ADDT 800 Alcohol and Drug Dependency Treatment
Credits 1.25 to 10. 1.25 to 10 Other Hours.
The ADDT clerkship will expose students to clinical methods for
detection, diagnosis, triage, and intervention in a continuum of treatment
settings from specialized in-patient care to primary care to community
based self-help. It will introduce students to medication strategies for
substance abuse treatment while recognizing the primacy of behavioral
treatment for most addiction disorders. Students will review current
understanding of basic neurobiology common to all addictions along with
clinical presentation and specific management of different categories of
addictive drugs.
