The Department of Entomology offers both Doctor of Philosophy and thesis-option Master of Science degrees in entomology. Within these programs, subject matter areas include arthropod ecology, biological control, integrated pest management, molecular biology, physiology, genetics and toxicology, plant resistance, systematics, and urban, medical/veterinary, and forensic entomology. Students come into the field of entomology with diverse interests, science backgrounds and career goals. Students are able to tailor their education and research interests for the respective degree program with the help of their major advisor and advisory committees. Graduates from these programs have become prominent leaders in entomological research, application, education, and regulatory affairs of private sector and government arenas, as well as international agencies and foreign countries.

The department occupies five floors of the Minnie Belle Heep Building and nearby buildings that house the Entomology Research Laboratory, the Biological Control Laboratory and Urban, Veterinary and Medical Entomology. Texas A&M is only one of a select group of U.S. locations for a federally approved quarantine laboratory. In addition, the department houses the Rollins Urban and Structural Entomology Facility and the Janice & John G. Thomas Honey Bee Facility. The department also maintains three multi-room greenhouses. The Texas A&M University Insect Collection is housed in the Minnie Belle Heep Building. It is the largest and most actively growing arthropod collection in the Southwest, containing approximately three million specimens representing more than 45,000 identified species. Graduate students often work with faculty located at 8 research and extension centers across Texas, each addressing entomological issues unique to their particular geographic region.

Specific course requirements in entomology are dependent upon previous training and professional experience. Students are expected to demonstrate mastery in the core knowledge areas of 1) Insect Biodiversity, Systematics, and Insect Evolution; 2) Insect Ecology; 3) Insect Physiology, Toxicology & Genetics; 4) Applied Entomology on their graduate degree plans to be designed in consultation with their major advisor and advisory committee. Prospective students are directed to the Department of Entomology website for additional information.

Faculty

Adelman, Zachary N, Associate Professor
Department of Entomology
PhD, Colorado State University, 2000

Behmer, Spencer T, Professor
Department of Entomology
PhD, University of Arizona, 1998

Bernal, Julio S, Professor
Department of Entomology
PhD, University of California, Riverside, 1995

Bowling, Robert, Assistant Professor & Extension Specialist
Department of Entomology
PhD, Kansas State University, 2003

Brewer, Michael, Associate Professor
Department of Entomology
PhD, University of California, Riverside, 1990

Brundage, Adrienne L, Assistant Lecturer
Department of Entomology
PhD, Texas A&M University, 2012

Bynum, Edsel, Associate Professor & Extension Specialist
Department of Entomology
PhD, Texas Tech University, 2003

Coates, Craig J, Instructional Associate Professor
Department of Entomology
PhD, Australian National University, 1997

Coulson, Robert N, Professor
Department of Entomology
PhD, University of Georgia, 1969

Eubanks, Micky D, Professor
Department of Entomology
PhD, University of Maryland, 1997

Hamer, Gabriel L, Assistant Professor
Department of Entomology
PhD, Michigan State University, 2008

Heinz, Kevin M, Professor
Department of Entomology
PhD, University of California, Riverside, 1989

Johnston, J S, Professor
Department of Entomology
PhD, University of Arizona, 1972

Knutson, Allen, Professor & Extension Entomologist
Department of Entomology
PhD, Texas A&M University, 1987

McCutchen, Billy, AgriLife Professor
Department of Entomology
PhD, University of California, Davis, 1993

Medina, Raul F, Professor
Department of Entomology
PhD, University of Maryland, 2005

Merchant, Michael, Professor & Urban Extension Entomologist
Department of Entomology
PhD, Texas A&M University, 1989

Myles, Kevin M, Associate Professor
Department of Entomology
PhD, Colorado State University, 2003

Oswald, John D, Professor
Department of Entomology
PhD, Cornell University, 1991
Way, Michael Orrin, Professor  
Entomology  
PHD, University of California, Davis, 1982

Woolley, James B, Professor  
Entomology  
PHD, University of California, Riverside, 1983

Zhu Salzman, Keyan, Professor  
Entomology  
PHD, Purdue University, 1994

Masters

• Master of Science in Entomology (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/agriculture-life-sciences/entomology/ms)

Doctoral

• Doctor of Philosophy in Entomology (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/agriculture-life-sciences/entomology/phd)

Courses

ENTO 601 Principles of Systematic Entomology  
Credits 3. 3 Lecture Hours.  
An introduction to the principles and theory of systematic zoology and comparative biology including species concepts and speciation; methods for higher classification including phylogenetic systematics, phenetics and evolutionary taxonomy; introduction to zoological nomenclature.  
Prerequisite: Graduate classification in entomology or other biological sciences.

ENTO 602 Insect Biodiversity and Biology  
Credits 4. 3 Lecture Hours. 3 Lab Hours.  
Biodiversity and biology of the orders and selected families of insects; order-level morphology, family-level natural history and identification; field trips and an insect collection provide experience with insect collecting methods, specimen preparation techniques and field biology.  
Prerequisite: 6 hours of biological sciences.

ENTO 606 Quantitative Phylogenetics  
Credits 3. 2 Lecture Hours. 3 Lab Hours.  
Designed to provide the theory and tools required for inference of phylogenetic (evolutionary) relationships among biological taxa using various types of comparative data including morphological characters, biochemical and molecular characters, and DNA sequences; hands-on analysis of data using contemporary tools.  
Prerequisite: Entomology 601 or approval of instructor.  
Cross Listing: GENE 606 and WFSC 646.

ENTO 608 Principles of Biological Control  
Credits 3. 3 Lecture Hours.  
Theory and practices relating to the role and use of natural enemies in arthropod and plant population regulation; review and analysis of projects in biological control; biology and behavior of entomophagous arthropods.  
Prerequisite: ENTO 201 or equivalent or approval of instructor.
ENTO 610 Host Plant Resistance  
Credits 3. 3 Lecture Hours.  
Host plant resistance programs from the standpoint of the plant breeder,  
plant pathologist and entomologist; team taught with each discipline  
represented; roundtable discussion of assigned readings and lectures.  
Prerequisite: Approval of instructor.  
Cross Listing: SCSC 610 and PLPA 610.

ENTO 612 Insect Evolution  
Credits 3. 3 Lecture Hours.  
Review current and historical ideas about the phylogeny and evolution  
of the major groups of hexapods; includes evidential basis for  
hyphotheses of monophyly, competing phylogenetic hypotheses, major  
innovations and trends affecting the adaptive radiations of specific taxa,  
morphological character systems, and history of insect classification and  
the major character systems.  
Prerequisite: One semester of insect or invertebrate zoology.

ENTO 614 Insect Community Ecology  
Credits 3. 3 Lecture Hours.  
Provide a strong and contemporary foundation in insect population,  
community and evolutionary ecology; review historical and theoretical  
perspectives, current philosophies, approaches and a description of  
classic experiments used to test and modify theories on topics including  
insect herbivore-plant interactions; major biological forces affecting  
population dynamics and community structure (resource availability,  
competition, predation, mutualisms, etc.).  
Prerequisite: Graduate classification.

ENTO 615 Insect Physiology  
Credits 3. 3 Lecture Hours.  
Physiological processes of insects; metabolism, nutrition, neuro-  
edocrinology, nerve action, cell structure, respiration, circulation,  
excretion and flight; functional integration and regulatory processes of  
the total organism.  
Prerequisite: ENTO 306 or equivalent.

ENTO 617 Acarology  
Credits 4. 3 Lecture Hours. 3 Lab Hours.  
Systematics, morphology, physiology, and ecology of ticks and mites;  
management of acarine pests of humans, animals and plants; role of  
parasitic species in causation and transmission of diseases.  
Prerequisite: ENTO 208 or equivalent. (Offered in 2010-2011 and alternate  
years thereafter.)

ENTO 618 Medical and Veterinary Entomology  
Credits 4. 3 Lecture Hours. 3 Lab Hours.  
Taxonomy, biology and epidemiological role of insects that directly and/or  
indirectly affect the health and well-being of humans and animals.  
Prerequisite: ENTO 208 or equivalent. (Offered in 2010-2011 and alternate  
years thereafter.)

ENTO 619 Insect Toxicology  
Credits 3. 3 Lecture Hours.  
Classification and properties of major types of insecticides; chemistry,  
metabolism and mode of action; selectivity, use hazards, residues  
and resistance; environmental problems: biological magnification,  
persistence and effects on non-target organisms.  
Prerequisites: One course in organic chemistry and ENTO 615 or approval  
of instructor.

ENTO 621 Biology and Systematics of Entomophagous Insects  
Credits 3. 2 Lecture Hours. 3 Lab Hours.  
Systematics of entomophagous insects at the family level; collecting  
and rearing parasitoids from their hosts; emphasis on groups used in  
biological control.  
Prerequisites: ENTO 301 or approval of instructor. (Offered in 2010-2011  
and alternate years thereafter.)

ENTO 625/GEOG 625 Landscape Ecology  
Credits 3. 2 Lecture Hours. 3 Lab Hours.  
Study of structure, function and change in a heterogeneous land  
area composed of interacting ecosystems; examine basic ecological  
principles dealing with landscape structure.  
Prerequisite: Approval of instructor.  
Cross Listing: GEOG 625/ENTO 625.

ENTO 626/VIBS 626 Methods in Vector-Borne Disease Ecology  
Credits 3. 1 Lecture Hour. 5 Lab Hours.  
Methodological understanding of how vector-borne disease are studied  
in the field and the laboratory; hands-on exploration of the ecology  
of disease systems in a one health framework; concepts of design,  
execution, and presentation of research projects; outdoor field work and  
bio-safety level 2 laboratory.  
Cross Listing: VIBS 626/ENTO 626.

ENTO 628 Arthropod Genomes and Gene Expression  
Credits 3. 3 Lecture Hours.  
Introduction to the vocabulary and experimental procedures routinely  
used for molecular genetic studies using arthropod systems as model  
examples; discussion of germ-line transformation, transient gene  
expression, and the analysis of tissue-specific and genome-wide gene  
expression.  
Prerequisite: GENE 301 or equivalent.

ENTO 630 Insect Interactions with Microbes and Plant Hosts  
Credits 3. 3 Lecture Hours.  
Concepts on phytophagous piercing/sucking insects, their complex  
interactions with their host plants and associated microbes, including  
transmission of plant pathogens.  
Prerequisites: Graduate classification or approval of instructor.

ENTO 631 Principles of Integrated Pest Management  
Credits 3. 2 Lecture Hours. 3 Lab Hours.  
IPM history, conceptual foundations and basic principles; human  
practices aimed to reduce human carbon and chemical footprints on  
our planet; a series of pest control efforts towards a more sustainable  
agriculture.  
Prerequisite: Graduate classification or approval of instructor.

ENTO 645 Arthropods as Vectors of Plant Pathogens  
Credits 3. 3 Lecture Hours.  
Concepts on transmission of plant pathogens, discussion of  
transmission mechanisms, characteristics of insect vectors and their  
consequences for plant protection.  
Prerequisites: Graduate classification or approval of instructor.

ENTO 681 Seminar  
Credit 1. 1 Lecture Hour.  
Oral reports and discussions of current research and developments in  
entomology and related fields; designed to broaden understanding of  
problems in field and to stimulate research.  
Prerequisite: Graduate classification.
ENTO 684 Professional Internship  
Credits 1 to 4. 1 to 4 Other Hours.  
On-the-job training in the fields of pest identification, home and garden pest control, medical and veterinary pest control, and pest management of food and fiber crop pests.  
**Prerequisite:** Graduate classification in the Master of Agriculture program in economic entomology or plant protection.

ENTO 685 Directed Studies  
Credits 1 to 9. 1 to 9 Other Hours.  
Entomological problems not pertaining to thesis or dissertation. May be repeated for credit.  
**Prerequisites:** Graduate classification with major or minor in entomology; approval of department head.

ENTO 689 Special Topics in...  
Credits 1 to 4. 1 to 4 Lecture Hours. 0 to 4 Lab Hours.  
Selected topics in an identified area of entomology. May be repeated for credit.  
**Prerequisite:** Graduate classification.

ENTO 690 Theory of Research  
Credit 1. 1 Lecture Hour.  
Examination of concepts and theories in entomological research including applications of novel technologies and experimental approach.  
May be repeated for credit.  
**Prerequisite:** Graduate classification.

ENTO 691 Research  
Credits 1 to 23. 1 to 23 Other Hours.  
Research problems on taxonomy, life histories, biological control, ecology and physiology of insects, and toxicology of insecticides.  
**Prerequisite:** Graduate classification.
