Credit 1-4. Study of selected topics in an identified area of marine biology.  
Prerequisite: Junior or senior classification or approval of instructor.

MARB 491 Research in Marine Biology  
Credits 0 to 4. 0 to 4 Other Hours.  
Credit 0-4. Research conducted under the direction of faculty member in Marine Biology. May be repeated 2 times for credit. Please see academic advisor in department. Registration in multiple sections of this course is possible within a given semester provided that the per semester credit hour limit is not exceeded.  
Prerequisites: Junior or senior classification and approval of instructor.

MARE - Marine Engr Technology (MARE)

MARE 100 Marine Engineering Fundamentals  
Credits 3. 2 Lecture Hours. 3 Lab Hours.  
A study of basic marine engineering systems, with emphasis on propulsion plants. Introduction to propulsion plant machinery and shipboard safety practices and equipment; offshore oil production; subsea technologies; petroleum product transport and refinery.
MARE 180 Basic Machine Shop Techniques  
Credits 1. 3 Lab Hours.  
Safety, care of machines and hand-tools, cutting speeds and feeds, measuring instruments, gauging, standard machine tool work in metals, layouts, drilling, tapping, threading, vertical and horizontal milling and shaving.

MARE 200 Basic Operations  
Credits 4. 4 Lecture Hours.  
Practical application of student’s classroom studies while at sea on training ship during sea-training period. Student required to complete several projects relating to engineering plant of ship.  
Prerequisite: NAUT 104.

MARE 202 Marine Thermodynamics  
Credits 3. 3 Lecture Hours.  
Energy Concepts; First and second law of thermodynamics; Carnot and Rankine principles and reversible heat cycles; Properties of processes of vapors; vapor-power cycles and vapor refrigeration cycles.  
Prerequisites: MARE 100, MATH 152 or MATH 161 or concurrent enrollment.

MARE 205 Engineering Mechanics I  
Credits 3. 3 Lecture Hours.  
Statics, basic vector operations, mechanics of particles and rigid bodies. Center of gravity, analysis of structures, friction, moments of inertia.  
Prerequisites: MATH 151, PHYS 218.

MARE 206 Engineering Mechanics II  
Credits 3. 3 Lecture Hours.  
Dynamics; scalar and vector solutions of relative linear velocities and acceleration; kinetics; dynamics of translation and rotation; work; energy; impact; momentum.  
Prerequisite: MARE 205.

MARE 207 Electrical Power I  
Credits 3. 3 Lecture Hours.  
Application of circuit analysis principles to DC and AC circuits having sources and passive inductors, resistors and capacitors; electrical instrumentation; power and voltage/current phase relationships in AC circuits; balanced three-phase AC power circuits; cable sizing.  
Prerequisites: MATH 151 and PHYS 208.

MARE 209 Mechanics of Materials  
Credits 3. 2 Lecture Hours. 3 Lab Hours.  
Introduction to the study of stresses, strains, and deformation of a solid body which results when static forces are applied. Transformation of stresses and strains, torsion, beam deflection, and combined loadings are discussed.  
Prerequisite: MARE 205.

MARE 211 Steam Propulsion Plants  
Credits 3. 2 Lecture Hours. 3 Lab Hours.  
Fossil fuel steam generators, shipboard propulsion turbines and condensers, reduction gears, line shafting, internal fittings and fluid flow paths, automatic controls, regulatory requirements for safety device settings, system tests and inspections, boiler water/feed water test and treatment, turbine/reduction gear lubrication, computer aided heat balances, parametric analysis of plant performance.  
Prerequisite: MATH 152 or 161.

MARE 242 Manufacturing Methods I  
Credits 2. 1 Lecture Hour. 3 Lab Hours.  
(1-3) Introduction to manufacturing methods used in marine industries emphasizing fabrication techniques including oxy-acetylene cutting and welding, brazing, arc welding, pipe welding and sheet metal fabrication. Laboratory exercises will develop the knowledge and skills needed to perform fabrication operations, routine maintenance and emergency repairs of marine engineering structures and systems.

MARE 243 Manufacturing Methods II  
Credit 1. 0 Lecture Hours. 3 Lab Hours.  
Continued introduction to manufacturing methods used in marine industries including machine, foundry and forge work and other manufacturing technologies. Laboratory emphasizes machine shop practices including safety, use and care of machine and hand tools; measuring instruments, layout, gauging, cutting speeds and feeds, drilling, tapping, threading, turning and milling.  
Prerequisite: Approval of Instructor.

MARE 261 Engineering Analysis  
Credits 3. 3 Lecture Hours.  
Review of mathematical concepts previously studied (e.g., complex quantities, vectors and calculus), coupled with study of advanced concepts (e.g., differential equations, Laplace Transforms, statistics and numerical methods) with a view to emphasize applications in nuclear engineering, electrical engineering, thermodynamics, heat transfer and turbine theory.  
Prerequisite: MATH 152 or 161.

MARE 285 Directed Studies  
Credits 1 to 4. 1 to 4 Other Hours.  
Credit 1-4 each semester. Special problems in marine engineering technology not covered by any other course in the curriculum. Work may be in either theory or laboratory.  
Prerequisite: Approval of department head.

MARE 289 Special Topics  
Credits 1 to 5. 0 to 5 Lecture Hours. 3 to 5 Lab Hours.  
Credit 1-4 each semester. Selected topics in an identified area of marine engineering technology. May be repeated for credit.  
Prerequisite: Approval of instructor.

MARE 300 Intermediate Operations  
Credits 4. 4 Lecture Hours.  
Intermediate Operations. Training program for second sea-training period. Sea project required of each student under supervision of officer-instructors. Lifeboat and safety training.  
Prerequisite: Junior or senior classification or approval of instructor.

MARE 303 Marine Thermodynamics  
Credits 3. 3 Lecture Hours.  
Prerequisites: MATH 161. Junior or senior classification or approval of instructor.

MARE 305 Fluid Mechanics Theory  
Credits 4. 3 Lecture Hours. 2 Lab Hours.  
Theory of incompressible and compressible fluid flow, introduction to fluid power systems and controls, and dynamics of turbomachinery. Mathematical analysis of piping systems to determine pump head, system resistance, and pipe sizing optimization. Topics include physical properties of fluids, continuity equation, Bernoulli’s Equation, Darcy’s Equation, series and parallel flow, relative roughness, friction factors, dimensional analysis, and laws of similitude.  
Prerequisite: Junior or senior classification or approval of instructor.
MARE 306 Electrical Power II  
Credits 3. 2 Lecture Hours. 3 Lab Hours.  
Electrical power generation and distribution; AC and DC rotating machinery; transformers; controllers and safety devices; operation, maintenance and repair procedures and practices; static converters AC/DC and DC/AC that are used in modern electric propulsion systems.  
Prerequisite: MARE 207.

MARE 307 Marine Electronics  
Credits 3. 2 Lecture Hours. 3 Lab Hours.  
Introduction to the theory of electronic circuits. Fundamentals and basic concepts of semiconductors; solid-state components; power supplies; amplifiers; inverters; rectifiers; oscillators; digital and analog integrated circuits. Application in automation, motor controllers, battery-charging systems, communications; and propulsion plant monitoring systems.  
Prerequisite: MARE 207.

MARE 309 Marine Construction Materials  
Credits 3. 2 Lecture Hours. 3 Lab Hours.  
Introduction to materials science and engineering, structural, property relationships; advanced manufacturing techniques from the point of view of marine applications such as subsea pipelines, ship hulls, etc.; corrosion and biofouling. Laboratory includes experimental testing of materials properties, materials syntheses and heat treatment techniques.  
Prerequisite: MARE 209.

MARE 311 Steam Propulsion Plants  
Credits 3. 2 Lecture Hours. 3 Lab Hours.  
Comprehensive study of fossil fuel steam generators, propulsion turbines and condensers, reduction gears, line shafting. Studies include internal fittings and fluid flow paths, automatic controls; regulatory requirements for safety device settings, and system tests and inspections. Additional topics include boiler water-feed water test and treatment, and turbine/reduction gear lubrication. Laboratory includes computer-aided heat balance and parametric analysis of plant performance.  
Prerequisites: MARE 303. Sophomore, junior or senior classification or approval of instructor.

MARE 312 Diesel Propulsion Plants  
Credits 3. 2 Lecture Hours. 3 Lab Hours.  
Marine Diesel Engines. Comprehensive study of diesel engines, thermodynamics of air standard cycles, actual compression ignition engine cycles, emissions and emission controls, fuel injection systems and turbo charging systems, engine material properties, operational parameters including forces and temperatures resulting from combustion and inertial dynamics. Laboratory includes computer-aided parametric analysis of engine performance and use of low-speed diesel propulsion plant simulator.  
Prerequisites: MARE 305, MARE313. Junior or senior classification or approval of instructor.

MARE 313 Heat Transfer  
Credits 3. 2 Lecture Hours. 3 Lab Hours.  
Introduction to heat transfer; basic heat transfer modes and different solution techniques; introduction to 1-D and 2-D heat conduction in transient and steady state conditions; fundamentals of convection heat transfer under different flow conditions; forced convection in internal and external flows; analysis and selection of heat exchangers; introduction to thermal radiation heat transfer.  
Prerequisites: MARE 261 and MARE 305 or concurrent enrollment.

MARE 314 Gas Turbine Power Generation  
Credits 3. 2 Lecture Hours. 3 Lab Hours.  
Application of the Brayton cycle to gas turbine power cycles, including ideal gas cycle analysis, compressor design and construction, gas turbine construction, operation and maintenance for marine and industrial installations.  
Prerequisites: MARE 202, MARE 205, MARE 309 or concurrent enrollment and permission of instructor.

MARE 350 Commercial Cruise Internship  
Credits 4. 4 Other Hours.  
Training program for second sea-training period; sea project required of each student under supervision of officer-instructors; lifeboat and safety training.  
Prerequisites: MARE 100, MARE 200, MART 103. Junior or senior classification or permission of MARR and MART department heads.

MARE 400 Advanced Operations  
Credits 4. 4 Lecture Hours.  
Training program for third sea-training period. At the end of this period each student will have achieved the knowledge and will have demonstrated the ability to take complete charge of a modern marine power plant while underway at sea.  
Prerequisite: Junior or senior classification or approval of instructor.

MARE 401 Marine Auxiliary Systems  
Credits 3. 2 Lecture Hours. 2 Lab Hours.  
Study of the principal shipboard auxiliary systems, including: auxiliary fired-boilers, sea water service, ballast, freshwater service, lubricating oil, fuel oil storage and transfer, distilling, and steering systems. Major components, operation and maintenance, and interrelationship with other auxiliary systems are covered. Additional topics include steam turbine, gas turbine, and diesel-driven electric power generators and support systems, as well as propulsion train power take-off type electric power generation systems.  
Prerequisites: MARE 305, 313. Junior or senior classification or approval of instructor.

MARE 402 Shipboard Automation and Control  
Credits 3. 3 Lecture Hours.  
Study of automation in marine power plants; including electronic and pneumatic proportional, integral and derivative control elements; applications in boiler combustion and water level control; engine speed control; remote sensing and performance monitoring systems.  
Prerequisites: MARE 307, 311, 312. Junior or senior classification or approval of instructor.

MARE 405 Fundamentals of Naval Architecture  
Credits 3. 2 Lecture Hours. 3 Lab Hours.  
Ship geometry and arrangement; ship-form calculations; intact and damaged stability; ships’ structure; fundamentals of resistance and propulsion; ship motion, maneuverability, and control; introduction to ship design, construction, and overhaul.  
Prerequisites: Junior or senior classification or approval of instructor.

MARE 431 Subsea Technology  
Credits 3. 3 Lecture Hours.  
Theory, concepts, and practices of subsea projects and operations in the offshore oil and gas industry; field development, drilling, architecture, installation, intervention, mooring systems, operations, flow assurance, chemistry, materials, classification, economics and risk management.  
Prerequisite: Junior or senior classification or approval of instructor.
MARE 434 Offshore Energy, Oil, and Gas Production
Credits 3. 3 Lecture Hours.
Orientation to the offshore and gas industry; petroleum exploration, production, and marketing; platform and floating production facilities; operations; classification of production systems; economics and risk management.
Prerequisite: Junior or senior classification or approval of instructor.

MARE 441 Engineering Economics and Project Management
Credits 3. 3 Lecture Hours.
Analysis of engineering economics and management, using costs and benefits of various engineering options. Topics include time value of money, cash flows, analysis techniques, interests rates, inflation, depreciation, optimization, statistics, network analysis and critical path programming.
Prerequisite: Junior or senior classification or advisor approval.

MARE 451 Senior Design Project I
Credits 2. 1 Lecture Hour. 3 Lab Hours.
Introduction to design, modeling, testing and validation processes. Design of equipment, components or systems for marine and related power generation applications. Complete design process including: definition of the problem, research for existing designs and related technologies, conceptualization and evaluation of alternatives, development of preliminary design, refining and generation of final design and documents.
Prerequisites: MARE 206, MARE 242, MARE 306, MARE 309, MARE 311, MARE 312, MARE 313, PHYS 208 (or concurrent enrollment) and senior classification.

MARE 452 Senior Design Project II
Credits 2. 1 Lecture Hour. 3 Lab Hours.
This course is a continuation of MARE 451. Development of theoretical, computational or experimental models using the design developed in MARE 451. Formulation, construction and/or fabrication work. Refining, experimenting and testing of models considering alternatives. Analyzing results and preparing and submitting design documents including a project report.
Prerequisite: MARE 451.

MARE 484 Undergraduate Internship
Credits 0 to 6. 0 to 6 Other Hours.
Supervised study with an approved power generator, either electrical, mechanical, or thermal power. Alternatively, studies can be with a research, manufacturing or repair facility whose primary mission is to support power generation.
Prerequisites: 2.5 GPR and completion of 300 level courses.

MARE 485 Directed Studies
Credits 1 to 8. 1 to 8 Other Hours.
Credit 1-8 each semester. Special problems in marine engineering technology not covered by any other course in the curriculum. Work may be in either theory or laboratory.
Prerequisites: Approval of department head. Junior or senior classification or approval of instructor.

MARE 489 Special Topics
Credits 1 to 4. 1 to 4 Lecture Hours.
Selected topics in an identified area of marine engineering technology. May be repeated for credit.
Prerequisites: Junior or senior classification or approval of instructor.

MARE 491 Research in Marine Engineering Technology
Credits 1 to 4. 1 to 4 Other Hours.
Research in Engineering Technology. Credit 1-4. Research conducted under the direction of faculty member in Marine Engineering Technology. May be repeated 2 times for credit. Please see academic advisor in department. Registration in multiple sections of this course is possible within a given semester provided that the per semester credit hour limit is not exceeded.
Prerequisites: Junior or senior classification and approval of instructor.

MARR - Marine Engr Technology (MARR)

MARR 101 Marine Engineering Fundamentals
Credits 2. 1 Lecture Hour. 3 Lab Hours.
A study of basic marine engineering systems, with emphasis on propulsion plants; propulsion plant machinery, watch standing organization and duties, shipboard safety practices and equipment.

MARR 102 Engine Room Resource Management and Dynamics
Credit 1. 0 Lecture Hours. 2 Lab Hours.
Marine engineering watch standing and operations, safety and security, effective resource management and control of engine room equipment, leadership and managerial skills.

MARR 200 Basic Operations
Credits 6. 6 Lecture Hours.
Practical application of student's classroom studies while at sea on training ship during sea-training period. Student required to complete several projects relating to engineering plant of ship.
Prerequisite: MARR 103.

MARR 207 Electrical Power I
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Application of circuit analysis principles to DC and AC circuits having sources and passive inductors, resistors, and capacitors; shipboard electrical instrumentation; power and voltage/current phase relationships in AC circuits; balanced three-phase AC power circuits, shipboard cable sizing. Prerequisites: MATH 151, PHYS 208.

MARR 211 Steam Propulsion Plants
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Fossil fuel steam generators. shipboard propulsion turbines and condensers, reduction gears, line shafting, internal fittings and fluid flow paths, automatic controls, marine regulatory requirements for safety device settings, system tests and inspections, boiler water/fee water test and treatment, turbine/reduction gear lubrication, compute aided heat balances, parametric analysis of plant performance.
Prerequisite: MARR 202.

MARR 300 Intermediate Operations
Credits 6. 6 Lecture Hours.
Training program for second sea-training period. Sea project required of each student under supervision of officer-instructors. Lifeboat and safety training.
Prerequisite: Junior or senior classification or approval of instructor.
MARR 306 Electrical Power II
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Electrical power generation and distribution; AC and DC rotating machinery; transformers; controllers and safety devices; shipboard operation, maintenance, and repair procedures and practices; static converters AC/DC and DC/AC used in shipboard electric propulsion plants.
Prerequisites: MARR 207. Junior or senior classification or approval of instructor.

MARR 307 Marine Electronics
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Theory of electronic circuits; fundamentals and basic concepts of semiconductors, solid-state components, power supplies, amplifiers, inverters, rectifiers, oscillators, and digital and analog integrated circuits; application in shipboard automation, motor controllers, battery charging systems, communications, and marine propulsion plant monitoring systems.
Prerequisites: MARR 207. Junior or senior classification or approval of instructor.

MARR 312 Marine Diesel Engines
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Comprehensive study of shipboard diesel engines; thermodynamics of air standard cycles; actual compression ignition engine cycles; emissions and emission controls; fuel injection and turbocharging systems; shipboard engine material properties, operational parameters including forces and temperatures resulting from combustion and inertial dynamics; laboratory includes computer-aided parametric analysis of engine performance and use of a low-speed marine diesel propulsion plant simulator.
Prerequisites: MARE 305, 313. Junior or senior classification or approval of instructor.

MARR 400 Advanced Operations
Credits 6. 6 Lecture Hours.
Training program for third sea-training period. At the end of this period each student will have achieved the knowledge and will have demonstrated the ability to take complete charge of a modern marine power plant while underway at sea.
Prerequisite: Junior or senior classification or approval of instructor.

MARR 401 Marine Auxiliary Systems
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Study of the principal shipboard auxiliary systems, including: auxiliary fired-boilers, sea water service, ballast, freshwater service, lubricating oil, fuel oil storage and transfer, distilling, and steering systems. Major components, operation and maintenance, and interrelationship with other auxiliary systems are covered. Additional topics include steam turbine, gas turbine, and diesel-driven electric power generators and support systems, as well as propulsion train power take-off type electric power generation systems.
Prerequisites: MARE 305, 313, Junior or senior classification or approval of instructor.

MARR 402 Shipboard Automation and Control
Credits 3. 3 Lecture Hours.
Study of automation in marine power plants, including electronic and pneumatic proportional, integral, and derivative control elements; applications in boiler combustion and water level control, engine speed control, and remote sensing and performance monitoring systems on seagoing vessels. Prerequisites: MARR 307, 311, 312. Junior or senior classification or approval of instructor.

MARR 451 Senior Capstone Project I
Credits 2. 1 Lecture Hour. 3 Lab Hours.
Design, modeling, testing and validation processes; design of equipment, components, or systems for seagoing vessels; use of design manuals, material/equipment specifications and industry regulations applicable to marine engineering technology.
Prerequisites: MARR 206, 242, 309, 313; MARR 306, 311, 312; PHYS 208. Senior classification.

MARR 452 Senior Capstone Project II
Credits 2. 1 Lecture Hour. 3 Lab Hours.
Continuation of MARR 451; implementation of ship-related project initiated and developed therein, which may include development of theoretical, computational or experimental models and/or formulation, construction, and fabrication work; refining, experimenting, and testing of models considering alternatives; analyzing results and preparing and submitting design documents including a project report.
Prerequisite: MARR 451.

MARS - Marine Science (MARS)

MARS 101 Marine Science Matters
Credit 1. 1 Lecture Hour.
A non-technical introduction to the field of marine sciences, including biology, ocean activities, and marine industries. Course includes lectures, seminars, outside speakers, and industrial contacts.

MARS 201 Marine Geography
Credits 3. 3 Lecture Hours.
Introduction to the physical and cultural patterns of the coastal zones of the world. Interrelationships between the physical forms and processes and the cultural patterns are used to analyze human use and abuse of the sea.

MARS 202 Coastal and Ocean Resources
Credits 3. 3 Lecture Hours.
Coastal and Ocean Resources. Resources from the ocean including food, minerals, transportation and recreation. Methods of recovery and utilization of resources from the ocean, efficiency and cost effectiveness. Provides a foundation for understanding the wealth of resources available from the ocean and its margins, to include the impact of human activity on these resources.

MARS 210 Marine Geography
Credits 3. 3 Lecture Hours.
A non-technical introduction to the field of marine sciences, including biology, ocean activities, and marine industries. Course includes lectures, seminars, outside speakers, and industrial contacts.

MARS 251 Oceanography Laboratory
Credit 1. 0 Lecture Hours. 3 Lab Hours.
Overview of the global ocean environment and the interrelated sub-disciplines; the important of the ocean for the earth’s ecosystems and human impact on the ocean; field work and boat trip, water and benthic sediment collection and analysis; navigation chart work.
Prerequisite: OCNG 251 or concurrent enrollment.

MARS 252 Introductory Marine Science Laboratory
Credit 1. 0 Lecture Hours. 3 Lab Hours.
Compilation and discussions of literature pertaining to topics in marine sciences. Emphasis placed upon preparation and presentation of a written report.
Prerequisite: Sophomore standing or approval of instructor.

MARS 280 Marine Science Matters
Credit 1. 1 Lecture Hour.
A non-technical introduction to the field of marine sciences, including biology, ocean activities, and marine industries. Course includes lectures, seminars, outside speakers, and industrial contacts.

MARS 281 Sophomore Seminar in Marine Sciences
Credit 1. 1 Lecture Hour.
Compilation and discussions of literature pertaining to topics in marine sciences. Emphasis placed upon preparation and presentation of a written report.
Prerequisite: Sophomore standing or approval of instructor.

MARS 285 Directed Studies
Credits 1 to 6. 1 to 6 Other Hours.
Credit 1-6 each semester. Special topics and problems suited to analysis by individuals or small groups concerning special aspects of marine sciences.
Prerequisite: Approval of department head.
MARS 289 Special Topics in Marine Sciences  
Credits 1 to 4. 1 to 4 Lecture Hours.  
Credit 1-4. Study of selected topics in an identified area of marine sciences.  
**Prerequisite:** Approval of instructor.

MARS 303 Computing and Data Display  
Credits 3. 2 Lecture Hours. 2 Lab Hours.  
Elements of programming and data display primarily through the MATLAB computing environment; includes an introduction to statistics and hypothesis testing with MATLAB.  
**Prerequisite:** Junior or senior classification or approval of instructor.

MARS 305 Environmental Micropalaeontology  
Credits 4. 3 Lecture Hours. 3 Lab Hours.  
Environmental Micropalaeontology. Major animal, plant and protist microfossils groups, ecology, biostratigraphy, paleoenvironmental and paleoclimatic utility, primary preperation techniques, basic microscopy, research design and dissemination. Coastal foraminifera, thecamoebians and ostracods emphasized. Field trips required.  
**Prerequisites:** GEOL 104. Junior or senior classification or approval of instructor.

MARS 306 Coastal Sedimentary Geology  
Credits 4. 3 Lecture Hours. 3 Lab Hours.  
A survey of modern coastal sedimentary systems, including principles of sedimentology and sediment analysis. The laboratory includes a large group field projects. Local field trips required.  
**Prerequisites:** GEOL 104. Junior or senior classification or approval of instructor.

MARS 310 Field Methods in Marine Sciences  
Credits 3. 3 Lecture Hours. 6 Lab Hours.  
Techniques of documenting collected materials, the methods of reconnaissence and the mapping of traverses in the major coastal environments. Sampling and recording techniques, interview procedures, and the use of maps and remotely sensed imagery will be introduced.  
**Prerequisites:** CHEM 102, PHYS 202 or PHYS 208, GEOL 104. Junior or senior classification or approval of instructor.

MARS 325 Introduction to GIS for Marine Sciences  
Credits 3. 2 Lecture Hours. 2 Lab Hours.  
Geographic Information Systems (GIS) are introduced for marine sciences and management. Basic use of software including creation of GIS models is covered. Creating, editing and querying GIS shape files is treated utilizing one of the standard GIS software packages such as ArcGIS.  
**Prerequisite:** Junior or senior classification or approval of instructor.

MARS 330 Petroleum Geology  
Credits 3. 3 Lecture Hours.  
Origin, migration and accumulation of petroleum. Reservoir rock, traps, accumulation and conditions, and subsurface methods.  
**Prerequisites:** GEOL 104. Junior or senior classification or approval of instructor.

MARS 340 Geochemistry  
Credits 3. 3 Lecture Hours.  
Chemical principles and processes that govern the behavior of geologic materials. Silica and carbonate low temperature equilibrium and kinetics.  
**Prerequisites:** CHEM 102, GEOL 104. Junior or senior classification or approval of instructor.

MARS 350 Advanced Computer Applications  
Credits 2. 1 Lecture Hour. 2 Lab Hours.  
Data manipulation, merging, selection, filtering and querying in Microsoft Office primarily using large real data sets. Introduction to GIS, MatLab and other software relevant to science and/or business applications. Discussion of algorithm development in structured and object oriented programming languages.

MARS 360 Biochemistry  
Credits 4. 4 Lecture Hours.  
General introductory biochemistry; structures of the four classes of biologically important molecules (proteins, carbohydrates, lipids and nucleotides); how these biomolecules are generated from molecular building blocks; relationship of biomolecule structure to biochemical reactivity such as kinetics and enzyme regulation; membrane phospholipids and glycoproteins and the structure and function of membranes; catabolic reaction pah ways of monosaccharides and fatty acids; oxidative phosphorylation and photosynthesis.  
**Prerequisites:** BIOL 111, BIOL 112, CHEM 228. Junior or senior classification or approval of instructor.

MARS 361 Marine Biochemistry Laboratory  
Credit 1. 3 Lab Hours.  
Selected methods used to characterize, purify, identify and isolate biomolecules. The laboratory is designed to complement the MARS 360 lecture.  
**Prerequisite:** MARS 360 or concurrent enrollment.

MARS 365 Integrated Marine Sciences Laboratory  
Credits 3. 1 Lecture Hour. 6 Lab Hours.  
Integrated lectures, field and laboratory exercises for data collection and analysis of physical, chemical, biological and geological measurements in ocean, coastal and estuarine environments.  
**Prerequisites:** MATH 142 or 152, PHYS 202 or PHYS 208, OCNG 251, MARS 252, CHEM 102 and CHEM 112, BIOL 112 and GEOL 101 and GEOL 102. Junior or senior classification or approval of instructor.

MARS 370/GEOG 370 Coastal Processes  
Credits 3. 3 Lecture Hours.  
Introduction to the coastal system, waves and wave dominated coasts, shoreline morphodynamics, tidal and lake coasts, long term coastal development, sea level changes, subtidal and beach ecosystems, coastal dunes and wetlands, structures and organizations, coastal management and coastal hazards.  
**Cross Listing:** GEOG 370/MARS 370.

MARS 380 Introduction to Physical Chemistry  
Credits 3. 3 Lecture Hours.  
**Prerequisites:** CHEM 102, MATH 151. Junior or senior classification or approval of instructor.

MARS 408 Estuarine and Coastal Hydrodynamics  
Credits 3. 3 Lecture Hours.  
Physical processes in estuarine and coastal environments in various time scales: turbulent, tidal and residual (subtidal); study of salts, suspended solids, nutrients and heat affected by water movement; physical, biogeochemical processes and mass transport.  
**Prerequisites:** MATH 251, PHYS 218, junior or senior classification or approval of instructor.
MARS 410 Physical Oceanography
Credits 3. 3 Lecture Hours.
Elements of the physics of the ocean; descriptive aspects and theoretical explanations of circulation, characteristic structure and waves.
Prerequisites: OCNG 251, MARS 252, MATH 152, PHYS 208, junior or senior classification or approval of instructor.

MARS 412 Remote Field Investigations in Marine Sciences
Credits 1 to 6. 1 to 6 Lecture Hours.
Credit 1-6. An overview of marine sciences in remote locations varying by instructor and selected topics; lectures on recent scientific papers, methods and concepts related to field area; individual projects; data collection; data analysis and presentation.
Prerequisite: Junior or senior classification or approval of instructor.

MARS 415 Remote Sensing Technology
Credits 3. 3 Lecture Hours.
An introduction to the uses of remote sensing technology in the marine sciences, including electromagnetic, acoustic, and seismic methods. Generation, transmission, and reception methods. Active and passive systems, multispectral techniques, and signal analysis systems.
Prerequisites: PHYS 202 or 208, BIOL 112. Junior or senior classification or approval of instructor.

MARS 423 Ecological Economics
Credits 3. 3 Lecture Hours.
An integrated study of management of ecology and economics; conceptual and professional economic and environmental policies; ethical concerns and economic benefits of nature to humans, human and nature's economies, and the complex connections between humans and nature with the valuing of ecosystems integrity.
Prerequisite: Junior or senior classification.

MARS 425 Coastal Wetlands Management
Credits 3. 3 Lecture Hours.
Wetlands management laws, regulations, wetland delineation and applications of Geographic Information System (GIS) to wetlands management. Biological species in wetlands delineation. Basic biogeochemical cycles and interactions in wetlands.
Prerequisites: BIOL 112, GEOL 104 and concurrent enrollment in MARS 426 or approval of instructor.

MARS 426 Coastal Wetlands Delineation Laboratory
Credit 1. 3 Lab Hours.
Coastal wetlands delineation, including mapping techniques, Geographic Information System (GIS) and theodolite. Biological species and biogeochemical factors in wetlands delineation.
Prerequisites: BIOL 112, GEOL 104 and concurrent registration in MARS 425 or approval of instructor.

MARS 428 Coastal Development and Human Health
Credits 3. 2 Lecture Hours. 2 Lab Hours.
(2-2) Exploration of public environmental health issues associated with urbanization in coastal areas. Topics address population pressures on coasts, infectious and chronic disease, the natural and built environment, toxicology, sanitation, forms and media of pollution, and the application of environmental health science to coastal zone management. Prerequisites: CHEM 102 or equivalent; MARS 210 or equivalent. Junior or senior classification or approval of instructor. CHEM 383 and MARS 325 are recommended but not required.

MARS 430 Geological Oceanography-Plate Tectonics
Credits 3. 3 Lecture Hours.
Geological Oceanography-Plate Tectonics. Understanding the complex interactions of the earth system and the critical role that geological oceanography plays in these interactions, specifically the plate tectonic aspects of geological oceanography. Prerequisites: GEOL 101, OCNG 251, junior or senior classification or approval of instructor.

MARS 431 Geological Oceanography-Earth's Climate
Credits 3. 3 Lecture Hours.
Geological Oceanography - Earth's Climate. Understanding the complex interactions of the earth system and the critical role that geological oceanography plays in these interactions, specifically the paleoceanographic/climate change aspects of geological oceanography.
Prerequisites: GEOL 101, OCNG 251, junior or senior classification or approval of instructor.

MARS 432 Peak Oil, Global Warming and Resource Scarcity
Credits 3. 3 Lecture Hours.
The concept of peak oil, resource depletion, and human-induced climate change and the broad consequences for food and water supplies, mortality rates, conflict, migration, and political stability; scientific/social/political debates surrounding these issues, and the individual/local/national/global options for living in a globally-warmed world with declining natural resources.
Prerequisites: Any two from GEOL 104, OCNG 251, MARS 280 or approval of instructor. Junior or senior classification.

MARS 435 Exploration Geophysics
Credits 3. 3 Lecture Hours.
Physiochemical properties of rocks and sediments. Seismic reflection and refraction principles applicable to offshore, coastal and onshore exploration. Determination of media velocity and stratigraphy from reflection and refraction studies in both marine and non-marine systems.
Prerequisites: PHYS 202 or PHYS 208, GEOL 104, MATH 151. Junior or senior classification or approval of instructor.

MARS 440 Chemical Oceanography
Credits 3. 3 Lecture Hours.
Composition of sea salt and dissolved material in the ocean; biogeochemistry and measurements of oxygen, nutrient and other major elements, trace metals and radioisotopes; formation, composition and alterations of detrital material and marine sediments and other chemical processes; simple models relating ocean chemistry to the circulation of masses of water.
Prerequisites: CHEM 102, OCNG 251, junior or senior classification or approval of instructor.

MARS 450 Principles of Marine Instrumental Analysis
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Fundamental principles and practical applications for state-of-the-art analytical instrumentation applied to marine and environmental science. Topics include atomic and molecular spectroscopy, gas and liquid chromatography, radiochemistry, x-ray spectroscopy, mass spectrometry and field instrumentation. Students work with instruments and make presentation on them to the class.
Prerequisites: CHEM 102 and 228, PHYS 202, MATH 131 or 151. Junior or senior classification or approval of instructor.

MARS 460 Capstone Undergraduate Research Experience I
Credit 1. 1 Lecture Hour.
Methodology for research outlines, organization and strategies; research ethics, writing and presentation of results.
Prerequisites: MARS 491 or concurrent enrollment, senior classification or approval of instructor.
MARS 461 Capstone Undergraduate Research Experience II
Credit 1. 1 Lecture Hour.
Research and scientific communications; development of a scientific abstract, poster presentation, oral presentation or written scientific paper.
Prerequisites: MARS 491 or concurrent enrollment, senior classification or approval of instructor.

MARS 470 Eco-Environmental Modeling
Credits 3. 3 Lecture Hours.
Biological components are in chemical and physical environments which are influenced by the bio-system and flows of energy, water and chemical species. Coupling to the complex atmospheric, aquatic and terrestrial systems is important. Modeling entails mathematical tools and the underlying science, focusing on scientific models, from the simplest to the elaborate.
Prerequisites: CHEM 102, BIOL 112 and MATH 151 or approval of instructor.

MARS 481 Seminar
Credit 1. 1 Lecture Hour.
Problem-oriented discussion session. Topics and reports selected for current relevance. May be repeated once only for credit.
Prerequisite: Junior or senior classification or approval of instructor.

MARS 484 Undergraduate Internship
Credits 0 to 6. 0 to 6 Other Hours.
Credit 0-6. Supervised study in a research or teaching laboratory within or outside of the Texas A&M University System. Student involvement is to consist of real-life learning or marine sciences research, teaching, management or a combination of these.
Prerequisites: Junior or senior classification or approval of instructor.

MARS 485 Directed Studies
Credits 1 to 6. 1 to 6 Other Hours.
Credit 1-6 each semester. Special topics and problems suited to analysis by individuals or small groups concerning special aspects of marine sciences.
Prerequisites: Junior or senior classification or approval of instructor.

MARS 488 Writing Intensive Directed Studies in Marine Sciences
Credits 1 to 6. 1 to 6 Other Hours.
Credit 1-6. A writing-intensive course leading to the equivalent of a mini thesis in an area of interest to the faculty and student; introduces students to the rigors of writing for publication in professional journals in their major.
Prerequisite: Junior or senior classification.

MARS 489 Special Topics in Marine Sciences
Credits 1 to 4. 1 to 4 Lecture Hours.
Credit 1-4. Study of selected topics in an identified area of marine sciences.
Prerequisite: Junior or senior classification or approval of instructor.

MARS 491 Research in Marine Sciences
Credits 0 to 4. 0 to 4 Other Hours.
Credit 0-4. Research conducted under the direction of faculty member in Marine Sciences. May be repeated 2 times for credit. Please see academic advisor in department. Registration in multiple sections of this course is possible within a given semester provided that the per semester credit hour limit is not exceeded.
Prerequisites: Junior or senior classification and approval of instructor.

MART - Marine Transportation (MART)

MART 103 Basic Safety and Lifeboatman Training
Credits 3. 2 Lecture Hours. 3 Lab Hours.
(STCW Course). Introduction to the maritime industry, ship types, nomenclature, cargoes and recent trends in the maritime industry. Practical lifeboat and lifesaving training for certification as Lifeboatman by the U.S. Coast Guard.

MART 200 Basic Communications, Navigation and Seamanship
Credits 4. 4 Lecture Hours.
(STCW Course). Practical application of student's classroom studies aboard training ship during first training cruise. Student completes basic projects in communications, navigation, seamanship and rules of the road.
Prerequisites: MART 103, 201, 203, 204, or permission of MART department head.

MART 201 Naval Architecture I
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Naval Architecture I. (STCW Course). Description of ship as self-sustaining unit. Shipbuilding nomenclature and dimensions, types of construction, and classification of merchant ships. Classification societies, shipbuilding materials and methods, and structural components of ships.
Prerequisite: MART 103 or approval of instructor.

MART 202 Naval Architecture II
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Naval Architecture II. (STCW Course). Ship's lines drawing and form calculations; principles of flotation and buoyancy; inclining experiments, free liquids, transverse stability; motion of ships in waves, seaway and dynamic loads, ship structure tests.
Prerequisite: MART 200 or NAUT 200, MART 201.

MART 203 Seamanship I
Credits 3. 2 Lecture Hours. 3 Lab Hours.
(STCW Course). Intermediate lifeboat, lifesaving and firefighting procedures. Practical use in lab of manila lines, wire, splicing, knots, block and tackle, cargo gear, anchoring, mooring, and steering gear operations. Introduction to the international rules of the road. Projects aboard merchant, research and offshore oil vessels in the ports of Galveston and Texas City.
Prerequisite: MART 103 or concurrent registration.

MART 204 Terrestrial Navigation
Credits 3. 2 Lecture Hours. 2 Lab Hours.
(STCW Course). Intermediate lifeboat, lifesaving and firefighting procedures. Practical use in lab of manila lines, wire, splicing, knots, block and tackle, cargo gear, anchoring, mooring, and steering gear operations. Introduction to the international rules of the road. Projects aboard merchant, research and offshore oil vessels in the ports of Galveston and Texas City.
Prerequisite: MART 103 or concurrent registration.

MART 205 Marine Surveying
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Fundamentals of marine surveying using the various types of maritime surveys; writing survey reports by meeting regulatory and industry standards for submission to maritime clients.
Prerequisites: MART 202 and MART 203 (MART majors); or MART 205 (MARA majors); or MARR 101 (MARR majors); or MARE 100 (MARR-NLO majors); or approval of instructor.
MART 285 Directed Studies
Credits 1 to 4. 1 to 4 Lecture Hours.
Credit 1-4. Directed study in problems in marine transportation not covered by other courses in the department.
Prerequisite: Approval of department head.

MART 289 Special Topics in Marine Transportation
Credits 1 to 4. 1 to 4 Lecture Hours.
Credit 1-3. Study of selected topics in an identified area of marine transportation or nautical science.
Prerequisite: Approval of department head.

MART 300 Intermediate Communications, Navigation and Seamanship
Credits 4. 4 Lecture Hours.
(STMW Course). Practical application of student's classroom studies aboard training ship during second training cruise. Student completes intermediate projects in communications, navigation, seamanship, and rules of the road. Thorough study made of U.S. Public Health requirements in first aid.
Prerequisites: MART 200 or NAUT 200, MART 202, 301, 303, 306, 312, 321, METR 302. Junior or senior classification or approval of MART department head.

MART 301 Seamanship II
Credits 3. 2 Lecture Hours. 3 Lab Hours.
(STMW Course). Mechanical appliances aboard ship, accident prevention, vessel sanitation, marine inspection laws and regulations, search and rescue procedures, communications.
Prerequisites: MART 203 or concurrent registration or approval of instructor.

MART 303 Celestial Navigation
Credits 3. 2 Lecture Hours. 3 Lab Hours.
(STMW Course). Full range of celestial navigation. Survey of nautical astronomy, sight reduction, sextants, compass error determination, and solutions of the navigational triangle by various methods.
Prerequisites: Junior or Senior classification. MART 200 or NAUT 200, 204 or permission of MART department head.

MART 304 Electronic Navigation
Credits 2. 1 Lecture Hour. 3 Lab Hours.
(STMW Course). Theory, operation and application of marine electronic navigation aids and systems; marine gyro compass, radio direction finder, Loran, Omega, Decca, satellite, echo sounder, Doppler and integrated navigation systems. Marine radar theory, operation and interpretation.
Prerequisites: MART 200 or NAUT 200, 204, 303, 306, 321 or approval of instructor.

MART 305 Ship Construction and Stability
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Shipbuilding nomenclature, dimensions, construction and classification. Classification societies, shipbuilding materials and methods, structural components. Ship's line drawing and form calculations; principles of flotation and buoyancy; inclining experiments; free surface; transverse stability; trim and longitudinal stability; motion of ships in waves, seaways and dynamic loads; ship's structure tests and propulsion; labs focus on manual and computer-based stability and trim calculations using standard industry-based software.
Prerequisites: Junior or senior classification. MART 103, PHYS 201 or PHYS 218 or approval of instructor.

MART 306 Radar/ARPA/ECDIS
Credits 4. 3 Lecture Hours. 3 Lab Hours.
(STCW Course). Introduction to the theory, operation and interpretation of marine radar and automatic radar plotting aids (ARPA) and Electronic Chart Display Systems (ECDIS). Student examined for U.S. Coast Guard Certification as "RADAR Observer" and for Standards of Training, Certification and Watchkeeping (STCW) Radar and ARPA endorsements. Minimum grade of 70% required for USCG and STCW endorsements.
Prerequisites: Junior or Senior classification. MART 200 or NAUT 200, PHYS 202 or 208 or approval of instructor.

MART 307 Global Maritime Distress Safety System
Credits 3. 2 Lecture Hours. 3 Lab Hours.
(STCW Course). Requirements, regulations, equipment, principles and hands-on operating procedures of each Global Maritime Distress Safety System subsystem, including: SARTS, EPIRBS NAVTEX, INMARSAT, SAFETYNET, VHF Survival Craft Transceivers, DSC, and HF Radiotelephone. USCG and FCC certification as GMDSS Operator and Maintainer. Minimum passing grade 75%.
Prerequisites: Junior or Senior classification. MART 300 or 350 or NAUT 300, PHYS 202 or 208 or approval of instructor.

MART 308 Fast Rescue Craft
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Search and rescue techniques through fast rescue craft maneuvers and team management; description of various rescue craft and U.S. Coast Guard "Fast Rescue Craft" Standard of Watchkeeping endorsement.
Prerequisites: MART 103, MART 303, MART 204, junior or senior classification or approval of instructor.

MART 309 Advanced Topics in Shipboard Operations
Credits 2. 2 Lecture Hours.
Advanced concepts and techniques related to navigation and cargo watch responsibilities on container, dry and liquid bulk and gas tank vessels, focusing on professional licensing.
Prerequisites: Junior or Senior classification. MART 300 or 350, or NAUT 300.

MART 311 Tug and Towing Operations
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Knowledge and theory associated with the safe and efficient operation of towing vessels, utilizing classroom discussion, on-board vessel training and vessel simulation; concepts of vessel construction, business operations and introduction to TOAR (Towing Operation Assessment Record) for U.S. Coast Guard. Prerequisites: MART 203, MART 301, MART 321, MART 306, junior or senior classification or approval of instructor.

MART 312 Marine Cargo Operations I
Credits 3. 3 Lecture Hours.
Prerequisites: Junior or Senior classification. MART 200 or NAUT 200, 301 or concurrent registration or approval of instructor.
MART 321 Maritime Law I  
Credits 2. 2 Lecture Hours.  
(StCW Course). Basic laws governing vessel navigation; International and  
U.S. Inland Rules for the prevention of collision at sea, and the safety of  
life at sea convention.  
Prerequisites: MART 200 or NAUT 200. Junior or senior classification.

MART 350 Commercial Cruise Internship  
Credits 4. 4 Other Hours.  
(StCW Course). Practical application of student's classroom studies  
aboard an assigned merchant vessel during second training cruise.  
Student completes basic projects in communications, navigation,  
seamanship and rules of the road. Must be taken on a satisfactory/  
unsatisfactory basis.  
Prerequisites: MART 200 or NAUT 200, MART 202, 301, 303, 306,  
312, 321, METR 302. Junior or senior classification or approval of MART  
department head.

MART 400 Advanced Communications, Navigation and Seamanship  
Credits 4. 4 Lecture Hours.  
(StCW Course). Practical application of student's classroom studies  
aboard training ship during third training cruise. Student completes  
advanced projects in communications, navigation, seamanship and rules  
of the road.  
Prerequisites: Junior or Senior classification. MART 300 or 350 or  
NAUT 300, or permission of MART department head.

MART 401 Maritime Security  
Credits 3. 3 Lecture Hours.  
Orientation of maritime security issues, duties and responsibilities  
based on U.S. Coast Guard and International Maritime Organization  
rules, regulations and recommendations for Vessel, Company and Port  
Facility Security Officer certification. Prerequisites: MART 300 or 350  
or NAUT 300, MART 301, MARA 416, junior or senior classification or  
approval of instructor.

MART 404 The Navigator  
Credits 2. 1 Lecture Hour. 3 Lab Hours.  
Intensive, in-depth review of the principles of electronic, celestial, and  
terrestrial navigation in preparation for the U.S. Coast Guard examination  
for Third Mate.  
Prerequisites: Junior or Senior classification. MART 300 or 350 or  
NAUT 300, or approval of instructor.

MART 406 Marine Cargo Operations II  
Credits 3. 2 Lecture Hours. 2 Lab Hours.  
(StCW Course). Principles and practice of bulk liquid, gas handling,  
and carriage by water craft. Theoretical and practical problems involved  
in loading, stowing and discharging of petroleum, chemical, elevated  
temperature and cryogenic cargoes. Marine pollution abatement,  
personnel safety, and firefighting techniques and systems.  
Prerequisites: Junior or Senior classification. MART 200 or NAUT 200, or  
approval of instructor.

MART 407 Liquefied Gas Tankers  
Credits 3. 2 Lecture Hours. 3 Lab Hours.  
Preparation as cargo officer for loading, discharging and transit of liquefied  
gas cargoes. Emphasis on physical and chemical properties, operations,  
safety, firefighting and pollution prevention.  
Prerequisites: Junior or Senior classification. MART 300 or 350 or  
NAUT 300, 406, PHYS 201.

MART 410 Bridge Watchstanding  
Credits 2. 1 Lecture Hour. 3 Lab Hours.  
(StCW Course). Integration of navigation, communications and  
seamanship in Bridge Resource Management (BRM) training required  
under the International Convention on the Standards for Training and  
Certification of Watchkeepers, using simulator-based teaching techniques.  
Prerequisites: MART 304, 306, 321, 400. Junior or senior classification or  
approval of instructor.

MART 422 Seamanhip III  
Credits 2. 1 Lecture Hour. 3 Lab Hours.  
Principles and methods of propulsion and steering of ships. Ship handling  
in narrow channels and heavy seas, docking, undocking, mooring and  
towing.  
Prerequisites: Junior or Senior classification. MART 300 or 350 or  
NAUT 300, MART 301 or concurrent registration or approval of instructor.

MART 485 Directed Studies  
Credits 1 to 4. 1 to 4 Lecture Hours.  
Credit 1-4. Directed study in problems in marine transportation not covered  
by other courses in the department.  
Prerequisite: Senior classification or approval of department head.

MART 489 Special Topics in Marine Transportation  
Credits 3. 1 to 3 Lecture Hours. 0 to 3 Lab Hours.  
Credit 1-3. Study of selected topics in an identified area of marine  
transportation or nautical science.  
Prerequisites: Approval of MART department head. Junior or senior  
classification or approval of instructor.

MART 491 Research in Marine Transportation  
Credits 0 to 4. 0 to 4 Other Hours.  
Credit 0-4. Research conducted under the direction of faculty member in  
Marine Transportation. May be repeated 2 times for credit. Please see  
academic advisor in department. Registration in multiple sections of this  
course is possible within a given semester provided that the per semester  
credit hour limit is not exceeded.  
Prerequisites: Junior or senior classification and approval of instructor.

MART 498 Maritime Medical Care  
Credits 2. 1 Lecture Hour. 3 Lab Hours.  
(StCW Course). Provides advanced training for medical care of sick  
and injured in maritime field; course assessments meet the Standards  
of Training, Certification, and Watchkeeping Table A-VI/1-3 and Table  
A-V 1/4 (1-2); successful completion of course awards student a Basic  
Safety Training for Elementary First Aid, Health Care Provider and Medical  
Person in Charge.  
Prerequisites: MART 300 or 350 or NAUT 300, junior or senior  
classification or approval of instructor.

MASC - Integrated Math & Sci (MASC)

MASC 351 Problem Solving in Mathematics  
Credits 3. 3 Lecture Hours.  
Problem solving strategies in math and science; evaluate conjectures  
and arguments; writing and collaborating on problem solutions; posing  
problems and conjectures; constructing knowledge from data; developing  
relationships from empirical evidence; connecting mathematics concepts;  
readings, discussions, and analyses will model and illustrate mathematics  
problems solving and proofs.  
Prerequisites: 6 hours of mathematics.
MASC 371 Inquiries in Life and Earth Sciences
Credits 3. 3 Lecture Hours.
Integration and connections among topics in the life and earth sciences--diversity, natural selection, ecosystem development, earth's features, and weather systems; inquiry emphasizing experimental design, data analysis and collection; use of models in the life and earth sciences.
Prerequisites: BIOL 111 or BIOL 113 and BIOL 123, CHEM 106 and CHEM 116, GEOI 101 or GEOG 203, ASTR 101 and ASTR 102, and PHYS 205; junior or senior classification; admission to teacher certification.

MASC 450 Integrated Mathematics
Credits 3. 3 Lecture Hours.
Integration and connections among topics and ideas in mathematics and other disciplines; connections between algebra and geometry and statistics and probability; focus for integration with authentic problems requiring various branches of mathematics.
Prerequisites: MASC 351; admission to teacher education; junior classification.

MASC 475 Inquiries in Physical Science
Credits 3. 3 Lecture Hours.
Integration and connections among topics in physical sciences--matter, energy, force, motion, scientific cycles; focuses on inquiry emphasizing experimental design, data analysis and collection, and use of models in the physical sciences.
Prerequisites: BIOL 111, BIOL 113 and BIOL 123, CHEM 106 and CHEM 116, GEOI 101 or GEOG 203, ASTR 101 and ASTR 102, and PHYS 205; junior or senior classification; admission to teacher certification.

MASE - Maritime Systems Engr (MASE)

MASE 100 Introduction to Offshore and Coastal Engineering
Credits 2. 2 Lecture Hours. 0 Lab Hours.
Introduction to offshore and coastal engineering principles with emphasis on offshore structures, underwater pipelines, floating production systems, current advances in offshore technologies; coastal structures, coastal processes, port and harbor design, and advances in ocean/wind energy technologies.
Prerequisite: MATH 151 or registration therein; only U1 and U2 are allowed to enroll.

MASE 210 Properties of Engineering Materials
Credit 1. 3 Lab Hours.
Atomic and crystalline structures of materials; mechanical properties, failure, corrosion and thermal processes of metallic materials; tensile, hardness, impact and torsion testing of metal alloys.
Prerequisites: ENGR 212, 221 and PHYS 208.

MASE 212 Engineering Science in Thermodynamics
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Theory and application of thermodynamics as an engineering science; applications of the laws of thermodynamics and energy equations to heat transfer and flow.
Prerequisites: ENGR 221 and MATH 251 or concurrent enrollment.

MASE 213 Principles of Materials Engineering
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Description of properties of materials using a unified approach; discussion of the chemical structure, crystalline structure, microstructure, interface structure, and phase diagrams for materials; develop bulk properties and characteristics of metals, polymers, and ceramics; mechanical, electrical, magnetic, thermal, and optical properties for these materials.
Prerequisites: CHEM 107, CHEM 117; MASE 221; MASE 216; PHYS 208; MATH 308 or concurrent registration.

MASE 214 Mechanics of Deformable Bodies
Credits 3. 3 Lecture Hours.
Prerequisites: ENGR 221; MATH 308 or concurrent registration.

MASE 215 Principles of Electrical Engineering
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Fundamentals of electric circuit analysis, AC power, and electronics; intended as a terminal course in these areas for most engineering disciplines.
Prerequisites: ENGR 212, 221; PHYS 208, MATH 308 or concurrent registration.

MASE 216 Principles of Thermodynamics
Credits 2. 2 Lecture Hours.
Principle of Thermodynamics. Theory and application of thermodynamics as an engineering science; study of work, heat and energy as applied to open and closed systems; introduction to entropy, reversible and irreversible processes; intended as a terminal course in these areas for OCSE students.
Prerequisites: ENGR 221 and MATH 251 or registration therein.

MASE 217 Electrical Engineering: Circuits
Credits 2. 2 Lecture Hours.
Fundamental principles of electric circuit analysis, DC and AC electricity, electric power; designed to prepare students for topical questions from the P.E. exam; intended as a terminal course in these areas for OCSE students.
Prerequisite: PHYS 208.

MASE 221 Engineering Mechanics: Statics
Credits 3. 2 Lecture Hours. 2 Lab Hours.
I, II General principles of mechanics; concurrent force systems; statics of particles; equivalent force/moment systems; centroids and center of gravity; equilibrium of rigid bodies; trusses, frames and machines; internal forces in structural members; moments of areas.
Prerequisites: ENGR 111; MATH 251 or MATH 253 or registration therein; PHYS 218; enrollment in OCSL or OCSE major degree sequence.

MASE 261 Applied Numerical Methods
Credits 3. 3 Lecture Hours.
Application of numerical methods to ocean-related engineering problems; development, evaluation and comparison of various techniques for root finding, curve fitting, numerical integration, simultaneous linear algebraic equations, matrix methods, probability and statistics and ordinary differential equations in ocean-related engineering applications.
Prerequisites: MATH 308 or concurrent enrollment, ENGR 111, ENGR 112.
MASE 265 Introduction to Geotechnical Engineering  
**Credits 3. 2 Lecture Hours. 2 Lab Hours.**  
Physical properties of soils, classification systems, soil exploration, permeability, consolidation, compaction and shear strength. Laboratory tests conducted to determine the physical and engineering soil properties needed for application in geotechnical engineering design.  
**Prerequisites:** MASE 221. Enrollment in OCSE or OCSL.

MASE 285 Directed Studies  
**Credits 1 to 4. 1 to 4 Other Hours.**  
Credit 1-8. Directed study on selected current problems in the ocean and/or maritime industry. Offered to enable individuals or groups to undertake and complete with credit some specialized investigation not covered by other courses.  
**Prerequisite:** Approval of department head.

MASE 310 Engineering Analysis  
**Credits 3. 3 Lecture Hours.**  
Application of numerical methods to ocean-related engineering problems; development, evaluation, and comparison of various techniques for root finding, curve fitting, numerical integration, simultaneous linear algebraic equations, matrix methods, probability and statistics, and ordinary differential equations in ocean-related engineering applications.  
**Prerequisites:** Junior or senior classification or approval of instructor, MATH 308 or concurrent registration, ENGR 111, 112.

MASE 319 Naval Architecture Design I  
**Credits 3. 2 Lecture Hours. 3 Lab Hours.**  
**Prerequisites:** CVEN 311 and CVEN 345 or concurrent enrollment; MASE 221 and MASE 214 or concurrent enrollment; junior or senior classification or approval of instructor; enrollment in OCSE major degree sequence.

MASE 336 Flow Measurement Fundamentals  
**Credits 3. 2 Lecture Hours. 2 Lab Hours.**  
Introduction to fundamental principles of measuring fluctuating fluid velocities in open channels, simple pipe flow systems and surface waves. Laboratory includes experimental investigation of classic fluid dynamics and introduction to PIV systems.  
**Prerequisites:** PHYS 208, CVEN 311 or concurrent registration. Junior or senior classification or approval of instructor. Enrollment in OCSE major degree sequence.

MASE 341 Engineering Economics and Project Management  
**Credits 3. 3 Lecture Hours.**  
Analysis of engineering economics and management, using costs and benefits of various engineering options; project scheduling covered in detail including PERT, GANT and CPM methods. Additional topics include time value of money, cash flows, analysis techniques, interest rates, inflation, depreciation, optimization, statistics, network analysis and critical path programming.  
**Prerequisites:** Junior or senior classification. Enrollment in the OCSE major degree sequence.

MASE 344 Reinforced Concrete Structures  
**Credits 3. 2 Lecture Hours. 3 Lab Hours.**  
Analysis and design of reinforced concrete beams, columns, slabs and footings using ultimate strength methods.  
**Prerequisite:** CVEN 345. Enrollment in OCSE major degree sequence.

MASE 363 Dynamics and Vibrations  
**Credits 3. 3 Lecture Hours.**  
Application of Newtonian and energy methods to model dynamic systems with ordinary differential equations; dynamics and vibrations of linear single-and multi-degree of freedom systems of particles and rigid bodies; solutions of models using analytical approaches; interpreting solutions; application to simple floating systems. Prerequisites: MASE 221 with a grade of C or better; MATH 308 with C or better; MASE 261. Enrollment in OCSE major degree sequence and junior or senior classification.

MASE 400 Introduction to Coastal Engineering  
**Credits 3. 3 Lecture Hours.**  
Mechanics of shallow water wave motion; wave diffraction, refraction and reflection; wave forecasting; water level fluctuations; coastal processes and geomorphology; erosion control and shoreline stabilization; coastal structures; beach nourishment; dredging; introduction to physical and computer models and modeling techniques; design in coastal engineering.  
**Prerequisites:** OCEN 300; senior classification or approval of instructor. Enrollment in OCSE major degree sequence.

MASE 401 Underwater Acoustics  
**Credits 3. 3 Lecture Hours.**  
Fundamentals of underwater acoustics, SONAR equations, propagation of underwater sound, acoustic transducers and arrays, noise in the ocean environment, design and prediction of SONAR systems, ocean engineering applications of underwater sound.  
**Prerequisites:** CVEN 311, CVEN 336. Junior or senior classification or approval of instructor. Enrollment in OCSE major degree sequence.

MASE 405 Finite Element Analysis in Engineering Design  
**Credits 3. 3 Lecture Hours.**  
Introduction to the fundamental theory and techniques; direct approach and energy formulation; element equations, assembly and solution schemes; computer implementation, design considerations; applications to field problems; original computer project required.  
**Prerequisites:** CVEN 345, MASE 214, MASE 261. Junior or senior classification or approval of instructor. Enrollment in OCSE major degree sequence.

MASE 406 Capstone Design I  
**Credit 1. 1 Lecture Hour.**  
Part one of a two-course sequence; development and presentation of detailed proposals for offshore or coastal engineering projects, which will form the basis for MASE 407 design projects; includes formulation of project objectives, design constraints, delineation of alternatives, scheduling and analysis of economic and environmental impact.  
**Prerequisites:** Prior completion or co-enrollment in MASE 405, 415, 463. Successful completion of ENGL 210. All required 300-level engineering and technology courses. Enrollment in OCSE major degree sequence.

MASE 407 Capstone Design II  
**Credits 3. 6 Lab Hours.**  
Design of a major engineered system based on a proposal developed in MASE 406 completed as a group project; realistic application of engineering skills and tools, experience managing a significant engineering-design effort. This is a writing-intensive course including a major report and weekly one-page written reports.  
**Prerequisites:** MASE 406. Enrollment in OCSE major degree sequence.
MASE 410 Measurements in the Ocean Laboratory
Credit 1. 3 Lab Hours.
Fundamental techniques and instrumentation for field and laboratory measurements pertaining to coastal and ocean engineering (e.g., currents, wave height, wave/sediment interaction, mass transport, surveying, etc.): experiment planning; data analysis and presentation; written reports on methodology, analysis, and results of experiments.
Prerequisites: OCEN 300, MASE 400. Junior or senior classification or approval of instructor. Enrollment in OCSE major degree sequence.

MASE 411 Environmental Nearshore Hydrodynamics
Credits 3. 3 Lecture Hours.
Fundamentals of current and shallow water wave motions. Beach response to nearshore processes. Coastal sediment and pollutant transport including nearshore currents, longshore onshore/offshore transport and shoreline configuration; facilities for shoreline stabilization, backshore protection and inlet stabilization. Environmentally conscious coastal engineering design is emphasized.
Prerequisites: OCEN 300. Junior or senior classification or approval of instructor. Enrollment in OCSE major degree sequence.

MASE 415 Offshore Structure Design
Credits 3. 3 Lecture Hours.
Design of large structures using diffraction analysis. Design project: Design of a fixed offshore structure including dynamics effects.
Prerequisites: MASE 463 or concurrent enrollment. MASE 265, CVEN 446 and OCEN 300. Junior or senior classification or approval of instructor. Enrollment in OCSE major degree sequence.

MASE 421 Naval Architecture Design II
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Ship motion and mooring. Theory and practice of naval architecture, basic principles and design calculations. Hull structural design considerations, ship resistance and propulsion power prediction, propeller selection concepts, dynamic positioning systems, mobile offshore drilling unit (MODU) design considerations, practical design work on a vessel or MODU of the student's choosing under the guidance of the instructor.
Prerequisites: MASE 319, CVEN 346, OCEN 462. Junior or senior classification or approval of instructor. Enrollment in OCSE major degree sequence.

MASE 459 Mechanical Vibrations
Credits 3. 3 Lecture Hours.
Basic theory of vibrating systems with single and multiple degrees of freedom and principles of transmission and isolation of vibrations.
Prerequisites: MASE 214, 221, 310. Junior or senior classification or approval of instructor. Enrollment in OCSE major degree sequence.

MASE 461 Ocean Instrumentation and Control Theory
Credits 3. 3 Lecture Hours.
Electrical systems components; analog and digital filters-amplifiers; network analysis; instrument behavior and displacement, velocity, acceleration, force, and flow measurements; simple feedback and control theory for linear electromechanical systems; digital data acquisition.
Prerequisites: PHYS 208 and ENGR 215. Junior or senior classification or approval of instructor. Enrollment in OCSE major degree sequence.

MASE 463 Hydrodynamics of Offshore Structures
Credits 3. 3 Lecture Hours.
Introduction to offshore structures; wave force formulation; wave forces on small structures; floating structure dynamics; modeling dynamics systems of rigid body motion; structure response statistics.
Prerequisites: Junior or senior classification or approval of instructor; MASE 261, MASE 363, CVEN 345 and OCEN 300; Enrollment in OCSE major degree sequence.

MASE 465 Subsea Pipeline Design
Credits 3. 3 Lecture Hours.
Design and construction practices of submarine oil/gas pipelines and risers; pipe selections, coating, insulation; route selection; operation and installation stresses; stability during laying and operation due to wave and current action; cost analysis considering long term operability and safety.

MASE 467 Offshore Random Processes
Credits 3. 3 Lecture Hours.
Basic probability theory and engineering statistics; irregular structural excitation and response; random vibration theory with application to offshore processes and structures; development of extreme values used in design of ocean structures.
Prerequisites: MASE 261, MASE 301 and MASE 363; or approval of instructor. Enrollment in OCSE major degree sequence.

MASE 474 Port and Harbor Engineering
Credits 3. 3 Lecture Hours.
Engineering background and specific skills for design of marine facilities and harbors; includes development of design criteria, channel design, evaluation of operations and extreme loads, dredging and disposal.
Prerequisite: Junior or senior classification or approval of instructor.

MASE 482 Seminar
Credit 1. 1 Lecture Hour.
State of technology topics in ocean engineering; professional ethics, membership in professional societies and professional registrations; case studies and lectures presented by staff and practicing engineers.
Prerequisite: Junior or senior classification or approval of instructor. Enrollment in OCSE major degree sequence.

MASE 483 Marine Foundation Analysis and Design
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Design of foundations for onshore, alongshore, and offshore structures, including prediction of settlement and the bearing capacity of shallow and deep foundations; determination of earth pressure acting on retaining structures and design of steel and concrete bulkheads; design of pile foundations; and design of cofferdams and caissons. Laboratory tests conducted to determine the physical and engineering properties needed for application in geotechnical engineering design.
Prerequisites: CVEN 345, 346, 365. Junior or senior classification or approval of instructor. Enrollment in OCSE major degree sequence.

MASE 485 Directed Studies
Credits 1 to 4. 1 to 4 Other Hours.
Credit 1-8. Directed study on selected current problems in the ocean and/ or maritime industry. Offered to enable individuals or groups to undertake and complete with credit some specialized investigation not covered by other courses.
Prerequisites: Approval of department head. Junior or senior classification or approval of instructor. Enrollment in OCSE major degree sequence.

MASE 489 Special Topics
Credits 1 to 4. 1 to 4 Lecture Hours.
Credit 1-4. Selected topics in a identified area of maritime systems engineering. May be repeated for credit.
Prerequisite: Junior or senior classification or approval of instructor. Enrollment in OCSE major degree sequence.
MASE 491 Research in Maritime Systems Engineering  
Credits 0 to 4. 0 to 4 Other Hours.  
Credit 0-4. Research conducted under the direction of faculty member in Maritime Systems Engineering. May be repeated 2 times for credit. Please see academic advisor in department. Registration in multiple sections of this course is possible within a given semester provided that the per semester credit hour limit is not exceeded.  
Prerequisites: Junior or senior classification and approval of instructor. Enrollment in OCSE major degree sequence.

MASE 333 Viking Archaeology and Norse Mythology  
Credits 3. 3 Lecture Hours.  
Overview of Viking Age (ca. 800 to 1100 C.E.) in Northern Europe; topics include Norse seafaring, world-view, society, archaeology, religion and cosmology as know from the archaeological and literary record.  
Prerequisite: Junior or senior classification or approval of instructor.

MASE 336 Maritime Foreign Policy  
Credits 3. 3 Lecture Hours.  
Strategies used by governments to guide international actions; objectives of state leaders in decision making; sources, processes, objectives and outcomes of maritime policy choices.  
Prerequisite: Junior or senior classification or approval of instructor.

MASE 345 Texas Maritime Culture and History  
Credits 3. 3 Lecture Hours.  
The coastal peoples, maritime history and culture of the Texas Gulf Coast ranging from pre-historic times to the present day; geography's influence on exploration, resources utilization, development and inland access; Texas ports historic and modern; shipwreck sites and historical texts; La Salle's La Belle, Texas Navy, Mexican War logistics; Civil War Naval actions, Texas Fisheries, tourism and recreation.  
Prerequisite: Junior or senior classification.

MASE 350 A History of Wooden Ship Construction  
Credits 3. 3 Lecture Hours.  
This course is designed to give undergraduate students an overview of ship construction and possible cultural factors that may influence how a shipwright builds a vessel.  
Prerequisites: Junior or senior classification and ANTH 316 or ANTH 318.

MASE 352 Crafts of the Maritime World  
Credits 3. 3 Lecture Hours.  
An exploration of various crafts, skills and aesthetic/design used in and supporting the maritime world; hands-on activities and practical experience of various skills and processes, using traditional tools required to put a ship to sea; from carpentry to rope-making, sewing canvas sails to making blocks.  
Prerequisites: Junior or senior classification and approval of instructor.

MASE 354 Ancient Egyptian Seafaring  
Credits 3. 3 Lecture Hours.  
Archaeology, iconography and written records of ancient Egypt as they relate to local and international trade by land, river and sea, beginning in Neolithic times (c. 5000 B.C.) to the end of the New Kingdom (c. 1069 B.C.).  
Prerequisites: ANTH 316; junior or senior classification or approval of instructor.

MASE 371 Archaeology of the Pacific  
Credits 3. 3 Lecture Hours.  
Overview of the archaeology, history and cultures of the Pacific Rim; emphasizing the cultures of Polynesia, Melanesia, and Micronesia.  
Prerequisite: Junior or senior classification or approval of instructor.

MASE 411 International Maritime Culture  
Credits 3. 3 Lecture Hours.  
Strategies used in the exploitation of marine, coastal, and island habitats throughout human evolutionary history and the variety and complexity of adaptations in such environments. Classes will be devoted to lectures and group discussions with occasional slide or movie presentations.  
Prerequisites: ANTH 201 or GEOG 201. Senior Classification or approval of instructor.
MAST 425 Thesis and Technical Writing
Credits 3. 3 Lecture Hours.
Rhetorical techniques for professional expository prose; intertextual argumentation and analysis.
Prerequisite: Junior classification.

MAST 441 Maritime Piracy
Credits 3. 3 Lecture Hours.
Research of social, economic, political and cultural aspects of piracy from ancient to modern times; presentation of findings; understanding modern perception of pirates through modern art, literature and movies.
Prerequisites: Junior or senior classification and approval of instructor.

MAST 480 Honors Seminar in Service Learning
Credit 1. 1 Lecture Hour.
Opportunities for community service through active community participation; includes structured time for reflection; use of skills and knowledge in real-life situations; extend learning beyond the classroom; foster a sense of caring for others.
Prerequisites: Junior or senior classification or permission from the instructor and must be a member of the Honors Program.

MAST 481 Seminar in Maritime Studies
Credit 1. 1 Lecture Hour.
This course is intended to provide students with the opportunity to conduct in-depth research on a particular issue, event, period, or people in maritime studies.
Prerequisite: This one-credit hour course is open to senior maritime studies majors or approval of instructor.

MAST 484 Undergraduate Internship
Credits 0 to 6. 0 to 6 Other Hours.
Credit 0-6. Supervised study in a research or teaching laboratory remote from TAMUG. Student involvement is to consist of real-life learning or research, teaching, management, or a combination of these.
Prerequisite: Junior or senior classification or permission from the instructor and must be a member of the Honors Program.

MAST 485 Directed Studies
Credits 1 to 4. 1 to 4 Lecture Hours.
Credit 1-4. Individually supervised research or advanced study on restricted area not covered in regular courses.
Prerequisite: Junior or senior classification or approval of instructor.

MAST 489 Special Topics
Credits 1 to 4. 1 to 4 Lecture Hours.
Credit 1-3. Selected topics in a identified area of maritime studies. May be repeated for credit.
Prerequisite: Junior or senior classification or approval of instructor.

MAST 491 Research in Maritime Studies
Credits 0 to 4. 0 to 4 Other Hours.
Credit 0-4. Research conducted under the direction of faculty member in Maritime Studies. May be repeated 2 times for credit. Please see academic advisor in department. Registration in multiple sections of this course is possible within a given semester provided that the per semester credit hour limit is not exceeded.
Prerequisites: Junior or senior classification and approval of instructor.

MAST 493 Maritime Studies Travel Experience
Credits 1 to 6. 1 to 6 Lecture Hours.
Combination of classroom and travel emphasizing cultural, archaeological, political and historical aspects of maritime humanities related topics. May be taken two times for credit.
Prerequisite: Junior or senior classification or approval of instructor.

MATH - Mathematics (MATH)

MATH 102 Algebra
Credits 3. 3 Lecture Hours.
(MATH 1314, 1414) Algebra. Sets, structure of number system; absolute values, solution sets of linear and nonlinear equations, of systems of equations, and of inequalities; relations and functions, graphical representations, graphical representations, progressions, mathematical induction, determinants.

MATH 131 Mathematical Concepts—Calculus
Credits 3. 3 Lecture Hours.
Mathematical Concepts—Calculus. Limits and continuity; rates of change, slope; differentiation: the derivative, maxima and minima; integration: the definite and indefinite integral techniques; curve fitting. No credit will be given for more than one of MATH 131, MATH 142, MATH 147, MATH 151 and MATH 171.
Prerequisites: High school algebra I and II and geometry.

MATH 140 Mathematics for Business and Social Sciences
Credits 3. 3 Lecture Hours.
(MATH 1324) Application of common algebraic functions, including polynomial, exponential, logarithmic and rational, to problems in business, economics and the social sciences; includes mathematics of finance, including simple and compound interest and annuities; systems of linear equations; matrices; linear programming; and probability, including expected value. No credit will be given for more than one of MATH 140, MATH 141 and MATH 166.
Prerequisite: High school algebra I and II and geometry.

MATH 141 Finite Mathematics
Credits 3. 3 Lecture Hours.
Linear equations and applications; systems of linear equations, matrix algebra and applications, linear programming, probability and applications, statistics. No credit will be given for more than one of MATH 140, MATH 141 and MATH 166.
Prerequisites: High school algebra I and II and geometry.

MATH 142 Business Calculus
Credits 3. 3 Lecture Hours.
(MATH 1325) Business Calculus. Derivatives, curve sketching and optimization, techniques of derivatives, logarithms and exponential functions with applications, integrals, techniques and applications of integrals, multivariate calculus. No credit will be given for more than one of MATH 131, MATH 142, MATH 147, MATH 151 and MATH 171.
Prerequisites: MATH 140 or equivalent or acceptable score on Texas A&M University math placement exam.

MATH 147 Calculus I for Biological Sciences
Credits 4. 3 Lecture Hours. 2 Lab Hours.
Introduction to differential calculus in a context that emphasizes applications in the biological sciences. No credit will be given for more than one of MATH 131, MATH 142, MATH 147, MATH 151 and MATH 171.
Prerequisite: MATH 150 or equivalent or acceptable score on TAMU Math Placement Exam.

MATH 148 Calculus II for Biological Sciences
Credits 4. 3 Lecture Hours. 2 Lab Hours.
Introduction to integral calculus in a context that emphasizes applications in the biological sciences; ordinary differential equations and analytical geometry. No credit will be given for more than one of MATH 148, MATH 152 and MATH 172.
Prerequisite: MATH 147 or approval of instructor.
MATH 150 Functions, Trigonometry and Linear Systems  
Credits 4. 3 Lecture Hours. 2 Lab Hours.  
(MATH 2412) Functions, Trigonometry and Linear Systems. Graphs, functions, college algebra and trigonometry, linear systems and vectors.

MATH 151 Engineering Mathematics I  
Credits 4. 3 Lecture Hours. 2 Lab Hours.  
(MATH 2413, 2513) Engineering Mathematics I. Rectangular coordinates, vectors, analytic geometry, functions, limits, derivatives of functions, applications, integration, computer algebra. MATH 171 designed to be a more demanding version of this course. No credit will be given for more than one of MATH 131, MATH 142, MATH 147, MATH 151 and MATH 171.  
Prerequisite: MATH 150 or equivalent or acceptable score on TAMU Math Placement Exam.

MATH 152 Engineering Mathematics II  
Credits 4. 3 Lecture Hours. 2 Lab Hours.  
(MATH 2414) Engineering Mathematics II. Differentiation and integration techniques and their applications (area, volumes, work), improper integrals, approximate integration, analytic geometry, vectors, infinite series, power series, Taylor series, computer algebra. MATH 172 designed to be a more demanding version of this course. No credit will be given for more than one of MATH 148, MATH 152 and MATH 172.  
Prerequisite: MATH 151 or equivalent.

MATH 161 Engineering Mathematics II  
Credits 3. 3 Lecture Hours.  
Differentiation and integration techniques and their applications (area, volumes, work), improper integrals, approximate integration, analytic geometry, vectors, infinite series, power series, Taylor series.  
Prerequisite: MATH 151 or equivalent. Credit will not be given for more than one of MATH 152, 161 and 172.

MATH 166 Topics in Contemporary Mathematics II  
Credits 3. 3 Lecture Hours.  
Finite mathematics, matrices, probability and applications. No credit will be given for more than one of MATH 140, MATH 141 and MATH 166.  
Prerequisites: High school algebra I and II and geometry.

MATH 167 Explorations in Mathematics  
Credits 3. 3 Lecture Hours.  
Application of mathematics to topics of contemporary societal importance using quantitative methods; may include elements of management science (optimal routes, planning and scheduling), statistics (sampling/polling methods, analyzing data to make decisions), cryptography (codes used by stores, credit cards, internet security), fairness (apportionment, voting) patterns (symmetry, tessellations, fractals,) world health.  
Prerequisites: High school algebra I and II.

MATH 170 Freshman Mathematics Laboratory  
Credit 1. 2 Lab Hours.  
Computing and problem solving laboratory; introduction to the various mathematical disciplines; development of skills in mathematical problem solving and skills in teamwork. May be taken two times for credit.  
Prerequisites: Concurrent enrollment in MATH 171 or MATH 172; admission to College of Science.

MATH 171 Analytic Geometry and Calculus  
Credits 4. 4 Lecture Hours.  
Vectors, functions, limits, derivatives, Mean Value Theorem, applications of derivatives, integrals, Fundamental Theorem of Calculus. Designed to be more demanding than MATH 151. No credit will be given for more than one of MATH 131, MATH 142, MATH 147, MATH 151 and MATH 171.  
Prerequisite: MATH 150 or equivalent or acceptable score on TAMU Math Placement Exam.

MATH 172 Calculus  
Credits 4. 4 Lecture Hours.  
Techniques of integration, applications of integrals, improper integrals, sequences, infinite series, vector algebra and solid analytic geometry. Designed to be more demanding than MATH 152. No credit will be given for more than one of MATH 148, MATH 152 and MATH 172.  
Prerequisite: MATH 147, MATH 151 or MATH 171 or equivalent with a grade of C or better.

MATH 220 Foundations of Mathematics  
Credits 3. 3 Lecture Hours.  
Foundations of mathematics including logic, set theory, combinatorics, and number theory.  
Prerequisite: MATH 148, MATH 152 or MATH 172 or equivalent with a grade of C or better.

MATH 221 Several Variable Calculus  
Credits 4. 4 Lecture Hours.  
Vector algebra and solid analytic geometry; calculus of functions of several variables; Lagrange multipliers; multiple integration, theory, methods and application; line and surface integrals, Green's and Stokes' theorems; Jacobians. Designed to be more demanding than MATH 251 and MATH 253. No credit will be given for more than one of MATH 221, MATH 251 and MATH 253.  
Prerequisite: MATH 148, MATH 152, or MATH 172.

MATH 225 Advanced Spreadsheet Techniques  
Credit 1. 1 Lecture Hour.  
Advanced commands, formatting and functionality of spreadsheets, with Excel being the particular example.  
Prerequisite: MATH or APMS major.

MATH 251 Engineering Mathematics III  
Credits 3. 3 Lecture Hours.  
(MATH 2316) Engineering Mathematics III. Vector algebra, calculus of functions of several variables, partial derivatives, directional derivatives, gradient, multiple integration, line and surface integrals, Green's and Stokes' theorems. MATH 221 designed to be a more demanding version of this course. No credit will be given for more than one of MATH 221, MATH 251 and MATH 253.  
Prerequisite: MATH 148, MATH 152, or MATH 172.

MATH 253 Engineering Mathematics III  
Credits 4. 3 Lecture Hours. 2 Lab Hours.  
(MATH 2415) Engineering Mathematics III. Vector algebra; calculus of functions of several variables, partial derivatives, directional derivatives, gradient, multiple integration, line and surface integrals, Green's and Stokes' theorems, computer algebra. MATH 221 designed to be a more demanding version of this course. No credit will be given for more than one of MATH 221, MATH 251 and MATH 253.  
Prerequisite: MATH 148, MATH 152, or MATH 172.

MATH 281 Seminar in Mathematics  
Credit 1. 1 Lecture Hour.  
Designed to familiarize students with mathematics pertaining to real world applications in such areas as biology, signal processing, quantum computation and robotics. May be taken four times for credit.

MATH 285 Directed Studies  
Credits 1 to 4. 1 to 4 Other Hours.  
Special problems not covered by any other lower-division course in the curriculum; intended for freshman and sophomore students.  
Prerequisite: Approval of department head.
MATH 289 Special Topics in...  
Credits 1 to 4. 1 to 4 Lecture Hours.  
Selected topics in an identified area of mathematics. May be repeated for credit.  
Prerequisite: Approval of instructor.

MATH 291 Research  
Credits 0 to 4. 0 to 4 Other Hours.  
Research conducted under the direction of faculty member in mathematics. May be repeated 2 times for credit.  
Prerequisites: Freshman or sophomore classification and approval of instructor.

MATH 302 Discrete Mathematics  
Credits 3. 3 Lecture Hours.  
Formal structures for describing data, algorithms and computing devices; theory and applications of sets, graphs and algebraic structures.  
Prerequisite: MATH 148, MATH 152, or MATH 172.

MATH 304 Linear Algebra  
Credits 3. 3 Lecture Hours.  
Introductory course in linear algebra covering abstract ideas of vector space and linear transformation as well as models and applications of these concepts, such as systems of linear equations, matrices and determinants. MATH 323 designed to be a more demanding version of this course. No credit will be given for more than one of MATH 304, MATH 309, MATH 311 and MATH 323.  
Prerequisite: MATH 148, MATH 152, or MATH 172; junior or senior classification.

MATH 308 Differential Equations  
Credits 3. 3 Lecture Hours.  
Prerequisites: MATH 221, MATH 251, or MATH 253, or concurrent enrollment; knowledge of computer algebra system.

MATH 309 Linear Algebra for Differential Equations  
Credits 3. 3 Lecture Hours.  
Systems of linear equations, matrices, determinants, vector spaces, linear transformations, eigenvalues and eigenvectors, diagonalization, inner product spaces, orthogonal functions, separation of variables, Fourier series, Bessel functions. No credit will be given for more than one of MATH 304, MATH 309, MATH 311 and MATH 323.  
Prerequisites: MATH 221, MATH 251, or MATH 253; MATH 308 or concurrent enrollment; junior or senior classification or approval of instructor.

MATH 311 Topics in Applied Mathematics I  
Credits 3. 3 Lecture Hours.  
Systems of linear equations, matrices, determinants, vector spaces, linear transformations, eigenvalues and eigenvectors, diagonalization, inner product spaces, orthogonal functions; vector analysis, including gradient, divergence, curl, line and surface integrals, Gauss', Green's and Stokes' theorems. No credit will be given for more than one of MATH 304, MATH 309, MATH 311 and MATH 323.  
Prerequisites: MATH 221, MATH 251, or MATH 253; MATH 308 or concurrent enrollment; junior or senior classification or approval of instructor.

MATH 323 Linear Algebra  
Credits 3. 3 Lecture Hours.  
Linear equations and matrices; real vector spaces, linear transformations, change of bases, determinants, eigenvalues and eigenvectors, diagonalization, inner products. Designed to include more theory and be more demanding than MATH 304. No credit will be given for more than one of MATH 304, MATH 309, MATH 311 and MATH 323.  
Prerequisites: MATH 148, MATH 152 or MATH 172; MATH 220; junior or senior classification or approval of instructor.

MATH 325 The Mathematics of Interest  
Credits 3. 3 Lecture Hours.  
The mathematical theory associated with interest; annuities; internal rate of return; coupon bonds; valuation of noncallable bonds; yield of maturity; interest rate sensitivity; duration and convexity; reinvestment risk; total return; compound return; STRIPS; yield curve; short selling; hedge ratio; bond swaps.  
Prerequisites: MATH 142, MATH 147, MATH 151 or MATH 171.

MATH 365 Structure of Mathematics I  
Credits 3. 3 Lecture Hours.  
Informal logic, sets, relations, functions, whole numbers, numeration systems, binary operations, integers, elementary number theory, modular systems, rational numbers and the system of real numbers. Designed primarily for elementary teacher certification. Others must have consent of instructor.  
Prerequisites: Must have completed University Core Curriculum mathematics requirements with a grade of C of better.

MATH 366 Structure of Mathematics II  
Credits 3. 3 Lecture Hours.  
Geometry, measurement and coordinate geometry. Designed primarily for elementary teacher certification. Others must have consent of instructor.  
Prerequisite: MATH 365 or equivalent with a grade of C or better.

MATH 367 Basic Concepts of Geometry  
Credits 3. 3 Lecture Hours.  
Formal development of geometry: finite [Euclidean and non-Euclidean]. Designed primarily for elementary mathematics teacher certification. Others must have consent of instructor.  
Prerequisite: MATH 366 or equivalent with a grade of C or better.

MATH 368 Introduction to Abstract Mathematical Structures  
Credits 3. 3 Lecture Hours.  
Mathematical proofs, sets, relations, functions, infinite cardinal numbers, algebraic structures, structure of the real line; designed primarily for elementary teacher certification.  
Prerequisite: MATH 366 or equivalent with a grade of C or better.

MATH 375 Intermediate Real Analysis  
Credits 3. 3 Lecture Hours.  
Development of the real numbers, limits, foundations and major theorems of calculus. Designed primarily for mathematics teacher certification. Others must have consent of instructor.  
Prerequisite: MATH 220 or equivalent.

MATH 376 Intermediate Abstract Algebra  
Credits 3. 3 Lecture Hours.  
Relations, functions, binary operators, rings, homomorphisms, integral domains and fields. Designed primarily for mathematics teacher certification. Others must have consent of instructor.  
Prerequisites: MATH 220 or MATH 302; MATH 304 or equivalent.
MATH 396 Communications in Mathematics
Credit 1. 1 Lecture Hour.
Electronic, written, and oral communications in mathematics.
Prerequisites: MATH 220, junior or senior classification, and mathematics major.

MATH 401 Advanced Engineering Mathematics
Credits 3. 3 Lecture Hours.
Engineering mathematics including Perturbation Theory, Fourier series and partial differential equations. Designed primarily for engineering majors. Others must have consent of instructor.
Prerequisite: MATH 308.

MATH 403 Mathematics and Technology
Credits 3. 3 Lecture Hours.
Mathematical problem-solving and communication through the use of various technologies (both hardware and software). Intended primarily, but not limited to, students working toward teacher certification.
Prerequisite: MATH 367 or MATH 467 with a grade of C or better.

MATH 407 Complex Variables
Credits 3. 3 Lecture Hours.
Fundamental theory of analytic functions, including residues and their applications.
Prerequisite: MATH 221, MATH 251, or MATH 253.

MATH 409 Advanced Calculus I
Credits 3. 3 Lecture Hours.
Axioms of the real number system; point set theory of R1; compactness, completeness and connectedness; continuity and uniform continuity; sequences, series; theory of Riemann integration.
Prerequisites: MATH 220; MATH 221, MATH 251 or MATH 253.

MATH 410 Advanced Calculus II
Credits 3. 3 Lecture Hours.
Differential and integral calculus of functions defined on Rm including inverse and implicit function theorems and change of variable formulas for integration; uniform convergence.
Prerequisites: MATH 304 or MATH 323; MATH 409.

MATH 411 Mathematical Probability
Credits 3. 3 Lecture Hours.
Probability spaces, discrete and continuous random variables, special distributions, joint distributions, expectations, law of large numbers, the central limit theorem.
Prerequisite: MATH 148, MATH 152, or MATH 172.

MATH 412 Theory of Partial Differential Equations
Credits 3. 3 Lecture Hours.
Formulation and solution of partial differential equations of mathematical physics; Fourier series and transform methods, complex variable methods, methods of characteristics and first order equations.
Prerequisite: MATH 308 or approval of instructor.

MATH 414 Fourier Series and Wavelets
Credits 3. 3 Lecture Hours.
Fourier series and wavelets with applications to data compression and signal processing.
Prerequisite: MATH 304, MATH 309, MATH 311, or MATH 323.

MATH 415 Modern Algebra I
Credits 3. 3 Lecture Hours.
A study of groups, rings, fields with emphasis on the theoretical aspects and proofs.
Prerequisite: MATH 220; MATH 304 or MATH 323.

MATH 416 Modern Algebra II
Credits 3. 3 Lecture Hours.
Continuation of topics introduced in MATH 415 including Galois Theory and the Sylow Theorems with emphasis on the theoretical aspects.
Prerequisite: MATH 415; junior or senior classification.

MATH 417 Numerical Methods
Credits 4. 3 Lecture Hours. 3 Lab Hours.
Numerical methods for applications; qualitative discussion of convergence and stability properties; computer implementation; interpolation and quadrature, initial value problems, matrix decompositions, interactive solution of linear and non-linear systems; least squares approximation, boundary value problems for ordinary differential equations.
Prerequisites: MATH 304, MATH 309, MATH 311, or MATH 323; MATH 308; ability to program; junior or senior classification.

MATH 419 Applications of Actuarial Science
Credits 2. 2 Lecture Hours.
Applications of actuarial science using mathematical and statistical methods to assess risk in the insurance and finance industries; emphasis on probability, statistics, finance and economics; focus on using probabilistic models in the estimation of insurance premiums.
Prerequisite: MATH 411 or STAT 414 or approval of math advisor.

MATH 420 Application of Actuarial Science II
Credits 2. 2 Lecture Hours.
Use of mathematical and statistical methods to price various financial instruments, such as bonds; understanding how the term structure of interest rates affect the price of these instruments.
Prerequisite: MATH 325 or concurrent enrollment, or approval of instructor.

MATH 423 Linear Algebra II
Credits 3. 3 Lecture Hours.
Eigenvalues, similarity and canonical forms, advanced topics to be chosen by the instructor.
Prerequisites: MATH 220 or CSCE 222/ECEN 222; MATH 304 or MATH 323, or approval of instructor.

MATH 425 The Mathematics of Contingent Claims
Credits 3. 3 Lecture Hours.
The mathematical theory associated with asset price dynamics; binomial pricing models; Black-Scholes analysis; hedging; volatility smile; implied volatility trees; implied binomial trees.
Prerequisites: MATH 308; MATH 411, STAT 211 or STAT 414.

MATH 427 Introduction to Number Theory
Credits 3. 3 Lecture Hours.
Prime and composite integers; Euclidean algorithm; modular arithmetic; Chinese remainder theorem; unique factorization; quadratic reciprocity; Riemann zeta function; representation of numbers as a sum of squares.
Prerequisites: MATH 220; MATH 304 or MATH 323.

MATH 431 Structures and Methods of Combinatorics
Credits 3. 3 Lecture Hours.
Enumerative techniques generating functions, partially ordered sets, elementary graph theory, elementary Ramsey theory.
Prerequisite: MATH 220 or MATH 302 or approval of instructor.

MATH 433 Applied Algebra
Credits 3. 3 Lecture Hours.
An introduction to groups, rings, fields with emphasis on modular arithmetic; applications to number theory, coding theory, and other areas.
Prerequisites: MATH 220 or MATH 302; MATH 304 or MATH 323.
MATH 436 Introduction to Topology
Credits 3.3 Lecture Hours.
Metric spaces; continuity of metric spaces; topological spaces; basic notions; separation axioms; compactness; local compactness; connectedness; basic notions in homotopy theory; quotient spaces, paracompactness and topological manifolds.
Prerequisites: MATH 220; MATH 221, MATH 251, or MATH 253.

MATH 437 Principles of Numerical Analysis
Credits 4.3 Lecture Hours. 3 Lab Hours.
Mathematical principles of numerical analysis and their application to the study of particular methods; fixed-point iteration, Newton’s method; normed vector spaces and operators, Schur decomposition, convergent matrices, minimization methods, conjugate gradient method; polynomial interpolation of Lagrange and Hermite; best approximation, Bernstein and Weierstrass Theorems, numerical quadrature.
Prerequisites: MATH 304, MATH 309, MATH 311, or MATH 323; MATH 308; MATH 409; ability to program; junior or senior classification.

MATH 439 Differential Geometry of Curves and Surfaces
Credits 3.3 Lecture Hours.
Local and global theory of parameterized curves; regular surfaces, local coordinates, first fundamental form, orientation, area; Gauss map, second fundamental form; Gauss Bonnet theorem; additional topics to be selected by the instructor.
Prerequisites: MATH 308; MATH 304 or MATH 323.

MATH 442 Mathematical Modeling
Credits 3.3 Lecture Hours.
The construction of mathematical models from areas such as economics, game theory, integer programming, mathematical biology and mathematical physics.
Prerequisites: MATH 304, MATH 309, MATH 311, or MATH 323; MATH 308 or equivalent.

MATH 446 Principles of Analysis I
Credits 3.3 Lecture Hours.
Construction of the real and complex numbers; topology of metric spaces, compactness and connectedness; Cauchy sequences, completeness and the Baire Category Theorem; Continuous Mappings; introduction to Point-Set Topology.
Prerequisites: MATH 409; junior or senior classification.

MATH 447 Principles of Analysis II
Credits 3.3 Lecture Hours.
Riemann-Stieltjes integration; sequences and series of functions; the Stone-Weierstrass and Arzela-Ascoli Theorems; introduction to Lebesgue measure theory and integration.
Prerequisites: MATH 446 or approval of instructor; junior or senior classification.

MATH 460 Tensors and General Relativity
Credits 3.3 Lecture Hours.
Vectors and tensors in special relativity, curvature, manifolds, covariant differentiation, Einstein field equations, Schwarzschild geometry and black holes, cosmology, gauge field theories.
Prerequisites: MATH 308; PHYS 331 or MATH 323 or MATH 311; junior or senior classification.

MATH 467 Modern Geometry
Credits 3.3 Lecture Hours.
Modern development of Euclidean geometry (Hilbert axioms) with historical and philosophical context; independence of the parallel postulate; models of hyperbolic non-Euclidean geometry.
Prerequisite: MATH 304 or MATH 323.

MATH 469 Introduction to Mathematical Biology
Credits 3.3 Lecture Hours.
Introduction to mathematical modeling techniques in the biological sciences; continuous versus discrete models; deterministic versus stochastic models; includes population dynamics and ecology, spread of infectious diseases, population genetics and evolution, spatial pattern formation.
Prerequisites: MATH 304 or MATH 323; MATH 308 or equivalent.

MATH 470 Communications and Cryptography
Credits 3.3 Lecture Hours.
Introduction to coded communications, digital signatures, secret sharing, one-way functions, authentication, error control and data compression.
Prerequisites: MATH 304 or MATH 309 or MATH 311 or MATH 323; CSCE 110 or CSCE 111 or CSCE 121 or CSCE 206 or ENGR 112; approval of instructor.

MATH 471 Communications and Cryptography II
Credits 3.3 Lecture Hours.
Additional topics in coded communications; information and entropy, elliptical curves, error corrections, quantum methods.
Prerequisites: MATH 470 or consent of instructor.

MATH 482 Research Seminar
Credits 3.3 Lecture Hours.
Problems, methods and recent developments in mathematics, with emphasis on projects, and written and oral presentations. May be repeated for credit.
Prerequisites: MATH 409 or MATH 415 (may be taken concurrently); junior or senior classification; approval of instructor.

MATH 485 Directed Studies
Credits 1 to 8.1 to 8 Other Hours.
Special problems in mathematics not covered by any other course in the curriculum. Work may be in either theory or laboratory.
Prerequisite: Approval of department head.

MATH 488 Specified Topics in...
Credits 1 to 4.1 to 4 Lecture Hours.
Selected topics in an identified area of mathematics. May be repeated for credit.
Prerequisite: Approval of instructor.

MATH 490 The Putnam Challenge
Credit 1.1 Lecture Hour.
Intensive personalized training for preparation for the Putnam Exam, a national contest for mathematics majors. May be taken four times for credit.
Prerequisites: Approval of instructor; junior or senior classification.

MATH 491 Research
Credits 0 to 3.0 to 3 Other Hours.
Active research of basic nature under supervision of Department of Mathematics or affiliated department graduate faculty member; a maximum of 6 hours of credit can be used in degree plans. Registration in multiple sections of this course is possible within a given semester provided that the per semester credit hour limit is not exceeded.
Prerequisites: Mathematics or applied mathematical sciences major; junior or senior classification or approval of mathematics advisor.
MEEN - Mechanical Engineering (MEEN)

MEEN 210 Geometric Modeling for Mechanical Design
Credits 2. 1 Lecture Hour. 2 Lab Hours.
Foundations of geometric modeling as applied to mechanical design through use of modern computer-aided design (CAD) and physical prototyping tools; basics of systematic design methodology; geometric visualization concepts; multiview orthographic, isometric, oblique, perspective; three-dimensional representations, surface and solid modeling; dimensioning and tolerancing; rapid prototyping using 3D printing.
Prerequisites: Mechanical engineering major; ENGR 111.

MEEN 221 Statics and Particle Dynamics
Credits 3. 3 Lecture Hours.
Application of the fundamental principles of Newtonian mechanics to the statics and dynamics of particles; equilibrium of trusses, frames, beams and other rigid bodies.
Prerequisites: For non-mechanical engineering majors; admission to an engineering major; MATH 251 or MATH 253 or registration therein; PHYS 218.

MEEN 222/MSEN 222 Materials Science
Credits 3. 3 Lecture Hours.
Mechanical, optical, thermal, magnetic and electrical properties of solids; differences in properties of metals, polymers, ceramics and composite materials in terms of bonding and crystal structure.
Prerequisites: CHEM 102, or CHEM 104 and CHEM 114, or CHEM 107 and CHEM 117; PHYS 218.
Cross Listing: MSEN 222/MEEN 222.

MEEN 225 Engineering Mechanics
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Application of the laws of classical mechanics to simplified, plausibly real world problems or interest to mechanical engineering, including the analysis of cables, frames, trusses, beams, machines and mechanisms.
Prerequisites: Mechanical engineering major; MATH 251 or MATH 253 or registration therein; PHYS 218.

MEEN 260 Mechanical Measurements
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Introduction to the basic principles of engineering experimentation including: instrumentation and measurement techniques, signal processing and data acquisition, statistical data analysis, and interpretation and reporting of results.
Prerequisites: MEEN 225, ECEN 215, MATH 308 and MEEN 315 or registration therein.

MEEN 289 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Selected topics in an identified area of mechanical engineering. May be repeated for credit.
Prerequisite: Approval of instructor.

MEEN 291 Research
Credits 1 to 4. 1 to 4 Other Hours.
Research conducted under the direction of faculty member in mechanical engineering. May be repeated 2 times for credit.
Prerequisites: Freshman or sophomore classification and approval of instructor.

MEEN 315 Principles of Thermodynamics
Credits 3. 3 Lecture Hours.
Theory and application of energy methods in engineering; conservation of mass and energy; energy transfer by heat, work and mass; thermodynamic properties; analysis of open and closed systems; the second law of thermodynamics and entropy; gas, vapor and refrigeration cycles.
Prerequisites: MEEN 225; MATH 251 or MATH 253; junior or senior classification.

MEEN 344 Fluid Mechanics
Credits 3. 3 Lecture Hours.
Application of laws of statics, buoyancy, stability and momentum to behavior of ideal and real fluids; dimensional analysis and similarity and their application to flow through ducts and piping; lift and drag and related problems.
Prerequisites: MEEN 225 and MEEN 315.

MEEN 345 Fluid Mechanics Laboratory
Credit 1. 3 Lab Hours.
Introduction to basic fluid mechanics instrumentation; experimental verification and reinforcement of the analytical concepts introduced in MEEN 344.
Prerequisites: MEEN 260; MEEN 344 or registration therein.

MEEN 357 Engineering Analysis for Mechanical Engineers
Credits 3. 3 Lecture Hours.
Practical foundation for the use of numerical methods to solve engineering problems: Introduction to Matlab, error estimation, Taylor series, solution of non-linear algebraic equations and linear simultaneous equations; numerical integration and differentiation; initial value and boundary value problems; finite difference methods for parabolic and elliptic partial differential equations.
Prerequisites: ENGR 112 and MATH 308; MEEN 210 or concurrent enrollment.

MEEN 360 Materials and Manufacturing Selection in Design
Credits 3. 3 Lecture Hours.
Selecting materials and manufacturing processes in design; emphasis on material mechanical properties; microstructure production and control; manufacturing processes for producing various shapes for components and structures; use of design methodology.
Prerequisites: MEEN 210, MEEN 222/MSEN 222, MEEN 260; CVEN 305; junior or senior classification.

MEEN 361 Materials and Manufacturing in Design Laboratory
Credit 1. 3 Lab Hours.
Experiments in materials characterization and manufacturing processes; emphasis on material mechanical properties; microstructure production and control; manufacturing processes for producing various shapes for components and structures.
Prerequisites: MEEN 222/MSEN 222, MEEN 260; CVEN 305; MEEN 360 or registration therein; junior or senior classification or approval of instructor.

MEEN 363 Dynamics and Vibrations
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Dynamics and Vibration. Application of Newtonian and energy methods to model dynamic systems (particles and rigid bodies) with ordinary differential equations; solution of models using analytical and numerical approaches; interpreting solutions; linear vibrations.
Prerequisites: MEEN 225; MATH 308; MEEN 357 or concurrent enrollment; CVEN 305 or concurrent enrollment.
MEEN 364 Dynamic Systems and Controls  
Credits 3.2 Lecture Hours. 3 Lab Hours.  
Mathematical modeling, analysis, measurement and control of dynamic  
systems; extensions of modeling techniques of MEEN 363 to other types  
of dynamic systems; introduction to feedback control, time and frequency  
domain analysis of control systems, stability, PID control, root locus;  
design and implementation of computer-based controllers in the lab.  
Prerequisites: MEEN 260 and MEEN 363; ECEN 215.  

MEEN 368 Solid Mechanics in Mechanical Design  
Credits 3.2 Lecture Hours. 2 Lab Hours.  
Stress analysis of deformable bodies and mechanical elements; stress  
transformation; combined loading; failure modes; material failure theories;  
fracture and fatigue; deflections and instabilities; thick cylinders; curved  
beams; design of structural/mechanical members; design processes.  
Prerequisites: CVEN 305; MEEN 357 and MEEN 360 or registration  
therein; junior or senior classification.  

MEEN 381 Seminar  
Credit 1.2 Other Hours.  
Presentations by practicing engineers and faculty addressing: effective  
communications, engineering practices, professional registration, ethics,  
career-long competence, contemporary issues, impact of technology  
on society and being informed; preparation of a resume, a lifelong  
learning plan, two papers, two oral presentations and complete an online  
assessment of the mechanical engineering program.  
Prerequisite: Upper-level classification in mechanical engineering.  

MEEN 401 Introduction to Mechanical Engineering Design  
Credits 3.2 Lecture Hours. 3 Lab Hours.  
The design innovation process; need definition, functional analysis,  
performance requirements and evaluation criteria, conceptual design  
evaluation, down-selected to an embodiment; introduction to systems  
and concurrent engineering; parametric and risk analysis, failure mode  
analysis, material selection, and manufacturability; cost and life cycle  
issues, project management.  
Prerequisites: MEEN 360, MEEN 361, MEEN 364, MEEN 368,  
MEEN 461.  

MEEN 402 Intermediate Design  
Credits 3.2 Lecture Hours. 3 Lab Hours.  
Product detail design and development process including case studies;  
project management, marketing considerations, manufacturing, detailed  
design specifications; failure modes, application of codes and standards,  
selection of design margins; product (component) development guidelines;  
intellectual property, product liability and ethical responsibility.  
Prerequisites: MEEN 401; junior or senior classification.  

MEEN 404 Engineering Laboratory  
Credits 3.2 Lecture Hours. 3 Lab Hours.  
Systematic design of experimental investigations; student teams identify  
topics and develop experiment designs including: establishing the need;  
functional decomposition; requirements; conducting the experiment;  
analyzing and interpreting the results and written and oral reports  
documenting the objectives, procedure, analysis, and results and  
conclusion of two or three experiments.  
Prerequisites: MEEN 260, MEEN 360, MEEN 361, MEEN 364  
and MEEN 461; MEEN 401 or registration therein; junior or senior  
classification.  

MEEN 408 Introduction to Robotics  
Credits 3.3 Lecture Hours.  
Forward and inverse kinematics of robot manipulators, path planning,  
motion planning for mobile robots, dynamics of robot manipulators, control  
algorithms; computed torque algorithm, adaptive control algorithms and  
current topics in mobile robots; cooperative motion planning of mobile  
robots and formation control.  
Prerequisites: MEEN 364 or equivalent; junior or senior classification.  

MEEN 410 Internal Combustion Engines  
Credits 3.3 Lecture Hours.  
Thermodynamics of cycles for internal combustion engines and gas  
turbines, including fuels and combustion; performance characteristics of  
various types of engines.  
Prerequisite: MEEN 344 or equivalent or approval of instructor.  

MEEN 411 Mechanical Controls  
Credits 3.3 Lecture Hours.  
Application of classical and modern control theory techniques to modeling,  
analysis and synthesis of linear, mechanical control systems.  
Prerequisite: MEEN 364.  

MEEN 414 Principles of Turbomachinery  
Credits 3.3 Lecture Hours.  
Aero-thermodynamic and mechanical design of turbomachinery  
components including steam and gas turbine stages, compressor stages,  
and inlet and exhaust systems, and their integration into power and  
thrust generation units; design and off-design behaviors of turbine and  
compressor stages and units; design with SolidWorks.  
Prerequisites: MEEN 421 or approval of instructor; junior or senior  
classification.  

MEEN 417/NUEN 417 Basics of Plasma Engineering and Applications  
Credits 3.3 Lecture Hours.  
Basic plasma properties and confinement techniques; single particle  
orbits in electric and magnetic fields, moments of Boltzmann equation and  
introduction to fluid theory; wave phenomena in plasmas and introduction  
to plasma kinetic theory; analysis of laboratory plasmas and plasma  
applications including fusion, electric propulsion, materials processing and  
plasmas enhanced chemistry.  
Prerequisites: PHYS 208 or equivalent; senior classification in nuclear,  
mechanical or aerospace engineering, physics, or approval of instructor.  
Cross Listing: NUEN 417/MEEN 417.  

MEEN 421 Thermal-Fluids Analysis and Design  
Credits 3.3 Lecture Hours.  
Integration of thermodynamics, fluid mechanics and heat transfer through  
application to the design of various thermal systems comprised of several  
components requiring individual analyses; analysis of the entire system;  
representative applications of thermal-fluids analysis with a design  
approach.  
Prerequisites: MEEN 461; MEEN 315; junior or senior classification.  

MEEN 430 Nanomaterials  
Credits 3.3 Lecture Hours.  
Fundamentals of nanotechnology, including nanomaterials, types of  
nanomaterials, fabrication, characterization methods, and applications;  
explore current roles in technology and future impact on such systems on  
industry.  
Prerequisites: Junior or senior classification and approval of instructor.
MEEN 431 Advanced System Dynamics and Controls  
Credits 3.3 Lecture Hours.  
Unified framework for modeling, analysis, synthesis, design and simulation of mechanical systems with energy exchange across multiple domains; study of mechanical, electrical, hydraulic and thermal subsystems; Newtonian mechanics, rigid body dynamics, multiple degrees of freedom vibrations and control system design.  
Prerequisites: MEEN 364; junior or senior classification.

MEEN 432 Automotive Engineering  
Credits 3.3 Lecture Hours.  
Introduction to vehicle dynamics; application of engineering mechanics principles to analysis of acceleration and braking, cornering and handling; analysis and design of drive train, suspension, brakes, and tires to achieve desired performance.  
Prerequisite: MEEN 363.

MEEN 433 Mechatronics  
Credits 3.2 Lecture Hours. 3 Lab Hours.  
Basic principles of digital logic and analog circuits in mechanical systems; electrical-mechanical interfacing; sensors and actuators; digital control implementation; precision design and system integration.  
Prerequisite: MEEN 364 or equivalent.

MEEN 434 Dynamics and Modeling of Mechatronic System  
Credits 3.3 Lecture Hours.  
Mechatronic interactions in lumped parameter and continuum systems; review of integral and differential electromagnetic laws, including motions; lumped elements and dynamic equations of motion; linear and nonlinear actuators and transducers; field transformation and moving media; electromagnetic force densities and stress tensors.  
Prerequisite: MEEN 364.

MEEN 436 Principles of Heating, Ventilating and Air Conditioning  
Credits 3.3 Lecture Hours.  
Application of thermodynamics fluid mechanics, and heat transfer to the design of HVAC equipment; selection of equipment, piping and duct layouts.  
Prerequisite: MEEN 461 or equivalent.

MEEN 437 Principles of Building Energy Analysis  
Credits 3.3 Lecture Hours.  
Analysis of building energy use by applying thermodynamics and heat transfer to building heating and cooling load calculations; heat balance and radiant time series calculation methods; psychometric analysis, indoor air quality, effect of solar radiation on heating and cooling of buildings. Required design project.  
Prerequisites: MEEN 315 or equivalent; junior or senior classification.

MEEN 439 Solar Energy Engineering  
Credits 3.3 Lecture Hours.  
Solar energy; solar angles and radiation; solar thermal systems; solar water heating and space heating; concentrated solar power; energy storage; solar photovoltaics; solar cell manufacturing; other solar energy technologies.  
Prerequisite: MEEN 315.

MEEN 440 Bio-inspired Engineering Design  
Credits 3.3 Lecture Hours.  
Expand design space available to engineering by developing and understanding of how nature solves problems; study of effective bio-inspired design and biomimetic applications to draw solutions from nature; enhance concept generation through the use of bio-inspired design; use current state of the art methods in bioinspired design; view nature’s solutions to different problems form an engineering perspective.  
Prerequisite: MEEN 368, BMEN 361, or BAEN 375.

MEEN 441 Design of Mechanical Components and Systems  
Credits 3.3 Lecture Hours.  
Design of machine elements, characteristics of prime movers, loads and power transmission elements as related to mechanical engineering design.  
Prerequisite: MEEN 368 or approval of instructor.

MEEN 442 Computer Aided Engineering  
Credits 3.3 Lecture Hours.  
Effective and efficient use of modern computer hardware and software in modeling, design, and manufacturing; simulation of a broad spectrum of mechanical engineering problems.  
Prerequisites: MEEN 363 and MEEN 368.

MEEN 444 Finite Element Analysis in Mechanical Engineering  
Credits 3.3 Lecture Hours.  
Introduction to basic theory and techniques; one- and two-dimensional formulations for solid mechanics applications; direct and general approaches; broader aspects for field problems; element equations, assembly and solution schemes; computer implementation, programming and projects; error sources and application consideration.  
Prerequisites: MEEN 357 and 368 or equivalents.

MEEN 445 Engineering Applications of Solid Mechanics  
Credits 3.3 Lecture Hours.  
Mechanical and mathematical basis for modeling response of solid bodies undergoing coupled mechanical and non-mechanical effects, analysis of stress and deformation for structural members subjected to axial, torsional and bending loads, design of multifunctional systems.  
Prerequisites: CVEN 305, MEEN 368.

MEEN 451 Viscoelastic Materials  
Credits 3.3 Lecture Hours.  
Mechanical and mathematical basis for modeling linear viscoelastic materials which focus on polymeric solid materials; characterization of viscoelastic material properties from experimental tests; applications of stress and deformation relationships for viscoelastic structural members subjected to axial, torsional, and bending loads.  
Prerequisites: CVEN 305; junior or senior classification.

MEEN 452 Engineering with Plastics  
Credits 3.3 Lecture Hours.  
Polymer structure, processing, property characterization at the molecular, microscopic and macroscopic dimensional levels for thermosets, thermoplastics, elastomers, fibers and advanced fibrous nonparticle filled composites and smart multi-performance structures.  
Prerequisite: MEEN 222/MSEN 222 or approval of instructor.

MEEN 458 Processing and Characterization of Polymers  
Credits 3.3 Lecture Hours.  
Introduction of flow behavior in polymers; structure-property-process relationship; mixing rules for polymer blends; mechanical properties; laboratory demonstrations: injection molding, extrusion, melt mixing, and study of morphology using OM, SEM, and TEM.  
Prerequisite: MEEN 222/MSEN 222.

MEEN 459 Sound and Vibration Measurements  
Credits 3.3 Lecture Hours.  
Basic acoustics, review of vibration theory, wave propagation in vibrating systems, sound radiation from vibrating systems, sound and vibration sensors and instrumentation, data acquisition systems, measurement techniques, spectral analysis, spatial FFT analysis, design of experiments with vibro-acoustic systems, applications.  
Prerequisites: MEEN 363; MATH 308.
MEEN 460 Corrosion Engineering  
Credits 3.3 Lecture Hours.  
Basic corrosion phenomena are described, including mixed potential theory, types of corrosion, experimental methods, and prevention techniques.  
Prerequisite: MEEN 360 and MEEN 361, or equivalent.

MEEN 461 Heat Transfer  
Credits 3.3 Lecture Hours.  
Heat transfer by conduction, convection and radiation: steady and transient conduction, forced and natural convection, and blackbody and gray body radiation; multi-mode heat transfer; boiling and condensation; heat exchangers.  
Prerequisites: MEEN 344; MATH 308.

MEEN 463 Cogeneration Systems  
Credits 3.3 Lecture Hours.  
Design and analysis of cogeneration system; selection of the prime mover, matching power and thermal needs, institutional factors, economic evaluations, financial options and the study of actual and hypothetical systems.  
Prerequisite: MEEN 421 or equivalent.

MEEN 464 Heat Transfer Laboratory  
Credit 1.3 Lab Hours.  
Basic measurement techniques in conduction, convection, and radiation heat transfer; experimental verification of theoretical and semi-empirical results; uncertainly analysis.  
Prerequisite: MEEN 345, MEEN 461 or registration therein.

MEEN 467 Mechanical Behavior of Materials  
Credits 3.3 Lecture Hours.  
Fundamentals of flow and fracture in metals, emphasizing safe design by anticipating response of materials to complex stress and environmental service conditions; micromechanisms of flow, fatigue, creep and fracture; fracture mechanics approach to design. Special emphasis given to microstructure-mechanical property relationship and damage tolerant design.  
Prerequisite: MEEN 360 and MEEN 361.

MEEN 469 Alternative Energy Conversion  
Credits 3.3 Lecture Hours.  
Design and analysis of alternative energy conversion processes and systems that are based on converting energy directly (e.g., fuel cells, photovoltaics), utilizing non-combustible heat sources (e.g., geothermal, ocean gradients, solar and nuclear fission and fusion) and obtaining energy from the environment (e.g., wind, hydroelectric, ocean tides and waves).  
Prerequisite: MEEN 315.

MEEN 471 Elements of Composite Materials  
Credits 3.3 Lecture Hours.  
Fundamentals concerned with relating structure of multiphase materials to physical properties; plastic, metallic and ceramic matrices reinforced with continuous and discontinuous fibers, whiskers and particulates.  
Prerequisites: MEEN 360, MEEN 361, and MEEN 368 or approval of instructor.

MEEN 472 Gas Dynamics  
Credits 3.3 Lecture Hours.  
Fundamental analysis of compressible flows and its application to supersonic airfoils/projectiles, jet and rocket nozzles, normal and oblique shock waves, explosion waves, shock tubes, supersonic wind tunnels, and compressible pipe flows.  
Prerequisite: MEEN 344.

MEEN 475 Materials in Design  
Credits 3.3 Lecture Hours.  
The heuristics of synthesis of material properties, configuration and processing in the optimization of material selection in the design process; product design and development overview, failure mode effects analysis, design margin establishment; role of the generic failure modes and codes and standards; fundamental characteristics of process methods.  
Prerequisites: MEEN 360 and MEEN 361; CVEN 305.

MEEN 477 Air Pollution Engineering  
Credits 3.3 Lecture Hours.  
Fundamentals of manufacturing techniques at the nanoscale and larger length scales; design approaches and issues; direct fabrication of nanostructures; nanomanufacturing as a building block to larger objects; fabrication of composites and devices utilizing nanoscale components.  
Prerequisites: MEEN 222/MSEN 222 or approval of instructor; junior or senior classification.

MEEN 483 Directed Studies  
Credits 1 to 6.1 to 6 Other Hours.  
Special problems relating to a specific project in some phase of mechanical engineering. A commitment of two semesters with 6 hours 485 credit is required.  
Prerequisites: Approval of department head and senior classification.

MEEN 487 Materials in Design  
Credits 3.3 Lecture Hours.  
The heuristics of synthesis of material properties, configuration and processing in the optimization of material selection in the design process; product design and development overview, failure mode effects analysis, design margin establishment; role of the generic failure modes and codes and standards; fundamental characteristics of process methods.  
Prerequisites: MEEN 360 and MEEN 361; CVEN 305.

MEEN 491 Research  
Credits 1 to 4.1 to 4 Other Hours.  
Research conducted under the direction of faculty member in mechanical engineering. May be repeated 2 times for credit. Registration in multiple sections of this course is possible within a given semester provided that the per semester credit hour limit is not exceeded.  
Prerequisites: Junior or senior classification and approval of instructor.

MEFB - Mid Grds Ed Field Based (MEFB)

MEFB 351 Introduction to Middle Grades: Adolescent Development, Philosophy and Organization  
Credits 3.2 Lecture Hours. 6 Lab Hours.  
Study of young adolescents in domains of physical, social, emotional, cognitive, interpersonal, moral growth and development; organizational structure of middle schools supporting development of young adolescents through teaming and interdisciplinary work; investigates roles and responsibilities of middle level teachers.  
Prerequisite: Junior classification.
MEFB 450 Social Studies Methods in the Middle Grades
Credits 3. 2 Lecture Hours. 6 Other Hours.
Trends and issues related to middle grades curriculum development and instruction in social studies and humanities; integration of content, planning, teaching-learning experiences; evaluation of teaching and learning in social studies.
Prerequisites: MEFB 352; admission to teacher education; senior classification.
Corequisites: RDNG 470 and RDNG 490.

MEFB 452 Curriculum and Instruction for Middle Grades
Credits 3. 2 Lecture Hours. 6 Other Hours.
Study of educational theory and instructional strategies appropriate to middle grades education including planning and development of interdisciplinary and multidisciplinary curricula; student centered learning and methodologies.
Prerequisites: Admission to teacher education; senior classification.

MEFB 460 Math Methods in Middle Grades
Credits 3. 2 Lecture Hours. 6 Other Hours.
Examines theories, provides practice in teaching methods essential to successful mathematics learning; focuses on content and criteria central to teaching mathematics for understanding, skill development, and problem solving; readings, discussions, analyses; modeling and practicing mathematics teaching and learning.
Prerequisites: MASC 351 and MASC 450; admission to teacher education; senior classification.
Corequisites: MEFB 452, MEFB 470, RDNG 490.

MEFB 470 Science Methods in Middle Grades
Credits 3. 2 Lecture Hours. 6 Other Hours.
Problems-based-learning course integrating science content, scientific inquiry skills and field-based instruction; technology-mediated teaching, learning, and assessment.
Prerequisites: MEFB 352; admission to teacher education; senior classification.
Corequisites: MEFB 460; MASC 450.

MEFB 497 Supervised Clinical Teaching
Credits 6. 30 Other Hours.
Culmination of teaching education program; integrate and apply knowledge and skills learned from program of study while observing and participating in accredited schools with university supervision. Must be taken on a satisfactory/unsatisfactory basis.
Prerequisites: Admission and retention in teacher education program; successful completion of all coursework.

MEPS-Molecular & Env Plant Sci (MEPS)

MEPS 291 Research
Credits 1 to 4. 1 to 4 Other Hours.
Research conducted under the direction of faculty member in molecular and environmental plant sciences. May be repeated 3 times for credit.
Prerequisites: Freshman or sophomore classification and approval of instructor.

MEPS 313 Introduction to Plant Physiology
Credits 3. 3 Lecture Hours.
General course dealing with principal life processes of higher plants; influence of environmental factors on these processes. Agricultural and ecological significance of life processes of plants.
Prerequisites: BIOL 101; CHEM 102 or CHEM 104; CHEM 222 or CHEM 228.

MEPS 316 Introduction to Theory and Practice of Plant Physiology
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Theory of plant physiology related to purposeful practices for improving plant adaptation, productivity and quality and for protecting and remediating environments in agriculture; laboratory experiments of physiology of plant structure, components and culture; water relations and stress; nitrogen and mineral nutrition; gas exchange; hormonal regulation.
Prerequisites: BIOL 101; CHEM 101; junior or senior classification.

MEPS 411/GENE 411 Biotechnology for Crop Improvement
Credits 3. 3 Lecture Hours.
Use of biotechnology to improve agricultural, horticultural and forest crops; techniques and methods used and case studies where biotechnology has been used to alter traits such as pathogen resistance, protein or oil consumption, ripening, fertility and wood properties.
Prerequisite: BIOL 113 or equivalent.
Cross Listing: GENE 411/MEPS 411.

MEPS 485 Directed Studies
Credits 1 to 4. 1 to 4 Other Hours.
Credit 1 to 4 each semester. Individual problems or research not covered by other coursework. Report required.
Prerequisites: Junior or senior classification and prior approval of instructor or department head.

MEPS 489 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Selected topics in an identified area of plant physiology. May be repeated for credit.

MEPS 491 Research
Credits 1 to 4. 1 to 4 Other Hours.
Research conducted under the direction of faculty member in molecular and environmental plant sciences. May be repeated 3 times for credit. Registration in multiple sections of this course are possible within a given semester provided that the per semester credit hour limit is not exceeded.
Prerequisites: Junior or senior classification and approval of instructor.

METR - Meteorology (METR)

METR 302 Weather Reports and Forecasting
Credits 3. 3 Lecture Hours.
Weather and Reports Forecasting. Basic description of atmospheric characteristics and processes relevant to the understanding of weather patterns and atmospheric principles.
Prerequisite: Junior or senior classification or approval of instructor.

MGMT - Management (MGMT)

MGMT 105 Introduction to Business
Credits 3. 3 Lecture Hours.
(BUSI 1301) Introduction to Business. Survey of economic systems, forms of business ownership and running the small business; organizing and managing businesses; managing human resources; managing production and information; managing marketing; introducing financial issues including accounting, money, and banking, securities markets; business issues and challenges including legal and regulatory environment, business ethics, and international business. Limited to students in freshman or sophomore classification.
MGMT 209 Business, Government and Society
Credits 3. 3 Lecture Hours.
Impact of the external environment—legal, political, economic and international—on business behavior; market and non-market solutions to contemporary public policies confronting business persons examined including antitrust law, employment and discrimination law, product safety regulation, consumer protection and ethics. May not be used to satisfy degree requirements for majors in business.
Prerequisites: Sophomore classification; for students other than business and agribusiness majors.

MGMT 211 Legal and Social Environment of Business
Credits 3. 3 Lecture Hours.
Role of government in business and society; analysis of social policy and legal institutions; ethical problems in management decisions; administrative law; antitrust law; employment and discrimination law; regulation of business transactions; protection of property rights; regulation of information in markets including securities and product safety; international business law.
Prerequisite: Sophomore classification.

MGMT 212 Business Law
Credits 3. 3 Lecture Hours.
(BUSI 2301) Business Law. Legal principles of business; legal reasoning; dispute resolution and procedure; contract law; bankruptcy law; property law; Uniform Commercial Codes sections concerning contracts, security interests, negotiable instruments and sales.
Prerequisite: Sophomore classification.

MGMT 261 Introduction to Entrepreneurship
Credit 1. 1 Lecture Hour.
Exposure to the mindset of entrepreneurship through interaction with successful entrepreneurs and hands-on activities for exploring the 21st century global entrepreneurial economy. May be taken two times for credit. Must be taken on a satisfactory/unsatisfactory basis.
Prerequisite: Freshman classification in the Startup Living Learning Community.

MGMT 289 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours. 0 to 4 Lab Hours.
Selected topics in an identified area of business and management. May be repeated for credit.
Prerequisite: Approval of instructor.

MGMT 309 Survey of Management
Credits 3. 3 Lecture Hours.
Survey for non-business majors of the basic functions and responsibilities of managers; includes the environmental context of management, planning and decision making, organization structure and design, leading and managing people, and the controlling process; issues of globalization, ethics, quality and diversity integrated throughout the course. May not be used to satisfy degree requirements for majors in business.
Prerequisites: Junior classification; for students other than business and agribusiness majors.

MGMT 363 Managing People in Organizations
Credits 3. 3 Lecture Hours.
The role and importance of human behavior in organizations; models for understanding individual, group, and team dynamics, including individual differences, motivation, and leadership; managing organizational change; ethical issues in organizations; cross-cultural issues in managing people in organizations; the organizational context as determined by human resource management and organization design.
Prerequisite: MGMT 211 and admission to upper division in Mays Business School.

MGMT 372 Advanced Concepts in Organizational Behavior
Credits 3. 3 Lecture Hours.
Builds on the survey of organizational behavior in MGMT 363; review of core concepts and their application in organizational settings; includes personality and individual differences, job design, group and team dynamics, leadership and decision-making, conflict and cooperation, cross-cultural aspects of behavior in organizations.
Prerequisite: MGMT 363.

MGMT 373 Managing Human Resources
Credits 3. 3 Lecture Hours.
Strategic issues in managing human resources; shared responsibilities of line managers and human resource staff for developing and implementing human resource policies and procedures; human resource planning; job design, analysis and evaluation; staffing; compensation; performance appraisal; training and development; career management; labor relations; legal, ethical and international issues.
Prerequisite: MGMT 363.

MGMT 422 Management Consulting
Credits 3. 3 Lecture Hours.
The field of management consulting from the perspective of both the individual consultant and the consulting firm; fundamentals of diagnosing situations, planning and executing assignments, client management, common mistakes and ethical issues in consulting including a variety of diagnostic and problem-solving methodologies.
Prerequisite: MGMT 363.

MGMT 424 Organizational Design, Change and Development
Credits 3. 3 Lecture Hours.
Aspects of effectively planning for and introducing changes in organizational structures and procedures based on environmental demands; examination of the successful management of organizational and behavioral changes, focusing on planned and unplanned changes, and emphasizing development of change strategies and measurement of change effectiveness.
Prerequisite: MGMT 363.

MGMT 425 Human Resource Selection
Credits 3. 3 Lecture Hours.
Theory and application of methods for the recruitment and selection of managerial, non-professional and professional employees; exposure to scientific issues such as reliability and validity, legal issues such as equal opportunity and affirmative action, and selection techniques such as interviews and testing.
Prerequisite: MGMT 373.

MGMT 427 Human Resource Compensation
Credits 3. 3 Lecture Hours.
Theories and techniques of designing and managing programs of direct compensation and benefits, including the role of rewards in motivation, job evaluation, pay discrimination and comparable worth, internal and external equity comparisons and benefit plans.
Prerequisite: MGMT 373.

MGMT 429 Labor and Industry
Credits 3. 3 Lecture Hours.
Brief review of the history of organized labor; critical study of labor-management relations; analysis of fundamentals of labor contracts and administration of contract parts.
Prerequisite: Admission to upper division in Mays Business School.
MGMT 430/WGST 430 Employment Discrimination Law
Credits 3. 3 Lecture Hours.
Legal issues surrounding employment discrimination, including disparate treatment and impact; intent; affirmative action; sexual harassment; pregnancy, sex, race, religious, salary, disability, age, and ethnic discrimination; policy issues and perspectives to aid human resource specialists and managers.
Prerequisites: Admission to upper division in Mays Business School and senior classification.
Cross Listing: WGST 430/MGMT 430.

MGMT 432 Managing the Nonprofit Organization
Credits 3. 3 Lecture Hours.
Broad trends shaping the nonprofit sector, a primary driver of social change and key player in society and the economy that provides an array of goods and services; complex management challenges that confront nonprofits as they balance their mission and values against the requirements of effective management with limited resources.
Prerequisite. MGMT 363.

MGMT 435 Labor Law and Policy
Credits 3. 3 Lecture Hours.
Federal and state public policy and laws regulating human resource management including National Labor Relations Act, Railway Labor Act, Fair Labor Standards Act, employment discrimination statutes, statutes regarding public sector unionization, and other relevant legal authorities; various forms of dispute settlement including litigation, mediation, fact finding and arbitration; legal ramifications of strategic human resource management decision making.
Prerequisites: Admission to upper division in Mays Business School and senior classification.

MGMT 439 Negotiations
Credits 3. 3 Lecture Hours.
Overview of the various theories and processes of negotiation relevant to the broad spectrum of negotiation problems faced by employees and managers, and in situations outside of organizations; discovery of optimal solutions to problems and means to implement solutions through classroom simulations, role playing and case studies.
Prerequisite: MGMT 363.

MGMT 440 Creativity and Innovation in Business
Credits 3. 3 Lecture Hours.
Examines factors that may foster or stifle individual, team, organizational creative performance; presents techniques that may improve creative thinking skills.
Prerequisite: MGMT 363.

MGMT 450/IBUS 450 International Environment of Business
Credits 3. 3 Lecture Hours.
Broad survey of international business issues; analyzes the environment in which international businesses operate; examines international economic issues including trade theory, investment theory, foreign exchange and capital markets, and balance of payments; introduces multinational enterprises, global competition, international organizations, treaties and international law, national trade policies and the determinants of competitiveness of firms in international markets.
Prerequisite: Admission to upper division in Mays Business School.
Cross Listing: IBUS 450/MGMT 450.

MGMT 452/IBUS 452 International Management
Credits 3. 3 Lecture Hours.
An overview of international management to include international dimensions of organizational behavior, theory, strategy and human resource management; application of theoretical ideas to real-world situations through case analyses, presentations, projects and interactive class discussion.
Prerequisite: MGMT 450/IBUS 450 or IBUS 450/MGMT 450, or concurrent enrollment.
Cross Listing: IBUS 452/MGMT 452.

MGMT 453/IBUS 453 Emerging Economies: Brazil, Russia, India, China
Credits 3. 3 Lecture Hours.
Examination of present and future dynamics of the emerging economies of Brazil, Russia, India and China and their impact on the developing and developed worlds; importance of BRIC countries and their position in the world; history and development of these countries and the current business environment in each.
Prerequisite: MGMT 363.
Cross Listing: IBUS 453/MGMT 453.

MGMT 457/IBUS 457 Global Entrepreneurship
Credits 3. 3 Lecture Hours.
Practical issues associated with taking small- and medium-size business global; includes importing and exporting, developing global strategies, evaluating market opportunities, regional impact on economies and people.
Prerequisite: Admission to upper division in Mays Business School.
Cross Listing: IBUS 457/MGMT 457.

MGMT 460 Managing Projects
Credits 3. 3 Lecture Hours.
Application of management processes to complex interdisciplinary organizational environments through the study of program and project management; adoptions of traditional management theories to the project environment; master typical project management microcomputer software for project planning; resource allocation; project budgeting; and control of project cost, schedule and performance.
Prerequisite: MGMT 363.

MGMT 461 Entrepreneurship and New Ventures
Credits 3. 3 Lecture Hours.
The entrepreneurial process from conception of a business idea to the actual start up of the venture; environmental scanning for new opportunities; matching individual skills and attributes with the requirements of the venture; evaluating the viability, growth potential and markets for the venture; securing financing; beginning operations.
Prerequisites: Admission to upper division in Mays Business School and senior classification.

MGMT 464 The Political Environment of Business
Credits 3. 3 Lecture Hours.
Role of business in contemporary society; the large corporation and its external environment; ownership and control controversy; private and collective choice processes; role of regulation; social issues including pollution, discrimination, consumer protection, corporate social and ethical responsibilities, corporate political activity; international business relations.
Prerequisites: MGMT 363 and senior classification.
MGMT 465 Corporate Governance
Credits 3. 3 Lecture Hours.
Overview of the theories and practice of corporate governance; history of corporations, role and relationship of boards of directors, shareholders and management; concepts of agency cost, shareholder activism, executive compensation and international corporate governance in globalized markets; ethical issues and corporate social responsibility.
Prerequisite MGMT 363.

MGMT 466 Strategic Management
Credits 3. 3 Lecture Hours.
Strategic issues facing organizations, including top management decision making and social responsibility; environmental and industry analysis; establishing organizational mission and objectives; corporate, business and functional level strategy formulation; global and multidomestic strategies; strategic implementation and control; integrating operations, finance, marketing and human resource strategies; case analysis.
Prerequisites: MGMT 363; FINC 341; SCMT 364; MKTG 321; senior classification.

MGMT 470 Entrepreneurial Small Business
Credits 3. 3 Lecture Hours.
Exploration of practical approaches to growing a small business, evaluating and projecting financial performance, raising capital, legal formations and issues, human resource management, business plan development, franchising and family business; networking opportunities with local business leaders, successful former student entrepreneurs and current student entrepreneurs operating at the student incubator.
Prerequisites: Admission to upper division in Mays Business School and senior classification.

MGMT 475 Leadership Development
Credits 3. 3 Lecture Hours.
explores the evolution of leadership theory and practice with an emphasis on effective and ineffective leaders' traits, behaviors, and styles in profit and not-for-profit work organizations; reviews critical aspects of leader role behavior from theoretical and practical perspectives; examines leader effectiveness at the individual, group, and strategic level.
Prerequisite: MGMT 363.

MGMT 477 Entrepreneurial Consulting and Development
Credits 3. 3 Lecture Hours.
Application of current lean startup methodologies working directly with existing student entrepreneurs and mentors in preparing for the launch of a real business at the student incubator (Startup Aggieland); act as advocates and consultants assisting with organizational structure, marketing and market validation, financial analysis and risk assessment.
Prerequisites: Junior or senior classification and approval of instructor.

MGMT 481 Seminar in Management
Credit 1. 1 Other Hour.
Discussions and observation of current management practice in the public and private sectors of the nation; reading and discussion of current events and changes taking place in management theory and/or its application and practice in actual business and government situations. May be repeated for credit.
Prerequisites: Admission to upper division in Mays Business School; management major or approval of instructor.

MGMT 484 Management Internship
Credits 1 to 4. 1 to 4 Other Hours.
Internship in management: staffing; planning; leading and controlling. Enrollment is limited to those who have managerial responsibilities for the resources used by a business firm or the like.
Prerequisites: Management major; MGMT 363; approval of instructor prior to internship.

MGMT 485 Directed Studies
Credits 1 to 3. 1 to 3 Other Hours.
Credit 1 to 3 each semester. Directed study on selected problems in the area of management not covered in other courses.
Prerequisites: Admission to upper division in Mays Business School; senior classification and approval of department head.

MGMT 489 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours. 0 to 4 Lab Hours.
Selected topics in an identified area of management. Consult the professor offering a particular special topics course for details. May be repeated for credit.
Prerequisites: Admission to upper division in Mays Business School and approval of instructor.

MKTG - Marketing (MKTG)

MKTG 321 Marketing
Credits 3. 3 Lecture Hours.
Exploration of the activities and managerial decisions involved in the provision of products to customers; includes strategic marketing fundamentals, buyer behavior, market segmentation, managerial issues related to the marketing mix (product, pricing, distribution, and promotion) decision variables, and social and ethical issues.
Prerequisite: Admission to upper division in Mays Business School.
MKTG 322 Consumer Behavior
Credits 3.3 Lecture Hours.
Application of behavioral science designed to provide in-depth knowledge of the fundamental theories and concepts of consumer behavior, with an emphasis on consumers in the marketplace as individuals, as decision makers, and as influenced by culture.
Prerequisite: MKTG 321.

MKTG 323 Marketing Research
Credits 3.3 Lecture Hours.
Nature and uses of marketing research in business; methods of collecting, analyzing and interpreting data needed for business decisions, with specific application to problems in marketing.
Prerequisites: MKTG 321; SCMT 303 or AP STAT 301 or AP STAT 302 or AP STAT 303.

MKTG 325 Retailing Concepts and Policies
Credits 3.3 Lecture Hours.
Survey of the concepts, policies, theories, and practices for managing a retail firm in a competitive environment; topics include functions of retailers, retail customers, supply chain, legal and ethical behavior, location analysis, pricing, promotion, customer services, and layout.
Prerequisite: MKTG 321.

MKTG 326 Strategic Retailing
Credits 3.3 Lecture Hours.
Retail strategies such as channels of distribution, private labels, customer service levels, visual presentation, pricing, and marketing mix that influence a retail business model.
Prerequisite: MKTG 321.

MKTG 335 Professional Selling
Credits 3.3 Lecture Hours.
General principles of personal selling in both consumer and industrial markets plus specialty selling.
Prerequisite: MKTG 321.

MKTG 345 Social Media and Public Relations
Credits 3.3 Lecture Hours.
Marketing and promotional strategy related to social media, the internet and interactive media; managing publicity and public relations with a wide variety of stakeholders.
Prerequisite: MKTG 321.

MKTG 347 Advertising and Creative Marketing Communications
Credits 3.3 Lecture Hours.
Advertising and integrated marketing communications; market segmentation and targeting; development of multi-media campaigns; emphasis on enhancing creativity, critical thinking, and communication skills.
Prerequisite: MKTG 321.

MKTG 401/IBUS 401 Global Marketing
Credits 3.3 Lecture Hours.
Survey of the aspects involved in marketing goods and services in a global marketplace; social, political, legal, and economic issues associated with conducting business globally.
Prerequisite: MKTG 321.
Cross Listing: IBUS 401/MKTG 401.

MKTG 402/IBUS 402 International Marketing: Study Abroad
Credits 3.3 Lecture Hours.
Introduction to the facets of doing business in an international setting; provides exposure to a variety of foreign cultures; facilitates understanding of the international marketplace in which these students will function.
Prerequisites: MKTG 321 or MKTG 409; junior classification; 2.5 GPA overall.
Cross Listing: IBUS 402/MKTG 402.

MKTG 403/IBUS 403 International Market Entry Strategies
Credits 3.3 Lecture Hours.
A research-based course in which students prepare an analysis of a country, or region outside the U.S., and use it in the preparation of a marketing plan for a good or service to be introduced and marketed in that country.
Prerequisites: MKTG 321 or MKTG 409; concurrent registration in IBUS 402/MKTG 402 or MKTG 402/IBUS 402; junior or senior classification.
Cross Listing: IBUS 403/MKTG 403.

MKTG 404 Advanced Excel for Marketing Managers
Credit 1.1 Lecture Hour.
Hands-on practice and application of the Excel skills needed for marketing decision-making.
Prerequisites: MKTG 323.

MKTG 409 Principles of Marketing
Credits 3.3 Lecture Hours.
Survey of the basic concepts and decisions associated with product, promotion, distribution, and pricing; focuses on developing marketing strategies that contribute to building long-term customer relationships and achieving the organization's objectives. May not be used to satisfy degree requirements for a major in business.
Prerequisites: Junior classification; for students other than business and agribusiness majors.

MKTG 425 Retail Merchandising
Credits 3.3 Lecture Hours.
Theories, concepts and practices relating to the merchandising of products for enhancing sales and profit growth of retail businesses; emphasis on retail math, purchasing decisions, vendor negotiations, communications skills, assortment planning and competitive analysis.
Prerequisite: MKTG 321.

MKTG 426 Advanced Retail Case Study
Credits 3.3 Lecture Hours.
Problems and opportunities faced by retailing organizations; development of an effective strategy through application-oriented seminars and activities, interaction with industry guest speakers and executives; analysis of retail strategies in field settings and completion of a semester long retail audit; participation in a national case competition.
Prerequisites: Admission to upper division in Mays Business School and approval of instructor.

MKTG 430 Marketing Consulting
Credits 3.3 Lecture Hours.
Consulting tools and techniques, managing client relationships, preparing reports and presentations, problem-solving processes; semester-long client project.
Prerequisites: MKTG 323.
MKTG 431 Marketing Analytics
Credits 3. 3 Lecture Hours.
Data driven marketing strategy, data handling and management techniques, use of statistical software to estimate marketing models, project based course focused on marketing decision making.
Prerequisite: MKTG 321.

MKTG 432 Corporate Social Responsibility
Credits 3. 3 Lecture Hours.
Study of the role of corporate social responsibility, corporate governance and business ethics with an emphasis on the marketing perspective.
Prerequisites: MKTG 321.

MKTG 435 Advanced Selling
Credits 3. 3 Lecture Hours.
In-depth strategic account planning, extensive role-play and team selling exercises, sales analytics, networking and prospecting, strategic goal setting and time management.
Prerequisites: MKTG 335.

MKTG 436 Sales Management
Credits 3. 3 Lecture Hours.
Ethical planning, organizing, staffing, training, motivating and evaluating salespeople.
Prerequisite: MKTG 321.

MKTG 438 Strategic Digital Marketing
Credits 3. 3 Lecture Hours.
Implications of the internet and related digital technologies for marketing; evolution of the digital marketplace and impact on firms’ marketing mix decisions; competitive advantage; public policy issues; future trends and developments.
Prerequisite: MKTG 321.

MKTG 440 Services Marketing
Credits 3. 3 Lecture Hours.
Focuses on the unique challenges of managing a service-based business; delivering quality service to customers and building strong customer relationships; applicable to for-profit and not-for-profit organizations that depend on service excellence for competitive advantage.
Prerequisite: MKTG 321.

MKTG 442 Innovation and Product Management
Credits 3. 3 Lecture Hours.
Opportunity identification, concept generation, concept and program evaluation, development and launch of the various types of new products; specific topics include creativity, design, launch and management of new products.
Prerequisite: MKTG 321.

MKTG 444 Account Planning and Research
Credits 3. 3 Lecture Hours.
Concepts in account planning; gathering and analyzing data (database analysis, focus groups, interviews, surveys); compilation of research into a situation analysis and creative brief for use in a national advertising case competition.
Prerequisites: MKTG 321, approval of instructor.

MKTG 447 Advanced Advertising: Case Competition
Credits 3. 3 Lecture Hours.
Development of a fully integrated, multi-million dollar budgeted advertising campaign plan; participation in a national case competition.
Prerequisite: MKTG 321; approval of instructor.

MKTG 448 Marketing Strategy
Credits 3. 3 Lecture Hours.
Marketing decision-making and strategies in case situations; integration of product, pricing, distribution, and promotion considerations for the purposes of determining and evaluating the optimal marketing strategy.
Prerequisite: MKTG 323; graduating marketing senior.

MKTG 449 Marketing Internship
Credits 3. 3 Other Hours.
Directed internship of at least 300 hours of work under the supervision of a marketing professional providing students with on-the-job training that advances their career objectives; emphasis on business communication and personal professional development.
Prerequisites: Marketing major; MKTG 321; approval of instructor prior to internship.

MKTG 450 Directed Studies
Credits 1 to 3. 1 to 3 Other Hours.
Selected topics in an identified area of marketing. May be repeated once for credit.
Prerequisites: Admission to upper division in Mays Business School and approval of instructor.

MLSC - Military Science (MLSC)

MLSC 121 Introduction to the United States Army I
Credits 2. 1 Lecture Hour. 3 Lab Hours.
Introduction to the United States Army and the Army Reserve Officer Training Corps (ROTC); its purpose in the Army and its advantages; Army customs, courtesies, traditions, and Army values; Army history and individual soldier skills with an emphasis on leadership; includes a leadership laboratory.

MLSC 122 Introduction to the United States Army II
Credits 2. 1 Lecture Hour. 3 Lab Hours.
The second half of an introductory two-semester survey of the United States Army; principles of leadership, Army history, management theory and individual soldier skills; emphasis on critical thinking and problem solving skills; foundation for tactical and leadership concepts; includes a leadership laboratory.

MLSC 221 Tactics and Leadership Theory I
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Dimensions of creative and innovative leadership strategies through team dynamics and leadership theories that form the basis of the Army leadership framework (trait and behavior theories); infantry tactics, techniques and procedures; includes a leadership laboratory.

MLSC 222 Tactics and Leadership Theory II
Credits 3. 2 Lecture Hours. 3 Lab Hours.
The second half of a two-semester survey on leadership theory and infantry tactics; emphasis on leading tactical teams in a complex environment; Army planning and orders process; adaptive leadership styles in the context of military operations; case studies on the importance of teamwork and tactics in real-world scenarios; includes a leadership laboratory.
MLSC 321 Adaptive Leadership and Tactical Operations I
Credits 3. 3 Lecture Hours. 1 Lab Hour.
Theoretical and practical application of adaptive leadership as it relates to planning, executing and evaluating complex tactical operations; ability to assess risk, ethical decision-making, managing people and critical thinking skills in a tactical environment; includes a leadership laboratory.

MLSC 322 Adaptive Leadership and Tactical Operations II
Credits 3. 3 Lecture Hours. 1 Lab Hour.
The second half of a two-semester survey on adaptive leadership and tactical operations; ethical decision-making, planning, executing and evaluating military operations at a tactical level; preparation to attend the Leadership, Development and Assessment Course (LDAC) for the Army’s commissioning process; includes a leadership laboratory.

MLSC 421 The Army Officer and the Profession of Arms I
Credits 3. 3 Lecture Hours. 1 Lab Hour.
Advanced study, research and practical application of Army training, operations and doctrine; the military as a profession, functioning as a member of a staff, and officership; law of land warfare, principles of war, and rules of engagement and their application; duties and responsibilities of a Second Lieutenant in the United States Army; includes a leadership laboratory.

MLSC 422 The Army Officer and the Profession of Arms II
Credits 3. 3 Lecture Hours. 1 Lab Hour.
Dynamics of leadership in a complex world; cultural awareness, terrorism, non-governmental organizations, and operational security; off-site battlefield analysis and application of military concepts; maintaining an ethical climate in an organization, military support structures, and equal opportunity; duties and responsibilities of a Second Lieutenant in the United States Army; includes a leadership laboratory.

MLSC 485 Directed Studies
Credits 1 to 3. 1 to 3 Other Hours.
Directed study of problems in the field of military science.
Prerequisite: Junior or senior classification with approval of department head.

MLSC 489 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Selected topics in an identified field of military science. May be repeated for credit.

MLSC 491 Research
Credits 1 to 4. 1 to 4 Lecture Hours.
Research conducted under the direction of a faculty member in military science. May be taken three times for credit.
Prerequisite: Junior or senior classification or approval of instructor.

MMET 181 Manufacturing and Assembly Processes I
Credits 3. 2 Lecture Hours. 3 Lab Hours.
A survey of metal manufacturing processes; traditional machining, non-traditional machining, welding, fabrication, casting and assembly.
Prerequisite: Grade of C or better in ENGR 111 and ENGR 112.
Corequisite: ENDG 105.

MMET 201 Manufacturing and Materials
Credits 4. 3 Lecture Hours. 2 Lab Hours.
Survey of metallic and non-metallic materials; selection and applications of materials; introduction to traditional and non-traditional manufacturing processes, assembly processes, and metrology.
Prerequisite: ENGR 111.

MMET 206 Nonmetallic Materials
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Introduction to structure, properties, processing and application of forest products, plastics, ceramics and composites; laboratory includes processing, physical and mechanical testing, applications, surface treatment and material identification.
Prerequisite: CHEM 102 or CHEM 107 with a grade of C or better; manufacturing and mechanical engineering technology or industrial distribution major or approval of department.

MMET 207 Metallic Materials
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Introduction to structure, properties and engineering application of ferrous and nonferrous materials; beneficiation, production of ferrous and nonferrous metals, destructive and nondestructive testing, protective coatings, strengthening and heat treatment; laboratory includes metallographic procedures, mechanical testing, heat treatment, surface treatment, corrosion testing, recrystallization and failure analysis.
Prerequisite: CHEM 102 or CHEM 107 with a grade of C or better; manufacturing and mechanical engineering technology or industrial distribution major or approval of department.

MMET 275 Mechanics for Technologists
Credits 3. 3 Lecture Hours.
Forces, moments and couples in 2-D and 3-D systems; equilibrium of rigid bodies; friction and applications; centroids and moments of inertia; review of particle dynamic principles; kinematics and kinetics of rigid bodies; principles of impulse-momentum and workenergy; computer use in selected areas.
Prerequisites: Grade of C or better in MATH 152 and PHYS 218; manufacturing and mechanical engineering technology major or approval of department.

MMET 281 Manufacturing and Assembly Processes II
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Continuation of MMET 181. Economics and manufacturability in polymer molding processes; assembly (fits and tolerances); compatibility of metallic and non-metallic discrete parts.
Prerequisites: Grade of C or better in MMET 181 and MMET 206; manufacturing and mechanical engineering technology major or approval of department.

MMET 303 Fluid Mechanics and Power
Credits 4. 3 Lecture Hours. 2 Lab Hours.
Fluid mechanics and fluid power applications for technologists; fluid properties; conservation of energy and momentum; incompressible flow in pipes; standard symbols: components and control of hydraulic systems and pneumatic systems.
Prerequisites: MMET 275, ENGL 104, MATH 151, MATH 152, CHEM 107 and CHEM 117, PHYS 218 with a grade of C or better.
MMET 313 Industrial Welding Processes
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Theory and practical applications of industrial welding and cutting processes; experience in operation of various machines and processes. **Prerequisites:** Grade of C or better in MMET 181 and MMET 207 and MMET 376; grade of C or better in ENGL 104, MATH 151, MATH 152, CHEM 107 and CHEM 117, and PHYS 218; junior or senior classification in manufacturing and mechanical engineering technology major.

MMET 320 Quality Assurance
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Applied statistical process control and design-of-experiment techniques for quality improvement and process characterization; emphasis on organizations operating in a continuous-improvement, customer-driven environment; statistical thinking; control charts; capability analysis of product, process and measurement system; experimental process characterization, prediction models and input variable control. **Prerequisites:** STAT 211 with a grade of C or better; completion of ENGL 104, MATH 151, MATH 152, CHEM 107 and CHEM 117, and PHYS 218 with a grade of C or better; junior or senior classification in manufacturing and mechanical engineering technology.

MMET 361 Product Design and Solid Modeling
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Design processes and methodologies including quality function deployment, materials and process selection, and design for manufacturing and assembly; fundamentals of modeling part geometry and mechanical assembly using parametric CAD software. **Prerequisites:** Grade of C or better in MMET 181, MMET 206, MMET 207 and MMET 275; completion of ENGL 104, MATH 151, MATH 152, CHEM 107 and CHEM 117, and PHYS 218 with a grade of C or better; junior or senior classification in manufacturing and mechanical engineering technology.

MMET 363 Mechanical Design Applications I
Credits 3. 3 Lecture Hours.
Principles of design of mechanical components; theories of failure; Soderberg and Goodman diagrams; fatigue and fracture design criteria; materials and their selection to engineering applications; component assembly aspects; design of fasteners and springs as examples. **Prerequisites:** MMET 376 with a grade of C or better; completion of ENGL 104, MATH 151, MATH 152, CHEM 107 and CHEM 117, and PHYS 218 with a grade of C or better; junior or senior classification in manufacturing and mechanical engineering technology.

MMET 370 Thermodynamics for Technologists
Credits 4. 3 Lecture Hours. 2 Lab Hours.
Thermal and mechanical energy transformations; relationships applied to flow and non-flow processes in power and refrigeration cycles; devices include compressors, turbines, heat exchangers, nozzles, diffusers, pumps and piston-cylinder models; computer modeling. **Prerequisites:** PHYS 218 with a grade of C or better; completion of ENGL 104, MATH 151, MATH 152, CHEM 107 and CHEM 117; junior or senior classification in manufacturing and mechanical engineering technology.

MMET 376 Strength of Materials
Credits 4. 3 Lecture Hours. 2 Lab Hours.
Stress and strain; elastic moduli Poisson's ratio; torsion, bending, unsymmetrical bending; design of beams and shafts; deflection of beams; buckling of columns; material and strength characterization laboratory tests. **Prerequisites:** Grade of C or better in MMET 207 and MMET 275; completion of ENGL 104, MATH 151, MATH 152, CHEM 107 and CHEM 117, and PHYS 218 with a grade of C or better; junior or senior classification in manufacturing and mechanical engineering technology.

MMET 380 Computer-Aided Manufacturing
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Basic concepts in computer-aided manufacturing with emphasis on a system approach to manufacturing activities; use of numerical control machine tools and other computer based software as applied to different industries. **Prerequisites:** Grade of C or better in MMET 181 and MATH 152; completion of ENGL 104, MATH 151, CHEM 107 and CHEM 117, and PHYS 218 with a grade of C or better; junior or senior classification in manufacturing and mechanical engineering technology.

MMET 383 Manufacturing Information Systems
Credits 4. 3 Lecture Hours. 3 Lab Hours.
Use of information technology for manufacturing enterprise applications, including computer-integrated manufacturing, database, computer networking, web-technology and enterprise resource planning. **Prerequisites:** MMET 380 with a grade of C or better; completion of ENGL 104, MATH 151, MATH 152, CHEM 107 and CHEM 117, and PHYS 218 with a grade of C or better; junior or senior classification in manufacturing and mechanical engineering technology.

MMET 402 Inspection Methods and Procedures
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Methods and procedures in nondestructive inspection of materials and industrial products; ultrasonics, dye penetrants, magnetic particle, radiography and supportive evaluation methods such as weld sectioning, polishing, etching and macroscopic analysis. **Prerequisites:** Grade of C or better in MMET 281 and MMET 376; completion of ENGL 104, MATH 151, MATH 152, CHEM 107 and CHEM 117, and PHYS 218 with a grade of C or better; junior or senior classification in manufacturing and mechanical engineering technology.

MMET 405 Weldability of Ferrous Metals
Credits 3. 3 Lecture Hours.
Applied principles of metallurgy with reference to weldability of ferrous metals. **Prerequisites:** MMET 207 or MEEN 340; MMET 313 or approval of instructor; admitted to major degree sequence (upper-level) in engineering technology.

MMET 410 Manufacturing Automation and Robotics
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Hardware for automated work handling, conveyors, loaders, robots, storage devices; power sources and methods of control, electric motors, controllers, program logic controllers, robot programming; interfacing of equipment controls; and manufacturing work cells. **Prerequisites:** Grade of C or better in MMET 361, MMET 376, MMET 380, MMET 383 and IDIS 300; completion of ENGL 104, MATH 151, MATH 152, CHEM 107 and CHEM 117, and PHYS 218 with a grade of C or better; junior or senior classification in manufacturing and mechanical engineering technology.
MMET 412 Production and Inventory Planning
Credits 3. 2 Lecture Hours. 2 Lab Hours.
An introductory treatment of models and techniques for the planning of production and inventory systems.
Prerequisites: Grade of C or better in MMET 320, MMET 380, MMET 383 and ISEN 302; completion of ENGL 104, MATH 151, MATH 152, CHEM 107 and CHEM 117, and PHYS 218 with a grade of C or better; senior classification in manufacturing and mechanical engineering technology.

MMET 414 Micro/Nano Manufacturing
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Product miniaturization and impact; review of atomic structure, electrical and physical properties of materials; ultraprecision machining; microlithography; dry and wet etching/sputtering techniques; isotropic and anisotropic processes; pattern transfer with additive processes; surface micromachining; microreplication processes; introduction to packaging technology and nanometrology; manufacturing of selected microsystems (MEMS) and their applications.
Prerequisites: CHEM 107; PHYS 208; senior or graduate in engineering or science; admitted to major degree sequence (upper-level) in engineering technology for ENTC majors.

MMET 418 Medical Manufacturing
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Surveys relevant regulations, biocompatibility of engineering materials, and emphasizes suitable techniques for medical device manufacturing.
Prerequisites: MMET 181, junior or senior level classification or approval of instructor.

MMET 422 Manufacturing Technology Projects
Credits 2. 1 Lecture Hour. 3 Lab Hours.
A capstone projects course utilizing a team approach to an analysis and solutions of manufacturing problems.
Prerequisites: MMET 429 with a grade of C or better; completion of junior-level courses; must be taken during long semester prior to MMET 422; completion of ENGL 104, MATH 151, MATH 152, CHEM 107 and CHEM 117, and PHYS 218 with a grade of C or better; senior classification in manufacturing and mechanical engineering technology.

MMET 429 Managing People and Projects in a Technological Society
Credits 3. 3 Lecture Hours.
Supervisory and project management duties and responsibilities in technology based organizations and the methods required to fulfill these functions.
Prerequisites: ISEN 302 with a grade of C or better, or approval of instructor; must be taken during long semester prior to MMET 422; completion of ENGL 104, MATH 151, MATH 152, CHEM 107 and CHEM 117, and PHYS 218 with a grade of C or better; senior classification in manufacturing and mechanical engineering technology.

MMET 463 Mechanical Design Applications II
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Applications of principles of analysis and design of machines and machine elements including linkages, robots, cam and follower systems, shafts, gears, clutches, belt and chain drives; introduction to the mathematical tools for the analysis and design of these machines and machine elements.
Prerequisites: Grade of C or better in MMET 361 and MMET 363; completion of ENGL 104, MATH 151, MATH 152, CHEM 107 and CHEM 117, and PHYS 218 with a grade of C or better; senior classification in manufacturing and mechanical engineering technology.

MODL - Modern Languages

MODL 221/ENGL 221 World Literature
Credits 3. 3 Lecture Hours.
Survey of world literature from the ancient world through the sixteenth century in relation to its historical and cultural contexts; texts selected from a diverse group of authors, traditions and genres.
Cross Listing: ENGL 221/MODL 221.

MODL 222/ENGL 222 World Literature
Credits 3. 3 Lecture Hours.
Survey of world literature from the seventeenth century to the present in relation to its historical and cultural contexts; texts selected from a diverse group of authors, tradition and genres.
Cross Listing: ENGL 222/MODL 222.

MODL 285 Directed Studies
Credits 0 to 3. 0 to 3 Other Hours.
Individual supervision of readings or assigned projects, selected for each student individually. Written and oral reports. No class meetings.
Prerequisite: Approval of department head.

MODL 289 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Selected topics in an identified area of modern languages. May be repeated for credit.
Prerequisite: Approval of department head.

MODL 321 Culture and Civilization I
Credits 3. 3 Lecture Hours.
Studies in national culture and civilization from classical antiquity through the nineteenth century. Conducted in the target language.
Prerequisite: Junior or senior classification, or instructor approval.

MODL 322 Culture and Civilization II
Credits 3. 3 Lecture Hours.
Studies in national culture and civilization from the late nineteenth century through the present. Conducted in the target language.
Prerequisite: Junior or senior classification, or instructor approval.

MODL 484 Internship
Credits 0 to 3. 0 to 3 Other Hours.
Directed internship in a private firm or public agency to provide experience and learning appropriate to the student's degree program and career objectives. Must be taken on a satisfactory/unsatisfactory basis.
Prerequisite: Junior or senior classification.

MODL 485 Directed Studies
Credits 0 to 4. 0 to 4 Other Hours.
Individual supervision of readings or assigned projects, selected for each student individually. Written and oral reports. No class meetings.
Prerequisite: Approval of department head.

MODL 489 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Selected topics in an identified area of modern languages. May be repeated for credit.
Prerequisite: Approval of department head.
MSEN - Materials Science & Engr (MSEN)

MSEN 201 Introduction to Materials Science
Credits 3. 3 Lecture Hours.
Processing, structure, properties and performance in materials; materials structure and defects over many orders of scale; mechanical, thermal, electrical, magnetic and optical properties.
Prerequisites: CHEM 102 or CHEM 104 or CHEM 107; PHYS 218.

MSEN 222/MEEN 222 Material Science
Credits 3. 3 Lecture Hours.
MSEN 222/MEEN 222. Material Science. Mechanical, optical, thermal, magnetic and electrical properties of solids; differences in properties of metals, polymers, ceramics and composite materials in terms of bonding and crystal structure.
Prerequisites: CHEM 102, or CHEM 104 and CHEM 114, or CHEM 107 and CHEM 117; PHYS 218.
Cross Listing: MEEN 222/MSEN 222.

MSEN 285 Directed Studies
Credits 1 to 4. 1 to 4 Other Hours.
Directed study of selected problems in the area of materials science and engineering. May be taken for credit 4 times.
Prerequisite: Approval of instructor.

MSEN 289 Special Topics In...
Credits 1 to 3. 1 to 3 Lecture Hours. 0 to 3 Lab Hours.
Selected topics in an identified area of materials science and engineering. May be repeated for credit.
Prerequisite: Approval of instructor.

MSEN 310 Structure of Materials
Credits 3. 3 Lecture Hours.
Symmetry, unit cell and the atomic structure of crystalline and non-crystalline materials; the bonding forces and energy for van der Waals, metallic, ionic and covalent crystals.
Prerequisite: MSEN 201, MSEN 222/MEEN 222, AERO 413, BMEN 343, CHEN 313, CVEN 306, ENTC 206, or NUEN 265, or approval of instructor.

MSEN 401 Materials Processing
Credits 3. 3 Lecture Hours.
Synthesis, properties and processing of technologically important inorganic materials (metals and ceramics); includes thermodynamics and kinetics of different materials processing methods, casting, deformation processing, heat treatments, powder processing and sintering, coating and thin films processing, etc.
Prerequisite: MSEN 201, MSEN 222/MEEN 222, AERO 413, BMEN 343, CHEN 313, CVEN 306, ENTC 206, or NUEN 265, or approval of instructor.

MSEN 420 Polymer Science
Credits 3. 3 Lecture Hours.
Polymer structure, processing, property characterization at the molecular, microscopic and macroscopic dimensional levels for thermosets, thermoplastics, elastomers, fibers and advanced non-particle filled composites and smart multi-performance structures.
Prerequisite: MSEN 201, MSEN 222/MEEN 222, AERO 413, BMEN 343, CHEN 313, CVEN 306, ENTC 206, or NUEN 265, or approval of instructor.

MSEN 460 Electronic, Optical and Magnetic Properties of Materials
Credits 3. 3 Lecture Hours.
Origins of functional materials properties from their electronic and molecular structure; electron theory in solids; electronic transport and dielectric behavior; optical and magnetic properties; current applications of functional materials.
Prerequisite: MSEN 201, MSEN 222/MEEN 222, AERO 413, BMEN 343, CHEN 313, CVEN 306, ENTC 206, or NUEN 265, or approval of instructor.

MSEN 485 Directed Studies
Credits 0 to 4. 0 to 4 Other Hours.
Directed study of selected problems in the area of materials science and engineering. May be taken four times for credit.
Prerequisite: Approval of instructor.

MSEN 489 Special Topics In...
Credits 1 to 4. 1 to 4 Lecture Hours. 0 to 4 Lab Hours.
Selected topics in an identified area of materials science and engineering. May be repeated for credit.
Prerequisite: Approval of instructor.

MSEN 491 Research
Credits 0 to 4. 0 to 4 Other Hours.
Research conducted under the direction of a faculty member in materials science and engineering. May be taken four times for credit.
Prerequisites: Junior or Senior classification or approval of instructor.

MUSC - Music (MUSC)

MUSC 102 Fundamentals of Music
Credits 3. 3 Lecture Hours.
(MUSI 1300, 1301, 1030, 1304) Fundamentals of Music. Introduction to the basic elements of music (pitch, rhythm, scales, intervals and triads) and how these elements interrelate to form musical compositions; the application of musical understanding to particular instruments such as the guitar, keyboard, recorder and voice.

MUSC 200 Topics in Music
Credits 3. 3 Lecture Hours.
The study of a circumscribed musical topic in its sociohistorical context; emphasis on the aesthetic, social and cultural issues affecting music rather than on technical analysis. May be repeated for credit.

MUSC 201 Music and the Human Experience
Credits 3. 3 Lecture Hours.
(MUSI 1306) Music and the Human Experience. An introduction to music and related issues; designed to enhance the student's knowledge and perception of music; selected works in various styles within historical, psychological and aesthetic contexts.

MUSC 204 Music Theory I
Credits 2. 2 Lecture Hours. 1 Lab Hour.
(MUSI 1211) Music Theory I. Basic concepts of harmonic and contrapuntal structures in diatonic tonal music, musical analysis of these structures and musical composition; using these structures for piano solo, voice and piano and other small ensembles; includes harmonic progression, root/first/second inversion harmonies, cadences and 2v 1st-, 2nd-, and 4th-species counterpoint.
Prerequisites: MUSC 102 or placement exam and music major or minor status; concurrent enrollment in MUSC 208.
MUSC 205 Music Theory II
Credits 2. 2 Lecture Hours. 1 Lab Hour.
(MUSI 1212) Music Theory II. Continuation of harmonic and contrapuntal principles in chromatic tonal music, musical analysis of these structures, and musical composition using these structures for small ensembles; includes secondary functions, common-chord modulation, basic reductive techniques and compound melody, phrase structure, 2v imitative counterpoint, and 2v 3rd- and 5th-species.
Prerequisites: MUSC 204 and 208 and music major or minor status; concurrent enrollment in MUSC 210.

MUSC 206 Music Theory III
Credits 2. 2 Lecture Hours. 1 Lab Hour.
(MUSI 2211, 2212, 2311, 2312) Music Theory III. Continued study of harmonic, contrapuntal and set-theoretical principles, composition and analysis of highly chromatic tonal music and twentieth-century music; includes mode mixture, Neapolitans, augmented sixths, “tall” chords, substitute chords, passing harmonies, enharmonicism, extended chromaticism, modes, artificial scales, impressionism, pandiatonicism, atonality, serialism, aleatory, sound mass, minimalism and electronic music.
Prerequisites: MUSC 205 and MUSC 210, and music major or minor status; concurrent enrollment in MUSC 212.

MUSC 207 Form and Analysis
Credits 2. 2 Lecture Hours. 1 Lab Hour.
Focus on phrase structure, traditional small and large forms in full score, Baroque compositional procedures, reductive (pre-Shenkerian) analytical techniques and Schoenbergian composition theory; extensive listening, reading and analysis; includes binary, ternary, rondo, variation, sonata and fugue; musicianship studies from earlier courses.
Prerequisites: MUSC 206 and MUSC 212 and music major or minor status.

MUSC 208 Musicianship I
Credit 1. 2 Other Hours.
(MUSI 1116, 1216) Musicianship I. Application of concepts taught in MUSC 204; focus on ear training, aural analysis, sight singing, rhythm and rudimentary keyboard skills.
Prerequisites: MUSC 102, and music major or minor status; concurrent enrollment in MUSC 204.

MUSC 210 Musicianship II
Credit 1. 2 Other Hours.
(MUSI 1117, 1217) Musicianship II. Application of concepts taught in corequisite course MUSC 205; focus on ear training, aural analysis, sight singing, rhythm and rudimentary keyboard skills.
Prerequisites: MUSC 204 and MUSC 208 and music major or minor status; concurrent enrollment in MUSC 205.

MUSC 212 Musicianship III
Credit 1. 2 Other Hours.
Application of concepts taught in MUSC 206; focus on ear training, aural analysis, sight singing, rhythm and rudimentary keyboard skills.
Prerequisites: MUSC 205 and MUSC 210 and music major or minor status; concurrent enrollment in MUSC 206.

MUSC 214 Perspectives on World Music
Credits 3. 3 Lecture Hours.
A thematic overview of basic issues in ethnomusicology; provides an appreciation for the diversity of ways in which music sound and music making are organized in world cultures; includes music making and the performance event, music and identity, music and nationalism, and music and globalization.
Prerequisites: MUSC 204, ENGL 104 and ANTH 201, or approval of instructor.

MUSC 215 Fieldwork in World Music
Credits 3. 3 Lecture Hours.
Hands-on experience with readings in and critical analysis of ethnographic musical research; philosophies and practices of fieldwork on the world's music.
Prerequisite: MUSC 214 or approval of instructor.

MUSC 221 Guitar Heroes
Credits 3. 3 Lecture Hours.
Survey of social, cultural and aesthetic transformations of music history centered on important classical guitarists; exploration of their performance and compositional/music styles; analysis of how their contributions gave rise to and revived the guitar’s popularity as a concert-level instrument in both the classical and folk idioms.

MUSC 222 Music of the Americas
Credits 3. 3 Lecture Hours.
Evolution of music of the Americas and the Caribbean; influence of natives, people of forced relocation and people from European communities; the syncretic process of music making.

MUSC 225 History of Jazz
Credits 3. 3 Lecture Hours.
Non-technical survey of jazz as America’s classical music, from the earliest recorded blues through the most recent trends; examination of how jazz has broadly expressed issues of modern life.

MUSC 226 History of Rock
Credits 3. 3 Lecture Hours.
Examination of the development of rock music; emphasis on how the sounds and meaning of music reflects culture, ideology and history.

MUSC 227 Popular Music of India
Credits 3. 3 Lecture Hours.
Introduction to Indian popular musics and society; focus on musical, cultural and aesthetic features of “Bollywood” films and film songs; overview of Indian social, cultural and religious expression.

MUSC 228 History of Electronic Music
Credits 3. 3 Lecture Hours.
Historical survey of electronic music, including key technological advancements, people and musical works; exploration of electronic music from different genres and countries.

MUSC 235 Introduction to Composition
Credits 3. 3 Lecture Hours.
Significant styles and techniques in contemporary music including classical, jazz and popular trends; contemporary sonic design achieved through written exercises, reading and critical listening.
Prerequisite: MUSC 204.
MUSC 245 Composition I  
Credit 1. 2 Other Hours.  
(MUSI 1286) Composition I. Instruction in composition; the writing of small-form musical compositions employing contemporary styles; techniques in writing for instrumental, vocal, electronic and mixed-media resources. May be taken 2 times for credit.  
Prerequisite: MUSC 207 or approval of instructor.

MUSC 253 Individual Performance: Guitar I  
Credit 1. 0 Lecture Hours. 3 Lab Hours.  
(MUSI 1192) Individual Performance: Guitar I. Instruction in guitar performance; broad range of literature with special emphasis on the historical and theoretical aspects that reveal the performance practices of specific periods; individual and group laboratory instruction. May be taken six times for credit.  
Prerequisite: Approval of instructor.

MUSC 254 Individual Performance--Voice I  
Credit 1. 2 Other Hours.  
(MUSI 1183, 1184, 2183, 2184) Individual Performance--Voice I. Instruction in vocal performance; broad range of literature with special emphasis on the historical and theoretical aspects that reveal the performance practices of specific periods; individual and group laboratory instruction. May be repeated for credit.  
Prerequisite: Approval of instructor.

MUSC 255 Individual Performance—Keyboard I  
Credit 1. 2 Other Hours.  
(MUSI 1114, 1115, 1181, 1182, 2115, 2181, 2182) Individual Performance—Keyboard I. Instruction in keyboard performance; broad range of literature with special emphasis on the historical and theoretical aspects that reveal the performance practices of specific periods; individual and group laboratory instruction. May be repeated for credit.  
Prerequisite: Approval of instructor.

MUSC 256 Individual Performance: String I  
Credit 1. 0 Lecture Hours. 3 Lab Hours.  
(MUSI 1195) Individual Performance: String I. Instruction in string performance; broad range of literature with special emphasis on the historical and theoretical aspects that reveal the performance practices of specific periods; individual and group laboratory instruction. May be taken six times for credit.  
Prerequisite: Approval of instructor.

MUSC 259 Individual Performance via Classroom Instruction  
Credit 1. 0 Lecture Hours. 3 Lab Hours.  
Individual performance skills studied in a classroom setting; broad range of literature with special emphasis on the historical and theoretical aspects that reveal the performance practices of specific periods. May be taken six times for credit.

MUSC 270 Individual Performance: Woodwind I  
Credit 1. 3 Lab Hours.  
(MUSI 1166) Individual Performance: Woodwind I. Instruction in woodwind performance; broad range of literature with special emphasis on the historical and theoretical aspects that reveal the performance practices of specific periods; individual and group laboratory instruction. May be taken six times for credit.  
Prerequisite: Approval of instructor.

MUSC 271 Individual Performance: Brass I  
Credit 1. 3 Lab Hours.  
(MUSI 1178) Individual Performance: Brass I. Instruction in brass performance; broad range of literature with special emphasis on the historical and theoretical aspects that reveal the performance practices of specific periods; individual and group laboratory instruction. May be taken six times for credit.  
Prerequisite: Approval of instructor.

MUSC 272 Individual Performance: Percussion I  
Credit 1. 3 Lab Hours.  
(MUSI 1188) Individual Performance: Percussion I. Instruction in percussion performance; broad range of literature with special emphasis on the historical and theoretical aspects that reveal the performance practices of specific periods; individual and group laboratory instruction. May be taken six times for credit.  
Prerequisite: Approval of instructor.

MUSC 280 Ensemble Performance--Symphonic Band  
Credit 1. 3 Lab Hours.  
Three select musical performing ensembles (symphonic, concert and campus bands) composed of 65 to 100 members each and devoted to learning the extensive literature written for wind band; activities include at least two concerts per semester; annual tours during spring for the symphonic band. Students may register in up to but no more than two different sections of this course. May be repeated for credit.  
Prerequisite: Satisfactory audition.

MUSC 281 Ensemble Performance--Small Ensembles  
Credit 1. 3 Lab Hours.  
Participation in small ensemble performance; the study and performance of small ensemble repertory from all historical periods and styles. May be repeated for credit.  
Prerequisite: Satisfactory audition.

MUSC 282 Ensemble Performance--Jazz Ensemble  
Credit 1. 3 Lab Hours.  
A select musical performing ensemble of 18 to 25 members devoted to performing all styles and periods of jazz music from big band to modern jazz; activities include at least 2 performances each semester. May be repeated for credit.  
Prerequisite: Satisfactory audition.

MUSC 283 University Student Orchestra  
Credit 1. 3 Lab Hours.  
The rehearsal and performance of orchestra literature of various historical backgrounds; full ensemble rehearsal, individual practice, and public performances; development of knowledge, understanding, and appreciation for aspects of music ranging from the Renaissance to the Modern Era. May be repeated 10 times for credit.  
Prerequisites: Previous orchestral experience; successful audition with Conductor.

MUSC 285 Directed Studies  
Credits 0 to 9. 0 to 9 Other Hours.  
Directed Studies in specific problems in identified areas of music. May be taken for credit up to 9 hours.  
Prerequisites: Approval of instructor and department head; MUSC majors and minors only.
MUSC 286 Ensemble Performance--Symphony Orchestra  
Credit 1. 3 Other Hours.  
Participation in the Brazos Valley Symphony Orchestra, a community/university ensemble; includes rehearsals off campus and varying course requirements depending on the setting and needs of the student. May be repeated for credit.  
Prerequisite: Satisfactory audition.  

MUSC 289 Special Topics in...  
Credits 1 to 4. 1 to 4 Lecture Hours.  
Selected topics in an identified area of music. May be repeated for credit.  
Prerequisite: Approval of instructor.  

MUSC 290 Ensemble Performance--Choir  
Credit 1. 1 Other Hour.  
A select musical performing ensemble composed of 40 to 70 members devoted to learning and performing works from the vast repertory of choral music from all historical periods and styles; several performances, occasionally with orchestra, each semester on and off campus. Students may register in up to but no more than two different sections of this course. May be repeated for credit.  
Prerequisite: Satisfactory audition.  

MUSC 291 Research  
Credits 0 to 3. 0 to 3 Other Hours.  
Research conducted under the direction of a faculty member in music. May be taken up to two times for credit.  
Prerequisites: Freshman or sophomore classification and approval of instructor.  

MUSC 301 Performance in World Cultures  
Credits 3. 3 Lecture Hours.  
Application of the tools of performance studies to explore the enactment of the arts in world cultures and the ways the people of every society express themselves in performance; examination of different genres of performance through music, theatre, verbal art and dress.  
Prerequisite: Junior or senior classification or approval of instructor.  
Cross Listing: PERF 301 and THAR 301.  

MUSC 311 Music in Early Western Culture  
Credits 3. 3 Lecture Hours.  
Survey of styles, genres, and forms in Western music, focusing on the lives and works of the principal composers from Greek antiquity to the end of the Baroque period within the context of political, social and cultural developments.  
Prerequisite: MUSC 205 or approval of instructor.  

MUSC 312 Music in Modern Western Culture  
Credits 3. 3 Lecture Hours.  
Survey of styles, genres, and forms in Western music, focusing on the lives and works of the principal composers from the middle of the eighteenth century to the present within the context of political, social and cultural developments.  
Prerequisite: MUSC 205 or approval of instructor.  

MUSC 315 Music in the 20th Century  
Credits 3. 3 Lecture Hours.  
The understanding and enjoyment of twentieth century music; survey of the broad panorama of the contemporary scene and an assessment of the forces that have shaped the musical climate we inhabit.  
Prerequisite: MUSC 206 or approval of instructor.  

MUSC 316 Music and Technology  
Credits 3. 3 Lecture Hours. 1 Lab Hour.  
Study of music produced with the aid of electronic and computer technologies; critical listening and analysis of music literature; understanding of technical concepts; required laboratory provides creative practical experience in studio and live performance applications.  
Prerequisite: Junior or senior classification and MUSC 206, PERF 202, or approval of instructor.  

MUSC 317 Recording and the Producer  
Credits 3. 3 Lecture Hours.  
Tools and techniques of studio recording; the studio as compositional tool; recorded literature examining the creative and ideological impact of the producer; recording projects applying course techniques and exploring aesthetic concepts.  
Prerequisite: MUSC 316 or approval of instructor.  

MUSC 318/PERF 318 Electronic Composition  
Credits 3. 3 Lecture Hours.  
Project-based study of techniques for creating electronic and mixed-media performance; critical analysis of important electronic and interactive works; interactive media programming techniques for sound and video synthesis, sampling, digital signal processing.  
Prerequisites: Junior or senior classification and MUSC 316, PERF 202, or approval of instructor.  
Cross Listing: PERF 318/MUSC 318.  

MUSC 321 The Symphony Orchestra and Its Music  
Credits 3. 3 Lecture Hours.  
The development of the symphony orchestra with particular attention to its vast musical repertory, and the colorful personalities associated with it; the organization and management of this musical institution including local arts support and volunteerism.  
Prerequisite: Approval of instructor.  

MUSC 324/ANTH 324 Music in World Cultures  
Credits 3. 3 Lecture Hours.  
Examination of music from an ethnomusicological perspective focusing on musical performance and the complex interrelationship of music to culture, society and daily life; examination of music from a variety of cultures through a series of case studies.  
Prerequisite: Junior or senior classification or approval of instructor.  
Cross Listing: ANTH 324/MUSC 324.  

MUSC 325/PERF 325 Dance and World Cultures  
Credits 3. 3 Lecture Hours.  
Examination of international relationships between dance, culture, identity, gender, youth and politics; relationships between dancing, gender and politics in specific cultures and in globalization; variety of dance practices around the globe.  
Prerequisite: Junior or senior classification.  
Cross Listing: PERF 325/MUSC 325.  

MUSC 326 Dance and Identity in the United States  
Credits 3. 3 Lecture Hours.  
Analysis of dance events as complex sites for social action; examines dances performed by diverse groups of people; considers such issues as identity, community, diversity, gender and representation in the United States.  
Prerequisite: Junior or senior classification.
MUSC 327 Popular Musics in the African Diaspora
Credits 3. 3 Lecture Hours.
Examination of a range of popular musics from the twentieth century that have emerged in conjunction with the historical global spread of peoples and cultures from the African continent; technical knowledge about music is not required; focus on social and cultural contexts for popular music.
Prerequisite: Junior or senior classification or approval of instructor.
Cross Listing: AFST 327 and PERF 327.
MUSC 328/THAR 328 Japanese Traditional Performing Arts
Credits 3. 3 Lecture Hours.
Study of various genres of Japanese performing arts from the 7th century to the present; understanding the genres in their historical and cultural contexts and recognizing shared aesthetic values.
Prerequisite: Junior or senior classification or approval of instructor.
Cross Listing: THAR 328/MUSC 328.
MUSC 345 Composition II
Credit 1. 2 Other Hours.
Advanced instruction in composition; the writing of large-form musical compositions employing contemporary styles; techniques in writing for instrumental, vocal, electronic and mixed-media resources. May be repeated for credit.
Prerequisite: MUSC 245 or approval of instructor.
MUSC 352 IND PERF-BAND & ORCH II
Credit 1. 2 Other Hours.
MUSC 353 Individual Performance: Guitar II
Credit 1. 3 Lab Hours.
Advanced instruction in guitar performance; broad range of literature with special emphasis on the historical and theoretical aspects that reveal the performance practices of specific periods; individual and group laboratory instruction. May be repeated six times for credit.
Prerequisites: Junior or senior classification and approval of instructor.
MUSC 354 Individual Performance--Voice II
Credit 1. 2 Lab Hours.
Advanced instruction in voice performance; broad range of literature with special emphasis on the historical and theoretical aspects that reveal the performance practices of specific periods; individual and group laboratory instruction. May be repeated for credit.
Prerequisite: Junior or senior classification and approval of instructor.
MUSC 355 Individual Performance—Keyboard II
Credit 1. 2 Lab Hours.
Advanced instruction in keyboard performance; broad range of literature with special emphasis on the historical and theoretical aspects that reveal the performance practices of specific periods; individual and group laboratory instruction. May be repeated for credit.
Prerequisites: Junior or senior classification and approval of instructor.
MUSC 356 Individual Performance: String II
Credit 1. 3 Lab Hours.
Advanced instruction in string performance; broad range of literature with special emphasis on the historical and theoretical aspects that reveal the performance practices of specific periods; individual and group laboratory instruction. May be taken six times for credit.
Prerequisites: Junior or senior classification and approval of instructor.
MUSC 370 Individual Performance: Woodwind II
Credit 1. 3 Lab Hours.
Advanced instruction in woodwind performance; broad range of literature with special emphasis on the historical and theoretical aspects that reveal the performance practices of specific periods; individual and group laboratory instruction. May be taken six times for credit.
Prerequisites: Junior or senior classification and approval of instructor.
MUSC 371 Individual Performance: Brass II
Credit 1. 3 Lab Hours.
Advanced instruction in brass performance; broad range of literature with special emphasis on the historical and theoretical aspects that reveal the performance practices of specific periods; individual and group laboratory instruction. May be taken six times for credit.
Prerequisites: Junior or senior classification and approval of instructor.
MUSC 386/THAR 386 Evolution of the American Musical
Credits 3. 3 Lecture Hours.
Examination of the American musical from its heterogeneous origins to a thriving and diverse expression of the human condition; analysis and critical discourse on the development of the American musical through text, audio and visual recordings.
Prerequisite: Junior or senior classification or approval of instructor.
Cross Listing: THAR 386/MUSC 386.
MUSC 400 Senior Seminar and Project
Credits 3. 3 Other Hours.
Culminating senior project on an individually-chosen research topic, presentation of a recital, or lecture-demonstration.
Prerequisites: Senior classification (completion of all 300- and 400-level coursework required for the B.A. in Music); music major status; approval of instructor, advisor, and department head.
MUSC 402 Intermedia Performance
Credits 3. 3 Lecture Hours.
Study of theory, history, literature and techniques of intermedia composition and design for film, theatre, dance, interactive media, and other forms of performance; examination of the collaborative creative process; projects in interdisciplinary performance.
Prerequisites: Junior or senior classification and MUSC 316, PERF 202, or approval of instructor.
Cross Listing: FILM 402 and PERF 402.
MUSC 424 TOPICS ETNOMUSICOLOGY
Credits 3. 3 Lecture Hours.
Topics in Ethnomusicology. Study and application of ethnomusicological theory, method, and literature in a variety of historical and geographical contexts. May be taken four times for credit.
Prerequisite: Junior or senior classification.
MUSC 485 Directed Studies
Credits 0 to 3. 0 to 3 Other Hours.
Advanced directed study of identified topic in music. May be repeated for credit up to 6 credit hours.
Prerequisites: Approval of instructor and department head; 24 hours of music; MUSC majors and minors only.
MUSC 489 Special Topics in... 
Credits 1 to 4. 1 to 4 Lecture Hours.
Selected topics in an identified area of music. May be repeated for credit.
Prerequisite: Approval of instructor.

MUSC 491 Research 
Credits 0 to 3. 0 to 3 Other Hours.
Research conducted under the direction of a faculty member in music. May be taken two times for credit.
Prerequisites: Junior or senior classification and approval of instructor.

NAUT - Nautical Science (NAUT) 

NAUT 200 Basic Communications, Navigation and Seamanship 
Credits 6. 6 Lecture Hours.
Basic Communications, Navigation and Seamanship. Practical application of student's classroom studies aboard training ship during first training cruise. Student completes basic projects in communications, navigation, seamanship and rules of the road.
Prerequisites: MART 103, 203, 204 or permission of MART department head.

NAUT 300 Intermediate Communications, Navigation and Seamanship 
Credits 6. 6 Lecture Hours.
Practical application of student's classroom studies aboard training ship during second training cruise. Student completes intermediate projects in communications, navigation, seamanship, and rules of the road. Thorough study made of U.S. Public Health requirements in first aid.
Prerequisites: MART 200 or NAUT 200, 301, 303, METR 302, or permission of MART department head. Junior or senior classification or approval of instructor.

NAUT 400 Advanced Communications, Navigation and Seamanship 
Credits 6. 6 Lecture Hours.
Practical application of student's classroom studies aboard training ship during third training cruise. Student completes advanced projects in communications, navigation, seamanship and rules of the road.
Prerequisites: NAUT 200, 300, 302, 304 MART 321, 406. Junior or senior classification or approval of instructor.

NRSC - Neuroscience (NRSC) 

NRSC 277/VIBS 277 Introduction to Neuroscience 
Credits 3. 3 Lecture Hours.
Neuroscience from the molecular to system levels; fundamental principles and knowledge of neuroscience; current research information on neuroscience.
Prerequisites: Freshman or sophomore classification and approval of instructor.
Cross Listing: VIBS 277/NRSC 277.

NRSC 289 Special Topics in... 
Credits 1 to 4. 1 to 4 Lecture Hours. 0 to 4 Lab Hours.
Selected topics in an identified area of neuroscience. May be repeated for credit.
Prerequisite: Approval of instructor.

NRSC 311/PSYC 311 Psychology of Animal Behavior 
Credits 3. 3 Lecture Hours.
Survey of problems, principles, and methods of animal psychology; animal learning, motivation discriminative processes, and abnormal, social, and instinctual behaviors.
Prerequisites: PSYC 107; PSYC 203 and 204 or junior or senior classification.
Cross Listing: PSYC 311/NRSC 311.

NRSC 320/PSYC 320 Sensation-Perception 
Credits 3. 3 Lecture Hours.
Review of sensory physiology, sensory and perceptual phenomena and the major perceptual theories; current research in the field.
Prerequisites: PSYC 107; PSYC 203 and PSYC 204 or junior or senior classification.
Cross Listing: PSYC 320/NRSC 320.

NRSC 331/PSYC 331 Social Neuroscience 
Credits 3. 3 Lecture Hours.
Integration of biological and psychological explanations of social behavior; recent research and theories in social neuroscience; emotion, motivation, aggression, face processing, empathy, social cognition, and social relationships.
Prerequisites: PSYC 107 or approval of instructor; junior or senior classification.
Cross Listing: PSYC 331/NRSC 331.

NRSC 332/PSYC 332 Neuroscience of Learning and Memory 
Credits 3. 3 Lecture Hours.
Brain mechanisms of learning and memory from molecular to behavioral levels; synaptic plasticity, model systems, multiple memory systems, diseases of learning and memory.
Prerequisites: PSYC 107 or approval of instructor; junior or senior classification.
Cross Listing: PSYC 332/NRSC 332.

NRSC 333/PSYC 333 Biology of Psychological Disorders 
Credits 3. 3 Lecture Hours.
Neurobiology and clinical explanation of molecular mechanisms underlying psychiatric disorders and their drug treatments; depression and bipolar, anxiety disorders, mood disorders, psychosis and schizophrenia.
Prerequisites: PSYC 107, PSYC 335/NRSC 335 or one year of biology; junior or senior classification.
Cross Listing: PSYC 333/NRSC 333.

NRSC 335/PSYC 335 Physiological Psychology 
Credits 3. 3 Lecture Hours.
Physiological bases of sensation, motor functions, emotion motivation, and complex psychological processes.
Prerequisites: PSYC 107; 8 Hours Biology.
Cross Listing: PSYC 335/NRSC 335.

NRSC 336/PSYC 336 Drugs and Behavior 
Credits 3. 3 Lecture Hours.
Physiological, pharmacological and behavioral effects of psychoactive drugs, including short-term and long-term effects of psychoactive drugs, properties of addictive drugs, etiology of addiction, and treatments of drug addiction and withdrawal.
Prerequisites: PSYC 335/NRSC 335 or NRSC 335/PSYC 335; junior or senior classification.
Cross Listing: PSYC 336/NRSC 336.
NRSC 340/PSYC 340 Psychology of Learning
Credits 3. 3 Lecture Hours.
Survey of significant concepts, experimental methods and principles of learning.
Prerequisites: PSYC 107 or INST 301; PSYC 203 and PSYC 204 or junior or senior classification.

NRSC 350/PSYC 350 Science of Mind and Brain
Credits 3. 3 Lecture Hours.
Research in cognitive neuroscience; methodological advances that enable the study of the human brain safely in the laboratory; complex aspects of the mind like emotion, social behavior, and consciousness.
Prerequisite: Junior or senior classification.
Cross Listing: PSYC 350/NRSC 350.

NRSC 360/PSYC 360 Health Psychology and Behavioral Medicine
Credits 3. 3 Lecture Hours.
Survey of health psychology emphasizing behavioral and lifestyle factors in health and illness, prevention and modification of health-compromising behaviors, health care utilization, and psychological management of chronic disorders and terminal illness.
Prerequisite: PSYC 107.
Cross Listing: PSYC 360/NRSC 360.

NRSC 401/VIBS 401 Developmental Neurotoxicology
Credits 2. 2 Lecture Hours.
Effects of exposure to toxic substances on the developing nervous system; content to include mechanisms of toxicity of substances potentially devastating to the developing nervous system including lead, mercury and other heavy metals, alcohol, nicotine (smoking), pesticides, flame retardants and others.
Prerequisite: Junior or senior classification.
Cross Listing: VIBS 401.

NRSC 407/VIBS 407 Core Ideas in Neuroscience
Credit 1. 1 Lecture Hour.
General overview of selected core ideas across the full spectrum of neuroscience.
Prerequisite: Junior or senior classification; background in science courses recommended.
Cross Listing: VIBS 407/NRSC 407.

NRSC 434/BIOL 434 Regulatory and Behavioral Neuroscience
Credits 3. 3 Lecture Hours.
Bioelectricity, nerve cell functions, brain functions; physiologic basis of behavior.
Prerequisites: BIOL 319 or BIOL 388.
Cross Listing: BIOL 434/NRSC 434.

NRSC 450/VIBS 450 Mammalian Functional Neuroanatomy
Credits 4. 3 Lecture Hours. 2 Lab Hours.
Functional morphology of the domestic animal and human brain using gross specimens, microscopic sections, interactive computer-, DVD-, and video-assisted instructional programs supplemented with clinical case studies.
Prerequisites: Junior or senior classification; BIMS, biology, biochemistry, or psychology majors, or neuroscience minors with overall 3.5 TAMU GPA; or approval of instructor.
Cross Listing: VIBS 450/NRSC 450.

NRSC 485 Directed Studies
Credits 1 to 3. 1 to 3 Other Hours.
Directed readings or research problems in selected areas designed to supplement existing course offerings. Individual report required.
Prerequisite: Approval of instructor.

NRSC 489 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Special Topics in... Selected topics in an identified area of neuroscience. May be repeated for credit.
Prerequisite: Approval of instructor.

NRSC 491 Research
Credits 1 to 4. 1 to 4 Other Hours.
Research conducted under the direction of a faculty member in neuroscience. May be repeated 3 times for credit.
Prerequisites: Junior or senior classification and approval of instructor.

NUEN - Nuclear Engineering (NUEN)

NUEN 101 Principles of Nuclear Engineering
Credit 1. 1 Lecture Hour.
Introduction to nuclear engineering including global and national energy requirements, radioactivity, radiation protection, and fission and fusion reactor concepts.

NUEN 201 Introduction to Nuclear Engineering I
Credits 3. 3 Lecture Hours.
Atomic and nuclear physics discoveries that have led to the development of nuclear engineering, atomic models, relativity, x-rays, types of nuclear reactors; problem solving techniques.
Prerequisites: MATH 251 or registration therein; PHYS 208.

NUEN 265 Materials Science for Nuclear Energy Applications
Credits 3. 3 Lecture Hours.
Materials science fundamentals with an emphasis on nuclear applications; topics will include bonding, crystal structures crystalline defects, mechanical properties and radiation effects in metal, ceramic and polymer materials.
Prerequisites: CHEM 102, or CHEM 104 and CHEM 114, or CHEM 107; PHYS 218.

NUEN 289 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Special Topics in... Selected topics in an identified area of nuclear engineering. May be repeated for credit.
Prerequisite: Approval of department head.

NUEN 301 Nuclear Reactor Theory
Credits 3. 3 Lecture Hours.
An introduction to neutron diffusion theory, neutron moderation, conditions for criticality of nuclear reactors.
Prerequisites: NUEN 302.

NUEN 302 Introduction to Nuclear Engineering II
Credits 3. 3 Lecture Hours.
Basic radioactivity, nuclear and neutron physics as applied to nuclear engineering.
Prerequisites: NUEN 201; MATH 308 or registration therein.

NUEN 303 Nuclear Detection and Isotope Technology Laboratory
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Interaction of radiation with matter; behavior of various nuclear radiation detectors studied both theoretically and experimentally in laboratory; properties of radionuclides useful to industry considered and evaluated from engineering point of view; writing intensive course.
Prerequisites: NUEN 309/SENG 309; ECEN 215.
NUEN 304 Nuclear Reactor Analysis  
Credits 3.3 Lecture Hours.  
The group diffusion method, multi-region reactors, heterogeneous reactors, reactor kinetics, changes in reactivity.  
Prerequisite: NUEN 301; MATH 309.

NUEN 309/SENG 309 Radiological Safety  
Credits 3.3 Lecture Hours.  
Interactions of nuclear radiations with matter and biological systems; theory and practice of radiation dosimetry as applied to radiation protection; design and application of radiation dosimetry systems for personnel monitoring, area radiation monitoring and accident situation; includes external and internal dosimetry as well as long-term risk analysis.  
Prerequisite: NUEN 302.  
Cross Listing: SENG 309/NUEN 309.

NUEN 329 Analytical and Numerical Methods  
Credits 3.3 Lecture Hours.  
Introduction to use of numerical analysis and advanced analytical techniques for obtaining nuclear reactor flux distributions, temperatures and transients; use of digital computer in obtaining nuclear reactor design information.  
Prerequisites: MATH 309 and NUEN 301.

NUEN 405 Nuclear Engineering Experiments  
Credits 3.2 Lecture Hours. 3 Lab Hours.  
Experimental measurements of basic nuclear reactor parameters; reactor operation and reactor safety.  
Prerequisites: NUEN 303; NUEN 304 or senior classification.

NUEN 406 Nuclear Engineering Systems and Design  
Credits 3.3 Lecture Hours.  
Nuclear plant systems; conventional and advanced generation power reactors, nuclear simulators, transient analysis using available software for reactor simulators; nuclear engineering design methodology; problem formulation, criteria, trade-off decisions and design optimization; case studies.  
Prerequisite: NUEN 304; MEEN 461 or approval of instructor.

NUEN 410 The Design of Nuclear Reactors  
Credits 4.4 Lecture Hours.  
Application of reactor theory and other engineering disciplines in fundamental and practical design of nuclear reactor systems for power applications; use of computer in design operations.  
Prerequisites: NUEN 304 and NUEN 406; MEEN 461.

NUEN 417/MEEN 417 Basics of Plasma Engineering and Applications  
Credits 3.3 Lecture Hours.  
Basic plasma properties and confinement techniques; single particle orbits in electric and magnetic fields, moments of Boltzmann equation and introduction to fluid theory; wave phenomena in plasmas and introduction to plasma kinetic theory; analysis of laboratory plasmas and plasma applications including fusion, electric propulsion, materials processing and plasma enhanced chemistry.  
Prerequisite: PHYS 208 or equivalent; senior classification in nuclear, mechanical, or aerospace engineering, physics, or approval of instructor.  
Cross Listing: MEEN 417/NUEN 417.

NUEN 418 Fuel Assembly and 3-D Reactor Core Design and Modeling  
Credits 3.3 Lecture Hours.  
Application of state-of-the-art engineering-grade codes in the neutronic design, analysis and modeling of nuclear fuel assembly and core.  
Prerequisites: NUEN 304 and junior or senior classification.

NUEN 430 Computer Applications in Nuclear Engineering  
Credits 3.3 Lecture Hours.  
Applications of digital computers to solve nuclear engineering problems; nuclear data and cross-section libraries; deterministic methods for linear and non-linear nuclear systems, and Monte Carlo methods for linear nuclear systems.  
Prerequisites: NUEN 304, NUEN 329.

NUEN 431 Technical Communications Issues in the Nuclear Industries  
Credit 1.1 Lecture Hour.  
Introduction to a variety of topics that present communication challenges; opportunities to learn from a variety of visiting experts concerning the nuances and challenges of, as well as successful methods for, communicating with concerned audiences about technically challenging topics.  
Prerequisite: Junior or senior classification or approval of instructor.

NUEN 432 Nuclear Power Plant Fundamentals  
Credits 3.3 Lecture Hours.  
Understanding the operation of a nuclear electric general station; includes reactor water chemistry, material science, electrical science; mechanical science, civil engineering for nuclear power plant engineers, and digital process control systems.  
Prerequisite: Junior or senior classification in the college of engineering; non-NUEN majors.

NUEN 433 Nuclear Power Plant Systems – Pressurized Water Reactor  
Credits 3.3 Lecture Hours.  
Principal elements of pressurized water reactor nuclear power systems; overview of reactor physics, thermodynamics, and heat transfer; focus on systems with both function and interfaces stressed throughout; includes basic reactor physics, reactor heat generation, reactor plant systems; support systems, and reactor safety.  
Prerequisites: NUEN 431 and junior or senior classification in the college of engineering; non-NUEN majors.

NUEN 434 Nuclear Power Plant Systems – Boiling Water Reactor  
Credits 3.3 Lecture Hours.  
Principal elements of boiling water reactor nuclear power systems; overview of reactor physics, thermodynamics, and heat transfer; focus on systems with both function and interfaces stressed throughout; includes basic reactor physics, reactor heat generation, reactor plant systems, support systems, and reactor safety.  
Prerequisites: NUEN 431 and junior or senior classification in the college of engineering; non-NUEN majors.

NUEN 435 Nuclear Power Plant Operations  
Credits 4.3 Lecture Hours. 3 Lab Hours.  
Overview of mass, momentum and energy conservation as it relates to nuclear power plants; includes coupled neutron/thermal models to study plant operations semi-quantitatively achieving an integrated plant understanding.  
Prerequisites: NUEN 431, and NUEN 432 or NUEN 433; junior or senior classification in the college of engineering, non-NUEN majors.

NUEN 436 Human Performance for Nuclear Power Plant Engineers  
Credits 2.2 Lecture Hours.  
Six modules: human performance fundamentals, the organization and the processes, the individual worker, the engineer, corrective action programs and root cause analysis, and case studies including TMI-2, Chernobyl, Davis-Besse, and Fukushima Daiichi.  
Prerequisites: NUEN 432; junior or senior classification in the college of engineering.
NUEN 451 Nuclear Security System Design
Credits 3.3 Lecture Hours.
The science and engineering associated with the design, evaluation and implementation of systems to secure nuclear and radiological materials; adversary characterization, categorization of nuclear and radiological targets, calculation of consequences associated with failure to protect targets, detection and delay technologies, and mathematical methods for evaluation and managing risk.
Prerequisites: NUEN 303 and NUEN 309/SENG 309 or equivalent, or approval of instructor.

NUEN 460 Nuclear Plant Systems and Transients
Credits 3.3 Lecture Hours.
Use of engineering principles to elucidate the nuclear, mechanical, electrical and functional interactions among nuclear plant components and systems: reactor protection systems, alarm and trip setpoints, normal and accident transients. Components studied in detail include: core, control rod drive mechanism, neutron source, neutron detectors, primary coolant system, and emergency core cooling system.
Prerequisites: NUEN 301, NUEN 302, NUEN 304, NUEN 406, NUEN 430 or equivalents; MEEN 315, MEEN 344, MEEN 461 or equivalents; junior or senior classification.

NUEN 465 Nuclear Materials Engineering
Credits 3.3 Lecture Hours.
Explore applications of materials science principles in nuclear energy systems; includes crystal structures and defects, metallurgy, and materials thermochemistry; emphasis on nuclear fuel performance, structural material changes, and waste materials; laboratory demonstrations on materials behavior.
Prerequisites: NUEN 265, MEEN 222/MSEN 222 or equivalent and NUEN 302.

NUEN 475 Environmental Nuclear Engineering
Credits 3.3 Lecture Hours.
Environmental aspects of nuclear power; natural radiation environment and the distribution of radioactivity added to the environment by human activities; evaluation of effects of radiation and radioactivity on the environment and on humans.
Prerequisite: NUEN 309/SENG 309.

NUEN 479 Radiation Protection Engineering
Credits 3.2 Lecture Hours. 3 Lab Hours.
Analysis of radiation hazard situations and design of nuclear facilities from a safety standpoint.
Prerequisite: NUEN 475.

NUEN 481 Seminar
Credit 1.1 Lecture Hour.
Designed to broaden the student's capability, performance and perspective in nuclear engineering through faculty, student and guest presentations.
Prerequisite: NUEN 410 or registration therein or NUEN 479 or registration therein.

NUEN 485 Directed Studies
Credits 1 to 6.1 to 6 Other Hours.
Problems of limited scope approved on an individual basis intended to promote independent study; program enrichment for capable students; results presented in writing to staff.
Prerequisites: Junior or senior classification and approval of department head.

NUEN 489 Special Topics in...
Credits 1 to 4.1 to 4 Lecture Hours. 0 to 4 Lab Hours.
Selected topics in an identified area of nuclear engineering. May be repeated for credit.
Prerequisite: Approval of instructor.

NUEN 491 Research
Credits 1 to 4.1 to 4 Other Hours.
Research conducted under the direction of a faculty member in Nuclear Engineering. May be repeated 2 times for credit. Registration in multiple sections of this course is possible within a given semester provided that the per semester credit hour limit is not exceeded.
Prerequisites: Junior or senior classification and approval of instructor.

NUEN - Nursing (NURS)

NURS 301 Nursing Foundation
Credits 2.1 Lecture Hour. 1 Lab Hour.
Introduction to nursing skills including such activities as safety, assessment of vital signs, comfort measures, assistance with daily living activities, environmental concerns, positioning and transporting. We will become familiar with the nursing process, communication and documentation tools. An introduction to the simulation center is highlighted in this class. Orientation to clinical sites and expectations for clinical rotation, as well as mandatory clinical site requirements will be completed.
Prerequisites: Admission to the BSN program or approval from the Associate Dean for Academic Affairs.

NURS 305 Nursing Dimensions and Informatics
Credits 3.3 Lecture Hours.
This course explores the concepts of informatics and professional dynamics in nursing. Basic computer competencies essential to nursing are introduced, along with skills required to locate and evaluate information (info literacy), and process and communicate findings (info management) related to evidence-based nursing practice. The roles and behaviors of the professional nurse are also introduced. The influence of ethics and cultural/society issues on the nursing profession are explored as well as opportunities for personal and professional development.
Prerequisites: Admission to the BSN program or approval from the Associate Dean for Academic Affairs.

NURS 312 Introduction to Pathophysiology
Credits 3.3 Lecture Hours.
An introduction to pathophysiological alterations in major regulatory mechanisms of the body. Provides a foundation for understanding general nursing practice, various diagnostic procedures and selected therapeutic regimes.

NURS 313 Nursing Fundamentals
Credits 5.3 Lecture Hours. 2 Lab Hours.
(3-2) An introduction to the scope of human needs, utilization of the nursing process as a systematic approach to meeting those needs and the role of the professional nurse in assisting individuals toward optimal health. Clinical settings are utilized in the application of fundamental concepts, principles of nursing and communication skills that are employed in providing basic client care.
Prerequisite: Admission to the BSN Program.
NURS 314 Health Assessment
Credits 3. 1 Lecture Hour. 2 Lab Hours.
Concepts and principles underlying assessment of the health status of individuals are presented. Emphasis is placed on interviewing skills, health histories, and the physical and psychosocial findings in the well person. Development of communication in the nurse-client relationship and assessment skills are included. Students implement the nursing process by obtaining health histories, performing physical and psychosocial assessments, establishing a database, and formulating initial nursing plans.

NURS 315 Nursing and the Aged
Credits 3. 2 Lecture Hours. 1 Lab Hour.
This course presents an overview of age-related changes including physical, emotional, social and environmental transitions in the aging family. Emphasis is placed on developmental patterns and health promotion in the population.

NURS 316 Pharmacology Principles
Credits 3. 3 Lecture Hours.
Focuses on the basic drug classifications, concepts and principles of pharmacology, with special consideration for the nursing role in developing a comprehensive approach to the clinical application of drug therapy through the use of the nursing process. Nursing implications relative to the utilization of drug therapy are examined.

NURS 320 Adult Nursing I
Credits 6. 3 Lecture Hours. 3 Lab Hours.
This course introduces the student to the use of the nursing process in the care of adults with chronic or non-complex illness. The course uses a systems approach to discuss the effects of illness on individual and family, and to examine the disruption of growth and development patterns across the lifespan from young adult to senior years, emphasizing the nursing process to assist adults in reaching their optimal level of wellness. The course includes clinical laboratory to allow the student the opportunity to apply theoretical concepts to clinical practice in diverse adult populations.

NURS 323 Nursing Care of Women, Families and Newborns
Credits 4. 2 Lecture Hours. 2 Lab Hours.
A study of childbearing families and women's health in normal and high-risk situations. The role of the nurse in meeting health needs of women, families and their newborns is analyzed. Supervised clinical experiences and/or simulation experiences in the application of the nursing process in meeting these health needs are offered. This course promotes acquisition of skills in caring for women, families and newborns during uncomplicated and/or complicated health experiences in a variety of settings.
Prerequisites: NURS 312, NURS 313, NURS 314, NURS 316.

NURS 365 Directed Studies
Credits 1 to 3. 1 to 3 Other Hours.
Individually supervised study in subject matter to be arranged with faculty. Prerequisite: Admission to the College of Nursing or approval from the associate dean of academic affairs.

NURS 366 Directed Clinical Studies
Credits 1 to 3. 1 to 3 Other Hours.
Individually supervised study focusing on clinical skills in focused areas to be arranged with faculty. Prerequisite: Admission to the College of Nursing or approval from the associate dean of academic affairs.

NURS 405 Selected Topics in Nursing
Credit 1. 1 Lecture Hour.
A broad introduction to selected topics of current interest in the role of professional nursing.

NURS 411 Evidence-Based Practice for Nurses
Credits 3. 3 Lecture Hours.
A study of the principles and methodology of research in nursing practice, with emphasis on evidence based practice research. Students will be expected to interpret research, identify its methods and significance, and analyze findings in order to be a consumer of nursing research and practitioner of evidence based practice. Prerequisite: NURS 312, NURS 313, NURS 314, NURS 316, or with approval from the Associate Dean of Academic Affairs.

NURS 412 Care of Mental Health Clients
Credits 4. 2 Lecture Hours. 2 Lab Hours.
Care of Mental Health Clients. Demonstrates the relevance of psychosocial nursing concepts to all areas of professional practice. Provides a conceptual integration of the nursing process, theories and research from psychosocial sciences and humanities as these relate to the care of persons with mental disorders. Clinical experience provides an opportunity for application of psychosocial concepts and methods in using the nursing process to promote optimal levels of wellness for individuals, families and target groups. Prerequisites: NURS 312, NURS 313, NURS 314, NURS 316.

NURS 413 Nursing Care of Children and Families
Credits 4. 3 Lecture Hours. 1 Lab Hour.
A study of the factors influencing health promotion, protection and maintenance of infants, children and adolescents. Family theory, growth and development, primary health care, and acute, chronic, and terminal conditions are examined. Clinical experience is provided in caring for healthy, at-risk, acutely and chronically ill infants, children, adolescents and their families. Prerequisites: NURS 312, NURS 313, NURS 314, NURS 316.

NURS 420 Adult Nursing II
Credits 6. 6 Lecture Hours.
This course presents to the senior students critical thinking and problem-solving strategies for care of adults with acute or complex illness and injury. The effects of acute illnesses are examined in relation to the injury and in relation to the individual’s developmental stage, culture and gender. Building on Nursing Care of Adults I, a systems approach is used to analyze and intervene in alterations to the health of the individual and family and to help them reach their optimal level of wellness. This course includes clinical laboratory to allow the student the opportunity to integrate theoretical concepts to clinical practice in diverse populations. Prerequisite: NURS 312, NURS 313, NURS 314, NURS 316.

NURS 421 Care of Community Health Clients
Credits 5. 5 Lecture Hours.
The nursing process is utilized in the study of community/public health nursing practice and common health problems encountered in community settings. Health promotion, maintenance, counseling and coordination of care are utilized in providing care to individuals, families, aggregates and populations in community settings. Principles and skills of public health nursing practice are used to assess a community’s health and diagnose community health needs. Prerequisite: NURS 312, NURS 313, NURS 314, NURS 316.

NURS 422 Professional Issues
Credits 2. 2 Lecture Hours.
The purpose of this course is to introduce health professions students to professional and ethical/legal issues in everyday practice in health care, develop self-awareness skills about their own values, and those of others, and provide them with tools to engage in self-reflective practice leading to enhancement of patient-centered care and collaborative team work. Prerequisites: Admission to the College of Nursing.
NURS 430 Transition to Professional Nursing Practice
Credits 5. 3 Lecture Hours. 2 Lab Hours.
Course reflects content that will prepare senior students for transition of entry into practice. Theories and principles concerning human behavior in organizations, with emphasis on leadership roles encountered in professional nursing practice. Senior nursing students in collaboration with nursing faculty refine coordination of care for a diverse population of clients. A clinical practicum will focus on synthesizing and refining skills in the delivery and management of nursing care to various groups of clients. Concepts of clinical decision-making, and inter-professional dynamics are incorporated in the context of legal, ethical, and evidence-based practice. 
Prerequisites: NURS 301, NURS 305, NURS 313, NURS 314, NURS 315, NURS 320, NURS 411, NURS 412, NURS 420.

NURS 431 Care of Vulnerable Populations
Credits 1 to 3. 1 to 3 Lecture Hours.
Principles of caring for vulnerable populations; includes characteristics of the vulnerable, clinical issues associated with caring for individuals from vulnerable populations, social justice and resilience; activities include development of care plans for the vulnerable, teaching projects and capacity building; option to utilize 16 hours of community health clinical time to complete a mini-immersion experience.
Co-requisite: NURS 421.

NURS 432 Relations in Healthcare: Teamwork and Communication
Credits 1 to 3. 1 to 3 Lecture Hours.
Preparation for inter and intra professional teamwork and communication to improve the culture for professional collaboration with a shared mental model for excellence in quality and safety; goal for effective teamwork and communication is higher quality, safer patient care through highly effective medical teams that optimize the use of resources, information, and people to achieve the best clinical outcomes for patients.

NURS 433 Community Health for the RN
Credits 4. 4 Lecture Hours.
In this course, the concepts and principles underlying assessment of the professional nurse's role in the application of evidence into clinical practice.

NURS 434 Pathophysiology and Pharmacology for the RN
Credits 4. 4 Lecture Hours.
Students will demonstrate the ability to incorporate the principles of pathophysiology and pharmacology in planning healthcare for individuals across the lifespan.

NURS 435 Health Assessment for the RN
Credits 3. 3 Lecture Hours.
This course provides an introduction to forensic science as a collaborative approach to criminal investigation. General concepts and principles of forensic science will be explored with an emphasis on the role of the nurse working with victims of violence. Content to be addressed includes: forensic investigation, evidence collection and management, mechanisms of injury and death using post-mortem forensic analysis, interpersonal crimes of violence, and forensic nursing roles.

NURS 436 Nursing Dimensions and Informatics for the RN
Credits 3. 3 Lecture Hours.
This course is designed to build on the informatics knowledge and skills of the practicing nurse. Emphasis is placed on the application of the ANA Standards for Nursing Informatics and Professional Practice and incorporation of information technology to support patient care and clinical decision-making. The course will assist the students to develop the professional role by incorporation of the philosophy of nursing, nursing theory, and clinical reasoning. The nurse's role in interprofessional practice will be explored. The influence of ethics and cultural/society issues on the nursing profession are explored as well as opportunities for personal and professional development.

NURS 441 Application of Evidence Based Practice for the RN
Credits 3. 3 Lecture Hours.
This course is a study of basic research methodologies and an in depth examination of the professional nurse's role in the application of evidence into clinical practice.

NURS 442 Pathophysiology and Pharmacology for the RN
Credits 4. 4 Lecture Hours.
Students will demonstrate the ability to incorporate the principles of pathophysiology and pharmacology in planning healthcare for individuals across the lifespan.

NURS 443 Health Assessment for the RN
Credits 3. 3 Lecture Hours.
This course reflects content that will prepare senior students for transition of entry into practice. Theories and principles concerning human behavior in organizations, with emphasis on leadership roles encountered in professional nursing practice. Senior nursing students in collaboration with nursing faculty refine coordination of care for a diverse population of clients. A clinical practicum will focus on synthesizing and refining skills in the delivery and management of nursing care to various groups of clients. Concepts of clinical decision-making, and inter-professional dynamics are incorporated in the context of legal, ethical, and evidence-based practice. 
Prerequisites: NURS 301, NURS 305, NURS 313, NURS 314, NURS 315, NURS 320, NURS 411, NURS 412, NURS 420.

NURS 446 Community Health for the RN
Credits 5. 4 Lecture Hours. 1 Lab Hour.
In this course, students are introduced to community-based health care of culturally diverse populations. The role of the professional nurse as part of an interprofessional team in health promotion, disease prevention, and management of chronic health problems in community settings is explored. Students apply critical reasoning and information technology skills to develop and implement evidence-based projects that positively impact the quality of life of populations. Practicum experiences are individualized.
NURS 467 Leadership and Management for the RN
Credits 5. 3 Lecture Hours. 2 Lab Hours.
In this course, theories and principles of human behavior in organizations are examined, including an exploration of leadership roles in professional nursing practice. The role of regulatory agencies in the provision of quality health care is explored. Students will participate in the evaluation and planning for quality improvement using nurse sensitive indicators. The students will discern the nurse’s role in reducing the financial cost of health care. Practicum experiences are individualized.

NURS 468 Professional Practice Issues for the RN
Credits 2. 2 Lecture Hours.
Professional practice issues such as those related to political action, socio-legal concerns, cultural diversity, and ethics are explored with an emphasis on the advocacy role of the nurse. The importance of the nurse leader as a role model for continued professional growth through lifelong learning is emphasized.

NURS 489 Special Topics In...
Credits 1 to 4. 1 to 4 Lecture Hours. 0 to 4 Lab Hours.
Selected topics in an identified area of nursing. May be repeated for credit.
Prerequisites: Admission to the BSN program or approval from the Associate Dean for Academic Affairs.

NUTR - Nutrition (NUTR)

NUTR 202 Fundamentals of Human Nutrition
Credits 3. 3 Lecture Hours.
(BIOL 1322, HECO 1322) Fundamentals of Human Nutrition. Principles of nutrition with application to the physiologic needs of individuals; food sources and selection of an adequate diet; formulation of Recommended Dietary Allowances; nutritional surveillance; for non-nutrition majors only.

NUTR 203 Scientific Principles of Human Nutrition
Credits 3. 3 Lecture Hours.
Chemistry and physiology of proteins, carbohydrates, lipids, vitamins and minerals; their ingestion, digestion, absorption, transport and metabolism.
Prerequisite: CHEM 101 and CHEM 111. Majors only.

NUTR 210/FSTC 210 Horizons in Nutrition and Food Science
Credits 2. 2 Lecture Hours.
Introduction to nutrition and food science career opportunities through presentations by nutrition and food science researchers and industry professionals; addresses issues of professionalism including portfolio development, teamwork, and critical thinking skills.

NUTR 211 Scientific Principles of Foods
Credits 4. 3 Lecture Hours. 3 Lab Hours.
Basic principles underlying selection, preparation and preservation of food in relation to quality standards, acceptability and aesthetics. Introduction to composition, nutritive value, chemical and physical properties of foods; introduction to experimental study of foods.
Prerequisites: CHEM 101, CHEM 111; NUTR 202 or NUTR 203; sophomore classification or above.

NUTR 222 Nutrition for Health and Health Care
Credits 3. 3 Lecture Hours.
Analysis of nutrition with emphasis on providing a basic understanding of nutrition and its role in disease prevention and treatment.

NUTR 285 Directed Studies
Credits 0 to 4. 0 to 4 Other Hours.
Directed study of selected problems in the area of nutrition.
Prerequisites: Approval of instructor; 2.0 GPR in major and overall.

NUTR 289 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Selected topics in an identified area of nutrition. May be repeated for credit.
Prerequisite: Approval of department head.

NUTR 291 Research
Credits 0 to 4. 0 to 4 Other Hours.
Research conducted under the direction of faculty member in nutrition. May be repeated 2 times for credit.
Prerequisites: Freshman or sophomore classification and approval of department head.

NUTR 300/FSTC 300 Religious and Ethnic Foods
Credits 3. 3 Lecture Hours.
Understanding religious and ethnic foods with application to product development, production, and nutritional practices; emphasis on different food rules and priorities with attention given to different religious and ethnic groups within the US and around the world.
Prerequisites: Junior or senior classification or approval of instructor; basic knowledge of food science and nutrition helpful.
Cross Listing: FSTC 300/NUTR 300.

NUTR 301 Nutrition Through Life
Credits 3. 3 Lecture Hours.
Analysis of nutrition with emphasis on human biological needs through stages of the life cycle; biochemical, physiological and anthropometric aspects of nutrition.
Prerequisites: NUTR 203; junior classification or approval of department head.

NUTR 303/ANSC 303 Principles of Animal Nutrition
Credits 3. 3 Lecture Hours.
Scientific approach to nutritional roles of water, carbohydrates, proteins, lipids, minerals, vitamins, and other dietary components; emphasis on the comparative aspects of gastrointestinal tracts and on digestion, absorption, and metabolism of nutrients.
Prerequisites: ANSC 107 and ANSC 108; CHEM 222 or CHEM 227 or equivalent.
Cross Listing: ANSC 303/NUTR 303.

NUTR 304 Food Service Systems Management
Credits 4. 3 Lecture Hours. 3 Lab Hours.
Principles of food service management used in selecting, storing, preparing and serving food in quantity; emphasis on menu planning, quality control, purchasing, equipment and layout/design; application of basic food service systems management principles, including financial planning and personnel issues.
Prerequisites: NUTR 203 and NUTR 211, junior or senior classification.

NUTR 365 Nutritional Physiology of Vitamins and Minerals
Credits 3. 3 Lecture Hours.
Fundamental nutritional significance of fat soluble and water soluble vitamins and minerals to human metabolism, cell biology and physiology; micro-nutrient groups as per metabolic function or biochemical and physiological actions; important dietary sources, absorption, storage, metabolism, (bio)chemistry, deficiency and toxicity of individual nutrients in this context and basis of DRIs.
Prerequisites: NUTR 203 and NUTR 301; junior or senior classification.
NUTR 404 Nutrition Assessment and Planning
Credits 4. 3 Lecture Hours. 3 Lab Hours.
Methods of determining the nutritional status of individuals; dietary techniques; planning nutritional care including diet modification and/or nutrition support; nutrition counseling.
Prerequisites: NUTR 203; NUTR 301; junior classification or approval of department head.

NUTR 405 Nutritional Treatment of Disease
Credits 3. 3 Lecture Hours.
Nutritional intervention in pathological conditions, based on biochemical, physiological and psychological effects of disease state; current research in clinical nutrition.
Prerequisites: NUTR 203, NUTR 301; BIOL 319; BICH 410 or concurrent enrollment; senior classification or approval of instructor.

NUTR 410/FSTC 410 Nutritional Pharmacometrics of Food Compounds
Credits 3. 3 Lecture Hours.
Nutritional pharmacokinetics and pharmacodynamics of food compounds; specific examples of toxicological and pharmacological effects of food compounds.
Prerequisites: NUTR 202 or NUTR 203 or FSTC 201 or CHEM 222 or CHEM 227 or approval of instructor; junior or senior classification.
Cross Listing: FSTC 410/NUTR 410.

NUTR 430 Community Nutrition
Credits 3. 3 Lecture Hours.
Health and nutrition programs, food labeling, cultural food practices, consumer education and marketing.
Prerequisites: NUTR 203; NUTR 301; junior or senior classification.

NUTR 440/FSTC 440 Therapeutic Microbiology: Probiotics and Related Strategies
Credits 3. 3 Lecture Hours.
Topics relevant to alimentary (gastrointestinal) microbiology including: (i) the "normal" intestinal microbiota; (ii) probiotic and prebiotic nutritional supplements; (iii) recombinant pharmabiotics; (iv) gut-associated lymphoid tissue and mucosal immunity; (v) foodborne gastrointestinal pathogens; and (vi) fermented products as functional foods.
Prerequisites: Undergraduate survey course in microbiology or approval of instructor; junior or senior classification.
Cross Listing: FSTC 440/NUTR 440.

NUTR 450 Nutrition and Metabolism of Minerals
Credits 3. 3 Lecture Hours.
The role of minerals in living systems and the exploration of their multitude of functions; chemical properties of minerals and how that relates to function in cells and tissues; consequences of mineral deficiencies based on known functions; insight into experimental approaches used to assess minerals in a living environment.
Prerequisite: NUTR 203, BICH 303 or BICH 410 or approval of instructor.

NUTR 469/FSTC 469 Experimental Nutrition and Food Science Laboratory
Credits 4. 1 Lecture Hour. 6 Lab Hours.
Investigation of nutritional intervention in animal models of metabolic and psychological disorders (e.g. obesity and depression); investigational approaches: behavioral analyses; RNA and protein analyses; reverse transcription PCR.
Prerequisites: CHEM 227; CHEM 237; junior or senior classification or approval of instructor.
Cross Listing: FSTC 469/NUTR 469.

NUTR 470 Nutrition and Physiological Chemistry
Credits 3. 3 Lecture Hours.
Fundamentals of physiology, biochemistry and nutrition and their relationship to the organismic and cellular metabolism of animals; biochemical basis of hormonal action.
Prerequisites: NUTR 203; NUTR 301; BICH 410; senior classification or approval of department head.

NUTR 471/FSTC 471 Critical Evaluation of Nutrition and Food Science Literature: Evidence Based Reviews
Credits 3. 3 Lecture Hours.
Evaluation of scientific literature, research methods within the literature, and the quality of scientific studies to produce an evidence-based review in areas specific to nutrition and food science.
Prerequisites: NUTR 202 or NUTR 203 and STAT 302; junior or senior classification; knowledge of technical writing helpful.
Cross Listing: FSTC 471/NUTR 471.

NUTR 481 Seminar
Credit 1. 1 Lecture Hour.
Review of current literature and research in nutrition; oral presentations and critical discussions.
Prerequisite: Junior or senior classification in scientific nutrition or allied area; approval of instructor; 2.0 GPR in major and overall.

NUTR 485 Directed Studies
Credits 0 to 4. 0 to 4 Other Hours.
Directed study on selected problems in the area of nutrition.
Prerequisites: Junior or senior classification in scientific nutrition or allied area; approval of instructor; 2.0 GPR in major and overall.

NUTR 489 Special Topics in...
Credits 1 to 4. 0 to 4 Lecture Hours. 0 to 4 Lab Hours.
Selected topics in an identified area of nutrition. May be repeated for credit.
Prerequisite: Junior or senior classification.

NUTR 491 Research
Credits 0 to 4. 0 to 4 Other Hours.
Research conducted under the direction of faculty member in nutrition. May be repeated 3 times for credit. Registration in multiple sections of this course are possible within a given semester provided that the per semester credit hour limit is not exceeded.

NVSC - Naval Science (NVSC)

NVSC 101 Introduction to Naval Science
Credits 2. 2 Lecture Hours. 1 Lab Hour.
Seapower and the naval service; mission, organization, regulations, and broad warfare components of the Navy; overview of officer and enlisted rank and rating structures, procurement and recruitment, training and education, promotion and advancement, and retirement policies. Basic tenets of naval courtesy and customs, discipline, naval leadership, and ship's nomenclature. Major challenges facing Naval officers; areas of equal opportunity, fraternization and drug/alcohol abuse.

NVSC 200 Naval Science for the Merchant Marine Officer
Credits 3. 3 Lecture Hours.
(STCW Course). Organization of the U.S. Navy (including the U.S. Navy Control of Shipping Organization) with discussion of the Merchant Marine Naval Reserve commission in order to provide a sound basis for liaison between the U.S. Navy and the Merchant Marine. Seapower will be analyzed and naval damage control procedures and underway replenishment procedures will be introduced.
NVSC 205 Naval Sea Power and Maritime Affairs
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Naval history survey emphasizing major developments in strategy, tactics, technology, and effects of political climate; significant naval engagements and officers; includes an introduction to the role of seapower in national policy and diplomacy, Mahan's naval strategy and the affects of maritime policy on global stability.

NVSC 210 Leadership and Management I
Credits 3. 3 Lecture Hours. 1 Lab Hour.
Principles of leadership and management and their application to duties and responsibilities for Junior Naval Officers; management theory, professional responsibility and human resource management programs; skills in leadership and management, communication, counseling, evaluations; administration of discipline developed through participation in case studies, experiential exercises and situational problems.

NVSC 301 Navigation
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Theory, principles and procedures of ship navigation in coastal and open ocean environments; piloting, ocean and tidal currents, weather, introduction to USN electronic and satellite navigational systems, guided participation in case studies involving maritime accidents.

NVSC 303 Evolution of Warfare
Credits 3. 3 Lecture Hours.
Art and concepts of land warfare; its evolution from the beginning of recorded history to present day; influence that leadership, political, economic, sociological and technological development have had on warfare throughout history.

NVSC 320 Naval Ships Systems I: Engineering
Credits 3. 3 Lecture Hours. 1 Lab Hour.
Study of engineering concepts and their application in U.S. Naval vessels: basic ship design, hydrodynamic forces, fluid dynamics, stability, propulsion, closed thermodynamic systems, electrical systems, shipboard power generation and distribution, shipboard safety, organization and firefighting.
Prerequisites: Junior or senior classification.

NVSC 401 Naval Ships Systems II: Weapons
Credits 3. 3 Lecture Hours. 1 Lab Hour.
Types and purpose of major weapons systems and platforms of the U.S. Naval forces; theory and operational principles of radar, sonar and communication circuits; fire control problem geometry, principles of ballistics, propulsion, launching and guidance of weapons; principles of electronic warfare and nuclear weapons.

NVSC 402 Leadership and Ethics
Credits 3. 3 Lecture Hours. 1 Lab Hour.
Theoretical concepts of Western moral traditions and ethical philosophy; topics include leadership, values, military ethics, Just War Theory, Uniform Code of Military Justice and Naval regulations; examination of ethical foundation for the development of leadership and communication skills; should be taken the semester of graduation.

NVSC 404 Naval Operations and Seamanship
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Relative motion, formation tactics, ship maneuvering behavior and characteristics, applied aspects of ship handling, afloat communications and ship employment; naval warfare, operations concepts, command and control, and joint warfare; review and analysis of case studies involving moral, ethical and leadership issues.
Prerequisite: NVSC 301; junior or senior classification.

NVSC 410 Amphibious Warfare
Credits 3. 3 Lecture Hours.
Historical survey of the projection of seapower ashore; background of military history with emphasis on Marine Corps contributions; selected amphibious operations and the evolution of current amphibious doctrine. Development of concepts, principles and techniques of amphibious operations.
Prerequisite: NVSC 303.

NVSC 485 Directed Studies
Credits 1 to 4. 1 to 4 Other Hours.
Directed study in problems in the field of naval science not covered by other courses in department.
Prerequisite: Approval of department head.

OCEN 201 Introduction to Ocean Engineering
Credits 3. 3 Lecture Hours.
Survey of ocean engineering; concepts and theories of wave-structure interaction; sources of technical information; coastal and ocean structures, moorings, laboratory models; underwater systems; naval architecture; ocean instrumentation; materials and corrosion; hydrographic surveying and positioning, recent developments in ocean engineering.
Prerequisite: CVEN 221 or registration therein.

OCEN 300 Ocean Engineering Wave Mechanics
Credits 3. 3 Lecture Hours.
Physical and mathematical fundamentals of ocean wave behavior; mechanics of wave motion; use of statistics and probability to develop design wave criteria.
Prerequisite: CVEN 311, OCEN 201 or registration therein.

OCEN 336 Fluid Dynamics Laboratory
Credit 1. 2 Lab Hours.
Introduction to laboratory techniques, calibration principles, reports and fluid measurements; determination of fluid properties; visualization of types of flow; experiments in closed conduit flow of air, water and oil; fluid drag and turbomachinery tests; open channel and gravity wave demonstrations.
Prerequisite: CVEN 311 or registration therein.

OCEN 362 Hydromechanics
Credits 3. 3 Lecture Hours.
Kinematics of fluids; differential analysis of fluid flow; incompressible, irrotational and turbulent flow; Navier-Stokes equations; flow of viscous fluids; open-channel flow.
Prerequisites: CVEN 311; MATH 308; junior or senior classification.

OCEN 400 Basic Coastal Engineering
Credits 3. 3 Lecture Hours.
Mechanics of wave motion; wave refraction, diffraction and reflection; wave forecasting; shore processes; planning of coastal engineering projects; design of seawalls, breakwaters, beach nourishment, and fixed and floating installations; dredging; risk analysis.
Prerequisites: OCEN 300 or approval of instructor; CVEN 311; junior or senior classification.
OCEN 401 Underwater Acoustics for Ocean Engineers
Credits 3. 3 Lecture Hours.
Fundamentals of underwater acoustics, SONAR equations, propagation of underwater sound, acoustic transducers and arrays, noise in the ocean environment, design and prediction of SONAR systems, ocean engineering applications of underwater sound.
Prerequisite: CVEN 311.

OCEN 402 Principles of Naval Architecture
Credits 3. 3 Lecture Hours.
Elementary principles of naval architecture; ship geometry and hydrostatics; load line and classification regulations; concept of intact and damaged stability; resistance and propulsion of water-borne vehicles; applications to the design consideration of semi-submersibles, catamarans and drilling rigs.
Prerequisite: CVEN 311.

OCEN 403 Dynamics of Offshore Structures
Credits 3. 3 Lecture Hours.
Prediction of loads due to wind, current and waves; introduction to concepts of linear structural dynamics and to the design of ocean structures; mooring and towing analysis; fluid-structure interactions; vibration of submerged structures; offshore pipelines; introduction to risk analysis.
Prerequisites: OCEN 300 or approval of instructor; CVEN 345, CVEN 363 or registration therein.

OCEN 407 Design of Ocean Engineering Facilities
Credits 4. 1 Lecture Hour. 6 Lab Hours.
Design of structures, equipment and systems for the ocean; environmental, logistical and reliability requirements; complete design process followed through group design project; delineation of alternatives, constraints, economics and environmental consequences included to strengthen real-life problem solving skills.
Prerequisites: OCEN 400, OCEN 402, OCEN 403 or approval of instructor.

OCEN 408 Underwater and Moored System Design
Credits 3. 3 Lecture Hours.
Basic principles of thermodynamics, fluid dynamics and human respiration physiology applied to design of underwater habitats, submersibles and diving bells; breathing gas supply for diving systems; heat transfer for underwater systems; pressure vessel design; remotely operated vehicles; subsea flowlines and manifold systems; and design of towed and moored systems.
Prerequisites: CVEN 311; MEEN 315 or approval of instructor.

OCEN 410 Ocean Engineering Laboratory
Credit 1. 3 Lab Hours.
Fundamental techniques and instrumentation for field and laboratory measurements pertaining to ocean engineering experiment planning; data analysis and data presentation; written reports describing planning, analysis and results of experiments.
Prerequisites: OCEN 400, OCEN 402, OCEN 403; junior or senior classification.

OCEN 475 Environmental Fluid Mechanics
Credits 3. 3 Lecture Hours.
Examines fluid and mass transport in naturally occurring flows; topics include molecular and turbulent diffusion; dispersion; river, estuary, and ocean mixing; dissolution boundary layers; tidal mixing; offshore wastewater outfalls; introduction to environmental quality numerical modeling.
Prerequisite: CVEN 311.

OCEN 481 Seminar
Credit 1. 1 Lecture Hour.
Responsibilities and obligations of new ocean engineers; professional ethics, membership in professional societies and professional registrations; case studies and lectures presented by staff and practicing engineers. Must be taken on a satisfactory/unsatisfactory basis.
Prerequisite: OCEN 300.

OCEN 485 Directed Studies
Credits 1 to 6. 1 to 6 Other Hours.
Special problems in various areas of ocean engineering assigned to individual students or to groups; readings and assignments given and frequent consultations held.
Prerequisite: Approval of program head.

OCEN 489 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Selected topics in an identified field of ocean engineering. May be repeated for credit.
Prerequisite: Approval of instructor.

OCEN 491 Research
Credits 1 to 4. 1 to 4 Other Hours.
Research conducted under the direction of faculty member in ocean engineering. May be repeated 2 times for credit. Registration in multiple sections of this course is possible within a given semester provided that the per semester credit hour limit is not exceeded.
Prerequisites: Junior or senior classification and approval of instructor.

OCNG - Oceanography (OCNG)

OCNG 251 Oceanography
Credits 3. 3 Lecture Hours. 1 Lab Hour.
Overview of the ocean environment; interrelation of the subdisciplines of ocean sciences; importance of the oceans to human beings; human impact on the oceans.
Prerequisite: Concurrent registration in ONCG 252 if necessary for meeting the 8 credit hour science core curriculum requirement.

OCNG 252 Oceanography Laboratory
Credit 1. 2 Lab Hours.
Hands-on laboratory experiments and exercises demonstrating principles of ocean sciences; emphasis on the unique interdisciplinary nature of the ocean and current ocean issues relevant to today’s society. Honors sections and contracts are also available.

OCNG 281 Seminar
Credit 1. 1 Lecture Hour.
Basic background on the research being conducted in the Department of Oceanography through seminars given by Oceanography graduate student; basic writing skills for ocean science through instruction and assignments during the semester.
Prerequisites: OCNG 251 or OCNG 401; OCNG 252; or approval of instructor.

OCNG 291 Research
Credits 0 to 4. 0 to 4 Other Hours.
Research conducted under the direction of faculty member in oceanography. May be repeated 2 times for credit. Registration in multiple sections of this course is possible within a given semester provided that the per semester credit hour limit is not exceeded.
Prerequisites: Freshman or sophomore classification and approval of instructor.
OCNG 350 Marine Pollution
Credits 3.3 Lecture Hours.
Sources and fates of marine pollutants; types of pollutants including plastics, oil and sound; impact of pollution on society.
Prerequisite: Junior or senior classification or approval of instructor.

OCNG 401 Interdisciplinary Oceanography
Credits 3.3 Lecture Hours.
Quantitative survey of interdisciplinary relationships between biological, chemical, geological/geophysical and physical aspects of the ocean. Honors section also available.
Prerequisites: MATH 131, MATH 151, or MATH 171; junior or senior classification; or approval of instructor.

OCNG 404 Ocean Observing Systems
Credits 3.3 Lecture Hours.
Investigate the rationale behind ocean observing systems; familiarize with the relevant social, scientific design, technology and policy issues associated with observing systems.
Prerequisite: OCNG 251 or OCNG 401 or approval of instructor.

OCNG 410 Physical Oceanography
Credits 3.3 Lecture Hours.
Elements of the physics of the sea; descriptive aspects as well as cause and effect relations in respect to currents, thermal structure and waves. Intended for majors in the physical sciences or engineering.
Prerequisites: MATH 152; junior or senior classification.

OCNG 420 Biological Oceanography
Credits 3.3 Lecture Hours.
Biological aspects of the marine environment; marine organisms; productivity of the sea; marine pollution and fouling; use of the sea.
Prerequisites: BIOL 112 or OCNG 251; junior or senior classification.

OCNG 425 Microbial Oceanography
Credits 3.3 Lecture Hours.
Diversity and ecology of microorganisms in the ocean; role in the Earth system both in the contemporary ocean and the geological past.
Prerequisites: Junior or senior classification, OCNG 251, or OCNG 401, or approval of instructor.

OCNG 430 Geological Oceanography
Credits 3.3 Lecture Hours.
History of Oceanography; physiographic provinces of the oceans, their origins and sediments; geological sampling techniques and geophysical methods; coasts and beaches, paleoceanography; global tectonics.
Prerequisites: OCNG 251 or OCNG 401 or GEOL 101 or GEOL 104 or GEOG 203; junior or senior classification.

OCNG 440 Chemical Oceanography
Credits 3.3 Lecture Hours.
Chemical aspects of the marine environment; biogeochemical cycles of organic and inorganic constituents; primary productivity, the carbon dioxide system, nutrient cycles, stable and radioactive isotopes in the sea.
Prerequisites: CHEM 102 or CHEM 104; junior or senior classification; sophomore with approval of instructor.

OCNG 451 Mathematical Modeling of Ocean Climate
Credits 4.3 Lecture Hours. 2 Lab Hours.
Problem-based course in theoretical and computer techniques applied to mathematical solutions of ocean climate, including ocean circulation, climate variability, El Niño.
Prerequisite: MATH 308 or MATH 451.
PERF - Performance Studies
(PERF)

PERF 101 Introduction to Performance Studies
Credits 3.3 Lecture Hours.
Survey of topics in the interdisciplinary field of performance studies, including forms of performance, performance in everyday life and performance in global and intercultural contexts; in-class performance exercises and discussions; major writing component.

PERF 202 Introduction to Performance Technology
Credits 3.3 Lecture Hours. 1 Lab Hour.
Basic hardware, software, and aesthetic concepts of technology-based artistic performance; basic electricity, electronics, troubleshooting, audio and video design software, study of significant works, and participation in a departmental production.

PERF 284 Performance Studies Internship
Credits 0 to 4.0 to 4 Lecture Hours.
Supervised experience program conducted in the area of the student's interest in performance studies. May be taken three times for credit.
Prerequisite: PERF 101.

PERF 285 Directed Studies
Credits 0 to 3.0 to 3 Other Hours.
Directed Studies in specific problems in identified areas of performance studies. May be taken for credit up to 3 hours.
Prerequisites: Approval of instructor and department head; PERF majors and minors only.

PERF 289 Special Topics in...
Credits 3.3 Other Hours.
Selected topics in performance studies. May be taken for credit seven times.
Prerequisite: Approval of instructor.

PERF 291 Research
Credits 0 to 3.0 to 3 Other Hours.
Research conducted under the direction of faculty member in performance studies. May be taken two times for credit.
Prerequisites: Freshman or sophomore classification and approval of instructor.

PERF 292 Cooperative Education in Performance Studies
Credits 0 to 3.0 to 3 Other Hours.
Educational work assignment by a student in the field of his or her career interest and course of study; supervision of the student by the cooperating employer and the instructor; technical report on a related subject area approved by the instructor. May be taken two times for credit.
Prerequisite: PERF 101.

PERF 301 Performance in World Cultures
Credits 3.3 Lecture Hours.
Application of the tools of performance studies to explore the enactment of the arts in world cultures and the ways the people of every society express themselves in performance; examination of different genres of performance through music, theatre, verbal art and dress.
Prerequisite: Junior or senior classification or approval of instructor.
Cross Listing: MUSC 301 and THAR 301.

PERF 318/MUSC 318 Electronic Composition
Credits 3.3 Lecture Hours.
Project-based study of techniques for creating electronic and mixed-media performance; critical analysis of important electronic and interactive works; interactive media programming techniques for sound and video synthesis, sampling, digital signal processing.
Prerequisites: Junior or senior classification and MUSC 316, PERF 202, or approval of instructor.
Cross Listing: MUSC 318/PERF 318.

PERF 325/MUSC 325 Dance and World Cultures
Credits 3.3 Lecture Hours.
Examination of international relationships between dance, culture, identity, gender, youth and politics; relationships between dancing, gender and politics in specific cultures and in globalization; variety of dance practices around the globe.
Prerequisite: Junior or senior classification.

PERF 326 Dance and Identity in the United States
Credits 3.3 Lecture Hours.
Analysis of dance events as complex sites for social action; examines dances performed by diverse groups of people; considers such issues as identity, community, diversity, gender and representation in the United States.
Prerequisite: Junior or senior classification.

PERF 327 Popular Musics in the African Diaspora
Credits 3.3 Lecture Hours.
Examination of a range of popular musics from the twentieth century that have emerged in conjunction with the historical global spread of peoples and cultures from the African continent; technical knowledge about music is not required; focus on social and cultural contexts for popular music.
Prerequisite: Junior or senior classification or approval of instructor.
Cross Listing: AFST 327 and MUSC 327.

PERF 402 Intermedia Performance
Credits 3.3 Lecture Hours.
Study of theory, history, literature and techniques of intermedia composition and design for film, theatre, dance, interactive media, and other forms of performance; examination of the collaborative creative process; projects in interdisciplinary performance.
Prerequisites: Junior or senior classification and MUSC 316, PERF 202, or approval of instructor.
Cross Listing: FILM 402 and MUSC 402.

PERF 481 Senior Project
Credits 3.1 Lecture Hour. 5 Lab Hours.
Capstone senior project on an individually-chosen research topic, presentation of a performance or interdisciplinary project; major writing and oral communication components.
Prerequisites: Performance studies major; completion of all performance studies coursework or taken concurrently with this course; approval of instructor, advisor and department head.

PERF 483 Performance Practicum
Credits 1 to 3.1 to 3 Other Hours.
Faculty-supervised performance experience in a public setting as part of a department production or an approved external production. May be taken four times for credit.
Prerequisite: Junior or senior classification and approval of instructor.
PERF 484 Performance Studies Internship
Credits 0 to 4. 0 to 4 Other Hours.
Supervised experience program conducted in the area of the student’s interest in performance studies. May be taken three times for credit.
Prerequisites: PERF 101; junior or senior classification.

PERF 485 Directed Studies
Credits 0 to 3. 0 to 3 Other Hours.
Directed Studies in specific problems in identified areas of performance studies. May be taken for credit up to 3 hours.
Prerequisites: Approval of instructor and department head; PERF majors and minors only.

PERF 489 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours. 0 to 4 Lab Hours.
Selected topics in performance studies. May be repeated for credit.
Prerequisite: Approval of instructor.

PERF 491 Research
Credits 0 to 3. 0 to 3 Other Hours.
Research conducted under the direction of faculty member in performance studies. May be taken two times for credit.
Prerequisites: Junior or senior classification and approval of instructor.

PERF 492 Cooperative Education in Performance Studies
Credits 0 to 3. 0 to 3 Other Hours.
Educational work assignment by a student in the field of his or her career interest and course of study; supervision of the student by the cooperating employer and the instructor; technical report on a related subject area approved by the instructor. May be taken two times for credit.
Prerequisites: PERF 101; junior or senior classification.

PETE - Petroleum Engineering (PETE)

PETE 201 Introduction to Petroleum Engineering
Credit 1. 1 Lecture Hour.
Overview and history of the petroleum industry and petroleum engineering; nature of oil and gas reservoirs, exploration and drilling, formation evaluation, well completions and production, surface facilities, reservoir mechanics, improved oil recovery; impact of ethical, societal, environmental considerations; career development resources, including professional society.
Prerequisite: Approval of department head.

PETE 225 Introduction to Drilling Systems
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Introduction to petroleum drilling systems, including fundamental petroleum engineering concepts, quantities and unit systems, drilling rig components, drilling fluids, pressure loss calculations, casing, well cementing, and directional drilling.
Prerequisites: Grade of C or better in ENGR 112, MATH 152 and PHYS 218.

PETE 285 Directed Studies
Credits 1 to 4. 1 to 4 Other Hours.
Special problems in various areas of petroleum engineering assigned to individual students or to groups.
Prerequisites: Approval of department head.

PETE 289 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Selected topics in an identified area of petroleum engineering. May be repeated for credit.
Prerequisite: Approval of instructor.

PETE 291 Research
Credits 1 to 4. 1 to 4 Other Hours.
Research conducted under the direction of a faculty member in petroleum engineering. May be taken two times for credit. Registration in multiple sections of this course is possible within a given semester.
Prerequisites: Freshman or sophomore classification and approval of instructor.

PETE 300 Summer Practice
Credits 0.
Required. No Credit. Industry practice to familiarize the petroleum engineering student with practices and equipment of the petroleum industry. Approval of advisor required.

PETE 301 Petroleum Engineering Numerical Methods
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Use of numerical methods in a variety of petroleum engineering problems; numerical differentiation and integration; root finding; numerical solution of differential equations; curve fitting and interpolation; computer applications; introduction to the principles of numerical simulation methods.
Prerequisites: MATH 308, junior or senior classification, petroleum engineering majors only; or approval of instructor.

PETE 310 Reservoir Fluids
Credits 4. 3 Lecture Hours. 3 Lab Hours.
Thermodynamic behavior of naturally occurring hydrocarbon mixtures; evaluation and correlation of physical properties of petroleum reservoir fluids including laboratory and empirical methods.
Prerequisites: Grade of C or better in CHEM 107 and CHEM 117; MATH 251, MEEN 315, PETE 311.
Corequisite: MATH 308.

PETE 311 Reservoir Petrophysics
Credits 4. 3 Lecture Hours. 3 Lab Hours.
Systematic theoretical and laboratory study of physical properties of petroleum reservoir rocks; lithology, porosity, elastic properties, strength, acoustic properties, electrical properties, relative and effective permeability, fluid saturations, capillary characteristics and rock-fluid interactions such as adsorption and absorption.
Prerequisites: MATH 251; PHYS 208 with a grade of C or better.
Corequisite: GEOL 104.

PETE 314 Transport Processes in Petroleum Production
Credits 3. 3 Lecture Hours.
Basics and applications of fluid mechanics (statics; mass, energy, momentum balances; laminar and turbulent flow, Reynolds number, Moody diagram; non-Newtonian fluid flow; multi-phase flow; flow in porous media, non-Darcy flow); heat transfer (heat conduction, convection, heat exchangers); emphasis on analogies and similarities within mass, energy and momentum transport.
Prerequisites: MEEN 315, junior or senior classification, petroleum engineering majors only; or approval of instructor.
PETE 321 Formation Evaluation  
**Credits 4.3 Lecture Hours. 3 Lab Hours.**
Well-log interpretation for formation evaluation of hydrocarbon-bearing reservoirs; basic rock physics principles; theory of tool operation; analysis of open hole logs and core measurements to estimate hydrocarbon reserves and petrophysical properties of the formation such as porosity, net pay thickness, water/hydrocarbon saturation, permeability and saturation-dependent capillary pressure; formation evaluation of clay-free and shaly-sand formations as well as basic introduction to formation evaluation of organic-shale formations.

**Prerequisites:** PETE 301, PETE 310, PETE 311; GEOL 404, junior or senior classification, petroleum engineering majors only; or approval of instructor.

PETE 322 Geostatistics  
**Credits 3.3 Lecture Hours.**
Introduction to geostatistics; basic concepts in probability and univariate statistics; bivariate statistics and spatial relationship; covariance and correlation; second order stationarity; variogram estimation and modeling; spatial estimation and reservoir modeling; simple and ordinary kriging; uncertainty analysis; estimation versus conditional simulation; sequential Gaussian simulation.

**Prerequisites:** Senior classification, petroleum engineering majors only; or approval of instructor.

PETE 323 Fundamentals of Reservoir Engineering  
**Credits 3.3 Lecture Hours.**
Determination of reserves; material balance methods; aquifer models; fractional flow and frontal advance; displacement, pattern and vertical sweep efficiencies in waterfloods; enhanced oil recovery processes; design of optimal recovery processes; introduction and performance analysis of unconventional reservoirs.

**Prerequisites:** PETE 301, PETE 310, PETE 311; GEOL 404, junior or senior classification, petroleum engineering majors only; or approval of instructor.

PETE 324 Well Testing  
**Credits 3.3 Lecture Hours.**
Analysis of well performance under varied reservoir conditions including evaluation of unsteady, pseudo-steady and steady state flow; well testing methods used to determine well and reservoir parameters; applications to conventional and unconventional wells producing gas and/or liquids; fundamentals of preparing and operating well test equipment to monitor, measure and gather samples for evaluating well performance.

**Prerequisites:** PETE 301, PETE 310, PETE 311; GEOL 404, junior or senior classification, petroleum engineering majors only; or approval of instructor.

PETE 325 Petroleum Production Systems  
**Credits 3.2 Lecture Hours. 3 Lab Hours.**
Petroleum operation and oil field equipment including onshore and offshore production systems; wellbore inflow and outflow and backpressure analysis; downhole completion and sand control equipment; artificial lift equipment and design; stimulation, workover/completion nomenclature; flow assurance; produced fluids, fluid separation and metering, safety systems, pressure boosting and monitoring.

**Prerequisites:** PETE 301, PETE 310, PETE 314, junior or senior classification, petroleum engineering majors only; or approval of instructor.

PETE 335 Technical Presentations I  
**Credit 1.1 Lecture Hour.**
Preparation of a written technical paper proposal on a subject related to petroleum technology and an oral presentation of the proposal in a formal technical conference format.

**Prerequisites:** COMM 203, COMM 205 or ENGL 210; junior or senior classification.

PETE 337 Junior Student Paper Contest  
**Credits 0.**
No Credit. Presentation of a technical proposal on a subject related to petroleum technology judged by petroleum professionals at the junior level departmental student paper contest. Must be taken on a satisfactory/unsatisfactory basis.

**Prerequisite:** PETE 335.

PETE 353 Petroleum Project Evaluation  
**Credits 3.3 Lecture Hours.**
Economic analysis and investment decision methods in petroleum and mineral extraction industries; depletion, petroleum taxation regulations, and projects of the type found in the industry; mineral project evaluation case studies.

**Corequisites:** PETE 301, PETE 310.

PETE 355 Drilling Engineering  
**Credits 3.3 Lecture Hours.**
Design and evaluation of well drilling systems; identification and solution of drilling problems; wellbore hydraulics, well control, casing design; well cementing directional drilling, offshore drilling.

**Prerequisites:** CVEN 305, PETE 225, PETE 314; Corequisites: PETE 321, PETE 325.

PETE 401 Reservoir Simulation  
**Credits 2.1 Lecture Hour. 3 Lab Hours.**
Solution of production and reservoir engineering problems using state-of-the-art commercial reservoir simulation software, using data commonly available in industry; emphasis on reservoir description, reservoir model design and calibration, production forecasting and optimization, economic analysis and decision making under uncertainty.

**Prerequisites:** PETE 310, PETE 321, PETE 323, PETE 324, PETE 353.

PETE 402 Integrated Asset Development  
**Credits 3.1 Lecture Hour. 6 Lab Hours.**
Capstone design encompassing previously acquired skills; project teams formed to solve practical petroleum engineering problems using current tools; technical content of the projects may include any combination of drilling and completion, formation evaluation, inflow/outflow design and analysis, and application of reservoir engineering principles.

**Prerequisites:** PETE 355, PETE 401, PETE 404, PETE 410.

PETE 404 Integrated Reservoir Modeling  
**Credits 3.3 Lecture Hours.**
Geophysical, geological, petrophysical and engineering data with geostatistical methods to create reservoir descriptions for dynamic reservoir modeling (simulation); geostatistical concepts such as variogram modeling, kriging and sequential Gaussian simulation; combines several techniques to quantify uncertainty in a realistic dynamic reservoir simulation.

**Corequisite:** PETE 401.
PETE 406 High Performance Drilling Design and Operational Practices  
Credits 3.3 Lecture Hours.  
Preparation in achieving differentiating drilling performance in the most complex wells; includes training in the underlying physics of each type of performance limiter and real time and engineering practices to address the limitation; performance management workflows and change models required to effectively change the way organizations conduct work essential in achieving higher performance.  
Prerequisite: PETE 355.

PETE 410 Production Engineering  
Credits 3.3 Lecture Hours.  
Fundamental production engineering design, evaluation and optimization for oil and gas producing well; well deliverability; formation damage and skin analysis; well completion selection; technologies that improve oil and gas well performance including artificial lift and well stimulation.  
Prerequisites: PETE 321, PETE 323, PETE 324, PETE 325.

PETE 416 Solving Common Production Engineering Problems  
Credits 3.3 Lecture Hours.  
Application of petroleum engineering tools, methods and techniques to solve real problems that petroleum engineers encounter in producing individual wells; focus primarily on problems associated with single-phase gas wells and uses Microsoft Excel to solve many of these problems.  
Prerequisite: PETE 410.

PETE 435 Technical Presentations II  
Credit 1 1 Lecture Hour.  
Preparation of a written technical paper on a subject related to petroleum technology and an oral presentation of the paper in a formal technical conference format.  
Prerequisites: PETE 335; satisfactory performance in junior student paper contest.

PETE 437 Senior Student Paper Contest  
Credits 0.  
No credit. Presentation of a technical petroleum engineering topic judged by petroleum professionals at the senior level departmental student paper contest. Must be taken on a satisfactory/unsatisfactory basis.  
Prerequisite: PETE 337;  
Corequisite: PETE 435.

PETE 458 Energy and Sustainability  
Credits 3.3 Lecture Hours.  
Energy resources and use with emphasis on long-term sustainability; considers fossil, nuclear and alternative energy sources, electricity and transportation, energy conversions, energy efficiency, energy security, energy policy and environmental impact.

PETE 485 Directed Studies  
Credits 1 to 5. 1 to 5 Other Hours.  
Special problems in various phases of petroleum engineering assigned to individual students or to groups.  
Prerequisites: Junior or senior classification and approval of department head.

PETE 489 Special Topics in...  
Credits 1 to 4. 1 to 4 Lecture Hours.  
Selected topics in an identified field of petroleum engineering. Approval of instructor. May be repeated for credit.

PETE 491 Research  
Credits 1 to 4. 1 to 4 Other Hours.  
Research conducted under the direction of a faculty member in petroleum engineering. May be taken two times for credit. Registration in multiple sections of this course is possible within a given semester.  
Prerequisites: Junior or senior classification and approval of instructor.

PHIL - Philosophy (PHIL)

PHIL 111 Contemporary Moral Issues  
Credits 3.3 Lecture Hours.  
(PHIL 2306) Contemporary Moral Issues. Representative ethical positions and their application to contemporary social problems.

PHIL 205 Technology and Human Values  
Credits 3.3 Lecture Hours.  
Interaction of personal and societal values with technology and man's self-image, the future and value change.

PHIL 208 Philosophy of Education  
Credits 3.3 Lecture Hours.  
Basic social ideas and concepts of human nature in Western civilization; their implications for theories of education.

PHIL 240 Introduction to Logic  
Credits 3.3 Lecture Hours.  
(PHIL 2303) Introduction to Logic. Introduction to formal methods of deductive and inductive logic including, but not limited to, truth-tables, formal deduction and probability theory.

PHIL 251 Introduction to Philosophy  
Credits 3.3 Lecture Hours.  
(PHIL 1301) Introduction to Philosophy. Perennial problems of philosophy such as the existence of God, the mind/body relationship, the limits of knowledge, the foundations of moral judgment, man and the state.

PHIL 252/AFST 252 Introduction to Hip-Hop Philosophy  
Credits 3.3 Lecture Hours.  
Introduction to philosophy by way of the major themes and subjects of Hip-Hop; critical advocacy of various philosophical ideals.  
Cross Listing: AFST 252/PHIL 252.

PHIL 283 Latin American Philosophy  
Credits 3.3 Lecture Hours.  
Major philosophers in the history of Latin American philosophy, such as Unamuno, Ortega y Gasset, Vasconcelos, Caso and Gutiérrez.

PHIL 285 Directed Studies  
Credits 0 to 4. 0 to 4 Other Hours.  
Directed studies in specific problem areas of philosophy.  
Prerequisite: Approval of department head.

PHIL 289 Special Topics in...  
Credits 1 to 4. 1 to 4 Lecture Hours.  
Selected topics in an identified area of philosophy. May be repeated for credit.  
Prerequisite: Approval of instructor.

PHIL 291 Research  
Credits 0 to 3. 0 to 3 Other Hours.  
Research conducted under the direction of faculty member in the department of philosophy and humanities. May be taken two times for credit.  
Prerequisites: Freshman or sophomore classification and approval of department head.
PHIL 305 Philosophy of the Natural Sciences  
Credits 3. 3 Lecture Hours.  
Critical analysis of scientific methods and achievements; the nature and types of explanation, discovery and confirmation, models and theories.  
Prerequisite: 3 hours of philosophy other than PHIL 240.

PHIL 307 Philosophy of the Social Sciences  
Credits 3. 3 Lecture Hours.  
Nature and objectivity of the social sciences, their paradigms and patterns of explanation.  
Prerequisite: 3 hours of philosophy other than PHIL 240.

PHIL 314 Environmental Ethics  
Credits 3. 3 Lecture Hours.  
Moral basis of duties to preserve or protect plants, animals and environmental systems; foundations of environmental law and policy; the idea of nature in philosophy; critique of social and economic analyses of environmental values.  
Prerequisite: Sophomore classification or approval of instructor.

PHIL 315 Military Ethics  
Credits 3. 3 Lecture Hours.  
Major ethical issues in modern military practice: ethics of leadership, just war theory, killing of the innocent and the moral status of the rules of war.

PHIL 320 Philosophy of Mind  
Credits 3. 3 Lecture Hours.  
Relation of mind to body, nature of thought and knowing, the free will problem, death and immortality.  
Prerequisite: 3 hours of philosophy other than PHIL 240.

PHIL 330 Philosophy of Art  
Credits 3. 3 Lecture Hours.  
Theories of artistic creation and aesthetic response as exemplified in art forms such as painting, music, poetry, architecture, dance, theater, sculpture and motion pictures.

PHIL 331/RELS 331 Philosophy of Religion  
Credits 3. 3 Lecture Hours.  
Philosophical problems of Western religion such as the existence of God, the problem of evil, types of theism, rational, empirical and mystical approaches to God.  
Cross Listing: RELS 331/PHIL 331.

PHIL 332 Social and Political Philosophy  
Credits 3. 3 Lecture Hours.  
Metaphysical commitments and political theory, the nature and proper ends of the state, freedom, equality, authority, and justice, considering such writers as Plato, Aristotle, Machiavelli, Locke, Rousseau, Marx, Dewey.  
Prerequisite: 3 hours of philosophy other than PHIL 240.

PHIL 334 Philosophy of Law  
Credits 3. 3 Lecture Hours.  
Traditional legal issues such as definitions of law, relationship between law and morality, and punishment considered from a legal perspective.  
Prerequisite: Junior or senior classification.

PHIL 341 Symbolic Logic  
Credits 3. 3 Lecture Hours.  
Elementary symbolic logic beginning with propositional calculus and first order predicate logic, and their applications.  
Prerequisite: PHIL 240.

PHIL 342 Symbolic Logic II  
Credits 3. 3 Lecture Hours.  
Advanced topics in logic such as the theory of identity, higher order logics, logic of sets, elements of modal logic.  
Prerequisite: PHIL 240 or PHIL 341, or approval of instructor.

PHIL 351 Theory of Knowledge  
Credits 3. 3 Lecture Hours.  
Major topics in epistemology such as the problem of induction, perception theory, memory and the problem of other minds.  
Prerequisites: 3 hours of philosophy.

PHIL 352/AFST 352 Africana Philosophy  
Credits 3. 3 Lecture Hours.  
Presentation of the seminal ideas of several influential Africana thinkers; recovery of the neglected traditions in which these thinkers locate themselves. May be taken three times for credit.  
Prerequisite: Junior or senior classification or approval of instructor.  
Cross Listing: AFST 352/PHIL 352.

PHIL 353/AFST 353 Radical Black Philosophies of Race and Racism  
Credits 3. 3 Lecture Hours.  
Critical evaluation of white supremacy, colonialism, and the modern construction of race; examination of the historical background for contemporary theories of race.  
Prerequisite: Junior or senior classification or approval of instructor.  
Cross Listing: AFST 353/PHIL 353.

PHIL 361 Metaphysics  
Credits 3. 3 Lecture Hours.  
Topics concerning the fundamental nature of reality such as what exists, the mental and the physical, universals and individuals, space and time, God.  
Prerequisites: PHIL 240 and 3 hours of philosophy.

PHIL 371 Philosophy of Literature  
Credits 3. 3 Lecture Hours.  
Philosophical analysis of the major recurrent themes in world literature including fate, the meaning of tragedy, death, odyssey, good and evil, time and eternity, hope and salvation; works selected from a variety of cultures and historical periods.

PHIL 375 Philosophy of the Visual Media  
Credits 3. 2 Lecture Hours. 2 Lab Hours.  
Aesthetic, ethical and epistemological issues of photography, cinema and video.

PHIL 376/FILM 376 Philosophy, Film and Evil  
Credits 3. 3 Lecture Hours.  
Application of philosophical methods and analyses to the medium of film; survey of various depictions and treatments of evil within the genre of science fiction; investigation of depictions and treatments of evil arising from consideration of human encounters with alien others.  
Prerequisite: Junior or senior classification.  
Cross Listing: FILM 376/PHIL 376.

PHIL 381 Ethical Theory  
Credits 3. 3 Lecture Hours.  
Values and conduct such as moral relativism, self-interest, utilitarianism, rules, nature of valuation, ethical language and argumentation.  
Prerequisite: 3 hours of Philosophy other than PHIL 240.
PHIL 409/WGST 409 Studies in Gender and Philosophy
Credits 3. 3 Lecture Hours.
Analysis, from a gender-studies perspective, of a single figure or concept in the history of philosophy. May be repeated 1 time for credit with a different focus.
Prerequisites: 3 hours in philosophy and women's and gender studies; junior or senior classification.
Cross Listing: WGST 409/PHIL 409.

PHIL 410 Classical Philosophy
Credits 3. 3 Lecture Hours.
Major philosophers from 600 B.C. to the end of the third century A.D. including the Pre-Socratics, Socrates, Plato, Aristotle, Hellenistic and Roman philosophy and the Neo-Platonists.

PHIL 411 Medieval Philosophy
Credits 3. 3 Lecture Hours.
Major philosophers from the early Christian centuries through the 14th century, emphasizing such writers as Augustine, Aquinas, Duns Scotus and William of Ockham.

PHIL 412 Seventeenth-Century Philosophy
Credits 3. 3 Lecture Hours.
Significant seventeenth-century texts in metaphysics, epistemology, moral psychology, and political philosophy; authors such as Descartes, Hobbes, Spinoza, Leibniz, and Locke.
Prerequisite: Junior or senior classification or approval of instructor.

PHIL 413 Eighteenth-Century Philosophy
Credits 3. 3 Lecture Hours.
Significant eighteenth-century texts from philosophers such as Berkeley, Rousseau, Hume, and Kant.

PHIL 414 Nineteenth Century Philosophy
Credits 3. 3 Lecture Hours.
Contributions of such philosophers as Hegel, Marx, Kierkegaard, Nietzsche, Husserl, Mill and Bradley.
Prerequisite: 3 hours of philosophy.

PHIL 415 American Philosophy
Credits 3. 3 Lecture Hours.
The thought of philosophers such as Peirce, James, Royce, Santayana, Mead, Dewey and Whitehead.
Prerequisite: 3 hours of philosophy other than PHIL 240.

PHIL 416 Recent British and American Philosophy
Credits 3. 3 Lecture Hours.
Major philosophers in contemporary Anglo-American thought such as Moore, Russell, Wittgenstein, Ayer, Quine, Austin and Ryle.
Prerequisites: PHIL 240.

PHIL 417 Phenomenology
Credits 3. 3 Lecture Hours.
Phenomenology from its nineteenth-century origins to the present; authors such as Brentano, Husserl, Scheler, Heidegger, Merleau-Ponty, Levinas, Henry, Marion.
Prerequisites: Junior or senior classification.

PHIL 418 Existentialism
Credits 3. 3 Lecture Hours.
Existentialism from its nineteenth-century origins to the present; philosophers such as Kierkegaard, Nietzsche, Buber, Rosenzweig, Sartre, de Beauvoir, and Camus.
Prerequisite: PHIL 412 or 413; junior or senior classification or approval of instructor.

PHIL 419 Current Continental Philosophy
Credits 3. 3 Lecture Hours.
Major thinkers concerned with "postmodern" topics in hermeneutics, poststructuralism, critical theory, deconstructionism, contemporary Marxist strategies, semiotics and feminist theory.
Prerequisite: Junior classification or approval of instructor.

PHIL 420 Philosophy of Language
Credits 3. 3 Lecture Hours.
The nature of language; the various uses of language and their philosophical import; the nature of meaning, truth, reference and issues surrounding formal representations of natural languages.
Prerequisite: Junior classification or approval of instructor. Prerequisite: PHIL 240 and 3 additional hours of philosophy; junior or senior classification or approval of instructor.

PHIL 464/RELS 464 Modern Jewish Thought and Philosophy
Credits 3. 3 Lecture Hours.
An overview of modern Jewish thought and philosophy spanning Jewish European thinkers from the 18th century to the 20th century.
Prerequisite: Junior or senior classification.
Cross Listing: RELS 464/PHIL 464.

PHIL 480 Medical Ethics
Credits 3. 3 Lecture Hours.
Critical analysis of major ethical issues in medicine including truth-telling, confidentiality, paternalism, genetics, abortion, infanticide, euthanasia and social justice in health care.

PHIL 482/ENGR 482 Ethics and Engineering
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Development of techniques of moral analysis and their application to ethical problems encountered by engineers, such as professional employee rights and whistle blowing; environmental issues; ethical aspects of safety, risk and liability; conflicts of interest; emphasis on developing the capacity for independent ethical analysis of real and hypothetical cases.
Prerequisite: Junior classification.

PHIL 484 Professional Internship
Credits 0 to 6. 0 to 6 Other Hours.
Practical experience in an institutional or organizational setting appropriate to analysis and understanding of issues in some area of applied philosophy. May be taken five times for credit.

PHIL 485 Directed Studies
Credits 0 to 6. 0 to 6 Other Hours.
Directed studies in specific problem areas of philosophy.

PHIL 489 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Selected topics in an identified area of philosophy. May be repeated for credit.

PHIL 491 Research
Credits 0 to 3. 0 to 3 Other Hours.
Research conducted under the direction of faculty member in the department of philosophy and humanities. May be taken two times for credit.

Prerequisites: Junior or senior classification and approval of dean of college.
PHLT 497 Independent Honors Studies  
Credits 1 to 3. 1 to 3 Other Hours.  
Directed independent studies in specific philosophical problems.  
Prerequisites: Junior or senior classification either as Honors students or with overall GPR of 3.25; letter of approval from head of student's major department.

PHLT - Public Health (PHLT)

PHLT 201 Orientation to Public Health  
Credit 1. 1 Lecture Hour.  
Familiarization with public health including aspects such as different disciplines within the profession; local, national and international agencies that have interest in public health and public health code of ethics.  
Prerequisites: Public health major; junior or senior classification; approval of instructor.

PHLT 289 Special Topics In...  
Credits 1 to 4. 1 to 4 Lecture Hours. 0 to 4 Lab Hours.  
Selected topics in an identified area of public health. May be taken three times for credit.  
Prerequisite: PHLT major or approval of instructor.

PHLT 302 Foundations of Public Health  
Credits 3. 3 Lecture Hours.  
History, philosophy, development and careers of public health; core values, ethics, concepts, functions and essential services of public health; population health and health improvement.  
Prerequisites: Public health major or minor, junior or senior classification, or approval of instructor.

PHLT 303 Social Context of Population Health  
Credits 3. 3 Lecture Hours.  
Exploration of social determinants of population health and the socio-cultural roots of health improvement; socio-economic, behavioral and other factors that impact human health and contribute to health improvement and health disparities.  
Prerequisites: Public health major or minor, junior or senior classification, or approval of instructor.

PHLT 304 Biological Basis of Public Health  
Credits 3. 3 Lecture Hours.  
Biological mechanisms in individuals and populations affecting human health and disease; adverse health events including diseases, exposure to pathogens and toxins, and nutritional deficiencies.  
Prerequisites: Public health major; junior or senior classification; or approval of instructor.

PHLT 305 Epidemiology in Public Health  
Credits 3. 3 Lecture Hours.  
Principles of epidemiology, a systematic approach to collecting and evaluating information on distributions of health outcomes in populations; history of epidemiology, descriptive epidemiology, epidemiologic methods, association and causation, evidence-based public health and applications.  
Prerequisites: Public health major or minor, junior or senior classification, or approval of instructor.

PHLT 306 Border Health  
Credits 3. 3 Lecture Hours.  
United States-Mexico border public health system; includes issues important to public health at the border; addresses health challenges.  
Prerequisite: Public health major; junior or senior classification; or approval of instructor.

PHLT 307 Public Health in the Global Context  
Credits 3. 3 Lecture Hours.  
Frameworks for understanding population health on a global scale; physical, social, cultural, geographic, political and economic interactions and interdependencies that influence global population health status.  
Prerequisite: Public health major; junior or senior classification; or approval of instructor.

PHLT 308 Comparative Global Health Systems  
Credits 3. 3 Lecture Hours.  
Public health issues from population health and comparative perspectives at the global level; exploration of different public health systems in developing and developed countries.  
Prerequisites: Public health major; junior or senior classification; or approval of instructor.

PHLT 309 Population Health Promotion  
Credits 3. 3 Lecture Hours.  
Major issues in population health promotion, including applying the concept of social determinants of health: the socio-economic, behavioral, and other factors that impact human health to address population health issues.  
Prerequisites: Public health major; junior or senior classification; or approval of instructor.

PHLT 310 Public Health Writing  
Credit 1. 1 Lecture Hour.  
Strategies to become more familiar with types of writing required as public health students or public health professionals; strengthens and increases general writing skills; establishes a foundation for continued development in writing. Must be taken on a satisfactory/unsatisfactory basis.  
Prerequisites: Public health major; junior or senior classification; or approval of instructor.

PHLT 311 Narrative Approach to Public Health  
Credit 1. 1 Lecture Hour.  
Familiarization with the writing style required for public health; instruction in writing styles and narrative techniques to increase and strengthen writing abilities in public health disciplines such as environmental and occupational health, health promotion and community health sciences, health policy and management, epidemiology and biostatistics.  
Prerequisites: Public health major; junior or senior classification; or approval of instructor.

PHLT 313 Health Care and Public Health System  
Credits 3. 3 Lecture Hours.  
Two distinct systems – health care system: an individual and medical services model and the public health system: population level disease prevention and health education.  
Prerequisites: Public health major; junior or senior classification; or approval of instructor.

PHLT 314 Public Health Data Management and Assessment I  
Credits 2. 2 Lecture Hours.  
Familiarization with using the CDC software Epi-Info for managing, analyzing and assessing population health data; focus on using Epi-Info to produce descriptive data reports including tables and graphs.  
Prerequisite: Public health major; junior or senior classification; or approval of instructor.
PHLT 315 Public Health Data Management and Assessment II
Credits 2. 2 Lecture Hours.
Continuation of PHLT 314; familiarization with using the CDC software Epi-Info for managing, analyzing and assessing population health data; focus on using Epi-Info to generate inferential statistics such as confidence intervals and p-values.
Prerequisite: Public health major; PHLT 314; or approval of instructor.

PHLT 330 The Environment and Public Health
Credits 3. 3 Lecture Hours.
Environmental exposures and population health; public health core knowledge; includes methods for defining environmental contamination; identifying contaminants, pathogens and toxins; assessing risks and causality; determining health impact; methods to decrease exposures.
Prerequisites: Public health major or minor, junior or senior classification, or approval of instructor.

PHLT 331 Occupational Safety and Health I
Credits 3. 3 Lecture Hours.
Regulations and topics of relevance to occupational health professionals; includes legislation and regulations, workers’ compensation, accident investigation, industrial hygiene, ergonomics and fire prevention with an emphasis on the health professionals’ role.
Prerequisites: Public health major; junior or senior classification; or approval of instructor.

PHLT 332 Occupational Safety and Health II
Credits 3. 3 Lecture Hours.
Occupational safety and health topics including behavior-based safety, workplace violence, preparedness, hazardous materials, construction, transportation, required written programs and professional resources.
Prerequisites: Public health major; PHLT 331; or approval of instructor.

PHLT 333 Accident Investigation
Credits 3. 3 Lecture Hours.
Principles of accident investigation and how accidents happen in the workplace; integrates procedural, systematic, corrective and formative applications for the occupational health professional.
Prerequisite: Public health major; junior or senior classification; or approval of instructor.

PHLT 334 Fire Safety and Workplace Hazards
Credits 3. 3 Lecture Hours.
Principles of fire safety and other workplace hazards such as electrical hazards, chemical hazards, respiratory hazards, falls, confined spaces, bloodborne pathogens, hearing loss, ergonomics and machine hazards.
Prerequisite: Public health major; junior or senior classification; or approval of instructor.

PHLT 335 Hazardous Materials
Credits 3. 3 Lecture Hours.
Principles of managing materials in the workplace; role of the health and safety professional in hazardous material management and hazard communication.
Prerequisite: Public health major; junior or senior classification; or approval of instructor.

PHLT 410 Public Health Communication
Credits 3. 3 Lecture Hours.
Exploration of different communication approaches for addressing public health challenges; basic concepts of public health-specific communication, including risk communication, the use of mass media and evaluation of public health communication programs.
Prerequisites: PHLT 310; public health major; or approval of instructor.

PHLT 411 Project Management in Public Health
Credits 3. 3 Lecture Hours.
Exploration of successful project management and administration in public health settings; includes project development, budgeting and implementation.
Prerequisites: Public health major; junior or senior classification; or approval of instructor.

PHLT 412 Health Advocacy and Policy
Credits 3. 3 Lecture Hours.
Concepts of legal, ethical, economic and regulatory dimensions of public health policy; the roles, influences and responsibilities of the different agencies and branches of government; advocacy for the public’s health at all levels of society.
Prerequisites: Public health major; junior or senior classification; or approval of instructor.

PHLT 413 Public Health Informatics
Credits 3. 3 Lecture Hours.
Broad range of knowledge and skills encompassed by PHI; bridging public health data/information needs, information technology and stakeholders; creating user requirements to guide system design; evidence-based public health; electronic health records.
Prerequisite: PHLT 302 or approval of instructor.

PHLT 414 Applications of Epidemiology in Public Health
Credits 3. 3 Lecture Hours.
Application of the concept of distribution, determinants and measurement of health and disease outcomes in populations in real life situations through lectures, case studies and presentations.
Prerequisites: Public health major; PHLT 305; or approval of instructor.

PHLT 415 Emergency Management in Public Health
Credits 3. 3 Lecture Hours.
Principles and practices of emergency management at the local, state, national and international levels; explores stages of emergency management such as preparedness, response and recovery; includes population health and the basic processes, approaches and interventions; emergency management systems in the United States; actors in emergency management.
Prerequisites: Public health major; junior or senior classification; or approval of instructor.

PHLT 416 Public Health Leadership and Ethics
Credits 3. 3 Lecture Hours.
Overview of major leadership and ethical theories, current leadership and ethical issues and their impact on public health practice.
Prerequisite: Public health major; junior or senior classification; or approval of instructor.

PHLT 432 Human Factors and Ergonomic Health and Safety
Credits 3. 3 Lecture Hours.
Principles of ergonomics including principles of anatomy, physiology, instrument design, and work environments; emphasis on ergonomic design, implementing ergonomic programs.
Prerequisites: Public health major; junior or senior classification; or approval of instructor.

PHLT 433 Industrial Inspections and Audit Techniques
Credits 3. 3 Lecture Hours.
Principles of conducting industrial audits for fire, safety and security; emphasis on the role of the health and safety professional, assessing safety programs and meeting regulatory requirements.
Prerequisites: Public health major; junior or senior classification; or approval of instructor.
PHLT 434 Project Cost Benefit and Economics
Credits 3.3 Lecture Hours.
Estimation and management of project costs; emphasis on improving accuracy of cost projection, making better modifications to cost on work in-progress.
Prerequisites: Public health major; junior or senior classification; or approval of instructor.

PHLT 441 Strategies for Population Health Improvement
Credits 3.3 Lecture Hours.
The three core functions of public health and strategies for improving population health; case studies exploring multiple types of interventions; involves class discussion, break-out groups and group assignments.
Prerequisite: PHLT 302; PHLT 411 or concurrent enrollment; public health major; junior or senior classification; or approval of instructor.

PHLT 445 Applications of Public Health
Credits 3.3 Lecture Hours.
Combines knowledge and skills related to public health experience and coursework to address public health issues; process of developing, implementing and evaluating public health interventions; role assignment and responsibilities in group assignments and presentations.
Prerequisite: PHLT 441 or concurrent enrollment; public health major; junior or senior classification; or approval of instructor.

PHLT 484 Public Health Studies Field Experience
Credits 3.3 Other Hours.
On the job training in the area of public health studies industry; development of objectives and goals; evaluation by supervisor required.
Prerequisites: Approval of instructor; junior or senior classification; public health major with a minimum overall 3.0 TAMU GPA.

PHLT 485 Directed Studies
Credits 1 to 4.1 to 4 Other Hours.
Directed study of selected problems in the area of public health studies. May be taken four times for credit.
Prerequisite: Approval of instructor.

PHLT 489 Special Topics In...
Credits 1 to 4.1 to 4 Lecture Hours. 0 to 4 Lab Hours.
Selected topics in an identified area of public health. May be repeated for credit.
Prerequisites: PHLT major; junior or senior classification or approval of instructor.

PHLT 491 Research
Credits 0 to 4.0 to 4 Other Hours.
Research conducted under the direction of faculty member in public health studies. May be taken two times for credit.
Prerequisite: PHLT 485. Restrictions: Junior or senior classification and approval of instructor; 3.0 TAMU GPA.

PHYS - Physics (PHYS)

PHYS 101 Freshman Physics Orientation
Credit 1.1 Lecture Hour.
Critical thinking skills and problem solving in physics; time management and teaming skills. For physics majors. Registration by non-majors requires approval of instructor.
Prerequisite: PHYS 218 or registration therein; MATH 171 or registration therein; or approval of instructor.

PHYS 102 Freshman Physics Orientation II
Credit 1.1 Lecture Hour.
Critical thinking skills and problem solving in physics; time management and teaming skills. For physics majors. Registration by non-majors requires approval of instructor.
Prerequisites: PHYS 101, PHYS 208 or registration therein; MATH 172 or registration therein; or approval of instructor.

PHYS 109/ASTR 109 Big Bang and Black Holes
Credits 3.3 Lecture Hours.
Designed to give an intuitive understanding of the Big Bang and Black Holes, without mathematics, and de-mystify them for the non-scientist.

PHYS 201 College Physics
Credits 4.3 Lecture Hours. 3 Lab Hours.

PHYS 202 College Physics
Credits 4.3 Lecture Hours. 3 Lab Hours.
(PHYS 1302 and 1102, 1402*) College Physics. Continuation of PHYS 201. Fundamentals of classical electricity and light; introduction to contemporary physics.
Prerequisite: PHYS 201.

PHYS 205 Concepts of Physics
Credits 4.3 Lecture Hours. 3 Lab Hours.
General survey physics course for K-8 preservice teachers integrating physics content and laboratory activities relevant to physics-related subject matter included in the current Texas and national standards for elementary school science; includes aspects of mechanics, waves, electricity, magnetism and modern physics.
Prerequisite: Major in interdisciplinary studies or inter disciplinary technology or approval of instructor.

PHYS 208 Electricity and Optics
Credits 4.3 Lecture Hours. 3 Lab Hours.
Continuation of PHYS 218. Electricity, magnetism, and introduction to optics. Primarily for students in science and engineering.
Prerequisites: PHYS 218; MATH 152 or MATH 172 or registration therein.

PHYS 218 Mechanics
Credits 4.3 Lecture Hours. 3 Lab Hours.
(PHYS 2325 and 2125, 2425*) Mechanics. Mechanics for students in science and engineering.
Prerequisite: MATH 151 or MATH 171 or registration therein.

PHYS 221 Optics and Thermal Physics
Credits 3.3 Lecture Hours.
Wave motion and sound, geometrical and physical optics, kinetic theory of gases, laws of thermodynamics.
Prerequisites: PHYS 208; MATH 152 or MATH 172; registration in MATH 221, MATH 308.
PHYS 222 Modern Physics for Engineers  
Credits 3. 3 Lecture Hours.  
Atomic, quantum, relativity and solid state physics.  
Prerequisites: PHYS 208 or PHYS 219; MATH 308 or registration therein.

PHYS 225 Electronic Circuits and Applications  
Credits 4. 3 Lecture Hours.  3 Lab Hours.  
Linear circuit theory and applications of solidstate diodes, bipolar and field-effect transistors, operational amplifiers and digital systems.  
Prerequisites: PHYS 208; MATH 308.

PHYS 285 Directed Studies  
Credits 1 to 4. 1 to 4 Other Hours.  
Special work in laboratory or theory to meet individual requirements in cases not covered by regular curriculum; intended for use as lower-level credit.  
Prerequisite: Approval of department head.

PHYS 289 Special Topics in...  
Credits 1 to 4. 1 to 4 Lecture Hours.  0 to 4 Lab Hours.  
Selected topics in an identified area of physics. May be repeated for credit.  
Prerequisite: Approval of instructor.

PHYS 291 Research  
Credits 0 to 4. 0 to 4 Other Hours.  
Research conducted under the direction of faculty member in physics. May be repeated 2 times for credit.  
Prerequisites: Freshman or sophomore classification and approval of instructor.

PHYS 302 Advanced Mechanics I  
Credits 3. 3 Lecture Hours.  
Classical mechanics of particles and rigid bodies, both by direct application of Newton's equations and by Lagrangian methods; applications to gravity and other central forces, coupled oscillators, non-inertial reference frames, and the statics and dynamics of fluids with and without viscosity; introduction to statics of structures.  
Prerequisites: MATH 221 or MATH 251 or MATH 253; MATH 308; PHYS 208, PHYS 218, PHYS 222, and PHYS 331; concurrent enrollment in PHYS 332; for students with other backgrounds, approval of instructor.

PHYS 303 Advanced Mechanics II  
Credits 3. 3 Lecture Hours.  
Classical mechanics of particles and rigid bodies with an emphasis on Lagrangian and Hamiltonian methods; applications to chaos, scattering, coupled oscillations, and continua, including sound in fluids; mechanical implications of special relativity; introduction to drag and turbulence in fluids; introduction to elasticity in solids; Euler buckling instability.  
Prerequisites: PHYS 302 and PHYS 332.

PHYS 304 Advanced Electricity and Magnetism I  
Credits 3. 3 Lecture Hours.  
Electrostatics; dielectrics; electrical current and circuits; magnetic fields and materials; induction; Maxwell's equations.  
Prerequisites: PHYS 221; PHYS 331; concurrent enrollment in PHYS 332; junior or senior classification.

PHYS 305 Advanced Electricity and Magnetism II  
Credits 3. 3 Lecture Hours.  
Radiation and optics. Electromagnetic waves; radiation; reflection and refraction; interference; diffraction; special relativity applied to electrodynamics.  
Prerequisite: PHYS 304.

PHYS 309 Modern Physics  
Credits 3. 3 Lecture Hours.  
Special relativity; concepts of waves and particles; introductory quantum mechanics.  
Prerequisites: PHYS 221; MATH 221; MATH 308.

PHYS 327 Experimental Physics I  
Credits 2. 1 Lecture Hour.  2 Lab Hours.  
Laboratory experiments in modern physics and physical optics with an introduction to current, state-of-the-art recording techniques.  
Prerequisites: PHYS 225; PHYS 309.

PHYS 328 Experimental Physics II  
Credit 1. 1 Lecture Hour.  1 Lab Hour.  
Laboratory experiments in modern physics and physical optics with an introduction to current, state-of-the-art recording techniques.  
Prerequisites: PHYS 225, PHYS 309, PHYS 327.

PHYS 331 Theoretical Methods for Physicists I  
Credits 3. 3 Lecture Hours.  
Applications involving vectors; vector and additional methods for advanced electricity and magnetism; relationship and solutions of classical wave equation, heat equation, and Schrodinger equation; harmonic motion on finite or periodic lattice and in continuum; tensor and matrix notation in classical mechanics and electricity and magnetism.  
Prerequisites: MATH 221 or MATH 251 or MATH 253; MATH 308; PHYS 208 or PHYS 219, PHYS 218, and PHYS 221; restricted to physics majors.

PHYS 332 Theoretical Methods for Physicists II  
Credits 3. 3 Lecture Hours.  
Methods to solve the important equations of theoretical physics, emphasizing the effects of boundary conditions and quantization on their solutions and restricted to the essential physical symmetries associated with free space, spheres, cylinders, and rectangles; if time permits, introduction to symmetries in physics and to asymptotic methods.  
Prerequisites: PHYS 222 or PHYS 309; PHYS 331; restricted to physics majors.

PHYS 401 Computational Physics  
Credits 3. 2 Lecture Hours.  2 Lab Hours.  
Introduction to computational and simulational techniques widely used in physics applications and research, including trajectory integration, wave motion analysis, molecular dynamics, Monte Carlo methods, statistical mechanics of spin systems, phase transitions, quantum evolution, bound state problems, and variational methods.  
Prerequisites: PHYS 302; PHYS 309; PHYS 331; PHYS 332; knowledge of a high level language such as FORTRAN or C (This prerequisite can be obtained by taking CSCE 206 or the equivalent.); junior or senior classification.

PHYS 408 Thermodynamics and Statistical Mechanics  
Credits 4. 4 Lecture Hours.  
Statistical method, macroscopic thermodynamics, kinetic theory, black body radiation, Maxwell-Boltzmann, Bose-Einstein, and Fermi-Dirac statistics.  
Prerequisites: PHYS 331; PHYS 412; junior or senior classification.

PHYS 412 Quantum Mechanics I  
Credits 3. 3 Lecture Hours.  
Postulates of wave mechanics; wave packets; harmonic oscillator; central field problem; hydrogen atom; approximation methods.  
Prerequisites: PHYS 302; PHYS 309; PHYS 332; junior or senior classification.
PHYS 414 Quantum Mechanics II
Credits 3. 3 Lecture Hours.
Continuation of PHYS 412. Electron spin; addition of angular momenta; atomic structure; time dependent perturbations; collision theory; application of quantum mechanics to atomic, solid state, nuclear or high energy physics.
Prerequisite: PHYS 412.

PHYS 416 Physics of the Solid State
Credits 3. 3 Lecture Hours.
A survey of solid state physics; an introduction to crystal structures and the physics of electrons, lattice vibrations and photons; applications to semiconductors; magnetism; superconductivity; physics of nanostructures; brief introduction to selected current topics in condensed matter physics.
Prerequisites: PHYS 304 and PHYS 412.

PHYS 420 Concepts, Connections, and Communication
Credit 1. 1 Lecture Hour.
Stars and atoms; new physics; post-Newtonian universe.
Prerequisite: Junior or senior classification.

PHYS 425 Physics Laboratory
Credits 2. 6 Lab Hours.
Experiments in nuclear, atomic, and molecular physics using modern instrumentation and equipment of current research.
Prerequisite: PHYS 327 or equivalent.

PHYS 426 Physics Laboratory
Credits 2. 6 Lab Hours.
Experiments in solid state and nuclear physics. Modern instrumentation and current research equipment are employed.
Prerequisite: PHYS 327 or equivalent.

PHYS 444 Art of Communication in Physics I: Communicating Science to Scientists
Credits 2. 2 Lecture Hours.
Communication in physics, communicating physics to scientists, scientific presentations; scientific writing; information retrieval; reading technical publications.
Prerequisite: Knowledge of oral and written English; junior or senior classification.

PHYS 445 Art of Communication in Physics II: Communicating Science to Non-Scientists
Credit 1. 1 Lecture Hour.
Communication in physics, communicating physics to scientists, scientific presentations; scientific writing; job and graduate school application; job interview.
Prerequisites: PHYS 444; knowledge of oral and written English; junior or senior classification.

PHYS 485 Directed Studies
Credits 1 to 12. 1 to 12 Other Hours.
Credit 1 or more. Special work in laboratory or theory to meet individual requirements in cases not covered by regular curriculum.
Prerequisite: Approval of department head.

PHYS 489 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours. 0 to 4 Lab Hours.
Selected topics in an identified field of physics. May be repeated for credit.
Prerequisite: Approval of instructor.

PHYS 491 Research
Credits 0 to 4. 0 to 4 Other Hours.
Research conducted under the direction of faculty member in physics. May be repeated for credit. Registration in multiple sections of this course is possible within a given semester provided that the per semester credit hour limit is not exceeded.
Prerequisites: Junior or senior classification and approval of instructor.

PLPA - Plant Pathology (PLPA)

PLPA 291 Research
Credits 1 to 4. 1 to 4 Other Hours.
Research conducted under the direction of faculty member in plant pathology. May be repeated 3 times for credit.
Prerequisites: Freshman or sophomore classification and approval of instructor.

PLPA 301 Plant Pathology
Credits 3. 3 Lecture Hours.
Introduction to fundamental principles of plant pathology; diagnosis, cause and control of plant diseases.
Prerequisites: BIOL 113 or BIOL 101; concurrent registration in PLPA 303.

PLPA 303 Plant Pathology Laboratory
Credit 1. 2 Lab Hours.
Isolation, identification of plant pathogens and clinical diagnosis and control of plant diseases.
Prerequisite: PLPA 301 or registration therein.*

PLPA 334 Turfgrass Pathology
Credits 3. 3 Lecture Hours. 0 Lab Hours.
Recognizing turfgrass problems and understanding biological mechanisms in the disease process; principles of disease management strategies.
Prerequisite: Junior or senior classification.

PLPA 485 Directed Studies
Credits 1 to 4. 1 to 4 Other Hours.
Credit 1 to 4 each semester. Special problems for advanced undergraduates to permit study of subject matter not available in existing courses.
Prerequisites: PLPA 301 and prior approval of instructor or department head.

PLPA 489 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Selected topics in an identified area of plant pathology. May be repeated for credit.
Prerequisite: PLPA 301 or approval of plant pathology.

PLPA 491 Research
Credits 1 to 4. 1 to 4 Other Hours.
Research conducted under the direction of faculty member in plant pathology. May be repeated 3 times for credit. Registration in multiple sections of this course are possible within a given semester provided that the per semester credit hour limit is not exceeded.
Prerequisites: Junior or senior classification and approval of instructor.

POLS - Political Science (POLS)

POLS 200 Foundations of Political Science
Credits 3. 3 Lecture Hours.
Survey of the scholarly discipline of political science and its theoretical foundations, principal subfields, major research questions and modes of scholarship.
POLS 203 Introduction to Political Theory
Credits 3.3 Lecture Hours.
Introduction to the study of political theory, with attention to major themes in the history of political thought; discussion of the nature of politics; examination of method in political theory and its relation to the discipline of political science.

POLS 206 American National Government
Credits 3.3 Lecture Hours.

POLS 207 State and Local Government
Credits 3.3 Lecture Hours.
(GOV 2306) State and Local Government. Survey of state and local government and politics with special reference to the constitution and politics of Texas.

POLS 209 Introduction to Political Science Research
Credits 3.3 Lecture Hours.
Introduction to the philosophy and practice of social science and to modes of research in major subfields of political science.
Prerequisite: Political science majors must have completed POLS 209 before they enroll in their last 18 hours of 300- and 400-level POLS courses. This means a student may take no more than 6 hours of upper division (300- and 400-level courses) before completing POLS 209. Enrollment is restricted to political science majors.

POLS 229 Introduction to Comparative Politics
Credits 3.3 Lecture Hours.
A comparison of political institutions, processes and issues across a wide variety of political systems.

POLS 231 Introduction to World Politics
Credits 3.3 Lecture Hours.
Analysis of contemporary world from point of view of nation-state; political problems, factors involved in foreign policies and relations of nations.

POLS 233 Politics and Policy in the United States
Credits 3.3 Lecture Hours.
Survey of institutions of American government, mass political behavior, and policy fields of significant contemporary importance.

POLS 285 Directed Studies
Credits 0 to 3.0 to 3 Other Hours.
Credit 0 to 3 each semester. Individual instruction in selected aspects of political science not adequately covered by other courses.
Prerequisite: Approval of department head.

POLS 289 Special Topics in...
Credits 3.3 Other Hours.
Selected topics in an identified area of political science and public policy. May be taken for credit seven times.
Prerequisite: POLS 206 or approval of department head.

POLS 291 Research
Credits 0 to 6.0 to 6 Other Hours.
Research conducted under the direction of a faculty member in political science. May be taken three times for credit.
Prerequisites: Freshman or sophomore classification and approval of instructor.

POLS 302 The Mass Media and Politics
Credits 3.3 Lecture Hours.
Examination of mass media impact on politics and political behavior, and governmental impact on the mass media.
Prerequisite: POLS 206 or approval of department head.

POLS 304 Latino Politics in the United States
Credits 3.3 Lecture Hours.
Survey of historical and contemporary issues in Latino politics in the U.S.; race and ethnicity in the context of U.S. politics; comparisons of racial and ethnic group experiences in the U.S. with those experienced by racial and ethnic groups elsewhere; Latino access to the political system through political participation.
Prerequisite: Junior or senior classification.

POLS 306 Contemporary Political Problems and Issues
Credits 3.3 Lecture Hours.
Major contemporary political problems and issues with primary emphasis on the U.S. Each term one to three problems or issues will be examined in some depth. Students may register in up to but no more than two different sections of this course. May be repeated for credit.
Prerequisite: POLS 206 or approval of department head. NOTE: POLS 306 courses taken in a study abroad program may not count toward this limit; please consult with the undergraduate advisor.

POLS 307 The Texas Legislature
Credits 3.3 Lecture Hours.
Examination of contemporary political problems and issues in the Texas Legislature.
Prerequisites: POLS 206 and POLS 207; junior or senior classification.

POLS 308 Game Theoretic Methods in Political Science
Credits 3.3 Lecture Hours.
Core concepts of game theory to study strategic interaction in politics; game theory using simple mathematical models to describe social situations, understand political and social phenomena; emphasis on model building skills and problem solving.
Prerequisites: POLS 206 and junior or senior classification or approval of department head.

POLS 309 Polimetrics
Credits 3.3 Lecture Hours.
Theory, techniques, and application of quantitative analysis in political science; focus on quantitative techniques commonly used to evaluate empirical theories of politics.
Prerequisites: POLS 209 or equivalent and 9 additional hours of political science or approval of instructor.

POLS 312 Ethnic Conflict
Credits 3.3 Lecture Hours.
Examination of government institutions designed to structure ethnic relations; source of ethnic conflict; mechanisms to facilitate the peaceful resolution of ethnic conflict.
Prerequisite: Junior or senior classification.

POLS 313 Public Opinion
Credits 3.3 Lecture Hours.
Role of public opinion in a democratic political system--its formation, properties and patterns, with special attention to problems of linking public opinion to public policy.
Prerequisite: POLS 206 or approval of department head.

POLS 314 Interest Groups
Credits 3.3 Lecture Hours.
Role of interest groups in politics; types of groups and resources; internal dynamics; group strategies/tactics (including PACs); forms of indirect and direct lobbying; influence of groups in political arena.
Prerequisite: POLS 206 or approval of department head.
POLS 315 Political Parties
Credits 3.3 Lecture Hours.
Organization, history, and activities of political parties and functions they serve in national, state and local politics in the United States and elsewhere.
Prerequisite: POLS 206 or approval of department head.

POLS 316 Urban Politics
Credits 3.3 Lecture Hours.
Politics at the community level; urban and metropolitan political systems.
Prerequisites: POLS 206 and POLS 207 or approval of department head.

POLS 317/WGST 317 Women in Politics
Credits 3.3 Lecture Hours.
Role of women in the political system; treatment of women in political theory; effect of law on women’s status; women as political leaders; current policy issues of concern to women.
Prerequisite: POLS 206.
Cross Listing: WGST 317/POLS 317.

POLS 318 Theories of International Relations
Credits 3.3 Lecture Hours.
Examination of major paradigms of international relations; focus on theory development and application to cases.
Prerequisites: POLS 206, POLS 209, and junior or senior classification or approval of department head.

POLS 319 The American Presidency
Credits 3.3 Lecture Hours.
The American Presidency and the primary relationships and responsibilities of the office, dealing with the public, decision making, influencing Congress, and implementing policy.
Prerequisite: POLS 206 or approval of department head.

POLS 320 Race and Politics in the United States
Credits 3.3 Lecture Hours.
The politics of race in the United States: contrast of the political experiences of racial groups with the ideals and realities of democratic political systems.
Prerequisites: POLS 206 and POLS 207 and junior or senior classification.

POLS 321 Western European Government and Politics
Credits 3.3 Lecture Hours.
Political institutions and ideas of major European countries. Prospects for political integration.
Prerequisite: POLS 206 or approval of department head.

POLS 322 African Politics
Credits 3.3 Lecture Hours.
Survey of African politics from pre-colonial period to contemporary era; examination of local experience of democracy, governance, economic development in light of varied colonial experiences, independence movements, international political economy, informal sources of political power.
Prerequisites: POLS 206 and POLS 207; junior or senior classification.

POLS 323 Political Systems of Latin America
Credits 3.3 Lecture Hours.
Survey of the major features of the political process in Latin America; key political groups and sources and characteristics of their political power; studies of selected countries.
Prerequisite: POLS 206 or approval of department head.

POLS 324 Politics of Global Inequality
Credits 3.3 Lecture Hours.
Examination of the causes and consequences of economic inequality between rich and poor states; evaluation of competing explanations for poverty of less-developed countries; development strategies employed by poor states; and structure of global economic relations.
Prerequisite: Junior or senior classification.

POLS 325 AFRICAN POLITICS
Credits 3.3 Lecture Hours.
Survey of African politics from pre-colonial period to contemporary era; examination of local experience of democracy, governance, economic development in light of varied colonial experiences, independence movements, international political economy, informal sources of political power.
Prerequisites: POLS 206 and POLS 207; junior or senior classification.

POLS 326 Government and Politics of Eastern Europe
Credits 3.3 Lecture Hours.
Political, social and economic transformations in the post-Communist Eastern and Southern European countries; examination of the interrelations between political, economic and social issues that impact the building of new governments and institutions in these countries.
Prerequisites: POLS 206 and POLS 207; junior or senior classification.

POLS 327 Congressional Politics
Credits 3.3 Lecture Hours.
Prerequisite: POLS 206 or approval of department head.

POLS 328 Globalization and Democracy
Credits 3.3 Lecture Hours.
Examination of the political and economic origins of globalization; effects of globalization on advanced industrial democracies; effect on less developed nations; evaluation of the economic, social, cultural and political consequences of globalization.
Prerequisite: Junior or senior classification.

POLS 329 International Cooperation
Credits 3.3 Lecture Hours.
Contemporary issues, problems, and solutions in international cooperation.
Prerequisites: POLS 206; junior or senior classification or approval of department head.

POLS 330 International Conflict
Credits 3.3 Lecture Hours.
Examination of major theoretical explanations of war and conflict resolution.
Prerequisites: POLS 206; junior or senior classification or approval of department head.

POLS 331 Government and Politics of the Former Soviet Union
Credits 3.3 Lecture Hours.
Major political issues of the post-communist transition in the former Soviet Union.
Prerequisite: POLS 206 or approval of department head.

POLS 332 Introduction to Public Administration
Credits 3.3 Lecture Hours.
American public administration; development of public service; the political and constitutional context; organization theory; leadership and decision-making; personnel and resource staff functions; administrative law and regulation; ethics and administrative accountability.
Prerequisite: POLS 206 or approval of department head.

POLS 333 Urban Administration
Credits 3.3 Lecture Hours.
Practices and problems of city government. Organization, administration, and planning and their relation to political processes and structure.
Prerequisites: POLS 206 and 207 or approval of department head.
POLS 342 Politics and Bureaucracy  
Credits 3.3 Lecture Hours.  
Public bureaucracy in the context of a political environment; role of experts, the use of political power and problems of bureaucratic accountability and responsibility.  
**Prerequisite:** POLS 206 or approval of department head.

POLS 347 Politics of Energy and the Environment  
Credits 3.3 Lecture Hours.  
U.S. energy and environmental problems and politics and the political, legal, and institutional factors influencing their development and implementation.  
**Prerequisites:** POLS 206 or approval of department head. Junior or senior classification or approval of instructor.

POLS 349 Early Political Thought  
Credits 3.3 Lecture Hours.  
Political thought from Greek antiquity to Renaissance.  
**Prerequisite:** POLS 206 or approval of department head.

POLS 350 Modern Political Thought  
Credits 3.3 Lecture Hours.  
Political thought from Machiavelli to Marx.  
**Prerequisite:** POLS 206 or approval of department head.

POLS 351 Law and Legislation  
Credits 3.3 Lecture Hours.  
Legal, political and institutional factors that influence the passage of legislation in American legislative bodies.  
**Prerequisites:** POLS 206 and POLS 207; junior or senior classification.

POLS 352 Empirical Democratic Theory  
Credits 3.3 Lecture Hours.  
Examination of empirical political science theory about the nature and consequences of democratic government in the modern era; study of scientific theory that accounts for the rise, characteristics and behavior of democratic political systems.  
**Prerequisites:** POLS 206, POLS 207, and POLS 209; junior or senior classification.

POLS 353 Constitutional Rights and Liberties  
Credits 3.3 Lecture Hours.  
Legal issues, controversies and significant developments in constitutional rights and liberties, and the impact of these developments upon American politics, culture and social institutions.  
**Prerequisite:** POLS 206 or approval of department head.

POLS 355 United States Constitutional Development  
Credits 3.3 Lecture Hours.  
Leading decisions of the Supreme Court. Trends in our constitutional development since 1789; expansion through judicial interpretation of powers delegated to national government.  
**Prerequisites:** POLS 206 and HIST 105 or approval of department head.

POLS 356 Law, Politics and Policy  
Credits 3.3 Lecture Hours.  
An introduction to the American legal system, its development and structure: the role of lawyers, law enforcement agencies, and interest groups in its operation; the dynamics of civil litigation and criminal processes of courts; the impact of legal policies on society, politics and the economy.  
**Prerequisite:** POLS 206 or approval of department head.

POLS 357 National Judicial Politics  
Credits 3.3 Lecture Hours.  
Political factors that influence judicial selection; decision making and policy-making roles and impact of the U.S. Supreme Court and Federal Court System.  
**Prerequisites:** POLS 206, POLS 209, and junior or senior classification or approval of department head.

POLS 358 Comparative Judicial Politics  
Credits 3.3 Lecture Hours.  
Survey of the major features of court systems of the world; examination of the role played by courts in the politics of selected nations of the world; comparison of judicial decision making in selected counties; the impact of courts in developing democracies.  
**Prerequisites:** POLS 206 and 207; junior or senior classification.

POLS 359 American Political Thought  
Credits 3.3 Lecture Hours.  
American political thought from colonial times to the present.  
**Prerequisite:** POLS 206 or approval of department head.

POLS 360 American State Politics  
Credits 3.3 Lecture Hours.  
American state governments; comparative state policies and politics.  
**Prerequisite:** POLS 207 or approval of department head.

POLS 361 Politics of Energy and the Environment  
Credits 3.3 Lecture Hours.  
U.S. energy and environmental problems and politics and the political, legal, and institutional factors influencing their development and implementation.  
**Prerequisites:** POLS 206 or approval of department head. Junior or senior classification or approval of instructor.

POLS 362 Latin American Political Thought  
Credits 3.3 Lecture Hours.  
Survey of various traditions in the history of Latin American political thought; key texts in the history of political theory in the Spanish-American continent.  
**Prerequisites:** POLS 206; junior or senior classification or approval of instructor.

POLS 363 Global Political Thought  
Credits 3.3 Lecture Hours.  
Global perspective on the history of political ideas and contemporary political philosophy; confrontation and conversion of East Asia and Middle Eastern concepts of political problems and Western perspectives; impact of culture on the shaping of political ideas.  
**Prerequisite:** Junior or senior classification.

POLS 365/ASIA 365 Asian Governments and Politics  
Credits 3.3 Lecture Hours.  
Contemporary political systems of Asia, political institutions, actors and processes.  
**Prerequisite:** POLS 206 or approval of department head.  
**Cross Listing:** ASIA 365/POLS 365.

POLS 366 Political Conflicts of the Middle East  
Credits 3.3 Lecture Hours.  
This course seeks to provide students with an understanding of the internal, regional and international politics of the Middle East; with a focus on selected political conflicts and the influence of the region’s cultures, religions and natural resources, as well as outside political forces.  
**Prerequisites:** POLS 206. Junior or senior classification or approval of instructor.
POLS 367/WGST 367 Women in Government in Comparative Perspective
Credits 3.3 Lecture Hours.
Examination of women's representation in government based on comparison across multiple nation-states; focus on legislative and executive branches of democratic governments.
Prerequisites: POLS 206; junior or senior classification or approval of department head.
Cross Listing: WGST 367/POLS 367.

POLS 368 Latin American Legislatures
Credits 3.3 Lecture Hours.
Survey of the major features of the legislative branch in Latin America; examination of the role played by legislatures in the politics of selected countries; studies of executive-legislative relations in selected countries; participation by traditionally excluded groups in legislatures.
Prerequisites: POLS 206, junior or senior classification or approval of department head.

POLS 369 Theories of Democracy
Credits 3.3 Lecture Hours.
Definitions and justifications of democratic political systems; criticisms of democratic legitimacy, difficulties encountered by actual democratic regimes; methodological problems of assessing the fulfillment of democratic goals.
Prerequisite: POLS 206 or approval of instructor.

POLS 375 Campaigns and Elections
Credits 3.3 Lecture Hours.
Theories of voter choice; effects of mass media and campaign finance regulations on the conduct and outcome of elections; effects of elections on policy; emphasis on U.S. national elections.
Prerequisite: POLS 206 or approval of department head.

POLS 412 International Political Economy
Credits 3.3 Lecture Hours.
Politics of international economic relations; interactions between political and economic realms in the contemporary world.
Prerequisites: POLS 206; junior or senior classification or approval of department head.

POLS 413 American Foreign Policy
Credits 3.3 Lecture Hours.
Evolution of U.S. foreign policies since World War II. Policy process; role of executive, legislative, bureaucratic and private institutions; current foreign policy issues and problems.
Prerequisite: POLS 206 or approval of department head.

POLS 415 Contemporary Issues in American Foreign Policy
Credits 3.3 Lecture Hours.
Detailed analysis of a selected aspect of American foreign policy.
Prerequisite: POLS 206 or approval of department head.

POLS 423 U.S.-Latin American Relations
Credits 3.3 Lecture Hours.
Political, economic and social relations between the United States and Latin American nations from independence to the present.
Prerequisites: POLS 206, POLS 207, POLS 323; junior or senior classification.

POLS 424 Comparative Governmental Institutions
Credits 3.3 Lecture Hours.
Study of the politics and structure of governmental institutions in a comparative venue; examination of the building blocks by which patterns of governments and institutions can be identified across various political systems of the world; role of institutions across different types of political systems and how they are affected by global economic factors.
Prerequisites: POLS 322, POLS 323, POLS 326, or POLS 365/ASIA 365; junior or senior classification.

POLS 429 Issues in World Politics
Credits 3.3 Lecture Hours.
Selected issues of importance in contemporary world politics. May be repeated for credit.
Prerequisite: POLS 206 or approval of department head.

POLS 432 The Politics of European Union
Credits 3.3 Lecture Hours.
Examination of the institutional, economic and political forces that led to the development of the European Economic Union; impact of the European Union on world affairs.
Prerequisites: POLS 206 and POLS 207; junior or senior classification.

POLS 435 Voting Behavior
Credits 3.3 Lecture Hours.
Voting decisions, electoral behavior and consequences for the political system.
Prerequisite: POLS 206 or approval of department head.

POLS 439 Foreign Policy Decision Making
Credits 3.3 Lecture Hours.
Examination of decision processes in contemporary world politics; individual, group and organizational aspects of decision making in the context of world events.
Prerequisites: POLS 206, POLS 209, and junior or senior classification or approval of department head.

POLS 440 Public Policies and Policymaking
Credits 3.3 Lecture Hours.
Socio-economic, political, and institutional factors as they affect the development, implementation and impact of public policies. Strategies of choice by political regimes in the formation of public policies.
Prerequisite: POLS 206 or approval of department head.

POLS 441 State and Local Financial Administration
Credits 3.3 Lecture Hours.
Financial management practices in state and local governments including the impact of management practices and political factors on revenues, expenditures, budgeting and debt financing.
Prerequisite: POLS 207.

POLS 442 Social Welfare Policy
Credits 3.3 Lecture Hours.
Political and social issues involved in social welfare and income security policies; problems of poverty and public welfare in the United States.
Prerequisite: POLS 206 or approval of department head.

POLS 447 National Security Policy
Credits 3.3 Lecture Hours.
Need for national security policy, the factors involved in determining defense policy and the resulting problems; special attention to the United States.
Prerequisite: POLS 206 or approval of department head.
POLS 454 Contemporary Political Ideas
Credits 3. 3 Lecture Hours.
Contemporary political ideas such as liberalism, socialism, communism and fascism; role of ideology in political change.
Prerequisite: POLS 206 or approval of department head.

POLS 455 Traditions of Political Theory
Credits 3. 3 Lecture Hours.
Survey of particular schools or historical periods of normative political theory. May be taken three times.
Prerequisites: POLS 206 and POLS 207; junior or senior classification.

POLS 456 Environmental Political Theory
Credits 3. 3 Lecture Hours.
Examination of classical and contemporary theories of politics and the environment, overview of main lines of thought on how human beings should interact with and manage the physical environment, with attention to the particular problems raised by these theories for political theory.
Prerequisites: POLS 206; junior or senior classification.

POLS 461 Jurisprudence
Credits 3. 3 Lecture Hours.
History of legal philosophy from the ancient Greeks to the present; exploration of recurring themes such as natural law, legal positivism, legal realism, sociological jurisprudence and Marxist jurisprudence; exposure to various issues, such as liberty, privacy, obedience, responsibility and punishment.
Prerequisite: POLS 206 or approval of department head.

POLS 462/WGST 462 Women and the Law
Credits 3. 3 Lecture Hours.
The legal status of American women from the adoption of the Constitution to the present: constitutional developments; the 19th Amendment and the proposed Equal Rights Amendment; employment; family law; reproductive rights; education; sexual equality in context of other claims to equality; law and social norms.
Prerequisite: POLS 206 or approval of department head.
Cross Listing: WGST 462/POLS 462.

POLS 475 Government and the Economy
Credits 3. 3 Lecture Hours.
Constitutional and legal framework of governmental involvement in economy; governmental budget in management of business cycle; regulation of business activities; governmental economic planning in democratic societies.
Prerequisite: POLS 206 or approval of department head.

POLS 481 Research Seminar
Credits 3. 3 Other Hours.
In-depth study of topics associated with particular sub-field of political science; experience designing and implementing major, original research project.
Prerequisites: POLS 206, POLS 207, POLS 209, 12 credits in POLS at or above 300 level; junior or senior political science major or approval of instructor.

POLS 484 Internship
Credits 0 to 6. 0 to 6 Other Hours.
Directed internship in a public organization to provide students with on-the-job training and applied research experience with professionals in settings appropriate to the student's degree plan and career objectives. May be taken four times for credit.
Prerequisite: Approval of department head. Must be taken on a satisfactory/unsatisfactory basis.

POLS 485 Directed Studies
Credits 0 to 6. 0 to 6 Other Hours.
Credit 0 to 6 each semester. Individual instruction in selected aspects of political science not adequately covered by other courses.
Prerequisite: Approval of department head.

POLS 489 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Selected topics in an identified area of political science and public policy. May be repeated for credit.
Prerequisite: POLS 206 or approval of department head.

POLS 491 Research
Credits 0 to 6. 0 to 6 Other Hours.
Research conducted under the direction of a faculty member in political science. May be taken three times for credit.
Prerequisites: Junior or senior classification and approval of instructor.

POLS 497 Independent Honors Studies
Credits 0 to 4. 1 to 4 Other Hours.
Directed independent studies for upper division Honors students, regardless of academic major, in selected aspects of political science.
Prerequisites: Junior or senior classification either as Honors student or with overall GPR of 3.25; letter of approval from head of student's major department.

PORT - Portuguese (PORT)

PORT 101 Beginning Portuguese I
Credits 4. 4 Lecture Hours. 1 Lab Hour.
(PORT 1411, 1511) Beginning Portuguese I. Elementary language study with aural, oral, written, and reading practice; preparation for conversation; part of class preparation done in language laboratory. Students with prior knowledge of or instruction in Portuguese are required to take a placement test before enrolling for the first time in a college Portuguese course.

PORT 102 Beginning Portuguese II
Credits 4. 4 Lecture Hours. 1 Lab Hour.
(PORT 1412, 1512) Beginning Portuguese II. Continuation of PORT 101; part of class preparation done in language laboratory. Students with prior knowledge of or instruction in Portuguese are required to take a placement test before enrolling for the first time in a college Portuguese course.
Prerequisite: PORT 101 with a grade of C or better.

PORT 201 Intermediate Portuguese I
Credits 3. 3 Lecture Hours.
(PORT 2311) Intermediate Portuguese I. Readings of average difficulty; review of grammar, practice in conversation and composition. Students with prior knowledge of or instruction in Portuguese are required to take a placement test before enrolling for the first time in a college Portuguese course.
Prerequisite: PORT 102 with a grade of C or better.

PORT 202 Intermediate Portuguese II
Credits 3. 3 Lecture Hours.
(PORT 2312) Intermediate Portuguese II. Continuation of PORT 201 with more advanced material. Students with prior knowledge of or instruction in Portuguese are required to take a placement test before enrolling for the first time in a college Portuguese course.
Prerequisite: PORT 201 with a grade of C or better.
POSC - Poultry Science (POSC)

POSC 201 General Avian Science
Credits 3. 3 Lecture Hours.
(AGRI 1327) General Avian Science. Introduction to the poultry industry to include past, present and future industry dynamics; avian anatomy/physiology as they impact commercial production; management principles and practices of breeding, incubation, brooding, nutrition, disease control and marketing technology.

POSC 285 Directed Studies
Credits 1 to 4. 1 to 4 Other Hours.
Directed studies in specific problem areas of poultry science.
Prerequisite: Approval of instructor.

POSC 289 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Selected topics in an identified area of poultry science. May be repeated for credit.
Prerequisite: Approval of instructor.

POSC 302 Avian Science Laboratory
Credit 1. 2 Lab Hours.
Field trips and application of basic skills in production of poultry meat and eggs. Recommended supplement to POSC 201.
Prerequisite: Junior or senior classification or approval of instructor.*

POSC 304 Judging
Credits 3. 6 Other Hours.
Intensive, individualized training in selection standards for meat and egg strains of poultry, grading standards for egg and live and ready-to-cook poultry, and organizing and managing poultry shows. Practice requires visits to processing plants.
Prerequisite: Junior or senior classification or approval of instructor.*

POSC 308 Avian Anatomy and Physiology
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Anatomy and physiology of the major body systems of the bird, including the cardiovascular, gastrointestinal, respiratory, endocrine and reproductive systems; influence of the environment on bird physiology, including effects of stress. Laboratory exercises include dissection and microscopic analysis of the major body system and assessment of environmental conditions.
Prerequisites: BIOL 111; POSC 201; junior or senior classification or approval of instructor.

POSC 309 Poultry Meat Production
Credits 4. 3 Lecture Hours. 2 Lab Hours.
Modern integrated broiler and turkey production; housing and equipment, nutrition, flock health, pest control, grower relations, marketing and financial management; lab involves blood testing, growth trials, posting birds, processing, and observation of a local integrated poultry operation.
Prerequisite: Junior or senior classification or approval of instructor.*

POSC 313 Game Birds and Ornamental Fowl
Credits 3. 3 Lecture Hours.
Commercial game bird production; nutrition, incubation, rearing, breeder care, diseases, marketing, housing requirements and economic considerations; management of rare and ornamental fowl.
Prerequisite: Junior or senior classification or approval of instructor.

POSC 319 Breeder and Hatchery Management
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Housing and equipment, incubation technology, embryology, nutrition and flock health; lab involves hatchery management, blood testing, semen evaluation, artificial insemination, basic embryology and observation of a local hatchery.
Prerequisite: Junior or senior classification or approval of instructor.

POSC 326 Commercial Egg Industry
Credits 3. 3 Lecture Hours.
Production, management, marketing, economics and integration of commercial laying hen operations.
Prerequisite: Junior or senior classification or approval of instructor.

POSC 333 Instincts and Behavior
Credits 3. 3 Lecture Hours.
Investigation of the reasoning behind evolved reproductive strategies with integration of veterinary and avian science perspectives; examination of individual differences in behavior and their development in particular environments.
Prerequisite: Junior or senior classification or approval of instructor.

POSC 381 Investigation of Professional Development in Poultry Science
Credits 2. 2 Other Hours.
An investigation of career options and the research process as applied to poultry science.
Prerequisite: Junior or senior classification or approval of instructor.

POSC 402 Skills in Poultry Evaluation
Credit 1. 2 Lab Hours.
Practical application of judging and husbandry skills used in poultry exhibition and production. Primarily designed for preservice vocational agriculture teachers.
Prerequisite: Junior or senior classification or approval of instructor.

POSC 405/FSTC 405 Egg and Poultry Meat Processing
Credits 3. 3 Lecture Hours.
Principles of egg and poultry meat processing, understanding egg and poultry meat markets, egg and meat grading, product safety, packaging and consumer acceptance of shell eggs and poultry meat; specifically turkey and broilers.
Prerequisite: Junior or senior classification or approval of instructor.
Cross Listing: FSTC 405/POSC 405.

POSC 406/FSTC 406 Poultry Further Processing
Credits 4. 3 Lecture Hours. 2 Lab Hours.
Science and practice of value-added products; physical, chemical, microbiological and functional characteristics of value-added poultry products as they affect consumer acceptance, efficiency of production and regulatory approval.
Prerequisites: CHEM 222; DASC 326/FSTC 326/FSTC 326/DASC 326; POSC 309; POSC 405/FSTC 405; junior or senior classification or approval of instructor.
Cross Listing: FSTC 406/POSC 406.
POSC 411 Poultry Nutrition  
Credits 3. 3 Lecture Hours.  
Prerequisites: CHEM 222 or equivalent; junior or senior classification or approval of instructor.

POSC 412 Poultry Feed Formulation  
Credit 1. 1 Lecture Hour.  
Practical feeding of poultry with emphasis on specific nutrient requirements of various species and computer least cost diet formulations.  
Prerequisites: POSC 411; junior or senior classification or approval of instructor.

POSC 414 Avian Genetics and Breeding  
Credits 3. 2 Lecture Hours. 2 Lab Hours.  
Basic concepts of avian genetics and breeding principles, inheritance of economically important qualitative and quantitative traits; statistical analysis of breeding results; application of molecular genetics, mating systems analyses, breeder management; and incubation of hatching eggs.  
Prerequisite: Junior or senior classification or approval of instructor.

POSC 425 Environmental Physiology  
Credits 3. 3 Lecture Hours.  
Environmental influences on the physiology of animals and humans; review of shelter engineering to promote animal welfare and production during stressful climatic conditions. Chronic and acute stress in a variety of birds and animals.  
Prerequisite: Junior or senior classification or approval of instructor.

POSC 427 Animal Waste Management  
Credits 3. 3 Lecture Hours.  
An applied approach to current and emerging issues relating to responsible management of animal waste; the role of biological aspects of production management decisions evaluated in an examination of regulatory and environmental requirements; current case studies and exposure to field situations. Field trips may be required for which departmental fees may be assessed.  
Prerequisite: Junior or senior classification or approval of instructor.*

POSC 429 Advanced Food Bacteriology  
Credits 4. 3 Lecture Hours. 2 Lab Hours.  
Microbiology of foodborne human pathogens of food animals, raw and processed food, and human disease; methods to control incidence of pre- and post-harvest contamination.  
Prerequisites: DASC 326/FSTC 326 or FSTC 326/DASC 326 or BIOL 351 or VTPB 405; junior or senior classification.

POSC 481 Poultry Science Systems  
Credits 2. 1 Lecture Hour. 2 Lab Hours.  
Individual and team approaches for the collection, interpretation, synthesis and presentation of information on integration of all aspects of the poultry industry to address issues facing it; emphasis on oral and written communication.  
Prerequisite: Senior classification.

POSC 484 Internship  
Credits 1 to 5. 1 to 5 Other Hours.  
A supervised internship in the poultry industry to provide practical experience in a real world setting that is consistent with the student's professional interests.  
Prerequisites: Junior or senior classification and approval of department head.

POSC 485 Directed Studies  
Credits 1 to 4. 1 to 4 Other Hours.  
Prerequisite: Junior or senior classification and approval of instructor.

POSC 489 Special Topics in...  
Credits 1 to 4. 1 to 4 Lecture Hours.  
Selected topics in an identified area of poultry science. May be repeated for credit.  
Prerequisites: Junior or senior classification and approval of instructor.

POSC 491 Research  
Credits 0 to 4. 0 to 4 Other Hours.  
Research conducted under the direction of faculty member in poultry science. May be repeated 3 times for credit. Registration in multiple sections of this course are possible within a given semester provided that the per semester credit hour limit is not exceeded.  
Prerequisites: Junior or senior classification and approval of instructor and department head.

PSYC 107 Introduction to Psychology  
Credits 3. 3 Lecture Hours.  
(PSYC 2301) Introduction to Psychology. Introductory course dealing with elementary principles of human behavior.

PSYC 203 Elementary Statistics for Psychology  
Credits 4. 3 Lecture Hours. 2 Lab Hours.  
(PSYC 2317)Elementary Statistics for Psychology. Practical knowledge of statistics up through analysis of variance. Practice sessions devoted to numerical problems. Will not satisfy mathematics requirement in College of Liberal Arts curricula.  
Prerequisites: PSYC 107; MATH 166 or equivalent; major in psychology.

PSYC 204 Experimental Psychology  
Credits 4. 3 Lecture Hours. 2 Lab Hours.  
Research techniques in psychology with emphasis on the experimental method. Laboratory exercises applied to specific problems in psychology.  
Prerequisites: PSYC 107 and 203; major in psychology.

PSYC 206/AFST 206 Black Psychology  
Credits 3. 3 Lecture Hours.  
Critical examination of psychological experience, theories, and methods from perspectives grounded in the "Black experience."  
Cross Listing: AFST 206/PSYC 206.

PSYC 208/AFST 208 Stereotypes, Prejudice, and Minority Experience  
Credits 3. 3 Lecture Hours.  
Overview of theory and research relating to stereotyping, prejudice, discrimination, and minority experiences from a social psychological perspective.  
Prerequisite: PSYC 107.

PSYC 209/AFST 209 Psychology of Culture and Diversity  
Credits 3. 3 Lecture Hours.  
Introduction to various issues surrounding an increasingly interconnected and globalized world by critically examining the dynamic relationship between psychological processes and diverse (e.g., motivation, memory, self, prejudice) socio-cultural contexts.  
Prerequisite: PSYC 107.

PSYC - Psychology (PSYC)
PSYC 210/WGST 210 Psychological Aspects of Human Sexuality  
Credits 3.3 Lecture Hours.  
Interface between human sexuality, reproductive development, and gender roles across the lifespan; theoretical and research literature promotes understanding of hormonal influences, learning processes, cultural differences, sexual response, and love and attraction.  
Prerequisite: PSYC 107.  
Cross Listing: WGST 210.

PSYC 251 Survey of Industrial/Organizational Psychology  
Credits 3.3 Lecture Hours.  
Literature and research in the basic theories and practices of I/O psychology including selection, testing, job analysis, performance appraisal, training, employee motivation, job satisfaction, leadership, and group processes within organizations. Students may not receive credit for both PSYC 251 and PSYC 352 or PSYC 251 and PSYC 353.

PSYC 285 DIRECTED STUDIES  
Credits 0 to 3.0 to 3 Other Hours.  
Directed readings or research problems in selected areas designed to supplement existing course offerings. Individual report required.  
Prerequisites: 12 hours of psychology including completion of PSYC 204; GPR of 2.5 or better in all psychology courses; approval of instructor; major in psychology.

PSYC 289 Special Topics in...  
Credits 1 to 4.1 to 4 Lecture Hours. 0 to 4 Lab Hours.  
Selected topics in an identified area of psychology. May be repeated for credit.  
Prerequisite: PSYC 107.

PSYC 291 RESEARCH  
Credits 0 to 3.0 to 3 Other Hours.  
Research conducted under the supervision of a chosen faculty member in the department of psychology; involves discussion and weekly presentation of student research projects. May be repeated for credit.  
Prerequisites: PSYC 284 or PSYC 285; freshman or sophomore classification.

PSYC 300/WGST 300 Psychology of Women  
Credits 3.3 Lecture Hours.  
Theoretical and research literature relevant to psychological assumptions about the female personality. How these assumptions are being questioned or verified by recent experimental studies.  
Prerequisite: PSYC 107.  
Cross Listing: WGST 300.

PSYC 303 Psychology of Women of Color  
Credits 3.3 Lecture Hours.  
Interdisciplinary theories to study the unique yet intersectional experiences of women from different racial groups, ethnicities, nationalities and cultural backgrounds; scholarly research from the diversity science field; contemporary topics that have developed in a global context; examination of complex issues, which affect women of color across the lifespan.  
Prerequisite: Grade of C or better in AFST 201 or PSYC 107 or WGST 200, or approval of instructor.  
Cross Listing: AFST 303 and WGST 303.

PSYC 304 Psychology of Sport and Physical Activity  
Credits 3.3 Lecture Hours.  
The relationship of psychology to sport; topics include history, application of learning principles, social psychology, personality variables, psychological assessment, youth sport, women in sport, the psychology of coaching, sports law and ethics.  
Prerequisite: Junior or senior classification.

PSYC 305 Psychology of Adjustment  
Credits 3.3 Lecture Hours.  
Adjustment problems of normal people; application of psychological principles to family, school and community life.

PSYC 306 Abnormal Psychology  
Credits 3.3 Lecture Hours.  
Survey of behavior pathology; functional and organic psychoses, psychoaffective, character disorders, psychophysiological disorders, alcohol and drug addiction and mental retardation; therapeutic and diagnostic methods.  
Prerequisites: PSYC 107; PSYC 203 and PSYC 204 or junior or senior classification.

PSYC 307 Developmental Psychology  
Credits 3.3 Lecture Hours.  
Growth and development of normal child from infancy to adolescence with emphasis on elementary school years.  
Prerequisites: PSYC 107; PSYC 203 and PSYC 204 or junior or senior classification.

PSYC 311/NRSC 311 Psychology of Animal Behavior  
Credits 3.3 Lecture Hours.  
Survey of problems, principles, and methods of animal psychology; animal learning, motivation, discriminative processes and abnormal, social and instinctual behaviors.  
Prerequisites: PSYC 107; PSYC 203 and PSYC 204 or junior or senior classification.  
Cross Listing: NRSC 311/PSYC 311.

PSYC 315 Social Psychology  
Credits 3.3 Lecture Hours.  
Social psychological variables operating on the individual; results of experimental laboratory findings; interaction of personality and social behavior.  
Prerequisites: PSYC 107; PSYC 203 and PSYC 204 or junior or senior classification.

PSYC 319 History and Systems of Psychology  
Credits 3.3 Lecture Hours.  
Historical analysis of pre-scientific psychology in philosophy and physiology through the period of the psychological "schools."  
Prerequisite: PSYC 107.

PSYC 320/NRSC 320 Sensation-Perception  
Credits 3.3 Lecture Hours.  
Review of sensory physiology, sensory and perceptual phenomena and the major perceptual theories; current research in the field.  
Prerequisites: PSYC 107; PSYC 203 and PSYC 204 or junior or senior classification.  
Cross Listing: NRSC 320/PSYC 320.

PSYC 323 Psychology of Adolescence  
Credits 3.3 Lecture Hours.  
Psychological problems of normal teenage individual; ways and means of aiding youth to meet these problems constructively.  
Prerequisites: PSYC 107; PSYC 203 and PSYC 204 or junior or senior classification.

PSYC 330 Personality  
Credits 3.3 Lecture Hours.  
Review of personality theories, techniques of assessment and research relevant to understanding individual differences.  
Prerequisites: PSYC 107; PSYC 203 and PSYC 204 or junior or senior classification.
PSYC 331/NRSC 331 Social Neuroscience
Credits 3.3 Lecture Hours.
Integration of biological and psychological explanations of social behavior; recent research and theories in social neuroscience; emotion, motivation, aggression, face processing, empathy, social cognition, and social relationships.
Prerequisites: PSYC 107 or approval of instructor; junior or senior classification.
Cross Listing: NRSC 331/PSYC 331.

PSYC 332/NRSC 332 Neuroscience of Learning and Memory
Credits 3.3 Lecture Hours.
Brain mechanisms of learning and memory from molecular to behavioral levels; synaptic plasticity, model systems, multiple memory systems, diseases of learning and memory.
Prerequisites: PSYC 107 or approval of instructor; junior or senior classification.
Cross Listing: NRSC 332/PSYC 332.

PSYC 333/NRSC 333 Biology of Psychological Disorders
Credits 3.3 Lecture Hours.
Neurobiology and clinical explanation of molecular mechanisms underlying psychiatric disorders and their drug treatments; depression and bipolar, anxiety disorders, mood disorders, psychosis and schizophrenia.
Prerequisites: PSYC 107, PSYC 335/NRSC 335 or one year of biology and junior or senior classification.
Cross Listing: NRSC 333/PSYC 333.

PSYC 335/NRSC 335 Physiological Psychology
Credits 3.3 Lecture Hours.
Physiological bases of sensation, motor functions, emotion, motivation and complex psychological processes.
Prerequisites: 6 hours of biology; PSYC 203 and PSYC 204 or junior or senior classification.
Cross Listing: NRSC 335/PSYC 335.

PSYC 336/NRSC 336 Drugs and Behavior
Credits 3.3 Lecture Hours.
Physiological, pharmacological and behavioral effects of psychoactive drugs, including short-term and long-term effects of psychoactive drugs, properties of addictive drugs, etiology of addiction, and treatments of drug addiction and withdrawal.
Prerequisites: PSYC 335/NRSC 335 or NRSC 335/PSYC 335; junior or senior classification.
Cross Listing: NRSC 336/PSYC 336.

PSYC 340/NRSC 340 Psychology of Learning
Credits 3.3 Lecture Hours.
Survey of significant concepts, experimental methods and principles of learning.
Prerequisites: PSYC 107 or INST 301; PSYC 203 and PSYC 204 or junior or senior classification.

PSYC 345 Human Cognitive Processes
Credits 3.3 Lecture Hours.
Human cognition and information processing; perception, attention, memory, reasoning and problem solving; experimental methods and data, and contemporary theories of human cognition.
Prerequisites: PSYC 107; PSYC 203 and PSYC 204; or junior or senior classification.

PSYC 346 Psychology of Language
Credits 3.3 Lecture Hours.
Examines theories of how language is acquired, comprehended, produced, and used in normal and brain-impaired individuals.
Prerequisites: PSYC 107; or junior or senior classification.

PSYC 350/NRSC 350 Science of Mind and Brain
Credits 3.3 Lecture Hours.
Research in cognitive neuroscience; methodological advances that enable the study of the human brain safely in the laboratory; complex aspects of the mind like emotion, social behavior and consciousness.
Prerequisite: Junior or senior classification.
Cross Listing: NRSC 350/PSYC 350.

PSYC 352 Organizational Psychology
Credits 3.3 Lecture Hours.
Literature and research in basic theories and practices of organizational psychology including employee motivation, leadership, job satisfaction, counterproductive work behaviors, organizational commitment, culture, climate, communication, and group processes within organizations.
Prerequisites: PSYC 203 and PSYC 204.

PSYC 353 Personnel Psychology
Credits 3.3 Lecture Hours.
Literature and research in basic theories and practices of personnel psychology including job analysis, testing and validation, selection, performance appraisal, training, and legal issues in employment decision making.
Prerequisites: PSYC 203 and PSYC 204.

PSYC 354 Conflict and Negotiation
Credits 3.3 Lecture Hours.
Examination of the field of conflict and negotiation, including the structure and causes of common interpersonal, intragroup, and intergroup conflicts, effective negotiation strategies, ethics, mediation, and the development of negotiating skills.
Prerequisite: PSYC 107.

PSYC 360/NRSC 360 Health Psychology and Behavioral Medicine
Credits 3.3 Lecture Hours.
Survey of health psychology emphasizing behavioral and lifestyle factors in health and illness, prevention and modification of health-compromising behaviors, health care utilization, and psychological management of chronic disorders and psychological management of chronic disorders and terminal illnesses.
Prerequisite: PSYC 107.

PSYC 365 Psychology of Aging
Credits 3.3 Lecture Hours.
Examination of the psychological aspects of the aging process including physiology and health, memory and intellectual functioning, personality and social relationships, emotional health and late life transition.
Prerequisite: PSYC 107.

PSYC 371 Forensic Psychology
Credits 3.3 Lecture Hours.
Interface between psychology and the legal system; role of psychological theories and data, as well as mental health expertise, in the resolution of criminal trials and civil disputes; legal system's impact on the practice of psychology.
Prerequisite: PSYC 203 and PSYC 204 or junior or senior classification.
PSYC 407 Behavioral Disorders of Children
Credits 3. 3 Lecture Hours.
Behavior problems related to childhood; psychological aspects of mental retardation, emotional disturbance, physical handicaps and other disorders; causative factors, preventative and therapeutic methods explored; where feasible, practical experience included as requirement.
Prerequisites: PSYC 306; PSYC 307 or equivalent.

PSYC 411 Psychology of Self
Credits 3. 3 Lecture Hours.
Brief review of Freud's psychology and an in-depth coverage of Jung's psychology.
Prerequisite: PSYC 306 or PSYC 330 or approval of instructor.

PSYC 414 Behavior Principles
Credits 3. 3 Lecture Hours.
Behavioral analysis of humans' complex interactions with their environments: how behavioral repertoires are constructed during maturation process; how existent behaviors are strengthened, weakened or eliminated; and how features of environment exercise control over behavioral components within a repertory.
Prerequisites: 9 hours of psychology; PSYC 203 and PSYC 204 or junior or senior classification.

PSYC 450 Clinical Psychology
Credits 3. 3 Lecture Hours.
Analysis of the field of clinical psychology with a particular focus on the theoretical and scientific bases for the practice of clinical psychology.
Prerequisites: PSYC majors only; grade of C or better in PSYC 203, PSYC 204 and PSYC 306.

PSYC 470 Psychological Testing and Measurement
Credits 3. 3 Lecture Hours.
Theories and techniques of measurement of psychological concepts; a range of measurement models and procedures; critical tasks of evaluating strategies for measuring psychological concepts and drawing inferences and interpretations from commonly used psychological assessments.
Prerequisites: PSYC 203; junior or senior classification or approval of instructor.

PSYC 484 Field Experiences
Credits 0 to 6. 0 to 6 Other Hours.
Participation in an approved mental health, mental retardation, school, industrial or other approved setting; field experiences supervised by an appropriate professor within an area of student interest; course requirements vary with the setting, the supervising professor and the needs of the individual student. May be repeated for credit.
Prerequisites: PSYC 203 and PSYC 204; 12 hours of psychology; GPR of 2.5 or better in all psychology courses; approval of instructor; major in psychology.

PSYC 485 Directed Studies
Credits 0 to 3. 0 to 3 Other Hours.
Directed readings or research problems in selected areas designed to supplement existing course offerings. May be repeated for credit.
Prerequisite: Approval of instructor.

PSYC 489 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Selected topics in an identified area of psychology. May be repeated for credit.
Prerequisites: PSYC 107 and approval of instructor.

PSYC 491 Research
Credits 0 to 3. 0 to 3 Other Hours.
Research conducted under the supervision of a chosen faculty member in the department of psychology; involves discussion and presentation of student research projects. May be repeated for credit.
Prerequisites: PSYC 484 or PSYC 485; approval of instructor.

RDNG - Reading (RDNG)

RDNG 291 Research
Credits 1 to 4. 1 to 4 Other Hours.
Research conducted under the direction of faculty member in reading. May be repeated two times for credit.
Prerequisites: Freshman or sophomore classification and approval of instructor.

RDNG 351 Reading in the Elementary School
Credits 3. 3 Lecture Hours.
Recent trends, issues, materials and procedures considered essential for effective teaching of reading, such as comprehension, word analysis, study skills, motivation, grouping, etc.
Prerequisites: Concurrent enrollment in RDNG 361; junior classification or approval of department head.

RDNG 361 Assessment in Reading Instruction
Credits 3. 3 Lecture Hours.
Evaluation and use of commonly used achievement tests, development of criterion referenced tests and interpretation and construction of informal measures for assessing reading skills.
Prerequisites: Concurrent enrollment in RDNG 351; junior classification or approval of department head.

RDNG 371 Multicultural and Interdisciplinary Literature for Middle Grades
Credits 3. 3 Lecture Hours.
Focuses on multicultural and interdisciplinary literature appropriate for middle grades students; implements and evaluates effective multicultural, interdisciplinary instruction through selection, use and development of literature in middle grades classroom.
Prerequisite: Junior classification.
Corequisite: INST 322 recommended.

RDNG 372 Reading and Writing across the Middle Grades Curriculum
Credits 3. 3 Lecture Hours.
Acquaints middle-grade educators to reading and writing instruction in content area education; focuses on development of grade-appropriate reading/writing competencies and educational techniques appropriate to student development in various subjects.
Prerequisite: Junior classification.

RDNG 460 Language and Reading
Credits 3. 3 Lecture Hours.
Relationship between language and reading, dialect and reading, and linguistics.

RDNG 461 Teaching Reading Through Children's Literature
Credits 3. 3 Lecture Hours.
Use of past and contemporary literature for the motivation of wide leisure reading in the elementary grades.
Prerequisites: RDNG 351, RDNG 361.

RDNG 465 Reading in the Middle and Secondary Grades
Credits 3. 3 Lecture Hours.
Reading needs of middle and secondary school students with emphasis upon curriculum organization for reading development and assessment of student progress in content area reading.
RELS 211/HUMA 211 Hebrew Scriptures
Credits 3.3 Lecture Hours.
Philosophical concepts of the Hebrew Scriptures as they relate to the development of religious and ethical ideas.
Cross Listing: HUMA 211/RELS 211.

RELS 213/HUMA 213 New Testament
Credits 3.3 Lecture Hours.
The origin and development of the religious and philosophical concepts of the New Testament.
Cross Listing: HUMA 213/RELS 213.

RELS 220 History of Christianity: Origins to the Reformation
Credits 3.3 Lecture Hours.
History of Christian doctrine, ecclesiastical organization, and religious practice, origins through Reformation, with emphasis on religion and society; life and teachings of Jesus; apostolic church; patristic period; Christianization of Roman Empire and northern Europe; monasticism; medieval church; Gregorian reform; heresy; papal monarchy; schism and conciliarism; reformation of the sixteenth century.
Cross Listing: CLAS 220 and HIST 220.

RELS 221/HIST 221 History of Islam
Credits 3.3 Lecture Hours.
Introduction to the history of Islam, from the origins of the religion to the present; development of Islamic law; gender issues; expansion of Islam to Sub-Saharan Africa and South Asia; globalized Islam.
Cross Listing: HIST 221/RELS 221.

RELS 251/CLAS 251 Classical Mythology
Credits 3.3 Lecture Hours.
Introduction to the most important myths of Greeks and Romans; ancient and modern methods of interpreting myths; the role of myths in ancient literature; readings in English.
Cross Listing: CLAS 251/RELS 251.

RELS 285 Directed Studies
Credits 0 to 3.0 to 3 Other Hours.
Readings and/or assigned projects for specific needs of students minoring in religious studies; directed independent or individual study in an identified area of religious studies.
Prerequisite: Approval of coordinator of religious studies.

RELS 289 Special Topics in...
Credits 1 to 4.1 to 4 Lecture Hours.
Selected topics in an identified area of religious studies. May be repeated for credit.
Prerequisite: Approval of instructor.

RELS 291 Research
Credits 0 to 3.0 to 3 Other Hours.
Research conducted under the direction of a faculty member in Liberal Arts.
Prerequisites: Freshman or sophomore classification and approval of instructor.

RELS 302 Women and Religion
Credits 3.3 Lecture Hours.
Investigation of women's position in religious institutions historically and/or currently; religion's influence on women's roles and status, and women's attempts to define their own religious perspectives; draws on sociological and philosophical insights and methods.
Prerequisite: Junior or senior classification or approval of instructor.
Cross Listing: SOCI 302 and WGST 302.

RELS 303/HUMA 303 Near Eastern Religions
Credits 3.3 Lecture Hours.
Beliefs and practices of Judaism, Zoroastrianism, Christianity, and Islam with particular attention to their philosophical presuppositions.
Cross Listing: HUMA 303/RELS 303.
RELS 304/HUMA 304 Indian and Oriental Religions
Credits 3.3 Lecture Hours.
Beliefs and practices of Hinduism, Jainism, Sikhism, Buddhism, Confucianism, Taoism, and Shinto with particular attention to their philosophical presuppositions.
Cross Listing: HUMA 304/RELS 304.

RELS 312 Contemplation in the Modern World
Credits 3.3 Lecture Hours.
Interdisciplinary approach to examining contemplative practices: origins in philosophy and religious traditions, goals and techniques of contemplation, contemplation in relation to cultural and social problems or needs.

RELS 317/ANTH 317 Introduction to Biblical Archaeology
Credits 3.3 Lecture Hours.
Application of archaeology in biblical research; basic overview of the material cultures that are the setting for the biblical narratives.
Cross Listing: ANTH 317/RELS 317.

RELS 321 Political Islam and Jihad
Credits 3.3 Lecture Hours.
Interaction between Islamic movements and politics in various Middle Eastern countries; the meaning and evolution of jihad; the role of Islam as a tool for political and social mobilization.
Prerequisite: Junior or senior classification or approval of instructor.
Cross Listing: HUMA 321 and INTS 321.

RELS 326/SOCI 326 Sociology of Religion
Credits 3.3 Lecture Hours.
Institution of religion and religious-related behavior; relationship between dynamic and structural religion and contemporary society.
Prerequisite: SOCI 205.
Cross Listing: SOCI 326/RELS 326.

RELS 331/PHIL 331 Philosophy of Religion
Credits 3.3 Lecture Hours.
Philosophical problems of western religion such as the existence of God, the problem of evil, types of theism, rational, empirical, and mystical approaches to God.
Cross Listing: PHIL 331/RELS 331.

RELS 340/ANTH 340 Folklore and the Supernatural
Credits 3.3 Lecture Hours.
Traditional expressions of the supernatural such as superstition, belief tale and divination classified as folklore genres and their relationships to the cultures in which they develop; theories drawn from anthropology, folklore and related social sciences.
Prerequisite: Junior or senior classification or approval of instructor.

RELS 347/HIST 347 Rise of Islam, 600-1258
Credits 3.3 Lecture Hours.
Introduction to Islamic civilization from the rise of Islam to the Mongol conquests; examination of pre-Islamic poetry, the Qur'an, early Islamic laws on prayer, the ethical conventions of jihad, the lives of Muslim women, and the relation of Islam to Judaism and Christianity.
Prerequisite: Junior or senior classification.
Cross Listing: HIST 347/RELS 347.

RELS 360/ENGL 365 The Bible as Literature
Credits 3.3 Lecture Hours.
Prerequisite: Junior or senior classification.
Cross Listing: ENGL 365/RELS 360.

RELS 365/HIST 365 History of Religion in America to 1860
Credits 3.3 Lecture Hours.
Religion in North America from colonial beginnings to eve of Civil War; relations between European Christianity, Native Americans and African Americans; religious pluralism, reform movements, social and political change.
Cross Listing: HIST 365/RELS 365.

RELS 366/HIST 366 History of Religion in America from 1860 to the Present
Credits 3.3 Lecture Hours.
Religion in America from the Civil War; relationship of religion and science, ethnic assimilation, emergence of fundamentalism, mass evangelism, cults and criticisms of contemporary culture; examination of social and racial problems by the major religious traditions.
Cross Listing: HIST 366/RELS 366.

RELS 392/ENGL 392 Studies in Literature, Religion, and Culture
Credits 3.3 Lecture Hours.
Exploration of literature treating significant religious topics in the context of cultural setting; features current faculty research on such topics as Tolkien and the making of myth, C.S. Lewis, texts and cultures of the Middle East and Victorian women writers and religion.
Prerequisites: 3 credits of literature at 200-level or above; junior or senior classification.
Cross Listing: ENGL 392/RELS 392.

RELS 403/ANTH 403 Anthropology of Religion
Credits 3.3 Lecture Hours.
Anthropological theories of the relationship of religious behavior to social structure and cultural change, with particular reference to non-Western, pre-industrial societies.
Cross Listing: ANTH 403/RELS 403.

RELS 405 Psychology of Religion
Credits 3.3 Lecture Hours.
Review of world's religions and the psychological study of the religious experience; religion within the context of personality; religious development through social interactions; religion in psychological research and therapy.
Prerequisites: PSYC 306 and PSYC 330 or approval of instructor.

RELS 418 European Intellectual History from Ancient Greece to the Early Middle Ages
Credits 3.3 Lecture Hours.
Political and social history of selected major figures and important movements in political theory, literature, sociology, art, economics and philosophy from Pre-Socratic Greece through the formative stages of the Christian Middle Ages.
Prerequisite: Junior or senior classification or approval of instructor.
Cross Listing: CLAS 418 and HIST 418.

RELS 419/HIST 419 European Intellectual History from the High Middle Ages to the 17th Century
Credits 3.3 Lecture Hours.
Political and social history of selected major figures and important movements in political theory, literature, sociology, art, economics and philosophy from the founding of Scholasticism and the University System to the New Philosophy and science of 17th century.
Prerequisite: Junior or senior classification or approval of instructor.
Cross Listing: HIST 419/RELS 419.
RELS 436/ANTH 436 Ancient Egypt
Credits 3. 3 Lecture Hours.
Archaeology and history of ancient Egypt from earliest times to the end of the New Kingdom period.
Prerequisite: Junior or senior classification or approval of instructor.
Cross Listing: ANTH 436/RELS 436.

RELS 464/PHIL 464 Modern Jewish Thought and Philosophy
Credits 3. 3 Lecture Hours.
An overview of modern Jewish thought and philosophy spanning Jewish European thinkers from the 18th century to the 20th century.
Prerequisite: Junior or senior classification.
Cross Listing: PHIL 464/RELS 464.

RELS 471/HISP 471 Hispanic Religions
Credits 3. 3 Lecture Hours.
Exploration of the history and practice of Hispanic religion, including spirit possession, evil eye, consumption of sacred substances, healing traditions, ex-votos, relics, prophecy, omens, monsters, astrology, witchcraft, the Inquisition, festivals, pilgrimage, mystics and religious contributions of diverse ethnic groups.
Prerequisite: Junior or senior classification or approval of instructor.
Cross Listing: HISP 471/RELS 471.

RELS 474/HISP 474 Crucible of cultures--Christian, Jewish, and Muslim--that was medieval Spain and modern implication of the experience in diversity.
Prerequisites: ENGL 104 and junior or senior classification or approval of instructor.
Cross Listing: HISP 474/RELS 474.

RELS 480/COMM 480 Religious Communication
Credits 3. 3 Lecture Hours.
The role of religious communication as manifested in speeches, sermons, debates, campaigns, and social movements throughout history. May be taken two times for credit.
Prerequisite: Junior or senior classification or approval of instructor.
Cross Listing: COMM 480/RELS 480.

RELS 485 Directed Studies
Credits 0 to 6. 0 to 6 Other Hours.
Readings and/or assigned projects for specific needs of students minoring in religious studies; directed independent or individual study in an identified area of religious studies.
Prerequisite: Approval of coordinator of religious studies.

RELS 489 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Selected topics in an identified area of religious studies. May be repeated for credit.
Prerequisite: Approval of instructor.

RELS 491 Research
Credits 0 to 3. 0 to 3 Other Hours.
Research conducted under the direction of a faculty member in Liberal Arts. May be taken 3 times for credit.
Prerequisites: Junior or senior classification and approval of instructor.

RENR 375 Conservation of Natural Resources
Credits 3. 3 Lecture Hours.
Principles and philosophies associated with the development, management and use of natural resources; ecological and social implications inherent in management alternatives involving the natural environment and use of renewable natural resources.

RENR 400 Study Abroad in Natural Resources
Credits 2 to 12. 2 to 12 Lecture Hours.
Provides students with an opportunity to gain first-hand experience in natural resource management in foreign countries; focus on the interaction of public, communal and private land tenure systems with the ecological and human dimensions of rangeland management, wildlife conservation and nature-based tourism. May be taken two times for credit.
Prerequisite: Junior or senior classification.

RENR 405 GIS for Environmental Problem Solving
Credits 3. 3 Lecture Hours. 2 Lab Hours.
Interdisciplinary approach to train students to integrate GIS and relevant technologies for environmental problem solving; helps students relate learning to real world situations; students conceptualize, develop and manage projects using real data; one term project required.
Prerequisite: RENR 201 or equivalent or approval of instructor.
RENR 410 Ecosystem Management
Credits 4.3 Lecture Hours. 3 Lab Hours.
Concepts and practices relevant to the development of landscape/regional level ecosystem management plans; an ecosystem management plan will be developed utilizing a strategic management/coordinated resources approach to establish resource goals, ecosystem resource analysis and impact evaluation, and implementation compatible with societal and individual concerns.
Prerequisites: RNR 205, senior classification or approval of instructor.

RENR 460/RPTS 460 Nature, Values, and Protected Areas
Credits 3.3 Lecture Hours.
Writing-intensive discussion of the ways in which protected areas reflect human values about nature; identify stakeholders in and around protected areas, exploring how interests either conflict or coincide; evaluate social, economic, cultural, and ecological trade-offs of different approaches to conservation.
Prerequisite: RNR 307 or RNR 316; or 9 hours of credit in natural resource courses.
Cross Listing: RNR 460/RER 460.

RENR 470 Environmental Impact Assessment
Credits 3.3 Lecture Hours.
The evolution of natural resources regulatory policies and how this influences current procedures for environmental/natural resources assessment and management; demonstration of the environmental impact assessment procedures and policy issues associated with environmental impacts.
Prerequisite: Senior classification or approval of instructor.

RENR 489 Special Topics in...
Credits 1 to 4.1 to 4 Lecture Hours.
Selected topics in an identified field of renewable natural resources. May be repeated for credit.
Prerequisite: Approval of instructor.

RLEM-Rangeland Ecology & Mgmt (RLEM)

RLEM 321 Field Studies in Ecological Restoration
Credit 1.2 Lab Hours.
Field trip course that provides examples, visits and field experiences in ecological restoration; reinforces conceptual basis for ecological restoration principles developed in RLEM 320, alternative strategies for succession management, plant materials selection, seedbed preparation, planting technologies and planning ecological restoration programs.
Prerequisites: ESM 320 or concurrent enrollment; junior or senior classification.

RLEM 324 Application of Rangeland Management Principles
Credit 1.2 Lab Hours.
An opportunity to experience and visualize rangeland management practices under field conditions and to develop a practical understanding of rangeland planning and principles in an integrated fashion.
Prerequisite: Junior or senior classification or approval of instructor.

RLEM 401 Plant-Herbivore Dynamics
Credits 3.3 Lecture Hours.
Evaluates the effects of herbivory at the plant population and community levels; developmental plant morphology and plant resistance to grazing; foraging strategies of herbivores relating to landscape/plant attributes along with animal nutritional needs; manipulation of the grazing process to meet management objectives.
Prerequisite: ESM 314.

RPTS - Rec, Park & Tourism Sci (RPTS)

RPTS 201 Foundations of Recreation, Parks and Tourism
Credits 3.3 Lecture Hours.
(PHED 1336) Foundations of Recreation, Parks and Tourism. Analysis of the elements comprising a community, community assessment techniques and community development processes engaged by stakeholders and residents to improve living conditions; definitions and principles associated with community development.

RPTS 209 Park and Tourism Operations
Credits 3.2 Lecture Hours. 2 Lab Hours.
Planning, execution and supervision of field maintenance and operations.

RPTS 291 Research
Credits 1 to 3.1 to 3 Other Hours.
Research conducted under the direction of faculty member in recreation park and tourism sciences.
Prerequisites: Freshman or sophomore classification and approval of instructor.

RPTS 300 Supervised Field Studies
Credits 3.3 Other Hours.
Survey and application of principles of recreation and parks; selected aspects of park and recreation management in an operational setting under the supervision of an approved agency; preparation and presentation of a comprehensive analysis of a specific problem; offered on an individual basis. May be repeated for credit.
Prerequisites: RPTS 207; 12 hours of credit in recreation and parks.

RPTS 301 Leisure and Outdoor Recreation in American Culture
Credits 3.3 Lecture Hours.
Introduction to the fundamental concepts of leisure and outdoor recreation and how they influence us as individuals, groups and society; critical factors such as self, family, lifespan, ecology, health, work patterns, communications, diversity, popular culture, and consumption are studied in relationship to past, present and future leisure patterns.

RPTS 302 Application of Tourism Principles
Credits 3.3 Lecture Hours.
Tourism principles applied at local, regional and international levels; examination of the scale, scope and organization of the industry including marketing destinations and experiences; issues related to the economic, technological and political aspects of tourism.
Prerequisite: Junior or senior classification.
RPTS 304 Administration of Recreation Resource Agencies
Credits 3.3 Lecture Hours.
Contemporary issues and related administrative practices associated with the provision of recreation services and settings; addresses principles associated with recreation resource agency administration; personnel and customer-related administrative issues in recreation resource agencies; concepts and principles relevant to commercial and non-profit recreation resource agencies.
Prerequisites: RPTS 201 and RPTS 209; RENR 201.

RPTS 307 Methods of Environmental Interpretation
Credits 3.2 Lecture Hours. 2 Lab Hours.
Communication processes and practices between resource managers and publics using or affected by natural, cultural and tourism resource places; principles and techniques of gathering, analyzing and disseminating information through various media, such as exhibits, presentations, publications and programs.*

RPTS 308 Foundations of Community and Community Development
Credits 3.3 Lecture Hours.
Analysis of the elements comprising a community, community assessment techniques and community development processes engaged by stakeholders and residents to improve living conditions; definitions and principles associated with community development.
Prerequisite: Junior or senior classification.

RPTS 311 Planning and Implementation of Events and Programs
Credits 3.3 Lecture Hours.
Planning, operations, administration and evaluation; includes creation and implementation of programs and special events with budgeting, operational and venue logistics, marketing, fund raising, hospitality training and participant satisfaction.
Prerequisite: Junior or senior classification.*

RPTS 316 Recreational Management of Wildlands
Credits 3.3 Lecture Hours.
Management and recreational use of wild and wilderness areas and multiple use management areas; systems and techniques for dealing with management problems in outdoor recreation.
Prerequisite: Junior or senior classification.*

RPTS 320 Event Management and Operations I
Credits 3.3 Lecture Hours.
Principles and applications for effective planning and management of events; planning, promotion, operational logistics, sponsorship and evaluation.
Prerequisite: RPTS 311.

RPTS 321 Event Management and Operations II
Credits 3.3 Lecture Hours.
Advanced principles and applications of event management, including practical knowledge relating to contracting, media, fund raising, compliance and oversight, risk management, site logistics, sponsorships and vendor management.
Prerequisites: RPTS 311 and RPTS 320.

RPTS 331 Tourism Marketing
Credits 3.3 Lecture Hours.
Application of basic tourism marketing principles and concepts in government, business, and social-cause contexts; situation analysis and operational evaluation; decision making in terms of product, place, price, and channel of distribution mixes for tourism attractions and services.
Prerequisite: RPTS 302 and junior or senior classification.

RPTS 336 Research and Analysis in Recreation and Tourism
Credits 3.3 Lecture Hours.
Examination of current tourism and recreation research emphasizing specialized research methodology, adaptive techniques and methods of research useful to the recreation and tourism professional; analysis of the methods of problems identification, formulation and solution.
Prerequisites: RENR 201 and STAT 201 or equivalents; all mathematics requirements satisfied.*

RPTS 340 Recreation, Parks, Tourism and Diverse Populations
Credits 3.3 Lecture Hours.
Review of major judicial decisions and civil rights laws on provision and distribution of leisure services in society; influence of age, disability, ethnicity, national origin, race, religion and gender on individual’s preferences for particular experiences; implications of individual differences for the provision of services.
Prerequisite: Junior or senior classification.*

RPTS 360 Ecotourism: Principles and Practices
Credits 3.3 Lecture Hours.
Principles and practices related to ecotourism; analyzes outcomes of ecotourism for conservation and development; ecotourism as a strategy to protect culture and the physical environment.
Prerequisite: RPTS 302.

RPTS 370 Youth Development Organizations and Services
Credits 3.3 Lecture Hours.
Changing views of adolescence and youth culture in the United States; developmental assets and principles of developing positive youth development supports, opportunities and services; mentoring and staff development for youth serving agencies; goals, program emphases, administrative methods and membership of major youth serving organizations.

RPTS 371 Understanding and Developing Effective Skills for Youth Development
Credits 3.3 Lecture Hours.
Development of skills needed to effectively work with youth; issues such as youth participation, conflict resolution, youth-adult collaboration, leadership development, youth empowerment and youth voice; connection of theoretical concepts to practice.
Prerequisites: RPTS 370 and junior or senior classification.

RPTS 401 Tourism and Recreation Enterprises
Credits 4.3 Lecture Hours. 2 Lab Hours.
Market and financial feasibility analysis; resource characteristics, location and market aspects of tourism and recreation enterprises; sources of funding for facility development; approaches to marketing recreation, park and tourism services; applying knowledge to case study situations.
Prerequisites: RPTS 304 or RPTS 423 and senior classification.*

RPTS 402 Park Planning and Design
Credits 3.2 Lecture Hours. 2 Lab Hours.
Classification of areas according to primary function, location and clientele served; basic park planning principles involving scale, circulation, function and spatial relationships; methodology for establishing planning goals, objectives and planning strategies.
Prerequisites: Junior or senior classification.*

RPTS 403 Financing and Marketing Recreation, Park and Tourism Resources
Credits 4.3 Lecture Hours. 2 Lab Hours.
Public sources of funding for facility development and of approaches to marketing recreation, park, and tourism services; applying knowledge to case study situations.
Prerequisites: RPTS 304 or RPTS 423; senior classification.
RPTS 404/SOCI 404 Sociology of the Community
Credits 3.3 Lecture Hours.
Organization of American communities examining the bases of community, types of communities and the changes faced by communities.
Prerequisite: SOCI 205; Junior or senior classification.

Cross Listing: SOCI 404/RPTS 404.

RPTS 408 Community Development and Supporting Institutions
Credits 3.3 Lecture Hours.
Scope, function and mission of domestic and international organizations that support community development efforts.
Prerequisites: RPTS 308 or approval of instructor; junior or senior classification.

RPTS 411 Cruise Tourism
Credits 3.3 Lecture Hours.
Overview of cruise tourism; management of service sectors; understanding of cultural aspects of places traveled; cruise marketing/decision making; geography of cruising; youth programming; agri-tourism; identification of issues related to the economic, technological and political aspects of cruise tourism.
Prerequisite: Junior or senior classification.

RPTS 421 Planning and Implementation of Events in Resorts and Hotels
Credits 3.3 Lecture Hours.
Principles and applications for effective planning and management of events in resorts and hotels; planning, promotion, operational logistics, sponsorship and evaluation.
Prerequisite: Junior or senior classification.

RPTS 423 Tourism Management
Credits 3.3 Lecture Hours.
Management issues and tools related to the travel and tourism industry; history, planning, operations, leading, directing and controlling tourism businesses; complexity and scope of tourism systems; issues related to ethics and sustainability; managing tourism in different environments; roles of technology and information technology; future of tourism.
Prerequisite: RPTS 302.

RPTS 426 Tourism Impacts
Credits 3.3 Lecture Hours.
Consequences and impacts of various kinds of tourism development for host communities and regions; read and evaluate case studies from Texas, other areas in the United States and internationally; economic, environmental, social, cultural and political impacts associated with tourism proposals, project development, tourist activity, industry expansion and industry decline.
Prerequisite: RPTS 302.

RPTS 441 Tourism Experience
Credits 3.3 Lecture Hours.
Theoretical foundation of tourism experiences from an interdisciplinary perspective, including the role of humans, nature/landscapes, built environments and technologies in staging tourism-experiences; draws implications for the design/planning, management and marketing of tourism venues such as events, festivals, museums, hotels/resorts, cruise ships, cities, theme parks, and websites.
Prerequisite: Junior or senior classification or approval of instructor.

RPTS 444 Service Quality for Hospitality Organizations
Credits 3.3 Lecture Hours.
Application of SERVQUAL concepts with focus on implementing measures to enhance customer service; in-depth study of planning and administering hospitality service strategies, measurement of service delivery, repair and recovery of service delivery gaps, and management and training of employees; practical applications of research in the field.
Prerequisite: Junior or senior classification.

RPTS 445 Sustainability in International Tourism
Credits 3.3 Lecture Hours.
International tourism with a focus on the diversity of tourism practices and policies around the world and approaches scholars use to study tourism planning, management, marketing, sustainability and impacts; includes a required international field trip during spring break.
Prerequisite: Junior or senior classification or approval of instructor.

RPTS 446 Information Technology Adoption and Use in Recreation, Park and Tourism Organizations
Credits 3.3 Lecture Hours.
Theories of technology adoption and diffusion in recreation, park and tourism organizations; use of technology for knowledge management, benchmarking, and collaboration within leisure and tourism organizations.
Prerequisite: RENR 201.

RPTS 454 Amazon Field School
Credits 3.4 Lecture Hours.
Investigation of social and ecological complexities of biodiversity conservation in tropical ecosystems; biological and social science approaches to evaluate causes, consequences and solutions to biodiversity loss through ecology, culture and governance.
Prerequisites: Junior or senior classification with a minimum GPA of 2.0 and approval of instructor.

Cross Listing: VTPB 404 and WFSC 454.

RPTS 460/RENR 460 Nature, Values, and Protected Areas
Credits 3.3 Lecture Hours.
Writing-intensive discussion of the ways in which protected areas reflect human values about nature; identify stakeholders in and around protected areas, exploring how interests either conflict or coincide; evaluate social, economic, cultural, and ecological trade-offs of different approaches to conservation.
Prerequisite: RPTS 307 or RPTS 316; or 9 hours of credit in natural resource courses.

Cross Listing: RENR 460/RPTS 460.

RPTS 474 Management of Programs and Services for Youth
Credits 3.3 Lecture Hours.
Organizational behavior, administration and management of public, non-profit and commercial youth programs and agencies; strategic planning, marketing, financial resource development, budgeting and fiscal management; contemporary issues facing youth development field; international perspective on youth agencies.
Prerequisite: RPTS 304, RPTS 370 and RPTS 371.

RPTS 476 Leadership for Outdoor Recreation
Credits 3.3 Lecture Hours.
Leadership principles related to outdoor recreation; classroom instruction and experiential learning; skills training through field trips; risk management planning, environmental education, group facilitation, and trip planning.

Prerequisite: RPTS 370.
RPTS 478 Youth Development Practice
Credits 3. 3 Lecture Hours.
Application of youth development philosophy in community settings; principles and practices of community youth development and existing youth development models; local efforts related to community youth development.
Prerequisite: RPTS 370, RPTS 371 and junior or senior classification.

RPTS 481 Seminar
Credit 1. 1 Lecture Hour.
Development of knowledge and skills necessary for employment in the recreation, park and tourism fields; focus on career preparation and job search strategies, professionalism, networking and opportunities for advanced education.
Prerequisite: Junior or senior classification.

RPTS 484 Internship
Credits 1 to 6. 1 to 6 Other Hours.
Practical experience working in a professional recreation, park or tourism setting. Offered on an individual basis. May be repeated for credit.
Prerequisite: Approval of department head.

RPTS 485 Directed Studies
Credits 1 to 4. 1 to 4 Other Hours.
Credit 1 to 4 each semester. For individual research by advanced undergraduates upon a broad range of subjects not included in established courses.
Prerequisite: Junior classification or approval of department head.

RPTS 489 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours. 0 to 9 Lab Hours.
Selected topics in an identified field of recreation and parks. May be repeated for credit.

RPTS 491 Research
Credits 1 to 3. 1 to 3 Other Hours.
Research conducted under the direction of faculty member in recreation park and tourism sciences. Registration in multiple sections of this course are possible within a given semester provided that the per semester credit hour limit is not exceeded.
Prerequisites: Junior or senior classification and approval of instructor.

RUSS - Russian (RUSS)

RUSS 101 Beginning Russian I
Credits 4. 3 Lecture Hours. 2 Lab Hours.
(RUSS 1411, 1511) Beginning Russian I. Elementary language study with oral, written and reading practice. Attention given to background for conversation. Part of class preparation will be done in language laboratory.

RUSS 102 Beginning Russian II
Credits 4. 3 Lecture Hours. 2 Lab Hours.
(RUSS 1412, 1512) Beginning Russian II. Continuation of RUSS 101. Part of class preparation will be done in language laboratory.
Prerequisite: RUSS 101.

RUSS 201 Intermediate Russian I
Credits 3. 3 Lecture Hours.
(RUSS 2311) Intermediate Russian I. Continuation and review of grammar, selected readings; material to develop conversational and reading ability.
Prerequisite: RUSS 102.

RUSS 202 Intermediate Russian II
Credits 3. 3 Lecture Hours.
(RUSS 2312) Intermediate Russian II. Continuation of RUSS 201. Readings taken from standard works.
Prerequisite: RUSS 201.

RUSS 211 Russian Conversation
Credits 3. 3 Lecture Hours.
Development of conversational skills in Russian; building of active vocabulary; exercises with emphasis on correct diction; oral presentations; skits; dialogues; discussion of current events; conducted in Russian.
Prerequisite: RUSS 102 or equivalent.

RUSS 221 Field Studies I
Credits 3. 3 Lecture Hours.
Russian language and culture, taught in the former Soviet Union; supervised travel of cultural interest; participation in courses and activities at a Russian university or institute; exams, written and oral reports; to be taken concurrently with RUSS 222.
Prerequisite: RUSS 102 with a grade of B or higher.

RUSS 222 Field Studies II
Credits 3. 3 Lecture Hours.
Russian language and literature taught in the former Soviet Union in cooperation with a Russian university or institute; exams, written and oral reports; to be taken concurrently with RUSS 221.
Prerequisite: RUSS 102 with a grade of B or higher.

RUSS 285 Directed Studies
Credits 1 to 4. 1 to 4 Other Hours.
Individual supervision of readings or assigned projects in Russian, selected for each student individually.
Prerequisite: Approval of instructor and department head.

RUSS 289 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Selected topics in an identified area of Russian. May be repeated for credit.
Prerequisite: Approval of instructor.

RUSS 301 Advanced Grammar and Composition I
Credits 3. 3 Lecture Hours.
Review of grammar at an advanced level; readings of literary texts for analysis and emulation; development of oral and written skills; required for modern languages majors in Russian; conducted in Russian.
Prerequisite: RUSS 202 or RUSS 222 or registration therein.

RUSS 302 Advanced Grammar and Composition II
Credits 3. 3 Lecture Hours.
Continuation of RUSS 301; literary interpretation of longer works; particular emphasis on the short stories of Chekhov and other major authors; required for modern languages majors in Russian; conducted in Russian.
Prerequisite: RUSS 202 or RUSS 222 or registration therein.

RUSS 322 Masterpieces of Russian Literature
Credits 3. 3 Lecture Hours.
Selected works of Russian literature, representative of its major authors and most important literary movements; literary analysis and evaluation of each work’s cultural background; conducted in Russian.
Prerequisite: RUSS 202 or RUSS 222 or registration therein. May be retaken with approval of department head.
RUSS 410 Seminar in Russian Studies
Credits 3. 3 Lecture Hours.
Exploration of a significant topic, event, or period in Russian literature and culture; taught in Russian.
Prerequisite: RUSS 202 or RUSS 222.

RUSS 441/EURO 441 The Russian Novel I: Tolstoy and Dostoevsky
Credits 3. 3 Lecture Hours.
Study of the major works of Tolstoy and Dostoevsky; discussion of the literary nature and purpose of novels, especially in the context of Russian culture; taught in English.
Prerequisite: RUSS 201 or registration therein, or approval of instructor.
Cross Listing: EURO 441/RUSS 441.

RUSS 430 Contemporary Russian Prose
Credits 3. 3 Lecture Hours.
Study of major Russian novels from ca. 1900 to the end of Stalinism; exploration of topics relevant to Russia's experience in the 20th century; taught in English.
Prerequisite: RUSS 201 or registration therein, or approval of instructor.
Cross Listing: RUSS 430.

RUSS 440 Contemporary Russian Drama
Credits 3. 3 Lecture Hours.
Introduction to the masterpieces of Russian drama from the 19th century to the present; includes such authors as Pushkin, Chekhov, Gorky, Arbuzov, Rozov and Petrushevskaya; taught in English.
Prerequisite: RUSS 201 or registration therein, or approval of instructor.
Cross Listing: RUSS 440.

RUSS 442/EURO 442 The Russian Novel II: The Twentieth Century
Credits 3. 3 Lecture Hours.
Study of major Russian novels from ca. 1900 to the end of Stalinism; exploration of topics relevant to Russia's experience in the 20th century; taught in English.
Prerequisite: RUSS 201 or registration therein, or approval of instructor.
Cross Listing: EURO 442/RUSS 442.

RUSS 443/EURO 443 Contemporary Russian Prose
Credits 3. 3 Lecture Hours.
Study of Russian and Soviet 20th century prose literature, with emphasis on post-Stalinist and post-glasnost writers; taught in English.
Prerequisite: RUSS 201 or registration therein, or approval of instructor.
Cross Listing: EURO 443/RUSS 443.

RUSS 444/EURO 444 Russian Drama
Credits 3. 3 Lecture Hours.
Introduction to the masterpieces of Russian drama from the 19th century to the present; includes such authors as Pushkin, Chekhov, Gorky, Arbuzov, Rozov and Petrushevskaya; taught in English.
Prerequisite: RUSS 201 or registration therein, or approval of instructor.
Cross Listing: EURO 444/RUSS 444.

RUSS 446/EURO 446 Russian Artistic Culture I: Beginnings to 1900
Credits 3. 3 Lecture Hours.
Masterpieces of Russian art, including architecture, dance, theater, music, and literature, from its beginnings until ca. 1900; taught in English.
Prerequisite: RUSS 201 or registration therein, or approval of instructor.
Cross Listing: EURO 446/RUSS 446.

RUSS 447/EURO 447 Russian Artistic Culture II: 1890 to Present
Credits 3. 3 Lecture Hours.
Masterpieces of Russian art, including architecture, dance, theater, music, film, and literature, from ca. 1890 to the present; taught in English.
Prerequisite: RUSS 201 or registration therein, or approval of instructor.
Cross Listing: EURO 447/RUSS 447.

RUSS 485 Directed Studies
Credits 1 to 4. 1 to 4 Other Hours.
Individual supervision of readings or assigned projects, selected for each student individually; written and oral reports.
Prerequisite: Approval of instructor and department head.

RUSS 489 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Selected topics in an identified area of Russian language, literature and civilization.
Prerequisite: Approval of instructor.

RUSS 491 Research
Credits 1 to 3. 1 to 3 Other Hours.
Research conducted under the direction of faculty member in Russian. May be taken three times for credit.
Prerequisites: Junior or senior classification and approval of department head.

SCEN - College of Science (SCEN)

SCEN 201 Self-Directed Experiences with Adolescents
Credit 1. 1 Lecture Hour. 3 Lab Hours.
Study of adolescents in diverse school and community settings; issues in physical, mental, social and emotional development; issues related to racism, sexism, and cultural diversity; development, presentation, and defense of portfolio required. Attendance at all seminars and scheduled observations required.
Prerequisite: Major in mathematics, biology, chemistry or physics, or approval of instructor.

SCEN 289 Special Topics in...
Credits 1 to 3. 1 to 3 Lecture Hours. 0 to 3 Lab Hours.
Special Topics in... Selected topics in an identified area of science. May be repeated for credit.
Prerequisites: Freshman or sophomore classification and approval of instructor.

SCEN 292 Cooperative Education in Science
Credits 2. 20 Other Hours.
Credit 0 or 2. Educational work assignment by a student in the field of his or her career interest and course of study. Supervision of the student will be by the cooperating employer and the instructor. A technical report, approved by the instructor, on a related subject area will be required.
Prerequisite: Approval of the college coordinator of cooperative education.

SCEN 301 College of Science Study Abroad
Credits 0 to 18. 0 to 18 Other Hours.
For student in approved programs abroad. May be repeated for credit.
Prerequisites: Admission to approved program and approval of academic dean.

SCEN 392 Cooperative Education in Science
Credits 2. 20 Other Hours.
Credit 0 or 2. Educational work assignment by a student in the field of his or her career interest and course of study. Supervision of the student will be by the cooperating employer and the instructor. A technical report, approved by the instructor, on a related subject area will be required.
Prerequisite: Approval of the college coordinator of cooperative education.

SCEN 489 Special Topics in...
Credits 1 to 4. 0 to 4 Lecture Hours. 0 to 8 Lab Hours.
Special Topics in... Selected topics in an identified area of science. May be repeated for credit.
Prerequisites: Selected topics in an identified area of science. May be repeated for credit.

SCEN 492 Cooperative Education in Science
Credits 2. 20 Other Hours.
Credit 0 or 2. Educational work assignment by a student in the field of his or her career interest and course of study. Supervision of the student will be by the cooperating employer and the instructor. A technical report, approved by the instructor, on a related subject area will be required.
Prerequisite: Approval of the college coordinator of cooperative education.
SCMT 300/ISYS 300 Business Communications I  
Credit 1. 1 Lecture Hour.  
Proper techniques for writing major-specific business communications;  
progress report, memorandum, letter, executive summary; verbal  
communications via phone call and person-to-person communications;  
critiques of personal and peer writing.  
Prerequisites: Junior or senior classification; SCMT majors only.  
Cross Listing: ISYS 300/SCMT 300.

SCMT 303 Statistical Methods  
Credits 3. 3 Lecture Hours.  
Collection, tabulation and presentation of numerical data; sampling,  
estimation of averages and variation, probability and error, hypothesis  
testing and correlation.  
Prerequisite: Admission to upper division in Mays Business School.

SCMT 305 Intermediate Business Statistics  
Credits 3. 3 Lecture Hours.  
Selected topics in statistical analysis; practical applications to functional  
problems in accounting, finance, marketing and management; applications  
of existing computer programs minimize computations.  
Prerequisite: SCMT 303 or STAT 301, STAT 302, or STAT 303.

SCMT 309 Supply Chain Management Principles  
Credits 3. 3 Lecture Hours.  
Integrated management of the make, buy and delivery processes in firms;  
emphasis on issues specific to the procurement, manufacturing, and  
logistics disciplines; requirements for operating in a global marketplace;  
includes cultural, functional and strategic aspects of global business.  
Prerequisite: ISYS 209; junior classification; University Studies Business  
Concentration students only.

SCMT 335 Sourcing and Procurement  
Credits 3. 3 Lecture Hours.  
Processes to identify and manage suppliers for goods and services to  
support operations; including sourcing, contracting, negotiations, buying  
procedures, cost and price analysis, vendor relations, auditing and  
inspection, supplier relations, and applications to information technology  
systems.  
Prerequisite: SCMT 364 with a grade of C or better; SCMT 340 and  
SCMT 361; or approval of instructor.

SCMT 336 Decision Support Systems  
Credits 3. 3 Lecture Hours.  
Application of quantitative decision-making techniques to management  
decision problems; focus on model development, solution and  
implementation of results.  
Prerequisites: SCMT 364; junior or senior classification.

SCMT 340 Global Supply Chain Management  
Credits 3. 3 Lecture Hours.  
Extend knowledge of basic concepts of transportation and logistics to  
specialized situations in international business in order to understand (a)  
the international trade and commercial environment, (b) exporting and  
importing documentation and procedures and (c) operations involving  
international shipping and transportation.  
Prerequisite: SCMT 364 with a grade of C or better.

SCMT 345 Business Process Design  
Credits 3. 3 Lecture Hours.  
Design, implementation and improvement of the processes by which a  
firm sources, makes, and delivers products and services to meet customer  
requirements; includes six-sigma, process flow charting, computer  
simulation, and other techniques to document, analyze, design and  
 improve business processes.  
Prerequisite: SCMT 364 with a grade of C or better; SCMT 340 and  
SCMT 361; or approval of instructor.

SCMT 361 Operations Planning and Control  
Credits 3. 3 Lecture Hours.  
Planning and controlling the conversion of materials, labor, capital, and  
information into goods and services for both manufacturing and service  
organizations; emphasis on managerial and technical aspects of planning  
and controlling operating systems.  
Prerequisite: SCMT 364 with a grade of C or better; or approval of  
instructor.

SCMT 364 Operations Management  
Credits 3. 3 Lecture Hours.  
Concepts, issues and techniques used to plan, analyze, and control  
systems of production; operational problems in producing goods and  
services.  
Prerequisite: SCMT 303 or STAT 301, STAT 302, or STAT 303;  
concurrent enrollment; admission to upper division in Mays Business  
School.

SCMT 370/ISYS 370 Introduction to Energy Industry  
Credits 3. 3 Lecture Hours.  
History of the modern Oil & Gas Industry; ecosystem of companies driving  
the industry; operations involved in exploration, production, refining,  
trading, pipeline, and retail in bringing oil to market; accounting and  
economics of the industry; issues and solutions in supporting supply chain;  
discussion of technology innovations occurring in the industry.  
Prerequisite: Admission to upper division in Mays Business School.  
Cross Listing: ISYS 370/SCMT 370.

SCMT 375 Supply Chain Security  
Credits 3. 3 Lecture Hours.  
Security of global supply chains; selection of appropriate technologies  
utilized in securing global supply chains; planning responses to disaster  
events in relation to the delivery and receipt of goods and services;  
designing draft security policies for an organization’s supply chain.  
Prerequisite: SCMT 364.

SCMT 380 Lean Business Systems  
Credits 3. 3 Lecture Hours.  
Analysis of real world business challenges using an operational framework  
to identify and solve problems; provides a route map to sustain results;  
exploration of lean strategies such as root cause analysis, batch to pull  
processes, value stream mapping, level loading, line balancing.  
Prerequisite: Admission to upper division in Mays Business School.

SCMT 381 Lean Business Tools and Techniques  
Credits 3. 3 Lecture Hours.  
In-depth and hands-on look into specific Lean tools used to solve specific  
tactical problems; standard work strategies, time studies, waste simulation,  
PFEPs, productive maintenance, visual daily management systems, and  
Kaizen events.  
Prerequisite: Admission to upper-division in Mays Business School.
SCMT 400/ISYS 400 Business Communication II  
Credit 1. 1 Lecture Hour.  
Development of critical interpersonal and oral communication skills; strategies for positive team development; conflict resolution; oral presentations and information elicitation; production of effective visual aids.  
Prerequisites: Junior or senior classification; SCMT majors only.  
Cross Listing: ISYS 400/SCMT 400.

SCMT 464 Advanced Supply Chain Management  
Credits 3. 3 Lecture Hours.  
Advanced contemporary topics in supply chain and operations management; developing analytical insights into the operation of selected methodologies.  
Prerequisites: SCMT 340 and senior classification.

SCMT 465 Information Technology for Supply Chain Management  
Credits 3. 3 Lecture Hours.  
Overview of information technology applications for planning and controlling the design, manufacture and distribution of goods and services; managerial and technical aspects of information technology for product design, shop floor, factory, enterprise and supply chain management.  
Prerequisite: SCMT 340 with a grade of C or better; SCMT 361; or approval of instructor.

SCMT 468 Enterprise Resource Planning  
Credits 3. 3 Lecture Hours.  
Application of advanced information technology for integrating business functions through distributed databases; applications for planning, scheduling, purchasing and costing to multiple layers of the organization.  
Prerequisite: SCMT 364.

SCMT 484 Supply Chain Management Internship  
Credits 1 to 4. 1 to 4 Other Hours.  
A directed internship in an organization to provide students with a learning experience supervised by professionals in organizational settings appropriate to the student's professional objectives. Must be taken on a satisfactory/unsatisfactory basis.  
Prerequisite: SCMT major and approval of academic advisor and instructor.

SCMT 485 Directed Studies  
Credits 1 to 4. 1 to 4 Other Hours.  
Directed study of selected problems in an area of supply chain management not covered in other courses.  
Prerequisites: Admission to upper division in Mays Business School and approval of academic advisor and instructor.

SCMT 489 Special Topics In...  
Credits 1 to 4. 1 to 4 Other Hours.  
Selected topic in an identified field of supply chain management two times for credit.  
Prerequisites: Admission to upper division in Mays Business School and approval of academic advisor and instructor.

SCSC - Soil and Crop Sciences (SCSC)

SCSC 105 World Food and Fiber Crops  
Credits 3. 2 Lecture Hours. 2 Lab Hours.  
(AGRI 1307, 1407) World Food and Fiber Crops. Plant relationships, structure and development; environmental factors affecting plants; technological aspects of agricultural practices; food production for an increasing population.
SCSC 309 Water in Soils and Plants
Credits 4. 3 Lecture Hours. 2 Lab Hours.
Fundamentals of plant water use, and water movement and storage in soils; evapotranspiration, plant water requirements and irrigation scheduling; issues impacting irrigation and water quality; techniques for measuring soil and plant water relations.
Prerequisite: Junior or senior classification, or approval of instructor.

SCSC 310 Soil Morphology and Interpretations
Credits 2. 1 Lecture Hour. 3 Lab Hours.
Field study of morphological features of soil profiles and the morphological characterization of important soils of Texas in relation to soil use and management.
Prerequisite: SCSC 301 or registration therein.

SCSC 311 Principles of Crop Production
Credits 3. 3 Lecture Hours.
Review of plant physiology and crop adaptation to mesoclimates; crop management factors of planting, pest control, plant nutrition, irrigation, GIS, and harvesting techniques; special units on organic farming, conservation agriculture, farming in low-rainfall climates, and bioenergy crops; influence of markets, government policies, and the global economy on cropping strategies.
Prerequisites: SCSC 307, junior or senior classification, or approval of instructor.

SCSC 312 Professional Development in Turfgrass
Credit 1. 1 Lab Hour.
Includes but not limited to fertilizer, pesticide, irrigation calculations; turfgrass, insect and weed identification and management, soils and rootzone construction; irrigation system operation and auditing; sprayer and spreader operation and calibration; builds upon and allows application of information obtained in SCSC 302; designed to better prepare those intending to compete in the GCSAA and STMA Collegiate Turf Bowl competitions.
Prerequisite: SCSC 302 or registration therein.

SCSC 330 Social and Ethical Aspects of International Cropping Systems
Credits 3. 3 Lecture Hours. 0 Lab Hours.
Philosophical basis of ethical decisions; includes slavery, war, population growth, migration, farm workers, chemical inputs, genetically modified organisms, soil and water conservation and protection of wild species.
Prerequisite: Junior or senior classification.

SCSC 401/FIVS 401 Forensic Soil Science
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Examination of soils biology, chemistry and physical attributes to solve crimes; soil and geologic characteristics associated with crime scene examination; physical, biological and chemical characteristics and use of trace evidence.
Prerequisite: Junior or senior classification or approval of instructor.
Cross Listing: FIVS 401/SCSC 401.

SCSC 402 Crop Stress Management
Credits 4. 3 Lecture Hours. 2 Lab Hours.
Identification, measurement, biology, physiology and management of crop stress; limitations of specific environments to crop productivity; morphological and physiological crop stress response mechanisms.
Prerequisites: SCSC 307, junior or senior classification, or approval of instructor.

SCSC 405 Soil and Water Microbiology
Credits 4. 3 Lecture Hours. 2 Lab Hours.
Roles of soil and water microorganisms in the sustainability and productivity of various ecosystems with specific emphasis on plant-microbial interactions, nutrient cycling, degradation of pesticides and other xenobiotics, generation of trace gases, and soil and water quality; hands-on laboratory experience with current techniques in soil and water microbiology.
Prerequisites: Junior or senior classification, or approval of instructor.

SCSC 410 International Agricultural Systems
Credits 3. 3 Lecture Hours.
Contrast modern agriculture systems with those in developing countries; emphasis on natural resources and technologies interacting with economic and social development on a global scale.
Prerequisite: Junior or senior classification, or approval of instructor.

SCSC 420 Brazilian Agriculture and Food Production Systems
Credits 3 to 6. 3 to 6 Lecture Hours.
Comparison and study of Brazilian and U.S. agriculture and culture related to soil, water, and forest conservation and management in Brazil; tour and learn about Amazon River, rain forest, Brasilia, farm, ranch, and floral production systems, agricultural cooperatives and research, sugar and alcohol production, phosphate mining and production; visit points of interest.
Prerequisite: Junior or senior classification or approval of instructor.

SCSC 421 International Agricultural Research Centers - Mexico
Credits 3. 3 Lecture Hours.
International agricultural research; CIMMYT interaction; modern and underdeveloped tropical agricultural systems; introduction to Mexican culture; critical evaluation of complex and international agricultural issues and research programs.
Prerequisites: Junior or senior classification and approval of instructor.

SCSC 422 Soil Fertility and Plant Nutrient Management
Credits 3. 3 Lecture Hours.
Chemical and biological reactions in soils that influence nutrient availability to plants; environmental aspects associated with nutrient availability and fertilization, especially for nitrogen (N) and phosphorus (P).
Prerequisites: SCSC 301, junior or senior classification, or approval of instructor.

SCSC 423 Natural Resources and Agricultural Sustainability in UK
Credits 3. 3 Lecture Hours.
Environmental impacts and sustainability of United Kingdom and U.S. agriculture compared; soil, water, crop, and environmental management; conservation of watersheds; production of hydropower; sustainable use of water resources; cultural immersion.
Prerequisites: Junior or senior classification and approval of instructor.

SCSC 427 Sports Field Construction
Credits 4. 3 Lecture Hours. 3 Lab Hours.
Development of knowledge, skills, and experiences for the design and construction of a turfgrass-based sports field; case studies and visits to model fields, guest lectures from sports field owners, designers, and construction company managers; hands-on construction of a small-scale sand-based sports field.
Prerequisites: SCSC 309, junior or senior classification, or approval of instructor.
SCSC 428 Advanced Turf Ecology and Physiology  
Credits 3. 3 Lecture Hours.  
Examination of how environmental stresses, genetics, and cultural management practices influence the growth, development, and physiology of turfgrasses; exploration of how turf communities function within urban landscapes; introduction to environmental, social, and political issues encountered when managing these areas.  

SCSC 429 Turf Management Systems  
Credits 4. 3 Lecture Hours. 2 Lab Hours.  
Development of turf management plans for large turfgrass sites including parks, golf courses and sports facilities; use of case studies to critically analyze turf management programs.  
Prerequisite: SCSC 428.  

SCSC 430 Turfgrass Maintenance  
Credits 4. 3 Lecture Hours. 2 Lab Hours.  
Activities in a day-to-day turfgrass maintenance operation; decision-making in culture, equipment, irrigation systems, budgets, records and labor management. Laboratory includes principles and actual mechanical procedures involved in maintaining turfgrass.  
Prerequisite: SCSC 428 or approval of instructor.*  

SCSC 432 Soil Fertility and Plant Nutrient Management Laboratory  
Credit 1. 3 Lab Hours.  
Methods used in soil testing, fertilizer recommendations, chemical and physical properties of soils, and determination of specific characteristics of a collected and analyzed soil sample.  
Prerequisites: SCSC 301; SCSC 422 or registration therein, junior or senior classification, or approval of instructor.*  

SCSC 441 Crop Production Systems  
Credits 3. 3 Lecture Hours.  
Integration of crop production and management concepts through a systems approach; application of concepts using case studies and team projects.  
Prerequisite: Senior classification or approval of instructor.  

SCSC 444 Forage Ecology and Management  
Credits 3. 3 Lecture Hours.  
Investigation of multidisciplinary approaches toward the development of integrated forage, livestock, and wildlife production systems that are economically feasible and environmentally sustainable.  
Prerequisite: Junior or senior classification or approval of instructor.  

SCSC 446 Weed Management and Ecology  
Credits 4. 3 Lecture Hours. 2 Lab Hours.  
Practical information related to weed management and ecology for various vegetative systems to include turf and agronomic crops; calibration of applicators, herbicide labels, mode of action of herbicides, herbicide-resistant weed management.  
Prerequisites: CHEM 222, SCSC 307, junior or senior classification, or approval of instructor.  

SCSC 452 Chemical Weed Control Laboratory  
Credit 1. 0 Lecture Hours. 2 Lab Hours.  
Important weed problems in Texas; herbicides and equipment used for herbicidal application.  
Prerequisite: SCSC 450 or registration therein.*  

SCSC 455 Environmental Soil and Water Science  
Credits 3. 3 Lecture Hours.  
Discussion of physical, chemical, and biological properties of soil and water and the impact on productivity and sustainability of various ecosystems; application of the knowledge of properties and soil processes to develop and evaluate strategies for protecting and/or improving soil and water quality.  
Prerequisite: SCSC 301 or approval of instructor.  

SCSC 458 Watershed and Water Quality Management  
Credits 3. 3 Lecture Hours.  
Land use impact on surface and ground water chemistry; legislation impacting water quality; surface and groundwater impairment and restoration.  
Prerequisite: CHEM 101 or equivalent or approval of instructor; junior or senior classification.  

SCSC 481 Senior Seminar  
Credits 2. 2 Lecture Hours.  
Capstone course bringing together student experiences, exams, and exercises necessary for completing and assessing curriculum program learning outcomes.  
Prerequisite: Senior classification.  

SCSC 484 Internship  
Credits 1 to 3. 1 to 3 Lecture Hours.  
Practical on-the-job experience in the student's area of specialization.  
Prerequisites: Junior or senior classification; approval of instructor; 2.0 or better GPR in major and overall.  

SCSC 485 Directed Studies  
Credits 1 to 4. 1 to 4 Lecture Hours.  
Credit 1 to 4 each semester. For advanced undergraduates to permit field or laboratory investigation or study of subject matter not included in established courses.  
Prerequisite: 10 hours of junior and senior agronomy or approval of instructor.  

SCSC 489 Special Topics in...  
Credits 1 to 4. 1 to 4 Lecture Hours. 0 to 4 Lab Hours.  
Selected topics in an identified area of agronomy. May be repeated for credit.  
Prerequisite: Approval of department head.*  

SCSC 491 Research  
Credits 1 to 3. 1 to 3 Lecture Hours.  
Research conducted under the direction of faculty member in agronomy. May be repeated 2 times for credit. Registration in multiple sections of this course are possible within a given semester provided that the per semester credit hour limit is not exceeded.  
Prerequisites: Junior or senior classification and approval of instructor.  

SEFB - Special Ed Field Based (SEFB)  

SEFB 420 Education and Employment Issues in Secondary Special Education  
Credits 3. 2 Lecture Hours. 3 Other Hours.  
Field-based course involving psychological, social, physical and cognitive development of secondary-age students; career assessment; programmatic options within educational and employment settings; transition models from school to adult settings.  
Prerequisites: Admission to professional phase of program.
SEFB 425 Student Teaching in Special Education
Credits 6. 24 Other Hours.
(0-24) Observation and participation in an accredited special education classroom; techniques of teaching special education and appropriate instructional strategies for students with exceptionalities. Must be taken on a satisfactory/unsatisfactory basis.
Prerequisites: Admission to professional phase of program and to student teaching.

SENB 430 Practicum in Applied Behavior Analysis
Credits 3. 9 Other Hours.
University-supervised experience related to specializations in special education and behavior analysis. May be taken 8 times for credit.
Prerequisites: Junior or senior classification; approval of instructor; approval of department head.

SENG 310 Industrial Hygiene Engineering
Credits 3. 3 Lecture Hours.
Applications of scientific and engineering principles to process safety and hazards analysis, mitigation, and prevention, with special emphasis on the chemical process industries; includes source modeling for leakage rates, dispersion analysis, relief valve sizing, fire and explosion damage analysis, hazards identification, risk analysis, accident investigations.
Prerequisite: Senior classification in any engineering major.
Cross Listing: CHEN 430/SENG 430.

SENG 312 System Safety Engineering
Credits 3. 3 Lecture Hours.
Applications of system safety analytical techniques to the design process; emphasis on the management of a system safety or product safety program; relationship with other disciplines such as reliability, maintainability, human factors and product liability applications.
Prerequisite: Junior classification.

SENG 321 Industrial Safety Engineering
Credits 3. 3 Lecture Hours.
Concepts of designing, operating and maintaining optimally safe systems; risk management, economic impact, legislation, performance measurement and accident investigation/analysis; principles and practices in industrial hygiene engineering, fire protection engineering and introduction to systems safety engineering.
Prerequisite: Junior classification.

SENG 422 Fire Protection Engineering - Facilities Design
Credits 3. 3 Lecture Hours.
Design of facilities from a fire protection engineering viewpoint including fire detection and fire control systems; materials, equipment, exposures, occupancies and processes; both public and industrial occupancies studied to determine fire protection design specifications.
Prerequisite: SENG 322 or approval of instructor.

SENG 430/CHEN 430 Risk Analysis in Safety Engineering
Credits 3. 3 Lecture Hours.
Concepts of risk and risk assessment, which uses all available information to provide a foundation for risk-informed and cost-effective engineering practices; examples and exercises are drawn from a variety of engineering areas.
Prerequisite: Junior or senior classification.
Cross Listing: CHEN 430/SENG 430.

SENG 455/CHEN 455 Process Safety Engineering
Credits 3. 3 Lecture Hours.
Applications of engineering principles to process safety and hazards analysis, mitigation, and prevention, with special emphasis on the chemical process industries; includes source modeling for leakage rates, dispersion analysis, relief valve sizing, fire and explosion damage analysis, hazards identification, risk analysis, accident investigations.
Prerequisite: Senior classification in any engineering major.
Cross Listing: CHEN 455/SENG 455.

SENG 460/CHEN 460 Quantitative Risk Analysis in Safety Engineering
Credits 3. 3 Lecture Hours.
Fundamental concepts, techniques, and applications of risk analysis and risk-informed decision making for engineering students; practical uses of probabilistic methods are demonstrated in exercises and case studies from diverse engineering areas.
Prerequisite: Senior or graduate classification.
Cross Listing: CHEN 460/SENG 460.

SENG 477 Air Pollution Engineering
Credits 3. 3 Lecture Hours.
Design of air pollution abatement equipment and systems to include cyclones, bag filters and scrubbers; air pollution regulations; permitting; dispersion modeling; National Ambient Air Quality Standards.
Prerequisite: ENGR 214 or equivalent.
Cross Listing: BAEN 477 and MEEN 477.

SENG 485 Directed Studies
Credits 1 to 4. 1 to 4 Other Hours.
Permits students to develop special projects in industrial hygiene engineering, safety engineering or fire protection engineering. Project must be approved by department head.
SOCI 203 U.S.-Mexico Border
Credits 3. 3 Lecture Hours.
Understanding of the U.S.-Mexico border from different theoretical perspectives, including structural violence, identity, power and demography.

SOCI 205 Introduction to Sociology
Credits 3. 3 Lecture Hours.
(SOCI 1301) Introduction to Sociology. Sociological perspectives including concepts and methods; social class and social status, the family, minorities, crime, religion, power, urbanization and population.

SOCI 206 Global Social Trends
Credits 3. 3 Lecture Hours.
Long-term trends in world societies from ancient times to the present and to the foreseeable future; emphasis on contemporary international issues and problems, techniques of analysis and future projections.

SOCI 207/WGST 207 Introduction to Gender and Society
Credits 3. 3 Lecture Hours.
Similarities and differences between females and males in a number of cultures throughout the world; sociological analysis of gender in relation to social structure.
Cross Listing: WGST 207/SOCI 207.

SOCI 208 Introduction to Aging and Society
Credits 3. 3 Lecture Hours.
Introduction to a multidisciplinary approach to the social study of aging; separating facts from stereotypes about aging, examining basic sociological, psychological, and physiological factors affecting the aging process, and exploring institutions and careers related to aging.

SOCI 210 Sociology of Technology and Science
Credits 3. 3 Lecture Hours.
Examination of technology and science from a variety of theoretical perspectives; process by which engineered products are influenced by social factors as well as how they in turn, impact society; exploration and critique of classic and contemporary theories of technological development.

SOCI 211 Sociology of Deviance
Credits 3. 3 Lecture Hours.
Perspectives on non-normative behavior; theories of deviance.

SOCI 212 Sociology of Popular Culture
Credits 3. 3 Lecture Hours.
Examination of the classic and contemporary social scientific definitions and theories of culture, and popular versus “high” or elite culture(s), various forms and arenas of popular culture, such as television, film, and music, institutions and popular culture, identity (race, class, gender and sexuality) and popular culture.

SOCI 217 Introduction to Race and Ethnicity
Credits 3. 3 Lecture Hours.
Introduction to the sociological examination of race and ethnicity in U.S. society; overview of theories and methods in the study of race and ethnicity, an understanding of how they function as individual and group-level identities, and organizing principles in social institutions.

SOCI 220 Methods of Social Research
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Relationships between sociological theory, research, qualitative evaluation of data; construction and use of analytical procedures and research techniques, and participant observation.

SOCI 229 Qualitative Methods
Credits 3. 3 Lecture Hours.
Methodologies in social research with emphasis on qualitative dimensions of inquiry; topics include in-depth interviewing, observation, unobtrusive measures, analysis of documents, fieldwork issues, ethics, note-taking, preliminary data analysis, and an overview of writing research reports based on qualitative research.

SOCI 230 Classical Sociological Theory
Credits 3. 3 Lecture Hours.
Role of theory in sociological study; the development of classical theoretical perspectives providing the foundation for contemporary theory.

SOCI 285 Directed Studies
Credits 0 to 3. 0 to 3 Other Hours.
Course depends upon needs and interest of the student and upon the number of credit hours.
Prerequisite: Sophomore classification in sociology.

SOCI 289 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours. 0 to 4 Lab Hours.
Selected topics in an identified area of sociology. May be repeated for credit.
Prerequisite: Approval of instructor.

SOCI 291 Research
Credits 0 to 3. 0 to 3 Other Hours.
Research conducted under the direction of a chosen faculty member in sociology. May be taken for a maximum of three hours total credit.
Prerequisites: Freshman or sophomore classification and approval of instructor.

SOCI 302 Women and Religion
Credits 3. 3 Lecture Hours.
Investigation of women's position in religious institutions historically and/or currently, religion's influence on women's roles and status, and women's attempts to define their own religious perspectives; draws on sociological and philosophical insights and methods.
Prerequisite: Junior or senior classification or approval of instructor.

SOCI 304 Criminology
Credits 3. 3 Lecture Hours.
Criminal law and crime rates; explanations of criminal behavior; criminal careers, police, adult courts and prisons.
Prerequisite: Junior classification.

SOCI 306/ASIA 306 Society and Population of Modern China
Credits 3. 3 Lecture Hours.
Major trends and current topics in social and demographic aspects of the society of modern China, including Taiwan.
Prerequisite: Junior or senior classification.
Cross Listing: ASIA 306/SOCI 306.
SOCI 308 Community Issues in Aging
Credits 3.3 Lecture Hours.
Detailed exploration of social forces impacting the elderly and their families at the community level; the impact of demographic, cultural, organizational and social factors on a community's response to an increasingly aging population; and the application of this knowledge through volunteer collaboration with a community nonprofit organization serving the elderly. 
Prerequisite: Junior or senior classification or approval of instructor.

SOCI 310/WGST 310 Motherhood in Society
Credits 3.3 Lecture Hours.
Examines expectations and/or practices relating to motherhood, with consideration of their cultural impact; taught from a social science perspective.
Prerequisites: Junior or senior classification or approval of instructor.
Cross Listing: WGST 310/SOCI 310.

SOCI 311 Social Change
Credits 3.3 Lecture Hours.
Survey of major changes in American and Western society, the forces underlying change and tensions caused by social change.
Prerequisite: Junior or senior classification or approval of instructor.

SOCI 312 Population and Society
Credits 3.3 Lecture Hours.
The causes and implications of major population trends.

SOCI 313 Military, War and Society
Credits 3.3 Lecture Hours.
Major trends and current topics in military organization; the experience and conduct of war; civil-military relations.

SOCI 314 Social Problems
Credits 3.3 Lecture Hours.
Survey and exploration of causes and consequences of major social problems in American society such as poverty, unemployment, energy, alcohol, other drugs and sexual abuse.

SOCI 315/WGST 315 The Marriage Institution
Credits 3.3 Lecture Hours.
Courtship, engagement, marriage, family formation, personal adjustment, conflict, financing and child rearing.
Cross Listing: WGST 315/SOCI 315.

SOCI 316/WGST 316 Sociology of Gender
Credits 3.3 Lecture Hours.
Sociological explanations of status differences between men and women; cross-cultural comparisons; gender role socialization, cultural stereotypes, discrimination; gender roles and status in the family, economy, religion, science, other social institutions; deviance, victimization and gender; recent social changes.
Cross Listing: WGST 316/SOCI 316.

SOCI 317/AFST 317 Racial and Ethnic Relations
Credits 3.3 Lecture Hours.
Status of racial and ethnic groups such as Native Americans, African Americans, Latino Americans, Asian Americans, European Americans, and other groups in the political, economic, legal and social systems of the United States.
Cross Listing: AFST 317/SOCI 317.

SOCI 319/SPMT 319 Sociology of Sport
Credits 3.3 Lecture Hours.
Social institution of sport and its consequences for American society social organization from play to professional sport; violence, discrimination, women in sport; socialization implications from participation in sports.
Cross Listing: SPMT 319/SOCI 319.

SOCI 320 Demographic Methods
Credits 3.3 Lecture Hours.
Procedures and techniques of demographic analysis; examination of demographic data; calculation of rates; construction of life tables; population estimates and projections. 
Prerequisite: Junior or senior classification or approval of instructor.

SOCI 322 Industrial Sociology
Credits 3.3 Lecture Hours.
Work relations in jobs; social relations of groups and occupations and the social organization of small work groups, bureaucracies and modern large corporations.

SOCI 323/AFST 323 Sociology of African Americans
Credits 3.3 Lecture Hours.
Major elements of the Afro-American subculture in relation to white American society and its major social institutions. 
Prerequisite: SOCI 205. 
Cross Listing: AFST 323/SOCI 323.

SOCI 325/ASIA 325 International Business Behavior
Credits 3.3 Lecture Hours.
Theoretical models and practical protocols/behavior demands to conduct business and to work in France, Germany, Japan, China, Mexico and other countries; discussion of national character, managerial and negotiating styles.
Cross Listing: ASIA 325/SOCI 325.

SOCI 326/RELS 326 Sociology of Religion
Credits 3.3 Lecture Hours.
Institution of religion and religious-related behavior; relationship between dynamic and structural religion and contemporary society.
Prerequisite: SOCI 205.
Cross Listing: RELS 326/SOCI 326.

SOCI 327 Morality and Society
Credits 3.3 Lecture Hours.
Examination of how moral beliefs arise, how they change, how the moral order is maintained, and how that order affects the social structure; use of case-study method.

SOCI 328 Environmental Sociology
Credits 3.3 Lecture Hours.
A comprehensive overview of environmental sociology, including major sociological theories, concepts and policy issues affecting our understanding of environmental changes; emphasizes social factors that impact environmental quality.
Prerequisite: SOCI 205 or approval of instructor.

SOCI 329/ASIA 329 Pacific Rim Business Behavior
Credits 3.3 Lecture Hours.
Theoretical models of Asian cultures and practical protocol/etiquette related to business and work in China, Thailand, South Korea, Japan, Australia, and other Pacific Rim nations; discussions of national character, managerial behavior and values.
Cross Listing: ASIA 329/SOCI 329.

SOCI 330 Sociology of Nutrition
Credits 3.3 Lecture Hours.
Social factors affecting the kind and amount of food consumed around the world; social consequences of nutritional status for family functioning and for international development.
SOCI 332/WGST 332 Alternative Genders
Credits 3.3 Lecture Hours.
Examination of theories and case studies involving alternative genders and sexualities, studies in their cultural contexts and including the role of factors such as race, class, ethnicity, age, and physical characteristics.
Prerequisites: 3 credits in SOCI or WGST; junior or senior classification.
Cross Listing: WSOC 332/SOCI 332.

SOCI 335 Sociology of Organizations
Credits 3.3 Lecture Hours.
How people act in organizations; structures in organizations; the relationship between organizations and their environments.

SOCI 337 International Migration
Credits 3.3 Lecture Hours.
Survey of theories and trends in international migration.
Prerequisite: Junior or senior classification, or approval of instructor.

SOCI 338 Latino Immigration
Credits 3.3 Lecture Hours.
Theoretical and empirical examinations of the causes, processes, and impacts of Latin American immigration to the U.S.; Latino/a immigrant experience in the U.S.; effects of immigration on sending and receiving communities.
Prerequisite: Junior or senior classification or approval of the instructor.

SOCI 402 Sociology of Latin America
Credits 3.3 Lecture Hours.
Latin American society; integration of viewpoints from the humanities, arts and social sciences.
Prerequisite: Junior or senior classification or approval of instructor.

SOCI 403 Sociology of Latinos
Credits 3.3 Lecture Hours.
Exploration of social characteristics and acculturation problems of Mexican Americans in the United States; styles of life and cultural variability, social mobility, the struggle for advancement and identity through social movements.

SOCI 404/RPTS 404 Sociology of the Community
Credits 3.3 Lecture Hours.
Organization of American communities examining the bases of community, types of communities and the changes faced by communities.
Prerequisite: SOCI 205.
Cross Listing: RPTS 404/SOCI 404.

SOCI 408 Death and Dying
Credits 3.3 Lecture Hours.
Exploration of interdisciplinary social issues surrounding death and dying; the interactions among professionals, families, and dying individuals; the development and functioning of death norms and institutions (e.g., hospitals, funeral homes, hospice, capital punishment); the critical analysis of social/cultural inequalities affecting when and how we die.
Prerequisite: Junior or senior classification or approval of instructor.

SOCI 411 Social Psychology
Credits 3.3 Lecture Hours.
Effects of social experience and groups on the development of personality, attitudes, values and behavior.
Prerequisite: 3 hours of sociology or psychology.

SOCI 412 Political Sociology
Credits 3.3 Lecture Hours.
Survey of social bases of power; state formation in advanced industrial societies; origins of welfare state; interrelation of nationalism; culture and class formation.
Prerequisite: Junior or senior classification or approval of instructor.

SOCI 413 Social Movements
Credits 3.3 Lecture Hours.
Survey of social movements; emphasis on social movement participation, emergence and outcomes; analysis of revolutions and movements in the developing world; theory and methods of social movement research.
Prerequisite: Junior or senior classification or approval of instructor.

SOCI 415 Sociology of Education
Credits 3.3 Lecture Hours.
Relationship of social structure and change to education; social background and student performance; teachers and their careers; bureaucracy and change in education.
Prerequisite: SOCI 205.

SOCI 419 Social Class in Contemporary Society
Credits 3.3 Lecture Hours.
Composition and consequences of social class structure; social class explanations for lifestyle patterns, educational and occupational achievements.
Prerequisite: SOCI 205.

SOCI 420 Advanced Methods of Social Research
Credits 3.2 Lecture Hours, 2 Lab Hours.
Philosophy and methods of social research, including research design; methods of observation; questionnaires, interviews and other sources of social data; qualitative and quantitative techniques of inference, analysis and research report writing.
Prerequisite: SOCI 220.

SOCI 423 Globalization and Social Change
Credits 3.3 Lecture Hours.
Examines the effects of globalization on social structure including politics, governments, corporations, work and inequality.
Prerequisite: Junior or senior classification or approval of instructor.

SOCI 424/WGST 424 Women and Work in Society
Credits 3.3 Lecture Hours.
Social context of women’s work; work patterns, labor force participation, occupational destinations and occupational mobility; alternatives to the conventional division of labor by sex in society.
Cross Listing: WSOC 424/SOCI 424.

SOCI 425 Medical Sociology
Credits 3.3 Lecture Hours.
Organization, value systems and practice of medicine and the provision of health care in the U.S.; role of physicians, health occupations and patients; marginal and folk medicine.
Prerequisite: SOCI 205.

SOCI 426 Sociology of Work
Credits 3.3 Lecture Hours.
Overview of classical and contemporary theories of work, changes in labor market structure; contemporary work place organization; occupational stratification by race, class, and gender.
Prerequisite: Junior or senior classification or approval of instructor.

SOCI 430 Contemporary Sociological Theory
Credits 3.3 Lecture Hours.
Basic ideas of contemporary sociological theory: structuralism, functionalism, conflict, symbolic interaction, exchange and their application to current research.
Prerequisite: SOCI 230.

SOCI 445 Sociology of Law
Credits 3.3 Lecture Hours.
Introduction to the sociology of law; the relation of law to general social control and to organizational dynamics.
SOCI 463 Gender in Asia
Credits 3. 3 Lecture Hours.
Gender dynamics in Asia; changes in gender roles; women's movements; women and the economy; women and politics; men's and women's private lives.
Prerequisite: Junior or senior classification or approval of instructor.
Cross Listing: ASIA 463 and WGST 463.

SOCI 478 Professional Development in Sociology I
Credit 1. 1 Lecture Hour.
Career fields available to sociology majors, including the nature of the work, professional expectations, and the credentials for entry in the fields.
Prerequisite: Sociology major; junior or senior classification.

SOCI 479 Professional Development in Sociology II
Credits 2. 2 Lecture Hours.
Preparation for careers in sociology-related professions by in-depth research of prospective career fields, development of oral, written, and media skills, formation of professional networks, and training in professional ethics, cultural diversity, and leadership.
Prerequisite: Sociology major; junior or senior classification.

SOCI 484 Field Practicum
Credits 0 to 4. 0 to 4 Other Hours.
Credit 0 to 4 each semester. Participation in an approved agency. Field experience will be supervised by selected agency personnel and appropriate faculty. Experiences and requirements will vary slightly according to placement and student interests.
Prerequisites: Major in sociology; 12 hours of sociology; approval of undergraduate advisor.

SOCI 485 Directed Studies
Credits 0 to 3. 0 to 3 Other Hours.
Credit 0 to 3 each semester. Special problems not covered by other courses. Course depends upon needs and interest of the student and upon the number of credit hours.
Prerequisite: Senior classification in sociology.

SOCI 489 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Selected topics in an identified area of sociology. May be repeated for credit.
Prerequisite: Approval of instructor.

SOCI 491 Research
Credits 0 to 3. 0 to 3 Other Hours.
Research conducted under the direction of a chosen faculty member in sociology. May be taken four times for credit.
Prerequisites: Junior or senior classification and approval of instructor.

SOMS-Schl of Military Sciences (SOMS)

SOMS 111 Principles of Academic and Personal Development
Credit 1. 1 Lecture Hour.
Identification of personal goals and learning skills promoting academic and career success; development of personal leadership strengths, styles, motivation and values; personal development planning for self-improvement.
Prerequisite: Freshman classification or approval of instructor.

SOMS 180 Survey of Performance Based Training Methods
Credit 1. 1 Lecture Hour.
Introduction to performance oriented training methods and techniques; key concepts and generalizations of training and identification of training needs; study of representative theories of workplace training, performance evaluation, and experiential training techniques.
Prerequisite: Freshman classification or approval of instructor.

SOMS 280 Fundamentals of Peer Leadership
Credit 1. 1 Lecture Hour.
Introduction to theories of peer leadership when applied to a specific context; fundamentals and techniques of small group communication; performance evaluation; survey of basic supervisory skills.
Prerequisite: Sophomore classification or approval of instructor.

SOMS 289 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Selected topics in an identified area of leadership theory and practice. May be repeated for credit.
Prerequisites: Freshman or sophomore classification; approval of instructor.

SOMS 380 Workshop in Leadership Education
Credit 1. 1 Lecture Hour.
The study of leadership theory, intra group relationships, assessment tools for skills development, and techniques for achieving group goals.
Prerequisite: Junior classification or approval of instructor.

SOMS 381 Seminar in Executive Leadership
Credit 1. 1 Lecture Hour.
Continuation of SOMS 380. Fundamentals of small group dynamics; interpersonal communication; application of selected leadership theories; interpretation of individual assessments to include personality traits, values, and signature strengths.
Prerequisites: SOMS 380; junior or senior classification.

SOMS 481 Seminar in Executive Leadership
Credit 1. 1 Lecture Hour.
The study of contemporary leadership issues, organizational effectiveness, problem solving, and decision making.
Prerequisite: Senior classification or approval of instructor.

SOMS 482 Seminar in Executive Leadership II
Credit 1. 1 Lecture Hour.
Continuation of SOMS 481. Discussion of ethical dilemmas in leadership roles; ethical decision-making; personal accountability in organizational settings.
Prerequisite: SOMS 481 or approval of instructor.

SOMS 485 Directed Studies
Credits 1 to 4. 1 to 4 Lecture Hours.
Individual supervision of special readings or assigned projects to promote independent study; program enrichment for capable students; written and oral reports required.
Prerequisite: Approval of instructor.

SOMS 489 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Selected topics in an identified area of leadership theory and practice. May be repeated for credit.
Prerequisites: Junior or senior classification; approval of instructor.
SPAN - Spanish (SPAN)

SPAN 101 Beginning Spanish I
Credits 4.3 Lecture Hours. 2 Lab Hours.
(SPAN 1411, 1511) Beginning Spanish I. Elementary language study with oral, written and reading practice. Preparation for conversation. Part of class preparation will be done in language laboratory and online. Students with prior instruction are required to take the Spanish Placement Test before enrolling for the first time in a college Spanish course.

SPAN 102 Beginning Spanish II
Credits 4.3 Lecture Hours. 2 Lab Hours.
(SPAN 1412, 1512) Beginning Spanish II. Continuation of SPAN 101. Part of class preparation will be done in language laboratory and online.
Prerequisite: SPAN 101 with a grade of C or better. Students with prior instruction in Spanish are required to take the Spanish Placement Test before enrolling for the first time in a college Spanish course.

SPAN 140 Alternate Beginning Spanish
Credits 4.4 Lecture Hours. 1 Lab Hour.
Accelerated review of grammatical structures covered in SPAN 101, followed by study of material covered in SPAN 102.
Prerequisite: Placement by examination or transfer credit for SPAN 101 with a grade of C or better.

SPAN 201 Intermediate Spanish I
Credits 3.3 Lecture Hours.
Prerequisite: SPAN 102 or SPAN 104 with a grade of C or better. Students with prior instruction in Spanish are required to take the Spanish Placement Test before enrolling for the first time in a college Spanish course.

SPAN 202 Intermediate Spanish II
Credits 3.3 Lecture Hours.
(SPAN 2312) Intermediate Spanish II. Continuation of SPAN 201 with more advanced material.
Prerequisite: SPAN 201 with a grade of C or better. Students with prior instruction in Spanish are required to take the Spanish Placement Test before enrolling for the first time in a college Spanish course.

SPAN 203 Intermediate Spanish for Heritage Speakers
Credits 3.3 Lecture Hours.
Study of grammar and continued development of the four skills (writing, reading, speaking, listening) with an emphasis on literacy in a dynamic cultural context centered on Hispanics in the U.S. Conducted in Spanish.
Prerequisites: SPAN 201 with a grade of C or better; students with prior knowledge of Spanish are required to take the Spanish Placement Test before enrolling for the first time in a college Spanish course.

SPAN 208 Spanish for Health Professionals I
Credits 3.3 Lecture Hours.
First half of a two-semester sequence for intermediate level Spanish; for those interested in careers in the health professions; presentation and practice of the most important basic communication functions in patient-provider interaction.
Prerequisite: SPAN 102 or placement by exam.

SPAN 218 Spanish for Health Professionals II
Credits 3.3 Lecture Hours.
Second half of a two-semester course sequence for intermediate level Spanish; for those interested in careers in the health professions; presentation and practice of the most important basic communication functions in patient-provider interaction.
Prerequisite: SPAN 201, SPAN 208, or placement by exam with approval of instructor.

SPAN 221 Field Studies Abroad I
Credits 1 to 6.1 to 6 Lecture Hours.
Spanish language and culture taught in Spanish-speaking country; participation in academic and cultural activities of a host university or study abroad institute/center; written and oral reports and exams in Spanish.
Prerequisite: SPAN 102 with a grade of B or higher.

SPAN 222 Field Studies Abroad II
Credits 1 to 6.1 to 6 Lecture Hours.
Spanish language, culture, cultural history, or literature taught in Spanish in a Spanish-speaking country; participation in academic and cultural activities of a host university or study abroad institute/center; written and oral reports and exams in Spanish.
Prerequisite: SPAN 102 with a grade of B or higher.

SPAN 285 Directed Studies
Credits 0 to 4.0 to 4 Other Hours.
Individual supervision of readings or assigned projects in Spanish, selected for each student individually.
Prerequisite: Approval of instructor and department head.

SPAN 289 Special Topics in...
Credits 1 to 4.1 to 4 Lecture Hours.
Selected topics in an identified area of Spanish. May be repeated for credit.
Prerequisite: Approval of instructor.

SPAN 302 Advanced Grammar
Credits 3.3 Lecture Hours.
Study and practice of Spanish grammar, focusing on grammatical features of particular concern to English speakers. Conducted in Spanish.
Prerequisites: SPAN 202, SPAN 203, SPAN 222 or equivalent.

SPAN 303 Composition and Conversation
Credits 3.3 Lecture Hours.
Development of writing skills in Spanish with emphasis on grammatical constructions; structural analysis of representative texts and their imitation; organization of short compositions and term papers; discussion and conversation over multiple topics; conducted in Spanish.
Prerequisites: SPAN 202, SPAN 203, SPAN 222 or approval of instructor.

SPAN 304 Advanced Grammar for Heritage Speakers
Credits 3.3 Lecture Hours.
A continuation of SPAN 203. Study of grammar and further development of the four skills (writing, reading, speaking, listening) with an emphasis on literacy in a dynamic cultural context centered on Hispanics in the U.S. Conducted in Spanish.
Prerequisites: SPAN 202, SPAN 203, SPAN 222 or equivalent.
SPAN 306 Business Spanish  
Credits 3.3 Lecture Hours.  
Continuation of language skill acquisition with advanced material drawn from business and related fields; study of and practice with Spanish business language in the context of Hispanic economic and business systems; conducted in Spanish.  
Prerequisite: SPAN 202, SPAN 203, SPAN 222 or approval of instructor.

SPAN 307 Spanish for the Sciences  
Credits 3.3 Lecture Hours.  
Development of written and oral scientific communication in Spanish, including listening, speaking, reading and writing, with a focus on general and specialized scientific discourse; field-specific vocabulary and review of structures necessary for academic registers.  
Prerequisites: SPAN 202, SPAN 203, or equivalent.

SPAN 310 Oral Expression  
Credits 3.3 Lecture Hours.  
Development of oral skills in Spanish through pronunciation practice, discussion of current events, skits, interviews, conversations, role play, impromptu debates and public speaking; conducted in Spanish.  
Prerequisite: SPAN 202 or SPAN 203.

SPAN 311 Hispanic Culture and Civilization to the 18th Century  
Credits 3.3 Lecture Hours.  
Survey of the Hispanic world with emphasis on its history and cultural patterns from pre-Roman times to the 18th century; description and analysis of artistic, historical, literary, political topics. Taught in Spanish.  
Prerequisite: SPAN 202, 203, 222 or approval of instructor.

SPAN 312 Hispanic Culture and Civilization: 18th Century to Present  
Credits 3.3 Lecture Hours.  
Overview of the Hispanic world, including the United States, from independence in the Americas to present; description and analysis of artistic, historical, literary, political, sociolinguistic topics. Taught in Spanish.  
Prerequisite: SPAN 202, SPAN 203, SPAN 222 or approval of instructor.

SPAN 318 Oral Communication for Health Professionals  
Credits 3.3 Lecture Hours.  
Development of advanced oral communication skills in Spanish within the context of the medical professions through discussion and study of health related and cultural issues relating specifically to the Latino/Hispanic community. Field trips, service learning, volunteering, interviews, impromptu speaking and formal presentations may be required.  
Prerequisite: Junior or senior classification or approval of instructor with placement exam, or SPAN 202 or SPAN 218.

SPAN 320 Introduction to Hispanic Literature  
Credits 3.3 Lecture Hours.  
Readings in Spanish poetry and prose with emphasis on methods of analysis for imagery, prosody, rhetorical figures, thematic composition and narrative structure; application of those techniques in oral and written reports; required for modern languages majors in Spanish; conducted in Spanish.  
Prerequisite: SPAN 202 or SPAN 203 or approval of instructor.

SPAN 331 Spanish Literature to 1700  
Credits 3.3 Lecture Hours.  
Origins and evolution of Spanish literature from the Medieval to the Golden Age traditions; epic, drama, novel, picaresque and satire as reflected in works by Berceo, Cervantes, Garcilaso de la Vega, Lope de Vega, Calderón de la Barca and others; conducted in Spanish.  
Prerequisites: SPAN 202, SPAN 203, SPAN 222 or approval of instructor.

SPAN 332 Spanish Literature from 1700 to 1936  
Credits 3.3 Lecture Hours.  
Representative works of Spanish Neoclassicism, Romanticism, realism, naturalism, modernism, and Avant-Garde movements; overview of historical background, cultural and philosophical tendencies; socio-political movements in modern Spain until the Civil War; conducted in Spanish.  
Prerequisites: SPAN 202, SPAN 203, SPAN 222 or approval of instructor.

SPAN 341 Spanish-American Literature from 1492 to 1821  
Credits 3.3 Lecture Hours.  
Theories, styles and authors from the meeting of Old and New Worlds through the final days of the Colony; overview of cultural and historical background; conducted in Spanish.  
Prerequisites: SPAN 202, SPAN 203, SPAN 222 or approval of instructor.

SPAN 342 Spanish-American Literature from 1821 to 1935  
Credits 3.3 Lecture Hours.  
Theories, styles and authors from Independence to Modernity; overview of cultural and historical background; conducted in Spanish.  
Prerequisites: SPAN 202, SPAN 203, SPAN 222 or approval of instructor.

SPAN 350 Phonetics  
Credits 3.3 Lecture Hours.  
Sound system of Spanish with special reference to pronunciation and contrast with sounds of American English; development and description of phonology of principal dialects of American and Peninsular Spanish. Especially for native speakers of English, future teachers of Spanish and bilingual education majors; conducted in Spanish.  
Prerequisite: SPAN 202, SPAN 203, SPAN 222 or equivalent.

SPAN 352 Hispanic Linguistics  
Credits 3.3 Lecture Hours.  
Study of Hispanic linguistics, including phonetics and phonology, morphology, syntax, change and variation.  
Prerequisite: SPAN 202, SPAN 203, SPAN 222 or approval of instructor.

SPAN 358 Spanish for the Sciences  
Credits 3.3 Lecture Hours.  
Continuation of language skill acquisition with advanced material drawn from business and related fields; study of and practice with Spanish business language in the context of Hispanic economic and business systems; conducted in Spanish.  
Prerequisite: SPAN 202, SPAN 203, SPAN 222 or approval of instructor.

SPAN 359 Spanish-American Literature from 1821 to 1935  
Credits 3.3 Lecture Hours.  
Theories, styles and authors from Independence to Modernity; overview of cultural and historical background; conducted in Spanish.  
Prerequisites: SPAN 202, SPAN 203, SPAN 222 or approval of instructor.

SPAN 360 Spanish-English Translation  
Credits 3.3 Lecture Hours.  
Translations of works from Spanish into English with emphasis on translation into the first language. Taught in Spanish.  
Prerequisite: SPAN 202 or 203 or approval of instructor.

SPAN 403 Advanced Writing in Spanish  
Credits 3.3 Lecture Hours.  
Building on established skills, practice in and reflection on writing in professional, public, academic, and literary genres; evaluation of a variety of models and development of abilities in audience analysis, critical research, review and revision. Taught in Spanish.  
Prerequisites: Junior or senior classification and SPAN 303, or approval of instructor.

SPAN 407 Spanish-English Translation  
Credits 3.3 Lecture Hours.  
Foundations of translation methodology, strategies and practice; rendering of literary and non-literary texts; ethics of translation; emphasis on translation into the first language.  
Prerequisite: 6 credits of upper division SPAN with a grade of B or better or approval of instructor.

SPAN 409 Photography in the Hispanic World  
Credits 3.3 Lecture Hours.  
Study of the work produced by major photographers and/or in different countries in the Hispanic world, from mid-19th century origins of photography to present; theoretical, historical and critical readings; analysis of various genres, modes, and formats. Taught in Spanish.  
Prerequisites: Junior or senior classification and SPAN 203 SPAN 222 (p. 907), SPAN 203 SPAN 222, or approval of instructor.
SPAN 410 Hispanic Film  
Credits 3.3 Lecture Hours.  
Examination of major works and directors of contemporary Hispanic film;  
interpretation of culture through film; relationship of literature and film;  
conducted in Spanish.  
Prerequisites: SPAN 202, SPAN 203, SPAN 222 or approval of instructor.

SPAN 411 Contemporary Hispanic Society and Culture  
Credits 3.3 Lecture Hours.  
Cultural, economic, and political aspects of present-day Hispanic societies,  
and the treatment of these issues in the media; conducted in Spanish.  
Prerequisites: SPAN 202, SPAN 203, SPAN 222 or approval of instructor.

SPAN 412 Hispanic Writers in the U.S.  
Credits 3.3 Lecture Hours.  
Contemporary literature by monolingual/bilingual Hispanic authors in  
the United States; analysis of representative works from major Hispanic  
communities in the United States; conducted in Spanish.  
Prerequisites: SPAN 202, SPAN 203, SPAN 222 or approval of instructor.

SPAN 413 Hispanic Culture through Art  
Credits 3.3 Lecture Hours.  
Examination of the works of a major artist and/or artistic movement as  
a vehicle for intensive analysis of elements of Hispanic culture; study  
of artists such as El Greco, Velazquez, Goya, Picasso, Dali, and Diego  
Rivera. Conducted in Spanish.  
Prerequisites: SPAN 202, SPAN 203, SPAN 222 or approval of instructor.

SPAN 414 Contemporary Spanish and Spanish-American Literature  
Credits 3.3 Lecture Hours.  
Representative works of authors from both sides of the Atlantic; similarities  
and differences as regional literature give way to cosmopolitan styles,  
themes and movements; conducted in Spanish.  
Prerequisites: SPAN 202, SPAN 203, SPAN 222 or approval of instructor.

SPAN 421 Spanish Language Poetry  
Credits 3.3 Lecture Hours.  
Development of Spanish lyric poetry from the Jarchas to the present;  
analysis of metrics, imagery, language and style in the different periods;  
may include poems by Berceo, Garcilaso de la Vega, Góngora, Sor Juana,  
Bécquer, Rosalía, Dario, Machado, Lorca, Neruda, Vallejo, Paz and  
others; course conducted in Spanish.  
Prerequisites: SPAN 407 with a grade of B or better or approval of instructor.

SPAN 445 Cervantes  
Credits 3.3 Lecture Hours.  
Analysis of Cervantes' life, cultural milieu and works; emphasis on Don  
Quixote, its significance in Spanish literature and in the development of the  
modern novel; conducted in Spanish.  
Prerequisites: SPAN 202, SPAN 203, SPAN 222 or approval of instructor.

SPAN 450 Contemporary Spanish and Spanish-American Literature  
Credits 3.3 Lecture Hours.  
Representative works of authors from both sides of the Atlantic; similarities  
and differences as regional literature give way to cosmopolitan styles,  
themes and movements; conducted in Spanish.  
Prerequisites: SPAN 202, SPAN 203, SPAN 222 or approval of instructor.

SPAN 452 Hispanic Sociolinguistics  
Credits 3.3 Lecture Hours.  
Exploration of language varieties and language use in different social  
contexts within the Hispanic society; introduction to the theoretical  
foundations of sociolinguistic variation. Taught in Spanish.  
Prerequisites: Junior or senior classification; SPAN 352 or approval of instructor.

SPAN 460 Topics in Hispanic Literature  
Credits 3.3 Lecture Hours.  
Exploration of a significant topic, author, movement, genre or period in  
Hispanic literature. May be taken three times for credit.  
Prerequisite: SPAN 202, SPAN 203, SPAN 222 or approval of instructor.

SPAN 461 Topics in Hispanic Culture  
Credits 3.3 Lecture Hours.  
Exploration of significant topics in Hispanic linguistics from different  
thetical and applied perspectives. May be taken three times for credit.  
Prerequisites: SPAN 202, SPAN 203, SPAN 222 or approval of instructor.

SPAN 462 Topics in Hispanic Linguistics  
Credits 3.3 Lecture Hours.  
Expansion of translation practice and development of lexical and stylistic  
competence in specialized fields, including commercial, legal, medical,  
technical and scientific; mandatory service learning component included.  
Prerequisite: SPAN 407 with a grade of B or better or approval of instructor.

SPAN 463 Topics in Hispanic Language and Linguistics  
Credits 3.3 Lecture Hours.  
Exploration of language varieties and language use in different social  
contexts within the Hispanic society; introduction to the theoretical  
foundations of sociolinguistic variation. Taught in Spanish.  
Prerequisites: Junior or senior classification; SPAN 352 or approval of instructor.

SPAN 464 Internship  
Credits 0 to 3.3 Lecture Hours.  
Directed internship in a Spanish-speaking public or private organization to  
provide students with on-the-job training or applied research experience  
appropriate to career objectives. Must be taken satisfactory/unsatisfactory  
May be taken three times for credit.  
Prerequisites: Approval of department head; junior or senior classification.

SPAN 465 Directed Studies  
Credits 0 to 4 Other Hours.  
Individual supervision of readings or assigned projects selected for each  
student individually; written and oral reports.  
Prerequisite: Approval of instructor and department head.

SPAN 466 Special Topics in...  
Credits 1 to 4.1 to 4 Lecture Hours.  
Selected topics in an identified area of Spanish. May be repeated for  
credit.  
Prerequisite: Approval of department head.

SPAN 491 Research  
Credits 0 to 4 Other Hours.  
Research conducted under the direction of faculty member in Hispanic  
studies. May be repeated three times for credit.  
Prerequisites: Junior or senior classification and approval of instructor.

SPED - Special Education (SPED)

SPED 291 Research  
Credits 0 to 4 Other Hours.  
Research conducted under the direction of faculty member in special  
education. May be repeated 2 times for credit.  
Prerequisites: Freshman or sophomore classification and approval of instructor.
SPED 302 Instructional Design for Students with Disabilities  
Credits 3. 3 Lecture Hours.  
Familiarizes pre-service teachers with research associated with effective teaching; designing and implementing of instruction for students including those with mild to moderate disabilities; designing and managing environments and materials.  
Prerequisites: INST 210; junior classification.

SPED 310 Instructional Strategies for Students with Disabilities  
Credits 3. 3 Lecture Hours.  
Research-based strategies and techniques in teaching students who are at-risk academically or students with disabilities in a variety of general and special education settings; addresses teaching of academics, teacher strategies for engagement and incorporating the use of technology.  
Prerequisite: Admission to professional phase of program.

SPED 311 Assessment of Students with Disabilities  
Credits 3. 3 Lecture Hours.  
Instruction in formal and informal assessment techniques used with students with disabilities, including progress monitoring; development of Individualized Educational Program plans and the IEP process.  
Prerequisite: Admission to professional phase of program.

SPED 312 Effective Reading Instruction for Students with Diverse Abilities  
Credits 3. 3 Lecture Hours.  
Information and competencies in research-based reading instruction for students who have disabilities, are struggling readers, and are bilingual/multilingual; includes reading assessment, dyslexia and effective instruction in phonemic awareness, phonics, reading fluency, vocabulary and comprehension, Response to Intervention (RTI) strategies, and data driven decision-making.  
Prerequisite: Admission to professional phase of program.

SPED 314 Effective Mathematics Strategies for Students with Disabilities  
Credits 4. 4 Lecture Hours.  
Information and competencies through instruction in effective mathematics instruction for students P-12 with academic learning problems and/or disabilities; effective instruction design and teaching techniques, implementation of research-based methods relevant for active authentic learning; considers state and national standards related to teaching and learning mathematics.  
Prerequisites: Admission to professional phase of program.

SPED 414 Methods and Issues in Low-Incidence Disabilities  
Credits 3. 3 Lecture Hours.  
Overview of learning and behavioral characteristics of individuals with low-incidence disabilities such as intellectual disability, autism, physical disabilities, traumatic brain injury, sensory impairments, and multiple disabilities; research-based practices in assessment and education and designing educational environments that facilitate active participation, self-advocacy and independence.  
Prerequisites: Admission to professional phase of program.

SPED 442 Teaching Students with Emotional Disturbances and Behavior Disorders  
Credits 3. 3 Lecture Hours.  
Research-based techniques and materials used in the instruction of students who have emotional and behavioral disorders across a variety of classroom and other educational environments; includes identification and assessment issues, placements, family involvement, and historical and legal issues.  
Prerequisites: Admission to professional phase of program.

SPED 471 Classroom Management and Behavioral Interventions  
Credits 3. 3 Lecture Hours.  
Effective management of classrooms; includes research-based models of classroom discipline, proactive strategies that prevent misbehavior, interventions that decrease problem behaviors, and management systems appropriate for students with disabilities.  
Prerequisites: Admission to professional phase of program.

SPED 491 Research  
Credits 0 to 4. 0 to 4 Lecture Hours.  
Research conducted under the direction of faculty member in special education. May be repeated 2 times for credit.  
Prerequisites: Junior or senior classification and approval of instructor.

SPMT - Sport Management (SPMT)
SPMT 319/SOCI 319 Sociology of Sport
Credits 3.3 Lecture Hours.
Social institution of sport and its consequences for American society; social organization from play to professional sport; violence, discrimination, women in sport; socialization implications from participation in sports.
Prerequisite: Junior or senior classification.
Cross Listing: SOCI 319/SPMT 319.

SPMT 333 Sport Management
Credits 3.3 Lecture Hours.
Introduction to techniques for proper management of programs in physical activities and athletics including the basic physical education instructional program, intercollegiate and interscholastic athletics, intramural and club programs, and alternative athletic programs such as health clubs, corporate fitness centers and YMCA/YWCAs.
Prerequisites: Junior or senior classification; admission to professional phase of program.

SPMT 334 Sport Communication
Credits 3.3 Lecture Hours.
(3-0) Communications from the interorganizational level to mass media specific within the unique setting of sport industry.
Prerequisites: Junior or senior classification; sport management majors only or approval of instructor.

SPMT 336 Diversity in Sport Organizations
Credits 3.3 Lecture Hours.
Examine an encompassing perspective of diversity within North American and international sport organizations.
Prerequisite: Junior or senior classification.

SPMT 337 International Sport Business
Credits 3.3 Lecture Hours.
The magnitude of global expansion and development of sport familiarity with major firms and organizations on the global scene, major issues in global sports; emphasis on business opportunities available internationally; underlying thesis focuses on the contrasts from the U.S. sport industry to foreign markets.
Prerequisite: Junior or senior classification.

SPMT 340 Sport Governance
Credits 3.3 Lecture Hours.
Governance and policy development in sport management; managerial activities related to governance, strategic management, ethics in sport, governance and policy development in specific sport contexts.
Prerequisite: Junior or senior classification.

SPMT 402 Pre-Internship Field Experiences
Credit 1.2 Lab Hours.
Orientation, observations and experiences in preparation for professional internships.
Prerequisites: Senior classification; approved acceptance to field experience.

SPMT 420 Sports Facility Planning
Credits 3.3 Lecture Hours.
Examination of the principles involved in planning and managing sports and recreational facilities.
Prerequisites: Junior or senior classification; admission to professional phase of program or approval of instructor for non-sport management majors.

SPMT 421 Legal Aspects of Sport
Credits 3.3 Lecture Hours.
Explores the relationship between sport and law, and the fundamentals of law used by sport managers, including contract law, tort law, Constitutional issues, employment and discrimination law, the effect of state and federal statutes on recreational activities and sport, and current legal issues in sports.
Prerequisites: Junior or senior classification; admission to professional phase of program or approval of instructor for non-sport management majors.

SPMT 422 Financing Sport Operations
Credits 3.3 Lecture Hours.
Study of financial theories and practical application as they impact sport revenues and expenditures; familiarization with current issues and trends in financing sport organizations.
Prerequisites: Junior or senior classification; admission to professional phase of program.

SPMT 423 Marketing Aspects of Sport
Credits 3.3 Lecture Hours.
Investigation of the rapidly developing sports industry from a marketing perspective; familiarization of marketing terms and tools needed in the sports industry; introduction to the various aspects of marketing that make up the marketing plan.
Prerequisites: Junior or senior classification; admission to professional phase of program.

SPMT 450 Professional Practice in Sport Management
Credits 3.3 Lecture Hours.
Information, perspectives and skills to promote the management of sports in the community, school, workplace and sport business settings; boundary-crossing partnerships across sport disciplines; the role of collaborative efforts to improve the needs of the sport community.
Prerequisite: Admission to professional phase of program; senior classification.

SPMT 481 Seminar
Credit 1.1 Lecture Hour.
A variety of topical seminars in communicating contemporary and historical sport management subjects designed to complement the curriculum in sport management. May be taken three times for credit.
Prerequisite: Admission to the professional phase of the sport management program; junior or senior classification; or approval of instructor.

SPMT 482 Professional Writing Seminar
Credit 1.1 Lecture Hour.
Acquaint students with a primary means of communicating contemporary research in sport management; extensive readings, intensive writings and an oral presentation designed to complement the curriculum in sport management by introducing the application of sport management research to organizational decision making.
Prerequisites: Admission to professional phase of program or approval of instructor; junior or senior classification.

SPMT 483 Practicum in Sport Management
Credits 3.3 Lecture Hours.
Participation and study in sport management and administration; acquisition and practice of professional and/or clinical skills in sport management. Must be taken on a satisfactory/unsatisfactory basis.
Prerequisites: Admission to professional phase of program; approval of instructor; junior or senior classification.
SPMT 484 Internship in Sport Management
Credits 0 to 12. 0 to 12 Other Hours.
Supervised internship with sport management organizations; acquisition and practice of professional and/or clinical skills in sport management.
Prerequisites: SPMT 402; completion of all coursework.

SPMT 485 Directed Studies
Credits 0 to 4. 0 to 4 Other Hours.
Special problems in sport management assigned to individual students or to groups. May be repeated for credit. Must be taken on a satisfactory/unsatisfactory basis.
Prerequisites: Junior or senior classification; approval of instructor.

SPMT 489 Special Topics in...
Credits 0 to 4. 0 to 4 Lecture Hours.
Special Topics in... Selected topics in an identified area of sport management. May be repeated for credit.

SPMT 491 Research
Credits 0 to 4. 0 to 4 Other Hours.
Research conducted under the direction of a faculty member in sport management. May be repeated 4 times for credit.
Prerequisites: Junior or senior classification; approval of instructor.

SPSC - Spatial Sciences (SPSC)

SPSC 102 Introduction to Spatial Sciences
Credit 1. 1 Lecture Hour.
Provides an understanding of spatial sciences; how it is applied for problem solving in a wide variety of fields; and survey of the field and what opportunities are available to professionals in spatial sciences.

SPSC 461/AGSM 461 Geographic Information Systems for Resource Management
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Geographic Information System (GIS) approach to the integration of spatial and attribute data to study the capture, analysis, manipulation and portrayal of natural resource data; examination of data types/formats, as well as the integration of GIS with remote sensing and Global Positioning System; laboratory includes extensive use of GIS applications to conduct analyses of topics in natural resources.
Prerequisite: Approval of instructor.
Cross Listing: AGSM 461/SPSC 461.

STAT - Statistics (STAT)

STAT 182 Foundations of Statistics
Credit 1. 1 Lecture Hour.
Elementary topics in statistics; data collection; design of experiments; confidence intervals, hypothesis testing; ethics in statistics; the role of statistics in industry, the health profession and the sciences.
Prerequisite: Statistics majors only.

STAT 201 Elementary Statistical Inference
Credits 3. 3 Lecture Hours.
(MATH 1342, 1442) Elementary Statistical Inference. Data collection, tabulation and presentation; elementary description of the tools of statistical inference; probability, sampling and hypothesis testing; applications of statistical techniques to practical problems. May not be taken for credit after or concurrently with any other course in statistics or SCMT 303.

STAT 211 Principles of Statistics I
Credits 3. 3 Lecture Hours.
Introduction to probability and probability distributions; sampling and descriptive measures; inference and hypothesis testing; linear regression, analysis of variance.
Prerequisite: MATH 152 or MATH 172.

STAT 212 Principles of Statistics II
Credits 3. 3 Lecture Hours.
Design of experiments, model building, multiple regression, nonparametric techniques and contingency tables.
Prerequisite: STAT 211.

STAT 301 Introduction to Biometry
Credits 3. 3 Lecture Hours.
Intended for undergraduates in the biological sciences. Introduces fundamental concepts of biometry including measures of location and variation, probability, tests of significance, regression, correlation and analysis of variance which are used in advanced courses and are being widely applied to animal-oriented industry. Credit will not be allowed for more than one of STAT 301, STAT 302 or STAT 303.
Prerequisite: MATH 141 or MATH 166 or equivalent.

STAT 302 Statistical Methods
Credits 3. 3 Lecture Hours.
Intended for undergraduates in the biological sciences. Introduction to concepts of random sampling and statistical inference; estimation and testing hypotheses of means and variances; analysis of variance; regression analysis; chi-square tests. Credit will not be allowed for more than one of STAT 301, STAT 302 or STAT 303.
Prerequisite: MATH 141 or MATH 166 or equivalent.

STAT 307 Sample Survey Techniques
Credits 3. 3 Lecture Hours.
Concepts of population and sample; the organization of a sample survey; questionnaire design. Basic survey designs and computation of estimates and variances.
Prerequisite: STAT 301 or STAT 302 or STAT 303 or SCMT 303.

STAT 404 Statistical Computing
Credits 3. 3 Lecture Hours.
Statistical programming in R and SAS; random number generation; design of simulation studies; interactive and dynamic statistical graphics; parallel computing in statistics.
Prerequisites: STAT 212; junior or senior classification or approval of instructor.

STAT 406 Design and Analysis of Experiments
Credits 3. 3 Lecture Hours.
Design fundamentals; completely randomized designs; blocking; factorial, nested, nested-factorial designs; incomplete designs; fractional factorial designs; confounding; general mixed factorials; split pilot; analysis of covariance; crossover designs; power analysis, sample size determination.
Prerequisite: STAT 212; STAT 408.
STAT 407 Principles of Sample Surveys
Credits 3.3 Lecture Hours.
Principles of sample surveys and survey design; techniques for variance reduction; simple, stratified and multi-stage sampling; ratio and regression estimates; post-stratification; equal and unequal probability sampling.
Prerequisite: STAT 212.

STAT 408 Introduction to Linear Models
Credits 3.3 Lecture Hours.
Introduction to the formulation of linear models and the estimation of the parameters of such models, with primary emphasis on least squares. Application to multiple regression and curve fitting.
Prerequisites: STAT 212; MATH 304.

STAT 414 Mathematical Statistics I
Credits 3.3 Lecture Hours.
Mathematical theory of statistics; probability, random variables and their distributions, transformations of random variables, expectations and variance, generating functions, sampling distributions and basic limit theorems.
Prerequisite: MATH 221, MATH 251 or MATH 253.

STAT 415 Mathematical Statistics II
Credits 3.3 Lecture Hours.
Continuation of the mathematical theory of statistics, including principles for statistical inference, formulation of statistical models, reduction of data, point estimation, confidence intervals, hypothesis testing and Bayesian inference.
Prerequisite: STAT 414.

STAT 426 Methods in Time Series Analysis
Credits 3.3 Lecture Hours.
Autocorrelation and spectral characteristics of univariate, autoregressive and moving average models; identification, estimation and forecasting.
Prerequisites: STAT 408; STAT 415 or approval of instructor.

STAT 436 Multivariate Analysis and Statistical Learning
Credits 3.3 Lecture Hours.
Matrix algebra; random vectors; multivariate distributions; copulas; multivariate generalizations of classical testing; principle component analysis; discriminant analysis; clustering; multidimensional scaling; factor analysis; canonical analysis.
Prerequisites: MATH 304 or MATH 323; STAT 212; STAT 415 or equivalent.

STAT 438 Bayesian Statistics
Credits 3.3 Lecture Hours.
Analysis of scalar and vector-valued parameters; Bayesian linear models; Monte Carlo computational methods; prior elicitation; hypothesis testing and model selection; hierarchical models; selected advanced models; use of statistical packages such as WinBUGS, R or MATLAB.
Prerequisites: MATH 221; STAT 408 or equivalent.

STAT 445 Applied Biostatistics and Data Analysis
Credits 3.3 Lecture Hours.
Applications of regression methods in biostatistics; correlated data analysis; survival analysis; missing data techniques; use of the R programming language.
Prerequisites: STAT 212; STAT 408 or approval of instructor.

STAT 446 Statistical Bioinformatics
Credits 3.3 Lecture Hours.
Analysis of high-dimensional genomic and proteomic data using R; sequence analysis; genome-wide association studies; proteomics; array-based technologies; classification techniques.
Prerequisites: STAT 212; STAT 408 or approval of instructor.

STAT 459 Categorical Data Analysis
Credits 3.3 Lecture Hours.
Techniques for the analysis of categorical data; contingency table analysis; logistic regression; Poisson regression; loglinear models; analysis of ordinal data; use of computer software such as SAS or R.
Prerequisite: STAT 212; STAT 408 or equivalent.

STAT 482 Statistics Capstone
Credits 3.3 Lecture Hours.
Integration of statistical models, design, sampling, graphics and computing for the analysis of real problems; planning, drafting, revising and editing reports; ethics; principles of collaboration and communication.
Prerequisites: STAT 404; STAT 406; STAT 408 and senior classification.

STAT 485 Directed Studies
Credits 1 to 6.1 to 6 Other Hours.
Special problems in statistics not covered by another course in the curriculum. Work may be in either theory or methodology.
Prerequisite: Approval of instructor.

STAT 489 Special Topics in...
Credits 1 to 4.1 to 4 Lecture Hours.
Special Topics in... Selected topics in an identified area of statistics. May be repeated for credit.
Prerequisite: Junior or senior classification or approval of department head.

STAT 491 Research
Credits 1 to 4.1 to 4 Lecture Hours. 0 to 4 Lab Hours.
Research conducted under the direction of faculty members in statistics. May be taken four times for credit. Registration in multiple sections of this course is possible within a given semester provided that the per semester credit hour limit is not exceeded.
Prerequisite: Junior or senior classification or approval of instructor.

STLC - Student Learning Center (STLC)

STLC 001 Basic Mathematical Skills
Credits 1 to 3.1 to 3 Lecture Hours.
Developmental instruction in mathematics; includes the integers and rational numbers and applications, exponents, polynomials, solution of equations, graphing, elementary geometry and reasoning skills. May not be used for credit toward a degree.

STLC 002 Basic Writing Skills
Credits 1 to 3.1 to 3 Lecture Hours.
Individualized instruction in English composition based on an analysis of the student's proofreading, revision and editing skills; a programmed sequence of study and practice designed for improvement of writing performance through mastery of basic skills at word, sentence, paragraph and multiparagraph levels. May not be used for credit toward a degree.

STLC 003 Basic Reading Skills
Credits 1 to 3.1 to 3 Lecture Hours.
Individualized instruction in reading based on an analysis of the student's reading comprehension skills; study and practice of reading strategies designed to increase reading comprehension skills. May not be used for credit toward a degree.
STLC 101 Application of Learning Theories to College Studies
Credits 2. 2 Lecture Hours.
The study of critical theories of learning with application to academic performance; designated as the university’s learning framework course, this course is designed to help students understand learning theory and develop strategies for successful completion of college level studies.

STLC 102 Career Awareness
Credits 2. 2 Lecture Hours.
Encourages planning career and life goals early in academic career for timely decision-making related to academics, acquiring marketable skills, pursuing relevant experiential education, and participating in student/professional organizations; acquaints students with realities of early career, emphasizes utilization of resources on a timely basis for competitiveness in job market.

STLC 289 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours. 1 to 4 Lab Hours.
Selected topics in academic development and improvement.
Prerequisite: Approval of coordinator.

TCMG - Technology Management (TCMG)

TCMG 272 Technology and End-User Support
Credits 3. 3 Lecture Hours.
Upgrading, setup, configuration, troubleshooting of computer systems; development of skills to work with end-users; technology needs assessment; escalation and defusing strategies; service learning and community engagement.
Prerequisite: Sophomore classification.

TCMG 274 Distance Networking for Training and Development
Credits 3. 3 Lecture Hours.
Development of knowledge towards application of telecommunication networking in public education and corporate training settings; technical alternatives for delivery of subject matter for educators and trainers.
Prerequisites: Sophomore classification and approval of instructor.

TCMG 285 Directed Studies
Credits 0 to 12. 0 to 12 Lecture Hours.
Directed readings or research problems in industrial technology.

TCMG 289 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours. 0 to 4 Lab Hours.
Selected topics in an identified area of industrial technology. May be repeated for credit.

TCMG 291 Research
Credits 0 to 4. 0 to 4 Lecture Hours.
Research conducted under the direction of faculty member in technology management. May be repeated 3 times for credit.
Prerequisites: Freshman or sophomore classification and approval of instructor.

TCMG 303 Unix System Administration Practices
Credits 4. 3 Lecture Hours. 3 Lab Hours.
Development and system administration of the Unix operating system; technical alternatives for proactive and reactive maintenance of system health.
Prerequisites: TCMG 272 and TCMG 274 with a grade of C or better; junior or senior classification or approval of instructor.

TCMG 308 Cybersecurity and Digital Ethics
Credits 3. 3 Lecture Hours.
Introduction to cybersecurity; analysis of threats and risks from the environment; development of appropriate strategies to mitigate impact; ethics of extraordinary administrative access; ethics of digital forensics and implications to society.
Prerequisites: TCMG 272 and TCMG 274 with a grade of C or better; junior or senior classification or approval of instructor.

TCMG 316 Database Systems Administration and Application
Credits 4. 3 Lecture Hours. 3 Lab Hours.
Database administration and application use techniques; database structures, modeling, configuration, development, security, topologies and access; focus on system administration of Unix-based database systems.
Prerequisite: TCMG 303 with a grade of C or better.

TCMG 402 Instructional Technology and Design
Credits 3. 3 Lecture Hours.
Design principles; development of instruction; contemporary issues and trends; foundations in learning research; requirements for instruction, task and needs analysis; learning situations and instructional models; hardware and software innovations; assessing instructional outcomes; factors affecting utilization.
Prerequisites: EHRD 371 with a grade of C or better; junior or senior classification or approval of instructor.

TCMG 412 Contemporary Issues in Technology Management
Credits 3. 3 Lecture Hours.
Specific innovation or practices nascent to the professional information technology industry; discovery of practical applications and analytics of new innovation.
Prerequisites: TCMG 272 and TCMG 274 with a grade of C or better; junior or senior classification.

TCMG 476 Managing Technical Networks
Credits 4. 3 Lecture Hours. 3 Lab Hours.
Development of knowledge and skills towards the application of technical network management in public education and corporate training settings; focus on practices, techniques and tools for managers of technical networks.
Prerequisites: TCMG 272 and TCMG 274 with a grade of C or better; junior or senior classification.

TCMG 484 Professional Internship
Credits 6. 6 Other Hours.
Directed internship in an organization to provide students with a learning experience supervised by professionals in organizational settings appropriate to the student’s professional objectives; must be in good standing with the University. Must be taken on a satisfactory/unsatisfactory basis.
Prerequisites: EHRD 481 and EHRD 490 with a grade of C or better; approval of instructor.

TCMG 485 Research
Credits 0 to 12. 0 to 12 Other Hours.
Directed Studies. Directed readings or research problems in industrial technology.
Prerequisites: Junior or senior classification; approval of directed studies application.

TCMG 489 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours. 0 to 4 Lab Hours.
Selected topics in an identified area of industrial technology. May be repeated for credit.
Prerequisite: Approval of instructor.
TEED - Teacher Education (TEED)

TEED 302 Teaching/Learning Processes: Psychological Perspectives on Education
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Psychological perspectives on instruction; examines learning processes, learner motivation, home and cultural influences, learning strategies; design and delivery of instruction; controversies regarding learning and instruction.
Prerequisites: Junior classification; admission to teacher education.

TEED 425 Supervised Clinical Teaching
Credits 12. 36 Other Hours.
Supervised Student Teaching. Culmination of teacher education program; integrate and apply knowledge and skills learned from program of study while observing and participating in accredited schools with university supervision. Must be taken on a satisfactory/unsatisfactory basis.
Prerequisites: Admission and retention in teacher education program; successful completion of all coursework.

TEFB - Teacher Ed Field Based (TEFB)

TEFB 273 Introduction to Culture, Community, Society and Schools
Credits 3. 2 Lecture Hours. 3 Other Hours.
Field-based course that introduces the culture of schooling and classrooms for analysis within the lens of language, gender, racial, socioeconomic, ethnic and academic diversity; the family as a partner in education and educational equality discussed.

TEFB 322 Teaching and Schooling in Modern Society
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Development, structure, management and finance of secondary schools; historical, philosophical, ethical and moral dimensions of teaching; role of school in a democratic society; teaching as a profession.
Prerequisite: Junior or senior classification.

TEFB 323 Teaching Skills I
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Study and development of teaching skills necessary for reflective problem solving, managing classroom learning environments, motivating students to learn, and making ethical decisions; emphasis given to models and theories of human behavior, informal and formal data collection techniques, and diversity of learners. Phase III of the secondary program.
Prerequisites: Successful completion of TEFB 322; admission to teacher education.

TEFB 324 Teaching Skills II
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Study and development of teaching skills necessary for applying instructional strategies; teaching general strategies, assessing student learning, and analyzing and synthesizing multiple source data; emphasis given to adolescent development and cultures and to teacher and child cultures.
Prerequisites: Successful completion or concurrent enrollment in TEFB 322; junior or senior classification.

TEFB 371 Dynamics and Management in Multicultural/Inclusionary Learning Environments
Credits 3. 2 Lecture Hours. 4 Lab Hours.
Field-based course focusing on communication, methodology and management perspectives that lead to democratic classrooms; organizational structures that focus on transformative, inclusionary learning; interventions for students with disabilities; analysis of systemic conditions placing children from diverse backgrounds and representing diverse abilities in positions of "risk" for incomplete success in school.
Prerequisites: Junior or senior classification; approval of instructor.

TEED - Teacher Education (TEED)

TEED 302 Teaching/Learning Processes: Psychological Perspectives on Education
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Psychological perspectives on instruction; examines learning processes, learner motivation, home and cultural influences, learning strategies; design and delivery of instruction; controversies regarding learning and instruction.
Prerequisites: Junior classification; admission to teacher education.

TEED 425 Supervised Clinical Teaching
Credits 12. 36 Other Hours.
Supervised Student Teaching. Culmination of teacher education program; integrate and apply knowledge and skills learned from program of study while observing and participating in accredited schools with university supervision. Must be taken on a satisfactory/unsatisfactory basis.
Prerequisites: Admission and retention in teacher education program; successful completion of all coursework.

TEFB - Teacher Ed Field Based (TEFB)

TEFB 273 Introduction to Culture, Community, Society and Schools
Credits 3. 2 Lecture Hours. 3 Other Hours.
Field-based course that introduces the culture of schooling and classrooms for analysis within the lens of language, gender, racial, socioeconomic, ethnic and academic diversity; the family as a partner in education and educational equality discussed.

TEFB 322 Teaching and Schooling in Modern Society
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Development, structure, management and finance of secondary schools; historical, philosophical, ethical and moral dimensions of teaching; role of school in a democratic society; teaching as a profession.
Prerequisite: Junior or senior classification.

TEFB 323 Teaching Skills I
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Study and development of teaching skills necessary for reflective problem solving, managing classroom learning environments, motivating students to learn, and making ethical decisions; emphasis given to models and theories of human behavior, informal and formal data collection techniques, and diversity of learners. Phase III of the secondary program.
Prerequisites: Successful completion of TEFB 322; admission to teacher education.

TEFB 324 Teaching Skills II
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Study and development of teaching skills necessary for applying instructional strategies; teaching general strategies, assessing student learning, and analyzing and synthesizing multiple source data; emphasis given to adolescent development and cultures and to teacher and child cultures.
Prerequisites: Successful completion or concurrent enrollment in TEFB 322; junior or senior classification.

TEFB 371 Dynamics and Management in Multicultural/Inclusionary Learning Environments
Credits 3. 2 Lecture Hours. 4 Lab Hours.
Field-based course focusing on communication, methodology and management perspectives that lead to democratic classrooms; organizational structures that focus on transformative, inclusionary learning; interventions for students with disabilities; analysis of systemic conditions placing children from diverse backgrounds and representing diverse abilities in positions of "risk" for incomplete success in school.
Prerequisites: Junior or senior classification; approval of instructor.
THAR 115 Voice and Articulation
Credits 3. 3 Lecture Hours.
(SPCH 1342, 2336) Voice and Articulation. Voice mechanism and use of phonetic alphabet to determine sound placement and production for speech and voice improvement. Analysis and practice of relaxation, pitch, rate, resonance, quality, and volume through class exercise and performance.

THAR 135 Theatre Technology I
Credits 3. 2 Lecture Hours. 4 Lab Hours.
(DRAM 1330) Theatre Technology I. Survey of theatre performance spaces, basic tools and set construction, basic scenic, lighting, sound and properties design and construction; participation on departmental production crews required.

THAR 155 History of Western Dress
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Evolution of dress in Western civilization; consideration of influences of politics, religion, economics, visual arts and social mores on choices of dress.

THAR 156 Dress, Culture and Society
Credits 3. 3 Lecture Hours.
Relationship of dress to humans as biological, aesthetic and social beings; dress as cultural performance.

THAR 201 Introduction to World Theatre
Credits 3. 3 Lecture Hours.
Non-Western theatre, its origins and continuing influence on society and Western theater; emphasis on the theaters of India, China, Japan, Africa, the Caribbean and Latin America.

THAR 245 Basic Theatrical Design
Credits 3. 3 Lecture Hours.
Elements and principles of design for the theatre; role of the designer within the production team, theoretical and practical applications in the visual interpretation of plays; participation in departmental productions.

THAR 250 Stage Makeup
Credits 3. 2 Lecture Hours. 4 Lab Hours.
(DRAM 1341) Stage Makeup. An analytical approach to the visualization of characters focusing on research and design, application techniques and media.

THAR 255 Costume Technology I
Credits 3. 2 Lecture Hours. 4 Lab Hours.
(DRAM 1342) Costume Technology I. Survey of the costume process from concept to realization; basic hand and sewing machine techniques; basic patterning and fitting methods; and crafts techniques; participation on departmental production crews required.

THAR 280 History of the Theatre I
Credits 3. 3 Lecture Hours.
(DRAM 2361) History of the Theatre I. Survey of the history of Western theatre from primitive times to the closing of the theatres in England in 1642. For non-theatre majors and minors only.
THAR 281 History of the Theatre II
Credits 3. 3 Lecture Hours.
(DRAM 2362) History of the Theatre II. Survey of the history of Western theatre from the closing of the theatres in England in 1642 to the present; brief introduction to the theatre of the East. For non-theatre majors and minors only.

THAR 282 American Theatre
Credits 3. 3 Lecture Hours.
Surveys American theatrical production and drama from colonial times to the present; focus on various theatre artists and movements which have shaped, and been shaped by, American culture.

THAR 285 Directed Studies
Credits 0 to 4. 0 to 4 Other Hours.
Individual study of identified topics in the theatre for specific needs of theatre arts majors; formal report required.
Prerequisites: Six hours of theatre arts and approval of instructor and department head; THAR majors and minors only.

THAR 289 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Selected topics in an identified area of theatre production, technology, history or criticism. May be repeated for credit.

THAR 290 Theatre Practicum: Crew
Credit 1. 4 Other Hours.
(DRAM 1120, 1121, 1220, 1221, 1320, 1321, 2120, 2121, 2220) Theatre Practicum: Crew. Participation in the run crew for a departmental theatre production under supervision of theatre arts faculty; audition or application may be required. May be taken two times for credit.

THAR 291 Research
Credits 0 to 3. 0 to 3 Other Hours.
Research conducted under the direction of a faculty member in theatre arts. May be taken up to two times for credit.
Prerequisites: Freshman or sophomore classification and approval of instructor.

THAR 301 Performance in World Cultures
Credits 3. 3 Lecture Hours.
Application of the tools of performance studies to explore the enactment of the arts in world cultures and the ways the people of every society express themselves in performance; examination of different genres of performance through music, theatre, verbal art and dress.
Prerequisite: Junior or senior classification or approval of instructor.
Cross Listing: MUSC 301 and PERF 301.

THAR 302 Dramaturgy
Credits 3. 3 Lecture Hours.
Exploration of literary, production and theoretical dramaturgy in a classroom setting; script analysis, theatre criticism, theories of theatre, research techniques and dramaturgy in the production process, advancing thought about the art form in all its complexity; research methods for theatre.
Prerequisites: THAR 102; majors and minors only or approval of instructor.

THAR 308 Stage Management and Arts Administration
Credits 3. 3 Lecture Hours.
Planning and managing artistic events and performances; basic concepts of management theories, creating budgets, stage and production management, and grant applications; attendance of departmental events required.
Prerequisite: Approval of instructor.

THAR 310 Acting III: Period Styles
Credits 3. 2 Lecture Hours. 4 Lab Hours.
Exploration of acting techniques associated with various periods and non-realistic styles of theatre; scene work emphasized.
Prerequisites: THAR 110 and THAR 210 or approval of instructor.

THAR 328/MUSC 328 Japanese Traditional Performing Arts
Credits 3. 3 Lecture Hours.
Study of various genres of Japanese performing arts from the 7th century to the present; understanding the genres in their historical and cultural contexts and recognizing shared aesthetic values.
Prerequisite: Junior or senior classification or approval of instructor.
Cross Listing: MUSC 328/THAR 328.

THAR 335 Theatre Technology II
Credits 3. 2 Lecture Hours. 4 Lab Hours.
Planning, design and execution of scenic, lighting, sound and properties design construction; participation in departmental crews required. May be repeated once for credit.
Prerequisites: THAR 135; participation in departmental productions.

THAR 345 Scene Design
Credits 3. 2 Lecture Hours. 4 Lab Hours.
Drafting techniques as applied to scenic design; scenic construction techniques; design projects to include perspective rendering, ground plans, elevations, working drawings and models.
Prerequisites: THAR 102, THAR 135 and THAR 245, or approval of the instructor.

THAR 355 Costume Design
Credits 3. 2 Lecture Hours. 4 Lab Hours.
Role and responsibilities of costume designer; design projects to include rendering techniques, stylistic choices and alternative analytical approaches.
Prerequisites: THAR 102, THAR 245, or approval of instructor.

THAR 360 Lighting Design
Credits 3. 2 Lecture Hours. 4 Lab Hours.
Basic electricity; theatre lighting instrumentation and maintenance; color theory and color media; stage lighting theory and technique; preparation of light plot, instrumentation schedule and cue sheets; operation of lighting equipment; laboratory practice and participation on departmental productions crews is required.
Prerequisites: THAR 102, THAR 135 and THAR 245, or approval of instructor.

THAR 381 Theatre History and Dramatic Literature I
Credits 3. 3 Lecture Hours.
Survey of the history of theatre and drama from ancient times to c. 1700; examination of the evolution of theatre and drama from primitive rituals to highly stylized writing and performance in Europe and Asia.
Prerequisites: THAR 102; majors and minors only; junior or senior classification.

THAR 382 Theatre History and Dramatic Literature II
Credits 3. 3 Lecture Hours.
Continuation of THAR 381. Survey of the history of theatre and drama from 1700 to the present; examines the evolution of theatre and drama in Africa, the Americas, Asia and Europe.
Prerequisites: THAR 381; majors and minors only; junior or senior classification.
THAR 386/MUSC 386 Evolution of the American Musical
Credits 3. 3 Lecture Hours.
Examination of the American musical from its heterogeneous origins to a
thriving and diverse expression of the human condition; analysis and
critical discourse on the development of the American musical through
text, audio and visual recordings.
Prerequisite: Junior or senior classification or approval of instructor.
Cross Listing: MUSC 386/THAR 386.
THAR 390 Theatre Practicum: Performance
Credit 1. 4 Other Hours.
Participation as a performer in a departmental theatre production under
supervision of theatre arts faculty; audition or application may be required.
May be taken two times for credit.
Prerequisite: Junior or senior classification or approval of instructor.
THAR 391 Theatre Practicum: Production
Credit 1. 4 Other Hours.
Participation in the production team for a departmental theatre production
under supervision of theatre arts faculty; audition or application may be
required. May be taken two times for credit.
Prerequisite: Junior or senior classification or approval of instructor.
THAR 392 Theatre Practicum: Design
Credit 1. 4 Other Hours.
Participation in the design team for a departmental theatre production
under supervision of theatre arts faculty; audition or application may be
required. May be taken two times for credit.
Prerequisite: Junior or senior classification or approval of instructor.
THAR 407 Performing Literature.
Credits 3. 3 Lecture Hours.
Analysis and performance of poetry, prose and drama; emphasis on
translating analytical decisions into performance; solo performance,
readers theatre, chamber theatre, and technology in/as performance.
Prerequisite: Junior or senior classification.
THAR 410 Acting IV - Advanced Problems in Acting
Credits 3. 3 Lecture Hours.
Solving advanced dramatic problems using acting, voice, movement,
and style techniques; writing, development and performance of an
autobiographical monologue; includes audition preparation and rehearsal
techniques.
Prerequisites: THAR 310; junior or senior classification.
THAR 420 Directing
Credits 3. 2 Lecture Hours. 4 Lab Hours.
Theatre forms and styles; director's function and responsibility in
producing plays; script analysis; directing laboratory scenes; participation
in departmental productions.
Prerequisites: THAR 102, THAR 110, THAR 245, THAR 381, or approval
of instructor.
THAR 435 New Technology for Designers
Credits 3. 3 Lecture Hours.
Fundamentals of design software including sound editing, video editing,
and rendering for theatre; multi-media installation.
Prerequisites: PEFR 202 or THAR 135; THAR 245; junior or senior
classification; or approval of instructor.
THAR 445 Design as Performance
Credits 3. 3 Lecture Hours.
Design as performance using research methods and the production of new
work; disciplines of design, performance, installation and performance as
research.
Prerequisites: THAR 245 and junior or senior classification; or approval of
instructor.
THAR 482 Topics in American Theatre and Performance
Credits 3. 3 Lecture Hours.
Exploration of significant issues in American theatre and performance;
emphasis on the aesthetic, social, and cultural issues affecting theatre and
performance. May be taken two times for credit.
Prerequisites: THAR 102 and THAR 382 or approval of instructor; junior
or senior classification.
THAR 485 Directed Studies
Credits 0 to 3. 0 to 3 Other Hours.
I, II, S Advanced individual study of identified topics in theatre for specific
needs of theatre arts majors; formal report required. May be repeated for
credit up to 6 hours.
Prerequisites: 24 hours of theatre arts; THAR majors and minors only or
permission of instructor.
THAR 489 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Selected topics in an identified area of theatre production, technology,
history, or criticism. May be repeated for credit.
Prerequisite: Approval of instructor.
THAR 491 Research
Credits 0 to 3. 0 to 3 Other Hours.
Research conducted under the direction of a faculty member in theatre
arts. May be taken two times for credit.
Prerequisites: Junior or senior classification and approval of instructor.

UGST - Undergraduate Studies
(UGST)

UGST 181 First Year Seminar
Credits 0 to 3. 0 to 3 Lecture Hours.
Seminar on various contemporary topics; introduction to high quality
college instruction and research; focus on writing, speaking, discussion
and research; open to all majors; restricted to first-time-in-college students
and limited in size to provide small class experience. May be taken two
times for credit.
UGST 182 Topics in Undergraduate Studies
Credits 0 to 3. 0 to 3 Lecture Hours.
Selected interdisciplinary topics related to specific programs as identified
by the office of undergraduate studies; for students in approved first year
programs. May be taken two times for credit.
Prerequisite: Freshman classification or approval of instructor.
UGST 211 UScholar Personal Statement
Credits 0-1. 0-1 Lecture Hours.
Oral and written reflection on values, goals, and opportunities; preparation
of personal statement appropriate for nationally competitive scholarship
application. Must be taken on a satisfactory/unsatisfactory basis.
Prerequisite: University Scholar classification.
UGST 285 Directed Studies
Credits 0 to 4. 0 to 4 Other Hours.
Directed individual study on selected topics in undergraduate studies. May
be taken six times for credit.
UGST 311 UScholar Exploration Series
Credits 0-1. 0-1 Lecture Hours.
Selection from a variety of discussion topics designed to foster student-faculty interaction, intellectual and cultural enrichment, inter-and cross-disciplinary connections, and the development of interest and knowledge of issues outside of a student's degree area. May be taken six times for credit. Must be taken on a satisfactory/unsatisfactory basis. 
Prerequisites: Junior or senior classification or approval of instructor; admitted to Undergraduate Research Scholars.

UGST 405 Thesis Writing
Credits 0-1. 0-1 Lecture Hours.
Accessing information, searching scholarly literature, and oral or poster presentation of scholarly work and formal research thesis. Must be taken on a satisfactory/unsatisfactory basis. 
Prerequisites: Junior or senior classification or approval of instructor; admitted to University Scholar program.

UGST 484 Internship
Credits 0 to 3. 0 to 3 Other Hours.
Directed internship in a community, public or private organization to provide students with on-the-job training and/or applied research experience appropriate to career objectives. May be taken three times for credit. 
Prerequisites: Junior or senior classification and approval of instructor.

UGST 485 Directed Studies
Credits 0 to 4. 0 to 4 Other Hours.
Directed individual study on selected topics in undergraduate studies. May be taken six times for credit.

UGST 491 Research
Credits 0 to 4. 0 to 4 Other Hours.
Research conducted under the direction of a faculty member in undergraduate studies. May be taken three times for credit. 
Prerequisites: Junior or senior classification and approval of instructor.

UGST 492 Cooperative Education in Public Policy
Credits 0 to 3. 0 to 3 Lecture Hours.
Educational work assignment in public policy setting related to student's career interest and course of study; supervision of the student will be by the cooperating employer and the instructor; reports, approved by course instructor, will be required. May be taken two times for credit. 
Prerequisites: Junior or senior classification and approval of instructor.

UGST 497 Capstone
Credits 0 to 6. 0 to 6 Lecture Hours.
Demonstrating mastery of discipline as applied to an original problem through an independent, mentored project; public presentation of work. May be taken two times for credit. Must be taken on a satisfactory/unsatisfactory basis. 
Prerequisites: Junior or senior classification; admitted to Undergraduate Service Scholars program.

URPN - Urban & Reg Planning (URPN)

URPN 200 Introduction to Landscape Architectural Practice
Credit 1. 1 Lecture Hour.
Explores and evaluates the diversity of landscape architectural practice; defines the traditional practice forms and examines evolving and boundary expanding opportunities for future practice; introduces the departmental curriculum and faculty.

URPN 201 The Evolving City
Credits 3. 3 Lecture Hours.
Introduction to the history of contemporary urban and regional planning and how the evolving forms of cities and regions pose opportunities and/or challenges for planners; understanding key social, economic, political and technological forces that shape city form and function and its ramifications for urban and regional planning.

URPN 202 Building Better Cities
Credits 3. 3 Lecture Hours.
Determinants of land use patterns; classification of uses; idealized conceptual alternatives; location and size criteria; mapping; comprehensive planning process, relationship to circulation planning.

URPN 210 Urban Analytical Methods I
Credits 3. 3 Lecture Hours.
Study of various analytical techniques used in urban and regional decision making; quantitative approaches to analyze and manipulate data; utilization of statistical packages for data, analysis and communication to enhance urban planning modeling. 
Prerequisite: URPN majors only or approval of instructor.

URPN 220 Digital Communication I
Credits 3. 3 Lecture Hours.
Applications of computer graphics, rendering, and visualization software in urban design, landscape architecture, and environmental analysis; introduction to basic concepts and principles of graphic composition; rendering, visualization, and linkages to landscape-referenced data. 
Prerequisite: Landscape Architecture and Urban Planning majors only or approval of instructor.

URPN 291 Research
Credits 1 to 4. 1 to 4 Other Hours.
Research conducted under the direction of faculty member in landscape architecture and urban planning. May be taken 2 times for credit.

URPN 301 Urban Analytical Methods II
Credits 3. 3 Lecture Hours.
Familiarization with the fundamental principles of planning law and legislation; legal foundation for the urban planning process; alternative methods of plan implementation; emphasis on legal issues as they impact land use planning and development at the municipal level of government; participation in mock advocacy trials and public hearings. 
Prerequisites: URPN 301; URPN majors only.

URPN 310 Urban Analytical Methods II
Credits 3. 3 Lecture Hours.
Focuses on research conducted by planners, sociologists, anthropologists, political scientists and a variety of applied social scientists; examines variety of procedures employed when conducting research in urban areas; furthers understanding and knowledge of statistical methods employed in social research and elements of geographical analysis. 
Prerequisite: Upper division College of Architecture; URPN 210 or approval of instructor, URPN majors only.

URPN 320 Digital Communication II
Credits 3. 3 Lecture Hours.
Advanced applications of computer graphics, rendering, and visualization software in urban design, landscape architecture, and environmental analysis; introduction to basic concepts and principles of graphic composition, rendering, visualization, and linkages to landscape-referenced data. 
Prerequisites: URPN 220; department majors only.
URPN 325 Introduction to GIS in Urban and Regional Planning
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Provides an understanding of GIS fundamentals; basic concepts, principles and functions; essential skills for applying GIS in various fields such as urban planning, landscape architecture, land development, environmental studies, transportation and hazard management; based on learning through class projects.
Prerequisite: Upper division College of Architecture; department majors only or approval of instructor.

URPN 326 Advanced GIS in Urban and Regional Planning
Credits 3. 3 Lecture Hours.
Advanced instruction in applications of spatial tools for urban planning, landscape architecture, land development, hazard management, and related problems; GIS applications through review of literature and practice; data quality, uncertainty, the integration of GPS, remote sensing and information technology within the context of urban and regional planning.
Prerequisite: URPN 325 or approval of instructor, department majors only.

URPN 330 Land Development I
Credits 3. 3 Lecture Hours.
Interface between the physical and financial dimensions in design and development to achieve building and project economies; creating a physical product and a financial venture that are responsive to social and environmental concerns and to market economy and finance.
Prerequisite: Department majors only or approval of instructor.

URPN 331 Public and Private Infrastructure Funding
Credits 3. 3 Lecture Hours.
An introduction to issues of financing public and public-private development project; exploring the difference between raising revenue, including the trade offs associated with establishing a sustainable tax base, and raising capital through capital markets; illustration of the range of decisions with financing public and public-private partnerships.
Prerequisite: Department majors only or approval of instructor.

URPN 340 Housing and Community
Credits 3. 3 Lecture Hours.
Housing, its development, planning, marketing, designing, financing and production; social and design history and contemporary issues of American housing development, urban renewal, neighborhood structure and community facilities.
Prerequisite: Department majors and minors only or approval of instructor.

URPN 360 Issues in Environmental Quality
Credits 3. 3 Lecture Hours.
Issues in environmental quality; focus on stormwater and ecosystem qualities influenced by land development; planning and design principles and techniques (e.g. low impact development) for sustainable stormwater management in urban and suburban watersheds.
Prerequisite: Junior or senior classification or approval of instructor.

URPN 361 Urban Issues
Credits 3. 3 Lecture Hours.
Issues pertaining to the evolution and development of cities and urban regions; examines the socio-economic, cultural and physical development of urban areas; addresses contemporary problems such as racial tension, unemployment and poverty, housing, pollution and environmental sustainability, traffic and congestion, land use, crime, public health, and other quality of life issues.
Prerequisite: Junior or senior classification or approval of instructor.

URPN 369 Transportation and Urban Form
Credits 3. 3 Lecture Hours.
Examination of the interrelated nature of transportation, land use and urban design; familiarization with the role of transportation in contemporary society; understanding the interrelationships between transportation and urban form at both the regional and community levels.
Prerequisite: Junior or senior classification or approval of instructor.

URPN 370 Health Systems Planning
Credits 3. 3 Lecture Hours.
Introduction to planning in the health care system at both institutional and community levels.
Prerequisite: Junior or senior classification or approval of instructor.

URPN 371 Environmental Health Planning and Policy
Credits 3. 3 Lecture Hours.
Philosophical and historical relationships of human-environment-disease; environmental health domains and associated planning and policy organizations and initiative for monitoring, intervention, and prevention; interdisciplinary approaches for risk analysis of environmental health.
Prerequisite: Junior or senior classification or approval of instructor.

URPN 401 Policy Implementation
Credits 3. 3 Lecture Hours.
Techniques of implementing major urban development programs and plans; capital improvements programming and budgeting; overview of regulatory measures including zoning and subdivision regulations; public involvement process; and fiscal planning.
Prerequisite: URPN majors only.

URPN 440 Urban and Regional Economic Development
Credits 3. 3 Lecture Hours.
Examines economic development processes in urban and regional planning; issues explored include theoretical, the economic development planning process, ethics, location factors, intergovernmental relations, budgeting, and private sector revenue generation.
Prerequisite: URPN majors only or approval of instructor.

URPN 441 Neighborhood Revitalization
Credits 3. 3 Lecture Hours.
Examination of the causes of decline of central cities, with the goal of developing a realistic view of who is affected, and why, so that a realistic foundation can be laid for successful redevelopment projects; topics and case studies on downtown decline and redevelopment, older city neighborhood problems and retrofitting.
Prerequisite: URPN majors only or approval of instructor.

URPN 450 Emergency Management Principles and Practices
Credits 3. 3 Lecture Hours.
Introduction to the fundamental principles of emergency management.
Prerequisite: Upper division College of Architecture or approval of instructor.

URPN 451 Hazard and Vulnerability Analysis for Planners
Credits 3. 3 Lecture Hours.
Tools and techniques used by city planners and emergency managers to determine their jurisdictions’ hazard risk and social vulnerability to disaster impacts.
Prerequisite: Junior or senior classification, URPN 450 or approval of instructor.
URPN 460 Sustainable Communities  
Credits 3. 3 Lecture Hours. 
Focuses on sustainable community with applications in public policy/design including societal organization, disciplinary bound design and policy, and empowered approaches to design, social ecology and public policy; reading and review of relevant literature on sustainability, complemented with exercises to illustrate underlying principles.  
Prerequisite: Department majors and minors only or approval of instructor.

URPN 469 Urban Infrastructure  
Credits 3. 3 Lecture Hours. 
Foundation of planning and managing infrastructure and public services; utilization of life-cycle method of infrastructure planning and delivery, research theory and tools to perform basic infrastructure planning.  
Prerequisite: URPN majors only or approval of instructor.

URPN 470 Health Systems Planning and Policy  
Credits 3. 3 Lecture Hours. 
Analyzes health needs at community, regional and national levels; organization and supply of health services at community, regional and national levels; medical technology and its impact on health needs and system organization; medical care financing and its effects on health need and system organization; health planning for natural and human-made disasters; and service-learning for applying planning theories and methods.  
Prerequisite: Junior or senior classification or approval of instructor.

URPN 471 Planning Healthier Communities  
Credits 3. 3 Lecture Hours. 
Planning for the creation of healthier cities/communities; emphasis on the impact of global paradigmatic shifts regarding community health, stakeholder participation, coalition building, leadership, visioning the planning process, and the need for more systemic and process orientation in community building.  
Prerequisite: Junior or senior classification or approval of instructor.

URPN 481 Seminar  
Credits 3. 3 Lecture Hours. 
Seminar discussion of current topics in urban planning.  
Prerequisite: Senior classification.

URPN 483 Studio in Urban and Regional Science  
Credits 1 to 6. 1 to 6 Lecture Hours. 
Studio introduces the confluence of ecological, environmental, economic, social, cultural, and political forces impacting the planning, design, and development of complex urban environments; site planning, design process, sustainability.  
Prerequisite: URPN majors only or approval of instructor.

URPN 484 Internship  
Credits 3. 3 Other Hours. 
Practical experience in an office of design allied professionals; 12 week internship with a minimum of 480 hours; continuous employment; departmental pre-approval through the department internship coordinator required. May not be repeated for credit.  
Prerequisites: URPN majors only or approval of internship coordinator.

URPN 485 Directed Studies  
Credits 1 to 5. 1 to 5 Other Hours. 
Individual instruction in selected aspects of urban planning not adequately covered in other courses. May be taken 3 times for credit.  
Prerequisite: Upper level classification.

URPN 489 Special Topics in...  
Credits 1 to 4. 1 to 4 Lecture Hours. 0 to 4 Lab Hours. 
Selected topics in an identified field of urban studies. May be repeated for credit.

URPN 491 Research  
Credits 1 to 4. 1 to 4 Other Hours. 
Research conducted under the direction of faculty member in landscape architecture and urban planning. May be taken 2 times for credit.  
Prerequisites: Junior or senior classification.

URPN 493 Urban and Regional Studies Capstone Course  
Credits 5. 5 Lecture Hours. 
Syntheses and application of skills and knowledge gained through coursework applied to the development of creative solutions to real-world projects.  
Prerequisites: URPN 310, URPN 331, URPN 410, URPN 469; LAND 494; senior classification; URPN majors only.

URPN 494 Internship  
Credits 6. 6 Other Hours. 
Practical experience in public, private, non-profit and for profit organizations of design allied professionals; 18 week internship with a minimum of 720 hours; continuous employment; departmental pre-approval through the department internship coordinator required. May not be repeated for credit.  
Prerequisites: Upper level classification and approval of internship coordinator.

VIBS - Vet Integrative Biosci (VIBS)

VIBS 204 Fundamentals of Food Toxicology and Safety  
Credits 3. 3 Lecture Hours. 
Toxicity and safety of various foods and food additives, ingredients and contaminants; occurrence, control and prevention of food transmitted diseases.  
Prerequisite: Sophomore classification and CHEM 101.

VIBS 222 Great Poisonings of the World  
Credits 3. 3 Lecture Hours. 
Exploration of the effect of intentional and accidental man-made and natural poisonings on humans and the environment and their impact on public policy.  
Prerequisite: Freshman or sophomore classification.

VIBS 243 Introductory Mammalian Histology  
Credits 2. 1 Lecture Hour. 2 Lab Hours. 
Biological aspects of the human body by integrating histology and anatomy and physiology; emphasis on the transition of cell and tissue organization to organ systems that comprise mammalian organisms; builds upon concepts introduced in lower-level biology and builds a foundation to succeed in upper-level histology, anatomy and physiology.

VIBS 277/NRSC 277 Introduction to Neuroscience  
Credits 3. 3 Lecture Hours. 
Neuroscience from the molecular to system levels; fundamental principles and knowledge of neuroscience; current research information on neuroscience.  
Prerequisites: Freshman or sophomore classification and approval of instructor.  
Cross Listing: NRSC 277/VIBS 277.
VIBS 285 Directed Studies  
Credits 0 to 4. 0 to 4 Other Hours.  
Directed studies in specific problem areas of veterinary anatomy and public health.  
Prerequisites: Freshman or sophomore classification and approval of department head.

VIBS 289 Special Topics in...  
Credits 1 to 4. 1 to 4 Lecture Hours. 0 to 4 Lab Hours.  
Selected topics in an identified area of veterinary anatomy or topics not covered in other courses. May be repeated for credit.  
Prerequisites: Freshman or sophomore classification and approval of instructor.

VIBS 305 Biomedical Anatomy  
Credits 4. 2 Lecture Hours. 4 Lab Hours.  
Comprehensive mammalian gross anatomy, using the dog as the model species; laboratory dissection, veterinary nomenclature with human correlates and the application of anatomy to clinical situations.  
Prerequisites: BIOL 114 and BIOL 124; junior or senior classification; BIMS major with a minimum overall 2.5 Texas A&M GPA.

VIBS 310 Biomedical Writing  
Credit 1. 1 Lecture Hour.  
Mechanisms by which knowledge is shared among researchers, clinicians and other science professionals, then disseminated to the general public; an assortment of written assignments to develop writing skills specific for communicating scientific concepts to a variety of audiences. Must be taken on a satisfactory/unsatisfactory basis.  
Prerequisite: Junior or senior classification.

VIBS 311 Biomedical Explorations through Narrative  
Credit 1. 1 Lecture Hour.  
Familiarization with the writing style required for biomedical and health science; instruction in writing styles and appropriate techniques to increase and strengthen writing abilities. Must be taken on a satisfactory/unsatisfactory basis.  
Prerequisite: VIBS 310 or approval of instructor.

VIBS 343 Histology  
Credits 4. 3 Lecture Hours. 3 Lab Hours.  
Normal tissues of vertebrates including histogenesis of some; histogenesis and organography of mammalian tissues.  
Prerequisites: BIOL 114 and BIOL 124; CHEM 228; junior or senior classification; BIMS major with a minimum overall 2.5 Texas A&M GPA.

VIBS 401 Developmental Neurotoxicology  
Credits 2. 2 Lecture Hours.  
Effects of exposure to toxic substances on the developing nervous system; content to include mechanisms of toxicity of substances potentially devastating to the developing nervous system including lead, mercury and other heavy metals, alcohol, nicotine (smoking), pesticides, flame retardants, and others.  
Prerequisite: Junior or senior classification.

VIBS 404 Food Toxicology and Safety  
Credits 3. 3 Lecture Hours.  
Toxicity and safety of various foods and food additives, ingredients, and contaminants; occurrence, control and prevention of food transmitted diseases.  
Prerequisite: Junior or senior classification.

VIBS 407/NRSC 407 Core Ideas in Neuroscience  
Credit 1. 1 Lecture Hour.  
General overview of selected core ideas across the full spectrum of neuroscience.  
Prerequisite: Junior or senior classification; background in science courses recommended.  

VIBS 408 Neuroscience and Religion  
Credits 3. 3 Lecture Hours.  
Emphasis on the biology of the human mind in the context of religious implications.  
Prerequisites: Junior or senior classification; concurrent enrollment in NRSC 407/VIBS 407 or VIBS 407/NRSC 407.

VIBS 411 Tumor Cell Biology and Carcinogenesis  
Credits 3. 3 Lecture Hours.  
(3-0) Principles of tumor biology; role of gene-environment interactions; molecular mechanisms regulating cancer initiation and progression; therapeutic treatment of cancer.  
Prerequisites: BIMS 320/GENE 320 or equivalent; junior or senior classification.

VIBS 413 Introduction to Epidemiology  
Credits 3. 3 Lecture Hours.  
Study and measurement of disease and health in populations; examples from literature and current events; emphasizes concepts and appreciation for epidemiologic approaches and applications in life.  
Prerequisite: Junior or senior classification.

VIBS 420 Computer Applications in Public Health Research  
Credits 3. 2 Lecture Hours. 3 Lab Hours.  
Introduction to the use of computers for public health research applications, including word processing, spreadsheets, data base management and telecommunications.  
Prerequisites: Senior classification or approval of instructor; BIMS major with a minimum overall 2.5 Texas A&M GPA.

VIBS 422 Endocrine Toxicology  
Credits 4. 4 Lecture Hours.  
Impacts of endocrine toxicology on endocrine system; prevalence, environmental and occupational use and disposal of environmental endocrine disrupting chemicals (EDCs); structure, toxicokinetics and mechanism of action of EDCs; effects of EDCs on the development and function, disorders and diseases of the endocrine and reproductive organs.  
Prerequisites: Senior classification; approval of instructor.

VIBS 424/VTPP 424 Biomedical Neuroendocrinology and Endocrine Disorders  
Credits 3. 3 Lecture Hours.  
Neuroendocrine (hypothalamus-pituitary) control of puberty, menstruation, ovulation, pregnancy, labor, lactation, female reproductive cycles, male reproductive functions, thyroid and parathyroid, adrenal and kidney, diabetes, obesity, sleep, memory, learning and aging and their endocrine disorders; overview on biosynthesis, transport and signaling of peptide and neuropeptide hormones, steroids and prostaglandins.  
Prerequisites: Honors, junior or senior classification, or approval of instructor.  
Cross Listing: VTPP 424/VIBS 424.
VIBS 432 Public Health Practices
Credits 3. 3 Lecture Hours.
Study of various diseases, causes and methods of prevention; epidemiology of disease; social and behavioral sciences; health policy and management; environmental and occupational health.
Prerequisites: Junior or senior classification; BIMS major with a minimum overall 2.5 Texas A&M GPA.

VIBS 443 Biology of Mammalian Cells and Tissues
Credits 4. 3 Lecture Hours.
Molecular phenomena placed in context with tissues, organs and organ systems; cell and tissue structures visualized by light microscopy and electron micrographs for functional relationships; clinical correlations reveal relevance of histology in specific disease states; conceptual thinking exercises facilitate problem solving skills.
Prerequisites: Junior or senior classification in life sciences and interest in health related careers.

VIBS 447 Neurophysiology of Music
Credits 2. 2 Lecture Hours.
Exploration of the heritability and genetics of musical talent, the physiology and physics of hearing, and the neurophysiology of processing sound using primarily German and Austrian compositions. Must be taken on a satisfactory/unsatisfactory basis.
Prerequisite: Junior or senior classification.

VIBS 450 NRSC 450 Mammalian Functional Neuroanatomy
Credits 4. 3 Lecture Hours. 2 Lab Hours.
Functional morphology of the domestic animal and human brain using gross specimens, microscopic sections, interactive computer-, DVD- and video-assisted instructional programs supplemented with clinical case studies.
Prerequisites: Junior or senior classification; BIMS, biology, biochemistry, or psychology majors, or neuroscience minors with overall 3.5 Texas A&M GPA; or approval of instructor.
Cross Listing: NRSC 450/VIBS 450.

VIBS 485 Directed Studies
Credits 0 to 4. 0 to 4 Other Hours.
Directed individual study of a selected problem in veterinary anatomy (with emphasis on neuroscience, cell biology, reproduction, developmental biology, marine mammal anatomy) approved by instructor or selected problems in veterinary public health (with emphasis on food safety, toxicology, epidemiology, informatics, zoonoses).
Prerequisites: Junior or senior classification and approval of instructor.

VIBS 489 Special Topics in...
Credits 1 to 4. 0 to 4 Lecture Hours. 0 to 4 Lab Hours.
Selected topics in an identified area of veterinary anatomy (with emphasis on neuroscience, cell biology, genetics, reproduction, developmental biology, marine mammal anatomy) or selected topics in veterinary public health, epidemiology, zoonoses, food hygiene, food toxicology and mycotoxicology. May be repeated for credit.
Prerequisites: Junior or senior classification and approval of instructor; BIMS major with a minimum overall 2.5 Texas A&M GPA.

VIST - Visual Studies (VIST)

VIST 105 Principles of Design I
Credits 4. 2 Lecture Hours. 6 Lab Hours.
Survey of principles and theory of design and visual communication; elements and organizational structure of the visual language; sign, symbol, and meaning; visual perception; problem solving and the creative process; design in terms of value as well as color; emphasis on two-dimensional design.*

VIST 106 Principles of Design II
Credits 4. 2 Lecture Hours. 6 Lab Hours.
Fundamentals of spatial design; theory of form; transformations, additive/subtractive techniques as process; 3D composition; traditional modeling and construction techniques; formal visual analysis and critique.
Prerequisite: VIST 105.*

VIST 170 Introduction to Visualization Computing Environments
Credit 1. 2 Lab Hours.
Procedures, practices and environments useful for visual problem solving using programmatic languages; setup and use of the computing environment; useful system tools and commands; basic programming concepts and constructs.
Prerequisite: Visualization majors only or approval of instructor.

VIST 201 Writing for Design
Credit 1. 2 Lab Hours.
Writing as a discipline for the development, conceptualization, critique and presentation of visual works; emphasis on portfolio and narrative development.
Prerequisite: Major in visualization.

VIST 205 Principles of Design III
Credits 4. 2 Lecture Hours. 6 Lab Hours.
Introduction to the creative processes, workflows and methodologies used in the field of visualization including graphic design, interactivity and animation.
Prerequisites: ARTS 115; VIST 106; VIST 170.

VIST 206 Visual Studies Studio I
Credits 4. 2 Lecture Hours. 6 Lab Hours.
Theory and practice of traditional techniques for visual communication and visualization; the camera model; principles of physically based motion; time based media and animation; development of narrative and storytelling in the creative process.
Prerequisite: VIST 205.*

VIST 270 Computing for Visualization I
Credits 3. 3 Lecture Hours.
Introduction to the theory and practice of computer based problem solving; system tools; problem solving principles and practice; basics of software interaction and interface organization; development concepts and principles useful in digital art and visualization production.
Prerequisite: MATH 151; VIST 170.

VIST 271 Computing for Visualization II
Credits 3. 3 Lecture Hours.
Continuation of Computing for Visualization I; concepts of object oriented programming; emphasis on principles and techniques useful for three dimensional visualization and real time graphic display.
Prerequisite: MATH 152; VIST 270.
VIST 275 Introduction to Visualization
Credits 3. 3 Lecture Hours.
Introduction to visualization concepts, techniques and applications; introduction to significant visualization topics including cultural context, visual perception, the digital image, visual language, geometric modeling, animation, image creation, image compositing; application areas, ethical issues in visualization and the future of visualization.
Prerequisites: MATH 150 or equivalent; non-majors only.

VIST 284 Visualization Techniques
Credit 1. 2 Lab Hours.
Introduction to software used in the visual arts including 2D raster and vector systems, modeling, rendering, animation, post production and multimedia. Specific course content will vary based upon curriculum requirements. May be repeated for up to 3 credit hours.
Prerequisite: Major in visualization or minor in art.

VIST 289 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours. 0 to 4 Lab Hours.
Selected topics in an identified area of visualization. May be repeated for credit.
Prerequisite: Approval of instructor.

VIST 305 Visual Studies Studio II
Credits 3. 1 Lecture Hour. 5 Lab Hours.
Theory and practice of visual communication employing digital and conventional media; development of artistic concepts, proposal development and related implementation techniques; introduction to digital painting, 3D modeling, animatics and post production.
Prerequisites: VIST 206; upper level classification in visualization.*

VIST 310 Photography for Visualization
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Advanced aesthetic and thematic control of the digital image; exposure refinement; advanced lighting techniques and digital compositing; digital workflow; image conversion and control; color management; digital forensics; printing technology, processes and presentation.
Prerequisites: Visualization major or approval of instructor; junior or senior classification.

VIST 370 Interactive Virtual Environments
Credits 3. 3 Lecture Hours.
Languages and techniques useful for the creation of real time virtual environments; definition of formal scene description structures; modeling and transformation techniques; simulation techniques; behaviors and message passing; user interaction and animation; multiplayer environments; creating virtual interfaces; scripting techniques.
Prerequisite: Visualization majors; junior or senior classification; VIST 271.

VIST 372 Creating Digital Environments
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Terminology, principles and practices in the creation of 3D models; mathematical principles of geometrical modeling theory and application of modeling techniques; boolean operations; parametric modeling; modeling; particle systems; L-Systems; nurbs and/or grammar based techniques; lighting setup and control.
Prerequisite: Visualization majors; junior or senior classification; VIST 271.

VIST 374 Multimedia Design and Development
Credits 3. 2 Lecture Hours. 4 Lab Hours.
Concepts and techniques for integrating multimedia with user control and interactivity; production of computer presentations and interactive mobile devices; computer animation, graphics, production and use of digital images; scripting techniques; projects for stand-alone computers and mobile devices.
Prerequisite: Junior or senior classification or approval of instructor and undergraduate program coordinator.

VIST 375 Foundations of Visualization
Credits 3. 3 Lecture Hours.
A comprehensive introduction to visualization concepts, techniques and applications; major topic areas include cultural context, application areas, visual perception, the digital image, visual language, coordinate systems, geometric representation, modeling animation, image synthesis, image composing, ethics and the future of visualization.
Prerequisites: MATH 152; VIST 271; junior or senior classification.

VIST 405 Visual Studies Studio III
Credits 3. 1 Lecture Hour. 5 Lab Hours.
Theory and practice in the art and science of the visual image; scientific and mathematical principles as process; information theory and sensorial design; interactivity and user integration; integration of real and virtual environments including lighting design and material definition.
Prerequisites: VIST 305; CARC 301 or VIST 494.*

VIST 406 Visual Studies Studio IV
Credits 3. 1 Lecture Hour. 5 Lab Hours.
Theory and practice in the development of the digital image; non-traditional modeling methods; camera control and animation techniques; special effects; creative lighting methods; non-photorealistic rendering; integration of traditional and digital media in the creation of visual works.
Prerequisites: VIST 305; CARC 301 or VIST 494.*

VIST 432 Applied Perception
Credits 3. 3 Lecture Hours.
An advanced introduction to perceptual science, including the cognitive, neural and evolutionary processes that undergird perceptual systems as well as the variety of perceptual factors that influence design decision.
Prerequisite: Visualization major; junior or senior classification or approval of instructor.

VIST 441 Scientific and Technological Developments in Visual Arts
Credits 3. 3 Lecture Hours.
Advanced level course focusing on the relationship between art, science and technology; visual arts before the digital revolution; the development of computer graphic arts.
Prerequisite: Upper level classification or approval of the undergraduate program coordinator.

VIST 442 Digital Characters: Art, Technology, Uses and Meaning
Credits 3. 3 Lecture Hours.
Examination of the art and technology employed in the creation of digital characters; exploration of the reasons for, and impact of, their use in popular media and science; digital character creation techniques; estimating performance requirements; visual examples and written work used to illustrate topics and application areas.
Prerequisite: Junior or senior classification.

VIST 465 Art, Culture and Time Based Media
Credits 3. 2 Lecture Hours. 4 Lab Hours.
Exploration of perception, vision and self-expression for communication through time based media; investigation of expression, vision, and visual language as a process; practice of visual communication strategies.
Prerequisites: Junior or senior classification or approval of instructor.
VIST 470 Digital Rendering  
Credits 3. 3 Lecture Hours.  
Creation of photorealistic images; rendering techniques and control; perceptual and physical principles related to creating realistic images; lighting and environmental effects; properties of materials; rendering models and techniques for adding visual detail; shading languages.  
Prerequisite: Visualization majors; junior or senior classification; VIST 271.

VIST 472 Digital Compositing  
Credits 3. 3 Lecture Hours.  
History, mathematical foundations, techniques and applications used in combining two dimensional images for film, video and multimedia; includes theoretical foundations of the digital image, color spaces and corrections, matte techniques, keying, rotoscoping, camera and object tracking, stereo compositing and process workflow.  
Prerequisite: VIST 271, junior or senior classification.

VIST 474 Designing for the Web  
Credits 3. 2 Lecture Hours. 4 Lab Hours.  
Principles of web page and site creation; elements of visual design; typography for the web; web technologies; controlling the page real estate through cascading style sheets (CSS); imaging for the web; creation and use of color and graphics; web standards; building complete web sites.  
Prerequisite: Junior or senior classification or approval of instructor and undergraduate program coordinator.

VIST 484 Summer Internship  
Credits 3. 3 Lecture Hours.  
Practical experience in a visualization related company; 10-week internship with a minimum of 400 hours continuous employment; departmental pre-approval through the departmental internship coordinator required; post evaluation conducted following the internship. May not be repeated for credit.  
Prerequisites: Upper level classification in visualization and approval of visualization intern coordinator.

VIST 485 Directed Studies  
Credits 1 to 6. 1 to 6 Other Hours.  
Special problems in visual studies. May be repeated for up to 9 credit hours.  
Prerequisite: Approval of instructor and undergraduate program coordinator.

VIST 486 Introduction to Game Design  
Credits 3. 3 Lecture Hours.  
Computer game design; emphasis on interactive storytelling, game play and interface design; history of computer games, review of selected games; analysis of rules of play and simple game prototype development.  
Prerequisite: Junior or senior classification.

VIST 487 Game Development  
Credits 3. 2 Lecture Hours. 2 Lab Hours.  
Aesthetic and technical aspects of computer game development, including game mechanics, story development, content creation and game programming; includes game design, interface design, 3D modeling and animation, graphics algorithms, shader programming and artificial intelligence; group project includes the design and development of a game from start to finish.  
Prerequisite: VIST 486 or CSCE 441 or approval of instructor; junior or senior classification.

VIST 489 Special Topics in...  
Credits 1 to 4. 1 to 4 Lecture Hours. 0 to 4 Lab Hours.  
Special Topics in... Selected topics in an identified field of visual studies. May be repeated for up to 9 credit hours.  
Prerequisite: Approval of instructor and undergraduate program coordinator.

VIST 491 Research  
Credits 1 to 4. 1 to 4 Other Hours.  
Research conducted under the direction of faculty members in visualization; emphasis on visual studies. May be repeated 2 times for credit.  
Prerequisites: Upper level classification; approval of instructor and undergraduate program coordinator.

VIST 494 Internship  
Credits 6. 6 Other Hours.  
Practical experience in a visualization related company; equivalent of 600 hours over at least 15 weeks; departmental pre-approval through the departmental internship coordinator required; post evaluation conducted following the internship. May not be repeated for credit.  
Prerequisites: Upper level classification in visualization and approval of visualization intern coordinator.

VLCS-Vet Large Animal Clin Sc (VLCS)  

VLCS 422 Equine Disease and Epidemiology  
Credits 3. 3 Lecture Hours.  
Principles and methods of epidemiology applied to equine health and prevention and control of selected equine infectious diseases.  
Prerequisite: Enrollment in equine certificate and junior or senior classification, or approval of instructor.

VLCS 485 Directed Studies  
Credits 0 to 4. 0 to 4 Other Hours.  
Directed individual study of selected problems in biomedical sciences approved by instructor. May be repeated for credit.  
Prerequisites: Senior classification in biomedical science and approval of department head.

VSCS-Vet Small Animal Clin Sc (VSCS)  

VSCS 485 Directed Studies  
Credits 0 to 4. 0 to 4 Other Hours.  
Directed individual study of a selected problem in biomedical sciences approved by instructor. May be repeated for credit.  
Prerequisites: Junior or senior classification and approval of department head and instructor.
VTPB - Veterinary Pathobiology (VTPB)

VTPB 212 Genetics in the News
Credits 3. 3 Lecture Hours.
Use of contemporary news articles from the popular press to delve into the science of genetics and genomics and their methodologies to gain a deeper understanding of how data is analyzed and interpreted leading to news headlines.
Prerequisites: Sophomore classification or approval of instructor; high school or college course in biology recommended.

VTPB 221 Great Diseases of the World
Credits 3. 3 Lecture Hours.
Great infectious and parasitic diseases; introduction to the major diseases affecting humans and other mammals including plague, tuberculosis, AIDS and malaria.
Prerequisite: Freshman or sophomore classification.

VTPB 285 Directed Studies
Credits 0 to 4. 0 to 4 Other Hours.
Directed individual study of selected problems in microbiology, parasitology, immunology, genetics or pathology as approved by instructor.
Prerequisites: Approval of department head; freshman or sophomore classification.

VTPB 289 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Selected topics in an identified area of veterinary pathobiology. May be repeated for credit.
Prerequisite: Freshman classification.

VTPB 301/WFSC 327 Wildlife Diseases
Credits 3. 3 Lecture Hours.
Basic mechanisms of diseases as they occur in wildlife populations; interplay of habitat requirements, individual physiological requirements and disease producing mechanisms of varied wildlife species.
Prerequisite: Junior classification or approval of department head. Cross Listing: WFSC 327/VTPB 301.

VTPB 303 Medical Communication in the International Community
Credits 2. 2 Lecture Hours.
To develop an awareness that there is a culture associated with the practice of veterinary and human medicine in other countries.
Prerequisite: Junior or senior classification.

VTPB 334 Poultry Diseases
Credits 4. 3 Lecture Hours. 2 Lab Hours.
Poultry sanitation and diseases. Prevention and control of environmental, nutritional, parasitic and contagious diseases.
Prerequisites: BIOL 113 and BIOL 123; junior or senior classification.

VTPB 404 Amazon Field School
Credits 4. 4 Lecture Hours.
Investigation of social and ecological complexities of biodiversity conservation in tropical ecosystems; biological and social science approaches to evaluate causes, consequences and solutions to biodiversity loss through ecology, culture and governance.
Prerequisites: Junior or senior classification with a minimum GPA of 2.0 and approval of instructor. Cross Listing: RPTS 454 and WFSC 454.

VTPB 405 Biomedical Microbiology
Credits 5. 3 Lecture Hours. 5 Lab Hours.
Fundamentals of bacteriology, mycology, virology, infectious diseases, immunology and identification of pathogenic microorganisms.
Prerequisite: Junior classification in a biological science.

VTPB 407 Advanced Veterinary Microbiology Laboratory
Credits 1 to 3. 1 to 4 Lab Hours.
Modular course (one credit per module) that covers immunological and molecular techniques used with bacteria, parasites and viruses in animals for diagnostic and identification purposes.
Prerequisites: VTPB 405, VTPB 409 and VTPB 438 or concurrent enrollment; junior or senior classification.

VTPB 408 Clinical Microbiology
Credits 4. 2 Lecture Hours. 5 Lab Hours.
Practical application of clinical bacteriology and mycology; laboratory identification of pathogenic organisms.
Prerequisites: VTPB 405; junior or senior classification.

VTPB 409 Introduction to Immunology
Credits 3. 3 Lecture Hours.
Diverse concepts relative to immunologic mechanisms inherent to domestic and laboratory animals.
Prerequisite: Advanced classification.

VTPB 410 Cell Mechanisms of Disease
Credits 3. 3 Lecture Hours.
Mechanisms, morphologic manifestations and clinical signs of disease processes at the cellular level.
Prerequisites: VTPP 423 or registration therein; junior or senior classification.

VTPB 412 Techniques of Clinical Pathology
Credits 4. 3 Lecture Hours. 3 Lab Hours.
Theory and pathophysiologic principles underlying laboratory evaluation of disease states; principles of analytical methods with applications in the contemporary biomedical laboratory considered, using selected hematology and clinical chemistry techniques as examples.
Prerequisites: CHEM 228 and CHEM 238; VTPP 423; senior classification in a biological science or approval of instructor.

VTPB 415 Immunogenetics and Comparative Immunology
Credits 3. 3 Lecture Hours.
Genetic mechanisms used to diversify immune receptors; immunoglobulins, T cell receptors, major histocompatibility complex, natural killer cell receptors, toll-like receptors and many others; selected comparative and veterinary examples of different immune recognition systems; evolution of the immune system.
Prerequisites: Junior or senior classification, GENE 320/BIMS 320 and VTPB 409 or approval of instructor.

VTPB 421 Bacterial Diseases of Humans and Animals
Credits 3. 3 Lecture Hours.
Pathogenesis of selected bacterial pathogens of humans and animals; bacterial virulence factors, host immune responses; current concepts of extracellular, facultative intracellular and obligate intracellular bacterial diseases.
Prerequisites: VTPB 405 and VTPB 409; junior or senior classification.

VTPB 438 Biomedical Virology
Credits 3. 3 Lecture Hours.
Fundamental study of nature and characteristics of human and animal viruses; classification, morphology, chemical structure, ability to cause disease and nature of resulting disease.
Prerequisite: 3 hours of microbiology or approval of instructor.
VTPB 452 Clinical Veterinary Mycology  
Credits 3. 2 Lecture Hours. 2 Lab Hours.  
Practical application of clinical mycology; laboratory identification of important fungal and actinomycotic organisms.  
Prerequisites: Junior or senior classification; VTPB 405 or approval of instructor.

VTPB 454/MARB 454 Ornamental Fish Health Management  
Credits 3. 3 Lecture Hours.  
Maintenance and health care of ornamental fish in closed recirculating systems; aquariology, anatomy and physiology, nutrition, immunology, infectious and noninfectious diseases, checklists, quarantine procedures and health maintenance of ornamental fish.  
Prerequisites: VTPB 405 or BIOL 351; BICH 410 or MARS 360; junior or senior classification.  
Cross Listing: MARB 454.

VTPB 485 Directed Studies  
Credits 0 to 4. 0 to 4 Other Hours.  
Directed individual study of selected problems in microbiology, parasitology, immunology, genetics or pathology as approved by instructor.  
Prerequisites: Approval of department head; junior or senior classification.

VTPB 487/BIOL 487 Biomedical Parasitology  
Credits 4. 3 Lecture Hours. 2 Lab Hours.  
Helminth and protozoan parasites of medical and veterinary importance; life cycles, morphology, taxonomic classification, economic and public health aspects and current topics in parasitic diseases.  
Prerequisites: BIOL 107 or BIOL 114; junior classification or approval of instructor.  
Cross Listing: BIOL 487/VTPB 487.

VTPB 489 Special Topics in...  
Credits 1 to 4. 1 to 4 Lecture Hours. 0 to 4 Lab Hours.  
Selected topics in an identified area of microbiology, pathology, genetics, immunology, parasitology, or physiological chemistry. May be repeated for credit.  
Prerequisites: Junior or senior classification and approval of department head.

VTPP - Vet Physiology & Pharm (VTPP)

VTPP 123 Foundations of Physiology  
Credits 3. 3 Lecture Hours.  
Introduction to fundamental concepts in physiology and the practice of physiology research through exploration of mathematical models used in physiology research; emphasis on prediction of complex adaptive behavior in health and disease from elementary math, physics, chemistry and biology.

VTPP 223 Design of Experiments for Physiology Research  
Credits 3. 2 Lecture Hours. 2 Lab Hours.  
Team or group formulation and refinement of novel hypotheses and design of controlled in vitro experiments; emphasis on production of publishable research in physiology.  
Prerequisite: VTPP 123 or approval of instructor.

VTPP 224 In Vitro Experimentation in Physiology Research  
Credits 3. 2 Lecture Hours. 2 Lab Hours.  
Team or group collection, analysis and interpretation of data from in vitro experiments; emphasis on production of publishable research in physiology.  
Prerequisite: VTPP 223 or approval of instructor.

VTPP 234 Design of Models for Physiology Research  
Credits 3. 3 Lecture Hours.  
Team or group design of novel models of physiological systems to predict homeostatic behavior arising from the interaction of subsystems; emphasis on production and formal presentation of basic research in physiology.  
Prerequisite: VTPP 123 or approval of instructor.

VTPP 235 Analysis and Validation of Models for Physiology Research  
Credits 3. 3 Lecture Hours.  
Team or group analysis and validation of models of physiological systems to explain disease states and design potential clinical interventions; emphasis on production of publishable applied research in physiology.  
Prerequisite: VTPP 234 or approval of instructor.

VTPP 281 Seminar  
Credits 4. 4 Other Hours.  
Exposure to scientists from a variety of biomedical disciplines through attendance at seminars followed by review and discussion of current scientific work in physiology and related subjects, and subsequent student seminar presentations.  
Prerequisites: Freshman or sophomore classification; approval of instructor.

VTPP 285 Directed Studies  
Credits 0 to 4. 0 to 4 Other Hours.  
Course for freshman and sophomore students who desire additional laboratory work in physiology to supplement required courses.  
Prerequisites: Freshman or sophomore classification; approval of department head.

VTPP 289 Special Topics in...  
Credits 1 to 4. 1 to 4 Lecture Hours. 0 to 4 Lab Hours.  
Selected topics in an identified area of veterinary physiology and pharmacology. May be repeated for credit.  
Prerequisite: VTPP 291 Research.

VTPP 291 Research  
Credits 0 to 4. 0 to 4 Other Hours.  
Laboratory and/or field research supervised by a faculty member.  
Prerequisites: Freshman or sophomore classification; approval of instructor.

VTPP 323 Physiology of Domestic Animals  
Credits 3. 3 Lecture Hours.  
Physiology essential to understanding of life processes. For students in agriculture and related fields.  
Prerequisite: Junior classification.

VTPP 401 History of Human and Veterinary Medicine in Europe  
Credits 4. 4 Lecture Hours.  
Addresses the major developments in human and veterinary medicine in Europe from the Middle Ages to the present; explores key events and figures in medical history and analyzes issues of current biomedical concern in an historical context; for example, animal rights, ethics of human experimentation, euthanasia.
VTPP 423 Biomedical Physiology I  
Credits 4.3 Lecture Hours. 2 Lab Hours.  
Physiological principles, review of cellular physiology, and development of an understanding of the nervous system and muscle, cardiovascular, and respiratory physiology; clinical applications related to organ systems.  
Prerequisites: VIBS 305; junior or senior classification.  
VTPP 424/VIBS 424 Biomedical Neuroendocrinology and Endocrine Disorders  
Credits 3.3 Lecture Hours.  
Neuroendocrine (hypothalamus-pituitary) control of puberty, menstruation, ovulation, pregnancy, labor, lactation, female reproductive cycles, male reproductive functions, thyroid and parathyroid, adrenal and kidney, diabetes, obesity, sleep, memory, learning and aging and their endocrine disorders; overview on biosynthesis, transport and signaling of peptide and neuropeptide hormones, steroids and prostaglandins.  
Prerequisites: Honors, junior or senior classification, or approval of instructor.  
Cross Listing: VIBS 424/VTPP 424.  
VTPP 425 Pharmacology  
Credits 3.3 Lecture Hours.  
Introduction to pharmacokinetics and pharmacodynamics; survey of major pharmaceutical classes; uses, mechanisms of action and adverse reactions of selected agents.  
Prerequisites: VTPP 423 or approval of instructor; junior or senior classification.  
VTPP 427 Biomedical Physiology II  
Credits 3.3 Lecture Hours.  
Continuation of VTPP 423. Fluid balance and acid-base balance; development of an understanding of renal, gastrointestinal, endocrine and reproductive physiology using human and other mammalian models; clinical applications related to organ systems.  
Prerequisites: VTPP 423; junior or senior classification.  
VTPP 429 Introduction to Toxicology  
Credits 3.3 Lecture Hours.  
An overview of toxicology with emphasis on environmental, human and animal health issues.  
Prerequisite: Junior or senior classification.  
VTPP 434 Physiology for Bioengineers I  
Credits 4.3 Lecture Hours. 1 Lab Hour.  
Cellular anatomy, cellular physiology and biochemistry; systems analysis of digestive, endocrine and musculoskeletal system function including information related to gross anatomy, histology and disease states; quantitative aspects of physiology and engineering applications to clinical medicine.  
Prerequisites: Junior or senior classification; biomedical engineering major or approval of instructor.  
VTPP 435 Physiology for Bioengineers II  
Credits 4.3 Lecture Hours. 1 Lab Hour.  
A systems analysis of nervous, cardiovascular, respiratory and urinary function including information related to gross anatomy, histology and disease states; quantitative aspects of physiology and engineering applications to clinical medicine.  
Prerequisites: VTPP 434; junior or senior classification.  
VTPP 438 Analysis of Genomic Signals  
Credits 3.2 Lecture Hours. 2 Lab Hours.  
Overview of current high throughput technology for data acquisition and analysis of genomic signals (e.g. mRNA or proteins); emphasis on the microarray technology, methods for analyzing microarray data, and approaches to model the underlying phenomena from the systems biology perspective.  
Prerequisites: Junior or senior classification; BIMS 320/GENE 320 or GENE 320/BIMS 320 and BIOL 111, BIOL 112 or BIOL 213 or equivalent; STAT 302 or equivalent.  
VTPP 439 Non-Coding RNA’s  
Credits 3.3 Lecture Hours.  
Advanced topics in noncoding RNA’s in gene regulation; investigation of the role of noncoding RNAs and epigenetic regulatory factors in modulating gene expression, physiological functions and disease development.  
Prerequisite: Junior or senior classification or approval of instructor.  
VTPP 444 Practicum in Biomedical Research  
Credits 3.3 Other Hours.  
Team or group development of sustainable collaborations that include biomedical research, high-impact educational practices and community service; focus on connecting research experience to future career goals.  
Prerequisites: VTPP 423 and VTPP 427 or VTPP 434 and VTPP 435; junior or senior classification.  
VTPP 450 Stem Cell Physiology  
Credits 3.3 Lecture Hours.  
Advanced topics in stem cell biology; exploration of mammalian stem cells, stem cell characteristics, cell differentiation potency, molecular basis of stem cell signaling, regulatory pathways, research tools and experimental models.  
Prerequisite: Junior or senior classification or approval of instructor.  
VTPP 452 Fetal and Embryo Physiology  
Credits 3.3 Lecture Hours.  
Introduction to the physiologic processes driving embryonic development and pregnancy; focus on embryo implantation, establishment of the placenta, development of the fetal circulatory systems and the molecular processes governing embryo differentiation and development; special emphasis on the major organ systems affected by pediatric disease and on the actions of teratogens.  
Prerequisite: BICH 410 or equivalent, or approval of instructor.  
VTPP 481 Seminar  
Credits 4.4 Other Hours.  
Exposure to scientists from a variety of biomedical disciplines through attendance at seminars followed by review and discussion of current scientific work in physiology and related subjects, and subsequent student seminar presentations.  
Prerequisites: Junior or senior classification; approval of instructor.  
VTPP 485 Directed Studies  
Credits 0 to 4.0 to 4 Other Hours.  
Course for junior and senior students who desire additional laboratory work in physiology to supplement required courses.  
Prerequisites: Junior or senior classification and approval of department head.  
VTPP 489 Special Topics in...  
Credits 1 to 4.1 to 4 Lecture Hours. 0 to 4 Lab Hours.  
Selected topics in an identified area of physiology, pharmacology, endocrinology or toxicology. May be repeated for credit.  
Prerequisite: Junior or senior classification.
VTPP 491 Research
Credits 0 to 4. 0 to 4 Other Hours.
Laboratory and/or field research supervised by a faculty member.
Prerequisites: Junior or senior classification; approval of instructor.

WFSC-Wildlife & Fisheries Sci (WFSC)

WFSC 101 Introduction to Wildlife and Fisheries
Credit 1. 1 Lecture Hour.
Introduction to the wildlife and fisheries profession and to alternatives for study in the department.
Prerequisite: Open only to students with less than 36 hours at Texas A&M University. Registration through the Department of Wildlife and Fisheries Sciences only.

WFSC 291 Research
Credits 1 to 4. 1 to 4 Other Hours.
Research conducted under the direction of faculty member in wildlife and fisheries sciences. May be repeated 3 times for credit.
Prerequisites: Freshman or sophomore classification and approval of instructor.

WFSC 300/ENTO 300 Field Studies
Credits 3. 3 Other Hours.
Integration of principles of animal and plant ecology with environmental factors to characterize wildlife populations. Intensive analysis of specific areas will emphasize either the development of a wildlife management plan or a general vertebrate natural history survey.
Prerequisite: Prior approval of instructor.
Cross Listing: ENTO 300/WFSC 300.*

WFSC 301 Wildlife and the Changing Environment
Credits 3. 3 Other Hours.
Using an ecosystem approach, analyzes changes in the North American environment; effects of these changes on wildlife populations; and reviews areas of major, current concern.
Prerequisites: Junior or senior classification; restricted to non-majors.

WFSC 302 Natural History of the Vertebrates
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Introduction to life histories of fishes, amphibians, reptiles, birds and mammals; lecture covers vertebrate groups on a worldwide scale and emphasizes a comparative approach to the study of adaptation to the environment; lecture topics include behavior, reproduction, feeding specializations, evolutionary history, locomotion, hibernation, migration, endangered species, zoogeography and importance to man; laboratory emphasizes the recognition of Texas vertebrates. Designed for both science and non-science majors.
Prerequisites: BIOL 111 and BIOL 112 or BIOL 101 and BIOL 107 or equivalent.*

WFSC 303 Fish and Wildlife Laws and Administration
Credits 3. 3 Lecture Hours.
Review and analysis of state and federal laws and international treaties and conventions affecting fish and wildlife; their application and administration; organizational structure of state, federal and international agencies; their objectives, policies and practices.
Prerequisite: RENR 205 or BIOL 357; junior classification. Prerequisite: Junior classification.

WFSC 304 Wildlife and Fisheries Conservation
Credits 3. 3 Lecture Hours.
Ecological principles used to conserve and manage wildlife and fisheries resources at the individual, population and community levels; topics include conservation biology, species interactions, animal-habitat relationships, population dynamics and harvesting, habitat management and restoration and human dimensions of fish and wildlife conservation.
Prerequisites: RENR 205 and junior or senior classification or approval of instructor.*

WFSC 311 Ichthyology
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Introduction to the study of fishes, their biology, classification, evolution, distribution, ecology and economic importance.
Prerequisite: WFSC 302 or BIOL 318.*

WFSC 315 Herpetology
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Evolutionary ecology of reptiles and amphibians and conservation biology of the major groups; labs concentrate on the global diversity of herps and the herpetofauna of Texas; foundation for students in wildlife science and biology.
Prerequisites: WFSC 302 or approval of instructor; WFSC 302 or BIOL 318.*

WFSC 316 Field Herpetology
Credit 1. 3 Lab Hours.
Field work involving collection and preservation of herpetological specimens; natural history, ecological relations. Available for students enrolled in WFSC 315 who would like to have field trips.
Prerequisite: WFSC 315 or registration therein.*

WFSC 327/VTPB 301 Wildlife Diseases
Cross Listing: VTPB 301/WFSC 327.*

WFSC 335 Natural History of the Invertebrates
Credits 3. 2 Lecture Hours. 3 Lab Hours.
A phyleogenetic survey of the invertebrate phyla including their taxonomy, morphology, life histories, ecology, ethnology and zoogeography. Field trips may be required for which departmental fees may be assessed to cover costs.

WFSC 401 General Mammalogy
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Mammalian biology; evolution, classification, biogeography, reproduction, physiology, ecology, and behavior; focuses on basic concepts necessary for a foundation in both wildlife science and biology.
Prerequisites: WFSC 302 or BIOL 318; junior classification.*

WFSC 402 General Ornithology
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Introduction to study of birds, their structure, classification, geographic distribution, ecological relations and economic status; foundation of wildlife science, also for museum work.
Prerequisites: WFSC 302 or BIOL 318; junior classification.*
WFSC 403 Animal Ecology
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Concepts of animal ecology which emerge at various levels of organization; the ecosystem, the community, the population and the individual; laboratories emphasis on the quantitative analysis of field data and the simulation of population dynamics.
Prerequisites: WFSC 201 and RENR 205 or approval of instructor; junior classification.*

WFSC 404 Aquatic Ecosystems
Credits 3. 3 Lecture Hours.
Inland and coastal zone aquatic ecosystems, lower foodweb structure, functioning and influence on living resources; lakes, rivers, estuaries, open bay systems, factors impacting ecosystem health and fisheries; harmful algal blooms, reduced water inflows, eutrophication and hypoxia formation as they affect foodwebs, recruitment of commercially and recreationally important fisheries.
Prerequisite: Junior or senior classification or approval of instructor.

WFSC 405 Urban Wildlife and Fisheries
Credits 3. 3 Lecture Hours.
Urban wildlife and fisheries trains students to establish and maintain diverse, self-sustaining urban wildlife and fish populations at levels in harmony with ecological, social, and economic values of the human community and to develop optimal levels of public appreciation and use of urban wildlife and fish resources and associated habitats.
Prerequisites: RENR 205; junior or senior classification.

WFSC 406 Wildlife Habitat Management
Credits 3. 3 Lecture Hours.
Designed to acquaint the student with major land use practices on lands that produce wildlife, how these influence wildlife production and alterations or manipulations of habitat used to achieve specific wildlife management goals.
Prerequisites: WFSC 201 and WFSC 403; WFSC 401 or WFSC 402; senior classification; wildlife and fisheries sciences major or approval of instructor; concurrent registration in WFSC 407 required.

WFSC 407 Field Wildlife Habitat Management
Credit 1. 2 Lab Hours.
Field and laboratory studies of specific wildlife habitat management practices with special emphasis on those used in Texas; attendance required at four weekend field trips to study wildlife habitat operations.
Prerequisite: Concurrent registration in WFSC 406 required.*

WFSC 408 Techniques of Wildlife Management
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Techniques available to directly and indirectly manipulate wild animal populations to achieve balance between socioeconomic and aesthetic values.
Prerequisites: Senior classification; WFSC 403 and WFSC 406 or registration therein or approval of instructor.*

WFSC 409 NATURE in the Classroom: Needed Activities To Understand Resource Ecology
Credit 1. 3 Lab Hours.
Integration of natural resources through conservation ecology programs, utilization of research techniques adaptable for classroom use; field trips to community facilities, gaming strategies and computer simulations.
Prerequisites: WFSC 420 or RENR 205 or concurrent enrollment; junior or senior classification.

WFSC 410 Principles of Fisheries Management
Credits 4. 3 Lecture Hours. 3 Lab Hours.
Basic knowledge from ichthyology, biology of fishes and limnology related to applied aspects of freshwater and marine fishery science. Management techniques applicable to streams, ponds, reservoirs, estuaries and the oceans.
Prerequisites: WFSC 311 and WFSC 414; STAT 302 or concurrent enrollment; or approval of instructor.*

WFSC 414 Ecology of Lakes and Rivers
Credits 4. 3 Lecture Hours. 3 Lab Hours.
Biological, physical, chemical and geological characteristics of fresh waters; human impacts, which include influence of industrial, domestic, conservation and restoration activities.
Prerequisites: CHEM 101 and CHEM 222; PHYS 201; junior or senior classification.*

WFSC 417 Biology of Fishes
Credits 4. 3 Lecture Hours. 3 Lab Hours.
Fishes’ physiological and morphological adaptations for life in aquatic systems; physiological and behavioral responses of fish to environmental variation. Laboratory emphasizes design, conduct and analysis of virtual experiments featuring “EcoFish,” a simulation model of fish autoecology.
Prerequisites: WFSC 302 or WFSC 311; WFSC 414; or approval of instructor.

WFSC 418 Ecology of the Coastal Zone
Credits 3. 3 Lecture Hours.
Introduction to the ecosystems that comprise the coastal zone with an emphasis on the role of freshwater inflows; open bay systems are the focus of lectures, but fringing habitats are also discussed; human components of the coastal zone are also discussed including industrial, commercial domestic, conservation and restoration issues.
Prerequisite: Junior or senior classification.

WFSC 419 Wildlife Restoration
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Study of the fundamentals of the restoration of animal populations and the resources they require; factors that control the distribution and abundances of animals in relation to restoration; and how restoration plans for wildlife are developed.
Prerequisite: RENR 205 or equivalent; junior or senior classification or approval of instructor; WFSC 406 and WFSC 407 and ESSM 320 preferred.

WFSC 420 Ecology and Society
Credits 3. 3 Lecture Hours.
Study and compare human and natural ecosystems using diversity, interrelations, cycles, and energy as the conceptual organization; central themes are sustainability, stewardship and science.
Prerequisite: Junior or senior classification.

WFSC 422 Ethology
Credits 3. 3 Lecture Hours.
Survey of the control, ontogeny, function and natural selection of behavior in a variety of vertebrate and invertebrate species; interaction between the organism and its environment with regard to the mechanisms and adaptive significance of behavior; evolution of anti-predator, feeding, reproductive and cooperative traits.
Prerequisite: BIOL 112 or equivalent.*
WFSC 423 Aquaculture
Credits 4. 3 Lecture Hours. 3 Lab Hours.
Principles of fish production for stock enhancement and human food. Species of fish used for production, cross-breeding and selection; feeds and feeding of fishes and nutritional and environmental requirements for optimum productivity; effects of fish production on land and water uses as related to conservation.*

WFSC 425 Marine Fisheries
Credits 3. 3 Lecture Hours.
Survey of fisheries for marine vertebrates and invertebrates primarily in the Gulf of Mexico and South Atlantic with special emphasis being directed to their biology, economics and management.*

WFSC 426/MARB 426 Aquatic Animal Nutrition
Credits 3. 3 Lecture Hours.
Chemistry, digestion, absorption and intermediary metabolism of nutrient classes with special emphasis on their relationship to warmwater fish nutrition; determination of nutrient requirements, feed evaluation, feed processing, ration formulation and feeding practices.
Prerequisites: CHEM 222; CHEM 227 or equivalent. Taught even years.
Cross Listing: MARB 426.*

WFSC 427 Disease Management in Fisheries and Aquaculture
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Fish and invertebrates of economic importance; factors influencing the maintenance of health for each species group; problems and solutions unique to each phase of aquaculture from breeding to growout; application of routine diagnosis and other management tools.
Prerequisite: Junior classification.*

WFSC 428 Wetland Ecosystem Management
Credits 4. 3 Lecture Hours. 3 Lab Hours.
Ecosystem approach to the ecology and management of wetlands; emphasis on factors controlling wetland structure and function, characteristics of different wetland types, and applied issues of wetland restoration, creation and delineation.
Prerequisite: Junior or senior classification.*

WFSC 432 Molecular Ecology in Wildlife and Fisheries
Credits 3. 3 Lecture Hours.
Fundamentals of molecular ecology applied to conservation and management of wildlife and fisheries; presentation and discussion of scientific papers on wildlife and fisheries molecular ecology; topics in conservation, management and aquaculture.
Prerequisites: BIOL 112 or equivalent; junior or senior classification.

WFSC 444 Aquaculture I: Principles and Practices
Credits 4. 3 Lecture Hours. 3 Lab Hours.
Scientific perspectives concerning major principles associated with fish production under controlled conditions; production techniques associated with prominent species produced via aquaculture throughout the world with emphasis on those cultured in the United States.
Prerequisite: Junior or senior classification or approval of instructor.

WFSC 447 Aquaculture II: Aquatic Animal Nutrition, Feeding and Disease Management
Credits 4. 3 Lecture Hours. 3 Lab Hours.
Review of scientific perspectives on major aspects of nutrition, diet formulation and feeding of aquatic species in aquaculture; major disease-causing organisms encountered in aquaculture and means of disease prevention and control.
Prerequisite: Junior or senior classification or approval of instructor.

WFSC 448 Fish Ecophysiology
Credits 3. 3 Lecture Hours.
Ecological domains and demands placed on physiological performance; physiological mechanisms and control in fishes, interaction of physiological mechanisms with environment, emphasis in adaptive value of physiological traits; analysis of physiology and adaptation with models; process and functional modeling.
Prerequisite: WFSC 311 or concurrent enrollment, junior or senior classification or approval of instructor.

WFSC 449 Professional Aspects of Aquatic Ecology
Credits 3. 3 Lecture Hours.
Discipline of aquatic sciences through oral presentation and written documentation; job market expectations, resume preparation, job application, and preparation for and giving an interview.
Prerequisite: Junior or senior classification or approval of instructor.

WFSC 450/ENTO 450 Caribbean Conservation
Credits 2. 6 Lab Hours.
Provide experience in and appreciation for diverse tropical habitats and the problems associated with conserving these habitats; design and conduct individual research projects on topics of their choice with approval from the instructors on project design and feasibility.
Prerequisites: Concurrent enrollment in ENTO 300/WFSC 300 and ENTO 451/WFSC 451; junior or senior classification.
Cross Listing: ENTO 450/WFSC 450.

WFSC 451/ENTO 451 Caribbean Research Seminar
Credit 1. 1 Other Hour.
Document research activities; keep a journal of activities and research methods during study abroad trips.
Prerequisites: Concurrent enrollment in ENTO 300/WFSC 300 and ENTO 451/WFSC 451; junior or senior classification.

WFSC 454 Amazon Field School
Credits 4. 4 Lecture Hours.
Investigation of social and ecological complexities of biodiversity conservation in tropical ecosystems; biological and social science approaches to evaluate causes, consequences and solutions to biodiversity loss through ecology, culture and governance.
Prerequisites: Junior or senior classification with a minimum GPA of 2.0 and approval of instructor.
Cross Listing: RPTS 454 and VTPB 404.

WFSC 462/BIOL 462 Amazon River Tropical Biology
Credits 3. 3 Lecture Hours.
History, ecology, evolutionary-biology, geography, and culture of the Amazon River and Rio Negro; exploration of the world’s most bio-diverse river during a 10-day expedition from Manaus, Brazil; survey biota, record observations about the ecosystem, select research topics, development of presentations.
Prerequisites: BIOL 107, BIOL 112, BIOL 113, BIOL 357 or RENR 205; or approval of instructor.
Cross Listing: BIOL 462/WFSC 462.

WFSC 481 Seminar
Credit 1. 1 Lecture Hour.
Oral discussion of selected topics from technical literature on recent advances in the field.
Prerequisites: Senior classification in wildlife and fisheries sciences; 6 hours of 300- or 400-level wildlife and fisheries sciences courses. May be repeated for credit.
WFSC 484 Internship
Credits 1 to 9. 1 to 9 Other Hours.
Practical experience working in a professional wildlife or fisheries facility.
Prerequisite: Approval of department head.
WFSC 485 Directed Studies
Credits 1 to 3. 1 to 3 Other Hours.
Individual study and research on selected problem approved by instructor and academic advisor.
Prerequisites: Junior or senior classification; approval of department head.
WFSC 489 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours. 0 to 4 Lab Hours.
Selected topics in an identified area of wildlife and fisheries sciences. May be repeated for credit.
Prerequisite: Approval of department head.*
WFSC 491 Research
Credits 1 to 6. 1 to 6 Other Hours.
Credit 1 to 6 each semester. Laboratory and/or field research supervised by a faculty member in wildlife and fisheries sciences. Registration in multiple sections of this course are possible within a given semester provided that the per semester credit hour limit is not exceeded.
Prerequisites: Junior or senior classification; approval of instructor.

WGST - Women's &Gender Studies (WGST)

WGST 200 Introduction to Women's and Gender Studies
Credits 3. 3 Lecture Hours.
Historical and cross-cultural perspectives on women's roles in culture, the workplace, the family and other socio-political institutions; the social construction of gender; sexuality and racism; social control mechanisms and ideologies.
WGST 207/SOCI 207 Introduction to Gender and Society
Credits 3. 3 Lecture Hours.
Similarities and differences between females and males in a number of cultures throughout the world; sociological analysis of gender in relation to social structure.
Cross Listing: SOCI 207/WGST 207.
WGST 285 Directed Studies
Credits 0 to 3. 0 to 3 Other Hours.
Readings and/or research for specific needs of students majoring or minoring in women's and gender studies.
Prerequisites: Approval of women's and gender studies director and faculty supervisor.
WGST 289 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours. 0 to 4 Lab Hours.
Selected topics in an identified area of women's/gender studies. May be repeated for credit.
Prerequisite: Approval of director.
WGST 291 Research
Credits 0 to 3. 0 to 3 Other Hours.
Research conducted under the direction of faculty member in women's and gender studies. May be taken four times for credit.
Prerequisites: 3 credits in WGST; freshman or sophomore classification and approval of instructor.

WGST 300/PSYC 300 Psychology of Women
Credits 3. 3 Lecture Hours.
Theoretical and research literature relevant to psychological assumptions about the female personality; challenges to and verification of these assumptions by recent experimental studies.
Prerequisite: PSYC 107.
Cross Listing: PSYC 300/WGST 300.
WGST 302 Women and Religion
Credits 3. 3 Lecture Hours.
Investigation of women's position in religious institutions historically and/or currently, religion's influence on women's roles and status, and women's attempts to define their own religious perspectives; draws on sociological and philosophical insights and methods.
Prerequisite: Junior or senior classification or approval of instructor.
Cross Listing: RELS 302 and SOCI 302.
WGST 303 Psychology of Women of Color
Credits 3. 3 Lecture Hours.
Interdisciplinary theories to study the unique yet intersectional experiences of women from different racial groups, ethnicities, nationalities and cultural backgrounds; scholarly research from the diversity science field; contemporary topics that have developed in a global context; examination of complex issues, which affect women of color across the lifespan.
Prerequisite: Grade of C or better in AFST 201 or PSYC 107 or WGST 200, or approval of instructor.
Cross Listing: AFST 303 and PSYC 303.
WGST 307 Gender and Education
Credits 3. 3 Lecture Hours.
Overview of gender and education; role of feminism and feminist theory; intersections of gender, race, class, ethnicity, and sexuality.
Prerequisite: Junior or senior classification.
WGST 308 Gender and International Education
Credits 3. 3 Lecture Hours.
Exploration of the intersection of formal and informal education and understandings of gender in countries beyond the United States.
Prerequisites: WGST 307; junior or senior classification.
WGST 309 Feminist Pedagogy
Credits 3. 3 Lecture Hours.
Exploration of educational systems' and institutions' regard for women historically and contemporarily; practical and theoretical writings on feminist pedagogy.
Prerequisites: WGST 307; junior or senior classification.
WGST 310/SOCI 310 Motherhood in Society
Credits 3. 3 Lecture Hours.
Examines expectations and/or practices relating to motherhood, with consideration of their cultural impact; taught from a social science perspective.
Prerequisite: Junior or senior classification or approval of instructor.
Cross Listing: SOCI 310/WGST 310.
WGST 315/SOCI 315 The Marriage Institution
Credits 3. 3 Lecture Hours.
Courtship, engagement, marriage, family formation, personal adjustment, conflict, financing and child rearing.
Prerequisite: Junior or senior classification.
Cross Listing: SOCI 315/WGST 315.
WGST 316/SOCI 316 Sociology of Gender
Credits 3. 3 Lecture Hours.
Sociological explanations of status differences between men and women; cross-cultural comparisons; gender role socialization, cultural stereotypes, discrimination; gender roles and status in the family, economy, religion, science, other social institutions; deviance, victimization and gender; recent social changes.
Cross Listing: SOCI 316/WGST 316.

WGST 317/POLS 317 Women in Politics
Credits 3. 3 Lecture Hours.
Role of women in the political system; treatment of women in political theory; effect of law on women’s status; women as political leaders; current policy issues of concern to women.
Prerequisite: POLS 206.
Cross Listing: POLS 317/WGST 317.

WGST 318/ECON 318 The Economics of Gender and Race
Credits 3. 3 Lecture Hours.
Theories and evidence on gender and race differences in labor market outcomes; labor supply and the role of family formation; the effect of human capital and discrimination on earnings; analysis of government policies; international comparisons.
Prerequisites: 6 hours drawn from the following: ECON 202, STAT 303, 3 hours in WGST above 200 level; junior or senior classification.
Cross Listing: ECON 318/WGST 318.

WGST 330 Women in Ancient Greece and Rome
Credits 3. 3 Lecture Hours.
Survey of women in classical Greece and Rome; emphasizes on female occupations and family relationships, legal and political status, traditional values, notorious women, how women were viewed and how they viewed themselves.
Prerequisite: Junior or senior classification.
Cross Listing: CLAS 330 and HIST 330.

WGST 332/SOCI 332 Alternative Genders
Credits 3. 3 Lecture Hours.
Examination of theories and case studies involving alternative genders and sexualities, studied in their cultural contexts and including the role of factors such as race, class, ethnicity, age, and physical characteristics.
Prerequisites: 3 credits in SOCI or WGST; junior or senior classification.
Cross Listing: SOCI 332/WGST 332.

WGST 333/ENGL 333 Gay and Lesbian Literature
Credits 3. 3 Lecture Hours.
Gay and lesbian literature from classical times to present, studied in its historical and cultural context.
Prerequisite: Junior or senior classification. Prerequisite: Junior or senior classification.
Cross Listing: ENGL 333/WGST 333.

WGST 334/HLTH 334 Women’s Health
Credits 3. 3 Lecture Hours.
A broad range of health issues that are either unique to women or of special importance to women; information for the health consumer; preparation as an advocate of healthy lifestyles; awareness of the role health plays in the life of all women.
Prerequisite: Junior or senior classification.
Cross Listing: HLTH 334/WGST 334.

WGST 343/FILM 343 Sex, Gender and Cinema
Credits 3. 3 Lecture Hours.
Exploration of a significant topic at the intersection of women’s/gender studies and film, such as cinema and sexuality studies, cinema and women, and cinema and masculinity; may include discussion of production, film content, and/or reception.
Prerequisites: 3 hours in FILM or WGST; junior or senior classification or approval of instructor.
Cross Listing: FILM 343/WGST 343.

WGST 367/POLS 367 Women in Government in Comparative Perspective
Credits 3. 3 Lecture Hours.
Examination of women’s representation in government based on comparison across multiple nation-states; focus on legislative and executive branches of democratic governments.
Prerequisites: POLS 206; junior or senior classification or approval of political science department head.
Cross Listing: POLS 367/WGST 367.

WGST 374/ENGL 374 Women Writers
Credits 3. 3 Lecture Hours.
History of literature by women in English; emphasis on continuity of ideas and on literary contributions; study of a variety of genres with particular attention to the significance of gender in the racial, social, sexual and cultural contexts of women writing in English.
Prerequisite: Junior or senior classification.
Cross Listing: ENGL 374/WGST 374.

WGST 391 Studies in Gender and Diversity
Credits 3. 3 Lecture Hours.
Exploration of a significant topic in gender studies, emphasizing the interplay of gender with one or more races, ethnicities, and/or cultures beyond the Anglo-American.
Prerequisite: Junior or senior classification.

WGST 401 Feminist Theory
Credits 3. 3 Lecture Hours.
Inquiry-based examination of feminist theory from various periods and disciplinary perspectives, with application to societal debates and controversies.
Prerequisites: WGST 200 or approval of instructor; junior or senior classification.

WGST 403 Language and Gender
Credits 3. 3 Lecture Hours.
Language and gender from a sociolinguistic perspective; gender in the words and structures of language; gender representation and gendered language use in the media, and a variety of sociocultural contexts; language use in intimate relationships; computer-mediated discourse; language, sexuality, and sexual orientation.
Prerequisite: Junior or senior classification.
Cross Listing: ENGL 403 and LING 403.

WGST 404/ANTH 404 Women and Culture
Credits 3. 3 Lecture Hours.
Examines women’s lives in evolutionary and cross-cultural perspective; women’s roles in subsistence, politics, religion and economics in traditional cultures; women’s roles in international development; the cultural and social construction of women’s biology cross-culturally including circumcision, menstruation, pregnancy, childbirth and motherhood.
Cross Listing: ANTH 404/WGST 404.
WGST 407/COMM 407 Women, Minorities and the Mass Media
Credits 3. 3 Lecture Hours.
The contributions of women and ethnic groups to the evolution of the media; the portrayal of women and ethnic groups in the mass media; issues resulting from the recognition of women and ethnic groups as media audiences.
**Prerequisite:** Junior classification or approval of instructor.
**Cross Listing:** COMM 407/WGST 407.

WGST 409/PHIL 409 Studies in Gender and Philosophy
Credits 3. 3 Lecture Hours.
Analysis, from a gender-studies perspective, of a single figure or concept in the history of philosophy. May be repeated 1 time for credit with a different focus.
**Prerequisites:** 3 hours in philosophy and women's and gender studies; junior or senior classification.
**Cross Listing:** PHIL 409/WGST 409.

WGST 411/COMM 411 Representations of Motherhood
Credits 3. 3 Lecture Hours.
Examination of understandings of motherhood from a humanities perspective and over a variety of cultures and time periods, as reflected in written, media and/or oral texts.
**Prerequisites:** Junior or senior classification or approval of instructor.
**Cross Listing:** COMM 411/WGST 411.

WGST 420/COMM 420 Gender and Communication
Credits 3. 3 Lecture Hours.
Survey of the role of gender in communication processes; focus on communication differences between men and women in contexts such as the family, school and work organizations; discussion of media influence in gender stereotypes.
**Cross Listing:** COMM 420/WGST 420.

WGST 422/FREN 422 Studies in Gender and French Literature
Credits 3. 3 Lecture Hours.
The role of gender in production, dissemination, reception and interpretation of literary texts in the French tradition, including continental France as well as the Francophone literatures of West Africa, Canada, and elsewhere; taught in English.
**Prerequisite:** Junior or senior classification or approval of instructor.
**Cross Listing:** FREN 422/WGST 422.

WGST 424/SOCI 424 Women and Work in Society
Credits 3. 3 Lecture Hours.
Social context of women's work; work patterns, labor force participation, occupational destinations and occupational mobility; alternatives to the conventional division of labor by sex in society.
**Cross Listing:** SOCI 424/WGST 424.

WGST 428/COMM 428 Women's Rhetoric
Credits 3. 3 Lecture Hours.
Examination of the historical imbrication of masculinity and rhetoric in relation to women's participation in political life, reception of women's rhetoric in the public sphere, and remembrance and representation of women as rhetorical agents throughout history; consideration of women's rhetoric in various cultural arenas.
**Prerequisite:** Junior or senior classification.
**Cross Listing:** COMM 428/WGST 428.

WGST 439/ANTH 439 Gender, Ethnicity and Class in Archaeological Research
Credits 3. 3 Lecture Hours.
Exploration of theoretical and methodological issues in engendering archaeology; ideological biases in the interpretation of roles attributed to women, men, and underrepresented groups in the past; the impact of cultural transformation on underrepresented groups and gender relations; and the formulation of research questions concerning these issues.
**Prerequisites:** ANTH 202, ANTH 210, WGST 200 or WGST 207; SOCI 207; junior or senior classification or approval of instructor.
**Cross Listing:** ANTH 439/WGST 439.

WGST 445 Queer Theory
Credits 3. 3 Lecture Hours.
Examines origins of theories of gender and sexual diversity and their intersections with feminist theories; considers foundational and contemporary texts that address queer theory.
**Prerequisites:** 6 hours in Women's and Gender Studies; senior classification or approval of instructor.
**Cross Listing:** ITAL 452/WGST 445.

WGST 452/ITAL 452 Women and Gender in Italian Literature
Credits 3. 3 Lecture Hours.
The historical and cultural dynamics forging the notion of woman and gender in Italian society and literature; discussion of films and theoretical texts concerning subjectivity and language, body and culture; taught in English.
**Prerequisite:** Junior or senior classification or approval of instructor.
**Cross Listing:** ITAL 452/WGST 452.

WGST 461/HIST 461 History of American Women
Credits 3. 3 Lecture Hours.
Cultural, political, legal and religious factors that helped shape the role and character of women in American society from colonial times to the present; historical role of women in the development of the nation.
**Cross Listing:** HIST 461/WGST 461.

WGST 462/POLS 462 Women and the Law
Credits 3. 3 Lecture Hours.
The legal status of American women from the adoption of the Constitution to the present; constitutional developments; the 19th Amendment and the proposed Equal Rights Amendment; employment; family law; reproductive rights; education; sexual equality in context of other claims to equality; law and social norms.
**Prerequisite:** POLS 206 or approval of department head.
**Cross Listing:** POLS 462/WGST 462.

WGST 463 Gender in Asia
Credits 3. 3 Lecture Hours.
Gender dynamics in Asia; changes in gender roles; women's movements; women and the economy; women and politics; men's and women's private lives.
**Prerequisite:** Junior or senior classification or approval of instructor.
**Cross Listing:** ASIA 463 and SOCI 463.
WGST 473/HIST 473 History of Modern American Women  
Credits 3. 3 Lecture Hours.  
Emergence of modern American women in the 1890s; examination  
of their history from the 1890s to the present; women as organizers,  
innovators, political reformers, workers, social activists, housewives,  
mothers, consumers and feminists.  
Cross Listing: HIST 473/WGST 473.

WGST 474/ENGL 474 Studies in Women Writers  
Credits 3. 3 Lecture Hours.  
A different topic each term examining women’s writing through historical  
period, genre, cross-cultural study and/or feminist literary theory. May be  
repeated for credit.  
Prerequisites: 3 credits of literature at the 300-level; junior or senior  
classification.  
Cross Listing: ENGL 474/WGST 474.

WGST 476/HIST 476 Sex and Sexuality in History  
Credits 3. 3 Lecture Hours.  
Changing ideas about sex and sexuality over time; includes their  
interaction with ideas about gender, race, class, religion, science,  
technology, medicine, politics and popular culture; historical and cultural  
processes creating modern concerns about sex and sexuality.  
Prerequisite: Junior or senior classification.  
Cross Listing: HIST 476/WGST 476.

WGST 477/HIST 477 Women and Gender in Modern European History  
Credits 3. 3 Lecture Hours.  
Women in Europe from the 18th century to the present: women’s  
contributions to their societies; realities of their daily lives and their  
responses; perceptions of women; role of institutions in defining women’s  
roles; significance for women of industrialization, revolution, warfare,  
scientific discoveries; interaction of class, race and gender.  
Cross Listing: HIST 477/WGST 477.

WGST 481 Senior Seminar  
Credits 3. 3 Lecture Hours.  
Inquiry-based investigation of an issue, problem, or question, using gender  
or feminism as the organizing principle for analysis; methods and materials  
of scholarship in the field; includes opportunities for student research.  
Prerequisite: Senior classification or approval of instructor.

WGST 484 Internship in Women’s and Gender Studies  
Credits 0 to 4. 0 to 4 Other Hours.  
Directed internship in a public or private organization to provide students  
with on-the-job training and applied research experience; opportunity to  
observe first hand issues and problems covered in women's and gender  
studies courses; designed to enhance and clarify the student's career  
objectives.  
Prerequisites: 6 hours in women's and gender studies, junior or senior  
classification and approval of women's and gender studies director and  
internship coordinator.

WGST 485 Directed Studies  
Credits 0 to 4. 0 to 4 Other Hours.  
Readings and/or research for specific needs of students majoring or  
minoring in women's and gender studies.  
Prerequisites: Approval of women's and gender studies director and  
faculty supervisor.

WGST 489 Special Topics in...  
Credits 1 to 4. 1 to 4 Lecture Hours. 0 to 4 Lab Hours.  
Selected topics in an identified area of women's and gender studies. May  
be repeated for credit.

WGST 491 Research  
Credits 0 to 3. 0 to 3 Other Hours.  
Research conducted under the direction of faculty member in women's  
and gender studies. May be taken four times for credit.  
Prerequisites: 12 credits in WGST including 6 at 300-level; junior or  
senior classification and approval of instructor.

ZOOL - Zoology (ZOOL)

ZOOL 289 Special Topics in...  
Credits 1 to 4. 1 to 4 Lecture Hours.  
Selected topics in an identified area of zoology. May be repeated for  
credit.  
Prerequisite: Approval of instructor.

ZOOL 291 Research  
Credits 1 to 4. 1 to 4 Other Hours.  
Active research of basic nature under the supervision of a Department of  
Biology faculty member.  
Prerequisites: Freshman or sophomore classification and approval of  
instructor.

ZOOL 489 Special Topics in...  
Credits 1 to 4. 1 to 4 Lecture Hours.  
Selected topics in an identified area of zoology. May be repeated once for  
credit.  
Prerequisites: Junior or senior classification and approval of instructor.
Faculty

Abanov, Artem, Associate Professor
Physics And Astronomy
PHD, Texas A&M University, 1998

Abbey, James, Assistant Professor
Information & Operations Mgmt
PHD, The Pennsylvania State University, 2013

Abbott, Elton, Associate Professor Of The Practice
Architecture
PHD, Texas A&M University, 1983

Abbott, Louise, Professor
Vet Integrative Biosciences
PHD, University of Washington, 1982

Abbott, Elton, Associate Professor Of The Practice
Architecture
PHD, Texas A&M University, 1983

Abbott, Louise, Professor
Vet Integrative Biosciences
PHD, University of Washington, 1982

Abdi Mashhadimighani, Sara, Assistant Professor
Petroleum Engineering
PHD, University of Southern California, 2012

Abraham, Celeste, Clinical Associate Professor
Periodontics
MS, University of Michigan Ann Arbor, 1991

Acero-Schertzer, Carmen, Lecturer
Liberal Studies
PHD, University of Miami, 1996

Acosta, Sandra, Assistant Professor
Educational Psychology
PHD, Texas A&M University, 2010

Adair, Thomas, Professor
Physics And Astronomy
PHD, Texas A&M University, 1965

Adams, Clark, Emeritus Professor
Wildlife & Fisheries Sciences
PHD, University of Nebraska - Lincoln, 1973

Adams, George, Senior Lecturer
International Studies Department
MED, Temple University, Japan, 1996

Adams, Leslie, Senior Professor
Veterinary Pathobiology
DVM, Texas A&M University, 1964

Adams, Marvin, Professor
Nuclear Engineering
PHD, University of Michigan - Ann Arbor, 1986

Adams, Rae, Clinical Assistant Professor
Clinical Translational Med
BS, Texas A&M University, 2003

Adams, Ralph, Distinguished Professor
History
PHD, University of California, Santa Barbara, 1972

Adams, Terry, Adjunct Assistant Professor
Orthodontics
MS, MSD, 1978 BCD, 1978

Agnolet, Glenn, Professor
Physics And Astronomy
PHD, Cornell University, 1983

Aitani, Koichiro, Associate Professor
Architecture
MS, Virginia Polytechnic Institute and State University, 1997

Akabani, Gamal, Associate Professor
Nuclear Engineering
PHD, Texas A&M University, 1990

Akbulut, Mustafa, Associate Professor
Chemical Engineering
MS, University of California, Santa Barbara, 2007

Akbulut, Mustafa, Associate Professor
Chemical Engineering
MS, University of California, Santa Barbara, 2007

Ali Rousan, Rabaa, Assistant Professor
College of Pharmacy
PHD, Marshall University School of Medicine, Huntington, WV, 2010
Al-Hashimi, Ibtisam, Professor
Periodontics
PHD, State University of New York - Buffalo, 1989

Alajlouni, Khaldoun, Adjunct Professor
Restorative Sciences
DDS, Jordan University of Science and Technology, Irbid Jordan, 1998

Alaniz, Robert, Assistant Professor
Microbial Pathogenesis & Immunity
PHD, University of Washington, 2015

Alexander, James, Instructional Associate Professor
Health Policy & Management
PHD, University of Houston, 1978

Alexander, Steve, Lecturer
Marine Science
PHD, Louisiana State University, 1976

Alexander-Packard, Gerianne, Professor
Psychology
PHD, McGill University, 1991

Alfred, Mary, Professor
Educ Admin & Human Resource Dev
PHD, University of Texas, 1995

Alfriend, Kyle, Professor
Aerospace Engineering
PHD, Virginia Polytechnic Institute and State University, 1967

Alge, Daniel, Assistant Professor
Biomedical Engineering
PHD, Purdue University, 2010

Ali, Ahmed, Assistant Professor
Architecture
PHD, Virginia Polytechnic Institute, 2012

Alkhatteeb, Fadi, Associate Professor
College of Pharmacy
MBA, Aspen University, 2011

Alkon, Cynthia, Associate Professor
School of Law
LLM, University of Missouri-Columbia, 2001

Allaire, Douglas, Assistant Professor
Mechanical Engineering
PHD, MASSACHUSETTS INSTITUTE OF TECHNOLOGY, 2009

Allen, Angela, Instructional Assistant Professor
Mathematics
MS, Texas A&M University, 2005

Allen, Graham, Professor
Mathematics
PHD, University of Wisconsin - Madison, 1971

Allen, Gregg, Instructional Assistant Professor
Neuroscience & Experimental Therapeutics
PHD, Texas A&M University, 2001

Allen, Natalie, Senior Lecturer
Accounting
MS, Texas A&M University, 1988

Allen, Roland, Professor
Physics and Astronomy
PHD, University of Texas at Austin, 1969

Allen, Sarah, Clinical Assistant Professor
Restorative Sciences
DDS, Texas A&M University System Baylor College of Dentistry, 2010

Alfred, Clinton, Associate Professor
Nutrition & Food Science
PHD, University of Illinois at Urbana Champaign, 2002

Alonzo, Armando, Associate Professor
History
PHD, Indiana University, 1994

Alonzo, Juan, Associate Professor
English
PHD, University of Texas, 2003

Alperntarlow, Sara, Associate Professor
History
PHD, University of Maryland, 1978

Alpini, Gianfranco, Distinguished Professor
Internal Medicine Temple Campus
PHD, University of Rome, 1984

Altenhofen, Brian, Lecturer
Communication
MA, Fordham University, 2010

Alton, Stephen, Professor
School of Law
LLM, Columbia University School of Law, 1992

Alvarado, Christine, Associate Professor
Poultry Science
PHD, Texas A&M University, 2001

Alvarado, Jorge, Associate Professor
Engineering Technology & Industrial Dist
PHD, University of Illinois, 2004

Alvarado-Bremer, Jaime, Associate Professor
Marine Biology
PHD, University of Toronto, 1994

Alvard, Michael, Associate Professor
Anthropology
PHD, University of New Mexico, 1993

Alvarez, Martha, Adjunct Assistant Professor
Pediatric Dentistry
DDS, Instituto des Ciencias de la Salud (CES), Medellin, Colombia, 1997

Alyismail, Hamed, Assistant Professor
College of Pharmacy
MA, College of Pharmacy, Helwan University Cairo, 2001
Amato, Nancy, Professor
Computer Science & Engineering
PHD, University of Illinois, 1995

Biology
PHD, State University of New York at Albany, 1991

Bellinger, Larry, Regents Professor
Biomedical Sciences
PHD, University of California at Davis, 1974

Bellows, Charles, Adjunct Professor
School of Law
JD, SMU Dedman School of Law, 1976

Belmonte, Arthur, Instructional Assistant Professor
Mathematics
MS, Texas A&M University, 1986

Beltran, Liliana, Associate Professor
Architecture
PHD, University of California - Berkeley, 1997
Belyanin, Alexey, Professor  
Physics And Astronomy  
PHD, Institute of Applied Physics Russian Academy of Sciences, 1995

Benavides Iglesias, Alfonso, Lecturer  
Geology & Geophysics  
PHD, Texas A&M University, 2007

Benden, Mark, Associate Professor  
Environmental And Occupational Health  
PHD, Texas A&M University, 2006

Bender, Steven, Clinical Assistant Professor  
Oral Surgery  
DDS, Baylor College of Dentistry, 1986

Bendixen, Alfred, Professor Emeritus  
English  
PHD, University of North Carolina at Chapel Hill, 1979

Benedik, Michael, Professor  
Biology  
PHD, Stanford University, 1982

Benefiel, Candace, Associate Professor  
Tamu Libraries  
MA, South West Texas State University, 1989

Benham, James, Visiting Lecturer  
Construction Science  
MS, Texas A&M University, 2014

Beninger, Christine, Clinical Associate Professor  
Restorative Sciences  
BS, University of Southern California Long Beach, 1976

Benjamin, James, Professor  
Accounting  
PHD, Indiana University, 1972

Bennett, Brad, Lecturer  
Vet Small Animal Clinical Sc  
DVM, Texas A&M University, 2007

Bennett, George, Senior Professor  
Industrial & Systems Eng  
PHD, Texas Tech University, 1970

Bennett, Gregg, Professor  
Health & Kinesiology  
PHD, Auburn University, 1997

Benson, Byron, Regents Professor  
Diagnostic Sciences  
DDS, The University of Iowa, 1975

Benson, M, Assistant Professor  
Biomedical Sciences  
PHD, University of Michigan, 2000

Benson, Monica, Adjunct Professor  
School of Law  
JD, Texas Wesleyan University School of Law, 2002

Bento, Pedro, Assistant Professor  
Economics  
PHD, University of Toronto, 2013

Benton, Elain, Instructor  
Public Health Sciences  
BS, Texas Women's University, 1978

Benz, Michael, Professor  
Educational Psychology  
PHD, University of Oregon, 1983

Benzerga, Amine, Associate Professor  
Aerospace Engineering  

Bergbreiter, David, Professor  
Chemistry  
PHD, Massachusetts Institute of Technology, 1974

Berger, Harris, Professor  
Performance Studies  
PHD, Indiana University, 1995

Bergeron, Christine, Clinical Associate Professor  
Health & Kinesiology  
MFA, Florida State University, 1998

Berghman, Luc, Associate Professor  
Poultry Science  
PHD, University of Leuven, Belgium, 1987

Bergman, Mindy, Professor  
Psychology  
PHD, University of Illinois at Urbana-Champaign, 2001

Berke, Philip, Professor  
Landscape Architecture & Urban Planning  
PHD, Texas A&M University, 1981

Berkolaiko, Gregory, Professor  
Mathematics  
PHD, University of Bristol, 1997

Bermudez Ospina, Jose, Professor  
Philosophy & Humanities  
PhD, Cambridge University, 1992

Bernal, Julio, Professor  
Entomology  
PHD, University of California, Riverside, 1995

Bernard, Jessica, Assistant Professor  
Psychology  
PHD, University of Michigan, 2012

Bernardo, Joseph, Research Associate Professor  
Biology  
PHD, Duke University, 1991

Berry, Charles, Professor  
College of Dentistry  
PHD, Baylor University College of Dentistry, 1973
Berry, Leonard, Distinguished Professor  
Marketing  
PHD, Arizona State University, 1968

Berthold, Dennis, Professor Emeritas  
English  
PHD, University of Wisconsin - Madison, 1972

Berthot, Patricia, Instructional Associate Professor  
Health & Kinesiology  
MED, Stephen F. Austin State University, 1990

Bessac, Bret, Assistant Professor  
College of Pharmacy

Bessler, David, Professor  
Agricultural Economics  
PHD, University of California - Davis, 1977

Beste, Karen, Veterinary Resident  
Vet Large Animal Clinical Sc  
DVM, Texas A&M University, 2013

Bethel, Ryan, Lecturer  
Chemistry  
PHD, Texas A&M University, 2014

Bettati, Riccardo, Professor  
Computer Science & Engineering  
PHD, University of Illinois, 1994

Betz, Timm, Assistant Professor  
Political Science  
PHD, University of Michigan, 2015

Bevan, John, Professor  
Chemistry  
PHD, University of London (University College), 1975

Bevers, Stanley, Professor & Extension Specialist  
Agricultural Economics  
MS, Texas A&M University, 1989

Beyerlein, Michael, Professor  
Educ Admn & Human Resource Dev  
PHD, Colorado State University, 1986

Bhattacharya, Anirban, Assistant Professor  
Statistics  
PHD, Duke University, 2012

Bhattacharya, Nandini, Professor  
English  
PHD, University of Rochester, 1992

Bhattacharya, Raktim, Associate Professor  
Aerospace Engineering  
PHD, University of Minnesota, 2003

Bhattacharyya, S, Professor  
Electrical & Computer Eng  
PHD, Rice University, 1971

Biard, Severine, Visiting Assistant Professor  
Mathematics  
PHD, Universite Pierre et Marie Curie, 2013

Bieber, Susanne, Instructor  
Visualization  
PHD, Freie Universitat Berlin, 2012

Bierman, Leonard, Professor  
Management  
BS, Cornell University, Ithaca, NY, 1975

Bigelow, Ben, Assistant Professor  
Construction Science  
PHD, University of Colorado, 2014

Biggs, Douglas, Professor  
Oceanography  
PHD, Massachusetts Institute of Technology, 1976

Bilbo, David, Professor  
Construction Science  
EDD, Texas A&M University, 1977

Birely, Anna, Assistant Professor  
Civil Engineering  
PHD, University of Washington, 2012

Bishop, Michael, Professor  
Geography  
PHD, Indiana State University, 1987

Bissett, Wesley, Associate Professor  
Vet Large Animal Clinical Sc  
DVM, Texas A&M University, 1997

Bitouni, Annetta, Clinical Assistant Professor  
Public Health Sciences  
MS, Baylor College of Dentistry, 2006

Blackwell, Jamilia, Associate Professor  
Educational Psychology  
PHD, University of Georgia, 2007

Blanchard, Terry, Professor  
Vet Large Animal Clinical Sc  
DVM, Kansas State University, 1976

Blanton, Carlos, Associate Professor  
History  
PHD, Rice University, 1999

Blasingame, Thomas, Professor  
Petroleum Engineering  
PHD, Texas A&M University, 1989

Mathematics
PHD, Cornell University, 2002

Demorrow, Sharon, Associate Professor
Internal Medicine Temple Campus
PHD, The University of Queensland, 1999

Deng, Youjun, Associate Professor
Soil & Crop Sciences
PHD, Texas A&M University, 2001

Dengo, Carlos, Executive Professor
Geology & Geophysics
PHD, Texas A&M University, 1982

Dennie, Christian, Adjunct Professor
School of Law
JD, University of Oklahoma, 2004

Depoy, Darren, Professor
Physics And Astronomy
PHD, University of Hawaii at Manoa, 1987

Derr, James, Professor
Veterinary Pathobiology
PHD, Texas A&M University, 1990

Dessler, Andrew, Professor
Atmospheric Sciences
PHD, Harvard University, 1994

Deutz, Nicolaas, Professor
Health & Kinesiology
PhD, University of Amsterdam, 1988

Devarenne, Timothy, Associate Professor
Biochemistry & Biophysics
PHD, University of Kentucky, 2000

Deveau, Michael, Clinical Assistant Professor
Vet Small Animal Clinical Sc
DVM, Kansas State University, 2005

Devers, Cynthia, Associate Professor
Management
PHD, Michigan State University, 2003

Devore, Ronald, Distinguished Professor
Mathematics
PHD, Ohio State University, 1967

Dewald, Janice, Professor
Dental Hygiene
DDS, University of Iowa, 1980

Dewitt, Thomas, Associate Professor
Wildlife & Fisheries Sciences
PHD, State University of New York - Binghamton, 1996

Dewolff, Timo, Visiting Assistant Professor
Mathematics
PHD, Goethe Universitat, 2013

Dexter, Rayna, Instructional Assistant Professor
Performance Studies
PHD, Kent State University, 2009

Deyong, Sarah, Associate Professor
Architecture
PHD, Princeton University, 2008

Dhar, Barun, Lecturer
Physics And Astronomy
PHD, University of Minnesota, Minneapolis, 2012

Diaz Delgado, Josue, Assistant Lecturer
Veterinary Pathobiology
PHD, Universidad De Las Palmas de Gran Canaria, 2013

Diaz, Michelle, Clinical Assistant Professor
Accounting
PHD, Texas A&M University, 2005

Dickman, Martin, Professor
Plant Pathology & Microbiology
PHD, University of Hawaii, 1986

Dickson, Donald, Professor
English
PHD, University of Illinois, Urbana-Champaign, 1981

Diekwisch, Thomas, Professor
Periodontics
DMD, Philipps-University of Marburg, West Germany, 1986

Dierker, Steven, Professor
Physics And Astronomy
PHD, University of Illinois-Urbana-Champaign, 1983

Diesel, Alison, Clinical Assistant Professor
Vet Small Animal Clinical Sc
DVM, Kansas State University, 2005
Dietrich, Katheryn, Instructional Associate Professor
Sociology
PHD, Texas A&M University, 1994

Dimarco, Frank, Lecturer
Liberal Studies
MPA, Long Island University, 1979
MS, Long Island University, 1981

Dimarco, Steven, Professor
Oceanography
PHD, University of Texas at Dallas, 1991

Dindot, Scott, Associate Professor
Veterinary Pathobiology
PHD, Texas A&M University, 2003

Ding, Yu, Professor
Industrial & Systems Eng
DVM, University of Michigan, 2001

Dinges, Lewis, Clinical Assistant Professor
Vet Large Animal Clinical Sc
BS, Texas A&M University, 1990

Dirani, Khalil, Associate Professor
Educ Admn & Human Resource Dev
PHD, University of Illinois-Urbana Champaign, 2007

Ditty, James, Lecturer
Marine Biology
PHD, Louisiana State University and A&M College, 2002

Dixit, Manish, Assistant Professor
Construction Science
PHD, Texas A&M University, 2013

Dixon, Laurie, Associate Professor
Teaching, Learning And Culture
EDD, Harvard University Graduate School of Education, 2004

Dixon, Mary, Visiting Assistant Professor
Health & Kinesiology
PHD, Texas A&M University, 2011

Dobbins, Michael, Clinical Assistant Professor
Restorative Sciences
DDS, Baylor College of Dentistry, 1968

Dodd, Johnathon, Clinical Professor
Vet Small Animal Clinical Sc
DVM, Texas A&M University, 1979

Dominguez, Brandon, Clinical Assistant Professor
Vet Large Animal Clinical Sc
MS, Texas A&M University, 2007

Domsky, Darren, Associate Professor
Liberal Studies
PHD, York University, 2006

Donelan, Michael, Lecturer
Maritime Administration
MBA, Tulane University, 1981

Donfanokar, Ranjeet, Assistant Professor
Vet Physiology & Pharmacology
PHD, Texas A&M University, 2008

Donkor, David, Assistant Professor
Africana Studies
PHD, Northwestern University, 2008

Donkor, David, Assistant Professor
Performance Studies
PHD, Northwestern University, 2008

Donnell, Cydney, Executive Professor
Finance
MBA, Southern Methodist University, 1982

Donnell, James, Professor Of The Practice
Mechanical Engineering
BS, Texas A&M University, 1982

Donnellan, Michael, Professor
Psychology
PHD, University of California, Davis, 2001

Donnelly, Jared, Visiting Assistant Professor
International Affairs
PHD, Texas A&M University, 2015

Donzis, Diego, Associate Professor
Aerospace Engineering
PHD, Georgia Institute of Technology, 2007

Doocy, Kelley, Veterinary Resident
Vet Small Animal Clinical Sc
BS, Oklahoma State University, 2007

Dooley, Kim, Professor
Biological & Agricultural Eng
PHD, Texas A&M University, 1995

Dooley, Larry, Associate Professor
Educ Admn & Human Resource Dev
PHD, Texas A&M University, 1989

Dorch, Edwina, Lecturer
George Bush School of Govern
PHD, University of Colorado, 1982

Doron, Yuval, Lecturer
Mechanical Engineering
MS, Texas A&M University, 2009

Dorsey, Leroy, Professor
Communication
PHD, Indiana University, 1993

Dos Reis, Gabriel, TEES Assistant Research Professor
Computer Science & Engineering
PHD, Universite Paris VII, 2001

Dostal, David, Professor
Medical Physiology
PHD, University of Missouri, 1986
Dougherty, Edward, Distinguished Professor  
Electrical & Computer Eng  
PHD, Rutgers State University of New Jersey, 1974

Douglas, Charles, Assistant Professor  
College of Pharmacy  
PHD, University of Florida, Gainesville, FL, 2011

Douglas, Ronald, Distinguished Professor  
Mathematics  
PHD, Lousiana State University and A&M College, 1962

Douglass, April, Clinical Assistant Professor  
Teaching, Learning And Culture  
PHD, Texas A&M University, 2011

Dowdy, Diane, Instructional Assistant Professor  
Hlth Promotion & Comm Hlth Sci  
PHD, Texas A&M University, 1990

Dowell Lashmet, Tiffany, Assistant Professor & Extension Specialist  
Agricultural Economics  
JD, University of New Mexico School of Law, 2009

Downey, Mike, Lecturer  
English Language Institute  
MA, Angelo State University, 1981

Downing, Nancy, Associate Professor  
College Of Nursing  
PHD, The University of Iowa, 2010

Dox, Donnalee, Associate Professor  
Performance Studies  
PHD, University of Minnesota, Twin Cities, 1995

Dozier, Monty, Associate Professor & Extension Specialist  
Soil & Crop Sciences  
PHD, Texas A&M University, 1999

Dragolich, William, Adjunct Assistant Professor  
General Dentistry  
MS, Georgia Regents University, 1992

Drayer, Penelope, Adjunct Assistant Professor  
General Dentistry  
DDS, Texas A&M Baylor College of Dentistry, 2009

Dromgoole, Darrell, Associate Professor & Extension Specialist  
Ag Leadership, Educ & Comm  
EDD, Texas A&M University/Texas Tech University, 2007

Dronen, Norman, Professor  
Wildlife & Fisheries Sciences  
PHD, New Mexico State University, 1974

Dror, Olga, Associate Professor  
History  
PHD, Cornell University, 2003

Drost, Marcia, Senior Lecturer  
Mathematics  
PHD, Texas A&M University, 1993

Dryden, Joseph, Adjunct Professor  
School of Law  
JD, California Western School of Law, 1990

Du, Jing, Assistant Professor  
Construction Science  
PHD, Michigan State University, 2012

Duan, Benchun, Associate Professor  
Geology & Geophysics  
PHD, University of California, Riverside, 2006

Dubriwny, Tasha, Associate Professor  
Communication  
PHD, University of Georgia, 2005

Dubriwny, Tasha, Associate Professor  
Womens Studies  
PHD, University of Georgia, 2005

Dubuisson, Lydia, Instructional Assistant Professor  
Health & Kinesiology  
MS, Texas A&M University, 1999

Dudensing, Rebekka, Assistant Professor & Extension Specialist  
Agricultural Economics  
PhD, Clemson University, 2008

Duffield, Nicholas, Professor  
Electrical & Computer Eng  
PHD, Queen Mary College, Univ. of London, 1987

Dunaway, Johanna, Associate Professor  
Communication  
PHD, Rice University, 2006

Dunbar, Bonnie, Professor  
Aerospace Engineering  
PHD, University of Houston, 1983

Dunbar, Kim, Distinguished Professor  
Chemistry  
PHD, Purdue University, 1984

Dunlap, Kathrin, Assistant Professor  
Animal Science  
PHD, Texas A&M University, 2006

Dunlap, Thomas, Professor  
History  
PHD, University of Wisconsin - madison, 1975

Dunn, Richard, Assistant Professor  
Agricultural Economics  
PHD, University of Wisconsin, 2008

Dunning, Chester, Professor  
History  
PHD, Boston College, 1976

Dunsford, Deborah, Senior Lecturer  
Ag Leadership, Educ & Comm  
PHD, Texas A&M University, 1993
Duong, Tri, Associate Professor
Poultry Science
PHD, North Carolina State University, 2008

Duplessis, Nicole, Lecturer
English
PHD, Texas A&M University, 2008

Dupriest, Fred, Professor Of The Practice
Petroleum Engineering
BS, Texas A&M University, 1977

Durko, Angela, Lecturer
Recreation, Park & Tourism Sc
PHD, Texas A&M University, 2014

Duru, Okan, Assistant Professor
Maritime Administration
PHD, Kobe University, 2012

Dutta, Bhaskar, Professor
Physics And Astronomy
PHD, Oklahoma State University, 1995

Dvorak, Bruce, Associate Professor
Landscape Architecture & Urban Planning
MLA, University of Illinois at Urbana-Champaign, 1994

Dworkin, Ira, Assistant Professor
English
PHD, City University of New York, 2003

Dye, Richard, Clinical Professor
Finance
PHD, Texas A&M University, 1993

Dykema, Kenneth, Professor
Mathematics
PHD, University of California, Berkeley, 1993

Earhart, Amy, Associate Professor
English
PHD, Texas A&M University, 1999

Earnest, David, Professor
Biology
PHD, Northwestern University, Evanston, 1984

Earnest, David, Professor
Neuroscience & Experimental Therapeutics
PHD, Northwestern University, Evanston, 1984

Eason, John, Assistant Professor
Sociology
PHD, University of Chicago, 2008

Easterwood, Leslie, Clinical Assistant Professor
Vet Large Animal Clinical Sc
BS, Texas A&M University, 1990

Easwaran, Kenneth, Associate Professor
Philosophy & Humanities
PHD, UC Berkeley, 2008

Ebbole, Daniel, Professor
Plant Pathology & Microbiology
PHD, Purdue University, 1988

Echols, Katherine, Instructional Assistant Professor
Liberal Studies
PHD, University of Houston, 2015

Eckel, Catherine, Distinguished Professor
Economics
PHD, University of Virginia, 1983

Eckert, Rachael, Veterinary Resident
Vet Large Animal Clinical Sc
DVM, Royal (Dick) School of Veterinary Studies, 2014

Eckhause, Melissa, Adjunct Professor
School of Law
JD, University of Detroit Mercy School of Law, 1998

Eckman, Stacy, Clinical Assistant Professor
Vet Small Animal Clinical Sc
DVM, Texas A&M University, 2001

Eckstein, Gabriel, Professor
School of Law
JD, American University Washington College of Law, 1995

Eden, Lorraine, Professor
Management
PHD, Dalhousie University, 1976

Edens, John, Professor
Psychology
PHD, Texas A&M University, 1996

Edens, Pamela, Lecturer
Psychology
PHD, Texas A&M University, 1997

Edney, Kirk, Continuing Education Assistant Professor
Ag Leadership, Educ & Comm
PHD, Texas A&M University, 2009

Edwardson, Jeffrey, Senior Lecturer
Veterinary Pathobiology
DVM, University of Georgia, 2014

Edwards, Erin, Assistant Lecturer
Veterinary Pathobiology
DVM, The Ohio State University, 1974

Edwards, George, Distinguished Professor
Political Science
PHD, University of Wisconsin at Madison, 1973

Edwards, John, Professor
Veterinary Pathobiology
DVM, Texas A&M University, 2000

Efendiev, Yalchin, Professor
Mathematics
PHD, California Institute of Technology, 1999
Ege, Matthew, Assistant Professor
Accounting
PHD, The University of Texas of Austin, 2013

Egenolf, Susan, Associate Professor
English
PHD, Texas A&M University, 1995

Ehlerl, Patricia, Clinical Assistant Professor
College Of Nursing
MS, University of Phoenix, 2004

Ehsani, Mehrdad, Professor
Electrical & Computer Eng
PHD, University of Wisconsin - madison, 1981

Eichelberger, Bunita, Clinical Assistant Professor
Vet Large Animal Clinical Sc
DVM, University of California, 2004

Eide, Marian, Associate Professor
English
PHD, University of Pennsylvania, 1994

Elliot, John, Clinical Associate Professor
Health & Kinesiology
PHD, The Ohio State University, 1998

Elliot, Frank, Professor
School of Law
JD, The University of Texas School of Law, 1957

Elliott, Kay, Adjunct Professor
School of Law
JD, University of Oklahoma, 1964

Elliott, Timothy, Professor
Educational Psychology
PHD, University of Missouri - Columbia, 1987

Ellis, Cheryl, Lecturer
Vet Large Animal Clinical Sc
BS, University of California, Davis, CA, 2008

Ellis, Debra, Senior Lecturer
Construction Science
BS, Texas A&M University, 1990

Ellis, Gary, Professor
Recreation, Park & Tourism Sc
PHD, North Texas State University, 1983

Ellis, Lisa, Lecturer
Film Studies
MFA, Columbia College - Chicago, 2007

Ellis, Robert, Instructional Assistant Professor
Health & Kinesiology
BA, Oklahoma State University, 1964

Ellis, Thomas, Assistant Lecturer
Philosophy & Humanities
MA, Texas A&M University, 2009

Ellison, John, Senior Lecturer
Biochemistry & Biophysics
PHD, University of Oregon, 1970

Elmendorf, Harry, Associate Professor Of The Practice
Aerospace Engineering
BS, TAMU, 1970

Elmore, Otis, Senior Lecturer
Management
JD, University of Texas, Austin, 1976

Elms, Rene, Senior Lecturer
Engineering Student Serv & Academic Prog
PHD, Texas A&M University, 2009

Elwany, Alaa, Assistant Professor
Industrial & Systems Eng
PHD, Georgia Institute of Technology, 2009

Emre, Side, Assistant Professor
History
PHD, University of Chicago, 2009
En et, Emanuela, Lecturer
Physics And Astronomy
PHD, Oklahoma State University, 2013

Engelen, Marielle, Associate Professor
Health & Kinesiology
PHD, Maastricht University, Netherlands, 2000

England, Peter, Instructional Associate Professor
Civil Engineering
PHD, Texas Tech University, 2011

Engler, Cady, Senior Professor
Biological & Agricultural Eng
PHD, University of Waterloo, 1980

Enjeti, Prasad, Professor
Engineering Student Serv & Academic Prog
PHD, Concordia University, Montreal, Canada, 1984

Enoh, Linda, Lecturer
Recreation, Park & Tourism Sc
PHD, Texas A&M University, 2011

Entesari, Kamran, Associate Professor
Electrical & Computer Eng
PHD, University of Michigan, 2006

Epifanio, Craig, Associate Professor
Atmospheric Sciences
PHD, University of Washington, 1999

Epstein, Janice, Instructional Associate Professor
Mathematics
PHD, Texas A&M University, 1992

Erdelyi, Tamas, Professor
Mathematics
PHD, University of Southern Carolina, 1989

Erickson, James, Associate Professor
Biology
PHD, University of Wisconsin - madison, 1989

Eriksson, MarJan, Associate Professor
Ecosystem Science & Mgmt
PHD, University of Minnesota, 1989

Erminy Castillo, Marcel, Associate Professor Of The Practice
Architecture
PHD, Central University of Venezuela, 1987

Erraguntla, Madhav, Associate Professor Of The Practice
Industrial & Systems Eng
PHD, Texas A&M, 1996

Erturk, Bilal, Visiting Assistant Professor
Finance
PHD, Texas A&M University, 2006

Erukhimova, Tatiana, Senior Lecturer
Physics And Astronomy
PHD, Institute of Applied Physics, Russian Academy of Sciences, 1999

Erwin, Barbara, Clinical Professor
Teaching, Learning And Culture
PHD, Texas A&M University, 1983

Escamilla, Edelmiro, Instructional Assistant Professor
Construction Science
PHD, Texas A&M University, 2011

Escobar-Lemmon, Maria, Associate Professor
Political Science
PHD, The University of Arizona, 2000

Esplami, Zohreh, Associate Professor
Teaching, Learning And Culture
PHD, University of Illinois at Urbana-Champaign, 1992

Espina, Eduardo, Professor
Hispanic Studies
PHD, Washington University in St. Louis, 1987

Esquivel, Jose, Associate Professor
Architecture
MA, Ohio State University, 1998

Estev-Gasent, Maria, Assistant Professor
Veterinary Pathobiology
PHD, Universidad de Valencia, Spain, 2003

Estill, Laura, Assistant Professor
English
PHD, Wayne State University, 2010

Ettelbrick, Kelli, Adjunct Assistant Professor
Pediatric Dentistry
DDS, University of Iowa, 1996

Eubanks, Micky, Professor
Entomology
PHD, University of Maryland, College Park, 1997

Euresti, Vianne, Lecturer
Liberal Studies
BS, Texas A&M University at Galveston, 2013

Eusebi, Ricardo, Associate Professor
Physics And Astronomy
PHD, University of Rochester, 2006

Eustace, George, Senior Lecturer
Construction Science
MA, Texas A&M University, 1977

Evans, Dwayne, Clinical Assistant Professor
Public Health Sciences
DDS, Texas A&M University Baylor College of Dentistry, 1990

Evans, Timothy, Adjunct Professor
School of Law
JD, University of Arkansas Fayetteville, 2008

Everett, Mark, Professor
Geology & Geophysics
PHD, University of Toronto, 1991
Everett-Houser, Joan, Clinical Assistant Professor  
College of Pharmacy  
DNP, University of the Pacific, 1983

Ewing, Ryan, Assistant Professor  
Geology & Geophysics  
PHD, The University of Texas - Austin, 2009

Eytan, Ron, Assistant Professor  
Marine Biology  
PHD, Louisiana State University, 2010

Ezell-Mainzer, Margaret, Distinguished Professor  
English  
PHD, Cambridge University, 1981

Ezzo, Paul, Adjunct Assistant Professor  
Periodontics  
PHD, Texas A&M University Baylor College of Dentistry, 2000

Fajt, Virginia, Clinical Associate Professor  
Vet Physiology & Pharmacology  
PHD, Iowa State University, 2000

Fallis, Bruce, Adjunct Professor  
Diagnostic Sciences  
MD, Washington University School of Medicine, 1952

Falzarano, Jeffrey, Professor  
Ocean Engineering  
PHD, University of Michigan, Ann Arbor, 1990

Fang, Gwo-Ping, Associate Professor  
Engineering Technology & Industrial Dist  
PHD, Texas A&M University, 1996

Fang, Lei, Assistant Professor  
Chemistry  
PHD, Northwestern University, 2010

Fannin, Ehriel, Clinical Assistant Professor  
College Of Nursing  
MNU, University of the Incarnate Word, 2008

Fanning, Travis, Lecturer  
Maritime Administration  
JD, Roger Williams University School of Law, 2005

Farmer, Karen, Lecturer  
Accounting  
MS, Texas A&M University, 2009

Farris, Charlotte, Assistant Professor  
College of Pharmacy

Faulkner, William, Associate Professor  
Biological & Agricultural Eng  
PHD, Texas A&M University, 2008

Feagin, Joe, Professor  
Sociology  
PHD, Harvard University, 1966

Feagin, Russell, Associate Professor  
Ecosystem Science & Mgmt  
PHD, Texas A&M University, 2003

Feagley, Sam, Professor & Extension Specialist  
Soil & Crop Sciences  
PHD, University of Missouri - Columbia, 1979

Feare, Donald, Adjunct Professor  
School of Law  
JD, Texas Wesleyan University School of Law, 1996

Fehily Kohl, Ellen, Visiting Assistant Professor  
Geography  
PHD, University of Georgia, 2015

Fehr, Sara, Clinical Assistant Professor  
Health & Kinesiology  
PHD, University of Cincinnati, 2015

Feigenbaum, Leslie, Senior Lecturer  
Construction Science  
MS, Texas A&M University, 1985

Feil, Scott, Lecturer  
George Bush School of Govern  
MA, Stanford University, 1984

Feldman, Richard, Senior Professor  
Industrial & Systems Eng  
PHD, Northwestern University, 1975

Felton Odom, Summer, Assistant Professor  
Ag Leadership, Educ & Comm  
PHD, Texas A&M University, 2011

Felts, Jonathan, Assistant Professor  
Mechanical Engineering  
DEN, University of Illinois Urbana Champaign, 2013

Feng, Jian, Professor  
Biomedical Sciences  
PHD, University of Connecticut, 1991

Ferdinand, Alva, Assistant Professor  
Health Policy & Management  
PHD, University of Alabama Birmingham, 2013

Fernandez-Solis, Jose, Associate Professor  
Construction Science  
PHD, Georgia Institute of Technology, 2006

Fernando, Sandun, Associate Professor  
Biological & Agricultural Eng  
PHD, University of Nebraska, 2003

Ferris, Thomas, Assistant Professor  
Industrial & Systems Eng  
MS, University of Michigan, 2006

Ficht, Allison, Professor  
Molecular & Cellular Medicine  
PHD, Vanderbilt University, 1980
Ficht, Thomas, Professor  
Veterinary Pathobiology  
PHD, Columbia University, 1980

Fickel, Larry, Senior Lecturer  
Construction Science  
BS, Texas A&M University, 1981

Fiechtner, Susan, Clinical Associate Professor  
Accounting  
PHD, University of Oklahoma, 1982

Fields, Shereece, Associate Professor  
Psychology  
PHD, University of South Florida, 2008

Fields, Steven, Adjunct Professor  
School of Law  
JD, University of Oklahoma School of Law, 1986

Figlus, Jens, Assistant Professor  
Ocean Engineering  
PHD, University of Delaware, 2010

Filippi, Anthony, Associate Professor  
Geography  
PHD, University of South Carolina, 2003

Finch, Krista, Instructional Assistant Professor  
Visualization  
MFA, Maryland Institute College of Art, 2000

Finch, Sherman, Assistant Professor  
Visualization  
MFA, Maryland Institute College of Art, 1998

Fink, Rainer, Associate Professor  
Engineering Technology & Industrial Dist  
PHD, Texas A&M University, 1995

Finkelstein, Alexander, Professor  
Physics And Astronomy  
PHD, Laudau Institute for Theoretical Physics, 1972

Finlayson, Scott, Associate Professor  
Soil & Crop Sciences  
PHD, University of Calgary, 1994

Finn, Tiffany, Clinical Assistant Professor  
Restorative Sciences  
DDS, Texas A&M University Baylor College of Dentistry, 1992

Fitza, Markus, Assistant Professor  
Management  
PHD, University of Colorado, 2010

Fitzgerald, Lee, Professor  
Wildlife & Fisheries Sciences  
PHD, University of New Mexico, 1993

Fitzhugh, Thomas, Lecturer  
Maritime Administration  
JD, University of Texas School of Law, 1976

Fitzsimmons, Jessica, Assistant Professor  
Oceanography  
PHD, Massachusetts Institute of Technology, 2013

Flagg, James, Associate Professor  
Accounting  
PHD, Texas A&M University, 1988

Flaherty, Jane, Lecturer  
History  
PHD, Texas A&M University, 2005

Flanagan, Gerald, Assistant Professor  
School of Law  
JD, University of Houston Law Center, 2003

Fleck, Diane, Associate Professor  
Diagnostic Sciences  
DDS, Baylor College of Dentistry, 1986

Flint, Gerald, Clinical Associate Professor  
Management  
PHD, Texas A&M University, 1997

Floudas, Christodoulos, Professor  
Chemical Engineering  
PHD, Carnegie Mellon University, 1986

Fluckey, James, Professor  
Health & Kinesiology  
PHD, The Pennsylvania State University, 1995

Foias, Ciprian, Distinguished Professor  
Mathematics  
PHD, University of Bucharest, 1968

Folden, Charles, Associate Professor  
Chemistry  
PHD, University of California, Berkeley, 2004

Foote, Lorien, Professor  
History  
PHD, University of Oklahoma - Norman, 1999

Ford, Albert, Professor  
Physics And Astronomy  
PHD, University of Texas at Austin, 1972

Ford, David, Professor  
Civil Engineering  
PHD, Massachusetts Inst of Technology, 1995

Ford, John, Associate Professor  
Nuclear Engineering  
PHD, University of Tennessee, 1992

Forrest, David, Professor  
Animal Science  
PHD, University of Wyoming, 1979
Forsgaard, Jens, Visiting Assistant Professor
Mathematics
PHD, Stockholm University, 2015

Fortney, Suraya, Professor
School of Law
LLM, Columbia University School of Law, 1992

Fossett, Mark, Professor
Sociology
PHD, The University of Texas - Austin, 1983

Foster, Courtney, Lecturer
Accounting
MS, Texas A&M University, 2008

Foster, Holly, Associate Professor
Sociology
PHD, University of Toronto, 2001

Foster, Margaret, Associate Professor
Tamu Libraries
MPH, The University of Texas Health Science Center, 2009

Foucart, Simon, Associate Professor
Mathematics
PHD, University of Cambridge, 2005

Fournier, Constance, Clinical Professor
Educational Psychology
PHD, University of Texas at Austin, 1987

Fowler, Allison, Adjunct Assistant Professor
Restorative Sciences
DDS, Texas A&M University Baylor College of Dentistry, 2013

Fowler, Rhonda, Clinical Assistant Professor
Educ Admn & Human Resource Dev
PHD, Texas A&M University, 2013

Fragiadakis, Daniel, Assistant Professor
Economics
PHD, Stanford University, 2014

Francique, Akilah, Assistant Professor
Health & Kinesiology
PHD, University of Georgia, 2008

Frank-Cannon, Tamy, Clinical Assistant Professor
 Vet Integrative Biosciences
BS, Texas A&M University, 1992

Franklin, Carter, Visiting Lecturer
Maritime Administration
PHD, Purdue University, 1968

Frauenfeld, Oliver, Associate Professor
Geography
PHD, University of Virginia, 2003

Frech, Devek, Adjunct Assistant Professor
Orthodontics
MS, University of Washington, Seattle, 1988

Fredrickson, Henry, Professor Of The Practice
Marine Engineering
CERT, US Coast Guard, 1968

Freed, Alan, Professor
Mechanical Engineering
DEN, University of Wisconsin-Madison, 1985

Frieda, Dianna, Assistant Lecturer
Teaching, Learning And Culture
MS, Texas A&M University, 1984

Fries, Rainer, Associate Professor
Physics And Astronomy
PHD, University of Regensburg, Germany, 2001

Fromme, Daniel, Associate Professor & Extension Specialist
Soil & Crop Sciences
PHD, Texas A&M University, 2007

Froyd, Jeff, Tees Research Professor
Engineering Student Serv & Academic Prog
PHD, University of Minnesota, 1979

Fry, Edward, Distinguished Professor
Physics And Astronomy
PHD, University of Michigan, 1969

Fry, Erin, Lecturer
Mathematics
MS, University Of Illinois Urbana Champaign, 1990

Fry, Gary, Associate Professor
Civil Engineering
PHD, University of Illinois, 1995

Frye, Gerald, Professor Emeritus
Neuroscience & Experimental Therapeutics
PHD, The University of North Carolina at Chapel Hill, 1977

Fuhrmann, Matthew, Associate Professor
Political Science
PHD, University of Georgia, 2008

Fujiwara, Masami, Associate Professor
Wildlife & Fisheries Sciences
PHD, Massachusetts Inst of Technology, 2002

Fullerton, Tracy, Associate Professor Of The Practice
Engineering Student Serv & Academic Prog
PHD, Texas A&M University, 2011

Fulling, Stephen, Professor
Mathematics
PHD, Princeton University, 1972

Fulton, Patrick, Assistant Professor
Geology & Geophysics
PHD, Pennsylvania State University, 2008

Fulton, Sarah, Associate Professor
Political Science
PHD, University of California, Davis, 2006
Fuqua, Amy, Adjunct Professor
School of Law
JD, University of Houston Law Center, 1997

Furth, Brett, Lecturer
Liberal Studies
MS, University of Wisconsin-Milwaukee, 2005

Furuta, Richard, Professor
Computer Science & Engineering
PHD, University of Washington, 1986

Gabbai, Francois, Professor
Chemistry
PHD, Technische Universitat Munchen, Germany, 1999

Gabbard, Carl, Professor
Health & Kinesiology
PHD, North Texas State University, 1977

Gabriel, Eleanor, Adjunct Professor
School of Law
JD, Texas Tech School of Law, 1980

Gaddis, Keith, Visiting Assistant Professor
Geography
PHD, University of California-Los Angeles, 2014

Gaddy, Dana, Professor
Vet Integrative Biosciences
PHD, Baylor College of Medicine, 1991

Gaede, Holly, Instructional Assistant Professor
Chemistry

PHD, Iowa State University, 1990

Gan, Li, Professor
Economics
PHD, University of California, Berkeley, 1998

Ganesh, Vannakambadi, Assistant Professor
Institute of Biosciences & Tec
PHD, University of Madras, 2000

Gannaway, Mark, Clinical Associate Professor
Restorative Sciences
DDS, Baylor College of Dentistry, 1981

Ganz, Jennifer, Professor
Educational Psychology
PHD, University of Kansas, 2002

Gao, Huilin, Assistant Professor
Civil Engineering
PHD, Princeton University, 2005

Garcia, Deni, Adjunct Professor
School of Law
JD, Texas Wesleyan University, 2000

Garcia, Leslie, Instructional Assistant Professor
Animal Science
PHD, Texas A&M University, College Station, 2015

Garcia, Luis, Adjunct Assistant Professor
Restorative Sciences
DDS, Texas A&M University Baylor College of Dentistry, 1999

Garcia, Magdiel, Clinical Assistant Professor
College Of Nursing
MNU, The University of Texas - Austin, 2012

Garcia, Robert, Assistant Professor
Philosophy & Humanities
PHD, University of Notre Dame, 2009

Garcia, Tanya, Assistant Professor
Epidemiology & Biostatistics
PHD, Texas A&M University, 2011

Gardner, Wilford, Professor
Oceanography
PHD, Massachusetts Inst of Technology, 1978

Garitano, Carmela, Associate Professor
Africana Studies
PHD, Michigan State University, 2001
Garritano, Carmela, Associate Professor
Film Studies
PHD, Michigan State University, 2001

Gary, Jodie, Assistant Professor
College Of Nursing
PHD, University of Texas at Tyler, 2012

Garza-Horne, Julie, Lecturer
Liberal Studies
MA, University of Houston Clear Lake, 2010

Gashev, Anatoliy, Associate Professor
Medical Physiology
PHD, Pavlov Institute of Physiology, 1989

Gaspar, Julian, Clinical Professor
Finance
PHD, Georgetown University, 1981

Gastel, Barbara, Professor
Vet Integrative Biosciences
MD, Johns Hopkins University, 1978

Gatlin, Delbert, Regents Professor
Wildlife & Fisheries Sciences
PHD, Mississippi State University, 1983

Gatson, Sarah, Associate Professor
Sociology
PHD, Northwestern University, 1999

Gause, Francis, Professor
International Affairs
PHD, Harvard University, 1987

Gautam, Natarajan, Professor
Industrial & Systems Eng
PHD, University of North Carolina at Chapel Hill, 1997

Gaynanova, Irina, Assistant Professor
Statistics
PHD, Cornell University, 2015

Ge, Yufeng, Research Assistant Professor
Biological & Agricultural Eng
PHD, Texas A&M University, 2007

Gehring, Kerri, Associate Professor
Animal Science
PHD, Texas A&M University, 1994

Geismar, Harry, Associate Professor
Information & Operations Mgmt
PHD, University of Texas at Dallas, 2003

Geismar, Karen, Lecturer
Nutrition & Food Science
MS, Texas Woman's University, Denton, 1998

Geller, Mark, Adjunct Assistant Professor
Orthodontics
MS, Baylor College of Dentistry, 1975

Geller, Susan, Professor
Mathematics
PHD, Cornell University, 1975

Gelwick, Frances, Emeritus Professor
Wildlife & Fisheries Sciences
PHD, University of Oklahoma, 1995

Genecov, Jeffrey, Adjunct Assistant Professor
Orthodontics
DDS, Baylor College of Dentistry, 1985

Gentry, Terry, Associate Professor
Soil & Crop Sciences
PHD, University of Arizona, 2003

George, James, Professor
School of Law
JD, The University of Tulsa, 1978

George, Theodore, Associate Professor
Philosophy & Humanities
PHD, Villanova University, 2000

Georgiades, Costas, Professor
Electrical & Computer Eng

Geraci, Lisa, Associate Professor
Psychology
PHD, State University of New York at Stony Brook, 2001

Geva, Anat, Professor
Architecture
PHD, Texas A&M University, 1995

Geva, Nehemia, Associate Professor
Political Science
PHD, Ohio State University, 1977

Gharaibeh, Nasir, Associate Professor
Civil Engineering
PHD, University of Illinois, 1997

Gharehgozli, Amir, Assistant Professor
Maritime Administration
PHD, Rotterdam School of Management, 2012

Giardino, John, Professor
Geology & Geophysics
PHD, University of Nebraska, Lincoln, 1979

Gibbons, Philippa, Clinical Assistant Professor
Vet Large Animal Clinical Sc
MS, Texas A & M University, 2012

Gibbs, Brian, Visiting Lecturer
Architecture
MAR, Texas A&M University, 2006

Gibbs, Holly, Lecturer
Biomedical Engineering
PHD, Texas A&M University, 2015

Restorative Sciences
DDS, Texas A&M University Baylor College of Dentistry, 1998

Goydan, David, Adjunct Assistant Professor
General Dentistry
DMD, University of Pittsburgh School of Dental Medicine, 1977

Gracia, Pete, Senior Lecturer
Liberal Studies
MS, University of Houston - Clear Lake, 1991
Graf, Kelly, Assistant Professor  
Anthropology  
PHD, University of Nevada, Reno, 2008

Graham, Cole, Executive Professor  
Public Service & Administration  
PHD, University of South Carolina, 1971

Graham, Gary, Professor & Extension Specialist  
Wildlife & Fisheries Sciences  
BS, Texas A&M University, 1969

Graham, Lori, Clinical Assistant Professor  
Teaching, Learning And Culture  
PHD, Texas A&M University, 2007

Graham, Rene, Visiting Lecturer  
Architecture  
MA, Rice University, 2010

Gramann, James, Professor  
Recreation, Park & Tourism Sc  
PHD, University of Illinois at Urbana-Champaign, 1980

Granberry, Mark, Professor  
College of Pharmacy

Granger, Harris, Distinguished Professor  
Medical Physiology  
PHD, University of Mississippi, 1970

Grant, Melinda, Instructional Professor  
Health & Kinesiology  
MS, West Virginia University, 1976

Grant, William, Professor  
Wildlife & Fisheries Sciences  
PHD, Colorado State University, 1974

Grasley, Zachary, Associate Professor  
Civil Engineering  
PHD, University of Illinois Urbana Champaign, 2006

Grasso, Barton, Lecturer  
Ocean Engineering  
MS, North Carolina State University, 2007

Gratz, Paul, Associate Professor  
Electrical & Computer Eng  
PHD, University of Texas, 2008

Grau, James, Professor  
Psychology  
PHD, University of Pennsylvania, 1985

Graul, Michael, Associate Professor Of The Practice  
Industrial & Systems Eng  
PHD, Texas A&M University, 1995

Graves, Gregory, Professor Of The Practice  
Engineering Student Serv & Academic Prog  
PHD, Texas A&M University, 2006

Grayson, Stephen, Clinical Assistant Professor  
College of Pharmacy  
BS, University of Texas, 1985

Grayton, Jesse, Clinical Assistant Professor  
Vet Small Animal Clinical Sc  
DVM, Kansas State University, 2009

Green, Eleanor, Professor  
Vet Large Animal Clinical Sc  
DVM, Auburn University, 1973

Green, John, Clinical Professor  
Health & Kinesiology  
PHD, Texas A&M University, 1996

Green, Lisa, Adjunct Assistant Professor  
Health & Kinesiology  
PHD, Texas Women's University, 2001

Green, Micah, Associate Professor  
Chemical Engineering  
PHD, Massachusetts Institute of Technology, 2007

Green, Michael, Professor  
School of Law  
LLM, University of Wisconsin-Madison School of Law, 1999

Green, Thomas, Associate Professor  
Anthropology  
PHD, University of Texas, 1974

Greenbaum, Ira, Professor  
Biology  
PHD, Texas Tech University, 1978

Greenwald, Michael, Professor  
Performance Studies  
PHD, University of California at Santa Barbara, 1981

Greenwood, C. Michael, Clinical Professor  
Health & Kinesiology  
PHD, Texas Woman's University, 1990

Greenwood, Lori, Clinical Professor  
Health & Kinesiology  
PHD, Oregon State University, 1995

Gresham, Larry, Associate Professor  
Marketing  
PHD, University of South Carolina, 1982

Griffin, Cleet, Clinical Associate Professor  
Vet Large Animal Clinical Sc  
DVM, Texas A&M University, 1990

Griffin, Davey, Professor & Extension Specialist  
Animal Science  
PHD, Texas A&M University, 1989

Griffin, James, Professor  
Public Service & Administration  
PHD, University of Pennsylvania, 1971
Griffin, John, Assistant Professor
Vet Large Animal Clinical Sc
DVM, Texas A&M University, 2004

Griffin, Lawrence, Professor
Marine Science
PHD, University of Texas at Austin, 1972

Griffin, Ricky, Distinguished Professor
Management
PHD, University of Houston, 1978

Griffin, Robert, Associate Professor
English
PHD, Yale University, 1985

Griffin, Ronald, Professor
Agricultural Economics
PHD, University of Wisconsin, 1980

Griffin, Sarah, Lecturer
Vet Small Animal Clinical Sc
DVM, Texas A&M University, 2007

Griffin, Stephen, Associate Professor
College of Dentistry
DDS, DDS, 1985 BCD, 1985

Griﬃng, Lawrence, Associate Professor
Biology
PHD, Stanford University, 1981

Grifﬁth, Jennifer, Instructional Associate Professor
School Of Public Health
DrPH, University of North Carolina Chapel Hill, 2004

Grifﬁth, Karee, Lecturer
Teaching, Learning And Culture
PHD, University of Mary Hardin-Baylor, 1993

Grifﬁths, Garth, Adjunct Assistant Professor
Periodontics
DDS, The University of Texas Health Science Center at San Antonio, 1992

Grigorchuk, Rostislav, Distinguished Professor
Mathematics
PHD, Moscow State University of Lomonosov, 1986

Grisham, Ray, Lecturer
Construction Science
JD, University of Texas at Austin, 1972

Grogan, David, Clinical Associate Professor
Oral & Maxillofacial Surgery
MS, Baylor College of Dentistry, 1986

Gronberg, Timothy, Professor
Economics
PHD, Northwestern University, 1978

Groppe, Jay, Associate Professor
Biomedical Sciences
PHD, University of California at Santa Barbara, 1991

Gross, Dennis, Professor
Plant Pathology & Microbiology
PHD, University of California, Davis, 1976

Grossman, Ethan, Professor
Geology & Geophysics
PHD, University of Southern California, 1982

Grossman, Steven, Associate Professor
Accounting
PHD, Tufts University, 1972

Grubin, Darla, Clinical Assistant Professor
College Of Nursing
MNU, The University of Texas Health Science Center, 1999

Grunlan, Jaime, Professor
Mechanical Engineering
PHD, University of Minnesota, 2001

Grunlan, Melissa, Associate Professor
Biomedical Engineering
PHD, University of South Carolina, 2004

Gu, GuoFei, Associate Professor
Computer Science & Engineering
PHD, Georgia Institute of Technology, 2008

Gu, Lili, Visiting Assistant Professor
Mechanical Engineering
PHD, Tsinghua University, 2015

Gu, Mengmeng, Associate Professor & Extension Specialist
Horticultural Sciences

Guerin, Amy, Instructional Assistant Professor
Performance Studies
DVM, University of Houston, 2006

Guermond, Jean-Luc, Professor
Mathematics
PHD, Sorbonne Universites, 1995

Guidry, Jeffrey, Associate Professor
Health & Kinesiology
PHD, University of Texas Health Science Center at Houston, 1994

Guillen, George, Lecturer
Marine Biology
PHD, University of Texas HSC at Houston, 1996

Guinn, James, Instructional Assistant Professor
Health & Kinesiology
MA, Abilene Christian University, 2012
MA, Abilene Christian University, 2012

Guiseppi Elie, Anthony, Professor
Biomedical Engineering
PHD, Massachusetts Institute of Technology, 1983
Guleria, Rakeshwar, Research Assistant Professor
Medical Physiology
PHD, King George's Medical University, 2002

Gunasekaran, Senthilmu, Lecturer
Engineering Technology & Industrial Dist
DEN, Texas A&M University, 2014

Gundy, Anna, Clinical Professor Emeritus
Edc Admn & Human Resource Dev
PHD, Texas A&M University, 1999

Guneralp, Burak, Research Assistant Professor
Geography
PHD, University of Illinois at Urbana-Champaign, 2006

Guneralp, Inci, Associate Professor
Geography
PHD, University of Illinois at Urbana-Champaign, 2007

Gunnels, Emily, Lecturer
Health & Kinesiology
MS, Texas A&M University, 2005

Guo, Shaodong, Associate Professor
Nutrition & Food Science
PHD, Peking University, Beijing China, 1995

Guo, Yanqiu, Lecturer
Mathematics
PHD, University of Nebraska-Lincoln, 2012

Gupta, Sudhiranjan, Assistant Professor
Medical Physiology
PHD, Bose Institute, India, 1999

Gursky, Sharon, Professor
Anthropology
PHD, State University of New York at Stony Brook, 1997

Gustafson, Robert, Associate Professor
Mathematics
PHD, Yale University, 1979

Gutierrez-Osuna, Ricardo, Professor
Computer Science & Engineering
PHD, North Carolina State University, 1998

Guyton, Sally, Senior Lecturer
Finance
MBA, University of Texas, 1982

Gwyn, David, Professor Of The Practice
Engineering Student Serv & Academic Prog
BS, Texas A&M University, 1992

Habert, Jeff, Professor
Architecture
PHD, University of Colorado, 1986

Haefeli, Evan, Associate Professor
History
PHD, Princeton University, 2000

Hagerty, Veronica, Lecturer
George Bush School of Govern
PHD, Antioch University, 2012

Haglund, John, Lecturer
Mechanical Engineering
PHD, Texas A&M University, 2003

Hague, Steven, Associate Professor
Soil & Crop Sciences
PHD, Texas A&M University, 2000

Hailey, Camille, Senior Lecturer
Management
JD, South Texas College of Law, 1993

Hairrell, Angela, Lecturer
Teaching, Learning And Culture
PHD, Texas A&M University, 2008

Hajash, Donna, Instructional Associate Professor
Visualization
MA, Siena Heights College, 1981

Hajimirza, Shima, Assistant Professor
Mechanical Engineering
PHD, Texas A&M University, 2013

Hala, David, Assistant Professor
Marine Biology
PHD, Brunel University, 2007

Hale, Daniel, Professor & Extension Specialist
Animal Science
PHD, Oklahoma State University, 1986

Haliburton, James, Lecturer
Architecture
MAR, Texas A&M University, 2014

Hall, Charles, Professor
Horticultural Sciences
PHD, Mississippi State University, 1988

Hall, Christopher, Lecturer
Marine Biology
BA, University of North Carolina at Wilmington, 1997
BA, University of North Carolina at Wilmington, 1997

Hall, Michael, Professor
Chemistry
PHD, University of Wisconsin - Madison, 1971

Hall, Robert, Associate Professor
Educational Psychology
PHD, UCLA, 1979

Hallermann, Detlef, Clinical Associate Professor
Finance
PHD, Colorado School of Mines, 1999

Hamer, Gabriel, Assistant Professor
Entomology
PHD, Michigan State University, 2008
Hand, Michael, Professor
Philosophy & Humanities
PHD, Florida State University, 1985

Handler, Robert, Research Professor
Mechanical Engineering
PHD, University of Minnesota, 1980
DEN, University of Minnesota, 1980

Haney, Adam, Lecturer
Liberal Studies
MA, Texas A&M University-Commerce, 2014

Hanik, Michael, Instructional Assistant Professor
Health & Kinesiology
MS, Northwestern State University of Louisiana, 1996

Hankins, Rebecca, Associate Professor
Tamu Libraries
MLS, Louisiana State University, 2000

Hanks, John, Professor Of The Practice
Biomedical Engineering
MS, University of Texas, Austin, 1989

Hannaford, Dinah, Assistant Professor
International Studies Department
PHD, Emory University, 2014

Hannah, James, Professor
English
MFA, University of Iowa, 1980

Hansen, Cathy-Lynn, Clinical Assistant Professor
College Of Nursing
MNU, University of Texas El Paso, 1988

Hanson, John, Professor
Economics
PHD, University of Pennsylvania, 1972

Haque, Mohammed, Professor
Construction Science
PHD, New Jersey's Science & Technology University, 1995

Hardin, Paul, Distinguished Professor
Biology
PHD, Indiana University, 1987

Harding, Kenn, Professor
Chemistry
PHD, Stanford University, 1968

Hardy, Joanne, Clinical Associate Professor
Vet Large Animal Clinical Sc
DVM, University of Montreal, 1982

Hardy, John, Distinguished Professor
Physics And Astronomy
PHD, McGill University, 1965

Hare, Martha, Clinical Assistant Professor
College Of Nursing
DNP, Texas Tech University Health Science Center, 2010
Haridas, Balakrishna, Professor Of The Practice
Biomedical Engineering
PHD, University of Cincinnati, 2001

Hark, John, Lecturer
Maritime Administration
BS, Texas A&M University, 1989

Harlin, Julie, Associate Professor
Ag Leadership, Educ & Comm
PHD, Oklahoma State University, 1999

Harlow, Mark, Assistant Professor
Biology
PHD, Stanford University, 2001

Harmel, Robert, Professor
Political Science
PHD, Northwestern University, 1977

Harner, James, Professor Emeritus
English
PHD, University of Illinois, Urbana-Champaign, 1972

Harness, Nathaniel, Instructional Associate Professor
Agricultural Economics
PHD, Texas Tech University, 2007

Harrel, Stephen, Adjunct Professor
Periodontics
DDS, Baylor University College of Dentistry, 1972

Harrington, Maxine, Professor
School of Law
JD, The George Washington University, 1977

Harris IV, T, Executive Professor
Finance
BBA, Texas A&M University, 1980

Harris, Harlan, Associate Professor
Electrical & Computer Eng
PHD, Texas Tech University, 2003

Harris, Isaac, Visiting Assistant Professor
Mathematics
PHD, University of Delaware, 2015

Harris, James, Professor Of The Practice
Chemical Engineering
PHD, University of Texas, Austin, 1981

Harris, Jason, Lecturer
English
PHD, University of Washington, 2001

Harris, Joseph, Adjunct Assistant Professor
Pediatric Dentistry
MS, Baylor College of Dentistry, 1974

Harris, Stefanie, Associate Professor
International Studies Department
PHD, Emory University, 1999

Harrison, Elizabeth, Clinical Assistant Professor
College Of Nursing
MNU, George Mason University, 2012

Harrist, Christopher, Assistant Professor & Extension Specialist
Recreation, Park & Tourism Sc
PHD, Texas A&M University, 2009

Hart, Jeffrey, Professor
Statistics
PHD, Southern Methodist University, 1981

Hartl, Darren, Tees Research Assistant Professor
Aerospace Engineering
PHD, Texas A&M University, 2009

Hartman, Jared, Lecturer
Accounting
MS, Texas A&M University, College Station, TX, 2006

Hartnack, Amanda, Assistant Professor
Vet Large Animal Clinical Sc
MS, Colorado State University, 2006
MS, The Ohio State University, 2014

Hartwig, Karl, Professor
Materials Science And Engineering
PHD, University of Wisconsin - madison, 1977

Harvey, Aja, Veterinary Resident
Vet Large Animal Clinical Sc
DVM, Tuskegee University, 2014

Harvey, Idethia, Associate Professor
Health & Kinesiology
PHD, University of Pittsburgh, 2014

Harwell, William, Assistant Professor Of The Practice
Recreation, Park & Tourism Sc
MS, Memphis State University, 1980

Hasan, Abu Rashid, Professor
Petroleum Engineering
PHD, University of Waterloo, 1979

Hasan, M, Assistant Professor
Chemical Engineering
PHD, National University of Singapore, 2010

Hasçakır, Berna, Assistant Professor
Petroleum Engineering
PHD, Middle East Technical University, 2008

Hassan, Yassin, Professor
Nuclear Engineering
PHD, University of Illinois, 1980

Hatala, Jeffrey, Instructional Assistant Professor
Health Policy & Management
PHD, University of South Carolina School of Public Health, 2013

Hatch, Stephan, Professor
Ecosystem Science & Mgmt
PHD, Texas A&M University, 1975
Hatfield, April, Associate Professor
History
PHD, Johns Hopkins University, 1997

Hatfield, Lloyd, Senior Lecturer
Statistics
MS, University of North Texas, 1980

Havens, Jessica, Lecturer
Communication
MA, Colgate University, 2012

Hawkins, Cecelia, Instructional Professor
English
MA, Stephen F. Austin State University, 1975

Hawkins, Harvey, Associate Professor
Civil Engineering
PHD, Texas A&M University, 1993

Hawthorne, Melanie, Professor
International Studies Department
PHD, University of Michigan Ann Arbor, 1987

Hayatdavoodi, Masoud, Instructional Assistant Professor
Ocean Engineering
PHD, University of Hawaii at Manoa, 2013

Hayenga, Wayne, Extension Specialist
Agricultural Economics
PHD, Michigan State University, 1973

Hays, Dirk, Professor
Soil & Crop Sciences
PHD, University of Calgary, 1997

Hazel, Michael, Clinical Assistant Professor
College Of Nursing
DNP, Texas Tech University Health Science Center, 2010

He, Ping, Associate Professor
Biochemistry & Biophysics
PHD, Kansas State University, 2003

He, Weiling, Associate Professor
Architecture
PHD, Georgia Institute of Technology, 2005

Heaney, Michael, Instructional Assistant Professor
Geology & Geophysics
PHD, Texas A&M University, 1998

Heaps, Cristine, Associate Professor
Vet Physiology & Pharmacology
PHD, University of Missouri - Columbia, 1999

Heatley, Jennifer, Associate Professor
Vet Small Animal Clinical Sc
DVM, Texas A&M University, 1995

Heffer, Robert, Clinical Professor
Psychology
PHD, Louisiana State University & A&M College, 1988

Hegde, Rashmi, Adjunct Assistant Professor
Periodontics
MS, University of Alabama - Birmingham, 2005

Heilman, James, Professor
Soil & Crop Sciences
PHD, Kansas State University, 1977

Heim, Gregory, Associate Professor
Information & Operations Mgmt
PHD, University of Minnesota, Twin Cities, 2000

Hein, Travis, Professor
Surgery
PHD, Texas A&M University, 1997

Heinz, Kevin, Professor
Entomology
PHD, University of California, Riverside, 1989

Heird, James, Executive Professor
Animal Science
PHD, Texas Tech University, 1978

Heltchue, Regis, Lecturer
George Bush School of Govern
BA, Rensselaer Polytechnic Institute, 1956

Helfeldt, John, Professor
Teaching, Learning And Culture
PHD, Syracuse University, 1973

Helge, Terri, Professor
School of Law
JD, South Texas College of Law, 2001

Hemmer, Philip, Professor
Electrical & Computer Eng
PHD, Massachusetts Inst of Technology, 1984

Henderson, Bryan, Clinical Assistant Professor
Oral Surgery
DDS, Baylor College of Dentistry, 1987

Henderson, Mary, Associate Professor
Sociology
PHD, University of California, San Diego, 1991

Henderson, Michelle, Lecturer
Biochemistry & Biophysics
PHD, Texas A&M University, 2010

Hendrix, Laura, Assistant Professor
Microbial Pathogenesis & Imm
PHD, Washington State University, 1991

Hennessy, Bernard, Clinical Assistant Professor
Diagnostic Sciences
DDS, University of Illinois Urbana, 1986

Henning, William, Executive Professor
School of Law
JD, University of Tennessee-Knoxville, 1976
Hensel, Martha, Assistant Lecturer
Veterinary Pathobiology
DVM, Ohio State University, 2013

Hensley, Douglas, Senior Professor
Mathematics
PHD, University of Minnesota, 1974

Henson, Clifford, Adjunct Professor
School of Law
JD, University of Illinois, 2011

Henthorne, Mary, Instructional Assistant Professor
Health & Kinesiology
MS, Texas A&M University, 2008

Heo, Jinmoo, Associate Professor
Recreation, Park & Tourism Sc
PHD, Indiana University, 2007

Herbert, Bruce, Professor
Tamu Libraries
MS, University of California, Riverside, 1988

Hercot, Philippe, Executive Professor
Finance
MBA, Harvard Graduate School of Business Administration, 1993

Herman, Cheryl, Clinical Associate Professor
Vet Integrative Biosciences
DVM, University of Saskatchewan, 1987

Herman, James, Clinical Professor
Vet Physiology & Pharmacology
MS, Texas A&M University, 2001

Herman, Jennifer, Assistant Professor
Biochemistry & Biophysics
PHD, Indiana University, 2005

Hermann, Charles, Professor
International Affairs
PHD, Northwestern University, 1995

Hernandez, Alexander, Instructional Assistant Professor
Sociology
PHD, Boston College, 2014

Hernandez, Annalisa, Assistant Lecturer
Veterinary Pathobiology
BS, Loyola University New Orleans, 2010

Hernandez, Sonia, Associate Professor
History
PHD, University of Houston, 2006

Herring, Andy, Professor
Animal Science
PHD, Texas A&M University, 1994

Herring, Mary, Associate Professor
Humanities In Medicine
BA, Texas A&M University, 1983

Herman, Timothy, Professor
Soil & Crop Sciences
DVM, The University of Idaho, 1977

Herschbach, Dudley, Distinguished Professor
Physics And Astronomy
PHD, Harvard University, 1958

Heseltine, Johanna, Clinical Assistant Professor
Vet Small Animal Clinical Sc
MS, Virginia-Maryland Regional College of Veterinary Medicine, 2004

Hester, Yvette, Instructional Associate Professor
Mathematics
PHD, Texas A&M University, 2000

Hetland, Robert, Professor
Oceanography
PHD, Florida State University, 1999

Heuman, Joshua, Instructional Assistant Professor
Communication
PHD, University of Wisconsin - Madison, 2006

Hibbitts, Toby, Lecturer
Wildlife & Fisheries Sciences
MS, Texas A&M University, 2000

Hicks, Joshua, Associate Professor
Psychology
PHD, University of Missouri - Columbia, 2009

Higginbotham, Billy, Professor & Extension Specialist
Wildlife & Fisheries Sciences
PHD, Stephen F. Austin State University, 1991

Highfield, Wesley, Assistant Professor
Marine Science
PHD, Texas A&M University, 2008

Hildebrand, Brody, Adjunct Assistant Professor
Restorative Sciences
DDS, Texas A&M University Baylor College of Dentistry, 2000

Hilderbrand, Mary, Senior Lecturer
Public Service & Administration
PHD, Harvard University, 1992

Hill, Alfred, Professor
Petroleum Engineering
PHD, University of Texas, 1978

Hill, Kim, Professor
Political Science
PHD, Rice University, 1974

Hill, Rodney, Professor
Architecture
MA, University of California - Berkeley, 1969

Hill, Sharon, Adjunct Assistant Professor
Pediatric Dentistry
DDS, University of North Carolina, 1986
Hill-Jackson, Valerie, Clinical Professor
Teaching, Learning And Culture
PHD, St. Joseph's University, 2003

Hillhouse, Andrew, Research Assistant Professor
Veterinary Pathobiology
PHD, University of Missouri-Columbia, 2010

Hilty, Christian, Associate Professor
Chemistry
PHD, Swiss Federal Institute of Technology Zurich, 2004

Hinojosa, Felipe, Associate Professor
History
PHD, University of Houston, 2009

Hinrichs, Katrin, Professor
Vet Physiology & Pharmacology
PHD, University of Pennsylvania, 1988

Hinze, Erin, Adjunct Assistant Professor
Pediatric Dentistry
MS, Texas A&M University Baylor College of Dentistry, 2010

Hite, Gerald, Professor
Marine Science
PHD, University of Illinois at Urbana-Champaign, 1967

Hitt, Michael, Professor Emeritus
Management
PHD, Colorado University, 1974

Hoagwood, Terence, Professor
English
PHD, University of Maryland, 1979

Hochman, Mona, Lecturer
Marine Biology
MS, University of Maryland, 2000

Hodge, Courtney, Instructional Assistant Professor
Health & Kinesiology
PHD, Texas A&M University, 2015

Hodges, Louis, Associate Professor
Recreation, Park & Tourism Sc
PHD, Texas A&M University, 1971

Hodgson, Lucia, Assistant Professor
English
PHD, University of Southern California, 2009

Hoekstra, Mark, Associate Professor
Economics
PHD, University of Florida, 2006

Hoffman, Anton, Clinical Professor
Vet Integrative Biosciences
PHD, Texas A&M University, 1992

Hoffman, Matt, Instructor
College Of Nursing
BS, Texas A&M Health Science Center, 2010

Hogan, Harry, Professor
Mechanical Engineering
PHD, Texas A&M University, 1984

Hogler, Joe, Lecturer
George Bush School of Govern
PHD, University of Kent, 2011

Holder, Eugene, Assistant Professor
College of Pharmacy
MS, Sam Houston State University, Huntsville, TX, 1981

Holditch, Stephen, Professor
Petroleum Engineering
PHD, Texas A&M University, 1976

Holladay, Sherry, Professor
Communication
PHD, Purdue University, 1992

Holland, Brian, Assistant Professor
College Of Nursing
PHD, The University of Texas at Arlington, 2014

Holland, Hubert, Professor
School of Law
LLM, Columbia University School of Law, 2003

Hollenbach, Florian, Assistant Professor
Political Science
PHD, Duke University, 2015

Holliday, Ray, Assistant Professor Of The Practice
Architecture
MAR, Texas A&M University, 1992
MLA, Texas A&M University, 2000

Holliday, Shelley, Associate Professor Of The Practice
Architecture
MEN, Texas A&M University, 2001

Hollub, Ariane, Instructional Assistant Professor
Health & Kinesiology
PHD, Indiana University, 2009

Holman, Patricia, Research Associate Professor
Veterinary Pathobiology
PHD, Texas A&M University, 1994

Holste, James, Professor
Chemical Engineering
PHD, Iowa State University, 1973

Holt, Jeremy, Assistant Professor
Physics And Astronomy
PHD, Stony Brook University, NY, 2016

Holtzapple, Mark, Professor
Chemical Engineering
PHD, University of Pennsylvania, 1981

Holyfield, Lavern, Clinical Associate Professor
College of Dentistry
DDS, Baylor College of Dentistry, 1977
Holzenburg, Andreas, Professor
Biology
PHD, Georg-August-Universitat Gottingen, 1987

Holzweiss, Robert, Visiting Assistant Professor
History
PHD, Texas A&M University, 2001

Homrich da Jornada, Daniel, Lecturer
Engineering Technology & Industrial Dist
PHD, Texas A&M University, 2015

Honeyman, Allen, Associate Professor
Biomedical Sciences
PHD, University of Kansas, 1988

Hong, Traci, Associate Professor
Communication
PHD, University of Southern California, 2002

Hong, Yan, Associate Professor
Hlth Promotion & Comm Hlth Sci
PHD, Johns Hopkins University, Bloomberg School of Public Health, 2007

Hons, Frank, Senior Scientist
Soil & Crop Sciences
PHD, Texas A&M University, 1978

Hood, Marilynn, Lecturer
Agricultural Economics
MBA, Texas A&M University, 1992
MBA, Texas A&M University, 1992

Hook, Axel, Professor
Institute of Biosciences & Tec
PHD, University of Uppsala, Sweden, 1974

Hopkins, Allison, Assistant Professor
Anthropology
PHD, University of Florida, 2009

Hoppes, Sharman, Clinical Associate Professor
Vet Small Animal Clinical Sc
DVM, Oklahoma State University, 1993

Horbczewska, Ian, Associate Professor Of The Practice
Engineering Student Serv & Academic Prog
MEN, Texas A&M University, 2009

Horlen, Joseph, Associate Professor
Construction Science
JD, Baylor University, 1980

Horney, Jennifer, Associate Professor
Epidemiology & Biostatistics
PHD, University of North Carolina, 2009

Horrillo, Juan, Associate Professor
Ocean Engineering
PHD, University of Alaska at Fairbanks, 2006

Horseman, Michael, Associate Professor
College of Pharmacy

Hou, I-Hong, Assistant Professor
Electrical & Computer Eng
PHD, University of Illinois, 2011

Hourahan, Johanna, Instructional Associate Professor
Health & Kinesiology
MED, Texas A&M University, 2008

House, Felice, Assistant Professor
Visualization
MFA, University of Texas at Austin, 2011

Houser, Christopher, Associate Professor
Geography
PHD, University of Toronto, 2004

Houston, Mark, Professor
Marketing
PHD, Arizona State University, 1995

Hover, Matthew, Lecturer
George Bush School of Govern
LLM, U.S. Army Judge Advocate General's Legal Center and School, 2008
MA, U.S. Naval War College, 2011

Howard, Daniel, Professor
Sociology
PHD, Vanderbilt University, 1992

Howard, Michael, Assistant Professor
Management
PHD, University of Washington, 2012

Howard, Peter, Professor
Mathematics
PHD, Indiana University, 1998

Howe, Lisa, Professor
Vet Small Animal Clinical Sc
PHD, Texas A&M University, 1993

Howell, Jessica, Assistant Professor
English
PHD, University of California, Davis, 2008

Hoyos, Sebastian, Associate Professor
Electrical & Computer Eng
PHD, University of Delaware, 2004

Hronek, Melissa, Lecturer
Performance Studies
MMU, Baylor, 2005

Hsieh, Sheng-Jen, Professor
Engineering Technology & Industrial Dist
PHD, Texas Tech University, 1995

Hu, James, Professor
Biochemistry & Biophysics
PHD, University of Wisconsin - madison, 1987

Hu, Jiang, Professor
Electrical & Computer Eng
PHD, University of Minnesota, 2001
Hu, Xia, Assistant Professor
Computer Science & Engineering
PHD, Arizona State University, 2015

Huang, Chang, Associate Professor
Landscape Architecture & Urban Planning
PHD, University of Pennsylvania, 1995

Huang, Gangu, Professor
Electrical & Computer Eng
PHD, Washington University in St. Louis, 1980

Huang, Jianhua, Professor
Statistics
PHD, University of California, Berkeley, 1997

Huang, Reyko, Assistant Professor
International Affairs
PHD, Columbia University, 2012

Huang, Ruihong, Assistant Professor
Computer Science & Engineering
PHD, University of Utah, 2014

Huang, Shaoming, Assistant Professor
Computer Science & Engineering
PHD, Hong Kong University of Science and Technology, 2012

Huang, Yongheng, Associate Professor
Biological & Agricultural Eng
PHD, University of Nebraska - Lincoln, 2002

Huang, Yun, Assistant Professor
Institute of Biosciences & Tec
PHD, Georgia State University, 2009

Hubbard, John, Instructional Associate Professor
Neuroscience & Experimental Therapeutics
PHD, Texas A&M University, 1996

Huber, John, Lecturer
Health Policy & Management
PHD, University of Texas, HSC, 2004

Hudson, Angela, Associate Professor
History
PHD, Yale University, 2007

Hudson, David, Instructional Associate Professor
History
PHD, Texas A&M University, 1998

Hudson, Shane, Clinical Associate Professor
Health & Kinesiology
PHD, Texas A&M University, 2007

Hudson, Valerie, Professor
International Affairs
PHD, The Ohio State University, 1983

Hueste, Marybeth, Professor
Civil Engineering
PHD, University of Michigan, 1997

Huff, Gregory, Associate Professor
Electrical & Computer Eng
PHD, University of Illinois, 2006

Huff, Jerome, Visiting Lecturer
Construction Science
BS, Texas A&M University - Commerce, 2013

Hufn, Amie, Instructional Assistant Professor
Liberal Studies
BS, Texas A&M University, 2002

Hughart, Charlotte, Professor
School of Law
JD, University of Oklahoma, 1966

Hughbanks, Timothy, Professor
Chemistry
PHD, Cornell University, 1983

Hughes, Jan, Research Scientist
Educational Psychology
PHD, University of Texas at Austin, 1976

Hughill, Peter, Professor
Geography
PHD, Syracuse University, 1977

Hui, Jason, Adjunct Assistant Professor
Restorative Sciences
DDS, Texas A&M University Baylor College of Dentistry, 2011

Hulsey, Donald, Professor
Vet Small Animal Clinical Sc
DVM, Texas A&M University, 1970

Humphrey, Daniel, Associate Professor
Film Studies
PHD, University of Rochester, 2006

Humphrey, Daniel, Associate Professor
Womens Studies
PHD, University of Rochester, 2006

Hung, Nguyen, Associate Professor
Engineering Technology & Industrial Dist
PHD, University of California, Berkeley, 1987

Hunsucker, Bob, Adjunct Assistant Professor
General Dentistry
DDS, Baylor College of Dentistry, 1989

Hunter, Jacqueline, Clinical Assistant Professor
College Of Nursing
DNP, Radford University, 2014

Hur, Pilwon, Assistant Professor
Mechanical Engineering
DEN, University of Illinois at Urbana-Champaign, 2010

Hurdle, Julian, Associate Professor
Institute of Biosciences & Tec
PHD, University of Leeds, 2005
Hurlebaus, Stefan, Professor
Civil Engineering
PHD, University of Stuttgart, Germany, 2002

Hurley, Joseph, Senior Lecturer
Computer Science & Engineering
PHD, Texas A&M University, 2002

Hurley, Patricia, Professor
Political Science
PHD, Rice University, 1976

Hurtado Clavijo, Luis, Associate Professor
Wildlife & Fisheries Sciences
PHD, Rutgers, 2002

Hurtado, John, Professor
Aerospace Engineering
PHD, Texas A&M University, 1995

Hurtado, John, Professor
Engineering Student Serv & Academic Prog
PHD, Texas A&M University, 1995

Hutchinson, Richard, Lecturer
Engineering Student Serv & Academic Prog
MEN, Texas A&M University, 2001

Hutchison, Robert, Associate Professor
College of Pharmacy

Hutson, Brent, Clinical Associate Professor
Restorative Sciences
MS, Texas A&M University System Health Sciences Center, 2005

Hwang, Haeshin, Professor
Economics
PHD, University of Minnesota, Twin Cities, 1976

Hwang, Wonmuk, Associate Professor
Biomedical Engineering
PHD, Boston University, 2001

Hyde, Jennifer, Assistant Professor
Microbial Pathogenesis & Immu
BS, Texas A&M University, 2000

Hyland, David, Professor
Aerospace Engineering
DVM, Massachusetts Institute of Technology, 1974

Hyodo, Ayumi, Research Assistant Professor
Ecosystem Science & Mgmt
PHD, The University of Western Ontario, 2010

Iakovou, Eleftherios, Professor
Engineering Technology & Industrial Dist
PHD, Cornell University, 1992

Ibrahim, Amir, Professor
Soil & Crop Sciences
PHD, Colorado State University, 1998

Ighani, Elham, Adjunct Assistant Professor
Restorative Sciences
DDS, Texas A&M Baylor College of Dentistry, 2008

Igumenova, Tatyana, Associate Professor
Biochemistry & Biophysics
PHD, Columbia University, 2003

Ikenmeyer, Christian, Visiting Assistant Professor
Mathematics
PHD, Universitat Paderborn, Germany, 2012

Iliffe, Thomas, Professor
Marine Biology
PHD, University of Texas Medical Branch at Galveston, 1977

Imbrie, Peter, Associate Professor
Engineering Student Serv & Academic Prog
PHD, Texas A&M University, 2000

Imhoff, Andrea, Instructional Assistant Professor
Performance Studies
MA, University of Illinois at Urbana Champaign, 1992

Imhoff, Brian, Associate Professor
Hispanic Studies
PHD, University of Illinois at Urbana - Champaign, 1996

Ing, Nancy, Associate Professor
Animal Science
PHD, University of Florida, 1988

Ioerger, Thomas, Associate Professor
Computer Science & Engineering
PHD, University of Illinois, 1996

Iranmehr, Mehrnaz, Adjunct Assistant Professor
General Dentistry
DDS, Baylor College of Dentistry, 2003

Irby, Beverly, Professor
Educ Admn & Human Resource Dev
PHD, Univ of Mississippi, 1983

Ireland, Robert, Distinguished Professor
Management
PHD, Texas Tech University, 1977

Ireland-Stoddard, Kati, Instructional Assistant Professor
Plant Pathology & Microbiology
PHD, University of North Texas, 2012

Isdale, Charles, Senior Lecturer
Chemical Engineering
MBA, Southern Illinois University at Edwardsville, 1977

Ishdorj, Ariun, Assistant Professor
Agricultural Economics
PHD, Iowa State University, 2008

Ivanov, Ivan, Clinical Associate Professor
Vet Physiology & Pharmacology
PHD, University of South Florida, 1999
Ives, Maura, Professor
English
PHD, University of Virginia, 1990

Ivy, Delaney, Assistant Professor
College of Pharmacy

Jackson, Shona, Associate Professor
English
PHD, Stanford University, 2005

Jacob, Helder, Instructor
Orthodontics
MS, São Paulo State University, Brazil, 2006

Jacobs, Timothy, Associate Professor
Mechanical Engineering
PHD, University of Michigan, 2005

Jacobs, Wuraola, Instructional Assistant Professor
Health & Kinesiology
PHD, Texas A&M University, 2016

Jafari, Roozbeh, Associate Professor
Biomedical Engineering
PHD, University of California, 2006

Jalali, Sid, Clinical Assistant Professor
Endodontics
PHD, Kerman University of Medical Sciences/Iran, 2008

Jamal, Tazim, Associate Professor
Recreation, Park & Tourism Sc
PHD, University of Calgary, 1998

James, Marlon, Assistant Professor
Teaching, Learning And Culture
PHD, Texas A&M University, 2008

James, Ray, Associate Professor
Civil Engineering
PHD, University of Texas - Austin, 1976

Jamieson, Thomas, Executive Professor
Information & Operations Mgmt
PHD, Texas A&M University, 1978

Jani, Priyam, Clinical Assistant Professor
Restorative Sciences
DDS, Maharashtra University of Health Sciences-Rural Dental College, India, 2009

Jansen, Dennis, Professor
Economics
PHD, University of North Carolina at Chapel Hill, 1983

Jarvi, Jaakko, Associate Professor
Computer Science & Engineering
PHD, University of Turku, 2000

Jasperson, Jon, Clinical Associate Professor
Information & Operations Mgmt
PHD, Florida State University, 1999
Jo, Javier, Associate Professor
Biomedical Engineering
PHD, University of Southern California, 2002

Jo, Young-Ki, Associate Professor & Extension Specialist
Plant Pathology & Microbiology
PHD, Ohio State University, 2005

Jochen, John, Senior Lecturer
Petroleum Engineering
MS, Texas A&M University, 1993

Joh, Kenneth, Assistant Professor
Landscape Architecture & Urban Planning
PHD, University of California, Irvine, 2009

Johansen Aase, Emily, Associate Professor
English
PHD, McMaster University, 2008

Johnson, Andrew, Associate Professor
Industrial & Systems Eng
PHD, Georgia Institute of Technology, 2006

Johnson, Carol, Senior Lecturer
Biology
PHD, University of Florida, 1984

Johnson, Charles, Professor
Psychology
PhD, University of Kentucky, 1977

Johnson, Charles, Professor
Political Science
PHD, University of Kentucky, 1977

Johnson, Derek, Lecturer
Vet Small Animal Clinical Sc
PHD, Texas A&M University, 2014

Johnson, Gregory, Professor
Vet Integrative Biosciences
PHD, University of Wyoming, 1997

Johnson, James, Adjunct Professor
School of Law
BS, Texas Tech University, 1997

Johnson, John, Lecturer
Engineering Technology & Industrial Dist
MBA, Texas A&M University, 2001

Johnson, Larry, Professor
Vet Integrative Biosciences
PHD, Colorado State University, 1978

Johnson, Mark, Associate Professor Of The Practice
Engineering Technology & Industrial Dist
MS, Central Michigan University, 1991

Johnson, Mark, Clinical Associate Professor
Veterinary Pathobiology
BS, Texas A&M University, 1986

Johnson, Michael, Associate Professor
Engineering Technology & Industrial Dist
PHD, Massachusetts Institute of Technology, 2004

Johnson, Natalie, Assistant Professor
Environmental And Occupational Health
PHD, Texas A&M University, 2010

Johnson, Richard, Lecturer
Business Undergraduate Special Programs
MS, Texas A&M University, 2005

Johnson, Robert, Clinical Associate Professor
Information & Operations Mgmt
PHD, University of Rochester, 1989

Johnson, Shane, Professor
Finance
PHD, Louisiana State University, 1991

Johnson, Valen, Professor
Statistics
PHD, University Of Chicago, 1989

Johnson, Violet, Professor
Africana Studies
PHD, Boston College, 1992

Johnson, Violet, Professor
History
PHD, Boston College, 1992

Johnson, William, Distinguished Professor
Mathematics
PHD, Iowa State University, 1969

Johnston, J, Professor
Entomology
PHD, University of Arizona, 1972

Jolly, Ashley, Assistant Lecturer
Teaching, Learning And Culture
MED, Sam Houston State University, 2007

Jones Barbour, Jennifer, Instructional Assistant Professor
Communication
PHD, University of Illinois at Urbana-Champaign, 2006

Jones, Adam, Professor
Biology
PHD, University of Georgia, 1998

Jones, Daniel, Professor
Public Health Sciences
PHD, Baylor University, 1978

Jones, Daniel, Associate Professor
Vet Physiology & Pharmacology
PHD, University of Guelph, 1976

Jones, Edward, Executive Professor
Statistics
PHD, Virginia Tech, 1976
Jones, Eli, Professor
Marketing
PHD, Texas A&M University-College Station, 1997

Jones, Glenn, Professor
Marine Science
PHD, Columbia University, 1983

Jones, Harry, Associate Professor
Civil Engineering
PHD, University of Illinois, 1969

Jones, Meredyth, Assistant Professor
Vet Large Animal Clinical Sc
MS, Oklahoma State University, 2006

Jones, Robert, Clinical Assistant Professor
Educ Admn & Human Resource Dev
PHD, Texas A&M University, 2004

Jones, Sarah, Veterinary Resident
Vet Large Animal Clinical Sc
DVM, Royal Veterinary College, 2011

Jones-McKyer, Ellisa, Associate Professor
Hlth Promotion & Comm Hlth Sci
PHD, Indiana University, 2005

Jones-Schubart, Kara, Clinical Assistant Professor
College Of Nursing
DNP, George Washington University, 2011

Jordan, Michael, Lecturer
Liberal Studies
BS, Texas A&M University, 2012

Joseph, Merlyn, Clinical Assistant Professor
College of Pharmacy
PHD, Texas Tech University Health Science Center, 2012

Joshi, R, Professor
Teaching, Learning And Culture
PHD, University of South Carolina, 1976

Josvoll, Kristin, Lecturer
Liberal Studies
MA, Johns Hopkins University, 2015

Julien, Katie, Clinical Assistant Professor
Orthodontics
MS, Baylor College of Dentistry, 1994

Jun, Mikyoung, Associate Professor
Statistics
PHD, University of Chicago, 2005

Junkins, John, Distinguished Professor
Aerospace Engineering
PHD, University of California, Los Angeles, 1969

Juntune, Joyce, Instructional Associate Professor
Educational Psychology
PHD, Texas A&M University, 1997

Kading, Cherri, Clinical Assistant Professor
College of Dentistry
MS, University of North Carolina at Chapel Hill, 2009

Kahlig, Joseph, Instructional Assistant Professor
Mathematics
MS, Texas A&M University, 1994

Kaihatu, James, Associate Professor
Civil Engineering
PHD, University of Delaware, 1994

Kaiser, Karl, Assistant Professor
Marine Science
PHD, University of South Carolina, 2009

Kaiser, Ronald, Professor
Recreation, Park & Tourism Sc
MS, Michigan State University, 1970

Kalantar Mehrjardi, Negar, Assistant Professor
Architecture
MAR, Shahid Beheshti University, 2005
MS, Virginia Tech, 2014

Kallendorf, Craig, Professor
English
PHD, University of North Carolina at Chapel Hill, 1982

Kallendorf, Hilaire, Professor
Hispanic Studies
PHD, Princeton University, 2000

Kameoka, Jun, Associate Professor
Electrical & Computer Eng
PHD, Cornell University, 2002

Kamon, Teruki, Professor
Physics And Astronomy
PHD, University of Tsukuba, 1986

Kamphoefner, Walter, Professor
History
PHD, University of Missouri, 1978

Kan, Christina, Assistant Professor
Marketing
PHD, University of Colorado-Boulder, 2015

Kane, Matthew, Associate Professor
Marine Engineering
PHD, Georgia Institute of Technology, 2007

Kang, Cong, Associate Professor
Liberal Studies
PHD, University of Texas, 1999

Kang, David, Assistant Professor
Oral Surgery
MD, University of Texas Southwestern Medical Center, 2009
DDS, Columbia University, 2006

Kang, Ho-Yeong, Associate Professor
Construction Science
PHD, Texas A&M University, 2001
Kanipe, David, Associate Professor of the Practice
Aerospace Engineering
MS, Texas A&M University, 1971

Kanta, Lufthansa, Instructional Assistant Professor
Civil Engineering
PHD, Texas A&M University, 2009

Kao, Katy, Associate Professor
Chemical Engineering
PHD, University of California, Los Angeles, 2005

Kaplan, Craig, Associate Professor
Biochemistry & Biophysics
PHD, Harvard University, 2003

Karahan, Ibrahim, Professor
Materials Science and Engineering
PHD, University of Illinois - Urbana-Champaign, 2000

Karapin, Sena, Instructional Assistant Professor
International Studies Department
PHD, Universiteit Leiden, 2006

Karbowiak, Steve, Clinical Associate Professor
Restorative Sciences
DDS, The University of Texas Health Science Center at Houston, 1972

Karim, Muhammad, Professor
Chemical Engineering
PHD, University of Manchester, 1977

Karns, Joel, Adjunct Assistant Professor
Restorative Sciences
DDS, Texas A&M Baylor College of Dentistry, 2000

Karpac, Jason, Assistant Professor
Molecular & Cellular Medicine
PHD, The University of Oklahoma Health Sciences Center, 2007

Karpilis, Adonios, Associate Professor
Aerospace Engineering
PHD, Yale University, 1998

Karsilayan, Aydin, Associate Professor
Electrical & Computer Eng
PHD, Portland State University, 2000

Karthikeyan, Raghunathan, Associate Professor
Biological & Agricultural Eng
PHD, Kansas State University, 2001

Kash, Bita, Associate Professor
Health Policy & Management
PHD, Texas A&M Health Science Center - School of Rural Public Health, 2007

Katju, Vaishali, Associate Professor
Vet Integrative Biosciences
PHD, Indiana University, 2004

Kattari, Kimberly, Assistant Professor
Performance Studies
MMU, University of Texas at Austin, 2005

Katz, Claire, Professor
Philosophy & Humanities
PHD, University of Memphis, 1999

Katzfuss, Matthias, Assistant Professor
Statistics
PHD, The Ohio State University, 2011

Katzgraber, Helmut, Professor
Physics and Astronomy
PHD, University of California, Santa Cruz, 2001

Kaunas, Roland, Associate Professor
Biomedical Engineering
PHD, University of California, San Diego, 2003

Keating, Peter, Associate Professor
Civil Engineering
PHD, Lehigh University, 1987

Kee, Ernie, Associate Professor of the Practice
Nuclear Engineering
BS, University of Idaho, 1978

Keefe, Lisa, Instructional Assistant Professor
Vet Integrative Biosciences
MS, Purdue University, 2008

Keeney-Kennicutt, Wendy, Emerita Instructional Assistant Professor
Chemistry
PHD, Texas A&M University, 1982

Keiper, Paul, Clinical Associate Professor
Health & Kinesiology
EDD, Texas A&M University, 2002

Keith, Verna, Professor
Sociology
PHD, University of Kentucky, 1982

Kellstedt, Paul, Professor
Political Science
PHD, University of Minnesota, Twin Cities, 1996

Kelly, Howard, Instructional Associate Professor
School of Law
JD, Texas Tech University School of Law, 1981

Kelly, Larry, Clinical Professor
Teaching, Learning And Culture
PHD, The University of Texas - Austin, 2002

Kemp, Walter, Professor
Biology
PHD, The Tulane University of Louisiana, 1969

Kendall, Shari, Associate Professor
English
PHD, Georgetown University, 1999

Kenerley, Charles, Professor
Plant Pathology & Microbiology
PHD, North Carolina State Univ, 1983
Kenimer, Ann, Professor  
Biological & Agricultural Eng  
PHD, University of Illinois at Urbana-Champaign, 1990

Kennedy, Deanna, Assistant Professor  
Health & Kinesiology  
PHD, Texas A&M University, 2015

Kepler, Tara, Adjunct Professor  
School of Law  
JD, Texas Wesleyan University School of Law, 2007

Kerekes, Angela, Assistant Lecturer  
Teaching, Learning And Culture  
MED, Texas A&M University, 2011

Kerins, Carolyn, Associate Professor  
Pediatri Dentistry  
DDS, Baylor College of Dentistry, 2002

Kerne, Andrew, Associate Professor  
Computer Science & Engineering  
PHD, New York University, 2001

Kerns, David, Clinical Professor  
Periodontics  
DMD, Medical University of South Carolina, 1981

Kerr, David, Professor  
Mathematics  
PHD, University of Toronto, 2001

Kerr, Deborah, Associate Professor Of The Practice  
Public Service &Administration  
PHD, The University of Texas at Austin, 1982

Kerth, Christopher, Associate Professor  
Animal Science  
PHD, Texas Tech University, 1999

Kerwin, Sharon, Professor  
Vet Small Animal Clinical Sc  
DVM, Texas A&M University, 1988

Kessler, Harvey, Professor  
Diagnostic Sciences  
MS, George Washington University, 1979

Ketzenberg, Michael, Associate Professor  
Information & Operations Mgnt  
PHD, University of North Carolina at Chapel Hill, 2000

Keys, Vicky, Clinical Assistant Professor  
College Of Nursing  
MNU, University of Phoenix, 2005

Keyser, John, Professor  
Computer Science & Engineering  
PHD, University of North Carolina at Chapel Hill, 2000

Kezunovic, Mladen, Professor  
Electrical & Computer Eng  
PHD, University of Kansas, 1980

Khatr, Sunil, Professor  
Electrical & Computer Eng  
PHD, University of California, Berkeley, 1999

Khazaal, Natalie, Assistant Professor  
International Studies Department  
PHD, UCLA, 2007

Khosravianghadikolaei, Homa, Research Assistant Professor  
Chemical Engineering  
PHD, University of Illinois at Chicago, 2013

Kianfar, Kiavash, Associate Professor  
Industrial & Systems Eng  
PHD, North Carolina State University, 2007

Kier, Ann, Professor  
Veterinary Pathobiology  
DVM, Texas A&M University, 1974

Killough, John, Professor  
Petroleum Engineering  
PHD, Rice University, 1986

Kilmer, Kendra, Instructional Assistant Professor  
Mathematics  
MS, Texas A&M University, 2003

Kim, Dongin, Assistant Professor  
College of Pharmacy  
PHD, University of Utah, 2009

Kim, Eun, Associate Professor  
Computer Science & Engineering  
PHD, Pennysylvania State University, 2003

Kim, Haejune, Research Assistant Professor  
Mechanical Engineering  
PHD, University of Wisconsin - Milwaukee, 2014

Kim, Hoi-Eun, Associate Professor  
History  
PHD, Harvard University, 2006

Kim, Hwagyun, Assistant Professor  
Finance  
PHD, University of Chicago, 2003

Kim, Jihoon, Assistant Professor  
Petroleum Engineering  
PHD, Stanford University, 2010

Kim, Joung, Instructional Assistant Professor  
Mathematics  
PHD, State University of New York at Stony Brook, 2012

Kim, Jun, Assistant Professor  
Landscape Architecture & Urban Planning  
PHD, Texas A&M University, 2010

Kim, Mookyun, Professor  
Ocean Engineering  
PHD, Massachusetts Institute of Technology, 1988
Kim, Won-Jong, Associate Professor
Mechanical Engineering
PHD, Massachusetts Inst of Technology, 1997

Kim, Yang, Lecturer
Landscape Architecture & Urban Planning
MLA, Texas A&M University, 2010

Kim, Yong-Joe, Associate Professor
Mechanical Engineering
PHD, Purdue University, 2003

Kimber, Mark, Assistant Professor
Nuclear Engineering
PHD, Purdue University, 2008

Kincheloe, Faron, Visiting Professor
Statistics
MS, Baylor University, 2011

Kindrick, Roy, Adjunct Assistant Professor
Oral Surgery
MS, Baylor College of Dentistry, 1970

King, Andrew, Lecturer
Horticultural Sciences
MS, Texas A&M University, 2010

King, Maria, TEES Associate Research Professor
Mechanical Engineering
PHD, Akademie Der Wissenschaften Der DDR, 1986

King, Michael, Professor
Petroleum Engineering
PHD, Syracuse University, 1980

King, Silvia, Adjunct Assistant Professor
Pediatric Dentistry
DDS, Catholic University of Minas Gerais-Brazil, 1981

King-Metters, Kathryn, Executive Professor
Management
PHD, Capella University, 2007

Kingman, Douglas, Instructional Associate Professor
Biological & Agricultural Eng
PHD, Purdue University, 2002

Kinney, Michael, Associate Professor
Accounting
PHD, University of Arizona, 1990

Kinra, Vikram, Professor
Aerospace Engineering
PHD, Brown University, 1975

Kiral, Eren, Visiting Assistant Professor
Mathematics
PHD, Brown University, 2014

Kirkendall, Andrew, Professor
History
PHD, University of North Carolina at Chapel Hill, 1996

Kirkham, Ernest, Instructional Associate Professor
Health & Kinesiology
PHD, Texas A&M University, 1981

Kiser, James, Adjunct Professor
School of Law
JD, Texas Wesleyan University School of Law, 2009

Kish, Laszlo, Professor
Electrical & Computer Eng
PHD, Uppsala University, Sweden, 1994

Kitajima, Hiroko, Assistant Professor
Geology & Geophysics
PHD, Texas A&M University, 2010

Klappenecker, Andreas, Professor
Computer Science & Engineering
PHD, Universitat Karlsruhe, 1998

Klein, Andrew, Professor
Geography
PHD, Cornell University, 1997

Klein, Douglas, Regents Professor
Marine Science
PHD, University of Texas, 1969

Klein, Gregory, Instructional Assistant Professor
Mathematics
MS, Texas A&M University, 1992

Klein, Nancy, Associate Professor
Architecture
PHD, Bryn Mawr College, 1991

Klein, Patricia, Associate Professor
Horticultural Sciences
PHD, Texas A&M University, 1989

Klemm, William, Senior Professor
Vet Integrative Biosciences
DVM, Auburn University, 1958

Klinefelter, Danny, Professor & Extension Specialist
Agricultural Economics
PHD, University of Illinois at Urbana-Champaign, 1979

Klose, Steven, Professor & Extension Specialist
Agricultural Economics
PHD, Texas A&M University, 2001

Klutke, Georgia, Professor
Industrial & Systems Eng
PHD, Virginia Tech, 1986

Kluver, Alan, Associate Professor
Communication
PHD, University of Southern California, 1993

Knap, Anthony, Professor
Oceanography
PHD, University of South Hampton, 1978
Knappett, Peter, Assistant Professor
Geology & Geophysics
PHD, University of Tennessee at Knoxville, 2010

Kneese, Dana, Lecturer
Vet Integrative Biosciences
PHD, Texas A&M University, 2009

Kniffin, Daniel, Instructional Associate Professor
Health & Kinesiology
MED, The University of Texas - Austin, 1987

Knight, Robert, Associate Professor
Ecosystem Science & Mgmt
PHD, Texas A&M University, 1980

Knock, Susan, Instructional Associate Professor
Marine Science
PHD, University of Texas Medical Branch at Galveston, 1989

Knoop, Jacqueline, Lecturer
Accounting
MS, Texas A&M University, 1997

Knox, Benjamin, Assistant Professor Of The Practice
Visualization
BED, Texas A&M University, 1993

Knox, Kris, Instructional Associate Professor
Maritime Administration
PHD, University of Texas HSC at Houston, 1992

Knutson, Allen, Professor & Extension Specialist
Entomology
PHD, Texas A&M University, 1987

Ko, Che-Ming, Professor
Physics And Astronomy
PHD, State University of New York at Stony Brook, 1973

Ko, Gladys, Associate Professor
Vet Integrative Biosciences
PHD, Kent State University, 1996

Kobayashi, Koichi, Professor
Microbial Pathogenesis & Immuno
PHD, Chiba University School of Medicine, 1998

Koch, Michael, Associate Professor
Political Science
PHD, University of California, Davis, 2002

Kocharovskykaya, Olga, Distinguished Professor
Physics And Astronomy
PHD, Institute of Applied Physics, Russian Academy of Sciences, 1986

Kocharovsky, Vitaly, Professor
Physics And Astronomy
PHD, Institute of Applied Physics, Russian Academy of Sciences, 1998

Kodatt, Stephanie, Assistant Professor
School Of Public Health
PHD, Our Lady of the Lake University, 2007

Koebenick, Douglas, Assistant Lecturer
Teaching, Learning And Culture
MS, University of Texas Pan American, 1975

Kofford, Kelly, Clinical Associate Professor
Diagnostic Sciences
DDS, DDS, Creighton Univ 1978, 1978

Kogut, Mark, Adjunct Assistant Professor
Pediatric Dentistry
MS, Baylor College of Dentistry, 1979

Koiwa, Hisashi, Professor
Horticultural Sciences
PHD, Kyoto University, 1996

Kolari, James, Professor
Finance
PHD, Arizona State University, 1980

Kolasinski, Adam, Associate Professor
Finance
PHD, MIT, 2006

Kolodziej, Elizabeth, Instructional Assistant Professor
Statistics
PHD, Texas A&M University, 2010

Kolomiets, Mikhailo, Professor
Plant Pathology & Microbiology
PHD, Iowa State University, 1998

Konrad, Christoph, Associate Professor
International Studies Department
PHD, University of North Carolina at Chapel Hill, 1985

Kontogiorgos, Dimitrios, Clinical Associate Professor
Restorative Sciences
PHD, Texas A&M University System Health Sciences Center, 2010

Kordek, Kevin, Visiting Assistant Professor
Mathematics
PHD, Duke University, 2015

Kornegay, Joe, Professor
Vet Integrative Biosciences
PHD, University of Georgia, 1982

Korosec, Jason, Adjunct Professor
School of Law
JD, Case Western Reserve University School of Law, 1997

Korty, Robert, Associate Professor
Atmospheric Sciences
PHD, Massachusetts Institute of Technology, 2005

Kosarek, Jane, Clinical Assistant Professor
College Of Nursing
MNU, Texas Woman's University, 1985

Kothmann, Merwyn, Professor
Ecosystem Science & Mgmt
PHD, Texas A&M University, 1968

Diagnostic Sciences
MS, University of North Carolina at Chapel Hill, 2014

Liang, Hwa, Senior Lecturer
Statistics
PHD, University of New Mexico, 2003

Liang, Jenn, Professor
Petroleum Engineering
PHD, University of Texas at Austin, 1988

Lidbury, Jonathan, Assistant Professor
Vet Small Animal Clinical Sc
DVM, University of Glasgow, 2002

Liescheski, Joshua, Clinical Assistant Professor
Public Health Sciences
DDS, The University of Texas Health Science Center at San Antonio, 2010

Liewen, Peter, Professor
Performance Studies
PHD, University of California at Santa Barbara, 1984

Liew, Jeffrey, Professor
Educational Psychology
PHD, Arizona State University, 2005

Light, Gregory, Instructor
Naval Science
AS, Coastline Community College of California, 2007

Light, Jessica, Associate Professor
Wildlife & Fisheries Sciences
PHD, Louisiana State University, 2005

Lightfoot, John, Professor
Health & Kinesiology
PHD, University of Tennessee, 1986

Likavec, Tasha, Veterinary Resident
Vet Large Animal Clinical Sc
DVM, Michigan State University, 2014

Lillard, Michael, Clinical Assistant Professor
General Dentistry
DDS, Baylor College of Dentistry, 1979

Lillibridge, Robin, Professor
Epidemiology & Biostatistics
MD, Uniformed Services of the Health Sciences, 1981

Lim, Phaik, Senior Lecturer
Political Science
PHD, University of Houston, 2003

Lim, Soon, Lecturer
Chemistry
PHD, Texas A&M University, 2006

Limafilho, Paulo, Professor
Mathematics
PHD, State University of New York at Stony Brook, 1989

Lin, Ko-Yu, Clinical Assistant Professor
Pediatric Dentistry
MS, Texas A&M University Baylor College of Dentistry, 1991

Lin, Paotai, Assistant Professor
Electrical & Computer Eng
PHD, Northwestern University, 2009

Lin, Szu-Hsuan, Instructional Assistant Professor
School Of Public Health
PHD, Texas A&M Health Science Center, School of Public Health, 2015

Lin, Xiaorong, Associate Professor
Biology
PHD, University of Georgia, 2003

Lincoln, Yvonna, Distinguished Professor
Educ Admn & Human Resource Dev
MA, University of Illinois, 1970

Lindahl, Paul, Professor
Chemistry
PHD, Massachusetts Institute of Technology, 1985

Lindell, Michael, Professor Emeritus
Landscape Architecture & Urban Planning
PHD, University of Colorado, 1975

Linderholm, Anna, Assistant Professor
Anthropology
PHD, Stockholm University - Sweden, 2008

Lindner, James, Professor
Ag Leadership, Educ & Comm
PHD, Ohio State University, 2000

Lindo, Jason, Associate Professor
Economics
PHD, University of California - Davis, 2009

Lineberger, R, Professor
Horticultural Sciences
PHD, Cornell University, 1978

Linn, Brian, Professor
History
PHD, Ohio State University, 1985

Linnesman, Judith, Instructional Associate Professor
Sociology
PHD, Iowa State University, 1985
Linton, Thomas, Instructional Assistant Professor
Marine Science
PHD, University of Michigan at Ann Arbor, 1965

Lintz, Leah, Instructional Assistant Professor
Health & Kinesiology
MS, Texas A&M University, 2003

Lipsmeyer, Christine, Associate Professor
Political Science
PHD, Vanderbilt University, 1999

Little, Charles, Lecturer
George Bush School of Govern
PHD, University of North Texas, 1985

Little, Dallas, Professor
Civil Engineering
PHD, Texas A&M University, 1979

Litzenberg, Kerry, Regents Professor
Agricultural Economics
PHD, Purdue University, 1979

Liu, Hui, Assistant Professor
Marine Biology
PHD, University of Alaska Fairbanks, 2006

Liu, Jyh, Professor
Computer Science & Engineering
PHD, University of Michigan - Ann Arbor, 1989

Liu, Leyuan, Assistant Professor
Institute of Biosciences & Tec
PHD, Texas A&M University, 1997

Liu, Li, Research Assistant Professor
Materials Science And Engineering
PHD, NORTHWESTERN UNIVERSITY, 2005

Liu, Mingyao, Professor
Institute of Biosciences & Tec
PHD, University of Maryland, 1992

Liu, Tie, Associate Professor
Electrical & Computer Eng
PHD, University of Illinois, 2006

Liu, Wenshe, Associate Professor
Chemistry
PHD, University of California, Davis, 2005

Liu, Xiaohua, Assistant Professor
Biomedical Sciences
PHD, Tsinghua University, China, 2002

Liu, Yan, Assistant Professor
Finance
PHD, Duke University, 2014

Liu, Yan, Assistant Professor
Marketing
MS, Purdue University, 2010

Livesay, Harold, Professor
History
PHD, Johns Hopkins University, 1970

Livingston, Jerry, Assistant Professor
Clinical Translational Med
PHD, Capella University, 2013

Lockard, Brittanie, Adjunct Assistant Professor
Health & Kinesiology
MS, East Carolina University, 2004

Lockett, Landry, Senior Lecturer
Ag Leadership, Educ & Comm
EDD, Texas A&M University, 2007

Locklear, Alyssa, Instructional Associate Professor
Health & Kinesiology
MA, Texas A&M University System Health Sciences Center, 2003

Lockless, Steve, Assistant Professor
Biology
PHD, University of Texas at Dallas, 2002

Loden, Lori, Associate Professor
Public Service & Administration
PHD, University of Rochester, 1990

Logan, Linda, Professor
Veterinary Pathobiology
PHD, University of California-Davis, 1987

Logan, Timothy, Instructional Assistant Professor
Atmospheric Sciences
PHD, University of North Dakota, 2014

Loguinov, Dmitri, Professor
Computer Science & Engineering
PHD, City University of New York, 2002

Loh, Koushen, Senior Professor
Ecosystem Science & Mgmt
PHD, Texas A&M University, 1984

Loisel, Julie, Visiting Assistant Professor
Geography
PHD, Lehigh University, 2012

Lombard, Frederick, Visiting Professor
Statistics
PHD, University of Johannesburg, 1975

Lombardini, Leonardo, Professor
Horticultural Sciences
MS, Università degli Studi di Firenze, Italy, 1993

Long, Charles, Associate Professor
Veterinary Physiology & Pharmacology
PHD, University of Massachusetts - Amherst, 1996

Long, Jack, Associate Professor
Restorative Sciences
DDS, Baylor College of Dentistry, 1976
Long, James, Assistant Professor
Statistics
PHD, University of California - Berkeley, 2013

Longenecker, Michael, Professor
Statistics
PHD, Florida State University, 1976

Loopstra, Carol, Associate Professor
Ecosystem Science & Mgmt
PHD, North Carolina State University, 1992

Lopez Perez, Franklin, Lecturer
Veterinary Pathobiology
DVM, Universidad Nacional Pedro Henriquez Urena, 2004

Lopez, Roel, Professor
Wildlife & Fisheries Sciences
PHD, Texas A&M University, 2001

Lord, Dominique, Professor
Civil Engineering
PHD, University of Toronto, 2000

Lorenz, Saundra, Lecturer
Nutrition & Food Science
MS, Texas A&M University, 2002

Lorenzo, Roger, Lecturer
Engineering Technology & Industrial Dist
MS, University of Kansas, 1972

Loria Lepiz, Mauricio, Clinical Assistant Professor
Vet Small Animal Clinical Sc
DVM, Universidad Nacional de Costa Rica, 2000

Loring, Andrew, Lecturer
Marketing
MS, University of Maine, 2012

Louchouarn, Patrick, Professor
Marine Science
PHD, Universite du Quebec a Montreal, 1997

Loudder, Martha, Professor
Accounting
PHD, Arizona State University, 1990

Love, Charles, Associate Professor
Vet Large Animal Clinical Sc
PHD, University of Missouri-Columbia, 1993

Loving, Cathleen, Associate Professor
Teaching, Learning And Culture
PHD, University of Texas, 1990

Loving, Jerome, Distinguished Professor
English
PHD, Duke University, 1973

Lowery, Lee, Professor
Civil Engineering
PHD, Texas A&M University, 1967

Lu, Dai, Assistant Professor
College of Pharmacy
PHD, University of Connecticut, 2005

Lu, Mi, Professor
Electrical & Computer Eng
PHD, Rice University, 1987

Lu, Yongbo, Assistant Professor
Biomedical Sciences
PHD, University of Missouri-Kansas City, 2007

Lu, Zhipeng, Senior Lecturer
Architecture
PHD, Texas A&M University, 2009

Lucas, Gary, Professor
School of Law
LLM, University of Florida Levin College of Law, 2006

Lucchese, Robert, Professor
Chemistry
PHD, California Institute of Technology, 1982

Luce, Andrea, Assistant Professor
College of Pharmacy

Ludovico Echeverria, Fernando, Assistant Professor
Economics
PHD, Northwestern University, 2014

Luiselli, Alessandra, Professor
Hispanic Studies
PHD, University of New Mexico, 1990

Lum, Jason, Lecturer
George Bush School of Govern
MA, Harvard University, 1997

Luna, Amy, Lecturer
Marine Transportation
CERT, US Coast Guard, 2007

Lunney, Joseph, Professor
School of Law
JD, Stanford Law School, 1990

Luo, Wen, Associate Professor
Educational Psychology
PHD, Texas A&M University, 2007

Lupiani, Blanca, Professor
Veterinary Pathobiology
PHD, University of Maryland, College Park, 1994

Lutkenhaus, Jodie, Associate Professor
Chemical Engineering
PHD, University of Notre Dame, 2003

Lutz, Joann, Professor
Liberal Studies
PHD, University of North Texas, 1993
Lutz, Wayne, Associate Professor Of The Practice
Aerospace Engineering
MS, University of Southern California, 1984

Luxemburg, Leon, Associate Professor
Liberal Studies
PHD, Texas A&M University, 1987

Lynch, Benjamin, Lecturer
Mathematics
PHD, University of Tennessee, 2010

Lynch, Darrell, Lecturer
Anthropology
PHD, University of Tennessee, 2014

Lynch, Patricia, Clinical Professor
Educational Psychology
PHD, Texas A&M University, 1992

Lyons, Kendra, Veterinary Resident
Vet Small Animal Clinical Sc
DVM, Washington State University, 2012

Lyons, Robert, Professor & Extension Specialist
Ecosystem Science & Mgmt
PHD, Texas A&M University, 1990

Lytton, Robert, Professor
Civil Engineering
PHD, University of Texas - Austin, 1967

Lyuksyutov, Igor, Professor
Physics And Astronomy

Ma, Xingmao, Associate Professor
Civil Engineering
PHD, Missouri University of Science and Technology, 2004

MacFarlane, Ronald, Distinguished Professor
Chemistry
PHD, Carnegie Institute of Technology, 1959

MacNamee, Richard, Senior Lecturer
International Affairs
MA, Royal Military Academy Sandhurst, 1998

Maceo, Debra, Instructional Professor
Liberal Studies
MS, University of Houston, 1995

Machann, Clinton, Professor
English
PHD, University of Texas, 1976

Machen, Richard, Professor & Extension Specialist
Animal Science
PHD, Texas A&M University, 1987

Mackenzie, Duncan, Associate Professor
Biology
PHD, University of California, Berkeley, 1980

Mackin, Robert, Instructional Associate Professor
Sociology
PHD, University of Wisconsin - madison, 1998

Macri, Lucas, Associate Professor
Physics And Astronomy
PHD, Harvard University, 2001

Macwillie, Donald, Lecturer
International Affairs
MS, Central Michigan University, 1994

Madden, Linda, Assistant Lecturer
Teaching, Learning And Culture
MED, Sam Houston State University, 1997

Madigan, Michael, Professor
Biomedical Engineering
PHD, Virgina Commonwealth University, 2014

Madrigal, Rodolfo, Veterinary Resident
Vet Large Animal Clinical Sc
DVM, Texas A&M University, 2013

Madsen, Christi, Professor
Electrical & Computer Eng
PHD, Rutgers State University of New Jersey, 1996

Madsen, Jean, Professor
Educ Admn & Human Resource Dev
PHD, Teachers College, Columbia, New York City, 1987

Maffei, Gerald, Visiting Professor
Architecture
MAR, University of California at Berkley, 1969

Maggard, Bryan, Senior Lecturer
Petroleum Engineering
PHD, Texas A&M University, 2000

Magill, Clint, Professor
Plant Pathology & Microbiology
PHD, Cornell University, 1969

Mahajan, Arvind, Professor
Finance
PHD, Georgia State University, 1980

Mahajan, Vanita, Senior Lecturer
Management
MBA, Texas A&M University, 1986

Mahapatra, Rabinarayan, Professor
Computer Science & Engineering
PHD, Indian Institute of Technology, Kharagpur, 1992

Mahapatra, Rupak, Associate Professor
Physics And Astronomy
PHD, University of Minnesota, 2000

Maitland, Duncan, Professor
Biomedical Engineering
PHD, Northwestern University, 1995

EDD, Texas A&M University, 2006

Menet, Jerome, Assistant Professor
Biology
PHD, LOUIS PASTEUR UNIVERSITY, 2003

Menzel, Christopher, Professor
Philosophy & Humanities
PHD, University of Notre Dame, 1984

Menzies, Max, Lecturer
Agricultural Economics
MS, Texas A&M University, 2004

Merchant, Michael, Professor & Extension Specialist
Entomology
PHD, Texas A&M University, 1989

Mercieca, Jennifer, Associate Professor
Communication
MA, University of the Pacific, 1997

Mercier, Richard, Professor
Civil Engineering
PHD, Massachusetts Inst of Technology, 1985

Merlin, Christine, Assistant Professor
Biology
PHD, University Pierre and Marie Curie, 2006

Merrell, William, Professor
Marine Science
PHD, Texas A&M University, 1971

Merrill, Jeremy, Assistant Professor
Landscape Architecture & Urban Planning
PHD, Kansas State University, 2014

Mestrovic, Stjepan, Professor
Sociology
PHD, Syracuse University, 1982

Metters, Richard, Professor
Information & Operations Mgmt
PHD, University of North Carolina - Chapel Hill, 1993

Metz, Tasha, Lecturer
Marine Biology
PHD, Texas A&M University, 2004

Michalski, Krzysztof, Associate Professor
Electrical & Computer Eng
PHD, University of Kentucky, 1981

Mickelson, Kimberley, Visiting Associate Professor
Landscape Architecture & Urban Planning
BA, The University of Texas - Austin, 1981

Middlebrooks, Mary, Assistant Lecturer
Teaching, Learning and Culture
PHD, Sam Houston State University, 1973
Mies, William, Visiting Professor
Animal Science
PHD, University of Missouri, 1971

Miglietta, Maria, Assistant Professor
Marine Biology
PHD, Duke University, 2005

Miles, Bryant, Senior Lecturer
Biochemistry & Biophysics
PHD, Texas A&M University, 1998

Mileski, Joan, Professor
George Bush School of Govern
PHD, University of Texas at Dallas, 2000

Mileski, Joan, Professor
Maritime Administration
PHD, University of Texas at Dallas, 2000

Miller, Amp, Professor
Restorative Sciences
MS, Baylor University College of Dentistry, 1980

Miller, Barbara, Associate Professor
College of Dentistry
DDS, Baylor College of Dentistry, 1983

Miller, Brent, Associate Professor
Geology & Geophysics
PHD, Dalhousie University, 1997

Miller, Glen, Lecturer
Philosophy & Humanities
MA, University of North Texas, 2014

Miller, Gretchen, Assistant Professor
Civil Engineering
PHD, University of California, Berkeley, 2009

Miller, Heather, Assistant Professor
College of Pharmacy

Miller, Jeremy, Lecturer
Communication
PHD, Texas A&M University, 2012

Miller, Julian, Visiting Professor
Horticultural Sciences
MS, Louisiana State University, 1967

Miller, Justin, Instructional Assistant Professor
Performance Studies
MFA, Michigan State University, 2009

Miller, Kate, Professor
Geology & Geophysics
PHD, Stanford University, 1991

Miller, Kristina, Instructional Assistant Professor
Performance Studies
PHD, Michigan State University, 2010

Miller, Paula, Clinical Professor
Health & Kinesiology
PHD, Texas A&M University, 1993

Miller, Rhonda, Professor
Animal Science
PHD, Colorado State University, 1983

Miller, Scott, Professor
Electrical & Computer Eng
PHD, University of California, San Diego, 1988

Miller, Stephen, Professor
Hispanic Studies
PHD, The University of Chicago, 1976

Milstein, Sloane, Clinical Assistant Professor
Health & Kinesiology
EDD, Southern Connecticut State University, 2013

Minard, Holly, Assistant Lecturer
Veterinary Pathobiology
DVM, University of Missouri, 2013

Miner, Kathi, Associate Professor
Psychology
PHD, University of Michigan, 2004

Miner, Kathi, Assistant Professor
Womens Studies
PHD, University of Michigan, 2004

Mioduszewski, Saskia, Associate Professor
Physics And Astronomy
PHD, University of Tennessee, 1999

Mirabolfathi, Nader, Research Associate Professor
Physics And Astronomy
PHD, University of Paris XI, 2002

Miranda, Malathi, Clinical Assistant Professor
Public Health Sciences
MS, Boston University, 2002

Miranda, Rajesh, Professor
Neuroscience & Experimental Therapeutics
PHD, University of Rochester, 1989

Miranda, Valerian, Associate Professor
Architecture
MAR, Texas A&M University, 1984

Misemer, Sarah, Associate Professor
Hispanic Studies
PHD, University of Kansas, 2001

Mishra, Aashwin, Lecturer
Aerospace Engineering
PHD, Texas A&M University, 2014
Mishra, Jayshree, Research Assistant Professor
College of Pharmacy
PHD, Indian Institute of Technology, Kharagpur, 2005

Mitchell, Brett, Associate Professor
Medical Physiology
PHD, Medical College of Georgia, 2003

Mitchell, J, Professor Emeritas
English
PHD, The University of Iowa, 1971

Mitchell, Timothy, Professor
Hispanic Studies
PHD, State University of New York - Buffalo, 1986

Mize, Britt, Associate Professor
English
PHD, The University of North Carolina at Chapel Hill, 2003

Mjelde, James, Professor
Agricultural Economics
PHD, University of Illinois at Urbana - Champaign, 1985

Moats, Jason, Lecturer
George Bush School of Govern
PHD, Texas A&M University, 2013

Moble, Benedict, Assistant Professor
Aerospace Engineering
PHD, University of Maryland, 2010

Moczygemba, Margarita, Assistant Professor
Institute of Biosciences & Tec
PHD, State University of New York at Stony Brook, 1997

Modaresi, Neda, Clinical Assistant Professor
Pediatric Dentistry
DDS, Quazvin University of Medical Sciences, 2005

Mogilevsky, Mila, Instructional Assistant Professor
Mathematics
PHD, Rostov State University USSR, 1976

Mohanty, Binayak, Professor
Biological & Agricultural Eng
PHD, Iowa State University, 1992

Mohler, Robert, Senior Lecturer
Marine Science
PHD, Texas A&M University, 1994

Mohseni, Mahdi, Assistant Professor
Finance
PHD, Boston College, 2015

Mohtar, Rabi, Professor
Biological & Agricultural Eng
PHD, Michigan State University, 1994

Molhusen, Brian, Executive Professor
Marketing
BBA, Texas A&M University, 1978

Montalvo-Liendo, Nora, Assistant Professor
College Of Nursing
PHD, The University of Texas Health Science Center at Houston, 2009

Mooney, Karl, Clinical Assistant Professor
Teaching, Learning And Culture
EDD, Lehigh University, 1982

Moore, Andrew, Lecturer
Marine Engineering
CERT, US Coast Guard, 2014

Moore, Georgianne, Associate Professor
Ecosystem Science & Mgmt
PHD, Oregon State University, 2004

Moore, John, Instructional Assistant Professor
Computer Science & Engineering
PHD, Texas A&M University, 2007

Moore, Kevin, Executive Professor
Finance
MBA, The Wharton School, 1994
MS, Johns Hopkins University, 2013
MS, London School of Economics, 2000

Moore, Lori, Associate Professor
Ag Leadership, Educ & Comm
PHD, University of Florida, 2003

Moore, Loulou, Clinical Associate Professor
Restorative Sciences
MPH, Texas A&M University Baylor College of Dentistry, 1997

Moore, Morgan, Lecturer
Accounting
BBA, Texas Christian University, 2007

Moore, Wendy, Associate Professor
Sociology
PHD, University of Minnesota, 2005

Mora-Zacarias, Miguel, Professor
Wildlife & Fisheries Sciences
PHD, University of California, Davis, 1990

Moreira, Rosana, Professor
Biological & Agricultural Eng
PHD, Michigan State University, 1989

Moreiras, Alberto, Professor
Hispanic Studies
PHD, University of Georgia, 1987

Morel, Jim, Professor
Nuclear Engineering
PHD, The University of New Mexico, 1979

Moreland, Jack, Clinical Assistant Professor
College Of Nursing
PHD, Capella University, 2011

Moreno Centeno, Erick, Assistant Professor
Industrial & Systems Eng
PHD, University of California, Berkeley, 2010
Mulenga, Albert, Associate Professor
Veterinary Pathobiology
PHD, Hokkaido University, 1999

Muliana, Hanifah, Professor
Mechanical Engineering
PHD, Georgia Institute of Technology, 2004

Mullen, Christine, Senior Lecturer
Chemistry
PHD, University of California, San Diego, 2000

Muller, Robert, Clinical Associate Professor
Educ Admn & Human Resource Dev
PHD, University of Texas, 1989

Mullet, John, Professor
Biochemistry & Biophysics
PHD, University of Illinois - Urbana-Champaign, 1981

Mullins, Leisha, Senior Lecturer
Biochemistry & Biophysics
PHD, Texas A&M University, 1999

Munster, Clyde, Professor
Biological & Agricultural Eng
PHD, North Carolina State University, 1992

Murray, Christine, Clinical Assistant Professor
Restorative Sciences
DDS, Texas A&M University Baylor College of Dentistry, 2012

Musser, Jeffrey, Clinical Professor
Vet Integrative Biosciences
DVM, VA-MD Regional College of Veterinary Medicine, 1989

Myers, Alexandra, Veterinary Resident
Veterinary Pathobiology
DVM, Texas A&M University, 2015
Mykonias, Nikolaos, Instructional Assistant Professor
Maritime Administration
PHD, The Pennsylvania State University, 2013

Myser, Scott, Adjunct Assistant Professor
Orthodontics
MS, Texas A&M University Baylor College of Dentistry, 2010

Nabity, Mary, Assistant Professor
Veterinary Pathobiology
PHD, Texas A&M University, 2010

Nafstad, April, Lecturer
Accounting
MS, Texas A&M University, 1997

Nafukho, Fredrick, Professor
Educ Admn & Human Resource Dev
PHD, Louisiana State University and A&M College, 1998

Nagaya, Naomi, Research Assistant Professor
Psychology
PHD, University of Southern California, 1993

Nagy, William, Professor
Restorative Sciences
DDS, Ohio State University, 1970

Naidu, Aparna, Clinical Assistant Professor
Diagnostic Sciences
MS, Texas A&M University System Health Sciences Center, 2006

Nair, Dimple, Lecturer
English
MA, University of Mysore (India), 1997

Nair, Radhika, Instructional Assistant Professor
Marine Science
PHD, University of Nevada, 2009

Nan, Beiyan, Assistant Professor
Biology
PHD, Peking University, 2007

Nanopoulos, Dimitri, Distinguished Professor
Physics And Astronomy
PHD, University of Sussex, Falmer, Brighton, England, 1973

Napper, Larry, Senior Lecturer
International Affairs
MS, University of Virginia, 1974

Naraghi, Mohammad, Assistant Professor
Aerospace Engineering
PHD, University of Illinois at Urbana Champaign, 2009

Narayanan, Krishna, Professor
Electrical & Computer Eng
PHD, Georgia Institute of Technology, 1998

Narcowich, Francis, Professor
Mathematics
PHD, Princeton University, 1972

Nascentes Alves, Ibere, Professor Of The Practice
Petroleum Engineering
PHD, University of Tulsa, 1991

Nasr-El-Din, Hisham, Professor
Petroleum Engineering
PHD, University of Saskatchewan, 1984

Nasrabadi, Hadi, Assistant Professor
Petroleum Engineering
PHD, Imperial College, London, UK, 2006

Natarajarathinam, Malini, Associate Professor
Engineering Technology & Industrial Dist
PHD, University of Alabama, 2007

Natowitz, Joseph, Senior Professor
Chemistry
PHD, University of Pittsburgh, 1965

Natsios, Andrew, Executive Professor
International Affairs
PHD, Harvard University, 1979

Naugle, Donald, Professor
Physics And Astronomy
PHD, Texas A&M University, 1965

Navas De Solis, Cristobal, Clinical Assistant Professor
Vet Large Animal Clinical Sc
PHD, Universidad Autonoma de Barcelona, 2013

Ndubisi, Forster, Professor
Landscape Architecture & Urban Planning
PHD, University of Waterloo, 1987

Neal, Colleen, Clinical Assistant Professor
College Of Nursing
MNU, The University of Oklahoma Health Science Center, 2011

Nederman, Cary, Professor
Political Science
PHD, York University, 1983

Needleman, Alan, Professor
Materials Science And Engineering
PHD, Harvard University, 1971

Neely, Clark, Assistant Professor & Extension Specialist
Soil & Crop Sciences
PHD, Texas A&M University, 2013

Neely, Haly, Assistant Professor
Soil & Crop Sciences
PHD, Texas A&M University, 2014

Nekrashevych, Volodymyr, Professor
Mathematics
PHD, Taras Shevchenko National University, Russia, 1998

Nelick, Timothy, Assistant Professor Of The Practice
Marine Transportation
CERT, US Coast Guard, 1980
Nelson, A, Senior Professor
Agricultural Economics
PHD, Purdue University, 1969

Nelson, Chad, Instructional Assistant Professor
Health & Kinesiology
MS, Texas A&M University, 2015

Nelson, Claudia, Professor
English
PHD, Indiana University, 1989

Nelson, David, Clinical Associate Professor
Vet Small Animal Clinical Sc
DVM, Texas A&M University, 1978

Nelson, Garrett, Adjunct Assistant Professor
Oral Surgery
DDS, University Of California-Los Angeles, 1999

Nelson, Paul, Tees Research Engineer
Nuclear Engineering
PHD, University of New Mexico, 1969

Nepal, Bimal, Associate Professor
Engineering Technology & Industrial Dist
PHD, Wayne State University, 2005

Neshyba, Monica, Clinical Assistant Professor
Teaching, Learning And Culture
PHD, University of Texas - Austin, 2012

Netherland, Beth, Instructional Associate Professor
Health & Kinesiology
MS, Miami University, 2000

Nevels, Robert, Professor
Electrical & Computer Eng
PHD, University of Mississippi, 1979

Newell Rogers, Martha, Professor
Surgery
PHD, University of Colorado, 1987

Newell-Fugate, Anne, Assistant Professor
Vet Physiology & Pharmacology
PHD, University of Illinois-Urbana Champaign, 2012

Newman, Galen, Assistant Professor
Landscape Architecture & Urban Planning
MLA, Auburn University, 2006
MA, Auburn University, 2006

Newman, Joseph, Adjunct Associate Professor
Biomedical Sciences
PHD, University of Texas Medical School at San Antonio, 1973

Newman, Julie, Associate Professor
Geology & Geophysics
PHD, University of Rochester, 1993

Newman, Neal, Professor
School of Law
JD, Howard University, 1998

Newton, Howard, Senior Professor
Statistics
PHD, State University of New York, 1975

Ng, Desmond, Associate Professor
Agricultural Economics
PHD, University of Illinois at Urbana-Champaign, 2001

Nghiem, Peter, Assistant Professor
Vet Integrative Biosciences
PHD, George Washington University, 2014

Nichols, Anne, Associate Professor Of The Practice
Architecture
PHD, University of Illinois, 2000

Nichols, John, Associate Professor
Construction Science
PHD, University of Newcastle, Australia, 2002

Nickell, Larry, Clinical Assistant Professor
Restorative Sciences
DDS, Baylor College of Dentistry, 1985

Nicksic, Hildi, Clinical Assistant Professor
Health & Kinesiology
PHD, The University of Texas, 2015

Niedzwecki, John, Professor
Civil Engineering
PHD, The Catholic University of America, 1977

Nielsen, Rebecca, Visiting Lecturer
International Affairs
MA, Yale University, 2010
MA, Yale University, 2012

Nielsen-Gammon, John, Professor
Atmospheric Sciences
PHD, Massachusetts Institute of Technology, 1990

Nikolov, Zivko, Professor
Biological & Agricultural Eng
PHD, Iowa State University, 1986

Nippe, Michael, Assistant Professor
Chemistry
PHD, University of Wisconsin-Madison, 2011

Nixon, Clair, Professor
Accounting
PHD, Texas A&M University, 1980

Noack, Laurissa, Lecturer
Liberal Studies
BS, Texas A&M University Galveston, 2008

Nober, Roger, Adjunct Professor
School of Law
JD, Harvard Law School, 1989

Noh, Youngre, Visiting Assistant Professor
Landscape Architecture & Urban Planning
PHD, Texas A&M University, 2015
Norman, Keri, Research Assistant Professor
Veterinary Pathobiology
PHD, Texas A&M University, 2010

Normandin, Kathleen, Lecturer
Liberal Studies
MS, Oregon State University, 2010

Norris, William, Assistant Professor
International Affairs
PHD, Massachusetts Institute of Technology, 2010

North, Jerry, Distinguished Professor
Atmospheric Sciences
PHD, University of Wisconsin, 1966

North, Simon, Professor
Chemistry
PHD, University of California, Berkeley, 1995

Norton, John, Senior Lecturer
Information & Operations Mgmt
BBA, Baylor University, 1981

Noshadravan, Arash, Research Assistant Professor
Civil Engineering
PHD, University of Southern California, Los Angeles, 2011

Nourel-Din, Amal, Clinical Assistant Professor
Public Health Sciences
DDS, Cairo University, 1993

Nowotarski, Christopher, Assistant Professor
Atmospheric Sciences
PHD, Pennsylvania State University, 2013

Nyanaert, Samuel, Assistant Professor
Petroleum Engineering
PHD, Texas A&M University, 2013

Ntiamo, Lewis, Associate Professor
Industrial & Systems Eng
PHD, University of Arizona, 2004

Nutan, Mohammad, Associate Professor
College of Pharmacy
PHD, Texas Tech University, 2004

Nyakiti, Luke, Assistant Professor
Marine Engineering
PHD, Texas Tech University, 2008

Nyman, Elizabeth, Assistant Professor
Liberal Studies
PHD, Florida State University, 2010

O'Brien, Maureen, Assistant Lecturer
Veterinary Pathobiology
BS, Ohio State University, 2006

O'Farrell, Mary, Associate Professor
English
PHD, University of California, Berkeley, 1991

O'Reilly, Kathleen, Associate Professor
Geography
PHD, University of Iowa, 2002

Obeidat, Suleiman, Instructional Assistant Professor
Engineering Technology & Industrial Dist
PHD, University of Oklahoma, 2008

Ober, Raimund, Professor
Biomedical Engineering
PHD, Cambridge University, 1987

Oberhelman, Steven, Professor
European and Classical Languages
PHD, University of Minnesota, 1981

Obrien, Michael, Professor
Architecture
MAR, Virginia Tech, 1982

Ochoa, Ozden, Tees Research Professor
Mechanical Engineering
PHD, Texas A&M University, 1980

Oertling, Thomas, Instructional Assistant Professor
Liberal Studies
MA, Texas A&M University, 1984

Ofili, Theresa, Instructional Assistant Professor
College of Pharmacy

Ogletree, Quinita, Lecturer
Teaching, Learning And Culture
PHD, Texas A&M University, 2012

Ohsfeldt, Robert, Professor
Health Policy & Management
PHD, University of Houston, 1983

Oliva, Rogelio, Associate Professor
Information & Operations Mgmt
PHD, MIT, 1996

Oliver, Lawrence, Professor
English
PHD, The Pennsylvania State University, 1981

Olivera, Francisco, Associate Professor
Civil Engineering
PHD, University of Texas, 1996

Olson, James, Senior Lecturer
International Affairs
JD, The University of Iowa, 1969

Ompendoguelet, Lizette, Associate Professor
Educational Psychology
PHD, University of Missouri - Columbia, 2009

Omran, Mohamed, Clinical Assistant Professor
Veterinary Pathobiology
PHD, Texas A&M University, 1995
Faculty

Oneal, Clifford, Lecturer
Marine Biology
PHD, Southern Illinois University, 2005

Oneal, Devin, Visiting Assistant Professor
International Studies Department
PHD, Rutgers University, 2015

Oneill, Christopher, Visiting Assistant Professor
Mathematics
PHD, Duke University, 2014

Onica, Constantin, Instructional Assistant Professor
Mathematics
PHD, Texas A&M University, 2005

Ono, Hiroshi, Associate Professor
Sociology
PHD, University of Chicago, 1999

Opperman, Lynne, Regents Professor
Biomedical Sciences
PHD, University of the Witwatersrand, South Africa, 1985

Orange, William, Lecturer
Marine Transportation
BS, Texas A&M University, 1991

Orchard, Patrick, Lecturer
Mathematics
MS, Texas A&M University, 2015

Orr, Joseph, Assistant Professor
Psychology
PHD, University of Michigan, 2011

Orsi, Alejandro, Professor
Oceanography
PHD, Texas A&M University, 1993

Ortega-Aguilar, Dionisio, Instructional Assistant Professor
Hispanic Studies
PHD, Stanford University, 1986

Ortiz Sierra, Paula, Adjunct Assistant Professor
Periodontics
MS, Case Western Reserve University, 2008

Orville, Richard, Research Professor
Atmospheric Sciences
PHD, University of Arizona, 1966

Ory, Marcia, Professor
Hlth Promotion & Comm Hlth Sci
PHD, Purdue University, 1976

Osburn, Wesley, Associate Professor
Animal Science
PHD, University of Nebraska--Lincoln, 1996

Osinde, Eliphas, Adjunct Assistant Professor
Diagnostic Sciences
DDS, Texas A&M University Baylor College of Dentistry, 2015

Ostrovska, Natela, Senior Lecturer
Nuclear Engineering
PHD, Texas A&M University, 2005

Oswald, John, Professor
Entomology
PHD, Cornell University, 1991

Otamendi, Arturo, Veterinary Resident

Recreation, Park & Tourism Sc
PHD, Texas A&M University, 2000

Ozerov, Oleg, Professor
Chemistry
PHD, University of Kentucky, 2000

Ozkan, Tanil, Visiting Assistant Professor
Mechanical Engineering
DEN, University of Illinois Urbana Champaign, 2014

Ozmetin, Ali, Senior Lecturer
Engineering Student Serv & Academic Prog
PHD, Texas A&M University, 2009

Paarlberg, Laurie, Associate Professor
Public Service & Administration
PHD, Indiana University - Bloomington, 2003

Pace, Kathleen, Clinical Assistant Professor
Pediatric Dentistry
DDS, State University of New York, Buffalo School of Dentistry, 1977

Pacek, Alexander, Professor
Political Science
PHD, University of Illinois at Urbana - Champaign, 1991

Packard, Jane, Emeritus Professor
Wildlife & Fisheries Sciences
PHD, University of Minnesota, 1980

Packard, Mark, Professor
Psychology
PHD, McGill University, 1991

Padron, Yolanda, Professor
Educational Psychology
PHD, University of Houston, 1985

Paetzold, Ramona, Professor
Management
PHD, Indiana University, 1979
Page, Robin, Clinical Assistant Professor
College Of Nursing
PHD, University of Texas at Austin, 2006

Pagilla, Prabhakar, Professor
Mechanical Engineering
PHD, University of California, Berkeley, 1996

Pakhotina, Nataliya, Lecturer
Economics
PHD, University of Florida, 2010

Palakurthi, Srinath, Associate Professor
College of Pharmacy
MS, Dr. H.S. Gour University -India, 1993

Palazzolo, Alan, Professor
Mechanical Engineering
PHD, University of Virginia, 1981

Palermo, Samuel, Associate Professor
Electrical & Computer Eng
MS, Texas A&M University, 1999

Palma, Marco, Associate Professor & Extension Specialist
Agricultural Economics
PHD, University of Florida, 2005

Palmer, Clare, Professor
Philosophy & Humanities
PHD, University of Oxford, 1993

Palmer, Darlene, Assistant Lecturer
Teaching, Learning And Culture
MS, Texas A&M University, 1988

Palmer, Douglas, Professor
Educational Psychology
PHD, University of California, 1977

Palmer, Erica, Assistant Professor
Political Science
PHD, University of Minnesota, 2010

Palos, Edward, Clinical Assistant Professor
Restorative Sciences
DDS, Texas A&M University Baylor College of Dentistry, 2012

Pals, Heili, Assistant Professor
Sociology
PHD, Stanford University, 2006

Pan, Jing, Research Associate Professor
Medical Physiology
MD, Shaxi Medical University, 1987

Panahi, Ladan, Clinical Assistant Professor
College of Pharmacy

Panetta, Richard, Professor
Atmospheric Sciences
PHD, University of Wisconsin, 1978

Pangemanan, Adelaide, Instructional Assistant Professor
Liberal Studies
MS, State University of New York at Stony Brook, 2002

Panin, Vladislav, Professor
Biochemistry & Biophysics
PHD, Moscow State University, 1990

Panina, Daria, Clinical Associate Professor
Management
PHD, Rutgers University, 2002

Papunya, John, Research Professor
Geology & Geophysics
PHD, University of South Carolina, 1988

Papouris, Grigory, Professor
Mathematics
PHD, University of Crete, 2004

Panet, Matthew, Professor
Mathematics
PHD, Brown University, 1998

Papovich, Casey, Associate Professor
Physics And Astronomy
PHD, Johns Hopkins University, 2002

Pappas, Gregory, Professor
Philosophy & Humanities
PHD, University of Texas at Austin, 1990

Pappu, Madhav, Clinical Assistant Professor
Information & Operations Mgmt
PHD, University of Tennessee, 1999

Parish, Janet, Clinical Professor
Marketing
PHD, University of Alabama, 2002

Park, John, Professor & Extension Specialist
Agricultural Economics
PHD, Texas A&M University, 1996

Park, Kyeong, Professor
Marine Sciences
PHD, College of William and Mary, 1993

Park, Philip, Assistant Professor
Civil Engineering
PHD, Yonsei University, 2012

Park, William, Professor
Biochemistry & Biophysics
PHD, University of Florida, 1977

Park, Yun, Lecturer
Landscape Architecture & Urban Planning
PHD, Texas A&M University, 2014

Parke, Frederic, Professor
Visualization
PHD, University of Utah, 1974
Parker, Dawn, Clinical Professor
Teaching, Learning And Culture
PHD, Texas A&M University, 1997

Parker, Jason, Associate Professor
History
PHD, University of Florida, 2002

Parnell, Calvin, Professor
Biological & Agricultural Eng
PHD, Clemson University, 1970

Parra Carrasquer, Carlos, Clinical Assistant Professor
Periodontics
DDS, Universitat Internacional de Catalunya, 2009

Parvin, Christopher, Adjunct Professor

Epidemiology & Biostatistics
PHD, Johns Hopkins University, Bloomberg School of Public Health, 2012

Perez, Nicholas, Assistant Professor
Geology & Geophysics
PHD, University of Texas at Austin, 2015

Perez, Sebastian, Assistant Professor
College of Pharmacy

Perez-Nunez, Delia, Teas Associate Research Scientist
Nuclear Engineering
PHD, Texas A&M University, 2008

Perrigo, James, Instructional Assistant Professor
Marine Science

Perrott, Lisa, Associate Professor
Educational Psychology
PHD, University of Virginia, 2001

Perry, Brittany, Instructional Assistant Professor
Political Science
PHD, Duke University, 2013

Perry, Nandra, Associate Professor
English
PHD, University of North Carolina at Chapel Hill, 2003

Peters, Regina, Lecturer
English Language Institute
MFA, Purdue University, West Lafayette, IN, 2005
MFA, Purdue University, West Lafayette, IN, 2005

Petersen, Eric, Professor
Mechanical Engineering
PHD, Stanford University, 1998

Petersen, Lene, Instructional Assistant Professor
Marine Biology
PHD, Memorial University of Newfoundland, 2010

Peterson, David, Professor
Biochemistry & Biophysics
PHD, Harvard University, 1977

Peterson, John, Lecturer
Finance
PHD, Texas A&M University, 2002

Peterson, Thomas, Instructional Professor
Medical Physiology
PHD, The University of Oklahoma, 1977

Petrick, James, Professor
Recreation, Park & Tourism Sc
PHD, Clemson University, 1999

Petrova, Guergana, Professor
Mathematics
PHD, University of Southern Carolina, 1999

Pettersson, Martin, Professor
Philosophy & Humanities
PHD, KTH Royal Institute of Technology, 2003

Peycke, Laura, Clinical Associate Professor
Vet Small Animal Clinical Sc
DVM, Louisiana State University, 1998

Pham, Leuhuyen, Professor
School of Law
JD, Harvard Law School, 1996

Phillips, David, Adjunct Assistant Professor
Oral Surgery
DDS, The University of Texas Health Science Center at Houston, 1977

Phillips, Don, Senior Professor
Industrial & Systems Eng
PHD, University of Arkansas, 1969

Phillips, Susan, Professor
School of Law
JD, The Catholic University of America, 1990

Phillips, Timothy, Professor
Vet Integrative Biosciences
PHD, University of Southern Mississippi, 1975

Philofsky, David, Adjunct Assistant Professor
Periodontics
DDS, Texas A&M University Baylor College of Dentistry, 2005
Phinney, Theresa, Senior Lecturer
Information & Operations Mgmt
BS, Texas A&M University, 1981

Pho, Victoria, Assistant Professor
College of Pharmacy

Pickens, Adam, Assistant Professor
Environmental And Occupational Health
PHD, Texas A&M University/Texas Tech University, 2008

Pierce, Tanya, Associate Professor
School of Law
JD, The University of Texas School of Law, 1996

Pierson, Elizabeth, Associate Professor
Horticultural Sciences
PHD, Washington State University, 1988

Pierson, Leland, Professor
Plant Pathology & Microbiology
PHD, Washinton State University, 1986

Pietrantonio, Patricia, Professor
Entomology
PHD, University of California, Riverside, 1995

Pilant, Michael, Professor
Mathematics
PHD, New York University, 1982

Pillai, Suresh, Professor
Nutrition & Food Science
PHD, University of Arizona, 1989

Pillai, Suresh, Professor
Poultry Science
PHD, University of Arizona, 1989

Pilsch, Andrew, Assistant Professor
English
PHD, The Pennsylvania State University, 2011

Pina, Manuel, Associate Professor
Ag Leadership, Educ & Comm
MS, Texas A&M University, College Station, 1974

Pine, Michelle, Clinical Associate Professor
Vet Integrative Biosciences
DVM, University of Missouri-Columbia, 1991

Plavnik, Julia, Visiting Assistant Professor
Mathematics
PHD, National University of Cordoba, 2013

Plemons, Jacqueline, Clinical Professor
Periodontics
DDS, Baylor University College of Dentistry, 1986

Plotkin, Pamela, Research Associate Professor
Oceanography
PHD, Texas A&M University, 1994

Plumlee, Quinci, Assistant Lecturer
Veterinary Pathobiology
DVM, Oklahoma State University, 2014

Plemons, Kristan, Associate Professor
Pediatric Dentistry
MS, Baylor College of Dentistry, 1977
MS, Baylor College of Dentistry, 1985

Poe, Allen, Lecturer
Animal Science
MED, Texas A&M University, 2003

Poirot, Kristan, Associate Professor
Communication
PHD, University of Georgia, 2004

Poirot, Kristan, Associate Professor
Womens Studies
PHD, University of Georgia, 2004

Pokrovsky, Valery, Distinguished Professor
Physics And Astronomy
PHD, Tomsk State University, 1957

Pollock, Sara, Visiting Assistant Professor
Mathematics
PHD, University of California, 2012

Pollock, Thomas, Associate Professor
Aerospace Engineering
PHD, University of Virginia, 1977

Polson, James, Adjunct Assistant Professor
Orthodontics
DDS, The University of Texas Health Science Center at San Antonio, 1986
Poltoratski, Alexei, Professor
Mathematics
PHD, California Institute of Technology, 1995

Polycarpou, Andreas, Professor
Mechanical Engineering
PHD, State University of New York at Buffalo (SUNY), 1994

Polymenis, Michael, Professor
Biochemistry & Biophysics
PHD, Tufts University, 1994

Pond, Amy, Assistant Professor
Political Science
PHD, University of Michigan, 2015

Ponjuan, Luis, Associate Professor
Educ Admn & Human Resource Dev
PHD, University of Michigan, 2005

Ponnalagu, Alagappan, Visiting Assistant Professor
Mechanical Engineering
PHD, Texas A&M University, 2015

Portales, Marco, Professor
English
PHD, University of Buffalo, 1975

Porter, Brian, Clinical Associate Professor
Veterinary Pathobiology
DVM, Texas A&M University, 1992

Porter, Dana, Professor & Extension Specialist
Biological & Agricultural Eng
MS, Texas A&M University, 1989

Porter, Jay, Professor
Engineering Technology & Industrial Dist
PHD, Texas A&M University, 1993

Porter, Weston, Associate Professor
Vet Integrative Biosciences
PHD, Texas A&M University, 1997

Porter, Kent, Professor
Public Service & Administration
PHD, Florida State University, 1979

Posey, Richard, Clinical Professor
Vet Large Animal Clinical Sc
DVM, Texas A&M University, 1982

Poston, Dudley, Professor
Sociology
PHD, University of Oregon, 1968

Poston, John, Professor
Nuclear Engineering
PHD, Georgia Institute of Technology, 1971

Potter, David, Professor
College of Pharmacy
PHD, University of Kansas, 1969

Pourahmadi, Mohsen, Professor
Statistics
PHD, Michigan State University, 1980

Powers, David, Assistant Professor
Chemistry
PHD, Harvard University, 2011

Powers, Tamara, Lecturer
Chemistry
PHD, Harvard, 2013

Prats, Lorenzo, Clinical Assistant Professor
Restorative Sciences
DMD, University of Puerto Rico Medical Sciences, 1979

Prechel, Harland, Professor
Sociology
PHD, University of Kansas, 1986

Presswood, Phillip, Lecturer
Liberal Studies
MA, University of Houston-Clear Lake, 2011

Price, Angie, Associate Professor
Engineering Technology & Industrial Dist
PHD, Texas A&M University, 1999

Price, Edwin, Professor
Agricultural Economics
PHD, University of Kentucky, 1973
Pride, William, Professor
Marketing
PHD, Louisiana State University and A&M College, 1972

Procaccia, Eviatar, Assistant Professor
Mathematics
PHD, Weizmann Institute of Science, 2013

Prockop, Darwin, Professor
Internal Medicine Temple Campus
MD, University of Pennsylvania, 2014

Prout, Erik, Instructional Assistant Professor
Geography
PHD, Louisiana State University, 2001

Provin, Tony, Professor & Extension Specialist
Soil & Crop Sciences
MS, Iowa State University, 1991

Putcha, Rumya, Assistant Professor
Performance Studies
PHD, University of Chicago, 2011

Puttaiah, Raghunath, Professor
Diagnostic Sciences
MPH, University of Alabama - Birmingham, 1990

Putty, Scott, Associate Professor of the Practice
Marine Transportation
CERT, US Coast Guard, 1979

Pylant, George, Adjunct Assistant Professor
Periodontics
DDS, Baylor College of Dentistry, 1988

Qian, Xiaofeng, Assistant Professor
Materials Science And Engineering
PHD, Massachusetts Institute of Technology, 2008

Qian, Xiaoning, Assistant Professor
Electrical & Computer Eng
PHD, Yale University, 2005

Qi, Chunlin, Professor
Biomedical Sciences
DMD, Harbin Medical University, 1983

Qin, Hongmin, Associate Professor
Biology
PHD, Institute of Microbiology, Chinese Academy of Sciences, 1999

Qiu, Lin, Instructional Assistant Professor
Liberal Studies
PHD, University of Alabama, 2006

Qu, Tongbin, Lecturer
Landscape Architecture & Urban Planning
PHD, Texas A&M University, 2010

Quackenbush Ammons, Anne, Lecturer
Performance Studies
MA, University of Houston, 2010

Quadrifoglio, Luca, Associate Professor
Civil Engineering
PHD, University of Southern California, 2005

Quek, Francis, Professor
Visualization
PHD, University of Michigan, 1990

Quick, Christopher, Professor
Vet Physiology & Pharmacology
PHD, Rutgers University, 1999

Quigg, Antonietta, Professor
Marine Biology
PHD, Monash University, 2000

Quintana, Maria, Associate Professor
Hispanic Studies
PHD, University of California, Berkeley, 1998
Quiring, Steven, Associate Professor
Geography
PHD, University of Delaware, 2005

Rackley, Robin, Clinical Professor
Teaching, Learning And Culture
PHD, Texas A&M University, 2004

Radcliff, Tiffany, Associate Professor
Health Policy & Management
PHD, School of Public Health University of Minnesota, 2000

Radovic, Miladin, Associate Professor
Materials Science And Engineering
PHD, Drexel University, 2001

Radzik, Linda, Professor
Philosophy & Humanities
PHD, The University of Arizona, 1997

Rae, William, Clinical Professor
Educational Psychology
PHD, University of Texas at Austin, 1975

Rafael, Ruben, Adjunct Assistant Professor
Restorative Sciences
MS, Tufts University, 2010

Ragan, Eric, Assistant Professor
Visualization
PHD, Virginia Tech, 2013

Ragsdale, Daniel, Professor Of The Practice
Computer Science & Engineering
PHD, Texas A&M University, 2001

Ragsdale, David, Professor
Entomology
PHD, Louisiana State University, 1980

Ragucci, Sylvie, Lecturer
International Studies Department
PHD, The Pennsylvania State University, 1999

Ragusa, Jean, Associate Professor
Nuclear Engineering
MS, Texas A&M University, 1996

Rahimian, Mina, Senior Lecturer
Electrical & Computer Eng
PHD, Texas A&M University, 2011

Rahn, Rhonda, Clinical Assistant Professor
Health & Kinesiology
PHD, Texas A&M University, 2014

Raibourn, Delmer, Adjunct Professor
School of Law
JD, University of Oklahoma School of Law, 1998

Rainey, Robert, Assistant Professor
Political Science
PHD, Florida State University, 2013

Raisor, Cynthia, Lecturer
George Bush School of Govern
MA, Texas A&M University, 1986

Rajagopal, Kumbakonam, Distinguished Professor
Mechanical Engineering
PHD, University of Minnesota, 1978

Rajan, Nithya, Assistant Professor
Soil & Crop Sciences
PHD, Texas Tech University, 2007

Ramadan, Hadeel, Lecturer
Visualization
MFA, Virginia Tech, 2014

Ramadoss, Jayanth, Assistant Professor
Vet Physiology & Pharmacology
PHD, Texas A&M University, 2007

Ramanathan, Suresh, Professor
Marketing
PHD, New York University, 2002

Ramasubramanian, Srividya, Associate Professor
Communication
PHD, Pennsylvania State University, 2004

Rambo, Lynne, Professor
School of Law
JD, The University of Georgia, 1987

Ramirez, Gilbert, Professor
School Of Public Health
DrPH, University of Texas Health Science Center at Houston, 1986

Ramsey, Heather, Instructional Assistant Professor
Mathematics
MS, Texas A&M University, 2004

Ramsey, W, Professor
Animal Science
PHD, New Mexico State University, 1996

Randall, Robert, Professor
Ocean Engineering
PHD, University of Rhode Island, 1972

Rangan, Sudarsan, Clinical Assistant Professor
Information & Operations Mgmt
PHD, University of Alabama, 2008

Rangel Posada, Juliana, Assistant Professor
Entomology
PHD, Cornell University, 2010

Ranjan, Devesh, TEES Associate Research Professor
Mechanical Engineering
PHD, University of Wisconsin - Madison, 2006

Rankin, Kathleen, Professor
Public Health Sciences
DDS, Baylor College of Dentistry, 1977
Rao, Asha, Lecturer
Biology
PhD, Texas A&M University, 2002

Rapp, Anita, Assistant Professor
Atmospheric Sciences
MS, Colorado State University, 2004

Rapp, Ralf, Professor
Physics And Astronomy
PhD, Rheinische Friedrich-Wilhelma University, Bonn, 1996

Rasmussen, Bryan, Associate Professor
Mechanical Engineering
PhD, University of Illinois, 2005

Rathinam, Sivakumar, Associate Professor
Mechanical Engineering
PhD, University of California, Berkeley, 2007

Rathore, Keerti, Professor
Soil & Crop Sciences
PhD, Imperial College London, 1981

Rauchwerger, Lawrence, Professor
Computer Science & Engineering
PhD, University of Illinois, 1995

Raudsepp, Terje, Associate Professor
Vet Integrative Biosciences
PhD, Swedish University of Agricultural Sciences, 1999

Rauscher, Emily, Assistant Professor
Communication
PhD, University of Missouri, 2012

Rauschel, Frank, Distinguished Professor
Chemistry
PhD, University of Wisconsin - Madison, 1976

Ray, Korok, Associate Professor
Accounting
PhD, Stanford Graduate School of Business, 2004

Rayfield, John, Associate Professor
Ag Leadership, Educ & Comm
PhD, Texas Tech University, 2006

Raymond, Anne, Professor
Geology & Geophysics
PhD, University of Chicago, 1983

Raymond, Dwayne, Instructional Assistant Professor
Philosophy & Humanities
PhD, University of Western Ontario, 2006

Rech, Raquel, Clinical Assistant Professor
Veterinary Pathobiology
PhD, Federal University of Santa Maria (UFSM), 2007

Reddy, Anil, Adjunct Assistant Professor
Pediatric Dentistry
MPH, Columbia University, 1994

Reddy, Doodipala, Professor
Neuroscience & Experimental Therapeutics
PhD, Panjab University, India, 1998

Reddy, Junuthula, Distinguished Professor
Mechanical Engineering
PhD, University of Alabama at Huntsville, 1974

Reddy, Likith, Clinical Associate Professor
Oral Surgery
MD, University of Texas Southwestern Medical Center, 2000

Reddy, Sanjay, Professor
Poultry Science
PhD, University of Maryland, College Park, 1994

Reddy, Sanjay, Professor
Veterinary Pathobiology
PhD, University of Maryland, College Park, 1994

Reddy, Vanita, Assistant Professor
English
PhD, University of California, Davis, 2009

Rediniotis, Othon, Professor
Aerospace Engineering
PhD, Virginia Tech, 1992

Redman, Karen, Executive Professor
Accounting
BBA, Texas A&M University, 1980

Redmon, Larry, Professor & Extension Specialist
Soil & Crop Sciences
PhD, Texas A&M University, 1992

Redwine, Tobin, Assistant Professor
Ag Leadership, Educ & Comm
PhD, Texas A&M University, 2014

Reece, Julia, Assistant Professor
Geology & Geophysics
PhD, University of Texas, 2011

Reece, Robert, Assistant Professor
Geology & Geophysics
PhD, The University of Texas - Austin, 2012

Reed, David, Professor
Horticultural Sciences
MS, Cornell University, 1977

Reed, Helen, Professor
Aerospace Engineering
PhD, Virginia Tech, 1981

Reed, Teri, Professor
Petroleum Engineering
PhD, Arizona State University, 1999

Rees, Lynn, Professor
Accounting
PhD, Arizona State University, 1993
Rees, Terry, Professor
Periodontics
DDS, University of Tennessee Medical Units-Memphis, 1957

Reese, Roger, Professor
History
PHD, The University of Texas, 1990

Regan, Deborah, Clinical Assistant Professor
Periodontics
MS, Texas A&M University System Baylor College of Dentistry, 2005

Regan, Martin, Associate Professor
Performance Studies
PHD, University of Hawai‘i at manoa, 2006

Reid, Russell, Assistant Professor Of The Practice
Landscape Architecture & Urban Planning
MAR, Texas A&M University, 2001

Reihani, Kamran, Instructional Assistant Professor
Mathematics
PHD, Tarbiat Modares University, 2005

Reilly, Peter, Associate Professor
School of Law
LLM, Georgetown University Law Center, 2004

Reiner, David, Associate Professor
Institute of Biosciences & Tec
PHD, University of Washington, 1996

Reinhart, Gregory, Professor
Biochemistry & Biophysics
PHD, University of Wisconsin - madison, 1979

Rene, Antonio, Associate Professor
Environmental And Occupational Health
PHD, University of Texas School of Public Health, 1990

Rentzepis, Peter, Professor
Electrical & Computer Eng
PHD, University of Cambridge, 1963

Resch, Robert, Associate Professor
History
PHD, University of California Davis, 1985

Retchless, David, Assistant Professor
Marine Science
PHD, Pennsylvania State University, 2015

Reynolds, Larry, Distinguished Professor
English
PHD, Duke University, 1974

Reynolds, Mollie, Lecturer
Biochemistry & Biophysics
PHD, Texas A&M University, 2010

Reynolds, Raquel, Clinical Assistant Professor
College Of Nursing
MNU, The University of Texas at Austin, 2005

Rhine, Joshua, Assistant Lecturer
Teaching, Learning And Culture
MED, University of Houston Downtown, 2008
MED, University of Houston, 2008

Rhodes, Adrienne, Assistant Professor
Accounting
PHD, Pennsylvania State University, 2013

Rholes, William, Professor
Psychology
PHD, Princeton University, 1978

Ribera, L, Associate Professor & Extension Specialist
Agricultural Economics
PHD, Texas A&M University, 2005

Riccio, Cynthia, Professor
Educational Psychology
PHD, University of Georgia, 1993

Rice, Dale, Instructional Associate Professor
Communication
BA, Syracuse University, 1973

Rice, Laura, Veterinary Resident
Veterinary Pathobiology
DVM, Kansas State University, 2015

Rice, Mitchell, Professor
Political Science
PHD, Claremont Graduate School, 1976

Rice, Sarah, Assistant Professor
Accounting
PHD, The Ohio State University, 2007

Rich, Elisabeth, Associate Professor
International Studies Department
PHD, University of Michigan Ann Arbor, 1985

Rich, Lisa, Associate Professor
School of Law
JD, American University Washington College of Law, 1998

Richard, Cheryl, Executive Professor
Management
MBA, Murray State University Murray, KY, 1979

Richard, Jacques, Senior Lecturer
Aerospace Engineering
PHD, Rensselaer University, 1989

Richardson, James, Regents Professor
Agricultural Economics
PHD, Oklahoma State University, 1978

Richardson, Mary, Professor
Oceanography
PHD, Massachusetts Institute of Technology, 1980

Richardson, Nicole, Adjunct Assistant Professor
Restorative Sciences
DDS, Texas A&M Baylor College of Dentistry, 2007
Richert, Anita, Veterinary Resident  
Veterinary Pathobiology  
DVM, Purdue University, 2015

Ridley, Charles, Professor  
Educational Psychology  
PHD, University of Minnesota, 1978

Riechman, Steven, Associate Professor  
Health & Kinesiology  
PHD, University of Pittsburgh, 2000

Riggs, Eric, Associate Professor  
Geology & Geophysics  
PHD, University of California-Riverside, 2000

Riggs, Penny, Associate Professor  
Animal Science  
PHD, Texas A&M University, 1996

Righetti, Raffaella, Associate Professor  
Electrical & Computer Eng  
PHD, University of Houston, 2005

Riley, Bruce, Professor  
Biology  
PHD, University of Wisconsin - madison, 1990

Riley, David, Associate Professor  
Animal Science  
PHD, Texas A&M University, 2000

Rimer, Mendell, Associate Professor  
Neuroscience & Experimental Therapeutics  
PHD, University of Maryland at Baltimore, 1993

Ripley, Jeffrey, Associate Professor  
Ag Leadership, Educ & Comm  
PHD, Texas A&M University, 2008

Riskowski, Gerald, Professor  
Biological & Agricultural Eng  
PHD, Iowa State University, 1986

Rispoli, Mandy, Associate Professor  
Educational Psychology  
PHD, University of Texas at Austin, 2009

Rister, M, Professor  
Agricultural Economics  
PHD, Michigan State University, 1981

Ritchey, Philip, Instructional Assistant Professor  
Computer Science & Engineering  
PHD, Purdue University, 2015

Rivera, Gonzalo, Associate Professor  
Veterinary Pathobiology  
DVM, Cornell University, 2002  
DVM, National University of Rio Cuarto, Argentina, 1988

Rivera, Hector, Assistant Professor  
Educational Psychology  
PHD, University of California-Santa Cruz, 2001

Roach, Kevin, Executive Professor  
Accounting  
BS, State University of New York at Albany, 1973

Roark, Erin, Associate Professor  
Geography  
PHD, University of California, Berkeley, 2005

Robertson, John, Professor  
Political Science  
PHD, University of Illinois at Urbana - Champaign, 1979

Robertson, Raymond, Professor  
International Affairs  
PHD, University of Texas at Austin, 1997

Robinson, Elizabeth, Instructional Associate Professor  
English  
PHD, Texas A&M University, 1995

Robinson, John, Professor  
Accounting  
MS, Colorado State University, 1976

Robinson, John, Professor & Extension Specialist  
Agricultural Economics  
PHD, Texas A&M University, 1993

Robinson, Sally, Associate Professor  
English  
PHD, University of Washington, 1989

Robles Emmanuelli, Juan, Clinical Assistant Professor  
Vet Physiology & Pharmacology  
BS, University of Puerto Rico, 2001

Roblyer, Dwight, Lecturer  
Political Science  
PHD, Texas A&M University, 2009

Rodgers, William, Professor of Practice  
Construction Science  
JD, Texas Tech University, 1978

Rodiek, Jon, Professor  
Landscape Architecture & Urban Planning  
PHD, University of Massachusetts, Amherst, 1974

Rodiek, Susan, Associate Professor  
Architecture  
MAR, Texas A&M University, 1998

Rodrigues De Paula Lima, Heitor, Professor Of The Practice  
Petroleum Engineering  
PHD, Texas A&M University, 1998

Rodrigues Hoffmann, Aline, Assistant Professor  
Veterinary Pathobiology  
PHD, Texas A&M University, 2011

Roelke, Daniel, Professor  
Wildlife & Fisheries Sciences  
PHD, Texas A&M University, 1997
Roesch, Darren, Assistant Professor
Biomedical Sciences
PHD, University of Florida, 1998

Rogachev, Grigory, Professor
Physics And Astronomy
PHD, National Research Centre, 1999

Rogers, George, Professor
Landscape Architecture & Urban Planning
PHD, University of Pittsburgh, 1983

Rogers, Julia, Senior Lecturer
Architecture
PHD, Texas A&M University, 1996

Rogers, Kenita, Professor
Vet Small Animal Clinical Sc
DVM, Louisiana State University, 1982

Rogers, William, Lecturer
Chemical Engineering
PHD, Ohio State University, 1976

Rogers, William, Professor
Ecosystem Science & Mgmt
PHD, Kansas State University, 1998

Rogovskyy, Artem, Assistant Professor
Veterinary Pathobiology
PHD, Washington State University, 2014

Rojas, Joseph, Professor
Mathematics
PHD, University of California, Berkeley, 1995

Rollins, Ian, Instructional Assistant Professor
Performance Studies
PHD, Texas Tech University, 2009

Rollins, John, Lecturer
George Bush School of Govern
BS, University of North Carolina - Fayetteville, 1995

Rollins, Kayla, Assistant Lecturer
Teaching, Learning And Culture
PHD, Texas A&M University, 2011

Romano, Juan, Associate Professor
Vet Large Animal Clinical Sc
DVM, Universidad del Uruguay, 1985

Rooker, Jay, Regents Professor
Marine Biology
PHD, The University of Texas - Austin, 1997

Roosevelt, William, Professor
Soil & Crop Sciences
PHD, Kansas State University, 1966

Ross, Andy, Professor
International Affairs
PHD, Cornell University, 1984

Ross, Joseph, Professor
Physics And Astronomy
PHD, University of Illinois at Urbana-Champaign, 1986

Ross, Shawna, Assistant Professor
English
PHD, The Pennsylvania State University, 2011

Ross, Shawna, Assistant Professor
Public Service & Administration
PHD, Texas A&M University, 1997

Rossi, Marco, Visiting Assistant Professor
Finance
PHD, Pennsylvania State University, 2010

Mechanical Engineering
PHD, Texas A&M University, 1985

Sanchez Castilla, Marcelo, Associate Professor
Civil Engineering
PHD, Universidad Politécnica de Catalunya (UPC), Barcelona, Spain, 2004

Sanchez, Russell, Assistant Professor
Surgery
PHD, New York University, 1996

Sanchez-Sinencio, Edgar, Professor
Electrical & Computer Eng
PHD, University of Illinois, 1973

Sanders, James, Professor
Animal Science
PHD, Texas A&M University, 1977

Sanders, Joan, Senior Lecturer
Accounting
MS, Texas A&M University, 1990

Sandlin, Judy, Clinical Associate Professor
Educ Admn & Human Resource Dev
PHD, Texas A&M University, 1993

Sandlin, Michael, Clinical Associate Professor
Health & Kinesiology
PHD, Texas A&M University, 1992

Sang, Huiyan, Associate Professor
Statistics
PHD, Duke University, 2008

Sansom, Roger, Associate Professor
Philosophy & Humanities
PHD, University of North Carolina at Chapel Hill, 2002

Santander, Patricio, Senior Lecturer
Chemistry
PHD, Texas A&M University, 1987

Santschi, Peter, Regents Professor
Marine Science
PHD, Universitat Bern, 1975

Saravanan, Ramalingam, Professor
Atmospheric Sciences
PHD, Princeton University, 1990

Saric, William, Distinguished Professor
Aerospace Engineering
PHD, Illinois Institute of Technology, 1968

Sar, Vivek, Associate Professor
Computer Science & Engineering
PHD, University of Illinois, 1997

Sasangohar, Farzan, Assistant Professor
Industrial & Systems Eng
PHD, University of Toronto, 2015

Saslow, Wayne, Professor
Physics And Astronomy
PHD, University of California - Irvine, 1968

Satterfield, Michael, Associate Professor
Animal Science
PHD, Texas A&M University, 2008

Saunders, Ashley, Associate Professor
Vet Small Animal Clinical Sc
BS, Texas A&M University, 1998

Saunders, William, Assistant Professor
Vet Small Animal Clinical Sc
PHD, Texas A&M University, 2005

Savari, Serap, Associate Professor
Electrical & Computer Eng
PHD, Massachusetts Inst of Technology, 1996
Savell, Jeffrey, Professor
Animal Science
PHD, Texas A&M University, 1978

Saving, Thomas, Distinguished Professor
Economics
PHD, University of Chicago, 1960

Sawyer, Jason, Associate Professor
Animal Science
PHD, New Mexico State University, 2000

Scallan, Elizabeth, Lecturer
Vet Small Animal Clinical Sc
MS, Texas A&M University, 2001

Scarborough, Sherry, Instructional Assistant Professor
Mathematics
PHD, Texas A&M University, 2001

Scarfuto, Jessica, Assistant Lecturer
Civil Engineering
MS, Texas A&M University, 2014

Schade, Gunnar, Associate Professor
Atmospheric Sciences
PHD, Johannes Gutenberg Universitat, Germany, 1997

Schechter, David, Associate Professor
Petroleum Engineering
PHD, Bristol University, United Kingdom, 1989

Scheiner, Justin, Assistant Professor & Extension Specialist
Horticultural Sciences
PHD, Cornell University, 2010

Schielack, Vincent, Associate Professor
Mathematics
PHD, University of Texas at Austin, 1982

Schlegel, Rebecca, Associate Professor
Psychology
PHD, University of Missouri - Columbia, 2009

Schleicher, Deidra, Associate Professor
Management
PHD, Pennsylvania State University, 1998

Schloss, Rebecca, Associate Professor
History
PHD, Duke University, 2003

Schluens, Amber, Assistant Lecturer
Teaching, Learning And Culture
MED, Sam Houston State University, Huntsville, TX, 2006

Schlumprecht, Thomas, Professor
Mathematics
PHD, Ludwig Maximilians Universitat, Germany, 1988

Schmalz, Thomas, Senior Professor Emeritus
Marine Science
PHD, University of Illinois at Urbana-Champaign, 1975

Schmeichel, Brandon, Professor
Psychology
PHD, Florida State University, 2005

Schmiediche, Henrik, Instructional Associate Professor
Statistics
PHD, Texas A&M University, 1993

Schmitz, David, Associate Professor
Vet Large Animal Clinical Sc
DVM, Kansas State University, 1976

Schmitz, Rose, Instructional Associate Professor
Health & Kinesiology
MS, Texas A&M University, 1986

Schneider, William, Professor Of The Practice
Mechanical Engineering
PHD, Rice University, 1972

Schneiderman, Emet, Professor
Biomedical Sciences
PHD, University of Michigan - Ann Arbor, 1985

Schnell, Ronnie, Assistant Professor & Extension Specialist
Soil & Crop Sciences
PHD, Texas A&M University, 2010

Schobeiri, Taher, Professor
Mechanical Engineering
PHD, Technische Universität Darmstadt, Germany, 1979

Schoessow, Courtney, Instructional Assistant Professor
Health & Kinesiology
PHD, Medical University of South Carolina, 2014

Scholthof, Herman, Professor
Plant Pathology & Microbiology
PHD, University of Kentucky, 1990

Scholthof, Karenbeth, Professor
Plant Pathology & Microbiology
PHD, University of Kentucky, 1989

Scholtz, John, Professor
Molecular & Cellular Medicine
PHD, University of California, Berkeley, 1989
Schoolcraft, Ralph, Associate Professor
International Studies Department
PHD, Emory University, 1995

Schow, Sterling, Clinical Professor
Oral Surgery
DMD, University of Oregon Dental School, 1966

Schreuders, Paul, Instructional Associate Professor
Engineering Student Serv & Academic Prog
MS, Clemson University, 1985

Schroeder, Friedhelm, Professor
Vet Physiology & Pharmacology
PHD, Michigan State University, 1974

Schubert, Jerome, Associate Professor
Petroleum Engineering
PHD, Texas A&M University, 1999

Schuett, Michael, Associate Professor
Recreation, Park & Tourism Sc
PHD, University of Illinois at Urbana - Champaign, 1991

Schulman, Craig, Associate Professor of the Practice
Economics
PHD, Texas A&M University, 1990

Schultz, Deeann, Research Assistant Professor
Biochemistry & Biophysics
BS, Texas A&M University, 1993

Schulze, Anja, Associate Professor
Marine Biology
PHD, University of Victoria, Canada, 2001

Schumacher, Courtney, Professor
Atmospheric Sciences
PHD, University of Washington, 2003

Schumacher, Jay, Lecturer
Psychology
PHD, Texas A&M University, 1999

Schwab, Arthur, Professor
Soil & Crop Sciences
PHD, Colorado State University, 1981

Schwartz, Daniel, Assistant Professor
History
PHD, Princeton University, 2009

Schwarz, John, Regents Professor
Marine Biology
PHD, Rensselaer Polytechnic Institute, 1972

Schweikert, Emile, Professor
Chemistry
PHD, Universite de Paris, France, 1964

Schweitzer, Jordan, Clinical Associate Professor
Endodontics
MS, Marquette University, 1990

Schwerner, Lee, Adjunct Professor
School of Law
JD, Texas Tech University School of Law, 1972

Scott, David, Professor
Recreation, Park & Tourism Sc
PHD, Pennsylvania State University, 1990

Scott, Erin, Clinical Assistant Professor
Vet Small Animal Clinical Sc
BS, Georgetown University, 2004

Scott, Harvey, Professor
Veterinary Pathobiology
DVM, University of Saskatchewan, 1988

Scott, Susan, Lecturer
Recreation, Park & Tourism Sc
MS, Pennsylvania State University, 1987

Scott, Timothy, Associate Professor
Biology
PHD, Texas A&M University, 1996

Scully, Marlan, Distinguished Professor
Physics And Astronomy
PHD, Yale University, 1966

Sczepanski, Jonathan, Assistant Professor
Chemistry
PHD, The Johns Hopkins University, 2010

Seaback, Wanda, Clinical Assistant Professor
College Of Nursing
MNU, Texas Women's University, 2005

Seabury, Christopher, Associate Professor
Veterinary Pathobiology
PHD, Texas A&M University, 2004

Seale, Nancy, Adjunct Professor
Pediatric Dentistry
DDS, Baylor College of Dentistry, 1970

Searcy, Stephen, Professor
Biological & Agricultural Eng
PHD, Oklahoma State University, 1980

Seelye, Stacie, Assistant Lecturer
Veterinary Pathobiology
DVM, Colorado State University, 2013

Seipp, Adam, Professor
History
PHD, University of North Carolina at Chapel Hill, 2005
Seipp, Leslie, Lecturer
Marketing
MBA, Rice University, 2008

Seitz, William, Regents Professor
Marine Science
PHD, University of Texas at Austin, 1973

Sekhposyan, Tatevik, Assistant Professor
Economics
PHD, University of North Carolina Chapel Hill, 2010

Sell, Jane, Professor
Sociology
PHD, Washington State University, 1979

Seminario, Jorge, Professor
Chemical Engineering
PHD, Southern Illinois University, 1987

Sen, Arun, Professor
Information & Operations Mgmt
PHD, Pennsylvania State University, 1979

Sen, Ravi, Associate Professor
Information & Operations Mgmt
PHD, University of Illinois at Urbana - Champaign, 2003

Senarat Dharmasena, Kalu, Instructional Assistant Professor
Agricultural Economics
PHD, Texas A&M University, 2010

Sengupta, Sinjini, Lecturer
Mathematics
MMA, Florida State University, 2006

Seo, Anna, Adjunct Assistant Professor
Pediatric Dentistry
MS, University of Toronto, 1996

Seo, Jinsil, Assistant Professor
Visualization
PHD, Simon Fraser University, 2011

Septiningsih, Endang, Assistant Professor
Soil & Crop Sciences
PHD, Cornell University, 2002

Serra, Gianvito, Lecturer
Visualization
BFA, Ringling College of Art and Design, 2001

Seymore, Malinda, Professor
School of Law
JD, Baylor University, 1986

Sezgin, Ergin, Professor
Physics And Astronomy
PHD, State University of New York at Stony Brook, 1980

Shackelford, Philip, Assistant Professor & Extension Specialist
Ag Leadership, Educ & Comm
PHD, Texas A&M University, 2014

Shafer, C, Professor
Recreation, Park & Tourism Sc
PHD, Clemson University, 1993

Shafer, Debra, Lecturer
Recreation, Park & Tourism Sc
MS, University of Utah, 1985

Shah, Dimpy, Lecturer
Epidemiology & Biostatistics
PHD, The University of Texas at Houston School of Public Health, 2014

Shakkottai, Srinivas, Associate Professor
Electrical & Computer Eng
PHD, University of Illinois, 2007

Shamberger, Kathryn, Assistant Professor
Oceanography
PHD, University of Washington, 2011

Shamberger, Patrick, Assistant Professor
Materials Science And Engineering
PHD, University of Washington, 2010

Shan, Libo, Associate Professor
Plant Pathology & Microbiology
PHD, Kansas State University, 2003

Shandley, Robert, Professor
International Studies
PHD, University of Minnesota, Twin Cities, 1996

Shankar, Venkatesh, Professor
Marketing
PHD, Northwestern University, 1995

Shannon, Joe, Adjunct Professor
School of Law
JD, The University of Texas School of Law, 1963

Shao, Lin, Associate Professor
Nuclear Engineering
PHD, University of Houston, 2001

Shapiro, Lee, Associate Professor
Surgery
PHD, State University of New York at Stony Brook, 2004

Sharif, Mustafa, Lecturer
Landscape Architecture & Urban Planning
PHD, Texas A&M University, College Station, 2015

Sharkey, Joseph, Professor
Hlth Promotion & Comm Hlth Sci
PHD, University of North Carolina - Chapel Hill, 2002

Sharma, Virender, Professor
Environmental And Occupational Health
PHD, University of Miami, 1989

Sharp, Nathan, Associate Professor
Accounting
PHD, University of Texas, 2007
Shatalov, Oksana, Instructional Assistant Professor
Mathematics
PHD, Technion - Israel Institute of Technology, 2001

Shaub, Michael, Clinical Professor
Accounting
PHD, Texas Tech University, 1983

Shaw, Brian, Associate Professor
Plant Pathology & Microbiology
PHD, Cornell University, 2000

Shaw, Gary, Professor Of The Practice
Engineering Student Serv & Academic Prog
BS, Texas A&M University, 1979

Shaw, Robert, Professor
Ecosystem Science & Mgmt
PHD, Texas A&M University, 1979

Shaw, Timothy, Lecturer
George Bush School of Govern
BA, Muskingum College, New Concord, Ohio, 1977

Shaw, William, Professor
Agricultural Economics
PHD, University of Colorado, 1985

Shea, Charles, Professor
Health & Kinesiology
PHD, Virginia Tech, 1978

Sheather, Simon, Professor
Statistics
PHD, La Trobe University, 1986

Sheldon, Matthew, Assistant Professor
Chemistry
PHD, University of California, Berkeley, 2010

Shell, Dylan, Associate Professor
Computer Science & Engineering
PHD, University of Southern California, 2008

Shen, Yang, Assistant Professor
Electrical & Computer Eng
PHD, Boston University, 2008

Sherman, Heather, Assistant Lecturer
Teaching, Learning And Culture
MS, Texas A&M University, 2012

Sherman, Ledric, Assistant Professor
Health & Kinesiology
PHD, Texas A&M University, 2013

Sherman, Michael, Professor
Statistics
PHD, University of North Carolina at Chapel Hill, 1992

Shetty, Bala, Professor
Information & Operations Mgmt
PHD, Southern Methodist University, 1985

Shetty, Bharathi, Lecturer
Management
MS, Texas A&M University, 2009

Shi, Wei Dong, Lecturer
International Studies Department
PHD, Beijing Normal University, 1999

Shi, Weiping, Professor
Electrical & Computer Eng
PHD, University of Illinois, 1992

Shields, Samantha, Assistant Lecturer
Teaching, Learning And Culture
MED, Texas A&M University, 1998

Shifrinson, Joshua, Assistant Professor
International Affairs
PhD, Massachusetts Institute of Technology, 2013

Shim, Won-Bo, Professor
Plant Pathology & Microbiology
PHD, Purdue University, 2000

Shinn, Jamie, Assistant Professor
Geography
PHD, The Pennsylvania State University, 2015

Shipley, Meagan, Clinical Assistant Professor
Health & Kinesiology
PHD, Indiana University, 2014

Shipman, Frank, Professor
Computer Science & Engineering
PHD, University of Colorado, 1993

Shippen, Dorothy, Professor
Biochemistry & Biophysics
PHD, University of Alabama at Birmingham, 1987

Shiralkar, Reena, Adjunct Assistant Professor
Pediatric Dentistry
MS, Texas A&M University Baylor College of Dentistry, 2006

Shiu, Anne, Assistant Professor
Mathematics
PHD, University of California at Berkeley, 2010

Short, Aric, Professor
School of Law
JD, University of Texas Law School, 1996

Shryock, Kristi, Instructional Associate Professor
Aerospace Engineering
PHD, Texas A&M University, 2011

Shukla, Keshawa, Professor Of The Practice
Engineering Student Serv & Academic Prog
PHD, Banaras Hindu University, 1979

Shumbera, Kristen, Assistant Lecturer
Teaching, Learning And Culture
MS, University of Florida, 2007
Sicilio, Mark, Clinical Assistant Professor
Humanities In Medicine
MD, Texas A&M University, 1981

Siebert, John, Professor
Agricultural Economics
PHD, University of California, Berkeley, 1978

Siefert, Thomas, Instructional Assistant Professor
International Studies Department
PHD, Harvard University, 2013

Siegele, Deborah, Associate Professor
Biology
PHD, University of Wisconsin - Madison, 1989

Sievert, Ronald, Senior Lecturer
International Affairs
JD, The University of Texas - Austin, 1977

Sigler, Dennis, Professor & Extension Specialist
Animal Science
PHD, Texas A&M University, 1981

Silva-Martinez, Jose, Professor
Electrical & Computer Eng
PHD, Katholieke Universiteit Leuven, 1992

Silvy, Nova, Regents Professor
Wildlife & Fisheries Sciences
PHD, Southern Illinois University, 1975

Simmons, Deborah, Professor
Educational Psychology
PHD, Purdue University, 1986

Simmons, Joe, Clinical Assistant Professor
General Dentistry
DDS, Baylor College of Dentistry, 1998

Simmons, Krystal, Clinical Associate Professor
Educational Psychology
PHD, Texas A&M University, 2009

Simon, Bradley, Clinical Assistant Professor
Vet Small Animal Clinical Sc
BS, University of Maryland, 2003

Simpson, Nancy, Clinical Professor
Business Undergraduate Special Programs
PHD, Texas A&M University, 1992

Singer, John, Associate Professor
Health & Kinesiology
MS, Ohio State University, 2002

Singh, Chanan, Professor
Electrical & Computer Eng
PHD, University of Saskatchewan, 1972

Singh, Vijay, Professor
Biological & Agricultural Eng
PHD, Colorado State University, 1974

Singleton, Daniel, Professor
Chemistry
PHD, University of Minnesota, 1986

Singleton, Julie, Clinical Assistant Professor
Teaching, Learning And Culture
PHD, Texas A&M University, 2011

Sinha, Samiran, Associate Professor
Statistics
PHD, University of Florida, 2004

Sink, Todd, Assistant Professor & Extension Specialist
Wildlife & Fisheries Sciences
PHD, University of Tennessee, 2004

Stitcheran, Raquel, Assistant Professor
Molecular & Cellular Medicine
PHD, University of California, San Francisco, 2000

Sivakumar, Natarajan, Associate Professor
Mathematics
PHD, University of Alberta, 1990

Skaggs, Chris, Professor
Animal Science
PHD, Iowa State University, 1992

Skare, Jon, Professor
Microbial Pathogenesis & Immuno
PHD, Washington State University, 1992

Skeie, David, Assistant Professor
Finance
PHD, Princeton, 2004

Skelton, Robert, Professor
Aerospace Engineering
PHD, University Of California-Los Angeles, 1976

Skoufranis, Paul, Visiting Assistant Professor
Mathematics
PHD, UCLA, Los Angeles, 2014

Skow, Loren, Professor
Vet Integrative Biosciences
PHD, Texas A&M University, 1976

Slagel, Kristin, Instructional Assistant Professor
Health & Kinesiology
MS, Texas A&M University, 2002

Slattery, Geor, Professor
Teaching, Learning And Culture
PHD, Louisiana State University, 1989

Slatton, Katie, Instructional Assistant Professor
Liberal Studies
MED, University of Montevallo, 2003

Silva, Catherine, Senior Lecturer
Petroleum Engineering
BS, Texas A&M University, 1980
Snyder, Douglas, Professor
Psychology
PHD, University of North Carolina at Chapel Hill, 1978

Snyder, Franklin, Professor
School of Law
LLM, Temple University Beasley School of Law, 1998

Sobol, Neil, Associate Professor
School of Law
JD, Southern Methodist University, 1988

Socolofsky, Scott, Professor
Civil Engineering
PHD, Massachusetts Inst of Technology, 2001

Sohrabji, Farida, Professor
Neuroscience & Experimental Therapeutics
PHD, University of Rochester, 1991

Sokolov, Alexei, Professor
Physics And Astronomy
PHD, Stanford University, 2001

Sokolowski, Andrzej, Lecturer
Teaching, Learning And Culture
PHD, Texas A&M University, 2013

Solomon, Eric, Research Professor
Public Health Sciences
DDS, University of Maryland at Baltimore, 1979

Solomon, Gary, Clinical Assistant Professor
Restorative Sciences
DDS, Baylor College of Dentistry, 1976

Son, Dong, Associate Professor
Chemistry
PHD, University of Texas at Austin, 2002

Sones, Amerian, Clinical Assistant Professor
General Dentistry
DMD, Tufts University, 1979

Song, Dezhen, Associate Professor
Computer Science & Engineering
PHD, University of California, Berkeley, 2004

Song, Hojun, Assistant Professor
Entomology
PHD, The Ohio State University Columbus, OH, 2006

Song, Xingyong, Assistant Professor
Engineering Technology & Industrial Dist
PHD, University of Minnesota, Twin Cities, 2011

Sonnenburg, Sunni, Assistant Lecturer
Teaching, Learning And Culture
MA, Dallas Theological Seminary, 2009

Sorescu, Alina, Associate Professor
Marketing
PHD, University of Houston, 2002

Sorescu, Sorin, Professor
Finance
PHD, University of Florida, 1996

Sorg, Joseph, Assistant Professor
Biology
PHD, University of Chicago, 2006

Sottile, Frank, Professor
Mathematics
PHD, University of Chicago, 1994

Sparks, David, Associate Professor
Geology & Geophysics
PHD, Brown University, 1992

Spears, Robert, Professor
Biomedical Sciences
PHD, Baylor College of Dentistry, 2002

Speer, Aline, Adjunct Assistant Professor
Restorative Sciences
MS, University of Texas Health Science Center at Houston, 2012

Spence, Alicia, Clinical Assistant Professor
College of Dentistry
DDS, Texas A&M University Baylor College of Dentistry, 2012

Spence, Joseph, Adjunct Professor
School of Law
JD, Baylor Law School, 1983

Spengler, John, Professor
Health Promotion & Comm Health Sci
PHD, Indiana University, 1999

Spiegelman, Clifford, Distinguished Professor
Statistics
PHD, Northwestern University, 1976

Sprintson, Alexander, Associate Professor
Electrical & Computer Eng
PHD, Israel Institute of Technology, 2003

Spurlock, Joe, Professor
School of Law
LLM, University of Virginia School of Law, 1992

Srinivasa, Arun, Professor
Mechanical Engineering
PHD, University of California, Berkeley, 1991

Srinivasan, Raghavan, Professor
Ecosystem Science & Mgmt
PHD, Purdue University, 1992

Sriskandarajah, Chelliah, Professor
Information & Operations Mgmt
PHD, L'Institut National Polytechnique de Grenoble, 1986

Srivastava, Ankit, Assistant Professor
Materials Science And Engineering
PHD, University of North Texas, 2013
St Clair, Katherine, Lab Instructor  
Marine Biology  
MS, Texas A&M University, 2014

Staack, David, Associate Professor  
Mechanical Engineering  
PHD, Drexel University, 2008

Stabile, Susan, Associate Professor  
English  
PHD, University of Delaware, 1997

Stagner, Brian, Clinical Professor  
Psychology  
PHD, University of Massachusetts Amherst, 1982

Stallone, John, Professor  
Vet Physiology & Pharmacology  
PHD, University of Arizona, 1984

Stanley, Christine, Professor  
Educ Admn & Human Resource Dev  
PHD, Texas A&M University, 1990

Stark, Gregory, Assistant Professor Of The Practice  
Biological & Agricultural Eng  
MS, University of Nebraska, 1986

Starks, Ernest, Professor  
History  
PHD, University of Houston, 1996

Starman, Terri, Professor  
Horticultural Sciences  
PHD, Texas A&M University, 1986

Starnes, Robin, Executive Professor  
Information & Operations Mgmt  
MA, Texas A&M University, 1981

Stasny, Mary, Senior Lecturer  
Accounting  
PHD, Texas A&M University, 2010

Stebbins, Richard, Lecturer  
Agricultural Economics  
JD, Texas Tech University, 2005

Stecher, Michael, Associate Professor  
Mathematics  
PHD, Indiana University, 1973

Steglich, Alan, Adjunct Assistant Professor  
Restorative Sciences  
DDS, Baylor College of Dentistry, 1986

Steichen, Jamie, Lecturer  
Marine Biology  
PHD, Texas A&M University, 2012

Steiner, Joerg, Professor  
Vet Small Animal Clinical Sc  
PHD, Texas A&M University, 2000

Stelly, David, Professor  
Soil & Crop Sciences  
PHD, University of Wisconsin - madison, 1983

Stephens, Marvin, Adjunct Assistant Professor  
Orthodontics  
MS, Baylor College of Dentistry, 1973

Stephenson, Michael, Professor  
Communication  
PHD, University of Kentucky, 1999

Stevens, Reid, Assistant Professor  
Agricultural Economics  
PHD, Univ of California-Berkeley, 2015

Stewart, Larry, Adjunct Assistant Professor  
Oral Surgery  
MS, The University of Texas Health Science Center at Houston, 1982

Stewart, Randolph, Clinical Professor  
Vet Physiology & Pharmacology  
BS, Texas A&M University, 1981

Stickney, Mark, Clinical Associate Professor  
Vet Small Animal Clinical Sc  
BS, Texas A&M University, 1993  
BS, Texas A&M University, 1994

Stillier, Peter, Professor  
Mathematics  
PHD, Princeton University, 1977

Stoescu, Livia, Instructional Assistant Professor  
Visualization  
PHD, Queen's University, 2010

Stoessel, Achim, Associate Professor  
Oceanography  
PHD, Universitat Hamburg, 1990

Stogdill, Patricia, Assistant Lecturer  
Teaching, Learning And Culture  
MED, University of Houston, 1989

Stoica, Gheorghe, Professor  
Veterinary Pathobiology  
PHD, Michigan State University, 1984

Stoleru, Radu, Associate Professor  
Computer Science & Engineering  
PHD, University of Virginia, 2007

Stooksberry, John, Clinical Assistant Professor  
General Dentistry  
DDS, Baylor College of Dentistry, 1998

Stough, Laura, Associate Professor  
Educational Psychology  
PHD, University of Texas, 1993

Stout Aguilar, Jacqueline, Clinical Assistant Professor  
College Of Nursing  
PHD, The University of Texas Medical Branch at Galveston, 2015
Straight, Paul, Associate Professor  
Biochemistry & Biophysics  
PHD, Colorado University, 2000

Stramaski, James, Instructor 
Humanities In Medicine  
PHD, Texas A&M University, 2015

Stranges, Anthony, Associate Professor  
History  
PHD, University of Wisconsin - madison, 1977

Straube, Emil, Professor  
Mathematics  
PHD, Swiss Federal Institute of Technology Zurich, 1983

Strawser, Jerry, Professor  
Accounting  
PHD, Texas A&M University, 1985

Strawser, Robert, Professor  
Accounting

Street, Nancy, Instructional Professor  
Communication  
MA, University of Texas, 1980

Street, Richard, Professor  
Communication  
PHD, Speech Communication, 1980

Strganac, Thomas, Professor  
Aerospace Engineering  
PHD, Virginia Tech, 1987

Strickland, Jack, Adjunct Professor  
School of Law  
JD, The University of Texas School of Law, 1971

Strigari, Louis, Assistant Professor  
Physics And Astronomy  
PHD, Ohio State University, 2014

Stringfellow, Joan, Associate Professor  
School of Law  
MLS, University of North Texas, 2002

Strohbeck, Karin, Associate Professor  
School of Law  
MLS, Texas Woman's University, Denton, 1989

Strong Jr, Robert, Assistant Professor  
Ag Leadership, Educ & Comm  
PHD, University of Florida, 2010

Strong, Jennifer, Assistant Professor  
Ag Leadership, Educ & Comm  
PHD, Oklahoma State University, 2007

Strong, Michelle, Instructional Assistant Professor  
Health & Kinesiology  
MFA, Case Western Reserve University, 2011

Stronza, Amanda, Associate Professor  
Recreation, Park & Tourism Sc  
PHD, University of Florida, 2000

Strouboulis, Theofanis, Professor  
Aerospace Engineering  
PHD, University of Texas - Austin, 1986

Stroustrup, Bjarne, Tees Distinguished Research Professor  
Computer Science & Engineering  
PHD, Cambridge University, 1979

Strzelec, Andrea, Assistant Professor  
Mechanical Engineering  
PHD, University of Wisconsin-Madison, 2009

Stuessy, Carol, Associate Professor  
Teaching, Learning And Culture  
PHD, The Ohio State University, 1984

Sturgeon, Sharron, Lecturer  
English Language Institute  
MA, University of Iowa, 2000

Su, Chin, Professor  
Electrical & Computer Eng  
PHD, Brandeis University, 1979

Su, Hung-Jue, Professor  
Materials Science And Engineering  
PHD, University of Michigan - Ann Arbor, 1988

Subbarao, Suhasini, Associate Professor  
Statistics  
PHD, University of Bristol, 1999

Suchodolski, Jan, Associate Professor  
Vet Small Animal Clinical Sc  
PHD, Texas A&M University, 2005

Sudderth, Bonnie, Adjunct Professor  
School of Law  
JD, The University of Texas School of Law, 1985

Suen, Ching-Yun, Professor  
Liberal Studies  
PHD, University of Houston, 1983

Suh, Chii-Der, Associate Professor  
Mechanical Engineering  
PHD, Texas A&M University, 1997

Sukhishvili, Svetlana, Professor  
Materials Science And Engineering  
PHD, Lomonosov Moscow State University, 1989

Sullivan, Harry, Adjunct Professor  
School of Law  
JD, Louisiana State Law School, 1976

Sullivan, Ronald, Lecturer  
Public Service &Administration  
BBA, Howard University, 1993

Wang, Jun, Assistant Professor
Neuroscience & Experimental Therapeutics
PHD, Shanghai Institutes for Biological Sciences, 1999
Wang, Jyhwen, Professor
Engineering Technology & Industrial Dist
PHD, Northwestern University, 1991

Wang, Kun, Visiting Assistant Professor
Mathematics
PHD, University of Puerto Rico, Rio Piedras, 2014

Wang, Lifan, Professor
Physics And Astronomy
PHD, University of Science and Technology of China, 1993

Wang, Ping, Assistant Professor
Maritime Administration
PHD, The Ohio State University, 2007

Wang, Qian, Associate Professor
Biomedical Sciences
PHD, Chinese Academy of Sciences, 1998

Wang, Shiren, Associate Professor
Industrial & Systems Eng
PHD, Florida State Univ., 2006

Wang, Suojin, Professor
Statistics
PHD, University of Texas at Austin, 1988

Wang, Wen-Yao, Associate Professor
Maritime Administration
PHD, Texas A&M University, 2008

Wang, Xiaofang, Research Assistant Professor
Biomedical Sciences
DDS, Fourth Military Medical University, China, 2003

Wang, Xiubin, Associate Professor
Civil Engineering
PHD, University of California, Irvine, 2001

Wang, Yen, Instructional Assistant Professor
Industrial & Systems Eng
DEN, Northwestern University, 1991

Wang, Yuxuan, Assistant Professor
Marine Science
PHD, Harvard University, 2005

Ward Ober, Elizabeth, Professor
Molecular & Cellular Medicine
PHD, University of Cambridge, 2015

Ward, Joseph, Professor
Mathematics
PHD, Indiana University, 1973

Ward, Ronald, Senior Lecturer
Computer Science & Engineering
PHD, Texas A&M University, 1973

Ward, Susan, Clinical Associate Professor
Health & Kinesiology
PHD, University of Virginia, 1990

Warden, Robert, Professor
Architecture
MAR, Texas A&M University, 1986

Wardle, William, Senior Associate Professor
Marine Biology
PHD, Texas A&M University, 1974

Ware, Michael, Adjunct Professor
School of Law
JD, University of Houston Law Center, 1983

Waren, Warren, Instructional Assistant Professor
Sociology
PHD, Texas A&M University, 2008

Warren, Gina, Associate Professor
School of Law
JD, Rutgers School of Law, 2004

Warren, Jesse, Lecturer
Liberal Studies
PHD, University of Houston - Clear Lake, 2005

Warren, Nancy, Professor
English
PHD, Indiana University, 1997

Washburn, Kevin, Professor
Vet Large Animal Clinical Sc
DVM, Oklahoma State University, 1993

Washburn, Shannon, Clinical Assistant Professor
Vet Physiology & Pharmacology
BS, Texas A&M University, 1990

Wasser, Jeremy, Associate Professor
Vet Physiology & Pharmacology
PHD, Indiana University, 1985

Watanabe, Coran, Associate Professor
Chemistry
PHD, John Hopkins University, 1988

Waters, Michael, Professor
Anthropology
PHD, The University of Arizona, 1980

Waterworth, Leonard, Executive Professor
Maritime Administration
MS, US Army War College, 2000

Watkins, Jeffrey, Professor
Vet Large Animal Clinical Sc
DVM, Kansas State University, 1980

Watson, Karan, Professor
Electrical & Computer Eng
PHD, Texas Tech University, 1982

Watson, Nancy, Clinical Associate Professor
Educ Admn & Human Resource Dev
PHD, Texas A&M University, 1998
Watson, Robert, Assistant Professor
Microbial Pathogenesis & Immune System
PhD, Yale University, 2006

Watson, Wesley, Lecturer
Ecosystem Science & Management
PhD, Texas A&M University, 1999

Watt, John, Clinical Associate Professor
Management
PhD, Kansas State University, 2002

Watts, Ashlee, Assistant Professor
Vet Large Animal Clinical Science
BS, Colorado State University, 1999

Watzak, Bree, Assistant Professor
College of Pharmacy
PhD, University of Houston College of Pharmacy, 2008

Waugh, Yuki, Instructional Assistant Professor
International Studies Department
PhD, University of Nebraska, 2006

Waxman, Hersholt, Professor
Teaching, Learning And Culture
PhD, University of Illinois at Chicago, 1982

Weaver, Constance, Professor
Accounting
PhD, Arizona State University, 1997

Webb, Debra, Lecturer
Agricultural Economics
MS, Texas A&M University, 1980
MS, Texas A&M University, 1986

Webb, Robert, Professor
Physics And Astronomy
PhD, Princeton University, 1972

Weijermars, Rudy, Professor
Petroleum Engineering
PhD, University of Uppsala, 1987

Welch, Ben, Clinical Professor
Management
PhD, Texas A&M University, 1990

Welch, George, Professor
Physics And Astronomy
PhD, Massachusetts Institute of Technology, 1989

Welch, James, Associate Professor & Extension Specialist
Agricultural Economics
PhD, Texas Tech University, 2006

Welch, Jennifer, Professor
Computer Science & Engineering
PhD, Massachusetts Institute of Technology, 1988

Wellman, Paul, Professor
Psychology
PhD, Iowa State University, 1980

Welsh, Christabel, Professor
Vet Integrative Biosciences
PhD, London University, 1981

Welsh, Thomas, Professor
Animal Science
PhD, North Carolina State University, 1980

Wen, Tim-Bor, Associate Professor
Mechanical Engineering
PhD, University of Pennsylvania, 2006

Wenzel, Theresa, Instructional Associate Professor
Health & Kinesiology
MED, Baylor University, 1992

Werner, Cynthia, Professor
Anthropology
PhD, Indiana University, 1997
Werner, Diana, Assistant Lecturer
Teaching, Learning And Culture
MA, Southwest Texas State University, 1990

Wesner, Kylene, Lecturer
Communication
MA, Indiana University Purdue University, 2007

Wesson, Liesl, Senior Lecturer
Management
MS, Texas A&M University, 1992

Wesson, Michael, Associate Professor
Management
PHD, Michigan State University, 2002

West, Jason, Associate Professor
Ecosystem Science & Mgmt
PHD, University of Georgia, 2002

West, Virginia, Lecturer
English Language Institute
MS, University of Pennsylvania, 1987

West, William, Professor
Public Service & Administration
PHD, Rice University, 1981

Westhusin, Mark, Professor
Vet Physiology & Pharmacology
PHD, Texas A&M University, 1986

Weston, Cynthia, Assistant Professor
College Of Nursing
DNP, University of Texas Health Science Center San Antoion, 2014

Weston, Jaye, Clinical Assistant Professor
College of Pharmacy
MS, University of Houston, 1983

Wheeler, Steven, Associate Professor
Chemistry
PHD, University of Georgia, 2006

Wherley, Benjamin, Assistant Professor
Soil & Crop Sciences
PHD, North Carolina State University, 2008

Whitcomb, Della, Senior Lecturer
Information & Operations Mgmt
MS, Texas A&M University, 1998

Whitcomb, John, Professor
Aerospace Engineering
PHD, Virginia Tech, 1988

White, Bobbie Ann, Adjunct Assistant Professor
Humanities In Medicine
MA, University of New Haven, 2003

White, Edward, Associate Professor
Aerospace Engineering
PHD, Arizona State University, 2000

White, Edward, Executive Professor
Finance
MBA, University of Hawaii, 1972

White, James, Senior Lecturer
Chemical Engineering
BA, Texas A&M University, 1978

White, Lowell, Lecturer
English
PHD, Texas A&M University, 2010

White, Richard, Professor
Soil & Crop Sciences
PHD, Virginia Tech, 1985

White, Robert, Clinical Assistant Professor
Endodontics
DMD, Tufts University, 1978

White-Corey, Shelley, Clinical Assistant Professor
College Of Nursing
MNU, University of Texas Health Science Center at Houston, 2011

Whiteacre, Matthew, Senior Lecturer
Engineering Student Serv & Academic Prog
MEN, Texas A&M University, 1984

Whitfield, Jennifer, Instructional Assistant Professor
Mathematics
MS, Texas A&M University, 2000

Whitfield-Cargile, Canaan, Assistant Professor
Vet Large Animal Clinical Sc
DVM, University of Georgia, 2006

Whitten, Gary, Clinical Associate Professor
George Bush School of Govern
PHD, Louisiana Tech University, 2004

Whitten, Gary, Clinical Associate Professor
Information & Operations Mgmt
PHD, Louisiana Tech University, 2004

Whitten, Guy, Professor
Political Science
PHD, University of Rochester, 1994

Wickersham, Tryon, Associate Professor
Animal Science
PHD, Kansas State University, 2006

Wickliff, Tanya, Professor Of The Practice
Engineering Student Serv & Academic Prog
PHD, Texas A&M University, 2005

Wicksten, Mary, Professor
Biology
PHD, University of Southern California, 1977

Wiederwohl, Christina, Instructional Assistant Professor
Oceanography
PHD, Texas A&M University, 2012
Wiese, Patricia, Clinical Associate Professor
Teaching, Learning And Culture
PHD, Texas A&M University, 2001

Wiggins, Steven, Professor
Economics
PHD, Massachusetts Institute of Technology, 1979

Wijekumar, Kausalai, Professor
Teaching, Learning And Culture
PHD, The Pennsylvania State University, 2000

Wijekumar, Vythilingam, Lecturer
Teaching, Learning And Culture
PHD, The Ohio State University, 1985

Wijesuriya, Uditha, Visiting Assistant Professor
Statistics
PHD, University of Texas at Dallas, 2015

Wilborn, David, Associate Professor
Performance Studies
PHD, University of Texas, 1994

Wilcox, Bradford, Professor
Ecosystem Science & Mgmt
PHD, Texas A&M University, 1986

Wilcox, Teresa, Professor
Psychology
PHD, The University of Arizona, 1993

Wildey, William, Adjunct Assistant Professor
Endodontics
DDS, Georgetown University, 1976

Wilhelm, Wilbert, Professor
Industrial & Systems Eng
PHD, Virginia Polytechnic Institute, 1972

Wilhite, Benjamin, Associate Professor
Chemical Engineering
PHD, University of Notre Dame, 2003

Wilkinson, Heather, Professor
Plant Pathology & Microbiology
PHD, Binghamton University, 1996

Willaert, Ann, Lecturer
English Language Institute
MA, Katholieke Universiteit Leuven, 1983

Willard, Michael, Professor
Vet Small Animal Clinical Sc
DVM, Texas A&M University, 1975

Willett, Donald, Professor
Liberal Studies
PHD, Texas A&M University, 1985

Willey, Harley, Lecturer
Engineering Technology & Industrial Dist
BS, Texas A&M University, 1978

Williams, Craig, Adjunct Associate Professor
Oral Surgery
DDS, Baylor College of Dentistry, 1972

Williams, Gary, Professor
Agricultural Economics
PHD, Purdue University, 1981

Williams, Kamala, Lecturer
Teaching, Learning And Culture
PHD, Texas A&M University, 2010

Williams, Sara, Lecturer
Liberal Studies
BS, Texas A&M University, 2000

Williams, Tiffany, Associate Professor
Computer Science & Engineering
PHD, University of Central Florida, 2000

Williams, Vanessa, Clinical Assistant Professor
Public Health Sciences
DDS, Meharry Medical College, 2007

Williamson, Kenneth, Associate Professor
Construction Science
PHD, University of Oklahoma, 1994

Williamson, Robert, Adjunct Assistant Professor
Pediatric Dentistry
MS, Ohio State University, 2007

Williamson, Vickie, Instructional Assistant Professor
Chemistry
MS, University of Oklahoma, 1992

Wilson, Victor, Professor
Educational Psychology
PHD, University of Colorado, 1973

Wilson, Christin, Lecturer
Chemical Engineering
PHD, The Ohio State University, 2012

Wilson, Courtney, Veterinary Resident
Vet Small Animal Clinical Sc
BS, University of Guelph, 2009

Wilson, Emily, Professor
Medical Physiology
PHD, Emory University, 1987

Wilson, Kelly, Associate Professor
Health & Kinesiology
PHD, Texas A&M University, 2004

Wilson, Lloyd, Professor
Entomology
PHD, University of California, Davis, 1977

Wilson, Phillip, Clinical Assistant Professor
General Dentistry
DDS, Baylor College of Dentistry, 1991
Wilson, Roy, Adjunct Assistant Professor
Oral Surgery
DDS, Baylor College of Dentistry, 1965

Wilson-Robles, Heather, Associate Professor
Vet Small Animal Clinical Sc
DVM, University of Tennessee, 2003

Winemiller, Kirk, Regents Professor
Wildlife & Fisheries Sciences
PHD, University of Texas, 1987

Winemiller, Leslie, Senior Lecturer
Biology
PHD, University of Texas at Austin, 1989

Wingenbach, Gary, Professor
Ag Leadership, Educ & Comm
PHD, Iowa State University, 1995

Winkel-Blair, Andrea, Veterinary Resident
Vet Small Animal Clinical Sc
MPH, Michigan State University, 2005

Winking, Jeffrey, Associate Professor
Anthropology
PHD, The University of New Mexico, 2005

Winkley, Shel, Visiting Lecturer
Atmospheric Sciences
BS, Texas A&M University, 2007

Winston, Vickie, Lecturer
English Language Institute
MS, University of Central Missouri, 2003

Winzer-Serhan, Ursula, Associate Professor
Neuroscience & Experimental Therapeutics
PHD, University of Bremen, Germany, 1989

Wiseman, Melissa, Visiting Lecturer
Maritime Administration
PHD, Texas Tech University, 1999

Withers, Michael, Assistant Professor
Management
MBA, Arizona State University, 2011

Witherspoon, Sarah, Professor
Mathematics
PHD, University of Chicago, 1994

Wolf, Joan, Associate Professor
Womens Studies
PHD, University of Chicago, 1997

Wolfe, Christopher, Professor
Accounting
PHD, Kent State University, 1984

Wolken, Lawrence, Senior Professor
Finance
PHD, Texas A&M University, 1972

Wollock, Jennifer, Professor
English
PHD, Harvard University, 1981

Woltinger, Steven, Assistant Professor
Educational Psychology
PHD, University of Toronto, 2012

Womack, James, Distinguished Professor
Veterinary Pathobiology
PHD, Oregon State University, 1968

Wong, Lolo, Adjunct Assistant Professor
Pediatric Dentistry
DDS, Creighton University, 1990

Woo, Ayoung, Lecturer
Landscape Architecture & Urban Planning
PHD, Texas A&M University, 2014

Wood, Amanda, Instructional Assistant Professor
Ocean Engineering
MS, University of Houston, 2010

Wood, Billy, Professor
Political Science
PHD, University of Houston, 1987

Wood, Carrissa, Veterinary Resident

- Jeanne Clery Disclosure of Campus Security Policy and Campus Crime Statistics Act (Clery Act) (p. 1060)
- Education Code - Hazing (p. 1060)

Rules and Regulations for Determining Residence Status

Determination of Residency for Tuition Purposes

In accordance with Texas Higher Education Coordinating Board Rules and pursuant to Texas Education Code, a student's status as a resident, nonresident or international (foreign) student for tuition purposes will be determined in the Office of Admissions prior to enrollment. Students must be prepared to pay tuition and other required fees by specified due dates.

Students with a status of permanent resident of the United States are not automatically eligible as a Texas state resident for tuition purposes.

Students who have knowledge of an error in their residency status for tuition purposes are responsible for notifying the Office of the Registrar which is available for download on the Office of the Registrar (http://registrar.tamu.edu) website in order to amend their status.

Questions should be directed to the Residency Officer at (979) 845-8606 or email residency@tamu.edu. Complete rules and regulations are available on the Texas Higher Education Coordinating Board website.

Texas Common Course Numbering System

The Texas Common Course Numbering System (TCCNS) has been designed for the purpose of aiding students in the transfer of general academic courses between colleges and universities throughout Texas. Common courses are freshman and sophomore academic credit courses that have been identified as common by institutions that are members of the common course numbering system. The system ensures that if the student takes the courses the receiving institution designates as common, then the courses will be accepted in transfer and the credit will be treated as if the courses had actually been taken on the receiving institution's campus.

The table below lists the courses Texas A&M University has identified as common and their TCCNS equivalents. Before using this table students should be sure that the institution they attend employs the TCCNS.

This table is revised quarterly in January, March, June, and September. The most recent version may be obtained from the Office of Admissions.

Family Educational Rights and Privacy Act

Texas A&M University informs students annually of the Family Educational Rights and Privacy Act. This Act, with which the University intends to comply fully, is intended to protect the privacy of education records, to establish the rights of students to inspect and review their education records and to provide guidelines for the correction of inaccurate or misleading data through informal and formal hearings. Students also have the right to file complaints with the Family Policy Compliance Office of the Department of Education in Washington, D.C. concerning alleged failures by the University to comply with the Act.

The Family Educational Rights and Privacy Act (FERPA) is a federal regulation that provides minimum standards for the management of student education records for universities receiving funds made available under any federal program administered by the U.S. Commissioner of Education. The Act provides, among other things, that an institution will maintain the confidentiality of student education records, and students will have the right to inspect their own education records.
This Policy is designed to meet FERPA provisions. Texas A&M University is committed to the good faith implementation of this Policy. Questions may be emailed to ferpa@tamu.edu.

If a student, the parent of a student, or any other individual has a complaint that an official of the University is violating FERPA, and the complaint cannot be satisfactorily resolved within the University, that person has the right to file a complaint with the Department of Education by contacting:

Family Policy Compliance Office
U.S. Department of Education
400 Maryland Ave., S.W.
Washington, D.C. 20202-5920

For the purposes of this Policy, Texas A&M University has used the following definitions of terms:

Student. Person who attends or has attended a program of instruction sponsored by Texas A&M University.

Education Records. Any records (in handwriting, print, tapes, film or other medium) maintained by the University, an employee of the University or agent of the University which is related to the student.

Directory Information. The following directory information may be made public unless the student desires to withhold any or all of this information: the student’s name, UIN (Universal Identification Number), local address, permanent address, email address, local telephone number, permanent telephone number, dates of attendance, program of study, classification, previous institution(s) attended, degrees received, honors and awards received, participation in officially recognized activities and sports, medical residence location (Health Science Center students), and medical residence specialization (Health Science Center students).

Currently enrolled students wishing to withhold any or all directory information items may do so by going to the My Record tab in the Howdy (https://howdy.tamu.edu) portal, clicking on “Withhold Directory Information” in the My Information channel and submitting a completed form.

Directory information may be released unless a Withhold Directory Information request is submitted by the student. The request remains in effect until the student revokes it or is deceased. Only currently enrolled students may request directory information be withheld.

Statement of Rights

Texas A&M University encourages students to exercise all of their rights under the Family Educational Rights and Privacy Act. Operating under the premise that the educational process is a cooperative venture between a student and the University, we emphasize the following rights of eligible students:

1. the right to inspect and review, with certain limited exceptions, the student’s educational records, including the right to receive explanations and interpretations of the records and to obtain copies of the records when such are needed to allow the student to effectively exercise his/her right of inspection and review;
2. the right to consent to disclosures of personally identifiable information contained in the student’s education records, except to the extent that FERPA authorizes disclosure without consent.

One exception which permits disclosure without consent is disclosure to school officials with legitimate educational interests. A school official is a person or entity: (a) employed by the university or the university system in an administrative, supervisory, academic or research, or support staff position; (b) serving on a university governing body or duly authorized panel or committee; or (c) employed by or under contract to the university to perform a special task, function, or service for the university.

A school official has a legitimate educational interest if the information requested is necessary for that official to (a) perform appropriate tasks that are specified in his/her position description or in the performance of regularly assigned duties by a lawful supervisor; (b) fulfill the terms of a contractual agreement; (c) perform a task related to a student’s education; (d) perform a task related to the discipline of a student; or (e) provide a service or benefit relating to the student or student’s family, such as health care, counseling, financial aid, job placement, or former student-related activities.

Disclosure to a school official having a legitimate educational interest does not constitute university authorization to transmit, share, or disclose any or all information received to third parties unless such disclosure is permitted or required by law.

3. the right to correct a student’s education records when the records are inaccurate, misleading or otherwise in violation of FERPA;
4. the right to report violations of FERPA to the Department of Education;
5. the right to be informed about FERPA rights.

All the rights and protections given students under FERPA belong to the student. However, information in student records may be provided to parents/legal guardians without the written consent of the student if the eligible student is a financial dependent of his or her parents/legal guardians as defined under Section 152 of the Internal Revenue Code of 1954.

Records Not Available for Information and Review

Students shall have access to all education records concerning them maintained by the University with the exception of the following:

1. A personal record kept by a university faculty or staff member which meets the following tests:
   a. It is in the personal possession of the individual who made it.
   b. Information contained in it has never been revealed or made available to any other person except the maker’s temporary substitute.
2. An employment record which is used in relation to a student’s employment by the University, except where an individual in attendance at the University is employed as a result of his or her status as a student.
3. Records relating to a student which are created or maintained by a physician, psychiatrist, psychologist or other recognized professional or para-professional acting in his or her professional or para-professional capacity or assisting in that capacity which are used in connection with the provision of treatment to a student and are not disclosed to anyone other than the individuals providing the treatment.
4. Financial records and statements of a student’s parents.
5. Confidential letters and statements of recommendation which were placed in the education records of a student prior to January 1, 1975.
6. Confidential letters and statements of recommendation which were placed in the education records of a student on or after January 1, 1975, if the student has waived his or her right to inspect and review the letters or statements.

7. Records concerning admissions to an academic component of the University which the student has never attended.

Any questions concerning FERPA should be directed to the Office of the Registrar.

International Agreements

In order to help internationalize the campus and create significant global opportunities for our students and faculty, Texas A&M University has active, formal agreements with foreign institutions as well as Reciprocal Educational Exchange Programs (REEP). For information regarding international partnerships visit the Global Partnership Services (http://globalsupport.tamu.edu) website or call Public Partnership & Outreach, Global Partnerships office at 979.845.3099. For updated information on global engagement please visit globalsupport.tamu.edu.

Oak Ridge Associated Universities (ORAU)

Since 1950, students and faculty of Texas A&M University have benefited from its membership in Oak Ridge Associated Universities (ORAU). ORAU
is a consortium of 101 colleges and universities and a contractor for the U.S. Department of Energy (DOE) located in Oak Ridge, Tennessee. ORAU works with its member institutions to help their students and faculty gain access to federal research facilities throughout the country; to keep its members informed about opportunities for fellowship, scholarship and research appointments; and to organize research alliances among its members.

Through the Oak Ridge Institute for Science and Education (ORISE), the DOE facility that ORAU operates, undergraduates, graduates, postgraduates, as well as faculty enjoy access to a multitude of opportunities for study and research. Students can participate in programs covering a wide variety of disciplines including business, Earth sciences, epidemiology, engineering, physics, geological sciences, pharmacology, ocean sciences, biomedical sciences, nuclear chemistry and mathematics. Appointment and program length range from one month to four years. Many of these programs are especially designed to increase the numbers of underrepresented minority students pursuing degrees in science- and engineering-related disciplines. A comprehensive listing of these programs and other opportunities, their disciplines, and details on locations and benefits can be found in the ORISE Catalog of Education and Training Programs, which is available at http://see.orau.org, or by calling the contact below.

ORAU’s Office of Partnership Development seeks opportunities for partnerships and alliances among ORAU’s members, private industry, and major federal facilities. Activities include faculty development programs, such as the Ralph E. Powe Junior Faculty Enhancement Awards, the Visiting Industrial Scholars Program, consortium research funding initiatives, faculty research and support programs as well as services to chief research officers.

For more information about ORAU and its programs, visit www.orau.org or contact:

Glen A. Laine
Vice President for Research
ORAU Councilor for Texas A&M University

Jeanne Clery Disclosure of Campus Security Policy and Campus Crime Statistics Act (Clery Act)

(Formerly Student Right to Know and Campus Security Act of 1990)

In compliance with federal law, the following information is maintained and available through the office listed below:

Campus Crime Statistics and Security Policies

An Annual Security Report is available that includes information on campus security policies and statistics. Security policies include: reporting crimes and emergencies, security resources, crime awareness and prevention, security of campus facilities and residence halls, alcohol, drug and weapon violations. The Annual Security Report can be found at this website (https://upd.tamu.edu/Current%20Disclosures/Annual%20Security %20Report.pdf). A paper copy is available upon request.

Higher Education Campus Fire Safety Standards and Measures

In compliance with federal law, the following information is maintained and available through Environmental Health and Safety as listed below.

Campus Fire Statistics and Fire Safety Policies

An annual campus housing fire safety report is available that includes information on fire safety systems and fire statistics for on-campus student housing facilities. The Annual Fire Safety Report on Student Housing is available at this website (https://ehsd.tamu.edu/Fire%20Life%20Safety %20Documents/Annual%20Fire%20Safety%20Report%20on%20Student %20Housing%20(1).pdf). A paper copy is available upon request at the address below.

Education Code - Hazing

Education Code § 51.936 requirement to publish a summary of Education Code Ch. 37, subchapter F. Hazing in the University Catalog

The following is a summary of Chapter 37, subchapter F. (§§ 37.151-157) of the Texas Education Code, which prohibits hazing in Texas public or private high schools. Texas Education Code §51.936 applies Ch. 37’s prohibition on hazing to institutions of higher education. This summary of Chapter 37 is provided as required by § 51.936(d).

Summary

Hazing is a criminal violation under Texas law. A person may be found guilty of criminal conduct for hazing, encouraging hazing, permitting hazing, or having knowledge of the planning of hazing incidents and failure to report in writing his/her knowledge to the Dean of Students.

Both failing to report hazing and hazing that does not result in serious bodily injury are Class B misdemeanors. Hazing that results in serious bodily injury is a Class A misdemeanor. Hazing resulting in a death is a state jail felony. An organization found guilty of hazing may be fined $5,000 to $10,000 or, for incidents causing personal injury or property damage, an amount double the loss or expenses incurred because of the hazing incident. It is not a defense to prosecution that the person hazed consented to the hazing activity.

Any person reporting a specific hazing incident to the Dean of Students or other appropriate institutional official is immune from civil and criminal liability unless the report is in bad faith or malicious.
The state law does not limit or affect an educational institution’s right to enforce its own penalties against hazing.

The Education Code defines hazing as “any intentional, knowing, or reckless act occurring on or off the campus of an educational institution, by one person or acting with others, directed against a student, that endangers the mental or physical health or safety of a student for the purpose of pledging, being initiated into, affiliating with, holding office in, or maintaining membership in an organization.” The statute contains a list of conduct which constitutes hazing.

In order to report suspected incidents of hazing, please contact either the Office of the Dean of Student Life at (979) 845-3111 or the Texas A&M University Police Department at (979) 845-2345. For information on how to report suspected incidents of hazing, go to http://stophazing.tamu.edu/report
