The broad objective of the academic discipline of geography is to understand and improve the human environment: Earth. Understanding the Earth's surface requires a consideration of both natural and social processes, hence geography is by nature interdisciplinary. Human-environment interactions are of particular interest in geography. The area of concentration in geography offers students a broad perspective on the Earth as human habitat, while permitting them to complete two supporting minors in other disciplines. The area of concentration is flexible in that numerous courses are included to permit a student to build a course of study in geography that is tailored to his or her interests. Ideally, the minors would be in related fields to build depth and breadth around themes that the student wishes to emphasize.

### Geography - Minor

#### General Requirements

1. Geography Minor: minimum of 16 credits in the discipline with at least 6 hours in upper-division courses, 3 hours of which must be at the 400 level.
2. Geographic Information Science and Technology (GIST): minimum of 15 credits in the discipline at 300-400 level.
3. Minimum of 6 credits must be taken in residence at either Texas A&M University or Texas A&M at Galveston.
4. Students must meet with the department's advisor for minor programs for approval of courses selected (any substitutions must be approved by the department head).
5. Minimum cumulative GPR of 2.0 must be achieved for all courses in the minor.

</table>

1. GEOG 301 and GEOG 305 cannot be used in combination to meet this requirement.
2. Any 100-499 course not used elsewhere.

Two courses that meet the writing requirement are required.

A total of six semester credit hours must include courses that meet the International and Cultural Diversity (p. 38) requirements, except sections of BUSN 289 that meet the university writing requirement.
The selection of courses must be made in agreement with the geography department advisor for minor programs.

Minimum GPA of 2.000 must be maintained in the minor coursework. 6 hours must be upper division courses, 3 of which must be at the 400-level.

**Geographic Information Science and Technology - Minor**

Geographic Information Science and Technology (GIST) is used to solve problems associated with land administration, environment and natural resource management, planning and population studies, as well as traditional surveying and mapping applications. GIST uses GIS, remote sensing, and global positioning mapping to collect, analyze and display spatial information.

**General Requirements**

1. Geography Minor: minimum of 16 credits in the discipline with at least 6 hours in upper-division courses, 3 hours of which must be at the 400 level.
2. Geographic Information Science and Technology (GIST): minimum of 15 credits in the discipline at 300-400 level.
3. Minimum of 6 credits must be taken in residence at either Texas A&M University or Texas A&M at Galveston.
4. Students must meet with the department’s advisor for minor programs for approval of courses selected (any substitutions must be approved by the department head).
5. Minimum cumulative GPR of 2.0 must be achieved for all courses in the minor.

The Department of Geology and Geophysics offers two undergraduate programs in geology, the Bachelor of Arts and the Bachelor of Science. The BS program is appropriate for students seeking careers as geologists or preparing for graduate school in geology, whereas the BA program is designed for students wishing to combine geology with other disciplines, and includes less rigorous mathematics and physics. Details of the two programs are given below along with specialty options and tracks.

Graduates must pass two Writing Intensive courses within their major. This requirement is described in Requirements for a Baccalaureate Degree (p. 25). GEOL 311 and any geology or geophysics class with a 9xx section number meets the requirement. To remain in satisfactory academic standing, students must maintain a 2.0 or better GPR in all technical courses (geology, geophysics, chemistry, math and physics). Some courses in geology require field trips. Students are required to pay expenses incurred on such trips.

**Geophysics**

Geophysics includes all areas of scientific inquiry that deal with the physical state of Earth and other planets and the dynamic processes, which act on and within planetary bodies. The Department of Geology and Geophysics offers the Bachelor of Science in Geophysics for students who wish to combine a proficiency in mathematics with an interest in Earth. The objective of this program is to develop a physically-motivated approach to the study of Earth phenomena, through treatment of physical and geological principles and development of mathematical tools. Graduates will be well-prepared for careers in the energy and environmental industries, and for advanced study at top-ranked graduate programs.

**Minors in Geology and Geophysics**

The Department of Geology and Geophysics offers minors in three separate programs: Geology, Geophysics and Earth Sciences. Minors provide opportunities for broadening a student’s background and tailoring the curriculum to specific career goals. For example, a minor in Geology or Geophysics may be especially beneficial to students majoring in fields that deal directly or indirectly with geological processes. These include agriculture, anthropology, archaeology, architecture, business, law, biology, chemistry, recreation and parks and soil science, to name a few.

The Department of Geology and Geophysics, and Geography offer a minor in Geographic Information Science and Technology (GIST). GIST is concerned with the collection, analysis and display of spatial information using geographic information systems, remote sensing, global positioning satellites and field mapping. The minor combines courses in computer science, mapping, geodesy, geographical information systems...
and remote sensing. GIST is used to solve problems associated with land administration, environment and natural resource management, planning and population studies in addition to traditional surveying and mapping applications. This minor represents a focused course of study, which can be combined with traditional areas of study in geology and geophysics, geography, and other areas of science and policy studies.

Geology & Geophysics  
PHD, Stanford University, 2006

Tominaga, Masako, Assistant Professor  
Geology & Geophysics  
PHD, Texas A&M University, 2009

Yancey, Thomas, Professor  
Geology & Geophysics  
PHD, University of California, Berkeley, 1971

Zhan, Hongbin, Professor  
Geology & Geophysics  
PHD, University of Nevada, Reno, 1996

**Majors**

- Bachelor of Arts in Geology (p. 421)
- Bachelor of Arts in Geology and Master of Ocean Science and Technology, 5-Year Degree Program (p. 422)
- Bachelor of Science in Geology (p. 423)
- Bachelor of Science in Geology and Master of Ocean Science and Technology, 5-Year Degree Program (p. 425)
- Bachelor of Science in Geophysics (p. 426)

**Minors**

- Geology Minor (p. 427)
- Geophysics Minor (p. 427)

**Geology - BA**

The Bachelor of Arts in Geology provides a foundation in geology for students who are not planning a career as a geologist. This program provides a basis for science-related careers, such as environmental law, pre-college teaching, science journalism, and resource management and marketing. Graduates will supplement their curriculum in geology with a minor designed around their career goals. The minor requires a minimum of 15 credit hours in one discipline, to be chosen in consultation with an advisor.

The BA program has less rigorous mathematics and physics requirements and less comprehensive geology requirements than the BS in Geology; therefore, the BS is the more appropriate option for students considering graduate study in geology.

Total Semester Credit Hours: 120

1. Fifteen hours of electives must be selected in a minor. Electives must be chosen in consultation with advisor.
2. Any 300- or 400-level geology or geophysics course not already required.
3. Any science, math, engineering or social science course that augments the degree with the approval of the advisor.
4. Six hours must be selected from courses that also satisfy the international and cultural diversity requirement.
5. General electives may not include STLC 100-499 (p. 920); SLCX 100-499; DEVS 100-499; BUSN 100; ENGL 103; GEOL 101-104 (p. 784); KINE 198, KINE 199; MATH 102, MATH 131, MATH 141, MATH 142, MATH 150, MATH 151, MATH 166, MATH 171; AERS 100-499 (p. 664); MLSC 100-499 (p. 856); NVSC 100-499 (p. 872); SOMS 100-499 (p. 913).

Geology - 5-Year Bachelor of Arts/Master of Ocean Science and Technology

The Fast Track Program offers motivated and exceptional students the opportunity to achieve aspirations in an efficient program at Texas A&M, completing the Bachelor of Arts (B.A.) degree in the Department of Geology and Geophysics, Geology Program and the Oceanography non-thesis M.S. degree in 5 years. There will be only two courses used for dual credit in this program. There is a total of 150 hours of coursework. The concurrent degree program will enable these motivated students to coordinate the required B.A. coursework (120 undergraduate credit hours including 6 dual credit graduate hours) and non-thesis M.S. coursework (36 credit hours including the 6 dual credit graduate hours) to complete the required credit hours for each degree without diminishing scope or quality of work and within 5 years.

Application and Eligibility:

- Applications to the Fast Track program will be submitted by July 1 after the completion of the student’s junior year. Applications submitted after that time will be evaluated on a case by case basis.
- Applicants must have a minimum undergraduate GPR of 3.0. Applicants should also earn a C or better in all Chemistry, Calculus and Physics courses. Once admitted to the program, students must maintain a minimum 3.0 GPR.
- A faculty advisor will be assigned to each student. Students may seek additional mentors, but a formal committee is not required.
- Students admitted into the Fast Track program must finish the entire 150 credit hours to obtain both the Bachelor’s and Master’s degrees. These students will be conferred with two degrees once they complete the 5th year of the concurrent program.
- Students admitted to the program will change from U4 to G7 status when they are admitted having completed at least 102 hours (end of spring semester, year 3).
- Students not accepted or not allowed to continue with the Fast Track Program will complete the 120 hour Bachelor’s degree under the standard 4 year curriculum. These students may still apply to the traditional graduate program.
- Students will graduate at the completion of the 5th year in the Fast Track Program coursework (150 credit hours) with both Bachelor’s and Master’s degrees. Students will complete the coursework in May of the 5th year.

OCNG 661  Advanced Oceanographic Data Analysis and Communication  3  

**Term Semester Credit Hours**:  9  

**Total Semester Credit Hours**:  18  

1. If students use six credits of allowed OCNG courses (e.g. OCNG 251 or OCNG 401, OCNG 252, OCNG 350, OCNG 451, OCNG 458) as minor or free electives, they will receive an OCNG minor with their BA in GEOL.  
2. Select in consultation with advisor.  
3. Students must complete 6 credit hours of American history and 6 credit hours of government/political science.  
4. A second W course is required. GEOL 312 is offered as a W option when taught by Dr. Julie Newman, and other GEOL electives also fulfill the W requirement (including GEOL 491 when arranged with the permission of the instructor).  
5. Students will not be permitted to receive credit for both the 400- and 600-level versions of certain courses because the content and learning outcomes are too similar (e.g. OCNG 410/OCNG 608, OCNG 440/OCNG 640; GEOS 470/OCNG 657).  
6. Two graduate courses will be taken for dual undergraduate/graduate credit and may contribute to the minor.  

**Geology - BS**  

The BS in Geology is considered the preparatory degree in the field of geology. Graduates will be prepared for careers in the energy and environmental industries, and for advanced study at top-ranked graduate programs. The first two years of the BS program in Geology provide students with the basics of geology and geophysics and the allied fields of chemistry, physics and mathematics. The junior and senior years involve more advanced study in the field of geology and the opportunity to concentrate study in specific disciplines through the selection of technical and geology electives. GEOL 300, during the summer following the junior year, serves as a capstone course in which students apply their geologic knowledge to solving real problems and collecting data during a six-week field season. Students are also encouraged to become involved in research problems with faculty members and can receive course credit for this activity through research hours (GEOL 291 and GEOL 491).  

The BS is the appropriate degree for students intending to pursue graduate study in geology. Students desiring employment in industry are encouraged to pursue an MS degree. Students planning a research or university teaching career should pursue a PhD degree. Particular selections of elective can be used to refine the degree.  
The BS is the appropriate degree for students intending to pursue graduate study in geology. Students desiring employment in industry
are encouraged to pursue an MS degree. Students planning a research or university teaching career should pursue a PhD degree. Particular selections of elective can be used to refine the degree.

Some of society’s most pressing problems, including groundwater contamination and remediation, water resources, and geologic hazards such as landslides, flooding and subsidence are addressed in the field of environmental geology. Environmental geologists typically find careers with environmental and engineering consulting companies and other industrial corporations, governmental agencies or academia. Students are well-prepared for the Association of State Boards of Geology (ASBOG) Fundamentals of Geology exam, which is required for appointment as a Professional Geologist in the State of Texas. Specific classes recommended for the geology and technical electives include CVEN 365, GEOG 331, GEOG 390, GEOL 410, GEOL 440, GEOS 410 and approved classes in other departments including Soil Science, Chemistry, Physics and Civil Engineering.

Many geologists go on to employment in the field of petroleum exploration and extraction. Some of the required geology classes prepare students for this field. Additional recommended classes include GEOL 400, GEOL 404, PETE 311, PETE 321, PETE 324 and PETE 402. Qualified students (GPR of 3.0 or higher with dean’s permission) may also take related graduate courses during the senior year. Such classes include GEOL 619, GEOL 622, GEOL 623, GEOL 624, GEOL 668, and GEOP 629. These classes prepare students for graduate study, as well as provide training for those who may be interested in service jobs in the oil and gas industry between their undergraduate and graduate education.

Students must pass two Writing Intensive courses within their major. This requirement is described on page 24 of this catalog. GEOL 311 and any geology or geophysics class with a 9xx section number meet the requirement. To remain in satisfactory academic standing, students must maintain a 2.0 or better GPR in all technical courses (geology, geophysics, chemistry, physics and math). Some courses in geophysics require field trips. Students must pay expenses incurred on such trips.

Geology - 5-Year Bachelor of Science/Master of Ocean Science and Technology

The Fast Track Program offers motivated and exceptional students the opportunity to achieve aspirations in an efficient program at Texas A&M, completing the Bachelor of Science (B.S.) degree in the Department of Geology and Geophysics Geology Program and the Oceanography non-thesis M.S. degree in 5 years. There will be only two courses used for dual credit in this program. There is a total of 150 hours of coursework. The concurrent degree program will enable these motivated students to coordinate the required B.S. coursework (120 undergraduate credit hours including 6 dual credit graduate hours) and non-thesis M.S. coursework (36 credit hours including the 6 dual credit graduate hours) to complete the required credit hours for each degree without diminishing scope or quality of work and within 5 years.

Application and Eligibility

- Applications to the Fast Track program will be submitted by July 1 after the completion of the student’s junior year. Applications submitted after that time will be evaluated on a case by case basis.
- Applicants must have a minimum undergraduate GPR of 3.0. Applicants should also earn a C or better in all Chemistry, Calculus and Physics courses. Once admitted to the program, students must maintain a minimum 3.0 GPR.
- A faculty advisor will be assigned to each student. Students may seek additional mentors, but a formal committee is not required.
- Students admitted into the Fast Track program must finish the entire 150 credit hours to obtain both the Bachelor’s and Master’s degrees. These students will be conferred with two degrees once they complete the 5th year of the concurrent program.
- Students admitted to the program will change from U4 to G7 status when they are admitted having completed at least 96 hours (end of spring semester, year 3).
- Students not accepted or not allowed to continue with the Fast Track Program will complete the 120 hour Bachelor’s degree under the standard 4 year curriculum. These students may still apply to the traditional graduate program.

Students will graduate at the completion of the 5th year in the Fast Track Program coursework (150 credit hours) with both Bachelor’s and Master’s degrees. Students will complete the coursework in May of the 5th year.

1 Any of the required courses may be taken during the Summer
   Sessions to diminish the heavy semester loads during Years Two and
   Three.
2 A second W course is required. GEOL 312 is offered as a W option
   when taught by Dr. Julie Newman, and other GEOL electives also
   fulfill the W requirement (including GEOL 491 when arranged with
   the permission of the instructor).
3 Students must complete 6 credit hours of American history and 6
   credit hours of government/political science.
4 Select in consultation with advisor.
5 Two graduate courses will be taken for dual undergraduate/graduate
   credit.
6 Students will not be permitted to receive credit for both the 400-
   and 600-level versions of certain courses because the content and
   learning outcomes are too similar (e.g. OCNG 410/OCNG 608,
   OCNG 440/OCNG 640; GEOS 470/OCNG 657)

Geophysics - BS

The first two years of the BS in Geophysics are similar to the BS in
Geology, providing students with the fundamentals of geology, chemistry,
physics, mathematics and computer science. Courses in geophysics
during the junior and senior years emphasize knowledge transfer from the
fields of math and physics to techniques and problems in both theoretical
and applied geophysics. Technical electives allow students to focus
on specific career objectives. The Environmental and Petroleum tracks
prepare students for the most common career paths for geophysicists.
Students are also encouraged to become involved in research problems
with faculty members and can receive course credit for this activity through
research hours (GEOP 291 and GEOP 491).

Whereas graduates from the Geophysics program will have employment
opportunities in industry, the rigor of this degree is designed to prepare
students for advanced study. The MS degree is generally considered
to be the entry degree for professionals in the petroleum industry.
Students interested in teaching in a university or research in an academic,
government or industrial laboratory should seek the PhD.

Students must pass two Writing Intensive courses within their major.
This requirement is described on page 24 of this catalog. GEOL 311 and
any geology or geophysics class with a 9xx section number meet the
requirement. To remain in satisfactory academic standing, students must
maintain a 2.0 or better GPR in all technical courses (geology, geophysics,
chemistry, math and physics). Some courses in geophysics require field
trips. Students must pay expenses incurred on such trips.

Geophysicists contribute to the field of environmental science by working
on traditional and emerging methods used for hydrogeological, structural
and stratigraphic characterization of the uppermost 100 meters, with
applications to shallow resource and groundwater assessment and the
solution of environmental and engineering problems. Environmental
geophysicists typically work as independent environmental consultants
or with industrial corporation or government agencies. GEOP 413 and
GEOP 435 provide the necessary grounding in seismic, electromagnetic,
radar and other techniques used in environmental geophysics. Other
recommended classes include GEOL 410, GEOL 420 and GEOL 440.

Many geophysicists find eventual employment in the petroleum industry, in
which reflection seismology is the primary subsurface exploration tool.
Students aiming for this field will supplement their background in seismic
theory with electives that focus on subsurface structures and processes
and industry techniques. These students will be prepared for graduate
study, as well as service jobs in the oil and gas industry between their
undergraduate and graduate education. Additional recommended classes
include GEOL 306, GEOL 400, GEOL 404 and PETE 311. Qualified
students may also take related graduate courses during the senior year,
including GEOP 629 and GEOP 620. Students interested in seismic theory
may take additional math classes, such as MATH 417, MATH 407 and
MATH 414.

Term Semester Credit Hours: 14

Total Semester Credit Hours: 120

1. Computer science course must entail programming with a high-level language.
2. Any science, math or engineering course that augments the degree with the approval of the advisor.
3. Six hours must be selected from courses that also satisfy the International and Cultural diversity requirement.

Geology - Minor

The Department of Geology and Geophysics offers a minor in Geology.

Program Requirements

1. Minimum of 15 credit hours in Geology or Geophysics. May not include GEOL 308.
2. Minimum of 6 credits must be taken in residence at either Texas A&M in College Station or Texas A&M in Galveston.
3. Must include one of GEOL 101, GEOL 104 or GEOL 320.
4. Maximum of 4 credits may be from selected courses in Geography or Oceanography, with approval of advisor (any substitutions must be approved by the department head).
5. Minimum of 6 credits at the 300-400 level.
6. Minimum of 2.0 cumulative GPA for all courses in the minor.

Geophysics - Minor

The Department of Geology and Geophysics offers a minor in Geophysics.

Program Requirements

1. Minimum of 15 credit hours in Geology or Geophysics. May not include GEOL 308.
2. Minimum of 6 credits must be taken in residence at either Texas A&M in College Station or Texas A&M in Galveston.
3. Minimum of 9 credit hours in Geophysics.
4. Maximum of 4 credits may be from selected courses in Geography or Oceanography, with approval of advisor (any substitutions must be approved by the department head).
5. Minimum of 6 credits at the 300-400 level.
6. Minimum of 2.0 cumulative GPA for all courses in the minor.

**Department of Oceanography**

**Studies in Oceanography**

Oceanography is an interdisciplinary science that focuses on the oceans, their contents and their boundaries. Degree programs are offered at the graduate level, leading to the Master of Science and the Doctor of Philosophy degrees in oceanography. In addition, various undergraduate courses are offered, and qualified undergraduate students may participate in a 15-credit minor in Oceanography.

Oceanography is unusual as a graduate discipline. Whereas graduate programs in most disciplines lead to progressively greater degrees of specialization, oceanography as an interdisciplinary field takes graduates of biology, chemistry, geology, mathematics, physics, geophysics, meteorology or engineering and initially generalizes and broadens their education with a core of required courses. These core courses include the four subject areas of the oceanography program (biological, chemical, geological/geophysical and physical oceanography) and a seminar covering the state of the science. The student then refocuses in a particular subject area to pursue research and further study.

Effective study of oceanography requires a thorough undergraduate training in one of the pertinent undergraduate sciences, mathematics or engineering. During the undergraduate years, a student should consult with the oceanography faculty while enrolled in an appropriate undergraduate curriculum.

Minors

• Oceanography Minor (p. 429)

Oceanography - Minor

Studies in Oceanography

Oceanography is an interdisciplinary science that focuses on the oceans, their contents and their boundaries. Degree programs are offered at the graduate level, leading to the Master of Science and the Doctor of Philosophy degrees in oceanography. In addition, various undergraduate courses are offered, and qualified undergraduate students may participate in a 15-credit minor in Oceanography. A minor consists of at least 15 hours from any of the undergraduate OCNG courses. However, only one of OCNG 251 or OCNG 401 can be used for the minor. At least 6 hours must be upper division courses in the minor. In addition, the department is initiating a 3+2 program.

Oceanography is unusual as a graduate discipline. Whereas graduate programs in most disciplines lead to progressively greater degrees of specialization, oceanography as an interdisciplinary field takes graduates of biology, chemistry, geology, mathematics, physics, geophysics, meteorology, or engineering and initially generalizes and broadens their education with a core of required courses. These core courses include the four subject areas of the oceanography program (biological, chemical, geological/geophysical and physical oceanography) and a seminar covering the state of the science. The student then refocuses in a particular subject area to pursue research and further study.

Effective study of oceanography requires a thorough undergraduate training in one of the pertinent undergraduate sciences, mathematics or engineering. During the undergraduate years, a student should consult with the oceanography faculty while enrolled in an appropriate undergraduate curriculum.

Program Requirements

Select 15 semester credits from the following:

Any OCNG 100 - 499

Total Semester Credit Hours 15

1 Only one of OCNG 251 or OCNG 401 can be used for the minor.
2 At least 6 hours must be upper division courses.

University Studies Programs

The College of Geosciences offers degrees in University Studies. A University Studies degree differs from a traditional “major” in that it consists of a concentration of 26 hours and two minors of 15-18 hours each. The University Studies degree format was created to provide students the flexibility to combine areas of study that are of special interest.

Majors

• Bachelor of Science in University Studies, Geographic Information Science and Technology Concentration (p. 416)
• Bachelor of Science in University Studies, Geography Concentration (p. 416)

University Studies - BS, Geographic Information Science and Technology Concentration

The broad objective of the academic discipline of geography is to understand and improve the human environment: Earth. Understanding the Earth's surface requires a consideration of both natural and social processes, hence geography is by nature interdisciplinary. Human-environment interactions are of particular interest in geography. The area of concentration in geography offers students a broad perspective on the Earth as human habitat, while permitting them to complete two supporting minors in other disciplines. The area of concentration is flexible in that numerous courses are included to permit a student to build a course of study in geography that is tailored to his or her interests. Ideally, the minors would be in related fields to build depth and breadth around themes that the student wishes to emphasize.

Program Requirements

GEOG 390 Principles of Geographic Information Systems 4
GEOG 361 Remote Sensing in Geosciences 4
GEOG 352/GEOL 352 GNSS in the Geosciences 3
GEOG 475 Advanced Topics in GIS (Geographic Information Systems) 4

Select from the following: 6-8

ESSM 459 Programming for Spatial Data Applications
CSCE 111 Introduction to Computer Science Concepts and Programming
GEOG 232 Cartography and Visualization
GEOG 398 Interpretation of Aerial Photographs
GEOG 392 GIS Programming
GEOG 461 Digital Image Processing in the Geosciences
GEOG 475 Advanced Topics in GIS (Geographic Information Systems)
GEOG 312 Data Analysis in Geography
GEOG 479 Principles of Geocomputation
GEOG 461 Digital Image Processing in the Geosciences

University and College Requirements

ENGL 104 Composition and Rhetoric 3
Communication elective (p. 21) 3
MATH 141  Finite Mathematics      3
MATH 142  Business Calculus        3
Life and Physical Sciences elective (p. 21)  9
Language, Philosophy and Culture (p. 22)  3
Creative Arts (p. 23)                  3
Social and Behavioral Sciences (p. 24)  3
American History (p. 24)              6
POLS 206  American National Government     3
POLS 207  State and Local Government    3
International and Cultural Diversity (p. 38)  1
Minor 1                               15-18
Minor 2                               15-18
Free Electives                       26
Total Semester Credit Hours          120

1 A graduation requirement includes 6 hours of international and cultural diversity courses. A course satisfying a University Core category, a college/department requirement, or a free elective may be used to satisfy this requirement.

University Studies - BS, Geography Concentration

The broad objective of the academic discipline of geography is to understand and improve the human environment: Earth. Understanding the Earth's surface requires a consideration of both natural and social processes, hence geography is by nature interdisciplinary. Human-environment interactions are of particular interest in geography. The area of concentration in geography offers students a broad perspective on the Earth as human habitat, while permitting them to complete two supporting minors in other disciplines. The area of concentration is flexible in that numerous courses are included to permit a student to build a course of study in geography that is tailored to his or her interests. Ideally, the minors would be in related fields to build depth and breadth around themes that the student wishes to emphasize.

- GEOL 101  Principles of Geology
- & GEOL 101 and Historical Geology
- PHYS 201  College Physics
- & PHYS 202 and College Physics

Language, Philosophy and Culture elective (p. 22) 3

Creative Arts elective (p. 23) 3

Social and Behavioral Sciences elective (p. 24) 3

American History elective (p. 24) 6

POLS 206  American National Government 3

POLS 207  State and Local Government 3

Minor 1 15-18

Minor 2 15-18

General Electives 2 18-24

Total Semester Credit Hours 120

1. GEOG 301 and GEOG 305 cannot be used in combination to meet this requirement.

2. Any 100-499 course not used elsewhere.

Two courses that meet the writing requirement are required.

A total of six semester credit hours must include courses that meet the International and Cultural Diversity (p. 38) requirements, except sections of BUSN 289 that meet the university writing requirement.
College of Liberal Arts

Administrative Officers
Dean - Pamela R. Matthews, Ph.D.
Associate Dean - Patricia A. Hurley, Ph.D.
Associate Dean - Steven M. Oberhelman, Ph.D.
Associate Dean - Srividya Ramasubramanian, Ph.D.
Associate Dean - Gerianne Alexander, Ph.D.
Associate Dean - Paul Wellman, Ph.D.
Associate Dean - Leroy Dorsey, Ph.D.
Assistant Dean - Cheryl L. Hanks, M.A.

General Statement
The College of Liberal Arts offers students an opportunity to explore the intellectual achievements of humankind through a disciplined and responsible study of issues that have been of enduring importance to people. Thus, courses in liberal arts help students develop a sensitivity to the questions and values that confront them in their daily lives. At the same time, skills are built which can be put to use in solving complex problems. One of the program’s principal objectives is to achieve the hallmark of an educated person: a fundamental knowledge of the forces that have shaped and continue to direct our cultural identity.

The purpose of the undergraduate program in the College of Liberal Arts is to foster independent thinking by offering students a broad education. To achieve this, the college supports the aims of the University Core Curriculum, which requires all students to engage in specific studies intended to promote an awareness of their heritage, their culture, and their environment. Students who choose to major in one of the Liberal Arts disciplines will complete a curriculum designed to promote this breadth of understanding while providing a focus through concentration in one specific area of study.

The first two years of undergraduate study in the College of Liberal Arts introduce students to the full range of arts, humanities, science, mathematics and social science areas that are established in the University Core Curriculum. During the last two years, students concentrate on their major and minor fields of study and complete their program with appropriate elective hours. Throughout the program, skills in critical thinking and in communication are developed, strengthened and polished.

Many graduates with bachelor’s degrees in liberal arts continue their study at the graduate level in an academic discipline or in a profession such as medicine or law. The majority go directly into the job market. Studies have shown that liberal arts graduates are very successful in a variety of activities in commerce, business, or public service because the knowledge and skills they have developed are valuable in today’s world. Many businesses actively recruit liberal arts majors.

Thus, whether as a foundation for further study or as a broad education preparatory to positions in business, industry, and the public domain, a liberal arts degree has intrinsic worth and enduring value.

General Degree Requirements
Degree requirements for Liberal Arts majors are organized into:
1. General Requirements, including University Core Curriculum requirements and College of Liberal Arts requirements
2. Requirements of the Major Field of Study
3. Requirements of the Minor Field of Study
4. Electives

A minimum of 120 acceptable hours of coursework is required for the baccalaureate degree. A minimum of 36 hours of 300- or 400-level coursework must be completed at Texas A&M University.

General Requirements
The areas listed below include University Core Curriculum requirements and College of Liberal Arts requirements. The completion of requisite hours in these areas will thus satisfy both University Core Curriculum and college requirements.

Bachelor of Arts Requirements

Communication
ENGL 104 Composition and Rhetoric 3
Select one of the following: 3
   ENGL 203 Writing about Literature
   ENGL 210 Technical and Business Writing
   COMM 203 Public Speaking
   COMM 205 Communication for Technical Professions
   COMM 243 Argumentation and Debate

Literature in English
Select two of the following: 6
   ENGL 202 Environmental Literature
   ENGL 203 Writing about Literature 2
   ENGL 204/AFST 204 Introduction to African-American Literature
   ENGL 205/AFST 205 Introduction to Africana Literature
   ENGL 206 Twenty-first Century Literature and Culture
   ENGL 212 Shakespeare
   ENGL 219 Literature and the Other Arts
   ENGL 221/222 World Literature
   MODL 221
   MODL 222
   ENGL 227/228 American Literature: The Beginnings to Civil War
   ENGL 231 Survey of English Literature I
   ENGL 232 Survey of English Literature II
   ENGL 313 Medieval English Literature
   ENGL 314 The English Renaissance
   ENGL 315 Seventeenth-Century Literature
   ENGL 316 Eighteenth-Century Literature and Culture
   ENGL 317 Early British Drama

Total Semester Credit Hours 74

1 Students must demonstrate the ability to express themselves in acceptable written English. The College requirement is satisfied if a student earns a grade of C or better in ENGL 203. Students who do not meet this standard must repeat the course prior to completing 60 hours and earn a grade of C or better or must immediately arrange with the director of the writing laboratory to be certified as competent in writing.

2 ENGL 203 will count toward the Communication requirement or the Literature in English requirement, but will not count toward both requirements.

3 Students must take a foreign language placement test if they:
   • intend to enroll for the first time in a college Spanish, French, German, Russian, Arabic, Chinese, Japanese, Classical Greek, Italian, or Latin course and
   • have knowledge of the language acquired in any way
   The placement test serves as a basis for credit by examination. Placement tests are offered throughout the calendar year by the Department of Hispanic Studies for Spanish and by the Department of International Studies for all other languages. Students who have taken the Advanced Placement (AP) test or the Reading Achievement test in their foreign language of choice may substitute the test results for the placement exam.

4 No course used to fulfill this requirement may fulfill any other college of University requirement except in the minor field of study.

5 Minimum of 3 and maximum of 6 semester credit hours in Creative Arts.

6 Courses in military, air or naval science may not be substituted for required courses.

7 The list of approved courses is available in the degree audit for each major.

Total Semester Credit Hours 74

1 Students must demonstrate the ability to express themselves in acceptable written English. The College requirement is satisfied if a student earns a grade of C or better in ENGL 203. Students who do not meet this standard must repeat the course prior to completing 60 hours and earn a grade of C or better or must immediately arrange with the director of the writing laboratory to be certified as competent in writing.
2 ENGL 203 will count toward the Communication requirement or the Literature in English requirement, but will not count toward both requirements.
3 Two years of high school foreign language may be used to satisfy this requirement unless specified by major.
4 No course used to fulfill this requirement may fulfill any other college or university requirement except in the minor field of study.
5 Minimum of 3 and maximum of 6 semester credit hours in Creative Arts.
6 Courses in military, air or naval science may not be substituted for required courses.
7 The list of approved courses is available in the degree audit for each major.

Major Field of Study
Each department sets its own requirements for the major, including no fewer than 27 hours of coursework and no more than 33 hours (except for the BA in Music). At least 12 semester hours in the major must be completed in advanced courses (300- and 400-level), and at least 12 semester hours in the major field must be completed in residence at Texas A&M. A grade of C or higher is required in a course to be counted toward the major.

Minor Field of Study
Completion of a minor is not a requirement of the College of Liberal Arts; however, individual departments may require their majors to have a minor. Students should consult with an advisor in their major department to determine if a minor is required. The minor program comprises 15–18 hours with a minimum of 6 hours in residence at the 300- to 400-level. Minor programs are recognized on the transcript after graduation, but not on the diploma. A grade of C or higher is required if a course is to be counted toward the minor field. Each student who is required to complete a minor, or who chooses to do so, should contact the department that offers the minor to determine which specific courses are mandated. The student’s college and/or major department determines the number of minor programs a student may seek and shall be responsible for advising after the student receives signed approval from the department, program, or college granting the minor program.

Electives
To enhance the traditionally broad background of the liberal arts graduate, undergraduate students are allowed to include in their degree program a minimum of 9 semester hours of free elective courses. These courses may be chosen from any field within the University except from a student’s major field. (See section on “Requirements for a Baccalaureate Degree” in this catalog.) All other elective hours must be selected with the approval of the student’s advisor and dean.

- STLC 101, STLC 102 and STLC 289 may only be taken on an S/U basis.
- Lower level (100 and 200 level) military science coursework (AERS, MLSC, NVSC) does not apply to degree requirements in the College of Liberal Arts.
- No more than 14 semester credit hours combined of KINE 199 and upper-level Military Science or SOMS courses may be used as electives.
- Any undergraduate student may take up to four semester credit hours of KINE 199 on an S/U basis.
- In the College of Liberal Arts, students who have less than a 2.0 GPR and who enroll in KINE 199 must enroll in the course on an S/U basis.
- Juniors and seniors in the College of Liberal Arts whose cumulative GPR is 2.50 or above may take up to 12 semester credit hour hours of “free electives” on an S/U basis.
- Transfer students must take at least 12 semester credit hours of regular coursework at Texas A&M before enrolling in a course on an S/U basis.
- Courses offered only on an S/U basis may be taken by freshmen and sophomores. These courses count toward the 12 semester credit hour limit.

Combined Degree Plan, Double Degree and Double Major
Students may pursue a program to qualify for two bachelor’s degrees, either a Bachelor of Arts and a Bachelor of Science degree from different departments, or two Bachelor of Arts or two Bachelor of Science degrees, with the second degree from another college. Alternatively, instead of a major and a minor field, students in the College of Liberal Arts may elect to have two Liberal Arts major fields of study. Both majors may be within the college, or one major may be outside the college, provided both majors lead to the same baccalaureate degree.

Students must declare the double degree no later than the semester in which they will complete 90 hours. Students must have and maintain at least a 3.0 GPR cumulative and in the majors (or the minimum departmental GPR requirement in the major, whichever is higher), with at least a 3.0 GPR in at least 9 hours in the second field of study at the time of declaration. Before declaring the double degree, students should consult with the appropriate advisors to formulate the combined degree plan. The following requirements must be met: the student must

1. satisfy all University and college requirements
2. complete all required courses in each major, if both majors are in the College of Liberal Arts (i.e., take all courses that are specifically listed in each regular degree program)
3. in cases where one major is in the College of Liberal Arts and the other major is in another college, the student shall take in his or her liberal arts major field of study the same number of credit hours
required of regular majors in that field and also satisfy whatever conditions are set by the other college for its major field.

Candidates for a double bachelor’s degree must have been in residence at least two academic years and must complete all essential work of the second curriculum not covered in the first. To qualify for the double degree, the student must complete a minimum of 30 semester credit hours more than the higher number of semester credit hours required for either degree.

Curricular Options

International and Intercultural Experiences

The International and Cultural Diversity requirement encourages all students to learn about attitudes and cultures different from their own. All students are required to select from a list of approved courses that foster greater awareness of our interdependent and diverse world.

Students also may select, as free electives, courses which address cultural diversity issues in the United States. Courses in this area encourage students to focus on issues of race, ethnicity and gender and to develop a broader understanding of the diverse cultures and traditions in the United States.

Further opportunity to increase international and national intercultural awareness can be accomplished through study abroad and internship programs. More information on these programs is available through the Undergraduate Programs Office in the College of Liberal Arts.

Liberal Arts Honors Program

The College of Liberal Arts encourages qualified majors to participate in its Honors Program, which is designed for academically talented high school graduates who have distinguished secondary school records (top 10%) and high scores on achievement tests (1250 SAT or 28 ACT). Students accepted into the program take courses that foster an interdisciplinary outlook characteristic of the Liberal Arts and that synthesize knowledge from other courses. Participants work in small classes with some of the most distinguished faculty at Texas A&M University. Students develop their own interests and have the option to write an honors thesis under the direct supervision of a professor with whom they have chosen to work. For information about Texas A&M Honors Program and Fellows Program (i.e., the senior thesis), see the Honors and Undergraduate Research (http://honors.tamu.edu) website. Individual departments may have their own Honors program for their majors.

Interdisciplinary Minors

Interdisciplinary minors are offered in Africana Studies, Asian Studies, Comparative Cultural Studies, Film Studies, Hispanic Studies for Community Engagement, Journalism Studies, Latino/a Mexican American Studies, Religious Studies, and Women’s and Gender Studies. Specific course requirements and options are available from each interdisciplinary program director.

Cooperative Education Program

Cooperative education enables students to gain practical work experience and a salary while completing academic requirements. During the four-year academic program, co-op students complete two to four periods of work away from campus, gaining experience through on-the-job training and thus improving their opportunities for future employment. An advisor in the cooperative education office provides additional information about this program.

Government Service (MPA Programs)

Most graduate programs in public administration recommend a broad background of knowledge and skills in the following areas: the political, social, economic and legal context of administration; analytical tools; individual, group and organizational dynamics; policy analysis; administrative/management processes; and arts and science foundation skills. Students are best prepared for an MPA program if their undergraduate programs are multidisciplinary in nature, drawing upon political science, economics, the behavioral sciences, the quantitative sciences, and administrative and managerial sciences.

Law

Most law school admissions committees require a student to have a baccalaureate degree, or equivalent, as well as an acceptable score on the Law School Admissions Test (LSAT). In general, law schools prefer that a student seek a diverse college education rather than one which is narrowly specialized. They favor thorough learning in some broad cultural field of a student’s choice, such as history, economics, political science, philosophy, mathematics, science, literature, or the classics. Admissions committees rarely favor concentration in specialized, technical curricula unless such study is adequately supplemented by advanced work in the social sciences and humanities. The Law School Admissions Test Council and the Council of the Section on Legal Education and Admissions of the American Bar Association both advise against the taking of satisfactory/unsatisfactory courses by students intending to go to law school.

The college now offers a university studies degree in pre-law (B.A. in Society, Ethics and Law). Advising for pre-law students regardless of major, including application forms for taking the Law School Admissions Test, may be obtained from the Office of Professional School Advising.

Medicine

Advising for all pre-health students, including medical and dental students, may be obtained from the Office of Professional School Advising. Students are urged to stop by the office to pick up information on professional schools and talk with an advisor very early in their collegiate career.

Teacher Certification

Students majoring in one of the departments of the College of Liberal Arts and working toward a teaching certificate must meet the minimum requirements described in the College of Education and Human Development section under secondary teacher certification. Because many certification requirements are determined by the State of Texas and thus are subject to periodic change, students working toward certification should maintain frequent contact with advisors in the College of Education and Human Development.

Theology

The American Association of Theological Schools recommends that students planning to enter a theological seminary include in their undergraduate curriculum the following subjects.

English (6 semesters)
History (3 semesters)
Philosophy (3 semesters)
Natural science (2 semesters)
Social science (6 semesters)
Foreign language (4 semesters): Latin, German or French
Religion (3 semesters).

Courses taught at Texas A&M in religion include:

For more information, see the Director of the Religious Studies Program in the college.

The English Language Institute

The English Language Institute (ELI) offers a comprehensive program designed to help international students improve their English language ability. The goal of the English Language Institute is to provide the necessary language and cultural skills for international students to enter and participate in academic programs at Texas A&M. This intensive English program facilitates international students' participation in technology, science and management. Enriched by the arts and humanities, the program serves current and future University students and emphasizes diversity and excellence.

Full-time ELI admitted students receive 25 hours of instruction per week, while part-time admitted students take from 3 to 12 or more hours per week. ELI classes meet on a regular University semester schedule in classrooms on the Texas A&M campus.

The ELI uses the most current textbooks, supplementary materials, language learning equipment and instructional techniques in the field of language learning. Courses emphasize listening and reading comprehension, fluency in speaking and writing, and the development of pronunciation skills, vocabulary and grammar. Courses are offered at beginning (100), intermediate (200), and advanced (300) levels. In addition, 500-level courses in oral skills prepare graduate students to serve as teaching assistants, while 500-level courses in composition teach preparation for thesis and dissertation writing. For more information, contact the ELI Office at (979) 845-7936.

Majors

College of Liberal Arts

- Bachelor of Arts in Women's and Gender Studies (p. 441)
- Bachelor of Arts in University Studies, Journalism Studies Concentration (p. 530)
- Bachelor of Arts in University Studies, Race, Gender, Ethnicity Concentration (p. 530)
- Bachelor of Arts in University Studies, Religious Thought, Practices and Cultures Concentration (p. 532)
- Bachelor of Arts in University Studies, Society, Ethics and Law Concentration (p. 533)
- Bachelor of Science in University Studies, Race, Gender, Ethnicity Concentration (p. 534)

Department of Anthropology

- Bachelor of Arts in Anthropology, General Track (p. 453)
- Bachelor of Arts in Anthropology, Archaeology Track (p. 452)

Department of Communication

- Bachelor of Arts in Communication (p. 456)
- Bachelor of Arts in Telecommunication Media Studies (p. 457)
- Bachelor of Science in Telecommunication Media Studies (p. 458)

Department of Economics

- Bachelor of Arts in Economics (p. 463)
- Bachelor of Arts in Economics (p. 463) and Master of International Affairs, 5-Year Degree Program (p. 465)
- Bachelor of Arts in Economics (p. 463) and Master of Public Service and Administration, 5-Year Degree Program (p. 466)
- Bachelor of Science in Economics (p. 464)
- Bachelor of Science in Economics (p. 464) and Master of International Affairs, 5-Year Degree Program (p. 467)
- Bachelor of Science in Economics (p. 464) and Master of Public Service and Administration, 5-Year Degree Program (p. 468)
- Bachelor of Science in Economics and Master of Science in Economics, 5-Year Degree Program (p. 469)

Department of English

- Bachelor of Arts in English (p. 473)
- Bachelor of Arts in English, Middle School Teaching Certification (p. 474)

Department of Hispanic Studies

- Bachelor of Arts in Spanish (p. 477)

Department of History

- Bachelor of Arts in History (p. 482)

Department of International Studies

- Bachelor of Arts in Classics, Classical Civilization Track (p. 485)
- Bachelor of Arts in Classics, Language and Literature Track (p. 485)
- Bachelor of Arts in International Studies, International Commerce Track (p. 486)
- Bachelor of Arts in International Studies, International Communication and Media Track (p. 488)
- Bachelor of Arts in International Studies, International Environmental Studies Track (p. 489)
- Bachelor of Arts in International Studies, International Geographic Information Systems Track (p. 491)
- Bachelor of Arts in International Studies, Global Cultural Studies Track (p. 492)
- Bachelor of Arts in International Studies, International Politics and Diplomacy Track (p. 494)
• Bachelor of Arts in International Studies and Master of Public International Affairs, 5-Year Degree Program (p. 495)
• Bachelor of Arts in Modern Languages, French Option (p. 497)
• Bachelor of Arts in Modern Languages, German Option (p. 498)
• Bachelor of Arts in Modern Language, Russian Option (p. 499)

Department of Performance Studies
• Bachelor of Arts in Performance Studies (p. 503)

Department of Philosophy and Humanities
• Bachelor of Arts in Philosophy (p. 507)

Department of Political Science
• Bachelor of Arts in Political Science (p. 511)
• Bachelor of Science in Political Science (p. 512)
• Bachelor of Arts in Political Science and Master of Public Service and Administration, 5-Year Degree Program (p. 512)
• Bachelor of Science in Political Science and Master of Public Service and Administration, 5-Year Degree Program (p. 513)

Department of Psychology
• Bachelor of Arts in Psychology (p. 521)
• Bachelor of Science in Psychology (p. 521)

Department of Sociology
• Bachelor of Arts in Sociology (p. 524)
• Bachelor of Science in Sociology (p. 526)
• Bachelor of Arts in Sociology and Master of Public Service and Administration, 5-Year Degree Program (p. 525)
• Bachelor of Science in Sociology and Master of Public Service and Administration, 5-Year Degree Program (p. 526)

Minors

College of Liberal Arts
• Africana Studies Minor (p. 443)
• Comparative Cultural Studies-International Minor (p. 444)
• Comparative Cultural Studies-U.S. Minor (p. 445)
• Film Studies Minor (p. 446)
• Global Culture and Society Minor (p. 446)
• Journalism Minor (p. 446)
• Leadership Minor (p. 447)
• Liberal Arts Honors Minor (p. 447)
• Religious Studies Minor (p. 447)
• Women’s Studies Minor (p. 448)

Department of Anthropology
• Anthropology Minor (p. 454)
• Museum Studies Minor (p. 454)

Department of Communication
• Communication Minor (p. 459)

Department of Economics
• Economics Minor (p. 470)

Department of English
• English Minor (p. 476)

Department of Hispanic Studies
• Hispanic Studies for Community Engagement Minor (p. 479)
• Spanish Minor (p. 480)

Department of History
• History Minor (p. 483)

Department of International Studies
• Arabic Studies Minor (p. 500)
• Asian Studies Minor (p. 500)
• Chinese Minor (p. 501)
• Classical Studies Minor (p. 501)
• French Minor (p. 502)
• German Minor (p. 502)
• Italian Minor (p. 502)
• Japanese Minor (p. 502)
• Russian Minor (p. 503)

Department of Performance Studies
• Performance Studies Minor (p. 506)
• Performance Technology Minor (p. 507)

Department of Philosophy
• Philosophy Minor (p. 508)

Department of Psychology
• Psychology Minor (p. 522)

Department of Sociology
• Latino/a and Mexican-American Studies Minor (p. 527)
• Sociology Minor (p. 528)

Certificates

College of Liberal Arts
• Diversity Certificate (p. 449)
• Gender and Leadership Certificate (p. 449)
• Global Perspectives in Liberal Arts Certificate (p. 450)

Department of Communication
• Communication and Global Media Certificate (p. 460)
• Communication Leadership and Conflict Management Certificate (p. 460)
• Health Communication Certificate, Health Campaign/Policy Track (p. 460)
• Health Communication Certificate, Provider-Patient/Organizational Track (p. 461)
• Strategic Communication Certificate (p. 461)

Department of Economics
• Business Economics Certificate (p. 470)
Department of Philosophy and Humanities
- Philosophy Pre-Law Certificate (p. 508)

Department of Political Science
- Advanced Research Methods in Political Sciences Certificate (p. 514)
- Comparative Study of National Politics Certificate (p. 514)
- European Union Politics Certificate (p. 515)
- Foundations of Political Theory Certificate (p. 516)
- International Relations Certificate (p. 517)
- Law, Politics, and Society Certificate (p. 517)
- Race, Ethnicity, and Gender Politics Certificate (p. 518)

Department of Sociology
- Global Sociology Certificate (p. 528)
- Sociology of Gender Certificate (p. 529)
- Sociology of Race and Ethnicity Certificate (p. 529)

Masters

Department of Anthropology
- Master of Arts in Anthropology (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/liberal-arts/anthropology/ma)

Women's and Gender Studies - BA

Women's and Gender Studies is a flexible interdisciplinary program devoted to the critical analysis of gender and the pursuit of knowledge about women throughout history and around the world. Combining the methods and insights of traditional liberal arts disciplines with the special insights of scholarship on women's and gender studies, our courses yield fresh perspectives on the nature of gender as it intersects with race, ethnicity, class, religion, and nation, and encourage students to look beyond their own culture and era in examining gender's role in shaping society. Through interdisciplinary breadth and an emphasis on critical thinking, women's and gender studies prepares students to employ critical learning in their private lives as well as in public roles as citizens and members of a diverse and complex workforce.

Majors in women's and gender studies receive training in both humanities and social sciences approaches and are required to complete coursework that focuses on material beyond dominant U.S. culture; core courses have both theoretical and applied focuses. In addition, majors pursue a strong liberal arts education and complete a minor in another disciplinary or interdisciplinary area, enhancing career options and enabling students to complement their work in the major and further their educational objectives by gaining detailed knowledge of a second area.

Since gender has far-reaching influence on daily life, world culture, and public policy, this major equips students to enter a wide range of fields. As a liberal arts degree, women's and gender studies is attractive to employers looking for recruits trained in critical thinking, organizational skills, reading, writing, and presenting in a wide range of subject areas. Expertise in women's and gender issues is increasingly important to businesses, governmental agencies, and other organizations dealing with matters such as sexual harassment, flex-time, parental leave, and pay equity, just as specialists in women's and gender studies find opportunities in education, law, health care, social work, counseling, media, public policy, and a wide range of other fields.

Minor ²

15-18

**College and University Requirements**

**Communication**
- ENGL 104 Composition and Rhetoric ³ | 3
- Select one of the following: ³ |
  - ENGL 203 Writing about Literature
  - ENGL 210 Technical and Business Writing
- COMM 203 Public Speaking
- COMM 205 Communication for Technical Professions
- COMM 243 Argumentation and Debate

**Literature in English** (p. 432) ⁴ | 6
- Foreign language (p. 432) | 14
- Mathematics (p. 21) | 6
- Life and physical sciences (p. 21) | 9
- Creative arts (p. 23) ⁵ | 3
- Language, philosophy and culture (p. 22) ⁵ | 3
- Language, philosophy and culture course or Creative arts course (p. 22) ⁵ | 3
- Social and behavioral sciences (p. 24) | 3
- Government/political science (p. 24) ⁶ | 6
- American history (p. 24) ⁶,⁷ | 6
- International and cultural diversity (p. 38) ⁸ | 6
- Electives ⁵,⁹ | 7-10

**Total Semester Credit Hours** | 120

¹ Courses may be applied both toward the WGST international and cultural diversity requirement and toward the WGST humanities and/or social sciences requirements.
² Only students who are double majoring do not need to complete a minor. See the Minor Requirements section below.

³ A minimum grade of C is required.
⁴ See **Literature in English** table below for college approved list of courses.
⁵ WGST course may not be used to fulfill this requirement.
⁶ Completion of four semesters of upper-level ROTC may be substituted for 3 hours of American history or political science.
⁷ No more than one course may be in Texas history.
⁸ Students are required to complete 6 hours of International and Cultural Diversity courses. These courses may also be used to satisfy other requirements.
⁹ Minimum of 7 hours if 18-hour minor; minimum of 10 hours if 15-hour minor.

27 hours of WGST coursework required for the BA degree.

A minimum 2.0 GPR and a minimum grade of C for a course to count in the major. Completion of a minor in another field and completion of distribution requirements in the major as outlined.

At least 12 semester hours in the major must be completed in advanced courses (300- and 400-level), and at least 12 semester hours in the major field must be completed in residence at Texas A&M.

**Minor Requirements**

All Women's and Gender Studies majors, with the exception of those who are double-majoring, must complete a minor chosen from other departments or divisions within or outside the College of Liberal Arts. The minor will consist of 15–18 hours of coursework with a minimum of 6 hours in residence at the 300- to 400-level. A grade of C or higher is required if a course is to count in the minor. Courses taken toward the minor may also be used to satisfy University Core Curriculum requirements. Students should consult the advisor for the minor or the Undergraduate Student Services Office in the College of Liberal Arts for details about how to satisfy minor requirements.

**College and University Requirements**

Other courses may qualify. Students should consult the approved lists of courses available in the Undergraduate Student Services Office in the College of Liberal Arts. Students must complete a minimum of 36 hours of 300- or 400-level course work at Texas A&M University.

**Africana Studies - Minor**

The College of Liberal Arts offers a minor in Africana Studies. An interdisciplinary minor that can be paired easily with any major, Africana Studies is a program which provides students with a unique opportunity to think critically about the cultural, historical and social contributions and experiences of people from Africa and of African descent. In our program, students examine the construction of blackness across ethnic, regional, and national boundaries. Africana Studies courses are a comingling of traditional approaches to the field and cutting edge scholarship that challenges stereotypical portrayals of blacks the world over.

**Program Requirements**

Required Courses:
- **AFST 302**  
  Gateway Course  
- **AFST 481**  
  Seminar

Select four from the following:
- **AFST 201**  
  Introduction to Africana Studies
- **AFST 204/ENGL 204**  
  Introduction to African-American Literature
AFST 205/ ENGL 205 Introduction to Africana Literature
AFST 252/ PHIL 252 Introduction to Hip-Hop Philosophy
AFST 285 Directed Studies
AFST 289 Special Topics in...
AFST 300/ HIST 300 Blacks in the United States, 1607-1877
AFST 301/ HIST 301 Blacks in the United States Since 1877

- HIST 307 Latino Communities of the U.S.
Film Studies - Minor

The Interdisciplinary Minor in Film Studies prepares undergraduate students to think and write critically about film and media from multiple perspectives. The minor offers courses in the history, criticism, and theory of film and media, and provides opportunities to pursue analyses of the aesthetic, cultural, economic, technological, and international dimensions of film. The foundational courses, FILM 251/ENGL 251 and FILM 299, set the stage for advanced courses in Film. A major goal of the program is to connect the student's major field of study with an understanding of film's cultural and social significance. Drawing from the expertise of affiliated faculty across the College of Liberal Arts, the minor can be tailored to the student's interests. The minor culminates in a Senior Seminar involving research on a special topic in the study of film.

Program Requirements

Required courses:
- FILM 251/ENGL 251 Introduction to Film Analysis 3
- FILM 299 History of Film 3
- FILM 481 Seminar in Film Studies 3

Select three of the following: 9
- ENGL 251/ Introduction to Film Analysis
- FILM 251
- FILM 289 Special Topics in...
- FILM 343/ Sex, Gender and Cinema
- WGST 343
- FILM 351/ Advanced Film
- ENGL 351
- FILM 356/ Literature and Film
- ENGL 356
- FILM 394 Studies in Film Genre
- FILM 401 National Cinema History
- FILM 405/ European Cinema
- EURO 405
- FILM 425/ French Film
- FREN 425
- FILM 435/ German Film
- GERM 435
- FILM 455/ Italian Cinema
- ITAL 455
- FILM 489 Special Topics in...
- HIST 460 American Society and Culture Since 1877
- SPAN 410 Hispanic Film

Total Semester Credit Hours 18

Students must make a grade of "C" or better in all courses.

Global Culture and Society - Minor

The College of Liberal Arts offers a minor in Global Culture and Society.

Program Requirements

Portfolio 1
- ARCH 250 Survey of World Architecture History II 3
- or ANTH 210 Social and Cultural Anthropology
- or GEOG 202 Geography of the Global Village

Select twelve hours from the following: 2 12
- ARTS 350 The Arts and Civilization
- CARC 311 Field Studies in Design Communication
- CARC 331 Field Studies in Design Philosophy
- HIST 382 History of Science

Other courses approved by student's college

Total Semester Credit Hours 16

1 Portfolio in global culture and society may be completed either during the long semester abroad or upon return to College Station.
2 Must be taken in a single fall or spring semester at a TAMU-affiliated facility such as Santa Chiara or Soltis Center.

Students must make a grade of "C" or better in all courses.

Journalism - Minor

Journalism Studies in The College of Liberal Arts offers a minor in Journalism, as well as a major in Journalism, and provides a background in reporting, from interviewing to on-line records searches, and in writing, from deadline news stories to longer analytical and feature pieces. Video production for the web is an integral part of news writing in our program, along with the opportunity for specialized, advanced writing classes in political reporting, literary nonfiction, arts and entertainment journalism, and magazine writing. Students also can get in-depth experience in the field of new media, particularly blogging.

Program Requirements

Required courses:
- JOUR 200 Mass Media Information 3
- JOUR 203 Media Writing I 3
- JOUR 490 Journalism as a Profession 3
- JOUR 484 Internship 3

Select one of the following: 3
- COMM 307 Mass Communication, Law, and Society
- JOUR 301
- JOUR 301/ Mass Communication, Law and Society
- COMM 307
- JOUR 303 Media Writing II
Select one of the following:  
ANTH 225 Introduction to Biological Anthropology  
ANTH 301 Indians of North America  
ANTH 316 Nautical Archaeology  
ANTH 317/RELS 317 Introduction to Biblical Archaeology  
ANTH 404/RELS 404 Women and Culture  
WGST 404

Total Semester Credit Hours 18

JOUR 102 is a prerequisite for enrollment in the Journalism minor.

Students must make a grade of "C" or better in all courses.

Leadership - Minor

The College of Liberal Arts offers a minor in Leadership.

Program Requirements

COMM 324 Communication Leadership and Conflict Management 3
PHIL 381 Ethical Theory 3
POLS 328 Globalization and Democracy 3
or SOCI 206 or Global Social Trends
HIST 426/CLAS 426 The Ancient Greeks 3
or HIST 463 or American Foreign Relations Since 1913
Select one of the following:  
COMM 335 Intercultural Communication  
HIST 343 Inter-American Relations  
LBAR 181 First-Year Seminar in the Liberal Arts  
PHIL 332 Social and Political Philosophy  
POLS 369 Theories of Democracy  
SOCI 312 Population and Society  
SOCI 404/RELS 404 Sociology of the Community

Total Semester Credit Hours 15

Students must make a grade of "C" or better in all courses.

Liberal Arts Honors - Minor

This minor will allow talented students the opportunity to craft a coherent and challenging program by utilizing at least four distinct Liberal Arts disciplines, as well as requiring significant investment in upper-level liberal arts coursework to include research or independent study as a capstone experience.

The minor is designed to ensure that students, in consultation with their honors advisor, will be able to create a minor that will expose them to an intelligent and well-conceived liberal arts experience, giving students a breadth and depth of experience in the liberal arts.

For the vast majority of minors the upper-level requirement is normally 9 hours. This minor requires students to complete 12 hours at the upper level from different departments. That would presuppose a superior acquisition of knowledge already acquired in different disciplines, particularly as many of our 300- and 400-level courses have required prerequisites. The capstone experience of research or independent study ensures that students will be able not only to acquire a better understanding of a cross-disciplinary liberal arts approach, but to apply it in practice as well as theory.

Program Requirements

Minimum of 18 hours of Honors Liberal Arts courses.

At least 12 hours must be at the 300- and 400-level approved by a College Honors advisor.

3 hours of a departmental capstone 485, 491, or 497 CLLA course. Must be approved by a College Honors advisor.

Courses must come from a minimum of four separate CLLA departments.

Must maintain a 3.50 or higher GPA.

Religious Studies - Minor

The study of religion has become increasingly important as a way to understand the roles religion plays in public life and world cultures. The College of Liberal Arts offers an Interdisciplinary Minor in Religious Studies. Students must have a GPA above 2.0 and fewer than 90 hours of completed coursework to declare the minor.

Program Requirements

Comparative Religions

REL 303/HUMA 303 Near Eastern Religions 3
REL 304/HUMA 304 Indian and Oriental Religions 3

Select two or four of the following:  
Comparative Religions
REL 303/HUMA 303 Near Eastern Religions 3
REL 304/HUMA 304 Indian and Oriental Religions 3

Select two or four of the following:  
Comparative Religions
Women’s Studies - Minor

The College of Liberal Arts offers a minor in Women’s Studies.

**Program Requirements**

**Required Courses:**
- WGST 200 Introduction to Women's and Gender Studies 3
- WGST 481 Senior Seminar 3

Total Semester Credit Hours 18

Students must make a grade of “C” or better in all courses.

Diversity - Certificate

The Diversity Certificate Program enables students to create, synthesize and integrate academic coursework, co-curricular experience, and service learning engagement to demonstrate their preparedness for participation in the modern global economy and community.

Program Requirements

Students must complete a minimum of twelve hours to include nine hours of diversity related courses from the College of Liberal Arts plus an additional three hours chosen in consultation with the certificate advisers. The additional three hours could consist of a research project, internship, directed study or other option, including a regular approved course. Students will be provided with a sample list of courses and advice about the most appropriate choices for their long term goals. Certificate advisers may approve additional courses not on the sample list to count toward the completion of this requirement. The core courses required for this certificate may also count toward other degree requirements. Students should maintain a GPA of 3.0 in certificate courses.

Certificate Components

1. Orientation Session
2. Academic Component - 12 hours, nine hours from the College of Liberal Arts
3. Co-curricular Component - minimum of 10 hours participation in diversity related co-curricular lectures, presentations and activities.
4. Service Learning Component - consists of 20 hours of involvement in an approved project
5. Capstone Retreat

Gender and Leadership - Certificate

To earn a Gender and Leadership Certificate, a student must complete the Women's Studies minor and fulfill certain non-academic requirements.

Program Requirements

Summary Requirements for the Certificate

- Minor in Women's Studies (18 hours). At least nine hours at the upper division (300 and 400) level.
- A one-year membership in the Aggie Women in Leadership (AWIL) Program or one year of residency in a proposed Women's Leadership Living Learning Community
- Two years of membership in the AWIL Scholars student organization
• Attendance at a minimum of two co-curricular events (lectures, etc.) per semester, excluding summer sessions, during the student’s enrollment in the AWIL Scholars program

Global Perspectives in Liberal Arts- Certificate

The global perspectives certificate provides students in the Liberal Arts with a better understanding of our world and their role in it through interactive coursework, research and international experience.

Department of Anthropology

Anthropology is the study of humankind over the entire world and throughout time. With such a broad approach, anthropologists study existing cultures and human behavior (cultural anthropology), traditions (folklore), prehistoric cultures and lifeways (archaeology), the biological makeup and evolution of humans and non-human primates (biological anthropology), and the origin and nature of language (linguistic anthropology). The study of anthropology promotes an understanding of humankind and provides an introduction to the variety inherent in our biological and cultural heritage. Through the comparative study of the many diverse prehistoric and modern cultures of the world, we have a means of reaching a clearer understanding of ourselves and other people.

**Majors**
- Bachelor of Arts in Anthropology (p. 453)
- Bachelor of Arts in Anthropology, Archaeology Track (p. 452)

**Minors**
- Anthropology Minor (p. 454)
- Museum Studies Minor (p. 454)

**Anthropology - BA, Archaeology Track**

Students who elect to pursue the archaeology track take the foundation courses but also have the opportunity to take multiple upper-level courses which focus on specific topics in archaeology. In addition, majors receive a broad yet rigorous liberal arts education.

The curriculum leading to a degree in anthropology provides students with the background necessary to pursue graduate studies in anthropology, but is well-rounded and flexible enough to allow students to pursue graduate studies in other disciplines. Employment opportunities include careers in: teaching and research in college, university, museum and foundation settings; administration and research in local, state and federal governments (such as the National Park Service, Bureau of Indian Affairs, National Institute of Health and others); non-governmental organizations and non-profit organizations; foreign service with government agencies (such as the Agency for International Development, United Nations and non-profit organizations; foreign service with government agencies (such as the Agency for International Development, United Nations and non-profit organizations); private archaeological research institutions; secondary schools that are adding anthropology to their curricula; and nontraditional opportunities emerging in business and management. Anthropology offers diverse career opportunities and is an expanding and dynamic field that is relevant to many fields of study.

| STAT 302 Statistical Methods | 3 |
| or STAT 303 or Statistical Methods |   |

**College and University Requirements**

| ENGL 104 Composition and Rhetoric | 3 |
| Select one of the following: |   |
| ENGL 203 Writing about Literature | 3 |
| ENGL 210 Technical and Business Writing |   |
| COMM 203 Public Speaking |   |
| COMM 205 Communication for Technical Professions |   |
| COMM 243 Argumentation and Debate |   |

| Literature in English (p. 432) | 6 |
| Foreign language (p. 432) | 14 |
| Mathematics (p. 432) | 2 |
| Life and physical sciences (p. 21 | 3 |
| Language, philosophy and culture (p. 22) | 4 |
| Creative arts (p. 23) | 3 |
| Social and behavioral sciences (p. 24) | 4 |
| POLS 206 American National Government & POLS 207 State and Local Government | 6 |
| American history (p. 24) | 6 |
| International and cultural diversity (p. 38) | 5 |
| Electives | 21 |
| Total Semester Credit Hours | 120 |

1. 31 hours required; 12 hours must be in residence; 12 hours must be in upper-division courses. A grade of C or higher is required for a course to count in the major.
2. 3 hours may be in logic.
3. ANTH 225 and ANTH 226 are excluded.
4. No anthropology course will satisfy this requirement.
5. Courses may also be used to satisfy any other requirement.

**Writing Courses**

All students in each track are required to take two courses with the writing attribute, also known as "W-courses", from the department. Substitutions with W-courses from other departments are not allowed. Please see the academic advisor for the most current list of Anthropology W-courses.

**Minor Requirements**

All anthropology majors may select a minor field of study from departments or divisions within or outside the College of Liberal Arts or in a particular area of interest (as with interdisciplinary minors or career opportunity minors). The minor will consist of 15-18 hours of coursework, at least 6 of which must be at the upper-division level. A grade of C or higher is required if a course is to count in the minor. A
minor must be declared before the student has completed 75 credit hours. Interdisciplinary minors such as women’s and gender studies, classical studies, and religious studies have specific requirements; students should consult the Undergraduate Student Services Office in the College of Liberal Arts for details.

**College and University Requirements**

Other courses may qualify for this category. Students should consult the approved lists of courses available through the academic advisor in the Department of Anthropology or in the Undergraduate Student Services Office in the College of Liberal Arts. The following list incorporates University Core Curriculum requirements. No course can be counted in more than one category. To promote the opportunity for anthropology majors to acquire a broad educational experience, anthropology students must satisfy their University requirements for language, philosophy and culture, social and behavioral sciences, and the sciences with courses other than those offered by anthropology.

Students must complete a minimum of 36 hours of 300- or 400-level coursework at Texas A&M University.

**Anthropology - BA**

Anthropology majors pursuing the general anthropology track receive foundations in the archaeology, biological anthropology and cultural anthropology subfields of anthropology as well as options to pursue upper-level courses in each of the subfields.

The curriculum leading to a degree in anthropology provides students with the background necessary to pursue graduate studies in anthropology, but is well-rounded and flexible enough to allow students to pursue graduate studies in other disciplines. Employment opportunities include careers in: teaching and research in college, university, museum and foundation settings; administration and research in local, state and federal governments (such as the National Park Service, Bureau of Indian Affairs, National Institute of Health and others); non-governmental organizations and non-profit organizations; foreign service with government agencies (such as the Agency for International Development, United Nations organizations and others); private archaeological research institutions; secondary schools that are adding anthropology to their curricula; and nontraditional opportunities emerging in business and management. Anthropology offers diverse career opportunities and is an expanding and dynamic field that is relevant to many fields of study.

</tr>
</tbody>
</table>

Total Semester Credit Hours 15

Students must make a grade of "C" or better in all courses.

At least six hours must be taken at the upper level and must be in residence.

**Museum Studies - Minor**

The minor in Museum Studies is offered in cooperation with the College of Liberal Arts, the College of Architecture, and the College of Agriculture and Life Sciences. The increase of collections, curatorial facilities and museums ensures this minor is a wise choice for any student with an interest in Anthropology or related fields. The minor will provide students with a foundational understanding of museum studies while giving them professional experience working in a museum. Coursework includes a minimum of 15 hours, including one core course (3 hours), one internship course (3 hours), and three elective courses (9 hours).

</table>

Total Semester Credit Hours 15

Minimum of six hours at the 300-400 level.

Students must make a grade of "C" or better in all courses.

**Department of Communication**

Communication is concerned with one of the most distinctly human characteristics: the use of spoken language to communicate information, maintain social contact, and influence others. Communication is an attractive major because it provides students with a broad liberal arts education, while at the same time focusing on vital communication skills, which are in high demand in the workplace as well as in political, religious and social communities. Communication skills include public speaking, argumentation, technical communication, leading teams and groups to solve problems, interviewing to gather information and to persuade, use and evaluation of communication technology, as well as a thorough array of communication research methods applications.

Degree requirements include the study of rhetorical and communication theories, the study of communication research methods, and the use of those theories and research methods in a variety of communication contexts. Such contexts include health communication, intercultural communication, interpersonal communication, mass media and new communication technologies, organizational communication, political rhetoric, religious communication, and others. Students use their communication skills to become leaders in all areas of business, social and political life.

The career interests of communication majors vary. Some students pursue advanced degrees in communication, law, business, or religion. Others take communication-related positions in strategic communication, public relations, marketing and sales, training and human resources, leadership and management, health fields related to communication, organizations and public policy, communication media, and related areas of business, industry, government, and non-profit organizations. Still others prepare for teaching careers.

**Honors Program**

The Department of Communication has a well-established Honors plan and strong linkages to the University honors program. Honors courses are available in all areas of Communication. In addition, students may graduate with honors in Communication noted on the transcript. Honor students may also choose individualized instruction through COMM 497, and through honors contracting. Students interested in the Department’s Honors Program should contact the Communication Undergraduate Studies Office.

**Undergraduate Courses**

The Department of Communication offers courses in many areas of the discipline: Health Communication, Media Studies, Organizational Communication, Rhetoric and Public Affairs, Leadership and Civic Dialogue and Strategic Communication with significant focus in Intercultural and International communication across each area.

**Certificates**

The Department of Communication offers four certificates. While these certificates are optional, they permit a student to focus studies in one of four areas. The certificates in Communication and Global Media, in Communication Leadership and Conflict Management, and in Health Communication are open to students in the Department of Communication and in any major across the University. The certificate in Strategic
Communication is offered to students majoring in Communication or in Telecommunication Media Studies only.

Majors
• Bachelor of Arts in Communication (p. 456)  
• Bachelor of Arts in Telecommunication Media Studies (p. 457)  
• Bachelor of Science in Telecommunication Media Studies (p. 458)

Minors
• Communication Minor (p. 459)

Certificates
• Communication and Global Media Certificate (p. 460)  
• Communication Leadership and Conflict Management Certificate (p. 460)  
• Health Communication Certificate - Health Campaign/Policy Track (p. 460)  
• Health Communication Certificate - Provider-Patient/Organizational Track (p. 461)  
• Strategic Communication Certificate (p. 461)

Communication - BA
Students who want to transform the world through communication can choose Communication as a major. The Bachelor of Arts in Communication teaches how to influence and persuade others through the use of language, visuals and media. We pursue coursework that gives students a background in the processes and theories of communication as well as in the skills that are so valuable in the working world.

Coursework for incoming Freshmen begins with a dedicated first semester experience which introduces them to the breadth of the field of Communication and Media. We welcome Transfer students, meeting them where they are and integrating them into the Communication family. All Communication majors take a core of required courses that establish a firm foundation in the field and then select additional coursework that suits their interests and needs. Students who wish to focus their studies further, may choose to earn a certificate in Health Communication, Strategic Communication, Leadership and Conflict Management or Global Media.

Program Requirements
COMM 203  Public Speaking  3

or COMM 205  or Communication for Technical Professions
or COMM 243  or Argumentation and Debate

Select one of the following:
COMM 210  Group Communication and Discussion  3
COMM 215  Interviewing: Principles and Practice  3
JOUR 215  3
COMM 230  Communication Technology Skills  3
JOUR 230  3

Language, philosophy and culture or Creative arts elective (p. 22)  3

Social and behavioral sciences elective (p. 24)  6
International and cultural diversity (p. 38)  7
Foreign language (p. 432)  14
Minor  15-18

General electives  0-4
Total Semester Credit Hours  120

1  Should be completed by the end of junior year.
2  COMM 101 and COMM 291 are required for incoming freshmen in the First Semester of freshman year.
3  Minimum grade of C required.
4  Course satisfies a writing elective.
5  ENGL 203 will count toward the Communication requirement or the Literature in English requirement, but not both.
6  COMM course may not be used to fulfill this requirement.
7  International and Cultural Diversity courses may also be used to satisfy any other requirement.
Sequences approved by the College of Liberal Arts, except Communication. No more than 9 semester credit hours may be at a lower-division (100 and 200) level. A minor must be declared before a student completes 75 semester credit hours.

Maximum of 9 semester credit hours of any combination of military science and physical activity courses.

Included in graduation requirements are the following stipulations:

1. A minimum of 2.0 GPR
2. Minimum grade of C in each course applied to the major
3. Minimum of 12 hours of upper-level COMM coursework at Texas A&M

Teaching Certification

Students desiring certification to teach communication in secondary schools of Texas may either major in communication (College of Liberal Arts) or in another field, but in either case, they must include the following courses in their degree plans:

<table>

Total Semester Credit Hours 27

Additional education courses are required. More complete information on the requirements for teacher certification may be found in the College of Education and Human Development section under secondary teacher certification.

Telemcommunication Media Studies - BA

Telecommunication Media Studies focuses on media industries, technologies, and communication systems in cultural and historical contexts, their audience processes and effects, and social implications of the media.

The Telecommunication Media Studies major provides students with tools for understanding the media and their roles in social life theoretically, historically and critically. The degree allows students to choose a broadly based communication and media studies major or a more specialized study of telecommunication and information systems. Students can choose Communication courses that address media industries, law and policy, technology and society, media audiences, processes, and effects, and the theory, history, and criticism of media, culture, and communication.

A degree in Telecommunication Media Studies may be useful in a broad variety of careers, from media and telecommunication industries, through communication-related positions in business, government, or non-profit organizations, to higher education. The curriculum is designed to educate citizens for a productive future in a changing world. Our students may become industry leaders, government regulators, spokespeople, politicians, writers, artists, activists, and informed citizens.

The BA and BS are both available. The BA is a more flexible, liberal arts media-oriented degree.

### Communication and Global Media - Certificate

The Communication and Global Media Certificate (CGMC), is offered by the Department of Communication, and is designed to provide students with an understanding of a communication perspective on the impact of media in a global context. Media and communication sectors are the second largest export markets for the US, after defense and aerospace. The rise of the BRIC (Brazil, Russia, India, China, Indonesia) economies and the desire of businesses to capitalize on the growth of these markets is a prime example of the application of this certificate. The CGMC prepares students for understanding the growth and impact of communication and global media in a variety of similar contexts. Specific certificate requirements are available in the Office of Undergraduate Advising of the Department of Communication. Details are also available on the Department of Communication website (http://communication.tamu.edu).

### Program Requirements

The CGMC requires designated courses and completion of a global internship or approved experience. Students must earn a grade of “B” or better in each course used to meet the requirements. Students who pursue the CGMC must complete all requirements prior to graduation.

### Health Communication - Certificate, Health Campaign/Policy Track

Careers in Health and in Communication are growing much faster than average according to the Office of Occupational Outlook, Bureau of Labor Statistics. Health communication skills are increasingly valuable in careers related to health and medicine, as well as the media, public relations, and strategic communication. Health communication skills are applicable for a variety of health and medical career tasks including provider-patient consultations; the formative research, design, implementation, and assessment of public health communication campaigns; the development of strategic communication initiatives for health organizations and related products and services; as well as leadership in public and private sector health agendas. Health messaging reaches diverse audiences and includes the use of advocacy to influence policy, as well as mediating and shaping public conversations on health issues both face-to-face and via traditional and new media in local and global arenas. Health communication skills are important for profit, nonprofit, and governmental organizations.

The Health Communication Certificate (HCC) provides a track for students interested in health campaigns, other forms of mediated health
communication, and health policy. Specific certificate requirements are available in the Undergraduate Studies Office of the Department of Communication. Details are also available on the Department of Communication (http://communication.tamu.edu) website.

Program Requirements

Students must earn a grade of “B” or better in each course used to meet the requirements. Students who pursue the HCC must complete all requirements prior to graduation.

Strategic Communication - Certificate

Strategic communication is the process that supports public relations, promotions, public information, marketing, corporate communication and advertising. Strategic communication is creation of the plan as well as the tools or tactics used to implement that plan effectively. The value of effective strategic communication is acknowledged by both profit and nonprofit corporations and by governmental agencies. The effect of strategic communication failures on the bottom line, on employee and stakeholder satisfaction, and on the efficient use of resources, is well documented. Gathering and interpreting appropriate information, audience analysis, as well as harnessing the power of accurate language in message crafting, are further noted as key strategic communication functions. Tactics available for implementing strategic communication are expanding exponentially as digital communication and new media evolve. Mastery of the integration of these tactics in strategic plans augment the effectiveness of internal and public issues management while mitigating corporate frustration, offensive messages, and overspending. Although effective strategic communication is critical to organizational success, many companies and agencies continue to need support and assistance in this arena. The U.S. Department of Labor Occupational Outlook Handbook notes that careers in various strategic communication areas are growing “faster than average” to “much faster than average.” The Certificate in Strategic Communication will prepare Communication and Telecommunication Media Studies majors to plan and execute communication strategically and to coordinate the integration of appropriate tactics to enhance commerce, government, and to further political, religious and social goals, as they lead us into the future. Specific certificate requirements are available in the Undergraduate Studies Office of the Department of Communication. Details are also available on the Department of Communication (http://communication.tamu.edu) website.
Program Requirements

Students must earn a grade of “B” or better in each course used to meet the requirements. Students who pursue the SCC must complete all requirements prior to graduation.

Department of Economics

The study of economics helps students develop a framework for understanding of how individuals, organizations and societies make choices and how those choices interact to determine the allocation of an economy’s limited resources among alternative competing uses. Economists study how these choices are made in a variety of environments and consider how the outcomes vary under alternative forms of economic organization. Economists evaluate the outcomes of an economic system on a scorecard that includes several different criteria such as efficiency, equity, and stability.

The fundamental goal of our curriculum is to introduce students to the economic way of thinking—a particular way of asking questions and analyzing problems. We offer a core set of courses that teach the fundamental theoretical tools of economics, and a set of elective courses that demonstrate how economists apply these tools to study a wide variety of real-world economic issues. A key takeaway for students is a working knowledge of a useful and coherent structural approach to examining current public policy issues and an ability to identify the inherent tradeoffs involved in developing solutions to major social problems.

The economic style of thinking, when combined with training in the required tools of quantitative and qualitative analysis, provides students with a skill set that will serve them well in a wide array of post-graduate pursuits. The banking and financial sectors regularly hire undergraduate economics majors as do management consulting firms. A number of private corporations employ economists to prepare forecasts of future movements in firm costs and profits. Government agencies—local, state, national, international—hire economics majors for positions as budget analysts or government program evaluators. The study of economics also provides sound preparation for graduate school, either a Masters or PhD degree in economics or a professional degree in business, law, or public policy.

**Majors**

- Bachelor of Arts in Economics (p. 463)
- Bachelor of Science in Economics (p. 464)

**5-Year Degree Programs**

- Bachelor of Arts in Economics and Master of International Affairs (p. 465)
- Bachelor of Arts in Economics and Master of Public Service and Administration (p. 466)
- Bachelor of Science in Economics and Master of International Affairs (p. 467)
- Bachelor of Science in Economics and Master of Public Service and Administration (p. 468)
- Bachelor of Science in Economics and Master of Science in Economics (p. 469)

**Minors**

- Economics Minor (p. 470)

**Certificates**

- Business Economics Certificate (p. 470)
- Quantitative Economics Methods (p. 470)

**Economics - BA**

The Bachelor of Arts in Economics degree teaches students analytical thinking skills and their applications to better understand human behavior. The degree plan is designed to allow opportunities for applied exploration of economic principles and theory through research, internship, and study abroad opportunities. With classes that focus on analytical thinking and a foreign language requirement, students are prepared for a wide variety of post-graduate options including: international business, law school, government and public policy professions, and non-profit organizations.

2  ECON 322 may not be applied toward the major.
3  No course can be counted in more than one category.
4  Courses do not satisfy the College of Liberal Arts Language, Philosophy and Culture requirement or Creative Arts requirement.
5  Must make a grade of C or better.
6  ECON 100-ECON 499 (p. 746) and ECMT 100-ECMT 499 (p. 745) may not be used to fulfill this requirement.
7  6 hours required. These courses may also be used to satisfy any other requirement.
8  The student may select any courses other than economics courses and ENGL 103 as free electives. No more than 11 credits of any combination of military, air or naval science and physical activity will be allowed to count as electives. Students may also use up to 13 hours of free electives to pursue a minor.

Total of 33 credits. No more than 36 credits in economics and econometrics can be applied to this degree. A grade of C or higher is required for a course to be counted in the major field (Economics and Econometrics coursework)

Economics - BS

The Bachelor of Science in Economics degree teaches students analytical thinking skills and their applications to better understand human behavior. The degree plan is designed to allow opportunities for applied exploration of economic principles and theory through research, internship, and study abroad while focusing on quantitative skills and the development of rational thought and critical thinking. At the completion of the degree, students are prepared for a wide variety of post-graduate opportunities including: financial and banking careers, actuarial science, graduate school in social science and law, and government, public policy and professional positions.

No more than 11 credits of any combination of military, air or naval science and physical activity will be allowed to count as electives. Students may also use up to 18 hours of free electives to pursue a minor.

Total of 33 credits. No more than 39 credits in economics and econometrics can be applied to this degree. A grade of C or higher is required for a course to be counted in the major field.

Economics - 5-Year Bachelor of Arts/Master of International Affairs

The Joint-Degree Program between the Department of Economics and The Bush School of Government & Public Service allows undergraduate Economics students to enter the Master of International Affairs Program, with a focus in International Economics and Development, at the beginning of their fourth year at Texas A&M University. This program combines the teaching of analytical thinking skills and applications to better understand human behavior as it relates to international economic development along with skills in diplomacy, research, and development of a global perspective.

Students will be required to complete the same two-year, 48-hour curriculum as other students admitted to the Bush School's MPIA program. Students will double-count 9 hours of Bush School courses toward the undergraduate major coursework area and up to 9 hours toward general electives in the Bachelor of Arts in Economics. At the completion of the joint degree, students are prepared for a wide variety of post-graduate opportunities including: employment in global commerce, government, government contracting, national security, and transfer pricing.

Students interested in this program will apply during the fall of their junior year and, if admitted, begin taking masters-level courses in the fall of their senior year with an undergraduate classification. Students are reclassified as degree seeking master's students upon completing 96 credit hours, typically in the following semester. These credit hours must include all specific course prerequisites for a baccalaureate degree in Economics, as well as the courses required by the College of Liberal Arts and by Texas A&M University for an undergraduate degree.

### Economics - 5-Year Bachelor of Arts/Master of Public Service Administration

The Joint-Degree Program between the Department of Economics and The Bush School of Government & Public Service allows undergraduate Economics students to enter the Master of Public Service Program, with a focus in Public Policy Analysis, at the beginning of their fourth year at Texas A&M University. This program combines the teaching of analytical thinking skills and applications to better understand human behavior as it relates to public policy and management along with skills in leadership and research methods.

Students will be required to complete the same two-year, 48-hour curriculum as other students admitted to the Bush School’s MPSA program. Students will double-count 9 hours of Bush School courses toward the undergraduate major coursework area and up to 9 hours toward general electives in the Bachelor of Arts degree in Economics. At the completion of the joint degree, students are prepared for a wide variety of post-graduate opportunities including: employment in local, state or federal government, non-profit organizations, or government contracting.

Students interested in this program will apply during the fall of their junior year and, if admitted, begin taking masters-level courses in the fall of their senior year with an undergraduate classification. Students are reclassified as degree seeking master’s students upon completing 96 credit hours, typically in the following semester. These credit hours must include all specific course prerequisites for a baccalaureate degree in Economics, as well as the courses required by the College of Liberal Arts and by Texas A&M University for an undergraduate degree.

### Total Semester Credit Hours

120

1 ECON 322 may not be applied toward the major.
2 ECON 323 is a pre-requisite for most ECON electives.
3 Must make a grade of C or better.
4 Student must complete ECMT 461 or equivalent STAT course (Pre-approved by an advisor) prior to ECMT 463.
5 No course can be counted in more than one category.
6 ECON 100-ECON 499 (p. 746) and ECMT 100-ECMT 499 (p. 745) may not be used to fulfill this requirement.
6 required hours. These courses may also be used to satisfy any other requirement.

The student may select any courses other than economics courses and ENGL 103 as free electives. No more than 11 credits of any combination of military, air or naval science and physical activity will be allowed to count as electives. Students may also use up to 18 hours of free electives to pursue a minor.

Total of 33 credits. No more than 39 credits in economics and econometrics can be applied to this degree. A grade of C or higher is required for a course to be counted in the major field.

Students are reclassified as degree seeking master’s students upon completing 96 credit hours, typically in the following semester.

Students will double-count 6 hours of Bush School courses toward the undergraduate major coursework area, 3 hours toward ECMT 463, and up to 9 hours toward general electives in the Bachelor of Science degree in Economics.

**Economic Electives**

In addition to the electives for the BA in ECON, the following courses may be selected for the ECON-MIA program: BUSH 632, BUSH 635; INTA 608, INTA 616, INTA 625, INTA 630, INTA 632.

See the MIA program in the Graduate Catalog for MIA requirements.

**Economics - 5-Year Bachelor of Science/Master of Public Service Administration**

The Joint-Degree Program between the Department of Economics and the Bush School of Government & Public Service allows undergraduate Economics students to enter the Master of Public Service Program, with a focus in Public Policy Analysis, at the beginning of their fourth year at Texas A&M University. This program combines the teaching of analytical thinking skills and applications to better understand human behavior as it relates to public policy and management along with skills in leadership and research methods.

Students will be required to complete the same two-year, 48-hour curriculum as other students admitted to the Bush School’s MPSA program. Students will double-count 6 hours of Bush School courses toward the undergraduate major coursework area, 3 hours toward ECMT 463, and up to 9 hours toward general electives in Bachelor of Science degree in Economics. At the completion of the joint degree, students are prepared for a wide variety of post-graduate opportunities including: employment in local, state or federal government, non-profit organizations, or government contracting.

Students interested in this program will apply during the fall of their junior year and, if admitted, begin taking masters-level courses in the fall of their senior year with an undergraduate classification. Students are reclassified as degree seeking master’s students upon completing 96 credit hours, typically in the following semester. These credit hours must include all specific course prerequisites for a baccalaureate degree in Economics, as well as the courses required by the College of Liberal Arts and by Texas A&M University for an undergraduate degree.

Total Semester Credit Hours 122

1 ECON 322 may not be applied toward the major.
2 ECON 323 is a prerequisite for most ECON electives.
3 Highly recommended taking MATH 151/MATH 152 prior to Linear Algebra (MATH 304 / MATH 323). If other MATH is taken, you must consult with the MATH Department in order to register for MATH 304/MATH 323
4 Other courses may qualify. Students should consult the approved list of courses available in the Undergraduate Student Services Office in the College of Liberal Arts. No course can be counted in more than one category.
5 MATH 151 and MATH 152 are four credit hour courses. Three hours will count toward the Mathematics requirement for each course and the remaining one hour for each course will count toward free electives.
6 Must make grade of C or better.

Economics - 5-Year Bachelor of Science/Master of Science in Economics

The Department of Economics offers a five year joint degree program that provides the opportunity to earn a Bachelor of Science in Economics and a Master of Science in Economics with a focus in either Financial Economics or Financial Econometrics. The MS in Economics Program is a professional, terminal masters degree focused on analytical and quantitative skills in the field of financial economics. In this program, the undergraduate degree requirements are slightly modified to require more mathematics courses in an effort to prepare students for the more rigorous masters-level coursework. Students will double count six hours of masters-level coursework toward the undergraduate degree and complete both the undergraduate degree and the 36-hour Masters degree in five years. At the completion of the degree, students are well-prepared for careers in the financial sector such as: trading analyst, financial consultant, data analyst, distribution analyst and loan administrator.

Students interested in this program will apply during the fall of their junior year and, if admitted, begin taking masters-level courses in the fall of their senior year with an undergraduate classification. Students are reclassified as degree seeking master's students upon completing 96 credit hours, typically in the following semester. These credit hours must include all specific course prerequisites for a baccalaureate degree in Economics, as well as the courses required by the College of Liberal Arts and by Texas A&M University for an undergraduate degree.

POLS 206 American National Government 3
POLS 207 State and Local Government 3
International and cultural diversity (p. 38) 9
Free electives 5, 10 16

Total Semester Credit Hours 122

1 ECON 322 may not be applied toward the major.
2 ECON 323 is a prerequisite for most ECON electives.
3 Highly recommended taking MATH 151/MATH 152 prior to Linear Algebra (MATH 304 / MATH 323). If other MATH is taken, you must consult with the MATH Department in order to register for MATH 304/MATH 323
4 Other courses may qualify. Students should consult the approved list of courses available in the Undergraduate Student Services Office in the College of Liberal Arts. No course can be counted in more than one category.
5 MATH 151 and MATH 152 are four credit hour courses. Three hours will count toward the Mathematics requirement for each course and the remaining one hour for each course will count toward free electives.
6 Must make grade of C or better.
Students must complete ECMT 461 or equivalent STAT course (pre-approved by an advisor) prior to ECMT 463.

ECON 100-ECON 499 (p. 746) and ECMT 100-ECMT 499 (p. 745) may not be used to fulfill this requirement.

Six hours required. These courses may also be used to satisfy any other requirement.

The student may select any courses other than economics courses and ENGL 103 as free electives. No more than 11 credits of any combination of military, air, or naval science and physical activity will be allowed to count as electives.

Students are reclassified as degree seeking master’s students upon completing 96 credit hours, typically in the following semester.

Students enrolled in the BS-MS-ECON degree program may double count ECON 607 and ECMT 674 toward the undergraduate major requirements. Undergraduate students must take MATH 151 & MATH 152, and MATH 304 or MATH 323, in addition to the other University Core Curriculum, College of Liberal Arts, and Department of Economics-specific degree requirements.

Total of 33 credits. No more than 39 credits in economics and econometrics can be applied to this degree. A grade of C or higher is required for a course to be counted in the major field.

Economics - Minor

The study of economics provides a rigorous structure for decision-making, whether on academic topics or day-to-day activities such as how to divide roommate expenses or how to allocate time between study and recreation. Economics teaches students how to think rationally about problems, a skill that is essential in any profession.

A minor in economics provides knowledge and information that will make a student a better-informed consumer and participant in the world economy. It also provides a basis for a better understanding of world events.

Total Semester Credit Hours 15

1 ECON 322 does not count toward minor.

Students must make a grade of "C" or better in all courses.

Business Economics - Certificate

The Business Economics Certificate (BEC) is an innovative program designed to prepare students for successful careers in a rapidly changing economic environment. The certificate combines a foundation in Economics in the College of Liberal Arts with a business minor in the Mays College of Business, integrating the practical skills taught in business courses with the analytical tools of economics.

Total Semester Credit Hours 12

1 Student must complete ECMT 461 or equivalent STAT course (pre-approved by an advisor) prior to ECMT 463.
2 ECMT 461 and ECMT 463 are prerequisites for this course.
3 ECMT 475 and the required six hours of electives may also be used to satisfy the Economics electives requirement.
4 ECON 323 is a pre-requisite for all 400-level ECON courses.

Students pursuing this certificate must also complete a minor in Business Administration (BUAD) (p. 224).

Quantitative Economic Methods - Certificate

The Quantitative Economic Methods certificate program prepares students for entry into an economics Ph.D. program or highly quantitatively-oriented occupation such as economic consulting and research. Students select from a set of courses in the Statistics and Mathematics departments to broaden their understanding of the fundamental basis of advanced economics. In addition, students are required to take several intensive economics courses focused on mathematical and statistical topics. Students interested in this certificate are also strongly encouraged to participate in undergraduate research activities in the Department of Economics.

Department of English

The study of English language and literature is central to an understanding of our culture and our relationship to it. Mastery of the English language is essential to all of us at Texas A&M, no matter what our interests or profession. An awareness of our heritage as it is embodied in great literary works provides us with a sense of the traditions, ideas, and rhetorics that have shaped us and our world; it enables us to define ourselves and our values in relation to this valued past. The Department of English offers students an opportunity to explore our linguistic and literary inheritance.

Courses are offered in British literature, American literature, rhetoric and composition, creative writing, literary criticism, linguistics, and film. Students can discover the roots of the English language or learn about the latest linguistic theories. They can acquire the skills necessary to be a technical writer and editor or begin to learn the craft of writing poetry and fiction. They can immerse themselves in literature from Beowulf to Virginia Woolf, from Captain John Smith to Toni Morrison; and they can explore the extensions and challenges to tradition found in women’s writing, ethnic literature, and postmodernist experimentation. Students also may explore literature in relation to the other arts and religion and culture, and investigate the global through studies in Asian, Africana, Caribbean, postcolonial, transnational and other literatures. The flexibility of the degree in English and the options available in the department enable students to pursue their own interests while acquiring important analytic and writing skills and discovering the riches of our literary heritage.

English graduates, with relevant minors or specialized courses outside English, may pursue careers in technical writing, editing and publishing, government service, public relations, personnel work, and advertising or administrative positions in business and industry. The program in English also provides excellent preparation for later professional training in law, medicine, business and the ministry, as well as for graduate work in information studies and in the humanities, including English. Supported by work in the College of Education and Human Development, the English program also may lead to careers in teaching or educational administration.

The curriculum in English is designed to allow students to develop concentrations in such areas as composition and rhetoric, creative writing, linguistics, literature and film, or coursework relevant to teacher certification.

Teacher Certification Programs in English

Teacher Certification in English Language Arts/Reading - OPTION II (Secondary)

Students desiring certification by Option II to teach English language arts and reading in the secondary schools of Texas should consult an undergraduate English advisor as early as possible. Requirements include 27 semester hours in literature, language, reading, and rhetoric and composition (an optional 24-30 hours in a second teaching field is possible); and professional education courses.

Degree and Certification Program for Middle School in English Language Arts/Reading

The Department of English offers a degree and certification program in English language arts/reading for prospective middle-school teachers. This program requires 36 hours of literature, linguistics, composition and rhetoric and 15 hours of reading along with an 18-hour professional education component.

All students seeking certification should consult an undergraduate English advisor for additional information.

Professional Writing Certificate

The Professional Writing Certificate gives students 18 hours of intensive training in a broad range of communication skills. Students who achieve a grade of B or better in all 18 hours of coursework will receive a certificate signifying their successful completion of this training. Students should allow at least a year and a half to complete the courses, some of which are offered only once a year. Transfer courses, independent studies and credit by exam cannot be counted toward the 18 hours. Required courses include ENGL 210, ENGL 320, ENGL 241 and ENGL 355. With the help of the Professional Writing Certificate Advisor, the student must also select two additional courses in rhetoric, ENGL 355.

ENGL 481 Senior Seminar  

Major concentration/electives  
Select five of the following:  
ENGL 100-ENGL 499 (p. 751)  
LING 200-LING 499 (p. 822)  

College and University Requirements  
Select one of the following:  
ENGL 104 Composition and Rhetoric  
ENGL 210 Technical and Business Writing  

COMM 203 Public Speaking  
COMM 205 Communication for Technical Professions  
COMM 243 Argumentation and Debate  
ENGL 203 Writing about Literature  
Foreign language (p. 432)  
Mathematics (p. 21)  
Life and physical sciences (p. 21)  
Creative arts (p. 23)  
Language, philosophy and culture (p. 22)  
Language, philosophy and culture or creative arts (p. 22)  
Social behavioral sciences (p. 24)  
POLS 206 American National Government  
POLS 207 State and Local Government  
American history (p. 24)  
General electives (may include optional minor)  
International and cultural diversity (p. 38)  

Total Semester Credit Hours: 120  

1. Majors must complete two ENGL courses formally designated as writing intensive.  
2. At least 3 hours must be in MATH. Three hours may be PHIL 240.  
3. Middle School Certificate seekers should consult an undergraduate English advisor for required courses.  
4. Up to 12 hours of ENGL 300-499 courses may be used.  
5. International and cultural diversity (p. 38) courses may also be used to satisfy any other requirement.  

Up to 51 credits in English can be applied to the degree; at least 21 credits must be in literature. A grade of C or higher is required for a course to be counted in the major. For residency, a student must have at least 12 hours in 300- or 400-level English classes from Texas A&M University.  

College and University Requirements  
Other courses may qualify for the following categories. All courses are to be selected with the approval of the student’s academic advisor. The courses incorporate University Core Curriculum (p. 20) requirements. No course can be counted in more than one category, except as allowed in the minor field of study and the International and Cultural Diversity (p. 38) graduation requirement. A minimum of 36 hours of 300- or 400-level coursework must be completed at Texas A&M University, with at least 12 of those hours being in the major.  

Minor Field of Study  
English majors are advised, but not required, to select a minor field of study. Students who elect to complete a minor should contact the department or program that offers the minor to determine the requirements for that minor. A grade of C or higher is required for a course to be counted in the minor field. A minor field must be declared before the student has completed 75 credit hours.  

English - BA, Middle School Teacher Certification  
The Department of English offers a degree and certification program in English language arts/reading for prospective middle-school teachers. This program requires 36 hours of literature, linguistics, composition
and rhetoric and 15 hours of reading along with an 18-hour professional education component.

All students seeking certification should consult an undergraduate English advisor for additional information.

## Program Requirements

### Required Courses

1. **ENGL 303** Approaches to English Studies 3

### Literary Histories I

Select one of the following: 3

- ENGL 221/ MODL 221 World Literature
- ENGL 227 American Literature: The Beginnings to Civil War
- ENGL 231 Survey of English Literature I
- ENGL 314 The English Renaissance
- ENGL 315 Seventeenth-Century Literature
- ENGL 317 Early British Drama
- ENGL 353 History of Rhetoric
- ENGL 412 Studies in Shakespeare
- ENGL 414 Milton
- ENGL 431 Chaucer

### Literary Histories II

Select one of the following: 3

- ENGL 222/ MODL 222 World Literature
- ENGL 232 Survey of English Literature II
- ENGL 316 Eighteenth-Century Literature and Culture
- ENGL 321 Nineteenth-Century Literature (Romantic)
- ENGL 322 Nineteenth-Century Literature (Victorian)
- ENGL 323 The American Renaissance
- ENGL 373 American Realism and Naturalism
- ENGL 375 Nineteenth-Century American Novel
- ENGL 377 The British Novel to 1870.

### Literary Histories III

Select one of the following: 3

- ENGL 228 American Literature: Civil War to Present
- ENGL 336 Life and Literature of the Southwest
- ENGL 337 Life and Literature of the American South
- ENGL 340 Modern and Contemporary Drama
- ENGL 350 Twentieth-Century Literature to World War II.
- ENGL 352 Literature, World War II to Present.
- ENGL 356/ Film 356 Literature and Film
- ENGL 372 American Poetry
- ENGL 376 The American Novel Since 1900
- ENGL 378 The British Novel, 1870 to Present.
- ENGL 379/ AFST 379 Postcolonial Literatures
- ENGL 401 Contemporary Literary Theory

### Literary Histories IV

Select one of the following: 3

- ENGL 204/ AFST 204 Introduction to African-American Literature
- ENGL 205/ AFST 205 Introduction to Africana Literature
- ENGL 329/ AFST 329 African-American Literature Pre-1930
- ENGL 333/ WGST 333 Gay and Lesbian Literature
- ENGL 338 American Ethnic Literature
- ENGL 339/ AFST 339 African-American Literature Post-1930
- ENGL 357 Native American Rhetorics and Literatures
- ENGL 362/ HISP 362 Latino/a Literature
- ENGL 374/ WGST 374 Women Writers
- ENGL 391 Folktale, Literature, and World Cultures
- ENGL 393/ AFST 393 Studies in Africana Literature and Culture
- ENGL 474/ AFST 474 Studies in Women Writers
- ENGL 481 Senior Seminar 3

### Major concentration/electives

Select four of the following: 12

- ENGL 100-ENGL 499 (p. 751)
- LING 200-LING 499 (p. 822)

### Supporting Coursework

- RDNG 371 Multicultural and Interdisciplinary Literature for Middle Grades 3
- RDNG 372 Reading and Writing across the Middle Grades Curriculum 3
- RDNG 461 Teaching Reading Through Children’s Literature 3
- RDNG 470 Reading/Language Arts Methods in Middle Grades Education 3
- RDNG 490 Assessment in Reading Instruction in Middle Grades 3

### Teaching requirement

- EDCI 354 Early Childhood and Adolescent Curriculum and Lesson Design 3
- TEFB 371 Dynamics and Management in Multicultural/Inclusionary Learning Environments 3
- MEFB 452 Curriculum and Instruction for Middle Grades 3
- INST 362 English as a Second Language Methods I 3
- MEFB 497 Supervised Clinical Teaching 6

### College and University Requirements

Select one of the following: 3

- ENGL 104 Composition and Rhetoric
- ENGL 210 Technical and Business Writing
- COMM 203 Public Speaking
- COMM 205 Communication for Technical Professions
- COMM 243 Argumentation and Debate
- ENGL 203 Writing about Literature 3

### Foreign language

Select one of the following: 14

- Foreign language (p. 432)

### Mathematics

Select one of the following: 6

- Mathematics (p. 21)
Life and physical sciences (p. 21) 9
Creative arts (p. 23) 3
Language, philosophy and culture (p. 22) 3
Language, philosophy and culture or creative arts (p. 22) 3
INST 210 Understanding Special Populations 3
INST 222 Foundations of Education in a Multicultural Society 3
POLS 206 American National Government 3
POLS 207 State and Local Government 3
American history (p. 24) 6
International and cultural diversity (p. 38) 3
Total Semester Credit Hours 125

1 Majors must complete two ENGL courses formally designated as writing intensive.
2 At least 3 hours must be in MATH. Three hours may be PHIL 240.
3 International and cultural diversity courses may also be used to satisfy any other requirement.

Up to 36 credits in English can be applied to the degree; at least 21 credits must be in literature. A grade of C or higher is required for a course to be counted in the major. For residency, a student must have at least 12 hours in 300- or 400-level English classes from Texas A&M University.

College and University Requirements

Other courses may qualify for the following categories. All courses are to be selected with the approval of the student’s academic advisor. The following lists incorporate University Core Curriculum requirements. No course can be counted in more than one category, except as allowed in the minor field of study and the International and Cultural Diversity Graduation requirement. A minimum of 36 hours of 300- or 400-level coursework must be completed at Texas A&M University, with at least 12 of those hours being in the major.

English - Minor

Students seeking to minor in English should consult with their advisor and with the Office of Undergraduate Studies in English.

Program Requirements

ENGL 100 to 499 (p. 751) 9
ENGL 300 to 499 (p. 751) 9
Total Semester Credit Hours 18

A grade of C or higher is required for a course to be counted in the minor field of study.

Department of Hispanic Studies

At a time when worldwide globalization includes the demographically and culturally significant Hispanicization of Texas, along with other areas of the United States, the study of the Spanish language and Hispanic culture is important to achieve an understanding of the world in which we live. The mission of the Department of Hispanic Studies is to create and disseminate knowledge about the cultures and languages of the Hispanic world. Our research agenda includes Hispanic contemporary and period literature, film and performance, photography, iconography and digital humanities, cultural studies, gender and diaspora studies, and the history and presence of Spanish in the United States. We offer a Bachelor of Arts in Spanish, a Minor in Spanish, and a Minor in Hispanic Studies for Community Engagement. The development of proficiency in the Spanish language is at the core of all these programs.

With class sizes that rarely exceed 30 students, we are recognized for our excellent teaching and personalized attention to student needs. Our department offers a full range of courses for undergraduates, including language instruction and content courses in literature, culture, professional Spanish, and linguistics. An undergraduate major in Spanish can show future employers and/or graduate schools that a student has achieved a high level of linguistic ability and understanding of Hispanic cultures. The undergraduate major is designed to help students grow in their oral and written language skills as they learn more about Hispanic cultures through literature and cultural studies. This kind of study is valuable for those who plan to go into international careers or for those who plan to work with Hispanic populations in the United States. A Spanish major is useful in careers such as banking, advertising, marketing, journalism, health services, government, social welfare and public administration, and it is an excellent preparation for professional school in medicine, law, and business. Teaching certification is available to Spanish majors through the College of Education and Human Development.

The department insists on a high level of language competence as the basis for other intellectual growth in the discipline and requires a 10-week experience abroad. To help facilitate the fulfillment of this requirement, the department sponsors a summer study abroad program for credit in a variety of locations, such as Costa Rica, Chile, Ecuador, Mexico, and Spain. Semester and year-long study abroad programs, reciprocal exchanges and internships are also available and encouraged.

Spanish Bilingual/Bicultural Enhancement Initiative

The Hispanic Studies faculty recommends that Spanish language students, especially heritage speakers of Spanish and Advanced Placement (AP) students, take a healthy mixture of coursework related, on the one hand, to achieving University-level linguistic competence in the language; and coursework related to the Hispanic or Latino cultural experience on the other. To this end students select from courses on language, grammar and culture in spoken and written Spanish and electives which broaden the Hispanic/Latino knowledge base taught in English. A prudent and timely selection of courses can allow the student to apply coursework taken in the pursuit of bilingual/biculturalism to satisfy some requirements on the student’s degree plan. Many of the suggested courses will apply in the Core Curriculum, for example, in areas such as Humanities and Social Sciences. Discussions with a departmental advisor can help students to focus the best possible fit of coursework with their interests and degree plan.

HISP and SPAN Courses

Reflective of its dual mission of striving to provide students with opportunities for cultural and linguistic competence, the Department of Hispanic Studies offers courses under two different rubrics, HISP (p. 790) and SPAN (p. 914). In the first case, courses cover a variety of topics pertinent to culture in the Hispanic world, and they are conducted in English. HISP (p. 790) courses deal with topics such as food, film, literature in translation, music and visual culture as well as social and political issues. SPAN (p. 914) courses are conducted in Spanish, and while they also deal with cultural topics ranging from literature to visual culture, they emphasize aspects of language and linguistic development.

Required Foreign Language Placement Test
Students who intend to enroll for the first time in a college foreign language course, who have previous knowledge of the language, however acquired, and who have no college credit in the language MUST take a placement test to determine the appropriate course for their level of ability. The foreign language placement test also serves as a basis for the credit by examination.

Students who take the Advanced Placement (AP) test or other acceptable tests which grant college-level credit in Spanish do not have to take the required foreign language placement test, as the results of these tests may be used for placement, but they are encouraged to do so nonetheless. Heritage learners, or those who have acquired any level of Spanish outside of a formal academic setting, are also expected to take the exam to guarantee correct placement.

The Spanish Language Placement Test is administered by the Department of Hispanic Studies on the Pre-Conference Day of the New Student Conference, along with other credit-by-examination tests. The test is also offered twice per week during the fall and spring semesters. Students who do not take the placement test on the Pre-Conference Day will not be able to register for a foreign language course during their first semester.

International students whose native language is not English are exempted from satisfying the University foreign language requirement. These students are not allowed to register in those courses in their native language (101, 102) which are used to fulfill that requirement.

Majors

• Bachelor of Arts in Spanish (p. 477)

Minors

• Hispanic Studies for Community Engagement Minor (p. 479)
• Spanish Minor (p. 480)

Spanish - BA

A Spanish major provides students with language skills that translate into a practical tool for use in our increasingly bilingual landscape, whether this be Texas, the American Southwest, one of the many urban areas in the U.S. with large Spanish-speaking populations, or beyond our borders where over 400 million Spanish speakers reside. Above the practical aspect of the major, students of Spanish acquire a rich view of the world in which we live. Focusing on analytical and critical thinking, as well as cultural awareness, our students are prepared for graduate studies in Spanish and professional schools (medicine, law, business), and for professions in fields such as education, business, human resources, research, government, social service, tourism, journalism, and translation. To enhance their career options, Spanish majors are encouraged to seek out a complementary minor or second major/degree, to create even more
opportunities after graduation. Similarly, students can also complete an internship that will provide practical hands-on experience.

The Spanish major consists of 33 hours of major coursework plus 38 hours of general supporting electives. The 33 hours are divided into 6 lower division hours (Spanish 201, 202 or 203) plus 27 hours that are equally distributed among Spanish language or linguistics (9 hours), Spanish literature or culture (9 hours), and approved related electives (9 hours). At least 9 of these 27 hours must be in 400-level Spanish courses. The 38 hours of general supporting electives can come from any of the university’s offerings and may be taken as a minor or part of a second major. To underscore the focus on cultural awareness and to support the achievement of increased linguistic proficiency, our major requires a 10-week minimum experience abroad in a Spanish-speaking country. This experience abroad can be in a formal academic setting, through an internship or other comparable environment. For cases where study abroad is not possible, a student may petition that an internship be used instead.

Program Requirements

SPAN 201 Intermediate Spanish I 3
SPAN 202 Intermediate Spanish II 3
or SPAN 203 Intermediate Spanish for Heritage Speakers
Select three of the following:
   SPAN 302 Advanced Grammar 3
   or SPAN 30 Advanced Grammar for Heritage Speakers
   SPAN 303 Composition and Conversation
   SPAN 306 Business Spanish
   SPAN 307 Spanish for the Sciences
   SPAN 310 Oral Expression
   SPAN 350 Phonetics
   SPAN 352 Hispanic Linguistics
   SPAN 452 Hispanic Sociolinguistics
   SPAN 462 Topics in Hispanic Linguistics
Select three of the following:
   SPAN 311 Hispanic Culture and Civilization to the 18th Century 3
   SPAN 312 Hispanic Culture and Civilization: 18th Century to Present
   SPAN 320 Introduction to Hispanic Literature
   SPAN 331 Spanish Literature to 1700
   SPAN 332 Spanish Literature from 1700 to 1936
   SPAN 341 Spanish-American Literature from 1492 to 1821
   SPAN 342 Spanish-American Literature from 1821 to 1935
   SPAN 410 Hispanic Film
   SPAN 411 Contemporary Hispanic Society and Culture
   SPAN 412 Hispanic Writers in the U.S.
   SPAN 413 Hispanic Culture through Art
   SPAN 421 Spanish Language Poetry
   SPAN 445 Cervantes
   SPAN 450 Contemporary Spanish and Spanish-American Literature
   SPAN 460 Topics in Hispanic Literature
   SPAN 461 Topics in Hispanic Culture
Select nine semester credit hours from the following: 1

SPAN courses (p. 914)
HISP courses (p. 790)

HISP-related courses (see HISP-Related Interdisciplinary Courses table)

College and University Requirements

ENGL 104 Composition and Rhetoric 3
Select one of the following: 3
   ENGL 203 Writing about Literature
   ENGL 210 Technical and Business Writing
COMM 203 Public Speaking
COMM 205 Communication for Technical Professions
COMM 243 Argumentation and Debate

Literature in English (p. 432) 6

POLS 207 State and Local Government 3
American history (p. 24) 6
International and cultural diversity (p. 38) 3
Free Electives 4 39

Total Semester Credit Hours 120

1 See department advisor for list of current options.
2 One course must include a corresponding laboratory.
3 Course may also be used to satisfy any other requirement.
4 Additional SPAN hours may not be used as free electives.

33 hours required. Spanish majors are required to complete a credit-bearing 10-week minimum semester-long study or experience abroad in a Spanish-speaking country. Study abroad options include University-sponsored, reciprocal, affiliated, and independent programs. Selection of location and type of experience abroad should be made in consultation with departmental advisors. For students who are unable to study abroad, an internship may be used instead. This option is available only with prior approval by the Spanish advisor.

HISP-Related Interdisciplinary Courses

ANTH 308 Archaeology of Mesoamerica 3

HISP 205 Don Quixote and the Other Arts 3
Hispanic Studies for Community Engagement - Minor

The minor in Hispanic Studies for Community Engagement offers students the opportunity to combine advanced Spanish language skills and Hispanic cultural knowledge with an internship or service learning experience. This minor is a perfect complement to degrees in other disciplines, since it allows for courses taught in English that address themes from throughout the Hispanic world. Coursework for this minor consists of 18 hours: 6 hours in 300- to 400-level Spanish courses; 9 hours from relevant courses in Anthropology, English, Hispanic Studies, History, Philosophy, Political Science, or Sociology; and 3 hours in the form of an internship or service learning experience with a Hispanic-serving public or private institution. Of the total required hours, at least 9 must be taken in residence at Texas A&M.

Program Requirements

Spanish requirement
Select from the following: 6
- SPAN 302 Advanced Grammar
- SPAN 303 Composition and Conversation
- SPAN 304 Advanced Grammar for Heritage Speakers
- SPAN 310 Oral Expression
- SPAN 312 Hispanic Culture and Civilization: 18th Century to Present
- SPAN 411 Contemporary Hispanic Society and Culture
- SPAN 412 Hispanic Writers in the U.S.
- SPAN 460 Topics in Hispanic Literature
- SPAN 461 Topics in Hispanic Culture
- SPAN 462 Topics in Hispanic Linguistics

Electives 1
Select from the following: 9
- ANTH 303 Archaeology of the American Southwest
- ANTH 308 Archaeology of Mesoamerica
- ANTH 445 Studies in African Diaspora

**Total Semester Credit Hours** 18

1. No more than 6 hours from one area and at least 6 hours must be 300-400 level.
2. Any course of relevant content not listed in the electives may be substituted with the advisor's permission.
3. To be selected in consultation with program coordinator and Academic Advisor during last 6 hours of minor.

Students must make a grade of C or better in minor courses.

## Spanish - Minor

The Spanish minor allows students with other majors to work on their linguistic skills while they gain Hispanic cultural competency. A great way to complement coursework in many other majors, including those in science, health, and business, this minor focuses on language-based coursework that will serve as an asset upon entering the job market after graduation. The minor requires 18 hours of course work beyond 100-level Spanish courses including Spanish 201; 202 or 203. The remaining 12 hours may be selected from the many 300- and 400-level courses offered every semester. Of the total required hours, at least 9 must be taken in residence at Texas A&M.

**Total Semester Credit Hours** 18

At least 9 of these 18 hours must be taken at Texas A&M. A grade of C or higher is required for a course to be counted in the minor field. A minor must be declared before the student has completed 75 credit hours.

## Department of History

The Department of History at Texas A&M offers the B.A., M.A., and Ph.D. The faculty teach over one hundred undergraduate courses on peoples, ideas, and cultures from around the world and across the ages, and are devoted to developing students' critical thinking, reading, and writing skills. A major in history affords students both a broad education and valuable practical skills. By acquiring familiarity with people in diverse times, places and circumstances, students of history develop a sophisticated human empathy which is the key to good scholarship and good citizenship alike.

Many students rely upon a major in history as preparation for a career in teaching as well as graduate study in law, business, public administration, international relations and theology. A small number pursue graduate degrees in history itself. Other history majors seek postgraduate employment in business management, advertising and public relations, government service, museum and archival work, editorial and publishing work, park interpretation and administration, non-profit organizations, and professions requiring research and bibliographic skills.

**Majors**

- Bachelor of Arts in History (p. 482)

**Minors**

- History Minor (p. 483)

---

**History - BA**

In fulfilling the requirements for a Bachelor of Arts degree in History, students must meet the general degree requirements of the College of Liberal Arts and the special requirements listed in the college section.

---

**Teacher Certification**

Students wishing to meet certification requirements to teach history or social studies in the secondary schools of Texas should contact the College of Education and Human Development for more complete information about the certification options available at Texas A&M University. To be eligible for these options, students must also consult with, and have approval of, their field advisor in the Department of History.

---

1. Writing-intensive course.
2. At least 12 hours at the 300- and 400-level. At least 3 hours of pre-modern history and at least 3 hours from three of the five lists (United States; Europe; Latin America and Caribbean; Africa, Asia and the Middle East; Thematic).
3. Course may also be used to satisfy other requirements.
4. Students may use an additional 12 hours of HIST 300-499 for this requirement.
Students should plan a program of study in consultation with one of the department’s undergraduate advisors.

A minimum of 33 hours in history may be applied to the degree. Students must take not less than 15 credit hours at upper level for history residency requirement. A grade of C or higher is required for a course to be counted in the major field. A student must complete not less than 18 hours of coursework in history at Texas A&M University.

Minor Field of Study

All history majors are encouraged to select a minor field of study from departments or divisions within or outside of the College of Liberal Arts or in a particular area of interest (as in the case of interdisciplinary minors or career opportunity minors). The minor will consist of a minimum of 15 hours of coursework, as defined by the minor department. A grade of C or higher is required for a course to be counted in the minor field. Interdisciplinary minors (p. 439) such as Women’s and Gender Studies, Africana Studies, Classical Studies, Religious Studies, Film Studies, Latina/o and Mexican American Studies, and Business have specific requirements; students should consult undergraduate advisors in these areas of study. A second major may substitute for the minor. Courses used to meet the minor requirements may not be used in the major. See also the statement on “Minor Field of Study” under the general requirements (p. 432) of the College of Liberal Arts.

History - Minor

To apply for a history minor, a student needs to consult with one of the undergraduate advisors in the Department of History.

Program Requirements

Lower-level requirement
Select two from the following: 6
HIST 100 to 289 (p. 791)

Upper-level requirement
Select three from the following: 9
HIST 300 to 489 (p. 791)

Total Semester Credit Hours 15

Students must make a grade of "C" or better in all courses.

Department of International Studies

The Department of International Studies offers diverse curricula that immerse students in the social, political, economic, and cultural implications of globalization. The degree combines a linguistic and cultural proficiency with a flexible set of tracks and a mandatory abroad experience. In addition to the BA in International Studies, the department offers Modern Language BA degree options in French, German, and Russian, as well as a BA in Classics. Students looking for language minors can find them in Arabic, Chinese, Classical Studies, French, German, Italian, Japanese, and Russian. We also offer minors in Asian Studies and Comparative Cultural Studies. The programs give students a combination of measurable language proficiency and a global perspective that will serve both their professional and personal ambitions.

Required Foreign Language Placement Test. Incoming students who intend to enroll for the first time in any language course at Texas A&M University, who have previous knowledge, however acquired, of the language in which they plan to enroll, and who have no college credit in the language, must take the departmental placement examination to determine the appropriate course for their level of ability. The placement test also serves as a basis for credit by examination. The placement examination will be administered by the Department of International Studies during freshman conferences along with other credit by exam tests. The test will also be offered during Fall and Spring semesters. Students who take the Advanced Placement (AP) test or other acceptable tests which grant college-level credit in their foreign language of choice do not have to take the required departmental placement test. In this case, the AP and Achievement test results may be used for placement.

International students whose native language is not English are exempted from satisfying the University foreign language requirement. These students are not allowed to register in those courses in their native language that are used to fulfill that requirement.

## Classics - BA, Classical Civilization Track

The B.A. in Classics is designed to give students a thorough grounding in the culture, history, literature, and intellectual accomplishments of Ancient Greece and Rome from the Bronze Age to the dawn of the Middle Ages. Studying the history and literature of these civilizations will not only help students to develop skills in close reading, writing, and critical thinking, but will also help them to see how fundamental concepts of Western Civilization such as rationalism and democracy first arose in Classical Antiquity. The Classics degree is divided into two tracks: the Literature and Language track has a traditional focus on Latin and Greek philology (students choose either Latin or Greek to specialize in, but are encouraged to take both) and is intended to enable students to read and enjoy the great texts of Classical Antiquity (Homer, Herodotus, Thucydides, Livy, Tacitus, the New Testament, etc.) in the original languages. The Classical Civilization track has no language requirement and focuses instead on the history, beliefs, and material culture of ancient Greek and Roman civilization. A major in Classics signals a commitment to serious intellectual inquiry and is an excellent basis for careers in law, business, consulting, public service, and teaching. Those intending to pursue careers in medicine or finance will also find that a major in Classics can be easily combined with undergraduate courses required for those fields.

**Minor Field of Study.** All Classics majors are strongly encouraged to select 15-18 hours in a minor field of study. Students must earn a "C" or better in all minor coursework.

Courses cross-listed with other programs cannot be used under different prefixes to fulfill more than one requirement.

## Classics - BA, Language and Literature Track

The B.A. in Classics is designed to give students a thorough grounding in the culture, history, literature, and intellectual accomplishments of Ancient Greece and Rome from the Bronze Age to the dawn of the Middle Ages. Studying the history and literature of these civilizations will not only help students to develop skills in close reading, writing, and critical thinking, but will also help them to see how fundamental concepts of Western Civilization such as rationalism and democracy first arose in Classical Antiquity. The Classics degree is divided into two tracks: the Literature and Language track has a traditional focus on Latin and Greek philology (students choose either Latin or Greek to specialize in, but are encouraged to take both) and is intended to enable students to read and enjoy the great texts of Classical Antiquity (Homer, Herodotus, Thucydides, Livy, Tacitus, the New Testament, etc.) in the original languages. The Classical Civilization track has no language requirement and focuses instead on the history, beliefs, and material culture of ancient Greek and Roman civilization. A major in Classics signals a commitment to serious intellectual inquiry and is an excellent basis for careers in law, business, consulting, public service, and teaching. Those intending to pursue careers in medicine or finance will also find that a major in Classics can be easily combined with undergraduate courses required for those fields.

### Program Requirements

#### Greek or Latin Language

**Total Semester Credit Hours**: 120

---

1. At least 3 hours must be in MATH. Three hours may be PHIL 240.
2. Courses may be used to satisfy other requirements.
3. Select from any 100-499 courses not used elsewhere, except CLAS 300-499.

### Minor Field of Study

All Classics majors are strongly encouraged to select 15-18 hours in a minor field of study. Students must earn a “C” or better in all minor coursework.

---

Courses cross-listed with other programs cannot be used under different prefixes to fulfill more than one requirement.

### International Studies - BA, International Commerce Track

#### Principle Objectives

1. To guide students through the complex cultural, social, political, and economic stakes of global interdependence.
2. To assure a measurable proficiency in a foreign language.
3. To assure regional cultural competency through a structured and integrated abroad experience.
4. To provide a historical dimension to current conceptions of globalization.

#### Curriculum

The degree plan consists of a combination of INTS core courses (15 hours), with electives tailored for each track (18 hours); area studies courses in the region corresponding to the student's foreign language choice (9 hours); foreign language courses (20 hours); and at least one long semester or 10-week summer study abroad or other approved international program with an emphasis on cultural and linguistic immersion.

### International Commerce Track

The International Commerce track combines a basic set of courses in business practice with a broader set of courses in international economic and social theory. Student choose their coursework from a list that spans at least four colleges of the university. It provides students with a well-developed understanding of the interconnectedness of global commercial systems.

#### Track Courses

Select three of the following: 9

- ACCT 209: Survey of Accounting Principles
- AGEC 105: Introduction to Agricultural Economics
- ECON 203: Principles of Economics
- FINC 409: Survey of Finance Principles
- ISYS 209: Business Information Systems Concepts
- MGMT 209: Business, Government and Society
- MGMT 309: Survey of Management
- MKTG 409: Principles of Marketing
Total Semester Credit Hours 120

1 Requirement for the minor in business.
2 Choose courses from an approved list on the INTS website in consultation with an advisor. Courses numbered 485 or 489 that contain significant international content can be taken in any department to meet part of the track or area requirement. Students must obtain International Studies advisor approval before taking the 485 or 489 course.
3 See the Foreign Language paragraph.
4 See the International Experience Requirements paragraph.
5 At least 3 hours must be in MATH. Three hours may be PHIL 240.
6 Courses may be used to satisfy other requirements.

Foreign Language

Students entering International Studies take a placement exam to determine the level of and number of required foreign language courses. Exam results may fulfill a maximum of 14 semester credit hours.

- Students placed in 101 will take 101, 102, 201 and 202 and 6 semester credit hours at the 300- or 400-level.
- Students placed in 102 will take 102, 201 and 202 and 6 semester credit hours at the 300- or 400-level.
- Students placed in 201 will take 201 and 202 and 6 semester credit hours at the 300- or 400-level.
- Students placed in 202 will take 202 and 6 semester credit hours at the 300- or 400-level.
- Students placing out of 101, 102, 201 and 202 will take 6 semester credit hours.

International Experience Requirements

The International Experience must generate at least 3 hours of Texas A&M University credit. Departmental approval is required before travel.

Any international experience that does not meet these criteria will not count toward the degree.

- Must be at least one long semester or one 10-week summer approved experience.
- Must be taken after completion of 100- and 200-level language requirement and INTS 201.
- Must be completed before student is eligible to enroll in INTS 481, INTS 491 or INTS 497.
- Must be an immersion experience in the foreign culture and language, which can be satisfied by:
  - An internship at a company, government agency or non-profit operation involving significant use of the foreign language. Three hours of INTS 484 elective credit can be given.
  - Courses taken at a foreign university. Courses may count for Texas A&M University credit with approval of the advisor of the relevant department. These courses cannot apply to the International Studies core. One course must be taken in the foreign language at the 300- or 400-level.
  - Selected Texas A&M University Study Abroad programs which involve intensive cultural and language immersion.
  - A combination of the above to equal the requirement of a long semester or a 10-week summer-approved experience.
- Must be taken outside of the student’s country of origin.
- Must be taken in one foreign country that matches with the foreign language and the area study requirement unless approved by the department head before travel.

Other courses may qualify for the college, university requirements categories. Students should consult the approved list of courses available in the Undergraduate Student Services Office in the College of Liberal Arts or in the International Studies Degree Program Office. The list incorporates University Core Curriculum requirements. No course can be counted in more than one category, except as allowed in the International and Cultural Diversity Graduation requirement.
International Studies - BA, International Communication and Media Track

The BA in International Studies is a degree offered in the Department of International Studies.

**Principle objectives**

1. To guide students through the complex cultural, social, political, and economic stakes of global interdependence.
2. To assure a measurable proficiency in a foreign language.
3. To assure regional cultural competency through a structured and integrated abroad experience.
4. To provide a historical dimension to current conceptions of globalization.

**Curriculum**

The degree plan consists of a combination of INTS core courses (15 hours), with electives tailored for each track (18 hours); area studies courses in the region corresponding to the student’s foreign language choice (9 hours); foreign language courses (20 hours); and at least one long semester or 10-week summer study abroad or other approved international program with an emphasis on cultural and linguistic immersion.

**International Communication and Media Track**

As one of the largest sectors of the American and global economy, communication and media occupy a major role in our private and professional lives. Moreover, this sector of the economy often functions transnationally in a relatively seamless fashion. This track offers a discreet set of courses that provide students with a strong background in how media function in a global setting.

**Program Requirements**

**Core Courses**

- INTS 201 Introduction to International Studies 3
- Take three hours of the following: 3
  - INTS 205 Current Issues in International Studies
  - Select two of the following: 6
    - INTS 400 to 480 (p. 807)
    - INTS 485 Directed Studies
    - INTS 489 Special Topics in...
    - INTS 497 Independent Honors Study
- INTS 481 Senior Seminar in International Studies 3

**Track courses**

Select three of the following: 9

- COMM 240 Rhetorical Criticism
- COMM 243 Argumentation and Debate
- COMM 320 Organizational Communication
- COMM 325 Persuasion
- COMM 415 New Media and Civil Society
- COMM 443 Communication and Conflict
- ENGL 241 Advanced Composition
- ENGL 320 Technical and Professional Editing
- JOUR 203 Media Writing I 1
- JOUR 303 Media Writing II 1
- MKTG 409 Principles of Marketing
- PSYC 346 Psychology of Language

Select three of the following: 9

- COMM 330 Technology and Human Communication
- COMM 335 Intercultural Communication
- COMM 340 Communication and Popular Culture
- COMM 354 Political Economy of Telecommunication
- COMM 365/INTS 365 International Communication
- JOUR 365
- COMM 450 Media Campaigns
- COMM 454 Telecommunication Policy
- COMM 458/Global Media
- JOUR 458
- INTS 301 Theories of Globalization
- INTS 484 Directed Internship

**Area Studies**

Select courses from one of the following areas: 2 9

- Latin America
- Europe
- Africa
- North Africa and the Middle East
- Asia
- Foreign Language 3 20

**International Experience Requirement** 4

**College and University Requirements**

- ENGL 104 Composition and Rhetoric 3
- Communication (p. 21) 3
- Literature in English (p. 432) 6
- Mathematics (p. 21) 5 6
- Language, philosophy and culture (p. 22) 3
- Creative arts (p. 23) 3
- Life and physical sciences (p. 21) 9
- Social and behavioral sciences (p. 24) 6
- American history (p. 24) 6
- POLS 206 American National Government 3
- POLS 207 State and Local Government 3
- International and Cultural Diversity (p. 38) 6

General electives 7

Total Semester Credit Hours 120

1 Requirement for the minor in public relations.
2 Choose courses from an approved list on the INTS website in consultation with an advisor. Courses numbered 485 or 489 that contain significant international content can be taken in any department to meet part of the track or area requirement. Students must obtain International Studies advisor approval before taking the 485 or 489 course.
3 See the Foreign Language paragraph.
Foreign Language

Students entering International Studies take a placement exam to determine the level of and number of required foreign language courses. Exam results may fulfill a maximum of 14 semester credit hours.

- Students placed in 101 will take 101, 102, 201 and 202 and 6 semester credit hours at the 300- or 400-level.
- Students placed in 102 will take 102, 201 and 202 and 6 semester credit hours at the 300- or 400-level.
- Students placed in 201 will take 201 and 202 and 6 semester credit hours at the 300- or 400-level.
- Students placed in 202 will take 202 and 6 semester credit hours at the 300- or 400-level.
- Students placing out of 101, 102, 201 and 202 will take 6 semester credit hours at the 300- or 400-level.

The list incorporates University Core Curriculum requirements. No course can be counted in more than one category, except as allowed in the International and Cultural Diversity Graduation requirement.

International Studies - BA, Environmental Studies Track

Principle objectives

1. To guide students through the complex cultural, social, political, and economic stakes of global interdependence.
2. To assure a measurable proficiency in a foreign language.
3. To assure regional cultural competency through a structured and integrated abroad experience.
4. To provide a historical dimension to current conceptions of globalization.

Curriculum

The degree plan consists of a combination of INTS core courses (15 hours), with electives tailored for each track (18 hours); area studies courses in the region corresponding to the student's foreign language choice (9 hours); foreign language courses (20 hours); and at least one long semester or 10-week summer study abroad or other approved international program with an emphasis on cultural and linguistic immersion.

International Environmental Studies Track

Globalization and rapid industrialization have brought about a set of environmental concerns that defy national boundaries. Students will work through a fascinating array of coursework chosen among the Colleges of Geoscience, Science, Agrilife, and Liberal Arts. Ultimately students will have a firm grasp of the myriad environmental issues that arise from our global interconnectedness.

Program Requirements

### International Studies - BA, International Geographic Information Systems Track

#### Principle objectives
1. To guide students through the complex cultural, social, political, and economic stakes of global interdependence.
2. To assure a measurable proficiency in a foreign language.
3. To assure regional cultural competency through a structured and integrated abroad experience.
4. To provide a historical dimension to current conceptions of globalization.

#### Curriculum

The degree plan consists of a combination of INTS core courses (15 hours), with electives tailored for each track (18 hours); area studies courses in the region corresponding to the student’s foreign language choice (9 hours); foreign language courses (20 hours); and at least one long semester or 10-week summer study abroad or other approved international program with an emphasis on cultural and linguistic immersion.

### International Geographic Information Systems Track

The International Geographic Information Systems track adds a tremendous skill set to the already substantial ones offered by the core INTS major. The International GIS track immerses students in the workings of spatially distributed information that is used in the environmental, transportation, defense, and many other sectors of the economy. Students will develop skills in spatial analysis and advanced applications of GIS technologies.

Social and behavioral sciences (p. 24): 6

American history (p. 24): 6

POLS 206 | American National Government                        | 3     |
| POLS 207 | State and Local Government                          | 3     |

International and cultural diversity (p. 38): 5

General electives: 7

Total Semester Credit Hours: 120
Choose courses from an approved list on the INTS website in consultation with an advisor. Courses numbered 485 or 489 that contain significant international content can be taken in any department to meet part of the track or area requirement. Students must obtain International Studies advisor approval before taking the 485 or 489 course.

See the Foreign Language paragraph.

At least 3 hours must be in MATH. Three hours may be PHIL 240.

Courses may be used to satisfy other requirements.

Foreign Language

Students entering International Studies take a placement exam to determine the level of and number of required foreign language courses. Exam results may fulfill a maximum of 14 semester credit hours.

- Students placed in 101 will take 101, 102, 201 and 202 and 6 semester credit hours at the 300- or 400-level.
- Students placed in 102 will take 102, 201 and 202 and 6 semester credit hours at the 300- or 400-level.
- Students placed in 201 will take 201 and 202 and 6 semester credit hours at the 300- or 400-level.
- Students placed in 202 will take 202 and 6 semester credit hours at the 300- or 400-level.
- Students placing out of 101, 102, 201 and 202 will take 6 semester credit hours at the 300- or 400-level.

International Experience Requirements

The International Experience must generate at least 3 hours of Texas A&M University credit. Departmental approval is required before travel. Any international experience that does not meet these criteria will not count toward the degree.

- Must be at least one long semester or one 10-week summer approved experience.
- Must be taken after completion of 100- and 200-level language requirement and INTS 201.
- Must be completed before student is eligible to enroll in INTS 481, INTS 491 or INTS 497.
- Must be an immersion experience in the foreign culture and language, which can be satisfied by:
  - An internship at a company, government agency or non-profit operation involving significant use of the foreign language. Three hours of INTS 484 elective credit can be given.
  - Courses taken at a foreign university. Courses may count for Texas A&M University credit with approval of the advisor of the relevant department. These courses cannot apply to the International Studies core. One course must be taken in the foreign language at the 300- or 400-level.
  - Selected Texas A&M University Study Abroad programs which involve intensive cultural and language immersion.
  - A combination of the above to equal the requirement of a long semester or a 10-week summer-approved experience.
- Must be taken outside of the student's country of origin.
- Must be taken in one foreign country that matches with the foreign language and the area study requirement unless approved by the department head before travel.

Other courses may qualify for the college, university requirements categories. Students should consult the approved list of courses available in the Undergraduate Student Services Office in the College of Liberal Arts or in the International Studies Degree Program Office. The list incorporates University Core Curriculum requirements. No course can be counted in more than one category, except as allowed in the International and Cultural Diversity Graduation requirement.

International Studies - BA, Global Cultural Studies Track

Principle objectives

1. To guide students through the complex cultural, social, political, and economic stakes of global interdependence.
2. To assure a measurable proficiency in a foreign language.
3. To assure regional cultural competency through a structured and integrated abroad experience.
4. To provide a historical dimension to current conceptions of globalization.

Curriculum

The degree plan consists of a combination of INTS core courses (15 hours), with electives tailored for each track (18 hours); area studies courses in the region corresponding to the student's foreign language choice (9 hours); foreign language courses (20 hours); and at least one long semester or 10-week summer study abroad or other approved international program with an emphasis on cultural and linguistic immersion.

Global Cultural Studies Track

The Global Cultural Studies track offers students both the fundamental theoretical background in cultural studies as well as a broad array of courses in international cultural production and criticism. This humanities based program provides students with a rich understanding of artistic expression in a global setting.

No course can be counted in more than one category, except as allowed in the International and Cultural Diversity Graduation requirement.

International Studies - BA, International Politics and Diplomacy Track

Principle objectives

1. To guide students through the complex cultural, social, political, and economic stakes of global interdependence.
2. To assure a measurable proficiency in a foreign language.
3. To assure regional cultural competency through a structured and integrated abroad experience.
4. To provide a historical dimension to current conceptions of globalization.

Curriculum

The degree plan consists of a combination of INTS core courses (15 hours), with electives tailored for each track (18 hours); area studies courses in the region corresponding to the student’s foreign language choice (9 hours); foreign language courses (20 hours); and at least one long semester or 10-week summer study abroad or other approved international program with an emphasis on cultural and linguistic immersion.

International Politics and Diplomacy Track

This track offers students a fundamental understanding of foreign relations. Students learn about the workings of governments and civil societies in a global framework. In the end, students come away from the program with a sound understanding of how governments communicate and cooperate in regional, continental, and global settings.

COMM 243  Argumentation and Debate  3

Total Semester Credit Hours  7

International Experience Requirements
The International Experience must generate at least 3 hours of Texas A&M University credit. Departmental approval is required before travel. Any international experience that does not meet these criteria will not count toward the degree.

- Must be at least one long semester or one 10-week summer approved experience.
- Must be taken after completion of 100- and 200-level language requirement and INTS 201.
- Must be completed before student is eligible to enroll in INTS 481, INTS 491 or INTS 497.
- Must be an immersion experience in the foreign culture and language, which can be satisfied by:
  - An internship at a company, government agency or non-profit operation involving significant use of the foreign language. Three hours of INTS 484 elective credit can be given.
  - Courses taken at a foreign university. Courses may count for Texas A&M University credit with approval of the advisor of the relevant department. These courses cannot apply to the International Studies core. One course must be taken in the foreign language at the 300- or 400-level.
  - Selected Texas A&M University Study Abroad programs which involve intensive cultural and language immersion.
  - A combination of the above to equal the requirement of a long semester or a 10-week summer-approved experience.
- Must be taken outside of the student’s country of origin.
- Must be taken in one foreign country that matches with the foreign language and the area study requirement unless approved by the department head before travel.

Other courses may qualify for the college, university requirements categories. Students should consult the approved list of courses available in the Undergraduate Student Services Office in the College of Liberal Arts or in the International Studies Degree Program Office. The list incorporates University Core Curriculum requirements. No course can be counted in more than one category, except as allowed in the International and Cultural Diversity Graduation requirement.

International Studies - 5-Year Bachelor of Arts and Master of International Affairs

Principle objectives
1. To guide students through the complex cultural, social, political, and economic stakes of global interdependence.
2. To assure a measurable proficiency in a foreign language.
3. To assure regional cultural competency through a structured and integrated abroad experience.
4. To provide a historical dimension to current conceptions of globalization.
**Curriculum**

The degree plan consists of a combination of INTS core courses (15 hours), with electives tailored for each track (18 hours); area studies courses in the region corresponding to the student's foreign language choice (9 hours); foreign language courses (20 hours); and at least one long semester or 10-week summer study abroad or other approved international program with an emphasis on cultural and linguistic immersion.

**5-Year Bachelor of Arts and Master of International Affairs**

The International Studies department, in conjunction with the Bush School of Government & Public Service, offers a joint degree program that allows International Studies majors to enter the Bush School at the beginning of their fourth year at Texas A&M. This opportunity enables students to receive their International Studies undergraduate degree and a Master of International Affairs (MIA) degree in five years. The partnership between International Studies and the Bush School is especially attractive because all graduates from the Bush School’s Masters Program must have proficiency in a foreign language and are encouraged to spend a semester abroad; International Studies majors will have completed this requirement prior to entering the Bush School graduate program. Students admitted to the five-year degree program will have completed 102 hours of the 120 hours of coursework required to receive their bachelor’s degree. These courses must include all of the specific prerequisites for a Bachelor of Arts degree in International Studies (within the Politics and Diplomacy emphasis track), as well as the courses required by the College of Liberal Arts and by Texas A&M University for an undergraduate degree. Students will be required to complete the same two year, 48 hour curriculum as other students admitted to the Bush School’s MPSA program. For information about the 5-year Degree Program, contact the Bush School (http://bush.tamu.edu).

**Program Requirements**

**Core Courses**

- INTS 201 Introduction to International Studies 3
- Take the following course three times. 3
  - INTS 205 Current Issues in International Studies
- Select two of the following: 6
  - INTS 400 to 480 (p. 807)
  - INTS 485 Directed Studies (no more than 3 hours)
  - INTS 489 Special Topics in...
  - INTS 497 Independent Honors Study
- INTS 481 Senior Seminar in International Studies 3

**Supporting Courses**

Select six of the following: 18

- ECON 203 Principles of Economics
- ECON 320 Economic Development of Europe
- ECON 324 Comparative Economic Systems
- ECON 330 Economic Development
- ECON 452 International Trade Theory and Policy
- HIST 343 Inter-American Relations
- HIST 444 American Military History Since 1901
- HIST 462 American Foreign Relations to 1913
- HIST 463 American Foreign Relations Since 1913
- HIST 464 International Developments Since 1918
- INTS 301 Theories of Globalization
- INTS 484 Directed Internship

- POLS 206 American National Government 3
- POLS 207 State and Local Government 3
- International and cultural diversity (p. 38) 5
Choose courses from an approved list on the INTS website in consultation with an advisor. Courses numbered 485 or 489 that contain significant international content can be taken in any department to meet part of the track or area requirement. Students must obtain International Studies advisor approval before taking the 485 or 489 course.

See the Foreign Language paragraph.

At least 3 hours must be in MATH. Three hours may be PHIL 240.

Courses may be used to satisfy other requirements.

**Foreign Language**

Students entering International Studies take a placement exam to determine the level of and number of required foreign language courses. Exam results may fulfill a maximum of 14 semester credit hours.

- Students placed in 101 will take 101, 102, 201 and 202 and 6 semester credit hours at the 300- or 400-level.
- Students placed in 102 will take 102, 201 and 202 and 6 semester credit hours at the 300- or 400-level.
- Students placed in 201 will take 201 and 202 and 6 semester credit hours at the 300- or 400-level.
- Students placed in 202 will take 202 and 6 semester credit hours at the 300- or 400-level.
- Students placing out of 101, 102, 201 and 202 will take 6 semester credit hours at the 300- or 400-level.

**International Experience Requirements**

The International Experience must generate at least 3 hours of Texas A&M University credit. Departmental approval is required before travel. Any international experience that does not meet these criteria will not count toward the degree. International Experience must be completed prior to admission into the 5-year Degree Program.

- Must be at least one long semester or one 10-week summer approved experience.
- Must be taken after completion of 100- and 200-level language requirement and INTS 201.
- Must be completed before student is eligible to enroll in INTS 481, INTS 491 or INTS 497.
- Must be an immersion experience in the foreign culture and language, which can be satisfied by:
  - An internship at a company, government agency or non-profit operation involving significant use of the foreign language. Three hours of INTS 484 elective credit can be given.
  - Courses taken at a foreign university. Courses may count for Texas A&M University credit with approval of the advisor of the relevant department. These courses cannot apply to the International Studies core. One course must be taken in the foreign language at the 300- or 400-level.
  - Selected Texas A&M University Study Abroad programs which involve intensive cultural and language immersion.
  - A combination of the above to equal the requirement of a long semester or a 10-week summer-approved experience.
  - Must be taken outside of the student’s country of origin.

Other courses may qualify for the college and university requirements categories. Students should consult the approved list of courses available in the Undergraduate Student Services Office in the College of Liberal Arts or in the International Studies Degree Program Office. The list incorporates University Core Curriculum requirements. No course can be counted in more than one category, except as allowed in the International and Cultural Diversity graduation requirement.

See the MIA program in the Graduate and Professional Catalog for the MIA requirements.

**Modern Languages - BA, French Option**

The department offers a wide range of courses in Modern Languages at all levels of the undergraduate curriculum as part of its mission to support and advance the international and global competencies of university students. At present, students can earn a BA in Modern Languages with options in French, German or Russian. Courses are designed to offer students extended study of the language, literatures, and cultures of these language communities. The department insists on a high competence in the language, which is the basis for all other options. Students will be required to complete, by coursework or placement test, all 100- and 200-level courses in sequence (except FREN 221/FREN 222, GERM 221/GERM 222 and RUSS 221/RUSS 222, which are taken concurrently) before taking any upper-level course, unless an upper-level course permits co-registration or skipping a lower course in the sequence (see inventory of courses for prerequisites). Once a student has received credit for a higher-level language course, the student is no longer eligible to receive credit for prerequisite courses. In addition to classes at the College Station campus, the department offers summer study abroad programs for credit. Departmental faculty and advising staff also work closely with students to match their interests with semester and full-year programs abroad.

¹ Minimum of 6 hours at the 400- level.
² See the Minor Field of Study paragraph.
³ See the Study Abroad Requirement paragraph.
⁴ At least three hours must be in MATH. Three hours may be PHIL 240.
⁵ Courses may be used to satisfy other requirements.
Minor Field of Study

All Modern Language majors must select a minor field of study from departments or divisions within or outside of the College of Liberal Arts or in a particular area of interest (as in the case of interdisciplinary minors). The minor will consist of a minimum of 15 hours of coursework, as defined by the minor department. No more than 9 credit hours may be at the 100-299 level. Interdisciplinary minors such as women's and gender studies, classical studies, religious studies, and business have specific requirements; students should consult undergraduate advisors in these areas of study. A second major may substitute for the minor. Courses used to meet the minor requirements may not be used in the major. See also the statement on "Minor Field of Study" under the general requirements of the College of Liberal Arts. In general, the careful combination of foreign language skills with other major curricula enhances preparation for careers in business, industry and government. Teaching certification is available to majors through the College of Education and Human Development. Consult the College of Education and Human Development section under secondary teacher certification for additional information.

Study Abroad Requirement

All German majors are required to study for one semester or summer in a German-speaking country approved by the department.

Any departmental major must earn a "C" or better in all major and minor coursework.

Other courses may qualify for the college and university requirements categories. Students should consult the approved list of courses available in the Undergraduate Student Services Office in the College of Liberal Arts. The lists incorporate University Core Curriculum requirements. No course can be counted in more than one category.

Modern Languages - BA, Russian Option

The department offers a wide range of courses in Modern Languages at all levels of the undergraduate curriculum as part of its mission to support and advance the international and global competencies of university students. At present, students can earn a BA in Modern Languages with options in French, German or Russian. Courses are designed to offer students extended study of the language, literatures, and cultures of these language communities. The department insists on a high competence in the language, which is the basis for all other options. Students will be required to complete, by coursework or placement test, all 100- and 200-level courses in sequence (except FREN 221/FREN 222, GERM 221/GERM 222 and RUSS 221/RUSS 222, which are taken concurrently) before taking any upper-level course, unless an upper-level course permits co-registration or skipping a lower course in the sequence (see inventory of courses for prerequisites). Once a student has received credit for a higher-level language course, the student is no longer eligible to receive credit for prerequisite courses. In addition to classes at the College Station campus, the department offers summer study abroad programs for credit. Departmental faculty and advising staff also work closely with students to match their interests with semester and full-year programs abroad.

Arabic Studies - Minor

The minor in Arabic Studies is an academic program open to all students in the university. The minor is interdisciplinary in nature and combines courses in Arabic language and culture with electives in Arabic studies, as well as a capstone project. The minor is a valuable complement to the academic portfolio of any student majoring in the humanities, social sciences, or natural sciences, who wishes to add an international dimension to their intellectual profile. In addition, Arabic Studies faculty offer study abroad programs in order to enrich student learning experiences and cultural knowledge while helping students attain higher proficiency in the language.

Students must complete ARAB 101 and ARAB 102 before they may declare a minor in Arabic Studies.

Capstone Project

A capstone project that is completed in an approved upper-division Arabic Studies course is required of all students pursuing a minor in Arabic Studies during their final year of the program. It consists of a substantial research paper (15–20 pages) on an original topic and is conducted under the direction of a faculty member with the approval of the departmental advisors. Through the capstone course and project, students get a chance to integrate their classroom knowledge about the Arab world and use their study-abroad experiences and internships in an Arabic-speaking country, if any, to address an issue of interest to them. Issues that students can choose to address could be of linguistic, cultural, historical, religious, or political nature, among others. Upon its completion, and in coordination with the departmental advisors, the final project will be presented orally to Arabic classes in order to maximize its benefits.

Asian Studies - Minor

The minor in Asian Studies is an academic program open to all students in the university. The minor is interdisciplinary in nature and includes Asian Studies courses in the humanities and the social sciences, as well as a capstone project. The minor is a valuable complement to the academic portfolio of any student majoring in the humanities, social sciences, or natural sciences, who wishes to add an international dimension to their intellectual profile.

- RUSS 202 Intermediate Russian II □
- RUSS 221 or Field Studies I □
- RUSS 222 or Field Studies II □
- RUSS 301 Advanced Grammar and Composition I □
- RUSS 302 or Advanced Grammar and Composition II □
- RUSS 446/EUR 446 Russian Artistic Culture I: Beginnings to 1900 □
- RUSS 447/EUR 447 or Russian Artistic Culture II: 1890 to Present □
- Select two from the following: □

Total Semester Credit Hours 18

Any RUSS course at the 300- and 400-level not used for credit previously.

Students must earn a "C" or better in all minor coursework.

Department of Performance Studies

Performance Studies is an inquiry-based humanities field that examines relationships between performance and culture. Students study music and theatre performance as practice and use performance as a method of inquiry. Performance Studies investigates traditional art forms such as music, theatre, and dance as well as a range of cultural expressions such as ritual, festivals, games and sports, parades, storytelling, clothing, social arts, and mass media. Students learn performance skills that enhance intellectual inquiry. Through performance, students learn to engage creatively with the world around them in an on-going process of inquiry and meaning-making. In the course of their work in the Performance Studies BA, students will develop a perspective on artistic practice that crosses genres, the ability to think independently and creatively, and a commitment to the performing arts as socially engaged practice.

The BA in Performance Studies provides a foundation for careers that combine skills and knowledge gained in the study, practice, and critical analysis of performance. A comprehensive BA in Performance Studies can prepare students for a variety of careers, including arts administration, education, journalism, art criticism, entertainment management, public sector arts advocacy, museum administration, corporate or nonprofit communications, community development, arts therapy, marketing and market research, public relations, media production, gallery management, social and public service, international and non-governmental organization work, and sonic/scenic design as well as advanced study or professional work in music or theatre.

Majors
- Bachelor of Arts in Performance Studies (p. 503)

Minors
- Performance Studies Minor (p. 506)
- Performance Technology Minor (p. 507)

Performance Studies - BA

Performance Studies is an inquiry-based field that examines relationships between performance and culture. Students study music and theatrical performance as practice and use performance as a method of inquiry. Students study traditional art forms such as music, theatre, and dance as well as a broad range of cultural expressions such as ritual, festivals, games and sports, parades, storytelling, clothing, indigenous arts, and mass media. Students also learn performance skills that enhance inquiry.
Program Requirements

General Degree Requirements:
- Complete 120 hours with a minimum 2.0 GPA overall and a minimum 2.0 GPA in major coursework
- 18 hours of major coursework completed at Texas A&M
- Make a "C" or better in all coursework within the major
- Complete 36 hours of upper division (300-400 level) hours in residence, 12 hours of which must be completed in major coursework.
- Complete two PERF courses formally designated as writing intensive

Performance Studies - Minor

Performance Studies is an inquiry-based field that examines relationships between performance and culture. Students study music and theatrical performance as practice and use performance as a method of inquiry. Students study traditional art forms such as music, theatre, and dance as well as a broad range of cultural expressions such as ritual, festivals, games and sports, parades, storytelling, clothing, indigenous arts, and mass media. Students also learn performance skills that enhance inquiry.

The minor in Performance Studies is 18 hours of course work designed to allow students to explore all areas of performance and develop an understanding of performance as research. The minor is open to all majors.

1 Each applied course is 1 credit hour.
2 Students can take either MUSC 206 and co-requisite MUSC 212 or MUSC 212 and co-requisite MUSC 212.
3 A list of approved courses can be found at [link].
4 University Core Curriculum requires six hours of International & Cultural Diversity coursework, 3 hours of which will be satisfied by PERF 301. A list of approved courses can be found at [link].
5 Select at least one course with [UICD] attribute.
Performance Technology - Minor

The Minor in Performance Technology is open to all majors. It gives students research experiences through interdisciplinary technology-based performances.

Program Requirements

Required courses in the minor include an introductory survey of essential concepts and skills (PERF 202) and a capstone course in Intermedia Performance based on interdisciplinary collaboration (PERF 402). Additional courses in the minor are drawn from the Music, Performance Studies, or Theatre Arts curricula focusing on advanced applications and analysis of technology in performance including consideration of aural, visual, and human components; sensors and actuators; data and programming; construction; and composition, design, improvisation, and devised performance. Students are encouraged to propose or apply for unique performance and research experiences (PERF 483 and PERF 491) in order to build their portfolios and better align their coursework with their professional goals.

PERF 202   Introduction to Performance Technology 3
PERF 402   Intermedia Performance 3
Select four of the following: 12
   MUSC 316   Music and Technology
   MUSC 317   Recording and the Producer
   MUSC 491   Research
   PERF 318/491   Electronic Composition
   MUSC 318
   PERF 483   Performance Practicum
   PERF 491   Research
   THAR 435   New Technology for Designers
   THAR 445   Design as Performance
   THAR 491   Research

Total Semester Credit Hours 18

A minimum of six semester credit hours must be at the 300-400 level.

Students must make a grade of "C" or better in all courses.

The capstone course, PERF 402, allows students to integrate and apply knowledge and skills pertaining to technology-based performance in interdisciplinary collaborative projects.

Department of Philosophy and Humanities

The Greek philosopher Socrates once said that the unexamined life is not worth living. For more than 2,000 years, philosophy has been the source of the most intensely reflective, influential and argued versions of that examination. The concerns of philosophy range from the arts, the methods and foundations of the sciences, politics, education, and religion to the complex questions relating to the meaning of reality, truth, values and the significance of human history. The study of philosophy is an essential dimension of a well-educated person.

Philosophy seeks to establish standards of evidence, provide rational methods of resolving conflicts, and create techniques for evaluating ideas and arguments. Philosophy develops the capacity to see the world from the perspectives of other individuals and other cultures; it enhances one’s ability to perceive the relationships among the various fields of study; and it deepens one’s sense of the meaning and variety of human experience.

Toward these ends the program in philosophy at Texas A&M is structured to provide students with the skills necessary to appreciate more fully the central concerns of human existence and develop abilities in problem-solving, communication, persuasion, writing, and critical thinking.

Students, along with parents and friends, often assume that the only undergraduates who major in philosophy are those who intend to pursue graduate degrees in philosophy, theology and law. The breadth of skills developed, however, makes the study of philosophy appropriate for students entering professional fields such as medicine, business and education, and for those preparing for graduate work in the humanities or the social sciences.

It should be stressed that the non-academic value of a field of study must not be viewed mainly in terms of its contribution to obtaining one’s first job after graduation. Students are understandably preoccupied with getting their first job, but even from a narrow vocational point of view it would be short-sighted to concentrate on that at the expense of developing potential for success and advancement once hired. Factors leading to initial employment are not necessarily those that lead to promotions or beyond a first position. This is so because the needs of many employers alter with changes in social and economic patterns. It is therefore crucial to see beyond the specifics of a job description.

As this suggests, there are people trained in philosophy in just about every field. They have gone into not only such professions as teaching, medicine, and law, but also into computer science, management, publishing, sales, government service, criminal justice, public relations, and other fields.

Majors

- Bachelor of Arts in Philosophy (p. 507)

Minors

- Philosophy Minor (p. 508)

Certificates

- Philosophy Pre-Law Certificate (p. 508)

Philosophy - BA

The program in philosophy at Texas A&M is structured to provide students with the skills necessary to appreciate more fully the central concerns
of humans existence and develop abilities in problem-solving, communication, persuasion, writing and critical thinking. In essence, the study of Philosophy is what college is all about: engaging with topics that matter; cultivating skills that will carry you the rest of your life.

**Total Semester Credit Hours** 15

1. Up to six semester credit hours may be selected from PHIL 100 - PHIL 299 (p. 879).

Students must make a grade of "C" or better in all courses.

**Philosophy Pre-Law - Certificate**

The Department of Philosophy offers a Pre-law Certificate that is primarily guided by the published recommendations of the American Bar Association (A.B.A.). The A.B.A. encourages prospective law students to pursue classes that cultivate a set of skills that will enhance the study of law. The study of philosophy lends itself to the development these recommended skills. To this end, Philosophy’s Pre-law Certification requires that students take classes that typically cultivate the A.B.A’s recommended skill set:

1. **Problem Solving** involves “courses and other experiences that will engage [students] in critical thinking about important issues, challenge ... beliefs and improve ... tolerance for uncertainty and criticism.”

2. **Critical Reading** involves “close reading and critical analysis of complex textual material.”

3. **Writing and Editing** involves “preparing original pieces of substantial length and revising written work in response to constructive criticism. [...] Language is the most important tool of a lawyer, and lawyers must learn how to express themselves clearly and concisely.”

4. **Oral Communication and Listening** involves “the ability to speak clearly and persuasively... and excellent listening skills.”

5. **Research** involves “undertaking a project that requires significant library research and the analysis of large amounts of information obtained from that research.”

The Certification requires students to take 12 hours of classes, one of which is an introduction to logic and 9 of which are at the 300-400 level.
Students must complete at least one Philosophy class that is writing intensive.

**Total Semester Credit Hours** 12

1  Must be any course with a 'W' designation.

**Department of Political Science**

Political science is a social science that investigates collective decision-making. It is concerned with governments, individuals' attitudes and choices, and the interactions between governing institutions and mass behavior. Among other things, political science addresses power, authority, influence, identity, ethics, law, liberty, justice, wealth, and violence.

The study of political science introduces students to a powerful set of analytical tools for understanding interactions within and among groups of people. These include systematic knowledge of recurring patterns and problems in political life and methods for collecting and analyzing data and other forms of evidence. Studying political science also cultivates critical thinking and effective communication and prepares students for active citizenship, professional success, and lifelong learning.

**Undergraduate Courses**

The Department of Political Science offers courses in all facets of the discipline: American Politics, International Relations, Comparative Politics, Political Theory, Political Methodology, Public Administration and Policy, and Race and Ethnic Politics.

**American Politics**

American politics involves the study of the institutions of national government, law, mass political behavior, elections, political communication and media, interest groups, political parties, state and local governments, urban politics, and identity in politics in the United States.

**International Relations**

International relations involve the study of relations between the governments of the world. Courses are offered in world politics, American foreign relations, and national security policy.

**Comparative Politics**

This area of political science allows students to develop an in-depth understanding of foreign governments and politics. Courses are offered in European governments, Latin American governments, Asian governments, Russia and the former Soviet states, and in the politics of inequality and globalization.

**Political Theory**

The study of political theory provides students with an understanding of the fundamental relationships between governments and people. Courses range from the study of Greek antiquity to contemporary political ideologies.

**Public Administration and Policy**

This area of political science encompasses the study of public administration and the role of public policy in American politics. Study in this area will provide the student with the opportunity to understand the fundamentals of administration within a political environment. Courses are offered in bureaucracy and administration, state and local finance, urban administration, and government and the economy.

**Political Methodology**

These courses introduce students to scientific research design, statistical analysis, and game theory.

**Race and Ethnic Politics**

These courses provide the student with an in-depth understanding of the role of diversity in politics.

**5-Year Degree Programs**

The Political Science Department offers a joint degree program in conjunction with the Bush School of Government and Public Service. This program enables students to receive either a B.A. or B.S. in political science and a Master of Public Service and Administration (MPSA) degree in five years.

The Political Science Department also offers a joint degree program in conjunction with the University of Essex. This program enables students to receive either a B.A. or B.S. in political science and a Master of Arts or a Master of Science in Political Science in four and a half years.

**Honors Program**

The Department of Political Science participates actively in the University honors program. Honors courses are available in all areas of political science. In addition, students may graduate with honors distinction in political science. Honor students also are offered individual instruction under POLS 497. Students interested in the Department’s Honors Program should contact the Political Science Undergraduate Programs Office.

**Teacher Certification**

Students desiring certification to teach civics or government in secondary schools in Texas must meet special additional requirements.

More complete information on requirements for teacher certification may be found in the College of Education and Human Development section under secondary certification.

## Political Science - BA

The Department of Political Science offers a Bachelor of Arts in Political Science. The B.A. degree program offers a strong liberal arts curriculum aimed at enhancing students’ understanding of politics along with essential training in social science research methods, developing habits of critical thinking, and enhancing students’ written, verbal, and visual communications skills.

**Total Semester Credit Hours** 120

¹ Students must complete this course before taking more than six hours of 300- or 400-level courses in Political Science.
² At least 3 hours must be in MATH except MATH 102, MATH 150, MATH 167, MATH 365, and MATH 366. Three hours may be PHIL 240.
³ POLS 100-POLS 499 (p. 886) cannot be used to fulfill this requirement.
Course may be used to satisfy any other requirement.

No more than 36 credits in political science may be applied to the degree.

A grade of C or better is required for a course to be counted in the major field.

Other courses may qualify for the college and university requirements. Student should consult the approved list of courses in the Undergraduate Student Services Office in the College of Liberal Arts. No course can be counted in more than one category.

Political Science - BS

The Department of Political Science offers a Bachelor of Science in Political Science. The B.S. program emphasizes building skills in social science research and data analysis while gaining a better understanding of politics, developing habits of critical thinking, and enhancing students' written, verbal, and visual communications skills.

No more than 39 credits in political science may be applied to the degree.

A grade of C or better is required for a course to be counted in the major field.

Other courses may qualify for the college and university requirements. Student should consult the approved list of courses in the Undergraduate Student Services Office in the College of Liberal Arts. No course can be counted in more than one category.

Political Science - 5-Year Bachelor of Arts/Master of Public Service Administration

Students admitted into this program will be enrolled in Bush School graduate courses with an undergraduate classification for the fall of their fourth year and will be re-classified as degree seeking master's degree students upon completing 120 credit hours, typically in the following semester. These credit hours must include all specific course prerequisites for a baccalaureate degree in Political Science, as well as the courses required by the College of Liberal Arts and by Texas A&M University for an undergraduate degree. Students will be required to complete the same two-year, 48 hour curriculum as other students admitted to the Bush School's MPSA program.

This fifteen-hour certificate provides students with the opportunity to pursue independent research in political science. In addition to completing the required course offerings and summer research academy, participants will have opportunities to conduct research with faculty members, present their work at scholarly conferences, and meet with visiting scholars. Research may be conducted one-on-one with a faculty sponsor, or the student may join one of several faculty-led research teams. Students are encouraged to begin planning as freshmen to avoid the addition of extra hours to the degree plan. Certificate requirements are specified in a current brochure available in the Department of Political Science’s Undergraduate Programs Office, Allen Building, room 2024.

1 Taught as part of POLS Summer Research Academy.

Comparative Study of National Politics - Certificate

The Certificate in Comparative Study of National Politics is a means of enhancing undergraduate education through a focused combination of courses and study abroad. Administered by the Department of Political Science, the program is open to all Texas A&M University undergraduates, regardless of major. Students interested in gaining background for postgraduate studies in comparative politics or comparative public policy, for a career in the U.S. Foreign Service or international aid work, or for careers in areas such as international business, marketing, or law may wish to pursue this certificate.

This certificate program requires 18 hours of coursework, including a capstone course involving comparative politics research. It also requires participation in a study abroad program. The 18 semester hours of coursework can be accommodated within the regular undergraduate curriculum. Students are encouraged to begin planning as freshmen to avoid the addition of extra hours to the degree plan. Certificate requirements are specified in a current brochure available in the Department of Political Science’s Undergraduate Programs Office, Allen Building, room 2024.

Successful completion of the program will be indicated on the student’s transcript. Each student will receive a program certificate upon graduation from Texas A&M.

Advanced Research Methods in Political Sciences - Certificate

The Certificate in Advanced Research Methods in Political Science is a means of enhancing undergraduate education through a focused program of courses and independent research. Administered by the Department of Political Science, the program is open to all Texas A&M University undergraduate students, regardless of major. This certificate program aims to enhance students’ skills in research design and quantitative data analysis. It provides valuable technical skills that are essential in graduate schools, professional schools, and careers in a research-intensive, data-driven fields.

Total Semester Credit Hours 120

1 Students must complete this course before taking more than six hours of 300- or 400-level courses in Political Science.
2 POLS 100-POLS 499 (p. 886) cannot fulfill this requirement.
3 Course may be used to satisfy any other requirement.

No more than 39 credits in political science may be applied to the degree.

A grade of C or better is required for a course to be counted in the major field.

Other courses may qualify for the college and university requirements.
Student should consult the approved list of courses in the Undergraduate Student Services Office in the College of Liberal Arts. No course can be counted in more than one category.

Students are reclassified as degree seeking master’s students upon completing 120 credit hours, typically in the following semester.

See the MPSA program in the Graduate Catalog for MPSA requirements.
The Certificate in European Union Politics is an initiative of the European Union Center and the Department of Political Science. Both interdisciplinary and international in its orientation, the Certificate program offers students seeking a Bachelor of Arts or Bachelor of Science degree at Texas A&M University the opportunity to combine courses, intermediate level foreign language skills, and study abroad.

Certificate requirements include 23 semester hours of coursework including an approved study abroad program. The 23 semester hours of coursework can be accommodated within the regular undergraduate curriculum. Students are encouraged to begin planning as freshmen to avoid the addition of extra hours to the degree plan. Certificate requirements are specified in a current brochure available in the Department of Political Science's Undergraduate Program Office, Allen Building, room 2024.

Successful completion of the program will be indicated on the student’s transcript. Each student will also receive a program certificate upon graduation from Texas A&M University.

Track 3 - EU study abroad REEP or Equivalent

Required Courses

1 Students are required to complete courses from the following list, at least three of which must be from political science.
Foundations of Political Theory - Certificate

The Certificate in Foundations of Political Theory is a means of enhancing undergraduate education through a focused combination of courses, independent study and program participation. Administered by the Department of Political Science, the program is open to all Texas A&M University undergraduates, regardless of major. Students may choose one of two areas of concentration: history of political theory, or analytic political theory. Students interested in gaining background for post-graduate studies in law, social science, history or political theory, or for a fulfilling career that builds on other analytical and expressive skills may wish to pursue this certificate.

This certificate requires 18 hours of coursework, including an introductory course in political theory and a capstone senior research course on a relevant topic. The 18 semester hours of coursework can be accommodated within the regular undergraduate curriculum. Students are encouraged to begin planning as freshmen to avoid the addition of extra hours to the degree plan. Certificate requirements are specified in a current brochure available in the Department of Political Science’s Undergraduate Programs Office, Allen Building, room 2024.

Successful completion of the program will be indicated on the student’s transcript. Each student will receive a program certificate upon graduation from Texas A&M.

**International Relations - Certificate**

The Certificate in International Relations is a means of enhancing undergraduate education through a focused combination of courses, an optional internship, and language development. Administered by the Department of Political Science, the program is open to all Texas A&M University undergraduates, regardless of major. This certificate program provides essential knowledge and skills for students interested in postgraduate studies in international relations, careers in the U.S. Foreign Service, international intelligence, law enforcement, or as a military officer; or for job recruitment in areas such as international law or finance.

This certificate requires 18 hours of coursework, including a capstone course involving international relations research. Up to six of the 18 hours may be earned in connection with participation in an internship program. The 18 semester hours of coursework can be accommodated within the regular undergraduate curriculum. Students are encouraged to begin planning as freshmen to avoid the addition of extra hours to the degree plan. Certificate requirements are specified in a current brochure available in the Department of Political Science’s Undergraduate Programs Office, Allen Building, room 2024.

Successful completion of the program will be indicated on the student’s transcript. Each student will receive a program certificate upon graduation from Texas A&M.

**Law, Politics, and Society - Certificate**

The Certificate in Law, Politics and Society is a means of enhancing undergraduate education through a focused combination of courses and individualized research instruction. Administered by the Department of Political Science, the program is open to all Texas A&M University undergraduates, regardless of major. The program offers an intellectually-rigorous, research-oriented foundation for post-graduate studies focusing on the politics of law, courts, and legal systems or for preparation for law school and the legal profession.

This certificate requires 18 hours of coursework, including a capstone course involving doctrinal, empirical or comparative research into important socio-legal questions. The 18 semester hours of coursework can be accommodated within the regular undergraduate curriculum. Students are encouraged to begin planning as freshmen to avoid the addition of extra hours to the degree plan. Certificate requirements are specified in a current brochure available in the Department of Political Science’s Undergraduate Programs Office, Allen Building, room 2024.

Successful completion of the program will be indicated on the student’s transcript. Each student will receive a program certificate upon graduation from Texas A&M.

1. Three courses must be from Political Science.

2. Course, and similar courses in other disciplines, qualifies when focused specifically on race, ethnicity, or gender politics or on closely related topics of significant substance or importance. Consult an Undergraduate Advisor in the Political Science Department to determine if course would be accepted toward certificate.
Course qualifies when taught with significant focus on race, ethnicity, or gender politics or clearly related topics. Consult an Undergraduate Advisor in the Political Science Department to determine if course would be accepted toward certificate.

Department of Psychology

Psychology majors receive a rigorous program of undergraduate education and training that encourages critical thinking, lifelong learning, and the analysis and integration of information about individuals and groups of people. The curriculum leading to a degree in psychology provides students with an understanding of human behavior and the ability to use scientific methods to answer questions about human behavior. Students are prepared to enter a variety of graduate and professional programs in psychology and related fields (such as law, medical school), as well as to enter entry-level employment in a number of fields (such as business, human resources).

BA/BS Degrees: Students majoring in psychology may earn either the Bachelor of Arts or Bachelor of Science degree. The psychology course requirements for the two degrees are identical; they differ with respect to the requirements in other disciplines. For example, the BA degree requires courses in a foreign language and extra humanities hours, whereas the BS degree requires additional hours in the physical and biological sciences. The two degrees are offered to allow students to complete their non-psychology course of study in fields of greatest interest to them. Thus, students who have stronger interests in the natural and life sciences should pursue the BS degree, whereas those with stronger interests in foreign language and the humanities should pursue the BA degree.

Both degrees provide students with the necessary curriculum requirements to pursue graduate study in psychology in most institutions, as well as other professional fields such as law. Students planning to apply to medical school or other physical health professional programs are advised to select the BS degree program.

Honors: Students who qualify for the University Honors Program should contact the Department of Psychology about the department’s own honors program which places an emphasis on small classes and independent research experience.

Minors: A non-psychology minor is optional for psychology majors. If chosen, a minor must consist of 15–18 credit hours, no more than 9 of which may be lower division and must be declared before the student completes 90 credit hours. No more than 6 hours from the minor may be used to fulfill other Core requirements. A grade of C or higher is required if a course is to be counted in the major or minor field. A psychology minor is available for non-psychology majors (see below). A neuroscience minor is available to both psychology and non-psychology majors. For more information, visit the Neuroscience website (http://tamin.tamu.edu/undergrad/minor). For more information about Psychology undergraduate programs, please visit the Department of Psychology website (http://psychology.tamu.edu).

**Majors**
- Bachelor of Arts in Psychology (p. 521)
- Bachelor of Science in Psychology (p. 521)
Minors

- Psychology Minor (p. 522)

Psychology - BA

The Department of Psychology offers a Bachelor of Arts in Psychology. Students interested in studying human behavior, with a humanities-oriented supporting curriculum, would pursue a BA degree. The BA can successfully prepare students interested in graduate and professional programs that stress a humanities background (e.g., counseling, social work, management, law), as well as students interested in employment in business or applied psychology.

Total Semester Credit Hours 120

1. Enrollment freshman year is strongly recommended.
2. Enrollment sophomore year is strongly recommended.
3. No more than a combined maximum of 6 hours of PSYC 484, PSYC 485, or PSYC 485H are permitted.
4. Exceptions are MATH 150, MATH 167, MATH 365, MATH 366.
5. Courses in psychology may not be used to satisfy this requirement.
6. Other courses in American and Texas history may be used; however, courses solely about Texas history may not comprise more than 3 semester credit hours.
7. Course may be used to satisfy any other requirement.
8. No more than 9 hours of any combination of military science, naval science, aerospace studies and physical activity may be counted. A minor field of study may fulfill this requirement, but a minor is not required.
9. Up to 6 hours in PSYC 100-499 are permitted.

A grade of C or higher is required if a course is to be counted in the major field. A student must complete a minimum of 36 hours of 300- and 400-level courses at Texas A&M.

No course can be counted in more than one category.

Psychology - BS

The Department of Psychology offers a Bachelor of Science in Psychology. Students interested in studying human behavior, with a science-oriented supporting curriculum, would pursue a BS degree. The BS can successfully prepare students interested in further study in a science-oriented psychology graduate program (such as neuroscience) or medical school, or other health-related graduate and professional programs (e.g., pharmacy, physical therapy), as well as students interested in entry-level positions in business or applied psychology.

1. PSYC 484, PSYC 485 and PSYC 491 do not count toward the minor.
2. Registration in PSYC 203 and PSYC 204 is limited to PSYC majors only.

At least 9 semester credit hours of PSYC courses above the 200-level must be taken at Texas A&M.

Students must make a grade of "C" or better in all courses.

**Department of Sociology**

Sociology is the scientific study of society. The discipline examines all aspects of human behavior, especially those involving interpersonal relationships and the development of social structures.

The Department of Sociology offers courses in such areas as the family, racial and ethnic relations, demography, social stratification and inequality, social psychology, complex organizations, community, environment, criminology, the sociology of religion, global sociology and social change.

Sociological training is useful in a broad variety of occupations. Our coursework provides an understanding of the forces behind individual opinions and beliefs, organizational behavior, social trends and world events. These skills are critical to marketing, law, human resources, journalism, government and strategic management. Sociology is the best form of training for entry into the helping professions like social services and law enforcement, and it provides an outstanding foundation for business and industry.

Sociology majors desiring certification must include the following among their sociology courses and required education courses:

- **Select one of the following:**
  - **SOCI 317/AFST 317** Racial and Ethnic Relations  
  - **AFST 317** Sociology of African Americans  

**International and Cultural Diversity**

1. A grade of C or better is required for credit.  
2. SOCI courses do not count toward fulfilling this requirement.  
3. Course may be used to satisfy any other requirement.  
4. No more than 6 semester credit hours for SOCI 484 1 may be applied to the Bachelor of Arts degree in Sociology.

Sociology majors are not required to select a minor field of study. If chosen, the minor must consist of 15-18 hours, with no more than 9 hours taken at a 100- or 200-level. No more than six hours from the minor may be used to fulfill other requirements. A grade of C or higher is required if a course is to be counted in the minor field.

**Teacher Certification**

**Non-Sociology Majors To Teach Sociology**

Students desiring certification to teach sociology in Texas secondary schools must complete a social studies composite with a sociology emphasis and required education courses:

General Electives 4

Total Semester Credit Hours 120

1. A grade of C or better is required for credit.
2. SOCI courses do not count toward fulfilling this requirement.
3. Course may be used to satisfy any other requirement.
4. No more than 6 semester credit hours for SOCI 4841 may be applied to the Bachelor of Science degree in Sociology.

No more than 33 hours in sociology may be applied to the major.
PSAA 601 Foundations of Public Service 1 3
PSAA 611 Public Policy Formation 1 3
PSAA 621 Economic Analysis 1 3
Total Semester Credit Hours 120

1 A grade of C or better is required for credit.
2 SOCI courses do not count toward fulfilling this requirement.
3 Courses may be used to satisfy any other requirement.
4 No more than 6 credit hours of SOCI 484 may count toward this requirement.

No more than 33 credit hours in SOCI may be applied to the major.

Other courses may qualify. Consult the approved list of courses available in the Undergraduate Student Services Office in the College of Liberal Arts or from departmental advisors. No more than one course may be counted in more than one category.

Please note that university requirements specify that all students must take at least two courses in their major that are designated as fulfilling a writing intensive requirement (W). See the section on general requirements for baccalaureate degree for more information.

**Minor Field of Study**

Sociology majors are not required to select a minor field of study. If chosen, the minor must consist of 15-18 hours, with no more than 9 hours taken at a 100- or 200-level. No more than six hours from the minor may be used to fulfill other requirements. A grade of C or higher is required if a course is to be counted in the minor field.

**Teacher Certification**

**Non-Sociology Majors To Teach Sociology**

Students desiring certification to teach sociology in Texas secondary schools must complete a social studies composite with a sociology emphasis and required education courses:

<table>
<thead>
<tr>

Students should consult an undergraduate Sociology advisor as early as possible to review the requirements of the social studies composite.

**Latino/a and Mexican-American Studies - Minor**

The Latino/a and Mexican American Studies (or LMAS) minor at Texas A&M University invites students to investigate the experiences and contributions of Latino/as in the United States and abroad. Students minoring in LMAS will receive instruction from interdisciplinary faculty across the colleges in the areas of History, Sociology, English, Anthropology, Psychology, Communications, Political Science, Health, Geography, Education, and Hispanic studies.

The courses provide students with a broad knowledge about Latinos frequently omitted from the common curriculum, centered in the experiences of Latinos, and which provides an important pathway to multiple career choices.

Topics covered in courses include race/ethnicity, gender, politics, religion, education, and labor as well as major historical events like the Chicano and Puerto Rican civil rights movements and the social and demographic changes brought on by continued immigration.
Career Options

The LMAS minor can be a critical addition to a student’s career opportunities in occupations in the public or private sectors as employers desire applicants with intercultural competence.

In addition, the minor demonstrates knowledge in a growing specialty area which is attractive to graduate programs in areas including but not limited to Business Administration, Media/Journalism, History, Public Health, Psychology, and Sociology.

Program Requirements

Select at least 6 hours from the following: \(^{1,2}\) 6

- ENGL 362/ HISP 362 Latino/a Literature
- HISP 363 Borderlands: U.S. and Mexico
- HIST 307 Latino Communities of the U.S.
- LMAS 201 Introduction to Latino/Mexican American Studies
- POLS 304 Latino Politics in the United States
- SOCI 403 Sociology of Latinos
- SPAN 412 Hispanic Writers in the U.S.

Total Semester Credit Hours 6

Select the remaining hours from the following: \(^{2}\) 12

- AFST 325 Africana Humanities
- ANTH 303 Archaeology of the American Southwest
- COMM 407/ WGST 407 Women, Minorities and the Mass Media
- GEOG 323 Geography of Latin America
- HISP 204 Spanish and Spanish American Literature in Translation
- HIST 258 American Indian History
- HIST 304 Mexican-American Frontier to 1848
- HIST 305 Mexican-American History 1848-Present
- HLTH 236 Race, Ethnicity and Health
- PHIL 283 Latin American Philosophy
- POLS 306 Contemporary Political Problems and Issues
- POLS 362 Latin American Political Thought
- PSYC 208/ WGST 208 Stereotypes, Prejudice, and Minority Experience
- PSYC 209/ AFST 209 Psychology of Culture and Diversity
- PSYC 303 Psychology of Women of Color
- SOCI 203 U.S.-Mexico Border
- SOCI 217 Introduction to Race and Ethnicity
- SOCI 337 International Migration
- SOCI 402 Sociology of Latin America
- SPAN 450 Contemporary Spanish and Spanish-American Literature
- TEFB 273 Introduction to Culture, Community, Society and Schools

Total Semester Credit Hours 12

\(^{1}\) The two courses (6 hours) from the first area must come from two departments.

\(^{2}\) Students will select 18 hours total from both lists with a minimum of 9 hours at the upper-division level (300- and 400-level).

Students must earn a C or higher in each course to be counted in the minor field.

Sociology - Minor

The Department of Sociology offers a minor in Sociology.

Program Requirements

Select five from the following: 15

- SOCI 205 to 499 (p. 910)

Total Semester Credit Hours 15

Students must make a grade of "C" or better in all courses.

At least nine hours must be at the 300- or 400-level.

Global Sociology - Certificate

The Certificate in Global Sociology gives students concentrated educational experience in international sociological perspectives. This certificate program is open to all Texas A&M sociology majors. The certificate indicates meritorious completion of the appropriate courses. The 12 credits needed to complete the certificate may fulfill 12 credits of Sociology major electives.

Program Requirements

- SOCI 206 Global Social Trends 3

Select three of the following: 9

- SOCI 207/ WGST 207 Introduction to Gender and Society
- SOCI 312 Population and Society
- SOCI 313 Military, War and Society
- SOCI 322 Industrial Sociology
- SOCI 325/ ASIA 325 International Business Behavior
- SOCI 328 Environmental Sociology
- SOCI 329/ ASIA 329 Pacific Rim Business Behavior
- SOCI 330 Sociology of Nutrition
- SOCI 337 International Migration
- SOCI 423 Globalization and Social Change
- SOCI 484 Field Practicum \(^{1}\)
- SOCI 489 Special Topics in... \(^{1}\)

Total Semester Credit Hours 12

\(^{1}\) Credit contingent on appropriateness of subject matter as determined by undergraduate advisor.

International Experience

Each student must ordinarily complete one semester abroad, either through one of Texas A&M’s regular programs (such as the Santa Chiara, Italy program) or another approved study abroad program, international internship or similar academic experience in another country. With the permission of the undergraduate advisor, a student may substitute
appropriate overseas work or experience. Course credit from courses taken during study abroad may sometimes count toward the three required courses in part (b), with the approval of the undergraduate advisor.

**Language**

A minimum of two years (four courses) at the college level of a non-English language is required, normally taken prior to the study abroad or other international experience. The language should be appropriate to the student’s overall program.

**Grade Point**

A cumulative GPR of 3.0 or above must be earned in courses counting toward the certificate.

Transfer courses, independent studies and credit by exam cannot substitute for the required courses unless approved by the undergraduate advisor for certificate purposes.

### Sociology of Gender - Certificate

The Certificate in Sociology of Gender prepares students for graduate studies in gender-related issues and for work in which gender issues are important. This course of study will also help the student become a knowledgeable and responsible citizen in a society which has become increasingly committed to establishing gender equality. Students may, if they wish, combine this certificate with a minor in Women’s and Gender Studies. This certificate program is open to all Texas A&M sociology majors. The certificate indicates meritorious completion of the appropriate courses. The 12 credits needed to complete the certificate may fulfill 12 credits of Sociology major electives.

Transfer courses, independent studies and credit by exam cannot substitute for the required courses unless approved by the undergraduate advisor for certificate purposes.

### Sociology of Race and Ethnicity - Certificate

The Certificate in Sociology of Race and Ethnicity gives students 12 hours of intensive training in a broad range of issues related to racial diversity and ethnic dynamics. This certificate program is open to all Texas A&M sociology majors. The certificate indicates meritorious completion of the appropriate courses. The 12 credits needed to complete the certificate may fulfill 12 credits of Sociology major electives.

Transfer courses, independent studies and credit by exam cannot substitute for the required courses unless approved by the undergraduate advisor for certificate purposes.

### University Studies Programs

The College of Liberal Arts offers degrees in University Studies. A University Studies degree differs from a traditional “major” in that it consists of a concentration and two minors of 15-18 hours each. At least one minor must be outside the college. The University Studies degree format was created to provide students the flexibility to combine areas of study that are of special interest.

#### Majors

- Bachelor of Arts in University Studies, Journalism Concentration (p. 539)
- Bachelor of Arts in University Studies, Race, Gender, Ethnicity Concentration (p. 530)
- Bachelor of Arts in University Studies, Religious Thought, Practices and Cultures Concentration (p. 532)
- Bachelor of Arts in University Studies, Society, Ethics and Law Concentration (p. 533)
- Bachelor of Science in University Studies, Race, Gender, Ethnicity Concentration (p. 534)
University Studies - BA, Journalism Concentration

University Studies - Journalism in the College of Liberal Arts represents an interdisciplinary approach to journalism education, with an emphasis on writing-intensive courses (four would be required as part of the concentration) and electives from other disciplines that complement and support the critical thinking skills required of journalists in the 21st century. In addition to the concentration in journalism through the University Studies degree, students in the program are required to have a minor within the College of Liberal Arts and another outside the college, substantially broadening the interdisciplinary aspects of journalism education.

Students with a degree in University Studies - Journalism would be prepared for a successful life and career in several ways. Their coursework would emphasize critical thinking skills—a necessary component in the changing world of journalism that relies on writing for different types of media with frequent updates and differing audiences. They would be exposed to experiential learning through classes that require students to report and write on deadline and by the requirement for an internship in the field. They would develop and enhance strong writing skills by taking up to four writing-intensive courses. The very nature of journalism—constantly reporting and evaluating new information while examining new topics—would prepare them to be thoughtful consumers of information and encourage them to engage in learning throughout their lifetimes.

1. Select from given list (p. 432) or courses for which one of the listed courses is a prerequisite.
2. A two-course sequence at the intermediate level (201 and 202).
3. One course may be in Texas history.
4. Course may be used to satisfy any other requirement.
5. One minor must be from outside the College of Liberal Arts.

Other courses may qualify. Consult the approved list of courses available from the undergraduate advisor in the Journalism Studies Program and from the Undergraduate Student Services Office in the College of Liberal Arts.

University Studies - BA, Race, Gender, Ethnicity Concentration

This area of concentration is purposefully designed to require that students complete coursework that educates them in interdisciplinary knowledge. Two inquiry-rich, research-based courses, one an introduction and one a capstone senior seminar, provide students with introductory and concluding courses in the methodologies appropriate to interdisciplinary studies in Race, Gender and Ethnicity. Two minors are required for the degree; at least one minor must be from outside the College of Liberal Arts.

1 Two American History courses or one American History course and one Texas History course will fulfill this requirement.
2 One course on federal government and one course on state/local government will fulfill this requirement. Completing four semesters of upper-level ROTC may be substituted for 3 semester hours of the six hours required.
3 100-499 courses not used elsewhere.

University Studies - BA, Religious Thought, Practices and Cultures Concentration

The concentration in Religious Thought allows students to study religion through a variety of lenses: philosophical, historical, literary, artistic, and social. Students gain perspective on religion in the modern world and learn to analyze the impact of religious thought on human culture. Courses are taught by faculty from a range of disciplines and departments, so students can tailor the concentration their interests and goals.

**University Studies - BA, Society, Ethics and Law Concentration**

Society, Ethics, and Law (S.E.A.L.) is a university degree that has been designed for students who are interested in pursuing law school, or developing a highly transferable skill set that is useful to non-profits and businesses alike. To this end, S.E.A.L.’s curriculum is primarily guided by the published recommendations of the American Bar Association (A.B.A.). While the A.B.A. does not recommend nor require any particular major, it does encourage prospective law students to i) pursue opportunities (courses and experiences) that cultivate a specific set of skills; ii) obtain experiences that “can help [them] hit the ground running when [they] become a lawyer; and iii) develop “a broad understanding of history, including the various factors (social, political, economic, and cultural) that have influenced the development of our society in the United State.”

The requirements for this University Studies degree reflect the A.B.A.’s recommendation. Under the broad themes of Society, Ethics and Law, the degree requires classes that contribute to a broad understanding of philosophy, politics, economics and history. Specifically, S.E.A.L. requires that students complete 24 hours of major requirements, a minor in Philosophy, and a second minor outside of the Liberal Arts. In addition to obtaining a broad understanding of society, ethics and law, the degree requires that students pursue experiences and opportunities that typically cultivate the A.B.A.’s recommended skill set:

1. **Problem Solving** involves “courses and other experiences that will engage [students] in critical thinking about important issues, challenge... beliefs and improve ... tolerance for uncertainty and criticism.”

2. **Critical Reading** involves “close reading and critical analysis of complex textual material.”

3. **Writing and Editing** involves “preparing original pieces of substantial length and revising written work in response to constructive criticism. [...] Language is the most important tool of a lawyer, and lawyers must learn how to express themselves clearly and concisely.”
4. **Oral Communication and Listening** involves "the ability to speak clearly and persuasively... and excellent listening skills."¹

5. **Research** involves "undertaking a project that requires significant library research and the analysis of large amounts of information obtained from that research."²

The study of philosophy lends itself to the development of the five recommended skills. To this end, the required minor in Philosophy provides an opportunity to cultivate these skills.

Students are strongly advised to take philosophy courses over and above the minimum requirements for a minor, including independent studies and honors research courses. Those who take at least eight philosophy classes are encouraged to speak with an advisor about the possibility of obtaining a double major with Philosophy.

### Program Requirements

#### Core Courses

- Society focus courses ¹
- Ethics focus courses ²
- Law, regulation and policy focus courses ³
- Experiential component and supplemental studies ⁴

#### University and College Requirements

- **ENGL 103** Introduction to Rhetoric and Composition (3)
- or **ENGL 104** Composition and Rhetoric (3)
- Select one from:
  - **COMM 203** Public Speaking (3)
  - **COMM 243** Argumentation and Debate (3)
  - **ENGL 210** Technical and Business Writing (3)
  - **PHIL 240** Introduction to Logic (3)

- **Mathematics** (p. 21) (2)
- **Life and physical sciences** (p. 21) (2)
- **Foreign language** (p. 432) ⁵ (3)
- **Language, philosophy and culture** (p. 22) (3)
- **Creative arts** (p. 23) (3)
- **Social and behavioral sciences** (p. 24) (3)
- **Literature requirement** ⁶ (3)
- **POLS 206** American National Government (3)
- **POLS 207** State and Local Government (3)
- **American history** (p. 24) ⁷ (3)
- **International and cultural diversity** (p. 38) (3)
- **Philosophy Minor** (15)
- Minor ² (15-18)
- Free electives ⁹ (1-4)
- **Total Semester Credit Hours** 120

⁴ Students must take **PHIL 484** and then choose the remainder of the required 6 hours from: **COMM 203**, **COMM 240**, **COMM 243**, **COMM 301**, **COMM 324**, **COMM 325**, **COMM 327**, **COMM 420/WGST 420**, **ENGL 210**, **WGST 403**, **PHIL 300-499** and any course from the other focus areas lists.

⁵ Take 14 hours of the same language.

⁶ To be chosen from the college approved list (p. 432).

⁷ No more than one Texas History course can be used to satisfy this requirement.

⁸ This second minor must be chosen from outside of the College of Liberal Arts.

⁹ Any 100-499 courses not used elsewhere.

### University Studies - BS, Race, Gender, Ethnicity Concentration

This area of concentration is purposefully designed to require that students complete coursework that educates them in interdisciplinary knowledge. Two inquiry-rich, research-based courses, one an introduction and one a capstone senior seminar, provide students with introductory and concluding courses in the methodologies appropriate to interdisciplinary studies in Race, Gender and Ethnicity. Two minors are required; at least one must be outside the College of Liberal Arts.

Total Semester Credit Hours 120

1 Must be a capstone course meeting University Writing (W) Requirement.
Two American History courses or one American History course and one Texas History course will fulfill this requirement.

One course on federal government and one course on state/local government will fulfill this requirement. Completing four semesters of upper-level ROTC may be substituted for 3 semester hours of the six hours required.

100-499 courses not used elsewhere.
College of Nursing

Administrative Officers
Dean - Sharon Wilkerson, Ph.D., RN, CNE, ANEF
Associate Dean for Academic Affairs - Debra Matthews, Ph.D., RN
Associate Dean for Student Affairs - Kathryn Cochran, M.S.N., RN
Associate Dean for Finance and Administration - Shirley Ellison, M.B.A.
Assistant Dean for Undergraduate Studies – Brian Holland, Ph.D., RN
Assistant Dean for Graduate Studies – Kevin Gosselin, Ph.D., M.Ed., M.S., B.A.

General Statement
Registered nurses have been called the backbone of our health care system. Working on the front lines of health care, they treat patients, monitor and record their condition, help establish a plan of care, educate patients or the public about a health condition, and provide advice and emotional support to patients’ family members. Registered nurses are highly observant and detail-oriented and are often the first to catch important and changing signs and symptoms. They are increasingly being recognized as leaders in transforming the health care system to meet the burgeoning demand for prevention, wellness and primary care services with a focus on improving quality and managing costs. In addition to their clinical expertise, nurses are being sought out to serve in a variety of leadership posts on bodies developing policy recommendations related to a wide-range of health care policy issues.

Individuals who earn a nursing degree must first complete a national licensing examination in order to obtain a nursing license for practice. Further training or education can qualify nurses to work in specialty areas, such as emergency care, pediatrics, labor and delivery, psychiatry, oncology, surgery or public health. Graduate education can increase advancement opportunities for nurses including administrative positions, academic faculty positions, and as nurse practitioners.

The College of Nursing is committed to addressing the critical nursing shortage across Texas through exceptional educational programs in nursing. Our students are provided with cutting-edge classroom technologies and simulated experiences, which include standardized patients and virtual clinical learning activities. As leaders, our graduates are taught to question traditional methods and continually seek the best practices based on relevant clinical research. Through community service and leadership opportunities, the College of Nursing fosters a sense of social responsibility and global citizenship.

History
After receiving approval in 2008 from the Texas Board of Nursing, the College of Nursing located in Bryan-College Station, Texas, was created. Initially, 44 students were admitted expected to assist upon graduation with the severe nursing shortage across Texas. With a nursing workforce shortage and a large population that is aging and ready to retire, it is vital to the state of Texas to help increase the number of baccalaureate-prepared registered nurses. The college is committed to addressing this need. The faculty and staff believe that highly skilled nurses, working in collaboration with other health professionals, through research and service can enable individuals, families and groups to achieve a maximum state of well-being.

College of Nursing Programs
Program: Baccalaureate degree in nursing
Length: 12 to 22 months
General Admissions Requirements: Prerequisite coursework varies by program
Application Deadline: Varies depending on program of study
Start Term: Varies depending on program of study
Specialization, Program of Study: BSN Traditional Track, BSN Second Degree Track, RN to BSN Track
Degree: BSN.

Baccalaureate Degree in Nursing
The College of Nursing offers three tracks that lead to a Bachelor of Science in Nursing (BSN) degree. Upon obtaining the BSN degree, the prelicensure graduates will apply to take the registered nurse (RN) licensure examination.

Accreditation by the Commission on Collegiate Nursing Education (CCNE)
The Commission on Collegiate Nursing Education is an autonomous accrediting agency, contributing to the improvement of the public’s health. A specialized/professional accrediting agency, CCNE ensures the quality and integrity of baccalaureate and graduate nursing programs and of post-baccalaureate nurse residency programs. The Commission on Collegiate Nursing Education gave a full ten year accreditation to the College of Nursing in 2014 for the B.S.N. program. For more information on accreditation, go to www.aacn.nche.edu/ccne-accreditation (http://www.aacn.nche.edu/ccne-accreditation).

Good Academic Standing
Good academic standing is defined as having a minimum grade point average of a 2.0 (on a 4.0 scale), maintaining a minimum grade of C in all courses, and non-probatory status. Students must be in good academic standing in order to progress in the program. If a student receives a grade of D or F in any course in any given semester, the student will automatically be placed on probation and notified in writing of probation status. The student will remain on probation until the course is repeated with a C or better. The course can only be taken through the College of Nursing. Students are allowed to repeat only one course during their enrollment in the program.

Students must complete the program in three consecutive years. If a student repeats a course, which he/she has failed in the College of Nursing, the official grade is the last one earned. That official grade will be used in computing the grade point average and the failing grade will remain on the record.

Academic Dismissal
Students will not be permitted to continue in the nursing program or apply for readmission if they:
1. receive a grade of D or F in more than one course,
2. receive any combination of grades of D or F on two attempts of the same course, or
3. receive notice of dismissal from the program by the Associate Dean for Academic Affairs or the Associate Dean for Student Affairs for failure to adhere to College of Nursing policy.

**Nursing Professional Code of Ethics**

Students in nursing and other health professions curricula are held to standards of conduct that both differ from and exceed those usually expected of university students. Each student enrolled in the College of Nursing is expected to uphold the professional code of ethics established for and by the nursing profession. The nurse recognizes that his/her first obligation is to the patient’s welfare.

Any situation that threatens patient safety, exhibits a lack of moral character, demonstrates a lack of professionalism or good judgment, and/or proves harmful to the hospital or college environment is a violation of College/Hospital policy and may result in immediate termination from the program.

**Compliance Requirements for Clinical Courses**

Students must provide documentation confirming completion of compliance requirements prior to participating in clinical nursing courses. Information on requirements is provided upon admission and during New Student Orientation.

**Locations**

The College of Nursing educates students at three locations: Bryan/College Station, Round Rock, and McAllen, Texas. The Bryan/College Station campus opened in 2010 and serves as the headquarters of the Texas A&M Health Science Center College of Nursing. The 200-acre campus is located along State Highway 47 approximately three miles west of the main campus of Texas A&M University. In 2009, the College of Nursing opened a new facility in Round Rock providing a state-of-the-art 134,000-square-foot structure with classrooms, a simulation center, library, study lounge, student services and faculty offices. The McAllen location was established in 2000 and provides comprehensive, accessible health education programs and services to residents of the Lower Rio Grande Valley of Texas. Since 2014, the College of Nursing has provided prospective and current student support. The McAllen location is housed in a 23,000-square-foot facility with space for laboratories, offices, classrooms and conference areas available to deliver a wide range of health training, clinical research, medical education, community interventions and public health programs with local partners. Additionally, the College of Nursing has an advising location at Angelina College in Lufkin.

**College of Nursing**

- Master of Science in Nursing in Family Nurse Practitioner (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/nursing/msn-family-practitioner)
- Master of Science in Nursing in Nursing Education (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/nursing/msn)
Nursing - BS, RN to BSN Track

The RN to BSN track is an opportunity for registered nurses who hold an associate’s degree in nursing and an active RN license to pursue a Bachelor of Science in Nursing degree. Students may complete the 30 credit hour upper division course of study as either a full-time or a part-time student. The RN to BSN plan allows working nurses to balance career, education and other responsibilities. All applicants are required to complete prerequisite credit hours as noted above along with any outstanding core curriculum courses in order to receive the bachelor’s degree.

Entry to the RN to BSN (Bachelor of Science in Nursing) Program

Those who are already a registered nurse with an associate’s degree may apply for the RN to BSN program to obtain a bachelor’s degree. All applicants are expected to complete prerequisite coursework prior to the first class day. The course instruction is delivered online allowing students to balance career, family and other responsibilities along with advancing their education. Students may choose to complete the curriculum in 3 semesters (1-year option), in 4 semesters (1 1/2-year option) or in 5 semesters (2-year option). Applicants who completed their Associate Degree in Nursing through an LVN to RN or Paramedic to RN bridge program must have earned a minimum of 35 transferable credits in their program in order to apply.

Nursing - BS, Second Degree BSN Track

The second degree (post baccalaureate) track is for students who already hold a bachelor’s degree in another field of study. Acceptance into this track requires successful completion of prerequisite coursework prior to beginning upper division courses. All students will be required to complete core curriculum requirements if these were not met in the previous degree program. Contact the Office of Student Affairs for more information.

Students with a previous bachelor’s degree may apply to the traditional BSN track and must follow the same requirements as noted above. If they met a core curriculum at another Texas institution in their previous degree, it will be accepted for entry into the College of Nursing.

Upper Level Entry to the Second Degree Bachelor of Science in Nursing

Admission decisions are based on:

1. the strength of the student’s academic background;
2. HESI A2 score;
3. the personal statement;
4. the student’s achievements and accomplishments, with emphasis on volunteer work and activities in health care;
5. minimal academic history of repeats, withdraws or failures; and
6. the personal interview, if requested.

Nursing - BS, Select BSN Track

The Select BSN allows nursing students, with or without a first degree, to obtain nursing degrees more quickly. The Select Track Bachelor of Science in Nursing (BSN) will allow bachelor’s students to participate in a “fast track” program to complete both a BSN and a Master of Science in Nursing (MSN) within a three-year academic trajectory. Students must complete prerequisite coursework prior to entry. Because of the rigorous nature of the Select Track program, it will only be offered in full-time course loads.

Interested students should speak to the Associate Dean for Student Affairs following admission.

Nursing - BS, Traditional BSN

The traditional track requires the successful completion of prerequisite coursework prior to beginning upper division courses. College counselors will be able to advise students regarding equivalencies to common course numbers. Information is also available regarding courses at www.tccns.org (http://www.tccns.org) and through the Texas A&M Transfer Course Equivalency (https://compass-ssb.tamu.edu/pls/PROD/bwxtwtes.P_TransEquivMain) web page.
Upper Level Entry to the Traditional Bachelor of Science in Nursing

Admission to the College of Nursing upper-level entry program is competitive. The student must have a minimum grade of C in each prerequisite course and a recommended minimum cumulative grade point average of at least 3.0 (on a 4.0 scale). Students admitted to the program usually exceed this minimum requirement significantly, with higher grade point averages in all university courses, in core curriculum courses and in the science courses. Preference is given to students completing more than 50% of coursework in either Brazos, Williamson, Hidalgo and Angelina counties in the state of Texas. In addition, applicants are required to complete the HESI Admissions Assessment A2 exam within one year of the application deadline. Students may take the exam only one time per application cycle. The application includes the application, HESI score, personal statement, a transcript from every other college or university the student has attended and a high school transcript. Admission decisions are based on:

1. the strength of the student’s academic background;
2. HESI A2 score;
3. the personal statement;
4. the student’s achievements and accomplishments, with emphasis on volunteer work and activities in health care;
5. minimal academic history of repeats, withdraws or failures; and
6. the personal interview, if requested.

Internal Transfer Applicants

An Internal Transfer Applicant is a current Texas A&M University undergraduate in a non-nursing major who meets specific requirements to apply to the upper division sequence in Nursing. Meeting requirements does not guarantee admission, it only allows a student the opportunity to apply for a seat.

Students must submit the application available through the CON website no later than the published deadline in the term in which they are applying. Note: All academic information included on the application must be posted to and appear in a student's official record at Texas A&M.

External Transfer Applicants

A limited number of External Transfer Applicants from colleges and universities outside of Texas A&M University will be admitted.

Students on the Blinn TEAM and those participating in the PSA program must follow the external transfer process found here (http://nursing.tamhsc.edu/traditional/external.html).

Program Requirements

Prerequisite Courses

Prerequisites may be planned or in progress during the application cycle, but must be completed with a grade of “C” or better before the program start date. The courses may be completed at any regionally accredited college or university.

Communication

English Comp I - 3 credit hours

American History/Government/Social and Behavioral Science

History- 6 credit hours
Political Science (federal or Texas)- 6 credit hours
Psychology- 3 credit hours
Life Span Growth and Development Psychology- 3 credit hours

Mathematics

Two courses selected from core curriculum- 6 credit hours

Life and Physical Sciences

Introductory Biology- 4 credit hours
Anatomy & Physiology I and II- 8 credit hours
Introductory or General Chemistry- 4 credit hours
Microbiology- 4 credit hours
Nutrition- 3 credit hours

Other Courses

Language, Philosophy and Culture: Philosophy (Intro or Ethics)- 3 credit hours
Creative Arts: Course that meets TAMU or sending institution core curriculum

Foreign Language

Proficiency in a foreign language is required. Can be met by taking two years of the same language in high school or college credit.

TAMU students must meet 9 hour science core requirement. KINE 120 may be required.

School of Public Health

Administrative Officers
Dean - Jay Maddock, Ph.D., FAAHB
Interim Associate Dean for Academic Affairs - Thomas McDonald, Ph.D.
Associate Dean for Research - Marcia Ory, Ph.D., MPH
Interim Assistant Dean for Student Affairs - Erin Schneider, M.P.H.
Assistant Dean for Finance and Administration - John Zamora, C.P.A., B.B.A.
Associate Dean for Public Health Practice - Jennifer Griffith, Dr.P.H., M.P.H.

General Statement
Founded in 1998 as the first public health school in the nation with a focus on rural and underserved communities, the School of Public Health developed into a nationally ranked, fully accredited public health research, service and training program. After only nine years, U.S. News & World Report ranked the school as a Top 25 Graduate School in Public Health.

Offering classes at the College Station campus as well as other Texas locations through distance education, the school provides public health bachelor’s, master’s and doctoral programs in several public health disciplines: epidemiology, biostatistics, environmental health, occupational health, occupational safety and health, health administration, policy and management, and health promotion and community health sciences. In addition to core public health curriculum, the school is home to several centers of research excellence.

Providing a forum for future public health leaders, the school builds an array of research strengths and practice skills for rural and urban settings.

History
The School of Public Health is the first of its kind in the nation. The Texas Legislature established the school in 1995 as part of a rural health initiative to better address rural health needs in the state. After receiving degree-granting authority for the Master of Public Health degree in April 1998 from the Texas Higher Education Coordinating Board, the School of Rural Public Health welcomed its inaugural class in September 1998.

In 2014, the School of Public Health welcomed its first students into the brand-new Bachelor of Science in Public Health program, the first program of its kind in the state affiliated with a fully accredited School of Public Health. With a mission to serve the public health needs of the entire state, the undergraduate program is based on a philosophy of health promotion and disease prevention to improve the quality of life of individuals, families, and communities in the State of Texas and beyond. Graduates of the BSPH program will be able to assess factors influencing health in populations as well as plan, design, implement and successfully manage effective healthcare programs and interventions as well as be well-positioned for careers in medicine, nursing and other allied health professions.

The school currently offers one bachelor’s degree program, three master’s degree programs, and two doctoral degree programs.

Location
The School of Public Health’s administration and faculty are located in a state-of-the-art, three-building complex in College Station, on the Texas A&M University west campus. The nearly 100,000-square-foot complex includes classrooms fully equipped with videoconferencing technology to support the school’s innovative distance education programs that reach across the breadth of the state. The laboratory building provides a venue for the school’s internationally regarded toxicology group to engage in exemplary public health work and provides a vehicle for training tomorrow’s researchers. The administration building houses the administration and faculty. In addition, the school operates on-going regional instructional and research programs at the McAllen campus.

Our mission guides us toward improving population health throughout Texas and beyond by providing competency-based educational programs focused on the knowledge, skills, and abilities relevant to the practice of public health.

Our educational programs are strengthened by our commitment to regionally focused, practice-based scholarship and service.

Our vision is simple: Texas A&M Department of Public Health Studies graduates will be world renowned for their competency as public health practitioners and as the preferred “new hires” of health organizations!

We invite you to join our family of faculty, staff and students on our collective journey for improving population health.

Faculty

Appiah, Bernard, Assistant Professor
School Of Public Health
DrPH, Texas A&M Health Science Center School of Public Health, 2013

Campos-Bowers, Monica, Instructional Assistant Professor
School Of Public Health
DrPH, University Of North Texas Health Science Center at Houston, 1986

Clendenin, Angela, Instructor
School Of Public Health
MA, Seaton Hall University, South Orange, NJ, 2005

Griffith, Jennifer, Instructional Associate Professor
School Of Public Health
DrPH, University of North Carolina Chapel Hill, 2004

Kodatt, Stephanie, Assistant Professor
School Of Public Health
PHD, Our Lady of the Lake University, 2007

Lin, Szu-Hsuan, Instructional Assistant Professor
School Of Public Health
PHD, Texas A&M Unvieristy School of Public Health, 2015

Ramirez, Gilbert, Professor
School Of Public Health
DrPH, University of Texas Health Science Center at Houston, 1986

Ross, Jennifer, Instructional Assistant Professor
School Of Public Health
DrPH, Texas A&M Unviersity School of Public Health, 2013

Majors

- Bachelor of Science in Public Health (p. 545)

Minors

- Public Health Minor (p. 547)

Public Health - BS

Public Health professionals with a Bachelor of Science in Public Health (BSPH) are prepared to:

- assess factors influencing health in individuals, communities and populations
- plan effective programs and interventions
- design evaluations for those interventions
- successfully manage the implementation of those programs

The BSPH program is based on a philosophy of health promotion and disease prevention, to improve the quality of life of individuals, families and communities. The BSPH discipline focuses on four areas:

1. the multiple determinants of health, including biological, environmental, sociocultural, health service, and economic factors,
2. identification of scientific data, tools of informatics, and other information for identifying indicators of health status and health disparities and assessing the well-being of a community,
3. addressing major local, national, and global health challenges, and
4. designing public health approaches and interventions that improve health outcomes, population health and well-being.

The Bachelor of Science in Public Health degree program is more than a means to produce ready public health practitioners. It can complement or enrich a traditional biology-based pre-health degree plan for students intending professional education in medicine, nursing, allied health or other health professions. Notably the program establishes a specific entry-
level baccalaureate degree in the Public Health academic pathway which, until recently, had started with a master’s degree.

Select one of the following: 3

- Any PHLT 3 credit course (p. 882)
- Any relevant public health course

Total Semester Credit Hours: 15

Minimum 15 hours required.

Minimum of 6 hours at 300- to 400-level.

Minimum 2.0 TAMU GPA and a completed minor form filed in the Public Health Studies advising office.

1 Must be approved by a Public Health Studies advisor.

Chosen in consultation with BSPH academic advisor.

Approval of degree plan does not guarantee access to courses. Students must satisfy prerequisites, and some course (writing intensive classes included) are available to majors only. It is the responsibility of the student to ascertain whether there are any restrictions or prerequisites for courses in their degree plan.
College of Science

Administrative Officers
Dean - Meigan Aronson, Ph.D.
Executive Associate Dean - Michael B. Hall, Ph.D.
Associate Dean for Undergraduate Programs and Development - Timothy P. Scott, Ph.D.
Associate Dean for Faculty Affairs and Graduate Studies - Mark J. Zoran, Ph.D.
Associate Dean for External Relations - Marlan O. Scully, Ph.D.
Associate Dean for International Programs - Paulo Lima-Filho, Ph.D.
Senior Advisor to the Dean - W. Michael Kemp, Ph.D.
Associate Dean for Assessment and College Climate - Ginger Carney, Ph.D.
Associate Dean for Strategic Planning - Sherry J. Yennello, Ph.D.
Assistant Dean for Finance and Administration - Julie B. Allen, B.B.A.

General Statement

Nature, its origins and its evolution, its strengths and its frailties, its order and its perceived disarray, constitutes the realm of study classified as science. Scientists search for interconnecting relationships and traits of order to understand the nature of our universe. Each new discovery provides additional knowledge and frequently enables the solution of previously perplexing questions. Often technology is able to transform scientific discovery into applications which are beneficial to our everyday living. Technology would be impoverished were it not for the new knowledge continually being sought by scientists. At the same time, science could not progress without the advances in instrumentation and techniques generated by technology. Thus, a symbiotic relationship exists between science and technology, a relationship which permeates the courses and programs in the college.

The departments of the College of Science are organized to respond to the needs of students for both general and specialized education in science. The former degree permits heavy emphasis in selected subject matter and closely allied fields, whereas the latter degree is designed for the student who desires a more broadly based education while still specializing in one of the sciences. Additionally, the college offers a Bachelor of Science degree in Applied Mathematical Science.

For this reason, many students select a degree program in science to complete their prerequisite courses for professional study programs. The early admissions option to professional schools of dentistry or medicine in the zoology degree program provides the opportunity for a student to receive a degree in zoology if they are successful in gaining admission to a professional study program in medicine or dentistry prior to completion of a regular four-year degree program. To receive the degree, they must complete all requirements under this program and successfully complete their first year of medical or dental school.

In addition to the Departments of Biology, Chemistry, Mathematics, Physics and Astronomy, and Statistics, the College of Science includes the Cyclotron Institute, a research institute that emphasizes fundamental studies of nuclear science in which both undergraduate and graduate students participate. The College of Science offers MS and PhD programs in various departments.

General Degree Requirements

Degree requirements for science majors are organized into:

1. general requirements, including University Core Curriculum requirements and College of Science requirements;
2. requirements of the major field of study;
3. requirements of the minor field of study for those students completing a BA degree; and
4. electives.

With the exception of physical activity and general elective requirements, courses taken to satisfy degree requirements must be taken for letter grades.

Students are responsible for selecting the courses in their degree plan and assuring they abide by Texas A&M University Student Rules in meeting all degree requirements. Each department has advisors who should be consulted in developing degree programs.

General Requirements

General requirements include those which are required in every degree program at the University. Please refer to these requirements defined in the University Core Curriculum and graduation requirements in foreign language sections of this catalog. Special guidelines should be noted in the following categories:

American History

<table>
<thead>
<tr>
<th>Course</th>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>U.S. history course 1</td>
<td>3</td>
</tr>
<tr>
<td>U.S. history course 1</td>
<td>3</td>
</tr>
<tr>
<td>Total Semester Credit Hours</td>
<td>6</td>
</tr>
</tbody>
</table>

1. Students seeking teacher certification must complete HIST 105 and HIST 106.

Three hours in history may be substituted by successfully completing the required four semesters of upper-level ROTC curriculum.

Government/Political Science

<table>
<thead>
<tr>
<th>Course</th>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>POLS 206 American National Government</td>
<td>3</td>
</tr>
<tr>
<td>POLS 207 State and Local Government</td>
<td>3</td>
</tr>
<tr>
<td>Total Semester Credit Hours</td>
<td>6</td>
</tr>
</tbody>
</table>

Three hours in political science may be substituted by successfully completing the required four semesters of upper-level ROTC curriculum.

International and Cultural Diversity Requirements

The International and Cultural Diversity portion of the Graduation requirements may be fulfilled by 6 hours from the approved list of courses (see the International and Cultural Diversity requirements (p. 38)
 programs. Each departmental advisor has information pertaining to these programs.

### Minor Field of Study

The BA degree requires a minor field of study or an area of emphasis for students pursuing teacher certification. A minor requires 15–18 semester hours in one discipline. Six of these hours must be advanced (300- or 400-level) courses. Students must contact the department offering the minor to determine course requirements. Students pursuing a BS degree may select an optional minor. Contact the department offering the minor to determine course requirements. Students must declare a minor no later than the date on which they apply for graduation.

### Electives

Electives should be chosen to enhance the student’s degree program and/or complete professional school prerequisites if not contained in required courses in the degree plan. Elective courses must be above the minimum level required in other areas of the degree program. For example, MATH 102 is not acceptable because it is below the minimum requirement of calculus. Also, introductory courses to another field of study such as BIMS 101 and AGLS 101 will not count toward degree requirements. Lower-level ROTC courses are not acceptable as electives. Please consult an advisor when selecting electives.

### Curricular Options

#### Honors Program

The College of Science participates in the University Honors Program designed to offer the superior student special opportunities for academic work of a range and depth appropriate to his or her capabilities and greater intellectual interests. For further information, refer to the section regarding the University Honors Program (p. 99).

### Cooperative Education Program

Cooperative education enables students to gain practical work experience and a salary while completing academic requirements. During the four-year academic program, co-op students complete two to four periods of work away from campus, gaining experience through on-the-job training and thus improving their opportunities for future employment. The Cooperative Education Office provides additional information about this program.

### Minor Field of Study

Each department in the College of Science offers a minor. Students interested in pursuing a minor in a field in the College should contact the department offering the minor.

### Summer Internships

A number of programs are available throughout the country which offer summer employment to students interested in specific fields of study and training. Each departmental advisor has information pertaining to these programs.

### Integrated Fast Track Bachelor’s and Master’s Degrees

The Department of Mathematics provides the opportunity for ambitious and talented students to earn a bachelor’s and a master’s degree within a five year period. Eligible students earn graduate credit during their undergraduate study which allows them to complete this option. Interested students should contact the Mathematics Department if interested in this program.

### Preparation for Professional Studies

Students interested in gaining admission to professional study programs in the health professions may do so through any course of study. Prerequisite course requirements may be completed as part of a regular degree program or through electives. Advising for students preparing for health profession careers is available, regardless of major, through the Office of Professional School Advising, 209 Koldus, (979) 847-8938.

### Medicine and Dentistry

Curricula in biology, chemistry, mathematics and physics within the College of Science readily accommodate the required courses needed for admission to professional studies in medicine and dentistry. Admission to medical and dental schools require the following prerequisites:

#### Chemistry

<table>
<thead>
<tr>

Early Admission Program

The College of Science offers two methods of awarding a baccalaureate degree to students who gain admission to professional school prior to completion of their degree. The Baccalaureate Degree Option for Students Granted Early Admission to Medical/Professional Programs is available to all students regardless of their major.

Most students complete a four-year program prior to acceptance to professional school and thus it is advised a degree program leading to a standard baccalaureate degree be selected.

Veterinary Medicine

Please refer to the Admission Requirements—Professional Curriculum listed in the College of Veterinary Medicine and Biomedical Sciences.

Other Allied Health Programs

There are many allied health fields students may prepare for through degree programs in the College of Science. Prerequisite requirements for admission should be completed as part of a degree granting program.

Teacher Certification

The Secondary Teaching Certificate may be obtained in conjunction with a major in the College of Science. Requirements for teacher certification may be found at the aggieTEACH (http://aggieteach.tamu.edu) website.

Curricula in University Studies

The College of Science has four different University Studies degree plans. A University Studies Degree generally consists of a concentration of 21-24 hours and two minors of 15-18 hours each. Some concentrations and minors contain required courses that have additional prerequisites. One of the two minors must be completed in a college outside of the College of Science. The student’s diploma will list Bachelor of Science in University Studies. The student’s area of concentrations and the two minors will be indicated on the student’s transcript.

Interested students must complete the online application and have necessary minor field approvals. The degree plans and applications may be found at www.science.tamu.edu/academics/degrees.php.

Majors

College of Science

- Bachelor of Science in University Studies, Mathematics for Business Concentration (p. 607)
- Bachelor of Science in University Studies, Mathematics for Teaching Concentration (p. 609)
- Bachelor of Science in University Studies, Mathematics for Pre-Professionals Concentration (p. 607)
- Bachelor of Science in University Studies, Science for Secondary Teaching Concentration (p. 608)

Department of Biology

- Bachelor of Arts in Biology (p. 556)
- Bachelor of Science in Biology (p. 557)
- Bachelor of Science in Microbiology (p. 558)
- Bachelor of Science in Molecular and Cell Biology (p. 560)
- Bachelor of Science in Zoology (p. 561)

Department of Chemistry

- Bachelor of Arts in Chemistry (p. 565)
- Bachelor of Arts in Chemistry, Biological Chemistry or Medical, Dental, Pharmacy School Track (p. 567)
- Bachelor of Arts in Chemistry, Chemical Education Track (p. 569)
- Bachelor of Arts in Chemistry, Environmental Chemistry Track (p. 570)
- Bachelor of Science in Chemistry (p. 572)
- Bachelor of Science in Chemistry, Biological Chemistry Track (p. 574)
- Bachelor of Science in Chemistry, Environmental Chemistry Track (p. 576)

Department of Mathematics

- Bachelor of Arts in Mathematics (p. 592)
- Bachelor of Arts in Mathematics and Master of Science in Mathematics, 5-Year Degree Program (p. 594)
- Bachelor of Science in Mathematics (p. 595)
- Bachelor of Science in Mathematics and Master of Science in Mathematics, 5-Year Degree Program (p. 597)
- Bachelor of Science in Applied Mathematical Sciences, Actuarial Emphasis (p. 583)
- Bachelor of Science in Applied Mathematical Sciences, Biological Science Emphasis (p. 584)
- Bachelor of Science in Applied Mathematical Sciences, Computational Emphasis (p. 585)
- Bachelor of Science in Applied Mathematical Sciences, Economics Emphasis (p. 587)
- Bachelor of Science in Applied Mathematical Sciences, Math Emphasis (p. 588)
- Bachelor of Science in Applied Mathematical Sciences, Statistics Emphasis (p. 589)
- Bachelor of Science in Applied Mathematical Sciences and Master of Science in Mathematics, 5-Year Degree Program (p. 591)

Department of Physics and Astronomy

- Bachelor of Arts in Physics (p. 601)
- Bachelor of Science in Physics (p. 602)

Department of Statistics

- Bachelor of Science in Statistics (p. 605)

Minors

Department of Biology

- Biology Minor (p. 562)

Department of Chemistry

- Chemistry Minor (p. 577)

Department Mathematics

- Mathematics Minor (p. 598)

Department of Physics

- Astrophysics Minor (p. 603)
Department of Physics and Astronomy
- Statistics Minor (p. 606)

Masters

Department of Biology
- Master of Science in Biology (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/science/biology/ms)

Department of Biology

No one really knows what the world will be like 50 years from now, but it is certain that biologists will be at the forefront of science attempting to find solutions to many of the world’s problems and to find answers to intriguing questions about animals, plants and microbes at the molecular, cellular, organismal and ecosystem levels. Biologists will be concerned with pollution of the environment, cause and cure of disease, population control, recurring food shortages, preservation of species and many other aspects resulting from the impact of technological changes on life forms. Those who are astounded by the array of living things on the earth and who seek challenging, creative work should consider a career in biology or in a biology-related field. The Department of Biology offers five distinct four-year curricula which lead to the baccalaureate degree. These are the Bachelor of Arts in Biology, Bachelor of Science in Biology, Bachelor of Science in Molecular and Cell Biology, Bachelor of Science in Microbiology and Bachelor of Science in Zoology. The curricula are designed to maximize postbaccalaureate opportunities in:

1. professional schools of medicine, veterinary medicine and dentistry;
2. allied health schools of physical and occupational therapy, physician assistant programs, optometry, pharmacy, and nursing;
3. graduate education leading to teaching and research careers in universities, in industry or in state or national agencies;
4. teaching at junior high or high school levels and
5. jobs in biotechnology, research laboratories, pharmaceutical companies and field biology.

The Department of Biology degree plans will enable students to complete all entrance requirements for graduate and professional schools as well as medical technology, pharmacy, optometry, nursing, physical therapy, and other paramedical and health support fields.

Advising

Because some careers in biology require advanced and/or specialized training, it is essential to take advantage of advising opportunities. In the Department of Biology, there are professional advisors in the Biology Undergraduate Programs Office. The advisor may be consulted prior to each registration period and as the student needs. Questions regarding registration, degree checks, transfer of courses, advanced placements and other academic matters are handled in the Office of Undergraduate Programs. Students with special interests in graduate study should consult the graduate advisor. Information concerning entrance to professional schools of medicine, dentistry and other health related fields is available from the Office of Professional School Advising.

Requirements for All Baccalaureate Degrees in the Department of Biology

Each student seeking a baccalaureate degree in the Department of Biology is required to master a common body of knowledge in science. In addition, the student must take courses essential to a liberal education. Students will note that the first two years of all curricula offered by the Department of Biology are similar. Electives must include the 6 hours of international and cultural diversity courses required for graduation. Students must also take at least two writing-intensive courses in biology.
Other requirements for graduation are listed in the Texas A&M University Student Rules and this catalog.

Students in the Department of Biology must make a grade of C or better in BIOL 111 and BIOL 112. Additionally, students may have only one D in courses within the major used to satisfy required or directed electives for a given degree plan. It is required that the freshman and sophomore level biology, chemistry and math courses be completed before the start of the 5th full semester and before enrollment in any junior or senior level science.

**Common Body of Knowledge**

To assure that students have sufficient prerequisite training for advanced courses, Biology majors must complete a series of courses comprising a Common Body of Knowledge (CBK) prior to their junior year (5th full semester) and enrollment in upper level BIOL courses. A Biology student will be admitted into upper level Biology classes when he or she has met the following criteria:

Completion of a set of CBK courses (38 hours) before the student's 5th full semester to include:

<table>

- MATH 147 Calculus I for Biological Sciences
- & MATH 14:and Calculus II for Biological Sciences
- MATH 151 Engineering Mathematics I
- & MATH 15:and Engineering Mathematics II
- MATH 171 Analytic Geometry and Calculus
- & MATH 17:and Calculus

Total Semester Credit Hours 38

A grade of C or better must be earned.

A student must be in good academic standing with an overall grade point average of a 2.0 or better overall and in the major.

**Process**

Students will be audited by the department to monitor progress of completion of the CBK. Students failing to complete the CBK within the first four full semesters at Texas A&M University may be blocked and forced to change majors or be required to meet with an academic advisor to see if they can be successful in the major. Students registering for upper-level Biology classes without completing the CBK, or without approval of the Undergraduate Advising Office, will be dropped from the roster.

**Transfer Students**

1. Transfer from within Texas A&M University: The Biology Department will accept changes of major from other departments at Texas A&M upon completion of AT LEAST one semester of an applicable BIOL course taken at Texas A&M and AT LEAST one semester of an applicable CHEM course taken at Texas A&M, with a minimum 2.5 grade point average overall for courses taken at Texas A&M, a 2.5 grade point average in BIOL courses taken at Texas A&M, and a 2.5 or better grade point average in CHEM courses taken at Texas A&M. Students still must complete the CBK before being admitted to upper level BIOL courses.

2. Transfer students from other institutions to Biology must have completed the following:
   a. A minimum of 24 accredited college hours
   b. Sixteen hours of prescribed coursework:
      i. Eight hours of General Biology (TAMU BIOL 111 and BIOL 112 or Texas Common Course Numbers BIOL 1406 and 1407) with B's or better, and
      ii. Eight hours of General Chemistry (TAMU CHEM 101/102 or Texas Common Course Numbers CHEM 1411 and CHEM 1412) with B's or better, and
      iii. Eight hours of Calculus (TAMU MATH 147/MATH 148 or MATH 151/MATH 152 or MATH 171/MATH 172 or Texas Common Courses Numbers MATH 2413 and MATH 2414) with C's or better
   c. A minimum cumulative grade point average of a 3.0
   d. A minimum Biology and Chemistry grade point average of a 3.0

**Biology Honors Program**

The Biology Department Honors Program is open to highly talented and motivated students pursuing a major in any of our degree plans. Honors students will be part of a vibrant community within the department with enriched learning experiences in both the classroom and biology research laboratories.

**Honors Requirements:** Students wishing to graduate with honors distinctions in either Biology (BIOL), Microbiology (MICR), Zoology (Zool), or Molecular and Cellular Biology (BMCCB) must earn 21 credits in Honors courses and meet the following minimum honors requirements in addition to those listed in the degree plan:

- 4 credits BIOL 111H or BIOL 112H*
- 3 credits BIOL 213H or BIOL 214H
- 3 credits at 300/400 BIOL honors or honors contract; any 600 BIOL; not to include BIOL 485H, BIOL 491H, or BIOL 495H
- 6 credits BIOL 491H
- 2 credits BIOL 495H
- 3 credits any honors course outside the College of Science

* This requirement may be waived with a score of 5 on the Biology AP exam, a score of 6 on the IB exam, or by taking an additional honors biology course at the 300 or 400 level.

**Grade requirements at time of graduation:**

- cumulative Texas A&M University GPR of 3.5 or higher
- cumulative honors GPR of 3.25 or higher
• no grade lower than a B in courses counting toward honors. If a student earns less than a B in an honors course, they will still receive University credit. However, they will need to take a different course to fulfill the honors requirement.
• no F*, given in cases of academic dishonesty, on the transcript

Honors recognition: All honors courses will be denoted as honors on students' official transcripts. Furthermore, students completing the honors program will have the departmental honors distinction, as well as, any earned university or college distinction noted on the official transcript.

Admission to the Honors Program in Biology

Incoming Freshmen: Incoming freshmen should indicate their interest in the departmental honors program through the ApplyTexas site and choosing the "Apply to any Honors Program" after August 1. To be admitted, students should have a SAT score of 1250 or above (verbal + math and minimum of 600 on both sections) or a composite score of 28 or above on the ACT (minimum 27 on both verbal and math sections).

Students who have already completed their application and now wish to apply to the Biology Honors program can use the "Apply to any Honors Program" link at the Texas A&M Honors program site (http://honorsprograms.tamu.edu/Home).

Current or transfer students: Current or transfer students with a cumulative GPR of 3.5 or better can apply for admissions to the Biology Honors Program by writing a short (less than 300 word) memo requesting admittance to the departments honors director. When applying, students should keep in mind that they will need to fulfill all honors requirements.

Please send memos to: biohonors@bio.tamu.edu.

Remaining in the program

In order to remain in the Biology Honors program, students must maintain a cumulative GPR at Texas A&M of 3.5 and honors GPR of 3.25. Students falling below these standards will be placed on probation for the next semester. Students unable to meet these standards for a second semester may be dismissed from the Biology Honors Program.

Contact us

Please direct any questions to biohonors@bio.tamu.edu or the biology advising office.

Human Biology Track

This unofficial track is for students requiring a more rigorous and in-depth foundation in biological courses that apply to marine environments and ecosystems. This suggested degree plan is ideal for students who intend to pursue graduate studies in marine biology or serve as field biologists at national seashores or sanctuaries. A minimum of 20 hours is required to fulfill this requirement, to be chosen from the following:

Social and Behavioral Science

<table>

Total Semester Credit Hours 65

Students should consult their academic advisor about the courses that best fit their career interests.

Education Track

This unofficial track is for students wishing to acquire state certification to teach at the secondary level upon graduation. Students should seek advice from the advisors within their department and from the College of Education and Human Development, as well as from the advisor in charge of their teaching option. The intention is to make the best possible use of social science, humanity, free and directed electives in the Bachelor of Arts in Biology, thereby condensing as many of the certification requirements as possible into the degree plan. Courses should include:

Social and Behavioral Science

<table>

Marine Biology Track

This unofficial track is for students requiring a more rigorous and in-depth foundation in biological courses that apply to marine environments and ecosystems. This suggested degree plan is ideal for students who intend to pursue graduate studies in marine biology or serve as field biologists at national seashores or sanctuaries. A minimum of 20 hours is required to fulfill this requirement, to be chosen from the following:
Biology Electives

BIOL 335  Invertebrate Zoology  4
BIOL 440  Marine Biology  4

Related ZOOL research or field experience (p. 942)  3

Free Electives

OCNG 251  Oceanography  3
or OCNG 401  or Interdisciplinary Oceanography  3
or OCNG 420  or Biological Oceanography  3
WFSC 311  Ichthyology  3
WFSC 425  Marine Fisheries  3

Total Semester Credit Hours  20

Students should consult their academic advisor about the courses that best fit their career interests.

Ecology/Environmental Track

This unofficial track is particularly designed for students interested in environmental consulting, environmental protection and ecosystem evaluation. This suggested degree plan can be adapted to focus on particular areas or populations within an ecosystem. A minimum of 18 hours is required to fulfill this requirement, to be chosen from the following:

Communication

ENGL 210  Technical and Business Writing  3

Biology Electives

Select one of the following:  3-4
BIOL 335  Invertebrate Zoology
BIOL 357  Ecology
BIOL 358  Ecology Laboratory
BIOL 400  Tropical Ecology Costa Rica
BIOL 440  Marine Biology
BIOL 462/ WFSC 462  Amazon River Tropical Biology
WFSC 311  Ichthyology

Free Electives

CHEM 315  Quantitative Analysis  4
& CHEM 318  and Quantitative Analysis Laboratory
ENTO 201  General Entomology  3
MEPS 313  Introduction to Plant Physiology  3

Select one of the following:  3-4
PLPA 301  Plant Pathology
& PLPA 303 and Plant Pathology Laboratory
WFSC 311  Ichthyology
WFSC 401  General Mammalogy
WFSC 402  General Ornithology

Total Semester Credit Hours  20-21

Students should consult their academic advisor about the courses that best fit their career interests.

Quantitative Biology Track

This unofficial track is for students interested in applying quantitative approaches, including mathematical, statistical, and computational techniques, to fundamental problems in biology. Because courses for this track are still being developed in conjunction with the Departments of Mathematics and Statistics, students should check with their advisor for new quantitative biology courses:

Mathematics

MATH 171  Analytic Geometry and Calculus  4
MATH 172  Calculus  4

Electives

BIOL 289  Special Topics in...  1-4
MATH 308  Differential Equations  3

Total Semester Credit Hours  12-15

Liberal Education Requirements of the University, College or State

American history elective (p. 24)  6
Communication elective (p. 21)  6
Language, philosophy and culture elective (p. 22)  3
Government/Political science elective (p. 24)  6
Social and behavioral sciences elective (p. 24)  3
Creative arts elective (p. 23)  3
International and cultural diversity elective (p. 38)  0-6

Total Semester Credit Hours  27-33

Biology - BA

The BA degree in Biology, through the availability of a large number of electives, gives students maximum flexibility in earning a biology degree. The 15-18 hour minor requirement, including 6 hours of advanced courses in a discipline other than biology, provides students with the opportunity to include significant coursework in areas such as foreign language, business, education, or social sciences. The BA program is recommended for students with broad educational objectives or who intend to pursue further education in areas such as allied health professions, professional schools, or teaching certification.

**Total Semester Credit Hours:** 58
1 Students seeking teacher certification must take HIST 105 and HIST 106. Other students may choose HIST 105 and HIST 106 or any 6 hours of American history courses (3 hours may be in Texas history).

2 Students successfully completing the required four semesters of upper-level ROTC courses may substitute these courses for 3 hours of American history and 3 hours of government/political science.

The following are CBK courses and must be completed prior to the start of 5th full semester: BIOL 111, BIOL 112, BIOL 213, BIOL 214, CHEM 101 & CHEM 111, CHEM 102 & CHEM 112, CHEM 227 & CHEM 237, CHEM 228 & CHEM 238, MATH 147, MATH 148.

### Total Program Hours 120

#### Biology - BS

The BS degree in Biology is designed for students to obtain a comprehensive, solid foundation in the major branches of Biology. The degree provides the opportunity for extensive study across the breadth of biological disciplines, ranging from molecular and cellular biology to ecology and evolution. This degree plan is recommended for students preparing for graduate programs in biological sciences or any professional programs in health and medical sciences such as medical, dental or veterinary schools.

---

1 Students seeking teacher certification must take HIST 105 and HIST 106. Other students may choose HIST 105 and HIST 106 or any 6 hours of American history courses (3 hours may be in Texas history).

2 Students successfully completing the required four semesters of upper-level ROTC courses may substitute these courses for 3 hours of American history and 3 hours of government/political science.

3 Students successfully completing the required four semesters of upper-level ROTC courses may substitute these courses for 3 hours of American history and 3 hours of government/political science.

4 Courses that cannot be used as free electives are: one hour introductory classes (BIIMS 101, AGLS 101, etc.); MATH 102, BIOL 101, BIOL 107, BIOL 206; Corps-required courses (MILS, NVSC, AERS); CHEM 106/CHEM 116.

5 Two courses in the major must be designated as writing intensive.
Through the required four semesters of American history and 3 hours of government/political science.

The following are CBK courses and must be completed prior to the start of 5th full semester: BIOL 111, BIOL 112, BIOL 213, BIOL 214, CHEM 101 & CHEM 111, CHEM 102 & CHEM 112, CHEM 227 & CHEM 237, CHEM 228 & CHEM 238, MATH 147, MATH 148.

### Microbiology - BS

The degree program in Microbiology is designed to provide a comprehensive education in the biology of microorganisms. A graduate of this program will have a thorough grounding in the classical areas of microbial physiology and biochemistry, microbial genetics, and developing areas like the molecular biology of microorganisms. The curriculum provides excellent training toward a career in any one of many areas of industrial microbiology and public health services. It is also an ideal preparation for advanced study or professional school in medicine, dentistry and other related fields, especially medical technology and biotechnology.

### Notes

1 Students seeking teacher certification must take HIST 105 and HIST 106. Other students may choose HIST 105 and HIST 106 or any 8 hours of American history courses (3 hours may be in Texas history).

2 Students successfully completing the required four semesters of upper-level ROTC courses may substitute these courses for 3 hours of American history and 3 hours of government/political science.

3 Courses that cannot be used as free electives are: one hour introductory classes (BIMS 101, AGLS 101, etc.); MATH 102, BIOL 101, BIOL 107, BIOL 206; Corps-required courses (MILS, NVSC, AERS); CHEM 106/CHEM 116.

4 Students successfully completing the required four semesters of upper-level ROTC courses may substitute these courses for 3 hours of American history and 3 hours of government/political science.

5 Two courses in the major must be designated as writing intensive.
The following are CBK courses and must be completed prior to the start of
Fall, Spring, and Summer.

Molecular Microbiology
Molecular and Cell Biology - BS

Students who select Molecular and Cell Biology as their major will receive a strong background in the cellular and molecular aspects of biology with particular emphasis on eukaryotes. The major provides an excellent foundation for a career in biotechnology, genetic engineering, MD/PhD programs or basic biological research.

Zoology - BS

The Zoology degree program is designed to expose students to all aspects of the study of animals. Following foundation courses on the principles of vertebrate and invertebrate zoology, students may select from a broad range of classes in animal biology, ranging from cellular and developmental biology, physiology, and anatomy to ecology and evolution. Graduates enter into advanced studies in zoology, specialized zoological fields in agriculture and renewable resources, or such professional fields as medicine, veterinary medicine, dentistry and other health-related areas.

**Courses that cannot be used as free electives are:**

- one hour introductory classes (BIMS 101, AGLS 101, etc.); MATH 102; BIOL 101, BIOL 107, BIOL 113, BIOL 206; Corps-required courses (MILS, NVSC, AERS); CHEM 106/CHEM 116.

- Two courses in the major must be designated as writing intensive.

- Students successfully completing the required four semesters of upper-level ROTC courses may substitute these courses for 3 hours of American history and 3 hours of government/political science.

In order to qualify for the secondary provisional teaching certificate, see requirements listed in the College of Education and Human Development section under secondary certification.
Department of Chemistry

An understanding of chemistry is critical to an understanding of life and its associated activities. Chemistry and chemical principles profoundly influence the way we live, communicate and interact with one another so it is little wonder that a strong background in chemistry provides a solid foundation for a variety of careers of major importance in the twenty-first century. Chemistry is uniquely positioned at the crossroad between the biological and physical sciences. By exploiting their understanding of both realms, chemists and other professionals with strong backgrounds in chemistry have made, and continue to make, major contributions to improve the human condition. Major technological and biological discoveries almost always depend on a fundamental understanding of chemistry and the pursuit of these discoveries, as a way to improve the world in which we live, drives those who seek to be a part of the process.

The Department of Chemistry offers coursework and research in all the major areas of chemistry, organized into programs leading to the degrees of Bachelor of Arts and Bachelor of Science. Both degree programs are suitable as terminal degree programs as well as for preparation for more advanced study in chemistry and related areas or as preparation for many professional programs in a variety of career fields. The BS program is more rigorous with respect to required mathematics, physics and chemistry courses. It is particularly appropriate for those students who plan a career in the chemical industry or who intend to pursue advanced degrees in chemistry, biochemistry, chemical physics or forensics. An attractive number of free electives in this degree program allows students to take courses in interdisciplinary focus areas. The BA program offers the greatest degree of flexibility for students who see chemistry as a springboard into a related career field such as medicine, pharmacy, law, science writing, teaching or business for example. Chemistry majors are counseled by PhD chemistry faculty advisors fully familiar with the many options available in the chemistry and other departments, so as to optimize each student’s program of study to meet individual needs. The Department of Chemistry (http://chem.tamu.edu) website provides additional information about the degree plans, advising, and career opportunities for chemistry majors.

Although students may choose a variety of electives and/or minors in either the BA or BS degree programs, the following chemistry tracks have been developed to guide students in choosing electives.

Chemistry Tracks

In addition to the traditional BS degree (which allows for optional minors) and the traditional BA degree (minor required), the Department of Chemistry offers five tracks to guide students in their selection of electives for particular career paths in biological chemistry, environmental chemistry, chemical education, medicine, dentistry and pharmacy. A traditional minor requires that all minor courses must be taken from the same department and approved by the department granting the minor. These tracks provide the student an opportunity to replace a traditional minor with a broad spectrum of elective courses focused, not in a single department, but in an area of emphasis. A list of the recommended elective courses for each track may be obtained from the Office of the Undergraduate Advisor in Room 104 Chemistry Building or from the Department of Chemistry (http://chem.tamu.edu) website.

Cooperative Education Program in Chemistry

Under suitable circumstances, chemistry majors may participate in a cooperative education program in which the student alternates periods of attendance at the University with periods of employment in industry. This year-round cooperative program of college study and industrial experience is educationally enriching and meaningful, and also has the benefit of providing substantial financial assistance to the student without unduly prolonging the completion of the BS or BA degree program.

Faculty

Banerjee, Sarbajit, Professor Chemistry
PHD, State University of New York at Stony Brook, 2004

Barondeau, David, Associate Professor Chemistry
PHD, Texas A&M University, 1996

Batteas, James, Professor Chemistry

Gabbai, Francois, Professor  
Chemistry  
PHD, Technische Universitat Munchen, Germany, 1999

Gaede, Holly, Instructional Assistant Professor  
Chemistry  
PHD, University of California, Berkeley, 1995

Gladysz, John, Distinguished Professor  
Chemistry  
PHD, Stanford University, 1974

Goodey, Joanna, Senior Lecturer  
Chemistry  
PHD, University of Houston, 2001

Gopalakrishnan, Ganesa, Senior Lecturer  
Chemistry  
PHD, University of Madras, India, 1977

Hall, Michael, Professor  
Chemistry  
PHD, University of Wisconsin - Madison, 1971

Harding, Kenn, Professor  
Chemistry  
PHD, Stanford University, 1968

Hilty, Christian, Associate Professor  
Chemistry  
PHD, Swiss Federal Institute of Technology Zurich, 2004

Hughbanks, Timothy, Professor  
Chemistry  
PHD, Cornell University, 1983

Jiang, Lin, Lecturer  
Chemistry  
PHD, Miami University, 2013

Keeney-Kennicutt, Wendy, Emerita Instructional Assistant Professor  
Chemistry  
PHD, Texas A&M University, 1982

Laane, Jaan, Professor  
Chemistry  
PHD, Massachusetts Institute of Technology, 1967

Lim, Soon, Lecturer  
Chemistry  
PHD, Texas A&M University, 2006

Lindahl, Paul, Professor  
Chemistry  
PHD, Massachusetts Institute of Technology, 1985

Liu, Wenshe, Associate Professor  
Chemistry  
PHD, University of California, Davis, 2005

Lucchese, Robert, Professor  
Chemistry  
PHD, California Institute of Technology, 1982

MacFarlane, Ronald, Distinguished Professor  
Chemistry  
PHD, Carnegie Institute of Technology, 1959

Maw, Elmo, Senior Lecturer  
Chemistry  
PHD, Texas A&M University, 1999

McCartney, Stephanie, Lecturer  
Chemistry  
PHD, George Washington University, 2009

Mullen, Christine, Senior Lecturer  
Chemistry  
PHD, University of California, San Diego, 2000

Nippe, Michael, Assistant Professor  
Chemistry  
PHD, University of Pittsburgh, 1965

Ozerov, Oleg, Professor  
Chemistry  
PHD, University of Kentucky, 2000

Ponnampерuma, Krishan, Senior Lecturer  
Chemistry  
PHD, University of Cambridge, UK, 1992

Powers, David, Assistant Professor  
Chemistry  
PHD, Harvard University, 2011

Powers, Tamara, Lecturer  
Chemistry  
PHD, Harvard, 2013
Majors

- Bachelor of Arts in Chemistry (p. 565)
- Bachelor of Arts in Chemistry, Biological Chemistry or Medical, Dental, Pharmacy School Track (p. 567)
- Bachelor of Arts in Chemistry, Chemical Education Track (p. 569)
- Bachelor of Arts in Chemistry, Environmental Chemistry Track (p. 570)
- Bachelor of Science in Chemistry (p. 572)
- Bachelor of Science in Chemistry, Biological Chemistry Track (p. 574)
- Bachelor of Science in Chemistry, Environmental Chemistry Track (p. 576)

Minors

- Minor in Chemistry (p. 577)

Chemistry - BA

The Bachelor of Arts program, through the availability of a generous number of electives, gives the student a firm and broadly based foundation in chemistry, with the option of pursuing other educational objectives involving specialization in at least one other field in depth. This objective is accomplished by means of the BA program flexibility and by the inclusion of a minor area of study in another discipline or completion of a track as outlined above. Additional elective hours allow further diversification.

The BA degree offers somewhat more flexibility than the BS program, in terms of tailoring a program of study that combines chemistry with an interest in subject areas such as biochemistry, biology, business, computer science, education, forensics, medicine or physics. Although the BA program may in any specific case turn out to be a somewhat less technical curriculum, it meets the needs of many students who plan to use chemistry as a springboard to a career in chemical sales, marketing, law, technical writing, teaching at a pre-college level, science journalism, etc., to name only a few possibilities.

A BA degree in Chemistry coupled with a minor in Biology, or completion of a biological chemistry track, is excellent preparation for a variety of careers in the health-related disciplines. In particular, a BA degree in Chemistry is excellent and proven preparation for medical and dental schools, and affords the superior student the opportunity to maintain flexibility for a broad spectrum of medical or dental careers.

Although not required for the BA program, abundant research opportunities are available to students. The BA program also permits and encourages non-technical elective courses.

Chemistry - BA, Biological Chemistry or Medical, Dental, Pharmacy School Track

Many students planning to enter medical, dental, or pharmacy school prefer a bachelor of arts degree that contains a large number of elective courses which may be used to satisfy pre-professional school requirements. With that in mind, this track recommends an effective way to use some of the available free electives in the BA chemistry program to satisfy the pre-professional requirements for these programs. Courses in anatomy, biochemistry, biology, genetics, and microbiology are recommended. Additional free electives, of which there will be many, may be used to strengthen the student’s program of study in a manner decided by the student and the academic advisor.

Chemistry - BA, Chemical Education Track

The chemical education track provides the student an opportunity to obtain secondary teacher certification in addition to completion of the requirements for a degree in chemistry. Many students who plan to become high school chemistry teachers or to pursue a master’s degree in chemical education will find this track attractive. Students must complete the requirements for secondary teacher certification as defined by the College of Education and Human Development (consultation with the College of Education and Human Development is required).

Program Requirements

First Year

Spring

Select one of the following:

- CHEM 102 Fundamentals of Chemistry II
- & CHEM 112 and Fundamentals of Chemistry Laboratory II

Select one of the following:

- CHEM 104 Chemistry of the Elements
- & CHEM 114 and Qualitative Analysis

HIST 106 History of the United States

MATH 152 or Engineering Mathematics II or Calculus

Language, philosophy and culture (p. 22)

Total Semester Credit Hours: 14

Fall

CHEM 100 Horizons in Chemistry

**Chemistry - BA, Environmental Chemistry Track**

This environmental chemistry track contains a very large number of elective courses and provides even greater opportunity for students to select electives which provide for a career focus in environmental
chemistry. The large number of electives makes it possible for students to combine interests in environmental issues with other interests such as business, law, and politics. Electives may be chosen from recommended courses in atmospheric sciences, bioenvironmental science, biology, geography, geology, geosciences, microbiology and oceanography.

**Total Semester Credit Hours:** 120

---

1. Select a section designated for chemistry majors.
2. Students may substitute any 6 hours of American history courses approved by the University Core Curriculum to fulfill this requirement, but no more than 3 hours may be in Texas history. Students seeking teacher certification must take HIST 105 and HIST 106.
3. These electives must include 12 hours which meet the language, philosophy and culture (3 hours), creative arts (3 hours), social and behavioral science (3 hours) and communication (3 hours) requirements of the University Core Curriculum. (See page 17). In addition, 6 hours of courses must be in the area of international and cultural diversity. These may be in addition to the previous 12 hours of University Core Curriculum courses, or if a course in this category satisfies an area of the Core, it can be used to meet both requirements. Additional elective hours must be used to complete a required minor approved by the granting department or students must satisfy the requirements of one of the approved chemistry track programs. BA chemistry majors may take CHEM 485 or CHEM 491 as elective courses. The total hours of CHEM 485 and CHEM 491 taken on a graded (A-F) basis may not exceed 9. Additional hours of these courses may be taken on an S/U basis. A maximum of 6 hours of these courses may be included on the degree plan. Electives should be chosen in consultation with the chemistry advisor, and should be selected to meet the residency requirement (36 hours at 300-400-level must be taken at TAMU). Electives recommended in the various track programs should be strongly considered.
4. This is a designated C- or W-course.

---

**Chemistry - BS**

The BS program in Chemistry is arranged so that a student obtains a comprehensive, solid foundation in all of the major branches of chemistry, combined with a suitable measure of individual flexibility. The latter objective is met in part by a strong emphasis on involving the undergraduate BS chemistry major in exciting, innovative, state-of-the-art research programs. Most students in the BS program become involved in research during their junior year and continue this until graduation. Students frequently receive research scholarships and fellowships, which include opportunities for summer research programs. It is not uncommon...
for an undergraduate chemistry major to be a coauthor of scientific publications in major research journals before graduation.

Undergraduate chemistry research activities involve substantial use of modern scientific equipment, including major instrumentation. The student involved in this activity also gains considerable insight into the profession by means of substantial individual contact with chemistry department faculty.

The BS degree in Chemistry is the appropriate program for students planning advanced degree programs in chemistry, biochemistry, forensics, chemical physics and other fields. Students planning careers in chemical industry should also choose the BS degree in Chemistry. Students may wish to choose electives suggested in the biological or environmental chemistry tracks. This degree program satisfies fully the accreditation requirements of the American Chemical Society.

### Program Requirements

#### First Year

These electives must include 12 hours of courses which meet the language, philosophy and culture (3 hours), creative arts (3 hours), social and behavioral science (3 hours) and communication (3 hours) requirements of the University Core Curriculum (p. 20). In addition, 6 hours of courses must be in the area of International and Cultural Diversity (p. 38). These may be in addition to the previous 12 hours of University Core Curriculum (p. 20) courses, or if a course in this category satisfies an area of the Core, it can be used to meet both requirements. Electives should be chosen in consultation with the chemistry advisor. Electives should be chosen in consultation with the chemistry advisor and should be selected to meet the residency requirement (36 hours at 300-400 level must be taken at TAMU). Electives recommended in the various track programs should be strongly considered.

The total hours of CHEM 485 and CHEM 491 taken by BS chemistry majors on a graded (A–F) basis may not exceed 15. Additional hours of these courses may be taken on a satisfactory/unsatisfactory basis.

Students wishing to complete an American Chemical Society certified degree program must take at least one semester of biochemistry (i.e., BICH 410 or BICH 440).

### Program Requirements

#### Chemistry - BS, Biological-Chemistry Track

The biological chemistry track has been designed for students interested in pursuing graduate study in biological chemistry, biochemistry, pharmacology or related fields or a career in the pharmaceutical industry. Students who wish to enter an MD/PhD program or medical, dental or pharmacy school will, in most cases, need to take an additional advanced biology course beyond those recommended for this track and should check the admission requirements for these programs with the Office of Professional School Advising. Courses in biology, biochemistry, genetics and statistics are recommended as electives.

Electives recommended in the various track programs should be strongly considered.
5 The total hours of CHEM 485 and CHEM 491 taken by BS chemistry majors on a graded (A–F) basis may not exceed 15. Additional hours of these courses may be taken on a satisfactory/unsatisfactory basis.
Chemistry - BS, Environmental Chemistry Track

Chemistry plays a major role in most environmental issues and this track recommends electives in a broad spectrum of courses designed to prepare students to address environmental problems from a variety of perspectives. Electives may be chosen from recommended courses in atmospheric sciences, bioenvironmental science, biology, geography, geology, microbiology and oceanography.

### Chemistry - Minor

Students seeking a minor in chemistry must complete the Declaration of Minor in Chemistry form (http://www.chem.tamu.edu/academics/undergraduate/minor.pdf) and have it approved by the undergraduate advisor in chemistry (Room 104 Chemistry) and their academic advisor.

A minor in Chemistry should represent course work taken in the discipline beyond courses that might be used to satisfy core curriculum science requirements (8 credits). Therefore, though CHEM 101/CHEM 111 or CHEM 107 and CHEM 102/CHEM 112 are prerequisites to all of the listed courses, they are not considered part of the minor program. The course work listed (17-20 credits) represents various sub-disciplines within the field of Chemistry and would give the student an overall knowledge base fitting a Minor in Chemistry. This is consistent with the statement on minors published by the American Chemical Society.

### Program Requirements

The student will choose FIVE lecture courses (14-15 credits) and THREE laboratory courses (3-5 credits) from categories A.-E. below. The student must take at least one course from FOUR of the FIVE categories. Students must have a C average in all courses taken for a minor in Chemistry. CHEM 491 and CHEM 485 credits will not be allowed to count for the minor nor used in the Chemistry GPA calculation. Substitution of courses without the CHEM prefix will not be allowed.

</table>

1. Select a section designated for chemistry majors.
2. Students may substitute any 6 hours of American history courses approved by the University Core Curriculum (p. 20) to fulfill this requirement, but no more than 3 hours may be in Texas history. Students seeking teacher certification must take HIST 105 and HIST 106.
3. This is a designated C- pr W-course.
4. These electives must include 12 hours of courses which meet the language, philosophy and culture (3 hours), creative arts (3 hours), social and behavioral science (3 hours) and communication (3 hours) requirements of the University Core Curriculum (p. 20). (See page 17). In addition, 6 hours of courses must be in the area of International and Cultural Diversity (p. 38). These may be in addition to the previous 12 hours of University Core Curriculum (p. 20) courses, or if a course in this category satisfies an area of the Core, it can be used to meet both requirements. Electives should be chosen in consultation with the chemistry advisor. Electives should be chosen in consultation with the chemistry advisor and should be selected to meet the residency requirement (36 hours at 300-400 level must be taken at TAMU). Electives recommended in the various track programs should be strongly considered.
5. The total hours of CHEM 485 and CHEM 491 taken by BS chemistry majors on a graded (A–F) basis may not exceed 15. Additional hours of these courses may be taken on a satisfactory/unsatisfactory basis.
6. Students wishing to complete an American Chemical Society certified degree program must take at least one semester of biochemistry (i.e., BICH 410 or BICH 440).
NOTE: Students following the Fall 2008 catalog or earlier should follow the pre Catalog 132 requirements (http://www.chem.tamu.edu/academics/undergraduate/minors_pre132.php).

A. Organic Chemistry
CHEM 227 Organic Chemistry I 3
CHEM 237 Organic Chemistry Laboratory 1
CHEM 228 Organic Chemistry II 3
CHEM 238 Organic Chemistry Laboratory 1

B. Analytical Chemistry
CHEM 315 Quantitative Analysis 1 3
CHEM 316 Quantitative Analysis 1 2
CHEM 317 Quantitative Analysis 2
CHEM 318 Quantitative Analysis Laboratory 1
CHEM 320 Instrumental Analysis Laboratory 2

C. Physical Chemistry
CHEM 322 Physical Chemistry for Engineers 2 3
CHEM 325 Physical Chemistry Laboratory I 1
CHEM 326 Physical Chemistry Laboratory II 1
CHEM 327 Physical Chemistry I 2 3
CHEM 328 Physical Chemistry II 3

D. Inorganic Chemistry
CHEM 362 Descriptive Inorganic Chemistry 3
CHEM 383 Chemistry of Environmental Pollution 3

E. Advanced Chemistry
CHEM 415 Analytical Chemistry 3
CHEM 433 Advanced Inorganic Chemistry Laboratory 2
CHEM 434 Analytical Instrumentation Laboratory 2
CHEM 446 Organic Chemistry III 3
CHEM 456 Chemical Biology 3
CHEM 462 Inorganic Chemistry 3
CHEM 464 Nuclear Chemistry 3
CHEM 466 Polymer Chemistry 3
CHEM 470 Industrial Chemistry 3
CHEM 483 Green Chemistry 3
CHEM 489 Special Topics in... 1-4

1 Students may not count both CHEM 315 and CHEM 316
2 Students may not count both CHEM 322 and CHEM 327

Department of Mathematics

The Department of Mathematics offers curricula which lead to the following undergraduate degrees: Bachelor of Science in Applied Mathematical Sciences, Bachelor of Arts in Mathematics and Bachelor of Science in Mathematics. An Integrated Fast Track combined baccalaureate/graduate degree program is also offered.

The curriculum for the BS in Applied Mathematical Sciences includes courses in economics, industrial engineering, statistics, computer science and mathematics. A student completing this program is prepared to enter employment with analytical and quantitative tools relevant to modern technological industries and/or modern financial markets. On the other hand, with the appropriate electives chosen, the student is prepared to enter quantitatively oriented graduate programs. Advising for this degree option is done through the Undergraduate Program Office in the Department of Mathematics.

With carefully chosen electives in education, any one of the above three degree plans can lead to teacher certification. Students interested in teacher certification may find the BA degree plan the most suitable since this degree plan offers the greatest flexibility for the inclusion of teacher certification courses.

Applied Mathematical Sciences - BS, Actuarial Emphasis

Many advances in technology and business are achieved by people applying technical knowledge from statistics, computing science, finance, economics and mathematics. The curriculum in applied mathematical sciences provides study in all of these areas, with ample electives available to allow further in-depth study of any of these areas. In fact, there are six emphases in this curriculum: Applied Mathematics, Statistics, Actuarial Science, Economics, Biological Science and Scientific Computing. The Actuarial Science emphasis includes mathematical finance.

A student completing this program is prepared to enter employment with analytical and quantitative tools relevant to technological industries and/or modern financial markets. On the other hand, with the appropriate electives chosen, the student is prepared to enter quantitatively oriented graduate schools. All advising for this degree option is done through the Undergraduate Program Office in the Department of Mathematics.

Elective 4

Term Semester Credit Hours 14

Fourth Year

Fall
Select six hours from the following:
MATH 407-MATH 499 (p. 842)
STAT 407-STAT 415 (p. 919)
CSCE 210-CSCE 499 (p. 728) 5
ISEN 420-ISEN 421 (p. 809)
Select nine hours from the following:
ECON 311-ECON 489 (p. 746)
FINC 309-FINC 489 (p. 771)
ECMT 463 Introduction to Econometrics

Term Semester Credit Hours 15

Spring
MATH 409 Advanced Calculus I 3
POLS 207 State and Local Government 3
PHYS 218 Mechanics 4
Creative arts (p. 23) 3

Term Semester Credit Hours 13

Total Semester Credit Hours: 120

A student completing this program is prepared to enter employment with analytical and quantitative tools relevant to technological industries and/or modern financial markets. On the other hand, with the appropriate electives chosen, the student is prepared to enter quantitatively oriented graduate schools. All advising for this degree option is done through the Undergraduate Program Office in the Department of Mathematics.

Program Requirements

Biological Science Emphasis: Consult with departmental advisor.

First Year

Fall
Select one of the following:
ENGL 104 Composition and Rhetoric 3
MATH 171 Analytic Geometry and Calculus 4
Select one of the following:
CSCE 110 Programming I 4
CSCE 111 Introduction to Computer Science Concepts and Programming
CSCE 121 Introduction to Program Design and Concepts
CSCE 206 Structured Programming in C
Select one of the following:
BIOL 111 Introductory Biology I
BIOL 112 Introductory Biology II
CHEM 101 Fundamentals of Chemistry I
& CHEM 111 and Fundamentals of Chemistry Laboratory I
CHEM 102 Fundamentals of Chemistry II
& CHEM 112 and Fundamentals of Chemistry Laboratory II
CHEM 103 Structure and Bonding
& CHEM 113 and Physical and Chemical Principles
CHEM 104 Chemistry of the Elements
& CHEM 114 and Qualitative Analysis
ASTR 111 Overview of Modern Astronomy
Free elective 1 1

Term Semester Credit Hours 16

Spring
HIST 105 History of the United States 3
MATH 172 Calculus 4
Select one of the following:
CSCE 110 Programming I 4
CSCE 111 Introduction to Computer Science Concepts and Programming
CSCE 121 Introduction to Program Design and Concepts
CSCE 206 Structured Programming in C
Select one of the following:
BIOL 111 Introductory Biology I
BIOL 112 Introductory Biology II
CHEM 101 Fundamentals of Chemistry I
& CHEM 111 and Fundamentals of Chemistry Laboratory I

Applied Mathematical Sciences - BS, Biological Science Emphasis

Many advances in technology and business are achieved by people applying technical knowledge from statistics, computing science, finance, economics and mathematics. The curriculum in applied mathematical sciences provides study in all of these areas, with ample electives available to allow further in-depth study of any of these areas. In fact, there are six emphases in this curriculum: Applied Mathematics, Statistics, Actuarial Science, Economics, Biological Science and Scientific Computing. The Actuarial Science emphasis includes mathematical finance.
Consult with departmental advisor to select emphasis hours.

Fall
- ECON 202 or ECON 203: Principles of Economics or Principles of Economics
- HIST 106: History of the United States
- MATH 220: Foundations of Mathematics
- MATH 221: Several Variable Calculus
- STAT 211: Principles of Statistics I

Third Year
Fall
- MATH 409: Advanced Calculus I
- POLS 207: State and Local Government
- PHYS 218: Mechanics
- Consult with departmental advisor to select emphasis hours.

Spring
- MATH 417 or MATH 437: Numerical Methods or Principles of
- PHYS 208 or PHYS 451: Electricity and Optics or Mathematical Modeling of Ocean Climate
- Consult with departmental advisor to select emphasis hours.

Fourth Year
Fall
- Select one of the following:
  - COMM 203: Public Speaking
  - COMM 205: Communication for Technical Professions
  - COMM 243: Argumentation and Debate
- Consult with departmental advisor to select emphasis hours

Spring
- Consult with departmental advisor to select emphasis hours

Elective hours 3

Term Semester Credit Hours 5

Fall
- ENGL 104: Composition and Rhetoric
- MATH 170: Analytic Geometry and Calculus
- Select one of the following:
  - CSCE 110: Programming I
  - CSCE 111: Introduction to Computer Science Concepts and Programming
  - CSCE 121: Introduction to Program Design and Concepts
  - CSCE 206: Structured Programming in C

 erst Semester Credit Hours 14
 Total Semester Credit Hours: 120

1 MATH 170 is highly recommended for math majors co-enrolled in MATH 150, MATH 151, MATH 152, MATH 171 or MATH 172.
2 Select 3 hours from any 200-400 level course.
3 Three elective hours must be chosen from the approved University Core Curriculum (p. 20) list for creative arts. In addition, 6 hours of courses must be in the area of International and Cultural Diversity (p. 38). These may be in addition to University Core Curriculum (p. 20) courses, or if a course in this category satisfies an area of the Core, it can be used to meet both requirements. Students desiring teacher certification should consult the requirements for certification before registering for electives.

If a grade of D or F is earned in any of the following courses, MATH 151/MATH 171, MATH 152/MATH 172, MATH 221/MATH 251/MATH 253, MATH 220, MATH 323 or MATH 308, this course must be immediately retaken and a grade of C or better earned. The department will allow at most two D’s in upper-level (325-499) courses. If a third D is earned, one of the three courses in which a D was earned must be retaken and a grade of C or better earned.

Many advances in technology and business are achieved by people applying technical knowledge from statistics, computing science, finance, economics and mathematics. The curriculum in applied mathematical sciences provides study in all of these areas, with ample electives available to allow further in-depth study of any of these areas. - COMM 205: Communication for Technical Professions
- COMM 243: Argumentation and Debate

- Select one of the following:
  - 3
- MATH 412: Theory of Partial Differential Equations
- MATH 414: Fourier Series and Wavelets
- MATH 442: Mathematical Modeling
- MATH 470: Communications and Cryptography
- MATH 471: Communications and Cryptography II

- Select up to six hours from the following:
  - 6
- STAT 407-STAT 415 (p. 919)
- CSCE 210-CSCE 452 (p. 728)
- CSCE 461-CSCE 481 (p. 728)
- ISEN 420-ISEN 421 (p. 809)

#### Total Semester Credit Hours: 12

### Elective Hours

- MATH 170 is highly recommended for math majors co-enrolled in MATH 150, MATH 151, MATH 152, MATH 171 or MATH 172.
- Select 3 hours from any 200-400 level course.
- Three elective hours must be chosen from the approved University Core Curriculum (p. 20) list for creative arts. In addition, 6 hours of courses must be in the area of International and Cultural Diversity (p. 38). These may be in addition to University Core Curriculum (p. 20) courses, or if a course in this category satisfies an area of the Core, it can be used to meet both requirements. Students desiring teacher certification should consult the requirements for certification before registering for electives.

- Except CSCE 442.

- If a grade of D or F is earned in any of the following courses, MATH 151/MATH 171, MATH 152/MATH 172, MATH 221/MATH 251/MATH 253, MATH 220, MATH 323 or MATH 308, this course must be immediately retaken and a grade of C or better earned. The department will allow at most two D's in upper-level (325-499) courses. If a third D is earned, one of the three courses in which a D was earned must be retaken and a grade of C or better earned.

### Applied Mathematical Sciences - BS, Statistics Emphasis

Many advances in technology and business are achieved by people applying technical knowledge from statistics, computing science, finance, economics and mathematics. The curriculum in applied mathematical

## Applied Mathematics - 5-Year Bachelor of Science/Master of Science in Mathematics

The FastTrack Degree Program enables ambitious and academically talented mathematics majors at Texas A&M University to earn both a bachelor's degree and a master's degree within a period of five years after entering A&M.

Amongst the various advantages of the program, upon its completion a student will be in an exceptionally strong position to enter:

- The professional industrial job marketplace;
- A career in secondary education;
- A doctoral program in mathematics, or in a related discipline, at Texas A&M or another university.

The related disciplines include computer science, engineering, physics, statistics, genetics, economics, business administration, education, and biology.

Eligibility for entering a doctoral program in one of these disciplines would depend in part on the undergraduate and graduate external options and areas of emphasis that were reflected in a student's individual degree plan.

- American History (p. 24)
- Government/Political science (p. 24)

### Third Year

#### Fall

- MATH 409: Advanced Calculus I 3
- PHYS 218: Mechanics 4

Free elective 4

Minor elective 3

### Spring

Select one of the following:

- MATH 415: Modern Algebra I 3
- MATH 423: Linear Algebra II 3
- MATH 433: Applied Algebra 3

MATH elective (p. 842) 5

Minor electives 3

Free elective 4

### Fourth Year

#### Fall

- MATH elective (p. 842) 5

Select one of the following: 6

- Creative Arts (p. 23)
- Social and Behavioral Sciences (p. 24)

Free elective 4

Minor elective 3

#### Spring

- MATH elective (p. 842) 5

Select one of the following: 6

- Creative Arts (p. 23)
- Social and Behavioral Sciences (p. 24)

Free elective 4

Minor elective 3

### Free elective

1  MATH 170 is highly recommended for math majors co-enrolled in MATH 150, MATH 151, MATH 152, MATH 171 or MATH 172.

2  Select 3 hours from any 200-400 level Language, philosophy and culture (p. 22) course.

3  A 15-18 hour minor field of study should be chosen in conference with a departmental advisor.
Six hours of courses must be in the area of international and cultural diversity. These may be in addition to other University Core Curriculum courses, or if a course in this category satisfies an area of the Core, it can be used to meet both requirements. Students desiring teacher certification should consult the requirements for certification before registering for electives.

Nine of the 12 hours of math elective courses are to be from any 400- or 600-level MATH, excluding MATH 401 and MATH 601. The last three hours can be from any 400- or 600-level MATH (excluding MATH 401 or MATH 601), any 400-level STAT, CSCE 221 or higher, or any 400-level ISEN, excluding any 485 course in any department without permission of a departmental advisor. Students wishing to be certified must take MATH 403 and MATH 467. Students who plan to attend graduate school are encouraged to take MATH 416, MATH 447 and at least one 600-level course.

Three hours must be social and behavioral sciences (p. 24) and three hours must be creative arts (p. 23).

If a grade of D or F is earned in any of the following courses, MATH 151/MATH 171, MATH 152/MATH 172, MATH 221/MATH 251/MATH 253/MATH 220, MATH 323 or MATH 308, this course must be immediately retaken and a grade of C or better earned. The department will allow at most two Ds in upper-level (325-499) courses. If a third D is earned, one of the three courses in which a D was earned must be retaken and a grade of C or better earned.

Mathematics - 5-Year Bachelor of Arts/Master of Science in Mathematics

The FastTrack Degree Program enables ambitious and academically talented mathematics majors at Texas A&M University to earn both a bachelor's degree and a master's degree within a period of five years after entering A&M.

Amongst the various advantages of the program, upon its completion a student will be in an exceptionally strong position to enter:

- BIOL 112 Introductory Biology II
- CHEM 101 Fundamentals of Chemistry I
  & CHEM 111 Fundamentals of Chemistry Laboratory I

**Total Semester Credit Hours:** 120

---

1. Select 3 hours from any 200-400 level Language, philosophy and culture (p. 22) course.
2. A 15-18-hour minor field of study should be chosen in conference with a departmental advisor.
3. Six hours of courses must be in the area of international and cultural diversity. These may be in addition to other University Core Curriculum courses, or if a course in this category satisfies an area of the Core, it can be used to meet both requirements. Students desiring teacher certification should consult the requirements for certification before registering for electives.
4. This 6 hours will be applied towards both BA and MS degrees in Mathematics.
5. Three hours must be social and behavioral sciences (p. 24) and three hours must be creative arts (p. 23).
6. MATH 170 is highly recommended for math majors co-enrolled in MATH 150, MATH 151, MATH 152, MATH 171 or MATH 172.

Total Semester Credit Hours: 120

---

1. MATH 170 is highly recommended for math majors co-enrolled in MATH 150, MATH 151, MATH 152, MATH 171 or MATH 172.
2. Science electives should be chosen from biology, biochemistry, chemistry, genetics or physics courses after consultation with the student’s advisor. At least 6 hours must be 200-level or above.
3. Select 3 hours from any 200- to 400-level Language, philosophy and culture (p. 22) course.
4. Three hours must be creative arts (p. 23) and three hours must be social and behavioral sciences (p. 24). In addition, six hours must be in the area of international and cultural diversity. These may be in addition to other University Core Curriculum (p. 20) courses, or if a course in this category satisfies an area of the Core, it can be used to meet both requirements. Students desiring teacher certification should consult the requirements for certification before registering for electives.
Twelve hours must be chosen from any 400- or 600-level MATH (excluding MATH 401, MATH 403 and MATH 601). Students are required to take at least one of the following: MATH 427, MATH 431, MATH 436, MATH 439. Students are encouraged to take MATH 412, MATH 442, or MATH 470. Students who plan to attend graduate school are encouraged to take MATH 447 and at least one 600-level course. Departmental permission is required to take MATH 485 or to enroll in a 600-level MATH course.

If a grade of D or F is earned in any of the following courses, MATH 151/MATH 171, MATH 152/MATH 172, MATH 221/MATH 251/MATH 253, MATH 220, MATH 323 or MATH 308, this course must be immediately retaken and a grade of C or better earned. The department will allow at most two D's in upper-level (325-499) courses. If a third D is earned, one of the three courses in which a D was earned must be retaken and a grade of C or better earned.

**Mathematics - 5-Year Bachelor of Science/Master of Science in Mathematics**

The FastTrack Degree Program enables ambitious and academically talented mathematics majors at Texas A&M University to earn both a bachelor's degree and a master's degree within a period of five years after entering A&M.

Amongst the various advantages of the program, upon its completion a student will be in an exceptionally strong position to enter:

- The professional industrial job marketplace;
- A career in secondary education;
- A doctoral program in mathematics, or in a related discipline, at Texas A&M or another university.

The related disciplines include computer science, engineering, physics, statistics, genetics, economics, business administration, education, and biology.

Eligibility for entering a doctoral program in one of these disciplines would depend in part on the undergraduate and graduate external options and areas of emphasis that were reflected in a student's individual degree plan.

  - MATH 630-MATH 639  
  - MATH 641-MATH 644  
  - MATH 647-MATH 684  
- CORE elective

**Mathematics - Minor**

**Getting a Minor in Mathematics is Simple!**

Students wishing to earn a minor in mathematics do not need to visit the Mathematics Department to do so. They should see their advisor, and inform them of their intention to earn a minor in mathematics, and to have that information entered into COMPASS.

The department also wants to point out to students who are majoring in engineering or one of the sciences that it might not take more than another 18 to 24 hours to get a double major in mathematics. If that is of interest to you, contact Mathematics Undergraduate Program Office.

**Program Requirements**

Non-math majors can obtain a minor in mathematics by meeting the following requirements:

Select one from:
- MATH 148 Calculus II for Biological Sciences  
- MATH 152 Engineering Mathematics II  
- MATH 172 Calculus

Select one from:
- MATH 221 Several Variable Calculus  
- MATH 251 Engineering Mathematics III  
- MATH 253 Engineering Mathematics III

Select from the following:
- MATH 220 Foundations of Mathematics  
- 300-400 level Mathematics course

**Total Semester Credit Hours**

1. Only one of MATH 323, MATH 304, MATH 309, or MATH 311 can be taken to satisfy the minor, due to the course content.
All 300-400 level MATH courses MUST be taken at Texas A&M University. No transfer work will be accepted.

Students must make a grade of "C" or better in all courses.

MATH 131, MATH 141, MATH 142, MATH 365, MATH 366, MATH 367, MATH 368, MATH 403, and MATH 485 may not be used to satisfy the requirements. MATH 485 will receive approval only under exceptional circumstances.

Department of Physics and Astronomy

Physics seeks to understand the fundamental workings of nature, from the constituents of matter deep within the nuclei of atoms, to the most distant galaxies of our expanding universe, to everyday phenomena of emergent complexity, self-organization and chaos. The resulting basic physical knowledge provides a firm foundation for innovations and is often the driving force of advanced technology. Lasers, compact disks, global positioning devices, magnetic resonance imaging machines and gigabit storage media were all made possible by key advances in physics.

Physicists have a curiosity that thrives on the challenge of solving problems. Consistent with this, the physics program at Texas A&M strives to teach analytical thinking and quantitative problem-solving skills. This enables students to work productively in physics, in areas closely related to physics, and in a wide variety of areas outside of physics proper. Physicists can be found in almost any discipline that requires complex problem-solving skills. Some engage in cutting-edge research to increase our basic knowledge of the universe. Some apply new-found knowledge to make practical advances in the fields of science, medical science and engineering. Still others use their knowledge to advocate, advise, inform, instruct and administrate as lawyers, consultants, journalists/writers, teachers and managers.

The Department of Physics and Astronomy offers two undergraduate degree programs, a Bachelor of Arts and a Bachelor of Science. The Department of Physics and Astronomy also offers the graduate degrees of Master of Science and Doctor of Philosophy. Highly qualified undergraduates are encouraged to take courses in the graduate program as part of their degree program.

The Texas A&M Department of Physics and Astronomy has strong research groups in the areas of Applied Physics, Astronomy and Astrophysics, Atomic Physics (including Molecular Physics and Quantum Optics), Condensed Matter Physics ( Liquids and Solids), Elementary Particle Physics and Nuclear Physics. During the course of their undergraduate experience at Texas A&M, physics majors have the opportunity to work with faculty in all of these areas. The Astronomy program is very active. Physics majors seeking a BS have the opportunity to take special topics courses in the above disciplines, as well as ASTR 314, to satisfy their science or technical elective.

Faculty

Abanov, Artem, Associate Professor
Physics And Astronomy
PHD, Texas A&M University, 1998

Adair, Thomas, Professor
Physics And Astronomy
PHD, Texas A&M University, 1965

Agnolet, Glenn, Professor
Physics And Astronomy
PHD, Cornell University, 1983

Akimov, Alexey, Assistant Professor
Physics And Astronomy
PHD, Moscow Institute of Technology, 2003

Allen, Roland, Professor
Physics And Astronomy
PHD, University of Texas at Austin, 1969

Aronson, Meigan, Professor
Physics And Astronomy
PHD, University of Illinois, 1988

Bassichis, William, Professor
Physics And Astronomy
PHD, Case Western Reserve University, 1963

Becker, Katrin, Professor
Physics And Astronomy
PHD, University of Bonn, 1994

Becker, Melanie, Professor
Physics And Astronomy
PHD, University of Bonn, Germany, 1994

Belyanin, Alexey, Professor
Physics And Astronomy
PHD, Institute of Applied Physics Russian Academy of Sciences, 1995

Chin, Siu, Professor
Physics And Astronomy
PHD, Massachusetts Institute of Technology, 1975

Christian, Gregory, Assistant Professor
Physics And Astronomy
PHD, Michigan State University, 2011

Depoy, Darren, Professor
Physics And Astronomy
PHD, University of Hawaii at Manoa, 1987

Dhar, Barun, Lecturer
Physics And Astronomy
PHD, University of Minnesota, Minneapolis, 2012

Dierker, Steven, Professor
Physics And Astronomy
PHD, University of Illinois-Urbana-Champaign, 1983

Dutta, Bhaskar, Professor
Physics And Astronomy
PHD, Oklahoma State University, 1995

Ene, Emanuela, Lecturer
Physics And Astronomy
PHD, Oklahoma State University, 2013

Erukhimova, Tatiana, Senior Lecturer
Physics And Astronomy
PHD, Institute of Applied Physics, Russian Academy of Sciences, 1999
Eusebi, Ricardo, Associate Professor  
Physics And Astronomy  
PHD, University of Rochester, 2006

Finkelstein, Alexander, Professor  
Physics And Astronomy  
PHD, Landau Institute for Theoretical Physics, 1972

Ford, Albert, Professor  
Physics And Astronomy  
PHD, University of Texas at Austin, 1972

Fries, Rainer, Associate Professor  
Physics And Astronomy  
PHD, University of Regensburg, Germany, 2001

Fry, Edward, Distinguished Professor  
Physics And Astronomy  
PHD, University of Michigan, 1969

Gagliardi, Carl, Professor  
Physics And Astronomy  
PHD, Princeton University, 1982

Hardy, John, Distinguished Professor  
Physics And Astronomy  
PHD, Harvard University, 1958

Holt, Jeremy, Assistant Professor  
Physics And Astronomy  
PHD, Stony Brook University, NY, 2016

Kamon, Teruki, Professor  
Physics And Astronomy  
PHD, University of Tsukuba, 1986

Katzgraber, Helmut, Professor  
Physics And Astronomy  
PHD, University of California, Santa Cruz, 2001

Ko, Che-Ming, Professor  
Physics And Astronomy  
PHD, State University of New York at Stony Brook, 1973

Kocharovskaya, Olga, Distinguished Professor  
Physics And Astronomy  
PHD, Institute of Applied Physics, Russian Academy of Sciences, 1986

Kocharovsky, Vitaly, Professor  
Physics And Astronomy  
PHD, Institute of Applied Physics, Russian Academy of Sciences, 1998

Krisclunas, Kevin, Lecturer  
Physics And Astronomy  
PHD, University of Washington, 2000

Kwiatkowski, Anna, Assistant Professor  
Physics And Astronomy  
PHD, Michigan State University, 2011

Lee, David, Distinguished Professor  
Physics And Astronomy  
PHD, Yale University, 1959

Lyuksyutov, Igor, Professor  
Physics And Astronomy  

Macri, Lucas, Associate Professor  
Physics And Astronomy  
PHD, Harvard University, 2001

Mahapatra, Rupak, Associate Professor  
Physics And Astronomy  
PHD, University of Minnesota, 2000

Marshall, Jennifer, Assistant Professor  
Physics And Astronomy  
PHD, Ohio State University, 2006

McIntyre, Peter, Professor  
Physics And Astronomy  
PHD, University of Chicago, 1973

Melconian, Daniel, Associate Professor  
Physics And Astronomy  
PHD, Simon Fraser University, 2006

Mioduszewski, Saskia, Associate Professor  
Physics And Astronomy  
PHD, University of Tennessee, 1999

Mirabolfathi, Nader, Research Associate Professor  
Physics And Astronomy  
PHD, University of Paris XI, 2002

Nanopoulos, Dimitri, Distinguished Professor  
Physics And Astronomy  
PHD, University of Sussex, Falmer, Brighton, England, 1973

Naugle, Donald, Professor  
Physics And Astronomy  
PHD, Texas A&M University, 1965

Papovich, Casey, Associate Professor  
Physics And Astronomy  
PHD, Johns Hopkins University, 2002

Pokrovsky, Valery, Distinguished Professor  
Physics And Astronomy  
PHD, Tomsk State University, 1957

Pope, Christopher, Distinguished Professor  
Physics And Astronomy  
PHD, University of Cambridge, 1980

Rapp, Ralf, Professor  
Physics And Astronomy  
PHD, Rheinische Friedrich-Wilhelma University, Bonn, 1996

Rogachev, Grigory, Professor  
Physics And Astronomy  
PHD, National Research Centre, 1999
Majors

- Bachelor of Arts in Physics (p. 601)
- Bachelor of Science in Physics (p. 602)

Minors

- Astrophysics Minor (p. 603)
- Physics Minor (p. 603)

Physics - BA

The Bachelor of Arts curriculum provides the student with a firm foundation in physics and with the flexibility to choose from a large number of elective courses, thus permitting the student to explore other interests. Except for those students pursuing teacher certification, some of these elective courses are chosen to satisfy the requirements of a minor field of study. The student can, therefore, customize his or her program of study in preparation for a career in any science-related or science-required field, from intellectual property law and science reporting to physics teaching. Although not required for the BA program, students have the opportunity to become directly involved in any of the active research programs in the Department of Physics and Astronomy.

1. A physics major must complete the foundation courses (PHYS 101, PHYS 102, PHYS 208, PHYS 218, PHYS 221, PHYS 309, CHEM 107/CHEM 117, MATH 171, MATH 172, MATH 221, MATH 308) with a grade of C or better and have a 2.0 cumulative GPR before taking non-foundation upper-level physics courses.

2. Any approved Communication course with an ENGL prefix.

3. Approved W course designation.

4. Maximum combination of 18 hours of 481, 482, 485 and/or 491.

5. To register for PHYS 401 a student must be able to program in a high level language, such as FORTRAN, Java or C. This prerequisite can be satisfied by taking CSCE 206 or the equivalent.

6. ASTR 314 or any 400-level physics, science or technical elective, except the writing intensive courses, PHYS 444 and PHYS 445.

7. Electives should be chosen in consultation with the student's advisor. If the student has not fulfilled the six hour international and cultural diversity Graduation requirement with courses used to meet areas of the Core, they must fulfill this requirement with six of their elective hours.

### Astrophysics - Minor

The Department of Physics and Astronomy offers a minor in astrophysics. Contact the department for more information.

\(^1\) Must make a grade of "C" or better.

\(^2\) Select from PHYS 300- 499 or ASTR 314 in consultation with an advisor.

Department of Statistics

The science of statistics deals with the collection and summarization of data, design of experiments and surveys, measurement of the magnitude of variation in both experimental and survey data, estimation of population parameters with measures of their accuracy and precision, tests of hypotheses about populations and studies of the relationships between two or more variables. While the ideal of science is to achieve a systematic interrelationship of facts, scientific methods must be a pursuit of this ideal by experimentation, observation and logical arguments from various accepted postulates. Thus, the science of statistics is a set of scientific principles and methodologies that are useful in reaching conclusions about populations and processes when the available information is both limited and variable. Hence, statistical principles are useful in all the sciences, both physical and social. Many practical applications of statistics are found in a wide variety of fields, including biology, education, social sciences, engineering, business, government and agriculture.

The Department of Statistics offers training in statistics leading to degrees of Master of Science and Doctor of Philosophy, and provides many courses for students majoring in the Bachelor of Science degree in applied mathematical sciences. This undergraduate curriculum provides the student with a firm foundation in mathematics, statistics and computing science.

• Minor in Statistics (p. 606)

Statistics - BS

Statistics is the science of collecting and analyzing data for the purpose of making decisions in the presence of uncertainty. Data are ubiquitous in the modern day and age, and statisticians are in high demand. Multidisciplinary application areas vary widely and include health and medicine, business, engineering, physical sciences, environmental studies, and government. The curriculum in statistics provides instruction in all necessary areas, including a foundation in mathematics and probability, strategies for designing studies and collecting data, the visualization and analysis of data using popular software such as SAS and R, and the process of using sample data to draw conclusions about a population. Depending on the electives selected, a student completing this program will be prepared to enter employment as a statistical analyst or to continue to graduate school in statistics or a related field.

Program Requirements

The following is a suggested schedule that includes the required courses for the BS in Statistics. It is recognized that many students will change the sequence and number of courses taken in any semester. Deviations from the prescribed course sequence, however, should be made with care to ensure that prerequisites for all courses are met.

Total Semester Credit Hours: 120

---

1. Two lower-level science courses are to be selected from ASTR 111; BIOL 111; BIOL 112; CHEM 101/CHEM 111 or CHEM 103/CHEM 113; CHEM 102/CHEM 112 or CHEM 104/CHEM 114; PHYS 208; PHYS 218. A third science course (p. 21) is to be selected from any course satisfying the life and physical sciences requirement for the University Core Curriculum.

2. Select 8 hours from CSCE 110, CSCE 111, CSCE 121, or CSCE 206.

3. Select 3 hours from COMM 203, COMM 205, or COMM 243, which fulfills the communication (p. 21) requirement for the University Core Curriculum.

4. Three elective hours must be chosen from the approved University Core Curriculum list for language, philosophy and culture (p. 22), three elective hours must be chosen from the approved University Core Curriculum list for creative arts (p. 23), and three elective hours must be chosen from the approved University Core Curriculum list for social and behavior sciences (p. 24). In addition, 6 hours of courses must be in the area of international and cultural diversity (p. 38). These may be in addition to University Core Curriculum courses, or if a course in this category satisfies an area of the Core, it can be used to meet both requirements.

5. Students must take at least one course from the following courses: MATH 220, MATH 308, MATH 409, MATH 410, MATH 417 or MATH 437, MATH 442, MATH 446, MATH 447, MATH 469, ISEN 320, ISEN 340, ISEN 355. The student must take a total of at least 12 hours of mathematics and statistics elective courses.

6. Students must take 12 hours in an outside specialization area upon approval by a departmental advisor. At least 6 hours must be upper level hours.

7. Students must take at least two courses from the following courses: STAT 407, STAT 426, STAT 436, STAT 438, STAT 445, STAT 446, STAT 459, STAT 485, STAT 489, STAT 491, ISEN 350. The student must take a total of at least 12 hours of mathematics and statistics elective courses.

*If a grade of D or F is earned in any of the following courses, MATH 151/MATH 171, MATH 152/MATH 172, MATH 221/MATH 251/MATH 253, MATH 220, MATH 304/MATH 323, STAT 211, or STAT 212, this course must be immediately retaken and a grade of C or better earned. The department will allow at most two D’s in upper-level (325-499) courses. If a third D is earned, one of the three courses in which a D was earned must be retaken and a grade of C or better earned.

---

**Statistics - Minor**

The Department of Statistics offers a minor in Statistics. For additional information, see the Department of Statistics website (http://www.stat.tamu.edu).
Additional Requirements:

Students must make a grade of "C" or better in all courses.

Students must not be BS in APMS or BS in MATH major.

Substitutions for the minor must be approved by the Statistics Department.

University Studies Programs

The College of Science offers degrees in University Studies. A University Studies degree differs from a traditional “major” in that it consists of a concentration and two minors of 15-18 hours each. The University Studies degree format was created to provide students the flexibility to combine areas of study that are of special interest.

Majors

- Bachelor of Science in University Studies, Mathematics for Business Concentration (p. 607)
- Bachelor of Science in University Studies, Mathematics for Pre-Professionals Concentration (p. 607)
- Bachelor of Science in University Studies, Science for Secondary Teaching Concentration (p. 608)
- Bachelor of Science in University Studies, Mathematics for Teaching Concentration (p. 609)

University Studies - BS, Mathematics for Business Concentration

The Bachelor of Science in University Studies, Mathematics for Business area of concentration consists of courses that are designed to give students who are both interested in business and mathematically inclined a way to combine both interests.

**University Studies - BS, Science for Secondary Teaching Concentration**

The BS in University Studies, Science for Secondary Teaching area of concentration consists of courses that give students desiring secondary-school teaching credentials a solid foundation in life, earth and physical sciences. In particular, the courses chosen encompass the science composite areas test by the State of Texas and TExES. These are the courses currently required for the science composite certificate.

Administrative Officers

Dean - Eleanor M. Green, B.S., D.V.M.

Associate Dean for Professional Programs - Kenita S. Rogers, D.V.M., M.S.

Associate Dean for Research and Graduate Studies - Robert Burghardt M.S., Ph.D.

Associate Dean for Undergraduate Education - Evelyn Tiffany-Castiglioni, Ph.D.

Assistant Dean for Undergraduate Education - Elizabeth Crouch, Ph.D.

Assistant Dean for Finance and Administration - Belinda S. Hale, M.B.A.

Director of Student Services for Professional Programs -

General Statement

The College of Veterinary Medicine & Biomedical Sciences consists of five academic departments: Veterinary Integrative Biosciences, Veterinary Large Animal Clinical Sciences, Veterinary Pathobiology, Veterinary Physiology and Pharmacology, and Veterinary Small Animal Clinical Sciences. Each department is administered by a department head, who is responsible to the Dean of Veterinary Medicine & Biomedical Sciences for all programs assigned or developed in the department, including teaching, research, extension and service.

A Veterinary Medical Teaching Hospital and Field Service Clinic are operated within the College to provide clinical laboratories for the veterinary medical educational program.

An extensive research program in animal health and disease is conducted by the faculty and staff of the college, and a substantial number of the teaching faculty members are engaged in research.

A veterinary extension program carries research information to veterinarians, animal owners, and others in the state and nation with the least possible delay. The faculty makes research information available to the students in the classroom and laboratories in a timely manner.

The typical land-grant institutional mandate of teaching, research, patient care and service provides the organizational framework necessary to meet the dynamics in the ever-changing field of veterinary medicine.

Graduate programs leading to the Master of Science and Doctor of Philosophy degrees are available in the departments of the College of Veterinary Medicine & Biomedical Sciences. The programs are research-oriented but sufficiently flexible to permit intensive training in many areas of special training. Clinical specialty training programs are also available. These programs are designed to provide effective training in the areas of professional specialization.

Majors

College of Veterinary Medicine and Biomedical Sciences

- Bachelor of Science in Biomedical Sciences (p. 611)
- Bachelor of Science in University Studies, Biomedical Sciences Concentration (p. 614)

Minors

College of Veterinary Medicine and Biomedical Sciences

- Biomedical Sciences Minor (p. 615)

Certificates

College of Veterinary Medicine and Biomedical Sciences

- International Certificate in Cultural Competency and Communications in Spanish (p. 616)

Department of Veterinary Physiology and Pharmacology

- Biomedical Research and Development Certificate (p. 616)

Masters

College of Veterinary Medicine and Biomedical Sciences

- Master of Science in Biomedical Sciences (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/veterinary-medicine-biomedical-sciences/interdepartmental/biomedical-sciences-ms)
- Master of Science in Science and Technology Journalism (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/science-technology-journalism-ms)

Department of Veterinary Integrative Biosciences

- Master of Science in Veterinary Public Health - Epidemiology (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/veterinary-medicine-biomedical-sciences/veterinary-integrative-biosciences/veterinary-public-health-epidemiology-ms)

Doctoral

College of Veterinary Medicine and Biomedical Sciences

- Doctor of Philosophy in Biomedical Sciences (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/veterinary-medicine-biomedical-sciences/interdepartmental/biomedical-sciences-phd)
Department of Veterinary Pathobiology

- Doctor of Philosophy in Veterinary Pathobiology (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/veterinary-medicine-biomedical-sciences/veterinary-pathobiology/phd)

Professional

College of Veterinary Medicine and Biomedical Sciences

- Doctor of Veterinary Medicine in Veterinary Medicine (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/veterinary-medicine-biomedical-sciences/interdepartmental/dvm)

Biomedical Sciences - BS

Admission

1. A Biomedical Sciences (BIMS) major will be admitted into the upper-level courses according to the following criteria:
   a. Completion of a set of Common Body of Knowledge (CBK) courses (35 hours to include BIOL 111, BIOL 112, CHEM 101/CHEM 111, CHEM 102/HEM 112, CHEM 227/CHEM 237, CHEM 228/CHEM 238, PHYS 201, PHYS 202 and MATH 131) with a grade of C or better in each course taken at Texas A&M. Any CBK course transferred in from a community college must have a minimum grade of a “B”.
   Normally, for admission to BIMS upper-level courses, a student may have attempted a CBK course no more than twice.
   b. A minimum of 55 completed semester hours with a cumulative resident Grade Point Ratio (GPR) of 2.5 or better.
      Process: Each student upon completing 55–65 semester credit hours must have a degree audit to verify upper-level eligibility.

2. The Biomedical Sciences Program will continue to accept changes of major into BIMS according to current Texas A&M University policy, but restrict changes of major into the upper-level courses (BIMS) according to the criteria listed in item 1. Students in other majors requesting a change of major to the BIMS program must also fulfill the criteria listed in item 1. In addition, the dean must verify availability of resources necessary to assure the student’s full-time enrollment in required upper-level courses prior to admission to upper-level status. If such courses are not available, the student will be denied admission to Biomedical Sciences.

3. To enter BIMS upper-level courses, transfer students must have:
   a. A minimum GPR of 3.0 in CBK courses with a grade of B or better in each completed course if taken at a 2-year college. A grade of C is accepted from a 4-year college.
   b. Transfer students admitted under another major and wishing to change into BIMS must complete one semester of graded coursework at Texas A&M University with a cumulative resident GPR of 2.5 and must fulfill the criteria in item 1.
   c. Texas A&M change of majors must have at least 55 semester credit hours with a minimum cumulative GPR of 3.0.

4. Students seeking readmission will be considered on a case-by-case basis, according to current catalog policy. No quotas will be placed on readmission; however, the decision to readmit will be dependent on resource availability and University policy.

5. Any BIMS student admitted to upper-level courses who then falls below the 2.5 GPR requirement will not be considered in good academic standing in their major and will be placed on college probation. Students who achieve less than a 1.0 GPR in any semester are not eligible for college probation or grade warning status. All Biomedical Sciences majors must follow established probation rules for the Biomedical Sciences Program.

6. The Dean, Director or Department Head will reserve the right to waive CBK or GPR requirements within the criteria established in Texas A&M University Student Rules.

7. No courses other than BIMS 481, BIMS 484, VIBS 310, VIBS 311, or research/directed studies credits can be taken S/U to be used in the degree plan.

8. BIMS probation is determined at the end of the Spring semester. Students not meeting acceptable GPR requirements (2.5 BIMS majors with 55 or more hours or 2.0 area of concentration (USVM), BIMS majors with less than 55 hours) will be required to attend Texas A&M University that summer and repeat courses as needed to raise their GPR. Students who achieve less than a 1.0 GPR in any semester (BIMS or USVM) are not eligible for college probation or grade warning status.

9. Students may only attempt CVM courses a total of three (3) times.

Applied Science Option

Biomedical Sciences is a broad field of applied biology that is directed toward understanding health and disease. The curriculum is designed to provide a strong four-year education that emphasizes versatility of the graduate in the biological and medical sciences. A highly effective counseling program assists the students with the development of an individualized approach and course package that orient and prepares the students for entry into the medical, allied health field or graduate program of their choice. Such an approach enhances their educational experiences, improves their placement in professional and graduate programs, and facilitates their entry into the biomedical science job market.

Biomedical Sciences graduates enter professional programs in human medicine, veterinary medicine, dentistry, osteopathy, podiatry, optometry, and pharmacy. Some become medical technologists, physician assistants, nurses, and laboratory and research technicians. Others pursue radiation technology, hospital administration, and a wide variety of health-related fields. Many Biomedical Sciences students continue their education in graduate schools and specialize in various biology- and medicine-related disciplines. Other graduates are employed by clinical practices, industrial companies, government agencies, private foundations, public schools, colleges and certain aspects of business. Positions are available in pharmaceutical and drug marketing, research equipment manufacture and sales, food safety, biomedical research, disease control, zoonoses and epidemiology, laboratory animal care, zoo and aquatic animal supervision, health-related inspection and regulatory work. The BS in Biomedical Sciences is also awarded to students who complete the three year Early Admission Option to Professional Schools and one year of professional school.

Faculty

Bellinger, Larry, Regents Professor
Biomedical Sciences
PHD, University of California at Davis, 1974

Benson, M, Assistant Professor
Biomedical Sciences
PHD, University of Michigan, 2000
Carlson, David, Adjunct Professor
Biomedical Sciences
PHD, University of Massachusetts - Amherst, 1974

Dechow, Paul, Regents Professor
Biomedical Sciences
PHD, University of Chicago, 1980

Feng, Jian, Professor
Biomedical Sciences
PHD, University of Connecticut, 1991

Groppe, Jay, Associate Professor
Biomedical Sciences
PHD, University of California at Santa Barbara, 1991

Honeyman, Allen, Associate Professor
Biomedical Sciences
PHD, University of Kansas, 1988

Kramer, Phillip, Professor
Biomedical Sciences
PHD, Texas A&M University, 1996

Liu, Xiaohua, Assistant Professor
Biomedical Sciences
PHD, Tsinghua University, China, 2002

Lu, Yongbo, Assistant Professor
Biomedical Sciences
PHD, University of Missouri-Kansas City, 2007

Newman, Joseph, Adjunct Associate Professor
Biomedical Sciences
PHD, University of Texas Medical School at San Antonio, 1973

Opperman, Lynne, Regents Professor
Biomedical Sciences
PHD, University of the Witwatersrand, South Africa, 1985

Qin, Chunlin, Professor
Biomedical Sciences
DMD, Harbin Medical University, 1983

Roesch, Darren, Assistant Professor
Biomedical Sciences
PHD, University of Florida, 1998

Ruest, Louis, Assistant Professor
Biomedical Sciences
PHD, McGill University, Montreal, Canada, 2002

Schneiderman, Emet, Professor
Biomedical Sciences
PHD, University of Michigan - Ann Arbor, 1985

Spears, Robert, Professor
Biomedical Sciences
PHD, Baylor College of Dentistry, 2002

Svoboda, Kathy, Regents Professor
Biomedical Sciences
PHD, University of Nebraska Medical Center, 1982

Tao, Feng, Associate Professor
Biomedical Sciences
PHD, Fudan University, China, 2000

Varanasi, Venu, Assistant Professor
Biomedical Sciences
DEN, University of Florida Gainesville, 2004

Wang, Qian, Associate Professor
Biomedical Sciences
PHD, Chinese Academy of Sciences, 1998

Wang, Xiaofang, Research Assistant Professor
Biomedical Sciences
DDS, Fourth Military Medical University, China, 2003

In satisfying the required 26 hours of BIMS directed electives and free electives, all 285/485 courses may not exceed 6 credit hours and all 289/489 courses may not exceed 9 credit hours. A 289/489 course used as a free elective may not exceed 3 hours. A 291/491 course may not exceed 3 hours credit.

**Directed Electives**

BIMS directed electives are courses that constitute the major offered by the College of Veterinary Medicine and Biomedical Sciences and those approved for biomedical science electives. A student may choose 26 semester credits from the following partial list of courses:

<table>

### Additional CVM courses

489, including Honors sections, 285/491 (Directed Studies), 291/491 (Research)

A complete list of all BIMS directed electives may be obtained from a BIMS advisor.
**Biomedical Sciences - Minor**

Students declaring a Biomedical Sciences (BIMS) minor must declare the minor through the BIMS academic advising office.

**Requirements to declare BIMS minor:**

- Must have a 2.0 TAMU GPA
- Must be declared before 75 hours are completed

**Program Requirements**

A selection from among the following courses will constitute a minor field of study. The following 15 hours of course work are required. Proper classification must be met for the course level being taken.

### Biomedical Research and Development - Certificate

The Biomedical Research Certificate, offered by the Department of Veterinary Physiology and Pharmacology, will provide students the opportunity to gain advanced training in biomedical research. Students in the Certificate Program will gain a broader understanding of the creation, evaluation, and dissemination of new knowledge while performing publishable original biomedical research within a research-intensive community. The Biomedical Research Certificate Program requires a minimum of 18-credit hours in designated courses, each of which includes engagement in inquiry-based research. Specific certificate requirements are available in the Biomedical Sciences Office and the Department of Veterinary Physiology and Pharmacology [http://vetmed.tamu.edu/vtpp](http://vetmed.tamu.edu/vtpp).

**Prescribed Elective Courses**

- Select one of the following:
  - VTPP 223 Design of Experiments for Physiology Research
  - VTPP 222 or In Vitro Experimentation in Physiology Research
  - VTPP 234 Design of Models for Physiology Research
  - VTPP 235 or Analysis and Validation of Models for Physiology Research

**Total Semester Credit Hours**

- 18

---

Two VTPP 491 (3 hours) courses are required for 6 hours total.

### International Certificate in Cultural Competency and Communications in Spanish

Students who complete this certificate will be functionally bilingual and able to perform linguistically in a culturally sensitive manner within the biomedical environment. A required study abroad will allow students to gain experiential knowledge, expanding their cultural sensitivities and functionality in a foreign environment. Because of limited resources, the program will have a cap on the number of students admitted. All courses in the program must be completed with a grade of C or better. The certificate will be awarded upon completion of a BS degree in Biomedical Sciences.

#### Program Requirements

To earn the certificate, students are required to complete:

1. BIMS Directed Electives are taken in consultation with a BIMS Academic Advisor.

Must have a 2.0 TAMU GPA
An international experience approved by the Biomedical Sciences Program.

Total Semester Credit Hours: 16

1. SPAN 221 and SPAN 222 are acceptable substitutions, when taken abroad, for SPAN 201 and SPAN 202.
2. Prerequisites apply.
3. The certificate was designed with the student's required Texas A&M Core Curriculum (p. 20) in mind. Many of the courses on the approved list will count as a language, philosophy and culture, creative arts, or social and behavioral sciences. It is up to the student to compare the two lists and to work with their academic advisor to choose courses appropriate to their degree plan.
4. It is suggested that students enroll in this course after the completion of at least SPAN 201 or equivalent. For course options, see academic advisor.
5. This course is a specific section of 485 that requires shadowing in the biomedical environment while using the Spanish language.
6. This requirement may be satisfied by an approved study abroad program.

Certificates

- Biomedical Research and Development Certificate (p. 616)
Aerospace Studies

The Air Force ROTC (AFROTC) program at Texas A&M University is the largest AFROTC program in the United States and is designed to prepare selected students to be commissioned officers in the United States Air Force.

The institutional phase of AFROTC, called aerospace studies, is divided into two parts. The first two years constitute the General Military Course and the second two years constitute the Professional Officer Course. Details on courses offered are set forth in the alphabetical departmental listing. Concurrent enrollment in more than one aerospace studies course requires the approval of the department head, also known as the Professor of Aerospace Studies.

The General Military Course consists of the 100- and 200-level courses. These courses focus on the structure and missions of Air Force organizations; officership and professionalism; and, include an introduction to communicative skills. The General Military Course prepares the cadet, as a candidate, for the Professional Officer Course (POC). Cadets in the General Military Course attend one hour of class plus two hours of leadership lab per week.

Students apply for enrollment in the Professional Officer Course during their sophomore year. Enrollment in the Professional Officer Course at the beginning of the junior year is limited to students of high moral character who are academically qualified, physically fit, possess the necessary interest and aptitude, and have demonstrated leadership potential.

Before entry into the Professional Officer Course, cadets must attend AFROTC Field Training during the summer months typically between the sophomore and junior academic years. The major areas of study in the Field Training program include junior officer training, aircraft and aircrew orientation, career orientation, survival training, base functions, Air Force environment, physical fitness training, and a culmination field training exercise. Those who complete Field Training are enlisted in the Air Force Reserve and enter the POC.

The purpose of the Professional Officer Course is to develop skills and attitudes vital to a career as a professional Air Force officer. A degree is a prerequisite for an Air Force commission. Cadets attend class three hours a week and leadership lab two hours per week during each semester of the Professional Officer Course.

If a student is selected for and enrolled in the Professional Officer Course, he or she must sign a contract with the government in which he or she agrees to enlist in the Air Force Reserve, complete the course and, upon graduation, accept a commission as an officer in the United States Air Force. He or she also must agree to serve on active duty for not less than four years after being commissioned. Persons selected for flight training must serve ten years of active duty following completion of pilot training. During their two years in the Professional Officer Course, cadets are eligible to receive monthly subsistence pay, plus added monetary incentives.

Leadership training is continuous during the student’s life as an AFROTC cadet. One way this is accomplished is through Leadership Laboratory. Instruction is conducted within the framework of an organized cadet corps with a progression of experiences designed to develop each student’s leadership potential. Leadership Laboratory involves a study of Air Force customs and courtesies, drill and ceremonies, Air Force career opportunities, and expectations of an Air Force junior officer. Students develop their leadership in a practical, supervised laboratory, which typically includes field trips to Air Force installations.

Students enrolled in the four-year program may apply and compete for two- or three-year AFROTC College Scholarships. The AFROTC In-College Scholarship Program is a highly competitive program aimed primarily at college freshmen and sophomores in any major. If selected for an AFROTC scholarship, the student will receive tuition payment, textbook allowance and monthly subsistence allowance.
Upon completion of the Professional Officer Course and graduation from the University, students are commissioned as Second Lieutenants in the United States Air Force. All instructors are active duty officers assigned to the University by the United States Air Force. Information about the Air Force ROTC program may be obtained by contacting the Detachment, or visiting the Air Force ROTC (http://afrotc.tamu.edu) website.

**Military Science**

The Army ROTC program at Texas A&M is the oldest on campus. Aggie ROTC graduates are renowned throughout the Army and business world for their leadership abilities, initiative, and competence. AROTC graduates are proud to contribute to the heritage of the “Fightin’ Texas Aggies.” Army ROTC members are leaders in a wide variety of university activities including Student Government, campus athletics, the Fightin’ Texas Aggie Band Ross Volunteer Company, Rudder’s Rangers and Parsons Mounted Calvary. The Army ROTC Ranger Challenge Team is a perennial contender at both the Regional and National levels having finished in the top five at the Sandhurst competition hosted by the US Military Academy in consecutive years. The Ranger Challenge Team works closely with the Corps-sponsored Aggie Pathfinder orienteering team to develop expert land navigation skills and the stamina to compete in physically challenging terrain.

The Army has the career field to match a student’s education and interests, with no restrictions on the major field of study or discipline. Army ROTC classes are unique in the college curriculum in offering both classroom instruction and hands-on leadership development opportunities. The Army ROTC student may enter such diverse career fields as aviation, engineering, law enforcement, medical services, armor, infantry, artillery, communications, finance, personnel administration, transportation, or military intelligence. Engineering students are eligible to participate in the University’s chapter of the Society of American Military Engineers. Opportunities in Airborne, Ranger and Special Operations are also available. Highly qualified applicants may compete to take part in the delayed entry program while pursuing medical or law degrees and selected cadets may attend specialty military training including Airborne, Air Assault, Northern Warfare, and Mountain Warfare Schools.

Army ROTC is divided into two parts: The Basic and Advanced Courses. The Basic Course is taken in the freshman and sophomore years. Coursework covers the areas of military courtesy, discipline, and customs as well as map reading, marksmanship and land navigation. Students begin leadership development opportunities as members of the Warrior Training Battalion participating in weekly tactical leadership labs and field training exercises. Uniforms and the necessary textbooks are furnished and there is no military commitment for participation in the Basic Course. Three and Four year ROTC scholarship winners attend Cadet Initial entry training in the summer after their Freshman or Sophomore years.

The Advanced Course is taken in the final two years of college and includes the Cadet Leader Course (CLC) during the summer after the junior or senior year. Instruction includes advanced leadership development, organization ethics critical thinking and problem solving, administration, and military law. Summer training at Fort Knox, Kentucky enables cadets to put into practice, in a field environment, the principles and theories acquired in the classroom. All cadets in the Advanced ROTC program and who have entered into a commissioning contract receive a tiered subsistence allowance up to $500 per month and are paid approximately $800 per attending CLC. Army ROTC cadets are encouraged to take courses in strategic languages. Through the Army’s Culture and Language Incentives Program, students can earn up to $300 per credit hour for completing classes in qualifying languages. In addition, AROTC sponsors the Cultural Understanding and Language Proficiency Program that affords students the opportunity to participate in month long immersion programs in over 40 countries.

Army ROTC cadets receiving commissions may request to serve on active duty with the U.S. Army following graduation or to pursue a civilian career upon completion of the officer’s basic schooling while remaining affiliated with the Army Reserve or National Guard.

The Army ROTC Scholarship program awards four-year and three-year advance designee scholarships on a competitive basis to students entering ROTC as college freshmen. Two-year and three-year scholarships also are available for college students already enrolled in ROTC. These scholarships pay the cost of tuition, required fees and a flat rate textbook allowance for the duration of the award and provide a tiered subsistence allowance of up to $500 per month. In all, a four-year scholarship can be worth over $58,000 at Texas A&M. Additional scholarship opportunities are available specifically for students participating in Science, Technology, Engineering, and Math majors that pay the same benefits as four and three-year ROTC scholarships.

Qualified students who join the Army National Guard or Army Reserve, may participate in the Simultaneous Membership Program (SMP) in which they earn approximately $250 per month. The total dollar amount for SMP cadets can reach $750 per month during their junior and senior years in ROTC. Tuition assistance, which pays between 75-100% of tuition costs, is available through the US Army Reserves and Texas National Guard.

Qualified veterans may enroll directly into the ROTC Advanced Course. Veterans in the Advanced Program receive a tiered subsistence allowance of up to $500 per month in addition to their veterans’ benefits. The U.S. Army Health Profession Scholarship Program offers a unique opportunity for financial support to cadets who desire to continue their education beyond their undergraduate work by enrolling in a program leading to a professional degree in medicine, dentistry or veterinary medicine.

Texas A&M’s staff, having served multiple combat and operational deployments overseas, are dedicated to developing academically superior and physically fit commissioned officers recognized as outstanding leaders of character for the U.S. Army Officer Corps. For more information on Army ROTC programs, contact the Military Science Department at (979) 845-2814.

**Naval Science**

**Mission**

The Naval ROTC Unit at Texas A&M University provides qualified young men and women the opportunity to learn the mission of the Naval Services and pursue a commission as an officer in the United States Navy or United States Marine Corps. The Naval ROTC Unit operates as the Department of Naval Science at Texas A&M and is one of the largest Naval ROTC Units in the United States. Graduates from our program can be found serving around the world. Officers commissioned as Ensigns in the United States Navy have the option, based on physical and aptitude qualification, to serve in the Aviation (Pilot or Naval Flight Officer), Surface Warfare (Conventional or Nuclear), Nuclear Submarine, or Special Warfare (SEAL or Explosive Ordnance Disposal) communities. Officers commissioned as Second Lieutenants in the United States Marine Corps can serve in one of more than 36 military operational specialties in three categories including Aviation (Pilot or Naval Flight Officer), Combat Arms (Infantry, Artillery,
Naval ROTC students may participate fully in all aspects of university life. This includes serving in positions with Student Government or the Memorial Student Center, belonging to campus clubs and service organizations, or participating in religious, social, professional or personal interest organizations. The NROTC Unit also sponsors and advises special units within the Corps of Cadets; SEAL Platoon and RECON Company.

Scholarships

The Naval ROTC program provides numerous scholarship opportunities for qualified individuals who are seeking a commission upon graduation as an officer in either the United States Navy or United States Marine Corps. The four-year Naval ROTC scholarship program is a nationally competitive program. High school students seeking a four-year Navy or Marine Corps Option Naval ROTC scholarship may apply as early as the spring of their junior year in high school, and should apply no later than December of their senior year in high school. The Naval ROTC scholarship pays for all tuition, most university fees, some uniform fees, and provides the student with a monthly stipend and a semester book allowance. Three- and two-year scholarships with the same benefits listed above are available for qualifying students who apply while enrolled as NROTC students at Texas A&M.

College Program

Students without NROTC scholarships initially participate in Naval ROTC as Naval Science Students. Basic College Program students are guided by the same goals as the NROTC Scholarship students; to include meeting the physical requirements of the Corps of Cadets, maintaining a required minimum GPR, and possessing the aptitude and motivation for service above self. The Basic College Program exists to provide students the opportunity to learn about the United States Navy and United States Marine Corps and provide an alternate means for a commission for those not on scholarship. Basic College Program students can apply for a two- or three-year Navy or Marine Corps Option Naval ROTC scholarship. Students who do not qualify for a scholarship but still desire a commission can apply for acceptance into the College Program (Advanced Standing). The College Program (Advanced Standing) begins during the junior year and pays a monthly stipend, but does not pay for tuition and fees. All NROTC students are provided Naval Science textbooks, which are returned at the end of each semester, at no cost.

Leadership

All Scholarship and College Program (Basic and Advanced Standing) NROTC students are also members of the Texas A&M Midshipman Battalion, an organization providing distinct training and leadership opportunities for students pursuing Navy and Marine Corps commissions. This training is accomplished through the NROTC’s Leadership Laboratory. Associated with each Naval Science class and conducted every Tuesday afternoon, Leadership Laboratory is a combination of classroom study and practical hands-on application that exposes the students to many facets of the Navy and Marine Corps and provides them the opportunity to develop their leadership skills.

Academic Requirements

Academic requirements vary by program, but all freshmen and sophomore Naval ROTC students must take a Naval Science (NVSC) class each Fall and Spring semester. These courses provide a basic understanding of the Navy and Marine Corps organization and mission; address the concepts of leadership, ethics, and management; and provide a basic understanding of the history of American sea power and the evolution of warfare throughout the ages. All Scholarship and College Program (Advanced Standing) students continue to take Naval Science courses during their junior and senior year. These courses cover additional topics such as navigation, weapons systems, amphibious warfare and leadership and ethics for the junior officer.

Summer Cruise

Scholarship students receive four to six weeks of additional training every summer with operational Navy and Marine Corps units around the world. Between the freshman and sophomore years, students receive orientation training with naval aviation, surface combatant, submarine and Marine Corps units. Between the sophomore and junior years, Navy Option students experience the life of enlisted sailors aboard ships and submarines and Marine Option students experience the life of enlisted marines with Marine units in the field. For the final training session between the junior and senior years, all Scholarship and College Program (Advanced Standing) students receive service-specific training in final preparation for commissioning. Navy Option students are assigned to aviation units, surface combatants or submarines depending upon their qualifications and desires and receive hands-on training working closely with qualified junior officers. Marine Option students attend Officer Candidate School at Quantico, VA where they are screened, trained and evaluated in an intense, competitive environment alongside other Marine Option students from around the country. Students participating in summer cruises are provided government travel, medical and dental care, commissary and exchange privileges, and are paid for the duration of the training.

Commissioning

Upon graduation, qualified Naval ROTC Navy and Marine Option Scholarship students receive commissions as Ensigns in the United States Navy or as Second Lieutenants in the United States Marine Corps and serve a minimum of four years of active duty. Qualified Naval ROTC College Program (Advanced Standing) Navy Option students receive commissions as Ensigns in the United States Navy and serve a minimum of three years of active duty. Qualified Naval ROTC College Program (Advanced Standing) Marine Option students receive commissions as Second Lieutenants in the United States Marine Corps and serve a minimum of three and a half years of active duty. Those Navy Option graduates who are academically qualified and accepted to graduate school in certain disciplines may apply for active duty deferments to complete their post-graduate education.

NROTC Staff

The staff of the Naval Science Department is dedicated to producing officers of the highest quality for the United States Navy and United States Marine Corps. All instructors are active duty Navy or Marine Corps officers and senior enlisted personnel assigned to the University by the United States Navy or United States Marine Corps. In addition, they work with the Corps of Cadets and act as military advisors to the Companies/Outfits within the Naval regiments. This group of highly trained professionals places specific emphasis on the academic and professional development of every student assigned. Additional information about the Naval ROTC program at Texas A&M University can be obtained by calling the Department at (979) 845-1775, or by visiting the Texas A&M Naval ROTC (http://nrotc.tamu.edu) website.
Military Studies - Minor

The School of Military Sciences offers a minor in Military Studies. This minor is available to all Texas A&M students but is not required for ROTC or Corps of Cadets participation. Students should consult with an advisor in their major department to determine minor requirements. All students desiring to enroll in the Military Studies minor should contact the Assistant Commandant for Academics and International Programs in Room 211 of the Buzbee Leadership Learning Center, (979) 458-2829.

Program Requirements

The Military Studies minor requires 18 hours. Nine hours must be completed in approved upper-level Aerospace Studies, Military Science, or Naval Science courses with an additional 9 hours from approved university courses with a military-related focus. A minimum of 12 hours must be at the 300-400 level. A grade of C or higher is required if a course is to be counted towards the minor field. Minor programs are recognized on the transcripts after graduation, but not on the diploma. The student’s college and/or major department determines the number of minor programs a student may seek and shall be responsible for advising after the student receives signed approval from the Assistant Commandant for Administration.

Military Science Courses

Select three of the following:

- NVSC 303 Evolution of Warfare
- NVSC 401 Naval Ships Systems II: Weapons
- NVSC 402 Leadership and Ethics
- NVSC 410 Amphibious Warfare
- AERS 303 Air Force Leadership Studies
- AERS 304 Air Force Leadership Studies
- AERS 403 National Security Affairs—Preparation for Active Duty
- AERS 404 National Security Affairs—Preparation for Active Duty
- MLSC 321 Adaptive Leadership and Tactical Operations I
- MLSC 322 Adaptive Leadership and Tactical Operations II
- MLSC 421 The Army Officer and the Profession of Arms I
- MLSC 422 The Army Officer and the Profession of Arms II

Non-Military Science Courses

Select three from the following:

- CLAS 371 In Search of Homer and the Trojan War
- GEOG 320 The Middle East
- GEOG 327 Geography of South Asia
- GEOG 352/GNSS in the Geosciences
- GEOL 352
- GEOG 361 Remote Sensing in Geosciences
- GEOG 390 Principles of Geographic Information Systems
- GEOG 401 Political Geography
- GEOG 420 Geography of Terrorism
- GEOG 475 Advanced Topics in GIS (Geographic Information Systems)
- GEOG 352/GNSS in the Geosciences
- GEOG 352
- HIST 230 American Military History, 1609 to Present
- HIST 232 History of American Sea Power

Total Semester Credit Hours

18
Minimum of 6 hours of School of Military Sciences courses (NVSC, AERS, and MLSC) must be at the 400 level.

**Leadership Study and Development - Certificate**

The School of Military Science offers a certificate in Leadership Study and Development.

¹ Two hours in SOMS 380 and two hours in SOMS 481 are required.
Texas A&M University at Galveston

General Statement

Texas A&M University at Galveston, a branch campus of Texas A&M University, offers ocean-oriented academic degrees, research, continuing education and public service in marine science, engineering, business, transportation and liberal arts. Degrees are awarded from Texas A&M University. Ocean voyages, sailing in Galveston Bay, beachfront experiments and independent study complement the rigorous classroom experience at Texas A&M University at Galveston. In addition to its academic programs, the campus houses the Texas A&M Maritime Academy, which offers training programs leading to officer licensing in the U.S. Merchant Marine.

Texas A&M University at Galveston is located near the mouth of Galveston Bay with close access to the Gulf of Mexico. Most instructional programs are taught at the 130-acre Mitchell Campus on Pelican Island (with housing for 1,400+ students). The training ship serves as a floating classroom, laboratory and dormitory for the annual summer training cruise of the U.S. Maritime Service cadets. During the regular school year, the ship is berthed at Pelican Island and provides valuable dockside laboratory facilities for instruction in the practical aspects of the maritime curricula.

University Statement on Harassment and Discrimination

Texas A&M University at Galveston is committed to providing an educational and work climate that is conducive to the personal and professional development of each individual. To fulfill its multiple missions as an institution of higher learning, Texas A&M encourages a climate that values and nurtures collegiality, diversity, pluralism and the uniqueness of the individual within our State, nation and world. The University also strives to protect the rights and privileges, and to enhance the self-esteem of all its members. Faculty, staff and students should be aware that any form of harassment and any form of illegal discrimination against any individual is inconsistent with the values and ideals of the University community. Any questions or complaints relative to discrimination should be referred to the Human Resources Office.

Courses of Study

Texas A&M University at Galveston provides undergraduate degree programs in Marine Biology (MARB), Marine Sciences (MARS), Marine Engineering Technology (MART), Marine Fisheries (MARP), Maritime Administration (MARA), Maritime Studies (MAST), Offshore and Coastal Systems Engineering (OCSE), Ocean and Coastal Resources (OCRE) and University Studies (USGA). A 5-year program is offered to allow OCRE majors to additionally complete the Master of Marine Resources Management (MARM) degree, combining their senior year of OCRE with the first year of MARM. A similar 5-year program is offered to allow MARA majors to complete the Master of Maritime Administration and Logistics (MMAL) degree program in a total of 5 years. All students complete the University Core Curriculum requirements set by Texas A&M University to ensure a broad-based education.

Texas A&M University at Galveston is fully accredited by the “Southern Association of Colleges and Schools Commission on Colleges”. Marine Engineering Technology is accredited by the Engineering Technology Accreditation Commission of ABET and is STCW certified by the U.S. Coast Guard.

Admission

Admission into Texas A&M University at Galveston is processed separately, and requires a separate application, from Texas A&M University - College Station. Applicants must apply for any program on the Galveston campus via www.applytexas.org (https://www.applytexas.org). The SAT or the ACT admission examinations are acceptable. Students should have the scores forwarded to Texas A&M University at Galveston (Code 6835 for SAT and Code 6592 for ACT).

To obtain an enrollment packet or schedule a campus visit, call toll free at 1-87-SEAAGGIE, write Student Relations Office, Texas A&M University at Galveston, P. O. Box 1675, Galveston, TX 77553-1675, or visit www.tamug.edu (http://www.tamug.edu/admissions)/admissions. Acceptance by the Office of Admissions does not constitute admission to the U.S. Maritime Service License Option Program. When admission requirements have been satisfied, the Office of Enrollment Services will send the applicant a letter of acceptance.

Admission Statement and Policy on Individuals with Disabling Conditions

Texas A&M University at Galveston has a strong institutional commitment to the principle of diversity in all areas. In that spirit, admission to Texas A&M University and any of its sponsored programs is open to all qualified individuals. Texas A&M does not discriminate on the basis of an individual’s disability and complies with Section 504 of the Rehabilitation Act of 1973, and the Americans with Disabilities Act (ADA) as amended in its admissions, accessibility, treatment and employment of students in its programs and activities. Services and facilities are available to students with handicaps. Individuals should contact the Office of Student Affairs if they have special needs before they commit to enrollment.

U.S. Maritime Service Corps of Cadets

Texas A&M University at Galveston houses the Texas A&M Maritime Academy, which is one of six state maritime academies in the U.S. preparing graduates for licensing as officers in the American Merchant Marine. This program provides an opportunity for students to learn how to operate and maintain an ocean-going vessel. In addition to classroom and field training during the regular school year, students will sail aboard a training vessel during three summer cruises to gain practical experience in seamanship, navigation and operations. At the conclusion of the program, cadets are tested to become licensed as officers in the U.S. Merchant Marine and may seek employment in the exciting field of marine transportation as a licensed Third Mate or Third Assistant Engineer.

The NROTC Program offers men and women an opportunity to qualify for a commission in the Navy while attending Texas A&M University at Galveston. All NROTC students are required to participate in the Texas A&M Maritime Academy Corps of Cadets. Any student may join the
NROTC Program either as a National Scholarship winner or as a non-subsidized college program student. Applications for National Scholarships can be obtained through a Navy recruiting office before the submission deadline of January 30 of the year for which the student is applying.

Mission Statement
Texas A&M University at Galveston is a special-purpose institution of higher education for undergraduate and graduate instruction in marine and maritime studies in science, engineering and business and for research and public service related to the general field of marine resources. The institution is under the management and control of the Board of Regents of The Texas A&M University System, with degrees offered under the name and authority of Texas A&M University at College Station.

Research Programs
Faculty, post-doctoral fellows, research staff and students are actively involved in research throughout the world. Research is conducted under the direction of more than 50 faculty members with funding from federal, state, private and university sources including the National Science Foundation, National Oceanic and Atmospheric Administration, National Aeronautics and Space Administration, Department of the Interior, National Institutes of Health, Department of Energy, Environmental Protection Agency, Texas General Land Office, Texas Commission on Environmental Quality, Texas Parks and Wildlife Department, CONACYT, Consortium for Ocean Leadership, Texas Institute of Oceanography and Research Development Fund. Externally funded research expenditures were over $4.1 million. Total research expenditures were over $5.6 million. Research encompasses both the basic and applied aspects of fields such as marine biology, oceanography, coastal/ocean engineering, marine geology, marine policy and management, environmental studies, conservation, business, admiralty law and coastal zone management. Research is focused largely in the areas of coastal and beach processes (e.g., physical profiling of coastal regions and erosion processes and control), marine life studies (e.g., marine mammal, fish, shellfish, algae and sea turtle biology and ecology), bay and estuary ecosystems (e.g., wetlands management and toxic contaminant analysis), geochemical cycling in marine/aquatic/communic systems and offshore/deep water environments. There are over 130 students participating in these programs. Many of the faculty researchers also have graduate appointments in TAMUG and/or TAMU departments. Approximately 40 M.S. and Ph.D. graduate students from the TAMU departments of Wildlife and Fisheries Sciences, Oceanography, Ecosystem Science and Management, Ocean/Civil Engineering, Biology and Anthropology are conducting their research under a Texas A&M University at Galveston faculty member. Undergraduate students have many opportunities to participate in research, such as the Texas Institute of Oceanography Undergraduate Student Research Program, working as student workers and technicians on funded research programs, taking independent study classes or participating in the Undergraduate Research Scholars Program. Undergraduate students may work in the laboratory and at field sites throughout the world, participate in research cruises, present results at local, national and international meetings, and serve as authors on publications.

Administrative Officers
Robert Smith III - Chief Executive Officer; Superintendent, Texas A&M Maritime Academy; Vice President, Texas A&M University
Patrick Louchouarn - Associate Vice President for Academic Affairs and Chief Academic Officer; Associate Provost, Texas A&M University
Donna C. Lang - Associate Vice President for Academic Operations
Susan Hernandez Lee - Associate Vice President for Finance
Grant W. Shallenberger - Associate Vice President for Administration and Auxiliary Services
Tammy L. Holliday - Associate Vice President for Research Operations
Antonietta S. Quigg - Associate Vice President for Research and Graduate Studies
Todd Sutherland - Assistant Vice President for Student Affairs

Facilities

Classrooms, laboratories and meeting spaces are housed within 18 major buildings on the Mitchell Campus on Pelican Island. The Ocean and Coastal Studies building is the largest and best-equipped marine research facility on the Gulf of Mexico. There are seven residence halls on campus, the James McClory Arena and the Mary Moody Northen Student Center with cafeteria services. The Jack K. Williams Library contains over 43,000 books, 35,000 bound volumes of journals and a collection of charts and maps. The training ship provides additional classroom, meeting and training space during the school year, and an additional fleet of small boats serve as floating classrooms and research stations. Texas A&M University at Galveston has telecommunications systems established to communicate statewide within The Texas A&M University System universities and agencies. The Galveston campus has direct access to the Texas A&M University computer network in College Station via remote job entry connect lines.

Housing applications are available from Texas A&M University at Galveston and should be returned with the required deposit to the Office of Student Services, Texas A&M University at Galveston, P.O. Box 1675, Galveston, TX 77553-1675.

Majors

Department of Liberal Studies

- Bachelor of Arts in Maritime Studies (p. 629)
- Bachelor of Science in University Studies, Marine Environmental Law and Policy Concentration (p. 630)
- Bachelor of Science in University Studies, Maritime Public Policy and Communication Concentration (p. 631)

Department of Marine Biology

- Bachelor of Science in Marine Biology (p. 633)
- Bachelor of Science in Marine Biology, License Option (p. 634)
- Bachelor of Science in Marine Fisheries (p. 636)

Department of Marine Engineering Technology

- Bachelor of Science in Marine Engineering Technology (p. 638)
- Bachelor of Science in Marine Engineering Technology, License Option (p. 639)

Department of Marine Sciences

- Bachelor of Science in Marine Sciences, License Option (p. 642)
- Bachelor of Science in Marine Sciences, Chemical Marine Science Track (p. 644)
- Bachelor of Science in Marine Sciences, Geological Marine Science Track (p. 645)
- Bachelor of Science in Marine Sciences, Integrated Marine Science Track (p. 646)
- Bachelor of Science in Marine Sciences, Physical Marine Science Track (p. 647)
- Bachelor of Science in Ocean and Coastal Resources (p. 650)
- Bachelor of Science in Ocean and Coastal Resources and Master of Marine Resources Management, 5-Year Degree Program (p. 648)
- Bachelor of Science in University Studies, Oceans and One Health Concentration (p. 651)

Department of Maritime Administration

- Bachelor of Science in Maritime Administration (p. 654)
- Bachelor of Science in Maritime Administration and Master of Maritime Administration and Logistics, 5-Year Degree Program (p. 653)

Department of Maritime Transportation

- Bachelor of Science in Marine Transportation (p. 656)

Minors

- Diving Technology and Methods Minor (p. 631)
- Marine Biology Minor (p. 637)
- Maritime Administration Minor (p. 655)
- Maritime Studies Minor (p. 632)
- Ocean and Coastal Resources Minor (p. 651)

Department of Liberal Studies

The Department of Liberal Studies offers an interdisciplinary undergraduate Bachelor of Arts degree in Maritime Studies, as well as a Bachelor of Science University Studies degree in Maritime Public Policy and Communication. The mission of the Department of Liberal Studies is to provide a robust intellectual foundation for students pursuing occupational and leadership roles in areas such as government, communication, business, non-governmental organizations, public policy, journalism, archeology and anthropology, museums and archives, professional diving, and preparation for graduate studies and law school. Liberal Studies students participate in a variety of national programs such as the Model United Nations, and unique international educational opportunities around the world are frequently available through courses offered in the Texas A&M University Study Abroad Programs Office (http://studyabroad.tamu.edu).

With faculty maintaining research agendas in a variety of disciplines including politics, history, mass media and communication, English, popular culture, archeology, philosophy, museum studies, anthropology, genocide studies, African-American studies, and mathematics, Liberal Studies builds within students enhanced critical thinking and strong communication skills, while emphasizing the critical nature of multicultural thinking and collaboration in a global economy.

The Department of Liberal Studies provides the skills necessary for students to:

- Lead others through critical thinking, multi-dimensional problem solving, and issue advocacy;
- Be competitive in a multicultural world increasingly interested in college graduates with interdisciplinary backgrounds;
- Inform public policy creation and decision-making from both the governmental and business perspectives;
- Earn internships in areas such as politics, law and legal affairs, communication, for-profit and non-profit organizations, and museum management;
- Prepare for graduate school and law school opportunities.
- Understand the inalienable connections between liberal education, freedom, and democracy.
Majors

- Bachelor of Arts in Maritime Studies (p. 629)
- Bachelor of Science in University Studies, Marine Environmental Law and Policy Concentration (p. 630)
- Bachelor of Science in University Studies, Maritime Public Policy and Communication Concentration (p. 631)

Minors

- Diving Technology and Methods Minor (p. 631)
- Maritime Studies Minor (p. 632)

Maritime Studies - BA

Maritime Studies (MAST) offers students a unique opportunity to examine the varied ways that humans use and impact coastal and maritime environments. Sea Aggies have the best of both worlds: all the benefits of being an Aggie, but with small classes taught primarily by PhDs who are experts in their fields. As a MAST major at Texas A&M University at Galveston, the ocean is your classroom.

By studying the history, archaeology, literature, communication and politics of maritime peoples and cultures from ancient times to present, MAST majors gain a comprehensive understanding of maritime cultural adaptations and mankind’s experience with the sea. The broad-based interdisciplinary nature of this exciting liberal arts program gives it a distinctive, international emphasis.

Employers understand that students of the liberal arts bring advanced comprehensive problem-solving capabilities to the job market. By the time they graduate, our students will have acquired valuable critical thinking, reasoning, and communication skills. They are prepared for a diverse choice of fields including, but not limited to, oil and gas administration, environmental management, state and federal agencies, historical and non-profit foundations, museums conservation and administration, mass and niche communication, nautical and contract archaeology, journalism, education, management, law school, and graduate studies in related fields.

All students are given the once-in-a-lifetime opportunity to train as a crewmember on a working 19th century tall ship, while earning college credit. Students tailor their MAST program to suit their interests; they may enroll in an internship, participate in field studies, concentrate on a particular topic with a professor of their choice, and/or study abroad for a semester. Students are encouraged to pursue at least one minor, usually in Anthropology, English, Diving or History, and many earn two.

Total Semester Credit Hours: 120
A University Studies major will be considered a student in the department that offers the concentration; the Marine Environmental Law and Policy concentration is housed in the Liberal Studies department. The student’s diploma will list Bachelor of Arts or Bachelor of Science in the same place it is currently listed, and University Studies will be listed in the place the major is currently listed. The student’s area of concentration and the two minors will be indicated on the student’s transcript.

The concentration in Marine Environmental Law and Policy requires 21 to 24 hours in coursework such as business law, admiralty law, environmental law, environmental law, environmental ethics and politics of energy and the environment. Students can choose from a wide variety of combinations to position themselves for graduate studies in environmental law, employment in environmental regulatory areas and/or industry interested in environmental protection especially in a near shore environment. The student must complete a minimum of 6 hours at the 400-level and 36 hours of 300-400 level coursework in residence at Texas A&M University at Galveston.

1 Hours must be in 100-499 courses not used elsewhere.
University Studies - BS, Maritime Public Policy and Communication Concentration

The TAMUG University Studies concentration in Maritime Public Policy and Communication (MPPC) links two important fields of professional opportunity – Public Policy and Communication. It uniquely synthesizes the study of maritime public policy/policymaking with the study of international and intercultural communication methods, laws and regulations, and activism. MPPC students will focus their plan of study within the Texas A&M University at Galveston Department of Liberal Studies (LIST), taking significant LIST coursework in public policy, political science, and communication. In addition, with a course selection pool that includes relevant curricula found in Maritime Administration and Marine Sciences, MPPC students engage a synergistic and broad interdisciplinary combination of study that is non-existent in any other major.

With an interdisciplinary approach to maritime issues in public policy and contemporary institutions and methods of global communication, MPPC is a particularly attractive offering for prospective students wishing to acquire a degree from TAMUG in something other than a STEM area. It provides students of good academic standing with a host of skills important to gaining careers in such areas as government, politics, urban planning, business, NGO’s, policymaking, mass media production and administration, journalism, public relations, teaching, and national security.

As part and parcel of the TAMUG Department of Liberal Studies, MPPC is particularly well-suited for preparing students for graduate and law schools.

Program Requirements

Core Courses
COMM 203 Public Speaking 3
COMM 365/ JOUR 365 International Communication 3
POLS 289 Special Topics in... 3
POLS 340 Introduction to Public Administration 3
Select from: 12
COMM 307/Mass Communication, Law, and Society
JOUR 301
COMM 449 Activism and Communication
PHIL 314 Environmental Ethics
POLS 231 Introduction to World Politics
POLS 347 Politics of Energy and the Environment
MARA 435 Labor Law and Policy
MARA 440 Global Economy and Enterprise Management
MARA 470 Environmental Law
MARS 432 Peak Oil, Global Warming and Resource Scarcity
MAST 336 Maritime Foreign Policy
MAST 441 Maritime Piracy
MAST 484 Undergraduate Internship

University and College Requirements
Communication (p. 21) 3
Mathematics (p. 21) 6
Life and physical sciences (p. 21) 9
Language, philosophy and culture (p. 22) 3
Creative arts (p. 23) 3
Social and behavioral sciences (p. 24) 3
American history (p. 24) 6
Government/Political science (p. 24) 6
Minor 1 15-18
Minor 2 15-18
General electives 21-27
Total Semester Credit Hours 120

Diving Technology and Methods - Minor

The minor in Diving Technology and Methods combines practical scuba training with advanced coursework highlighting the scientific and professional applications of diving. Students get hands-on experience conducting scientific diving research and gain certification as Dive Masters and Dive Instructors. Students in any major may establish a minor field of study in Diving Technology and Methods through completing 16 hours from the designated courses. A minimum of 8 hours must be completed at the 300- to 400- level.

In addition to the course requirements, students must:

• Complete a medical statement showing no contra-indications to diving or have a recreational scuba diver’s physical examination.
• Maintain a GPA of 2.5.
• Maintain good health and fitness appropriate to the level of diving required. Adverse behaviors that put the diver or other participants at risk such as the use of alcohol or certain medicines may require the diver to be removed from the program.

Program Requirements

Select from: 16
KINE 199 Required Physical Activity (Conditioning Swimming)
KINE 199 Required Physical Activity (Positive Impact Diving)
DIVE 250 SCUBA Diving I
DIVE 251 SCUBA Diving II
DIVE 330 Rescue Diving
DIVE 331 Alternative Diving Technology
DIVE 357 Dive Leadership – Divemaster
DIVE 457 Dive Leadership – Instructor
MARB 340 Tropical Marine Ecology
MARB 345 Introduction to Scientific Diving
MARB 350 Methods in Research Diving
Total Semester Credit Hours 16

Minimum of 6 hours at 300-400 level.

Must complete a medical statement or have recreational scuba divers physician examination.

Must maintain a GPA of 2.5.

Must maintain good health and fitness appropriate to the level of diving required.
Maritime Studies - Minor

The Maritime Studies minor offers students an interdisciplinary selection of courses to complement the majors offered at Texas A&M University at Galveston. The minor requires a total of 15 hours—three hours each of Anthropology, English, and History/Political Science, and 6 hours of electives to be chosen from Maritime Studies courses. The broad range of liberal arts courses offered by this minor provides an opportunity for TAMUG students in other majors to expand their knowledge and experience of maritime topics. The courses in the minor have been carefully selected for content, class size, and instructor, to give students an optimum learning experience and to enrich all of the majors offered at TAMUG.

Total Semester Credit Hours: 15

Minimum of 6 hours at 300- to 400- level.

A minimum grade of 'C' must be made in a course for it to count toward the minor.

Department of Marine Biology

The Department of Marine Biology offers undergraduate Bachelor of Science degrees in Marine Biology, Marine Fisheries, and Marine Biology-License Option from Texas A&M University. At the graduate level, the department offers Master of Science and Doctoral degrees in Marine Biology. Teaching and research facilities are located in Galveston, Texas along the shore of Galveston Bay. The semitropical climate provides students and faculty with year-round access to a variety of estuarine, coastal and pelagic marine ecosystems, including salt marshes, oyster reefs, seagrass meadows and coastal sand dunes and beaches. A state-of-the-art Sea Life Facility is available for additional hands-on experiences with marine organisms.

With a low student-to-professor ratio, undergraduate students have extensive opportunities for laboratory and field education and research at national and international locations. International educational opportunities are frequently available through courses offered in Mexico, Greece, Italy, and New Zealand through the TAMU Study Abroad Program, as well as a summer field course in Alaska.

The faculty have research expertise in marine fisheries, marine invertebrate and vertebrate zoology, marine botany, marine mammalogy, biological oceanography, wetlands ecology, marine conservation and management, biospeleology, biodiversity, seafood microbiology, genomics, toxicology, physiology and evolutionary biology.

Marine biology undergraduate students obtain employment with State and Federal agencies, private industry, environmental consulting entities, biomedical research, zoos and aquariums, and teaching. Many undergraduates pursue postgraduate studies in marine biology, as well as in the fields of medicine, veterinary sciences and environmental law.

Faculty

Alvarado-Bremer, Jaime, Associate Professor
Marine Biology
PHD, University of Toronto, 1994

Armitage Chan, Anna, Associate Professor
Marine Biology
PHD, University of California, Los Angeles, 2003

Borda, Elizabeth, Lecturer

**Marine Biology - BS**

This program explores the biological sciences through studies in the unique coastal environment. The curriculum offers broad training in general biology, while emphasizing the local flora and fauna in estuaries and the marine environment. Students receive hands-on field sampling experience as well as internship and research opportunities. Students may take electives to emphasize certain interests such as vertebrate zoology, coastal wetlands ecology, conservation, comprehensive biology, fisheries biology, mammalogy, and aquatic animal health. Students may also choose electives to allow them to pursue medical or veterinary degree programs.

Total Semester Credit Hours: 120

All electives must be chosen in consultation with, and approved by, the student's academic advisor. Unless courses are specifically listed, see University Core Curriculum at http://core.tamu.edu/ for a listing of course options for Communication; Mathematics; Life and Physical Sciences; Language, Philosophy and Culture; Creative Arts; American History; Government and Political Sciences; and Social and Behavioral Sciences. The 6-hour University Core Curriculum requirement for International and Cultural Diversity may be met with courses used to satisfy other degree requirements. Up to 4 hours of MARB 491 and/or MARB 484 may be used as marine biology elective courses in your curriculum. Please consult with your academic advisor.

A grade of C or better is required before advancing to upper level courses.
2 Indicates required courses in the Marine Biology major. These courses will be used to compute the major GPR.
3 The total hours may be increased if the student is required to take remedial math, remedial English, foreign language or International and Cultural Diversity courses.
4 There are two mathematics course requirements. The first is MATH 142 or 151. The other math course shall be selected from MATH 141, 150, 152, or PHIL 240. Depending on the math sequence selected, the number of credit hours may vary by 1 or 2 credits. Credit will not be given for both MATH 151 and MATH 142.

5 20 credit hours of biology electives required. A minimum of 12 credit hours must be taken from the following: BIOL 351; MARB 311, MARB 330, MARB 335, MARB 340, MARB 360, MARB 400, MARB 401, MARB 403, MARB 404, MARB 407, MARB 408, MARB 410, MARB 430, MARB 466; MARS 360. For the remainder of the 20 hours of marine biology electives, students may take a maximum of two mammals courses (selected from MARB 400, MARB 401, MARB 403, MARB 404, MARB 407), one of the two MARB scientific diving courses (either MARB 345 or MARB 350), or any other MARB 300-499 level classes.
6 Designated writing intensive course.
7 The Earth Science elective may be chosen from GEOL 101-499, OCNG 251-499, or METR 302.
8 MARB 408, which is offered in the Spring semester, can be substituted for MARB 430. MARB 408 is also a writing intensive course.

Marine Biology - BS, License Option

The Marine Biology License Option program allows the marine biology student to prepare for a career as an officer aboard a sea going vessel by participating in the Texas A&M Maritime Academy Corps of Midshipmen. The curriculum provides the basics of marine biology as well as courses leading toward licensing as a Third Mate of any gross tonnage upon oceans, steam, or motor vessels, in the U.S. Merchant Marine.

The Marine Biology License Option curriculum is an abbreviated version of the Marine Biology curriculum and is oriented toward field activities consistent with service aboard research vessels. Students who wish to attend a biologically-oriented graduate program, or are interested in the medical professions, are advised to take additional coursework in developmental biology, genetics, biochemistry, and physiology.

Midshipmen who enroll in and apply to graduate in this curriculum must pass the license examination for Third Mate in order to graduate from Texas A&M University. Certain USCG courses require a minimum grade of C (70%).

1 A grade of C or better is required before advancing to upper level courses.
Marine Fisheries - BS

This program provides educational opportunities in the biological sciences, with emphasis on marine management. Ecology, taxonomy, zoogeography, culture, and general biology of commercial species are emphasized. Course offerings are structured to provide not only a strong basis of formal academic instruction but also considerable hands-on field and collection experience by taking advantage of the coastal location of the University. A strong preparation in the sciences is recommended. Marine Fisheries graduates are prepared to work as fisheries managers or research biologists for state and federal agencies, ecological consulting firms, and educational institutions. Qualified degree recipients may undertake postgraduate studies in resource management, mariculture, systematics, seafood technology, and fisheries economics.

All electives must be chosen in consultation with, and approved by, the student's academic advisor. Unless courses are specifically listed, see University Core Curriculum at http://core.tamu.edu/ for a listing of course options for Communication; Mathematics; Life and Physical Sciences; Language, Philosophy and Culture; Creative Arts; American History; Government and Political Sciences; and Social and Behavioral Sciences. The 6-hour University Core Curriculum requirement for International and Cultural Diversity may be met with courses used to satisfy other degree requirements.
Marine Biology - Minor

Students in other majors may establish a minor field of study in Marine Biology through completing 16 credits of MARB course selected in consultation with a Marine Biology advisor, choosing from the courses listed below. The student must have earned a C or better in BIOL 111 and BIOL 112.

1 All MARB 300-400 level courses require BIOL 111 and BIOL 112 with a grade of “C” or better.

Department of Marine Engineering Technology

The goal of the Marine Engineering Technology (MARR) program with a license option is to produce graduates for performing engineering work in the marine sector or marine-related shore-based industries involving the design, production, operation, maintenance, and management of engineering systems and projects.

Opportunities for such work abound in the vicinity of the University, which is located just south of the fourth largest metropolis in the United States. The Houston/Galveston area has extensive port facilities, considerable commercial, recreational, and military ship traffic, and ever-increasing offshore and onshore infrastructure associated with the oil industry. Career opportunities of various kinds (e.g. operational, management, leadership, etc.) are therefore available for these graduates who are ideally suited for working on ships, at port facilities, and at shore facilities, particularly in power generation, distribution, and concomitant auxiliary support systems.

The program provides a License Option, intended for cadets of the U. S. Maritime Service Corps, who are required to pass the U. S. Coast Guard license examination, enabling them to serve as engineering officers aboard sea-going vessels.

Our goal is to produce graduates with a strong background in engineering fundamentals, mathematics, and analytical methods, which is reinforced by practical machine-shop, welding, and laboratory experiences (including several on the training ship). The curriculum builds on a foundation of basic engineering topics such as fluid mechanics, thermodynamics, electricity, drafting, and materials science to develop inter-disciplinary skills required for the practice of marine engineering. In particular, the program’s educational objectives are to produce graduates who: (1) Can specify, operate, and maintain systems used in marine and facilities power systems and associated auxiliary systems (e.g. propulsion, electrical power generation and distribution, refrigeration, and air conditioning) in support of the maritime sector (the Navy, Coast Guard, and companies operating sea-going vessels), the offshore oil and gas industry, and companies involved in facilities management or shore-based power systems; in particular, to plan, design, construct, operate, and maintain systems such as those intended to provide marine propulsion and electrical power; and (2) Are well-prepared to engage in lifelong education, professional development, and continuous improvement.

The curriculum in Marine Engineering Technology with the non-license option is to produce graduates for performing engineering work in the marine sector or marine-related shore-based industries involving the design, production, operation, maintenance, and management of engineering systems and projects.

Opportunities for such work abound in the vicinity of the University, which is located just south of the fourth largest metropolis in the U. S. The Houston/Galveston area has extensive port facilities, considerable commercial, recreational, and military ship traffic, and ever-increasing offshore and onshore infrastructure associated with the oil industry. - Bachelor of Science in Marine Engineering Technology, License Option (p. 639)

Marine Engineering Technology - BS

Texas A&M University at Galveston is a special purpose institution for teaching, research, and public service of marine and maritime studies in science, engineering, and business, leading to a degree from Texas A&M University. The goal of the Marine Engineering Technology (MARR) non-license option program is to produce graduates for performing engineering work in the marine sector or marine-related shore-based industries involving the design, production, operation, maintenance, and management of engineering systems and projects.

Opportunities for such work abound in the vicinity of the University, which is located just south of the fourth largest metropolitan in the U. S. The Houston/Galveston area has extensive port facilities, considerable commercial, recreational, and military ship traffic, and ever-increasing offshore and onshore infrastructure associated with the oil industry. Career opportunities of various kinds (e.g. operational, management, leadership, etc.) are therefore available for these graduates who are ideally suited for working on ships, at port facilities, and at shore facilities, particularly in power generation, distribution, and concomitant auxiliary support systems. The program provides a Non-License Option for students not intending to appear for the U. S. Coast Guard license examination.

Our goal is to produce graduates with a strong background in engineering fundamentals, mathematics, and analytical methods, which is reinforced by practical machine-shop, welding, and laboratory experiences (including several on the training ship). The curriculum builds on a foundation of basic engineering topics such as fluid mechanics, thermodynamics, electricity, drafting, and materials science to develop inter-disciplinary skills required for the practice of marine engineering. In particular, the program’s educational objectives are to produce graduates who: (1) Can specify, operate, and maintain systems used in marine and facilities power systems and associated auxiliary systems (e.g. propulsion, electrical power generation and distribution, refrigeration, and air conditioning) in support of the maritime sector (the Navy, Coast Guard, and companies operating sea-going vessels), the offshore oil and gas industry, and companies involved in facilities management or shore-based power systems; in particular, to plan, design, construct, operate, and maintain systems such as those intended to provide marine propulsion and electrical power; and (2) Are well-prepared to engage in lifelong education, professional development, and continuous improvement.

Total Semester Credit Hours:  123

All electives must be chosen in consultation with, and approved by, the student's academic advisor. Unless courses are specifically listed, see University Core Curriculum at http://core.tamu.edu/ for a listing of course options for Communication; Mathematics; Life and Physical Sciences; Language, Philosophy and Culture; Creative Arts; American History; Government and Political Sciences; and Social and Behavioral Sciences. The 6-hour University Core Curriculum requirement for International and Cultural Diversity may be met with courses used to satisfy other degree requirements.

Although they may count for university credit, grades form another institution below a C in engineering, mathematics and physics will not be accepted by the TAMUG engineering programs toward the degree.

1 Indicates required courses in Marine Engineering major. These courses will be used to compute the major GPR.

2 MARR students are required to earn a grade of C or better in MATH 151, PHYS 218, PHYS 208, MARE 202, MARE 205, MARE 206 and MARE 207. Failure to meet this requirement will prevent the student from continuing any sequence in which the course is a prerequisite. Although they may count for credit, grades from another institution below a C in engineering, mathematics and physics will not be accepted by the TAMUG engineering programs toward the degree.

3 Directed electives are recommended to be MARS 306, MARS 330, MARS 370, MARS 410, MARS 430, MARS 431, MARS 435 or MARS 440.

4 Designated writing intensive course.

5 Students may take any of the 400 level courses offered by the Marine Engineering Department in their senior year including standard courses such as MARE 401, MARE 402 and MARE 484, which are offered to license option students (except MARE 405).

* The total hours may be increased if the student is required to take remedial math, remedial English, computer science, foreign language or International and Cultural Diversity requirement.

Marine Engineering Technology - BS, License Option

The goal of the Marine Engineering Technology (MARR) program is to produce graduates for performing engineering work in the marine sector or marine-related shore-based industries involving the design, production, operation, maintenance, and management of engineering systems and projects.

Opportunities for such work abound in the vicinity of the University, which is located just south of the fourth largest metropolis in the United States. The Houston/Galveston area has extensive port facilities, considerable commercial, recreational, and military ship traffic, and ever-increasing offshore and onshore infrastructure associated with the oil industry. ### Total Semester Credit Hours: 137

All electives must be chosen in consultation with, and approved by, the student’s academic advisor. Unless courses are specifically listed, see University Core Curriculum at [http://core.tamu.edu/](http://core.tamu.edu/) for a listing of course options for Communication; Mathematics; Life and Physical Sciences; Language, Philosophy and Culture; Creative Arts; American History; Government and Political Sciences; and Social and Behavioral Sciences. The 6-hour University Core Curriculum requirement for International and Cultural Diversity may be met with courses used to satisfy other degree requirements. Although they may count for university credit, grades from an other institution be low a C in engineering, mathematics and physics will not be accepted by the TAMUG engineering programs toward the degree.

1 Indicates required courses in the Marine Engineering Technology License Option major. These courses will be used to compute the major GPR.
Indicates license courses leading to a USCG/STCW license endorsement or sea time credit accrual which require a minimum grade of C (70%) or better to earn the endorsement or accrual. Midshipmen will be required to repeat the course until they earn a grade of C (70%) or better. Failure to meet this requirement will prevent the student from continuing any sequence in which the course is a prerequisite.

MARR students are required to earn a grade of C or better in MATH 151, PHYS 218, PHYS 208, MARE 202, MARE 205, MARE 206, and MARE 207. Failure to meet this requirement will prevent the student from continuing any sequence in which the course is a prerequisite.

The total hours may be increased if the student is required to take remedial math, remedial English, foreign language or International and Cultural Diversity courses, or any of the six hour cruise options. The six-hour cruise options (NAUT 200, 300, and 400 or MARR 200, 300 and 400) do not add any required hours to the degree plan.

Designated writing intensive course.

Department of Marine Sciences

The mission of the Department of Marine Sciences is to provide high quality undergraduate and graduate education and research in the physical sciences related to coastal and marine environment as well as in management and policy decision-making for the utilization and preservation of marine resources. We recognize that today's professional careers demand strong interdisciplinary as well as interpersonal skills and have designed our educational programs to provide a core education in the physical sciences and the necessary training for applying this knowledge to the maintenance and improvement of our marine resources. Our faculty are actively involved in research areas involving coastal marine geology, physical oceanography, marine geochemistry, and coastal resources management that emphasize and support our degrees and course curricula. Our strength is the diversity of our faculty who utilize their experience from private, governmental, and academic careers to create extraordinary learning opportunities for students through "hands on" and "on the water" field and laboratory research as well as internships that give our students a competitive advantage for employment after graduation.

We offer a variety of majors/minors/concentrations in the subjects related to coastal and marine environments. We offer the B.S. in Marine Sciences (MARS) or in Ocean and Coastal Resources (OCRE), as well as a B.S. in University Studies (USGA) with the concentration in Oceans and One Health (OOH). Students enrolled for the MARS degree will have the opportunity to select a track in physical, chemical, geological marine sciences or an integrated track. The License Option Program (MARS/LO) is also available for the MARS majors to obtain a third mate's license upon graduation. In addition, we offer a minor in OCRE, as well as minors in Chemistry, Geology, and Oceanography through the respective departments at TAMU. Our graduate program offers the Master of Marine Resources Management (MARM). We also have a 3+2 Program in which the student can achieve the B.S. OCRE with the MARM degree in 5 years. Our faculty advise students in diverse M.S. and Ph.D. graduate degrees on our campus such as the Interdisciplinary Program in Marine Biology (MARB IDP) and programs in conjunction with TAMU’s Departments such as Oceanography (OCNG) and Landscape Architecture & Urban Planning (LAUP).

PHD, University of Texas at Austin, 1995

Anis, Ayal, Associate Professor
Marine Science
PHD, Oregon State University, 1993

Bodson, Bruce, Lecturer
Marine Science
BS, University of Arizona, 1980

Boulahouache, Chaouki, Instructional Assistant Professor
Marine Science
PHD, Syracuse University, 2002

Brinkmeyer, Robin, Assistant Professor
Marine Science
PHD, University of Bremen, Germany, 2003

Brody, Samuel, Professor
Marine Science
PHD, University of North Carolina, 2002

Brumbaugh, Fred, Lecturer
Marine Science
MS, University of Houston at Clear Lake, 1978

Coleman, Charles, Instructional Assistant Professor
Marine Science
MS, University of Houston at Clear Lake, 1986

Davlasheridze, Meri, Assistant Professor
Marine Science
PHD, Pennsylvania State University, 2013

Dellapenna, Timothy, Associate Professor
Marine Science
PHD, The College of William & Mary, 1999

Galan, Jhenny, Instructional Assistant Professor
Marine Science
PHD, University of Connecticut, 2006

Griffin, Lawrence, Professor
Marine Science
PHD, University of Texas at Austin, 1972

Highfield, Wesley, Assistant Professor
Marine Science
PHD, Texas A&M University, 2008

Hite, Gerald, Professor
Marine Science
PHD, University of Illinois at Urbana-Champaign, 1967

Jones, Glenn, Professor
Marine Science
PHD, Columbia University, 1983
Kaiser, Karl, Assistant Professor
Marine Science
PHD, University of South Carolina, 2009

Klein, Douglas, Regents Professor
Marine Science
PHD, University of Texas, 1969

Knock, Susan, Instructional Associate Professor
Marine Science
PHD, University of Texas Medical Branch at Galveston, 1989

Linton, Thomas, Instructional Assistant Professor
Marine Science
PHD, University of Michigan at Ann Arbor, 1965

Louchouarn, Patrick, Professor
Marine Science
PHD, Universite du Quebec a Montreal, 1997

Merrell, William, Professor
Marine Science
PHD, Texas A&M University, 1971

Mohler, Robert, Senior Lecturer
Marine Science
PHD, Texas A&M University, 1994

Moser, Melanie, Instructional Associate Professor
Marine Science
PHD, University of Houston, 1977

Nair, Radhika, Instructional Assistant Professor
Marine Science
PHD, University of Nevada, 2009

Park, Kyeong, Professor
Marine Sciences
PHD, College of William and Mary, 1993

Perrigo, James, Instructional Assistant Professor
Marine Science

Retchless, David, Assistant Professor
Marine Science
PHD, Pennsylvania State University, 2015

Santschi, Peter, Regents Professor
Marine Science
PHD, Universitat Bern, 1975

Schmalz, Thomas, Senior Professor Emeritus
Marine Science
PHD, University of Illinois at Urbana-Champaign, 1975

Seitz, William, Regents Professor
Marine Science
PHD, University of Texas at Austin, 1973

Townsend, Grace, Instructional Assistant Professor
Marine Science
MS, University of Houston at Clear Lake, 1983

Van Hengstum, Peter, Assistant Professor
Marine Science
PHD, Dalhousie University, Canada, 2011

Vonzharen, Wyndylyn, Senior Regents Professor
Marine Science
EDD, University of Florida, 1976

Wang, Yuxuan, Assistant Professor
Marine Science
PHD, Harvard University, 2005

Majors

• Bachelor of Science in Marine Sciences, License Option (p. 642)
• Bachelor of Science in Marine Sciences, Chemical Marine Science Track (p. 644)
• Bachelor of Science in Marine Sciences, Geological Marine Science Track (p. 645)
• Bachelor of Science in Marine Sciences, Integrated Marine Science Track (p. 646)
• Bachelor of Science in Marine Sciences, Physical Marine Science Track (p. 647)
• Bachelor of Science in Ocean and Coastal Resources (p. 650)
• Bachelor of Science in Ocean and Coastal Resources and Master of Marine Resources Management, 5-Year Degree Program (p. 648)
• Bachelor of Science in University Studies, Oceans and One Health Concentration (p. 651)

Minors

• Ocean and Coastal Resources Minor (p. 651)

Marine Sciences - BS, License Option

The license option (LO) in this curriculum leads toward a license as a deck officer in the United States Merchant Marine. This program retains the basic physical science core of the Marine Sciences curriculum, and adds coursework which prepares the student to sit for the U.S. Coast Guard examination as a Third Mate of any gross tonnage upon oceans, steam, or motor vessels. Students combine a broad base of courses in physical science and mathematics and practical instruction in seamanship and navigation with four oceanography courses. The objective of the program is to provide students with a sound intellectual and educational background to function in a scientifically and technologically advanced society, while also providing the practical hands-on training needed for employment in the maritime industry. Graduates are particularly well qualified to serve on research vessels where an understanding of the scientific purpose of the voyage is required. Students who wish to enter a physical science graduate program will need to take additional coursework in science and mathematics. Midshipmen who enroll in and apply to graduate under one of the license option curricula must complete the appropriate license examination for Third Mate or Third Assistant Engineer in order to graduate from Texas A&M University. Certain USCG courses require a minimum grade of C (70%).

All electives must be chosen in consultation with, and approved by, the student's academic advisor. Unless courses are specifically listed, see University Core Curriculum at http://core.tamu.edu/ for a listing of course options for Communication; Mathematics; Life and Physical Sciences; Language, Philosophy and Culture; Creative Arts; American History; Government and Political Sciences; and Social and Behavioral Sciences. The 6-hour University Core Curriculum requirement for International and Cultural Diversity may be met with courses used to satisfy other degree requirements.
Marine Sciences - BS, Chemical Marine Science Track

The Marine Sciences curriculum concentrates on the physical and chemical science aspects of the estuarine, coastal, and marine environment. The coastal location of the campus enables students to acquire extensive hands-on field experience in addition to a solid base of academic instruction in chemistry, geology, physics, biology, and mathematics. All marine science majors take five semesters of oceanography and an integrated, field-oriented laboratory class. In the senior year students will participate in 2 semesters of research with the faculty. The chemistry track allows the student to focus on chemical science aspects of the estuarine, coastal, and marine environment. The coastal location of the campus enables students to obtain a chemistry minor through the chemistry department at TAMU in College Station with coursework completed in Galveston. An advisor in MARS can help you select courses and facilitate the minor approval process through the TAMU department.

Marine Sciences - BS, Geological Marine Science Track

The Marine Sciences curriculum concentrates on the physical and chemical science aspects of the estuarine, coastal, and marine environment. The coastal location of the campus enables students to acquire extensive hands-on field experience in addition to a solid base of academic instruction in chemistry, geology, physics, biology, and mathematics. All marine science majors take five semesters of oceanography and an integrated, field-oriented laboratory class. In the senior year students will participate in 2 semesters of research with the faculty. The geology track allows the student to focus on geological aspects of marine sciences, preparing them to enter graduate programs in Oceanography or related disciplines or to work in companies that need expertise in this area. The track will also enable students to obtain a geology minor through the geology department at TAMU in College Station with coursework completed in Galveston. An advisor in MARS can help you select courses and facilitate the minor approval process through the TAMU department.

1 Writing intensive course.
2 Course counts towards major GPR.
3 Select courses from CHEM 300-499 (p. 712), MARS 340, MARS 360 or MARS 470, ATMO 363 or STAT 303. Only CHEM courses can be used for a chemistry minor.
4 3 hours must be International and Cultural Diversity (p. 38). This requirement can be met with courses used to satisfy other degree requirements.
Marine Sciences - BS, Integrated Marine Science Track

The Marine Sciences curriculum concentrates on the physical and chemical science aspects of the marine, estuarine, and coastal environment. The coastal location of the campus enables students to acquire extensive hands-on field experience in addition to a solid base of academic instruction in chemistry, geology, physics, biology, and mathematics. All marine science majors take five semesters of oceanography and an integrated, field-oriented laboratory class. In the senior year students will participate in 2 semesters of research with the faculty. Tracks in the curriculum enable the student to focus on chemistry, geology or the physical aspects of the ocean, or take a broader integrated approach. By following the chemistry or geology track the students are also able to obtain a chemistry or geology minor, respectively, through those departments at TAMU in College Station with coursework completed in Galveston. An advisor in MARS can help you select courses and facilitate the minor approval process through the TAMU department.

The Marine Sciences graduate has a strong, well-rounded foundation in the quantitative physical sciences with considerable field and laboratory experience. A significant number of our graduates are qualified to enter M.S. or Ph.D. programs in Oceanography or related disciplines, or they move directly into jobs in environmental monitoring, oceanographic instrumentation, pollution control, the offshore oil industry and other fields. Some Marine Science students on the integrated track choose secondary teaching in Physical Sciences, pending the completion of a teaching certification program. For information about teaching certification, go to https://secure.sbec.state.tx.us/SBECOnline/approvedprograms.asp.

Marine Sciences - BS, Physical Marine Science Track

The Marine Sciences curriculum concentrates on the physical and chemical science aspects of the estuarine, coastal, and marine environment. The coastal location of the campus enables students to acquire extensive hands-on field experience in addition to a solid base of academic instruction in chemistry, geology, physics, biology, and mathematics. All marine science majors take five semesters of oceanography and an integrated, field-oriented laboratory class. In the senior year students will participate in 2 semesters of research with the faculty. The physical track allows the student to focus on the currents, mixing and other physical aspects of marine sciences, preparing them to enter graduate programs in Oceanography or related disciplines or to work in companies that need expertise in this area.

1 Writing intensive course.
2 Course counts towards major GPR.
3 Selection may have prerequisites.
4 Select courses from CHEM 300-499 (p. 712), GEOL 300-499 (p. 784), MARS 300-499, PHYS 300-499 (p. 884), STAT 303 or ATMO 363.
5 3 hours must be International and Cultural Diversity (p. 38). This requirement can be met with courses used to satisfy other degree requirements.
Students who choose not to finish the MARM degree after being admitted to the 5-year program may exit the program at any time. Completed MARM courses will be applied to their bachelor's degree in Ocean and Coastal Resources, as appropriate. Failure to complete the MARM program will in no way impede their ability to attain a bachelor's degree in Ocean and Coastal Resources when the requirements for that degree are completed. Those who pursue the 5-year program will receive both degrees upon the completion of the 5-year program, receiving both their Bachelor of Science and the Master of Marine Resources Management degrees at the end of year five. Advising for the 5-year program is a coordinated effort by the Department of Marine Sciences undergraduate and graduate advisors and by the Office of Graduate Studies. Advising will help ensure that interested students have satisfied the prerequisite course requirements for the bachelor's degree so that they may enter the 5-year program. OCRE students can speak to Dr. Melanie Moser at moserm@tamug.edu or phone 409.740.4517. The MARM advisor is Dr. Wesley Highfield at highfiew@tamug.edu or phone 409.740.4726.

All electives must be chosen in consultation with, and approved by, the student's academic advisor. Unless courses are specifically listed, see University Core Curriculum at http://core.tamu.edu/ for a listing of course options for Communication; Mathematics; Life and Physical Sciences; Language, Philosophy and Culture; Creative Arts; American History; Government and Political Sciences; and Social and Behavioral Sciences. The 6-hour University Core Curriculum requirement for International and Cultural Diversity may be met with courses used to satisfy other degree requirements.

Students in the 5-year program will take 12 fewer undergraduate credit hours than the other OCRE students. Graduate courses taken in the fourth and fifth year will be counted as credit towards the OCRE degree.

The total undergraduate hours prior to entering the 5-year program is 101. After starting the 5-year program, 6 additional undergraduate hours will be taken for a total of 108 undergraduate hours. The total graduate credit hours is 36. Substituting 6 hours of MARM electives for one free and one professional elective and applying 6 hours of credit by exam results in a total of 150 hours. The total hours may be increased if the student is required to take remedial math, remedial English, foreign language or International and Cultural Diversity courses.

Course adjustments will be allowed for 6 hours of undergraduate elective credit to use 6 hours of MARM elective credits.

1 Indicates required courses in the Ocean and Coastal Resources major. These courses will be used to compute the major GPR. Also, if any upper level MARS or OCNG elective courses are taken, they will be used in the major GPR.

2 Designated writing intensive course.

3 Field Experience may also be met with MARB 300 plus one credit hour of a field oriented lab course.

4 Recommended professional electives include but are not limited to: CHEM 316, CHEM 318, MARA 470, MARB 320, MARB 340, MARB 345, MARB 423, MARB 432, MARB 438, MARB 445, MARB 305, MARB 330, MARB 370/GEOG 370, MARB 410, MARB 415, MARB 432, MARB 435, MARB 440, MARB 484, MARB 485, MARB 491 or MARB 489.

5 Credit by exam for MARS 325 and ECON 203 will be awarded after successful completion of MARS 625 and MARA 604, respectively.
The 36-hour professional track curriculum is structured with 24 hours of required courses and 12 hours of optional elective courses. The required courses include a 1 hour seminar to be taken in the student’s first year, 8 hours of management, 3 hours of Geographic Information Systems (GIS), 6 hours of resource economics and statistical methods, and 6 hours of law/policy courses. The student in the professional track will choose electives for the remaining 12 credit hours. See MARM curriculum pages of the graduate catalog for additional requirements for the research track (thesis option) curriculum.

Ocean and Coastal Resources - BS

Ocean and Coastal Resources (OCRE) graduates often operate at the interface between government and businesses with scientific operations. They can navigate the regulatory path from either the side of the developer or the permitting agency. This degree program prepares students with regard to the economic, environmental and social issues related to the development of marine and coastal resources, while providing them with the scientific background needed to understand these issues. These resources include fisheries, oil and gas, ocean mining, beach sand, wetlands and others. The OCRE degree provides a foundation in oceanography, geology, chemistry, biology and physics with additional coursework in geological and biological sciences, along with economics, political science and management. The OCRE curriculum is oriented toward the societal and environmental impacts of ocean science. Many of the resource development issues in today’s world center around environmental pollution, sustainable development, biological diversity, fisheries and mariculture or oil and gas development. There is good demand for trained entry-level personnel from both government and industry for individuals who understand and can use scientific information in the planning and management process, but who are not themselves bench or field scientists. A significant number of our graduates chooses to enter graduate programs in resource management or policy.

Students in OCRE may choose to establish a minor field of study, for example in Economics (TAMU) or in Maritime Administration (TAMUG) through completion of credits as outlined in the available minors curriculum pages. A minor in Ocean and Coastal Resources is available for students of other majors. Obtaining a minor from a department located at TAMU in College Station with coursework completed in Galveston is possible. An advisor in MARS can help you select courses and facilitate the minor approval process through another department.

**University Studies - BS, Oceans and One Health Concentration**

Oceans and One Health is an interdisciplinary program that allows the student to explore human, animal or environmental health issues associated with the marine and coastal communities. Students may pursue this degree program as a pathway to Medical, Dental or Veterinary School or as a stand-alone degree to address any of a number of health-related issues that result from urbanization of coastal areas or increased development of marine environments. The curriculum is designed to be flexible so that students can choose their focus from the diverse list of concentration electives. It also is rigorous enough to provide students headed for professional or graduate school with a solid background in health-related disciplines and environmental sciences.

This concentration is housed in the Marine Sciences Department (p. 642).

**Program Requirements**

**Core Courses**

- OCNG 251 Oceanography and Oceanography Laboratory
- MARS 360 Biochemistry
- MARS 428 Coastal Development and Human Health

**Select statistics from:**

- STAT 201 Elementary Statistical Inference
- STAT 303 Statistical Methods

**Directed electives, select 10 credit hours from:**

- BIOL 351 Fundamentals of Microbiology
- CHEM 383 Chemistry of Environmental Pollution
Department of Maritime Administration

Our Mission

The mission of the Maritime Administration Department is to educate leaders for roles in maritime commerce and service to society. We fulfill this mission by providing the highest quality instruction and curricula in our academic program; unique learning opportunities in marine and maritime industries and/or government organizations involved in coastal, marine and maritime activities; interacting with businesses, government and other organizations through the exchange of ideas and practices; disseminating knowledge through published research; and actively pursuing a collaborative and inclusive work environment.

Faculty

Maritime Administration
MA, Yale School of Management, 1982
MS, University of Bridgeport, 1980

Donelan, Michael, Lecturer
Maritime Administration
MBA, Tulane University, 1981

Duru, Okan, Assistant Professor
Maritime Administration
PHD, Kobe University, 2012

Fanning, Travis, Lecturer
Maritime Administration
JD, Roger Williams University School of Law, 2005

Fitzhugh, Thomas, Lecturer
Maritime Administration
JD, University of Texas School of Law, 1976

Franklin, Carter, Visiting Lecturer
Maritime Administration
PHD, Purdue University, 1968

Ghareghozli, Amir, Assistant Professor
Maritime Administration
PHD, Rotterdam School of Management, 2012

Glenn, William, Lecturer
Maritime Administration
BS, Texas A&M University, 1981

Hark, John, Lecturer
Maritime Administration
BS, Texas A&M University, 1989

Knox, Kris, Instructional Associate Professor
Maritime Administration
PHD, University of Texas HSC at Houston, 1992

Mileski, Joan, Professor
Maritime Administration
PHD, University of Texas at Dallas, 2000

Mykoniatis, Nikolaos, Instructional Assistant Professor
Maritime Administration
PHD, The Pennsylvania State University, 2013

Wang, Ping, Assistant Professor
Maritime Administration
PHD, The Ohio State University, 2007

Wang, Wen-Yao, Associate Professor
Maritime Administration
PHD, Texas A&M University, 2008

Waterworth, Leonard, Executive Professor
Maritime Administration
MS, US Army War College, 2000

Wiseman, Melissa, Visiting Lecturer
Maritime Administration
PHD, Texas Tech University, 1999
Majors

- Bachelor of Science in Maritime Administration (p. 654)
- Bachelor of Science in Maritime Administration and Master of Maritime Administration and Logistics, 5-Year Degree Program (p. 653)

Minors

- Maritime Administration Minor (p. 655)

Maritime Administration - 5-year bachelor of science/master of maritime administration and logistics

This program allows Maritime Administration (MARA) majors to enter the graduate program for a Master of Maritime Administration and Logistics at the beginning of their senior year, enabling students to receive their MARA undergraduate degree (B.S.) and a Master of Maritime Administration and Logistics (MMAL) graduate degree in five years.

Students admitted to the 5-year degree program will have completed 92 of the 120 hours of course work required to receive a bachelor's degree. These courses must include the specific prerequisites for a Bachelor of Science degree in Maritime Administration, as well as the required Texas A&M University core curriculum courses.

Maritime Administration majors who have at least a 3.25 GPA and who have taken all of their prerequisite courses and otherwise completed 92 hours by the fall of their fourth year will be eligible to apply for the 5-year program during their junior year. Applicants to the 5-year program will submit the same materials (including GMAT scores) as other MMAL applicants, and those whose records are judged to be competitive by the mid-January deadline will be admitted. Admission criteria will be the same as for other MMAL students.

Students who choose not to finish the MMAL degree after being admitted to the 5-year program may exit the program at any time. Completed MMAL courses will be applied to their bachelor's degree in Maritime Administration, as appropriate. Failure to complete the MMAL program will in no way impede their ability to attain a bachelor's degree in Maritime Administration when the requirements for that degree are completed. Those who pursue the joint program will receive both degrees upon completion of the entire 5-year program. Students will not graduate with a bachelor's degree in year four, but rather will earn both their Bachelor of Science and Master of Maritime Administration and Logistics at the end of year five.

Admitted students will be enrolled in Maritime Administration and Logistics graduate courses with an undergraduate classification (U4) during the fall of their fourth year and will be re-classified as degree seeking master's students (G7) upon completing 107 credit hours. This will normally occur at the beginning of the spring semester of year four. Students will take 9 fewer undergraduate credit hours. Graduate courses taken in the fifth year program will be counted double, as credit towards their MMAL degree and as substitutes for MARA and free electives required for the bachelor's degree.

Students will be required to complete 36 graduate hours. The graduate hours will include 7 core courses (21 credits) in economics, management, operations and logistics with 15 credit hours of electives. The electives will be chosen according to the interest of the student in either the Maritime Policy and Law track or the Shipping and Port Management track. Students will also take 21 hours of undergraduate level MARA electives that must include MARA 416 in order to satisfy the TAMU intensive writing requirement.

The Maritime Administration undergraduate curriculum provides a solid background in the key areas of accounting, finance, marketing, law, economics and mathematics that are critical for today's business professional. These courses lay the foundation for more advanced courses in international trade, inland waterways management, brokerage and chartering, organizational behavior, transportation economics, port and terminal management and other areas related to the maritime industry.

International trade is expanding as a result of the general increase in world-wide economic and political stability and this trend is expected to increase, as major economies such as China and Russia participate more fully in world-wide economic growth. The great majority of this expanded trade will be carried by ship. As a result, activity in American ports is expected to more than double in the next 20 years, and some ports in the Gulf of Mexico are expected to see a tripling of port activity. Additionally, the next 40 years will see greatly expanded oil and gas production in the deep waters of the western Gulf of Mexico. Taken together, these forces are now and will continue to positively affect demand for trained maritime professionals ashore. Maritime Administration graduates are ideally poised to meet the increasing demand for well educated maritime professionals.

Additionally, qualified undergraduate students have the opportunity to earn a Bachelor of Science and a Master of Maritime Administration and Logistics (http://www.tamug.edu/mara/mmal) in five years time through the Department of Maritime Administration’s 3+2 program.

1 Indicates required courses in the Maritime Administration major. These courses will be used to compute the major GPR. At the time of graduation, a MARA major must have a GPR of at least 2.25 in their major. A MARA major must achieve a grade of ‘C’ or better in ACCT 229, ACCT 230, ECON 202, ECON 203 and SCMT 303 as a graduation requirement. These courses may be repeated as necessary to meet this requirement, and the requirement applies to courses taken at TAMUG or offered for transfer from other institutions.

2 Students may satisfy the 9-credit hours of Life and Physical Science requirement through any combination of one, three or four credit hour courses.

3 Students are required to complete 21 credit hours of MARA electives that must include MARA 416 to satisfy the intensive writing requirement. Students should choose 6 hours from the following courses: ACCT 315, ACCT 316, ECON 311, ECON 323, ECON 452, MARA 342, MARA 401, MARA 402, MARA 416, MARA 424, MARA 435, MARA 450, MARA 460, MARA 470, MARA 475, MARA 484, MARA 485, MARA 489, MARA 491, MARA 493 and SCMT 336.

4 Choose 15 credit hours from the following graduate level MMAL elective courses: MARA 604, MARA 616, MARA 640, MARA 650, MARA 652, MARA 658, MARA 660, MARA 670, MARA 672, MARA 673, MARA 675, MARA 684, MARA 685, MARA 689, MARA 691, MARS 620, MARS 640, MARS 660, MARS 676.

5 Credit by examination given for MARA 363 and MARA 466.

All electives must be chosen in consultation with, and approved by, the student's academic advisor. Unless courses are specifically listed, see University Core Curriculum at [http://core.tamu.edu/](http://core.tamu.edu/) for a listing of course options for Communication; Mathematics; Life and Physical Sciences; Language, Philosophy and Culture; Creative Arts; American History; Government and Political Sciences; and Social and Behavioral Sciences. The 6-hour University Core Curriculum requirement for International and Cultural Diversity may be met with courses used to satisfy other degree requirements.

The total hours may be increased if the student is required to take remedial math, remedial English, foreign language or International and Cultural Diversity courses.

To earn the economics minor, the student's elective hours must include ECON 311, ECON 323 and ECON 452. For additional requirements of the economics minor, please see the website: [http://www.tamug.edu/academics/Minors.html](http://www.tamug.edu/academics/Minors.html).

¹ Indicates required courses in the Maritime Administration major. These courses will be used to compute the major GPR. ² Students may satisfy the 9-credit hours of Life and Physical Science requirement through any combination of one, three or four credit hour courses.

³ Students should select 18 hours from the following courses: ACCT 315, ACCT 316, ECON 311, ECON 323, ECON 452, MARA 342, MARA 401, MARA 402, MARA 416, MARA 424, MARA 435, MARA 450, MARA 460, MARA 470, MARA 475, MARA 484, MARA 485, MARA 489, MARA 491, MARA 493 and SCMT 336.

⁴ Designated writing intensive course.

---

**Maritime Administration - Minor**

The Minor in Maritime Administration is designed to provide the student with fundamental knowledge in the business of water transportation. Students are required to complete 18 credit hours consisting of 12 hours of required coursework in general business and the maritime industry, and 6 credit hours from an approved list of maritime course electives.

Department of Maritime Transportation

This program combines studies in the humanities and sciences with instruction and training in maritime disciplines to provide the U.S. Maritime Service Cadet with a broad-based education. The student who successfully completes the license program will be qualified to sit for the U.S. Coast Guard license examination as a Third Mate of any gross tonnage upon oceans, steam, or motor vessels and issuance of Standards of Training, Certification and Watchkeeping (STCW) credentials. Cadets are also provided with solid fundamentals in business topics related to the maritime industry, ashore and afloat. Cadets who enroll in and apply to graduate in Marine Transportation must successfully complete the license examination for Third Mate in order to graduate from Texas A&M University.

Courses earning USCG or STCW qualifications, sea-time remission or STCW competency certification require a minimum grade of C (70%). In addition, all STCW proficiencies must be satisfactorily completed with a grade of 70% or better (See applicable course outlines available through the department).

All electives must be chosen in consultation with, and approved by, the student’s academic advisor. Unless courses are specifically listed, see University Core Curriculum at http://core.tamu.edu/ for a listing of course options for Communication; Mathematics; Life and Physical Sciences; Language, Philosophy and Culture; Creative Arts; American History; Government and Political Sciences; and Social and Behavioral Sciences. The 6-hour University Core Curriculum requirement for International and Cultural Diversity may be met with courses used to satisfy other degree requirements.

1 Indicates required courses in the Marine Transportation major. These courses will be used to compute the major GPR, which must be at least 2.25.

2 Indicates license courses leading to a USCG/STCW license endorsement or sea time credit accrual which require a minimum grade of C (70%) or better. MART 307 GMDSS requires a score of 75% or better.

3 Indicates a course that satisfies the writing intensive course requirements of the university.

4 Although not STCW required (Assessment) courses, MART students are required to earn a grade of C or better in MART 201, MART 312, MART 422, MART 404, MART 309 and approved electives in field. Approved Electives in Field include but are not limited to ACCT 229; MART 308, MART 311, MART 407, MART 489, MARA 304, MARA 342, MARA 363, MARA 401, MARA 402, MARA 424, MARA 440, MARA 460.

5 The total hours may be increased if the student is required to take remedial math, remedial English, foreign language or International and Cultural Diversity courses, or any of the six hour cruise options. The six hour cruise options (NAUT 200, NAUT 300 and NAUT 400 or MARR 200, MARR 300 and MARR 400) do not add any required hours to the degree plan.
Texas A&M University at Qatar

Administrative Officers
Interim Dean - Ann L. Kenimer
Vice Dean - Eyad A. Masad
Assistant Dean for Academic and Student Services - Troy Bickham
Assistant Dean for Finance and Administrative Services - Rosalie Nickles
Assistant Dean for Research and Executive Director of Development, Engagement and Outreach - Hassan S. Bazzi

General Statement
Texas A&M’s branch campus in Qatar, part of the 2,500-acre multi-institutional campus known as Education City formally opened on September 7, 2003, offering undergraduate degree programs in chemical, electrical, mechanical, and petroleum engineering. Texas A&M’s engineering program is widely considered among the best in America, and the curricula offered at the Qatar campus are materially the same as those offered at the main campus located in College Station, Texas. Texas A&M University at Qatar is fully funded by the Qatar Foundation for Education, Science, and Community Development and provides a unique opportunity for the University to expand its international presence and provide educational and research opportunities for faculty and students.

Programs of Study at Texas A&M University at Qatar
Texas A&M University’s College of Engineering strives to provide its students with a high-quality education that will prepare them for a wide range of careers at the forefront of the engineering field. The curriculum is designed to accomplish this by closely integrating cutting-edge basic and applied research with innovative classroom instruction. Texas A&M University's engineering programs are routinely ranked among the best in the U.S., and graduates are highly sought-after to provide leadership and innovative solutions to global challenges.

Our faculty members maintain active research programs in a wide range of areas. In addition, our undergraduate students participate in numerous co-op and internship programs, which give them the opportunity to apply their knowledge to real-world challenges in a variety of settings.

At Texas A&M University at Qatar, engineering students take courses in the fundamental disciplines—mathematics, sciences, and liberal arts—that will prepare them for the rigorous technical training that follows. This training is dedicated to specialized studies in one of the four engineering fields offered at Texas A&M University at Qatar. After completing intensive, demanding course work and practical experience, students are ready to step into their professional fields and make immediate, meaningful contributions.

Admission
The online application for undergraduate admission may be found at www.qatar.tamu.edu/apply. Additional information may be obtained by calling +974 (4423-0043), or by visiting the Office of Admissions at the Engineering Building located in Education City, Doha, Qatar. To be considered a candidate for admission to Texas A&M University at Qatar, the prospective student must formally apply by submitting all of
the required documents and test scores and meeting all of the admission requirements. Required documents may include the following:

1. Completed application
2. Passport copy (resident permit if required)
3. Official high school/secondary school transcript
4. Official college/university and/or Academic Bridge Program transcripts (if applicable)
5. Official test scores
6. Essay
7. Resume/Curriculum Vitae
8. Reference forms
9. Application fee

Facilities
The Texas A&M at Qatar Engineering Building is one of the most advanced facilities for engineering education in the world. Designed by the Mexican architect Ricardo Legoretta, the 55,000 square meter (592,000 square feet) facility combines modernist elements with traditional Islamic architectural motifs. The building is fully wireless and features high-tech classrooms, teaching laboratories and computer laboratories. The research annex provides additional research laboratories that give future Aggie engineers firsthand experience.

Texas A&M at Qatar’s home in Education City also includes a library with a core professional collection of 10,000 titles and a number of journals and DVDs relating to the liberal arts, humanities, and basic sciences. Students also have access to books and journals from the libraries on the main campus, from collections that exceed 5 million volumes. Extensive online resources are available to students in the library and remotely, including more than 2 million electronic books and thousands of subscription electronic journals and databases.
Course Descriptions

All undergraduate courses offered in the University are described on each subject page. The course numbering scheme is as follows: 100–199, primarily open to freshmen; 200–299, primarily open to sophomores; 300–399, primarily open to juniors; and 400–499, primarily open to seniors.

Figures in parenthesis before the course description indicate the Texas Common Course Number(s). The unit of credit is the semester hour, which involves one hour of theory or from two to four hours of practice per week for one semester of 15 weeks. Figures following the credit hours indicate the clock hours per week devoted to theory and practice, respectively. Theory includes recitations and lectures; practice includes work done in the laboratory, shop, drawing room, field or other. When courses are cross-listed, credit cannot be received for both courses. Any course may be withdrawn from the session offerings in case the number of registrations is too small to justify offering the course.

Field trips may be required for which departmental fees may be assessed to cover costs.

**AACO - Arabic & Asian Language (AACO)**

**ACCT 209 Survey of Accounting Principles**
**Credits 3. 3 Lecture Hours.**
Accounting survey for non-business majors; non-technical accounting procedures, preparation and interpretation of financial statements and internal control. May not be used to satisfy degree requirements for majors in business. Business majors who choose to take this course must do so on a satisfactory/unsatisfactory basis.

**ACCT 210 Survey of Managerial and Cost Accounting Principles**
**Credits 3. 3 Lecture Hours.**
A survey of managerial and cost accounting for non-business majors; accounting responsibility of the manager, job and process cost systems, budgeting, cost-volume-profit analysis for decision-making. May not be used to satisfy degree requirements for majors in business. Business majors who choose to take this course must do so on a satisfactory/unsatisfactory basis.
**Prerequisite:** ACCT 209.

**ACCT 229 Introductory Accounting**
**Credits 3. 3 Lecture Hours.**
(ACCT 2301, 2401) Introductory Accounting. Analysis, recording and reporting of business transactions; partnership and corporation accounting; analysis and use of financial statements.
**Prerequisite:** Sophomore classification.

**ACCT 230 Introductory Accounting**
**Credits 3. 3 Lecture Hours.**
(ACCT 2302, 2402) Introductory Accounting. Continuation of ACCT 229. Use of budgets; introduction to cost accounting; cost control techniques and methods of measuring performance.
**Prerequisites:** ACCT 229 and sophomore classification.

**ACCT 310 PERSONAL BUDGETING**
**Credits 2. 2 Lecture Hours.**

**ACCT 315 Intermediate Accounting for Non-Accounting Majors I**
**Credits 3. 3 Lecture Hours.**
Revenue recognition, principles of asset valuation, and disclosure requirements for corporations; interpretation of financial statements, rather than their preparation. May not be used as a directed or free elective for accounting majors and does not count towards the accounting requirement for the CPA exam.
**Prerequisite:** ACCT 230 and admission to upper division in Mays Business School.

**ACCT 316 Intermediate Accounting for Non-Accounting Majors II**
**Credits 3. 3 Lecture Hours.**
Includes the measurement and disclosure requirements for liabilities and stockholders’ equity, SEC registration statements, and cash flow reporting; focus on the analysis and interpretation of financial statements rather than their preparation. Does not qualify as a directed or free elective for accounting majors and does not count towards the accounting requirement for the CPA exam.
**Prerequisite:** ACCT 315 or ACCT 327.

**ACCT 320 Accounting Communications**
**Credits 3. 3 Lecture Hours.**
Development of oral and written communication skills
**Prerequisite** to successful careers in public and corporate accounting.
Prerequisite: Admission to Professional Program.

**ACCT 321 Professional Development Seminar**
**Credits 2. 2 Lecture Hours.**
Exposure to professional issues of professional accounting practice using a workshop format.
**Prerequisite:** Admission to Professional Program.
ACCT 322 Professional Development Seminar – BBA
Credit 1. 1 Lecture Hour.
Exposure to professional issues in the practice of accounting, including potential careers and employers.
Prerequisite: ACCT 327 with a grade of C or better.

ACCT 327 Financial Reporting I
Credits 3. 3 Lecture Hours.
Study of theoretical basis for financial accounting concepts and principles related to financial reporting; emphasis on measurement and accounting for assets. BBA accounting majors must earn a minimum grade of C for graduation.
Prerequisite: ACCT 230 and admission to upper division in Mays Business School.

ACCT 328 Financial Reporting II
Credits 3. 3 Lecture Hours.
Continued study of accounting concepts and principles related to reporting long-debt and owners’ equity; including reporting issues of leases, retirement benefits, income taxes and international accounting standards.
Prerequisite: ACCT 327 with a grade of C or better.

ACCT 329 Cost Management and Analysis
Credits 3. 3 Lecture Hours.
Theory, concepts and methods relating to use of information and design of systems to aid managers in planning, controlling, decision making, evaluating performance and reporting financial results.
Prerequisite: ACCT 315 or ACCT 327 with a grade of C or better.

ACCT 403 Energy Accounting
Credits 3. 3 Lecture Hours.
Overview of the oil and gas industry and specialized financial accounting procedures associated with the industry; emphasis on accounting for exploration, development, production, depletion and amortization, joint operations, asset impairment and retirement obligation; includes reserve accounting/disclosure related to the above topics.
Prerequisite: ACCT 327 with C or better.

ACCT 405 Income Tax
Credits 3. 3 Lecture Hours.
Introduction to federal income tax legislation pertaining primarily to corporations and individuals.
Prerequisite: ACCT 327 with a grade of C or better.

ACCT 407 Auditing
Credits 3. 3 Lecture Hours.
Introduction to auditing theory and procedures pertaining to financial statements, in the context of both external auditing, by certified public accountants, and internal auditing; preparation of working papers.
Prerequisite: ACCT 327 with a grade of C or better.

ACCT 408 Internal Auditing
Credits 3. 3 Lecture Hours.
Reading and evaluation of current theory and procedures used by internal auditors; selected case studies; statistical methods of forming auditing judgment.
Prerequisite: ACCT 327 with a grade of C or better.

ACCT 410 Fraud Examination
Credits 3. 3 Lecture Hours.
Principles and methodologies of detecting and deterring fraud using accounting, auditing, and investigative skills; includes skimming, larceny, misappropriations, fraudulent statements, interviewing witnesses and support for litigation.
Prerequisites: ACCT 327 with a grade of C or better; junior or senior classification.

ACCT 421 Critical Communication Skills for Accountants
Credits 2. 2 Lecture Hours.
Development of oral and written communication skills prerequisite to successful careers in public and corporate accounting.
Prerequisite: ACCT 327 with a grade of C or better.

ACCT 425 Corporate Tax Planning
Credits 3. 3 Lecture Hours.
Integration of tax regulations into overall corporate finance planning and decision making cycle.
Prerequisite: ACCT 405.

ACCT 426 Taxation of Low-Income Filers
Credits 3. 3 Lecture Hours.
Overview of the Federal income tax and its impact on low-income filers; includes socio-economic forces impacting low-income families and individuals; topics explored through community service and academic learning.
Prerequisites: Admission to upper division in Mays Business School and approval of instructor.

ACCT 427 Accounting and Financial Information Systems
Credits 3. 3 Lecture Hours.
Overall data flow systems emphasizing financial data and computerized systems, for accounting majors; flow and logic concepts, developing meaningful control concepts and data reporting techniques.
Prerequisite: ACCT 327 with a grade of C or better.

ACCT 445/IBUS 445 International Accounting
Credits 3. 3 Lecture Hours.
Introduction and examination of accounting issues unique to multinational enterprises and international business activity.
Prerequisites: ACCT 315 or ACCT 327; FINC 341.

ACCT 447/FINC 447 Financial Statement Analysis
Credits 3. 3 Lecture Hours.
Development of an analytical approach to financial statements, integrating relevant finance and accounting concepts and principles; current topics in financial analysis.
Prerequisites: ACCT 315 or ACCT 327; FINC 341 with a grade of C or better.
Cross Listing: FINC 447/ACCT 447.

ACCT 450 Accounting Ethics
Credits 3. 3 Lecture Hours.
Integration of ethical reasoning, objectivity, independence and other core values into the development of a professional accountant; critical analysis of the ethical lapses which have occurred in business and the accounting profession; exploring ways to integrate ethical behavior into professional life.
Prerequisites: ACCT 328; junior or senior classification.

ACCT 484 Accounting Internship
Credits 3. 6 Other Hours.
A practicum in accounting under the supervision of accounting practitioners; one semester program for each student participant. Free elective only and must be taken on a satisfactory/unsatisfactory basis.
Prerequisites: Accounting major and approval of department head.

ACCT 485 Directed Studies
Credits 1 to 3. 1 to 3 Other Hours.
Directed study of selected problems in the area of accounting not covered in other courses.
Prerequisites: Accounting major and approval of department head.
ACCT 489 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Selected topics in an identified area of accounting. May be repeated for credit.
Prerequisites: Admission to upper division in Mays Business School and approval of instructor.

ACCT 491 Research
Credits 1 to 4. 1 to 4 Lecture Hours.
Research conducted under the direction of an accounting faculty member in Mays Business School or a faculty member in the Office of Undergraduate Research. May be repeated one time for credit.
Prerequisites: Junior or senior classification and approval of instructor.

AERO - Aerospace Engineering (AERO)

AERO 101 Introduction to Aerospace Engineering
Credit 1. 1 Lecture Hour.
Overview of aerospace engineering and the aerospace industry, including requirements and assignments of an aerospace engineer, vehicle configurations and missions, aerodynamics, structures and materials, dynamics and control, simulation and testing, and aerospace engineering in the future.
Prerequisites: ENGR 111, MATH 151, PHYS 218, or registration therein.

AERO 201 Introduction to Flight
Credits 3. 3 Lecture Hours. 1 Lab Hour.
Standard atmosphere; basic aerodynamic theory; isentropic flow; airfoil and wing descriptions; distributed load systems; static equilibrium; free body diagrams; wing structures; elementary aerospace vehicle performance; aircraft stability and control; experiential introduction to aerospace engineering.
Prerequisites: Admitted to major degree sequence in aerospace engineering; grade of C or better ENGR 111, MATH 151, MATH 152, PHYS 218; grade of C or better in MATH 251 or MATH 253 or registration therein.

AERO 210 Introduction to Aerospace Mechanics
Credits 3. 3 Lecture Hours. 1 Lab Hour.
Planar kinematics; fundamentals of Newtonian mechanics; system of particles and rigid bodies; the effect of friction forces on motion and static equilibrium; rectilinear and curvilinear motion of particles; translational momentum; moments of inertia; angular momentum; planar motion of rigid bodies; impact dynamics; situations involving variable mass; introduction to orbital mechanics.
Prerequisites: Grade of C or better AERO 201; grade of C or better in MATH 308 or registration therein.

AERO 212 Introduction to Aerothermodynamics
Credits 3. 3 Lecture Hours. 1 Lab Hour.
Study of thermodynamic properties and processes, heat and work, first and second laws of thermodynamics, power and refrigeration ideal cycles, psychrometrics.
Prerequisites: Grade of C or better in CHEM 107, CHEM 117; grade of C or better in AERO 201 and MATH 251, or registration therein.

AERO 214 Introduction to Aerospace Mechanics of Materials
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Fundamental concepts for deformable bodies (conservation of linear and angular momentum, kinematics and thermoelasticity); notions of stress and strain and illustrative examples for engineering applications; introduction to experimental methods and reporting, instrumentation and uncertainty analysis; measurement of elastic and thermal material properties.
Prerequisites: Grade of C or better in PHYS 208; grade of C or better in AERO 210 and MATH 308, or registration therein.

AERO 220 Introduction to Aerospace Computation
Credits 4. 3 Lecture Hours. 3 Lab Hours.
Review of basic skills required for developing computer programs and introduction to more advanced concepts in scientific computing to solve aerospace engineering problems; numerical and analytical methods of solving engineering problems involving curve fitting; interpolation and extrapolation; difference operators and differentiation; integration; solutions to linear and non-linear equations and differential equations with engineering applications.
Prerequisites: Grade of C or better in AERO 201, ENGR 112; grade of C or better in MATH 308 or registration therein.

AERO 289 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours. 0 to 4 Lab Hours.
Selected topics in an identified area of aerospace engineering. May be repeated for credit.
Prerequisite: Approval of instructor.

AERO 291 Research
Credits 0 to 4. 0 to 4 Other Hours.
Research conducted under the direction of faculty member in aerospace engineering. May be repeated 3 times for credit.
Prerequisites: Freshman or sophomore classification and approval of instructor.

AERO 301, AERO 304, AERO 310, ECEN 215, or registration therein.

AERO 301, AERO 304, AERO 310, ECEN 215, or registration therein.

AERO 302 Aerospace Engineering Laboratory
Credits 2. 1 Lecture Hour. 3 Lab Hours.
Intermediate and advanced topics in instrumentation, signal conditioning, data acquisition analysis for aerospace-related measurements; emphasis on technical reporting and data presentation; measurements of materials strain, deformation, pressure, velocity and aerodynamic forces; experimental investigations of static and dynamic response of structures; use of nonintrusive optical techniques; uncertainty analysis; linear regression, Fourier transform and power spectra; tests for statistical significance.
Prerequisites: Grade of C or better in ENGL 104; grade of C or better in AERO 301, AERO 304, AERO 310, ECEN 215, or registration therein.

AERO 303 High Speed Aerodynamics
Credits 3. 3 Lecture Hours.
Fundamentals of compressible flow, acoustic waves, shock and expansion waves, shock-expansion theory, supersonic airfoil design, small perturbation theory, conical flow theory, supersonic wing panel methods, supersonic wing design, similarity theory, cone flow, unsteady waves, and theory of characteristics.
Prerequisite: Grade of C or better in AERO 301.
AERO 304 Aerospace Structural Analysis I
Credits 3.3 Lecture Hours.
Structural design considerations; mechanics of structures; introduction to elasticity; constitution of materials; analysis of typical aerospace structures in bending, extension, torsion and shear.
Prerequisites: Grade of C or better in AERO 214, AERO 220, MATH 308.

AERO 306 Aerospace Structural Analysis II
Credits 3.3 Lecture Hours.
Work and energy principles; analysis of indeterminate structures by classical virtual work and finite elements; introduction to elastic stability of columns; application of energy methods to determine stresses, strains and displacements in typical aerospace structures; design considerations in aerospace structures.
Prerequisite: Grade of C or better in AERO 304.

AERO 310 Aerospace Dynamics
Credits 3.3 Lecture Hours.
Spatial kinematics; general motion of particles; Euler angles; Newton-Euler methods for translation and rotation of rigid bodies; work-energy and impulse momentum principles applied to aerospace systems; Linear theory of free and forced vibrations and dynamic response of single and multi-degree of freedom systems; frequency response of first and second order systems with instrumentation applications.
Prerequisites: Grade of C or better in AERO 210, AERO 214, AERO 220, MATH 308.

AERO 321 Dynamics of Aerospace Vehicles
Credits 3.3 Lecture Hours.
Derivation of the nonlinear flight dynamics equations; linearization; aircraft static stability and control; longitudinal and lateral dynamic stability; development of state-space models; stability derivatives; longitudinal and lateral modes and transfer functions; flying qualities; elements of configuration design; response to control inputs.
Prerequisites: Grade of C or better in AERO 301 and AERO 310.

AERO 351 Aerothermodynamics and Propulsion
Credits 3.3 Lecture Hours.
Aerothermodynamics of gases; laws of thermodynamics; equilibrium conditions; mixtures of gases; combustion and thermochemistry; compressible internal flows with friction, heat transfer and shock; turbojet cycle analysis and performance; chemical rockets.
Prerequisite: Grade of C or better in AERO 303 or registration therein.

AERO 401 Aerospace Vehicle Design I
Credits 3.2 Lecture Hours. 3 Lab Hours.
Aerodynamic design, specification, arrangement, performance analysis, weight and balance, stability.
Prerequisites: Grade of C or better in AERO 302, AERO 303, AERO 306, AERO 321, AERO 351.

AERO 402 Aerospace Vehicle Design II
Credits 2.6 Lab Hours.
Continuation of AERO 401. System optimization by examination and analysis of necessary trade-offs.
Prerequisite: Grade of C or better in AERO 401.

AERO 404 Mechanics of Advanced Aerospace Structures
Credits 3.3 Lecture Hours.
Advanced analysis techniques for aerospace structures; material anisotropy, plasticity, fatigue and fracture; laminated materials; solution of plane elasticity, plate and multi-component structural configurations; buckling of beams and plates; application of finite element analysis.
Prerequisites: Grade of C or better in AERO 304 and junior or senior classification.
AERO 423 Orbital Mechanics
Credits 3.3 Lecture Hours.
Rocket fundamentals; trajectories including aerodynamics, gravity turn and trajectory optimization, orbital mechanics, orbit lifetimes, three-body problem, orbit perturbations.
Prerequisite: Grade of C or better in AERO 321.

AERO 424 Spacecraft Attitude Dynamics and Control
Credits 3.3 Lecture Hours.
Introduces fundamental concepts of satellite attitude dynamics and control; includes derivations of environmental disturbances due to gravity gradient, aerodynamic, and solar radiation pressure; includes treatments of attitude control subsystems, such as thrusters, reaction wheels, CMGs, and magnetic torquers, and their designs.
Prerequisites: Grade of C or better in AERO 321.

AERO 425 Flight Test Engineering
Credits 3.2 Lecture Hours. 3 Lab Hours.
Application of performance and stability and control theory to flight test measurements; standard atmosphere and airspeed equations for pilot-static system calibrations; flight test methods for evaluating performance, stability and control, and stall-spin characteristics; laboratory practice in planning and conducting small flight test project.
Prerequisite: Grade of C or better in AERO 321.

AERO 426 Space System Design
Credits 3.3 Lecture Hours.
Introduces prevailing practices and processes used in modern space system design; applies knowledge in component engineering disciplines to a design challenge of interest to NASA or DoD; utilizes instruction in systematic methods of design and on dynamics of teamwork; when possible concludes with detailed design using an engineering design facility.
Prerequisites: Grade of C or better in AERO 306, AERO 321, AERO 351.

AERO 428 Electromagnetic Sensing for Space-Borne Imaging
Credits 3.3 Lecture Hours.
Study IR and Visible range imaging systems to obtain high resolution imaging of objects from space; this area has numerous applications and areas of advanced development; following instruction in needed background on optics, telescopes, and interferometry, perform preliminary design of imaging system with a different imaging design offered each year.
Prerequisites: Grade of C or better in AERO 306, AERO 321, AERO 351.

AERO 430 Numerical Simulation
Credits 3.3 Lecture Hours.
Numerical and analytical simulation of physical problems in sciences and engineering using applied methods; developing and using numerical techniques for physical problems described by nonlinear algebraic equations, ordinary and partial differential equations.
Prerequisite: Grade of C or better in AERO 220 or MATH 417.

AERO 435 Aerothermochemistry
Credits 3.3 Lecture Hours.
Composition of chemically reacting gases (air and propellant); thermodynamic functions based on classical and quantum mechanical theories; calculation of gas temperatures; equilibrium, frozen and nonequilibrium flows through nozzles and shock waves.
Prerequisite: Grade of C or better in AERO 303.

AERO 440 Cockpit Systems and Displays
Credits 3.3 Lecture Hours.
Design, development, and implementation of cockpit systems and multifunction displays; cockpit system requirements and specifications; human-machine interfaces, Flight Management Systems, navigation and guidance systems; 3-D real-time displays of weather, traffic, and terrain; characteristics and missions of air vehicles; project design and cost analysis.
Prerequisite: Grade of C or better in AERO 321 or junior or senior classification in computer science.

AERO 445 Vehicle Management Systems
Credits 3.3 Lecture Hours.
Introduction to vehicle management systems for manned and unmanned air and space vehicles; system centric concepts, requirements definition, specifications, and architectures; reliability analysis, health monitoring, and mission management; SISO digital design of integrated flight control, propulsion control and structural control; introduction to vehicle autonomy; design and analysis methods, industrial examples.
Prerequisite: Grade of C or better in AERO 422.

AERO 451 Human Spaceflight Operations
Credits 3.3 Lecture Hours.
Essential aspects of human spaceflight operations as performed by NASA; in-depth understanding of the state-of-the-art in spacecraft operations, including spacecraft systems, ground and launch operations, mission management and on-orbit activities such as science, robotics, spacewalking and human health maintenance; applications to future space systems.
Prerequisite: Grade of C or better in AERO 321 or equivalent; senior classification.

AERO 452 Heat Transfer and Viscous Flows
Credits 3.3 Lecture Hours.
Navier-Stokes and boundary layer equations; exact and approximate solutions; laminar boundary layers; origin of turbulence; transition; turbulent boundary layers; viscous airfoil design; one and two dimensional heat transfer; methods for steady and transient heat conduction; thermal boundary layers; convection; and radiation.
Prerequisite: Grade of C or better in AERO 351.

AERO 472 Airfoil and Wing Design
Credits 3.3 Lecture Hours.
Subsonic airfoil design and analysis, subsonic wing design and analysis, swept and delta wings, vortex lift, transonic flow methods, viscous transonic phenomena, transonic airfoil and wing design, supersonic panel methods, supersonic wing design, optimization.
Prerequisite: Grade of C or better in AERO 303.

AERO 481 Seminar
Credit 1.1 Lecture Hour.
Readings, reports, conferences and discussion. Must be taken on a satisfactory/unsatisfactory basis.
Prerequisite: Senior classification in aerospace engineering.

AERO 485 Directed Studies
Credits 1 to 4.1 to 4 Other Hours.
Special problems in aerospace engineering assigned to individual students or groups.
Prerequisites: Senior classification; approval of department head.

AERO 489 Special Topics in...
Credits 1 to 4.1 to 4 Lecture Hours. 0 to 4 Lab Hours.
Selected topics in an identified field of aerospace engineering. May be repeated for credit.
Prerequisite: Approval of instructor.
AERO 491 Research
Credit 0 to 4. 0 to 4 Other Hours.
Research conducted under the direction of faculty member in aerospace engineering. May be repeated 3 times for credit.
Prerequisites: Junior or senior classification and approval of instructor.

AERS - Aerospace Studies (AERS)

AERS 101 Foundations of the USAF
Credit 1. 1 Lecture Hour.
Introduction to the U.S. Air Force and the Air Force Reserve Officer Training Corps (AFROTC); includes Officership, professionalism, military customs and courtesies, and officer opportunities and benefits; AFROTC cadets must register for Leadership Laboratory (AERS 105) as it complements this course with followership experience.

AERS 102 Foundations of the USAF
Credit 1. 1 Lecture Hour.
Continuation of AERS 101; AFROTC cadets must register for Leadership Laboratory (AERS 106) as it complements this course with followership experience.

AERS 105 AFROTC Leadership Lab
Credit 1. 2 Lab Hours.
Designed to give insight into the Air Force and give leadership opportunities to cadets through a variety of experiences; expected to perform a multitude of tasks in both the subordinate and superior roles. Must be taken on a satisfactory/unsatisfactory basis.

AERS 106 AFROTC Leadership Lab
Credit 1. 2 Lab Hours.
Designed to give insight into the Air Force and give leadership opportunities to cadets through a variety of experiences; expected to perform a multitude of tasks in both the subordinate and superior roles. Must be taken on a satisfactory/unsatisfactory basis.

AERS 201 Evolution of Air and Space Power
Credit 1. 1 Lecture Hour.
Examines general aspects of air and space power through a historical perspective; covers the time period from the first use of balloons to the Persian Gulf War; AFROTC cadets must register for Leadership Laboratory (AERS 105) as it complements this course with followership/leadership experience.

AERS 202 Evolution of Air and Space Power
Credit 1. 1 Lecture Hour.
Continuation of AERS 201; AFROTC cadets must register for Leadership Laboratory (AERS 106) as it complements this course with followership/leadership experience.

AERS 303 Air Force Leadership Studies
Credits 3. 3 Lecture Hours.
Leadership, management fundamentals, professional knowledge, Air Force personnel and evaluation systems, and leadership ethics; case studies of leadership and management situations as a means of demonstrating and exercising practical application of concepts; Air Force contract individuals (or those seeking a contract) must register for Leadership Lab (AERS 105).

AERS 304 Air Force Leadership Studies
Credits 3. 3 Lecture Hours.
Continuation of AERS 303; Air Force contract individuals (or those seeking a contract) must register for Leadership Lab (AERS 106).

AERS 403 National Security Affairs—Preparation for Active Duty
Credits 3. 3 Lecture Hours.
Examines the Constitution and the national security process; focuses on civilian control of the military; the roles of the Services; and the functions of the Air Force commands; Air Force contract individuals (or those seeking a contract) must register for Leadership Lab (AERS 105).
Prerequisite: Non-Air Force contract students must have approval of instructor and department head.

AERS 404 National Security Affairs—Preparation for Active Duty
Credits 3. 3 Lecture Hours.
National Security Affairs—Preparation for Active Duty. Continuation of AERS 403; Air Force contract individuals (or those seeking a contract) must register for Leadership Lab (AERS 106).
Prerequisite: Non-Air Force contract students must have approval of instructor and department head.

AERS 485 Directed Studies
Credits 1 to 3. 1 to 3 Other Hours.
Directed study of problems in the field of aerospace studies.
Prerequisites: Air Force ROTC Cadet; junior or senior classification; approval of department head.

AFST - Africana Studies (AFST)

AFST 201 Introduction to Africana Studies
Credits 3. 3 Lecture Hours.
Introduction to the field of Africana Studies: interdisciplinary approach drawing from history, philosophy, sociology, political studies, literature and performance studies; explores the African foundational relationship to and connections with its diaspora populations; covers Africa, the United States, the Caribbean, Europe and South America.

AFST 204/ENGL 204 Introduction to African-American Literature
Credits 3. 3 Lecture Hours.
Introduction to the writings of African Americans from the 18th century to the present, emphasizing the major themes and traditions.
Cross Listing: ENGL 204/AFST 204.

AFST 205/ENGL 205 Introduction to Africana Literature
Credits 3. 3 Lecture Hours.
Works, literary movements and genres of authors of African descent in the Americas, Europe and Africa.
Cross Listing: ENGL 205/AFST 205.

AFST 206/PSYC 206 Black Psychology
Credits 3. 3 Lecture Hours.
Critical examination of psychological experience, theories, and methods from perspectives grounded in the "Black experience.”
Cross Listing: PSYC 206/AFST 206.

AFST 208/PSYC 208 Stereotypes, Prejudice, and Minority Experience
Credits 3. 3 Lecture Hours.
Overview of theory and research relating to stereotyping, prejudice, discrimination, and minority experiences from a social psychological perspective.
Prerequisite: PSYC 107.
Cross Listing: PSYC 208/AFST 208.
AFST 209/PSYC 209 Psychology of Culture and Diversity  
Credits 3.3 Lecture Hours.  
Introduction to various issues surrounding an increasingly interconnected and globalized world by critically examining the dynamic relationship between psychological processes and diverse (e.g., motivation, memory, self, prejudice) socio-cultural contexts.  
Prerequisite: PSYC 107.  
Cross Listing: PSYC 209/AFST 209.

AFST 252/PHIL 252 Introduction to Hip-Hop Philosophy  
Credits 3.3 Lecture Hours.  
Introduction to philosophy by way of the major themes and subjects of Hip-Hop; critical advocacy of various philosophical ideals.  
Cross Listing: PHIL 252/AFST 252.

AFST 285 Directed Studies  
Credits 0 to 4.0 to 4 Other Hours.  
Directed studies in the field of Africana Studies. May be taken two times for credit.  
Prerequisite: Freshman or sophomore classification; approval of instructor and director.

AFST 289 Special Topics in...  
Credits 1 to 4.1 to 4 Lecture Hours.  
Selected topics in Africana Studies. May be repeated for credit.

AFST 291 Research  
Credits 0 to 3.0 to 3 Other Hours.  
Research conducted under the direction of a faculty member in Africana Studies. May be taken three times for credit.  
Prerequisites: 6 credits of AFST; freshman or sophomore classification and approval of instructor.

AFST 300/HIST 300 Blacks in the United States, 1607-1877  
Credits 3.3 Lecture Hours.  
Blacks in the United States from the colonial period to 1877; the slave trade, slavery, free blacks and the impact of the Civil War and Reconstruction on blacks.  
Prerequisite: Junior or senior classification.  
Cross Listing: HIST 300/AFST 300.

AFST 301/HIST 301 Blacks in the United States Since 1877  
Credits 3.3 Lecture Hours.  
Blacks in the United States from the end of Reconstruction to the present; ideologies of black leaders, disfranchisement, lynching and the quest for equality in the 1950s and 1960s.  
Prerequisite: Junior or senior classification.  
Cross Listing: HIST 301/AFST 301.

AFST 302 Gateway Course  
Credits 3.3 Lecture Hours.  
Gateway to a series of courses offered for the minor in Africana Studies: explores topics such as Afrocentrism, postcolonial studies, black cultural studies, black feminist theory for a close study of issues among African and African diaspora populations in Africa, the United States, Caribbean, Europe and South America.

AFST 303 Psychology of Women of Color  
Credits 3.3 Lecture Hours.  
Interdisciplinary theories to study the unique yet intersectional experiences of women from different racial groups, ethnicities, nationalities and cultural backgrounds; scholarly research from the diversity science field; contemporary topics that have developed in a global context; examination of complex issues, which affect women of color across the lifespan.  
Prerequisite: Grade of C or better in AFST 201 or PSYC 107 or WGST 200, or approval of instructor.  
Cross Listing: PSYC 303 and WGST 303.

AFST 317/SOCI 317 Racial and Ethnic Relations  
Credits 3.3 Lecture Hours.  
Status of racial and ethnic groups such as Native Americans, African Americans, Latino Americans, Asian Americans, European Americans, and other groups in the political, economic, legal and social systems of the United States.  
Prerequisite: Junior or senior classification or approval of instructor.  
Cross Listing: SOCI 317/AFST 317.

AFST 323/SOCI 323 Sociology of African Americans  
Credits 3.3 Lecture Hours.  
Major elements of the Afro-American subculture in relation to white American society and its major social institutions.  
Prerequisites: SOCI 205; junior or senior classification or approval of instructor.  
Cross Listing: SOCI 323/AFST 323.

AFST 324 Africana Social Sciences  
Credits 3.3 Lecture Hours.  
Exploration of a significant topic pertaining to Africa and/or its diaspora in the social sciences.  
Prerequisite: Junior or senior classification.

AFST 325 Africana Humanities  
Credits 3.3 Lecture Hours.  
Exploration of a significant topic pertaining to Africa and/or its Diaspora in the humanities and arts.  
Prerequisite: Junior or senior classification.

AFST 326 Africana Popular Culture  
Credits 3.3 Lecture Hours.  
Dynamics of popular culture and classic theories of society; popular and public cultural forms in context of globalization and the Africana Diaspora.  
Prerequisite: Junior or senior classification or approval of instructor.

AFST 327 Popular Musics in the African Diaspora  
Credits 3.3 Lecture Hours.  
Examination of a range of popular musics from the twentieth century that have emerged in conjunction with the historical global spread of peoples and cultures from the African continent; technical knowledge about music is not required; focus on social and cultural contexts for popular music.  
Prerequisite: Junior or senior classification or approval of instructor.  
Cross Listing: PERF 327 and MUSC 327.

AFST 329/ENGL 329 African-American Literature Pre-1930  
Credits 3.3 Lecture Hours.  
Major works of the African-American literary tradition from the 18th century to 1930 studied within cultural and historical context.  
Prerequisites: 3 credits of literature at 200-level or above.  
Cross Listing: ENGL 329/AFST 329.
AFST 339/ENGL 339 African-American Literature Post-1930  
Credits 3. 3 Lecture Hours.  
Major works of the African-American literary tradition from the 1930s to the present studied in their cultural and historical context.  
**Prerequisites:** 3 credits of literature at 200-level or above.  
**Cross Listing:** ENGL 339/AFST 339.  
AFST 344/HIST 344 History of Africa to 1800  
Credits 3. 3 Lecture Hours.  
Origins of humankind in Africa; development and spread of pastoralism, agriculture and iron-working; formation of states and empires; impact of Christianity and Islam; rise of international trade in gold, ivory and slaves; African diaspora.  
**Prerequisite:** Junior or senior classification.  
**Cross Listing:** HIST 344/AFST 344.  
AFST 345/HIST 345 Modern Africa  
Credits 3. 3 Lecture Hours.  
Survey of Africa since 1800; pre-colonial African states and societies; establishment and impact of European colonial rule; rise of nationalist movements; achievement of independence; problems of political stability and economic development in contemporary Africa; South Africa's apartheid regime and its opponents.  
**Prerequisite:** Junior or senior classification.  
**Cross Listing:** HIST 345/AFST 345.  
AFST 346/HIST 346 History of South Africa  
Credits 3. 3 Lecture Hours.  
Selected themes in the history of South Africa from the African Iron Age to the Apartheid regime; history of race relations in the 19th and 20th centuries and the rise of modern industrial state.  
**Prerequisite:** Junior or senior classification or approval of instructor.  
**Cross Listing:** HIST 346/AFST 346.  
AFST 352/PHIL 352 Africana Philosophy  
Credits 3. 3 Lecture Hours.  
Presentation of the seminal ideas of several influential Africana thinkers; recovery of the neglected traditions in which these thinkers locate themselves.  
**Prerequisite:** Junior or senior classification or approval of instructor.  
**Cross Listing:** PHIL 352/AFST 352.  
AFST 353/PHIL 353 Radical Black Philosophies of Race and Racism  
Credits 3. 3 Lecture Hours.  
Critical evaluation of white supremacy, colonialism and the modern construction of race; examination of the historical background for contemporary theories of race.  
**Prerequisite:** Junior or senior classification or approval of instructor.  
**Cross Listing:** PHIL 353/AFST 353.  
AFST 357/HIST 357 Out of Africa: The Black Diaspora and the Modern World  
Credits 3. 3 Lecture Hours.  
History and cultures of the peoples of the African Diaspora from the fourteenth through the nineteenth centuries; social, political, and economic impact on Africa, the Americas, Europe, and the Arab World; emphasis on race, gender, identity, and migration.  
**Prerequisite:** Junior or senior classification or approval of instructor.  
**Cross Listing:** HIST 357/AFST 357.  
AFST 362/HIST 302 Women and War in the African Diaspora  
Credits 3. 3 Lecture Hours.  
Case studies of women and war in the African diaspora in a wide historical and comparative context; social, economic, and cultural influence of war on women's lives; women as victims, combatants, and refugees; historical construction of race, ethnic and gender identity during times of conflict.  
**Prerequisite:** Junior or senior classification.  
**Cross Listing:** HIST 302.  
AFST 379/ENGL 379 Postcolonial Literatures  
Credits 3. 3 Lecture Hours.  
Exploration of key terms, themes and debates within global literature written by colonized, occupied and diasporic peoples.  
**Prerequisites:** 3 credits of literature at the 200-level or above.  
**Cross Listing:** ENGL 379/AFST 379.  
AFST 391 Africana Feminisms  
Credits 3. 3 Lecture Hours.  
Exploration of a significant topic in feminist theory by and about women from Africa and/or its Diaspora, from various disciplinary perspectives and historical periods, and with application to societal debates and controversies.  
**Prerequisite:** Junior or senior classification.  
AFST 393/ENGL 393 Studies in Africana Literature and Culture  
Credits 3. 3 Lecture Hours.  
Literary movements, genres, groups of authors, topics or issues in the literature and culture of people in African descent.  
**Prerequisites:** 3 credits of literature at 200-level or above; junior or senior classification or approval of instructor.  
**Cross Listing:** ENGL 393/AFST 393.  
AFST 398/FILM 398 Africana Cinema  
Credits 3. 3 Lecture Hours.  
Overview of African cinema; historical survey of cinema from Africa and the African Diaspora; introducing films produced in several geographical regions and reflecting different filmmaking traditions. May be taken two times for credit.  
**Prerequisite:** Junior or senior classification, or approval of instructor.  
**Cross Listing:** FILM 398/AFST 398.  
AFST 401 Slavery in World History  
Credits 3. 3 Lecture Hours.  
Comparative history of human slavery; slavery in the Ancient World, Asia, Africa; varieties of modern slavery in the New World since 1500; abolition of slavery and continuing forms of human bondage in the contemporary world.  
**Prerequisite:** Junior or senior classification.  
**Cross Listing:** ASIA 401 and HIST 401.  
AFST 425/COMM 425 Rhetoric of the Civil Rights Movement  
Credits 3. 3 Lecture Hours.  
Rhetorical evaluation of theoretical literature and pragmatic episodes that shaped the U.S. Civil Rights Movement; examination of significant speeches, documents, and protest activities in their historical, political, and social contexts.  
**Prerequisite:** Junior or senior classification.  
**Cross Listing:** COMM 425/AFST 425.  
AFST 481 Seminar  
Credits 3. 3 Lecture Hours.  
Comparative studies of slave societies in the modern world; history and analysis of African American feminism; comparative analyses of the social, political, and economic condition of African Americans and other African peoples of the diaspora.  
**Prerequisite:** AFST 302; junior or senior classification.
AFST 485 Directed Studies  
Credits 0 to 3. 0 to 3 Other Hours.  
Selected fields of Africana Studies not covered in depth by other courses. Reports and extensive reading required. May be repeated for credit.  
Prerequisite: Approval of director of Africana Studies.  

AFST 489 Special Topics in...  
Credits 1 to 4. 1 to 4 Lecture Hours.  
Selected topics in Africana Studies. May be repeated for credit.  

AGCJ 105 Introduction to Agricultural Communications  
Credits 3. 3 Lecture Hours.  
Introduction to mass communication, its history, role in society, and especially its unique role in agriculture; importance of mass communication and the communication methods used in modern society; foundation for an understanding of agricultural news and information; credit cannot be given for both AGCJ 105 and JOUR 102.  

AGCJ 281 Journalism Concepts for Agriculture  
Credits 3. 3 Lecture Hours.  
The role of the news media in covering government, the court systems, corporations, taxation, and insurance; a practical perspective on how journalists interact with public and private institutions from a legal, ethical and social standpoint.  
Prerequisite: AGCJ 105 or co-enrollment in AGCJ 105.  

AGCJ 285 Directed Studies  
Credits 1 to 4. 1 to 4 Other Hours.  
Directed study of selected issue in field of agricultural communications with emphasis on collection, synthesis and interpretation of information.  
Prerequisite: Approval of department advisor.  

AGCJ 289 Special Topics in...  
Credits 1 to 4. 1 to 4 Lecture Hours.  
Special topics in an identified area of agricultural development. May be repeated for credit.  
Prerequisite: Approval of department advisor.  

AGCJ 291 Research  
Credits 1 to 4. 1 to 4 Other Hours.  
Research conducted under the direction of a faculty member in Africana Studies. May be taken for a maximum of 18 hours credit.  
Prerequisites: 6 credits of AFST; junior or senior classification and approval of instructor.  

AGCJ 305 Theory and Practice of Agricultural Publishing  
Credits 3. 3 Lecture Hours.  
Audience identification, publication content, management and design; analyze existing agricultural publications, identify audiences, advertising base and content; credit cannot be given for both AGCJ 305 and JOUR 321.  
Prerequisites: AGCJ 105; junior or senior classification.  

AGCJ 306 Theory and Practice of Agricultural Public Relations  
Credits 3. 3 Lecture Hours.  
Public relations between agricultural producers and their suppliers as a critical part of agricultural communication; public relations objectives, strategies, tactics, evaluation and execution theory and practice examined; credit cannot be given for both AGCJ 306 and JOUR 324.  
Prerequisites: AGCJ 105; junior or senior classification.  

AGCJ 307 Design for Agricultural Media  
Credits 3. 2 Lecture Hours. 2 Lab Hours.  
Principles and practices of agricultural media design, including design and production of printed publications and graphics; computer assisted design and production of media pieces. Required for AGCJ majors and minors.  
Prerequisite: Junior or senior classification.  

AGCJ 308 Agricultural Photography  
Credits 3. 2 Lecture Hours. 2 Lab Hours.  
Develop knowledge of photography, editing software, and composition techniques used in the agricultural communications field; develop photography and photo editing skills to a satisfactory level as demonstrated by performance on assignments and exams.  
Prerequisite: Junior or senior classification.  

AGCJ 312 Editing for Agricultural Audiences  
Credits 3. 2 Lecture Hours. 2 Lab Hours.  
Principles and practices of editing for agricultural and technical audiences including improving and tightening copy; writing headlines, titles, and subheads; photo editing and captions, graphics and layout; print, broadcast, Interactive and other media; credit cannot be given for both AGCJ 304 and JOUR 304.  
Prerequisites: AGCJ 105; junior or senior classification.  

AGCJ 313 Agricultural Media Writing I  
Credits 3. 2 Lecture Hours. 2 Lab Hours.  
News gathering, writing, editing and ethics for current and emerging mediums used in agricultural communication; includes news identification, basic news writing methods, introduction to public relations, broadcast and Internet writing, interviewing skills, proper use of direct quotes and other news style, credit cannot be given for both AGCJ 312 and JOUR 203.  
Prerequisite: Grade of C or better in AGCJ 105 and AGCJ 313.  

AGCJ 314 Agricultural Media Writing II  
Credits 3. 2 Lecture Hours. 2 Lab Hours.  
Interpretative agricultural news gathering and writing for all media types; basic media law and ethics, interviewing skills with assigned practice writing about agriculture, and science and technology, including meeting and event coverage both on and off campus; print, broadcast, Interactive and other media; credit cannot be given for both AGCJ 314 and JOUR 303. Grade of C or better in AGCJ 312; junior or senior classification.  

AGCJ 366 Radio Broadcasting  
Credits 3. 2 Lecture Hours. 2 Lab Hours.  
Survey of American broadcasting, development, and impact; influence on society, basic principles, mass communication theory, station operating programming, advertising, rating services, regulation, and censorship; in-depth analysis of current issues and developments.  
Prerequisite: Junior or senior classification.  

AGCJ 380 Workshop in Agricultural Communications and Journalism  
Credits 1 to 4. 1 to 4 Lecture Hours.  
The study, understanding and solution of human-agricultural problems based on theory learned in the classroom, library, laboratory and fieldwork completed by individuals and teams.  
Prerequisite: Junior or senior classification.
AGCJ 404 Communicating Agricultural Information to the Public
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Use of agricultural journalism principles and techniques to communicate
scientific information related to agriculture, agribusiness, natural resources
and life sciences to the general public; communication processes include
audience identification, writing, editing and production of agricultural
science-based manuscripts for popular and refereed publications.
Prerequisite: Junior or senior classification.

AGCJ 405 Agricultural Publications Production
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Study and practice of the principles and concepts of designing, writing,
editing, producing and distributing the AgriLeader magazine and Web site;
includes practical applications of writing feature articles, magazine and
Web site design, advertising sales, layout and graphics. May be repeated
one time for credit.
Prerequisites: AGCJ 312, AGCJ 305; approval of instructor; junior or
senior classification.

AGCJ 406 Agricultural Public Relations Methods
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Agricultural public relations campaign analysis; public relations case
studies and methods including writing public relations plans for agricultural
entities, producing public relations components and evaluating public
relations objectives, strategies and tactics.
Prerequisites: AGCJ 306; junior or senior classification.

AGCJ 407 Web Authoring in Agricultural Communication
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Study and practice of basic Web site design theories, principles and
writing for the Web; use of Web authoring software (not a programming
class) to create online publications tailored for agricultural audiences;
emphasizes informative content and functional design.
Prerequisites: AGCJ 307; junior or senior classification.

AGCJ 409 Television Production for Agricultural Journalists
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Fundamental concepts required to develop a broadcast quality video
production; uses the high definition facilities of KAMU-TV and TTVN;
hands-on experience in video production including producing, shooting
and hosting a professional program series broadcast on KAMU-TV.
Prerequisite: Junior or senior classification.

AGCJ 411 Audience and Communications Research Methods
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Evaluation and implementation of research designs and methods used
in audience and communications research; data collection methods and
strategies, including interviews, observations, focus groups, surveys
and content analyses, use of descriptive and comparative analyses to
develop data-driven personas and recommendations for engaging target
audiences.
Prerequisite: Junior or senior classification.

AGCJ 413 Emerging Media in Agriculture
Credits 3. 3 Lecture Hours.
Popular emerging media in agriculture to communicate, build and market
a brand online; understanding the strategy behind the posts and other
communications; create emerging media communications strategies for
academic or business entities that may be implemented upon completion
of course.
Prerequisite: AGCJ 313.

AGCJ 466 Advanced Radio Broadcasting. (2-2). Credit 3
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Advanced Radio Broadcasting. Project-based instruction; a practical guide
to producing, presenting, programming and managing a radio station.
Prerequisites: AGCJ 366; junior or senior classification or approval of
instructor.

AGCJ 481 Senior Seminar
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Identification of communication-related issues; strategic planning to
meet goals; measurable communication outcomes; writing, designing,
creating and distributing communications products to clients; measuring
effectiveness; working in teams.
Prerequisites: Grade of C or better in AGCJ 313; senior classification.

AGCJ 485 Directed Studies
Credits 1 to 4. 1 to 4 Lecture Hours.
Directed individual study of selected problems in agricultural
communications, communication methods and the communication
profession with emphasis on collection, analysis and presentation of
information.
Prerequisites: Junior or senior classification; approval of department
advisor.

AGCJ 489 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours. 0 to 4 Lab Hours.
Special topics in an identified area of agricultural communications and
journalism. May be repeated for credit.
Prerequisite: Junior or senior classification.

AGCJ 491 Research
Credits 1 to 4. 1 to 4 Other Hours.
Research conducted under the direction of faculty member in agricultural
communications and journalism. May be repeated 3 times for credit.
Registration in multiple sections of this course are possible within a given
semester provided that the per semester credit hour limit is not exceeded.
Prerequisites: Junior or senior classification and approval of department
advisor.

AGCJ 494 Internship
Credits 1 to 6. 1 to 6 Other Hours.
Supervised internship and independent study related to the student's
professional interest.
Prerequisites: Junior or senior classification; approval of department
advisor.

AGEC - Agricultural Economics (AGEC)

AGEC 105 Introduction to Agricultural Economics
Credits 3. 3 Lecture Hours.
(AGRI 2317) Introduction to Agricultural Economics. Characteristics of our
economic system and basic economic concepts; survey of the farm and
ranch firm and its organization and management; structure and operation
of the marketing system; functional and institutional aspects of agricultural
finance; government farm programs.
AGEC 217 Fundamentals of Agricultural Economics Analysis
Credits 3. 1 Lecture Hour. 4 Lab Hours.
Relates contemporary agribusiness issues to economic and financial management, illustrating their integration toward pragmatic applications in the agricultural industry; lab focuses on the integration of mathematics and economics with computer skills directed toward spreadsheets, databases, web pages, and communications software; emphasis is on writing as a critical communication skill.
Prerequisites: AGEC 105; ENGL 103 or 104; MATH 141; MATH 142; and sophomore or junior agricultural economics or agribusiness majors; or approval of department head.

AGEC 223 Establishing Agribusiness Entrepreneurship Networks I
Credit 1. 1 Lecture Hour.
Introduction to successful entrepreneurs and other professionals, identifying suggested strategies and tactics in starting and sustaining viable rural and metropolitan business ventures; emphasis on importance of how and how to develop relationships with a broad spectrum of mentors.
Prerequisite: Open to all majors.

AGEC 285 Directed Studies
Credits 0 to 4. 0 to 4 Other Hours.
Directed study of selected problems in agricultural economics.
Prerequisites: AGEC 105; freshman or sophomore classification in agricultural economics, agribusiness, or approval of instructor and department head; 2.5 GPR in major, overall, and CBK courses, if applicable; see an academic advisor in Room 214 AGLS.

AGEC 289 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Selected topics in an identified area of agricultural economics. May be repeated for credit.
Prerequisites: Freshman or sophomore classification and approval of department head.

AGEC 291 Research
Credits 0 to 4. 0 to 4 Other Hours.
Research conducted under the direction of faculty member in agricultural economics. May be repeated 3 times for credit.
Prerequisites: Freshman or sophomore classification and approval of department head; see an academic advisor in Room 214 AGLS.

AGEC 314 Marketing Agricultural and Food Products
Credits 3. 3 Lecture Hours.
Operations involved in movement of agricultural commodities from farmer to consumer via several intermediaries; functions involve buying, selling, transportation, storage, financing, grading, pricing and risk bearing; agricultural supply chain or value chain is studied in detail; marketing aspects of commodities and differentiated goods.
Prerequisites: AGEC 105 or 3 hours of economics; and junior or senior classification.

AGEC 315 Food and Agricultural Sales
Credits 3. 3 Lecture Hours.
Principles of professional sales techniques used in food and agricultural firms; develop a professional sales presentation; study current agribusiness industry professional salespersons.
Prerequisite: Junior or senior classification.

AGEC 317 Economic Analysis for Agribusiness Management
Credits 3. 3 Lecture Hours.
Quantitative methods used to address managerial problems, specifically calculus-based optimization, marginal analysis, elasticities, statistical and forecasting techniques, linear programming, and risk analysis; emphasis on theoretical aspects and applied analysis of managerial problems faced by agricultural firms.
Prerequisites: AGEC 217; ECON 322 or ECON 323; SCMT 303 or STAT 301 or STAT 302 or STAT 303; and junior or senior classification; agricultural economics, agribusiness majors only; or approval of department head.

AGEC 324 Agribusiness Entrepreneurship – Budgeting
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Case study approach to demonstrate a process for evaluating the economic feasibility of a single-enterprise rural or metropolitan business venture; relevant production, marketing and financing costs, in combination with capital ownership and overhead costs; computer spreadsheets including attention to deterministic sensitivity analyses; computer capabilities are essential.
Prerequisites: AGEC 105 or ECON 202; ACCT 209 or ACCT 210 or ACCT 229 or ACCT 230 or AGEC 330 or FINC 341 or FINC 409; junior or senior classification or approval of instructor.

AGEC 325 Principles of Farm and Ranch Management
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Agribusiness managerial decision making and analysis in different market environments; emphasis is on profit maximization; lab focuses on using computerized methods for evaluating management alternatives for farming and ranching problem situations.
Prerequisites: AGEC 105 or ECON 202; junior or senior non-agricultural economics, nonagribusiness majors only; and knowledge of Excel.

AGEC 330 Financial Management in Agriculture
Credits 3. 3 Lecture Hours.
Principles of financial management of farms, ranches, and other agribusiness firms; financial statements, financial statement analysis, time value of money, investment analysis, firm growth, risk management, credit analysis and best business management practices.
Prerequisites: AGEC 105 or 3 hours of economics; ACCT 209 or ACCT 229; and junior or senior classification.

AGEC 340 Agribusiness Management
Credits 3. 3 Lecture Hours.
Survey of management practices throughout the food marketing chain; focuses on farm and ranch suppliers, farmers and ranchers, first handlers, food processors, food distributors, and restaurants, food retailers and institutions; use of case studies and models for the purpose of evaluating firm management success.
Prerequisites: AGEC 105 or 3 hours of economics; and junior or senior classification.

AGEC 344 Food and Agricultural Law
Credits 3. 3 Lecture Hours.
Legal principles relevant to the farm family and business; characteristics of legal decisions and rules on property rights, and fencing laws; analysis of global, national, state, and local legal issues in contracts, torts, water, pollution, and natural resources.
Prerequisite: Junior or senior classification.
AGEC 350 Environmental and Natural Resource Economics  
Credits 3.3 Lecture Hours.  
Inspection of issues such as environmental degradation, population growth, recycling, water use and depletion, natural habitat protection, water and air pollution, acid deposition, fishery management, and global warming using economically derived principles and tools.  
Prerequisite: Junior or senior classification.

AGEC 401 Global Agri-Industries and Markets: Study Abroad  
Credits 3.3 Lecture Hours.  
Understanding agrindustries and markets; analysis of production; importing; exporting; provides classroom experience with an exposure to a variety of global cultures in an international setting. Course may be repeated 3 times for credit.  
Prerequisites: AGEC 105 or 3 hours of economics; junior or senior classification or approval of department head.

AGEC 402 Survey of International Agricultural Economics: Study Abroad  
Credits 3.3 Lecture Hours.  
Examine, from an international setting, the shape of international agriculture; how culture, history, politics and geography in foreign countries affect the production and management of agricultural products; agricultural policy formation; countries’ natural resources and competitive strategies; may be taken 3 times for credit.  
Prerequisites: AGEC 105 or 3 hours of economics; junior or senior classification or approval of department head.

AGEC 413 Agricultural Cooperatives  
Credits 3.3 Lecture Hours.  
Historical development and principles of cooperative associations in our economic system; organizational and operational aspects of cooperatives; legal considerations, financing, management, and member relations; and future role of cooperatives.  
Prerequisites: AGEC 105; AGEC 314; and junior or senior classification.

AGEC 414 Agribusiness and Food Market Analysis  
Credits 3.3 Lecture Hours.  
Application of economic and marketing principles to contemporary food and agribusiness marketing; practical marketing management for agribusiness firms; market analysis; and marketing strategy and planning as related to the emerging trends in the global food and agribusiness sector of the economy.  
Prerequisites: AGEC 317; FINC 341; MKTG 321; and junior or senior agribusiness majors only.

AGEC 415 Food and Agribusiness Strategic Market Planning  
Credits 3.3 Lecture Hours.  
Development of a market plan targeting the food and agribusiness market sector; market analysis; business propositions; action plans for executing the 4 P’s (Product, Price, Place, Promotion); monitoring and measurement.  
Prerequisites: AGEC 314 or MKTG 321 or MKTG 409; AGEC 315; junior or senior classification or approval of instructor.

AGEC 422 Land Economics  
Credits 3.3 Lecture Hours.  
Economic, institutional, and physical factors involved in the use and control of natural resources; includes elements of introductory land economics as a discipline, economic foundations of land economics, institutional influences on land use, and the effects of public policy on land use.  
Prerequisites: AGEC 105 or 3 hours economics; and junior or senior classification.

AGEC 423 Establishing Agribusiness Entrepreneurship Networks II  
Credit 1.1 Lecture Hour.  
Engagement opportunities with successful agri/metropolitan entrepreneurs and other professionals, focusing on strategies and tactics for starting and sustaining viable rural and metropolitan business ventures; emphasis on importance of, and how to, develop relationships with a broad spectrum of mentors.  
Prerequisites: Concurrent enrollment in AGEC 424; junior or senior classification or approval of instructor. May not enroll in AGEC 223 and AGEC 423 during the same semester.

AGEC 424 Agribusiness Entrepreneurship – Economic Analysis  
Credits 3.2 Lecture Hours. 2 Lab Hours.  
Strategic planning regarding economic feasibility of a single-enterprise rural or metropolitan business venture; emphasis on processes for developing a comprehensive enterprise budget and construction and evaluation of risk management alternatives; exchanges with “real-world” entrepreneurs, financial experts and other management personnel; computer capabilities essential.  
Prerequisites: AGEC 105 or ECON 202; ACCT 209 or ACCT 210 or ACCT 229 or ACCT 230 or AGEC 324 or AGEC 330 or FINC 341 or FINC 409; junior or senior classification or approval of instructor.

AGEC 425 Agribusiness Entrepreneurship – Financial Analysis  
Credits 3.2 Lecture Hours. 2 Lab Hours.  
Strategic planning regarding rural and metropolitan business ventures; emphasis on processes for developing comprehensive economics and financial prospectuses, including enterprise budgets, risk management planning, cash flow budgeting, net worth statements, income budgets, reconciliation statements and shock analysis; mentoring exchanges with “real-world entrepreneurs, financial experts and other management personnel.  
Prerequisites: AGEC 424; and junior or senior classification.

AGEC 429 Agricultural Policy  
Credits 3.3 Lecture Hours.  
Analysis of the causes, nature, and effects of government participation in agriculture; and interrelationship of the American agriculture and agribusiness sector with the political and economic system, public administration, and interest group representation.  
Prerequisites: AGEC 105, ECON 202 or ECON 203; ENGL 103 or ENGL 104; and junior or senior classification.

AGEC 430 Macroeconomics of Agriculture  
Credits 3.3 Lecture Hours.  
Basic functioning of U.S. economy and relationship to agriculture; the differential effects of macroeconomic policy on disposable income, interest rates, unemployment, inflation and exchange rates; impact on agricultural commodity prices, farm input costs, net farm income, farmland values and key financial indicators.  
Prerequisites: AGEC 105 or 3 hours of economics; AGEC 317 or concurrent enrollment; AGEC 429; AGEC 330 or FINC 341 or FINC 409; and junior or senior classification.

AGEC 431 Cases in Agribusiness Finance  
Credits 3.3 Lecture Hours.  
Financial management of agribusiness firms; advanced topics in financial statement analysis, liquidity management, investment analysis, and capital structure illustrated through examination of agribusiness cases.  
Prerequisites: AGEC 317; AGEC 340; FINC 341; and junior or senior agribusiness majors only.
AGEC 432 Rural Real Estate and Financial Analysis
Credits 3. 3 Lecture Hours.
Advanced topics in investment analysis; financial intermediation in agriculture; real estate markets and market analysis; and appraisal valuation.
Prerequisites: AGEC 317 (waived for nonmajors); AGEC 330 or FINC 341 or FINC 409; AGEC 422; ACCT 210 or ACCT 230; and junior or senior classification.

AGEC 434 Rural Financial Markets and Financial Planning
Credits 3. 3 Lecture Hours.
Organization, structure, conduct and regulation of lending institutions serving commercial agriculture and rural borrowers; borrower financial statement analysis, business forecasting, investment analysis and loan application process; lender credit application underwriting standards, credit scoring and loan decision making process; agricultural loan portfolio analysis.
Prerequisites: ACCT 209 or ACCT 229; ACCT 210 or ACCT 230; AGEC 330 or FINC 341 or FINC 409; junior or senior classification.

AGEC 435 Financial Planning for Professionals
Credits 3. 3 Lecture Hours.
Financial planning from a professional perspective; applying basic financial, economic and institutional concepts to advise individuals, families and small businesses in achieving their financial goals; tools and topics include financial analysis, budgeting, credit management, time value of money, investment strategies, income taxes, risk management, and retirement and estate planning.
Prerequisites: AGEC 330, FINC 409 or FINC 341; junior or senior classification.

AGEC 436 Insurance and Estate Planning
Credits 3. 3 Lecture Hours.
Insurance and estate planning for individuals, families and small businesses; applies risk management principles to evaluate various insurance products, including life, disability, long-term care, health, homeowners, auto and liability; estate planning process, tools and considerations.
Prerequisites: AGEC 330, AGEC 435, FINC 409 or FINC 341; junior or senior classification.

AGEC 437 Tax Planning
Credits 3. 3 Lecture Hours.
Applies the principles of income, gift and estate tax planning to enhance household income after taxes; understanding tax laws, reporting requirements and opportunities for planning; identify and implement useful tax planning strategies; focus on practical application for financial planning.
Prerequisites: AGEC 330, AGEC 435, FINC 409 or FINC 341; junior or senior classification.

AGEC 438 Investment Planning
Credits 3. 3 Lecture Hours.
Applying investment principles considering families’ goals, time horizons, risk tolerance and tax implications to build investment portfolios; attributes of various asset classes; asset allocation, selecting securities and portfolio management; developing successful investment programs for personal investors and financial planners.
Prerequisites: AGEC 435 and junior or senior classification.

AGEC 439 Retirement Planning
Credits 3. 3 Lecture Hours.
Retirement planning basics, qualified and nonqualified retirement plans, Social Security provisions and government healthcare plans along with the basics of employee benefits; focus on both quantitative (i.e., calculating retirement needs and plan limits) and qualitative (i.e., retirement age decisions, retirement income management) aspects of retirement.
Prerequisite: AGEC 435 and junior or senior classification.

AGEC 440 Agribusiness Strategic Analysis
Credits 3. 3 Lecture Hours.
Strategic management and economic principles for the agribusiness system; problem recognition and applied managerial/economic decision making with related considerations in marketing, production, or finance for agribusiness firms.
Prerequisites: AGEC 317; AGEC 340; FINC 341; MGMT 363; MKTG 321; and junior or senior agribusiness majors only.

AGEC 441 Financial Planning Capstone
Credits 3. 3 Lecture Hours.
Financial planning process, data gathering, approaches to financial planning, analysis of financial statements and client presentation; case analysis, ethics and professional conduct, use of financial planning software, advanced financial calculator usage, and Microsoft Excel applications.
Prerequisites: AGEC 435, AGEC 436, AGEC 437, AGEC 438 and AGEC 439; junior or senior classification.

AGEC 447 Food and Agricultural Price Analysis
Credits 3. 3 Lecture Hours.
Factors influencing the level of food and agricultural prices; price trends and seasonal variation; methods of forecasting demands and prices; and futures trading.
Prerequisites: AGEC 314; AGEC 317; and junior or senior classification.

AGEC 448 Agricultural Commodity Futures
Credits 3. 3 Lecture Hours.
Activities of commodity futures exchanges; the mechanics of trading futures contracts; the use of futures trading for hedging and forward pricing; and options, basis behavior, and hedging strategies for selected commodities.
Prerequisites: AGEC 105 or 3 hours of economics; AGEC 314; AGEC 317 or concurrent enrollment; and junior or senior classification; or approval of department head.

AGEC 452 International Trade and Agriculture
Credits 3. 3 Lecture Hours.
Changing role of U.S. agriculture in a dynamic world economy; national and international policies and institutions affecting agriculture; and exchange rates, tariffs, and non-tariff barriers.
Prerequisites: AGEC 105 or 3 hours of economics; AGEC 314; AGEC 317 or concurrent enrollment; and junior or senior classification.

AGEC 453 International Agribusiness Marketing
Credits 3. 3 Lecture Hours.
Basic competencies in international marketing of agri-foods; and market entry, pricing, payment, finance, and promotion.
Prerequisites: AGEC 105 or 3 hours of economics; and junior or senior classification.
AGEC 460 Cross-Cutting Issues in Agricultural Economics  
Credits 3. 3 Lecture Hours.  
Examination of economic theory and its history; emphasis on the areas of agricultural business, finance, macroeconomics, management, marketing, microeconomics, quantitative analysis, resources, and economics policy; emphasis on the ability to properly analyze economic problems.  
Prerequisites: AGEC 317; AGEC 314 or MKTG 321 or MKTG 409; AGEC 330 or FINC 341 or FINC 409; AGEC 429; agricultural economics and agribusiness majors only; junior or senior classification or approval of instructor.

AGEC 481 Ethics in Agribusiness and Agricultural Economics  
Credit 1. 1 Lecture Hour.  
Examination of the principals of ethical business behavior; context created through assigned readings, guest speakers from various law enforcement branches and private industry; student written reports about their own experiences relative to this context; attention given to establishing personal principles for an ethical business career.  
Prerequisites: AGEC 217; junior or senior classification; and agricultural economics or agribusiness majors only.

AGEC 484 Internship  
Credits 0 to 6. 0 to 6 Other Hours.  
Supervised experience program conducted in the area of the student's interest in agricultural economics and agribusiness. May be taken two times.  
Prerequisite: See an advisor in Room 214 AGLS Building.

AGEC 485 Directed Studies  
Credits 0 to 6. 0 to 6 Other Hours.  
Special problems not covered by other courses. Content will depend upon problem studied.  
Prerequisite: See an advisor in Room 214 AGLS Building.

AGEC 489 Special Topics in...  
Credits 1 to 4. 1 to 4 Lecture Hours.  
Selected topics in an identified area of agricultural economics. May be repeated for credit.  
Prerequisite: Junior or senior classification.

AGEC 491 Research  
Credits 0 to 6. 0 to 6 Other Hours.  
Research conducted under the direction of faculty member in agricultural economics. May be repeated 3 times for credit. Registration in multiple sections of this course are possible within a given semester provided that the per semester credit hour limit is not exceeded.  
Prerequisites: Junior or senior classification and approval of department head; see an advisor in Room 214 AGLS Building.

AGLS 101 Modern Agricultural Systems and Renewable Natural Resources  
Credit 1. 1 Lecture Hour.  
(AGRI 1131, 1231) Modern Agricultural Systems and Renewable Natural Resources. An introduction to modern agriculture and the natural, human and scientific resources upon which it depends. Freshman or sophomore classification.

AGLS 105 Research in Agriculture and Life Sciences  
Credit 1. 1 Lecture Hour.  
An introduction to the research process as applied to agriculture, renewable natural resources and biological sciences.  
Prerequisite: Freshman classification, major in College of Agriculture and Life Sciences and approval of instructor.

AGLS 125 Life Sciences Learning Community I  
Credit 1. 1 Lecture Hour.  
Development of personal and professional competencies in the life sciences: learning styles, leadership skills, appreciation for the arts; ethics in science, problem solving skills, experimental design, data gathering and interpretation, introduction to life sciences literature, critical analysis skills, and the connectivity between life science disciplines. May be taken two times for credit.  
Prerequisites: Freshman classification and approval of instructor.

AGLS 225 Life Sciences Learning Community II  
Credit 1. 1 Lecture Hour.  
Continuation of the development of personal and professional competencies in the life sciences: ethics in science, problem solving skills, experimental design, data gathering and interpretation, examination of life sciences literature, critical analysis skills, and the connectivity between life science disciplines. May be taken two times for credit.  
Prerequisites: Freshman classification and approval of instructor.

AGLS 289 Special Topics in...  
Credits 1 to 4. 1 to 4 Lecture Hours.  
Selected topics in an identified area of agriculture and life science. May be repeated for credit.  
Prerequisite: Freshman or sophomore.

AGLS 292 Cooperative Education in Agriculture  
Credits 2. 4 Other Hours.  
Educational work assignment by a student in the field of his or her career interest and course of study; supervision of the student by the cooperating employer and the instructor; a technical report, approved by the instructor, on a related subject area required.  
Prerequisite: Approval of the college coordinator of cooperative education.

AGLS 301 College of Agriculture and Life Sciences Study Abroad  
Credits 1 to 18. 1 to 18 Other Hours.  
For students in approved programs abroad. May be repeated for credit.  
Prerequisites: Admission to approved program and approval of academic dean.

AGLS 392 Cooperative Education in Agriculture  
Credits 2. 40 Other Hours.  
Educational work assignment by a student in the field of his or her career interest and course of study. Supervision of the student by the cooperating employer and the instructor; a technical report, approved by the instructor, on a related subject area required.  
Prerequisite: AGLS 292.

AGLS 484 Internship  
Credits 0 to 6. 0 to 6 Other Hours.  
Supervised experience program conducted in the area of the student's interest in agricultural economics and agribusiness. May be taken two times for credit.  
Prerequisite: Junior or senior classification and approval of department head; see an advisor in Room 214 AGLS Building.

AGLS 489 Special Topics in...  
Credits 1 to 4. 1 to 4 Lecture Hours.  
Selected topics in an identified area of agricultural and life sciences. May be repeated for credit.  
Prerequisites: Admission to approved program and approval of academic dean.

AGLS 492 Cooperative Education in Agriculture  
Credits 2. 40 Other Hours.  
Educational work assignment by a student in the field of his or her career interest and course of study. Supervision of the student by the cooperating employer and the instructor; a technical report, approved by the instructor, on a related subject area required.  
Prerequisite: AGLS 392.

AGRO - Agronomy (AGRO)  

AGRO 418 SOIL CONSERVATION  
Credits 4. 3 Lecture Hours. 3 Lab Hours.
AGSC - Agricultural Science (AGSC)

AGSC 285 Directed Studies
Credits 1 to 4. 1 to 4 Lecture Hours.
Directed individual study of selected problems in agricultural science with emphasis on collection, analysis and presentation of information. May be repeated for credit.
**Prerequisite:** Approval of instructor.

AGSC 289 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Special topics in an identified area of agricultural science. May be repeated for credit.
**Prerequisite:** Approval of department head.

AGSC 291 Research
Credits 1 to 4. 1 to 4 Other Hours.
Research conducted under the direction of faculty member in agricultural science. May be repeated 2 times for credit.
**Prerequisites:** Freshman or sophomore classification and approval of instructor.

AGSC 301 Introduction to Agricultural Science Teaching
Credits 3. 3 Lecture Hours.
Introduction to agricultural science teaching at the secondary level; an overview of preparing teachers for a changing world including knowledge of learners, subject matter and teaching within the context of agricultural science.
**Prerequisite:** Junior or senior classification.

AGSC 305 Management of Supervised Agricultural Experiences
Credits 3. 3 Lecture Hours.
Overview of supervised agricultural experiences (SAEs) and content that can be used in the secondary agricultural science program; engagement in SAE programs; management practices for SAE projects including record keeping and student reports.
**Prerequisite:** Junior or senior classification.

AGSC 373 Managing Safety in the Agricultural Science Program
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Safety principles and procedures, methods of teaching and motivating students in agricultural mechanics; design for those preparing to teach agricultural science in Texas public schools.
**Prerequisite:** Junior or senior classification.

AGSC 380 Workshop in Agricultural Science
Credits 1 to 4. 1 to 4 Lecture Hours.
The study, understanding and solution of human-agricultural problems based on theory learned in the classroom, library, laboratory and fieldwork completed by individuals and teams.
**Prerequisite:** Junior or senior classification.

AGSC 383 Teaching Agricultural Mechanics
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Methods of teaching and motivating students in agricultural mechanics; designed for students preparing to teach agricultural science in Texas public schools.
**Prerequisites:** AGSC 301 and AGSC 373.

AGSC 384 Clinical Professional Experience in AGSC
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Clinical field experience for students preparing to teach agricultural science in public schools of Texas; through first-hand observation, students will study learning theories, individual differences, teaching methods, classroom management, curriculum, school climate and culture, and teacher roles and responsibilities.
**Prerequisite:** AGSC 301.

AGSC 402 Designing Instruction for Secondary Agricultural Science Programs
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Theory and practice in designing instruction for secondary agricultural science programs including effective planning and delivery methods; designed for students preparing to teach agricultural science in Texas public schools.
**Prerequisites:** AGSC 384; concurrent enrollment in AGSC 405.

AGSC 405 Facilitating Complete Secondary Agricultural Science Programs
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Theory and practice in facilitating secondary agricultural science programs: includes classroom instruction, supervised experience, and youth leadership development; designed for students preparing to teach agricultural science in Texas public schools.
**Prerequisites:** AGSC 384; concurrent enrollment in AGSC 402.

AGSC 425 Learner Centered Instruction in Agricultural Science
Credits 3. 3 Lecture Hours.
Preparing curriculum materials for secondary agricultural science and adult education programs.
**Prerequisites:** Grade of C or better in AGSC 402 and AGSC 405.

AGSC 436 Professional Teaching Internship in AGSC
Credits 6. 2 Lecture Hours. 12 Lab Hours.
Planning for and teaching secondary agricultural science in selected high schools in Texas; includes 12 weeks of professional teaching experience under the guidance of a university supervisor and a cooperating teacher in the school.
**Prerequisites:** Grade of C or better in AGSC 402 and AGSC 405.

AGSC 481 Seminar
Credits 1. 1 Lecture Hour.
Review of current literature and research as related to program development in light of legislation and policies affecting education in agriculture.
**Prerequisite:** Grade of C or better in AGSC 402 and AGSC 405.

AGSC 484 Field Experience
Credits 1 to 6. 1 to 6 Other Hours.
An on-the-job supervised experience program conducted in the area of the student's specialization.
**Prerequisites:** Grade of C or better in AGSC 402 and AGSC 405.

AGSC 485 Directed Studies
Credits 1 to 4. 1 to 4 Lecture Hours.
Directed individual study of selected problems in agricultural science with emphasis on collection, analysis and presentation of information. May be repeated for credit.
**Prerequisite:** Junior or senior classification; approval of instructor.

AGSC 489 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours. 0 to 4 Lab Hours.
Special topics in an identified area of agricultural science. May be repeated for credit.
**Prerequisite:** Approval of department head.
AGSC 491 Research
Credits 1 to 4. 1 to 4 Other Hours.
Research conducted under the direction of faculty member in agricultural science. May be repeated 3 times for credit. Registration in multiple sections of this course are possible within a given semester provided that the per semester credit hour limit is not exceeded.
Prerequisites: Junior or senior classification and approval of instructor.

AGSC 494 Internship
Credits 1 to 6. 1 to 6 Other Hours.
Supervised internship and independent study related to student’s professional interest.
Prerequisites: AGSC 301; junior or senior classification; 2.0 GPR; approval of instructor.

AGSM - Agricultural Systems Mgmt (AGSM)

AGSM 125 Introduction to Agricultural Systems Management
Credit 1. 2 Lab Hours.
Introduction to technical management of agricultural systems using management projects presented by agricultural managers from industry; problem definition, information search, idea generation and development of management solutions.
Prerequisite: Freshman or sophomore classification or approval of instructor; majors only.

AGSM 201 Agricultural Energy and Power Systems
Credits 3. 2 Lecture Hours. 2 Lab Hours.
(AGRI 2301) Agricultural Energy and Power Systems. A study of the types of power and energy sources used in agricultural equipment and systems; management considerations for selecting, operating and maintaining internal combustion engines, electric equipment and motors, and renewables as power sources.

AGSM 284 Internship
Credits 0. 0 Lecture Hours. 0 Lab Hours. 0 Other Hours.
No Credit. Practical experience working in a professional agricultural systems management setting. May be taken three times.
Prerequisite: Freshman or sophomore classification; approval of instructor.

AGSM 285 Directed Studies
Credits 0 to 4. 0 to 4 Other Hours.
Selected problems in any phase of agricultural systems management; credit and specific content dependent upon background, interest, ability and needs of student enrolled; individual consultations and reports required.
Prerequisites: Freshman or sophomore classification; approval of department head.

AGSM 289 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Selected topics in an identified area of agricultural systems management. May be repeated for credit.
Prerequisite: Approval of instructor.

AGSM 291 Research
Credits 0 to 3. 0 to 3 Other Hours.
Research conducted under the direction of faculty member in agricultural systems management.
Prerequisites: Freshman or sophomore classification and approval of instructor.

AGSM 301 Systems Analysis in Agriculture
Credits 3. 3 Lecture Hours.
Operations research and systems theory applied to management problems in food and agricultural industries; linear programming, queuing theory, simulation and critical path method; provides the knowledge and computer skills to better manage resources for the evolving agricultural industries.
Prerequisites: MATH 141 and MATH 142 with a grade of C or better.

AGSM 310 Agricultural Machinery Management
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Selection of a matched complement of power units and machines for farming operations; consider constraints such as crops, season, weather, personnel and capital; apply systems techniques such as linear programming, optimization, queuing theory and inventory models; utilize available software programs and learn to develop electronic spreadsheets and other customized software.
Prerequisites: AGSM 301; AGEC 330; or registration therein.*

AGSM 315/FSTC 315 Food Process Engineering Technology
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Elementary mechanics, physical properties of food and processing materials, heat transfer, temperature measurement, solar heating and cooling, refrigeration and insulation, dehydration as applied to foods and food processing.
Prerequisite: PHYS 201 or PHYS 218; junior or senior classification or approval of instructor.
Cross Listing: FSTC 315/AGSM 315.

AGSM 325 Agri-Industrial Applications of Electricity
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Elements of electric current generation and transmission, applications of electric heating, lighting and power, wiring, motors, energy rates, meter reading, safety rules and regulations.
Prerequisite: Agricultural systems management majors only or approval of instructor.

AGSM 335 Water and Soil Management
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Elementary principles of surface and ground water supply, flood control, water distribution systems and irrigation systems; principles of drainage, soil conservation and erosion control; elementary surveying, chaining, leveling and mapping applied to agricultural and natural resource needs; illustrated by practical examples of terracing and farm pond design.
Prerequisite: AGSM 301.

AGSM 337 Technology for Environmental and Natural Resource Engineering
Credits 3. 3 Lecture Hours.
For the nonengineering student in the environmental and management sciences; concentrates on the application of technology for solving local environmental problems while considering global issues; reduction of water, air and hazardous waste pollutants; legislative issues and modeling.
Prerequisites: AGSM 301 and MATH 142.

AGSM 355 Energy and Conversion Systems
Credits 3. 3 Lecture Hours.
Basic physical conversion principles of energy use, including historical and future patterns; conservation measures, alternative energy sources, and the environment impact of U.S. and world energy use.
Prerequisites: Junior or senior classification; non-majors only.
AGSM 360 Occupational Safety Management  
Credits 3. 2 Lecture Hours. 2 Lab Hours.  
Safety considerations in the work environment, including safety mandates, safety mission, personal and business liability, fire, chemical, dust, machine noise, personal protective devices; design and implementation of safety programs.  
Prerequisite: Junior or senior classification.  

AGSM 403 Processing and Storage of Agricultural Products  
Credits 3. 2 Lecture Hours. 2 Lab Hours.  
Factors influencing the nature of biological materials and the preservation of quality throughout the harvesting, handling and processing system; a systems approach to cereal grains includes principles of drying, quality deterioration, storage, conveying and handling; processing of fiber crops.  
Prerequisites: AGSM 310 and AGSM 315/FSTC 315.  

AGSM 435 Irrigation Principles and Management  
Credits 3. 2 Lecture Hours. 3 Lab Hours.  
Principles of irrigation and management for efficient use of water; soil-water-plant relationships; methods of application; power and labor requirements; automated systems and components.  
Prerequisites: AGSM 335, AGSM 301, MATH 141.  

AGSM 439 Management of Agricultural Systems I  
Credits 3. 3 Lecture Hours.  
Application of agricultural systems management principles in solving realistic problems faced by agribusiness managers; project selection from problems posed by biological and agricultural industrial consultants; project feasibility study and outline; management and application philosophy; teamwork and communication, economics; product liability and reliability; standards and codes; goal setting and time management.  
Prerequisites: AGSM 301, AGSM 315/FSTC 315, AGSM 325, and AGSM 360; AGSM 335, AGSM 337 and AGSM 403 or registration therein; senior classification; must be taken prior to AGSM 440; AGSM majors only.  

AGSM 440 Management of Agricultural Systems II  
Credits 3. 2 Lecture Hours. 3 Lab Hours.  
Management of agricultural systems through team solution of management problems posed by agribusiness managers, farmers, extension specialists and other industry consultants; application of management principles to give students experience in solving realistic problems faced by agribusiness managers; critical evaluation of results by students, staff and consultants.  
Prerequisites: AGSM 439; should be taken last spring semester prior to graduation.  

AGSM 461/SPSC 461 Geographic Information Systems for Resource Management  
Credits 3. 2 Lecture Hours. 2 Lab Hours.  
Geographic Information System (GIS) approach to the integration of spatial and attribute data to study the capture, analysis, manipulation and portrayal of natural resource data; examination of data types/formats; integration of GIS with remote sensing and Global Positioning System; lab use of GIS applications to conduct analyses of topics in natural resources.  
Prerequisite: Junior or senior classification or approval of instructor.  
Cross Listing: SPSC 461/AGSM 461.  

AGSM 470 Agricultural Electronics and Control  
Credits 3. 2 Lecture Hours. 2 Lab Hours.  
Technology of electronic systems in agricultural production and processing, sensors, actuators, and controllers, controller hardware and computer bases.  
Prerequisite: AGSM 325.  

AGSM 475 Applied Information Technologies for Agricultural Systems  
Credits 3. 2 Lecture Hours. 2 Lab Hours.  
Definition and documentation of the value of information in agriculturally-based technology companies; methods for mapping information flow within the company and across companies; articulation value of information within a value chain for a food product by simulation; and projects using project management software and web-based interactions.  
Prerequisites: ISYS 209 or equivalent; junior or senior classification.  

AGSM 481 Seminar  
Credit 1. 1 Lecture Hour.  
Professional development; ethics; career opportunities and topics of interest related to the practice of agricultural systems management.  
Prerequisite: Senior classification.  

AGSM 484 Internship  
Credits 0. 0 Lecture Hours. 0 Lab Hours. 0 Other Hours.  
No Credit. Practical experience working in a professional agricultural systems management setting. May be taken three times.  
Prerequisite: Junior or senior classification; approval of the instructor.  

AGSM 485 Directed Studies  
Credits 0 to 4. 0 to 4 Lecture Hours.  
Selected problems in any phase of agricultural systems management; credit and specific content depend on background and interest of student; individual consultations and reports required.  
Prerequisites: Junior classification; approval of department head; 2.0 GPR.  

AGSM 489 Special Topics in...  
Credits 1 to 4. 1 to 4 Lecture Hours.  
Special topics in an identified area of agricultural systems management. May be repeated for credit.  

AGSM 491 Research  
Credits 0 to 3. 0 to 3 Lecture Hours.  
Research conducted under the direction of faculty member in agricultural systems management. May be repeated 2 times for credit. Registration in multiple sections of this course are possible within a given semester provided that the per semester credit hour limit is not exceeded.  
Prerequisites: Junior or senior classification and approval of instructor.
ALEC - Ag Leadrshp, Ed & Comm (ALEC)

ALEC 201 Foundations of Agricultural Leadership, Education and Communications
Credits 2. 2 Lecture Hours.
Survey of historical perspectives and future career opportunities in the field of agricultural leadership, education and communications; addresses undergraduate degree planner and departmental high-impact learning experiences; explores field of study standards for communication and publication; investigates learning preferences and academic support systems.
Prerequisites: Freshman or sophomore classification; AGCJ, AGSC, ALED or USAL-LED majors.

ALEC 285 Directed Studies
Credits 1 to 4. 1 to 4 Other Hours.
Directed study of selected issue in field of agricultural leadership, education, and communications with emphasis on collection, synthesis and interpretation of information. May be taken four times for credit.
Prerequisite: Approval of department advisor.

ALEC 289 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours. 0 to 4 Lab Hours.
Special topics in an identified area of agricultural development. May be repeated for credit.
Prerequisite: Approval of department advisor.

ALEC 291 Research
Credits 1 to 4. 1 to 4 Lecture Hours.
Research conducted under the direction of faculty member in agricultural communications and journalism. May be taken two times for credit.
Prerequisites: Freshman or sophomore classification and approval of department advisor.

ALEC 350 Global Agricultural Issues
Credits 3. 3 Lecture Hours.
Review of global agricultural issues (products, environment, people, and culture) affecting international agricultural development; concepts and principles underlying the processes of teaching, research, and service opportunities in international agricultural development and education situations.
Prerequisites: Junior or senior classification or approval of instructor; GEOG 202.

ALEC 380 Workshop in Agricultural Leadership, Education, and Communications
Credits 1 to 4. 1 to 4 Lecture Hours.
The study, understanding and solution of human-agricultural problems based on theory learned in the classroom, library, laboratory and fieldwork completed by individuals and teams. May be taken three times for credit.
Prerequisite: Junior or senior classification.

ALEC 412 Technology-Enhanced Instructional Design Strategies for Agriculture
Credits 3. 3 Lecture Hours.
Techniques and applications of technology to enhance instruction of agricultural topics; instructional design principles, instructional strategies, technological tools; the design, development and delivery of technology-enhanced instruction for agriculture and the life sciences. Not intended for majors in education.
Prerequisite: Junior or senior classification.

ALEC 425 Principles of Program Evaluation
Credits 3. 3 Lecture Hours.
Evaluation principles applied to educational programs in agriculture and life science; basic understanding of skills in program evaluation processes, concepts, and theories; develop expertise needed to design and conduct evaluations of youth and adults in extension, community, and school-based programs.
Prerequisite: Junior or senior classification.

ALEC 450 Global Social Justice Issues in Agriculture
Credits 3. 3 Lecture Hours.
An in-depth evaluation of global social justice issues and leadership skills necessary to effectively solve and manage issues in agricultural development; topics include awareness, knowledge and understanding of teaching, research and service opportunities for those seeking careers in global social justice and agricultural leadership.
Prerequisite: Junior or senior classification or approval of instructor.

ALEC 460 Applying International Development Theories in Agriculture
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Practical application of agricultural development theories (geographical, communal, societal, etc.) in real-world settings; high-impact learning, research skill development, international travel and participation in a service-learning project with an international non-governmental organization.
Prerequisites: Junior or senior classification or approval of instructor.

ALEC 485 Directed Studies
Credits 1 to 4. 1 to 4 Other Hours.
Directed individual study of selected problems in international agriculture leadership, education and communications. May be taken four times for credit.
Prerequisites: Junior or senior classification; approval of department advisor.

ALEC 489 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours. 0 to 4 Lab Hours.
Special topics in an identified area of international agriculture leadership, education, and communications. May be taken four times for credit.
Prerequisite: Junior or senior classification.

ALEC 491 Research
Credits 1 to 4. 1 to 4 Lecture Hours.
Research conducted under the direction of faculty member in international agricultural leadership, education, and communications. May be taken three times for credit.
Prerequisites: Junior or senior classification; approval of department advisor.

ALEC 494 Internship
Credits 1 to 6. 1 to 6 Other Hours.
Supervised internship and independent study related to the student's professional interest. May be taken six times for credit.
Prerequisites: Junior or senior classification; approval of departmental advisor.
ALED - Ag Leadership & Dev
(ALED)

ALED 125 Leadership Learning Community I
Credit 1. 1 Lecture Hour.
Offered to students living in the Freshmen Leadership Living Learning Community; fundamentals of developing personal leadership while participating in co-curricular activities; emphasis on the relational model of leadership and global perspective building.
Prerequisites: Freshman classification or approval of instructor; on-campus residence.

ALED 202 Introduction to Leadership
Credits 3. 3 Lecture Hours.
Introduction to the academic and scholarly development of leadership theory and leadership models; investigation of leadership theory when applied to a specific context; development of a leadership definition as an inquiry investigation.

ALED 222 Practicing Diverse Leadership and Cultural Exploration
Credits 3. 3 Lecture Hours.
Social theories and historical perspectives of leadership, particularly in terms of class, gender, race, ethnicity, and nationality; multidisciplinary approach to the study of leadership with a special emphasis on culture completed through readings, class lectures, films, group projects and discussions.
Prerequisite: Membership in the Multicultural Services Culture Leadership, Understanding and Exploration for Sophomores Learning Community.

ALED 223 Practicing Diverse Leadership and Cultural Exploration
Credits 3. 3 Lecture Hours.
Social theories and historical perspectives of leadership, particularly in terms of class, gender, race, ethnicity, and nationality; a multidisciplinary approach to the study of leadership with a special emphasis on culture through experiential learning.
Prerequisites: ALED 222 and membership in the Multicultural Services Cultural Leadership, Understanding, and Exploration for Sophomores Learning Community.

ALED 225 Leadership Learning Community II
Credit 1. 1 Lecture Hour.
Offered to students living in the Freshmen Leadership Living Learning Community; fundamentals of peer mentoring while participating in co-curricular activities; emphasis on building supportive relationships on a college campus.
Prerequisites: Freshman classification or approval of instructor; on-campus residence; ALED 125.

ALED 285 Directed Studies in Agricultural Leadership and Development
Credits 1 to 4. 1 to 4 Other Hours.
Directed study of selected issue in agricultural leadership and development with emphasis on collection, synthesis and interpretation of information.
Prerequisite: Approval of department advisor.

ALED 289 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours. 0 to 4 Lab Hours.
Special topics in an identified area of agricultural development. May be repeated for credit.
Prerequisite: Approval of department advisor.

ALED 291 Research
Credits 1 to 4. 1 to 4 Lecture Hours.
Research conducted under the direction of faculty member in agricultural development. May be repeated 2 times for credit. Please see academic advisor in department.
Prerequisites: Freshman or sophomore classification and approval of instructor.

ALED 301 Personal Leadership Education
Credits 3. 3 Lecture Hours.
Development, application and reflection of personal leadership capabilities through self-assessments and experiential learning activities; development of leadership identity through personal leadership inventories including strengths, personality type, values, vision and emotional intelligence.
Prerequisite: ALED or USAL-LED major, junior or senior classification, ALED 202.

ALED 313 Culture Theory, Orientation and Adaptation
Credits 3. 3 Lecture Hours.
Evaluation of culture theory, elements and manifestations of culture, assessing cultural norms of society or groups, adaptation to a new culture for effective leadership.
Prerequisite: Junior or senior classification.

ALED 339 Agricultural Extension Philosophy and the Land-Grant Mission
Credits 3. 3 Lecture Hours.
Philosophy of Cooperative Extension and roles within the land-grant system; history, organization, program areas and guiding principles; relationship with the teaching and research branches of the land-grant system.
Prerequisite: Junior or senior classification or approval of instructor.

ALED 340 Personal Leadership Theory
Credits 3. 3 Lecture Hours.
Exploration of leadership as a scholarly discipline; critical analysis of and evolution of multiple leadership models and theories; synthesis of leadership theory through experiential learning; integration of course content with personal experiences.
Prerequisite: ALED or USAL-LED major, junior or senior classification, ALED 202.

ALED 341 Team Learning
Credits 3. 3 Lecture Hours.
Team development theory; emphasizes research on team member behaviors, team decision making models and positive conflict in team environments.
Prerequisites: ALED 340; junior or senior classification.

ALED 342 Learning Organizations
Credits 3. 3 Lecture Hours.
Social systems language and archetypes; systems thinking theory including mental models, mastery, team learning, concept models of human organizations.
Prerequisites: ALED 340; junior or senior classification.

ALED 343 Human Resource Management in Agriculture and Life Sciences
Credits 3. 3 Lecture Hours.
Principles, theories, concepts, techniques and applications for managing human resources in food and agricultural organizations and in local communities; attracting, staffing, training, developing and compensating human talent. Not intended for majors in business.
Prerequisites: ALED 340; junior or senior classification.
ALED 344 Leadership of Volunteers  
Credits 3.3 Lecture Hours.  
Principles, theories, concepts and applications for leading volunteers in agriculture and life sciences nonprofit, governmental and community organizations.  
Prerequisite: ALED 340; junior or senior classification.

ALED 380 Workshop in Agricultural Leadership and Development  
Credits 1 to 4. 1 to 4 Lecture Hours.  
The study, understanding and solution of human-agricultural problems based on theory learned in the classroom, library, laboratory and fieldwork completed by individuals and teams.  
Prerequisite: Junior or senior classification.

ALED 400 Public Leadership Development  
Credits 3.3 Lecture Hours.  
Major issues in the study of public leadership, development of leadership skills, and a field investigation done in conjunction with local public leaders.  
Prerequisites: Junior classification and approval of instructor.

ALED 401 Advanced Professional Leadership Development  
Credits 3.3 Lecture Hours.  
Investigation of the best practices of successful leaders representing various organizational contexts; merging of scholarly mastery of theory with practice.  
Prerequisites: Selection for ALED Leadership Fellows Program; ALED 340 or ALED 301; junior or senior classification.

ALED 422 Cultural Pluralism in Agriculture  
Credits 3.3 Lecture Hours.  
Selected topics on the diversity of human resources in agriculture; emphasis on working in a multicultural society and developing a sensitivity toward different cultures; explores the interrelationships between the contributions of diverse individuals and the state, nation and global success of agriculture.  
Prerequisite: Junior or senior classification.

ALED 424 Applied Ethics in Leadership  
Credits 3.3 Lecture Hours.  
Exploration of ethical and moral theories and the application to multiple leadership contexts and situations.  
Prerequisites: Junior or senior classification, ALED 301.

ALED 426 Leading and Training Adult Learners  
Credits 3.3 Lecture Hours.  
Planning educational training programs, including leadership programs, to implement with an adult audience; includes needs assessment, instructional design, lesson plan development, evaluation and other items related to leading adults.  
Prerequisites: ALED or USAL-LED majors only; ALED 340, junior or senior classification.

ALED 440 Leading Change  
Credits 3.3 Lecture Hours.  
Analysis of change models and theories and the leadership application on individual, organizational and societal changes.  
Prerequisite: ALED or USAL-LED major; junior or senior classification, ALED 202.

ALED 441 Agricultural Extension Organization and Methods  
Credits 3.3 Lecture Hours.  
Cooperative extension in agriculture and home economics; development, objectives, organization, program building and methods of teaching.  
Prerequisite: Junior or senior classification.

ALED 442 Professional Communications in Agriculture and Life Sciences  
Credits 3.3 Lecture Hours.  
Technological communication theory; instructional and presentation models; teaching strategies; multimedia development.  
Prerequisite: Junior or senior classification.

ALED 481 Seminar  
Credits 3.3 Lecture Hours.  
Individual and team approaches to the review of leadership concepts and their application; observation and discussion of current leadership trends and issues.  
Prerequisites: ALED or USAL-LED major; senior classification, ALED 301, ALED 340, ALED 440, ALED 424.

ALED 485 Directed Studies in Agricultural Leadership Development  
Credits 1 to 4. 0 to 4 Lecture Hours. 1 to 4 Other Hours.  
Directed individual study of selected problems in agricultural leadership and development with emphasis on collection, analysis and presentation of information.  
Prerequisites: Junior or senior classification and approval of instructor.

ALED 489 Special Topics in...  
Credits 1 to 4. 1 to 4 Lecture Hours.  
Special topics in an identified area of agricultural development. May be repeated for credit.  
Prerequisite: Junior or senior classification.

ALED 491 Research  
Credits 1 to 4. 1 to 4 Lecture Hours.  
Research conducted under the direction of faculty member in agricultural development. May be repeated 2 times for credit. Registration in multiple sections of this course are possible within a given semester provided that the per semester credit hour limit is not exceeded. Please see academic advisor in department.  
Prerequisites: Junior or senior classification and approval of instructor.

ALED 494 Internship  
Credits 1 to 6. 1 to 6 Other Hours.  
Supervised internship and independent study related to student’s professional interest.  
Prerequisites: ALED 301; junior or senior classification; 2.0 GPR; approval of instructor.

ANSC - Animal Science (ANSC)

ANSC 107 General Animal Science  
Credits 3.3 Lecture Hours.  
(AGRI 1319, 1419*) General Animal Science. Scientific animal agriculture; selection, reproduction, nutrition, management and marketing of beef cattle, swine, sheep, goats and horses; evaluation and processing of meat, wool and mohair. Importance of livestock and meat industries.  
Prerequisite: Concurrent registration in ANSC 108 required.

ANSC 108 General Animal Science  
Credit 1. 2 Lab Hours.  
(AGRI 1419) General Animal Science. Laboratory to accompany ANSC 107.  
Prerequisite: Concurrent registration in ANSC 107 required.

ANSC 117 Texas Barbecue  
Credit 1. 1 Lecture Hour.  
Survey, demonstration and participation in preparation techniques of Texas barbecue; comparison of regional and international barbecue methods.  
Prerequisite: First year students.
ANSC 201 Introductory Equine Care and Use
Credits 2. 2 Lecture Hours.
Survey of basic equine care and use; breeds of horses and their use; care and maintenance of equines including feeding, health care, housing and equipment.

ANSC 207 Art and Heritage of Livestock
Credits 3. 3 Lecture Hours.
Using art as a venue to understand the legacy and heritage of livestock production and livestock's contribution to civilization and society; from man as hunter, agriculturalist, and finally, as industrialist; from cave paintings to Russell and Remington; history of the effects of painting, poetry, architecture and sculpture on agriculture.

ANSC 210 Companion Animal Science
Credits 3. 3 Lecture Hours.
Types, care, physiology, common diseases and common treatments of companion animals (dogs, cats, exotic pets); careers including biomedical research; solutions for problems such as behavior and overpopulation.
Prerequisite: ANSC 107.

ANSC 211 Equine Industry and Career Preparation
Credits 2. 2 Lecture Hours.
Identify opportunities and skill sets required to pursue a career in the equine industry; development of resume, communication, professional etiquette and interview skills.

ANSC 215 Introduction to Livestock Evaluation
Credits 2. 1 Lecture Hour. 3 Lab Hours.
Live market animal appraisal in relation to carcass and composition; criteria for selection of breeding livestock; techniques for preparation and delivery of oral reason.

ANSC 221 Equine Handling and Safety. (2-2). Credit 3
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Equine Handling and Safety. Working around horses safely and effectively; includes equine behavior, proper handling techniques, controlling movement of horses, health assessment and basic management.
Prerequisite: ANSC 201.

ANSC 230 Animal and Research Experience
Credits 2. 1 Lecture Hour. 2 Lab Hours.
Hands-on experience with farm animals; development and understanding of the scientific method; demonstration of critical thinking skills to evaluate scientific information.

ANSC 242 Growth and Development of Livestock
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Evaluation of slaughter livestock as related to growth and development, production efficiency, carcass value; selection of breeding animals based on performance, production records, visual appraisal; principles of growth biology; biotechnological tools used to manage growth and development.
Prerequisites: ANSC 107 and ANSC 108.

ANSC 289 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours. 0 to 4 Lab Hours.
Selected topics in an indentified area of animal science. May be repeated for credit.
Prerequisite: Approval of instructor.

ANSC 291 Research
Credits 0 to 4. 0 to 4 Other Hours.
Research conducted under the direction of faculty member in animal science. May be repeated 2 times for credit.
Prerequisites: Freshman or sophomore classification and approval of instructor; 2.0 GPR in major and overall.

ANSC 302 Basic Beef Cattle Production
Credits 3. 3 Lecture Hours.
Fundamental concepts of beef management and production principles. Service course recommended for non-animal science majors.
Prerequisites: ANSC 107 and ANSC 108.

ANSC 303/NUTR 303 Principles of Animal Nutrition
Credits 3. 3 Lecture Hours.
Scientific approach to nutritional roles of water, carbohydrates, proteins, lipids, minerals, vitamins, and other dietary components; emphasis on the comparative aspects of gastrointestinal tracts and on digestion, absorption, and metabolism of nutrients.
Prerequisites: ANSC 107 and ANSC 108; CHEM 222 or CHEM 227 or equivalent.
Cross Listing: NUTR 303/ANSC 303.

ANSC 305 Animal Breeding
Credits 3. 2 Lecture Hours. 2 Lab Hours.
A systems approach to selection and mating of livestock; gene frequency, heritability, relationship, inbreeding, linebreeding, heterosis, crossbreeding, direct and correlated response to selection, and use of pedigree, family, progeny testing and indices for selection.
Prerequisites: ANSC 107 and ANSC 108; GENE 301; STAT 301.

ANSC 307/FSTC 307 Meats
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Integrated studies of the meat animal processing sequence regarding the production of meat-type animals and the science and technology of their conversion to human food.
Prerequisites: ANSC 107 and ANSC 108.

ANSC 309 Applied Animal Record Keeping
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Keeping, analyzing and interpreting records to make fully-informed decisions on a day-to-day basis for production and management scenarios; practical application unique to animal science and meat processing.
Prerequisite: Junior or senior classification.

ANSC 310 Behavior and Management of Domestic Animals
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Application of behavior of cattle, horses, sheep, goats and swine to their management; basic principles, physiology of behavior, perception, training, predators, use of dogs in livestock production, stress and animal welfare.
Prerequisites: ANSC 107 and ANSC 108.

ANSC 311 Equine Behavior and Training
Credits 3. 1 Lecture Hour. 5 Lab Hours.
Equine behavior and application of principles of psychology to training horses; systematic approaches to horse training emphasizing principles of learning; equipment and its use; stable management and preparation of horses for competition; separate laboratory sections for students with varying backgrounds.

ANSC 312 Equestrian Technology
Credits 2. 1 Lecture Hour. 3 Lab Hours.
Advanced scientific methods and techniques for execution of equine performances in hunter, dressage and stock horse events; anatomical, physiological and psychological implications; preparation of horses and riders.
ANSC 314 Wool Evaluation and Grading
Credits 2. 1 Lecture Hour. 3 Lab Hours.
Evaluation of U.S.D.A. grades for wool and mohair; steps involved in processing raw wool into finished fabric; genetic and environmental factors affecting quality characteristics of wool and mohair; grading, evaluation and selection of fleeces for economic value; oral and written defense of judgments.
Prerequisites: ANSC 107 and ANSC 108; junior or senior classification.

ANSC 315 Livestock Judging
Credits 2. 1 Lecture Hour. 3 Lab Hours.
Selection and evaluation of beef cattle, swine, sheep and horses. Ability to present accurate, clear and concise oral and written reasons stressed.
Prerequisites: ANSC 107 and ANSC 108; junior or senior classification.

ANSC 316 Equine Selection and Judging
Credits 2. 1 Lecture Hour. 3 Lab Hours.
Detailed evaluation and comparison of horses; selection and critique of athleticism and performance in horses; industry trends addressed; oral and written defense of judgments also explained and expected; a prerequisite for participation on the Horse Judging Team. Prerequisite: Junior or senior classification or approval of instructor.

ANSC 317 Meat Selection, Evaluation and Grading
Credits 2. 1 Lecture Hour. 3 Lab Hours.
Selection and grading of carcasses and wholesale cuts of beef, pork and lamb; principles of evaluation included in carcass contests and progeny testing.
Prerequisites: ANSC 107 and ANSC 108.

ANSC 318 Feeds and Feeding
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Characteristics of feedstuffs used in livestock enterprises; manual and computer ration formulation procedures and life cycle nutritional management of beef, swine, sheep, dairy, horses, fish and pets; methods of grain, protein supplement and forage processing and evaluation; commercial and on-the-farm feed mixing methods and feed control laws.
Prerequisite: ANSC 303/NUTR 303.

ANSC 320 Animal Nutrition and Feeding
Credits 3. 3 Lecture Hours.
Nutritional functions of water, protein, carbohydrates, fats, minerals and vitamins and their digestion, absorption, use and excretion; energy, protein and forage feedstuff characteristics and processing; nutritional requirements, ration formulation and feeding methods for farm animals; general course for non-animal science majors.
Prerequisite: Junior or senior classification or approval of instructor; restricted to students in the college of agriculture and life sciences.

ANSC 325 Advanced Livestock and Product Evaluation. (1-3). Credit 2
Credits 2. 1 Lecture Hour. 3 Lab Hours.
Advanced Livestock and Product Evaluation. Advanced evaluation of cattle, swine, sheep and equine; products produced or associated with each species; advanced oral or written defense of judgments associated with changing trends in these industries.
Prerequisite: Junior or senior classification.

ANSC 335 Purebred Beef Cattle Management
Credits 2. 1 Lecture Hour. 2 Lab Hours.
Information and skills needed to be successful in the production, management and merchandising of purebred beef cattle; purpose and organization of the purebred beef cattle industry, and career opportunities in the industry.
Prerequisite: Junior or senior classification.

ANSC 337 Meat Merchandising
Credits 2. 1 Lecture Hour. 3 Lab Hours.
Steps of meat processing and merchandising of retail and foodservice; merchandising practices such as selection, identification, fabrication, pricing, packaging and distribution.
Prerequisites: ANSC 307/FSTC 307; junior or senior classification.

ANSC 351 Current Issues in Animal Agriculture
Credits 3. 3 Lecture Hours.
Preparation to project a professional image and the use of communication skills to describe animal agriculture; converse about the strengths and weaknesses of animal agriculture.
Prerequisite: Junior or senior classification.

ANSC 402 Exploring Animal Industries
Credits 2. 2 Lecture Hours.
Instruction for students nearing the end of their undergraduate studies; theoretical understanding of organizations and human resources available to students; awareness and understanding of the job application process, resume and cover letter writing; networking, professional and business attire; ethics related to job searches and retention.
Prerequisite: Junior or senior classification.

ANSC 406 Beef Cattle Production and Management
Credits 4. 3 Lecture Hours. 2 Lab Hours.
Basic principles and methods of application involved in breeding, feeding, management, marketing and disease control in cow-calf production.
Prerequisites: ANSC 303/NUTR 303, ANSC 318, ANSC 433; junior or senior classification.

ANSC 408 Management of Stocker and Feedlot Cattle
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Basic principles involved in feeding, management, marketing and disease control of stocker and feeder cattle from weaning through slaughter for economical production of beef.
Prerequisites: ANSC 318; junior or senior classification.

ANSC 411 Equine Nutrition and Health
Credits 3. 3 Lecture Hours.
Designed to provide knowledge of nutrition and health in the horse; gastrointestinal anatomy, nutrient utilization, feeding management and nutritional requirements; metabolic diseases, infectious diseases, internal and external parasites, and herd health management.
Prerequisite: Junior or senior classification.

ANSC 412 Swine Production and Management
Credits 4. 3 Lecture Hours. 2 Lab Hours.
Basic principles and their practical application in efficient, economical pork production; all areas of production--breeding and selection, nutrition, housing and equipment, marketing, herd health and economic management.
Prerequisites: Junior or senior classification or approval of instructor.

ANSC 414 Sheep and Goat Production and Management
Credits 4. 3 Lecture Hours. 2 Lab Hours.
Application of basic principles of genetics, physiology and nutrition to practical sheep and angora goat production systems; management, health care and marketing of animals and fiber.
Prerequisites: Junior or senior classification or approval of instructor.

ANSC 415 Brazil: Comparative Ruminant Production
Credits 3. 3 Lecture Hours.
Contrast two scenarios of ruminant production in Brazil; the effects of globalization on the two different production systems.
Prerequisites: ANSC 303/NUTR 303 or ANSC 320 or approval of instructor.
ANSC 418 Equine Exercise Physiology. (2-2). Credit 3
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Equine Exercise Physiology. Changes within the systems of the horse resulting from the physical stresses of exercise, adaptations of systems in response to a training regimen; methodology for measuring improvement in physical condition; foundation for development of training programs for horses in moderate, intense or prolonged performance activities.
Prerequisites: Junior or senior classification and approval of instructor.

ANSC 419 Equine Reproduction. (3-0). Credit 3
Credits 3. 3 Lecture Hours.
Equine Reproduction. Reproductive anatomy of the stallion and mare; industry and scientific practices; comprehensive analysis of the body of scientific research; development of critical thinking ability to assess and discuss previous research in comparison of needed research.
Prerequisites: ANSC 201 and junior or senior classification or approval of instructor.

ANSC 420 Equine Production and Management Credits 4. 3 Lecture Hours. 2 Lab Hours.
Application of biological and biotechnological principles and concepts in areas including genetics, breeding, nutrition, reproduction, immunology, parasitology, anatomy and exercise physiology to efficient production of horses for market; management of equine enterprises.
Prerequisites: ANSC 201 and ANSC 433; junior or senior classification.

ANSC 421 Stock Horse Advanced Training Credits 3. 3 Lecture Hours. 2 Lab Hours.
Theory and practice of applying scientific principles of psychology and behavior modification to advanced training of the stock horse; exercise conditioning and humane training methods to maximize learning effectiveness; current industry trends for preparing horses and showing in stock horse events.
Prerequisites: ANSC 311 and previous riding experience.

ANSC 423 Issues in the Equine Industry Credits 3. 3 Lecture Hours.
Integration of cumulative knowledge acquired in the equine science curriculum to demonstrate critical thinking and communication skills to address critical issues in the equine industry.
Prerequisites: Junior or senior classification; approval of instructor.

ANSC 424 Equine Sales Management. (3-0). Credit 3
Credits 3. 3 Lecture Hours.
Equine Sales Management. Hands-on horse sale management experience through planning and conducting the Texas A&M University Department of Animal Science Horse Sale.
Prerequisite: Junior or senior classification and approval of instructor.

ANSC 431 Equine Marketing and Development Credits 3. 3 Lecture Hours.
Scope of domestic and international equine industry; safe handling and transport of horses for export or import; career opportunities in the equine field.
Prerequisite: Junior or senior classification or approval of instructor.

ANSC 433 Reproduction in Farm Animals Credits 3. 2 Lecture Hours. 2 Lab Hours.
Physiological principles of reproductive processes in cattle, sheep, swine and horses including sperm and ova production, estrus, fertilization, gestation and parturition; techniques of semen evaluation and storage, estrous synchronization, embryo transfer and pregnancy determination.
Prerequisite: Junior classification.

ANSC 434 Animal Reproduction Management Credits 3. 2 Lecture Hours. 2 Lab Hours.
Available and emerging technologies; strategies including artificial insemination, embryo manipulation and transfer, control of ovulation, sex ratio manipulation and animal cloning for managing the reproductive function of farm animals; hands-on sessions using available technologies including artificial insemination of cattle.
Prerequisite: ANSC 433, priority enrollment given to graduating seniors in animal science.

ANSC 436 Texas Panhandle Beef Production Tour Credits 2. 2 Lecture Hours.
Facets of beef production from cow/calf operations to retail product; experiential knowledge of technologies and practices to enhance efficiency to enlighten students regarding the array of career opportunities in the beef production industry.
Prerequisites: Junior or senior classification or approval of instructor.

ANSC 437 Marketing and Grading of Livestock and Meats Credits 3. 2 Lecture Hours. 2 Lab Hours.
Study of USDA livestock and carcass grades; understanding current market trends for beef, pork, lamb and goat; review of branded and certified programs; principles applied in contracting, breakeven determination, hedging, and grid or formula pricing.
Prerequisite: Junior or senior classification.

ANSC 439 Feedlot Risk Management Credits 2. 2 Lecture Hours.
Advanced study of livestock marketing techniques; cash sales, video sales, futures and options markets, forward contracting; problem solving in real-time livestock marketing situations; risk of ownership of hypothetical livestock operations.
Prerequisites: junior or senior classification or approval of instructor.

ANSC 447 Advanced Meat Science and Technology Credits 4. 3 Lecture Hours. 3 Lab Hours.
Advanced basic and applied studies of meat science and/or technology utilizing the underlying physiological and structural components for conversion to human food; understanding the influence of pre- and post-harvest factors on meat quality, composition, color, packaging, sensory and preparation factors; applying scientific and business principles to manufacturing and process flow of commercial meat food products and demonstrating knowledge of these principles through development of meat products.
Prerequisites: ANSC 307/FSTC 307; CHEM 222 or approval of instructor; junior or senior classification.

ANSC 457/FSTC 457 Hazard Analysis and Critical Control Point System Credits 3. 3 Lecture Hours.
Hazard Analysis and Critical Control Point (HACCP) principles specifically related to meat and poultry; microbiological and process overviews; good manufacturing practices and standard operating procedures development.
Prerequisite: FSTC 326/DASC 326 or approval of instructor.
Cross Listing: FSTC 457/ANSC 457.

ANSC 470/FSTC 470 Quality Assurance for the Food Industry Credits 3. 3 Lecture Hours.
Principles of food system process control including statistical process control (SPC) and the tools required to assure uniform communication and understanding of quality assurance systems.
Prerequisite: Junior or senior classification.
Cross Listing: FSTC 470/ANSC 470.
ANTH 201 Introduction to Anthropology
Credits 3. 3 Lecture Hours.
(ANTH 2346, HUMA 2323) Introduction to Anthropology. An introduction to the discipline of anthropology through the examination of its four subfields: archaeology, physical anthropology, sociocultural anthropology and linguistics.

ANTH 202 Introduction to Archaeology
Credits 3. 3 Lecture Hours.
(ANTH 2302) Introduction to Archaeology. An introduction to the study of the human past through the retrieval, analysis, and interpretation of material remains.

ANTH 204 Peoples and Cultures of the Ancient World
Credits 3. 3 Lecture Hours.
Explores the development of human societies and world prehistory from the beginnings of humanity more than two million years ago to emergence of complex civilizations.

ANTH 205 Peoples and Cultures of the World
Credits 3. 3 Lecture Hours.
Survey of human cultures around the world using case studies of customs and cultural organization; case studies exemplifying contrasting types of cultures and societies.

ANTH 210 Social and Cultural Anthropology
Credits 3. 3 Lecture Hours.
(ANTH 2351) Social and Cultural Anthropology. Evolution of cultures; differences, similarities and effects of material and non-material culture on economic, social and political organization.

ANTH 225 Introduction to Biological Anthropology
Credits 3. 3 Lecture Hours. 0 Lab Hours.
Study of human biology including an examination of evolutionary processes acting on human populations; human genetics; non-human primate anatomy, classification and ecology of primates; the primate paleontological record, and human variation and adaptation. Concurrent registration in ANTH 226 recommended.

ANTH 226 Introduction to Biological Anthropology Laboratory
Credit 1. 0 Lecture Hours. 3 Lab Hours.
Exploration of basic evolutionary principles through population genetics; hands-on exposure to the fossils of primate and human evolution along with opportunity to measure, compare, contrast and observe trends that have occurred throughout the Cenozoic era. Concurrent registration in ANTH 225 is recommended.

ANTH 229 Introduction to Folklore
Credits 3. 3 Lecture Hours.
Study of folklore through selected examples of traditional cultures, their beliefs, customs and art forms such as: tales, folksongs, proverbs, riddles and material culture.

ANTH 285 Directed Studies
Credits 0 to 3. 0 to 3 Other Hours.
For individual research in anthropology on subjects not included in established courses. May be taken two times for credit.

ANTH 289 Special Topics In...
Credits 1 to 4. 1 to 4 Lecture Hours. 0 to 4 Lab Hours.
Selected topics in an identified area of anthropology. May be repeated for credit.

ANTH 291 Research
Credits 0 to 4. 0 to 4 Other Hours.
Research conducted under the direction of a faculty member in anthropology. May be repeated 3 times for credit. Registration in multiple sections of this course is possible within a given semester provided that the per semester credit hour limit is not exceeded.

ANTH 300 Cultural Change and Development
Credits 3. 3 Lecture Hours.
Anthropological strategies for the study of cultural change and the implication of these strategies for the development of Western and non-Western societies.
ANTH 301 Indians of North America  
Credits 3.3 Lecture Hours.  
Native North American cultures from the Arctic to Mesoamerica; their origins, cultures prior to extensive acculturation and their contemporary situations.

ANTH 302 Archaeology of North America  
Credits 3.3 Lecture Hours.  
Overview of archaeology and prehistory of North America from the arrival of humankind through the development of agriculture to Euro-American contact.  
**Prerequisite:** ANTH 201, ANTH 202, ANTH 205 or ANTH 210.

ANTH 303 Archaeology of the American Southwest  
Credits 3.3 Lecture Hours.  
Overview of archaeology and prehistory of the southwestern United States and northern Mexico from the earliest evidence of human occupation to the Spanish conquest.  
**Prerequisite:** ANTH 201, ANTH 202, ANTH 205 or ANTH 210.

ANTH 305 Fundamentals of Anthropological Writing  
Credit 1.1 Lecture Hour.  
Basic types of writing expected of anthropology students; emphasis on the subject matter of an upper-division anthropology course in which the student is currently enrolled.  
**Prerequisites:** Junior or senior classification and co-enrollment in another upper-division anthropology course (the "companion course").

ANTH 308 Archaeology of Mesoamerica  
Credits 3.3 Lecture Hours.  
Development of Indian civilizations in Mexico and Guatemala, including prehistory of the Olmec, Maya, Aztec and other regional cultures to the time of the Spanish conquest.

ANTH 312 Fossil Evidence of Human Evolution  
Credits 3.3 Lecture Hours.  
Detailed review of fossil antecedents of humans including theoretical implications for an understanding of human evolution.  
**Prerequisite:** ANTH 225 or approval of instructor.

ANTH 313 Historical Archaeology  
Credits 3.3 Lecture Hours.  
Use and methods of historical archaeology in locating, documenting, restoring and preserving our historical resources.

ANTH 314 Agrarian Peasant Societies  
Credits 3.3 Lecture Hours.  
Major adaptations among traditional agricultural peoples of the world; production and marketing organization; culture of the village; ties between peasants and the nation; contemporary changes in traditional life.

ANTH 316 Nautical Archaeology  
Credits 3.3 Lecture Hours.  
Nautical Archaeology Underwater shipwrecks, sunken harbors, and other submerged evidence of human activities; relationship to cultural geography in general; problems of diving technology, surveying and preservation; relevance to modern problems.  
**Prerequisite:** Junior or senior classification.

ANTH 317/RELS 317 Introduction to Biblical Archaeology  
Credits 3.3 Lecture Hours.  
Application of archaeology in biblical research; basic overview of the material cultures that are the setting for the biblical narratives.  
**Cross Listing:** RELS 317/ANTH 317.

ANTH 318 Nautical Archaeology of the Americas  
Credits 3.3 Lecture Hours.  
Seafaring in the Americas from the 16th to the 20th centuries based on shipwreck archaeology; ship construction, exploration, commerce, naval warfare and related activity; influence of seafaring on the cultures, economics and history of the Western Hemisphere.

ANTH 323 Nautical Archaeology of the Mediterranean  
Credits 3.3 Lecture Hours.  
The archaeology of ancient seafaring in the Mediterranean from the Stone Age through the Roman Empire.  
**Prerequisite:** Junior or senior classification.

ANTH 324/MUSC 324 Music in World Cultures  
Credits 3.3 Lecture Hours.  
Examination of music from an ethnomusicological perspective focusing on musical performance and the complex interrelationship of music to culture, society and daily life; examination of music from a variety of cultures through a series of case studies.  
**Prerequisite:** Junior or senior classification or approval of instructor.  
**Cross Listing:** MUSC 324/ANTH 324.

ANTH 325/ASIA 325 Cultures of Central Asia  
Credits 3.3 Lecture Hours.  
Study of anthropological research in Central Asia: ecological adaptations; colonialism and post-colonialism; ethnic politics and ethnic conflict; religion and identity; gender and family; globalization and modernization.  
**Prerequisite:** Junior or senior classification.  
**Cross Listing:** ASIA 325/ANTH 325.

ANTH 330 Field Research in Anthropology  
Credits 1 to 9.1 to 9 Other Hours.  
Training for students in formulating and solving anthropological problems through field research; problem oriented field research under supervision.  
**Prerequisites:** 6 hours of anthropology; approval of instructor.

ANTH 335/ASIA 335 Cultures of Central Asia  
Credits 3.3 Lecture Hours.  
Overview of archaeology and prehistory of Europe, Africa and Asia from the evolution of the hominids to the development of agriculture and the rise of civilization.  
**Cross Listing:** ASIA 335/ANTH 335.

ANTH 340/RELS 340 Folklore and the Supernatural  
Credits 3.3 Lecture Hours.  
Traditional expressions of the supernatural such as superstition, belief tale and divination classified as folklore genres and their relationships to the cultures in which they develop; theories drawn from anthropology, folklore and related social sciences.  
**Prerequisite:** Junior or senior classification or approval of instructor.  
**Cross Listing:** RELS 340/ANTH 340.

ANTH 350/ASIA 350 Archaeology of the Old World  
Credits 3.3 Lecture Hours.  
Overview of archaeology and prehistory of Europe, Africa and Asia from the Stone Age until the ascent of Rome in the Hellenistic Period; remains of ancient Greek art (sculpture, mosaic, painting), architecture (temples, homes, civic structures), religion (figurines, votive offerings), and social history (coins, inscriptions).  
**Prerequisite:** Junior or senior classification.  
**Cross Listing:** CLAS 353/ANTH 353.
ANTH 354/CLAS 354 Archaeology of Ancient Italy
Credits 3. 3 Lecture Hours.
Archaeology of ancient Italy from the Stone Age until the collapse of the Roman Empire in the fourth century; remains of ancient Etruscan and Roman art (sculpture, mosaic, painting), architecture (temples, homes, civic structures), religion (figurines, votive offerings), and social history (coins, inscriptions).
Prerequisite: Junior or senior classification.
Cross Listing: CLAS 354/ANTH 354.

ANTH 360 Ancient Civilizations of the World
Credits 3. 3 Lecture Hours.
Explores recent discoveries and efforts by archaeologists to understand the rise and fall of states and civilizations that emerged in the Near East, Africa, India, Europe, China, Mesoamerica, and Peru between 3500 BCE and 1500 CE.
Prerequisite: Junior or senior classification.

ANTH 401 Ice Age Humans in North America
Credits 3. 3 Lecture Hours.
Archaeological, environmental and geological evidence related to the timing of human entry into the Americas and megafaunal extinctions at the end of the Pleistocene.
Prerequisite: ANTH 202 or equivalent.

ANTH 402 Archaeological Artifact Conservation
Credits 4. 3 Lecture Hours. 3 Lab Hours.
Analysis of the treatments for artifacts of clay, stone, glass, wood, shell, bone, fiber and metal from archaeological excavations or ethnographic, and historic collections presented in an integrated series of lectures and hands-on laboratory experience.
Prerequisite: Junior or senior classification or approval of instructor.

ANTH 403/RELS 403 Anthropology of Religion
Credits 3. 3 Lecture Hours.
Anthropological approach to religion and to the relationship between religion, economics, politics and social structure with particular reference to non-Western, preindustrial societies.
Cross Listing: RELS 403/ANTH 403.

ANTH 404/CLAS 417 Naval Warfare and Warships in Ancient Greece and Rome. (3-0). Credit 3
Credits 3. 3 Lecture Hours.
Naval Warfare and Warships in Ancient Greece and Rome. Extensive survey of Greek and Roman warships, naval warfare, naval strategy and tactics drawing upon archaeological evidence, literary documentation and iconographic material, from the Bronze Age (Ancient Egypt and the mythical Trojan War) to the Imperial Roman Navy.
Prerequisite: Junior or senior classification.
Cross Listing: CLAS 417/ANTH 417.

ANTH 409 Science, Pseudoscience and Critical Thinking in Anthropology
Credits 3. 3 Lecture Hours.
Close scrutiny of fantastic claims made across a broad spectrum of media regarding anthropology, biological anthropology and archaeology; distinction of science from pseudoscience; critical evaluation of scientific and pseudoscientific research; evaluation of media portrayal of science; development of critical thinking skills for skeptical investigation of extraordinary claims.
Prerequisite: Junior or senior classification or approval of instructor.

ANTH 410 Anthropological Theory
Credits 3. 3 Lecture Hours.
A systematic examination of the basic principles of anthropology.
Prerequisite: ANTH 210.

ANTH 412 Archaeological Theory
Credits 3. 3 Lecture Hours.
History of scientific archaeological exploration; major theoretical paradigms and movements in archaeological theory; current trends in archaeology; intellectual developments from other disciplines that influenced archaeological thought.
Prerequisites: Junior or senior classification, ANTH 202 or approval of instructor.

ANTH 415 Anthropological Writing
Credits 3. 3 Lecture Hours.
Reading and discussion of the classic genres of anthropological literature; instruction in writing styles and techniques appropriate to each genre, followed by guided writing assignments.
Prerequisite: Junior or senior classification.

ANTH 417/CLAS 417 Naval Warfare and Warships in Ancient Greece and Rome. (3-0). Credit 3
Credits 3. 3 Lecture Hours.
Naval Warfare and Warships in Ancient Greece and Rome. Extensive survey of Greek and Roman warships, naval warfare, naval strategy and tactics drawing upon archaeological evidence, literary documentation and iconographic material, from the Bronze Age (Ancient Egypt and the mythical Trojan War) to the Imperial Roman Navy.
Prerequisite: Junior or senior classification.
Cross Listing: CLAS 417/ANTH 417.

ANTH 418 Romans, Arabs, and Vikings--Seafaring in the Mediterranean during the early Christian Era
Credits 3. 3 Lecture Hours.
Examination of seafaring, maritime commerce, naval affairs, and shipbuilding in the Mediterranean from the late Roman Period until the fall of Constantinople in 1453.
Prerequisite: Junior or senior classification.

ANTH 419 Indians of Texas
Credits 3. 3 Lecture Hours.
Study of diverse native/immigrant Texas Indian lifeways/cultures from late pre-European to contemporary times; exploration of historical underpinnings, traditional cultures, especially land-use patterns; assessment of tribal relationships with colonial powers, U.S., and Texas governments as evidenced in ethnographic, ethnohistoric, and historical materials; application toward anthropological, archaeological, and human ecology research.
Prerequisites: Junior or senior classification; ANTH 201; and ANTH 301 or ANTH 302 or ANTH 303 or HIST 258; or HIST 308 or approval of instructor.
ANTH 421 Museums and Their Functions
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Role of museums, those specializing in natural history and the extent to which they serve the community, state, nation, and the advancement of the sciences included in their programs; history, operations, methods and programs.
Prerequisite: Junior or senior classification.

ANTH 423 Bioarchaeology
Credits 3. 3 Lecture Hours.
Role of human skeletal studies in reconstructing the biological and cultural past of humans; evidence gleaned from human skeletal remains recovered from archaeological sites such as data regarding diet, health, genetics and migration.
Prerequisites: ANTH 225; junior or senior classification.

ANTH 424 Human Evolutionary Ecology I: Culture, Cooperation and Subsistence
Credits 3. 3 Lecture Hours.
Examines evolutionary perspective to explore culture, cooperation and sociality, and subsistence behaviors across a wide variety of human cultures; part of the Human Evolutionary Ecology series along with ANTH 434.

ANTH 425 Human Osteology
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Concepts and methods used by anthropologists to identify, describe and analyze human skeletal remains from forensic and archaeological contexts.
Prerequisites: ANTH 225 or VIBS 305; junior or senior classification.

ANTH 426 Anthropology of Food and Nutrition
Credits 3. 3 Lecture Hours.
Anthropological study of human foodways and their nutritional consequences; how environmental, biological and cultural factors interact to produce patterns of food intake, and the effects of such patterns on health, growth and fertility; examples drawn primarily from non-Western societies.
Prerequisite: ANTH 201 or ANTH 210 or ANTH 225 or NUTR 202 or approval of instructor.

ANTH 427 Human Variation
Credits 3. 3 Lecture Hours.
Biological basis of variation in the physical features of modern humans; details of anatomical and physiological differences of living populations to understand their adaptive and historical significance; history of human variation studies rooted in the historical notion of "race."
Prerequisites: ANTH 225, BIOL 214 or 225; junior or senior classification.

ANTH 428 Applied Anthropology
Credits 3. 3 Lecture Hours.
Theory, ethics and practical applications of anthropological methods and concepts as they relate to planned programs of sociocultural change.
Prerequisites: ANTH 210; junior or senior classification.

ANTH 434 Human Evolutionary Ecology II: Reproduction and Parenting
Credits 3. 3 Lecture Hours.
Evolutionary ecology perspective on family-formation patterns, sexuality, reproduction and parenting of humans throughout the life course and across different cultures; part of a Human Evolutionary Ecology series along with ANTH 424.
Prerequisites: Junior or senior classification; ANTH 201, ANTH 205, or ANTH 424.

ANTH 435 Medical Anthropology
Credits 3. 3 Lecture Hours.
Overview of medical anthropology, a subfield in anthropology which examines the biological and cultural basis of health and disease in order to understand the influence of culture on the illness experience and treatment.
Prerequisite: Junior or senior classification or approval of instructor.

ANTH 436/RELS 436 Ancient Egypt
Credits 3. 3 Lecture Hours.
Archaeology and history of ancient Egypt from earliest times to the end of the New Kingdom period.
Prerequisite: Junior or senior classification or approval of instructor.
Cross Listing: RELS 436/ANTH 436.

ANTH 437 Ethnobotany
Credits 3. 3 Lecture Hours.
Interdisciplinary study of the complex and dynamic relationships that exist between people and plants.
Prerequisite: Junior or senior classification or approval of instructor.

ANTH 438/WGST 439 Gender, Ethnicity and Class in Archaeological Research
Credits 3. 3 Lecture Hours.
Exploration of theoretical and methodological issues in engendering archaeology; ideological biases in the interpretation of roles attributed to women, men, and underrepresented groups in the past; the impact of cultural transformation on underrepresented groups and gender relations; and the formulation of research questions concerning these issues.
Prerequisites: ANTH 202, ANTH 210, WGST 200 or WGST 207/ SOCI 207; junior or senior classification or approval of instructor.
Cross Listing: WGST 439/ANTH 439.

ANTH 440 Studies in Globalization
Credits 3. 3 Lecture Hours.
Selected issues on the anthropology of globalization such as the impact of global circulations of media, money and people on local cultures, identities and politics, migration and political economy. May be taken three times for credit.
Prerequisites: Junior or senior classification or approval of instructor.

ANTH 444/CLAS 444 Classical Archaeology
Credits 3. 3 Lecture Hours.
History of the discipline through the individuals, organizations, excavations, theoretical models and ethical issues that have shaped it.
Prerequisites: Junior or senior classification; ANTH 353/CLAS 353, ANTH 354/CLAS 354, CLAS 353/ANTH 353 or CLAS 354/ANTH 354.
Cross Listing: CLAS 444/ANTH 444.

ANTH 445 Studies in African Diaspora
Credits 3. 3 Lecture Hours.
Examination of topics related to global African diaspora including African descent populations outside of Africa wherever found (the Americas, the Caribbean, Europe, Asia, etc.); construction of blackness in Latin America; diversity of past and present African descent populations in the Old World; social and political mobilization; religion; popular culture; cultural politics; politics of identity. May be taken three times for credit.
Prerequisite: Junior or senior classification.
ANTH 446 Ceramic Artifact Analysis  
**Credits 3. 2 Lecture Hours. 3 Lab Hours.**  
Concepts, methods, and approaches used in the analysis of archaeological pottery with a focus on the techniques and theories used to bridge the gap between the recovery of ceramic artifacts and their interpretation within various anthropological contexts.  
**Prerequisite:** ANTH 202 and approval of instructor; junior or senior classification.

ANTH 447 Lithic Artifact Analysis  
**Credits 3. 2 Lecture Hours. 3 Lab Hours.**  
Laboratory-based course reviewing methods archaeologists use to analyze stone tools and debitage, including identification of tool-stone sources, reconstruction of technology, explanation of assemblage variability, and microscopic use-wear analysis.  
**Prerequisite:** ANTH 202 and approval of instructor; junior or senior classification.

ANTH 448 Archaeological Photography  
**Credits 3. 2 Lecture Hours. 3 Lab Hours.**  
How to better use cameras in the process of reporting archaeological sites and material culture by exploring old and new photographic technologies.  
**Prerequisite:** Junior or senior classification.

ANTH 461 Environmental Archaeology  
**Credits 3. 3 Lecture Hours.**  
Exploration of the paleoecological context in which past humans interacted with the natural environment encompassing plants, animals and landscape; advanced method, theory and applications in paleoenvironmental reconstruction.  
**Prerequisites:** ANTH 202 or approval of instructor; junior or senior classification.

ANTH 484 Anthropology Internship  
**Credits 0 to 3. 0 to 3 Other Hours.**  
Provides students with the opportunity to gain practical experience in a variety of settings, including local, state or federal agencies; museums; non-profit organizations; non-governmental organizations; private firms. May be taken four times for credit.  
**Prerequisite:** Junior or senior classification.

ANTH 485 Directed Studies  
**Credits 0 to 9. 0 to 9 Other Hours.**  
For individual research in anthropology on subjects not included in established courses.  
**Prerequisite:** Junior or senior classification or approval of instructor.

ANTH 489 Special Topics in...  
**Credits 1 to 4. 1 to 4 Lecture Hours.**  
Selected topics in an identified area of anthropology. May be repeated for credit.

ANTH 491 Research  
**Credits 0 to 3. 0 to 3 Other Hours.**  
Research conducted under the direction of a faculty member in Anthropology. May be taken two times for credit.  
**Prerequisites:** Junior or senior classification and approval of instructor.

**ARAB - Arabic (ARAB)**

ARAB 101 Beginning Arabic I  
**Credits 4. 4 Lecture Hours.**  
(ARAB 1411, 1511) Beginning Arabic I. Introduction to Modern Standard Arabic in its written and spoken forms; emphasis on conversation, rudimentary vocabulary, simple grammar, and reading.

ARAB 102 Beginning Arabic II  
**Credits 4. 4 Lecture Hours.**  
(ARAB 1412, 1512) Beginning Arabic II. Introduction of more complex grammatical constructions; vocabulary building; emphasis on putting acquired vocabulary and grammar to conversational use.  
**Prerequisite:** ARAB 101 or equivalent.

ARAB 104 Intensive Beginning Arabic  
**Credits 8. 8 Lecture Hours.**  
Accelerated elementary language study, with oral, listening, reading and writing practice. Equivalent to ARAB 101 and ARAB 102.

ARAB 201 Intermediate Arabic I  
**Credits 3. 3 Lecture Hours.**  
(ARAB 2311) Intermediate Arabic I. Practice of listening, speaking, and writing skills; vocabulary building; discussion of topics related to daily life and general aspects of Arab culture.  
**Prerequisite:** ARAB 102 or equivalent.

ARAB 202 Intermediate Arabic II  
**Credits 3. 3 Lecture Hours.**  
(ARAB 2312) Intermediate Arabic II. Emphasis on comprehending printed material, perfecting pronunciation, and attending to more complex grammar; discussion of topics holding general and professional interest; knowledge of Arab culture and history.  
**Prerequisite:** ARAB 201 or equivalent.

ARAB 204 Intensive Intermediate Arabic  
**Credits 6. 6 Lecture Hours.**  
Accelerated intermediate language study, with oral, listening, reading and writing practice. Equivalent to ARAB 201 and ARAB 202.  
**Prerequisite:** ARAB 202 or ARAB 104.

ARAB 221 Introduction to Arabic Language and Society  
**Credits 3. 3 Lecture Hours.**  
Examination of critical linguistic issues in the Arab world from a sociolinguistic perspective, including language and religion; language and power; language and nationalism; and language and education.  
**Prerequisite:** Approval of instructor.

ARAB 222 Field Studies I: Language, Culture, and Society  
**Credits 3. 3 Lecture Hours.**  
Arabic language and culture taught in an Arabic-speaking country; living with a host family; supervised travel of cultural interest; participation in activities of host institution.  
**Prerequisite:** ARAB 102 or equivalent.

ARAB 285 Directed Studies  
**Credits 1 to 4. 1 to 4 Other Hours.**  
Individual supervision of readings or assigned projects in an Asian Language, selected for each student individually; written or oral reports.  
**Prerequisite:** Approval of Arabic and Asian Language Office Director.

ARAB 289 Special Topics in...  
**Credits 1 to 4. 1 to 4 Lecture Hours. 0 to 4 Lab Hours.**  
Selected topics in an identified area of Arabic studies. May be repeated for credit.  
**Prerequisite:** Approval of instructor.

ARAB 301 Reading and Composition  
**Credits 3. 3 Lecture Hours.**  
Advanced Arabic grammar and readings of average difficulty and of different genres, including literary and journalistic texts and other culturally-enriched materials in order to develop awareness of cultural products, perspectives, and practices found in the Arab world.  
**Prerequisites:** ARAB 202; junior or senior classification or approval of instructor.
ARAB 302 Reading and Composition II  
Credits 3. 3 Lecture Hours.  
Readings of average difficulty and of different genres, including literary and journalistic texts and other culturally-enriched materials; development of writing skills with emphasis on grammatical constructions; expansion of vocabulary and oral expression.  
Prerequisites: ARAB 301; junior or senior classification or approval of instructor.

ARAB 321 Business Arabic  
Credits 3. 3 Lecture Hours.  
Business and financial terminologies useful in the Arab World; cultural etiquette for effective communication in Arabic business settings; oral and written business reports from a variety of authentic sources; language skills and communication strategies for traveling, shopping and conducting financial transactions in the Arab World.  
Prerequisite: ARAB 202 or equivalent.

ARAB 322 Field Studies II: Language, Culture, and Society  
Credits 3. 3 Lecture Hours.  
Arabic language and culture taught in an Arabic-speaking country; living with a host family; supervised travel of cultural interest; participation in activities of host institution.  
Prerequisite: ARAB 202 or equivalent.

ARAB 323 Media Arabic  
Credits 3. 3 Lecture Hours.  
Analysis of current events in the Arab World; use of print and electronic materials in Arabic from variety of media sources; discussion of different points of view in media representation/coverage; issues pertaining to business, politics, culture and entertainment in the Arab World.  
Prerequisite: ARAB 202 or equivalent.

ARCH 205 Architecture Design I  
Credits 4. 1 Lecture Hour. 9 Lab Hours.  
Issues and methods in designing environments for human habitation and well-being; projects addressing site, functional planning, spatial ordering, form generation through a recognition of the synthesis of space, structure, use and context; reinforcement of appropriate graphic and model building techniques.  
Prerequisites: ENDS 105, ENDS 106, ENDS 115, ENDS 116.*

ARCH 206 Architecture Design II  
Credits 5. 2 Lecture Hours. 9 Lab Hours.  
Fundamental issues of innovative design processes and creation explored through the creative use of past, present and future materials, tools, and technologies; with an emphasis upon the research of materials, methods, scale, craft and technique as instruments of design, fabrication, and production.  
Prerequisites: ARCH 205; ENDS 105, ENDS 106, ENDS 115, ENDS 116.*

ARCH 207 Architecture Design II  
Credits 5. 2 Lecture Hours. 9 Lab Hours.  
Technology as medium for design planning and communication; impact and influence of technology on architectural design process; investigation of computing theories, systems, methods and current and future trends through creative thinking and innovation design, problem solving and creation with the use of digital media.  
Prerequisites: ARCH 205 and ENDS 105, ENDS 106, ENDS 115, ENDS 116.*

ARCH 212 Social and Behavioral Factors in Design  
Credits 3. 3 Lecture Hours.  
Social and behavioral factors in the built and natural environment; environmental perception and spatial cognition; social-environmental processes such as privacy and crowding; setting-oriented discussion on residences, education, and the workplace; the psychology of nature and natural resource management; social design and social science contribution to architectural design.

ARCH 213 Sustainable Architecture  
Credits 3. 3 Lecture Hours.  
A comprehensive introduction to sustainability concepts, techniques and applications at all levels of the built environment, history of contemporary development of sustainable architecture from 1960 to the present; design strategies, environmental technologies and social factors for reducing building energy needs and carbon foot prints; global applications of sustainable approaches.  
Prerequisite: Sophomore classification or approval of instructor.

ARCH 216 Computational Methods in Architecture  
Credits 3. 2 Lecture Hours. 2 Lab Hours.  
Software and processes for computer design in architecture; image editing and creation, vector drawing, 3D modeling, parametric modeling, rendering techniques and simulation.

ARCH 249 Survey of World Architecture History I  
Credits 3. 3 Lecture Hours.  
ARCH 250 Survey of World Architecture History II  
Credits 3. 3 Lecture Hours.  
(ARCH 1302) Survey of World Architecture History II. A survey of world architecture and the human-designed and built environment from the 13th to the 19th century.

ARCH 260 Comparative Theory in the Built and Virtual Environments  
Credits 3. 3 Lecture Hours.  
Introduction of cultural theory and the environment; theories, special concepts and ideas relevant to the built and virtual environments with primary focus on the last fifty years; theory, theory building, and application to buildings and urban design; formation of ideas and critical ways of assessing the environment.

ARCH 281 Seminar in Contemporary Architecture  
Credit 1. 1 Lecture Hour.  
Presentations by and discussions with professionals representing specialty areas related to environmental design through the Department of Architecture Lecture Series. May be taken four times for credit.

ARCH 291 Research in Architecture Innovation  
Credits 1 to 4. 1 to 4 Other Hours.  
Research conducted under the direction of faculty member in the College of Architecture. May be repeated 2 times for credit.  
Prerequisite: Approval of instructor and department head.

ARCH 305 Architectural Design III  
Credits 5. 2 Lecture Hours. 9 Lab Hours.  
Integration of architectural theories and philosophy with environmental design systems; study of theoretical approaches to graphic and analytical thinking, problem identification and design dissemimation through various media, case studies and problem resolution; conditions and forces associated with a variety of building types and the generation design solutions.  
Prerequisites: Admission to upper level in environmental design; ARCH 249 and ARCH 250.*

ARCH 317 Digital Fabrication for Architecture  
Credits 3. 1 Lecture Hour. 4 Lab Hours.  
Digital fabrication for architecture including software, numerically controlled tools, translation applications and management strategies for digital fabrication workflows; production of building components from three dimensional datasets of virtual architecture proposals.  
Prerequisites: Junior or senior classification or approval of instructor; ARCH 216 or approval of instructor.

ARCH 327 Conceptual Structural Analysis  
Credits 3. 1 Lecture Hour. 4 Lab Hours.  
A non-mathematical investigation of structural systems and components with respect to behavior; selection of the most appropriate structural system for various building typologies.  
Prerequisite: Junior or senior classification or approval of instructor.

ARCH 328 Architectural Envelopes  
Credits 3. 3 Lecture Hours.  
Study of roof, wall, glazing and screen systems of significant works in contemporary architecture and the strategies behind their making; focus on innovative materials, surface effects, and performance aspects.  
Prerequisite: Junior or senior classification in environmental design.

ARCH 330 The Making of Architecture  
Credits 3. 3 Lecture Hours.  
Study of significant works of contemporary architecture and materials and strategies used in their making; focus on innovative materials, systems, and partnerships necessary to realize the design.  
Prerequisites: Junior or senior classification in environmental design or approval of instructor or ARCH classification.

ARCH 331 Architectural Structures  
Credits 3. 2 Lecture Hours. 2 Lab Hours.  
Physical principles that govern statics and strength of materials through the design of architectural structures from a holistic view, in the context of architectural ideas and examples; introduction to construction, behavior of materials, and design considerations for simple and complex structural assemblies; computer applications.  
Prerequisites: Junior or senior classification in environmental design; MATH 142 or equivalent; PHYS 201.

ARCH 335 Architectural Systems  
Credits 3. 3 Lecture Hours.  
Theory and applications of building energy use, envelope design, shading analysis, heating and cooling systems, lighting design; building water supply, plumbing and drainage systems; electrical, acoustical, fire and lightning protection; life safety; transportation systems and construction materials; calculations, equipment selection, and component sizing as they relate to building design.  
Prerequisites: Junior or senior classification in environmental design; PHYS 201.

ARCH 345 History of Building Technology  
Credits 3. 3 Lecture Hours.  
Chronological development of civilization and building technology from prehistoric cultures to present; classic and modern materials, structural devices past and present, machine-produced products, prefabrication, construction methodology and servicing.

ARCH 350 History and Theory of Modern and Contemporary Architecture  
Credits 3. 3 Lecture Hours.  
Development of modern and contemporary architecture in the 20th and 21st centuries; materials, structure, social and economic changes as well as architectural theory.  
Prerequisites: Junior or senior classification.

ARCH 353 History of Product Design  
Credits 3. 3 Lecture Hours.  
History of product design in Europe and America including the relationship between designer and object, the relationship of design, industry and media over time and design criticism; focus on material/technical and typological approaches, comparative method and content analysis in context of original environment and social history.  
Prerequisite: Junior or senior classification or approval of instructor.

ARCH 381 Design Seminar  
Credit 1. 1 Lecture Hour.  
Presentations by and discussions with professionals representing specialty areas related to architectural fabrication and product design. May be taken three times for credit.  
Prerequisite: Junior or senior classification or approval of instructor.
ARCH 405 Architectural Design IV  
Credits 5. 2 Lecture Hours. 9 Lab Hours.  
A comprehensive design studio focused on the integration of design  
theory with functionally sustainable environmental and structural systems;  
consideration of a project from site analysis and programming through  
design detailing.  
Prerequisites: Admission to upper level in environmental design;  
ARCH 305, ARCH 331, ARCH 335; CARC 301 or ARCH 494; concurrent  
enrollment in ARCH 431 and ARCH 435.*

ARCH 406 Architecture Design V  
Credits 5. 2 Lecture Hours. 9 Lab Hours.  
Topical approaches to design, emphasizing theory and practice of  
architecture or related disciplines, such as urban design, interior design,  
health care design, etc.  
Prerequisites: Junior or senior classification; admission to upper level in  
environmental design; ARCH 305, ARCH 331 and ARCH 335; CARC 301  
or ARCH 494; students may with approval of the department enroll in the  
course during the summer term prior to taking ARCH 405; ARCH 431  
and ARCH 435 if they are within 20 credit hours of graduation prior to the  
beginning of the following fall semester.*

ARCH 421 Energy and Sustainable Architecture  
Credits 3. 3 Lecture Hours.  
Understanding the various design decisions impacting sustainability and  
energy efficiency; includes participation in an "academic" LEED-NC rating  
project; interdisciplinary team approach with a design studio architect to  
perform the LEED-NC rating on the architect's building; application of  
reference material, standards, and USGBC material.  
Prerequisite: Junior and senior classification or approval of instructor.

ARCH 430 History of Ancient Architecture  
Credits 3. 3 Lecture Hours.  
Architecture of antiquity, examining stylistic, structural and theoretical  
advancements in building, beginning with Mesopotamian and continuing  
with Egyptian, Greek and Roman civilizations.  
Prerequisite: ARCH 249 or ARTS 149; junior or senior classification or  
approval of degree coordinator or instructor.

ARCH 431 Integrated Structures  
Credits 2. 1 Lecture Hour. 2 Lab Hours.  
Selection and economics of structural systems in the context of integrating  
structural systems into a building through good design; analysis and  
design of wood, steel, concrete, and composite systems and members in  
relation to building design.  
Prerequisites: Admission to upper level in environmental design;  
ARCH 305, ARCH 331, ARCH 335; concurrent enrollment in ARCH 405  
and ARCH 435.

ARCH 433 Architectural Lighting  
Credits 3. 3 Lecture Hours.  
Theory and practice of lighting design as an art and science; aperture  
design for sunlight control; selecting and locating luminaries to enhance  
interior and exterior surfaces and spaces.  
Prerequisite: ARCH 335 or junior or senior classification in EDAS.

ARCH 434 The Role of Sculpture and Painting in Ancient Architecture  
Credits 3. 3 Lecture Hours.  
Interrelationships of architecture, painting and sculpture in the ancient  
world including Egypt, Mesopotamia, Crete, Greece and Rome.  
Prerequisite: ARCH 249 or ARTS 149; junior or senior classification or  
approval of degree coordinator or instructor.

ARCH 435 Integrated Systems  
Credits 2. 1 Lecture Hour. 2 Lab Hours.  
Understanding how to integrate sustainable environmental systems into  
a building through good design; lectures support studio; systems faculty  
participate in studio critiques throughout the project.  
Prerequisites: Admission to upper level in environmental design;  
ARCH 305, ARCH 331, ARCH 335; concurrent enrollment in ARCH 405  
and ARCH 431.

ARCH 437 Great Medieval Cathedrals  
Credits 3. 3 Lecture Hours.  
Interrelationships of architecture, sculpture and stained glass, technology  
and construction, function and form, society and patronage in the great  
period of medieval building.  
Prerequisite: ARCH 250 or ARTS 150; junior or senior classification or  
approval of degree coordinator or instructor.

ARCH 439 Architectural History of Mexico  
Credits 3. 3 Lecture Hours.  
History of architecture and urban design of Mexico and the southwestern  
United States from pre-Hispanic to contemporary eras.  
Prerequisites: ARCH 249 or ARCH 250; junior or senior classification or  
approval of degree coordinator or instructor.

ARCH 441 Baroque and Rococo Architecture  
Credits 3. 3 Lecture Hours.  
The investigation of the history of architecture, the arts and society, and  
major creative individuals from the late sixteenth to the early eighteenth  
centuries.  
Prerequisite: ARCH 250 or ARTS 150; junior or senior classification or  
approval of degree coordinator or instructor.

ARCH 443 Aegean Art and Architecture  
Credits 3. 3 Lecture Hours.  
Art and architecture of the prehistoric Aegean, ca. 6000-1100 B.C.E.;  
focus on the built environment, material culture and visual arts of early  
civilization in the Aegean basin; evidence for regional and vernacular  
architectural traditions; expressions of power, ideology and social identity  
through monumental architectural and elite arts of Minoan Crete and  
Mycenaean Greece.  
Prerequisites: Junior or senior classification; approval of instructor or  
degree coordinator.

ARCH 446 Foundations of Historic Preservation  
Credits 3. 3 Lecture Hours.  
Exploration and evaluation of the cross-disciplinary work of historic  
preservation; emphasis on the significance of historic places to societal  
well-being and conservation alternatives for historic and cultural  
environments; review of preservation projects and treatments; guest  
presentations and case studies from practicing professionals and  
researchers in a variety of fields.  
Prerequisite: Junior or senior classification or approval of instructor.
ARCH 451 Strategies in Architectural Management
Credits 3. 3 Lecture Hours.
Emerging strategies in the architecture and construction industry, with an emphasis on understanding the changing structure of the industry and the management of both firms and projects.
Prerequisite: Senior classification or approval of degree coordinator.

ARCH 452 Careers in Architecture
Credits 3. 3 Lecture Hours.
Career opportunities in the profession of architecture; investigations into the composition of architectural practice today and the wide range of specialties represented in architectural firms; interviews with select representative individuals.
Prerequisite: Admission to upper level in environmental design, construction science or landscape architecture.

ARCH 457 Ethics and Professional Practice
Credits 3. 3 Lecture Hours.
Issues and relationships within the business, legal and political environment; introduction to the concepts of architectural specifications and the AIA standard conditions of the construction contract; forms of construction, bidding and contract documents. For undergraduate students pursuing a professional degree and a career in architecture.
Prerequisite: Senior classification in environmental design.

ARCH 458 Cultural and Ethical Considerations for Global Practice
Credits 3. 3 Lecture Hours.
Issues and relationships within the cultural, business, legal and political environments of global practice; differences in the construction contract, bidding and various forms of construction.
Prerequisite: Junior or senior classification.

ARCH 463 Elements of Interior Architecture
Credits 3. 3 Lecture Hours.
Analysis and design of architectural interiors; historical and professional perspectives incorporating programming, space planning and organization; specification and selection of furnishings and materials to satisfy user needs in residential, commercial and institutional settings.
Prerequisites: Admission to upper level in environmental design; concurrent enrollment in ARCH 405, ARCH 431 and ARCH 435 not allowed.*

ARCH 481 Seminar
Credit 1. 1 Lecture Hour.
Presentations by and discussions with professionals representing specialty areas related to environmental design; career and academic objectives. May be repeated for up to 4 credit hours. Must be taken on a satisfactory/unsatisfactory basis.
Prerequisite: Junior or senior classification or approval of instructor.

ARCH 484 Summer Internship
Credits 6. 12 Other Hours.
Practical experience in an office of design allied professionals; 10-week internship with a minimum of 400 hours continuous employment; departmental pre-approval through the departmental internship coordinator required; post evaluation conducted following the internship. May not be repeated for credit.
Prerequisites: Junior or senior classification or approval of instructor; approval of the environmental design internship coordinator.

ARCH 485 Directed Studies
Credits 1 to 5. 1 to 5 Other Hours.
Special projects in architecture. May be repeated for credit.
Prerequisites: Admission to upper level in environmental design; approval of instructor and degree coordinator.

ARCH 489 Special Topics in...
Credits 1 to 6. 1 to 6 Lecture Hours. 0 to 4 Lab Hours.
Special topics in an identified area of architecture. May be repeated for credit.
Prerequisite: Junior or senior classification; approval of instructor and degree coordinator.

ARCH 491 Advanced Architecture Innovation Research
Credits 1 to 6. 1 to 6 Other Hours.
Research conducted under the direction of faculty member in the College of Architecture. May be repeated 2 times for credit.
Prerequisite: Admission to upper level in environmental design; approval of instructor and department head.

ARCH 494 Internship
Credits 9. 18 Other Hours.
Practical experience in an office of design allied professionals; fifteen week internship with a minimum of 600 hours of continuous employment; departmental pre-approval through the departmental internship coordinator required; post evaluation conducted following the internship. To be taken only as a requirement for the study away semester. May not be repeated for credit.
Prerequisites: Junior or senior classification; admission to upper level in environmental design; CARC 481; approval of the environmental design internship coordinator.

**ARTS - Art (ARTS)**

ARTS 103 Design I
Credits 3. 2 Lecture Hours. 4 Lab Hours.
(ARTS 1311) Design I. Two-dimensional design; fundamentals of line, color, form, texture, shape, space and arrangement.

ARTS 104 Introduction to Graphic Design
Credit 1. 2 Lab Hours.
Introduction to the concepts and techniques utilized in the layout of graphic presentations; basic digital camera operations, typography, use of color, design principles; integration of type, graphic elements and images.
Prerequisite: Major in visualization or minor in art.

ARTS 111 Drawing I
Credits 3. 2 Lecture Hours. 4 Lab Hours.
(ARTS 1316) Drawing I. Variety of media techniques and subjects, exploring perceptual and descriptive possibilities; drawing as a developmental process as well as an end in itself; freehand.

ARTS 115 Drawing for Visualization
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Investigation of and practice with tools, methods and techniques available for communication of designs; drawing, graphics, rendering and color.
Prerequisite: Visualization majors only.

ARTS 149 Art History Survey I
Credits 3. 3 Lecture Hours.
(ARTS 1303) Art History Survey I. Survey of architecture, painting, sculpture and the minor arts from prehistoric times to 14th century.

ARTS 150 Art History Survey II
Credits 3. 3 Lecture Hours.
(ARTS 1304) Art History Survey II. Survey of architecture, painting, sculpture and the minor arts from the 14th century to the end of the 19th century.
ARTS 210 Introduction to Photography
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Introduction to the digital camera, creation, manipulation and critique of the
digital image; composition and aesthetics; exposure control; digital work-
flow; post-processing techniques; layering and compositing; history of the
photographic image.
Prerequisite: Non-visualization majors only.

ARTS 212 Life Drawing
Credits 3. 1 Lecture Hour. 6 Lab Hours.
Emphasis on structure and action of the human figure.
Prerequisite: ARTS 111 or ARTS 115 or equivalent, or approval of
instructor and undergraduate program coordinator.

ARTS 303 Graphic Design I
Credits 3. 2 Lecture Hours. 4 Lab Hours.
Introduction to the principles of graphic design; composition and their
application for printed and digital media.
Prerequisites: ARTS 104, VIST 105, ENDS 105 or approval of instructor
and undergraduate program coordinator.

ARTS 304 Graphic Design II
Credits 3. 2 Lecture Hours. 4 Lab Hours.
Continuation of ARTS 303; concepts in advanced graphics as a tool for
design solutions for publication and promotion; emphasis on creative
thinking over technology.
Prerequisites: ARTS 303; junior or senior classification.

ARTS 305 Painting I
Credits 3. 2 Lecture Hours. 4 Lab Hours.
Exploring potentials of painting media with emphasis on color and
composition.
Prerequisite: ARTS 111 or ARTS 115 or approval of instructor and
undergraduate program coordinator; junior or senior classification.

ARTS 308 Sculpture
Credits 3. 1 Lecture Hour. 5 Lab Hours.
Sculptural principles of physical form, space and materials; context and
content of three-dimensional art forms.
Prerequisite: ARTS 115 or equivalent or approval of instructor and
undergraduate program coordinator; junior or senior classification.

ARTS 311 Black and White Photography
Credits 3. 2 Lecture Hours. 4 Lab Hours.
Exploration of vision through the photographic image as a medium of
visual expression; basic theory and practice of black and white and/or still
photography and/or digital imaging; historic development and aesthetic
concern for photographic imagery.
Prerequisites: Approval of instructor and undergraduate program
coordinator; junior or senior classification.

ARTS 312 Advanced Photography
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Advanced photographic image-making; development, control and
presentation of the expressive photographic image; expression and
criticism.
Prerequisite: ARTS 210, VIST 310 or ARTS 311.

ARTS 325 Digital Painting
Credits 3. 2 Lecture Hours. 4 Lab Hours.
Theory and practice of digital painting media; exploration of traditional and
new forms of art making and creativity; emphasis on color theory.
Prerequisites: ARTS 103, ARTS 115 or equivalent; junior or senior
classification.* "Field trip required.

ARTS 329 Texas Art History
Credits 3. 3 Lecture Hours.
The development of visual arts in Texas; an examination of art
movements, artists and major works exhibiting a broad range of artistic
techniques.
Prerequisite: Junior or senior classification or approval of instructor and
undergraduate program coordinator.

ARTS 330 The Arts of America
Credits 3. 3 Lecture Hours.
Survey of painting, sculpture, crafts and architecture of prehistoric America
to the present; emphasis on art as a record of cultural, economic and
social evolution.
Prerequisite: Junior or senior classification or approval of instructor and
undergraduate program coordinator.

ARTS 335 The Art and Architecture of Rome
Credits 3. 3 Lecture Hours.
Rome as a microcosm of western civilization; a survey of western
architectural and art history from antiquity through the Baroque; a focus on
the Eternal City's buildings, paintings, mosaics and sculptures exploring
criteria, methods, goals and results of major architectural and artistic
movements and the people involved.
Prerequisite: Junior or senior classification or approval of instructor and
undergraduate program coordinator.

ARTS 349 The History of Modern Art
Credits 3. 3 Lecture Hours.
Chronological development of late 19th through 20th century art; emphasis
on key artists, paintings, sculpture, photography and architecture.
Prerequisite: Junior or senior classification or approval of instructor and
undergraduate program coordinator.

ARTS 350 The Arts and Civilization
Credits 3. 3 Lecture Hours.
Investigation of the image of work of selected periods in terms of criticism,
aesthetic rationale, specific masters and social significance by going
beyond historical chronology.

ARTS 353 Color Theory
Credits 3. 2 Lecture Hours. 4 Lab Hours.
Aspects of color and color theory including optical phenomena, color
theory and perception; application and principles with respect to art and
design; two-dimensional and three-dimensional projects examining color
theories.
Prerequisites: College of Architecture majors or art minors; junior or
senior classification.

ARTS 403 Graphic Design III
Credits 3. 2 Lecture Hours. 4 Lab Hours.
Advanced graphic design concepts and practices; development of unified
graphic campaigns to promote a product, an organization, a publication, a
service, or business; advanced problem-solving techniques based on the
design process through research, analysis, and presentation; systematic
approach to visual development.
Prerequisites: ARTS 303 and ARTS 304; junior or senior classification or
approval of instructor and undergraduate program coordinator; knowledge
of industry-standard software (Adobe Photoshop, InDesign and Illustrator)
is expected.
ARTS 445 Byzantine Art and Architecture  
Credits 3. 3 Lecture Hours.  
A critical and historical investigation of Mediterranean art and architecture from the third century to the middle of the fifteenth century; emphasis on the artistic achievements from the late antique Mediterranean and the Byzantine Empire; investigation of architectural decoration, public monuments, cultural diversity and controversies over images.  
Prerequisite: Junior or senior classification.

ARTS 485 Directed Studies  
Credits 1 to 4. 1 to 4 Other Hours.  
Special problems in the fine and applied visual and plastic arts. May be repeated for up to 12 credit hours.  
Prerequisite: Approval of instructor and undergraduate program coordinator.

ARTS 489 Special Topics in...  
Credits 1 to 4. 1 to 4 Lab Hours.  
Selected topics in an identified field of the fine and applied visual and plastic arts. May be repeated for up to 9 credit hours.  
Prerequisite: Approval of instructor and undergraduate program coordinator.

ASIA - Asian Studies (ASIA)

ASIA 285 Directed Studies  
Credits 0 to 4. 0 to 4 Other Hours.  
Selected fields of Asian Studies not covered in depth by other courses. Reports and extensive reading required. May be repeated for credit.  
Prerequisite: Approval of director of Asian Studies.

ASIA 289 Special Topics in...  
Credits 1 to 4. 1 to 4 Lecture Hours.  
Selected topics in Asian studies. May be repeated for credit.

ASIA 306/SOCI 306 Society and Population of Modern China  
Credits 3. 3 Lecture Hours.  
Major trends and current topics in social and demographic aspects of the society of modern China, including Taiwan.  
Prerequisite: Junior or senior classification.  
Cross Listing: SOCI 306/ASIA 306.

ASIA 325/SOCI 325 International Business Behavior  
Credits 3. 3 Lecture Hours.  
Theoretical models and practical protocols/behavior demands to conduct business and to work in France, Germany, Japan, China, Mexico and other countries; discussion of national character, managerial and negotiating styles.  
Prerequisite: Junior or senior classification.  
Cross Listing: SOCI 325/ASIA 325.

ASIA 329/SOCI 329 Pacific Rim Business Behavior  
Credits 3. 3 Lecture Hours.  
Theoretical models of Asian cultures and practical protocol/etiquette related to business and work in China, Thailand, South Korea, Japan, Australia, and other Pacific Rim nations; discussions of national character, managerial behavior and values.  
Prerequisite: Junior or senior classification.  
Cross Listing: SOCI 329/ASIA 329.

ASIA 330 Modern Mediterranean World  
Credits 3. 3 Lecture Hours.  
Critical examination of Mediterranean history; colonialism, industrialization, and other trans-national phenomena linking Africa, Asia, and Europe; social and political movements, migration, intellectual trends.  
Prerequisite: Junior or senior classification.

ASIA 335/ANTH 335 Cultures of Central Asia  
Credits 3. 3 Lecture Hours.  
Study of anthropological research in Central Asia: ecological adaptations; colonialism and post-colonialism; ethnic politics and ethnic conflict; religion and identity; gender and family; globalization and modernization.  
Prerequisite: Junior or senior classification.  
Cross Listing: ANTH 335/ASIA 335.

ASIA 349/HIST 349 The Vietnam War/The American War  
Credits 3. 3 Lecture Hours.  
Vietnam's relations with the West; French colonialism; origins and development of Vietnamese nationalism; Cold War and American involvement; wartime societies in North and South Vietnam; expansion of the war to Cambodia and Laos; anti-war movements in the United States; reasons for the American defeat; consequences and lessons of the war.  
Prerequisites: Junior or senior classification.  
Cross Listing: HIST 349/ASIA 349.

ASIA 350/HIST 350 World War II in Asia and the Pacific  
Credits 3. 3 Lecture Hours.  
Origins and development of Japanese imperialism; Japan's expansion into East and Southeast Asia and the Pacific; wartime societies; collaboration and resistance; effects of the war in the United States on Japanese-Americans; outcomes of the war; remembrance of the war.  
Prerequisite: Junior or senior classification.  
Cross Listing: HIST 350/ASIA 350.

ASIA 351/HIST 351 Traditional East Asia  
Credits 3. 3 Lecture Hours.  
History and culture of China and Japan from earliest times to the coming of the West; impact of Confucianism and Buddhism; development of social, political and economic systems.  
Prerequisite: Junior or senior classification.  
Cross Listing: HIST 351/ASIA 351.

ASIA 352/HIST 352 Modern East Asia  
Credits 3. 3 Lecture Hours.  
Impact of the West on traditional China and Japan; the response through modernization; rise of nationalism and formation of modern nation states.  
Prerequisite: Junior or senior classification.  
Cross Listing: HIST 352/ASIA 352.

ASIA 354/HIST 354 Imperial China  
Credits 3. 3 Lecture Hours.  
History of imperial China from the earliest dynasties through the mid19th century, including major political events, the structure of Chinese government, economic development, philosophies and religion, wars and military and culture and daily life.  
Prerequisite: Junior or senior classification.  
Cross Listing: HIST 354/ASIA 354.

ASIA 355/HIST 355 Modern China  
Credits 3. 3 Lecture Hours.  
History of China from the coming of the West to the present; social, economic and political changes which have taken place during that period.  
Prerequisite: Junior or senior classification.  
Cross Listing: HIST 355/ASIA 355.

ASIA 356/HIST 356 Twentieth Century Japan  
Credits 3. 3 Lecture Hours.  
Industrialization and modernization of Japan; its rise from an isolated nation to a major world power and economic giant.  
Prerequisite: Junior or senior classification.  
Cross Listing: HIST 356/ASIA 356.
ASIA 358/HIST 358 Chinese Cultural History
Credits 3. 3 Lecture Hours.
Examination of Chinese culture and its evolution over the last 4,000 years; customs, art, literature, festivals, folklore, religion, architecture, medicine, and everyday life.
Prerequisite: Junior or senior classification.
Cross Listing: HIST 358/ASIA 358.

ASIA 360/ANTH 350 Archaeology of the Old World
Credits 3. 3 Lecture Hours.
Overview of archaeology and prehistory of Europe, Africa and Asia from the evolution of the hominids to the development of agriculture and the rise of civilization.
Prerequisite: Junior or senior classification.
Cross Listing: ANTH 350/ASIA 360.

ASIA 365/POLS 365 Asian Governments and Politics
Credits 3. 3 Lecture Hours.
Contemporary political systems of Asia, political institutions, actors and processes.
Prerequisite: Junior or senior classification.
Cross Listing: POLS 365/ASIA 365.

ASIA 401 Slavery in World History
Credits 3. 3 Lecture Hours.
Comparative history of human slavery; slavery in the Ancient World, Asia, Africa; varieties of modern slavery in the New World since 1500; abolition of slavery and continuing forms of human bondage in the contemporary world.
Prerequisite: Junior or senior classification.
Cross Listing: AFST 401 and HIST 401.

ASIA 463 Gender in Asia
Credits 3. 3 Lecture Hours.
Gender dynamics in Asia; changes in gender roles; women's movements; women and the economy; women and politics; men's and women's private lives.
Prerequisite: Junior or senior classification.
Cross Listing: SOCI 463 and WGST 463.

ASIA 485 Directed Studies
Credits 1 to 3. 1 to 3 Other Hours.
Selected fields of Asian Studies not covered in depth by other courses. Reports and extensive reading required. May be repeated for credit.
Prerequisite: Approval of director of Asian Studies.

ASIA 489 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Selected topics in Asian Studies. May be repeated for credit.

ASIA 491 Research
Credits 1 to 3. 1 to 3 Other Hours.
Research conducted under the direction of a faculty member in Asian Studies. May be repeated 3 times for credit.
Prerequisites: 6 credits of ASIA; junior or senior classification; approval of instructor.

ASTR - Astronomy (ASTR)

ASTR 101 Basic Astronomy
Credits 3. 3 Lecture Hours.
(ASTR 1303) Basic Astronomy. A qualitative approach to basic stellar astronomy; earth-moon-sun relationships then studies of distances to stars, stellar temperatures, and other physical properties; birth, life on the main sequence of the H-R diagram, and ultimate fates of stars; not open to students who have taken ASTR 111 or ASTR 314.

ASTR 102 Observational Astronomy
Credit 1. 3 Lab Hours.
Observational and laboratory course which may be taken in conjunction with ASTR 101 or ASTR 314. Use of techniques and instruments of classical and modern astronomy.
Prerequisite: ASTR 101 or ASTR 314, or registration therein.

ASTR 103 Introduction to Stars and Exoplanets
Credits 3. 3 Lecture Hours.
A qualitative study of stellar birth, stellar structure and evolution, stellar nucleosynthesis, the Hertzsprung-Russell Diagram, white dwarfs, neutron stars, supernovae, black holes, proto-planetary systems, origin of the solar system and the search for exoplanets; utilizes active learning methods that incorporate observations from the current generation of ground and space-based telescopes. Open to all majors.

ASTR 104 Introduction to Galaxies and Cosmology
Credits 3. 3 Lecture Hours.
A qualitative study of properties of galaxies, galaxy evolution through cosmic time, galactic archaeology, active galactic nuclei, super-massive black holes, large-scale structure, the expansion history of the universe, cosmological parameters and Big Bang nucleosynthesis; utilizes active learning methods that incorporate observations from the current generation of ground and space-based telescopes. Open to all majors.

ASTR 109/PHYS 109 Big Bang and Black Holes
Credits 3. 3 Lecture Hours.
Designed to give an intuitive understanding of the Big Bang and Black Holes, without mathematics, and de-mystify them for the non-scientist.

ASTR 111 Overview of Modern Astronomy
Credits 4. 3 Lecture Hours. 2 Lab Hours.
(ASTR 1303, and 1103, ASTR 1403) Overview of Modern Astronomy. Roots of modern astronomy; the scientific method; fundamental physical laws; the formation of planets, stars, and galaxies; introduction to cosmology; includes an integrated laboratory that reinforces the lecture topics, including hands-on experience with telescopes and imaging of celestial objects; not open to students who have taken ASTR 101 or ASTR 314.

ASTR 119/PHYS 119 Big Bang and Black Holes: Laboratory Methods
Credit 1. 2 Lab Hours.
Hands-on understanding of the concepts surrounding the Big Bang and Black Holes; emphasis on the evidence-based decision making process, methods and presentation; for non-scientists. Companion course for ASTR 109/PHYS 109/ASTR 109.
Prerequisite: ASTR/PHYS 109/ASTR 109 or registration therein.
Cross Listing: PHYS 119/ASTR 119.

ASTR 285 Directed Studies
Credits 1 to 4. 1 to 4 Other Hours.
Special work in laboratory or theory to meet individual requirements in cases not covered by regular curriculum; intended for use as lower-level credit.
Prerequisite: Approval of department head.

ASTR 289 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours. 0 to 4 Lab Hours.
Selected topics in an identified area of astronomy. May be repeated for credit.
Prerequisite: Approval of instructor.
ATMO 291 Research
Credits 0 to 4. 0 to 4 Other Hours.
Research conducted under the direction of faculty member in astronomy. May be repeated 2 times for credit.
Prerequisites: Freshman or sophomore classification and approval of instructor.

ASTR 314 Survey of Astronomy
Credits 3. 3 Lecture Hours.
Primarily for majors in science and engineering. Kepler's laws, law of gravitation, solar system, stars, stellar evolution, nucleosynthesis, cosmology, clusters, nebulae, pulsars, quasars, black holes.
Prerequisite: PHYS 208.

ASTR 320 Astrophysical Research Methods
Credits 2. 2 Lecture Hours.
Background and tools used by astronomical researchers in performing analyses; topics include reduction of photometric and spectroscopic data, bivariate and multivariate statistical methods and chi-squared minimization.
Prerequisites: MATH 171 and MATH 172.

ASTR 401 Stars and Extrasolar Planets
Credits 3. 3 Lecture Hours.
How stars are born, how internal structure changes, nuclear fuel burned and ultimate fate; extrasolar planets: detection, formation, properties and habitability.
Prerequisite: ASTR 314.

ASTR 403 Extragalactic Astronomy and Cosmology
Credits 3. 3 Lecture Hours.
Physical makeup of individual galaxies and large scale structure in the universe; origin and eventual fate of the universe; interpretation of observational data as it relates to baryonic matter, Dark Matter and cosmological models with Dark Energy.
Prerequisite: ASTR 314.

ASTR 485 Directed Studies
Credits 1 to 12. 1 to 12 Other Hours.
Special work in laboratory or theory to meet individual requirements in cases not covered by regular curriculum.
Prerequisite: Approval of department head.

ASTR 489 Special Topics in...
Credits 1 to 4. 0 to 4 Lecture Hours. 0 to 4 Lab Hours.
Selected topics in an identified topic of astronomy. May be repeated for credit.
Prerequisite: Approval of instructor.

ASTR 491 Research
Credits 0 to 4. 0 to 4 Other Hours.
Research conducted under the direction of faculty member in astronomy. May be repeated for credit. Registration in multiple sections of this course is possible within a given semester provided that the per semester credit hour limit is not exceeded.
Prerequisites: Junior or senior classification and approval of instructor.

ATMO 201 Weather and Climate
Credits 3. 3 Lecture Hours.
Structure, energy, and motions of the atmosphere; climate; fronts and cyclones; atmospheric stability; clouds and precipitation; severe storms.

ATMO 202 Weather and Climate Laboratory
Credit 1. 2 Lab Hours.
Practical laboratory experiments and exercises, conducted in the meteorology and computer laboratories, concerning the fundamental physical processes underlying atmospheric phenomena, and the collection, display and interpretation of meteorological information. For non-majors only.

ATMO 203 Weather Forecasting Laboratory
Credit 1. 2 Lab Hours.
Short-range weather forecasting practice; numerical guidance; weather map analysis and discussions.
Prerequisite: Concurrent enrollment in ATMO 201.

ATMO 251 Weather Observation and Analysis
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Standard and experimental weather observing techniques; subjective and objective analysis; application of conceptual models; simple kinematic and dynamic constraints.
Prerequisite: ATMO 203 or registration therein.

ATMO 285 Directed Studies
Credits 1 to 4. 1 to 4 Other Hours.
Offered to enable majors in meteorology to undertake and complete with credit in their particular fields of specialization limited investigations not covered by any other courses in established curriculum.
Prerequisite: Freshman or sophomore classification.

ATMO 289 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Selected topics in an identified area of meteorology. May be repeated for credit.
Prerequisite: Approval of instructor.

ATMO 291 Research
Credits 0 to 4. 0 to 4 Other Hours.
Research conducted under the direction of faculty member in atmospheric sciences. May be repeated 2 times for credit. Registration in multiple sections of this course is possible within a given semester provided that the per semester credit hour limit is not exceeded.
Prerequisites: Freshman or sophomore classification and approval of instructor.

ATMO 314 Survey of Meteorology
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Introduction to technical computing methods in the atmospheric sciences; use of specialized software and data analysis systems for meteorological applications.

ATMO 320 Astrophysical Research Methods
Credits 2. 2 Lecture Hours.
Background and tools used by astronomical researchers in performing analyses; topics include reduction of photometric and spectroscopic data, bivariate and multivariate statistical methods and chi-squared minimization.
Prerequisites: MATH 171 and MATH 172.

ATMO 321 Computer Applications in the Atmospheric Sciences
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Introduction to technical computing methods in the atmospheric sciences; use of specialized software and data analysis systems for meteorological applications.

ATMO 324 Physical and Regional Climatology
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Climate causes; global and surface energy balance; hydrologic cycle; general circulation; climate change; climate data analysis.
Prerequisites: ATMO 201 and ATMO 203; MATH 308 or registration therein or approval of instructor; ATMO 321 or equivalent; junior or senior classification.

ATMO 326 Environmental Atmospheric Science
Credits 4. 3 Lecture Hours. 3 Lab Hours.
Basic concepts of meteorology as needed in architectural and engineering fields; patterns of climatic elements and their application to practical problems in building and urban sciences; practical experience in use of instruments to measure cryptoclimes of buildings as they relate to outside conditions and analysis of data.
ATMO 335 Atmospheric Thermodynamics  
Credits 3. 3 Lecture Hours.  
Application of thermodynamics to Earth's atmosphere; phase changes of water; stability concepts; introduction to physical chemistry.  
Prerequisites: CHEM 102; MATH 251; PHYS 218.

ATMO 336 Atmospheric Dynamics  
Credits 4. 3 Lecture Hours. 2 Lab Hours.  
Kinematic concepts and relationships; equations of motion; geostrophic and accelerated motions; the vorticity equation and Rossby waves.  
Prerequisites: ATMO 335 or registration therein; MATH 308 or registration therein; junior or senior classification.

ATMO 352 Severe Weather and Mesoscale Forecasting  
Credits 3. 2 Lecture Hours. 2 Lab Hours.  
Parcel theory for dry and moist convection; sounding diagrams and their application to atmospheric convection; organization of midlatitude convection and severe weather; thunderstorm forecasting.  
Prerequisite: MATH 152 or MATH 172.

ATMO 363 Introduction to Atmospheric Chemistry and Air Pollution  
Credits 3. 3 Lecture Hours.  
Descriptive introduction of the composition and chemistry of natural and pollutant compounds in the atmosphere; transport, cycling and reactivity of atmospheric material; atmospheric measurements, data processing, air quality and human health issues; air pollution trends and climate change.  
Prerequisites: CHEM 101 and CHEM 102 or approval of instructor.

ATMO 435 Synoptic-Dynamic Meteorology  
Credits 3. 3 Lecture Hours.  
Dynamics and diagnosis of synoptic-scale systems; perturbation theory and baroclinic instability; wave energetics, frontogenesises.  
Prerequisites: ATMO 336 or equivalent; MATH 308.

ATMO 441 Satellite Meteorology and Remote Sensing  
Credits 3. 2 Lecture Hours. 2 Lab Hours.  
Introduction to satellite orbit dynamics, atmospheric radiative transfer, atmospheric remote sensing methods, and analysis and application of remotely sensed meteorological data.  
Prerequisites: ATMO 324; MATH 308; junior or senior classification.

ATMO 443 Radar Meteorology  
Credits 3. 2 Lecture Hours. 2 Lab Hours.  
Principles of radar theory, hardware, operations and analysis using real-time radar and computer-based case studies; conventional, Doppler and polarimetric weather radar; precipitation estimation, hydrometeor identification and air motion analysis; observations and analyses of thunderstorms, mesocyclones, tornadoes and gust fronts.  
Prerequisites: ATMO 352; PHYS 208.

ATMO 446 Physical Meteorology  
Credits 3. 3 Lecture Hours.  
Physics and meteorology of clouds and precipitation; atmospheric electricity; radiative transfer.  
Prerequisite: ATMO 335.

ATMO 455 Numerical Weather Prediction  
Credits 3. 2 Lecture Hours. 2 Lab Hours.  
Basic principles of computer models of the atmosphere; parameterizations; use and critical evaluation of models and model output.  
Prerequisites: MATH 308; ATMO 336 or registration therein.

ATMO 456 Practical Weather Forecasting  
Credits 3. 1 Lecture Hour. 4 Lab Hours.  
Advanced weather forecasting techniques with application to a variety of forecasting problems, both public and private sector.  
Prerequisites: ATMO 435 or registration therein; junior or senior classification.

ATMO 459 Tropical Meteorology  
Credits 3. 3 Lecture Hours.  
Tropical climatology; structure, evolution, and motion of tropical cyclones; tropical cyclone hazards; large-scale tropical phenomena.  
Prerequisites: ATMO 336; ATMO 352 or registration therein.

ATMO 461 Broadcast Meteorology  
Credit 1. 2 Lab Hours.  
Instruction in the practice of broadcast meteorology; practice in and preparation of weather forecast products and demonstration videotapes. May be taken two times for credit with faculty advisor approval.  
Prerequisites: ATMO 335 or registration therein; MATH 308 or registration therein; junior or senior classification.

ATMO 463 Air Pollution Meteorology  
Credits 3. 3 Lecture Hours.  
Problems of air pollution in our global atmosphere; environmental cycles; waste products in the biosphere; atmospheric pollution; natural concentrations of atmospheric constituents; pollution sources; atmospheric transport; pollution sinks; effects of pollution; monitoring and surveillance; and management of air quality.  
Prerequisite: ATMO 363 or approval of instructor; junior or senior classification only.

ATMO 464 Laboratory Methods in Atmospheric Sciences  
Credits 3. 2 Lecture Hours. 4 Lab Hours.  
Instruction in chemical techniques used to monitor the atmosphere and other earth systems; sampling strategies; survey of current literature focusing on development of new techniques.  
Prerequisites: CHEM 101 and one semester of calculus (MATH 171 or equivalent).

ATMO 485 Directed Studies  
Credits 1 to 23. 1 to 23 Other Hours.  
Offered to enable majors in meteorology to undertake and complete with credit in their particular fields of specialization limited investigations not covered by any other courses in established curriculum.  
Prerequisite: Junior or senior classification.

ATMO 488 Internship  
Credits 0 to 3. 0 to 3 Other Hours.  
Supervised internship at National Weather Service or in broadcast meteorology or elsewhere with faculty advisor approval; must complete a report and have a letter from supervisor for credit. May be taken three times for credit. Must be taken on a satisfactory/unsatisfactory basis.  
Prerequisites: ATMO 251; approval of faculty advisor.

ATMO 489 Special Topics in...  
Credits 1 to 4. 1 to 4 Lecture Hours.  
Selected topics in an identified area of meteorology. May be repeated for credit.

ATMO 491 Research  
Credits 0 to 4. 0 to 4 Other Hours.  
Research conducted under the direction of faculty member in atmospheric sciences. May be repeated 2 times for credit. Registration in multiple sections of this course is possible within a given semester provided that the per semester credit hour limit is not exceeded.  
Prerequisites: Junior or senior classification and approval of instructor.
ATTR - Athletic Training (ATTR)

ATTR 201 Field Experience in Athletic Training I
Credit 1. 4 Lab Hours.
Field based experience in athletic training to provide on-the-job training designed to enhance and clarify career objectives; knowledge and skill development in professional behaviors, injury prevention and risk management.
Prerequisite: Kinesiology majors.

ATTR 202 Field Experience in Athletic Training II
Credit 1. 4 Lab Hours.
Field based experience in athletic training to provide on-the-job training designed to enhance and clarify career objectives; knowledge and skill development in recognition and evaluation of common injuries and illnesses and their management.
Prerequisite: ATTR 201.

ATTR 301 Field Experience in Athletic Training I
Credit 1. 4 Lab Hours.
Field based experience in athletic training to provide on-the-job training designed to enhance and clarify career objectives; knowledge and skill development in the treatment and rehabilitation of athletic injuries.
Prerequisite: ATTR 202.

ATTR 302 Field Experience in Athletic Training II
Credit 1. 4 Lab Hours.
Field based experience in athletic training to provide on-the-job training designed to enhance and clarify career objectives; knowledge and skill development in athletic training administration; exploration of policy and position statements; professional development.
Prerequisite: ATTR 301.

BAEN - Biological & Ag Engr (BAEN)

BAEN 150 Introduction to Biological and Agricultural Engineering Design
Credit 1. 2 Lab Hours.
Introduction to the engineering design process using design problems presented by biological and agricultural engineers from industry; problem definition, information search, idea generation and development of design concepts.
Prerequisite: Engineering major or approval of department head.

BAEN 201 Analysis of Biological and Agricultural Engineering Problems
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Overview of Biological and Agricultural Engineering discipline through case studies and contemporary problems; introduction to computer programming; engineering analysis and problem solving using computer programming.
Prerequisites: ENGR 111; MATH 151; CHEM 107 and CHEM 117 or BIOL 113 or PHYS 218.

BAEN 281 Professional Development Seminar
Credit 1. 1 Lecture Hour.
Familiarization with engineering design process used in professional environments where BAEN and AGSM graduates are employed; discussion of professional development topics; improvement of technical communication skills. May be taken 4 times for credit.

BAEN 284 Internship
Credits 0. 0 Lecture Hours. 0 Lab Hours. 0 Other Hours.
No Credit. Practical experience working in a professional biological and agricultural engineering setting. May be taken three times.
Prerequisite: Freshman or sophomore classification; approval of the instructor.

BAEN 285 Directed Studies
Credits 0 to 4. 0 to 4 Other Hours.
Selected problems in any phase of agricultural engineering; credit and specific content dependent upon background, interest, ability and needs of student enrolled; individual consultations and reports required.
Prerequisites: Freshman or sophomore classification; approval of department head.

BAEN 289 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Selected topics in an identified area of agricultural engineering. May be repeated for credit.
Prerequisite: Approval of instructor.

BAEN 291 Research
Credits 0 to 3. 0 to 3 Other Hours.
Research conducted under the direction of faculty member in biological and agricultural engineering.
Prerequisites: Freshman or sophomore classification and approval of instructor.

BAEN 301 Biological and Agricultural Engineering Fundamentals I
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Fundamental engineering concepts related to agricultural systems including the environment (soil, water, and air), plant and animal production systems and processing, and associated machines and facilities; application of techniques for data collection and analysis to problems in biological and agricultural engineering; design of experiments and communication of experimental results.
Prerequisite: MEEN 221 or registration therein.

BAEN 302 Biological and Agricultural Engineering Fundamentals II
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Fundamentals of microbiology and biochemistry as they apply to biological and agricultural engineering systems to produce useful products and/or benign wastes; topics include microbiology, chemistry of biomolecules, microbial metabolism, bioenergetics, kinetics, mass transfer, bioreactor design, bioprocesses, and downstream processing.
Prerequisites: BIOL 113; CHEM 222 or registration therein.

BAEN 320 Engineering Thermodynamics
Credits 3. 2 Lecture Hours. 2 Lab Hours.
First and second laws of thermodynamics; properties of pure substances; analysis of closed and open systems; applications to steady-flow and non-flow processes; power and refrigeration cycles; psychrometrics.
Prerequisites: MEEN 221; MATH 251 or registration therein; junior or senior classification.

BAEN 340 Fluid Mechanics
Credits 3. 3 Lecture Hours.
Fundamentals of fluid properties; basic conservation principles of momentum, energy and continuity; flow through closed conduits; open channel flow; principles of turbomachines and compressible flow.
Prerequisites: MEEN 221; BAEN 320; junior classification.
BAEN 354 Engineering Properties of Biological Materials
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Relationships between composition, structure and properties of biological materials; definition and measurement of mechanical, physical, thermal and other material properties; variability of properties; application of properties to engineering analysis and design of biological and agricultural processes and systems.
Prerequisite: MEEN 222/MSEN 222.

BAEN 365 Unit Operations for Biological and Agricultural Engineering
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Theoretical and practical understanding of basic unit operations required to design processes and equipment in the agricultural, biological, environmental, and food industries, with unique constraints presented by biological and agricultural systems considered in design of all units.
Prerequisites: BAEN 340; CVEN 305 or registration therein; junior or senior classification.

BAEN 366 Transport Processes in Biological Systems
Credits 3. 3 Lecture Hours.
Basic principles governing transport of energy and mass; application of these principles to analysis and design of processes involving biological, environmental and agricultural systems.
Prerequisites: BAEN 340; BAEN 354; BAEN 365 or registration therein; MATH 308; junior or senior classification.

BAEN 370 Measurement and Control of Biological Systems and Agricultural Processes
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Theory and application of sensors and techniques in the design of systems for automatic control in biological systems and agricultural production and processing; sensor operation; signal processing; control techniques; automation and robotics.
Prerequisite: ECEN 215.

BAEN 375 Design Fundamentals for Agricultural Machines and Structures
Credits 3. 3 Lecture Hours.
Applications of stress/strain relationships and failure theory to the design of agricultural machines and structures; structural properties of engineering materials; finite element analysis and computer aided engineering design.
Prerequisite: CVEN 305.

BAEN 412 Hydraulic Power
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Hydraulic power systems; energy and power relationships; hydraulic fluid properties; frictional loses in pipelines; hydraulic pumps, cylinders, valves and motors; servo and proportional valves; circuit design and analysis; conductors, fittings and ancillary devices; maintenance of hydraulic systems; pneumatic components and circuits; electrical controls and fluid logic; electro-hydraulic systems.
Prerequisites: BAEN 340 and 375.

BAEN 414 Renewable Energy Conversions
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Energy/power systems through engineering and technical aspects of quantifying and designing the suitability of several types of renewable energy resources; new insights of vast resources that future engineers can harness to augment diminishing supplies of nonrenewable energy.
Prerequisite: BAEN 320, BAEN 366 or equivalent, or approval of instructor.

BAEN 417 Fundamentals of Nanoscale Biological Engineering
Credits 3. 3 Lecture Hours.
Nanostructures, nanofabrication methods, instrumentation and applications pertinent to Biological, Food and Bioenergy systems; identification and utilization of key tools available for fabricating, manipulating and analysis of nanostructures used in biological engineering applications.
Prerequisite: Senior classification in engineering or approval of instructor.

BAEN 422/CHEN 422 Unit Operations in Food Processing
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Design of food process engineering systems; basic concepts of rheology and physical properties of foods; fundamentals of heat and mass transfer and process control.
Prerequisites: CHEN 205 and 304, or CVEN 305.
Cross Listing: CHEN 422/BAEN 422.

BAEN 427 Engineering Aspects of Packaging
Credits 3. 3 Lecture Hours.
Introduction to properties and engineering aspects of materials for use as components of a package and/or packaging system; principles of design and development of packages; evaluation of product-package-environment interaction mechanisms; testing methods; environmental concerns; regulations.
Prerequisite: Senior classification or approval of instructor.

BAEN 431/CHEN 431 Fundamentals in Bioseparations
Credits 3. 3 Lecture Hours.
Design principles and application of chemical engineering unit operations to the production of therapeutic and bioactive molecules.
Prerequisite: BAEN 302 or BMEN 282/CHEN 282 or CHEN 282 or CHEN 382.
Cross Listing: CHEN 431/BAEN 431.

BAEN 460 Principles of Environmental Hydrology
Credits 3. 3 Lecture Hours.
Hydrologic cycle; precipitation, evaporation, evapotranspiration, infiltration, percolation, runoff, streamflow; groundwater and surface water flow; transport of contaminants in surface water; measurement and analysis of hydrologic data for engineering design.
Prerequisites: BAEN 340; senior classification.

BAEN 464 Irrigation and Drainage Engineering
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Engineering principles and design of both surface and pressurized irrigation systems; introduction to the design of surface and subsurface drainage systems including crop water requirements, soil moisture, irrigation scheduling, surface irrigation, sprinkler irrigation, trickle irrigation, pumps, pipelines, irrigation canals, irrigation wells, and surface and subsurface drainage.
Prerequisite: BAEN 340.

BAEN 465 Design of Biological Waste Treatment Systems
Credits 3. 3 Lecture Hours.
Management and treatment of high organic content wastes streams, with emphasis on agricultural, municipal, and agro-industry wastewater; engineering design of biological waste treatment processes; resource recovery from waste streams; recycle and reuse of finished effluents.
Prerequisites: BAEN 302; BAEN 340; junior or senior classification or approval of instructor.
BAEN 468 Soil and Water Conservation Engineering  
**Credits 3. 2 Lecture Hours. 2 Lab Hours.**  
Engineering principles of soil and water conservation; open channel flow principles, hydraulic grade stabilization, erosion control, storm water management, design of structures for floodwater routing, culvert design, design of waterways and agricultural reservoirs, stream bank protection, water quality assessment, groundwater flow, surface water modeling.  
**Prerequisites:** BAEN 340; CVEN 305.

BAEN 469 Water Quality Engineering  
**Credits 3. 3 Lecture Hours.**  
Nonpoint source pollution processes including transport mechanisms and contaminant fate; design of best management practices for abating nonpoint source pollution.  
**Prerequisites:** BAEN 340 or equivalent; CVEN 305.

BAEN 471/CHEN 471 Bioreactor Engineering  
**Credits 3. 3 Lecture Hours.**  
Fundamentals of microbial and enzyme kinetics; basic biochemical reaction theory and reactor systems; heterogeneous reactions and transport considerations in enzyme and cell reactors, and immobilized systems; bioreactor design considerations in bioprocessing.  
**Prerequisite:** CHEN 282 or CHEN 382 or BAEN 302; junior or senior classification in engineering or approval of instructor.  
**Cross Listing:** CHEN 471/BAEN 471.

BAEN 477 Air Pollution Engineering  
**Credits 3. 3 Lecture Hours.**  
Design of air pollution abatement equipment and systems to include cyclones, bag filters and scrubbers; air pollution regulations; permitting; dispersion modeling; National Ambient Air Quality Standards.  
**Prerequisite:** CVEN 305 or equivalent.  
**Cross Listing:** MEEN 477 and SENG 477.

BAEN 479 Biological and Agricultural Engineering Design I  
**Credits 3. 3 Lecture Hours.**  
Capstone design project selection from problems posed by biological and agricultural engineers in industrial practice; completion of project feasibility study and outline; design philosophy, teamwork and communication; economics; product liability and reliability; use of standards and codes; goal setting, professional development, and time management; project to be completed in BAEN 480.  
**Prerequisites:** BAEN 340 and BAEN 365; BAEN 366 or BAEN 370.

BAEN 480 Biological and Agricultural Engineering Design II  
**Credits 3. 6 Lab Hours.**  
Continuation of engineering design experience through team solution of design problem developed in BAEN 479; preparation of design solution under supervision of biological and agricultural engineering staff and clients; critical evaluation of results by students; staff and industrial consultants.  
**Prerequisites:** BAEN 479; senior classification.

BAEN 481 Seminar  
**Credit 1. 1 Other Hour.**  
Review of current literature dealing with agricultural engineering problems presented by staff members and students.  
**Prerequisite:** Senior classification.

BAEN 484 Internship  
**Credits 0. 0 Lecture Hours. 0 Lab Hours. 0 Other Hours.**  
No Credit. Practical experience working in a professional biological and agricultural engineering setting. May be taken three times.  
**Prerequisite:** Junior or senior classification; approval of the instructor.

BAEN 485 Directed Studies  
**Credits 0 to 4. 0 to 4 Other Hours.**  
Selected problems in any phase of agricultural engineering. Credit and specific content dependent upon background, interest, ability and needs of student enrolled. Individual consultations and reports required.  
**Prerequisites:** Junior or senior classification and approval of department head.

BAEN 489 Special Topics in...  
**Credits 1 to 4. 1 to 4 Lecture Hours. 0 to 4 Lab Hours.**  
Special topics in an identified area of agricultural engineering. May be repeated for credit.  
**Prerequisite:** Approval of department head.

BAEN 491 Research  
**Credits 0 to 3. 0 to 3 Other Hours.**  
Research conducted under the direction of faculty member in biological and agricultural engineering. May be repeated 2 times for credit. Registration in multiple sections of this course are possible within a given semester provided that the per semester credit hour limit is not exceeded.  
**Prerequisites:** Junior or senior classification and approval of instructor.

BEFB-Bilingual Ed Field Based (BEFB)  

BEFB 425 Student Teaching in Hispanic Bilingual Education  
**Credits 3. 3 Lecture Hours.**  
Observation and participation in Hispanic bilingual education classroom activity; supervised student teaching in accredited school. Must be taken on a satisfactory/unsatisfactory basis.  
**Prerequisites:** 2.5 GPA in teaching fields and professional development; approval of department head; senior classification. Must be taken concurrently with BEFB 426.

BEFB 426 Effective Instruction of Hispanic Students of Diverse Abilities  
**Credits 3. 3 Lecture Hours.**  
Field-based application of effective instructional strategies for teaching Hispanic bilingual students of diverse abilities. Must be taken on a satisfactory/unsatisfactory basis.  
**Prerequisites:** 2.5 GPA in teaching fields and professional development; approval of department head. Must be taken concurrently with BEFB 425.

BEFB 470 Bilingual Assessment and Monitoring  
**Credits 3. 3 Lecture Hours.**  
Assessment of language ability for second language learners; assessment instruments in bilingual/ESL programs; scoring and evaluation of second language assessment instruments.  
**Prerequisites:** Junior or senior classification; BEFB 472 and BEFB 474. Must be taken concurrently with BEFB 476.

BEFB 472 Bilingual and Dual Language Methodologies  
**Credits 3. 3 Lecture Hours.**  
Use of theory and effective teaching practice in promoting student’s development of strong social and academic skills; relationship of culture to language.  
**Prerequisite:** Junior or senior classification. Must be taken concurrently with BEFB 474.
BEFB 474 Biliteracy for Bilingual and Dual Language Classrooms
Credits 3. 3 Lecture Hours.
Social and linguistic characteristics of second language learners influencing literacy skills; reading and literature instruction for second language learners; reading and writing process across the curriculum for second language learners.
Prerequisite: Junior or senior classification. Must be taken concurrently with BEFB 472.

BEFB 476 Content Area Instruction for Bilingual Programs
Credits 3. 3 Lecture Hours.
Use of theory and various approaches for integrating English as a second language; learning strategies relating to how plans, procedures and units engage language teachers, students and learning environments.
Prerequisite: Junior or senior classification. Must be taken concurrently with BEFB 470.

BEFB 482 Seminar in Teachers as Effective Communicators
Credit 1. 1 Lecture Hour.
Effective communication techniques for working with learners, colleagues, administrators and stakeholders; professional and social linguistic protocols for bilingual education teachers.
Prerequisites: Junior or senior classification; concurrent enrollment in BEFB 472 and BEFB 474.

BESC - Bioenvironmental Sci (BESC)

BESC 201 Introduction to Bioenvironmental Sciences
Credits 3. 3 Lecture Hours.
An introduction to the biological components of environmental sciences, with emphasis on the impact of the world's population on global resources; lectures by research scientists reflecting their disciplinary perspective in relevant areas.

BESC 204 Molds and Mushrooms: The Impact of Fungi on Society and the Environment
Credits 3. 3 Lecture Hours.
Introduction to the fungi and the impact these organisms have on society and the environment; topics discussed will include: life cycles of fungi; classification schemes, pathogens of plants, animals and humans, fungi in food production; toxic fungi and the law, and others.

BESC 285 Directed Studies
Credits 1 to 4. 1 to 4 Other Hours.
Individually supervised research or advanced studies for lower-division undergraduate students to independently investigate special problems not available in existing courses.
Prerequisite: Approval of instructor in consultation with departmental advisor.

BESC 291 Research
Credits 1 to 4. 1 to 4 Other Hours.
Research conducted under the direction of faculty member in bioenvironmental sciences. May be repeated 3 times for credit.
Prerequisites: Freshman or sophomore classification and approval of instructor.

BESC 311 International Perspectives on Environmental Issues
Credits 3. 3 Lecture Hours.
Role of the United Nations and other institutions that promote international cooperation toward sustainable development goals; influence of cultural views on critical thinking about environmental issues, including population, water and agriculture, biodiversity and energy.
Prerequisite: Junior classification or approval of instructor; must attend two mandatory pre-departure meetings.

BESC 314 Pathogens, the Environment and Society
Credits 3. 3 Lecture Hours.
The impact of microorganisms (bacteria, fungi and viruses) on the development of modern culture and society; the role pathogens played in the history of mankind and the influence of the changing environment on emerging diseases.
Prerequisite: Junior or senior classification.

BESC 320 Water and the Bioenvironmental Sciences
Credits 3. 3 Lecture Hours.
Critical understanding of salient issues relating to fresh water as a limited and important bioenvironmental resource.
Prerequisite: Junior or senior classification.

BESC 357 Biotechnology for Biofuels and Bioproducts
Credits 3. 3 Lecture Hours.
Biotechnology issues in developing bioenergy as a renewable energy source; emphasis on the three generations of bioenergy and enabling technologies; special topics include recent advances in bioenergy research, government policy, and industrial development.
Prerequisite: BESC 201 and junior or senior classification.

BESC 367 U.S. Environmental Regulations
Credits 3. 3 Lecture Hours.
Investigation of the legal infrastructure of the U.S. associated with regulating environmental impacts; examination of major U.S. environmental statutes associated with air and water quality, toxic substances, waste and hazardous substance release, energy and natural resources; review the relationship between U.S. policy and international environmental regulations. May be taken 2 times for credit.
Prerequisites: BESC 201 and junior or senior classification.

BESC 401 Bioenvironmental Microbiology
Credits 3. 3 Lecture Hours.
The interactions of microorganism in diverse environments; applied aspects of microbial interactions in the environment, their effects on the environment, and potential use to solve environmental problems.
Prerequisites: SCSC 405 and 3 hours of organic chemistry, or equivalents; or approval of instructor.

BESC 402 Microbial Processes in Bioremediation
Credits 3. 3 Lecture Hours.
Metabolic pathways of microbes involved in the biodegradation of hazardous materials will be presented; ecological requirements for biotreatability of contaminated sites will be discussed emphasizing factors affecting microbial growth; strategies for in situ bioaugmentation will be presented.
Prerequisite: One semester of organic chemistry.

BESC 403 Sampling and Environmental Monitoring
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Introduction to environmental sampling and methodology; strategies and analyses of sampling data; overview of current applications of sampling and monitoring in the environmental sciences; emphasis on practical aspects of sampling from air, soil and water; detection and quantification of microbial and chemical unknowns in environmental media.
Prerequisite: Junior or senior classification or approval of instructor.
BESC 411 Environmental Health and Safety Compliance
Credits 3. 3 Lecture Hours. 1 Lab Hour.
Investigation of various Environmental Health and Safety (EHS) practices necessary for compliance with state and federal regulations; reinforcement of real-world understanding; tour several regulated facilities on campus and learn about the particular TAMU-EHS compliance management strategies for each (utilities, underground storage tanks, wastewater treatment and hazardous waste facility).
Prerequisite: BESC 367 or similar regulation intensive course and approval of instructor.

BESC 481 Seminar
Credit 1. 1 Lecture Hour.
Capstone course for topics in bioenvironmental sciences; critical analysis of environmental issues through written themes and presentations. May be taken three times for credit.
Prerequisites: BESC 201 and senior classification in BESC major.

BESC 484 Field Experience
Credits 1 to 4. 1 to 4 Other Hours.
An on-the-job supervised experience program conducted in the area of the student's specialization.
Prerequisite: Junior or senior classification or approval of department head.

BESC 485 Directed Studies
Credits 1 to 4. 1 to 4 Other Hours.
Special problems for advanced undergraduates to permit study of subject matter not available in existing courses.
Prerequisite: BESC 201 or approval of instructor.

BESC 489 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours. 1 to 4 Lab Hours.
Selected topics in an identified area of bioenvironmental sciences. May be repeated for credit.
Prerequisite: BESC 201 or approval of instructor.

BICH - Biochemistry (BICH)

BICH 101/GENE 101 Perspectives in Biochemistry and Genetics
Credit 1. 1 Lecture Hour.
Introduction to biochemistry and genetics and their relationship to the biological, biophysical and chemical sciences.
Prerequisite: Biochemistry and genetics major or approval of instructor.
Cross Listing: GENE 101/BICH 101.

BICH 281 Seminar in Biochemical Research
Credit 1. 1 Lecture Hour.
Round table discussions with visiting seminar speakers; review current literature; topics including cutting edge research in biochemistry.
Prerequisites: BICH 107 and freshman or sophomore classification in biochemistry or approval of instructor.

BICH 285 Directed Studies
Credits 1 to 4. 1 to 4 Other Hours.
Introduction to laboratory research.
Prerequisite: Freshman or sophomore classification in biochemistry or approval of instructor.

BICH 289 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Selected topics in an identified area of biochemistry. May be repeated for credit.
Prerequisite: Sophomore classification in biochemistry or approval of instructor.

BICH 291 Research
Credits 1 to 4. 1 to 4 Other Hours.
Research conducted under the direction of faculty member in Biochemistry. May be repeated 2 times for credit.
Prerequisites: Freshman or sophomore classification and approval of instructor; biochemistry majors only.

BICH 303 Elements of Biological Chemistry
Credits 3. 3 Lecture Hours.
Survey of the biochemical sciences designed for the non-biochemistry major; introduction to the chemistry and metabolism of biologically important molecules, the biochemical basis of life processes, cellular metabolism and regulation. Students requiring biochemistry in greater depth should register for BICH 410 and BICH 411. Not open to biochemistry majors.
Prerequisite: CHEM 222 or equivalent.

BICH 404 Biochemical Calculations
Credits 2. 2 Lecture Hours.
Quantitative and computational approaches to biochemical problems.
Prerequisites: BICH 440 or registration therein; junior or senior classification.

BICH 407 Horizons in Biological Chemistry II
Credit 1. 1 Lecture Hour.
Application of formal classroom instruction; applied view of biochemical concepts; use of biochemical principles to ascertain, evaluate, and make judgments on research information. May be taken five times.
Prerequisite: BICH 411 or BICH 441.

BICH 410 Comprehensive Biochemistry I
Credits 3. 3 Lecture Hours. 1 Lab Hour.
Structure, function and chemistry of proteins and carbohydrates; kinetics, mechanisms and regulation of enzymes; metabolism of carbohydrates. Not open to biochemistry or genetics majors.
Prerequisite: CHEM 228 or approval of instructor.

BICH 411 Comprehensive Biochemistry II
Credits 3. 3 Lecture Hours. 1 Lab Hour.
A continuation of BICH 410. Structure, function, chemistry and metabolism of lipids and nucleic acids; cellular metabolism viewed from the standpoint of energetics and control mechanisms; interrelationships of metabolic pathways. Not open to biochemistry or genetics majors.
Prerequisite: BICH 410.

BICH 412 Biochemistry Laboratory I
Credit 1. 3 Lab Hours.
Selected methods used to identify, isolate, purify and characterize biomolecules. Not open to biochemistry or genetics majors.
Prerequisite: BICH 410 or registration therein.

BICH 414 Biochemical Techniques I
Credits 2. 6 Lab Hours.
Techniques currently used in biochemistry such as spectrophotometry, column chromatography (gel filtration, ion exchange) electrophoresis and immunoelectrophoresis, performed in purification of proteins, enzymes and nucleic acids. For majors in biochemistry, genetics, molecular and cell biology and microbiology.
Prerequisite: BICH 440.
BICH 419/GENE 419 Computational Techniques for Evolutionary Analysis
Credits 3. 3 Lecture Hours.
Computational techniques for studying evolution; algorithms for construction and analysis of evolutionary relationships.
Prerequisite: Junior or senior classification or approval of instructor.
Cross Listing: GENE 419/BICH 419.

BICH 431/GENE 431 Molecular Genetics
Credits 3. 3 Lecture Hours.
Molecular basis for inheritance; gene structure and function, chromosomal organization, replication and repair of DNA, transcription and translation, the genetic code, regulation of gene expression, genetic differentiation and genetic manipulations.
Prerequisites: BICH 410 or BICH 440; GENE 301 or GENE 302 or GENE 320/BIMS 320.
Cross Listing: GENE 431/BICH 431.

BICH 432/GENE 432 Laboratory in Molecular Genetics
Credits 2. 6 Lab Hours.
Laboratory for molecular genetics providing technical experience with tools of molecular biology.
Prerequisite: GENE 301, GENE 302 or GENE 320/BIMS 320; BICH 410 or BICH 440.
Cross Listing: GENE 432/BICH 432.

BICH 440 Biochemistry I
Credits 3. 3 Lecture Hours.
Rigorous treatment of the structure, function and chemistry of proteins and carbohydrates; kinetics, mechanisms and regulation of enzymes; metabolism of carbohydrates. Course designed for biochemistry and genetics majors and honors students only.
Prerequisite: CHEM 228 or approval of instructor.

BICH 441 Biochemistry II
Credits 3. 3 Lecture Hours.
Continuation of BICH 440; structure, function, chemistry and metabolism of lipids and nucleic acids, cellular metabolism viewed from the standpoint of energetics and control mechanisms; interrelationships of metabolic pathways. Course designed for biochemistry and genetics majors and honors students only.
Prerequisite: BICH 440.

BICH 450/BIOL 450 Genomics
Credits 4. 3 Lecture Hours. 3 Lab Hours.
The study of genomic data includes consideration of the logic behind the most important genomic approaches, as well as their capabilities and limitations in investigating biological processes; the science of accessing and manipulating genomic data; and practical applications, including development of an hypotheses-driven datamining experiment.
Prerequisites: BIOL 213, GENE 301 or GENE 302, BICH 431/GENE 431 or GENE 431/BICH 431, or BIOL 351; junior or senior classification or approval of instructor.
Cross Listing: BIOL 450/BICH 450.

BICH 460 Genome Annotation with Ontologies
Credit 1. 2 Lab Hours.
Use of ontologies as structured controlled vocabularies for the organization of biological data; annotation based on critical reading of the scientific literature. May be taken two times for credit.
Prerequisite: Junior or senior classification or approval of instructor.

BICH 461 Advanced Genome Annotation with Ontologies
Credit 1. 2 Lab Hours.
Advanced topics in functional annotation using ontologies; usage issues and quality control for ontologies and annotations; mentoring annotation activities from BICH 460 and evaluation of annotations. May be taken three times for credit.
Prerequisite: BICH 460; junior or senior classification or approval of instructor.

BICH 464 Bacteriophage Genomics
Credits 3. 1 Lecture Hour. 6 Lab Hours.
Examines the latest technologies in genomic analysis by sequencing and annotating the genomes of novel bacterial viruses (phage); generates real data which will be submitted to the NIH/NCBI public database; includes phage biology and potential uses.
Prerequisites: GENE 302; BIOL 351 or concurrent enrollment; approval of instructor.

BICH 485 Directed Studies
Credits 1 to 4. 1 to 4 Other Hours.
Directed study in biochemistry not included in established courses.
Prerequisites: Junior or senior classification; approval of instructor and department head.

BICH 489 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours. 0 to 4 Lab Hours.
Selected topics in an identified area of biochemistry, biophysics or nutrition. May be repeated for credit.
Prerequisite: Junior or senior classification in life or physical sciences.

BICH 491 Research
Credits 1 to 4. 1 to 4 Other Hours.
Registration in multiple sections of this course are possible within a given semester provided that the per semester credit hour limit is not exceeded.
Prerequisite: Biochemistry major.

BIMS - Biomedical Science (BIMS)

BIMS 101 Introduction to Biomedical Science
Credit 1. 1 Lecture Hour.
Areas and opportunities in the varied fields of applied biology, professional programs, and the allied health industry. Open to all majors interested in the life sciences as related to health and disease.

BIMS 110 One Health in Action
Credit 1. 1 Lecture Hour.
Exploration of the concept of One Health; the interconnected and interdependent health of humans, animals and ecosystems; the conceptual framework that encompasses human and veterinary medical sciences, agricultural sciences, food safety, public health, epidemiology, environmental health, toxicology, wildlife ecology and conservation and many related fields of study or research.
Prerequisite: Freshman or sophomore classification or approval of instructor.

BIMS 201 Introduction to Phenotypic Expression in the Context of Human Medicine
Credits 2. 2 Lecture Hours.
Study of human genetics with respect to gene expression as it pertains to the cell cycle, development, cancer, aging and epigenetics; discussions and debates surrounding medical examples and case studies.
Prerequisite: BIOL 112, CHEM 227; or approval of instructor.
BIMS 289 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours. 0 to 4 Lab Hours.
Selected topics in an identified area of biomedical science. May be repeated for credit.
Prerequisites: Freshman or sophomore classification and approval of instructor.

BIMS 291 Research
Credits 0 to 4. 0 to 4 Other Hours.
Research conducted under the direction of faculty member in biomedical sciences. May be repeated 2 times for credit.
Prerequisites: Freshman or sophomore classification and approval of instructor.

BIMS 301 Biomedical Sciences Study Abroad
Credits 2 to 12. 2 to 12 Lecture Hours.
For students in approved programs abroad. May be repeated for credit. Minimum 3 hours free elective credit in the BIMS degree plan. Must be taken on a satisfactory/unsatisfactory basis.

BIMS 320/GENE 320 Biomedical Genetics
Credits 3. 3 Lecture Hours.
Fundamental genetic principles as applied to biomedical science; Mendelian inheritance, linkage and genetic mapping, mutagenesis and pedigree analysis; molecular basis of gene function and inherited disease; gene therapy and genetic counseling. Credit cannot be given for both GENE 301 and GENE 320/BIMS 320.
Prerequisites: Junior or senior classification; BIMS major with a minimum overall 2.5 TAMU GPA.

BIMS 392 Cooperative Education in Biomedical Science
Credits 2. 20 Other Hours.
Educational work assignment by a student in the field of his or her career interest and course of study. Supervision of the student will be by the cooperating employer and the instructor. A technical report, approved by the instructor, on a related subject area will be assigned. May be repeated for credit.
Prerequisites: Approval of the college coordinator of cooperative education; BIMS major with a minimum overall 2.5 TAMU GPA.

BIMS 405/GENE 405 Mammalian Genetics
Credits 3. 3 Lecture Hours.
Comparative mammalian genetic systems with emphasis on laboratory animals; organization and expression of mammalian genes; development and use of genetically defined animals in biomedical and genetic research.
Prerequisites: GENE 301, BIMS 320/GENE 320 or GENE 320/BIMS 320; junior or senior classification.
Cross Listing: GENE 405/BIMS 405.

BIMS 421/GENE 421 Advanced Human Genetics
Credits 3. 3 Lecture Hours.
A rigorous, analytical approach to genetic analysis of humans including diagnosis and management of genetic disease in humans; transmission of genes in human populations; human cytogenetics; the structure of human genes; gene therapy and genetic counseling.
Prerequisites: BIMS 320/GENE 320 or GENE 320/BIMS 320; BICH 410 or 440; junior or senior classification.
Cross Listing: GENE 421/BIMS 421.

BIMS 452/GENE 452 Modifying Mammalian Genomes for Biomedical Research
Credits 3. 3 Lecture Hours.
Review advances in the production of transgenic animals, the manipulation of embryonic stem cells for transgenics and therapeutics, the modification of specific genes in mammalian species by homologous recombination and RNA interference; special emphasis on genetic manipulation of cells and animals for biomedical research, stem-cell and gene therapy.
Prerequisite: BIMS 320/GENE 320, GENE 301 or 320.

BIMS 481 Seminar in Biomedical Science
Credit 1. 1 Other Hour.
Recent advances in biomedical sciences. To be taken on a satisfactory/unsatisfactory basis.
Prerequisites: Junior or senior classification in life sciences majors; BIMS major with a minimum overall 2.5 TAMU GPA.

BIMS 484 Biomedical Science Field Experience
Credits 2. 2 Other Hours.
On-the-job training in the Biomedical Science industry; development of objectives and goals; evaluation by supervisor required.
Prerequisite: Approval of department head; BIMS major with a minimum overall 2.5 TAMU GPA.

BIMS 485 Directed Studies
Credits 0 to 4. 0 to 4 Other Hours.
Directed individual study of problems in the biomedical sciences with emphasis in the allied health professions, hospital administration, and the health-related industry approved by the instructor.
Prerequisites: Junior or senior classification; approval of instructor; BIMS major with a minimum overall 2.5 TAMU GPA.

BIMS 489 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Selected topics in an identified area of biomedical science. May be repeated for credit.
Prerequisite: Junior or senior classification; BIMS major with a minimum overall 2.5 TAMU GPA.

BIMS 491 Research
Credits 0 to 4. 0 to 4 Other Hours.
Research conducted under the direction of faculty member in biomedical sciences. May be repeated 2 times for credit.
Prerequisites: 3.0 TAMU GPA; BIMS 485; junior or senior classification and approval of instructor.

BIOL - Biology (BIOL)

BIOL 101 Botany
Credits 4. 3 Lecture Hours. 3 Lab Hours.
(BIOL 1311 and 1111, BIOL 1411*) Botany. Structure, physiology and development of plants with an emphasis on seed plants. (Not open to students who have taken BIOL 111 and BIOL 112 or BIOL 113; includes laboratory that reinforces and provides supplemental information related to the lecture topics.)
BIOL 107 Zoology  
Credits 4. 3 Lecture Hours. 3 Lab Hours.  
(BIOL 1313 and 1113, 1413*) Zoology. Survey of animal life with respect to cell organization, genetics, evolution, diversity of invertebrates/vertebrates, anatomy/physiology, and interaction of animals with their environment; includes laboratory that reinforces and provides supplemental information related to lecture topics. (Not open to students who have taken BIOL 111 and BIOL 112 or BIOL 113).  

BIOL 111 Introductory Biology I  
Credits 4. 3 Lecture Hours. 3 Lab Hours.  
(BIOL 1306 and 1106, 1406*) Introductory Biology I. First half of an introductory two-semester survey of contemporary biology that covers the chemical basis of life, structure and biology of the cell, molecular biology and genetics; includes laboratory that reinforces and provides supplemental information related to the lecture topics.  
Prerequisite: BIOL 111.  

BIOL 113 Essentials in Biology  
Credits 4. 3 Lecture Hours. 3 Lab Hours.  
One-semester in introductory biology for non-majors; chemical basis of life, cellular and molecular biology, genetics, evolution, biodiversity and interaction of organisms with their environment; includes a laboratory to supplement and reinforce lecture topics.  

BIOL 206 Introductory Microbiology  
Credits 4. 3 Lecture Hours. 4 Lab Hours.  
(BIOL 2321 and 2121, 2421*) Introductory Microbiology. Basic microbiology of prokaryotes and eukaryotes; main topics include morphology, physiology, genetics, taxonomy, ecology, medically important species and immunology; mandatory laboratory designed to give hands-on experience and to reinforce basic principles.  
Prerequisites: BIOL 101, BIOL 107, BIOL 111, or BIOL 113; CHEM 101 and CHEM 111 or CHEM 103 and CHEM 115. May not be used for credit by biology, molecular and cell biology, microbiology, zoology, predentistry or premedicine majors.  

BIOL 213 Molecular Cell Biology  
Credits 3. 3 Lecture Hours.  
Explores the molecular basis of cell structure, function and evolution; gene regulation, cell division cycle, cancer, immunity, differentiation, multicellularity and photosynthesis; may not take concurrently with, or after the completion of, BIOL 413.  
Prerequisites: BIOL 112; CHEM 227 or concurrent enrollment.  

BIOL 214 Genes, Ecology and Evolution  
Credits 3. 3 Lecture Hours.  
A genetically-based introduction to the study of ecology and evolution; emphasis on the interactions of organisms with each other and with their environment.  
Prerequisite: BIOL 112.  

BIOL 285 Directed Studies  
Credits 1 to 4. 1 to 4 Other Hours.  
Problems in various phases of plant, animal and microbial science.  
Prerequisites: Freshman or sophomore classification; approval of ranking professor in field chosen and Undergraduate Advising Office.  

BIOL 289 Special Topics in...  
Credits 1 to 4. 1 to 4 Lecture Hours.  
Selected topics in an identified area of biology. May be repeated for credit.  
Prerequisite: Approval of instructor.  

BIOL 291 Research  
Credits 0 to 4. 0 to 4 Other Hours.  
Active research of basic nature under the supervision of a Department of Biology faculty member. May be repeated for credit.  
Prerequisites: Freshman or sophomore classification and approval of faculty member.  

BIOL 295 Research Fundamentals in the Life Sciences  
Credit 1. 1 Lecture Hour.  
First course of four in capstone research program in biology; groundwork for subsequent research-intensive courses; practical understanding of how biological research is accomplished; develop models; synthesize work; glean predictive hypothesis; design critical tests; collect and analyze data; refine or reject hypotheses.  
Prerequisite: BIOL 213 or concurrent enrollment, or approval instructor.  

BIOL 300 Research Seminar: Tropical Ecology in Costa Rica  
Credit 1. 1 Lecture Hour.  
Advanced instruction in research activities for Costa Rica; critical planning and writing skills essential in conducting research and communicating results using scientific methods and formatting.  
Prerequisites: Junior or senior classification; approval of instructor.  

BIOL 318 Chordate Anatomy  
Credits 4. 3 Lecture Hours. 3 Lab Hours.  
Classification, phylogeny, comparative anatomy, and biology of chordates; diversity, protochordates, vertebrate skeletons, shark and cat anatomy studied in laboratory.  
Prerequisite: BIOL 112.  

BIOL 319 Integrated Human Anatomy and Physiology I  
Credits 4. 3 Lecture Hours. 3 Lab Hours.  
Integrated approach to cellular, neural, skeletal, muscular anatomy and physiology; includes some histology, histopathology, radiology and clinical correlations.  
Prerequisite: BIOL 111 and BIOL 112, or BIOL 107.  

BIOL 320 Integrated Human Anatomy and Physiology II  
Credits 4. 3 Lecture Hours. 3 Lab Hours.  
Continuation of BIOL 319. Integrated approach to endocrine, cardiovascular, respiratory, digestive, urinary, reproductive and developmental anatomy and physiology; includes some histology, histopathology, radiology and clinical correlations.  
Prerequisite: BIOL 111 and BIOL 112, or BIOL 107; BIOL 319 or approval of instructor.  

BIOL 328 Plants and People  
Credits 3. 2 Lecture Hours. 3 Lab Hours.  
Development and uses of principal economically important plants of the world; plants and plant parts used in production of important commodities; vascular plants.  
Prerequisite: BIOL 101 or BIOL 111 or BIOL 112 or approval of instructor.  

BIOL 335 Invertebrate Zoology  
Credits 4. 3 Lecture Hours. 3 Lab Hours.  
Morphology, taxonomy, natural history and phylogeny of invertebrate animals, with emphasis on biodiversity; class includes both lecture and lab. Labs include study of preserved material and demonstration of living animals in aquaria and terraria.  
Prerequisite: BIOL 112 or approval of instructor.
BIOL 344 Embryology
Credits 4. 3 Lecture Hours. 3 Lab Hours.
Introduction to general and comparative embryology; molecular and cellular mechanisms of development; genetics and early development of selected invertebrates (C. elegans, Drosophila and sea urchin) and emphasis on vertebrates (frog, fish, chick and mouse).
Prerequisite: BIOL 213 or GENE 302.

BIOL 350 Computational Genomics
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Hands-on approach to obtaining, organizing and analyzing genome-related data; emphasis on asking and answering biologically relevant questions by designing and performing experiments using computers; understanding biology from a computational perspective.
Prerequisite: Junior or senior classification in life sciences, engineering, mathematics, chemistry.

BIOL 351 Fundamentals of Microbiology
Credits 4. 3 Lecture Hours. 4 Lab Hours.
Introduction to modern microbiology with emphasis on prokaryotes; includes microbial cell structure, function, and physiology; genetics, evolution, and taxonomy; bacteriophage and viruses; pathogenesis and immunity; and ecology and biotechnology; includes laboratory experience with microbial growth and identification.
Prerequisites: BIOL 112; CHEM 227, and CHEM 237 or CHEM 231; or approval of instructor.

BIOL 352 Diagnostic Bacteriology
Credits 4. 2 Lecture Hours. 6 Lab Hours.
Practical experience in handling, isolation and identification of pathogenic microorganisms using biochemical tests and rapid identification techniques.
Prerequisite: BIOL 206 or BIOL 351.

BIOL 357 Ecology
Credits 3. 3 Lecture Hours.
Analysis of ecosystems at organismal, population, interspecific and community levels. BIOL 358 is the laboratory for this lecture course.
Prerequisite: BIOL 112 or approval of instructor.

BIOL 358 Ecology Laboratory
Credit 1. 3 Lab Hours.
Quantitative analyses of freshwater and terrestrial ecosystems; includes data sampling and presentation of results in written and oral formats; required fieldtrips; analysis of competition and predator-prey interactions using ecological models.
Prerequisite: BIOL 357 or concurrent enrollment; junior or senior classification.

BIOL 388 Principles of Animal Physiology
Credits 4. 3 Lecture Hours. 3 Lab Hours.
Introduction to how animals function, including basics of neurophysiology, endocrinology, muscular, cardiovascular, respiratory, ommoregulatory, and metabolic physiology; broadly comparative in scope and encompassing adaptation of physiological systems to diverse environments; the laboratory stresses techniques used for monitoring and investigating physiological mechanisms and responses to environmental changes.
Prerequisites: BIOL 112; CHEM 228.

BIOL 395 Directed Investigation in Bioinformatics
Credits 2. 1 Lecture Hour. 2 Lab Hours.
Second course of four in capstone research program in biology; conduct individual research projects utilizing bioinformatic tools.
Prerequisite: BIOL 213 or approval of instructor.

BIOL 400 Tropical Ecology Costa Rica
Credits 6. 2 Lecture Hours. 12 Lab Hours.
Advanced field course taught at multiple field stations in Costa Rica; emphasis on biological, ecological, natural history and philosophical attributes of tropical ecosystems; includes planning and conducting a field-oriented research project, and presentation of results.
Prerequisites: BIOL 300 and approval of instructor; junior or senior classification.

BIOL 401 Critical Writing in Biology
Credit 1. 1 Lecture Hour.
Reading scientific papers and writing short synopses of papers with a focus on learning how to think and write like a scientist; fills the current Writing Intensive “W” course requirement for biology.
Prerequisites: BIOL 213 and BIOL 214; junior or senior classification.

BIOL 405 Comparative Endocrinology
Credits 3. 3 Lecture Hours.
Basic principles of endocrinology including structure and functions of hormones in vertebrates; hormonal control of growth, metabolism, osmoregulation, and reproduction; endocrine techniques and mechanism of hormone action.
Prerequisites: BIOL 213 and CHEM 227; BIOL 320 or BIOL 388 strongly recommended.

BIOL 406/GENE 406 Bacterial Genetics
Credits 3. 3 Lecture Hours.
A problem oriented course surveying the manipulation and mechanisms of genetic systems in bacteria; recombination, structure and regulation of bacterial genes, plasmids and phages.
Prerequisites: BIOL 351; GENE 302.
Cross Listing: GENE 406/BIOL 406.

BIOL 413 Cell Biology
Credits 3. 3 Lecture Hours.
Structure, function, and biogenesis of cells and their components; interpretation of dynamic processes of cells, including protein trafficking, motility, signaling and proliferation.
Prerequisites: BIOL 213 and BICH 410.

BIOL 414 Developmental Biology
Credits 3. 3 Lecture Hours.
Concepts of development in systems ranging from bacteriophage to the mammalian embryo; use of recombinant DNA technology and embryo engineering to unravel the relationships between growth and differentiation, morphogenesis and commitment, aging and cancer.
Prerequisite: BIOL 413 or concurrent enrollment or approval of instructor.

BIOL 423 Cell Biology Laboratory
Credit 1. 3 Lab Hours.
Modern methods of study of cell structure and cell function.
Prerequisites: BIOL 413 and BICH 412 or registration therein; approval of instructor.

BIOL 430 Biological Imaging
Credits 4. 3 Lecture Hours. 3 Lab Hours.
Still and video photography and photomicrography, computerbased digital image analysis and processing of biological images; theory and principles of light and electron microscopy including transmission and scanning electron microscopy; optical contrast methods for light microscopy including phase contrast, DIC, polarizing light and confocal laser scanning microscopy.
Prerequisite: Junior classification or approval of instructor.
BIOL 434/NRSC 434 Regulatory and Behavioral Neuroscience
Credits 3. 3 Lecture Hours.
Cell biology and biophysics of neurons; functional organization of the vertebrate nervous system; physiological basis of behavior.
Prerequisites: BIOL 319 or BIOL 388 or PSYC 335/NRSC 335; BIOL 213 strongly recommended.
Cross Listing: NRSC 434/BIOL 434.

BIOL 435 Laboratory for Regulatory and Behavioral Neuroscience
Credit 1. 3 Lab Hours.
Study of modern methods and tools used to investigate nervous system structure and function.
Prerequisite: Approval of instructor.

BIOL 437 Molecular and Human Medical Mycology
Credits 3. 3 Lecture Hours.
Principles of fungal pathogenesis, diagnosis and antifungal therapies, and relevant genetic and molecular tools for studying human pathogens and drug delivery.
Prerequisites: BIOL 351; junior or senior classification; or approval of instructor.

BIOL 438 Bacterial Physiology
Credits 4. 4 Lecture Hours.
Structure and function of prokaryotic cells, with emphasis on evolutionary adaptations to different environmental, developmental, and pathogenic selections pressures; formation of teams and preparation of presentations on specific topics in microbiology.
Prerequisites: BIOL 351 and BIOL 408/GENE 408; BICH 410, BICH 431/GENE 431 and GENE 302 strongly recommended.

BIOL 440 Marine Biology
Credits 4. 3 Lecture Hours. 3 Lab Hours.
Introduction to biology of common organisms inhabiting bays, beaches and near-shore oceanic waters with special reference to Gulf of Mexico biota; emphasis on classification, distribution, history, ecology, physiology, mutualism, predation, major community types and economic aspects of marine organisms.
Prerequisite: BIOL 112 or approval of instructor.

BIOL 445 Biology of Viruses
Credits 3. 3 Lecture Hours.
Structure, composition and life cycles of viruses; methods used to study viruses; their interaction with host cells; mechanisms of pathogenicity and cellular transformation; responses of the host to viral infection, and vaccine applications; in-depth study of the life cycles of the major classes of viruses and discussion of emerging viruses.
Prerequisite: BIOL 213 or BIOL 351 or approval of instructor.

BIOL 450/BICH 450 Genomics
Credits 4. 3 Lecture Hours. 3 Lab Hours.
The study of genomic data includes consideration of the logic behind the most important genomic approaches, as well as their capabilities and limitations in investigating biological processes; the science of accessing and manipulating genomic data; and practical applications, including development of an hypotheses-driven datamining experiment.
Prerequisites: BIOL 213, GENE 301 or GENE 302, BICH 431/GENE 431 or GENE 431/BICH 431, or BIOL 351; junior or senior classification or approval of instructor.
Cross Listing: BICH 450/BIOL 450.

BIOL 451 Bioinformatics
Credits 3. 3 Lecture Hours.
Introduction to the entire field of bioinformatics; theoretical background of computational algorithms, with an emphasis on application of computational tools related to modern molecular biological research.
Prerequisite: Junior or senior classification, or approval of instructor.

BIOL 452 Fungal Functional Genomics
Credits 4. 3 Lecture Hours. 4 Lab Hours.
Extensive research experience in eukaryotic molecular genetics using the fungus Neurospora crassa as the primary model system; analysis of Neurospora gene-deletion strain collection to examine the effects of genes on the organism's traits; introduction of molecular techniques for genome manipulation and analysis.
Prerequisite: Junior or senior classification in any life science major or approval of instructor.

BIOL 454 Immunology
Credits 3. 3 Lecture Hours.
Introduction to basic immunological concepts and principles of serology.
Prerequisite: BIOL 351 or equivalent or approval of instructor.

BIOL 455 Laboratory in Immunology
Credits 2. 6 Lab Hours.
Practical application of serological principles which include precipitation, agglutination and blood banking principles; techniques in tissue culture and hybridoma technology also included.
Prerequisite: BIOL 454 or registration therein.

BIOL 456 Medical Microbiology
Credits 4. 4 Lecture Hours.
Microbiology, epidemiology and pathology of human pathogens with an emphasis on bacterial agents.
Prerequisite: BIOL 351 or approval of instructor.

BIOL 461 Antimicrobial Agents
Credit 1. 1 Lecture Hour.
Understanding of antimicrobial agents, limitations of use, biosynthesis and regulation, and challenges in development as new therapeutics.
Prerequisites: BICH 410 or BICH 440 and BIOL 351 or VTPB 405.

BIOL 462/WFSC 462 Amazon River Tropical Biology
Credits 3. 3 Lecture Hours.
History, ecology, evolutionary-biology, geography and culture of the Amazon River and Rio Negro; exploration of the world's most bio-diverse river during a 10-day expedition from Manaus, Brazil; survey biota, record observations about the ecosystem, select research topics, development of presentations.
Prerequisites: BIOL 107, BIOL 112, BIOL 113, BIOL 357 or RENR 205; or approval of instructor.
Cross Listing: WFSC 462/BIOL 462.

BIOL 463 Epigenetic Mechanisms and Inheritance
Credits 3. 3 Lecture Hours.
Knowledge of chromatin structure, the mechanisms of chromatin inheritance and the consequences of heritable chromatin structures on gene expression; phenomenology, molecular underpinnings and evolutionary implications.
Prerequisite: Junior or senior classification or approval of instructor.

BIOL 466 Principles of Evolution
Credits 3. 3 Lecture Hours.
Evolutionary patterns, mechanisms and processes at the organismal, chromosomal and molecular levels; modes of adaptation and the behavior of genes in populations.
Prerequisite: GENE 302 or approval of instructor.
BIOL 467 Integrative Animal Behavior
Credits 3. 3 Lecture Hours.
Examines how behavior contributes to survival and reproduction, and how evolutionary history and ecological circumstance interact to shape the expression of behavior; focus on integrative nature of behavior: how the interaction of evolutionary processes, mechanistic constraints, and ecological demands determine behavioral strategies.
Prerequisite: Any one of the following: BIOL 214, BIOL 357, BIOL 388, BIOL 405, BIOL 434/NRSC 434, BIOL 466, or approval of instructor.

BIOL 481 Seminar in Biology
Credit 1. 1 Lecture Hour.
Recent advances. Restricted to senior undergraduate majors in biology, microbiology, botany or zoology.

BIOL 484 Internship
Credits 0 to 4. 0-1 Other Hours.
Directed internship in a private firm or public agency to provide research experience appropriate to the student's degree program and career objectives. May be taken two times.
Prerequisite: Approval of internship agency and advising office.

BIOL 485 Directed Studies
Credits 1 to 12. 1 to 12 Other Hours.
Problems in various phases of plant, animal and bacteriological science.
Prerequisites: Junior classification; approval of ranking professor in field chosen and Undergraduate Advising Office.

BIOL 487/VTPB 487 Biomedical Parasitology
Credits 4. 3 Lecture Hours. 2 Lab Hours.
Helminth and protozoan parasites of medical and veterinary importance; life cycles, morphology, taxonomic classification, economic and public health aspects and current topics in parasitic diseases.
Prerequisites: BIOL 107 or BIOL 112; junior or senior classification or approval of instructor.
Cross Listing: VTPB 487/BIOL 487.

BIOL 489 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours. 0 to 10 Lab Hours.
Selected topics in an identified area of biology. May be repeated once for credit.

BIOL 491 Research
Credits 0 to 4. 0 to 4 Other Hours.
Active research of basic nature under the supervision of a Department of Biology faculty member. May be taken two times. Registration in multiple sections of this course is possible within a given semester provided that the per semester credit hour limit is not exceeded.
Prerequisite: Approval of departmental faculty member.

BIOL 493 Independent Bioinformatics Research
Credits 2. 1 Lecture Hour. 2 Lab Hours.
Third course of four in capstone research program in biology; continuation of research projects utilizing bioinformatic tools.
Prerequisite: BIOL 395 or approval of instructor.

BIOL 495 Biology Capstone: Research Communication in the Life Sciences
Credits 2. 2 Lecture Hours.
Culmination of capstone research experience; formalization of research results in written and oral forms; introduction to primary genres or scientific writing; apply principles of rhetoric and composition to diverse methods of professional communication.
Prerequisite: BIOL 452, BICH 464, BIOL 400, BIOL 493 or BIOL 491 or approval of instructor.

BMEN - Biomedical Engineering (BMEN)

BMEN 101 Introduction to Biomedical Engineering
Credit 1. 1 Lecture Hour.
Overview of biomedical engineering and the biomedical engineering industry, including specialties, degree requirements and scholastic programs in the Department of Biomedical Engineering.
Prerequisite: Admitted to major degree sequence.

BMEN 207 Computing for Biomedical Engineering
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Introduction to the principles of computer programming for biomedical applications including program design and development, programming techniques and documentation; introduction to and programming in the LabVIEW and MATLAB environments.
Prerequisites: Admitted to major degree sequence; MATH 152, ENGR 112.

BMEN 211 Biomedical Applications of Circuits, Signals and Systems
Credits 3. 3 Lecture Hours.
Quantitative analysis of biomedical and physiological signals; A/D conversion and sampling; Fourier and Laplace transforms; filtering of biomedical signals and images; electrical circuits and analog representations of physiological systems as model systems.
Prerequisites: Admitted to major degree sequence; PHYS 208 and MATH 308, or concurrent enrollment.

BMEN 231 Foundations of Biomechanics
Credits 3. 3 Lecture Hours.
Introduction of biomechanics in formulating and solving problems in basic science, medical device development, and clinical intervention: emphasis on deriving differential equations in one spatial dimension for the five basic postulates of continuum biomechanics, identifying illustrative constitutive relations, and providing a unified approach to studying biosolid mechanics, biofluid mechanics, bioheat and mass transport, and biothermomechanics.
Prerequisite: Admitted to major degree sequence in biomedical engineering.

BMEN 253 Medical Device Design I
Credit 1. 3 Lab Hours.
FDA design controls for medical device development in a regulated environment; small-scale team biomedical engineering design project.
Prerequisite: BMEN 207.

BMEN 282/CHEN 282 Engineering Biology
Credits 3. 3 Lecture Hours.
Application of engineering principles to biological function at the molecular and cellular level.
Prerequisites: Admitted to major degree sequence and CHEM 101 and CHEM 111 or CHEM 107 and CHEM 117.
Cross Listing: CHEN 282.

BMEN 285 Directed Studies
Credits 1 to 4. 1 to 4 Other Hours.
Permits students to undertake special projects in biomedical engineering at an earlier point in their studies than required for BMEN 485.
Prerequisite: Approval of Director of Undergraduate Programs.

BMEN 289 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours. 0 to 4 Lab Hours.
Selected topics in an identified area of biomedical engineering. May be repeated for credit.
Prerequisite: Approval of instructor.
BMEN 291 Research
Credits 1 to 4. 1 to 4 Other Hours.
Research conducted under the direction of faculty member in biomedical engineering. May be repeated 2 times for credit.
Prerequisites: Freshman or sophomore classification and approval of instructor.

BMEN 305 Bioinstrumentation
Credit 1. 3 Lab Hours.
Introduction to biomedical instrumentation design; hands on acquisition of biomedical signals; design, building and testing of bioinstrumentation circuits including analog signal amplifiers and analog filter circuits.
Prerequisite: BMEN 211, BMEN 321 or concurrent enrollment.

BMEN 306 Biomeasurements Lab
Credit 1. 3 Lab Hours.
Introduction into experimental methods useful in biomedical engineering; includes the role of empiricism in biomedical research and development; the differences between observation and experimentation; and how to acquire, reduce, interpret, and present data.
Prerequisites: Admitted to major degree sequence in biomedical engineering; BMEN 240 and BMEN 341.

BMEN 310 Clinical Engineering
Credits 3. 3 Lecture Hours.
Equipment control concepts and techniques and their application in hospitals and in the medical profession; device evaluation specifications; preventative maintenance and service; calibration, regulation and medical product liability.
Prerequisites: Admitted to major degree sequence in biomedical engineering; BMEN 321.

BMEN 321 Biomedical Electronics
Credits 3. 3 Lecture Hours.
Introduction to biomedical signals; basic circuit analysis for biomedical signals; design of bioamplifier circuits; characteristics of linear and nonlinear circuit elements; design of basic electronic circuits, principles and practice of bioelectronic measurements.
Prerequisites: BMEN 211; junior or senior classification.

BMEN 322 Biosignal Analysis
Credits 3. 3 Lecture Hours.
Design and application of analog and digital signal analysis in biomedical engineering; characteristics of biomedical signals; design considerations for analog-to-digital and digital-to-analog circuitry; biosignal transformation methods; analog and digital filter design for biomedical signals.
Prerequisite: BMEN 321.

BMEN 341 Biofluid Mechanics
Credits 3. 3 Lecture Hours.
Introduction into the mechanics of fluids in biomechanics, including blood, synovial fluid and physiological solutions, with an emphasis on the importance of mechanobiology and the formation of biological problems within the context of 1) kinematics, 2) the concept of stress, 3) linear momentum balance, 4) constitutive relations, and 5) boundary conditions.
Prerequisites: Admitted to major degree sequence; junior or senior classification.

BMEN 342 Biomaterials and Medical Devices
Credits 3. 3 Lecture Hours.
Selection and use of materials in implantable and tissue contacting medical devices; mass transport in medical devices; regulation and testing of medical devices.
Prerequisites: VTPP 435 and BMEN 341; junior or senior classification.

BMEN 343 Introduction to Biomaterials
Credits 3. 3 Lecture Hours.
Properties of natural and man-made materials commonly encountered in biomedicine and biomedical engineering; an integrated approach in the presentation of material structures, characteristics and properties; the basics of material structures, including crystalline and chemical structure, and microstructure; and bulk properties and characteristics of the materials developed from the microscopic origins.
Prerequisites: MATH 308 and CHEM 227; junior or senior classification.

BMEN 344 Biological Responses to Medical Devices
Credits 3. 3 Lecture Hours.
Selection and characterization of materials in implantable and tissue contacting medical devices; biodegradation, biocompatibility, hemocompatibility and cell-material interactions of biomaterials.
Prerequisite: BMEN 343, VTPP 435 or concurrent enrollment.

BMEN 345 Biomaterials Lab
Credit 1. 3 Lab Hours.
Experimental methods used to prepare and characterize polymeric biomaterials used in biomedical engineering; related fundamental aspects of forming a hypothesis, experimental design, empirical observation, data collection, interpretation and presentation of data.
Prerequisite: BMEN 343.

BMEN 350 Statistics for Biomedical Engineering
Credits 3. 3 Lecture Hours.
Evaluation of the efficacy of clinical research; quantitative methods used in clinical trials in biomedical engineering; ethical and regulatory issues that must be considered during the design and implementation of any clinical trial, or pre-clinical study.
Prerequisites: Junior classification; admitted to the major degree sequence (upper level).

BMEN 353 Medical Device Design II
Credit 1. 3 Lab Hours.
Identification of needs for biomedical engineering design solutions, development of design proposals, analysis of design project requirements and constraints.
Prerequisite: BMEN 253 or equivalent; junior or senior classification.

BMEN 361 Biosolid Mechanics
Credits 3. 3 Lecture Hours.
Introduction to the mechanics of deformable media in biomedical engineering, including medical devices, biomaterials, and soft and hard biological tissues; emphasis on biomechanics and mechanobiology and formulation of problems within the context of basic continuum biomechanics; problems include analytical solutions for stress-strain analysis of extension, distension, bending, buckling, and torsion of biosolids.
Prerequisites: Admitted to major degree sequence in biomedical engineering; BMEN 341.

BMEN 400/VTPP 401 History of Human and Veterinary Medicine in Europe
Credits 4. 4 Lecture Hours.
Addresses the major developments in human and veterinary medicine in Europe from the Middle Ages to the present; explores key events and figures in medical history and analyzes issues of current biomedical concern in a historical context; for example, animal rights, ethics of humane experimentation, euthanasia.
Prerequisites: Admitted to major degree sequence in biomedical engineering; VTPP 434.
Cross Listing: VTPP 401.
BMEN 401 Principles and Analysis of Biological Control Systems
Credits 3.3 Lecture Hours.
Techniques for generating quantitative mathematical models of physiological control systems and devices; the behavior of physiological control systems using both time and frequency domain methods.
Prerequisite: BMEN 321.

BMEN 402 Biomedical Optics Laboratory
Credits 3.2 Lecture Hours. 3 Lab Hours.
Biomedical optics technology; basic engineering principles used in developing therapeutic and diagnostic devices; hands-on labs including optical monitoring, diagnostic and therapeutic experiments.
Prerequisite: PHYS 208 or approval of instructor.

BMEN 404 FDA Good Laboratory and Clinical Practices
Credits 3.3 Lecture Hours.
Implementation of Good Laboratory Practices (GLP) for the submission of preclinical studies and use of Good Clinical Practices (GCP) in clinical trials in accordance with Food and Drug Administration (FDA) regulations; includes similarities and differences in GLP and GCP critical for the introduction of new drugs and medical devices.
Prerequisites: BMEN 253; junior or senior classification.

BMEN 405 Virtual Instrumentation Design for Medical Systems
Credits 3.2 Lecture Hours. 3 Lab Hours.
Design of medical systems using graphics programming language of LabVIEW including the designing and programming of three virtual systems as follows: cardiac monitor, electromyogram system for biomechanics, and sleep stage analyses from electroencephalograms.
Prerequisites: BMEN 321 and BMEN 322.

BMEN 406 Medical Device Path to Market
Credits 3.3 Lecture Hours.
Path to market for a medical device with specific attention to the regulatory affairs to enable the development of an appropriate regulatory strategy due to the highly regulated global environment.
Prerequisites: BMEN 253; junior or senior classification, or approval of instructor.

BMEN 420 Medical Imaging
Credits 3.3 Lecture Hours.
The principles of the major imaging modalities including x-ray radiography, x-ray computed tomography (CT), ultrasonography and magnetic resonance imaging; including a brief discussion on other emerging imaging technologies such as nuclear imaging (PET and SPECT).
Prerequisites: BMEN 211; junior or senior classification.

BMEN 421 Biomechatronics
Credits 3.3 Lecture Hours.
The principles of the major imaging modalities including x-ray radiography, x-ray computed tomography (CT), ultrasonography and magnetic resonance imaging; including a brief discussion on other emerging imaging technologies such as nuclear imaging (PET and SPECT).
Prerequisites: BMEN 321; junior or senior classification, or approval of instructor.

BMEN 422 Biodynamic Systems
Credits 3.3 Lecture Hours.
Introduction to biomedical applications of lasers to manipulation, detection and visualization on (sub-)cellular length scales; emphasis on the governing principles on which applications are founded; includes applications from recent literature.
Prerequisites: BMEN 306 and BMEN 322; junior or senior classification.

BMEN 423 Microscale Bio-Optic Applications
Credits 3.3 Lecture Hours.
Introduction to biomedical applications of lasers to manipulation, detection and visualization on (sub-)cellular length scales; emphasis on the governing principles on which applications are founded; includes applications from recent literature.
Prerequisites: BMEN 306 and BMEN 322; junior or senior classification.

BMEN 424 Biomedical Sensing and Imaging at the Nanoscale
Credits 3.3 Lecture Hours.
Introduction to nanotechnology with an emphasis on biomedical techniques and medical applications; basic physics of contrast agents to the engineering of current sensing and imaging systems applied at the nanoscale.
Prerequisite: Senior classification or approval of instructor.

BMEN 425 Biophotonics
Credits 3.3 Lecture Hours.
Theory and application of optical instrumentation, including light sources, lasers, detectors, and optical fibers; instrumentation and engineering in biomedical applications of optics in therapeutics, diagnostics, and biosensing.
Prerequisites: Admitted to the major degree sequence in biomedical engineering; junior or senior classification.

BMEN 426 Optical Biosensors
Credits 3.3 Lecture Hours.
Biosensing principles and detailed analysis of optical methods for transduction; fluorescence-based transduction; molecular recognition of targets; immobilization of sensing reagents; quantitative analysis of sensing systems; design and characterization of sensing assays and associated measurement systems; review of historical and current trends in optical biosensors.
Prerequisite: Senior classification or approval of instructor.

BMEN 427 Magnetic Resonance Engineering
Credits 3.2 Lecture Hours. 3 Lab Hours.
Design, construction and application of instrumentation for MR imaging; fundamentals of the architecture of an MR spectrometer and the gradient subsystem used for image localization; emphasis on the radiofrequency sensors and systems used for signal generation and reception.
Prerequisites: BMEN 420 or ECEN 410 or ECEN 411 or approval of instructor; junior or senior classification.

BMEN 428 Microcontrollers and Communications in Medical Devices
Credits 3.2 Lecture Hours. 3 Lab Hours.
Principles of embedded system architecture and programming; fundamentals and theoretical foundations of wireless communication systems; hands-on experiences of how an embedded system could be used to solve problems in biomedical engineering; projects on wireless sensors and imaging for medical devices.
Prerequisite: BMEN 211 or approval of instructor.

BMEN 430 Medical Device Regulation
Credits 3.3 Lecture Hours.
Introduction to the regulations of the U.S. Food and Drug Administration pertaining to testing and marketing medical devices.
Prerequisites: BMEN 310; junior or senior classification.

BMEN 431 Thermodynamics of Biomolecular Systems
Credits 3.3 Lecture Hours.
Biothermodynamics: quantitative framework for describing biomolecular behavior and processes as they relate to the properties and interactions of microscopic constituents; application to bioengineering and biomedicine problems.
Prerequisite: BMEN 361.
BMEN 432 Molecular and Cellular Biomechanics  
Credits 3.3 Lecture Hours.  
Introduces biomolecules and their assemblies that play structural and dynamical roles in subcellular to cellular level mechanics; emphasis on quantitative/theoretical descriptions; discussions of the relevant experiment approaches to probe these nano to micro-scale phenomena; includes topics in self-assembly of cytoskeleton and biomembranes, molecular motors, cell motility, and mechanotransduction.  
**Prerequisite:** BMEN 361.

BMEN 440 Design of Medical Devices  
Credits 3.3 Lecture Hours.  
Overview of the multiple issues in designing a marketable medical device, including the design process from clinical problem definition through prototype and clinical testing to market readiness; includes FDA regulation, human factors and system safety considerations and medical product liability.  
**Prerequisites:** BMEN 342; senior classification in engineering.

BMEN 448 Healthcare Technology in the Developing World  
Credits 3.1 Lecture Hour. 6 Lab Hours.  
Principles of operation for major types of medical equipment; physiology underlying the measurement; major functional (system) pieces for each instrument; typical problems/applications of each instrument.  
**Prerequisites:** MATH 152, PHYS 208, and approval of instructor.

BMEN 450 Case Studies  
Credit 1.1 Lecture Hour.  
Examines process through which clinically defined problems are addressed from the perspective of biomedical engineering through the use of case studies; includes issues of technology transfer and clinical evaluation.  
**Prerequisites:** Admitted to major degree sequence; junior or senior classification.

BMEN 451 Cell Mechanobiology  
Credits 3.3 Lecture Hours.  
Focus on how mechanical forces influence cell behavior through physical and biochemical mechanisms; integration of engineering and cell biology to solve biomedical problems, which includes developing models for applying forces to cultured cells and tissues and measuring changes in cell biochemistry, structure, and function.  
**Prerequisite:** BMEN 341.

BMEN 452 Mass and Energy Transfer in Biosystems  
Credits 3.3 Lecture Hours.  
Transport phenomena associated with physiological systems and their interaction with medical devices; exchange processes in artificial life support systems and diagnostic equipment.  
**Prerequisites:** BMEN 341; MATH 308.

BMEN 453 Analysis and Design Project I  
Credits 2.6 Lab Hours.  
Group or team biomedical engineering analysis and design project involving statement, alternative approaches for solution, specific system analysis and design.  
**Prerequisites:** BMEN 321 and BMEN 353.

BMEN 454 Analysis and Design Project II  
Credits 2.0 Lecture Hours. 6 Lab Hours.  
Continuation of BMEN 453.  
**Prerequisite:** BMEN 453.

BMEN 457 Orthopedic Biomechanics  
Credits 3.3 Lecture Hours.  
Development of competencies in biomechanical principles using practical examples and clinical case studies; application of biomechanical knowledge to the evaluation of musculoskeletal tissues and structures, and treatment options for musculoskeletal dysfunction.  
**Prerequisite:** BMEN 361 or equivalent course approved by instructor.

BMEN 460 Vascular Mechanics  
Credits 3.3 Lecture Hours.  
Application of continuum mechanics to the study of the heart arteries; emphasis on the measurement and quantification of material properties, and the calculation of vascular stresses; analysis of several cardiovascular devices to reinforce the need for careful analysis in the device design.  
**Prerequisites:** BMEN 240.

BMEN 461 Cardiac Mechanics  
Credits 3.3 Lecture Hours.  
Application of continuum mechanics and computational solid mechanics to the study of the mammalian heart; utilization of continuum mechanics and finite element analysis in solving non-linear boundary value problems in biomechanics.  
**Prerequisites:** BMEN 341 and BMEN 361.

BMEN 462 Vascular Fluid Mechanics  
Credits 3.3 Lecture Hours.  
Bio-fluid mechanics of the human circulatory system including examination of disease development and medical treatments.  
**Prerequisites:** BMEN 240 or equivalent; junior or senior classification.

BMEN 463 Soft Tissue Mechanics and Finite Element Methods  
Credits 3.3 Lecture Hours.  
Application of continuum mechanics and finite element methods to the study of the mechanical behavior of soft tissues and associative applications in biomechanics.  
**Prerequisites:** BMEN 341 and BMEN 361.

BMEN 465 Biomechanics Experiential Learning Lab  
Credit 1.3 Lab Hours.  
Applications in biomechanics (solid and fluid); includes experimental methods used to investigate biomechanical factors in the assessment of therapeutic interventions; mechanical testing load frames; motion capture systems, high speed imaging and flow systems; hypothesis forming, experimental design, empirical observation, data collection and interpretation, and presentation of results.  
**Prerequisite:** BMEN 361.

BMEN 468 Advanced Biomechanics  
Credits 3.3 Lecture Hours.  
Application of fluid and solid mechanics to problems in biomedical engineering ranging from molecular-level to organ-level, including the mechanics of the cell cytoskeleton, whole cells, blood, arteries and the heart.  
**Prerequisites:** Admitted to major degree sequence in biomedical engineering; BMEN 361; or approval of instructor.

BMEN 469 Entrepreneurial Issues in Biomedical Engineering  
Credits 3.3 Lecture Hours.  
Description and analysis of issues associated with initiating business ventures to transfer biomedical technologies into the health care sector, including intellectual property protection, seed funding alternatives, and business strategies relevant to the biomedical engineering technology area; utilizing recent case studies of previous ventures.  
**Prerequisite:** Admitted to major degree sequence (upper-level) in biomedical engineering.
BMEN 470/CHEN 470 Introduction of Biomedical Optics  
Credits 3. 3 Lecture Hours.  
Fundamentals of biomedical optics; basic engineering principles used in  
optical therapeutics, optical diagnostics and optical biosensing.  
Prerequisites: MATH 308; PHYS 208.  
Cross Listing: CHEN 470/BMEN 470.  

BMEN 471 Numerical Methods in Biomedical Engineering  
Credits 3. 3 Lecture Hours.  
Application of numerical analysis to analyze molecular, cellular and  
physiological systems, using general techniques including programming in  
MATLAB to analyze steady and dynamic systems.  
Prerequisites: BMEN 207 and VTPP 434.  

BMEN 480 Biomedical Engineering of Tissues  
Credits 3. 3 Lecture Hours.  
Introduction to aspects of tissue engineering with and emphasis placed on  
tissue level topics including tissue organization and biological processes,  
with insights from recent literature (state-of-the-art).  
Prerequisite: BMEN 343.  

BMEN 482 Polymeric Biomaterials  
Credits 3. 3 Lecture Hours.  
Preparation, properties, and biomedical applications of polymers  
including: polymerization; structure-property relationships; molecular  
weight and measurement; morphology; thermal transitions; network  
formation; mechanical behavior; polymeric surface modification; polymer  
biocompatibility and bioadhesion; polymers in medicine, dentistry,  
and surgery; polymers for drug delivery; polymeric hydrogels; and  
biodegradable polymers.  
Prerequisite: BMEN 343.  

BMEN 483 Polymeric Biomaterial Synthesis  
Credits 3. 3 Lecture Hours.  
Overview of polymer synthetic routes and key structure-property  
relationships with emphasis on the design of polymeric systems to achieve  
specific properties; tissue engineering and drug delivery applications will  
be used as model systems to explore the process of biomaterial design  
from synthesis to device evaluation.  
Prerequisite: BMEN 343 or approval of instructor.  

BMEN 485 Directed Studies  
Credits 1 to 6. 1 to 6 Other Hours.  
Permits students to undertake special projects in biomedical engineering.  
Prerequisite: Approval of Director of Undergraduate Programs.  

BMEN 486 Biomedical Nanotechnology  
Credits 3. 3 Lecture Hours.  
Nanotechnology applications in biomedicine; concepts of scale; unique  
properties at the nanoscale; biological interaction, transport, and  
biocompatibility of nanomaterials; current research and development of  
nanotechnology for medical applications, including sensors, diagnostic  
tools, drug delivery systems, therapeutic devices, and interactions of cells  
and biomolecules with nanostructured surfaces.  
Prerequisite: BMEN 343, senior classification or approval of instructor.  

BMEN 487 Drug Delivery  
Credits 3. 3 Lecture Hours.  
Mechanisms for controlled release of pharmaceutically active agents  
and the development of useful drug delivery systems; controlled release  
mechanisms including diffusive, convective, and erosive driving forces  
by using case studies related to oral, topical and parenteral release in a  
frontier interdisciplinary scientific research format.  
Prerequisite: Senior classification in biomedical engineering or approval  
of instructor.  

BMEN 489 Special Topics in...  
Credits 1 to 4. 1 to 4 Lecture Hours.  
New or unique areas of biomedical engineering which are of interest to  
bioengineering and other undergraduate students.  

BMEN 491 Research  
Credits 1 to 4. 1 to 4 Other Hours.  
Research conducted under the direction of faculty member in biomedical  
engineering. May be repeated 2 times for credit. Registration in multiple  
sections of this course is possible within a given semester provided that  
the per semester credit hour limit is not exceeded.  
Prerequisites: Junior or senior classification and approval of instructor.  

BOTN - Botany (BOTN)  

BOTN 289 Special Topics in...  
Credits 1 to 4. 1 to 4 Lecture Hours.  
Selected topics in an identified area of botany. May be repeated for credit.  
Prerequisite: Approval of instructor.  

BOTN 291 Research  
Credits 1 to 4. 1 to 4 Other Hours.  
Active research of basic nature under the supervision of a Department of  
Biology faculty member.  
Prerequisites: Freshman or sophomore classification and approval of  
instructor.  

BOTN 485 Directed Studies  
Credits 3. 3 Lecture Hours.  
Problems in various phases of plant, animal and bacteriological science.  
Prerequisites: Junior classification; approval of ranking professor in field  
chosen and Undergraduate Advising Office.  

BOTN 491 Research  
Credits 1 to 4. 1 to 4 Other Hours.  
Active research of basic nature under the supervision of a Department of  
Biology faculty member.  
Prerequisites: Junior or senior classification and approval of instructor.  

BUAD - Business Administration (BUAD)  

BUAD 289 SPECIAL TOPICS IN  
Credits 1 to 4. 1 to 4 Lecture Hours.  

BUSN - Mays Business School (BUSN)  

BUSN 100 The Business Profession  
Credit 1. 1 Lecture Hour.  
Emphasis on developing professional business competencies; examines  
business conduct in different business settings; introduction to the  
necessary knowledge to become a professional through different practice  
activities. Students may not receive credit for both BUSN 100 and  
BUSN 101.  
Prerequisites: Freshman or sophomore classification; business or  
general studies major.
BUSN 101 Freshman Business Initiative
Credits 3.3 Lecture Hours.
Freshman orientation to business and to Mays Business School; introduction to majors within the business school and associated career opportunities; introduction and development of personal and professional competencies, with emphasis on self-leadership, business communication, ethical decision making, and teamwork. Students may not receive credit for both BUSN 101 and BUSN 100.
Prerequisite: Freshman admitted to Mays Business School.

BUSN 125 Business Learning Community I
Credits 3.3 Lecture Hours.
Focuses on the base competencies that relate to effectively managing people, tasks and organizations, and change and innovation; develops skills in personal and professional competencies, analytical and critical thinking skills, written and oral communication skills, interpersonal skills and problem-solving skills; research emphasis.
Prerequisite: Selection for Mays Business School Honors Program.

BUSN 205 Integrated Worklife Competencies
Credits 3.3 Lecture Hours.
Application of Mays’ core competencies, with required completion of either a peer leadership experience or a team-based service-learning project; continues development of student’s electronic portfolio of core competencies. Writing designated.
Prerequisite: Sophomore or higher classification admitted to Mays Business School.

BUSN 285 Directed Studies
Credits 1 to 4.1 to 4 Other Hours.
Directed study of selected problem in business not covered in other courses. May be taken two times for credit.
Prerequisites: Freshman or sophomore classification admitted to Mays Business School and approval of instructor.

BUSN 289 Special Topics in...
Credits 1 to 4.1 to 4 Lecture Hours.
Selected topics in an identified area of business and public service. May be repeated for credit.
Prerequisite: Freshman or sophomore in business.

BUSN 302 Applied Business Competencies
Credits 1 to 3.1 to 3 Lecture Hours.
Business core-competencies applied in specific disciplinary and/or experiential contexts; topics include working in the nonprofit sector, office politics; facilitation and training; conflict resolution, women in business, personal leadership, project evaluation. May be taken five times for credit.
Prerequisite: BUSN 205; or approval of instructor.

BUSN 392 Cooperative Education in Business
Credits 2.40 Other Hours.
Educational work assignment in the field in which the student is interested. Supervision will be by employer with technical report required at semester's end. May be taken three times for credit.

BUSN 401 Mays Business Fellows I
Credits 3.3 Lecture Hours.
A seminar for the development of leadership and management skills.
Prerequisite: Selection for Mays Business Fellows Program.

BUSN 403 Personal Competency Assessment
Credits 3.3 Lecture Hours.
Self-assessment of development of core business competencies: communication, problem-solving, management and leadership, ethical decision making, team work; compilation and evaluation of evidence of competencies; preparation of competency portfolio; creation of professional development plan.
Prerequisite: BUSN 205; junior or senior classification or approval of instructor.

BUSN 467 Ethics in Business
Credit 1.1 Lecture Hour.
Integration of ethical reasoning integrally, objectively and other core values in the development of professionals engaged in business; analyze ethical lapses that have occurred in multiple business disciplines.
Prerequisite: Admission to upper division in Mays Business School.

BUSN 484 Internship
Credits 1 to 3.1 to 3 Other Hours.
Professional internship or practical experience in a field in which the student is interested, under the direction of the business honors director or a business school faculty member. May be taken two times for credit.
Prerequisite: Business honors major or approval of instructor.

BUSN 485 Directed Studies
Credits 1 to 6.1 to 6 Other Hours.
Directed study on selected problems in the area of business administration not covered in other courses. May be repeated for credit.
Prerequisites: Admission to upper division in Mays Business School; approval of instructor.

BUSN 489 Special Topics in...
Credits 1 to 4.1 to 4 Lecture Hours.
Selected topics in an identified area of business and public service. May be repeated for credit.
Prerequisite: Junior or senior in business.

BUSN 491 Research
Credits 1 to 4.1 to 4 Other Hours.
Research conducted under the direction of faculty member in Mays Business School. May be repeated 1 times for credit.
Prerequisites: Junior or senior classification admitted to Mays Business School and approval of instructor.

CARC - College of Architecture (CARC)

CARC 181 First Year Seminar
Credit 1.1 Lecture Hour.
Seminar on various contemporary topics; introduction to high quality college instruction and research; focus on writing, speaking, exploration, discussion and research. May be taken two times for credit.
Prerequisite: First time in college and College of Architecture undergraduate studies.

CARC 291 Research
Credits 1 to 4.1 to 4 Other Hours.
Research conducted under the direction of a faculty member. May be repeated 2 times for credit.
Prerequisites: Freshman or sophomore classification and approval of instructor.
CARC 300 College of Architecture Study Abroad
Credits 1 to 18. 1 to 18 Other Hours.
For students in approved study abroad programs participating in reciprocal educational exchange programs. May be repeated for credit.
Prerequisite: Junior or senior classification; approval of assistant dean for international programs and initiatives.

CARC 301 Field Studies in Design Innovation
Credits 1 to 18. 1 to 18 Other Hours.
Design innovation in international and domestic environments away from the Texas A&M University campus; emphasis on the cultural, social, economic, geographical, climatic and technological factors influencing design solutions for human needs. May be taken up to two times in the same semester.
Prerequisite: Junior or senior classification; CARC 481; approval of assistant dean for international programs and initiatives.*

CARC 311 Field Studies in Design Communication
Credits 3. 2 Lecture Hours. 4 Lab Hours.
Design communication in international and domestic environments away from the Texas A&M University campus; emphasis on the tools, methods and techniques for design communication. May be taken up to two times in the same semester.
Prerequisite: Junior or senior classification; approval of assistant dean for international programs and initiatives.*

CARC 321 Field Studies in Design Technology
Credits 3. 3 Other Hours.
Design technology in international and domestic environments away from the Texas A&M University campus; emphasis on structural, material and environmental systems and methods of construction utilized to realize design solutions. May be taken up to two times in the same semester.
Prerequisite: Junior or senior classification; approval of assistant dean for international programs and initiatives.*

CARC 331 Field Studies in Design Philosophy
Credits 3. 3 Other Hours.
Design philosophy in international and domestic environments away from the Texas A&M University campus; emphasis on the historical, philosophical, cultural, social and economic factors that influence design solutions. May be taken up to two times in the same semester.
Prerequisites: Junior or senior classification; approval of assistant dean for international programs and initiatives.*

CARC 481 Seminar
Credit 1. 1 Lecture Hour.
Preparatory seminar for select College of Architecture study away and internships; topics include introduction to the language, culture and history of study abroad location. Must be taken the spring semester before the student's study away semester. Must be taken on a satisfactory/unsatisfactory basis.
Prerequisites: Junior or senior classification; approval of assistant dean for international programs and initiatives.

CARC 485 Directed Studies
Credits 1 to 6. 1 to 6 Other Hours.
Individual research in architecture, construction science or landscape architecture in an international or domestic environment away from the Texas A&M University campus. May be taken up to two times in the same semester.
Prerequisite: Junior or senior classification; approval of assistant dean for international programs and initiatives.

CARC 489 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours. 0 to 4 Lab Hours.
Selected topics in an identified area of architecture. May be repeated for credit.
Prerequisites: Junior or senior classification; approval of assistant dean for international programs and initiatives.

CARC 491 Research
Credits 1 to 4. 1 to 4 Other Hours.
Research conducted under the direction of a faculty member. May be repeated 2 times for credit.
Prerequisites: Junior or senior classification; approval of assistant dean for international programs and initiatives.

CEHD - Coll of Ed & Human Dev (CEHD)

CEHD 101 Learning Community Foundations of Leadership
Credit 1. 1 Lecture Hour.
Exploration of leadership identity, and reflection on lessons learned during the first year of college. Must be taken on a satisfactory/unsatisfactory basis.

CEHD 289 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Selected topics in an identified area of education and human development. May be repeated for credit.
Prerequisite: Approval of instructor.

CEHD 291 Research
Credits 1 to 4. 1 to 4 Other Hours.
Research conducted under the direction of faculty member in the College of Education and Human Development. May be repeated 2 times for credit.
Prerequisites: Freshman or sophomore classification and approval of instructor.

CEHD 300 Education and Human Development Study Abroad
Credits 1 to 18. 1 to 18 Lecture Hours.
For students in approved programs to study abroad. May be repeated for credit.
Prerequisites: Approval of department head; junior or senior classification.

CEHD 491 Research
Credits 1 to 4. 1 to 4 Other Hours.
Research conducted under the direction of faculty member in the College of Education and Human Development. May be repeated 2 times for credit.
Prerequisites: Junior or senior classification and approval of instructor.

CHEM - Chemistry (CHEM)

CHEM 100 Horizons in Chemistry
Credit 1. 1 Lecture Hour.
An introduction to chemistry and its relationship to and influence on society; emphasis on chemical demonstrations and the practical application of chemical phenomena. For chemistry majors.
Prerequisite: Major in chemistry or approval of instructor.
CHEM 101 Fundamentals of Chemistry I  
Credits 3.3 Lecture Hours.  
(CHEM 1311, 1411) Fundamentals of Chemistry I. Introduction to modern theories of atomic structure and chemical bonding; chemical reactions; stoichiometry; states of matter; solutions; equilibrium; acids and bases; coordination chemistry.  
Prerequisites: Concurrent enrollment in CHEM 111.

CHEM 102 Fundamentals of Chemistry II  
Credits 3.3 Lecture Hours.  
(CHEM 1312, 1412) Fundamentals of Chemistry II. Theory and applications of oxidation-reductions systems; thermodynamics and kinetics; complex equilibria and solubility product; nuclear chemistry; descriptive inorganic and organic chemistry.  
Prerequisites: Concurrent enrollment in CHEM 112.

CHEM 103 Structure and Bonding  
Credits 3.3 Lecture Hours.  
Rigorous treatment of chemical principles and their application.  
Prerequisite: For entering students with satisfactory scores on math and chemistry placement examinations; concurrent enrollment in CHEM 113.

CHEM 104 Chemistry of the Elements  
Credits 3.3 Lecture Hours.  
Continuation of CHEM 103.  
Prerequisites: CHEM 103 and CHEM 113; concurrent enrollment in CHEM 114.

CHEM 106 Molecular Science for Citizens  
Credits 3.3 Lecture Hours.  
(CHEM 1305, 1405) Molecular Science for Citizens. Molecules that control daily life explored via a conceptual approach to molecular science; properties, synthesis, transformations and utility of important molecules and fuels, fibers, metals, pharmaceuticals, foods, biomolecules and structural materials; pollution, consumerism, energy production, disease, biotechnology and risk-benefit analysis considered.  
Prerequisites: Concurrent enrollment in CHEM 116.

CHEM 107 General Chemistry for Engineering Students  
Credits 3.3 Lecture Hours.  
Introduction to important concepts and principles of chemistry; emphasis on areas considered most relevant in an engineering context; practical applications of chemical principles in engineering and technology. Students completing CHEM 107 and changing majors to curricula requiring CHEM 101 and CHEM 112 cannot receive credit for both CHEM 117 and CHEM 111.  
Prerequisites: Concurrent enrollment in CHEM 117.

CHEM 108 Organic Chemistry I  
Credits 3.3 Lecture Hours.  
(CHEM 1323, 1423) Organic Chemistry I. Introduction to chemistry of compounds of carbon; general principles and their application to various industrial and biological processes.  
Prerequisite: CHEM 102 or CHEM 104. Concurrent registration in CHEM 237 is suggested.

CHEM 109 Organic Chemistry II  
Credits 3.3 Lecture Hours.  
(CHEM 2325, 2425) Organic Chemistry II. Continuation of CHEM 227.  
Prerequisites: CHEM 227. Concurrent registration in CHEM 238 is suggested.

CHEM 110 Techniques of Organic Chemistry  
Credits 2.1 Lecture Hour. 3 Lab Hours.  
Techniques of organic chemistry; preparation, properties of typical organic compounds; separation, purification, analysis, and characterization of organic compounds.  
Prerequisites: CHEM 112 or CHEM 114; CHEM 227 or registration therein.

CHEM 111 Physical and Chemical Principles  
Credit 1.3 Lab Hours.  
Elementary experiments in physical chemistry and quantitative analysis.  
Prerequisite: CHEM 103 or registration therein.

CHEM 114 Qualitative Analysis  
Credit 1.3 Lab Hours.  
Qualitative analysis, elementary inorganic syntheses and quantitative aspects of chemical equilibrium.  
Prerequisites: CHEM 104 or registration therein; CHEM 113.

CHEM 116 Molecular Science for Citizens Laboratory  
Credit 1.3 Lab Hours.  
(CHEM 1105, 1405) Molecular Science for Citizens Laboratory. The importance of molecular science to daily life illustrated by using experiments, demonstration and videos; designed to accompany CHEM 106.  
Prerequisite: CHEM 106 or registration therein.

CHEM 117 General Chemistry for Engineering Students Laboratory  
Credit 1.3 Lab Hours.  
Introduction to important concepts and principles of chemistry in the laboratory; emphasis on areas considered most relevant in an engineering context; practical applications of chemical principles in engineering and technology. Students completing CHEM 117 and changing majors to curricula requiring CHEM 111 and CHEM 112 may substitute CHEM 117 for CHEM 111. Students may not receive credit for both CHEM 117 and CHEM 111.  
Prerequisites: CHEM 107 or registration therein.

CHEM 222 Elements of Organic and Biological Chemistry  
Credits 3.3 Lecture Hours.  
Organic chemistry and its applications to biological and agricultural chemistry, including chemistry of functional groups, acid-base and redox chemistry, stereochemistry and chemistry of important biological compounds. Not to be used as the basis for further study in organic chemistry or biochemistry.  
Prerequisite: CHEM 101 or CHEM 103.

CHEM 227 Organic Chemistry I  
Credits 3.3 Lecture Hours.  
(CHEM 2323, 2423) Organic Chemistry I. Introduction to chemical of compounds of carbon; general principles and their application to various industrial and biological processes.  
Prerequisite: CHEM 102 or CHEM 104. Concurrent registration in CHEM 237 is suggested.

CHEM 228 Organic Chemistry II  
Credits 3.3 Lecture Hours.  
(CHEM 2325, 2425) Organic Chemistry II. Continuation of CHEM 227.  
Prerequisite: CHEM 227. Concurrent registration in CHEM 238 is suggested.
CHEM 234 Organic Synthesis and Analysis IV
Credits 3. 1 Lecture Hour. 6 Lab Hours.
The synthesis of significant types of organic compounds and study of their properties; laboratory separations of mixtures of organic substances, identification of compounds by functional group tests and preparation of derivatives; instrumental methods of separation, identification and analysis.
Prerequisites: CHEM 228 or registration therein; CHEM 231 or CHEM 237.

CHEM 237 Organic Chemistry Laboratory
Credit 1. 3 Lab Hours.
(CHEM 2123, 2223, 2423*) Organic Chemistry Laboratory. Operations and techniques of elementary organic chemistry laboratory; preparation, reactions and properties of representative organic compounds.
Prerequisites: CHEM 102, CHEM 104 or CHEM 112, CHEM 114; CHEM 227 or registration therein.

CHEM 238 Organic Chemistry Laboratory
Credit 1. 3 Lab Hours.
(CHEM 2125, 2225, 2425*) Organic Chemistry Laboratory. Continuation of CHEM 237.
Prerequisites: CHEM 228 or registration therein; CHEM 237 or CHEM 231.

CHEM 242 Elementary Organic Chemistry Laboratory
Credit 1. 3 Lab Hours.
Operations and techniques of elementary organic chemistry laboratory with emphasis on experiments for students of agriculture.
Prerequisite: CHEM 222 or registration therein.

CHEM 285 Directed Studies
Credits 1 to 4. 1 to 4 Other Hours.
Introduction to research, library and laboratory work designed for the freshman or sophomore students.
Prerequisite: Approval of department head.

CHEM 289 Special Topics in...
Credits 0 to 4. 0 to 4 Lecture Hours.
Selected topics in an identified area of chemistry. May be repeated for credit.
Prerequisite: Approval of instructor.

CHEM 291 Research
Credits 0 to 4. 0 to 4 Other Hours.
Research conducted under the direction of faculty member in chemistry. May be repeated 2 times for credit.
Prerequisites: Freshman or sophomore classification and approval of instructor.

CHEM 315 Quantitative Analysis
Credits 3. 3 Lecture Hours.
Introduction to quantitative methods of analysis; solution chemistry; chemical equilibrium of analytically useful reactions and of processes important in advanced analytical methods including electrochemistry, separations and kinetic methods.
Prerequisite: CHEM 102 or CHEM 104.

CHEM 316 Quantitative Analysis
Credits 2. 2 Lecture Hours.
Methods of chemical analysis; chemical equilibrium; basic chemical instrumentation.
Prerequisite: CHEM 102 or CHEM 104.
CHEM 362 Descriptive Inorganic Chemistry
Credits 3.3 Lecture Hours.
Introduction to inorganic chemistry with a focus in descriptive inorganic chemistry, bonding theories in inorganic molecules and in the solid state, redox chemistry, descriptive main group and transition metal chemistry; ligand field theory, molecular magnetism and electronic spectra in transition metal complexes.
Prerequisites: CHEM 102, CHEM 104 or equivalent.

CHEM 383 Chemistry of Environmental Pollution
Credits 3.3 Lecture Hours.
Chemical pollutants in the air, in water and on land; their generation, chemical reactivity, action on environment and disappearance through chemical mechanisms; chemistry of existing pollution abatement.
Prerequisites: CHEM 102 or CHEM 104; junior or senior classification.

CHEM 415 Analytical Chemistry
Credits 3.3 Lecture Hours.
Theory and practical aspects of modern instrumental methods of quantitative analysis; instrumental approaches to selectivity and sensitivity; examples of major, minor and trace component analysis.
Prerequisite: CHEM 315.

CHEM 433 Advanced Inorganic Chemistry Laboratory
Credits 2.6 Lab Hours.
Preparation, characterization and properties of bioinorganic, organometallic and macromolecular inorganic compounds; special techniques (glove box manipulations and double-manifold Schlenk lines) for handling air-sensitive materials.
Prerequisite: CHEM 362 or registration therein.

CHEM 434 Analytical Instrumentation Laboratory
Credits 2.6 Lab Hours.
Practical application of modern instrumental methods of quantitative analysis; atomic and molecular techniques to conduct chemical characterizations and analyses.
Prerequisite: CHEM 415 or registration therein.

CHEM 446 Organic Chemistry III
Credits 3.3 Lecture Hours.
Principles and applications for students in chemistry, chemical engineering and biological and physical sciences; bonding, chemical reactivity, stereochemistry and synthesis.
Prerequisites: CHEM 228 and CHEM 328 or concurrent enrollment in CHEM 328.

CHEM 456 Chemical Biology
Credits 3.3 Lecture Hours.
Application of chemical principles to biological phenomena; capstone course for advanced students, integrating organic or inorganic chemistry with biology.
Prerequisites: CHEM 228 or equivalent; junior or senior classification.

CHEM 462 Inorganic Chemistry
Credits 3.3 Lecture Hours.
Periodic relationship of elements, their compounds, principles of their bonding and applications.
Prerequisites: CHEM 228 and CHEM 362.

CHEM 464 Nuclear Chemistry
Credits 3.3 Lecture Hours.
Properties of the nucleus; radioactivity; decay kinetics; nuclear masses; theory of radioactive decay; nuclear reactions; radiochemistry; nuclear energy; hands-on demonstrations; applications to non-nuclear problems.
Prerequisites: CHEM 322 or CHEM 327; CHEM 315 or CHEM 316 recommended.

CHEM 466 Polymer Chemistry
Credits 3.3 Lecture Hours.
Mechanisms of polymerization reactions of monomers and molecular weight distributions of products; principles, limitations and advantages of most important methods of molecular weight determination; relationship of physical properties to structure and composition: correlations of applications with chemical constitution.
Prerequisites: CHEM 228 and CHEM 315 or equivalents.

CHEM 470 Industrial Chemistry
Credits 3.3 Lecture Hours.
Applications of organic and inorganic chemical reactions in the manufacture of commercial products; chemistry of petroleum refining and petrochemical processing; industrial polymerization processes; commodity and fine chemical production; influence of kinetics and thermodynamics on economics of industrial chemical production; pollution abatement technology.
Prerequisites: CHEM 228; junior or senior classification.

CHEM 481 Seminar
Credits 2.2 Lecture Hours.
Preparation of oral and written reports on selected topics from recent technical publications.

CHEM 483 Green Chemistry
Credits 3.3 Lecture Hours.
Environmentally benign chemistry; the design of chemical products and processes that reduce or eliminate the use and generation of hazardous substances; twelve principles of Green Chemistry; atom economy; use of renewable resources; catalysis for Green Chemistry; alternative solvents and reaction media; energy and the environment.
Prerequisites: CHEM 228; CHEM 362 recommended; junior or senior classification.

CHEM 485 Directed Studies
Credits 1 to 16. 1 to 16 Other Hours.
Introduction to research, library and laboratory work.
Prerequisites: Senior classification and approval of chemistry advisor.

CHEM 489 Special Topics in...
Credits 1 to 4.1 to 4 Lecture Hours.
Selected topics in an identified area of chemistry. May be repeated for credit.

CHEM 491 Research
Credits 0 to 10. 0 to 10 Other Hours.
Active research of basic nature under the supervision of Department of Chemistry faculty member. Registration in multiple sections of this course is possible within a given semester provided that the per semester credit hour limit is not exceeded.
Prerequisites: Chemistry major; junior classification or approval of chemistry advisor.

CHEN - Chemical Engineering (CHEN)

CHEN 204 Elementary Chemical Engineering
Credits 3.2 Lecture Hours. 3 Lab Hours.
Solution of elementary problems by application of mass balances, energy balances and equilibrium relationships.
Prerequisites: Grade of C or better in CHEM 102, CHEM 112, ENGR 112, MATH 152 and PHYS 218; admission to chemical engineering major; or approval of instructor.
CHEN 205 Chemical Engineering Thermodynamics I  
Credits 3.3 Lecture Hours.  
First and second laws of thermodynamics; volumetric properties of pure fluids; heat effects; applications to flow processes, power cycles, refrigeration.  
Prerequisites: CHEN 204.

CHEN 285 Directed Studies  
Credits 1 to 4. 1 to 4 Other Hours.  
Directed study of special projects or studies in chemical engineering processes or operations, for lower division students. Credit not applicable to degree requirements in chemical engineering.  
Prerequisites: Freshman or sophomore classification; approval of department head.

CHEN 289 Special Topics in...  
Credits 1 to 4. 1 to 4 Other Hours.  
Selected topics in an identified area of chemical engineering for lower division students. May be repeated for credit. Credit not applicable to degree requirements in chemical engineering.  
Prerequisite: Approval of instructor.

CHEN 301 Engineering Workplace Writing  
Credits 3.3 Lecture Hours.  
Processes for preparing documents commonly developed by engineers in the workplace; database research; electronic collaboration; ethics, planning, drafting, revising, and editing reports, proposals, correspondence, instructions, procedures, and presentations for the engineering workplace; meets ABET communication requirements.  
Prerequisites: ENGL 104 or equivalent; junior or senior classification in chemical engineering or approval by CHEN.

CHEN 304 Chemical Engineering Fluid Operations  
Credits 3.3 Lecture Hours.  
Fundamentals of fluid mechanics with applications to design and analysis of process equipment.  
Prerequisites: CHEN 205; MATH 308.

CHEN 313 Chemical Engineering Materials  
Credits 3.3 Lecture Hours.  
Overview of materials science with particular emphasis on classes of materials relevant to chemical engineers.  
Prerequisite: CHEN 204, MATH 251 or registration therein, CHEN 205 or registration therein; or approval of instructor.

CHEN 320 Numerical Analysis for Chemical Engineers  
Credits 3.3 Lecture Hours.  
Applications of numerical analysis techniques to mathematical models of processes common to chemical and associated industries; computational methods and software for analysis of chemical engineering processes.  
Prerequisites: CHEN 205, MATH 308 or approval of instructor.

CHEN 323 Chemical Engineering Heat Transfer Operations  
Credits 3.3 Lecture Hours.  
Heat transfer operations.  
Prerequisite: CHEN 304.

CHEN 354 Chemical Engineering Thermodynamics II  
Credits 3.3 Lecture Hours.  
Applications of thermodynamics to pure and mixed fluids; phase equilibria and chemical reaction equilibria.  
Prerequisites: CHEN 205; CHEN 320 or registration therein; MATH 308; or approval of instructor.

CHEN 382 Bioprocess Engineering  
Credits 3.3 Lecture Hours.  
Application of engineering principles to design of biocatalysts and bioprocesses.  
Prerequisite: Grade of C or better in CHEN 204 and CHEN 205; junior or senior classification.

CHEN 409 Mathematical Models of Chemical Processes  
Credits 3.3 Lecture Hours.  
Development of the mathematical models of chemical and physical processes common to the petroleum processing, chemical and associated industries.  
Prerequisite: CHEN 424.

CHEN 414 Chemical Engineering Laboratory I  
Credit 1.3 Lab Hours.  
Laboratory work based on CHEN 304 and CHEN 323.  
Prerequisites: CHEN 304; CHEN 323 or registration therein with approval of instructor; CHEN 301 or ENGL 210.

CHEN 422/BAEN 422 Unit Operations in Food Processing  
Credits 3.2 Lecture Hours. 2 Lab Hours.  
Design of food process engineering systems; basic concepts of rheology and physical properties of foods; fundamentals of heat and mass transfer and process control.  
Prerequisites: CHEN 205 and CHEN 304, or ENGR 214.  
Cross Listing: BAEN 422/CHEN 422.

CHEN 424 Chemical Engineering Mass Transfer Operations  
Credits 3.3 Lecture Hours.  
Introduction to mass transfer operations with applications to design and analysis of process equipment.  
Prerequisites: CHEN 323 or registration therein; CHEN 354; or approval of instructor.

CHEN 425 Process Integration, Simulation and Economics  
Credits 3.2 Lecture Hours. 3 Lab Hours.  
Integration, simulation, and economic methods involved in the design of chemical processes and equipment.  
Prerequisite: CHEN 320, CHEN 323 or registration therein; CHEN 354.

CHEN 426 Chemical Engineering Plant Design  
Credits 3.1 Lecture Hour. 6 Lab Hours.  
Integration of material from other chemical engineering courses with applications to the design of plants and processes representative of the chemical and related process industries.  
Prerequisites: CHEN 424 and CHEN 425; graduating senior or approval of instructor.

CHEN 430/SENG 430 Risk Analysis in Safety Engineering  
Credits 3.3 Lecture Hours.  
Concepts of risk and risk assessment, which uses all available information to provide a foundation for risk-informed and cost-effective engineering practices; examples and exercises are drawn from a variety of engineering areas.  
Prerequisite: Junior or senior classification.  
Cross Listing: SENG 430/CHEN 430.

CHEN 431/BAEN 431 Fundamentals in Bioseparations  
Credits 3.3 Lecture Hours.  
Design principles and application of chemical engineering unit operations to the production of therapeutic and bioactive molecules.  
Prerequisite: BAEN 302 or BMEN 282/CHEN 282 or CHEN 282 or CHEN 382.  
Cross Listing: BAEN 431/CHEN 431.
CHEN 433 Chemical Engineering Laboratory II
Credit 1. 3 Lab Hours.
Laboratory work based on CHEN 424, CHEN 461 and CHEN 464.
Prerequisites: CHEN 414 and CHEN 424; CHEN 464 or registration therein.

CHEN 440 Introduction to Transport Phenomena
Credits 3. 3 Lecture Hours.
Unifying principles and analytical description of phenomena of momentum transport (viscous flow), energy transport (heat conduction and convection) and mass transport (diffusion) in continuous media; similarities and differences in these phenomena.
Prerequisite: Senior classification or approval of instructor.

CHEN 441 Design of Chemical Processes
Credits 3. 3 Lecture Hours.
Introduction to design methods for chemical processes; discussions of reaction systems, design and operation of commercial reactors.
Prerequisites: CHEN 424; senior classification or approval of instructor.

CHEN 450 Microfabrication and Microfluidics Technology
Credits 3. 3 Lecture Hours.
Micro Electro Mechanical Systems (MEMS) technology; study the fundamentals of fluids, heat and mass transfer, surface chemistry, and electrochemical interactions.
Prerequisite: Junior or senior classification.

CHEN 451 Introduction to Polymer Engineering
Credits 3. 3 Lecture Hours.
Fundamentals of polymer reaction kinetics, morphology, chemical and rheological properties with applications to polymer synthesis, production and processing operations.
Prerequisite: Senior classification in chemical engineering or approval of instructor.

CHEN 455/SENG 455 Process Safety Engineering
Credits 3. 3 Lecture Hours.
Applications of engineering principles to process safety and hazards analysis, mitigation, and prevention, with special emphasis on the chemical process industries; includes source modeling for leakage rates, dispersion, analysis, relief valve sizing, fire and explosion damage analysis, hazards identification, risk analysis, accident investigations.
Prerequisite: Senior classification in any engineering major.
Cross Listing: SENG 455/CHEN 455.

CHEN 458 Fundamentals of Environmental Remediation Processes
Credits 3. 3 Lecture Hours.
Fundamental approach to various remediation technologies; topics in environmental thermodynamics and mass transfer; adsorption, desorption, ion exchange, air stripping extractions, chemical oxidation, biodegradation.
Prerequisites: CHEN 354 and CHEN 424.

CHEN 459 Gas and Petroleum Processing
Credits 3. 3 Lecture Hours.
Design and operation of petroleum and gas processing facilities including hydrate suppression, dehydration, sweetening, sulfur recovery, LPG and liquid recovery, refining operations; analysis of the design and operations involving a large degree of process simulation.
Prerequisites: CHEN 323 and approval of instructor.

CHEN 460/SENG 460 Quantitative Risk Analysis in Safety Engineering
Credits 3. 3 Lecture Hours.
Fundamental concepts, techniques, and applications of risk analysis and risk-informed decision making for engineering students; practical uses of probabilistic methods are demonstrated in exercises and case studies from diverse engineering areas.
Prerequisite: Senior or graduate classification.
Cross Listing: SENG 460/CHEN 460.

CHEN 461 Process Dynamics and Control
Credits 3. 3 Lecture Hours.
Analysis of process dynamics and methods for the design of automatic control systems for chemical process plants.
Prerequisite: CHEN 320.

CHEN 463 Systems Biology
Credits 3. 3 Lecture Hours.
Experimental and computational techniques in systems biology; includes high throughput experiments, data analysis, modeling and simulation; discussed in the context to specific applications such as signal transduction.
Prerequisite: CHEN 382 or approval of instructor.

CHEN 464 Kinetics and Reactor Design
Credits 3. 3 Lecture Hours.
Introduction to kinetics of reactions and application of fundamental principles to design and operation of commercial reactors.
Prerequisites: CHEN 320, CHEN 323, CHEN 354 or approval of instructor.

CHEN 469 Chemical Engineering Car Design
Credit 1. 1 Lecture Hour.
Application of chemical, physical and engineering principles in design process, idea generation and development of design concepts, economic, safety and performance analysis. May be taken four times for credit.
Prerequisites: CHEN 204, CHEN 205; junior or senior classification or approval of instructor.

CHEN 470/BMEN 470 Introduction of Biomedical Optics
Credits 3. 3 Lecture Hours.
Fundamentals of biomedical optics; basic engineering principles used in optical therapeutics, optical diagnostics and optical biosensing.
Prerequisites: MATH 308; PHYS 208.
Cross Listing: BMEN 470/CHEN 470.

CHEN 471/BAEN 471 Bioreactor Engineering
Credits 3. 3 Lecture Hours.
Fundamentals of microbial and enzyme kinetics; basic biochemical reaction theory and reactor systems; heterogeneous reactions and transport considerations in enzyme and cell reactors, and immobilized systems; bioreactor design considerations in bioprocessing.
Prerequisite: CHEN 282 or CHEN 382 or BAEN 302; junior or senior classification in engineering or approval of instructor.
Cross Listing: BAEN 471/CHEN 471.

CHEN 475 Microelectronics Process Engineering
Credits 3. 3 Lecture Hours.
State-of-the-art process engineering principles on microelectronics, especially for the fabrication of very large scale integrated circuits (VLSICs); fundamental unit processes, such as thin film deposition, thermal growth, lithography, etching and doping, material structures and properties, and basic device operation principles.
Prerequisites: CHEN 354 and CHEN 464 or approval of instructor; CHEM 322.

CHEN 479 Seminar
Credit 1. 2 Lab Hours.
Preparation of oral and written reports on selected topics from recent technical publications.
Prerequisites: Senior classification in chemical engineering, ENGL 210 or ENGL 301.
CHEN 485 Directed Studies  
Credits 1 to 5. 1 to 5 Other Hours. 
Work covers one or more problems in chemical engineering processes or operations. 
**Prerequisite:** Approval of department head.

CHEN 489 Special Topics in...  
Credits 1 to 4. 1 to 4 Lecture Hours. 
Selected topics in an identified area of chemical engineering. May be repeated for credit. 
**Prerequisite:** Senior classification in chemical engineering or approval of instructor.

CHEN 491 Research  
Credits 1 to 4. 1 to 4 Other Hours. 
Research conducted under the direction of faculty member in chemical engineering. May be repeated 2 times for credit. 
**Prerequisites:** Junior or Senior classification and approval of instructor.

---

**CHIN - Chinese (CHIN)**

CHIN 101 Beginning Chinese I  
Credits 4. 3 Lecture Hours. 2 Lab Hours. 
(CHIN 1411, 1511) Beginning Chinese I. Introduction to Chinese language, culture and history; development of communicative skills in daily conversation; ability to read and write some commonly used Chinese characters.

CHIN 102 Beginning Chinese II  
Credits 4. 3 Lecture Hours. 2 Lab Hours. 
(CHIN 1412, 1512) Beginning Chinese II. Further development of communicative skills in different aspects of daily Chinese conversation; ability to read and write about 150 commonly used characters. 
**Prerequisite:** CHIN 101 with a grade of C or better.

CHIN 201 Intermediate Chinese I  
Credits 3. 3 Lecture Hours. 
(CHIN 2311) Intermediate Chinese I. Development of comprehension and production of spoken Chinese, with emphasis on connected discourse; acquisition of advanced language points; ability to read and write 250 or more characters. 
**Prerequisite:** CHIN 102 with a grade of C or better.

CHIN 202 Intermediate Chinese II  
Credits 3. 3 Lecture Hours. 
(CHIN 2312) Intermediate Chinese II. Continued development of effective communication skills in different daily situations; ability to read and write simple, short paragraphs in Chinese. 
**Prerequisite:** CHIN 201 with a grade of C or better.

CHIN 285 Directed Studies  
Credits 1 to 4. 1 to 4 Other Hours. 
Individual supervision of readings or assigned projects in Chinese, selected for each student individually; written or oral reports. 
**Prerequisite:** Approval of instructor and Director of AALO.

CHIN 289 Special Topics in...  
Credits 1 to 4. 1 to 4 Lecture Hours. 
Selected topics in an identified area of Chinese studies. May be repeated for credit. 
**Prerequisite:** Approval of instructor.

CHIN 301 Reading and Composition  
Credits 3. 3 Lecture Hours. 
Development of advanced proficiency in reading and writing through contact with various written and spoken styles of modern Chinese as reflected in newspaper reports, radio and TV broadcasts. 
**Prerequisites:** CHIN 202; junior or senior classification or approval of instructor.

CHIN 302 Reading and Composition II  
Credits 3. 3 Lecture Hours. 
Advanced proficiency in reading comprehension through contact with various written materials; development of cultural proficiency; development of writing skills with emphasis on new characters, new vocabulary and new sentence structures. 
**Prerequisites:** CHIN 301; junior or senior classification or approval of instructor.

CHIN 405 Modern Chinese Fiction  
Credits 3. 3 Lecture Hours. 
Analysis of major Chinese literary and other prose works of the twentieth and twenty-first centuries; taught in English. May be taken two times for credit. 
**Prerequisite:** Junior or senior classification or approval of instructor.

CHIN 465/FILM 465 Chinese Film  
Credits 3. 3 Lecture Hours. 
Consideration and analysis of major works and directors of Chinese film; interpretation of culture through film; relationship of film to history, literature and other arts; taught in English. May be taken two times for credit. 
**Prerequisite:** Junior or senior classification or approval of instructor. 
**Cross Listing:** FILM 465/CHIN 465.

CHIN 485 Directed Studies  
Credits 1 to 4. 1 to 4 Other Hours. 
Individual supervision of readings or assigned projects selected for each student individually; written or oral reports. 
**Prerequisite:** Approval of instructor and Director of AALO.

CHIN 489 Special Topics in...  
Credits 1 to 4. 1 to 4 Lecture Hours. 
Selected topics in an identified area of Chinese studies. May be repeated for credit. 
**Prerequisite:** Approval of instructor.

CHIN 491 Research  
Credits 1 to 4. 1 to 4 Other Hours. 
Research in Chinese studies conducted under the direction of faculty member approved by the Director of AALO. May be taken 2 times for credit. 
**Prerequisites:** Junior or senior classification and approval of instructor.

---

**CLAS - Classics (CLAS)**

CLAS 101 Beginning Classical Greek I  
Credits 4. 4 Lecture Hours. 
(CHIN 1411, 1511) Beginning Classical Greek I. Introduction to the language and culture of Greece; basic grammar and vocabulary; readings and slide lectures designed to place language study in its cultural and artistic context.
CLAS 102 Beginning Classical Greek II  
Credits 4. 4 Lecture Hours.  
(GREE 1412, 1512) Beginning Classical Greek II. Continuation of CLAS 101; basic grammar and vocabulary; readings and slide lectures designed to place language study in its cultural and artistic context.  
Prerequisite: CLAS 101.

CLAS 121 Beginning Latin I  
Credits 4. 4 Lecture Hours.  
(LATI 1411, 1511) Beginning Latin I. Introduction to grammar and vocabulary with a contrastive approach; reading of graded material.  
Prerequisite: CLAS 122.

CLAS 122 Beginning Latin II  
Credits 4. 4 Lecture Hours.  
(LATI 1412, 1512) Beginning Latin II. Completion of elementary grammatical structures; introduction to Latin historians.  
Prerequisite: CLAS 121.

CLAS 211 Intermediate Greek  
Credits 3. 3 Lecture Hours.  
(GREE 2311) Intermediate Greek. Completion of study of grammar and syntax; introduction to reading ancient Greek authors in the original language.  
Prerequisite: CLAS 102.

CLAS 220 History of Christianity: Origins to the Reformation  
Credits 3. 3 Lecture Hours.  
History of Christian doctrine, ecclesiastical organization, and religious practice, origins through Reformation, with emphasis on religion and society; life and teachings of Jesus; apostolic church; patristic period; Christianization of Roman Empire and northern Europe; monasticism; medieval church; Gregorian reform; heresy; papal monarchy; schism and conciliarism; reformations of the sixteenth century.  
Cross Listing: HIST 220 and RELS 220.

CLAS 221 Intermediate Latin I  
Credits 3. 3 Lecture Hours.  
(LATI 2311) Intermediate Latin I. Practice in reading Latin prose writings, especially historical writings and letters.  
Prerequisite: CLAS 122.

CLAS 222 Intermediate Latin II  
Credits 3. 3 Lecture Hours.  
Practice in reading Latin poetry writings, especially Vergil, Horace and Ovid.  
Prerequisite: CLAS 221.

CLAS 250 Greek and Roman Civilization  
Credits 3. 3 Lecture Hours.  
Introduction to the civilizations of classical antiquity from Bronze Age Greece to the dissolution of the Roman Empire; examination of major social, intellectual, and political developments in ancient Greece and Rome.

CLAS 251/RELS 251 Classical Mythology  
Credits 3. 3 Lecture Hours.  
Introduction to the most important myths of the Greeks and Romans; ancient and modern methods of interpreting myths; the role of myths in ancient literature; readings in English.  
Cross Listing: RELS 251/CLAS 251.

CLAS 285 Directed Studies  
Credits 0 to 4. 0 to 4 Other Hours.  
Individual supervision of readings or assigned projects in Classical Languages, selected for each student individually.  
Prerequisite: Approval of instructor and department head.

CLAS 289 Special Topics in...  
Credits 1 to 4. 1 to 4 Lecture Hours.  
Selected topics in an identified area of Classical Languages. May be repeated for credit.  
Prerequisite: Approval of instructor.

CLAS 291 Research  
Credits 0 to 3. 0 to 3 Other Hours.  
Research conducted under the direction of faculty member in classical studies. May be taken three times for credit.  
Prerequisites: Freshman or sophomore classification and approval of department head.

CLAS 311 Advanced Greek: New Testament  
Credits 3. 3 Lecture Hours.  
Readings of the New Testament and works contemporary with it in the original language; introduction to the linguistic, historical, literary and cultural background of the New Testament. May be repeated for credit with different readings.  
Prerequisite: CLAS 211.

CLAS 312 Advanced Classical Greek Poetry  
Credits 3. 3 Lecture Hours.  
Readings of selections from ancient Greek authors of poetry (lyric, epic, or drama) in the original language; discussion of the intellectual, historical, and literary background of the works, and of the lives and thought of the writers. May be repeated for credit with different readings.  
Prerequisite: CLAS 211.

CLAS 313 Advanced Classical Greek Prose  
Credits 3. 3 Lecture Hours.  
Readings of selections from ancient Greek authors of prose (history, oratory, letters, philosophy) in the original language; discussion of the intellectual, historical, and literary background of the works, and of the lives and thought of the writers. May be repeated for credit with different readings.  
Prerequisite: CLAS 211.

CLAS 320 Survey of Latin Literature  
Credits 3. 3 Lecture Hours.  
Latin literature from the republican through the imperial period; systematic overview of the development of literary genres and themes, to provide context for the intensive study of individual authors in other courses.  
Prerequisite: CLAS 222 or equivalent.

CLAS 321 Advanced Latin Prose  
Credits 3. 3 Lecture Hours.  
Readings of selections from ancient Roman authors of prose (history, oratory, letters, philosophy) in the original language; discussion of the intellectual, historical and literary background of the works, and of the lives and thought of the writers. May be repeated for credit with different readings.  
Prerequisite: CLAS 222 or equivalent.

CLAS 322 Advanced Latin Poetry  
Credits 3. 3 Lecture Hours.  
Readings of selections from ancient Roman authors of poetry (lyric, satire, epic, or drama) in the original language; discussion of the intellectual, historical, and literary background of the works, and the lives and thought of the writers. May be repeated for credit with different readings.  
Prerequisite: CLAS 222 or equivalent.
CLAS 330 Women in Ancient Greece and Rome
Credits 3. 3 Lecture Hours.
Survey of women in classical Greece and Rome; emphases on female occupations and family relationships, legal and political status, traditional values, notorious women, how women were viewed and how they viewed themselves.
Prerequisite: Junior or senior classification.
Cross Listing: HIST 330 and WGST 330.

CLAS 352 Greek and Roman Drama
Credits 3. 3 Lecture Hours.
Dramatic literature of Ancient Greece and Rome; works of the major classical playwrights; the origins of comedy and tragedy; visual and musical aspects of production; political and intellectual ideas as reflected in the plays; readings in English.

CLAS 353/ANTH 353 Archaeology of Ancient Greece
Credits 3. 3 Lecture Hours.
Archaeology of ancient Greece from the Stone Age until the ascent of Rome in the Hellenistic Period; remains of ancient Greek art (sculpture, mosaic, painting), architecture (temples, homes, civic structures), religion (figurines, votive offerings), and social history (coins, inscriptions).
Prerequisite: Junior or senior classification.
Cross Listing: ANTH 353/CLAS 353.

CLAS 354/ANTH 354 Archaeology of Ancient Italy
Credits 3. 3 Lecture Hours.
Archaeology of ancient Italy from the Stone Age until the collapse of the Roman Empire in the fourth century; remains of ancient Etruscan and Roman art (sculpture, mosaic, painting), architecture (temples, homes, civic structures), religion (figurines, votive offerings), and social history (coins, inscriptions).
Prerequisite: Junior or senior classification.
Cross Listing: ANTH 354/CLAS 354.

CLAS 361 Greek Literature in Translation
Credits 3. 3 Lecture Hours.
Literature of ancient Greece in its cultural context; Greek life and thought as revealed by its writers; development of the various genres of prose and poetry; readings in English.

CLAS 371 In Search of Homer and the Trojan War
Credits 3. 3 Lecture Hours.
The nature, background, authorship and historicity of the Iliad and the Odyssey; Aegean culture in the Stone, Bronze and early Iron ages; the value of Greek epics as historical documents; oral poetry; the Trojan War in Greek literature; readings in English.

CLAS 372 Greek and Roman Epic
Credits 3. 3 Lecture Hours.
Study of the ancient epic in its historical and cultural context; oral poetry; Homer, archaeology, and history; creation of Greek mythology; Alexandrian written epic; early Latin epic; Vergil's Aeneid as national epic; Vergil and the Homeric tradition; Silver Age Latin epics; readings in English.
Prerequisite: Sophomore classification or approval of instructor.

CLAS 381 Ancient Athletics
Credits 3. 3 Lecture Hours.
Study of Greek and Roman athletics in their cultural and historical contexts through the examination of ancient literary, archaeological, and artistic sources; readings in English.

CLAS 400 Seminar in Classical Studies
Credits 3. 3 Lecture Hours.
Exploration of a significant topic, work, or period in Greek or Roman literature, culture, or history; emphasis on development of research skills in Classical Studies. May be taken three times for credit.
Prerequisite: Junior or senior classification, or approval of instructor.

CLAS 415/FILM 415 The Ancient World in Film
Credits 3. 3 Lecture Hours.
Study of modern films as they relate to ancient literary texts that inspired them or with which they share common themes; relationship between Greek epic, tragedy, and comedy and their cinematic adaptations; treatment of Rome as an idea or ideal in the work of both ancient Romans and modern filmmakers.
Prerequisite: Junior or senior classification, or approval of instructor.
Cross Listing: FILM 415/CLAS 415.

CLAS 417/ANTH 417 Naval Warfare and Warships in Ancient Greece and Rome. (3-0). Credit 3
Credits 3. 3 Lecture Hours.
Navy and Warships in Ancient Greece and Rome. Extensive survey of Greek and Roman warships, naval warfare, naval strategy and tactics drawing upon archaeological evidence, literary documentation and iconographic material, from the Bronze Age (Ancient Egypt and the mythical Trojan War) to the Imperial Roman Navy.
Prerequisite: Junior or senior classification.
Cross Listing: ANTH 417/CLAS 417.

CLAS 418 European Intellectual History from Ancient Greece to the Early Middle Ages
Credits 3. 3 Lecture Hours.
Political and social history of selected major figures and important movements in political theory, literature, sociology, art, economics and philosophy from Pre-Socratic Greece through the formative stages of the Christian Middle Ages.
Prerequisite: Junior or senior classification, or approval of instructor.
Cross Listing: HIST 418 and RELS 418.

CLAS 426/HIST 426 The Ancient Greeks
Credits 3. 3 Lecture Hours.
Greek History and civilization from the Archaic Age to Alexander the Great (8th-late 4th century B.C.).
Prerequisite: Junior or senior classification, or approval of instructor.
Cross Listing: HIST 426/CLAS 426.

CLAS 427/HIST 427 The Roman Republic I: The Empire Builders
Credits 3. 3 Lecture Hours.
Roman history and civilization from the beginnings of the Republic (6th/5th century B.C.) to the late 2nd century B.C.
Prerequisite: Junior or senior classification, or approval of instructor.
Cross Listing: HIST 427/CLAS 427.

CLAS 428/HIST 428 The Roman Republic II: The Civil Wars
Credits 3. 3 Lecture Hours.
Roman history and civilization from the late 2nd century B.C. to the 1st century A.D.
Prerequisite: Junior or senior classification, or approval of instructor.
Cross Listing: HIST 428/CLAS 428.

CLAS 429/HIST 429 The Roman Empire
Credits 3. 3 Lecture Hours.
Roman History and civilization of the Imperial Period (1st century B.C.-6th century A.D.).
Prerequisite: Junior or senior classification, or approval of instructor.
Cross Listing: HIST 429/CLAS 429.
CLAS 444/ANTH 444 Classical Archaeology
Credits 3.3 Lecture Hours.
History of the discipline through the individuals, organizations, excavations, theoretical models and ethical issues that have shaped it.
Prerequisites: Junior or senior classification; ANTH 353/CLAS 353, ANTH 354/CLAS 354, CLAS 353/ANTH 353 or CLAS 354/ANTH 354.
Cross Listing: ANTH 444/CLAS 444.
CLAS 485 Directed Studies
Credits 0 to 4.0 to 4 Other Hours.
Individual supervision of readings or assigned projects, selected for each student individually.
Prerequisite: Approval of instructor and department head.
CLAS 489 Special Topics in...
Credits 1 to 4.1 to 4 Lecture Hours.
Selected topics in an intensified area of classical languages and culture. May be repeated for credit.
Prerequisite: Approval of instructor.
CLAS 491 Research
Credits 0 to 3.0 to 3 Other Hours.
Research conducted under the direction of faculty member in classical studies. May be taken three times for credit.
Prerequisites: Junior or senior classification and approval of department head.

COMM - Communication (COMM)

COMM 101 Introduction to Communication
Credits 3.3 Lecture Hours.
(SPCH 1311) Introduction to Communication. Survey of communication topics, research, and contexts of communicative practice; overview of communication from both humanities and social science perspectives.

COMM 203 Public Speaking
Credits 3.3 Lecture Hours.
(SPCH 1315) Public Speaking. Training in speeches of social and technical interest designed to teach students to develop and illustrate ideas and information and to inform, stimulate, and persuade their audiences.

COMM 205 Communication for Technical Professions
Credits 3.3 Lecture Hours.
Design and presentation of oral reports for technical professions; incorporation of visual and graphic materials into presentation required; written reports required.

COMM 210 Group Communication and Discussion
Credits 3.3 Lecture Hours.
(SPCH 2333) Group Communication and Discussion. Definition, structure, and functions of groups; group productivity, codes in verbal and nonverbal communication; problem-solving, role-playing, decision-making; leadership and organization; interview principles and techniques.

COMM 215/JOUR 215 Interviewing: Principles and Practice
Credits 3.3 Lecture Hours.
(COMM 2316, SPCH 2316) Interviewing: Principles and Practice. Theory and practice of methods in selected interview settings; emphasis on communication between two persons, questioning techniques, and the logical and psychological bases of interpersonal persuasion.
Cross Listing: JOUR 215/COMM 215.

COMM 230/JOUR 230 Communication Technology Skills
Credits 3.3 Lecture Hours.
Introduction to interactive media and media literacy skills in the digital domain; survey of technology histories, standards and markets for industries such as multichannel TV, digital radio, video games, streaming media, epublishing, teleconferencing and social networking.
Prerequisite: Communication or telecommunication media studies majors.

COMM 240 Rhetorical Criticism
Credits 3.3 Lecture Hours.
Principles and practice of the analysis of speeches and other forms of public discourse; compares systems of rhetorical criticism, such as neo-classical analysis, mythic analysis, rhetorical genres and close textual analysis.

COMM 243 Argumentation and Debate
Credits 3.3 Lecture Hours.
(SPCH 2335) Argumentation and Debate. Principles of argumentation and skills of debate, including reasoning, evidence, refutation, and briefing.

COMM 250/JOUR 250 New Media and the Independent Voice
Credits 3.3 Lecture Hours.
Examination of new media as independent voices for cultural and political movements; principles governing the design, presentation, and evaluation of blogs as a persuasive medium in society.
Cross Listing: JOUR 250/COMM 250.

COMM 280 Careers in Communication
Credit 1.1 Lecture Hour.
Introduction to careers in communication; emphasis on strengths and personality in selecting a profession, application letters, information interviews, mock interviews; must be taken on satisfactory/unsatisfactory basis.
Prerequisites: Sophomore classification or approval of instructor; COMM and TCMS majors.

COMM 285 Directed Studies
Credits 1 to 3.1 to 3 Other Hours.
Individual supervision of readings or assigned projects in communication. May be taken two times for credit.
Prerequisites: Approval of instructor and department head.

COMM 289 Special Topics in...
Credits 1 to 4.1 to 4 Lecture Hours.
Selected topics in an identified area of communication. May be repeated for credit.
Prerequisite: Approval of instructor.

COMM 291 Research
Credits 0 to 3.0 to 3 Other Hours.
Research conducted under the direction of faculty member in the department of communication. May be repeated 3 times for credit.
Prerequisites: GPA 2.5 or higher; freshman or sophomore classification and approval of instructor and department head.

COMM 301 Rhetoric in Western Thought
Credits 3.3 Lecture Hours.
Historical and critical evaluation of rhetorical theory from the classical era to the contemporary period--from Aristotle to Kenneth Burke. Major theories of communication and persuasion developed in Europe and America.
Prerequisite: Junior or senior classification.
COMM 305 Theories of Communication
Credits 3.3 Lecture Hours.
Theoretical approaches to human communication, including selected theories of language behavior, interpersonal and small group interaction, and persuasion.
Prerequisite: Any lower-division communication course, or junior classification, or approval of instructor.

COMM 307/JOUR 301 Mass Communication, Law, and Society
Credits 3.3 Lecture Hours.
Mass media as social institutions; social responsibility and ethics of the press; history, constitutional development, and law of the First Amendment.
Prerequisite: Any lower-division communication course, or junior classification, or approval of instructor.

Cross Listing: JOUR 301/COMM 307.

COMM 308 Research Methods in Communication
Credits 3.3 Lecture Hours.
Survey of methods used in communication research including quantitative, interpretive and rhetorical methods; formulating research questions, determining the appropriate method, planning and designing the research, data collection, and data analysis and interpretation.
Prerequisite: MATH 141 or MATH 166, and MATH 131 or MATH 142 or MATH 151 or PHIL 240; or MATH 151 and MATH 152.

COMM 315 Interpersonal Communication
Credits 3.3 Lecture Hours.
Speech interaction in person-to-person settings; concepts of perception, attraction, self-disclosure, listening, and conflict management through communication; speech interaction patterns and stages in the development of interpersonal communication.
Prerequisite: Junior or senior classification.

COMM 320 Organizational Communication
Credits 3.3 Lecture Hours.
Speech communication behavior and networks within organizations; recent research on speech communication systems, communication climate, and communication barriers in organizational settings.
Prerequisite: Junior or senior classification.

COMM 321 Strategic Communication Case Studies
Credits 3.3 Lecture Hours.
Strategic communication practice; application of skills including communication research, media writing and advanced media writing, visual media and public speaking; service-learning as not-for-fee consultant to a community organization.
Prerequisites: COMM 323 and junior or senior classification or approval of instructor.

COMM 322 Communication Tactics
Credits 3.3 Lecture Hours.
Examination of strategic use of communication tactics; analysis of new and digital media in organizational and public communication; skill development in strategic use of communication tactics including writing for new media, researching, planning, integrating and evaluation effectiveness of traditional and new media tactics in strategic public communication.
Prerequisite: COMM 323, junior or senior classification.

COMM 323 Strategic Communication
Credits 3.3 Lecture Hours.
Application of strategic communication tools to create and influence policy, to improve profit and non-profit strategic communication planning.
Prerequisite: Junior or senior classification.

COMM 324 Communication Leadership and Conflict Management
Credits 3.3 Lecture Hours.
Communication perspective of leadership, of conflict, of management of conflict in interpersonal, group and societal contexts; models of leadership as communication phenomenon; use of symbols by leaders to foster collaboration, systemic constructionist approach.
Prerequisite: Junior or senior classification.

COMM 325 Persuasion
Credits 3.3 Lecture Hours.
Theory of effective persuasive communication in interpersonal, small group, and public settings; audience analysis, ethics of persuasion, motivational factors, psychological and rhetorical principles, source credibility, and theories of attitude change.
Prerequisite: Junior or senior classification.

COMM 327 American Oratory
Credits 3.3 Lecture Hours.
Survey of significant American oratory; critical analysis of important speeches in their historical, political, social, and philosophical contexts.
Prerequisite: Junior or senior classification.

COMM 330 Technology and Human Communication
Credits 3.3 Lecture Hours.
Nontechnical survey of how modern technologies influence human communication including an introduction to communication technologies; the influence of technology on interpersonal communication, group decision-making and public communication; an analysis of argumentation and persuasion in technological issues.

COMM 335 Intercultural Communication
Credits 3.3 Lecture Hours.
Communication variables in intercultural contexts including culture and meaning, nonverbal styles across cultures, patterns of symbolic transfer, culture shock and communication, values in intercultural dialogue.
Prerequisite: Junior or senior classification.

COMM 340 Communication and Popular Culture
Credits 3.3 Lecture Hours.
Survey of theories and concepts of popular culture; dynamic relationships between pop culture and television, film, sports, politics and leisure.
Prerequisite: Any lower-division communication course, or junior classification, or approval of instructor.

COMM 345/FILM 345 Media Industries
Credits 3.3 Lecture Hours.
Survey of the business organization, economic structures and processes, and regulations of the media industry.
Prerequisite: Any lower-division communication course, or junior classification, or approval of instructor.

Cross Listing: FILM 345/COMM 345.

COMM 350 Theories of Mediated Communication
Credits 3.3 Lecture Hours.
Survey of different theories of mediated communication processes and effects; functions of theories in social scientific research on media and mediated processes.
Prerequisite: Any lower-division communication course, or junior classification, or approval of instructor.
COMM 354 Political Economy of Telecommunication
Credits 3.3 Lecture Hours.
Survey of the political economy of the telecommunication industries both
at the national and global level, including regulations and policies, global
infrastructure and types of networks.
Prerequisite: Any lower-division communication course, or junior
classification, or approval of instructor.

COMM 360 Cultural History of the Media
Credits 3.3 Lecture Hours.
Origins and development of the mass media; their influence on social,
political, and cultural change; history of mass communication from
historical, sociological, and cultural perspectives.
Prerequisite: Any lower-division communication course, or junior
classification, or approval of instructor.

COMM 365/JOUR 365 International Communication
Credits 3.3 Lecture Hours.
Mass media, international, and cross-cultural audiences; theoretical,
pragmatic, political and ethical issues; including cultural differences,
comparative media systems, development communication, patterns of
world news flow, political propaganda, impact of international advertising
and other issues.
Prerequisite: Junior or senior classification.
Cross Listing: JOUR 365/COMM 365.

COMM 367/ARAB 475 Media and the Middle East
Credits 3.3 Lecture Hours.
Examination of how media (e.g., literature, news, film, television)
contribute to our understanding of historical events in the Middle East;
analysis of cultural, social, political and historical circumstances of media
representation of events; exploration of various media genres’ techniques
and narrative structure. May be taken two times for credit with a focus on
different medium.
Prerequisite: Junior or senior classification or approval of instructor.
Cross Listing: ARAB 475/COMM 367.

COMM 370 Health Communication
Credits 3.3 Lecture Hours.
Survey of theory and research in health communication, including
interaction between patients and providers, communication in health care
organizations, health care campaigns, and cultural meanings of health and
illness.
Prerequisite: Any lower-division communication course, or junior
classification, or approval of instructor.

COMM 375 Media Audiences
Credits 3.3 Lecture Hours.
Media audiences; research and theory; processes and effects of mass
communication; audience members’ uses and interpretations of media;
topics including political media, news, and entertainment, health and
information campaigns, children and other special audiences.
Prerequisite: Any lower-division communication course, or junior
classification, or approval of instructor.

COMM 403 Media, Children and Adolescents
Credits 3.3 Lecture Hours.
Critical analysis of popular culture and mass media issues related to
children and adolescents; deconstruction of media created by, for and
about children and youth.
Prerequisite: Junior or senior classification or approval of instructor.

COMM 407/WGST 407 Women, Minorities and the Mass Media
Credits 3.3 Lecture Hours.
The contributions of women and ethnic groups to the evolution of the
media; the portrayal of women and ethnic groups in the mass media;
issues resulting from the recognition of women and ethnic groups as
media audiences.
Prerequisites: Junior or senior classification and approval of instructor.
Cross Listing: WGST 407/COMM 407. Majors only or approval of
program coordinator.

COMM 408 Advanced Research Methods in Communication
Credits 3.3 Lecture Hours.
Advanced research methods in communication including experimental,
survey, interpretive, and critical methods; emphasis on research design,
data collection, analysis, interpretation, and presentation.
Prerequisite: Junior or senior classification; COMM 308.

COMM 410 Radio, Records, and Popular Music
Credits 3.3 Lecture Hours.
History of radio and record industries; communication technology
and media industries related to American popular music; interaction
of communication technologies, media industries, social and cultural
processes in evolution of popular music.
Prerequisite: Any lower-division communication course, or junior
classification, or approval of instructor.

COMM 411/WGST 411 Representations of Motherhood
Credits 3.3 Lecture Hours.
Examination of understandings of motherhood from a humanities
perspective and over a variety of cultures and time periods, as reflected in
written, media and/or oral texts.
Prerequisite: Junior or senior classification or approval of instructor.
Cross Listing: WGST 411/COMM 411.

COMM 415 New Media and Civil Society
Credits 3.3 Lecture Hours.
Critical analysis of new media technologies, civic participation, and social
capital in democratic, non-democratic, and nascent civil societies around
the world.
Prerequisite: Any lower-division communication course, or junior
classification, or approval of instructor.

COMM 420/WGST 420 Gender and Communication
Credits 3.3 Lecture Hours.
Survey of the role of gender in communication processes; focus on
communication differences between men and women in contexts such as
the family, school and work organizations; discussion of media influence in
gender stereotypes.
Cross Listing: WGST 420/COMM 420.

COMM 425/AFST 425 Rhetoric of the Civil Rights Movement
Credits 3.3 Lecture Hours.
Rhetorical evaluation of theoretical literature and pragmatic episodes
that shaped the U.S. Civil Rights Movement; examination of significant
speeches, documents, and protest activities in their historical, political, and
social contexts.
Cross Listing: AFST 425/COMM 425.
COMM 428/WGST 428 Women’s Rhetoric
Credits 3. 3 Lecture Hours.
Examination of the historical imbrication of masculinity and rhetoric in relation to women’s participation in political life, reception of women’s rhetoric in the public sphere, and remembrance and representation of women as rhetorical agents throughout history; consideration of women’s rhetoric in various cultural arenas.
Prerequisite: Junior or senior classification.
Cross Listing: WGST 428/COMM 428.

COMM 431 Rhetoric of Social Movements
Credits 3. 3 Lecture Hours.
Survey of events and rhetorical documents of major U.S. social movements, including abolitionist, labor, socialist, women’s rights, civil rights, pro-life, gay and lesbian, and student movements.
Prerequisites: COMM 301; junior or senior classification.

COMM 434 Topics in Rhetorical Theory
Credits 3. 3 Lecture Hours.
Application of rhetorical theories and concepts to rhetorical problems and methods; emphasis on the relationship between theory and practice. May be taken two times for credit.
Prerequisite: Junior or senior classification.

COMM 435/FILM 445 Rhetoric of Television and Film
Credits 3. 3 Lecture Hours.
Critical analysis of television and film; close readings of such mediated texts; special attention to writing television and film criticism.
Prerequisite: Junior or senior classification.

COMM 437 Visual Communication
Credits 3. 3 Lecture Hours.
Critical analysis of visual communication including photographs, advertising, memorials, tattoos, comics, public protest.
Prerequisite: Junior or senior classification.

COMM 438 Propaganda
Credits 3. 3 Lecture Hours.
Examination of common propaganda strategies in contemporary mass mediated environments.
Prerequisite: Junior or senior classification.

COMM 440 Political Communication
Credits 3. 3 Lecture Hours.
Rhetorical analysis of messages, media and speakers in political campaigns, institutions and movements.

COMM 443 Topics in Rhetorical Theory
Credits 3. 3 Lecture Hours.
Application of rhetorical theories and concepts to rhetorical problems and methods; emphasis on the relationship between theory and practice. May be taken two times for credit.
Prerequisite: Junior or senior classification.

COMM 447 Communication, Group Processes and Collaboration
Credits 3. 3 Lecture Hours.
Communication processes in teamwork including collaboration in dyads, teams, and group processes that contribute to or detract from team effectiveness.
Prerequisites: COMM 210; junior or senior classification.

COMM 449 Activism and Communication
Credits 3. 3 Lecture Hours.
Examination of communicative behaviors used by individuals, grassroots, and established organizations in strategic ways to advocate on behalf of issues, groups, or actions perceived as pro-social or for the betterment of society.
Prerequisite: Junior or senior classification.

COMM 450 Media Campaigns
Credits 3. 3 Lecture Hours.
Principles of designing media campaigns as applied to commercial advertising, political advertising and health campaigns; processes that drive the planning and execution of these campaigns.
Prerequisite: Any lower-division communication course, or junior classification, or approval of instructor.

COMM 452 Cultural Studies of Communication Technology
Credits 3. 3 Lecture Hours.
Exploration of theories concerning technology; emphasis on technological culture; examination of the emergence of and societal reactions to technologies during modern era; consideration of utopian/dystopian discourse of technology in popular media narratives; contemplation of technology as constitutive of power and knowledge.
Prerequisite: Junior or senior classification.

COMM 453 Communication and Video Games
Credits 3. 3 Lecture Hours.
Business and industry aspects of video games; cultural and social aspects of gaming.
Prerequisite: Junior or senior classification.

COMM 454 Telecommunication Policy
Credits 3. 3 Lecture Hours.
Telecommunication policy, including intellectual property, first amendment protections, privacy, universal service, government support, national information policy, standard setting and deregulation; implications for managers and consumers of telecommunication.
Prerequisites: COMM 354; junior or senior classification.

COMM 458/JOUR 458 Global Media
Credits 3. 3 Lecture Hours.
Study of globalization through media ownership; content, flow, cultural values, political power and technological impact; implications of globalization for local economies and audiences.
Prerequisite: Any lower-division communication course, or junior classification, or approval of instructor.
Cross Listing: JOUR 458/COMM 458.

COMM 460 Communication and Contemporary Issues
Credits 3. 3 Lecture Hours.
Rhetorical and other critical approaches to study how communication practices influence the construction of social issues. May be taken two times.

COMM 462 Topics in Communication
Credits 3. 3 Lecture Hours.
Critical analysis of visual communication including photographs, advertising, memorials, tattoos, comics, public protest.
Prerequisite: Junior or senior classification.

COMM 463 Discourse and Power
Credits 3. 3 Lecture Hours.
Study of women’s rhetoric in the public sphere, and remembrance and representation of women as rhetorical agents throughout history; consideration of women’s rhetoric in various cultural arenas.
Prerequisite: Junior or senior classification.
Cross Listing: WGST 463.

COMM 464 Discourse and Power
Credits 3. 3 Lecture Hours.
Study of women’s rhetoric in the public sphere, and remembrance and representation of women as rhetorical agents throughout history; consideration of women’s rhetoric in various cultural arenas.
Prerequisite: Junior or senior classification.
Cross Listing: WGST 464.

COMM 470 Communication in Health Care Contexts
Credits 3. 3 Lecture Hours.
Principles of health communication applied in situations ranging from physician-patient communication to public health campaign theory, design, implementation and evaluation. May be taken two times.
COMM 471 Media, Health and Medicine
Credits 3.3 Lecture Hours.
Analysis and evaluation of representations of health in media; examination of gender, class and race as they intersect with health issues.
Prerequisite: Junior or senior classification.

COMM 480/RELS 480 Religious Communication
Credits 3.3 Lecture Hours.
The role of religious communication as manifested in speeches, sermons, debates, campaigns, and social movements throughout history. May be taken two times for credit.
Cross Listing: RELS 480/COMM 480.

COMM 484 Internship in Communication
Credits 0 to 23.0 to 23 Other Hours.
Directed internship in a public or private organization to provide students with on-the-job training and applied research experience; application of communication theory and practice in career settings; designed to enhance and clarify students’ career objectives. May be repeated for credit. Must be taken S/U.
Prerequisites: Cumulative GPR of 2.5 or higher for credits taken in residence; approval of department head.

COMM 485 Directed Studies
Credits 0 to 3.0 to 3 Other Hours.
Directed individual study of identified topics in communication; may include specific research, readings or other approved project in any area of communication; written report is required. May be repeated for credit.
Prerequisites: Cumulative GPR of 2.5 or higher; approval of instructor and department head.

COMM 489 Special Topics in...
Credits 1 to 4.1 to 4 Lecture Hours.
Selected topics in an identified area of communication. May be repeated for credit.

COMM 491 Research
Credits 0 to 3.0 to 3 Other Hours.
Research conducted under the direction of faculty member in the department of communication. May be taken four times for credit.
Prerequisites: GPA 2.5 or higher; junior or senior classification and approval of instructor and department head.

COMM 497 Independent Honors Studies
Credits 0 to 3.0 to 3 Other Hours.
Directed independent studies for upper division Honors students, regardless of academic major, in select aspects of communication. May be repeated for credit.
Prerequisites: Junior or senior classification either as Honors student or with GPR of 3.25; letter of approval from head of student’s department.

COSC - Construction Science (COSC)

COSC 153 Introduction to the Construction Industry
Credits 3.3 Lecture Hours.
Characteristics of the construction industry; types of construction companies; contracts; people involved in a project, their responsibilities and interrelationships; evolution of a project; interpreting working drawings; construction bonds; contract documents.

COSC 175 Construction Graphics Communication
Credits 3.3 Lecture Hours.
Visualization, interpretation and communication of graphical geometry in construction design and engineering; graphical analysis of problems; sketching applications, computer aided design, and fundamentals of information modeling software; introduction to common quantitative tools in construction.
Prerequisite: COSL majors only.

COSC 202 Introduction to Housing
Credits 3.3 Lecture Hours.
Overview of the social, economic, environmental and cultural impacts of housing on communities and nations; varied perspectives to understand the different facets of housing and their impacts on the human experience; critical thinking skills to gain knowledge and to be informed of housing choices.

COSC 253 Construction Materials and Methods I
Credits 3.3 Lecture Hours.
(ARCH 2312) Construction Materials and Methods I. Materials, methods and sequences of the construction process; emphasis on design, specification, purchase and use of concrete, masonry and wood.

COSC 254 Construction Materials and Methods II
Credits 3.3 Lecture Hours.
(ARCH 2313) Construction Materials and Methods II. Analysis of materials and methods used in the design and construction of buildings with a particular emphasis on structures using structural steel reinforced concrete and dimensional framing lumber.
Prerequisite: COSC 253.

COSC 275 Estimating I
Credits 3.2 Lecture Hours. 3 Lab Hours.
Systems approach to determining required quantities of construction materials; quantification of various types of foundation systems, structural systems and building envelope systems; excerpts of contract documents from a variety of different building projects.
Prerequisites: COSC 175; COSC 254.

COSC 284 Introduction to Applied Workplace Ethics, Etiquette and Communications
Credits 3.3 Lecture Hours.
For students in an experiential learning environment; required reading assignments on topics concerning workplace ethics, etiquette and communications; apply and discuss reflective writing assignments in order to prepare to meet the professional expectations of employers upon graduation.
Prerequisite: Engaged in an internship, co-op or other experiential learning opportunity working a minimum of 20 hours per week.

COSC 285 Directed Studies
Credits 1 to 3.1 to 3 Other Hours.
Special project in construction science. Project must be approved by the department.
Prerequisite: Approval of department head.

COSC 291 Research
Credits 1 to 4.1 to 4 Other Hours.
Research conducted under the direction of faculty member in construction science. May be repeated 2 times for credit.
Prerequisites: Freshman or sophomore classification; approval of instructor.
COSC 301 Construction Surveying  
Credits 2.0 Lecture Hours. 4 Lab Hours.  
Practical applications of surveying to the practice of construction project management; distance, grade and angular measurement; surveying equipment and its application to construction layout and control; surveying documentation and field work; introduction to other three dimensional measurement and positioning systems.  
Prerequisite: Admission to upper level in Construction Science.

COSC 310 Design and Construction Leadership Education I  
Credit 1.1 Lecture Hour.  
Promotion of personal leadership skills utilized within the design and construction professions; primary understanding and developing management skills with specific attention to developing personal attributes and skills necessary for achieving organizational goals.  
Prerequisites: CARC majors only pursuing the minor in leadership in the design & construction professions; junior or senior classification or approval of instructor.

COSC 321 Structural Systems I  
Credits 3.3 Lecture Hours.  
Introduction to the physical principles that govern classical statics and strengths of materials through the design of architectural structures.  
Prerequisite: Admission to upper level in Construction Science.

COSC 322 Soils in Construction  
Credits 2.1 Lecture Hour. 3 Lab Hours.  
Introduction to soils as used in construction projects; engineering properties, soil classification, soil exploration, embankment control, dewatering, excavation supports, foundations.  
Prerequisite: Admission to upper level in Construction Science.

COSC 325 Mechanical, Electrical and Plumbing Systems in Construction I  
Credits 3.3 Lecture Hours.  
Design, operation, materials and installation methods of mechanical, electrical and plumbing systems in construction.  
Prerequisite: Admission to upper level in Construction Science.

COSC 326 Mechanical, Electrical and Plumbing Systems in Construction II  
Credits 3.3 Lecture Hours.  
In-depth coverage of mechanical, electrical and plumbing (MEP) system operations, materials and installation methods; development of MEP drawings, specifications and contract documents as used in MEP specialty contracting industry.  
Prerequisite: COSC 325.

COSC 333 Project Management for Faculty Managers  
Credits 3.3 Lecture Hours.  
Overview of project management for facility managers covering concepts and components of project management and their interrelationships in construction practice.  
Prerequisite: Minor in facility management; junior or senior classification or approval of instructor.

COSC 351 Construction Equipment and Methods  
Credits 3.3 Lecture Hours.  
Management principles of construction equipment selection, operation and safety; development of skills necessary to select an equipment mix that yields maximum productivity and best value.  
Prerequisite: COSC 323.

COSC 353 Construction Project Management  
Credits 3.3 Lecture Hours.  
An introduction to construction project management covering concepts of project selection, estimating bidding, scheduling, subcontracting practices, cost controls, project documentation, construction bonds, insurance, payments and the elements of close out; development of professional communication skills through prepared multi-media presentations.  
Prerequisite: Admission to upper level in Construction Science.

COSC 364 Construction Safety I  
Credit 1.1 Lecture Hour.  
Administration and application of the OSHA Act in the construction industry; includes standards, the general duty clause, competent person, and hazard identification; fulfills the requirements for the ten-hour OSHA certifications.  
Prerequisite: Admission to upper level in Construction Science.

COSC 375 Estimating II  
Credits 3.2 Lecture Hours. 3 Lab Hours.  
Quantification and pricing of direct field costs and general condition costs from construction documents; the preparation of complete lump sum bid package ready for project execution; complete set of contract documents required.  
Prerequisites: Admission to upper level in Construction Science; COSC 275.

COSC 381 Professional Ethics in the Construction Industry  
Credit 1.1 Lecture Hour.  
Principles of ethical behavior in preparation for a professional internship with a construction or construction-related company; various construction company case studies emphasizing: personal accountability, integrity, moral courage, individual, association and company codes of conduct; accepted business practices, decision making, company cultures, peer pressure, public opinion.  
Prerequisite: Admission to upper level in Construction Science.

COSC 410 Design and Construction Leadership Education II  
Credit 1.1 Lecture Hour.  
Development of competencies in various leadership and management practices that are useful in an array of situations; emphasis on organizational leadership and management development with specific attention to intragroup relationships and techniques for achieving group goals.  
Prerequisites: COSC 310, CARC majors only pursuing the minor in leadership in the design and construction professions; junior or senior classification or approval of instructor.

COSC 411 Seminar in Design and Construction Executive Leadership  
Credit 1.1 Lecture Hour.  
Promotes an understanding of leadership and builds the capacity to understand and meet the challenges involved in developing and leading ethical and sustainable organizations in today’s economy; examination of theory, conceptualizing, reflection and application; share experiences in everyday life and learn to predict outcomes based on theoretical models.  
Prerequisite: COSC 410; CARC majors only pursuing the minor in leadership in the design and construction; junior or senior classification or approval of instructor.

COSC 421 Soil and Structural Analysis  
Credits 3.3 Lecture Hours.  
Advanced structural analysis of steel and concrete members with an introduction to soil properties and constituents; utilizations of computer analysis tools.  
Prerequisite: COSC 321.
COSC 422 Structural Systems III
Credits 3.3 Lecture Hours.
Structural principles applied to the design and construction of architectural reinforced concrete structures, reinforced masonry structures, and other selected topics.
Prerequisite: COSC 421.

COSC 440 Interdisciplinary Capstone
Credits 4.4 Lecture Hours.
A senior capstone for students preparing to enter the design-build sector of the construction industry; integration of the design and construction processes into a single, cohesive project delivery system, starting with project inception, and carrying through construction, operation and maintenance of various types of construction projects.
Prerequisites: COSC 475; must be taken last full semester or summer before graduation.

COSC 441 Residential Capstone
Credits 4.4 Lecture Hours.
A senior capstone course for students preparing to enter the residential construction industry; project management of residential projects, including: market analysis, site analysis, residential design, building codes, estimating, scheduling, financing, subcontracting, marketing, business planning and current trends in design and construction.
Prerequisites: COSC 475; must be taken last full semester or summer before graduation.

COSC 442 Commercial Capstone
Credits 4.4 Lecture Hours.
A senior capstone course for students preparing to enter the commercial construction sector; project management of commercial construction projects, including: aspects of design, bidding/estimating, Presentation, value engineering, contracts/negotiation, subcontractor relations, cost controls, management during construction, close out, and post-construction requirements.
Prerequisites: COSC 475; must be taken last full semester or summer before graduation.

COSC 443 Industrial Capstone
Credits 4.4 Lecture Hours.
A senior capstone course for students preparing to enter the industrial construction sector; project management of industrial construction projects including: project acquisition, planning and staffing, engineering, procurement, construction, start-up, close out, operations and maintenance, and turn-arounds.
Prerequisites: COSC 475; must be taken last full semester or summer before graduation.

COSC 446 Advanced Topics in Construction Law
Credits 3.3 Lecture Hours.
Introduction to basic contract and tort issues and their application in the construction industry; delineation of the various types of contracts and remedies available to parties involved in a construction project; additional related topics including bidding, delays, mechanics liens, site conditions, warranties and the Uniform Commercial Code as it relates to the construction industry, introduction to legal research and reasoning as used by professional constructors.
Prerequisite: Admission to upper level in Construction Science.

COSC 459 Industrial Construction
Credits 3.3 Lecture Hours.
Industry specific knowledge such as concepts of developing construction management strategies of industrial projects, materials and methods, structural and mechanical components; preparation to effectively resolve challenges faced in the industrial construction sector.
Prerequisites: Admission to upper level in construction science; COSC 375.

COSC 461 Building Information Modeling System
Credits 3.3 Lecture Hours.
Exploration of a data-rich, object-oriented, and parametric digital representation of the facility, from which views and information can be extracted and analyzed for construction project acquisition, planning, and control.
Prerequisite: Admission to upper level in Construction Science.

COSC 463 Introduction to Construction Law
Credits 3.3 Lecture Hours.
Introduction to basic contract and tort issues and their application in the construction industry; delineation of the various types of contracts and remedies available to parties involved in a construction project; additional related topics including bidding, delays, mechanics liens, site conditions, warranties and the Uniform Commercial Code as it relates to the construction industry, introduction to legal research and reasoning as used by professional constructors.
Prerequisite: Admission to upper level in Construction Science.

COSC 464 Construction Safety II
Credits 3.3 Lecture Hours.
Administration and application of the Occupational Safety and Health Administration Act in the construction industry; includes: OSHA standards, the general duty clause, competent person, and hazard identification; fulfills the requirements for the thirty-hour OSHA, CPR and First Aid certifications.
Prerequisite: Admission to upper-level in Construction Science.

COSC 465 Industrial Construction
Credits 3.3 Lecture Hours.
Industry specific knowledge such as concepts of developing construction management strategies of industrial projects, materials and methods, structural and mechanical components; preparation to effectively resolve challenges faced in the industrial construction sector.
Prerequisites: Admission to upper level in construction science; COSC 375.

COSC 466 Risk Management in the Built Environment
Credits 3.3 Lecture Hours.
Decision-making and risk analysis concepts in the context of the built environment and construction projects; major categories and tools of risk management regularly used in the construction industry such as contracts, insurance and bonds.
Prerequisites: Admission to upper level in construction science and COSC 463 or concurrent enrollment.

COSC 474 Facility Management Summer Internship
Credits 3.3 Lecture Hours.
Summer internship (10 weeks, 400 hours) in a facility management related position that exposes the student to facility management activities; daily logs, monthly reports, final report and completion letter required; distance education off-campus course. May not be enrolled in any other TAMU course while enrolled in COSC 474.
Prerequisites: COSC 450; approval of internship faculty coordinator.
COSC 475 Construction Project Planning
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Development of parameter cost estimates for activities that relate to the construction of a building project; work packages sequenced, planned and leveled to develop a working project execution document; development of procedures to monitor actual field progress.
Prerequisite: COSC 353, COSC 375.

COSC 477 Construction Project Controls
Credits 3. 3 Lecture Hours.
Introduction to construction related financial documents including; schedule of values, labor and operations cost reports, income statements, balance sheets and construction budgets; emphasis on the development of techniques required to effectively monitor the financial aspects of a construction project.
Prerequisite: COSC 353.

COSC 481 Seminar
Credit 1. 1 Lecture Hour.
Seminar discussion of construction equipment selection, utilization maintenance and operating cost.
Prerequisite: Must be taken last full semester before graduation.

COSC 483 Construction Industry Contemporary Issues
Credit 1. 1 Lecture Hour.
Introduces graduating seniors to contemporary issues in the construction industry.
Prerequisite: Must be taken last full semester before graduation.

COSC 484 Summer Internship
Credits 3. 3 Other Hours.
Summer internship (10 weeks, 400 hours) with a construction or construction-related company that exposes the student to construction-related activities; daily logs, monthly reports, final report and completion letter required; distance education course with non-resident status. No other TAMU courses may be taken while enrolled in COSC 484.
Prerequisites: COSC 364 and COSC 381; approval of internship faculty coordinator.

COSC 485 Directed Studies
Credits 1 to 5. 1 to 5 Other Hours.
Special problems in building construction.
Prerequisite: Admission to upper-level in Construction Science.

COSC 489 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Selected topics in an identified field of construction science. May be repeated for credit.
Prerequisite: Admission to upper-level in Construction Science.

COSC 491 Research
Credits 1 to 4. 1 to 4 Other Hours.
Research conducted under the direction of faculty member in construction science. May be repeated 2 times for credit. Registration in multiple sections of this course is possible within a given semester provided that the per semester credit hour limit is not exceeded.
Prerequisites: Admission to upper level in Construction Science and approval of instructor.

COSC 494 Internship
Credits 7. 7 Other Hours.
An internship (15 weeks, 600 hours) with a construction or construction-related company that exposes the student to construction-related activities, daily logs, monthly reports, final report and completion letter required; distance education course with non-resident status. No other TAMU courses may be taken while enrolled in COSC 494.
Prerequisites: COSC 364 and COSC 381; approval of internship faculty coordinator.

CPSY - Counseling Psychology (CPSY)

CSCE - Computer Sci & Engr (CSCE)

CSCE 110 Programming I
Credits 4. 3 Lecture Hours. 2 Lab Hours.
Basic concepts in using computation to enhance problem solving abilities; understanding how people communicate with computers, and how computing affects society; computational thinking; representation of data; analysis of program behavior; methods for identifying and fixing errors in programs; understanding abilities and limitations of programs; development and execution of programs.

CSCE 111 Introduction to Computer Science Concepts and Programming
Credits 4. 3 Lecture Hours. 2 Lab Hours.
Computation to enhance problem solving abilities; understanding how people communicate with computers, and how computing affects society; computational thinking; design and implementation of algorithms; data structures and object-oriented programming; software development strategies; error handling and exceptions; testing and debugging; type safety; strings; templates and the STL; graphics and GUIs; mathematical computation; and principles of object-oriented programming.
Prerequisites: Knowledge of C++ programming, class design, portable graphics, and parameterized types and their implementations.

CSCE 113 Intermediate Programming and Design
Credits 2. 1 Lecture Hour. 3 Lab Hours.
Continuation of ENGR 112; programming and design with C++; topics include design and implementation of functions, classes, and class hierarchies; software development strategies; error handling and exceptions; testing and debugging; type safety; strings; templates and the STL; graphics and GUIs; mathematical computation; and principles of object-oriented programming.
Prerequisites: Knowledge of C++ programming, class design, portable graphics, and parameterized types and their implementations.

CSCE 121 Introduction to Program Design and Concepts
Credits 4. 3 Lecture Hours. 2 Lab Hours.
Computation to enhance problem solving abilities; computational thinking; understanding how people communicate with computers, how computing affects society; design and implementation of algorithms; data types, program control, iteration, functions, classes, and exceptions; understanding abstraction, modularity, code reuse, debugging, maintenance, and other aspects of software development; development and execution of programs.
Prerequisite: Programming course (high school or college).
CSCE 181 Introduction to Computing
Credit 1. 1 Lecture Hour.
Introduction to the broad field of computing; presentations from industry and academia about how computer science concepts are used in research and end products; includes a major writing component.

CSCE 206 Structured Programming in C
Credits 4. 3 Lecture Hours. 2 Lab Hours.
(BCIS 1420, COSC 1420) Structured Programming in C. Basic concepts, nomenclature and historical perspective of computers and computing; internal representation of data; software design principles and practice; structured and object-oriented programming in C; use of terminals, operation of editors and executions of student-written programs.

CSCE 221 Data Structures and Algorithms
Credits 4. 3 Lecture Hours. 2 Lab Hours.
Specification and implementation of basic abstract data types and their associated algorithms: stacks, queues, lists, sorting and selection, searching, graphs, and hashing; performance tradeoffs of different implementations and asymptotic analysis of running time and memory usage; includes the execution of student programs written in C++.
Prerequisite: CSCE 113 or CSCE 121.
Corequisite: CSCE 222/ECEN 222.

CSCE 222/ECEN 222 Discrete Structures for Computing
Credits 3. 3 Lecture Hours.
Provide mathematical foundations from discrete mathematics for analyzing computer algorithms, for both correctness and performance; introduction to models of computation, including finite state machines and Turing machines.
Prerequisite: MATH 151.
Cross Listing: ECEN 222/CSCE 222.

CSCE 285 Directed Studies
Credits 1 to 4. 1 to 4 Lecture Hours.
Special project in computer science. Project must be approved by the department.
Prerequisite: Approval of department head.

CSCE 289 Special Topics in...
Credit 1. 1 Lecture Hour.
Selected topics in an identified area of computer science. May be repeated for credit.
Prerequisite: Approval of instructor.

CSCE 291 Research
Credits 1 to 4. 1 to 4 Lecture Hours.
Research conducted under the direction of faculty member in computer science. May be repeated 2 times for credit.
Prerequisites: Freshman or sophomore classification and approval of instructor.

CSCE 310 Database Systems
Credits 3. 3 Lecture Hours.
File structures and access methods; database modeling, design and user interface; components of database management systems; information storage and retrieval, query languages, high-level language interface with database systems.
Prerequisites: CSCE 221 with a grade of C or better; junior or senior classification.

CSCE 312 Computer Organization
Credits 4. 3 Lecture Hours. 2 Lab Hours.
Introduction to computer systems from programmer's perspective: simple logic design, data representation and processor architecture, programming of processors, memory, control flow, input/output, and performance measurements; hands-on lab assignments.
Prerequisites: CSCE 221 with a grade of C or better; junior or senior classification or approval of instructor.

CSCE 313 Introduction to Computer Systems
Credits 4. 3 Lecture Hours. 2 Lab Hours.
Introduction to system support for application programs, both on single node and over network: OS application interface, inter-process communication, introduction to system and network programming, and simple computer security concepts; hands-on lab assignments.
Prerequisite: CSCE 221 with a grade of C or better; CSCE 312 or corequisite CSCE 350/ECEN 350.

CSCE 314 Programming Languages
Credits 3. 3 Lecture Hours.
Explores the design space of programming languages via an in-depth study of two programming languages, one subject-oriented (Java), one functional (Haskell); focuses on idiomatic uses of each language, and on features characteristic for each language.
Prerequisites: CSCE 221 with grade of C or better; CSCE 312 or CSCE 350/ECEN 350.

CSCE 315 Programming Studio
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Intensive programming experience that integrates core concepts in Computer Science and familiarizes with a variety of programming/development tools and techniques; students work on 2 or 3 month-long projects each emphasizing a different specialization within Computer Science; focuses on programming techniques to ease code integration, reusability, and clarity.
Prerequisites: CSCE 312 and CSCE 314; or CSCE 350/ECEN 350.
Corequisite: CSCE 313.

CSCE 350/ECEN 350 Computer Architecture and Design
Credits 4. 3 Lecture Hours. 3 Lab Hours.
Computer architecture and design; use of register transfer languages and simulation tools to describe and simulate computer operations; central processing unit organization; microprogramming; input/output and memory system architectures.
Prerequisites: ECEN 248 with a grade of C or better; junior or senior classification.
Cross Listing: ECEN 350/CSCE 350.

CSCE 410 Operating Systems
Credits 3. 3 Lecture Hours.
Hardware/software evolution leading to contemporary operating systems; basic operating systems concepts; methods of operating systems design and construction: algorithms for CPU scheduling, memory and general resource allocation, process coordination and management; case studies of several operating systems.
Prerequisites: CSCE 313 and CSCE 315.

CSCE 411 Design and Analysis of Algorithms
Credits 3. 3 Lecture Hours.
Study of computer algorithms for numeric and non-numeric problems; design paradigms; analysis of time and space requirements of algorithms; correctness of algorithms; NP-completeness and undecidability of problems.
Prerequisite: Grade of C or better in CSCE 221 and CSCE 222/ECEN 222; junior or senior classification or approval of instructor.
CSCE 420 Artificial Intelligence
Credits 3.3 Lecture Hours.
Fundamental concepts and techniques of intelligent systems; representation and interpretation of knowledge on a computer; search strategies and control; active research areas and applications such as notational systems, natural language understanding, vision systems, planning algorithms, intelligent agents and expert systems.
Prerequisite: CSCE 315 or approval of instructor.

CSCE 431 Software Engineering
Credits 3.2 Lecture Hours. 2 Lab Hours.
Application of engineering approach to computer software design and development; life cycle models, software requirements and specification; conceptual model design; detailed design; validation and verification; design quality assurance; software design/development environments and project management.
Prerequisite: CSCE 315 or approval of instructor.

CSCE 433 Formal Languages and Automata
Credits 3.3 Lecture Hours.
Basic types of abstract languages and their acceptors; the Chomsky hierarchy; solvability and recursive function theory; application of theoretical results to practical problems.
Prerequisite: CSCE 315 or approval of instructor.

CSCE 434 Compiler Design
Credits 3.3 Lecture Hours.
Programming language translation: functions and general organization of compiler design and interpreters; theoretical and implementation aspects of lexical scanners; parsing of context free languages; code generation and optimization; error recovery.
Prerequisite: CSCE 315 or approval of instructor.

CSCE 435 Parallel Computing
Credits 3.3 Lecture Hours.
Overview of parallel computing technology and programming methods; includes multiprocessor architectures, programming tools, parallel performance, parallel algorithms, and applications of parallel computing.
Prerequisites: CSCE 315 and junior or senior classification or approval of instructor.

CSCE 436 Computer-Human Interaction
Credits 3.3 Lecture Hours.
Comprehensive study of the Computer-Human Interaction (CHI) area; includes history and importance of CHI; CHI design theories; modeling of computer users and interfaces; empirical techniques for task analysis and interface design; styles of interaction and future directions of CHI including hypermedia and computer-supported collaborative work.
Prerequisite: CSCE 315 or approval of instructor.

CSCE 438 Distributed Objects Programming
Credits 3.3 Lecture Hours.
Principles of distributed computing and programming with current paradigms, protocols, and application programming interfaces including Sockets, RMI, CORBA, IDL, Servlets, Web Services; security issues with public/private keys, digital signatures, forms and GUI based applications with multi-tier components, database connectivity and storing/streaming data structured using XML.
Prerequisite: CSCE 315 or approval of instructor.

CSCE 440 Quantum Algorithms
Credits 3.3 Lecture Hours.
Introduction to the design and analysis of quantum algorithms; basic principles of the quantum circuit model; gives a gentle introduction to basic quantum algorithms; reviews recent results in quantum information processing.
Prerequisite: CSCE 315 or approval of instructor.

CSCE 441 Computer Graphics
Credits 3.3 Lecture Hours.
Principles of interactive computer graphics; 2-D and 3-D rendering pipelines, including geometric object and view transformations, projections, hidden surface removal, and rasterization; lighting models for local and global illumination; hierarchical models of 3-D objects; systems and libraries supporting display and user interaction.
Prerequisite: CSCE 315 or approval of instructor.

CSCE 442 Scientific Programming
Credits 3.3 Lecture Hours.
Introduction to numerical algorithms fundamental to scientific and engineering applications of computers; elementary discussion of error; algorithms, efficiency; polynomial approximations, quadrature and systems of algebraic and differential equations.
Prerequisites: CSCE 221 with a grade of C or better; MATH 304 or MATH 308 or concurrent enrollment.

CSCE 443/VIST 487 Game Development
Credits 3.2 Lecture Hours. 2 Lab Hours.
Aesthetic and technical aspects of computer game development, including game mechanics, story development, content creation and gameplay programming; includes game design, interface design, 3D modeling and animation, graphics algorithms, shader programming and artificial intelligence; group project includes the design and development of a game from start to finish.
Prerequisites: CSCE 441 or VIST 486 or approval of instructor.
Cross Listing: VIST 487.

CSCE 444 Structures of Interactive Information
Credits 3.3 Lecture Hours.
A systems approach to the programming, design, authoring and theory of hypermedia; object-oriented visual and interactive programming; visual design, including color, space, text and layering; the reference as a metadisciplinary structure; collecting and sampling; ontologies, maps and navigation as means of structuring information; create dynamic hypermedia that is expressive and interpretive.
Prerequisite: CSCE 315 or approval of instructor.

CSCE 445 Computers and New Media
Credits 3.3 Lecture Hours.
Potential and realized impact of computers in the design of new media; relationship between authors and readers of interactive material; influence of media design on the content expressed.
Prerequisite: CSCE 221 or approval of instructor.

CSCE 451 Software Reverse Engineering
Credits 3.2 Lecture Hours. 2 Lab Hours.
Overview of the compilation mechanism to generate executable files and raw binary codes from source codes; executable file formats for an operating system to run the binary code; disassembly algorithms and control graph analysis; static and dynamic analyses; case studies on code obfuscation, codebreaking, malware analysis.
Prerequisite: CSCE 313 or approval of instructor.
CSCE 452 Robotics and Spatial Intelligence
Credits 3. 3 Lecture Hours.
Algorithms for executing spatial tasks; path planning and obstacle aance in two- and three-dimensional robots--configuration space, potential field, free-space decomposition methods; stable grasping and manipulation; dealing with uncertainty; knowledge representation for planning--geometric and symbolic models of the environment; task-level programming; learning.
Prerequisite: CSCE 315 or approval of instructor.

CSCE 456 Real-Time Computing
Credits 4. 3 Lecture Hours. 3 Lab Hours.
Introduction to principles and applications of real-time computing; system architecture; D/A and A/D conversion; synchronous data acquisition and analysis; computers in real-time control; asynchronous monitoring and control; resource scheduling; interfacing issues; lectures and laboratory.
Prerequisites: CSCE 313 and MATH 152.

CSCE 462 Microcomputer Systems
Credits 3. 2 Lecture Hours. 1 Lab Hour.
Microcomputers as components of systems; VLSI processor and coprocessor architectures, addressing and instruction sets; I/O interfaces and supervisory control; VLSI architectures for signal processing; integrating special purpose processors into a system.
Prerequisite: CSCE 313.

CSCE 463 Networks and Distributed Processing
Credits 3. 3 Lecture Hours.
Basic hardware/software, architectural components for computer communications; computer networks, switching, routing, protocols and security; multiprocessing and distributed processing; interfacing operating systems and networks; case studies of existing networks and network architectures.
Prerequisite: CSCE 315 or approval of instructor.

CSCE 464 Wireless and Mobile Systems
Credits 3. 3 Lecture Hours.
Introduction to wireless and mobile systems; wireless communication fundamentals; wireless medium access control design; transmission scheduling, network and transport protocols over wireless design; simulation and evaluation; wireless capacity; telecommunication systems; vehicular, adhoc, and sensor network systems; wireless security; mobile applications.
Prerequisites: CSCE 313; junior or senior classification or approval of instructor.

CSCE 465 Computer and Network Security
Credits 3. 3 Lecture Hours.
Fundamental concepts and principles of computer security, operating system and network security, secret key and public key cryptographic algorithms, hash functions, authentication, firewalls and intrusion detection systems, IPSec and VPN, wireless and web security.
Prerequisites: CSCE 313 and CSCE 315; junior or senior classification; or approval of instructor.

CSCE 469 Advanced Computer Architecture
Credits 3. 3 Lecture Hours.
Introduction to advanced computer architectures including memory designs, pipeline techniques, and parallel structures such as vector computers and multiprocessors.
Prerequisite: ECEN 350/CSCE 350.

CSCE 470 Information Storage and Retrieval
Credits 3. 3 Lecture Hours.
Representation of, storage of and access to very large multimedia document collections; fundamental data structures and algorithms of current information storage and retrieval systems and relates various techniques to design and evaluation of complete retrieval systems.
Prerequisite: CSCE 315 or approval of instructor.

CSCE 481 Seminar
Credit 1. 2 Lab Hours.
Investigation and report by students on topics of current interest in computer science.
Prerequisite: Junior or senior classification.

CSCE 482 Senior Capstone Design
Credits 3. 1 Lecture Hour. 6 Lab Hours.
Project-based course to develop system integration skills for solving real-world problems in computer science; significant team software project that integrates advanced concepts across computer science specialization; projects require design, implementation, documentation and demonstration, as well as design methodology, management process and teamwork.
Prerequisites: Senior classification; CSCE 315, CSCE 411, and two additional CSCE tracked courses.

CSCE 483 Computer Systems Design
Credits 3. 1 Lecture Hour. 6 Lab Hours.
Engineering design; working as a design-team member, conceptual design methodology, design evaluations, total project planning and management techniques, design optimization, systems manufacturing costs considerations; emphasis placed upon students' activities as design professionals.
Prerequisites: CSCE 315 and CSCE 462; senior classification.

CSCE 485 Directed Studies
Credits 1 to 6. 1 to 6 Other Hours.
Permits work on special project in computer science. Project must be approved by the department.
Prerequisite: Senior classification.

CSCE 489 Special Topics in...
Credits 1 to 4. 0 to 4 Lecture Hours. 0 to 4 Lab Hours.
Special topics in computer science that are new or unique that are not covered in existing courses.

CSCE 491 Research
Credits 1 to 4. 1 to 4 Other Hours.
Research conducted under the direction of faculty member in the computer science. May be repeated 2 times for credit. Registration in multiple sections of this course is possible within a given semester provided that the per semester credit hour limit is not exceeded.
Prerequisites: Junior or senior classification and approval of instructor.

CVEN - Civil Engineering (CVEN)

CVEN 207 Introduction to the Civil Engineering Profession
Credit 1. 1 Lecture Hour.
Introduction to the study and practice of civil engineering; specialized subdisciplines of civil engineering; professionalism and professional registration; engineering ethics; exercises in engineering technical communications.
Prerequisite: ENGL 104.
CVEN 221 Engineering Mechanics: Statics  
Credits 3. 2 Lecture Hours. 2 Lab Hours.  
General principles of mechanics; concurrent force systems; statics of particles; equivalent force/moment systems; centroids and center of gravity; equilibrium of rigid bodies; trusses, frames, and machines; internal forces in structural members; friction; second moments of areas.  
Prerequisites: MATH 251 or MATH 253 or registration therein; PHYS 218; admitted to major degree sequence in civil engineering.  

CVEN 250 Introduction to Graphics and Visualization Applications in Civil Engineering Design  
Credits 2. 1 Lecture Hour. 3 Lab Hours.  
Graphical communication in the civil engineering design process; introduction to industry standard software; construction documents and contract drawings in civil engineering applications; data analysis; introduction to project visualization.  

CVEN 289 Special Topics in...  
Credits 1 to 4. 1 to 4 Lecture Hours. 0 to 4 Lab Hours.  
Selected topics in an identified area of civil engineering. May be repeated for credit.  
Prerequisite: Approval of department head.  

CVEN 301 Environmental Engineering  
Credits 3. 3 Lecture Hours.  
Water quality; material balances; chemical, physical and biological processes; water quality modeling; water and wastewater treatment; air quality; solid and hazardous waste management.  
Prerequisites: CHEM 107; CVEN 302 or registration therein; MATH 308 or registration therein.  

CVEN 302 Computer Applications in Engineering and Construction  
Credits 3. 2 Lecture Hours. 3 Lab Hours.  
Application of computers to solution of civil engineering problems using various numerical methods; structured computer programming; mathematical modeling and error analysis; solution of algebraic and differential equations; numerical differentiation and integration; curve-fitting; root-finding.  
Prerequisites: ENGR 112; MATH 308 or registration therein; admitted to major degree sequence in civil engineering.  

CVEN 303 Civil Engineering Measurement  
Credits 3. 2 Lecture Hours. 3 Lab Hours.  
Introduction to geodetic positions, datums, map projections; theory of civil engineering measurements and errors applied to horizontal and vertical control, curves, earthwork and mapping using state-of-the-art technology for data capture; processing and presentation of result.  
Prerequisite: MATH 151; admitted to major degree sequence in civil engineering.  

CVEN 305 Mechanics of Materials  
Credits 3. 3 Lecture Hours.  
Applications of conservation principles and stress/deformation relationships for continuous media to structural members; axially loaded members; thin-walled pressure vessels; torsional and flexural members; shear; moment; deflection of members; combined loadings; stability of columns; nonsymmetrical bending, shear center; indeterminate members; elastic foundations.  
Prerequisite: CVEN 221.  

CVEN 306 Materials Engineering for Civil Engineers  
Credits 3. 2 Lecture Hours. 2 Lab Hours.  
Introduction to scientific concepts of civil engineering materials; relationship between macroscopic material properties and response and microscopic properties; physical, mechanical, surface, fracture, and rheological properties of civil engineering materials including metals, composites, and polymers.  
Prerequisites: CHEM 107, PHYS 208, CVEN 221; MATH 308 or registration therein; CVEN 305 or registration therein.  

CVEN 307 Transportation Engineering  
Credits 3. 3 Lecture Hours.  
Fundamental principles and methods in planning, design, and operation of transportation systems; driver and vehicle performance capabilities; highway geometric and pavement design principles; traffic analysis and transportation planning.  
Prerequisite: CVEN 302 or registration therein.  

CVEN 311 Fluid Dynamics  
Credits 3. 3 Lecture Hours.  
Fluid properties; statics; kinematics; basic conservation principles of continuity, energy, and momentum; similarity and hydraulic models; incompressible flow in pipes; fluid dynamic drag.  
Prerequisites: MATH 251 and CVEN 221; CVEN 302 or registration therein.  

CVEN 315 Sensor Technology for the Built Environment  
Credits 3. 2 Lecture Hours. 3 Lab Hours.  
Fundamentals of sensor technology including laboratory safety, error analysis, statistical analysis, electric circuits, data acquisition, signal conditioning, signal analysis, strain gages, laser technology, image acquisition and analysis, fiber optic sensors, wireless sensors; its applications in civil engineering; and hands-on demonstrations relevant to the natural and built environment.  
Prerequisites: CVEN 302, junior or senior classification, or approval of instructor.  

CVEN 322 Civil Engineering Systems  
Credits 3. 3 Lecture Hours.  
Economic analysis and evaluation of engineering projects; application of systems analysis to civil engineering design; systems synthesis and optimization techniques; assignments apply engineering economics, statistical methods and optimization techniques to civil engineering problems.  
Prerequisite: STAT 211 or registration therein; CVEN 302 or registration therein; admitted to major degree sequence in civil engineering.  

CVEN 336 Fluid Dynamics Laboratory  
Credit 1. 2 Lab Hours.  
Introduction to laboratory techniques; calibration principles, reports and fluid measurements; determination of fluid properties; visualization of types of flow; experiments in closed conduit flow of air, water and oil; fluid drag and turbomachinery tests; open channel and gravity wave demonstrations.  
Prerequisites: CVEN 311 or registration therein. Enrollment in MASE major degree sequence. Junior or senior classification or approval of instructor.  

CVEN 339 Water Resources Engineering  
Credits 3. 3 Lecture Hours.  
Quantitative hydrology, precipitation, hydrograph analysis, reservoir and stream routing; groundwater, Darcy equation, well equation, well design; probability concepts in design; water law; dams; reservoirs; spillways; open channel and pipe network hydraulics; pumps; urban stormwater drainage; flood damage mitigation.  
Prerequisite: CVEN 311.
CVEN 342 Materials of Construction  
Credits 3.2 Lecture Hours. 3 Lab Hours.  
Physical and mechanical properties of construction materials; Portland cement concrete, bituminous materials, wood, ferrous and non-ferrous metals, glass, plastics and masonry units; proportioning of concrete mixtures including admixtures.  
**Prerequisites:** CVEN 302 or registration therein; CVEN 305 and CVEN 306; ENGL 203, ENGL 210, ENGL 241 or ENGL 301.  

CVEN 343 Portland Cement Concrete Materials for Civil Engineers  
Credits 3.2 Lecture Hours. 3 Lab Hours.  
Physical and chemical characteristics of Portland cement concrete systems; constituent materials; mixture proportioning; fresh concrete characteristics; hardened concrete properties; durability characteristics; and concrete construction methods.  
**Prerequisites:** CVEN 302 or registration therein; CVEN 305 and CVEN 306; ENGL 203, ENGL 210, ENGL 241 or ENGL 301.  

CVEN 345 Theory of Structures  
Credits 3.3 Lecture Hours.  
Structural engineering--functions of structure, design loads, reactions and force systems; analysis of statically determinate structures including beams, trusses and arches; energy methods of determining deflections of structures; influence lines and criteria for moving loads; analysis of statically indeterminate structures including continuous beams and frames.  
**Prerequisites:** CVEN 302 or registration therein; CVEN 305.  

CVEN 349 Civil Engineering Project Management  
Credits 3.3 Lecture Hours.  
Basic elements of management of civil engineering projects; roles of all participants in the process—owners, designers, contractors and suppliers; emphasis on contractual aspect of the process—project estimating, planning and controls.  
**Prerequisite:** CVEN 302 or registration therein; CVEN 322 or CVEN 422.  

CVEN 363 Engineering Mechanics: Dynamics  
Credits 3.2 Lecture Hours. 2 Lab Hours.  
Application of first principles to model dynamic particles and rigid body systems with ordinary differential equations; solutions to models using analytical and numerical approaches; interpreting solutions/performance measures; linear vibrations; modeling of civil engineering systems and evaluating dynamic response to natural hazards.  
**Prerequisites:** CVEN 302, CVEN 305 and MATH 308.  

CVEN 365 Introduction to Geotechnical Engineering  
Credits 3.2 Lecture Hours. 3 Lab Hours.  
Physical properties of soils, classification systems, soil exploration, permeability, consolidation, compaction, and shear strength; laboratory tests conducted to determine the physical and engineering soil properties needed for application in geotechnical engineering design.  
**Prerequisites:** CVEN 302 or registration therein; CVEN 305; ENGL 203, ENGL 210, ENGL 241 or ENGL 301.  

CVEN 399 Mid-Curriculum Professional Development  
Credits 0.0 Lecture Hours. 0 Lab Hours. 0 Other Hours.  
No Credit. Participation in an approved high-impact learning practice; reflection on professional outcomes from civil engineering body of knowledge; documentation of experience appropriate to eventual professional licensure; self-assessment of learning at mid-curriculum point.  
**Prerequisites:** CVEN 207, CVEN 250, CVEN 303, CVEN 306, CVEN 311, CVEN 322, CVEN 345 and CVEN 363.  

CVEN 400 Design Problems in Civil Engineering  
Credits 3.2 Lecture Hours. 3 Lab Hours.  
Applications of civil engineering principles to the design and preparation of the plans and specifications of civil engineering projects.  
**Prerequisites:** CVEN 303, CVEN 322, CVEN 345 and CVEN 399; senior classification; or approval of instructor.  

CVEN 402 Engineered Environmental Systems  
Credits 3.3 Lecture Hours.  
Unit operations and processes in environmental engineering; physical, chemical and biological treatment of water and wastewater; treatment system analysis and design.  
**Prerequisite:** CVEN 301.  

CVEN 403 Applied Civil Engineering Surveying  
Credits 2.6 Lab Hours.  
Application of land surveying principles; topographic surveying, boundary surveying, and construction staking through field exercises using state-of-the-art equipment and data capture/analysis techniques; preparation of topographic and boundary maps with related documents; presentation of results.  
**Prerequisites:** CVEN 303; junior or senior classification.  

CVEN 405 Construction Management of Field Operations  
Credits 3.3 Lecture Hours.  
Effects of industrialization on construction methods and resultant construction management problems.  
**Prerequisite:** CVEN 349.  

CVEN 406 Environmental Protection and Public Health  
Credits 3.3 Lecture Hours.  
Communicable and noncommunicable diseases; environmental risk assessment; environmental assessments; comprehensive environmental planning; small water and wastewater systems; solid waste management; hazardous spills and waste management; vector control; environmental administration.  
**Prerequisite:** CVEN 301 or approval of instructor.  

CVEN 413 Natural Environmental Systems  
Credits 3.3 Lecture Hours.  
Water quality assessment of natural environmental systems; development and calibration of models to describe fate and transport of contaminants in aquatic systems; application of models to design of water quality control facilities.  
**Prerequisite:** CVEN 301.  

CVEN 417 Bituminous Materials  
Credits 3.2 Lecture Hours. 3 Lab Hours.  
Origin, production, specifications and tests of bituminous materials and paving mixtures used in construction and maintenance of roads and pavements, pavement surface properties, pavement distress and correction alternatives.  
**Prerequisites:** Senior classification in engineering; CVEN 342 or CVEN 343 or approval of instructor.  

CVEN 418 Highway Materials and Pavement Design  
Credits 3.3 Lecture Hours.  
Theory and practice in pavement design; pavement performance; structural design of pavement layers; types of materials used in pavement layers; characterization of pavement layer materials; introduction to pavement management concepts.  
**Prerequisites:** CVEN 307, CVEN 342 or CVEN 343.
CVEN 423 Geomatics for Civil Engineering
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Use of GIS, GPS, Survey and Remotely-sensed data integrated with predictive models for infrastructure management systems.
Prerequisite: CVEN 303 or approval of instructor.

CVEN 424 Civil Engineering Professional Practice
Credits 2. 1 Lecture Hour. 2 Lab Hours.
Professional practice issues; current civil engineering issues that impact design, construction, and operation of the civil engineer facilities; developing engineering solutions that better serve society; business and public policy concerns; life-long learning; problem solving; professional licensure.
Prerequisites: CVEN 322 and CVEN 399; senior classification in civil engineering.

CVEN 435 Geotechnical Engineering Design
Credits 3. 2 Lecture Hours. 3 Lab Hours.
A design course covering prediction of settlement, analysis of the stability of slopes, prediction of bearing capacity of shallow and deep foundations and determination of earth pressures acting on retaining structures; a general course in geotechnical engineering design for undergraduates and for graduate students not primarily interested in the geotechnical field, but desiring additional study beyond the introductory undergraduate level.
Prerequisite: CVEN 365.

CVEN 436 Case Histories in Geotechnical Engineering
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Examination of geotechnical problems through the use of case studies associated with foundations, waste disposal, slope stability, retaining structures, soil improvement and other civil engineering works.
Prerequisite: CVEN 365.

CVEN 444 Structural Concrete Design
Credits 3. 3 Lecture Hours.
Behavior, design, and detailing of reinforced concrete structural members according to the ACI Building Code Requirements; design for ultimate limit states (flexible, shear, and axial loads) and serviceability requirements (cracking and deflection); applications include continuous beams and moment frames.
Prerequisites: CVEN 345; CVEN 342 or CVEN 343 or registration therein.

CVEN 445 Matrix Methods of Structural Analysis
Credits 3. 3 Lecture Hours.
Analysis of framed structures using linear algebra concepts; matrix algebra and solution of linear algebraic equations; energy principles and virtual work; stiffness; coordinate transformations; use of commercial software for structural analysis.
Prerequisites: CVEN 345 and CVEN 363.

CVEN 446 Structural Steel Design
Credits 3. 3 Lecture Hours.
Design of structural steel elements found in building structures, including tension members, compression members, beams, beam-columns and base plates; design of bolted and welded simple connections; design of bolted eccentric connections; design of bolted and welded partially and fully restrained connections.
Prerequisite: CVEN 345.
CVEN 463 Engineering Hydrology
Credits 3. 3 Lecture Hours.
Occurrence, distribution and properties of natural waters of the earth; measurement and engineering analysis of hydrologic phenomena including precipitation, streamflow and groundwater; hydrologic design of water resources development and management projects.
Prerequisite: CVEN 339.

CVEN 473 Engineering Project Estimating and Planning
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Application of cost estimating and planning techniques for civil engineering projects; introduction to labor, materials and equipment costing; productivity analysis; indirect and general overhead costs; preparation of approximate and definitive estimates; and integration of time/cost relationships through critical path method and resource leveling.
Prerequisites: CVEN 349; senior classification.

CVEN 483 Analysis and Design of Structures
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Overall procedure of analysis and design including functions, loads, layouts of force systems; analysis, specifications, cost comparisons, and maintenance as applied to typical building structures.
Prerequisites: CVEN 365 or concurrent enrollment; CVEN 399, CVEN 444 and CVEN 446; senior classification; or approval of instructor.

CVEN 485 Directed Studies
Credits 1 to 3. 1 to 3 Other Hours.
Research and design problems of limited scope approved on an individual basis intended to promote independent study; results of study presented in writing.
Prerequisite: Approval of department head.

CVEN 489 Special Topics in...
Credits 1 to 4. 0 to 4 Lecture Hours. 0 to 4 Lab Hours.
Selected topics in an identified area of civil engineering. May be repeated for credit.
Prerequisite: Approval of department head.

CVEN 491 Research
Credits 1 to 4. 1 to 4 Other Hours.
Research conducted under the direction of faculty members in civil engineering. May be repeated 2 times for credit.
Prerequisites: Junior or senior classification and approval of instructor.

DASC - Dairy Science (DASC)

DASC 202 Dairying
Credits 3. 2 Lecture Hours. 2 Lab Hours.
(AGRI 1311) Dairying. Survey of dairy industry; dairy breeds, standards for selection and culling, herd replacements, feeding, management, physiology and health maintenance; food value of milk, tests for composition and quality, use and processing of market milk and dairy products.

DASC 312/FSTC 312 Food Chemistry
Credits 3. 3 Lecture Hours.
The fundamental and relevant chemistry and functionality of the major food constituents (water, carbohydrates, lipids, proteins, phytochemical nutraceuticals) and study of food emulsion systems, acids, enzymes, gels, colors, flavors and toxins.
Prerequisite: CHEM 227; CHEM 237 or approval of department head or instructor.
Cross Listing: FSTC 312/DASC 312.

DASC 313/FSTC 313 Food Chemistry Laboratory
Credit 1. 3 Lab Hours.
Laboratory exercises investigating specific molecules, such as food acids, enzymes, pigments and flavors, and chemical interactions in foods, such as oxidation reactions, emulsion systems, and functional properties from a fundamental chemistry rather than an analytical perspective.
Prerequisite: CHEM 227; CHEM 237 or approval of department head or instructor.
Cross Listing: FSTC 313/DASC 313.

DASC 314/FSTC 314 Food Analysis
Credits 3. 1 Lecture Hour. 4 Lab Hours.
Selected standard methods for assay of food components; principles and methodology of both classical and instrumental techniques for food analysis.
Prerequisite: CHEM 238 or CHEM 242.
Cross Listing: FSTC 314/DASC 314.

DASC 326/FSTC 326 Food Bacteriology
Credits 3. 3 Lecture Hours.
Microbiology of human foods and accessory substances; raw and processed foods; physical, chemical and biological phases of spoilage; standard industry techniques of inspection and control.
Prerequisites: BIOL 206 or approval of instructor; junior or senior classification.
Cross Listing: FSTC 326/DASC 326.

DASC 327/FSTC 327 Food Bacteriology Lab
Credit 1. 3 Lab Hours.
Laboratory to accompany DASC 326/FSTC 326.
Cross Listing: FSTC 327/DASC 327.

DASC 400 Animal Science Industry Studies
Credits 1 to 3. 1 to 3 Other Hours.
Organized instruction based on well-planned visits to selected industry operations which produce, process or market animal and dairy products, or produce and market supplies and materials to support animal industries; acquaint students with such operations, to reinforce campus-based instruction and to acquaint prospective employers with Texas A&M students. Field trips will normally be made during holidays or between sessions for which departmental fees may be assessed to cover costs.
Prerequisites: Junior or senior classification; approval of instructor organizing study tour; 2.0 GPR in major and overall.

DASC 418 Feeding and Management of Dairy Cattle
Credits 4. 3 Lecture Hours. 2 Lab Hours.
Dairy farm management; feeding and care of the dairy herd; raising calves for dairy replacements and for beef; developing dairy heifers; care of dry and fresh cows; optimum return rations for milk production; disease control; forage handling and storage; buildings and related topics.
Prerequisites: ANSC 318; DASC 202; DASC 400 also to be taken concurrently or approval of instructor.

DASC 485 Directed Studies
Credits 0 to 4. 0 to 4 Other Hours.
Special problems in dairy production or dairy manufacturing.
Prerequisites: Junior or senior classification; written approval of professor supervising the activity; 2.0 GPR in major and overall.
DCED - Dance Education (DCED)

DCED 160 Ballet I
Credits 2.0 Lecture Hours. 5 Lab Hours.
(DANC 1241) Ballet I. Introduction to ballet technique for dancers; series of barre exercises progressing to center work, explanation of positions of the body and port de bras; understand proper body alignment as it relates to ballet technique; appreciation of ballet as an instrument of expression. May be taken 3 times for credit.
Prerequisites: Dance science majors, dance concentration majors and dance minors; or approval of instructor.

DCED 161 Ballet II
Credits 2.5 Lab Hours.
(DANC 1242) Ballet II. Intermediate study of ballet; historical background and the knowledge and understanding of its cultural heritage; increased level of difficulty in barre, center and across the floor; concentration and continual refinement of body/spatial awareness, musicality, alignment and execution of correct classical technique. May be taken 3 times for credit.
Prerequisite: DCED 160; dance science majors, dance concentration majors and dance minors; or approval of instructor.

DCED 162 Ballet III
Credits 2.5 Lab Hours.
(DANC 2241) Ballet III. Technical study of classical and contemporary ballet; elevated barre work, traditional components including turns, footwork, adagios, advanced center/floor phrases; study of Cecchetti, Vaganova, and collaborative methods; focus on strength, concentration and correct technique on performance combinations. May be taken 3 times for credit.
Prerequisite: DCED 161; dance science majors, dance concentration majors and dance minors; or approval of instructor.

DCED 168 Visual and Performing Arts--Jazz Dance III
Credits 2.4 Lab Hours.
(DANC 2247) Visual and Performing Arts--Jazz Dance III. Advanced study of jazz dance; reviews historical background and cultural heritage including significant jazz artists and their influence on jazz dance and society; increased development of coordination, endurance and flexibility necessary to performing extensive jazz combinations; placement exam required on the second day of class.
Prerequisite: KINE 167 or approval of instructor.

DCED 171 Modern Dance I
Credits 2.0 Lecture Hours. 5 Lab Hours.
(DANC 1245) Modern Dance I. Study and understanding of modern dance concepts; lateral curve, contraction, spiral, high curve, high release, rotation versus parallel, body alignment, moving in and out of the floor, fluidity of phrase work, musicality and kinesthetic awareness. May be taken 3 times for credit.
Prerequisites: Dance science majors, dance concentration majors and dance minors; or approval of instructor.

DCED 172 Modern Dance II
Credits 2.5 Lab Hours.
(DANC 1246) Modern Dance II. Intermediate study of modern dance; reviews, historical background and its development within society; continual study and understanding of modern dance concepts; fall/recovery, contract/release, use of breath and weight, spine work, inversion and spatial awareness. May be taken 3 times for credit.
Prerequisite: DCED 171; dance science majors, dance concentration majors and dance minors; or approval of instructor.

DCED 173 Modern Dance III
Credits 2.5 Lab Hours.
(DANC 2245) Modern Dance III. Physical and artistic exploration of both traditional and contemporary training methods; three dimensional spine work, inversion, floor work and dynamics. May be taken 3 times for credit.
Prerequisite: DCED 172; dance science majors, dance concentration majors and dance minors; or approval of instructor.

DCED 202 Dance Appreciation
Credits 3.3 Lecture Hours.
Survey of dance as a cultural and artistic form in numerous countries; exploration of the development and influence of dance in various cultures; analysis of various genres of artistic dance and their development; discussion of aesthetic principles of dance as an art form and how choreographers are influenced by society to create work.

DCED 203 Dance Production
Credits 3.3 Lecture Hours.
Overview of philosophy, major aspects and common elements in producing dance concerts; lighting, sound, stage design, terminology, costuming, management, production designs, practical experience with on-stage performances.
Prerequisites: Dance science majors, dance concentration majors and dance minors; or approval of instructor.

DCED 301 Dance History
Credits 3.3 Lecture Hours.
Overview of current dance scene, career fields, education; development of theatrical, social, educational dance from lineage based to contemporary cultures; emphasis on dance in America, genres, roots, heritage, pioneers, crusading artists; impacts, influences, growth, development, trends and continual metamorphosis in the art world.
Prerequisite: Approval of instructor.

DCED 302 Dance Appreciation
Credits 2.2 Lecture Hours.
Focuses on health issues common to the dancer such as overtraining, drug use and performance anxiety, anatomy in relation to proper dance technique, misalignments, imbalances and injuries common to the dancer.
Prerequisites: Dance science majors only or approval of instructor; junior or senior classification.

DCED 304 Creative Dance for Children
Credits 3.3 Lecture Hours.
Theory and practice of creative movement classes for children; the development stages and learning outcomes of creative movement; incorporation of creative movement into children's classes; dance elements and benefits of creative movement; lesson plans and student assessment.
Prerequisite: Junior or senior classification or approval of instructor.

DCED 306 Dance Composition I
Credits 2.2 Lecture Hours.
Introduces choreographic devices in solo and duet movement studies; exploration of design principles; creating multiple movement studies using various elements of choreography.
Prerequisites: Dance science majors, dance concentration majors and dance minors; or approval of instructor; junior or senior classification.

DCED 400 Dance Composition II
Credits 2.2 Lecture Hours.
Introduces choreographic devices related to group movement studies; explore and create movement studies as a means of first and second function art, use choreographic tools in the dance making process as it relates to group work.
Prerequisites: DCED 306 or approval of instructor.
DDDS 011 Anterior Composites and Esthetics
Credits 0.
Advanced concepts including diagnosis, preparation and restoration of anterior teeth utilizing composite materials.

DDDS 012 Forensic Dentistry
Credits 0. 1 Lab Hour.
This summer semester course will introduce students to the Science of Forensic Dentistry, providing a broad overview of its scope but emphasizing forensic dental identification of deceased individuals. Identification procedures, particularly as they pertain to mass casualty situations, will be stressed. Twelve hours of hands-on laboratory participation in mock mass casualty exercises will allow students to utilize the knowledge they have gained and sharpen identification skills. This selective does not require clinic, but does require 12 hours of lab. Class time and location to be announced by course director. Class is limited to 35 D4 students only.

DDDS 013 Orthodontic Clinical Selective
Credits 0.
This is a clinical selective course in which D4 students will provide limited (adjunctive) orthodontic treatment to patients as one component of a comprehensive treatment plan. This treatment will be provided in conjunction with a third year orthodontic resident, and under the supervision of an orthodontic department faculty member.

DDDS 014 Advanced Implant Dentistry – Case Analysis and Problem Based Approach
Credits 0.
This course is designed for senior dental students who are interested in gaining advanced knowledge of implant dentistry. This course will give students advanced knowledge of implant supported restorations and their application in clinical dentistry. The course will include the evolution of implant dentistry, an interactive case-based session on treatment planning and case analysis, CAD-CAM technologies in implant dentistry, cone beam tomography, 3D treatment planning systems and digitally guided surgeries. Additionally, it will cover advanced implant treatment options (One on Four, Zygomatic Implants, Bioadaptable Implants…etc). The students will also be exposed to a wide variety of implant systems allowing them the chance to compare the most commonly distributed implant systems and their characteristics and applications. It will also include implants in the esthetic zone, implant complications, prevention and troubleshooting and the future direction of implant dentistry.

DDDS 015 Interdisciplinary C.A.R.E. and Collaboration
Credits 0.
This spring semester course will provide an opportunity for D-3 students to become more proficient at evaluating and integrating emerging trends in clinical care and identifying factors that differentiate one case from another. Clinical examples of interdisciplinary cases will be presented by post-doctoral residents that highlight a specific discipline (including contributions of other disciplines when appropriate). Both conventional and unconventional treatment methods will be presented.

DDDS 016 Advanced Topics in Endodontics
Credits 0. 1 Lab Hour.
This fall semester course provides advanced information and training in current Endodontic topics, including some of the state-of-the-art equipment used by endodontists today. These topics include: discussion of complex diagnostic cases, advanced cleaning and shaping techniques (i.e. new rotary instrumentation systems), advanced obturation techniques (i.e. warm vertical gutta-percha), notions of the utilization of an endodontic surgical microscope, and endodontic retreatment. This selective does not require clinic, but does require 2 hours of lab. Class time and location to be announced by course director. Participation in this selective course is by invitation only.

DDDS 017 Orthodontic Externship
Credits 0. 1 Other Hour.
The seminar portion of the course provides the students with an opportunity to enhance their skills in the diagnosis and recognition of malocclusion and craniofacial anomalies, and the ramifications of these diagnoses in the development of comprehensive treatment plans. Faculty will provide examples of new cutting edge technologies that are rapidly changing the approach to treatment of orthodontic patients. The externship provides an opportunity to discuss management considerations and other issues involved in the operation of a specialty practice. This selective does not require clinic. Class time and location to be announced by course director. Class is limited to 10 D4 students only.

DDDS 018 Fabrication of Complete Dentures Utilizing CAD/CAM Technology
Credits 1. 1 Lab Hour.
The focus of this selective is the fabrication of complete dentures by CAD/ CAM digital technology. In this process, the number of patient visits can be reduced, eliminating some traditional laboratory steps.
DDDS 024 Externship in Pediatric Dentistry
Credits 0.
This summer course introduces the student to the Advanced Education Program in Pediatric Dentistry; the delivery of dental care to medically and mentally compromised children and the delivery of dental care to children under various forms of sedation and general anesthesia. Participation in this selective course is by invitation only. Class is limited to 5 D4 students.

DDDS 025 Dental Ceramics
Credits 0.
This summer semester course introduces theory and fabrication of ceramo-metal and all-ceramic prosthodontic restorations. This selective does not require clinic, but does require 25 hours of lab. Class time and location to be announced by course director. Participation in this selective is by invitation only and restricted to D4 students.

DDDS 034 Dental Implantology
Credits 0. 1 Other Hour.
A clinical (treatment of patient who received dental implants), laboratory, surgical and restorative exercise. Familiarizes students with patient management of dental implants. This selective does require clinic time. Class time and location to be announced by course director. Class is limited to 12 D4 students per semester.

DDDS 042 Athletic Mouthguards
Credits 0. 1 Lab Hour.
Students attend seminars and fabricate athletic mouth guards for a community athletic team. This selective does not require clinic, but does require 15 hours of lab. The spring and summer course will be held on the 3rd and 6th floors. Class time and location to be announced by course director. Class is limited to 25 D3/D4 students only per semester.

DDDS 043 Tutoring Skills Seminar
Credits 0. 1 Lecture Hour.
This fall semester course will train students nominated by course directors to become effective peer tutors by developing skills in instructional technique. Class time and location to be announced by course director. Class is limited to D3/D4 students only.

DDDS 053 Secrets of Practice Success
Credits 0.
This summer/fall/spring course will teach, strengthen and reinforce behavioral skills that help dental teams build powerful interpersonal relationships with their patients, each other, their families and their communities as well as establish a patient-centered, preventively-oriented approach to practicing dentistry. This class is offered to D4 students.

DDDS 092 Craniofacial Research
Credits 0. 1 Other Hour.
This course is for research participants in the Short Term Training Program only. Provides students with an introduction to dental and craniofacial research and instill recognized values of biomedical research ethics.

DDDS 098 Dental Public Health
Credits 0.
This summer selective course offers observation of oral health care services for at least four days in a private dental office. This selective does not require class participation, is by invitation only and is limited to 50 D4 students.

DDDS 099 Public Health Sciences Community Preceptorship Program
Credits 0. 1 Other Hour.
This summer selective course offers observation and/or provision of oral health care services for at least four days in private practice, Indian Health Service, Veterans Administration hospital or other public health settings. This selective does not require clinic time. Class time and location to be announced by course director. Class participation is by invitation only and is limited to 30 D4 students.

DDDS - Dental Hygiene (DDHS)

DDHS 3020 Theory of Dental Hygiene Practice I
Credits 2. 2 Lecture Hours.
Emphasis on advanced dental hygiene skills and services; provision of services to medically compromised patients.

DDHS 3110 Introduction To Dentistry
Credit 1. 1 Lecture Hour.
Introduction to dental hygiene as it relates to the dental specialties. Guest lecturers will describe what their specialty encompasses and the dental hygienist’s role in that field of dentistry.

DDHS 3120 Dental Anatomy
Credits 2. 2 Lecture Hours.
Form and function of the primary and permanent human dentition; laboratory and seminar emphasis on morphology and comparisons of teeth.

DDHS 3160 Preclinical Dental Hygiene
Credits 6. 4 Lecture Hours. 0.5 Lab Hours. 8 Other Hours.
(4-.5-8). This course introduces the student to the foundational knowledge and skills needed to provide basic dental hygiene services. With faculty guidance, the student learns how to assess a patient’s oral health needs, plan dental hygiene services to meet those needs, and implement and evaluate newly learned preventive and therapeutic procedures.

DDHS 3220 Oral Radiology
Credits 0 to 2. 2 Lecture Hours. 1 Lab Hour. 1 Other Hour.
(2-1-1). This course is intended to provide the student with an understanding of the generation, properties, and techniques for use of X-rays in dentistry. The principles of radiation safety and health physics, interpretative recognition techniques and clinical patient management.

DDHS 3250 Biomedical Sciences I
Credits 5. 5 Lecture Hours. 0 Lab Hours.
Structure of the human body, including its anatomy, biochemistry, histology and physiology. Emphasis is placed on the structures of the head and neck region that surrounds the oral cavity.

DDHS 3310 Health Education and Behavioral Science
Credit 1. 1 Lecture Hour.
This course is designed to introduce the student to health education and behavioral science as it relates to educating patients and changing behaviors. Students will gain knowledge in evaluating and delivering educational services to culturally diverse populations.

DDHS 3325 Microbiology
Credits 2.5. 2.5 Lecture Hours. 0 Lab Hours.
A lecture course designed to teach the basic principles of medical microbiology, immunology and the infectious disease process.
DDHS 3340 Biomedical Sciences II  
Credits 4. 4 Lecture Hours. 0 Lab Hours.  
Structure of the human body, including its anatomy, bio-chemistry, histology and physiology. Emphasis is placed on the structures of the head and neck region that surrounds the oral cavity.

DDHS 3410 Introduction to Pathology  
Credit 1. 1 Lecture Hour.  
Introduction to Pathology is primarily a didactic lecture oriented course. Although clinically oriented, it is designed to provide a base of knowledge about pathologic processes and specific disease entities. Emphasis is on concepts and vocabulary essential to understanding basic pathologic process; systemic pathology of organ systems and tissues; clinical manifestations that result from biological cellular alterations.

DDHS 3425 Health Promotion and Disease Prevention  
Credits 2.5. 2.5 Lecture Hours.  
This course introduces the student to the etiology and prevalence of oral diseases and oral problems. The emphasis of the course is on the role of the dental hygienist in the promotion of optimal oral health, the prevention of oral diseases, and the importance of achieving and maintaining excellent personal oral health habits. The importance of and the techniques for educating the patient in self-care skills will also be examined.

DDHS 3530 Applied Dental Materials  
Credits 3. 2 Lecture Hours. 2.5 Lab Hours.  
Didactic, laboratory and clinical instruction in the principles of the science of dental materials and in procedures within the scope of dental hygiene practice.

DDHS 3830 Clinical Dental Hygiene I  
Credits 3. 9 Other Hours.  
Comprehensive dental hygiene care through clinical application of procedures. Includes intramural dental hygiene and dental school rotations.

DDHS 4010 National Board Review  
Credit 1. 1 Lecture Hour.  
Reviews applications of previous course content using a seminar format in preparation for the National Board Dental Hygiene Exam.

DDHS 4015 Pharmacology  
Credit 1.5. 1.5 Lecture Hour.  
Actions, indications and contraindications of drugs; emphasis on drugs frequently encountered in dentistry.

DDHS 4025 Oral Pathology  
Credits 2.5. 2.5 Lecture Hours.  
A didactic lecture oriented course. The lecture portion of the course, although clinically oriented is designed to provide a base of knowledge about pathologic processes and specific disease entities. Diseases unique to the oral regions as well as oral manifestations of systemic disease will be covered. The Clinical Pathologic Conference (CPC) attempts to assimilate that information and apply it to relevant clinical situations in a case-based PDL format. Cases which illustrate a variety of clinical signs and symptoms will be presented with clinical histories. Students will be given the opportunity to develop a differential diagnosis and discuss the implications of this relevant to the patient’s treatment.

DDHS 4110 Medical Emergencies  
Credits 0-1. 0-1 Lecture Hours.  
Discussions on the preparations for handling emergencies; prevention, recognition and management of various emergencies. The course includes case scenario presentations and mock hands-on drills.

DDHS 4140 Clinical Dental Hygiene III  
Credits 4. 12 Other Hours.  
(0-12). Comprehensive dental hygiene care through clinical application of procedures. Includes intramural dental hygiene and dental school rotations and extramural site rotations.

DDHS 4210 Professional Ethics  
Credit 1. 1 Lecture Hour.  
The didactic lecture course and case-based small group decision making exercises draw from general ethics, bioethics, dental-specific ethics and obligations of health-care professionals.

DDHS 4220 Comprehensive Care Seminar  
Credits 0 to 2. 0 to 2 Lecture Hours.  
Topics and activities designed to integrate dental hygiene care with total patient care; includes a case presentation.

DDHS 4240 Clinical Dental Hygiene IV  
Credits 4. 12 Other Hours.  
(0-12). Comprehensive dental hygiene care through clinical application of procedures. Includes intramural dental hygiene and dental school rotations and extramural site rotations.

DDHS 4310 Oral Radiography  
Credits 0-1. 0-1 Other Hours.  
Provides the student with clinical experience in the application of the principles, procedures and techniques of oral radiography.

DDHS 4320 Perspectives in Dental Hygiene  
Credits 2. 2 Lecture Hours.  
In addition to preparing the student for private practice dental hygiene positions, this course introduces other potential career options including hospital/clinic administration, sales, consulting, public health, insurance and education. The importance of the dental team concept, résumé writing and interviewing skills will be discussed. Legal, ethical and professional issues involving record keeping, licensing, informed consent, sexual harassment and the standard of care will be explored. The business aspects of dental hygiene, personal financial planning, and insurance options will also be addressed. In addition, this course will prepare students for the Texas Jurisprudence Exam required for state licensure.

DDHS 4410 Gerontology  
Credit 1. 1 Lecture Hour.  
This course will examine the unique considerations a dental professional will encounter when providing care to a geriatric patient. Social, psychological and biological aspects of aging will be discussed. Strategies for patient care will be outlined and discussed. Appropriate community referral agencies will be explored to aid the hygienist in providing assistance to the elderly patient.

DDHS 4510 Pediatric Dentistry  
Credit 1. 1 Lecture Hour.  
Child development as the basis for management of behavior in the dental environment.

DDHS 4530 Public and Community Health  
Credits 0 to 3. 0 to 3 Other Hours.  
This course examines dental public health and pro-motes a greater understanding of the important role of the dental hygienist within the community. The student is exposed to opportunities to promote oral health and prevent dental diseases in the community through organized community-based programs versus the traditional clinical approach.
DDHS 4610 Periodontics
Credit 1. 1 Lecture Hour.
Characteristics, etiology and treatment of inflammatory diseases of the supporting tissues of the teeth and their substitutes. Emphasis is placed on the relationship of periodontics to the practice of dental hygiene.

DDHS 4620 Theory of Dental Hygiene Practice II
Credits 2. 2 Lecture Hours.
Fundamental knowledge and techniques in managing patients with special needs.

DDHS 4710 Applied Research Methods
Credit 1. 1 Lecture Hour.
Practical experience in applying principles of research methodology; includes preparation of a formal proposal and table clinic under mentorship of individual faculty.

DDHS 4715 Research Methods
Credit 1.5. 1.5 Lecture Hour.
Identification of research problems and variables; sampling; research design; statistical testing of data; critical review of dental literature; table clinic development for presentation to the public and professional groups.

DDHS 4810 Local Anesthesia and Nitrous Oxide/Oxygen Sedation
Credit 1. 1 Lecture Hour.
The primary method of presentation is lecture, a detailed outline is provided to each student to facilitate the lecture or textbook notes to supplement the outline. Students are given outside assignments to practice dose calculations for each local anesthetic and for a variety of patients. The lecture material is supplemental with videotapes designed to show the correct administration techniques, the neural innervations of each area of the oral cavity and the area anesthetized.

DDHS 4820 Clinical Dental Hygiene II
Credits 2. 6 Other Hours.
Comprehensive dental hygiene care through clinical application of procedures. Includes intramural dental hygiene and dental school rotations and extramural site rotations.

DIVE - Diving Tech and Methods (DIVE)

DIVE 250 SCUBA Diving I
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Fundamental academic knowledge and practical application of SCUBA diving practices and theory; introduction to diving tables and diving physiology.
Prerequisite: Must complete a medical statement showing no contraindications to diving, or have a recreational SCUBA diver’s physical examination.

DIVE 251 SCUBA Diving II
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Methods to promote safe, self-reliant diving and improve the diver’s comfort, coordination and strength in the water; to build competency in dive planning and organization.
Prerequisite: Must complete a medical statement showing no contraindications to diving, or have a recreational SCUBA diver’s physical examination; open water certification from a nationally recognized agency; Divers Alert Network (DAN) insurance or equivalent.

DIVE 300 Rescue Diving
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Relates skills necessary to perform basic life support, administer dive first aid, evacuate victim, assist and rescue other divers in water; illustrate proper dive planning; practice accident prevention and effective accident management.
Prerequisites: Must complete a medical statement showing no contraindications to diving, or have a recreational SCUBA diver’s physical examination; certification as a SDI SCUBA diver or equivalent; Divers Alert Network (DAN) diving accident insurance or equivalent.

DIVE 330 Rescue Diving
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Relates skills necessary to perform basic life support, administer dive first aid, evacuate victim, assist and rescue other divers in water; illustrate proper dive planning; practice accident prevention and effective accident management.
Prerequisites: Must complete a medical statement showing no contraindications to diving, or have a recreational SCUBA diver’s physical examination; certification as a SDI SCUBA diver or equivalent; Divers Alert Network (DAN) diving accident insurance or equivalent.

DIVE 331 Alternative Diving Technology
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Illustrates the realities of operating in the scientific, public safety and military diving disciplines; practice real world training scenarios involving multiple aspects of each of the three fields.
Prerequisites: Must complete a medical statement showing no contraindications to diving, or have a recreational SCUBA diver’s physical examination (or AAUS physical if rating with AAUS); certification as an Advanced and Rescue Diver or equivalent; Divers Alert Network (DAN) diving accident insurance or equivalent; junior or senior classification or approval of instructor.

DIVE 357 Dive Leadership – Divemaster
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Examines divemaster-level dive knowledge, dive leadership theory and application, presentations skills, physical diving skills, logistics and planning, and operational execution; develops a multi-environment capable diving leader.
Prerequisites: Must complete a medical statement showing no contraindications to diving, or have a recreational SCUBA diver’s physical examination; certification as a SDI Advanced SCUBA Diver and SDI SCUBA Rescue Diver or equivalent; 60 varied dives logged; current certifications in First Aid, CPR and Emergency Oxygen Administration; Divers Alert Network (DAN) diving accident insurance (or equivalent); junior or senior classification or approval of instructor.

DIVE 457 Dive Leadership – Instructor
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Apply effective methods to teach skin and SCUBA diving in compliance with training agency instructional standards; evaluate instructional level dive knowledge, water skills and presentation performance in accordance with training agency teaching standards.
Prerequisites: Recreational SCUBA diver’s medical evaluation; certification as a SCUBA divemaster or equivalent; 100 varied dives logged; current certification in First Aid, CPR and Emergency Oxygen Administration; Divers Alert Network (DAN) diving accident insurance or equivalent; junior or senior classification or approval of instructor.

ECEN - Electrical & Comp Engr (ECEN)

ECEN 214 Electrical Circuit Theory
Credits 4. 3 Lecture Hours. 3 Lab Hours.
Resistive circuits: circuit laws, network reduction, nodal analysis, mesh analysis; energy storage elements; sinusoidal steady state; AC energy systems; magnetically coupled circuits; the ideal transformer; resonance; introduction to computer applications in circuit analysis.
Prerequisites: ENGR 111, ENGR 112, PHYS 208, CHEM 107. CHEM 117 with a grade of C or better; MATH 308 with a grade of C or better or registration therein; admission to electrical and computer engineering.
ECEN 215 Principles of Electrical Engineering  
Credits 3. 2 Lecture Hours. 2 Lab Hours.  
Fundamentals of electric circuit analysis and introduction to electronics for engineering majors other than electrical and computer engineering.  
**Prerequisites:** ENGR 111, ENGR 112, PHYS 208, CHEM 107, CHEM 117 with a grade of C or better; MATH 308 with a grade of C or better or registration therein; admission to an engineering major.  

ECEN 222/CSCE 222 Discrete Structures for Computing  
Credits 3. 3 Lecture Hours.  
Provide mathematical foundations from discrete mathematics for analyzing computer algorithms, for both correctness and performance; introduction to models of computation, including finite state machines and Turing machines.  
**Prerequisite:** MATH 151.  
**Cross Listing:** CSCE 222/ECEN 222.  

ECEN 248 Introduction to Digital Systems Design  
Credits 4. 3 Lecture Hours. 3 Lab Hours.  
Combinational and sequential digital system design techniques; design of practical digital systems.  
**Prerequisite:** ENGR 111, ENGR 112, PHYS 208, CHEM 107, CHEM 117, MATH 152 with a grade of C or better; admission to electrical and computer engineering.  

ECEN 285 Directed Studies  
Credits 1 to 4. 1 to 4 Other Hours.  
Problems of limited scope approved on an individual basis intended to promote independent study.  
**Prerequisite:** Approval of department head.  

ECEN 289 Special Topics in...  
Credits 1 to 4. 1 to 4 Other Hours.  
Selected topics in an identified area of electrical engineering. May be repeated for credit.  
**Prerequisite:** Approval of instructor.  

ECEN 291 Research  
Credits 1 to 4. 1 to 4 Other Hours.  
Research conducted under the direction of faculty member in electrical engineering. May be repeated 3 times for credit.  
**Prerequisites:** Freshman or sophomore classification and approval of instructor.  

ECEN 303 Random Signals and Systems  
Credits 3. 3 Lecture Hours. 1 Lab Hour.  
Concepts of probability and random variables necessary for study of signals and systems involving uncertainty; applications to elementary problems in detection, signal processing and communication.  
**Prerequisites:** Grade of C or better in MATH 308; junior or senior classification.  

ECEN 314 Signals and Systems  
Credits 3. 3 Lecture Hours. 1 Lab Hour.  
Introduction to the continuous-time and discrete-time signals and systems; time domain characterization of linear time-invariant systems; Fourier analysis; filtering; sampling; modulation techniques for communication systems.  
**Prerequisites:** Grade of C or better in ECEN 214; MATH 308; junior or senior classification.  

ECEN 322 Electric and Magnetic Fields  
Credits 3. 3 Lecture Hours. 1 Lab Hour.  
Vector analysis, Maxwell's equations, wave propagation in unbounded regions, reflection and refraction of waves, transmission line theory; introduction to waveguides and antennas.  
**Prerequisites:** ECEN 214, PHYS 208, and MATH 311 with a grade of C or better; junior or senior classification.  

ECEN 325 Electronics  
Credits 4. 3 Lecture Hours. 4 Lab Hours.  
Introduction to electronic systems; linear circuits; operational amplifiers and applications; diodes, field effect transistors, bipolar transistors; amplifiers and nonlinear circuits.  
**Prerequisite:** MATH 311 with a grade of C or better; ECEN 314 with a grade of C or better, or registration therein.  

ECEN 326 Electronic Circuits  
Credits 4. 3 Lecture Hours. 3 Lab Hours.  
Basic circuits used in electronic systems; differential and multistage amplifiers; output stages and power amplifiers; frequency response, feedback circuits, stability and oscillators, analog integrated circuits, active filters.  
**Prerequisites:** Grade of C or better in ECEN 314 and ECEN 325; junior or senior classification.  

ECEN 338 Electromechanical Energy Conversion  
Credits 4. 3 Lecture Hours. 3 Lab Hours.  
Introduction to magnetic circuits, transformers, electromechanical energy conversion devices such as dc, induction and synchronous motors; equivalent circuits, performance characteristics and power electronic control.  
**Prerequisite:** ECEN 214.  

ECEN 350/CSCE 350 Computer Architecture and Design  
Credits 4. 3 Lecture Hours. 3 Lab Hours.  
Computer architecture and design; use of register transfer languages and simulation tools to describe and simulate computer operation; central processing unit organization, microprogramming, input/output and memory system architectures.  
**Prerequisites:** Grade of C or better in ECEN 248; junior or senior classification.  
**Cross Listing:** CSCE 350/ECEN 350.  

ECEN 370 Electronic Properties of Materials  
Credits 3. 3 Lecture Hours. 1 Lab Hour.  
Introduction to basic physical properties of solid materials; some solid state physics employed, but major emphasis is on engineering applications based on semiconducting, magnetic, dielectric and superconducting phenomena.  
**Prerequisite:** Grade of C or better in PHYS 222; junior or senior classification.  

ECEN 403 Electrical Design Laboratory I  
Credits 3. 2 Lecture Hours. 3 Lab Hours.  
Application of design process and project engineering as practiced in industry; team approach to the design process; development of a project proposal; proposed project implemented in ECEN 404.  
**Prerequisites:** COMM 205 or COMM 243 or ENGL 210; grade of C or better in ECEN 314, ECEN 325, ECEN 350/CSCE 350; grade of C or better in ECEN 303, ECEN 322, ECEN 370 or grade C or better in CSCE 315, ECEN 449, STAT 211 or ECEN 303; senior classification.
ECEN 404 Electrical Design Laboratory II
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Continuation of ECEN 403; application of the design process and project engineering as practiced in industry; team approach to the design process; completion of project based on proposal from ECEN 403; includes testing, evaluation and report writing.
Prerequisites: Grade of C or better in ECEN 403; senior classification.

ECEN 405 Electrical Design Laboratory
Credits 3. 1 Lecture Hour. 6 Lab Hours.
Introduction to the design process and project engineering as practiced in industry; student teams apply the design process by developing a project from proposal through test and evaluation.
Prerequisites: ENGL 210 or 301, completion of selected major field courses, senior classification and project approval.

ECEN 410 Medical Imaging
Credits 4. 3 Lecture Hours. 2 Lab Hours.
Fundamentals of physics and the engineering principles of medical imaging systems; focus on magnetic resonance imaging, x-ray computer tomography, ultrasonography, optical imaging and nuclear medicine; includes systems, sources, energy tissue interaction, image formation and clinical examples; virtual labs, on- and off-campus lab tours.
Prerequisites: Grade of C or better in MATH 222 or MATH 251 or MATH 253; ECEN 444 or grade of C or better in ECEN 314; junior or senior classification.

ECEN 411 Introduction to Magnetic Resonance Imaging and Magnetic Resonance Spectroscopy
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Introduction to the basic physics of magnetic resonance, the principles of MR imaging and spectroscopy, the major contrast mechanisms in MRI and MR imaging system hardware; development of pulse sequences for different imaging methods, including flow and spectroscopic imaging; will build RF coils.
Prerequisites: Grade of C or better in MATH 251 and PHYS 208; junior or senior classification.

ECEN 412 Ultrasound Imaging
Credits 3. 3 Lecture Hours.
Mathematical analysis of wave propagation, scattering of ultrasound in biological tissues, electronic transducer arrays for the beam forming, models of the received signals and signal processing methods for medical ultrasound imaging of tissues; includes discussions of research related to fundamental ultrasound imaging concepts.
Prerequisites: Grade of C or better in ECEN 314; junior or senior classification.

ECEN 414 Biosensors
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Hands-on lab experience in the development of miniaturized biosensors; includes microfluidic devices for biosensing.
Prerequisite: Senior classification or approval of instructor.

ECEN 415 Physical and Economical Operations of Sustainable Energy Systems
Credits 3. 3 Lecture Hours.
Operational issues for sustainable electric energy systems; basic relevant topics in engineering, optimization and economic concepts; modular view of individual electric energy processing components; physical and market operations in electricity industry in support of sustainable energy integration; computer simulations and demonstrations to create and evaluate examples of power systems.
Prerequisites: Grade of C or better in ECEN 214; ECEN 420; ECEN 460; junior or senior classification.

ECEN 419 Genomic Signal Processing
Credits 3. 3 Lecture Hours.
Fundamentals of molecular biology; application of engineering principles to systems biology; topics include unearthing intergene relationships, carrying out gene based classification of disease, modeling genetic regulatory networks, and altering their dynamic behavior.
Prerequisites: Grade of C or better in ECEN 403; junior or senior classification.

ECEN 420 Linear Control Systems
Credits 3. 3 Lecture Hours.
Application of state variable and frequency domain techniques to modeling, analysis and synthesis of single input, single output linear control systems.
Prerequisites: Grade of C or better in ECEN 314 and MATH 308; junior or senior classification.

ECEN 421 Digital Control Systems
Credits 3. 3 Lecture Hours.
Feedback systems in which a digital computer is used to implement the control law; Z-transform and time domain methods serve as a basis for control systems design. Effects of computer word length and sampling rate.
Prerequisite: ECEN 420 or equivalent.

ECEN 422 Control Engineering and Design Methodology
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Modeling, specifications, rating and operating principles of sensors, actuators and other control system components; experiments on conceptual design, simulation and physical implementation of control systems.
Prerequisite: ECEN 420 or equivalent.

ECEN 423 Computer and Wireless Networks
Credits 3. 3 Lecture Hours.
Prerequisite: Grade of C or better in MATH 311; junior or senior classification.

ECEN 424 Fundamentals of Networking
Credits 3. 3 Lecture Hours. 1 Lab Hour.
Foundations of computer networking; layered architecture of the Internet, analysis of protocols, new-age networks such as the Web and social networks; computer network programming and offline analysis of real network data.
Prerequisites: Grade of C or better in ECEN 303 or STAT 211; junior or senior classification.

ECEN 425 Radio Frequency and Microwave Engineering
Credits 3. 3 Lecture Hours.
Fundamental Radio Frequency (RF) and microwave circuit analysis: scattering and ABCD matrices, return loss, insertion loss; transmission lines, lumped elements, impedance matching; theory, analysis and design of basic RF and microwave passive circuits; use of commercial CAD programs for RF and microwave circuit design and simulation.
Prerequisites: Grade of C or better in ECEN 322; junior or senior classification.
ECEN 434 Optimization for Electrical and Computer Engineering Applications
Credits 3. 3 Lecture Hours.
Principles of optimization including linear and nonlinear optimization as well as electrical and computer engineering applications in signal estimation, routing in communication networks, flows in wireless networks, wafer fabrication plants, and economic dispatch in power systems.
Prerequisites: Grade of C or better in MATH 304 or MATH 309 or MATH 311; grade of C or better in MATH 251; junior or senior classification.

ECEN 438 Power Electronics
Credits 4. 3 Lecture Hours. 3 Lab Hours.
Electric power conditioning and control; characteristics of solid state power switches; analysis and experiments with AC power controllers, controlled rectifiers, DC choppers and DC-AC converters; applications to power supplies, airborne and spaceborne power systems.
Prerequisite: Junior or senior classification in electrical engineering or approval of instructor.

ECEN 440 Introduction to Thin Film Science and Technology
Credits 3. 3 Lecture Hours. 1 Lab Hour.
The course focuses on the thin film technology in semiconductor industry; topics include the basic growth mechanisms for thin films (growth models, lattice matching epitaxy and domain matching epitaxy), the instrumental aspects of different growth techniques and advanced topics related to various applications.
Prerequisites: Junior or senior classification.

ECEN 441 Electronic Motor Drives
Credits 4. 3 Lecture Hours. 3 Lab Hours.
Application of semiconductor switching power converters to adjustable speed DC and AC motor drives; steady state theory and analysis of electric motion control in industrial, robotic and traction systems; laboratory experiments in power electronic motor drives and their control.
Prerequisite: Junior or senior classification in electrical engineering.

ECEN 442 DSP Based Electromechanical Motion Control
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Overview of energy conversion and basic concepts on electromechanical motion devices; different control strategies including the solid-state drive topologies; for every electromechanical motion device, its DSP control implementation discussed and implemented in the lab.
Prerequisites: Grade of C or better in ECEN 314; junior or senior classification.

ECEN 444 Digital Signal Processing
Credits 4. 3 Lecture Hours. 3 Lab Hours.
Digital signal processing; discrete-time signals and systems, linear shift-invariant systems, the discrete Fourier transform and fast Fourier transform algorithm, and design of finite impulse response and infinite impulse response digital filters.
Prerequisites: Grade of C or better in ECEN 314; junior or senior classification.

ECEN 445 Applied Electromagnetic Theory
Credits 3. 3 Lecture Hours.
Guided wave and wireless methods; applications of Maxwell's equations and electromagnetic wave phenomena to radiation, antennas and microwave circuit design; digital transmission line analysis and design.
Prerequisites: Grade of C or better in ECEN 322; junior or senior classification.

ECEN 447 Digital Image Processing
Credits 4. 3 Lecture Hours. 3 Lab Hours.
Improvement of pictorial information using spatial and frequency domain techniques; two-dimensional discrete Fourier transform; image filtering, enhancement, restoration, compression; image processing project.
Prerequisites: Grade of C or better in ECEN 314; junior or senior classification.

ECEN 448 Real-Time Digital Signal Processing
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Features and architectures of digital signal processing (DSP) chips; fundamental compromises amongst computational accuracy, speed and cost; real-time implementation of filtering, audio, image and video processing algorithms; rapid prototyping via MATLAB/Simulink.
Prerequisites: ECEN 444; junior or senior classification.

ECEN 449 Microprocessor Systems Design
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Introduction to microprocessors; 16/32 bit single board computer hardware and software designs; chip select equations for memory board design, serial and parallel I/O interfacing; ROM, static and dynamic RAM circuits for no wait-state design; assembly language programming, stack models, subroutines and I/O processing.
Prerequisites: Grade of C or better in ECEN 248; junior or senior classification.

ECEN 451 Antenna Engineering
Credits 3. 3 Lecture Hours.
Introduction to antenna theory and design; includes antenna performance parameters, analysis of radiation from sources using Maxwell's equations, theory and design of wire antennas, arrays and frequency independent antennas; computer methods for antenna design.
Prerequisite: Grade of C or better in ECEN 322; junior or senior classification.

ECEN 452 Ultra High Frequency Techniques
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Introduction to theory and practice of ultra high frequency radio wave generation, transmission and radiation; application of Maxwell's equations to transmission of electrical energy in wave guides.
Prerequisites: ECEN 322; ECEN 351 or registration therein.

ECEN 453 Microwave Solid-State Circuits and Systems
Credits 3. 3 Lecture Hours.
Microwave solid-state devices and circuits; theory and design of various types of active circuits; applications of these devices and circuits in radar, communication and surveillance systems.
Prerequisites: Grade of C or better in ECEN 322; junior or senior classification.

ECEN 454 Digital Integrated Circuit Design
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Analysis and design of digital devices and integrated circuits using MOS and bipolar technologies and computer aided simulation.
Prerequisites: Grade of C or better in ECEN 214 and ECEN 248; junior or senior classification.
ECEN 455 Digital Communications
Credits 4. 3 Lecture Hours. 3 Lab Hours.
Digital transmission of information through stochastic channels; analog-to-dialog conversion, entropy and information, Huffman coding; signal detection, the matched-filter receiver, probability of error; baseband and passband modulation, signal space representation of signals, PAM, QAM, PSK, FSK; block coding, convolutional coding; synchronization; communication through fading channels; spread-spectrum signaling; simulation of digital communication systems.
Prerequisites: Grade of C or better in ECEN 314; junior or senior classification.

ECEN 457 Operational Amplifiers
Credits 4. 3 Lecture Hours. 3 Lab Hours.
Analysis of basic operational amplifier and operational transconductance amplifier (OTA) circuits; noise analysis in Op amp and OTA circuits; nonlinear OTA and Op amp circuits; instrumentation amplifiers; transducer circuits; function generators; oscillators and D/A converters and basics of switched-capacitor circuits.
Prerequisite: Grade of C or better in ECEN 325; junior or senior classification.

ECEN 458 Active Filter Analysis and Design
Credits 4. 3 Lecture Hours. 3 Lab Hours.
Systematic analysis and design for active RC filters; continuous-time; switched-capacitor circuits; filter approximations; synthesis techniques; sensitivity; practical considerations for monolithic integrated filters; experimental and computer-simulation verification.
Prerequisite: Grade of C or better in ECEN 325; junior or senior classification.

ECEN 459 Power System Fault Analysis and Protection
Credits 4. 3 Lecture Hours. 2 Lab Hours.
General considerations in transmission and distribution of electrical energy as related to power systems; calculation of electric transmission line constants; general theory of symmetrical components and application to analysis of power systems during fault conditions.
Prerequisite: Grade of C or better in ECEN 215 or ECEN 314; junior or senior classification.

ECEN 460 Power System Operation and Control
Credits 4. 3 Lecture Hours. 2 Lab Hours.
Load flow studies; power system transient stability studies; economic system loading and automatic load flow control.
Prerequisite: Grade of C or better in ECEN 215 or ECEN 314; junior or senior classification.

ECEN 462 Optical Communication Systems
Credits 3. 3 Lecture Hours.
Principles of optical communication systems; characteristics of optical fibers, lasers and photodetectors for use in communication systems; design of fiber-optic digital systems and other optical communication systems.
Prerequisites: Grade of C or better in ECEN 322 and ECEN 370; junior or senior classification.

ECEN 463/BMEN 427 Magnetic Resonance Engineering
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Design, construction and application of instrumentation for MR imaging; fundamentals of the architecture of an MR spectrometer and the gradient subsystem used for image localization; emphasis on the radiofrequency sensors and systems used for signal generation and reception.
Prerequisites: BMEN 420 or ECEN 410 or ECEN 411 or approval of instructor; junior or senior classification.
Cross Listing: BMEN 427.

ECEN 464 Optical Engineering
Credits 3. 3 Lecture Hours.
Ray optics; wave optics; propagation, reflection, refraction and diffraction of light; passive optical components, polarization, optical modulators, interferometers and lasers.
Prerequisites: Grade of C or better in ECEN 322 and ECEN 370; junior or senior classification.

ECEN 465 Experimental Optics
Credits 4. 2 Lecture Hours. 7 Lab Hours.
In-depth study of experimental optic techniques; opto-mechanical assemblies; passive optics; interferometers; opto-electronics; basic op-amp circuits; feedback and control of optics with electronics.
Prerequisite: Junior or senior classification or approval of instructor.

ECEN 467 Harnessing Solar Energy: Optics, Photovoltaics and Thermal Systems
Credits 4. 3 Lecture Hours. 3 Lab Hours.
Solar radiation characteristics and measurement; optical coatings including reflection, transmission, absorption and emissivity; concentrating optics, tracking and etendue limit; photovoltaic cells, modules and systems overview; introduction to solar thermal systems.
Prerequisites: Grade of C or better in ECEN 322 and ECEN 370; junior or senior classification.

ECEN 468 Advanced Digital System Design
Credits 4. 3 Lecture Hours. 3 Lab Hours.
Design, modeling and verification of complex digital systems using hardware description language and electronic system level language.
Prerequisite: Grade of C or better in ECEN 248; junior or senior classification.

ECEN 472 Microelectronic Circuit Fabrication
Credits 4. 3 Lecture Hours. 3 Lab Hours.
Fundamentals of MOS and bipolar microelectronic circuit fabrication; theory and practice of diffusion, oxidation, ion implantation, photolithography, etch; yield and reliability considerations; statistical process control; integrated process design, simulation and characterization.
Prerequisites: Grade of C or better in ECEN 325 and ECEN 370; junior or senior classification.

ECEN 473 Microelectronic Device Design
Credits 3. 3 Lecture Hours.
General processes for the fabrication of microelectronic devices and integrated circuits; a review of the electronic properties of semiconductors and carrier transport and recombination; analysis and characterization of p-n junctions, bipolar transistors, and MOS capacitors and transistors; design considerations for achieving optimum performance and practical structures are discussed.
Prerequisites: Grade of C or better in ECEN 325 and ECEN 370; junior or senior classification.

ECEN 474 VLSI Circuit Design
Credits 4. 3 Lecture Hours. 3 Lab Hours.
Analysis and design of monolithic analog and digital integrated circuits using NMOS, CMOS and bipolar technologies; device modeling; CAD tools and computer-aided design; design methodologies for LSI and VLSI scale circuits; yield and economics; test and evaluation of integrated circuits.
Prerequisite: ECEN 326.
ECEN 475 Introduction to VLSI Systems Design
Credits 4. 3 Lecture Hours. 3 Lab Hours.
Introduction to design and fabrication of microelectronic circuits; emphasis on very large scale integration (VLSI) digital systems; use of state-of-the-art design methodologies and tools; design of small to medium scale integrated circuits for fabrication.
Prerequisites: Grade of C or better in ECEN 248 and ECEN 325; junior or senior classification.

ECEN 477 Photonics: Fiber and Integrated Optics
Credits 4. 3 Lecture Hours. 3 Lab Hours.
Photonics lab including optical power and spectral measurements of singlemode and multimode optical fibers, hands-on arc fusion splicing, lasers, amplifiers, interferometers, photodetectors, integrated optics, fiber-optic devices, optical modulators.
Prerequisite: Grade of C or better in ECEN 322 and ECEN 370; junior or senior classification.

ECEN 478 Wireless Communications
Credits 3. 3 Lecture Hours.
Overview of wireless applications, models for wireless communication channels, modulation formats for wireless communications, multiple access techniques, wireless standards.
Prerequisites: ECEN 455; junior or senior classification.

ECEN 480 RF and Microwave Wireless Systems
Credits 3. 3 Lecture Hours.
Introduction to various RF and microwave system parameters, architectures and applications; theory, implementation, and design of RF and microwave systems for communications, radar, sensor, surveillance, navigation, medical and optical applications.
Prerequisite: Grade of C or better in ECEN 322; junior or senior classification.

ECEN 484 Professional Internship
Credit 1. 1 Lecture Hour.
Professional internship in a private company, government agency or laboratory, university or organization to provide work and/or research experience related to the student’s major and career objectives. May be taken three times for credit.
Prerequisites: Grade of C or better in ECEN 214 or ECEN 248; junior or senior classification; approval of instructor and internship agency.

ECEN 485 Directed Studies
Credits 1 to 6. 1 to 6 Other Hours.
Problems of limited scope approved on an individual basis intended to promote independent study.
Prerequisites: Senior classification; approval of department head.

ECEN 489 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours. 0 to 7 Lab Hours.
Selected topics in an identified area of electrical engineering. May be repeated for credit.
Prerequisite: Approval of instructor.

ECEN 491 Research
Credits 1 to 4. 1 to 4 Other Hours.
Research conducted under the direction of faculty member in electrical engineering. May be repeated 3 times for credit. Registration in multiple sections of this course is possible within a given semester provided that the per semester credit hour limit is not exceeded.
Prerequisites: Junior or senior classification and approval of instructor.

ECHE-Early Childhd Ed Fld Based (ECHE)

ECHE 244 School, Family and Community Dynamics in Early Childhood Education
Credits 3. 3 Lecture Hours.
Study of the family unit, home-school relationships; strategies for building cooperative activities with parents in the education of their children; healthy parent-school-community relationships; developing collaboration, communication, leadership and advocacy skills; increased sensitivity to cross-cultural issues and strategies for collaboration.

ECHE 291 Research
Credits 1 to 4. 1 to 4 Other Hours.
Research conducted under the direction of faculty member in early childhood education. May be repeated 2 times for credit.
Prerequisites: Freshman or sophomore classification and approval of instructor.

ECHE 321 The Young Child and Early Childhood Education
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Examines the world of the contemporary child, its demographics and diversity; explores the philosophical and historical foundation of early childhood education; examines early childhood programs and practices serving young children from birth through age nine; translates child development theory into developmentally appropriate practice.
Prerequisites: ECHE 244; junior classification.

ECHE 342 Strategies for Teaching Young Children
Credits 3. 2 Lecture Hours. 6 Lab Hours.
Application of sound principles of early childhood pedagogical best practices informed by research, child development and clinical literature; explores developmentally appropriate instructional strategies practiced at each age and grade level; examines effective learning environments, teacher-child interaction, cooperative grouping and inquiry strategies for teaching and learning.
Prerequisites: ECHE 244, ECHE 321; junior classification.

ECHE 491 Research
Credits 1 to 4. 1 to 4 Other Hours.
Research conducted under the direction of faculty member in early childhood education. May be repeated 2 times for credit.
Prerequisites: Junior or senior classification and approval of instructor.

ECMT - Econometrics (ECMT)

ECMT 461 Economic Data Analysis
Credits 3. 3 Lecture Hours.
Concepts of statistical description, probability theory and statistical inference as they apply to economic analysis; data management, data handling and data analysis; focus on economic statistics with emphasis on regression analysis.
Prerequisite: MATH 141 or equivalent.

ECMT 463 Introduction to Econometrics
Credits 3. 3 Lecture Hours.
Application of mathematics and statistics to interpret economic phenomena; elementary econometric models and estimation techniques useful for estimating economic relationships and theories.
Prerequisites: ISYS 209; ECON 323; MATH 131 or MATH 142; STAT 211 or STAT 303.
ECMT 475 Economic Forecasting
Credits 3.3 Lecture Hours.
Econometric approach to prediction and forecasting; data mining and in-sample overfitting; exploratory data analysis; model selection; recursive techniques; structural change; nonlinear models; causality; forecast evaluation and combination; practical issues in real world prediction and forecasting.
Prerequisites: ECMT 463; junior or senior classification.

ECON - Economics (ECON)

ECON 202 Principles of Economics
Credits 3.3 Lecture Hours.
(ECON 2302) Principles of Economics. Elementary principles of economics; the economic problem and the price system; theory of demand, theory of production and the firm, theory of supply; the interaction of demand and supply.

ECON 203 Principles of Economics
Credits 3.3 Lecture Hours.
(ECON 2301) Principles of Economics. Measurement and determination of national income, employment and price; introduction to monetary and fiscal policy analysis; the effects of government deficits and debt, exchange rates and trade balances.
Prerequisite: ECON 202 or approval of undergraduate advisor.

ECON 285 Directed Studies
Credits 0 to 4.0 to 4 Other Hours.
Directed studies in specific problem areas of economics. May be repeated for credit.
Prerequisite: Freshman or sophomore classification; approval of instructor.

ECON 289 Special Topics in...
Credits 3.3 Lecture Hours.
Selected topics in an identified area of economics. May be repeated for credit.
Prerequisite: Approval of undergraduate advisor.

ECON 291 Research
Credits 0 to 3.0 to 3 Other Hours.
Research conducted under the direction of faculty member in economics. May be taken three times for credit.
Prerequisites: Freshman or sophomore classification.

ECON 311 Money and Banking
Credits 3.3 Lecture Hours.
Fundamental principles of money, credit, and banking; arbitrage conditions in domestic and international capital markets; theoretical and institutional analysis of money markets.
Prerequisite: ECON 203.

ECON 312 Poverty, Inequality and Social Policy
Credits 3.3 Lecture Hours.
Determinants of inequality in market earnings; philosophical and economic reasons for redistributing income; issues in measurement of inequality and poverty; examination of major social insurance and welfare programs and how they affect income distribution and performance of the economy.
Prerequisite: ECON 323 or concurrent enrollment.

ECON 315 Sports Economics
Credits 3.3 Lecture Hours.
Application of economic concepts to the business and practice of sports; taxpayer funding of stadiums; applications of game theory to sports; impact of imperfect information; pricing strategies; testing models of discrimination in sports markets.
Prerequisite: ECON 202.

ECON 318/WGST 318 The Economics of Gender and Race
Credits 3.3 Lecture Hours.
Theories and evidence on gender and race differences in labor market outcomes; labor supply and the role of family formation; the effect of human capital and discrimination on earnings; analysis of government policies; international comparisons.
Prerequisites: 6 hours drawn from the following: ECON 202, STAT 303, 3 hours in WGST above 200 level; junior or senior classification.
Cross Listing: WGST 318/ECON 318.

ECON 320 Economic Development of Europe
Credits 3.3 Lecture Hours.
Development of wage system expansion of markets, Industrial Revolution, relation of industrial development to political policy.
Prerequisites: ECON 202 and ECON 203.

ECON 322 Applied Microeconomic Theory
Credits 3.3 Lecture Hours.
Use of microeconomic theory in the analysis of problems that would face decision makers, not only in business but also in government, non-profit firms and other institutions.
Prerequisite: ECON 202. May not be counted toward a major in economics.

ECON 323 Microeconomic Theory
Credits 3.3 Lecture Hours.
Determination of prices and their role in directing consumption, production, and distribution under both competitive and non-competitive market situations.
Prerequisites: ECON 202 and MATH 142.

ECON 324 Comparative Economic Systems
Credits 3.3 Lecture Hours.
Foundations of the market economy, market socialism, and economic planning; comparative performance of these alternative institutional arrangements; economies in transition.
Prerequisites: ECON 202 and ECON 203.

ECON 328 Economics of Education
Credits 3.3 Lecture Hours.
Application of economic analysis to education policy; theoretical basis for private and public investment in education; returns to education; the importance of school resources, school financing, school choice, and accountability.
Prerequisites: ECON 202; STAT 211, STAT 303 or equivalent.

ECON 330 Economic Development
Credits 3.3 Lecture Hours.
A study of the less developed world; economic problems and solutions.
Prerequisites: ECON 202 and ECON 203.

ECON 410 Macroeconomic Theory
Credits 3.3 Lecture Hours.
Theory of the determination of aggregate levels of national income, employment and prices; monetary and fiscal policy analysis, effects of government debt and deficits.
Prerequisite: ECON 203.
ECON 420 Law and Economics
Credits 3.3 Lecture Hours.
Mutual interaction of the prevailing legal system and economic phenomena; development of a series of testable hypotheses concerning the effects of laws and regulations on incentives and economic behavior, the allocation of resources and the distribution of income.
Prerequisite: ECON 323.

ECON 425 The Organization of Industry
Credits 3.3 Lecture Hours.
Relationships between structure, conduct and performance of industries in the American economy using both theoretical and empirical material; antitrust regulation, pricing, product characteristics, advertising, technical change and environmental effects; the American experience contrasted with that of other countries; growth of international industries.
Prerequisite: ECON 323.

ECON 426 Economics of Antitrust and Regulation
Credits 3.3 Lecture Hours.
Bureaucratic and judicial impact of antitrust laws and other regulatory means on the American economy; efficiency gains and losses associated with price discrimination, predation, cartelization, horizontal merger, vertical integration, resale price maintenance; Supreme Court opinions delivered in landmark antitrust cases.
Prerequisite: ECON 323.

ECON 431 Public Finance
Credits 3.3 Lecture Hours.
Economic role of governments; the choice of public sector output in a democracy and the effects of various taxes on resource allocation and income distribution.
Prerequisite: ECON 323.

ECON 432 Economic Theory
Credits 3.3 Lecture Hours.
Introduction to principles of decision-making and analysis of strategic interaction; formal modeling of decision problems involving one or more agents, integrating preferences, risk, and uncertainty into analysis, and using principles of game theory to advise choices; applications include search, signaling, design of contracts, agendas and repeated interaction.
Prerequisites: ECON 323; junior or senior classification.

ECON 433 Energy Markets and Policy
Credits 3.3 Lecture Hours.
Economics of energy markets and energy regulation with emphasis on implications for optimal energy policy; sectors include gasoline, oil, electricity, natural gas, renewables, nuclear; economic theory integrated with empirical applications from American and international experience; new energy markets, energy trading, and interaction with environmental policy.
Prerequisites: ECON 323 and STAT 211/STAT 303 or approval of instructor; junior or senior classification.

ECON 434 Economics of Resource Scarcity
Credits 3.3 Lecture Hours.
Natural resource management and use; problems of renewable and non-renewable resources including scarcity and market responses, role of property rights, externalities, benefit-cost analysis and energy policy.
Prerequisite: ECON 323.

ECON 435 Environmental Economics
Credits 3.3 Lecture Hours.
Economic theory and public policy as applied to environmental problems; role of market failure in explaining the existence of pollution; alternative strategies for pollution control and environmental management; global environmental issues.
Prerequisites: ECON 323; Economic majors only.

ECON 436 Health Economics
Credits 3.3 Lecture Hours.
Economics of health care in the U.S.; role of third party payers; supply and demand for health care; structure and consequences of public and private insurance; role of competition in health care markets among hospitals, insurance plans, physicians and pharmaceutical manufacturers; role of completion and regulation in medical innovation.
Prerequisite: ECON 323.

ECON 437 Health Economics
Credits 3.3 Lecture Hours.
The effects of laws and regulations on incentives and economic behavior, the allocation of resources and the distribution of income.
Prerequisite: ECON 323.

ECON 438 Economics of Labor
Credits 3.3 Lecture Hours.
Economics of the labor market: factors affecting the economy's demand for labor and the supply of labor; labor market problems such as unemployment and poverty; the economics of trade unions and collective bargaining.
Prerequisite: ECON 323.

ECON 440 Experimental Economics
Credits 3.3 Lecture Hours.
Experimental techniques in economics and survey of literature in experimental economics; credibility of experimental data and criteria for determining reliability; application of statistical treatment to experimental data.
Prerequisite: ECON 323.

ECON 441 Microeconomics
Credits 3.3 Lecture Hours.
Economic role of governments; the choice of public sector output in a democracy and the effects of various taxes on resource allocation and income distribution.
Prerequisite: ECON 323.

ECON 442 International Trade Theory and Policy
Credits 3.3 Lecture Hours.
Basis for trade; theory of comparative advantage; determination of product and factor prices, gains from international trade; commercial policy and its implications for income distribution; concept of effective protection; market distortions, policy generated distortions and the arguments for tariffs.
Prerequisite: ECON 323.

ECON 445 Financial Economics
Credits 3.3 Lecture Hours.
Economic analysis of money and financial markets: market structures, efficiency, institutional features; international markets; arbitrage; derivative securities; asset pricing in complete and incomplete markets; relation to rest of economy.
Prerequisites: ECON 323; STAT 211 or STAT 303; junior or senior classification.

ECON 449 Economics of Decision-Making Strategy
Credits 3.3 Lecture Hours.
Introduction to principles of decision-making and analysis of strategic interaction; formal modeling of decision problems involving one or more agents, integrating preferences, risk, and uncertainty into analysis, and using principles of game theory to advise choices; applications include search, signaling, design of contracts, agendas and repeated interaction.
Prerequisites: ECON 323; junior or senior classification.

ECON 452 International Trade Theory and Policy
Credits 3.3 Lecture Hours.
Basis for trade; theory of comparative advantage; determination of product and factor prices; gains from international trade; commercial policy and its implications for income distribution; concept of effective protection; market distortions, policy generated distortions and the arguments for tariffs.
Prerequisite: ECON 323.

ECON 455 Games and Economic Behavior
Credits 3.3 Lecture Hours.
Introduction to game theory for advanced undergraduates; definition and existence of an equilibrium point for strategic, repeated and extensive form games; strategic and evolutionary equilibrium refinements; equilibrium selection; applications include auctions, bargaining, oligopoly, strategic market games, team production, voting and behavioral game theory.
Prerequisites: ECON 323; MATH 142 or equivalent or approval of instructor.
ECON 460 Introduction to Mathematical Economics  
Credits 3.3 Lecture Hours.  
Introduction to mathematical economics; application of mathematical tools  
in economic theory; fundamental results from differential and integral  
calculus; duality theory in consumer and producer theory; classical  
optimization techniques, elementary differential equations and stability  
analysis.  
Prerequisites: ECON 323 and ECON 410; MATH 131 or MATH 142;  
junior or senior classification.

ECON 465 Contemporary Economic Issues  
Credits 3.3 Lecture Hours.  
Application of microeconomic and macroeconomic analyses to evaluate  
contemporary economic issues.  
Prerequisites: ECON 323 and ECON 410.

ECON 470 Program Evaluation  
Credits 3.3 Lecture Hours. 1 Lab Hour.  
Economic approaches to program policy evaluation; empirical  
microeconomic tools; natural experiments; design experimental and quasi- 
experimental method.  
Prerequisite: ECON 323 or approval of instructor.

ECON 484 Internship  
Credits 0 to 3.0 to 3 Other Hours.  
Directed internship in an organization to provide on-the-job training and  
applied research experience with professionals in settings appropriate to  
economics and student professional interest. Maximum 3 hours can count  
toward major. Must be taken on a satisfactory/unsatisfactory basis.  
Prerequisites: Major in economics; 12 completed hours of economics  
including ECON 323; 2.5 cumulative GPA; 2.5 GPA in economic courses;  
pre-approval of the director of economics internship programs.

ECON 485 Directed Studies  
Credits 0 to 6.0 to 6 Other Hours.  
Research and design of specific problem areas approved on an individual  
basis with the intention of promoting independent study and to supplement  
extisting course offerings. Results of study presented in writing.  
Prerequisites: Major or minor in economics; approval of undergraduate  
advisor.

ECON 489 Special Topics in...  
Credits 1 to 4.0 to 4 Lecture Hours.  
Selected topics in an identified area of economics. May be repeated for  
credit.  
Prerequisite: Approval of undergraduate advisor.

ECON 491 Research  
Credits 0 to 4.0 to 4 Other Hours.  
Research conducted under the direction of faculty members in the  
Department of Teaching, Learning and Culture. May be taken four times  
for credit.  
Prerequisites: Freshman or sophomore classification and approval of  
instructor.

EDCI 289 Special Topics in...  
Credits 1 to 4.0 to 4 Lecture Hours.  
Selected topics in an identified area of educational curriculum and  
instruction. May be repeated for credit.  
Prerequisite: Approval of department head.

EDCI 291 Research  
Credits 1 to 4.0 to 4 Other Hours.  
Research conducted under the direction of faculty members in the  
Department of Teaching, Learning and Culture. May be taken four times  
for credit.  
Prerequisites: Freshman or sophomore classification and approval of  
instructor.

EDCI 353 Early Childhood through Adolescent Education  
Credits 3.3 Lecture Hours.  
Early childhood through adolescent approaches and instructional materials  
appropriate for EC through middle school programs; impact of research  
and theory on child development from gestation to early adolescence on  
instructional practices.  
Prerequisites: Admission to teacher education.

EDCI 354 Early Childhood and Adolescent Curriculum and Lesson  
Design  
Credits 3.3 Lecture Hours.  
Examination of curriculum models used in educational environments  
designed for young children through adolescents and the organization of  
the curriculum; investigation of state-adopted curriculum knowledge and  
skills standards and materials as well as their use and expansion.  
Prerequisites: EDCI 364 and EDCI 353; concurrent enrollment in  
TEFB 371.

EDCI 364 Creativity and the Young Child  
Credits 3.3 Lecture Hours.  
Creative expression in young children with a focus on artistic and musical  
expression, creative movement and creative dramatics; creativity as  
related to development of the right hemisphere of the brain.  
Prerequisites: EPSY 320; concurrent enrollment in EDCI 453.

EDCI 365 Using Technology Classrooms  
Credits 3.3 Lecture Hours.  
Overview of technology as it relates to the design of instruction and  
practices that support effective teaching and learning; how learning  
theories are reflected in and supported by technology; current and  
emerging applications in technology delivered and supported learning  
environments.  
Prerequisite: Junior or senior classification.

EDCI 455 Home-School Involvement in Early Childhood Education  
Credits 3.3 Lecture Hours.  
The family unit, home-school relationships and strategies for building  
cooperative activities with parents in the education of their children;  
experience with the development of parent involvement materials.  
Prerequisites: EDCI 364 and EDCI 453; admission to teacher education.

EDCI 485 Directed Studies  
Credits 0 to 4.0 to 4 Other Hours.  
Research problems and readings in areas selected to supplement existing  
offerings; individual reports, oral and written, required.  
Prerequisites: Junior or senior classification; approval of instructor.

EDCI 489 Special Topics in...  
Credits 0 to 4.0 to 4 Lecture Hours.  
Study of selected topics in an identified area of curriculum and instruction.  
May be repeated for credit.  
Prerequisite: Approval of department head.
EDCI 491 Research
Credits 1 to 4. 1 to 4 Other Hours.
Research conducted under the direction of faculty members in the Department of Teaching, Learning and Culture. May be taken four times for credit.
Prerequisites: Junior or senior classification and approval of instructor.

EDTC - Educational Technology (EDTC)

EDTC 345 Microcomputer Awareness for Educators
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Focus on both teacher and student utilization; overview of computer operations and instructional integration of word processor, database, spreadsheet, and graphics utilities; telecommunications and Internet functions and resources accessed and developed; includes the design, development, and evaluation of instructional materials and integration of MultiMedia and HyperText resources and techniques.
Prerequisite: Junior classification.

EDTC 489 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Selected topics in an identified area of educational technology. May be repeated for credit.
Prerequisite: Approval of instructor.

EHRD - Ed Human Res Develop (EHRD)

EHRD 101 Learning Community of Leadership Development in Human Resource Development and Technology Management
Credit 1. 1 Lecture Hour.
Exploration of leadership identity, reflection on lessons learned during the first year of college.

EHRD 203 Foundations of Human Resource Development
Credits 3. 3 Lecture Hours.
Overview of the discipline and field of human resource development; focus on how individuals and groups learn and interact with organizations including motivation, group dynamics, systems theory, organizational culture, learning and change.
Prerequisite: Sophomore classification.

EHRD 210 Legal and Ethical Environment of Human Resource Development
Credits 3. 3 Lecture Hours.
Development of knowledge towards legal and ethical work environment in a corporate and educational setting in human resource development.
Prerequisite: Sophomore classification.

EHRD 285 Directed Studies
Credits 0 to 12. 0 to 12 Lecture Hours.
Directed readings or research problems in industrial education.
Prerequisites: Freshman or sophomore classification; approval or directed studies application.

EHRD 289 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours. 0 to 4 Lab Hours.
Selected topics in an identified area of industrial educational. May be repeated for credit.
Prerequisite: Approval of instructor.

EHRD 291 Research
Credits 0 to 4. 0 to 4 Other Hours.
Research conducted under the direction of faculty member in educational human resource development. May be repeated 2 times for credit.
Prerequisites: Freshman or sophomore classification and approval of instructor.

EHRD 315 Applied Human Resource Development in the Workplace
Credits 3. 3 Lecture Hours.
Training and development context and synthesis of general industry-standard human resource practices in workplace environments for human resource practitioners.
Prerequisites: EHRD 203 and EHRD 210 with a grade of C or better; junior or senior classification.

EHRD 371 Applied Learning Principles
Credits 3. 3 Lecture Hours.
The overarching purpose of the course is to influence adult educators to make more intentional choices toward developmental growth in their work with adult learners; focus on adult learning theories and work strategies; meets writing intensive course requirement.
Prerequisites: Junior or senior classification and approval of instructor.

EHRD 372 Learning and Development in HRD
Credits 3. 3 Lecture Hours.
Concepts, knowledge and skills to access, design, develop, deliver and evaluate training programs; foundation of understanding roles of learning, training and development in organizations and systematic and evidence-based approach for designing and managing quality training programs in organizations.
Prerequisites: Grade of C or better in EHRD 203 and EHRD 210; junior or senior classification; or approval of instructor.

EHRD 374 Organizational Development
Credits 3. 3 Lecture Hours.
Introduction to major theories, concepts, skills and techniques for organization development in business and industry, education and the public sector.
Prerequisites: Grade of C or better in EHRD 203 and EHRD 210; junior or senior classification; or approval of instructor.

EHRD 391 Measurement and Evaluation in Human Resource Development and Technology Management
Credits 3. 3 Lecture Hours.
Measurement and evaluation techniques in the field of Human Resource Development and Technology Management; emphasis on understanding, calculation and application of basic testing, assessment and interpretation methods.
Prerequisites: Junior or senior classification or approval of instructor; EHRD 203 with a grade of C or better; MATH 141 and MATH 142.

EHRD 405 Principles and Practices of Leadership in Human Resource Development and Technology Management
Credits 3. 3 Lecture Hours.
Theories and concepts associated with learning in individuals and organizations; overview of leadership theories and learning theories within a context of developing leadership programs.
Prerequisites: Junior or senior classification and approval of instructor.

EHRD 408 Globalization and Diversity in the Workplace
Credits 3. 3 Lecture Hours.
Assist learners in the identification and understanding of globalization and diversity issues in learning, work and community; exploration of current issues, theories, trends and policy issues.
Prerequisites: Junior or senior classification and approval of instructor.
EHRD 413 Conflict Management and Dialogue  
Credits 3.3 Lecture Hours.  
Conflict management principles and practices in the workplace; engagement in meaningful conflict from a training and development perspective.  
**Prerequisites:** Grade of C or better in EHRD 203 and EHRD 210; junior or senior classification; or approval of instructor.

EHRD 473 Distance Learning Applications  
Credits 3.3 Lecture Hours.  
Application of distance learning principles to educational and training settings via a variety of distance learning modalities.  
**Prerequisites:** Junior or senior classification and approval of instructor.

EHRD 475 Multimedia Development for Training and Instruction  
Credits 3.3 Lecture Hours.  
Introduction to the development of multimedia as it applies to training and development; examine the application of multimedia principles to educational and training settings for both "face-to-face" and distance applications.  
**Prerequisites:** Junior or senior classification; or approval of instructor; ISYS 209 or approved substitution.

EHRD 477 Project Management in Organizations  
Credits 3.3 Lecture Hours.  
Application of principles of project management in organizations; focus on the development of project proposals, project planning using project management software; management of project personnel and resources.  
**Prerequisite:** Junior or senior classification or approval of instructor.

EHRD 479 Grants and Contracts  
Credits 3.3 Lecture Hours.  
Identify funding sources that support research and development activities; identify methods of securing funding; study state, national and private funding sources and how to become successful in submitting to each; complete a proposal to a funding agency and a management plan for a funded project.  
**Prerequisites:** Junior or senior classification and approval of instructor.

EHRD 481 Capstone Seminar in Human Resource Development and Technology Management  
Credits 3.3 Lecture Hours.  
Capstone seminar on significant issues in industry; transition from an academic environment to professional business environment; preparation of an individual professional portfolio; steps in searching and securing an internship position.  
**Prerequisites:** Junior or senior classification; admitted to professional phase; or approval of instructor.

EHRD 484 Professional Internship  
Credits 6.6 Other Hours.  
Directed internship in an organization to provide students with a learning experience supervised by professionals in organizational settings appropriate to the student's professional objectives. Must be taken on a satisfactory/unsatisfactory basis.  
**Prerequisites:** Senior classification and approval of instructor, admitted to professional phase, EHRD 481, EHRD 490.

EHRD 485 Directed Studies  
Credits 0 to 12.0 to 12 Other Hours.  
Directed readings or research problems in industrial education. Term report required.  
**Prerequisite:** Approval of department head.

EHRD 489 Special Topics in...  
Credits 1 to 4. 1 to 4 Lecture Hours. 1 to 4 Lab Hours.  
Selected topics in an identified area of industrial education. May be repeated for credit.  
**Prerequisite:** Approval of instructor.

EHRD 490 Research in Human Resource Development/Technology Management  
Credits 3.3 Lecture Hours.  
Investigative techniques currently employed in human resource development (HRD) and technology management (TCM) including the context of HRD/TCM research, planning HRD/TCM research, styles of HRD/TCM research, and strategies for data collection and researching.  
**Prerequisites:** Junior or senior classification; admitted to professional phase; EHRD 391 with a grade of C or better.

EHRD 491 Research  
Credits 0 to 4.0 to 4 Other Hours.  
Research conducted under the direction of faculty member in human resource development. May be repeated for credit.  
**Prerequisite:** Junior or senior classification.

ENDG - Engr Design Graphics (ENDG)

ENDG 105 Engineering Graphics  
Credits 2.1 Lecture Hour. 3 Lab Hours.  
(ENDR 1204, 1304) Engineering Graphics. Graphical approach to the engineering design process as applied to products; methods of graphical communications, three-dimensional geometry, working drawings, data analysis, computer graphics, introduction to team dynamics and creative problem solving.

ENDG 407 Computer Design Graphics  
Credits 3.3 Lecture Hours.  
Use of microcomputers with currently available CAD software as an aid in the design process and as a means of increasing engineering productivity. Review of ANSI standards and an introduction to a variety of computer graphics applications encountered in industry; user-oriented.  
**Prerequisite:** ENDG 105 or ENGR 112 or equivalent.

ENDG 408 Computer Graphics  
Credits 3.3 Lecture Hours.  
Current applications of computer graphics to produce orthographic views and rendered pictorials; introduction to several computer graphics software packages including applications in 3-D, parametric solid modeling, animation and rapid prototyping.  
**Prerequisite:** ENDG 105 or ENDG 407 or ENGR 112.

ENDG 409 Professional Computer Animation  
Credits 3.3 Lecture Hours.  
Advanced studies in computer graphics with an emphasis on the intricacies of graphical design and how it applies to a cohesive project design.  
**Prerequisites:** ENDG 407 and 408; junior or senior classification.

ENDG 485 Directed Studies  
Credits 1 to 3.1 to 3 Other Hours.  
Special problems in engineering design graphics to fit needs of individual students.  
**Prerequisite:** Approval of instructor.
ENDG 489 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Selected topics in an identified field of engineering design graphics.
Prerequisite: Approval of instructor.

ENDS - Environmental Design (ENDS)

ENDS 101 Design Process
Credits 3. 3 Lecture Hours.
(ARCH 1311) Design Process. Fundamental design processes, issues and theories relevant to design resolution and the creation of new ideas; creative thought processes from the formation of ideas through incubation to final product and future impact on the physical environment and society.

ENDS 105 Design Foundations I
Credits 4. 1 Lecture Hour. 6 Lab Hours.
(ENDS 101) Design Foundations I. Visual and functional design principles; development of skills in perception, thought and craft as they apply to the formation of two- and three-dimensional relationships; design attitudes and environmental awareness.
Prerequisite: Classification in environmental design and concurrent enrollment in ENDS 115.

ENDS 106 Design Foundations II
Credits 4. 1 Lecture Hour. 6 Lab Hours.
(ARCH 1404) Design Foundations II. Approaches to problem identification and problem solving emphasizing an awareness of human, physical and cultural factors influencing design; reinforcement of visual and verbal communication as applied to the design process.
Prerequisite: ENDS 105.

ENDS 108 Design and Visual Communication Foundations II
Credits 5. 1 Lecture Hour. 12 Lab Hours.
Approaches to problem identification and problem solving emphasizing human, physical and cultural factors influencing design; understanding of space, materiality and tectonics in a human body scale; development of drawing methods with emphasis on analytical drawing; reinforcement of visual and verbal communication as applied to design processes.
Prerequisite: ENDS 105 and ENDS 115.

ENDS 114 Introduction to Design Communication
Credits 3. 1 Lecture Hour. 4 Lab Hours.
Introduction to drawing methods for non-majors; free hand drawing as a creative and communicative tool to express design thinking, architectural form and space.

ENDS 115 Design Communication Foundations
Credits 3. 1 Lecture Hour. 4 Lab Hours.
(ARCH 1307, 1407) Design Communication Foundations. Introduction to and practice of tools, methods, techniques available for graphic communication; graphic communication and the design process; observation and other forms of free-hand drawing and drawing systems that develop representational and descriptive capabilities.
Prerequisites: Classification in environmental design and concurrent enrollment in ENDS 105.

ENDS 116 Design Communication Foundations II
Credits 3. 1 Lecture Hour. 4 Lab Hours.
(ARCH 1308, 1408) Design Communication Foundations II. Introduction to design drawing using a wide variety of tools ranging from conventional drafting and drawing equipment to the latest digital graphic applications; a focused investigation of analytical drawing as it contributes to the design process; experience of a wide variety of drawing conventions intended to equip students to navigate a design process.
Prerequisites: ENDS 115 and concurrent enrollment in ENDS 106.

ENDS 485 Directed Studies
Credits 1 to 6. 1 to 6 Other Hours.
Special problems in environmental design. May be repeated for up to 12 credit hours.
Prerequisite: Approval of instructor or department head.

ENDS 489 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Selected topics in an identified field of environmental design. May be repeated for up to 9 credit hours.
Prerequisite: Approval of instructor or department head.

ENDS 491 Research
Credits 1 to 4. 1 to 4 Other Hours.
Research conducted under the direction of faculty member in environmental design. May be repeated 2 times for credit.
Prerequisites: Admission to upper level in environmental design; approval of instructor and department head.

ENGL - English (ENGL)

ENGL 103 Introduction to Rhetoric and Composition
Credits 3. 3 Lecture Hours.
(ENGL 1301) Introduction to Rhetoric and Composition. Intensive study of and practice in writing processes, from invention and researching to drafting, revising and editing, both individually and corroboratively; emphasis on effective rhetorical choices including audience, purpose, arrangement and style; focus on writing the academic essay as a vehicle for learning, communicating and critical analysis.

ENGL 104 Composition and Rhetoric
Credits 3. 3 Lecture Hours.
(ENGL 1302) Composition and Rhetoric. Focus on referential and persuasive researched essays through the development of analytical reading ability, critical thinking and library research skills; for freshman and sophomore students only.

ENGL 201 Approaches to Literacy
Credits 3. 3 Lecture Hours.
Origins, functions, and philosophies of literacy; theories of text analysis; development of a broader concept of literacy; enhancement of instruction of communication skills.

ENGL 202 Environmental Literature
Credits 3. 3 Lecture Hours.
Texts from various periods and locations and in various genres and media that focus on the relationship of human beings to the rest of the natural world; topics vary from each section.

ENGL 203 Writing about Literature
Credits 3. 3 Lecture Hours.
Exploration of literature by genre and/or theme; literary analysis and interpretation; intensive writing about literature.
ENGL 204/AFST 204 Introduction to African-American Literature
Credits 3. 3 Lecture Hours.
Introduction to the writings of African Americans from the 18th century to the present, emphasizing the major themes and traditions.
Cross Listing: AFST 204/ENGL 204.

ENGL 205/AFST 205 Introduction to Africana Literature
Credits 3. 3 Lecture Hours.
Works, literary movements and genres of authors of African descent in the Americas, Europe and Africa.
Cross Listing: AFST 205/ENGL 205.

ENGL 206 Twenty-first Century Literature and Culture
Credits 3. 3 Lecture Hours.
Exploration of contemporary literature and culture; such topics as the new multicultural millennium; responses to September 11 and new global realities; the transformation of popular genres.

ENGL 209/LING 209 Introduction to Linguistics
Credits 3. 3 Lecture Hours.
Nature of human language and of linguistics; includes an introduction to phonology, syntax, semantics and morphology and the role of spoken and written discourse in sustaining societal arrangements.
Cross Listing: LING 209/ENGL 209. Credit cannot be given for both ENGL 209/LING 209 and LING 209/ENGL 209.

ENGL 210 Technical and Business Writing
Credits 3. 3 Lecture Hours.
(ENGL 2311) Technical and Business Writing. Focus on writing for professional settings; correspondence and researched reports fundamental to the technical and business workplace—memoranda, business letters, research proposals and presentations, use of graphical and document design; emphasis on audience awareness, clarity of communication and collaborative team-work.

ENGL 211/INTS 211 Foundations in Cultural Studies
Credits 3. 3 Lecture Hours.
Introduction to history, influence and major ideas of Cultural Studies; use of culture as a means to critique social problems and understand social forces; analysis of culture in its relationship to power; participation in project investigating contemporary U.S. youth subcultures.
Cross Listing: INTS 211/ENGL 211.

ENGL 212 Shakespeare
Credits 3. 3 Lecture Hours.
Exploration of selected works of Shakespeare.

ENGL 219 Literature and the Other Arts
Credits 3. 3 Lecture Hours.
Imaginative literature in conversation with aesthetic principles and such other arts as painting, sculpture, architecture, film and music.

ENGL 221/MODL 221 World Literature
Credits 3. 3 Lecture Hours.
(ENGL 2322) World Literature. Survey of world literature from the ancient world through the sixteenth century in relation to its historical and cultural contexts; texts selected from a diverse group of authors, traditions and genres.
Cross Listing: MODL 221/ENGL 221.

ENGL 222/MODL 222 World Literature
Credits 3. 3 Lecture Hours.
(ENGL 2333) World Literature. Survey of world literature from the seventeenth century to the present in relation to its historical and cultural contexts; texts selected from a diverse group of authors, traditions and genres.
Cross Listing: MODL 222/ENGL 222.

ENGL 227 American Literature: The Beginnings to Civil War
Credits 3. 3 Lecture Hours.
(ENGL 2327) American Literature: The Beginnings to Civil War. Representative writers, genres and movements of the period.

ENGL 228 American Literature: Civil War to Present
Credits 3. 3 Lecture Hours.
(ENGL 2328) American Literature: Civil War To Present. Expressions of the American experience in realism, regionalism and naturalism; varieties of modernist and contemporary writing; the rise of ethnic literature and experimental literary forms.

ENGL 231 Survey of English Literature I
Credits 3. 3 Lecture Hours.
(ENGL 2322) Survey of English Literature I. Literature of England from Anglo-Saxon times through the 18th century.

ENGL 232 Survey of English Literature II
Credits 3. 3 Lecture Hours.
(ENGL 2323) Survey of English Literature II. Literary works from the late 18th century to the 21st century by authors in Great Britain and its colonies.

ENGL 235 Elements of Creative Writing
Credits 3. 3 Lecture Hours.
(ENGL 2307) Elements of Creative Writing. Initiation into the craft of creative writing in prose and poetry; extensive reading in the genres; peer workshops.

ENGL 241 Advanced Composition
Credits 3. 3 Lecture Hours.
Focuses on the writing of advanced academic and professional prose by integrating computer technology in the analysis and production of that prose.

ENGL 251/FILM 251 Introduction to Film Analysis
Credits 3. 3 Lecture Hours.
Fundamental aspects of film analysis and criticism.
Cross Listing: FILM 251/ENGL 251.

ENGL 253 Introduction to Cultural Studies and Popular Culture
Credits 3. 3 Lecture Hours.
Introduction to Cultural Studies and Popular Cultural. An introduction to the history, theories and methods of contemporary cultural studies. The course will explore key concepts in cultural theory to examine specific aspects of popular culture as well as cultural sites and practices so as to expand upon the analytical and critical thinking skills learned in ENGL 104 and 203.
Prerequisite: ENGL 104.

ENGL 285 Directed Studies
Credits 0 to 4. 0 to 4 Other Hours.
Readings selected for specific need of major or minor in English.

ENGL 289 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Selected topics in an identified area of English. May be repeated for credit.

ENGL 291 Research
Credits 0 to 3. 0 to 3 Lecture Hours.
Research conducted under the direction of faculty member in English.
Prerequisites: 3 hours of 200-level literature; freshman or sophomore classification and approval of instructor.
ENGL 303 Approaches to English Studies  
Credits 3.3 Lecture Hours.  
A writing intensive exploration of the methodologies and major topics of English studies.  
**Prerequisite:** ENGL 104 or registration therein; junior or senior classification or approval of instructor.

ENGL 304 Topics in Digital Research  
Credits 3.3 Lecture Hours.  
Topics in the studies of digital humanities; introduction to making/interpreting digital materials, the surrogates of books, paintings, etc., that form our cultural heritage, as well as digitally-born literature, art and culture; reflection on digital cultures/digital archives; theory and practice of creating and research digital resources. May be taken three times for credit.  
**Prerequisite:** Junior or senior classification or approval of instructor.

ENGL 305 Texas Literature  
Credits 3.3 Lecture Hours.  
Examination of Texas literature, culture and multi-media; exploration of the development of Texas identities and responses to the rich cultural diversity within the state; topics vary from each section.  
**Prerequisite:** Junior or senior classification.

ENGL 308 History of Literary Criticism  
Credits 3.3 Lecture Hours.  
History of literary thought from antiquity to the present, including writers such as Plato, Aristotle, “Longinus,” Sidney, Shelley, and Dryden; analysis of genres such as tragedy, lyric, and film; critical approaches such as new criticism, structuralism, deconstruction, Marxism, feminism, new historicism, and film studies.  
**Prerequisite:** 3 credits of literature at 200-level or above.

ENGL 310/LING 310 History of the English Language  
Credits 3.3 Lecture Hours.  
Phonological, grammatical and lexical history of the English language; brief discussion of some other Indo-European languages; principles of linguistic change, as reflected in English.  
**Prerequisite:** LING 209/ENGL 209 or ENGL 209/LING 209.  
**Cross Listing:** LING 310/ENGL 310. Credit cannot be given for both ENGL 310/LING 310 and LING 310/ENGL 310.

ENGL 313 Medieval English Literature  
Credits 3.3 Lecture Hours.  
Old and Middle English literature exclusive of Chaucer, including such authors and works as Beowulf, The Dream of the Rood, Sir Gawain and the Green Knight, Piers Plowman, Malory, Julian of Norwich, Kempe, the mystery plays and the lyrics.  
**Prerequisite:** 3 credits of literature at 200-level or above.

ENGL 314 The English Renaissance  
Credits 3.3 Lecture Hours.  
Period course in the poetry, prose and drama of England in the 16th century.  
**Prerequisite:** 3 credits of literature at 200-level or above.

ENGL 315 Seventeenth-Century Literature  
Credits 3.3 Lecture Hours.  
Period course in English poetry, prose and drama of the 17th century.  
**Prerequisite:** 3 credits of literature at 200-level or above.

ENGL 316 Eighteenth-Century Literature and Culture  
Credits 3.3 Lecture Hours.  
Period course in English poetry, prose and drama of the 18th century.  
**Prerequisite:** 3 credits of literature at 200-level or above.

ENGL 317 Early British Drama  
Credits 3.3 Lecture Hours.  
Period course in early British, non-Shakespearean drama to 1642.  
**Prerequisite:** 3 credits of literature at the 200-level or above.

ENGL 320 Technical and Professional Editing  
Credits 3.3 Lecture Hours.  
Principles and techniques of technical editing for print and electronic media, including standards, style, copy-editing, comprehensive editing and project management.  
**Prerequisite:** ENGL 210.

ENGL 321 Nineteenth-Century Literature (Romantic)  
Credits 3.3 Lecture Hours.  
Representative texts in English generated throughout the British empire in the late-18th and early-19th centuries.  
**Prerequisite:** 3 credits of literature at 200-level or above.

ENGL 322 Nineteenth-Century Literature (Victorian)  
Credits 3.3 Lecture Hours.  
Period course in English poetry and prose of major Victorian authors.  
**Prerequisite:** 3 credits of literature at 200-level or above.

ENGL 323 The American Renaissance  
Credits 3.3 Lecture Hours.  
Period course in the American Renaissance, covering such writers as Emerson, Hawthorne, Thoreau, Alcott, Fuller, Douglass, Melville, Poe, Stowe and Whitman.  
**Prerequisite:** 3 credits of literature at 200-level or above.

ENGL 329/AFST 329 African-American Literature Pre-1930  
Credits 3.3 Lecture Hours.  
Major works of the African-American literary tradition from the 18th century to 1930 studied within cultural and historical context.  
**Prerequisites:** 3 credits of literature at 200-level or above.  
**Cross Listing:** AFST 329/ENGL 329.

ENGL 330 Arthurian Literature  
Credits 3.3 Lecture Hours.  
Legend of King Arthur in English and American literature from its Medieval origins to the present.  
**Prerequisite:** Junior or senior classification.

ENGL 331 Fantasy Literature  
Credits 3.3 Lecture Hours.  
An exploration of origins and development of fantasy literature, including representative writers, genres and texts.  
**Prerequisites:** Junior or senior classification.

ENGL 333/WGST 333 Gay and Lesbian Literature  
Credits 3.3 Lecture Hours.  
Gay and lesbian literature from classical times to present, studied in its historical and cultural context.  
**Prerequisite:** Junior or senior classification.  
**Cross Listing:** WGST 333/ENGL 333.

ENGL 334 Science Fiction Present and Past  
Credits 3.3 Lecture Hours.  
Origins and development of the science fiction genre.  
**Prerequisite:** Junior or senior classification.

ENGL 335 Literature of the Sea  
Credits 3.3 Lecture Hours.  
Significance of the sea in fictional and factual accounts, such as novels, short stories, poems, and narratives of sailors and seafaring life.  
**Prerequisites:** Three credits of literature at 200 level or above. Junior or senior classification or approval of instructor.
ENGL 336 Life and Literature of the Southwest
Credits 3. 3 Lecture Hours.
Exploration of Southwestern literature, including such authors as Abbey, Anaya, Cabeza de Vaca, Cather, Krutch, McCarty, Momaday, Paz, Paredes and Porter.
Prerequisite: Junior or senior classification.

ENGL 337 Life and Literature of the American South
Credits 3. 3 Lecture Hours.
Study of writing and culture of the American South based on reading and analysis of key texts by representative authors.
Prerequisite: Junior or senior classification.

ENGL 338 American Ethnic Literature
Credits 3. 3 Lecture Hours.
Multi-ethnic study of American Literature, the writings of Black Americans, American Indians, Latinos/Latinas, Jewish Americans, as well as other ethnic groups.
Prerequisite: Junior or senior classification.

ENGL 339/AFST 339 African-American Literature Post-1930
Credits 3. 3 Lecture Hours.
Major works of the African-American literary tradition from the 1930s to the present studied in their cultural and historical context.
Prerequisites: 3 credits of literature at 200-level or above.
Cross Listing: AFST 339/ENGL 339.

ENGL 340 Modern and Contemporary Drama
Credits 3. 3 Lecture Hours.
Representative plays and performances from the late nineteenth century to the present.
Prerequisite: 3 credits of literature at 200-level or above.

ENGL 345 Writers' Studies: Prose or Poetry
Credits 3. 3 Lecture Hours.
A different topic for fiction writers or poets each term; may include historical development of genres; connection between biography and artistic production; study of writers' theories of the art of fiction or poetry.
Prerequisites: ENGL 235; junior or senior classification.

ENGL 347 Writers' Workshop: Prose
Credits 3. 3 Lecture Hours.
Production of advanced, complete stories; peer workshops; extensive reading. May be repeated 1 time for credit.
Prerequisite: ENGL 235; junior or senior classification or approval of instructor.

ENGL 348 Writers' Workshop: Poetry
Credits 3. 3 Lecture Hours.
Production of advanced, complete poems; peer workshops; extensive reading. May be repeated 1 time for credit.
Prerequisite: ENGL 235; junior or senior classification or approval of instructor.

ENGL 350 Twentieth-Century Literature to World War II
Credits 3. 3 Lecture Hours.
Novelists, poets and dramatists writing in English from the late nineteenth to mid-twentieth century.
Prerequisite: 3 credits of literature at 200-level or above.

ENGL 351/FILM 351 Advanced Film
Credits 3. 3 Lecture Hours.
A different film topic each term; sample topics: major directors, historical periods, fiction into film, film genres. May be repeated for credit.
Prerequisite: ENGL 251/FILM 251 or FILM 251/ENGL 251 or FILM 301 or approval of instructor; junior or senior classification.
Cross Listing: FILM 351/ENGL 351.

ENGL 352 Literature, World War II to Present.
Credits 3. 3 Lecture Hours.
Novelists, poets and dramatists from the World War II era to the present.
Prerequisite: Junior or senior classification.

ENGL 353 History of Rhetoric
Credits 3. 3 Lecture Hours.
Exploration of the major approaches to the theory and practice of oral and written rhetoric and discourse up to the end of the 19th century.
Prerequisite: Junior or senior classification.

ENGL 354 Modern Rhetorical Theory
Credits 3. 3 Lecture Hours.
Study of 20th and 21st century rhetorical theories and theorists; focus on relationships among rhetoric and culture, such as rhetoric in oral and textual communities, rhetoric as a method of literary interpretation, rhetoric and linguistics, rhetoric as theorized and taught across academic communities.
Prerequisite: Junior or senior classification.

ENGL 355 The Rhetoric of Style
Credits 3. 3 Lecture Hours.
Fosters an appreciation for and better understanding of English prose style; the history of English prose; representative prose models for analysis and imitation; the impact of computer analysis.
Prerequisite: Junior or senior classification.

ENGL 356/FILM 356 Literature and Film
Credits 3. 3 Lecture Hours.
Novels and films based on them; writers and filmmakers such as Virginia Woolf, John Steinbeck, John Ford, Sally Potter, John Huston, Charlotte Bronte and Peter Bogdonovich.
Prerequisites: 3 credits of literature at the 200-level; junior or senior classification or approval of instructor.
Cross Listing: FILM 356/ENGL 356.

ENGL 357 Native American Rhetorics and Literatures
Credits 3. 3 Lecture Hours.
Examination of Native American rhetorics and literatures with a focus on the relationship between composed, performed, and material rhetorics; covering Native American rhetors and writers from pre-colonization to the present and contextualizing them within contemporary Native issues.
Prerequisite: Junior or senior classification or approval of instructor.

ENGL 358 Forms of Creative Writing
Credits 3. 3 Lecture Hours.
Major forms of writing in prose or poetry, depending on instructor; analysis of structure coupled with writing assignments illustrating principles of form in narrative and/or lyrical modes. May be taken three times for credit.
Prerequisites: ENGL 235; junior or senior classification.

ENGL 359 Forms of Creative Writing
Credits 3. 3 Lecture Hours.
Representative writers, genres, texts and movements.
Prerequisite: Junior or senior classification.

ENGL 360 Literature for Children
Credits 3. 3 Lecture Hours.
Survey of historical and contemporary literature for adolescents, including such forms as fantasy, domestic fiction, and the problem novel.
Prerequisite: Junior or senior classification.
ENGL 362/HISP 362 Latino/a Literature
Credits 3. 3 Lecture Hours.
Literature by U.S.-based Latino/a authors writing mostly in English; examination of historical and social contexts of cultural production; may include novels, poetry, short stories, plays, and films to gain understanding of aesthetic expression of diverse Latino/a authors, including but not limited to Mexican Americans, Puerto Ricans, Cuban Americans, and Dominican Americans.
Prerequisite: Junior or senior classification.
Cross Listing: HISP 362/ENGL 362.

ENGL 365/RELS 360 The Bible as Literature
Credits 3. 3 Lecture Hours.
Prerequisite: Junior or senior classification.
Cross Listing: RELS 360/ENGL 365.

ENGL 372 American Poetry
Credits 3. 3 Lecture Hours.
Exploration of the development of American poetic traditions, with an emphasis on the major poetry of 19th and 20th centuries.
Prerequisite: 3 credits of literature at 200-level or above.

ENGL 373 American Realism and Naturalism
Credits 3. 3 Lecture Hours.
Exploration of the literature produced in the United States between the Civil War and World War I, such as works by Twain, James, Freeman, Jewett, Chesnutt, Crane, Dreiser, Wharton.
Prerequisites: 3 credits of literature at 200-level or above.

ENGL 374/WGST 374 Women Writers
Credits 3. 3 Lecture Hours.
History of literature by women in English; emphasis on continuity of ideas and on literary contributions; study of a variety of genres with particular attention to the significance of gender in the racial, social, sexual and cultural contexts of women writing in English.
Prerequisite: Junior or senior classification.
Cross Listing: WGST 374/ENGL 374.

ENGL 375 Nineteenth-Century American Novel
Credits 3. 3 Lecture Hours.
An exploration of the development of the American novel; study of representative novels from the early national period, the American Renaissance, and realism and naturalism.
Prerequisite: 3 credits of literature at 200-level or above.

ENGL 376 The American Novel Since 1900
Credits 3. 3 Lecture Hours.
Representative novels of 20th and 21st century American writers; emphasis on varied literary movements and on thematic and formal innovations as reflections of/responses to social transformations in American society since 1900.
Prerequisite: Junior or senior classification.

ENGL 377 The British Novel to 1870.
Credits 3. 3 Lecture Hours.
Representative works illustrating the development of the novel, by writers resident in Great Britain and its colonies, from its beginnings to the late nineteenth century.
Prerequisite: 3 credits of literature at 200-level or above.

ENGL 378 The British Novel, 1870 to Present.
Credits 3. 3 Lecture Hours.
Representative works illustrating development of the novel by writers resident in Great Britain and its colonies from the late nineteenth century forward.
Prerequisite: Junior or senior classification.

ENGL 379/AFST 379 Postcolonial Literatures
Credits 3. 3 Lecture Hours.
Exploration of key terms, themes and debates within global literature written by colonized, occupied and diasporic peoples.
Prerequisites: 3 credits of literature at the 200-level or above.
Cross Listing: AFST 379/ENGL 379.

ENGL 385 Playwriting
Credits 3. 3 Lecture Hours.
The craft of writing plays and practical experience in writing plays of various lengths; structure, building of ideas into dramatic situations, use of dialogue and movement.
Prerequisite: ENGL 235; junior or senior classification or approval of instructor.

ENGL 386 Creative Nonfiction
Credits 3. 3 Lecture Hours.
Practical study and application of literary nonfiction, the general audience essay, the memoir, and related nonfiction forms; with extensive workshop time and attention given to student writing, expert and peer review as well as readings from authors in the genre.
Prerequisites: ENGL 235; junior or senior classification.

ENGL 390 Studies in British Literature
Credits 3. 3 Lecture Hours.
Exploration of a significant topic or period in British literature; features current faculty research on such topics as Victorian fantasy literature, social identity in medieval Britain and Ireland and children in film.
Prerequisites: 3 credits of literature at 200-level or above; junior or senior classification.

ENGL 391 Folklore, Literature, and World Cultures
Credits 3. 3 Lecture Hours.
Theories of folklore and vernacular culture; exploration of the relationship between oral literature and the forms of vernacular culture, including film, festival and dance.
Prerequisites: Junior or senior classification.

ENGL 392/RELS 392 Studies in Literature, Religion and Culture
Credits 3. 3 Lecture Hours.
Exploration of literature treating significant religious topics in the context of cultural setting; features current faculty research on such topics as Tolkien and the making of myth, C.S. Lewis, texts and cultures of the Middle East and Victorian women writers and religion.
Prerequisites: 3 credits of literature at 200-level or above; junior or senior classification.
Cross Listing: RELS 392/ENGL 392.

ENGL 393/AFST 393 Studies in Africana Literature and Culture
Credits 3. 3 Lecture Hours.
Exploration of the literature produced in the United States between the time and attention given to student writing, expert and peer review as well as readings from authors in the genre.
Prerequisites: ENGL 235; junior or senior classification.

ENGL 235; junior or senior classification or approval of instructor.
ENGL 394 Studies in Genre
Credits 3. 3 Lecture Hours.
Theory and practice of a single genre including analysis of its history and development; features current faculty research on such topics as women standup comics, British short stories and Irish history on stage and screen. May be repeated once for credit.
Prerequisites: 3 credits of literature at 200-level or above; junior or senior classification.

ENGL 396 Studies in American Literature
Credits 3. 3 Lecture Hours.
Exploration of a significant topic or period in American literature; features current faculty research on such topics as Asian-American women writers, American music and literature and American Gothic.
Prerequisites: 3 credits of literature at 200-level or above; junior or senior classification.

ENGL 401 Contemporary Literary Theory
Credits 3. 3 Lecture Hours.
Exposure to the discourses of contemporary theory in engagement with other academic disciplines; study of major theoretical schools, debates, and critiques.
Prerequisites: 3 credits of literature at the 300-level; junior or senior classification.

ENGL 403 Language and Gender
Credits 3. 3 Lecture Hours.
Language and gender from a sociolinguistic perspective; gender in the words and structures of language; gender representation and gendered language use in the media and a variety of sociocultural contexts; language use in intimate relationships; computer-mediated discourse; language, sexuality, and sexual orientation.
Prerequisite: Junior or senior classification.
Cross Listing: LING 403 and WGST 403.

ENGL 412 Studies in Shakespeare
Credits 3. 3 Lecture Hours.
Advanced study of a significant topic in Shakespeare.
Prerequisites: 3 credits of literature at the 300-level; junior or senior classification.

ENGL 414 Milton
Credits 3. 3 Lecture Hours.
In-depth study of poetry and selected prose works of John Milton.
Prerequisite: 3 credits of literature at the 300-level; junior or senior classification.

ENGL 415 Studies in a Major Author
Credits 3. 3 Lecture Hours.
Exploration of a major author as a vehicle for emphasizing intensive analysis, scholarship and literary criticism.
Prerequisite: 3 credits of literature at 300-level; junior or senior classification.

ENGL 431 Chaucer
Credits 3. 3 Lecture Hours.
Intensive analysis of Chaucer's works in Middle English, including engagement with published criticism and scholarship.
Prerequisite: 3 credits of literature at 300-level; junior or senior classification.

ENGL 460 Digital Authoring Practices
Credits 3. 3 Lecture Hours.
Analysis and practice of authoring in digital environments, including individual and collaborative approaches, audience concerns, theoretical, ethical and stylistic issues; environments and topics may include web design, content management system (CMS), text encoding, project management, usability, version tracking, content authoring and accessibility.
Prerequisites: ENGL 210; junior or senior classification.

ENGL 461 Advanced Syntax and Rhetoric
Credits 3. 3 Lecture Hours.
Points of view toward language study; traditional syntax; points of view toward rhetoric; Christensen's rhetoric of the paragraph; analysis of written discourse.
Prerequisite: Senior classification or approval of instructor.

ENGL 462 Rhetoric in Cultural Context
Credits 3. 3 Lecture Hours.
Theories concerning the influence of socio-cultural context on expressive forms and how such forms are used to achieve social and communicative aims; analysis of examples of written, verbal, and visual rhetorics from various cultures illustrating the impact that expressive forms have on social life.
Prerequisites: ENGL 353, ENGL 354, or ENGL 355; junior or senior classification.

ENGL 474/WGST 474 Studies in Women Writers
Credits 3. 3 Lecture Hours.
A different topic each term examining women's writing through historical period, genre, cross-cultural study and/or feminist literary theory. May be repeated for credit.
Prerequisites: 3 credits of literature at the 300-level; junior or senior classification.
Cross Listing: WGST 474/ENGL 474.

ENGL 481 Senior Seminar
Credits 3. 3 Lecture Hours.
Capstone seminar on significant figures, movements or issues with special attention to methods and materials of scholarship.
Prerequisites: ENGL 303; senior classification.

ENGL 484 Internship
Credits 0 to 3. 0 to 3 Lecture Hours.
Directed internship in a public or private organization to provide students with on-the-job training and applied research experience appropriate to career objectives. May be taken three times for credit. Must be taken on a satisfactory/unsatisfactory basis.
Prerequisites: Approval of department head; junior or senior classification.

ENGL 485 Directed Studies
Credits 0 to 3. 0 to 3 Other Hours.
Readings selected for specific need of major or minor in English.

ENGL 489 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Selected topics in an identified area of English language and literature. May be repeated for credit.

ENGL 491 Research
Credits 0 to 3. 0 to 3 Lecture Hours.
Research conducted under the direction of faculty member in English. May be taken three times for credit.
Prerequisites: 12 credits of English, including 3 at 300-level; junior or senior classification and approval of instructor.
ENGR 101 Energy: Resources, Utilization and Importance to Society
Credits 4. 3 Lecture Hours. 2 Lab Hours.
Introductory course about current and potential energy sources, the link between energy and wealth, and the consequences of action or inaction concerning energy and the environment.

ENGR 111 Foundations of Engineering I
Credits 2. 1 Lecture Hour. 3 Lab Hours.
Introduction to the engineering profession, ethics, and disciplines; development of skills in teamwork, problem solving and design; other topics included, depending on the major, are: emphasis on computer applications and programming, visualization and CAD tools, introduction to electrical circuits, semiconductor devices, digital logic, communications and their application in systems; Newton's laws, unit conversions, statistics, computers, Excel; basic graphics skills; visualization and orthographic drawings.
Corequisite: MATH 151; admission to the College of Engineering.

ENGR 112 Foundations of Engineering II
Credits 2. 1 Lecture Hour. 3 Lab Hours.
Continuation of ENGR 111. Topics include, depending on the major: emphasis on computer applications and programming and solids modeling using CAD tools or other software; fundamentals of engineering science; advanced graphic skills.
Prerequisite: ENGR 111, MATH 151.

ENGR 181 Engineering Honors Seminar I
Credit 1. 1 Lecture Hour.
Survey of interdisciplinary topics related to the professional practice of engineering; seminars with practicing professionals in industry and government. Must be taken on a satisfactory/unsatisfactory basis.
Prerequisites: Certificate in engineering honors membership; freshman or sophomore classification.

ENGR 270 Engineering Projects in Community Service
Credit 1. 1 Lecture Hour.
Project course using team approach to engage students in open-ended community service projects involving non-profit agencies; includes project management, understanding the complete design process, awareness of the customer in engineering design, and the ability to communicate effectively. May be taken six times for credit.
Prerequisites: ENGR 111 or approval of instructor; freshman or sophomore classification in an engineering major.

ENGR 281 Engineering Honors Seminar II
Credit 1. 1 Lecture Hour.
Introduction to research and development in both university and industry settings. Must be taken on a satisfactory/unsatisfactory basis.
Prerequisites: Certificate in engineering honors membership; ENGR 181.

ENGR 285 Directed Studies
Credits 0 to 4. 0 to 4 Other Hours.
Special problems in any area of engineering.
Prerequisites: Freshman or sophomore classification; approval of department head.

ENGR 289 Special Topics in...
Credits 0 to 4. 0 to 4 Lecture Hours. 0 to 4 Lab Hours.
Selected topics in an identified area of engineering. May be repeated for credit.
Prerequisite: Approval of instructor.

ENGR 291 Research
Credits 0 to 4. 0 to 4 Other Hours.
Research conducted under the direction of faculty member in the college of engineering. May be taken four times for credit.
Prerequisites: Freshman or sophomore classification and approval of instructor.

ENGR 301 College of Engineering Study Abroad
Credits 0 to 18. 0 to 18 Other Hours.
For students in approved programs abroad. May be repeated for credit.
Prerequisites: Admission to approved program; approval of study abroad coordinator.

ENGR 381 Engineering Honors Seminar III
Credit 1. 1 Lecture Hour.
Presentations by practicing engineers and professionals addressing engineering project management process and practice; discussion forum to better understand the opportunities and challenges of engineering project management and the analytical tools and skills required to be successful. Must be taken on a satisfactory/unsatisfactory basis.
Prerequisites: ENGR 333 or approval of instructor; junior or senior classification in the College of Engineering or biological and agricultural engineering or approval of instructor.

ENGR 380 Seminar Series in Engineering Project Management
Credit 1. 1 Lecture Hour.
Presentations by practicing engineers and professionals addressing engineering project management process and practice; discussion forum to better understand the opportunities and challenges of engineering project management and the analytical tools and skills required to be successful. Must be taken on a satisfactory/unsatisfactory basis.
Prerequisites: ENGR 333 or approval of instructor; junior or senior classification in the College of Engineering or biological and agricultural engineering (BAEN).

ENGR 381 Engineering Honors Seminar III
Credit 1. 1 Lecture Hour.
Exploration of research and development opportunities; university and industry research; research commercialization. To be taken on a satisfactory/unsatisfactory basis.
Prerequisite: Certificate in engineering honors membership; ENGR 281.

ENGR 385 Problems for Co-Op Students
Credits 1 to 3. 1 to 3 Other Hours.
Special problems in engineering for cooperative education students. Problems related to student's work assignment culminating in a research paper. Three hours may be used as technical elective, and one additional hour may be used as free elective. A total of 4 hours may be used toward graduation.
Prerequisite: Approval of department head.
ENGR 401 Interdisciplinary Design
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Instruction and practice in the following design process applied to an interdisciplinary design project: establish the customer need; determine requirements in terms of function (what) and performance (how well); develop alternative design concepts; perform trade-off studies among performance, cost and schedule; embodiment and detail design; iterate the above steps; major interdisciplinary design project.
**Prerequisites:** Senior classification and approval of instructor.

ENGR 402 Interdisciplinary Design II
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Product detail and design development process including case studies; may include project management, marketing considerations, manufacturing detailed design specifications; failure modes, applications of codes and standards, selection of design margins; product (component) development guidelines; intellectual property, product liability and ethical responsibility.
**Prerequisites:** ENGR 401; junior or senior classification.

ENGR 410 Global Engineering Design
Credits 0 to 3. 0 to 3 Lecture Hours.
Intercultural models and their application to engineering design in diverse, multinational and multidisciplinary settings; engineering design project working in international teams of students, faculty and industry experts; applying engineering skills to the project; includes the study and application of intercultural models, global enterprise fundamentals and remote collaboration technologies; required for the International Engineering Certificate.
**Prerequisite:** Junior or senior classification or approval of instructor.

ENGR 430 Fundamentals of Subsea Engineering
Credits 3. 3 Lecture Hours.
Orientation to subsea engineering fundamentals, including SURF (Subsea, Umbilicals/Controls, Risers, Flowlines) equipment and configurations; exposure to practical, industry focused problems; subsea equipment components; design considerations and design drivers; subsea production operations; integrity critical maintenance activities.
**Prerequisite:** Junior or senior classification; enrolled in the College of Engineering or approval of instructor.

ENGR 470 Engineering Projects in Community Service
Credits 1 to 2. 1 to 2 Other Hours.
Project course using team approach to engage students in open-ended community service projects involving non-profit agencies; includes project management, understanding the complete design process, awareness of the customer in engineering design, and the ability to communicate effectively. May be taken six times for credit.
**Prerequisites:** ENGR 111 or approval of instructor; junior or senior classification in an engineering major.

ENGR 482/PHIL 482 Ethics and Engineering
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Development of techniques of moral analysis and their application to ethical problems encountered by engineers, such as professional employee rights and whistle blowing; environmental issues; ethical aspects of safety, risk and liability and conflicts of interest; emphasis on developing the capacity for independent ethical analysis of real and hypothetical cases.
**Prerequisite:** Junior classification.
**Cross Listing:** PHIL 482/ENGR 482.

ENGR 484 International Engineering Internship
Credits 0 to 6. 0 to 6 Lecture Hours.
International Engineering Internship.
**Prerequisite:** Junior or senior classification.

ENGR 485 Directed Studies
Credits 0 to 4. 0 to 4 Other Hours.
Directed individual study of problems in any area of engineering. May be taken 3 times for credit.
**Prerequisites:** Junior or senior classification; approval of the college.

ENGR 489 Special Topics in...
Credits 0 to 4. 0 to 4 Lecture Hours. 0 to 6 Lab Hours.
Selected topics in an identified field of engineering. May be repeated for credit.

ENGR 491 Research
Credits 0 to 4. 0 to 4 Other Hours.
Research conducted under the direction of faculty member in the College of Engineering. May be repeated 3 times for credit. Registration in multiple sections of this course is possible within a given semester provided that the per semester credit hour limit is not exceeded.
**Prerequisites:** Junior or senior classification and approval of instructor.

**ENST-Environmental Studies (ENST)**

ENST 291 Research
Credits 1 to 4. 1 to 4 Other Hours.
Research conducted under the direction of faculty member in environmental studies. May be repeated 2 times for credit.
**Prerequisites:** Freshman or sophomore classification and approval of instructor.

ENST 491 Research
Credits 1 to 4. 1 to 4 Other Hours.
Research conducted under the direction of faculty member in environmental studies. May be repeated 3 times for credit. Registration in multiple sections of this course are possible within a given semester provided that the per semester credit hour limit is not exceeded.
**Prerequisites:** Freshman or sophomore classification and approval of instructor.

**ENTC - Engineering Technology (ENTC)**

ENTC 289 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours. 0 to 4 Lab Hours.
I, II, S Selected topics in an identified area of engineering technology. May be repeated for credit.
**Prerequisite:** Approval of instructor.

ENTC 481 Seminar
Credit 1. 1 Lecture Hour.
Presentation of selected topics from current literature and related industrial operations in various technical areas; films showing practical application of manufacturing and industrial processes; lectures from industrial representatives.
**Prerequisite:** Senior classification.
ENTC 484 Professional Internship  
Credit 1. 1 Lecture Hour.  
Directed internship in a private firm, government agency/laboratory, or non-governmental organization to provide work and/or research experience related to the student’s program and career objectives. May be taken two times for credit.  
Prerequisites: Junior and senior classification and approval of internship agency and instructor.

ENTC 485 Directed Studies  
Credits 1 to 6. 1 to 6 Other Hours.  
Permits work in a special problem area on an individual basis with the intent of promoting independent reading, research and study; to supplement existing course offerings or subjects not presently covered.  
Prerequisites: Senior classification and approval of instructor.

ENTC 489 Special Topics in...  
Credits 1 to 4. 1 to 4 Lecture Hours. 0 to 4 Lab Hours.  
Selected topics in an identified area of engineering technology.  
Prerequisite: Approval of instructor.

ENTC 491 RESEARCH  
Credits 1 to 4. 1 to 4 Other Hours.  
Research conducted under the direction of faculty member in the college of engineering. May be taken three times for credit. Registration in multiple sections of this course is possible within a given semester provided that the per semester credit hour limit is not exceeded.  
Prerequisites: Junior or senior classification and approval of instructor.

ENTC 493 RESEARCH  
Credits 0 to 4. 0 to 4 Other Hours.  
Research conducted under the direction of faculty member in entomology.  
Prerequisite: Approval of instructor.

ENTC 497 RESEARCH  
Credits 0 to 6. 0 to 6 Other Hours.

ENTO - Entomology (ENTO)

ENTO 201 General Entomology  
Credits 3. 2 Lecture Hours. 2 Lab Hours.  
Survey of the major classes of arthropods with special emphasis on species of economic or biological importance; general insect anatomy, physiology, metamorphosis and classification; survey of the biology of insect orders and major families using common injurious and beneficial species to relate material to production agriculture and the urban environment.

ENTO 208 Veterinary Entomology  
Credits 2. 2 Lecture Hours.  
Insects and their relatives causation of economic loss, impacts to well-being and transmission of disease pathogens to domestic and companion animals and wildlife as well as health and well-being of humans through occupational or recreational exposure; insect biology, economic importance and principles and methods of prevention and control.  
Prerequisite: Co-enrollment in ENTO 209.

ENTO 209 Veterinary Entomology Laboratory  
Credit 1. 2 Lab Hours.  
Insects and their relatives causation of economic loss, impacts to well-being and transmission of disease pathogens to domestic and companion animals and wildlife, as well as health and well-being of humans through occupational or recreational exposure; laboratory emphasizes identification of major arthropod pests, use of microscopy and dissection equipment.  
Prerequisite: Concurrent enrollment with ENTO 208.

ENTO 210 Global Public Health Entomology  
Credits 3. 3 Lecture Hours.  
Impacts of insects and insect-borne diseases on public health and well-being around the globe; insect biology, bloodfeeding, and transmission of human diseases; role of insect borne diseases on human history, socio-economic development, and public health infrastructure.  
Prerequisite: Freshman or sophomore classification or approval of instructor.

ENTO 285 Directed Studies  
Credits 1 to 4. 1 to 4 Other Hours.  
Directed individual study in entomology.  
Prerequisites: Freshman or sophomore classification; approval of instructor and department head.

ENTO 289 Special Topics in...  
Credits 1 to 4. 1 to 4 Lecture Hours.  
Selected topics in an identified area of entomology. May be repeated for credit.  
Prerequisite: Approval of instructor.

ENTO 291 Research  
Credits 0 to 4. 0 to 4 Other Hours.  
Research conducted under the direction of faculty member in entomology. May be repeated 2 times for credit.  
Prerequisites: Freshman or sophomore classification and approval of instructor.

ENTO 300/WFSC 300 Field Studies  
Credits 3. 3 Other Hours.  
Integration of principles of animal and plant ecology with environmental factors to characterize wildlife populations. Intensive analysis of specific areas will emphasize either the development of a wildlife management plan or a general vertebrate natural history survey.  
Prerequisite: Junior or senior classification.  
Cross Listing: WFSC 300/ENTO 300.

ENTO 301 Biodiversity and Biology of Insects  
Credits 4. 3 Lecture Hours. 3 Lab Hours.  
Introduction to orders and most important families of insects; order-level morphology and family-level natural history; collection of insects identified to family level provides introduction to collection methods and specimen preparation.  
Prerequisites: ENTO 201 or ENTO 208; 6 hours of biological sciences; junior or senior classification or approval of instructor.

ENTO 305 Evolution of Insect Structure  
Credits 3. 2 Lecture Hours. 3 Lab Hours.  
External morphology of insects; evolution of form and function.  
Prerequisite: 6 hours of biological sciences.

ENTO 306 Insect Physiology  
Credits 3. 2 Lecture Hours. 3 Lab Hours.  
Physiology of insects; structure and function of internal organ systems and their role in insect success.  
Prerequisite: ENTO 201 or ENTO 208; BIOL 111 and BIOL 112; CHEM 101/CHM 111 and CHEM 102/CHM 112.

ENTO 313 Biology of Insects  
Credits 3. 2 Lecture Hours. 3 Lab Hours.  
Study of the orders and important families of insects and related arthropods, including general biology, relationships with plants and other animals, and characteristics used in identification.  
Prerequisite: 3 hours of biological science.
Prerequisite: Junior or senior classification or approval of instructor.

**ENTO 321 Beekeeping**
Credit 1. 3 Lab Hours.
Basic knowledge and techniques used in apiculture; tools and knowledge needed to keep bees responsibly and productively.
Prerequisites: ENTO 320 or concurrent enrollment, junior or senior classification or approval of instructor.

**ENTO 322 Insects and Human Society**
Credits 3. 3 Lecture Hours.
Emphasis on the role insects have played in the development of human cultures; aspects include health, food production and storage, art, music and architecture; overview of historic, present day, and future roles insects will have on environmental movements (green societies), and in underdeveloped, developing and developed societies.
Prerequisite: Junior or senior classification.

**ENTO 401 Principles of Integrated Pest Management**
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Integrated pest management (IPM) concepts, principles, development and application; IPM constitutes a series of pest control tactics and strategies toward more sustainable agriculture, natural resources, and urban and rural health and well-being.
Prerequisite: ENTO 201 or ENTO 208.

**ENTO 402 Field-Crop Insects**
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Application of management strategies for insect/mite pests of small grains, corn, cotton, rice, sorghum, stored products and sunflower; nature and symptoms of damage, life history and habits of common pests. Laboratory consists of pest and pest damage identification supported by field trips.
Prerequisite: ENTO 201 or equivalent.

**ENTO 403 Urban Entomology**
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Biology, economic importance and control strategies for arthropod pests commonly invading households and commercial structures in urban environments; laboratory consists of urban pest identification and special presentations and demonstrations covering topics related to urban pest problems and their control. Offered in 2011-2012 academic year and alternating years thereafter.
Prerequisite: ENTO 201 or equivalent or approval of instructor.

**ENTO 423 Medical Entomology**
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Biology, disease relationships, and control of insects and other arthropods parasitic on or in humans; aspect of the fields of clinical and preventative medicine; survey, collection and taxonomy of medically-important arthropods in laboratory sessions.
Prerequisite: Junior or senior classification or approval of instructor.

**ENTO 424 Insect Ecology**
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Provides basic ecological background with an applied interpretation, emphasizing influences of insect populations and communities on ecosystem processes that influence landscape structure, function and change.
Prerequisites: ENTO 201 or equivalent; 3 hours of biological sciences; junior or senior classification or approval of instructor.

**ENTO 425 Disease Ecology**
Credits 3. 3 Lecture Hours.
Ecological interactions that influence the distribution and abundance of pathogens, vectors, and hosts ultimately determine the spread of disease; impacts of urbanization, climate change, and other human influenced environmental changes on disease dynamics; integration of disease ecology into pathogen and vector monitoring and comprehensive strategies to reduce disease occurrence.
Prerequisite: Junior or senior classification, or approval of instructor.

**ENTO 428 Insect Biotechnology**
Credits 3. 3 Lecture Hours.
Applications of genetic engineering and biotechnology; specific problems dealing with insects and control of insect pests.
Prerequisites: GENE 301 or GENE 315 or GENE 320/BIMS 320; junior or senior classification or approval of instructor.

**ENTO 429 Insect Biotechnology Laboratory**
Credit 1. 3 Lab Hours.
Basic technical experience in insect molecular biology and biotechnology, including genomic DNA isolation, PCR, cloning, sequencing and gene manipulation techniques; focus on insect applications for improvement of human health and agriculture.
Prerequisites: ENTO 428; concurrent enrollment in ENTO 428; junior or senior classification or approval of instructor.

**ENTO 431/FIVS 431 The Science of Forensic Entomology**
Credits 3. 3 Lecture Hours.
Explores the science, methodology and technology employed to gather, preserve and present information about insects and other arthropods in such a manner that this information can be used in courts of law as evidence and testimony to help resolve issues of a criminal or civil nature.
Prerequisite: Junior or senior classification or approval of instructor.
Cross Listing: FIVS 431/ENTO 431.

**ENTO 432/FIVS 432 Applied Forensic Entomology**
Credit 1. 3 Lab Hours.
Laboratory-based course offering practical experience using scientific information, methodology, technology, and legal procedures inherent to the field of forensic entomology; emphasis on collecting, preserving, and identifying information as evidence and expert witness testimony in courts of law.
Prerequisites: Concurrent enrollment in ENTO 431/FIVS 431; junior or senior classification or approval of instructor.
Cross Listing: FIVS 432/ENTO 432.

**ENTO 435 Case Studies in Problem Solving**
Credits 3. 3 Lecture Hours.
Development of reasoning strategies by examining a variety of case studies, science and scientific methods; solving real-world problems as part of an investigative team.
Prerequisite: Senior classification or approval of instructor.
ENTO 450/WFSC 450 Caribbean Conservation
Credits 2. 6 Lab Hours.
Provide experience in and appreciation for diverse tropical habitats and
the problems associated with conserving these habitats; design and
conduct individual research projects on topics of their choice with approval
from the instructors on project design and feasibility.
Prerequisites: Concurrent enrollment in ENTO 300/WFSC 300 and
ENTO 451/WFSC 451; junior or senior classification.
Cross Listing: WFSC 450/ENTO 450.
ENTO 451/WFSC 451 Caribbean Research Seminar
Credit 1. 1 Other Hour.
Document research activities; keep a journal of activities and research
methods during study abroad trips.
Prerequisites: Concurrent enrollment in ENTO 300 and 450; junior or
senior classification.
ENTO 481 Seminar
Credit 1. 1 Lecture Hour.
Report of original investigations, current literature and special features of
entomology.
Prerequisites: ENTO 201 or equivalent; junior or senior classification.
ENTO 482 Occupational and Professional Development
Credits 2. 2 Lecture Hours.
Organized instruction in written and oral communication; acquaint
students with private and public-sector companies and agencies as well
as leading professionals from these firms to reinforce academic instruction
and prepare students for the transition to employment, graduate and
professional schools.
Prerequisite: ENTO 201 or ENTO 208; or approval of instructor.
ENTO 484 Professional Internship
Credits 0 to 4. 0 to 4 Other Hours.
Independent study and supervised field experience related to a
professional area of interest in entomology. May be taken two times for
credit.
Prerequisite: Junior or senior classification or approval of instructor.
ENTO 485 Directed Studies
Credits 1 to 4. 1 to 4 Other Hours.
Individual problems.
Prerequisites: ENTO 201 or equivalent; junior or senior classification;
approval of instructor and department head.
ENTO 489 Special Topics in...
Credits 1 to 4. 0 to 4 Lecture Hours. 0 to 4 Lab Hours.
Selected topics in an identified area of entomology. May be repeated for
credit.
Prerequisite: Approval of instructor.
ENTO 491 Research
Credits 0 to 4. 0 to 4 Other Hours.
Faculty supervised research in entomology. May be taken two times for
credit. Registration in multiple sections of this course are possible within
a given semester provided that the per semester credit hour limit is not
exceeded.
Prerequisites: Junior or senior classification or approval of instructor.

EPFB - Educ Psyc Field Based (EPFB)

EPFB 210 Family Involvement and Empowerment
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Field-based course that provides information and skills necessary to
work with diverse families; addresses need for positive school-family
collaboration and characteristics of families throughout the life cycle, the
collaboration of educators with families through the special education
process, and the provision of family services through community agencies.
Prerequisite: Admission to professional phase of program.
EPFB 401 Teaching Skills II
Credits 3. 1 Lecture Hour. 6 Lab Hours.
Study and development of skills focusing on individual P-12 students’
needs with emphasis on delivering complete lessons from a written plan to
include Texas Essential Knowledge and Skills (TEKS) and Individualized
Educational Program (IEP) objectives, incorporating modifications
appropriately, setting behavioral expectations, and using questioning
strategies for high level thinking; field experience in two special education
settings. Must be taken on a satisfactory/unsatisfactory basis.
Prerequisites: Admission to program; junior or senior classification.

EPSY - Educational Psychology (EPSY)

EPSY 291 Research
Credits 0 to 4. 0 to 4 Other Hours.
Research conducted under the direction of faculty member in educational
psychology. May be repeated 2 times for credit.
Prerequisites: Freshman or sophomore classification and approval of
instructor.
EPSY 320 Child Development
Credits 3. 3 Lecture Hours.
Growth and development of the normal child from infancy to adolescence;
implications of children’s cognitive, language and psychosocial
development for success in academic and social interactions.
Prerequisite: Junior or senior classification.
EPSY 321 Adolescent Development
Credits 3. 3 Lecture Hours.
Characteristics of adolescent growth and development emphasizing
behavior within secondary school setting; influences of prior development;
home, family and community; peer group, as these affect school
adjustment and success.
Prerequisite: Junior or senior classification.
EPSY 430 Creativity Theories and Research
Credits 3. 3 Lecture Hours.
Theoretical base of creativity and the research methodologies used to study creativity.
Prerequisite: Junior or senior classification.

EPSY 431 Personal Creativity and Giftedness
Credits 3. 3 Lecture Hours.
Personal giftedness and creativity and its interrelatedness with development, relationships, and learning.
Prerequisite: Junior or senior classification.

EPSY 432 Creativity and Creative Problem Solving
Credits 3. 3 Lecture Hours.
Creativity research; historical background and application of the framework and tools of the Parnes/Osborn Creative Problem Solving Process.
Prerequisite: Junior or senior classification.

EPSY 433 Lateral Thinking
Credits 3. 3 Lecture Hours.
Edward deBono’s theories and approach to creativity known as lateral thinking which is used throughout the world to increase creative thinking in individuals.
Prerequisite: Junior or senior classification.

EPSY 435 Educational Statistics
Credits 3. 3 Lecture Hours.
Statistical concepts and techniques and their application in behavioral sciences.
Prerequisite: Junior or senior classification.

EPSY 459 Practicum in Educating the Gifted and Talented
Credits 3. 1 Lecture Hour. 6 Lab Hours.
Theory and strategies for instruction and guidance of the gifted and talented through a supervised experience in a laboratory setting with gifted and talented children and/or adolescents. May be taken two times for credit.
Prerequisites: Approval of department head and instructor; junior or senior classification.

EPSY 480 Field Experiences
Credits 0 to 6. 0 to 6 Other Hours.
University-supervised experience in a professional employment setting related to specialization in guidance and special education. May be repeated to 6 hours total.
Prerequisites: Approval of student's advisor and department head.

EPSY 485 Directed Studies
Credits 0 to 4. 0 to 4 Other Hours.
Research problems and readings in areas selected to supplement existing offerings; individual reports, oral and written, required.
Prerequisites: Junior or senior classification; approval of instructor.

EPSY 489 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Selected topics in an identified area of educational psychology. May be repeated for credit.
Prerequisite: Approval of instructor.

EPSY 491 Research
Credits 0 to 4. 0 to 4 Other Hours.
Research conducted under the direction of faculty member in educational psychology. May be repeated 2 times for credit.
Prerequisites: Junior or senior classification and approval of instructor.
ESET 329 Six Sigma and Applied Statistics  
Credits 3. 2 Lecture Hours. 3 Lab Hours.  
Concepts of probability and statistics, mean, variance, Gaussian/uniform/Student/Weibull distributions, and their applications in electronics design, analysis, and troubleshooting; Six Sigma process and tools including Gauge R&R, test of hypotheses, analysis of variance, linear regression, response surface method, control chart, and design of experiments.  
Prerequisites: Grade of C or better in ESET 210 and MATH 152; completion of ENGL 104, MATH 151, MATH 152, CHEM 107 and CHEM 117, and PHYS 218 with a grade of C or better; junior or senior classification in electronic systems engineering technology.  

ESET 333 Product Development  
Credits 3. 2 Lecture Hours. 3 Lab Hours.  
Process of product development to create an idea; development of a business plan; market research; voice of customer; managing resources; project management; identifying product partners; creating a unique product and/or company.  
Prerequisite: Completion of ENGL 104, MATH 151, MATH 152, CHEM 107 and CHEM 117, and PHYS 218 with a grade of C or better; junior or senior classification in electronic systems engineering technology.

ESET 349 Microcontroller Architecture  
Credits 4. 3 Lecture Hours. 3 Lab Hours.  
Microcontrollers including type of circuits and how they function; architecture of microcontrollers; instruction sets and how they are programmed.  
Prerequisites: Grade of C or better in ESET 219 and ESET 269; completion of ENGL 104, MATH 151, MATH 152, CHEM 107 and CHEM 117, and PHYS 218 with a grade of C or better; electronic systems engineering technology.

ESET 350 Analog Electronics  
Credits 4. 3 Lecture Hours. 3 Lab Hours.  
Study of semiconductor devices including diodes, field effect transistors, bipolar junction transistors, and operational amplifiers; applications include signal conditioning, power supplies, active filters, discrete transistor amplifiers, and transistor switching/driver circuits.  
Prerequisites: ESET 211 with a grade of C or better; completion of ENGL 104, MATH 151, MATH 152, CHEM 107 and CHEM 117, and PHYS 218 with a grade of C or better; junior or senior classification in electronic systems engineering technology.

ESET 352 Electronics Testing I  
Credits 4. 3 Lecture Hours. 3 Lab Hours.  
Testing of electronic devices and systems; including test planning, test reporting, test specifications, parametric testing, measurement accuracy, test hardware, sampling theory, digital signal processing based testing, and calibrations; both circuit analysis (2/3) and circuit design (1/3) with several analog and mixed-signal systems.  
Prerequisites: ENTC 329 and ESET 350 with a grade of C or better.

ESET 355 Electromagnetics and High Frequency Systems  
Credits 4. 3 Lecture Hours. 3 Lab Hours.  
High frequency concepts including topics in basic electromagnetics, transmission lines, antennas, and RF circuit design; applications including wireless communication systems, fiber optic systems, and high frequency PCB layout.  
Prerequisites: Grade of C or better in ESET 211 and PHYS 208; completion of ENGL 104, MATH 151, MATH 152, CHEM 107 and CHEM 117, and PHYS 218 with a grade of C or better; junior or senior classification in electronic systems engineering technology.

ESET 359 Electronic Instrumentation  
Credits 4. 3 Lecture Hours. 3 Lab Hours.  
Fundamentals of controls, measurement systems, sensors, sampling theorem, analog to digital and digital to analog conversions; signal conditioning; digital signal processing; computer-based data acquisition using graphical development environment; and digital communication protocols.  
Prerequisites: Grade of C or better in ESET 349 and ESET 350; completion of ENGL 104, MATH 151, MATH 152, CHEM 107 and CHEM 117, and PHYS 218 with a grade of C or better; junior or senior classification in electronic systems engineering technology.

ESET 366 Communications Electronics  
Credits 3. 2 Lecture Hours. 3 Lab Hours.  
Fundamentals of system approach to the design of communication electronics circuit; amplitude and frequency modulation techniques; application to the design of circuit level amplitude and frequency modulation; design techniques; transmission lines; wave propagation and optical/laser technologies.  
Prerequisites: ESET 350, admission to upper level in electronics engineering technology.

ESET 369 Embedded Systems Software  
Credits 4. 3 Lecture Hours. 3 Lab Hours.  
A study of the technical aspects of embedded computer software systems, with emphasis on embedded real-time systems, programming techniques and development methodologies.  
Prerequisites: ESET 349 with a grade of C or better; completion of ENGL 104, MATH 151, MATH 152, CHEM 107 and CHEM 117, and PHYS 218 with a grade of C or better; junior or senior classification in electronic systems engineering technology.

Corequisite: ENTC 350.

ESET 415 Advanced Network Systems and Security  
Credits 3. 2 Lecture Hours. 3 Lab Hours.  
Practical network systems and security; topics include network design and protocol such as VLAN, HSRP, IP Routing, MPLS, and SAN; network security such as ACLs, TCP/IP security, IDS, and VPN; network service and management such as DHCP, DNS, NAT, SNMP, and MIB; and network verification and testing.  
Prerequisites: ESET 315 with a grade of C or better; completion of ENGL 104, MATH 151, MATH 152, CHEM 107 and CHEM 117, and PHYS 218 with a grade of C or better; junior or senior classification in electronic systems engineering technology.

ESET 419 Engineering Technology Capstone I  
Credits 3. 3 Lecture Hours.  
Project management tools for a formal technical proposal; addresses scope, schedule, risk, cost, milestones and deliverables; planning and initial design of prototype implemented in ESET 420; teams must have sponsor and technical advisor.  
Prerequisites: ESET 319, ESET 333 and ESET 369 with a grade of C or better.
ESET 420 Engineering Technology Capstone II
Credits 2. 6 Lab Hours.
Second semester course in capstone design sequence; focus on design implementation, testing, documentation, demonstration, and presentation of a fully functional prototype; professional design tools for schematic capture, printed circuit board layout and software development, integration and validation.
Prerequisites: Completion of ENGL 104, MATH 151, MATH 152, CHEM 107 and CHEM 117, and PHYS 218 with a grade of C or better; junior or senior classification in electronic systems engineering technology; final semester of technical coursework and successful completion of ESET 419 or approval of department.

ESET 435 Data Communications
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Data communications concepts and techniques involving error detection and correction, data link control, switching, client-server computing, data compression, data security, internet protocol (IP); transmission control protocol (TCP), includes development of a data link control layer and a client server system utilizing socket by using C Programming Language in Visual C++ environment.
Prerequisites: ESET 315 and ESET 369 with a grade of C or better; junior or senior classification in electronic systems engineering technology.

ESET 452 Electronics Testing II
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Advanced testing techniques of electronic devices and systems; study of advanced electronics test methodologies; emphasis on circuits containing analog to digital converters (ADCs) and digital to analog converters (DACs); device interface board design and data analysis; both circuit analysis (2/3) and circuit design (1/3) using industry grade state-of-the-art equipment.
Prerequisites: Grade of C or better in ESET 349 and ESET 352; completion of ENGL 104, MATH 151, MATH 152, CHEM 107 and CHEM 117, and PHYS 218 with a grade of C or better; junior or senior classification in electronic systems engineering technology.

ESET 455 Wireless Transmission Systems
Credits 4. 3 Lecture Hours. 3 Lab Hours.
System engineering aspects of microwave, satellite and cellular communication systems; power budget calculations, propagation analysis, systems descriptions; CNR, CIR; review of modulations practical engineering considerations.
Prerequisites: ESET 355 with a grade of C or better; completion of ENGL 104, MATH 151, MATH 152, CHEM 107 and CHEM 117, and PHYS 218 with a grade of C or better; junior or senior classification in electronic systems engineering technology.

ESET 462 Control Systems
Credits 4. 3 Lecture Hours. 3 Lab Hours.
Fundamentals of real-time closed-loop analog and digital control (the proportional, integral and derivative controller); distributed control systems, sensors, electronics, stepper and servo motors on a 16-bit microcontroller platform; design an autonomous vehicle; open industrial networks, such as Control Area Network (CAN) and DeviceNet technologies, will be discussed.
Prerequisites: Grade of C or better in ESET 359 and ESET 369; completion of ENGL 104, MATH 151, MATH 152, CHEM 107 and CHEM 117, and PHYS 218 with a grade of C or better; junior or senior classification in electronic systems engineering technology.

ESET 463 Advanced Testing Techniques
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Advanced testing techniques of electronic devices and systems; study of advanced electronics test methodologies; emphasis on circuits containing analog to digital converters (ADCs) and digital to analog converters (DACs); device interface board design and data analysis; both circuit analysis (2/3) and circuit design (1/3) using industry grade state-of-the-art equipment.
Prerequisites: Grade of C or better in ESET 349 and ESET 352; completion of ENGL 104, MATH 151, MATH 152, CHEM 107 and CHEM 117, and PHYS 218 with a grade of C or better; junior or senior classification in electronic systems engineering technology.

ESET 491 Research
Credits 1 to 4. 1 to 4 Other Hours.
Research conducted under the direction of faculty member in ecosystem science and management. May be repeated 2 times for credit.
Prerequisites: Freshman or sophomore classification and approval of instructor.

ESSM 201 Exploring Ecosystem Science and Management
Credit 1. 1 Lecture Hour.
Introduction to natural resources and ecosystem system approach to wildland management; survey of the field of natural resources and related industries.

ESSM 202 Field Studies in Forest Ecosystems
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Field-oriented focus on forest ecosystem science and management; problem-solve management questions through data collection and team-based research; investigate the relationships between landowner objectives, mensuration, silviculture, ecology, soils, and regeneration-focused harvesting systems; foster the development of student-faculty relationships; enhance professional knowledge and skills.
Prerequisite: Junior or senior classification or approval of instructor.

ESSM 203 Forest Trees of North America
Credits 3. 2 Lecture Hours. 2 Lab Hours.
(FORE 1314) Forest Trees of North America. Taxonomy, phylogeny, and identification of the important forest trees of North America and their ecological and social uses and benefits.
Prerequisites: BIOL 101, BIOL 107, BIOL 111 or BIOL 113 and BIOL 123 or equivalent.

ESSM 291 Research
Credits 1 to 4. 1 to 4 Other Hours.
Research conducted under the direction of faculty member in ecosystem science and management. May be repeated 2 times for credit.
Prerequisites: Freshman or sophomore classification and approval of instructor.

ESSM 300 Field Studies in Forest Ecosystems
Credits 3. 1 Lecture Hour. 6 Lab Hours.
Field-oriented focus on forest ecosystem science and management; problem-solve management questions through data collection and team-based research; investigate the relationships between landowner objectives, mensuration, silviculture, ecology, soils, and regeneration-focused harvesting systems; foster the development of student-faculty relationships; enhance professional knowledge and skills.
Prerequisite: Junior or senior classification or approval of instructor.

ESSM 301 Wildland Watershed Management
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Elements of watershed management and principles and practices of wildland management for protection, maintenance and improvement of water resource values.
Prerequisite: Junior or senior classification or approval of instructor.

ESSM 302 Wildland Plants of North America
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Familiarization with the distribution and economic value of important wildland plants in Texas and North America and fundamentals of sight identification of these plants; plant collection required.
Prerequisite: Junior or senior classification or approval of instructor.

ESSM 303 Agrostology
Credits 3. 1 Lecture Hour. 6 Lab Hours.
Classification and identification of grasses based on macro- and micromorphological variations of spikelets; interpretation of spikelet variation and use of diagnostic keys to identify important species of North America; a grass collection required.
Prerequisites: Junior or senior classification or approval of instructor.
ESSM 304 Rangeland Plant Taxonomy
Credits 4. 2 Lecture Hours. 6 Lab Hours.
Interpretation of plant morphology for keying and identification of important flowering rangeland plants; vegetative and floral characters for important plant families including toxic compounds affecting domestic livestock. Plant collection required.
Prerequisites: Junior or senior classification or approval of instructor.*

ESSM 305 Watershed Analysis and Planning
Credits 3. 3 Lecture Hours.
Provide an integrated framework for watershed planning that addresses the related biophysical, social and economic issues; comprehensive in scope and approach giving students the tools and techniques for developing sound watershed management policy and practice; water issues, problems and regulations for Texas.
Prerequisite: Junior or senior classification.*

ESSM 306 Plant Functional Ecology and Adaptation
Credits 3. 3 Lecture Hours.
Investigation of physiological mechanisms influencing ecological patterns and processes, including plant acclimation and adaptation in contrasting habitats; abiotic controls on species productivity and distribution; underlying genetic and evolutionary mechanisms contributing to the occurrence of specific genotypes and phenotypes in unique environments.
Prerequisites: RENR 205, any BIOL course, junior or senior classification or approval of instructor.*

ESSM 307 Forest Protection
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Destructive agents in forestry as related to importance, identification, cause, extent of losses and protective measures.
Prerequisites: RENR 205, AGEC 105 or equivalent, junior or senior classification or approval of instructor.*

ESSM 308 Fundamentals of Environmental Decision-Making
Credits 3. 3 Lecture Hours.
Introduction to environmental issues in natural resources management; fundamental principles and methods for understanding biosocial interdependencies in complex environmental issues; use of computer-aided group decision-making techniques to develop cooperative strategies for resolving local or global environmental issues.
Prerequisite: Junior or senior classification or approval of instructor.*

ESSM 309 Forest Ecology
Credits 3. 3 Lecture Hours.
Life history and general characteristics of trees; structure and function of forest ecosystems; fundamental principles of forest tree physiology and ecology applied to an analysis of tree growth in relation to environmental factors and present day forest management; global changes and forests.
Prerequisite: Junior or senior classification or approval of instructor.*

ESSM 310 Forest Tree Improvement and Regeneration
Credits 3. 3 Lecture Hours.
ESSM 310. Forest Tree Improvement and Regeneration. Genetic improvement or manipulation of forest trees through breeding or transformation; regeneration of forests including reproduction, nursery production, stand establishment, natural regeneration and problems affecting regeneration.
Prerequisites: BIOL 101, BIOL 113 or equivalent; junior or senior classification.

ESSM 311 Biogeochemistry and Global Change
Credits 3. 3 Lecture Hours.
Framework for understanding biogeochemical cycles, their significance at both global and ecosystem levels of organization, and their contemporary relevance to ecosystem science and management.
Prerequisites: RENR 205, RENR 215, any BIOL and/or CHEM course, junior or senior classification or approval of instructor.

ESSM 313 Vegetation Sampling Methods and Designs in Ecosystems
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Basics for vegetation sampling in ecosystems; methods for conducting sampling; selection of sampling unit appropriate for vegetation type; sampling statistics; mean comparisons; regression analysis; sampling design principles; development of sampling plan; presentation and interpretation of sampling data.
Prerequisites: Any MATH course satisfying university core curriculum, junior or senior classification or approval of instructor.

ESSM 314 Principles of Rangeland Management Around the World
Credits 3. 3 Lecture Hours.
Basic knowledge of world rangeland ecosystems, how these systems are managed in diverse cultural settings; principles of underlying ecological processes influenced by various land management practices; foster understanding of the values that people in different countries place on rangeland resources; use of these values to enhance geologically sustainable and socially acceptable rangeland management practices.*
Prerequisite: Junior or senior classification or approval of instructor.

ESSM 315 Rangeland Inventory and Monitoring
Credit 1. 2 Lab Hours.
Theory and methods to inventory rangeland vegetation; sampling design; analysis of inventory data; interpretation of sampling data; preparation of a technical report; presentation of inventory data in text, tables, and graphs using the style of the Rangeland Ecology and Management discipline.
Prerequisites: ESSM 313, junior or senior classification or approval of instructor.*

ESSM 316 Range Ecology
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Organization and distribution of rangeland ecosystems of the world, with emphasis on North America; community dynamics and functions stressed including biotic history, succession, disturbance regimes, competitive interactions, herbivory, energy flow and nutrient cycling; conservation of rangeland resources.
Prerequisites: RENR 205, RENR 215, ESSM 302, ESSM 314, ESSM 315, junior or senior classification or approval of instructor.*

ESSM 317 Vegetation Management
Credits 3. 3 Lecture Hours.
Familiarization with practices that cause changes in rangeland vegetation composition for multiple uses; understanding of criteria for range improvement practices; comparison of expected responses of livestock forage production, watershed parameters and wildlife to vegetation changes following range improvements; systems concept for planning, analysis and implementation of range improvement practices.
Prerequisites: ESSM 314, junior or senior classification or approval of instructor.*
ESSM 318 Coupled Social and Ecological Systems  
Credits 3. 3 Lecture Hours.  
Resilience-based stewardship of social-ecological systems; ecological concepts of resilience, sustainability, ecosystem services, and vulnerability; investigation of linkages among social and ecological system components; contribution to sustainability and provisioning of ecosystem services; evaluation of multiple knowledge sources as the basis for adaptive ecosystem management.  
Prerequisites: RENR 205, AGEC 105 or equivalent, junior or senior classification or approval of instructor.

ESSM 319 Principles of Forestry  
Credits 4. 3 Lecture Hours. 3 Lab Hours.  
Theory and practice of forestry in controlling forest establishment, composition, structure and growth; principles of natural and artificial regeneration; intermediate cultural operations; silvicultural systems; use and control of fire in forests; principles of sustainable stand management.  
Prerequisite: Junior or senior classification or approval of instructor.

ESSM 320 Ecosystem Restoration and Management  
Credits 3. 3 Lecture Hours.  
A basic conceptual framework for restoration ecology and ecological restoration; major principles of ecology related to practical problems confronting humankind, such as, environmental pollution and degradation, exotic species invasions, land use and management trade-offs and consequences; importance of biological diversity.  
Prerequisite: RENR 205, RENR 215 or equivalent, junior or senior classification or approval of instructor.

ESSM 324 Forest Measurements  
Credits 2. 4 Lab Hours.  
ESSM 324. Forest Measurements. Measures and measurement of the dimensions and attributes of forested areas including the diameters, heights, volume and biomass of trees within a well-defined area; tools used for forest measurement; the conduct of forest inventories; summary measures and reports of inventory results; remote sensing and related technologies that assist forest measurements.  
Prerequisites: ESSM 313 and ESSM 319 or concurrent enrollment; junior or senior classification.

ESSM 351 Geographic Information Systems for Resource Management  
Credits 3. 2 Lecture Hours. 2 Lab Hours.  
Geographic Information Systems (GIS) approach to solving spatial problems and managing natural resources, including the capture, analysis, manipulation and mapping of spatial and non-spatial databases; identification of natural and cultural features from aerial photography and remote sensing products; integration of GPS technologies; extensive use of GIS software to solve real-world problems.  
Prerequisite: Junior or senior classification or approval of instructor.

ESSM 398 Interpretation of Aerial Photographs  
Credits 3. 2 Lecture Hours. 3 Lab Hours.  
Identification and evaluation of natural and cultural features on aerial photographs; methods for extracting information concerning land use, vegetative cover, surface and structural features, urban/industrial patterns and archaeological sites.  
Prerequisite: Junior or senior classification or approval of instructor.

ESSM 404 Changing Natural Resource Policy  
Credits 3. 3 Lecture Hours.  
ESSM 404. Changing Natural Resource Policy. Process through which environmental policies are changed; study theories of social and political change; teams use theories with their original research on environmental policy problems to create and implement plans for changing environmental policies in their own communities.  
Prerequisite: Junior or senior classification or approval of instructor.

ESSM 405 Forest Resource Assessment and Management  
Credits 3. 1 Lecture Hour. 4 Lab Hours.  
Integration of biophysical, economic and social factors in forest resource analysis, management planning and decision making; applications of interdisciplinary knowledge and multiple-use principles to practical forest management problems.  
Prerequisite: Senior classification or approval of instructor.

ESSM 406 Natural Resources Policy  
Credits 3. 3 Lecture Hours.  
Natural resources and forest policy development in the United States and review of current issues in forest and related natural resource policy.  
Prerequisite: Junior or senior classification or approval of instructor.

ESSM 415 Range Analysis and Management Planning  
Credits 4. 3 Lecture Hours. 2 Lab Hours.  
Basic concepts and theories of range management systems. Resource inventory, analysis and management planning.  
Prerequisites: AGEC 105 or ECON 202, ESSM 314, ESSM 317; junior or senior classification or approval of instructor.

ESSM 416 Fire Ecology and Natural Resource Management  
Credits 3. 3 Lecture Hours.  
Behavior and use of fire in the management of natural resources; principles underlying the role of weather, fuel characteristics and physical features of the environment related to the development and implementation of fire management plans.  
Prerequisite: RENR 205 or equivalent, junior or senior classification or approval of instructor.

ESSM 420 Ecological Restoration of Wetland and Riparian Systems  
Credits 3. 2 Lecture Hours. 2 Lab Hours.  
How wetland and riparian areas link terrestrial and aquatic systems and function hydrologically and ecologically within watersheds; integrated approaches for restoration of degraded wetland and riparian systems; improving water resources through vegetation management with a special interest in rangelands.  
Prerequisites: RENR 205, junior or senior classification or approval of instructor.

ESSM 430 Advanced Restoration Ecology  
Credits 3. 3 Lecture Hours.  
A dynamic discipline relying heavily on the fundamentals of ecology; practice translating and communicating key ecological concepts to advanced case studies in ecological restoration; enhance skills for professional applications.  
Prerequisites: RENR 205, ESSM 320, ESSM 420; junior or senior classification.

ESSM 440 Wetland Delineation  
Credits 3. 2 Lecture Hours. 2 Lab Hours.  
Covers the application of the 1987 Wetland Delineation Manual in use by the Army Corps of Engineers (CORPS); field indicators of hydrophytic vegetation; hydric soils, wetland hydrology, methods for making jurisdictional determinations in non-disturbed and disturbed areas, recognition of problem wetlands and technical guidelines for wetlands.  
Prerequisite: Junior or senior classification.
ESSM 444 Remote Sensing of the Environment  
Credits 3. 2 Lecture Hours. 3 Lab Hours.  
Principles and techniques necessary for applying remote sensing to diverse issues in studying and mapping land uses and land covers of the terrestrial environment; emphasizes a hands-on learning approach with theoretical foundations and applications in both aerial and satellite remote sensing, using optical and lidar datasets.  
Prerequisite: Junior or senior classification or approval of instructor.

ESSM 459 Programming for Spatial Data Applications  
Credits 3. 2 Lecture Hours. 3 Lab Hours.  
Programming for spatial data applications in general and for natural resources application in particular; basic programming concepts and constructs for the creation and manipulation of spatial data; automating of processes; programming behind spreadsheet and GIS applications.  
Prerequisites: ESSM 351 or equivalent, junior or senior classification or approval of instructor.

ESSM 461 Spatial Databases for Data Storage, Manipulation and Analysis  
Credits 3. 1 Lecture Hour. 4 Lab Hours.  
Relational databases and advanced geodatabase capabilities; types of geodatabases; Structured Query Language including join-types and subqueries; ArcGIS Desktop Advanced.  
Prerequisites: ESSM 459; junior or senior classification or approval of instructor.

ESSM 462/GEOG 462 Advanced GIS Analysis for Natural Resource Management  
Credits 3. 2 Lecture Hours. 2 Lab Hours.  
Advanced topics in Geographic Information Systems (GIS) to solve natural resource problems; manipulation of raster data types; three-dimensional modeling; emphasis on geoprocessing as it relates to applied projects, particularly with habitat suitability models; field and lab use of Global Positioning Systems (GPS); internet-based GIS modeling.  
Prerequisites: ESSM 351 or AGSM 461/SPSC 461 or equivalent or approval of instructor; junior or senior classification.  
Cross Listing: GEOG 462/ESSM 462.

ESSM 464 Spatial Project Management  
Credits 3. 2 Lecture Hours. 2 Lab Hours.  
Integration of key components of spatial project management to ensure a successful project implementation using life-cycle methodology and spatial project management; strategy and planning, requirements analysis, design, development, deployment, and operations and maintenance; term project working with real world data to develop and manage a spatial project for practical applications.  
Prerequisites: ESSM 351 and ESSM 444, junior or senior classification or approval of instructor.

ESSM 481 Senior Seminar  
Credit 1. 1 Lecture Hour.  
Completion of professional e-portfolio, résumé and job application; exploration of job search, application, and interview; discipline competency exams; program evaluation.  
Prerequisite: Senior classification in ESSM degree program.*

ESSM 484 Internship  
Credits 1 to 4. 1 to 4 Other Hours.  
Supervised experience program conducted in the student's area of specialization.  
Prerequisite: Approval of student's advisor.

ESSM 485 Directed Studies  
Credits 1 to 3. 1 to 3 Other Hours.  
Individual study and research upon a selected range problem.  
Prerequisite: Approval of student's advisor.

ESSM 489 Special Topics in...  
Credits 1 to 4. 1 to 4 Lecture Hours. 0 to 4 Lab Hours.  
Selected topics in an identified area of rangeland ecology and management. May be repeated for credit.  
Prerequisite: Approval of instructor.*

ESSM 491 Research  
Credits 1 to 4. 1 to 4 Other Hours.  
Research conducted under the direction of faculty member in ecosystem science and management. May be repeated 3 times for credit. Registration in multiple sections of this course is possible within a given semester provided that the per semester credit hour limit is not exceeded.  
Prerequisites: Junior or senior classification and approval of instructor.

EURO - European Studies (EURO)

EURO 220 Contemporary French Culture  
Credit 1. 1 Lecture Hour.  
Cultural and practical orientation for students participating in the summer study abroad programs in France; brief introduction to contemporary social and cultural institutions; discussions of French university system; oral reports and final paper; readings and discussion in English and French.  
Prerequisite: FREN 101 or equivalent.

EURO 223/FREN 223 French Culture and Society in French Literary Masterpieces in Translation  
Credits 3. 3 Lecture Hours.  
Analysis and understanding of French culture and contemporary society through the study of masterpieces of French literature including novels, plays, short stories and films.  
Cross Listing: FREN 223/EURO 223.

EURO 230 Contemporary German Culture  
Credit 1. 1 Lecture Hour.  
Cultural and practical orientation for students participating in the summer study abroad programs in Germany; brief introduction to contemporary social and cultural institutions; discussions of German university system; oral reports and final paper; readings and discussion in English and German.  
Prerequisite: GERM 101 or equivalent.

EURO 232 Exploratory German Language and Culture  
Credits 3. 3 Lecture Hours.  
Introduction to the fundamentals of German language and culture; immersion in a European culture; acquisition of skills and insights necessary to experience life in Germany; study of comparisons and contrasts between German and North American culture.

EURO 237 The German Roaring '20s  
Credits 3. 3 Lecture Hours.  
The German Roaring '20s. The culture of Weimar Germany as a paradigm for European modernity; examination of political and technological modernization through analysis of literary and artistic forms and philosophical and social ideas; taught in English.
EURO 240 Contemporary Russian Culture
Credit 1. 1 Lecture Hour.
Cultural and practical orientation for students participating in the summer study abroad programs in Russia; brief introduction to contemporary social and cultural institutions; discussions of Russian university system; oral reports and final paper; readings and discussion in English and Russian. 
Prerequisite: RUSS 101 or equivalent.
EURO 285 Directed Studies
Credits 1 to 4. 1 to 4 Other Hours.
Individual supervision of readings or assigned projects in European studies selected for each student individually.
Prerequisites: Approval of instructor and department head.
EURO 289 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Selected topics in an identified area of European studies. May be repeated for credit.
Prerequisite: Approval of instructor.
EURO 291 Research
Credits 0 to 3. 0 to 3 Other Hours.
Research conducted under the direction of faculty member in European languages and cultures. May be taken three times for credit.
Prerequisites: Freshman or sophomore classification and approval of department head.
EURO 311 Diversity Issues in Classical Studies
Credits 3. 3 Lecture Hours.
Study of diversity, "otherness," and tolerance in Greco-Roman antiquity; and the effects of intolerance on modern classical studies.
Prerequisites: ENGL 104 and junior or senior classification.
EURO 323 Immigration and Ethnicity in Contemporary France
Credits 3. 3 Lecture Hours.
Immigration and ethnic groups in contemporary France, their effects on national identity and politics, and their cultural representations.
Prerequisite: ENGL 104 and junior or senior classification.
EURO 405/FILM 405 European Cinema
Credits 3. 3 Lecture Hours.
Exploration of key movements in European cinema from 1895 to the present, including both national cinematic traditions, such as Italian Neorealism or French New Wave, and international trends such as Formalism, Expressionism, or Auteurism.
Prerequisite: FILM 251/ENGL 251 or approval of instructor.
Cross Listing: FILM 405/EURO 405.
EURO 406/FILM 406 Propaganda and Dissidence
Credits 3. 3 Lecture Hours.
Use of film as a medium to promote political ideology, government propaganda, political dissidence, and subversion, with focus on Europe.
Prerequisite: Junior or senior classification or approval of instructor.
Cross Listing: FILM 406/EURO 406.
EURO 432/GERM 432 Music in German Culture
Credits 3. 3 Lecture Hours.
Examination of the role of music in German cultural and national self-definition from the 18th century to the present; the political and ideological role of music; study of genres and media including opera, art song, Singspiel, protest songs and film; taught in English.
Prerequisite: Junior or senior classification, or approval of instructor.
Cross Listing: GERM 432/EURO 432.
EURO 436 German Fairy Tales
Credits 3. 3 Lecture Hours.
Introduction to and study of fairy tales and children's literature through German tradition in these forms; reception of fairy tales through adaptation and modernization; taught in English. 
Prerequisite: Junior or senior classification, or approval of instructor.
EURO 437/GERM 437 German Romanticism: Literature, Theory, Philosophy
Credits 3. 3 Lecture Hours.
From Goethe's "Faust" to the romantic exaltation of poetry; influence of the romantic movement on European literary theory and philosophy; taught in English. 
Prerequisite: Junior or senior classification or approval of instructor.
Cross Listing: GERM 437.
EURO 441/RUSS 441 The Russian Novel I: Tolstoy and Dostoevsky
Credits 3. 3 Lecture Hours.
Study of the major works of Tolstoy and Dostoevsky; discussion of the literary nature and purpose of novels, especially in the context of Russian culture; taught in English.
Prerequisite: 3 hours of English literature at 200 level or above, or approval of instructor.
Cross Listing: RUSS 441/EURO 441.
EURO 442/RUSS 442 The Russian Novel II: The Twentieth Century
Credits 3. 3 Lecture Hours.
Study of major Russian novels from ca. 1900 to the end of Stalinism; exploration of topics relevant to Russia's experience in the 20th century; taught in English.
Prerequisite: 3 hours of English literature at 200 level or above, or approval of instructor.
Cross Listing: RUSS 442/EURO 442.
EURO 443/RUSS 443 Contemporary Russian Prose
Credits 3. 3 Lecture Hours.
Study of Russian and Soviet 20th-century prose literature, with emphasis on post-Stalinist and post-glasnost writers; taught in English.
Prerequisite: Junior or senior classification, or approval of instructor.
Cross Listing: RUSS 443/EURO 443.
EURO 444/RUSS 444 Russian Drama
Credits 3. 3 Lecture Hours.
Introduction to the masterpieces of Russian drama from the 19th century to the present; includes such authors as Pushkin, Chekhov, Gorky, Arbuzov, Rozov and Petrushevskaya; taught in English.
Prerequisite: Junior or senior classification or approval of instructor.
Cross Listing: RUSS 444/EURO 444.
EURO 446/RUSS 446 Russian Artistic Culture I: Beginnings to 1900
Credits 3. 3 Lecture Hours.
Masterpieces of Russian art, including architecture, dance, theater, music, and literature, from its beginnings until ca. 1900; taught in English.
Prerequisite: Junior or senior classification, or approval of instructor.
Cross Listing: RUSS 446/EURO 446.
EURO 447/RUSS 447 Russian Artistic Culture II: 1890 to Present
Credits 3. 3 Lecture Hours.
Masterpieces of Russian art, including architecture, dance, theater, music, film, and literature, from ca. 1890 to the present; taught in English.
Prerequisite: Junior or senior classification, or approval of instructor.
Cross Listing: RUSS 447/EURO 447.
EURO 451/ITAL 451 Introduction to Italian Culture
Credits 3. 3 Lecture Hours.
Introduction to the culture of the Italian Peninsula, from Middle Ages to present; study of major works of literature, political science, visual arts, music and cinema, to set Italy’s culture in its social and historical context; taught in English.
Prerequisite: Junior or senior classification or approval of instructor.

EURO 453/ITAL 453 Italian Literature
Credits 3. 3 Lecture Hours.
Survey of Italian literature; focus on literary portrayal of reality in modern and contemporary Italian culture, the dialogue with the classical tradition, and literature’s potential to affect and be affected by social critique; taught in English.
Prerequisite: Junior or senior classification or approval of instructor.
Cross Listing: ITAL 453/EURO 453.

EURO 454/ITAL 454 Italian Drama
Credits 3. 3 Lecture Hours.
Study of Italian dramatic literature from the origins of Italian theater to the contemporary stage; analysis of the link between theater, opera, and film; taught in English.
Prerequisite: Junior or senior classification or approval of instructor.
Cross Listing: ITAL 454/EURO 454.

EURO 456/ITAL 456 Contemporary Italy
Credits 3. 3 Lecture Hours.
Examination of changes in Italian society and culture since World War II, with focus on their narration and interpretation by representative authors and filmmakers, and on multicultural literary production in present-day Italy; taught in English.
Prerequisite: Junior or senior classification or approval of instructor.
Cross Listing: ITAL 456/EURO 456.

EURO 481 Research
Credits 0 to 3. 0 to 3 Other Hours.
Research conducted under the direction of faculty member in European studies, selected for each student individually.
Prerequisite: Approval of instructor and department head.
Cross Listing: ITAL 481/EURO 481.

EURO 483 Research
Credits 1 to 3. 1 to 3 Other Hours.
Research conducted under the direction of faculty member in European studies, selected for each student individually.
Prerequisite: Approval of instructor and department head.
Cross Listing: ITAL 483/EURO 483.

EURO 484 Internship
Credits 1 to 3. 1 to 3 Other Hours.
Directed Internship in a private firm or public agency to provide experience and learning appropriate to the student's degree program and career objectives. Must be taken on a satisfactory/unsatisfactory basis. May be taken two times for credit.
Prerequisite: Junior or senior classification.

EURO 485 Directed Studies
Credits 1 to 4. 1 to 4 Other Hours.
Individual supervision of readings or assigned projects in European studies, selected for each student individually.
Prerequisite: Approval of instructor and department head.

EURO 489 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Selected topics in an identified area of European studies. May be repeated for credit.
Prerequisite: Approval of instructor.

EURO 491 Research
Credits 1 to 3. 1 to 3 Other Hours.
Research conducted under the direction of faculty member in European languages and cultures. May be taken three times for credit.
Prerequisites: Junior or senior classification and approval of department head.

FILM - Film Studies (FILM)

FILM 251/ENGL 251 Introduction to Film Analysis
Credits 3. 3 Lecture Hours.
Fundamental aspects of film analysis and criticism.
Cross Listing: ENGL 251/FILM 251.

FILM 285 Directed Studies
Credits 0 to 3. 0 to 3 Other Hours.
Selected fields of film studies not covered in depth by other courses. Reports and extensive reading required. May be repeated for credit.
Prerequisite: Approval of director of film.

FILM 289 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Special topics in an identified area of film studies.

FILM 291 Research
Credits 0 to 3. 0 to 3 Other Hours.
Research conducted under the direction of faculty member in film.
Prerequisites: FILM 251/ENGL 251 or FILM 299 and freshman or sophomore classification and approval of instructor.

FILM 299 History of Film
Credits 3. 3 Lecture Hours.
Historical development of major periods, movements and styles, including several different national cinemas.

FILM 343/WGST 343 Sex, Gender and Cinema
Credits 3. 3 Lecture Hours.
Prerequisites: 3 hours in FILM or WGST; junior or senior classification or approval of instructor.
Cross Listing: WGST 343/FILM 343.

FILM 345/COMM 345 Media Industries
Credits 3. 3 Lecture Hours.
Survey of the business organization, economic structures and processes and regulations of the media industry.
Prerequisites: Any lower-division COMM course, or junior classification, or approval of instructor.
Cross Listing: COMM 345/FILM 345.

FILM 349 Documentary Cinema
Credits 3. 3 Lecture Hours.
History and theory of documentary cinema; examination of documentary film's ability to both reflect and shape the history of its time. May be taken two times for credit.
Prerequisite: Junior or senior classification, or approval of instructor.

FILM 351/ENGL 351 Advanced Film
Credits 3. 3 Lecture Hours.
A different film topic each term; sample topics: major directors; historical periods. fiction into film, film genres. May be repeated for credit.
Prerequisite: ENGL 251/FILM 251 or FILM 251/ENGL 251 or FILM 299 or approval of instructor; junior or senior classification.
Cross Listing: ENGL 351/FILM 351.

FILM 356/ENGL 356 Literature and Film
Credits 3. 3 Lecture Hours.
Novels and films based on them; writers and filmmakers such as Virginia Woolf, John Steinbeck, John Ford, Sally Potter, John Huston, Charlotte Bronte and Peter Bogdanovich.
Prerequisites: 3 credits of literature at the 200-level; junior or senior classification or approval of instructor.
Cross Listing: ENGL 356/FILM 356.
FILM 376/PHIL 376 Philosophy, Film and Evil
Credits 3.3 Lecture Hours.
Application of philosophical methods and analyses to the medium of film; survey of various depictions and treatments of evil within the genre of science fiction; investigation of depictions and treatments of evil arising from consideration of human encounters with alien others.
Prerequisite: Junior or senior classification.
Cross Listing: PHIL 376/FILM 376.
FILM 394 Studies in Film Genre
Credits 3.3 Lecture Hours.
Study of a specific film genre, such as Western, Gangster, Mystery, Science Fiction; genre varies each time course is taught; movies are screened and analyzed along with assigned readings that explore characteristics of the genre and its cultural importance. May be repeated for credit.
Prerequisite: FILM 251/ENGL 251 or ENGL 251/FILM 251.
FILM 398/AFST 398 Africana Cinema
Credits 3.3 Lecture Hours.
Overview of African cinema; historical survey of cinema from Africa and the African Diaspora; introducing films produced in several geographical regions and reflecting different filmmaking traditions. May be taken two times for credit.
Prerequisite: Junior or senior classification or approval of instructor.
Cross Listing: AFST 398/FILM 398.
FILM 401 National Cinema History
Credits 3.3 Lecture Hours.
Cinema History of a given film-producing nation other than the United States, such as Japanese Film, Swedish Film, South African Film. May be taken three times for credit.
Prerequisites: FILM 299; junior or senior classification.
FILM 402 Intermedia Performance
Credits 3.3 Lecture Hours.
Study of theory, history, literature and techniques of intermedia composition and design for film, theatre, dance, interactive media, and other forms of performance; examination of the collaborative creative process; projects in interdisciplinary performance.
Prerequisites: Junior or senior classification and MUSC 316, PERF 202, or approval of instructor.
Cross Listing: MUSC 402 and PERF 402.
FILM 405/EURO 405 European Cinema
Credits 3.3 Lecture Hours.
Exploration of key movements in European cinema from 1895 to the present, including both national cinematic traditions, such as Italian Neorealism or French New Wave, and international trends such as Formalism, Expressionism, or Auteurism.
Prerequisite: FILM 251/ENGL 251 or approval of instructor.
Cross Listing: EURO 405/FILM 405.
FILM 406/EURO 406 Propaganda and Dissidence
Credits 3.3 Lecture Hours.
Use of film as a medium to promote political ideology, government propaganda, political dissidence, and subversion, with focus on Europe.
Prerequisite: Junior or senior classification or approval of instructor.
Cross Listing: EURO 406/FILM 406.
FILM 415/CLAS 415 The Ancient World in Film
Credits 3.3 Lecture Hours.
Study of modern films as they relate to ancient literary texts that inspired them or with which they share common themes; relationship between Greek epic, tragedy, and comedy and their cinematic adaptations; treatment of Rome as an idea or ideal in the work of both ancient Romans and modern filmmakers.
Prerequisite: Junior or senior classification, or approval of instructor.
Cross Listing: CLAS 415/FILM 415.
FILM 425/FREN 425 French Film
Credits 3.3 Lecture Hours.
Overview of French cinema from its origins to the present; interpretation of French cultural history and politics through film; taught in English.
Prerequisite: Junior or senior classification, or approval of instructor.
Cross Listing: FREN 425/FILM 425.
FILM 435/GERM 435 German Film
Credits 3.3 Lecture Hours.
Consideration and analysis of major works and directors of German Film; interpretation of culture through film; relationship of film to history, literature, and other arts; taught in English. May be repeated for credit.
Prerequisite: Junior or senior classification, or approval of instructor.
Cross Listing: GERM 435/FILM 435.
FILM 445/COMM 435 Rhetoric of Television and Film
Credits 3.3 Lecture Hours.
Critical analysis of television and film; close readings of such mediated texts; special attention to writing television and film criticism.
Prerequisite: Junior or senior classification.
Cross Listing: COMM 435/FILM 445.
FILM 455/ITAL 455 Italian Cinema
Credits 3.3 Lecture Hours.
Survey of Italian cinema from Neorealism to the present; taught in English.
Prerequisites: Junior or senior classification, or approval of instructor.
Cross Listing: ITAL 455/FILM 455.
FILM 465/CHIN 465 Chinese Film
Credits 3.3 Lecture Hours.
Consideration and analysis of major works and directors of Chinese film; interpretation of culture through film; relationship of film to history, literature and other arts; taught in English. May be taken two times for credit.
Prerequisite: Junior or senior classification or approval of instructor.
FILM 481 Seminar in Film Studies
Credits 3.3 Lecture Hours.
Seminar on a figure, theme, style, movement or theory in film studies, with practice in the methods of research in film studies, culminating in a substantial research paper. Open to seniors enrolled in the interdisciplinary minor in film studies and to others with approval of the Coordinator of Film Studies. May be taken two times for credit.
Prerequisite: 9 hours in film studies courses including FILM 299.
FILM 485 Directed Studies
Credits 0 to 3.0 to 3 Other Hours.
Selected fields of film studies not covered in depth by other courses. Reports and extensive reading required. May be repeated for credit.
Prerequisite: Approval of director of film.
FILM 489 Special Topics in...
Credits 1 to 4.1 to 4 Lecture Hours. 0 to 4 Lab Hours.
Special topics in an identified area of film studies.
Prerequisite: Junior or senior classification or approval of instructor.
FILM 491 Research
Credits 0 to 3. 0 to 3 Other Hours.
Research conducted under the direction of faculty member in film.
Prerequisites: FILM 251/ENGL 251 or FILM 299 and junior or senior classification and approval of instructor.

FINC - Finance (FINC)

FINC 201 Personal Finance
Credits 3. 3 Lecture Hours.
(BUSI 1307, HECO 1307) Personal Finance. Financial management problems of the individual consumer; budgeting, insurance, saving and investing, and home financing. May not be used as a finance elective.

FINC 210 Opportunities in Finance I
Credit 1. 1 Lecture Hour.
Introduction to major career paths in finance and assessment of students' aptitudes and interests with respect to these career paths.
Prerequisite: Freshman or sophomore classification in Mays Business School.

FINC 211 Opportunities in Finance II
Credit 1. 1 Lecture Hour.
Exploration of specific career competencies in various financial workplaces via lectures, practitioner presentations, and field experiences.
Prerequisites: FINC 210 and approval of instructor.

FINC 267 Introduction to Securities and Commodities Trading
Credit 1. 1 Lecture Hour.
Introduction to financial markets and the instruments that trade in them; describes how financial markets operate; compare and contrast a wide variety of common financial instruments, including debt, equity, derivatives and commodities; basic functions of real-world data sources (especially Bloomberg and the Wall Street Journal); and career paths in the field of finance.
Prerequisite: Freshman or sophomore classification in business.

FINC 285 Directed Studies
Credits 0 to 6. 0 to 6 Other Hours.
Directed study of selected problems in the area of finance not covered in other courses. May be taken five times.
Prerequisites: FINC 341 or concurrent enrollment and approval of department head.

FINC 341 Business Finance
Credits 3. 3 Lecture Hours.
Financial practices and financial management of modern business corporations; cash flow, planning, procurement of funds, management of long-term funds and working capital.
Prerequisite: Admission to upper division in Mays Business School.

FINC 350 Ethics in Financial Decision-Making
Credit 1. 1 Lecture Hour.
Recognition and avoidance of breaches of fiduciary duty in the financial workplace; integration of classical ethical codes of conduct into professional decision-making; analysis and application of practitioner standards of conduct.
Prerequisites: Admission to upper division in Mays Business School; FINC majors only.

FINC 351 Investment Analysis
Credits 3. 3 Lecture Hours.
Operation and functions of the organized security exchanges, fundamental security analysis and technical market analysis.
Prerequisites: ACCT 327, or concurrent enrollment; FINC 341 with a grade of C or better; SCMT 303 or concurrent enrollment, or AP STAT 301 or AP STAT 302 or AP STAT 303.

FINC 361 Managerial Finance I
Credits 3. 3 Lecture Hours.
Managerial problems of financial managers; financial analysis, current asset management, capital budgeting and capital structure.
Prerequisites: ACCT 327, or concurrent enrollment; FINC 341 with a grade of C or better; SCMT 303 or concurrent enrollment, or AP STAT 301 or AP STAT 302 or AP STAT 303.

FINC 368 Trade Floor Dynamics
Credits 3. 3 Lecture Hours.
Analysis of trade floor activities and behaviors; organizational and process structure of trade floors; characteristics of trade floors that vary by type of asset traded, trading objectives and contract structure; analysis of operational issues including credit constraints, trade strategies, and regulatory compliance.
Prerequisites: FINC 341 or concurrent enrollment; admission to Trading, Risk and Investment Program (TRIP).

FINC 371 Real Estate Decision-Making
Credits 3. 3 Lecture Hours.
Legal, physical and economic characteristics of real estate; overview of real estate market analysis, real estate valuation procedures and real estate production, marketing and financing methods.
Prerequisite: FINC 341 or concurrent enrollment in FINC 341.

FINC 381 Money and Capital Markets
Credits 3. 3 Lecture Hours.
Role of finance and financial institutions in the money and capital markets in the U.S. including supply of and demand for funds, interest rates and flow of funds analysis.
Prerequisite: FINC 341 with a grade of C or better.

FINC 409 Survey of Finance Principles
Credits 3. 3 Lecture Hours.
Finance survey for non-business majors; financial markets, the investment banking process, interest rates, financial intermediaries and the banking system, financial instruments, time value of money concepts, security valuation and selection, and international finance. May not be used to satisfy degree requirements for majors in business or agribusiness.
Prerequisites: Junior or senior classification; for students other than business and agribusiness.

FINC 422 Applied Investment Analysis
Credits 3. 3 Lecture Hours.
Theoretical and analytical developments in security selection and portfolio management; includes macroeconomic analysis, portfolio theory, and portfolio performance evaluation; concepts applied to the allocation of investments in a student-managed equity portfolio.
Prerequisites: Approval of instructor; FINC 351 and FINC 361; ACCT 328 or concurrent enrollment.
FINC 423 Options and Financial Futures
Credits 3.3 Lecture Hours.
Valuation of options and financial futures; risk management and hedging applications using options and financial futures; primary focus on stock options, index options, stock index futures, interest rate futures, foreign exchange futures and futures options.
Prerequisites: FINC 351 and FINC 361; ACCT 328 or concurrent enrollment.

FINC 424 Trading Risk Management
Credits 3.3 Lecture Hours.
Mid-office risk management strategies using the energy markets as a focus; develops understanding of commodity market behavior, use of forwards and options for risk management, risk management reporting, Greeks and simulation-based VaR analysis.
Prerequisites: FINC 351 and FINC 361; ACCT 328 or concurrent enrollment.

FINC 425 Active Portfolio Management
Credits 3.3 Lecture Hours.
Analysis of investment tactics designed to earn abnormal returns; identification and evaluation of active strategies that exploit capital market anomalies and market inefficiencies; portfolio structuring, stock and sector selection, performance measurement, attribution analysis and benchmarks in inefficient markets.
Prerequisites: FINC 351 and FINC 361; ACCT 328 or concurrent enrollment.

FINC 426 Trading Markets
Credits 3.3 Lecture Hours.
Issues related to securities trading and securities markets; why and how people trade; the operation, structure and regulation of securities markets; focus on equity markets; comparisons to the markets for derivatives and other securities.
Prerequisites: FINC 351 and FINC 361; ACCT 328 or concurrent enrollment.

FINC 427 Titans of Investing
Credits 3.3 Lecture Hours.
Readings from the most influential theorists and practitioners of 20th and 21st century investing; case studies and portfolio sector exercises in an institutional context, based on detailed assessment of global investment risks.
Prerequisites: FINC 341 or FINC 409, or concurrent enrollment in either course; approval of instructor.

FINC 428 Fixed Income Analysis
Credits 3.3 Lecture Hours.
Characteristics of fixed income securities including Treasury issues, federal agency issues, corporate and municipal bonds, mortgage-backed and asset-backed securities; institutional features fixed income markets; risks of bond investing; fixed income valuation; term structure; trade strategies; modeling and assessing credit risks; hedging with fixed income derivatives.
Prerequisites: FINC 351 and FINC 361; ACCT 328 or concurrent enrollment.

FINC 435 Managerial Finance II
Credits 3.3 Lecture Hours.
Case studies in the administration of the financial affairs of business enterprises; working capital management, capital budgeting, capital structure, and mergers and acquisitions.
Prerequisites: FINC 351 and FINC 361; ACCT 328 or concurrent enrollment.

FINC 443 Valuation
Credits 3.3 Lecture Hours.
Theory and application of various approaches to corporate valuation; measuring and managing the value of companies; principles of value creation; fundamental valuation methodology; application of value creation principles to managerial problems; special cases and complex valuation issues.
Prerequisites: FINC 351 and FINC 361; ACCT 328 or concurrent enrollment.

FINC 444 Behavioral Finance
Credits 3.3 Lecture Hours.
Psychological and sociological aspects of financial decision making for individuals, institutions, and corporations; impacts of psychological factors on the financial markets, including anomalies in asset prices and stock market bubbles and crashes.
Prerequisites: FINC 351 and FINC 361.

FINC 445/IBUS 446 International Finance
Credits 3.3 Lecture Hours.
International business transactions, balance of payments and exchange rate systems, exchange rate risk and hedging techniques, sources of funding, relation to international financial institutions and capital instruments; foreign direct investment; international asset and liability management.
Prerequisites: FINC 351 and FINC 361; ACCT 328 or concurrent enrollment.

Cross Listing: IBUS 446/FINC 445.

FINC 446 Technical Analysis of Financial Markets
Credits 3.3 Lecture Hours.
Use of price, volume and other non-fundamental, market and behavioral data to analyze and predict security prices; emphasis on pattern recognition and correlation analysis over theory and casual analysis; application of technical analysis as an investment discipline for institutional portfolio management; principles, terminology, techniques and emerging theories of technical analysis.
Prerequisites: FINC 351 and FINC 361.

FINC 447/ACCT 447 Financial Statement Analysis
Credits 3.3 Lecture Hours.
Development of an analytical approach to financial statements, integrating relevant finance and accounting concepts and principles; current topics in financial analysis.
Prerequisites: FINC 341 with a grade of C or better; ACCT 327.
Cross Listing: ACCT 447/FINC 447.

FINC 448 Advanced Investments
Credits 3.3 Lecture Hours.
Application of finance theory to complex investment problems; implementation of asset pricing models, portfolio theory and arbitrage strategies; implication of principles of market efficiency and behavioral finance for selection of individual securities and portfolios.
Prerequisites: FINC 351 and FINC 361.

FINC 449 Financial Modeling
Credits 3.3 Lecture Hours.
Computer-based modeling of contemporary problems in investments and corporate finance including asset pricing, portfolio optimization, valuation, capital budgeting, cost of capital, risk assessment, and option pricing; using models to evaluate financial decision variables and alternative investment strategies.
Prerequisites: FINC 351 and FINC 361; ACCT 328 or concurrent enrollment.
FINC 462 Commercial Bank Management  
Credits 3.3 Lecture Hours.  
Problems confronting commercial banks: development and application of credit standards, decisions on loan applications, liquidity management and profit sensitivity to varying levels of interest rates.  
Prerequisite: FINC 381 or concurrent enrollment.

FINC 463 Seminar in Commercial Banking  
Credits 3.3 Lecture Hours.  
Cases and problems on contemporary management challenges and problem-solving techniques in commercial banks.  
Prerequisite: Junior or senior classification and approval of instructor.

FINC 464 Commercial Credit Analysis  
Credits 3.3 Lecture Hours.  
Recognized techniques for assessing the ability and willingness of business firms to service debts as originally agreed; regulatory and ethical requirements for structuring and documenting commercial bank loans to protect interests of shareholders, depositors, and deposit insurers.  
Prerequisite: Admission to Mays Commercial Banking Certificate Program, or FINC 434 and approval of advisor.

FINC 465 Seminar in Investment Banking  
Credits 3.3 Lecture Hours.  
Cases and problems on fundamentals of valuing publicly and privately held firms, underwriting public and private offerings of debt and equity securities, managing capital market risks, complying with SEC and NASD regulations and managing other financial services commonly offered by investment banks.  
Prerequisite: Junior or senior classification and approval of instructor.

FINC 466 Wall Street, Investment Banking and the Financial Markets  
Credits 3.3 Lecture Hours.  
Experience, first-hand, the major financial markets of the United States; visits to major Wall Street firms, security and commodity exchanges, and other financial institutions.  
Prerequisites: FINC 351 and FINC 361 and approval of instructor.

FINC 472 Real Estate Finance  
Credits 3.3 Lecture Hours.  
Real estate financing instruments, institutions and techniques; trust deed financing, mortgage underwriting and risk analysis, primary and secondary mortgage markets and institutions.  
Prerequisites: FINC 351, FINC 361 and FINC 371; ACCT 328 or concurrent enrollment.

FINC 473 Real Estate Appraisal  
Credits 3.3 Lecture Hours.  
Impact of socio-economic forces on urban real estate values; cost, sales comparison and capitalized income approaches to market value; demonstration appraisal.  
Prerequisites: FINC 351, FINC 361 and FINC 371; ACCT 328 or concurrent enrollment.

FINC 475 Real Estate Investment Analysis  
Credits 3.3 Lecture Hours.  
Real estate market analysis, equity investor decision criteria, institutional investment constraints and investment valuation; case analysis of specific real estate investment decisions.  
Prerequisites: FINC 351, FINC 361 and FINC 371; ACCT 328 or concurrent enrollment.

FINC 476 Corporate Finance  
Credits 3.3 Lecture Hours.  
Corporate finance, corporate financial management, investments, or financial institutions and markets.  
Prerequisites: Approval of department head; FINC 351 and FINC 361; ACCT 328 or concurrent enrollment.

FINC 477 Capital Markets and Institutions  
Credits 3.3 Lecture Hours.  
Reported regulations and managing other financial services commonly offered by investment banks.  
Prerequisites: Approval of department head; FINC 351 and FINC 361; ACCT 328 or concurrent enrollment.

FINC 478 Financial Management of Business Enterprises  
Credits 3.3 Lecture Hours.  
Impact of socio-economic forces on urban real estate values; cost, sales comparison and capitalized income approaches to market value; demonstration appraisal.  
Prerequisites: Approval of department head; FINC 351 and FINC 361; ACCT 328 or concurrent enrollment.

FINC 479 Corporate Finance Special Topics  
Credits 1 to 4.1 to 4 Lecture Hours.  
Selected topics in financial management. May include attention to aspects of real estate finance, corporate financial management, investments, or financial institutions and markets.  
Prerequisites: Approval of department head; FINC 351 and FINC 361; ACCT 328 or concurrent enrollment.

FINC 480 Professional Internship  
Credits 1 to 6.1 to 6 Other Hours.  
Professional internship with practicing professionals under the direction of a faculty member. Available for free elective only and must be taken on a satisfactory/unsatisfactory basis.  
Prerequisites: Finance major and approval of instructor and department head.

FINC 481 Directed Studies  
Credits 0 to 6.0 to 6 Other Hours.  
Directed study on selected problems in the area of finance not covered in other courses.  
Prerequisites: Approval of department head; FINC 351 and FINC 361; ACCT 328 or concurrent enrollment.

FINC 482 Seminar in Real Estate Finance  
Credits 3.3 Lecture Hours.  
Case studies and problems on fundamentals of valuing publicly and privately held firms, underwriting public and private offerings of debt and equity securities, managing capital market risks, complying with SEC and NASD regulations and managing other financial services commonly offered by investment banks.  
Prerequisite: Junior or senior classification and approval of instructor.

FINC 483 Seminar in Real Estate Appraisal  
Credits 3.3 Lecture Hours.  
Impact of socio-economic forces on urban real estate values; cost, sales comparison and capitalized income approaches to market value; demonstration appraisal.  
Prerequisite: Junior or senior classification and approval of instructor.

FINC 484 Professional Internship  
Credits 1 to 6.1 to 6 Other Hours.  
Professional internship with practicing professionals under the direction of a faculty member. Available for free elective only and must be taken on a satisfactory/unsatisfactory basis.  
Prerequisites: Finance major and approval of instructor and department head.

FINC 485 Directed Studies  
Credits 0 to 6.0 to 6 Other Hours.  
Directed study on selected problems in the area of finance not covered in other courses.  
Prerequisites: Approval of department head; FINC 351 and FINC 361; ACCT 328 or concurrent enrollment.

FINC 486 Seminar in Investment Banking  
Credits 3.3 Lecture Hours.  
Cases and problems on fundamentals of valuing publicly and privately held firms, underwriting public and private offerings of debt and equity securities, managing capital market risks, complying with SEC and NASD regulations and managing other financial services commonly offered by investment banks.  
Prerequisite: Junior or senior classification and approval of instructor.

FINC 487 Seminar in Real Estate Finance  
Credits 3.3 Lecture Hours.  
Problems confronting commercial banks: development and application of credit standards, decisions on loan applications, liquidity management and profit sensitivity to varying levels of interest rates.  
Prerequisite: FINC 381 or concurrent enrollment.

FINC 488 Seminar in Real Estate Appraisal  
Credits 3.3 Lecture Hours.  
Impact of socio-economic forces on urban real estate values; cost, sales comparison and capitalized income approaches to market value; demonstration appraisal.  
Prerequisite: Junior or senior classification and approval of instructor.

FINC 489 Special Topics in...  
Credits 1 to 4.1 to 4 Lecture Hours.  
Selected area in finance. May include attention to aspects of real estate finance, corporate financial management, investments, or financial institutions and markets.  
Prerequisites: Admission to upper division in Mays Business School and approval of instructor.

FIVS - Forensic & Inv Science (FIVS)

FIVS 123 Forensic Investigations  
Credits 3.3 Lecture Hours.  
Overview of forensics from incident scene to court room verdict; principles, concepts, tools and methodologies used in the science and practice of forensics; examination of various forensic fields; evidence recognition, analysis, interpretation and presentation to diverse audiences.

FIVS 205 Introduction to Forensic and Investigative Sciences  
Credits 3.3 Lecture Hours.  
Overview of principles, procedures, and concepts of forensic and investigative sciences; instruction in the definitions, scope, and use of tools, techniques and protocols in forensic applications used to resolve social, regulatory, and legal disputes.  
Prerequisite: Freshman or sophomore classification or approval of instructor.

FIVS 2440 (FORS 2440) Introduction to Forensic and Investigative Sciences  
Credits 3.3 Lecture Hours.  
Overview of principles, procedures, and concepts of forensic and investigative sciences; instruction in the definitions, scope, and use of tools, techniques and protocols in forensic applications used to resolve social, regulatory, and legal disputes.  
Prerequisite: Freshman or sophomore classification or approval of instructor.

FIVS 285 Directed Studies  
Credits 1 to 4.0 to 4 Lecture Hours. 0 to 4 Lab Hours. 0 to 4 Other Hours.  
Directed individual study in forensic and investigative sciences. May be repeated for credit.  
Prerequisites: Freshman or sophomore classification; approval of instructor and department head.

FIVS 289 Special Topics in...  
Credits 1 to 4.1 to 4 Lecture Hours. 0 to 4 Lab Hours.  
Selected topics in an identified area of forensic and investigative sciences. May be repeated for credit.

FIVS 291 Research  
Credits 0 to 4.0 to 12 Lab Hours.  
Research conducted under the direction of a faculty member in the department of entomology. May be repeated 3 times for credit.  
Prerequisite: Freshman or sophomore classification.
FIVS 308 Forensic Implications of Inheritance  
Credits 4. 3 Lecture Hours. 3 Lab Hours.  
Forensic genetics with an emphasis on human molecular genetics, population genetics, and genetic application in the forensic sciences.  
Prerequisites: BIOL 112; upper division in forensic and investigative sciences; junior or senior classification.  

FIVS 316 Biotechnology and Forensics  
Credits 4. 3 Lecture Hours. 3 Lab Hours.  
Introduction of applications of biotechnology for agriculture and human health purposes; description of experimental protocols used to create genetically modified organisms (GMOs); discussion of the risks, benefits, and regulations controlling the use of biotechnology in society.  
Prerequisites: GENE 301 or GENE 310 or FIVS 308 or approval of instructor.  

FIVS 401/SCSC 401 Forensic Soil Science  
Credits 3. 2 Lecture Hours. 2 Lab Hours.  
Examination of soils biology, chemistry and physical attributes to solve crimes; soil and geologic characteristics associated with crime scene examination; physical, biological and chemical characteristics and use of trace evidence.  
Prerequisite: Junior or senior classification.  
Cross Listing: SCSC 401/FIVS 401.  

FIVS 415 Practice and Principles of Science and Law  
Credits 3. 3 Lecture Hours.  
Introduction to series of practitioners of forensic science and the justice system; receive instruction on principles, procedures, and practices used in solving legal and societal issues; examine scientific method and scientific knowledge as applied through expert testimony; enhance critical thinking and reasoning skills in studying and debating different positions of current issues of science and law.  
Prerequisites: FIVS 205, FIVS 431/ENTO 431 and FIVS 432/ENTO 432; senior classification or approval of instructor; concurrent enrollment with FIVS 435.  

FIVS 421 Latent Print Processing  
Credits 2. 1 Lecture Hour. 3 Lab Hours.  
Information, techniques, and methodologies for processing latent fingerprints and enhancing visible fingerprints at and from crime scenes, as well as from physical evidence.  
Prerequisites: FIVS 205, upper division forensic and investigative sciences academic standing, and approval of instructor.  

FIVS 422 Crime Scene Investigation  
Credits 2. 1 Lecture Hour. 3 Lab Hours.  
Principles, procedures, processes and hands-on experience for conducting investigations ranging from general crime scene to death investigations.  
Prerequisites: FIVS 205, upper division forensic and investigative sciences academic standing, and approval of instructor.  

FIVS 431/ENTO 431 The Science of Forensic Entomology  
Credits 3. 3 Lecture Hours.  
Explores the science, methodology and technology employed to gather, preserve, and present information about insects and other arthropods in such a manner that this information can be used in courts of law as evidence and testimony to help resolve issues of a criminal or civil nature.  
Prerequisites: Junior classification or approval of instructor.  
Cross Listing: ENTO 431/FIVS 431.  

FIVS 432/ENTO 432 Applied Forensic Entomology  
Credit 1. 3 Lab Hours.  
Laboratory-based course affording practical experience using scientific information, methodology, technology, and legal procedures inherent to the field of forensic entomology; emphasis on collecting, preserving, and identifying information as evidence and expert witness testimony in courts of law.  
Prerequisites: Concurrent enrollment with FIVS 431/ENTO 431; junior classification or approval of instructor.  
Cross Listing: ENTO 432/FIVS 432.  

FIVS 435 Case Studies in Problem Solving  
Credits 3. 3 Lecture Hours.  
Development of reasoning strategies by examining a variety of case studies; science and scientific method solving real-world problems as part of an investigative team.  
Prerequisite: Senior classification or approval of instructor; concurrent enrollment with FIVS 415.  

FIVS 481 Seminar  
Credit 1. 1 Lecture Hour.  
Analysis of research topics related to the fields of forensic science and law. May be taken 4 times for credit.  
Prerequisite: Junior or senior classification or approval of instructor.  

FIVS 484 Professional Internship  
Credits 0 to 4. 0 to 12 Lab Hours.  
Independent study and supervised field experience related to a professional area or interest in forensic science. May be taken 3 times for credit.  
Prerequisite: Junior or senior classification or approval of instructor.  

FIVS 485 Directed Studies  
Credits 1 to 4. 1 to 4 Lecture Hours.  
Directed individual study in forensic and investigative sciences. May be repeated for credit.  
Prerequisites: Junior or senior classification; upper-division FIVS only; approval of instructor and department head.  

FIVS 489 Special Topics in...  
Credits 1 to 4. 1 to 4 Lecture Hours. 0 to 4 Lab Hours.  
Selected topics in an identified area of forensic and investigative sciences. May be repeated for credit.  

FIVS 491 Research  
Credits 0 to 4. 0 to 12 Lab Hours.  
Research conducted under the direction of a faculty member in the department of entomology. May be repeated 3 times for credit.  
Prerequisite: Junior or senior classification.  

FREN - French (FREN)  

FREN 101 Beginning French I  
Credits 4. 3 Lecture Hours. 2 Lab Hours.  
(FREN 1411, 1511) Beginning French I. Elementary language study with oral, written, and reading practice. Preparation for conversation. Part of class preparation will be done in language laboratory.
FREN 102 Beginning French II
Credits 4. 3 Lecture Hours. 2 Lab Hours.
(FREN 1412, 1512) Beginning French II. Continuation of FREN 101. Part of class preparation will be done in language laboratory.
Prerequisite: FREN 101.

FREN 201 Intermediate French I
Credits 3. 3 Lecture Hours.
Prerequisite: FREN 102.

FREN 202 Intermediate French II
Credits 3. 3 Lecture Hours.
(FREN 2312) Intermediate French II. Continuation of FREN 201 with more advanced material.
Prerequisite: FREN 201.

FREN 211 Field Studies I
Credits 3. 3 Other Hours.
French language and culture taught in France; supervised travel of cultural interest; living with local families; participation in the activities and courses of a French university or institute; written and oral reports, exams; to be taken concurrently with FREN 221.
Prerequisite: FREN 102 with a grade of B or higher or approval of instructor.

FREN 222 Field Studies II
Credits 3. 3 Other Hours.
French language and literature taught in France in cooperation with a French university or institute; exams, written reports; to be taken concurrently with FREN 221.
Prerequisite: FREN 102 with a grade of B or higher or approval of instructor.

FREN 223/EURO 223 French Culture and Society in French Literary Masterpieces in Translation
Credits 3. 3 Lecture Hours.
Analysis and understanding of French culture and contemporary society through the study of masterpieces of French literature including novels, plays, short stories and films.
Cross Listing: EURO 223/FREN 223.

FREN 285 Directed Studies
Credits 1 to 4. 1 to 4 Other Hours.
Individual supervision of readings or assigned projects in French, selected for each student individually.
Prerequisite: Approval of instructor and department head.

FREN 289 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Selected topics in an identified area of French. May be repeated for credit.
Prerequisite: Approval of instructor.

FREN 300 Written Communication in the French-Speaking World
Credits 3. 3 Lecture Hours.
Strategies for effective communication in the written language; active production of a variety of narrative, expository, analytical, persuasive and epistolary texts with special attention to language appropriate to various social, professional and cultural contexts both in French and in the Francophone world; conducted in French.
Prerequisite: FREN 202 or FREN 222.

FREN 301 French Society and Culture in Evolution
Credits 3. 3 Lecture Hours.
Events, figures, monuments, laws and cultural productions, texts and events participating in the evolution of French institutions, religion, socio-economic structures, marriage, sexuality and identities from the Gallo-Roman period through May 1968; conducted in French.
Prerequisite: FREN 202 or FREN 222.

FREN 306 Technical and Business French
Credits 3. 3 Lecture Hours.
Advanced-intermediate course to provide cross-cultural communication skills crucial to succeeding in a francophone business or technical environment, including topics on business and technical jargon, correspondence, résumés, interviewing, the European Union, telecommunications, technology and the French-speaking community.
Prerequisite: FREN 202 or FREN 222 or approval of instructor.

FREN 311 Oral Communication in the French-Speaking World
Credits 3. 3 Lecture Hours.
Strategies for effective communication in the spoken language; case studies in economic, political, cultural, social and environmental issues as presented through the press and audio-visual media of France and the Francophone world; conducted in French.
Prerequisite: FREN 202 or FREN 222.

FREN 321 French Literature I
Credits 3. 3 Lecture Hours.
Representative works of French poetry, theater, essays and novels in the historical, cultural and political context of French society from the Middle Ages through the 18th century; conducted in French.
Prerequisite: FREN 202 or FREN 222.

FREN 322 French Literature II
Credits 3. 3 Lecture Hours.
Representative works of French and Francophone novels, plays, poetry and essays reflecting the societies and cultural experience of French-speaking people in the 19th, 20th and 21st centuries; conducted in French.
Prerequisite: FREN 202 or FREN 222.

FREN 336 Politics, Culture and Society in Contemporary France
Credits 3. 3 Lecture Hours.
Contemporary France. Salient aspects of present-day French society and culture, including government, demographics, immigration, education, families, gender roles, entertainment and leisure, social classes and cross-cultural tensions; conducted in French.
Prerequisite: FREN 202 or FREN 222.

FREN 375 The Francophone World
Credits 3. 3 Lecture Hours.
The peoples, cultures and societies of French-speaking communities outside of France, with special attention to their colonial origins and current issues of politics, identities and migrations as represented in the press and media as well as in works of film and literature; conducted in French.
Prerequisite: FREN 202 or equivalent; junior or senior classification.

FREN 410 Seminar in French Literature
Credits 3. 3 Lecture Hours.
Exploration of a significant topic or period in French literature; conducted in French. May be repeated for credit.
Prerequisites: FREN 300 and an additional 3 hours at 300-level.
FRSC 418 Seminar in French Civilization
Credits 3. 3 Lecture Hours.
Discussions and observation of particular events and institutions crucial to the development of French society and culture; analysis of literary, artistic and cinematic representations of events and phenomena such as the French revolution, May 1968, and church and state relations; conducted in French. May be repeated for credit.
Prerequisite: FREN 300 and an additional 3 hours at 300-level.

FREN 421 Urban Forestry
Credits 3. 3 Lecture Hours.
Conceptual role of trees in improving the urban environment; optimum use of existing forested areas and the establishment of trees in appropriate open spaces; tree ordinances, species evaluation, street tree planning and tree inventory systems.
Prerequisite: Approval of instructor.*

FSTC - Food Science & Tech (FSTC)

FSTC 201 Food Science
Credits 3. 3 Lecture Hours.
(AGRI 1329) Food Science. The fundamental biological, chemical and physical scientific principles associated with the study of foods; topics include food composition and nutrition, food additives and regulations, food safety and toxicology, food processing, food engineering, food biotechnology, product development and sensory evaluation.

FSTC 285 Directed Studies
Credits 0 to 4. 0 to 4 Other Hours.
Directed study of selected problems in the area of food science.
Prerequisites: Approval of instructor; 2.0 GPR in major and overall.

FSTC 289 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Selected topics in an identified area of food science and technology. May be repeated for credit.
Prerequisite: Approval of instructor.

FSTC 291 Research
Credits 0 to 4. 0 to 4 Other Hours.
Research conducted under the direction of faculty member in food science and technology. May be repeated 2 times for credit.
Prerequisites: Freshman or sophomore classification and approval of department head.

FSTC 300/NUTR 300 Religious and Ethnic Foods
Credits 3. 3 Lecture Hours.
Understanding religious and ethnic foods with application to product development, production, and nutritional practices; emphasis on different food rules and priorities with attention given to different religious and ethnic groups within the US and around the world.
Prerequisites: Junior or senior classification or approval of instructor; basic knowledge of food science and nutrition helpful.
Cross Listing: NUTR 300/FSTC 300.

FSTC 305 Fundamental Baking
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Fundamentals of baking; chemical and physical properties of ingredients, methods of baking all products, fundamental reactions of dough, fermentation and oven baking.
Prerequisite: CHEM 222 or 227 or approval of department head.
FSTC 307/ANSC 307 Meats
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Integrated studies of the meat animal processing sequence regarding the production of meat-type animals and the science and technology of their conversion to human food.
Prerequisites: ANSC 107 and 108 or approval of department head.

FSTC 311/HORT 311 Principles of Food Processing
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Principles and practices of canning, freezing, dehydration, pickling and specialty food manufacture; fundamental concepts of various techniques of preparation, processing, packaging and use of additives; processing plants visited.
Prerequisite: FSTC 201; junior or senior classification or approval of department head or instructor.
Cross Listing: HORT 311/FSTC 311.

FSTC 312/DASC 312 Food Chemistry
Credits 3. 3 Lecture Hours.
The fundamental and relevant chemistry and functionality of the major food constituents (water, carbohydrates, lipids, proteins, phytochemical nutraceuticals) and study of food emulsion systems, acids, enzymes, gels, colors, flavors and toxins.
Prerequisite: FSTC 201; CHEM 227; CHEM 237 or approval of department head or instructor.
Cross Listing: DASC 312/FSTC 312.

FSTC 313/DASC 313 Food Chemistry Laboratory
Credit 1. 3 Lab Hours.
Laboratory exercises investigating specific molecules, such as food acids, enzymes, pigments and flavors, and chemical interactions in foods, such as oxidation reactions, emulsion systems, and functional properties from a fundamental chemistry rather than an analytical perspective.
Prerequisite: FSTC 201; CHEM 227; CHEM 237 or approval of department head or instructor.
Cross Listing: DASC 313/FSTC 313.

FSTC 314/DASC 314 Food Analysis
Credits 3. 1 Lecture Hour. 4 Lab Hours.
Selected standard methods for assay of food components; principles and methodology of both classical and instrumental techniques in food analysis.
Prerequisite: FSTC 201; FSTC 311/HORT 311; CHEM 227; CHEM 237 or approval of department head or instructor.
Cross Listing: DASC 314/FSTC 314.

FSTC 315/AGSM 315 Food Process Engineering Technology
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Elementary mechanics, power transmission, steam and steam boilers, pipes and pipe fitting, refrigeration and insulation, temperature measurement and control, electric motors, disposal of waste products, and mechanical problems as applied to foods and food processing.
Prerequisites: PHYS 201 or PHYS 218; junior or senior classification or approval of instructor.
Cross Listing: AGSM 315/FSTC 315.

FSTC 326/DASC 326 Food Bacteriology
Credits 3. 3 Lecture Hours.
Microbiology of human foods and accessory substances. Raw and processed foods; physical, chemical and biological phases of spoilage. Standard industry techniques of inspection and control.
Prerequisite: BIOL 206 or approval of instructor; junior or senior classification.
Cross Listing: DASC 326/FSTC 326.

FSTC 327/DASC 327 Food Bacteriology Lab
Credit 1. 3 Lab Hours.
Laboratory to accompany FSTC 326/DASC 326.
Cross Listing: DASC 327/FSTC 327.

FSTC 330/DASC 330 Dairy and Food Technology
Credits 4. 3 Lecture Hours. 3 Lab Hours.
Principles and techniques involved in processing of milk into market milk, butter, cheese and cheese foods; fundamental principles of these processes as related to their design and control.
Cross Listing: DASC 330.

FSTC 331/DASC 331 Dairy and Food Technology
Credits 4. 3 Lecture Hours. 3 Lab Hours.
Manufacture of frozen, freeze-dehydrated, concentrated and dehydrated dairy foods; fundamental aspects of freezing, concentration and dehydration of foods.
Prerequisite: FSTC 330/DASC 330 or approval of department head.
Cross Listing: DASC 331.

FSTC 401 Food Product Development
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Design and develop food products using principles of food chemistry, food processing, nutrition, sensory analysis and statistics; team collaborate to improve food product characteristics to meet the needs of a changing society.
Prerequisites: FSTC 201, FSTC 311/HORT 311, FSTC 312/DASC 312, FSTC 313/DASC 313, FSTC 314/DASC 314, FSTC 315/AGSM 315, FSTC 326/DASC 326 or registration therein; senior classification or approval of instructor.
Cross Listing: POSC 405/FSTC 405.

FSTC 405/POSC 405 Egg and Poultry Meat Processing
Credits 3. 3 Lecture Hours.
Principles of egg and poultry meat processing, understanding egg and poultry meat markets, egg and meat grading, product safety, packaging and consumer acceptance of shell eggs and poultry meat, specifically turkey and broilers.
Prerequisites: Junior or senior classification or approval of instructor.
Cross Listing: POSC 405/FSTC 405.

FSTC 406/POSC 406 Poultry Further Processing
Credits 4. 3 Lecture Hours. 2 Lab Hours.
Science and practice of value-added products; physical, chemical, microbiological and functional characteristics of value-added poultry products as they affect consumer acceptance, efficiency of production and regulatory approval.
Prerequisites: CHEM 222; DASC 326/FSTC 326/DASC 326/POS 309; POSC 405/FSTC 405; junior or senior classification or approval of instructor.
Cross Listing: POSC 406/FSTC 406.

FSTC 410/NUTR 410 Nutritional Pharmacometrics of Food Compounds
Credits 3. 3 Lecture Hours.
Nutritional pharmacokinetics and pharmacodynamics of food compounds; specific examples of toxicological and pharmacological effects of food compounds.
Prerequisites: NUTR 202 or NUTR 203 or FSTC 201 or CHEM 222 or CHEM 227 or approval of instructor; junior or senior classification.
Cross Listing: NUTR 410/FSTC 410.
FSTC 440/NUTR 440 Therapeutic Microbiology: Probiotics and Related Strategies
Credits 3. 3 Lecture Hours.
Topics relevant to alimentary (gastrointestinal) microbiology including: (i) the "normal" intestinal microbiota; (ii) probiotic and prebiotic nutritional supplements; (iii) recombinant pharmabiotics; (iv) gut-associated lymphoid tissue and mucosal immunity; (v) foodborne gastrointestinal pathogens; and (vi) fermented products as functional foods.
Prerequisites: Undergraduate survey course in microbiology or approval of instructor; junior or senior classification.
Cross Listing: NUTR 440/FSTC 440.

FSTC 444 Fundamentals of Food Law
Credits 3. 3 Lecture Hours.
History, development of, and fundamental principles behind current food regulations, including food labeling, adulteration, food safety, food additives, dietary supplements, and import and export laws; overview of government agency jurisdiction, international law and ethics.
Prerequisite: FSTC 201; junior or senior classification.

FSTC 446/HORT 446 Commercial Fruit and Vegetable Processing
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Pilot plant and laboratory operations pertaining to processed fruits, vegetables and beverages; new product development emphasized via individual laboratory projects.
Prerequisite: FSTC 311/HORT 311.
Cross Listing: HORT 446/FSTC 446. (Offered in even numbered years.)

FSTC 457/ANSC 457 Hazard Analysis and Critical Control Point System
Credits 3. 3 Lecture Hours.
Hazard Analysis and Critical Control Point (HACCP) principles specifically related to meat and poultry; microbiological and process overviews; good manufacturing practices and standard operating procedures development.
Prerequisite: FSTC 326/DASC 326 or approval of instructor.
Cross Listing: ANSC 457/FSTC 457.

FSTC 469/NUTR 469 Experimental Nutrition and Food Science Laboratory
Credits 4. 1 Lecture Hour. 6 Lab Hours.
Investigation of nutritional intervention in animal models of metabolic and psychological disorders (e.g. obesity and depression); investigational approaches: behavioral analyses; RNA and protein analyses; reverse transcription PCR.
Prerequisites: CHEM 227; CHEM 237; junior or senior classification or approval of instructor.
Cross Listing: NUTR 469/FSTC 469.

FSTC 470/ANSC 470 Quality Assurance for the Food Industry
Credits 3. 3 Lecture Hours.
Principles of food system process control including statistical process control (SPC) and the tools required to assure uniform communication and understanding of quality assurance systems.
Prerequisite: Junior or senior classification.
Cross Listing: ANSC 470/FSTC 470.

FSTC 471/NUTR 471 Critical Evaluation of Nutrition and Food Science Literature: Evidence Based Reviews
Credits 3. 3 Lecture Hours.
Evaluation of scientific literature, research methods within the literature, and the quality of scientific studies to produce an evidence-based review in areas specific to nutrition and food science.
Prerequisites: NUTR 202 or NUTR 203 and STAT 302; junior or senior classification; knowledge of technical writing helpful.
Cross Listing: NUTR 471/FSTC 471.

FSTC 481 Seminar
Credit 1. 1 Lecture Hour.
Guidelines and practice in journal article review and making effective technical presentations; strategies for conducting a job search; development of résumés and letters and interviewing targeted for careers in the food industry or graduate school.
Prerequisite: Senior classification in food science and technology.

FSTC 485 Directed Studies
Credits 0 to 4. 0 to 4 Other Hours.
Directed study on selected problems in the area of food technology not covered in other courses.
Prerequisites: Junior or senior classification; approval of department head; 2.0 GPR in major and overall.

FSTC 487/ANSC 487 Sensory Evaluation of Foods
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Application of sensory science principles and practices to food systems including an understanding of discriminative, descriptive and consumer sensory techniques.
Prerequisites: CHEM 222 or CHEM 228; junior or senior classification.
Cross Listing: ANSC 487/FSTC 487.

FSTC 489 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Selected topics in an identified area of food science and technology. May be repeated for credit.

FSTC 491 Research
Credits 0 to 4. 0 to 4 Other Hours.
Research conducted under the direction of faculty member in food science and technology. May be repeated 3 times for credit. Registration in multiple sections of this course are possible within a given semester provided that the per semester credit hour limit is not exceeded.

GALV - TAMUG Study Abroad (GALV)

GALV 300 TAMUG Study Abroad
Credits 1 to 18. 1 to 18 Lecture Hours.
For students in approved study abroad programs; may be repeated for credit.

GALV 301 TAMUG Study Abroad
Credits 1 to 18. 1 to 18 Lecture Hours.
For students in approved study abroad programs; may be repeated for credit.

GENE - Genetics (GENE)

GENE 101/BICH 101 Perspectives in Biochemistry and Genetics
Credit 1. 1 Lecture Hour.
Introduction to biochemistry and genetics and their relationship to the biological, biophysical and chemical sciences.
Prerequisite: Biochemistry and genetics major or approval of instructor.
Cross Listing: BICH 101/GENE 101.

GENE 285 Directed Studies
Credits 1 to 4. 1 to 4 Other Hours.
Introduction to laboratory research.
Prerequisite: Freshman or sophomore classification in genetics or approval of instructor.
GENE 289 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Selected topics in an identified area of genetics. May be repeated for credit.
Prerequisites: Freshman or sophomore classification in genetics; approval of instructor.

GENE 291 Research
Credits 1 to 4. 1 to 4 Other Hours.
Research conducted under the direction of faculty member in genetics. May be repeated 2 times for credit.
Prerequisites: Freshman or sophomore classification and approval of instructor.

GENE 301 Comprehensive Genetics
Credits 3. 3 Lecture Hours.
Survey of the fundamental principles of genetics: Physical basis of Mendelian inheritance, expression and interaction of genes, linkage, sex linkage, biochemical nature of genetic material and mutation. No credit will be given for more than one of GENE 301, GENE 302, GENE 315 or GENE 320/BIMS 320. Not open to biochemistry or genetics majors.
Prerequisite: BIOL 112; concurrent enrollment in GENE 312.

GENE 302 Principles of Genetics
Credits 3. 3 Lecture Hours.
Mechanisms of inheritance, stressing the conservation of fundamental genetic processes throughout evolution, from bacteria to humans; mutations and phenotypes, Mendelian genetics, population genetics and evolution, and complex inheritance. Course designed for biochemistry, genetics and all majors in biology. No credit will be given for more than one of GENE 301, GENE 302, GENE 315 and GENE 320/BIMS 320.
Prerequisite: BIOL 112; concurrent enrollment in GENE 312.

GENE 310 Principles of Heredity
Credits 3. 3 Lecture Hours.
Basic principles of classical genetics, molecular genetics, mutation theory and genetic engineering; emphasis on humans and society. Not open to biochemistry and genetics majors.
Prerequisite: Junior classification.

GENE 312 Comprehensive Genetics Laboratory
Credit 1. 0 Lecture Hours. 3 Lab Hours.
Exercises in Mendelian genetics, meiosis, probability theory in pedigrees, population and quantitative genetics, as well as other genetics theory; molecular techniques to examine DNA and analyze outcomes.
Prerequisite: GENE 301 or GENE 302 or registration therein.

GENE 315 Genetics of Plants
Credits 3. 3 Lecture Hours.
Fundamental genetic principles as applied to plants: transmission, replication, expression and interaction of genes; linkage, recombination and mapping; chromosomal and gene mutation; behavior of genes in populations; selection, mating systems, cytoplasmic inheritance; molecular analysis and manipulation of genes and gene products; genetically modified plants. Not open to biochemistry or genetics majors. No credit will be given for more than one of GENE 301, GENE 302, GENE 315 or GENE 320/BIMS 320.
Prerequisite: BIOL 101 or BIOL 111.

GENE 320/BIMS 320 Biomedical Genetics
Credits 3. 3 Lecture Hours.
Fundamental genetic principles as applied to biomedical science; Mendelian inheritance, linkage and genetic mapping, mutagenesis and pedigree analysis; molecular basis of gene function and inherited disease; gene therapy and genetic counseling. No credit will be given for more than one of GENE 301, GENE 302, GENE 315 or GENE 320/BIMS 320.
Prerequisite: BIMS major with a minimum overall 2.5 Texas A&M GPA.
Cross Listing: BIMS 320/GENE 320.

GENE 404 Plant Breeding
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Application of genetics and other sciences to the breeding and improvement of horticultural crops; methods and special techniques employed.
Prerequisite: GENE 301.
Cross Listing: HORT 404/GENE 404. Credit cannot be given for HORT 404/GENE 404 and SCSC 304.

GENE 405/BIMS 405 Mammalian Genetics
Credits 3. 3 Lecture Hours.
Comparative mammalian genetic systems with emphasis on laboratory animals; organization and expression of mammalian genes; development and use of genetically defined animals in biomedical and genetic research.
Prerequisite: GENE 302.
Cross Listing: BIMS 405/GENE 405.

GENE 406/BIOL 406 Bacterial Genetics
Credits 3. 3 Lecture Hours.
A problem oriented course surveying the manipulation and mechanisms of genetic systems in bacteria; recombination, gene structure and regulation of bacterial genes, plasmids and phages.
Prerequisites: GENE 302; BIOL 351.

GENE 411/MEPS 411 Biotechnology for Crop Improvement
Credits 3. 3 Lecture Hours.
Use of biotechnology to improve agricultural, horticultural and forest crops; techniques and methods used and case studies where biotechnology has been used to alter traits such as pathogen resistance, protein or oil consumption, ripening, fertility and wood properties.
Prerequisite: BIOL 111 or equivalent.
Cross Listing: MEPS 411/GENE 411.

GENE 412 Population and Ecological Genetics
Credits 3. 3 Lecture Hours.
Concepts of population genetics: dynamics of natural populations with emphasis on ecological interactions.
Prerequisite: GENE 302.

GENE 419/BICH 419 Computational Techniques for Evolutionary Analysis
Credits 3. 3 Lecture Hours.
Computational techniques for studying evolution; algorithms for construction and analysis of evolutionary relationships.
Prerequisite: Junior or senior classification or approval of instructor.
Cross Listing: BICH 419/GENE 419.

GENE 420 Bioethics
Credits 3. 3 Lecture Hours.
The application of ethical theory to the use of modern genetics and biochemistry stressing the social implications of genetic engineering, agricultural manipulation and biotechnology.
Prerequisites: GENE 302; BICH 410 or BICH 440.
GENE 421/BIMS 421 Advanced Human Genetics
Credits 3. 3 Lecture Hours.
A rigorous, analytical approach to genetic analysis of humans including diagnosis and management of genetic disease in humans; transmission of genes in human populations; human cytogenetics; the structure of human genes; human gene mapping; molecular analysis of genetic disease; genetics screening and counseling.
Prerequisites: GENE 302; BICH 410 or BICH 440.
Cross Listing: BIMS 421/GENE 421.

GENE 431/BICH 431 Molecular Genetics
Credits 3. 3 Lecture Hours.
Molecular basis for inheritance: gene structure and function, chromosomal organization, replication and repair of DNA, transcription and translation, the genetic code, regulation of gene expression, genetic differentiation and genetic manipulations.
Prerequisites: BICH 410 or BICH 440; GENE 301 or GENE 302 or GENE 320/BIMS 320.
Cross Listing: BICH 431/GENE 431.

GENE 432/BICH 432 Laboratory in Molecular Genetics
Credits 2. 6 Lab Hours.
Laboratory for molecular genetics providing technical experience with tools of molecular biology.
Prerequisite: GENE 301, GENE 302 or GENE 320/BIMS 320; BICH 410 or BICH 440.
Cross Listing: BICH 432/GENE 432.

GENE 450 Recombinant DNA and Biotechnology
Credits 3. 3 Lecture Hours.
Basic genetic engineering techniques; cloning with plasmid, lambda, cosmid and M13 vectors; gene libraries; DNA sequencing and mutagenesis; PCR; eucaryotic expression with yeast, baculovirus and mammalian vectors; transgenic animals and plants; gene therapy; monoclonal antibodies; bioremediation.
Prerequisites: BICH 431/GENE 431 or GENE 431/BICH 431 or concurrent registration; BICH 411 or 441 or concurrent registration.

GENE 452/BIMS 452 Modifying Mammalian Genomes for Biomedical Research
Credits 3. 3 Lecture Hours.
Review advances in the production of transgenic animals, the manipulation of embryonic stem cells for transgenics and therapeutics, the modification of specific genes in mammalian species by homologous recombination and RNA interference; special emphasis on genetic manipulation of cells and animals for biomedical research, stem-cell and gene therapy.
Prerequisite: GENE 302.
Cross Listing: BIMS 452/GENE 452.

GENE 461 Genetics I Seminar
Credit 1. 1 Lecture Hour.
Seminar topics on recent developments in genetics.
Prerequisites: GENE 302; GENE 431/BICH 431 or concurrent registration; senior classification or approval of instructor.

GENE 482 Genetics II Seminar
Credit 1. 1 Lecture Hour.
Student preparation and presentation of pertinent genetics topics.
Prerequisites: GENE 481; senior classification or approval of instructor.

GENE 485 Directed Studies
Credits 1 to 4. 1 to 4 Other Hours.
Directed study in genetics not included in established courses.
Prerequisites: Junior or senior classification; approval of instructor and department head.

GENE 489 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Selected topics in an identified area of genetics. May be repeated for credit.
Prerequisite: Approval of instructor.

GENE 491 Research
Credits 1 to 4. 1 to 4 Other Hours.
Laboratory research supervised by a faculty member. Registration in multiple sections of this course are possible within a given semester provided that the per semester credit hour limit is not exceeded.
Prerequisites: Junior or senior classification in genetics; approval of instructor and department head.

GEOG - Geography (GEOG)

GEOG 201 Introduction to Human Geography
Credits 3. 3 Lecture Hours. 1 Lab Hour.
A survey of the major systems of man-land relations of the world and their dissimilar developments; the processes of innovation, diffusion, and adaptation stressed with regard to changing relationships between people and their environment.

GEOG 202 Geography of the Global Village
Credits 3. 3 Lecture Hours.
(GEOG 1303) Geography of the Global Village. Survey of world regions; globalization; environmental problems at multiple scales; human-environment interactions; cultural coherence and diversity; population and settlement; geopolitics; social and economic development; place identification.

GEOG 203 Planet Earth
Credits 3. 3 Lecture Hours. 1 Lab Hour.
(GEOG 1301) Planet Earth. Earth’s physical environment including climate, water, landforms, and ecosystems; processes that control these systems and their global distributions; human effects on these processes.

GEOG 205 Environmental Change
Credits 3. 3 Lecture Hours.
Systems perspective on important attributes, elements, and connections within earth’s physical environment; dynamic nature of environment at multiple spatial and temporal scales.

GEOG 213 Planet Earth Lab
Credit 1. 3 Lab Hours.
Exercises and maps to illustrate principles of physical geography.

GEOG 232 Cartography and Visualization
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Introduction to science and art of map production; principles of thematic map compilation and design; history of thematic mapping; map projections; data management and symbolization; common types and styles of thematic maps.

GEOG 285 Directed Studies
Credits 1 to 4. 1 to 4 Other Hours.
Individually-supervised research or intensive study on topics not covered in regular courses.
Prerequisite: Approval of department head.
GEOG 291 Research
Credits 0 to 4. 0 to 4 Other Hours.
Research conducted under the direction of faculty member in geography. May be taken 2 times for credit. Registration in multiple sections of this course is possible within a given semester provided that the per semester credit hour limit is not exceeded.
Prerequisites: Freshman or sophomore classification and approval of instructor.

GEOG 301 Geography of the United States
Credits 3. 3 Lecture Hours.
Geographic personality (physical and cultural) of the United States.

GEOG 304 Economic Geography
Credits 3. 3 Lecture Hours.
Location of economic activities over the earth; distribution of agriculture, manufacturing, tertiary activities and transportation; economic growth of areas.

GEOG 305 Geography of Texas
Credits 3. 3 Lecture Hours.
Exploration into the geographic personality of Texas; past and current physical and biotic environments; cultural pluralism, including ethnic origins and distinctive human ecologies; and the social, economic and political sources of environmental problems.

GEOG 306 Introduction to Urban Geography
Credits 3. 3 Lecture Hours.
Reasons humankind tends to congregate in cities. Overview of patterns in the geographic distribution of cities, and in the geographic distribution of peoples and activities within cities, and the dynamics of these distributions.

GEOG 309 Geography of Energy
Credits 3. 3 Lecture Hours.
Development of high-energy society; renewable and nonrenewable energy resources; physical and social economies of energy use; geography of energy; energy problems and decisions; dependence of other resources on energy; alternative energy futures.
Prerequisite: Junior classification or approval of instructor.

GEOG 311 Cultural Geography
Credits 3. 3 Lecture Hours.
Human factors which affect man-land relationship; concept of culture, culture areas; population growth and migrations, types of economic activity, urban and transportation geography.

GEOG 312 Data Analysis in Geography
Credits 3. 3 Lecture Hours.
Foundation for collection and analysis of quantitative and qualitative geographic data; emphasis on hands-on, practical experience with commonly used analysis software and qualitative methods including interviewing and archival research; problems commonly encountered in dealing with data.
Prerequisite: STAT 303.

GEOG 320 The Middle East
Credits 3. 3 Lecture Hours.
Regional geography of the Middle East; physical setting and the historical evolution of Middle Eastern landscapes; current issues.
Prerequisites: Junior or senior classification.

GEOG 323 Geography of Latin America
Credits 3. 3 Lecture Hours.
Physical and cultural characteristics of Latin America; physical landscape, cultural succession and the present cultural landscape; details on sub-regions.

GEOG 324 Global Climatic Regions
Credits 3. 3 Lecture Hours.
Climatological processes and their consequences for spatial distributions of climates; survey of earth’s climates; relationships among climate, landforms, vegetation, soils and humans.
Prerequisite: GEOG 203 or ATMO 201 or approval of instructor.

GEOG 325 Geography of Europe
Credits 3. 3 Lecture Hours.
Regional geography of European landmass; global, political and cultural characteristics of European geography in historical and ecological contexts.
Prerequisite: Junior or senior classification.

GEOG 327 Geography of South Asia
Credits 3. 3 Lecture Hours.
South Asian geography; political and physical geographic divisions of South Asia; diversity of region; people, history, religion, cultures, political systems, rural and urban settings, climate, and environment; current problems and solutions.
Prerequisite: Junior or senior classification or approval of instructor.

GEOG 330 Resources and the Environment
Credits 3. 3 Lecture Hours.
Changing demand for land and sea resources; international conditions of population growth, resource depletion and geopolitical control; resource perceptions and decision-making.

GEOG 331 Geomorphology
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Principles and fundamentals of landform analysis. Laboratory work in advanced map interpretation.
Prerequisite: GEOL 101 or GEOG 203.

GEOG 335 Pattern and Process in Biogeography
Credits 3. 3 Lecture Hours.
Distribution of organisms across the earth and on environmental and cultural processes that have contributed to these patterns of distribution; dynamic nature of biogeographic patterns; impacts of contemporary and prehistoric humans on plant and animal distributions; methods for exploring biogeographic patterns and detecting change.
Prerequisite: Junior or senior classification.

GEOG 352/GEOL 352 GNSS in the Geosciences
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Fundamentals of Global Navigation Satellite Systems (GNSS); basic geodesy, figure of the earth; frames of reference, map projection, datums, ellipsoids; GPS accuracy and precision; applications in earth resource mapping and database creation; elementary GPS phase data processing.
Prerequisite: Junior or senior classification or approval of instructor.
Cross Listing: GEOL 352/GEOG 352.

GEOG 355 Concepts in Geographic Education
Credits 3. 3 Lecture Hours.
Key concepts and generalizations of geography; learning theory applied to geography and environmental education; development of field and computerbased technical/intellectual skills required to teach geography; curriculum and instructional issues related to geography.
Prerequisites: GEOG 201 or GEOG 202; GEOG 203 or equivalent.
GEOG 360 Natural Hazards  
**Credits 3. 3 Lecture Hours.**  
Introduction to the types and causes of natural events that pose risk to society; an examination of prevailing concepts and theories of human response and vulnerability; characteristics of natural events; natural hazard paradigms; case studies.  
**Prerequisites:** GEOG 203 or GEO 101; junior or senior classification.

GEOG 361 Remote Sensing in Geosciences  
**Credits 4. 3 Lecture Hours. 2 Lab Hours.**  
Introduction to the principles, techniques and applications of remote sensing technology in geosciences including the analysis and interpretation of airborne and spaceborne remote sensing data for studying key earth system processes.  
**Prerequisite:** Junior or senior classification.

GEOG 370/MARS 370 Coastal Processes  
**Credits 3. 3 Lecture Hours.**  
Introduction to the coastal system, waves and wave dominated coasts, shoreline morphodynamics, tidal and lake coasts, long term coastal development, sea level changes, subtidal and beach ecosystems, coastal dunes and wetlands, structures and organizations, coastal management and coastal hazards.  
**Cross Listing:** MARS 370/GEOG 370.

GEOG 380 Workshop in Environmental Studies  
**Credits 2 to 6. 2 to 6 Lab Hours.**  
The study, understanding and solution of human environment problems based on principles learned in the classroom; library, laboratory and field work carried out by individuals and in groups; reports on work accomplished. May be repeated for credit as many as three times.  
**Prerequisite:** GEOG 330.

GEOG 390 Principles of Geographic Information Systems  
**Credits 4. 3 Lecture Hours. 2 Lab Hours.**  
Basic concepts of design, planning and implementation of geographic information systems.  
**Prerequisite:** Junior or senior classification.

GEOG 391 Geodatabases  
**Credits 3. 3 Lecture Hours. 1 Lab Hour.**  
GIS data modeling; introductory and advanced spatial SQL (structured query language); spatial database management system (DBMS) server setup, management and maintenance; spatial DBMS design, implementation, tuning, performance analysis and indexing; connecting spatial data services and warehouses to GIS software.  
**Prerequisite:** Junior or senior classification.

GEOG 392 GIS Programming  
**Credits 4. 3 Lecture Hours. 2 Lab Hours.**  
Programming for geographic information science applications; principles of programming syntax and data structures; development of custom GIS programs; integration of programs into commercial GIS platforms.  
**Prerequisites:** GEOG 390 and ESSM 465 or equivalents, or approval of instructor; junior or senior classification.

GEOG 398 Interpretation of Aerial Photographs  
**Credits 3. 2 Lecture Hours. 3 Lab Hours.**  
Identification and evaluation of natural and cultural features on aerial photographs; methods for extracting information concerning land use, vegetative cover, surface and structural features, urban/industrial patterns and archaeological sites.  
**Prerequisites:** Junior or senior classification or approval of instructor.

GEOG 400 Arid Lands Geomorphology  
**Credits 3. 3 Lecture Hours.**  
Introduction to the geomorphology of deserts; processes, origin and evolution of arid lands; urban geomorphology in drylands; desertification.

GEOG 401 Political Geography  
**Credits 3. 3 Lecture Hours.**  
The political process at a variety of geographic scales: international, intranational and urban; origins of territorial organization and conflicts over access to and use of space and its resources.

GEOG 404 Spatial Thinking, Perception and Behavior  
**Credits 3. 3 Lecture Hours.**  
Spatial thinking, spatial perception of the environment and the ways thinking and perception influence spatial behavior; role of geospatial technologies in supporting spatial thinking; models of spatial thinking acquisition; cognitive maps and spatial decision making; developing spatial thinking and individual differences.  
**Prerequisite:** Junior or senior classification.

GEOG 405 Field Trips  
**Credits 1 to 4. 1 to 4 Other Hours.**  
Supervised field trip to investigate the physical, economic and cultural processes that influence the spatial development and distribution on the landscape. May be repeated for credit.  
**Prerequisites:** Geography course at the 200-level or registration therein; approval of instructor.

GEOG 406 Geographic Perspectives on Contemporary Urban Issues  
**Credits 3. 3 Lecture Hours.**  
Contemporary readings on spatial patterns and processes in urban environments; sprawl; human-environment interaction; housing; development and growth; concept of place; scale; power and policy.  
**Prerequisite:** GEOG 304 or GEOG 306 or equivalent.

GEOG 420 Geography of Terrorism  
**Credits 3. 3 Lecture Hours.**  
Exploration of global terrorism and counter terrorism; regional conflicts and mass violence; construction of places and regions associated with terror; American reactions to global terrorism.  
**Prerequisite:** Junior or senior classification.

GEOG 430 Environmental Justice  
**Credits 3. 3 Lecture Hours.**  
Exploration into the spatial variability and human geography of exposure to environmental hazards in U.S. and international contexts; emphasizes environmental equity and environmental racism as it relates to occupational, leisure, and residential geography.  
**Prerequisites:** GEOG 201 or GEOG 202; junior or senior classification.

GEOG 434 Hydrology and Environment  
**Credits 4. 3 Lecture Hours. 2 Lab Hours.**  
Examination of hydrologic processes in relation to climate, soils, vegetation, land use practices, and human impacts; natural scientific perspectives emphasized; field and laboratory included.  
**Prerequisite:** GEOG 203 or equivalent.

GEOG 435 Principles of Plant Geography  
**Credits 3. 2 Lecture Hours. 3 Lab Hours.**  
Plant distributions, their associations and environmental relationships; survey of the principal explanatory systems; field and laboratory study of area patterns at various geographic scales. A weekend field trip is required.  
**Prerequisite:** BIOL 101 or BIOL 107 or BIOL 301 or approval of instructor.
GEOG 440 History and Nature of Geography  
Credits 3. 3 Lecture Hours. 
Summary of classical knowledge of world; development of thought on nature of geography from 1800 to present. 
Prerequisite: Junior or senior classification.  

GEOG 442/GEOS 442 Past Climates  
Credits 3. 3 Lecture Hours. 
Terrestrial and marine proxy records of past climate variability, including tree rings, coral, and sediments; past climate change events such as the Little Ice Age and Medieval Warm Period; greenhouse gases and global temperature; insight into the nature of climate change and challenges humankind faces in the next few centuries. 
Prerequisites: ATMO 201, or GEOG 203, or GEOL 101, or GEOL 104, or OCNG 251; junior or senior classification.  
Cross Listing: GEOS 442/GEOG 442.  

GEOG 450 Field Geography  
Credits 3. 1 Lecture Hour.  6 Lab Hours. 
Introduction to field methods; documenting materials, reconnaissance, the field plan; mapping traverse, base maps and aerial photographs; recording techniques; interview procedures. Fields trips required, some on weekends and/or semester breaks, for which departmental fees may be assessed to cover costs. 
Prerequisite: 15 hours of geography or equivalent.  

GEOG 461 Digital Image Processing in the Geosciences  
Credits 4. 3 Lecture Hours.  2 Lab Hours. 
Key remote-sensing digital image processing methods; advanced topics in feature extraction, radiometric calibration, image enhancement, pattern recognition and geoscience applications. 
Prerequisite: GEOG 361 or equivalent and junior or senior classification.  

GEOG 462/ESSM 462 Advanced GIS Analysis for Natural Resources Management  
Credits 3. 2 Lecture Hours.  2 Lab Hours. 
Advanced topics in geographic information systems (GIS) to solve natural resource problems; manipulation of raster data types; three-dimensional modeling; emphasis on geoprocessing as it relates to applied projects particularly with habitat suitability models; field and lab use of global positioning systems (GPS); internet-based GIS modeling. 
Prerequisites: ESSM 351 or AGSM 461/SPSC 461 or equivalent or approval of instructor; junior or senior classification. 
Cross Listing: ESSM 462/GEOG 462.  

GEOG 467 Dynamic Modeling of Earth and Environmental Systems  
Credits 4. 3 Lecture Hours.  2 Lab Hours. 
Dynamical systems modeling; key concepts and processes in earth and environmental systems; human impact on these systems; model building and testing; system behavior over time; model validation and sensitivity; examples from the applications in earth and environmental sciences. 
Prerequisite: GEOG 203 or approval of instructor.  

GEOG 475 Advanced Topics in GIS (Geographic Information Systems)  
Credits 4. 3 Lecture Hours.  2 Lab Hours. 
Advanced Topics in Geographic Information Systems. Topics related to GIS implementation, spatial database design, spatial data analysis, and various advanced GIS applications. 
Prerequisite: GEOG 390 or equivalent.  

GEOG 476 GIS Practicum  
Credits 3. 3 Other Hours. 
Introduction to current topics in Geographic Information Science including ethical and legal issues surrounding spatial technologies, proper GIS management practices and professional certification; development of professional research, technical and communication skills through participation in a coordinated internship or independent research project. Meets writing-intensive course requirements for environmental geosciences, environmental studies and geography majors. 
Prerequisites: Senior classification and enrollment in Geographic Information Science and Technology or approval of instructor.  

GEOG 477 Terrain Analysis and Mapping  
Credits 4. 3 Lecture Hours.  2 Lab Hours. 
Geomorphometry for land surface characterization; fundamentals of terrain analysis; theory of land surface dynamics; application of software for digital terrain modeling and analysis. 
Prerequisites: GEOG 361 and GEOG 390 or equivalents, or approval of instructor; junior or senior classification.  

GEOG 478 WebGIS  
Credits 4. 3 Lecture Hours.  2 Lab Hours. 
Investigation of web-based geographic information systems; introduction to server-oriented architectures for web-based applications and services; development of web applications; management of web servers, web services and databases. 
Prerequisites: GEOG 390 or equivalent, or approval of instructor; junior or senior classification.  

GEOG 479 Principles of Geocomputation  
Credits 4. 3 Lecture Hours.  2 Lab Hours. 
Geocomputation including geospatial technologies, computational techniques and algorithms utilizing high-performance computing; fundamental geocomputation principles, artificial and computational intelligence. 
Prerequisites: GEOG 361, GEOG 390, GEOG 475; CSCE 110 or CSCE 111.  

GEOG 484 Internship  
Credits 0 to 12. 0 to 12 Lecture Hours. 
Directed internship in a private firm, government agency or non-governmental organization to provide work experience related to the student's degree program and career objectives. 
Prerequisites: Junior or senior classification and approval of internship agency and departmental internship director.  

GEOG 485 Directed Studies  
Credits 1 to 23. 1 to 23 Other Hours. 
Individually supervised research or advanced study on restricted areas not covered in regular courses. 
Prerequisite: Approval of department head.  

GEOG 489 Special Topics in...  
Credits 1 to 4. 1 to 4 Lecture Hours.  0 to 4 Lab Hours. 
Selected topics in an identified area of geography. May be repeated for credit. 
Prerequisite: Approval of instructor.  

GEOG 491 Research  
Credits 0 to 4. 0 to 4 Other Hours. 
Research conducted under the direction of faculty member in geography. May be repeated 2 times for credit. Registration in multiple sections of this course is possible within a given semester provided that the per semester credit hour limit is not exceeded. 
Prerequisites: Junior or senior classification and approval of instructor.
GEOL - Geology (GEOL)

GEOL 101 Principles of Geology
Credits 3. 3 Lecture Hours.
(GEOL 1103 and 1303, 1403)* Principles of Geology. Physical and chemical nature of the Earth and dynamic processes that shape it; plate tectonics, Earth's interior, materials it is made of, age and evolution, earthquakes, volcanism, erosion and deposition; introduces physical and chemical principles applied to the Earth. Not open to students who have taken GEOL 103 or GEOL 104.

GEOL 102 Principles of Geology Laboratory
Credit 1. 2 Lab Hours.
Laboratory exercise-based introduction to the physical and chemical nature of the Earth and dynamic process that shape it; rock and mineral types; topographic and geologic maps; complements GEOL 101 but may be taken independently.

GEOL 104 Physical Geology
Credits 4. 3 Lecture Hours. 3 Lab Hours.
Earth materials, structures, external and internal characteristics; physical processes at work upon or within the planet. A working knowledge of high school chemistry and mathematics is required.

GEOL 106 Historical Geology
Credits 4. 3 Lecture Hours. 3 Lab Hours.
(GEOL 1104 and 1304, 1404)* Historical Geology. Hypotheses of Earth's origin; age dating of geologic materials; development and history of life; plate tectonic reconstructions, geologic history, and paleogeography, with emphasis on the North American plate.
Prerequisite: GEOL 101 or equivalent.

GEOL 108 Dinosaur Life and Times
Credit 1. 1 Lecture Hour.
Dinosaur paleobiology and paleoecology; terrestrial paleoclimate and paleoenvironments of the Mesozoic; dinosaur ancestors; appearance and radiation of dinosaurs; paleoecology and paleobiology of major dinosaur groups; extinction of large dinosaurs and the Cretaceous-Paleogene mass extinction; the appearance and ancestry of birds. Not open to students who have taken GEOL 307.

GEOL 203 Mineralogy
Credits 4. 2 Lecture Hours. 6 Lab Hours.
Crystallography, crystal chemistry, mineral chemistry, optical crystallography, physical properties, and geologic occurrence of rock-forming and economic minerals.
Prerequisites: GEOL 101, GEOL 104 or GEOL 320; CHEM 101; MATH 131 or MATH 151 or approval of instructor.

GEOL 285 Directed Studies
Credits 1 to 4. 1 to 4 Other Hours.
Directed studies in specific problem areas of geology.
Prerequisite: Approval of instructor.

GEOL 289 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours. 0 to 4 Lab Hours.
Selected topics in an identified area of geology. May be repeated for credit.
Prerequisite: Approval of instructor.

GEOL 291 Research
Credits 0 to 4. 0 to 4 Other Hours.
Research conducted under the direction of faculty member in geology. May be repeated 2 times for credit. Registration in multiple sections of this course is possible within a given semester provided that the per semester credit hour limit is not exceeded.
Prerequisites: Freshman or sophomore classification and approval of instructor.

GEOL 300 Field Geology
Credits 6. 6 Other Hours.
Basic concepts of field relationships and field techniques are used to develop geologic maps, stratigraphic columns, cross-sections and geologic interpretations for a variety of geologic provinces. Course conducted off-campus in a field camp for six weeks.
Prerequisites: GEOL 302, GEOL 306, GEOL 309, GEOL 312 or approval of instructor.*

GEOL 301 Mineral Resources
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Origin, geologic relations and geographic distribution of mineral and energy resources; mineral economics, mining and reclamation and global economics in the resource industry; identification and classification of economic minerals including energy resources, base and precious metals, chemical industrial minerals and gemstones.
Prerequisites: GEOL 101 or GEOL 320; CHEM 106 or higher.*

GEOL 302 Introduction to Petrology
Credits 4. 3 Lecture Hours. 3 Lab Hours.
Introduction to the origin and evolution of igneous, sedimentary, and metamorphic rocks; classification and petrographic analysis of major rock types; relationships to tectonic settings.
Prerequisites: GEOL 104 and GEOL 203 or approval of instructor.

GEOL 304 Igneous and Metamorphic Petrology
Credits 4. 3 Lecture Hours. 3 Lab Hours.
Origin, identification and classification of igneous and metamorphic rocks; genetic processes inferred from laboratory studies and field occurrences.
Prerequisites: GEOL 302 and GEOL 309 or approval of instructor.*

GEOL 305 Paleobiology
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Principles of paleobiology; study of organisms important in the marine fossil record; application of paleontology to geologic problems.
Prerequisite: GEOL 106 or approval of instructor.

GEOL 306 Sedimentology and Stratigraphy
Credits 4. 3 Lecture Hours. 3 Lab Hours.
Origin of sediments and sedimentary rocks; climate, weathering, and weathering products; transport, deposition, and depositional environments for sediments; field and laboratory studies in description and interpretation of genesis of sedimentary rocks; principles of stratigraphy and basin analysis; plate tectonics and the formation of sedimentary basins; stratigraphic nomenclature; geologic time and correlation; sequence stratigraphy and basin architecture.
Prerequisite: GEOL 101 or GEOL 104 or approval of instructor.*

GEOL 308 Integrated Earth Science
Credits 4. 3 Lecture Hours. 3 Lab Hours.
Integrated processes shaping Earth's crust, continents, ocean basins, atmosphere and biosphere; place of Earth in the universe; relationship between Earth and human society; related fundamental physical and biological science principles and processes within an integrated Earth science context. Not an elective for students pursuing degrees for careers as professional geologists.
Prerequisite: GEOL 101 or GEOG 203.*
GEOL 309 Introduction to Geological Field Methods
Credits 3. 1 Lecture Hour. 6 Lab Hours.
Geological mapping methods, field observation procedures and data gathering and recording; use of Brunton compass; pace-and-compass mapping; topographic map use and interpretation; measurement of structural elements; interpretation of geologic map patterns; measurement of stratigraphic sections; construction of geologic cross sections; six day geologic mapping project during either spring break or two three-day weekends.
Prerequisites: GEOL 101 or GEOL 104; GEOL 106.*

GEOL 310 Planetary Geology
Credits 3. 3 Lecture Hours.
Introduction to planetary science; organization and composition of the solar system, including the planets, satellites and asteroids; surface features and internal structures of the terrestrial planets and moons; the dynamic processes of planetary resurfacing, including volcanism, tectonism, weathering and impacts; the history and future of solar system exploration.
Prerequisites: GEOL 101 or 104; junior or senior classification or approval of instructor.

GEOL 311 Principles of Geological Writing
Credit 1. 1 Lecture Hour.
Principles of writing for geological reports; format and style for abstracts, grant proposals, journal manuscripts and industry reports; evaluating written reports for revision and editing; using proper referencing and citation style; methods of maintaining clarity in documents; using web tools for geological communication.

GEOL 312 Structural Geology and Tectonics
Credits 4. 3 Lecture Hours. 3 Lab Hours.
Interpretation of rock structures; their relation to stratigraphic, physiographic and economic problems; regional tectonics of several selected areas.
Prerequisites: GEOL 101, GEOL 104 or GEOL 320; approval of instructor.*

GEOL 316 Team Research in Geology and Geophysics
Credits 3. 0 Lecture Hours. 9 Lab Hours.
Team-based research in geology and geophysics; hypothesis development, data collection, data interpretation; communication of geological/geophysical interpretations and data. May be taken four times for credit.
Prerequisites: GEOL 203 or concurrent enrollment and approval of instructor.

GEOL 320 Geology for Civil Engineers
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Principles of physical and engineering geology; properties of minerals, rocks and soils; active surface and subsurface processes; applications to the siting, design, construction, operation and maintenance of engineered works and the protection of the environment. A three-day field trip is required (a field trip fee is charged at registration).
Prerequisite: Sophomore classification.*

GEOL 330 Geologic Field Trips
Credits 1 to 3. 1 to 3 Other Hours.
Field trips to observe, analyze and interpret the geology and geophysics of selected localities in Texas and adjacent regions; complements classroom experience. Trip frequencies, duration, dates and study localities vary with semester.
Prerequisite: GEOL 101 or GEOL 104 or approval of instructor. May be repeated for credit.*

GEOL 352/GEOG 352 GNSS in the Geosciences
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Fundamentals of Global Navigation Satellite Systems (GNSS); basic geodesy, figure of the earth; frames of reference, map projection, datums, ellipsoids; GPS accuracy and precision; applications in earth resource mapping and database creation; elementary GPS phase data processing.
Prerequisites: Junior or senior classification; approval of instructor.
Cross Listing: GEOG 352/GEOL 352.

GEOL 400 Reservoir Description
Credits 3. 2 Lecture Hours. 3 Lab Hours.
An integrated reservoir characterization and design experience for seniors in petroleum engineering, geology and geophysics; includes using geophysical, geological, petrophysical and engineering data; emphasis on reservoir description (reservoir and well data analysis and interpretation), reservoir modeling (simulation), reservoir management (production optimization) and economic analysis (property evaluation).
Prerequisite: Junior or senior classification or approval of instructor.

GEOL 404 Geology of Petroleum
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Origin, migration and accumulation of petroleum; typical U.S. oil and gas fluids; laboratory work in subsurface geology.
Prerequisites: GEOL 312; senior classification in geology.

GEOL 410 Hydrogeology
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Geologic conditions determining the distribution and movement of ground water and their effect on the hydrologic properties of aquifers.
Prerequisite: Junior or senior classification or approval of instructor.

GEOL 420 Environmental Geology
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Geologic concepts of the nature of geologic environments and the dynamics of geologic processes needed to characterize and quantify human interactions with specific geologic systems including aquifers, watershed, coastlines and wetlands; specific techniques, including geophysical and geochemical techniques, field mapping, geographical information systems and remote sensing used to monitor human-geosphere interactions.
Prerequisites: GEOL 101 or GEOG 203; junior or senior classification or approval of instructor.

GEOL 440 Engineering Geology
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Fundamentals of soil, rock and fluid mechanics and basic engineering practices as applied to the analysis of the geologic environment for engineering uses. Designed for geoscience majors who have not had engineering courses.
Prerequisites: GEOL 312 or approval of instructor; PHYS 218.*

GEOL 451 Introduction to Geochemistry
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Chemical principles and processes responsible for the formation and cycling of earth materials, with emphasis on low temperature equilibria and kinetics in rockwater systems.
Prerequisite: GEOL 302 or approval of instructor.

GEOL 478 Earth Science Modeling
Credits 4. 3 Lecture Hours. 3 Lab Hours.
Techniques for building, solving and analyzing numerical models applied to a wide variety of problems in geology, geochemistry, geobiology and geophysics; derivation and scaling of conservation laws; finite difference and finite element techniques; programming in MATLAB or a higher-level language.
Prerequisites: MATH 151; MATH 152; junior or senior classification.
**GEOL 484 Internship**  
Credits 0. 0 Other Hours.  
Directed internship in a private firm, government agency or nongovernmental organization to provide work experience related to the student’s degree program and career objectives. May be taken two times.  
**Prerequisites:** Junior or senior classification and approval of internship agency and approval of instructor.

**GEOL 485 Directed Studies**  
Credits 1 to 12. 1 to 12 Other Hours.  
Advanced problems in geology.

**GEOL 486 Special Topics in...**  
Credits 1 to 4. 1 to 4 Lecture Hours. 0 to 4 Lab Hours.  
Selected topics in an identified area of geology. May be repeated for credit.  
**Prerequisite:** Approval of instructor.

**GEOL 491 Research**  
Credits 0 to 4. 0 to 4 Other Hours.  
Research conducted under the direction of faculty member in geology. May be repeated 2 times for credit. Registration in multiple sections of this course is possible within a given semester provided that the per semester credit hour limit is not exceeded.  
**Prerequisites:** Junior or senior classification and approval of instructor.

**GEOP - Geophysics (GEOP)**

**GEOP 484 Internship**  
Credits 0. 0 Other Hours.  
Directed internship in a private firm, government agency or nongovernmental organization to provide work experience related to the student’s degree program and career objectives. May be taken two times.  
**Prerequisites:** Junior or senior classification and approval of internship agency and approval of instructor.

**GEOP 485 Directed Studies**  
Credits 1 to 12. 1 to 12 Other Hours.  
Advanced problems in geophysics.

**GEOP 486 Special Topics in...**  
Credits 1 to 4. 1 to 4 Lecture Hours. 0 to 4 Lab Hours.  
Selected topics in an identified area of geophysics. May be repeated for credit.  
**Prerequisites:** Junior or senior classification and approval of instructor.

**GEOP 491 Research**  
Credits 0 to 4. 0 to 4 Other Hours.  
Research conducted under the direction of faculty member in geophysics. May be repeated 2 times for credit. Registration in multiple sections of this course is possible within a given semester provided that the per semester credit hour limit is not exceeded.  
**Prerequisites:** Junior or senior classification and approval of instructor.

**GEOP 491 Research**  
Credits 0 to 4. 0 to 4 Other Hours.  
Research conducted under the direction of faculty member in geophysics. May be repeated 2 times for credit. Registration in multiple sections of this course is possible within a given semester provided that the per semester credit hour limit is not exceeded.  
**Prerequisites:** Junior or senior classification and approval of internship agency and approval of instructor.

**GEOP 485 Directed Studies**  
Credits 1 to 12. 1 to 12 Other Hours.  
Advanced problems in geophysics.

**GEOP 491 Research**  
Credits 0 to 4. 0 to 4 Other Hours.  
Research conducted under the direction of faculty member in geophysics. May be repeated 2 times for credit. Registration in multiple sections of this course is possible within a given semester provided that the per semester credit hour limit is not exceeded.  
**Prerequisites:** Junior or senior classification and approval of instructor.

**GEOS - Geosciences (GEOS)**

**GEOS 101 Introduction to the Geosciences**  
Credit 1. 1 Lecture Hour.  
Introduction to the geosciences; geography, geology, geophysics, atmospheric sciences and oceanography; areas and opportunities in the various geoscience fields. Open to all freshman and sophomore non-geoscience students interested in geosciences.

**GEOS 105 Introduction to Environmental Geoscience**  
Credits 3. 3 Lecture Hours.  
Key concepts and generalizations of global environmental issues within an Earth systems science framework including climate change, air pollution, land and coastal degradation, water resources and pollution, and habitat loss; environmental ethics, economics and politics; environmental issues in Texas. Enrollment preference will be given to environmental geoscience and environmental studies majors.
GEOS 210 Climate Change
Credits 3.3 Lecture Hours.
Examination of the science of climate change; how greenhouse gases warm the planet; scientific evidence that the earth is warming; scientific evidence that humans are causing this warming; what warming we can expect in the future and impacts of that warming.

GEOS 289 Special Topics in...
Credits 1 to 4.1 to 4 Lecture Hours.
.. Selected topics in an identified area of geosciences. May be repeated for credit.
Prerequisite: Approval of instructor.

GEOS 291 Research
Credits 1 to 4.1 to 4 Other Hours.
Research conducted under the direction of faculty member in the College of Geosciences. May be repeated 2 times for credit. Registration in multiple sections of this course is possible within a given semester provided that the per semester credit hour limit is not exceeded.
Prerequisites: Freshman or sophomore classification and approval of instructor.

GEOS 301 College of Geosciences Study Abroad
Credits 1 to 18.1 to 18 Other Hours.
For students in approved programs abroad. May be repeated for credit.
Prerequisites: Admission to approved program and approval of academic dean.

GEOS 401 Polar Regions of the Earth: Science, Society and Discovery
Credits 3.3 Lecture Hours.
Overview of disciplines and topics that define modern polar science in the north and the south; includes history of the Polar Regions, polar geosciences, major polar scientific projects, and special topics; participate as individuals and teams in education, outreach and science projects.
Prerequisite: Junior or senior classification.

GEOS 405 Environmental Geosciences
Credits 3.2 Lecture Hours.2 Lab Hours.
Dynamics and human interactions with near-surface environments including land, atmosphere and oceans through problem-based learning; interdisciplinary environmental problem topic, for example, water quality, urbanization, coastal development, or environmental pollution; geoscience techniques used for monitoring human-geosphere interaction.
Prerequisites: GEOS 105; junior or senior classification.

GEOS 410 Global Change
Credits 3.3 Lecture Hours.
The interaction of the earth, atmosphere, oceans, cryosphere and life, including the impact of human society on the environment and climate; global change modeling; politics, policy and decision making; and personal awareness.
Prerequisite: Junior or senior classification.

GEOS 430 Global Science and Policy Making
Credits 3.3 Lecture Hours.
Policy making derived from global science and technology; how advice is communicated to the federal government and the public; current and future societal concerns that could affect future policy making; knowledge and information used to set priorities, decide budget allocations, and establish public policy.
Prerequisite: Junior or senior classification or approval of instructor.

GEOS 442/GEOG 442 Past Climates
Credits 3.3 Lecture Hours.
Terrestrial and marine proxy records of past climate variability, including tree rings, coral, and sediments; past climate change events such as the Little Ice Age and Medieval Warm Period; greenhouse gases and global temperature; insight into the nature of climate change and challenges humankind faces in the next few centuries.
Prerequisites: ATMO 201, or GEOG 203, or GEOL 101, or GEOL 104, or OCNG 251; junior or senior classification.
Cross Listing: GEOG 442/GEOS 442.

GEOS 444 The Science and Politics of Global Climate Change
Credits 3.3 Lecture Hours.
Examination of the policy and scientific debate over climate change; how scientific debates produce "knowledge"; how political debates produce policies; how policy debates use science; scientific evidence for climate change; impacts of climate change; possible responses to climate change; the political debate over climate change.
Prerequisite: One semester of physics or one science core course.

GEOS 470 Data Analysis Methods in Geosciences
Credits 3.3 Lecture Hours.
Research methods from conceptualization of a scientific problem to data collection, analysis, and visualization; basic data analysis methodologies in the geosciences; emphasis on real-world applications from environmental, atmospheric, and oceanographic sciences.
Prerequisites: Junior or senior classification; MATH 151 and STAT 303 or concurrent enrollment, or approval of instructor.

GEOS 481 Seminar
Credit 1.1 Other Hour.
Acquaint students with current research themes in the environmental field. May be repeated 4 times for credit.
Prerequisite: Junior or senior classification.

GEOS 484 Internship
Credits 0 to 6.0 to 6 Other Hours.
Provides opportunity to gain practical experience in a working situation either during the semester or summer; work experience must have relevance to the degree sought and/or career objectives. Must be taken on a satisfactory/unsatisfactory basis.
Prerequisite: Junior or senior classification and approval of internship agency and departmental director.

GEOS 485 Directed Studies
Credits 1 to 4.1 to 4 Other Hours.
Advanced problems in geosciences.

GEOS 489 Special Topics in...
Credits 1 to 4.1 to 4 Lecture Hours.
Selected topics in an identified area of geosciences. May be repeated for credit.

GEOS 491 Research
Credits 0 to 4.0 to 4 Other Hours.
Research conducted under the direction of a faculty member in the College of Geosciences. Registration in multiple sections of this course is possible within a given semester provided that the per semester credit hour limit is not exceeded.
Prerequisites: Junior or senior classification and approval of instructor.

- Social, political, and economic debates and issues in Germany from 1945 to the present through the arts (literature, film, video, music); focus on post-war reconstruction, divided Germany, and post-reunification periods; conducted in German.

**Academic Year:**
- Fall
- Spring
GERM 334 German Drama
Credits 3. 3 Lecture Hours.
Study, analysis and public presentation in German of a major German
dramatic work; literary theory and intensive conversational practice
combined with skills of language acquisition within a performance setting.
Prerequisite: GERM 310 or GERM 315, or registration therein.

GERM 336 German Fairy Tales
Credits 3. 3 Lecture Hours.
Introduction to and study of fairy tales and children's literature through
German tradition in these forms; reception of fairy tales through adaptation
and modernization; taught in German.
Prerequisite: GERM 310 or GERM 315, or registration therein.

GERM 362 The Weimar Republic: Literature and Culture
Credits 3. 3 Lecture Hours.
Film, theater and poetry in the turbulent era prior to the Nazi terror;
conducted in German.
Prerequisite: GERM 310 or GERM 315, or registration therein.

GERM 411 German Author and Genre Studies
Credits 3. 3 Lecture Hours.
Examination of the work of a specific author, such as Goethe, Schiller,
Kafka, Brecht, Frisch, or Grass, or the diachronic study of a specific genre,
e.g., poetry, drama, prose; taught in German. May be taken two times.
Prerequisite: 6 hours in GERM at 300-level, or approval of instructor.

GERM 417 Reformation in Germany
Credits 3. 3 Lecture Hours.
The life and thought of Martin Luther; study of the Protestant Reformation
in Germany from theological, political, and social perspectives; taught in
English.
Prerequisite: GERM 202 or registration therein or approval of instructor.

GERM 418 German Drama
Credits 3. 3 Lecture Hours.
Consideration and analysis of major works and directors of German
Film; interpretation of culture through film; relationship of film to history,
literature, and other arts; taught in English. May be repeated for credit.
Prerequisites: Junior or senior classification, or approval of instructor.
Cross Listing: FILM 435/GERM 435.

GERM 424 German Romanticism: Literature, Theory, Philosophy
Credits 3. 3 Lecture Hours.
From Goethe's "Faust" to the romantic exaltation of poetry; influence of the
romantic movement on European literary theory and philosophy; taught in
English.
Prerequisite: GERM 202 or registration therein, or approval of instructor.
Cross Listing: EURO 437/GERM 437.

GERM 430 Global Germany
Credits 3. 3 Lecture Hours.
Impact of globalization on Germany and the globalization of German life
and culture from postwar period to the present; analysis of theoretical,
historical, fictional and/or cinematic works presenting relationship of
modern Germany with world affairs. Course conducted in English.
Prerequisite: Junior or senior classification or approval of instructor.

GERM 432 German Romanticism: Literature, Theory, Philosophy
Credits 3. 3 Lecture Hours.
From Goethe's "Faust" to the romantic exaltation of poetry; influence of the
romantic movement on European literary theory and philosophy; taught in
English.
Prerequisite: GERM 202 or registration therein, or approval of instructor.
Cross Listing: EURO 437/GERM 437.

GERM 436 German Fairy Tales
Credits 3. 3 Lecture Hours.
Introduction to and study of fairy tales and children's literature through
German tradition in these forms; reception of fairy tales through adaptation
and modernization; taught in German.
Prerequisite: GERM 310 or GERM 315, or registration therein.

GERM 437 German Romanticism: Literature, Theory, Philosophy
Credits 3. 3 Lecture Hours.
From Goethe's "Faust" to the romantic exaltation of poetry; influence of the
romantic movement on European literary theory and philosophy; taught in
English.
Prerequisite: GERM 202 or registration therein, or approval of instructor.
Cross Listing: EURO 437/GERM 437.

GERM 438 German Fairy Tales
Credits 3. 3 Lecture Hours.
Introduction to and study of fairy tales and children's literature through
German tradition in these forms; reception of fairy tales through adaptation
and modernization; taught in German.
Prerequisite: GERM 310 or GERM 315, or registration therein.
HBRW 289 Special Topics In...  
Credits 3. 3 Lecture Hours.  
Selected topics in an identified area of Hebrew studies. May be repeated for credit.  
Prerequisite: Approval of instructor.

HEFB - Health Ed Field Based (HEFB)

HEFB 222/KNFB 222 Teaching and Schooling in Modern Society  
Credits 3. 2 Lecture Hours. 3 Lab Hours.  
Developing an understanding of students in multiple settings and levels; development, structure, history, finance, and management of schools in a democratic society; philosophical, ethical and moral dimensions of teaching; professional role of teacher.  
Prerequisites: Junior or senior classification; majors only.  
Cross Listing: KNFB 222/HEFB 222.

HEFB 324/KNFB 324 Technology and Teaching Skills for the 21st Century Learner  
Credits 3. 2 Lecture Hours. 2 Lab Hours.  
Preparation of future Health and Physical Education teachers with practical skills related to: technology in the classroom/gymnasium, strategies for addressing urban education and English language learners, liability, management and classroom discipline, development of professional communication skills and time management; includes field based experiences in diverse classroom settings.  
Prerequisites: HEBF 222/KNFB 222; junior or senior classification; admission to professional phase of program.  
Cross Listing: KNFB 324/HEFB 324.

HEFB 325/KNFB 325 Introduction to Secondary School Teaching  
Credits 3. 2 Lecture Hours. 2 Lab Hours.  
Introduce fundamental teaching skills and theories necessary for preparing reflective teachers; examine classroom management, learning strategies and assessment techniques; classroom lectures combined with field-based experiences to link theory into practice.  
Prerequisites: HEBF 324/KNFB 324; admission to the professional phase of program; junior or senior classification.  
Cross Listing: KNFB 325/HEFB 325.

HEFB 450/KNFB 450 Supervised Student Teaching  
Credits 6. 2 Lecture Hours. 6 Other Hours.  
Observation and participation in an accredited public school classroom; techniques of teaching student’s teaching fields, and appropriate instructional strategies for assigned student population.  
Prerequisites: Admission to professional phase of program and to student teaching; junior or senior classification.  
Cross Listing: KNFB 450/HEFB 450.

HISP - Hispanic Studies (HISP)

HISP 201 Current Issues in Hispanic Studies  
Credit 1. 1 Lecture Hour.  
Exploration of current issues and concerns in Hispanic Studies through attendance and participation in Hispanic Studies-related events and lectures by noted academics and professionals in Hispanic Studies; in-class discussions. May be taken three times for credit. Must be taken on a satisfactory/unsatisfactory basis.  
Prerequisite: ENGL 104.

HISP 204 Spanish and Spanish American Literature in Translation  
Credits 3. 3 Lecture Hours.  
Survey of literature from the Spanish-speaking world from the Middle Ages to the present; English translations of masterpieces of Spanish language literature; authors such as Cervantes, Lope de Vega, Dario, Garcia Marquez. Taught in English.

HISP 205 Don Quixote and the Other Arts  
Credits 3. 3 Lecture Hours.  
A study of Miguel de Cervantes’ masterwork, Don Quixote, and its representations in other arts such as painting, film and music. Taught in English.

HISP 206 Food in the Hispanic World  
Credits 3. 3 Lecture Hours.  
A study of food, food preparation and consumption in the Hispanic world from historical, geographical, artistic, social and psychological perspective. Taught in English.

HISP 250 Contemporary Spanish Culture  
Credit 1. 1 Lecture Hour.  
Cultural and practical orientation for students participating in the summer study abroad programs in Spain; brief introduction to contemporary social and cultural institutions; discussions of Spanish university system; oral reports and final paper; readings and discussion in English and Spanish.  
Prerequisite: SPAN 101 or equivalent.

HISP 260 Contemporary Mexican Culture  
Credit 1. 1 Lecture Hour.  
Introduction to contemporary Mexican social, cultural, and political institutions; discussion of Mexican university system; readings and discussion in Spanish and English. For preparation for study abroad program in Mexico.  
Prerequisite: SPAN 101 or equivalent.

HISP 285 Directed Studies  
Credits 0 to 3. 0 to 3 Other Hours.  
Individual supervision of readings or assigned projects in Hispanic Studies, selected for each student individually.  
Prerequisites: Approval of instructor and department head.

HISP 289 Special Topics In...  
Credits 3. 3 Lecture Hours.  
Selected topics in an identified area of Hispanic Studies. May be taken three times for credit.  
Prerequisites: ENGL 104; freshman or sophomore classification; approval of department head.

HISP 291 Research  
Credits 0 to 3. 0 to 3 Other Hours.  
Research in Hispanic Studies conducted under the direction of faculty member. May be taken two times for credit.  
Prerequisites: Freshman or sophomore classification and approval of instructor.

HISP 352 Hispanic Literature and Film  
Credits 3. 3 Lecture Hours.  
The language of film, and film as fiction; the relationship between film and literature; films as expressions of cultural realities through the adaptation of Hispanic literary works; readings and lectures in English.
HISP 362/ENGL 362 Latino/a Literature
Credits 3. 3 Lecture Hours.
Literature by U.S.-based Latino/a authors writing mostly in English; examination of historical and social contexts of cultural production; may include novels, poetry, short stories, plays, and films to gain understanding of aesthetic expression of diverse Latino/a authors, including but not limited to Mexican Americans, Puerto Ricans, Cuban Americans and Dominican Americans.
Prerequisite: Junior or senior classification.
Cross Listing: ENGL 362/HISP 362.
HISP 363 Borderlands: U.S. and Mexico
Credits 3. 3 Lecture Hours.
Multiple images of the U.S./Mexico border, their creation, their evolution, and their conflicting representations in filmic, literary and musical texts.
Prerequisites: ENGL 104 and junior or senior classification.
HISP 471/RELS 471 Hispanic Religions
Credits 3. 3 Lecture Hours.
Exploration of the history and practice of Hispanic religion, including spirit possession, evil eye, consumption of sacred substances, healing traditions, ex-votos, relics, prophecy, omens, monsters, astrology, witchcraft, the Inquisition, festivals, pilgrimage, mystics and religious contributions of diverse ethnic groups.
Prerequisite: Junior or senior classification or approval of instructor.
Cross Listing: RELS 471/HISP 471.
HISP 474/RELS 474 Diversity Lessons from Medieval Spain
Credits 3. 3 Lecture Hours.
Crucible of cultures—Christian, Jewish, and Muslim—that was medieval Spain and modern implications of that experience in diversity.
Prerequisites: ENGL 104 and junior or senior classification.
Cross Listing: RELS 474/HISP 474.
HISP 485 Directed Studies
Credits 0 to 3. 0 to 3 Other Hours.
Individual supervision of readings or assigned projects in Hispanic Studies, selected for each student individually.
Prerequisites: Junior or senior classification; approval of instructor and department head.
HISP 489 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours. 0 to 4 Lab Hours.
Selected topics in an identified area of Hispanic studies. May be taken three times for credit.
Prerequisites: ENGL 104; junior or senior classification; approval of department head.
HISP 491 Research
Credits 0 to 3. 0 to 3 Other Hours.
Research in Hispanic Studies conducted under the direction of faculty member. May be taken two times for credit.
Prerequisites: Junior or senior classification and approval of instructor.

HIST - History (HIST)

HIST 101 Western Civilization to 1660
Credits 3. 3 Lecture Hours.
(HIST 2311) Western Civilization to 1660. Ancient civilizations, Greek, Roman and Asian; Christianity; medieval civilization in west, eastern Europe; political, social and intellectual developments from earliest human cultures to 1660.

Cross Listing: CLAS 220 and RELS 220.
HIST 221/RELS 221 History of Islam
Credits 3. 3 Lecture Hours.
Introduction to the history of Islam, from the origins of the religion to the present; development of Islamic law; gender issues; expansion of Islam to Sub-Saharan Africa and South Asia; globalized Islam.
Cross Listing: RELS 221/HIST 221.

HIST 226 History of Texas
Credits 3. 3 Lecture Hours.
(HIST 2301) History of Texas. History of Texas from Spanish period to present day. Stress placed upon period of Anglo-American settlement, revolution, republic and development of modern state.

HIST 230 American Military History, 1609 to Present
Credits 3. 3 Lecture Hours.
Main events, personalities and technologies related to American military history.

HIST 232 History of American Sea Power
Credits 3. 3 Lecture Hours.
Development of American sea power from the 18th century to the present.

HIST 234 European Military History
Credits 3. 3 Lecture Hours.
Includes societal involvement, democratization of war, technology, strategy, military thought and campaigns.

HIST 242 United States Maritime History
Credits 3. 3 Lecture Hours.
Development of American maritime history from colonial times to the present.

HIST 258 American Indian History
Credits 3. 3 Lecture Hours.
Survey of American Indian history; Pre-Columbian, First Contact, Colonial Conquest, Differentiation between cultural groups; Reservation period, twentieth-century self-determination, and Pan-Indianism.

HIST 280 The Historian’s Craft
Credits 3. 3 Lecture Hours.
The Historian's Craft. The world of the professional historian; meanings and uses of history; current debates; archival research; evidence and argumentation; principles and methods of the analytical narrative.

HIST 285 Directed Studies
Credits 0 to 3. 0 to 3 Other Hours.
Selected fields of history not covered in depth by other courses. Reports and extensive reading required.
Prerequisite: Approval of department head.

HIST 289 Special Topics in...
Credits 3. 3 Other Hours.
Selected topics in an identified area of history. May be repeated for credit.
Prerequisite: Approval of instructor.

HIST 291 Research
Credits 0 to 3. 0 to 3 Other Hours.
Research conducted under the direction of faculty member in history.
Prerequisites: 24 hours if history, with 12 or more at 200-level or above; freshman or sophomore classification and approval of instructor.

HIST 300/AFST 300 Blacks in the United States, 1607-1877
Credits 3. 3 Lecture Hours.
Blacks in the United States from the colonial period to 1877; the slave trade, slavery, free blacks and the impact of the Civil War and Reconstruction on blacks.
Prerequisite: Junior or senior classification.
Cross Listing: AFST 300/HIST 300.

HIST 301/AFST 301 Blacks in the United States Since 1877
Credits 3. 3 Lecture Hours.
Blacks in the United States from the end of Reconstruction to the present; the ideologies of black leaders, disfranchisement, lynching and the quest for equality in the 1950s and 1960s.
Prerequisite: Junior or senior classification.
Cross Listing: AFST 301/HIST 301.

HIST 302 Women and War in the African Diaspora
Credits 3. 3 Lecture Hours.
Case studies of women and war in the African diaspora in a wide historical and comparative context; social, economic, and cultural influence of war on women’s lives; women as victims, combatants, and refugees; historical construction of race, ethnic and gender identity during times of conflict.
Prerequisite: Junior or senior classification.

HIST 304 Mexican-American Frontier to 1848
Credits 3. 3 Lecture Hours.
Origins and development of Spanish and Mexican history of Greater Southwest; exploration and conquest; Spanish entradas into Southwest; rise of institutions and colonial society; economic history; Mexican independence; Mexico’s far northern frontier, 1821-1848.
Prerequisite: Junior or senior classification.

HIST 305 Mexican-American History 1848-Present
Credits 3. 3 Lecture Hours.
Social, economic and political evolution of Mexican Americans from 1848 to present; adaptation to a harsh and isolated frontier; land tenure systems; conflict in the new Southwest; change and continuity in society; immigration and settlement of Mexicans; emergence of various political movements; current issues.

HIST 307 Latino Communities of the U.S.
Credits 3. 3 Lecture Hours.
Hispanic or “Latino” communities of 20th century U.S.: Mexican Americans, Puerto Ricans, Cubans and Central Americans; differences in historical experiences; role of race, class, and gender; cultural identity as expressed in art, literature, folklore and religion; contemporary social, political, and economic issues.

HIST 308 History of American Indians in the U.S. South
Credits 3. 3 Lecture Hours.
Examination of the role of indigenous populations in the history and formation of the U.S. South; cultural values and social practices; impact of European exploration and African slavery; trade patterns, imperial wars, and removal policies.
Prerequisite: Junior or senior classification.

Credits 3.3 Lecture Hours.
European political and diplomatic history from Constantine to Philip the Fair; emergence of medieval institutions; the influence of Plato and Aristotle upon Augustine, Abelard and Thomas Aquinas, and the origins of European education and law.

HIST 332 Renaissance and Reformation Europe, 1300 to 1600
Credits 3.3 Lecture Hours.
Renaissance politics and diplomacy; political ideas of Erasmus and Machiavelli; art and humanism of the Renaissance; religious views of Luther, Calvin and Zwingli; the "new" economics.

HIST 333 Europe in the Age of Absolutism, 1660-1815
Credits 3.3 Lecture Hours.
Europe from the "Age of Louis XIV" to the Congress of Vienna; Russia, Austria and Prussia. Mercantilism, capitalism and the rise of the middle class. Origins and consequences of the Enlightenment.

HIST 334 History of Europe in the Nineteenth Century
Credits 3.3 Lecture Hours.
Cultural, economic, and political processes that shaped European civilization (east and west); the Napoleon era; industrialization and urbanization; liberalism and socialism; empire and revolution; cultural developments.
Prerequisite: Junior or senior classification.

HIST 335 Europe, 1890-1932
Credits 3.3 Lecture Hours.
A political, diplomatic, social and cultural history of Europe prior to, during and shortly after World War I.

HIST 336 Europe Since 1932
Credits 3.3 Lecture Hours.
A political, diplomatic, military, social and cultural history of Europe prior to, and during and since World War II.

HIST 337 War and European Society in the Twentieth Century
Credits 3.3 Lecture Hours.
War and social change in Europe during the twentieth century; relationships between front lines and home fronts; government and civil society; gender and war; ethnic and national identities in Eastern, Central, and Western Europe.
Prerequisite: Junior or senior classification.

HIST 338 The Rise of the European Middle Class
Credits 3.3 Lecture Hours.
Survey of European society and social classes from the origins of capitalism in the Middle Ages to the triumph of the "middle class world" in the 19th century; rise of the middle class, development of bourgeois ideology and culture, and creation of the working class.

HIST 339 Eastern Europe Since 1453
Credits 3.3 Lecture Hours.
Eastern Europe from the fall of the Byzantine Empire to the present; the Ottoman, Habsburg, Russian and Soviet Empires; the origins of modern East European states.

HIST 341 Latin America to 1810
Credits 3.3 Lecture Hours.
Political history of South America from exploration and settlement to independence; colonial institutions; commercial systems.
Prerequisite: Junior or senior classification.

HIST 342 Latin America Since 1810
Credits 3.3 Lecture Hours.
Political history of independent South American nations since independence with emphasis upon ABC countries; economic, social and cultural development; foreign relations.
Prerequisite: Junior or senior classification.

HIST 343 Inter-American Relations
Credits 3.3 Lecture Hours.
Cultural, diplomatic and economic relations in the Western Hemisphere in historical perspective.
Prerequisite: Junior or senior classification or approval of instructor.

HIST 344/AFS 344 History of Africa to 1800
Credits 3.3 Lecture Hours.
Origins of humankind in Africa; development and spread of pastoralism, agriculture and iron-working; formation of states and empires; impact of Christianity and Islam; rise of international trade in gold, ivory and slaves; African diaspora.
Prerequisite: Junior or senior classification.
Cross Listing: AFST 344/HIST 344.
HIST 345/AFST 345 Modern Africa
Credits 3.3 Lecture Hours.
Survey of Africa since 1800; pre-colonial African states and societies; establishment and impact of European colonial rule; rise of nationalist movements; achievement of independence; problems of political stability and economic development in contemporary Africa; South Africa's apartheid regime and its opponents.
Prerequisite: Junior or senior classification.
Cross Listing: AFST 345/HIST 345.

HIST 346/AFST 346 History of South Africa
Credits 3.3 Lecture Hours.
Selected themes in the history of South Africa from the African Iron Age to the Apartheid regime; history of race relations in the 19th and 20th centuries and the rise of a modern industrial state.
Cross Listing: AFST 346/HIST 346.

HIST 347/RELS 347 Rise of Islam, 600-1258
Credits 3.3 Lecture Hours.
Introduction to Islamic civilization from the rise of Islam to the Mongol conquests; examination of pre-Islamic poetry, the Qur'an, early Islamic laws on prayer, the ethical conventions of jihad, the lives of Muslim women, and the relation of Islam to Judaism and Christianity.
Prerequisite: Junior or senior classification.
Cross Listing: RELS 347/HIST 347.

HIST 348 Modern Middle East
Credits 3.3 Lecture Hours.
Survey of the Middle East since 1800; introduction to Islam and Islamic civilization; decline of the Ottoman Empire; European imperialism; rise of nationalist movements; Zionism and the emergence of Israel; Arab-Israeli conflict; impact of oil; revolution in Iran and Islamic resurgence.
Prerequisite: Junior or senior classification.
Cross Listing: AFST 345/HIST 345.

HIST 349/ASIA 349 The Vietnam War/The American War
Credits 3.3 Lecture Hours.
Vietnam's relations with the West; French colonialism; origins and development of Vietnamese nationalism; Cold War and American involvement; wartime societies in North and South Vietnam; expansion of the war to Cambodia and Laos; anti-war movements in the United States; reasons for American defeat; consequences and lessons of the war.
Prerequisite: Junior or senior classification.
Cross Listing: ASIA 349/HIST 349.

HIST 350/ASIA 350 World War II in Asia and the Pacific
Credits 3.3 Lecture Hours.
Origins and development of Japanese imperialism; Japan's expansion into East and Southeast Asia and the Pacific; wartime societies; collaboration and resistance; effects of the war in the United States on Japanese-Americans; outcomes of the war; remembrance of the war.
Prerequisite: Junior or senior classification.
Cross Listing: ASIA 350/HIST 350.

HIST 351/ASIA 351 Traditional East Asia
Credits 3.3 Lecture Hours.
History and culture of China and Japan from earliest times to the coming of the West; impact of Confucianism and Buddhism; development of social, political and economic systems.
Cross Listing: ASIA 351/HIST 351.

HIST 352/ASIA 352 Modern East Asia
Credits 3.3 Lecture Hours.
Impact of the West on traditional China and Japan; the response through modernization; rise of nationalism and formation of modern nation states.
Prerequisite: Junior or senior classification.
Cross Listing: ASIA 352/HIST 352.

HIST 353 Modern South Asia
Credits 3.3 Lecture Hours.
Evolution of cultures, politics and societies in Indian sub-continent from c.1500 to present; rise and demise of empires (especially Mughal and British); anti-colonialism and emergence of nation states; social and cultural struggles and debates.
Prerequisite: Junior or senior classification.
Cross Listing: ASIA 354/HIST 354.

HIST 354/ASIA 354 Imperial China
Credits 3.3 Lecture Hours.
History of imperial China from the earliest dynasties through the mid-19th century, including major political events, the structure of Chinese government, economic development, philosophies and religion, wars and military and culture and daily life.
Prerequisite: Junior or senior classification.
Cross Listing: ASIA 354/HIST 354.

HIST 355/ASIA 355 Modern China
Credits 3.3 Lecture Hours.
History of China from the coming of the West to the present; social, economic and political changes which have taken place during that period.
Cross Listing: ASIA 355/HIST 355.

HIST 356/ASIA 356 Twentieth Century Japan
Credits 3.3 Lecture Hours.
Industrialization and modernization of Japan; its rise from an isolated nation to a major world power and economic giant.
Cross Listing: ASIA 356/HIST 356.

HIST 357/AFST 357 Out of Africa: The Black Diaspora and the Modern World
Credits 3.3 Lecture Hours.
History and cultures of the peoples of the African Diaspora from the fourteenth through the nineteenth centuries; social, political, and economic impact on Africa, the Americas, Europe, and the Arab World; emphasis on race, gender, identity, and migration.
Prerequisite: Junior or senior classification.
Cross Listing: AFST 357/HIST 357.

HIST 358/ASIA 358 Chinese Cultural History
Credits 3.3 Lecture Hours. 0 Lab Hours.
Examination of Chinese culture and its evolution over the last 4,000 years; customs, art, literature, festivals, folklore, religion, architecture, medicine, and everyday life.
Prerequisite: Junior or senior classification.
Cross Listing: ASIA 358/HIST 358.

HIST 359 American Environmental History
Credits 3.3 Lecture Hours.
History of American attitudes toward nature: use of land, water, timber, oil, coal, wildlife and other natural resources in the United States; conservation movement and significant conflicts over resources; changing perception of the physical environment.

HIST 360 History of Energy in America
Credits 3.3 Lecture Hours.
Impact of energy upon industrial America; emphasis on relationship between energy and industrial development, emergence of state and federal energy policies, role of energy in foreign policy, growth of energy-oriented industries and impact of energy development on the environment.
HIST 361 Technology and Engineering in Western Civilization, 1400-Present
Credits 3.3 Lecture Hours.
Man's material culture and his understanding of the physical world since the 15th century; role of the Renaissance and the Scientific, Agricultural and Industrial Revolutions in Europe; the resulting transformations in western civilization.

HIST 362 History of Science
Credits 3.3 Lecture Hours.
The ideas of the great scientists and their impact on society; the Newtonian Revolution; Lavoisier and the new chemistry; Darwin and evolutionary thought; Enrico Fermi, Robert Oppenheimer and the development of nuclear energy.

HIST 363 History of Science in America
Credits 3.3 Lecture Hours.
The major developments in the physical and life sciences from colonial times to the present; the lives and scientific contributions of such famous American scientists as Benjamin Franklin, Joseph Henry, Thomas Edison and J. Robert Oppenheimer.

HIST 364 History of Technology and Engineering in America, 1607-Present
Credits 3.3 Lecture Hours.
American technological development from the colonial times to the present; technology in society, factors affecting technological development, changing attitudes toward technological accomplishments and the effects of technology upon society.

Cross Listing: RELS 365/HIST 365.

HIST 365/RELS 365 History of Religion in America to 1860
Credits 3.3 Lecture Hours.
Religion in North America from colonial beginnings to eve of Civil War; relations between European Christianity, Native Americans and African Americans; religious pluralism, reform movements, social and political change.

Cross Listing: RELS 365/HIST 365.

HIST 366/RELS 366 History of Religion in America from 1860 to the Present
Credits 3.3 Lecture Hours.
Religion in America from the Civil War; relationship of religion and science, ethnic assimilation, emergence of fundamentalism, mass evangelism, cults and criticisms of contemporary culture; examination of social and racial problems by the major religious traditions.

Cross Listing: RELS 366/HIST 366.

HIST 367 Colonization of North America
Credits 3.3 Lecture Hours.
Geographic setting; early English, French, Dutch, Swedish discovery, conquest and settlement, 1497-1763; colonial administration; colonial life; inter-colonial wars.

HIST 368 The Birth of the Republic, 1763-1820
Credits 3.3 Lecture Hours.
Impact of French and Indian War; British colonial policy 1763-1775; War for Independence; Confederation crisis; Constitution-making and ratification; development of political parties; problem of foreign entanglements; War of 1812; conflict of nationalist and sectionalist tendencies; historiography and interpretation.

HIST 369 The United States, 1820-1860
Credits 3.3 Lecture Hours.
Jacksonian democracy; impact of nationalism and sectionalism; manifest destiny and Mexican War; slavery controversy; expansion.

HIST 370 Civil War and Reconstruction
Credits 3.3 Lecture Hours.
Survey of background and causes of the war; military, political, economic, and diplomatic aspects of the war; life behind the lines; Reconstruction and post-war adjustments, 1861-1877.

HIST 371 America in the Gilded Age, 1877-1901
Credits 3.3 Lecture Hours.
The United States from 1877 to 1901; political, cultural and economic developments.

HIST 372 Reform, War and Normalcy: The United States, 1901-1929
Credits 3.3 Lecture Hours.
Emergence of Progressivism; reform in the cities and states; reforms and foreign policies of the Theodore Roosevelt, William Howard Taft and Woodrow Wilson administrations; World War I and aftermath; Harding-Coolidge normalcy; the Jazz Age; Hoover and the Great Crash.

HIST 373 The Great Depression and World War II
Credits 3.3 Lecture Hours.
The United States, 1929-1945; cultural, social, economic, and political developments in the nation; global diplomacy and military strategy.

HIST 374 The United States After World War II
Credits 3.3 Lecture Hours.
The United States since World War II; political, economic, cultural and social changes and role as a world leader.

HIST 375 Great Scientists in History
Credits 3.3 Lecture Hours.
History of fundamental scientific principles through biography; Galileo, Newton, Darwin, Mendel, Curie, Einstein, Pauling, and others.

Prerequisite: Junior or senior classification.

Cross Listing: RELS 401 and ASIA 401.

HIST 401 Slavery in World History
Credits 3.3 Lecture Hours.
Comparative history of human slavery; slavery in the Ancient World, Asia, Africa; varieties of modern slavery in the New World since 1500; abolition of slavery and continuing forms of human bondage in the contemporary world.

Prerequisite: Junior or senior classification.
Cross Listing: ASFST 401 and ASIA 401.

HIST 402 Germany Since 1815
Credits 3.3 Lecture Hours.
A survey of the unification of Germany; creation of the German Empire; Weimar Republic; rise and fall of Nazi Germany; and the role of Germany in international diplomacy.

HIST 403 History of Nazi Germany
Credits 3.3 Lecture Hours.
Inner workings of the Third Reich from inception in 1933 to collapse at the end of World II in 1945; leadership and structure of the Nazi party; family life, religion and business.

HIST 404 Post 1945 Germanies
Credits 3.3 Lecture Hours.
Examines Germany from the end of World War II to the end of the 20th century; includes political, social, cultural, and economic life in divided and occupied Germany; covers Germany since reunification in 1990.

Prerequisite: Junior or senior classification.

HIST 405 History of the Holocaust
Credits 3.3 Lecture Hours.
History of the Nazi Holocaust; Third Reich; Jewish Ghetto life and concentration camps; role of the military, S.S. and German business; lessons and legacies.
HIST 406 The Era of the French Revolution and Napoleon, 1715-1815
Credits 3. 3 Lecture Hours.
Origins and events of the French Revolution; Napoleon Bonaparte and the First Empire; social, economic, political and military developments in France and Europe.

HIST 407 History of France Since 1815
Credits 3. 3 Lecture Hours.
Nineteenth century Bourbon, Orleanist, Bonapartist and Republican regimes: France in World Wars I and II; De Gaulle and the role of France in the 20th century.

HIST 410 Russian History to 1801
Credits 3. 3 Lecture Hours.
Origins and Christianization of Russia; establishment and decline of Kievan Rus’ state; Mongol conquest and domination of Russia; rise of Moscow, establishment of tsardom, expansion of state in sixteenth and seventeenth centuries; Peter the Great’s reforms; emergence of Russian Empire as a major power; era of Catherine the Great.

HIST 411 Imperial Russia 1801-1917
Credits 3. 3 Lecture Hours.
The last century of the autocratic Romanov dynasty and the social, intellectual, economic and political forces that ended it; political culture, society in transition, international affairs and revolutionary groups in an era of reform, counter-reform, reaction and industrialization.

HIST 412 Soviet Union 1917-1991
Credits 3. 3 Lecture Hours.
Political and social evaluation of the Soviet system; the Russian Revolution and consolidation of Bolshevik power; Civil War; power struggles among Lenin’s successors; Stalin’s industrial revolution, collectivization, and terror; Khrushchev’s de-Stalinization campaign, stagnation under Brezhnev; Gorbachev’s attempts at radical reform; the collapse of the Soviet Union.

HIST 416 Texas as Border Region
Credits 3. 3 Lecture Hours.
History of Texas since annexation; slavery and its aftermath; border cultures and identities; race and ethnicity; modernization and its discontents.
Prerequisite: Junior or senior classification or approval of instructor.

HIST 418 European Intellectual History from Ancient Greece to the Early Middle Ages
Credits 3. 3 Lecture Hours.
Political and social history of selected major figures and important movements in political theory, literature, sociology, art, economics and philosophy from Pre-Socratic Greece through the formative stages of the Christian Middle Ages.
Prerequisite: Junior or senior classification.
Cross Listing: CLAS 426/HIST 426.

HIST 419/RELS 419 European Intellectual History from the High Middle Ages to the 17th Century
Credits 3. 3 Lecture Hours.
Political and social history of selected major figures and important movements in political theory, literature, sociology, art, economics and philosophy from the founding of Scholasticism and the University System to the New Philosophy and science of 17th century.
Prerequisite: Junior or senior classification.
Cross Listing: RELS 419/HIST 419.

HIST 420 European Intellectual History from the Enlightenment to 1900
Credits 3. 3 Lecture Hours.
Political and social history of selected major figures and important movements in political theory, literature, sociology, art, economics and philosophy in the 18th and 19th centuries.

HIST 421 European Intellectual History in the Twentieth Century
Credits 3. 3 Lecture Hours.
Political and social history of selected major figures and important movements in political theory, literature, sociology, art, economics and philosophy from the turn of the century to the present.

HIST 426/CLAS 426 The Ancient Greeks
Credits 3. 3 Lecture Hours.
Greek History and civilization from the Archaic Age to Alexander the Great (8th-late 4th century B.C.).
Prerequisite: Junior or senior classification, or approval of instructor.
Cross Listing: CLAS 426/HIST 426.

HIST 427/CLAS 427 The Roman Republic I: The Empire Builders
Credits 3. 3 Lecture Hours.
Roman history and civilization from the beginnings of the Republic (6th/5th century B.C.) to the late 2nd century B.C.
Prerequisite: Junior or senior classification, or approval of instructor.
Cross Listing: CLAS 427/HIST 427.

HIST 428/CLAS 428 The Roman Republic II: The Civil Wars
Credits 3. 3 Lecture Hours.
Roman history and civilization from the late 2nd century B.C. to the 1st century A.D.
Prerequisite: Junior or senior classification, or approval of instructor.
Cross Listing: CLAS 428/HIST 428.

HIST 429/CLAS 429 The Roman Empire
Credits 3. 3 Lecture Hours.
Roman History and civilization of the Imperial Period (1st century B.C.-6th century A.D.).
Prerequisite: Junior or senior classification, or approval of instructor.
Cross Listing: CLAS 429/HIST 429.

HIST 431 The Kingdom of Ireland, 1541-1800
Credits 3. 3 Lecture Hours.
History of Ireland from the mid sixteenth century through the end of the eighteenth century; impact of religion, politics, warfare, land disputes, famine, and international developments; creation of the United Kingdom.
Prerequisite: Junior or senior classification.

HIST 432 The Nation of Ireland, 1800 to the Present
Credits 3. 3 Lecture Hours.
History of Ireland from the creation of the United Kingdom through the end of the twentieth century; British-Irish relations; agrarian unrest and violence; famine; political, cultural, and religious developments.
Prerequisite: Junior or senior classification.

HIST 435 Sixteenth-Century Britain
Credits 3. 3 Lecture Hours.
Changes in social, cultural, economic, political and religious institutions and organization; growth of the nation state; the "new monarchy"; Reformation and religious settlement; international relations; inflation and social dislocation; the role of Parliament.
HIST 436 Seventeenth-Century Britain
Credits 3.3 Lecture Hours.
Social, political, economic, cultural and religious developments, Puritanism and the Revolution of the 1640s, the Restoration, establishment of constitutional monarchy after 1688, Great Britain's rise as an imperial power.

HIST 437 Eighteenth Century Britain
Credits 3.3 Lecture Hours.
Political, social, economical, intellectual, cultural, and imperial history of Britain in the eighteenth century.
Prerequisite: Junior or senior classification.

HIST 438 Nineteenth Century Britain
Credits 3.3 Lecture Hours.
Political, social, economic, cultural, intellectual and military history of Great Britain from 1815 to 1914.
Prerequisite: Junior or senior classification or approval of instructor.

HIST 439 Twentieth Century Britain
Credits 3.3 Lecture Hours.
Constitutional, political, economic, military, social and cultural history of Great Britain since 1900.
Prerequisite: Junior or senior classification or approval of instructor.

HIST 440 Latin American Cultural and Intellectual History
Credits 3.3 Lecture Hours.
Main currents of culture and thought as shaped by historical circumstances.

HIST 441 History of Mexico, 1821 to the Present
Credits 3.3 Lecture Hours.
Political, economic and social development of Mexico since independence and her relation to other world powers.

HIST 442 World War II
Credits 3.3 Lecture Hours.
Origins; military campaigns in Europe, North Africa, Asia, and the Pacific; European, Japanese, Asian, and American home fronts; collapse of Germany; atomic warfare; legacies.
Prerequisite: Junior or senior classification.

HIST 443 American Military History to 1901
Credits 3.3 Lecture Hours.
American military experience from colonial days to 1901; causes, nature and effect of the wars in which the United States has participated.

HIST 444 American Military History Since 1901
Credits 3.3 Lecture Hours.
American military experience from 1901 to present; causes, nature and effect of wars in which the United States has participated; effect of war on American history.

HIST 445 History of Modern Military Thought
Credits 3.3 Lecture Hours.
Military thought and theory, 1700 to the present.

HIST 447 Law and Society in the United States
Credits 3.3 Lecture Hours.
How political and social conditions in American history have produced fundamental constitutional principles, changes and practices; historical evolution of written and unwritten Constitution.

HIST 449 History of Brazil, 1822 to the Present
Credits 3.3 Lecture Hours.
Political, cultural and economic development of Brazil since independence; slavery and race relations; relation to other world powers.
Prerequisite: Junior classification.

HIST 450 Southern Identities and Cultures through Reconstruction
Credits 3.3 Lecture Hours.
Focus on parts of North America where slavery dominated the economy, politics and demographics; experiences of native, African and European-descended peoples in such regions from the colonial period to the end of slavery; debates about geographical and cultural roots of regional identities.
Prerequisite: Junior or senior classification or approval of instructor.

HIST 451 Southern Identities and Cultures Since Reconstruction
Credits 3.3 Lecture Hours.
Focus on the aftermath of slavery and defeat in those parts of North America where slavery dominated the economy, politics and demographics; transformations in race, culture and politics in such regions and emergence of new identities since Reconstruction; debates over the geographic and cultural roots of the American South.
Prerequisite: Junior or senior classification or approval of instructor.

HIST 453 The American Frontier
Credits 3.3 Lecture Hours.
Westward movement; patterns of westward expansion, pioneer settlement, the West in diplomacy and influence of frontier on American life and institutions.

HIST 455 History of the American City
Credits 3.3 Lecture Hours.
History of American Cities; a social, economic and political study of industry, labor and immigration; development of a metropolitan society.

HIST 456 American Agricultural History
Credits 3.3 Lecture Hours.
History of American agricultural development from the Revolutionary period to the present; technological developments, major farm industries, labor, regional development, farm movements and farm programs.

HIST 459 American Society and Culture to 1877
Credits 3.3 Lecture Hours.
Century of social and political thought, religion, science, scholarship and education in the United States.

HIST 460 American Society and Culture Since 1877
Credits 3.3 Lecture Hours.
Continuation of HIST 459 from 1877 to the present.

HIST 461/WGST 461 History of American Women
Credits 3.3 Lecture Hours.
Cultural, political, legal and religious factors that helped shape the role and character of women in American society from colonial times to the present; historical role of women in the development of the nation.
Cross Listing: WGST 461/HIST 461.

HIST 462 American Foreign Relations to 1913
Credits 3.3 Lecture Hours.
History of U.S. foreign relations and policies to 1913.
Prerequisite: Junior or senior classification or approval of instructor.

HIST 463 American Foreign Relations Since 1913
Credits 3.3 Lecture Hours.
History of U.S. foreign relations and policies since 1913.
Prerequisite: Junior or senior classification or approval of instructor.

HIST 464 International Developments Since 1918
Credits 3.3 Lecture Hours.
General survey of world politics since close of World War I; problems and ideologies of great powers of Europe and factors and conditions which explain present political tendencies and policies.
HIST 469 History of Collective Protest and Violence
Credits 3. 3 Lecture Hours.
Examination of collective protest and violence on a case study basis and in comparative and historical context; emphasis on causes, the nature of participation, assumptions and goals, and the character of repression.
Prerequisite: Junior or senior classification.

HIST 470 American Business History
Credits 3. 3 Lecture Hours.
Management strategy and structure of the modern corporation in 19th and 20th century America and the corporation's changing roles in American society.

HIST 473/WGST 473 History of Modern American Women
Credits 3. 3 Lecture Hours.
Emergence of modern American women in the 1890s; examination of their history from the 1890s to the present; women as organizers, innovators, political reformers, workers, social activists, housewives, mothers, consumers and feminists.
Cross Listing: WGST 473/HIST 473.

HIST 475 Empire and History
Credits 3. 3 Lecture Hours.
Survey of empire in a wide historical and comparative framework using a case study approach; themes of a given case study include changing social, economic, and cultural politics of imperialism, resistance in colonial environments, colonial and post-colonial identities, and race and gender relations. May be taken 3 times for credit.
Prerequisite: Junior or senior classification.

HIST 476/WGST 476 Sex and Sexuality in History
Credits 3. 3 Lecture Hours.
Changing ideas about sex and sexuality over time; includes their interaction with ideas about gender, race, class, religion, science, technology, medicine, politics and popular culture; historical and cultural processes creating modern concerns about sex and sexuality.
Prerequisite: Junior or senior classification.
Cross Listing: WGST 476/HIST 476.

HIST 477/WGST 477 Women and Gender in Modern European History
Credits 3. 3 Lecture Hours.
Women in Europe from the 18th century to the present: women's contributions to their societies; realities of their daily lives and their responses; perceptions of women; role of institutions in defining women's roles; significance for women of industrialization, revolution, warfare, scientific discoveries; interaction of class, race and gender.
Cross Listing: WGST 477/HIST 477.

HIST 481 Seminar in History
Credits 3. 3 Lecture Hours.
Literature of an issue, event, period or people in history; use of primary source materials connected with the field of the seminar; problems of bibliography, historiography and historical method; and experience in writing.
Prerequisite: 21 credits of history, 9 of which must be 300-level or above. Open to senior history majors or with instructor's approval.

HIST 485 Directed Studies
Credits 0 to 3. 0 to 3 Other Hours.
Selected fields of history not covered in depth by other courses. Reports and extensive reading required.
Prerequisite: Approval of department head.

HIST 489 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Selected topics in an identified area of history.

HIST 491 Research
Credits 0 to 3. 0 to 3 Other Hours.
Research conducted under the direction of faculty member in history.
Prerequisites: 24 hours in history, with 12 or more at 300-level or above; junior or senior classification and approval of instructor.

HIST 497 Independent Honors Studies
Credits 1 to 3. 1 to 3 Other Hours.
Directed independent studies for upper division Honors students, regardless of academic major, in selected aspects of history.
Prerequisites: Junior or senior classification either as Honors student or with overall GPR of 3.25 and letter of approval from head of student's major department and approval of head, Department of History.

HLTH - Health (HLTH)

HLTH 210 Introduction to the Discipline
Credits 3. 3 Lecture Hours.
Concepts essential to understanding the discipline: competencies and career opportunities for professional health educators in school and community settings.

HLTH 214/KINE 214 Health and Physical Activity for Children
Credits 3. 3 Lecture Hours.
Coordinated school health and physical activity programs appropriate for elementary aged children; focus on the content of the curriculum and the philosophical underpinnings of programming related to health and physical activity.
Prerequisite: KINE 198.

HLTH 216 First Aid
Credits 2. 1 Lecture Hour. 2 Lab Hours.
(PHED 1206, 1306) First Aid. Basic first aid instruction leading to National Safety Council, University Level, first aid course completion recognition.

HLTH 221 Safety
Credits 3. 3 Lecture Hours.
The magnitude of the accident problem as it relates to individual and community well-being; promotion of safe behavior. No credit will be given for both HLTH 221 and SAED 301.

HLTH 222 Concepts in Peer Health Education
Credits 3. 3 Lecture Hours.
Preparation as peer educators and campus community leaders; experiential learning; includes various health topics, program development, presentation and public speaking, communication and group facilitation.

HLTH 231 Healthy Lifestyles
Credits 3. 3 Lecture Hours.
(PHED 1304) Healthy Lifestyles. Health issues relevant to students; included are mental health, use and abuse of drugs, human sexuality, communicable diseases, environmental and consumer health.

HLTH 236 Race, Ethnicity and Health
Credits 3. 3 Lecture Hours.
Explore in-depth the racial, ethnic, and cultural dimensions that underlie health and health disparities; emphasis on culture, social economic status and governmental policies as they influence the adaptation of health practices.
HLTH 240/KINE 240 Computer Technology in Health and Kinesiology
Credits 3.2 Lecture Hours. 2 Lab Hours.
Application of current technology in the areas of health and kinesiology; fundamentals of computers and their use; application of commercial software to health and kinesiology settings; use of computer networks for communications and research.
Prerequisite: Freshman or sophomore classification in health or kinesiology.
Cross Listing: KINE 240/HLTH 240.

HLTH 285 Directed Studies
Credits 0 to 4.0 to 4 Other Hours.
Work on a specified topic with the intent of promoting independent reading, research and study; supplement existing course offerings or subjects not presently covered.
Prerequisites: Freshman or sophomore classification; approval of instructor.

HLTH 291 Research
Credits 0 to 4.0 to 4 Other Hours.
Research conducted under the direction of faculty member in health. May be repeated 4 times for credit.
Prerequisites: Freshman or sophomore classification and approval of instructor.

HLTH 331 Community Health
Credits 3.3 Lecture Hours.
Aspects of the community that relate to health; identification and analysis of community health programs; organizational pattern and functions of voluntary and governmental health agencies; organizing the community for health action; and coordination of school and community health programs.
Prerequisite: HLTH 231 or concurrent enrollment.

HLTH 332 School Health Program
Credits 3.3 Lecture Hours.
Background, development, administration and framework of the school health program; role of the school health team; nature and function of school health services and healthful school living.
Prerequisite: HLTH 231 or concurrent enrollment.

HLTH 333 Spirituality and Health
Credits 3.3 Lecture Hours.
Exploration of the relationship between spirituality, religion, health, health education and spiritual health; identification of techniques to measure spiritual health/wellness and enlighten healthcare professionals to the role spiritual health plays in healing; identification of spirituality topics important to health care professionals.
Prerequisite: HLTH 231, HLTH 331 or approval of instructor.

HLTH 334/WGST 334 Women's Health
Credits 3.3 Lecture Hours.
A broad range of health issues that are either unique to women or of special importance to women; information for the health consumer; preparation as an advocate of healthy lifestyles; awareness of the role health plays in the life of all women.
Prerequisite: Junior or senior classification.
Cross Listing: WGST 334/HLTH 334.

HLTH 335 Human Diseases
Credits 3.3 Lecture Hours.
Causes of disease, course of communicable disease, body's defense against disease and classification and description of diseases.
Prerequisite: BIOL 319, BIOL 320; admission to professional phase of program.

HLTH 342 Human Sexuality
Credits 3.3 Lecture Hours.
Many aspects of human sexuality; physiology and function of human reproductive system, factors involved in learning sex roles, biological and emotional motivations associated with the sexual aspects of life and their relationship to marriage and family planning.
Prerequisite: Admission to the professional phase of program.

HLTH 353 Drugs and Society
Credits 3.3 Lecture Hours.
Use and abuse of drugs in today's society; physiological, sociological and psychological factors involved.
Prerequisite: BIOL 319, BIOL 320; admission to professional phase of program.

HLTH 354 Medical Terminology for the Health Professions
Credits 3.3 Lecture Hours.
Designed for students interested in pursuing a career in a health, medical, scientific or other helping profession; develop medical word power skills combined with related health and disease knowledge.
Prerequisite: Junior or senior classification.

HLTH 403 Consumer Health
Credits 3.3 Lecture Hours.
#Selection, evaluation and understanding of health information, medical services, advertising of products and sociocultural factors in consumer health protection.
Prerequisite: Junior or senior classification.

HLTH 405 Rural Health
Credits 3.3 Lecture Hours.
Issues facing rural health care; emphasis on understanding the geographical characteristics of rural communities and their affect on health care delivery.
Prerequisites: HLTH 331; junior or senior classification.

HLTH 407 Global Health
Credits 3.3 Lecture Hours.
Overview of global health issues; synthesis of historical, cultural, environmental, economic and political perspectives; gathering and understanding international health statistics; cultural, social and political impacts on health and health care behaviors; clinical and population-based approaches to health management and illness resolution; ethical issues implicit in conducting health research; private and public agency relief strategies; opportunities for employment in international health.
Prerequisites: Admission to the professional phase of program; junior or senior classification or approval of instructor.

HLTH 410 Exercise and Health Programs in the Workplace
Credits 3.3 Lecture Hours.
Careful examination of strategies to design, implement and evaluate exercise and health programs in worksites; including health risk assessment, marketing protocol, needs assessment, corporate culture issues, policy development and cost-benefit analysis.
Prerequisite: Junior or senior classification.

HLTH 415 Health Education Methodology
Credits 3.3 Lecture Hours.
Theory and practice in the development and use of creative and traditional health education strategies in secondary schools and community settings; emphasis is given to cognitive, affective and behavioral teaching strategies.
Prerequisites: Senior classification and approved acceptance to field experience.
HLTH 421 Elementary School Health Instruction
Credits 3. 3 Lecture Hours.
Modern issues, trends, content and material in elementary school health programs; research and instructional strategies essential for reading in content areas with an emphasis on developing the coordinated school health education for health and kinesiology teacher certification majors.
Prerequisite: Junior or senior classification in health or kinesiology; admission to professional phase of program.

HLTH 425 Health Program Evaluation
Credits 3. 3 Lecture Hours.
Theory and practice in evaluation of health programs in school and community; analysis of test results; evaluation of standardized health tests.
Prerequisites: Senior classification and approved acceptance to field experience.

HLTH 429 Environmental Health
Credits 3. 3 Lecture Hours.
Health aspects of environments; health problems related to water, air and noise pollution; pesticides; population and radiation; examination of various micro-environments which either promote or hinder human health and well-being and their implications for community planning and utilization of human resources.
Prerequisite: Junior or senior classification.

HLTH 440 Contemporary Issues for Community Health Interns
Credits 3. 3 Lecture Hours.
Preparatory course for advanced students in the community health internship program.
Prerequisite: Acceptance to internship program.

HLTH 445 Professional Practice in Health Education
Credits 2. 2 Lecture Hours.
Information, perspectives and skills to promote health and quality of life effectively in community, school, workplace and health-care settings; boundary-crossing partnerships across health disciplines; the role of collaborative efforts to better meet community health needs.
Prerequisites: Admission to professional phase of program; junior or senior classification.

HLTH 481 Seminar in Allied Health
Credit 1. 1 Lecture Hour. 1 Lab Hour.
Admission to allied health professional school and/or careers; research on selected allied health fields, discussion of transition from college environment to professional school/career environment including professional development. Must be taken on a satisfactory/unsatisfactory basis.
Prerequisites: Junior or senior classification.

HLTH 482 Grant Writing in Health
Credit 1. 1 Lecture Hour.
A writing intensive course focused on grant writing in the field of health education and health promotion; grant application written by student on a health-related topic using a recursive writing process. May be taken two times for credit. Must be taken on a satisfactory/unsatisfactory basis.
Prerequisite: Admission to professional phase of program.

HLTH 484 Community Health Internship
Credits 0 to 12. 0 to 12 Other Hours.
Supervised internship at selected community, public or private health agencies.
Prerequisites: HLTH 415, HLTH 425 and HLTH 440; completion of all coursework.

HLTH 485 Directed Studies
Credits 0 to 4. 0 to 4 Other Hours.
Directed study of special problems within the discipline.
Prerequisites: Junior or senior classification; approval of instructor.

HLTH 489 Special Topics in...
Credits 0 to 4. 0 to 4 Lecture Hours.
Selected topics in an identified area of the discipline. May be repeated for credit.

HLTH 491 Research
Credits 0 to 4. 0 to 4 Other Hours.
Research conducted under the direction of faculty member in health. May be repeated 4 times for credit.
Prerequisites: Junior or senior classification and approval of instructor.

HORT - Horticultural Sciences (HORT)

HORT 101 Concepts of Horticultural Science
Credit 1. 1 Lecture Hour.
Introduction to the many facets of horticulture in Texas and the United States including organization, history and nature of the industry; discussion of professional development and identification of career opportunities.

HORT 201 Horticultural Science and Practices
Credits 3. 3 Lecture Hours.
(AGRI 1315, 1415, HORT 1301, 1401) Horticultural Science and Practices. Structure, growth and development of horticultural plants from a practical and scientific approach; environmental effects, basic principles of propagation, greenhouse and outdoor production, nutrition, pruning and chemical control of growth, pest control and branches of horticulture.

HORT 202 Horticultural Science and Practices Laboratory
Credit 1. 3 Lab Hours.
Methods and practices related to production of horticultural crops; practical exercises in greenhouse and field.
Prerequisite: HORT 201 or registration therein.

HORT 203 Floral Design
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Principles of design illustrated with the use of floral materials; floral design elements and techniques including color, form, line and texture; history and utilization of floral art in society.

HORT 225 Horticulture Learning Community
Credit 1. 1 Lecture Hour.
Understanding the personal and professional competencies that should develop during college career; determine learning style; develop oral and written communication skills, teamwork and leadership characteristics, analytical and critical thinking, research and problem solving skills; exposure to current critical issues in horticulture and science.
Prerequisite: Horticulture or floriculture major.*

HORT 281 Horticulture as a Profession.
Credit 1. 1 Lecture Hour.
Comprehensive view of the opportunities in the art and science of horticulture; sub-disciplines by crop (fruit, vegetable, ornamental, floral) and approach (landscaping, production, sales, management, floral design, research); examination of the national and international scope of horticulture including the major horticultural regions in Texas; construction of a professional e-portfolio.
HORT 291 Research
Credits 1 to 3. 1 to 3 Other Hours.
Research conducted under the direction of faculty member in horticulture. May be repeated 2 times for credit.
Prerequisites: Freshman or sophomore classification and approval of instructor.

HORT 301 Garden Science
Credits 3. 3 Lecture Hours.
Identification, propagation, soil management, fertilization, growth control and protection of common garden plants; indoor ornamentals, landscape ornaments, fruits and vegetables; special topics include home landscaping, container gardens, bonsai, herbs and medicinal plants and hobby greenhouse management. The effects of organic and non-organic practices on the garden ecosystem.

HORT 302 Garden Science Lab
Credit 1. 3 Lab Hours.
Practical activities in identification, propagation, fertilization, media preparation, soil management, irrigation and protection of indoor ornamentals, landscape ornaments, fruits and vegetables common in gardens in Texas. Organic and non-organic methods.

HORT 306 Trees and Shrubs for Sustainable Built Environments
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Better known woody ornamental trees and shrubs; identification, morphology, classification, nomenclature and adaptability for use in landscape environments.
Prerequisite: BIOL 111 or BIOL 113 or HORT 201 or approval of instructor.

HORT 308 Plants for Sustainable Landscapes
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Identification and use of indigenous and introduced landscape plants; plants for special uses in urban environments; emphasis on plants' ornamental attributes, cultural requirements, and adaptability in urban and suburban environments.
Prerequisite: BIOL 111 or BIOL 113 or HORT 201 or HORT 306 or approval of instructor.

HORT 309 Interior Plants
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Identification, selection and maintenance of interior foliage plants; emphasis on design solutions for commercial and private facilities.
Prerequisites: HORT 201; junior or senior classification.

HORT 311/FSTC 311 Principles of Food Processing
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Principles and practices of canning, freezing, dehydration, pickling and specialty food manufacture; fundamental concepts of various techniques of preparation, processing, packaging and use of additives; processing plants visited.
Prerequisites: FSTC 201; junior or senior classification or approval of department head or instructor.
Cross Listing: FSTC 311/HORT 311.

HORT 315 Issues in Horticulture
Credits 3. 3 Lecture Hours.
Analysis of contemporary economic, technological, environmental, human resource, and regulatory issues that impact the way global horticultural firms compete; emphasis on problem recognition and analysis of managerial decisions by firms throughout the entire horticultural supply chain.
Prerequisites: HORT 201 and HORT 202.

HORT 319 Fruit and Nut Production
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Rootstocks, cultivars, identification, site selection, pollination, pruning, fruit thinning, dormancy, orchard culture management, irrigation, pest control, harvesting and post harvest physiology of temperate fruit and nut species.
Prerequisite: HORT 201.

HORT 325 Vegetable Crop Production
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Origin, nutritive value, economic importance, botany and cultural practices of the major vegetable crops. Lab activities include organic and non-organic production of major vegetable crops.

HORT 326 Plant Propagation
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Principles, practices and techniques followed in the sexual and asexual propagation of horticultural plants: seed technology and seed propagation, rooting and propagation of cuttings, grafting and budding systems, layering and propagation by specialized plant structures, biotechnology and tissue culture systems for micropropagation.

HORT 332 Horticulture Landscape Graphics
Credits 2. 1 Lecture Hour. 2 Lab Hours.
Graphic representation of landscape design; demonstrations of technique; examination of drawing examples and drawing production; basic hand graphics techniques for visual-thinking and presentation-quality landscape drawings.
Prerequisite: Junior or senior classification.

HORT 335 Sociohorticulture
Credits 3. 3 Lecture Hours.
Horticulture as it relates to humans through people-plant interactions; use of horticulture to improve quality of life; awareness and appreciation of the economic, environmental, social and health benefits of plants.
Prerequisite: Junior classification.

HORT 400 Field Studies in Horticulture
Credits 1 to 3. 1 to 9 Other Hours.
Field trip to observe operation of horticultural businesses, governmental agencies affecting horticultural programs, and public and private institutions active in horticulture in the U.S. and other countries; usually arranged during spring break, between semesters or during the summer; may be repeated for credit.
Prerequisites: HORT 201 or HORT 301 and approval of instructor.

HORT 404/GENE 404 Plant Breeding
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Application of genetics and other sciences to breeding and improvement of horticultural crops; methods and special techniques employed. Offered in even numbered years.
Prerequisite: GENE 301.
Cross Listing: GENE 404. Credit cannot be given for both HORT 404/GENE 404 and SCSC 304.

HORT 416 Understanding Wine: From Vines to Wines and Beyond
Credits 3. 3 Lecture Hours.
Facets of wine in the United States and around the world; the history of wine, grape growing and winemaking, types of wine, wine etiquette, beer and spirits, sensory evaluation, wine marketing, and winery tasting room and event management.
Prerequisites: Must be 21 years of age; junior senior classification.
HORT 418 Nut Culture
Credits 3.3 Lecture Hours.
Orchard management, native grove development, cultivars, fruit setting, soils, nutrition, propagation, pest control, harvesting, shipping, storage and marketing of temperate tree nut crops grown in the U.S. with major emphasis on pecans. Offered in odd numbered years.
Prerequisite: HORT 319 or approval of instructor.*

HORT 419 Viticulture and Small Fruit Culture
Credits 3.3 Lecture Hours.
Classic wine grape culture in Europe and U.S. are taught; influence of climate, soil, cultivar, rootstock, canopy and management is presented; nutrition, water, spacing, trellis, pruning, IPM and harvest are integrated for quality yields; culture of muscadines, berries, figs and persimmons are taught. Offered in even numbered years.
Prerequisite: HORT 319 or approval of instructor.

HORT 420 Concepts of Wine Production
Credits 3.3 Lecture Hours.
Classic wine grapes of the world and where they are produced; evaluation of wine style and quality through formal laboratory tastings.
Prerequisites: HORT 201, HORT 319, HORT 419 or HORT 446/ FSTC 446 or FSTC 201; must be 21 years of age; junior or senior classification.

HORT 421 Enology
Credits 3.2 Lecture Hours. 3 Lab Hours.
Provides a basic understanding of each step of the wine making process; emphasis on home and small scale commercial wine production as related to Texas conditions.
Prerequisite: Must be 21 years of age; junior or senior classification.*

HORT 423 Tropical Horticulture
Credits 3.3 Lecture Hours.
Production, processing and marketing of coffee, bananas, cacao, mango, cashew, pineapple, coconut and root and tuber crops; recent significant developments in plant breeding and cultural practices. Offered in odd numbered years.
Prerequisites: HORT 201 or approval of instructor.

HORT 425 Landscape Maintenance and Construction
Credits 3.2 Lecture Hours. 3 Lab Hours.
Principles and practices of grading, drainage and construction of residential and small commercial landscapes; cost and bid estimation; soil preparation; transplanting operations; control of landscape diseases and pests; maintenance of landscape areas.
Prerequisite: HORT 201 or approval of instructor.

HORT 426 International Floriculture Marketing
Credits 3.2 Lecture Hours. 2 Lab Hours.
Importance, cost, and opportunities in marketing floral products, fresh cut flowers, flowering potted plants, foliage plants, and bedding/garden plants; topics include: world production areas, economic value, species grown, marketing channels, retail environments, current/future consumers, postharvest handling, promotion/advertising, perceived/added value, marketing trends and employment opportunities.
Prerequisites: HORT 201; junior or senior classification.

HORT 427 Fall Greenhouse Crops
Credit 1.2 Lab Hours.
Hands-on lab for growing and managing fall greenhouse crops including fall bedding plants, cut flowers, foliage, poinsettias and other flowering potted plants.

HORT 428 Greenhouse Operation and Management
Credits 3.2 Lecture Hours. 2 Lab Hours.
Principles of greenhouse operation and management for production of horticultural crops; construction and operation of greenhouse structures and systems; regulating and controlling the environment and applying cultural practices as they affect plant physiological processes and influence plant growth and development; management of a greenhouse business.
Prerequisite: HORT 201.*

HORT 429 Floriculture Crop Production
Credits 3.2 Lecture Hours. 2 Lab Hours.
Production of floriculture crops in the greenhouse environment; scheduling and controlling crop growth for target market periods; specific flowering crops will be used as models to demonstrate potted flowering plant, cut flower, and garden plant production systems; hands-on crop production experience in lab.
Prerequisite: HORT 201.*

HORT 431 Nursery Production and Management
Credits 3.2 Lecture Hours. 2 Lab Hours.
Container, field and protected culture production of ornamental nursery plants (shrubs, trees, ground covers, bedding plants and herbaceous perennials); retail and wholesale nursery-site selection and development, financing, niche-marketing, personnel and labor management; wholesale nursery production cycles and systems, storage and shipping.*

HORT 432 Horticulture Landscape Design
Credits 3.2 Lecture Hours. 2 Lab Hours.
Application of the principles and elements of design to planning and developing both exterior residential landscape designs and interior commercial designs.
Prerequisites: HORT 203; HORT 332; HORT 306 or HORT 308 or approval of instructor.

HORT 435 Urban Horticulture
Credits 3.3 Lecture Hours.
Introduction to urban horticulture and its role in community development and well-being; emphasis on career opportunities and the roles of the urban horticulture programmer. Offered in odd numbered years.
Prerequisite: Junior or senior classification.

HORT 440 International Horticulture
Credits 3.3 Lecture Hours.
Examines the source of horticultural commodities; shows how geography, culture, politics, and history influence our markets, gardens and refrigerators; educates students on interpreting different garden styles; offered in even number years.
Prerequisite: Junior or senior classification.

HORT 442 Horticulture Landscape Design II
Credits 3.2 Lecture Hours. 2 Lab Hours.
Introduce computer-aided-drafting (CAD) to produce site layout, grading and planting plan, and construction details for small-scale landscape design; advanced design principles and practices in their historical context, includes design and drafting of hardscape details, manipulation of earth forms, ecological urban park design to traditional garden design.
Prerequisites: HORT 203, HORT 308 and HORT 432 or approval of instructor; junior or senior classification.
HORT 446/FSTC 446 Commercial Fruit and Vegetable Processing
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Pilot plant and laboratory operations pertaining to processed fruits, vegetables and beverages; new product development emphasized via individual laboratory projects. Offered in even numbered years.
Prerequisite: FSTC 311/HORT 311.
Cross Listing: FSTC 446/HORT 446.

HORT 451 Retail Floristry
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Principles of floral design in a commercial shop enterprise; aspects of design in vase arrangements, personal flowers, sympathy flowers and flowers for special occasions; production costs and profit analysis, selling techniques and customer relations; term project required.
Prerequisite: HORT 203 or approval of instructor.

HORT 452 Floral Design: Weddings and Personal Flowers
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Basic principles of floral design as applied to wedding work; design principles and mechanics as applied to corsages, headpieces, hand bouquets and ceremony and reception decorations; history of wedding traditions; selling and pricing weddings.
Prerequisite: HORT 203 or HORT 451 or approval of instructor.

HORT 453 Floral Art
Credits 2. 1 Lecture Hour. 2 Lab Hours.
Advanced study of floral design as an art form in contrast to a commercial florist operation; interpretive expression of design principles and color stressed along with international design styles.
Prerequisites: HORT 203; HORT 451 and/or HORT 452.

HORT 454 Special Event Design and Production
Credits 2. 1 Lecture Hour. 2 Lab Hours.
Role of event planners, production managers, designers, and decorators within traditional event management practices; analyze how artistic components are used in visual styling to achieve a specific purpose; impact of collaborative planning, effective research, and strong communication skills, social psychological and economic influences as they relate to event planning.
Prerequisite: Junior or senior classification.

HORT 481 Seminar
Credits 2. 2 Lecture Hours.
Advanced preparation for the transition from college to the work environment including career investigation, presentation techniques and practice, resume and e-portfolio preparation, and professional development and career advancement; required of all senior students in horticulture.
Prerequisite: Junior or senior classification.

HORT 484 Internship
Credits 1 to 9. 1 to 9 Other Hours.
On-the-job experience program in the student's area of horticultural specialization. May be taken three times for credit.
Prerequisites: Sophomore, junior or senior classification; approval of instructor; 2.0 GPR in major and overall.

HORT 485 Directed Studies
Credits 1 to 4. 1 to 4 Other Hours.
Special problems and projects in any area of horticulture.
Prerequisite: Junior or senior classification or approval of department head.

HORT 489 Special Topics in...
Credits 1 to 4. 0 to 4 Lecture Hours. 0 to 4 Lab Hours.
Selected topics in an identified area of horticultural science. May be repeated for credit.
Prerequisite: Approval of instructor.*

HORT 491 Research
Credits 1 to 3. 1 to 3 Other Hours.
Research conducted under the direction of faculty member in horticulture. May be repeated 2 times for credit. Registration in multiple sections of this course are possible within a given semester provided that the per semester credit hour limit is not exceeded.
Prerequisites: Junior or senior classification and approval of instructor. NOTE: Undergraduate floriculture courses are taught under the horticulture designation.

HUMA - Humanities (HUMA)

HUMA 211/RELS 211 Hebrew Scriptures
Credits 3. 3 Lecture Hours.
Philosophical concepts of the Hebrew Scriptures as they relate to the development of religious and ethical ideas.
Cross Listing: RELS 211/HUMA 211.

HUMA 213/RELS 213 New Testament
Credits 3. 3 Lecture Hours.
The origin and development of the religious and philosophical concepts of the New Testament.
Cross Listing: RELS 213/HUMA 213.

HUMA 303/RELS 303 Near Eastern Religions
Credits 3. 3 Lecture Hours.
Beliefs and practices of Judaism, Zoroastrianism, Christianity and Islam with particular attention to their philosophical presuppositions.
Cross Listing: RELS 303/HUMA 303.

HUMA 304/RELS 304 Indian and Oriental Religions
Credits 3. 3 Lecture Hours.
Beliefs and practices of Hinduism, Jainism, Sikhism, Buddhism, Confucianism, Taoism and Shinto with particular attention to their philosophical presuppositions.
Cross Listing: RELS 304/HUMA 304.

HUMA 321 Political Islam and Jihad
Credits 3. 3 Lecture Hours.
Interaction between Islamic movements and politics in various Middle Eastern countries; the meaning and evolution of jihad; the role of Islam as a tool for political and social mobilization.
Prerequisite: Junior or senior classification or approval of instructor.
Cross Listing: INTS 321 and RELS 321.

HUMA 485 Directed Studies
Credits 1 to 6. 1 to 6 Other Hours.
Directed Studies in humanities. May be repeated for credit.
Prerequisite: Approval of department head.

HUMA 489 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Selected topics in an identified area of humanities. May be repeated for credit.
Prerequisite: Approval of instructor.
IBUS - International Business (IBUS)

IBUS 285 Directed Studies
Credits 1 to 3. 1 to 3 Other Hours.
Directed study of selected problems in international business not covered in other courses. May be taken two times for credit.
Prerequisites: Freshman or sophomore classification in business.

IBUS 289 Special Topics in...
Credits 1 to 3. 1 to 3 Lecture Hours. 0 to 3 Lab Hours.
Selected topics in an identified area of international business. May be taken two times for credit.
Prerequisites: Freshman or sophomore classification in business.

IBUS 301 Business Study Abroad
Credits 1 to 18. 1 to 18 Lecture Hours.
For students in approved programs abroad. May be repeated for credit.
Prerequisites: Admission to upper division in Mays Business School and selected for program; approval of study abroad coordinator and academic dean.

IBUS 401/MKTG 401 Global Marketing
Credits 3. 3 Lecture Hours.
I Survey of the aspects involved in marketing products and services in the international market; tariffs, cultural restrictions, business environment and legal restrictions.
Prerequisite: MKTG 321.
Cross Listing: MKTG 401/IBUS 401.

IBUS 402/MKTG 402 International Marketing: Study Abroad
Credits 3. 3 Lecture Hours.
Introduces marketing students to the facets of designing and implementing a marketing strategy in an international setting; provides a traditional classroom experience along with personal exposure to a variety of European cultures; facilitates understanding of the international marketplace in which these students will function.
Prerequisites: Junior classification; MKTG 321 or MKTG 409.
Cross Listing: MKTG 402/IBUS 402.

IBUS 403/MKTG 403 International Mark... 
Credits 3. 3 Lecture Hours.
A research-based course in which students prepare an analysis of a country, or region outside the U.S., and use it in the preparation of a marketing plan for a good or service to be introduced and marketed in that country.
Prerequisites: MKTG 321; concurrent registration in IBUS 402/MKTG 402 or MKTG 102; junior or senior classification.
Cross Listing: MKTG 403/IBUS 403.

IBUS 445/ACCT 445 International Accounting
Credits 3. 3 Lecture Hours.
Introduction and examination of accounting issues unique to multinational enterprises and international business activity. Does not count towards the accounting requirement for the CPA exam.
Prerequisites: ACCT 315 or ACCT 327; FINC 341.
IBUS 457/MGMT 457 Global Entrepreneurship
Credits 3. 3 Lecture Hours.
Practical issues associated with taking small- and medium-size business
global; includes importing and exporting, developing global strategies,
evaluating market opportunities, regional impact on economies and
people.
Prerequisite: Admission to upper division in Mays Business School.
Cross Listing: MGMT 457/IBUS 457.

IBUS 458 International Negotiations
Credits 3. 3 Lecture Hours.
Skill building strategies and exercises in communication, listening and
issue identification; how to negotiate globally; importance of knowing
people and cultures; practice and theory of effective negotiation;
awareness of diverse constructions of reality and communicating across
different groups.
Prerequisite: Admission to upper division in Mays Business School.

IBUS 459 Latin American Markets
Credits 3. 3 Lecture Hours.
Comparing and contrasting the Latin American, Canadian and U.S.
markets across different variables, including culture, economics, social
and legal aspects.
Prerequisite: MKTG 321.

IBUS 460 Academy for Future International Leaders
Credits 3. 3 Lecture Hours.
A practical orientation to international business and cultural issues to
prepare selected Texas A&M students for the international marketplace;
joint effort among all colleges at Texas A&M; designed to complement
any academic major by helping students gain a global perspective of their
chosen field of study.
Prerequisite: Junior or senior classification and selection for the Academy
for Future International Leaders.

IBUS 484 International Business Internship
Credits 1 to 4. 1 to 4 Other Hours.
International business internship with practicing professionals under the
direction of a faculty member.
Prerequisites: Admission to upper division in Mays Business School;
approval of department head.

IBUS 485 Directed Studies
Credits 1 to 6. 1 to 6 Other Hours.
Directed study on selected problems in the area of international business.
Prerequisites: Admission to upper division in Mays Business School and
approval of instructor.

IBUS 489 Special Topics in...
Credits 1 to 4. 1 to 4 Other Hours.
Selected topics in an identified area of international business. May be
repeated for credit.
Prerequisites: Admission to upper division in Mays Business School.

IBIS - Industrial Distribution (IDIS)

IDIS 240 Introduction to Industrial Distribution
Credits 3. 3 Lecture Hours.
Definition, history, types of industrial distribution; range of products;
line of distribution; function of and services provided by distributors;
distributor operational and financial analyses; measures of organizational
effectiveness; employment and advancement opportunities in the field of
industrial distribution.

IDIS 300 Industrial Electricity
Credits 4. 3 Lecture Hours. 3 Lab Hours.
Industrial applications of electrical theory, codes, circuitry, wiring devices,
motors and controllers, switch gear and solid state controls.
Prerequisite: Industrial distribution or engineering technology major,
junior or senior classification, PHYS 208 or PHYS 219; completion of
ENGL 104, MATH 151, MATH 152, CHEM 107 and CHEM 117, and
PHYS 218 with a grade of C or better.

IDIS 303 Mechanical Power Transmission
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Overview of the engineering concepts of mechanical power and the
components within a system to provide transmission of that power into
useful work; experimental application of the related theory as it relates to
the industrial distributor; "real world" knowledge learned for application in
industry.
Prerequisite: Industrial distribution major, junior or senior classification;
completion of ENGL 104, MATH 151, MATH 152, CHEM 107 and
CHEM 117, and PHYS 218 with a grade of C or better.

IDIS 330 Sales Engineering
Credits 4. 3 Lecture Hours. 2 Lab Hours.
Sales and sales management techniques for analyzing distribution
challenges and providing solutions through effective communication;
establishing credibility, effective questioning techniques, developing
solutions, presenting solutions, anticipating objections and gaining a
commitment, plus techniques for building, developing and compensating
an effective sales organization.
Prerequisites: IDIS 240; industrial distribution major, junior or senior
classification; completion of ENGL 104, MATH 151, MATH 152,
CHEM 107 and CHEM 117, and PHYS 218 with a grade of C or better.

IDIS 340 Manufacturer Distributor Relations
Credits 3. 3 Lecture Hours.
Approaches and procedures for developing and maintaining effective
manufacturer distributor relations; marketing channel design, channel
roles, managing uncertainty, legal and ethical imperatives, conflict
resolution, decision support and strategic marketing.
Prerequisites: IDIS 240; industrial distribution major, junior or senior
classification; completion of ENGL 104, MATH 151, MATH 152,
CHEM 107 and CHEM 117, and PHYS 218 with a grade of C or better.

IDIS 343 Distribution Logistics
Credits 3. 3 Lecture Hours.
Study of concepts, issues and techniques used to plan, analyze and
control the logistics network; examination of three key logistical decision-
making areas: inventories, facilities and transportation; particular interest
will be the study of techniques and technologies for managing and
optimizing the logistical (supply) chain.
Prerequisites: STAT 201, STAT 211, or STAT 303; industrial distribution
major, junior or senior classification; completion of ENGL 104, MATH 151,
MATH 152, CHEM 107 and CHEM 117, and PHYS 218 with a grade of C
or better.

IDIS 344 Distributor Information and Control Systems
Credits 4. 3 Lecture Hours. 3 Lab Hours.
Industrial distribution systems including hardware and software operations;
inventory management, vendor evaluation; physical distribution systems;
use of bar codes, radio frequency and other automated data entry
techniques; purchasing operations.
Prerequisites: IDIS 343; industrial distribution major, junior or senior
classification; completion of ENGL 104, MATH 151, MATH 152,
CHEM 107 and CHEM 117, and PHYS 218 with a grade of C or better.
IDIS 400 Industrial Automation
Credits 4. 3 Lecture Hours. 3 Lab Hours.
Industrial applications of electronic devices; instrumentation; AC and DC drives; local area networks; cell and area controllers and advanced applications of programmable controllers.
Prerequisites: IDIS 300; industrial distribution major, junior or senior classification; completion of ENGL 104, MATH 151, MATH 152, CHEM 107 and CHEM 117, and PHYS 218 with a grade of C or better.

IDIS 403 Fluid Power Transmission
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Overview of the engineering concepts of hydraulics and pneumatic power and its components within a system to provide transmission of that power into useful work; experimental application of the related theory as it relates to the industrial distributor; "real world" knowledge learned for application in industry.
Prerequisites: IDIS 303; PHYS 208 or PHYS 219; industrial distribution major, junior or senior classification; completion of ENGL 104, MATH 151, MATH 152, CHEM 107 and CHEM 117, and PHYS 218 with a grade of C or better.

IDIS 420 Contemporary Topics in Electronics Distribution: Going Green
Credits 3. 3 Lecture Hours.
Study of concepts, issues, and techniques used to plan and analyze supply chain for new generation of green products; utilize interdisciplinary approach combining team projects, individual research, case study analysis, and interaction with industry executives; creation of marketing and distribution roadmaps for growth opportunities.
Prerequisites: IDIS 300; IDIS 434; industrial distribution major, junior or senior classification; completion of ENGL 104, MATH 151, MATH 152, CHEM 107 and CHEM 117, and PHYS 218 with a grade of C or better.

IDIS 421 Healthcare Distribution Networks
Credits 3. 3 Lecture Hours.
Examination of the value chain in the health care supply chain; emphasis on distributors in terms of competitive strategy, market power, distinctive capabilities and strategic alliances.
Prerequisites: IDIS 343; industrial distribution major, junior or senior classification; completion of ENGL 104, MATH 151, MATH 152, CHEM 107 and CHEM 117, and PHYS 218 with a grade of C or better.

IDIS 424 Purchasing Applications in Distribution
Credits 3. 3 Lecture Hours.
Applications of purchasing systems, specifically for the distribution industry; emphasis on supplier relations, strategic purchase planning, supplier evaluation, global purchasing techniques, cost analysis, life cycle costing, value analysis; case studies and procurement modeling for distributors.
Prerequisites: IDIS 340; IDIS 343; industrial distribution major, junior or senior classification; completion of ENGL 104, MATH 151, MATH 152, CHEM 107 and CHEM 117, and PHYS 218 with a grade of C or better.

IDIS 433 Industrial Sales Force Development
Credits 3. 3 Lecture Hours.
Techniques and processes for developing, maintaining and leading high performing industrial sales organizations; organization planning and forecasting processes, processes and procedures for identifying and developing talented sales professionals who can operate within a sales process and provide solutions to customers while growing profitable accounts.
Prerequisite: IDIS 330 with a grade of C or better.

IDIS 434 The Quality Process in Distribution
Credits 3. 3 Lecture Hours.
Application of the "Deming" principles specifically for distributors, including customer needs analysis, research and data collection methodology, employee involvement techniques, team building, statistical methods and data analysis; solutions to quality problems for distributors, lean and six-sigma principles.
Prerequisites: IDIS 344; industrial distribution major, junior or senior classification; completion of ENGL 104, MATH 151, MATH 152, CHEM 107 and CHEM 117, and PHYS 218 with a grade of C or better.

IDIS 444 Ethics and Leadership in Distribution
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Managing change in a dynamic environment in industrial distribution including key success factors involved in firm profitability, issues of a strategic nature; negotiation processes; ethical behavior in achieving economic and social performance.
Prerequisites: IDIS 330; industrial distribution major, junior or senior classification; completion of ENGL 104, MATH 151, MATH 152, CHEM 107 and CHEM 117, and PHYS 218 with a grade of C or better.

IDIS 445 International Sales and Marketing
Credits 3. 3 Lecture Hours.
Principles, cultural aspects of selling in the Latin American market, business-to-business selling environment, and marketing products, services and solutions in Latin America; local/country market analysis, strategic marketing, sales planning, alliances and partnerships, and operational support.
Prerequisite: Junior or senior classification.

IDIS 450 Analytics for Distribution Operation
Credits 3. 3 Lecture Hours.
Fundamental concepts in data analytics in distribution operations; using data management tools to process transaction data into useful information; various statistical and analytical models to make strategic decision making; predictive analytics, simulation and risk analysis, linear optimization, and data mining.
Prerequisites: IDIS 343 and IDIS 344 with a grade of "C" or better.

IDIS 454 New Directions in Distributor Competitiveness
Credits 3. 3 Lecture Hours.
Investigation of new research in distributor competitiveness; focus on defining distribution strategy in changing market places; exploration of the latest applied findings and how companies are successfully implementing initiatives; project management approach to demonstrate the development of competitive advantage and design strategies for implementation.
Prerequisites: Junior or senior classification; completion of ENGL 104, MATH 151, MATH 152, CHEM 107 and CHEM 117, and PHYS 218 with a grade of C or better.

IDIS 455 Humanitarian Distribution Networks
Credits 3. 3 Lecture Hours.
Humanitarian logistics; essential knowledge to model distribution systems in humanitarian environments; supplemented by case studies and a project.
Prerequisites: IDIS 343; junior or senior classification; completion of ENGL 104, MATH 151, MATH 152, CHEM 107 and CHEM 117, and PHYS 218 with a grade of C or better.
IDIS 464 Distributor Operations and Financial Management
Credits 3. 3 Lecture Hours.
Assessment of firm performance utilizing financial statement analysis and industry studies; methods for planning, implementing and monitoring profitability from distributor operations; procedures for controlling cash flow; credit, receivables, inventory, personnel and productivity; and related financial operations.
Prerequisites: ACCT 209; IDIS 343; industrial distribution major, junior or senior classification; completion of ENGL 104, MATH 151, MATH 152, CHEM 107 and CHEM 117, and PHYS 218 with a grade of C or better.

IDIS 481 Seminar - Internship Preparation
Credit 1. 1 Lecture Hour.
Develop an understanding of the distribution industry and its opportunities; prepare students for summer internships; provide students with opportunities to network with industry and companies that will be hiring summer interns.
Prerequisite: Minimum of 60 credit hours.

IDIS 484 Professional Internship
Credits 2. 2 Other Hours.
Independent study and on-the-job supervised experience related to a professional area of interest in industrial distribution.
Prerequisites: IDIS 481; junior or senior classification.

IDIS 485 Directed Studies
Credits 1 to 6. 1 to 6 Other Hours.
Permits work in a special problem area on an individual basis with the intent of promoting independent reading, research and study; to supplement existing course offerings or subjects not presently covered.
Prerequisites: Senior classification and approval of instructor.

IDIS 489 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Selected topics in an identified area of industrial distribution.
Prerequisite: Approval of instructor.

INST-Interdisciplinary Studies (INST)

INST 210 Understanding Special Populations
Credits 3. 3 Lecture Hours.
Referral, assessment and categorization of special populations including physical, cognitive and affective characteristics; cultural, ethnic, economic and linguistic differences; giftedness; special education and compensatory programs; awareness of legislative history that results in rights for special populations.
Prerequisite: Sophomore classification or above.

INST 222 Foundations of Education in a Multicultural Society
Credits 3. 3 Lecture Hours.
Historical, philosophical and cultural foundations of education emphasizing education for a multicultural society.

INST 291 Research
Credits 0 to 3. 0 to 3 Other Hours.
Research conducted under the direction of faculty member in teaching, learning and culture. May be taken three times for credit.
Prerequisites: Freshman or sophomore classification and approval of instructor.

INST 301 Educational Psychology
Credits 3. 3 Lecture Hours.
Application of psychology to problems of teaching. Nature and operation of principles of learning, transfer of training; nature, measurement and significance of individual differences; conditions influencing efficiency of learning.
Prerequisite: Junior or senior classification.

INST 332 Second Language Instruction and Assessment
Credits 3. 3 Lecture Hours.
Techniques and methods of intensive English instruction for Limited English Proficient students; lesson planning and instructional modification; use of instructional strategies and appropriate assessment practices.
Prerequisite: Admission to teacher education.

INST 334 Assessment of English Language Learners
Credits 3. 3 Lecture Hours.
Theoretical and practical aspects of ESL/EFL testing, including formal and informal assessment procedures and instruments, assessments and referral and processes of ESL with special needs, and gifted ESL learners.
Prerequisites: INST 322 and INST 332.

INST 362 English as a Second Language Methods I
Credits 3. 3 Lecture Hours.
Basic principles of language acquisition, multiple approaches to second language acquisition; individual differences and second language acquisition; stages of second language development; multiple approaches to assessment.

INST 363 English as a Second Language Methods II
Credits 3. 3 Lecture Hours.
Strategies and techniques for teaching English language learners; curriculum design and material development, instruction of English language learners, content area instruction, and language assessment instruments; a historical perspective of the education of English language learners in United States’ schools.
Prerequisite: INST 362.

INST 491 Research
Credits 1 to 4. 1 to 4 Other Hours.
Research conducted under the direction of faculty member in teaching learning and culture. May be repeated 2 times for credit.
Prerequisites: Junior or senior classification and approval of instructor.

INTS - International Studies (INTS)

INTS 201 Introduction to International Studies
Credits 3. 3 Lecture Hours.
Introduction to the basic concepts and frameworks for analyzing global events and understanding the current international situation; for freshman and transfer international studies majors.

INTS 205 Current Issues in International Studies
Credit 1. 1 Lecture Hour.
Exploration of current issues and problems in International Studies through attendance of events, lectures by noted international academics and professionals, and in-class discussions. May be taken three times for credit.
Prerequisite: International studies major.
INTS 211/ENGL 211 Foundations in Cultural Studies
Credits 3. 3 Lecture Hours.
Introduction to history, influence and major ideas of Cultural Studies; use of culture as a means to critique social problems and understand social forces; analysis of culture in its relationship to power; participation in project investigating contemporary U.S. youth subcultures.
Prerequisites: ENGL 211
Cross Listing: ENGL 211/INTS 211.

INTS 251 Contemporary Issues in the Middle East
Credits 3. 3 Lecture Hours.
Exploration of current political and cultural issues in the Middle East.

INTS 285 Directed Studies
Credits 0 to 3. 0 to 3 Other Hours.
Individual supervision of readings or assigned projects in international studies. May be taken two times for credit.
Prerequisites: Approval of instructor and department head.

INTS 289 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Introduction to the broad range of disciplines and issues explored in the international studies curriculum. May be repeated for credit.
Prerequisite: Freshman or sophomore classification.

INTS 301 Theories of Globalization
Credits 3. 3 Lecture Hours.
Diverse global and international cultural processes in their economic and political contexts; analyses of theorectical lenses on transnationalism including diaspora, hybridity, liminality, marginality, cyborgism, nomadism, scapes and flows and others; case studies of global cultures.
Prerequisite: Junior or senior classification or approval of instructor.

INTS 321 Political Islam and Jihad
Credits 3. 3 Lecture Hours.
Interaction between Islamic movements and politics in various Middle Eastern countries; the meaning and evolution of jihad; the role of Islam as a tool for political and social mobilization.
Prerequisite: Junior or senior classification, or approval of instructor.

INTS 321 Political Islam and Jihad
Credits 3. 3 Lecture Hours.
Cross Listing: HUMA 321 and RELS 321.

INTS 401 Urbanism and Modernism
Credits 3. 3 Lecture Hours.
Interdisciplinary examination of the transition from rural traditions to urban alienation, covering modernist currents in culture, history, politics, and society; exploration of the problems of urbanism as represented by the most renowned twentieth-century artists; study of such topics as modernist urban design, urban alienation, modernist cities, dystopia, and urbanism.
Prerequisites: International studies major; INTS 201.

INTS 403 Nations and Nationalisms
Credits 3. 3 Lecture Hours.
Interdisciplinary approach where nation is understood as modern political entity distinct from country; examination of historical and philosophical origins of idea of nationalism; theories on nationhood, national identity and rise of nationalism; global variety of concrete test cases to highlight actual functions (wars, decolonization, symbolic representations in film, etc.).
Prerequisites: International studies major; INTS 201.

INTS 405 War and Memory
Credits 3. 3 Lecture Hours.
Examination of world wars, colonial wars, genocides, and historical crimes from the late nineteenth century until the present; analysis of the changing memory of those traumatic events as evident in historical accounts, commemorations, film, and literature.
Prerequisites: International studies major; INTS 201.

INTS 407 Diversity in a Globalized World
Credits 3. 3 Lecture Hours.
Examination of the cultural constructs that arise through the encounters with colonialism from the conquest of the Americas to the present; cultural studies and literary analysis to identify and interrogate the common principles of human interaction in the face of cultural diversity.
Prerequisites: International studies major; INTS 201.

INTS 409 Culture, Neoliberalism and Globalism
Credits 3. 3 Lecture Hours.
Examination of largely North Atlantic cultural forms and meanings that arise in the context of neoliberalism from the late 1970's to the present; cultural studies and broad-based social analysis to identify and interrogate the many relational contexts where power circulates through cultural objects and meanings.
Prerequisites: INTS 201; international studies major; junior or senior classification.

INTS 410 Gender and the Global Modern
Credits 3. 3 Lecture Hours.
Relationship of the concepts of gender and modernity in the 20th and the 21st centuries from an international perspective; global theories of gender and sex across genres.
Prerequisites: INTS 201; junior or senior classification or approval of instructor.

INTS 481 Senior Seminar in International Studies
Credits 3. 3 Lecture Hours.
Capstone course designed to produce in-depth research projects; based on student's international experience and specific area of expertise acquired in major.
Prerequisites: International Studies major; INTS 201; senior classification; completed international experience.

INTS 484 Directed Internship
Credits 0 to 3. 0 to 3 Other Hours.
Directed internship in a private firm, government or non-profit agency outside the United States; provide on-the-job experience appropriate to the student's program of work and career objectives. To be taken on a satisfactory/unsatisfactory basis. Maximum of 3 credit hours may count towards degree.
Prerequisites: Completion of 100- and 200-level language requirement; junior or senior classification; approval of internship coordinator.

INTS 485 Directed Studies
Credits 0 to 3. 0 to 3 Other Hours.
Research problems and readings for students majoring in international studies; directed independent study of an international issue related to student's area of interest.
Prerequisite: Junior or senior classification or approval of instructor.

INTS 489 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Selected topics in an identified area of international studies. May be repeated for credit.
Prerequisite: Junior or senior classification or approval of instructor.

INTS 491 Research
Credits 0 to 3. 0 to 3 Other Hours.
Research conducted under the direction of faculty member in international studies.
Prerequisites: INTS 201; junior or senior classification and approval of instructor.
INTS 497 Independent Honors Study
Credits 3. 3 Other Hours.
Directed independent studies designed to produce a senior honors thesis; based on international experience and interdisciplinary expertise acquired in major.
Prerequisites: INTS major; honors candidate; completed international experience.

ISEN - Indust & Systems Engr (ISEN)

ISEN 101 Introduction to Industrial Engineering
Credit 1. 1 Lecture Hour.
Introduction to industrial engineering; overview of the curriculum; presentations by faculty and industry to familiarize with the department and the scope of industrial engineering applications.

ISEN 210 Fundamentals of Industrial Engineering Design
Credits 4. 3 Lecture Hours. 3 Lab Hours.
Engineering design for product development, problem definition and need identification, information gathering and concept generation, decision making and concept selection; industrial engineering concepts including design for manufacturing, assembly, sustainability and environment; economic decision making and cost evaluation; risk, reliability and safety; quality; robust design and optimization.
Prerequisite: ENGR 112.

ISEN 220 Introduction to Production Systems
Credits 3. 3 Lecture Hours.
Introduction to manufacturing and production systems; overview of various aspects of manufacturing systems; includes using Excel and VBA in coding and evaluating models related to production systems and other industrial engineering applications.
Co-requisites: MMET 181; STAT 211.
Prerequisite: CSCE 206.

ISEN 230 Informatics for Industrial Engineers
Credits 3. 3 Lecture Hours.
Structured programming concepts for implementing mathematical and statistical models in industrial engineering problems; emphasis on introductory production and service system problems and computer-based approaches to solve the problems; engineering applications of probability and statistics concepts.
Prerequisite: CSCE 206 or CSCE 111 or CSCE 121 or equivalent. Concurrent enrollment in STAT 211.

ISEN 285 Directed Studies
Credits 1 to 4. 1 to 4 Other Hours.
Problems of limited scope in industrial engineering approved on an individual basis intended to promote independent study.
Prerequisite: Approval of department head.

ISEN 291 Research
Credits 1 to 4. 1 to 4 Other Hours.
Research conducted under the direction of faculty member in industrial and systems engineering. May be taken four times for credit.
Prerequisites: Freshman or sophomore classification and approval of instructor.

ISEN 302 Economic Analysis of Engineering Projects
Credits 2. 2 Lecture Hours.
Principles of economic equivalence; time value of money; analysis of single and multiple investments; comparison of alternatives; capital recovery and after-tax analysis of economic projects.
Prerequisite: MATH 152.

ISEN 303 Engineering Economic Analysis
Credits 3. 3 Lecture Hours.
Principles of economic equivalence; time value of money; analysis of single and multiple investments; comparison of alternatives; capital recovery and tax implications; certainty; uncertainty; risk analysis; public sector analysis and break-even concepts.
Prerequisite: MATH 152.

ISEN 310 Uncertainty Modeling for Industrial Engineering
Credits 3. 3 Lecture Hours.
Models and methods based on probability and statistics for industrial engineering applications; random variables, expectation, distribution fitting, reliability of systems, central limit theorem and interval estimates in the context of production and service systems.
Prerequisites: ISEN 230 and STAT 211; junior or senior classification.

ISEN 314 Statistical Control of Quality
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Quality control with statistical principles applied to quality problems, including statistical analysis, density and distribution functions, control chart concepts, and process capability analysis; laboratory exercises for exposure to basic metrology and applied statistics for quality control applications in discrete-item manufacturing systems; introduction to six-sigma principles including DMAIC and variance reduction strategies.
Prerequisite: STAT 212.

ISEN 315 Production Systems Planning
Credits 3. 3 Lecture Hours.
Principles, models, and techniques for planning, analysis, and operation of integrated production and distribution systems; application of non-linear optimization and linear, integer, and dynamic programming models and solution methods as appropriate to capacity planning, aggregate planning, inventory planning and control under deterministic and stochastic demands, push (MRP) and pull (JIT) material flow management, production lot sizing, supply chain planning, assembly line balancing, and scheduling.
Prerequisites: ISEN 220; MATH 304.
Corequisite: ISEN 420.

ISEN 316 Production Systems Operations
Credits 3. 3 Lecture Hours.
Analytical principles of manufacturing systems design, analysis and control; emphasis on stochastic analysis; role of variability and impact on cycle time; push versus pull production strategies including Kanban and constant wip control; probability, queuing theory, Little’s Law, heavy traffic approximations, queuing networks, and lean engineering principles.
Prerequisites: ISEN 220, ISEN 424; MATH 304.

ISEN 320 Operations Research I
Credits 3. 3 Lecture Hours.
Development and application of fundamental deterministic optimization models and solution methods; focus on quantitative modeling and formulation of linear, integer, and network flow problems; use of computer optimization software to model and solve real-life problems.
Prerequisites: MATH 304; junior or senior classification.
ISEN 330 Human Systems Interaction
Credits 3. 3 Lecture Hours.
Principles of human factors and ergonomics; emphasis on design to support human capabilities, limitations, and interaction tendencies in sociotechnical work systems; topics include human information processing, physiological and biomechanical functioning, and implications for design of the workplace and jobs; case studies in manufacturing, medicine, aerospace, ground transportation, and computer interaction.
Prerequisites: MMET 181; junior classification.

ISEN 340 Operations Research II
Credits 3. 3 Lecture Hours.
Probabilistic methods for industrial and service systems; stochastic processes used in industrial engineering, including Poisson processes and discrete and continuous-time Markov chains; applications to production operations, inventory control, revenue management, quality control, reliability, digital simulation and finance.
Prerequisites: MATH 304 and ISEN 310; junior or senior classification.

ISEN 350 Quality Engineering
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Strategic approach to implementing quality, process and business improvement methods using data analysis tools; total quality management and six sigma approaches to define, measure, analyze, improve and control processes; principles of lean engineering; control charts; process capability analysis; basic metrology, applied statistics, lean principles and process capability.
Prerequisites: ISEN 310 and ISEN 230; junior or senior classification.

ISEN 355 System Simulation
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Systems simulation structure, logic and methodologies; development of simulation models; data handling methods; analysis of simulation data; verification and validation; system simulation languages, models and analysis; applications to industrial situations.
Prerequisites: ISEN 230 and ISEN 310; junior or senior classification.

ISEN 360 Lean Thinking and Lean Engineering in the Process Industries
Credits 3. 3 Lecture Hours.
Philosophical, managerial, and operational principles of lean thinking within the context, tools, and practices of lean engineering; emphasis on the pharmaceutical and process industry; design of lean systems, lean cell design, modeling of lean manufacturing systems, and operation of manufacturing cells; queuing network theory for the analysis of lean systems.
Prerequisites: STAT 211; junior or senior classification for students other than INEN majors.

ISEN 370 Production Systems Engineering
Credits 3. 3 Lecture Hours.
Principles, models, and techniques for planning and analysis of production and distribution systems; application of linear, integer, and nonlinear optimization models and solution methods for aggregate planning, supply chain planning, push (MRP) and pull (JIT) material flow management, inventory control under deterministic and stochastic demands, operations scheduling, and production scheduling.
Prerequisites: ISEN 230 and ISEN 320; junior or senior classification.

ISEN 405 Facilities Design and Material Handling
Credits 3. 3 Lecture Hours.
Principles of facilities location, layout, and material handling systems and to practice designing facilities; modeling, design, and analysis techniques; methodologies in facilities location, layout, and material handling; integration of ergonomics analysis techniques and their implications on design, layout, safety and quality.
Prerequisites: ISEN 210 and ISEN 320; junior or senior classification.

ISEN 408 Supply Chain and Logistics
Credits 3. 3 Lecture Hours.
Principles, models and techniques for planning, analysis and design of supply chain systems; optimization principles, including linear and integer programming, applied to supply chain planning and operations; information technology, design models, databases, and strategic and tactical decision making.
Prerequisites: ISEN 320, ISEN 340, and ISEN 370; junior or senior classification.

ISEN 410 Advanced Engineering Economy
Credits 3. 3 Lecture Hours.
Principles of economic equivalence; borrowing, lending, and investing; establishing minimum attractive rate of return; replacement analysis; capital budgeting; uncertainty analysis; decision trees.
Prerequisites: ISEN 210 or ISEN 302; junior or senior classification.

ISEN 411 Engineering Management Techniques
Credits 3. 3 Lecture Hours.
Techniques relating to managing engineering activities; engineer's transition into management; engineering managerial functions; motivation of individual and group behavior; productivity assessment/improvement; managing the quality function and communications.
Prerequisite: Senior classification in industrial engineering.

ISEN 413 Advanced Data Analytics for Industry
Credits 3. 3 Lecture Hours.
Data mining; linear discriminant analysis (LDA), principal component analysis (PCA) and other methods; classification, clustering, and mining, information extraction; dealing with uncertainty, Bayesian inference; neural models, regression and feature selection.
Prerequisites: ISEN 310 and ISEN 350; junior or senior classification.

ISEN 414 Total Quality Engineering
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Principles of total quality engineering; total quality management philosophy, engineering approaches for designing quality into products and processes; off-line experimentation methods for the robust design; emphasis on teamwork and continuous quality improvement.
Prerequisite: STAT 211; junior or senior classification.

ISEN 416 Facilities Location, Layout and Material Handling
Credits 4. 3 Lecture Hours. 3 Lab Hours.
Analytical treatment of facilities location, physical layout, material flow and handling, combined with heuristic algorithms to assist in the design of production/service facilities; fundamental concepts applied through a sequence of design projects.
Prerequisites: ISEN 315; ISEN 316 or registration therein.

ISEN 420 Operations Research I
Credits 3. 3 Lecture Hours.
Development and application of fundamental deterministic analytical methods including linear programming, integer programming, dynamic programming and nonlinear optimization.
Prerequisite: MATH 304 or equivalent.
ISEN 421 Operations Research II
Credits 3. 3 Lecture Hours.
Development and application of probabilistic analytical methods including Markov chains, queuing systems and digital simulation modeling.
Prerequisites: MATH 304 or equivalent; STAT 212.

ISEN 424 Systems Simulation
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Systems simulation structure, logic and methodologies; generation of random numbers and random variates; system simulation languages, models and analysis; applications to a variety of systems such as transportation, supply chain modeling, manufacturing and service systems.
Prerequisite: STAT 212.

ISEN 425 Design and Analysis of Industrial Systems with Simulation
Credits 3. 2 Lecture Hours. 3 Lab Hours.
In-depth study into the design-modeling and subsequent analysis of contemporary production/service systems; factory/service systems are modeled using the ARENA/SIMAN V simulation-animation language; emphasis is placed on the critical analysis of alternative flow designs of modeled systems using flow and economic parameters to assess system improvement.
Prerequisites: ISEN 303 and ISEN 424.

ISEN 430 Human Factors and Ergonomics
Credits 3. 3 Lecture Hours.
Human biological, ergonomic, and psychological capabilities and limitations; techniques and procedures for developing and applying the principles of human factors engineering to systems design; stresses interdisciplinary nature of the subject.
Prerequisite: Junior or senior classification.

ISEN 434 Human Error and System Failures
Credits 3. 3 Lecture Hours.
Human error from a sociotechnical systems perspective; role of error in complex system failures; human behavioral modes and system design factors; analytical methods for defining the roles and impact of errors in large-scale system accidents; real-world case studies.
Prerequisites: ISEN 330; junior or senior classification.

ISEN 440 Systems Thinking
Credits 3. 3 Lecture Hours.
Systems thinking process, systems of systems and the fundamental considerations associated with the engineering of large-scale systems, or systems engineering including systems modeling, design and the system development process.
Prerequisites: MATH 304 or approval of instructor; junior or senior classification.

ISEN 442 Organizational Systems
Credits 3. 3 Lecture Hours.
Role of people and organizations in the design and development of complex engineered systems; providing engineers with the skills needed to effectively manage large-scale system development programs.
Prerequisites: ISEN 330; junior or senior classification.

ISEN 450 Healthcare Systems Engineering
Credits 3. 3 Lecture Hours.
Explores components of healthcare system, existing problems in healthcare systems; need for engineering to analyze healthcare system problems; application of industrial engineering tools in improving healthcare system; role of industrial engineering in addressing healthcare policy issues.
Prerequisites: ISEN 314, ISEN 420, ISEN 424, or approval of instructor; junior or senior classification.

ISEN 453 Manufacturing Operations
Credits 3. 3 Lecture Hours.
Analytical principles of manufacturing systems design, analysis and control; emphasis placed on stochastic analysis; role of variability and impact on cycle time; push versus pull production strategies including Kanban and constant WIP control; probability, queuing theory, Little’s Law, heavy traffic approximations, and queuing networks.
Prerequisites: ISEN 340; junior or senior classification.

ISEN 459 Industrial Engineering Systems Design
Credits 3. 1 Lecture Hour. 6 Lab Hours.
Capstone design course emphasizing modeling, analysis and design of industrial, manufacturing, and service systems; integrates knowledge gained from all required industrial engineering courses in a comprehensive design project, to be taken in the final semester of undergraduate studies.
Prerequisites: ISEN 314, ISEN 316, ISEN 416.

ISEN 460 Capstone Senior Design
Credits 3. 1 Lecture Hour. 6 Lab Hours.
Engineering design including identification of a problem; development, analysis and evaluation of alternative solutions; and recommendations for and, where possible, development of systems improvement tools; application of experience and training to provide a product or solution that helps company clients; balancing client needs with academic requirements.
Prerequisite: ISEN 340, ISEN 350, ISEN 355 and ISEN 370; junior or senior classification.

ISEN 485 Directed Studies
Credits 1 to 6. 1 to 6 Other Hours.
Permits work on special project in industrial engineering. Project must be approved by department head.
Prerequisite: Senior classification in industrial engineering.

ISEN 489 Special Topics in...
Credits 1 to 5. 1 to 5 Lecture Hours. 0 to 5 Lab Hours.
In-depth study of areas of current student interest and recent advances; normally used for first time offering of new courses.
Prerequisite: Approval of instructor.

ISEN 491 Research
Credits 1 to 4. 1 to 4 Other Hours.
Research conducted under the direction of faculty member in industrial and systems engineering. May be taken three times for credit.
Prerequisites: Junior or senior classification and approval of instructor.

ISYS - Mgmt Info Systems (ISYS)

ISYS 209 Business Information Systems Concepts
Credits 3. 3 Lecture Hours.
Introduction to the use of computers in data and document management and as a problem-solving tool for business; fundamental concepts of information technology and theory; opportunities to use existing application software to solve various business information systems oriented problems.
May not be used to satisfy degree requirements for majors in business.
Prerequisite: For students other than business and agribusiness majors.

ISYS 210 Fundamentals of Information Systems
Credits 3. 3 Lecture Hours.
Introduction to information systems concepts; study of information systems in the functional areas of business; overview of hardware, software and popular operating systems; study of problem solving tools; human factors.
Prerequisite: For business majors.
ISYS 250 Business Programming Logic and Design
Credits 3.3 Lecture Hours.
Development of structured and object-oriented program logic and design in solving business programming problems; writing, documenting, debugging and testing computer code; emphasis on good coding techniques and logical thinking.
Prerequisite: ISYS 210 or approval of instructor.

ISYS 281 Professional Development Information Systems Seminar
Credit 1.1 Other Hour.
Exposure to professional issues, contemporary information systems topics, potential MIS careers and employers. May be taken three times for credit.
Prerequisite: Admission to Mays Business School; intend to major in management information systems.

ISYS 300/SCMT 300 Business Communications I
Credit 1.1 Lecture Hour.
Proper techniques for writing major-specific business communications; progress report, memorandum, letter, executive summary; verbal communications via phone call and person-to-person communications; critiques of personal and peer writing.
Prerequisites: Junior or senior classification; MISY majors only.
Cross Listing: SCMT 300/ISYS 300.

ISYS 310 Network Communications and Infrastructure
Credits 3.3 Lecture Hours.
Concepts, technologies and applications of on-line and network-based systems; analysis and design of data communications; requirements in an information system environment; impact on business organizations; installation, configuration and management of virtual servers.
Prerequisite: ISYS 250; admission to upper division in Mays Business School.

ISYS 315 Database Programming
Credits 3.3 Lecture Hours.
Use and application of Structured Query Language (SQL); Database Management Systems (DBMS) in the solution of business problems; database programming.
Prerequisites: ISYS 310; ISYS 320; or approval of instructor.

ISYS 320 Business Systems Analysis and Design
Credits 3.3 Lecture Hours.
Techniques and methods currently used in system analysis and design including object oriented methods; use of automated tools to support systems development.
Prerequisite: ISYS 250; admission to upper division in Mays Business School.

ISYS 325 Business Object Oriented Programming with Java
Credits 3.3 Lecture Hours.
Introduction of abstract data types, inheritance, object identity, polymorphism as they relate to building business objects and business classes; use of Java programming language depicting the object orientation concepts; use of class libraries and Java packages for business object construction.
Prerequisites: Admission to upper division in Mays Business School; ISYS 250.

ISYS 370/SCMT 370 Introduction to Energy Industry
Credits 3.3 Lecture Hours.
History of the modern Oil & Gas Industry; ecosystem of companies driving the industry; operations involved in exploration, production, refining, trading, pipeline, and retail in bringing oil to market; accounting and economics of the industry; issues and solutions in supporting supply chain; discussion of technology innovations occurring in the industry.
Prerequisite: Admission to upper division in Mays Business School.
Cross Listing: SCMT 370/ISYS 370.

ISYS 400/SCMT 400 Business Communications II
Credit 1.1 Lecture Hour.
Development of critical interpersonal and oral communication skills; strategies for positive team development; conflict resolution; oral presentations and information elicitation; production of effective visual aids.
Prerequisites: Senior classification; MISY majors only.
Cross Listing: SCMT 400/ISYS 400.

ISYS 410 Management of Information Systems
Credits 3.3 Lecture Hours.
Strategic management of information systems; change and risk management processes during information systems implementation; role of information systems to support business goals; writing business cases for request for proposals and responses; project management techniques.
Prerequisite: ISYS 310; ISYS 320; or approval of instructor.

ISYS 415 Information Systems Capstone Project
Credits 3.3 Lecture Hours.
Design and development of information system software based on technical specifications; multi-platform environment; database server and web server software deployment.
Prerequisites: ISYS 315; ISYS 410; or approval of instructor.

ISYS 420 Web-Enabled Applications
Credits 3.3 Lecture Hours.
Distributed business applications using the World Wide Web; advanced discussions of the concepts of internet, intranet, extranet; different methods to design web-enabled applications; active web applications; cutting edge website design; legacy to web integration; use of web-oriented languages.
Prerequisites: ISYS 315.

ISYS 425 Complex Business Application Design
Credits 3.3 Lecture Hours.
Business application development alternatives; COM and CORBA object models; use of Visual Basic; use of ActiveX controls, ActiveX Servers and ActiveX Documents.
Prerequisites: ISYS 250; senior classification.

ISYS 450 Business Intelligence and Data Mining
Credits 3.3 Lecture Hours.
Rationale for Business Intelligence and data mining through business case studies; lab training using data mining software; and process of data mining by using commercial data mining software on large data sets.
Prerequisites: Grade of "C" or better in SCMT 303 or equivalent; junior or senior classification.

ISYS 455 Business Information Security and Risk Management
Credits 3.3 Lecture Hours.
Explores business, managerial and technological aspects of information security; analysis, design, implementation and management issues surrounding effective information security; includes risk management, business continuity planning, security policy development.
Prerequisite: ISYS 310.
ISYS 460 E-Services  
Credits 3. 3 Lecture Hours.  
Examines the deployment and utilization of information technologies by businesses, governments and not for profit organizations to deliver services, with applications in banking and financial advisory services, healthcare, and federal, state and local governments.  
Prerequisite: Senior classification in business or approval of instructor.  

ISYS 481 Information Systems Seminar  
Credit 1. 1 Other Hour.  
Exposure to professional issues, contemporary information systems topics, potential MIS careers and employers. May be taken three times for credit.  
Prerequisite: Admission to upper division in Mays Business School; or approval of instructor.  

ISYS 484 Management Information Systems Internship  
Credits 1 to 4. 1 to 4 Other Hours.  
A directed internship in an organization to provide students with a learning experience supervised by professionals in organizational settings appropriate to the student's professional objectives. Must be taken on a satisfactory/unsatisfactory basis.  
Prerequisites: Management Information Systems major and approval of academic advisor and instructor.  

ISYS 485 Directed Studies  
Credits 1 to 4. 1 to 4 Other Hours.  
Directed study of selected problems in an area of management information systems not covered in other courses.  
Prerequisites: Admission to upper division in Mays Business School and approval of academic advisor and instructor.  

ISYS 489 Special Topics in...  
Credits 1 to 4. 1 to 4 Lecture Hours. 0 to 4 Lab Hours.  
Selected topic in an identified field of management information systems.  
Prerequisites: Admission to upper division in Mays Business School and approval of academic advisor and instructor.  

ITAL - Italian (ITAL)  

ITAL 101 Beginning Italian I  
Credits 4. 3 Lecture Hours. 2 Lab Hours.  
(ITAL 1411, 1511) Beginning Italian I. Elementary language study with oral, written and reading practice; preparation for conversation; part of class preparation will be done in language laboratory.  

ITAL 102 Beginning Italian II  
Credits 4. 3 Lecture Hours. 2 Lab Hours.  
(ITAL 1412, 1512) Beginning Italian II. Continuation of ITAL 101; part of class preparation will be done in the language laboratory.  
Prerequisite: ITAL 101.  

ITAL 201 Intermediate Italian I  
Credits 3. 3 Lecture Hours.  
(ITAL 2311) Intermediate Italian I. Readings of average difficulty; review of grammar; practice in conversation and composition.  
Prerequisite: ITAL 102.  

ITAL 202 Intermediate Italian II  
Credits 3. 3 Lecture Hours.  
(ITAL 2312) Intermediate Italian II. Continuation of ITAL 201 with more advanced material.  
Prerequisite: ITAL 201.  

ITAL 285 Directed Studies  
Credits 1 to 4. 1 to 4 Lecture Hours.  
Individual supervision of readings or assigned projects in Italian, selected for each student individually.  
Prerequisites: Approval of instructor and department head.  

ITAL 289 Special Topics in...  
Credits 1 to 4. 1 to 4 Lecture Hours.  
Selected topics in an identified area of Italian studies. May be repeated for credit.  
Prerequisite: Approval of instructor.  

ITAL 303 Composition and Conversation  
Credits 3. 3 Lecture Hours.  
Readings of contemporary Italian prose; intensive review of grammar and syntax; development of written and oral skills; expansion of vocabulary; translations, compositions and short presentation.  
Prerequisite: ITAL 202 or equivalent.  

ITAL 451/EURO 451 Introduction to Italian Culture  
Credits 3. 3 Lecture Hours.  
Introduction to the culture of the Italian Peninsula, from Middle Ages to present; study of major works of literature, political science, visual arts, music and cinema, to set Italy's culture in its social and historical context; taught in English.  
Prerequisite: ITAL 201 or registration therein, or approval of instructor.  
Cross Listing: EURO 451/ITAL 451.  

ITAL 452/WGST 452 Women and Gender in Italian Literature  
Credits 3. 3 Lecture Hours.  
The historical and cultural dynamics forging the notion of woman and gender in Italian society and literature; discussion of films and theoretical texts concerning subjectivity and language, body and culture; taught in English.  
Prerequisite: ITAL 201 or registration therein or approval of instructor.  
Cross Listing: WGST 452/ITAL 452.  

ITAL 453/EURO 453 Italian Literature  
Credits 3. 3 Lecture Hours.  
Survey of Italian literature; focus on literary portrayal of reality in modern and contemporary Italian culture, the dialogue with the classical tradition, and literature's potential to affect and be affected by social critique; taught in English.  
Prerequisite: ITAL 201 or registration therein, or approval of instructor.  
Cross Listing: EURO 453/ITAL 453.  

ITAL 454/EURO 454 Italian Drama  
Credits 3. 3 Lecture Hours.  
Study of Italian dramatic literature from the origins of Italian theater to the contemporary stage; analysis of the link between theater, opera, and film; taught in English.  
Prerequisite: ITAL 201 or registration therein or approval of instructor.  
Cross Listing: EURO 454/ITAL 454.  

ITAL 455/FILM 455 Italian Cinema  
Credits 3. 3 Lecture Hours.  
Survey of Italian cinema from Neorealism to the present; taught in English.  
Prerequisite: Junior or senior classification, or approval of instructor.  
Cross Listing: FILM 455/ITAL 455.
ITAL 456/EURO 456 Contemporary Italy
Credits 3. 3 Lecture Hours.
Examination of changes in Italian society and culture since World War II, with focus on their narration and interpretation by representative authors and filmmakers, and on multicultural literary production in present-day Italy; taught in English.
Prerequisite: ITAL 201 or registration therein or approval of instructor.
Cross Listing: EURO 456/ITAL 456.

ITAL 485 Directed Studies
Credits 1 to 4. 1 to 4 Other Hours.
Individual supervision of readings or assigned projects, selected for each student individually; written and oral reports.
Prerequisite: Approval of instructor and department head.

ITAL 489 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Selected topics in an identified area of Italian. May be repeated for credit.
Prerequisite: Approval of instructor.

JAPN - Japanese (JAPN)

JAPN 101 Beginning Japanese I
Credits 4. 3 Lecture Hours. 2 Lab Hours.
(JAPN 1411, 1511) Beginning Japanese I. Elementary language study with oral, written and reading practice; preparation for conversation; part of class preparation to be done in the language laboratory.

JAPN 102 Beginning Japanese II
Credits 4. 3 Lecture Hours. 2 Lab Hours.
(JAPN 1412, 1511) Beginning Japanese II. Continuation of JAPN 101; part of class preparation to be done in the language laboratory.
Prerequisite: JAPN 101.

JAPN 110 Functional Japanese: History and Culture
Credits 3. 3 Lecture Hours.
Designed to complement beginning Japanese courses; emphasis on oral production and ability to function in a variety of real-life situations; includes survey of Japanese history.
Prerequisite: Ability to read Hiragana and Katakana.

JAPN 201 Intermediate Japanese I
Credits 4. 4 Lecture Hours.
(JAPN 2311) Intermediate Japanese I. Readings of average difficulty; review of grammar; practice in conversation and composition.
Prerequisite: JAPN 102.

JAPN 202 Intermediate Japanese II
Credits 4. 4 Lecture Hours.
(JAPN 2312) Intermediate Japanese II. Continuation of JAPN 201 with more advanced material.
Prerequisite: JAPN 201.

JAPN 285 Directed Studies
Credits 1 to 4. 1 to 4 Other Hours.
Individual supervision of readings or assigned projects in Japanese, selected for each student individually; written or oral reports.
Prerequisite: Approval of instructor and Director of AALO.

JAPN 289 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Selected topics in an identified area of Japanese studies. May be repeated for credit.
Prerequisite: Approval of instructor.

JAPN 291 Research
Credits 0 to 3. 0 to 3 Other Hours.
Research in Japanese studies conducted under the direction of faculty member approved by the Director of AALO. May be taken 2 times for credit.
Prerequisites: Freshman or sophomore classification and approval of instructor.

JAPN 301 Upper Level Japanese I
Credits 3. 3 Lecture Hours.
Reading and listening practice using authentic and near-authentic materials; conversation practice in different levels of formality; composition and grammar; conducted in Japanese.
Prerequisite: JAPN 202.

JAPN 302 Upper Level Japanese II
Credits 3. 3 Lecture Hours.
Continuation of JAPN 301 with more advanced material.
Prerequisite: JAPN 301.

JAPN 325 Japanese Language and Culture through Manga
Credits 3. 3 Lecture Hours.
Examination of Japanese and Asian visual, linguistic, and cultural traditions, with emphasis on genre of Manga.
Prerequisite: JAPN 202.

JAPN 401 Advanced Japanese I
Credits 3. 3 Lecture Hours.
Readings with selected grammar and kanji lessons; focus on Japanese traditional and popular culture, religion, and history; taught in Japanese.
Prerequisite: JAPN 302 or equivalent.

JAPN 402 Advanced Japanese II
Credits 3. 3 Lecture Hours.
Readings with selected grammar and kanji lessons; focus on Japanese private and business life, education, politics, and contemporary culture; taught in Japanese.
Prerequisite: JAPN 302 or equivalent.

JAPN 485 Directed Studies
Credits 1 to 4. 1 to 4 Other Hours.
Individual supervision of readings or assigned projects selected for each student individually; written or oral reports.
Prerequisite: Approval of instructor and Director of AALO.

JAPN 489 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Selected topics in an identified area of Japanese studies. May be repeated for credit.
Prerequisite: Approval of instructor.

JAPN 491 Research
Credits 1 to 4. 1 to 4 Other Hours.
Research in Japanese studies conducted under the direction of faculty member approved by the Director of AALO. May be taken 2 times for credit.
Prerequisites: Junior or senior classification and approval of instructor.
JOUR - Journalism (JOUR)

JOUR 102 American Mass Media
Credits 3.3 Lecture Hours.
(COMM 1307) American Mass Media. Introductory survey of mass communication media, their history and social role, to provide an understanding of the development and importance of mass communication media in modern society.
Prerequisite: Freshman or sophomore classification, or approval of program director.

JOUR 200 Mass Media Information
Credits 3.3 Lecture Hours.
Strategies and procedures in identifying, gathering, analyzing and organizing information for the mass media; sources and methods; evaluation and validation of evidence; legal and ethical considerations.
Prerequisites: JOUR 102 with a grade of B or better, 80 percent on the GSP test or SAT or ACT equivalent, 2.5 GPR or higher, and freshman or sophomore classification; or approval of program director.

JOUR 203 Media Writing I
Credits 3.2 Lecture Hours. 3 Lab Hours.
(COMM 2311) Media Writing I. Basic journalistic techniques common to all media; integration of news gathering, writing and editing; ethics. Limited to minors in journalism, or with approval of program director.
Prerequisites: JOUR 102 and JOUR 200, freshman or sophomore classification and enrollment in journalism minor; or approval of program director.*

JOUR 215/COMM 215 Interviewing: Principles and Practices
Credits 3.3 Lecture Hours.
Theory and practice of methods in selected interview settings; emphasis on communication between two persons, questioning techniques, and the logical and psychological bases of interpersonal persuasion.

JOUR 230/COMM 230 Communication Technology Skills
Credits 3.3 Lecture Hours.
Introduction to interactive media and media literacy skills in the digital domain; survey of technology histories, standards, and markets for industries such as multichannel TV, digital radio, video games, streaming media, epublishing, teleconferencing, and social networking.
Prerequisites: Communication or telecommunication media studies majors.
Cross Listing: COMM 230/JOUR 230.

JOUR 250/COMM 250 New Media and the Independent Voice
Credits 3.3 Lecture Hours.
Examination of new media as independent voices for cultural and political movements; principles governing the design, presentation, and evaluation of blogs as a persuasive medium in society.
Cross Listing: COMM 250/JOUR 250.

JOUR 285 Directed Studies
Credits 0 to 3. 0 to 3 Other Hours.
Research problems related to communication field. Individual work, fitted to special needs of specific student as determined by his or her interests and aptitude.
Prerequisites: Enrollment restricted to students completing the journalism minor and approval of the program director.*

JOUR 289 Special Topics in...
Credits 3.3 Other Hours.
Selected topics in an identified area of journalism and mass communication. May be repeated for credit.
Prerequisites: Enrollment restricted to students completing the journalism minor and approval of the program director.*

JOUR 291 Research
Credits 0 to 3. 0 to 3 Other Hours.
Research conducted under the direction of a chosen faculty member in Journalism Studies. May be taken for a maximum of 3 hours credit.
Prerequisites: Freshman or sophomore classification and approval of instructor.

JOUR 301/COMM 307 Mass Communication, Law and Society
Credits 3.3 Lecture Hours.
Mass media as social institutions; social responsibility and ethics of the press; history, constitutional development, and law of the First Amendment.
Prerequisites: JOUR 102 and JOUR 200, junior or senior classification and enrollment in journalism minor; or approval of program director.
Cross Listing: COMM 307/JOUR 301.*

JOUR 303 Media Writing II
Credits 3.2 Lecture Hours. 3 Lab Hours.
Interpretative news gathering and writing for various media; basic communication law and ethics; assigned practice on campus or other publications.
Prerequisites: JOUR 203, junior or senior classification and enrollment in journalism minor; or approval of program director.*

JOUR 304 Editing for the Mass Media
Credits 3.3 Lecture Hours.
Principles and practice of editing including: improving and tightening text; writing headlines, titles and subheads; self-editing and editing others; tailoring texts for specific audiences; understanding style guides.
Prerequisite: Junior or senior classification or approval of program director.

JOUR 365/COMM 365 International Communication
Credits 3.3 Lecture Hours.
Mass media, international, and cross-cultural audiences, theoretical, pragmatic, political and ethical issues; including cultural differences, comparative media systems, development, communication, patterns of world news flow, political propaganda, impact of international advertising and other issues.
Prerequisite: Junior or senior classification.
Cross Listing: COMM 365/JOUR 365.

JOUR 450 Political Reporting
Credits 3.3 Lecture Hours.
Interviewing; reporting; and writing various types of political stories and commentary; exploration of ethical principles and issues in political reporting including role of free press in a democracy.
Prerequisite: Junior or senior classification or approval of instructor.

JOUR 451 Arts & Entertainment Journalism
Credits 3.3 Lecture Hours.
Arts & Entertainment Journalism. Journalistic coverage of arts and entertainment issues and events; examination of reviews and feature stories; feature writing and criticism; extensive workshop experience; emphasis on the value of research, self-editing and revision.
Prerequisite: Junior or senior classification or approval of instructor.
KINE 120 The Science of Basic Health and Fitness
Credit 1. 1 Lecture Hour. 1 Lab Hour.
Overview of the human body; scientific fundamentals of stress, fitness, nutrition, disease and drug use; interdisciplinary focus on wellness and longevity; integrated physical activity experiences centering on principles and applications of the scientific basis of conditioning; not open to students who have taken KINE 223.

KINE 121 Physical and Motor Fitness Assessment
Credit 2. 1 Lecture Hour. 2 Lab Hours.
Assessment of individual physical fitness and motor ability profiles for students majoring in kinesiology.
Prerequisite: Kinesiology major.

KINE 167 Visual and Performing Arts—Jazz Dance II
Credit 1. 2 Lab Hours.
(DANC 1148) Visual and Performing Arts—Jazz Dance II. Intermediate study of jazz dance; review of historical background and cultural heritage; includes several jazz styles; proper body mechanics and alignment; placement exam required on the second day of class.
Prerequisite: Beginning jazz dance or approval of instructor.

KINE 175 Gender Neutral Partnering
Credit 1. 2 Lab Hours.
Explores the fundamental principles of partnering; explores the properties of momentum, weight sharing, contact improvisation, breath, timing and trust; develops movement phrases on the principles of impromptu and partnering.
Prerequisite: DCED 172 or approval of instructor.

KINE 198 Health and Fitness Activity
Credit 1. 2 Lab Hours.
(PHED 1164, 1238) Health and Fitness Activity. Half lecture; half activity; student choice of designated fitness or strength related activities; lecture portion covers current health topics.

KINE 199 Required Physical Activity
Credit 1. 2 Lab Hours.
(Any 1-hour PHED activity course) Required Physical Activity. Selection from a wide variety of activities designed to increase fitness and/or encourage the pursuit of lifetime activity.

KINE 201 Pilates Apparatus
Credits 2. 2 Lecture Hours.
Study of Pilates apparatus work as designed by Joseph H. Pilates; basic principles of Pilates including breathing, pelvic and ribcage placement, scapulae stabilization, head and cervical alignment; uses apparatuses such as reformer, cadillac, chair, and barrel; incorporates the use of props such as rollers, mini balls, physioballs, blocks, therabands and pinky balls into apparatus work. May be taken 2 times for credit.
Prerequisites: KINE 198--Pilates Mat I; dance science track majors only.

KINE 210 The Art of Movement
Credits 3. 3 Lecture Hours.
Introductory course that examines and appreciates movement as expressed by every culture; movement is a function driven by context, whether practical or artistic; this course examines how dance is used to advance personal, social expression via design, patterning, connoted meaning, and inter-connectivity of form; in-class discussions, applications, and presentations, students attend and critique off-campus dance productions to enhance perspective, experience and appreciation of dance movement.

KINE 213 Foundations of Kinesiology
Credits 3. 3 Lecture Hours.
KINE 214/HLTH 214 Health and Physical Activity for Children
Credits 3. 3 Lecture Hours.
(PhEd 1331) Health and Physical Activity for Children. Coordinated school health and physical activity programs appropriate for elementary aged children; focus on the content of the curriculum and the philosophical underpinnings of programming related to health and physical activity.
Prerequisite: KINE 198.
Cross Listing: HLTH 214/KINE 214.

KINE 215 Fundamentals of Coaching
Credit 1. 1 Lecture Hour.
(PhEd 1321,1322) Fundamentals of Coaching. Study modern theories and applications related to coaching; philosophies, styles, techniques, team organization, liability and administration.
Prerequisite: Kinesiology majors and coaching minors only.

KINE 223 Introduction to the Science of Health and Fitness
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Overview of the human body systems; interdisciplinary focus on wellness, fitness, nutrition, disease, drug use; integrated physical activity centering on principles and applications of conditioning; collect data, evaluate information, formulate plans based on findings; experience with pedometers, heart rate monitors, bioelectrical impedance devices, software and other technology.

KINE 240/HLTH 240 Computer Technology in Health and Kinesiology
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Application of current technology in the areas of health and kinesiology; fundamentals of computers and their use; application of commercial software to health and kinesiology settings; use of computer networks for communications and research.
Prerequisite: Freshman or sophomore classification in health or kinesiology.
Cross Listing: HLTH 240/KINE 240.

KINE 260 Movement Lab: Ballet I
Credits 2. 0 Lecture Hours. 5 Lab Hours.
Understand body alignment through ballet technique; assess individual muscular and skeletal imbalances during a ballet technique class; video references of proper body alignment; anatomical explanation and assessment of individual's use of lateral rotation in ballet technique. May be taken 3 times for credit.
Prerequisites: DCED 160; dance science majors, dance concentration majors and dance minors; or approval of instructor.

KINE 271 Movement Lab: Modern Dance I
Credits 2. 0 Lecture Hours. 5 Lab Hours.
Understand body alignment through modern dance; assess individual muscular and skeletal body imbalances during a modern dance class; introduction of how to work with imbalances in the body while executing proper dance technique; understand the structural and muscular alignment of parallel versus lateral rotation. May be taken 3 times for credit.
Prerequisites: DCED 171; dance science majors, dance concentration majors and dance minors; or approval of instructor.

KINE 285 Directed Studies
Credits 0 to 4. 0 to 4 Other Hours.
Work on a specified topic with the intent of promoting independent reading, research and study; supplement existing course offerings or subjects nor presently covered.
Prerequisites: Freshman or sophomore classification; approval of instructor.

KINE 289 Special Topics in...
Credits 0 to 4. 0 to 4 Lecture Hours.
Selected topics in an identified area of kinesiology. May be repeated for credit.

KINE 291 Research
Credits 0 to 4. 0 to 4 Other Hours.
Research conducted under the direction of faculty member in kinesiology. May be repeated 4 times for credit.
Prerequisites: Freshman or sophomore classification and approval of instructor.

KINE 302 Applied Exercise Physiology for Coaches
Credit 1. 1 Lecture Hour.
Survey of the physiology of exercise with an emphasis on topics in applied physiology that coaches should understand in working with student athletes of both genders and different ages.
Prerequisites: KINE 306; junior or senior classification or approval of instructor.

KINE 305 Sport Nutrition
Credits 3. 3 Lecture Hours. 0 Lab Hours.
Optimal nutritional intake in support of peak performance in sport and dance; food as fuel and which fuels are most important to specific sport/dance activities; the role nutritional supplements can play; fluid balance; weight management for athletes and dancers.
Prerequisites: NUTR 202 or equivalent or approval of instructor; junior or senior classification.

KINE 306 Functional Anatomy for Coaches
Credit 1. 2 Lab Hours.
Introduction to musculoskeletal anatomy and movement analysis and the applications of these topics to basic sport skills.
Prerequisite: Junior or senior classification or approval of instructor.

KINE 307 Lifespan Motor Development
Credits 3. 3 Lecture Hours.
Developmental characteristics and contemporary issues associated with motor behavior across the lifespan.
Prerequisite: Junior or senior classification or approval of instructor.

KINE 308 Integrated Adventure Education
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Philosophy of outdoor education in a physical education program; designing and implementing outdoor adventure activities in an experiential and interdisciplinary manner for reinforcing the Texas Essential Knowledge and Skills.
Prerequisites: Junior or senior classification or instructor approval.

KINE 311 Fundamental Rhythms and Dance
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Theory and practice in fundamental rhythms and dance as appropriate for elementary and secondary school curricula.
Prerequisite: Approval of instructor.

KINE 312 Coaching of Baseball
Credits 2. 1 Lecture Hour. 2 Lab Hours.
Theory and practice of coaching fundamentals in baseball.
Prerequisite: KINE 215.

KINE 314 Coaching of Soccer
Credits 2. 1 Lecture Hour. 2 Lab Hours.
Study of modern theories and applications related to coaching soccer.
Prerequisites: KINE 215 and KINE 199-Soccer or approval of instructor.
KINE 317 Coaching of Football  
**Credits 2.1 Lecture Hour. 2 Lab Hours.**  
Theory and practice of coaching fundamentals in football.  
**Prerequisite:** KINE 215.

KINE 318 Athletic Injuries  
**Credits 3.3 Lecture Hours.**  
Introduction to the profession of athletic training; comprehensive analysis of the theories and practices in preventing, recognizing and treating common athletic injuries.  
**Prerequisites:** HLTH 216; BIOL 319; BIOL 320; junior or senior classification.

KINE 320 Advanced Athletic Injuries  
**Credits 3.3 Lecture Hours.**  
Principles and procedures of therapeutic modalities, therapeutic exercise and rehabilitation as they relate to physical education, athletic training and physical therapy.  
**Prerequisites:** KINE 318 and approval of instructor.

KINE 321 Coaching of Volleyball  
**Credits 2.1 Lecture Hour. 2 Lab Hours.**  
Coaching fundamentals in volleyball.  
**Prerequisites:** KINE 215 and KINE 199-Volleyball or approval of instructor.

KINE 351 Coaching of Basketball  
**Credits 2.1 Lecture Hour. 2 Lab Hours.**  
Theory of fundamental skills needed to coach basketball with emphasis on knowledge of rules, strategies and skill analysis.  
**Prerequisites:** KINE 215 and KINE 199-Basketball or approval of instructor.

KINE 355 Coaching of Track  
**Credits 2.1 Lecture Hour. 2 Lab Hours.**  
Theory and practice of coaching fundamentals in track and field events.  
**Prerequisite:** KINE 215.

KINE 361 Movement Lab: Ballet II  
**Credits 2.0 Lecture Hours. 5 Lab Hours.**  
Self evaluation of correct body alignment and imbalances while executing proper ballet technique; observation and assessment of the student's progression throughout the semester in regards to proper alignment and technique. May be taken 3 times for credit.  
**Prerequisites:** DCED 161; dance science majors, dance concentration majors and dance minors; or approval of instructor.

KINE 372 Movement Lab: Modern Dance II  
**Credits 2.0 Lecture Hours. 5 Lab Hours.**  
Self evaluation of correct body alignment and imbalances while executing proper modern dance technique; observation and assessment of the student's progression throughout the semester in regards to proper alignment and technique. May be taken 3 times for credit.  
**Prerequisites:** DCED 172; dance science majors, dance concentration majors and dance minors; or approval of instructor.

KINE 386 Sport Physiology  
**Credits 3.3 Lecture Hours.**  
Scientific physiological principles as they relate to sport and exercise in the preparation of current and future coaches; emphasis on cognitive, physiological knowledge and practical applications necessary to earn a credible national certification; safely and effectively train athletic, fitness and general populations.  
**Prerequisites:** KINE 121, KINE 213 and KINE 302; junior or senior classification.

KINE 403 Dance Wellness  
**Credits 3.3 Lecture Hours.**  
Using scientific methods to evaluate the dancer's body; implementation of dance screening process and creation of programs to address specific dance related injuries, imbalances or misalignments; study of current research in dance medicine/science and application of this knowledge to increase longevity of movement.  
**Prerequisites:** BIOL 319, BIOL 320; dance science track majors only; admittance into the professional phase or approval of instructor; junior or senior classification.

KINE 404 Coaching Psychology  
**Credits 3.3 Lecture Hours.**  
Mental aspects of coaching for performance improvement in athletic and exercise settings; focus on coaching applications of theoretical concepts including individual differences, motivation, team and group dynamics, leadership, performance enhancement, positive and negative health behaviors and youth development.  
**Prerequisite:** Junior or senior classification, or approval of instructor.

KINE 406 Motor Learning and Skill Performance  
**Credits 3.3 Lecture Hours.**  
Learning in psychomotor domain; motor learning theories, physiological bases of skill behavior, motor and skill learning, state of performer and application of instructional techniques in motor learning and skill performance.  
**Prerequisites:** Junior or senior classification; admission to professional phase of program or approval of instructor for non-kinesiology majors.

KINE 425 Tests and Measurements  
**Credits 3.3 Lecture Hours.**  
Comprehensive examination of the conceptual and theoretical aspects of measurement and evaluation in the field of kinesiology; emphasis on the application of statistical techniques germane to measurement and evaluation.  
**Prerequisites:** Junior or senior classification; or approval of instructor for non-majors.

KINE 426 Exercise Biomechanics  
**Credits 4.3 Lecture Hours. 3 Lab Hours.**  
An integrated, mechanistic study of biomechanics of human motion during physical activity and exercise; biology and mechanical properties of the human movement system including bones, tendons, ligaments, cartilage, skeletal muscles, joints and whole body systems investigated.  
**Prerequisites:** PHYS 201, BIOL 319, BIOL 320; junior or senior classification; admission to the professional phase of program or approval of instructor for non-majors.

KINE 427 Therapeutic Principles  
**Credits 3.3 Lecture Hours.**  
Examination of human tissue types, characteristics, and physiology pertaining to injury, pain transmission, and the healing process; study of common therapeutic modalities such as ultrasound and electricity with emphasis on physiological mechanisms of effect.  
**Prerequisites:** Junior or senior classification; admission to the professional phase of program or approval of instructor for non-kinesiology majors.
KINE 429 Adapted Physical Activity  
Credits 3. 2 Lecture Hours. 2 Lab Hours.  
Kinesiology for individuals with handicapping conditions; emphasis on cognitive recognition of such handicaps as postural deviations, emotional disturbances, convulsive disorders, vision and auditory problems, and other learning disability conditions.  
Prerequisite: Admission to professional phase of program or approval of instructor.

KINE 431 Ropes Course and Group Process  
Credits 3. 2 Lecture Hours. 2 Lab Hours.  
Techniques of group facilitation for initiatives of ropes/challenge course events; activity presentation and sequencing, safety techniques and construction principles, and processing experiences for transfer of learning.  
Prerequisite: Junior or senior classification; approval of instructor.

KINE 433 Physiology of Exercise  
Credits 3. 3 Lecture Hours.  
Physiological bases of exercise and physical conditioning; measurement of metabolic efficiency during exercise, neuromuscular efficiency and body composition.  
Prerequisites: BIOL 319, BIOL 320, junior or senior classification; admission to the professional phase of program or approval of instructor for non-majors.

KINE 434 Advanced Exercise Physiology  
Credits 3. 3 Lecture Hours.  
Investigates mechanisms responsible for skeletal muscle power production during exercise and the energetic support for the muscles through intermediary metabolism and oxygen flux from the lungs to the muscle mitochondria; examines the effects of training on these processes.  
Prerequisites: KINE 433; junior or senior classification.

KINE 439 Exercise Evaluation and Prescription  
Credits 4. 3 Lecture Hours. 3 Lab Hours.  
Prerequisites: KINE 433; senior classification; admission to the professional phase of program or approval of instructor for non-kinesiology majors.

KINE 462 Movement Lab: Ballet III  
Credits 2. 0 Lecture Hours. 5 Lab Hours.  
Peer evaluation of body alignment, imbalances and biomechanics of movement; explanation of kinesthetic principles and injury prevention through ballet technique; conditioning programs for a peer's imbalances and improper technique in a ballet class. May be taken 3 times for credit.  
Prerequisites: DCED 162; dance science majors, dance concentration majors and dance minors; or approval of instructor.

KINE 473 Movement Lab: Modern Dance III  
Credits 2. 0 Lecture Hours. 5 Lab Hours.  
Peer evaluation of body alignment, imbalances and biomechanics of movement; explanation of kinesthetic principles and injury prevention through modern dance technique; develop conditioning program for a peer's imbalances and improper technique in a modern dance class. May be taken 3 times for credit.  
Prerequisites: DCED 173; dance science majors, dance concentration majors and dance minors; or approval of instructor.

KINE 482 Seminar  
Credit 1. 1 Lecture Hour.  
Acquaint students with current research and the research process in their chosen field of study (kinesiology). May be taken four times for credit. Must be taken on a satisfactory/unsatisfactory basis.  
Prerequisites: Admission to professional phase of program or approval of instructor; junior or senior classification.

KINE 483 Practicum in Kinesiology  
Credits 3. 2 Lecture Hours. 2 Lab Hours.  
Participation and study in the areas of fitness assessment, exercise and/or sport programming, and fitness/sport administration; acquisition and practice of professional and/or clinical skills in kinesiology.  
Prerequisites: KINE 199 (Aerobic Movement); senior classification; admission to the professional phase; approval of instructor.

KINE 484 Internship in Kinesiology  
Credits 0 to 12. 0 to 12 Other Hours.  
Supervised internship with corporate fitness centers, rehabilitation centers, hospitals, recreation centers and similar agencies and organizations.  
Prerequisites: KINE 483; completion of all coursework.

KINE 485 Directed Studies  
Credits 0 to 4. 0 to 4 Other Hours.  
Special problems in kinesiology assigned to individual students or to groups.  
Prerequisites: Junior or senior classification; approval of instructor.

KINE 489 Special Topics in...  
Credits 0 to 4. 0 to 4 Lecture Hours. 0 to 4 Lab Hours.  
Selected topics in an identified area of kinesiology. May be repeated for credit.

KINE 490 Research  
Credits 0 to 4. 0 to 4 Other Hours.  
Research conducted under the direction of faculty member in kinesiology. May be repeated 4 times for credit.  
Prerequisites: Junior or senior classification and approval of instructor.

KINE 491 Seminar  
Credit 1. 1 Lecture Hour.  
Knack students with current research and the research process in their chosen field of study (kinesiology). May be taken four times for credit. Must be taken on a satisfactory/unsatisfactory basis.  
Prerequisites: Admission to professional phase of program or approval of instructor; junior or senior classification.

Cross Listing: HEFB 222/KNFB 222.

KNFB 222/HEFB 222 Teaching and Schooling in Modern Society  
Credits 3. 2 Lecture Hours. 3 Lab Hours.  
Developing an understanding of students in multiple settings and levels; development, structure, history, finance, and management of schools in a democratic society; philosophical, ethical and moral dimensions of teaching; professional role of teacher.  
Prerequisite: Majors only; junior or senior classification.

KNFB 315 Elementary School Physical Activities  
Credits 3. 2 Lecture Hours. 2 Lab Hours.  
Physical activities, materials and curriculum in elementary schools.  
Prerequisites: Junior or senior classification; admission to the professional phase of program.
KNFB 324/HEFB 324 Technology and Teaching Skills for the 21st Century Learner
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Preparation of future Health and Physical Education teachers with practical skills related to: technology in the classroom/gymnasium, strategies for addressing urban education and English language learners, liability, management and classroom discipline, development of professional communication skills and time management; includes field based experiences in diverse classroom settings.
Prerequisites: KNFB 222/HEFB 222; junior or senior classification; admission to the professional phase of program.
Cross Listing: HEBF 324/KNFB 324.

LAND 112 Landscape Architectural Communications II
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Introduce fundamental teaching skills and theories necessary for preparing reflective teachers; examine classroom management, learning strategies and assessment techniques; classroom lectures combined with field-based experiences to link theory into practice.
Prerequisites: LAND 324/HEFB 324, admission to professional phase of program; junior or senior classification.
Cross Listing: HEBF 325/KNFB 325.

KNFB 416 Middle and Secondary School Physical Activities Credits 3. 2 Lecture Hours. 2 Lab Hours.
Physical activities, teaching strategies, media techniques and curriculum in middle and secondary schools.
Prerequisites: Admission to professional phase of program; approved acceptance to field experience.

KNFB 450/HEFB 450 Supervised Student Teaching Credits 6. 6 Other Hours.
Observation and participation in an accredited public school classroom; techniques of teaching student's teaching fields, and appropriate instructional strategies for assigned student population.
Prerequisites: Admission to professional phase of program and to student teaching.
Cross Listing: HEBF 450/KNFB 450.

LAND - Landscape Architecture (LAND)

LAND 101 Introduction to Landscape Architectural Practice Credit 1. 1 Lecture Hour.
Explores and evaluates the diversity of landscape architectural practice; defines the traditional practice forms and examines evolving and boundary expanding opportunities for future practice; introduces the departmental curriculum and faculty.

LAND 111 Landscape Architecture Communications I
Credits 3. 2 Lecture Hours. 4 Lab Hours.
Introduction to basic drafting and drawing required for landscape architecture projects; introduction to basic concepts, principles of graphic composition and pencil sketching techniques.

LAND 112 Landscape Architectural Communications II
Credits 3. 2 Lecture Hours. 4 Lab Hours.
Advanced study in traditional and computer-based communication techniques in landscape architecture including studio explorations in concept and analysis graphics, color sketching, perspective drawing and rendering, desktop publishing, image capturing and manipulation, and compilation of graphic presentations; lecture, demonstrations and studio assignments.
Prerequisite: LAND 111 or approval of instructor.

LAND 211 Landscape Design I
Credits 4. 2 Lecture Hours. 7 Lab Hours.
Beginning studio course in land design; forces that produce useable three-dimensional site-space relationships; problems presented to give a basic knowledge, scope and application of landscape architecture design principles. Overnight field trip required.
Prerequisites: LAND 112; junior or senior classification or approval of instructor.

LAND 212 Landscape Design II
Credits 4. 2 Lecture Hours. 7 Lab Hours.
Continuation of LAND 318; basic design principles that combine natural systems (such as landform, water, vegetation, wildlife habitat, soils, climate) and human-built systems (such as roads, building utilities).
Prerequisites: LAND 211 and LAND 231.

LAND 231 Landscape Construction I
Credits 4. 2 Lecture Hours. 4 Lab Hours.
First construction studio course; aspects of site engineering and consideration of earth bound elements in land development; contours, landform, grading design, drainage principles, cut and fill computations, basic hydraulics and hydrology, stormwater management.
Prerequisite: Junior or senior classification or approval of instructor.

LAND 232 Landscape Construction II
Credits 3. 2 Lecture Hours. 4 Lab Hours.
Second construction studio course; essential construction materials and systems applied in landscape development; topics include statics and mechanics of simple structures; properties and procedures of wood, masonry and concrete construction; construction sequencing and material costs; development of a construction document package required. Construction observation field trips required.
Prerequisites: LAND 211 and LAND 231; junior or senior classification.*

LAND 240 History of Landscape Architecture
Credits 3. 3 Lecture Hours.
Introduction to history of land use, urban design and planning, and site design from prehistory to the present in Europe, Asia, Africa and Australia; contemporary issues in landscape architecture such as sustainability, ecological design, and professional roles, both historically and at present, with comparisons to American examples.
Prerequisite: Sophomore classification or higher.*

LAND 291 Research
Credits 1 to 4. 1 to 4 Other Hours.
Research conducted under the direction of faculty member in landscape architecture. May be repeated 2 times for credit.
Prerequisites: Freshman or sophomore classification and approval of instructor.

LAND 301 Landscape Architecture Theory
Credits 3. 3 Lecture Hours.
Landscape Architecture. Relevant theoretical discourse in landscape architecture, urban planning and urban design; urban theory, social and cultural theory; critical and creative thinking; ecological planning and design; process and sustainable development; environmental philosophy and environmental aesthetics.
Prerequisite: Junior classification or approval of instructor.

LAND 311 Landscape Design III
Credits 5. 2 Lecture Hours. 9 Lab Hours.
Design process, sustainable landscape design, synthesis and design refinement; problems to stimulate highly creative self-motivated results, design thinking to integrate behavioral settings into natural and/or built landscape systems.
Prerequisites: LAND 212 and LAND 232; junior or senior classification.*
LAND 340 Development of Landscape Architecture in North America
Credits 3. 3 Lecture Hours.
Interaction between people and the land in North America from first settlement to the present; settlement patterns, sustainable land use, urban design and plan, and site design in context of cultural, social, and technological factors; current issues in landscape architecture, landscape urbanism, and land-use planning.
Prerequisite: Senior and junior classification or approval of instructor.

LAND 351 Professional Practice
Credits 3. 3 Lecture Hours.
Procedures, management and ethical frameworks in which professional landscape architectural practice occurs; topics include forms of practice, employment, proposal preparation, fee and contract structures, project management, roles of the landscape architect, presentations and public participation, legal and ethical responsibilities.
Prerequisites: Senior classification; approval of instructor.

LAND 384 Summer Internship
Credits 0. 0 Lecture Hours.
Practical experience in an office of design allied professionals; 10 week internship with a minimum of 400 hours; continuous employment; departmental pre-approval through the department internship coordinator required. Must be taken on a satisfactory/unsatisfactory basis.
Prerequisites: Upper level classification and approval of internship coordinator; LAND 321.

LAND 395 Directed Studies
Credits 1 to 6. 1 to 6 Other Hours.
Special problems in various phases of landscape architecture assigned to individual students or to groups. Consultation and assigned collateral reading.
Prerequisite: Approval of department head.

LAND 399 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Selected topics in an identified field of landscape architecture. May be repeated for credit.

LAND 413 Professional Practice
Credits 3. 3 Lecture Hours.
Capstone studio; advanced study and research designed to go beyond the core design experience; introduction of issues, methodologies, tools and techniques developing in professional practice.
Prerequisites: LAND 312. *

LAND 421 Landscape Design VI
Credits 5. 2 Lecture Hours. 9 Lab Hours.
Continuation of LAND 311; land design projects of increased complexity and emphasis on sustainability, with site scale problems used to demonstrate complete design thought. One or more field trips may be required.
Prerequisite: LAND 311.*

LAND 331 Landscape Construction III
Credits 4. 2 Lecture Hours. 4 Lab Hours.
Third construction studio course; sustainable water management techniques in landscape development; theory, principles and techniques of low impact development; construction document preparation, working drawings, project layout and design; theory and principles of irrigation and lighting design. Field trips required.
Prerequisites: LAND 320 and LAND 330; junior or senior classification.*

LAND 431 Professional Practice
Credits 3. 3 Lecture Hours.
Procedures, management and ethical frameworks in which professional landscape architectural practice occurs; topics include forms of practice, employment, proposal preparation, fee and contract structures, project management, roles of the landscape architect, presentations and public participation, legal and ethical responsibilities.
Prerequisites: Senior classification; approval of instructor.

LAND 484 Summer Internship
Credits 0. 0 Lecture Hours.
Practical experience in an office of design allied professionals; 10 week internship with a minimum of 400 hours; continuous employment; departmental pre-approval through the department internship coordinator required. Must be taken on a satisfactory/unsatisfactory basis.
Prerequisites: Upper level classification and approval of internship coordinator; LAND 321.

LAND 485 Directed Studies
Credits 1 to 6. 1 to 6 Other Hours.
Special problems in various phases of landscape architecture assigned to individual students or to groups. Consultation and assigned collateral reading.
Prerequisite: Approval of department head.*

LAND 489 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Selected topics in an identified field of landscape architecture. May be repeated for credit.*
LBAR 300 Liberal Arts Study Abroad
Credits 1 to 18. 1 to 18 Other Hours.
For students in approved programs abroad. May be repeated for credit.
Prerequisites: Admission to approved program; approval of study abroad coordinator and academic dean.

LBAR 330 Introduction to International Study
Credits 1 to 3. 1 to 3 Lecture Hours.
Readings and research preparatory to participation in a summer or semester at an international site.
Prerequisite: Approval of the dean of liberal arts.

LBAR 331 Studies in European Civilization and Culture I
Credits 1 to 6. 1 to 6 Lecture Hours.
European civilization and culture as seen especially through literature, history, philosophy and the arts. To be taught only at an overseas site.
Prerequisite: LBAR 330 or approval of instructor.

LBAR 332 Studies in European Civilization and Culture II
Credits 1 to 6. 1 to 6 Lecture Hours.
European civilization and culture as seen especially through political, social and economic developments. To be taught only at an overseas site.
Prerequisite: LBAR 330 or approval of instructor.

LBAR 392 Cooperative Education: Liberal Arts
Credit 1. 1 Other Hour.
Educational work assignment for a student in a career-related field; supervision by the employer, co-op coordinator and course instructor; technical report approved by the course instructor required. To be taken on a satisfactory/unsatisfactory basis.
Prerequisite: Approval of college co-op coordinator.

LBAR 400 Topics in Liberal Arts II
Credits 3. 3 Lecture Hours.
Emphasis on developed critical thinking, international perspectives and scholarly research; capstone course in the Liberal Arts Cornerstone Program Honors Learning Community. May be taken 3 times for credit as topics will vary each semester.
Prerequisites: LBAR 200 and admission to College of Liberal Arts Cornerstone Learning Program Community.

LDEV - Land Development (LDEV)

LDEV 485 Directed Studies
Credits 1 to 6. 1 to 6 Other Hours.
Individual instruction in selected aspects of land development not adequately covered by other courses with stress on reports and readings in selected areas of land development.
Prerequisite: Junior classification or approval of instructor.

LDEV 489 Special Topics in...
Credits 1 to 6. 1 to 6 Lecture Hours.
Selected topics in an identified area of land and real estate development. May be repeated for credit.
Prerequisite: Junior classification or approval of instructor.

LING -Linguistics (LING)

LING 209/ENGL 209 Introduction to Linguistics
Credits 3. 3 Lecture Hours.
Nature of human language and of linguistics; includes an introduction to phonology, syntax, semantics and morphology and the role of spoken and written discourse in sustaining societal arrangements.
