ESSM ECOSYSTEM SCIENCE & MGMT

ESSM 600 Principles of Ecosystem Science and Management
Credits 3. 3 Lecture Hours.
Ecological foundations for sustained use of natural resources; climatic, edaphic, biotic and cultural factors in land resource allocation; land and cover viewed with respect to population dynamics, succession and climax, gradients and graduation, equilibria and imbalance.
Prerequisite: Graduate classification in agriculture or in allied subject.

ESSM 601 Ecosystem Stewardship
Credits 3. 3 Lecture Hours.
Integrates ecological concepts of resilience, sustainability, transformation and vulnerability within a framework of cosystem stewardship to support human well-being in a rapidly changing world; emphasizes social-ecological systems; adaptive management, and valuation of ecosystem services as mechanisms to strengthen management and policy recommendations supporting ecosystem stewardship.
Prerequisite: Graduate classification.

ESSM 604 Changing Natural Resource Policy
Credits 3. 3 Lecture Hours.
Process through which environmental policies are changed; theories of social and political change; using these theories along with original research on environmental policy problems to create and implement plans for changing environmental policies in communities.
Prerequisite: Graduate classification.

ESSM 605 The Research Process
Credits 2. 2 Lecture Hours.
Nature and objectives of graduate work, the scientific method and basic and applied research. Introduction to design of experiments and analysis of data; principles of organization of project proposals, theses and scientific reports.

ESSM 610 Rangeland Resource Management
Credits 3. 3 Lecture Hours.
Basic concepts and theories of rangeland resource management; trends in range classification, grazing management and improvement practices.
Prerequisite: Graduate classification in agriculture or related subject matter areas.

ESSM 611 Grazing Management and Range Nutrition
Credits 3. 3 Lecture Hours.
Nutritional ecology of domestic and wild herbivores on rangelands; vegetation and animal response to various grazing management practices; diet selection, quality, intake and supplementation of herbivores.

ESSM 612 Rangeland Vegetation Management
Credits 3. 3 Lecture Hours.
Principles of rangeland brush and weed control with mechanical, chemical, burning and biological methods; interrelationships of brush management with grazing, wildlife and watershed management; planning and economic analysis of range improvement practices.

ESSM 620 Plant and Range Ecology
Credits 3. 3 Lecture Hours.
Investigation of community/ecosystem/landscape distribution patterns, structure, spatial/temporal organization and function, paleoecology, ecological succession, disturbance regimes, ecological diversity and classification schemes. North American rangelands (grasslands, shrublands, deserts, wetlands, etc.) stressed but world ecosystems reviewed.
Prerequisites: RENR 205; RENR 215 or equivalent; graduate classification.

ESSM 621 Physiological Plant Ecology
Credits 3. 3 Lecture Hours.
Investigation of physiological mechanisms influencing ecological patterns and processes, including plant acclimation and adaptation in contrasting habitats, abiotic controls on species productivity and distribution, relevant conceptual and experimental approaches, and integration among ecological scales.
Prerequisites: RENR 205 or equivalent; graduate classification.

ESSM 622 Biogeochemistry of Terrestrial Ecosystems
Credits 3. 3 Lecture Hours.
Biogeochemical cycles of carbon, nitrogen, sulfur and phosphorus and their interaction with biotic and abiotic processes; biogeochemical processes investigated at the global level and in several types of terrestrial ecosystems; addressing global climate change, deforestation, acid precipitation, ozone depletion.
Prerequisites: RENR 205 or equivalent; graduate classification.

ESSM 624 Terrestrial Ecosystems and Global Change
Credits 3. 3 Lecture Hours.
Identify the physical and biological principles governing the structure and function of terrestrial ecosystems in an earth-system context; analyze how plants and microorganisms respond to environmental change and affect global carbon, nutrient, and water cycles; evaluate ecosystem response to global change, including rising carbon dioxide, climate warming, and human impacts.
Prerequisite: Graduate classification.

ESSM 626 Fire and Natural Resources Management
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Behavior and use of fire in the management of natural resources; principles underlying the role of weather, fuel characteristics and physical features of the environment related to development and implementation of fire plans.
Prerequisites: Graduate classification and approval of instructor.

ESSM 628 Wetland Delineation
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Prerequisite: Graduate classification or approval of instructor.
ESSM 630 Restoration Ecology
Credits 3. 3 Lecture Hours.
Review and discuss fundamental concepts, current literature, and
contemporary topics relating to ecological restoration. This includes the
theoretical development of restoration ecology and its application. The
relationship with conservation biology will be explored. The goal is to
inform, exchange views, and develop critical thinking skills through case
studies.
Prerequisite: Graduate classification.

ESSM 631 Ecological Restoration of Wetland and Riparian Systems
Credits 3. 2 Lecture Hours. 2 Lab Hours.
How wetland and riparian areas link terrestrial and aquatic systems and
function hydrologically and ecologically within watersheds; integrated
approaches for restoration of degraded wetland and riparian systems;
 improving water resources through vegetation management with a
special interest in rangelands.
Prerequisites: RENR 205 or equivalent and WFSC 428 or equivalent.

ESSM 633 Coastal Processes and Ecosystem Management
Credits 3. 3 Lecture Hours.
Exploration of current state of knowledge in coastal ecosystem
science with integrated view across sub-fields of coastal ecology,
geomorphology, biology, law, policy, economics and engineering; focus
on techniques to manage, construct and restore ecosystems.
Prerequisite: Graduate classification.

ESSM 635 Ecophyiology
Credits 3. 3 Lecture Hours.
Framework for understanding how plants and animals affect the water
cycle; examine and explore the water cycle in all of its aspects with the
idea of understanding how changes in land cover may influence the water
cycle; implications for both upland and riparian systems.
Prerequisite: Graduate classification.

ESSM 636 Wildland Watershed Management
Credits 3. 3 Lecture Hours.
Elements of watershed management and principles and practices of
wildland management for protection, maintenance and improvement of
water resources values; current literature and research advances.

ESSM 647 Range Grasses and Grasslands
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Basic concepts of grass structure and classification, recent advances
in agrostological research, genetic and ecological basis for patterns
of variation and evolution in grasses. Offered Spring Semester of even
numbered years.

ESSM 648 Coastal Processes and Ecosystem Management
Credits 3. 2 Lecture Hours. 4 Lab Hours.
Interpretation of plant morphologies for keying and the identification
of wetland plants from prime habitats; plant communities including
the plant’s adaptation to variation in salinity and soils; identification
of inconspicuous flowered plant species including sedges, rushes and
grasses.
Prerequisite: FLEEM 304 or approval of instructor. Offered Fall Semester
of even numbered years.

ESSM 651 Geographic Information System for Resource Management
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Geographic Information System (GIS) approach to the integration of
spatial and attribute data to study the capture, analysis, manipulation and
portrayal of natural resource data; examination of data types/formats, as
well as the integration of GIS with remote sensing and Global Positioning
System; laboratory includes extensive use of GIS applications to conduct
analyses of topics in natural resources.
Prerequisites: Graduate classification.
Cross Listing: BAEN 651 and RENR 651.

ESSM 652 Advanced Topics in Geographic Information Systems
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Advanced GIS topics with a focus on modeling actual GIS applications
including relational and database theory, design and implementation and
its connection to GIS; surface analysis with digital terrain models; and an
introduction to spatial statistics.
Prerequisite: ESSM 651 or BAEN 651.

ESSM 655 Remote Sensing of the Environment
Credits 3. 2 Lecture Hours. 1 Lab Hour.
Remote sensing for the management of renewable natural resources; use
of aerial photography and satellite imagery to detect, identify and monitor
forest, range and agricultural resources; utilize remotely sensed data as
input to computerized information management systems.
Prerequisite: Graduate classification.

ESSM 656 Advanced Remote Sensing
Credits 3. 2 Lecture Hours. 1 Lab Hour.
Advanced techniques for information extraction using airborne
and satellite imagery; active and passive sensors characteristics;
customizing and developing image processing tools for remote sensing
applications for a broad range of sensors and applications.
Prerequisites: ESSM 655, RENR 444, GEOG 651, GEOG 661.

ESSM 660 Landscape Analysis and Modeling
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Introduction to quantitative methods of landscape analysis and modeling
for applications in natural resource conservation and management;
quantification of landscape composition and configuration; spatial
statistical methods for characterizing landscape pattern; methods for
hypothesis testing with spatial data; landscape modeling approaches and
applications; current literature and software.
Prerequisite: Approval of instructor.

ESSM 663/SCSC 663 Applied Spatial Statistics
Credits 4. 3 Lecture Hours. 2 Lab Hours.
An introduction to the theory and practice of spatial statistics as applied
to the natural resources. Spatial analyses focusing primarily on ordinary
kriging, point processes, and lattice data.
Prerequisites: MATH 141, MATH 142; STAT 651; or equivalents;
ESSM 651 preferred.
Cross Listing: SCSC 663/ESSM 663.

ESSM 665 Computer Programming for Natural Resources Applications
Credits 3. 2 Lecture Hours. 2 Lab Hours.
An introduction to programming concepts and applications; elements
of Visual Basic programming including data types, control and program
structure; introduction to objects and object-oriented programming;
macro and applications development; automation of GIS programming
through the use of macros.
Prerequisites: Approval of instructor.
ESSM 671 Ecological Economics
Credits 3. 3 Lecture Hours.
Study of the relationships between ecosystems and economic systems; understanding the effects of human economic endeavors on ecological systems and how the ecological benefits and costs of such activities can be quantified and internalized.
Prerequisite: Graduate Classification.
Cross Listing: AGEC 659 and RENR 659.

ESSM 672/RENR 660 Environmental Impact Analysis for Renewable Natural Resources
Credits 3. 3 Lecture Hours.
Analysis and critique of contemporary environmental analysis methods in current use; environmental impact statements; national policies; political, social and legal ramifications as related to development and use of renewable natural resources.
Prerequisite: Graduate Classification.
Cross Listing: RENR 660/ESSM 672.

ESSM 676/RENR 650 Leadership, Development and Management of Environmental NGOs
Credits 3. 3 Lecture Hours.
Trends and increasing power of NGOs in environment and sustainable development; understanding of the organizational structures, functions, planning and management processes of environmental NGOs; technical skills and leadership qualities for careers with environmental NGOs.
Prerequisite: Graduate Classification.
Cross Listing: RENR 650/ESSM 676.

ESSM 681 Seminar
Credit 1. 1 Lecture Hour.
Reviews and discussions of current topics and advances in Ecosystem Science and Management.
Prerequisite: Graduate classification.

ESSM 684 Professional Internship
Credits 1 to 16. 1 to 16 Lecture Hours.
On-the-job training in fields of ecosystem science and management.
Prerequisite: Graduate classification in an ecosystem science and management major.

ESSM 685 Directed Studies
Credits 1 to 9. 1 to 9 Lecture Hours.
Investigations not included in student’s research for thesis or dissertation.
Prerequisite: Graduate majors or minors in Ecosystem Science and Management.

ESSM 689 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours. 0 to 4 Lab Hours.
Selected topics in an identified area of ecosystem science and management. May be repeated for credit.
Prerequisite: Graduate classification.

ESSM 691 Research
Credits 1 to 23. 1 to 23 Lecture Hours.
Research for thesis or dissertation.
Prerequisite: Graduate majors in Ecosystem Science and Management.
