MSEN -MATERIALS SCIENCE & ENGR

MSEN 601 Fundamental Materials Science and Engineering
Credits 3. 3 Lecture Hours.
Prerequisite: Graduate classification.

MSEN 602 Physics of Materials
Credits 3. 3 Lecture Hours.
Understanding of modern molecular level description of underlying physico-chemical behavior and properties of materials; includes thermal, mechanical, kinetic (transport), electronic, magnetic and optical properties; rational basis for the synthesis, characterization and processing of such material, materials systems for engineering applications.
Prerequisite: MSEN 604, undergraduate quantum mechanics course, or approval of instructor.

MSEN 603 Fundamentals of Soft and Biomaterials
Credits 3. 3 Lecture Hours.
Introductory graduate-level survey on the general areas of soft materials and biomaterials; includes basic concepts of colloidal particle physics, polymer physics and chemistry, and general concepts in biomaterials.
Prerequisites: Undergraduate general chemistry course; graduate classification.

MSEN 604 Quantum Mechanics for Materials Scientists
Credits 3. 3 Lecture Hours.
Provides a background in quantum mechanics for graduate materials scientists or engineers with little or no quantum mechanics background. The following topics will be covered: origins of quantum theory, interpretation, Schroedinger equation and its applications, operator mechanics, approximation methods, angular momentum, the hydrogen atom, and quantum statistics.
Prerequisites: MATH 601, MATH 311 or approval of instructor; graduate classification.

MSEN 605 Field Theories in Materials Science
Credits 3. 3 Lecture Hours.
Field theory concepts to understand and quantify a wide range of material behaviors, including, transportable quantities; development of constitutive relations; linear response theory and Maxwell’s equations; deformation and motion of a continuum; Brownian motion; self-assembly and patterning within reaction-diffusion formulations; thermal and ion/charge transport; acoustic waves in solids; Fourier’s equations.
Prerequisites: Basic courses in materials science; graduate classification.

MSEN 606 Multifunctional Materials
Credits 3. 3 Lecture Hours.
In-depth analysis of multifunctional materials and composites, and their novel applications.
Prerequisites: MEMA 602/AERO 603/AERO 603/MEMA 602, MSEN 601.
Cross Listing: AERO 606 and MEMA 606.

MSEN 607/MEEN 607 Polymer Physical Properties
Credits 3. 3 Lecture Hours.
Macromolecular concepts; molecular weight characterization; solubility parameters; phase diagrams; viscoelasticity; rheology; thermal behavior; damage phenomena; morphology; crystallization; liquid crystallinity; nanocomposites.
Prerequisites: MEEN 222/MSEN 222 (or other intro to materials science course).
Cross Listing: MSEN 607/MEEN 607.

MSEN 608 Nanomechanics
Credits 3. 3 Lecture Hours.
Application of mechanics concepts to nano-scale behavior of materials. Review of continuum mechanics; Extensions to generalized continua; Nonlocal elasticity; Nano-scale plasticity. Focus on multi-scale modeling: Dislocation Dynamics; Quasi-Continuum method; Molecular dynamics with introductions to quantum mechanics and statistical mechanics.
Prerequisite: AERO 603/MEMA 602.
Cross Listing: AERO 608 and MEMA 608.

MSEN 610/MEMA 613 Principles of Composite Materials
Credits 3. 3 Lecture Hours.
Classification and characteristics of composite materials; micromechanical and macromechanical behavior of composite laminate; macromechanical behavior of laminates using classical laminate theory; interlaminar stresses and failure modes; structural design concepts, testing and manufacturing techniques.
Prerequisite: MEMA 602/AERO 603.
Cross Listing: MEMA 613/MSEN 610.

MSEN 612/BIOL 602 Fundamentals of Transmission Electron Microscopy
Credits 3. 2 Lecture Hours. 6 Lab Hours.
State-of-the-art fundamentals in TEM; theoretical background supporting a strong hands-on course component comprising specimen preparation and image acquisition/interpretation; practical experience to attain a proficiency level permitting independent operation of one of the transmission electron microscopes in the Microscopy and Imaging Center.
Prerequisite: Graduate classification or approval of instructor.
Cross Listing: BIOL 602/MSEN 612.

MSEN 613/BIOL 603 Advanced Transmission Electron Microscope (TEM) Methodologies in Life and Materials Science (TEM II)
Credits 3. 1 Lecture Hour. 6 Lab Hours.
Advanced TEM methodologies, including specimen preparation and TEM imaging/analysis techniques as applicable to both biological and material samples; theory designed to support a strong hands-on component comprising specimen preparation, different imaging/diffraction/spectroscopic techniques and data interpretation.
Prerequisite: BIOL 602/MSEN 612 or MSEN 612/BIOL 602.
Cross Listing: BIOL 603/MSEN 613.

Credits 2. 1 Lecture Hour. 3 Lab Hours.
Fundamentals of Scanning Electron Microscopy (SEM) and Environmental Scanning Electron Microscopy (ESEM). Provides biologists, material scientists and students from other disciplines with the techniques of operation of the scanning electron microscope (SEM) and the environmental SEM (ESEM) coupled with the appropriate theoretical background knowledge; individual instruction in support of their research endeavors involving SEM/ESEM.
Prerequisite: Graduate classification.
Cross Listing: BIOL 604/MSEN 614.
MSEN 616/MEEN 616 Surface Science  
Credits 3. 2 Lecture Hours. 2 Lab Hours.  
Properties of surfaces, principles of classic and contemporary surface characterization techniques, recent development and roles of surface science in advanced technology.  
Prerequisite: Graduate classification.  
Cross Listing: MEEN 616/MSEN 616.

MSEN 617 Crystallography and Crystal Structure Determination  
Credits 3. 3 Lecture Hours.  
Symmetry operations in point group and space group; reciprocal lattice and kinematical diffraction theory; crystal structure determination by X-ray diffraction and transmission electron microscopy (TEM).  
Prerequisites: Knowledge of calculus and vector algebra; graduate classification.

MSEN 618/MEEN 686 Composite Materials Processing and Performance  
Credits 3. 3 Lecture Hours.  
Fundamental science and design; processing and design interaction regarding multiphase composites; processing science, experimental characterization, laminate analysis; design structure and processing.  
Prerequisite: Elasticity, continuum mechanics, or equivalent; graduate classification.  
Cross Listing: MEEN 686/MSEN 618.

MSEN 619 Materials Modeling of Phase Transformation and Microstructural Evolution  
Credits 3. 3 Lecture Hours.  
Computer modeling and simulation of microstructural evolution during various phase transformation processes in solid materials, including spinodal decomposition, ordering, martensitic transformation, ferroelectric and ferromagnetic domain evolution, dislocation dynamics, and crack propagation.  
Prerequisites: Graduate classification and approval of instructor.

MSEN 620/MEEN 620 Kinetic Processes in Materials Science  
Credits 3. 3 Lecture Hours.  
Atomistic and mesoscale levels; foundation for microstructural evolution and behavior of materials; basic and irreversible thermodynamics; diffusion equations solutions; atomistic diffusion, nucleation; phase transformations: gas-solid, liquid-solid and solid-solid reactions; FiPy (finite volume solver for PDE) to simulate kinetic processes.  
Prerequisites: MEE 222/MSEN 222 or equivalent materials science course; preliminary general thermodynamics course is not necessary.  
Cross Listing: MEEN 620/MSEN 620.

MSEN 625/MEEN 625 Mechanical Behavior of Materials  
Credits 3. 3 Lecture Hours.  
Examination of deformation and microstructure mechanisms responsible for deformation and failure in metals; fatigue, creep, and fracture mechanisms of materials; emphasis on microstructural-mechanical property relationship.  
Prerequisite: Undergraduate-level materials science course.  
Cross Listing: MEEN 625/MSEN 625.

MSEN 626/MEEN 606 Polymers Laboratories  
Credits 3. 2 Lecture Hours. 3 Lab Hours.  
Introduction to basic experimental skills relating to polymers; experiments include polymerization, molecular weight determination, FTIR, tensile test, NMR, DSC, swelling index, viscosity, X-ray diffraction.  
Prerequisite: Graduate classification.  
Cross Listing: MEEN 606/MSEN 626.

MSEN 634 Nano-scale Phenomena in Polymeric Systems  
Credits 3. 3 Lecture Hours.  
Fundamental and practical knowledge related to nano-scale phenomena in polymeric systems; discussions and critiques on related research activities; preparation for nanotechnology related career.  
Prerequisite: Approval of instructor.

MSEN 635/MEEN 635 Flow and Fracture of Polymeric Solids  
Credits 3. 3 Lecture Hours.  
Relationship of molecular structure to flow and fracture in polymeric materials; introduction of viscoelastic fracture mechanics; micromechanisms of fracture including crazing; fatigue behavior of polymeric materials.  
Cross Listing: MEEN 635/MSEN 635.

MSEN 636 Damage Mechanics and Failure in Composite Materials  
Credits 3. 3 Lecture Hours.  
Mechanisms and models related to damage and failure in composite materials subjected to mechanical loads.  
Prerequisites: Courses in composite materials, elasticity; graduate classification.  
Cross Listing: AERO 616 and MEMA 616.

MSEN 640/MEEN 640 Thermodynamics in Materials Science  
Credits 3. 3 Lecture Hours.  
Use of thermodynamic methods to predict behavior of materials; codification of thermodynamic properties into simplified models; principles, methods, and models to generate accurate equilibrium maps through computational thermodynamics software; applications to bulk metallic, polymeric and ceramic materials, defects, thin films, electrochemistry, magnetism.  
Prerequisites: MEE 222/MSEN 222 or equivalent; graduate classification.  
Cross Listing: MEEN 640/MSEN 640.

MSEN 641 Plasticity Theory  
Credits 3. 3 Lecture Hours.  
Theory of plastic yield and flow of two and three-dimensional bodies; classical plasticity theories, unified viscoplastic theories, numerical considerations; applications and comparisons of theory to experiment.  
Prerequisite: MEMA 602/AERO 603.  
Cross Listing: MEEN 666 and MEMA 641.

MSEN 643 Materials Electrochemistry and Corrosion  
Credits 3. 3 Lecture Hours.  
Survey of thermodynamic and kinetic fundamentals of electrochemistry; multiscale materials corrosion mechanisms; details of interfacial aqueous electrochemical mechanisms and the environmental effects when materials are exposed to different conditions.  
Prerequisite: Grade of C or better in MSEN 601; or approval of instructor.

MSEN 644 Corrosion and Electrochemistry Lab  
Credits 3. 2 Lecture Hours. 3 Lab Hours.  
Laboratory practice and principles for corrosion and electrochemistry methods; design, carry out and analyze a series of labs illustrating the most important techniques in the field; builds to an open-ended corrosion engineering problem resulting in preparation of a technical report for a hypothetical client.  
Prerequisite: Grade of C or better in MSEN 643; or approval of instructor.
MSEN 645/AERO 645 Failure Mechanics of Engineering Materials
Credits 3. 3 Lecture Hours.
Introduction and integration of key experimental, theoretical and computational aspects of failure in engineering materials, including metals, alloys and polymers; brittle fracture, ductile fracture and brittle-to-ductile transitions.

Prerequisites: Graduate classification; MSEN 601.

Cross Listing: AERO 645/MSEN 645.

MSEN 646 Corrosion Prevention and Control Methods
Credits 3. 3 Lecture Hours.
Cathodic protection and coatings; functional engineering approach to controlling and preventing aqueous corrosion; impressed current, galvanic anodes, organic, inorganic and hybrid coatings; case studies in oil and gas, energy, automotive and different industries.

Prerequisite: Grade of C or better in MSEN 643; or approval of instructor.

MSEN 655 Materials Design Studio
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Project-driven studio based on the integration of informatics and engineering systems design to address problems in materials discovery and development; projects derived from real industry-driven needs.

Prerequisites: Grade of C or better in ECEN 769/MSEN 660 or MSEN 660/ECEN 769, or MSEN 601 and MEEN 601, or equivalent; or approval of instructor.

MSEN 656/MEEF 656 Mechanical and Physical Properties of Thin Films
Credits 3. 3 Lecture Hours.
Mechanical properties (hardness, stress, strain, delamination, fracture) of films; nanomechanical testing techniques; electrical properties of thin films; electrical properties measurement techniques; magnetic properties of films; magnetic properties measurement techniques; laboratory includes (1) thin film fabrication (sputtering, PVD); (2) nanomechanical testing; (3) electrical/magnetic measurement.

Prerequisite: MEEN 222/MSE 601, or basic materials science background.

Cross Listing: MEEN 656/MSE 656.

MSEN 657 Multiscale Modeling in Materials
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Introduction to a wide range of computational methods to simulate materials behavior at multiple scales.

Prerequisite: Approval of instructor.

MSEN 658/MEEF 658 Fundamentals of Ceramics
Credits 3. 3 Lecture Hours.
Atomic bonding; crystalline and glassy structure; phase equilibria and ceramic reactions; mechanical, electrical, thermal, dielectric, magnetic, and optical properties; ceramic processing.

Prerequisite: MEEN 222/MSE 622 or equivalent or approval of instructor.

Cross Listing: MEEN 658/MSE 658.

MSEN 659 Materials Design ePortfolio
Credits 0. 0 Other Hours.
Capture and reflect upon components of what has been learned; why it matters within an electronic portfolio aligned with learning outcomes of the interdisciplinary program.

Prerequisites: Grade of C or better in ECEN 769/MSEN 660, MSEN 660/ECEN 769, or MSEN 601 and MEEN 601, or equivalent; MSEN 655 or concurrent enrollment; or approval of instructor.

MSEN 660/ECEN 769 Materials Informatics
Credits 3. 3 Lecture Hours.
Use of informatics approaches to establish quantitative structure-property relations (QSPRs) in materials and materials systems; basic concepts of QSPRs and probability, supervised learning, unsupervised learning, optimal prediction and applications in materials discovery.

Prerequisite: Approval of instructor.

Cross Listing: ECEN 769/MSEN 660.

MSEN 666 Nanoindentation and Small-Scale Contact Mechanics
Credits 3. 3 Lecture Hours.
Basic principles of elastic and plastic contact as they determine hardness and influence the measurement of mechanical properties by load and depth sensing indentation methods; application of nanoindentation techniques to small scale mechanical characterization of solid materials.

Prerequisites: Grade of C or better in MSEN 320, MEE 467, MSEN 625/MEEN 625, MSEN 625/MEEN 625, AERO 603/MEEM 602, MEEM 602/AERO 603, or CVEN 613; or approval of instructor.

MSEN 670 Computational Materials Science and Engineering
Credits 3. 3 Lecture Hours.
Modern methods of computational modeling and simulation of materials properties and phenomena, including synthesis, characterization, and processing of materials, structures and devices; quantum, classical, and statistical mechanical methods, including semi-empirical atomic and molecular-scale simulations, and other modeling techniques using macroscopic input.

Prerequisites: Approval of instructor; graduate classification.

Cross Listing: CHEN 670 and MEEM 670.

MSEN 681 Seminar
Credit 1. 1 Lecture Hour.
Selected research topics in materials science and engineering presented by faculty, students, and outside speakers.

Prerequisite: Graduate classification.

MSEN 684 Professional Internship
Credits 1 to 9. 1 to 9 Other Hours.
Directed internship in an industrial or laboratory setting under the supervision of successful, experienced personnel; work related to the student’s career aspirations and areas of specialization. May be taken 2 times for credit.

Prerequisite: Graduate classification.

MSEN 685 Directed Studies
Credits 1 to 12. 1 to 12 Other Hours.
Special topics not within the scope of thesis research and not covered by other formal courses.

Prerequisite: Graduate classification.

MSEN 689 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours. 1 to 4 Lab Hours.
Selected topics in an identified area of materials science and engineering. Potential topics include: advanced phase transformations, advanced materials and processing, nanomaterials and nanotechnologies, computational modeling of materials, advanced techniques of spectroscopy, surface and interface phenomena, thin film processing, ceramic engineering, organic materials for electronic and photonic devices, biomedical microdevices, materials fabrication, processing and fabrication of semiconductors, and materials and processing for MEMS. May be repeated for credit.

Prerequisite: Approval of instructor.
MSEN 691 Research
Credits 1 to 23. 1 to 23 Other Hours.
Research toward thesis or dissertation.
