TEXAS A&M CATALOGS

Purpose of Catalogs

The Undergraduate and Graduate and Professional catalogs provide information about the academic programs of Texas A&M University to students, prospective students, faculty and staff of the University. Included is information concerning admissions, academic regulations and requirements, services available to students, academic offerings and a list of the administrative officers and faculty of the University. While every effort has been made to make this catalog as complete and accurate as possible, changes may occur at any time in requirements, deadlines, fees, curricula and courses listed in these catalogs.

Students should refer to Howdy, for course offerings in any given semester. For administrative reasons, because of insufficient enrollment or because of limited resources, any given course might not be offered in the announced semester.

This catalog was prepared in advance of its effective date; therefore, the course descriptions may vary from actual course content. The provisions of the catalogs do not constitute a contract, express or implied, between any applicant, student, faculty or staff member of Texas A&M University or The Texas A&M University System. These catalogs are for informational purposes only. The University reserves the right to change or alter any statement herein without prior notice. Neither catalog should be interpreted to allow a student who begins his or her education under either catalog to continue the program under the provisions in that catalog.

Accreditation

Texas A&M University is accredited by the Southern Association of Colleges and Schools Commission on Colleges at 1866 Southern Lane, Decatur, Georgia 30033-4097, 404-679-4501, to award degrees at the bachelors’, masters’, doctoral and professional levels.

College of Agriculture and Life Sciences

Agricultural Systems Management curriculum is recognized by the American Society of Agricultural and Biological Engineers (ASABE) (http://www.asabe.org).

Dietetic Program in Dietetics is accredited by the Commission on Accreditation for Dietetics Education (https://www.cdnet.org).

Forestry curriculum is accredited by the Society of American Foresters (SAF) (http://www.eforester.org).

Food Science and Technology curriculum is approved by the Institute of Food Technologists (IFT) (https://www.ift.org).

Forensics and Investigative Sciences program is accredited by the Forensic Science Education Programs Accreditation Commission (FEPAC) (http://fepac-edu.org).

Rangeland Ecology and Management curriculum is accredited by the Society for Range Management (SRM) (http://rangelands.org).

Recreation, Park and Tourism Sciences undergraduate curriculum is accredited by the National Recreation and Park Association (NRPA) (http://www.nrpa.org).

College of Architecture

Architecture program is accredited by the National Architectural Accrediting Board (NAAB) (http://www.naab.org).

Construction Science curriculum is accredited by the American Council for Construction Education (ACCE) (http://www.acce-hq.org).

Landscape Architecture curriculum is accredited by the Landscape Architectural Accreditation Board (LAAB) (https://www.asla.org/accreditationlaab.aspx).

Urban and Regional Planning curriculum is accredited by the Planning Accreditation Board (PAB) (http://www.planningaccreditationboard.org).

May College of Business

The baccalaureate and master’s curricula in Mays Business School are accredited by the Association to Advance Collegiate Schools of Business (AACSB) (http://www.aacsb.edu).

College of Dentistry

Dentistry degree program is accredited by the Commission on Dental Accreditation (CODA) (http://www.ada.org).

College of Education and Human Development

Programs in professional education and degrees conferred by Texas A&M University are approved by the State Board of Educator Certification and the Texas Education Agency for certification purposes and are fully accredited by the National Council for Accreditation of Teacher Education (TEA) (http://tea.texas.gov/About_TEA/Leadership/State_Board_for_Educator_Certification).

Counseling Psychology and School Psychology are accredited by the American Psychological Association (APA) (http://www.apa.org).

Athletic Training is accredited by the Commission on Accreditation of Athletic Training Education (CaATE) (http://caate.net).

College of Engineering

Undergraduate programs in Aerospace, Biological and Agricultural, Biological Systems, Biomedical, Chemical, Civil, Computer, Electrical, Industrial, Mechanical, Nuclear, Ocean, Petroleum and Radiological Health Engineering are accredited by the Engineering Accreditation Commission of ABET (http://main.abet.org/aps/Accreditedprogramsearch.aspx).

Electronic Systems Engineering Technology Program and the Manufacturing and Mechanical Engineering Technology Program are accredited by the Engineering Technology Accreditation Commission of ABET (http://main.abet.org/aps/Accreditedprogramsearch.aspx).

Computer Science Program is accredited by the Computing Accreditation Commission of ABET (http://main.abet.org/aps/Accreditedprogramsearch.aspx).

Bush School of Government and Public Service

The Master of Public Service and Administration degree in the Bush School of Government and Public Service is accredited by the Network of Schools of Public Policy, Affairs, and Administration (NASPAA) (https://accreditation.naspaa.org)
The School of Law
The curriculum in the School of Law is accredited by the American Bar Association (ABA) (http://www.americanbar.org/aba.html).

College of Liberal Arts
Clinical Psychology is accredited by the American Psychological Association (APA) (http://www.apa.org).

The English Language Institute is accredited by the Commission on English Language Program Accreditation (CEA) (http://cea-accredit.org).

College of Medicine
Medical Education degree program is accredited by the Liaison Committee on Medical Education (LCME) (http://lcme.org).

College of Nursing
Nursing degree program is accredited by the Commission on Collegiate Nursing Education (CCNE) (http://www.aacn.nche.edu).

Irma Lerma Rangel College of Pharmacology
The curriculum in the Irma Lerma Rangel College of Pharmacy is accredited by the Accreditation Council for Pharmacy Education (ACPE). (https://www.acpe-accredit.org)

School of Public Health
Public Health degree program is accredited by the Council on Education for Public Health (CEPH) (https://ceph.org).

College of Veterinary Medicine and Biomedical Sciences
Veterinary Medicine degree program is accredited by the American Veterinary Medical Association Council on Education (AVMA) (https://www.avma.org/Pages/home.aspx).

Other accrediting agencies which have approved programs offered at the University: American Chemical Society (ACS) (https://www.acs.org/content/acs/en.html).

Texas A&M University at Galveston
Offshore and Coastal Systems Engineering is accredited by the Engineering Accreditation Commission of ABET (http://main.abet.org/aps/Accreditedprogramsearch.aspx).

Marine Engineering Technology is accredited by the Engineering Technology Accreditation Commission of ABET (http://main.abet.org/aps/Accreditedprogramsearch.aspx).
UNDERGRADUATE CATALOG

The Texas A&M University Undergraduate Catalog, published annually, provides information about the undergraduate programs of Texas A&M University to students, prospective students, and faculty and staff of the University. Included is information concerning requirements for admission, services available to students, course offerings and listings of the administrative officers.

Publication

Publication Statement

The Texas A&M University Undergraduate Catalog is published each spring and the provisions for this volume are applicable during the 2017-2018 academic year. A student who registers for the first time at the University during a summer session is subject to the degree requirements set forth in the catalog effective for the fall semester immediately following his or her initial enrollment.

Texas A&M University Undergraduate Catalog, Edition 140, is published online by the Office of the Registrar, Texas A&M University, College Station, Texas 77843-0200

2017 Fall Semester

Date Event

August 12 Commencement.
August 14 Final grades for 10-week semester due in Office of the Registrar, noon.

Grades will be available for viewing in Howdy after 5 p.m.

2018 Spring Semester

Date Event

January 3 Graduation application opens for all students planning to graduate in May 2018.
January 12 Last day to register for spring semester classes, 5 p.m.

Refer to http://finance.tamu.edu/sbs for tuition and fee due dates.

January 15 Martin Luther King Jr. Day. Faculty and Staff holiday.
January 17* First day of spring semester classes.

January 23* Last day for adding/dropping courses for the spring semester, 5 p.m.
January 24* Galveston Campus Only: Last day for adding/dropping courses for the spring semester.

February 1* Spring official census date.
February 16 Last day to apply for degrees to be awarded in May without a late fee.

March 5 Mid-semester grades due to Office of the Registrar, noon.
March 12-16 Spring Break.
March 14-16 Faculty and Staff holiday.
March 30 Reading day, no classes. Does not apply to programs offered by the College of Nursing.

April 5-20 Preregistration for 2018 Summer I term, Summer II term, 10-week summer semester and fall semester.
April 17 Last day for all students to drop courses with no penalty (Q-drop), 5 p.m.

Last day to change Kinesiology 198/199 grade type for Spring 2018, 5 p.m.
March 5 Mid-semester grades due to Office of the Registrar, noon.
March 12-16 Spring Break.
March 14-16 Faculty and Staff holiday.
March 30 Reading day, no classes. Does not apply to programs offered by the College of Nursing.

April 5-20 Preregistration for 2018 Summer I term, Summer II term, 10-week summer semester and fall semester.
April 17 Last day for all students to drop courses with no penalty (Q-drop), 5 p.m.

Last day to change Kinesiology 198/199 grade type for Spring 2018, 5 p.m.
April 21 Muster. Campus ceremony.
April 30 Pursuant to Student Rule 8.3, no regular course examinations (except for laboratory and one-hour courses) shall be given during the 15th week of classes.

May 1 Last day of spring semester classes. Pursuant to Student Rule 8.3, no regular course examinations (except for laboratory and one-hour courses) shall be given during the 15th week of classes.

Last day to apply for all degrees to be awarded in May.
Redefined day, students attend their Friday classes. Does not apply to programs offered by the College of Nursing. Pursuant to Student Rule 8.3, no regular course examinations (except for laboratory and one-hour courses) shall be given during the 15th week of classes.

History and Development

Mission Statement

Texas A&M University (Texas A&M) is dedicated to the discovery, development, communication and application of knowledge in a wide range of academic and professional fields. Its mission of providing the highest quality undergraduate and graduate programs is inseparable from its mission of developing new understandings through research and creativity. It prepares students to assume roles in leadership, responsibility and service to society. Texas A&M assumes as its historic trust the maintenance of freedom of inquiry and an intellectual environment nurturing the human mind and spirit. It welcomes and seeks to serve persons of all racial, ethnic and geographic groups, women and men alike, as it addresses the needs of an increasingly diverse population and a global economy. In the twenty-first century, Texas A&M University seeks to assume a place of preeminence among public universities while respecting its history and traditions.

History and Development

Texas A&M University, the state’s first public institution of higher education, opened for classes in 1876. It is now one of a select few institutions in the nation to hold land grant, sea grant and space grant designations. It is also one of the few universities to host a presidential library. The George Bush Presidential Library and Museum opened in 1997 on a 90-acre tract of land on the west side of campus. The University owes its origin to the Morrill Act approved by the Congress on July 2, 1862. This act provided for donation of public land to the states. The land was to be sold at auction, and the proceeds were set aside in a perpetual fund. The act directed that interest from this fund be used to support a college whose “leading object shall be, without excluding other scientific and classical studies, and including military tactics, to teach such branches of learning as are related to agriculture and mechanic arts... in order to promote the liberal and practical education of the industrial classes in the several pursuits and professions in life.”

By resolution of the Legislature of the State of Texas in November 1866, Texas agreed to provide for a college under the terms of the Morrill Act, but no such institution was organized until the establishment of the Agricultural and Mechanical College of Texas by act of the Twelfth Texas Legislature on April 17, 1871. The same act appropriated $75,000 for the erection of buildings and bound the state to defray all expenses of the college exceeding the annual interest from the endowment. Proceeds from the sale of the 180,000 acres of land scrip received under the Land Grant College Act were invested in $174,000 of gold frontier defense bonds to Texas, forming a perpetual endowment for the institution. A commission created to locate the institution accepted the offer of 2,416 acres of land from the citizens of Brazos County in 1871, and instruction began in 1876.
As the State of Texas grew, so did its land grant institution. Texas A&M now has a physical plant valued at more than $1 billion. The campus in College Station includes 5,200 acres and is one of the largest campuses of any major institution of higher education in the nation. The University also operates branch campuses at Galveston and Doha, Qatar, with the latter operating at no expense to the State of Texas. Additionally, the University operates the Soltis Center for Research and Education in San Isidro de Peñas Blancas, Costa Rica. The University also supports global activities for students at the Santa Chiara Study Center in Castiglion Fiorentino, Arezzo, Italy, and maintains an office in Mexico City.

In keeping with the diversified and expanded character of the institution, the 58th Legislature of Texas, on August 23, 1963, changed the name of the Agricultural and Mechanical College of Texas to Texas A&M University.

On September 17, 1971, the designation “sea grant college” was assigned to Texas A&M University in recognition of its achievements in oceanographic and marine resources development. Texas A&M was one of the first four institutions nationwide to achieve this distinction. Patterned after the century-old land grant idea, sea grant colleges are federal-state partnerships for furthering marine work through practical research, education and advisory services. The designation clearly establishes the University’s leadership relative to marine affairs of the state.

Texas A&M added a third special designation to its credentials on August 31, 1989, when it was named a “space grant college.” This new designation, bestowed by the National Aeronautics and Space Administration, came to the University based on its continuing commitment to space research and its participation in the Texas Space Grant Consortium, a group of 35 institutions that includes universities, industrial organizations, non-profit organizations and government agencies within Texas under the leadership of Texas A&M University, the University of Texas at Austin and the University of Houston.

In addition to its traditional strengths in agriculture and engineering, Texas A&M has established itself as a leader in such newer technological areas as the space, nuclear, computer, biotechnological, oceanographic and marine resources fields. It also has placed added emphasis on the arts and sciences and business and continues to enhance its prominent role in these fields.

A mandatory military component was a part of the Land Grant designation until the 1950s, and the Corps of Cadets has played an important part in the history and development of Texas A&M. Even though membership in the Corps of Cadets became voluntary in 1965, Texas A&M historically has produced more officers than any other institution in the nation with the exception of the service academies. The University is one of only three institutions with a full-time corps of cadets including ROTC programs leading to commissions in all branches of service — Army, Air Force, Navy, Marine Corps and Coast Guard.

Texas A&M offers a variety of programs in both undergraduate and graduate studies through its academic colleges and schools supported by the Texas A&M University Libraries — Agriculture and Life Sciences, Architecture, The Bush School of Government and Public Service, Mays Business School, Education and Human Development, College of Engineering, Geosciences, Liberal Arts, Science, and Veterinary Medicine and Biomedical Sciences. Texas A&M University Galveston campus is the marine and maritime branch campus of Texas A&M University, and Texas A&M University Qatar campus offers degrees in engineering. In addition, Texas A&M’s extensive research efforts in all fields, in conjunction with agricultural and engineering experiment stations, resulted in annual expenditures of approximately $630 million in 2009, which consistently rank in the top tier of research institutions by the National Science Foundation.

Classified by the Carnegie Foundation as a Research University (very high research activity), Texas A&M embraces its mission of the advancement of knowledge and human achievement in all its dimensions. The research mission is a key to advancing economic development in both public and private sectors. Integration of research with teaching prepares students to compete in a knowledge-based society and to continue developing their own creativity, learning, and skills beyond graduation.

In 2001, Texas A&M University was admitted to the Association of American Universities (AAU), the prestigious organization founded in 1900 that restricts its ranks to the nation’s premier public and private institutions of higher learning. In 2004, the Kappa of Texas Chapter of Phi Beta Kappa was installed at Texas A&M University.

University Core Curriculum

The Texas A&M Core Curriculum, in compliance with the Texas Core Curriculum, provides students with a foundation of knowledge of human cultures and the physical and natural world, develops principles of personal and social responsibility for living in a diverse world, and advances intellectual and practical skills that are essential for all learning. The Core Curriculum enhances the individual degree program and university graduation requirements, and all three areas must be met by every student.

Given the rapid evolution of necessary knowledge and skills and the need to take into account global, national, state, and local cultures, the core curriculum ensures that students will develop the essential knowledge and skills they need to be successful in college, in a career, in their communities, and in life. The core curriculum acts to enrich and broaden the University’s tradition of providing thorough preparation in each student’s academic major and preparing students for a lifetime of learning.

The University Core Curriculum requirements are described in the section that follows. These requirements must be met by every student entering Texas A&M University on or after the 2014 fall semester. Students entering earlier will be guided by the core curriculum in the catalog upon which they entered the university. Individual degree programs may require that specific courses from the core curriculum be used to satisfy core curriculum requirements. Please check with individual program advisors for details. Students transferring course credit to satisfy the Core Curriculum requirements should refer to the Texas Common Course Numbering System (p. 1115).

The core curriculum focuses on the development of six skills that have been shown to be effective in preparing students for the job market and their role in a diverse world and democratic society.

- **Critical Thinking Skills** — to include creative thinking, innovation, inquiry, and analysis, evaluation and synthesis of information.
- **Communication Skills** — to include effective development, interpretation and expression of ideas through written, oral and visual communication.
- **Empirical and Quantitative Skills** — to include the manipulation and analysis of numerical data or observable facts resulting in informed conclusions.
• **Teamwork** – to include the ability to consider different points of view and to work effectively with others to support a shared purpose or goal.

• **Personal Responsibility** – to include the ability to connect choices, actions and consequences to ethical decision-making.

• **Social Responsibility** – to include intercultural competence, knowledge of civic responsibility, and the ability to engage effectively in regional, national, and global communities.

Students develop and practice these skills in the context of 42 semester credit hours assigned to eight Foundational Component Areas, each made up of a selection of courses that meet the definition provided by the Texas Core Curriculum. For additional information, please reference http://core.tamu.edu.

### Communication - 6 SCH

Courses in this category focus on developing ideas and expressing them clearly, considering the effective of the message, fostering understanding, and building the skills needed to communicate persuasively. Courses involve the command of oral, aural, written, and visual literacy skills that enable people to exchange messages appropriate to the subject, occasion, and audience. The following skills will be addressed in the courses that comprise this area: critical thinking, communication, team work, and personal responsibility.

PHIL 240  Introduction to Logic  3

Courses in this category focus on quantitative literacy in logic, patterns, and relationships. Courses involve the understanding of key mathematical concepts and the application of appropriate quantitative tools to everyday experiences. The following skills will be addressed in the courses that comprise this area: critical thinking, communication, and empirical and quantitative.

Student Learning Outcomes

Student learning outcomes articulate the knowledge and skills we expect students to gain during their educational experiences. These learning outcomes ask students to connect their course- and degree-level learning to overall goals determined to be critically important to a university’s graduates as they make their way in the world after graduation and prepared to engage in learning for a lifetime.

First and foremost, of course, we expect students to have learned the material presented in their individual courses. From entry-level general education courses required of all undergraduates to capstone courses restricted to seniors in a major to specialized graduate seminars, by the time of graduation students are expected to have learned the material assigned in all of their courses. We call this “content knowledge.”

The broader institutional student learning outcomes ask students to connect the pieces of their education into a whole that synthesizes what they have learned. Students graduate not only knowing facts and understanding basic concepts but also demonstrating an ability to apply and explain those facts and concepts creatively in new situations. Students gain the skills and knowledge that allows them to thrive in a complex world.

Baccalaureate

A student who graduates from Texas A&M University with a baccalaureate degree will have acquired the knowledge and skills necessary to:

Master the depth of knowledge required for a degree, including the ability to:

- Articulate disciplinary and interdisciplinary theories, concepts, principles, skills, and practices;
- Synthesize knowledge across courses and other experiences; and
• Apply knowledge from core curriculum courses, discipline-based courses, and other experiences in a range of contexts to solve problems and make decisions.

Demonstrate critical thinking, including the ability to:

• Evaluate, analyze, and integrate information from a variety of sources;
• Use appropriate strategies and tools to represent, analyze, and integrate information; and
• Develop critical, reasoned positions.

Communicate effectively, including the ability to:

• Demonstrate effective oral communication skills (which could include the use of languages such as American Sign language for those who do not communicate orally);
• Demonstrate effective writing skills;
• Demonstrate effective nonverbal communication skills (which could include appropriate use of performance, design, or representations such as maps, tables, and graphs);
• Listen actively and critically;
• Present work effectively to a range of audiences; and
• Effectively communicate original and creative ideas.

Practice personal and social responsibility, including the ability to:

• Practice ethical leadership;
• Recognize an ethical dilemma and apply rational decision-making in order to address it;
• Choose ethical courses of action in research and practice;
• Acknowledge and address the consequences of one’s own actions; and
• Engage in local and global civic activities.

Demonstrate social, cultural, and global competence, including the ability to:

• Live and work effectively in a diverse and global society;
• Articulate the value of a diverse and global perspective; and
• Recognize diverse economic, political, cultural, and religious opinions and practices.

Prepare to engage in lifelong learning, including the ability to:

• Exhibit the skills necessary to acquire, organize, reorganize, and interpret new knowledge;
• Show proficiency in current technologies and the ability to adapt to emerging technologies;
• Recognize and participate in activities that enhance wellness of body, mind, and spirit;
• Formulate a plan of personal goals for continued professional growth; and
• Demonstrate intellectual curiosity.

Work collaboratively, including the ability to:

• Participate effectively in teams;
• Consider different points of view; and
• Work with others to support a shared purpose or goal.

Degree Information

Which Catalog to Follow

In meeting the requirements for a baccalaureate degree, a student is expected to complete the course and hour requirements as outlined in the catalog in effect at the time he or she first enrolls at Texas A&M. Normally, a student will not be granted a degree based upon completion of the requirements set forth in a catalog more than seven years old. Before changing catalogs, the student must consult his or her academic advisor. A student changes catalogs by filing a written notification with his or her dean, or designee. It is incumbent on the student to verify that the change has been made. Texas A&M University Student Rules (including periodic revisions) is the governing document in case of conflict between this catalog and Texas A&M University Student Rules. It is the responsibility of the individual student to read this information carefully and to use it as a reference. Please refer to the Student Rules for this information.

Whereas each college must retain the flexibility to improve its curriculum, course offerings may be changed during the student’s education. If a course required under a previous catalog is no longer offered, a student eligible to graduate according to that catalog should consult his or her academic advisor or dean to identify another course that may be used to fulfill the requirement. Course adjustments in the degree program are permitted only with the approval of the dean through the department head or program director. Furthermore, the University reserves the right to make any changes in requirements it may consider necessary and desirable by due notice in the catalog.

Students are required to take the courses listed in a curriculum; however, the display of a curriculum does not in any way indicate the length of time required to finish degree requirements. Rather, this display is intended as a guide to indicate the preferred order for completion of degree requirements. Exceptions to certain requirements may be petitioned through the department head to the dean of the college.

Degrees Offered

The following degrees are offered for the satisfactory completion of resident study in the appropriate curriculum:

• Bachelor of Arts (BA)
• Bachelor of Business Administration (BBA)
• Bachelor of Environmental Design (BED)
• Bachelor of Landscape Architecture (BLA)
• Bachelor of Science (BS)
• Bachelor of Science in Nursing (BSN)
• Master of Agribusiness (MAB)
• Master of Agriculture (MAGR)
• Master of Architecture (MARCH)
• Master of Arts (MA)
• Master of Biotechnology (MBIOT)
• Master of Business Administration (MBA)
• Master of Computer Science (MCS)
• Master of Education (MED)
• Master of Engineering (MENGR)
• Master of Engineering Technical Management (METM)
• Master of Equine Industry Management (MEIM)
• Master of Financial Management (MFM)
must:

1. To be a candidate for a degree at the end of the semester, a student
   must:
   a. Be enrolled in or have completed all degree requirements by the
      60th class day of the fall or spring semester, or the 15th class day
      of the second summer term either in residence or at another college
      or university. Proof of enrollment in any courses taken at another
      college or university must be provided to the Office of the Registrar,
      Degree Audit, by the above deadlines. A student must be enrolled in
      his or her degree-granting college(s) and major(s) at the beginning
      of the student’s last semester at Texas A&M to be a candidate for a
      degree from that college.
   b. Complete a minimum of 120 credit hours.
   c. Complete, with at least a 2.0 grade point average, all undergraduate
      coursework attempted at Texas A&M University.
   d. Complete, with a 2.0 grade point average, all courses included in the
      major field of study.
   e. Meet the Residence Requirement. A minimum of 36 semester hours
      of 300- and/or 400-level coursework must be successfully completed
      in residence at Texas A&M to obtain a baccalaureate degree. A
      minimum of 12 of these 36 semester hours must be in the major.
      A student participating in Texas A&M University off-campus study
      programs approved by the student’s college may apply upper division
      credits earned in the programs toward the residence requirement up
      to a maximum of 18 semester hours, including hours transferred from
      another institution as part of one of these programs. These Texas
      A&M University off-campus study programs may involve domestic or
      international institutions and may be taught by Texas A&M University
      faculty or faculty from other institutions. Students choosing to
      participate in such programs and wishing to apply credits earned
      from the programs toward the residence requirement must receive
      college approval prior to the student’s participation in the off-campus
      study program. Students participating in international programs
      must contact the Study Abroad Programs Office for details on how to
      obtain approval for courses taken outside the United States. Students
      participating in domestic off-campus programs must contact the
      dean’s office of their college for approval procedures.
   f. Complete the University Core Curriculum. Core Curriculum courses
      are listed on the University Core Curriculum (p. 21) page. For
      additional information, please reference http://core.tamu.edu.
   g. Complete the citizenship requirement, which includes at least
      6 credit hours in government/political science and at least 6
      credit hours in American history. American National Government
      (POLS 206) and State and Local Government (POLS 207) fulfill the
      government/political science requirement.
      a. Both the government/political science and American history
         requirements may be met, in whole or in part, by equivalent
         coursework satisfactorily completed at another accredited
         college or university.
      b. State law permits the substitution of 3 hours of history
         and 3 hours of government/political science for a student
         in the program of an approved senior ROTC unit. With the
         approval of the dean of the appropriate college, students
         successfully completing the required 12 hours of upper-level
         ROTC courses will be deemed to have completed the equivalent
         of POLS 206 or POLS 207 plus HIST 105 or HIST 106 (or another
         appropriate course) for a total of 6 hours.
      c. Students pursuing teacher certification are not allowed to
         substitute ROTC credits for this requirement.

Requirements for a Baccalaureate Degree

To be a candidate for a degree at the end of the semester, a student
must:

1. Be enrolled in or have completed all degree requirements by the
   60th class day of the fall or spring semester, or the 15th class day
   of the second summer term either in residence or at another college
   or university. Proof of enrollment in any courses taken at another
   college or university must be provided to the Office of the Registrar,
   Degree Audit, by the above deadlines. A student must be enrolled in
   his or her degree-granting college(s) and major(s) at the beginning
   of the student’s last semester at Texas A&M to be a candidate for a
   degree from that college.

2. Complete a minimum of 120 credit hours.
3. Complete, with at least a 2.0 grade point average, all undergraduate
   coursework attempted at Texas A&M University.
4. Complete, with a 2.0 grade point average, all courses included in the
   major field of study.
5. Meet the Residence Requirement. A minimum of 36 semester hours
   of 300- and/or 400-level coursework must be successfully completed
   in residence at Texas A&M to obtain a baccalaureate degree. A
   minimum of 12 of these 36 semester hours must be in the major.
   A student participating in Texas A&M University off-campus study
   programs approved by the student’s college may apply upper division
   credits earned in the programs toward the residence requirement up
   to a maximum of 18 semester hours, including hours transferred from
   another institution as part of one of these programs. These Texas
   A&M University off-campus study programs may involve domestic or
   international institutions and may be taught by Texas A&M University
   faculty or faculty from other institutions. Students choosing to
   participate in such programs and wishing to apply credits earned
   from the programs toward the residence requirement must receive
   college approval prior to the student’s participation in the off-campus
   study program. Students participating in international programs
   must contact the Study Abroad Programs Office for details on how to
   obtain approval for courses taken outside the United States. Students
   participating in domestic off-campus programs must contact the
   dean’s office of their college for approval procedures.
6. Complete the University Core Curriculum. Core Curriculum courses
   are listed on the University Core Curriculum (p. 21) page. For
   additional information, please reference http://core.tamu.edu.
7. Complete the citizenship requirement, which includes at least
   6 credit hours in government/political science and at least 6
   credit hours in American history. American National Government
   (POLS 206) and State and Local Government (POLS 207) fulfill the
   government/political science requirement.
   a. Both the government/political science and American history
      requirements may be met, in whole or in part, by equivalent
      coursework satisfactorily completed at another accredited
      college or university.
   b. State law permits the substitution of 3 hours of history
      and 3 hours of government/political science for a student
      in the program of an approved senior ROTC unit. With the
      approval of the dean of the appropriate college, students
      successfully completing the required 12 hours of upper-level
      ROTC courses will be deemed to have completed the equivalent
      of POLS 206 or POLS 207 plus HIST 105 or HIST 106 (or another
      appropriate course) for a total of 6 hours.
   c. Students pursuing teacher certification are not allowed to
      substitute ROTC credits for this requirement.
8. Complete the Foreign Language requirement. A minimum of one year
   of foreign language is required for all baccalaureate degree programs
   at Texas A&M. For many programs, this degree requirement can be
   satisfied by the satisfactory completion of two units of the same
   foreign language at the high school level or one year of the same
   language at the college level.
   a. International students whose native language is not English
      are exempted from satisfying the university foreign language
      requirement. These students may not register for the beginning
      and intermediate level courses in their native language (course
      numbers 101, 102, 201, and 202) which are used to fulfill the
      foreign language requirement.

Texas A&M diploma or other academic record is prohibited by state law.
A person who violates this statute or who aids another person in violation
is guilty of a misdemeanor and is subject to a fine and/or confinement if
convicted.

The University has the right to rescind a previously granted degree if the
University becomes aware of information indicating that the degree never
should have been granted.

- Master of Fine Arts (MFA)
- Master of Geoscience (MGSC)
- Master of Health Administration (MHA)
- Master of Industrial Distribution (MID)
- Master of International Affairs (MIA)
- Master of Jurisprudence (MJUR)
- Master of Land and Property Development (MLPD)
- Master of Landscape Architecture (MLA)
- Master of Laws (LLM)
- Master of Marine Resources Management (MMRM)
- Master of Maritime Administration and Logistics (MMAL)
- Master of Natural Resources Development (MNRD)
- Master of Ocean Science and Technology (MOST)
- Master of Public Health (MPH)
- Master of Public Service and Administration (MPSA)
- Master of Real Estate (MRE)
- Master of Recreation and Resources Development (MRRD)
- Master of Science (MS)
- Master of Science in Nursing (MSN)
- Master of Science in Public Health (MSPH)
- Master of Urban Planning (MUP)
- Master of Water Management and Hydrological Science (MWM)
- Master of Wildlife Science (MWSC)
- Doctor of Dental Surgery (DDS)
- Doctor of Education (EdD)
- Doctor of Engineering (DEng)
- Doctor of Medicine (MD)
- Doctor of Pharmacy (PharmD)
- Doctor of Philosophy (PhD)
- Doctor of Public Health (DrPH)
- Doctor of Veterinary Medicine (DVM)
- Juris Doctor (JD)

The buying, selling, creating, duplicating, altering, giving or obtaining the
Texas A&M diploma or other academic record is prohibited by state law.
A person who violates this statute or who aids another person in violation
is guilty of a misdemeanor and is subject to a fine and/or confinement if
convicted.
b. Many Bachelor of Arts degrees require at least 6 additional semester credit hours of foreign language at the 200-level. Students should consult with an academic advisor about specific language requirements for their degree program.

c. Students who wish to demonstrate foreign language proficiency without taking acceptable high school or college courses may do so through the existing credit by examination process. In cases where students wish to demonstrate proficiency in a language not taught at Texas A&M, the following procedures shall apply. The student shall request an examination from the Head of the Department of Hispanic Studies or the Head of the Department of International Studies. This department will coordinate the administration of special examinations to demonstrate foreign language proficiency. This will include finding an appropriate examination to test the student’s proficiency, informing the student how to arrange to take the examination and certifying the results to the student’s advisor. All arrangements shall be made and fees paid by the student.

d. American Sign Language (ASL) may be used to fulfill the foreign language degree requirement unless otherwise specified by the student’s college or department. Students may either transfer ASL credits or arrange to be tested at another institution. (Texas A&M does not offer courses in ASL.)

9. Complete the Writing requirement. The requirement may be met by passing two writing (W) courses or one writing (W) course and one oral communication (C) course in the student’s major. The requirement may not be met by any course listed as a University Core Curriculum communication requirement, nor may it be met through credit by examination. It may be met by a course transferred from another institution of higher learning, with the approval of the dean of the student’s college and the Associate Provost for Undergraduate Studies. Upon request, students will provide their dean with a course description, syllabus or writing sample from the course being transferred.

10. Complete the International and Cultural Diversity requirement (6 credit hours). As individual and national destinies become progressively more interconnected, the ability to survive and succeed is increasingly linked to the development of a more pluralistic, diverse and globally-aware populace. Two courses from the list available on the International and Cultural Diversity Requirements (p. 40) page are to be taken by the student. For additional information, please reference http://icd.tamu.edu. If a course listed also satisfies a Core Curriculum requirement, it can be used to satisfy both requirements if the student wishes to do so.

11. Be formally recommended for graduation by the Faculty Senate after consideration of his or her complete record.

Undergraduate Minor Programs

A minor is a selection of courses that focus on a single area or an interdisciplinary perspective as developed by the department or program that offers the minor. The department or program offering the minor is responsible for setting enrollment limits and deciding which courses are used to meet the minor. Coursework consists of 15-18 hours with a minimum of 6 in residence at the 300-400 level.

If a minor is offered by a department or academic unit, then the minor is considered to be available to all students as resources permit. Students must declare a minor no later than the date on which they apply for graduation. A maximum of two minors per degree can be completed by students. A minor is displayed on the transcript after graduation but not displayed on the diploma.

Two Degrees

A student pursuing a second baccalaureate degree must complete all university, college, and department/curricular requirements for the second degree not covered in the first. All essential work required for a second degree must be defined in advance in writing by the Dean or designee of the college granting the second degree. In all such cases, the total semester hours required must be at least 30 hours additional to the greater number required for either degree. At least 12 hours of 300- and 400-level course work must be completed in each field of study.

A student who has previously not been enrolled at Texas A&M University and who is seeking a second degree must have a minimum of 36 hours of 300- and 400-level courses, 12 hours of which must be in the major field of study, in residence at Texas A&M. The student must also meet the citizenship requirements for American history and government/political science.

Baccalaureate Degree Option for Students Granted Early Admission to Professional Programs

A minimum of 120 hours is required for a Texas A&M University undergraduate degree. Some degree programs require additional hours (see specific degree requirements for each major in this catalog). Students from undergraduate programs who are selected early into participating programs in medicine, dentistry, optometry, pharmacy, or veterinary medicine must have satisfied all University Core Curriculum requirements as specified in this catalog. A student intending to use this baccalaureate degree option must coordinate early in his or her program with the appropriate undergraduate advisor in order to ensure that degree requirements are met. The degree candidate must complete at least half of the total hours required for the baccalaureate degree while in residence at Texas A&M University. This requirement includes a minimum of 24 hours of upper division courses in residence, of which a minimum of 12 must be in the major. A student will become eligible for the Texas A&M degree upon completion of the total credit hours required by his or her undergraduate degree plan. Each undergraduate major specifies those professional courses that may be used to satisfy its degree plan.

A student then selected into an approved professional program will be required to successfully complete a minimum of one full year of acceptable work at an accredited school of medicine, dentistry, optometry, pharmacy, or veterinary medicine in the United States. The student will be responsible for submitting official transcripts to the Office of Admissions to verify completion of agreement requirements. The participating undergraduate department or program will complete the required degree audit, approve the necessary substitutions and clear the student to graduate.

Baccalaureate degrees will be awarded in May, August, and December after the completion of the first year of the approved professional program or the necessary hours for the desired baccalaureate degree. Students must apply for graduation at Howdy. Check the academic calendar for deadlines and for commencement dates. Questions may be emailed to degree-audit@tamu.edu or call (979) 845-1089. For additional information about graduation, visit the graduation (http://graduation.tamu.edu) website.
Students who have received a baccalaureate degree are not eligible to participate in commencement. Individuals who would have been eligible to participate in this program had it been in effect when they were students at Texas A&M University may request the conferral of a baccalaureate degree. Although this is a University-wide policy, not all colleges choose to participate. The use of this baccalaureate option will remain a college initiative in that each individual college and/or program must clear each candidate for graduation.

**Graduation with Honors**

**Undergraduate Students**
To be eligible for graduation with Latin honors, a student seeking a baccalaureate degree must enroll in and complete a minimum of 60 semester hours at Texas A&M University, Texas A&M University Galveston campus, or Texas A&M University Qatar campus preceding graduation and have an institutional grade point average equal to or greater than that required for the appropriate category of honors. Course credit received by examination, and courses reserved for graduate credit only, are excluded from the calculation of the number of hours and the grade point average for graduation with Latin honors.

Categories for Latin honors shall be designated as follows:

- **Summa Cum Laude:** A student may be graduated Summa Cum Laude with a grade point average of 3.90 or above.
- **Magna Cum Laude:** A student may be graduated Magna Cum Laude with a grade point average range of 3.70 through 3.899.
- **Cum Laude:** A student may be graduated Cum Laude with a grade point average range of 3.50 through 3.699.

Grade point averages used to determine Latin honors designations are calculated during the final degree audit the day before the ceremonies and include hours and final grades in courses taken during the graduation semester. Latin honors designations will not be changed after the final graduation clearance deadline.

Information regarding other honors designations may be found on the Honors and Undergraduate Research (p. 103) page.

**Please note:**

- Students are not required to enroll in honors courses to graduate with Latin honors.
- Taking designated honors courses does not mean students will graduate with Latin honors.

No Upper Division student found guilty of academic misconduct may receive Cum Laude, Magna Cum Laude, or Summa Cum Laude honors at graduation. Upper Division status is defined as having earned 60 or more credit hours, including transfer hours, prior to the date of the violation. This sanction is automatic upon a finding of academic misconduct, and is imposed without regard to the severity of other sanctions imposed by the instructor or Honor Council.

For more information, please see the Aggie Honor System Office (p. 79) section in the catalog.

**First-Professional Students**

- Students who complete their entire course of study at Texas A&M University in the College of Medicine are eligible for academic honors. In the College of Medicine, students must obtain a grade point average of 3.50 or greater to graduate with honors.

- In the Irma Lerma Rangel College of Pharmacy, students are eligible for Latin Honors as follows: Summa Cum Laude (4.0-3.90), Magna Cum Laude (3.89-3.75), and Cum Laude (3.74-3.50).

- A student who graduates in the top 2% of the graduating class of the School of Law is designated as graduating Summa Cum Laude; a student who is not in the top 2% but graduates in the top 5% of the graduating class of the School of Law is designated as graduating Magna Cum Laude, and a student who is not in the top 5% but graduates in the top 10% of the graduating class of the School of Law is designated as graduating Cum Laude.

- A first-professional student in the College of Veterinary Medicine may qualify to graduate Summa Cum Laude by holding a final grade point average of 3.90 or above, Magna Cum Laude with a grade point average of 3.70 through 3.899 and Cum Laude with a grade point average of 3.50 through 3.699.

**Graduation Application, Diploma and Commencement**

Formal application for degrees must be submitted online in Howdy by the deadline stated in the academic calendar.

The diploma of the University, with the appropriate degree, will be granted to the student who has made formal application for the degree by the published official deadline, has all grades on record in the Office of the Registrar, including grades pertaining to graduation with honors, and has satisfied all degree requirements by no later than 5 p.m., Friday, the first week of classes of the succeeding semester or summer term following commencement.

Students must have settled all financial obligations to the university prior to receiving a diploma.

Graduate and undergraduate students who plan to attend a commencement ceremony must do so the semester they apply for graduation and complete their degree requirements.

**Tuition Charged for Excess Credit Hours**

The State of Texas will not provide funds to state institutions of higher education for excess semester credit hours earned by a resident student. Because funding will not be provided by the State, and as permitted by State law, Texas A&M University will charge tuition at the non-resident rate to all students who exceed the semester credit hour limit for their program. Excess semester credit hours are those which accrue after the student attempts more than 30 hours beyond the number of semester credit hours required for the completion of the degree program in which the student is enrolled. Thus, the student may accumulate up to 30 hours beyond those required for the chosen degree program and not exceed the limitation. The limitation on excess credit hours applies only to those undergraduate students who first enter higher education in the fall 1999 and thereafter. The semester credit hours counted toward the limitation include all hours attempted by the student except:

- Semester credit hours earned by the student before receiving a baccalaureate degree that has been previously awarded.
- Semester credit hours earned by the student by examination or other procedure by which credit is earned without registering for a course for which tuition is charged.
- Credit for remedial education courses, technical courses, workforce education courses funded according to contact hours, or other
courses that would not generate academic credit that could be applied toward a degree program at Texas A&M University.

- Semester credit hours earned by the student at a private or an out-of-state institution.
- Semester credit hours earned by the student before graduating from high school and used to satisfy high school graduation requirements (Effective June 2009).
- Hours not eligible for formula funding.
- Semester credit hours earned 10 or more years before the student began his or her degree program that have been excluded from the student record due to an election of admission under the Academic Fresh Start program.

Supplementary Fee for Courses Attempted More than Twice

Certain courses that are attempted by a student more than twice at a public institution of higher education in Texas may not be reported for state funding. As a result, the institution must either pass the non-funded portion to all students, or charge a supplementary fee to the student who is repeating the course. Texas A&M has chosen to assess a supplementary fee to those students attempting a course more than twice.

A student attempting certain courses more than twice at Texas A&M University will be subject to a supplementary fee of $125 per semester credit hour ($375 for a 3 hour course) for the repeated course, in addition to tuition and required fees associated with the course.

Students will be notified at the time they register for a course that it has been taken twice at Texas A&M University and is subject to the supplementary fee.

Graduate Degree Programs

- Doctor of Education (EdD) in Agricultural Education
- Doctor of Education (EdD) in Curriculum and Instruction
- Doctor of Philosophy (PhD) in Plant Breeding
- Master of Agriculture (MAgr) in Agricultural Development
- Master of Agriculture (MAgr) in Poultry Science
- Master of Education (MEd) in Bilingual Education
- Master of Education (MEd) in Curriculum and Instruction
- Master of Education (MEd) in Educational Administration
- Master of Education (MEd) in Educational Psychology
- Master of Education (MEd) in Educational Technology
- Master of Education (MEd) in Special Education
- Master of Engineering (MEng) in Aerospace
- Master of Engineering (MEng) in Biological and Agricultural Engineering
- Master of Engineering (MEng) in Computer Engineering
- Master of Engineering (MEng) in Electrical Engineering
- Master of Engineering (MEng) in Engineering
- Master of Engineering (MEng) in Industrial Engineering
- Master of Engineering (MEng) in Mechanical Engineering
- Master of Engineering (MEng) in Petroleum Engineering
- Master of Engineering Technical Management (METM) in Technical Management
- Master of Geoscience (MGSC) in Geoscience
- Master of Industrial Distribution (MID) in Industrial Distribution
- Master of Jurisprudence (MJur) in Jurisprudence
- Master of Laws (LLM) in Laws
- Master of Maritime Administration and Logistics (MMAL) in Maritime Administration and Logistics
- Master of Natural Resource Development (MNRD) in Natural Resource Development
- Master of Public Health (MPH) in Epidemiology
- Master of Public Service and Administration (MPSA) in Public Service and Administration
- Master of Recreation and Resources Development (MRRD) in Recreation and Resources Development
- Master of Science (MS) in Agricultural Systems Management
- Master of Science (MS) in Analytics
- Master of Science (MS) in Bilingual Education
- Master of Science (MS) in Education for Health Care Professionals
- Master of Science (MS) in Educational Human Resource Development
- Master of Science (MS) in Educational Psychology
- Master of Science (MS) in Energy
- Master of Science (MS) in Engineering Systems Management
- Master of Science (MS) in Health Education
- Master of Science (MS) in Mathematics
- Master of Science (MS) in Plant Breeding
- Master of Science (MS) in Safety Engineering
- Master of Science (MS) in Special Education
- Master of Science (MS) in Sport Management
- Master of Science (MS) in Statistics
- Master of Science in Nursing (MSN) in Family Nurse Practitioner
A limited number of graduate certificate programs are available by
distance education. Please review Transcribed Graduate Certificate
Programs.

The delivery platform differs among these programs. Most are available
100% online, some are web-supported with interactive video and others
require periodic campus visits. The delivery platform in most programs
changes depending on the course/program content, needs of the
students and their geographic locations. Students should carefully
consider distance education and address any specific questions to the
department offering the program of interest.

Only a student who is admitted to Texas A&M University may enroll
in these distance education programs and the associated courses. A
student wishing to enroll in any of the distance education programs
must be admitted as a degree-seeking graduate student or as a
post-baccalaureate non-degree seeking student. Please see http://
admissions.tamu.edu for graduate admissions information.

A student may take up to 12 hours in non-degree-seeking post-
baccalaureate status and apply these hours to a master's program
with the approval of the student's advisory committee, the head of
the department (or Chair of the Intercollegiate Faculty, if appropriate),
and the Office of Graduate and Professional Studies if all admission
requirements to the selected master's program are fulfilled. Courses
offered for extension credit may not be used on the student’s degree
plan. Post-baccalaureate non-degree status does not establish eligibility
for admission to degree-seeking status.

Texas A&M University provides students pursuing a graduate degree by
distance a wide variety of student support services, including access
to library resources, advising, technology support and course materials
acquisition through the online bookstore. A complete listing of services,
degree program descriptions, appropriate points of contact within each
program, and costs are available through the distance education website
at http://distance.tamu.edu. Additional distance education programs
are in development. Interested students should check the website
periodically for updates. Students should contact the department offering
the program for any questions.

Admission

General Application Information

Application Information

Both Texas resident and non-resident students can apply for undergraduate admission to any Texas Public University for freshman, transfer and international admission by using the ApplyTexas Application or Coalition Application.

You may access the appropriate application from the ApplyTexas Application website (www.applytexas.org), the Coalition Application website (http://www.coalitionforcollegeaccess.org/) or the Texas A&M University website (http://admissions.tamu.edu).

Texas A&M University has several conveniently located Prospective Student Centers throughout the state, staffed with regional advisors ready to serve you. Please contact the center nearest you to learn more about admissions, financial aid, academic programs and student services. Visit the website admissions.tamu.edu/psc for more details.

An applicant who:
- is a citizen or permanent resident of the United States
- or qualifies for Texas residency based on Senate Bill 1528
- is a degree-seeking applicant
- has graduated from high school or equivalent
- has enrolled in a post-secondary institution after graduation from high school
- does not have a bachelor’s degree
- does not qualify for readmission
An applicant who:
• is not a citizen or permanent resident of the United States (or applicant for permanent residency) and does not qualify for Texas residency based on Senate Bill 1528
• is an applicant seeking a bachelor’s degree
• has graduated from high-school or equivalent
• has enrolled in a post-secondary institution, and
• is not eligible for readmission (has never enrolled at Texas A&M University as an undergraduate degree-seeking student).

Readmission
An applicant who:
• is a former degree-seeking Texas A&M undergraduate student (including an international student)
• does not have a bachelor’s degree
• did not officially register for the previous semester (excluding summer sessions) at Texas A&M
Readmission does not include applicants whose only previous enrollment at Texas A&M has been as a non-degree student.

Postbaccalaureate Undergraduate
An applicant who: Spring 2018 Summer/Fall 2018
• has a bachelor’s 2018 degree
• wishes to pursue a second undergraduate degree

Non-degree Undergraduate
An applicant who: Spring 2018 Summer/Fall 2018
• does not wish to pursue a degree at Texas A&M
• wishes to take specific undergraduate coursework

High School Enrichment Program
An applicant who:
• is a high school junior or senior in the Bryan/College Station area
• has a new SAT score of 1270, or an ACT score of 27
• has completed all levels of related coursework offered at their high school
Each student is eligible to take 1 (one) course per fall or spring semester, and course registration will be completed by the TAMU advisor. No summer classes are offered at this time. Classes will be held on the Texas A&M University campus.
Students and their parents/guardians will be responsible for any lodging or transportation considerations.
Admission for this program is on a space-available basis. The applicant pool is competitive, and admission into this program is not guaranteed.

</tr>
</tbody>
</table>

An applicant who has enrolled in a post-secondary institution since high school graduation, with or without credit earned, must apply as a transfer applicant.

Items Necessary to Complete an Application File

Please see the Readmission, Post-baccalaureate or Non-degree sections for other items required to complete the transfer application for those types of admission. U.S. citizens completing a non-U.S. high school program should refer to International Admissions for questions concerning transcripts, examination results and foreign credentials.

An application is reviewed to make a decision about admission after all items listed below have been received. The items must be received by the appropriate closing date to qualify for consideration for admission.

In addition, freshman applicants must show proof of meeting the State of Texas Uniform Admission Policy to qualify for review.

Application submitted electronically via ApplyTexas
Application Fee (check, money order, Visa, MasterCard, Discover or American Express)—All fees are nonrefundable
• Domestic Undergraduate - $75
• Domestic Graduate - $65
• International - $90
• Checks and money orders should be made payable to Texas A&M University. International checks must be backed by a U.S. bank and be issued in U.S. dollars. The applicant's name and date of birth should be written on the face of checks and money orders.

Guidelines for requesting application fee waivers:
• Fee waivers are not available for international students.

Freshman Waivers
Applicants who qualify for federally funded free/reduced lunch programs may qualify for a fee waiver. Please see our admissions website, http://admissions.tamu.edu/freshman/apply, for instructions for requesting a waiver.

Transfer or Readmit Waivers
To request a fee waiver, please provide your Student Aid Report (SAR), which you will find within your current FAFSA or a copy of an award letter from your current institution. Checking the fee waiver box on the application will not satisfy the fee waiver requirement.

The documents can be uploaded through the Applicant Information System (AIS) page. Documents will also be accepted by fax at (979) 458-4302 or email at d-nichols@tamu.edu, as well as U.S. mail.

Essays
• Freshman applicants are required to complete Essay Topics A and B. Essay Topic C is strongly recommended for applicants to be considered in the holistic review process.
• Transfer applicants are required to complete Essay Topic A.

SAT or ACT Scores
• Required of all freshman applicants, including all international freshman applicants.
• Scores should be sent directly from the testing agency and must be received by the posted deadline to be considered
• The SAT code is 6003; the ACT code is 4198.
• Test scores must be from a test date within five years of the date of planned enrollment.
• The highest test score from one test date will be used. Texas A&M does not allow combined test scores from different test dates.
Official High School Transcripts
- Freshman applicants who have not graduated from high school at the time of application must submit an official transcript indicating coursework, credits earned, grades, graduation plan/diploma type and a numerical class rank at least through their junior year. If admitted, the applicant will be required to submit a final transcript with graduation data.
- If the applicant’s high school does not rank its students, a school profile from the high school must be provided as part of the application file.
- Freshman and transfer applicants who have graduated from high school at the time of application should submit an official high school transcript that includes grades and credits for all completed coursework, a numerical class rank, date of graduation and graduation plan completed, or a certificate verifying completion of a GED program.
- Readmit and post-baccalaureate applicants are not required to submit a high school transcript as part of the application file.
- To be considered official, a transcript must bear an original signature of a school official or an official school seal.
- Transcripts in a language other than English must be accompanied by an official English translation. Applicants who have attended high school both in the U.S. and out of the U.S. should submit official transcripts from each school attended.
- For students enrolled in the U.S., copies of official transcripts from other countries will be accepted provided the copies are on file and verified by the U.S. institution.
- Faxed copies are not official and will not be accepted.

Official College Transcripts
- An official transcript is required from every post-secondary institution attended even if the applicant did not earn credit, receive a course grade or the course is not transferable. Coursework from one college posted on the transcript of another college will not satisfy this requirement. Failure to acknowledge attendance and provide transcripts from all schools attended may be considered a fraudulent admissions application resulting in a denial of the application. A college transcript for dual credit coursework earned in high school must also be provided.
- Official paper transcripts are to be sent by the sending institution in a sealed envelope. The transcript will not be considered official if the student has had access to the actual transcript.
- Transcripts in a language other than English must be accompanied by an official English translation.
- Faxed copies are not official and will not be accepted.
- For students enrolled in the U.S., copies of official transcripts from other countries will be accepted provided the copies are on file and verified by the U.S. institution.

Lawful Permanent Residents of the United States
An applicant who has applied for or been granted Lawful Permanent Resident (LPR) status in the United States by the Department of Homeland Security (DHS) is eligible to submit an application as a Domestic Applicant. To qualify, you must include one of the following with the application:
- a copy of both sides of the DHS-issued Permanent Resident Card, or
- the I-551 Entry Stamp and Immigrant Visa in the passport, or
- an approved I-797 Notice of Action or I-797C Notice of Receipt.
If your parent is also a permanent resident, a copy of the parent’s proof of LPR status will be necessary to determine in-state residency for tuition purposes.

Note: If you have applied for adjustment of status to Lawful Permanent Residency and have not received your LPR card or Notice of Action that says Notice Type: Approval Notice, you are considered an international student once you are admitted to the University. There are certain requirements that international students must fulfill upon enrollment. Please contact International Student Services at iss@tamu.edu for more information about these requirements.

Required Immunizations
Texas Education Code (TEC) 51.9192 requires all entering students (under the age of 22) to provide evidence of vaccination against bacterial meningitis received within the last 5 years or a signed affidavit declining the vaccine at least 10 days prior to the start of classes for any given semester. Learn more about bacterial meningitis at http://admissions.tamu.edu/meningitis.aspx.

Notification of Application Status
Check the Applicant Information System (AIS) website in Howdy (http://howdy.tamu.edu), Applicant channel, to verify your application has been received and to determine if any credentials are missing. Please allow at least two weeks to process credentials.

The Office of Admissions will make every effort to inform applicants of incomplete files through AIS. If incomplete credentials are received within one month of the closing date, there may not be sufficient time for the Office of Admissions to notify applicants. All items necessary to complete an application must be received by the Office of Admissions by the closing date (not postmarked) to assure consideration for admission.

Required Coursework
Applicants who graduate from an accredited Texas public or private high school applying to Texas A&M University must have completed the Foundation High School Program preferably with the Distinguished Level of Achievement with at least one endorsement. The high school curriculum should be noted on the official high school transcript. Please visit http://admissions.tamu.edu/freshman/coursework for a complete description of coursework including information for home-schooled and out-of-state applicants.

State of Texas Uniform Admission Policy
Texas Education Code (TEC) 51.803-51.809 (State of Texas Uniform Admission Policy (http://admissions.tamu.edu/freshman/TexasUAP)) requires that all freshman applicants meet one of the following college readiness standards in order to be eligible to be considered for admission at a Texas four-year public institution.
- Satisfy the College Readiness Benchmarks on the SAT or ACT assessment; or
  - SAT – 1500 out of 2400 (Verbal + Math + Writing) for tests taken prior to March 2016
  - SAT - 480 EBRW and 530 Math for tests taken after February 2016
  - ACT – 18 English, 21 Reading, 22 Mathematics and 24 Science
• Successfully complete the State of Texas foundation, recommended or advanced/distinguished high school program or complete the portion of the program that was available to them; or
• Successfully complete a curriculum that is equivalent in content and rigor to the foundation, recommended or advanced/distinguished high school program at a high school that is exempt from offering such programs.

Freshman Admissions

Additional Information for Freshman Applicants

1. Information Presented in the Application
   • Extracurricular activities including time commitment and duration of involvement
   • Leadership and/or exceptional talent as shown in extracurricular activities and/or work
   • Community/volunteer work including time commitment and duration of involvement
   • Awards and achievements earned while in high school
   • Employment and/or internships including dates of work and hours per week
   • Family educational background and household income
   • Number of people in household

2. Essay Topics A and B

   Topics A and B on the application are required. Essay Topic C is recommended for applicants in the holistic review process. Scholarship review by departments may utilize Essay Topics A, B and C in award decisions. Those applying for the Terry Scholarship are required to complete Essay Topic C. Applicants to the College of Engineering will be asked to answer an additional essay question as part of the application.

Freshman Admissions

When all credentials necessary to complete a freshman applicant's file are received during the admission application period, one of the following criteria will be used to determine who will be offered admission:

1. Top 10% Applicants from Texas High Schools
   Applicants who are Texas residents or who are enrolled in recognized public or private high schools in Texas with a rank in the top 10% of their high school graduating class will be automatically admitted to Texas A&M University if they have successfully met the State of Texas Uniform Admission Policy and have successfully completed the recommended or distinguished graduation plan or the foundation distinguished plan. Choice of major is not guaranteed. These applicants must submit all required credentials by the closing date in order to qualify for automatic admission.

2. Academic Admits
   Applicants who rank in the top 25% of their high school graduating class, achieve a combined SAT Math and SAT Critical Reading score of at least 1300 on an SAT test taken prior to March 2016, with a test score of at least 600 in each of these components of the SAT, or achieve a combined SAT Math and SAT Evidence Based Reading and Writing (EBRW) score of at least 1360 on an SAT test taken after March 2016, with a minimum 620 Math and 660 EBRW score, or earn a composite ACT score of at least 30 with a test score of at least 27 in ACT Math and ACT English, have successfully completed all recommended coursework and have successfully met the State of Texas Uniform Admission Policy will be automatically admitted to Texas A&M University, but not necessarily to the major of choice. These applicants must submit all required credentials by the closing date to qualify for automatic admission.

3. Other Applicants
   Applicants not meeting the above requirements for automatic admission but who have met the state of Texas Uniform Admission Policy will have their complete application file reviewed in a holistic manner to make an admission decision.

Information for all Freshman Applicants

• All applicants should use the application questions and the essays to present their academic background and personal strengths as well as personal circumstances.
• Letters of recommendation are not required. If an applicant chooses to submit letters of recommendation, be sure they validate or certify leadership, exceptional talent or special circumstances. The most helpful letters are from individuals who know the applicant well and who can write about what distinguishes the individual from other applicants. Please submit no more than two letters of recommendation. Photocopies are acceptable.
• A competitive applicant who cannot be admitted to a major with restricted enrollment (Colleges of Architecture, Business, Education, Engineering, Liberal Arts, and Public Health) will be offered admission to their second major choice. If the second major choice is full, then an alternate major must be chosen after admission to the university.

Admission Decisions

Notice of Admission Decision

Texas A&M University receives many more academically prepared applicants for admission than we can accommodate. Admission decisions are made throughout the application period and announced as soon as possible. A final decision may not be announced until early December for spring admission or late March for summer or fall admission. A limited number of applicants may be offered provisional admission that requires the successful completion of a summer school program at Texas A&M. In addition, some applicants may be considered for the Texas A&M Blinn TEAM Program (http://blinnteam.tamu.edu), Texas A&M Engineering Academy at Blinn-Bryan (http://engineering.tamu.edu/academies/blinn-bryan), Texas A&M Engineering at Galveston (http://engineering.tamu.edu/academics/engineering-at-galveston), Texas A&M Engineering at McAllen (https://engineering.tamu.edu/academics/engineering-at-mcallen), or participation in the Program for System Admission (http://admissions.tamu.edu/PSA).

Suspected Fraudulent Admission Applications

Applicants for admission to Texas A&M University should be aware that the information submitted as part of the application process will be relied upon by University officials to determine their status for admission and residency for tuition purposes. By signing and submitting an admission application, the applicant certifies that the information in, and submitted with, the application is complete and correct and may be verified by Texas A&M University.

All students applying to Texas A&M University are expected to follow the Aggie Code of Honor which states “An Aggie does not lie, cheat or steal
nor tolerate those who do." Applicants found to have misrepresented themselves or submitted false information on the application will receive appropriate disciplinary action which may include rejection of the application, withdrawal of any offer of acceptance, cancellation of enrollment or any other appropriate disciplinary action deemed necessary. In all instances of disciplinary action, the application fee is non-refundable.

Pursuant to the 2017-2018 undergraduate catalog and Texas A&M student rule 24.4.1 (http://student-rules.tamu.edu/rule24), acts of dishonesty include but are not limited to:

- Withholding material information from the University, misrepresenting the truth during a University investigation or student conduct conference, and/or making false statements to any University official.
- Furnishing false information to and/or withholding information from any University official, faculty member, or office.
- Forgery, alteration, or misuse of any University document, record, or instrument of identification.

For prospective undergraduate students (admitted but not enrolled), the initial determination of whether an individual has submitted a fraudulent application will be made by the Director of Admissions Operations, with a right of appeal to the Assistant Vice President for Academic Services and Director of Admissions for undergraduate students. All appeals will be considered by Admissions Decisions Appeals Committee and a recommendation made to the Assistant Vice President for Academic Services and Director of Admissions. For prospective graduate students, initial appeals will be made to the Dean of Graduate Studies.

Enrolled students suspected of violating Student Rules will be reported to the Student Conduct Office.

Any University official who suspects that a prospective student or enrolled student has submitted a fraudulent admission application must notify the Assistant Vice President for Academic Services and Director of Admissions.

Residence Requirement for Baccalaureate Degree
A student must complete at least 25% of semester credit hours applied to a baccalaureate degree in residence at Texas A&M University. A minimum of 36 semester credit hours of 300-level and higher coursework must be successfully completed in residence at Texas A&M University to obtain a baccalaureate degree. For the Bachelor of Science in Nursing RN to BSN Track, a minimum of 30 semester credit hours of 300-level and higher coursework must be successfully completed in residence at Texas A&M University. In all cases, a minimum of 12 of these 36 semester hours must be in the major.

1 See this catalog pertaining to your major for the specific science.
2 Choice available for transfer applicants only. Nursing and Dental Hygiene applicants must have completed or be enrolled in prerequisite courses at the time of application. Courses may be completed at any accredited college or university.
3 All new students to the Colleges of Architecture, Business, and Public Health enter the lower level.
4 Requires CHEM 102; MATH 141, MATH 151.
5 The curriculum leading to a professional degree in Architecture begins in the four-year undergraduate Environmental Design Architectural Studies degree program. This degree provides entry to the Master of Architecture program.
6 No spring transfer admission.
7 Choice not available for transfer applicants.
8 All students seeking elementary teacher certification will complete a baccalaureate degree in Interdisciplinary Studies. There is no major in Secondary Teacher Education. All students seeking secondary certification (except those preparing to teach physical education or health) will major in an academic discipline other than education (i.e., mathematics, English, computer science, biology, etc.) and take appropriate coursework for teacher certification in the College of Education and Human Development.
Apply through College of Agriculture and Life Sciences.

Pre-veterinary medicine is not offered at Texas A&M. If you plan to apply to the Doctor of Veterinary Medicine (DVM) program, you should select a major that would be a good vocational choice if you do not later enter the DVM program. Any major may be selected; however, some curricula more closely parallel courses that must be completed before applying to the DVM program than others.

Change of Curriculum to Another Campus
Texas A&M offers certain undergraduate degrees at two branch campuses in addition to the main campus. While enrolled as a student in residence at any one of the Texas A&M locations, students may apply for a change of curriculum to another campus for a future semester. Students must comply with the established change of curriculum procedures and requirements of their desired major, department, and college, and space must be available. Final approval is granted by the academic dean or departmental advisor for that major.

Transfer Admissions
Transfer Admissions
Transfer applicants will be reviewed and receive a decision from the college/major to which they have applied. Prospective applicants are encouraged to follow the curriculum and guidelines outlined by that specific college/major.

With the changes to the 2014-2015 University Core Curriculum, the Degree Tracks previously used for transfer admission are no longer valid. Recommended/required coursework for desired majors is available on the Transfer Course Sheets at http://admissions.tamu.edu/transfer/majors. It is to a student’s advantage to follow the guidelines and complete courses as outlined on the Transfer Course Sheets and in the catalog. Applicants who begin a set of courses which have a two-semester sequence are encouraged to complete both courses in the sequence before planning to transfer to Texas A&M.

Admission Criteria
- Transfer applicants must have at least a 2.5 grade point ratio (GPR) on at least 24 graded semester hours of transferable coursework at the time of application to be reviewed for admission.
- Students with less than a 2.5 GPR and/or less than 24 graded transferable hours will be denied admission and will not be sent to the academic college for review.
- Transfer admission decisions are made by the college and major and are competitive; thus, admission standards may change from one semester to another. Preference is given to the applicant with the highest grade point ratio (GPR) and the most courses completed for the major designated on the application. See the College Specific Information for the college of the major for which you applied.
- Applicants who drop or withdraw from courses frequently and who do not routinely achieve satisfactory grades will be at a disadvantage in the review for admission.
- Spring grades may be used in the fall admission decision if requested by the Academic College or in instances where the student did not meet the university requirements for review. Spring transcripts must be received by June 1 for review with spring grades. A complete application must be on file by March 1 to be considered for fall admission and to qualify for spring grade review. Spring grade review is not an option for students studying outside the U.S.
- The entire application, including essay topic A, is considered to identify admissible candidates.
- Some colleges consider second choice majors. While such admissions may be more competitive since they are made after applicants indicating that major as first choice, the admission decision follows the guidelines for that college presented in College Specific Information. Note that several colleges do not consider second choice majors.

Automatic Transfer Admission through SB 175
A transfer applicant who graduated from a Texas high school and ranked in the top 10% of the student’s high school qualifies for automatic transfer admission to a 4-year university under the provisions of SB 175 if they meet the following guidelines:

1. The applicant must have graduated in the top 10% of his or her high school graduating class from a Texas high school not more than 4 years prior to the semester for which the student is applying. The top 10% ranking must be stated on the final high school transcript, or the applicant must have been previously offered admission under the top 10% rule to the institution to which the applicant seeks admission as a transfer student.
2. The applicant must complete the core curriculum at a public junior college or other public or private lower-division institution with a 2.5 GPR on a four-point scale or equivalent.
3. Transcript should note core completion.
4. The applicant must expressly and clearly claim in the application that he or she is seeking admission under the transfer top 10% rule (SB 175).
5. The applicant must provide all of the documents required for transfer admission to Texas A&M by the posted deadline. Transfer requirements can be found at http://admissions.tamu.edu/transfer.

Applicants qualifying for transfer top 10% admission under SB 175 will be admitted to Texas A&M but the choice of major is not guaranteed. Students desiring admission to Business or Engineering are encouraged to select a second choice major of interest due to the limited enrollment capacity in these colleges.

For information concerning the Transfer Top 10% Admission, please see www.legis.state.tx.us/lodocs/81R/billtext/doc/SB00175F.doc.

College Specific Information
College of Agriculture and Life Sciences
Transfer admission requirements vary greatly across the College. Admission decisions are made by major and are competitive. Most majors have a series of required and preferred coursework to be completed by the student prior to application. It is highly recommended that prospective students contact the academic advisor for the major of interest to inquire about specific transfer admission requirements. Students should also refer to the Texas A&M University Admissions (http://admissions.tamu.edu) website to review the transfer guides for each major. Also, note that transfer admission GPR requirements vary by major and several exceed the minimum 2.5 GPR. Completion of the essay indicating why the major was selected and how a degree in this major will help meet career goals is required. For more information on transfer guidelines, coursework and contact information for all academic advisors, refer to the College of Agriculture and Life Sciences (http://aglifesciences.tamu.edu) website.
College of Architecture

Applicants must have completed 24 hours of transferable coursework at the time of application, and it is recommended that these courses be selected from the degree program electives described elsewhere in this catalog. The essay is an important component in the review process and should explain why the applicant is interested in either the Construction Science, Environmental Design Architectural Studies, Landscape Architecture, Urban and Regional Planning or Visualization program. Applicants with less than a 3.0 GPR are rarely admitted. For more information, visit the College of Architecture (http://www.arch.tamu.edu) website.

Enrollment in Environmental Design Architectural Studies and Visualization is driven by available studio space. Additionally, there are eight sequential studios in those degree programs which make it difficult for students that transfer with more than 36 hours.

MATH 1324 from some colleges will not be a direct equivalent to MATH 141 at Texas A&M University but will satisfy the core math requirement for this major.

Mays Business School

Mays Business School offers transfer admission to the most competitive applicants. The transfer admission process identifies applications that evidence outstanding accomplishments, including academic credentials using the following guidelines.

Transfer admission to Mays generally requires excellence in the following set of eight specific courses. Applicants desiring to major in business are encouraged to plan early, and incorporate this entire body of coursework into their curriculum prior to applying. It is especially important to have credit for both required math courses before applying.

Mays admits transfer applicants for summer or fall admission. Spring transfer admission is not available. Applicants are expected to have completed and excelled in substantially all of the 24 semester hours of Recommended Coursework. Due to the competitiveness of the applicant pool, successful applicants will have a combination of As and Bs in this coursework and a high overall GPR.

The entire application is reviewed. Successful applicants include carefully written essays that demonstrate clarity of purpose, creativity, and an advanced writing style. Applicants are encouraged to identify their intended upper-level major and to describe why they are well suited for that area of specialization. Applicants who have special circumstances they wish to discuss are urged to share all pertinent information, with appropriate documentation, in their essay(s).

RECOMMENDED COURSEWORK FOR ADMISSION: Priority courses to be completed before transfer application to Mays Business School are:

<table>

</tbody>
</table>

1 In lieu of MATH 1324 and MATH 1325, Mays accepts MATH 2414 and MATH 2413, respectively.

College of Education and Human Development

The College of Education and Human Development (CEHD) is actively seeking qualified transfer students who are interested in teacher certification. There is a nationwide demand for teachers. In particular, the College is seeking students interested in high-need teaching fields: math, science, special education, bilingual, English as a Second Language, and foreign language. The College also offers a variety of non-certification programs.

To be competitive for admission, an applicant should, at the time of application, have a minimum 2.75 GPR on at least 24 hours of graded transferable coursework. It is preferred that MATH 141/MATH 1324, MATH 142/MATH 1325 and two science courses from the desired major be taken prior to application. Students specifically interested in Allied Health or Kinesiology Exercise Science should complete both math and both science courses with a grade of “B” or better and maintain a cumulative 3.0 GPR across all transferable coursework in order to be competitive in the applicant pool.

Students interested in certification at grades 8–12 should complete a baccalaureate degree in a discipline area and contact the College regarding certification. The College of Education and Human Development does not consider second-choice majors.

Recommended Courses. Prospective transfer students should refer to the College of Education and Human Development (http://education.tamu.edu) website to identify additional courses that will satisfy degree requirements. Any student applying for a degree in Allied Health or Kinesiology is encouraged to apply with under 60 total hours of
transfer credit. Applicants should refer to the College website for more information.

The College of Education and Human Development evaluates performances in all courses and considers all parts of the application. If you have repeatedly dropped or withdrawn from courses or if you are taking courses that do not apply to the Core Curriculum or your major, they may have a negative impact when the application is reviewed. A well-written essay is a student’s opportunity to share information and experiences that could indicate success in a particular major.

The college has identified the following 31 hours of coursework as transferable for all CEHD majors:

<table>

1 MATH 1324 from some colleges will not be a direct equivalent to MATH 141 at Texas A&M University but will satisfy the core math requirement for this major.

**Guidelines for Transfer Applicants by Program**

**Health.** Applicants who are seeking transfer admission to this program should complete BIOL 1406, CHEM 1411, MATH 1324 and MATH 1325 for admission. Other prerequisite coursework that is recommended is SPCH 1315; and PHED 1304. Students may also take BIOL 2401 and BIOL 2402 to substitute for BIOL 319 and BIOL 320 for this option. Students specifically interested in Allied Health should complete both math courses with grades of "B" or better and at least two of the available science courses listed with grades of "B" or better. It is preferred that these students also maintain a minimum 3.0 cumulative GPR across all courses that transfer to Texas A&M University.

**Kinesiology–Exercise Science.** Students in this program are encouraged to complete at least 24 hours of the science coursework prior to the 60 completed hours. The Texas Common Course Numbers for the required science coursework on the exercise science degree plan (Applied Exercise Physiology, Basic Exercise Physiology and Motor Behavior options in the Kinesiology degree) are BIOL 1406, BIOL 1407, CHEM 1411, CHEM 1412, PHYS 1401 and PHYS 1402. The remaining 8 hours (Anatomy and Physiology I and II) must be taken at Texas A&M. Other coursework that students could complete include MATH 1324 and MATH 1325 (required for transfer); ENGL 2311 or SPCH 1315; and PHED 1301. Students should complete both math courses with grades of "B" or better and at least two of the available science courses listed with grades of "B" or better. It is preferred that these students also maintain a minimum 3.0 cumulative GPR across all courses that transfer to Texas A&M University.

**Kinesiology–Physical Education Teacher Certification.** Applicants who are seeking transfer admission to this program should complete BIOL 1406, PHYS 1401, MATH 1324 and MATH 1325. Other prerequisite coursework that can be taken prior to admission to Texas A&M and the program and is recommended is ENGL 1301 or ENGL 2311; and PHED 1301. Students may also take BIOL 2401 and BIOL 2402 to substitute for BIOL 319 and BIOL 320 for this option.

**Sport Management.** Applicants who are seeking transfer admission to this program should complete two lab sciences that meet TAMU Core Curriculum which could consist of the following science courses: BIOL 1406, GEOL 1403, CHEM 1411 or PHYS 1401. Check with the Office of Admissions for specific courses that may meet this requirement. MATH 1324 and MATH 1325 are also required for admission. Other recommended coursework includes ENGL 1301 or ENGL 2311 and SPCH 1315; and ECON 2302.

For more information about admission to the College of Education and Human Development, please contact Casey Ricketts at cricketts@tamu.edu.

**College of Engineering**

Applicants should complete at least 24 hours of graded transferable coursework at the time of submitting their application, all with a grade of C or better. Transfer admission GPA requirements vary by major, with the majority exceeding the minimum requirements for transfer admission consideration to Texas A&M. Transfer admission course requirements also vary by major. Successful applicants for undergraduate engineering degree programs in the College of Engineering will have completed all or most of the coursework listed before applying for transfer admission. Prospective transfer students should review prospective student information accessed through the College of Engineering (http://engineering.tamu.edu) website for more information and details specific to each major.

<table>

</tbody>
</table>

1 IDIS will accept an equivalent to Introduction to Composition and Rhetoric (ENGL 103 – ENGL 1301) to fulfill the composition requirement.

2 The MATH 151, MATH 152 and MATH 251 sequence can also be satisfied by completing the TCCNS sequence of four 3-hour courses (MATH 2313, MATH 2314, MATH 2315, MATH 2316). It is intended that applicants finish their calculus sequence, and not intended that applicants mix courses between two different calculus sequences.

3 Applicants are often admitted without this course, but it is recommended.
Each major requires the courses as listed below:

Applicable Majors | Courses
---|---
Environmental Studies (ENST) B.S. | At least one course selected from: GEOG 1302, 1303, GEOL 1303 and 1103, 1403 or other introductory courses in the Geosciences (Geography, Geology, Atmospheric Science, Oceanography) Two Math courses: MATH 1324 and 1325 One Science course selected from: BIOL 1306 and 1106, 1406 CHEM 1311 and 1111, 1411

Environmental Geosciences (ENGS) B.S. | At least one course selected from: GEOG 1302, 1303, GEOL 1303 and 1103, 1403 or other introductory courses in the Geosciences (Geography, Geology, Atmospheric Science, Oceanography) Two Math courses: MATH 2413 and 2414 One Science course selected from: BIOL 1306 and 1106, 1406 CHEM 1311 and 1111, 1411 PHYS 1301 and 1101, 1401

Geography (GEOG) B.S. University Studies - Geography (USGE) B.S. Geographic Information Science and Technology (GIST) B.S. | One course selected from: GEOG 1301, 1302 or 1303, or the equivalent to GEOG 203 (Earth System Science) Two Math courses: MATH 1324 and 1325 One Science course selected from: BIOL 1306 and 1106, 1406 GEOL 1403 CHEM 1311 and 1111, 1411 PHYS 1301 and 1101, 1401

Geology (GEOL) B.A. | GEOL 1303 and 1103 or 1403 Two Math courses: MATH 1324 and 1325 One Science course selected from: BIOL 1306 and 1106, 1406 CHEM 1311 and 1111, 1411, 1412 PHYS 1301 and 1101, 1401

Geology (GEOL) B.S. | GEOL 1303 and 1103 or 1403 These four Math/Science courses: MATH 2413, 2414, CHEM 1411, 1412

Geophysics (GEOP) B.S. | GEOL 1303 and 1103 or 1403 These four Math/Science courses: MATH 2413, 2414, PHYS 2325 and 2125, PHYS 2326 and 2126

Meteorology (METR) B.S. | MATH 2413, 2414; PHYS 2425, CHEM 1411, 1412 (These courses must be completed with a B or better.)

Oceanography (OCNG) B.S. | MATH 2413, 2414; CHEM 1411, 1412; PHYS 2325, 2326; BIOL 11106, 1306 (These courses must be completed with a C or better.)

College of Science
Applicants should complete 24 hours, as appropriate to the choice of major, with a cumulative GPA of at least 3.00. Strength of schedule is a factor in determining admission. Applicants will not be admitted without the completion of the first two semesters of courses in their declared major with a grade of B or better. Chemistry and Physics majors must also complete 8 hours of Calculus I and II with a grade of B or better. Biology students must complete 8 hours of Chemistry I and II with a grade of B or better and Calculus I and II with a grade of C or better. The College of Science will consider second-choice majors. Students with 90 hours of college credit will not be considered for transfer admission. For more information, visit the College of Science website.

The transfer admission guidelines by major in the College of Science include:
### Biology

1. A grade of B or better is required on all courses. Requirements also include a cumulative GPA of 3.00 or better.
2. Must be completed with a C or better.
3. Meets major requirement. May be taken as time permits.

### College of Veterinary Medicine and Biomedical Sciences

Applicants should have a 3.00 GPR on at least 45 hours of graded transferable coursework at the time of application and meet all Common Body of Knowledge (CBK) requirements for Biomedical Sciences in order to be considered for admission into Biomedical Sciences. Students who begin a set of courses which have a two-semester sequence are encouraged to complete both courses in the sequence before transferring to Texas A&M. No second-choice majors are considered. No summer admissions accepted. For more information, visit the College of Veterinary Medicine and Biomedical Sciences website.

Transfer students with 45 or more hours completed at the time of application will be given preference in admission. The transfer into Biomedical Sciences must occur before the student reaches 75 completed hours. All CBK courses must have a minimum grade of a “C”. Any CBK courses transferred in from a community college must have a minimum grade of a “B”.

Readmits will require a 3.0 at Texas A&M University and all CBK courses completed with at least a “C” in all courses. Any CBK courses transferred in from a community college must have a minimum grade of a “B”.

Qualified by criteria 7.

Students may choose to take MATH 2413 or MATH 1325 as calculus for transfer. These are equivalent to TAMU course numbers MATH 151 and MATH 142, respectively.

Notification of Admission Decisions

Transfer admission decisions are made through a competitive review process. Applicants are notified of the admission decision on a rolling basis throughout the application season. For those applicants requested to submit spring grades for fall consideration, decisions should be announced by early July.

Additional Information for Transfer Applicants

1. Applicants to the Colleges of Architecture, Business, and Veterinary Medicine and Biomedical Sciences should refer to the Upper Level Entry requirements. Applicants to the College of Engineering should refer to the Entry To A Major – College of Engineering requirements.
2. At least a 2.0 GPR on coursework in progress during the semester (excluding summer terms) immediately prior to enrollment at Texas A&M is a condition of admission.
3. Grades for all transferable courses are used in the computation of the GPR. This includes:
   - Failing grades, repeated courses, WF, Incomplete, etc.
   - Grades reported as Incomplete are computed as Fs.
   - Plus and minus grade designations are not used; C+ is computed as a C, B- as a B, etc.
4. Credit by examination courses which are transcripted from other colleges or universities may be transferred if sequential coursework with credit is also indicated. If there is evidence that the credit by examination courses are part of the student’s program of study at that institution, credit will be awarded for those courses that meet the transfer guidelines. Note: Credit by examination will not count toward the 24 hours required for consideration for admission.
5. Coursework taken as credit-by-exam must be listed as a specific course on an official college transcript to be considered for transfer of credit.

Transfer Course Credit Policies

Transfer credit on coursework complete at the time of application to Texas A&M University is determined when an official transcript from the originating institution is presented as part of the application for admission or readmission process. An official transcript is required from every post-secondary institution attended (including dual credit earned in high school) even if the applicant did not earn credit, receive a course grade or the course is not transferable.

The transfer of course credit will be determined by the Office of Admissions on a course-by-course basis. Credit submitted for transfer must be on an official transcript received by the Office of Admissions from the registrar of the institution where the credit was earned. Course content will be determined from the catalog description or the syllabus. The transferability of credit will be based on the criteria below. All criteria are intended to be considered together; for example, criteria 10 may be qualified by criteria 7.

Credit from Institutions Accredited by One of the Regional Accrediting Associations

1. A course that is normally considered as part of a bachelor’s degree program (not including the bachelor of technology or similar terminal degree) may be transferred. The following criteria, taken together, are used:
   a. The course is applicable to a bachelor’s degree at Texas A&M.
   b. The course is similar to a course or courses offered for degree credit by Texas A&M.
   c. The course content is at or above the level of the beginning course in the subject matter offered by Texas A&M.
2. A course that is intended for use in a vocational, technical or occupational program will normally not transfer. In certain cases, credit for occupational skill courses will be considered. Transfer of this credit requires either that the student’s Texas A&M major is engineering technology or industrial distribution or that the student’s major department and dean approve the course for use in the student’s degree program after enrollment.
3. Credit for support courses such as Math, Science and English intended specifically for use in an occupational program will not be transferred.
4. Credit for the course must be shown on the official transcript in semester hours or in units that are readily converted to semester hours.
5. A graduate-level course will not be transferred for undergraduate credit unless approved for use in the student’s undergraduate degree program by the student’s major department and Dean. This also applies for a course offered in a professional degree program such as Nursing, Law, or Medicine.
6. Credit by examination courses which are transcripted from other colleges or universities may be transferred if sequential coursework with credit is also indicated. If there is evidence that the credit by examination courses are part of the student’s program of study at that institution, credit will be awarded for those courses that meet the transfer guidelines.
7. Courses similar to ones offered by the Colleges of Agriculture and Life Sciences, Business, Engineering or Geosciences at the junior or senior level transfer by title only. Such courses may be used in the student’s degree program only if approved by the Department Head and Dean of the student’s major field. Validation of such credit, either by examination or the completion of a higher level course, may be required.
8. A field experience, internship or student teaching course may be transferred by title only.
9. Credit for cooperative education will not be transferred.
10. A course that is substantially equivalent to a Texas A&M course transfers as an equivalent course. Two or more courses may be combined to form one or more equivalent courses. If there is doubt about the equivalency of a course, the Texas A&M department offering the course subject matter may be asked to determine if the course is equivalent.
11. As a general policy, credit for admission will be given for transfer work satisfactorily completed with a passing grade at another properly accredited institution.
12. Grade Point Ratio (GPR) for any period shall be computed by dividing the total number of semester hours of transferable courses for which the student received grades into the total number of grade points earned in that period. Credit hours to which grades equivalent to...
Texas A&M grades of W, WF, F, I or U are assigned shall be included; those having grades equivalent to Texas A&M grades of WP, Q, S, X and NG shall be excluded.

13. In any case where a decision cannot be made using the above criteria, the Office of Admissions will determine the transfer of credit based on University policy, previous actions of the University and prior experience.

Resolution of Transfer Disputes for Lower Division Courses Between Public Institutions in Texas

The following procedures shall be followed by public institutions of higher education in the resolution of credit transfer disputes involving lower-division courses:

1. If an institution of higher education does not accept course credit earned by a student at another institution of higher education, the receiving institution shall give written notice to the student and to the sending institution that transfer of the course credit is denied. A receiving institution shall also provide written notice of the reasons for denying credit for a particular course or set of courses at the request of the sending institution.

2. A student who receives notice as specified in subsection 1 may dispute the denial of credit by contacting a designated official at either the sending or the receiving institution.

3. The two institutions and the student shall attempt to resolve the transfer of the course credit in accordance with the rules and guidelines of the Texas Higher Education Coordinating Board (THECB).

4. If the transfer dispute is not resolved to the satisfaction of the student or the sending institution within 45 days after the date the student received written notice of denial, the institution that denies the course credit for transfer shall notify the Commissioner of its denial and the reasons for the denial.

The Commissioner of Higher Education or the Commissioner’s designee shall make the final determination about the dispute concerning the transfer of course credit and give written notice of the determination to the involved student and institutions.

Credit from Non-accredited Schools

Students who transfer to Texas A&M from an institution of higher education that is not accredited by one of the regional accrediting associations may validate the work taken at the institution by one of the following methods:

1. Successful completion of a comprehensive departmental examination or nationally standardized examination that is approved by the department.

2. Successful completion of a higher level course in the same subject area when approved by the head of the department and the dean of the college.

Credit will be given to students transferring from non-accredited public colleges in Texas for work completed with grades of C or better if they earn a grade point of 2.0 (C average) on the first 30 hours of residence work at Texas A&M.

Credit from Foreign Institutions

Transfer work from institutions following other than the United States educational system with instruction in English will be evaluated on an individual basis. A-level examinations with a grade of C or better will transfer. Baccalaureate II examinations will not transfer; however, these students may take placement and proficiency examinations to receive credit by examination. Credit will be given for work satisfactorily completed at international institutions offering programs recognized by Texas A&M. Official credentials submitted directly from the office of the Registrar and a listing of courses completed and grades awarded must accompany any request for transfer credit. Transfer work will be awarded by course title unless previous arrangements have been made using the Texas A&M University Transfer Credit Study Abroad Pre-Approval Form. Courses must be equivalent in character and content to courses offered at Texas A&M. Credit will not be awarded from international institutions which are not academically accredited by the Ministry of Education or other appropriate authority in the home country.

No English composition courses will be transferred from institutions located in non-English speaking countries. American history and American political science (government) courses will not transfer from foreign institutions.

Courses taken at language training centers or institutes are generally not awarded transfer credit. A transcript from such an institution must be issued through the office of the Registrar at a Texas A&M recognized university, institute or language training center. Credentials of all language training centers and institutes are carefully checked.

Credit for Military Experience

State law (Texas Education Code Section 51.3042) and Texas A&M University policy awards credit for military service to eligible veterans. To receive credit, student veterans must submit proof of eligibility to the Office of Admissions. Up to 12 hours of general elective credits may be awarded, as needed for the student’s degree plan.

Proof of eligibility includes:

- DD Form 214 showing 1 year active duty and an honorable discharge OR
- Military orders OR
- Disability discharge documentation AND
- Documentation of high school completion (final high school transcript or General Educational Development certificate)

Military transcripts are evaluated at the time of application and credit for military experience/training is awarded based on recommendations contained within the Guide to the Evaluation of Educational Experiences in the Armed Services published by the American Council on Education (ACE). Texas A&M University will award KINE 198 and KINE 199 credit for completion of Basic Training. Credit under this policy does not prohibit Texas A&M University from awarding additional credit. The Military Transcript Credit Appeal form shall be provided to the Office of Admissions with approval of the academic advisor and veteran.

Proof of eligibility includes:

- Official military transcript (JST or CCAF)

Military Service Credits are irrevocable once awarded. Potential consequences should be identified and understood before a request is submitted. Students must consult their academic advisor for advice on the number of credits from military service that can be used in their degree program to avoid excessive credit accumulation and possible negative effects.
Extension and Correspondence Courses

Students may apply a maximum of 30 semester hours of approved extension class work and correspondence study toward a degree. Students may apply up to 12 hours of correspondence credit earned through an accredited institution toward the requirements for an undergraduate degree, even though Texas A&M does not offer courses by correspondence.

Correspondence courses taken through the Defense Activity for Nontraditional Education Support (DANTES) may be accepted and included in the 12 hours allowed.

In order for a student in residence at Texas A&M to receive credit for correspondence work toward a bachelor's degree, he or she should:

- obtain advance written permission from the dean of his or her college;
- present appropriate evidence of having completed the course.

Data and Research Services is authorized to act as an agent to receive correspondence courses.

International Admissions

International Admission Criteria

Transcripts/Examination Results

Official academic records (transcripts, marksheets, diplomas, etc.) are required for all secondary and any university coursework completed. Records should include all courses taken in high school and every college or university the applicant has attended.

Official records require the original seal or original signature of the Registrar, Principal, Headmaster or Director of Student Records. Official records should be mailed from the school directly to Texas A&M University, Office of Admissions. Examination results should be sent directly from the examination agency. In addition to the original records in a language other than English, Texas A&M requires official translations in English. Translations sent directly from the institution attended or from a recognized translator will be accepted. Transcript evaluations from an evaluation service which is a member of the National Association of Credential Evaluation Services (http://www.naces.org/members.html) or from the International Education Credential Services (http://www.aacrao.org/aacrao-solutions/aacrao-international/home) provided by the American Association of the Collegiate Registrars and Admissions Officers are recommended and will be accepted. We recommend a document-by-document evaluation (with a GPA) for high school credentials and a course-by-course evaluation for college/university transcripts from non-U.S. institutions. For students enrolled in the United States, we will accept copies of official transcripts from other countries that are on file and verified by the U.S. institution. Unofficial photocopies, fax copies and notarized copies of records, examination results or translations will not be accepted. Uploaded transcripts and diplomas indicating graduation from secondary school (final high school transcripts) will not be accepted. These transcripts must be mailed.

Admission Criteria for International Applicants with U.S. Based Credentials

International applicants who are completing their education at an institution that is accredited by the U.S. will be reviewed in accordance with the guidelines determined for domestic admission. However, these applicants must still meet international deadlines and testing requirements. (See item 2 below.)

Admission Criteria for International Applicants with Foreign Credentials

International applicants who are completing their education at an institution that is not accredited by the U.S. will be reviewed based on the following criteria:

1. Academic Achievement
   - International applicants are expected to complete an educational program that will allow them to be considered for admission to a university in their home country. Examples include the completion of Grade 13, Form 6 or 3 A-level exams following the General Certificate of Secondary Education (GCSE). Predicted A-level exam results must be received by the application closing date.
   - Applicants must submit proof of high school graduation, typically a diploma, leaving certificate, or official examination results. Students that complete the West African Examinations Council (WAEC) exam must submit a WAEC scratch card by the application closing date.
   - Successful applicants will rank near the top of their country's educational system (8 average or better) and score well above average on national exams.
   - Secondary school courses: Appropriate college preparatory coursework is required.

2. Testing
   - SAT or ACT scores will be considered in the review criteria for international freshman applicants. Additional English testing may be required after admission and before enrollment. Applicants whose native language is not English are required to demonstrate English proficiency by meeting any one of the following requirements:
     - TOEFL scores of 550 paper-based test or 80 internet-based test (taken within two years of date of intended enrollment)
     - IELTS with a 6.0 overall band score (taken within two years of date of intended enrollment)
     - SAT Evidence Based Reading and Writing (EBRW) score of 560 or higher or SAT Critical Reading score of 500 or higher on test taken prior to March 2016
     - ACT English score of 21 or higher
     - Completed all four years of high school within the U.S.

3. Individual Achievement and Recognition
   - Leadership positions held
   - Honors/awards received
   - Major national, state or Texas A&M scholarships received

Additional Requirements for International Applicants After Admission

If admitted, international applicants must fulfill the following additional requirements before enrollment:

1. International Student Services Channel
   - Visit Howdy and click on the Applicant tab. Go to the International Student Services Channel, and click on New Students. At the new international student homepage, follow the instructions. For more information, please visit the International Student Services website.

2. English Verification/Certification
Texas A&M requires international undergraduate students to demonstrate the ability to speak, write and understand the English language. Undergraduate students may meet this requirement in one of five ways:

a. official TOEFL score of 600 paper-based test or 100 internet-based test; or
b. official IELTS score of 7.0 overall band; or
c. SAT Evidence Based Reading and Writing (EBRW) score of 560 or higher or SAT Critical Reading score of 500 or higher on test taken prior to March 2016; or
d. transfer from an accredited U.S. institution of higher education with at least 30 semester credit hours including the equivalent to Texas A&M’s ENGL 103 or ENGL 104 with a grade of “C” or better; or
e. achieve English Language Proficiency Verification by taking the English Language Proficiency Examination (ELPE) prior to registration for the first semester at Texas A&M University. If remedial English classes are necessary, it will extend the time required to complete a degree.

Scholarship Information for International Students

There are a limited number of scholarships, fellowships, grants and loans available to international students, both in the admission process and throughout their enrollment. Some of these come from academic departments, particularly for graduate applicants, but there are also forms of financial aid available through International Student Services and Scholarships & Financial Aid. International applicants with financial need are encouraged to complete the International Student Financial Aid Application (ISFAA) (http://financialaid.tamu.edu/Forms-%281%29.aspx). This form must be resubmitted annually for continued consideration.

One special opportunity that a student may be eligible for upon admission to Texas A&M University is the Texas/Mexico Education Scholarship. Texas law allows a limited number of admitted applicants who are citizens of Mexico, and who can document financial need, to pay the same tuition as the residents of the State of Texas. For more information regarding how to apply for this scholarship, please refer to International Student Services (http://iss.tamu.edu) website.

For additional information regarding financial assistance and other scholarships available to International Students, please contact:

Other Admissions

Admission Criteria for Other Application Types

Readmission Criteria

Admission decisions for readmission are based on the following:

- GPA on Texas A&M coursework;
- GPA on coursework since leaving Texas A&M;
- desired major; and
- information presented in the application and essay/statement of purpose if provided.

If you were previously admitted but did not enroll and attend class through the official census date, you do not qualify as a readmit, and you must apply as either a freshman or transfer student.

If you were previously enrolled at Texas A&M but did not attend class through the official census date of the previous long semester, then you must apply for readmission.

Transcripts from institutions attended since the last enrollment at Texas A&M are required as follows:

<table>
<thead>
<tr>
<th>If Desired Readmission Term Is</th>
<th>Must Have Transcripts Through</th>
</tr>
</thead>
<tbody>
<tr>
<td>2018 Spring semester</td>
<td>2017 Summer session</td>
</tr>
<tr>
<td>2018 Summer semester</td>
<td>2017 Fall semester</td>
</tr>
<tr>
<td>2018 Fall semester</td>
<td>2018 Spring semester if applying after June 1</td>
</tr>
</tbody>
</table>

Post-baccalaureate Undergraduate Criteria

Admission is limited and is intended for applicants with a degree who wish to apply for further study at the undergraduate level to pursue a second bachelor’s degree.

Additional requirements to complete a post-baccalaureate application:

- an official transcript indicating the receipt of a recognized baccalaureate degree
- a statement explaining why enrollment at Texas A&M is necessary
- official transcripts from all colleges attended (official high school transcript not required)

Admission decisions for post-baccalaureate undergraduates consider:

- GPA on transferable college coursework
- completion of prerequisite coursework
information presented in the application

Priority is given to qualified applicants for their initial degree; therefore, **post-baccalaureate undergraduate admission may be limited or may not be available.** Mays Business School, the College of Liberal Arts, the School of Public Health, and the College of Veterinary Medicine do not currently consider applicants for post-baccalaureate study. See the Classification section of this catalog for the enrollment rights and privileges of this classification.

**Undergraduate Non-degree Criteria**

Admission is limited and is intended for applicants with a high school diploma (with the exception of High School Enrichment Program participants) or for degree applicants who do not intend to pursue a baccalaureate degree at Texas A&M. This includes:

- local residents or University employees taking courses on a part-time basis
- applicants completing established Texas A&M University requirements for teacher or other certification
- applicants completing a prescribed set of courses as preparation for application to graduate study or professional programs (i.e., medical school, veterinary school, law school or CPA exam)
- others as deemed appropriate by the Office of Admissions and the college or program of admission

Additional requirements to complete an undergraduate non-degree application:

- a statement explaining why enrollment at Texas A&M is desired
- an official college transcript showing the latest collegiate coursework attempted or a complete, official high school transcript if no college work has been attempted after high school graduation
- additional information presented in the application may be considered

Priority is given to qualified applicants for their initial bachelor’s degree; therefore, non-degree admission may be limited or not available. The College of Liberal Arts limits enrollment to summer only and the College of Veterinary Medicine and School of Public Health does not allow non-degree seeking admission. See the Classification section of this catalog for the enrollment rights and privileges of this classification.

**Transient Session Only Criteria**

Admission is considered for applicants who wish to attend one specific session only and who present appropriate credentials for the level of specified coursework and apply within the processing period for the specific session.

Additional requirements to complete transient session only application:

- a statement explaining why enrollment at Texas A&M is desired
- an official college transcript showing the latest collegiate coursework attempted or a complete, official high school transcript if no college work has been attempted after high school graduation

**High School Enrichment Program**

Texas A&M University is pleased to offer the High School Enrichment Program (HSEP) for qualified high school students in the Bryan/College Station area that will provide college credit and may also provide credit toward high school graduation. Admission for this program is on a space-available basis. The applicant pool is competitive, and admission into this program is not guaranteed.

This program provides a chance to further your knowledge in a subject you have completed in high school and earn valuable credit for graduation at both levels. For example, if you are interested in Physics and you have completed all of the classes your high school offers, you may qualify to continue to study Physics at the college level.

To be considered for this program, students must have completed all levels of related coursework offered at their high school. Each student is eligible to take 1 (one) course per fall or spring semester, and course registration will be completed by the Texas A&M advisor. No summer classes are offered at this time. Classes will be held on the Texas A&M campus, and students and their parents/guardians will be responsible for any transportation considerations.

Eligibility requirements:

- You must be a junior or senior in high school in the Bryan/College Station area.
- You must have a minimum new SAT score of 1270 or an ACT score of 27.

**Academic Fresh Start Policy**

Applicants for admission or readmission to Texas A&M may choose to have academic coursework that was completed at least 10 years prior to their term of application removed from consideration in the admission decision (Texas residents only). All other admission requirements apply. Should a Fresh Start applicant be admitted, he or she will forfeit all credit earned prior to 10 years from the term of admission. Academic Fresh Start cannot be requested after an applicant is admitted or enrolled. Academic Fresh Start must be requested as part of the application process.

Academic work done subsequent to ten years will be used in the evaluation of the applicant for admission. If a student does not have course work subsequent to ten years, he or she will be considered for admission based on the guidelines for new entering freshmen, which will require, among other things, an acceptable SAT or ACT score that has been completed within the past five years.

Admitted Fresh Start applicants have “Academic Fresh Start” indicated on their official Texas A&M transcript, are required to satisfy TSI/THEA requirements, and will follow the academic requirements of the Undergraduate Catalog of record for the term of admission.

Forfeited coursework cannot be considered as prerequisites, but placement examinations are allowed for courses which were not considered for admission because of the Fresh Start Policy. Once admitted on Academic Fresh Start, the applicant or student cannot subsequently request that the Fresh Start policy restrictions be removed.

If an applicant has used the Academic Fresh Start Policy at a previous school, the Academic Fresh Start will remain in effect at Texas A&M upon transfer.

**Entry to a Major – College of Engineering**

Freshmen in General Engineering (https://engineering.tamu.edu/academics/advisors-procedures/entry-to-a-major/general-engineering-program), Engineering at Galveston (https://engineering.tamu.edu/academics/engineering-at-galveston), Engineering at McAllen (http://engineering.tamu.edu/academics/engineering-at-mcallen), or Engineering
Academy programs (https://engineering.tamu.edu/academies) have a common first year engineering curriculum to allow time for students to learn about the 18 engineering degree granting majors. It is recognized that in most cases students are not made aware of all of our engineering majors while in high school. Students are introduced to the different engineering majors in the first year engineering courses, ENGR 111 and ENGR 112. Students are encouraged to leverage additional resources, including the career center, faculty, as well as advisors to get career advice. Students must complete the following courses in at least two semesters before applying to an engineering major: two engineering courses, two math courses, and two science courses in the freshman year engineering curriculum. Exceptions will be made as needed for students entering with credit for the required courses. The entry-to-a-major process is designed for students to take ownership of their future to identify at least three majors that are a good match for their career goals and academic performance. The entry-to-a-major process is designed to place students in the highest rank major possible based upon capacity and student performance. Students are encouraged to be in a major as early as possible. Students in the General Engineering (https://engineering.tamu.edu/academics/advisors-procedures/entry-to-a-major/general-engineering-program), Engineering at Galveston (https://engineering.tamu.edu/academics/engineering-at-galveston), and Engineering at McAllen (http://engineering.tamu.edu/academics/engineering-at-mcallen) programs must be in a major by the end of the third semester in engineering. Students in the Engineering Academy programs (https://engineering.tamu.edu/academies) must be in a major by the end of the fourth semester in engineering.

Transfer students are admitted directly to a major degree granting program through the admissions process.

Upper-Level Entry into Colleges of Architecture, Business and Veterinary Medicine and Biomedical Sciences—Biomedical Science

College of Architecture

Transfer Students

Transfer students, who meet the University entrance requirements and who desire to enter a major field of study in the College of Architecture, will be admitted based on available space and current College of Architecture entrance criteria. Following admission, all transfer students are placed on a 2.5 GPR probation for a minimum of 12 credit hours to substantiate competency in required lower-level courses. Transfer students will be admitted into the college with a lower-level classification and may apply for upper-level status after at least one semester at Texas A&M University.

Change of Major

Students currently enrolled in another major at Texas A&M University, with fewer than 60 hours who desire to change their major field of study into the College of Architecture must fill out a Change of Curriculum application. Deadlines for applications are as follows:

- March 1 for summer admittance (for Construction Science, Environmental Design Architectural Studies, Landscape Architecture, Urban and Regional Planning and Visualization students)
- June 15 for fall admittance (for Construction Science, Environmental Design Architectural Studies, Landscape Architecture, Urban and Regional Planning and Visualization students)

- October 1 for spring admittance (for Construction Science, Landscape Architecture, Urban and Regional Planning and Visualization students)

Students will be notified of action on their applications within 30 days of the deadline date. The college will admit the best-qualified applicants based on the number of spaces available in their program of choice.

Mays Business School

Students who meet the University and college entrance requirements enter Mays Business School in the BUAD (lower-level business) classification. Enrollment of Mays Business School students in junior- and senior-level business courses is limited to those who have been admitted to upper level (also referred to as upper division) in one of the seven majors (B.B.A.: accounting, business honors, finance, management, management information systems, marketing, and supply chain management) in the college.

The B.B.A. (accounting, business honors, finance, management, management information systems, marketing and supply chain management) upper-level entry requirements and application procedures are as follows:

1. To be admitted to an upper-level major, a student must be admitted to Mays Business School and have:
   a. Satisfactorily completed the following five courses:

   - ACCT 229 Introductory Accounting 3
   - ECON 202 Principles of Economics 3
   - ECON 203 Principles of Economics 3
   - MATH 140 Mathematics for Business and Social Sciences 3
   - MATH 142 Business Calculus 3

   b. BUAD students apply for upper level no later than the last class day of the semester before they expect to enter upper level. 
   NOTE: To enter upper level in the summer, all requirements must be completed BEFORE the beginning of the FIRST SUMMER SESSION.

   c. Business students must successfully complete these three remaining lower-level Core Business Knowledge (CBK) courses at Texas A&M during their first upper-level semester, unless satisfactorily completed prior to upper-level entry:

   - ACCT 230 Introductory Accounting 3
   - ISTM 210 Fundamentals of Information Systems 3
   - MGMT 211 Legal and Social Environment of Business 3

   d. Students are encouraged to complete the freshman and sophomore sequence of courses as listed under Curriculum in Business. BUAD students may preregister for upper-level business courses in the semester for which they have applied for upper level. However, students who fail to complete upper-level
requirements shall not be permitted to remain registered in upper-level business classes.

2. Transfer students: Transfer students admitted to Mays Business School will be classified as BUAD (lower-level Business) students until they complete all requirements listed previously in item 1, at which time they may apply for admission to an upper-level major field of study. Transfer students may immediately apply for upper level when admitted to Mays Business School if, and only if, they meet all upper-level requirements at that time.

3. Change of curriculum students: Texas A&M students who change curriculum into Mays Business School from another college or department at the University will be classified as BUAD (lower-level Business) students until they complete all requirements listed previously in item 1. Change of curriculum students who, when admitted to the business school, qualify to apply for admission to the upper level may do so.

4. Preference for available seats in junior- and senior-level business courses will be given to students who have been admitted to a degree granting major in Mays Business School. All ineligible students who preregister for upper-level business classes are subject to cancellation of their registration in these courses.

College of Veterinary Medicine and Biomedical Sciences—Biomedical Sciences

1. A Biomedical Sciences (BIMS) major will be admitted into the upper-level courses according to the following criteria:
   a. Completion of a set of Common Body of Knowledge (CBK) courses with a grade of “C” or better in each course completed at Texas A&M. Any CBK course transferred from a community college must have a minimum grade of a “B”. Normally, for admission to BIMS upper-level courses, a student may have attempted a CBK course no more than twice.

   b. A minimum of 55 completed semester hours with a cumulative resident Grade Point Ratio (GPR) of 2.5 or better.

   c. Process: Each student upon completing 55–65 semester credit hours must have a degree audit to verify upper-level eligibility.

2. The Biomedical Sciences Program will continue to accept changes of major into BIMS according to current Texas A&M University policy, but restrict changes of major into the upper-level courses (BIMS) according to the criteria listed in item 1. Students in other majors requesting a change of major to the BIMS program must also fulfill the criteria in item 1. In addition, the dean must verify availability of resources necessary to insure the student’s full-time enrollment in required upper-level courses prior to admission to upper-level status. If such courses are not available, the student will be denied admission to Biomedical Sciences.

3. To enter BIMS upper-level courses, transfer students must have:
   a. A minimum GPR of 3.0 in CBK courses with a grade of "B" or better in each completed course if taken at a 2-year college. A grade of "C" or better is accepted from a 4-year college.
   b. Transfer students admitted under another major and wishing to change into BIMS must complete one semester of graded coursework at Texas A&M University with a cumulative resident GPR of 2.5.
   c. Texas A&M University change of majors must have at least 55 semester credit hours with a minimum cumulative GPR of 2.5.

4. Students seeking readmission will be considered on a case-by-case basis, according to current catalog policy. No quotas will be placed on readmission; however, the decision to readmit will be dependent on resource availability and University policy.

5. Any BIMS student admitted to upper-level courses who then falls below the 2.5 GPR requirement will not be considered in good academic standing in their major and will be placed on college probation. Students who achieve less than a 1.0 GPR in any semester are not eligible for college probation or grade warning status. All Biomedical Sciences majors must follow established probation rules for the Biomedical Sciences Program.

6. The Dean, Director or Department Head will reserve the right to waive CBK or GPR requirements within the criteria established in Texas A&M University Student Rules.

7. No courses other than BIMS 481, BIMS 484, VIBS 310, VIBS 311, or research/directed studies courses can be taken S/U to be used in the degree plan.

8. BIMS probation is determined at the end of the Spring semester. Students not meeting acceptable GPR requirements (2.5 BIMS majors with 55 or more credit hours or 2.0 area of concentration (USVM) or BIMS majors with less than 55 credit hours) will be required to attend Texas A&M University that summer and repeat courses as needed to raise their GPR. Students who achieve less than a 1.0 GPR in any semester (BIMS or USVM) are not eligible for college probation or grade warning status.

9. Students may only attempt CVM courses a total of three times.

Texas Success Initiative (TSI)

The Texas Success Initiative (TSI) was instituted to ensure that students enrolled in Texas public colleges and universities possess the necessary academic skills to perform effectively in college and to provide diagnostic information about reading, writing and mathematics skills of each student. All undergraduate students who did not meet one of the allowed exemptions must take the approved TSI Assessment test.

Students who do not meet established cutoff scores or other approved exemptions for the TSI Assessment test are required by Texas law to be
enrolled in, and actively attend, an academic skills course and/or program each semester prior to completing all TSI requirements. Academic skills courses in each of the three TSI areas are offered by Texas A&M. Failure to meet the attendance requirements of the academic skills course will result in withdrawal from Texas A&M. The hours for these courses will not count toward any degree program but may count toward determining full-time status.

Students required to take the TSI Assessment test should have their forms sent by December 1. All materials related to the application must be submitted online:

- Application for Admission
- Secondary Application
- List of courses in progress and those planned prior to enrollment in the dental hygiene program
- Biographical sketch

Other materials that should be sent to complete your application:
- Application Fee ($35.00)
- Photograph sized 2 X 2 (does not have to be a passport picture - can be regular photograph cut down)
- Transcripts from high school and all colleges attended (if you attended a foreign high school, you do not have to submit a copy)
- Scores from Texas Success Initiative (TSI). (Or if exempt, SAT/ACT or TAAS – usually scores are listed on high school transcript; you do not have to submit scores separately.)
- Observation Verification Form (minimum 16 hours required)
- Evaluation Forms (submitted by a science instructor, dental hygienist and personal friend)

An application is valid for one academic year only.
- Official transcripts are required and will be accepted only when sent directly from each school the applicant has attended.
- Recommendations are required from a dentist or a dental hygienist, a biology or chemistry instructor and an individual who has known the applicant for some time; for example, an employer or supervisor.
- It is the responsibility of the applicant to keep the application file current. Failure to supply grades, transcripts or recommendations may be perceived as an indication that the applicant is no longer interested in admission.

Interviews
Processing of applications begins the year prior to entrance into the professional program and continues until the class is filled. The applications are evaluated, and an invitation for an interview may be extended. The purpose of the interview is to determine the applicant’s knowledge of the dental hygiene profession. It also provides an opportunity for the applicant to see the facility, meet with the Admissions Committee and to ask questions about the Caruth School of Dental Hygiene program.

All prospective students are encouraged to contact the college with questions regarding prerequisite courses or the program.

To Access the Dental Hygiene Application Forms:
The applicant will need to create an account on the Banner Admissions Management Framework (BAMF) website. The applicant will be required to complete and submit the College of Dentistry Dental Hygiene Application, the Secondary Application and the Ethnicity Form.

The application for the Dental Hygiene Program will be available on the BAMF website from July 15 to January 5.

Download Forms (Adobe PDF files):
The Evaluation Form and Observation Verification Form are available for download. You will need to print these forms and submit them with signatures through regular mail.

- Evaluation Form – top section to be filled in by applicant
- Observation Verification Form

For questions about the application process, please contact The Office of Recruitment and Admissions at (214) 828-8231 or by email at admissions-dentistry@tamhsc.edu.

Mail forms and transcripts to:
Transfer Credit
Transfer credit will be determined by each component in conjunction with the staff of the college on a course-by-course basis from official transcripts submitted in the competitive admissions process. Course content will be determined by the catalog course description or course syllabus.

Course acceptability is guided by these criteria:

- Courses completed at regionally accredited institutions are considered for transfer if:
  a. They are acceptable as credit for a bachelor’s degree at a regionally accredited institution.
  b. Course content is at or above the level of courses specified in the requirements for admission.

- Courses intended for use in a vocational, technical or occupational program normally do not transfer; general courses within this type of program may transfer.

- Credit on the transcript must appear in semester hours or credits that may be converted to semester hours.

- Credit by examination courses may be transferred if accepted by another college and followed by sequenced coursework.

- Equivalency of coursework is determined by content found in catalog course descriptions or syllabi of courses. In case of doubt, departmental faculty will determine equivalency. The final determination is left to the director of the Department of Dental Hygiene.

- As a general policy, coursework with a passing grade may be transferred, but the applicant must keep in mind that admission to the hygiene program is on a competitive basis and grades of F are transferred, but the applicant must keep in mind that admission to the hygiene program is on a competitive basis and grades of F are calculated into the grade point average.

- Course hours will be evaluated on a course-by-course basis but will be transferred as a block of hours, and the grades do not calculate into the GPA for the hygiene program.

- Credit will be given for correspondence courses on a select basis.

- Typically, credit will not be given for courses completed at institutions not accredited by a regional accrediting agency.

- The college does not accept non-credit coursework to be used in lieu of coursework taken for academic credit.

College of Nursing (Health Science Center)
There are three different tracks leading to a baccalaureate degree in nursing. The traditional BSN track is for students seeking their first degree in college. The second degree BSN track (post baccalaureate) is for individuals who have already earned a bachelor’s degree in another field of study. The third option is an RN to BSN program for registered nurses who hold an associate degree in nursing. Prerequisite courses, which are the essential foundation for nursing, must be completed before entry into upper-division nursing courses through a competitive admission process. In addition, all students must meet the core curriculum requirements for Texas A&M University if not already completed at another institution.

The following documents are required for an application to be considered complete and ready for review:

- Application
- Application fee
- Official college transcript(s)
- Completion of prerequisite and core curriculum courses with a grade of C or better
- Personal essay (see website for specific information)
- Admissions Assessment Exam (HESI A2) required for traditional and second degree BSN applicants only
- Reference required for RN to BSN applicants only
- RN to BSN applicants must provide proof of State of Texas RN licensure in good standing
- Copy of permanent resident card, if applicable
- Official TOEFL Scores required for international applicants and must be taken within the past two years. Test scores must be sent directly from the testing agency to be considered official.

Applications must be received by the posted deadline. No late documents will be accepted. Admission to the college is competitive. At the time of application, students must be enrolled in or have completed all prerequisite course requirements. Admission offers may be made to students finalizing courses and will be contingent upon successful completion of all prerequisite requirements and students presenting a clear criminal background check.

Students applying to the College of Nursing must complete selected coursework as a condition of acceptance. If the student completed a core curriculum from another Texas public institution in a previous degree program, they are not required to complete the college’s Core Curriculum. Students transferring from out of state, from a private institution, those with an international degree or anyone with concerns about this requirement, please contact the Office of Student Affairs for further clarification. Students will not be considered for admission unless the required coursework will be completed by the time of enrollment.
Additional Requirements for International Applicants and Applicants with Foreign Credentials

In addition to each program's stated application requirements, applicants with foreign transcripts must also include an official World Education Services (WES) or Educational Credential Evaluations, Inc. (ECE) transcript evaluation report listing course-by-course U.S. grade point equivalencies and semester credits received. These reports must be sent directly from the evaluation agency in the original sealed envelope to NursingCAS. Send to: NursingCAS, P.O. Box 9201, Watertown, MA 02471. If sent via UPS or FEDEX, send to NursingCAS Transcript Department, 311 Arsenal Street, Suite #15, Watertown, MA 02472.

If admitted to the College of Nursing, applicants with foreign transcripts must submit the native language transcript along with an official English translation. These documents must include all original seals and/or signatures and be approved by the Texas A&M Office of Admissions prior to enrollment in the program.

Students may wish to speak with an advisor and provide results of the evaluation to determine transfer credits. Email CONAdmissions@tamhsc.edu to request an appointment.

English Proficiency

Applicants whose native language is not English are required to submit proof of English proficiency by the application deadline, which is satisfied by:

- a minimum TOEFL score taken within the previous two years of:
  - 587 for paper-based testing (p-BT), or
  - 240 computer-based testing (c-BT), or
  - 95 Internet-based testing (i-BT), or
- a minimum IELTS score of 6.0 overall band
- completing all four years of high school in a U.S. accredited school, or
- earning a baccalaureate degree following four years of study at a U.S. accredited institution.

The College of Nursing requires scores that are higher than the minimum posted on the Texas A&M website due to the nature of the curriculum and expected student outcomes in order to verify English proficiency requirements. Test scores must be sent directly from the testing agency to be considered official. The institutional code for Texas A&M University for the TOEFL is 6003. There is no institutional code for the IELTS examination; therefore, please use the Office of Admissions address listed below when requesting your scores be sent to Texas A&M University. Tests should be taken at least eight weeks prior to the appropriate application deadline to ensure timely receipt and processing of results.

College of Nursing (Health Science Center) Traditional, Second Degree and RN to BSN

Course Credit

Testing Services

Testing Services has primary responsibility for conducting research about students’ learning and development at Texas A&M and for management of testing programs. The unit serves as the center for credit by examination, placement testing and correspondence testing, as well as national standardized testing. Other services include publication of research reports about student characteristics and abilities, test validation studies and evaluation studies, scanning and scoring services, and student ratings of faculty.

Credit by Examination

Undergraduate students at Texas A&M may earn course credits by demonstrating superior achievement on tests offered through several examination programs. Credit by examination is available to freshmen who plan to enter the University and to students who are currently enrolled. Credit earned by examination does not contribute to a student's grade point ratio. The University awards credit for scores on certain tests published by the Advanced Placement Program (AP), the College Level Examination Program Computer-Based Testing (CLEP CBT), the SAT Subject Tests, DANTES Subject Standardized Tests (DSST) and the International Baccalaureate (IB) Program. Texas A&M also offers...
qualified students opportunities to earn credits by taking departmental examinations prepared by the faculty. Information concerning credit by examination may be obtained from Testing Services (http://dars.tamu.edu), (979) 845-0532.

Please note these regulations concerning credit by examination:

1. Test scores and/or credit eligibility must be reported formally to Testing Services for credit by examination to be awarded. Credit is posted to the academic record once appropriate scores are received by Testing Services, the student has officially enrolled in the University and the student has accepted the credit. For information regarding current procedures for accepting credit, please visit the Testing Services website.

2. Students may not receive credit by examination for courses that are prerequisites to courses for which they already have credit except with the approval of the department authorizing the examination.

3. A student may not have credit posted for credit by examination for a course in which he or she is currently registered. If a student has acquired a grade or exercised First-Year Grade Exclusion on a course, then the student will not be eligible to take the equivalent departmental exam. Eligibility will not be affected if a student has a Q, W or NG in a course.

4. Please note that once any credit has been accepted it cannot be removed.

Advanced Placement Program (AP)

Examinations offered by the AP Program are administered during late spring by high schools. Students usually take the examinations after completing Advanced Placement courses, although experience in an AP course is not required. Interested students should contact their high school counselors for information concerning registration and test sites. High school students and currently enrolled students should have the College Board forward their scores to Testing Services, institution code: 6003. Advanced Placement scores of entering freshmen are generally received in July. Students will need to log onto their Howdy portal under My Records and then Credit by Exam to accept the credit earned via AP tests. Testing Services suggests visiting with your advisor before you accept credit.

The following list includes all AP examinations currently accepted for credit.

AP Research: Test scores and/or credit eligibility must be reported formally to Testing Services for credit by examination to be awarded. Credit is posted to the academic record once appropriate scores are received by Testing Services, the student has officially enrolled in the University and the student has accepted the credit. For information regarding current procedures for accepting credit, please visit the Testing Services website.

AP Seminar: Students may not receive credit by examination for courses that are prerequisites to courses for which they already have credit except with the approval of the department authorizing the examination.

Art History: A student may not have credit posted for credit by examination for a course in which he or she is currently registered. If a student has acquired a grade or exercised First-Year Grade Exclusion on a course, then the student will not be eligible to take the equivalent departmental exam. Eligibility will not be affected if a student has a Q, W or NG in a course.

AP Research: Please note that once any credit has been accepted it cannot be removed.
Students must consult their academic advisor for advice on the number of credits that can be used in their degree program to avoid excessive credit accumulation and possible negative effects.

For instructions on accepting AP credit, please visit our website (http://dars.tamu.edu).

**College Level Examination Program Computer-Based Testing (CLEP CBT)**

CLEP CBT tests are designed to evaluate nontraditional college-level education such as independent study, correspondence work, etc. Both enrolled undergraduate students and entering freshmen may receive CLEP CBT credit for the courses which are listed below. Only examination titles below are currently accepted. The minimum scores listed below are based on the current version of CLEP CBT Examinations. Students will need to log onto their Howdy portal under My Records and then Credit by Exam to accept the credit earned via CLEP tests. Testing Services suggests visiting with your advisor before you accept credit.

International Baccalaureate (IB)

Texas A&M University, in compliance with SB111, will grant at least 24 semester credit hours of course-specific college credit in subject-appropriate areas on all International Baccalaureate (IB) exam scores of 4 or above as long as the incoming freshman has earned an IB diploma. While some course credit will be awarded regardless of a student’s IB diploma status, some course credit at Texas A&M University may be subject to the successful completion of the IB diploma.

Entering freshman students should submit their International Baccalaureate transcript to Texas A&M University, institution code: 01355, for review. Students should contact Testing Services regarding their eligibility for course credit. Students should work with an academic advisor to determine the use of the IB credits in their individual degree plan and the impact accepting the credit may have upon tuition rebate eligibility, tuition charges for excessive total hours, and preparedness for sequential coursework based on IB test scores. Students will need to log onto their Howdy portal under My Records and then Credit by Exam to accept the credit earned via IB tests. Testing Services suggests visiting with your advisor before you accept credit.

Texas A&M University will notify IB applicants of their eligibility to receive credit by posting information on the website, Testing Services, and by establishing links to other web pages.

The evaluation of IB courses in order to identify the appropriate course credit is continuing and will be posted as it becomes available. The following list includes all IB examinations currently accepted for credit.

The minimum score required is based on the recentered scale. Students who took tests before April 1, 1995, should contact Testing Services to determine the minimum score required. For instructions on accepting SAT Subject credit, please visit our website (http://dars.tamu.edu).

### Departmental Examinations for Entering Freshmen and Currently Enrolled Students

Qualified entering freshmen may take departmental tests after being officially admitted into Texas A&M University. Currently enrolled students can also take the exams throughout the year. Contact Testing Services (http://dars.tamu.edu) for registration information. The tests are prepared by participating Texas A&M departments. Current offerings include:

Graduate Admission

Graduate Admission

For information or applications for graduate admission, please contact:

Office of Graduate Admissions
Texas A&M University
P. O. Box 40001
College Station, TX 77842-4001
(979) 845-1060
graduate-admission@tamu.edu
http://admissions.tamu.edu/graduate

Please reference the Texas A&M University Graduate and Professional Catalog on this website.

Galveston

Texas A&M University Galveston Campus

Texas A&M University Galveston campus offers ocean oriented undergraduate and graduate curricula leading to Texas A&M University degrees in Maritime Studies, Marine Biology, Marine Engineering Technology, Marine Fisheries, Marine Sciences, Marine Transportation, Maritime Administration, Ocean and Coastal Resources and University Studies (with concentrations in Oceans and One Health, Marine Environmental Law and Policy, Maritime Public Policy and Communication, and Tourism and Coastal Community Development). Graduate curricula are offered in Marine Resource Management (master’s level), Marine Biology (master’s and doctoral levels) and Maritime Administration and Logistics (master’s level). Applicants who wish to enroll must meet all requirements for admission as specified in the online catalog for the Texas A&M University Galveston campus. Admission information for Texas A&M University Galveston campus may be obtained from the Office of Student Relations in Galveston. Results of the Scholastic Aptitude Test (Code 6835) or American College Test (Code 6592) should be sent directly to Texas A&M University Galveston campus. The Texas A&M Maritime Academy at Texas A&M University Galveston campus offers a training program concurrently with four undergraduate programs. These programs lead to licensing as a merchant marine officer.

For further information, see the section on Texas A&M University Galveston campus or www.tamug.edu.

Registration and Academic Status

Registration and Academic Status

Registration for the fall and spring semesters is accomplished at several times. During the fall and spring semesters (in November and April), a preregistration period is held for currently enrolled and readmitted students to register for the next semester. There are periods of announced open registration for students who were unable to preregister during the scheduled preregistration period. New Student Conferences serve as an opportunity for new undergraduate students to register. Further information concerning registration may be obtained from the academic calendar published in this catalog or from the Office of the Registrar. The schedule of classes is available online.

Full-Time Student

A full-time undergraduate student is defined as one who is registered for 12 semester hours during a fall or spring semester or 8 hours in a summer semester. Full-time enrollment for federal financial aid is always defined as 12 semester hours, including the summer term. A Q grade or W grade does not count toward the certification of enrollment status. Only hours for which a student is currently enrolled at Texas A&M University can be used toward certification of enrollment.*

* - Students participating in the Blinn TEAM program or the TAMU Engineering Academy at Blinn Bryan program may have unique enrollment certification specifications based on the program agreements. Enrollment status for students in these programs is reported to the National Student Clearinghouse by Texas A&M University and includes enrolled hours from both institutions. Students can obtain enrollment verification which will reflect this enrollment status from the National Student Clearinghouse through Howdy. Students alternatively requesting enrollment verification directly from the Texas A&M University Registrar’s Office on TAMU letterhead are provided enrollment verification of Texas A&M University enrolled hours ONLY. Students may also consider obtaining a verification of their enrollment from Blinn College that will reflect their Blinn enrollment.

Undergraduates Registering for Graduate Courses

A senior undergraduate student with a cumulative grade point average of at least 3.0 or approval of his/her academic dean, is eligible to enroll in a graduate course and reserve it for graduate credit by filing a petition obtained from the student’s undergraduate college and approved by the course instructor, the student’s major department head, the dean of the college offering the course, and the dean of the student’s undergraduate college.

An academically superior undergraduate student with a cumulative grade point average of at least 3.25 or approval of his/her academic dean, is eligible to apply graduate credit hours toward his/her undergraduate degree program by filing a petition obtained from the student’s undergraduate college and approved by the course instructor, the student’s major department head, the dean of the college offering the course, and the dean of the student’s undergraduate college. Graduate
credit hours used to meet the requirements for a baccalaureate degree may not be used to meet the requirements for a graduate degree.

VA Benefits
Students who are military veterans should note that to receive full VA benefits they must be registered for enough hours to be considered full-time for their degree during each term they are seeking benefits. This number may differ between degrees and during the summer semester. For hour requirements, please visit Veterans Services.

Maximum Schedule
An undergraduate student with an overall grade point average of 3.0 or better may register for a course load in excess of 19 hours in a fall or spring semester with the approval of his or her advisor. An undergraduate student with an overall grade point average of less than 3.0 must obtain approval of his or her dean before registering for a course load in excess of 19 hours in a fall or spring semester.

Classification
Each student has a classification which indicates the type of degree program in which the student is enrolled, and reflects the student’s progress within that program. The classifications are:

<table>
<thead>
<tr>
<th>Code</th>
<th>Classification Definition</th>
</tr>
</thead>
<tbody>
<tr>
<td>U0</td>
<td>Undergraduate Non-degree</td>
</tr>
<tr>
<td></td>
<td>Students with a high school diploma (with the exception of high school concurrent enrollment participants) who do not intend to pursue a baccalaureate degree at Texas A&amp;M University. This includes:</td>
</tr>
<tr>
<td></td>
<td>a. Summer session only students.</td>
</tr>
<tr>
<td></td>
<td>b. Local residents or university employees taking courses on a part-time basis.</td>
</tr>
<tr>
<td></td>
<td>c. Others as may be deemed appropriate by the Office of Admissions and the college or program of admission.</td>
</tr>
</tbody>
</table>

Undergraduate non-degree students are not permitted to enroll in courses until all degree seeking students have had the opportunity to enroll. Undergraduate non-degree enrollment begins on the first day of open registration. Enrollment may be limited by college or program policies. Admitted students are not eligible for refund of the admission processing fee regardless of course availability.

An undergraduate non-degree student must maintain a 2.0 GPA on all coursework attempted to remain eligible to register. Enrollment is subject to review at the end of each semester of enrollment. Enrollment beyond two years of attendance will be approved only in exceptional cases.

Should an undergraduate non-degree student desire admission to a degree program, regular formal application is necessary, including: a complete application for admission, the required application processing fee, the submission of all required credentials, and the meeting of all admission requirements.

An undergraduate non-degree student may not take graduate-level coursework.

Undergraduate non-degree students are subject to TSI and English proficiency requirements.

An undergraduate non-degree student does not qualify for financial aid through the University.

With few exceptions, undergraduate non-degree status is not available to international students.

| U1   | Freshman 0-29 hours |
| U2   | Sophomore 30-59 hours |
| U3   | Junior 60-89 hours |
| U4   | Senior 90+ hours |
| U5   | Postbaccalaureate Undergraduate |

Students with a recognized baccalaureate degree who wish to complete requirements for a second baccalaureate degree at Texas A&M University or to complete established Texas A&M University certification requirements.

The postbaccalaureate undergraduate classification (U5) has all the privileges and responsibilities of a senior classification (U4).

Recipients of a Texas A&M University baccalaureate degree are not eligible for continued enrollment unless they have the specific approval of the college offering the second bachelor’s degree or certification. Should they break enrollment, they must apply for readmission as second bachelor’s degree candidates.
Scholastic Probation
Scholastic probation is conditional permission for an undergraduate student to continue in the University after he or she has become scholastically deficient. For university policy regarding scholastic deficiency and scholastic probation, see the Texas A&M University Student Rules (http://student-rules.tamu.edu).

Withdrawal from the University
An official withdrawal from the university will result when a student drops all in progress and courses not yet started in a particular term. A student who withdraws from the university before the completion of a semester or summer term is required to comply with the official withdrawal procedure. This process is initiated by submitting a request through the Student Withdrawal channel on the My Record tab in the Howdy portal. Students may not withdraw after the Q-drop deadline. The student’s dean will retain the authority to support a student withdrawal after the deadline.

If a student is enrolled in one or more inter/intra-session (“minimesters”) or summer terms and chooses to withdraw, all current and future in progress courses for the entire semester will be dropped. The student will be ineligible to register for courses for the remainder of that semester.

For university policy regarding withdrawal, see the Texas A&M University Student Rules (http://student-rules.tamu.edu).

Correct Addresses
It is necessary to have a correct residence address on file with the University. Students may change their address in Howdy. International students must have a correct physical and permanent address. International students must go to International Student Services to change their physical and permanent addresses.

Texas A&M may also use email for official communications. It is each student’s responsibility to claim his/her Texas A&M University email account (http://gateway.tamu.edu) and to check that account on a frequent and consistent basis.

Academic Status

Distinguished Student and Dean’s Honor Roll
An undergraduate student who completes a semester schedule of at least 15 graded hours or a summer session schedule of at least 12 graded hours with no grade lower than C and with a grade point average of not less than 3.5 for the semester or for a summer session shall be designated “distinguished student.” A student who, under the same circumstances, achieves a grade point average of at least 3.75 shall also be designated as a member of the “dean’s honor roll.” First semester freshmen must complete a semester schedule of at least 15 hours with no grade lower than a C, no Q-drops and with a grade point average of not less than 3.5 for “distinguished student” designation and a 3.75 for “dean’s honor roll.” Official notification of these designations will be issued to the student by the dean of the student’s college. The hours earned with a grade of S shall not be included in determining minimum hours required for the designation of “distinguished student” or “dean’s honor roll.” A grade of I or U disqualifies a student from being considered as a “distinguished student” or for the “dean’s honor roll.” Grades of Q, W, and NG may not be included in the 15 graded hours. Only undergraduate courses or graduate courses used for the undergraduate degree will be used in either calculation.

Scholastic Probation
Scholastic probation is conditional permission for an undergraduate student to continue in the University after he or she has become scholastically deficient. For university policy regarding scholastic deficiency and scholastic probation, see the Texas A&M University Student Rules (http://student-rules.tamu.edu).

Grading System

Because students attend a college or university to extend their education, grades are usually given as an indication of the proficiency of their endeavors. The student’s semester grade in a course shall be based upon performance and/or participation in class, exercises and tests, laboratory work and final examination as applicable to the course. The proportionate weight assigned to each of the factors shall be determined by the department administering the course.

The basis upon which the final grade will be determined shall be distributed in written form to the class during the first class meeting.

There are five passing grades at the undergraduate level, A, B, C, D and S, representing varying degrees of achievement; these letters carry grade points and significance as follows:

<table>
<thead>
<tr>
<th>Grade</th>
<th>Definition</th>
</tr>
</thead>
<tbody>
<tr>
<td>A</td>
<td>Excellent, 4 grade points per semester hour</td>
</tr>
<tr>
<td>B</td>
<td>Good, 3 grade points per semester hour</td>
</tr>
<tr>
<td>C</td>
<td>Satisfactory, 2 grade points per semester hour</td>
</tr>
<tr>
<td>D</td>
<td>Passing, 1 grade point per semester hour</td>
</tr>
<tr>
<td>F</td>
<td>Failing, no grade points, hours included in GPA calculation</td>
</tr>
<tr>
<td>I</td>
<td>Incomplete, no grade points, hours not included in GPA calculation</td>
</tr>
</tbody>
</table>
NG  No grade, grade removed from record, no grade points, hours not included in GPA calculation
Q  Course dropped with no penalty, no grade points, hours not included in GPA calculation
S  Satisfactory (C or above), no grade points, hours not included in GPA calculation
U  Unsatisfactory (D or F), no grade points, hours included in GPA calculation
X  No grade submitted, no grade points, hours not included in GPA calculation
W  Withdrew, no grade points, hours not included in GPA calculation (effective Spring 1996)
F*  Aggie Honor Code violation, no grade points, hours included in GPA calculation

There are two failing grades, F and U, indicating work of unsatisfactory quality.

Repetition of a Course to Improve Grade

Any undergraduate student who wishes to repeat a course must do so before he or she completes a more advanced course in the same subject. What constitutes a more advanced course will be determined by the head of the department offering the course.

Credit for a course failed may be obtained only by registering for and repeating the course. The original grade will remain on the student’s permanent record, and both grades will be used in computing the GPA. An F or U previously earned is not removed once the course is passed. Credit for each repeated course may only be used once toward degree requirements.

A student repeating a course completed at Texas A&M University in which a grade of B or better has been earned will not receive grade points for the repeated course, unless the catalog states the course may be repeated for credit.

I and X Grades

A temporary grade of I (incomplete) at the end of a semester or summer term indicates that the student has completed the course with the exception of a major quiz, final examination or other work. The instructor shall give this grade only when the deficiency is due to an authorized absence or other cause beyond the control of the student. When an instructor reports an incomplete grade to the Office of the Registrar, he or she will fill out an “Incomplete Grade Report,” which is filed with the head of the department in which the course is taught. Copies are sent to the student and to the student’s academic dean. This report includes:

1. a statement of the instructor’s reason for awarding the incomplete grade and
2. a statement concerning the remaining work to be completed.

The remaining work must be completed before the last day of scheduled classes of the next fall or spring semester in which the student enrolls in the University unless the student’s academic dean, with the consent of the instructor (in the absence of the instructor, the department head), grants an extension of time for good reason. If the incomplete work is not completed within this time or if the student registers for the same course again, the I will be changed to an F by the Office of the Registrar.

The X notation is assigned to a course by the Office of the Registrar at the end of a semester or summer term only when a grade is not submitted by the instructor. The Office of the Registrar will notify the dean of the college in which the course is taught that an X notation has been made. The dean of the college offering the course will request, through the department head, that the instructor submit a Grade Change Request online in Howdy, removing the X notation and assigning a grade. The instructor will have 30 days from the beginning of the succeeding semester or summer term to report a change of grade to the Office of the Registrar. If a Grade Change Request is not received during this time period, the Office of the Registrar will automatically remove the X notation and assign a grade of F.

Q-Drop and Add and Drop

1. A student may enroll in a class during the first five class days of a fall or spring semester or during the first four class days of a summer term. A student requesting to add a course after these deadlines must have the approval of the student’s dean or designee and department.

2. A student may drop a course with no record during the first 12 class days of a fall or spring semester and during the first four class days of a summer term. Following this period, if approved by the dean of the college or his or her designee, a student may drop a course without penalty through the 60th class day of a fall or spring semester, the 15th class day of a summer term or the 35th class day of a 10-week summer semester. The symbol Q shall be given to indicate a drop without penalty.

Under section 51.907 of the Texas Education Code, “an institution of higher education may not permit a student to drop more than six courses, including any course a transfer student has dropped at another institution of higher education.” Any course that a student drops is counted toward the six-course limit if “(1) the student was able to drop the course without receiving a grade or incurring an academic penalty; (2) the student’s transcript indicates or will indicate that the student was enrolled in the course; and (3) the student is not dropping the course in order to withdraw from the institution.” Some exemptions for good cause could allow a student to drop a course without having it counted toward this limit, but it is the responsibility of the student to establish that good cause.

Undergraduate students at Texas A&M University will normally be permitted four Q-drops during their undergraduate studies. However, in order to comply with this statute a student who has dropped courses at other Texas public institutions may not be permitted four Q-drops if the student’s total number of dropped courses would exceed the State limit of six.

3. Any course taught on a shortened format or between regularly scheduled terms will have add/drop, Q-drop and withdrawal dates proportionally the same as if the course were offered in a regular term. These dates will be determined by the Office of the Registrar.

4. After the Q-drop period has elapsed, a course may be dropped and a grade of W recorded if the student’s dean determines that unusual circumstances exist to warrant a late drop.
Satisfactory/Unsatisfactory

Undergraduate students may be permitted to take courses in their degree programs at Texas A&M University on a satisfactory/unsatisfactory (S/U) basis consistent with the requirements of the student’s college. The hours for which a student receives a grade of satisfactory shall not be included in the computation of the student’s semester or cumulative GPA; a grade of unsatisfactory shall be included in the computation of the student’s grade points per credit hour as an F. A grade of satisfactory (S) will be given only for grades of C and above; a grade of unsatisfactory (U) will be given for grades D and F. The hours earned on a satisfactory/unsatisfactory basis shall not be included in the designation of distinguished student or dean’s honor roll.

Students on probationary standing may be required to take electives on an S/U basis as determined by published college policies.

Students must register for courses on an S/U basis during the official registration periods and shall not be permitted to change the basis on which their grades will be recorded on their official transcripts, except for unusual circumstances and with the approval of the student’s academic dean.

Students registered for KINE 198 or KINE 199 who wish to change the grade type from a graded course to S/U or from S/U to a graded course, may do so in Howdy. All requests for KINE 198 and KINE 199 changes must be completed on or before the Q-drop deadline for the fall, spring or summer semester.

Semester Credit Hour

A lecture course which meets one hour per week for 15 weeks is worth 1 semester credit hour. Thus, a course worth 3 semester credit hours, meets three hours per week. Credit hours for laboratory courses are determined to be some fraction of the number of hours spent in class.

The Texas Higher Education Coordinating Board defines minimum course lengths as part of the Texas Administrative Code, "Minimum Length of Courses and Limitation on the Amount of Credit that a Student May Earn in a Given Time Period". For more information, please see the Texas Administrative Code online (http://texreg.sos.state.tx.us/public/readtac SextTacPage?sl=T&app=9&p_dir=N&p_rloc=162966&p_tloc=1&p_ploc=1&pg=2&p_tac=18&pt=1&ch=4&it=5)

Grade Point Average (GPA)

Only the grade earned in coursework for which the student was registered in this institution shall be used in determining his or her grade point average. Students anticipating graduating with honors should refer to that section of this catalog for information concerning the computation of grade point averages for that purpose.

A student’s grade point average for any period shall be computed by dividing the total number of semester hours for which he or she received grades into the total number of grade points earned in that period. Semester credit hours to which grades of F or U are assigned shall be included; those involving grades of W, Q, S, X, I, and NG shall be excluded.

Classification

Classification for academic purposes shall be based solely on scholastic progress as shown by the official records in the Office of the Registrar. Sophomore, junior and senior classification will be granted students who have passed 30, 60 and 90 semester hours, respectively.

Grade Reports

Mid-semester Report

Near the middle of the fall and spring semesters, a preliminary report, showing the current progress of undergraduate students who have completed less than 30 semester credit hours of coursework at Texas A&M, and of a selected group of other students that the academic deans/departments are monitoring, will be made available. Preliminary grades are not recorded on the student’s permanent record. Grades are available in Howdy.

Final Grade Report

End of semester final grades are available in Howdy. No student grade may be posted in a manner that is personally identifiable unless the student has given written consent in advance.

Parent/Guardian Access to Grades

A parent or guardian may access midterm and final grades in Howdy after the student sets the parent access password. The Office of the Registrar cannot access the passwords created by students for parental access.

Transcripts

Students applying for admission to Texas A&M are required to submit transcripts of previous academic work and in some cases, results of standardized tests. The submission of altered documents or the failure to furnish complete and accurate information on admission forms will be grounds for disciplinary action.

Individuals who have attended the University may obtain an official transcript of their completed work, provided they have no financial obligations to the University. A fee, which, according to state law must be paid in advance, will be charged for each copy. During grading and degree posting, official transcripts may be produced for enrolled students only if all courses for that semester or term are shown as in progress (IP) or have all final grades posted. Students and former students may submit a Transcript Request Order form in person, by mail, by fax or by completing the transcript request form in the Howdy portal. Transcript requests will not be accepted over the phone. A faxed request must be paid using a credit card from a United States bank. A Transcript request ordered through the Howdy portal must be paid either by electronic check (ECH) or by credit card from a United States bank. Requests made in person or by mail may only be paid with check, money order or a credit card.

Housing

Off-Campus Student Services

http://ocss.tamu.edu

AggieSearch provides students access to apartment and property listings, as well as roommate search options.

The Off Campus Survival Manual (OCSM) introduces students to the community and provides information regarding leases, transportation, security deposits, the BCS community, and more.

On-Campus Housing and White Creek Apartments

http://reslife.tamu.edu
Admission to the University is required prior to applying for campus housing. Undergraduate students can apply for campus housing online. Applications should be completed as soon as possible following admission since the date of application for housing is important in the housing assignment process. An application fee and housing deposit (or applicable deferral) are required at the time of application.

On-campus housing is assigned on a first-come, first-served basis. With the exception of the Corps of Cadets, students are not required to live on campus at Texas A&M.

**University Apartments (The Gardens)**
http://reslife.tamu.edu/apartments

Available for graduate students, married students, students with dependent children, international students, U.S. military veteran students, students who are at least 21 years old, or undergraduate students who have completed at least 30 credit hours.

Fully furnished one- and two-bedroom units are available. Rent for The Gardens can be monthly or by semester and includes furniture, parking, cable TV service and high-speed Internet. Students pay electricity. All leases are either 9- or 12-month leases.

Application forms, rental rates and additional information may be obtained online.

**Orientation**

**Orientation New Student Conferences**
http://newaggie.tamu.edu

- Held each year for undergraduate students entering Texas A&M University. New students are required to register for and attend a conference in order to accept their offer of admission and register for classes.
- During the conference, new students learn about valuable University services and meet with academic advisors for curriculum advisement and selection of first semester courses.
- Additional services and programs from the Office of New Student and Family Programs: http://studentlife.tamu.edu/nsfp
  - Howdy Week: Aggieland’s Week of Welcome - held the week before Fall classes begin
  - Family Member support and outreach including a family listserv open to all Aggie families
  - Publications for incoming students and family members - New Student Handbook and Aggie Family Calendar
  - Family Weekend - held each Spring
  - Advisement of Aggie Orientation Leader Program and Family Weekend Committee

**Aggie Honor Code**

Integrity is a fundamental core value of Texas A&M University. Academic integrity requires a commitment by all faculty, students, and administrators to:
- Remain constantly focused on the quality of the academic programs;
- Achieve and maintain academic excellence in all courses and programs to assure the value of Texas A&M University degrees;
- Demand high academic standards from all members of the Aggie community.

All Texas A&M University students, graduate and undergraduate, part-time or full-time, in residence or in distance education, are expected to follow the guiding rule of the Aggie Honor Code:

“An Aggie does not lie, cheat, or steal or tolerate those who do.”

Upon accepting admission to Texas A&M University, a student immediately assumes a commitment to uphold the Honor Code, to accept responsibility for learning, and to follow the philosophy and rules of the Honor System, which may be found at http://aggiehonor.tamu.edu. A student will be required to state his/her commitment on examinations, research papers, and other academic work. Ignorance of the rules does not exclude any member of the Texas A&M community from the requirements or the processes of the Honor System.

The Honor System Office is charged with promotion of the honor code and administration of academic misconduct cases. The Honor Council, comprised of students and faculty from colleges and offices across the University, will investigate all such infractions of the honor code and recommend appropriate sanctions. The office website, http://aggiehonor.tamu.edu, defines the types of infractions and the possible consequences. Students are urged to review this information.

In addition to adherence to the Honor Code, a student (graduate students in particular) who is completing a thesis, record of study, dissertation, and publication may fall under the additional federal requirements promulgated by the Office of Research Integrity (Scientific Misconduct Regulations – 42 CFR part 50), as well as Texas A&M System Regulations and Texas A&M University Rules (Texas A&M System Regulations – Ethics in Research and Scholarship – 15.99.03, and Texas A&M University rules and standard administrative procedures – Responsible Conduct in Research and Scholarship – 15.99.03.M1, 15.99.03.M1.01-06).

**Aggie Honor System Office**
http://aggiehonor.tamu.edu

All Texas A&M students, graduate and undergraduate, part-time or full-time, in residence or in distance education, are expected to follow the guiding rule of the Aggie Honor Code: “An Aggie does not lie, cheat, or steal or tolerate those who do.”

Upon accepting admission to Texas A&M University, a student immediately assumes a commitment to uphold the Honor Code, to accept responsibility for learning, and to follow the philosophy and rules of the Aggie Honor System Office (see http://aggiehonor.tamu.edu). Students will be required to state their commitment on examinations, research papers, and other academic work. Ignorance of the rules does not exclude any member of the Texas A&M community from the requirements or the processes of the Aggie Honor System Office.

**Extended Orientation**

**ExCeL Program**
http://excel.tamu.edu

Texas A&M University’s Excellence uniting Culture, Education, and Leadership (ExCEL) is a student organization and freshman involvement
program designed to help freshmen find academic, social, and personal balance at Texas A&M by fostering a community where they can culturally identify. Since 1987, ExCEL has assisted freshmen in making a smooth transition from high school to college by orienting freshmen to the program through a conference, cultivating relationships between peers and mentors, providing a sense of belonging through cultural communities, offering academic support services, and serving as a resource for transitioning into Aggie life.

ExCEL launches with the ExCEL Conference the Friday before fall classes. During the conference, students become familiar with the year-long program, as they are assigned upper-class peer mentors and a peer group of freshmen. The Conference consists of motivational speakers, dialogue within the ExCEL cultural communities, introduction to developmental series focused on personal development, and meet and greet mentor activities. Following the Conference, academic, social, and cultural activities begin through the close of the spring semester. Activities include cultural community events, seminar series covering various relevant topics, mentor engagement activities, study halls, community service projects, and socials!

While ExCEL is a student-run program, you may also obtain information by contacting the Department of Multicultural Services at 979.862.2000 or in Suite 2200 in the Memorial Student Center.

Fish Camp
http://fishcamp.tamu.edu

Fish Camp is a student-run, extended orientation program intended to provide incoming freshman students the opportunity to establish friendships, meet student leaders, become familiar with Aggie traditions, and learn about Texas A&M campus life. Faculty and staff members speak on topics such as study habits, personal goals, Aggie traditions and history, involvement, and campus services. Held during a three-week period preceding the fall semester, each four-day, three-night session is designed to aid students in the transition from high school to college and, particularly, to Texas A&M.

In addition to providing educational programs, group activities, and small group discussions, the camp allows students to get to know each other through recreation, intramural sports, and evening theme mixers. Fish Camp is not just a four-day experience in August; activities and camp hangouts continue into the Fall semester. For more information on Fish Camp and how to register for a session, please visit our website.

Howdy Camp
http://atc.tamu.edu

Occurring every January, Howdy Camp is a three-day, two-night extended orientation camp hosted by Aggie Transition Camps for all students entering Texas A&M University in the spring semester.

Howdy Camp is the spring semester’s equivalent to Fish Camp and T-Camp, and offers a great way for incoming students to find community before classes begin. At Howdy Camp, new Aggies are introduced to the many traditions, indescribable spirit, and customs of Aggieland. Additionally, Howdy Camp doesn’t end when the bus leaves camp! Counselors continue to be available and serve as resources during the semester as students complete their transition into Texas A&M. Aggie Transition Camps is a sponsored student organization at Texas A&M University.

T-Camp
http://atc.tamu.edu

Held in August each year, T-Camp is a three-day, two-night extended orientation camp experience for transfer and other non-traditional students entering Texas A&M in the summer and fall semesters. Through staff presentations, student skits, and small group discussion time, new students will leave camp with knowledge about Texas A&M campus resources and many new friends.

Additionally, T-Camp doesn’t end when the bus leaves camp! Your counselors will continue to be available and serve as resources as you complete your transition into Texas A&M. Counselors will be at the T-Camp Backyard Bash during Gig ‘Em Week, will show you around the MSC Open House, and will plan frequent camp hangouts. Counselors will also coordinate campus tours so that you are not lost on your first day! T-Camp is hosted by Aggie Transition Camps, a sponsored student organization at Texas A&M University.

Venture Camp: Base Camp
http://venturecamp.tamu.edu

Venture Camp: Base Camp, the inaugural program under the Venture Camp umbrella, is an outdoor, six-day, five-night extended orientation experience that occurs in July and takes place both on the Texas A&M main campus and also in the Texas Hill Country. A collaborative program hosted by the Departments of Student Activities and Recreational Sports, Base Camp involves numerous outdoor adventures including hiking, rock climbing, camping, and paddling a river. Staff and students from Outdoor Adventures guide the trip activities during the day, and in the evening campers gather back at the campsite to participate in peer-led large and small group discussions about college and life at Texas A&M. No prior outdoor experience is required, but a willingness to be an active participant and a team player is very important! A much smaller program than the other summer extended orientation programs, Base Camp offers a more intimate extended orientation experience while also providing information important to students transitioning into college life.

Venture Camp: Veterans

Venture Camp: Veterans is the newest extended orientation program and will launch the first session in August of 2017. A collaborative effort between the Departments of Student Activities, Recreational Sports, and the Veterans Resource & Support Center, Venture Camp: Veterans is a two-day program designed to offer a combination of outdoor experiences such as paddling a river and/or rock climbing off-campus as well as peer-led, on-campus activities designed to create greater senses of confidence and competence for incoming students learning to navigate the Texas A&M campus and community. Interested individuals can learn more by contacting Sarah Edwards at sedwards@stuact.tamu.edu. (sedwards@stuact.tamu.edu)

Academic Advising

- Academic advising is a collaboration between a student and an academic advisor. Through teaching and learning experiences, the student sets goals, acquires information and services, and makes decisions consistent with interests, goals, abilities and degree requirements.
- Academic advising at Texas A&M University is an important component of student learning, contributing to the success of all students through:
  - Supporting student achievement of the University Learning Outcomes and commitment to learning for a lifetime
  - Being responsible to and respectful of the individual student
  - Encouraging commitment to lifetime learning by directing students toward opportunities to interpret, reflect upon, and apply their classroom experiences in ways relevant to their careers and their lives
  - Interpreting and conveying Texas A&M University’s mission to students
  - Supporting the educational policies, procedures and values of the department, college and university, likewise, academic advising relies on the support and resources of the university, college and department
  - Involving other university programs, services and individuals, when appropriate in the advising process
  - Being responsible for professional academic advising, training, development and practices

Academic Success Center

Career Center

HireAggies.com

- The Texas A&M University Career Center provides comprehensive services to students in planning their careers, gaining work-related experience, seeking admission to graduate and professional school, and securing professional employment upon graduation. Our goal is to assist you every step of the way, from your freshman year through graduation, and after, as a Former Student. We offer a variety of programs, services and resources:
  - Career Exploration, Assessment, and Planning
  - Job Search Tools, Resume Writing, Interview Preparation
  - Professional Networking Resources and Events
  - Full-time positions, Internships, Externships, and Cooperative Education
  - Assistance with Professional and Graduate School applications and interviews
  - Presentations to Classes and Student Organizations, Workshops and Panel Discussions, Career Fairs, and Webinars
  - Employer Contacts, Campus Recruiting
  - Individual appointments, Walk-in Advising, Mock Interviews

One of the largest programs of its kind in the nation, the Career Center has been recognized nationally and regionally for our many Best Practices. In a Wall Street Journal survey, recruiters ranked Texas A&M as the second most preferred university in hiring college talent nationwide. The Career Center can be found online at HireAggies.com (http://HireAggies.com) and is located in the Koldus Building, Suite 209. You can also find us on Facebook, follow us on Twitter, Snapchat and Instagram, and view us on YouTube.

Consensual Language, Education, Awareness and Relationships (CLEAR)

CLEAR is dedicated to reducing violence in Aggieland by educating students, faculty, and staff about power-based interpersonal violence and how Aggies can work to prevent it. CLEAR advises one student organization, Student Anti-Violence Educators (SAVE).

We offer presentations on a variety of topics, including the following:

- Sexual violence
- Sexual harassment
- Domestic/dating violence
- Stalking
- Healthy/respectful intimate relationships
- Consent

To request a presentation on any of these topics, visit our website at https://studentlife.tamu.edu/clear or email CLEAR at clear@studentlife.tamu.edu
For presentations on Green Dot Bystander Intervention Program visit http://greendot.tamu.edu

For more information on Texas A&M’s Step In Stand UP Campaign visit http://stepinstandup.tamu.edu

**Disability Services**
http://disability.tamu.edu

- Reviews and maintains student disability documentation
- Determines appropriate accommodations
- Facilitates exam accommodations
- Provides sign language interpreting and transcription services
- Obtains course materials in alternative formats
- Consults on disability-related issues

**Gay, Lesbian, Bisexual, Transgender (GLBT) Resource Center**
http://glbt.tamu.edu

Resource and Referral Center that provides:

- Resource Library (Books, Periodicals, Brochures and Films)
- Programming
- Education
- Advocacy
- Leadership Development
- Visibility

**George Bush Presidential Library and Museum**
http://Bush41.org

The George Bush Presidential Library and Museum at Texas A&M University is dedicated to preserving and making available the records and artifacts of George H.W. Bush, 41st President of the United States. We promote civic literacy and increased historical understanding of our national experience, and foster a community of public service and volunteerism. We accomplish this mission by offering:

- Rich Educational and Public Programs
- Original Museum Exhibits
- Access to our Archival Holdings
- Research Opportunities
- Special Events
- Unique Volunteer and Internship Positions
- Foundation Memberships

The George Bush Presidential Library and Museum can be found online at http://Bush41.org and is located at 1000 George Bush Drive West, College Station, Texas 77845. For additional information on the resources the George Bush Presidential Library and Museum have to offer please call 979-691-4000 for all Museum inquiries or 979-862-2251 for all Foundation or Membership inquiries.

**Health Promotion**
http://studentlife.tamu.edu/hp

- Provide educational health information and consultation
- Alcohol and Other Drugs, Nutrition, Reproductive Health, Sexual Health, Stress Management, etc.
- Presentations available upon request
- Body fat analysis
- Peer health educator training and outreach
- Resource tables or interactive programming available for student events

**International Student Services**
http://iss.tamu.edu

International Student Services provides the following support services to international students (defined as students who are not U.S. citizens or lawful permanent residents):

- Pre-arrival information
- Certificates of Eligibility (Forms I-20 and DS-2019)
- On-line Orientation and International Student Conference
- Represent the University with the Department of Homeland Security, Department of State and the Student Exchange Visitor Information System (SEVIS)
- Assist students with federal immigration regulation compliance
- Advising
- Liaison for students, university and community
- International student employment information
- Administration of some international student scholarships and loans
- Coordinate with the Texas A&M University System Student Health Insurance Plan provider and students
- Community involvement activities

International Student Services also provides these additional services to sponsored students:

- Liaison between academic departments, students and sponsors
- Acts as admission liaison for sponsored students and sponsors
- Assist with contractual agreements between the students and sponsors
- Liaison for sponsors and students regarding third party billing
- Assistance with housing, specialized letters, and some transportation

**Professional School Advising**
http://opsa.tamu.edu

- Medical, Veterinary, Dental, Physical Therapy, Physician Assistant, Pharmacy and Nursing Professions Advisory Services
- Law Advisory Services
- Preprofessional Student Organizations

**Student Conduct Office**
http://studentlife.tamu.edu/sco

- Receive and process reports of alleged student rule violations
- Presentations available upon request
Student Counseling Service
http://scs.tamu.edu

- Career Counseling
- Stress Management
- Personal Counseling
- HelpLine
- Crisis Intervention
- Therapist Assisted Online Counseling

Student Health Services
(Accredited by Accreditation Association for Ambulatory Health Care)
http://shs.tamu.edu

Clinics:
- Medical Clinics
- Women's Clinic
- Specialty Clinics

Ancillary:
- Dietitian
- Medical Laboratory
- Pharmacy
- Physical Therapy
- Preventive Medicine
- Radiology Services

Additional Services:
- Ambulance Service/EMS
- Dial-A-Nurse
- Insurance
- Appointments – Monday - Friday, 8 a.m. - 5 p.m.

University Writing Center
http://writingcenter.tamu.edu

- Online Writing and Speaking Resources – The Handouts and Guides section on http://writingcenter.tamu.edu includes print, audio, and video help for writers and public speakers.
- Face-to-Face and Online Consultations on Writing and Public Speaking – Make an appointment via http://writingcenter.tamu.edu for feedback on speeches, writing, posters, presentation slides, videos, and multimodal communication. Come in person, send work online, or meet in a web conference. You can also schedule appointments for group writing projects.
- Workshops and Studios on Writing and Public Speaking – Available for classes, workshops present information and engage participants in practice; studios combine instruction with an extended opportunity to write and seek advice from a consultant.

Veteran Resource and Support Center (VRSC)
http://aggieveterans.tamu.edu

- Aggie Veteran Network – “One-stop referral shop” for military-affiliated student resources (veterans, active duty, reserve/National Guard, dependents and survivors).
- Academic and Student Life Support – Connect with academic assistance and student life resources to meet individual requirements.
- Military Admissions Liaison – Located in the VRSC to assist veteran students in the admission process, academic credit for military service and military withdrawals.
- Vet Success on Campus – Connect with our campus VA Counselor for VA related inquiries, support and programs.
- Peer Advising for Veteran Education (PAVE) – Connect new veteran students with current veteran students to facilitate the transition to Texas A&M University.
- Student Vet Association – Student organization for veteran students. Opportunity to meet other vets and be part of the Aggie veteran community.
Veteran Services Office (Scholarships & Financial Aid)
http://veterans.tamu.edu

- Assists eligible students in securing federal and state veterans’ education benefits and other educational funding including scholarships and financial aid.

Women’s Resource Center (WRC)
http://wrc.tamu.edu

- Programs include:
  - Breastfeeding Welcomed Here: A list of private, accessible space for nursing mothers to express their milk on campus. Locations can be found on the WRC website or the Aggie Map.
  - Book Club: Discussion groups led by TAMU faculty related to a book published in their field of study.
  - Elect Her: Aggie Women Win: A one day conference held in late January or early February which encourages and trains women to run for student government and future political office.
  - International Women’s Day Conference: The aim of this evening conference is to bring awareness to the struggle women face internationally as well as to celebrate and empower women from all cultural backgrounds. The conference is held during Women’s History Month in March.
  - Start Smart Salary Negotiation Workshops: These workshops teach college students preparing to enter the job market about the gender pay gap, including its personal consequences; how to quantify the market value of their education, skills, and experience; how to conduct objective market research and determine a fair target salary; and how to create a strategic pitch and respond to salary offers.
  - Women’s History Month Calendar: A printed calendar highlighting campus events related to Women’s History Month in March.

- Presentation topics include, but are not limited to:
  - Women’s Leadership
  - Gender Equity
  - Body Image

- Internships:
  - Book Club Intern
  - Marketing and Communications Intern
  - Graphic Design Intern

- Onsite lactation suite for mothers to express their milk
- Student organization advisor: The American Association of University Women at Texas A&M University (AAUW-TAMU)
- Offers resources and referrals to survivors of sexual violence, dating and domestic violence, and stalking

The Corps Experience
http://corps.tamu.edu

- The Corps of Cadets is the largest and most visible student organization at Texas A&M. Known as the Keepers of the Spirit and the Guardians of Tradition, many of Texas A&M’s most cherished traditions grew out of the Corps, including Midnight Yell Practice, Aggie Muster and Silver Taps. Currently, over 2,500 young men and women are Corps members.
- Most cadet graduates pursue a career in the public and private sector; however, the Corps of Cadets consistently commissions more officers than any institution other than the service academies.
- Academic excellence is the top priority of the Corps of Cadets. The Corps of Cadets offers scholastic advising and cadet-led support programs as well as access to state-of-the-art academic facilities.
- Cadets who pursue non-military careers declare themselves candidates for the Academic Certificate in Leadership Studies – 12 credit hours of university-recognized leadership coursework noted on the student’s official university transcript.
- The Corps of Cadets offers cadet organizations (The Fightin’ Texas Aggie Band, a precision military band; the Ross Volunteers, the official honor guard for the governor of the state of Texas; the Fish Drill Team, a precision drill unit; and Parsons Mounted Cavalry, the only mounted ROTC unit in the United States), ROTC special units (Armoy’s Ranger Challenge Team and Rudder’s Rangers, Navy SEAL Platoon, Marine Recon Platoon and the Air Force’s Arnold Air Society) and advanced course ROTC contracts.

Department of Multicultural Services
http://dms.tamu.edu

The Department of Multicultural Services (DMS) contributes to steady progress toward institutional diversity goals of greater inclusion and academic excellence by positively impacting the campus climate. The department has a mission to provide multiple educational and developmental services for underrepresented populations and diversity education programs that foster inclusive learning environments for all students. DMS supports, advocates for and challenges students as they transition and persist at Texas A&M, as well as provides opportunities for students to examine and communicate ways to contribute to an inclusive and respectful campus community, develop cultural knowledge and competence and build cross-cultural communication skills.

DMS is home to a number of student organizations, many of which support academic, social, cultural, and personal development, as well as opportunities for intentional interaction and engagement. Our student organizations include Asian Presidents’ Council (APC); Black Student Alliance Council (BSAC); Hispanic Presidents’ Council (HPC); African American Student Leadership Institute (AASLI); Institute for the Development and Education of Asian American Leaders.
Outside of student organizations, we offer additional educational and developmental experiences including Aggies to Aggies (A2A), Diversity Certificate Program, Aggie Black Male Connection (ABMC), Latino Males United (LMU), Women of Color Courageous Conversations; Community of Respect, Community Conversations, Cultural Explorations experiential learning experiences, Cultural Leadership Understanding and Exploration for Sophomores (CLUES), and Race Identity and Social Equity (RISE) Conference. Our department is also home to a free tutorial service providing one-on-one tutoring in specific courses and coordinates a NASPA Undergraduate Fellows Program initiative for the Division of Student Affairs. The department strives to maintain a welcoming and inclusive environment for all students.

Office of Fraternity and Sorority Life (OFSL)
http://aggiegreeks.tamu.edu

- Housed in the Department of Student Activities, the Office of Fraternity and Sorority Life's mission is to build an inclusive fraternity and sorority community at Texas A&M and enhance the collegiate experience by supporting opportunities for leadership, academic success, civic engagement and the creation of fraternal bonds. Our office serves as a liaison among our collegiate chapters, parents, alumni, international organizations, and Texas A&M University to provide organizational guidance, educational programs, and resources while challenging members to live their fraternal values.

- Fraternities and Sororities are a fundamental part of Texas A&M University. We are home to 55+ internationally affiliated or local Greek-letter organizations governed by one of four councils: Collegiate Panhellenic Council (CPC), the InterFraternity Council (IFC), the Multicultural Greek Council (MGC), and the National Pan-Hellenic Council (NPHC). Our fraternities and sororities collectively constitute the largest membership-based and multi-faceted community on campus.

- Representing 10 percent of the undergraduate student population, fraternity and sorority members are committed to their academics, developing and strengthening their leadership skills, volunteering time in the community and continually forming a campus and cultural support network for current and incoming Aggies. Fraternities and sororities have enhanced the lives of Aggies since their inception.

Intercollegiate Athletics
www.aggieathletics.com

- Texas A&M is a member of the National Collegiate Athletic Association (NCAA) and the prestigious Southeastern Conference (SEC), which also includes the University of Alabama, University of Arkansas, Auburn University, University of Florida, University of Georgia, University of Kentucky, Louisiana State University, University of Mississippi, Mississippi State University, University of Missouri, University of South Carolina, University of Tennessee and Vanderbilt University.

- Texas A&M sponsors 20 intercollegiate athletics teams. The nine men’s programs are football, basketball, baseball, golf, indoor track and field, outdoor track and field, cross country, swimming and diving, and tennis. The 11 women’s programs are basketball, cross country, golf, indoor track and field, outdoor track and field, softball, swimming and diving, tennis, volleyball, soccer and equestrian.

- Texas A&M brought home four national champion titles in 2011 as the women's basketball team, the men's and women's outdoor track and field squads and the women's western equestrian all won their respective national championships. The track and field program accomplished the double national titles for the third straight year, a historic accomplishment in NCAA history.

- Aggie athletes have earned more than 800 All-American citations and hundreds have gone on to successful professional careers in their respective sports. In addition, Texas A&M has produced a number of Olympic athletes, including a record number of Aggies who competed in the 2012 Summer Olympic Games.

- The mission of Texas A&M athletics is “Building Champions” and it at the heart of the athletic department’s Mission Statement: “Texas A&M Athletics commits to Building Champions through academic achievement, athletic excellence and national recognition of our student-athletes, teams and programs. We provide our student-athletes with all the necessary tools for them to be Champions in their sport and in life. The integrity of our program takes root in the tradition and spirit of Texas A&M, bringing honor and distinction to our University.”

Memorial Student Center (MSC)
http://msc.tamu.edu

- Programming at the MSC, Texas A&M's student union, enriches the living and learning experience in Aggieland. The MSC’s student-managed program committees produce hundreds of programs each year in the arts, cultural and educational awareness and exploration, leadership development, and service projects on campus and in the community. Our programs include the OPAS performing arts series, art exhibitions in the MSC Reynolds Gallery, concerts, weekly films, lectures and speakers discussing current events and national affairs, the MLK Breakfast, Salsa Dance Night, and MSC Open House. The MSC also promotes international awareness through on-campus programs and internships abroad.

- MSC programs also offer students excellent academic, personal, and professional development opportunities. Student program committee members learn leadership and professional skills through the experience of managing their own organizations and producing programs for the campus community. Students can get practical experience in budgeting, communication, fund development, team development, program planning and logistics, meeting facilitation, public speaking, and even technical skills such as running sound for a concert or installing an art exhibit.

- The MSC Box Office provides students and organizations with convenient and affordable ticketing, cash handling, and sales services. The Box Office makes selling easier by eliminating the worry and risk of cash handling by providing online sales and by providing extensive reporting capabilities that take the hassle out of accounting tracking sales and cash flow.

Music Activities (MUSA)
http://musa.tamu.edu

Band Opportunities

- Fighitin’ Texas Aggie Band – The Fighitin’ Texas Aggie Band is nationally known for its precision military marching formations on the football gridiron and is the largest military marching band
in the nation. This 400+ member, Corps of Cadets unit is the official marching band of Texas A&M University. Corps of Cadets membership is required as well as an audition with the directors. Please refer to our website (http://musa.tamu.edu) for more information.

• University Concert Bands – Wind Symphony, Symphonic Winds, Symphonic Band and Concert Band. These ensembles consist of outstanding wind and percussion players from all areas of the Texas A&M campus. Literature performed by the bands is chosen from the best of traditional and contemporary band works. The bands perform at least two concerts per semester and occasionally participate in off-campus concerts and tours. Students from all majors are welcome in the band, and Corps of Cadets membership is not required. An audition is required to participate in the bands. Please refer to our website (http://musa.tamu.edu) for more information.

• University Jazz Ensembles – These two groups utilize standard 17-piece, large jazz ensemble instrumentation for 13 winds and 4 rhythm section instruments. The bands perform select literature from the best traditional and contemporary big band jazz repertoire. The ensembles perform at least two concerts each semester, including campus and community performances. An audition is required to participate in the jazz ensembles. Please refer to our website (http://musa.tamu.edu) for more information.

• University Singing Cadets – The purpose of the Singing Cadets is to enhance the perception of the ensemble at all levels. The choir travels throughout Texas, beyond our state borders, and internationally, and performs a varied repertoire of sacred and secular classical selections. An audition is required to participate in the Singing Cadets. Please refer to our website (http://musa.tamu.edu) for more information.

• University Orchestras – The orchestra program at Texas A&M consists of two orchestras; the Chamber Orchestra and the Philharmonic Orchestra. Both of these groups are comprised of students from all majors at the university. Both orchestras provide students with outstanding musical experiences while allowing time for academics and other interests. Students in the orchestras perform the best of both string and symphony orchestra literature at a high level of artistic achievement in a focused and supportive environment. An audition is required to participate in the orchestras. Please refer to our website (http://musa.tamu.edu) for more information.

• University Women’s Chorus – The Texas A&M Women’s Chorus is a recognized student organization that strives to promote excellence in the fine arts and to encourage cultural expansion at Texas A&M. They also aim to provide entertainment for the campus community, and to enhance the perception of the ensemble at all levels. The choir travels throughout Texas, beyond our state borders, and internationally, and performs a varied repertoire of sacred and secular classical selections. An audition is required to participate in the Women’s Chorus. Please refer to our website (http://musa.tamu.edu) for more information.

Choral Opportunities

• Century Singers – The Century Singers is a close-knit family that connects through a shared passion for music. Members also have the opportunity to participate in events throughout the year including overnight retreats and activities such as ice-skating, movie nights, and group dinners. Involvement in both social gathering and formal rehearsals brings members together as Aggies, musicians, and friends. This creates a truly unique and rewarding experience that will be remembered for a lifetime. An audition is required to participate in the Century Singers. Please refer to our website (http://musa.tamu.edu) for more information.

• Singing Cadets – The purpose of the Singing Cadets is to enhance the public relations of Texas A&M University through musical presentations as deemed appropriate by the Director and to develop disciplined leaders of character as defined by the Singing Cadet Handbook. The four pillars of the Singing Cadets are Purpose, Unity, Spirit, and Honor. Together, these four pillars have formed the solid foundation that has inspired and enabled our organization to succeed in carrying out its purpose for over a century. An audition is required to participate in the Singing Cadets. Please refer to our website (http://musa.tamu.edu) for more information.

• Women’s Chorus – The Texas A&M Women’s Chorus is a recognized student organization that strives to promote excellence in the fine arts and to encourage cultural expansion at Texas A&M. They also aim to provide entertainment for the campus community, and to enhance the perception of the ensemble at all levels. The choir travels throughout Texas, beyond our state borders, and internationally, and performs a varied repertoire of sacred and secular classical selections. An audition is required to participate in the Women’s Chorus. Please refer to our website (http://musa.tamu.edu) for more information.

Orchestral Opportunities

• University Orchestras – The orchestra program at Texas A&M consists of two orchestras; the Chamber Orchestra and the Philharmonic Orchestra. Both of these groups are comprised of students from all majors at the university. Both orchestras provide students with outstanding musical experiences while allowing time for academics and other interests. Students in the orchestras perform the best of both string and symphony orchestra literature at a high level of artistic achievement in a focused and supportive environment. An audition is required to participate in the orchestras. Please refer to our website (http://musa.tamu.edu) for more information.

Recreational Sports

http://recrec.tamu.edu

• Most Texas A&M students are automatically Rec Members. All you need is your student ID to utilize the Student Recreation Center (Rec Center) and other Rec Sports facilities. Persons with disabilities are invited to contact Member Services to inquire about accommodations.

• Drop-in recreation encompasses the use of recreational facilities such as swimming/diving pools, walking/jogging track, handball/ racquetball courts, and indoor soccer, basketball, volleyball and badminton courts. The Rec Center also features a bouldering wall, an indoor rock climbing facility, outdoor basketball and sand volleyball courts, extensive strength and conditioning areas, dance/activity rooms, and a world-class natatorium featuring indoor and outdoor pools and a diving well. Facilities may be used on a drop-in basis except when reserved for classes or university functions. Daily guest passes are available for visitors.

• Rec Sports also offers aquatics classes, group exercise classes, endurance programs and boot camps, personal training, specialty classes, massage therapy, intramural sports, the Texas A&M Sport Clubs program, Outdoor Adventures, CPR certification classes, and the Walk of Champions brick campaign.

Speech and Debate Team

http://speech.tamu.edu

• Compete at national level while impacting the community and the world at a grassroots level.

• Compete in debate, public address events, individual limited preparation events and oral interpretation events.

• Student-run, student-funded and student-oriented organization.

Student Activities

http://studentactivities.tamu.edu

• Student Activities is the premier resource hub for the many leadership and involvement opportunities on campus. At Texas A&M, we care about helping Aggies develop skills both in and out of the classroom, preparing you for life beyond Aggieland. Whatever it is that you love, Student Activities is here to help you practice your passion through involvement in one of our 1000+ student organizations. The perks of getting involved range from reaching your
leadership potential to networking with administrators and potential employers to forming lasting friendships.

- The Department of Student Activities houses key involvement opportunities, including the 50+ fraternity and sorority chapters that can be found in our Center for Fraternity and Sorority Life. The Student Government Association and the Texas A&M Class Councils offer opportunities for those who are passionate about representing the student voice and hosting Texas A&M traditions.

- At Texas A&M, Aggies are held to a high standard of leadership and selfless service. To promote and develop these qualities, our Leadership and Service Center offers a number of leadership programs to help you reach your leadership potential, including the Maroon & White Leadership Fellows, and it also houses several service-based organizations such as The Big Event and Aggie Replant. We also provide a way for Aggies to connect and volunteer with local community agencies through our AggieServe database (http://aggieserve.tamu.edu).

### Student Government (SGA)

http://sga.tamu.edu

- SGA is comprised of the executive, legislative and judicial branches. Members of these branches work to advocate for student needs and help better the Texas A&M campus.

- In addition, SGA has four commissions – Development, Election, Diversity and Legislative Relations. Each of these serve to carry out the goals of the Student Body President from fundraising money for all of SGA to advocating for students at the state level.

- Finally, SGA houses 14 committees including CARPOOL, The BIG Event, Muster and more. These committees strive to enhance the student body through their leadership, programs, conferences and traditions, and they directly have an impact on the student body and community.

### Student Life

http://studentlife.tamu.edu

- The Offices of the Dean of Student Life strive to enhance your opportunities as a student to participate fully in the University experience. We do this by providing you with information, services, programs and involvement opportunities that facilitate responsible life choices and promote awareness of yourself and of your community. Each of the program areas within the Offices of the Dean of Student Life has a specific mission, but one common goal: to provide education, outreach, and support to you.

- Additionally, the department advises the following student organizations: Aggie Orientation Leader Program (AOLP), American Association of University Women at Texas A&M University (AAUW-TAMU), Graduate & Professional Student Council (GPSC), the Family Weekend Committee and The Sex Project.

- Specific services and programs offered include:
  - Consensual Language, Education, Awareness and Relationships (CLEAR)
  - Gay, Lesbian, Bisexual, Transgender Resource Center
  - Health Promotion
  - New Student & Family Programs
  - Off Campus Student Services
  - Student Assistance Services

### Student Life Studies

http://studentlifestudies.tamu.edu

- Facilitates the Division of Student Affairs and student organizations in the assessment and evaluation of services and programs and assists in expanding the knowledge base about Texas A&M students and their co-curricular experiences. Department staff can assist with the development of assessment instruments and the collection and analysis of data including web-based programs.

### Student Media

http://studentmedia.tamu.edu

- Student Media produces national, award-winning publications; The Battalion newspaper and the Aggieland yearbook. Both are written, edited and produced by students and offer excellent opportunities to gain valuable experience for journalistic and related careers.

- The Battalion is published Monday through Thursday during fall and spring semesters and typically on Tuesday and Thursday during the summer sessions. It is distributed to students, faculty and staff on campus and at many apartments and other high traffic areas in College Station. The Battalion also is available online and on mobile devices at thebatt.com.

- The Aggieland is distributed in the fall but is a year-round project documenting school activities. It is one of the nation’s largest college yearbooks.

### University Art Galleries

http://uart.tamu.edu

- The University Art Galleries (UART) Department supports the educational mission of Texas A&M University by providing impactful visual arts experiences to diverse campus and regional community audiences. UART serves as steward of its collections, promoting arts advocacy and engagement across the university. It is responsible for visual art exhibitions at the J. Wayne Stark Galleries, the Forsyth Galleries and for art inventories at Texas A&M.

- The program organizes the major art exhibitions for the University; advises on the selection, display and management of visual art objects on the campus; handles all art and art-related gifts to the University; and provides guidance and support to all exhibitions and collections at the University. The department also maintains the outdoor sculpture collection for the university.

- In addition, the University Art Galleries department organizes programs to complement exhibitions; has a docent program, which provides guided tours of changing exhibitions on campus and the University’s permanent collections to interested community and school groups as well as other art education programs.

### University Center and Special Events (UCEN)

http://ucenter.tamu.edu
• University Center and Special Events (UCEN) is a highly skilled team of professionals committed to creating extraordinary guest experiences. We provide exceptional event management and technical support in state-of-the-art facilities that are well maintained, safe and clean. Through our facilities and services, we enhance the educational, business, social and cultural experiences of students, faculty, staff and visitors of Texas A&M University.

• Event Services – located on the second floor of Rudder Tower, the Event Services team assists in the booking, coordination, setup and staffing of meetings and events held in the Memorial Student Center (MSC), J. Earl Rudder Conference Tower, John J. Koldus Building, All Faiths Chapel, and the surrounding outside event spaces.

• Special Events – located on the first floor of Rudder Theatre Complex, the Special Events team assists with the booking of space in Rudder Theatre Complex, which includes Rudder Auditorium, Rudder Theatre, Rudder Forum, and the Exhibit Hall. Additionally, our Special Events team provides AV technical support, event setup and support, equipment rental and event consultation for events held outside of UCEN facilities.

• University Center Guest Suites – located in the Memorial Student Center (MSC), the University Center Guest Suites are an ideal and convenient place for housing speakers, visitors, and out-of-town guests. With an offering of 800 square feet, each suite includes a living room, kitchenette, king bedroom, full bath and vanity. Individually decorated, each suite welcomes guests with tailored amenities, exemplary service and an experience which embraces university traditions and values.

**Vice President for Student Affairs**

http://studentaffairs.tamu.edu

In support of the Texas A&M University mission, the Division of Student Affairs contributes to student learning and development. The Division provides exceptional services, facilities, and programs that promote student success, embody the Aggie spirit, and foster a diverse and inclusive campus community to deepen the understanding and individual application of the Aggie Core Values - Loyalty, Integrity, Excellence, Leadership, Selfless Service and Respect.
TUITION, FEES AND OTHER FINANCIAL INFORMATION

General Information

Educational expenses for nine months will vary according to personal needs and course of study. The Financial Aid Office's basic budget for new undergraduate students including tuition and fees, books, supplies, transportation, on-campus room and board, incidental and living expenses comes to about $27,272. Total expenses for returning students during an academic year should be slightly less than those for new students. The cost for new nonresident or international students is about $47,448. All tuition and fee amounts provided herein represent the most accurate figures available at the time of public and are subject to change. The most current information available will be maintained on the Scholarship & Financial Aid (http://financialaid.tamu.edu) website. Student Business Services online tuition and fee estimate calculator can be found at the Student Business Services (http://sbs.tamu.edu) website.

Payment of Tuition and Fees

Students must meet all financial obligations to the University by their due dates to avoid late penalties. Failure to pay amounts owed may result in cancellation of the student's registration and their being barred from future enrollment and receiving official transcripts. State law requires that tuition and fees be paid prior to the first day of classes. Students who wish to pay fees in installments can select the option on the My Finances tab on the Howdy (http://howdy.tamu.edu) Portal.

Obligation to Pay Tuition, Required Fees, Other Fees and Charges for Optional Services

By registering for classes, students agree to pay all tuition and required fees associated with their registration, optional services and other fees, whether paying in full or utilizing the installment payment option. Failure to pay tuition, fees and other charges may result in penalties, late registration fees and/or possible cancellation.

Financial Obligation for Graduating Students

According to Texas A&M University Student Rules and Chapter § 54.007 (c) of the Texas Education Code, all financial obligations to the University must be paid by the end of the semester. Failure to settle all financial obligations will result in withholding a student’s diploma at graduation. Additionally, a block will be placed on the student’s account which will prohibit registration in subsequent semesters and receipt of official transcripts.

Citations

- Section 14.15 of the Texas A&M University Student Rules states “The student must have settled all financial obligations to the University.”
- Chapter § 54.007 (c) of the Texas Education Code states “A student who fails to make payment prior to the end of the semester may be denied credit for the work done that semester.”

Tuition

Texas A&M Tuition and Required Fees per Semester Credit Hour

All rates are the most current available at the time of printing and are subject to change. Please refer to the Student Business Services website for the latest tuition and fee information.

Nonresident Tuition Waiver

If you have any questions concerning your eligibility for a waiver of nonresident tuition, please visit our website (http://sbs.tamu.edu/ accounts-billing/forms/waivers-exemptions) or contact Student Business Services at (979) 847-3337 or by email at sbs@tamu.edu.

University Advancement Fee

The University Advancement Fee is a required fee charged to all Texas A&M University students. It is assessed at a rate of $242.44 for the first hour plus $85.69 per additional hour. The University Advancement Fee funds services such as advising, the Career Center, University Writing Center, technology and libraries as well as administrative services such as ID services, the campus bus system, billing and refunds, access for students to discounted software and many of the services provided through the Division of Student Affairs.

CEHD Teacher Preparation Program

Undergraduate students enrolled in the professional phase of teacher preparation programs incur a differential tuition charge of $300 in each of the remaining fall and spring semesters. This differential tuition helps support field experiences, supervision, scholarships and international/urban experiences in culturally diverse settings.

Distance Education Administration Fee

This $30 per semester credit hour administrative fee is assessed to Non-Funded Out-of-State students taking distance education courses.
Distance Education Differential Tuition

The rate to be charged for distance education courses will range from a minimum of $40/SCH to a maximum of $550/SCH. Each academic department will have an individual rate that will be approved annually by the President of Texas A&M University. For more information regarding Distance Education Differential Tuition, please visit http://sbs.tamu.edu/accounts-billing/tuition-fees/schedule/#DIST_ED_DIFF.

TAMUHSC Tuition and Required Fees

Texas A&M University Health Science Center tuition and fees are approved by The Texas A&M University System Board of Regents within guidelines established by the Texas Legislature. Fees are subject to change by the Board of Regents.

Additional information regarding the TAMUHSC Student Business Services Office and its services may be found online at the Student Business Services website.

TAMUHSC Student Business Services may be reached at 979-847-3337 or at sbs@tamu.edu.

All rates are the most current available at the time of printing and are subject to change.

### TAMUHSC Tuition

#### Department (Tuition Only)

- **UG Resident (12 Hours-varies by program)**
  - Nursing: $2,188.86 to $2,251.70
  - Dental Hygiene: $1,532.75 to $1,557.00
  - Public Health (Upper Level): $1,650.88 to $1,683.36

- **UG Non-Resident (12 Hours-varies by college)**
  - Nursing: $7,547.53 to $7,715.95
  - Dental Hygiene: $6,964.99 to $7,045.65
  - Public Health (Upper Level): $7,077.62 to $7,166.44

### TAMUHSC Fees

- **Distance Education Administration Fee**
  - This $30.00 per semester credit hour administrative fee is assessed to Non-Funded Out-of-State students taking distance education courses.

- **Field Trip Fees**
  - Field trip fees are assessed to cover the cost of providing trips and vary depending on the course taken and expected expenses.

- **Group Hospital Fee**
  - The group hospital fee supports provision of medical services to students to access services at the academic locale.

- **Instructional Enhancement/ Equipment Fee**
  - The Texas A&M Health Science Center charges an Instructional Enhancement Fee (IEF) at each of the colleges offering TAMUHSC academic programs. The colleges have varying fee rates based on the IEF needs of the college. This fee supports an array of educational activity enhancing academic programs at the college. A few examples of enhancement expenditures are; software to enhance education, media, web-based instruction, tracking and evaluation tools, licensure fees, and integration of technology.

- **Publication ASDA/ ADHA Fee**
  - This fee provides for students to receive a monthly publication, annual membership into the ASDA, ADA, or ADHA, and many leadership opportunities depending on the student’s academic program.

- **ID card (1 time flat rate)**
  - This additional ID fee covers the College of Dentistry badge, which also serves an access card to secure locations of the dental school in addition to being an identification card.

- **Matriculation Fee (1 time flat rate)**
  - This is a setup fee for first year dental students related to college specific file set up with the college.

- **Drug Testing Fee (1 time flat rate)**
  - All dental students pay this fee to cover drug testing for students, and this is a one-time assessment.

- **Lab Fee**
  - The University is required to assess and collect a laboratory fee not less than $2 nor more than $30.00 for each laboratory course to cover in general the cost of laboratory materials and supplies used by a student.

- **Medical Liability**
  - Medical Liability Insurance is required by students interacting & treating patients. This fee covers medical malpractice required for this type of activity.

- **Equipment Usage**
  - This fee supports costs associated with instrument usage during the dental education.

- **Summer Clinic Fee (D3 and D4 only)**
  - The Summer Clinic Fee is use to partly cover the cost of students working in the clinic, this fee is a flat fee and isn’t charged by the hour. (The students are scheduling and working on patients as part of their clinical training.)

- **Clinical Simulation Fee**
  - Fee covers costs associated with Clinical Learning Resources Center to include specialized simulation technology, equipment, materials and supplies related to the operating of the simulation center.

- **Gross Anatomy Fee (M1 Only)**
  - Fee covers costs associated with Gross Anatomy lab to include lab materials, supplies, furnishings, software and equipment specific to gross anatomy

- **Professional Liability Fee**
  - Professional liability insurance coverage is required of all students who will be in clinical settings providing patient care. It is a mandatory requirement of all local facilities with which we have contracts for student clinical experiences.

- **Clinic Simulation Fee**
Fee covers costs associated with Clinical Learning Resources Center to include specialized simulation technology, equipment, materials and supplies related to the operating of the simulation center.

**Professional Activity Fee**

The Professional Activity Fee supports various professional activities for pharmacy students such as participation in clinical partnerships enhancing experiential education, financial resources to ensure these clinical experiences meet pharmacy education expectations, support of student travel to professional meetings/conferences, and other professional activities.

**Professional Development Fee**

One-third of the pharmacy curriculum is experiential education, which consists of the Introductory Pharmacy Practice Experiences (IPPE) and the Advanced Pharmacy Practice Experiences (APPE). This fee supports clinical site payments for student rotations. In addition to clinical site payments, the Professional Development Fee supports service learning activities and other professional development services and programs.

**Environmental Service Fee**

This fee supports distribution, maintenance and pick up of recycle bins and materials from each building located on the Texas A&M University-Kingsville campus. Only pharmacy students located at Kingsville are assessed this fee.

**Career Services & Professional Services Fee**

This fee will support efficient and effective support services for professional career development services. Various operational costs associated with provision of professional career development services.

**Advising Services Fee**

This fee will provide advising support services for all graduate degree programs not provided by members of the faculty. This fee includes, but is not limited to Graduate Studies, Professional School Advising, and Admission Services related to student enrollment. Various operational costs associated with the delivery of services noted in programmatic justification.

**Locked and Variable Rate Tuition Plans**

Beginning with the Academic Year 2016-2017, incoming undergraduate students at Texas A&M University will be offered the choice between a variable rate tuition plan or a locked-rate (fixed) tuition plan allowing students and their parents to better plan and budget for college expenses. You will need to select the best option for you and your family prior to registration.

**Variable rate plan:** Tuition and fees could increase each year, using the Higher Education Price Index.

**Locked-rate (fixed) plan:** Tuition and fees are locked into a per semester rate for 12 consecutive semesters, or 4 years, from the point of initial enrollment at a public or private institution. Those paying non-resident tuition will be billed the state mandated non-resident rate, but other required fees will remain locked.

**Entering freshman:** Will choose either the variable rate or the locked-rate (fixed) associated with their first term of enrollment.

**Entering transfer or readmits:** Have three options to choose from

- Variable rate, which will vary each academic year
- Locked rate (fixed), based on their first term of enrollment in college after high school, which will expire at the end of 12 consecutive semesters, or 4 years from that first term of enrollment
- The current academic year’s tuition and fee rate which will be locked in for 12 consecutive semesters or 4 years

**Presumptions made:**

Students will enroll in 30 hours an academic year for 4 years allowing completion of most degree plans. Some majors such as engineering and architecture are offered 1-2 additional semesters at the locked rate.

**Where do I select my tuition rate?**

All incoming freshmen and admitted transfer and readmit applicants must select a rate prior to registration. Rate code selections can be made by logging in to the Howdy Portal at howdy.tamu.edu, selecting the My Finances Tab and following the instructions. The choice will be offered only once and cannot be changed in future semesters.

Tuition estimates can be found on the Student Business Services website at http://sbs.tamu.edu/.

Texas A&M University meets requirements of the Texas Education Code, Section 54.017 regarding fixed tuition for undergraduate students.

1. Distance Education Instruction: This group includes traditional off-campus classes, all university centers and telecommunications, video and other nontraditional Distance Education Instruction delivery models.
2. In Absentia: The traditional student who is performing individual research or completing degree requirements that do not require classroom instruction.
3. Cooperative Registration: Students participating in the Cooperative Education Program at Texas A&M University.
4. Texas A&M University Graduate Students—Galveston: Texas A&M graduate students who enrolled at College Station, but who are taking courses exclusively at Galveston.
5. Study Abroad: Students participating in the Texas A&M University Study Abroad Program.

Application Fees
Graduate: $50; Undergraduate: $75; International: $90

Cooperative Education Fee
A fee of $75 is charged to all participants of the Cooperative Education program.

Field Trip Fees
Field trip fees are assessed to cover the cost of providing trips and vary depending on the course taken and expected expenses.

Laboratory Fees
The University is required to assess and collect a laboratory fee not to exceed $30 for each laboratory course to cover in general the cost of laboratory materials and supplies used by a student.

Late Penalties
Students who fail to pay fees and installments when due are assessed a late payment fee for each payment or installment paid late.

Late Registration/Add Penalties
- Students who register on or after the first day of classes, but before the 13th day of classes are assessed a $100 late registration fee.
- Students who register after the 12th class day are assessed a $200 late registration penalty.
- Students who add classes after the 12th class day that result in a net increase in hours enrolled are assessed a $50 late add fee.

Microfilming, Binding and Collating
Binding, collating, microfilming theses and dissertations—Masters: $110, Doctoral: $170

New Student Conference Fee
A non-refundable new student orientation fee of $100 is charged to all students. An additional fee of $35 is required of all international students to cover additional costs associated with orientation programs.

ROTC Uniform Rental
Qualifying cadets enrolled in Army, Air Force or Naval ROTC will be reimbursed the cost of basic cadet uniforms. Cadets who are not enrolled in ROTC (Drills and Ceremonies Cadets) are required to pay for use of uniforms.

Supplementary Fee for Courses Attempted More than Twice
A non-repeatable course that is attempted by a student more than twice at a public institution of higher education in Texas may not be reported for state funding. As a result, the institution must either pass the non-funded portion to all students, or charge a supplementary fee to the student who is attempting the course more than twice. Texas A&M has chosen to assess a supplementary fee to those students attempting a course more than twice.

A student attempting non-repeatable courses more than twice at Texas A&M University will be subject to a supplementary fee of $125 per semester credit hour ($375 for a 3 hour course) for the repeated course, in addition to tuition and required fees associated with the course.

Students will be notified at the time they register for a course that it has been taken twice at Texas A&M and is subject to the supplementary fee.

Diploma/Graduation Fee
A non-refundable fee per degree sought is assessed the semester a student applies for graduation. This fee is payable each time a student applies for graduation. A late fee of $50, in addition to the diploma/graduation fee, may be charged to those who apply for graduation after the published deadline.

Health Center Fee
This $72.50 per semester fee ($25 for a 5-week summer term and $72.50 for a 10-week summer term) is required of all students for the purpose of operating, maintaining and equipping the University Health Center and entitles the student to its services. These services do not include surgical operations or charges for consultations with outside physicians.

Identification Card (Aggie Card)
Every student is required to have a student ID card. ID cards are permanent and students are responsible for maintaining a working ID throughout their career at the University. The Aggie Card is used for residence hall access, registration, fee collection, financial aid disbursement, dining halls, athletic events and recreational sports admittance and library privileges. Replacement ID cards are $12. Students who lose their IDs can report the loss immediately and deactivate their card online at http://myaggiecard.tamu.edu or by contacting:
Improving and equipping the Student Center Complex.

Summer semester) is required of all students for operating, maintaining, and equipping the Student Center Complex.

This $100 fee ($50 for a 5-week summer term and $100 for a 10-week summer semester) is required of all students attending the University for use of the Student Recreation Center.

Please see the Texas A&M University System rule for information regarding the rules related to student health insurance. http://policies.tamu.edu/26-99-01.pdf

International Student Health Insurance

International students with F or J visa/status, and enrolled at Texas A&M University, are required to have health insurance. International students will be automatically enrolled in and charged for the System Student Health Insurance Plan (SSHIP) unless they apply for and are granted the waiver. The waiver deadline and criteria are posted at the International Student Services web page, http://iss.tamu.edu.

Please see the Texas A&M University System rule for information regarding the rules related to student health insurance. http://policies.tamu.edu/26-99-01.pdf

International Student Orientation Fee

This $35 fee is a one-time fee charged to cover the cost of orientation programming for international students during their first semester of enrollment.

International Student Services Fee

This $46 fee ($23 for a 5 week summer term and $46 for a 10 week-summer semester) is required of all students who are not U.S. citizens or Lawful Permanent Residents to offset the cost of specialized services International Student Services or the English Language Institute provides to these students, such as immigration advising, certificate of eligibility document issuance (I-20/DS-2019), verification and monitoring of legal status, status changes, extensions of legal status, approve or help with the approval of on and off campus work authorizations, social/academic adjustment, administration of special scholarships and programs for these students.

Recreational Sports Fee

This $106 per semester fee ($53 for a 5-week summer term and $106 for a 10-week summer semester) is assessed to all students attending the University for use of the Student Recreation Center.

Reinstatement Fee

Students who fail to pay all fees by the last day of the semester will be administratively withdrawn from the University and charged a $50 reinstatement fee.

Sponsored International Students

An administrative fee not to exceed $500 per semester or summer session (all or part thereof) will be required to support international sponsored students whose programs are coordinated through International Student Services, unless these fees are waived as part of negotiated contractual agreements.

Student Center Complex Fee

This $100 fee ($50 for a 5-week summer term and $100 for a 10-week summer semester) is required of all students for operating, maintaining, improving and equipping the Student Center Complex.

Optional Services

Athletic Events

All Sports with Football—student tickets for all home sports (for all fall and spring sports) $290.

Maroon and White Packages- $150

Installment Payment Option

Students who choose to pay using the installment plan pay a $15 installment payment service charge per semester (excluding the Summer term.) This charge is non-refundable once a payment has been made or after the first installment due date.

MSC OPAS Tickets

Special Discounted Student OPAS tickets are available through the MSC Box office. For more information, please contact MSC OPAS at (979) 845-1661 or visit their website (http://mscopas.org).

Yearbook

The cost is $81.19 including shipping and sales tax.

Campus Dining

Freshmen (classified as U1s with less than 30 hours of college credit when they initially apply to live on campus) will be required to have a minimum dining plan for the full academic year (or remainder of the academic year for those that apply for housing after the beginning of the fall semester).

All Corps of Cadets members are required to have a dining plan, as designated by the Office of the Commandant.

Upperclassmen and students who are not campus residents are not required to purchase a Dining Plan, but the option is available.

All Dining Plans are loaded onto the Student ID card to make access and use easy.

Fees for the selected meal plan will be added to your Texas A&M University student fee, and are separate from housing fees. Any plan purchases or additions made after the ninth week of class cannot be charged to the student’s account and must be paid via credit card. Please visit our website for official date as it may vary each semester based on the academic and billing calendars.

Students have the option to select a Dining Plan that fits their individual needs. Dining Plans are designed to be flexible for an array of lifestyles and appetites. Smaller Dining Plans are available for upperclassmen and students who live off campus. Most Dining Plans include 2 parts: First, “Meals,” which can be used at the all-you-care-to-eat dining halls, or in select retail locations as a “meal trade.” The second part of the dining plan consists of “Dining Dollars.” These declining balance dollars can be spent like cash or a debit card, and are accepted at all University Dining kiosks, coffee shops, food courts and dining centers. Each purchase is automatically deducted from the account.

When paying with Dining Dollars, patrons will enjoy a discount on the door rate at Duncan, Sbisa, and The Commons, the all-you-care-to-eat dining halls on campus.
Dining Dollars roll over from fall to spring with the purchase of a spring dining plan.

Dining Dollars are only accepted on campus, assuring parents and guardians that this money is spent only on food and beverages.

Applicable sales tax will be added at checkout.

Parking Permit
Vehicles parked on the Texas A&M University campus are required to display a valid parking permit, except for those parked in designated visitor’s spaces. Costs of permits are prorated and subject to change. For more information or to purchase a permit, visit http://transport.tamu.edu.

Residence Hall and Apartment Room Rates
All students living in residence halls or apartments are required to pay room rent. Rooms are furnished with beds, mattresses, desks, chairs and dressers. Students are expected to furnish their own pillows, blankets and linens internet and basic tv service. Room rates include heat, air-conditioning, lights and cleaning of common areas. Rates are for the semester and are subject to change.

For more information, please see Residence Life (http://reslife.tamu.edu).

Payments

Scholarships, Grants and Loans
All financial aid or loans must be accepted and requirements completed before it can be applied toward a student’s account.

Payment Methods
Texas A&M utilizes online statements and electronic payments in its efforts to provide timely financial information to students and to control costs. Student account payment options include:

Electronic/Online
Students can view their account and make online payments using E-Checks, American Express, Discover Card or MasterCard by selecting “Pay Bill/Manage Account” on the My Finances tab in the Howdy portal. Payments made with credit cards will incur a convenience fee charged at the time of payment. Payments made with credit cards will incur a 2.25% convenience fee minimum charge of $3.00. Additional forms of payment accepted include: personal check, cashier’s check, wire transfer and Pin Debit. (Please Note: Once online payment transaction has occurred, the Convenience Fee is non-refundable).

Paper
- Checks – Students may still use paper checks for payments. The University reserves the right to utilize check conversion technology to convert paper checks into electronic format.
- Cashier’s checks

- Money orders

Cash
- Cash is not accepted.

Flywire
- All bank wire transfers are accepted using our partner, Flywire. Texas A&M University does not accept direct wire transfers and will not provide our banking information.

Returned Payments
Any payment that is rejected for payment by the paying bank, credit card company or other financial institution is subject to returned item charges of $30 or more. Rejected payments may also result in cancellation of the student’s registration and additional late registration penalties if the student is required to re-register on or after the first day of classes.

Installments
Tuition, required fees, room, board and parking are payable in full, or in installments. A $15 per semester service charge, to cover the cost of handling, will be assessed to each student who chooses to use the installment plan. Students may pay their account in full any time during a semester; however, the service fee will not be refunded once a payment is made under the installment plan or after the first installment due date. See the Student Business Services (http://sbs.tamu.edu) website for information on installment plans.

Deposits

General Deposit
A deposit of $100 is required of every student to insure the institution against losses, damages, and breakage for which the student is responsible, or to be used to offset in part amounts owed by the student to the institution. General deposits are returned to students, less any such amounts owed to the institution, within a reasonable period after the date of the student’s withdrawal or graduation from the institution, not to exceed 180 days. The deposit retention period provides the University sufficient time to identify all amounts owed, and to determine if the student intends to enroll in the semester or summer session immediately following the student’s withdrawal or graduation or, if the student withdraws or graduates in the spring semester, in the next fall semester. If a student leaves the University without graduating or officially withdrawing, they must submit a written request to Student Business Services to receive a refund of their deposit. Deposits for students that do not graduate, withdraw or otherwise request a refund remain on file for four years. Those deposits are forfeited to the University’s General Deposit Scholarship Fund, after deducting any amounts owed the University.

Residence Hall Deposit
A deposit of $300 and a nonrefundable $50 application fee are required to apply for a room in a residence hall or university apartments. The deposit will be retained as a deposit against damage or late cancellation or to keep the application on file. A reservation may be canceled and the deposit refunded upon request prior to signing a housing contract. Housing contracts must be signed for the next academic year. Any cancellations after May 1st will result in forfeiture of deposit. Additional penalties for later cancellation. The amount of the room deposit and
the deposit refund schedule are subject to change per university administration approval.

Freshmen classified as U1 with less than 30 hours will be required to have a dining plan if they live on campus.

Penalties and Late Fees

Late Payment Penalty
There are severe penalties for failure to pay student account balances and installments by their specified due dates. If a payment is delinquent when a semester ends, the student will be blocked and may not receive credit for academic work performed. Students will not be readmitted to the University until all past due balances, including late charges, are paid. A late fee of $25 for A&M students and $50 for HSC students will be assessed for each payment not received on or before it is due. If a student is removed from the rolls of the University or is withdrawn for failure to pay amounts owed the University, a reinstatement fee of $50 for A&M students and $150 for HSC students will be assessed in addition to any other late fees or penalties already incurred and must be paid before the student will be reinstated. Current due dates can be found online at the Student Business Services website.

Late Registration Fees
Students who register on or after the first day of classes are assessed a late registration fee of $100 for A&M students and $200 for HSC students. Students who register after the official census date (12th class day for fall or spring and 4th class day for summer) are assessed a late registration fee of $200 for A&M students and $250 for HSC students. Students who add classes after the official census date are assessed a late add fee of $50 for A&M students and $100 for HSC students. Note: Penalties, late registration and late add fees also apply to students who are required to reenroll because their registrations were canceled for nonpayment. Registrations are subject to cancellation and/or financial penalties if sufficient payment is not received before 5:00 p.m. on the semester due date.

Use of Collection Agencies and Credit Bureau
If amounts become past due, the University reserves the right to report the account to the Credit Bureau. This will also initiate internal collection efforts and could cause the University to employ an outside collection agency to recover the debt. If any collection efforts must be made, the student will be required to reimburse the University for the fees of any collection agency, which may be based on a percentage at a maximum of 30% of the debt, and all costs and expenses, including reasonable attorney’s fees the University incurs in such collection efforts.

Cancelling Registration
Once students have registered for classes, they must select one course of action from the following to remain in good standing with the University:

- pay all amounts due by the specified due date;
- use the online registration to drop all classes prior to the first day of classes; or
- initiate the withdrawal process online in Howdy to begin the process to withdraw from the University after the first day of classes.

Following this procedure is especially important for students who have been awarded scholarships or financial aid since the aid may automatically pay tuition and fees and cause the registration to be held even though the student has decided not to attend. Failure to request cancellation of an unwanted registration may result in grades of F or I in all courses for the semester. The student will be required to reimburse the University for scholarships and other financial aid applied to his or her account and will be held responsible for paying all fees for the semester, regardless of whether he or she attended classes.

Cancellation for Nonpayment of Tuition or Fees
The University reserves the right to cancel registrations not paid by their due date, or the official census date for a semester or summer term, to comply with state laws requiring payment of tuition and fees, to free the classroom spaces for other students, and to ensure the most efficient use of university resources.

Refunds

Refunds and Adjustments

Fee Adjustments for Courses Dropped
A student may drop individual courses during the first five days of a fall or spring semester (first four days of a summer term). Students also may drop individual classes with special permission of the dean between the 6th and 12th class days. Full refunds will be given for the individually dropped courses during these periods provided the student remains enrolled in at least one class and has not withdrawn from the university. Refunds will not be issued for classes dropped after the 12th class day. Any credit balance on a student account as a result of dropping courses will not be refunded until after the fifth class day. As of the first day of the semester, students may not drop all of their courses through the drop/add process, but instead must begin the official withdrawal process online through Howdy (https://howdy.tamu.edu) (see Withdrawal from the University below for additional information regarding the withdrawal process). A student may add courses during the first five days of a fall or spring semester.

Adjustments for Withdrawal–Tuition and Fees
Tuition and fee adjustments shall be made to students officially withdrawing from the University for charges listed below according to the following refund schedule: Tuition and Required Fees, Residence Hall Rent, and Meal Plans.

### Athletic Refunds

Refunds are not allowed for individual games or games missed. A prorated refund is permitted until the option is used to pick up a ticket for any one game. Once a ticket option has been used, prorated refunds will be given only in the event of withdrawal from the University.

For information on refunds, contact the Athletic Business Office at (979) 846-8892.

### Reductions in Rates for Late Entry to the University

No reduction will be made in the charge of room rent and board in case of entrance within 10 days after the opening of a semester or summer term, nor will a refund be made in case of withdrawal during the last 10 days of a semester or summer term, or the last days for which payment is made.

### Refund Delivery

Texas A&M and Heartland ECSI have joined forces to deliver financial aid and other refunds to students faster through the University's refund delivery process. You will receive information from Heartland ECSI and the University at your new student conference and in your official University email account, which will explain the process for signing up for direct deposit of refunds.

### Yearbook Refunds

Yearbook charges are refundable in full during the semester in which payment is made. Thereafter, no refunds will be made on orders canceled in subsequent semesters. Yearbooks must be picked up during the academic year in which they are published. Students who will not be on campus when the yearbooks are published must pay a mailing and handling fee. Yearbooks will not be held, nor will they be mailed, without payment of the mailing and handling fee. Refunds will not be made on books not picked up within one semester of the publication date. Refunds will not be made before 21 days from the date of payment. Refund policies contained herein reflect policies in effect at the time of publication and are subject to change.

### Dining Plan Refunds and Add/Change/Drop Policies

Texas A&M University Dining’s dining plans and options listed are based on information available at time of printing and are subject to change. University Dining follows the University’s refund schedule for Tuition and Fee Adjustments. Refunds are given on the percentage basis listed for students dropping fee options or officially withdrawing from the University.

Students may purchase a dining plan, change to a larger plan or add on to a plan during registration for classes or at any time through University Dining. Dining Plans and additions to the plans may be charged to the student account through the ninth week of school. Any purchases after that point will require a credit card payment. Changes from a higher dining plan to a smaller dining plan or requests to cancel/drop are permitted only through the fourth week of classes. The appropriate fee is to be paid to the Office of Student Business Services.

Dining plans are valid for one semester starting with the first day of campus move-in (as designated by the Department of Residence Life) and end after the last final exam day. Check with Dining for posted dates for dining plan access. Location hours may vary during class breaks and meal availability may exclude official University holidays.

Following University policy, no one is authorized to use or borrow a student’s identification card (Aggie Card), therefore, dining plans are not transferable between students. The Aggie Card must be presented to Dining cashiers for dining plan participation. If an Aggie Card becomes lost, report it immediately by calling (979) 845-4661 or go to http://myaggiecard.tamu.edu to deactivate the card.

For questions and assistance, please email dining@tamu.edu (include name, UIN and instructions if dining plan related) or contact our office at (979) 845-0152. Additional information on University Dining and dining plans can be found on our website (http://new.dineoncampus.com/tamu) or in this catalog under Campus Dining.

### Residence Hall Rent/Deposit Refund

If a student withdraws, moves off campus or in any other way terminates the housing contract, a refund of residence hall rent may be made according to the stipulations in the housing contract. If a student cancels the academic year housing contract during the contract period, the $300 deposit is subject to forfeiture. Any cancellation made 7 days after the student has been assigned, will be subject to 25% of the fall semester’s room rent. Any cancellation for the spring semester not outlined as an exception in the housing contract will be subject to an additional charge equal to 50% of the spring semester’s room rent. Exceptions may be made for students who cancel their contract for the following reasons: co-op or student teaching assignment, academic restriction, graduation and medical withdrawal.

### Withdrawal from the University

Once the University has accepted payment for tuition and fees, a student is considered officially enrolled unless otherwise restricted from enrolling. Stopping payment on a check for fees or allowing the check to be returned unpaid by the bank for any reason does not constitute official withdrawal.

Before classes begin, you may go online to Howdy (http://howdy.tamu.edu) and cancel your courses and options for the semester.

After classes begin, you must go through the official withdrawal process in order to cancel your registration for the semester. In Howdy (http://howdy.tamu.edu), go to the Student Withdrawal channel on the My Record tab to begin the online withdrawal process. Failure to complete the withdrawal process will result in forfeiture of any tuition and fee adjustments, and course work may be recorded as incomplete or failed.

Failure to follow procedures for withdrawing from the University may result in financial penalties and delays with future enrollment in the University. Once a student registers, he or she is responsible for the total fees assessed regardless of whether the installment option is used. Refund percentages are applied to total fees assessed and not the
amount paid. This means that students who withdraw before paying all installments may, in the event of withdrawal, still owe the University.

**International students** must visit with an advisor in the International Student Services Office before withdrawing to determine if doing so will affect visa status.

**Student athletes** should visit with an academic advisor in the Department of Athletics before initiating the withdrawal process.

**Recipients of financial assistance** should visit with a Scholarships & Financial Aid advisor before withdrawing. Students receiving funds awarded by Scholarships & Financial Aid should be aware of policies (http://financialaid.tamu.edu/Undergraduate/Maintaining-Eligibility/#2-Withdrawals) regarding withdrawal from the University. Federal regulations require a return calculation for all students who receive Title IV student assistance at a post-secondary institution of higher education and withdraw during a payment period (semester). The length of time during which a return must be calculated is up to 60 percent of the payment period. Students withdrawing prior to 60 percent of the payment period may be required to return disbursed funds not earned. Additionally, students who do not successfully complete courses for the semester may be considered unofficially withdrawn and may be subject to a return calculation or all disbursed funds being returned if attendance cannot be documented. Eligibility for state and institutional funds may also be impacted by withdrawing from the University. Drops and withdrawals are considered unsuccessfully completed coursework when determining Satisfactory Academic Progress (http://financialaid.tamu.edu/Undergraduate/Maintaining-Eligibility) (SAP) and will impact completion rate.

### Allocating Returned Title IV (Federal Aid)

Funds that are returned to the federal government due to student withdrawal are used to reduce the outstanding balances in individual federal programs.

Financial aid returned (by the University and/or the student or parent) must be allocated in the following order:

1. Unsubsidized Federal Direct Loan
2. Subsidized Federal Direct Loan
3. Federal Perkins Loan
4. Direct Graduate Plus (Student) Loan
5. Federal Direct PLUS (Parent) Loan
6. Federal Pell Grant
7. Federal Supplemental Educational Opportunity Grant (FSEOG)
8. TEACH Grant
9. Other federal loan or grant assistance
10. Other state or institutional financial aid programs

Additionally, students who do not successfully complete courses for the semester may be considered unofficially withdrawn and may be subject to a return calculation if attendance cannot be documented.

### Unclaimed Refunds

According to federal law, the university is required to return Title IV funds that have not been claimed (i.e., refund check that has not been cashed) within 240 days of issue. These funds will be returned to the appropriate federal financial aid program.

### Allocating Returned Title IV (Federal Aid)

### Rebates

#### Tuition Rebates After Graduation

Certain undergraduate students who attempt no more than three hours in excess of the minimum number of semester credit hours required to complete the degree under the catalog under which they were graduated may be entitled to a $1,000 tuition rebate after graduation. Several conditions apply and students must meet all of the specified criteria. If you wish to try and qualify for this program, please see the Office of the Registrar (http://registrar.tamu.edu) website for a complete set of student and institutional responsibilities and other criteria.

### Financial Assistance and Scholarships

The mission of Scholarships & Financial Aid is to provide students with information and financial resources to attend Texas A&M University along with support programs that promote higher education and developmental opportunities. As a part of this commitment, we strive to provide financial solutions to students at all income levels and with varying academic, merit, and leadership qualifications.

The need-based financial assistance program is designed for students who have a demonstrated financial need, as defined by the Free Application for Federal Student Aid (FAFSA) or other applicable application, in order to assist students in paying college expenses. All financial aid is contingent upon student enrollment and making Satisfactory Academic Progress (SAP), as defined by Scholarships & Financial Aid or the specific aid program.

Financial aid is available in two forms: Gift Aid and Self-help.

<table>
<thead>
<tr>
<th>Gift Aid</th>
<th>Self-Help</th>
</tr>
</thead>
<tbody>
<tr>
<td>Grants (Federal, State, Institutional)</td>
<td>Loans (Federal, State, Institutional, Alternative)</td>
</tr>
<tr>
<td>Scholarships</td>
<td>Student Employment (Work Study, Part-time Employment, Internships, Assistantships)</td>
</tr>
</tbody>
</table>

### Non-resident Tuition Waivers

Texas A&M University’s packaging philosophy for need-based financial aid is to provide the greatest amount of gift aid to those students with the highest demonstrated need and to keep loan liability to a minimum. Financial aid is awarded on a first-come, first-served basis with a priority date prior to the fall semester for which the student is seeking aid published on financialaid.tamu.edu.

To apply for financial assistance, a student must submit a Free Application for Federal Student Aid (FAFSA). The FAFSA becomes available on October 1st each year for the next academic year. Students are encouraged to submit their FAFSA online at https://fafsa.gov as soon as possible. Students who do not meet the citizenship eligibility requirements to complete the FAFSA may be eligible to submit the Texas Application for State Financial Aid (TASFA) or the International Student Financial Aid Application (ISFAA). Only students who have been accepted for enrollment, have a FAFSA or other financial aid application on file, and have submitted all requested documentation to Scholarships & Financial Aid will be sent a financial aid offer. Award offers for incoming students beginning in the Fall semester are made early in the preceding Spring semester. Award offers for incoming students beginning in the Spring semester are made late in the preceding Fall semester. Award
offers to continuing students for the upcoming academic year are made after Spring semester grades have been submitted. Summer financial assistance is offered to students with a FAFSA on file who enroll at least half-time in summer coursework at Texas A&M.

Financial aid offers are made based on the assumption that students will enroll full-time in the fall and spring semesters. Cost of attendance and awards will be adjusted for students who are enrolled less than full-time at Texas A&M University or through the Texas A&M-Blinn TEAM Programs. Students may only receive federal financial aid for eligible courses that count towards the program of study. State and Institutional Aid are not subject to the same regulatory restrictions. However, the cost of attendance for students will be reduced for courses that are not counting to the program of study, which can result in a lower amount of state and institutional aid a student could receive.

Student inquiries may be directed to:

Scholarships & Financial Aid

Please visit our website (http://financialaid.tamu.edu) for the most current information on financial aid applications, programs, and any associated deadlines.

Grants
The Federal Pell Grant is available to undergraduate students who have not received a baccalaureate degree and who have demonstrated financial need as determined by the FAFSA. The Federal Pell Grant provides a foundation of financial assistance to which aid from other sources may be added.

The Federal Supplemental Educational Opportunity Grant (FSEOG), and the Texas Public Education Grant (TPEG) are available to students, provided the results of their financial aid application show evidence of financial need and funds are available. These funds are awarded on a first-come, first-served basis. The Towards EXcellence, Access and Success (TEXAS) grant is available to eligible Texas residents who have requisite levels of financial need according to the FAFSA and have met the remaining program criteria (http://financialaid.tamu.edu/Undergraduate/Types-of-Aid/#0-TEXASGrant). It is also subject to funds availability and eligibility guidelines as defined by the Texas Higher Education Coordinating Board. Additionally, Texas A&M University provides institutional grant aid to eligible students to assist with educational expenses. Student grants are subject to fund availability and may be single-year or multi-year awards.

Student Part-Time Employment
The Student Employment Office in Scholarships & Financial Aid coordinates student part-time employment, both off- and on-campus in the Bryan/College Station area. Students may visit the online job database. Work Study, assistanthips and other part-time positions are posted. Students secure their own employment through job leads provided by Scholarships & Financial Aid or through their own initiative. Employment advising is available to students who have not had previous job seeking experience.

On-campus student employees are paid minimum wage or higher and are paid bi-weekly along with regular University employees. University student employees are not eligible for paid holidays, retirement, vacation, nor sick leave.

Professional development workshops are available for student employees and supervisors of student employees. These free workshops include topics ranging from communication skills to preventing sexual harassment in the workplace and from customer service to workplace etiquette. For more information or to register, please visit the Jobs for Aggies website (http://jobsforaggies.tamu.edu) or call (979) 845-0686.

The Federal/Texas College Work Study Programs
Federal and state programs provide part-time employment for U.S. citizens, permanent residents and eligible non-citizens, within fund limitations, who have an established financial need and desire on-campus employment.

To qualify for the Federal/Texas College Work Study Programs, a student must have submitted a financial aid application, have financial need, be eligible to work in the United States, be enrolled at least half-time or accepted for enrollment and be making Satisfactory Academic Progress if enrolled.

The Community Service Program allows students who qualify for the Federal Work Study Program to work part-time with participating local non-profit, governmental and community-based organizations. This program is designed to improve the quality of life for community residents, particularly low-income individuals, or to solve problems related to community needs.

The Texas A&M University Reads and Counts program is a partner of the national Every Student Succeeds Act (established initially as a part of the No Child Left Behind initiative). It is based on the philosophy that children are our nation’s greatest asset. It calls all Americans to support teachers and help ensure that every child can read well by the end of the third grade. Eligible and dedicated college students are called to serve as reading and math tutors, as well as mentors and role models for area elementary and middle school students.

All Work Study students are paid minimum wage or higher, work an average of 20 hours per week, and are not eligible for paid holidays, retirement, vacation, nor sick leave. For more information on Federal/Texas College Work Study, the Community Service Program, or Texas A&M University Reads and Counts, visit the Student Employment Office on the second floor of the Pavilion or the Jobs for Aggies website (http://jobsforaggies.tamu.edu).

Loan Programs
The Federal Direct Loan Programs are available to students who have submitted a FAFSA. Students will be notified of their eligibility for the Direct Loan program(s) through a financial aid offer.

Students and parents seeking the Parent Loan for Undergraduate Students (PLUS) may obtain information from the financial aid website (http://financialaid.tamu.edu). This program requires the FAFSA to be on file with Scholarships & Financial Aid.

Short-term loans are available to provide assistance to students who experience temporary financial difficulties with educationally related expenses. Funding for this program is provided by The Association of Former Students, the Class of 1926 and other University resources. This program is not intended to provide long-term assistance or to
replace other assistance available through Scholarships & Financial Aid. Students must be degree-seeking and enrolled at least half-time to be eligible for short-term loans.

The Emergency Tuition and Required Fees loan program is available to help students pay their Texas A&M University tuition and required fees. The loan is applied directly to the student’s tuition and fee account.

Please refer to our website (http://financialaid.tamu.edu) for detailed information on all of the aforementioned programs and more.

The Money Education (ME) Center

The Money Education (ME) Center provides the following free resources to all students in order to help them make wise personal finance decisions and to lay a foundation for financial success throughout life.

- Money Wise Aggie Workshops – presentations covering budgeting, credit cards and credit scores, saving and investing, student loans, and more. Scheduled presentations occur on-campus each semester and are provided in classrooms and to student organizations upon request.
- Money Wise Aggie Financial Foundations Series – a series of presentations covering the most critical personal finance topics
- Advising – one-on-one personal financial counseling
- moneywise.tamu.edu – offers personal finance content and videos
- SALT (saltmoney.org/tamu (http://saltmoney.org/tamu)) – provides scholarship, student loan, and personal finance information and tools

To learn more about these free resources, visit money.tamu.edu or contact money@tamu.edu.

Scholarships

College/Departmental Level Scholarships

A number of colleges and departments at the University award scholarships on a merit basis to incoming freshmen interested in particular major fields of study. The value of the awards vary, and the term of scholarships range from one to four years. Selection by each awarding college and department is based upon pre-determined criteria. Completed scholarship applications must be received no later than specified deadlines. Awards are announced mid-spring for the following academic year.

Incoming Freshmen Scholarship Programs

Opportunity Awards are awarded to freshmen based on academic achievement, leadership ability, extracurricular participation, and, in some cases, financial need. To be considered, students must complete and submit the ApplyTexas (http://www.applytexas.org) or Coalition (http://www.coalitionforcollegeaccess.org) freshman scholarship application no later than December 1 of their senior year of high school. In addition to scholarships offered through the Scholarships & Financial Aid office, many colleges, departments, the Corps of Cadets, and the Texas A&M Foundation utilize the ApplyTexas (http://www.applytexas.org) or Coalition (http://www.coalitionforcollegeaccess.org) freshman scholarship application.

Achievement Scholarships are available to incoming freshmen who attended and graduated from targeted high schools in the State of Texas. Scholarships include the Academic Achievement Scholarship, President’s Achievement Scholarship, Challenge Scholarship, and Century Scholarship. These high schools are designated as House Bill 400 schools, Engineering E12 schools, Early College High Schools, and Century Scholar Program Schools. Awards are based on academic achievement, leadership ability, and extracurricular participation. To be considered, students must complete and submit the ApplyTexas (http://www.applytexas.org) freshman scholarship application no later than December 1 of their senior year of high school.

Academic Scholarships are available to incoming freshmen who achieve a minimum 1300 Old SAT composite score (critical reading + math, with respective scores of 600 in each), 1360 New SAT composite score (evidence-based reading and writing score of at least 660 + math scores of at least 620), or 30 ACT composite (English + Math, with scores of at least 27). Scholarships include President’s Endowed Scholarship, Lechner Scholarship, and McFadden Scholarship. Awards are based on academic achievement, leadership ability, and extracurricular participation. To be considered, students must complete and submit the ApplyTexas (http://www.applytexas.org) freshman scholarship application no later than December 1 of their senior year of high school.

Continuing Student Scholarships

The University Scholarship Application is available to students with at least one semester completed at Texas A&M. Awards range in value from $500 to $1,500 and are available to undergraduate, graduate, and professional students currently enrolled at Texas A&M. Some awards are limited to certain fields of study and to individuals who have attained a necessary academic classification, while others are unrestricted. Awards are made to outstanding students based on a combination of academic achievement, campus/community involvement, campus leadership roles, and, for some scholarships, financial need. In addition to scholarships offered through the Scholarships & Financial Aid office, many colleges, departments, the Corps of Cadets, and the Texas A&M Foundation use the University Scholarship Application for award consideration. Students are encouraged to complete the application beginning in October via the scholarships website (https://scholarships.tamu.edu). The deadline for submitting applications is February 1, prior to the academic year for which the student will be awarded.

Transfer Student Scholarships

Aggie Transfer Student scholarships are designed to recognize outstanding students who will be transferring to Texas A&M University. Scholarships are awarded based on a combination of academic achievement, extracurricular activities, campus involvement at their current institution, leadership, major and, in some instances, financial need. These award amounts can range from $500 to $2,000 and the application is available to students through the ApplyTexas (http://www.applytexas.org) or Coalition (http://www.coalitionforcollegeaccess.org) application. In addition to scholarships offered through the Scholarships & Financial Aid office, many colleges, departments, the Corps of Cadets, and the Texas A&M Foundation use the ApplyTexas transfer scholarship application for award consideration. For more details, visit our website (https://scholarships.tamu.edu).

Scholarship Recipients and Non-Resident Tuition Waivers

The Competitive Scholarship waiver, authorized under Texas Education Code 54.213a, is an optional waiver that institutions can implement. An eligible non-resident student who holds a competitive academic scholarship of a specified minimum dollar amount for the academic year or summer for which the student is enrolled may be eligible to pay the fees and charges required of Texas residents without regard to the length of time the student has resided in Texas. The student must have competed with other students, including Texas residents, for the scholarship and the scholarship must be awarded by a Texas A&M University college or departmental scholarship committee or university
representative. An outside donor may be consulted for input by the college or departmental unit, however, outside donor(s) may not make the final selection of the student recipient for a scholarship.

Effective Fall 2017, undergraduate students must be awarded and maintain competitive scholarships of at least $4,000 per academic year in order to qualify for this waiver. All graduate students, all professional students, and current undergraduate students with existing and continuing scholarship awards, may continue to receive this waiver at the previous $1,000 threshold.

More information is available at http://scholarships.tamu.edu/Non-Resident-Tuition-Waiver

For additional information on scholarships, please visit https://scholarships.tamu.edu/ or email scholarships@tamu.edu.
UNIVERSITY POLICIES

University Statement for Individuals with Disabilities

Texas A&M University (TAMU) does not discriminate on the basis of an individual’s disability and complies with Section 504 of the Rehabilitation Act of 1973, and the Americans with Disabilities Act (ADA) as amended.

Students are protected from nondiscrimination regarding access to and participation in TAMU’s programs and activities. TAMU provides academic adjustments and auxiliary aides to accommodate needs of students with disabilities, as defined under the law, who are otherwise qualified to meet the institution’s academic requirements.

Students with disabilities who would like to request accommodations may contact the following based on your campus:

- TAMU College Station and Texas A&M University Health Science Center’s (TAMUHSC) College of Nursing and School of Public Health should contact Disability Services (979) 845-1637 or disability@tamu.edu.
- TAMUHSC College of Dentistry should contact the Office of Academic Affairs (214) 828-8207.
- TAMU Galveston (TAMUG) campus should contact Counseling and Career Services (409) 740-4736 or studentservices@tamug.edu.

Students with a disability who believe they have experienced discrimination may contact the following based on your campus:

- TAMU College Station should contact the ADA Coordinator at (979) 845-8116 or ADA.Coordinator@tamu.edu.
- TAMUHSC should contact the ADA Coordinator at (979) 436-9207 or ADA.Coordinator@tamhsc.edu.
- TAMUG should contact the ADA Coordinator at (409) 740-4503 or boyerj@tamug.edu.

For more information about disability accommodations, see TAMU Student Rule 46, Disability Accommodations in Academic Programs (http://student-rules.tamu.edu/rule46) or TAMUG Student Rule 46, Disability Accommodations in Academic Programs (http://www.tamug.edu/studentrules/Student_Grievance_Procedures/46_Disability_Accommodations.html).

University Statement on Harassment and Discrimination

Texas A&M University provides equal opportunity to all employees, students, applicants for employment or admission, and the public regardless of race, color, sex, religion, national origin, age, disability, genetic information, veteran status, sexual orientation or gender identity. Texas A&M University will promptly investigate all complaints of discrimination, sexual harassment, and/or related retaliation in accordance with applicable federal and state laws. Students who have questions or believe they have experienced illegal discrimination, sexual harassment, sexual violence, and/or related retaliation are encouraged to contact:

- Texas A&M University Health Science Center contacts - Notice of Nondiscrimination and Abuse (https://www.tamhsc.edu/payroll-hr/docs/notice-nondiscrimination-and-abuse.pdf)
- Texas A&M University Galveston Campus contacts - Notice of Nondiscrimination and Abuse (http://www.tamug.edu/hrd/LinksAndForms/TAMUG_Notice_of_Nondiscrimination_and_Abuse.pdf)

INTERNATIONAL OPPORTUNITIES FOR STUDENTS

Student Options Abroad

Study Abroad Programs Office
http://studyabroad.tamu.edu

Texas A&M University is committed to providing access to high impact international opportunities for all students. The ability to engage successfully across cultures and the development of international leadership skills are crucial for success as graduates enter the work force and commit to lifelong learning.

The Study Abroad Programs Office provides access for all Texas A&M students to a broad range of high impact international experiences. Last year, over 5,300 students participated in academic, volunteer, service learning and research opportunities in over 100 different countries. The Study Abroad Programs Office also contributes to the development of on-campus experiences that foster cultural awareness.

Conducting Research Abroad

Texas A&M University faculty engage in research in many foreign countries. Students who join faculty on research programs overseas, or who develop independent research opportunities, should register with the Study Abroad Programs Office to ensure emergency assistance as needed while abroad. Several other research options include the following:

- Fellows Program – MSC L.T. Jordan Institute for International Awareness (http://ltjordan.tamu.edu/fellows)
- Undergraduate Research (http://ugr.tamu.edu)
- Scowcroft Institute of International Affairs (http://bush.tamu.edu/scowcroft)

Internships/Work Abroad Options

Students have a variety of options for credit or non-credit work or internships abroad. In all such cases, students should register their work abroad experiences with the Study Abroad Programs Office to ensure emergency assistance as needed while abroad.

- Internship and Living Abroad Programs – MSC L.T. Jordan Institute for International Awareness (http://ltjordan.tamu.edu/ilap)
- Public Policy Internship Program (http://ppip.tamu.edu)
- Texas A&M Sponsored Internships (http://studyabroad.tamu.edu/Program-Types/Research-Internship-Volunteer-Conference)

University Locations Abroad

Many Texas A&M partner organizations offer international opportunities to students. Students can check the Study Abroad Programs Office search engine to locate such experiences or contact their academic departments about programs and locations they recommend. In addition, Texas A&M has a research and education center in Costa Rica.

The Soltis Center for Research and Education in Costa Rica
http://soltiscentercostarica.tamu.edu

The Soltis Center for Research and Education in north-central Costa Rica was established in January 2009 to support research, education and outreach in Costa Rica and throughout Central America. The Center is located in San Juan de San Isidro de Peñas Blancas, about three hours northwest of San Jose. The modern facilities of the Center include dorms, a cafeteria, wet and dry labs, classrooms, a videoconference room and multiple use areas. The Center provides students and faculty with access to more than 250 acres of primary and second growth forests with an experimental watershed complete with a meteorological station, a canopy tower and weir dam. The Center is adjacent to more than 50,000 hectares of protected forest in the Children’s Eternal Rainforest and the Monteverde Conservation Area. The Zona Protectora Arenal-Monteverde extends to the Center through a forest corridor that descends in elevation from 1,800 meters at Monteverde to 450 meters above sea level at the Center. This natural reserve has four major tropical life zones and includes more than 3,000 species of vascular plants and more than 400 species of resident and migratory birds. At the regional level, the Center is located in the heart of the Peñas Blancas River Watershed, which extends over 40,000 hectares that transition from rainforest in the highlands to pastures and agricultural crops below the Center. The unique physical and cultural setting of the center provides students and faculty with research and educational opportunities in tropical ecology, civil engineering, ecosystem sciences, geosciences, public and rural health and agricultural economics.

On Campus Engagement in International Opportunities

Students don’t have to go abroad to take advantage of international opportunities offered by Texas A&M. Students who remain on campus are encouraged to participate in many options available including the following:

- Academic certificates and minors with an international focus (http://studyabroad.tamu.edu)
- Center for International Business Studies (http://cibs.tamu.edu)
- Confucius Institute at Texas A&M University (http://confucius.tamu.edu)
- Corps Global Leadership Initiatives (http://corps.tamu.edu/global)
- MSC L.T. Jordan Institute for International Awareness (http://ltjordan.tamu.edu)
- Norman Borlaug Institute for International Agriculture (http://borlaug.tamu.edu)
- SCONA (http://scona.tamu.edu)
- Scowcroft Institute of International Affairs (http://bush.tamu.edu/scowcroft)
- Student Organizations (http://studentactivities.tamu.edu/app/organization)
  - (To find internationally focused student organizations, please visit http://studentactivities.tamu.edu/app/search/index and search international.)

Students should consult their department and college advisers for additional opportunities to engage in global education on or off campus.
**HONORS AND UNDERGRADUATE RESEARCH**

LAUNCH promotes student success by providing high-impact educational experiences and challenges motivated students in all academic disciplines to pursue an enriched, intellectually-stimulating curriculum. LAUNCH joins the university community in making Texas A&M a welcoming environment for all individuals. We are committed to helping our students understand the cultures that set us apart and appreciate the values that bring us together.

### Undergraduate Research

LAUNCH: Undergraduate Research promotes, coordinates, creates, and assesses undergraduate programs involving creative scholarship, inquiry, and research in all academic disciplines at Texas A&M. As a recognized "high impact practice," undergraduate research experiences increase undergraduate student learning and success, not only while students are at Texas A&M, but long after graduation.

In terms of professional and intellectual development, being involved in undergraduate research allows students to participate in a scholarly community of students with common interests, to learn more about their future professional field, and to develop a close working relationship with acclaimed faculty. Research experiences make students more competitive for scholarships, internships, jobs, international opportunities, and admission to top graduate and professional programs. Perhaps most importantly, engaging in undergraduate research allows students to experience the excitement of working collaboratively to create new knowledge, solve cutting-edge problems, work collaboratively, and communicate more effectively—life skills that are increasingly valued in our world.

Campus-wide programs coordinated by LAUNCH: Undergraduate Research include the Undergraduate Research Scholars program, the Undergraduate Research Ambassadors, and the publication of *Explorations: the Texas A&M Undergraduate Journal*. The office offers workshops for undergraduate students on getting started in research, finding summer research opportunities, developing research presentations, and organizing thesis writing, as well as workshops for faculty and graduate students on mentoring undergraduate researchers. LAUNCH: Undergraduate Research also works with groups across campus to promote and facilitate activities that support undergraduate research opportunities, such as Summer Undergraduate Research Experiences, National Science Foundation Research Experiences for Undergraduates (REU) programs, and the LAUNCH-Sigma Xi Research Expo. Lastly, the office provides assistance for developing externally-funded proposals and implementation of funded projects that have undergraduate research involvement, such as National Science Foundation REU, Beckman Scholars, and Howard Hughes Medical Institute Education grants.

### Undergraduate Research Scholars Program

Any junior or senior student with a cumulative Texas A&M GPR of 3.0 or above may apply to the Undergraduate Research Scholars (http://ugr.tamu.edu/UGR/UGRS) program. Groups of at least two students collaborating as a team on a single project may also apply. The Research Scholars program requires independent research during the Fall and Spring semesters supervised by a faculty advisor that culminates in a scholarly product. The scholarly product may be a research thesis, an accepted article in a professional journal, an exhibit, a performance, or other product as determined by the faculty advisor in collaboration with the LAUNCH: Undergraduate Research Office. Participants are selected for this program based on the quality of their project proposals and their academic records.

### Explorations: the Texas A&M Undergraduate Journal

*Explorations* is an interdisciplinary, student-led journal guided by faculty and administrators that selects and publishes student-authored research, scholarly, and creative pieces of general interest in any area. *Explorations* is composed of an Executive Board, Editorial Board, as well as a Marketing and Design Team made of students that work to accomplish the many facets of editing, publishing, and marketing the journal while representing departmental diversity, critical thought, and creativity.

The call for submissions begins late in the fall semester and extends into early spring. Articles are submitted in a two-stage process: first, synopses of articles are reviewed by faculty-student teams; second, full-length articles are evaluated in another round of peer review. Creative works are reviewed by faculty-student teams in a one-stage process. All authors of accepted pieces are paired with student board members who provide editorial assistance and formatting guidance. Additionally, the *Explorations* Board extends a call for cover art submissions based on one of the accepted pieces for each volume. Every fall *Explorations* hosts a journal release event to recognize all who were involved in the making of the latest volume.

Acceptance to the journal is highly competitive—less than 20% of submitted synopses result in published articles. Recently published articles cover a wide range of academic fields: music, creative poetry, forensics, cancer biology, astrophysics, nanomedicine, computer algorithms, business, geosciences, sociology, aerospace engineering, and cultural anthropology. To review recent volumes and to find upcoming submission deadlines, visit explorations.tamu.edu.

### Undergraduate Research Ambassadors

Undergraduate Research Ambassadors represent LAUNCH: Undergraduate Research at research, recruiting, and outreach events. Juniors or seniors with an extensive background in research, a GPR of 3.0 or higher, outstanding oral communication skills, and the ability to describe research to a general audience may apply to the program. A cohort of about a dozen Ambassadors are chosen to join existing Ambassadors from multiple disciplines each year. They are trained in presentation and leadership skills and then participate in a variety of activities including meeting with highly-placed members of the University Administration, distinguished faculty, outstanding alumni, prospective students, and parents.

### Workshops and Events

LAUNCH: Undergraduate Research offers informational workshops on undergraduate research for undergraduate students, graduate students, and faculty. Additionally, we coordinate numerous public events that celebrate and promote undergraduate research, providing venues for students to present their research projects, for faculty to recruit new student researchers, and for recognition of the research efforts of both students and faculty. Workshops and events are publicized through emails, newsletters, and the LAUNCH (http://ugr.tamu.edu) website.
Grant, Proposal, and Project Assistance
LAUNCH: Undergraduate Research provides a wide variety of support services for undergraduate research programs, proposal development, and implementation. Please contact the office directly for more information.

Other Capstones
LAUNCH: Capstones offers one year Capstone experiences to any Junior or Senior with a cumulative Texas A&M GPR of 3.0 or above. A listing of capstone options can be found at http://tx.ag/Capstones.

The Undergraduate Teacher Scholars program allows students to collaborate closely with a Texas A&M University faculty member to create a one-credit hour seminar or to improve an existing course in collaboration with a faculty expert. The Teacher Scholar will have the opportunity to research, design, and arrange the content of the seminar. The Teacher Scholar will be responsible for the presentation of class material under the supervision of the Texas A&M University supporting faculty member.

The Undergraduate Service Scholars program pairs students with community leaders to develop and carry out projects that benefit the greater community. The Undergraduate Service Scholars capstone allows the student to draw upon their undergraduate education to plan, coordinate, and execute a project aimed at improving the community while learning about issues that affect that community.

The Undergraduate Leadership Scholars program enables student leaders in various organizations to refine their leadership skills and methodologies. In collaboration with their faculty advisor, Undergraduate Leadership Scholars plan and implement improvements to their organization’s programming and impact on campus or in the community.

All capstones require a proposal and timeline, two semesters engaging with the project, supervision by a faculty member or similar expert, a public presentation, regular reflection, and a scholarly project appropriate for the field. Students are selected for participation in these programs based on the quality of their proposals, their academic record and the recommendation of their faculty or community advisor.

Admission to the University Honors Program
Honors Fellows is the university-level Honors distinction offered by the University Honors Program. Students are admitted to the Honors Fellows curriculum on a competitive basis. Incoming freshmen apply as part of their application for admission to the university. Continuing students may apply each spring for entry in the fall prior to completing 60 credit hours at Texas A&M.

Applications are evaluated on the basis of the student’s record of academic achievement and demonstrated potential for creativity, intellectual ability, imagination, curiosity, willingness to try new things and self-awareness. Once admitted to the Honors Fellows curriculum, students are designated as “Honors Students” and may then access specific privileges and resources, including additional advising, priority registration, contracting non-honors courses for Honors credit, Honors Independent Study and enrolling in graduate-level courses for undergraduate Honors credit. Honors Students also receive priority for the Honors Housing Community and advising for competitive national fellowships.

Freshmen admitted to the University Honors Program are required to live in the Honors Housing Community and participate in the Honors first year experience course. To remain in the program, all students (freshman and continuing students) must make progress toward the Honors Fellows distinction and meet minimum co-curricular participation requirements. See the section on Maintaining Honors Status (p. 105).

Honors Fellows Curriculum
To receive the Honors Fellows distinction at graduation, Honors Students must:

- Earn a total of 30 Honors points. Each credit hour of Honors coursework equals 1 point. 21 points must come from Honors courses distributed as follows:
  - Depth: 12 hours in upper-division (300/400-level) courses or graduate courses taken for undergraduate credit
  - Breadth: 9 hours in the Core Curriculum, as specified in the student’s catalog
  - Additional honors points to bring the total to 30 points

- Maintain 3.25 GPR in Honors coursework and 3.5 GPR overall (http://registrar.tamu.edu/Transcripts-Grades/How-to-Calculate-GPA).
- Practical Application: Complete an Honors Capstone experience (http://honors.tamu.edu/Capstones).

The University Honors Program works with academic departments across the university to ensure that appropriate Honors courses are offered. Honors courses have limited enrollment and encourage participatory learning. In Honors classrooms, students work closely with many of the University’s most acclaimed faculty. Material in Honors courses is intended to provide increased complexity, not simply more work or greater difficulty. Small class size (usually not more than 25 students) also allows Honors courses to undertake activities and utilize facilities not readily available to undergraduate students. Honors classes may be special sections of regularly offered courses or courses developed specifically for Honors Students. Students are encouraged to visit regularly with University Honors Program advisors to ensure that their course selection meets both degree and Honors curriculum requirements.

To complete Honors Fellows curriculum requirements, Honors Students must complete a capstone experience. The requirement may be met by engaging in an academic research project in the Undergraduate Research Scholars Program, by preparing and teaching a seminar or adding enriching material to an existing course as part of the Undergraduate Teacher Scholars Program, by undertaking a community service project as a participant in the Undergraduate Service Scholars Program, by developing an enhancement project for a student organization through the Undergraduate Leadership Scholars Program, or by completing a capstone project designated by their home department. Students should consult with a University Honors Program advisor in the planning stages to seek approval for their capstone experience.

Honors Students are afforded several avenues to earn Honors credit in addition to regularly offered Honors courses. Honors Students may contract for Honors credit, engage in Honors independent study or take graduate courses that count toward undergraduate degree requirements. Honors Students should consult with University Honors Program advisors about these opportunities.

Honors Students with unique intellectual interests and specific educational goals may also “major” in Honors by pursuing the innovative
University Studies – Honors (USHN) degree. Students may combine a range of related academic areas into a coherent degree plan by designating an “area of concentration” in combination with two established minor fields of study. The formulation of the degree plan requires students to conceptually link their course selection to a specific “problem” that will be addressed in a capstone thesis.

Maintaining Honors Status

To remain in the Honors Fellows curriculum, Honors Students must:

1. Maintain a 3.5 cumulative GPR,
2. Maintain a 3.25 GPR in honors coursework,
3. Make progress toward curriculum requirements by taking at least 6 Honors credits per year,
4. Fulfill annual co-curricular participation requirements,
   a. Freshmen: Live in Honors Freshman Housing (or obtain a waiver) and participate in the Learning Community Course, and
   b. Continuing Students: Participate in at least two Honors Student Council events each semester, with at least one designated as academic/intellectual.
   c. All: Prepare or update an ePortfolio on an annual basis.

Honors Students who fail to meet any of these requirements will be given a semester of probation to correct any deficiencies. Honors Students who fail to meet requirements after a semester of probation will be dismissed from the program.

University Scholars

The University Scholars program identifies students who embody academic leadership and enhances the personal, professional and intellectual development of these students.

University Scholars receive a scholarship stipend and participate in a number of development activities, including University Scholar Exploration Series, which are intimate discussion-based seminars offered on a wide variety of topics. Additionally, University Scholars serve as ambassadors for LAUNCH at Texas A&M University, representing the office at outreach events and in publicity materials.

Each spring semester, eligible freshmen are invited to apply for the University Scholar program. The application process involves an extensive written application and, for the approximately 40 students selected as semi-finalists, an in-depth interview. In the end, approximately 10 students are invited to join the University Scholar program.

Freshmen who meet the eligibility criteria for the program will be contacted via their official Texas A&M University email accounts at the start of the Spring semester. Students with questions about eligibility should contact LAUNCH.

Honors Student Services

Honors students have access to numerous special services and programs. Throughout the academic year, LAUNCH: Honors coordinates recreational and community-building events, lectures and workshops. Honors students are invited to engage in leadership opportunities and contribute to the development of the University Honors Program through the Honors Student Council, the University Scholars program, and as members of the Honors Housing Community.

Honors students receive supplemental advising to help them identify ways to enrich their college experience and complete the requirements for the prestigious Honors Fellows distinction. Throughout their time in the University Honors Program, students are encouraged to take on challenging and enriching experiences such as undergraduate research, study abroad, service learning, capstone experiences, and application to nationally-competitive scholarships and fellowships. This program is uniquely designed to make Honors students good candidates for opportunities coordinated through LAUNCH: National Fellowships. These include scholar programs such as the Rhodes, Truman, and Goldwater Scholarships. They also include other prestigious opportunities such as the Fulbright Program for U.S. Students and the National Science Foundation Graduate Research Fellowship Program.

Information about upcoming opportunities for Honors students appear regularly in our email bulletins (https://listserv.tamu.edu/cgi-bin/wa?A0=honors-l).

Services for All Students

LAUNCH challenges all motivated and high-achieving Texas A&M students to explore their world, expand their horizons and excel academically. While some services of the office are exclusive to Honors Students, advisors are available to talk with any undergraduate student who is interested in sampling the academic challenge of an Honors course, committing to an undergraduate research project, applying to the University Honors Program or engaging the process of self-discovery entailed in preparation for national fellowships. Students interested in applying to nationally competitive scholarships like the Rhodes, Marshall, Goldwater, and Fulbright U.S. Student Program should view our list of fellowship opportunities (http://natfellows.tamu.edu/National-Fellowships/About-National-Fellowships) and make note of instructions for our campus application processes (http://natfellows.tamu.edu/National-Fellowships/Apply-to-National-Fellowships-2016).

Continuing students with a minimum 3.5 cumulative GPR who have not applied or not been accepted to the Honors Fellows program may enroll in honors coursework during their assigned registration time. Students who would like to meet with a University Honors Program advisor may sign up for an appointment through our online appointment system (http://swan.tamu.edu/launch). All students interested in the services offered by LAUNCH are encouraged to sign up for the Honors weekly email bulletin.

Graduation with Honors

All Honors courses are designated on a student’s transcript, demonstrating to future employers or admissions committees that the student has engaged with an enriched, challenging curriculum. Students who complete the Honors Fellows curriculum and/or completion of the Undergraduate Research Scholars program are further denoted as graduation and transcript distinctions.

Undergraduates in some academic colleges and departments may pursue additional transcript distinctions (See http://honorsprograms.tamu.edu). These distinction requirements work in parallel with the Honors Fellows plan, but are separate and distinct from the University Honors Program. Many students elect to graduate with multiple distinctions from the university, college, or departmental offerings. In general, all Honors transcript distinctions require that the student complete a substantial body of Honors coursework, hold a minimum cumulative Texas A&M GPR of 3.5, and a cumulative Honors course GPR of 3.25, and meet other program participation requirements. Students are encouraged to work through their college
and/or departmental advisor to ensure satisfactory completion of the distinction requirements.

These Honors transcript distinctions are separate and distinct from "Latin Honors" such as *cum laude, summa cum laude* or *magna cum laude*, which are conferred by the Office of the Registrar and are based upon cumulative GPR and residency requirements (See http://registrar.tamu.edu/Graduation-Degree-Programs/Graduation-Diplomas/Graduation-with-Honors).
TRANSITION ACADEMIC PROGRAMS

Transition Academic Programs
Transition Academic Programs provides academic advising services for students transitioning between majors and programming for students transitioning from high school to college. Campus-wide programs coordinated by Transition Academic Programs include Aggie Gateways to Success and the Texas A&M Blinn TEAM (Transfer Enrollment to A&M) Program.

Academic Advising for Students in Transition
Transition Academic Programs helps students who are changing majors develop a realistic academic plan, transition into a new degree-granting major, and progress toward timely graduation. Currently enrolled Texas A&M students who move into Transition Academic Programs are only guaranteed one semester to complete necessary requirements to move into a degree-granting major.

Aggie Gateway to Success
Qualified students are selected for provisional admission by the Office of Admissions to participate in the Aggie Gateway to Success (AGS) program during the summer prior to their first fall semester at Texas A&M University. Participating students are assigned 6 hours of University Core Curriculum courses plus an Academic Success Center study skills class and participate in a learning community for the second summer session (July-August). Students who pass all assigned summer courses with at least a 2.0 grade point average earn the right to continue as a fully admitted student for the fall semester. Successful AGS students may compete for acceptance in any major program for which they meet regular change of curriculum requirements. Students are advised by Transition Academic Programs advisors about the best way to complete these requirements. Gateway students may apply for summer Financial Aid. Participants must reside on campus during the summer.

The Texas A&M Blinn TEAM Program
The Texas A&M-Blinn TEAM Program (TEAM) is a collaborative, co-enrollment partnership between Texas A&M University and Blinn College. To be considered for participation in the TEAM program, a prospective student must apply for regular freshman admission and meet all admission criteria. TEAM students enroll in a minimum of 12 total credit hours per semester, divided between Texas A&M and Blinn. TEAM students are able to transition into degree-granting departments at Texas A&M via the change of curriculum process if they have: Completed 45 Blinn and 15 Texas A&M credit hours, maintained required grades at both schools, and satisfied departmental entry criteria (to include any internal application processes). It is sometimes possible for TEAM students to transition in less than two years. TEAM students are able to access student services and programs on both campuses, to include participation in the Corps of Cadets and Greek Life. They may apply for on-campus housing at A&M, as well as financial aid (based upon their combined credit hours from both schools).

FOCUS Learning Community
LAUNCH promotes student success by providing high impact educational experiences and challenges motivated students in all academic disciplines to graduate from an enriched, intellectually-stimulating curriculum.

LAUNCH joins the university community in making Texas A&M a welcoming environment for all individuals. We are committed to helping our students understand the cultures which set us apart and appreciate the values that bring us together.

As a LAUNCH: Learning Community, FOCUS offers first-year Regents’ Scholarship recipients a full-year experience while they build Foundations of Continued Undergraduate Success (FOCUS). During the first year on campus, FOCUS students delve into connection, achievement, respect and exploration as guiding principles for personal development and individual responsibility in university life. Students meet weekly in one In-FOCUS Session of UGST 181 (zero-credit, S/U) each semester and benefit from professional staff guidance, undergraduate Community Leaders, in-hall programming, and monthly activities. FOCUS provides additional academic coaching, supplemental instruction, and tutoring and the option of joining an interest-centered track. Tracks require more student commitment during the year but provide additional opportunities for field-specific activities, mentoring by faculty or professional school students, and higher levels of interaction. With an academic advisor’s guidance, students may register for a small 25-student reserved section. FOCUS students are required to live in the FOCUS Living-Learning Community in Haas Hall and to participate in FOCUS orientation sessions prior to fall semester. Regents’ Scholars register for the program through the Living-Learning Programs application in the Residence Life housing portal during the spring prior to enrolling at Texas A&M University. Students who are not eligible for Regents’ Scholarships may register and request placement on the wait list.
UNIVERSITY STUDIES DEGREES

The University Studies Degree provides students the flexibility to combine areas of study that are of special interest. The combination of courses may not be possible through existing degree plans. This flexibility may be attractive to students who have particular career paths or post-baccalaureate degree paths in mind.

A University Studies Degree consists of a concentration of 21-24 hours and two minors of 15-18 hours each and requires 120 hours for completion. One of the two minors must be completed in a college outside of the college that provides the concentration for the student’s degree. A University Studies major will be considered a student in the college that offers the concentration and will receive academic advising services from that college. The student’s diploma will list Bachelor of Arts or Bachelor of Science in University Studies.

Information on specific University Studies degree programs is listed with individual colleges.

Texas A&M University

- University Studies - BA, Journalism Studies Concentration (p. 560)
- University Studies - BA, Race, Gender, Ethnicity Concentration (p. 561)
- University Studies - BA, Religious Thought, Practices and Cultures Concentration (p. 563)
- University Studies - BA, Society, Ethics and Law Concentration (p. 564)
- University Studies - BS, Biomedical Sciences Concentration (p. 654)

  • Doctor of Philosophy in Water Management and Hydrological Science (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/interdisciplinary/water-management-hydrological-science)

Bachelor of Arts/Science and Juris Doctor Program

Prior to enrolling in the School of Law, students must have completed at least 75% of their required undergraduate credit hours plus all undergraduate degree requirements that cannot be fulfilled through completion of coursework offered by the School of Law. Upon successful completion of the first year of coursework required of full-time students at the School of Law (or at whatever later point students successfully complete at the School of Law the required number of credit hours remaining for their undergraduate degree), 3+3 students will be awarded their bachelor's degree. Those equivalent credit hours will also count toward the 90 hours that students must earn for their Juris Doctor degree.

Credit for advanced placement, transfer, and dual credit courses are subject to the approval of each student’s undergraduate degree program. Students must complete the core curriculum requirements, thirty-six upper-level credit hours to satisfy university residency requirements (at least twelve upper-level credit hours must be in the major), and all additional graduation requirements published in their undergraduate catalog.

Student Application Process

Students should meet with pre-law advisor at Texas A&M University as soon as possible (at the latest by the completion of sixty acceptable degree program credit hours). Students must meet with their academic advisor at Texas A&M University no later than completion of sixty acceptable credit hours and must prepare a tentative degree plan for entry into the 3+3 program (all core curriculum hours, credit hours required to satisfy residency and major requirements, and graduation requirements to be included).

After completing between forty-five and sixty hours of credit, the student prepares for LSAT, takes test, and applies to the School of Law or applies to the School of Law through the “10% Rule.” The 10% Rule is a new American Bar Association Standard that allows a law school to admit up...
to 10% of its incoming class from its home institution without requiring those students to take the LSAT. In particular, the 10% Rule requires that the student must have scored at or above the 85th percentile on the ACT or SAT; and that the student must be ranked in the top 10% of their undergraduate class through six semesters of academic work or have achieved a cumulative GPA of 3.5 or above through six semesters of academic work.

In the fall of a student’s junior year (having completed approximately sixty credit hours), students apply for admission to the School of Law through the normal law school admissions process. During the fall and spring of the student’s junior year, the School of Law admissions office interviews selected applicants and makes decision on whether to accept or deny each applicant. Successful applicants begin law school in the fall of the accepted year.

Students applying through the 3+3 program must have an undergraduate grade point ratio of at least 3.25. Each student is allowed one semester of grades below a 3.25. If a student requests to be considered for the 10% Rule, that student must have attained a 3.5 (or above) grade point ratio through six semesters.

All students applying through the 3+3 program must complete normal procedures required by the School of Law for admission (including application, transcripts, letters of recommendation, and LSAT [if applicable]). In addition, those students must interview with the School of Law during the application process and submit secondary application materials designed for prospective 3+3 students.

The decision of whether to admit a student to the School of Law, including any student who has applied to or been accepted into any 3+3 program at the undergraduate level, rests exclusively with the School of Law.

**Awarding of Undergraduate Degree Timeline**

Students entering law school through the 3+3 program must enroll at the School of Law on a full-time basis. Their undergraduate degree will be awarded after successful completion of all coursework required for full-time, first-year law students at the TAMU School of Law (or at whatever later point students successfully complete at the School of Law the required number of credit hours remaining for their undergraduate degree), and successful completion of all undergraduate degree and graduation requirements at TAMU.

The student will be responsible for initiating graduation procedures with the Office of the Registrar to verify completion of degree requirements. The participating undergraduate department or program will complete the required degree audit, approve the necessary substitutions, and clear the student to graduate. Students accepted into the 3+3 program will be able to graduate after completion of all of their undergraduate degree and graduation requirements at TAMU, but no earlier than completion of the required first-year full-time coursework at Texas A&M University School of Law.

Additional information about the law school’s course of study, as well as its academic rules, can be found at [https://law.tamu.edu/current-students/registrar-student-services/rules-policies](https://law.tamu.edu/current-students/registrar-student-services/rules-policies).

**Neuroscience**

**Interdisciplinary Program in Neuroscience**

Chair: J. Welsh

Neuroscience is a field devoted to the scientific study of the nervous system, from its molecular/cellular underpinnings to the organization of neural circuits, and the manifestation of this biological/neurochemical machinery as behavioral, physiological and psychological processes. It aims to detail both how the normal system operates and how alterations in function contribute to clinical diseases, such as mental illness, dementia, developmental disorders, neurodegenerative diseases, chronic pain, drug addiction, and the loss of function with aging or neural injury.

**Minors**

Neuroscience Minor (p. 110)

**Certificates**

Neuroscience Certificate (p. 111)

**Neuroscience - Minor**

A minor in Neuroscience is considered an interdisciplinary minor with course selections in the Departments of Biology, Psychology, Philosophy and Veterinary Integrative Biosciences. Please be aware that each course selection may have prerequisite requirements that must be met.

To apply for admission to the Minor in Neuroscience, students must complete the Minor Approval Form. It must be signed by the NRSC academic advisor and then submitted to your major advisor.

**Program Requirements**

The coursework listed represents various sub-disciplines within the field of Neuroscience and would give the student an overall knowledge base fitting a minor in Neuroscience. No grade below a C is acceptable to meet minor requirements.

**Minor Requirements**

- Students must complete a minor in Neuroscience.
- The minor requires a minimum of 29 semester credit hours.
- At least 15 semester credit hours must be completed at Texas A&M University.
- The minor core includes courses in neuroscience, behavior, and systems neuroscience.
- Students must complete a minor approval form and submit it to the NRSC academic advisor.
- Additional information can be found at [https://law.tamu.edu/current-students/registrar-student-services/rules-policies](https://law.tamu.edu/current-students/registrar-student-services/rules-policies).

PSYC 332  Memory
NRSC 333/  Biology of Psychological Disorders
PSYC 333
NRSC 335/  Physiological Psychology
PSYC 335
NRSC 340/  Psychology of Learning
PSYC 340
NRSC 360/  Health Psychology and Behavioral
PSYC 360  Medicine
NRSC 401/  Developmental Neurotoxicology
VIBS 401
NRSC 407/  Core Ideas in Neuroscience
VIBS 407
NRSC 434/  Regulatory and Behavioral
BIOL 434  Neuroscience
NRSC 450/  Mammalian Functional
VIBS 450  Neuroanatomy
NRSC 485  Directed Studies
NRSC 489  Special Topics in...
NRSC 491  Research
PHIL 320  Philosophy of Mind
BIOL 388  Principles of Animal Physiology
BIOL 435  Laboratory for Regulatory and
Behavioral Neuroscience

Total Semester Credit Hours 15

The minor must be declared before the student has completed 95 credit hours.

Student must make a grade of C or better.

For Psychology students, no more than 6 credit hours can be counted toward both the Neuroscience Minor and the Psychology Major.

A total of 6 hours of directed research (485/491) may be counted toward the minor. Directed studies may be conducted with any member of the faculty of Neuroscience. Research experiences must be approved by the NRSC faculty mentor.

Neuroscience - Certificate

The Neuroscience Certificate, offered by the Texas A&M Institute for Neuroscience (TAMIN), provides students with the opportunity to acquire enhanced training in research in various aspects of the nervous system of humans and other animals. Students in this Certificate Program will gain a broader understanding of how the nervous system functions during health and disease through enriched experiences in areas of molecular, structural, physiological, cognitive, behavioral, computational, or bioengineering neuroscience. The Neuroscience Certificate requires completion of 16 hours of course work in designated courses. Students must complete, prior to graduation, a combination of coursework and inquiry-based research (or an internship), which will be completed under the supervision of a TAMIN faculty member.

Steps:

Normally, students should apply to the Neuroscience Certificate program approximately two years before they plan to graduate. For the first two years of the program (Fall 2014-Spring 2016), students who are further along in the program may apply (and are expected to complete all requirements). To apply, students must:

1. Identify a faculty advisor who is willing to supervise Directed Studies in Research (NRSC 485/491). Working with the faculty advisor, the student must develop a brief (one paragraph) description of the proposed line of research.
2. Complete the Neuroscience Certificate Program form and have the faculty advisor sign it.
3. Submit the form to the TAMIN Coordinator in the Interdisciplinary Life Sciences Building, Room 3148.

Students must maintain the required GPA for their major.

Students must present their research at one TAMU Student Research Week and a poster at the Annual TAMIN Neuroscience Symposium held in the spring semester.

Students are expected to file a degree plan for their major within the administering department at the start of their junior year.

Students wishing to obtain an Honors Neuroscience Certificate must maintain a GPA of 3.5. Please visit the Honors Office in Henderson Hall to request honors credit and to complete any paperwork required by that office.

Required Courses

Prescribed electives
NRSC 333/ PSYC 333  Biology of Psychological Disorders
NRSC 335/ PSYC 335  Physiological Psychology
NRSC 340/ PSYC 340  Psychology of Learning
NRSC 360/ PSYC 360  Health Psychology and Behavioral Medicine
NRSC 401/ VIBS 401  Developmental Neurotoxicology
NRSC 434/ BIOL 434  Regulatory and Behavioral Neuroscience
NRSC 450/ VIBS 450  Mammalian Functional Neuroanatomy

Other electives

BICH 410  Comprehensive Biochemistry I
BICH 411  Comprehensive Biochemistry II
BICH 431/ GENE 431  Molecular Genetics
BIOL 319  Integrated Human Anatomy and Physiology I
BIOL 320  Integrated Human Anatomy and Physiology II
BIOL 388  Principles of Animal Physiology
BIOL 413  Cell Biology
BIOL 423  Cell Biology Laboratory
GENE 302  Principles of Genetics
GENE 405/ BIMS 405  Mammalian Genetics
GENE 431/ BICH 431  Molecular Genetics

NUTR 469/ FSTC 469  Experimental Nutrition and Food Science Laboratory
PHIL 320  Philosophy of Mind

Total Semester Credit Hours 16

1 No more than six credits can be used towards the Neuroscience Certificate. This limit does not preclude students from taking additional hours. Those hours will not, however, count towards the 16 credit hours needed to complete the Neuroscience Certificate.
2 If a student takes more than one course, it can count towards their electives.
COLLEGE OF AGRICULTURE AND LIFE SCIENCES

Administrative Officers
Vice Chancellor and Dean - Mark A. Hussey, Ph.D.
Executive Associate Dean - Alan Sams, Ph.D.
Associate Dean for Academic Operations - Kim E. Dooley, Ph.D.
Associate Dean for Graduate Programs and Faculty Development - David W. Reed, Ph.D.
Associate Dean for Student Development - Chris L. Skaggs, Ph.D.
Assistant Dean for Student Success - Danielle A. Harris, Ph.D.

General Statement
Ensuring an adequate and safe food supply for a rapidly expanding world population, succeeding in a global economy, and maintaining our planet’s natural resources and biodiversity are some of the challenges that are being met by graduates from the College of Agriculture and Life Sciences. Our students apply knowledge to solve problems as scientists, business leaders, engineers, educators, physicians, and other professionals. Enthusiastic and competitive students, a distinguished faculty, innovative teaching methods, outstanding advisors, and abundant experiential learning opportunities, result in the College of Agriculture and Life Sciences being considered one of the top colleges of agriculture and life sciences in the country.

Our 30 majors and 25 minors provide students technical expertise and a broad education so that they can meet the challenges of feeding the world, improving health, protecting the environment, growing our economy, and enriching youth. Abilities to think creatively and critically, solving problems, making decisions and communicating effectively are developed, along with learning how to work with people of varied backgrounds. Relating well with others, leadership and followership are vital to professional success. Faculty members who teach undergraduate classes include many who are recognized nationally and internationally for research and other accomplishments in their disciplines. Interested undergraduates also have a chance to be a part of research projects themselves.

There are many opportunities for high impact courses and programs, such as undergraduate research, international experiences, internships, and field study. The college has study abroad programs in the Americas, Asia, Europe, Oceania, Africa, and the Caribbean. All students are encouraged to participate in at least one of these high impact activities before graduation. Honors programs are available in many of the college’s academic departments. There are numerous student organizations that are sponsored by departments or the college such as the Freshman Leadership Experience and the College of Agriculture and Life Sciences Student Council. These organizations promote interaction among students who share interests and foster leadership skills.

The College of Agriculture and Life Sciences and its departments offer a variety of scholarships to students on a competitive basis. Many are reserved for incoming freshmen or transfer students. Additional information and application forms for college-level scholarships for current students can be obtained from the Scholarships & Financial Aid Office. Information about departmental scholarships can be obtained from the departments directly.

College of Agriculture and Life Sciences

Baccalaureate Degree Programs
Each major can be planned to prepare students for graduate study or admission to professional schools in medicine, dentistry, veterinary medicine, other health professions, and law. Students in programs, such as biochemistry, genetics, and nutritional sciences, are highly recruited for medicine, nursing, and other health professions. Animal science and wildlife and fisheries sciences are among several excellent choices for students interested in veterinary medicine. Students with a background in natural resources, the agricultural industry, forensics, or life sciences can use that knowledge well if they choose to enter law school. An environmental lawyer with a degree in a natural resource area is better equipped to incorporate the science with the law.

Advising is provided for each student in the college through offices in the individual academic departments. Departmental faculty and professional advisors provide assistance on course selection and other academic issues. They also serve as mentors for career planning and admission to graduate or professional school. Advisors serve as professional consultants for students in the College with the objective of avoiding problems if possible and solving problems if needed.

Requirements for Graduation
Requirements for graduation are listed in the Texas A&M University Student Rules and this catalog. With the exception of general elective requirements, courses taken to satisfy degree requirements must be taken for letter grades.

International and Cultural Diversity Requirement
Texas A&M University requires its students to meet an International and Cultural Diversity requirement as part of the Graduation requirements. Meeting this requirement will require the careful selection of courses. The student is directed to the Requirements for a Baccalaureate Degree (p. 27) section of this catalog for detailed information regarding this requirement and also is encouraged to seek the advice of the student’s academic advisor.

Internships
Internships provide real-world experience in industries related to a student’s education and professional career preparation. Students return to campus with a broader perspective and more intense interest in their education. The experiences are so valuable that many students complete more than one internship. Most departments in the College offer academic credit for the satisfactory completion of an internship. In fact, an internship is required for graduation in some degree programs.

The Agricultural and Natural Resources Policy (ANRP) Internship Program places students from the College of Agriculture and Life Sciences in policy-based internships in Austin, TX, Washington, D.C. and Rome, Italy for a semester or summer. Selection for the program is based upon factors such as academic performance, leadership, and a student’s general interest in learning the policy process.

Graduate Study
All departments in the College of Agriculture and Life Sciences offer graduate degrees at the master’s and doctoral levels. Many departments offer courses and programs online.

Students are encouraged to contact the department in which they wish to obtain information about graduate study. Information on admission, programs available, etc., can be found in the Texas A&M University Graduate and Professional Catalog.

**Teacher Certification**

Texas teacher certification in agricultural science is available through the Department of Agricultural Leadership, Education, and Communications. Certification is granted through the State Board of Educator Certification (SBEC) upon a student’s completion of the course of study administered by the department. The undergraduate major in agricultural science includes all coursework required for teacher certification. The requirements can be completed with any major in the College of Agriculture and Life Sciences. See an advisor in Agricultural Science, Department of Agricultural Leadership, Education, and Communications, for more information.

**Majors**

**College of Agriculture and Life Sciences**

- Bachelor of Science in Renewable Natural Resources (p. 156)

**Department of Agricultural Economics**

- Bachelor of Science in Agribusiness (p. 120)
- Bachelor of Science in Agricultural Economics, Finance and Real Estate Option (p. 122)
- Bachelor of Science in Agricultural Economics, Food Marketing Systems Option (p. 123)
- Bachelor of Science in Agricultural Economics, Policy and Economic Analysis Option (p. 124)
- Bachelor of Science in Agricultural Economics, Rural Entrepreneurship Option (p. 125)
- Bachelor of Science in Agricultural Economics and Master of Public Service and Administration, 5-Year Degree Program (p. 126)

**Department of Agricultural Leadership, Education, and Communications**

- Bachelor of Science in Agricultural Communications and Journalism (p. 132)
- Bachelor of Science in Agricultural Leadership and Development (p. 133)
- Bachelor of Science in Agricultural Science (p. 134)
- Bachelor of Science in University Studies, Leadership Studies Concentration (p. 135)

**Department of Animal Science**

- Bachelor of Science in Animal Science, Production/Industry Option (p. 138)
- Bachelor of Science in Animal Science, Science Option (p. 140)

**Department of Biochemistry and Biophysics**

- Bachelor of Science in Biochemistry (p. 143)
- Bachelor of Science in Genetics (p. 144)

**Department of Biological and Agricultural Engineering**

- Bachelor of Science in Agricultural Systems Management (p. 147)
- Bachelor of Science in Biological and Agricultural Engineering (p. 148) — offered in conjunction with the College of Engineering

**Department of Ecosystem Science and Management**

- Bachelor of Science in Ecological Restoration (p. 151)
- Bachelor of Science in Forestry (p. 152)
- Bachelor of Science in Rangeland Ecology and Management, Ranch Management Option (p. 153)
- Bachelor of Science in Rangeland Ecology and Management, Rangeland Resources Option (p. 155)
- Bachelor of Science in Renewable Natural Resources (p. 156)
- Bachelor of Science in Spatial Sciences (p. 158)

**Department of Entomology**

- Bachelor of Science in Entomology (p. 161)
- Bachelor of Science in Forensic and Investigative Sciences, Pre-Law Emphasis (p. 163)
- Bachelor of Science in Forensic and Investigative Sciences, Science Emphasis (p. 165)

**Department of Horticultural Sciences**

- Bachelor of Arts in Horticulture (p. 168)
- Bachelor of Science in Horticulture (p. 169)

**Department of Nutrition and Food Science**

- Bachelor of Science in Food Science and Technology, Food Industry Option (p. 172)
- Bachelor of Science in Food Science and Technology, Food Science Option (p. 174)
- Bachelor of Science in Nutrition, Didactic Program in Dietetics Track (p. 176)
- Bachelor of Science in Nutrition, General Nutrition Track (p. 177)
- Bachelor of Science in Nutrition, Molecular and Experimental Track (p. 179)

**Department of Plant Pathology and Microbiology**

- Bachelor of Science in Bioenvironmental Sciences (p. 181)
- Bachelor of Science in Environmental Studies (p. 182)
- Bachelor of Science in University Studies, Environmental Business Concentration (p. 183)
Department of Poultry Science
• Bachelor of Science in Poultry Science, Industry Emphasis (p. 185)
• Bachelor of Science in Poultry Science, Technical Emphasis (p. 186)

Department of Recreation, Park and Tourism Sciences
• Bachelor of Science in Recreation, Park and Tourism Sciences with Certificate (p. 189)
• Bachelor of Science in Renewable Natural Resources (p. 156)

Department of Soil and Crop Sciences
• Bachelor of Science in Plant and Environmental Soil Science, Crops Emphasis (p. 197)
• Bachelor of Science in Plant and Environmental Soil Science, Soil and Water Emphasis (p. 198)
• Bachelor of Science in Turfgrass Science (p. 199)

Department of Wildlife and Fisheries Sciences
• Bachelor of Science in Renewable Natural Resources (p. 156)
• Bachelor of Science in Wildlife and Fisheries Sciences, Aquatic Ecology and Conservation Option (p. 205)
• Bachelor of Science in Wildlife and Fisheries Sciences, Vertebrate Zoology Option (p. 206)
• Bachelor of Science in Wildlife and Fisheries Sciences, Wildlife Ecology and Conservation Option (p. 208)

Minors
Minors consist of a group of specified courses totaling between 15 and 18 credit hours. Students who are eligible to enroll in a minor should contact an advisor in the department offering the minor. Minors available in the college are listed.

Department of Agricultural Economics
• Agribusiness Entrepreneurship Minor
• Agricultural Economics Minor (p. 129)
• AgriFood Sales Minor (p. 129)
• Financial Planning Minor (p. 130)

Department of Agricultural Leadership, Education, and Communications
• Agricultural Communications and Journalism Minor (p. 135)
• Extension Education Minor (p. 136)
• International Agricultural Development Minor (p. 136)
• Leadership Minor (p. 136)

Department of Biochemistry and Biophysics
• Biochemistry Minor (p. 146)
• Genetics Minor (p. 146)

Department of Biological and Agricultural Engineering
• Agricultural Systems Management Minor (p. 150)

Department of Ecosystem Science and Management
• Forestry Minor (p. 158)
• Rangeland Ecology and Management Minor (p. 159)
• Spatial Sciences Minor (p. 159)

Department of Entomology
• Entomology Minor (p. 166)

Department of Horticultural Sciences
• Horticulture Minor (p. 170)

Department of Plant Pathology and Microbiology
• Bioenvironmental Sciences Minor (p. 184)

Department of Poultry Science
• Poultry Science Minor (p. 187)

Department of Recreation, Park and Tourism Science
• Park and Natural Resource Management Minor (p. 192)
• Recreation, Park and Tourism Sciences Minor (p. 193)
• Tourism Management Minor (p. 193)
• Youth Development Minor (p. 193)

Department of Soil and Crop Sciences
• Agronomy Minor (p. 200)
• Environmental Soil Science Minor (p. 200)
• Plant Breeding Minor (p. 201)

Department of Wildlife and Fisheries Sciences
• Wildlife and Fisheries Sciences Minor (p. 209)

Certificates
Certificate programs document expertise in an area beyond a major or minor. Information on requirements for certificate programs is available from the advisor of the department offering the certificate. Certificate programs available in the college are listed.

Department of Agricultural Economics
• International Trade and Agriculture Certificate (p. 130)

Department of Animal Science
• Equine Science Certificate (p. 141)
• Meat Science Certificate (p. 141)
Department of Ecosystem Science and Management
- Watershed Certificate (p. 159)

Department of Entomology
- Public Health Entomology Certificate (p. 167)

Department of Horticultural Sciences
- Enology Certificate (p. 170)

Department of Recreation, Park and Tourism Science
- Community Recreation and Park Administration Certificate (p. 194)
- Hospitality Management Certificate (p. 194)
- Parks and Conservation Certificate (p. 194)
- Professional Event Manager Certificate (p. 195)
- Tourism Management Certificate (p. 195)
- Youth Development Certificate (p. 195)

Masters

College of Agriculture and Life Sciences
- Master of Natural Resources Development in Natural Resources Development (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/agriculture-life-sciences/recreation-park-tourism-sciences/mnrds)
- Master of Science in Plant Breeding (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/agriculture-life-sciences/horticultural-sciences/plant-breeding-ms)

Doctoral

College of Agriculture and Life Sciences
- Doctor of Philosophy in Plant Breeding (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/agriculture-life-sciences/plant-breeding-phd)

Department of Agricultural Economics
- Doctor of Philosophy in Agricultural Economics (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/agriculture-life-sciences/agriculture-life-sciences/agricultural-economics/phd)

Department of Agricultural Leadership, Education, and Communications
- Doctor of Education in Agricultural Education—offered as a joint program with Texas Tech University when offered by Distance Education (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/agriculture-life-sciences/agricultural-leadership-education-communications/edd)
- Doctor of Philosophy in Agricultural Leadership, Education and Communication—offered in conjunction with the College of Education and Human Development (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/agriculture-life-sciences/agricultural-leadership-education-communications/phd)

Department of Animal Science
- Doctor of Philosophy in Animal Breeding (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/agriculture-life-sciences/animal-science/animal-breeding-phd)
- Doctor of Philosophy in Animal Science (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/agriculture-life-sciences/animal-science/phd)
• Doctor of Philosophy in Physiology of Reproduction (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/agriculture-life-sciences/animal-science/physiology-reproduction-phd)

Department of Biochemistry and Biophysics
• Doctor of Philosophy in Biochemistry (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/agriculture-life-sciences/biochemistry-biophysics/phd)

Department of Biological and Agricultural Engineering
• Doctor of Philosophy in Biological and Agricultural Engineering (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/agriculture-life-sciences/biological-agricultural-engineering/phd)

Department of Ecosystem Science and Management
• Doctor of Philosophy in Ecosystem Science and Management (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/agriculture-life-sciences/ecosystem-science-management/phd)

Department of Entomology
• Doctor of Philosophy in Entomology (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/agriculture-life-sciences/entomology/phd)

Department of Horticultural Sciences
• Doctor of Philosophy in Horticulture—also offered as cooperative program with Texas A&M University - Kingsville (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/agriculture-life-sciences/horticultural-sciences/horticulture-phd)
• Doctor of Philosophy in Plant Breeding (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/agriculture-life-sciences/horticultural-sciences/plant-breeding-phd)

Department of Nutrition and Food Science
• Doctor of Philosophy in Food Science and Technology (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/agriculture-life-sciences/nutrition-food-science/food-science-technology-phd)
• Doctor of Philosophy in Nutrition (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/agriculture-life-sciences/nutrition-food-science/nutrition-phd)

Department of Plant Pathology and Microbiology
• Doctor of Philosophy in Plant Pathology (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/agriculture-life-sciences/plant-pathology-microbiology/phd)

Department of Poultry Science
• Doctor of Philosophy in Poultry Science (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/agriculture-life-sciences/poultry-science/phd)

Department of Recreation, Park and Tourism Sciences
• Doctor of Philosophy in Recreation, Park and Tourism Sciences (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/agriculture-life-sciences/recreation-park-tourism-sciences/phd)

Department of Soil and Crop Sciences
• Doctor of Philosophy in Agronomy (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/agriculture-life-sciences/soil-crop-sciences/agronomy-phd)
• Doctor of Philosophy in Plant Breeding (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/agriculture-life-sciences/soil-crop-sciences/plant-breeding-phd)
• Doctor of Philosophy in Soil Science (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/agriculture-life-sciences/soil-crop-sciences/soil-science-phd)

Department of Wildlife and Fisheries Sciences
• Doctor of Philosophy in Wildlife and Fisheries Sciences (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/agriculture-life-sciences/wildlife-fisheries-sciences/phd)

Interdepartmental Degree Programs
The Bachelor of Science in Renewable Natural Resources degree is an interdepartmental degree in the College of Agriculture and Life Sciences. It is offered in the Department of Ecosystem Science and Management (p. 150), the Department of Recreation, Parks and Tourism Sciences, (p. 187) and the Department of Wildlife and Fisheries Sciences (p. 203).

Majors
• Bachelor of Science in Renewable Natural Resources (p. 156)

Department of Agricultural Economics
The Department of Agricultural Economics offers a Bachelor of Science degree in Agricultural Economics. The BS degree in Agricultural Economics offers students four options: Finance and Real Estate, Food Marketing Systems, Policy and Economic Analysis, and Rural Entrepreneurship. The course requirements for the freshman and sophomore years are the same for all Agricultural Economics options. In conjunction with the Bush School of Government and Public Service, the department offers a five-year program that allows a student to receive a BS in AGEC and a Master’s of Public Service and Administration degree. In addition, in conjunction with the Mays Business School, the department also offers a BS in Agribusiness.
Department of Agricultural Economics Honors Plan

The Department of Agricultural Economics at Texas A&M University offers academically talented Agricultural Economics and Agribusiness majors an opportunity to study, experience, learn, and grow. This honors plan will enrich your college experience by offering curricular challenge and stimulating your interest in research. Through the Agricultural Economics departmental honors plan, you will have an opportunity to work closely with faculty members and have in-depth conversations about class topics as well their areas of research. You will develop the vital problem solving and critical thinking skills that are valued in today’s fast-paced business culture. Honors distinctions will demonstrate your ability to handle a challenging curriculum, which can be particularly useful if you are planning to attend graduate school or law school. The challenging coursework and fascinating co-curricular activities offered through this program will enhance your academic success.

The Department of Agricultural Economics Honors Plan is administered through the Undergraduate Programs Office, located in Room 214 of the Agriculture and Life Sciences Building. For more information, contact the Undergraduate Programs Office, (979) 845-4911, or visit our website at http://agecon.tamu.edu/undergraduate/current-students/honors/ and select the Future or Current Students link.

Faculty

Bessler, David A, Professor
Agricultural Economics
PHD, University of California, Davis, 1977

Boadu, Frederick O, Professor
Agricultural Economics
PHD, University of Kentucky, 1981

Buenger, Sarah D, Lecturer
Agricultural Economics
MS, College for Financial Planning, 2015

Conner, James R, Senior Professor
Agricultural Economics
PHD, Texas A&M University, 1970

Harness, Nathaniel J, Instructional Associate Professor
Agricultural Economics
PHD, Texas Tech University, 2007

Ishdorj, Ariun, Associate Professor
Agricultural Economics
PHD, Iowa State University, 2008

Leatham, David J, Professor
Agricultural Economics
PHD, Purdue University, 1983

Litzenberg, Kerry K, Professor
Agricultural Economics
PHD, Purdue University, 1979

McCarl, Bruce A, Distinguished Professor
Agricultural Economics
PHD, The Pennsylvania State University, 1973

Menzies, Max D, Lecturer
Agricultural Economics
MS, Texas A&M University, 2004

Mjelde, James W, Professor
Agricultural Economics
PHD, University of Illinois at Urbana-Champaign, 1985

Moore, Christopher M, Lecturer
Agricultural Economics
MBA, Texas A&M University Commerce, 2013

Ng, Desmond W, Associate Professor
Agricultural Economics
PHD, University of Illinois at Urbana-Champaign, 2001

Penson, John B, Professor
Agricultural Economics
PHD, University of Oklahoma, 1978

Price, Edwin C, Professor
Agricultural Economics
PHD, University of Kentucky, 1973

Richardson, James W, Professor
Agricultural Economics
PHD, University of Illinois at Urbana-Champaign, 1973

Rister, M E, Professor
Agricultural Economics
PHD, Michigan State University, 1981

Salin, Victoria S, Professor
Agricultural Economics
PHD, Purdue University, 1996

Senarath Dharmasena, Kalu A, Instructional Assistant Professor
Agricultural Economics
PHD, Texas A&M University, 2010

Shaw, William D, Professor
Agricultural Economics
PHD, University of Colorado, 1985

Siebert, John W, Professor
Agricultural Economics
PHD, University of California, Berkeley, 1978

Stebbins, Richard A, Professor
Agricultural Economics
JD, Texas Tech School of Law, 2005
MS, Texas Tech University, 2005

Stevens, Reid, Assistant Professor
Agricultural Economics
PHD, University of California, Berkeley, 2015

Vedenov, Dmitry, Associate Professor
Agricultural Economics
PHD, The Ohio State University, 2001

Williams, Gary W, Professor
Agricultural Economics
PHD, Purdue University, 1981
Woodward, Richard T, Professor  
Agricultural Economics  
PHD, University of Wisconsin - Madison, 1997

Wu, Ximing, Professor  
Agricultural Economics  
PHD, University of California, Berkeley, 2003

Zhang, Yu, Assistant Professor  
Agricultural Economics  
PHD, Texas A&M University, 2010

Majors
Agribusiness
• Bachelor of Science in Agribusiness (p. 120)

Agricultural Economics
• Bachelor of Science in Agricultural Economics, Finance and Real Estate Option (p. 122)  
• Bachelor of Science in Agricultural Economics, Food Marketing Systems Option (p. 123)  
• Bachelor of Science in Agricultural Economics, Policy and Economic Analysis Option (p. 124)  
• Bachelor of Science in Agricultural Economics, Rural Entrepreneurship Option (p. 125)  
• Bachelor of Science in Agricultural Economics and Master of Public Service and Administration, 5-Year Degree Program (p. 126)

Minors
• Agribusiness Entrepreneurship Minor (p. 128)  
• Agricultural Economics Minor (p. 129)  
• AgriFood Sales Minor (p. 129)  
• Financial Planning Minor (p. 130)

Certificates
• International Trade and Agriculture Certificate (p. 130)

Agribusiness - BS

Curriculum in Agribusiness (BS)
The Bachelor of Science degree in Agribusiness combines selected Core Business Knowledge classes from a degree in business with coursework emphasizing the understanding of the unique institutional and managerial challenges facing agribusiness firms. By integrating business management principles with applied technical knowledge, students develop practical decision-making skills to address challenges facing agribusiness firms in the production, processing and distribution of food and fiber in Texas, the nation, and the world. Students in the BS Agribusiness degree program will take selected coursework in the Mays Business School.

1. Requirements for graduation are listed in the Texas A&M University Student Rules and this catalog. With the exception of general elective requirements, courses taken to satisfy degree requirements must be taken for letter grades. In addition, students pursing the Agribusiness degree must have a GPR of 2.0 and in the courses included in the Core Business Knowledge.

Upper-Level Entry into Agribusiness
The requirements and procedures for consideration for upper level are as follows:

1. In order to be considered for upper-level and possible admission into the program of study in agribusiness, a student must have:
   a. Satisfactorily completed at least 60 semester credit hours.
   b. Satisfactorily completed all of the following eight courses:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>

<td>3</td>
</tr>
</tbody>
</table>

   1 This requirement may be met with MATH 140

c. Students should complete the freshman and sophomore sequence of courses as listed under Curriculum in Agribusiness. Following this sequence will allow the timely application for consideration for upper-level.

d. Admission, if granted, will be effective upon successful completion of the in-process courses; however, if all requirements are not met prior to the start of the next semester, admission will be revoked.

2. Transfer students: Transfer students admitted to the Agribusiness degree will be classified as AGBL (lower-level Agribusiness) students until they complete all requirements listed previously in item 1.

3. Change of curriculum students: Texas A&M students who change curriculum into the Agribusiness degree from another college or department at the University will be classified as AGBL (lower-level Agribusiness) students until they complete all requirements listed in item 1.

1. Satisfies the University Core Curriculum Social and Behavioral Sciences requirement.
2. For those students under ROTC contract, see Requirement 7 of the Requirements for a Baccalaureate Degree (p. 28).
3. Three hours must be selected from ENGL 103 or ENGL 104.
4. All undergraduate students must take at least two (2) specific courses in their major designated as writing intensive (W). This course is an approved W course.
5. Six hours required. A complete list of approved international electives is available in the college Undergraduate Program Office, Room 214 of the Agriculture and Life Sciences Building, or can be found on our website.
6. Three hours of technical agriculture electives to be selected from any course offered by the College of Agriculture and Life Sciences except 285s, 484s, 485s and agricultural economics courses. To be selected in consultation with an advisor.
7. Any Texas A&M or transfer course (except KINE 198 and KINE 199; STLC 001-STLC 003) not used to meet other requirements.

Agricultural Economics - BS, Finance and Real Estate Option

The Bachelor of Science degree in Agricultural Economics offers students four options: Finance and Real Estate, Food Marketing Systems, Policy and Economic Analysis, and Rural Entrepreneurship. The course requirements for the freshman and sophomore years are the same for all Agricultural Economics options.

The Agricultural Economics program is designed to assist in the development of skills in agriculture, applied economics, and economic logic which students can utilize to analyze and communicate about financial, real estate, sales, marketing, policy, and entrepreneurship issues in Texas, the nation, and the world. Graduates are trained for a wide variety of jobs in agricultural and nonagricultural oriented businesses, firms, and agencies in both the public and private sectors. Flexibility is included in the curriculum so that a student, in consultation with an academic advisor, can develop a degree program which best fits personal career objectives and could include one or more of the following experiences: industry internship; the Agricultural and Natural Resources Policy Internship program; and research, directed studies, or study abroad opportunities.

Requirements for graduation are listed in the Texas A&M University Student Rules and this catalog. With the exception of general elective requirements, courses taken to satisfy degree requirements must be taken for letter grades.

Finance and Real Estate Option

The Finance and Real Estate option is designed to provide a well-founded basis in principles, concepts and methods for students interested in finance and/or related professions.

Agricultural Economics - BS, Policy and Economic Analysis Option

The Bachelor of Science degree in Agricultural Economics offers students four options: Finance and Real Estate, Food Marketing Systems, Policy and Economic Analysis, and Rural Entrepreneurship. The course requirements for the freshman and sophomore years are the same for all Agricultural Economics options.

The Agricultural Economics program is designed to assist in the development of skills in agriculture, applied economics, and economic logic which students can utilize to analyze and communicate about financial, real estate, sales, marketing, policy, and entrepreneurship issues in Texas, the nation, and the world. Graduates are trained for a wide variety of jobs in agricultural and nonagricultural oriented businesses, firms, and agencies in both the public and private sectors. Flexibility is included in the curriculum so that a student, in consultation with an academic advisor, can develop a degree program which best fits personal career objectives and could include one or more of the following experiences: industry internship; the Agricultural and Natural Resources Policy Internship program; and research, directed studies, or study abroad opportunities.

Requirements for graduation are listed in the Texas A&M University Student Rules and this catalog. With the exception of general elective requirements, courses taken to satisfy degree requirements must be taken for letter grades.

Policy and Economic Analysis Option

The Policy and Economic Analysis Option is designed to provide a well-founded basis in principles, concepts and methods for students interested in pursuing graduate study and/or law school following their graduation with a BS degree.

Agricultural Economics - 5-Year Bachelor of Science/Master of Public Service Administration

The Joint-Degree Program between the Department of Agricultural Economics and The Bush School of Government & Public Service allows undergraduate Agricultural Economics students to enter the Master of Public Service Program at the beginning of their senior year (typically year four) at Texas A&M University. This enables students to receive both their Bachelor of Science in Agricultural Economics (B.S. AGEC) and a Master of Public Service and Administration (MPSA) graduate degree, with a track emphasis in Public Policy Analysis (PPA), in five years. The program includes a total of 151 hours with 17 hours double-counting to both degrees.

To be considered for the 5-year degree program, Agricultural Economics students must have a minimum 3.25 GPA and have completed 103 of the 120 hours of course work required to receive a bachelor’s degree. These courses must include all of the specific prerequisites for a B.S. in Agricultural Economics, as well as the courses required by the College of Agriculture and Life Sciences and by Texas A&M University for an undergraduate degree.

Students in the 3+2 program will submit the same materials (including GRE scores) as other MPSA applicants; the one exception to this is the submission of a 2-page application found on the Bush School website rather than the ApplyTexas application, hence no application fee. Students whose records are judged to be competitive by the mid-January...
Students who choose not to finish the MPSA degree after being admitted to the five-year program may exit the program at any time. Completed MPSA courses will be applied to their bachelor's degree in Agricultural Economics, and students will select the Agricultural Economics option area that is most appropriate for their interest. Failure to complete the MPSA program will in no way impede their ability to attain a bachelor's degree in Agricultural Economics when the requirements for that degree are completed.

Advising for the five-year program will involve a coordinated effort by the Undergraduate Program Office in the Department of Agricultural Economics and the Director of the MPSA program in the Bush School. Advising by the Department of Agricultural Economics will help ensure that interested students have satisfied the prerequisite course requirements for their bachelor's degree by the beginning of their senior year. The MPSA director and GBS director of recruiting will also be available for Agricultural Economics students who wish to set up appointments to talk individually about the MPSA program's curriculum and career opportunities available to its graduates.

Students in the five-year program will be required to complete the same two-year, 48-hour curriculum as other students admitted to the Bush School's MPSA program.

### Agribusiness Entrepreneurship - Minor

The Agribusiness Entrepreneurship Minor is for students who are interested in starting their own business; working in an existing family-owned business; working for an entrepreneur; pursuing employment with a bank or financial institution; or wanting a working knowledge of business development practices and strategies.

Students will choose to develop a business plan for their own professional career pursuit, or to evaluate a business from an investor’s or consultant’s perspective in the coursework included in this minor. Your business venture and business settings will be selected, and mutually agreed on, between the instructor and the student. The options

**Fourth Year**

**Fall**

General Electives 14

- BUSH 631 Quantitative Methods in Public Management I
- PSAA 601 Foundations of Public Service
- PSAA 621 Economic Analysis or Foundations of Microeconomic Theory
- PSAA 622 Public Finance
- PSAA 635 Social Welfare and Health Policy

**Spring**

AGEC elective 600-level 3

Select one of the following:

- AGEC 604/PSAA 663 Natural Resource Economics
- AGEC 606 Water Resource Economics
- AGEC 607 Research Methodology
- AGEC 610 Economics of Biosecurity
- AGEC 614 Global Food and Agribusiness Policy
- AGEC 633 Sustainability in World Development
- AGEC 652 International Agribusiness Trade Analysis

**Fifth Year**

**Fall**

- PSAA 611 Public Policy Formation 3
- PSAA 675 Public Service and Administration Capstone Seminar 3
- Elective 600-level 6
- One approved PSAA Elective 3

**Spring**

- PSAA 615 Policy Analysis 3
- PSAA 676 Public Service and Administration Capstone Seminar II 3
- Elective 600-level 9

The program includes a total of 150 hours with 17 hours being applied toward both the B.S. in AGEC and the MPSA (14 hours of general electives and 3 hours of 600-level AGEC coursework).
for your business are wide and varied, and your business can be located in either a rural or metropolitan setting.

A critical ingredient in the Agribusiness Entrepreneurship Minor is learning to establish and develop a large network with successful entrepreneurs and other professionals. This minor offers ample opportunities for you to learn how to develop networking strategies in the classroom and in social settings.

Innovation and entrepreneurship are not limited to one field/degree area; therefore, the Agribusiness Entrepreneurship Minor is open to all majors. Students must have a cumulative GPR of 2.0 or higher to be approved to pursue the minor. Students must earn a grade of "C" or better in all required minor coursework.

### Agricultural Economics - Minor

The minor in Agricultural Economics is available to all students enrolled at Texas A&M University. The primary educational objective of this minor program is to provide students, majoring in other fields, with a fundamental knowledge of the fields of agricultural economics. The courses required for this minor will cover the major business elements of the agricultural industry.
The minor in Financial Planning prepares students for leadership roles in this growing profession. Financial planners advise their clients about financial decisions, including budget management, insurance, investment, taxes, retirement and estate planning. Their goal is to assist clients in achieving their financial goals in an increasingly complex economy. The six-course curriculum (18 credit hours) also satisfies the educational requirements to be eligible to sit for the exam portion of the CERTIFIED FINANCIAL PLANNER™ (CFP®) designation conferred by the CFP Board of Standards (http://www.cfp.net). Professionals who have earned this designation are in high demand in the financial services sector.

The minor in Financial Planning is available to all junior or senior undergraduate students enrolled at Texas A&M University, who have completed an introductory finance course and have an overall GPA of 2.5 or higher. Successful completion of the minor requires the courses to be taken for academic credit with a grade of C or better for each course. Coursework is offered both online and in the classroom to meet students' learning preferences. Visit our website (http://financialplanning.tamu.edu) for more information about this minor and the career opportunities in Financial Planning.

Students must make a grade of "C" or better in all courses.

Students must have completed an introductory finance course and have an overall GPA of 2.5 or approval of the program director.

### International Trade and Agriculture - Certificate

Open to All Majors

The Certificate in International Trade and Agriculture (CITA), offered by the Department of Agricultural Economics, is designed to provide students with a complete knowledge and understanding of the global forces shaping change in agriculture. The CITA is available to all students provided that all prerequisites are met. The program requires a minimum of 15 credit hours in designated courses. Also, students must earn a grade of "C" or better in each course used to meet CITA requirements. Students who pursue the CITA must complete all requirements prior to graduation. Specific certificate requirements are available in the Undergraduate Programs Office, Room 214 of the Agriculture and Life Sciences Building, of the Department of Agricultural Economics or at http://agecon.tamu.edu/undergraduate/current-students/curriculum/certificate/
Study abroad, foreign languages, and international internships are encouraged and allowed to contribute toward the 15 hours required for the certificate. No more than three hours of foreign language or six hours of study abroad or six hours of international internship may be counted as credit toward the certificate.

Department of Agricultural Leadership, Education, and Communications

The Department of Agricultural Leadership, Education, and Communications (ALEC) includes a student-centered faculty and staff offering undergraduate and graduate degrees leading to professional careers. Undergraduate programs in ALEC offer a unique combination of practical, hands-on skills and the critical people skills required for success in today’s fast-moving careers. ALEC graduates are uniquely equipped for leadership, education, communications, and training roles in the broad field of agricultural sciences and human performance in both domestic and international settings. ALEC offers four Bachelor of Science degrees: Agricultural Communications and Journalism, Agricultural Leadership and Development, Agricultural Science, and University Studies-Leadership Studies; and three minors: Agricultural Communications and Journalism, International Agricultural Development, and Leadership.

Faculty

Archer, Holli R, Assistant Professor

Agricultural Communications and Journalism - BS

Strong Jr, Robert L, Associate Professor
Ag Leadership, Educ & Comm
PHD, University of Florida, 2010

Strong, Jennifer R, Associate Professor
Ag Leadership, Educ & Comm
PHD, Oklahoma State University, 2007

Wingenbach, Gary J, Professor
Ag Leadership, Educ & Comm
PHD, Iowa State University, 1995

Majors

- Bachelor of Science in Agricultural Communications and Journalism (p. 132)
- Bachelor of Science in Agricultural Leadership and Development (p. 133)
- Bachelor of Science in Agricultural Science (p. 134)
- Bachelor of Science in University Studies, Leadership Studies Concentration (p. 135)

Minors

- Agricultural Communications and Journalism Minor (p. 135)
- Extension Education Minor (p. 136)
- International Agricultural Development Minor (p. 136)
- Leadership Minor (p. 136)

Agricultural Communications and Journalism - BS

Curriculum in Agricultural Communications and Journalism is administered by the Department of Agricultural Leadership, Education, and Communications. Graduates are employed by agricultural businesses, industries and associations; by agriculture-related organizations; by government agencies at all levels; and by all types of communication media: magazines, the Internet, television and radio stations, newspapers, and public relations and advertising agencies.

Students who wish to develop specific career plans may do so in consultation with their Agricultural Communications and Journalism advisor. With approval of the advisor and the dean’s office, substitutions may be made in the required scientific and technical agriculture courses to help meet the student’s goals.

Students are expected to be proficient in the use of computer keyboards for writing.

Agricultural Leadership and Development - BS

Agricultural Leadership and Development is administered by the Department of Agricultural Leadership, Education, and Communications. It prepares students to work with people involved in agriculture and life sciences. The curriculum emphasizes the development of leadership capabilities, communication skills, and broad preparation in life sciences. The curriculum in agricultural leadership and development is multidisciplinary, designed to develop students for leadership positions in local, state, regional, and national groups, organizations, and agencies that are involved in the agricultural industry. The degree requires a 15-18 hour university approved minor that serves as a context for students to apply their leadership knowledge.
Students are required to make a C or better for each of their courses in the major coursework area.

At least 36 credits must be 300- and 400-level courses.

Graduation requirements include a requirement for six hours of international and cultural diversity courses. A course satisfying a Core category, a college/department requirement or a free elective can be used to satisfy this requirement.

**Agricultural Science - BS**

The Agricultural Science curriculum is designed to offer the student a combination of courses in scientific agriculture and in professional education that will meet requirements for employment and advanced study in different careers in which the emphasis is on formal and informal programs of education. Such careers may include teaching agriculture food, and natural resources in high schools; working as an agricultural extension agent; working as an agricultural representative for a marketing agency, an agricultural supply company or other industries related to agriculture; and serving as an agricultural development consultant in an international program.

A student majoring in agricultural science will be counseled by an advisor in the Department of Agricultural Leadership, Education, and Communications to ensure that the program developed with the student will satisfy his or her unique interests, needs and professional aspirations. A combination of courses in scientific agriculture, education and general studies provides students with a knowledge of scientific agriculture and the ability to work with and influence people. Flexibility in course selection allows a student to place emphasis on a particular field of agriculture or to prepare broadly in agricultural studies. This flexibility will prepare a student to teach in a particular school setting, focusing upon a certain curriculum (e.g., mechanical systems, horticulture, animal science, or agricultural business).

Many aspects of the practice of agriculture are learned through experience. Enrollment in high school agricultural science and participation in FFA and/or 4-H are encouraged and recommended, but not required.

A student following this curriculum may be eligible to enter public schools as a teacher of agriculture food and natural resource under the Texas Education Agency. An off-campus professional teaching internship is required.

Total Semester Credit Hours 120

1. Must make a grade of 'C' or better to receive credit.
2. Professional development courses required for certification as a teacher of agricultural science.
3. In order to be eligible for student teaching, the AGSC major requires a 2.75 GPA.
4. Restricted electives in scientific agriculture are required for teacher certification by the Texas Education Agency. A minimum of 24 semester hours of scientific agriculture must be at the 300- and 400-level.
The Graduation requirements include a requirement for six hours of international and cultural diversity courses. A course satisfying a Core category, a college/department requirement, or a free elective can be used to satisfy this requirement.

**University Studies - BS, Leadership Studies Concentration**

A University Studies Degree is an interdisciplinary major that consists of a concentration of 26 hours and two minors of 15-18 hours each. The University Studies Degree format was created to provide students the flexibility to combine areas of study that are of special interest. University Studies - Leadership Studies is administered by the Department of Agricultural Leadership, Education, and Communications. In the leadership studies concentration, students learn theories and models of the leadership process and they use analysis and evaluation to synthesize multiple leadership theories. This interdisciplinary program allows you the ability to customize your higher educational experience to your future career goals unlike any other degree at Texas A&M University. This innovative degree empowers you to develop an understanding of foundational leadership theory in your chosen context. The student, with support from the advisor, will choose minors to assist them in creating a degree plan that will allow students to gain the knowledge and skills required for their chosen career path.

1 Before registering as a junior, each student must develop a degree program in consultation with the departmental advisor.

2 The total number of hours between Minor 1, Minor 2 and electives must be 53 hours. Courses counting in other areas of the degree plan and toward a minor cannot count toward the 53 total hours. Must meet with an advisor to determine correct hours.

Students are required to make a C or better for each of their courses in the major coursework and both Minor Areas.

At least 36 credits must be 300- and 400-level courses.

The Graduation requirements include a requirement for 6 hours of international and cultural diversity courses. A course satisfying a Core category, a college/department requirement, or a free elective can be used to satisfy this requirement.

**Agricultural Communications and Journalism - Minor**

Students in the College of Agriculture and Life Sciences seeking a minor in Agricultural Communications and Journalism should begin the process by discussing the option with their academic advisor in their major. Students should then make an appointment with an advisor in Agricultural Communications and Journalism to discuss their interests. An application is required for establishing a minor in Agricultural Communications and Journalism.

Agricultural Communications and Journalism is highly focused on written communication. Interested students should consider their interest in writing before beginning the minor.

Students must make a grade of "C" or better in all courses.
**Extension Education - Minor**

The undergraduate Minor in Extension Education (EXED) provides students with formal instruction in Extension Education necessary to be successful Extension educators. The 18 hour curriculum prepares students in the history and philosophy of Extension education, extension educational methodologies, program management and program development. Students explore Extension educational roles in their future contexts; develop an awareness of program development, volunteer management, Extension educational theories and models for future application as an Extension educator. The coursework includes nine credits of foundation leadership concepts, three credit hours in a specialized area of leadership, and three hours in an Extension internship.

Total Semester Credit Hours: 18

Minimum of 6 hours at 300- to 400-level.

**International Agricultural Development - Minor**

The minor in International Agricultural Development provides students with formal instruction in international development concepts and practical experiences through language acquisition, study/research abroad, and/or international fieldwork. The 18-hour curriculum prepares students for successful post-baccalaureate international careers, or graduate studies. Students critically examine current international agricultural issues and/or diversity and communications. Coursework includes 12 credits of foundational concepts and six hours of upper-division foreign languages or approved international experiences. Students must have a declared major, a GPR of 2.0 or higher, and have completed less than 75 hours at time of application. Before being accepted into the minor, students must meet with an IDAG advisor and complete an online application.

- Practical Skills/Experiences: Upper-division, university-level foreign languages; or IDAG advisor approved international experiences

Total Semester Credit Hours: 18

Students must have completed less than 75 hours and have a minimum GPA of 2.0 or higher.

**Leadership - Minor**

The minor in leadership studies provides students with formal instruction of leadership theory and practices necessary to be successful leaders in future career roles. The 15-hour curriculum prepares students to be effective industry, community, and organization leaders. Students explore leadership roles in their future contexts, develop an awareness of personal leadership characteristics, and apply leadership theories and models to future professional experiences. The coursework includes 9 credits of foundational leadership concepts, 3 credit hours in a specialized area of leadership, and 3 hours in a capstone seminar.

Department of Animal Science

The curricula in Animal Science are designed to prepare students for rewarding careers in animal-oriented agribusiness. The millions of domestic animals that provide food, fiber and recreation for humans offer a variety of career opportunities for animal science graduates.

Students completing the Bachelor of Science degree in Animal Science are in demand by both the private and public sectors. Career paths include livestock production and the extensive infrastructure that provides the products and services required for management, marketing and processing of livestock and livestock products. Students receive training in nutrition, breeding, reproductive physiology, meat science, dairy products, wool and mohair, and the production and management of livestock. Extensive laboratory facilities and livestock operations located on or near campus in the Animal Science Teaching, Research and Extension Complex facilitate practical application of the scientific principles.

Leadership skills are developed through participation in a wide array of extracurricular activities, including departmental clubs, judging teams and continuing education/youth programs. A substantial number of students gain experience in a variety of disciplines through high impact learning experiences such as internships, research, study abroad and field trips.

Animal Science - BS, Production/Industry Option

This curriculum prepares students for careers in animal-oriented agribusinesses. Other courses, in addition to animal science courses, include marketing, economics, genetics and management. A wide array of internships giving students invaluable experience in all phases of livestock production and related industries is available. Career opportunities include sales, management, public relations, marketing, quality control and education. Students may concentrate on an emphasis area within this option, including the following.

Beef Cattle
Students receive training that enables them to pursue careers in ranch management, feedlot management, pharmaceutical sales and other service-oriented livestock industries. Students are trained in all aspects of production, marketing and merchandising techniques for employment in the beef industry. The University Beef Cattle Center gives students hands-on experience.

Dairy
The focus of this emphasis area is to develop a well-rounded, knowledgeable student. Students have the opportunity to apply scientific principles, problem-solving methods, state-of-the-art techniques and information transfer to complex dairy production systems.

Equine
Designed for students with professional or vocational interests in horses and the horse industry. Coursework emphasizes equine nutrition, breeding, reproduction, health, management, training and judging. Lectures are reinforced with laboratories in which students work with horses. Graduates are well prepared for careers with horse production farms, stallion stations, performance and race training stables, breed associations, performance horse organizations, feed and pharmaceutical companies, county extension positions, and other industries and agencies related to the horse industry.

Meat
Students prepare for a career in the meats industry by taking meat science and processing and evaluation courses. Students also can conduct research through special problems courses and can gain valuable work experience on campus in the Meat Science Section or the Rosenthal Meat Science and Technology Center or off campus through internships or summer jobs. Job opportunities are available in packing, processing, retailing, purveying, food service, promotion, public relations and government regulatory agencies.
Sheep

Designed to prepare students for careers in the sheep and goat industries and in the associated wool and mohair industries, this emphasis gives students first-hand experience in sheep production and management practices, as well as procedures for processing and evaluating fleeces. Job opportunities are diverse and include flock management, marketing of lamb and fiber products, feed and pharmaceutical sales and county extension agent positions.

Swine

This emphasis area is designated for students planning to pursue a career in swine production or closely allied industries. Students are taught the principles of breeding and genetics, nutrition and feeding, animal health, environmental control and waste management as they relate to profitable swine production systems. These principles are reinforced by hands-on experience with the department’s swine herd. Career paths include management of swine production units and technical service or sales for feed, pharmaceutical and breeding stock companies.

Animal Science - BS, Science Option

This curriculum is designed to provide scientific expertise in chemistry, biological and physical sciences and mathematics and is recommended for students considering entry into the veterinary, medical or allied health field, or the graduate program of their choice. This option provides a strong background for graduate study in a wide variety of disciplines. Animal scientists graduating with a Bachelor of Science degree in this option who do not enter graduate or professional school find employment in rewarding careers in the pharmaceutical, clinical and food-related industries. Students may concentrate on an emphasis area within this option, including the following.

Pre-Professional

Students planning to pursue a career in veterinary medicine can complete all course requirements for admission to the professional curriculum in this emphasis. Students gain experience working with animals through direct contact in laboratory courses and directed field study. Students acquire knowledge of animal systems and animal behavior principles through coursework and interaction with livestock industry leaders. Students are also prepared to seek admission to the professional curricula in medicine, dentistry, pharmacy, optometry and physical therapy.

Pre-graduate Studies

This emphasis prepares students to pursue a Master of Science, Master of Agriculture or Doctor of Philosophy degree. Possible graduate programs include animal behavior, animal breeding, biochemistry, cellular and molecular biology, meats, dairy science, food science and technology, genetics, growth biology, nutrition and reproductive physiology. Experience gained through honors courses, internships, special problems courses and research laboratories helps the student identify specific disciplines of interest for graduate study. Students with advanced degrees are employed as university professors, research scientists or technicians, extension livestock specialists and technical representatives for industry.

**Meat Science - Certificate**

The Department of Animal Science offers a certificate in Meat Science for students who wish to obtain specialization in this area. The certificate is designed to provide a knowledge base to those individuals who
have an interest in pursuing a career that involves the meat industry. Students must complete a minimum of 18 credit hours by taking four required courses and selecting additional courses from the elective list to complete the minimum credit hour requirement.

¹ Students who have taken ANSC 489, Special Topics in Advanced Meat Technology, will be credited with ANSC 447.

² Students who have taken ANSC 489, Special Topics in Meat Merchandising, will be credited with ANSC 337.

### Department of Biochemistry/Biophysics

Curriculum in Biochemistry is administered by the Department of Biochemistry and Biophysics.

Biochemists seek to understand life at the molecular level, including the detailed structures of biological molecules and the chemical reactions in which they participate. They study the molecules of living systems of all kinds, from the simplest viruses and bacteria to higher plants and animals. In their work, biochemists use experimental tools ranging from x-ray crystallography and nuclear magnetic resonance to bioinformatics and genetic engineering. Biochemistry is a dynamic and diverse field that has become the basic discipline for the life sciences, and biochemists have made significant discoveries that relate to medicine, agriculture, and the environment.

### Faculty

Ayres, Nicola M, Senior Lecturer
Biochemistry & Biophysics
PHD, University of Nebraska - Lincoln, 1987

Bryk, Mary E, Associate Professor
Biochemistry & Biophysics
PHD, Albany Medical College, 1994

Cho, Jae H, Assistant Professor
Biochemistry & Biophysics
PHD, State University of New York at Stony Brook, 2006

Cruz-Reyes, Jorge A, Professor
Biochemistry & Biophysics
PHD, London School of Hygiene & Tropical Medicine, 1992

Datta, Sumana, Associate Professor
Biochemistry & Biophysics
PHD, University of California, San Diego, 1987

Devarene, Timothy P, Associate Professor
Biochemistry & Biophysics
PHD, University of Kentucky, 2000

Glasner, Margaret E, Associate Professor
Biochemistry & Biophysics
PHD, Massachusetts Institute of Technology, 2003

Gohil, Vishal M, Assistant Professor
Biochemistry & Biophysics
PHD, Wayne State University, 2005

Hu, James C, Professor
Biochemistry & Biophysics
PHD, University of Wisconsin - Madison, 1987

Igumenova, Tatyana I, Associate Professor
Biochemistry & Biophysics
PHD, Columbia University, 2003

Kaplan, Craig D, Associate Professor
Biochemistry & Biophysics
PHD, Harvard University, 2003

Kunkel, Gary R, Associate Professor
Biochemistry & Biophysics
PHD, University of California, Los Angeles, 1977

Li, Pingwei, Professor
Biochemistry & Biophysics
PHD, Peking University, China, 1996

Meek, Thomas D, Professor
Biochemistry & Biophysics
PHD, The Pennsylvania State University, 1981

Miles, Bryant W, Senior Lecturer
Biochemistry & Biophysics
PHD, Texas A&M University, 1998
Mullet, John E, Professor  
Biochemistry & Biophysics  
PHD, University of Illinois at Urbana-Champaign, 1981

Mullins, Leisha H, Senior Lecturer  
Biochemistry & Biophysics  
PHD, Texas A&M University, 1989

Panin, Vladislav M, Professor  
Biochemistry & Biophysics  
PHD, Moscow State University, 1990

Park, William D, Professor  
Biochemistry & Biophysics  
PHD, University of Florida, 1977

Pellois, Jean-Philippe, Professor  
Biochemistry & Biophysics  
PHD, University of Houston, 2002

Peterson, David O, Professor  
Biochemistry & Biophysics  
PHD, Harvard University, 1977

Pishko, Elizabeth J, Lecturer  
Biochemistry & Biophysics  
PHD, The University of Texas at Austin, 1993

Polymenis, Michael S, Professor  
Biochemistry & Biophysics  
PHD, Tufts University, 1994

Reinhart, Gregory D, Professor  
Biochemistry & Biophysics  
PHD, University of Wisconsin - Madison, 1979

Reynolds, Mollie M, Lecturer  
Biochemistry & Biophysics  
PHD, Texas A&M University, 2010

Rye, Chavela M, Lecturer  
Biochemistry & Biophysics  
PHD, Massachusetts Institute of Technology, 2014

Rye, Hays S, Associate Professor  
Biochemistry & Biophysics  
PHD, University of California, Berkeley, 1995

Sacchettini, James C, Professor  
Biochemistry & Biophysics  
PHD, Washington University in St. Louis, 1987

Shippen, Dorothy E, Professor  
Biochemistry & Biophysics  
PHD, The University of Alabama at Birmingham, 1987

Straight, Paul D, Associate Professor  
Biochemistry & Biophysics  
PHD, University of Colorado, 2000

Young, Ryland F, Professor  
Biochemistry & Biophysics  
PHD, The University of Texas at Dallas, 1975

Zeng, Lanying, Assistant Professor  
Biochemistry & Biophysics  
PHD, University of Illinois at Urbana-Champaign, 2007

Zhang, Junjie, Assistant Professor  
Biochemistry & Biophysics  
PHD, Baylor College of Medicine, 2009

Zhang, Xiuren, Associate Professor  
Biochemistry & Biophysics  
PHD, Cornell University, 2003

**Majors**

- Bachelor of Science in Biochemistry (p. 143)
- Bachelor of Science in Genetics (p. 144)

**Minors**

- Biochemistry Minor (p. 146)
- Genetics Minor (p. 146)

**Biochemistry - BS**

The undergraduate biochemistry curriculum is designed to provide a solid background in chemistry and the physical sciences, as well as in the biological sciences. Consequently, biochemistry is an especially versatile major giving undergraduates many options when they complete their BS degree. A biochemistry major provides a strong background for entering graduate school in a variety of fields, and the majority of biochemistry majors go on to graduate school or to professional schools such as medicine, veterinary medicine or dentistry. Biochemistry majors excel in biomedical professional schools because of their strong background in the basic sciences. In addition, a wide variety of job opportunities is open to biochemistry majors with a BS degree. Many find rewarding careers working in laboratories as research scientists, forensic scientists and technicians in clinical, governmental and university laboratories. Biochemists are also employed by diverse companies in the chemical, pharmaceutical, agricultural, food and scientific equipment industries.

Majors in Biochemistry must make a grade of C or better in CHEM 227, CHEM 237, CHEM 228 and CHEM 238 before registration in BICH 440. In addition, majors in Biochemistry must make a grade of C or better in all major coursework used to satisfy the degree plan.

The undergraduate curriculum in genetics allows the study of several different aspects of genetics, including population genetics, human molecular genetics have provided biotechnologies that will dramatically affect our lives from the improved diagnosis of human disease, to the production of viral-resistant crops, to environmental cleanup.

Genetics is one of the most exciting, rapidly expanding areas in the life sciences. More than an independent discipline, it has become the basis for understanding many aspects of medical and agricultural systems, animal and plant diseases, and even animal behavior. Developments in molecular genetics have provided biotechnologies that will dramatically affect our lives from the improved diagnosis of human disease, to the production of viral-resistant crops, to environmental cleanup.

The undergraduate curriculum in genetics allows the study of several different aspects of genetics, including population genetics, human...
The genetics major is designed to develop the knowledge and skills necessary for advanced studies in all disciplines related to life sciences from medicine/veterinary medicine to genetic engineering. This basic science curriculum also has enough flexibility to allow a student to prepare for such diverse careers as forensics, medicine, business or law.

1. Often used for a minor degree. Students intending to pursue an advanced degree in genetics are strongly encouraged to use some free electives for additional upper division courses in BICH (p. 739), BIOL (p. 741), CHEM (p. 752), GENE (p. 821), MATH (p. 885) or STAT (p. 970).

2. To be selected from the University Core Curriculum (p. 21). Of the 21 hours shown as University Core Curriculum (p. 21) electives, 3 must be from language, philosophy and culture, 3 from creative arts, 3 from social and behavioral sciences, 6 from American history, 6 from POLS 206 and POLS 207. The Graduation requirements include a requirement for 6 hours of International and Cultural Diversity (p. 40) courses which may be met by courses satisfying the language, philosophy and culture, creative arts, social and behavioral sciences, government/political science and American history requirements if they are also on the approved list of international and cultural diversity courses.

3. Before registration in BICH 440, students much have attained a grade of C or better in each of these courses: CHEM 227, CHEM 228, CHEM 237, CHEM 238.

4. Hours to be selected from any 400-level course in GENE with approval of student's academic advisor. GENE 432/BICH 432 or GENE 491 may not be used to satisfy this requirement.
The fourth registered hour of research credit must be taken as writing intensive.

Students must make a grade of C or better in all major coursework used to satisfy the degree plan.

**Biochemistry - Minor**

The Department of Biochemistry and Biophysics offers a minor in Biochemistry. Students seeking a minor must complete a minor form (http://biochemistry.tamu.edu/academics/undergraduate-programs/academic-requirements/minors) and have it approved and signed by the BICH/GENE undergraduate advisor and their major academic advisor. Students are required to obtain a grade of 'C' or better in all minor courses and meet all minor course prerequisites.

**Department of Biological and Agricultural Engineering**

Biological and agricultural engineers apply their knowledge of physical and biological sciences, mathematics, engineering principles and engineering design to the production and processing of food and fiber, to the preservation of environmental quality, to biological systems and processes, and to machine systems that interface with all of these. Because of their broad general engineering background, biological and agricultural engineering graduates are sought by a wide variety of employers including environmental consulting firms, equipment manufacturers, crop storage and handling industries, the cotton and forest products industries, food and feed processing industries, animal production industries, biotechnology companies, electric utility companies, chemical companies, and governmental agencies. Biological and agricultural engineers make significant contributions to meeting many basic needs of society such as maintaining food quality, quantity and safety; improving environmental quality; and enhancing the quantity and quality of our water resources.

The Biological and Agricultural Engineering Department provides quality education, research and outreach in engineering and technology for the world's agricultural, biological, environmental and food systems. Our undergraduate programs provide a high quality education for engineering and systems management students to fulfill the needs of industries we serve and advance our reputation as a world leader in engineering and systems management education.

Minors
- Agricultural Systems Management Minor (p. 150)

Agricultural Systems Management - BS

Graduates of the Agricultural Systems Management program manage people, money and machines in the food and agricultural industries. They are typically employed as production or processing operations managers, equipment managers, or in technical sales and services. Employers include farm and industrial equipment companies, food processing plants, cotton gins, grain and seed companies, livestock feeding operations, irrigation companies, construction companies, manufacturers, and a variety of other employers who need technical managers.

The technological courses are applications-oriented and focus on practical experience in food processing systems, water management, machinery and power systems, electrical systems and electronics. Business courses include accounting, economics, marketing, management, law and finance. The Business minor is built into the AGSM degree program (with no additional courses required), or students can obtain a minor in Agricultural Economics by taking one additional class. Management and systems science techniques such as linear programming, simulation, optimization, queuing theory, inventory models, PERT/CPM and expert systems are taught along with applications for solving realistic problems faced by agribusiness managers. Supporting courses provide a foundation of mathematics, chemistry, computer and communications skills. Technical electives are available to develop a degree program that meets personal career objectives.

The curriculum is administered by the Department of Biological and Agricultural Engineering and leads to the Bachelor of Science degree in Agricultural Systems Management.

### Biological and Agricultural Engineering - BS

Graduates from the Biological and Agricultural Engineering program will:

- Successfully enter the biological and agricultural engineering profession as practicing engineers and consultants in the natural resources, machine systems, food processing, bioprocessing, and agricultural production and processing fields.
- Pursue graduate education and research at major universities in biological and agricultural engineering, and related fields.
- Advance into leadership positions in their chosen fields and professional societies.
- Engage in life-long learning through professional registration and professional development.

Students learn to apply fundamental knowledge of biological and physical sciences, mathematics, and engineering principles to formulate and solve engineering problems. Engineering design is integrated

1. To be selected from the University Core Curriculum.
2. The 6 hours of international and cultural diversity courses, as required for graduation, may be met in the curriculum. Students may select Language, Philosophy and Culture, Creative Arts, Technical Electives, or American History Electives that also meet the ICD requirement.
3. A minor in BUAD may be obtained by completing the noted courses. Each of these courses must be completed with a C or better.
4. To be selected from a departmental approved list.
5. Technical electives must be selected in consultation with the student’s advisor and from the current list of approved electives published by the department.
6. All undergraduate students must take at least two (2) specific courses in their major designated as writing intensive (W). This course is an approved W course.

A grade of C or better is required for all Common Body of Knowledge (CBK) courses; ACCT 209, AGSM 301, CHEM 101, CHEM 111, ECON 202, MATH 141, MATH 142 and PHYS 201, or equivalents and senior capstone courses AGSM 439 and AGSM 440.
throughout the curriculum, along with opportunities to develop communication, learning, and teamwork skills, culminating in a capstone design experience. Electives in the curriculum allow the student to focus in one of the following areas:

- **Environmental and Natural Resources Engineering**—design and management of systems affecting soil, water, and air resources.
- **Renewable Energy Engineering**—design and development of biomass, wind and solar energy systems.
- **Food and Bioprocess Engineering**—design and development of systems for processing and handling of food and agricultural products and processes involving cells, enzymes, or other biological components.
- **Machine Systems Engineering**—design and development of machines and machine systems for food, feed and fiber production and processing.

Students select courses with the assistance of faculty advisors in an individualized advising system. Faculty members also assist with professional development and job placement for students.

The biological and agricultural engineering program is jointly administered by the College of Agriculture and Life Sciences and the College of Engineering, and the curriculum is fully accredited by the Engineering Accreditation Commission of ABET, Inc., www.abet.org. The department is one of the largest in North America and is consistently ranked as one of the top programs in the nation.

For graduates to become successful practicing biological and agricultural engineers, students need to acquire a set of skills, knowledge, and behaviors as they progress through the curriculum. We have established the following program outcomes outlining what students are expected to know and be able to do upon completion of the curriculum. At the time of graduation, students should have:

1. an ability to apply knowledge of mathematics, science and engineering;
2. an ability to design and conduct experiments, as well as to analyze and interpret data;
3. an ability to design a system, component, or process to meet desired needs within realistic constraints such as economic, environmental, social, political, ethical, health and safety, manufacturability, and sustainability;
4. an ability to function on multidisciplinary teams;
5. an ability to identify, formulate, and solve engineering problems;
6. an understanding of professional and ethical responsibility;
7. an ability to communicate effectively;
8. the broad education necessary to understand the impact of engineering solutions in a global, economic, environmental, and societal context;
9. a recognition of the need for, and an ability to engage in life-long learning;
10. a knowledge of contemporary issues;
11. an ability to use the techniques, skills, and modern engineering tools necessary for engineering practice.

### Department of Ecosystem Science and Management

The Department of Ecosystem Science and Management provides one of the most advanced educational opportunities available to prepare undergraduate students for leadership in the science and stewardship of rangeland, forest and wetland ecosystems across the rural-urban gradient. We offer Bachelors of Science degrees in Ecological Restoration, Forestry, Rangeland Ecology and Management, Renewable Natural Resources, and Spatial Sciences.

### Faculty

- **Boutton, Thomas W.**, Professor  
  Ecosystem Science & Mgmt  
  PhD, Brigham Young University, 1979

- **Briske, David D.**, Professor  
  Ecosystem Science & Mgmt  
  PhD, Colorado State University, 1978

- **Casola, Claudio**, Assistant Professor  
  Ecosystem Science & Mgmt  
  PhD, University of Pisa, Italy, 2006

- **Eriksson, Marian**, Associate Professor  
  Ecosystem Science & Mgmt  
  PhD, University of Minnesota, Twin Cities, 1989

- **Feagin, Russell A.**, Professor  
  Ecosystem Science & Mgmt  
  PhD, Texas A&M University, 2003

- **Gan, Jianbang**, Professor  
  Ecosystem Science & Mgmt  
  PhD, Iowa State University, 1990

---

1. Entering students will normally be given a placement test in mathematics. Test results will be used in selecting the appropriate starting course which may be at a higher or lower level.

2. The six hours of international and cultural diversity courses, as required for graduation, may be met by courses that also satisfy a core curriculum course.

3. Engineering, mathematics and technical electives must be selected from a departmental approved list in consultation with an academic advisor.

4. All undergraduate students must take at least two (2) specific courses in their major designated as writing intensive.

5. All engineering students are required to complete a high-impact experience in order to graduate. The list of possible high-impact experiences is available in the BAEN advising office.

A grade of C or better is required for all math, science, and engineering courses.

---

### Agricultural Systems Management - Minor

The minor in Agricultural Systems Management is available to all students enrolled at Texas A&M University. The primary educational objective of this minor program is to provide students, majoring in other fields, with a fundamental knowledge of the fields of agricultural systems management.

- Rangeland Ecology and Management Minor (p. 159)
- Spatial Sciences Minor (p. 159)

**Certificates**

- Watershed Certificate (p. 159)

**Ecological Restoration - BS**

Ecological restoration is the process of repairing dysfunctional ecosystems to provide essential ecosystem goods and services important to society. The Ecological Restoration degree prepares students for a career that requires an understanding of the causes of land degradation and strategies for recovery of ecosystems damaged, degraded, or destroyed by natural or human causes.

The curriculum focuses on restoration of damaged ecosystems and landscapes, particularly terrestrial, wetland, and riparian systems in diverse settings that span the rural-urban spectrum. The discipline of ecological restoration requires a strong conceptual/theoretical foundation as well as a practical application component. This degree combines basic sciences, modern technologies, and contemporary ecological knowledge. Students will develop practical capabilities and gain critical understanding of the interaction of biophysical, socio-economic and political drivers that affect land degradation and
restoration through a program that incorporates integrated coursework and an internship with ecological restoration practitioners.

Completion of this degree will prepare students to assess the causes of ecosystem degradation and to develop strategies for ecological restoration at multiple spatial scales. Graduates will be equipped for professional careers with environmental consulting companies, governmental and non-governmental land management organizations, and regulatory agencies. This degree program also provides a foundation for students planning to pursue advanced degrees in restoration ecology, disturbed land reclamation, natural resources conservation and management, or related fields. The total number of credit hours required for graduation is 120 hours.

Total Semester Credit Hours 120

1 To be selected in consultation with an advisor.
2 The Graduation requirements include a requirement for six hours of international and cultural diversity courses. A course satisfying a Core category, a college/department requirement, or a free elective can be used to satisfy this requirement. See academic advisor.
3 Credit by examination may be used to substitute three hours of POLS 206 or POLS 207.

**Forestry - BS**

The Department of Ecosystem Science and Management provides one of the most advanced educational opportunities available for developing leaders in the management, conservation and restoration of the world’s diverse forests. Students seeking to study forestry in this department are interested in solving problems related to protecting forest biodiversity, providing wood, water, recreation and wildlife for a growing society, and contributing to the advancement of knowledge about forests. Resolving today’s forest management issues requires a broad education in the biological, physical and social sciences, a solid understanding of the methods used to integrate information from many fields and to solve problems, and an in-depth knowledge of the sophisticated tools and techniques that are an essential part of modern forestry.

Curriculum in the Department of Ecosystem Science and Management incorporates these ideas so that motivated and capable students can become competent forest and resource management professionals and scientists.

Forests cover one-third of the land area of the United States. The products and services derived from forests, and the scenic beauty they provide, have contributed to the well-being of the American people since the founding of this country. These benefits range from lumber and paper to recreation and biological diversity. Forests also are renewable. Under proper stewardship, they yield products and biodiversity indefinitely. Proper management of forests, which is the responsibility of the professional forester, results in healthy, productive forests that are capable of serving human needs and providing a quality environment in rural or urban settings.

The primary objective of the Department of Ecosystem Science and Management is to educate students in the scientific management of forest resources. Students select a course of study best suited to their educational and career goals. Students also receive help from faculty...
advisors in their areas of interest. The total number of credit hours required for a degree is 120.

To be selected in consultation with an advisor.

The Graduation requirements include a requirement for 6 hours of international and cultural diversity courses. A course satisfying a Core category, a college/department requirement, or a free elective can be used to satisfy this requirement. See academic advisor.

Credit by examination may be used to substitute for 3 hours of POLS 206 or POLS 207.

## Rangeland Ecology and Management - BS, Ranch Management Option

Students majoring in Rangeland Ecology and Management are taught to integrate knowledge and technology in a systems approach to manage land for sustainable utilization of natural resources. Emphasis is placed on conservation and maintenance of biological diversity in wet to arid environments and sustainable production, conservation and function of land. Rangelands comprise approximately 50% of the land area of the United States and the world. Natural resources on rangelands provide many products and values for society including: livestock grazing, habitat for game and non-game wildlife, water for urban and agricultural uses, recreational opportunities, minerals, oil and gas. The expansiveness and diversity of rangelands require that knowledge and technology be drawn from numerous disciplines.

Employment opportunities are diverse. They include all aspects of natural resource management, including ranch management, environmental consulting, conservation and natural resource planning on private lands and with state and federal agencies. Students also find employment in agribusiness sales, marketing, agricultural finance real estate, consulting and reclamation. Students can also pursue professional careers in teaching agricultural science.

Two options in the Rangeland Ecology and Management curriculum provide the opportunity for specialization in a minor field.

## Ranch Management Option

Designed for students preparing for careers in ranch management and agribusiness. This option emphasizes management and utilization of rangeland for livestock and wildlife production. It provides excellent preparation for students desiring to obtain a Master of Agriculture degree in ranch management. Employment opportunities are available on private ranches, businesses, and industries supporting ranches and with state and federal agencies.

### Emphasis Areas

#### Ecology

Designed for students to explore and specialize in a diverse array of ecological topics. They study plants and animals and the ecological principles essential for effective conservation, management and restoration of the land and associated natural resources. They are prepared for careers in resource monitoring, management and conservation with state and federal agencies and the private sector.
Environmental Science

Designed for students preparing for professional careers in environmental management. The coursework includes a basic foundation of ecological sciences, plant taxonomy and rangeland management with emphasis on plants, water and soils. Job opportunities are available in environmental consulting firms, public utility companies, municipalities and federal environmental agencies. The curriculum provides a good foundation for students planning to pursue graduate studies in watershed management, environmental sciences, pollution control or waste management.

Pre-veterinary Medicine

Prepares students for admission to the professional program in veterinary medicine. Students planning to work in large animal practice would benefit from studies in rangeland ecology and management.

Range/Soil Conservation

Designed to qualify students as range management specialists or soil conservationists with the federal government. The curriculum will provide students with competitive ratings with federal Civil Service for positions with the Natural Resources Conservation Service, Forest Service and Bureau of Land Management. Various electives and work experience may be used to increase the rating score. Job opportunities are also available in private and state organizations.

Teaching

For students majoring in rangeland ecology and management who wish to teach. Directed electives may be chosen so that, following this curriculum, the student is eligible to enter the induction year as a teacher of agricultural science under the Texas Education Agency Plan. Off-campus student teaching is required.

Watershed Resources

For students preparing for a professional career in watershed management. Graduates qualify for employment as range management specialists and soil conservationists or, with proper selection of electives, as hydrologists. Opportunities are also available in environmental consulting firms, public utility companies, land reclamation firms, municipalities, secondary school education and private land management.

Rangeland Ecology and Management - BS, Rangeland Resources Option

Students majoring in Rangeland Ecology and Management are taught to integrate knowledge and technology in a systems approach to manage land for sustainable utilization of natural resources. Emphasis is placed on conservation and maintenance of biological diversity in wet to arid environments and sustainable production, conservation and function of land. Rangelands comprise approximately 50% of the land area of the United States and the world. Natural resources on rangelands provide many products and values for society including: livestock grazing, habitat for game and non-game wildlife, water for urban and agricultural uses, recreational opportunities, minerals, oil and gas. The expansiveness and diversity of rangelands require that knowledge and technology be drawn from numerous disciplines.

Employment opportunities are diverse. They include all aspects of natural resource management, including ranch management, environmental consulting, conservation and natural resource planning on private lands and with state and federal agencies. Students also find employment in agribusiness sales, marketing, agricultural finance real estate, consulting and reclamation. Students can also pursue professional careers in teaching agricultural science.

Two options in the Rangeland Ecology and Management curriculum provide the opportunity for specialization in a minor field.

Rangeland Resources Option

Designed for students preparing for careers in the private, state and federal sectors in the area of natural resources conservation and management. It also provides good preparation for graduate study leading to positions in extension, teaching, research and consulting. It allows maximum flexibility to orient a degree program towards specific career interests. Students are encouraged to develop an emphasis area by selecting 15 hours of directed elective courses in related disciplines. Several suggested emphasis areas for the Rangeland Resources Option follow.

Emphasis Areas

Ecology

Designed for students to explore and specialize in a diverse array of ecological topics. They study plants and animals and the ecological principles essential for effective conservation, management and restoration of the land and associated natural resources. They are prepared for careers in resource monitoring, management and conservation with state and federal agencies and the private sector.

Environmental Science

Designed for students preparing for professional careers in environmental management. The coursework includes a basic foundation of ecological sciences, plant taxonomy and rangeland management with emphasis on plants, water and soils. Job opportunities are available in environmental consulting firms, public utility companies, municipalities and federal environmental agencies. The curriculum provides a good foundation for students planning to pursue graduate studies in watershed management, environmental sciences, pollution control or waste management.

Preveterinary Medicine

Prepares students for admission to the professional program in veterinary medicine. Students planning to work in large animal practice would benefit from studies in rangeland ecology and management.

Range/Soil Conservation

Designed to qualify students as range management specialists or soil conservationists with the federal government. The curriculum will provide students with competitive ratings with federal Civil Service for positions with the Natural Resources Conservation Service, Forest Service and Bureau of Land Management. Various electives and work experience may be used to increase the rating score. Job opportunities are also available in private and state organizations.

Watershed Resources

For students preparing for a professional career in watershed management. Graduates qualify for employment as range management specialists and soil conservationists or, with proper selection of electives, as hydrologists. Opportunities are also available in environmental consulting firms, public utility companies, land reclamation firms, municipalities, secondary school education and private land management.

Renewable Natural Resources - BS

Professional Fields of Study and Department Heads

Ecosystem Science and Management, Kathleen Kavanagh, Head
Recreation, Park and Tourism Sciences, Gary D. Ellis, Head
Wildlife and Fisheries Sciences, John B. Carey, Interim Head

General Statement

Three departments offer degrees in specific areas of natural resources management and conservation. Students may select one of these degree programs or a broad approach to natural resource education by pursuing the multi-department degree in Renewable Natural Resources.

Renewable Natural Resources

Renewable Natural Resources (RENR) is for students desiring a rigorous education in the study and management of sustainable ecosystems for a wide variety of resource values. The RENR program of study is comprised of a core of courses and two emphases. The goal of this core/emphasis structure is to provide students with an identity as a renewable natural resources specialist, while, at the same time, affording the flexibility for preparation for a variety of career tracks. One emphasis focuses on management and the other on policy. Technical electives prepare the students in chosen educational and career directions. The underlying goal of the RENR degree is to integrate the scientific issues of renewable natural resources. Graduates of this program will be able to articulate these issues verbally and in writing in their chosen career. Therefore, the RENR degree emphasizes verbal presentations and major papers as well as field-oriented activities.

The RENR programs are designed to help students prepare for careers in public and private organizations associated with the planning and use of natural resources and the environment. Possible employment includes areas such as multi-use land management, environmental assessment, resource inventory, natural resource planning, law, policy analysis and land remediation.

An emphasis may be selected in policy or management. The RENR degree consists of 120 credit hours: 42 university core, 42-45 common to both emphasis areas and 24-27 designated by the emphasis area and 9 free elective hours.

RENR Areas of Emphasis

The BS in Renewable Natural Resources includes two emphasis areas for students to select. The directed electives available from advisors are what differentiates the emphases.

Management Emphasis

Designed for an education in the scientific management of integrated natural resources. In today's world, it is important to have college graduates prepared to deal with integrated systems, accounting for all of the separate aspects of the system. The management emphasis seeks to prepare the student to integrate concerns related to land, water, air, plants and wildlife into the management process. Students select 24 credit hours of directed electives from an approved list in consultation with their advisor. The remaining 9 credit hours are free electives.

1 To be selected in consultation with an advisor.
2 The Graduation requirements include a requirement for 6 hours of international and cultural diversity courses. A course satisfying a Core category, a college/department requirement, or a free elective can be used to satisfy this requirement. See academic advisor.
3 Credit by examination may be used to substitute for 3 hours of POLS 206 or POLS 207.
**Policy Emphasis**

Designed for students desiring an education in natural resources policy. This emphasis incorporates knowledge from all renewable natural resources disciplines, which provides a foundation for decision-making related to the environment. Students will obtain an understanding of the behavior of institutions and organizations associated with natural resource management.

Professionals associated with natural resources need to consider legislative mandates, community interests, resource evaluation and competing uses, and conflict management techniques. This emphasis prepares the student for work in private industry, public and non-profit agencies, and graduate school. Students must select 24 hours of restricted electives from an approved list in consultation with their advisor. The remaining nine hours are free electives.

1 Students will complete an internship, study abroad or independent research experience.

2 To be selected from an approved list in consultation with an advisor.

3 The graduation requirements include a requirement for 6 hours of international and cultural diversity courses. A course satisfying a core category, a college/department requirement, or a free elective can be used to satisfy this requirement. See academic advisor.

4 Credit by examination may be used to substitute for 3 hours of POLS 206 or POLS 207.
Spatial Sciences - BS

A degree in Spatial Sciences offers students the opportunity to obtain a career in a cutting-edge discipline at the intersection of environmental and spatial sciences. The spatial sciences combine multidisciplinary fields of scientific study with geospatial technologies including Geographic Information Systems (GIS), Global Positioning Systems (GPS), and Remote Sensing. A spatial sciences graduate will possess an advanced knowledge of these technologies, experience in interpretation of aerial photographs and processing of satellite images, as well as a broad understanding of computer applications and database management. Graduates are capable of working as environmental and natural resource managers and possess the necessary skills to map geographical features, patterns, and changes. Furthermore, these individuals will be able to lead and conduct modern environmental management activities.

Through core and supporting coursework, students will learn to utilize the full potential of the spatial sciences in real-world problem solving. From real-time wildfire risk assessment to crime analysis, habitat mapping for endangered species, and evaluating environmental damage from natural disasters, the spatial sciences are an integral part of modern resource management.

Students in this degree program receive guidance from faculty advisors in their areas of interest, and meet regularly to discuss courses and career opportunities. The total number of credit hours required for graduation is 120.

- ESSM 316 Range Ecology
- ESSM 317 Vegetation Management
- ESSM 320 Ecosystem Restoration and Management
- ESSM 416 Fire Ecology and Natural Resource Management
- ESSM 420 Ecological Restoration of Wetland and Riparian Systems

Total Semester Credit Hours 15

Students must make a grade of "C" or better in all courses.

**Elective Courses**

Select one of the following: 3

- ESSM 302 Wildland Plants of North America
- ESSM 303 Agrostology
- ESSM 304 Rangeland Plant Taxonomy
- ESSM 314 Principles of Rangeland Management Around the World

Total Semester Credit Hours 15

Students must complete a minimum of 6 hours in residence at the 300-400 level.

Students must maintain a 2.0 or above in minor curriculum.

Watershed - Certificate

The goal of the watershed certificate is to provide a rigorous and high quality program that will produce graduates capable of working as a professional in watershed or hydrology fields, but with very solid scientific and ecological foundation. Graduates will be qualified to work in government or consulting or if they choose, be prepared to pursue graduate training in any watershed/hydrology science program. Training will be built on a solid foundation in watershed management and hydrology.

Zhu Salzman, Keyan, Professor
Entomology
PHD, Purdue University, 1994

Minors
- Entomology Minor (p. 166)

Certificates
- Public Health Entomology Certificate (p. 167)

Entomology - BS

Entomology is a basic and applied science of insects and their relatives such as ticks and mites. Insects are the most numerous and diverse forms of life on earth; they are essential constituents of virtually every terrestrial and aquatic ecosystem. While society benefits from the many diverse roles played by the vast majority of insects, some species may become limiting factors in the production, processing and storage of our food and fiber crops, and to the health and well being of humans and animals. The knowledge and skills possessed by entomologists are essential components of modern integrated pest management strategies designed to safely and efficiently produce adequate food supplies for a continuously expanding world population, and to impede the transmission of insect-borne diseases, while at the same time protecting our endangered species and fragile ecosystems.

The Bachelor of Science degree in Entomology leads to a wide array of career paths with strong employment demands among corporate and private agribusiness; urban pest management companies; scientific and technical organizations; public health agencies; local, state and federal governments; and international organizations. In addition, employment opportunities exist in areas such as forensic entomology, conservation biology, environmental quality, food quality, regulatory inspection, public health and many more. Our curriculum is sufficiently flexible such that a student, in consultation with the academic advisor, may tailor the degree to meet their individual academic goals, including requirements for graduate school, professional schools in the health career areas (medical, veterinary, dental) as well as providing the analytical skills needed for law school. Our department also participates in the Texas A&M accelerate online program for teaching certification, which is an innovative approach to training Texas secondary science teachers to gain the background education needed to prepare for certification to teach science grades 8–12.

Students majoring in related areas such as agronomy, animal science, horticulture, biology, genetics and biomedical sciences may wish to consider augmenting their knowledge base and broaden their career opportunities by electing to either double major or to minor in entomology. Interested students should contact the departmental Undergraduate Advisor for additional information on these options.

**Forensic and Investigative Sciences - BS, Pre-Law Emphasis**

Forensic and Investigative Sciences, an accredited program by the Forensic Science Education Programs Accreditation Commission (FEPAC), is a major offered by the Department of Entomology and is a growing area of interest for students seeking to gain entry into careers that deal with the collection, preservation, processing and use of evidentiary information to solve problems. A life sciences-based education, which develops skills in problem solving and critical thinking, is essential for career opportunities in this field. Forensic and investigative scientists rely upon state-of-the-art scientific discoveries and technologies as tools to seek answers to critical questions in a variety of settings. Molecular, organismal, environmental, and ecological sources of information are often analyzed and interpreted in industrial, regulatory, legal, medical and associated professions. Graduates will be competitive for employment opportunities in quality assurance laboratories, homeland security and investigative services at local, state and national levels. Graduates will also be well prepared for opportunities to enter post-graduate studies or professional schools including medicine, law, and veterinary medicine.

Interactions with and among plants, animals and microbes occur regularly. These interactions impact public and environmental health and require life science-based forensic and investigative science to improve the quality of life. Homeland security, criminal investigation, environmental quality, agricultural and public health offer careers for students with forensic and investigative skills. Students can also pursue avenues to forensic careers through degree programs in specialty areas such as chemistry, anthropology, physics, computer science and business.

Forensic and investigative sciences also operate at the crossroads of science and the legal profession, and provide opportunities for students to consider pre-law preparation. There are growing demands for attorneys with knowledge and understanding of science and research to address legal issues and cases where the interpretation of science and/or scientific data and analyses are pivotal. Law schools often seek
candidates with diverse backgrounds and interests, and they look closely at curricula that stress analytical and problem-solving skills, critical reading abilities, writing skills, oral communication and listening abilities, general research skills, and task organization and management skills. The Forensic and Investigative Sciences program provides students with opportunities to build these essential skills and knowledge areas through a combination of required and elective courses.

The Forensic and Investigative Sciences program requires students to earn a grade of C or better in all courses within the program curriculum.

Forensic and Investigative Sciences - BS, Science Emphasis

Forensic and Investigative Sciences, an accredited program by the Forensic Science Education Programs Accreditation Commission (FEPAC), is a major offered by the Department of Entomology and is a growing area of interest for students seeking to gain entry into careers that deal with the collection, preservation, processing and use of evidentiary information to solve problems. A life sciences-based education, which develops skills in problem solving and critical thinking, is essential for career opportunities in this field. Forensic and investigative scientists rely upon state-of-the-art scientific discoveries and technologies as tools to seek answers to critical questions in a variety of settings. Molecular, organismal, environmental, and ecological sources of information are often analyzed and interpreted in industrial, regulatory, legal, medical and associated professions. Graduates will be competitive for employment opportunities in quality assurance laboratories, homeland security and investigative services at local, state and national levels. Graduates will also be well prepared for opportunities to enter post-graduate studies or professional schools including medicine, law, and veterinary medicine.

Interactions with and among plants, animals and microbes occur regularly. These interactions impact public and environmental health and require life science-based forensic and investigative science to improve the quality of life. Homeland security, criminal investigation, environmental quality, agricultural and public health offer careers for students with forensic and investigative skills. Students can also pursue avenues to forensic careers through degree programs in specialty areas such as chemistry, anthropology, physics, computer science and business.

Forensic and investigative sciences also operate at the crossroads of science and the legal profession, and provide opportunities for students to consider pre-law preparation. There are growing demands for attorneys with knowledge and understanding of science and research to address legal issues and cases where the interpretation of science and/or scientific data and analyses are pivotal. Law schools often seek candidates with diverse backgrounds and interests, and they look closely at curricula that stress analytical and problem-solving skills, critical reading abilities, writing skills, oral communication and listening abilities, general research skills, and task organization and management skills. The Forensic and Investigative Sciences program provides students with opportunities to build these essential skills and knowledge areas through a combination of required and elective courses.

The Forensic and Investigative Sciences program requires students to earn a grade of C or better in all courses within the program curriculum.

1. This course fulfills a writing requirement. See Requirement for a Baccalaureate Degree section.

The Forensic and Investigative Sciences program requires students to earn a grade of C or better in all courses within the program curriculum.

**Entomology - Minor**

The minor in Entomology is available to all students enrolled at Texas A&M University. The courses listed constitute the minimum 17 hours required for a minor in Entomology.

1. Students must earn a grade of C or better in each course used for the minor.
2. Prerequisite Courses: All prerequisites for each core and elective course also must be met. Prerequisite courses will not be applied to the minor requirements and do not count toward the number of hours needed to complete the minor. Please refer to the Texas A&M University Undergraduate Catalog for a listing of course prerequisites.
3. Availability of courses and minor recognition: The Department of Entomology cannot guarantee the availability of the courses required to meet the minor requirements. Successful completion of the minor will be certified by a degree audit in Howdy during the semester of the student’s graduation. The minor will be recognized after graduation on the student’s transcript, but not on the student’s diploma.

Students pursuing the Minor in Entomology (http://entomology.tamu.edu/entomology-academic-program/entomology-minor) are to complete the minor application form and submit the

Public Health Entomology - Certificate

Population growth and distribution predicted over future decades pose increased risks of disease outbreaks and emergence of new diseases worldwide. Scientists from many disciplines, physicians, veterinarians, health-care practitioners, public health workers and policy makers are needed to provide public health surveillance, make new discoveries, and find solutions to address these risks.

This certificate offers a 15 credit-hour concentration in Public Health Entomology focused on insects and other arthropods that serve as vectors and reservoirs of disease pathogens, and are responsible for the direct and indirect causation of disease.

Employment opportunities in the public health sector include environmental and health service agencies, mosquito control districts, the Centers for Disease Control and Prevention (CDC), the Department of Defense, the World Health Organization, and the PanAmerican Health Organization.

Students completing this certificate will be competitive for employment upon graduation, for graduate programs in related disciplines, such as Master's programs in Public Health, Epidemiology, and Entomology, as well as professional schools.

Eligibility Requirements for Entrance:

1. Completion of a minimum of one (1) course from Category I and II with a grade of "B" or better and a cumulative TAMU GPA of 2.0+
2. Students must complete and submit application before completion of 75 credit hours.

</table>
Eligibility Requirements for Application and Entrance:

- Complete a minimum of one course from both Category I and Category II with a grade of "B" or better and a cumulative Texas A&M University 2.0 GPA or better
- Students must complete and submit application before completion of 75 total credit hours.

To Complete the Certification, Students Must:

- Successfully complete courses in Category I-III PRIOR to enrollment in Category IV
- Complete all courses within the certification with a minimum grade of "C"
- Earn a cumulative 3.0 GPA or better in the certificate courses
- Complete exit survey
- Meet the minimum qualifications for graduation as defined by Texas A&M University including a 2.0 cumulative GPA

For additional information and to discuss the scheduling of these courses upon successful completion of your entrance requirements, please contact a member of the Entomology Academic Advising Team to schedule an appointment to submit your Public Health Certificate Application.

Department of Horticultural Sciences

Horticulture encompasses a unique blend of art, science and technology. Horticultural crops include trees, shrubs, tropical plants, ornamental grasses, herbs, flowers, fruits, vegetables and nuts which are grown and utilized throughout the world. The Department of Horticultural Sciences offers two undergraduate degrees: a Bachelor of Science in Horticulture and a Bachelor of Arts in Horticulture. Our flexible degree plans enable students opportunities to develop programs tailored to their unique career goals. The horticulture industry is one of the largest agricultural industries in the state and offers graduates a multitude of diverse career opportunities.

Majors

- Bachelor of Arts in Horticulture (p. 168)
- Bachelor of Science in Horticulture (p. 169)

Minors

- Horticulture Minor (p. 170)

Certificates

- Enology Certificate (p. 170)

Horticulture - BA

This degree blends traditional horticulture with the benefits derived from the human association with plants. This degree offers students the option of pairing a horticulture degree with electives in social sciences, business, education, art and design. Creative opportunities range from planning gala events, to designing tranquil gardens, to constructing educational programs for school gardens to pursuing advanced degrees. Graduates may find themselves working in exciting environments including botanical gardens, international flower markets or upscale resorts.

Horticulture - BS

This degree is designed to provide students with the knowledge and skills needed for production, management and marketing of horticultural and floriculture crops. This degree also offers students with strong interests in science and/or technology opportunities in research related fields including preparation for graduate studies. Career prospects range from producing specialty herb crops for upscale restaurants, to managing landscape businesses for growing communities, to marketing fruits and vegetables for healthier lifestyles. Many former students are self-employed, owning their own greenhouse, nursery or landscape operation. Others work in upper management of large corporations or travel the world developing future horticultural crops.

1. This course fulfills a writing requirement (see Requirements for a Baccalaureate Degree (p. 27)).
2. This course fulfills a communications requirement.
3. Hours to be selected based on the emphasis area chosen in consultation with the student’s academic advisor.
4. Student must successfully complete a course of a foreign language beyond that required by the university in general.
5. Any university approved minor or major is acceptable, except a minor or major in Horticulture as the intent is to provide a concentration in a second field of expertise.
6. Hours to be selected with approval by the student’s academic advisor and the associate department head from 100-400-level courses in ACCT (p. 697), AGCJ (p. 705), AGEC (p. 707), AGLS (p. 711), SCSC (p. 956), ALEC (p. 714), ANTH (p. 721), ARTS (p. 729), BESC (p. 738), COMM (p. 761), ECON (p. 786), ENDS (p. 791), ENTO (p. 800), EPSY (p. 803), FINC (p. 813), ESSM (p. 806), GENE (p. 821), GEOG (p. 822), HLTH (p. 842), HORT (p. 844), INST (p. 851), ISTM (p. 855), KINE (p. 861), LAND (p. 865), MEPS (p. 894), MGMT (p. 895), MKTG (p. 898), NUTR (p. 916), PSYC (p. 943), RENR (p. 949), RPTS (p. 950), SAED, SCM (p. 955), SEFB (p. 959), SOCI (p. 960), SPAN (p. 964), SPED (p. 967), STAT (p. 970), WSC (p. 987).
Horticulture - Minor

An undergraduate minor in Horticulture provides students a concentration of courses that focus on areas of horticulture and floriculture. These may range from a broad based, comparative perspective to a narrower application within the field. Students may choose such diverse topics as fruit and vegetable production, enology, greenhouse and nursery management, florals, and landscape design, science and biotechnology, urban and environmental horticulture and much more. Earning a minor in Horticulture provides students with the skills required to have a basic working knowledge in the field of Horticulture.

Students must make a grade of "C" or better in all courses and must be in good academic standing with a GPA of 2.250 or above.

Enology - Certificate

Overview

The Enology Certificate, offered by the Department of Horticultural Sciences, contains 15 hours of concentrated study in the areas of viticulture, pre- and post-fermentation wine making processes, wine etiquette, and sensory evaluation. The certificate is designed to provide a knowledge base to those individuals who have an interest in pursuing a career that involves the wine industry.

Applicants must be currently enrolled in an undergraduate degree program at Texas A&M University and, if required, have permission from their departmental advisor to apply for the program.
Any major at Texas A&M University can apply.

An overall Texas A&M University GPA of 2.0 or higher is required for acceptance into the program.

Must complete Certificate in Enology program application.

**Department of Nutrition and Food Science**

Nutritional sciences prepares majors with a comprehensive knowledge of the biological and social sciences to understand the relationships between nutrients, food components and human health. Prevention of diseases that are related to lifestyle, particularly diet and nutrition, is a focus of the curriculum. Core courses emphasize the role of nutrients in biochemistry, genetics, physiology, microbiology and immunology that promotes wellness and enhances the quality of life. The major also provides an excellent background for those interested in pursuing graduate degrees in biological, nutritional or food sciences; professional degrees in human or veterinary medicine; degrees in dentistry, pharmacy, physical therapy, nursing, public health and other health professions; or dietetic internships.

The Didactic Program in Dietetics (DPD) and the Graduate Degree/Dietetic Internship Program are accredited by the Accreditation Council for Education in Nutrition and Dietetics (ACEND). Students who successfully complete the DPD and a dietetic internship are eligible to take the Registration Examination to become a Registered Dietitian (RD).

Three curriculum tracks are offered (General Nutrition, Didactic Program in Dietetics and Molecular and Experimental Nutrition) to provide flexibility in one’s chosen career path. The Nutrition major prepares one for graduate school, corporate wellness positions, health promotion programs, the food industry, public health programs, pharmaceutical sales, clinical dietetics, medical and research laboratories, biotechnology firms, government agencies and related fields. For more information, visit [http://nfs.tamu.edu](http://nfs.tamu.edu)

Majors

- Bachelor of Science in Food Science and Technology, Food Industry Option (p. 172)
- Bachelor of Science in Food Science and Technology, Food Science Option (p. 174)
- Bachelor of Science in Nutrition, Didactic Program in Dietetics Track (p. 176)
- Bachelor of Science in Nutrition, General Nutrition Track (p. 177)
- Teacher certification in Biology and Life Sciences, Chemistry and Science
- Bachelor of Science in Nutrition, Molecular and Experimental Track (p. 179)

Food Science and Technology - BS, Food Industry Option

Food Science and Technology is an exciting multidisciplinary field that prepares majors with a comprehensive knowledge of the biological, physical and engineering sciences to develop new food products, design innovative processing technologies, improve food quality and nutritive value, enhance the safety of foods and ensure the wholesomeness of our food supply. Food Science majors apply the principles learned in the basic sciences such as food chemistry, biochemistry, genetics, microbiology, food engineering and nutrition to provide consumers with safe, wholesome and attractive food products that contribute to their health and well-being. For more information, visit http://nfs.tamu.edu

The undergraduate curriculum is approved by the Institute of Food Technologists (IFT) and offers two tracks, a Food Science Option and an Industry Option. These tracks provide promising career opportunities in areas such as food product/process design, technical service, research and development, quality assurance, food safety, food law, regulatory oversight, technological innovation, marketing, corporate sales, sensory evaluation and operations management. There are numerous opportunities available for corporate internships, scholarships and study abroad programs that provide real-world experience and enhance opportunities for employment after completing a baccalaureate degree. The major also provides an excellent background for those interested in professional schools, graduate studies, medicine, veterinary medicine, dentistry, pharmacy, physical therapy, nursing, occupational therapy and public health.

Food Industry Option

The Food Industry option integrates knowledge from the basic disciplines of chemistry, microbiology, physics and biology and applies scientific principles from food engineering, food processing operations, sensory evaluation, food safety, HACCP, quality assurance and management to produce foods that are wholesome, affordable and safe. The goal of the curriculum is to prepare Food Technologists for careers in the food and related industries. These careers may involve food processing, manufacturing, technical service, food product development, operations management, regulatory oversight and other technology based opportunities.

The Graduation requirements include a requirement for 6 hours of international and cultural diversity courses. Selection must be from courses on the approved list. Selection can be courses that also satisfy the requirement for social and behavioral sciences; creative arts; language, philosophy and culture; or electives. For more information visit http://core.tamu.edu
Students may achieve a business minor by taking the following courses as free electives: ISTM 209, MGMT 209, FINC 409, MKTG 409.

A total of 120 hours is required for graduation; 36 hours of 300/400 level courses are required to meet the Texas A&M University residency requirement.

### Food Science and Technology - BS, Food Science Option

Food Science and Technology is an exciting multidisciplinary field that prepares majors with a comprehensive knowledge of the biological, physical and engineering sciences to develop new food products, design innovative processing technologies, improve food quality and nutritive value, enhance the safety of foods and ensure the wholesomeness of our food supply. Food Science majors apply the principles learned in the basic sciences such as food chemistry, biochemistry, genetics, microbiology, food engineering and nutrition to provide consumers with safe, wholesome and attractive food products that contribute to their health and well-being. For more information, visit http://nfs.tamu.edu

The undergraduate curriculum is approved by the Institute of Food Technologists (IFT) and offers two tracks, a Food Science Option and an Industry Option. These tracks provide promising career opportunities in areas such as food product/process design, technical service, research and development, quality assurance, food safety, food law, regulatory oversight, technological innovation, marketing, corporate sales, sensory evaluation and operations management. There are numerous opportunities available for corporate internships, scholarships and study abroad programs that provide real-world experience and enhance opportunities for employment after completing a baccalaureate degree. The major also provides an excellent background for those interested in professional schools, graduate studies, medicine, veterinary medicine, dentistry, pharmacy, physical therapy, nursing, occupational therapy and public health.

### Food Science Option

The Food Science option provides a strong knowledge base and fundamental understanding of chemistry, biology, engineering, physics, statistics, genetics, biochemistry, microbiology and nutrition that is applied toward the preservation, processing, packaging and distribution on foods that are wholesome, affordable and safe. The goal of the curriculum is to prepare Food Scientists for career opportunities in the food and allied industries or for further studies in graduate or professional schools. See an academic advisor for specific course listings.

1 The Graduation requirements include a requirement for 6 hours of international and cultural diversity courses. Selection must be from courses on the approved list. Selection can be courses that also satisfy the requirement for social and behavioral sciences; creative arts; language, philosophy and culture; or electives. For Core Curriculum requirements, http://core.tamu.edu/

2 Students may earn a chemistry minor by taking 6 hours of additional chemistry courses from an approved list as free electives. See the Department of Chemistry for more details. Students seeking a minor in chemistry must complete the Declaration of Minor in Chemistry form and have it approved by the undergraduate advisor in Chemistry (Room 104 Chemistry) and their NFSC advisor.

A total of 120 hours is required for graduation; 36 hours of 300/400 level courses are required to meet the Texas A&M University residency requirement.
Nutrition - BS, Didactic Program in Dietetics Track

Nutritional sciences prepares majors with a comprehensive knowledge of the biological and social sciences to understand the relationships between nutrients, food components and human health. Prevention of diseases that are related to lifestyle, particularly diet and nutrition, is a focus of the curriculum. Core courses emphasize the role of nutrients in biochemistry, genetics, physiology, microbiology and immunology that promotes wellness and enhances the quality of life. The major also provides an excellent background for those interested in pursuing graduate degrees in biological, nutritional or food sciences; professional degrees in human or veterinary medicine; degrees in dentistry, pharmacy, physical therapy, nursing, public health and other health professions; or dietetic internships.

The Didactic Program in Dietetics (DPD) and the Graduate Degree/Dietetic Internship Program are accredited by the Accreditation Council for Education in Nutrition and Dietetics (ACEND). Students who successfully complete the DPD and a dietetic internship are eligible to take the Registration Examination to become a Registered Dietitian (RD).

Three curriculum tracks are offered (General Nutrition, Didactic Program in Dietetics and Molecular and Experimental Nutrition) to provide flexibility in one’s chosen career path. The Nutrition major prepares one for graduate school, corporate wellness positions, health promotion programs, the food industry, public health programs, pharmaceutical sales, clinical dietetics, medical and research laboratories, biotechnology firms, government agencies and related fields. For more information, visit http://nfs.tamu.edu

Didactic Program in Dietetics Track

The Didactic Program in Dietetics (DPD) is accredited by the Accreditation Council for Education in Nutrition and Dietetics (ACEND) and is designed to prepare students for meeting the requirements for the credential of Registered Dietician (RD). The DPD provides a strong science base and foundational courses in nutrition for students desiring a dietetic practice in a clinical, therapeutic, community wellness, public health or food production/service setting.

1 The Graduation requirements include a requirement for 6 hours of international and cultural diversity courses. Selection must be from courses on the approved list. Selection can be courses that also satisfy the requirement for social and behavioral sciences; creative arts; language, philosophy and culture; or electives. For Core Curriculum requirements visit http://core.tamu.edu. Creative Arts Elective (p. 24) and ANTH 205 satisfy both degree requirements as well as international and cultural diversity requirements.

A total of 120 hours is required for graduation; 36 hours of 300/400 level courses are required to meet the Texas A&M University residency requirement.

To be eligible to participate in the DPD program, students must maintain an overall GPR of 2.8 or above and have a grade of at least C in all non-nutrition courses and a grade of at least B in all nutrition courses. See academic advisor for information on specific course listings and eligibility requirements.

Nutrition - BS, General Nutrition Track

Nutritional sciences prepares majors with a comprehensive knowledge of the biological and social sciences to understand the relationships between nutrients, food components and human health. Prevention of diseases that are related to lifestyle, particularly diet and nutrition, is a focus of the curriculum. Core courses emphasize the role of nutrients in biochemistry, genetics, physiology, microbiology and immunology that promotes wellness and enhances the quality of life. The major also provides an excellent background for those interested in pursuing graduate degrees in biological, nutritional or food sciences; professional degrees in human or veterinary medicine; degrees in dentistry, pharmacy, physical therapy, nursing, public health and other health professions; or dietetic internships.

The Didactic Program in Dietetics (DPD) and the Graduate Degree/Dietetic Internship Program are accredited by the Accreditation Council for Education in Nutrition and Dietetics (ACEND). Students who successfully complete the DPD and a dietetic internship are eligible to take the Registration Examination to become a Registered Dietitian (RD).

Three curriculum tracks are offered (General Nutrition, Didactic Program in Dietetics and Molecular and Experimental Nutrition) to provide flexibility in one’s chosen career path. The Nutrition major prepares one for graduate school, corporate wellness positions, health promotion programs, the food industry, public health programs, pharmaceutical sales, clinical dietetics, medical and research laboratories, biotechnology firms, government agencies and related fields. For more information, visit http://nfs.tamu.edu

General Nutrition Track

The General Nutrition Track provides a wide range of approved electives in biochemistry, nutrition, food science, microbiology, immunology, genetics, and psychology in order to customize a degree suited to research interests and career objectives. Through this program, students are prepared to work in community nutrition programs, sports nutrition, education, research, and as technical representatives in the nutrition and health industry. This is also an excellent program for students wanting to go to professional schools such as medicine, dentistry, physical therapy, physician assistant, or pharmacy.

Teacher Certification

The secondary Provisional Teaching Certificate may be obtained in conjunction with the Bachelor of Science degree in Nutritional Sciences, General Nutrition Track. There are three subject areas available for teacher certification through this degree: Biology/Life Science (grades 8-12), Chemistry (grades 8-12), and Science (grades 8-12).

Students must also complete the STEM (Science, Technology, Engineering, Mathematics) minor. Students interested in teacher certification should contact the teacher certification advisor in the Department of Teaching, Learning and Culture in the College of Education and Human Development for more information.

Total Semester Credit Hours  120

1 The Graduation requirements include a requirement for 6 hours of international and cultural diversity courses. Selection must be from courses on the approved list. Selection can be courses that also satisfy the requirement for social and behavioral sciences; creative arts; language, philosophy and culture; or electives. For Core Curriculum requirements visit http://core.tamu.edu

2 Students may choose to take two physiology courses, VTPP 423 and VIBS 305, instead of anatomy.

3 Students may choose from the following technical electives: CHEM 238, PHYS 201, PHYS 202, CHEM 315 and CHEM 318, BIOL 413 or BIOL 414, BIOL 352, VTPP 425, COMM 203, COMM 315, or COMM 325, PSYC 306, PSYC 307, BICH 431/GENE 431, HLTH 236, HLTH 334/WGST 334, HLTH 354.

A total of 120 hours is required for graduation; 36 hours of 300/400 level courses are required to meet the Texas A&M University residency requirement.

Students interested in teacher certification must also complete the 18 credit hour STEM (Science, Technology, Engineering, Mathematics) Minor. Substitutions must be approved by the Department of Teaching, Learning and Culture advisors.

Teacher certification in Biology/Life Science

• STEM minor
• Technical electives: one Botany course (BIOL 328); one Ecology course (WFSC 402 or BIOL 357).

Teacher certification in Science

• STEM minor
• Technical electives: PHYS 201 and PHYS 202; one Earth Science course GEOL 101 or GEOL 308 and Ecology course WFSC 420, WFSC 409 or BIOL 357.

Teacher certification in Chemistry

• STEM minor
• No additional courses required

Nutrition - BS, Molecular and Experimental Track

Nutritional sciences prepares majors with a comprehensive knowledge of the biological and social sciences to understand the relationships between nutrients, food components and human health. Prevention of diseases that are related to lifestyle, particularly diet and nutrition, is a focus of the curriculum. Core courses emphasize the role of nutrients in biochemistry, genetics, physiology, microbiology and immunology that promotes wellness and enhances the quality of life. The major also provides an excellent background for those interested in pursuing graduate degrees in biological, nutritional or food sciences; professional degrees in human or veterinary medicine; degrees in dentistry, pharmacy, physical therapy, nursing, public health and other health professions; or dietetic internships.

The Didactic Program in Dietetics (DPD) and the Graduate Degree/Dietetic Internship Program are accredited by the Accreditation Council for Education in Nutrition and Dietetics (ACEND). Students who successfully complete the DPD and a dietetic internship are eligible to take the Registration Examination to become a Registered Dietitian (RD).

Three curriculum tracks are offered (General Nutrition, Didactic Program in Dietetics and Molecular and Experimental Nutrition) to provide flexibility in one’s chosen career path. The Nutrition major prepares one for graduate school, corporate wellness positions, health promotion programs, the food industry, public health programs, pharmaceutical sales, clinical dietetics, medical and research laboratories, biotechnology firms, government agencies and related fields. For more information, visit http://nfs.tamu.edu

Molecular and Experimental Track

The Molecular and Experimental Track emphasizes a fundamental background in the biological and physical sciences that relate to human health and nutrition. This option offers students the opportunity to develop analytical and critical thinking skills through undergraduate research with department faculty, independent study and study abroad programs, and a science-based curricula that is essential for graduate studies and pre-professional schools. The goal of this track is to enable students to seek employment in specialized science-based fields in the biological or medical sciences, to pursue graduate degrees beyond the baccalaureate or to enter professional schools of medicine, veterinary medicine, dentistry, pharmacy or similar disciplines. See academic advisor for information on application procedures, GPR requirements, specific course listings and eligibility requirements.

### Department of Plant Pathology and Microbiology

Our mission is to conduct leading edge research on plant diseases and plant-microbe interactions that directly and indirectly impact: Our ability to feed the world; Human and animal health; Environmental stewardship and sustainability. Educate and prepare leaders in the STEM fields of plant and environmental health through a creative and challenging educational environment that integrates scholarship, fundamental knowledge, and experiential learning. Convey information relevant to society through effective outreach and services that address plant health, food safety and environmental health to the citizens of Texas, the United States and the World.

An extension of this mission is to train the next generation of environmental professionals by providing them both the analytical and biological understanding to successfully protect the environment while promoting economic vitality.

- Bachelor of Science in Environmental Studies (p. 182)
- Bachelor of Science in University Studies, Environmental Business Concentration (p. 183)

Minors

- Bioenvironmental Sciences Minor (p. 184)

Bioenvironmental Sciences - BS

Major breakthroughs are taking place locally, regionally and globally concerning environmental awareness. Environmental hazards take many forms, including microbial threats, toxic wastes and the indirect impact of man’s activities on a fragile ecosystem. As a result, there is a growing recognition that the solutions to environmental problems require innovative multi-disciplinary perspectives and technologically-intensive approaches. The Bioenvironmental Sciences curriculum (BESC) was designed in consultation with numerous industry representatives in order to comply with the most current thinking on the talents needed for tomorrow’s environmental fields. Students will be prepared for a breadth of career choices in the environmental sciences. These choices include such areas as research and development, environmental consulting, remediation of wastes, site assessment and environmental sampling, and environmental law. Graduates from BESC find employment in federal, state and municipal environmental agencies; in industries concerned with the generation and clean-up of hazardous wastes; with environmental advocacy and educational groups. In addition, the strong science base in BESC prepares students for professional and graduate schools in a variety of disciplines.

The curriculum described combines a foundation of required courses of technical and free electives to allow the student the maximum flexibility to design a personalized course of study. Students are advised to focus on an area of emphasis with those electives that come from such categories as conservation/ecology, policy/ethics/regulations, the physical environment, engineering, plant studies, genetics/biotechnology and general environmental. The Department of Plant Pathology and Microbiology also supports the extracurricular activities needed to support a successful environmental professional.

Select from the following:
The BS degree in Environmental Studies in the College of Agriculture and Life Sciences provides students with the opportunity to learn about the major societal forces that influence environmental issues. These include political agreement supporting legal and regulatory requirements, economics and the marketplace, environmental values, and technology. Students gain technical background blended with a solid foundation in economics, political issues, environmental law, ethics, and communications. Technology and the environment are well supported in existing curricula and contribute to the multidisciplinary nature of the Environmental Studies degree. Technical courses focus on biological sciences, natural resources, and assessment of the environment and come from the Agricultural Economics; Bioenvironmental Sciences; Entomology; Forest Science; Rangeland Ecology and Management; Recreation, Park and Tourism Sciences; Soil and Crop Sciences; and Wildlife and Fisheries Sciences. It is the fusion of these courses with those from the Liberal Arts that make this a truly unique curriculum. This degree is housed within the Department of Plant Pathology and Microbiology.

Total Semester Credit Hours 120

1 The Graduation requirements include a requirement for 6 hours of international and cultural diversity courses. A course satisfying a Core category, a college/department requirement, or a free elective can be used to satisfy this requirement. See academic advisor.

A minimum of 120 semester hours will be required for a BS degree.

University Studies - BS, Environmental Business Concentration

A University Studies Degree differs from a traditional “major” in that it consists of a concentration of 21-24 hours and two minors of 15-18 hours each. The University Studies Degree format was created to provide students the flexibility to combine areas of study that are of special interest. Under the guidelines of the University Studies degree requirements, the student’s diploma will list “University Studies” in the place where the major is currently listed. The student’s area of concentration (Environmental Business) and the two minors (Rangeland Ecology & Management AND Business) will be indicated on the student’s transcript.

This new degree option features a blending of environmental science coursework and business coursework in a truly unique combination unlike any other degree at Texas A&M University. The Environmental Business concentration draws heavily from the established Bioenvironmental Sciences degree already offered at Texas A&M, but this concentration is significantly different in that it lacks the larger number of life science courses that serve as a necessary foundation in any environmental science degree. The focus on environmental coursework (through the BESC and ESSM courses) coupled with core business coursework allows this University Studies concentration to provide a very well-rounded and marketable degree in a variety of arenas.

This interdisciplinary degree plan provides a highly-marketable focus from an already fast-rising, multi-faceted discipline. The coursework retains the “customizable” nature of the university studies degree within the concentration itself, allowing students a truly one-of-a-kind opportunity for their bachelor’s degree. The Environmental Business concentration provides a solid foundation of Bioenvironmental Sciences coursework that, when paired with the Rangeland Ecology & Management minor and the Business minor, provides students with a versatile, sound degree that is uniquely positioned in the job market and combines a
The minor in Bioenvironmental Sciences is available to all students enrolled at Texas A&M University.

The minor in business consists of six specific courses chosen to develop a foundational knowledge in the basic aspects of business, including accounting, finance, management, marketing, and management information systems.

The courses listed below constitute the 18 hours required for a minor in business.

Students must make a grade of "C" or better in all courses.

Department of Poultry Science

Growth of the poultry industry has created the need for scientific, technical and business knowledge in the various fields important to successful poultry production. In few fields of science is an understanding of the basic sciences, nutrition, genetics, physiology, diseases, biotechnology, processing and marketing more rewarding than in the modern, intensive methods of poultry and food production. Students are trained in the necessary background, analytical skills, problem solving and leadership for complex production units, hatcheries, integrated feed mills, processing plants and research laboratories. Rapid industry growth provides many career opportunities for graduates. Students are given two emphasis areas in which to specialize their education toward their selected career goals. The University Core Curriculum courses and the Poultry Science Core courses are required for both emphases. Students then complete a BS degree in either emphasis area by completing the respective emphasis area courses. All students are strongly encouraged to get early and frequent academic counseling which is readily available.

Poultry Science
PHD, University of Florida, 1987

Walzem, Rosemary L, Professor
Poultry Science
PHD, University of California, Davis, 1987

Majors

• Bachelor of Science in Poultry Science, Industry Emphasis (p. 185)
• Bachelor of Science in Poultry Science, Technical Emphasis (p. 186)

Minors

• Poultry Science Minor (p. 187)

Poultry Science - BS, Industry Emphasis

Growth of the poultry industry has created the need for scientific, technical and business knowledge in the various fields important to successful poultry production. In few fields of science is an understanding of the basic sciences, nutrition, genetics, physiology, diseases, biotechnology, processing and marketing more rewarding than in the modern, intensive methods of poultry and food production. Students are trained in the necessary background, analytical skills,
problem solving and leadership for complex production units, hatcheries, integrated feed mills, processing plants and research laboratories. Rapid industry growth provides many career opportunities for graduates. Students are given two emphasis areas in which to specialize their education toward their selected career goals. The University Core Curriculum courses and the Poultry Science Core courses are required for both emphases. Students then complete a BS degree in either emphasis area by completing the respective emphasis area courses. All students are strongly encouraged to get early and frequent academic counseling which is readily available.

Students completing a BS degree in the industry emphasis find employment with the poultry and food industries in positions such as corporate management, quality assurance, sales or technical support in live production, processing or marketing. Students in this emphasis also get positions with pharmaceutical and equipment companies, with industry trade publications and in various university and public service positions.

Students completing a BS degree in the technical emphasis are prepared for advanced study in biochemistry, nutrition, physiology, molecular genetics, reproduction, processing technology, microbiology or environmental science and for eventual professional employment in research, teaching or public service. This curriculum can be easily tailored to meet the veterinary medicine preprofessional requirements.

### Department of Recreation, Park and Tourism Sciences

The undergraduate curriculum leading to a Bachelor of Science degree with a major in Recreation, Park and Tourism Sciences emphasizes problem-solving skills, development of an international perspective and
the application of scientific principles to managerial problems. Students study both the social and life sciences to gain an understanding of how to manage and market organizations in the vast park, recreation and tourism industry. The curriculum provides the student with an introduction to the history and concepts of recreation, park and tourism sciences, followed by the knowledge and skills for both entry-level positions and for future professional growth in the field. In addition to core courses, students must fulfill requirements for at least one certificate, and may earn additional certificates. An education in recreation, park and tourism sciences prepares students to become leaders for the 21st century with the capacity to learn from life and throughout life.

Recreation, Park and Tourism Sciences - BS with Certificate

The undergraduate curriculum leading to a Bachelor of Science degree with a major in Recreation, Park and Tourism Sciences provides students with an education in recreation, park and tourism sciences, with an emphasis on problem-solving skills, development of an international perspective and the application of scientific principles to managerial problems. The first two years of studies build a foundation that spans a wide range of disciplines and bodies of knowledge in the arts and sciences and provide the student with an introduction to the history and concepts of recreation, park and tourism sciences. The second two years prepare students with the knowledge and skills for both entry-level positions and for future professional growth in the field. In addition to core courses, students must fulfill requirements for at least one certificate, but may earn additional certificates.

Through the curriculum, students develop the depth and breadth of knowledge needed to scientifically investigate and select among alternatives as well as the intellectual skills to organize and integrate their knowledge in new and more effective patterns. An education in recreation, park and tourism sciences prepares students to become professionals with the capacity to learn from life and throughout life.

The department maintains links with other resource-management programs within the University as well as exchange programs with other academic entities. Supporting programs at Texas A&M include the resource management programs in Ecosystem Science and Management, Wildlife and Fisheries Sciences, and the Sports Management Specialization in the Department of Health and Kinesiology.

Recreation, Park and Tourism Sciences majors must complete at least one certificate.

Certificate Options

Community Recreation and Park Administration Certificate
Management of recreation, park and leisure-service agencies requires expertise in problem-solving, decision-making, assessment of social and environmental impacts, personnel, public relations, volunteer management, financing and fund-raising, marketing of services, and needs assessments. Skills in working with people in the legal and political environment are necessary, as well as the ability to assess and work with other organizations for cooperative developments in recreation and tourism. Utilizing computer based decision-aids, students in this emphasis prepare for managerial careers with public recreation and park agencies, youth agencies, not-for-profit recreation agencies, and commercial recreation enterprises.

Parks and Conservation Certificate
This option focuses on management of natural and cultural resources associated with conserving parks, and other protected areas, while also providing for their use by people. Land managers and related professionals operate within a variety of forums that require the integration of concepts in the environmental, social and behavioral sciences, along with policy and administrative decision-making. Necessary skills include computer applications for natural resource management, planning and design related to natural and cultural resources. Students with an option in this field look forward to careers with both public and private employers in the recreation, park and tourism fields, including state and federal agencies and private enterprises, non-profit organizations, camps and environmental education programs.

Tourism Management Certificate
Tourism is one of the world’s largest and most diverse industries. To help students prepare for tourism careers, this option area introduces issues pertaining to the management, development, and promotion of places and events as tourism attractions. Courses in tourism are designed to collectively build understanding about the links that exist between local places, host populations, and various public, private and special interest groups. Students also develop competencies in assessing economic, environmental, social and political impacts of tourism, as well as in tourism marketing. Students in this option can pursue careers in private sector enterprises, government agencies, convention and visitor bureaus, and other tourism-related service organizations.

Youth Development Certificate
This option focuses on programs and services that contribute to the development of young people’s personal, physical, social and educational abilities. Youth workers are program developers, leaders and managers who need to be able to work with youth, families, organizations and communities. Coursework in this option focuses on positive youth development, program planning and evaluation, methods for working with young people, and societal factors that both contribute to and inhibit the development of young people. Students with an option in this field look forward to careers with non-profit, public and for-profit agencies that supply youth development opportunities for young people. Settings include after-school programs, community programs, camps, outdoor adventure and church-related recreation programs.

Understanding and Developing

Wildland Watershed Management

Texas A&M University Undergraduate Catalog

resources specialist, while, at the same time, affording the flexibility

structure is to provide students with an identity as a renewable natural

wider variety of resource values. The RENR program of study is comprised

education in the study and management of sustainable ecosystems for a

Renewable Natural Resources (RENR) is for students desiring a rigorous

management and conservation. Students may select one of these degree

programs or a broad approach to natural resource education by pursuing

the multi-department degree in Renewable Natural Resources.

Renewable Natural Resources

Renewable Natural Resources (RENR) is for students desiring a rigorous

education in the study and management of sustainable ecosystems for a

wide variety of resource values. The RENR program of study is comprised

of a core of courses and two emphases. The goal of this core/emphasis

structure is to provide students with an identity as a renewable natural

resources specialist, while, at the same time, affording the flexibility

for preparation for a variety of career tracks. One emphasis focuses on

management and the other on policy. Technical electives prepare the

students in chosen educational and career directions. The underlying

goal of the RENR degree is to integrate the scientific issues of renewable

natural resources. Graduates of this program will be able to articulate

these issues verbally and in writing in their chosen career. Therefore, the

RENR degree emphasizes verbal presentations and major papers as well

as field-oriented activities.

The RENR programs are designed to help students prepare for careers in

public and private organizations associated with the planning and use of

natural resources and the environment. Possible employment includes

areas such as multi-use land management, environmental assessment,

resource inventory, natural resource planning, law, policy analysis and

land remediation.

An emphasis may be selected in policy or management. The RENR

degree consists of 120 credit hours: 42 university core, 42-45 common to

both emphasis areas and 24-27 designated by the emphasis area and 9

free elective hours.

RENR Areas of Emphasis

The BS in Renewable Natural Resources includes two emphasis areas

for students to select. The directed electives available from advisors are

what differentiates the emphases.

Management Emphasis

Designed for students desiring an education in natural resources policy.

In today’s world, it is important to have college graduates prepared to deal with integrated systems, accounting for all of

the separate aspects of the system. The management emphasis seeks to

prepare the student to integrate concerns related to land, water, air,

plants and wildlife into the management process. Students select 24

credit hours of directed electives from an approved list in consultation

with their advisor. The remaining 9 credit hours are free electives.

Policy Emphasis

Designed for an education in the scientific management of integrated

natural resources. Designed for students desiring an education in natural resources policy. This emphasis incorporates knowledge from all renewable natural

resources disciplines, which provides a foundation for decision-making

related to the environment. Students will obtain an understanding of

the behavior of institutions and organizations associated with natural

resource management.

Professionals associated with natural resources need to consider

legislative mandates, community interests, resource evaluation and

competing uses, and conflict management techniques. This emphasis

prepares the student for work in private industry, public and non-profit

agencies, and graduate school. Students must select 24 hours of

restricted electives from an approved list in consultation with their

advisor. The remaining nine hours are free electives.

Park and Natural Resource Management - Minor

The Department of Recreation, Park and Tourism Sciences offers an 18 credit hour minor in Park and Natural Resource Management as a supplement to other majors. The minor focuses on management of natural and cultural resources associated with conserving parks and other protected areas. Land managers and related professionals integrate concepts in the bio-environmental sciences, social and behavioral sciences, and policy and administrative decision-making. Students with an emphasis in this field look forward to careers with both public and private employers in the recreation, park, and tourism fields, including state and federal agencies and private enterprises, non-profit organizations, youth camps, and environmental education programs.

Students must make a grade of "C" or better in all courses.

An internship (RPTS 484) is available for minors above required 18 hours.

Tourism Management - Minor

The Department of Recreation, Park and Tourism Sciences offers an 18 credit hour minor in Tourism Management as a supplement to other majors. The minor focuses on the planning, management, development, and promotion of places and events as tourism attractions. Courses in tourism are designed to collectively build understanding about the linkages that exist between local places and cultures, host populations, and various public, private, and special interest groups. The minor requires RPTS 302 and RPTS 311. Students select four additional courses from a list of nine.

An internship (RPTS 484) is available for minors above required 18 hours.

Youth Development - Minor

Overview

The Department of Recreation, Park and Tourism Sciences offers an 18-hour minor in Youth Development as a supplement to other majors. The minor focuses on programs and services that contribute to the
development of young people’s personal, physical, social and educational abilities. Youth workers are program developers, leaders and managers who need to be able to work with youth, families, organizations and communities. Coursework in this option focuses on positive youth development, program planning and evaluation, methods for working with young people, and societal factors that both contribute to and inhibit the development of young people.

- RPTS 311 Planning and Implementation of Events and Programs
- RPTS 340 Recreation, Parks, Tourism and Diverse Populations
- RPTS 476 Leadership for Outdoor Recreation
- RPTS 478 Youth Development Practice

Total Semester Credit Hours 18

Students must make a grade of "C" or better in all courses.

An internship (RPTS 484) is available for minors above required 18 hours.

**Community Recreation and Park Administration - Certificate**

Management of recreation, park and leisure-service agencies requires expertise in problem-solving, decision-making, assessment of social and environmental impacts, personnel, public relations, volunteer management, financing and fund-raising, marketing of services, and needs assessments. Skills in working with people in the legal and political environment are necessary, as well as the ability to assess and work with other organizations for cooperative developments in recreation and tourism. Utilizing computer based decision-aids, students in this emphasis prepare for managerial careers with public recreation and park agencies, youth agencies, not-for-profit recreation agencies, and commercial recreation enterprises.

**Hospitality Management - Certificate**

The Certificate in Hospitality Management, offered by the Department of Recreation, Park and Tourism Sciences, is designed to provide students with an understanding of the planning, analysis, and decision-making techniques needed for management positions in the tourism and hospitality industries. Students will study and develop skills related to principles of management, sustainability, development, cultural tolerance, marketing, finance, and service quality as they apply to the hospitality and tourism industries.

</tbody>
</table>

Total Semester Credit Hours 15

This Certificate requires a minimum of 15 credit hours of designated courses, all of which are to be taken online. If a student has taken the on-campus version of any course prior to enrollment in the Certificate, it may be substituted for the on-line version with permission of the RPTS academic advisor. Students must earn a grade of a "C" or better in each course used to meet the requirements, and an overall average of at least a 2.5 in applicable coursework.

**Parks and Conservation - Certificate**

This option focuses on management of natural and cultural resources associated with conserving parks, and other protected areas, while also providing for their use by people. Land managers and related professionals operate within a variety of forums that require the integration of concepts in the environmental, social and behavioral sciences, along with policy and administrative decision-making. Necessary skills include computer applications for natural resource management, planning and design related to natural and cultural resources. Students with an option in this field look forward to careers with both public and private employers in the recreation, park and tourism industries.

1 Students should review the list of electives prepared by the Event Management Program Coordinating Committee. The courses listed are included on the full list.

Tourism Management - Certificate

Tourism is one of the world’s largest and most diverse industries. To help students prepare for tourism careers, this option area introduces issues pertaining to the management, development, and promotion of places and events as tourism attractions. Courses in tourism are designed to collectively build understanding about the links that exist between local places, host populations, and various public, private and special interest groups. Students also develop competencies in assessing economic, environmental, social and political impacts of tourism, as well as in tourism marketing. Students in this option can pursue careers in private sector enterprises, government agencies, convention and visitor bureaus, and other tourism-related service organizations.

Department of Soil and Crop Sciences

Undergraduate Students who complete the undergraduate course of study receive the degree of Bachelor of Science in Plant and Environmental Soil Science and Turfgrass Science.

The B.S. degrees require a minimum of 120 credit hours. Details of course requirements are given below and in the Texas A&M University Undergraduate Catalog. Information on undergraduate admissions, including how to order a catalog, can be obtained from the Office of Admissions (http://admissions.tamu.edu). We encourage prospective students to make an appointment with an academic advisor prior to applying.

Undergraduates are required to complete an internship, undergraduate research or study abroad. Soil and Crop Sciences offers a wide variety of experiential learning opportunities for students to achieve their graduation needs. Students are able to complete their experiential learning requirement regionally, nationally, or internationally. Information about undergraduate research and internship opportunities can be obtained from students’ academic advisors and professors.

- Agronomy Minor (p. 200)
- Environmental Soil Science Minor (p. 200)
- Plant Breeding Minor (p. 201)

**Plant and Environmental Soil Science - BS, Crops Emphasis**

Curriculum in Plant and Environmental Soil Science is administered by the Department of Soil and Crop Sciences. Students following this curriculum develop and utilize basic scientific knowledge to understand the most fundamental resources—plants, soils, and water—and the interaction of these resources in different environmental settings. The required courses provide an essential foundation in several disciplines, while the elective courses can be selected to meet the interests, needs and objectives of individual students.

Based on professional goals and objectives, students will select an emphasis in crops or soil and water. The crops emphasis focuses on the principles involved in the production, management, marketing and use of fiber, forage, grain, biofuel and oilcrops. In the soil and water emphasis, students will study the nature, properties, management, conservation, and use of soils and water. The graduate in Plant and Environmental Soil and Science may choose a career in: education—consulting, extension, or public relations; production agriculture—biofuel or seed production, farming, or farm management; soil and water resource management—soil surveying, land appraisal, land use planning, conservation and pollution abatement, or watershed management; environmental—pollution control and environmental protection as affected by plant-soil-water interactions.

Flexible curricula are provided so that each student, in consultation with their academic advisor, can design a degree program that best serves the student's career objectives.

1. Credit by examination may be used to substitute for courses.
2. To be selected from crops emphasis courses.
3. The Graduation requirements include a requirement for six hours of international and cultural diversity courses. A course satisfying a Core category, a college/department requirement, or a free elective can be used to satisfy this requirement. See academic advisor.

**Plant and Environmental Soil Science - BS, Soil and Water Emphasis**

Curriculum in Plant and Environmental Soil Science is administered by the Department of Soil and Crop Sciences. Students following this curriculum develop and utilize basic scientific knowledge to understand the most fundamental resources—plants, soils, and water—and the interaction of these resources in different environmental settings. The required courses provide an essential foundation in several disciplines, while the elective courses can be selected to meet the interests, needs and objectives of individual students.
Turfgrass Science - BS

Curriculum in Turfgrass Science is administered by the Department of Soil and Crop Sciences. Students following this curriculum develop and utilize basic scientific knowledge to understand the most fundamental resources—turfgrass, soils, and water—and the interaction of these resources in different environmental settings. The required courses provide an essential foundation, while the elective courses (i.e., ornamental horticulture, plant protection, business, landscape architecture) can be selected to meet the interests, needs and objectives of individual students.

Turfgrass Science prepares graduates for careers in: management—golf courses, athletic fields, public, private or commercial grounds; production agriculture—turfgrass production, or plant breeding; agribusiness—seed sales, turf equipment and supplies, landscape contractor, commercial or home lawn care specialists; education—consulting, extension, or public relations.

Total Semester Credit Hours 15

Students must make a grade of "C" or better in all courses.

Agronomy - Minor

The Department of Soil and Crop Sciences offers a minor in Agronomy. SCSC 105, Food & Fiber or SCSC 205, Problem Solving in Plant and Soil Science and SCSC 301, Soil Science are required. Select an additional 8 hours of course work within Soil and Crop Sciences. Please speak with an advisor concerning courses prior to registering.
Plant Breeding - Minor

Overview

The Department of Soil and Crop Sciences offers a Minor in Plant Breeding. SCSC 304, plant breeding and genetics, and GENE 310, principles of heredity, are required courses. Students select an additional nine hours of course work and a ‘C’ or better is required in all coursework. GENE 301 may be substituted for GENE 310. Plant breeding minor offers the opportunity for students to explore their interest in applied biological sciences in the areas of plant breeding, crop improvement, crop biotechnology, and genetics. Students must have an overall GPA of 2.75 or better to enter the program.

1  GENE 301 may be substituted for GENE 310. Must have an overall GPA of 2.75 to enter program.

University Studies Programs

The College of Agriculture and Life Sciences offers degrees in University Studies. A University Studies degree differs from a traditional “major” in that it consists of a concentration of 26 hours and two minors of 15-18 hours each. The University Studies degree format was created to provide students the flexibility to combine areas of study that are of special interest.

Majors

- Bachelor of Science in University Studies, Environmental Business Concentration (p. 183)
- Bachelor of Science in University Studies, Leadership Studies Concentration (p. 135)

University Studies - BS, Environmental Business Concentration

A University Studies Degree differs from a traditional “major” in that it consists of a concentration of 21-24 hours and two minors of 15-18 hours each. The University Studies Degree format was created to provide students the flexibility to combine areas of study that are of special interest. Under the guidelines of the University Studies degree requirements, the student’s diploma will list “University Studies” in the place where the major is currently listed. The student’s area of concentration (Environmental Business) and the two minors (Rangeland Ecology & Management AND Business) will be indicated on the student’s transcript.

This new degree option features a blending of environmental science coursework and business coursework in a truly unique combination unlike any other degree at Texas A&M University. The Environmental Business concentration draws heavily from the established Bioenvironmental Sciences degree already offered at Texas A&M, but this concentration is significantly different in that it lacks the larger number of life science courses that serve as a necessary foundation in any environmental science degree. The focus on environmental coursework (through the BESC and ESSM courses) coupled with core business coursework allows this University Studies concentration to provide a very well-rounded and marketable degree in a variety of arenas.

This interdisciplinary degree plan provides a highly-marketable focus from an already fast-rising, multi-faceted discipline. The coursework retains the “customizable” nature of the university studies degree within the concentration itself, allowing students a truly one-of-a-kind opportunity for their bachelor’s degree. The Environmental Business concentration provides a solid foundation of Bioenvironmental Sciences coursework that, when paired with the Rangeland Ecology & Management minor and the Business minor, provides students with a versatile, sound degree that is uniquely positioned in the job market and combines a general overview of both environmental issues/policies and business administration principals/content.

1 Course must be taken in residence at Texas A&M. No transfer courses or substitutions will be allowed.
2 Credit by exam is offered for students who have not taken ISTM 209 but can demonstrate mastery of the concepts. See dars.tamu.edu/testing.
3 MGMT 212 cannot be used to meet this requirement.

Students must make a grade of "C" or better in all courses.

University Studies - BS, Leadership Studies Concentration

A University Studies Degree is an interdisciplinary major that consists of a concentration of 26 hours and two minors of 15-18 hours each. The University Studies Degree format was created to provide students the flexibility to combine areas of study that are of special interest. University Studies - Leadership Studies is administered by the Department of Agricultural Leadership, Education, and Communications. In the leadership studies concentration, students learn theories and models of the leadership process and they use analysis and evaluation to synthesize multiple leadership theories. This interdisciplinary program allows you the ability to customize your higher educational experience to your future career goals unlike any other degree at Texas A&M University. This innovative degree empowers you to develop an understanding of foundational leadership theory in your chosen context. The student, with support from the advisor, will choose minors to assist them in creating a degree plan that will allow students to gain the knowledge and skills required for their chosen career path.

Total Semester Credit Hours 120

1 Before registering as a junior, each student must develop a degree program in consultation with the departmental advisor.
2 The total number of hours between Minor 1, Minor 2 and electives must be 53 hours. Courses counting in other areas of the degree plan and toward a minor cannot count toward the 53 total hours. Must meet with an advisor to determine correct hours.

Students are required to make a C or better for each of their courses in the major coursework and both Minor Areas.

At least 36 credits must be 300- and 400-level courses.

The Graduation requirements include a requirement for 6 hours of international and cultural diversity courses. A course satisfying a Core category, a college/department requirement, or a free elective can be used to satisfy this requirement.

Department of Wildlife and Fisheries Sciences

The Department of Wildlife and Fisheries Sciences uses the latest in the ecological and management disciplines to provide the most diverse and progressive education available in the conservation of the earth’s biodiversity. Students in this department are interested in making contributions to solving problems associated with the extinction of species, wildlife recreational uses, food production from aquaculture, environmental education, wildlife management, and urban wildlife and fisheries recreational activities.

The conservation and management of wildlife and fisheries resources require resolution of increasingly complex issues that extend far beyond the bounds of classical biology. Contemporary wildlife and fisheries professionals must be well-versed in the life and physical sciences, mathematics, and the language, philosophy and culture. Today’s professionals must have a problem-solving orientation that accommodates animals and their habitats within a larger ecological and socio-economic system. In addition, modern students must be familiar with molecular genetics and the principles of conservation biology. Curricula in wildlife and fisheries sciences are designed to provide both the traditional and contemporary dimensions of academic instruction necessary to transform motivated and intellectually capable students into competent professionals.

### Renewable Natural Resources - BS

#### Professional Fields of Study and Department Heads

Ecosystem Science and Management, Kathleen Kavanagh, Head  
Recreation, Park and Tourism Sciences, Gary D. Ellis, Head  
Wildlife and Fisheries Sciences, John B. Carey, Interim Head

#### General Statement

Three departments offer degrees in specific areas of natural resources management and conservation. Students may select one of these degree programs or a broad approach to natural resource education by pursuing the multi-department degree in Renewable Natural Resources.

### Renewable Natural Resources

Renewable Natural Resources (RENR) is for students desiring a rigorous education in the study and management of sustainable ecosystems for a wide variety of resource values. The RENR program of study is comprised of a core of courses and two emphases. The goal of this core/emphasis structure is to provide students with an identity as a renewable natural resources specialist, while, at the same time, affording the flexibility for preparation for a variety of career tracks. One emphasis focuses on management and the other on policy. Technical electives prepare the students in chosen educational and career directions. The underlying goal of the RENR degree is to integrate the scientific issues of renewable natural resources. Graduates of this program will be able to articulate these issues verbally and in writing in their chosen career. Therefore, the RENR degree emphasizes verbal presentations and major papers as well as field-oriented activities.

The RENR programs are designed to help students prepare for careers in public and private organizations associated with the planning and use of natural resources and the environment. Possible employment includes areas such as multi-use land management, environmental assessment, resource inventory, natural resource planning, law, policy analysis and land remediation.

An emphasis may be selected in policy or management. The RENR degree consists of 120 credit hours: 42 university core, 42-45 common to both emphasis areas and 24-27 designated by the emphasis area and 9 free elective hours.

### RENR Areas of Emphasis

The BS in Renewable Natural Resources includes two emphasis areas for students to select. The directed electives available from advisors are what differentiates the emphases.

#### Management Emphasis

Designed for an education in the scientific management of integrated natural resources. In today’s world, it is important to have college graduates prepared to deal with integrated systems, accounting for all of the separate aspects of the system. The management emphasis seeks to prepare the student to integrate concerns related to land, water, air, plants and wildlife into the management process. Students select 24 credit hours of directed electives from an approved list in consultation with their advisor. The remaining 9 credit hours are free electives.

#### Policy Emphasis

Designed for students desiring an education in natural resources policy. This emphasis incorporates knowledge from all renewable natural resources disciplines, which provides a foundation for decision-making related to the environment. Students will obtain an understanding of the behavior of institutions and organizations associated with natural resource management.

Professionals associated with natural resources need to consider legislative mandates, community interests, resource evaluation and competing uses, and conflict management techniques. This emphasis prepares the student for work in private industry, public and non-profit agencies, and graduate school. Students must select 24 hours of restricted electives from an approved list in consultation with their advisor. The remaining nine hours are free electives.

Wildlife and Fisheries Sciences - BS, Aquatic Ecology and Conservation Option

Graduates are well equipped for post-baccalaureate study in many life science fields (graduate school programs and human and veterinary medicine) or for direct entry into professions such as wildlife management, fisheries management, environmental impact assessment, aquaculture, natural history museum education, zoological park collection management, public school teaching, and urban wildlife management. Employers of recent graduates include state and federal resource agencies, scientific foundations, ranches, hunting and fishing clubs, fish farms, environmental consulting firms, museums, and secondary schools.

Wildlife ecology, aquatic ecology, and vertebrate zoology curriculum options lead to the Bachelor of Science degree. Each student will choose a course of study from among the options within the department’s curricula after consultation with the academic advisor. The chosen option is enhanced by a common departmental “core” of courses necessary for a sound education in the wildlife and fisheries conservation professions.

Students are encouraged to develop an emphasis area within their degree option. To build this emphasis area, students will choose directed electives, from related disciplines, in consultation with their academic advisor and faculty members.
This option (Aquatic Ecology & Conservation Option which is also known as the Fisheries, Aquaculture, and Aquatic Sciences Option) is designed for students interested in the research and management of fish, other freshwater and marine organisms, and the ecosystems that sustain them as well as controlled production of organisms in aquatic systems. Careers are available in state and federal resource agencies; fisheries management companies; nongovernmental conservation organizations; environmental consulting firms; and private consultation. In addition careers may be available in supporting areas such as quality control, supply, marketing, distribution, finance, consultation as well as domestic and foreign resource development. This degree option can also prepare students for grad school. This option meets American Fisheries Society requirements for certification as an Associate Fisheries Professional.

Total Semester Credit Hours: 120

---

1. Students currently enrolled at Texas A&M who wish to transfer to a Wildlife and Fisheries Sciences major must have achieved a grade of C or higher in introductory biology and mathematics courses required in the University Core Curriculum. Enrollment in Wildlife and Fisheries Sciences (WFSC) option courses will be restricted to students who have achieved a grade of C or higher in prerequisite courses.

2. Directed electives to be chosen in areas related to fisheries, aquaculture and related topics.

3. The Graduation requirements include a requirement for 6 hours of international and cultural diversity courses. A course satisfying a Core category, a college/department requirement, or a free elective can be used to satisfy this requirement.

Students are required to make a C or better in all WFSC and RENR 205/RENR 215 courses.

A total of 120 semester hours will be required for a BS degree.

### Wildlife and Fisheries Sciences - BS, Vertebrate Zoology Option

Graduates are well equipped for post-baccalaureate study in many life science fields (graduate school programs and human and veterinary medicine) or for direct entry into professions such as wildlife management, fisheries management, environmental impact assessment, aquaculture, natural history museum education, zoological park collection management, public school teaching and urban wildlife management. Employers of recent graduates include state and federal...
resource agencies, scientific foundations, ranches, hunting and fishing clubs, fish farms, environmental consulting firms, museums and secondary schools.

Wildlife ecology, aquatic ecology, and vertebrate zoology curriculum options lead to the Bachelor of Science degree. Each student will choose a course of study from among the options within the department’s curricula after consultation with the academic advisor. The chosen option is enhanced by a common departmental “core” of courses necessary for a sound education in the wildlife and fisheries conservation professions.

Students are encouraged to develop an emphasis area within their degree option. To build this emphasis area, students will choose directed electives, from related disciplines, in consultation with their academic advisor and faculty members.

**Vertebrate Zoology Option**

This emphasis provides the rigorous training needed for careers in the various aspects of natural resources related to the fields of ichthyology, herpetology, mammalogy and ornithology, including behavior, ecology, evolution, genetics, molecular biology, physiology and systematics. It is a flexible program which permits the inclusion of courses specifically required by schools graduate programs as well as schools of dentistry, law, medicine and veterinary medicine.

For students interested in biological diversity and the ecological processes and population interactions that sustain it, courses in this option are designed to provide a strong foundation in basic and applied organismal biology that will prepare students for graduate studies as well as careers within governmental and nongovernmental agencies and environmental firms dealing with biological conservation.

Students who are interested in mathematical and statistical approaches to conservation of endangered species, management of exploited populations, and their habitats will be equipped in basic ecological data analysis and modeling. The demand for professionals who can integrate quantitative methods and ecological concepts is rapidly increasing among government agencies, academia, and the private sector. Possible careers include entry-level assistant positions in fisheries management, wildlife management, environmental consulting, and research at conservation agencies, hospitals, and universities. This is also suitable for students who plan to obtain a post baccalaureate degree (M.S. or PhD) in ecology and related fields later in order to pursue higher level positions.

Total Semester Credit Hours 120
1 Students currently enrolled at Texas A&M who wish to transfer to a Wildlife and Fisheries Sciences major must have achieved a grade of C or higher in introductory biology and mathematics courses required in the University Core Curriculum. Enrollment in Wildlife and Fisheries Sciences (WFSC) option courses will be restricted to students who have achieved a grade of C or higher in prerequisite courses.

2 Directed electives to be chosen to meet prerequisite requirements for admission to professional schools.

3 The Graduation requirements include a requirement for 6 hours of international and cultural diversity courses. A course satisfying a Core category, a college/department requirement, or a free elective can be used to satisfy this requirement.

Students are required to make a C or better in all WFSC and RENR 205/RENR 215 courses.

A total of 120 semester hours will be required for a BS degree.

Wildlife and Fisheries Sciences - BS, Wildlife Ecology and Conservation Option

Graduates are well equipped for post-baccalaureate study in many life science fields (graduate school programs and human and veterinary medicine) or for direct entry into professions such as wildlife management, fisheries management, environmental impact assessment, aquaculture, natural history museum education, zoological park collection management, public school teaching and urban wildlife management. Employers of recent graduates include state and federal resource agencies, scientific foundations, ranches, hunting and fishing clubs, fish farms, environmental consulting firms, museums and secondary schools.

Wildlife ecology, aquatic ecology, and vertebrate zoology curriculum options lead to the Bachelor of Science degree. Each student will choose a course of study from among the options within the department’s curriculum after consultation with the academic advisor. The chosen option is enhanced by a common departmental “core” of courses necessary for a sound education in the wildlife and fisheries conservation professions.

Students are encouraged to develop an emphasis area within their degree option. To build this emphasis area, students will choose directed electives, from related disciplines, in consultation with their academic advisor and faculty members.

Wildlife Ecology and Conservation Option

This option is designed for students interested in the research, management and conservation of wildlife and its ecosystems. This option provides considerable flexibility when designing a degree program and allows students to focus on both terrestrial and aquatic conservation management. Job opportunities are available with state and federal agencies; private land management individuals and companies; state, national and international organizations; zoos and wildlife centers; environmental consulting firms; and as private consultants. In addition, this degree program can prepare students for further graduate school studies in the wildlife and/or fisheries area. Emphasis areas in this option include:

Wildlife Ecology Emphasis

The wildlife ecology emphasis is for students interested in research and management of terrestrial animals and ecosystems, including game, non-game, and endangered species. The ability to be certified is becoming increasingly important for employment. Courses taken can go toward course certification requirements of The Wildlife Society.

Wildlife and Fisheries Management Emphasis

This emphasis is for students interested in understanding and management of both aquatic and terrestrial habitats. Courses taken can go toward course certification requirements of both the American Fisheries Society and The Wildlife Society. The ability to be certified is becoming increasingly important for employment.

Conservation Biology Emphasis

This emphasis is for students interested in conservation of the earth’s biodiversity. This emphasis allows the student to focus on various ecological environments and socio-economic aspects including urban and/or wetland conservation.

Total Semester Credit Hours

1 Students currently enrolled at Texas A&M who wish to transfer to a Wildlife and Fisheries Sciences major must have achieved a grade of C or higher in introductory biology and mathematics courses required in the University Core Curriculum. Enrollment in Wildlife and Fisheries Sciences (WFSC) option courses will be restricted to students who have achieved a grade of C or higher in prerequisite courses.

2 Directed electives to be chosen in areas related to wildlife management, conservation or animal behavior.

3 The Graduation requirements include a requirement for 6 hours of international and cultural diversity courses. A course satisfying a Core category, a college/department requirement, or a free elective can be used to satisfy this requirement.

Students are required to make a C or better in all WFSC and RENR 205/REN 215 courses.

A total of 120 semester hours will be required for a BS degree.

Wildlife and Fisheries Sciences - Minor

The Department of Wildlife and Fisheries Sciences offers an 18-hour minor in Wildlife and Fisheries Sciences as a supplement to other related majors. The minor includes three required courses as well as three additional courses that students can choose from which include courses centered on wildlife management, fisheries management, habitat management, and differences among the different types of wildlife. Students will get an exposure to both terrestrial and aquatic wildlife and habitats. BIOL 111 and BIOL 112 as well as RENR 205 are required prerequisites for several of these courses.

Students must choose at least one terrestrial and one aquatic course.
COLLEGE OF ARCHITECTURE

Administrative Officers
Dean - Jorge A. Vanegas, Ph.D.
Executive Associate Dean - Dawn Jourdan, Ph.D.
Associate Dean for Outreach and Diversity - Cecilia Guisti, Ph.D.
Associate Dean for Academic Affairs - Leslie H. Feigenbaum, M.S.
Associate Dean for International Programs - Elton Abbott, D.E.D.

General Statement
The College of Architecture offers undergraduate and graduate professional programs to prepare individuals to enter the professions of architecture, landscape architecture, construction management, urban and regional planning and visualization. The planning, design and construction of the world’s buildings, cities and landscapes involve a variety of professional skills. The faculty of architects, urban planners, landscape architects, engineers, computer scientists, constructors, lawyers, historians and artists, in collaboration with educators in the language, philosophy and culture and natural and social sciences, help students develop an understanding of the physical, social, economic and political forces that shape our environment.

Undergraduate degree programs are offered in landscape architecture, construction science, environmental design architectural studies, visualization and urban and regional planning. Minors in art and architectural history, global art, design and construction; architectural fabrication and product design; and sustainable architecture and planning are offered through the Department of Architecture. A minor in urban and regional planning is offered through the Department of Landscape Architecture and Urban Planning. Minors in facility management; and leadership in the design and construction professions are offered through the Department of Construction Science. Minors in art; and game design and development are offered through the Department of Visualization. Master’s degree programs are offered in architecture, landscape architecture, urban planning, land and property development, construction management, fine arts and visualization. Doctor of Philosophy degrees are offered in architecture and urban and regional sciences.

Personal Computers
Because of the important role of computing in the disciplines housed within the College of Architecture, all entering students are required to possess a portable, network-ready personal computer capable of running software appropriate to their academic program. Financial aid is available to assist students in their computer purchases. No student will be denied admission to Texas A&M University based on an inability to purchase a computer. Additional information is available on the College of Architecture (http://www.arch.tamu.edu) website or the Department of Visualization (http://viz.arch.tamu.edu) website for Visualization students.

Enrollment Management Policy
Students that are admitted into the College of Architecture enter with a lower level classification in Construction Science (p. 218) (COSL), Environmental Design Architectural Studies (p. 212) (EDAL), Landscape Architecture (p. 222) (LANL), Urban and Regional Planning (p. 222) or Visualization (p. 231) (VISL). All students must comply with the guidelines in terms of coursework and process to be considered for upper level. Until students are accepted into upper level they are prohibited from taking 300 and 400 level courses in their major.

Admission will be effective upon successful completion of in-progress courses. If all requirements are not met prior to the start of the following semester, admission will not be granted and registration in all upper level coursework in the College of Architecture will be cancelled. Admission is not guaranteed. If there are more qualified applicants than there is space available, preference will be given to students based on their academic achievement.

Transfer Students
Transfer students, who meet the University entrance requirements and who desire to enter a major field of study in the College of Architecture, will be admitted based on available space and current College of Architecture entrance criteria. Following admission, all transfer students are placed on a 2.5 GPR probation for a minimum of 12 credit hours to substantiate competency in required lower-level courses. Transfer students will be admitted into the college with a lower-level classification and may apply for upper-level status after at least one semester at Texas A&M University.

Transfer students accepted into the Bachelor of Environmental Design degree program must submit a portfolio to the Department of Architecture to receive credit for drawing and design studio classes taken at another university or college, unless the course is listed as an equivalent under the Texas common course numbering system. The review of the portfolio will ensure appropriate studio placement. Additional information may be found on the Department of Architecture (http://dept.arch.tamu.edu/undergraduate/prospective-students) website.

Change of Major
Students currently enrolled in another major at Texas A&M University with fewer than 60 hours who desire to change their major field of study into the College of Architecture must fill out a Change of Curriculum application. Deadlines for applications are as follows:

- March 1 for summer admittance (for Construction Science, Environmental Design Architectural Studies, Landscape Architecture, Urban and Regional Planning, Visualization and University Studies students)
- June 15 for fall admittance (for Construction Science, Environmental Design Architectural Studies, Urban and Regional Planning, Visualization and University Studies students)
- October 1 for spring admittance (for Construction Science, Urban and Regional Planning, Visualization and University Studies students)

Students will be notified of action on their applications within 30 days of the deadline date. The college will admit the best-qualified applicants based on the number of spaces available in their program of choice.

Semester Away
The College of Architecture requires all upper-level undergraduate students to spend one semester studying abroad or at another university, or in a professional internship. Specific information on these programs is available through each department or the Texas A&M Study Abroad Office.
Academic Policies

For Construction Science, Environmental Design Architectural Studies, Landscape Architecture, Urban Planning and Visualization

Majors: Students must make a grade of C or better in every College of Architecture course (ARCH, ARTS, CARC, COSC, ENDS, LAND, LDEV, URPN, VIST) used to satisfy degree requirements. Students must also make a grade of C or better in any course used as an equivalent substitution for College of Architecture courses that satisfy degree requirements. All majors within the college require student to maintain a 2.0 or better GPR; the College does not offer academic probation.

Majors

College of Architecture

- Bachelor of Science in University Studies, Global Arts, Planning, Design and Construction Concentration (p. 230)

Department of Architecture

- Bachelor of Environmental Design in Environmental Design Architectural Studies (p. 215)

Department of Construction Science

- Bachelor of Science in Construction Science (p. 220)

Department of Landscape Architecture and Urban Planning

- Bachelor of Landscape Architecture and Master of Land and Property Development, 6-Year Degree Program (p. 225)
- Bachelor of Landscape Architecture and Master of Urban Planning, 6-Year Degree Program (p. 226)
- Bachelor of Landscape Architecture in Landscape Architecture (p. 224)
- Bachelor of Science in Urban and Regional Planning (p. 227)
- Bachelor of Science in Urban and Regional Planning and Master of Land and Property Development, 5-Year Degree Program (p. 228)
- Bachelor of Science in Urban and Regional Planning and Master of Urban Planning, 5-Year Degree Program (p. 229)

Department of Visualization

- Bachelor of Science in Visualization (p. 233)

Minors

College of Architecture

- Global Culture and Society Minor (p. 212)

Department of Architecture

- Architectural Fabrication and Product Design Minor (p. 216)
- Architectural Heritage Conservation Minor (p. 216)
- Art and Architectural History Minor (p. 216)
- Global Art, Design and Construction Minor (p. 217)
- Sustainable Architecture and Planning Minor (p. 217)

Department of Construction Science

- Facility Management Minor (p. 221)
- Leadership in the Design and Construction Professions (p. 221)

Department of Landscape Architecture and Urban Planning

- Urban and Regional Planning Minor (p. 230)

Department of Visualization

- Art Minor, New Media Emphasis or Traditional Media Emphasis (p. 233)
- Game Design and Development Minor (p. 234)

Certificates

College of Architecture

- Diversity Program Certificate (p. 212)

Masters

Department of Architecture

Students must make a grade of C or better.

1 Portfolio in global culture and society. May be completed either during the long semester abroad or upon return to College Station.

2 Must be taken in a single fall or spring semester at a TAMU-affiliated facility such as Santa Chiara or Soltis Center.

Diversity - Certificate

The Diversity Certificate Program enables students to create, synthesize and integrate academic coursework, co-curricular experience, and service learning engagement to demonstrate their preparedness for participation in the modern global economy and community.

3. Students must apply to the upper level through the department. The application is to be submitted by the following date.
   • March 1 for Summer and Fall admission

4. Students applying for upper level must submit a portfolio that provides documentation of the applicant's design representation and creative problem solving ability. Portfolios will be reviewed as evidence supporting design ability. Guidelines are outlined on the application form and in the Student Services office. Students will be admitted according to available space.

**Preparation for Professional Studies in Architecture**

Although the four-year BED degree at Texas A&M University is a pre-professional degree and is not accredited by the National Architectural Accrediting Board (NAAB), those who have completed this pre-professional degree can apply to an accredited Master of Architecture program, which is offered at Texas A&M University.

In the United States, most state architectural registration boards require, as the prerequisites for licensure, a degree from a National Architectural Accrediting Board (NAAB) accredited professional degree program, the fulfillment of the National Council of Architectural Registration Board's (NCARB) Internship Development Program (IDP), and the successful completion of NCARB's Architectural Licensing Examination (ARE). The NAAB, which is the sole agency authorized to accredit U.S. professional degree programs in architecture, recognizes three types of degrees: the Bachelor of Architecture (BArch), the Master of Architecture (MArch), and the Doctor of Architecture (DArch). Students should consult the Texas A&M Master of Architecture, NAAB and NCARB websites for additional information.

**Transfer and Change of Major Students**

Transfer and change of major students (students currently enrolled in another major at Texas A&M University) who are admitted to the Department of Architecture are classified as lower level (EDAL). Transfer students who meet all the criteria for admittance to upper-level studies may immediately apply for admittance to upper level.

Transfer students who have completed at least 24 graded transferable hours, and change of major students who have completed at least 12 graded transferable hours are encouraged to participate in a 10-week summer module offered by the Department of Architecture. The summer module is designed to provide an intensive first-year design studio sequence along with support coursework that will enable change of major and transfer students to qualify for sophomore design studios the following semester. This summer module can enable Transfer and Change of Major students to complete the four-year degree in a more efficient and timely manner.

Transfer students accepted into the Bachelor of Environmental Design degree program must submit a portfolio to the Department of Architecture to receive credit for drawing and design studio classes taken at another university or college, unless the course is listed as an equivalent under the Texas common course numbering system. The review of the portfolio will ensure appropriate studio placement.

Additional information may be found on the Department of Architecture website.

**Majors**

- Bachelor of Environmental Design in Environmental Design
Architectural Studies (p. 215)
Minors

- Architectural Fabrication and Product Design Minor (p. 216)
- Architectural Heritage Conservation Minor (p. 216)
- Art and Architectural History Minor (p. 216)
- Global Art, Design and Construction Minor (p. 217)
- Sustainable Architecture and Planning Minor (p. 217)

Environmental Design Architectural Studies - BED

The degree in Environmental Design Architectural Studies requires study in the arts, humanities and sciences. The curriculum fosters creativity and problem-solving skills while providing a solid foundation in design, theory, architectural history, building and technology. Coursework encourages multidisciplinary and comparative perspectives that allow opportunities for communication and team-oriented methods of production. Global perspectives are encouraged by a mandatory semester-long study away experience that includes study abroad or internship opportunities.

Students develop skills and acquire knowledge through a studio-based experience with a variety of proposed or actual design-related projects. The studio projects place a shared emphasis on the technical and expressive content of design work; the processes by which student’s research, synthesize and document their design ideas; and the creation of tangible products that achieve a high quality of graphic and physical craft.

Total Semester Credit Hours

1 Study Away electives will be selected with approval of the Assistant Dean for International Programs & Initiatives.

2 Directed Electives are to be selected from an approved list; see the Department of Architecture Undergraduate Advisor (in Langford ARCA 219).

3 Select from any 100-499 course not used elsewhere (except MATH 100-MATH 103 (p. 885) and MATH 150).

4 Except PHYS 201.

5 Courses pertaining to solely Texas history may not comprise more than 3 hours of the American History core curriculum requirement.

All proposals for undergraduate independent study must be signed by the supervising faculty and submitted to the department for approval; forms are available from the Department of Architecture Undergraduate Advisor (in Langford ARCA 219) and on the department website.

A grade of C or better must be made in all College of Architecture courses (ARCH, ARTS, COSC, CARC, ENDS, LAND, LDEV, URPN, and VIST). Students must also make a grade of C or better in any course used as an equivalent substitution for College of Architecture courses satisfying degree requirements.
Architectural Fabrication and Product Design - Minor

The minor in Architectural Fabrication and Product Design can serve as a complement to several major fields of study and is open to all Texas A&M University undergraduates. The structure of the minor encourages students to gain a broad understanding of the terminology, history, prototyping and professional practices in Architectural Fabrication and Product Design. The minor includes six (6) credit hours of foundation coursework and nine (9) credit hours of design, theory and practice coursework.

</tbody>
</table>

¹ Eligible undergraduate students meeting prerequisite requirements may enroll in the ARCH 648.

Students must complete a minimum of 6 hours in residence at the 300-400 level.

Students applying for a minor in Architectural Heritage Conservation must have a 2.0 or better overall GPR. Some colleges and departments outside the College of Architecture may permit their students to minor.

Students must obtain a C or better in each course listed above (or in any transfer course used as an equivalent).

Art and Architecture History - Minor

The Minor in Art and Architecture History provides undergraduate students with an interdisciplinary, global, and multicultural approach to understanding visual arts and the built environment. The curriculum emphasizes an awareness of diverse global cultures and historical traditions, an appreciation of context, visual understanding, and critical thinking. The Minor in Art and Architecture History can serve as a complement to several major fields of study and is open to all Texas A&M undergraduates. The structure of the minor encourages students to gain a broad chronological understanding of art and architectural history before advancing to specialized areas of interest. Coursework includes six credit hours at the introductory level (100- and 200-level courses) and nine credit hours in specialized subjects at an advanced level (300- and 400-level courses) for a total of 15 credit hours.

The application form can be found on the Department of Architecture's website. Per university guidelines, the student's home college/department is responsible for advising students pursuing the Minor in Art and Architecture History.

1 Coordination with Bachelor of Environmental Design (BED) Degree Plan - For students pursuing the BED degree, upper level coursework for the minor may be applied to general or free electives, but may not be applied to directed electives or any other requirements for BED degree plan.  

2 Coordination with University Studies Architecture (USAR) Degree Plan - Students pursuing the University Studies Architecture degree cannot use a course in the concentration area for the Art and Architectural History Minor or the second minor, and no courses taken within the AAH Minor can count toward the concentration or the second minor. Courses that count toward University Core Curriculum can count for both the AAH minor and that specific core requirement.  

3 Students must complete a minimum of 6 hours in residence at the 300-400 level.

Global Art Design and Construction - Minor  
The Minor in Global Art, Design and Construction is designed for students in the College of Architecture and other colleges to officially record they have taken courses in an international environment.

1. At least three of the nine hours must be at the 300-400 level. Six of the nine hours may be in coursework taken outside of the College of Architecture.
2. BED majors may not use directed electives to satisfy both the minor and graduation requirements. USAR majors may not use coursework to satisfy both the minor and the concentration area.
3. Students must complete a minimum of 6 hours in residence at the 300-400 level.

Students must make a grade of "C" or better in all courses.

**Department of Construction Science**

The construction industry is the largest industry in the nation with more than 7.7 million employees who annually produce more than 5 percent of the nation’s Gross Domestic Product. Managing the construction process requires a broad understanding of the principles of construction science as well as leadership skills in motivating teams and integrating a wide range of tasks to produce a completed project.

The primary mission of the Department of Construction Science is to prepare students for successful careers and future leadership roles in construction and construction-related industries. The program integrates principles of architecture, technology, engineering, business and project management preparing students to effectively manage the total construction process. Courses taught by the Department include construction materials and methods, fundamental design courses in soils and foundations, mechanical and electrical systems and structures, project control systems and management, construction law, labor and contracts, and industry emphasis courses. In addition, related courses from other colleges are included to ensure a broad base of knowledge in business, engineering and construction fundamentals.

**Enrollment in Construction Science Program**

1. Students must have satisfactorily completed at least 54 hours of coursework with a minimum GPR of 2.5 for those courses completed at Texas A&M University.
2. Students must satisfactorily complete the following courses as part of the 54 hours of coursework with a minimum of a 2.5 GPR to be considered to upper level:

Majors
• Bachelor of Science in Construction Science (p. 220)

Minors
• Facility Management Minor (p. 221)
• Leadership in the Design and Construction Professions Minor (p. 221)

Construction Science - BS

The Construction Science Program is accredited by the American Council for Construction Education. Strong ties are maintained with the construction industry via the Construction Industry Advisory Council, an organization of construction and construction-related companies and individuals committed to supporting the Construction Science Program at Texas A&M University.

Because of the important role of computing in the disciplines housed within the College of Architecture, all entering students are required to possess a portable, network-ready personal computer capable of running software appropriate to their academic program. Financial aid is available to assist students in their computer purchases. No student will be denied admission to Texas A&M University based on an inability to purchase a computer. Additional information is available on the College of Architecture website.

In addition to the academic coursework, each student is required to accomplish an approved internship of full-time practical work experience with a contractor, or in a construction-related work activity. For more information, please visit the Department of Construction Science website.

College of Architecture students can apply no more than six hours of coursework toward both the Facility Management Minor and their degree requirements.

At least two courses must be taken outside of the major area of study.

Must make a grade of C or better.

**Leadership in the Design and Construction Professions - Minor**

The Department of Construction Science offers a minor in Leadership in the Design and Construction Professions. This minor will enhance the leadership skills of students by educating them about different leadership techniques and skills that will help them grow personally in order to become effective leaders in the design and construction industries.

### Enrollment in Landscape Architecture and Urban and Regional Planning Programs

1. Students must have satisfactorily completed at least 54 hours of coursework with a minimum GPR of 2.5 for those courses completed at Texas A&M University to apply for upper level.

2. Students must satisfactorily complete the courses listed below as part of the 54 hours of coursework with a minimum of a 2.5 GPR to be considered to upper level.

3. Student must apply to the upper level through the department. The application is to be submitted the semester or summer session in which all of the above criteria are met.

   - March 1 for Summer admission
   - June 15 for Fall admission
   - October 1 for Spring admission

224
• Bachelor of Landscape Architecture and Master of Urban Planning, 6-Year Degree Program (p. 226)
• Bachelor of Landscape Architecture in Landscape Architecture (p. 224)
• Bachelor of Science in Urban and Regional Planning (p. 227)
• Bachelor of Science in Urban and Regional Planning and Master of Land and Property Development, 5-Year Degree Program (p. 228)
• Bachelor of Science in Urban and Regional Planning and Master of Urban Planning, 5-Year Degree Program (p. 229)

Minors
• Urban and Regional Planning Minor (p. 230)

Landscape Architecture - BLA
The mission of the Bachelor of Landscape Architecture (BLA) program is to prepare students to become professional landscape architects in the private and public sectors of practice. We foster a learning environment of creativity and critical analysis that uses evidence-based design principles as its core. This approach builds upon the knowledge of natural and built environments and how humans interact within various cultural settings. Our BLA graduates use this knowledge to produce spatial solutions at multiple scales from site design to land use planning. This creative process aims to advance human health, and social, economic and environmental sustainability. The program strives to produce graduates motivated to be life-long learners capable of working independently and leading interdisciplinary teams in the field of landscape architecture.

Graduates from the BLA program are prepared for employment with private practice firms in landscape architecture, engineering, architecture, or planning, and with federal, state, or local government agencies. Upon graduation and with additional two-year practical experience students are qualified to pursue licensure in the profession or post graduate education in landscape architecture or a related field.

Because of the important role of computing in the disciplines housed within the College of Architecture, all entering students are required to possess a portable, network-ready personal computer capable of running software appropriate to their academic program. Financial aid is available to assist students in their computer purchases. No student will be denied admission to Texas A&M University based on an inability to purchase a computer. Additional information is available on the Department of Landscape Architecture and Urban Planning website.

*Any approved university core curriculum history course

1. Any approved university core curriculum history course
2. This course will be selected in consultation with the student’s advisor.
3. URPN 320 or URPN 325 or approval of BLA Program Coordinator
4. Semester Away: May be satisfied by study abroad, at another university, internship, or special arrangement by advisor or instructor. Electives may be taken during summer, online, distance education, at another university or college, or at a study abroad university.
5. Study abroad course.
6. If electing to study abroad, must take CARC 311 for PHIL 314 and CARC 331 as an elective.

A grade of C or better is required in College of Architecture courses (CARC, COSC, ENDS, ARCH, URPN, LAND, VIST, ARTS) to satisfy Landscape Architecture degree requirements.

Any student wishing to change majors into the Landscape Architecture program must have less than 60 total hours, including all transfer hours.
**Overview**

1. A grade of B or better is required in graduate level courses
2. To be selected in consultation with student’s advisory committee.

A grade of C or better is required in College of Architecture undergraduate courses (CARC, COSC, ENDS, ARCH, URPN, LAND, VIST, ARTS) to satisfy Landscape Architecture degree requirements.
The Bachelor of Science in Urban and Regional Planning degree program is based in the Department of Landscape Architecture and Urban Planning (LAUP) within the College of Architecture at Texas A&M University. The Urban and Regional Planning program equips students for entry-level positions in planning allied fields and prepares them for graduate studies in fields such as Urban Planning and Land Development. The core curriculum, designed to equip students with knowledge and skills to deal effectively with the opportunities and challenges inherent in the development, growth and culture of neighborhoods, cities, and regions, is based on theoretical training in the natural, physical, and social sciences. Students acquire skills that enable them to apply these theories to develop communities, cities, and regions which are safe, healthy, and sustainable.

Critical thinking and analytical skills are emphasized for problem-solving at the community and regional scale. Classroom service-learning experiences enable graduates to more reliably and realistically assess complex community problems, design solutions for overcoming those problems, and evaluate the outcomes of programs and policies in meeting community and regional needs.

Program Requirements

First Year
Fall
- ENGL 104 Composition and Rhetoric 3
- LAND 101 Introduction to Landscape Architectural Practice 1
- MATH 141 Finite Mathematics 3
- POLS 206 American National Government 3
- URPN 201 The Evolving City 3
- American history (p. 25) 3

Semester Credit Hours 18

Spring
- LAND 494 Internship 6
- or CARC 301 Field Studies in Design Innovation 6
- General Elective 6

Semester Credit Hours 12

Second Year
Fall
- ENGL 301 3
- HORT 306 Trees and Shrubs for Sustainable Built Environments 3
- LAND 318 4
- LAND 329 3
- General Elective 3

Semester Credit Hours 16

Spring
- GEOL 320 Geology for Civil Engineers 3
- HORT 308 Plants for Sustainable Landscapes 3
- LAND 319 4
- LAND 330 3
- LAND 340 3

Semester Credit Hours 16

Third Year
Fall
- ENGL 301 3
- HORT 306 Trees and Shrubs for Sustainable Built Environments 3
- LAND 318 4
- LAND 329 3
- General Elective 3

Semester Credit Hours 16

Spring
- GEOL 320 Geology for Civil Engineers 3
- HORT 308 Plants for Sustainable Landscapes 3
- LAND 319 4
- LAND 330 3
- LAND 340 3

1. A grade of B or better is required for graduate level courses.
2. To be selected in consultation with student's advisory committee.

A grade of C or better is required in all courses to satisfy Urban and Regional Planning degree requirements.
Urban and Regional Planning - Minor

By pursuing a minor in urban planning at Texas A&M, students will earn an education within a multi-disciplinary atmosphere where analytical skills and critical thinking are harvested. Students will then apply this acquired knowledge to address real-world issues which communities and regions face on a daily basis. Those earning a minor in urban planning can effectively solve problems related to a number of complex issues involving the built and natural environment, transportation, health, economic development, among others.

The minor in urban planning program will provide a solid educational basis for those students wishing to pursue a post-graduate education within the planning field. Also, because of its broad scope, the minor program may serve as an effective introduction to graduate studies in other social science disciplines such as economics, geography, political science, and public policy.

The minor program will prepare students for entry-level positions in a variety of fields including state and local government; advocacy, grant-making and civic organizations; real estate management; environmental science; social assistance services; and health care services.

University Studies Programs

The College of Architecture offers a degree in University Studies. A University Studies degree differs from a traditional “major” in that it consists of a concentration and two minors of 15-18 hours each. The University Studies degree format was created to provide students the flexibility to combine areas of study that are of special interest.

Majors

- Bachelor of Science in University Studies, Global Arts, Planning, Design and Construction Concentration (p. 230)

University Studies - BS, Global Arts, Planning, Design and Construction Concentration

The Global Arts, Planning Design and Construction concentration is an interdisciplinary course of study that integrates multiple aspects of the built environment. The course offerings are from all of the professional undergraduate programs within the College of Architecture and are intended to give students an understanding of the interplay of professions that are required to work as a team in order to successfully complete built environment projects. These foundation courses are coupled with a required study abroad experience. All students in the College of Architecture are required to participate in a semester away experience that serves to expand the context of their education. The benefit of this experience is integrated into the concentration at a smaller scale.

General Electives  17-23
Minor 1  15-18
Minor 2  15-18

Total Semester Credit Hours  120

A 2.0 GPA is required in all major field of study courses.

Two writing-intensive courses are required.

Two courses must meet the International and Cultural Diversity (p. 40) requirement, however, BUSN 289 cannot be used.

Department of Visualization
Visualization is the study of the art and science used in the creation of traditional and digital visual communication. The Bachelor of Science in Visualization is a studio based program requiring completion of 120 credit hours including areas of traditional art, programming, history and theory as well as digital media. The degree prepares students for the artistic and technical demands facing digital content creators in a variety of visually oriented professions including interactive media, information technology, education, entertainment, and independent practice.

Enrollment in the Visualization Program
Students enrolled in the Bachelor of Science in Visualization (VISL) program will be granted automatic admission to the Sophomore level art and visualization courses by obtaining a 3.6 GPR in category A courses and a 3.0 GPR in category B courses and completing 27 semester credit hours during the first two semesters in the Visualization Program (VISL).

If AP or Dual Credit courses are available as substitutions in any of the above courses, sequential or other art/visualization/math/science courses taken at Texas A&M University will be used to calculate the respective GPRs. For change of major and transfer students, equivalent transferable courses may be substituted for any of the above courses. In this case, courses taken at Texas A&M University in the same program area will be specified and used to calculate the respective GPRs.

Students not automatically admitted will be allowed on a space available basis into sophomore level art and visualization courses based on a ranking of the combined GPR of the Category A and Category B courses. An optional 500 word essay may be submitted to explain extenuating circumstances related to the 1st year academic experience and provide justification why the student should be allowed to take sophomore level courses. The essay may be used to adjust the overall student ranking.

Transfer and Change of Major Students
Transfer and change of major students (students currently enrolled in another major at Texas A&M University) who are admitted to the Department of Visualization are classified as lower level (VISL).

Majors

- Bachelor of Science in Visualization (p. 233)
Minors

- Art Minor (p. 233)
- Game Design and Development Minor (p. 234)

Visualization - BS

The mission of the Bachelor of Science in Visualization program is to engage and develop the student’s visual, intuitive and analytical capabilities through the scientific and aesthetic issues surrounding the use of technology in visual communication. To fulfill its mission, the program requires both a creative spirit and the technical understanding to adapt to the changing demands of the visual industries served by the departmental programs.

The curriculum integrates elements of fine arts, three-dimensional design, scientific inquiry and digital technology to provide a broad, wide-ranging educational experience. The core of the program is the studio experience, which explores the relationship between theory and practice through a variety of exercises and projects using traditional and electronic media. A variety of directed electives allows the student to gain an in-depth understanding in an area of specialization.

Graduates of the program are prepared to be technically adept artists, designers and/or tool-makers capable of utilizing interactive and directed media. Employment may be found in such fields as graphic and web design, the entertainment industry (game design and development, animation and visual effects), as well as fields such as architectural presentation, modeling and simulation, and other fields where visualization contributes to understanding. Alternatively, graduates may enter graduate programs that emphasize digital media in either computer science or art/design. Two such programs, the Master of Science (MS) in Visualization and the Master of Fine Arts (MFA) in Visualization, are offered by the Department of Visualization at Texas A&M University.

1. Select from any 300-499 course not used elsewhere. If you do not participate in study abroad, 3 hours will come from ICD.

A grade of C or better must be made in all College of Architecture courses (ARCH, ARTS, CARC, COSC, ENDS, LAND, LDEV, VIST, URPN and VIZA). Students must also make a grade of C or better in any course used as an equivalent substitution for College of Architecture courses that satisfy degree requirements.

Art - Minor

Students pursuing other majors may minor in Art by taking a minimum of 18 hours. There are two emphases within the minor, traditional media and new media. A minimum of six hours of 300-400 level courses is required.

Students must have a minimum cumulative GPR of 3.00 and must maintain a “C” average or better in all courses completed as part of the minor in Art. The student’s home college/department may grant, with agreement from the Department of Visualization, transfer credit of no more than six credit hours. Transfer credit will not be accepted for any 300- or 400-level course. Credit for study abroad (CARC) courses may not be applied to the minor in Art if an on-campus course containing similar content is offered.

A grade of ‘C’ or better is required for all courses used towards the minor. Per University guidelines, the student’s home college/department is responsible for advising students pursuing a minor in Art.

**Game Design and Development - Minor**

The Minor in Game Design and Development offers students the opportunity to develop the knowledge and skills associated with the aesthetic and technical aspects of game creation. The minor consists of 16 credit hours, 10 credit hours are required courses and six are from a prescribed menu of courses. The minor provides a foundation in the principles of game design and software development. Students develop core competencies, collaborate on the design and development of game projects, and engage in authentic, situated creative problem-solving to broaden their horizons as interdisciplinary team members.

Total Semester Credit Hours 16

1. CSCE majors must take this course instead of CSCE 110 and CSCE 111.

Minimum GPA of 3.2 for admittance into the minor.

A grade of 'C' or better is required for all courses used towards the minor.

Minimum of 6 hours of 300- or 400-level courses are required.

Students must make a grade of "C" or better in all courses.
MAYS BUSINESS SCHOOL

Administrative Officers
Dean - Eli Jones, Ph.D.
Associate Dean - Martha L. Loudder, Ph.D.
Director of Academic Services - Peter K. Drysdale, M.S.

General Statement
A goal of Mays Business School is to help develop students to become effective managers, concerned citizens and life-long learners. Through challenging academic and enrichment programs, the business school provides students with numerous opportunities for intellectual, leadership and personal development.

In support of this student development goal, the curriculum in business has a dual emphasis—a broad-based education in the foundation disciplines of the liberal arts and the sciences, and a focused development of business knowledge and behavioral skills.

The program of study in business provides students a background in the basic academic areas—mathematics; language, philosophy and culture; life and physical, social and behavioral sciences; and, rhetoric and composition. Students simultaneously pursue introductory coursework in accounting, economics, business information systems and the legal environment of business. This broad educational foundation provides an enriching dimension to the university experience that cannot be attained in a more limited course of study.

Upon successful completion of this broad-based coursework, the student will begin to focus on a major field of study and a full range of business courses. The major field—chosen from the fields of accounting, finance, management, management information systems, marketing, and supply chain management—is designed to prepare students for an entry-level organizational position as well as subsequent career development. Each major has a set of required courses, as well as electives, from which students may gain additional depth in the chosen area. Students admitted to Mays Business Honors pursue an interdepartmental degree in business honors.

This combination of a broad educational foundation and more specialized study produces graduates uniquely qualified to deal with the rapidly changing and diverse global economy.

Requirements for Graduation
Requirements for graduation are listed in the Texas A&M University Student Rules and this catalog.

With the exception of general elective requirements, courses taken to satisfy degree requirements must be taken for letter grades.

In addition, students in Mays Business School must have a GPR of 2.0 in the courses included in the Core Business Knowledge. Undergraduate business students must take two writing-designated (W) business courses. The requirement may be met by taking two writing (W) business courses or one W business course and one oral communication (C) business course. These W and C courses are major specific and are taken as part of the student’s upper-level coursework. See an academic advisor for additional information.

Transfer of Credits
Acceptance of transfer of credit for business courses will generally be limited to those courses taught in the freshman and sophomore years at this institution. Transfer credit is not offered for upper-level business courses.

Credit by Examination
Undergraduate students may receive credit for certain courses required in undergraduate business curricula by successfully completing Advanced Placement (AP), College Level Exam Program (CLEP) and departmental credit by exam. Students should contact the Undergraduate Advising Office (Room 238, Wehner Building) for information. Information concerning AP, CLEP and departmental credit by examination may be obtained from the Data and Research Services (http://dars.tamu.edu) website or (979) 845-0532. A fee is charged for such an examination.

Students may not receive credit by examination for courses in which they are enrolled, which they have previously failed, or which are prerequisite to courses for which they already have credit.

Bachelor’s Degrees and Departments of Instruction
The academic program of Mays Business School is organized in the following majors: Accounting, Business Honors, Finance, Management, Management Information Systems, Marketing, and Supply Chain Management. Bachelor of Business Administration degrees are offered in each of these seven majors.

A Bachelor of Science in University Studies with concentration in business (USBU) is offered.

Bachelor of Business Administration
The degree of Bachelor of Business Administration is offered in these seven majors: accounting, business honors, finance, management, management information systems, marketing, and supply chain management. Each requires a minimum of 120 semester credit hours of study. The student elects one of these as a “major,” but is also required to study fundamental theory and procedure in each of the basic business functions. In addition, the student takes courses essential to a general liberal education.

The following is a representation of the curriculum requirements by major.

eligible applicants are denied postbaccalaureate admission but may be encouraged to apply, instead, to an appropriate graduate degree program.

Certificate Programs
Mays offers certificate programs for undergraduate students who want to explore a particular topic area in more depth. Most are open to all BBA majors, and some are designed for specific majors who wish to specialize in a particular area in the major field of study.

Students who pursue any of the certificate programs must complete all requirements for the specific program prior to graduation. Certificates are noted on the transcript after graduation. Information regarding certificates programs and requirements can be found in the Mays Business School Certificates section.

Mays Business School
International: Each program offers BBA degree seeking students the opportunity to study international business and other cultures to develop foundation knowledge to meet global business challenges.
  - European Union Business Certificate (p. 241)
  - International Business Studies Certificate (p. 241)
  - Latin American Business Certificate (p. 242)

Nonprofit and Social Innovation: Offers BBA degree seeking students high-impact educational opportunities that will equip them to contribute positively to nonprofit and social purpose organizations.
  - Nonprofit and Social Innovation Certificate (p. 244)

Department of Accounting
  • Energy Accounting Certificate (p. 250)
  • Internal Audit Certificate (p. 250)

Department of Finance
  • Commercial Banking Certificate (p. 253)
  • Investment Banking Certificate (p. 253)
  • Trading, Risk and Investments Certificate (p. 254)

Department of Management
  • Entrepreneurial Leadership Certificate (p. 271)

Department of Marketing
  • Advertising Strategy Certificate (p. 281)
  • Analytics and Consulting Certificate (p. 281)
  • Retail Buying and Management Certificate (p. 282)
  • Professional Selling and Sales Management Certificate (p. 282)

International and Cultural Diversity Requirement
Texas A&M University requires its students to meet an International and Cultural Diversity requirement as part of the University’s Graduation requirement. Business students meet this requirement by taking six (6) hours of coursework from an approved list of international elective courses.

In the BBA curricula the 6 hours of approved international elective coursework simultaneously fulfill the University’s International and Cultural Diversity Graduation requirement.

Business Honors - BBA

Selection through a separate application process is required to participate in Business Honors. Students apply to Business Honors as incoming freshmen or during the spring semester of their freshman year. Both are competitive selection processes. More information is available at http://mays.tamu.edu/businesshonors.

Bachelor of Business Administration

A Bachelor of Business Administration (BBA) in Business Honors is a degree available only to students admitted to Mays’ Business Honors program. The Business Honors major is designed for students whose academic excellence is matched by strong character, leadership skills, and teamwork. The Business Honors major prepares students to begin careers in all fields or to continue on to a graduate program or professional school.

Students pursuing a BBA in Business Honors must maintain a cumulative GPA of 3.5 or higher and meet other program requirements to continue in Business Honors. Students are required to complete a total of 30 hours of honors coursework plus an internship for credit. Other program requirements apply.
Business Honors majors work closely with an academic advisor to identify a set of courses to meet their academic goals. They may pursue a double major in Business Honors and one of the six other BBA majors (accounting, finance, management, management information systems, marketing and supply chain management).

**Upper-level Entry Requirements and Application Procedures**

Students who meet the University and college entrance requirements enter Mays Business School in the BUAD (lower-level business) classification. Enrollment of Mays Business School students in junior- and senior-level business courses is limited to those who have been admitted to upper-level (also referred to as upper division) in one of the seven majors (B.B.A.: accounting, business honors, finance, management, management information systems, marketing, and supply chain management) in the college.

The B.B.A. (accounting, business honors, finance, management, management information systems, marketing, and supply chain management) upper-level entry requirements and application procedures are as follows:

1. To be admitted to an upper-level major, a student must be admitted to Mays Business School and have:
   a. Satisfactorily completed the following five courses:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Semester Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>ACCT 229</td>
<td>Introductory Accounting</td>
<td>3</td>
</tr>
<tr>
<td>ECON 202</td>
<td>Principles of Economics</td>
<td>3</td>
</tr>
<tr>
<td>ECON 203</td>
<td>Principles of Economics</td>
<td>3</td>
</tr>
<tr>
<td>MATH 140</td>
<td>Mathematics for Business and Social Sciences</td>
<td>3</td>
</tr>
<tr>
<td>MATH 142</td>
<td>Business Calculus (or its equivalent)</td>
<td>3</td>
</tr>
</tbody>
</table>

   b. BUAD students apply for upper level no later than the last class day of the semester before they expect to enter upper level. **NOTE:** To enter upper level in the summer, all requirements must be completed BEFORE the beginning of the FIRST SUMMER SESSION.

   c. Business students must successfully complete these three remaining lower-level Core Business Knowledge (CBK) courses at Texas A&M during their first upper-level semester, unless satisfactorily completed prior to upper-level entry:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Semester Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>ACCT 230</td>
<td>Introductory Accounting</td>
<td>3</td>
</tr>
<tr>
<td>ISTM 210</td>
<td>Fundamentals of Information Systems</td>
<td>3</td>
</tr>
<tr>
<td>MGMT 211</td>
<td>Legal and Social Environment of Business</td>
<td>3</td>
</tr>
</tbody>
</table>

   d. Students are encouraged to complete the freshman and sophomore sequence of courses as listed under Curriculum in Business. BUAD students may preregister for upper-level business courses in the semester for which they have applied for upper level. However, students who fail to complete upper-level requirements shall not be permitted to remain registered in upper-level business classes.

2. **Transfer students:** Transfer students admitted to Mays Business School will be classified as BUAD (lower-level Business) students until they complete all requirements listed previously in item 1, at which time they may apply for admission to an upper-level major field of study. Transfer students may immediately apply for upper-level when admitted to Mays Business School if, and only if, they meet all upper-level requirements at that time.

3. **Change of curriculum students:** Texas A&M students who change curriculum into Mays Business School from another college or department at the University will be classified as BUAD (lower-level Business) students until they complete all requirements listed previously in item 1. Change of curriculum students who, when admitted to the business school, qualify to apply for admission to upper level may do so.

4. Preference for available seats in junior- and senior-level business courses will be given to students who have been admitted to a degree granting major in Mays Business School. All ineligible students who pre-register for upper-level business classes are subject to cancellation of their registration in these courses.

**Program Requirements**

**Lower-Level Business Program (BUAD)**

### First Year

**Fall**

- ACCT 229 Introductory Accounting 3
- ECON 202 Principles of Economics 3
- ECON 203 Principles of Economics 3
- MATH 140 Mathematics for Business and Social Sciences 3
- MATH 142 Business Calculus (or its equivalent) 3

**Spring**

- ECON 202 Principles of Economics 3
- MATH 142 Business Calculus 3
- American history (p. 25) 3
- Communication 3

**Select one of the following:**

- COMM 203 Public Speaking
- COMM 205 Communication for Technical Professions
- COMM 243 Argumentation and Debate
- ENGL 104 Composition and Rhetoric
- Life and physical sciences (p. 22) 3
- Social and behavioral sciences (p. 25) 3

**Second Year**

**Fall**

- ACCT 229 Introductory Accounting 3
- ECON 203 Principles of Economics 3
- ISTM 210 Fundamentals of Information Systems 3
- POLS 206 American National Government 3
- Communication 3
Select one of the following:

- COMM 203 Public Speaking
- COMM 205 Communication for Technical Professions
- COMM 243 Argumentation and Debate
- ENGL 104 Composition and Rhetoric

Spring

- ACCT 230 Introductory Accounting 3
- MGMT 211 Legal and Social Environment of Business 3

Total Semester Credit Hours 60

1 MATH 141, MATH 148, MATH 152, MATH 166 and MATH 172 will be accepted in lieu of MATH 140.
2 For those students under ROTC contract, see Requirement 7 of the "Requirements for a Baccalaureate Degree" (p. 27).
3 MATH 131, MATH 147, MATH 151 and MATH 171 will be accepted in lieu of MATH 142.

Management Information Systems: Students intending to major in Management Information Systems must add ISTM 250 Business Programming Logic and Design (3 credits) to sophomore year curriculum in Business (lower level). The creative arts elective or a communication elective can be taken during the junior year.

Business Honors: Students admitted to Business Honors must add (1) BUSN 125 Business Learning Community I (3 credits) to the freshman year curriculum and (2) BUSN 225 Business Competency (3 credits) to the sophomore year curriculum in Business (lower level). The creative arts elective and a communication elective can be taken during the junior year.

Finance: Students intending to major in Finance must add FINC 210 to freshman year curriculum in Business (lower level). The general elective taken in the senior year can be reduced by 1 credit.

Total Semester Credit Hours 54

1 Five of the nine Common Body of Knowledge classes listed must be taken as honors: ACCT 229, ACCT 230, FINC 341, ISTM 210, SCMT 303, SCMT 364, MGMT 211, MGMT 363, MKTG 321.
2 Elective courses are open to any course offered for University credit, except ACCT 209, ACCT 210, FINC 409, IBUS 301, ISTM 209, KINE 198, MGMT 209, MGMT 309, MKTG 409, SCMT 309. Additional restrictions may apply: see academic advisor for information. May be taken on a satisfactory/unsatisfactory basis.
3 Six hours required. A complete list of approved courses is available in the Undergraduate Advising Office, Room 238, Wehner Building. In the BBA curricula, the 6 hours of approved international elective courses simultaneously fulfill the University's International and Cultural Diversity Graduation requirement.
4 Any 300- or 400-level business course (ACCT, FINC, IBUS, ISTM, MGMT, MKTG, SCMT) except FINC 341, 409; MGMT 309, 363, 466; MKTG 321, 409; SCMT 303, 309, 364. At least one course must be designated as writing designated (W) or oral communication (C). Select in consultation with an academic advisor.
5 Must be taken as honors.

Total Program Hours 120

Business - Minor

Mays Business School offers a business minor for undergraduate non-business majors.

Students interested in pursuing a future MBA may find that when combined with appropriate statistics and economics coursework, the business minor provides a foundational knowledge in the basic aspects of business required by most MBA programs.

Students applying for a business minor must have a 2.0 or better overall GPA. Application is made in the student’s home college or major department.

Program Requirements

The minor in business consists of six specific courses chosen to develop a foundational knowledge in the basic aspects of business, including accounting, finance, management, marketing, and management information systems.
The courses listed below constitute the 18 hours required for a minor in business.

1. Course must be taken in residence at Texas A&M. No transfer courses or substitutions will be allowed.
2. Credit by exam is offered for students who have not taken ISTM 209 but can demonstrate mastery of the concepts. See dars.tamu.edu/testing.
3. MGMT 212 cannot be used to meet this requirement.

Students must earn a grade of "C" or better in each course listed above to be awarded the business minor and receive transcript recognition.

### European Union Business - Certificate

The Certificate in European Business (EUB) is designed to provide Mays Business School undergraduate students seeking a BBA degree the opportunity to gain a better understanding of European business by studying its history, politics, and business models.

The EUB requires 21 credit hours of course work that can be integrated as part of the BBA business curriculum. Also, a European Union (EU) international experience is required along with demonstration of the ability to conduct business transactions in an EU language (other than English).

1. IBUS 456 or another course that focuses specifically on conducting business in the European Union. Must have prior approval.
2. Three hours must be taken in the student’s business major.
3. Either AGE 452 or AGE 453 is required for AGBU majors.

### Approved European Union Experience

An approved international experience in an EU country: 1 month minimum. Options available include:

- Mays or university-wide reciprocal exchange program
- Mays or TAMU study abroad program or field trip.
- International internship (for IBUS 484 credit)
- Other study abroad or volunteer program (with prior approval)

### Foreign Language Competence

To determine competence in a non-English European Union language, a student must pass an oral competency exam in their desired EU language as administered by a Mays faculty member, or pass a designated proficiency exam upon completion of the European Union experience.

### International Business Studies - Certificate

The Certificate in International Business Studies (IBS) is designed to offer Mays Business School undergraduate students seeking a BBA degree the
opportunity to study international business and other cultures to develop a knowledge foundation to meet global business challenges.

The IBS requires 18 credit hours of course work that can be integrated as part of the BBA business curriculum. Also, an international experience is required. Students who pursue the IBS certificate program must complete all requirements prior to graduation.

Total Semester Credit Hours 18

1 Three hours must be taken in the student’s business major. Business courses taken through Mays and university-wide exchange may also be approved.

2 Either course is required for AGBU majors.

3 Must be the same language (e.g. SPAN 101 & SPAN 102) and taken at the university level. Credit-by-exam not allowed.

4 Non-business courses taken abroad as part of a TAMU faculty-led, semester exchange program, or through direct enrollment in a foreign institution may also be used to satisfy this requirement.

Approved International Experience
An approved international experience, one month minimum, is required. Options available include:

- Mays or university-wide reciprocal exchange program
- Mays or TAMU study abroad program or field trip
- International internship (for IBUS 484 credit)
- Other study abroad or volunteer program (with prior approval)

Latin American Business - Certificate
The Certificate in Latin American Business (LAB) is designed to provide Mays Business School undergraduate students seeking a BBA degree the opportunity to gain a better understanding of Latin American business by studying its history, politics and business models.

The LAB requires 21 credit hours of course work that can be integrated as part of the BBA business curriculum. Also, a Latin American international experience is required along with demonstration of the ability to conduct business transactions in Spanish or Portuguese.

Students who pursue the LAB certificate program must complete all requirements prior to graduation.

Foreign Language Competence

To determine competence in Spanish or Portuguese, a student must pass an oral competency exam administered by a Mays faculty member, or pass a designated proficiency exam upon completion of the Latin American experience.

Nonprofit and Social Innovation - Certificate

The Certificate in Nonprofit and Social Innovation provides students with high-impact educational opportunities that will equip them to contribute positively to nonprofit and social purpose organizations.

The certificate includes 13 hours of coursework and an internship with a social purpose organization (nonprofit or for-profit) that will enhance a student’s undergraduate education to include preparation for occupations, service roles, and graduate study.

Organizations around the world are increasingly recognizing the importance of addressing societal challenges. This certificate allows students to contribute toward the goal of advancing the world’s prosperity.

Department of Accounting

The accounting profession continues to be recognized as one of the world’s leading professions and as one offering many opportunities for a challenging career. The major challenge confronting the accounting profession today is the continuous development of accounting and information systems that can be utilized by business firms operating in an increasingly complex global environment. Within this environment, business firms and government units are generating and utilizing information at an accelerating rate.

A degree in accounting provides the opportunity for entry into a career offering a variety of different and challenging paths. Many accounting graduates are employed by public accounting firms that provide assurance, tax and other services to all types of organizations. Other accounting graduates pursue careers with business firms and financial institutions, with all levels of government and as accounting educators. All of these careers provide an opportunity to earn the Certified Public Accountant (CPA) license and to serve society by maintaining the highest levels of integrity. The program listed in the following tables for the junior and senior years leads to the Bachelor in Business Administration (BBA) degree. This degree program provides the minimum credentials necessary for entry into most accounting careers. However, the BBA degree does not meet the requirements to sit for the CPA examination in Texas.

The American Institute of Certified Public Accountants (AICPA) recognizes the need for technically competent graduates entering the accounting profession. In response to the recommendations of the AICPA, other professional accounting organizations, and many professional accounting firms, the State of Texas requires candidates for the CPA certificate to have a minimum of 150 semester hours of college coursework, including at least 36 hours of accounting courses.

As a consequence, highly motivated students are encouraged to give serious consideration to pursuing advanced studies at the graduate level to enhance their potential for a successful accounting career.

The Department of Accounting offers an integrated Professional Program that students enter during their junior year. The Professional Program offers a curriculum integrating undergraduate and graduate education. Graduates receive a BBA and a Master of Science degree (MS). This program offers opportunities for successful and motivated students to pursue academic coursework that challenges both their interests and abilities. The courses are taught by experienced faculty with superior teaching and professional credentials and are limited in class size.

The objectives of the Professional Program include developing sound conceptual, technical, analytical and communication skills that are required for success in the accounting profession. The program develops decision making and teamwork skills through extensive use of discussions and case studies. The program enables the student to select a specialization in assurance services/information management, information systems, financial management, marketing, entrepreneurship, or taxation. Each track offers the student an opportunity to participate in a professional accounting internship.

The department also offers a traditional Master’s Program (MS in Accounting) that students enter after completion of the Bachelor’s degree. For more details about the Professional Program or the Master’s Program, refer to the Texas A&M University Graduate and Professional Catalog or contact the director of the Professional Program in the Department of Accounting.

Upper-level Entry Requirements and Application Procedures

Students who meet the University and college entrance requirements enter Mays Business School in the BUAD (lower-level business) classification. Enrollment of Mays Business School students in junior- and senior-level business courses is limited to those who have been admitted to upper-level (also referred to as upper division) in one of the seven majors (B.B.A.: accounting, business honors, finance, management, management information systems, marketing, and supply chain management) in the college.

The B.B.A. (accounting, business honors, finance, management, management information systems, marketing, and supply chain management) upper-level entry requirements and application procedures are as follows:

1. To be admitted to an upper-level major, a student must be admitted to Mays Business School and have:
   a. Satisfactorily completed the following five courses:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Semester Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>ACCT 229</td>
<td>Introductory Accounting</td>
<td>3</td>
</tr>
<tr>
<td>ECON 202</td>
<td>Principles of Economics</td>
<td>3</td>
</tr>
<tr>
<td>ECON 203</td>
<td>Principles of Economics</td>
<td>3</td>
</tr>
<tr>
<td>MATH 140</td>
<td>Mathematics for Business and Social Sciences</td>
<td>3</td>
</tr>
<tr>
<td>MATH 142</td>
<td>Business Calculus (or its equivalent)</td>
<td>3</td>
</tr>
</tbody>
</table>

   b. BUAD students apply for upper level no later than the last class day of the semester before they expect to enter upper level.  
   NOTE: To enter upper level in the summer, all requirements must be completed BEFORE the beginning of the FIRST SUMMER SESSION.

   c. Business students must successfully complete these three remaining lower-level Core Business Knowledge (CBK) courses at Texas A&M during their first upper-level semester, unless satisfactorily completed prior to upper-level entry:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Semester Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>ACCT 230</td>
<td>Introductory Accounting</td>
<td>3</td>
</tr>
<tr>
<td>ISTM 210</td>
<td>Fundamentals of Information Systems</td>
<td>3</td>
</tr>
<tr>
<td>MGMT 211</td>
<td>Legal and Social Environment of Business</td>
<td>3</td>
</tr>
</tbody>
</table>

d. Students are encouraged to complete the freshman and sophomore sequence of courses as listed under Curriculum in Business. BUAD students may preregister for upper-level business courses in the semester for which they have applied for upper level. However, students who fail to complete upper-level requirements shall not be permitted to remain registered in upper-level business classes.

2. Transfer students: Transfer students admitted to Mays Business School will be classified as BUAD (lower-level Business) students
until they complete all requirements listed previously in item 1, at which time they may apply for admission to an upper-level major field of study. Transfer students may immediately apply for upper-level requirements at that time.

3. **Change of curriculum students:** Texas A&M students who change curriculum into Mays Business School from another college or department at the University will be classified as BUAD (lower-level Business) students until they complete all requirements listed previously in item 1. Change of curriculum students who, when admitted to the business school, qualify to apply for admission to upper level may do so.

4. Preference for available seats in junior- and senior-level business courses will be given to students who have been admitted to a degree granting major in Mays Business School. All ineligible students who pre-register for upper-level business classes are subject to cancellation of their registration in these courses.

### Management Information Systems

Students intending to major in Management Information Systems must add ISTM 250 Business Programming Logic and Design (3 credits) to sophomore year curriculum in Business (lower level). The creative arts elective or a communication elective can be taken during the junior year.

### Business Honors

Students admitted to Business Honors must add (1) BUSN 125 Business Learning Community I (3 credits) to the freshman year curriculum and (2) BUSN 225 Business Competency (3 credits) to the sophomore year curriculum in Business (lower level). The creative arts elective and a communication elective can be taken during the junior year.

### Finance

Students intending to major in Finance must add FINC 210 to freshman year curriculum in Business (lower-level). The general elective taken in the senior year can be reduced by 1 credit.

### Upper-Level Accounting Program

**Total Semester Credit Hours**

1 Six hours required. A complete list of approved courses is available in the Undergraduate Program Office, Room 238, Wehner Building. In the BBA curricula, the six hours of approved international elective courses simultaneously fulfill the University's International and Cultural Diversity Graduation requirement.

2 This course is an approved writing-designated (W) or oral communication (C) business course. See your academic advisor for additional information.

3 General elective courses are open to any course offered for University credit, except ACCT 209, ACCT 210, FINC 409, IBUS 301, ISTM 209, KINE 198, MGMT 209, MGMT 309, MKTG 409, SCMT 309. Additional restrictions may apply: see academic advisor for information. May be taken on a satisfactory/unsatisfactory basis.

No more than 33 hours of accounting courses may be applied toward the undergraduate degree.

See Department of Accounting advisors for more information on the requirements to sit for the CPA examination.

Professional Program students will follow the degree plan coordinated by the Professional Program office.

Professional Program students will substitute ACCT 321 to replace 2 hours of General electives.

Energy Accounting - Certificate

The Certificate in Energy Accounting offers Mays BBA undergraduate students a chance to set themselves apart and find a place in an exciting, competitive industry that provides a wide variety of opportunities – including international experiences. This program is designed to give students high impact learning experiences related to the energy industry.

All requirements for the program must be completed prior to graduation. A certificate notation will be added to the official transcript upon graduation.

---

The business enterprise must raise capital, use it to maximum advantage, and reward investors. Finance is the set of management challenges (and career opportunities) concerned with succeeding at these tasks.

The finance major involves both required and elective courses in three areas. The area of Corporate Finance encompasses tools and techniques for valuing productive assets, choosing ways of funding them, and gauging financial success. In the area of Investments, theoretical and practical models help assess risks and rewards of stocks, bonds, derivatives, and other “financial assets” (individually and in portfolios), as well as the financial health of firms and institutions offering them to the investing public. The area of Markets and Institutions explores the ways in which bankers, brokers, and other financial institutions convert savings into productive capital.

Mays finance graduates with good academic records place well in all these areas, as well as in graduate and professional schools. They work in industry, on Wall Street, in major banking and consulting firms, and as wealth managers. Accordingly, the Department of Finance emphasizes scholarship in its faculty, professionalism in its programs, and innovation in its relationships with employers and mentors.

The Department of Finance offers three certificate programs for BBA business majors. Each program is designed to complement the student’s degree by providing a concentrated course of study and participation in experiential learning opportunities or internships in the selected area.

- Trading, Risk and Investments Certificate (p. 254)

**Finance - BBA**

**Upper-level Entry Requirements and Application Procedures**

Students who meet the University and college entrance requirements enter Mays Business School in the BUAD (lower-level business) classification. Enrollment of Mays Business School students in junior- and senior-level business courses is limited to those who have been admitted to upper-level (also referred to as upper division) in one of the seven majors (B.B.A.: accounting, business honors, finance, management, management information systems, marketing, and supply chain management) in the college.

The B.B.A. (accounting, business honors, finance, management, management information systems, marketing, and supply chain management) upper-level entry requirements and application procedures are as follows:

1. To be admitted to an upper-level major, a student must be admitted to Mays Business School and have:
   a. Satisfactorily completed the following five courses:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Semester Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>ACCT 229</td>
<td>Introductory Accounting</td>
<td>3</td>
</tr>
<tr>
<td>ECON 202</td>
<td>Principles of Economics</td>
<td>3</td>
</tr>
<tr>
<td>ECON 203</td>
<td>Principles of Economics</td>
<td>3</td>
</tr>
<tr>
<td>MATH 140</td>
<td>Mathematics for Business and Social Sciences</td>
<td>3</td>
</tr>
<tr>
<td>MATH 142</td>
<td>Business Calculus (or its equivalent)</td>
<td>3</td>
</tr>
</tbody>
</table>
b. BUAD students apply for upper level no later than the last class
day of the semester before they expect to enter upper level.
NOTE: To enter upper level in the summer, all requirements must
be completed BEFORE the beginning of the FIRST SUMMER
SESSION.
c. Business students must successfully complete these three
remaining lower-level Core Business Knowledge (CBK) courses
at Texas A&M during their first upper-level semester, unless
satisfactorily completed prior to upper-level entry:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Semester Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>ACCT 230</td>
<td>Introductory Accounting</td>
<td>3</td>
</tr>
<tr>
<td>ISTM 210</td>
<td>Fundamentals of Information Systems</td>
<td>3</td>
</tr>
<tr>
<td>MGMT 211</td>
<td>Legal and Social Environment of Business</td>
<td>3</td>
</tr>
</tbody>
</table>

d. Students are encouraged to complete the freshman and
sophomore sequence of courses as listed under Curriculum
in Business. BUAD students may preregister for upper-level
business courses in the semester for which they have applied for
upper level. However, students who fail to complete upper-level
requirements shall not be permitted to remain registered in upper-level
business classes.

2. Transfer students: Transfer students admitted to Mays Business
School will be classified as BUAD (lower-level Business) students
until they complete all requirements listed previously in item 1, at
which time they may apply for admission to an upper-level major field
of study. Transfer students may immediately apply for upper-level
when admitted to Mays Business School if, and only if, they meet all
upper-level requirements at that time.

3. Change of curriculum students: Texas A&M students who change
curriculum into Mays Business School from another college or
department at the University will be classified as BUAD (lower-
level Business) students until they complete all requirements listed
previously in item 1. Change of curriculum students who, when
admitted to the business school, qualify to apply for admission to
upper level may do so.

4. Preference for available seats in junior- and senior-level business
courses will be given to students who have been admitted to a degree
granting major in Mays Business School. All ineligible students
who pre-register for upper-level business classes are subject to
cancellation of their registration in these courses.

**Total Semester Credit Hours**

1. MATH 141, MATH 148, MATH 152, MATH 166 and MATH 172 will be
accepted in lieu of MATH 140.
2. For those students under ROTC contract, see Requirement 7 of the
“Requirements for a Baccalaureate Degree” (p. 27).
3. MATH 131, MATH 147, MATH 151 and MATH 171 will be accepted in lieu of MATH 142.

**Management Information Systems**: Students intending to major in
Management Information Systems must add ISTM 250 Business
Programming Logic and Design (3 credits) to sophomore year curriculum
in Business (lower level). The creative arts elective or a communication
elective can be taken during the junior year.

**Business Honors**: Students admitted to Business Honors must add
(1) BUSN 125 Business Learning Community I (3 credits) to the freshman
year curriculum and (2) BUSN 225 Business Competency (3 credits) to
the sophomore year curriculum in Business (lower level). The creative
arts elective and a communication elective can be taken during the junior year.
Finance: Students intending to major in Finance must add FINC 210 to freshman year curriculum in Business (lower-level). The general elective taken in the senior year can be reduced by 1 credit.

1. This course is an approved writing-designated (W) or oral communication (C) business course. See your academic advisor for additional information.

2. Six hours required. A complete list of approved courses is available in the Undergraduate Advising Office, Room 238, Wehner Building. In the BBA curricula, the 6 hours of approved international elective courses simultaneously fulfill the University’s International and Cultural Diversity Graduation requirement.

3. Any 300- or 400-level finance course except FINC 341, FINC 350, FINC 409, and FINC 484.

4. Any 300- or 400-level accounting course except ACCT 315, ACCT 316, ACCT 327, and ACCT 328. Before enrolling in ACCT 489, students should consult with the finance department advisor.

5. Elective courses are open to any course offered for University credit, except ACCT 209, ACCT 210, FINC 409, IBUS 301, ISTM 209, KINE 198, MGMT 209, MGMT 309, MKTG 409, SCMT 309. Additional restrictions may apply: see academic advisor for information. May be taken on a satisfactory/unsatisfactory basis.

Commercial Banking - Certificate

The Commercial Banking Program (CBP) is designed to equip BBA-Finance students with the banking and finance skills needed to transition into banking careers and serve the personnel needs of banking organizations in the state of Texas and the United States. The program requires completion of prescribed coursework and a paid summer internship with a member bank. Business students must be U.S. citizens or permanent residents.

Students who pursue the CBP must complete all program requirements prior to graduation. A certificate notation will be added to the transcript after graduation.

Trading, Risk and Investments - Certificate

The Trading, Risk and Investments Program (TRIP) is designed to prepare BBA-Finance and BBA-Business Honors/Finance undergraduate students in the fields of trading, investments and risk management by combining exceptional class instruction with hands-on internship-based experience. Two paid internships with different board member companies are required. Business students must be U.S. citizens or permanent residents.

Students who pursue TRIP must complete all program requirements prior to graduation. A certificate notation will be added to the transcript after graduation.

Total Semester Credit Hours 20

1 BUSN 392, a 2-credit course, is repeatable and must be taken two times. This certificate program requires completion of two internships, with BUSN 392 enrollment required during each internship period. A total of 4 credits earned through BUSN 392 enrollment is required.

Department of Information and Operations Management

The Department of Information and Operations Management offers two undergraduate degrees: a BBA degree in Management Information Systems (MISY) and a BBA degree in Supply Chain Management (SCMT). In each degree program, students learn how to use technology to make businesses more efficient, effective, and competitive. Coursework includes both the technical and managerial aspects of MISY and SCMT to ensure that students are well-equipped for successful careers in the dynamic, global business environment.

A list of recommended courses for each degree is available from the Department of Information and Operations Management undergraduate advisors (Room 330, Wehner Building).

Majors

- Bachelor of Business Administration in Management Information Systems (p. 255)
- Bachelor of Business Administration in Supply Chain Management (p. 257)

Management Information Systems - BBA

The Management Information Systems major produces graduates who are both business analysts (i.e., professionals who understand accounting, marketing, finance, etc.) and information system specialists (i.e., professionals who can implement information systems strategies). Graduates of the program possess the business, technical, and leadership skills to meet the challenges presented by rapidly evolving information technology and the need to effectively incorporate this technology into business strategy and day-to-day operations.

Upper-level Entry Requirements and Application Procedures

Students who meet the University and college entrance requirements enter Mays Business School in the BUAD (lower-level business) classification. Enrollment of Mays Business School students in junior- and senior-level business courses is limited to those who have been admitted to upper-level (also referred to as upper division) in one of the seven majors (B.B.A.: accounting, business honors, finance, management, management information systems, marketing, and supply chain management) in the college.

The B.B.A. (accounting, business honors, finance, management, management information systems, marketing, and supply chain management) upper-level entry requirements and application procedures are as follows:

1. To be admitted to an upper-level major, a student must be admitted to Mays Business School and have:
   a. Satisfactorily completed the following five courses:

<table>

b. BUAD students apply for upper level no later than the last class day of the semester before they expect to enter upper level. **NOTE:** To enter upper level in the summer, all requirements must be completed BEFORE the beginning of the FIRST SUMMER SESSION.

c. Business students must successfully complete these three remaining lower-level Core Business Knowledge (CBK) courses at Texas A&M during their first upper-level semester, unless satisfactorily completed prior to upper-level entry:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Semester Credit Hours</th>

</tr>
<tr>
<td>MGMT 211</td>
<td>Legal and Social Environment of Business</td>
<td>3</td>
</tr>
</tbody>
</table>

d. Students are encouraged to complete the freshman and sophomore sequence of courses as listed under Curriculum in Business. BUAD students may preregister for upper-level business courses in the semester for which they have applied for upper level. However, students who fail to complete upper-level requirements shall not be permitted to remain registered in upper-level business classes.

2. **Transfer students:** Transfer students admitted to Mays Business School will be classified as BUAD (lower-level Business) students until they complete all requirements listed previously in item 1, at which time they may apply for admission to an upper-level major field of study. Transfer students may immediately apply for upper-level when admitted to Mays Business School if, and only if, they meet all upper-level requirements at that time.

3. **Change of curriculum students:** Texas A&M students who change curriculum into Mays Business School from another college or department at the University will be classified as BUAD (lower-level Business) students until they complete all requirements listed previously in item 1. Change of curriculum students who, when admitted to the business school, qualify to apply for admission to upper level may do so.

4. Preference for available seats in junior- and senior-level business courses will be given to students who have been admitted to a degree granting major in Mays Business School. All ineligible students who pre-register for upper-level business classes are subject to cancellation of their registration in these courses.

Supply Chain Management - BBA

The Supply Chain Management major prepares students for careers in designing and managing the activities that deliver products and services to customers. Supply chain activities add direct value to the customer and thus, are extremely valuable to firms. This major produces graduates with strong analytical and problem-solving skills and the ability to work in and coordinate team activities. Graduates possess the business, technical, and leadership skills needed to meet the challenges of the rapidly evolving global marketplace.

Upper-level Entry Requirements and Application Procedures

Students who meet the University and college entrance requirements enter Mays Business School in the BUAD (lower-level business) classification. Enrollment of Mays Business School students in junior- and senior-level business courses is limited to those who have been admitted to upper-level (also referred to as upper division) in one of the seven majors (B.B.A.: accounting, business honors, finance, management, management information systems, marketing, and supply chain management) in the college.

The B.B.A. (accounting, business honors, finance, management, management information systems, marketing, and supply chain management) upper-level entry requirements and application procedures are as follows:

1. To be admitted to an upper-level major, a student must be admitted to Mays Business School and have:
   a. Satisfactorily completed the following five courses:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credit Hours</th>

</tr>
</tbody>
</table>

b. BUAD students apply for upper level no later than the last class day of the semester before they expect to enter upper level.

NOTE: To enter upper level in the summer, all requirements must be completed BEFORE the beginning of the FIRST SUMMER SESSION.

c. Business students must successfully complete these three remaining lower-level Core Business Knowledge (CBK) courses at Texas A&M during their first upper-level semester, unless satisfactorily completed prior to upper-level entry:

1. ISTM 281 and ISTM 481 are cross-listed courses. Students must take three semesters of ISTM 281/481 for a total of three credits.
2. This course is an approved writing-designated (W) or oral communication (C) business course. See your academic advisor for additional information.
3. A complete list of approved courses is available in the Undergraduate Advising Office, 238 Wehner Building. The six required hours simultaneously fulfill the University’s International and Cultural Diversity Graduation requirement.
4. Select in consultation with a management information systems (MISY) academic advisor. A list of acceptable courses is available in the department academic advising office, 330 Wehner.
5. Elective courses are open to any course offered for University credit, except ACCT 209, ACCT 210, FINC 409, IBUS 301, ISTM 209, KINE 198, MGMT 209, MGMT 309, MKTG 409, SCMT 309. Additional restrictions may apply: see academic advisor for information. May be taken on a satisfactory/unsatisfactory basis.

### Department of Management

The BBA in Management offers a broad range of career opportunities. A management student develops the ability to plan, organize, make decisions, communicate, and lead effectively in a variety of work settings. Written and verbal communication, teamwork, and problem solving are emphasized.

Management majors pursue a specialization, also called directed elective track, that allows for a focused area of study in one of the five following areas.

- **Consulting and General Management** - This track will appeal to students interested in problem-solving and helping individuals or organizations as they maneuver the business environment, whether the student anticipates working in the consulting industry or in any managerial role.
- **Entrepreneurial Leadership** - Designed for students interested in learning the entrepreneurial process, the role of creativity in identifying and/or developing entrepreneurial opportunities, the elements of a business plan, and the leadership practices associated with successful organizations.
- **Human Resource Management** - A career in human resources allows HR professionals to engage in the strategic management of an organization’s human capital. Students in this track will learn how HR professionals develop and implement workplace policies and initiatives regarding employee recruiting, selection, compensation, training & development, performance management, career planning, and employee & labor relations.
- **Nonprofit Management** - For students seeking to invest themselves in a mission beyond profit-making and into the realm of social change for charitable, educational, religious, scientific, and other “public good” causes and organizations.
- **Pre-Law** - This track will expose students to opportunities that combine law and business, and could include careers in corporate law, international affairs, public policy, and conflict resolution, to name a few. Many students in this track will pursue a law or other advanced degree.

Combining theory and application both inside and outside the classroom allows the student to obtain the knowledge and competencies sought by and readily applied in organizations such as consulting firms, Fortune 500 companies, retail and services industries, nonprofit and charitable entities, governmental agencies, new ventures, and family businesses.

The Management major allows the student to select from a variety of jobs, organizations and industries within the student’s specialization or more broadly in management. It also provides a solid foundation for pursuing graduate studies in business, law, and a variety of other disciplines.

### Faculty

- **Barrick, Murray R**, Distinguished Professor
  - Management
  - PHD, University of Akron, 1988

- **Bierman, Leonard**, Professor
  - Management
  - MA, University of California, Los Angeles, 1980
  - JD, University of Pennsylvania School of Law, 1978

Management - BBA, Consulting/General Management Track

The BBA in Management offers five specializations, or tracks, that provide academic focus and career direction for student interests.

The Consulting and General Management track will appeal to students interested in problem-solving and helping individuals or organizations as they maneuver the business environment, whether the student anticipates working in the consulting industry or in any managerial role.

BUAD students expecting to declare their upper level major in Management with the Consulting/General Management track will meet the following requirements.

Upper-level Entry Requirements and Application Procedures

Students who meet the University and college entrance requirements enter Mays Business School in the BUAD (lower-level business) classification. Enrollment of Mays Business School students in junior- and senior-level business courses is limited to those who have been admitted to upper-level (also referred to as upper division) in one of the seven majors (B.B.A.: accounting, business honors, finance, management, management information systems, marketing, and supply chain management) in the college.

The B.B.A. (accounting, business honors, finance, management, management information systems, marketing, and supply chain management) upper-level entry requirements and application procedures are as follows:

1. To be admitted to an upper-level major, a student must be admitted to Mays Business School and have:
   a. Satisfactorily completed the following five courses:
      
      | Code | Title                              | Semester Credit Hours |
      |------|------------------------------------|-----------------------|
      | ACCT 229 | Introductory Accounting           | 3                     |
      | ECON 202 | Principles of Economics           | 3                     |
      | ECON 203 | Principles of Economics           | 3                     |
      | MATH 140 | Mathematics for Business and Social Sciences | 3                 |
      | MATH 142 | Business Calculus (or its equivalent) | 3                |

   b. BUAD students apply for upper level no later than the last class day of the semester before they expect to enter upper level. 

   NOTE: To enter upper level in the summer, all requirements must be completed BEFORE the beginning of the FIRST SUMMER SESSION.

   c. Business students must successfully complete these three remaining lower-level Core Business Knowledge (CBK) courses at Texas A&M during their first upper-level semester, unless satisfactorily completed prior to upper-level entry:

      | Code  | Title                                      | Semester Credit Hours |
      |-------|--------------------------------------------|-----------------------|
      | ACCT 230 | Introductory Accounting                   | 3                     |
      | ISTM 210 | Fundamentals of Information Systems       | 3                     |
      | MGMT 211 | Legal and Social Environment of Business  | 3                     |

   d. Students are encouraged to complete the freshman and sophomore sequence of courses as listed under Curriculum in Business. BUAD students may preregister for upper-level business courses in the semester for which they have applied for upper level. However, students who fail to complete upper-level requirements shall not be permitted to remain registered in upper-level business classes.

2. Transfer students: Transfer students admitted to Mays Business School will be classified as BUAD (lower-level Business) students until they complete all requirements listed previously in item 1, at which time they may apply for admission to an upper-level major field of study. Transfer students may immediately apply for upper-level when admitted to Mays Business School if, and only if, they meet all upper-level requirements at that time.

3. Change of curriculum students: Texas A&M students who change curriculum into Mays Business School from another college or department at the University will be classified as BUAD (lower-level Business) students until they complete all requirements listed previously in item 1. Change of curriculum students who, when
admitted to the business school, qualify to apply for admission to upper level may do so.

4. Preference for available seats in junior- and senior-level business courses will be given to students who have been admitted to a degree granting major in Mays Business School. All ineligible students who pre-register for upper-level business classes are subject to cancellation of their registration in these courses.

Semester Credit Hours 15

1 MATH 141, MATH 148, MATH 152, MATH 166 and MATH 172 will be accepted in lieu of MATH 140.
2 For those students under ROTC contract, see Requirement 7 of the “Requirements for a Baccalaureate Degree” (p. 27).
3 MATH 131, MATH 147, MATH 151 and MATH 171 will be accepted in lieu of MATH 142.
Management - BBA, Entrepreneurial Leadership Track

The BBA in Management offers five specializations, or tracks, that provide academic focus and career direction for student interests.

The Entrepreneurial Leadership track is designed for students interested in learning the entrepreneurial process, the role of creativity in identifying and/or developing entrepreneurial opportunities, the elements of a business plan, and the leadership practices associated with successful organizations.

BUAD students expecting to declare their upper level major in Management with the Entrepreneurial Leadership track will meet the following requirements.

Upper-level Entry Requirements and Application Procedures

Students who meet the University and college entrance requirements enter Mays Business School in the BUAD (lower-level business) classification. Enrollment of Mays Business School students in junior- and senior-level business courses is limited to those who have been admitted to upper-level (also referred to as upper division) in one of the seven majors (B.B.A.: accounting, business honors, finance, management, management information systems, marketing, and supply chain management) in the college.

The B.B.A. (accounting, business honors, finance, management, management information systems, marketing, and supply chain management) upper-level entry requirements and application procedures are as follows:

1. To be admitted to an upper-level major, a student must be admitted to Mays Business School and have:

1. MATH 141, MATH 148, MATH 152, MATH 166 and MATH 172 will be accepted in lieu of MATH 140.
2. For those students under ROTC contract, see Requirement 7 of the "Requirements for a Baccalaureate Degree" (p. 27).
3. MATH 131, MATH 147, MATH 151 and MATH 171 will be accepted in lieu of MATH 142.

**Management Information Systems:** Students intending to major in Management Information Systems must add ISTM 250 Business Programming Logic and Design (3 credits) to sophomore year curriculum in Business (lower level). The creative arts elective or a communication elective can be taken during the junior year.

**Business Honors:** Students admitted to Business Honors must add (1) BUSN 125 Business Learning Community I (3 credits) to the freshman year curriculum and (2) BUSN 225 Business Competency (3 credits) to the sophomore year curriculum in Business (lower level). The creative arts elective or a communication elective can be taken during the junior year.

**Finance:** Students intending to major in Finance must add FINC 210 to freshman year curriculum in Business (lower-level). The general elective taken in the senior year can be reduced by 1 credit.
Management - BBA, Nonprofit Management Track

The BBA in Management offers five specializations, or tracks, that provide academic focus and career direction for student interests.

A career in human resources allows HR professionals to engage in the strategic management of an organization’s human capital. Students in the Human Resource Management track will learn how HR professionals develop and implement workplace policies and initiatives regarding employee recruiting, selection, compensation, training & development, performance management, career planning, and employee & labor relations.

BUAD students expecting to declare their upper level major in Management with the Human Resource Management track will meet the following requirements.

Upper-level Entry Requirements and Application Procedures

Students who meet the University and college entrance requirements enter Mays Business School in the BUAD (lower-level business) classification. Enrollment of Mays Business School students in junior- and senior-level business courses is limited to those who have been admitted to upper-level (also referred to as upper division) in one of the seven majors (B.B.A.: accounting, business honors, finance, management, management information systems, marketing, and supply chain management) in the college.

The B.B.A. (accounting, business honors, finance, management, management information systems, marketing, and supply chain management) upper-level entry requirements and application procedures are as follows:

1. To be admitted to an upper-level major, a student must be admitted to Mays Business School and have:
   a. Satisfactorily completed the following five courses:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Semester Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>ACCT 229</td>
<td>Introductory Accounting</td>
<td>3</td>
</tr>
<tr>
<td>ECON 202</td>
<td>Principles of Economics</td>
<td>3</td>
</tr>
<tr>
<td>ECON 203</td>
<td>Principles of Economics</td>
<td>3</td>
</tr>
<tr>
<td>MATH 140</td>
<td>Mathematics for Business and Social Sciences</td>
<td>3</td>
</tr>
<tr>
<td>MATH 142</td>
<td>Business Calculus (or its equivalent)</td>
<td>3</td>
</tr>
</tbody>
</table>

   b. BUAD students apply for upper level no later than the last class day of the semester before they expect to enter upper level. NOTE: To enter upper level in the summer, all requirements must be completed BEFORE the beginning of the FIRST SUMMER SESSION.

   c. Business students must successfully complete these three remaining lower-level Core Business Knowledge (CBK) courses at Texas A&M during their first upper-level semester, unless satisfactorily completed prior to upper-level entry:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Semester Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>ACCT 230</td>
<td>Introductory Accounting</td>
<td>3</td>
</tr>
<tr>
<td>ISTM 210</td>
<td>Fundamentals of Information Systems</td>
<td>3</td>
</tr>
<tr>
<td>MGMT 211</td>
<td>Legal and Social Environment of Business</td>
<td>3</td>
</tr>
</tbody>
</table>

   d. Students are encouraged to complete the freshman and sophomore sequence of courses as listed under Curriculum in Business. BUAD students may preregister for upper-level business courses in the semester for which they have applied for upper level. However, students who fail to complete upper-level requirements shall not be permitted to remain registered in upper-level business classes.
2. **Transfer students**: Transfer students admitted to Mays Business School will be classified as BUAD (lower-level Business) students until they complete all requirements listed previously in item 1, at which time they may apply for admission to an upper-level major field of study. Transfer students may immediately apply for upper-level when admitted to Mays Business School if, and only if, they meet all upper-level requirements at that time.

3. **Change of curriculum students**: Texas A&M students who change curriculum into Mays Business School from another college or department at the University will be classified as BUAD (lower-level Business) students until they complete all requirements listed previously in item 1. Change of curriculum students who, when admitted to Mays Business School if, and only if, they meet all upper-level requirements at that time.

4. **Preference for available seats in junior- and senior-level business courses will be given to students who have been admitted to a degree granting major in Mays Business School. All ineligible students who pre-register for upper-level business classes are subject to cancellation of their registration in these courses.**

1. This course is an approved writing-designated (W) or oral communication (C) business course. See your academic advisor for additional information.
2. Six hours required. Management majors must take MGMT/IBUS 450 as three of these required credit hours. A complete list of approved courses is available in the Undergraduate Advising Office, 238 Wehner Building. The six required hours simultaneously fulfill the University's International and Cultural Diversity Graduation requirement.
3. Select in consultation with a management academic advisor. A list of acceptable courses is available in the department academic advising office, or in the Undergraduate Advising Office, Room 238, Wehner Building.
4. Elective courses are open to any course offered for University credit, except ACCT 209, ACCT 210, FINC 409, IBUS 301, ISTM 209, KINE 198, MGMT 209, MGMT 309, MKTG 409, SCMT 309. Additional restrictions may apply: see academic advisor for information. May be taken on a satisfactory/unsatisfactory basis.
5. Any 300- or 400-level business course (ACCT, FINC, ISTM, MKTG, SCMT) except MGMT 300-MGMT 499 (p. 895), ACCT 484, ACCT 485, FINC 341, FINC 409, FINC 484, FINC 485, IBUS 301, IBUS 450/MGMT 450, IBUS 452/MGMT 452, IBUS 453/MGMT 453, IBUS 457/MGMT 457, IBUS 484, IBUS 485, ISTM 484, ISTM 485, MKTG 321, MKTG 409, MKTG 484, MKTG 485, SCMT 303, SCMT 309, SCMT 364.
6. Select in consultation with a management academic advisor. A list of acceptable courses is available in the department academic advising office, or in the Undergraduate Advising Office, Room 238, Wehner Building.

Management - BBA, Pre-Law Track

The BBA in Management offers five specializations, or tracks, that provide academic focus and career direction for student interests.

The Pre-Law track will expose students to opportunities that combine law and business, and could include careers in corporate law, international affairs, public policy, and conflict resolution, to name a few. Many students in this track will pursue a law or other advanced degree.

BUAD students expecting to declare their upper level major in Management with the Pre-Law track will meet the following requirements.

Upper-level Entry Requirements and Application Procedures

Students who meet the University and college entrance requirements enter Mays Business School in the BUAD (lower-level business) classification. Enrollment of Mays Business School students in junior- and senior-level business courses is limited to those who have been admitted to upper-level (also referred to as upper division) in one of the seven majors (B.B.A.: accounting, business honors, finance, management, management information systems, marketing, and supply chain management) in the college.

The B.B.A. (accounting, business honors, finance, management, management information systems, marketing, and supply chain management) upper-level entry requirements and application procedures are as follows:

1. To be admitted to an upper-level major, a student must be admitted to Mays Business School and have:
   a. Satisfactorily completed the following five courses:
      | Code     | Title                                      | Semester Credit Hours |
      |----------|--------------------------------------------|-----------------------|
      | ACCT 229 | Introductory Accounting                    | 3                     |
      | ECON 202 | Principles of Economics                    | 3                     |
      | ECON 203 | Principles of Economics                    | 3                     |
      | MATH 140 | Mathematics for Business and Social Sciences| 3                     |
      | MATH 142 | Business Calculus (or its equivalent)      | 3                     |
   b. BUAD students apply for upper level no later than the last class day of the semester before they expect to enter upper level.
   NOTE: To enter upper level in the summer, all requirements must be completed BEFORE the beginning of the FIRST SUMMER SESSION.
   c. Business students must successfully complete these three remaining lower-level Core Business Knowledge (CBK) courses at Texas A&M during their first upper-level semester, unless satisfactorily completed prior to upper-level entry:
      | Code     | Title                                      | Semester Credit Hours |
      |----------|--------------------------------------------|-----------------------|
      | ACCT 230 | Introductory Accounting                    | 3                     |
      | ISTM 210 | Fundamentals of Information Systems        | 3                     |
      | MGMT 211 | Legal and Social Environment of Business   | 3                     |
   d. Students are encouraged to complete the freshman and sophomore sequence of courses as listed under Curriculum in Business. BUAD students may preregister for upper-level business courses in the semester for which they have applied for upper level. However, students who fail to complete upper-level requirements shall not be permitted to remain registered in upper-level business classes.

2. Transfer students: Transfer students admitted to Mays Business School will be classified as BUAD (lower-level Business) students until they complete all requirements listed previously in item 1, at which time they may apply for admission to an upper-level major field...
of study. Transfer students may immediately apply for upper-level when admitted to Mays Business School if, and only if, they meet all upper-level requirements at that time.

3. **Change of curriculum students**: Texas A&M students who change curriculum into Mays Business School from another college or department at the University will be classified as BUAD (lower-level Business) students until they complete all requirements listed previously in item 1. Change of curriculum students who, when admitted to the business school, qualify to apply for admission to upper level may do so.

4. Preference for available seats in junior- and senior-level business courses will be given to students who have been admitted to a degree granting major in Mays Business School. All ineligible students who pre-register for upper-level business classes are subject to cancellation of their registration in these courses.

1. MATH 141, MATH 148, MATH 152, MATH 166 and MATH 172 will be accepted in lieu of MATH 140.
2. For those students under ROTC contract, see Requirement 7 of the “Requirements for a Baccalaureate Degree” (p. 27).
3. MATH 131, MATH 147, MATH 151 and MATH 171 will be accepted in lieu of MATH 142.

**Management Information Systems**: Students intending to major in Management Information Systems must add ISTM 250 Business Programming Logic and Design (3 credits) to sophomore year curriculum in Business (lower level). The creative arts elective or a communication elective can be taken during the junior year.

**Business Honors**: Students admitted to Business Honors must add (1) BUSN 125 Business Learning Community I (3 credits) to the freshman year curriculum and (2) BUSN 225 Business Competency (3 credits) to the sophomore year curriculum in Business (lower level). The creative arts elective or a communication elective can be taken during the junior year.

**Finance**: Students intending to major in Finance must add FINC 210 to freshman year curriculum in Business (lower-level). The general elective taken in the senior year can be reduced by 1 credit.
Entrepreneurial Leadership - Certificate

The Certificate in Entrepreneurial Leadership offers Mays Business School students seeking a BBA or BS (Agribusiness) degree the opportunity to study entrepreneurship in a focused set of courses.

Designed to develop competencies needed to successfully create and manage new ventures or to be a driver of innovation within existing enterprises, emphasis is placed on leadership in three areas: conceiving, exploiting, and managing opportunities. Graduates of this program are provided with the tools to plan for new business start-ups, to become leaders in high growth firms, or to become corporate “intrapreneurs” capable of improving an organization’s ability to innovate.

Students who pursue the Certificate in Entrepreneurial Leadership must complete all program requirements prior to graduation.

• Bachelor of Business Administration in Marketing, Analytics and Consulting Track (p. 275)
• Bachelor of Business Administration in Marketing, Professional Selling and Sales Management Track (p. 277)
• Bachelor of Business Administration in Marketing, Retail Buying and Management Track (p. 279)

Certificates

• Advertising Strategy Certificate (p. 281)
• Analytics and Consulting Certificate (http://catalog.tamu.edu/undergraduate/business/marketing/analytics-consulting-certificate)
• Professional Selling and Sales Management Certificate (p. 282)
• Retail Buying and Management Certificate (p. 282)
Marketing - BBA, Advertising Strategy Track

The Department of Marketing offers students interested in advertising several opportunities for building skills specific to that career, and for networking with advertising professionals. In addition to taking advertising courses, students can attend professional conferences, participate in local, regional, and national advertising campaign competitions, and tour top advertising agencies.

The Advertising Strategy track supplements their degree by tailoring directed elective courses and building specific advertising skills. It also provides recruiters a means of identifying top students interested in advertising.

Students who complete the Advertising Strategy track are well-prepared for careers in advertising account services or brand management, or they may choose to specialize in related areas such as media planning, social and digital media, or public relations.

BUAD students expecting to declare their upper level major in Marketing with the Advertising Strategy track must meet the following requirements.

Upper-level Entry Requirements and Application Procedures

Students who meet the University and college entrance requirements enter Mays Business School in the BUAD (lower-level business) classification. Enrollment of Mays Business School students in junior- and senior-level business courses is limited to those who have been admitted to upper-level (also referred to as upper division) in one of the seven majors (B.B.A.: accounting, business honors, finance, management, management information systems, marketing, and supply chain management) in the college.

The B.B.A. (accounting, business honors, finance, management, management information systems, marketing, and supply chain management) upper-level entry requirements and application procedures are as follows:

1. To be admitted to an upper-level major, a student must be admitted to Mays Business School and have:
   a. Satisfactorily completed the following five courses:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Semester Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>ACCT 229</td>
<td>Introductory Accounting</td>
<td>3</td>
</tr>
<tr>
<td>ECON 202</td>
<td>Principles of Economics</td>
<td>3</td>
</tr>
<tr>
<td>ECON 203</td>
<td>Principles of Economics</td>
<td>3</td>
</tr>
<tr>
<td>MATH 140</td>
<td>Mathematics for Business and Social Sciences</td>
<td>3</td>
</tr>
<tr>
<td>MATH 142</td>
<td>Business Calculus (or its equivalent)</td>
<td>3</td>
</tr>
</tbody>
</table>

   b. BUAD students apply for upper level no later than the last class day of the semester before they expect to enter upper level.

   **NOTE:** To enter upper level in the summer, all requirements must be completed BEFORE the beginning of the FIRST SUMMER SESSION.

   c. Business students must successfully complete these three remaining lower-level Core Business Knowledge (CBK) courses at Texas A&M during their first upper-level semester, unless satisfactorily completed prior to upper-level entry:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Semester Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>ACCT 230</td>
<td>Introductory Accounting</td>
<td>3</td>

<td>ISTM 210</td>
<td>Fundamentals of Information Systems</td>
<td>3</td>
</tr>
<tr>
<td>MGMT 211</td>
<td>Legal and Social Environment of Business</td>
<td>3</td>
</tr>
</tbody>
</table>

d. Students are encouraged to complete the freshman and sophomore sequence of courses as listed under Curriculum in Business. BUAD students may preregister for upper-level business courses in the semester for which they have applied for upper level. However, students who fail to complete upper-level requirements shall not be permitted to remain registered in upper-level business classes.

2. **Transfer students:** Transfer students admitted to Mays Business School will be classified as BUAD (lower-level Business) students until they complete all requirements listed previously in Item 1, at which time they may apply for admission to an upper-level major field of study. Transfer students may immediately apply for upper-level when admitted to Mays Business School if, and only if, they meet all upper-level requirements at that time.

3. **Change of curriculum students:** Texas A&M students who change curriculum into Mays Business School from another college or department at the University will be classified as BUAD (lower-level Business) students until they complete all requirements listed previously in Item 1. Change of curriculum students who, when admitted to the business school, qualify to apply for admission to upper level may do so.

4. Preference for available seats in junior- and senior-level business courses will be given to students who have been admitted to a degree granting major in Mays Business School. All ineligible students who pre-register for upper-level business classes are subject to cancellation of their registration in these courses.

### Total Semester Credit Hours

60

1. MATH 141, MATH 148, MATH 152, MATH 166 and MATH 172 will be accepted in lieu of MATH 140.
2. For those students under ROTC contract, see Requirement 7 of the "Requirements for a Baccalaureate Degree" (p. 27).
3. MATH 131, MATH 147, MATH 151 and MATH 171 will be accepted in lieu of MATH 142.

### Management Information Systems: Students intending to major in Management Information Systems must add ISTM 250 Business Programming Logic and Design (3 credits) to sophomore year curriculum in Business (lower level). The creative arts elective or a communication elective can be taken during the junior year.

### Business Honors: Students admitted to Business Honors must add (1) BUSN 125 Business Learning Community I (3 credits) to the freshman year curriculum and (2) BUSN 225 Business Competency (3 credits) to the sophomore year curriculum in Business (lower level). The creative arts elective and a communication elective can be taken during the junior year.

### Finance: Students intending to major in Finance must add FINC 210 to freshman year curriculum in Business (lower-level). The general elective taken in the senior year can be reduced by 1 credit.

### Upper-Level Marketing Program

---

1. This course is an approved writing-designated (W) or oral communication (C) business course. See your academic advisor for additional information.
2. Elective courses are open to any course offered for University credit, except ACCT 209, ACCT 210, FINC 409, IBUS 301, ISTM 209, KINE 198, MGMT 209, MGMT 309, MKTG 409, SCMT 309. Additional restrictions may apply: see academic advisor for information. May be taken on a satisfactory/unsatisfactory basis.
3. Twelve hours required. Select from MKTG 345, MKTG 347, MKTG 445, MKTG 447 and MKTG 442.
4. Six hours required. A complete list of approved courses is available in the Undergraduate Advising Office, 238 Wehner Building. The six hours of approved international elective courses simultaneously fulfill the University's International and Cultural Diversity Graduation requirement.
5. Six hours required. Any MKTG course (except required MKTG courses and MKTG 409) and IBUS 401-IBUS 403 (p. 848). A maximum of 6 hours of MKTG 402/IBUS 402, MKTG 403/IBUS 403, MKTG 484, MKTG 485, BUSN 392 may be used.
Marketing - BBA, Analytics and Consulting Track

The Analytics and Consulting track complements the student’s degree and provides tangible evidence of rigorous academic and experiential preparation for a career in analytics or consulting. The curriculum emphasizes marketing analytics and marketing consulting as well as a consulting project in corporate social responsibility.

Students who complete this track can work in marketing analytics or consulting positions for marketing, information systems, or organizational structure.

BUAD students expecting to declare their upper level major in Marketing with the Analytics and Consulting track must meet the following requirements.

Upper-level Entry Requirements and Application Procedures

Students who meet the University and college entrance requirements enter Mays Business School in the BUAD (lower-level business) classification. Enrollment of Mays Business School students in junior- and senior-level business courses is limited to those who have been admitted to upper-level (also referred to as upper division) in one of the seven majors (B.B.A.: accounting, business honors, finance, management, management information systems, marketing, and supply chain management) in the college.

The B.B.A. (accounting, business honors, finance, management, management information systems, marketing, and supply chain management) upper-level entry requirements and application procedures are as follows:

1. To be admitted to an upper-level major, a student must be admitted to Mays Business School and have:
   a. Satisfactorily completed the following five courses:

<table>

Marketing - BBA, Professional Selling and Sales Management Track

Students who are looking to expand their communication and relationship building skills should consider the Professional Selling and Sales Management track. Students in this program will take four sales-related directed electives that provide real world scenarios and role-plays which help them build skills that are critical for a successful career in sales and marketing.

Upon graduating in the sales track, students will have enhanced their interpersonal communication skills in a business environment which gives them a distinct advantage in the job market regardless of the planned career path.

BUAD students expecting to declare their upper level major in Marketing with the Professional Selling and Sales Management track must meet the following requirements.

Upper-level Entry Requirements and Application Procedures

Students who meet the University and college entrance requirements enter Mays Business School in the BUAD (lower-level business) classification. Enrollment of Mays Business School students in junior- and senior-level business courses is limited to those who have been admitted to upper-level (also referred to as upper division) in one of the seven majors (B.B.A.: accounting, business honors, finance, management, management information systems, marketing, and supply chain management) in the college.

The B.B.A. (accounting, business honors, finance, management, management information systems, marketing, and supply chain management) upper-level entry requirements and application procedures are as follows:

1. To be admitted to an upper-level major, a student must be admitted to Mays Business School and have:
   a. Satisfactorily completed the following five courses:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Semester Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>ACCT 229</td>
<td>Introductory Accounting</td>
<td>3</td>
</tr>
<tr>
<td>ECON 202</td>
<td>Principles of Economics</td>
<td>3</td>
</tr>
<tr>
<td>ECON 203</td>
<td>Principles of Economics</td>
<td>3</td>
</tr>
<tr>
<td>MATH 140</td>
<td>Mathematics for Business and Social Sciences</td>
<td>3</td>
</tr>
<tr>
<td>MATH 142</td>
<td>Business Calculus (or its equivalent)</td>
<td>3</td>
</tr>
</tbody>
</table>

   b. BUAD students apply for upper level no later than the last class day of the semester before they expect to enter upper level.

   NOTE: To enter upper level in the summer, all requirements must be completed BEFORE the beginning of the FIRST SUMMER SESSION.

   c. Business students must successfully complete these three remaining lower-level Core Business Knowledge (CBK) courses at Texas A&M during their first upper-level semester, unless satisfactorily completed prior to upper-level entry:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Semester Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>ACCT 230</td>
<td>Introductory Accounting</td>
<td>3</td>
</tr>
<tr>
<td>ISTM 210</td>
<td>Fundamentals of Information Systems</td>
<td>3</td>
</tr>
<tr>
<td>MGMT 211</td>
<td>Legal and Social Environment of Business</td>
<td>3</td>
</tr>
</tbody>
</table>

d. Students are encouraged to complete the freshman and sophomore sequence of courses as listed under Curriculum in Business. BUAD students may preregister for upper-level business courses in the semester for which they have applied for upper level. However, students who fail to complete upper-level requirements shall not be permitted to remain registered in upper-level business classes.

2. Transfer students: Transfer students admitted to Mays Business School will be classified as BUAD (lower-level Business) students until they complete all requirements listed previously in item 1, at which time they may apply for admission to an upper-level major field of study. Transfer students may immediately apply for upper-level when admitted to Mays Business School if, and only if, they meet all upper-level requirements at that time.

3. Change of curriculum students: Texas A&M students who change curriculum into Mays Business School from another college or department at the University will be classified as BUAD (lower-level Business) students until they complete all requirements listed previously in item 1. Change of curriculum students who, when admitted to the business school, qualify to apply for admission to upper level may do so.

4. Preference for available seats in junior- and senior-level business courses will be given to students who have been admitted to a degree granting major in Mays Business School. All ineligible students who pre-register for upper-level business classes are subject to cancellation of their registration in these courses.

1. This course is an approved writing-designated (W) or oral communication (C) business course. See your academic advisor for additional information.
2. Elective courses are open to any course offered for University credit, except ACCT 209, ACCT 210, FINC 409, IBUS 301, ISTM 209, KINE 198, MKTG 209, MGMT 309, MKTG 409, SCMT 309. Additional restrictions may apply: see academic advisor for information. May be taken on a satisfactory/unsatisfactory basis.
3. Twelve hours required. Select from MKTG 335, MKTG 347, MKTG 489, MKTG 435 and MKTG 436.
4. Six hours required. A complete list of approved courses is available in the Undergraduate Advising Office, 238 Wehner Building. The six hours of approved international elective courses simultaneously fulfill the University's International and Cultural Diversity Graduation requirement.
5. Six hours required. Any MKTG course (except required MKTG courses and MKTG 409) and IBUS 401-IBUS 403 (p. 848). A maximum of 6 hours of MKTG 402/IBUS 402, MKTG 403/IBUS 403, MKTG 484, MKTG 485, BUSN 392 may be used.
Marketing - BBA, Retail Buying and Management Track

The Center for Retailing Studies is a nationally known and respected center that is part of the Department of Marketing in Mays Business School at Texas A&M University. The Center is a bridge between the academic and business community, and serves students, faculty, and partner firms in a variety of ways, one of which is the Retail Buying and Management track of the BBA in Marketing.

The Retail Buying and Management track requires four retailing related directed electives. Graduates who complete this track are well equipped for exciting careers in management, merchandising, retail financial planning, and marketing. Completion of the program provides tangible evidence of commitment to and expertise in retailing.

BUAD students expecting to declare their upper level major in Marketing with the Retail Buying and Management track must meet the following requirements.

**Upper-level Entry Requirements and Application Procedures**

Students who meet the university and college entrance requirements enter Mays Business School in the BUAD (lower-level business) classification. Enrollment of Mays Business School students in junior- and senior-level business courses is limited to those who have been admitted to upper-level (also referred to as upper division) in one of the seven majors (B.B.A.: accounting, business honors, finance, management, management information systems, marketing, and supply chain management) in the college.

The B.B.A. (accounting, business honors, finance, management, management information systems, marketing, and supply chain management) upper-level entry requirements and application procedures are as follows:

1. To be admitted to an upper-level major, a student must be admitted to Mays Business School and have:
   a. Satisfactorily completed the following five courses:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Semester Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>ACCT 229</td>
<td>Introductory Accounting</td>
<td>3</td>
</tr>
<tr>
<td>ECON 202</td>
<td>Principles of Economics</td>
<td>3</td>
</tr>
<tr>
<td>ECON 203</td>
<td>Principles of Economics</td>
<td>3</td>
</tr>
<tr>
<td>MATH 140</td>
<td>Mathematics for Business and Social Sciences</td>
<td>3</td>
</tr>
<tr>
<td>MATH 142</td>
<td>Business Calculus (or its equivalent)</td>
<td>3</td>
</tr>
</tbody>
</table>

   b. BUAD students apply for upper level no later than the last class day of the semester before they expect to enter upper level.

   **NOTE:** To enter upper level in the summer, all requirements must be completed BEFORE the beginning of the FIRST SUMMER SESSION.

   c. Business students must successfully complete these three remaining lower-level Core Business Knowledge (CBK) courses at Texas A&M during their first upper-level semester, unless satisfactorily completed prior to upper-level entry:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Semester Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>ACCT 230</td>
<td>Introductory Accounting</td>
<td>3</td>
</tr>
<tr>
<td>ISTM 210</td>
<td>Fundamentals of Information Systems</td>
<td>3</td>
</tr>
<tr>
<td>MGMT 211</td>
<td>Legal and Social Environment of Business</td>
<td>3</td>
</tr>
</tbody>
</table>

   d. Students are encouraged to complete the freshman and sophomore sequence of courses as listed under Curriculum in Business. BUAD students may preregister for upper-level business courses in the semester for which they have applied for upper level. However, students who fail to complete upper-level requirements shall not be permitted to remain registered in upper-level business classes.

2. **Transfer students:** Transfer students admitted to Mays Business School will be classified as BUAD (lower-level Business) students until they complete all requirements listed previously in item 1, at which time they may apply for admission to an upper-level major field of study. Transfer students may immediately apply for upper-level admission to upper level when admitted to Mays Business School if, and only if, they meet all upper-level requirements at that time.

3. **Change of curriculum students:** Texas A&M students who change curriculum into Mays Business School from another college or department at the University will be classified as BUAD (lower-level Business) students until they complete all requirements listed previously in item 1. Change of curriculum students who, when admitted to the business school, qualify to apply for admission to upper level may do so.

4. Preference for available seats in junior- and senior-level business courses will be given to students who have been admitted to a degree granting major in Mays Business School. All ineligible students who pre-register for upper-level business classes are subject to cancellation of their registration in these courses.

**Program Requirements**

Total Semester Credit Hours: 60

1. MATH 141, MATH 148, MATH 152, MATH 166 and MATH 172 will be accepted in lieu of MATH 140.

2. For those students under ROTC contract, see Requirement 7 of the "Requirements for a Baccalaureate Degree" (p. 27).

3. MATH 131, MATH 147, MATH 151 and MATH 171 will be accepted in lieu of MATH 142.

This course is an approved writing-designated (W) or oral communication (C) business course. See your academic advisor for additional information.

Elective courses are open to any course offered for University credit, except ACCT 209, ACCT 210, FINC 409, IBUS 301, ISTM 209, KINE 198, MGMT 209, MGMT 309, MKTG 409, SCMT 309. Additional restrictions may apply: see academic advisor for information. May be taken on a satisfactory/unsatisfactory basis.

Twelve hours required. Select from MKTG 325, MKTG 326, MKTG 425, MKTG 426 and MKTG 438.

Six hours required. A complete list of approved courses is available in the Undergraduate Advising Office, 238 Weshner Building. The six hours of approved international elective courses simultaneously fulfill the University's International and Cultural Diversity Graduation requirement.

Six hours required. Any MKTG course (except required MKTG courses and MKTG 409) and IBUS 401-IBUS 403 (p. 848). A maximum of 6 hours of MKTG 402/IBUS 402, MKTG 403/IBUS 403, MKTG 484, MKTG 485, BUSN 392 may be used.
Advertising Strategy - Certificate

The Department of Marketing offers BBA undergraduate students interested in advertising several opportunities for building skills specific to that career, and for networking with advertising professionals. In addition to taking advertising courses, students can attend professional conferences, participate in local, regional, and national advertising campaign competitions, and tour top advertising agencies.

Of particular interest is the Certificate in Advertising Strategy, which supplements the BBA degree by providing an opportunity to tailor elective course offerings and build specific advertising skills. It also provides recruiters a means for identifying top students interested in advertising. Students who earn the Certificate in Advertising are well-prepared for careers in advertising account services or brand management, or they may choose to specialize in related areas such as media planning, social and digital media, or public relations.

The Certificate in Advertising requires three approved advertising related classes, an internship, and active participation in the Aggie Advertising Club. For more information, contact an academic advisor in marketing.

Students pursuing the certificate must complete all program requirements prior to graduation. A certificate notation will be added to the transcript after graduation.

Program Requirements

Requirements include 12 hours of specific coursework, with a grade of 'B' or better required in each certificate course.

<table>

- MKTG 484  Marketing Internship

Select four of the following:

- MKTG 345  Social Media and Public Relations
- MKTG 347  Advertising and Creative Marketing Communications
- MKTG 442  Innovation and Product Management
- MKTG 445  Account Planning and Research
- MKTG 447  Advanced Advertising: Case Competition

Total Semester Credit Hours: 12

1 MKTG 299 should be registered for when there is active participation in Aggie Advertising Club. This is required for a minimum of 2 semesters. Therefore, MKTG 299 must be taken a minimum of two times to receive the certificate.

Analytics and Consulting - Certificate

The Certificate in Analytics and Consulting is open to all BBA undergraduate students. The certificate program complements the student’s degree and provides tangible evidence of rigorous academic and experiential preparation for a career in analytics or consulting. Students who earn this certificate can work in marketing analytics or consulting positions for marketing, information systems, or organizational structure.

The curriculum emphasizes marketing analytics and marketing consulting as well as a consulting project in corporate social responsibility. The required internship teaches lessons the classroom cannot.

The certificate requires 12 hours of coursework, an internship, and active participation in the AMA’s student organization at Texas A&M. Through the American Marketing Association (AMA) students refine professional skills including networking, leadership, and career preparation. For more information, contact the marketing academic advisor.

Students pursuing the certificate must complete all program requirements prior to graduation. A certificate notation will be added to the transcript after graduation.

Program Requirements

Requirements include 12 hours of specific coursework, with a grade of "B" or better required in each certificate course, and have a minimum cumulative GPA of 3.0 by graduation.

- MKTG 426  Advanced Retail Case Study
Professional Selling and Sales Management - Certificate

The Certificate in Professional Selling and Sales Management is open to all BBA undergraduate students looking to expand their communication and relationship building skills. Students in this program will take four sales-related courses that provide real world scenarios and role plays to help them build skills that are critical for a successful career in sales and marketing. Through a wide range of internship opportunities with a growing number of business partners, students can apply their sales skills to actual situations. The program also gives students the opportunity to interact with and be mentored by top recruiters.

Certificate students participate in sales competitions and have significant networking opportunities. Upon completing the certificate program, students will have enhanced their interpersonal communication skills in a business environment which gives them a distinct advantage in the job market regardless of the planned career path. Graduates with a Certificate in Professional Selling and Sales Management are consistently recruited and hired by top firms in the manufacturing, technology, medical, retail and service industries.

For more information contact Andrew Loring, aloring@mays.tamu.edu, or Hannah Cole, marketing academic advisor, hcole@mays.tamu.edu.

Students pursuing the certificate must complete all program requirements prior to graduation. A certificate notation will be added to the transcript after graduation.

Program Requirements

Requirements include 12 hours of specific coursework, with a grade of ‘B’ or better required in each certificate course, and have a minimum cumulative GPA of 3.0 by graduation.

Total Semester Credit Hours 12

1 Must take MKTG 299 at least two semesters during participation in American Marketing Association. Therefore, MKTG 299 must be taken a minimum of two times to receive the certificate.

2 Also, an internship involving analytics and/or consulting is required. The internship must be for a minimum of 300 hours over 15 weeks or fewer. No more than 20% of work can be clerical or unrelated to the development of professional skills in analytics/consulting. The internship must offer meaningful, professional-level learning. The student must comply with all company regulations, health and safety conditions, and legal requirements.

Retail Buying and Management - Certificate

The Center for Retailing Studies (Center), a nationally known and respected center, is part of the Department of Marketing in Mays Business School at Texas A&M University. The Center, a bridge between the academic and business community, serves students, faculty, and partner firms in a variety of ways. Of particular interest to BBA undergraduate students is the Certificate in Retail Buying and Management, which requires four retailing related classes, an internship, and participation in the Student Retailing Association.

Graduates who earn the Certificate in Retail Buying and Management are well equipped for exciting careers in management, merchandising, retail financial planning, and marketing. Most Center partner companies hire students who have earned the certificate into executive development training programs which prepare them for the next level of career advancement.

The certificate is university-recognized, a supplement to a student’s degree, and is open to all BBA majors. Through a customized program of retailing, marketing, and related courses, and other educational experiences, students receive focused preparation for a retailing career. Completion of the program provides tangible evidence of commitment and expertise in retailing.

For more information contact Andrew Loring, aloring@mays.tamu.edu, or the Center for Retailing Studies staff in Suite 201 of the Wehner building.

Students pursuing the certificate must complete all program requirements prior to graduation. A certificate notation will be added to the transcript after graduation.
Program Requirements

Requirements include 12 hours of specific coursework, with a grade of 'B' or better required in each certificate course, and have a minimum cumulative GPA of 3.0 or better by graduation.

- MKTG 438 Strategic Digital Marketing

1 MKTG 299 should be registered for when there is active participation in the associated student organization, Student Retailing Association. This is required, for a minimum of 2 semesters.

2 Also, an internship in the retailing industry is required. The internship must be for a minimum of 300 hours over 15 weeks or fewer. No more than 20% of work can be clerical or unrelated to the development of professional skills in marketing. The internship must offer meaningful, professional-level learning in areas of sales, advertising, retailing, sports marketing, event planning, or communication. The student must comply with all company regulations, health and safety conditions, and legal requirements.

University Studies Programs

Mays Business School offers a degree in University Studies with a concentration in business.

A University Studies degree differs from a traditional major in that it consists of a concentration and two minors of 15-18 hours each. The business concentration provides a solid foundation in basic aspects of business including:

- Accounting
- Management Information Systems
- Finance
- Management
- Marketing
- Supply Chain Management

The University Studies degree format was created to provide students the flexibility to combine areas of study that are of special interest.

Majors

- Bachelor of Science in University Studies, Business Concentration (p. 283)

University Studies - BS, Business Concentration

The Bachelor of Science in University Studies is offered by Texas A&M University.

Students who earn a Bachelor of Science (BS) in University Studies are able to tailor their undergraduate coursework to align with future personal and career objectives. Specific requirements, course offerings, and restrictions exist for the University Studies-Business degree.

The University Studies-Business curriculum consists of a 24 credit hour business concentration and two minors of 15 to 18 hours each. The degree program offers a number of unique features and benefits:

- **Foundational knowledge:** The business concentration provides students with a firm grasp of the basic aspects of business including accounting, finance, management, management information systems, marketing, and supply chain management.

- **Interdisciplinary study:** Students pursue two minors that involve coursework in other Texas A&M colleges and departments. Students are encouraged to identify minors that complement the business concentration and reflect their individual interests and strengths.

- **Flexibility for the future:** Students who earn this degree find they have flexible options after graduation since they are prepared to pursue a wide range of careers and graduate programs.

Careers pursued by University Studies-Business graduates include financial advisor, account manager, marketing coordinator, sales representative, web developer, public relations specialist, consultant, and human resource specialist.

1. The student is encouraged to identify minors that complement the business concentration and reflect the student's individual interests and strengths. The two minors must be completed outside of Mays Business School.

2. Enrollment of University Studies majors in courses offered at Mays Business School is limited to the required business concentration courses plus the following courses to be used as electives: ACCT 210, BUSN 302, BUSN 403, FINC 201 and MGMT 212.
COLLEGE OF DENTISTRY

Administrative Officers
Dean - Lawrence E. Wolinsky, Ph.D., D.M.D.
Associate Dean, Academic Affairs - Paul C. Dechow, Ph.D.
Associate Dean, Research and Graduate Studies - Larry L. Bellinger, Ph.D.
Executive Director, Facilities Services and Planning - Dale A. Christensen, M.B.A.
Associate Dean, Student Affairs - Jack L. Long, D.D.S.
Associate Dean, Clinical Affairs - Stephen J. Griffin, D.D.S.
Executive Director, Communications, Institutional Advancement and Alumni Affairs - Susan Mitchell Jackson, M.A.
Associate Dean, Finance and Administration - Juanna S. Moore, C.P.A.
Executive Director, Institutional Research - Eric S. Solomon, D.D.S.

General Statement
The College of Dentistry has been a distinguished resource for dental education in Texas for more than 100 years and is dedicated to combining higher education and research with community service.

Known internationally for producing excellent clinicians, the college opened in 1905. Since then, it has graduated more than 8,000 dentists and dental hygienists. Nearly one-third of all dentists in Texas are College of Dentistry graduates. The college also graduates a large number of dental hygienists with bachelor’s degrees in the state. In addition to a doctor of dental surgery and bachelor’s degree in dental hygiene, postdoctoral certificate and degree programs are offered.

Today, the college works toward innovative treatments, leading-edge technology and better ways to deliver care. It not only ensures that Texas has qualified generations of dentists, dental hygienists and scientists, but also provides care for patients who have no other access to oral health care.

Location
The College of Dentistry is located in Dallas, Texas, adjacent to the rapidly expanding Baylor University Medical Center. The Dallas-Fort Worth metroplex is an area noted for the vigor, optimism and friendliness of its population. The ever-changing skyline reflects the continuing growth of the area.

Opportunities for educational, cultural and religious enrichment are numerous. Within a 100-mile radius of Dallas are more than 40 colleges and universities. Dallas has professional theater, opera, symphony and dance companies. Among the many museums and galleries in the area, the Dallas Museum of Art has received international acclaim for both its design and its exhibits.

For sports enthusiasts, Dallas has professional and college football, basketball, baseball, hockey and soccer teams. The metroplex annually hosts competitions in golf, tennis, bowling, soccer and running that attract many of the world’s best athletes. Numerous lakes and parks provide recreational opportunities for boating, fishing, swimming, jogging, biking and horseback riding.

Dallas is served by a variety of transportation modes, including several interstate highways, the Amtrak rail system and the Dallas Area Rapid Transit system. The Dallas/Fort Worth International Airport, with many major and feeder airline connections, is one of the busiest air terminals in the nation. Airline connections also can be made at nearby Love Field, which is a 20-minute car ride from the college.

The College of Dentistry is centrally located in the city of Dallas, about one mile east of the downtown business district. This is an area where restored historic homes and varied types of new construction create diverse neighborhoods. The Texas State Fairgrounds and the downtown arts district, with its world-class performance halls and art museum, help make this part of Dallas an exciting place to live and work. Living accommodations are located as close as one block from the campus.

Professional
College of Dentistry
• Doctor of Dental Surgery in Dentistry (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/dentistry/interdepartmental/dds)

Caruth School of Dental Hygiene
The Caruth School of Dental Hygiene is an integral part of the College of Dentistry. The dental hygiene school was equipped in 1954 through a generous gift from the Caruth Foundation of Dallas and W.W. Caruth, Jr., in honor of W.W. Caruth, Sr., a pioneer Texas philanthropist.

The first dental hygiene students were accepted in fall 1955. At that time, there was no requirement for previous college experience. In 1964, the Caruth School of Dental Hygiene established prerequisite courses prior to professional study. During the same year, the Bachelor of Science degree was offered in addition to the traditional certificate program. All
graduates since 1973 have received the degree of Bachelor of Science in Dental Hygiene. In 1997, the Master of Science degree was added.

**Purpose**
The purpose of the Caruth School of Dental Hygiene is to educate preventive oral health professionals, eligible for licensure as dental hygienists, who are capable of providing educational, clinical and therapeutic services that support total health through the promotion of optimal oral health.

**Opportunities**
The services of a dental hygienist are offered in private dental practices and clinics, public health agencies, school systems, hospitals, nursing homes and corporate health facilities. Dental hygienists also teach in dental and dental hygiene programs and participate in health research. The baccalaureate degree offered through the Caruth School of Dental Hygiene by the College of Dentistry satisfies the educational requirement for eligibility for state licensure. Graduates are provided with diverse experiences to prepare for a variety of employment settings and to pursue graduate education. A Master of Science in Education for Healthcare Professionals with a focus in dental hygiene is also offered.

**Faculty**
- Brown, Maureen D, Adjunct Assistant Professor  
  Dental Hygiene  
  BS, Baylor College of Dentistry, 2003
- Campbell, Patricia A, Professor

COLLEGE OF EDUCATION AND HUMAN DEVELOPMENT

Administrative Officers

Dean - Joyce M. Alexander, Ph.D.
Executive Associate Dean for Faculty Affairs - Mary Alfred, Ph.D.
Associate Dean for Academic Affairs and Research - George B. Cunningham, Ph.D.
Assistant Dean for Finance and Administration - Suprena Bennett
Assistant Dean for Undergraduate Academic Affairs - R. Christopher Cherry, Ph.D.

General Statement

Within Texas A&M University, the College of Education and Human Development plays a proactive role in shaping the state and national educational agenda. To this end, programs in the College of Education and Human Development attempt to:

1. develop thinking professionals whose research adds to the store of knowledge regarding teaching and learning.
2. produce exemplary teachers and administrators to serve in school systems of the state and nation, and
3. assist Texas and the nation in using up-to-date knowledge to improve educational practice in diverse settings.

In summary, the College of Education and Human Development has three key functions: research, teaching and service.

Production of knowledge is central to the College of Education and Human Development’s research role. The College of Education and Human Development supports both basic and applied research activities. Of particular interest is the effort to translate research findings into models and prescriptions that will result in substantive educational and health improvement in field settings.

In discharging its teaching function, the College of Education and Human Development seeks to prepare highly qualified professionals for a wide variety of professional settings. Teacher preparation programs are particularly committed to providing students with the ability to use sophisticated technologies in their instructional repertoires.

Service to the state and nation through teaching, supervising and assisting schools, state agencies, other institutions of higher education, and businesses and industries is a strong commitment of the College of Education and Human Development. Increasingly, these service efforts build on new knowledge generated through the College of Education and Human Development’s research activities.

The College of Education and Human Development is responsible for managing programs for the preparation of certified school personnel. Other programs in the college prepare students for specific human service roles in the private sector and within state and community agencies. College of Education and Human Development majors include interdisciplinary studies (certification) EC-6, middle school, bilingual and special education; technology management and human resource development; health (including school health education); community health; kinesiology (including physical education certification); and sport management. Students seeking middle school certification also have a choice of majoring in English (offered through the College of Liberal Arts). Students interested in any elementary, middle school or secondary certification programs are responsible for meeting with an advisor in the Department of Teaching, Learning and Culture’s Office of Undergraduate Advising. Advisors have available specific information regarding all program options.

Students seeking secondary certification in areas other than health or kinesiology must major in an academic discipline offered through the appropriate college. Professional education courses for secondary certification are offered by the College of Education and Human Development. Students interested in secondary certification must report to an advisor in the Department of Teaching, Learning and Culture’s Office of Undergraduate Advising to access additional information about the multiple routes to secondary certification at the post-baccalaureate level.

Teaching fields, specialization areas and endorsements/delivery systems may be chosen from the following:

- Agricultural Science
- Bilingual (EC-6)
- Chemistry
- Computer Science
- Early Childhood
- English Language Arts and Reading
- English as a Second Language
- Health (EC-12)
- History
- Kinesiology (EC-12)
- Languages other than English (Spanish, French, German, Latin, Chinese)
- Life Science
- Mathematics
- Middle School English/Language Arts and Reading
- Middle School Science/Mathematics
- Middle School Social Studies/English
- Language Arts and Reading
- Physical Science
- Science
- Social Studies
- Special Education
- Speech

The College of Education and Human Development carries out its mission of research, teaching and service through the following departments: Educational Administration and Human Resource Development, Educational Psychology, Health and Kinesiology, and Teaching, Learning and Culture. Other contributing entities include Agricultural Education, the Center for Mathematics, Science and Technology Education, and the Counseling and Assessment Clinic. Detailed descriptions of College of Education and Human Development departments are provided on the following pages. The College of Education and Human Development is required by Federal policy to make available the summary report of students’ scores on the TExES examination. This information is available from the Associate Dean for Academic Affairs in the College of Education and Human Development.
General Requirements for Admission to Professional Programs

The programs of study in the College of Education and Human Development are composed of two phases—the pre-professional phase and the professional phase. The pre-professional phase consists of basic University Core Curriculum requirements and introductory courses to the major field of study. The professional phase consists of advanced work in the major field of study, courses in the professional undergirding disciplines and professional studies courses.

Upon entering the College of Education and Human Development, students are assigned a general College of Education and Human Development major that tracks the pre-professional phase of their chosen program. To advance to the professional phase of the chosen program and to be accepted into the professional major, students must meet the program entry requirements and be accepted by the program faculty. Students are responsible for contacting the departmental advisors to obtain information about specific requirements for their major and program areas.

Requirements for Admission to the Professional Phase of Teacher Education Programs

The State of Texas establishes standards for teacher education programs. All certification programs at Texas A&M are in compliance with these requirements. Students must meet state, University, College of Education and Human Development and department/program requirements for matriculation into a teacher education program. Students are responsible for contacting the departmental advisors to obtain information about specific requirements for their major and program areas.

Teacher Education Retention Policy

A student, after being admitted to teacher education, who fails to continue to meet all requirements, will be dropped from the program and may not continue in or register for any professional teacher education course. Any student removed from or who discontinues student teaching because of unsatisfactory performance will be dropped from the teacher education program. A student dropped from the teacher education program may apply through their respective department for readmission to the teacher education program.

Requirements for Admission to Student Teaching

Students are responsible for contacting the departmental advisors to obtain information about specific requirements for their major and program areas.

NOTE: As several of the College of Education and Human Development's teacher education programs are undergoing change and are pending approval, the programs offered, admission to professional programs, admission to professional phase of teacher education, retention policy, and requirements for admission to student teaching are subject to change. Students should check with advisors in the appropriate departments to receive the most current policies and procedures.

Requirements for Admission to the Professional Phase of Non-Certification Programs

The following requirements must be met by students seeking admission to the professional phase of non-certification programs.

1. An approved degree plan and application for admission to the professional phase of non-certification programs.
2. Minimum GPR as stated in program requirements available from departmental advisor.
3. Satisfy the English proficiency requirement as stated in program requirements available from departmental advisor.
4. Pass the THEA, ACCUPLACER, ASSET or COMPASS test or show proof of exemption from the test with appropriate STAAR, SAT or ACT scores.
5. Have sophomore or junior classification with a minimum of 15 semester credit hours at Texas A&M, and completion of University Core Curriculum requirements applicable to the respective degree program.
6. Admission to professional phase of some programs may be competitive. See departmental advisor.
7. Students must meet departmental criteria before acceptance into an approved internship. See departmental advisor.

International and Cultural Diversity Requirement

Texas A&M University requires its students to meet an International and Cultural Diversity requirement as part of the Graduation requirements. Meeting this requirement will require the careful selection of courses. The student is directed to the Requirements for a Baccalaureate Degree (p. 27) section of this catalog for detailed information regarding this requirement and also is encouraged to seek the advice of the student’s academic advisor.

Curriculum in Agricultural Science

(Training Option)

The Agricultural Science curriculum is designed to offer the student a combination of courses in scientific agriculture and in professional education that will meet requirements for employment and advanced study in different careers in which the emphasis is on formal and informal programs of education. Such careers may include teaching agricultural science in high schools, area career and technology schools and community colleges; working as an agricultural extension agent; working as an agricultural representative for a marketing agency, an agricultural supply company or other industries related to agriculture; and serving as an agricultural development specialist in an international program.

A student majoring in agricultural science will be counseled by an advisor in the Department of Agricultural Leadership, Education, and Communications to ensure that the program developed with the student will satisfy his or her unique interests, needs and professional aspirations. A combination of courses in scientific agriculture, education and general studies provides students with a knowledge of scientific agriculture and the ability to work with and influence people. Flexibility in course selection allows a student to place emphasis on a particular field of agriculture or to prepare broadly in agricultural studies. This
flexibility might prepare a student to teach in a particular school setting, focusing upon a certain curriculum (e.g., horticulture, animal science and agricultural business).

Many aspects of the practice of agriculture are learned through experience. Enrollment in high school agricultural science and participation in FFA and/or 4-H are encouraged and recommended.

A student following this curriculum may be eligible to enter public schools as a teacher of agricultural science under the Texas Education Agency. Off-campus student teaching is required.

For further information, see the section on Agricultural Science under the Department of Agriculture and Life Sciences. The Department of Agricultural Science under the Texas Education Agency.

Classroom participation in FFA and/or 4-H are encouraged and recommended.

Department of Education and Human Development

Majors

Department of Educational Administration and Human Resource Development

- Bachelor of Science in Human Resource Development (p. 293)
- Bachelor of Science in Technology Management (p. 294)

Department of Educational Psychology

The Department of Educational Administration and Human Resource Development prepares people for many professional careers associated with the broad fields of corporate education. The Bachelor of Science
in Human Resource Development and the Bachelor of Science in Technology Management are designed to encourage students to achieve a bachelor’s degree and to enter the profession in their area of specialty. The programs prepare graduates to assume responsibility for enhancing technology, developing workplace competence and strengthening student achievement in their career paths.

Technology Management - BS

The curricula for Technology Management provide students with the content and course sequence to enter the workforce in either education, business or industry. The program stresses application in real settings as well as strong foundations in knowledge and has strong field-based components. The courses have been combined to give students a well-rounded foundation in the roles and responsibilities in education and business settings.

Semester Credit Hours 13

1 To be chosen in consultation with academic advisor, if necessary
2 Writing or Communication Intensive course requirement
3 Professional Phase.
4 Online course offered

Six hours of International and Cultural Diversity (p. 40) are required. Selection must be from courses on the approved list. Selection can be courses that also satisfy the requirement for social and behavioral sciences, creative arts, language, philosophy and culture, or electives.

Foreign Language Requirement - 2 years same foreign language in high school OR 1 full year (2 semesters) of same foreign language in college.
Human Resource Development - Minor

Human Resource Development (HRD) is the process of improving learning and performance in individual, group and organization contexts through domains of expertise such as lifelong learning, career development, training and development, and organization development. A minor in HRD allows for a wider range of potential employment and accommodation to a diverse education professional experience.

Students must submit an application for admission during the following periods:

• Summer/Fall - January 13 through March 10
• Fall Semester - May 15 through June 10
• Spring Semester - September 1 through October 10

Total Semester Credit Hours 15

Minimum required GPA to declare minor is a 2.5.
Obtain a "C" or better in each course taken towards minor
Achieve overall GPA of 2.5 in approved minor coursework.
Students must enrolled after completing 12 hours at Texas A&M and a maximum of 75 hours total.
Department of Educational Psychology

The Department of Educational Psychology offers one undergraduate non-certification degree program in University Studies with an area of concentration in Child Professional Services along with two undergraduate teacher certification programs in Bilingual Education and Special Education. Also offered are undergraduate courses designed to assist prospective educators in understanding human learning and development and to teach.

At the graduate level, the department offers the Master of Science, Master of Education and Doctor of Philosophy degrees. At the master’s level, students may emphasize educational technology; bilingual education; cognition, creativity, intelligence, and development; research, measurement and statistics; school counseling; or special education. Doctoral specializations include counseling psychology; cognition, creativity, intelligence and development; bilingual education; learning and technology; research, measurement, and statistics; school psychology; and special education.

Requirements for Admission to Professional Phase

The undergraduate curricula in the Department of Educational Psychology are composed of two phases: the pre-professional phase and the professional phase. Upon acceptance into the department, all students enter the pre-professional phase and are assigned a lower-division classification (EDIS). The pre-professional phase consists of University Core Curriculum requirements and introductory courses to the major field of study. After successful completion of these requirements, students are eligible to apply for admission into the professional phase. Cohorts in bilingual and special education are limited in number and students are admitted on a competitive basis. The application process is competitive, and meeting the minimum program prerequisites does not guarantee admission to the professional phase. If admitted to the professional phase of the program, students will be assigned an upper-level classification (INST). The professional phase consists of advanced work in the major field of study and professional development courses, with field-based experiences.

Requirements for Admission to the Professional Phase of Teacher Education Programs

The State of Texas establishes standards for teacher education programs. All certification programs at Texas A&M are in compliance with these requirements. Students must meet state, University, College of Education and Human Development and department/program requirements for matriculation into a teacher education program. Below are the requirements for the traditional certification program. Students are responsible for contacting a departmental advisor to obtain information about specific requirements for majors and program areas, as some programs have requirements beyond those listed below. University-wide requirements for admission to teacher education include the following:

1. An approved degree plan or certification and teaching field plan(s).
2. Minimum GPR of 2.75 for the special education program and 2.75 for the bilingual education program based on all coursework completed at Texas A&M University. (See departmental advisor for additional grade requirements.)
3. Completion of all required University core courses.
4. A grade of B or higher in all certification courses. (See departmental advisor for additional grade requirements).
5. Satisfaction of English proficiency requirement by:
   a. Earning a grade of B or higher in ENGL 103 or ENGL 104 (or receiving credit by exam for the course); or
   b. Earning a grade of B or higher in ENGL 210, ENGL 235 or ENGL 241; and
   c. Earning no grade below C in any course taken in (a) or (b) above.
6. Pass the THEA, ACCUPLACER, ASSET or COMPASS test or show proof of exemption from the test with appropriate STAAR, SAT or ACT scores.
7. Oral interview required for admission to upper level for Hispanic Bilingual Education.
8. Documentation of foreign language and computer literacy requirements on file in the Texas A&M University Office of Admissions.
9. Transcripts from all institutions of higher education on file in the Texas A&M University Office of Admissions.

Requirements for Admission to Student Teaching

1. Successful admission to Professional Phase of Teacher Education.
2. Complete Application for Clinical Teaching by the given deadlines for each semester.
3. Completion of all courses listed on the degree plan. All coursework must have a grade of C or better. See departmental advisor for additional grade requirements.
4. A minimum GPR of 3.0 in upper-level courses in Special Education. See departmental advisor for additional grade requirements.
5. A minimum GPR of 2.75 on all coursework completed at Texas A&M. See departmental advisor for additional grade requirements.
6. Satisfaction of Spanish proficiency requirements (Hispanic Bilingual Education ONLY).
7. In addition to #6, satisfactory performance on the written and oral Spanish proficiency component of the Hispanic Bilingual Education program admission process.

Majors

- Bachelor of Science in Interdisciplinary Studies, Bilingual Education-EC-6 (p. 298)
- Bachelor of Science in Interdisciplinary Studies, Special Education-EC-12 (p. 299)
- Bachelor of Science in University Studies, Child Professional Services Concentration (p. 300)

Minors

- Creative Studies Minor (p. 301)

Certificates

Creative Studies Certificate (p. 302)

Interdisciplinary Studies - BS, Bilingual Education EC-6

The Department of Educational Psychology offers an undergraduate degree program in Interdisciplinary Studies that includes certification in bilingual education and general elementary education, grades EC through 6. This program prepares teachers to instruct students who are served in bilingual classes at the elementary level. Students interested in certification in bilingual education should contact the EPSY undergraduate advisor in Heaton Hall.

Program Requirements

The following curriculum leads to the Bachelor of Science degree in Interdisciplinary Studies with certification in Bilingual Education, EC-6. Students are required to meet with their assigned academic advisor prior to registration each semester.

Interdisciplinary Studies - BS, Special Education EC-12

The Department of Educational Psychology offers an undergraduate degree program in Interdisciplinary Studies that includes certification in special education, EC through grade 12, within the constraints of Texas Certification and The Elementary and Secondary Education Act mandates. This program prepares teachers to instruct students who are served by special education services. Graduates will be prepared to work with students in a wide range of grade levels and settings, serving students with mild to severe disabilities. Students interested in certification in Special Education should contact the EPSY undergraduate advisor in Heaton Hall.

Program Requirements

The following curriculum leads to a Bachelor of Science degree in Interdisciplinary Studies with certification in Special Education K-12. Students are required to meet with their assigned academic advisor prior to registration each semester.

### University Studies - BS, Child Professional Services Concentration

The Department of Educational Psychology offers an undergraduate non-certification degree program in University Studies with an area of concentration in Child Professional Services. This degree is a flexible 120-hour degree program that enables a student to combine a prescribed concentration, two minors, the core curriculum and electives to create a comprehensive degree that aligns with the student’s individual professional interest. The Child Professional Services non-certification concentration requires students to complete a minor in Human Resource Development or Creative Studies and Sociology. This concentration does not allow students to seek teacher certification; however, it offers study in upper level education courses that provides a strong foundation in child and adolescent development, instructional methods, educational psychology, kinesiology, human resource development, and sociology as a means of preparing graduates for careers in civic, social or religious organizations; hospitals or non-profit organizations; or family and community services. Semester Credit Hours 12

Total Semester Credit Hours 120

1 Free elective can be chosen from any 300-400 level course of student’s choice.
2 Sociology minor elective to be selected from approved list of courses in the Department of Sociology (p. 553).

Creative Studies - Minor

The Creative Studies minor is provides knowledge and strategies to help you think more creatively within the area of your future profession. Everyone has the ability to think more creatively. Our job is to help you develop and grow your creative ability. Creativity changes the way you think about personal and professional situations.

### Creative Studies - Certificate

The Department of Educational Psychology offers a certificate in Creative Studies. This 12-credit fully online certificate is targeted to mid-career professionals desiring to improve their understanding and application of creative thinking to their personal and professional lives. The course of study will be developed in collaboration with the certificate advisor. Examples of course offerings are listed under the Creative Studies Minor. Courses cover theories of creativity, personal creativity and creative strategies such as Creative Problem Solving and Lateral Thinking.

### Department of Health and Kinesiology

The Department of Health and Kinesiology offers degrees in Health, Kinesiology, Sport Management and University Studies. Several tracks are offered for students who are interested in a career in these fields. All students majoring in the Department of Health and Kinesiology are assigned an advisor in accordance with their career choice.

The curricula in Health, Kinesiology, Sport Management and University Studies offer opportunities to obtain professional preparation for careers such as health and physical education teachers in public and private schools, coaches, sport administrators, community health educators, clinical and applied exercise physiologists, exercise scientists, recreational leaders (in non-school agencies), dance scientists, sports marketing professionals and athletic administrators. The department also provides academic preparation for students interested in allied health and medical related professional schools, e.g., physical therapy, occupational therapy, physicians’ assistant or medicine.

The Department of Health and Kinesiology offers minors in coaching, dance and sport management. The coaching and dance minors consist of 18 credit hours. The sport management minor is 15 credit hours. A list of courses and enrollment information regarding the minor may be obtained from the Advising Office in the Department of Health and Kinesiology.

In addition to undergraduate degrees, the department offers the Master of Education, Master of Science, Doctor of Education and Doctor of Philosophy degrees.

### Teacher Certification

Students majoring in either Health or Kinesiology may qualify for a Provisional Teaching Certificate after being admitted to teacher education, completing the prescribed requirements, and being recommended by the department to the Texas Education Agency through the University’s Council for Teacher Education. Completion of this degree and other academic requirements does not automatically assure that the student will be recommended for a teaching certificate. Students interested in Texas certification for a teaching career must apply for, and be admitted to, the professional phase of teacher education. See the section entitled “Requirements for Admission to the Professional Phase of Teacher Education” for additional information. Students should see an
academic advisor for specific courses. Additionally, all core curriculum courses must be completed before the student accrues 90 hours.

**Non-Teacher Certification Tracks**

Students may seek a career other than public school teaching. The department offers opportunities in allied health, community health, dance science, exercise science, motor behavior and sport management. Students are encouraged to declare career intentions early so that appropriate coursework and field experiences may be planned. Students pursuing careers other than teaching are not eligible for teacher certification. These opportunities are briefly summarized in the descriptions of each track.

Students interested in obtaining a degree must apply for, and be admitted to, the professional phase of a specific track (i.e., exercise science, sport management, community health, allied health or dance science). See the section entitled “Requirements for Admission to the Professional Phase of Non-Certification Tracks (p. 288)” for additional information.

**Departmental Advising**

Because of the wide variety of careers in Health, Kinesiology and Sport Management and the difference in course requirements for each, it is essential for students to take advantage of the advising opportunities offered by the department. Students are assigned to an academic advisor in accordance with their degree choice. Students are encouraged to declare career intentions early so appropriate coursework may be planned. All undergraduate advising matters are handled by the advisors in the department’s Advising Office. Information concerning entrance to professional schools in health-related fields is available from the Office of Professional School Advising.

Students are encouraged to become involved in professional organizations and extracurricular activities that afford opportunities for becoming involved in their respective professions.

**General Requirements for Admission to Professional Phase**

The curricula in the Department of Health and Kinesiology are composed of two phases: the pre-professional phase and the professional phase. Upon acceptance into the department, all students enter the pre-professional phase and are assigned a lower-division classification in Community Health (CHLL), Health (EDHL), Kinesiology (EDK1) or Sport Management (EDSM). The pre-professional phase consists of University Core Curriculum requirements and introductory courses to the major field of study. After successful completion of these requirements, students may be accepted into the professional phase and assigned an upper-level classification in Community Health, (CHLT), Health (HLTH), Kinesiology (KINE) or Sport Management (SPMT). The professional phase consists of advanced work in the major field of study and professional development courses. Students are not guaranteed automatic admission to the professional phase.

**Requirements for Admission to the Professional Phase of Teacher Education**

The State of Texas establishes standards for teacher education. All certification programs at Texas A&M University are in compliance with these requirements. Students must meet State, University, College of Education and Human Development and department/program requirements for matriculation into teacher education. Students are responsible for contacting the Advising Office in the Department of Health and Kinesiology to obtain information about specific requirements, which include the following.

1. Complete the following communication requirement:
   a. Physical Education: Complete both Communications electives on degree plan with a grade combination of B/C or higher.
   b. School Health: Complete ENGL 103 or ENGL 104 with at least a grade of C or higher. (If completed with the C, the COMM 203 course must be completed with at least a B, but is not required for professional phase.)

2. Complete the following courses with a grade of C or better:
   a.

1 One of the two required MATH classes on degree plan.

3. GPR requirements:
   a. Overall 2.75 on all coursework taken at any institution of higher education.
   b. Once admitted into professional phase, students must maintain a minimum GPR of 2.5 or higher in the following areas: overall at Texas A&M University, on all degree plan coursework, on all professional development coursework and on major coursework.

4. A grade of C or better must be made in each of the following: science, professional development and major (HLTH and KINE) courses (those courses taken at Texas A&M and those taken elsewhere and transferred to Texas A&M).
5. Pass the THEA, ACCUPLACER, ASSET or COMPASS test or show proof of exemption from the test with appropriate STAAR, SAT or ACT scores.

6. Complete application for the professional phase of teacher education before the deadline during the semester all above criteria are met (see academic advisor for date). Application for professional phase includes documentation of professional organizations and certificates, Code of Ethics, FERPA acknowledgement and Expectation for Professional Behavior form signed by student and program coordinator.

7. Demonstrate swimming proficiency (for KINE majors).

NOTE: Undergraduate students enrolled in professional phase of teacher preparation programs incur a differential tuition charge of $300 in each of the remaining semesters.

Requirements for Admission to Student Teaching

1. Successful admission to Professional Phase of Teacher Education.
2. Complete Intent to Student Teach form at the time of application for professional phase.
3. Complete all degree plan coursework except KNFB 450/HEFB 450/KNFB 450.
4. GPR requirements:
   a. minimum of 2.5 on all coursework completed at Texas A&M.
   b. minimum of 2.5 on all coursework that applies to the degree plan.
   c. minimum of 2.5 computed for each: professional development and major courses.
5. A grade of C or better must be made in each of the following: science, professional development, major and support field courses (those courses taken at Texas A&M and those taken elsewhere and transferred to Texas A&M).
7. Successful completion of the English Language Learner and Ethics Training Module.

Requirements for Admission to the Professional Phase of Non-Certification Tracks

The following requirements must be met by students seeking admission to the professional phase of non-certification tracks in Health and Kinesiology. Students are responsible for contacting the Advising Office in the Department of Health and Kinesiology to obtain information about specific requirements.

1. Complete the following courses with a grade combination of B/C or higher:

4. Minimum of 2.5 on all coursework completed at Texas A&M except Sport Management which requires a 2.25. Dance Science requires a 2.5 on all dance science coursework for admission to the professional phase.

5. Applied Exercise Physiology and Sport Management have additional requirements. Please see your academic advisor for these.

6. Admission to the professional phase is competitive and not gua

Requirements for Admission to Internship

1. Successful admission to Professional Phase of Non-Certification Track.
2. Submit the Application for Internship form prior to the deadline (check with your advisor for deadlines) the semester before enrolling in pre-intern courses.
3. Minimum 2.5 on all coursework completed at Texas A&M except Sport Management which requires a 2.00.
4. Health and Kinesiology requires a grade of C or better must be made in each of the following: science, professional development and major courses (those courses taken at Texas A&M and those taken elsewhere and transferred to Texas A&M).
5. Complete all degree plan courses prior to internship experience.
6. Approval of Application for Internship by program coordinator.

Faculty

Agnor, Dottiedee, Instructional Associate Professor
Health & Kinesiology
MS, Texas A&M University, 1992

Alvarez, Andrea, Instructional Assistant Professor
Health & Kinesiology
MFA, Case Western Reserve University, 2016

Apostolopoulos, Yiorgos, Associate Professor
Health & Kinesiology
PHD, University of Connecticut, 1994

Armstrong, Carisa L, Clinical Associate Professor
Health & Kinesiology
MFA, Case Western Reserve University, 2002

Ballard, Danny J, Adjunct Professor
Health & Kinesiology
MS, Texas A&M University, 1980

Baletka, Dawn M, Instructional Assistant Professor
Health & Kinesiology
PHD, Sam Houston State University, 2006

Barry, Adam, Associate Professor
Health & Kinesiology
PHD, Oklahoma State University, 1982

Ballouli, Khalid W, Adjunct Assistant Professor
Health & Kinesiology
PhD, Texas A&M University, 2011

Barry, Adam, Associate Professor
Health & Kinesiology
PHD, Texas A&M University, 2007
Batista, Paul J, Associate Professor
Health & Kinesiology
JD, Baylor University, 1976

Bedford, Diane C, Clinical Assistant Professor
Health & Kinesiology
MFA, Florida State University, 2010

Bennett, Gregg R, Professor
Health & Kinesiology
PHD, Auburn University, 1997

Bergeron, Christine S, Clinical Professor
Health & Kinesiology
MFA, Florida State University, 1998

Berthot, Patricia A, Instructional Associate Professor
Health & Kinesiology
MED, Stephen F. Austin State University, 1990

Bloomfield, Susan A, Professor
Health & Kinesiology
PHD, The Ohio State University, 1992

Bosquez, Janet M, Instructional Assistant Professor
Health & Kinesiology
MS, Texas A&M University, 1986

Boucher, Anthony M, Clinical Associate Professor
Health & Kinesiology
PHD, Texas Women's University, 2008

Breaux, Wade J, Instructional Assistant Professor
Health & Kinesiology
MS, Texas A&M University, 2002

Brekken, Kirstin L, Instructional Professor
Health & Kinesiology
MS, Texas A&M University, 1982

Brison, Natasha T, Assistant Professor
Health & Kinesiology
PHD, University of Georgia, 2015
JD, University of Georgia School of Law, 1998

Buchanan, John J, Professor
Health & Kinesiology
PHD, Florida Atlantic University, 1996

Campbell, August J, Instructional Assistant Professor
Health & Kinesiology
PHD, Texas State University, 2005

Campbell, Kelli R, Instructional Assistant Professor
Health & Kinesiology
MS, Texas A&M University, 2000

Chapman, Denise D, Instructional Assistant Professor
Health & Kinesiology
MS, University of Central Missouri, 2000

Chen, Lei-Shih, Associate Professor
Health & Kinesiology
PHD, Texas A&M University, 2007

Clark, Heather R, Clinical Assistant Professor
Health & Kinesiology
PHD, Texas A&M University, 2014

Coady, William J, Instructional Associate Professor
Health & Kinesiology
MS, Texas A&M University, 1992

Crouse, Stephen F, Professor
Health & Kinesiology
PHD, The University of New Mexico, 1984

Cunningham, George B, Professor
Health & Kinesiology
PHD, The Ohio State University, 2002

Dannenbaum, Joseph H, Instructional Associate Professor
Health & Kinesiology
MA, Oklahoma State University, 2005

Darnell, Gayden S, Instructional Associate Professor
Health & Kinesiology
MS, Texas A&M University, 1997

Deutz, Nicolaas, Professor
Health & Kinesiology
MD, University of Amsterdam, 1988

Dixon, Marlene A, Professor
Health & Kinesiology
PHD, The Ohio State University, 2002

Dixon, Mary O, Clinical Assistant Professor
Health & Kinesiology
PHD, Texas A&M University, 2011

Dixon, Stuart M, Instructional Associate Professor
Health & Kinesiology
MED, Concordia University Texas, 2009

Eliot, John F, Clinical Associate Professor
Health & Kinesiology
PHD, University of Virginia, 1998

Ellis, Robert B, Instructional Assistant Professor
Health & Kinesiology
BA, Oklahoma State University, 1964

Engelen, Marielle P, Associate Professor
Health & Kinesiology
PHD, Maastricht University, Netherlands, 2000

Fehr, Sara K, Clinical Assistant Professor
Health & Kinesiology
PHD, University of Cincinnati, 2015

Fluckey, James D, Professor
Health & Kinesiology
PHD, The Pennsylvania State University, 1995

Gabbard, Carl P, Senior Professor
Health & Kinesiology
PHD, North Texas State University, 1977
Garney, Whitney R, Assistant Professor
Health & Kinesiology
PHD, Texas A&M University, 2015

Gegg, Laura G, Instructional Associate Professor
Health & Kinesiology
MED, Texas A&M University, 2009

Gilreath, Tamika D, Associate Professor
Health & Kinesiology
PHD, The Pennsylvania State University, 2007

Gomez, Daniel, Instructional Associate Professor
Health & Kinesiology
MED, Texas A&M University, 2010

Gomez, Lorinda B, Instructional Associate Professor
Health & Kinesiology
MS, Texas A&M University, 2006

Goodson, Patricia, Professor
Health & Kinesiology
PHD, The University of Texas at Austin, 1996

Grant, Melinda L, Instructional Professor
Health & Kinesiology
MS, West Virginia University, 1976

Green, John S, Clinical Professor
Health & Kinesiology
PHD, Texas A&M University, 1996

Green, Lisa L, Adjunct Assistant Professor
Health & Kinesiology
PHD, Texas Woman's University, 2001

Greenwood, C Michael, Clinical Professor
Health & Kinesiology
PHD, Texas Woman's University, 1990

Greenwood, Lori, Clinical Professor
Health & Kinesiology
PHD, Oregon State University, 1995

PHD, Kansas State University, 2008
Majors

Health
- Bachelor of Science in Community Health (p. 309)
- Bachelor of Science in Health, Allied Health Track (p. 311)
- Bachelor of Science in Health, School Health Track (p. 312)

Kinesiology
- Bachelor of Science in Kinesiology, All-Level Physical Education Teacher Certification Track (p. 313)
- Bachelor of Science in Kinesiology, Dance Science Track (p. 314)
- Bachelor of Science in Kinesiology, Exercise Science Track, Applied Exercise Physiology Concentration (p. 316)
- Bachelor of Science in Kinesiology, Exercise Science Track, Basic Exercise Physiology Concentration (p. 317)
- Bachelor of Science in Kinesiology, Exercise Science Track, Motor Behavior Concentration (p. 318)
- Bachelor of Science in Kinesiology and Master of Science in Athletic Training, 5-Year Degree Program (p. 319)

Sports Management
- Bachelor of Science in Sport Management, Internship Track (p. 321)
- Bachelor of Science in Sport Management, Non-Internship Track (p. 322)

University Studies
- Bachelor of Science in University Studies, Dance Concentration (p. 323)
- Bachelor of Science in University Studies, Sport Conditioning Concentration (p. 324)

Minors
The Department of Health and Kinesiology offers three minors to all students at the university. The Coaching minor and Dance minor have admission requirements. Students should consult with an advisor in the Department of Health and Kinesiology for admission requirements.
- Coaching Minor (p. 325)
- Dance Minor (p. 326)
- Sports Management Minor (p. 326)

Community Health - BS
The Bachelor of Science in Community Health prepares and educates students to serve as community health educators and promoters in a variety of government and private health agencies, clinical settings, nonprofit organizations, volunteer agencies and other community organizations. This program is unique in that it offers a wide range of approved electives permitting the student to develop a program according to his or her needs and interests. Each graduate will have knowledge enabling them to communicate health and health education needs, concerns and resources.

In addition to classroom experience, the student is exposed to pre-professional training through a non-paid, full semester internship in the final semester. This internship program provides them with on-the-job
experience and employment opportunities. Students are placed in a setting which best fits their professional goals.

**Program Requirements**

This degree plan has been laid out showing students the number of hours they must take each semester in order to complete the degree in four years without attending summer school. This is a suggested plan and does not have to be followed as laid out below. Students should use this information in conjunction with advising documents available from their advisor or the department website when scheduling courses each semester to ensure they are meeting all prerequisites, taking courses for admission to professional phase in a timely manner and meeting all grade requirements.

1. Course should meet Core Curriculum requirement.
2. Course selection should meet the International and Cultural Diversity Graduation requirement, if needed.
3. Course meets International and Cultural Diversity graduation requirement.
4. To be chosen in consultation with academic advisor.
5. Course meets the University writing requirement.
Health - BS, Allied Health Track

The goals of the curriculum leading to a Bachelor of Science in Health are to more effectively develop literate, informed professionals capable of making the world healthier and more humane. Students receive a general education through a broad exposure to information. They also receive a specialized education through coursework designed to help them develop as a professional, expand their knowledge and skills related to health education and prepare them for professional practice. The curriculum in health offers two options: the Allied Health track and the School Health track.

The Allied Health concentration gives students a strong background in health that serves them well if they choose to pursue additional schooling in an allied health area. This concentration provides an opportunity for students to take prerequisite courses for professional allied health schools as electives while receiving a background in the health education field. Students select electives from a list of prerequisites for specific professional schools.

This program consists of two phases: pre-professional phase and professional phase. Students must meet program prerequisite requirements in order to advance to professional phase.

Program Requirements

This degree plan has been laid out showing students the number of hours they must take each semester in order to complete the degree in four years without attending summer school. This is a suggested plan and does not have to be followed as laid out below. Students should use this information in conjunction with advising documents available from their advisor or the department website when scheduling courses each semester to ensure they are meeting all prerequisites, taking courses for admission to professional phase in a timely manner and meeting all grade requirements.

Health - BS, School Health Track

The goals of the curriculum leading to a Bachelor of Science in Health are to more effectively develop literate, informed professionals capable of making the world healthier and more humane. Students receive a general education through a broad exposure to information. They also receive a specialized education through coursework designed to help them develop as a professional, expand their knowledge and skills related to health education and prepare them for professional practice. The curriculum in health offers two options: the Allied Health track and the School Health track.

The School Health option provides a background in the basic health sciences and pedagogy and prepares educators to plan, implement and evaluate health education in a variety of settings with an emphasis on teaching health in school settings. Graduates have the ability to acquire K-12 teacher certification credentials enabling them to teach health only in public or private schools although students are encouraged to become certified in a support teaching field through the use of core curriculum and support field electives. Students frequently take support field electives that also serve as course pre-requisites for professional schools such as nursing, PA, PT or other medical fields of study. Each student completes appropriate course work in academic foundations and professional education as well as participates in several field experiences representing a variety of levels and types of instruction. The program consists of three phases in the development of their professional dispositions. All students will complete a full semester of student teaching in a school setting as a culminating experience.

Program Requirements

This degree plan has been laid out showing students the number of hours they must take each semester in order to complete the degree in four years without attending summer school. This is a suggested plan and does not have to be followed as laid out below. Students should use this information in conjunction with advising documents available from their advisor or the department website when scheduling courses each semester to ensure they are meeting all prerequisites, taking courses for admission to professional phase in a timely manner and meeting all grade requirements.

Kinesiology - BS, All-Level Physical Education Teacher Certification Track

The Bachelor of Science degree in Kinesiology offers several options designed to prepare students for a variety of careers in public school education, exercise science and dance science. Some options also provide academic preparation for students interested in professional schools, e.g., physical therapy, occupational therapy, physician’s assistant or medicine. There are some common course requirements for all kinesiology options. Additional hours for each option are specifically designed to prepare students for that field of study. The sequencing of courses should be determined in consultation with an appropriate academic advisor.

This option is offered to students wishing to teach physical education in public or private school. The all-level certification qualifies the recipient to teach in preschool–12th grades in physical education/wellness only. This degree plan includes a full semester of student teaching in a public school setting after the completion of coursework. This degree plan will provide a program that will lead to successful completion of the certification requirements outlined by the State of Texas. Additional program information is available on the Department of Health and Kinesiology website or by contacting the advising office in the department.

Program Requirements

This degree plan has been laid out showing students the number of hours they must take each semester in order to complete the degree in four years without attending summer school. This is a suggested plan and does not have to be followed as laid out below. Students should use this information in conjunction with advising documents available from their advisor or the department website when scheduling courses each semester to ensure they are meeting all prerequisites, taking courses for admission to professional phase in a timely manner and meeting all grade requirements.

4 To be chosen in consultation with your academic advisor.
5 Meets Creative Arts core curriculum requirement.
6 Meets Core Curriculum writing requirement.

Kinesiology - BS, Dance Science Track

The Bachelor of Science degree in Kinesiology offers several options designed to prepare students for a variety of careers in public school education, exercise science and dance science. Some options also provide academic preparation for students interested in professional schools, e.g., physical therapy, occupational therapy, physician’s assistant or medicine. There are some common course requirements for all kinesiology options. Additional hours for each option are specifically designed to prepare students for that field of study. The sequencing of courses should be determined in consultation with an appropriate academic advisor.

This option is offered to prepare and educate students to enter the field of dance science. Dance Scientists are professionals who are employed by dance companies and dance training facilities throughout the world to devise effective training programs as well as advise the dancers regarding nutrition, injury prevention/care and dance psychology. Dance Scientists also become researchers, dance therapists, massage therapists and better informed dancers and teachers.

Program Requirements

This degree plan has been laid out showing students the number of hours they must take each semester in order to complete the degree in four
years without attending summer school. This is a suggested plan and does not have to be followed as laid out below. Students should use this information in conjunction with advising documents available from their advisor or the department website when scheduling courses each semester to ensure they are meeting all prerequisites, taking courses for admission to professional phase in a timely manner and meeting all grade requirements.

Kinesiology - BS, Exercise Science Track, Applied Exercise Physiology Concentration

The Bachelor of Science degree in Kinesiology offers several options designed to prepare students for a variety of careers in public school education, exercise science and dance science. Some options also provide academic preparation for students interested in professional schools, e.g., physical therapy, occupational therapy, physician’s assistant or medicine. There are some common course requirements for all kinesiology options. Additional hours for each option are specifically designed to prepare students for that field of study. The sequencing of courses should be determined in consultation with an appropriate academic advisor.

The three options in exercise science expose students to a strong science background making them excellent candidates for employment opportunities in exercise related areas (cardiac rehabilitation, corporate or private fitness), advanced graduate studies (motor behavior, exercise physiology) or professional school (medical, dental or physical therapy). Course prerequisites for medical, dental or physical therapy professional schools are included in the various programs under this track.

Program Requirements

This degree plan has been laid out showing students the number of hours they must take each semester in order to complete the degree in four years without attending summer school. This is a suggested plan and does not have to be followed as laid out below. Students should use this information in conjunction with advising documents available from their advisor or the department website when scheduling courses each semester to ensure they are meeting all prerequisites, taking courses for admission to professional phase in a timely manner and meeting all grade requirements.

---

1. Course selection should meet the International and Cultural Diversity Graduation requirement, if needed.
2. Course must meet Core Curriculum requirements.
4. To be chosen in consultation with your academic advisor.
5. Participation in band or athletics cannot be used for KINE 199 credit. KINE 199 activities cannot be repeated for credit and must be taken for a grade.

### Program Requirements

The Bachelor of Science degree in Kinesiology offers several options designed to prepare students for a variety of careers in public school education, exercise science and dance science. Some options also provide academic preparation for students interested in professional schools, e.g., physical therapy, occupational therapy, physician’s assistant or medicine. There are some common course requirements for all kinesiology options. Additional hours for each option are specifically designed to prepare students for that field of study. The sequencing of courses should be determined in consultation with an appropriate academic advisor.

The three options in exercise science expose students to a strong science background making them excellent candidates for employment opportunities in exercise related areas (cardiac rehabilitation, corporate or private fitness), advanced graduate studies (motor behavior, exercise physiology) or professional school (medical, dental or physical therapy). Course prerequisites for medical, dental or physical therapy professional schools are included in the various programs under this track.

1 Course selection should meet the International and Cultural Diversity (p. 40) Graduation requirement, if needed.
2 Meets University writing requirement. Select writing intensive section of KINE 198.
3 To be chosen in consultation with your academic advisor.
4 Participation in band or athletics cannot be used for KINE 199 credit. KINE 199 activities cannot be repeated for credit and must be taken for a grade.

Kinesiology - 5-Year Bachelor of Science/Master of Science

The dual degree program (3+2) allows undergraduate Kinesiology students to enter the Master of Science in Athletic Training program the beginning of their fourth year at Texas A&M University and earn a Bachelor of Science in Kinesiology and a Master of Science in Athletic Training (MSAT) degree in five years.

Students will follow departmental requirements for admission into the professional phase of the BS in Kinesiology. Kinesiology majors who have at least a 3.25 GPA and who will have completed all of their prescribed courses by the spring of their junior year will be eligible to apply for the five-year program.

Applicants to the five-year program will submit the same materials (including GRE scores) as other MSAT applicants by the spring deadline of their junior year, and those who meet all minimum requirements, including having earned a B or better in ATTR 201, ATTR 202, ATTR 301, ATTR 302, will receive placement in the MSAT program. The admissions criteria for the five-year program will be the same as for other MSAT students.

Students continuing into the 4th year of the 3+2 program must finish the entire 156 hours to obtain both the Bachelor’s and Master’s degrees. Students will be conferred with two degrees once they complete the 5th year of the concurrent program.

Students in the 3+2 program will be required to complete the same two-year, 60 hour curriculum as other students admitted to the MSAT program. Students will take 96 hours of undergraduate courses, and 60 hours of graduate course work, of which 24 hours will be applied to the undergraduate degree. Students are required to maintain a 3.25 GPA through the first 24 hours of graduate course work at which time the student must maintain a 3.0 GPA. Students continuing in the 3+2 program will change from U4 to G7 status when they complete 96 hours.

Students not accepted or unable to continue with the 3+2 program may complete the remaining requirements for the BS degree in Kinesiology in a concentration that is most suitable to their needs (e.g., Motor...
Behavior, Applied Exercise Physiology). These students may apply to the traditional (4+2) graduate degree program.

## Program Requirements

This degree plan has been laid out showing students the number of hours they must take each semester in order to complete the dual degree program. The undergraduate portion of the plan is a suggested plan and should be followed closely. There may be some modifications in course order that can occur but students should consult with the departmental academic advisor for the dual degree program before changes are made in order to ensure they are meeting all dual degree requirements.

To be chosen in consultation with academic advisor.
Participation in band or athletics cannot be used for KINE 199 credit. KINE 199 activities cannot be repeated for credit and must be taken for a grade.
Course must meet core curriculum requirements.
Meets core curriculum writing requirement.
Select writing intensive section of KINE 198.
Course selection should meet the International and Cultural Diversity (p. 40) graduation requirement if needed.

Students may elect to take PHYS or CHEM courses during the Summer semester between freshman and sophomore year to reduce the Fall load.

Sport Management - BS, Internship Track

The Bachelor of Science degree in Sport Management is designed to prepare students for careers as administrators and managers in athletic, health and country clubs, as well as entry-level management positions in college and professional athletic organizations. Through this program, students are prepared for a diversity of roles in the areas of sport marketing and promotions, facility management and planning, activity programming and events management. Students may elect the option that requires completion of an internship or may select the non-internship option. The internship, following coursework, provides students with on-the-job experience and networking opportunities. Students in the internship option will have also completed a business minor. The non-internship option allows students to study sport management from a specific perspective with the goal of continued educational experiences in graduate or professional school, obtaining a post-baccalaureate internship or securing an entry-level position in a sport organization. Students in the non-internship option must complete 2 minors/cognates from a list of approved minors/cognates (i.e., business, journalism, speech communications, etc.). There are common course requirements for both tracks.

Program Requirements

This degree plan shows students the number of hours they must take each semester in order to complete the degree in four years without attending summer school. This is a suggested plan and does not have to be followed as laid out below. Students should use this information in conjunction with advising documents available from their advisor or the department website when scheduling courses each semester to ensure they are meeting all prerequisites, taking courses for admission to professional phase in a timely manner, and meeting all grade requirements.

1. Must meet Core Curriculum requirements.
2. Course selection should meet the International and Cultural Diversity graduation requirement, if necessary.
3. To be chosen in consultation with academic advisor. Some electives may meet International and Cultural Diversity graduation requirement.
4. Courses meet University writing requirement.

**Program Requirements**

This degree plan shows students the number of hours they must take each semester in order to complete the degree in four years without attending summer school. This is a suggested plan and does not have to be followed as laid out below. Students should use this information in conjunction with advising documents available from their advisor or the department website when scheduling courses each semester to ensure they are meeting all prerequisites, taking courses for admission to professional phase in a timely manner, and meeting all grade requirements.
University Studies - BS, Dance Concentration

The dance concentration curriculum leads to a Bachelor of Science in University Studies. It is designed to serve students who are in good academic standing with the University (2.0+ GPR) and are specifically seeking an interdisciplinary degree plan which provides preparation in dance history and production. Students complete courses in the foundations of dance, dance production, and dance composition, and technique courses in various forms of dance. Students choose their minors. This concentration is housed in the Division of Kinesiology within the Department of Health and Kinesiology.

Program Requirements

This degree plan has been laid out showing the number of hours they must take each semester in order to complete the degree in four years without attending summer school. This is a suggested plan and does not have to be followed as laid out below. Students should use this information in conjunction with advising documents available from...
their advisor or the department website when scheduling courses each semester to ensure they are meeting all prerequisites, taking courses for admission to professional phase in a timely manner and meeting all grade requirements.

University Studies - BS, Sports Conditioning Concentration

The sports conditioning concentration curriculum leads to a Bachelor of Science degree in University Studies. It is designed to serve students who are in good academic standing with the University (2.0+ GPR) and are specifically seeking an interdisciplinary degree plan which provides preparation for further study in fields or careers in coaching high performance athletes and personal training. The focus is on adult performance at collegiate, professional or fitness industry levels. Students will receive a coaching minor and will choose a second minor of their choice. This concentration is housed in the Division of Kinesiology within the Department of Health and Kinesiology.

Program Requirements

This degree plan has been laid out showing students the number of hours they must take each semester in order to complete the degree in four years without attending summer school. This is a suggested plan and does not have to be followed as laid out below. Students should use this information in conjunction with advising documents available from their advisor or the department website when scheduling courses each semester to ensure they are meeting all prerequisites, taking courses for admission to professional phase in a timely manner and meeting all grade requirements.

### Total Semester Credit Hours

120

---

1. Must meet Core Curriculum requirements.
2. Some electives should meet the International and Cultural Diversity graduation requirement.
4. Must be a specific activity class. See advisor for appropriate course.
5. Select electives in consultation with advisor.

### Coaching - Minor

This minor is also useful to those who work with youth in sports leagues. Admission to this minor is by application only. Consult with an advisor in the Department of Health and Kinesiology for admission requirements and application. Students should allow a minimum of three semesters to complete this minor.

Dance - Minor

Admission to the Dance minor requires an audition. Refer to the Dance Program (http://tamudance.tamu.edu) website for information on auditions.

A minor in dance can lead to numerous opportunities within the field of dance performance and education. Students can obtain the necessary tools to teach, choreograph and direct in high schools, private studios, performance groups, dance/drill teams, dance within community and/or companies, or utilize their minor studies to pursue degrees in dance. Dance is considered to be an important part of the visual and performing arts educational experience. Studies of dance performance, education and history can enhance a student’s academic experience.

Dance students are part of the Dance Program (http://tamudance.tamu.edu), and have the opportunity to participate in events throughout the year.

Performance

Performance opportunities include: an annual dance concert (Perpetual Motion), Faculty Arts Showcase, Choreographers’ Showcase, Senior Concerts, informal performances, student organization concerts, performances throughout the community and on campus and state, regional, and national/international gala performances. Dance faculty often receive grants for other performances throughout the university in collaboration with faculty from other colleges. Students are also given the opportunity to attend various festivals and conferences.

The Dance Program also offers students the capability to work with guest artists (http://dance.tamu.edu/people/guest-artists) in master classes, watching performances and learning repertory. This not only gives students an unique opportunity to build their resumes, but to work with a variety of professionals in the field.

Students must make a grade of "C" or better in all courses.

Sport Management - Minor

The minor provides a foundational understanding of the multifarious sport industry from the perspectives of management, marketing and other business principles. The minor provides an introductory understanding of the broadly defined sport management discipline and potential careers that can be leveraged in the sport industry.

1 Topics for the seminar classes include: Sport Sponsorship, Athletic Administration and Sport and the Media.

2 Courses meet International and Cultural Diversity requirement

Students must make a grade of "C" or better in all courses.

Department of Teaching, Learning and Culture

The Department of Teaching, Learning and Culture is responsible for undergraduate programs that lead to certification at the early childhood/elementary, middle and secondary levels. Note these exceptions:

1. students interested in teaching either health or physical education must major in the Department of Health and Kinesiology;
2. students interested in teaching agricultural science must major in the Department of Agricultural Education;
3. students interested in secondary certification can be certified through the secondary graduate certification program, the secondary
accelerate certification program, the University Studies program or the Aggie Teach program.

**Early Childhood/Elementary or Middle Grades Certification**

Baccalaureate Degree Programs. Most students interested in early childhood/elementary (PreK-6) or middle school (4–8) certification pursue a program leading to the Bachelor of Science degree (BS) with a major in interdisciplinary studies (INST). The INST degree certification programs prepare students for the many diverse instructional roles assumed by public school teachers. A minimum of 123 credit hours is required for the INST degree. Within this program, students may focus on:

1. early childhood (PreK–grade 6);
2. middle school (grades 4–8 math and science); and
3. middle school (grades 4–8 English language arts and social studies).

For complete information, see an advisor in the Department of Teaching, Learning and Culture’s Office of Undergraduate Advising in Heaton Hall.

There is another baccalaureate elementary certification program available for students majoring in English. For information about this program, see an advisor in the Department of English, College of Liberal Arts.

Eligibility. Students must meet the requirements for a bachelor’s degree in the college and the department in which they are majoring. Further, they must meet specific admission and performance standards established by the Department of Teaching, Learning and Culture as well as requirements for professional education and certification established by the State of Texas. These requirements include admission to teacher education, admission to student teaching and qualification for initial certification. **It is the responsibility of the student to contact the Department of Teaching, Learning and Culture’s Office of Undergraduate Advising for specific information pertaining to program changes.**

**Requirements for Admission to Teacher Education**

**Early Childhood/Elementary or Middle Grades Certification Programs**

Please see an advisor in the Department of Teaching, Learning and Culture’s Office of Undergraduate Advising for current information.

**Requirements for Admission to Teaching Education**

**Early Childhood/Elementary and Middle Grades Education Program**

1. Pass the THEA, ACCUPLACER, ASSET or COMPASS test or show proof of exemption from the test with appropriate STAAR, SAT or ACT scores.
2. Completion of a minimum 42 hours of pre-professional coursework from degree program (includes University Core Curriculum courses).
3. Completion of a minimum of 32 hours of University Core Curriculum courses with no grade lower than a C.
4. Completion of TEFB 273 or INST 210 with a grade of B or higher (equivalent courses from a community college may be substituted).
5. Completion of English Proficiency grade requirement by earning a B/C grade combination in ENGL 103 or ENGL 104 and one of the following courses: ENGL 203 or ENGL 210.
6. A GPR of 2.75 on all coursework on a degree plan with no grade lower than a C.
7. Transcripts for all institutions of higher education on file in the Texas A&M University Office of the Registrar.
8. Approved and signed degree plan on file in the Advising Office of the Department of Teaching, Learning and Culture.

These requirements must be seen as minimum standards only. Successful fulfillment of all of the above requirements does not guarantee admission to the program. Admission also depends upon the number of places available and the number of applications received each year. If more qualified students apply than the available number of spaces, admission may be based on selection factors at the time of application, such as GPA in pre-professional courses, number of hours needed to complete the program, and enrollment in prerequisite courses.

**Secondary Graduate Certification Program**

Four routes leading to initial teacher certification at the secondary level are available. These include the Aggie Teach program, the University Studies program, the graduate certification program and Accelerate (an alternative certification program). Complete information is available from the TLAC advising office in Heaton Hall.

**Requirements for Admission to Student Teaching**

1. Complete a student teaching application by the given deadlines and complete all coursework prior to senior methods. Students must see their advisors for deadlines.
2. Admission to teacher education.
3. Completion of all courses listed on the degree plan. All Education/Interdisciplinary Studies and professional courses with a grade of C or better.
4. All certification coursework must be completed. Each emphasis/teaching field must have a grade of C or better in each course with a minimum GPR of 2.75 in teacher emphasis/teaching field.
5. ENGL 203 or ENGL 210 must be completed with a grade of C or better.
6. A minimum of 2.75 on all coursework completed at Texas A&M.
7. A minimum of 2.75 on all coursework that applies to the degree plan, taken at Texas A&M.
8. A minimum of 2.75 on all coursework that applies to the emphasis/teaching field, taken at Texas A&M.

Interdisciplinary Studies - BS, Pre-K-6, Generalist Certification
Secondary Graduate Certification Program

This program is designed for those candidates who have completed the baccalaureate degree and desire initial certification at the secondary level. Candidates are admitted upon recommendation of departmental advisors and progress through summer, fall and spring as a cohort. The certification program requires completion of 21 graduate semester credit hours and the successful completion of appropriate State examinations. A full public school year internship and the opportunity to apply all coursework toward the Master of Education degree are unique features of this program. The candidate may, upon approval by the department and a cooperating school district, serve as an intern in a full-time salaried teacher of record position, in a part-time salaried teaching position, or as a paid substitute teacher. All candidates will serve a full public school year internship whether in a salaried or non-salaried position.

Prerequisites

Completion of the following prior to the first summer session:

1. Baccalaureate degree from an accredited institution with a GPR of 2.75.
2. Coursework for one teaching field as approved by the teaching field advisor.
3. Pass the appropriate content area TExES exam.

Course of Study for Secondary Certification at the Post-Baccalaureate Level

Enrollment in the following courses is limited to candidates pursuing initial secondary certification in the post-baccalaureate program.

Total Semester Credit Hours: 18

Students must make a grade of "C" or better in all courses.

A 2.5 GPA is required in minor courses to pursue teacher certification.

Substitutions must be approved by the Department of Teaching, Learning and Culture advisors.

University Studies Programs

The College of Education and Human Development offers degrees in University Studies. A University Studies degree differs from a traditional "major" in that it consists of a concentration and two minors of 15-18 hours each. The University Studies degree format was created to provide students the flexibility to combine areas of study that are of special interest.

Majors

- Bachelor of Science in University Studies, Child Professional Services Non-Certification Program (p. 300)
- Bachelor of Science in University Studies, Dance Concentration (p. 323)
- Bachelor of Science in University Studies, Sport Conditioning Concentration (p. 324)

University Studies - BS, Child Professional Services Concentration

The Department of Educational Psychology offers an undergraduate non-certification degree program in University Studies with an area of concentration in Child Professional Services. This degree is a flexible 120-hour degree program that enables a student to combine a prescribed concentration, two minors, the core curriculum and electives to create a comprehensive degree that aligns with the student's individual professional interest. The Child Professional Services non-certification concentration requires students to complete a minor in Human Resource Development or Creative Studies and Sociology. This concentration does not allow students to seek teacher certification; however, it offers study in upper level education courses that provides a strong foundation in child and adolescent development, instructional methods, educational psychology, kinesiology, human resource development, and sociology as a means of preparing graduates for careers in civic, social or religious organizations; hospitals or non-profit organizations; or family and community services. Students interested in University Studies - Child Professional Services should contact the EPSY undergraduate advisor located in Heaton Hall.

Program Requirements

The following curriculum leads to a Bachelor of Science degree in University Studies with an area of concentration in Child Professional Services. Students are required to meet with their assigned academic advisor prior to registration each semester.

---

1. Free elective can be chosen from any 300-400 level course of student's choice.
2. Sociology minor elective to be selected from approved list of courses in the Department of Sociology (p. 553).

**University Studies - BS, Dance Concentration**

The dance concentration curriculum leads to a Bachelor of Science in University Studies. It is designed to serve students who are in good academic standing with the University (2.0+ GPR) and are specifically seeking an interdisciplinary degree plan which provides preparation in dance history and production. Students complete courses in the foundations of dance, dance production, and dance composition, and technique courses in various forms of dance. Students choose their minors. This concentration is housed in the Division of Kinesiology within the Department of Health and Kinesiology.

**Program Requirements**

This degree plan has been laid out showing students the number of hours they must take each semester in order to complete the degree in four years without attending summer school. This is a suggested plan and does not have to be followed as laid out below. Students should use this information in conjunction with advising documents available from their advisor or the department website when scheduling courses each semester to ensure they are meeting all prerequisites, taking courses for admission to professional phase in a timely manner and meeting all grade requirements.

- KINE/DCED Elective 2 2
University Studies - BS, Sports Conditioning Concentration

The sports conditioning concentration curriculum leads to a Bachelor of Science degree in University Studies. It is designed to serve students who are in good academic standing with the University (2.0+ GPR) and are specifically seeking an interdisciplinary degree plan which provides preparation for further study in fields or careers in coaching high performance athletes and personal training. The focus is on adult performance at collegiate, professional or fitness industry levels. Students will receive a coaching minor and will choose a second minor of their choice. This concentration is housed in the Division of Kinesiology within the Department of Health and Kinesiology.

Program Requirements

This degree plan has been laid out showing students the number of hours they must take each semester in order to complete the degree in four years without attending summer school. This is a suggested plan and does not have to be followed as laid out below. Students should use this information in conjunction with advising documents available from their advisor or the department website when scheduling courses each semester to ensure they are meeting all prerequisites, taking courses for admission to professional phase in a timely manner and meeting all grade requirements.

1. Must meet Core Curriculum requirements.
2. Some electives should meet the International and Cultural Diversity graduation requirement.
4. Must be a specific activity class. See advisor for appropriate course.
5. Select electives in consultation with advisor.
To achieve this mission the College of Engineering is committed to:

- complex technical challenges of society.
- standards of professional and ethical behavior, and prepared to meet the well founded in engineering fundamentals, instilled with the highest and the global community by providing engineering graduates who are well prepared to make a significant contribution to the world in which he or she works.

The mission of the College of Engineering is to serve Texas, the nation and the global community by providing engineering graduates who are well founded in engineering fundamentals, instilled with the highest standards of professional and ethical behavior, and prepared to meet the complex technical challenges of society.

To achieve this mission the College of Engineering is committed to:

- ensuring an academic environment conducive to our faculties achieving the highest levels of academic and research excellence;
- building upon our traditional partnerships with industry, engineering practitioners and former students, to enhance our impact on the profession of engineering;
- encouraging excellence, innovation and cross-disciplinary initiatives in education and research;
- providing national and international leadership in undergraduate and graduate engineering education;
- becoming the engineering college of choice for the increasingly diverse citizenry of the state; and
- encouraging and supporting opportunities for our students to grow beyond their chosen disciplines by participation in ethics courses, leadership programs, study-abroad programs and research.

A student engineer can pursue any one of several degree plans, according to personal ambitions, interests and abilities. The student may choose the traditional BS degree and consider advanced research-oriented graduate programs leading to the MS and PhD degrees. Alternatively, the student may select the Doctor of Engineering program which is directed toward professional engineering.

Within the College of Engineering, the undergraduate programs in aerospace, biological and agricultural, biomedical, chemical, civil, computer, electrical, industrial, mechanical, nuclear, ocean, and petroleum engineering are accredited by the Engineering Accreditation Commission of ABET, www.abet.org. The electronic systems engineering technology program, and manufacturing and mechanical engineering technology program are accredited by the Engineering Technology Accreditation Commission of ABET, www.abet.org. The Computer Science program is accredited by the Computing Accreditation Commission of ABET, www.abet.org.

### Entrance and Enrollment Requirements

The minimum requirements for entrance to the University are listed in the earlier pages of this catalog. Because of the importance of science and mathematics to engineering, high school students who aspire to a career in engineering are encouraged to take as many of these courses as possible. In particular, high school preparation should include four years of mathematics and four years of science emphasizing algebra, geometry, trigonometry, calculus, chemistry, physics and biology.

A critical step in an engineering education is proper individual placement in the first courses undertaken. The College of Engineering strongly recommends the following guidelines to students participating in the math advanced placement examinations in high school. Incoming engineering students can earn advanced placement (AP) credits for MATH 151 with a score of 4 on the Calculus AB exam or 3 on the BC exam, and for MATH 151 and MATH 152 by a score of 4 on the BC exam. While the student can accept these AP credits and enroll in the next course in the engineering mathematics sequence, the college recommends a more conservative decision about accepting advanced placement credits in math. Students who earn a 4 or 5 on the Calculus AB exam or a 3 or 4 on the BC exam are recommended to begin in MATH 151. Students who score a 5 on the Calculus BC exam are recommended to begin in MATH 151 or MATH 152. These conservative recommendations help ensure students have thoroughly mastered the content that is fundamental to the engineering curriculum. Students should discuss their choice with their assigned undergraduate academic advisor before registering for mathematics classes.

New Student Conferences and associated Credit by Examination tests provide
information to advisors so that students begin at a level which may differ from the printed curriculum, but is appropriate to their aptitudes and background. All freshmen admitted into engineering are required to complete the Math Placement Exam (MPE) before the New Student Conferences and should review algebra, trigonometry and geometry prior to taking the MPE.

Because of the importance of computing in the disciplines housed within the College of Engineering, all entering students are required to possess a portable, network-ready personal computer capable of running software appropriate to their academic program, effective Fall 2014. Details about the personal computer needed to meet the requirement can be found on our website. No student will be denied admission to Texas A&M University based on an inability to purchase a computer.

Freshmen in General Engineering (https://engineering.tamu.edu/academics/advisors-procedures/entry-to-a-major/general-engineering-program), Engineering at Galveston (https://engineering.tamu.edu/academics/engineering-at-galveston), Engineering at McAllen (http://engineering.tamu.edu/academics/engineering-at-mcallen), or Engineering Academy programs (https://engineering.tamu.edu/academies) have a common first year engineering curriculum to allow time for students to learn about the 18 engineering degree granting majors. It is recognized that in most cases students are not made aware of all of our engineering majors while in high school. Students are introduced to the different engineering majors in the first year engineering courses, ENGR 111 and ENGR 112. Students are encouraged to leverage additional resources, including the career center, faculty, as well as advisors to get career advice. Students must complete the following courses in at least two semesters before applying to an engineering major: two engineering courses, two math courses, and two science courses in the freshman year engineering curriculum. Exceptions will be made as needed for students entering with credit for the required courses. The entry-to-a-major process is designed for students to take ownership of their future to identify at least three majors that are a good match for their career goals and academic performance. The entry-to-a-major process (https://engineering.tamu.edu/academics/advisors-procedures/entry-to-a-major/general-engineering-program) is designed to place students in the highest rank major possible based upon capacity and student performance. Students are encouraged to be in a major as early as possible.

Students in the General Engineering (https://engineering.tamu.edu/academics/advisors-procedures/entry-to-a-major/general-engineering-program), Engineering at Galveston (https://engineering.tamu.edu/academics/engineering-at-galveston), Engineering at McAllen (http://engineering.tamu.edu/academics/engineering-at-mcallen), and Engineering Academy programs (https://engineering.tamu.edu/academies) must be in a major by the end of the third semester in engineering. Students in the Engineering Academy program must be in a major by the end of the fourth semester in engineering.

Transfer students are admitted directly to a major degree granting program through the admissions process.

Freshman Curriculum

The freshman year is identical for degrees in aerospace engineering, biomedical engineering, civil engineering, computer engineering, computer science, electrical engineering, electronic systems engineering technology, industrial distribution, industrial engineering, manufacturing and mechanical engineering technology, mechanical engineering, multidisciplinary engineering technology, nuclear engineering, ocean engineering, and petroleum engineering. The freshman year is slightly different for chemical engineering in that students take CHEM 101/CHEM 111 or CHEM 107/CHEM 117 and CHEM 102/CHEM 112. Biomedical Engineering also requires a two semester sequence of chemistry courses consisting of CHEM 101/CHEM 111 or CHEM 107/CHEM 117 and CHEM 102/CHEM 112. Students pursuing degrees in biological and agricultural engineering should refer to the specific curriculum for this major. It is recognized that many students will change the sequence and number of courses taken in any semester. Deviations from the prescribed course sequence, however, should be made with care to ensure that prerequisites for all courses are met.

Bring Your Own Device (BYOD) (https://engineering.tamu.edu/easa/areas/academics/byod)

Just as students are required to have specific textbooks and supplies in order to gain the highest quality engineering educational experience, the College of Engineering requires students to purchase a computer to complement the course instruction. The vast majority of the students entering the College already bring some form of desktop or laptop computer with them when they begin school. Unfortunately, the variation in the types of computers makes it next to impossible for instructors to routinely ask students to use their own computers in the classroom. A computer designated by the College and purchased by entering students will provide students the convenience to explore course content anytime, anywhere.

While there are many computers available, the College can only guarantee performance and provide support for the specific computers identified by the College of Engineering. These computers will accommodate most of the needs of an engineering student throughout a four-year degree plan, balancing performance, cost and expected life of the computer. The computers have been negotiated with the various vendors, which are external to Texas A&M University, at a price point that is lower than what an individual would likely be able to negotiate. The price for each computer includes up to a four-year warranty.

ENGR [x]

ENGR[x] is a college-wide, zero-credit-hour required program that is composed of approved engineering-centric activities that meet the criteria of high-impact learning experiences. Undergraduate students can use their participation in one of these activities to partially satisfy their ENGR[x] requirement. Full satisfaction of the ENGR[x] requirement includes participating in an engineering-centric activity and submitting a meaningful, self-reflection that discusses the impact and overall experience on the student’s education.

Each department in the College of Engineering identifies the activities it will accept in satisfying a student’s ENGR[x] requirement. Some activities may include the following:

• Study Abroad (http://studyabroad.tamu.edu/)
• Internship or Co-op Experience (http://careercenter.tamu.edu/current-students)
• Grand Challenge Scholars Program (http://engineering.tamu.edu/programs/gcsp)
• The University, College, or Departmental Honors Program (http://honorsprograms.tamu.edu/)
• Aggie’s Invent (https://engineering.tamu.edu/aggiesinvent)
• AggieE_Challenge (https://engineering.tamu.edu/easa/areas/enrichment/aggie-challenge)
• Startup Aggieland (http://startupaggieland.com/)
• Undergraduate research (https://engineering.tamu.edu/graduate/undergraduate-bridges)
• TAMU Minor or Certificate Programs, like the Zachry Leadership Program (https://engineering.tamu.edu/academics/certificates/zachry-leadership-program) or Engineering Honors Program (https://engineering.tamu.edu/programs/eh).
• Engineers without Borders Project (http://www.ewbtamu.org/projects/)
• Department design competitions, like the High Altitude Balloon Club (http://astrocenter.tamu.edu/stem-outreach/high-altitude-balloon-club/)
• Leadership in student organizations

Financial Aid
For financial aid recipients, purchase of the a computer device can be considered in the cost of attendance. To request this, please complete the Request to Change Cost of Attendance form (http://financialaid.tamu.edu/Forms-(1).aspx) for Scholarships & Financial Aid. Submission of documentation does not guarantee additional aid will be awarded. In certain situations students may not be eligible for additional funding.

Undergraduate students entering the College are required to follow the BYOD policy of purchasing one of the configured devices designated by the College. No student will be denied admission to Texas A&M University based on an inability to purchase a computer.

For more information, including specific requirements, visit the Bring Your Own Device (BYOD) web page (http://engineering.tamu.edu/easa/areas/academics/byod).

College Prerequisite Policy
The following prerequisite policy applies to any student in a College of Engineering undergraduate degree program and to any student who seeks admission to an undergraduate degree program in the College of Engineering. This policy is in addition to prerequisite policies imposed by the University (Texas A&M University Student Rules). For complete details concerning this policy, students should contact their Undergraduate Advising Office.

Students must earn a grade of C or better in all courses identified in each College of Engineering undergraduate degree program and any prerequisites for these courses. If a student earns a grade of D or F in any of these courses, the student is required to repeat the course before enrolling in a more advanced course that has the D/F course as a prerequisite. A student may attempt a course no more than three times, including courses graded Q or W but excluding those graded NG, unless approval has been received from their department. A student must complete all prerequisites for a course with a grade of C or better by the start of the semester in which the student plans to enroll in the course.

A student is responsible for checking the prerequisites for each course to ensure the prerequisite requirements have been satisfied. A student who registers for a course for which he/she lacks the necessary prerequisite course(s) and/or the prerequisite grade requirement will be required to drop the course. A student who is told to drop a course and is still enrolled by the deadline set each semester may be administratively dropped by their department. If a student is administratively dropped from a course, the student is responsible for all financial obligations associated with the drop. An administrative drop may adversely impact (including, but not limited to): health insurance benefits, financial aid, athletic eligibility, INS status, veterans’ benefits, and eligibility to participate in extracurricular activities.

Fast Track Program (https://engineering.tamu.edu/academics/fasttrack)
Each participating department in the College of Engineering has streamlined its program for Fast Track participants by substituting specific graduate courses for selected undergraduate offerings. Academically qualified students take these 600-level courses during their senior year, earning graduate credit while fulfilling undergraduate requirements through “credit by exam.” The individual department sets its own grade and exam requirements for earning dual credit. The department also establishes the maximum number of credit hours allowed for acceleration, usually five to seven.

Industry-University Cooperative Education
Cooperative education is a study-work plan of education in which a student alternates periods of attendance in college or university with periods of employment in industry related to his or her major. Students who choose this degree plan must complete at least 12 months of experience in order to receive the cooperative education certificate. The practice of engineering is an art which is learned through practice as well as in the classroom. The cooperative education program provides the education that can be achieved from practice by having the student work with professional engineers on the job. Consequently, the student who graduates with the cooperative education certificate has both the academic background and the practical experience to qualify him or her for more meaningful employment in the profession of engineering. The cooperative education work periods also provide an income for students that allows them to pay for their school expenses.

Those who wish additional information concerning this program should contact the Associate Director of Cooperative Education.

Advanced Study
Students who rank in the upper half of their undergraduate class should give serious consideration to developing their full intellectual potential in engineering by continuing with advanced studies at the graduate level. Two routes are available for students. The traditional master of science and doctor of philosophy degrees should be considered by students who wish to go into research fields. For those students interested in the practice of professional engineering, the master of engineering and doctor of engineering degrees should be given serious consideration. The professional doctor of engineering degree was established in the fall of 1974 to fill a need for better-educated engineers in the practice of engineering. Students may enter this program at any time after they receive the bachelor’s degree in engineering by applying and being accepted to a departmental graduate program within the College of Engineering. Master’s level degrees require a minimum of one year of coursework after the bachelor’s, and the doctoral degrees require a minimum of an additional two years of coursework. The doctor of philosophy also requires a dissertation based on research by the student, and the doctor of engineering requires at least one year of internship experience in industry or government.
For more information concerning these programs, please refer to the Texas A&M University Graduate and Professional Catalog or contact the Office of the Dean of Engineering.

The engineering programs also provide a foundation for further education in the fields of medicine, law or business. An engineering background will prepare the individual to understand, contribute to and embrace technical advances in these fields.

The Texas A&M Engineering Academies

The Texas A&M Engineering Academies are co-enrollment programs between the College of Engineering and selected two-year institutions. Students in the Engineering Academy program are engineering students, who take their math, science, and core courses at the two-year institutions and the engineering courses from the College of Engineering. The admission process for the Engineering Academies is unique to each partner institution, with the offer of admission to the Engineering Academy made by Texas A&M University. Texas A&M Engineering Academy students, who satisfy the program GPA requirements, apply for entry to a major as early as the end of the first year.

Eligible students receive financial aid based upon their combined credit hours from both institutions.

For more information, including specific requirements for each of the partner institutions, visit Texas A&M Engineering Academies Texas A&M Engineering Academies (https://engineering.tamu.edu/academies).

Majors

College of Engineering

• Bachelor of Science in Biological and Agricultural Engineering (p. 344)
• Bachelor of Science in Interdisciplinary Engineering (p. 346)

Department of Aerospace Engineering

• Bachelor of Science in Aerospace Engineering (p. 353)

Department of Biomedical Engineering

• Bachelor of Science in Biomedical Engineering (p. 356)

Artie McFerrin Department of Chemical Engineering

• Bachelor of Science in Chemical Engineering (p. 362)

Zachry Department of Civil Engineering

• Bachelor of Science in Civil Engineering (p. 366)
• Bachelor of Science in Civil Engineering, Coastal and Ocean Engineering Track (p. 367)
• Bachelor of Science in Civil Engineering, Construction Engineering and Management Track (p. 369)
• Bachelor of Science in Civil Engineering, Environmental Engineering Track (p. 371)
• Bachelor of Science in Civil Engineering, General Civil Engineering Track (p. 373)
• Bachelor of Science in Civil Engineering, Geotechnical Engineering Track (p. 376)
• Bachelor of Science in Civil Engineering, Structural Engineering Track (p. 377)
• Bachelor of Science in Civil Engineering, Transportation Engineering Track (p. 379)
• Bachelor of Science in Civil Engineering, Water Resources Engineering Track (p. 381)

Department of Computer Science and Engineering

• Bachelor of Science in Computer Engineering, Computer Science Track (p. 384)
• Bachelor of Science in Computer Science (p. 386)

Department of Electrical and Computer Engineering

• Bachelor of Science in Computer Engineering, Electrical Engineering Track (p. 388)
• Bachelor of Science in Electrical Engineering (p. 390)

Department of Engineering Technology and Industrial Distribution

• Bachelor of Science in Electronic Systems Engineering Technology (p. 393)
• Bachelor of Science in Industrial Distribution (p. 394)
• Bachelor of Science in Manufacturing and Mechanical Engineering Technology (p. 396)
• Bachelor of Science in Multidisciplinary Engineering Technology (p. 398)

Department of Industrial and Systems Engineering

• Bachelor of Science in Industrial Engineering (p. 401)

Department of Mechanical Engineering

• Bachelor of Science in Mechanical Engineering (p. 408)

Department of Nuclear Engineering

• Bachelor of Science in Nuclear Engineering (p. 413)

Department of Ocean Engineering

• Bachelor of Science in Ocean Engineering (p. 416)

Harold Vance Department of Petroleum Engineering

• Bachelor of Science in Petroleum Engineering (p. 419)

Minors

College of Engineering

• Cybersecurity Minor (p. 346)
• Engineering Project Management Minor (p. 347)
Department of Aerospace Engineering
  • Aerospace Engineering Minor (p. 354)

Department of Biomedical Engineering
  • Biomedical Engineering Minor (p. 358)

Artie McFerrin Department of Chemical Engineering
  • Chemical Engineering Minor (p. 363)

Department of Computer Science and Engineering
  • Computer Science Minor (p. 387)
  • Game Design and Development Minor (p. 388)

Department of Electrical and Computer Engineering
  • Electrical Engineering Minor (p. 391)

Department of Engineering Technology and Industrial Distribution
  • Embedded Systems Integration Minor (p. 399)

Department of Industrial and Systems Engineering
  • Industrial Engineering Minor (p. 403)

Department of Materials Science and Engineering
  • Materials Science and Engineering Minor (p. 405)

Department of Mechanical Engineering
  • Analysis, Design and Management of Energy Conversion Systems Minor (p. 411)
  • Control of Mechanical Systems Minor (p. 411)
  • Design and Simulation of Mechanical Systems Minor (p. 411)

Department of Nuclear Engineering
  • Nuclear Engineering Minor (p. 414)
  • Radiological Health Engineering Minor (p. 414)

Harold Vance Department of Petroleum Engineering
  • Petroleum Engineering Minor (p. 421)

Certificates

The College of Engineering has designed the following certificate programs to offer ambitious students the opportunity to go beyond the traditional curriculum and gain specific knowledge in a concentration area. Students are required to consult with their academic advisor prior to submitting an application for a certificate. Enrolling and being accepted into a certificate program does not guarantee registration into required courses. Each certificate, with the exception of the Business Management Certificate, will be recognized on the candidate’s transcript. A coordinator reviews each student’s coursework via a certificate worksheet and requirements met prior to certification. Certificate coordinators are given the discretion to determine the eligibility of students in other colleges and/or majors to pursue College of Engineering certificates. For specific information on each certificate available, visit the College of Engineering website.

College of Engineering
  • Business Management Certificate for Engineering Students (p. 348)
  • Engineering Honors Certificate (p. 349)
  • Engineering Leadership Certificate (p. 349)
  • International Engineering Certificate (p. 349)
  • Polymer Specialty Certificate (p. 349)
  • Safety Engineering Certificate (p. 350)

Department of Biomedical Engineering
  • Engineering Therapeutics Manufacturing Certificate (p. 359)
  • Quality Engineering for Regulated Medical Technologies Certificate (p. 359)

Department of Industrial and Systems Engineering
  • Data Center Operations Engineering Certificate (p. 403)
  • Engineering Systems Management Certificate (p. 403)

Harold Vance Department of Petroleum Engineering
  • Energy Engineering Certificate (p. 421)

Masters

College of Engineering
  • Master of Engineering in Engineering (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/engineering/interdepartmental-degree-programs/meng)
  • Master of Engineering in Systems Engineering (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/engineering/interdepartmental-degree-programs/systems-engineering-meng)
  • Master of Science in Interdisciplinary Engineering (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/engineering/interdepartmental-degree-programs/systems-engineering-ms)
  • Master of Science in Safety Engineering (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/engineering/interdepartmental-degree-programs/safety-engineering-ms)

Department of Aerospace Engineering
  • Master of Engineering in Aerospace Engineering (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/engineering/aerospace/meng)
• Master of Science in Aerospace Engineering (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/engineering/aerospace/ms)

Department of Biomedical Engineering
• Master of Engineering in Biomedical Engineering (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/engineering/biomedical/meng)
• Master of Science in Biomedical Engineering (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/engineering/biomedical/ms)

Artie McFerrin Department of Chemical Engineering
• Master of Engineering in Chemical Engineering (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/engineering/chemical/meng)
• Master of Science in Chemical Engineering (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/engineering/chemical/ms)

Zachry Department of Civil Engineering
• Master of Engineering in Civil Engineering (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/engineering/civil/meng)
• Master of Science in Civil Engineering (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/engineering/civil/ms)

Department of Computer Science and Engineering
• Master of Computer Science in Computer Science (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/engineering/computer-science/mcs)
• Master of Engineering in Computer Engineering, Computer Science (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/engineering/computer-science/engineering-meng)
• Master of Science in Computer Engineering, Computer Science (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/engineering/computer-science/engineering-ms)
• Master of Science in Computer Science (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/engineering/computer-science/ms)

Department of Electrical and Computer Engineering
• Master of Engineering in Computer Engineering, Electrical Engineering (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/engineering/electrical-computer/engineering-electrical-meng)
• Master of Science in Electrical Engineering (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/engineering/electrical-computer/electrical-ms)

• Master of Science in Nuclear Engineering (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/engineering/nuclear/ms)

Department of Ocean Engineering
• Master of Engineering in Ocean Engineering (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/engineering/ocean/ocean-meng)
• Master of Science in Ocean Engineering (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/engineering/ocean/ocean-ms)
Biological and Agricultural Engineering - BS

Graduates from the Biological and Agricultural Engineering program will:

- Successfully enter the biological and agricultural engineering profession as practicing engineers and consultants in the natural resources, machine systems, food processing, bioprocessing, and agricultural production and processing fields.
- Pursue graduate education and research at major universities in biological and agricultural engineering, and related fields.
- Advance into leadership positions in their chosen fields and professional societies.
- Engage in life-long learning through professional registration and professional development.

Students learn to apply fundamental knowledge of biological and physical sciences, mathematics, and engineering principles to formulate and solve engineering problems. Engineering design is integrated throughout the curriculum, along with opportunities to develop...
communication, learning, and teamwork skills, culminating in a capstone design experience. Electives in the curriculum allow the student to focus in one of the following areas:

- **Environmental and Natural Resources Engineering**—design and management of systems affecting soil, water, and air resources.
- **Renewable Energy Engineering**—design and development of biomass, wind and solar energy systems.
- **Food and Bioprocess Engineering**—design and development of systems for processing and handling of food and agricultural products and processes involving cells, enzymes, or other biological components.
- **Machine Systems Engineering**—design and development of machines and machine systems for food, feed and fiber production and processing.

Students select courses with the assistance of faculty advisors in an individualized advising system. Faculty members also assist with professional development and job placement for students.

The biological and agricultural engineering program is jointly administered by the College of Agriculture and Life Sciences and the College of Engineering, and the curriculum is fully accredited by the Engineering Accreditation Commission of ABET, Inc., www.abet.org. The department is one of the largest in North America and is consistently ranked as one of the top programs in the nation.

For graduates to become successful practicing biological and agricultural engineers, students need to acquire a set of skills, knowledge, and behaviors as they progress through the curriculum. We have established the following program outcomes outlining what students are expected to know and be able to do upon completion of the curriculum. At the time of graduation, students should have:

1. an ability to apply knowledge of mathematics, science and engineering;
2. an ability to design and conduct experiments, as well as to analyze and interpret data;
3. an ability to design a system, component, or process to meet desired needs within realistic constraints such as economic, environmental, social, political, ethical, health and safety, manufacturability, and sustainability;
4. an ability to function on multidisciplinary teams;
5. an ability to identify, formulate, and solve engineering problems;
6. an understanding of professional and ethical responsibility;
7. an ability to communicate effectively;
8. the broad education necessary to understand the impact of engineering solutions in a global, economic, environmental, and societal context;
9. a recognition of the need for, and an ability to engage in life-long learning;
10. a knowledge of contemporary issues;
11. an ability to use the techniques, skills, and modern engineering tools necessary for engineering practice.

1. Entering students will normally be given a placement test in mathematics. Test results will be used in selecting the appropriate starting course which may be at a higher or lower level.

2. The six hours of international and cultural diversity courses, as required for graduation, may be met by courses that also satisfy a core curriculum course.

3. Engineering, mathematics and technical electives must be selected from a departmental approved list in consultation with an academic advisor.

4. All undergraduate students must take at least two (2) specific courses in their major designated as writing intensive.

5. All engineering students are required to complete a high-impact experience in order to graduate. The list of possible high-impact experiences is available in the BAEN advising office.

A grade of C or better is required for all math, science, and engineering courses.

### Interdisciplinary Engineering - BS

The College of Engineering offers a BS in Interdisciplinary Engineering.
inclusion of these courses in the minor will allow students to specialize in the area of cybersecurity that is most closely aligned with their respective interests and their degree plans.

Minimum required GPA to declare minor is a 2.5.

Must make a grade of 'C' or better in each course used towards minor.

Must achieve an overall GPA of 2.5 in approved minor coursework.

Minimum of 6 hours at 300-400 level.

Engineering Project Management - Minor

The Engineering Project Management minor is intended to help meet the requirements of industry by educating undergraduate engineering students to understand complex engineering projects, project organizations, and project management methods. Students completing this minor will be able to work effectively in multidisciplinary engineering projects immediately after completion and to advance more
rapidly within the project management organization and profession. The management of projects entails technical knowledge, engineering skills, and management skills.

To earn the minor, a student must complete a total of 16 semester credit hours that include prerequisite introductory core courses (ENGR 333 and ENGR 380) and courses selected from the following 4 categories:

1. **Business management and leadership.** The courses listed under this category provide required skills to understand the key management principles and provide leadership in project planning and execution.
2. **Project economics, analysis, and decisions.** The courses listed under this category provide advanced understanding of the analytical tools required to support project planning and execution.
3. **Application of project management tools.** The courses listed under this category provide examples of the application of project management principles.
4. **Project experience as directed studies.** The courses listed under this category provide practical experience in managing projects via internships, campus or community-based engagements, or research. Students should be able to receive credit via ENGR 485 for documenting their project experience.

#### Core Courses

**Business Management and Leadership**

Select from the following: 2-4

- MGMT 309 Survey of Management
- SOMS 380 Workshop in Leadership Education
- SOMS 381 Workshop in Leadership Education II
- SOMS 481 Seminar in Executive Leadership
- SOMS 482 Seminar in Executive Leadership II
- ESET 319 Engineering Leadership
- ENGR 289 Special Topics in... (Introduction to Engineering Leadership)
- ENGR 489 Special Topics in... (Leadership and Business Fundamentals)
- ENGR 489 Special Topics in... (Role of Engineering and Business in Society)
- ENGR 489 Special Topics in... (Exploring Your Leadership Qualities and Perspective)
- ENGR 489 Special Topics in... (Leadership Capstone)

**Project Economics, Analysis and Decisions**

Select from the following: 2-6

- ISEN 302 Economic Analysis of Engineering Projects
- or ISEN 302 Engineering Economic Analysis
- CVEN 322 Civil Engineering Systems
- CHEN 360 Risk Analysis in Safety Engineering
- SENG 430

**Application of Project Management Tools**

Select from the following: 3-6

- ISEN 411 Engineering Management Techniques
- CVEN 405 Construction Management of Field Operations
- CVEN 473 Engineering Project Estimating and Planning
- CVEN 349 Civil Engineering Project Management
- ISEN 330 Human Systems Interaction
- CSCE 431 Software Engineering
- CSCE 315 Programming Studio
- SENG 312 System Safety Engineering
- CHEN 460/SENG 460 Quantitative Risk Analysis in Safety Engineering
- ESET 329 Six Sigma and Applied Statistics
- ESET 419 Engineering Technology Capstone I
- BMEN 469 Entrepreneurial Issues in Biomedical Engineering
- MEEN 489 Special Topics in... (Entrepreneurship Related to Nanomaterials Application in Energy)
- ENGR 485 Directed Studies (Internship Project, Campus Project or Community Project)
- ENGR 491 Research (Research Project)

Total Semester Credit Hours

- 16

Minimum required GPA to declare minor is a 2.5.

Must earn a grade of ‘C’ or better in each course used towards minor.

Must achieve an overall GPA of 2.5 in approved minor coursework.

### Business Management - Certificate

The Business Management Certificate offers instruction in business acumen which complements the technical skills engineers receive through their major coursework. Recognized by the College of Engineering, it is a highly intensive program intended to teach the vital business competencies students need before entering the workforce. The certificate is comprised of the Business Management Initiative, which is an intensive 120-hour course that is held for three weeks in the summer of each year. Students attend class from 8 am-5 pm daily and learn the principles of accounting, finance, management and marketing. The course meetings are held at the Mays Business School, and courses are taught by business faculty. Students completing this course will be awarded a Business Management Certificate from the Mays Business School.
For additional information, contact Engineering Academic and Student Affairs, Engineering Activities Building B, (979) 845-7200.

**Engineering Honors - Certificate**

The Engineering Honors Certificate offers academically talented students the opportunity to pursue engineering studies of a depth and range that will fully challenge their abilities and meet their interests.

Engineering honors students have the opportunity to enroll in honors courses, obtain early involvement in graduate studies and participate in honors contracting and honors independent study. Students take part in special interdisciplinary seminars that focus on the practice of engineering in industry, research and development. These seminars promote student interaction with faculty, industry professionals and graduate student researchers.

The Engineering Honors Certificate is administered by the Engineering Academic and Student Affairs office in close collaboration with each engineering department.

Each departmental coordinator is responsible for setting policy as well as advising and mentoring the respective honors students.

For additional information, contact the Engineering Honors Certificate coordinator at engineeringhonors@tamu.edu or 979-845-7200.

**International Engineering - Certificate**

Advances in communications and transportation technologies coupled with a historical trend of nations moving towards market economies have made it possible for companies to function using the best locations and resources no matter where in the world. The resources available are of a wide variety including money, state-of-the-art technologies, knowledge and scientific discoveries, raw materials, components, and human resources. An effective engineer in this global environment is one that complements his/her core technical knowledge with excellent cross-cultural competence and international exposure. The certificate program prepares graduates for positions in multinational companies and foreign organizations.

For additional information, contact the International Engineering Certificate coordinator or Engineering Academic and Student Affairs, Engineering Activities Building B, (979) 845-7200.

^1 Three credit hours of at least a 200-level course in a single language (excluding English). Students could place out of this course with AP credit or by showing proficiency by exam. These courses can be taken in outside the U.S. However, immersion language to gain this basic level of language learning will not count for the international experience.

^2 To be selected from approved International and Cultural Diversity courses. At least one course must have significant focus on international diversity.

^3 Individualized and approved by the College of Engineering. May be satisfied by an approved study abroad program, international internship, directed study or research experience, or another approved course or field experience. The minimum time period to be aboard is one summer term. Students are encouraged to go abroad in programs that are appropriate to their academic and career objectives.

**Polymer Specialty - Certificate**

The Polymer Specialty Certificate is designed to provide a strong interdisciplinary educational program for undergraduate engineering and suitably prepared science students interested in pursuing a polymer career. The certificate will also provide knowledge to reduce the training time required to turn Texas A&M students into productive members of
the industrial workforce. This program is the first of its kind offered in the State of Texas and is administered by the Polymer Technology Center. No schools in the State of Texas offer a formal polymer curriculum, despite the significant role the polymer industry plays in the state’s economy.

For additional information, contact the Polymer Specialty Certificate coordinator or Engineering Academic and Student Affairs, Engineering Activities Building B, (979) 845-7200.

**Total Semester Credit Hours**

1 Up to 3 hours of credit can be substituted with research emphasizing polymers (provided polymer coursework has been initiated). Research must be approved by the director of the Polymer Technology Center.

Students should take at least 2 courses outside their department to receive the Polymer Certificate.

### Safety Engineering - Certificate

The Safety Engineering Certificate prepares the graduate for positions in several areas of safety engineering. Students must complete 15 semester credit hours of specified courses to earn a Safety Engineering Certificate. The Safety Program coordinator reviews each student’s coursework prior to certification.

For additional information, contact the Safety Engineering Certificate coordinator or Engineering Academic and Student Affairs, Engineering Activities Building B, (979) 845-7200.

### Department of Aerospace Engineering

Aerospace Engineering is a complex, rapidly changing field that includes aerodynamics, structures and materials, propulsion, dynamics and control, and astrodynamics. The primary application of Aerospace Engineering...
Engineering is to design and develop flight vehicles, such as aircraft, missiles, spacecraft and satellites. Aerospace engineering is also important and applicable to other vehicles and systems, such as rotorcraft, submarines, automobiles, wind turbines, advanced robotics, re-entry vehicles, exotic materials and computational simulations.

The mission of the Aerospace Engineering program is

1. to provide students with a quality undergraduate and graduate education for the State of Texas and the nation through an innovative educational program;
2. to advance the science and aerospace engineering knowledge base through basic and applied research, inventions, technologies and solutions to aerospace problems; and
3. to serve the aerospace engineering profession by preparing leaders for leadership in the creation, design and operation of the next generation aerospace systems.

To achieve this mission, the educational objectives established by the Aerospace Engineering undergraduate program are to produce graduates whose expected accomplishments within three to five years of graduation are

1. to have successful careers in industry, private practice, or government, or have pursued advanced graduate studies;
2. to be skilled practitioners who apply their knowledge and skills to solve relevant engineering problems in the aerospace or a related profession; and
3. to function well in teams, communicate well, continue enhancing their professional competence, and understand the impact of engineering solutions.

To carry out these educational objectives, the goals of the program are

1. using a high quality faculty, to provide a comprehensive aerospace engineering education that develops in students the fundamental skills necessary for the design, synthesis, analysis and research development of aircraft, spacecraft and other high technology flight systems; and
2. to prepare students for the aerospace engineering profession and related fields by developing the attributes needed, so that they can contribute successfully to society and to the engineering profession now and in the future.

The Department offers a Bachelor of Science in Aerospace Engineering with Honors degree option. This option was proposed by our students and implemented for our students. Very few programs across the country offer this type of experience within Aerospace Engineering. You will be part of an honors community and be provided with the opportunity to enhance your learning experience through one-on-one research with a faculty mentor, introduction to advanced aerospace theories, and much more. The Department also offers a Fast Track program, which is tailored for high-achieving undergraduate students who wish to extend their knowledge and gain an edge by earning a Master of Engineering (MEng) degree. Fast Track allows qualified students to earn up to nine hours of credit toward their Aerospace Engineering undergraduate and graduate degrees. Consequently, through Fast Track a student can earn a MEng degree in two semesters beyond their undergraduate degree.

Laboratories supplement theoretical studies in the major disciplines in the Department. Numerous wind tunnels for low-speed and supersonic aerodynamic studies, a jet engine test facility, numerous research aircraft, a flight simulator, a satellite laboratory with Integrated Concurrent Engineering Capability, a robotics laboratory, and state-of-the-art materials and structures testing equipment are available, equipped with modern instrumentation. The Department and the University also provide an extensive array of computing resources.

Students are encouraged to enrich their undergraduate experience through a variety of ways in the Department, including co-op and internship positions, student competition design projects, and even undergraduate research. In addition, students have the opportunity to study abroad or participate in an international exchange program.

The Department also offers programs of study leading to the MEng, MS, and PhD degrees (see the Texas A&M University Graduate and Professional Catalog). The Bachelor of Science in Aerospace Engineering degree is accredited by the Engineering Accreditation Commission of ABET, www.abet.org. Before commencing course work in the major, students must be admitted to the major or have the approval of the Department.

Whitcomb, John D, Professor
Aerospace Engineering
PHD, Virginia Polytechnic Institute and State University, 1988

White, Edward B, Professor
Aerospace Engineering
PHD, Arizona State University, 2000
Aerospace Engineering - BS

Coursework in aerodynamics, structures and materials, propulsion, and dynamics and control provide a strong fundamental basis for advanced study and specialization, while technical electives offer a concentration of study in fields of special interest. Design philosophy and practice are developed throughout the curriculum to relate analysis to aerospace engineering design. The design of aerospace system components is particularly emphasized in the junior- and senior-level courses. A senior-level two-semester design sequence, involving specific goals, objectives, and constraints, integrates analysis and design tools and requires students working in small teams to design, build, test, and even fly an aerospace system, such as an aircraft, rocket, or spacecraft. Application of modern engineering and computational tools is required and emphasized in all courses.

Program Requirements

The freshman year is identical for degrees in aerospace engineering, biomedical engineering, civil engineering, computer engineering, computer science, electrical engineering, electronic systems engineering technology, industrial distribution, industrial engineering, manufacturing and mechanical engineering technology, mechanical engineering, multidisciplinary engineering technology, nuclear engineering, ocean engineering, and petroleum engineering. The freshman year is slightly different for chemical engineering in that students take CHEM 101/CHEM 111 or CHEM 107/CHEM 117 and CHEM 102/CHEM 112. Biomedical Engineering also requires a two semester sequence of chemistry courses consisting of CHEM 101/CHEM 111 or CHEM 107/CHEM 117 and CHEM 102/CHEM 112. Students pursuing degrees in biological and agricultural engineering should refer to the specific curriculum for this major. It is recognized that many students will change the sequence and number of courses taken in any semester. Deviations from the prescribed course sequence, however, should be made with care to ensure that prerequisites for all courses are met.

**Additional Requirements**

- Overall GPR > 2.50 when entering the minor field of study.
- Major GPR >2.50 when entering the minor field of study.
- Must earn C or higher to count as a minor field of study.

**Prerequisites**

- Approval to pursue the minor from Aerospace; completion of CBKs with a C or better.

### Department of Biomedical Engineering

The objectives of the Biomedical Engineering program are to produce high-quality graduates with a broad-based education in engineering, life sciences and natural sciences applied to the fields of biomechanics, biomaterials, bioinstrumentation, and biomolecular and cellular engineering, who:

1. are well prepared for further graduate studies, careers in the biomedical or biotechnology industries or entry into medical or other professional schools;
2. will make significant contributions in biomedical industries, medicine and other sectors;
3. will apply acquired knowledge appropriately, work professionally with others, effectively communicate ideas and technical information and continue to learn and improve their knowledge base and skills.

These objectives are met through a modern and comprehensive curriculum taught by a well prepared, professionally active and dedicated...
faculty. In addition, the program actively supports professional development among the students through individual study and research opportunities, cooperative education and internships, and student society activities. These goals are measured by the success of the graduates in finding rewarding professional employment, and by admission to respected graduate and professional schools.

Design is an important part of biomedical engineering and design skills are emphasized throughout the curriculum, beginning in the freshman year, and culminating in the two-semester senior design course sequence that requires application of a wide range of engineering methods to a focused design project. Other courses in biomedical engineering and in supporting disciplines include examples of the application of the principles to design, as well as specific design exercises. The biomedical engineering curriculum is accredited by the Engineering Accreditation Commission of ABET, www.abet.org.

Before commencing coursework in the department, students must be admitted to the major or minor.

**Faculty**

Alge, Daniel L, Assistant Professor  
Biomedical Engineering  
PHD, Purdue University, 2010

Applegate, Brian E, Associate Professor  
Biomedical Engineering  
PHD, The Ohio State University, 2000

Bishop, Corey J, Assistant Professor  
Biomedical Engineering  
PHD, Johns Hopkins University School of Medicine, 2015

Biswa, Saurabh, Associate Professor of the Practice  
Biomedical Engineering  
PHD, Texas A&M University, 2011

Brewer, Maurice A, Professor of the Practice  
Biomedical Engineering  
MBA, Harvard Graduate School of Business Administration, 1984

Cosgriff-Hernandez, Elizabeth M, Associate Professor  
Biomedical Engineering

Cote, Gerard L, Professor  
Biomedical Engineering  
PHD, University of Connecticut, 1990

Criscone, John C, Professor  
Biomedical Engineering  
PHD, Johns Hopkins University School of Medicine, 2005

Gaharwar, Akhilesh K, Assistant Professor  
Biomedical Engineering  
PHD, Purdue University, 2011

Gibbs, Holly C, Lecturer  
Biomedical Engineering  
PHD, Texas A&M University, 2015

Grunlan, Melissa A, Professor  
Biomedical Engineering  
PHD, University of South Carolina, 2004

Guiseppi Elie, Anthony, Professor  
Biomedical Engineering  
PHD, Massachusetts Institute of Technology, 1983

Huang, Shuning, Lecturer  
Biomedical Engineering  
PHD, Massachusetts Institute of Technology, 2009

Hwang, Wonmuk, Associate Professor  
Biomedical Engineering  
PHD, Boston University, 2001

Jafari, Roozbeh, Associate Professor  
Biomedical Engineering  
PHD, University of California, Los Angeles, 2006

Jain, Abhishek, Assistant Professor  
Biomedical Engineering  
PHD, Boston University, 2012

Jo, Javier A, Associate Professor  
Biomedical Engineering  
PHD, University of Southern California, 2002

Kaunas, Roland R, Associate Professor  
Biomedical Engineering  
PHD, University of California, San Diego, 2003

Keller, Brandis K, Lecturer  
Biomedical Engineering  
PHD, Politecnico di Milano, 2013

Madigan, Michael L, Professor  
Biomedical Engineering  
PHD, Virginia Commonwealth University, 2001

Maitland, Duncan J, Professor  
Biomedical Engineering  
PHD, Northwestern University, 1995

Maitland, Kristen D, Associate Professor  
Biomedical Engineering  
PHD, The University of Texas at Austin, 2006

McDougall, Mary P, Associate Professor  
Biomedical Engineering  
PHD, Texas A&M University, 2004

McShane, Michael J, Professor  
Biomedical Engineering  
PHD, Texas A&M University, 1999

Monroe, Mary Beth, Lecturer  
Biomedical Engineering  
PHD, Texas A&M University, 2013

Ober, Raimund J, Professor  
Biomedical Engineering  
PHD, Cambridge University, 1987

Thyparambil, Aby, Lecturer  
Biomedical Engineering  
PHD, Clemson University, 2015
Yakovlev, Vladislav V, Professor
Biomedical Engineering
PHD, Moscow State University, 1990

Yeh, Alvin T, Associate Professor
Biomedical Engineering
PHD, University of California, Berkeley, 2000

### Biomedical Engineering - BS

The curriculum in biomedical engineering involves the development and application of engineering science and technology for living and medical systems. Although there have been individuals working in biomedical engineering for centuries, today’s modern educational programs are specifically designed to prepare engineers for this challenging field. The curriculum described is broadly based around a basic core of courses developed to prepare students for team involvement with other engineers and with physicians and life scientists in working to solve a wide array of biological and medical problems. Elective courses are included to accommodate individual student specialty interests within the fields of biomechanics, biomaterials, bioinstrumentation, and biomolecular and cellular engineering. Students interested in medical school can meet admission prerequisites through slight modifications and additions to the curriculum.

### Program Requirements

The freshman year is identical for degrees in aerospace engineering, biomedical engineering, civil engineering, computer engineering, computer science, electrical engineering, electronic systems engineering technology, industrial distribution, industrial engineering, manufacturing and mechanical engineering technology, mechanical engineering, multidisciplinary engineering technology, nuclear engineering, ocean engineering, and petroleum engineering. The freshman year is slightly different for chemical engineering in that students take CHEM 101/CHEM 111 or CHEM 107/ CHEM 117 and CHEM 102/CHEM 112, Biomedical Engineering also requires a two semester sequence of chemistry courses consisting of CHEM 101/CHEM 111 or CHEM 107/CHEM 117 and CHEM 102/CHEM 112. Students pursuing degrees in biological and agricultural engineering should refer to the specific curriculum for this major. It is recognized that many students will change the sequence and number of courses taken in any semester. Deviations from the prescribed course sequence, however, should be made with care to ensure that prerequisites for all courses are met.

Total Semester Credit Hours: 33

1. A grade of C or better is required.
2. Entering students will be given a math placement exam. Test results will be used in selecting the appropriate starting course which may be at a higher or lower level.
3. Of the 18 hours shown as University Core Curriculum electives, 3 must be from creative arts (for Industrial Distribution this is 3 hours from language, philosophy and culture, see IDIS curriculum for more information), 3 from social and behavioral sciences, 6 from American history, and 6 from government/political science. The required 6 hours from international and cultural diversity may be met by courses satisfying the creative arts, social and behavioral sciences (for Industrial Distribution this is language, philosophy and culture), and American history requirements if they are also on the approved list of international and cultural diversity courses.
4. BMEN and CHEN require 8 hours of freshman chemistry, which may be satisfied by CHEM 101/CHEM 111 or CHEM 107/CHEM 117 and CHEM 102/CHEM 112; Credit by Examination (CBE) for CHEM 101/CHEM 111 or CHEM 107/CHEM 117 plus CHEM 102/CHEM 112; or 8 hours of CBE for CHEM 101/CHEM 111 or CHEM 107/CHEM 117 and CHEM 102/CHEM 112.

Total Semester Credit Hours 95

1 A grade of C or better is required.

2 Of the 18 hours shown as University Core Curriculum electives, 3 must be from creative arts, 3 from social and behavioral sciences, 6 from American history, and 6 from government/political science. The required 6 hours from international and cultural diversity may be met by courses satisfying the creative arts, social and behavioral sciences, and American history requirements if they are also on the approved list of international and cultural diversity courses.

3 Technical electives are to be selected from the course list below. Students must select one of the following tracks and take 15 hours from within that track: Bioinstrumentation, Biomaterials, Biomechanics, or Biomolecular & Cellular Engineering. Course selection should be done in consultation with student’s advisor and track coordinator.

4 All students are required to complete a high-impact experience in order to graduate. A list of possible high-impact experiences is available in the BMEN advising office.

5 Writing intensive course.
Biomedical Engineering - Minor

The Department of Biomedical Engineering offers a minor to students within the College of Engineering who are interested in biomedical applications of engineering related to the sub-specialty fields of biomechanics, biomaterials, bioinstrumentation and biomolecular and cellular engineering. Eligible students must submit an application in order to be considered for and allowed to pursue a minor in Biomedical Engineering.

Requirements: In order to earn a Minor in Biomedical Engineering, students must meet and adhere to the following requirements and guidelines:

- Admitted into a College of Engineering major.
- In good academic standing within major department (GPR of 2.5 or higher).
- Maintain a cumulative 2.0 GPA in minor courses.
- Complete the courses listed for the selected Biomedical Engineering minor track.
- Following acceptance into a particular track, change of Biomedical Engineering minor track will not be permitted unless by petition and review by the Director of Undergraduate Programs.

Select one from the following:

- BMEN 101 Introduction to Biomedical Engineering
- BMEN 253 Medical Device Design I
- BMEN 450 Case Studies

Select 12 hours from one area:

**Bioinstrumentation Area**

- BMEN 321 Biomedical Electronics
- BMEN 420 Medical Imaging
- Bioinstrumentation technical electives

**Biomaterials Area**

- BMEN 343 Introduction to Biomaterials
- BMEN 344 Biological Responses to Medical Devices
- Biomaterials technical electives

**Biomechanics Area**

- BMEN 341 Biofluid Mechanics
- BMEN 361 Biosolid Mechanics

---

**Biomechanics**

Select from the following:

- CHEN 451 Introduction to Polymer Engineering
- MEEN 458 Processing and Characterization of Polymers
- MSEN 410 Materials Processing
- MSEN 420 Polymer Science

**Biomolecular and Cellular Engineering**

Required courses

- BMEN 431 Biomolecular Engineering
- BMEN 433 Biomolecular and Cellular Engineering Laboratory

Select from the following:

- BMEN 291 Research
- BMEN 491 Research
- BMEN 432 Molecular and Cellular Biomechanics
- BMEN 457 Orthopedic Biomechanics
- BMEN 458 Motion Biomechanics
- BMEN 461 Cardiac Mechanics
- BMEN 468 Advanced Biomechanics
- BMEN 471 Numerical Methods in Biomedical Engineering

**Biomolecular and Cellular Engineering**

Required courses

- MEEN 363 Dynamics and Vibrations
- MEEN 368 Solid Mechanics in Mechanical Design
- MEEN 440 Bio-inspired Engineering Design
- MEEN 441 Design of Mechanical Components and Systems
- MEEN 442 Computer Aided Engineering
- MEEN 444 Finite Element Analysis in Mechanical Engineering

Select from the following:

- BMEN 404 FDA Good Laboratory and Clinical Practices
- BMEN 406 Medical Device Path to Market
- BMEN 469 Entrepreneurial Issues in Biomedical Engineering
- ENGR 181 Engineering Honors Seminar I
- ENGR 281 Engineering Honors Mentoring & Team Building Seminar

Select from the following to apply to any of the tracks above:

- ENGR 381 Engineering Honors Leadership & Project Management Seminar
- ENGR 385 Problems for Co-Op Students
- CHEM 228 Organic Chemistry II
- VTPB 410 Cell Mechanisms of Disease
- VTPP 401 History of Human and Veterinary Medicine in Europe

400-Level BMEN with department approval (p. 745)
Students must select courses exclusively from one of the three areas represented and not mixed.

Students may use up to 6 hours from their home department to satisfy minor requirements. The following substitutions will be allowed: BMEN 321 can be replaced by ECEN 214 or 215; BMEN 343 can be replaced by MEEN 222, CHEN 313, or MSEN 310; BMEN 361 can be replaced by CVEN 305 or MEEN 368. All substitutions must be approved by the BMEN academic advisor and director.

See the departmental academic advisor for a complete list of technical electives.

Students must be admitted to a degree sequence in the College of Engineering or to the degree sequence in Biological and Agricultural Engineering. Applications are available in the Biomedical Engineering Advising Office and will be reviewed on a competitive basis.

**Engineering Therapeutics Manufacturing - Certificate**

The Engineering Therapeutics Manufacturing Certificate is intended to meet the requirements of industry by educating engineering Bachelor of Science graduates how to economically, ecologically and safely design and operate equipment used for the production and separation of biological materials. By the end of the certificate program, students will be able to:

1. understand the processing of biological materials
2. analyze functions and properties of biological materials
3. understand the impact of the use/misuse of biological materials
4. understand the life cycle and evolution of biological materials
5. design, operate and optimize biological process units

For additional information, contact the Engineering Therapeutics Manufacturing Certificate coordinator or Engineering Academic and Student Affairs, Engineering Activities Building B, (979) 845-7200.

**Quality Engineering for Regulated Medical Technologies - Certificate**

Quality engineering principles are mandated by federal and state regulations for clinical facilities and for the design, testing and manufacture of medical technologies (such as pharmaceuticals and imaging, diagnostic and therapeutic devices). Completion of this
The Medical Technologies Certificate requires specific instruction in quality engineering and regulation of medical technologies; moreover, candidates must go beyond understanding concepts and demonstrate appropriate usage of quality engineering principles in a medically related career, candidates for this certificate are expected to be entering a high-growth job market for engineers.

For additional information, contact the Quality Engineering for Regulated Medical Technologies Certificate coordinator or Engineering Academic Student Affairs, Engineering Activities Building B, (979) 845-7200.

Total Semester Credit Hours 12

1. Course cannot be used to satisfy the required courses, and both the undergraduate and graduate versions of the same course cannot be used. For example, BMEN 404 and BMEN 604 cannot both count toward fulfilling requirements.

**Artie McFerrin Department of Chemical Engineering**

Chemical engineering is a broad field of engineering and thus requires a diverse preparation in science and engineering. Distinguishing chemical engineering from other engineering disciplines is its use of chemical and biochemical reactions to produce products and materials for society. Traditionally, chemical engineers have provided leadership in the petrochemical, refining, chemical, polymer, and food processing industries. Because of strengths in the foundation sciences of mathematics, chemistry, physics and biology, as well as in engineering, this leadership role has now extended to the biochemical, biomedical, high-tech materials, semi-conductor and microelectronics, nanotechnology, environmental quality, safety, and a host of other areas. Chemical engineers have consistently commanded starting salaries among the highest of all college graduates because of the combined breadth and depth of their education.

The mission of the Artie McFerrin Department of Chemical Engineering at Texas A&M is to educate and prepare students for national and international leadership roles in industry, government, and academia; to attract top students to chemical engineering; to define and develop new directions in chemical engineering fundamentals and practices, and in chemical engineering education and curricula; to be a valuable resource and service base to the State and to industry; and to provide leadership in solving problems of social and economic importance.

Objectives of the chemical engineering program are that

1. graduates will have successful chemical engineering careers in industry, academia or government,
2. graduates will obtain, apply and transfer knowledge across disciplines and into emerging areas of chemical engineering and related fields,
3. graduates will communicate effectively, be leaders in their fields and work competently in interdisciplinary teams, and
4. graduates will be professionally responsible and ethical and engage in professional activities to impact the society on a global scale.

To supplement coursework, well-equipped laboratories provide our students with experiences in operating and analyzing a variety of unit operations and process control equipment and in the use of the modern computational tools and software used in chemical engineering. The department offers vibrant undergraduate research, co-op and study abroad programs that provide students with additional enrichment and experiential opportunities.

The undergraduate program in Chemical Engineering at Texas A&M University is accredited by the Engineering Accreditation Commission of ABET, www.abet.org, and compares favorably with the best in the nation.

Before commencing course work in the major, students must be admitted to the major or have the approval of the department.
Faculty

Akbulut, Mustafa, Associate Professor
Chemical Engineering
PHD, University of California, Santa Barbara, 2007

Balbuena, Perla B, Professor
Chemical Engineering
PHD, The University of Texas at Austin, 1996

Cheng, Zheng Dong, Professor
Chemical Engineering
PHD, Princeton University, 1999

El-Halwagi, Mahmoud M, Professor
Chemical Engineering
PHD, University of California, Los Angeles, 1990

Elabd, Yossef A, Professor
Chemical Engineering
PHD, Johns Hopkins University, 2001

Green, Micah, Associate Professor
Chemical Engineering
PHD, Massachusetts Institute of Technology, 2007

Harris, James E, Professor of the Practice
Chemical Engineering
PHD, The University of Texas at Austin, 1981

Hasan, M M Faruque, Assistant Professor
Chemical Engineering
PHD, National University of Singapore, 2010

Hilaly, Ahmad K, Professor of the Practice
Chemical Engineering
PHD, Colorado State University, 2009

Holtzapple, Mark T, Professor
Chemical Engineering
PHD, University of Pennsylvania, 1981

Isdale, Charles E, Senior Lecturer
Chemical Engineering
MBA, Southern Illinois University Edwardsville, 1977

Jayaraman, Arul, Professor
Chemical Engineering
PHD, University of California, Irvine, 1998

Jeong, Hae-Kwon, Associate Professor
Chemical Engineering
PHD, University of Minnesota, Twin Cities, 2004

Kao, Katy C, Associate Professor
Chemical Engineering
PHD, University of California, Los Angeles, 2005

Karim, M. Nazmul, Professor
Chemical Engineering
PHD, University of Manchester, 1977

Khosravianghadikolaei, Homa, Research Assistant Professor
Chemical Engineering
PHD, University of Illinois at Chicago, 2013

Kravaris, Costas, Professor
Chemical Engineering
PHD, California Institute of Technology, 1984

Kuo, Yue, Professor
Chemical Engineering
PHD, Columbia University, 1980

Kwon, Joseph, Assistant Professor
Chemical Engineering
PHD, University of California, Los Angeles, 2015

Lele, Pushkar P, Assistant Professor
Chemical Engineering
PHD, University of Delaware, 2010

Lutkenhaus, Jodie L, Associate Professor
Chemical Engineering
PHD, University of Notre Dame, 2003

Mannan, Mahboobul, Professor
Chemical Engineering
PHD, University of Oklahoma, 1986

Mashuga, Chad V, Assistant Professor
Chemical Engineering
PHD, Michigan Technological University, 1999

Pistikopoulos, Efstratios, Professor
Chemical Engineering
PHD, Carnegie Mellon University, 1988

Rogers, William J, Lecturer
Chemical Engineering
PHD, The Ohio State University, 1976

Seminario, Jorge M, Professor
Chemical Engineering
PHD, Southern Illinois University Carbondale, 1987

Tamamis, Phanourios, Assistant Professor
Chemical Engineering
PHD, University of Cyprus, 2010

Ugaz, Victor M., Professor
Chemical Engineering
PHD, Northwestern University, 1999

Vaddiraju, Sreram, Associate Professor
Chemical Engineering
PHD, University of Louisville, 2006

White, James D, Senior Lecturer
Chemical Engineering
BA, Texas A&M University, 1978

Wilhite, Benjamin A, Associate Professor
Chemical Engineering
PHD, University of Notre Dame, 2003

Wilson, Christin M, Lecturer
Chemical Engineering
PHD, The Ohio State University, 2012

Chemical Engineering - BS

The chemical engineering curriculum provides a balanced education in virtually all aspects of chemical engineering principles and practice and includes education in economics, language, philosophy and culture and communication. Chemical engineering courses emphasize fundamentals and methods that are applicable to the analysis, development, design and operation of a wide variety of chemical engineering systems and processes, thereby providing the necessary background for entry into the wide array of activities described above. At the same time, specific example applications provide the student with insight into the ability of chemical engineers to work in such a variety of areas. The curriculum is structured to offer students an opportunity to extend and apply the fundamentals developed in the basic courses toward more focused areas of specialization. The sequence of courses converges in the senior year into a comprehensive capstone design course that includes elements of economics, safety and environmental issues. The course provides an experience much like that of an industry design project. It is this philosophy of fundamentals, applications and design that has enabled our chemical engineering graduates to adapt readily to a dynamic and rapidly changing world and to solve problems they have not previously experienced.

Minimum GPR of 3.0 with at least 30 hours of Texas A&M credits completed.

Zachry Department of Civil Engineering

Civil Engineering

Civil engineers plan, design, supervise the construction, operate, maintain, inspect, retrofit, and manage many of the facilities and systems in both public and private sectors that are essential to modern life. The civil engineering profession is one of the most stable and most diverse of the engineering disciplines. Civil engineers are employed by consulting firms, public agencies, and start and operate their own business. Workplaces range from construction sites to design offices. Most civil engineers work with some engineering or construction aspect of private and/or public facilities, such as airports, bridges, buildings, coastal structures, dams, environmental remediation of contaminated sites, harbors, highways, offshore structures, pipelines, railroads, transportation systems, tunnels, water collection systems, water distribution systems, water and wastewater treatment facilities, and waterways. Civil engineers are on the forefront of applying the newest technology innovations in engineering and construction.

Civil engineering projects are unique because they require individual planning, analysis, design, construction supervision, performance monitoring, management and retrofitting. Civil engineering projects often require technical, governmental, legal, financial, and social evaluations. The primary objective is to provide the best service for the users while minimizing costs and other undesirable impacts.

The mission of the Zachry Department of Civil Engineering (http://engineering.tamu.edu/civil) at Texas A&M University is to prepare our graduates to become professional engineers and leaders in the civil engineering profession by providing our students with a solid education that will enable them to integrate fundamental scientific engineering principles and that will couple with the latest technological advances to facilitate the development of their problem solving skills. Additionally, the department provides opportunities for enhancement of the students’ educational experience through meaningful interactions with the profession, professionally-centered student activities and exposure to the broad field of civil engineering through seminars, practitioner visits, and Professional Day activities.

The faculty of the Zachry Department of Civil Engineering strives to ensure that our ever-evolving educational programs accomplish several objectives. First, our faculty must prepare the students to address the current and future civil engineering needs of the State of Texas, the nation and the world by being able to recognize the important geopolitical and public policy needs; and solve technical problems. In addition, the Department provides a curriculum that integrates scientific and technical knowledge with an appreciation for social, economic and political concerns. The curriculum and programs provide opportunities for our students to:

1. build leadership skills,
2. learn professionalism and ethical responsibility, and
3. develop and understanding of the need to engage in lifelong learning.

Finally, the faculty of the Zachry Department of Civil Engineering at Texas A&M University promotes the highest academic standards of excellence, quality, and ethics in both our undergraduate and graduate programs, and in doing so create both a culture of excellence and a community of scholars. Through our programs, our faculty and graduates provide local, state, national, and international leadership to a profession that must solve the civil engineering problems facing an increasingly complex society.

The program educational objectives for the undergraduate civil engineering program within the Department of Civil Engineering at Texas A&M University are to produce graduates:

1. who are prepared to enter civil engineering practice and/or continue their education through study in graduate and professional programs,
2. most of whom will become practicing civil engineers with most of these becoming licensed professional engineers, and
3. many of whom will pursue advanced studies.

The undergraduate program in civil engineering within the Zachry Department of Civil Engineering at Texas A&M is accredited by the Engineering Accreditation Commission of ABET, www.abet.org. Graduate programs in civil engineering are also available. These programs allow
further specialization and offer more in-depth study to address more complex technical and management issues. Graduate degrees also offer additional employment opportunities.

Before commencing course work in the major, students must be admitted to the major or have the approval of the department.

**Faculty**

Appleton, Robert A, Associate Professor of the Practice  
Civil Engineering  
BS, Texas A&M University, 1984

Ardani, Samira, Assistant Lecturer  
Civil Engineering  
PHD, Texas A&M University, 2016

Aubeny, Charles P, Professor  
Civil Engineering  
PHD, Massachusetts Institute of Technology, 1992

Autenrieth, Robin L, Professor  
Civil Engineering  
PHD, Clarkson University, 1986

Civil Engineering  
PHD, University of Minnesota, Twin Cities, 1996

Bracci, Joseph M, Professor  
Civil Engineering  
PHD, State University of New York at Buffalo, 1992

Brackin, Michael S, Assistant Lecturer  
Civil Engineering  
MS, Texas A&M University, 2010

Briaud, Jean-Louis, Professor  
Civil Engineering  
PHD, University of Ottawa, Canada, 1979

Brumbelow, James K, Associate Professor  
Civil Engineering  
PHD, Georgia Institute of Technology, 2001

Burris, Mark W, Professor  
Civil Engineering  
PHD, University of South Florida, 2001

Cahill, Anthony T, Associate Professor  
Civil Engineering  
PHD, Johns Hopkins University, 1998

Cha, Minsu, Assistant Professor  
Civil Engineering  
PHD, Georgia Institute of Technology, 2012

Chang, Kuang-An, Professor  
Civil Engineering  
PHD, Cornell University, 1999

Chellam, Shankararaman, Professor  
Civil Engineering  
PHD, Rice University, 1995

Chen, Hamm C, Professor  
Civil Engineering  
PHD, University of Iowa, 1982

Chinn, Timothy D, Professor of the Practice  
Civil Engineering  
BS, Texas A&M University, 1980

Chu, Kung-Hui, Associate Professor  
Civil Engineering  
PHD, University of California, Berkeley, 1998

Damnjanovic, Ivan, Associate Professor  
Civil Engineering  
PHD, The University of Texas at Austin, 2006

England, Peter S, Instructional Associate Professor  
Civil Engineering  
PHD, Texas Tech University, 2011

Ford, David N, Professor  
Civil Engineering  
PHD, Massachusetts Institute of Technology, 1995

Gao, Huilin, Assistant Professor  
Civil Engineering  
PHD, Princeton University, 2005

Gharaibeh, Nasir G, Associate Professor  
Civil Engineering  
PHD, University of Illinois at Urbana-Champaign, 1997

Grasley, Zachary C, Professor  
Civil Engineering  
PHD, University of Illinois at Urbana-Champaign, 2006

Hawkins, Harvey E, Professor  
Civil Engineering  
PHD, Texas A&M University, 1993

Hueste, Marybeth D, Professor  
Civil Engineering  
PHD, University of Michigan, 1997

Hurlebaus, Stefan, Professor  
Civil Engineering  
PHD, University of Stuttgart, Germany, 2002

Hutchinson, Richard N, Instructional Assistant Professor  
Civil Engineering  
MEN, Texas A&M University, 2001
Kaihatu, James M, Associate Professor
Civil Engineering
PHD, University of Delaware, 1994

Kanta, Lufthansa R, Instructional Assistant Professor
Civil Engineering
PHD, Texas A&M University, 2009

Keating, Peter B, Associate Professor
Civil Engineering
PHD, Lehigh University, 1987

Koliou, Maria, Assistant Professor
Civil Engineering
PHD, State University of New York at Buffalo, 2014

Little, Dallas N, Professor
Civil Engineering
PHD, Texas A&M University, 1979

London, Mara R, Instructional Associate Professor
Civil Engineering
PHD, The University of Texas at Austin, 2009

Lord, Dominique, Professor
Civil Engineering
PHD, University of Toronto, 2000

Lowery, Lee L, Professor
Civil Engineering
PHD, Texas A&M University, 1967

Lytton, Robert L, Professor
Civil Engineering
PHD, The University of Texas at Austin, 1967

Ma, Xingmao, Associate Professor
Civil Engineering
PHD, Missouri University of Science and Technology, 2004

Mander, John B, Professor
Civil Engineering
PHD, University of Canterbury, 1984

Martin, Amy E, Professor
Civil Engineering
PHD, University of California, Berkeley, 1997

Medina Cetina, Zenon, Associate Professor
Civil Engineering
PHD, Johns Hopkins University, 2007

Mercier, Richard S, Professor
Civil Engineering
PHD, Massachusetts Institute of Technology, 1985

Miller, Gretchen R, Associate Professor
Civil Engineering
PHD, University of California, Berkeley, 2009

Mostafavidarani, Ali, Assistant Professor
Civil Engineering
PHD, Purdue University, 2013

Niedzwecki, John M, Professor
Civil Engineering
PHD, The Catholic University of America, 1977

Noshadravan, Arash, Research Assistant Professor
Civil Engineering
PHD, University of Southern California, 2011

Olivera, Francisco, Associate Professor
Civil Engineering
PHD, The University of Texas at Austin, 1996

Otey, Jeffrey M, Instructional Assistant Professor
Civil Engineering
MEN, Texas A&M University, 1994

Paal, Stephanie G, Assistant Professor
Civil Engineering
PHD, Georgia Institute of Technology, 2013

Pittman, Leslie W, Associate Professor of the Practice
Civil Engineering
MS, Colorado State University, 1978

Quadrifoglio, Luca, Associate Professor
Civil Engineering
PHD, University of Southern California, 2005

Rogers, Alton G, Associate Professor of the Practice
Civil Engineering
BS, Texas A&M University, 1976

Sakhaei Far, Maryam S, Assistant Professor
Civil Engineering
PHD, North Carolina State University, 2011

Sanchez Castilla, Marcelo Javier, Professor
Civil Engineering
PHD, Universidad Politecnica de Catalunya, Spain, 2004

Scarfuto, Jessica C, Assistant Lecturer
Civil Engineering
MS, Texas A&M University, 2014

Sideris, Petros, Assistant Professor
Civil Engineering
PHD, State University of New York at Buffalo, 2012

Socolofsky, Scott A, Professor
Civil Engineering
PHD, Massachusetts Institute of Technology, 2001

Talebpour, Alireza, Assistant Professor
Civil Engineering
PHD, Northwestern University, 2015

Walewski, John A, Associate Professor of the Practice
Civil Engineering
PHD, The University of Texas at Austin, 2005

Wang, Xiubin B, Associate Professor
Civil Engineering
PHD, University of California, Irvine, 2001
Wolf, Charles M, Professor of the Practice  
Civil Engineering  
DEN, Texas A&M University, 2001

Wurbs, Ralph A, Senior Professor  
Civil Engineering  
PHD, Colorado State University, 1978

Ying, Qi, Associate Professor  
Civil Engineering  
PHD, University of California, Davis, 2004

Zhang, Yunlong, Professor  
Civil Engineering  
PHD, Virginia Polytechnic Institute and State University, 1996

Zollinger, Dan, Professor  
Civil Engineering  
PHD, University of Illinois at Urbana-Champaign, 1989

**Majors**

- Bachelor of Science in Civil Engineering (p. 366)
- Bachelor of Science in Civil Engineering, Coastal and Ocean Engineering Track (p. 367)
- Bachelor of Science in Civil Engineering, Construction Engineering and Management Track (p. 369)
- Bachelor of Science in Civil Engineering, Environmental Engineering Track (p. 371)
- Bachelor of Science in Civil Engineering, General Civil Engineering Track (p. 373)
- Bachelor of Science in Civil Engineering, Geotechnical Engineering Track (p. 376)
- Bachelor of Science in Civil Engineering, Structural Engineering Track (p. 377)
- Bachelor of Science in Civil Engineering, Transportation Engineering Track (p. 379)
- Bachelor of Science in Civil Engineering, Water Resources Engineering Track (p. 381)

**Civil Engineering - BS**

The first two years of the civil engineering curriculum build a solid foundation in mathematics, science and engineering science which are the necessary building blocks for a successful career in engineering. The third year provides an introduction to the various civil engineering disciplines and engineering principles, methods of analysis, and design. The fourth year provides the opportunity to pursue either a broad based program in general civil engineering or pursue more depth in an area of specialization by choice of one of eight tracks, described further below. The curriculum also includes courses in history, government/political science, social sciences, language, philosophy and culture and creative arts that help students:

1. understand the need for considering the global and societal context in which engineering solutions are completed,
2. understand professional and ethical responsibility, and
3. be knowledgeable of contemporary issues.

Students are encouraged to participate in cooperative education or to intern with civil engineering agencies during their undergraduate education.

All students must choose one of the eight tracks in the BS in Civil Engineering curriculum: construction engineering and management (p. 369), coastal and ocean (p. 367), environmental (p. 371), general (p. 373), geotechnical (p. 376), structural (p. 377), transportation (p. 379), and water resources (p. 381). The choice of track determines acceptable courses for technical electives listed in the general curriculum.

**Program Requirements**

The freshman year is identical for degrees in aerospace engineering, biomedical engineering, civil engineering, computer engineering, computer science, electrical engineering, electronic systems engineering technology, industrial distribution, industrial engineering, manufacturing and mechanical engineering technology, mechanical engineering, multidisciplinary engineering technology, nuclear engineering, ocean engineering, and petroleum engineering. The freshman year is slightly different for chemical engineering in that students take CHEM 101/111 or CHEM 107/117 and CHEM 102/112; Biomedical Engineering also requires a two semester sequence of chemistry courses consisting of CHEM 101/111 or CHEM 107/117 and CHEM 102/112.

Students pursuing degrees in biological and agricultural engineering should refer to the specific curriculum for this major. It is recognized that many students will change the sequence and number of courses taken in any semester. Deviations from the prescribed course sequence, however, should be made with care to ensure that prerequisites for all courses are met.

Civil Engineering, BS - Coastal and Ocean Engineering Track

The Coastal and Ocean Engineering Track to fulfill the BS in Civil Engineering degree emphasizes breadth across civil engineering with a focus on coastal and offshore engineering. The focus electives prepare students to analyze and design systems for shallow and deep water environments. The track is appropriate for a career related to coastal and offshore engineering, and for those planning on further specialization in graduate studies.

Program Requirements

The freshman year is identical for degrees in aerospace engineering, biomedical engineering, civil engineering, computer engineering, computer science, electrical engineering, electronic systems engineering technology, industrial distribution, industrial engineering, manufacturing and mechanical engineering technology, mechanical engineering, multidisciplinary engineering technology, nuclear engineering, ocean engineering, and petroleum engineering. The freshman year is slightly different for chemical engineering in that students take CHEM 101/111 or CHEM 107/117 and CHEM 102/112. Biomedical Engineering also requires a two semester sequence of chemistry courses consisting of 18 hours shown as University Core Curriculum electives, 3 must be from creative arts (for Industrial Distribution this is 3 hours from language, philosophy and culture, see IDIS curriculum for more information), 3 from social and behavioral sciences, 6 from American history, and 6 from government/political science. The required 6 hours from international and cultural diversity may be met by courses satisfying the creative arts, social and behavioral sciences (for Industrial Distribution this is language, philosophy and culture), and American history requirements if they are also on the approved list of international and cultural diversity courses.

BMEN and CHEN require 8 hours of freshman chemistry, which may be satisfied by CHEM 101/111 or CHEM 107/117 and CHEM 102/112; Credit by Examination (CBE) for CHEM 101/111 or CHEM 107/117 plus CHEM 102/112, or 8 hours of CBE for CHEM 101/111 or CHEM 107/117 and CHEM 102/112.
of CHEM 101/CHEM 111 or CHEM 107/CHEM 117 and CHEM 102/CHEM 112. Students pursuing degrees in biological and agricultural engineering should refer to the specific curriculum for this major. It is recognized that many students will change the sequence and number of courses taken in any semester. Deviations from the prescribed course sequence, however, should be made with care to ensure that prerequisites for all courses are met.

A total of 33 hours of technical electives is required. Technical electives are divided into four categories: science courses, breadth courses, focus courses, and capstone design courses. The choice of courses to be taken in each of the four categories depends on the track chosen and must be made in consultation with the student’s advisor and/or the Civil Engineering Undergraduate Student Services Office. Capstone design courses must include more than one civil engineering context.

All students must take at least two courses in their major that are designated as writing intensive (W). ENGR 482/PHIL 482 and CVEN 424 taken at Texas A&M satisfy this requirement. Other CVEN courses may be approved as W courses at a later date. A grade of C or better is required in these courses.

A grade of C or better is required in all science, mathematics and engineering courses taken to satisfy degree requirements.

**Total Program Hours 128**

**Coastal and Ocean Engineering Track - Technical Electives**

Technical electives for the BS in Civil Engineering, Coastal and Ocean Engineering Track are composed of a SCIENCE course (3 semester credit hours), BREADTH courses (10-11 semester credit hours), FOCUS courses (16 semester credit hours), and a CAPSTONE DESIGN course (3-4 semester credit hours), as delineated below, for a total of 33 semester credit hours. A substitution for any course in the track must be approved in writing by the Civil Engineering Undergraduate Student Services Office, CE Building, Room 141.

**Civil Engineering - BS, Construction Engineering and Management Track**

The Construction Engineering and Management Track to fulfill the BS in Civil Engineering degree emphasizes specialized coursework in the fundamentals of construction engineering and project management. The Track blends the principles of basic science, engineering, and technology with a strong component of business coursework. The Track is appropriate for students interested in a career in the construction industry.
### Program Requirements

The freshman year is identical for degrees in aerospace engineering, biomedical engineering, civil engineering, computer engineering, computer science, electrical engineering, electronic systems engineering technology, industrial distribution, industrial engineering, manufacturing and mechanical engineering technology, mechanical engineering, multidisciplinary engineering technology, nuclear engineering, ocean engineering, and petroleum engineering.

1 CVEN 403 is a 2 semester credit hour course. Students must typically earn an additional 1 semester credit hour of Focus course credit and should consult with their advisors for guidance on appropriate courses with which to earn this credit.

Civil Engineering - BS, Environmental Engineering Track

The Environmental Engineering Track to fulfill the BS in Civil Engineering degree emphasizes specialized coursework in water and waste water treatment, air and water quality management, solid and hazardous wastes, ground water protection and remediation, and environmental policy. The track is appropriate for those wishing to pursue careers in protecting the natural environment from human activities, protecting human populations from the effects of adverse environmental factors and improving the environmental quality for human health and well-being.

1 The sum of semester credit hours of Breadth and Focus courses must be at least 27.

Civil Engineering - BS, General Civil Engineering Track

The General Civil Engineering Track to fulfill the BS in Civil Engineering degree emphasizes breadth across the civil engineering field. Students take courses in all major sub-disciplines of civil engineering with an advanced focus elective allowing deeper learning in one area. The track is appropriate for a career in any area of civil engineering, with particular relevance for those interested in public works, land development, and general civil, and for those planning on further specialization in graduate studies.

Program Requirements

The freshman year is identical for degrees in aerospace engineering, biomedical engineering, civil engineering, computer engineering, computer science, electrical engineering, electronic systems engineering technology, industrial distribution, industrial engineering, manufacturing and mechanical engineering technology, mechanical engineering, multidisciplinary engineering technology, nuclear engineering, ocean engineering, and petroleum engineering. The freshman year is slightly different for chemical engineering in that students take CHEM 101/CHEM 111 or CHEM 107/CHEM 117 and CHEM 102/CHEM 112, Biomedical Engineering also
requires a two semester sequence of chemistry courses consisting of 
CHEM 101/ CHEM 111 or CHEM 107/ CHEM 117 and CHEM 102/ CHEM 112. 
Students pursuing degrees in biological and agricultural engineering 
should refer to the specific curriculum for this major. It is recognized that 
many students will change the sequence and number of courses taken in 
any semester. Deviations from the prescribed course sequence, however, 
should be made with care to ensure that prerequisites for all courses are 
met.

</table>

1. A grade of C or better is required.
2. Entering students will be given a math placement exam. Test results will be used in selecting the appropriate starting course which may be at a higher or lower level.
3. Of the 18 hours shown as University Core Curriculum electives, 3 must be from creative arts (for Industrial Distribution this is 3 hours from language, philosophy and culture, see IDIS curriculum for more information), 3 from social and behavioral sciences, 6 from American history, and 6 from government/political science. The required 6 hours from international and cultural diversity may be met by courses satisfying the creative arts, social and behavioral sciences (for Industrial Distribution this is language, philosophy and culture), and American history requirements if they are also on the approved list of international and cultural diversity courses.
4. BMEN and CHEN require 8 hours of freshman chemistry, which may be satisfied by CHEM 101/ CHEM 111 or CHEM 107/ CHEM 117 and CHEM 102/ CHEM 112; Credit by Examination (CBE) for CHEM 101/ CHEM 111 or CHEM 107/ CHEM 117 plus CHEM 102/ CHEM 112; or 8 hours of CBE for CHEM 101/ CHEM 111 or CHEM 107/ CHEM 117 and CHEM 102/ CHEM 112.

A total of 33 hours of technical electives is required. Technical electives are divided into four categories: science courses, breadth courses, focus courses, and capstone design courses. The choice of courses to be taken in each of the four categories depends on the track chosen and must be made in consultation with the student's advisor and/or the Civil Engineering Undergraduate Student Services Office. Capstone design courses must include more than one civil engineering context.

All students must take at least two courses in their major that are designated as writing intensive (W). ENGR 482/PHIL 482 and CVEN 424 taken at Texas A&M satisfy this requirement. Other CVEN courses may be approved as W courses at a later date. A grade of C or better is required in these courses.

A grade of C or better is required in all science, mathematics and engineering courses taken to satisfy degree requirements.

Total Program Hours 128

**General Civil Engineering Track - Technical Electives**

Technical electives for the BS in Civil Engineering, General Civil Engineering Track are composed of a SCIENCE course (3 semester credit hours), BREADTH courses (24 semester credit hours), a FOCUS course (3 semester credit hours), and a CAPSTONE DESIGN course (3 semester credit hours), as delineated below, for a total of 33 semester credit hours. A substitution for any course in the track must be approved in writing by the Civil Engineering Undergraduate Student Services Office, CE Building, Room 141.

1 CVEN 403 is a 2 semester credit hour course. Students must typically earn an additional 1 semester credit hour of Focus course credit and should consult with their advisors for guidance on appropriate courses with which to earn this credit.
Civil Engineering - BS, Geotechnical Engineering Track

The Geotechnical Engineering Track to fulfill the BS in Civil Engineering degree emphasizes specialized coursework in applied soil mechanics and foundation engineering, as well as civil engineering sub-disciplines with strong geotechnical engineering connections such as structures, water resources, construction, transportation, environmental, coastal and ocean engineering. The track is appropriate for those wishing to pursue careers in engineering design and management of infrastructure in a wide array of sectors that can include energy, transportation, and water resources.

Program Requirements

The freshman year is identical for degrees in aerospace engineering, biomedical engineering, civil engineering, computer engineering, computer science, electrical engineering, electronic systems engineering technology, industrial distribution, industrial engineering, manufacturing and mechanical engineering technology, mechanical engineering, multidisciplinary engineering technology, nuclear engineering, ocean engineering, and petroleum engineering. Civil Engineering - BS, Transportation Engineering Track

The Transportation Engineering Track to fulfill the BS in Civil Engineering degree emphasizes specialized coursework in transportation engineering areas of planning, design, and operations, as well as civil engineering sub-disciplines with strong transportation connections such as water resources, construction, and geotechnical. The track is appropriate for
those wishing to pursue careers in engineering related to the planning, design, construction, operation, and maintenance of various elements of the transportation system, including roads, rail, transit, and aviation.

**Program Requirements**

The freshman year is identical for degrees in aerospace engineering, biomedical engineering, civil engineering, computer engineering, computer science, electrical engineering, electronic systems engineering technology, industrial distribution, industrial engineering, manufacturing and mechanical engineering technology, mechanical engineering, multidisciplinary engineering technology, nuclear engineering, ocean engineering, and petroleum engineering.

The freshman year is slightly different for chemical engineering in that students take CHEM 101/CHEM 111 or CHEM 107/CHEM 112. Biomedical Engineering also requires a two semester sequence of chemistry courses consisting of CHEM 101/CHEM 111 or CHEM 107/CHEM 117 and CHEM 102/CHEM 112. Students pursuing degrees in biological and agricultural engineering should refer to the specific curriculum for this major. It is recognized that many students will change the sequence and number of courses taken in any semester. Deviations from the prescribed course sequence, however, should be made with care to ensure that prerequisites for all courses are met.

1 CVEN 403 is a 2 semester credit hour course. Students must typically earn an additional 1 semester credit hour of Focus course credit and should consult with their advisors for guidance on appropriate courses with which to earn this credit.

**Department of Computer Science & Engineering**

**Computer Science**

The curriculum in computer science is designed to prepare students to enter the rapidly expanding computer field. Curricula and courses are based upon recommendations by the Institute of Electrical and
Program Objectives
1. Graduates who choose to enter the workforce will become productive and valuable professionals in their field.
2. Graduates who choose to pursue advanced degrees will be able to gain admission to graduate programs and will become successful graduate students.
3. Graduates will understand the importance of lifelong learning to adapt to new technologies, tools and methodologies with the ability to respond to a changing world.

The four-year undergraduate curriculum in computer science at Texas A&M provides a sound preparation in computing, as well as in science, mathematics, English, and statistics. Students take a broad set of core computer science courses in the first two years, which exposes them to the main concepts in computing. During the last two years, students take elective computer science courses drawn from four tracks (theory, computer systems, software, and information and intelligent systems) to provide both breadth and depth. The electives can be used to tailor the curriculum to match the student’s interests. Graduate courses may be taken by qualified students for some of the electives.

A major in computer science includes a 12-hour area of concentration. This allows students to design a course of study that complements their computer science coursework and takes advantage of opportunities offered by other departments across the University.

The Department of Computer Science and Engineering has significant computer resources of its own, shares resources with other departments and makes use of University systems. Departmental resources for students include modern workstations, large computer servers; disk servers; and massively parallel systems as well as network access to the University supercomputers.

Students must submit a formal degree plan during the first full semester in the department. Departmental advisors are available for assistance.

Computer Engineering
The Computer Engineering curricula provide a balanced view of hardware, software, hardware-software trade-offs, analysis, design, and implementation techniques. It is a dynamic and broadly interdisciplinary field that continues to experience rapid professional growth that impacts every area of human endeavor. The Computer Engineering program is accredited by the Engineering Accreditation Commission of ABET, www.abet.org.

Program Mission
The mission of the Computer Engineering program is to provide students with an education that ensures an excellent understanding of hardware and software systems and the necessary system design and development skills, and that fosters professional curiosity and imagination that drives them throughout their career.

The program will stimulate and challenge the students with an exceptional, highly motivated faculty that shares its knowledge and excitement about Computer Engineering, well designed undergraduate and graduate curricula, research opportunities at all levels, and a first-class educational infrastructure.

The program strives to produce graduates who are well prepared to excel in industry, academia and government, and who will take on leadership roles in shaping the technological landscape of the future.

Program Objectives
In support of this mission, the Computer Engineering program has defined the following educational objectives:

1. Graduates of the program will have the necessary knowledge, both in breadth and depth, to pursue the practice, or advanced study, of Computer Engineering.
2. Graduates of the program will understand the importance of life-long learning, and be prepared to learn and understand new technological developments in their field.
3. Graduates of the program will understand the technical, social and ethical context of their engineering contributions.
4. Graduates of the program will develop the communication, teamwork, and leadership skills necessary to carry on the legacy of excellence of an Aggie Engineer.

The program periodically evaluates these objectives and assesses the level at which they are met. Input in this ongoing effort is provided by alumni, employers and recruiters, the faculty, and by external advisors to the program. This feedback drives the continuous improvement both of individual courses and of the overall curriculum. For more information on this process contact the Computer Engineering Program website.

Throughout this program, the student works with state-of-the-art computers and laboratory equipment and is exposed to the most recent analytical techniques and technological developments. Significant association with the program’s faculty, who are actively engaged in research and professional consulting activities, serves to acquaint the student with the opportunities and rewards available to the practicing Computer Engineering professional.

Majors
- Bachelor of Science in Computer Engineering, Computer Science Track (p. 384)
- Bachelor of Science in Computer Science (p. 386)

Minors
- Computer Science Minor (p. 387)
- Game Design and Development Minor (p. 388)

Computer Engineering - BS, Computer Science Track
The curriculum is designed to cover the engineering aspects of both hardware and software—a total computer systems perspective. All computer engineering students take courses in the following areas: electrical circuits, electronics, digital circuits, computer architecture...
ranging from microcomputers to mainframes, interfacing, programming languages ranging from assembler to high level, data structures, analysis of algorithms, operating systems, software engineering and microcomputer systems. A solid foundation in the basic sciences of physics, chemistry and mathematics is used to support these courses.

There are two distinct tracks in this curriculum, the Electrical Engineering Track and the Computer Science Track, both culminating in the same Computer Engineering degree. The tracks are substantially similar, each providing a broad coverage of the computer engineering discipline, but each has a slightly different emphasis. Note that students in either track can take courses from the other as electives, or they can use their electives to further specialize within their own track. Although students are required to select a track immediately upon entering the Computer Engineering program, it is usually possible to change tracks as late as the junior year.

The Computer Science track of the Computer Engineering degree provides students the freedom to enhance their knowledge in the broad range of topics comprising Computer Engineering: computer networks, computer architecture, artificial intelligence, computer graphics, robotics, real-time computing, computer languages, microcomputers, VLSI, and large-scale hardware and software systems. The track is primarily administered by the Department of Computer Science and Engineering and encompasses nearly all of the core material of the Computer Science degree, but its greater emphasis on design and engineering fundamentals prepares the student for registration as a professional engineer.

Program Requirements

The freshman year is identical for degrees in aerospace engineering, biomedical engineering, civil engineering, computer engineering, computer science, electrical engineering, electronic systems engineering technology, industrial distribution, industrial engineering, manufacturing and mechanical engineering technology, mechanical engineering, multidisciplinary engineering technology, nuclear engineering, ocean engineering, and petroleum engineering.

The freshman year is slightly different for chemical engineering in that students take CHEM 101/CHEM 111 or CHEM 107/ CHEM 117 and CHEM 102/CHEM 112; Biomedical Engineering also requires a two semester sequence of chemistry courses consisting of CHEM 101/CHEM 111 or CHEM 107/CHEM 117 and CHEM 102/CHEM 112.

Students pursuing degrees in biological and agricultural engineering should refer to the specific curriculum for this major. It is recognized that many students will change the sequence and number of courses taken in any semester. Deviations from the prescribed course sequence, however, should be made with care to ensure that prerequisites for all courses are met.

1 A grade of C or better is required.

2 Entering students will be given a math placement exam. Test results will be used in selecting the appropriate starting course which may be at a higher or lower level.
Of the 18 hours shown as University Core Curriculum electives, 3 must be from creative arts (for Industrial Distribution this is 3 hours from language, philosophy and culture, see IDIS curriculum for more information), 3 from social and behavioral sciences, 6 from American history, and 6 from government/political science. The required 6 hours from international and cultural diversity may be met by courses satisfying the creative arts, social and behavioral sciences (for Industrial Distribution this is language, philosophy and culture), and American history requirements if they are also on the approved list of international and cultural diversity courses.

BMEN and CHEN require 8 hours of freshman chemistry, which may be satisfied by CHEM 101/CHEM 111 or CHEM 107/CHEM 117 and CHEM 102/CHEM 112; Credit by Examination (CBE) for CHEM 101/CHEM 111 or CHEM 107/CHEM 117 plus CHEM 102/CHEM 112; or 8 hours of CBE for CHEM 101/CHEM 111 or CHEM 107/CHEM 117 and CHEM 102/CHEM 112.

Total Semester Credit Hours 16

**Department of Electrical & Computer Engineering**

Almost any technology that distinguishes the 20th and 21st centuries from previous history has the imprint of electrical and computer engineering - electric power, radio, television, radar, satellite communication, global positioning system, medical diagnostic and procedure systems, sophisticated domestic appliances, cell phones, computers and sophisticated sensors and control systems used in underwater, space exploration and national security. Electrical and computer engineering has advanced national and global prosperity through research, development and application of electrical and computer technologies and sciences for the benefit of humanity, and has helped create the global village. By choosing electrical or computer engineering our graduates embark on an exciting and productive career with endless opportunities and help in shaping a better future for mankind.

The curriculum is designed to prepare the undergraduate for work in the highly diverse electrical and computer engineering profession. A solid foundation in physics, chemistry and mathematics is used to support courses in the fundamentals of electrical and computer engineering. The use of computers is integrated throughout the curriculum, and basic studies in circuits, electronics, electromagnetic fields and digital logic lead to a flexible program of electives in the junior and senior year. Electives may be chosen from the broad fields of analog and mixed-signal electronics, biomedical imaging, sensing and genomic signal processing, computer engineering and systems, device science and nanotechnology, electric power systems and power electronics, electromagnetics and microwaves, and information science and systems. Laboratory work is structured to first familiarize the student with the basic concepts and then to apply these concepts to solve engineering problems.

Before commencing course work in the major, students must be admitted to the major or have the approval of the department.

**Mission**

Activities of the Electrical and Computer Engineering Department including research, teaching, and professional and community service revolve around the fourfold mission of the department:

- To create new knowledge and challenge young minds by participation in the process of discovery and invention
- To educate electrical and computer engineers with a solid background of fundamentals, stretching their imagination
- To prepare graduates for an exciting future
- To serve the society through research, education and outreach activities

Undergraduate education plays a major part in helping the department to achieve its mission. The Electrical and Computer Engineering programs are accredited by the Engineering Accreditation Commission of ABET, www.abet.org. More information on these efforts can be found at the Department of Electrical and Computer Engineering (http://engineering.tamu.edu/electrical) website by clicking on the link for ABET Accreditation.

**Majors**

- Bachelor of Science in Computer Engineering, Electrical Engineering Track (p. 388)
- Bachelor of Science in Electrical Engineering (p. 390)

**Minors**

- Electrical Engineering Minor (p. 391)

**Computer Engineering - BS, Electrical Engineering Track**

The Department of Electrical and Computer Engineering at Texas A&M University offers a Bachelor of Science degree option to its undergraduate students desiring to major in Computer Engineering.

The curriculum is designed to cover the engineering aspects of both hardware and software—a total computer systems perspective. All computer engineering students take courses in the following areas:
electrical circuits, electronics, digital circuits, computer architecture ranging from microcomputers to mainframes, interfacing, programming languages ranging from assembler to high level, data structures, analysis of algorithms, operating systems, software engineering and microcomputer systems. A solid foundation in the basic sciences of physics, chemistry and mathematics is used to support these courses.

There are two distinct tracks in this curriculum, the Electrical Engineering Track and the Computer Science Track, both culminating in the same Computer Engineering degree. The tracks are substantially similar, each providing a broad coverage of the computer engineering discipline, but each has a slightly different emphasis. Note that students in either track can take courses from the other as electives, or they can use their electives to further specialize within their own track. Although students are required to select a track immediately upon entering the Computer Engineering program, it is usually possible to change tracks as late as the junior year.

The Electrical Engineering track of the Computer Engineering degree places stronger emphasis on digital Very Large Scale Integrated (VLSI) circuits and systems, microprocessor interfacing and system design, computer system architecture, hardware-software interaction and embedded systems. The track is primarily administered by the Department of Electrical and Computer Engineering and is designed to encompass nearly all of the core material of the Electrical Engineering degree, but provides much more depth in computing. Students studying Computer Engineering can readily apply their knowledge to the design of digital circuits and software in various areas, including cell phones, computers, computer networks, computer vision, pattern recognition and embedded systems.

Before commencing course work in the major, students must be admitted to the major or have the approval of the department.

Program Requirements

The freshman year is identical for degrees in aerospace engineering, biomedical engineering, civil engineering, computer engineering, computer science, electrical engineering, electronic systems engineering technology, industrial distribution, industrial engineering, manufacturing and mechanical engineering technology, mechanical engineering, multidisciplinary engineering technology, nuclear engineering, ocean engineering, and petroleum engineering.

The freshman year is slightly different for chemical engineering in that students take CHEM 101/CHEM 111 or CHEM 107/ CHEM 117 and CHEM 102/CHEM 112; Biomedical Engineering also requires a two semester sequence of chemistry courses consisting of CHEM 101/CHEM 111 or CHEM 107/CHEM 117 and CHEM 102/CHEM 112. Students pursuing degrees in biological and agricultural engineering should refer to the specific curriculum for this major. It is recognized that many students will change the sequence and number of courses taken in any semester. Deviations from the prescribed course sequence, however, should be made with care to ensure that prerequisites for all courses are met.

Further Requirements: A minimum grade point average of 2.75 is required for entering the minor. Prerequisite coursework includes the calculus sequence, MATH 308, and PHYS 208 or equivalents. Students majoring in Computer Engineering will not be permitted to minor in Electrical Engineering since the coursework prescribed for the minor is required coursework for the Computer Engineering degree.
Department of Engineering Technology and Industrial Distribution

The Department of Engineering Technology and Industrial Distribution offers four baccalaureate degree programs in electronics systems engineering technology, industrial distribution, manufacturing and mechanical engineering technology, and multidisciplinary engineering technology. While these degrees are distinct, they share several common features including a sound foundation of mathematics and basic sciences, a strong core of technical courses, and an emphasis on written and oral communications. The curricula emphasize the latest state-of-the-art technologies, innovation and entrepreneurship. Finally, all four degrees are designed to prepare students for careers in industry with strong opportunities for advancement. Because these programs are highly applied and have a focus on project-based learning and experiential education, most of the department’s courses have hands-on laboratories that allow students to put theory to practice.

The mission of the Department of Engineering Technology and Industrial Distribution is to:

- maintain nationally recognized programs in engineering technology and industrial distribution
- focus on educating highly-qualified students with hands-on skills, providing them with experiences in advanced integration of both conventional and emerging technologies, a unique understanding of management and business practices, and an entrepreneurial point of view
- provide leadership within the COE and university in interdisciplinary applied research, to include the development and deployment of new technology
- promote and develop long term partnerships with industry and government that foster enhancements and interactions in education, research, and professional development

Electronic Systems Engineering Technology (ESET)

Electronic Systems Engineering Technology (ESET) prepares students for careers in electronic product and system development across a diverse range of industries that include the medical, power, computer networking, automotive, telecommunications, and quality of life sectors.

The Electronic Systems Engineering Technology program is accredited by the Engineering Technology Accreditation Commission of ABET, http://www.abet.org. For more information about the Electronic Systems Engineering Technology (ESET) program including the mission and program educational objectives, please see the program requirements (p. 393).

Graduates are awarded the Bachelor of Science in Electronic Systems Engineering Technology.

Industrial Distribution (IDIS)

Industrial distribution prepares men and women for sales engineering, sales management and mid-management positions with manufacturers who sell through distributors and with wholesale distributors who purchase, warehouse, sell, distribute and service a wide variety of industrial products. Industry segments include: automation solutions; general line; building materials; chemical and petrochemical; electrical; electronics; semiconductor; fluid power; heating, ventilation and air conditioning; mechanical power; metals; plastics; plumbing; safety equipment; specialty tools; and welding; oil & gas; defense; material handling; healthcare; automotive; heavy equipment; packaging; and logistics. The day-to-day challenges faced by the industrial distributor or the manufacturer’s representative require the person to be a professional with many capabilities. For more information about the Industrial Distribution (IDIS) program, please see the program requirements (p. 394).

Graduates are awarded the Bachelor of Science in Industrial Distribution.

Manufacturing and Mechanical Engineering Technology (MMET)

Manufacturing and mechanical engineering technology (MMET) prepares students for dynamic careers in industry. Graduates are versatile and effective in diverse areas that require understanding of the dependencies among material properties, product design, costs, manufacturing systems, and process technologies.

The Manufacturing and Mechanical Engineering Technology program is accredited by the Engineering Technology Accreditation Commission of ABET, http://www.abet.org. For more information about the Manufacturing and Mechanical Engineering Technology (MMET) program including the mission and program educational objectives, please see the program requirements (p. 396).

Graduates are awarded the Bachelor of Science in Manufacturing and Mechanical Engineering Technology.

Multidisciplinary Engineering Technology (MXET)

Multidisciplinary Engineering Technology combines core concepts from the electronics and mechanical engineering technology disciplines and provides students with a strong background in embedded systems, electronic system design, instrumentation, controls, statics, dynamics, thermodynamics, mechanical system design, and project management.

The curriculum is then augmented through a 29-hour technical focus area. The Mechatronics focus area is currently available and additional focus areas will be identified and created.

For more information about the Multidisciplinary Engineering Technology (ESET) program including the mission and program educational objectives, please see the program requirements (p. 398).

Graduates are awarded the Bachelor of Science in Multidisciplinary Engineering Technology.

Department Academic Policies

The Department of Engineering Technology and Industrial Distribution (ETID) imposes academic requirements in addition to those imposed by the University (Texas A&M University Student Rules) and college. For complete details concerning these and other academic policies, students should contact the ETID Undergraduate Advising Office and are referred to the ETID (http://engineering.tamu.edu/etid) website.

A student must complete all prerequisites for a course with a grade of C or better by the start of the semester in which the student plans to enroll in the course. A student is responsible for checking the prerequisites for each course to ensure the prerequisite requirements have been satisfied. A student who registers for a course for which he/she lacks the necessary prerequisite course(s) and/or the prerequisite grade requirement will be required to drop the course. A student who is told to drop a course and is still enrolled by the deadline set each semester...
may be administratively dropped by the department. If a student is administratively dropped from a course, the student is responsible for all financial obligations associated with the drop. An administrative drop may adversely impact (including, but not limited to): health insurance benefits, financial aid, athletic eligibility, INS status, veterans’ benefits, and eligibility to participate in extracurricular activities.

The department encourages students to participate in industrial internships or the Cooperative Education Program to acquire practical experience to complement their engineering technology education.

Before commencing course work in the major, students must be admitted to the major or have the approval of the department.

**Majors**
- Bachelor of Science in Electronic Systems Engineering Technology (p. 393)
- Bachelor of Science in Industrial Distribution (p. 394)
- Bachelor of Science in Manufacturing and Mechanical Engineering Technology (p. 396)
- Bachelor of Science in Multidisciplinary Engineering Technology (p. 398)

**Minors**
- Embedded Systems Integration Minor (p. 399)

**Masters**
- Master of Industrial Distribution in Industrial Distribution (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/engineering/technology-industrial-distribution/mid)

**Electronic Systems Engineering Technology - BS**

Electronic Systems Engineering Technology (ESET) prepares students for careers in electronic product and system development across a diverse range of industries that include the medical, power, computer networking, automotive, telecommunications, and quality of life sectors. While graduates of the program receive a rigorous technical education and typically take engineering and technology positions within industry, they are also well prepared for positions in technical sales and project management. The ESET curriculum is based on a strong underpinning of engineering math and science courses followed by a core technical sequence. This core includes analog and digital electronics, embedded systems design, real-time software development using C and assembly language, wired/wireless data communications, instrument and control. Throughout their curriculum, students work on multiple open-ended projects to design, implement, test, and evaluate hardware and software systems. One of the most unique aspects of the Electronic Systems Engineering Technology program is that students take CHEM 101/CHEM 111 or CHEM 107/CHEM 117 and CHEM 102/CHEM 112.

The Electronic Systems Engineering Technology program is accredited by the Engineering Technology Accreditation Commission of ABET, http://www.abet.org/.

**ESET Program Mission**

The Electronic Systems Engineering Technology Program at Texas A&M University prepares graduates for immediate impact and long-term career success by providing a real-world experiential education coupled with personalized undergraduate experiences in electronics product development, test, system integration, and engineering research.

**ESET Program Educational Objectives**

The Electronic Systems Engineering Technology Program at Texas A&M has as its primary educational objectives to produce graduates who, after three to five years:

- possess the technical skills to be highly productive and have successful careers in regional, state or national electronic product and system development industries
- demonstrate increasing levels of leadership and responsibility during their careers
- exhibit a commitment to professional ethics in their careers
- display a desire for life-long learning through continued education, technical training, and/or professional development

A continuous cycle of assessment and program improvement is used to ensure that these objectives are being met. Through interactions with industry and academic partners, the Electronic Systems Engineering Technology program continues to offer a state-of-the-art curriculum that produces successful graduates.

**Program Requirements**

The freshman year is identical for degrees in aerospace engineering, biomedical engineering, civil engineering, computer engineering, computer science, electrical engineering, electronic systems engineering technology, industrial distribution, industrial engineering, manufacturing and mechanical engineering technology, mechanical engineering, multidisciplinary engineering technology, nuclear engineering, ocean engineering, and petroleum engineering. A grade of C or better is required.

Entering students will be given a math placement exam. Test results will be used in selecting the appropriate starting course which may be at a higher or lower level.

Of the 18 hours shown as University Core Curriculum electives, 3 must be from creative arts (for Industrial Distribution this is 3 hours from language, philosophy, and culture, see IDIS curriculum for more information), 3 from social and behavioral sciences, 6 from American history, and 6 from government/political science. The required 6 hours from international and cultural diversity may be met by courses satisfying the creative arts, social and behavioral sciences (for Industrial Distribution this is language, philosophy, and culture), and American history requirements if they are also on the approved list of international and cultural diversity courses.

BMEN and CHEN require 8 hours of freshman chemistry, which may be satisfied by CHEM 101/CHEM 111 or CHEM 107/CHEM 117 and CHEM 102/CHEM 112; Credit by Examination (CBE) for CHEM 101/CHEM 111 or CHEM 107/CHEM 117 plus CHEM 102/CHEM 112; or 8 hours of CBE for CHEM 101/CHEM 111 or CHEM 107/CHEM 117 and CHEM 102/CHEM 112.

See departmental advisor for a list of approved electives. ENTC 485 is not for general use as a technical elective.

Completion of ENGL 104, MATH 151, MATH 152, CHEM 107, CHEM 117, PHYS 218 with C or better required.

All students are required to complete a high-impact experience in order to graduate. The list of possible high-impact experiences is available in the ETID advising office.

This curriculum lists the minimum number of classes required for graduation. Additional courses may be taken.

**Total Program Hours 127**

**Industrial Distribution - BS**

Industrial distribution prepares men and women for sales engineering, technical sales, supply chain management, operations management, sales management and other managerial positions. Students are prepared for employment in industry segments that include: aerospace; automation solutions; building materials; chemical and petrochemical; electrical; electronics; information systems and technology; healthcare; fluid power; general line; heating, ventilation and air conditioning;
Management consulting; mechanical power; metals; oil and gas; plastics; pipe, valve, and fitting; plumbing; safety equipment; semiconductor; specialty tools; and welding. The day-to-day challenges faced by the industrial distributor or the manufacturer’s representative require the person to be a professional with many capabilities. To fulfill this demand, the curriculum provides study in business, communications, finance, information technology, applied technology, general management, engineering, ethics, and human relations. This knowledge is applicable to the graduate in relationships with executives, managers, engineers, scientists, and business analysts while taking leadership roles in their manufacturing, distribution, analysis, service, production planning and maintenance or construction operations. The industrial distribution graduate assists these preceding entities by direct application of operations, business, and product knowledge. Essentially the industrial distribution graduate becomes a consultative resource to businesses - a challenging and rewarding career that can lead to the possibility of becoming a business leader in multiple segments. Graduates receive the Bachelor of Science degree in Industrial Distribution.

Mission

Industrial Distribution prepares students for sales engineering, sales management, supply chain operations and logistics management mid-management positions with wholesale distributors, who purchase, warehouse, sell, distribute and service a wide variety of products, and with manufacturers who sell through distributors.

Program Educational Objectives

The Industrial Distribution Program at Texas A&M has as its primary educational objectives to produce graduates who:

- Possess the technical skills to be immediately productive and have successful careers in regional, state or national level industrial distribution firms (or related firms across the multiple industry verticals).

- Demonstrate increasing levels of leadership and responsibility during their careers.

- Exhibit a commitment to professional ethics in their professional career.

- Display a desire for life-long learning through continued education, technical training, and/or professional development.

Program Requirements

The freshman year is identical for degrees in aerospace engineering, biomedical engineering, civil engineering, computer engineering, computer science, electrical engineering, electronic systems engineering technology, industrial distribution, industrial engineering, manufacturing and mechanical engineering technology, mechanical engineering, multidisciplinary engineering technology, nuclear engineering, ocean engineering, and petroleum engineering. The freshman year is slightly different for chemical engineering in that students take CHEM 101/111 or CHEM 107/111 and CHEM 102/112. Biomedical Engineering also requires a two semester sequence of chemistry courses consisting of CHEM 101/111 or CHEM 107/117 and CHEM 102/112. Students pursuing degrees in biological and agricultural engineering should refer to the specific curriculum for this major. It is recognized that many students will change the sequence and number of courses taken in any semester. Deviations from the prescribed course sequence, however, should be made with care to ensure that prerequisites for all courses are met.

5 Students in Industrial Distribution satisfy the 3 hour social and behavioral sciences by taking ECON 202 as a required course. Instead, IDIS students must take a 3 hour course from the Language, Philosophy, and Culture list. They may also use this course to satisfy one of their ICD courses.

6 See a departmental advisor for a list of acceptable directed electives and technical electives.

7 Completion of ENGL 104, MATH 151, MATH 152, CHEM 107/117, and PHYS 218 with a C or better required.

8 All students are required to complete a high-impact experience in order to graduate. The list of possible high-impact experiences is available in the ETID advising office.

The curriculum lists the minimum number of classes required for graduation. Additional courses may be taken.

**Total Program Hours 126**

Manufacturing and mechanical engineering technology (MMET) prepares students for dynamic careers in industry. Graduates are versatile and effective in diverse areas that require understanding of the dependencies among material properties, product design, costs, manufacturing systems, and process technologies. The student views manufacturing from an enterprise and system perspective, recognizing the importance of customer and supplier interactions. To meet these diverse needs, this degree program provides a foundation of mathematics, science, and specialized technical courses, as well as preparation in oral and written communication. The three main areas of concentration are product design, manufacturing systems integration and automation, and quality assessment. Studies in these areas are supported by a solid foundation in materials and manufacturing processes.

The Manufacturing and Mechanical Engineering Technology program is accredited by the Engineering Technology Accreditation Commission of ABET, http://www.abet.org/.

**Program Mission**

The mission of the Manufacturing and Mechanical Engineering Technology program at Texas A&M University is to provide a high-quality, application-oriented education producing professionals who can effectively contribute to leadership, the advancement of manufacturing and mechanical engineering technology, and improved performance of industrial endeavors. The educational mission is complemented by applied research and the development of new interdisciplinary technology that mutually benefits the university and its industrial, governmental, and academic collaborators. The people in the program are committed to providing service and leadership in the promotion and advancement of the University and the profession.

**Program Educational Objectives**

The MMET program prepares students who after a few years after graduation:

- Demonstrate manufacturing and mechanical technical knowledge, problem solving skills, and implementation skills for careers in industry;
- Demonstrate increasing level of leadership and responsibility;
- Exhibit both immediate and sustainable productivity in a dynamic work environment.

**Program Requirements**

The freshman year is identical for degrees in aerospace engineering, biomedical engineering, civil engineering, computer engineering, computer science, electrical engineering, electronic systems engineering technology, industrial distribution, industrial engineering, manufacturing and mechanical engineering technology, mechanical
engineering, multidisciplinary engineering technology, nuclear engineering, ocean engineering, and petroleum engineering. The freshman year is slightly different for chemical engineering in that students take CHEM 101/CHEM 111 or CHEM 107/CHEM 117 and CHEM 102/CHEM 112. Biomedical Engineering also requires a two semester sequence of chemistry courses consisting of CHEM 101/CHEM 111 or CHEM 107/CHEM 117 and CHEM 102/CHEM 112. Students pursuing degrees in biological and agricultural engineering should refer to the specific curriculum for this major. It is recognized that many students will change the sequence and number of courses taken in any semester. Deviations from the prescribed course sequence, however, should be made with care to ensure that prerequisites for all courses are met.

The Multidisciplinary Engineering Technology Program at Texas A&M University prepares graduates for immediate impact and long-term career success by providing a real-world experiential education coupled with personalized undergraduate experiences in mechanical, electronic, control and computer systems, as well as engineering design and development.

MXET Program Mission

The Multidisciplinary Engineering Technology Program at Texas A&M University prepares graduates for immediate impact and long-term career success by providing a real-world experiential education coupled with personalized undergraduate experiences in mechanical, electronic, control and computer systems, as well as engineering design and development.

MXET Program Educational Objectives

The program educational objectives of the BS MXET degree program are to produce graduates who, within two to five years after graduation, will:

- Possess and demonstrate technical knowledge of the design, manufacture, sales, and service of complex systems that span multiple engineering technology disciplines.
- Demonstrate increasing level of leadership and responsibility.
- Exhibit productivity in a dynamic work environment through a commitment to lifelong learning.
- Exhibit a commitment to professional ethics in their professional career.

A continuous cycle of assessment and program improvement is used to ensure that these objectives are being met. Through interactions with industry and academic partners, the Multidisciplinary Engineering Technology program offers a state-of-the-art curriculum that produces successful graduates.

**MXET Focus Areas**

As discussed above, the MXET degree supports a 29-hour focus area allowing the student to apply their technical knowledge to specific areas of interest. Currently, the degree supports a focus in Mechatronics preparing students to design, develop and support products and systems that combine mechanical, electronic, communication, control, and embedded computing principles.

Additional MXET focus areas are currently being identified and will be available in the future.

**Program Requirements**

The freshman year is identical for degrees in aerospace engineering, biomedical engineering, civil engineering, computer engineering, computer science, electrical engineering, electronic systems engineering technology, industrial distribution, industrial engineering, manufacturing and mechanical engineering technology, mechanical engineering, multidisciplinary engineering technology, nuclear engineering, ocean engineering, and petroleum engineering. The freshman year is slightly different for chemical engineering in that students take CHEM 101/111 or CHEM 107/117 and CHEM 102/112. Biomedical Engineering also requires a two semester sequence of chemistry courses consisting of CHEM 101/111 or CHEM 107/117 and CHEM 102/112.

Students pursuing degrees in biological and agricultural engineering should refer to the specific curriculum for this major. It is recognized that many students will change the sequence and number of courses taken in any semester. Deviations from the prescribed course sequence, however, should be made with care to ensure that prerequisites for all courses are met.

7. All students are required to complete a high-impact experience in order to graduate. The list of possible high-impact experiences is available in the ETID advising office.
8. This is a new course, see a departmental advisor for the correct course number.

This curriculum lists the minimum number of classes required for graduation. Additional courses may be taken.

Total Program Hours 127

Embedded Systems Integration - Minor

Our cars, cell phones, even every-day appliances operate based on small "computers" that sense the environment, make decisions, and control operations; essentially making our devices "smart." These "computers" or embedded processors/microcontrollers are a fundamental component in most modern products and systems and are used across a wide range
of industries that include medical, oil/gas, process control, automotive, communications, and quality of life.

The Embedded Systems Integration minor offered by the Department of Engineering Technology and Industrial Distribution teaches students about embedded systems hardware and software development and how these systems are used in modern products. The minor requires five courses (18 hours) and is available to not only engineering students but also students outside the College of Engineering who are interested in studying technology and understanding the devices that power our lives.

Students interested in an Embedded Systems Integration minor should see an advisor in Engineering Technology and Industrial Distribution for more information.

**Department of Industrial and Systems Engineering**

Industrial engineering is an engineering discipline devoted to the design, installation, improvement and control of integrated systems of people, materials, and facilities in a wide range of organizations that produce goods or render services. Like other engineering fields, industrial engineering is concerned with solving problems through the application of specialized knowledge in mathematics and science, as well as the principles of engineering. An important characteristic of industrial engineering is its systems approach to integrate the basic resources of production and service systems and other relevant resources, such as information and energy, in such a way as to create a smooth, efficient and competitive operation within an enterprise. Industrial and systems engineers are needed in virtually all types of enterprises, ranging from industries such as manufacturing, distribution, logistics, transportation, and construction; service sectors such as health care, telecommunications, retail, banking, and engineering consulting to government agencies, military, and non-profit organizations.

The mission of the Industrial Engineering program is to serve the state, nation, and global community by educating industrial engineering students to be well founded in engineering fundamentals and to have the knowledge and skills required to design, develop, improve, implement and control sophisticated production and service systems in an environment characterized by complex technical and social challenges. Throughout this educational process, students will be instilled with the highest standards of professional and ethical behavior. It is the intent of the undergraduate industrial engineering program to equip its graduates to achieve the following accomplishments a few years after graduation:

1. Graduates will be successful in improving operations by solving complex industrial engineering problems.
2. Graduates will demonstrate professional leadership.
3. Graduates will be instilled with the motivation and ability to accomplish professional life-long learning.

The undergraduate program in Industrial Engineering at Texas A&M University is accredited by the Engineering Accreditation Commission of ABET, www.abet.org.

Industrial Engineering students may participate in the Undergraduate Minor Program offered by Texas A&M. This program is usually comprised of 15 to 18 hours, some of which may be substituted as technical electives. The most common minors are math, business and economics. The department also has a Fast Track Program for academically qualified students who want to take selected graduate courses and receive both graduate and undergraduate credit by meeting specific requirements. The department encourages students to participate in industrial internships or the Cooperative Education Program to acquire practical experience to complement their industrial engineering education. Internships are generally encouraged during the summer months only. Students who participate in the Co-op program during three academic semesters may count the three credit hours as a technical elective in their curriculum.

Graduate degrees including the Master of Science (MS), Master of Engineering (M.Eng.), and Doctor of Philosophy (PhD) are also offered by the department in addition to the Bachelor of Science in Industrial Engineering. For graduate degree information, please see the Texas A&M University Graduate Catalog.

Before commencing course work in the major, students must be admitted to the major or have the approval of the department.

**Majors**

- Bachelor of Science in Industrial Engineering (p. 401)

**Minors**

- Industrial Engineering Minor (p. 403)

**Certificates**

- Data Center Operations Engineering Certificate (p. 403)
- Engineering Systems Management Certificate (p. 403)

**Industrial Engineering - BS**

The four-year curriculum in industrial engineering at Texas A&M is designed to provide students with a solid basis in mathematics and science, as well as in engineering economics, manufacturing systems, production and inventory control, operations research, quality engineering, simulation, human factors and informatics. The program culminates with a senior design course in which students apply principles and knowledge acquired through the curriculum to an actual industrial problem.

**Program Requirements**

The freshman year is identical for degrees in aerospace engineering, biomedical engineering, civil engineering, computer engineering, computer science, electrical engineering, electronic systems engineering technology, industrial distribution, industrial engineering, manufacturing and mechanical engineering technology, mechanical engineering, multidisciplinary engineering technology, nuclear engineering, ocean engineering, and petroleum engineering. The freshman year is slightly different for chemical engineering in that students take CHEM 101/CHEM 111 or CHEM 107/CHEM 117 and CHEM 102/CHEM 112. Biomedical Engineering also requires a two semester sequence of chemistry courses consisting of CHEM 101/CHEM 111 or CHEM 107/CHEM 117 and CHEM 102/CHEM 112.

Students pursuing degrees in biological and agricultural engineering should refer to the specific curriculum for this major. It is recognized that many students will change the sequence and number of courses taken in any semester. Deviations from the prescribed course sequence, however, should be made with care to ensure that prerequisites for all courses are met.

**Total Program Hours**: 33

1. A grade of C or better is required.
2. Entering students will be given a math placement exam. Test results will be used in selecting the appropriate starting course which may be at a higher or lower level.
3. Of the 18 hours shown as University Core Curriculum electives, 3 must be from creative arts (for Industrial Distribution this is 3 hours from language, philosophy and culture, see IDIS curriculum for more information), 3 from social and behavioral sciences, 6 from American history, and 6 from government/political science. The required 6 hours from international and cultural diversity may be met by courses satisfying the creative arts, social and behavioral sciences (for Industrial Distribution this is language, philosophy and culture), and American history requirements if they are also on the approved list of international and cultural diversity courses.
4. BMEN and CHEN require 8 hours of freshman chemistry, which may be satisfied by CHEM 101/CHEM 111 or CHEM 107/CHEM 117 and CHEM 102/CHEM 112; Credit by Examination (CBE) for CHEM 101/CHEM 111 or CHEM 107/CHEM 117 plus CHEM 102/CHEM 112; or 8 hours of CBE for CHEM 101/CHEM 111 or CHEM 107/CHEM 117 and CHEM 102/CHEM 112.

Data Center Operations Engineering - Certificate

With the rapid acceleration of technology through innovation on a global basis, industries recognize the need for young engineers who possess base line knowledge in areas of data system management and an understanding of the system level of complex data center processing systems. In both government and industry there is a growing need for undergraduate engineering students that possess the requisite knowledge and skill sets pertaining to complex data systems management and this certificate program includes a set of courses to assure students develop this knowledge and skill set. Completion of this certificate requires completion of the following educational outcomes:

1. to know and apply principles of engineering management
2. to understand principles of systems level engineering and their application to specific data center system operations
3. to be able to go beyond understanding concepts and demonstrate appropriate usage of systems engineering principles in a design context

For additional information, contact the Data Center Operations Engineering Certificate coordinator or Engineering Academic and Student Affairs, EABB, (979) 845-7200.

Department of Materials Science and Engineering

The Department of Materials Science and Engineering is jointly operated by the College of Engineering and College of Science.

The department offers Master of Science, Master of Engineering and Ph.D. degrees and has more than 100 graduate students currently in the program who are working on a wide range of materials-related interdisciplinary research projects. This multidisciplinary department includes faculty members from several disciplines, including aerospace engineering, biology, biomedical engineering, chemical engineering, chemistry, electrical engineering, mechanical engineering, nuclear engineering and physics. Many of today’s most pressing scientific problems stem from the limitations of materials currently available, and this department is at the forefront of new knowledge and discovery at Texas A&M University.

What is Materials Science and Engineering?

Materials science and engineering involves the characterization of the physical and chemical properties of solid materials—metals and alloys, ceramics, magnetic materials, polymers, optical materials, semiconductors, superconductors, and composites—for the purpose of using, changing, or enhancing inherent properties to create or improve end products. Materials science and engineering involves examining how the microstructure (crystalline or amorphous) of a material can be changed to influence the strength, electrical conductivity, optical, or magnetic properties of a material. This field is inherently multidisciplinary, encompassing mechanical, chemical, biomedical, civil, electrical, and aerospace engineering; physics; and chemistry.

Materials science comprises the study of materials from the macro to the atomic scale—from highway building materials to carbon nanotubes—but, independent of scale, the study of materials is concerned fundamentally with the effect of structure and chemistry on the properties of materials. Materials have historically been so important that different eras of civilization were named according to the materials from which tools were fabricated; for example, the Stone Age, the Bronze Age, and the Iron Age. The development of the semiconductor spawned the modern era of information technology often called the Silicon Age. Advances in materials science might make this new millennium the Biomaterials/Nanomaterials/Optical Materials Age.

What do Materials Scientists and Engineers do?

In industry, materials scientists and engineers work with natural or synthetic materials and, most often, with combinations of materials, to improve existing products or to develop novel products. For instance, at Intel, the developer of the processing chip used in most PCs, materials scientists optimize the materials used in chip packaging, balancing differing coefficients of thermal expansion, head dissipation, brittleness and compliancy, and cost for optimum performance and economic feasibility.

Other materials scientists are on the forefront of the revolution in biotechnology, developing materials for the components of artificial joints, heart valves, and other replacement body parts. Smart materials show a tremendous potential in medical and dental applications, such as compressible stents that reform to their intended shape upon contact with body heat once inserted into an artery, ceramic cement for bone repair, or shape-memory alloys to correct misplaced teeth or spine curvature. (Smart materials have one or more properties that can be dramatically altered, such as multiviscosity oil, with a viscosity that varies with temperature.)

Related research involves developing smaller and more reliable components, such as ferromagnetic activators acting as tiny machines in military and other applications. In aerospace engineering, materials scientists are developing airframe and fuselage materials with high strength-to-weight ratios, as well as developing smart materials into integrated sensors and actuators for reconfigurable wings and other adaptive structures.

Materials Science and Engineering Minor

The Department of Materials Science and Engineering minor (http://engineering.tamu.edu/materials/academics/degrees/undergraduate/minor) degree program is designed to provide a strong materials science educational program for undergraduate science and engineering majors and to integrate a materials focus into their undergraduate training. It is intended for students who are interested in broadening their undergraduate major program of study to incorporate a fundamental understanding of materials processing and structure–property relationships to complement their major degree. Students will have the flexibility to select relevant coursework in order to customize this program of study to best suit the particular student’s intended area of focus through consultation with an MSEN faculty advisor.

The minor program in materials science and engineering consists of a minimum of five (5) three-hour courses for a total of 15 credit hours, with up to six credit hours in materials courses within their major. All students are required to have completed a prerequisite, such as MSEN 222/MEEN 222—Materials Science, or MSEN 201—Introduction to Materials Science (or an equivalent course)—prior to applying for the minor. Two (2) three-hour courses (six credit hours) are selected from a list of core MSEN undergraduate courses. The remaining three courses (nine credit hours) are selected from upper-level materials focused technical electives. With the permission of the MSEN faculty advisor, students may substitute up to two technical electives with courses from their major department with a primary focus on materials science and engineering. Completion of the minor will be recorded on the student’s university transcript.

For more information, visit the Department of Materials Science and Engineering website (http://engineering.tamu.edu/materials).

Total Semester Credit Hours 15

1. Upon consultation with the materials science faculty advisor, up to 2 upper-level technical electives in the student’s major department may be accepted in place of these courses.

2. Or additional courses from first list.

Students must make a grade of "C" or better in all courses.

Student must achieve an overall GPA of 2.5 in approved minor courses.

Department of Mechanical Engineering

Mechanical engineering is a highly diversified profession. The mechanical engineer designs machines, devices, various products and control systems, and works with the generation, conversion, transmission, and utilization of mechanical and thermal power. Assignments often include analysis and synthesis of mechanical, thermal, and fluid systems. Mechanical engineers are also responsible for characterization, specification, and analysis of materials used in design and manufacturing. Manufacturing systems, robotics, electromechanical devices, and control systems are also the purview of the mechanical engineer. Graduates in mechanical engineering are among the most versatile engineers and enjoy professional employment in industry, government, consulting, and research organizations. The undergraduate program in Mechanical Engineering at Texas A&M University is accredited by the Engineering Accreditation Commission of ABET, www.abet.org.

The work of mechanical engineers varies from general engineering to numerous, narrow specialties, as required by the wide variety of employers. A general list, though not in any way exhaustive, of the areas of professional employment opportunities available to mechanical engineers includes: design, construction, controls, materials specification and evaluation, analysis of thermal systems, fluid and solid mechanics, manufacturing, plant engineering, research and development,
and technical sales. Many mechanical engineers are promoted to management and administrative positions as well.

The mission of the Department of Mechanical Engineering is to serve the students of Texas A&M University, the State of Texas, and the nation by:

- providing quality education that is well-grounded in the fundamental principles of engineering, fostering innovation and preparing students for leadership positions and successful careers in industry, government, and academia;
- advancing the knowledge base of mechanical engineering to support the competitiveness of existing industry and to spawn new economic development in Texas and the nation through active involvement in basic and applied research in a global context; and
- successfully pursue life-long learning and advanced study opportunities, and subsequently contribute to the development of advanced concepts and leading edge technologies.

The objectives of the Mechanical Engineering program are to produce graduates who will:

- have successful careers, and become leaders, in industry and the public sector;
- appropriately apply acquired knowledge, work well with other people, effectively communicate ideas and technical information, and continue to learn and improve; and
- successfully pursue advanced studies, if they so choose, opportunities, and subsequently contribute to the development of advanced concepts and leading edge technologies.

The educational outcomes for the Mechanical Engineering program are that students will attain:

- an ability to apply knowledge of mathematics, science and engineering;
- an ability to design and conduct experiments, as well as to analyze and interpret data;
- an ability to design a system, component, or process to meet desired needs within realistic constraints such as economic, environmental, social, political, ethical, health and safety, manufacturability, and sustainability;
- an ability to function on multi-disciplinary teams;
- an ability to identify, formulate and solve engineering problems;
- an understanding of professional and ethical responsibility;
- an ability to communicate effectively;
- the broad education necessary to understand the impact of engineering solutions in a global, economic, environmental, and societal context;
- a recognition of the need for, and an ability to engage in life-long learning;
- a knowledge of contemporary issues; and
- an ability to use the techniques, skills and modern engineering tools necessary for engineering practice.

Mechanical engineers should possess a thorough understanding of engineering science as well as analytical and practical skills in one of many basic mechanical engineering specialties. The mechanical engineering curriculum at Texas A&M requires students to develop and apply logical thinking, innovative approaches, and ethical standards as a prerequisite for professional competence. The curriculum consists of basic theory courses complemented by laboratory experiences in dynamic systems and controls, design, experimentation, fluid mechanics, heat transfer, manufacturing, and materials. Elective courses are offered in numerous areas including air conditioning, automotive engineering, computer-aided design, control systems, corrosion, energy conversion, internal combustion engines, manufacturing, materials, mechanical design, polymers, mechatronics, metallurgy, power generation, robotics, stress analysis, fluid mechanics, turbomachinery, and others. The selection of elective courses is dictated by the interests and goals of the student, working with departmental advisors and within the curriculum guidelines.

Many students enhance their education by participating in cooperative education and/or professional internships, which offer opportunities for employment in engineering positions while working toward a degree. Numerous study abroad programs are also available for gaining experience and perspectives in the international arena. Participation in student chapters of professional and honor societies provides leadership opportunities, collegial activities, and learning experiences outside the classroom. Many students also participate in research projects through individual directed studies courses with a professor. The mechanical engineering program culminates with a senior capstone design course sequence highlighted by real-life projects sponsored by various industries. Students benefit from the challenges and gratification that come through direct interaction with practicing engineers.

Before commencing course work in the major, students must be admitted to the major or have the approval of the department.

**Majors**

- Bachelor of Science in Mechanical Engineering (p. 408)

**Minors**

- Analysis, Design and Management of Energy Conversion Systems Minor (p. 411)
- Control of Mechanical Systems Minor (p. 411)
- Design and Simulation of Mechanical Systems Minor (p. 411)

**Mechanical Engineering - BS**

Mechanical engineering is a highly diversified profession. The mechanical engineer designs machines, devices, various products and control systems, and works with the generation, conversion, transmission, and utilization of mechanical and thermal power. Assignments often include analysis and synthesis of mechanical, thermal, and fluid systems. Mechanical engineers are also responsible for characterization, specification, and analysis of materials used in design and manufacturing. Manufacturing systems, robotics, electromechanical devices, and control systems are also the purview of the mechanical engineer. Graduates in mechanical engineering are among the most versatile engineers and enjoy professional employment in industry, government, consulting, and research organizations. The undergraduate program in Mechanical Engineering at Texas A&M University is accredited by the Engineering Accreditation Commission of ABET, www.abet.org.

The work of mechanical engineers varies from general engineering to numerous, narrow specialties, as required by the wide variety of employers. A general list, though not in any way exhaustive, of
the areas of professional employment opportunities available to mechanical engineers includes: design, construction, controls, materials specification and evaluation, analysis of thermal systems, fluid and solid mechanics, manufacturing, plant engineering, research and development, and technical sales. Many mechanical engineers are promoted to management and administrative positions as well.

The mission of the Department of Mechanical Engineering is to serve the students of Texas A&M University, the State of Texas, and the nation by:

• providing quality education that is well-grounded in the fundamental principles of engineering, fostering innovation and preparing students for leadership positions and successful careers in industry, government, and academia;
• advancing the knowledge base of mechanical engineering to support the competitiveness of existing industry and to spawn new economic development in Texas and the nation through active involvement in basic and applied research in a global context; and
• successfully pursue life-long learning and advanced study opportunities, and subsequently contribute to the development of advanced concepts and leading edge technologies.

The objectives of the Mechanical Engineering program are to produce graduates who will:

• have successful careers, and become leaders, in industry and the public sector;
• appropriately apply acquired knowledge, work well with other people, effectively communicate ideas and technical information, and continue to learn and improve; and
• successfully pursue advanced studies, if they so choose, opportunities, and subsequently contribute to the development of advanced concepts and leading edge technologies.

The educational outcomes for the Mechanical Engineering program are that students will attain:

• an ability to apply knowledge of mathematics, science and engineering;
• an ability to design and conduct experiments, as well as to analyze and interpret data;
• an ability to design a system, component, or process to meet desired needs within realistic constraints such as economic, environmental, social, political, ethical, health and safety, manufacturability, and sustainability;
• an ability to function on multi-disciplinary teams;
• an ability to identify, formulate and solve engineering problems;
• an understanding of professional and ethical responsibility;
• an ability to communicate effectively;
• the broad education necessary to understand the impact of engineering solutions in a global, economic, environmental, and societal context;
• a recognition of the need for, and an ability to engage in life-long learning;
• a knowledge of contemporary issues; and
• an ability to use the techniques, skills and modern engineering tools necessary for engineering practice.

Mechanical engineers should possess a thorough understanding of engineering science as well as analytical and practical skills in one of many basic mechanical engineering specialties. The mechanical engineering curriculum at Texas A&M requires students to develop and apply logical thinking, innovative approaches, and ethical standards as a prerequisite for professional competence. The curriculum consists of basic theory courses complemented by laboratory experiences in dynamic systems and controls, design, experimentation, fluid mechanics, heat transfer, manufacturing, and materials. Elective courses are offered in numerous areas including air conditioning, automotive engineering, computer-aided design, control systems, corrosion, energy conversion, internal combustion engines, manufacturing, materials, mechanical design, polymers, mechatronics, metallurgy, power generation, robotics, stress analysis, fluid mechanics, turbomachinery, and others. The selection of elective courses is dictated by the interests and goals of the student, working with departmental advisors and within the curriculum guidelines.

Many students enhance their education by participating in cooperative education and/or professional internships, which offer opportunities for employment in engineering positions while working toward a degree. Numerous study abroad programs are also available for gaining experience and perspectives in the international arena. Participation in student chapters of professional and honor societies provides leadership opportunities, collegial activities, and learning experiences outside the classroom. Many students also participate in research projects through individual directed studies courses with a professor. The mechanical engineering program culminates with a senior capstone design course sequence highlighted by real-life projects sponsored by various industries. Students benefit from the challenges and gratification that come through direct interaction with practicing engineers.

Before commencing course work in the major, students must be admitted to the major or have the approval of the department.

Program Requirements

The freshman year is identical for degrees in aerospace engineering, biomedical engineering, civil engineering, computer engineering, computer science, electrical engineering, electronic systems engineering technology, industrial distribution, industrial engineering, manufacturing and mechanical engineering technology, mechanical engineering, multidisciplinary engineering technology, nuclear engineering, ocean engineering, and petroleum engineering. The freshman year is slightly different for chemical engineering in that students take CHEM 101/CHEM 111 or CHEM 107/CHEM 117 and CHEM 102/CHEM 112. Biomedical Engineering also requires a two semester sequence of chemistry courses consisting of CHEM 101/CHEM 111 or CHEM 107/CHEM 117 and CHEM 102/CHEM 112. Students pursuing degrees in biological and agricultural engineering should refer to the specific curriculum for this major. It is recognized that many students will change the sequence and number of courses taken in any semester. Deviations from the prescribed course sequence, however, should be made with care to ensure that prerequisites for all courses are met.

1. A grade of C or better is required.
2. Entering students will be given a math placement exam. Test results will be used in selecting the appropriate starting course which may be at a higher or lower level.
3. Of the 18 hours shown as University Core Curriculum electives, 3 must be from creative arts (for Industrial Distribution this is 3 hours from language, philosophy and culture, see IDIS curriculum for more information), 3 from social and behavioral sciences, 6 from American history, and 6 from government/political science. The required 6 hours from international and cultural diversity may be met by courses satisfying the creative arts, social and behavioral sciences (for Industrial Distribution this is language, philosophy and culture), and American history requirements if they are also on the approved list of international and cultural diversity courses.
4. BMEN and CHEN require 8 hours of freshman chemistry, which may be satisfied by CHEM 101/CHEM 111 or CHEM 107/CHEM 117 and CHEM 102/CHEM 112; Credit by Examination (CBE) for CHEM 101/CHEM 111 or CHEM 107/CHEM 117 plus CHEM 102/CHEM 112; or 8 hours of CBE for CHEM 101/CHEM 111 or CHEM 107/CHEM 117 and CHEM 102/CHEM 112.

This curriculum lists the minimum number of classes required for graduation. Additional courses may be taken.

**Total Program Hours 128**

**Analysis, Design and Management of Energy Conversion Systems - Minor**

The objectives of the Mechanical Engineering minor-Analysis, Design and Management of Energy Conversion Systems- are to expand the working knowledge of mechanical engineering principles to broader engineering activities and to provide non-MEEN students with a specialized aspect of mechanical engineering to enhance their skillset and capabilities within their discipline-specific field. Candidates for a Mechanical Engineering minor must be high-achieving in their own discipline, with a minimum GPA of 3.5. Students may apply for the minor as early as their fourth semester of college but before their seventh semester of college. Students are responsible for the satisfying course pre-requisites (C or better) which may or may not apply toward the minor or the student's major degree.

Prerequisites of required and elective courses must have a grade of 'C' or better even if not counting toward degree or minor.
Missions of the Department of Nuclear Engineering are identified. Graduates of our Bachelor of Science program in Nuclear Engineering are trained radiological health engineers. To supply qualified engineers, the Department of Nuclear Engineering offers curricula leading to the Bachelor of Science degree in Nuclear Engineering and is accredited by the Engineering Accreditation Commission of ABET, www.abet.org.

The missions of the Department of Nuclear Engineering are:

• to produce high-quality graduates from the undergraduate through the doctoral levels to help meet the technical manpower needs of our state, region, nation, and the international community;
• to conduct research, including collaboration with research in related fields, to advance the state of knowledge in these disciplines in support of the needs of society; and
• to perform service in these disciplines for many constituencies including our College and University, industry, government and national laboratories, professional organizations, and the public.

In fulfilling these missions, the objective of the undergraduate program is to prepare students for success in their professional endeavors following the baccalaureate degree. These endeavors may include direct employment in the private or public sectors, graduate studies in engineering or science, professional studies in medicine, business, law or public administration, service in the military, or entrepreneurial activities. To achieve this purpose, four principal educational objectives are identified. Graduates of our Bachelor of Science program in Nuclear Engineering:

1. will work on the challenges of maintenance, improvement, innovation, education, and research in nuclear power and industrial utilization of nuclear radiation and radionuclides. In this work, they will fulfill independent assignments, engage in collaborations, and manage the work of others with effective communications characterizing all phases of their responsibilities;

2. will conduct their professional activities with full recognition of the choices and challenges implicit to their work, to its ethical dimensions, and to their implications for matters beyond their immediate tasks;

3. will take the local, global, historical, social, economic, and political settings into account in both their domestic and international endeavors; and

4. will recognize and utilize both the accumulated body of results from prior work and the continuing evolution of science and technology as essential resources for the effective conduct of their work.

The nuclear engineering baccalaureate degree programs stress engineering science fundamentals and mathematics. However, considerable numbers of elective hours are available in the curriculum to permit students to broaden their educations as desired.

Most of the facilities used in the MS and PhD programs are also used in the undergraduate degree programs. These facilities make the Department of Nuclear Engineering one of the best equipped in the United States. Texas A&M is now the only University in the United States with two nuclear reactors on its campus.

Before commencing course work in the major, students must be admitted to the major or have the approval of the department.

5. Power Option alternative. Students who intend to work in the nuclear power industry immediately upon completion of the BS degrees have the option of substituting NUEN 460. If this choice is made, then the student must also select NUEN 418 as a technical elective.

6. As approved by departmental advisor.

7. All students are required to complete a high-impact experience in order to graduate. The list of possible high-impact experiences is available in the NUEN advising office.

#### Radiological Health Engineering - Minor

The Department of Nuclear Engineering offers a minor in Radiological Health Engineering. Expanding and emerging nuclear applications have created a strong demand for specialists in radiological health engineering. Well-educated individuals are, and will be, required in all aspects of the nuclear power industry from mining all the way to disposal of wastes from spent fuel. There are needs for radiological health specialists in government, hospitals, educational institutions and private industry. This program at Texas A&M is designed to give students a broad background so they will be able to assume positions in any area of the nuclear industry.

Department of Ocean Engineering

Ocean Engineering

Ocean engineering is the application of basic engineering principles to the analysis, design, construction, and management of systems that operate in the ocean environment or near shore. Typical ocean engineering application areas include: beach protection and nourishment, coastal structures and erosion, wave and current structure interaction, development of ocean energy resources, instrumentation for coastal and offshore measurements, marine dredging and dredged material placement, ocean mining, offshore petroleum recovery, offshore structures and vessels, marine hydrodynamics, marine risers, moored and towed systems, numerical and physical modeling, ports and harbors, remotely operated and autonomous underwater vehicles, renewable ocean energy systems, search and salvage, suspended and dissolved constituent transport, subsea pipelines and cables, seafloor pipeline and umbilical layouts, flow assurance, submersible vehicles, sustainable and resilient ocean systems, and underwater acoustics. Employment opportunities exist with private industry, defense contractors, consulting firms, and government agencies. Ocean engineering students are encouraged to pursue summer internships and may participate in the University cooperative education program and the study abroad program. The undergraduate program in ocean engineering in the Department of Ocean Engineering at Texas A&M University is accredited by the Engineering Accreditation Commission of ABET, www.abet.org.

The mission of the Ocean Engineering Program is to conduct research, serve the public, and educate students in a broad program of instruction encompassing traditional and emerging areas of ocean engineering. Graduates are prepared for entering engineering practice, continuing onto graduate study, life-long learning and professional development. Students develop a sense of professionalism and an appreciation for the obligations of a professional engineer. The Program offers ocean engineering continuing education activities for the people and marine industry of the state, nation and international community. The Program serves the public and engineering profession in Texas and the nation through participation of faculty and students in public and professional activities. Applied and fundamental research is conducted that contributes to the better understanding of ocean engineering and supports student educational development.

The program educational objectives of the Ocean Engineering Program are:

1. Graduates contribute to the ocean engineering profession and society.
2. Graduates gain employment in ocean engineering and related engineering fields with private and government organizations.
3. Graduates advance to positions of increased responsibility and develop professionally through training, technical conferences, and continuing education activities.
4. Some graduates become professional engineers and members of ocean engineering related professional societies.
5. Some graduates pursue graduate studies in ocean engineering and related fields and receive post baccalaureate degrees.

The Department of Ocean Engineering is a two-campus department with campuses located in College Station and Galveston, Texas. The laboratory facilities accessible to the Department of Ocean Engineering are among the most comprehensive in the nation for testing offshore, dredging and coastal systems. The College Station facilities are located in the Reta and Bill Haynes ’46 Coastal Engineering Laboratory, the Offshore Technology Research Center and the Civil Engineering Laboratory Building. These facilities include a large deep water wave basin, a towing tank and model dredge, a wave channel, fluid dynamics laboratory equipment, a shallow water wave basin and data acquisition systems. The facilities in Galveston include naval architecture, fluid dynamics, and geotechnical experimental equipment, and two wave channels. The Galveston campus also provides access to the Gulf of Mexico through the use of small boats and research vessels that are available for education and research. Additional information is available on the Department of Ocean Engineering website: http://engineering.tamu.edu/ocean.

Before commencing course work in the major, students must be admitted to the major or have the approval of the department head.

Faculty

Carney, Sara E, Assistant Lecturer
Ocean Engineering
MS, Texas A&M University, 2016

Falzarano, Jeffrey M, Professor
Ocean Engineering
PHD, University of Michigan, 1990

Figlus, Jens, Assistant Professor
Ocean Engineering
PHD, University of Delaware, 2010

Girimaji, Sharath S, Professor
Ocean Engineering
PHD, Cornell University, 1990

Gordon, Robert B, Senior Lecturer
Ocean Engineering
PHD, University of Rhode Island, 1982

Greer, Matthew N, Senior Lecturer
Ocean Engineering
MS, Massachusetts Institute of Technology, 1979

Horrillo, Juan J, Associate Professor
Ocean Engineering
PHD, University of Alaska Fairbanks, 2006

Kang, Heonyong, Research Assistant Professor
Ocean Engineering
PHD, Texas A&M University, 2014

Kian, Rozita, Research Assistant Professor
Ocean Engineering
PHD, Middle East Technical University, 2015
The basic science and mathematics include two semesters of physics and one semester of chemistry with laboratories and mathematics through differential equations and one course in statistics. Fundamental engineering courses such as foundations in engineering, engineering statics, dynamics, materials, mechanics of deformable bodies, thermodynamics or electrical engineering, geotechnical engineering develop strong understanding of engineering basics. Courses that directly apply to ocean engineering include: coastal engineering, dynamics of ocean systems, engineering design of offshore and coastal systems, fluid dynamics and fluid dynamics laboratory, marine hydrodynamics, naval architecture, numerical methods, ocean engineering laboratory, ocean engineering wave mechanics, oceanography, offshore and coastal structures, underwater acoustics, senior capstone design project, steel and concrete design, and underwater and moored system design. The technical elective program provides students ability to develop some emphasis in offshore, coastal, or underwater systems. The ocean engineering curriculum includes courses in written communication skills, language, engineering ethics, philosophy and culture, social sciences and American heritage to ensure a well-rounded education.

Program Requirements

The freshman year is identical for degrees in aerospace engineering, biomedical engineering, civil engineering, computer engineering, computer science, electrical engineering, electronic systems engineering technology, industrial distribution, industrial engineering, manufacturing and mechanical engineering technology, mechanical engineering, multidisciplinary engineering technology, nuclear engineering, ocean engineering, and petroleum engineering. The freshman year is slightly different for chemical engineering in that students take CHEM 101/CHEM 111 or CHEM 107/CHEM 117 and CHEM 102/CHEM 112. Biomedical Engineering also requires a two semester sequence of chemistry courses consisting of CHEM 101/CHEM 111 or CHEM 107/CHEM 117 and CHEM 102/CHEM 112. Students pursuing degrees in biological and agricultural engineering should refer to the specific curriculum for this major. It is recognized that many students will change the sequence and number of courses taken in any semester. Deviations from the prescribed course sequence, however, should be made with care to ensure that prerequisites for all courses are met.

1 A grade of C or better is required.
2 Entering students will be given a math placement exam. Test results will be used in selecting the appropriate starting course which may be at a higher or lower level.
Of the 18 hours shown as University Core Curriculum electives, 3 must be from creative arts (for Industrial Distribution this is 3 hours from language, philosophy and culture, see IDIS curriculum for more information), 3 from social and behavioral sciences, 6 from American history, and 6 from government/political science. The required 6 hours from international and cultural diversity may be met by courses satisfying the creative arts, social and behavioral sciences (for Industrial Distribution this is language, philosophy and culture), and American history requirements if they are also on the approved list of international and cultural diversity courses.

BMEN and CHEN require 8 hours of freshman chemistry, which may be satisfied by CHEM 101/CHEM 111 or CHEM 107/CHEM 117 and CHEM 102/CHEM 112; Credit by Examination (CBE) for CHEM 101/CHEM 111 or CHEM 107/CHEM 117 plus CHEM 102/CHEM 112; or 8 hours of CBE for CHEM 101/CHEM 111 or CHEM 107/CHEM 117.

To be selected from the University Core Curriculum. Of the 18 hours shown as University Core Curriculum electives, 3 hours must be from creative arts, 3 from social and behavioral sciences, 6 from American history, 6 from government/political science. The required 6 hours from international and cultural diversity may be met by courses satisfying the creative arts, social and behavioral sciences, and American history requirements if they are also on the approved list of international and cultural diversity courses.

All students required to complete a high-impact experience in order to graduate. The list of possible high-impact experiences is available in the OCEN advising office.

All students must take at least two courses in their major that are designated as writing intensive (W). ENGR 482/PHIL 482 and OCEN 410 taken at Texas A&M satisfy this requirement.

This technical elective must be approved by the department head or the undergraduate advisor. Technical electives are chosen from the approved technical elective list.

Total Program Hours 128

Petroleum Engineering is concerned primarily with the economic extraction of oil, gas, and other natural resources from the earth. Oil and gas is produced through the design, drilling and operation of wells...
and well systems, and the integrated management of the underground reservoirs in which the resources are found.

The mission of the Petroleum Engineering Department is to create, preserve, integrate, transfer and apply petroleum engineering knowledge and to enhance the human capability of its practitioners. The Petroleum Engineering Program has two educational objectives:

- graduates will have the technical depth and breadth to be successful professionals early in their careers; and
- graduates will have the broad technical knowledge and soft skills needed to rise to positions of professional leadership.

In essence, the goal of the Petroleum Engineering curriculum is to provide a modern engineering education with proper balance between fundamentals and practice, and to graduate engineers capable of being productive contributors immediately who are also prepared for lifelong learning. The curriculum includes study of:

- design and analysis of well systems and procedures for drilling and completing wells;
- characterization and evaluation of subsurface geological formations and their resources;
- design and analysis of systems for producing, injecting and handling fluids;
- application of reservoir engineering principles and practices for optimizing resource development and management; and
- use of project economics and resource valuation methods for design and decision making under conditions of risk and uncertainty.

There is a heavy emphasis on mathematics, computer applications, communication skills and interdisciplinary problem solving. As a result, Aggie petroleum engineers are in high demand in the industry, and their starting salaries are consistently among the top in the University and the nation.

The department is well known for its curriculum, facilities and faculty, and its undergraduate program was recognized as one of the top petroleum engineering programs in the United States. The faculty comprises more than 41 professors and lecturers, many of them widely known and globally involved in the petroleum industry. Three (3) of the faculty are members of the prestigious National Academy of Engineering, and 18 are Distinguished Members of the Society of Petroleum Engineers. The Bachelor of Science program is accredited by the Engineering Accreditation Commission of ABET, www.abet.org.

Students must work as interns during the summer months; a minimum of six weeks of approved experience is required for graduation. The department also participates in the Cooperative Education Program.

In addition to the Bachelor of Science degree in Petroleum Engineering, the department also offers both masters and doctoral degrees, including the Master of Science and Master of Engineering, and the Doctor of Philosophy and Doctor of Engineering (see the Texas A&M University Graduate and Professional Catalog).

Before commencing course work in the major, students must be admitted to the major or have the approval of the department.

Students must make a grade of "C" or better in all courses.

Energy Engineering - Certificate

The objective of the Energy Engineering Certificate program is to better prepare undergraduate students to face the challenges of world energy supply and demand and how to ensure a sustainable energy future. The program will educate engineering majors and suitably prepared science majors about all energy sources, their development, generation, conversion, transmission, and use; with an emphasis on the importance of improving the standard of living for all people while at the same time preserving and improving the environment. To earn the Energy Engineering Certificate, a student must complete a minimum of 13 semester credit hours which includes one required course and three additional courses to be selected from a specified list. An overall GPA of 3.0 must be achieved to be awarded the certificate. Completion of the certificate will be recorded on the student's University transcript.

For additional information, contact the Energy Engineering Certificate coordinator or Engineering Academic and Student Affairs, Engineering Activities Building B (EABB), (979) 845-7200.

Oceanography.

waters, and the dynamics of water masses are the major elements of marine environment and its inhabitants. The distribution and nature of physics, and atmospheric chemistry. Oceanography is the study of the quality through the disciplines of atmospheric dynamics, atmospheric studies of weather/meteorology, climate and climate change, and air on continents and ocean basins. It also includes the detection of natural internal structure, physical properties, and plate motions and their effect of solid Earth. This includes the measurement and understanding of its life on its surface and in its waters. Geophysics focuses on the physics structures, and with the history of its development and the evolution of surface and within Earth: with the materials of Earth, its forms and technologies. As an interdisciplinary field, it synthesizes knowledge from a spatial perspective using a range of methods and geospatial people.

The College of Geosciences is home to four academic departments in these disciplines and interdisciplinary academic offerings in Environmental Programs and Water Management and Hydrological Sciences. The mission of the College of Geosciences is to advance new understandings of the Earth system and apply them to the needs of society, to prepare the next generation of geoscientists to conduct research, to find and develop natural resources, and to measure and respond to environmental change. In doing this, the College of Geosciences intends to lead in establishing the geosciences as the most important and impactful scientific discipline of the 21st century. To sustain human society into the future will depend more on the innovation and application of discovery in the geosciences than in other disciplines. The interdisciplinarity of our field is essential to solving today's grand challenges—understanding global climate change, maintaining air and water quality, and producing adequate energy and food supplies for all people.

Geography studies humans and their interactions with the environment from a spatial perspective using a range of methods and geospatial technologies. As an interdisciplinary field, it synthesizes knowledge from the other geosciences as well as from the social and biological sciences. Geology deals with the processes and forces acting at the surface and within Earth: with the materials of Earth, its forms and structures, and with the history of its development and the evolution of life on its surface and in its waters. Geophysics focuses on the physics of solid Earth. This includes the measurement and understanding of its internal structure, physical properties, and plate motions and their effect on continents and ocean basins. It also includes the detection of natural resources through remote sensing. Atmospheric Sciences includes studies of weather/meteorology, climate and climate change, and air quality through the disciplines of atmospheric dynamics, atmospheric physics, and atmospheric chemistry. Oceanography is the study of the marine environment and its inhabitants. The distribution and nature of marine life, the development of ocean basins, the chemistry of ocean waters, and the dynamics of water masses are the major elements of Oceanography.
in the discipline; at least 6 hours must be upper-division courses in the
discipline. Each student choosing to complete a minor must contact
the department offering the minor to determine if specific courses are
required.

**Change of Major and Transfer Students**

Change of Major students are welcomed in the College of Geosciences. Students seeking entry from another major must be in good academic standing, meet approval of the Associate Dean and have shown interest in their new intended major by taking at least one course in the subject. To begin the Change of Major process, students should first contact the academic advisor in the department to which they wish to change. If the student meets minimum criteria, he or she will be referred to the Associate Dean for approval and processing.

Students are welcomed to transfer into the College of Geosciences from other universities and community colleges. Overall, the College of Geosciences requires a prospective student to have completed, or be in progress of completing, a minimum of 24 hours from a list of courses specific to each major outlined on page 56 of this catalog with a cumulative minimum GPA of 2.5. The College of Geosciences is also participating in the Program for Transfer Admission as well as the Program for System Admission in cooperation with Prairie View A&M University, Tarleton State University, Texas A&M International University, Texas A&M University-Commerce, Texas A&M University–Corpus Christi, Texas A&M University—Kingsville, West Texas A&M University and Texas A&M University–Texarkana.

**Teacher Certification**

The need for highly qualified teachers is high in the state of Texas. Students in the College of Geosciences are encouraged to consider pursuing a career in teaching. A number of pathways to certification are available. Interested students should consult with their advisors early in their programs and consult options outlined on the certification website. The college collaborates with the College of Science and the College of Education and Human Development on the aggiteACH Program (http://aggiteach.tamu.edu) and in the University Studies degree program in secondary science teaching. Students in Geography may obtain composite social studies certification with a specialty in Geography through the Secondary Post-Baccalaureate Certification Program (8-12) or alternative certification options.

**University Honors Programs**

The College of Geosciences participates in the University Honors Programs, which is described in detail at Honors and Undergraduate Research (p. 103).

**International and Cultural Diversity Requirement**

Texas A&M University requires its students to meet an International and Cultural Diversity requirement as part of the Graduation requirements. Meeting this requirement will require the careful selection of courses. The student is directed to Requirements for a Baccalaureate Degree (p. 27) section of this catalog for detailed information regarding this requirement and is also encouraged to seek the advice of the student’s academic advisor.

**Curricula — College of Geosciences**

- Environmental Geosciences
- Geographic Information Science and Technology
- Geography
- Geology
- Geophysics
- Meteorology
- Oceanography
- University Studies—Geography
- University Studies—GIS

**Majors**

**College of Geosciences**

- Bachelor of Science in Environmental Geoscience (p. 424)
- Bachelor of Science in Environmental Geoscience and Master of Ocean Science and Technology, 5-Year Degree Program (p. 428)
- Bachelor of Science in Environmental Studies (p. 429)

**Atmospheric Sciences**

- Bachelor of Science in Meteorology (p. 435)
- Bachelor of Science in Meteorology and Master of Ocean Science and Technology, 5-Year Degree Program (p. 436)

**Geography**

- Bachelor of Science in Geographic Information Science and Technology, Computation, Design and Analysis Track (p. 439)
- Bachelor of Science in Geographic Information Science and Technology, Earth Systems and Analysis Track (p. 441)
- Bachelor of Science in Geographic Information Science and Technology, Human Systems and Society Track (p. 443)
- Bachelor of Science in Geography (p. 445)
- Bachelor of Science in University Studies, Geographic Information Science and Technology Concentration (p. 448)
- Bachelor of Science in University Studies, Geography Concentration (p. 448)

**Geology and Geophysics**

- Bachelor of Arts in Geology (p. 451)
- Bachelor of Arts in Geology and Master of Ocean Science and Technology, 5-Year Degree Program (p. 453)
- Bachelor of Science in Geology (p. 454)
- Bachelor of Science in Geology and Master of Ocean Science and Technology, 5-Year Degree Program (p. 455)
- Bachelor of Science in Geophysics (p. 457)

**Oceanography**

- Bachelor of Science in Oceanography (p. 460)

**Minors**

**College of Geosciences**

- Climate Change Minor (p. 432)
- Earth Sciences Minor (p. 432)
- Environmental Geosciences Minor (p. 433)
Environmental Geoscience - BS

The increasing demands that population growth and affluence put on the natural resources and the Earth’s environment require greater numbers of trained professionals and informed citizens. The BS degree in Environmental Geosciences embraces all the disciplines of geosciences to give the student a rigorous interdisciplinary education including issues associated with environmental policy. The degree trains students for employment by industry, environmental and engineering consulting firms, non-governmental organizations, and governmental regulatory agencies, among other entities. Students focus coursework in a particular environmental theme: coastal and marine environments, water, human impact on the environment, climate change, or biosphere.

Texas A&M University Undergraduate Catalog
### Environmental Geoscience - 5-Year Bachelor of Science/Master of Ocean Science and Technology

The Fast Track Program offers motivated and exceptional students the opportunity to achieve aspirations in an efficient program at Texas A&M, completing the Bachelor of Science (B.S.) degree in the Environmental Geosciences program and the Master of Ocean Science and Technology degree in 5 years. There will be only two courses used for dual credit in this program. There is a total of 150 hours of coursework. The concurrent degree program will enable these motivated students to coordinate the required B.S. coursework (120 undergraduate credit hours including 6 dual credit graduate hours) and Master of Ocean Science and Technology coursework (36 credit hours including the 6 dual credit graduate hours) to complete the required credit hours for each degree without diminishing scope or quality of work and within 5 years.

### Application and Eligibility:

- Applications to the Fast Track program will be submitted by July 1 after the completion of the student’s junior year. Applications submitted after that time will be evaluated on a case by case basis.
- Applicants must have a minimum undergraduate GPR of 3.0. Applicants should also earn a C or better in all Chemistry, Calculus and Physics courses. Once admitted to the program, students must maintain a minimum 3.0 GPR.
- A faculty advisor will be assigned to each student. Students may seek additional mentors, but a formal committee is not required.
- Students admitted into the Fast Track program must finish the entire 150 credit hours to obtain both the Bachelor’s and Master’s degrees. These students will be conferred with two degrees once they complete the 5th year of the concurrent program.
- Students admitted to the program will change from U4 to G7 status. Applications to the Fast Track program will be submitted by July 1 after the completion of the student’s junior year. Applications submitted after that time will be evaluated on a case by case basis.
- Students not accepted or not allowed to continue with the Fast Track Program will complete the 120 hour Bachelor’s degree under the standard 4 year curriculum. These students may still apply to the traditional graduate program.
- Students will graduate at the completion of the 5th year in the Fast Track Program coursework (150 credit hours) with both Bachelor’s and Master’s degrees. Students will complete the coursework in May of the 5th year.

---

1 Students who have taken OCNG 251 cannot take OCNG 401.

Two courses in the degree plan must be writing intensive courses designated by the Environmental Programs in the schedule of classes. Also, international and cultural diversity electives (6 hours) must be incorporated into the degree.
Freshmen entering the program take a first year seminar, GEOS 101. The choice is not restricted. Students transferring or changing majors into the program, who have not taken GEOS 101, are required to take GEOS 481 in their junior or senior year. It is recommended to select a course that also fulfills an International and Cultural Diversity (p. 40) requirement. Select in consultation with advisor.

If students use nine credits of allowed OCNG courses (e.g. OCNG 401, OCNG 350, OCNG 451, OCNG 485) as Coastal and Marine Environments theme electives, they will receive an OCNG minor with their BS in ENGS degree. If one of the Introductory Geoscience course and associated labs listed in Year Two is OCNG 251 with OCNG 252, then only two (six credits) of the theme electives needs to be from OCNG to still get the minor.

Students will not be permitted to receive credit for both the 400- and 600-level versions of certain courses because the content and learning outcomes are too similar (e.g. OCNG 440/OCNG 640; GEOS 470/OCNG 655).

Two courses in the degree plan must be writing intensive courses designated by the Environmental Programs in the schedule of classes. Also, international and cultural diversity electives (6 hours) must be incorporated into the degree.

Any of the required courses may be taken during the summer sessions to diminish the heavy semester loads during Years 2 and 3.

Environmental Studies - BS

Environmental Studies - BS

The increasing demands that population growth and affluence put on Earth’s natural resources and environment require greater numbers of trained professionals and informed citizens. The Bachelor of Science degree in Environmental Studies blends an interdisciplinary understanding of Earth’s surface processes and environmental problems, along with the policy and decision-making components of human
interactions with the environment. The degree is designed to educate students about the scientific, human-dimension and policy aspects of environmental issues facing our state and nation as they work in regulatory agencies, industry, and non-governmental organizations to resolve problems. Students focus upper division coursework in one of five environmental themes: 1) urban environment, 2) occupational health and safety, 3) environmental regulation and compliance, 4) Geographic Information Science and Technology (GIST), and 5) global environment.
