology.
PhD, University of California, Irvine, 2007.

Lenihan, John H, Associate Professor. History.
PhD, University of Maryland, 1976.

Leon, Victor J, Professor. Eng Tech Ind Distribution.
PhD, Texas AM University, 1999.

PhD, Lehigh University, 1991.

Lester, Richard H, Clinical Professor. Management.
PhD, Texas AM University, 2003.

Leunes, Arnold D, Professor. Psychology.
EdD, North Texas State University, 1969; PhD, North Texas State College, 1969.

Levine, Gwendolyn J, Clinical Assistant Professor. Veterinary Pathobiology.
DVM, Texas AM University, 2006.

Lewis, Dominique H, Lecturer. Political Science.
MA, Michigan State University, 2012.

Lewis, Donald H, Executive Professor. Management.
MBA, Texas AM International University, 1992.

PhD, Ohio State University, 1980; MS, Ohio State University, 1979.

Leyk, Teresa S, Senior Lecturer. Computer Science Engineering.
PhD, Australian National University, 1998.

Li, Jianrong, Associate Professor. Vet Integrative Biosciences.
PhD, University of Hawaii, 1997.

Li, Ming-Han, Professor. Landscape Arch Urban Planning.
PhD, Texas AM University, 2002.

Li, Peng, Professor. Electrical Computer Eng.

Li, Pingwei, Associate Professor. Biochemistry And Biophysics.
PhD, Peking University, 1996.

Li, Qi, Professor. Economics.
PhD, Texas AM University, 1991.

Li, Qinglei, Assistant Professor. Vet Integrative Biosciences.
PhD, Harbin Medical University, 2001.

Li, Quan, Professor. Political Science.
PhD, Florida State University, 1998.

Li, Wei, Assistant Professor. Landscape Arch Urban Planning.
PhD, University of California, Irvine, 2011.

Li, Yeping, Professor. Teaching, Learning Culture.
PhD, University of Pittsburgh, 1999.

Li, Ying, Clinical Assistant Professor. Information Operations Mgmt.
PhD, University of Michigan, 2005.

Li, Ying, Associate Professor. Mechanical Engineering.

Li, Yu, Assistant Professor. TAMU Libraries.
MLIS, McGill University, 2003.

Liang, Hong, Professor. Mechanical Engineering.
PhD, Stevens Institute of Technology, 1992.

Liang, Hui, Professor. Diagnostic Sciences.
PhD, Beijing Medical University, 1992; DDS, Beijing Medical University, 1988.

Liang, Hwa Chi, Senior Lecturer. Statistics.
PhD, University of New Mexico, 2003.

Liang, Jenn T, Professor. Petroleum Engineering.
PhD, University of Texas, Austin, 1988.

Liew, Jeffrey C, Professor. Educational Psychology. PhD, Arizona State University, 2005.

Light, Jessica E, Associate Professor. Wildlife Fisheries Sciences. PhD, Louisiana State University, 2005.

Lillard, Michael J, Assistant Professor. General Dentistry. DDS, Baylor College of Dentistry, 1979.

Lillibridge, Robin S, Professor. Epidemiology Biostatistics. MD, Uniformed Services of the Health Sciences, 1981.

Lim, Soon Mi, Lecturer. Chemistry. PhD, Texas AM University, 2006.

Lin, Xiaorong, Associate Professor. Biology. PhD, University of Georgia, 2003.

Lindo, Jason M, Associate Professor. Economics. PhD, University of California, Davis, 2009.

Linn, Brian M, Professor. History. PhD, Ohio State University, 1985.

Linneman, Judith A, Instructional Assistant Professor. Sociology. PhD, Iowa State University, 1985.

Lints, Robyn, Associate Professor. Biology. PhD, University of Melbourne, Australia, 1993.

Lintz, Leah E, Instructional Assistant Professor. Health Kinesiology. MS, Texas AM University, 2003.

Lipsmeyer, Christine S, Associate Professor. Political Science. PhD, Vanderbilt University, 1999.

Little, Dallas N, Professor. Civil Engineering. PhD, Texas AM University, 1979.

Litzenberg, Kerry K, Professor. Agricultural Economics. PhD, Purdue University, 1979.

McWhirter, David B, Associate Professor. English. PhD, University of Virginia, 1984.

Medina, Raul F, Associate Professor. Entomology. PhD, University of Maryland, 2005.
Meek, Thomas D, Professor. Biochemistry And Biophysics. PhD, Pennsylvania State University, 1981.

Meer, Jonathan, Associate Professor. Economics. PhD, Stanford University, 2009.

Meier, Kenneth J, Distinguished Professor. Political Science. PhD, Syracuse University, 1975.

Melchor, Nyria, Adjunct Professor. School of Law. JD, Harvard Law School, 1992.

Melconian, Daniel G, Associate Professor. Physics And Astronomy. PhD, Simon Fraser University, 2006.

Melgoza, Pauline, Associate Professor. TAMU Libraries. MS, Texas AM University, 1999.

Mendoza Diaz, Noami V, Instructional Assistant Professor. College of Engineering. EDD, Texas AM University, 2006.

Mentzer, Ray A, Senior Lecturer. Chemical Engineering. PhD, Purdue University, 1980.

Menzies, Max D, Assistant Lecturer. Agricultural Economics. MS, Texas AM University, 2004.

Mercieca, Jennifer R, Associate Professor. Department Of Communication. PhD, University of Illinois at Urbana-Champaign, 2003.

Merlin, Christine, Assistant Professor. Biology. PhD, University Pierre and Marie Curie, 2006.

Merrill, Jeremy, Assistant Professor. Landscape Arch Urban Planning. PhD, Kansas State University, 2014; MLA, Kansas State University, 2009.

Metz, Bradley N, Assistant Lecturer. Entomology. PhD, Texas AM University, 2009.

Meyer, Tamra E, Lecturer. Epidemiology Biostatistics. PhD, University of Texas Health Science Center at Houston, 2008.

Mickelson, Kimberley, Visiting Associate Professor. Landscape Arch Urban Planning. JD, University of Texas School of Law, 1986.

Middlebrooks, Mary W, Assistant Lecturer. Teaching, Learning Culture. MS, Sam Houston State University, 1973.

Miles, Bryant W, Senior Lecturer. Biochemistry And Biophysics. PhD, Texas AM University, 1998.

Millard, Ann V, Associate Professor. Hlth Promotion Comm Hlth Sci. PhD, University of Texas, Austin, 1980.

Miller, Brent V, Associate Professor. Geology Geophysics. PhD, Dalhousie University, 1997.

Miller, Glen A, Lecturer. Philosophy Humanities. MA, University of North Texas, 2014; PhD, University of North Texas, 2015.

Miller, Gretchen R, Assistant Professor. Civil Engineering. PhD, University of California, Berkeley, 2009.

Miller, Justin A, Instructional Assistant Professor. Performance Studies. MA, Michigan State University, 2009.

Miller, Kate, Professor. Geology Geophysics. PhD, Stanford University, 1991.

Miller, Kristina M, Instructional Assistant Professor. Performance Studies. MA, Michigan State University, 2010.

Miller, Matthew W, Senior Professor. Vet Small Animal Clinical Sc. DVM, Ohio State University, 1984.

Miner, Kathi N, Assistant Professor. Psychology. PhD, University of Michigan, 2004.
Mioduszewski, Saskia, Associate Professor. Physics And Astronomy. PhD, University of Tennessee, 1999.

Mirabolfathi, Nader, Research Associate Professor. Physics And Astronomy. PhD, University of Paris, 2002; MS, Shahid Beheshti University, Iran, 1997.

Miranda, Valerian, Associate Professor. Architecture. PhD, Texas AM University, 1988.

Mjelde, James W, Professor. Agricultural Economics. PhD, University of Illinois at Urbana-Champaign, 1985.

Moble, Benedict, Assistant Professor. Aerospace Engineering. PhD, University of Maryland, 2010.

Moczyczeka, Margaret M, Assistant Professor. Institute of Biosciences Tec. PhD, State University of New York at Stony Brook, 1997.

Mogilevsky, Mila, Instructional Assistant Professor. Mathematics. PhD, Rostov State University USSR, 1977.

Mohseni, Mahdi, Assistant Professor. Finance. PhD, Boston College, 2015.

Molhusen, Brian E, Executive Professor. Marketing. BBA, Texas AM University, 1978.

Montague, Marcia L, Adjunct Assistant Professor. Educational Psychology. PhD, Texas AM University, 2009.

Moore, Georgianne W, Associate Professor. Ecosystem Science Mgmt. PhD, Oregon State University, 2004.

Moore, Morgan E, Lecturer. Accounting. MAC, University of Texas, Austin, 2008.

Moreno, Michael R, Assistant Professor. Mechanical Engineering. PhD, Texas AM University, 2009.

Morey, Anne M, Associate Professor. English. PhD, University of Texas, Austin, 1998.

Morris, Theresa M, Associate Professor. Sociology. PhD, Texas AM University, 2000.

Morrison, Gerald L, Professor. Mechanical Engineering. PhD, Oklahoma State University, 1977.

Mortari, Daniele, Professor. Aerospace Engineering. 
PhD, University La Sapienza of Rome, 1980.

Mosbo, Julie A, Clinical Associate Professor. TAMU Libraries. 

Mosley, Pixey A, Professor. TAMU Libraries. 
BS, Texas AM University, 1987.

Motakis, Pavlos, Visiting Assistant Professor. Mathematics. 
PhD, National Technical University of Athens, 2015.

Mounenime, Roula, Research Professor. Vet Integrative Biosciences. 
PhD, Claude-Bernard University, 1984.

Moyes, Rita J, Instructional Assistant Professor. Biology. 
PhD, Texas AM University, 1992.

Moyna, Maria I, Associate Professor. Hispanic Studies. 
PhD, University of Florida, 2000.

Mu, Ren, Associate Professor. International Affairs. 
PhD, Michigan State University, 2004.

Muckleroy, Martha L, Instructional Professor. Health Kinesiology. 
MED, Texas AM University, 1994.

PhD, Universitat Bremen, Germany, 2005; PhD, University of Bremen, 1997.

Muir, Kristopher D, Lecturer. College of Business. 
EDD, Walden University, 2010.

Mukherjee, Partha P, Assistant Professor. Mechanical Engineering. 
PhD, Pennsylvania State University, 2007.

Munenga, Albert, Associate Professor. Veterinary Pathobiology. 
DVM, Hokkaido University, 1999.

Muliana, Hanifah, Professor. Mechanical Engineering. 
PhD, Georgia Institute of Technology, 2004.

Mullen, Christine A, Senior Lecturer. Chemistry. 
PhD, University of California, San Diego, 2000.

Muller, Robert W, Clinical Associate Professor. Educ Admn Human Resource Dev. 
PhD, University of Texas, 1989.

Mullet, John E, Professor. Biochemistry And Biophysics. 
PhD, University of Illinois at Urbana-Champaign, 1981.

Mullins, Leisha H, Senior Lecturer. Biochemistry And Biophysics. 
PhD, Texas AM University, 1989.

Mulvaney, Timothy M, Associate Professor. School of Law. 
JD, Villanova University, 2004.

Mumpower, Jeryl L, Professor. Public Service Administration. 
PhD, University of Colorado, 1976.

Muneoka, Ken, Professor. Vet Physiology Pharmacology. 
PhD, University of California, Irvine, 1983.

Munster, Clyde L, Professor. Biological Agricultural Eng. 
PhD, North Carolina State University, 1992.

PhD, Virginia Tech, 1990.

Murano, Peter S, Associate Professor. Nutrition Food Science. 
PhD, Virginia Tech, 1989.

Murguia, Edward, Professor. Sociology. 
PhD, University of Texas, 1978.

Murphrey, Theresa P, Associate Professor. Ag Leadership, Educ Comm. 
PhD, Texas AM University, 1997.

Murphy, John F, Associate Professor. School of Law. 
JD, University of Texas School of Law, 1993.

Murphy, Robin R, Professor. Computer Science Engineering. 
PhD, Georgia Institute of Technology, 1992.

Murphy, Timothy H, Professor. Ag Leadership, Educ Comm. 
PhD, Texas AM University, 1995.

Murphy, William J, Professor. Vet Integrative Biosciences. 
PhD, University of Tulsa, 1997.

Murray, Christine A, Instructional Assistant Professor. English. 
PhD, University of Texas, Arlington, 2005.

Murray, Seth C, Associate Professor. Soil Crop Sciences. 
PhD, Cornell University, 2008.

Musoba, Glenda D, Associate Professor. Educ Admn Human Resource Dev. 
PhD, Texas AM University, 2004.

Musoma, Henry K, Lecturer. College of Business. 
PhD, Texas Christian University, 2012.

Musser, Jeffrey M, Clinical Professor. Veterinary Pathobiology. 
PhD, North Carolina State University, 2000; DVM, VA-MD Regional College of Veterinary Medicine, 1989.

Muyia, Machuma A, Clinical Assistant Professor. Educ Admn Human Resource Dev. 
PhD, University of Arkansas, 2008.

Muzzin, Kathleen B, Professor. Dental Hygiene. 
MS, University of Missouri, 1985.

Mwangi, Waithaka, Associate Professor. Veterinary Pathobiology. 
PhD, Washington State University, 2002.

Myser, Scott A, Clinical Assistant Professor. Orthodontics. 
BS, Texas AM University, 2004.

Nabity, Mary B, Assistant Professor. Veterinary Pathobiology. 
PhD, Texas AM University, 2010; DVM, Cornell University, 2002.

Nafstad, April D, Lecturer. Accounting. 
MS, Texas AM University, 1997.

PhD, Louisiana State University, 1998.

Nagaya, Naomi, Research Assistant Professor. Psychology. 
PhD, University of Southern California, 1993.
DDS, Ohio State University, 1970.

Nair, Dimple, Lecturer. English.
MA, University of Mysore (India), 1997.

Nanopoulos, Dimitri V, Distinguished Professor. Physics And Astronomy.

Napper, Larry C, Senior Lecturer. International Affairs.
MS, University of Virginia, 1974.

Naraghi, Mohammad, Assistant Professor. Aerospace Engineering.
PhD, University of Illinois at Urbana-Champaign, 2009.

PhD, Georgia Institute of Technology, 1998.

Narcowich, Francis J, Professor. Mathematics.
PhD, Princeton University, 1972.

Nascentes Alves, Ibere, Professor Of The Practice. Petroleum Engineering.
PhD, University of Tulsa, 1991.

Nasiri, Shaima L, Associate Professor. Atmospheric Sciences.

Nasr-El-Din, Hisham A, Professor. Petroleum Engineering.
PhD, University of Saskatchewan, 1984.

Nasrabadi, Hadi, Assistant Professor. Petroleum Engineering.

Natarajarathinam, Malini, Associate Professor. Eng Tech Ind Distribution.
DEng, Texas AM University, 1983.

Natowitz, Joseph B, Senior Professor. Chemistry.
PhD, University of Pittsburgh, 1965.

Natsios, Andrew S, Executive Professor. International Affairs.
MS, Harvard University, 1979.

Naugle, Donald G, Professor. Physics And Astronomy.
PhD, Texas AM University, 1965.

Ndubisi, Forster O, Professor. Landscape Arch Urban Planning.
PhD, University of Waterloo, 1987.

Nederman, Cary J, Professor. Political Science.
PhD, York University, 1983.

Needleman, Alan, Professor. Materials Science Eng.
PhD, Harvard University, 1971.

Neely, Clark B, Assistant Professor Extension Specialist. Soil Crop Sciences.
PhD, Texas AM University, 2013.

Neely, Haly L, Assistant Professor. Soil Crop Sciences.
PhD, Texas AM University, 2014.

Nekrashevych, Volodymyr, Professor. Mathematics.
PhD, Taras Shevchenko National University, Russia, 1998.

Nelson, Claudia B, Professor. English.
PhD, Indiana University, 1989.

DVM, Texas AM University, 1978.

PhD, University of New Mexico, 1969.

Nelson, Whitney R, Clinical Assistant Professor. Vet Small Animal Clinical Sc.
DVM, Washington State University, 2008.

Nepal, Bimal P, Associate Professor. Eng Tech Ind Distribution.
PhD, University of Alabama, 2007.

Neshtyba, Monica V, Clinical Assistant Professor. Teaching, Learning Culture.
PhD, University of Texas, Austin, 2012.

Nessler, Craig L, Professor. Horticultural Sciences.
PhD, College of William and Mary, 1976.

Nessner, Caitlin E, Lab Instructor. Biology.
MS, Texas AM University, 2014.

Netherland, Beth M, Instructional Associate Professor. Health Kinesiology.
MS, Miami University, 2000.

Nevels, Robert D, Professor. Electrical Computer Eng.
PhD, University of Mississippi, 1979.

Newell-Fugate, Anne E, Assistant Professor. Vet Physiology Pharmacology.
PhD, University of Illinois at Urbana-Champaign, 2012; DVM, North Carolina State, 2004.

Newman, Galen D, Instructional Associate Professor. TAMU Libraries.
MS, Florida State University, 1992.

Newman, Julie, Associate Professor. Geology Geophysics.
PhD, University of Rochester, 1993.

Newman, Neal F, Professor. School of Law.
JD, Howard University, 1998.

Newton, Howard J, Professor. Statistics.
PhD, University at Buffalo, State University of New York, 1975.

Ng, Desmond W, Associate Professor. Agricultural Economics.
PhD, University of Illinois at Urbana-Champaign, 2001.

Nichols, Anne B, Associate Professor Of The Practice. Architecture.
PhD, University of Illinois, 2000.

Nichols, John M, Associate Professor. Construction Science.
PhD, University of Newcastle, Australia, 2002.

Niedzwiecki, John M, Professor. Civil Engineering.
PhD, The Catholic University of America, 1977.

Nielsen-Gammon, John W, Professor. Atmospheric Sciences.
PhD, Massachusetts Institute of Technology, 1990.

Nikolov, Zivko L, Professor. Biological Agricultural Eng.
PhD, Iowa State University, 1986.
Nippe, Michael, Assistant Professor. Chemistry. PhD, University of Wisconsin-Madison, 2011.

Niu, Genhua, Associate Professor. Horticultural Sciences. PhD, Chiba University, Japan, 1997.

PhD, Swedish University of Agricultural Sciences, 1999.

Rauscher, Emily A, Assistant Professor. Department Of Communication.
PhD, University of Missouri, 2012.

Rauschel, Frank M, Distinguished Professor. Chemistry.
PhD, University of Wisconsin-Madison, 1976.

Rayfield, John S, Associate Professor. Ag Leadership, Educ Comm.
EdD, Texas Tech University, 2006; PhD, Texas Tech University, 2006.

Raymond, Anne L, Professor. Geology Geophysics.
PhD, University of Chicago, 1983.

Raymond, Dwayne F, Instructional Assistant Professor. Philosophy Humanities.
PhD, University of Western Ontario, 2006.

Rech, Raquel R, Clinical Assistant Professor. Veterinary Pathobiology.
DVM, Federal University of Santa Maria, Brazil, 2007.

Reddy, Junuthula N, Distinguished Professor. Mechanical Engineering.
PhD, Texas AM University, 1974.

Reddy, Sanjay M, Professor. Veterinary Pathobiology.
PhD, University of Maryland, 1994; DVM, Andhra Pradesh Agricultural University, India, 1986.

Reedy, Vanita D, Assistant Professor. English.
PhD, University of California, Davis, 2009.

Rediniotis, Othon K, Professor. Aerospace Engineering.

Redman, Karen S, Executive Professor. Accounting.
BBA, Texas AM University, 1980.

Redmon, Larry A, Professor Extension Specialist. Soil Crop Sciences.
PhD, Texas AM University, 1992.

Redwine, Tobin D., Assistant Professor. Ag Leadership, Educ Comm.
PhD, Texas AM University, 2014.

Reece, Julia S, Assistant Professor. Geology Geophysics.
PhD, University of Texas, 2011.

Reece, Robert S, Assistant Professor. Geology Geophysics.
PhD, University of Texas, Austin, 2012.

Reece, Warren D, Professor. Nuclear Engineering.
PhD, Georgia Institute of Technology, 1988.

Reed, David W, Professor. Horticultural Sciences.
PhD, Cornell University, 1979.

Reed, Helen L, Professor. Aerospace Engineering.
PhD, Virginia Tech, 1981.

Reed, Teri K, Associate Professor. Petroleum Engineering.
PhD, Arizona State University, 1999.

Rees, Lynn L, Professor. Accounting.
PhD, Arizona State University, 1993.

Reese, Roger R, Professor. History.
PhD, University of Texas, Austin, 1990; MA, University of Texas at Austin, The, 1986.

Regan, Martin P, Associate Professor. Performance Studies.
PhD, University of Hawaii, 2006.

Regan, Michael R, Lecturer. Sociology.
PhD, Texas AM University, 2010.

Reid, Russell W, Assistant Professor Of The Practice. Landscape Arch Urban Planning.
MAR, Texas AM University, 2001.
Reihani, Kamran, Instructional Assistant Professor. Mathematics. PhD, Tarbiat Modares University, 2005.

Reilly, Peter R, Associate Professor. School of Law. JD, Harvard Law School, 1993.

Reinhardt, Gina M, Assistant Professor. Public Service Administration. PhD, Washington University in St. Louis, 2005.

Reine, Antonio, Professor. Environmental Occpntl Hlth. PhD, University of Texas School of Public Health, 1990.

Rhodes, Adrienne C, Assistant Professor. Accounting. PhD, Pennsylvania State University, 2013.

Ribera, L A, Associate Professor Extension Specialist. Agricultural Economics. PhD, Texas AM University, 2005.

Riccio, Cynthia A, Professor. Educational Psychology. PhD, University of Georgia, 1993.

Rice, Sarah C, Assistant Professor. Accounting. PhD, Ohio State University, 2007.

Rich, Lisa A, Associate Professor. School of Law. JD, American University Washington College of Law, 1998.

Richardson, James W, Professor. Agricultural Economics. PhD, Oklahoma State University, 1978.

Richardson, Mary J, Professor. Oceanography. PhD, Massachusetts Institute of Technology, 1980.

Riechman, Steven E, Associate Professor. Health Kinesiology. PhD, University of Pittsburgh, 2000.

Riggs, Penny K, Associate Professor. Animal Science. PhD, Texas AM University, 1996.

Righetti, Raffaella, Associate Professor. Electrical Computer Eng. PhD, University of Houston, 2005.

Ringham, Michael, Lecturer. Visualization. MS, Texas AM University, 1996.

Riskowski, Gerald L, Professor. Biological Agricultural Eng. PhD, Iowa State University, 1986.

Rispoli, Mandy J, Associate Professor. Educational Psychology. PhD, University of Texas, Austin, 2009.

Rister, M E, Professor. Agricultural Economics. PhD, Michigan State University, 1981.

Rivera, Gonzalo M, Associate Professor. Veterinary Pathobiology. PhD, Cornell University, 2002; DVM, National University of Rio Cuarto, Argentina, 1988.

Rivera, Hector H, Assistant Professor. Educational Psychology. PhD, University of California, Santa Cruz, 2001.

Roark, Erin B, Associate Professor. Geography. PhD, University of California, Berkeley, 2005.

Robertson, John D, Professor. Political Science. PhD, University of Illinois at Urbana-Champaign, 1979.

Robinson, Elizabeth K, Instructional Associate Professor. English. PhD, Texas AM University, 1995.

Robles Emmanuelli, Juan C, Clinical Assistant Professor. Vet Physiology Pharmacology. DVM, University of Wisconsin, 2005.

Roblyer, Dwight A, Lecturer. Political Science.
PhD, Texas AM University, 2009.

JD, Texas Tech University, 1978.

Rodiek, Jon, Professor. Landscape Arch Urban Planning.
PhD, University of Massachusetts, 1974.

Rodiek, Susan D, Associate Professor. Architecture.
PhD, Cardiff University, 2004.

PhD, Texas AM University, 1998.

Rodrigues Hoffmann, Aline, Assistant Professor. Veterinary Pathobiology.
PhD, Texas AM University, 2011; DVM, Universidade Federal de Santa, Brazil, 2004.

Roelke, Daniel L, Professor. Wildlife Fisheries Sciences.
PhD, Texas AM University, 1999.

Rogachev, Grigory V, Professor. Physics And Astronomy.
PhD, Kurchatov Institute, 1999.

Rogers, George O, Professor. Landscape Arch Urban Planning.
PhD, University of Pittsburgh, 1983.

Rogers, Julia S, Senior Lecturer. Architecture.
PhD, Texas AM University, 1996.

Rogers, Kenita S, Professor. Vet Small Animal Clinical Sc.
DVM, Louisiana State University, 1982.

Rogers, William E, Professor. Ecosystem Science Mgmt.
PhD, Kansas State University, 1998.

Rogers, William J, Lecturer. Chemical Engineering.
PhD, Ohio State University, 1976.

Rogovskyy, Artem S, Clinical Assistant Professor. Veterinary Pathobiology.
PhD, Washington State University, 2014; DVM, National Agricultural University, 2001.

Rojas, Joseph M, Professor. Mathematics.
PhD, University of California, Berkeley, 1995.

Rollins, Ian, Instructional Assistant Professor. Performance Studies.
PhD, Texas Tech University, 2009.

Rollins, John W, Lecturer. George Bush School of Govern.
JD, American University, 2001.

Romano, Juan E, Associate Professor. Vet Large Animal Clinical Sc.
PhD, Texas AM University, 2004; DVM, Universidad del Uruguay, 1985; MS, University of Minnesota, 1998.

Romo, Daniel, Professor. Chemistry.
PhD, Colorado State University, 1991.

Rooney, Lloyd W, Senior Professor. Soil Crop Sciences.
PhD, Kansas State University, 1966.

Rooney, William L, Professor. Soil Crop Sciences.
PhD, University of Minnesota, 1992.

PhD, Texas AM University, 2006.

Rosenheim, James M, Professor. History.
PhD, Princeton University, 1981.

PhD, Emory University, 2014.

PhD, University of Texas, Austin, 2000.

Roshan, Susan, Associate Professor. General Dentistry.
DDS, Tehran University of Medical Science Health Scie, 1991.

Ross, Andy L, Professor. International Affairs.
PhD, Cornell University, 1984.

Ross, Jennifer A, Instructional Assistant Professor. School of Public Health.
DrPH, Texas AM University, 2013.

Ross, Joseph H, Professor. Physics And Astronomy.
PhD, University of Illinois at Urbana-Champaign, 1986.

Ross, Shawna, Assistant Professor. English.
PhD, Pennsylvania State University, 2011.

Rosser, Aubrey W, Lecturer. Public Service Administration.
PhD, Texas AM University, 1997.

Ross, Marco, Visiting Assistant Professor. Finance.
PhD, Pennsylvania State University, 2010.

Rosson, Claude P, Professor. Agricultural Economics.
PhD, Texas AM University, 1982.

Rosynek, Michael P, Professor. Chemistry.
PhD, Rice University, 1972.

Rouleau, Brian J, Assistant Professor. History.
PhD, University of Pennsylvania, 2010.

Rouquette, Francis, Professor. Soil Crop Sciences.
PhD, Texas AM University, 1970.

Roussel, Allen J, Professor. Vet Large Animal Clinical Sc.
DVM, Louisiana State University, 1977; MS, Purdue University, 1984.

Rowe, Sara M, Lecturer. Department Of Communication.
MA, Texas AM University, 2012.

Rowell, Charles H, Professor. English.
PhD, Ohio State University, 1972.

Rowell, Eric C, Associate Professor. Mathematics.
PhD, University of California, San Diego, 2003.

Rowlett, Kristen M, Assistant Professor. School of Law.
JD, Louisiana State University, 2013.

Rundell, William, Professor. Mathematics.
PhD, Glasgow University, 1974.

Russell, Brooke H, Assistant Professor. Institute of Biosciences Tec. PhD, Texas AM University, 2008.

Russell, Karen E, Professor. Veterinary Pathobiology. DVM, VA-MD Regional College of Veterinary Medicine, 1990; PhD, North Carolina State University, 1997; DVM, VA-MD Regional College of Veterinary Medicine, 1990.

Russell, Leon H, Senior Professor. Vet Integrative Biosciences. PhD, Texas AM University, 1965; DVM, University of Missouri, 1956.

Rusyn, Ivan I, Professor. Vet Integrative Biosciences. PhD, University of North Carolina at Chapel Hill, 2000; MD, Ukrainian State Medical University, 1994.

Ryan, Kathryn J, Instructional Assistant Professor. Biology. PhD, Baylor College of Medicine, 1998.

Sakhaei Far, Maryam S, Assistant Professor. Civil Engineering. PhD, North Carolina State University, 2011.

Salaga, Steven H, Associate Professor. Health Kinesiology. PhD, University of Michigan, 2012.

Salazar, Katherine N, Assistant Lecturer. Teaching, Learning Culture. MS, Texas AM University, 2012.

Salin, Victoria S, Professor. Agricultural Economics. PhD, Purdue University, 1996.

Salter, Phia S, Assistant Professor. Psychology. PhD, University of Kansas, 2010.

Samuelson, Charles D, Associate Professor. Psychology. PhD, University of California, Santa Barbara, 1986.

Samuelson, Todd V, Associate Professor. TAMU Libraries. PhD, University of Houston, 2005.

Sanchez Castilla, Marcelo Javier, Associate Professor. Civil Engineering. PhD, Universidad Politecnica de Catalunya (UPC), Barcelona, Spain, 2004.

Sanchez McKinley, Florinda R, Lab Instructor. Chemistry. MS, Lamar University, 2008.

Sanders, Joan T, Senior Lecturer. Accounting. MS, Texas AM University, 1990.

Sandlin, Michael E, Clinical Associate Professor. Health Kinesiology. PhD, Texas AM University, 1992.

Sansom, Roger B, Associate Professor. Philosophy Humanities. PhD, University of North Carolina at Chapel Hill, 2002.

Sare, Laura A, Associate Professor. TAMU Libraries. MS, University of Illinois at Urbana-Champaign, 2003.

Satterfield, Michael C, Associate Professor. Animal Science. PhD, Texas AM University, 2008.

Saunders, Ashley B, Associate Professor. Vet Small Animal Clinical Sc. DVM, Texas AM University, 2001.

Sawyer, Jason E, Associate Professor. Animal Science. PhD, New Mexico State University, 2000.

Scarborough, Sherry L, Instructional Assistant Professor. Mathematics. PhD, Texas AM University, 2001.

Scarfuto, Jessica C, Assistant Lecturer. Civil Engineering. MS, Texas AM University, 2014.

Schade, Gunnar W, Associate Professor. Atmospheric Sciences. PhD, Johannes Gutenberg Universitat, Germany, 1997.

Schaefer, Scott D, Associate Professor. Computer Science Engineering. PhD, Rice University, 2006.

Schakel, David J, Instructional Assistant Professor. Health Kinesiology. MS, Ball State University, 1978.

Schechter, David S, Associate Professor. Petroleum Engineering. PhD, Brisl University, United Kingdom, 1989.

Schielack, Vincent, Associate Professor. Mathematics. PhD, University of Texas, Austin, 1982.

Schiffhauer, Robert J, Associate Professor. Architecture. MFA, Yale University, 1965; MS, Yale School of Art, 1965.

Schlegel, Rebecca J, Associate Professor. Psychology. PhD, University of Missouri, 2009.

Schleicher, Deidra J, Associate Professor. Management. PhD, Pennslyvania State University, 1998.

Schmeichel, Brandon J, Professor. Psychology. PhD, Florida State University, 2005.

Schmiediche, Henrik, Senior Lecturer. Statistics. PhD, Texas AM University, 1993.

Schmitz, Rose A, Instructional Associate Professor. Health Kinesiology. MS, Texas AM University, 1986.

Schneider, William C, Professor Of The Practice. Mechanical Engineering. PhD, Rice University, 1972.

Schnell, Ronnie W, Assistant Professor Extension Specialist. Soil Crop Sciences. PhD, Texas AM University, 2010.

Schoolcraft, Ralph, Associate Professor. International Studies. PhD, Emory University, 1995.

Schreuders, Paul D, Senior Lecturer. College of Engineering. PhD, University of Texas, Austin, 1989.

Schuett, Michael A, Associate Professor. Recreation, Park Tourism Sc. PhD, University of Illinois at Urbana-Champaign, 1991.

Schulman, Craig T, Visiting Associate Professor. Economics. PhD, Texas AM University, 1990.

Schumacher, Jay S, Lecturer. Psychology. PhD, Texas AM University, 1999.

Schwartz, Daniel L, Assistant Professor. History. PhD, Princeton University, 2009.

Schweitzer, Jordan L, Associate Professor. Endodontics. DDS, Baylor College of Dentistry, 1986.
Scott, David, Professor. Recreation, Park Tourism Sc.
PhD, Pennsylvania State University, 1990.

Scott, Harvey M, Professor. Veterinary Pathobiology.
DVM, University of Saskatchewan, Canada, 1988; PhD, University of Guelph, Canada, 1988.

Scott, Susan G, Lecturer. Recreation, Park Tourism Sc.

Scott, Timothy P, Associate Professor. Biology.
PhD, Texas AM University, 1996.

Scull, Marian O, Distinguished Professor. Physics And Astronomy.
PhD, Yale University, 1966.

Seabury, Christopher M, Associate Professor. Veterinary Pathobiology.
PhD, Texas AM University, 2004.

Searcy, Stephen W, Professor. Biological Agricultural Eng.
PhD, Oklahoma State University, 1980.

PhD, Texas AM University, 1971.

Seipp, Adam R, Professor. History.
PhD, University of North Carolina at Chapel Hill, 2005.

MBA, Rice University, 2008.

Sekhposyan, Tatevik, Assistant Professor. Economics.
PhD, University of North Carolina at Chapel Hill, 2010.

Sell, Jane A, Professor. Sociology.
PhD, Washington State University, 1979.

Seminario, Jorge M, Professor. Chemical Engineering.
PhD, Southern Illinois University, 1987; MS, Southern Illinois University, 1984.

Sen, Arun, Professor. Information Operations Mgmt.
PhD, Pennsylvania State University, 1979.

Sen, Ravi, Associate Professor. Information Operations Mgmt.
PhD, University of Illinois at Urbana-Champaign, 2003.

Senarat Dharmasena, Kalu A, Visiting Assistant Professor. Agricultural Economics.
PhD, Texas AM University, 2010.

Sengupta, Sinjini, Lecturer. Mathematics.
MMA, Florida State University, 2006.

Seo, Jinsil, Assistant Professor. Visualization.
PhD, Simon Fraser University, 2011; MFA, School of Visual Arts, 2004.

Serpedin, Erchin, Professor. Electrical Computer Eng.
PhD, University of Virginia, 1999.

Sewell, Robin R, Associate Professor. TAMU Libraries.
DVM, Washington State University, 1986.

Seymore, Malinda L, Professor. School of Law.
JD, Baylor University, 1986.

Sezgin, Ergin, Professor. Physics And Astronomy.
PhD, State University of New York at Stony Brook, 1980.

Shafer, C S, Professor. Recreation, Park Tourism Sc.
PhD, Clemson University, 1993.

Shafer, Debra M, Lecturer. Recreation, Park Tourism Sc.
MS, University of Utah, 1985.

Shakkottai, Srinivas G, Associate Professor. Electrical Computer Eng.
PhD, University of Illinois, 2007.

Shamberger, Kathryn E, Assistant Professor. Oceanography.
PhD, University of Washington, 2011.

Shamberger, Patrick J, Research Assistant Professor. Materials Science Eng.
MS, University of Washington, 2010.

Shan, Libo, Associate Professor. Plant Pathology Microbiology.
PhD, Kansas State University, 2003.

PhD, University of Minnesota, 1996.

Shankar, Venkatesh, Professor. Marketing.
PhD, Northwestern University, 1995.

Shannon, Joe, Adjunct Professor. School of Law.
JD, University of Texas School of Law, 1963.

Shao, Lin, Associate Professor. Nuclear Engineering.
PhD, University of Houston, 2001.

Sharkey, Joseph R, Professor. Hlth Promotion Comm Hlth Sci.
PhD, University of North Carolina at Chapel Hill, 2002.

Sharma, Virender K, Professor. Environmental Occptnl Hlth.
PhD, University of Miami, 1989.

Sharp, Nathan Y, Associate Professor. Accounting.
PhD, University of Texas, 2007.

Shatalov, Oksana, Instructional Assistant Professor. Mathematics.
PhD, Technion - Israel Institute of Technology, 2001.

Shaub, Michael K, Clinical Professor. Accounting.
MS, Texas Tech University, 1983.

Shaw, Brian D, Associate Professor. Plant Pathology Microbiology.
PhD, Cornell University, 2000.

Shaw, Robert B, Professor. Ecosystem Science Mgmt.
PhD, Texas AM University, 1979.

Shaw, William D, Professor. Agricultural Economics.
PhD, University of Colorado, 1985.

PhD, Virginia Polytechnic Institute and State University, 1978.

Sheather, Simon J, Professor. Statistics.
PhD, La Trobe University, 1986.

Shelton, Matthew T, Assistant Professor. Chemistry.
PhD, University of California, Berkeley, 2010.
Shell, Dylan A, Associate Professor. Computer Science Engineering. PhD, University of Southern California, 2008.

Shelton, Maria M, Adjunct Assistant Professor. Educ Admn Human Resource Dev. EDD, Texas AM University, 1987.

Shen, Yang, Assistant Professor. Electrical Computer Eng. PhD, Boston University, 2008.

Sherman, Ledric D, Clinical Assistant Professor. Health Kinesiology. PhD, Texas AM University, 2013.

Shetty, Bala, Professor. Information Operations Mgmt. PhD, Southern Methodist University, 1985.

Shidlovskaya, Anna V, Visiting Professor. Civil Engineering. PhD, National Mineral Resources University, Russia, 2005.

Shields, Samantha M, Assistant Lecturer. Teaching, Learning Culture. MEd, Texas AM University, 1998.

Shifrinson, Joshua I, Assistant Professor. International Affairs. PhD, Massachusetts Institute of Technology, 2013.

Shim, Won-Bo, Professor. Plant Pathology Microbiology. PhD, Purdue University, 2000.

Shinn, Jamie E., Assistant Professor. Geography. PhD, Pennsylvania State University, 2015.

Shipp, Eva M, Associate Professor. Epidemiology Biostatistics. PhD, University of Texas Health Science Center at Houston, 2005.

Short, Aric K, Professor. School of Law. JD, University of Texas Law School, 1996.

Shurtz, Suzanne, Associate Professor. TAMU Libraries. MLIS, University of South Carolina, 2008.

Sievert, Ronald J, Senior Lecturer. International Affairs. JD, University of Texas, Austin, 1977.

**Rules and Regulations for Determining Residence Status**

**Determination of Residency for Tuition Purposes**

In accordance with Texas Higher Education Coordinating Board Rules and pursuant to Texas Education Code, a student's status as a resident, nonresident or international (foreign) student for tuition purposes will be determined in the Office of Admissions prior to enrollment. Students must be prepared to pay tuition and other required fees by specified due dates.

Students with a status of permanent resident of the United States are not automatically eligible as a Texas state resident for tuition purposes.

Students who have knowledge of an error in their residency status for tuition purposes are responsible for notifying the Office of the Registrar and may be required to submit the Core Residency Questions form, which is available for download on the Office of the Registrar (http://registrar.tamu.edu) website in order to amend their status.

Questions should be directed to the Residency Officer at (979) 845-8606 or email residency@tamu.edu. Complete rules and regulations are available on the Texas Higher Education Coordinating Board website.

**Texas Common Course Numbering System**

The Texas Common Course Numbering System (TCCNS) has been designed for the purpose of aiding students in the transfer of general academic courses between colleges and universities throughout Texas. Common courses are freshman and sophomore academic credit courses that have been identified as common by institutions that are members of the common course numbering system. The system ensures that if the student takes the courses the receiving institution designates as common, then the courses will be accepted in transfer and the credit will be treated as if the courses had actually been taken on the receiving institution’s campus.

The table below lists the courses Texas A&M University has identified as common and their TCCNS equivalents. Before using this table students should be sure that the institution they attend employs the TCCNS.

This table is revised quarterly in January, March, June and September. The most recent version may be obtained from the Office of Admissions.

Family Educational Rights and Privacy Act

Texas A&M University informs students annually of the Family Educational Rights and Privacy Act. This Act, with which the University intends to comply fully, is intended to protect the privacy of education records, to establish the rights of students to inspect and review their education records and to provide guidelines for the correction of inaccurate or misleading data through informal and formal hearings. Students also have the right to file complaints with the Family Policy Compliance Office of the Department of Education in Washington, D.C. concerning alleged failures by the University to comply with the Act.

The Family Educational Rights and Privacy Act (FERPA) is a federal regulation that provides minimum standards for the management of student education records for universities receiving funds made available under any federal program administered by the U.S. Commissioner of Education. The Act provides, among other things, that an institution will maintain the confidentiality of student education records, and students will have the right to inspect their own education records.

This Policy is designed to meet FERPA provisions. Texas A&M University is committed to the good faith implementation of this Policy. Questions may be emailed to ferpa@tamu.edu.

If a student, the parent of a student, or any other individual has a complaint that an official of the University is violating FERPA, and the complaint cannot be satisfactorily resolved within the University, that person has the right to file a complaint with the Department of Education by contacting:

Family Policy Compliance Office
U.S. Department of Education
400 Maryland Ave., S.W.
Washington, D.C. 20202-5920

For the purposes of this Policy, Texas A&M University has used the following definitions of terms:

**Student.** Person who attends or has attended a program of instruction sponsored by Texas A&M University.

**Education Records.** Any records (in handwriting, print, tapes, film or other medium) maintained by the University, an employee of the University or agent of the University which is related to the student.

**Directory Information.** The following directory information may be made public unless the student desires to withhold any or all of this information: the student’s name, UIN (Universal Identification Number), local address, permanent address, email address, local telephone number, permanent telephone number, dates of attendance, program of study, classification, previous institution(s) attended, degrees received, honors and awards received, participation in officially recognized activities and sports, medical residence location (Health Science Center students), and medical residence specialization (Health Science Center students).

Currently enrolled students wishing to withhold any or all directory information items may do so by going to the My Record tab in the Howdy (https://howdy.tamu.edu) portal, clicking on “Withhold Directory Information.”

1. Must include a lab.
2. KINE 199 Ballet III is equivalent to DANC 2141.
3. KINE 199 Jazz Dance I is equivalent to DANC 1147.
4. KINE 199 Jazz Dance III is equivalent to DANC 2147.
5. KINE 199 Modern Dance III is equivalent to DANC 2145.
Information* in the My Information channel and submitting a completed form.

Directory information may be released unless a Withhold Directory Information request is submitted by the student. The request remains in effect until the student revokes it or is deceased. Only currently enrolled students may request directory information be withheld.

**Statement of Rights**

Texas A&M University encourages students to exercise all of their rights under the Family Educational Rights and Privacy Act. Operating under the premise that the educational process is a cooperative venture between a student and the University, we emphasize the following rights of eligible students:

1. the right to inspect and review, with certain limited exceptions, the student’s educational records, including the right to receive explanations and interpretations of the records and to obtain copies of the records when such are needed to allow the student to effectively exercise his/her right of inspection and review;
2. the right to consent to disclosures of personally identifiable information contained in the student’s education records, except to the extent that FERPA authorizes disclosure without consent.

One exception which permits disclosure without consent is disclosure to school officials with legitimate educational interests. A school official is a person or entity: (a) employed by the university or the university system in an administrative, supervisory, academic or research, or support staff position; (b) serving on a university governing body or duly authorized panel or committee; or (c) employed by or under contract to the university to perform a special task, function, or service for the university.

A school official has a legitimate educational interest if the information requested is necessary for that official to (a) perform appropriate tasks that are specified in his/her position description or in the performance of regularly assigned duties by a lawful supervisor; (b) fulfill the terms of a contractual agreement; (c) perform a task related to a student’s education; (d) perform a task related to the discipline of a student; or (e) provide a service or benefit relating to the student or student’s family, such as health care, counseling, financial aid, job placement, or former student-related activities.

Disclosure to a school official having a legitimate educational interest does not constitute university authorization to transmit, share, or disclose any or all information received to third parties unless such disclosure is permitted or required by law.

3. the right to correct a student’s education records when the records are inaccurate, misleading or otherwise in violation of FERPA;
4. the right to report violations of FERPA to the Department of Education;
5. the right to be informed about FERPA rights.

All the rights and protections given students under FERPA belong to the student. However, information in student records may be provided to parents/legal guardians without the written consent of the student if the eligible student is a financial dependent of his or her parents/legal guardians as defined under Section 152 of the Internal Revenue Code of 1954.

**Records Not Available for Information and Review**

Students shall have access to all education records concerning them maintained by the University with the exception of the following:

1. A personal record kept by a university faculty or staff member which meets the following tests:
   a. It is in the personal possession of the individual who made it.
   b. Information contained in it has never been revealed or made available to any other person except the maker’s temporary substitute.
2. An employment record which is used in relation to a student’s employment by the University, except where an individual in attendance at the University is employed as a result of his or her status as a student.
3. Records relating to a student which are created or maintained by a physician, psychiatrist, psychologist or other recognized professional or para-professional acting in his or her professional or para-professional capacity or assisting in that capacity which are used in connection with the provision of treatment to a student and are not disclosed to anyone other than the individuals providing the treatment.
4. Financial records and statements of a student’s parents.
5. Confidential letters and statements of recommendation which were placed in the education records of a student prior to January 1, 1975.
6. Confidential letters and statements of recommendation which were placed in the education records of a student on or after January 1, 1975, if the student has waived his or her right to inspect and review the letters or statements.
7. Records concerning admissions to an academic component of the University which the student has never attended.

Any questions concerning FERPA should be directed to the Office of the Registrar.

**International Agreements**

In order to help internationalize the campus and create significant global opportunities for our students and faculty, Texas A&M University has active, formal agreements with foreign institutions as well as Reciprocal Educational Exchange Programs (REEP). For information regarding international Partnerships visit the Global Program Support (http://globalsupport.tamu.edu) website or call Public Partnership & Outreach, Global Partnerships office at 979.845.3099.

Since 1950, students and faculty of Texas A&M University have benefited from its membership in Oak Ridge Associated Universities (ORAU). ORAU is a consortium of 101 colleges and universities and a contractor for the U.S. Department of Energy (DOE) located in Oak Ridge, Tennessee. ORAU works with its member institutions to help their students and faculty gain access to federal research facilities throughout the country; to keep its members informed about opportunities for fellowship, scholarship and research appointments; and to organize research alliances among its members.

Through the Oak Ridge Institute for Science and Education (ORISE), the DOE facility that ORAU operates, undergraduates, graduates, postgraduates, as well as faculty enjoy access to a multitude of opportunities for study and research. Students can participate in programs covering a wide variety of disciplines including business, Earth sciences, epidemiology, engineering, physics, geological sciences, pharmacology, ocean sciences, biomedical sciences, nuclear chemistry and mathematics. Appointment and program length range from one month to four years. Many of these programs are especially designed to increase the numbers of underrepresented minority students pursuing degrees in science- and engineering-related disciplines. A comprehensive listing of these programs and other opportunities, their disciplines, and details on locations and benefits can be found in the ORISE Catalog of Education and Training Programs, which is available at http://see.orau.org, or by calling the contact below.

ORAU’s Office of Partnership Development seeks opportunities for partnerships and alliances among ORAU’s members, private industry, and major federal facilities. Activities include faculty development programs, such as the Ralph E. Powe Junior Faculty Enhancement Awards, the Visiting Industrial Scholars Program, consortium research funding initiatives, faculty research and support programs as well as services to chief research officers.

For more information about ORAU and its programs, visit www.orau.org or contact:

Jeanne Clery Disclosure of Campus Security Policy and Campus Crime Statistics Act (Clery Act)

(Formerly Student Right to Know and Campus Security Act of 1990)

In compliance with federal law, the following information is maintained and available through the office listed below:

Campus Crime Statistics and Security Policies

An Annual Security Report is available that includes information on campus security policies and statistics. Security policies include: reporting crimes and emergencies, security resources, crime awareness and prevention, security of campus facilities and residence halls, alcohol, drug and weapon violations. The Annual Security Report can be found at this website (https://upd.tamu.edu/Current%20Disclosures/Annual%20Security%20Report.pdf). A paper copy is available upon request.

Education Code - Hazing

Education Code § 51.936 requirement to publish a summary of Education Code Ch. 37, subchapter F. Hazing in the University Catalog

The following is a summary of Chapter 37, subchapter F. (§§ 37.151-157) of the Texas Education Code, which prohibits hazing in Texas public or private high schools. Texas Education Code §51.936 applies Ch. 37’s prohibition on hazing to institutions of higher education. This summary of Chapter 37 is provided as required by § 51.936(d).

Summary

Hazing is a criminal violation under Texas law. A person may be found guilty of criminal conduct for hazing, encouraging hazing, permitting hazing, or having knowledge of the planning of hazing incidents and failure to report in writing his/her knowledge to the Dean of Students.

Both failing to report hazing and hazing that does not result in serious bodily injury are Class B misdemeanors. Hazing that results in serious bodily injury is a Class A misdemeanor. Hazing resulting in a death is a state jail felony. An organization found guilty of hazing may be fined $5,000 to $10,000 or, for incidents causing personal injury or property damage, an amount double the loss or expenses incurred because of the hazing incident. It is not a defense to prosecution that the person hazed consented to the hazing activity.

Any person reporting a specific hazing incident to the Dean of Students or other appropriate institutional official is immune from civil and criminal liability unless the report is in bad faith or malicious.

The state law does not limit or affect an educational institution’s right to enforce its own penalties against hazing.

The Education Code defines hazing as “any intentional, knowing, or reckless act occurring on or off the campus of an educational institution, by one person or acting with others, directed against a student, that endangers the mental or physical health or safety of a student for the purpose of pledging, being initiated into, affiliating with, holding office in, or maintaining membership in an organization.” The statute contains a list of conduct which constitutes hazing.

In order to report suspected incidents of hazing, please contact either the Office of the Dean of Student Life at (979) 845-3111 or the Texas A&M University Police Department at (979) 845-2345. For information on how to report suspected incidents of hazing, go to http://stophazing.tamu.edu/report.
