DEPARTMENT OF EDUCATIONAL ADMINISTRATION AND HUMAN RESOURCE DEVELOPMENT

http://eahr.tamu.edu

Head: M. Torres

Graduate Advisor: K. Smith

The Department of Educational Administration and Human Resource Development prepares students to be leaders in school settings as well as non-school settings. Students receive a master’s or doctorate degree in either Educational Administration or Educational Human Resource Development, depending on the area of specialization. These areas include adult education; human resource development; higher education administration; public school administration; and student affairs administration in higher education.

The adult education area of study prepares students to be successful in various teaching related positions in business and industry, health care institutions, government agencies, and postsecondary education. The educational human resource development (HRD) program is the process of improving learning and performance in individual, group and organizational contexts through domains of expertise such as lifelong learning, career development, training and development and organizational development.

In the higher education administration specialization, students will be prepared for leadership roles in higher education administration, teaching and research. Emphases in a wide range of areas are provided to enable students to achieve desired professional goals. The student affairs administration in higher education (SAAHE) curriculum recognizes that personal development and learning occurs not only in the classroom, but also in other phases of a student’s life while enrolled in college. Student affairs supports the educational mission of the institution in furthering the total, ongoing development of students intellectually, emotionally, physically, socially, culturally and vocationally.

The public school administration specialization is designed to enhance the students’ leadership skills to manage complex educational systems and to train and supervise personnel. Both the master’s and doctoral degrees prepares candidates for culturally-responsive leadership, commitment to education, and the skills needed for advanced administrative practice in schools and districts.
