MARB - MARINE BIOLOGY

MARB 603 Cetacean Behavior and Behavioral Ecology
Credits 4. 3 Lecture Hours. 3 Lab Hours.
Consists of lectures, discussions, and field trips on the social, breeding, foraging, and migratory behaviors of whales, dolphins, and porpoises. Emphasis is on the recent literature of animals in nature, although results from aquaria are also presented with comparisons to social strategies in the wild.
Prerequisite: Undergraduate or graduate level vertebrate biology course.

MARB 604 Behavioral Ecology of Marine Mammals and Seabirds of New Zealand
Credits 4. 3 Lecture Hours. 3 Lab Hours.
Ecology and behavior of marine birds and mammals of South Island, New Zealand; literature comparisons of marine vertebrates; emphasis is on animals in nature; laboratory experience of the animals from boats and shore.
Prerequisites: Graduate standing and permission of instructor.

MARB 605 Air Breathing Marine Vertebrate Research Techniques
Credits 3. 3 Lecture Hours.
Introductory and advanced descriptions and hands-on learning of photo-identification, theodolite, radio, satellite, and video-enhanced tracking, underwater remote sensing, acoustics, and other cutting edge research techniques.
Prerequisite: Graduate classification or approval of instructor.

MARB 606 Advanced Concepts in Marine Population Biology
Credits 3. 3 Lecture Hours.
Novel Approaches and concepts employed studying factors affecting recruitment, determining trophic relationships (e.g., stable isotopes), and the consequences, at various levels, of changes in abundance of marine populations, including ecological (community), population (Allee effects) and genetic (effective population size). Inference of population connectivity determined through the use of electronic tags and molecular techniques is also examined.
Prerequisite: B.S. Marine Biology or Marine Science or approval of instructor.

MARB 607 Research and Conservation in Greece-Dolphins, Fisheries and Cultural Heritage
Credits 4. 3 Lecture Hours. 2 Lab Hours.
Lectures, readings and labs on the ecology and behavior of the vertebrate fauna of Greece; laboratory hands-on experience of the marine environment from boats, readings, videos, interpretation and select major peer-review scientific papers and books.
Prerequisite: Approval of instructor.

MARB 610 Professional Development
Credits 3. 3 Lecture Hours.
Course will cover topics including proposal and manuscript development, the peer review process, proposal writing and speaking exercises, preparing oral and poster presentations, developing questions for quizzes and midterms, and library database management. Class discussions will include constructive critiques of participants’ experimental designs, analytical approaches and scientific writing.
Prerequisite: Graduate standing or permission of instructor.

MARB 615 Coastal Marine Biology and Geology of Alaska
Credits 3. 3 Lecture Hours.
The study of coastal marine biology and geology of south-central Alaska and participation in a behavioral ecological study of sea otters for 12 days at a remote field station in north-eastern Prince William Sound.
Prerequisite: Graduate classification and approval of instructor.

MARB 616 Introduction to Methods in Scientific Diving
Credits 3. 2 Lecture Hours. 3 Lab Hours.
This course prepares students to use SCUBA as a research tool for the marine sciences in compliance with University, American Academy of Underwater Sciences and Federal OSHA standards. Practical work in pool and open waters will complement academic experience and provide training towards scientific diver status.
Prerequisite: Advanced scuba certification.

MARB 617 Research Diving Methods
Credits 2. 6 Lab Hours.
Field experience in a wide range of research diving environments stressing dive planning and safety, buoyancy control, equipment configuration and scientific methodology in biological, physical, chemical, archaeological and geological sciences. Students will design, supervise and conduct independently developed scientific diving projects.
Prerequisite: MARB 616 or equivalent.

MARB 618 Marine Science of the Pacific Rim
Credits 3. 3 Lecture Hours.
Course intended for students interested in conducting research on the marine biology or fisheries of the Pacific Rim countries; tailored to specific interests of individual students; course involves directed readings, participation in the student's research project, discussions with the instructor, and final report for possible publication.
Prerequisite: Graduate status or approval of instructor.

MARB 620 Marine Biological Resources
Credits 3. 3 Lecture Hours.
An introduction to biological resources which can be recovered from the marine environment to provide food, biomass and materials, recreation, and employment to the coastal United States and other regions. With emphasis on fisheries and hatcheries, in: oceanic resources, coastal and estuarine resources, and mariculture. Natural and societal limitations to resource recovery are investigated, and environmental impacts are analyzed.
Prerequisites: (at least 3 of these) CHEM 102, BIOL 112, GEOL 104 and/or OCNG 251; graduate status or special approval.

MARB 633 Applied Bioinformatics
Credits 3. 3 Lecture Hours.
Fundamental concepts and methods in bioinformatics using sequence analysis and practical applications; includes biological databases, sequence and structure alignments, structural bioinformatics, gene prediction and genome analysis; emphasis on the understanding and application of these concepts.
Prerequisites: Graduate classification or approval of instructor.

MARB 635 Marine Invertebrate Zoology
Credits 4. 3 Lecture Hours. 3 Lab Hours.
General biology of marine invertebrate animals; morphology, evolution and systematics; laboratory stresses study of local fauna.
Prerequisite: Graduate classification.
MARB 640 Ecosystem Functions in Marine Environments
Credits 3. 3 Lecture Hours.
Advanced study of ecological processes in marine environments, with an emphasis on the investigation of the interactions between organisms and physical processes that regulate marine ecosystem functions.
Prerequisite: Graduate standing.

MARB 651 Shore and Estuarine Fishes of the Gulf Of Mexico
Credits 4. 2 Lecture Hours. 6 Lab Hours.
Taxonomy, ecology and zoogeography of fishes inhabiting estuarine and marine ecosystems of the northwestern Gulf of Mexico. Particular emphasis on community structure and factors affecting spatial and temporal abundance of fishes found along the Texas coast.
Prerequisites: MARB 311 or equivalent; approval of instructor.

MARB 654 Coastal Plant Ecology
Credits 3. 3 Lecture Hours. 3 Lab Hours.
Study of estuarine, coastal and dune plant communities and associated environmental factors affecting plants including the identification, distribution, ecological importance and management techniques of vascular plants in these communities.
Prerequisites: Graduate standing; approval of instructor.

MARB 655 Wetlands Ecology, Monitoring and Delineation
Credits 4. 3 Lecture Hours. 3 Lab Hours.
Wetlands Ecology, Monitoring, and Delineation. Study of the characteristics and importance of wetlands, and methods of delineating, monitoring and evaluating wetlands. Students will learn wetland plants, soils, hydrology, ecology, inhabiting animals, delineation techniques, laws, permits required for impacts, mitigation and management techniques.
Prerequisite: Graduate standing.

MARB 656 Tropical Marine Ecology
Credits 3. 1 Lecture Hour. 6 Lab Hours.
Topical Marine Ecology. Field oriented experience in coral reef, mangrove, sea grass, cave and other tropical marine ecosystems. Special emphasis will be placed on biodiversity, ecology and conservation issues specific to the Yucatan Peninsula of Mexico. This course will involve one week of course work in Galveston and a two-week field trip to Akumal on the Caribbean coast of Yucatan. Students will design, supervise and conduct an independently developed research project.
Prerequisite: Scuba Certification.

MARB 662 Biology of the Mollusca
Credits 3. 3 Lecture Hours. 3 Lab Hours.
Survey of mollusks including their morphology, ecology, physiology and reproduction. Emphasis on marine species of ecological and commercial importance.
Prerequisite: MARB 435 or MARB 665 or equivalent.

MARB 665 Biology of Invertebrates
Credits 4. 3 Lecture Hours. 3 Lab Hours.
Biology of Vertebrates. Morphology, biology and phylogeny of invertebrates. Topics may be either detailed discussions/dissections of specific organisms or comparative information on a process.
Prerequisites: MARB 435 or ZOOL 335 or equivalent; approval of instructor.

MARB 677 Biology of Marine Annelida
Credits 4. 3 Lecture Hours. 3 Lab Hours.
Survey of Marine Annelids including their behavior, organ systems physiology and reproduction. Emphasis on morphology and taxonomy of polychaetous annelids to enable students to move more rapidly and accurately analyze benthic assemblage data.
Prerequisites: MARB 435 or ZOOL 335 or equivalent; approval of instructor.

MARB 681 Seminar in Marine Biology
Credit 1. 1 Lecture Hour.
Detailed reports on specific topics within the field of marine biology. Students may register in no more than two sections of this course in a given semester.
Prerequisite: Graduate Standing.

MARB 684 Professional Internship
Credits 1 to 9. 1 to 9 Other Hours.
On the job training in the field of marine biology.
Prerequisites: Graduate standing; approval of instructor.

MARB 685 Directed Studies
Credits 1 to 6. 1 to 6 Other Hours.
Limited investigations in fields other than those chosen for the thesis or dissertation topic. May be repeated for credit.
Prerequisites: Graduate standing; approval of instructor.

MARB 689 Special Topics in
Credits 1 to 4. 3 Lecture Hours.
Selected topics in an identified area of marine biology.
Prerequisites: Graduate standing; approval of instructor.

MARB 691 Research for Thesis or Dissertation
Credits 1 to 9. 1 to 9 Other Hours.
MARB 691 is the designated field and/or laboratory research leading to the M.S. or Ph.D. degree. MARB 691 may be offered by any faculty member in MARB and may be offered as many times as necessary in a given semester. MARB 691 may be repeated for credit by a student.
Prerequisites: Graduate standing; approval of instructor.
