An acceptable thesis is required for the Master of Science degree for a student who selects the thesis option program. The finished work must reflect a comprehensive understanding of the pertinent literature and express in clear English, the problem(s) for study, the method, significance and results of the student’s original research. Guidelines for the preparation of the thesis are available in the *Thesis Manual*, which is available online at the Office of Graduate and Professional Studies website.

After successful defense (or exemption) and approval by the student’s advisory committee and the head of the student’s major department (or chair of the intercollegiate faculty, if appropriate), the student must submit his/her thesis in electronic format as a single PDF file. The PDF file must be uploaded to the Office of Graduate and Professional Studies website. Additionally, a signed paper approval form with original signatures must be received by the Office of Graduate and Professional Studies. The PDF file and the signed approval form are required by the deadline.

Deadline dates for submitting the thesis are announced each semester or summer term in the “Office of Graduate and Professional Studies Calendar” (see Time Limit statement). These dates also can be accessed via the Office of Graduate and Professional Studies website.

Each student who submits a document for review is assessed a one-time thesis/dissertation processing fee through Student Business Services. This fee is for the thesis/dissertation services provided. After commencement, theses and dissertations are digitally stored and made available through the Texas A&M Libraries.

A thesis that is deemed unacceptable by the Office of Graduate and Professional Studies because of excessive corrections will be returned to the student’s department head (or chair of the intercollegiate faculty, if applicable). The manuscript must be resubmitted as a new document, and the entire review process must begin again. All original submittal deadlines must be met during the resubmittal process to graduate that semester.

**Thesis Proposal**

For the thesis option Master of Science degree, the student must prepare a thesis proposal for approval by the advisory committee and the head of the major department or chair of the interdisciplinary faculty, if applicable. This proposal must be submitted to the Office of Graduate and Professional Studies at least 20 working days prior to the submission of the request for the final examination.

Compliance issues must be addressed if a graduate student is performing research involving human subjects, animals, infectious biohazards and recombinant DNA. A student involved in these types of research should check with the Office of Research Compliance and Biosafety at (979) 458-1467 to address questions about all research compliance responsibilities. Additional information can also be obtained on the Office of Research Compliance and Biosafety website.

**Final Examination/Thesis Defense**

A student must pass a final examination by dates announced each semester or summer term in the Office of Graduate and Professional Studies Calendar. To be eligible to take the final examination, a student’s GPR must be at least 3.000 for courses on the degree plan and for all courses completed at Texas A&M which are eligible to be applied to a graduate degree, and there must be no unabsolved grades of D, F or U for any course listed on the degree plan. To absolve a deficient grade, the student must repeat the course at Texas A&M University and achieve a grade of C or better. All coursework on the degree plan must have been completed with the exception of those hours for which the student is registered. For thesis-option students, an approved thesis proposal must be on file in the Office of Graduate and Professional Studies according to published deadlines prior to the final examination or submission of the request for exemption from the final examination.

A request to hold and announce the final examination must be submitted to the Office of Graduate and Professional Studies a minimum of 10 working days in advance of the scheduled date for the examination. The Office of Graduate and Professional Studies must be notified in writing of any cancellations. A student may be given only one opportunity to repeat the final examination for the master’s degree and that must be within
a time period that does not extend beyond the end of the next regular semester (summer terms are excluded).

For thesis option students, the final examination covers the thesis and all work taken on the degree plan and at the option of the committee may be written or oral or both. The final examination may not be administered before the thesis is available to all members of the student’s advisory committee in substantially final form, and all members have had adequate time to review the document. The examination is conducted by the student’s advisory committee as finally constituted. A thesis option student must be registered in the University in the semester or summer term in which the final examination is taken. Persons other than members of the graduate faculty may, with mutual consent of the candidate and the major professor, attend final examinations for advanced degrees. Upon completion of the questioning of the candidate, all visitors must excuse themselves from the proceedings. A positive vote by all members of the graduate committee with at most one dissension is required to pass a student on his or her exam. A department, or interdisciplinary degree program, may have a stricter requirement provided there is consistency within all degree programs within a department or interdisciplinary degree program.

The Report of the Final Examination Form must be submitted with original signatures of only the committee members approved by the Office of Graduate and Professional Studies. If an approved committee member substitution (1 only) has been made, his/her signature must also be submitted to the Office of Graduate and Professional Studies. If necessary, multiple copies of the form may be submitted with different committee member original signatures. If an approved committee member substitution (1 only) has been made, his/her signature must be included on the form submitted to the Office of Graduate and Professional Studies.

A thesis option candidate may petition to be exempt from his/her final examination provided his/her degree plan GPR is 3.500 or greater and he/she has the approval of the advisory committee, the head of the student’s major department, or intercollegiate chair, if appropriate, and the Office of Graduate and Professional Studies. It is required that the petition for exemption be submitted the same semester the student intends to submit the thesis.

Non-Thesis Option

For non-thesis option students, a final comprehensive examination may be required.

The final exam cannot be held prior to the mid point of the semester if questions on the exam are based on courses in which the student is currently enrolled. If a student has completed all required degree plan coursework, the student is not required to be registered for classes in the semester the final examination is administered (unless he/she holds an assistantship). For specific final examination requirements, a student should check the program requirements for the degree which he/she is pursuing.

Exam results must be submitted with original signatures of only the committee members approved by the Office of Graduate and Professional Studies. If an approved committee member substitution (1 only) has been made, his/her signature must also be submitted to the Office of Graduate and Professional Studies.

A student pursuing the non-thesis option is not allowed to enroll in 691 (research) for any reason and 691 may not be used for credit toward a non-thesis option Master of Science degree. A maximum of 4 credit hours of 684 (Professional Internship), 8 credit hours of 685 (Directed Studies), and up to 3 credit hours of 690 (Theory of Research) or 695 (Frontiers in Research) may be used toward the non-thesis option Master of Science degree. In addition, any combination of 684, 685, 690 and 695 may not exceed 25 percent of the total credit hour requirement shown on the individual degree plan. All requirements for the non-thesis option Master of Science degree other than those specified above are the same as for the thesis option degree.

Additional Requirements

Residence

In partial fulfillment of the residence requirement for the degree of Master of Science, the student must complete 9 resident credit hours during one regular semester or one 10-week summer semester in resident study at Texas A&M University. Upon recommendation of the student’s advisory committee, department head or Chair of the Interdisciplinary Program, if appropriate, and with approval of the Office of Graduate and Professional Studies, a student may be granted exemption from this requirement. Such a petition, however, must be approved prior to the student’s registration for the final 9 credit hours of required coursework.

Students who are employed full-time while completing their degree may fulfill total residence requirements by completion of less-than-full time course loads each semester. In order to be considered for this, the student is required to submit a Petition for Waivers and Exceptions along with verification of his/her employment to the Office of Graduate and Professional Studies.

Continuous Registration

A student in the thesis option of the Master of Science program who has completed all coursework on his/her degree plan other than 5V98, 5V99, and 691 (research) is required to be in continuous registration until all requirements for the degree have been completed. See Continuous Registration Requirements (p. 28).

Time Limit

All degree requirements must be completed within a period of seven consecutive years for the degree to be granted. A course will be considered valid until seven years after the end of the semester in which it is taken. Graduate credit for coursework which is more than seven calendar years old at the time of the final examination (oral or written) may not be used to satisfy degree requirements.

A student who has chosen the thesis option must have the final corrected version of the thesis cleared by the Office of Graduate and Professional Studies no later than one year after the final examination, or approval of a petition for exemption from the final exam, or within the seven-year time limit, whichever occurs first. Failure to do so will result in the degree not being awarded.
Foreign Languages
No specific language requirement exists for the Master of Science degree.

Application for Degree
For information on applying for your degree, please visit the Graduation (p. 26) section.

Doctor of Philosophy in Psychology
Work leading to the degree of Doctor of Philosophy (PhD) is designed to give the candidate a thorough and comprehensive knowledge of his or her professional field and training in methods of research. The final basis for granting the degree shall be the candidate’s grasp of the subject matter of a broad field of study and a demonstrated ability to do independent research. In addition, the candidate must have acquired the ability to express thoughts clearly and forcefully in both oral and written languages. The degree is not granted solely for the completion of coursework, residence and technical requirements, although these must be met.

For a student who has completed a master’s degree, a DDS/DMD, DVM or MD at a U.S. institution, a minimum of 64 hours is required on the degree plan for the degree of Doctor of Philosophy. For a student who has completed a baccalaureate degree but not a master’s degree or a U.S. DDS/DMD, DVM or MD, a minimum of 96 hours is required on the degree plan for the degree of Doctor of Philosophy.

Steps to Fulfill Doctoral Degree Requirements

<table>

Program Requirements

Program Requirements

- Student’s Advisory Committee (p. 1116)
- Degree Plan (p. 1116)
- Transfer of Credit (p. 1117)
- Research Proposal (p. 1117)
- Examinations (p. 1117)
  - Preliminary Examination (p. 1117)
  - Preliminary Examination Format (p. 1117)
  - Preliminary Examination Scheduling (p. 1118)
  - Report of Preliminary Examination (p. 1118)
  - Retake of Failed Preliminary Examination (p. 1118)
  - Final Examination (p. 1118)
  - Report of Final Examination (p. 1119)
- Dissertation (p. 1119)

Student’s Advisory Committee

After receiving admission to graduate studies and enrolling, the student will consult with the head of his or her major or administrative department (or chair of the intercollegiate faculty) concerning appointment of the chair of the advisory committee. The student’s advisory committee will consist of no fewer than four members of the graduate faculty representative of the student’s several fields of study and research, where the chair or co-chair must be from the student’s department (or intercollegiate faculty, if applicable), and at least one or more of the members must have an appointment to a department other than the student’s major department. The outside member for a student in an interdisciplinary degree program must be from a department different from the chair of the student’s committee.

The chair, in consultation with the student, will select the remainder of the advisory committee. Only graduate faculty members located on Texas A&M University campuses may serve as chair of a student’s advisory committee. Other Texas A&M University graduate faculty members located off-campus may serve as a member or co-chair (but not chair), with a member as the chair.

If the chair of a student’s advisory committee voluntarily leaves the University and the student is near completion of the degree and wants the chair to continue to serve in this role, the student is responsible for securing a current member of the University Graduate Faculty, from the student’s academic program and located near the Texas A&M University campus site, to serve as the co-chair of the committee. The Department Head or Chair of Intercollegiate faculty may request in writing to the Associate Provost for Graduate and Professional Studies that a faculty member who is on an approved leave of absence or has voluntarily separated from the university, be allowed to continue to serve in the role of chair of a student’s advisory committee without a co-chair for up to one year. The students should be near completion of the degree. Extensions beyond the one year period can be granted with additional approval of the Dean.

The committee members’ signatures on the degree plan indicate their willingness to accept the responsibility for guiding and directing the entire academic program of the student and for initiating all academic actions concerning the student. Although individual committee members may be replaced by petition for valid reasons, a committee cannot resign en masse. The chair of the committee, who usually has immediate supervision of the student’s research and dissertation or record of study, has the responsibility for calling all meetings of the committee. The duties of the committee include responsibility for the proposed degree plan, the research proposal, the preliminary examination, the dissertation or record of study and the final examination. In addition, the committee, as a group and as individual members, is responsible for counseling the student on academic matters, and, in the case of academic deficiency, initiating recommendations to the Office of Graduate and Professional Studies.

Degree Plan

The student’s advisory committee will evaluate the student’s previous education and degree objectives. The committee, in consultation with the student, will develop a proposed degree plan and outline a research problem which, when completed, as indicated by the dissertation (or its equivalent for the degree of Doctor of Education or the degree of Doctor of Engineering), will constitute the basic requirements for the degree. The degree plan must be filed with the Office of Graduate and Professional Studies prior to the deadline imposed by the student’s college and no later than 90 days prior to the preliminary examination.

This proposed degree plan should be submitted through the online Document Processing Submission System located on the website http:// ogsdpss.tamu.edu. A minimum of 64 hours is required on the degree plan for the Doctor of Philosophy for a student who has completed a master’s degree. A student who has completed a DDS/DMD, DVM or a MD at a U.S. institution is also required to complete a minimum of 64 hours. A student who has completed a baccalaureate degree but not a master’s degree will be required to complete a 96-hour degree plan. Completion of a DDS/DMD, DVM or MD degree at a foreign institution requires completion of a minimum of 96 hours for the Doctor of Philosophy. A field of study may be primarily in one department or in a combination of departments. A degree plan must carry a reasonable amount of 691 (research).

Additional coursework may be added by petition to the approved degree plan by the student’s advisory committee if it is deemed necessary to correct deficiencies in the student’s academic preparation. No changes can be made to the degree plan once the student’s Request for Final Examination is approved by the Office of Graduate and Professional Studies.
Approval to enroll in any professional course (900-level) should be obtained from the head of the department (or Chair of the intercollegiate faculty, if applicable) in which the course will be offered before including such a course on a degree plan.

No credit may be obtained by correspondence study, by extension or for any course of fewer than three weeks duration.

Transfer of Credit
Courses for which transfer credits are sought must have been completed with a grade of B or greater and must be approved by the student’s advisory committee and the Office of Graduate and Professional Studies. These courses must not have been used previously for another degree. Except for officially approved cooperative doctoral programs, credit for thesis or dissertation research or the equivalent is not transferable. Credit for “internship” coursework in any form is not transferable. Courses taken in residence at an accredited U.S. institution or approved international institution with a final grade of B or greater will be considered for transfer credit if, at the time the courses were completed, the courses would be accepted for credit toward a similar degree for a student in degree-seeking status at the host institution. Credit for coursework taken by extension is not transferable. Coursework in which no formal grades are given or in which grades other than letter grades (A or B) are earned (for example, CR, P, S, U, H, etc.) is not accepted for transfer credit. Credit for coursework submitted for transfer from any college or university must be shown in semester credit hours, or equated to semester credit hours.

Courses used toward a degree at another institution may not be applied for graduate credit. If the course to be transferred was taken prior to the conferral of a degree at the transfer institution, a letter from the registrar at that institution stating that the course was not applied for credit toward the degree must be submitted to the Office of Graduate and Professional Studies.

Grades for courses completed at other institutions are not included in computing the GPR. An official transcript from the university at which transfer courses are taken must be sent directly to the Office of Admissions.

Research Proposal
The general field of research to be used for the dissertation should be agreed on by the student and the advisory committee at their first meeting, as a basis for selecting the proper courses to support the proposed research.

As soon thereafter as the research project can be outlined in reasonable detail, the dissertation research proposal should be completed. The research proposal should be approved at a meeting of the student’s advisory committee, at which time the feasibility of the proposed research and the adequacy of available facilities should be reviewed. The approved proposal, signed by all members of the student’s advisory committee, the head of the student’s major department (or chair of the intercollegiate faculty, if applicable), must be submitted to the Office of Graduate and Professional Studies at least 20 working days prior to the submission of the Request for the Final Examination.

Compliance issues must be addressed if a graduate student is performing research involving human subjects, animals, infectious biohazards and recombinant DNA. A student involved in these types of research should check with the Office of Research Compliance and Biosafety at (979) 458-1467 to address questions about all research compliance responsibilities. Additional information can also be obtained on the website http://rcb.tamu.edu.

Examinations

Preliminary Examination for Doctoral Students
The student’s major department (or chair of the interdisciplinary degree program, if applicable) and his or her advisory committee may require qualifying, cumulative or other types of examinations at any time deemed desirable. These examinations are entirely at the discretion of the department and the student’s advisory committee.

The preliminary examination is required. The preliminary examination for a doctoral student shall be given no earlier than a date at which the student is within 6 credit hours of completion of the formal coursework on the degree plan (i.e., all coursework on the degree plan except 681, 684, 690, 691, 692, 693, 695, 697, 791, or other graduate courses specifically designated as S/U in the course catalog). The student should complete the Preliminary Examination no later than the end of the semester following the completion of the formal coursework on the degree plan.

Preliminary Examination Format
The objective of preliminary examination is to evaluate whether the student has demonstrated the following qualifications:

a. a mastery of the subject matter of all fields in the program;
b. an adequate knowledge of the literature in these fields and an ability to carry out bibliographical research;
c. an understanding of the research problem and the appropriate methodological approaches.

The format of the preliminary examination shall be determined by the student’s department (or interdisciplinary degree program, if applicable) and advisory committee, and communicated to the student in advance of the examination. The exam may consist of a written component, oral component, or combination of written and oral components.

The preliminary exam may be administered by the advisory committee or a departmental committee; herein referred to as the examination committee.

Regardless of exam format, a student will receive an overall preliminary exam result of pass or fail. The department (or interdisciplinary degree program, if applicable) will determine how the overall pass or fail result is determined based on the exam structure and internal department procedures. If the exam is administered by the advisory committee, each advisory committee member will provide a pass or fail evaluation decision.

Only one advisory committee substitution is allowed to provide an evaluation decision for a student’s preliminary exam, and it cannot be the committee chair.

If a student is required to take, as a part of the preliminary examination, a written component administered by a department or interdisciplinary degree program, the department or interdisciplinary degree program faculty must:
a. offer the examination at least once every six months. The departmental or interdisciplinary degree program examination should be announced at least 30 days prior to the scheduled examination date.

b. assume the responsibility for marking the examination satisfactory or unsatisfactory, or otherwise graded, and in the case of unsatisfactory, stating specifically the reasons for such a mark.

c. forward the marked examination to the chair of the student’s advisory committee within one week after the examination.

Preliminary Examination Scheduling

Prior to commencing any component of the preliminary examination, a departmental representative or the advisory committee chair will review the eligibility criteria with the student, using the Preliminary Examination Checklist to ensure the student is eligible for the preliminary examination. The following list of eligibility requirements applies.

- Student is registered at Texas A&M University for a minimum of one semester credit hour in the long semester or summer term during which any component of the preliminary examination is held. If the entire examination is held between semesters, then the student must be registered for the term immediately preceding the examination.
- An approved degree plan is on file with the Office of Graduate and Professional Studies prior to commencing the first component of the examination.
- Student’s cumulative GPR is at least 3.000.
- Student’s degree plan GPR is at least 3.000.
- All English language proficiency requirements are satisfied.
- At the end of the semester in which at least the first component of the exam is given, there are no more than 6 hours of coursework remaining on the degree plan (except 681, 684, 690, 691, 692, 693, 695, 697, 791, or other graduate courses specifically designated as S/U in the course catalog). The head of the student’s department (or Chair of the Interdisciplinary Degree Program, if applicable) has the authority to approve a waiver of this criterion.

Report of Preliminary Examination

Credit for the preliminary examination is not transferable in cases where a student changes degree programs after passing a preliminary exam. If a written component precedes an oral component of the preliminary exam, the chair of the student’s examination committee is responsible for making all written examinations available to all members of the committee. A positive evaluation of the preliminary exam by all members of a student’s examination committee with at most one dissection is required to pass a student on his or her preliminary exam.

The student’s department will promptly report the results of the Preliminary Examination to the Office of Graduate and Professional Studies via the Report of Doctoral Preliminary Examination form. The Preliminary Examination checklist form must also be submitted. These forms should be submitted to the Office of Graduate and Professional Studies within 10 working days of completion of the preliminary examination.

The Report of the Preliminary Examination form must be submitted with original signatures of the approved examination committee members.

If an approved examination committee member substitution (one only) has been made, that signature must also be included, in place of the committee member, on the form submitted to the Office of Graduate and Professional Studies. The original signature of the department head is also required on the form.

After passing the required preliminary examination for the doctoral degree, the student must complete the final examination for the degree within four calendar years. Otherwise, the student will be required to repeat the preliminary examination.

Retake of Failed Preliminary Examination

Upon approval of the student’s examination committee, with no more than one member dissenting, and approval of the Office of Graduate and Professional Studies, a student who has failed the preliminary examination may be given one re-examination. Adequate time must be given to permit the student to address the inadequacies emerging from the first preliminary examination. The examination committee must agree upon and communicate in writing to the student, an adequate time-frame from the first examination (normally six months) to retest, as well as a detailed explanation of the inadequacies emerging from the examination. The student and the committee should jointly negotiate a mutually acceptable date for this retest. When providing feedback on inadequacies, the committee should clearly document expected improvements that the student must be able to exhibit in order to retake the exam. The examination committee will document and communicate the time-frame and feedback within 10 working days of the exam that was not passed.

Final Examination for Doctoral Students

The candidate for the doctoral degree must pass a final examination by deadline dates announced in the “Office of Graduate and Professional Studies Calendar” each semester. The doctoral student is allowed only one opportunity to take the final examination.

No unabsolved grades of D, F, or U for any course can be listed on the degree plan. The student must be registered for any remaining hours of 681, 684, 690, 691, 692, 791 or other graduate courses specifically designated as S/U in the course catalog during the semester of the final exam. No student may be given a final examination until they have been admitted to candidacy and their current official cumulative and degree plan GPAs are 3.00 or better.

To be admitted to candidacy for a doctoral degree, a student must have:

1. completed all formal coursework on the degree plan with the exception of any remaining 681, 684, 690 and 691, 692 (Professional Study), or 791 hours,
2. a 3.0 Graduate GPA and a Degree Plan GPA of at least 3.0 with no grade lower than C in any course on the degree plan,
3. passed the preliminary examination,
4. submitted an approved dissertation proposal,
5. met the residence requirements.

The request to hold and announce the final examination must be submitted to the Office of Graduate and Professional Studies a minimum of 10 working days in advance of the scheduled date. Any changes to the degree plan must be approved by the Office of Graduate and Professional Studies prior to the submission of the request for final examination.
The student's advisory committee will conduct this examination. The final examination is not to be administered until the dissertation or record of study is available in substantially final form to the student's advisory committee, and all concerned have had adequate time to review the document. Whereas the final examination may cover the broad field of the candidate's training, it is presumed that the major portion of the time will be devoted to the dissertation and closely allied topics. Persons other than members of the graduate faculty may, with mutual consent of the candidate and the chair of the advisory committee, be invited to attend a final examination for an advanced degree. A positive vote by all members of the graduate committee with at most one dissension is required to pass a student on his or her exam. A department can have a stricter requirement provided there is consistency within all degree programs within a department. Upon completion of the questioning of the candidate, all visitors must excuse themselves from the proceedings.

Report of Final Examination
The student’s department will promptly report the results of the Final Examination to the Office of Graduate and Professional Studies via the Report of Doctoral Final Examination form. These forms should be submitted to the Office of Graduate and Professional Studies within 10 working days of the completion of the final examination. The Office of Graduate and Professional Studies must be notified in writing of any cancellations.

A positive evaluation of the final exam by all members of a student's advisory committee with at most one dissension is required to pass a student on his or her final exam. The Report of the Final Examination Form must be submitted with original signatures of all committee members approved by the Office of Graduate and Professional Studies.

If necessary, multiple copies of the form may be submitted with different committee member original signatures. If an approved committee member substitution (1 only) has been made, his/her signature must be included on the form submitted to the Office of Graduate and Professional Studies.

Dissertation
The ability to perform independent research must be demonstrated by the dissertation, which must be the original work of the candidate. Whereas acceptance of the dissertation is based primarily on its scholarly merit, it must also exhibit creditable literary workmanship. The format of the dissertation must be acceptable to the Office of Graduate and Professional Studies. Guidelines for the preparation of the dissertation are available in the Thesis Manual, which is available online at http://ogaps.tamu.edu.

After successful defense and approval by the student’s advisory committee and the head of the student's major department (or chair of the intercollegiate faculty, if applicable), a student must submit his/her dissertation in electronic format as a single PDF file. The PDF file must be uploaded to the website, http://ogaps.tamu.edu. Additionally, a signed paper approval form with original signatures must be received by the Office of Graduate and Professional Studies. Both the PDF file and the signed approval form are required by the deadline.

Deadline dates for submitting are announced each semester or summer term in the Office of Graduate and Professional Studies Calendar (see Time Limit statement). These dates also can be accessed via the website http://ogaps.tamu.edu.

Each student who submits a document for review is assessed a one-time thesis/dissertation processing fee through Student Business Services. This processing fee is for the thesis/dissertation services provided. After commencement, dissertations are digitally stored and made available through the Texas A&M Libraries.

A dissertation that is deemed unacceptable by the Office of Graduate and Professional Studies because of excessive corrections will be returned to the student's department head or chair of the intercollegiate faculty. The manuscript must be resubmitted as a new document, and the entire review process must begin anew. All original submittal deadlines must be met during the resubmittal process in order to graduate.

Additional Requirements

Residence
A student who enters the doctoral degree program with a baccalaureate degree must spend one academic year plus one semester in resident study at Texas A&M University. A student who holds master’s degree when he/she enters doctoral degree program must spend one academic year in resident study. One academic year may include two adjacent regular semesters or one regular semester and one adjacent 10-week summer semester. The third semester is not required to be adjacent to the one year. Enrollment for each semester must be a minimum of 9 credit hours each to satisfy the residence requirement.

To satisfy the residence requirement, the student must complete a minimum of 9 credit hours per semester or 10-week summer semester in resident study at Texas A&M University for the required period. A student who enters a doctoral degree program with a baccalaureate degree may fulfill residence requirements in excess of one academic year (18 credit hours) by registration during summer sessions or by completion of a less-than-full course load (in this context a full course load is considered 9 credit hours per semester).

Students who are employed full-time while completing their degree may fulfill total residence requirements by completion of less-than-full time course loads each semester. In order to be considered for this, the student is required to submit a Petition for Waivers and Exceptions along with verification of his/her employment to the Office of Graduate and Professional Studies. An employee should submit verification of his/her employment at the time he/she submits the degree plan. See Registration. (p. 28)

See Residence Requirements (p. 22).

Time Limit
All requirements for doctoral degrees must be completed within a period of ten consecutive calendar years for the degree to be granted. A course will be considered valid until 10 years after the end of the semester in which it is taken. Graduate credit for coursework more than ten calendar years old at the time of the final oral examination may not be used to satisfy degree requirements.
After passing the required preliminary oral and written examinations for a doctoral degree, the student must complete the final examination within four calendar years. Otherwise, the student will be required to repeat the preliminary examination.

A final corrected version of the dissertation or record of study in electronic format as a single PDF file must be cleared by the Office of Graduate and Professional Studies no later than one year after the final examination or within the 10-year time limit, whichever occurs first. Failure to do so will result in the degree not being awarded.

Continuous Registration
A student in a program leading to a Doctor of Philosophy who has completed all coursework on his/her degree plan other than 691, 5V98 or 5V99 (research) are required to be in continuous registration until all requirements for the degree have been completed. See Continuous Registration Requirements (p. 28).

Admission to Candidacy
To be admitted to candidacy for a doctoral degree, a student must have:

1. completed all formal coursework on the degree plan with the exception of any remaining 681, 684, 690 and 691, 5V98 and 5V99, or 791.
2. a 3.0 Graduate GPA and a Degree Plan GPA of at least 3.0 with no grade lower than C in any course on the degree plan,
3. passed the preliminary examination (written and oral portions),
4. submitted an approved dissertation proposal,
5. met the residence requirements. The final examination will not be authorized for any doctoral student who has not been admitted to candidacy.

Languages
A student is required to possess a competent command of English. For English language proficiency requirements, see the Admissions section of this catalog. The doctoral (PhD) foreign language requirement at Texas A&M University is a departmental option, to be administered and monitored by the individual departments of academic instruction.

99-Hour Cap on Doctoral Degrees
In Texas, public colleges and universities are funded by the state according to the number of students enrolled. In accordance with legislation passed by the Texas Legislature, the number of hours for which state universities may receive subvention funding at the doctoral rate for any individual is limited to 99 hours. Texas A&M University and other universities will not receive subvention for hours in excess of the limit.

Institutions of higher education are allowed to charge the equivalent of nonresident tuition to a resident doctoral student who has enrolled for 100 or more semester credit hours of doctoral coursework.

A doctoral student at Texas A&M has seven years to complete his/her degree before being charged out-of-state tuition. A doctoral student who, after seven years of study, has accumulated 100 or more doctoral hours will be charged tuition at a rate equivalent to out-of-state tuition. Please note that the tuition increases will apply to Texas residents as well as students from other states and countries who currently are charged tuition at the resident rate. This includes those doctoral students who hold GAT, GANT, and GAR appointments of 20 or more hours and recipients of competitive fellowships who receive more than $1,000 per semester. Doctoral students who, after seven years of study, have not accumulated 100 hours are eligible to pay in-state tuition if otherwise eligible.

For count purposes, a year is counted as three semesters, normally fall, spring and summer. Using this system, a student is allowed 21 semesters as a G8 student to complete the doctoral degree before being penalized with the higher tuition rate. Any semester in which a G8 student is enrolled for a doctoral level course is counted.

The following majors are exempt from the 99-Hour Cap on Doctoral Degrees:

- Biomedical Sciences
- Biochemistry
- Microbiology
- Genetics
- Toxicology
- Nutrition Sciences
- Community Clinical Psychology
- School Psychology
- Veterinary Pathology
- Clinical Psychology
- Counseling Psychology
- Medical Sciences
- Health Services Research
- Health Promotion and Community Health Sciences
- Epidemiology and Environmental Health
- Oral Biology

The hour limit for these majors is 130 doctoral hours.

Application for Degree
For information on applying for your degree, please visit the Graduation (p. 26) section.

Department of Sociology
http://sociology.tamu.edu

Head: D. O’Hearn

Graduate Advisor: W. L. Moore

The Department of Sociology offers graduate study leading to a Doctor of Philosophy. The Doctor of Philosophy degree prepares students for careers of teaching and research in higher education and for careers of research in the private and public sector.

Research and teaching in the department cover all major areas in sociology. The curriculum is constructed especially to support specialized training in the areas of culture, organizational, political and economic sociology; demography, crime, law and deviance; race, class and gender; and social psychology. The department helps students participate actively in these areas of scholarship by providing excellent research facilities and access to data, opportunities to collaborate in faculty research projects, and aid in seeking grants and fellowships to support their own work.

### Master of Science in Sociology

The Master of Science (MS) curriculum is designed to develop new understanding through research and creativity. Students have the option to pursue a thesis or non-thesis Master of Science degree.

#### Steps to Fulfill Master's Degree Requirements

### Program Requirements

#### Program Requirements

- Student’s Advisory Committee (p. 1123)
- Degree Plan (p. 1123)
- Credit Requirements (p. 1123)
- Transfer of Credit (p. 1123)
- Limitations on the Use of Transfer, Extension and Certain Other Courses (p. 1124)
Student's Advisory Committee

After receiving admission to graduate studies and enrolling for coursework, the student will consult with the head of his or her major or administrative department (or intercollegiate faculty, if applicable) concerning appointment of the chair of his or her advisory committee. The student’s advisory committee for the MS degree will consist of no fewer than three members of the graduate faculty, representative of the student’s fields of study and research. The chair or the co-chair of the advisory committee must be from the student’s major department (or intercollegiate faculty, if applicable), and at least one or more of the members must have an appointment to a department other than the student’s major department. The outside member for students in an interdisciplinary program must have an appointment to a department different from the chair of the student’s committee.

The chair, in consultation with the student, will select the remainder of the advisory committee. The student will interview each prospective committee member to determine whether he or she is willing to serve. Only graduate faculty members located on Texas A&M University campuses may serve as chair of a student’s advisory committee. Other graduate faculty members located off campus may serve as a member or co-chair (but not chair) with a member as the chair. The chair of the committee, who usually has immediate supervision of the student’s research and thesis, has the responsibility for calling required meetings of the committee and for calling meetings at any other time considered desirable.

If the chair of a student’s advisory committee voluntarily leaves the University and the student is near completion of the degree and wants the chair to continue to serve in this role, the student is responsible for securing a current member of the University Graduate Faculty, from the student’s academic program and located near the Texas A&M University campus site, to serve as the co-chair of the committee. The Department Head or Chair of Intercollegiate faculty may request in writing to the Associate Provost for Graduate and Professional Studies that a faculty member who is on an approved leave of absence or has voluntarily separated from the university, be allowed to continue to serve in the role of chair of a student’s advisory committee without a co-chair for us to one year. The students should be near completion of the degree. Extensions beyond the one year period can be granted with additional approval of the Dean.

If the chair of the student’s advisory committee is unavailable for an extended time in any academic period during which the student is involved in activities relating to an internship, thesis or professional paper, and is registered for courses such as 684, 691, 692 or 693, the student may request, in writing, that the department head appoint an alternate advisory committee chair during the interim period.

The duties of the committee include responsibility for the proposed degree plan, the research proposal, the thesis and the final examination. In addition, the committee as a group and as individual members are responsible for advising the student on academic matters, and, in the case of academic deficiency, initiating recommendations to the Office of Graduate and Professional Studies.

The committee members’ approval on the degree plan indicate their willingness to accept the responsibility for guiding and directing the entire academic program of the student and for initiating all academic actions concerning the student. Although individual committee members may be replaced by petition for valid reasons, a committee cannot resign en masse.

Degree Plan

The student’s advisory committee, in consultation with the student, will develop the proposed degree plan. The degree plan must be completed and filed with the Office of Graduate and Professional Studies prior to the deadline imposed by the student’s college or interdisciplinary degree program, if applicable, and no later than 90 days prior to the date of the final oral examination or thesis defense.

A student should submit the degree plan using the online Document Processing Submission System (http://ogsdpss.tamu.edu).

A student submitting a proposed degree plan for a Master of Science degree should designate on the official degree plan the appropriate program option.

Additional coursework may be added to the approved degree plan by petition if it is deemed necessary by the advisory committee to correct deficiencies in the student’s academic preparation. No changes can be made to the degree plan once the student’s Request for Final Examination or Request for Final Examination Exemption is approved by the Office of Graduate and Professional Studies.

Credit Requirement

A minimum of 32 semester credit hours of approved courses and research is required for the thesis option Master of Science degree.

A minimum of 36 semester credit hours of approved coursework is required for the Non-Thesis Option.

Ordinarily the student will devote the major portion of his or her time to work in one or two closely related fields. Other work will be in supporting fields of interest.

Transfer of Credit

A student who has earned 12 hours of graduate credit in residence at Texas A&M University may be authorized to transfer courses in excess of the limits prescribed below upon the advice of the advisory committee and with the approval of the Office of Graduate and Professional Studies. Courses taken in residence at an accredited U.S. institution or approved international institution with a final grade of B or greater may be considered for transfer credit if, at the time the courses were completed, the courses would be accepted for credit toward a similar degree for a student in degree-seeking status at the host institution. Otherwise, the limitations stated in the following section apply. Coursework in which no formal grades are given or in which grades other than letter grades (A or B) are earned (for example, CR, P, S, U, H, etc.) is not accepted for transfer credit. Courses appearing on the degree plan with grades of D, F or U may not be absolved by transfer work. Credit for thesis research or the equivalent is not transferable. Credit for coursework submitted for transfer from any college or university must be shown in semester credit hours or equated to semester credit hours. An official transcript from the university at which the transfer coursework was taken must be sent directly to the Office of Admissions.
Courses used toward a degree at another institution may not be applied for graduate credit. If the course to be transferred was taken prior to the conferral of a degree at the transfer institution, a letter from the registrar at that institution stating that the course was not applied for credit toward the degree must be submitted to the Office of Graduate and Professional Studies.

Grades for courses completed at other institutions are not included in computing the GPR.

**Limitations on the Use of Transfer, Extension and Certain Other Courses**

Some departments may have more restrictive requirements for transfer work. If otherwise acceptable, certain courses may be used toward meeting credit-hour requirements for the master’s degree under the following limitations.

1. The maximum number of credit hours which may be considered for transfer credit is the greater of 12 hours or one-third (1/3) of the total hours of a degree plan. The following restrictions apply:
   - Graduate and/or upper-level undergraduate courses taken in residence at an accredited U.S. institution, or approved international institution with a final grade of B or greater will be considered for transfer credit if, at the time the courses were completed, the student was in degree-seeking status at Texas A&M University, or the student was in degree-seeking status at the institution at which the courses were taken; and if the courses would be accepted for credit toward a similar degree for a student in degree-seeking status at the host institution.
   - Courses previously used for another degree are not acceptable for degree plan credit.

2. The maximum number of credit hours taken in post-baccalaureate non-degree (G6) classification at Texas A&M University which may be considered for application to the degree plan is 12.

3. A zero credit 684 and 685 course is only allowed for non-thesis master’s students. Other courses, including 691 research hours, are not eligible for zero credit.

4. Not more than 12 hours may be used in any combination of the following categories:
   - Not more than 8 hours in the combination of 691 (research), 684 (Professional Internship) or may be used.
   - Not more than 8 hours of 685 (Directed Studies) may be used.
   - Not more than 3 hours of 690 (Theory of Research) may be used.
   - Not more than 3 hours of 695 (Frontiers in Research) may be used.

5. A maximum of 2 hours of Seminar (681).

6. A maximum of 9 hours of advanced undergraduate courses (300- or 400-level).

7. For graduate courses of three weeks’ duration or less, taken at other institutions, up to 1 hour of credit may be obtained for each five-day week of coursework. Each week of coursework must include at least 15 contact hours.

8. Continuing education courses may not be used for graduate credit.

9. Extension courses are not acceptable for credit.

Exceptions will be permitted only in unusual cases and when petitioned by the student’s advisory committee and approved by the Office of Graduate and Professional Studies.

**Thesis Option**

An acceptable thesis is required for the Master of Science degree for a student who selects the thesis option program. The finished work must reflect a comprehensive understanding of the pertinent literature and express in clear English, the problem(s) for study, the method, significance and results of the student’s original research. Guidelines for the preparation of the thesis are available in the *Thesis Manual*, which is available online at the Office of Graduate and Professional Studies website.

After successful defense (or exemption) and approval by the student’s advisory committee and the head of the student’s major department (or chair of the intercollegiate faculty, if applicable), the student must submit his/her thesis in electronic format as a single PDF file. The PDF file must be uploaded to the Office of Graduate and Professional Studies website. Additionally, a signed paper approval form with original signatures must be received by the Office of Graduate and Professional Studies. The PDF file and the signed approval form are required by the deadline.

Deadline dates for submitting the thesis are announced each semester or summer term in the “Office of Graduate and Professional Studies Calendar” (see Time Limit statement). These dates also can be accessed via the Office of Graduate and Professional Studies website.

Each student who submits a document for review is assessed a one-time thesis/dissertation processing fee through Student Business Services. This processing fee is for the thesis/dissertation services provided. After commencement, theses and dissertations are digitally stored and made available through the Texas A&M Libraries.

A thesis that is deemed unacceptable by the Office of Graduate and Professional Studies because of excessive corrections will be returned to the student’s department head (or chair of the intercollegiate faculty, if applicable). The manuscript must be resubmitted as a new document, and the entire review process must begin again. All original submittal deadlines must be met during the resubmittal process to graduate that semester.

**Thesis Proposal**

For the thesis option Master of Science degree, the student must prepare a thesis proposal for approval by the advisory committee and the head of the major department or chair of the interdisciplinary faculty, if applicable. This proposal must be submitted to the Office of Graduate and Professional Studies at least 20 working days prior to the submission of the request for the final examination.

Compliance issues must be addressed if a graduate student is performing research involving human subjects, animals, infectious biohazards and recombinant DNA. A student involved in these types of research should check with the Office of Research Compliance and Biosafety at (979) 458-1467 to address questions about all research compliance responsibilities. Additional information can also be obtained on the Office of Research Compliance and Biosafety website.

**Final Examination/Thesis Defense**

A student must pass a final examination by dates announced each semester or summer term in the Office of Graduate and Professional Studies Calendar. To be eligible to take the final examination, a student’s GPR must be at least 3.000 for courses on the degree plan and for all courses completed at Texas A&M which are eligible to be applied to a
graduate degree, and there must be no unsolved grades of D, F or U for any course listed on the degree plan. To absolve a deficient grade, the student must repeat the course at Texas A&M University and achieve a grade of C or better. All coursework on the degree plan must have been completed with the exception of those hours for which the student is registered. For thesis-option students, an approved thesis proposal must be on file in the Office of Graduate and Professional Studies according to published deadlines prior to the final examination or submission of the request for exemption from the final examination.

A request to hold and announce the final examination must be submitted to the Office of Graduate and Professional Studies a minimum of 10 working days in advance of the scheduled date for the examination. The Office of Graduate and Professional Studies must be notified in writing of any cancellations. A student may be given only one opportunity to repeat the final examination for the master's degree and that must be within a time period that does not extend beyond the end of the next regular semester (summer terms are excluded).

For thesis option students, the final examination covers the thesis and all work taken on the degree plan and at the option of the committee may be written or oral or both. The final examination may not be administered before the thesis is available to all members of the student's advisory committee in substantially final form, and all members have had adequate time to review the document. The examination is conducted by the student's advisory committee as finally constituted. A thesis option student must be registered in the University in the semester or summer term in which the final examination is taken. Persons other than members of the graduate faculty may, with mutual consent of the candidate and the major professor, attend final examinations for advanced degrees. Upon completion of the questioning of the candidate, all visitors must excuse themselves from the proceedings. A positive vote by all members of the graduate committee with at most one dissension is required to pass a student on his or her exam. A department, or interdisciplinary degree program, may have a stricter requirement provided there is consistency within all degree programs within a department or interdisciplinary degree program.

The Report of the Final Examination Form must be submitted with original signatures of only the committee members approved by the Office of Graduate and Professional Studies. If an approved committee member substitution (1 only) has been made, his/her signature must also be submitted to the Office of Graduate and Professional Studies. If necessary, multiple copies of the form may be submitted with different committee member original signatures. If an approved committee member substitution (1 only) has been made, his/her signature must be included on the form submitted to the Office of Graduate and Professional Studies.

A thesis option candidate may petition to be exempt from his/her final examination provided his/her degree plan GPR is 3.500 or greater and he/she has the approval of the advisory committee, the head of the student's major department, or intercollegiate chair, if appropriate, and the Office of Graduate and Professional Studies. It is required that the petition for exemption be submitted the same semester the student intends to submit the thesis.

**Non-Thesis Option**

For non-thesis option students, a final comprehensive examination may be required.

The final exam cannot be held prior to the mid point of the semester if questions on the exam are based on courses in which the student is currently enrolled. If a student has completed all required degree plan coursework, the student is not required to be registered for classes in the semester the final examination is administered (unless he/she holds an assistantship). For specific final examination requirements, a student should check the program requirements for the degree which he/she is pursuing.

Exam results must be submitted with original signatures of only the committee members approved by the Office of Graduate and Professional Studies. If an approved committee member substitution (1 only) has been made, his/her signature must also be submitted to the Office of Graduate and Professional Studies.

A student pursuing the non-thesis option is not allowed to enroll in 691 (research) for any reason and 691 may not be used for credit toward a non-thesis option Master of Science degree. A maximum of 4 credit hours of 684 (Professional Internship), 8 credit hours of 685 (Directed Studies), and up to 3 credit hours of 690 (Theory of Research) or 695 (Frontiers in Research) may be used toward the non-thesis option Master of Science degree. In addition, any combination of 684, 685, 690 and 695 may not exceed 25 percent of the total credit hour requirement shown on the individual degree plan. All requirements for the non-thesis option Master of Science degree other than those specified above are the same as for the thesis option degree.

**Additional Requirements**

**Additional Requirements**

- Residence (p. 1125)
- Continuous Registration (p. 1125)
- Time Limit (p. 1126)
- Foreign Languages (p. 1126)
- Application for Degree (p. 1126)

**Residence**

In partial fulfillment of the residence requirement for the degree of Master of Science, the student must complete 9 resident credit hours during one regular semester or one 10-week summer semester in resident study at Texas A&M University. Upon recommendation of the student's advisory committee, department head or Chair of the Interdisciplinary Program, if appropriate, and with approval of the Office of Graduate and Professional Studies, a student may be granted exemption from this requirement. Such a petition, however, must be approved prior to the student's registration for the final 9 credit hours of required coursework.

Students who are employed full-time while completing their degree may fulfill total residence requirements by completion of less-than-full time course loads each semester. In order to be considered for this, the student is required to submit a Petition for Waivers and Exceptions along with verification of his/her employment to the Office of Graduate and Professional Studies.

See Residence Requirements (p. 22).

**Continuous Registration**

A student in the thesis option of the Master of Science program who has completed all coursework on his/her degree plan other than 5V98, 5V99, and 691 (research) is required to be in continuous registration until all requirements for the degree have been completed. See Continuous Registration Requirements (p. 28).
Time Limit

All degree requirements must be completed within a period of seven consecutive years for the degree to be granted. A course will be considered valid until seven years after the end of the semester in which it is taken. Graduate credit for coursework which is more than seven calendar years old at the time of the final examination (oral or written) may not be used to satisfy degree requirements.

A student who has chosen the thesis option must have the final corrected version of the thesis cleared by the Office of Graduate and Professional Studies no later than one year after the final examination, or approval of a petition for exemption from the final exam, or within the seven-year time limit, whichever occurs first. Failure to do so will result in the degree not being awarded.

Foreign Languages

No specific language requirement exists for the Master of Science degree.

Application for Degree

For information on applying for your degree, please visit the Graduation (p. 26) section.

Doctor of Philosophy in Sociology

Work leading to the degree of Doctor of Philosophy (PhD) is designed to give the candidate a thorough and comprehensive knowledge of his or her professional field and training in methods of research. The final basis for granting the degree shall be the candidate’s grasp of the subject matter of a broad field of study and a demonstrated ability to do independent research. In addition, the candidate must have acquired the ability to express thoughts clearly and forcefully in both oral and written languages. The degree is not granted solely for the completion of coursework, residence and technical requirements, although these must be met.

For a student who has completed a master’s degree, a DDS/DMD, DVM or MD at a U.S. institution, a minimum of 64 hours is required on the degree plan for the degree of Doctor of Philosophy. For a student who has completed a baccalaureate degree but not a master’s degree or a U.S. DDS/DMD, DVM or MD, a minimum of 96 hours is required on the degree plan for the degree of Doctor of Philosophy.

Steps to Fulfill Doctoral Degree Requirements

1. Meet with departmental/intercollegiate graduate advisor to plan course of study for first semester.
   - **When:** Before first semester registration.
   - **Approved by:** Graduate advisor.

2. Establish advisory committee. Submit a degree plan.
   - **When:** Prior to the deadline imposed by the student’s college or intercollegiate programs, and no later than 90 days prior to preliminary examination.
   - **Approved by:** Advisory committee, department head or intercollegiate faculty chair, and Office of Graduate and Professional Studies (OGAPS).

3. Complete coursework detailed on the approved degree plan.
   - **Before preliminary exam.**

4. Complete the preliminary examination.
   - **When:** See steps for completing the preliminary examination.
   - The student should complete the Preliminary Examination no later than the end of the semester following the completion of the formal coursework on the degree plan.
   - **Approved by:** Advisory committee, department head or chair of the intercollegiate faculty, and OGAPS.

5. Submit research proposal for dissertation or record of study and the research proposal approval form to the Office of Graduate and Professional Studies.
   - **When:** At least 20 working days prior to the submission of the Request for the Final Examination.
   - **Approved by:** Advisory committee, department head or intercollegiate faculty chair, Research Compliance and Biosafety, and OGAPS.

6. Complete residence requirement.
   - **When:** Before submitting request to schedule final examination.
   - **Approved by:** OGAPS

7. Apply for degree; pay graduation fee.
   - **When:** During the first week of the final semester; see OGAPS calendar for deadlines.
Program Requirements

Program Requirements

- Student’s Advisory Committee (p. 1127)
- Degree Plan (p. 1127)
- Transfer of Credit (p. 1128)
- Research Proposal (p. 1128)
- Examinations (p. 1128)
  - Preliminary Examination (p. 1128)
  - Preliminary Examination Format (p. 1129)
  - Preliminary Examination Scheduling (p. 1129)
  - Report of Preliminary Examination (p. 1129)

- Retake of Failed Preliminary Examination (p. 1129)
- Final Examination (p. 1129)
- Report of Final Examination (p. 1130)
- Dissertation (p. 1130)

Student's Advisory Committee

After receiving admission to graduate studies and enrolling, the student will consult with the head of his or her major or administrative department (or chair of the intercollegiate faculty) concerning appointment of the chair of the advisory committee. The student's advisory committee will consist of no fewer than four members of the graduate faculty representative of the student's several fields of study and research, where the chair or co-chair must be from the student’s department (or intercollegiate faculty, if applicable), and at least one or more of the members must have an appointment to a department other than the student’s major department. The outside member for a student in an interdisciplinary degree program must be from a department different from the chair of the student's committee.

The chair, in consultation with the student, will select the remainder of the advisory committee. Only graduate faculty members located on Texas A&M University campuses may serve as chair of a student's advisory committee. Other Texas A&M University graduate faculty members located off-campus may serve as a member or co-chair (but not chair), with a member as the chair.

If the chair of a student's advisory committee voluntarily leaves the University and the student is near completion of the degree and wants the chair to continue to serve in this role, the student is responsible for securing a current member of the University Graduate Faculty, from the student's academic program and located near the Texas A&M University campus site, to serve as the co-chair of the committee. The Department Head or Chair of Intercollegiate faculty may request in writing to the Associate Provost for Graduate and Professional Studies that a faculty member who is on an approved leave of absence or has voluntarily separated from the university, be allowed to continue to serve in the role of chair of a student's advisory committee without a co-chair for up to one year. The students should be near completion of the degree. Extensions beyond the one year period can be granted with additional approval of the Dean.

The committee members’ signatures on the degree plan indicate their willingness to accept the responsibility for guiding and directing the entire academic program of the student and for initiating all academic actions concerning the student. Although individual committee members may be replaced by petition for valid reasons, a committee cannot resign en masse. The chair of the committee, who usually has immediate supervision of the student’s research and dissertation or record of study, has the responsibility for calling all meetings of the committee. The duties of the committee include responsibility for the proposed degree plan, the research proposal, the preliminary examination, the dissertation or record of study and the final examination. In addition, the committee, as a group and as individual members, is responsible for counseling the student on academic matters, and, in the case of academic deficiency, initiating recommendations to the Office of Graduate and Professional Studies.

Degree Plan

The student’s advisory committee will evaluate the student’s previous education and degree objectives. The committee, in consultation with the student, will develop a proposed degree plan and outline a research
problem which, when completed, as indicated by the dissertation (or its equivalent for the degree of Doctor of Education or the degree of Doctor of Engineering), will constitute the basic requirements for the degree. The degree plan must be filed with the Office of Graduate and Professional Studies prior to the deadline imposed by the student’s college and no later than 90 days prior to the preliminary examination.

This proposed degree plan should be submitted through the online Document Processing Submission System located on the website http://ogdpss.tamu.edu. A minimum of 64 hours is required on the degree plan for the Doctor of Philosophy for a student who has completed a master’s degree. A student who has completed a DDS/DMD, DVM or a MD at a U.S. institution is also required to complete a minimum of 64 hours. A student who has completed a baccalaureate degree but not a master’s degree will be required to complete a 96-hour degree plan. Completion of a DDS/DMD, DVM or MD degree at a foreign institution requires completion of a minimum of 96 hours for the Doctor of Philosophy. A field of study may be primarily in one department or in a combination of departments. A degree plan must carry a reasonable amount of 691 (research).

Additional coursework may be added by petition to the approved degree plan by the student’s advisory committee if it is deemed necessary to correct deficiencies in the student’s academic preparation. No changes can be made to the degree plan once the student’s Request for Final Examination is approved by the Office of Graduate and Professional Studies.

Approval to enroll in any professional course (900-level) should be obtained from the head of the department (or Chair of the intercollegiate faculty, if applicable) in which the course will be offered before including such a course on a degree plan.

No credit may be obtained by correspondence study, by extension or for any course of fewer than three weeks duration.

Transfer of Credit

Courses for which transfer credits are sought must have been completed with a grade of B or greater and must be approved by the student’s advisory committee and the Office of Graduate and Professional Studies. These courses must not have been used previously for another degree. Except for officially approved cooperative doctoral programs, credit for thesis or dissertation research or the equivalent is not transferable. Credit for “internship” coursework in any form is not transferable. Courses taken in residence at an accredited U.S. institution or approved international institution with a final grade of B or greater will be considered for transfer credit if, at the time the courses were completed, the courses would be accepted for credit toward a similar degree for a student in degree-seeking status at the host institution. Credit for coursework taken by extension is not transferable. Coursework in which no formal grades are given or in which grades other than letter grades (A or B) are earned (for example, CR, P, S, U, H, etc.) is not accepted for transfer credit. Credit for coursework submitted for transfer from any college or university must be shown in semester credit hours, or equated to semester credit hours.

Courses used toward a degree at another institution may not be applied for graduate credit. If the course to be transferred was taken prior to the conferral of a degree at the transfer institution, a letter from the registrar at that institution stating that the course was not applied for credit toward the degree must be submitted to the Office of Graduate and Professional Studies.

Grades for courses completed at other institutions are not included in computing the GPR. An official transcript from the university at which transfer courses are taken must be sent directly to the Office of Admissions.

Research Proposal

The general field of research to be used for the dissertation should be agreed on by the student and the advisory committee at their first meeting, as a basis for selecting the proper courses to support the proposed research.

As soon thereafter as the research project can be outlined in reasonable detail, the dissertation research proposal should be completed. The research proposal should be approved at a meeting of the student’s advisory committee, at which time the feasibility of the proposed research and the adequacy of available facilities should be reviewed. The approved proposal, signed by all members of the student’s advisory committee, the head of the student’s major department (or chair of the intercollegiate faculty, if applicable), must be submitted to the Office of Graduate and Professional Studies at least 20 working days prior to the submission of the Request for the Final Examination.

Compliance issues must be addressed if a graduate student is performing research involving human subjects, animals, infectious biohazards and recombinant DNA. A student involved in these types of research should check with the Office of Research Compliance and Biosafety at (979) 458-1467 to address questions about all research compliance responsibilities. Additional information can also be obtained on the website http://rcb.tamu.edu.

Examinations

Preliminary Examination for Doctoral Students

The student’s major department (or chair of the interdisciplinary degree program faculty, if applicable) and his or her advisory committee may require qualifying, cumulative or other types of examinations at any time deemed desirable. These examinations are entirely at the discretion of the department and the student’s advisory committee.

The preliminary examination is required. The preliminary examination for a doctoral student shall be given no earlier than a date at which the student is within 6 credit hours of completion of the formal coursework on the degree plan (i.e., all coursework on the degree plan except 681, 684, 690, 691, 692, 693, 695, 697, 791, or other graduate courses specifically designated as S/U in the course catalog). The student should complete the Preliminary Examination no later than the end of the semester following the completion of the formal coursework on the degree plan.

Preliminary Examination Format

The objective of preliminary examination is to evaluate whether the student has demonstrated the following qualifications:

a. a mastery of the subject matter of all fields in the program;

b. an adequate knowledge of the literature in these fields and an ability to carry out bibliographical research;

c. an understanding of the research problem and the appropriate methodological approaches.

The format of the preliminary examination shall be determined by the student’s department (or interdisciplinary degree program, if applicable) and advisory committee, and communicated to the student in advance.
of the examination. The exam may consist of a written component, oral component, or combination of written and oral components.

The preliminary exam may be administered by the advisory committee or a departmental committee; herein referred to as the examination committee.

Regardless of exam format, a student will receive an overall preliminary exam result of pass or fail. The department (or interdisciplinary degree program, if applicable) will determine how the overall pass or fail result is determined based on the exam structure and internal department procedures. If the exam is administered by the advisory committee, each advisory committee member will provide a pass or fail evaluation decision.

Only one advisory committee substitution is allowed to provide an evaluation decision for a student’s preliminary exam, and it cannot be the committee chair.

If a student is required to take, as a part of the preliminary examination, a written component administered by a department or interdisciplinary degree program, the department or interdisciplinary degree program faculty must:

a. offer the examination at least once every six months. The departmental or interdisciplinary degree program examination should be announced at least 30 days prior to the scheduled examination date.

b. assume the responsibility for marking the examination satisfactory or unsatisfactory, or otherwise graded, and in the case of unsatisfactory, stating specifically the reasons for such a mark.

c. forward the marked examination to the chair of the student’s advisory committee within one week after the examination.

**Preliminary Examination Scheduling**

Prior to commencing any component of the preliminary examination, a departmental representative or the advisory committee chair will review the eligibility criteria with the student, using the Preliminary Examination Checklist to ensure the student is eligible for the preliminary examination. The following list of eligibility requirements applies:

- Student is registered at Texas A&M University for a minimum of one semester credit hour in the long semester or summer term during which any component of the preliminary examination is held. If the entire examination is held between semesters, then the student must be registered for the term immediately preceding the examination.

- An approved degree plan is on file with the Office of Graduate and Professional Studies prior to commencing the first component of the examination.

- Student’s cumulative GPR is at least 3.000.

- Student’s degree plan GPR is at least 3.000.

- All English language proficiency requirements are satisfied.

- At the end of the semester in which at least the first component of the exam is given, there are no more than 6 hours of coursework remaining on the degree plan (except 681, 684, 690, 691, 692, 693, 695, 697, 791, or other graduate courses specifically designated as S/U in the course catalog). The head of the student’s department (or Chair of the Interdisciplinary Degree Program, if applicable) has the authority to approve a waiver of this criterion.

**Report of Preliminary Examination**

Credit for the preliminary examination is not transferable in cases where a student changes degree programs after passing a preliminary exam.

If a written component precedes an oral component of the preliminary exam, the chair of the student’s examination committee is responsible for making all written examinations available to all members of the committee. A positive evaluation of the preliminary exam by all members of a student’s examination committee with at most one dissension is required to pass a student on his or her preliminary exam.

The student’s department will promptly report the results of the Preliminary Examination to the Office of Graduate and Professional Studies via the Report of Doctoral Preliminary Examination form. The Preliminary Examination checklist form must also be submitted. These forms should be submitted to the Office of Graduate and Professional Studies within 10 working days of completion of the preliminary examination.

The Report of the Preliminary Examination form must be submitted with original signatures of the approved examination committee members. If an approved examination committee member substitution (one only) has been made, that signature must also be included, in place of the committee member, on the form submitted to the Office of Graduate and Professional Studies. The original signature of the department head is also required on the form.

After passing the required preliminary examination for the doctoral degree, the student must complete the final examination for the degree within four calendar years. Otherwise, the student will be required to repeat the preliminary examination.

**Retake of Failed Preliminary Examination**

Upon approval of the student’s examination committee, with no more than one member dissenting, and approval of the Office of Graduate and Professional Studies, a student who has failed the preliminary examination may be given one re-examination. Adequate time must be given to permit the student to address the inadequacies emerging from the first preliminary examination. The examination committee must agree upon and communicate in writing to the student, an adequate time-frame from the first examination (normally six months) to retest, as well as a detailed explanation of the inadequacies emerging from the examination. The student and the committee should jointly negotiate a mutually acceptable date for this retest. When providing feedback on inadequacies, the committee should clearly document expected improvements that the student must be able to exhibit in order to retake the exam. The examination committee will document and communicate the time-frame and feedback within 10 working days of the exam that was not passed.

**Final Examination for Doctoral Students**

The candidate for the doctoral degree must pass a final examination by deadline dates announced in the “Office of Graduate and Professional Studies Calendar” each semester. The doctoral student is allowed only one opportunity to take the final examination.

No unabsolved grades of D, F, or U for any course can be listed on the degree plan. The student must be registered for any remaining hours of 681, 684, 690, 691, 692, 791 or other graduate courses specifically
designated as S/U in the course catalog during the semester of the final exam. No student may be given a final examination until they have been admitted to candidacy and their current official cumulative and degree plan GPAs are 3.00 or better.

To be admitted to candidacy for a doctoral degree, a student must have:

1. completed all formal coursework on the degree plan with the exception of any remaining 681, 684, 690 and 691, 692 (Professional Study), or 791 hours,
2. a 3.0 Graduate GPA and a Degree Plan GPA of at least 3.0 with no grade lower than C in any course on the degree plan,
3. passed the preliminary examination,
4. submitted an approved dissertation proposal,
5. met the residence requirements.

The request to hold and announce the final examination must be submitted to the Office of Graduate and Professional Studies a minimum of 10 working days before the scheduled date. Any changes to the degree plan must be approved by the Office of Graduate and Professional Studies prior to the submission of the request for final examination.

The student’s advisory committee will conduct this examination. The final examination is not to be administered until the dissertation or record of study is available in substantially final form to the student’s advisory committee, and all concerned have had adequate time to review the document. Whereas the final examination may cover the broad field of the candidate’s training, it is presumed that the major portion of the time will be devoted to the dissertation and closely allied topics. Persons other than members of the graduate faculty may, with mutual consent of the candidate and the chair of the advisory committee, be invited to attend a final examination for an advanced degree. A positive vote by all members of the graduate committee with at most one dissension is required to pass a student on his or her exam. A department can have a stricter requirement provided there is consistency within all degree programs within a department. Upon completion of the questioning of the candidate, all visitors must excuse themselves from the proceedings.

**Report of Final Examination**

The student’s department will promptly report the results of the Final Examination to the Office of Graduate and Professional Studies via the Report of Doctoral Final Examination form. These forms should be submitted to the Office of Graduate and Professional Studies within 10 working days of completion of the final examination. The Office of Graduate and Professional Studies must be notified in writing of any cancellations.

A positive evaluation of the final exam by all members of a student’s advisory committee with at most one dissension is required to pass a student on his or her final exam. The Report of the Final Examination Form must be submitted with original signatures of only the committee members approved by the Office of Graduate and Professional Studies. If necessary, multiple copies of the form may be submitted with different committee member original signatures. If an approved committee member substitution (1 only) has been made, his/her signature must be included on the form submitted to the Office of Graduate and Professional Studies.

**Dissertation**

The ability to perform independent research must be demonstrated by the dissertation, which must be the original work of the candidate. Whereas acceptance of the dissertation is based primarily on its scholarly merit, it must also exhibit creditable literary workmanship. The format of the dissertation must be acceptable to the Office of Graduate and Professional Studies. Guidelines for the preparation of the dissertation are available in the Thesis Manual, which is available online at http://ogaps.tamu.edu.

After successful defense and approval by the student’s advisory committee and the head of the student’s major department (or chair of the intercollegiate faculty, if applicable), a student must submit his/her dissertation in electronic format as a single PDF file. The PDF file must be uploaded to the website, http://ogaps.tamu.edu. Additionally, a signed paper approval form with original signatures must be received by the Office of Graduate and Professional Studies. Both the PDF file and the signed approval form are required by the deadline.

Deadline dates for submitting are announced each semester or summer term in the Office of Graduate and Professional Studies Calendar (see Time Limit statement). These dates also can be accessed via the website http://ogaps.tamu.edu.

Each student who submits a document for review is assessed a one-time thesis/dissertation processing fee through Student Business Services. This processing fee is for the thesis/dissertation services provided. After commencement, dissertations are digitally stored and made available through the Texas A&M Libraries.

A dissertation that is deemed unacceptable by the Office of Graduate and Professional Studies because of excessive corrections will be returned to the student’s department head or chair of the intercollegiate faculty. The manuscript must be resubmitted as a new document, and the entire review process must begin anew. All original submittal deadlines must be met during the resubmittal process in order to graduate.

**Additional Requirements**

**Additional Requirements**

- Residence (p. 1130)
- Time Limit (p. 1131)
- Continuous Registration (p. 1131)
- Admission to Candidacy (p. 1131)
- Languages (p. 1131)
- 99-Hour Cap on Doctoral Degree (p. 1131)
- Application for Degree (p. 1132)

**Residence**

A student who enters the doctoral degree program with a baccalaureate degree must spend one academic year plus one semester in resident study at Texas A&M University. A student who holds master's degree when he/she enters doctoral degree program must spend one academic year in resident study. One academic year may include two adjacent regular semesters or one regular semester and one adjacent 10-week summer semester. The third semester is not required to be adjacent to the one year. Enrollment for each semester must be a minimum of 9 credit hours each to satisfy the residence requirement.
To satisfy the residence requirement, the student must complete a minimum of 9 credit hours per semester or 10-week summer semester in resident study at Texas A&M University for the required period. A student who enters a doctoral degree program with a baccalaureate degree may fulfill residence requirements in excess of one academic year (18 credit hours) by registration during summer sessions or by completion of a less-than-full course load (in this context a full course load is considered 9 credit hours per semester).

Students who are employed full-time while completing their degree may fulfill total residence requirements by completion of less-than-full time course loads each semester. In order to be considered for this, the student is required to submit a Petition for Waivers and Exceptions along with verification of his/her employment to the Office of Graduate and Professional Studies. An employee should submit verification of his/her employment at the time he/she submits the degree plan. See Registration. (p. 28)

See Residence Requirements (p. 22).

**Time Limit**

All requirements for doctoral degrees must be completed within a period of ten consecutive calendar years for the degree to be granted. A course will be considered valid until 10 years after the end of the semester in which it is taken. Graduate credit for coursework more than ten calendar years old at the time of the final oral examination may not be used to satisfy degree requirements.

After passing the required preliminary oral and written examinations for a doctoral degree, the student must complete the final examination within four calendar years. Otherwise, the student will be required to repeat the preliminary examination.

A final corrected version of the dissertation or record of study in electronic format as a single PDF file must be cleared by the Office of Graduate and Professional Studies no later than one year after the final examination or within the 10-year time limit, whichever occurs first. Failure to do so will result in the degree not being awarded.

**Continuous Registration**

A student in a program leading to a Doctor of Philosophy who has completed all coursework on his/her degree plan other than 691, 5V98 or 5V99 (research) are required to be in continuous registration until all requirements for the degree have been completed. See Continuous Registration Requirements (p. 28).

**Admission to Candidacy**

To be admitted to candidacy for a doctoral degree, a student must have:

1. completed all formal coursework on the degree plan with the exception of any remaining 681, 684, 690 and 691, 5V98 and 5V99, or 791,
2. a 3.0 Graduate GPA and a Degree Plan GPA of at least 3.0 with no grade lower than C in any course on the degree plan,
3. passed the preliminary examination (written and oral portions),
4. submitted an approved dissertation proposal,
5. met the residence requirements. The final examination will not be authorized for any doctoral student who has not been admitted to candidacy.

**Languages**

A student is required to possess a competent command of English. For English language proficiency requirements, see the Admissions section of this catalog. The doctoral (PhD) foreign language requirement at Texas A&M University is a departmental option, to be administered and monitored by the individual departments of academic instruction.

**99-Hour Cap on Doctoral Degrees**

In Texas, public colleges and universities are funded by the state according to the number of students enrolled. In accordance with legislation passed by the Texas Legislature, the number of hours for which state universities may receive subvention funding at the doctoral rate for any individual is limited to 99 hours. Texas A&M University and other universities will not receive subvention for hours in excess of the limit.

Institutions of higher education are allowed to charge the equivalent of nonresident tuition to a resident doctoral student who has enrolled in 100 or more semester credit hours of doctoral coursework.

A doctoral student at Texas A&M has seven years to complete his/her degree before being charged out-of-state tuition. A doctoral student who, after seven years of study, has accumulated 100 or more doctoral hours will be charged tuition at a rate equivalent to out-of-state tuition. Please note that the tuition increases will apply to Texas residents as well as students from other states and countries who currently are charged tuition at the resident rate. This includes those doctoral students who hold GAT, GANT, and GAR appointments of 20 or more hours and recipients of competitive fellowships who receive more than $1,000 per semester. Doctoral students who, after seven years of study, have not accumulated 100 hours are eligible to pay in-state tuition if otherwise eligible.

For count purposes, a year is counted as three semesters, normally fall, spring and summer. Using this system, a student is allowed 21 semesters as a G8 student to complete the doctoral degree before being penalized with the higher tuition rate. Any semester in which a G8 student is enrolled for a doctoral level course is counted.

The following majors are exempt from the 99-Hour Cap on Doctoral Degrees:

- Biomedical Sciences
- Biochemistry
- Microbiology
- Genetics
- Toxicology
- Nutrition Sciences
- Community Clinical Psychology
- School Psychology
- Veterinary Pathology
- Clinical Psychology
- Counseling Psychology
- Medical Sciences
- Health Services Research
- Health Promotion and Community Health Sciences
- Epidemiology and Environmental Health
- Oral Biology

The hour limit for these majors is 130 doctoral hours.
There are currently two interdepartmental graduate programs residing in the college, Medical Science and Education for Healthcare Professionals (EDHP). The Medical Science program is available at our multiple campuses (Bryan/College Station, Temple, Houston, and Dallas) with distinct research strengths opportunities on each campus; while the Education for Healthcare Professionals program is delivered fully online. Our programs also have a flexible and interdisciplinary curriculum that allows our students to have a highly personalized and individually tailored training program. In addition to our own programs, our faculty also participate in several interdisciplinary graduate programs, including Genetics, Neuroscience, and Toxicology.

**Masters**

The purpose of the graduate program in Education for Healthcare Professionals (EDHP) is to provide the training necessary to produce effective leaders in health professions education. Accordingly, the program recruits health professionals who have, or are preparing for, educational leadership positions but who lack formal training in education and/or leadership. This program provides the opportunity for individuals to develop the background and skills necessary to be excellent teachers in their areas of specialty and conduct research to improve and develop innovative educational programs in health professions education. This interdisciplinary Master of Science degree is ideal for individuals who have an interest in an academic career.

For more information about the EDHP program, please visit the following website: http://medicine.tamhsc.edu/edhp.

The college also offers a Master of Science in Medical Science, though students are normally admitted into the Ph.D. program in Medical Science and admission for the M.S. degree requires special approval.

**Doctoral**

Our Medical Science program provides students with formal course work and experimental research leading to a Ph.D. degree. The program is organized into seven emphasis areas called Tracks. Each Track corresponds to an area of scientific research strength in the College where there are sufficient numbers of faculty to provide a robust training experience. Each Track has a specific curriculum that outlines appropriate coursework and activities which will provide the educational foundation for research in that general area. Students are expected to demonstrate professional level knowledge and research skills in their chosen area. The first year curriculum is meant to provide a broad-based foundation for students through course work in medical sciences and through research rotations leading to the selection of a faculty research advisor. Ultimately the student will conduct an independent research project that will constitute a significant contribution to the field in general, should be publishable in a peer-reviewed journal, and forms the basis for the student’s dissertation.

The College of Medicine also offers an MD/PhD Combined Degree Program and detailed information on this program can be found at http://medicine.tamhsc.edu/md-phd.

**Masters**

- Master of Science in Education for Health Care Professionals (p. 1139)
- Master of Science in Medical Sciences (p. 1143)
Doctoral
- Doctor of Philosophy in Medical Sciences (p. 1147)
- Combined Doctor of Medicine and Doctor of Philosophy (p. 1133)

Certificates
- Education for Health Care Professionals Certificate (p. 1154)

First Professional Doctoral
- Doctor of Medicine in Medicine (p. 1153)

Combined Doctor of Medicine and Doctor of Philosophy

The Combined Doctor of Medicine (MD) and Doctor of Philosophy (PhD)

The College of Medicine offers a combined training program leading to both MD and PhD degrees. The purpose of this program is to provide research training for highly motivated medical students planning careers in academic medicine.

To accomplish this, our program integrates the studies and requirements for both the MD and PhD degrees, providing students with many opportunities to relate their study of clinical medicine with basic biomedical science. Such training produces medical scientists with unique insights into human disease processes.

The MD/PhD program typically requires seven to nine years to complete the combined degree requirements. The program is flexible in many ways and is designed to meet the individual educational needs of the student. Students entering the program are enrolled in the summer semester eight weeks prior to medical school orientation. During this semester, students complete three credit hours of graduate research and, in consultation with the Program Director, a self-selected eight week rotation in a research lab. This rotation introduces students to the laboratories and potential research advisors.

Throughout training, all M.D./Ph.D. students are required to participate in MSCI 620/920 (The Scientific Basis of Medicine). This course, which grew out of the M.D./Ph.D. Journal Club, reviews recent papers in the medical literature and utilizes a group setting to further develop critical analysis skills as well as facilitate interaction and dialogue between peers and M.D./Ph.D. trained faculty. In addition, students are encouraged to attend at least one research seminar per week to assist in identifying a major discipline area for graduate training.

Lastly, this program is dedicated to developing outstanding physician-scientists who excel in their field and are competitive at the national level. The curriculum is designed to meet the individual educational needs of students while promoting excellence. To this end, M.D./Ph.D. students have two options for completing their training:

Option 1

Students follow the medical school curriculum and cover the basic medical sciences during their preclinical training period which extends through December of their second year. Next, students begin their Ph.D. training. During this period, students:

- Complete a second research rotation;
- Select a Ph.D. advisor;
- Finish required coursework, including electives in their specialized discipline area; and
- Finalize a meritorious research project and publish their work as well as write, and defend their dissertation.

After completing the Ph.D. requirements, students finish their clinical clerkships and the fourth year of medical school.

Option 2

Students complete medical school basic sciences courses and clinical clerkships prior to their Ph.D. training. After completing their clinical clerkships students complete a second research rotation and begin their formal Ph.D. training:

- Select a Ph.D. advisor;
- Complete coursework requirements including electives in their specialized discipline area; and
- Finalize a meritorious research project and publish their work as well as write and defend their dissertation.

Following their dissertation defense, students complete their fourth year of medical school. The Ph.D. and M.D. degrees are awarded after the requirements for both degrees have been fulfilled.

Steps to Fulfill Doctoral Degree Requirements

<table>
<thead>
<tr>
<th>Step</th>
<th>Action</th>
<th>When</th>
<th>Approved by</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>Meet with departmental/intercollegiate graduate advisor to plan course of study for first semester.</td>
<td>Before first semester registration.</td>
<td>Graduate advisor.</td>
</tr>
<tr>
<td>2</td>
<td>Establish advisory committee. Submit a degree plan.</td>
<td>Prior to the deadline imposed by the student’s college or intercollegiate programs, and no later than 90 days prior to preliminary examination.</td>
<td>Advisory committee, department head or intercollegiate faculty chair, and Office of Graduate and Professional Studies (OGAPS).</td>
</tr>
<tr>
<td>3</td>
<td>Complete course work detailed on the approved degree plan.</td>
<td>Before preliminary examination.</td>
<td></td>
</tr>
</tbody>
</table>
4. Complete the preliminary examination. **When:** See steps for completing the preliminary examination. The student should complete the Preliminary Examination no later than the end of the semester following the completion of the formal coursework on the degree plan. **Approved by:** Advisory committee, department head or chair of the intercollegiate faculty, and OGAPS.

5. Submit research proposal for dissertation or record of study and the research proposal approval form to the Office of Graduate and Professional Studies. **When:** No later than 20 working days prior to the submission of the Request for the Final Examination. **Approved by:** Advisory committee, department head or intercollegiate faculty chair, Research Compliance and Biosafety, and OGAPS.

6. Complete residence requirement. **When:** Before submitting request to schedule final examination. **Approved by:** OGAPS

7. Apply for degree; pay graduate fee. **When:** During the first week of the final semester; see OGAPS calendar for deadlines.

8. Submit request for permission to hold and announce final examination. **When:** Must be received by OGAPS at least 10 working days before requested exam date. See OGAPS calendar for deadlines. **Approved by:** Advisory committee, department head or intercollegiate faculty chair, and OGAPS.

9. Upload one approved final copy of the dissertation or record of study as a single pdf file to etd.tamu.edu and submit the fully signed dissertation/record of study approval form to the Office of Graduate and Professional Studies. **When:** See OGAPS calendar for deadlines. **Approved by:** Advisory committee, department head or intercollegiate faculty chair, and Office of Graduate and Professional Studies.

10. Graduate; arrange for cap and gown. **For more information, visit** [http://graduation.tamu.edu](http://graduation.tamu.edu)

**Note:** Once formal coursework is complete, you must be continuously registered until all degree requirements have been met. This includes submission and clearance of the dissertation or record of study. See Continuous Registration Requirements (p. 28).

More detailed information on the MD/PhD Combined Degree Program can be found at [http://medicine.tamhsc.edu/md-phd/index.html](http://medicine.tamhsc.edu/md-phd/index.html).

Research Proposal (p. 1135)

Examinations (p. 1135)

- Preliminary Examination (p. 1135)
- Final Examination/Dissertation Defense (p. 1137)

Dissertation (p. 1138)

**Student’s Advisory Committee**

After receiving admission to graduate studies and enrolling, the student will consult with the head of his or her major or administrative department (or chair of the intercollegiate faculty) concerning appointment of the chair of the advisory committee. The student’s advisory committee will consist of no fewer than four members of the graduate faculty representative of the student’s several fields of study and research, where the chair or co-chair must be from the student’s department (or intercollegiate faculty, if applicable), and at least one or more of the members must have an appointment to a department other than the student’s major department. The outside member for a student in an interdisciplinary degree program must be from a department different from the chair of the student’s committee.

The chair, in consultation with the student, will select the remainder of the advisory committee. Only graduate faculty members located on Texas A&M University campuses may serve as chair of a student’s advisory committee. Other Texas A&M University graduate faculty members located off-campus may serve as a member or co-chair (but not chair), with a member as the chair.

If the chair of a student’s advisory committee voluntarily leaves the University and the student wants the chair to continue to serve in this role, the student is responsible for securing a current member of the University Graduate Faculty, from her/his academic program and located on the respective Texas A&M University campus, to serve as the co-chair of the committee. If the committee chair is on an approved leave of absence, s/he can remain as chair without a co-chair for up to one year with written approval of the Department Head or chair of the intercollegiate faculty. Extensions beyond the one year period can be granted with additional approval of the Dean.

The committee members’ signatures on the degree plan indicate their willingness to accept the responsibility for guiding and directing the entire academic program of the student and for initiating all academic actions concerning the student. Although individual committee members may be replaced by petition for valid reasons, a committee cannot resign en masse. The chair of the committee, who usually has immediate
supervision of the student’s research and dissertation or record of study, has the responsibility for calling all meetings of the committee. The duties of the committee include responsibility for the proposed degree plan, the research proposal, the preliminary examination, the dissertation or record of study and the final examination. In addition, the committee, as a group and as individual members, is responsible for counseling the student on academic matters, and, in the case of academic deficiency, initiating recommendations to the Office of Graduate and Professional Studies.

**Degree Plan**

The student's advisory committee will evaluate the student's previous education and degree objectives. The committee, in consultation with the student, will develop a proposed degree plan and outline a research problem which, when completed, as indicated by the dissertation, will constitute the basic requirements for the degree. The degree plan must be filed with the Office of Graduate and Professional Studies prior to the deadline imposed by the student's college and no later than 90 days prior to the preliminary examination.

This proposed degree plan should be submitted through the online Document Processing Submission System located on the website https://ogsdpss.tamu.edu. A minimum of 64 hours is required on the degree plan for the Doctor of Philosophy for a student who has completed a master's degree. A student who has completed a DDS/ DMD, DVM or a MD at a U.S. institution is also required to complete a minimum of 64 hours. A student who has completed a baccalaureate degree but not a master's degree will be required to complete a 96-hour degree plan. Completion of a DDS/DMD, DVM or MD degree at a foreign institution requires completion of a minimum of 96 hours for the Doctor of Philosophy. A field of study may be primarily in one department or in a combination of departments. A degree plan must carry a reasonable amount of 691 (Research).

Additional coursework may be added by petition to the approved degree plan by the student’s advisory committee if it is deemed necessary to correct deficiencies in the student's academic preparation. No changes can be made to the degree plan once the student's Request for Final Examination or Request for Final Examination Exemption is approved by the Office of Graduate and Professional Studies.

Approval to enroll in any professional course (900-level) should be obtained from the head of the department (or Chair of the intercollegiate faculty, if applicable) in which the course will be offered before including such a course on a degree plan.

No credit may be obtained by correspondence study, by extension or for any course of fewer than three weeks duration.

**Transfer of Credit**

Courses for which transfer credits are sought must have been completed with a grade of B or greater and must be approved by the student’s advisory committee and the Office of Graduate and Professional Studies. These courses must not have been used previously for another degree. Except for officially approved cooperative doctoral programs, credit for thesis or dissertation research or the equivalent is not transferable. Credit for “internship” coursework in any form is not transferable. Courses taken in residence at an accredited U.S. institution or approved international institution with a final grade of B or greater will be considered for transfer credit if, at the time the courses were completed, the courses would be accepted for credit toward a similar degree for a student in degree-seeking status at the host institution. Credit for coursework taken by extension is not transferable. Coursework in which no formal grades are given or in which grades other than letter grades (A or B) are earned (for example, CR, P, S, U, H, etc.) is not accepted for transfer credit. Credit for coursework submitted for transfer from any college or university must be shown in semester credit hours, or equated to semester credit hours.

Courses used toward a degree at another institution may not be applied for graduate credit. If the course to be transferred was taken prior to the conferral of a degree at the transfer institution, a letter from the Registrar at that institution stating that the course was not applied for credit toward the degree must be submitted to the Office of Graduate and Professional Studies.

Grades for courses completed at other institutions are not included in computing the GPR. An official transcript from the university at which transfer courses are taken must be sent directly to the Office of Admissions.

**Research Proposal**

The general field of research to be used for the dissertation should be agreed on by the student and the advisory committee at their first meeting, as a basis for selecting the proper courses to support the proposed research.

As soon thereafter as the research project can be outlined in reasonable detail, the dissertation research proposal should be completed. The research proposal should be approved at a meeting of the student's advisory committee, at which time the feasibility of the proposed research and the adequacy of available facilities should be reviewed. The approved proposal, signed by all members of the student's advisory committee, the head of the student's major department (or chair of the intercollegiate faculty, if applicable), must be submitted to the Office of Graduate and Professional Studies at least 20 working days prior to the submission of the Request for the Final Examination.

Compliance issues must be addressed if a graduate student is performing research involving human subjects, animals, infectious biohazards and recombinant DNA. A student involved in these types of research should check with the Office of Research Compliance and Biosafety at (979) 458-1467 to address questions about all research compliance responsibilities. Additional information can also be obtained on the website http://rcb.tamu.edu.

**Examination**

**Preliminary Examination**

The student’s major department (or chair of the intercollegiate faculty, if applicable) and his or her advisory committee may require qualifying, cumulative or other types of examinations at any time deemed desirable. These examinations are entirely at the discretion of the department and the student’s advisory committee.

The preliminary examination is required. The preliminary examination for a doctoral student shall be given no earlier than a date at which the student is within 6 credit hours of completion of the formal coursework on the degree plan (i.e., all coursework on the degree plan except 681, 684, 690, 691 and 692 courses). The student is strongly encouraged to complete the Preliminary Examination no later than the end of the semester following the completion of the formal coursework on the degree plan. The Office of Graduate and Professional Studies must receive the results of the preliminary examination at least 14 weeks prior to the final examination date. The examination shall be oral and written unless otherwise recommended by the student’s advisory committee and the Office of Graduate and Professional Studies.
committee and approved by the Office of Graduate and Professional Studies. The written part of the examination will cover all fields of study included in the student's degree plan. Each member of the advisory committee is responsible for administering a written examination in his or her particular field, unless he or she chooses to waive participation in this part of the examination. Two or more members of the advisory committee may give a joint written examination. One or more members may require a student to take a departmental or intercollegiate faculty examination to supplement or replace a written examination. Each written examination must be completed and reported as satisfactory to the chair of the advisory committee before the oral portion of the examination may be held. In case any written examination is reported unsatisfactory, the entire advisory committee must agree

1. to proceed with the oral portion of the preliminary examination, or
2. to adopt another course of action regarding the unsatisfactory written examination.

Prior to scheduling the preliminary examination with the other committee members, the committee chair will review with the student eligibility criteria, using the Preliminary Examination Checklist to ensure the student is ready for the examination. The following list of eligibility requirements applies.

- Student is registered at Texas A&M University for the semester or summer term during which any portion of the preliminary examination may fall. If the entire examination falls between semesters, then the student must be registered for the term immediately preceding the examination.
- An approved degree plan was on file with the Office of Graduate and Professional Studies at least 90 days prior to the first written examination.
- Student’s cumulative GPR is at least 3.000.
- Student’s degree plan GPR is at least 3.000.
- All English language proficiency requirements have been satisfied.
- All committee members have scheduled or waived the written portion and agreed to attend the oral portion of the examination or have found a substitute. Only one substitution is allowed and it cannot be for the committee chair.
- At the end of the semester in which the exam is given, there are no more than 6 hours of coursework remaining on the degree plan (except 681, 684, 690, 691 and 692). The head of the student’s department (or Chair of the Intercollegiate Faculty, if applicable) has the authority to approve a waiver of this criterion.
- The time span from the first written examination to the oral is no more than three weeks. (In cases of department-wide written examinations, this criterion is not applicable.) The head of the student’s department (or chair of the intercollegiate faculty, if applicable) has the authority to approve a waiver of this criterion.

Once all requirements are met, departments or interdisciplinary degree programs may announce the schedule of the written and oral parts of the examination.

Credit for the preliminary examination is not transferable. If a departmental or intercollegiate faculty examination is used as part of the written portion of the preliminary examination, it must be the last examination offered prior to the date scheduled for the preliminary examination. In the schedule of the written portion, all members of the student’s advisory committee are to be included.

Through the preliminary examination, the student’s advisory committee should satisfy itself that the student has demonstrated the following qualifications:

1. a mastery of the subject matter of all fields in the program;
2. an adequate knowledge of the literature in these fields and an ability to carry out bibliographical research.

In case a student is required to take, as a part of the written portion of a preliminary examination, an examination administered by a department or intercollegiate faculty, the department or intercollegiate faculty must:

1. offer the examination at least once every six months. The departmental or interdisciplinary degree program examination should be announced at least 30 days prior to the scheduled examination date.
2. assume the responsibility for marking the examination satisfactory or unsatisfactory, or otherwise graded, and in the case of unsatisfactory, stating specifically the reasons for such a mark.
3. forward the marked examination to the chair of the student's advisory committee within one week after the examination.

The chair of the student’s advisory committee is responsible for making all written examinations available to the members of the advisory committee at or before the oral portion of the examination. A positive vote by all members of the graduate committee with at most one dissention is required to pass a student on his or her exam. A department or interdisciplinary degree program can have a stricter requirement provided there is consistency within all degree programs within a department or interdisciplinary program.

The chair of the advisory committee will promptly report the results of the Preliminary Examination to the Office of Graduate and Professional Studies, using the Report of Doctoral Preliminary Examination form and the Preliminary Examination checklist. Both forms must have the appropriate signatures. These forms should be submitted to the Office of Graduate and Professional Studies within 10 working days of the scheduled examination.

Exam results must be submitted with original signatures of only the committee members approved by the Office of Graduate and Professional Studies. If an approved committee member substitution (1 only) has been made, his/her signature must also be submitted to the Office of Graduate and Professional Studies. The original signature of the department head is also required for results for the preliminary examination.

After passing the required preliminary oral and written examinations for the doctoral degree, the student must complete the final examination for the degree within four calendar years. Otherwise, the student will be required to repeat the preliminary examination.

Upon approval of the student’s advisory committee, with no more than one member dissenting, and the approval by the Office of Graduate and Professional Studies, a student who has failed the preliminary examination may be given one re-examination, when adequate time has been given to permit the student to address the inadequacies emerging from the first examination (normally six months). The student and the advisory committee should jointly negotiate a mutually acceptable date for this purpose.

A student must be registered at Texas A&M University for a minimum of one semester credit hour in the semester or summer term in which they will take any portion of the Preliminary Examination.

### Final Examination/Dissertation Defense

The candidate for the doctoral degree must pass a final examination by deadline dates announced in the “Office of Graduate and Professional Studies Calendar” each semester or summer term. The doctoral student is allowed only one opportunity to take the final examination. No student may be given a final examination unless his or her current official cumulative and degree plan GPAs are 3.000 or better and he or she has been admitted to candidacy. No unabsolved grades of D, F, or U for any course can be listed on the degree plan. To absolve a deficient grade, a student must repeat the course and achieve a grade of C or better. A student must have completed all coursework on his or her degree plan with the exception of 691 (Research) or 692 (Professional Study) hours. The student must be registered for all remaining hours; no hours remain to be taken on the degree plan. The preliminary examination results must have been submitted to the Office of Graduate and Professional Studies 14 weeks prior to the date of the defense. The research proposal must have been submitted to the Office of Graduate and Professional Studies 25 working days prior to the date of the final examination/defense. Any changes to the degree plan must be approved by the Office of Graduate and Professional Studies prior to the approval of the final examination. The request to hold and announce the final examination must be submitted to the Office of Graduate and Professional Studies a minimum of 10 working days in advance of the scheduled date. Examinations/Defenses that are not completed and reported as satisfactory to the Office of Graduate and Professional Studies within 10 working days of the scheduled examination/defense date will be recorded as failures. The Office of Graduate and Professional Studies must be notified in writing of any cancellations.

The student's advisory committee will conduct this examination. The final examination is not to be administered until the dissertation or record of study is available in substantially final form to the student's advisory committee, and all concerned have had adequate time to review the document. Additionally, all English Language Proficiency requirements must be satisfied prior to scheduling the examination. Whereas the final examination may cover the broad field of the candidate's training, it is presumed that the major portion of the time will be devoted to the dissertation and closely allied topics. Persons other than members of the graduate faculty may, with mutual consent of the candidate and the major professor, be invited to attend a final examination for an advanced degree. A positive vote by all members of the graduate committee at most one dissension is required to pass a student on his or her exam. A department can have a stricter requirement provided there is consistency within all degree programs within a department. Upon completion of the questioning of the candidate, all visitors must excuse themselves from the proceedings.

The advisory committee will submit its recommendations on the appropriate Report of the Final Examination for Doctoral Candidates form to the Office of Graduate and Professional Studies regarding acceptability of the candidate for the doctoral degree. A student must be registered in the University in the semester or summer term in which the final examination is taken.
Exam results must be submitted with original signatures of only the committee members approved by the Office of Graduate and Professional Studies. If an approved committee member substitution (1 only) has been made, his/her signature must also be submitted to the Office of Graduate and Professional Studies.

**Dissertation**

MD/PhD students must submit their final corrected and committee approved dissertation to the Office of Graduate and Professional Studies no later than the published deadline during their last semester — after which both the MD and PhD degrees will be conferred.

**Additional Requirements**

- Residence (p. 1138)
- Time Limit (p. 1138)
- Continuous Registration (p. 1138)
- Admission to Candidacy (p. 1138)
- 99-Hour Cap on Doctoral Degrees (p. 1138)
- Languages (p. 1139)
- Application for Degree (p. 1139)

**Residence**

A student who enters the doctoral degree program with a baccalaureate degree must spend one academic year plus one semester in resident study at Texas A&M University. A student who holds master's degree when he/she enters doctoral degree program must spend one academic year in resident study. One academic year may include two adjacent regular semesters or one regular semester and one adjacent 10-week summer semester. The third semester is not required to be adjacent to the one year. Enrollment for each semester must be a minimum of 9 credit hours each to satisfy the residence requirement.

To satisfy the residence requirement, the student must complete a minimum of 9 credit hours per semester or 10-week summer semester in resident study at Texas A&M University for the required period. A student who enters a doctoral degree program with a baccalaureate degree may fulfill residence requirements in excess of one academic year (18 credit hours) by registration during summer sessions or by completion of a less-than-full course load (in this context a full course load is considered 9 credit hours per semester).

Students who are employed full-time while completing their degree may fulfill total residence requirements by completion of less-than-full time course loads each semester. In order to be considered for this, the student is required to submit a Petition for Waivers and Exceptions along with verification of his/her employment to the Office of Graduate and Professional Studies. An employee should submit verification of his/her employment at the time he/she submits the degree plan.

See Residence Requirements (p. 22).

**Time Limit**

Students in the combined PhD/MD program must clear their dissertation no later than 2 years after the final examination or within the 10 year time limit whichever occurs first.

**Continuous Registration**

A student in a program leading to a Doctor of Philosophy who has completed all coursework on his/her degree plan other than 691 (Research) are required to be in continuous registration until all requirements for the degree have been completed. See Continuous Registration Requirements (p. 28).

**Admission to Candidacy**

To be admitted to candidacy for a doctoral degree, a student must have:

- completed all formal coursework on the degree plan with the exception of any remaining 681, 684, 690 and 691,
- a 3.0 Graduate GPA and a Degree Plan GPA of at least 3.0 with no grade lower than C in any course on the degree plan,
- passed the preliminary examination (written and oral portions),
- submitted an approved dissertation proposal,
- met the residence requirements.

The final examination will not be authorized for any doctoral student who has not been admitted to candidacy.

**99-Hour Cap on Doctoral Degrees**

In Texas, public colleges and universities are funded by the state according to the number of students enrolled. In accordance with legislation passed by the Texas Legislature, the number of hours for which state universities may receive subvention funding at the doctoral rate for any individual is limited to 99 hours. Texas A&M University and other universities will not receive subvention for hours in excess of the limit.

Institutions of higher education are allowed to charge the equivalent of nonresident tuition to a resident doctoral student who has enrolled in 100 or more semester credit hours of doctoral coursework.

A doctoral student at Texas A&M has seven years to complete his/her degree before being charged out-of-state tuition. A doctoral student who, after seven years of study, has accumulated 100 or more doctoral hours will be charged tuition at a rate equivalent to out-of-state tuition.

Please note that the tuition increases will apply to Texas residents as well as students from other states and countries who currently are charged tuition at the resident rate. This includes those doctoral students who hold GAT, GANT, and GAR appointments of 20 or more hours and recipients of competitive fellowships who receive more than $1,000 per semester. Doctoral students who, after seven years of study, have not accumulated 100 hours are eligible to pay in-state tuition if otherwise eligible.

For count purposes, a year is counted as three semesters, normally fall, spring and summer. Using this system, a student is allowed 21 semesters as a G8 student to complete the doctoral degree before being penalized with the higher tuition rate. Any semester in which a G8 student is enrolled for a doctoral level course is counted.

The following majors are exempt from the 99-Hour Cap on Doctoral Degrees:

- Biomedical Sciences
- Biochemistry
- Microbiology
- Genetics
- Toxicology
- Nutrition Sciences
- Community Clinical Psychology
- Counseling Psychology
- School Psychology
• Veterinary Pathology
• Clinical Psychology
• Counseling Psychology
• Medical Sciences
• Health Services Research
• Health Promotion and Community Health Sciences
• Epidemiology and Environmental Health

The hour limit for these majors is 130 doctoral hours.

Languages
A student is required to possess a competent command of English. For English language proficiency requirements, see the Admissions section of this catalog. The doctoral (PhD) foreign language requirement at Texas A&M University is a departmental option, to be administered and monitored by the individual departments of academic instruction.

Application for Degree
The MD and PhD degree are conferred in the same semester.

For information on applying for your degree, please visit the Graduation (p. 26) section.

Master of Science in Education for Health Care Professionals

The Education for Healthcare Professionals (EDHP) program is designed for individuals to develop the background and skills necessary to be excellent teachers in their areas of specialty and conduct research to improve and develop innovative educational programs in health professions education. The interprofessional Master of Science degree will provide greater access to faculty and students, as well as clinicians and healthcare professionals, who have an interest in academia. Graduates of the program help satisfy the need for qualified teaching faculty in many health professions including nursing, medicine, pharmacy, dental and dental hygiene schools across the country.

The EDHP program has three curriculum options. Students can pursue a distance education 32 credit hour thesis, a distance education 36 credit hour non-thesis, and a distance education 14 credit hour certificate. For certificate information, please visit the Education for Healthcare Professionals - Certificate (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/medicine/interdepartmental/#certificatetestext) section.

The steps below are a general process to complete a masters. A more in depth and program specific guide for thesis and non-thesis students will be available to the students upon entrance into the Education for Healthcare Professionals (EDHP) program.

For more information about our program, please visit the following website; Medicine.tamhsc.edu/edhp (https://medicine.tamhsc.edu/edhp).

The Master of Science (MS) curriculum is designed to develop new understanding through research and creativity. Students have the option to pursue a thesis or non-thesis Master of Science degree.

Steps to Fulfill Master's Degree Requirements

1. Meet with departmental graduate advisor to plan course of study for first semester. 
   **When:** Before first semester registration.
   **Approved by:** Graduate advisor or chair of the intercollegiate faculty.

2. Establish advisory committee. Submit a degree plan.
   **When:** Prior to the deadline imposed by the student’s college and no later than 90 days prior to final oral or thesis defense.
   **Approved by:** Advisory committee, department head or chair of the intercollegiate faculty, and Office of Graduate and Professional Studies (OGAPS).

3. If thesis is required, submit thesis research proposal and research proposal approval form to the Office of Graduate and Professional Studies.
   **When:** At least 20 working days prior to the submission of the Request for the Final Examination.
   **Approved by:** Advisory committee, department head or chair of the intercollegiate faculty, Research Compliance and Biosafety, and OGAPS.

4. Apply for degree, pay graduation fee.
   **When:** During the first week of the final semester, see OGAPS calendar.

5. Check to be sure degree program and advisory committee are up-to-date, and coursework is complete.
   **When:** Well before submitting request to schedule final examination.

6. Complete residence requirement.
   **When:** If applicable, before or during final semester.
   **Approved by:** OGAPS.

7. Submit request to schedule final examination.
   **When:** Must be received by OGAPS at least 10 working days before exam date. See OGAPS calendar for deadlines.
   **Approved by:** Advisory committee, department head or chair of the intercollegiate faculty, and OGAPS.
8

Successfully complete final examination. When: The Report of the Final Examination Form should be submitted to OGAPS within 10 days following the exam. Approved by: Advisory committee and OGAPS.

9

If required, upload one approved final copy of thesis as a single PDF file to etd.tamu.edu and submit the fully signed thesis approval form to the Office of Graduate and Professional Studies. When: See OGAPS calendar for deadlines. Approved by: Advisory committee, department head or chair of the intercollegiate faculty and OGAPS.

10

Graduation; arrange for cap and gown. For more information, visit http://graduation.tamu.edu.

1 The online Document Processing Submission System is located on the website https://ogsdpss.tamu.edu.
2 Complete the application for degree form via the student’s Howdy portal.

Program Requirements

Although the Education for Healthcare Professional (EDHP) programs are only offered through distance education, it follows all policies and requirements posted by the University, but please be aware there are program specific guidelines detailed in the student handbook.

Program Requirements

- Student’s Advisory Committee (p. 1140)
- Degree Plan (p. 1140)
- Credit Requirements (p. 1141)
- Transfer of Credit (p. 1141)
- Limitations on the Use of Transfer, Extension and Certain Other Courses (p. 1141)
- Thesis Option (p. 1141)
  - Final Examination/Thesis Defense (p. 1142)
  - Non-Thesis Option (p. 1142)

Student’s Advisory Committee

After receiving admission to graduate studies and enrolling for coursework, the student will consult with the head of his or her major or administrative department (or intercollegiate faculty, if applicable) concerning appointment of the chair of his or her advisory committee. The student’s advisory committee for the MS degree will consist of no fewer than three members of the graduate faculty, representative of the student’s fields of study and research. The chair or the co-chair of the advisory committee must be from the student’s major department (or intercollegiate faculty, if applicable), and at least one or more of the members must have an appointment to a department other than the student’s major department. The outside member for students in an interdisciplinary program must have an appointment to a department different from the chair of the student’s committee.

The chair, in consultation with the student, will select the remainder of the advisory committee. The student will interview each prospective committee member to determine whether he or she is willing to serve. Only graduate faculty members located on Texas A&M University campuses may serve as chair of a student’s advisory committee. Other graduate faculty members located off campus may serve as a member or co-chair (but not chair) with a member as the chair. The chair of the committee, who usually has immediate supervision of the student’s research and thesis, has the responsibility for calling required meetings of the committee and for calling meetings at any other time considered desirable.

If the chair of a student’s advisory committee voluntarily leaves the University and the student is near completion of the degree and wants the chair to continue to serve in this role, the student is responsible for securing a current member of the University Graduate Faculty, from the student’s academic program and located near the Texas A&M University campus site, to serve as the co-chair of the committee. The Department Head or Chair of Intercollegiate faculty may request in writing to the Associate Provost for Graduate and Professional Studies that a faculty member who is on an approved leave of absence or has voluntarily separated from the university, be allowed to continue to serve in the role of chair of a student’s advisory committee without a co-chair for us to one year. The students should be near completion of the degree. Extensions beyond the one year period can be granted with additional approval of the Dean.

If the chair of the student’s advisory committee is unavailable for an extended time in any academic period during which the student is involved in activities relating to an internship, thesis or professional paper, and is registered for courses such as 684, 691, 692 or 693, the student may request, in writing, that the department head appoint an alternate advisory committee chair during the interim period.

The duties of the committee include responsibility for the proposed degree plan, the research proposal, the thesis and the final examination. In addition, the committee as a group and as individual members are responsible for advising the student on academic matters, and, in the case of academic deficiency, initiating recommendations to the Office of Graduate and Professional Studies.

The committee members’ approval on the degree plan indicate their willingness to accept the responsibility for guiding and directing the entire academic program of the student and for initiating all academic actions concerning the student. Although individual committee members may be replaced by petition for valid reasons, a committee cannot resign en masse.

Degree Plan

The student’s advisory committee, in consultation with the student, will develop the proposed degree plan. The degree plan must be completed and filed with the Office of Graduate and Professional Studies prior to the deadline imposed by the student’s college or interdisciplinary degree program, if applicable, and no later than 90 days prior to the date of the final oral examination or thesis defense.

A student should submit the degree plan using the online Document Processing Submission System (http://ogsdpss.tamu.edu).

A student submitting a proposed degree plan for a Master of Science degree should designate on the official degree plan the appropriate program option.
Additional coursework may be added to the approved degree plan by petition if it is deemed necessary by the advisory committee to correct deficiencies in the student's academic preparation. No changes can be made to the degree plan once the student's Request for Final Examination or Request for Final Examination Exemption is approved by the Office of Graduate and Professional Studies.

Credit Requirement
A minimum of 32 semester credit hours of approved courses and research is required for the thesis option and a minimum of 36 semester credit hours of approved coursework is required for the Non-Thesis (Project) option for the Master of Science degree.

Ordinarily the student will devote the major portion of his or her time to work in one or two closely related fields. Other work will be in supporting fields of interest.

Transfer of Credit
A student who has earned 12 hours of graduate credit in residence at Texas A&M University may be authorized to transfer courses in excess of the limits prescribed below upon the advice of the advisory committee and with the approval of the Office of Graduate and Professional Studies. Courses taken in residence at an accredited U.S. institution or approved international institution with a final grade of B or greater may be considered for transfer credit if, at the time the courses were completed, the courses would be accepted for credit toward a similar degree for a student in degree-seeking status at the host institution. Otherwise, the limitations stated in the following section apply. Coursework in which no formal grades are given or in which grades other than letter grades (A or B) are earned (for example, CR, P, S, U, H, etc.) is not accepted for transfer credit. Courses appearing on the degree plan with grades of D, F or U may not be absolved by transfer work. Credit for thesis research or the equivalent is not transferable. Credit for coursework submitted for transfer from any college or university must be shown in semester credit hours or equated to semester credit hours. An official transcript from the university at which the transfer coursework was taken must be sent directly to the Office of Admissions.

Courses used toward a degree at another institution may not be applied for graduate credit. If the course to be transferred was taken prior to the conferral of a degree at the transfer institution, a letter from the registrar at that institution stating that the course was not applied for credit toward the degree must be submitted to the Office of Graduate and Professional Studies.

Grades for courses completed at other institutions are not included in computing the GPR.

Limitations on the Use of Transfer, Extension and Certain Other Courses
Some departments may have more restrictive requirements for transfer work. If otherwise acceptable, certain courses may be used toward meeting credit-hour requirements for the master’s degree under the following limitations.

1. The maximum number of credit hours which may be considered for transfer credit is the greater of 12 hours or one-third (1/3) of the total hours of a degree plan. The following restrictions apply:
   • Graduate and/or upper-level undergraduate courses taken in residence at an accredited U.S. institution, or approved international institution with a final grade of B or greater will be considered for transfer credit if, at the time the courses were completed, the student was in degree-seeking status at Texas A&M University, or the student was in degree-seeking status at the institution at which the courses were taken; and if the courses would be accepted for credit toward a similar degree for a student in degree-seeking status at the host institution.
   • Courses previously used for another degree are not acceptable for degree plan credit.

2. The maximum number of credit hours taken in post-baccalaureate non-degree (G6) classification at Texas A&M University which may be considered for application to the degree plan is 12.

3. A zero credit 684 and 685 course is only allowed for non-thesis master’s students. Other courses, including 691 research hours, are not eligible for zero credit.

4. Not more than 12 hours may be used in any combination of the following categories:
   • Not more than 8 hours in the combination of 691 (research), 684 (Professional Internship) or may be used.
   • Not more than 8 hours of 685 (Directed Studies) may be used.
   • Not more than 3 hours of 690 (Theory of Research) may be used.
   • Not more than 3 hours of 695 (Frontiers in Research) may be used.

5. A maximum of 2 hours of Seminar (681).

6. A maximum of 9 hours of advanced undergraduate courses (300- or 400-level).

7. For graduate courses of three weeks’ duration or less, taken at other institutions, up to 1 hour of credit may be obtained for each five-day week of coursework. Each week of coursework must include at least 15 contact hours.

8. Continuing education courses may not be used for graduate credit.

9. Extension courses are not acceptable for credit.

Exceptions will be permitted only in unusual cases and when petitioned by the student’s advisory committee and approved by the Office of Graduate and Professional Studies.

Thesis Option
An acceptable thesis is required for the Master of Science degree for a student who selects the thesis option program. The finished work must reflect a comprehensive understanding of the pertinent literature and express in clear English, the problem(s) for study, the method, significance and results of the student’s original research. Guidelines for the preparation of the thesis are available in the Thesis Manual, which is available online at the Office of Graduate and Professional Studies website.

After successful defense (or exemption) and approval by the student’s advisory committee and the head of the student’s major department (or chair of the intercollegiate faculty, if appropriate), the student must submit his/her thesis in electronic format as a single PDF file. The PDF file must be uploaded to the Office of Graduate and Professional Studies website. Additionally, a signed paper approval form with original signatures must be received by the Office of Graduate and Professional Studies. The PDF file and the signed approval form are required by the deadline.

Deadline dates for submitting the thesis are announced each semester or summer term in the "Office of Graduate and Professional Studies..."
Calendar” (see Time Limit statement). These dates also can be accessed via the Office of Graduate and Professional Studies website.

Each student who submits a document for review is assessed a one-time thesis/dissertation processing fee through Student Business Services. This processing fee is for the thesis/dissertation services provided. After commencement, theses and dissertations are digitally stored and made available through the Texas A&M Libraries.

A thesis that is deemed unacceptable by the Office of Graduate and Professional Studies because of excessive corrections will be returned to the student’s department head (or chair of the intercollegiate faculty, if applicable). The manuscript must be resubmitted as a new document, and the entire review process must begin again. All original submittal deadlines must be met during the resubmittal process to graduate that semester.

**Thesis Proposal**

For the thesis option Master of Science degree, the student must prepare a thesis proposal for approval by the advisory committee and the head of the major department or chair of the interdisciplinary faculty, if applicable. This proposal must be submitted to the Office of Graduate and Professional Studies at least 20 working days prior to the submission of the request for the final examination.

Compliance issues must be addressed if a graduate student is performing research involving human subjects, animals, infectious bio-hazards and recombinant DNA. A student involved in these types of research should check with the Office of Research Compliance and Biosafety at (979) 458-1467 to address questions about all research compliance responsibilities. Additional information can also be obtained on the Office of Research Compliance and Biosafety website.

**Final Examination/Thesis Defense**

A student must pass a final examination by dates announced each semester or summer term in the Office of Graduate and Professional Studies Calendar. To be eligible to take the final examination, a student’s GPR must be at least 3.000 for courses on the degree plan and for all courses completed at Texas A&M which are eligible to be applied to a graduate degree, and there must be no unabsolled grades of D, F or U for any course listed on the degree plan. To absolve a deficient grade, the student must repeat the course at Texas A&M University and achieve a grade of C or better. All coursework on the degree plan must have been completed with the exception of those hours for which the student is registered. For thesis-option students, an approved thesis proposal must be on file in the Office of Graduate and Professional Studies according to published deadlines prior to the final examination or submission of the request for exemption from the final examination.

A request to hold and announce the final examination must be submitted to the Office of Graduate and Professional Studies a minimum of 10 working days in advance of the scheduled date for the examination. The Office of Graduate and Professional Studies must be notified in writing of any cancellations. A student may be given only one opportunity to repeat the final examination for the master’s degree and that must be within a time period that does not extend beyond the end of the next regular semester (summer terms are excluded).

For thesis option students, the final examination covers the thesis and all work taken on the degree plan and at the option of the committee may be written or oral or both. The final examination may not be administered before the thesis is available to all members of the student’s advisory committee in substantially final form, and all members have had adequate time to review the document. The examination is conducted by the student’s advisory committee as finally constituted. A thesis option student must be registered in the University in the semester or summer term in which the final examination is taken. Persons other than members of the graduate faculty may, with mutual consent of the candidate and the major professor, attend final examinations for advanced degrees. Upon completion of the questioning of the candidate, all visitors must excuse themselves from the proceedings. A positive vote by all members of the graduate committee with at most one dissension provided there is consistency within all degree programs within a department or interdisciplinary degree program.

The Report of the Final Examination Form must be submitted with original signatures of only the committee members approved by the Office of Graduate and Professional Studies. If an approved committee member substitution (1 only) has been made, his/her signature must also be submitted to the Office of Graduate and Professional Studies. If necessary, multiple copies of the form may be submitted with different committee member original signatures. If an approved committee member substitution (1 only) has been made, his/her signature must be included on the form submitted to the Office of Graduate and Professional Studies. A thesis option candidate may petition to be exempt from his/her final examination provided his/her degree plan GPR is 3.500 or greater and he/she has the approval of the advisory committee, the head of the student’s major department, or intercollegiate chair, if appropriate, and the Office of Graduate and Professional Studies. It is required that the petition for exemption be submitted the same semester the student intends to submit the thesis.

**Non-Thesis Option**

The Final Examination is not required for the Master of Science in Education for Health Care Professionals.

A student pursuing the non-thesis option is not allowed to enroll in 691 (research) for any reason and 691 may not be used for credit toward a non-thesis option Master of Science degree. A maximum of 4 credit hours of 684 (Professional Internship), 8 credit hours of 685 (Directed Studies), and up to 3 credit hours of 690 (Theory of Research) or 695 (Frontiers in Research) may be used toward the non-thesis option Master of Science degree. In addition, any combination of 684, 685, 690 and 695 may not exceed 25 percent of the total credit hour requirement shown on the individual degree plan. All requirements for the non-thesis option Master of Science degree other than those specified above are the same as for the thesis option degree.

**Additional Requirements**

Although the Education for Healthcare Professional (EDHP) programs are only offered through distance education, it follows all policies and requirements posted by the University, but please be aware there are program specific guidelines detailed in the student handbook.

**Additional Requirements**

Residence (p. 1143)
Continuous Registration (p. 1143)
Time Limit (p. 1143)
Foreign Languages (p. 1143)
Residence
There is no residence requirement for the Master of Science in Education for Health Care Professionals.

Continuous Registration
A student in the thesis option of the Master of Science program who has completed all coursework on his/her degree plan other than 5V98, 5V99, and 691 (research) is required to be in continuous registration until all requirements for the degree have been completed. See Continuous Registration Requirements (p. 28).

Time Limit
All degree requirements must be completed within a period of seven consecutive years for the degree to be granted. A course will be considered valid until seven years after the end of the semester in which it is taken. Graduate credit for coursework which is more than seven calendar years old at the time of the final examination (oral or written) may not be used to satisfy degree requirements.

A student who has chosen the thesis option must have the final corrected version of the thesis cleared by the Office of Graduate and Professional Studies no later than one year after the final examination, or approval of a petition for exemption from the final exam, or within the seven-year time limit, whichever occurs first. Failure to do so will result in the degree not being awarded.

Foreign Languages
No specific language requirement exists for the Master of Science degree.

Application for Degree
For information on applying for your degree, please visit the Graduation (p. 26) section.

Master of Science in Medical Sciences
The Master of Science (MS) curriculum is designed to develop new understanding through research and creativity. Students have the option to pursue a thesis or non-thesis Master of Science degree.

Steps to Fulfill Master’s Degree Requirements
1. Meet with departmental graduate advisor to plan course of study for first semester. **When:** Before first semester registration. **Approved by:** Graduate advisor or chair of the intercollegiate faculty.
2. Establish advisory committee. Submit a degree plan. **When:** Prior to the deadline imposed by the student’s college and no later than 90 days prior to final oral or thesis defense. **Approved by:** Advisory committee, department head or chair of the intercollegiate faculty, and Office of Graduate and Professional Studies (OGAPS).
3. If thesis is required, submit thesis research proposal and research proposal approval form to the Office of Graduate and Professional Studies. **When:** At least 20 working days prior to the submission of the Request for the Final Examination. **Approved by:** Advisory committee, department head or chair of the intercollegiate faculty, Research Compliance and Biosafety, and OGAPS.
4. Apply for degree²; pay graduation fee. **When:** During the first week of the final semester, see OGAPS calendar.
5. Check to be sure degree program and advisory committee are up-to-date, and coursework is complete. **When:** Well before submitting request to schedule final examination.
6. Complete residence requirement. **When:** If applicable, before or during final semester. **Approved by:** OGAPS.
7. Submit request to schedule final examination. **When:** Must be received by OGAPS at least 10 working days before exam date. See OGAPS calendar for deadlines. **Approved by:** Advisory committee, department head or chair of the intercollegiate faculty, and OGAPS.
8. Successfully complete final examination. **When:** The Report of the Final Examination Form should be submitted to OGAPS within 10 days following the exam. **Approved by:** Advisory committee and OGAPS.
Program Requirements

Student’s Advisory Committee

After receiving admission to graduate studies and enrolling for coursework, the student will consult with the head of his or her major or administrative department (or intercollegiate faculty, if applicable) concerning appointment of the chair of his or her advisory committee. The student’s advisory committee for the MS degree will consist of no fewer than three members of the graduate faculty, representative of the student’s fields of study and research. The chair or the co-chair of the advisory committee must be from the student’s major department (or intercollegiate faculty, if applicable), and at least one or more of the members must have an appointment to a department other than the student’s major department. The outside member for students in an interdisciplinary program must have an appointment to a department different from the chair of the student’s committee.

The chair, in consultation with the student, will select the remainder of the advisory committee. The student will interview each prospective committee member to determine whether he or she is willing to serve. Only graduate faculty members located on Texas A&M University campuses may serve as chair of a student’s advisory committee. Other graduate faculty members located off campus may serve as a member or co-chair (but not chair) with a member as the chair. The chair of the committee, who usually has immediate supervision of the student’s research and thesis, has the responsibility for calling required meetings of the committee and for calling meetings at any other time considered desirable.

If the chair of a student’s advisory committee voluntarily leaves the University and the student is near completion of the degree and wants the chair to continue to serve in this role, the student is responsible for securing a current member of the University Graduate Faculty, from the student’s academic program and located near the Texas A&M University campus site, to serve as the co-chair of the committee. The Department Head or Chair of Intercollegiate faculty may request in writing to the Associate Provost for Graduate and Professional Studies that a faculty member who is on an approved leave of absence or has voluntarily separated from the university be allowed to continue to serve in the role of chair of a student’s advisory committee without a co-chair for us to one year. The students should be near completion of the degree. Extensions beyond the one year period can be granted with additional approval of the Dean.

If the chair of the student’s advisory committee is unavailable for an extended time in any academic period during which the student is involved in activities relating to an internship, thesis or professional paper, and is registered for courses such as 684, 691, 692 or 693, the student may request, in writing, that the department head appoint an alternate advisory committee chair during the interim period.

The duties of the committee include responsibility for the proposed degree plan, the research proposal, the thesis and the final examination. In addition, the committee as a group and as individual members are responsible for advising the student on academic matters, and, in the case of academic deficiency, initiating recommendations to the Office of Graduate and Professional Studies.

The committee members’ approval on the degree plan indicate their willingness to accept the responsibility for guiding and directing the entire academic program of the student and for initiating all academic actions concerning the student. Although individual committee members may be replaced by petition for valid reasons, a committee cannot resign en masse.

Degree Plan

The student’s advisory committee, in consultation with the student, will develop the proposed degree plan. The degree plan must be completed and filed with the Office of Graduate and Professional Studies prior to the deadline imposed by the student’s college or interdisciplinary degree program, if applicable, and no later than 90 days prior to the date of the final oral examination or thesis defense.

A student should submit the degree plan using the online Document Processing Submission System (http://ogsdpss.tamu.edu).

A student submitting a proposed degree plan for a Master of Science degree should designate on the official degree plan the appropriate program option.

Additional coursework may be added to the approved degree plan by petition if it is deemed necessary by the advisory committee to correct deficiencies in the student’s academic preparation. No changes can be made to the degree plan once the student’s Request for Final Examination or Request for Final Examination Exemption is approved by the Office of Graduate and Professional Studies.

Credit Requirement

A minimum of 32 semester credit hours of approved courses and research is required for the thesis option Master of Science degree.
A minimum of 36 semester credit hours of approved coursework is required for the Non-Thesis Option.

Ordinarily the student will devote the major portion of his or her time to work in one or two closely related fields. Other work will be in supporting fields of interest.

Transfer of Credit

A student who has earned 12 hours of graduate credit in residence at Texas A&M University may be authorized to transfer courses in excess of the limits prescribed below upon the advice of the advisory committee and with the approval of the Office of Graduate and Professional Studies. Courses taken in residence at an accredited U.S. institution or approved international institution with a final grade of B or greater may be considered for transfer credit if, at the time the courses were completed, the courses would be accepted for credit toward a similar degree for a student in degree-seeking status at the host institution. Otherwise, the limitations stated in the following section apply. Coursework in which no formal grades are given or in which grades other than letter grades (A or B) are earned (for example, CR, P, S, U, H, etc.) is not accepted for transfer credit. Courses appearing on the degree plan with grades of D, F or U may not be absolved by transfer work. Credit for thesis research or the equivalent is not transferable. Credit for coursework submitted for transfer from any college or university must be shown in semester credit hours or equated to semester credit hours. An official transcript from the university at which the transfer coursework was taken must be sent directly to the Office of Admissions.

Courses used toward a degree at another institution may not be applied for graduate credit. If the course to be transferred was taken prior to the conferral of a degree at the transfer institution, a letter from the registrar at that institution stating that the course was not applied for credit toward the degree must be submitted to the Office of Graduate and Professional Studies.

Grades for courses completed at other institutions are not included in computing the GPR.

Limitations on the Use of Transfer, Extension and Certain Other Courses

Some departments may have more restrictive requirements for transfer work. If otherwise acceptable, certain courses may be used toward meeting credit-hour requirements for the master’s degree under the following limitations.

1. The maximum number of credit hours which may be considered for transfer credit is the greater of 12 hours or one-third (1/3) of the total hours of a degree plan. The following restrictions apply:
   • Graduate and/or upper-level undergraduate courses taken in residence at an accredited U.S. institution, or approved international institution with a final grade of B or greater will be considered for transfer credit if, at the time the courses were completed, the student was in degree-seeking status at Texas A&M University, or the student was in degree-seeking status at the institution at which the courses were taken; and if the courses would be accepted for credit toward a similar degree for a student in degree-seeking status at the host institution.
   • Courses previously used for another degree are not acceptable for degree plan credit.

2. The maximum number of credit hours taken in post-baccalaureate non-degree (G6) classification at Texas A&M University which may be considered for application to the degree plan is 12.

3. A zero credit 684 and 685 course is only allowed for non-thesis master’s students. Other courses, including 691 research hours, are not eligible for zero credit.

4. Not more than 12 hours may be used in any combination of the following categories:
   • Not more than 8 hours in the combination of 691 (research), 684 (Professional Internship) or may be used.
   • Not more than 8 hours of 685 (Directed Studies) may be used.
   • Not more than 3 hours of 690 (Theory of Research) may be used.
   • Not more than 3 hours of 695 (Frontiers in Research) may be used.

5. A maximum of 2 hours of Seminar (681).

6. A maximum of 9 hours of advanced undergraduate courses (300- or 400-level).

7. For graduate courses of three weeks’ duration or less, taken at other institutions, up to 1 hour of credit may be obtained for each five-day week of coursework. Each week of coursework must include at least 15 contact hours.

8. Continuing education courses may not be used for graduate credit.

9. Extension courses are not acceptable for credit.

Exceptions will be permitted only in unusual cases and when petitioned by the student’s advisory committee and approved by the Office of Graduate and Professional Studies.

Thesis Option

An acceptable thesis is required for the Master of Science degree for a student who selects the thesis option program. The finished work must reflect a comprehensive understanding of the pertinent literature and express in clear English, the problem(s) for study, the method, significance and results of the student’s original research. Guidelines for the preparation of the thesis are available in the Thesis Manual, which is available online at the Office of Graduate and Professional Studies website.

After successful defense (or exemption) and approval by the student’s advisory committee and the head of the student’s major department (or chair of the intercollegiate faculty, if appropriate), the student must submit his/her thesis in electronic format as a single PDF file. The PDF file must be uploaded to the Office of Graduate and Professional Studies website. Additionally, a signed paper approval form with original signatures must be received by the Office of Graduate and Professional Studies. The PDF file and the signed approval form are required by the deadline.

Deadline dates for submitting the thesis are announced each semester or summer term in the “Office of Graduate and Professional Studies Calendar” (see Time Limit statement). These dates also can be accessed via the Office of Graduate and Professional Studies website.

Each student who submits a document for review is assessed a one-time thesis/dissertation processing fee through Student Business Services. This processing fee is for the thesis/dissertation services provided. After commencement, theses and dissertations are digitally stored and made available through the Texas A&M Libraries.

A thesis that is deemed unacceptable by the Office of Graduate and Professional Studies because of excessive corrections will be returned
to the student's department head (or chair of the intercollegiate faculty, if applicable). The manuscript must be resubmitted as a new document, and the entire review process must begin again. All original submittal deadlines must be met during the resubmittal process to graduate that semester.

**Thesis Proposal**

For the thesis option Master of Science degree, the student must prepare a thesis proposal for approval by the advisory committee and the head of the major department or chair of the intercollegiate faculty, if applicable. This proposal must be submitted to the Office of Graduate and Professional Studies at least 20 working days prior to the submission of the request for the final examination.

Compliance issues must be addressed if a graduate student is performing research involving human subjects, animals, infectious biohazards and recombinant DNA. A student involved in these types of research should check with the Office of Research Compliance and Biosafety at (979) 458-1467 to address questions about all research compliance responsibilities. Additional information can also be obtained on the Office of Research Compliance and Biosafety website.

**Final Examination/Thesis Defense**

A student must pass a final examination by dates announced each semester or summer term in the Office of Graduate and Professional Studies Calendar. To be eligible to take the final examination, a student's GPR must be at least 3.00 for courses on the degree plan and for all courses completed at Texas A&M which are eligible to be applied to a graduate degree, and there must be no unabsoled grades of D, F or U for any course listed on the degree plan. To absolve a deficient grade, the student must repeat the course at Texas A&M University and achieve a grade of C or better. All coursework on the degree plan must have been completed with the exception of those hours for which the student is registered. For thesis-option students, an approved thesis proposal must be on file in the Office of Graduate and Professional Studies according to published deadlines prior to the final examination or submission of the request for exemption from the final examination.

A request to hold and announce the final examination must be submitted to the Office of Graduate and Professional Studies a minimum of 10 working days in advance of the scheduled date for the examination. The Office of Graduate and Professional Studies must be notified in writing of any cancellations. A student may be given only one opportunity to repeat the final examination for the master's degree and that must be within a time period that does not extend beyond the end of the next regular semester (summer terms are excluded).

For thesis option students, the final examination covers the thesis and all work taken on the degree plan and at the option of the committee may be written or oral or both. The final examination may not be administered before the thesis is available to all members of the student's advisory committee in substantially final form, and all members have had adequate time to review the document. The examination is conducted by the student's advisory committee as finally constituted. A thesis option student must be registered in the University in the semester or summer term in which the final examination is taken. Persons other than members of the graduate faculty may, with mutual consent of the candidate and the major professor, attend final examinations for advanced degrees. Upon completion of the questioning of the candidate, all visitors must excuse themselves from the proceedings. A positive vote by all members of the graduate committee with at most one dissension is required to pass a student on his or her exam. A department, or interdisciplinary degree program, may have a stricter requirement provided there is consistency within all degree programs within a department or interdisciplinary degree program.

The Report of the Final Examination Form must be submitted with original signatures of only the committee members approved by the Office of Graduate and Professional Studies. If an approved committee member substitution (1 only) has been made, his/her signature must also be submitted to the Office of Graduate and Professional Studies. If necessary, multiple copies of the form may be submitted with different committee member original signatures. If an approved committee member substitution (1 only) has been made, his/her signature must be included on the form submitted to the Office of Graduate and Professional Studies.

A thesis option candidate may petition to be exempt from his/her final examination provided his/her degree plan GPR is 3.500 or greater and he/she has the approval of the advisory committee, the head of the student's major department, or intercollegiate chair, if appropriate, and the Office of Graduate and Professional Studies. It is required that the petition for exemption be submitted the same semester the student intends to submit the thesis.

**Non-Thesis Option**

For non-thesis option students, a final comprehensive examination may be required.

The final exam cannot be held prior to the mid point of the semester if questions on the exam are based on courses in which the student is currently enrolled. If a student has completed all required degree plan coursework, the student is not required to be registered for classes in the semester the final examination is administered (unless he/she holds an assistantship). For specific final examination requirements, a student should check the program requirements for the degree which he/she is pursuing.

Exam results must be submitted with original signatures of only the committee members approved by the Office of Graduate and Professional Studies. If an approved committee member substitution (1 only) has been made, his/her signature must also be submitted to the Office of Graduate and Professional Studies.

A student pursuing the non-thesis option is not allowed to enroll in 691 (research) for any reason and 691 may not be used for credit toward a non-thesis option Master of Science degree. A maximum of 4 credit hours of 684 (Professional Internship), 8 credit hours of 685 (Directed Studies), and up to 3 credit hours of 690 (Theory of Research) or 695 (Frontiers in Research) may be used toward the non-thesis option Master of Science degree. In addition, any combination of 684, 685, 690 and 695 may not exceed 25 percent of the total credit hour requirement shown on the individual degree plan. All requirements for the non-thesis option Master of Science degree other than those specified above are the same as for the thesis option degree.

**Additional Requirements**

**Additional Requirements**

- Residence (p. 1147)
- Continuous Registration (p. 1147)
- Time Limit (p. 1147)
Residence
In partial fulfillment of the residence requirement for the degree of Master of Science, the student must complete 9 resident credit hours during one regular semester or one 10-week summer semester in resident study at Texas A&M University. Upon recommendation of the student’s advisory committee, department head or Chair of the Interdisciplinary Program, if appropriate, and with approval of the Office of Graduate and Professional Studies, a student may be granted exemption from this requirement. Such a petition, however, must be approved prior to the student’s registration for the final 9 credit hours of required coursework.

Students who are employed full-time while completing their degree may fulfill total residence requirements by completion of less-than-full time course loads each semester. In order to be considered for this, the student is required to submit a Petition for Waivers and Exceptions along with verification of his/her employment to the Office of Graduate and Professional Studies.

See Residence Requirements (p. 22).

Continuous Registration
A student in the thesis option of the Master of Science program who has completed all coursework on his/her degree plan other than 5V98, 5V99, and 691 (research) is required to be in continuous registration until all requirements for the degree have been completed. See Continuous Registration Requirements (p. 28).

Time Limit
All degree requirements must be completed within a period of seven consecutive years for the degree to be granted. A course will be considered valid until seven years after the end of the semester in which it is taken. Graduate credit for coursework which is more than seven calendar years old at the time of the final examination (oral or written) may not be used to satisfy degree requirements.

A student who has chosen the thesis option must have the final corrected version of the thesis cleared by the Office of Graduate and Professional Studies no later than one year after the final examination, or approval of a petition for exemption from the final exam, or within the seven-year time limit, whichever occurs first. Failure to do so will result in the degree not being awarded.

Foreign Languages
No specific language requirement exists for the Master of Science degree.

Application for Degree
For information on applying for your degree, please visit the Graduation (p. 26) section.

Doctor of Philosophy in Medical Sciences
Work leading to the degree of Doctor of Philosophy (PhD) is designed to give the candidate a thorough and comprehensive knowledge of his or her professional field and training in methods of research. The final basis for granting the degree shall be the candidate’s grasp of the subject matter of a broad field of study and a demonstrated ability to do independent research. In addition, the candidate must have acquired the ability to express thoughts clearly and forcefully in both oral and written languages. The degree is not granted solely for the completion of coursework, residence and technical requirements, although these must be met.

For a student who has completed a master’s degree, a DDS/DMD, DVM or MD at a U.S. institution, a minimum of 64 hours is required on the degree plan for the degree of Doctor of Philosophy. For a student who has completed a baccalaureate degree but not a master’s degree or a U.S. DDS/DMD, DVM or MD, a minimum of 96 hours is required on the degree plan for the degree of Doctor of Philosophy.

Submit research proposal for dissertation or record of study and the research proposal approval form to the Office of Graduate and Professional Studies. When: At least 20 working days prior to the submission of the Request for the Final Examination. Approved by: Advisory committee, department head or intercollegiate faculty chair, Research Compliance and Biosafety, and OGAPS.

Complete residence requirement. When: Before submitting request to schedule final examination. Approved by: OGAPS

Apply for degree; pay graduation fee. When: During the first week of the final semester; see OGAPS calendar for deadlines.

Submit request for permission to hold and announce final examination. When: Must be received by OGAPS at least 10 working days before requested exam date. See OGAPS calendar for deadlines. Approved by: Advisory committee, department head or intercollegiate faculty chair, and OGAPS.

Successfully complete final examination. When: The Report of the Final Examination Form should be submitted to OGAPS within 10 days following the exam. Approved by: Advisory committee and OGAPS

Upload one approved final copy of the dissertation or record of study as a single pdf file to etd.tamu.edu and submit the fully signed dissertation/record of study approval form to the Office of Graduate and Professional Studies. When: See OGAPS calendar for deadlines. Approved by: Advisory committee, department head or intercollegiate faculty chair, and Office of Graduate and Professional Studies.

Graduate; arrange for cap and gown. For more information, visit http://graduation.tamu.edu.

Program Requirements

Program Requirements

- Student's Advisory Committee (p. 1148)

  - Preliminary Examination Scheduling (p. 1150)
  - Report of Preliminary Examination (p. 1150)
  - Retake of Failed Preliminary Examination (p. 1150)
  - Final Examination (p. 1151)
- Report of Final Examination (p. 1151)

Student’s Advisory Committee

After receiving admission to graduate studies and enrolling, the student will consult with the head of his or her major or administrative department (or chair of the intercollegiate faculty) concerning appointment of the chair of the advisory committee. The student’s advisory committee will consist of no fewer than four members of the graduate faculty representative of the student’s several fields of study and research, where the chair or co-chair must be from the student’s department (or intercollegiate faculty, if applicable), and at least one or more of the members must have an appointment to a department other than the student’s major department. The outside member for a student in an interdisciplinary degree program must be from a department different from the chair of the student's committee.

The chair, in consultation with the student, will select the remainder of the advisory committee. Only graduate faculty members located on Texas A&M University campuses may serve as chair of a student’s advisory committee. Other Texas A&M University graduate faculty members located off-campus may serve as a member or co-chair (but not chair), with a member as the chair.

If the chair of a student's advisory committee voluntarily leaves the University and the student is near completion of the degree and wants the chair to continue to serve in this role, the student is responsible for securing a current member of the University Graduate Faculty, from the student's academic program and located near the Texas A&M University campus site, to serve as the co-chair of the committee. The Department Head or Chair of Intercollegiate faculty may request in writing to the Associate Provost for Graduate and Professional Studies that a faculty member who is on an approved leave of absence or has voluntarily separated from the university, be allowed to continue to serve in the role of chair of a student’s advisory committee without a co-chair for up to one year. The students should be near completion of the degree. Extensions beyond the one year period can be granted with additional approval of the Dean.

The committee members’ signatures on the degree plan indicate their willingness to accept the responsibility for guiding and directing the entire academic program of the student and for initiating all academic actions concerning the student. Although individual committee members may be replaced by petition for valid reasons, a committee cannot resign en masse. The chair of the committee, who usually has immediate

Note: Once formal coursework is complete, you must be continuously registered until all degree requirements have been met. This includes submission and clearance of the dissertation or record of study. See Continuous Registration Requirements (p. 28).
supervision of the student’s research and dissertation or record of study, has the responsibility for calling all meetings of the committee. The duties of the committee include responsibility for the proposed degree plan, the research proposal, the preliminary examination, the dissertation or record of study and the final examination. In addition, the committee, as a group and as individual members, is responsible for counseling the student on academic matters, and, in the case of academic deficiency, initiating recommendations to the Office of Graduate and Professional Studies.

Degree Plan
The student’s advisory committee will evaluate the student’s previous education and degree objectives. The committee, in consultation with the student, will develop a proposed degree plan and outline a research problem which, when completed, as indicated by the dissertation (or its equivalent for the degree of Doctor of Education or the degree of Doctor of Engineering), will constitute the basic requirements for the degree. The degree plan must be filed with the Office of Graduate and Professional Studies prior to the deadline imposed by the student’s college and no later than 90 days prior to the preliminary examination.

This proposed degree plan should be submitted through the online Document Processing Submission System located on the website http://ogsdpss.tamu.edu. A minimum of 64 hours is required on the degree plan for the Doctor of Philosophy for a student who has completed a master’s degree. A student who has completed a DDS/DMD, DVM or a MD at a U.S. institution is also required to complete a minimum of 66 hours. A student who has completed a baccalaureate degree but not a master’s degree will be required to complete a 96-hour degree plan. Completion of a DDS/ DMD, DVM or MD degree at a foreign institution requires completion of a minimum of 96 hours for the Doctor of Philosophy. A field of study may be primarily in one department or in a combination of departments. A degree plan must carry a reasonable amount of 691 (research).

Additional coursework may be added by petition to the approved degree plan by the student’s advisory committee if it is deemed necessary to correct deficiencies in the student’s academic preparation. No changes can be made to the degree plan once the student’s Request for Final Examination is approved by the Office of Graduate and Professional Studies.

Approval to enroll in any professional course (900-level) should be obtained from the head of the department (or Chair of the intercollegiate faculty, if applicable) in which the course will be offered before including such a course on a degree plan.

No credit may be obtained by correspondence study, by extension or for any course of fewer than three weeks duration.

Transfer of Credit
Courses for which transfer credits are sought must be completed with a grade of B or greater and must be approved by the student’s advisory committee and the Office of Graduate and Professional Studies. These courses must not have been used previously for another degree. Except for officially approved cooperative doctoral programs, credit for thesis or dissertation research or the equivalent is not transferable. Credit for “internship” coursework in any form is not transferable. Courses taken in residence at an accredited U.S. institution or approved international institution with a final grade of B or greater will be considered for transfer credit if, at the time the courses were completed, the courses would be accepted for credit toward a similar degree for a student in degree-seeking status at the host institution. Credit for coursework taken by extension is not transferable. Coursework in which no formal grades are given or in which grades other than letter grades (A or B) are earned (for example, CR, P, S, U, H, etc.) is not accepted for transfer credit. Credit for coursework submitted for transfer from any college or university must be shown in semester credit hours, or equated to semester credit hours.

Courses used toward a degree at another institution may not be applied for graduate credit. If the course to be transferred was taken prior to the conferral of a degree at the transfer institution, a letter from the registrar at that institution stating that the course was not applied for credit toward the degree must be submitted to the Office of Graduate and Professional Studies.

Grades for courses completed at other institutions are not included in computing the GPR. An official transcript from the university at which transfer courses are taken must be sent directly to the Office of Admissions.

Research Proposal
The general field of research to be used for the dissertation should be agreed on by the student and the advisory committee at their first meeting, as a basis for selecting the proper courses to support the proposed research.

As soon thereafter as the research project can be outlined in reasonable detail, the dissertation research proposal should be completed. The research proposal should be approved at a meeting of the student’s advisory committee, at which time the feasibility of the proposed research and the adequacy of available facilities should be reviewed. The approved proposal, signed by all members of the student’s advisory committee, the head of the student’s major department (or chair of the intercollegiate faculty, if applicable), must be submitted to the Office of Graduate and Professional Studies at least 20 working days prior to the submission of the Request for the Final Examination.

Compliance issues must be addressed if a graduate student is performing research involving human subjects, animals, infectious biohazards and recombinant DNA. A student involved in these types of research should check with the Office of Research Compliance and Biosafety at (979) 458-1467 to address questions about all research compliance responsibilities. Additional information can also be obtained on the website http://rcb.tamu.edu.

Examinations
Preliminary Examination for Doctoral Students
The student’s major department (or chair of the interdisciplinary degree program faculty, if applicable) and his or her advisory committee may require qualifying, cumulative or other types of examinations at any time deemed desirable. These examinations are entirely at the discretion of the department and the student’s advisory committee.

The preliminary examination is required. The preliminary examination for a doctoral student shall be given no earlier than a date at which the student is within 6 credit hours of completion of the formal coursework on the degree plan (i.e., all coursework on the degree plan except 681, 684, 690, 691, 692, 693, 695, 697, 791, or other graduate courses specifically designated as S/U in the course catalog). The student should complete the Preliminary Examination no later than the end of the semester following the completion of the formal coursework on the degree plan.
Preliminary Examination Format

The objective of preliminary examination is to evaluate whether the student has demonstrated the following qualifications:

a. a mastery of the subject matter of all fields in the program;

b. an adequate knowledge of the literature in these fields and an ability to carry out bibliographical research;

c. an understanding of the research problem and the appropriate methodological approaches.

The format of the preliminary examination shall be determined by the student’s department (or interdisciplinary degree program, if applicable) and advisory committee, and communicated to the student in advance of the examination. The exam may consist of a written component, oral component, or combination of written and oral components.

The preliminary exam may be administered by the advisory committee or a departmental committee; herein referred to as the examination committee.

Regardless of exam format, a student will receive an overall preliminary exam result of pass or fail. The department (or interdisciplinary degree program, if applicable) will determine how the overall pass or fail result is determined based on the exam structure and internal department procedures. If the exam is administered by the advisory committee, each advisory committee member will provide a pass or fail evaluation decision.

Only one advisory committee substitution is allowed to provide an evaluation decision for a student’s preliminary exam, and it cannot be the committee chair.

If a student is required to take, as a part of the preliminary examination, a written component administered by a department or interdisciplinary degree program, the department or interdisciplinary degree program faculty must:

a. offer the examination at least once every six months. The departmental or interdisciplinary degree program examination should be announced at least 30 days prior to the scheduled examination date.

b. assume the responsibility for marking the examination satisfactory or unsatisfactory, or otherwise graded, and in the case of unsatisfactory, stating specifically the reasons for such a mark.

c. forward the marked examination to the chair of the student’s advisory committee within one week after the examination.

Preliminary Examination Scheduling

Prior to commencing any component of the preliminary examination, a departmental representative or the advisory committee chair will review the eligibility criteria with the student, using the Preliminary Examination Checklist to ensure the student is eligible for the preliminary examination. The following list of eligibility requirements applies.

• Student is registered at Texas A&M University for a minimum of one semester credit hour in the long semester or summer term during which any component of the preliminary examination is held. If the entire examination is held between semesters, then the student must be registered for the term immediately preceding the examination.

• An approved degree plan is on file with the Office of Graduate and Professional Studies prior to commencing the first component of the examination.

• Student’s cumulative GPR is at least 3.000.

• Student’s degree plan GPR is at least 3.000.

• All English language proficiency requirements are satisfied.

• At the end of the semester in which at least the first component of the exam is given, there are no more than 6 hours of coursework remaining on the degree plan (except 681, 684, 690, 691, 692, 693, 695, 697, 791, or other graduate courses specifically designated as S/U in the course catalog). The head of the student’s department (or Chair of the Interdisciplinary Degree Program, if applicable) has the authority to approve a waiver of this criterion.

Report of Preliminary Examination

Credit for the preliminary examination is not transferable in cases where a student changes degree programs after passing a preliminary exam.

If a written component precedes an oral component of the preliminary exam, the chair of the student’s examination committee is responsible for making all written examinations available to all members of the committee. A positive evaluation of the preliminary exam by all members of a student’s examination committee with at most one dissension is required to pass a student on his or her preliminary exam.

The student’s department will promptly report the results of the Preliminary Examination to the Office of Graduate and Professional Studies via the Report of Doctoral Preliminary Examination form. The Preliminary Examination checklist form must also be submitted. These forms should be submitted to the Office of Graduate and Professional Studies within 10 working days of completion of the preliminary examination.

The Report of the Preliminary Examination form must be submitted with original signatures of the approved examination committee members. If an approved examination committee member substitution (one only) has been made, that signature must also be included, in place of the committee member, on the form submitted to the Office of Graduate and Professional Studies. The original signature of the department head is also required on the form.

After passing the required preliminary examination for the doctoral degree, the student must complete the final examination for the degree within four calendar years. Otherwise, the student will be required to repeat the preliminary examination.

Retake of Failed Preliminary Examination

Upon approval of the student’s examination committee, with no more than one member dissenting, and approval of the Office of Graduate and Professional Studies, a student who has failed the preliminary examination may be given one re-examination. Adequate time must be given to permit the student to address the inadequacies emerging from the first preliminary examination. The examination committee must agree upon and communicate in writing to the student, an adequate time-frame from the first examination (normally six months) to retest, as well as a detailed explanation of the inadequacies emerging from the examination. The student and the committee should jointly negotiate a mutually acceptable date for this retest. When providing feedback
on inadequacies, the committee should clearly document expected improvements that the student must be able to exhibit in order to retake the exam. The examination committee will document and communicate the time-frame and feedback within 10 working days of the exam that was not passed.

Final Examination for Doctoral Students

The candidate for the doctoral degree must pass a final examination by deadline dates announced in the “Office of Graduate and Professional Studies Calendar” each semester. The doctoral student is allowed only one opportunity to take the final examination.

No unabsolved grades of D, F, or U for any course can be listed on the degree plan. The student must be registered for any remaining hours of 681, 684, 690, 691, 692, 791 or other graduate courses specifically designated as S/U in the course catalog during the semester of the final exam. No student may be given a final examination until they have been admitted to candidacy and their current official cumulative and degree plan GPAs are 3.00 or better.

To be admitted to candidacy for a doctoral degree, a student must have:

1. completed all formal coursework on the degree plan with the exception of any remaining 681, 684, 690 and 691, 692 (Professional Study), or 791 hours,
2. a 3.0 Graduate GPA and a Degree Plan GPA of at least 3.0 with no grade lower than C in any course on the degree plan,
3. passed the preliminary examination,
4. submitted an approved dissertation proposal,
5. met the residence requirements.

The request to hold and announce the final examination must be submitted to the Office of Graduate and Professional Studies a minimum of 10 working days in advance of the scheduled date. Any changes to the degree plan must be approved by the Office of Graduate and Professional Studies prior to the submission of the request for final examination.

The student’s advisory committee will conduct this examination. The final examination is not to be administered until the dissertation or record of study is available in substantially final form to the student’s advisory committee, and all concerned have had adequate time to review the document. Whereas the final examination may cover the broad field of the candidate’s training, it is presumed that the major portion of the time will be devoted to the dissertation and closely allied topics. Persons other than members of the graduate faculty may, with mutual consent of the candidate and the chair of the advisory committee, be invited to attend a final examination for an advanced degree. A positive vote by all members of the graduate committee with at most one dissension is required to pass a student on his or her exam. A department can have a stricter requirement provided there is consistency within all degree programs within a department. Upon completion of the questioning of the candidate, all visitors must excuse themselves from the proceedings.

Report of Final Examination

The student’s department will promptly report the results of the Final Examination to the Office of Graduate and Professional Studies via the Report of Doctoral Final Examination form. These forms should be submitted to the Office of Graduate and Professional Studies within 10 working days of completion of the final examination. The Office of Graduate and Professional Studies must be notified in writing of any cancellations.

A positive evaluation of the final exam by all members of a student’s advisory committee with at most one dissension is required to pass a student on his or her final exam. The Report of the Final Examination Form must be submitted with original signatures of only the committee members approved by the Office of Graduate and Professional Studies. If necessary, multiple copies of the form may be submitted with different committee member original signatures. If an approved committee member substitution (1 only) has been made, his/her signature must be included on the form submitted to the Office of Graduate and Professional Studies.

Dissertation

The ability to perform independent research must be demonstrated by the dissertation, which must be the original work of the candidate. Whereas acceptance of the dissertation is based primarily on its scholarly merit, it must also exhibit creditable literary workmanship. The format of the dissertation must be acceptable to the Office of Graduate and Professional Studies. Guidelines for the preparation of the dissertation are available in the Thesis Manual, which is available online at http://ogaps.tamu.edu.

After successful defense and approval by the student’s advisory committee and the head of the student’s major department (or chair of the intercollegiate faculty, if applicable), a student must submit his/her dissertation in electronic format as a single PDF file. The PDF file must be uploaded to the website, http://ogaps.tamu.edu. Additionally, a signed paper approval form with original signatures must be received by the Office of Graduate and Professional Studies. Both the PDF file and the signed approval form are required by the deadline.

Deadline dates for submitting are announced each semester or summer term in the Office of Graduate and Professional Studies Calendar (see Time Limit statement). These dates also can be accessed via the website http://ogaps.tamu.edu.

Each student who submits a document for review is assessed a one-time thesis/dissertation processing fee through Student Business Services. This processing fee is for the thesis/dissertation services provided. After commencement, dissertations are digitally stored and made available through the Texas A&M Libraries.

A dissertation that is deemed unacceptable by the Office of Graduate and Professional Studies because of excessive corrections will be returned to the student’s department head or chair of the intercollegiate faculty. The manuscript must be resubmitted as a new document, and the entire review process must begin anew. All original submittal deadlines must be met during the resubmittal process in order to graduate.

Additional Requirements

- Residence (p. 1152)
- Time Limit (p. 1152)
- Continuous Registration (p. 1152)
- Admission to Candidacy (p. 1152)
- Languages (p. 1152)
To satisfy the residence requirement, the student must complete a minimum of 9 credit hours per semester or 10-week summer semester in resident study at Texas A&M University for the required period. A student who enters a doctoral degree program with a baccalaureate degree may fulfill residence requirements in excess of one academic year (18 credit hours) by registration during summer sessions or by completion of a less-than-full course load (in this context a full course load is considered 9 credit hours per semester).

Students who are employed full-time while completing their degree may fulfill total residence requirements by completion of less-than-full time course loads each semester. In order to be considered for this, the student is required to submit a Petition for Waivers and Exceptions along with verification of his/her employment to the Office of Graduate and Professional Studies. An employee should submit verification of his/her employment at the time he/she submits the degree plan. See Registration. (p. 28)

See Residence Requirements (p. 22).

**Time Limit**

All requirements for doctoral degrees must be completed within a period of ten consecutive calendar years for the degree to be granted. A course will be considered valid until 10 years after the end of the semester in which it is taken. Graduate credit for coursework more than ten calendar years old at the time of the final oral examination may not be used to satisfy degree requirements.

After passing the required preliminary oral and written examinations for a doctoral degree, the student must complete the final examination within four calendar years. Otherwise, the student will be required to repeat the preliminary examination.

A final corrected version of the dissertation or record of study in electronic format as a single PDF file must be cleared by the Office of Graduate and Professional Studies no later than one year after the final examination or within the 10-year time limit, whichever occurs first. Failure to do so will result in the degree not being awarded.

**Continuous Registration**

A student in a program leading to a Doctor of Philosophy who has completed all coursework on his/her degree plan other than 691, 5V98 or 5V99 (research) are required to be in continuous registration until all requirements for the degree have been completed. See Continuous Registration Requirements (p. 28).

---

**Admission to Candidacy**

To be admitted to candidacy for a doctoral degree, a student must have:

1. completed all formal coursework on the degree plan with the exception of any remaining 681, 684, 690 and 691, 5V98 and 5V99, or 791.
2. a 3.0 Graduate GPA and a Degree Plan GPA of at least 3.0 with no grade lower than C in any course on the degree plan,
3. passed the preliminary examination (written and oral portions),
4. submitted an approved dissertation proposal,
5. met the residence requirements. The final examination will not be authorized for any doctoral student who has not been admitted to candidacy.

**Languages**

A student is required to possess a competent command of English. For English language proficiency requirements, see the Admissions section of this catalog. The doctoral (PhD) foreign language requirement at Texas A&M University is a departmental option, to be administered and monitored by the individual departments of academic instruction.

**99-Hour Cap on Doctoral Degrees**

In Texas, public colleges and universities are funded by the state according to the number of students enrolled. In accordance with legislation passed by the Texas Legislature, the number of hours for which state universities may receive subvention funding at the doctoral rate for any individual is limited to 99 hours. Texas A&M University and other universities will not receive subvention for hours in excess of the limit.

Institutions of higher education are allowed to charge the equivalent of nonresident tuition to a resident doctoral student who has enrolled in 100 or more semester credit hours of doctoral coursework.

A doctoral student at Texas A&M has seven years to complete his/her degree before being charged out-of-state tuition. A doctoral student who, after seven years of study, has accumulated 100 or more doctoral hours will be charged tuition at a rate equivalent to out-of-state tuition. Please note that the tuition increases will apply to Texas residents as well as students from other states and countries who currently are charged tuition at the resident rate. This includes those doctoral students who hold GAT, GANT, and GAR appointments of 20 or more hours and recipients of competitive fellowships who receive more than $1,000 per semester. Doctoral students who, after seven years of study, have not accumulated 100 hours are eligible to pay in-state tuition if otherwise eligible.

For count purposes, a year is counted as three semesters, normally fall, spring and summer. Using this system, a student is allowed 21 semesters as a G8 student to complete the doctoral degree before being penalized with the higher tuition rate. Any semester in which a G8 student is enrolled for a doctoral level course is counted.

The following majors are exempt from the 99-Hour Cap on Doctoral Degrees:

- Biomedical Sciences
- Biochemistry
- Microbiology
- Genetics
- Toxicology
• Nutrition Sciences
• Community Clinical Psychology
• School Psychology
• Veterinary Pathology
• Clinical Psychology
• Counseling Psychology
• Medical Sciences
• Health Services Research
• Health Promotion and Community Health Sciences
• Epidemiology and Environmental Health
• Oral Biology

The hour limit for these majors is 130 doctoral hours

Application for Degree
For information on applying for your degree, please visit the Graduation (p. 26) section.

Doctor of Medicine

Curriculum

The Doctor of Medicine (MD) degree requires a minimum of four years of study. The focus of the medical curriculum is to prepare students for supervised medical practice through clinical integration of material throughout all four years of study. Students in the pre-clerkship portion of the curriculum (approximately 18 months) do not take separate courses in the traditional basic science disciplines of gross anatomy, biochemistry, genetics, physiology, histology, microbiology, immunology, pharmacology, pathology, and neuroscience. Rather, such content is appropriately organized into integrated blocks of instruction (3 to 19 weeks in duration depending upon the theme of the block). Students in the clerkship portion of the curriculum (approximately 30 months) rotate on clinical service in required clerkships (internal medicine, surgery, psychiatry, pediatrics, obstetrics/gynecology, family medicine, emergency medicine, critical care medicine, and an acting internship) and also have opportunities for rotations in elective clerkships and areas of interest. Grades are issued for individual blocks and clerkships on an honors/pass/fail basis. Students are required to take and pass and/or achieve a minimum score on National Board of Medical Examiners (NBME) customized comprehensive exams and subject exams at various points in the program.

The ethical and social aspects of medical practice receive special emphasis in the Humanities, Ethics, Altruism and Leadership (HEAL) courses, which provide lecture, discussion and small group case studies that focus on the humanistic concerns in modern medicine. During the clerkship portion of the curriculum, students receive clinical training in a variety of inpatient and outpatient settings associated with our main clinical teaching campuses located in Bryan/College Station (Family Medicine Residency, the College Station Medical Center, Baylor Scott & White Health and St. Joseph Regional Health Center), Dallas (Baylor Scott & White Health, Cook Children’s Medical Center, and Timberlawn Mental Health System), Houston (Houston Methodist Hospital), Round Rock (Lone Star Circle of Care, Baylor Scott & White Health, and various facilities within St David’s Healthcare and Seton Healthcare, including Dell Children’s and the Austin State Hospital), and Temple (Baylor Scott & White Health and the Central Texas Veterans Health Care System, as well as nearby Carl R. Darnall Army Medical Center at Ft. Hood). Clerkships in Internal Medicine, Surgery, Family Medicine, Psychiatry, Pediatrics and Obstetrics/Gynecology are required. Also, clerkships in Emergency Medicine, Critical Care Medicine, and acting internship are required. A wide variety of elective clinical experiences are available. Some clinical rotations can be completed at alternate locations around the state (e.g. Pediatrics at Driscoll Children’s Hospital in Corpus Christi). Students may also design custom learning experiences for electives or participate in offerings at other medical colleges on a limited basis.

Policies and Regulations
The College of Medicine (COM) Student Handbook is published on the COM website under the Office of Student Affairs. This handbook is the official statement of rules and regulations that govern student conduct and student activities at the COM. The handbook can be viewed online on the following site; http://medicine.tamhsc.edu/student-affairs/docs/handbook.pdf.

Professionalism
Students entering a formal medical education program are expected to uphold and adhere to the ethical and behavioral standards of the profession of medicine. The development and maintenance of a professional attitude is an ongoing responsibility of each student. Evaluation of professional behavior is an integral part of the curriculum and will be a factor in assigning grades and determining promotion, retention or dismissal.

College of Medicine Admission Information (p. 38)

Program Requirements

The Degree of Doctor of Medicine Core Curriculum

The curriculum provides the basic science and clinical foundations that will prepare medical students for supervised medical practice in residency and beyond.

Pre-Clerkship Phase

The first 18 months of the curriculum (pre-clerkship portion) focus on the fundamentals of biomedical science and consist of two components, Foundations and Organ Systems.

Students start the first year of medical school with the Foundations blocks, which continue through mid-April of the first calendar year. Foundations blocks emphasize the basic structure of the human body and basic principles of other medical science disciplines, i.e., gross anatomy, histology, basic principles of biochemistry, genetics, pharmacology, and cell physiology. Foundations blocks also include Neuroscience and Introduction to Disease, which covers basic pathophysiology, immunology, and bacteriology. In the addition to the instruction of these basic medical sciences, students take integrated courses which cover medical humanities, ethics, leadership, and other important professional development topics, as well as the Introduction to Clinical Skills course, which includes patient history-taking and doctor-patient communication skills and physical diagnosis. Further, students are introduced to Evidence-Based Medicine key principles, Scholarly Work foundations and Research principles.

By mid-April of the first calendar year, students transition into the Organ Systems blocks, which conclude the following winter. The Organ Systems blocks cover normal function, pathophysiology and disease-related aspects of the specific organ systems including the basic
therapeutic approach to disease. The disciplines covered in Organ Systems blocks include organ-based physiology, organ system/disease-related biochemistry and genetics, pathology, microbiology, immunology, pharmacology, introductory pediatrics and introductory internal medicine. Students take a summer break after two Organ Systems blocks have been delivered, and this break provides opportunities to explore scholarly activities, service learning, and other educational activities. Throughout the Organ Systems blocks, students continue to build skills in Evidence-Based Medicine, Scholarly Work and Research principles, and pursue continued learning experiences in the humanities, ethics, and leadership. Students also participate in required coursework within a structured Preceptorship course, which includes clinical activities with patients, as well as simulated patient experiences and objective structured clinical examinations (OSCEs).

Pre-Clerkship (Foundations)

Blocks/Courses

- Foundations of Medicine I
- Foundations of Medicine II
- Medical Gross Anatomy
- Neuroscience
- Introduction to Disease
- Humanities, Ethics, Altruism and Leadership (HEAL) I & II
- Evidence Based Medicine/Scholarship and Research I & II
- Introduction to Clinical Skills I & II

Pre-Clerkship (Organ Systems)

Blocks/Courses

- Cardiovascular
- Respiratory
- Hematology/Oncology
- Gastrointestinal/Metabolism/Nutrition
- Renal/Genitourinary
- Endocrinology/Reproductive Science
- Integument/Musculoskeletal
- Humanities, Ethics, Altruism and Leadership (HEAL) III
- Evidence Based Medicine / Scholarship & Research III
- Introduction to Clinical Skills Preceptorship

Years Three and Four

The Clerkship portion of the curriculum follows delivery of the Organ Systems blocks, begins in January of the second year of medical school and extends until graduation. During this 30-month period, students rotate on clinical service in required clerkships (internal medicine, surgery, psychiatry, pediatrics, obstetrics/gynecology, family medicine, emergency medicine, critical care medicine, and an acting internship) and also have opportunities for rotations in elective clerkships and areas of interest. During this time, students receive clinical training in several different patient care venues and locations, including private-practice, academic, and governmental institutions in Austin, Bryan-College Station, Corpus Christi, Dallas, Houston, Round Rock and Temple. Opportunities for rotations in other regions and states exist, as do opportunities for global medical mission work and service learning.

Clerkship Phase (Phase III)

Required Clerkships/Courses

- Family Medicine (6 weeks)
- Internal Medicine (8 weeks)
- Obstetrics and Gynecology (6 weeks)
- Pediatrics (6 weeks)
- Psychiatry (6 weeks)
- Surgery (8 weeks)

Required Course:

- Principles of Radiology

Clerkship Phase (Phase IV)

Phase IV Rotations/Electives

Required Rotations/Courses:

- Acting Internship in Primary Care Medicine (4 weeks)
- Critical Care Medicine (4 weeks)
- Emergency Medicine (4 weeks)
- Becoming a Physician IV (2 weeks)

Electives:

- Electives are offered on all COM campuses. Students may choose from pre-determined electives, design custom learning experiences, or participate in offerings at other medical colleges on a limited basis.

Requirements for Graduation for MD Degree

COM grants the MD degree after the completion of the four-year program to those students who have attained a grade of at least a “Pass” in the courses and clerkships in the medical curriculum, and who have satisfactorily demonstrated to the faculty the personal and professional qualities essential to the practice of medicine. In addition, passing scores on the USMLE Step 1 and USMLE Step 2-Clinical Knowledge exams must be obtained. Students are expected to complete requirements for the MD degree within six (6) years, not counting time on leave of absence or in pursuit of advanced degrees, e.g. an MD/PhD.

COM students who qualify for the MD degree and who attain a GPA of 3.50 or above in their professional medical curricula, are awarded a degree “With Honors.” Students who enter the curriculum with advanced standing are not eligible to be named honor graduates.

Commencement for COM students who have earned the MD degree takes place at the end of the spring semester.

Education for Health Care Professionals - Certificate

The Certificate in Education for Healthcare Professionals is a 14 credit hour program for students who want to expand their knowledge of teaching and curriculum development. This certificate can be utilized to expand knowledge of teaching and curriculum development. The certificate is also an intermediary step within the EDHP program and can
be applied to the Master’s degree if the student wishes to pursue the advanced degree in the future.

To review the certificate’s overarching goals and student learning outcomes, please review the “Program Requirements” tab.

**Program Requirements**

**Certificate Program Goals and Outcomes**

The overarching goals of the Certificate in EDHP are to prepare students to:

- Teach in a variety of settings with an interdisciplinary team. Incorporate theory and practice in the development and implementation of educational offerings in diverse settings and populations.
- Integrate collective teaching strategies and delivery systems for today’s new learning environment.
- Effectively evaluate student performance with the necessary tools and strategies in clinical and/or classroom settings.
- Develop their skills as a new faculty member.

The learning outcomes for students who complete the Certificate in EDHP require that students will:

- Analyze educational pedagogies for a population of learners.
- Apply best practices of curriculum development and evaluation methods in teaching environments.
- Develop expertise in varied instructional methodologies.
- Incorporate an interdisciplinary perspective into an educator role.
- Integrate the role of educator into current practice.

**College of Nursing**

https://nursing.tamhsc.edu

**Administrative Officers**

Interim Dean - Regina Bentley, Ed.D., M.S.N., R.N., C.N.E.

Associate Dean for Academic Affairs - Debra Matthews, Ph.D., R.N.

Associate Dean for Student Affairs - Kathryn McCallum, M.S.N., R.N.

Associate Dean for Finance and Administration - Shirley Davidson, M.B.A.

Assistant Dean for Academic Studies – Brian Holland, Ph.D., R.N.

**General Statement**

Registered nurses have been called the backbone of our health care system. Working on the front lines of health care, they treat patients, monitor and record their condition, help establish a plan of care, educate patients or the public about a health condition and provide advice and emotional support to patients’ family members. Registered nurses are increasingly being recognized as leaders in transforming the health care system to meet the burgeoning demand for prevention, wellness and primary care services with a focus on improving quality and managing costs. Graduate-level nursing degrees provide additional opportunities for registered nurses to excel even more.

Individuals seeking a master’s degree in nursing (MSN) must first complete a Bachelor of Science in nursing degree and hold a valid RN license to practice in the State of Texas. Once completed, the MSN provides numerous and varied opportunities to advance in clinical, leadership and service roles.

The College of Nursing is committed to addressing the critical nursing shortage across Texas through exceptional graduate and undergraduate educational programs and advanced technologies in nursing. As leaders, our graduates are taught to question traditional methods and continually seek the best practices based on relevant clinical research.

**History**

Texas A&M College of Nursing received approval from the Texas Board of Nursing on July 17, 2008, and admitted its first class on July 21, 2008. The inaugural class on the Bryan Campus included 22 Traditional and 22 Second-Degree Bachelor of Science in nursing (BSN) students.

In spring of 2018, the college had grown to approximately 450 nursing students enrolled at two campuses and locations: Bryan and Round Rock. The college also has a resident recruiting presence in Lufkin and McAllen serving residents in East and South Texas, for both undergraduate and graduate nursing students.

The college’s undergraduate nursing students are enrolled in one of three tracks: Traditional BSN, Second-Degree BSN or RN-to-BSN. Graduate students in the College of Nursing are pursuing master-of-science (MSN) degree programs in Nursing Education, Forensic Nursing or Family Nurse Practitioner (FNP). A Graduate Certificate in Forensic Health Care is offered for baccalaureate or master’s-prepared health care workers, protective service investigators/case workers, social workers, law enforcement, prosecutors and other professions who wish to assist victims of violence and trauma.

Texas A&M College of Nursing graduates are among the best-prepared masters and baccalaureate nurses in the nation, and they are highly sought after by prospective employers. First-time passing rates on certification board exams for graduates of the FNP degree program are significantly above the national average. Additionally, the first-time National Council Licensure Examination for Registered Nurses® (NCLEX-RN) pass rates for BSN graduates have ranked 10 percentage points higher than both the Texas and national average for the past ten years. And, the percent of BSN graduates employed within the first month following graduation is consistently high compared to state and national averages.

In recognition of this standard of excellence, the college received the National League of Nursing’s prestigious designation as a Center of Excellence in Nursing Education for the years 2016-2020, and in 2017.
was ranked the #1 nursing program in Texas by RegisteredNursing.org.

**The Degrees of Master of Science in Nursing**

The College of Nursing offers three Master of Science in nursing (MSN) degrees. The MSN degree programs are offered primarily online, with some required visits to the Bryan-College Station campus each semester, based on the program.

Completion of the MSN Nursing Education degree enables graduates to instruct future generations of the nursing profession with advanced teaching emphasis, preparing them for the national certification exam in nursing education.

Graduates of the MSN Family Nurse Practitioner (FNP) program are advanced practice registered nurses who provide primary health care to a wide range of patients from infants and children to older adults. MSN-FNP graduates are eligible to take the ANCC and AANP certification exams. With a focus on health promotion, risk reduction, disease prevention and illness management, FNs help meet the escalating need for high-quality and accessible health care.

The MSN in Forensic Nursing prepares graduates to care for victims and perpetrators of traumatic events or criminal acts. While caring for patients, the forensic nurse is responsible for observing, recognizing, collecting and documenting forensic evidence. The MSN in Forensic Nursing program provides the academic preparation required for the Advanced Forensic Nursing – Board Certification (AFN-BC), established by the American Nurses Credentialing Center (ANCC) and the International Association of Forensic Nurses (IAFN).

**Locations**

The Bryan/College Station campus serves as the headquarters of the Texas A&M Health Science Center College of Nursing. The 200-acre campus is located along State Highway 47 approximately three miles west of the main campus of Texas A&M University. The College of Nursing campus in Round Rock, Texas provides a state-of-the-art 134,000-square-foot structure with classrooms, a simulation center, library, study lounge, student services and faculty offices. Additionally, the College of Nursing has two advising locations: Lufkin and McAllen, Texas.

**Masters**

- Master of Science in Nursing in Family Nurse Practitioner (p. 1156)
- Master of Science in Nursing in Forensic Nursing (p. 1160)
- Master of Science in Nursing in Nursing Education (p. 1164)

**Certificates**

- Certificate in Forensic Healthcare (p. 1168)

**Master of Science in Nursing in Family Nurse Practitioner**

For requirements specific to the Master of Science in Nursing (MSN) - Family Nurse Practitioner Program is offered online. Please reference the Program Requirements tab and more information provided at this link (https://nursing.tamhsc.edu/msn-fnp). More information will be provided at orientation.

**Steps to Fulfill Master's Degree Requirements**

1. Meet with departmental graduate advisor to plan course of study for first semester. **When:** Before first semester registration. **Approved by:** Graduate advisor or chair of the intercollegiate faculty.

2. Establish advisory committee. Submit a degree plan. **When:** Prior to the deadline imposed by the student's college and no later than 90 days prior to final oral or thesis defense. **Approved by:** Advisory committee, department head or chair of the intercollegiate faculty, and Office of Graduate and Professional Studies (OGAPS).

3. If thesis is required, submit thesis research proposal and research proposal approval form to the Office of Graduate and Professional Studies. **When:** At least 20 working days prior to the submission of the Request for the Final Examination. **Approved by:** Advisory committee, department head or chair of the intercollegiate faculty, Research Compliance and Biosafety, and OGAPS.

4. Apply for degree; pay graduation fee. **When:** During the first week of the final semester, see OGAPS calendar.
Program Requirements

**Program Requirements**

- Student's Advisory Committee (p. 1157)
- Degree Plan (p. 1158)
- Credit Requirements (p. 1158)
- Transfer of Credit (p. 1158)
- Limitations on the Use of Transfer, Extension and Certain Other Courses (p. 1158)
- Thesis Option (p. 1159)
- Thesis Proposal (p. 1159)
- Final Examination/Thesis Defense (p. 1159)
- Non-Thesis Option (p. 1159)

**Student’s Advisory Committee**

After receiving admission to graduate studies and enrolling for coursework, the student will consult with the head of his or her major or administrative department (or intercollegiate faculty, if applicable) concerning appointment of the chair of his or her advisory committee. The student’s advisory committee for the MS degree will consist of no fewer than three members of the graduate faculty, representative of the student’s fields of study and research. The chair or the co-chair of the advisory committee must be from the student’s major department (or intercollegiate faculty, if applicable), and at least one or more of the members must have an appointment to a department other than the student’s major department. The outside member for students in an interdisciplinary program must have an appointment to a department different from the chair of the student’s committee.

The chair, in consultation with the student, will select the remainder of the advisory committee. The student will interview each prospective committee member to determine whether he or she is willing to serve. Only graduate faculty members located on Texas A&M University campuses may serve as chair of a student’s advisory committee. Other graduate faculty members located off campus may serve as a member or co-chair (but not chair) with a member as the chair. The chair of the committee, who usually has immediate supervision of the student’s research and thesis, has the responsibility for calling required meetings of the committee and for calling meetings at any other time considered desirable.

If the chair of a student’s advisory committee voluntarily leaves the University and the student is near completion of the degree and wants the chair to continue to serve in this role, the student is responsible for securing a current member of the University Graduate Faculty, from the student’s academic program and located near the Texas A&M University campus site, to serve as the co-chair of the committee. The Department Head or Chair of Intercollegiate faculty may request in writing to the Associate Provost for Graduate and Professional Studies that a faculty member who is on an approved leave of absence or has voluntarily separated from the university, be allowed to continue to serve in the role of chair of a student’s advisory committee without a co-chair for us to one year. The students should be near completion of the degree. Extensions beyond the one year period can be granted with additional approval of the Dean.

If the chair of the student’s advisory committee is unavailable for an extended time in any academic period during which the student is involved in activities relating to an internship, thesis or professional paper, and is registered for courses such as 684, 691, 692 or 693, the student may request, in writing, that the department head appoint an alternate advisory committee chair during the interim period.

The duties of the committee include responsibility for the proposed degree plan, the research proposal, the thesis and the final examination. In addition, the committee as a group and as individual members are responsible for advising the student on academic matters, and, in the case of academic deficiency, initiating recommendations to the Office of Graduate and Professional Studies.

The committee members’ approval on the degree plan indicate their willingness to accept the responsibility for guiding and directing the
entire academic program of the student and for initiating all academic actions concerning the student. Although individual committee members may be replaced by petition for valid reasons, a committee cannot resign en masse.

Degree Plan
The student's advisory committee, in consultation with the student, will develop the proposed degree plan. The degree plan must be completed and filed with the Office of Graduate and Professional Studies prior to the deadline imposed by the student's college or interdisciplinary degree program, if applicable, and no later than 90 days prior to the date of the final oral examination or thesis defense.

A student should submit the degree plan using the online Document Processing Submission System (http://ogspss.tamu.edu).

A student submitting a proposed degree plan for a Master of Science in Nursing degree should designate on the official degree plan the appropriate program option.

Additional coursework may be added to the approved degree plan by petition if it is deemed necessary by the advisory committee to correct deficiencies in the student's academic preparation. No changes can be made to the degree plan once the student's Request for Final Examination or Request for Final Examination Exemption is approved by the Office of Graduate and Professional Studies.

Credit Requirement
A minimum of 51 semester credit hours of approved courses and research is required for the thesis option Master of Science in Nursing degree.

A minimum of 48 semester credit hours of approved coursework is required for the Non-Thesis Option.

Ordinarily the student will devote the major portion of his or her time to work in one or two closely related fields. Other work will be in supporting fields of interest.

Transfer of Credit
A student who has earned 12 hours of graduate credit in residence at Texas A&M University may be authorized to transfer courses in excess of the limits prescribed below upon the advice of the advisory committee and with the approval of the Office of Graduate and Professional Studies. Courses taken in residence at an accredited U.S. institution or approved international institution with a final grade of B or greater may be considered for transfer credit if, at the time the courses were completed, the courses would be accepted for credit toward a similar degree for a student in degree-seeking status at the host institution. Otherwise, the limitations stated in the following section apply. Coursework in which no formal grades are given or in which grades other than letter grades (A or B) are earned (for example, CR, P, S, U, H, etc.) is not accepted for transfer credit. Courses appearing on the degree plan with grades of D, F or U may not be absorbed by transfer work. Credit for thesis research or the equivalent is not transferable. Credit for coursework submitted for transfer from any college or university must be shown in semester credit hours or equated to semester credit hours. An official transcript from the university at which the transfer coursework was taken must be sent directly to the Office of Admissions.

Courses used toward a degree at another institution may not be applied for graduate credit. If the course to be transferred was taken prior to the conferral of a degree at the transfer institution, a letter from the registrar at that institution stating that the course was not applied for credit toward the degree must be submitted to the Office of Graduate and Professional Studies.

Grades for courses completed at other institutions are not included in computing the GPR.

Limitations on the Use of Transfer, Extension and Certain Other Courses
Some departments may have more restrictive requirements for transfer work. If otherwise acceptable, certain courses may be used toward meeting credit-hour requirements for the master's degree under the following limitations.

1. Some departments may have more restrictive requirements for transfer work. If otherwise acceptable, certain courses may be used toward meeting credit-hour requirements for the master's degree under the following limitations.

2. The maximum number of credit hours which may be considered for transfer credit is the greater of 12 hours or one-third (1/3) of the total hours of a degree plan. The following restrictions apply:
   - Graduate and/or upper-level undergraduate courses taken in residence at an accredited U.S. institution, or approved international institution with a final grade of B or greater will be considered for transfer credit if, at the time the courses were completed, the student was in degree-seeking status at Texas A&M University, or the student was in degree-seeking status at the institution at which the courses were taken; and if the courses would be accepted for credit toward a similar degree for a student in degree-seeking status at the host institution.
   - Courses previously used for another degree are not acceptable for degree plan credit.

3. The maximum number of credit hours taken in post-baccalaureate non-degree (G6) classification at Texas A&M University which may be considered for application to the degree plan is 12.

4. Not more than 12 hours may be used in any combination of the following categories:
   - Not more than 8 hours in the combination of 691 (research), 684 (Professional Internship) or SOPH 680 may be used.
   - Not more than 8 hours of 685 (Directed Studies) may be used.
   - Not more than 3 hours of 690 (Theory of Research) may be used.
   - Not more than 3 hours of 695 (Frontiers in Research) may be used.

5. A maximum of 2 hours of Seminar (681).

6. A maximum of 9 hours of advanced undergraduate courses (300- or 400-level).

7. For graduate courses of three weeks' duration or less, taken at other institutions, up to 1 hour of credit may be obtained for each five-day week of coursework. Each week of coursework must include at least 15 contact hours.

8. Continuing education courses may not be used for graduate credit.

9. Extension courses are not acceptable for credit.

Exceptions will be permitted only in unusual cases and when petitioned by the student's advisory committee and approved by the Office of Graduate and Professional Studies.
**Thesis Option**

An acceptable thesis is required for the Master of Science in Nursing degree for a student who selects the thesis option program. The finished work must reflect a comprehensive understanding of the pertinent literature and express in clear English, the problem(s) for study, the method, significance and results of the student’s original research. Guidelines for the preparation of the thesis are available in the Thesis Manual, which is available online at the Office of Graduate and Professional Studies (http://ogaps.tamu.edu) website.

After successful defense (or exemption) and approval by the student’s advisory committee and the head of the student’s major department (or chair of the intercollegiate faculty, if applicable), the student must submit his/her thesis in electronic format as a single PDF file. The PDF file must be uploaded to the Office of Graduate and Professional Studies (http://ogaps.tamu.edu) website. Additionally, a signed paper approval form with original signatures must be received by the Office of Graduate and Professional Studies. The PDF file and the signed approval form are required by the deadline.

Deadline dates for submitting the thesis are announced each semester or summer term in the “Office of Graduate and Professional Studies Calendar” (see Time Limit statement). These dates also can be accessed via the Office of Graduate and Professional Studies (http://ogaps.tamu.edu) website.

Each student who submits a document for review is assessed a one-time thesis/dissertation processing fee through Student Business Services. This processing fee is for the thesis/dissertation services provided. After commencement, theses and dissertations are digitally stored and made available through the Texas A&M Libraries.

A thesis that is deemed unacceptable by the Office of Graduate and Professional Studies because of excessive corrections will be returned to the student’s department head (or chair of the intercollegiate faculty, if applicable). The manuscript must be resubmitted as a new document, and the entire review process must begin again. All original submittal deadlines must be met during the resubmittal process to graduate that semester.

**Thesis Proposal**

For the thesis option Master of Science in Nursing degree, the student must prepare a thesis proposal for approval by the advisory committee and the head of the major department or chair of the interdisciplinary faculty, if applicable. This proposal must be submitted to the Office of Graduate and Professional Studies at least 20 working days prior to the submission of the request for the final examination.

Compliance issues must be addressed if a graduate student is performing research involving human subjects, animals, infectious biohazards and recombinant DNA. A student involved in these types of research should check with the Office of Research Compliance and Biosafety at (979) 458-1467 to address questions about all research compliance responsibilities. Additional information can also be obtained on the Office of Research Compliance and Biosafety (http://rcb.tamu.edu) website.

**Final Examination/Thesis Defense**

A student must pass a final examination by dates announced each semester or summer term in the Office of Graduate and Professional Studies Calendar. To be eligible to take the final examination, a student’s GPR must be at least 3.000 for courses on the degree plan and for all courses completed at Texas A&M which are eligible to be applied to a graduate degree, and there must be no unabsolved grades of D, F or U for any course listed on the degree plan. To absolve a deficient grade, the student must repeat the course at Texas A&M University and achieve a grade of C or better. All coursework on the degree plan must have been completed with the exception of those hours for which the student is registered. For thesis-option students, an approved thesis proposal must be on file in the Office of Graduate and Professional Studies according to published deadlines prior to the final examination or submission of the request for exemption from the final examination.

A request to hold and announce the final examination must be submitted to the Office of Graduate and Professional Studies a minimum of 10 working days in advance of the scheduled date for the examination. The Office of Graduate and Professional Studies must be notified in writing of any cancellations. A student may be given only one opportunity to repeat the final examination for the master’s degree and that must be within a time period that does not extend beyond the end of the next regular semester (summer terms are excluded).

For thesis option students, the final examination covers the thesis and all work taken on the degree plan and at the option of the committee may be written or oral or both. The final examination may not be administered before the thesis is available to all members of the student’s advisory committee in substantially final form, and all members have had adequate time to review the document. The examination is conducted by the student’s advisory committee as finally constituted. A thesis option student must be registered in the University in the semester or summer term in which the final examination is taken. Persons other than members of the graduate faculty may, with mutual consent of the candidate and the major professor, attend final examinations for advanced degrees. Upon completion of the questioning of the candidate, all visitors must excuse themselves from the proceedings. A positive vote by all members of the graduate committee with at most one dissension is required to pass a student on his or her exam. A department, or interdisciplinary degree program, may have a stricter requirement provided there is consistency within all degree programs within a department or interdisciplinary degree program.

The Report of the Final Examination Form must be submitted with original signatures of only the committee members approved by the Office of Graduate and Professional Studies. If an approved committee member substitution (1 only) has been made, his/her signature must also be submitted to the Office of Graduate and Professional Studies. If necessary, multiple copies of the form may be submitted with different committee member original signatures. If an approved committee member substitution (1 only) has been made, his/her signature must be included on the form submitted to the Office of Graduate and Professional Studies.

A thesis option candidate may petition to be exempt from his/her final examination provided his/her degree plan GPR is 3.500 or greater and he/she has the approval of the advisory committee, the head of the student’s major department, or intercollegiate chair, if appropriate, and the Office of Graduate and Professional Studies. It is required that the petition for exemption be submitted the same semester the student intends to submit the thesis.

**Non-Thesis Option**

For non-thesis option students, a final comprehensive examination may be required.
The final exam cannot be held prior to the mid point of the semester if questions on the exam are based on courses in which the student is currently enrolled. If a student has completed all required degree plan coursework, the student is not required to be registered for classes in the semester the final examination is administered (unless he/she holds an assistantship). For specific final examination requirements, a student should check the program requirements for the degree which he/she is pursuing.

Exam results must be submitted with original signatures of only the committee members approved by the Office of Graduate and Professional Studies. If an approved committee member substitution (1 only) has been made, his/her signature must also be submitted to the Office of Graduate and Professional Studies.

A student pursuing the non-thesis option is not allowed to enroll in 691 (research) for any reason and 691 may not be used for credit toward a non-thesis option Master of Science degree. A maximum of 4 credit hours of 684 (Professional Internship), 8 credit hours of 685 (Directed Studies), and up to 3 credit hours of 690 (Theory of Research) or 695 (Frontiers in Research) may be used toward the non-thesis option Master of Science degree. In addition, any combination of 684, 685, 690 and 695 may not exceed 25 percent of the total credit hour requirement shown on the individual degree plan. All requirements for the non-thesis option Master of Science degree other than those specified above are the same as for the thesis option degree.

### Additional Requirements

**Additional Requirements**

- Residence (p. 1160)
- Continuous Registration (p. 1160)
- Time Limit (p. 1160)
- Foreign Languages (p. 1160)
- Application for Degree (p. 1160)

### Residence

In partial fulfillment of the residence requirement for the degree of Master of Science in Nursing, the student must complete 9 resident credit hours during one regular semester or one 10-week summer semester in resident study at Texas A&M University. Upon recommendation of the student’s advisory committee, department head or Chair of the Interdisciplinary Program, if appropriate, and with approval of the Office of Graduate and Professional Studies, a student may be granted exemption from this requirement. Such a petition, however, must be approved prior to the student’s registration for the final 9 credit hours of required coursework.

Students who are employed full-time while completing their degree may fulfill total residence requirements by completion of less-than-full time course loads each semester. In order to be considered for this, the student is required to submit a Petition for Waivers and Exceptions along with verification of his/her employment to the Office of Graduate and Professional Studies.

See Residence Requirements (http://catalog.tamu.edu/graduate/academic-expectations-general-degree-requirements/degree-requirements).

### Continuous Registration

A student in the thesis option of the Master of Science in Nursing program who has completed all coursework on his/her degree plan other than 5V98, 5V99, and 691 (research) is required to be in continuous registration until all requirements for the degree have been completed. See Continuous Registration Requirements (http://catalog.tamu.edu/graduate/academic-expectations-general-degree-requirements/registration-academic-status).

### Time Limit

All degree requirements must be completed within a period of seven consecutive years for the degree to be granted. A course will be considered valid until seven years after the end of the semester in which it is taken. Graduate credit for coursework which is more than seven calendar years old at the time of the final examination (oral or written) may not be used to satisfy degree requirements.

A student who has chosen the thesis option must have the final corrected version of the thesis cleared by the Office of Graduate and Professional Studies no later than one year after the final examination, or approval of a petition for exemption from the final exam, or within the seven-year time limit, whichever occurs first. Failure to do so will result in the degree not being awarded.

### Foreign Languages

No specific language requirement exists for the Master of Science in Nursing degree.

### Application for Degree

For information on applying for your degree, please visit the Graduation Application for Degree (p. 26) section.

### Master of Science in Nursing in Forensic Nursing

For requirements specific to the Master of Science in Nursing (MSN) - Forensic Nursing Program is offered online. Please reference the Program Requirements tab and more information provided at this link (https://nursing.tamhsc.edu/msn-fors). More information will be provided at orientation.

### Steps to Fulfill Master's Degree Requirements

1. Meet with departmental graduate advisor to plan course of study for first semester. **When:** Before first semester registration. **Approved by:** Graduate advisor or chair of the intercollegiate faculty.
2. Establish advisory committee. Submit a degree plan. **When:** Prior to the deadline imposed by the student’s college and no later than 90 days prior to final oral or thesis defense. **Approved by:** Advisory committee, department head or chair of the intercollegiate faculty, and Office of Graduate and Professional Studies (OGAPS).
If thesis is required, submit thesis research proposal and research proposal approval form to the Office of Graduate and Professional Studies. **When:** At least 20 working days prior to the submission of the Request for the Final Examination.  
**Approved by:** Advisory committee, department head or chair of the intercollegiate faculty, Research Compliance and Biosafety, and OGAPS.

### Program Requirements

#### Program Requirements

- Student’s Advisory Committee (p. 1161)
- Degree Plan (p. 1162)
- Credit Requirements (p. 1162)
- Transfer of Credit (p. 1162)
- Limitations on the Use of Transfer, Extension and Certain Other Courses (p. 1162)
- Thesis Option (p. 1163)
  - Thesis Proposal (p. 1163)
  - Final Examination/Thesis Defense (p. 1163)
- Non-Thesis Option (p. 1164)

#### Student’s Advisory Committee

After receiving admission to graduate studies and enrolling for coursework, the student will consult with the head of his or her major or administrative department (or intercollegiate faculty, if applicable) concerning appointment of the chair of his or her advisory committee. The student’s advisory committee for the MS degree will consist of **no fewer than three members of the graduate faculty**, representative of the student’s fields of study and research. The chair or the co-chair of the advisory committee must be from the student’s major department (or intercollegiate faculty, if applicable), and **at least one or more of the members must have an appointment to a department other than the student’s major department**. The outside member for students in an interdisciplinary program must have an appointment to a department different from the chair of the student’s committee.

The chair, in consultation with the student, will select the remainder of the advisory committee. The student will interview each prospective committee member to determine whether he or she is willing to serve. Only graduate faculty members located on Texas A&M University campuses may serve as chair of a student’s advisory committee. Other graduate faculty members located off campus may serve as a member or co-chair (but not chair) with a member as the chair. The chair of the committee, who usually has immediate supervision of the student’s research and thesis, has the responsibility for calling required meetings of the committee and for calling meetings at any other time considered desirable.

If the chair of a student’s advisory committee voluntarily leaves the University and the student is near completion of the degree and wants the chair to continue to serve in this role, the student is responsible for securing a current member of the University Graduate Faculty, from the student’s academic program and located near the Texas A&M University campus site, to serve as the co-chair of the committee. The Department Head or Chair of Intercollegiate faculty may request in writing to the Associate Provost for Graduate and Professional Studies that a faculty member who is on an approved leave of absence or has voluntarily separated from the university, be allowed to continue to serve in the role of chair of a student’s advisory committee without a co-chair for us to one year. The students should be near completion of the degree. Extensions beyond the one year period can be granted with additional approval of the Dean.
If the chair of the student’s advisory committee is unavailable for an extended time in any academic period during which the student is involved in activities relating to an internship, thesis or professional paper, and is registered for courses such as 684, 691, 692 or 693, the student may request, in writing, that the department head appoint an alternate advisory committee chair during the interim period.

The duties of the committee include responsibility for the proposed degree plan, the research proposal, the thesis and the final examination. In addition, the committee as a group and as individual members are responsible for advising the student on academic matters, and, in the case of academic deficiency, initiating recommendations to the Office of Graduate and Professional Studies.

The committee members’ approval on the degree plan indicate their willingness to accept the responsibility for guiding and directing the entire academic program of the student and for initiating all academic actions concerning the student. Although individual committee members may be replaced by petition for valid reasons, a committee cannot resign en masse.

Degree Plan

The student’s advisory committee, in consultation with the student, will develop the proposed degree plan. The degree plan must be completed and filed with the Office of Graduate and Professional Studies prior to the deadline imposed by the student’s college or interdisciplinary degree program, if applicable, and no later than 90 days prior to the date of the final oral examination or thesis defense.

A student should submit the degree plan using the online Document Processing Submission System (http://ogsdpss.tamu.edu).

A student submitting a proposed degree plan for a Master of Science in Nursing degree should designate on the official degree plan the appropriate program option.

Additional coursework may be added to the approved degree plan by petition if it is deemed necessary by the advisory committee to correct deficiencies in the student’s academic preparation. No changes can be made to the degree plan once the student’s Request for Final Examination or Request for Final Examination Exemption is approved by the Office of Graduate and Professional Studies.

Credit Requirement

A minimum of 39 semester credit hours of approved courses and research is required for the thesis option Master of Science in Forensic Nursing degree.

A minimum of 36 semester credit hours of approved coursework is required for the Non-Thesis Option.

Ordinarily the student will devote the major portion of his or her time to work in one or two closely related fields. Other work will be in supporting fields of interest.

Transfer of Credit

A student who has earned 12 hours of graduate credit in residence at Texas A&M University may be authorized to transfer courses in excess of the limits prescribed below upon the advice of the advisory committee and with the approval of the Office of Graduate and Professional Studies. Courses taken in residence at an accredited U.S. institution or approved international institution with a final grade of B or greater may be considered for transfer credit if, at the time the courses were completed, the courses would be accepted for credit toward a similar degree for a student in degree-seeking status at the host institution. Otherwise, the limitations stated in the following section apply. Coursework in which no formal grades are given or in which grades other than letter grades (A or B) are earned (for example, CR, P, S, U, H, etc.) is not accepted for transfer credit. Courses appearing on the degree plan with grades of D, F or U may not be absolved by transfer work. Credit for thesis research or the equivalent is not transferable. Credit for coursework submitted for transfer from any college or university must be shown in semester credit hours or equated to semester credit hours. An official transcript from the university at which the transfer coursework was taken must be sent directly to the Office of Admissions.

Courses used toward a degree at another institution may not be applied for graduate credit. If the course to be transferred was taken prior to the conferral of a degree at the transfer institution, a letter from the registrar at that institution stating that the course was not applied for credit toward the degree must be submitted to the Office of Graduate and Professional Studies.

Grades for courses completed at other institutions are not included in computing the GPR.

Limitations on the Use of Transfer, Extension and Certain Other Courses

Some departments may have more restrictive requirements for transfer work. If otherwise acceptable, certain courses may be used toward meeting credit-hour requirements for the master’s degree under the following limitations.

1. The maximum number of credit hours which may be considered for transfer credit is the greater of 12 hours or one-third (1/3) of the total hours of a degree plan. The following restrictions apply:
   - Graduate and/or upper-level undergraduate courses taken in residence at an accredited U.S. institution, or approved international institution with a final grade of B or greater will be considered for transfer credit if, at the time the courses were completed, the student was in degree-seeking status at Texas A&M University, or the student was in degree-seeking status at the institution at which the courses were taken; and if the courses would be accepted for credit toward a similar degree for a student in degree-seeking status at the host institution.
   - Courses previously used for another degree are not acceptable for degree plan credit.

2. The maximum number of credit hours taken in post-baccalaureate non-degree (G6) classification at Texas A&M University which may be considered for application to the degree plan is 12.

3. Not more than 12 hours may be used in any combination of the following categories:
   - Not more than 8 hours in the combination of 691 (research), 684 (Professional Internship) or SOPH 680 may be used.
   - Not more than 8 hours of 685 (Directed Studies) may be used.
   - Not more than 3 hours of 690 (Theory of Research) may be used.
   - Not more than 3 hours of 695 (Frontiers in Research) may be used.

4. A maximum of 2 hours of Seminar (681).

5. A maximum of 9 hours of advanced undergraduate courses (300- or 400-level).

6. For graduate courses of three weeks’ duration or less, taken at other institutions, up to 1 hour of credit may be obtained for each five-day period, for a maximum of 8 hours.
week of coursework. Each week of coursework must include at least 15 contact hours.
7. Continuing education courses may not be used for graduate credit.
8. Extension courses are not acceptable for credit.

Exceptions will be permitted only in unusual cases and when petitioned by the student’s advisory committee and approved by the Office of Graduate and Professional Studies.

Thesis Option

An acceptable thesis is required for the Master of Science in Nursing degree for a student who selects the thesis option program. The finished work must reflect a comprehensive understanding of the pertinent literature and express in clear English, the problem(s) for study, the method, significance and results of the student’s original research. Guidelines for the preparation of the thesis are available in the Thesis Manual, which is available online at the Office of Graduate and Professional Studies (http://ogaps.tamu.edu) website.

After successful defense (or exemption) and approval by the student’s advisory committee and the head of the student’s major department (or chair of the intercollegiate faculty, if applicable), the student must submit his/her thesis in electronic format as a single PDF file. The PDF file must be uploaded to the Office of Graduate and Professional Studies (http://ogaps.tamu.edu) website. Additionally, a signed paper approval form with original signatures must be received by the Office of Graduate and Professional Studies. The PDF file and the signed approval form are required by the deadline.

Deadline dates for submitting the thesis are announced each semester or summer term in the “Office of Graduate and Professional Studies Calendar” (see Time Limit statement). These dates also can be accessed via the Office of Graduate and Professional Studies (http://ogaps.tamu.edu) website.

Each student who submits a document for review is assessed a one-time thesis/dissertation processing fee through Student Business Services. This processing fee is for the thesis/dissertation services provided. After commencement, theses and dissertations are digitally stored and made available through the Texas A&M Libraries.

A thesis that is deemed unacceptable by the Office of Graduate and Professional Studies because of excessive corrections will be returned to the student’s department head (or chair of the intercollegiate faculty, if applicable). The manuscript must be resubmitted as a new document, and the entire review process must begin again. All original submittal deadlines must be met during the resubmittal process to graduate that semester.

Thesis Proposal

For the thesis option Master of Science in Nursing degree, the student must prepare a thesis proposal for approval by the advisory committee and the head of the major department or chair of the interdisciplinary faculty, if applicable. This proposal must be submitted to the Office of Graduate and Professional Studies at least 20 working days prior to the submission of the request for the final examination.

Compliance issues must be addressed if a graduate student is performing research involving human subjects, animals, infectious biohazards and recombinant DNA. A student involved in these types of research should check with the Office of Research Compliance and Biosafety at (979) 458-1467 to address questions about all research compliance responsibilities. Additional information can also be obtained on the Office of Research Compliance and Biosafety (http://rcb.tamu.edu) website.

Final Examination/Thesis Defense

A student must pass a final examination by dates announced each semester or summer term in the Office of Graduate and Professional Studies Calendar. To be eligible to take the final examination, a student’s GPR must be at least 3.000 for courses on the degree plan and for all courses completed at Texas A&M which are eligible to be applied to a graduate degree, and there must be no unsolved grades of D, F or U for any course listed on the degree plan. To absolve a deficient grade, the student must repeat the course at Texas A&M University and achieve a grade of C or better. All coursework on the degree plan must have been completed with the exception of those hours for which the student is registered. For thesis-option students, an approved thesis proposal must be on file in the Office of Graduate and Professional Studies according to published deadlines prior to the final examination or submission of the request for exemption from the final examination.

A request to hold and announce the final examination must be submitted to the Office of Graduate and Professional Studies a minimum of 10 working days in advance of the scheduled date for the examination. The Office of Graduate and Professional Studies must be notified in writing of any cancellations. A student may be given only one opportunity to repeat the final examination for the master’s degree and that must be within a time period that does not extend beyond the end of the next regular semester (summer terms are excluded).

For thesis option students, the final examination covers the thesis and all work taken on the degree plan and at the option of the committee may be written or oral or both. The final examination may not be administered before the thesis is available to all members of the student’s advisory committee in substantially final form, and all members have had adequate time to review the document. The examination is conducted by the student’s advisory committee as finally constituted. A thesis option student must be registered in the University in the semester or summer term in which the final examination is taken. Persons other than members of the graduate faculty may, with mutual consent of the candidate and the major professor, attend final examinations for advanced degrees. Upon completion of the questioning of the candidate, all visitors must excuse themselves from the proceedings. A positive vote by all members of the graduate committee with at most one dissension is required to pass a student on his or her exam. A department, or interdisciplinary degree program, may have a stricter requirement provided there is consistency within all degree programs within a department or interdisciplinary degree program.

The Report of the Final Examination Form must be submitted with original signatures of only the committee members approved by the Office of Graduate and Professional Studies. If an approved committee member substitution (1 only) has been made, his/her signature must also be submitted to the Office of Graduate and Professional Studies. If necessary, multiple copies of the form may be submitted with different committee member original signatures. If an approved committee member substitution (1 only) has been made, his/her signature must be included on the form submitted to the Office of Graduate and Professional Studies.

A thesis option candidate may petition to be exempt from his/her final examination provided his/her degree plan GPR is 3.500 or greater and he/she has the approval of the advisory committee, the head of the student’s
major department, or intercollegiate chair, if appropriate, and the Office of Graduate and Professional Studies. It is required that the petition for exemption be submitted the same semester the student intends to submit the thesis.

Non-Thesis Option

For non-thesis option students, a final comprehensive examination may be required.

The final exam cannot be held prior to the mid point of the semester if questions on the exam are based on courses in which the student is currently enrolled. If a student has completed all required degree plan coursework, the student is not required to be registered for classes in the semester the final examination is administered (unless he/she holds an assistantship). For specific final examination requirements, a student should check the program requirements for the degree which he/she is pursuing.

Exam results must be submitted with original signatures of only the committee members approved by the Office of Graduate and Professional Studies. If an approved committee member substitution (1 only) has been made, his/her signature must also be submitted to the Office of Graduate and Professional Studies.

A student pursuing the non-thesis option is not allowed to enroll in 691 (research) for any reason and 691 may not be used for credit toward a non-thesis option Master of Science degree. A maximum of 4 credit hours of 684 (Professional Internship), 8 credit hours of 685 (Directed Studies), and up to 3 credit hours of 690 (Theory of Research) or 695 (Frontiers in Research) may be used toward the non-thesis option Master of Science degree. In addition, any combination of 684, 685, 690 and 695 may not exceed 25 percent of the total credit hour requirement shown on the individual degree plan. All requirements for the non-thesis option Master of Science degree other than those specified above are the same as for the thesis option degree.

Additional Requirements

- **Residence** (p. 1164)
- **Continuous Registration** (p. 1164)
- **Time Limit** (p. 1164)
- **Foreign Languages** (p. 1164)
- **Application for Degree** (p. 1164)

**Residence**

In partial fulfillment of the residence requirement for the degree of Master of Science in Nursing, the student must complete 9 resident credit hours during one regular semester or one 10-week summer semester in resident study at Texas A&M University. Upon recommendation of the student’s advisory committee, department head or Chair of the Interdisciplinary Program, if appropriate, and with approval of the Office of Graduate and Professional Studies, a student may be granted exemption from this requirement. Such a petition, however, must be approved prior to the student’s registration for the final 9 credit hours of required coursework.

Students who are employed full-time while completing their degree may fulfill total residence requirements by completion of less-than-full time course loads each semester. In order to be considered for this, the student is required to submit a Petition for Waivers and Exceptions along with verification of his/her employment to the Office of Graduate and Professional Studies.

See Residence Requirements (http://catalog.tamu.edu/graduate/academic-expectations-general-degree-requirements/degree-requirements).

**Continuous Registration**

A student in the thesis option of the Master of Science in Nursing program who has completed all coursework on his/her degree plan other than 5V98, 5V99, and 691 (research) is required to be in continuous registration until all requirements for the degree have been completed. See Continuous Registration Requirements (http://catalog.tamu.edu/graduate/academic-expectations-general-degree-requirements/registration-academic-status).

**Time Limit**

All degree requirements must be completed within a period of seven consecutive years for the degree to be granted. A course will be considered valid until seven years after the end of the semester in which it is taken. Graduate credit for coursework which is more than seven calendar years old at the time of the final examination (oral or written) may not be used to satisfy degree requirements.

A student who has chosen the thesis option must have the final corrected version of the thesis cleared by the Office of Graduate and Professional Studies no later than one year after the final examination, or approval of a petition for exemption from the final exam, or within the seven-year time limit, whichever occurs first. Failure to do so will result in the degree not being awarded.

**Foreign Languages**

No specific language requirement exists for the Master of Science in Nursing degree.

**Application for Degree**

For information on applying for your degree, please visit the Graduation (p. 26) section.

**Master of Science in Nursing in Nursing Education**

For requirements specific to the **Master of Science in Nursing (MSN)**
- Nursing Education Program is offered online. Please reference the Program Requirements tab and more information provided at this link (https://nursing.tamhsc.edu/msn). More information will be provided at orientation.

**Steps to Fulfill Master’s Degree Requirements**

1. Meet with departmental **When**: Before first graduate advisor to **plan course of study for Approved by**: Graduate first semester.
   - **When**: Before first semester registration. advisor or chair of the intercollegiate faculty.
2 Establish advisory committee. Submit a degree plan.¹

When: Prior to the deadline imposed by the student’s college and no later than 90 days prior to final oral or thesis defense.

Approved by: Advisory committee, department head or chair of the intercollegiate faculty, and Office of Graduate and Professional Studies (OGAPS).

3 If thesis is required, submit thesis research proposal and research proposal approval form to the Office of Graduate and Professional Studies.

When: At least 20 working days prior to the submission of the Request for the Final Examination.

Approved by: Advisory committee, department head or chair of the intercollegiate faculty, Research Compliance and Biosafety, and OGAPS.

4 Apply for degree²; pay graduation fee.

When: During the first week of the final semester, see OGAPS calendar.

5 Check to be sure degree program and advisory committee are up-to-date, and coursework is complete.

When: Well before submitting request to schedule final examination.

6 Complete residence requirement.

When: If applicable, before or during final semester.

Approved by:OGAPS.

7 Submit request to schedule final examination.

When: Must be received by OGAPS at least 10 working days before exam date. See OGAPS calendar for deadlines.

Approved by: Advisory committee, department head or chair of the intercollegiate faculty, and OGAPS.

8 Successfully complete final examination.

When: The Report of the Final Examination Form should be submitted to OGAPS within 10 days following the exam.

Approved by: Advisory committee and OGAPS.

9 If required, upload one approved final copy of thesis as a single PDF file to etd.tamu.edu and submit the fully signed thesis approval form to the Office of Graduate and Professional Studies.

When: See OGAPS calendar for deadlines.

Approved by: Advisory committee, department head or chair of the intercollegiate faculty and OGAPS.

10 Graduation; arrange for cap and gown.

For more information, visit http://graduation.tamu.edu.

¹ The online Document Processing Submission System is located on the website https://ogsdpss.tamu.edu.

² Complete the application for degree form via the student’s Howdy portal.

Program Requirements

Program Requirements

- Student’s Advisory Committee (p. 1165)
- Degree Plan (p. 1166)
- Credit Requirements (p. 1166)
- Transfer of Credit (p. 1166)
- Limitations on the Use of Transfer, Extension and Certain Other Courses (p. 1166)
- Thesis Option (p. 1167)
  - Thesis Proposal (p. 1167)
  - Final Examination/Thesis Defense (p. 1167)
- Non-Thesis Option (p. 1168)

Student’s Advisory Committee

After receiving admission to graduate studies and enrolling for coursework, the student will consult with the head of his or her major or administrative department (or intercollegiate faculty, if applicable) concerning appointment of the chair of his or her advisory committee. The student’s advisory committee for the MS degree will consist of no fewer than three members of the graduate faculty, representative of the student’s fields of study and research. The chair or the co-chair of the advisory committee must be from the student’s major department (or intercollegiate faculty, if applicable), and at least one or more of the members must have an appointment to a department other than the student’s major department. The outside member for students in an interdisciplinary program must have an appointment to a department different from the chair of the student’s committee.

The chair, in consultation with the student, will select the remainder of the advisory committee. The student will interview each prospective committee member to determine whether he or she is willing to serve. Only graduate faculty members located on Texas A&M University campuses may serve as chair of a student’s advisory committee. Other graduate faculty members located off campus may serve as a member or co-chair (but not chair) with a member as the chair. The chair of the committee, who usually has immediate supervision of the student’s research and thesis, has the responsibility for calling required meetings of the committee and for calling meetings at any other time considered desirable.
If the chair of a student’s advisory committee voluntarily leaves the University and the student is near completion of the degree and wants the chair to continue to serve in this role, the student is responsible for securing a current member of the University Graduate Faculty, from the student’s academic program and located near the Texas A&M University campus site, to serve as the co-chair of the committee. The Department Head or Chair of Intercollegiate faculty may request in writing to the Associate Provost for Graduate and Professional Studies that a faculty member who is on an approved leave of absence or has voluntarily separated from the university, be allowed to continue to serve in the role of chair of a student’s advisory committee without a co-chair for us to one year. The students should be near completion of the degree. Extensions beyond the one year period can be granted with additional approval of the Dean.

If the chair of the student’s advisory committee is unavailable for an extended time in any academic period during which the student is involved in activities relating to an internship, thesis or professional paper, and is registered for courses such as 684, 691, 692 or 693, the student may request, in writing, that the department head appoint an alternate advisory committee chair during the interim period.

The duties of the committee include responsibility for the proposed degree plan, the research proposal, the thesis and the final examination. In addition, the committee as a group and as individual members are responsible for advising the student on academic matters, and, in the case of academic deficiency, initiating recommendations to the Office of Graduate and Professional Studies.

The committee members’ approval on the degree plan indicate their willingness to accept the responsibility for guiding and directing the entire academic program of the student and for initiating all academic actions concerning the student. Although individual committee members may be replaced by petition for valid reasons, a committee cannot resign en masse.

Degree Plan
The student’s advisory committee, in consultation with the student, will develop the proposed degree plan. The degree plan must be completed and filed with the Office of Graduate and Professional Studies prior to the deadline imposed by the student’s college or interdisciplinary degree program, if applicable, and no later than 90 days prior to the date of the final oral examination or thesis defense.

A student should submit the degree plan using the online Document Processing Submission System (http://ogspdss.tamu.edu).

A student submitting a proposed degree plan for a Master of Science in Nursing degree should designate on the official degree plan the appropriate program option.

Additional coursework may be added to the approved degree plan by petition if it is deemed necessary by the advisory committee to correct deficiencies in the student’s academic preparation. No changes can be made to the degree plan once the student’s Request for Final Examination or Request for Final Examination Exemption is approved by the Office of Graduate and Professional Studies.

Credit Requirement
A minimum of 39 semester credit hours of approved courses and research is required for the thesis option MSN in Nursing Education.

A minimum of 36 semester credit hours of approved coursework is required for the Non-Thesis Option.

Ordinarily the student will devote the major portion of his or her time to work in one or two closely related fields. Other work will be in supporting fields of interest.

Transfer of Credit
A student who has earned 12 hours of graduate credit in residence at Texas A&M University may be authorized to transfer courses in excess of the limits prescribed below upon the advice of the advisory committee and with the approval of the Office of Graduate and Professional Studies. Courses taken in residence at an accredited U.S. institution or approved international institution with a final grade of B or greater may be considered for transfer credit if, at the time the courses were completed, the courses would be accepted for credit toward a similar degree for a student in degree-seeking status at the host institution. Otherwise, the limitations stated in the following section apply. Coursework in which no formal grades are given or in which grades other than letter grades (A or B) are earned (for example, CR, P, S, U, H, etc.) is not accepted for transfer credit. Courses appearing on the degree plan with grades of D, F or U may not be absolved by transfer work. Credit for thesis research or the equivalent is not transferable. Credit for coursework submitted for transfer from any college or university must be shown in semester credit hours or equated to semester credit hours. An official transcript from the university at which the transfer coursework was taken must be sent directly to the Office of Admissions.

Courses used toward a degree at another institution may not be applied for graduate credit. If the course to be transferred was taken prior to the conferral of a degree at the transfer institution, a letter from the registrar at that institution stating that the course was not applied for credit toward the degree must be submitted to the Office of Graduate and Professional Studies.

Grades for courses completed at other institutions are not included in computing the GPR.

Limitations on the Use of Transfer, Extension and Certain Other Courses
Some departments may have more restrictive requirements for transfer work. If otherwise acceptable, certain courses may be used toward meeting credit-hour requirements for the master’s degree under the following limitations.

1. The maximum number of credit hours which may be considered for transfer credit is the greater of 12 hours or one-third (1/3) of the total hours of a degree plan. The following restrictions apply:
   • Graduate and/or upper-level undergraduate courses taken in residence at an accredited U.S. institution, or approved international institution with a final grade of B or greater will be considered for transfer credit if, at the time the courses were completed, the student was in degree-seeking status at Texas A&M University, or the student was in degree-seeking status at the institution at which the courses were taken; and if the courses would be accepted for credit toward a similar degree for a student in degree-seeking status at the host institution.
   • Courses previously used for another degree are not acceptable for degree plan credit.
2. The maximum number of credit hours taken in post-baccalaureate non-degree (G6) classification at Texas A&M University which may be considered for application to the degree plan is 12.

3. Not more than 12 hours may be used in any combination of the following categories:
   - Not more than 8 hours in the combination of 691 (research), 684 (Professional Internship) or SOH 680 may be used.
   - Not more than 8 hours of 685 (Directed Studies) may be used.
   - Not more than 3 hours of 690 (Theory of Research) may be used.
   - Not more than 3 hours of 695 (Frontiers in Research) may be used.

4. A maximum of 2 hours of Seminar (681).

5. A maximum of 9 hours of advanced undergraduate courses (300- or 400-level).

6. For graduate courses of three weeks' duration or less, taken at other institutions, up to 1 hour of credit may be obtained for each five-day week of coursework. Each week of coursework must include at least 15 contact hours.

7. Continuing education courses may not be used for graduate credit.

8. Extension courses are not acceptable for credit.

Exceptions will be permitted only in unusual cases and when petitioned by the student's advisory committee and approved by the Office of Graduate and Professional Studies.

### Thesis Option

An acceptable thesis is required for the Master of Science in Nursing degree for a student who selects the thesis option program. The finished work must reflect a comprehensive understanding of the pertinent literature and express in clear English, the problem(s) for study, the method, significance and results of the student's original research. Guidelines for the preparation of the thesis are available in the *Thesis Manual*, which is available online at the Office of Graduate and Professional Studies (http://ogaps.tamu.edu) website.

After successful defense (or exemption) and approval by the student's advisory committee and the head of the student's major department (or chair of the intercollegiate faculty, if appropriate), the student must submit his/her thesis in electronic format as a single PDF file. The PDF file must be uploaded to the Office of Graduate and Professional Studies (http://ogaps.tamu.edu) website. Additionally, a signed paper approval form with original signatures must be received by the Office of Graduate and Professional Studies. The PDF file and the signed approval form are required by the deadline.

Deadline dates for submitting the thesis are announced each semester or summer term in the "Office of Graduate and Professional Studies Calendar" (see Time Limit statement). These dates also can be accessed via the Office of Graduate and Professional Studies (http://ogaps.tamu.edu) website.

Each student who submits a document for review is assessed a one-time thesis/dissertation processing fee through Student Business Services. This processing fee is for the thesis/dissertation services provided. After commencement, theses and dissertations are digitally stored and made available through the Texas A&M Libraries.

A thesis that is deemed unacceptable by the Office of Graduate and Professional Studies because of excessive corrections will be returned to the student's department head (or chair of the intercollegiate faculty, if applicable). The manuscript must be resubmitted as a new document, and the entire review process must begin again. All original submittal deadlines must be met during the resubmittal process to graduate that semester.

### Thesis Proposal

For the thesis option Master of Science in Nursing degree, the student must prepare a thesis proposal for approval by the advisory committee and the head of the major department or chair of the interdisciplinary faculty, if applicable. This proposal must be submitted to the Office of Graduate and Professional Studies at least 20 working days prior to the submission of the request for the final examination.

Compliance issues must be addressed if a graduate student is performing research involving human subjects, animals, infectious biohazards and recombinant DNA. A student involved in these types of research should check with the Office of Research Compliance and Biosafety at (979) 458-1467 to address questions about all research compliance responsibilities. Additional information can also be obtained on the Office of Research Compliance and Biosafety (http://rcb.tamu.edu) website.

### Final Examination/Thesis Defense

A student must pass a final examination by dates announced each semester or summer term in the Office of Graduate and Professional Studies Calendar. To be eligible to take the final examination, a student's GPR must be at least 3.000 for courses on the degree plan and for all courses completed at Texas A&M which are eligible to be applied to a graduate degree, and there must be no unabsolved grades of D, F or U for any course listed on the degree plan. To absolve a deficient grade, the student must repeat the course at Texas A&M University and achieve a grade of C or better. All coursework on the degree plan must have been completed within the exception of those hours for which the student is registered. For thesis-option students, an approved thesis proposal must be on file in the Office of Graduate and Professional Studies according to published deadlines prior to the final examination or submission of the request for exemption from the final examination.

A request to hold and announce the final examination must be submitted to the Office of Graduate and Professional Studies a minimum of 10 working days in advance of the scheduled date for the examination. The Office of Graduate and Professional Studies must be notified in writing of any cancellations. A student may be given only one opportunity to repeat the final examination for the master's degree and that must be within a time period that does not extend beyond the end of the next regular semester (summer terms are excluded).

For thesis option students, the final examination covers the thesis and all work taken on the degree plan and at the option of the committee may be written or oral or both. The final examination may not be administered before the thesis is available to all members of the student's advisory committee in substantially final form, and all members have had adequate time to review the document. The examination is conducted by the student's advisory committee as finally constituted. A thesis option student must be registered in the University in the semester or summer term in which the final examination is taken. Persons other than members of the graduate faculty may, with mutual consent of the candidate and the major professor, attend final examinations for advanced degrees. Upon completion of the questioning of the candidate, all visitors must excuse themselves from the proceedings. A positive vote by all members of the graduate committee with at most one dissension is required to pass a student on his or her exam. A department, or interdisciplinary degree program, may have a stricter requirement...
provided there is consistency within all degree programs within a department or interdisciplinary degree program.

The Report of the Final Examination Form must be submitted with original signatures of only the committee members approved by the Office of Graduate and Professional Studies. If an approved committee member substitution (1 only) has been made, his/her signature must also be submitted to the Office of Graduate and Professional Studies. If necessary, multiple copies of the form may be submitted with different committee member original signatures. If an approved committee member substitution (1 only) has been made, his/her signature must be included on the form submitted to the Office of Graduate and Professional Studies.

A thesis option candidate may petition to be exempt from his/her final examination provided his/her degree plan GPR is 3.500 or greater and he/she has the approval of the advisory committee, the head of the student's major department, or intercollegiate chair, if appropriate, and the Office of Graduate and Professional Studies. It is required that the petition for exemption be submitted the same semester the student intends to submit the thesis.

**Non-Thesis Option**

A final comprehensive examination is not required for the MSN with a major in Nursing Education non-thesis option.

A student pursuing the non-thesis option is not allowed to enroll in 691 (research) for any reason and 691 may not be used for credit toward a non-thesis option Master of Science in Nursing degree. A maximum of 4 credit hours of 684 (Professional Internship), 8 credit hours of 685 (Directed Studies), and up to 3 credit hours of 690 (Theory of Research) or 695 (Frontiers in Research) may be used toward the non-thesis option Master of Science in Nursing degree. In addition, any combination of 684, 685, 690 and 695 may not exceed 25 percent of the total credit hour requirement shown on the individual degree plan. All requirements for the non-thesis option Master of Science in Nursing degree other than those specified above are the same as for the thesis option degree.

**Additional Requirements**

**Residence**

In partial fulfillment of the residence requirement for the degree of Master of Science in Nursing, the student must complete 9 resident credit hours during one regular semester or one 10-week summer semester in resident study at Texas A&M University. Upon recommendation of the student’s advisory committee, department head or Chair of the Interdisciplinary Program, if appropriate, and with approval of the Office of Graduate and Professional Studies, a student may be granted exemption from this requirement. Such a petition, however, must be approved prior to the student’s registration for the final 9 credit hours of required coursework.

Students who are employed full-time while completing their degree may fulfill total residence requirements by completion of less-than-full time course loads each semester. In order to be considered for this, the student is required to submit a Petition for Waivers and Exceptions along with verification of his/her employment to the Office of Graduate and Professional Studies.

See Residence Requirements (http://catalog.tamu.edu/graduate/academic-expectations-general-degree-requirements/degree-requirements).

**Continuous Registration**

A student in the thesis option of the Master of Science in Nursing program who has completed all coursework on his/her degree plan other than 5V98, 5V99, and 691 (research) is required to be in continuous registration until all requirements for the degree have been completed. See Continuous Registration Requirements (http://catalog.tamu.edu/graduate/academic-expectations-general-degree-requirements/registration-academic-status).

**Time Limit**

All degree requirements must be completed within a period of seven consecutive years for the degree to be granted. A course will be considered valid until seven years after the end of the semester in which it is taken. Graduate credit for coursework which is more than seven calendar years old at the time of the final examination (oral or written) may not be used to satisfy degree requirements.

A student who has chosen the thesis option must have the final corrected version of the thesis cleared by the Office of Graduate and Professional Studies no later than one year after the final examination, or approval of a petition for exemption from the final exam, or within the seven-year time limit, whichever occurs first. Failure to do so will result in the degree not being awarded.

**Foreign Languages**

No specific language requirement exists for the Master of Science in Nursing degree.

**Application for Degree**

For information on applying for your degree, please visit the Graduation Application for Degree (p. 26) section.

**Forensic Healthcare - Certificate**

**Overview**

The College of Nursing offers a Forensic Healthcare Certificate program. The Forensic Health Care Certificate is open to health care workers, protective service investigators/case workers, social workers, law enforcement, prosecutors and other professionals who wish to assist victims of violence and trauma who hold a master’s degree.

About the College of Pharmacy

The Irma Lerma Rangel College of Pharmacy offers a Doctor of Pharmacy (Pharm. D.) degree program. The primary goal of the program is to provide a comprehensive pharmacy education in a stimulating environment to prepare students for the practice of pharmacy as competent, caring, ethical professionals dedicated to the provision of optimal pharmaceutical care.

Students enrolled in this program are exposed to a core professional curriculum that includes coursework in the biomedical sciences; pharmaceutical sciences; social, behavioral and administrative pharmacy sciences; and pharmacy practice. The curriculum consists of 146 semester credit hours (SCH) and is organized so that students progress from didactic and laboratory coursework in pharmaceutical and clinical sciences to summative experiential rotations. This total includes 103 SCH of the core curriculum (required courses), six SCH of elective courses, 37 SCH of experiential education (hands-on clinical experiences) and one SCH of capstone. The fourth year focuses on Advanced Pharmacy Practice Experiences where students apply and further develop the knowledge and skills gained during the first three years of the program.

Only those students who are admitted into the Irma Lerma Rangel College of Pharmacy may enroll in courses. All pre-pharmacy coursework must be completed prior to the beginning of the first professional year (P1). Advancement to subsequent professional years (P2, P3, and P4) is determined by successful completion of all designated prerequisites and all prescribed coursework for that year. Students with unsatisfactory academic performance may not progress to the next year, may be required to remediate deficiencies, or repeat the year in which the deficiencies occurred.

Courses that comprise the core curriculum include both required and elective coursework and are described below.

Curricular Changes

The Irma Lerma Rangel College of Pharmacy program is subject to ongoing evaluation as mandated by the Accreditation Council for Pharmacy Education (ACPE). The Accreditation/Self-Study Committee follows the Guidelines for Self-Study from ACPE. It should be noted that these guidelines call for ongoing assessment rather than point-in-time assessment of program elements. This committee reports to the dean, who is responsible for taking action on the findings and recommendations of the committee. Proposals for curricular modification emanating from these self-study processes are carefully deliberated by the entire faculty. While the curriculum and program of study detailed within this document were accurate at the time of publication, the college reserves the right to make modifications without advance notice.

Course Credits

The learning format of the class governs the number of Semester Credit Hours (SCH) a particular course is given. The following guidelines were used to make these determinations:

- Didactic Courses: 1 x 50 minutes = 1 Semester Credit Hour
- Seminar Courses: 2 x 50 minutes = 1 Semester Credit Hour
- Laboratory Courses: 3-4 x 50 minutes = 1 Semester Credit Hour
- Recitation Courses: 3-4 x 50 minutes = 1 Semester Credit Hour (e.g., case studies)
- Experiential Courses: 8 x 50 minutes = 1 Semester Credit Hour

For experiential courses, semester credit hours assigned are described in the course syllabus and typically 8 or more 50 minute sessions equals 1 semester credit hour.

Admission Information (p. 41)

First Professional Doctoral

- Doctor of Pharmacy in Pharmacy (p. 1169)

Interdepartmental Degree Programs

- Doctor of Pharmacy in Pharmacy (p. 1169)

Doctor of Pharmacy

The Doctor of Pharmacy (Pharm.D.) degree program aims to increase representation in the pharmacy profession by the traditionally underrepresented demographic groups of South Texas, provide the population of South Texas access to a high quality Pharm.D. program, support advanced research in pharmaceutical care issues pertinent to South Texas, enhance health outcomes, and expand the scope and depth of regional health care service activities.

Educational Objectives
The Irma Lerma Rangel College of Pharmacy prepares entry-level pharmacy practitioners with the essential abilities necessary to be competent professionals, as evidenced by the ability to pass the national licensing exam (NAPLEX) on the first attempt.

The required core competencies to be attained by Pharm.D. students are grouped into the following categories:

- Communicating with patients and health professionals
- Applying basic science to practice
- Problem-solving and decision-making
- Dispensing pharmaceuticals
- Providing pharmaceutical care
- Performing professionally and ethically
- Managing and supervising within pharmacy practice

Each of the above categories has specific learning objectives that each student is expected to satisfy over his or her course of study.

**Program Requirements**

Courses that comprise the core curriculum of the Irma Lerma Rangel College of Pharmacy curriculum leading to the Doctor of Pharmacy degree are described below. The core includes both required and elective coursework. The courses below are listed by year and consist of didactic, laboratory, practice experience (introductory and advanced) and post-experiential offerings. Each course is shown with designations of pre- and/or corequisites where applicable.

of the following requirements to be eligible to graduate:

A candidate for the Doctor of Pharmacy (Pharm. D.) degree must meet all
Requirements for Graduation

The learning format of the class governs the number of Semester Credit
Hours (SCH) a particular course is given. The following guidelines were
used to make these determinations:

- Didactic Courses: 1 x 50 minutes = 1 Semester Credit Hour
- Seminar Courses: 2 x 50 minutes = 1 Semester Credit Hour
- Laboratory Courses: 3-4 x 50 minutes = 1 Semester Credit Hour
- Recitation Courses: 3-4 x 50 minutes = 1 Semester Credit Hour (e.g.,
case studies)
- Experiential Courses: $1 x 50 minutes = 1 Semester Credit Hour

1 For experiential courses, semester credit hours assigned are
described in the course syllabus and typically 8 or more 50 minute
sessions equals 1 semester credit hour.

Requirements for Graduation

A candidate for the Doctor of Pharmacy (Pharm. D.) degree must meet all
of the following requirements to be eligible to graduate:

- Satisfactorily meeting all requirements for admission
- Satisfactorily complete all curriculum requirements including:
  - the total number of semester credit hours
  - all specified didactic and experiential coursework
  - passing all applicable comprehensive benchmark assessment
    activities
  - completion of all final administrative or other requirements (e.g.,
    final debts to the college or Texas A&M University)
- Satisfactorily complete all Student Portfolio assignments
- Have a cumulative grade point average of 2.3 or higher for the total
degree program requirements
- Complete all immunization certification requirements
- Complete an exit interview with the Texas A&M University
  Scholarships & Financial Aid and the college’s Office of Student
  Affairs
- Submit a graduation application by the due date to the Texas A&M
  University Office of the Registrar

- Pay any required graduation fees or outstanding debts to the Texas
  A&M University Student Business Services

A student failing to meet any of these requirements may not graduate
until ALL requirements are met.

School of Public Health

http://sph.tamhsc.edu

Administrative Officers

- Dean - Jay Maddock, Ph.D., FAAHB
- Associate Dean for Academic Affairs – Amy L. Fairchild, Ph.D, M.P.H.
- Associate Dean for Climate and Diversity – Lisako McKyer, Ph.D, M.P.H.
- Associate Dean for Public Health Practice - Jennifer Griffith, Dr.P.H.

General Statement

Founded in 1998 as the first public health school in the nation with a
focus on rural and underserved communities, the School of Public Health
developed into a nationally ranked, fully accredited public health research,
service and training program. After only nine years, U.S. News & World
Report ranked the school as a Top 25 Graduate School in Public Health.

Offering classes at the College Station campus as well as other Texas
locations through distance education, the school provides graduate level
programs including two master’s degrees (Master of Public Health and
Master of Health Administration) in several public health disciplines:
epidemiology, biostatistics, environmental health, occupational safety
and health, health administration, policy and management, and health
promotion and community health sciences. The school also offers
a Doctor of Public Health with a concentration in epidemiology and
environmental health, a Doctor of Public Health with a concentration
in health promotion and community health sciences, and a Doctor of
Philosophy in health services research.

The school provides an excellent forum for tomorrow’s public health
leaders to engage in a learning environment that builds on a wide
array of research strengths and scholarly inquiry of a stellar faculty
(seven of whom have received the prestigious designations of Regents
Professors and two Distinguished Professors). Further, the research and
practice links established by the faculty provide an extensive diversity of
opportunities for students to work closely with professionals in applied
public health settings.

Location

The School of Public Health’s administration and faculty are located in a
state-of-the-art, three-building complex in College Station, on the Texas
A&M University west campus. The nearly 100,000-square-foot complex
includes classrooms fully equipped with videoconferencing technology
to support the school’s innovative distance education programs that
reach across the breadth of the state. The laboratory building provides
a venue for the school’s internationally regarded toxicology group to
engage in exemplary public health work and provides a vehicle for
training tomorrow’s researchers. The administration building houses
the administration and faculty. In addition, the school operates on-going regional instructional and research programs in McAllen.

Doctor of Public Health in Epidemiology and Environmental Health

The Doctor of Public Health (DrPH) is an advanced professional degree for those whose career goals are in the area of professional practice in public health, including current and potential leaders in public health practice. The DrPH prepares candidates for a career in high-level administration, teaching, or practice, where advance analytical and conceptual capabilities are requisite.

Applicants may choose a major in Health Promotion and Community Health Sciences or Epidemiology and Environmental Health. Applicants choosing the Epidemiology and Environmental Health may choose to focus on either epidemiology or environmental health concentration areas.

The programs are designed for the practitioner; a graduate may be expected to fill instructional, supervisory, and administrative positions in which educational services are to be rendered.

Applicants to the DrPH will hold a master’s degree. For further information regarding admission, please visit http://sph.tamhsc.edu/future.

Although substantively different from the PhD degree in education, the DrPH degree requires equivalent admission qualifications, standards of scholarship and breadth and depth of study. For additional requirements, see the department doctoral handbook.

Because graduates of the program are expected to demonstrate a high level of professional skill and educational statesmanship, only those candidates who show a consistently high level of professional performance in their academic studies, in their role-related studies, in their internship experience, and in the completion of their records of study will be recommended for the degree.

Steps to Fulfill Doctoral Degree Requirements

1. Meet with departmental/intercollegiate graduate advisor to plan course of study for first semester. When: Before first semester registration. Approved by: Graduate advisor.

2. Establish advisory committee. Submit a degree plan. When: Prior to the deadline imposed by the student’s college or intercollegiate programs, and no later than 90 days prior to preliminary examination. Approved by: Advisory committee, department head or intercollegiate faculty chair, and Office of Graduate and Professional Studies (OGAPS).

3. Complete course work detailed on the approved degree plan. Before preliminary exam.

Note: Once formal coursework is complete, you must be continuously registered until all degree requirements have been met. This includes submission and clearance of the dissertation or record of study. See Continuous Registration Requirements (p. 28).

For degree curriculum, see the Department of Environmental and Occupational Health (http://sph.tamhsc.edu/eh) or Department of Epidemiology and Biostatistics (http://sph.tamhsc.edu/epi-bio).

**Program Requirements**

**Program Requirements**

- Student’s Advisory Committee (p. 1173)
- Degree Plan (p. 1174)
- Transfer of Credit (p. 1174)
- Research Proposal (p. 1174)
- Examinations (p. 1175)
  - Preliminary Examination (p. 1175)
  - Preliminary Examination Format (p. 1175)
  - Preliminary Examination Scheduling (p. 1175)
  - Report of Preliminary Examination (p. 1175)
  - Retake of Failed Preliminary Examination (p. 1176)
  - Final Examination (p. 1176)
  - Report of Final Examination (p. 1176)
- Dissertation (p. 1176)

**Student’s Advisory Committee**

After receiving admission to graduate studies and enrolling, the student will consult with the head of his or her major or administrative department (or chair of the intercollegiate faculty) concerning appointment of the chair of the advisory committee. The student’s advisory committee will consist of no fewer than four members of the graduate faculty representative of the student’s several fields of study and research, where the chair or co-chair must be from the student’s department (or intercollegiate faculty, if applicable), and at least one or more of the members must have an appointment to a department other than the student’s major department. The outside member for a student in an interdisciplinary degree program must be from a department different from the chair of the student’s committee.
The chair, in consultation with the student, will select the remainder of the advisory committee. Only graduate faculty members located on the respective Texas A&M University campuses may serve as chair of a student’s advisory committee. Other Texas A&M University graduate faculty members located off-campus may serve as a member or co-chair (but not chair), with a member as the chair.

If the chair of a student’s advisory committee voluntarily leaves the University and the student is near completion of the degree and wants the chair to continue to serve in this role, the student is responsible for securing a current member of the University Graduate Faculty, from the student’s academic program and located near the Texas A&M University campus site, to serve as the co-chair of the committee. The Department Head or Chair of Intercollegiate faculty may request in writing to the Associate Provost for Graduate and Professional Studies that a faculty member who is on an approved leave of absence or has voluntarily separated from the university, be allowed to continue to serve in the role of chair of a student’s advisory committee without a co-chair for us to one year. The students should be near completion of the degree. Extensions beyond the one year period can be granted with additional approval of the Dean.

The committee members’ signatures on the degree plan indicate their willingness to accept the responsibility for guiding and directing the entire academic program of the student and for initiating all academic actions concerning the student. Although individual committee members may be replaced by petition for valid reasons, a committee cannot resign en masse. The chair of the committee, who usually has immediate supervision of the student’s research and dissertation or record of study, has the responsibility for calling all meetings of the committee. The duties of the committee include responsibility for the proposed degree plan, the research proposal, the preliminary examination, the dissertation or record of study and the final examination. In addition, the committee, as a group and as individual members, is responsible for counseling the student on academic matters, and, in the case of academic deficiency, initiating recommendations to the Office of Graduate and Professional Studies.

Degree Plan

The student’s advisory committee will evaluate the student’s previous education and degree objectives. The committee, in consultation with the student, will develop a proposed degree plan and outline a research problem which, when completed, as indicated by the dissertation will constitute the basic requirements for the degree. The degree plan must be filed with the Office of Graduate and Professional Studies prior to the deadline imposed by the student’s college and no later than 90 days prior to the preliminary examination.

This proposed degree plan should be submitted through the online Document Processing Submission System located on the website https://ogsdpss.tamu.edu. A minimum of 64 hours is required on the degree plan for the Doctor of Public Health for a student who has completed a master’s degree. A student who has completed a DDS/DMD, DVM or a MD at a U.S. institution is also required to complete a minimum of 64 hours. A student who has completed a baccalaureate degree but not a master’s degree will be required to complete a 96-hour degree plan. Completion of DDS/DMD, DVM or MD degrees at a foreign institution requires completion of a minimum of 96 hours for the Doctor of Public Health. A field of study may be primarily in one department or in a combination of departments. A degree plan must carry a reasonable amount of 691 (Research).

Additional coursework may be added by petition to the approved degree plan by the student’s advisory committee if it is deemed necessary to correct deficiencies in the student’s academic preparation. No changes can be made to the degree plan once the student’s Request for Final Examination or Request for Final Examination Exemption is approved by the Office of Graduate and Professional Studies.

Approval to enroll in any professional course (900-level) should be obtained from the head of the department (or Chair of the intercollegiate faculty, if applicable) in which the course will be offered before including such a course on a degree plan.

No credit may be obtained by correspondence study, by extension or for any course of fewer than three weeks duration.

Transfer of Credit

Courses for which transfer credits are sought must have been completed with a grade of B or greater and must be approved by the student’s advisory committee and the Office of Graduate and Professional Studies. These courses must not have been used previously for another degree. Except for officially approved cooperative doctoral programs, credit for thesis or dissertation research or the equivalent is not transferable. Credit for “internship” coursework in any form is not transferable. Courses taken in residence at an accredited U.S. institution or approved international institution with a final grade of B or greater will be considered for transfer credit if, at the time the courses were completed, the courses would be accepted for credit toward a similar degree for a student in degree-seeking status at the host institution. Credit for coursework taken by extension is not transferable. Coursework in which no formal grades are given or in which grades other than letter grades (A or B) are earned (for example, CR, P, S, U, H, etc.) is not accepted for transfer credit. Credit for coursework submitted for transfer from any college or university must be shown in semester credit hours, or equated to semester credit hours.

Courses used toward a degree at another institution may not be applied for graduate credit. If the course to be transferred was taken prior to the conferral of a degree at the transfer institution, a letter from the registrar at that institution stating that the course was not applied for credit toward the degree must be submitted to the Office of Graduate and Professional Studies.

Grades for courses completed at other institutions are not included in computing the GPR. An official transcript from the university at which transfer courses are taken must be sent directly to the Office of Admissions.

Research Proposal

The general field of research to be used for the dissertation should be agreed on by the student and the advisory committee at their first meeting, as a basis for selecting the proper courses to support the proposed research.

As soon thereafter as the research project can be outlined in reasonable detail, the dissertation research proposal should be completed. The research proposal should be approved at a meeting of the student’s advisory committee, at which time the feasibility of the proposed research and the adequacy of available facilities should be reviewed. The approved proposal, signed by all members of the student’s advisory committee, the head of the student’s major department (or chair of the intercollegiate faculty, if applicable), must be submitted to the Office of
Graduate and Professional Studies at least 20 working days prior to the submission of the Request for the Final Examination.

Compliance issues must be addressed if a graduate student is performing research involving human subjects, animals, infectious biohazards or recombinant DNA. A student involved in these types of research should check with the Office of Research Compliance and Biosafety at (979) 458-1467 to address questions about all research compliance responsibilities. Additional information can also be obtained on the website http://rcb.tamu.edu.

Examinations

Preliminary Examination for Doctoral Students
The student's major department (or chair of the interdisciplinary degree program faculty, if applicable) and his or her advisory committee may require qualifying, cumulative or other types of examinations at any time deemed desirable. These examinations are entirely at the discretion of the department and the student's advisory committee.

The preliminary examination is required. The preliminary examination for a doctoral student shall be given no earlier than a date at which the student is within 6 credit hours of completion of the formal coursework on the degree plan (i.e., all coursework on the degree plan except 681, 684, 690, 691, 692, 693, 695, 697, 791, or other graduate courses specifically designated as S/U in the course catalog). The student should complete the Preliminary Examination no later than the end of the semester following the completion of the formal coursework on the degree plan.

Preliminary Examination Format
The objective of preliminary examination is to evaluate whether the student has demonstrated the following qualifications:

- a mastery of the subject matter of all fields in the program;
- an adequate knowledge of the literature in these fields and an ability to carry out bibliographical research;
- an understanding of the research problem and the appropriate methodological approaches.

The format of the preliminary examination shall be determined by the student's department (or interdisciplinary degree program, if applicable) and advisory committee, and communicated to the student in advance of the examination. The exam may consist of a written component, oral component, or combination of written and oral components.

The preliminary exam may be administered by the advisory committee or a departmental committee; herein referred to as the examination committee.

Regardless of exam format, a student will receive an overall preliminary exam result of pass or fail. The department (or interdisciplinary degree program, if applicable) will determine how the overall pass or fail result is determined based on the exam structure and internal department procedures. If the exam is administered by the advisory committee, each advisory committee member will provide a pass or fail evaluation decision.

Only one advisory committee substitution is allowed to provide an evaluation decision for a student's preliminary exam, and it cannot be the committee chair.

If a student is required to take, as a part of the preliminary examination, a written component administered by a department or interdisciplinary degree program, the department or interdisciplinary degree program faculty must:

- offer the examination at least once every six months. The departmental or interdisciplinary degree program examination should be announced at least 30 days prior to the scheduled examination date.
- assume the responsibility for marking the examination satisfactory or unsatisfactory, or otherwise graded, and in the case of unsatisfactory, stating specifically the reasons for such a mark.

Preliminary Examination Scheduling
Prior to commencing any component of the preliminary examination, a departmental representative or the advisory committee chair will review the eligibility criteria with the student, using the Preliminary Examination Checklist to ensure the student is eligible for the preliminary examination. The following list of eligibility requirements applies.

- Student is registered at Texas A&M University for a minimum of one semester credit hour in the long semester or summer term during which any component of the preliminary examination is held. If the entire examination is held between semesters, then the student must be registered for the term immediately preceding the examination.
- An approved degree plan is on file with the Office of Graduate and Professional Studies prior to commencing the first component of the examination.
- Student's cumulative GPR is at least 3.000.
- Student's degree plan GPR is at least 3.000.
- All English language proficiency requirements are satisfied.
- At the end of the semester in which at least the first component of the exam is given, there are no more than 6 hours of coursework remaining on the degree plan (except 681, 684, 690, 691, 692, 693, 695, 697, 791, or other graduate courses specifically designated as S/U in the course catalog). The head of the student's department (or Chair of the Interdisciplinary Degree Program, if applicable) has the authority to approve a waiver of this criterion.

Report of Preliminary Examination
Credit for the preliminary examination is not transferable in cases where a student changes degree programs after passing a preliminary exam.

If a written component precedes an oral component of the preliminary exam, the chair of the student's examination committee is responsible for making all written examinations available to all members of the committee. A positive evaluation of the preliminary exam by all members of a student's examination committee with at most one dissension is required to pass a student on his or her preliminary exam.

The student's department will promptly report the results of the Preliminary Examination to the Office of Graduate and Professional Studies via the Report of Doctoral Preliminary Examination form. The Preliminary Examination checklist form must also be submitted. These forms should be submitted to the Office of Graduate and Professional
Studies within 10 working days of completion of the preliminary examination.

The Report of the Preliminary Examination form must be submitted with original signatures of the approved examination committee members. If an approved examination committee member substitution (one only) has been made, that signature must also be included, in place of the committee member, on the form submitted to the Office of Graduate and Professional Studies. The original signature of the department head is also required on the form.

After passing the required preliminary examination for the doctoral degree, the student must complete the final examination for the degree within four calendar years. Otherwise, the student will be required to repeat the preliminary examination.

Retake of Failed Preliminary Examination

Upon approval of the student's examination committee, with no more than one member dissenting, and approval of the Office of Graduate and Professional Studies, a student who has failed the preliminary examination may be given one re-examination. Adequate time must be given to permit the student to address the inadequacies emerging from the first preliminary examination. The examination committee must agree upon and communicate in writing to the student, an adequate time-frame from the first examination (normally six months) to retest, as well as a detailed explanation of the inadequacies emerging from the examination. The student and the committee should jointly negotiate a mutually acceptable date for this retest. When providing feedback on inadequacies, the committee should clearly document expected improvements that the student must be able to exhibit in order to retake the exam. The examination committee will document and communicate the time-frame and feedback within 10 working days of the exam that was not passed.

Final Examination for Doctoral Students

The candidate for the doctoral degree must pass a final examination by deadline dates announced in the "Office of Graduate and Professional Studies Calendar" each semester. The doctoral student is allowed only one opportunity to take the final examination.

No unabsolved grades of D, F, or U for any course can be listed on the degree plan. The student must be registered for any remaining hours of 681, 684, 690, 691, 692, 791 or other graduate courses specifically designated as S/U in the course catalog during the semester of the final exam. No student may be given a final examination until they have been admitted to candidacy and their current official cumulative and degree plan GPAs are 3.00 or better.

To be admitted to candidacy for a doctoral degree, a student must have:

1. completed all formal coursework on the degree plan with the exception of any remaining 681, 684, 690 and 691, 692 (Professional Study), or 791 hours,
2. a 3.0 Graduate GPA and a Degree Plan GPA of at least 3.0 with no grade lower than C in any course on the degree plan,
3. passed the preliminary examination,
4. submitted an approved dissertation proposal,
5. met the residence requirements.

The request to hold and announce the final examination must be submitted to the Office of Graduate and Professional Studies a minimum of 10 working days in advance of the scheduled date. Any changes to the degree plan must be approved by the Office of Graduate and Professional Studies prior to the submission of the request for final examination.

The student’s advisory committee will conduct this examination. The final examination is not to be administered until the dissertation or record of study is available in substantially final form to the student’s advisory committee, and all concerned have had adequate time to review the document. Whereas the final examination may cover the broad field of the candidate’s training, it is presumed that the major portion of the time will be devoted to the dissertation and closely allied topics. Persons other than members of the graduate faculty may, with mutual consent of the candidate and the chair of the advisory committee, be invited to attend a final examination for an advanced degree. A positive vote by all members of the graduate committee with at most one dissension is required to pass a student on his or her exam. A department can have a stricter requirement provided there is consistency within all degree programs in a department. Upon completion of the questioning of the candidate, all visitors must excuse themselves from the proceedings.

Report of Final Examination

The student’s department will promptly report the results of the Final Examination to the Office of Graduate and Professional Studies via the Report of Doctoral Final Examination form. These forms should be submitted to the Office of Graduate and Professional Studies within 10 working days of completion of the final examination. The Office of Graduate and Professional Studies must be notified in writing of any cancellations.

A positive evaluation of the final exam by all members of a student’s advisory committee with at most one dissension is required to pass a student on his or her final exam. The Report of the Final Examination Form must be submitted with original signatures of only the committee members approved by the Office of Graduate and Professional Studies. If necessary, multiple copies of the form may be submitted with different committee member original signatures. If an approved committee member substitution (1 only) has been made, his/her signature must be included on the form submitted to the Office of Graduate and Professional Studies.

Dissertation

The ability to perform independent research must be demonstrated by the dissertation, which must be the original work of the candidate. Whereas acceptance of the dissertation is based primarily on its scholarly merit, it must also exhibit creditable literary workmanship. The format of the dissertation must be acceptable to the Office of Graduate and Professional Studies. Guidelines for the preparation of the dissertation are available in the Thesis Manual, which is available online athttp://ogaps.tamu.edu.

After successful defense and approval by the student’s advisory committee and the head of the student’s major department (or chair of the intercollegiate faculty, if applicable), a student must submit his/her dissertation in electronic format as a single PDF file. The PDF file must be uploaded to the website, http://ogaps.tamu.edu. Additionally, a signed paper approval form with original signatures must be received by the Office of Graduate and Professional Studies. Both the PDF file and the signed approval form are required by the deadline.
Additional Requirements

Additional Requirements

- Residence (p. 1177)
- Time Limit (p. 1177)
- Continuous Registration (p. 1177)
- Admission to Candidacy (p. 1177)
- Foreign Languages (p. 1177)
- Internship or Practicum (p. 1177)
- 130 Hour Cap (for DrPH) (p. 1178)
- Application for Degree (p. 1178)

Residence

A student who enters the doctoral degree program with a baccalaureate degree must spend one academic year plus one semester in resident study at Texas A&M University. A student who holds master’s degree when he/she enters doctoral degree program must spend one academic year in resident study. One academic year may include two adjacent regular semesters or one regular semester and one adjacent 10-week summer semester. The third semester is not required to be adjacent to the one year. Enrollment for each semester must be a minimum of 9 credit hours each to satisfy the residence requirement.

To satisfy the residence requirement, the student must complete a minimum of 9 credit hours per semester or 10-week summer semester in resident study at Texas A&M University for the required period. A student who enters a doctoral degree program with a baccalaureate degree may fulfill residence requirements in excess of one academic year (18 credit hours) by registration during summer sessions or by completion of a less-than-full course load (in this context a full course load is considered 9 credit hours per semester).

Students who are employed full-time while completing their degree may fulfill total residence requirements by completion of less-than-full time course loads each semester. In order to be considered for this, the student is required to submit a Petition for Waivers and Exceptions along with verification of his/her employment to the Office of Graduate and Professional Studies. An employee should submit verification of his/her employment at the time he/she submits the degree plan. See Registration. (p. 28)

See Residence Requirements (p. 22).

Time Limit

All requirements for doctoral degrees must be completed within a period of 10 consecutive calendar years for the degree to be granted. A course will be considered valid until 10 years after the end of the semester in which it is taken. Graduate credit for coursework more than 10 calendar years old at the time of the final oral examination may not be used to satisfy degree requirements.

After passing the required preliminary oral and written examinations for a doctoral degree, the student must complete the final examination within 4 calendar years. Otherwise, the student will be required to repeat the preliminary examination.

A final corrected version of the dissertation or record of study in electronic format as a single PDF file must be cleared by the Office of Graduate and Professional Studies no later than one year after the final examination or within the 10-year time limit, whichever occurs first. Failure to do so will result in the degree not being awarded.

Continuous Registration

A student in a program leading to a Doctor of Public Health who has completed all coursework on his/her degree plan other than 691 (Research) are required to be in continuous registration until all requirements for the degree have been completed. See Continuous Registration Requirements (p. 28).

Admission to Candidacy

To be admitted to candidacy for a doctoral degree, a student must have:

1. completed all formal coursework on the degree plan with the exception of any remaining 681, 684, 690, 691 and 791.
2. a 3.0 Graduate GPA and a Degree Plan GPA of at least 3.0 with no grade lower than C in any course on the degree plan,
3. passed the preliminary examination (written and oral portions),
4. submitted an approved dissertation proposal,
5. met the residence requirements.

The final examination will not be authorized for any doctoral student who has not been admitted to candidacy.

Foreign Languages

A student is required to possess a competent command of English. For English language proficiency requirements, see the Admissions section of this catalog. The doctoral (PhD) foreign language requirement at Texas A&M University is a departmental option, to be administered and monitored by the individual departments of academic instruction.

Internship or Practicum

Students in the DRPH are required to fulfill a practicum requirement. Specific course names and numbers by department are PHEB 684, PHEO 684, PHPM 684, and HPCH 684. Instructions on submission and successful completion of the practicum are posted on the School of Public Health practicum website as well as with the department’s practicum coordinator. Students are to work specifically with their department practicum coordinator on meeting this curriculum course requirement. Students must be in good academic standing, have completed all core public health courses, or be enrolled concurrently in no more than one core course at the time they enroll in the 684 course, and have no registration or university blocks related to enrollment.
There is a state mandated cap on number of hours a student can enroll in without penalty. The cap is currently 130 hours (approximately 5 and one-half years), and once students reach this cap, they are required to pay out-of-state tuition on all subsequent hours until they graduate.

Application for Degree
For information on applying for your degree, please visit the Graduation Application for Degree section.

130 Hour Cap (for DrPH)
There is a state mandated cap on number of hours a student can enroll in without penalty. The cap is currently 130 hours (approximately 5 and one-half years), and once students reach this cap, they are required to pay out-of-state tuition on all subsequent hours until they graduate.

Master of Health Administration

The Master of Health Administration (MHA) is a professional degree program intended for students to enter or continue administrative practice in health service related settings. The mission of the MHA program is to develop skilled health care leaders through education, research and service to advance the health of all populations.

There are two tracks that students can choose to earn the MHA degree: 1) Resident and 2) Executive.

The Resident track of the MHA program is a 55-credit hour program that can be completed in 21 months (full-time) or 33 months (part-time). This track seeks to prepare students for competitive opportunities post-graduation, including administrative fellowships and entry-level positions in health services organizations. The Resident track curriculum includes a practicum allowing students to apply foundational knowledge in a health services organization. Application to the Resident track of the MHA program requires successful completion (i.e., a grade of "B" or better) of three undergraduate prerequisites: economics, statistics, and managerial accounting or finance.

The Executive track of the MHA program is tailored to individuals who are already employed within the health care industry and have demonstrated managerial and leadership experience. While no course prerequisites are required, ideal applicants will have a minimum of five years of progressive work experience and are seeking to expand their formal knowledge and skill set. The Executive track of the MHA program is a 48-credit hour program and takes 24 months to complete. This track is taught one weekend a month, and is offered only at the Houston Campus of the Texas A&M University Health Science Center.

For degree curricula associated with either track, see Master of Health Administration program tracks (http://sph.tamhsce.edu/hpm/mha/mhatracks).

Program Requirements

Program Requirements

Student’s Advisory Committee (p. 1178)
Degree Plan (p. 1178)
Credit Requirements (p. 1178)
Transfer of Credit (p. 1178)
Limitations on the Use of Transfer, Extension and Certain Other Courses (p. 1179)

Student’s Advisory Committee
The Student Advisory Committee for the MHA consists of an assigned faculty advisor. After receiving admission to the program and before enrolling for coursework, the student will consult with their assigned faculty advisor to receive additional information related to curriculum and processing of the degree plan. The faculty advisor must have graduate faculty membership in the academic program. If at any point of the student’s time in pursuit of the degree the assigned advisor is no longer available, the department will assign a new advisor and require a comprehensive advisory session to ensure the student is making progress according to degree program requirements. Students in this degree program receive advising prior to all semesters.

Degree Plan

The student’s advisor, in consultation with the student, will develop the proposed degree plan. The degree plan must be completed and filed with the Office of Graduate and Professional Studies prior to the deadlines imposed by the student’s college, and no later than the dates announced in the Office of Graduate and Professional Studies calendar of deadlines for graduation.

The proposed/final degree plan should be submitted through the online Document Processing Submission System located on the website https://ogsdpss.tamu.edu.

Additional coursework may be added to the approved degree plan by petition if it is deemed necessary by the advisor to correct deficiencies in the student’s academic preparation.

Credit Requirement

A minimum of 55 hours of coursework is required for the resident track of the Master of Health Administration degree. To demonstrate integration and application of subject matter learned and the development of written and oral communication skills, a student will be required to successfully complete a Capstone course and practicum as part of the culminating experience requirement to graduate.

The Executive track of the MHA program is a 48-credit hour program. This track takes 24 months to complete, is taught one weekend a month, and is offered only at the Houston Campus of the Texas A&M University Health Science Center.

Transfer of Credit

A student may transfer up to 9 hours of graduate credit to the Master of Health Administration degree program on the advice and approval of the student’s advisory committee, department Chair, and school Academic Affairs Dean, and with the approval of the Office of Graduate and Professional Studies. Courses taken in residence at an accredited U.S. institution or approved international institution with a final grade of B or greater may be considered for transfer credit if, at the time the courses were completed, the courses would be accepted for credit toward a similar degree for a student in degree-seeking status at the host institution. Otherwise, the limitations stated in the preceding section apply. Coursework in which no formal grades are given or in which grades other than letter grades (A or B) are earned (for example, CR, P, S, U, H, etc.) is not accepted for transfer credit. Courses appearing on the degree plan with grades of D, F, or U may not be accepted by transfer work. Credit for coursework submitted for transfer from any college or university must be shown in semester credit hours or equated to semester credit hours. An official transcript from the university at which the transfer coursework was taken must be sent directly to the Office of Admissions.

Courses used toward another degree at another institution may not be applied for graduate credit. If the course to be transferred was taken prior
to the conferral of a degree at the transfer institution, a letter from the Registrar at that institution stating that the course was not applied for credit toward the degree must be submitted to the Office of Graduate and Professional Studies.

Grades for courses completed at other institutions are not included in computing the GPR.

**Limitations on the Use of Transfer, Extensions, and Certain Other Courses**

If otherwise acceptable, certain courses may be used toward meeting credit-hour requirements for the master’s degree with the following limitations.

1. The maximum number of credit hours allowed toward the MHA as transfer credit is 9.
2. Courses previously used for another degree are not acceptable for credit.
3. A maximum of 6 hours of 684 (Professional Internship/Practicum), and 9 hours of 685 (Directed Studies), if approved on the degree plan.
4. Undergraduate courses are not allowed to transfer to the MHA degree program.
5. Continuing education courses may not be used for graduate credit.
6. Extension courses are not acceptable for credit.

Exceptions will be permitted only in unusual cases and when petitioned by the student’s advisor, department chair, school Academic Affairs Office, and approved by the Office of Graduate and Professional Studies.

**Additional Requirements**

- **Residence** (p. 1179)
- **Time Limit** (p. 1179)
- **Scholastic Requirements** (p. 1179)
- **Foreign Languages** (p. 1179)
- **Internship or Practicum** (p. 1179)
- **Application for Degree** (p. 1179)

**Residence**

No residence requirement exists; however, attention is directed to the rules regarding Limitations on the Use of Transfer, Extension and Certain Other Courses.

See Residence Requirements (p. 22).

**Time Limit**

All degree requirements for a master’s degree must be completed within a period of seven consecutive years. Coursework which is over seven calendar years old may not be applied to master’s degree. Time limits for coursework on the degree plan may also apply to transfer coursework.

**Scholastic Requirements**

To maintain good academic standing, a MHA student must maintain a minimum cumulative 3.000 GPR. If a student fails to attain a cumulative 3.000 GPR, he or she is placed on academic probation. A student on academic probation must raise his/her cumulative GPR to a 3.000 or above according to requirements to be set forth in the probation letter.

Typically, this means raising the cumulative GPR to a 3.000 or higher by the end of the next long semester (fall/spring). If this requirement is not met, the School’s Academic Affairs Office will recommend that the Office of Graduate and Professional Studies block the student from further enrollment. If a student is blocked from further enrollment in the MHA program, he or she shall not be permitted to enroll in other MHA courses.

**Foreign Languages**

No specific language requirement exists for the Master of Health Administration degree program.

**Internship or Practicum**

Students in the MHA are required to fulfill a practicum requirement (PHPM 684). Instructions on submission and successful completion of the practicum are posted on the School of Public Health practicum website as well as with the department’s practicum coordinator. Students are to work specifically with their department practicum coordinator on meeting this curriculum course requirement. The practicum is overseen by the School of Public Health Practicum Coordinator in conjunction with the school’s master’s curriculum committee. Students must be in good academic standing, have completed all core public health courses, or be enrolled concurrently in no more than one core course at the time they enroll in the PHPM 684 course, and have no registration or university holds related to enrollment.

**Application for Degree**

For information on applying for your degree, please visit the Graduation section.

**Master of Science in Public Health in Health Policy and Management**

The Master of Science in Public Health (MSPH) is considered an equivalent professional public health master’s degree and requires additional coursework in research methods and statistics.

The MSPH is a thesis degree program that has culminating experiences as part of the degree requirements. Students will also participate in a practicum demonstrating overall public health problem solving skills.

Note: The School of Public Health will not be accepting new students for the MSPH program from the 2015-2016 school year forward.

**Program Requirements**

- **Student’s Advisory Committee** (p. 1180)
- **Degree Plan** (p. 1180)
- **Credit Requirement** (p. 1180)
- **Transfer of Credit** (p. 1180)
- **Limitations on the Use of Transfer, Extension and Certain Other Courses** (p. 1180)
- **Thesis** (p. 1181)
  - **Thesis Proposal** (p. 1181)
  - **Final Examination/Thesis Defense** (p. 1181)
Student’s Advisory Committee

After receiving admission to graduate studies and enrolling, the student will consult with the head of his or her department concerning appointment of the chair of the advisory committee. The student’s advisory committee for the Master of Science degree will consist of no fewer than three graduate faculty representatives of the student’s fields of study and research. The committee chair or one of the co-chairs must be a member of Graduate Faculty in the student’s department.

Committee members must be comprised of at least one principal faculty member within SPH but external to the relevant department(s), all voting members must be members of the graduate faculty. The chair, in consultation with the student, will select the remainder of the advisory committee. The committee composition must be approved by the relevant department head.

If the chair of a student’s advisory committee voluntarily leaves the University and the student is near completion of the degree and wants the chair to continue to serve in this role, the student is responsible for securing a current member of the University Graduate Faculty, from the student’s academic program and located near the Texas A&M University campus site, to serve as the co-chair of the committee. The Department Head or Chair of Intercollegiate faculty may request in writing to the Associate Provost for Graduate and Professional Studies that a faculty member who is on an approved leave of absence or has voluntarily separated from the university, be allowed to continue to serve in the role of chair of a student’s advisory committee without a co-chair for us to one year. The students should be near completion of the degree. Extensions beyond the one year period can be granted with additional approval of the Dean.

The committee members’ signatures on the degree plan indicate their willingness to accept the responsibility for guiding and directing the entire academic program of the student and for initiating all academic actions concerning the student. Although individual committee members can be replaced by petition for valid reasons, a committee cannot resign in masse. The chair of the committee, who usually has immediate supervision of the student’s research and dissertation or record of study, has the responsibility for calling all meetings of the committee. The duties of the committee include responsibility for the proposed degree plan, the research proposal, guidance and supervision of the thesis study/research and the final examination. In addition, the committee, as a group and as individual members, is responsible for counseling the student on academic matters and, in the case of academic deficiency, initiating recommendations to the Office of Graduate and Professional Studies.

Degree Plan

The student’s advisor, in consultation with the student, will develop the proposed degree plan. The final degree plan must be completed and filed with the Office of Graduate and Professional Studies prior to the deadlines imposed by the student’s college, and no later than 90 days prior to the date of the final oral examination.

The proposed/final degree plan should be submitted through the online Document Processing Submission System located on the website https://ogsdpss.tamu.edu.

Additional coursework may be added to the approved degree plan by petition if it is deemed necessary by the advisor to correct deficiencies in the student’s academic preparation. No changes can be made to the degree plan once the student’s Request for Final Examination or Request for Final Examination Exemption is approved by the Office of Graduate and Professional Studies.

Credit Requirement

A minimum of 45 hours of coursework is required for the MSPH degree. To demonstrate integration and application of subject matter learned and the development of written and oral communication skills, a student will be required to produce a thesis and participate in a Practicum. Concentration and elective courses vary among the core disciplines and will be addressed during advising and creation of the degree plan. Electives may be taken upon approval/advice from the student’s assigned advisor and will be listed by rubric, section, and description in the degree plan.

Transfer of Credit

A student may transfer up to 9 hours of graduate credit to the MSPH degree program on the advice and approval of the student’s advisory committee, department Chair, and school Academic Affairs Dean, and with the approval of the Office of Graduate and Professional Studies. Courses taken in residence at an accredited U.S. institution or approved international institution with a final grade of B or greater may be considered for transfer credit if, at the time the courses were completed, the courses would be accepted for credit toward a similar degree for a student in degree-seeking status at the host institution. Otherwise, the limitations stated in the preceding section apply. Coursework in which no formal grades are given or in which grades other than letter grades (A or B) are earned (for example, CR, P, S, U, H, etc.) is not accepted for transfer credit. Courses appearing on the degree plan with grades of D, F, or U may not be absorbed by transfer work. Credit for coursework submitted for transfer from any college or university must be shown in semester credit hours or equated to semester credit hours. An official transcript from the university at which the transfer coursework was taken must be sent directly to the Office of Admissions.

Courses used toward another degree at another institution may not be applied for graduate credit. If the course to be transferred was taken prior to the conferral of a degree at the transfer institution, a letter from the registrar at that institution stating that the course was not applied for credit toward the degree must be submitted to the Office of Graduate and Professional Studies.

Grades for courses completed at other institutions are not included in computing the GPR.

Limitations on the Use of Transfer, Extensions, and Certain Other Courses

If otherwise acceptable, certain courses may be used toward meeting credit-hour requirements for the master’s degree with the following limitations.

1. The maximum number of credit hours allowed toward the MSPH as transfer credit is 9.
2. Courses previously used for another degree are not acceptable for credit.
3. A zero credit 684 and 685 course is only allowed for non-thesis master’s students. Other courses, including 691 research hours, are not eligible for zero credit.
4. A maximum of 3 hours of 684 (Professional Internship/Practicum), and 9 hours of 685 (Directed Studies), if approved on the degree plan.
5. Undergraduate courses are not allowed to transfer to the MSPH degree program.
6. Continuing education courses may not be used for graduate credit.
7. Extension courses are not acceptable for credit.

Exceptions will be permitted only in unusual cases and when petitioned by the student's advisor, department Chair, school Academic Affairs Office, and approved by the Office of Graduate and Professional Studies.

**Thesis**

An acceptable thesis is required for the Master of Science in Public Health degree. The finished work must reflect a comprehensive understanding of the pertinent literature and express in clear English, the problem(s) for study, the method, significance and results of the student's original research. Guidelines for the preparation of the thesis are available in the *Thesis Manual*, which is available online at http://ogaps.tamu.edu.

After successful defense (or exemption) and approval by the student's advisory committee and the head of the student's department, the student must submit his/her thesis in electronic format as a single PDF file. The PDF file must be uploaded to the website, http://ogaps.tamu.edu. Additionally, a signed approval form must be brought or mailed to the Office of Graduate and Professional Studies. The PDF file and the signed approval form are required by the deadline.

Deadline dates for submitting the thesis are announced each semester or summer term in the Office of Graduate and Professional Studies Calendar (see Time Limit statement). These dates also can be accessed via the website https://ogsdpss.tamu.edu.

Before a student can be "cleared" by Thesis and Dissertation Services, a processing fee must be paid through Student Business Services. This processing fee is for the thesis/dissertation services provided. After commencement, dissertations are digitally stored and made available through the Texas A&M Libraries.

A thesis that is deemed unacceptable by the Office of Graduate and Professional Studies because of excessive corrections will be returned to the student's department head. The manuscript must be resubmitted as a new document, and the entire review process must begin again. All submittal deadlines must be met during the resubmittal process to graduate that semester.

**Thesis Proposal**

The student must prepare a thesis proposal for approval by the student's advisory committee and the head of the major department or chair of the intercollegiate faculty, if applicable. This proposal must be submitted to the Office of Graduate and Professional Studies at least 20 working days prior to the submission of the request for the final examination.

Compliance issues must be addressed if a graduate student is performing research involving human subjects, animals, infectious biohazards and recombinant DNA. A student involved in these types of research should check with the Office of Research Compliance and Biosafety at (979) 458-1467 to address questions about all research compliance responsibilities. Additional information can be also obtained on the website http://rcb.tamu.edu.

**Final Examination/Thesis Defense**

A student must pass a final examination by dates announced each semester or summer term in the Office of Graduate and Professional Studies Calendar. To be eligible to take the final examination, a student's GPR must be at least 3.000 for courses on the degree plan and for all courses completed at Texas A&M which are eligible to be applied to a graduate degree, and there must be no unabsolved grades of D, F or U for any course listed on the degree plan. To absolve a deficient grade, the student must repeat the course at Texas A&M University and achieve a grade of C or better. All coursework on the degree plan must have been completed with the exception of those hours for which the student is registered. For thesis-option students, an approved thesis proposal must be on file in the Office of Graduate and Professional Studies according to published deadlines prior to the final examination or submission of the request for exemption from the final examination.

A request to hold and announce the final examination must be submitted to the Office of Graduate and Professional Studies a minimum of 10 working days in advance of the scheduled date for the examination. The Office of Graduate and Professional Studies must be notified in writing of any cancellations. A student may be given only one opportunity to repeat the final examination for the master's degree and that must be within a time period that does not extend beyond the end of the next regular semester (summer terms are excluded).

For thesis option students, the final examination covers the thesis and all work taken on the degree plan and at the option of the committee may be written or oral or both. The final examination may not be administered before the thesis is available to all members of the student's advisory committee in substantially final form, and all members have had adequate time to review the document. The examination is conducted by the student's advisory committee as finally constituted. A thesis option student must be registered in the University in the semester or summer term in which the final examination is taken. Persons other than members of the graduate faculty may, with mutual consent of the candidate and the major professor, attend final examinations for advanced degrees. Upon completion of the questioning of the candidate, all visitors must excuse themselves from the proceedings. A positive vote by all members of the graduate committee with at most one dissenion is required to pass a student on his or her exam. A department, or interdisciplinary degree program, may have a stricter requirement provided there is consistency within all degree programs within a department or interdisciplinary degree program.

The Report of the Final Examination Form must be submitted with original signatures of only the committee members approved by the Office of Graduate and Professional Studies. If an approved committee member substitution (1 only) has been made, his/her signature must also be submitted to the Office of Graduate and Professional Studies. If necessary, multiple copies of the form may be submitted with different committee member original signatures. If an approved committee member substitution (1 only) has been made, his/her signature must be included on the form submitted to the Office of Graduate and Professional Studies.

A thesis option candidate may petition to be exempt from his/her final examination provided his/her degree plan GPR is 3.500 or greater and he/she has the approval of the advisory committee, the head of the student's major department, or intercollegiate chair, if appropriate, and the Office of Graduate and Professional Studies. It is required that the petition for exemption be submitted the same semester the student intends to submit the thesis.
Additional Requirements

Additional Requirements

- Residence (p. 1182)
- Time Limit (p. 1182)
- Scholastic Requirements (p. 1182)
- Foreign Languages (p. 1182)
- Internship or Practicum (p. 1182)
- Application for Degree (p. 1182)

Residence

No residence requirement exists; however, attention is directed to the rules regarding Limitations on the Use of Transfer, Extension and Certain Other Courses.

Time Limit

All degree requirements must be completed within a period of seven consecutive years for the degree to be granted. A course will be valid until seven years after the end of the semester in which it was taken. Graduate credit for coursework which is more than seven calendar years old at the time of the final examination (oral or written) may not be used to satisfy degree requirements.

A student who has a thesis must have the final corrected version of the thesis cleared by the Office of Graduate and Professional Studies no later than one year after the final examination, or approval of a petition for exemption from the final exam, or within the seven-year time limit, whichever occurs first. Failure to do so will result in the degree not being awarded.

Scholastic Requirements

To maintain good academic standing, a MSPH student must maintain a minimum cumulative 3.00 GPR. If a student fails to attain a cumulative 3.00 GPR, he or she is placed on academic probation. A student on academic probation must raise his/her cumulative GPR to a 3.00 or above according to requirements to be set forth in the probation letter. Typically, this means raising the cumulative GPR to a 3.00 or higher by the end of the next long semester (fall/spring). If this requirement is not met, the School’s Academic Affairs Office will recommend that the Office of Graduate and Professional Studies block the student from further enrollment. If a student is blocked from further enrollment in the MSPH program, he or she shall not be permitted to enroll in other MSPH courses.

Foreign Languages

No specific language requirement exists for the Master of Science in Public Health degree program.

Internship or Practicum

Students in the MSPH are required to fulfill a practicum requirement. Specific course names and numbers by department are PHEB 684, PHEO 684, PHPM 684, and HPCH 684. Instructions on submission and successful completion of the practicum are posted on the School of Public Health practicum website as well as with the department’s practicum coordinator. Students are to work specifically with their department practicum coordinator on meeting this curriculum course requirement. Students must be in good academic standing, have completed all core public health courses, or be enrolled concurrently in no more than one core course at the time they enroll in the 684 course, and have no registration or university blocks related to enrollment.

Application for Degree

For information on applying for your degree, please visit the Graduation section.

Doctor of Philosophy in Health Services Research

Work leading to the degree of Doctor of Philosophy (PhD) is designed to give the candidate a thorough and comprehensive knowledge of his or her professional field and training in methods of research. The final basis for granting the degree shall be the candidate’s grasp of the subject matter of a broad field of study and a demonstrated ability to do independent research. In addition, the candidate must have acquired the ability to express thoughts clearly and forcefully in both oral and written languages. The degree is not granted solely for the completion of coursework, residence and technical requirements, although these must be met.

For a student who has completed a master's degree, a DDS/DMD, DVM or MD at a U.S. institution, a minimum of 64 hours is required on the degree plan for the degree of Doctor of Philosophy. For a student who has completed a baccalaureate degree but not a master’s degree or a U.S. DDS/DMD, DVM or MD, a minimum of 96 hours is required on the degree plan for the degree of Doctor of Philosophy.

  - Report of Final Examination (p. 1186)
- Dissertation (p. 1186)

### Student's Advisory Committee

After receiving admission to graduate studies and enrolling, the student will consult with the head of his or her major or administrative department (or chair of the intercollegiate faculty) concerning appointment of the chair of the advisory committee. The student's advisory committee will consist of no fewer than four members of the graduate faculty representative of the student's several fields of study and research, where the chair or co-chair must be from the student's department (or intercollegiate faculty, if applicable), and at least one or more of the members must have an appointment to a department other than the student's major department. The outside member for a student in an interdisciplinary degree program must be from a department different from the chair of the student's committee.

The chair, in consultation with the student, will select the remainder of the advisory committee. Only graduate faculty members located on Texas A&M University campuses may serve as chair of a student's advisory committee. Other Texas A&M University graduate faculty members located off-campus may serve as a member or co-chair (but not chair), with a member as the chair.

If the chair of a student's advisory committee voluntarily leaves the University and the student is near completion of the degree and wants the chair to continue to serve in this role, the student is responsible for...
securing a current member of the University Graduate Faculty, from the student’s academic program and located near the Texas A&M University campus site, to serve as the co-chair of the committee. The Department Head or Chair of Intercollegiate faculty may request in writing to the Associate Provost for Graduate and Professional Studies that a faculty member who is on an approved leave of absence or has voluntarily separated from the university, be allowed to continue to serve in the role of chair of a student’s advisory committee without a co-chair for up to one year. The students should be near completion of the degree. Extensions beyond the one year period can be granted with additional approval of the Dean.

The committee members’ signatures on the degree plan indicate their willingness to accept the responsibility for guiding and directing the entire academic program of the student and for initiating all academic actions concerning the student. Although individual committee members may be replaced by petition for valid reasons, a committee cannot resign en masse. The chair of the committee, who usually has immediate supervision of the student’s research and dissertation or record of study, has the responsibility for calling all meetings of the committee. The duties of the committee include responsibility for the proposed degree plan, the research proposal, the preliminary examination, the dissertation or record of study and the final examination. In addition, the committee, as a group and as individual members, is responsible for counseling the student on academic matters, and, in the case of academic deficiency, initiating recommendations to the Office of Graduate and Professional Studies.

Degree Plan

The student’s advisory committee will evaluate the student’s previous education and degree objectives. The committee, in consultation with the student, will develop a proposed degree plan and outline a research problem which, when completed, as indicated by the dissertation (or its equivalent for the degree of Doctor of Education or the degree of Doctor of Engineering), will constitute the basic requirements for the degree. The degree plan must be filed with the Office of Graduate and Professional Studies prior to the deadline imposed by the student’s college and no later than 90 days prior to the preliminary examination.

This proposed degree plan should be submitted through the online Document Processing Submission System located on the website http://ogsdpss.tamu.edu. A minimum of 64 hours is required on the degree plan for the Doctor of Philosophy for a student who has completed a master's degree. A student who has completed a DDS/DMD, DVM or a MD at a U.S. institution is also required to complete a minimum of 64 hours. A student who has completed a baccalaureate degree but not a master's degree will be required to complete a 96-hour degree plan. Completion of a DDS/DMD, DVM or MD degree at a foreign institution requires completion of a minimum of 96 hours for the Doctor of Philosophy. A field of study may be primarily in one department or in a combination of departments. A degree plan must carry a reasonable amount of 691 (research).

Additional coursework may be added by petition to the approved degree plan by the student’s advisory committee if it is deemed necessary to correct deficiencies in the student’s academic preparation. No changes can be made to the degree plan once the student’s Request for Final Examination is approved by the Office of Graduate and Professional Studies.

Approval to enroll in any professional course (900-level) should be obtained from the head of the department (or Chair of the intercollegiate faculty, if applicable) in which the course will be offered before including such a course on a degree plan.

No credit may be obtained by correspondence study, by extension or for any course of fewer than three weeks duration.

Transfer of Credit

Courses for which transfer credits are sought must have been completed with a grade of B or greater and must be approved by the student’s advisory committee and the Office of Graduate and Professional Studies. These courses must not have been used previously for another degree. Except for officially approved cooperative doctoral programs, credit for thesis or dissertation research or the equivalent is not transferable. Credit for “internship” coursework in any form is not transferable. Courses taken in residence at an accredited U.S. institution or approved international institution with a final grade of B or greater will be considered for transfer credit if, at the time the courses were completed, the courses would be accepted for credit toward a similar degree for a student in degree-seeking status at the host institution. Credit for coursework taken by extension is not transferable. Coursework in which no formal grades are given or in which grades other than letter grades (A or B) are earned (for example, CR, P, S, U, H, etc.) is not accepted for transfer credit. Credit for coursework submitted for transfer from any college or university must be shown in semester credit hours, or equated to semester credit hours.

Courses used toward a degree at another institution may not be applied for graduate credit. If the course to be transferred was taken prior to the conferral of a degree at the transfer institution, a letter from the registrar at that institution stating that the course was not applied for credit toward the degree must be submitted to the Office of Graduate and Professional Studies.

Grades for courses completed at other institutions are not included in computing the GPR. An official transcript from the university at which transfer courses are taken must be sent directly to the Office of Admissions.

Research Proposal

The general field of research to be used for the dissertation should be agreed on by the student and the advisory committee at their first meeting, as a basis for selecting the proper courses to support the proposed research.

As soon thereafter as the research project can be outlined in reasonable detail, the dissertation research proposal should be completed. The research proposal should be approved at a meeting of the student’s advisory committee, at which time the feasibility of the proposed research and the adequacy of available facilities should be reviewed. The approved proposal, signed by all members of the student’s advisory committee, the head of the student’s major department (or chair of the intercollegiate faculty, if applicable), must be submitted to the Office of Graduate and Professional Studies at least 20 working days prior to the submission of the Request for the Final Examination.

Compliance issues must be addressed if a graduate student is performing research involving human subjects, animals, infectious biohazards and recombinant DNA. A student involved in these types of research should check with the Office of Research Compliance and Biosafety at (979) 458-1467 to address questions about all research compliance responsibilities. Additional information can also be obtained on the website http://rcb.tamu.edu.
Examinations

Preliminary Examination for Doctoral Students

The student's major department (or chair of the interdisciplinary degree program faculty, if applicable) and his or her advisory committee may require qualifying, cumulative or other types of examinations at any time deemed desirable. These examinations are entirely at the discretion of the department and the student's advisory committee.

The preliminary examination is required. The preliminary examination for a doctoral student shall be given no earlier than a date at which the student is within 6 credit hours of completion of the formal coursework on the degree plan (i.e., all coursework on the degree plan except 681, 684, 690, 691, 692, 693, 695, 697, 791, or other graduate courses specifically designated as S/U in the course catalog). The student should complete the Preliminary Examination no later than the end of the semester following the completion of the formal coursework on the degree plan.

Preliminary Examination Format

The objective of preliminary examination is to evaluate whether the student has demonstrated the following qualifications:

a. a mastery of the subject matter of all fields in the program;

b. an adequate knowledge of the literature in these fields and an ability to carry out bibliographical research;

c. an understanding of the research problem and the appropriate methodological approaches.

The format of the preliminary examination shall be determined by the student's department (or interdisciplinary degree program, if applicable) and advisory committee, and communicated to the student in advance of the examination. The exam may consist of a written component, oral component, or combination of written and oral components.

The preliminary exam may be administered by the advisory committee or a departmental committee; herein referred to as the examination committee.

Regardless of exam format, a student will receive an overall preliminary exam result of pass or fail. The department (or interdisciplinary degree program, if applicable) will determine how the overall pass or fail result is determined based on the exam structure and internal department procedures. If the exam is administered by the advisory committee, each advisory committee member will provide a pass or fail evaluation decision.

Only one advisory committee substitution is allowed to provide an evaluation decision for a student's preliminary exam, and it cannot be the committee chair.

If a student is required to take, as a part of the preliminary examination, a written component administered by a department or interdisciplinary degree program, the department or interdisciplinary degree program faculty must:

a. offer the examination at least once every six months. The departmental or interdisciplinary degree program examination should be announced at least 30 days prior to the scheduled examination date.

b. assume the responsibility for marking the examination satisfactory or unsatisfactory, or otherwise graded, and in the case of unsatisfactory, stating specifically the reasons for such a mark.

c. forward the marked examination to the chair of the student's advisory committee within one week after the examination.

Preliminary Examination Scheduling

Prior to commencing any component of the preliminary examination, a departmental representative or the advisory committee chair will review the eligibility criteria with the student, using the Preliminary Examination Checklist to ensure the student is eligible for the preliminary examination. The following list of eligibility requirements applies.

- Student is registered at Texas A&M University for a minimum of one semester credit hour in the long semester or summer term during which any component of the preliminary examination is held. If the examination is held between semesters, then the student must be registered for the term immediately preceding the examination.

- An approved degree plan is on file with the Office of Graduate and Professional Studies prior to commencing the first component of the examination.

- Student's cumulative GPR is at least 3.000.

- Student's degree plan GPR is at least 3.000.

- All English language proficiency requirements are satisfied.

- At the end of the semester in which at least the first component of the exam is given, there are no more than 6 hours of coursework remaining on the degree plan (except 681, 684, 690, 691, 692, 693, 695, 697, 791, or other graduate courses specifically designated as S/U in the course catalog). The head of the student's department (or Chair of the Interdisciplinary Degree Program, if applicable) has the authority to approve a waiver of this criterion.

Report of Preliminary Examination

Credit for the preliminary examination is not transferable in cases where a student changes degree programs after passing a preliminary exam.

If a written component precedes an oral component of the preliminary exam, the chair of the student's examination committee is responsible for making all written examinations available to all members of the committee. A positive evaluation of the preliminary exam by all members of a student's examination committee with at most one dissension is required to pass a student on his or her preliminary exam.

The student's department will promptly report the results of the Preliminary Examination to the Office of Graduate and Professional Studies via the Report of Doctoral Preliminary Examination form. The Preliminary Examination checklist form must also be submitted. These forms should be submitted to the Office of Graduate and Professional Studies within 10 working days of completion of the preliminary examination.

The Report of the Preliminary Examination form must be submitted with original signatures of the approved examination committee members. If an approved examination committee member substitution (one only) has been made, that signature must also be included, in place of the committee member, on the form submitted to the Office of Graduate and
Professional Studies. The original signature of the department head is also required on the form.

After passing the required preliminary examination for the doctoral degree, the student must complete the final examination for the degree within four calendar years. Otherwise, the student will be required to repeat the preliminary examination.

Retake of Failed Preliminary Examination

Upon approval of the student's examination committee, with no more than one member dissenting, and approval of the Office of Graduate and Professional Studies, a student who has failed the preliminary examination may be given one re-examination. Adequate time must be given to permit the student to address the inadequacies emerging from the first preliminary examination. The examination committee must agree upon and communicate in writing to the student, an adequate time-frame from the first examination (normally six months) to retest, as well as a detailed explanation of the inadequacies emerging from the examination. The student and the committee should jointly negotiate a mutually acceptable date for this retest. When providing feedback on inadequacies, the committee should clearly document expected improvements that the student must be able to exhibit in order to retake the exam. The examination committee will document and communicate the time-frame and feedback within 10 working days of the exam that was not passed.

Final Examination for Doctoral Students

The candidate for the doctoral degree must pass a final examination by deadline dates announced in the "Office of Graduate and Professional Studies Calendar" each semester. The doctoral student is allowed only one opportunity to take the final examination.

No unabsoluted grades of D, F, or U for any course can be listed on the degree plan. The student must be registered for any remaining hours of 681, 684, 690, 691, 692, 791 or other graduate courses specifically designated as S/U in the course catalog during the semester of the final exam. No student may be given a final examination until they have been admitted to candidacy and their current official cumulative and degree plan GPAs are 3.00 or better.

To be admitted to candidacy for a doctoral degree, a student must have:

1. completed all formal coursework on the degree plan with the exception of any remaining 681, 684, 690 and 691, 692, 791 or other graduate courses specifically designated as S/U in the course catalog during the semester of the final exam. No student may be given a final examination until they have been admitted to candidacy and their current official cumulative and degree plan GPAs are 3.00 or better.

2. a 3.0 Graduate GPA and a Degree Plan GPA of at least 3.0 with no grade lower than C in any course on the degree plan,

3. passed the preliminary examination,

4. submitted an approved dissertation proposal,

5. met the residence requirements.

The request to hold and announce the final examination must be submitted to the Office of Graduate and Professional Studies a minimum of 10 working days in advance of the scheduled date. Any changes to the degree plan must be approved by the Office of Graduate and Professional Studies prior to the submission of the request for final examination.

The student's advisory committee will conduct this examination. The final examination is not to be administered until the dissertation or record of study is available in substantially final form to the student's advisory committee, and all concerned have had adequate time to review the document. Whereas the final examination may cover the broad field of the candidate's training, it is presumed that the major portion of the time will be devoted to the dissertation and closely allied topics. Persons other than members of the graduate faculty may, with mutual consent of the candidate and the chair of the advisory committee, be invited to attend a final examination for an advanced degree. A positive vote by all members of the graduate committee with at most one dissension is required to pass a student on his or her exam. A department can have a stricter requirement provided there is consistency within all degree programs within a department. Upon completion of the questioning of the candidate, all visitors must excuse themselves from the proceedings.

Report of Final Examination

The student's department will promptly report the results of the Final Examination to the Office of Graduate and Professional Studies via the Report of Doctoral Final Examination form. These forms should be submitted to the Office of Graduate and Professional Studies within 10 working days of completion of the final examination. The Office of Graduate and Professional Studies must be notified in writing of any cancellations.

A positive evaluation of the final exam by all members of a student's advisory committee with at most one dissension is required to pass a student on his or her final exam. The Report of the Final Examination Form must be submitted with original signatures of only the committee members approved by the Office of Graduate and Professional Studies. If necessary, multiple copies of the form may be submitted with different committee member original signatures. If an approved committee member substitution (1 only) has been made, his/her signature must be included on the form submitted to the Office of Graduate and Professional Studies.

Dissertation

The ability to perform independent research must be demonstrated by the dissertation, which must be the original work of the candidate. Whereas acceptance of the dissertation is based primarily on its scholarly merit, it must also exhibit creditable literary workmanship. The format of the dissertation must be acceptable to the Office of Graduate and Professional Studies. Guidelines for the preparation of the dissertation are available in the Thesis Manual, which is available online at http://ogaps.tamu.edu.

After successful defense and approval by the student's advisory committee and the head of the student's major department (or chair of the intercollegiate faculty, if applicable), a student must submit his/her dissertation in electronic format as a single PDF file. The PDF file must be uploaded to the website, http://ogaps.tamu.edu. Additionally, a signed paper approval form with original signatures must be received by the Office of Graduate and Professional Studies. Both the PDF file and the signed approval form are required by the deadline.

Deadline dates for submitting are announced each semester or summer term in the Office of Graduate and Professional Studies Calendar (see Time Limit statement). These dates also can be accessed via the website http://ogaps.tamu.edu.

Each student who submits a document for review is assessed a one-time thesis/dissertation processing fee through Student Business Services. This processing fee is for the thesis/dissertation services provided.
commencement, dissertations are digitally stored and made available through the Texas A&M Libraries.

A dissertation that is deemed unacceptable by the Office of Graduate and Professional Studies because of excessive corrections will be returned to the student's department head or chair of the intercollegiate faculty. The manuscript must be resubmitted as a new document, and the entire review process must begin anew. All original submittal deadlines must be met during the resubmittal process in order to graduate.

### Additional Requirements

#### Residence

A student who enters the doctoral degree program with a baccalaureate degree must spend one academic year plus one semester in resident study at Texas A&M University. A student who holds master's degree when he/she enters doctoral degree program must spend one academic year in resident study. One academic year may include two adjacent regular semesters or one regular semester and one adjacent 10-week summer semester. The third semester is not required to be adjacent to the one year. Enrollment for each semester must be a minimum of 9 credit hours each to satisfy the residence requirement.

To satisfy the residence requirement, the student must complete a minimum of 9 credit hours per semester or 10-week summer semester in resident study at Texas A&M University for the required period. A student who enters a doctoral degree program with a baccalaureate degree may fulfill residence requirements in excess of one academic year (18 credit hours) by registration during summer sessions or by completion of a less-than-full course load (in this context a full course load is considered 9 credit hours per semester).

Students who are employed full-time while completing their degree may fulfill total residence requirements by completion of less-than-full time course loads each semester. In order to be considered for this, the student is required to submit a Petition for Waivers and Exceptions along with verification of his/her employment to the Office of Graduate and Professional Studies. An employee should submit verification of his/her employment at the time he/she submits the degree plan. See Registration. (p. 28)

See Residence Requirements (p. 22).

#### Time Limit

All requirements for doctoral degrees must be completed within a period of ten consecutive calendar years for the degree to be granted. A course will be considered valid until 10 years after the end of the semester in which it is taken. Graduate credit for coursework more than ten calendar years old at the time of the final oral examination may not be used to satisfy degree requirements.

After passing the required preliminary oral and written examinations for a doctoral degree, the student must complete the final examination within four calendar years. Otherwise, the student will be required to repeat the preliminary examination.

A final corrected version of the dissertation or record of study in electronic format as a single PDF file must be cleared by the Office of Graduate and Professional Studies no later than one year after the final examination or within the 10-year time limit, whichever occurs first. Failure to do so will result in the degree not being awarded.

### Continuous Registration

A student in a program leading to a Doctor of Philosophy who has completed all coursework on his/her degree plan other than 691, 5V98 or 5V99 (research) are required to be in continuous registration until all requirements for the degree have been completed. See Continuous Registration Requirements (p. 28).

### Admission to Candidacy

To be admitted to candidacy for a doctoral degree, a student must have:

1. completed all formal coursework on the degree plan with the exception of any remaining 681, 684, 690 and 691, 5V98 and 5V99, or 791.
2. a 3.0 Graduate GPA and a Degree Plan GPA of at least 3.0 with no grade lower than C in any course on the degree plan,
3. passed the preliminary examination (written and oral portions),
4. submitted an approved dissertation proposal,
5. met the residence requirements. The final examination will not be authorized for any doctoral student who has not been admitted to candidacy.

### Languages

A student is required to possess a competent command of English. For English language proficiency requirements, see the Admissions section of this catalog. The doctoral (PhD) foreign language requirement at Texas A&M University is a departmental option, to be administered and monitored by the individual departments of academic instruction.

### 99-Hour Cap on Doctoral Degrees

In Texas, public colleges and universities are funded by the state according to the number of students enrolled. In accordance with legislation passed by the Texas Legislature, the number of hours for which state universities may receive subvention funding at the doctoral rate for any individual is limited to 99 hours. Texas A&M University and other universities will not receive subvention for hours in excess of the limit.

Institutions of higher education are allowed to charge the equivalent of nonresident tuition to a resident doctoral student who has enrolled in 100 or more semester credit hours of doctoral coursework.

A doctoral student at Texas A&M has seven years to complete his/her degree before being charged out-of-state tuition. A doctoral student who, after seven years of study, has accumulated 100 or more doctoral hours will be charged tuition at a rate equivalent to out-of-state tuition. Please note that the tuition increases will apply to Texas residents as well as students from other states and countries who currently are charged tuition at the resident rate. This includes those doctoral students who hold GAT, GANT, and GAR appointments of 20 or more hours and
recipients of competitive fellowships who receive more than $1,000 per semester. Doctoral students who, after seven years of study, have not accumulated 100 hours are eligible to pay in-state tuition if otherwise eligible.

For count purposes, a year is counted as three semesters, normally fall, spring and summer. Using this system, a student is allowed 21 semesters as a G8 student to complete the doctoral degree before being penalized with the higher tuition rate. Any semester in which a G8 student is enrolled for a doctoral level course is counted.

The following majors are exempt from the 99-Hour Cap on Doctoral Degrees:

- Biomedical Sciences
- Biochemistry
- Microbiology
- Genetics
- Toxicology
- Nutrition Sciences
- Community Clinical Psychology
- School Psychology
- Veterinary Pathology
- Clinical Psychology
- Counseling Psychology
- Medical Sciences
- Health Services Research
- Health Promotion and Community Health Sciences
- Epidemiology and Environmental Health
- Oral Biology

The hour limit for these majors is 130 doctoral hours

Application for Degree
For information on applying for your degree, please visit the Graduation (p. 26) section.

Master of Public Health in Occupational Safety and Health

The Master of Public Health (MPH) is a multi-disciplinary professional degree program designed to provide graduate level practical training in areas specializing in delivering public health practice. The degree is offered in all core disciplines of public health; epidemiology, biostatistics, environmental and occupational health, health policy and management, and health promotion and community health sciences. The Master of Public Health is a non-thesis degree program that has culminating experiences as part of the degree requirements. Students will participate in a practicum demonstrating overall public health problem solving skills and a capstone class.

An individual with a baccalaureate degree or a physician licensed to practice medicine in the United States may apply for admission to the program. No coursework prerequisites exist for making a successful application to this degree program.

For degree curriculum, see the Department of Environmental and Occupational Health (http://sph.tamhsc.edu/eoh).

Program Requirements

Program Requirements

- Student's Advisory Committee (p. 1188)
- Degree Plan (p. 1188)
- Credit Requirement (p. 1188)
- Transfer of Credit (p. 1188)
- Limitations on the Use of Transfer, Extension and Certain Other Courses (p. 1189)

Student Advisory Committee

The Student Advisory Committee for the MPH consists of an assigned faculty advisor. After receiving admission to the program and before enrolling for coursework, the student will consult with their assigned faculty advisor to receive additional information related to curriculum and processing of the degree plan. The faculty advisor must have graduate faculty membership in the academic program. If at any point of the student’s time in pursuit of the degree the assigned advisor is no longer available, the department will assign a new advisor and require a comprehensive advisory session to ensure the student is making progress according to degree program requirements.

Degree Plan

The student’s advisor, in consultation with the student, will develop the proposed degree plan. The degree plan must be completed and filed with the Office of Graduate and Professional Studies prior to the deadlines imposed by the student’s college, and no later than the dates announced in the Office of Graduate and Professional Studies calendar of deadlines for graduation.

The proposed/final degree plan should be submitted through the online Document Processing Submission System located on the website https://ogsdpss.tamu.edu.

Additional coursework may be added to the approved degree plan by petition if it is deemed necessary by the advisor to correct deficiencies in the student’s academic preparation.

Credit Requirement

A minimum of 45 hours of coursework is required for the Master of Public Health degree. To demonstrate integration and application of subject matter learned and the development of written and oral communication skills, a student will be required to take SOPH 680 as part of the culminating experience requirement to graduate. Concentration and elective courses vary among the core disciplines and will be addressed during advising and creation of the degree plan. Electives may be taken upon approval/advice from the student’s assigned advisor and will be listed by rubric, section, and description in the degree plan.

Transfer of Credit

A student may transfer up to 9 hours of graduate credit to the Master of Public Health degree program on the advice and approval of the student’s advisory committee, department Chair, and school Academic Affairs Dean, and with the approval of the Office of Graduate and Professional Studies. Courses taken in residence at an accredited U.S. institution or approved international institution with a final grade of B or greater may be considered for transfer credit if, at the time the courses were completed, the courses would be accepted for credit toward a similar degree for a student in degree-seeking status at the host institution. Otherwise, the
limitations stated in the preceding section apply. **Coursework in which no formal grades are given or in which grades other than letter grades (A or B) are earned (for example, CR, P, S, U, H, etc.) is not accepted for transfer credit.** Courses appearing on the degree plan with grades of D, F, or U may not be absolved by transfer work. Credit for coursework submitted for transfer from any college or university must be shown in semester credit hours or equated to semester credit hours. An official transcript from the university at which the transfer coursework was taken must be sent directly to the Office of Admissions.

Courses used toward another degree at another institution may not be applied for graduate credit. If the course to be transferred was taken prior to the conferral of a degree at the transfer institution, a letter from the registrar at that institution stating that the course was not applied for credit toward the degree must be submitted to the Office of Graduate and Professional Studies.

Grades for courses completed at other institutions are not included in computing the GPR.

### Limitations on the Use of Transfer, Extensions, and Certain Other Courses

If otherwise acceptable, certain courses may be used toward meeting credit-hour requirements for the master's degree with the following limitations.

1. The maximum number of credit hours allowed toward the MPH as transfer credit is 9.
2. Courses previously used for another degree are not acceptable for credit.
3. A zero credit 684 and 685 course is only allowed for non-thesis master's students. Other courses, including 691 research hours, are not eligible for zero credit.
4. A maximum of 6 hours of 684 (Professional Internship/Practicum), and 9 hours of 685 (Directed Studies), if approved on the degree plan.
5. Undergraduate courses are not allowed to transfer to the MPH degree program.
6. Continuing education courses may not be used for graduate credit.
7. Extension courses are not acceptable for credit.

Exceptions will be permitted only in unusual cases and when petitioned by the student’s advisory committee, department Chair, school Academic Affairs Office, and approved by the Office of Graduate and Professional Studies.

### Additional Requirements

#### Additional Requirements

- Residence (p. 1189)
- Time Limit (p. 1189)
- Scholastic Requirements (p. 1189)
- Foreign Languages (p. 1189)
- Internship or Practicum (p. 1189)
- Application for Degree (p. 1189)

### Residence

No residence requirement exists; however, attention is directed to the rules regarding Limitations on the Use of Transfer, Extension and Certain Other Courses.

### Time Limit

All degree requirements for a master’s degree must be completed within a period of seven consecutive years. Coursework which is over seven calendar years old may not be applied to master’s degree. Time limits for coursework on the degree plan may also apply to transfer coursework.

### Scholastic Requirements

To maintain good academic standing, a MPH student must maintain a minimum cumulative 3.000 GPR. If a student fails to attain a cumulative 3.000 GPR, he or she is placed on academic probation. A student on academic probation must raise his/her cumulative GPR to a 3.000 or above according to requirements to be set forth in the probation letter. Typically, this means raising the cumulative GPR to a 3.000 or higher by the end of the next long semester (fall/spring). If this requirement is not met, the School of Public Health’s Academic Affairs Office will recommend that the Office of Graduate and Professional Studies block the student from further enrollment. If a student is blocked from further enrollment in the MPH program, he or she shall not be permitted to enroll in other MPH courses.

### Foreign Languages

No specific language requirement exists for the Master of Public Health degree program.

### Internship or Practicum

Students in the MPH are required to fulfill a practicum requirement. Specific course names and numbers by department are PHEB 684, PHEO 684, PHPM 684, and HPCH 684. Instructions on submission and successful completion of the practicum are posted on the School of Public Health practicum website as well as with the department’s practicum coordinator. Students are to work specifically with their department practicum coordinator on meeting this curriculum course requirement. Students must be in good academic standing, have completed all core public health courses, or be enrolled concurrently in no more than one core course at the time they enroll in the 684 course, and have no registration or university blocks related to enrollment.

### Application for Degree

For information on applying for your degree, please visit the Graduation (p. 26) section.

### Public Health - Certificate

The Public Health Certificate Program is designed as an academic program specifically for working professionals in the public health field and for those interested with a general overview of the core functions and disciplines of public health to provide the tools that are fundamental in serving Texas communities.

This certificate is best suited for individuals who may want to pursue a graduate degree in the future, but who want to experience coursework to determine the feasibility of such activity. Completed coursework may be applied to degree-seeking pathways depending on grade received.
Information about admission and application requirements can be found at: http://sph.tamhsc.edu/degrees/certificate.html

Students are not currently being admitted to this certificate program at this time.

**Program Requirements**

**Course Requirements**

Students must complete the following courses to earn the Public Health Certificate:

- PHEB 600 – Introduction to Epidemiology
- PHEB 602 – Biostatistics I
- PHEO 600 – Principles of Environmental and Occupational Health
- HPCH 603 – Social and Behavioral Determinants of Health
- PHPM 605 – Introduction to Health Policy and Management

**Grading**

Certificate students will have the flexibility of taking classes any given semester.

- Applicants must hold a Bachelor’s degree from an accredited college or university with a minimum grade point average (GPA) of 3.0.
- All courses taken will be 600-level courses (for a letter grade).
- The Public Health Certificate is awarded upon achieving a “C” or better in all required courses.
- Certificate-seeking students wishing to pursue a graduate degree will proceed through the application process as all other applicants.
- 600-level coursework completed while a certificate-seeking student may be considered for inclusion on the student’s degree plan (following the school’s course petition process for approval) once admitted into a degree program within the school.

**Department of Environmental and Occupational Health**

http://sph.tamhsc.edu/eoh/

Department Head: Mark E. Benden CPE, PhD

The Department of Environmental and Occupational Health is concerned with the health effects of exposures to air and water pollution, pesticides, organic solvents, dusts and physical hazards, which occur in the environment, the home or the workplace. The department is also home to the Texas A&M Ergonomics Center whose research focuses on prevention of MusculoSkeletal Disease, Cognitive Health & Fatigue, and Human Computer Interaction with an emphasis on design and commercialization.

The department draws from the knowledge generated from disciplines that contribute to recognizing, assessing, and controlling these risks that include epidemiology, toxicology, microbiology, safety engineering, industrial hygiene, medicine, nursing, law and labor economics. The department includes a multidisciplinary core faculty and a large adjunct faculty.

For degree curricula see Department of Environmental and Occupational Health (http://sph.tamhsc.edu/eoh).

Masters

• Master of Public Health in Environmental Health (p. 1191)

Master of Public Health in Environmental Health

The Master of Public Health (MPH) is a multi-disciplinary professional degree program designed to provide graduate level practical training in areas specializing in delivering public health practice. The degree is offered in all core disciplines of public health; epidemiology, biostatistics, environmental and occupational health, health policy and management, and health promotion and community health sciences. The Master of Public Health is a non-thesis degree program that has culminating experiences as part of the degree requirements. Students will participate in a practicum demonstrating overall public health problem solving skills and a capstone class.

An individual with a baccalaureate degree or a physician licensed to practice medicine in the United States may apply for admission to the program. No coursework prerequisites exist for making a successful application to this degree program.

For degree curriculum, see the Department of Environmental and Occupational Health (http://sph.tamhsc.edu/eh).

Program Requirements

Program Requirements

• Student’s Advisory Committee (p. 1191)
• Degree Plan (p. 1191)
• Credit Requirement (p. 1191)
• Transfer of Credit (p. 1191)
• Limitations on the Use of Transfer, Extension and Certain Other Courses (p. 1191)

Student Advisory Committee

The Student Advisory Committee for the MPH consists of an assigned faculty advisor. After receiving admission to the program and before enrolling for coursework, the student will consult with their assigned faculty advisor to receive additional information related to curriculum and processing of the degree plan. The faculty advisor must have graduate faculty membership in the academic program. If at any point of the student’s time in pursuit of the degree the assigned advisor is no longer available, the department will assign a new advisor and require a comprehensive advisory session to ensure the student is making progress according to degree program requirements.

Degree Plan

The student’s advisor, in consultation with the student, will develop the proposed degree plan. The degree plan must be completed and filed with the Office of Graduate and Professional Studies prior to the deadlines imposed by the student’s college, and no later than the dates announced in the Office of Graduate and Professional Studies calendar of deadlines for graduation.

The proposed/final degree plan should be submitted through the online Document Processing Submission System located on the website https://ogsdpss.tamu.edu.

Additional coursework may be added to the approved degree plan by petition if it is deemed necessary by the advisor to correct deficiencies in the student’s academic preparation.

Credit Requirement

A minimum of 45 hours of coursework is required for the Master of Public Health degree. To demonstrate integration and application of subject matter learned and the development of written and oral communication skills, a student will be required to take SOPH 680 as part of the culminating experience requirement to graduate. Concentration and elective courses vary among the core disciplines and will be addressed during advising and creation of the degree plan. Electives may be taken upon approval/advice from the student’s assigned advisor and will be listed by rubric, section, and description in the degree plan.

Transfer of Credit

A student may transfer up to 9 hours of graduate credit to the Master of Public Health degree program on the advice and approval of the student’s advisory committee, department Chair, and school Academic Affairs Dean, and with the approval of the Office of Graduate and Professional Studies. Courses taken in residence at an accredited U.S. institution or approved international institution with a final grade of B or greater may be considered for transfer credit if, at the time the courses were completed, the courses would be accepted for credit toward a similar degree for a student in degree-seeking status at the host institution. Otherwise, the limitations stated in the preceding section apply. Coursework in which no formal grades are given or in which grades other than letter grades (A or B) are earned (for example, CR, P, S, U, H, etc.) is not accepted for transfer credit. Courses appearing on the degree plan with grades of D, F, or U may not be absolved by transfer work. Credit for coursework submitted for transfer from any college or university must be shown in semester credit hours or equated to semester credit hours. An official transcript from the university at which the transfer coursework was taken must be sent directly to the Office of Admissions.

Courses used toward another degree at another institution may not be applied for graduate credit. If the course to be transferred was taken prior to the conferral of a degree at the transfer institution, a letter from the Dean, and with the approval of the Office of Graduate and Professional Studies. Courses taken in residence at an accredited U.S. institution or approved international institution with a final grade of B or greater may be considered for transfer credit if, at the time the courses were completed, the courses would be accepted for credit toward a similar degree for a student in degree-seeking status at the host institution. Otherwise, the limitations stated in the preceding section apply. Coursework in which no formal grades are given or in which grades other than letter grades (A or B) are earned (for example, CR, P, S, U, H, etc.) is not accepted for transfer credit. Courses appearing on the degree plan with grades of D, F, or U may not be absolved by transfer work. Credit for coursework submitted for transfer from any college or university must be shown in semester credit hours or equated to semester credit hours. An official transcript from the university at which the transfer coursework was taken must be sent directly to the Office of Admissions.

Courses used toward another degree at another institution may not be applied for graduate credit. If the course to be transferred was taken prior to the conferral of a degree at the transfer institution, a letter from the registrar at that institution stating that the course was not applied for credit toward the degree must be submitted to the Office of Graduate and Professional Studies.

Grades for courses completed at other institutions are not included in computing the GPR.

Limitations on the Use of Transfer, Extensions, and Certain Other Courses

If otherwise acceptable, certain courses may be used toward meeting credit-hour requirements for the master’s degree with the following limitations.

1. The maximum number of credit hours allowed toward the MPH as transfer credit is 9.
2. Courses previously used for another degree are not acceptable for credit.
3. A zero credit 684 and 685 course is only allowed for non-thesis master’s students. Other courses, including 691 research hours, are not eligible for zero credit.
4. A maximum of 6 hours of 684 (Professional Internship/Practicum), and 9 hours of 685 (Directed Studies), if approved on the degree plan.
5. Undergraduate courses are not allowed to transfer to the MPH degree program.
6. Continuing education courses may not be used for graduate credit.
7. Extension courses are not acceptable for credit.

Exceptions will be permitted only in unusual cases and when petitioned by the student's advisory committee, department Chair, school Academic Affairs Office, and approved by the Office of Graduate and Professional Studies.

### Additional Requirements

#### Residence

No residence requirement exists; however, attention is directed to the rules regarding Limitations on the Use of Transfer, Extension and Certain Other Courses.

#### Time Limit

All degree requirements for a master's degree must be completed within a period of seven consecutive years. Coursework which is over seven calendar years old may not be applied to master's degree. Time limits for coursework on the degree plan may also apply to transfer coursework.

#### Scholastic Requirements

To maintain good academic standing, a MPH student must maintain a minimum cumulative 3.000 GPR. If a student fails to attain a cumulative 3.000 GPR, he or she is placed on academic probation. A student on academic probation must raise his/her cumulative GPR to 3.00 or above according to requirements to be set forth in the probation letter. Typically, this means raising the cumulative GPR to a 3.00 or higher by the end of the next long semester (fall/spring). If this requirement is not met, the School of Public Health's Academic Affairs Office will recommend that the Office of Graduate and Professional Studies block the student from further enrollment. If a student is blocked from further enrollment in the MPH program, he or she shall not be permitted to enroll in other MPH courses.

#### Foreign Languages

No specific language requirement exists for the Master of Public Health degree program.

#### Internship or Practicum

Students in the MPH are required to fulfill a practicum requirement. Specific course names and numbers by department are PHEB 684, PHEO 684, PHPM 684, and HPCH 684. Instructions on submission and successful completion of the practicum are posted on the School of Public Health practicum website as well as with the department's practicum coordinator. Students are to work specifically with their department practicum coordinator on meeting this curriculum course requirement. Students must be in good academic standing, have completed all core public health courses, or be enrolled concurrently in no more than one core course at the time they enroll in the 684 course, and have no registration or university blocks related to enrollment.

### Application for Degree

For information on applying for your degree, please visit the Graduation section.

### Department of Epidemiology and Biostatistics

http://sph.tamhsc.edu/epi-bio/index.html

**Department Head:** Jennifer Horney, PhD, MPH, CPH

The Department of Epidemiology and Biostatistics prepares students for research or practice in academia and numerous public and private health arenas. Students will acquire the expertise necessary to design and implement basic and applied research in disease etiology, control and prevention.

Epidemiological and biostatistical concepts, theories, and methods are fundamental building blocks upon which the public health sciences are built.

Students will become competent users of critical health related information, as well as proficient in the use of epidemiologic research methods applicable to various health and public health related settings.

For degree curricula see Department of Epidemiology and Biostatistics (http://sph.tamhsc.edu/epi-bio).

Program Requirements

Program Requirements

- Student's Advisory Committee (p. 1193)
- Degree Plan (p. 1193)
- Credit Requirement (p. 1193)
- Transfer of Credit (p. 1193)
- Limitations on the Use of Transfer, Extension and Certain Other Courses (p. 1194)

Student Advisory Committee

The Student Advisory Committee for the MPH consists of an assigned faculty advisor. After receiving admission to the program and before enrolling for coursework, the student will consult with their assigned faculty advisor to receive additional information related to curriculum and processing of the degree plan. The faculty advisor must have graduate faculty membership in the academic program. If at any point of the student’s time in pursuit of the degree the assigned advisor is no longer available, the department will assign a new advisor and require a comprehensive advisory session to ensure the student is making progress according to degree program requirements.

Degree Plan

The student’s advisor, in consultation with the student, will develop the proposed degree plan. The degree plan must be completed and filed with the Office of Graduate and Professional Studies prior to the deadlines imposed by the student’s college, and no later than the dates announced in the Office of Graduate and Professional Studies calendar of deadlines for graduation.

The proposed/final degree plan should be submitted through the online Document Processing Submission System located on the website https://ogsdpss.tamu.edu.

Credit Requirement

A minimum of 45 hours of coursework is required for the Master of Public Health degree. To demonstrate integration and application of subject matter learned and the development of written and oral communication skills, a student will be required to take SOPH 680 as part of the culminating experience requirement to graduate. Concentration and elective courses vary among the core disciplines and will be addressed during advising and creation of the degree plan. Electives may be taken upon approval/advice from the student’s assigned advisor and will be listed by rubric, section, and description in the degree plan.

Transfer of Credit

A student may transfer up to 9 hours of graduate credit to the Master of Public Health degree program on the advice and approval of the student’s advisory committee, department Chair, and school Academic Affairs Dean, and with the approval of the Office of Graduate and Professional Studies. Courses taken in residence at an accredited U.S. institution or approved international institution with a final grade of B or greater may be

Masters

- Master of Public Health in Biostatistics (p. 1193)

Certificates

- Maternal and Child Health Certificate

Master of Public Health in Biostatistics

The Master of Public Health (MPH) is a multi-disciplinary professional degree program designed to provide graduate level practical training in areas specializing in delivering public health practice. The degree is offered in all core disciplines of public health; epidemiology, biostatistics, environmental and occupational health, health policy and management, and health promotion and community health sciences. The Master of Public Health is a non-thesis degree program that has culminating experiences as part of the degree requirements. Students will participate in a practicum demonstrating overall public health problem solving skills and a capstone class.

An individual with a baccalaureate degree or a physician licensed to practice medicine in the United States may apply for admission to the program. No coursework prerequisites exist for making a successful application to this degree program.
considered for transfer credit if, at the time the courses were completed, the courses would be accepted for credit toward a similar degree for a student in degree-seeking status at the host institution. Otherwise, the limitations stated in the preceding section apply. Coursework in which no formal grades are given or in which grades other than letter grades (A or B) are earned (for example, CR, P, S, U, H, etc.) is not accepted for transfer credit. Courses appearing on the degree plan with grades of D, F, or U may not be absolved by transfer work. Credit for coursework submitted for transfer from any college or university must be shown in semester credit hours or equated to semester credit hours. An official transcript from the university at which the transfer coursework was taken must be sent directly to the Office of Admissions.

Courses used toward another degree at another institution may not be applied for graduate credit. If the course to be transferred was taken prior to the conferral of a degree at the transfer institution, a letter from the registrar at that institution stating that the course was not applied for credit toward the degree must be submitted to the Office of Graduate and Professional Studies.

Grades for courses completed at other institutions are not included in computing the GPR.

Limitations on the Use of Transfer, Extensions, and Certain Other Courses

If otherwise acceptable, certain courses may be used toward meeting credit-hour requirements for the master’s degree with the following limitations.

1. The maximum number of credit hours allowed toward the MPH as transfer credit is 9.
2. Courses previously used for another degree are not acceptable for credit.
3. A zero credit 684 and 685 course is only allowed for non-thesis master’s students. Other courses, including 691 research hours, are not eligible for zero credit.
4. A maximum of 6 hours of 684 (Professional Internship/Practicum), and 9 hours of 685 (Directed Studies), if approved on the degree plan.
5. Undergraduate courses are not allowed to transfer to the MPH degree program.
6. Continuing education courses may not be used for graduate credit.
7. Extension courses are not acceptable for credit.

Exceptions will be permitted only in unusual cases and when petitioned by the student’s advisory committee, department Chair, school Academic Affairs Office, and approved by the Office of Graduate and Professional Studies.

Additional Requirements

Additional Requirements

- Residence (p. 1194)
- Time Limit (p. 1194)
- Scholastic Requirements (p. 1194)
- Foreign Languages (p. 1194)
- Internship or Practicum (p. 1194)
- Application for Degree (p. 1194)

Residence

No residence requirement exists; however, attention is directed to the rules regarding Limitations on the Use of Transfer, Extension and Certain Other Courses.

Time Limit

All degree requirements for a master’s degree must be completed within a period of seven consecutive years. Coursework which is over seven calendar years old may not be applied to master’s degree. Time limits for coursework on the degree plan may also apply to transfer coursework.

Scholastic Requirements

To maintain good academic standing, a MPH student must maintain a minimum cumulative 3.000 GPR. If a student fails to attain a cumulative 3.000 GPR, he or she is placed on academic probation. A student on academic probation must raise his/her cumulative GPR to a 3.000 or above according to requirements to be set forth in the probation letter. Typically, this means raising the cumulative GPR to a 3.000 or higher by the end of the next long semester (fall/spring). If this requirement is not met, the School of Public Health’s Academic Affairs Office will recommend that the Office of Graduate and Professional Studies block the student from further enrollment. If a student is blocked from further enrollment in the MPH program, he or she shall not be permitted to enroll in other MPH courses.

Foreign Languages

No specific language requirement exists for the Master of Public Health degree program.

Internship or Practicum

Students in the MPH are required to fulfill a practicum requirement. Specific course names and numbers by department are PHEB 684, PHEO 684, PHPM 684, and HPCH 684. Instructions on submission and successful completion of the practicum are posted on the School of Public Health practicum website as well as with the department’s practicum coordinator. Students are to work specifically with their department practicum coordinator on meeting this curriculum course requirement. Students must be in good academic standing, have completed all core public health courses, or be enrolled concurrently in no more than one core course at the time they enroll in the 684 course, and have no registration or university blocks related to enrollment.

Application for Degree

For information on applying for your degree, please visit the Graduation (p. 26) section.

Master of Public Health in Epidemiology

The Master of Public Health (MPH) is a multi-disciplinary professional degree program designed to provide graduate level practical training in areas specializing in delivering public health practice. The degree is offered in all core disciplines of public health; epidemiology, biostatistics, environmental and occupational health, health policy and management, and health promotion and community health sciences. The Master of Public Health is a non-thesis degree program that has culminating experiences as part of the degree requirements. Students will participate
in a practicum demonstrating overall public health problem solving skills and a capstone class.

An individual with a baccalaureate degree or a physician licensed to practice medicine in the United States may apply for admission to the program. No coursework prerequisites exist for making a successful application to this degree program.

Maternal and Child Health - Certificate

The Department of Epidemiology and Biostatistics at the Texas A&M School of Public Health provides a Maternal and Child Health (MCH) certificate to increase MCH competencies to graduate-level students. This is an interdisciplinary certificate that partners with departments across the Texas A&M School of Public Health. Additionally, the MCH certificate offers electives from the College of Education and Human Development and the Bush School of Government and Public Service. The need for MCH public health professionals has been documented widely throughout the United States, as well as throughout the world. The United States ranks low on several health indicators for MCH populations. Most notability is the high rate of preterm birth. A summary of Title V national workforce needs emphasizes that quality MCH training is critical to strengthen the nationwide workforce given the shortage in this area. This certificate will develop student MCH competencies enabling graduates to improve health service delivery to all mothers, children and families. This certificate will focus on the foundations of MCH, such as understanding Title V programs, health disparities in MCH, life-course approach and general knowledge about MCH populations and common public health concerns. There is a special focus on program evaluation and community grant writing. Finally, we offer a number of electives from several departments in areas ranging from reproductive and perinatal epidemiology to the impact of policy and security on women’s health.

The degree programs in the Department of Health Policy and Management integrate instruction, research, and practice. The faculty and many of the students are engaged in substantial research and outreach efforts through several research and/or training focused centers and programs. Many other students are employed in hospitals, physician groups and other health organizations.

The School of Public Health offers state-of-the-art classrooms, labs, and offices that support the work of our department, students and faculty. The department’s talented faculty and several academic programs rely on these resources to serve a diverse student body at College Station and at several distance education sites across Texas.

For program curricula see Department of Health Policy and Management (http://sph.tamhsc.edu/hpm).

Master of Public Health in Health Policy and Management

The Master of Public Health (MPH) is a multi-disciplinary professional degree program designed to provide graduate level practical training in areas specializing in delivering public health practice. The degree is offered in all core disciplines of public health, epidemiology, biostatistics, environmental and occupational health, health policy and management,
and health promotion and community health sciences. The Master of Public Health is a non-thesis degree program that has culminating experiences as part of the degree requirements. Students will participate in a practicum demonstrating overall public health problem solving skills and a capstone class.

An individual with a baccalaureate degree or a physician licensed to practice medicine in the United States may apply for admission to the program. No coursework prerequisites exist for making a successful application to this degree program.

For degree curriculum see Department of Health Policy and Management (http://sph.tamhsc.edu/hpm)

Program Requirements

Program Requirements

- Student’s Advisory Committee (p. 1198)
- Degree Plan (p. 1198)
- Credit Requirement (p. 1198)
- Transfer of Credit (p. 1198)
- Limitations on the Use of Transfer, Extension and Certain Other Courses (p. 1198)

Student Advisory Committee

The Student Advisory Committee for the MPH consists of an assigned faculty advisor. After receiving admission to the program and before enrolling for coursework, the student will consult with their assigned faculty advisor to receive additional information related to curriculum and processing of the degree plan. The faculty advisor must have graduate faculty membership in the academic program. If at any point of the student’s time in pursuit of the degree the assigned advisor is no longer available, the department will assign a new advisor and require a comprehensive advisory session to ensure the student is making progress according to degree program requirements.

Degree Plan

The student’s advisor, in consultation with the student, will develop the proposed degree plan. The degree plan must be completed and filed with the Office of Graduate and Professional Studies prior to the deadlines imposed by the student’s college, and no later than the dates announced in the Office of Graduate and Professional Studies calendar of deadlines for graduation.

The proposed/final degree plan should be submitted through the online Document Processing Submission System located on the website https://ogsdpss.tamu.edu.

Additional coursework may be added to the approved degree plan by petition if it is deemed necessary by the advisor to correct deficiencies in the student’s academic preparation.

Credit Requirement

A minimum of 45 hours of coursework is required for the Master of Public Health degree. To demonstrate integration and application of subject matter learned and the development of written and oral communication skills, a student will be required to take SOPH 680 as part of the culminating experience requirement to graduate. Concentration and elective courses vary among the core disciplines and will be addressed during advising and creation of the degree plan. Electives may be taken upon approval/advice from the student’s assigned advisor and will be listed by rubric, section, and description in the degree plan.

Transfer of Credit

A student may transfer up to 9 hours of graduate credit to the Master of Public Health degree program on the advice and approval of the student’s advisory committee, department Chair, and school Academic Affairs Dean, and with the approval of the Office of Graduate and Professional Studies. Courses taken in residence at an accredited U.S. institution or approved international institution with a final grade of B or greater may be considered for transfer credit if, at the time the courses were completed, the courses would be accepted for credit toward a similar degree for a student in degree-seeking status at the host institution. Otherwise, the limitations stated in the preceding section apply. Courses in which no formal grades are given or in which grades other than letter grades (A or B) are earned for transfer credit. Courses appearing on the degree plan with grades of D, F, or U may not be absolved by transfer work. Credit for coursework submitted for transfer from any college or university must be shown in semester credit hours or equated to semester credit hours. An official transcript from the university at which the transfer coursework was taken must be sent directly to the Office of Admissions.

Courses used toward another degree at another institution may not be applied for graduate credit. If the course to be transferred was taken prior to the conferral of a degree at the transfer institution, a letter from the registrar at that institution stating that the course was not applied for credit toward the degree must be submitted to the Office of Graduate and Professional Studies.

Grades for courses completed at other institutions are not included in computing the GPR.

Limitations on the Use of Transfer, Extensions, and Certain Other Courses

If otherwise acceptable, certain courses may be used toward meeting credit-hour requirements for the master’s degree with the following limitations.

1. The maximum number of credit hours allowed toward the MPH as transfer credit is 9.
2. Courses previously used for another degree are not acceptable for credit.
3. A zero credit 684 and 685 course is only allowed for non-thesis master’s students. Other courses, including 691 research hours, are not eligible for zero credit.
4. A maximum of 6 hours of 684 (Professional Internship/Practicum), and 9 hours of 685 (Directed Studies), if approved on the degree plan.
5. Undergraduate courses are not allowed to transfer to the MPH degree program.
6. Continuing education courses may not be used for graduate credit.
7. Extension courses are not acceptable for credit.

Exceptions will be permitted only in unusual cases and when petitioned by the student’s advisory committee, department Chair, school Academic Affairs Office, and approved by the Office of Graduate and Professional Studies.
Additional Requirements

Scholastic Requirements
To maintain good academic standing, a MPH student must maintain a minimum cumulative 3.000 GPR. If a student fails to attain a cumulative 3.000 GPR, he or she is placed on academic probation. A student on academic probation must raise his/her cumulative GPR to a 3.000 or above according to requirements to be set forth in the probation letter. Typically, this means raising the cumulative GPR to a 3.000 or higher by the end of the next long semester (fall/spring). If this requirement is not met, the School of Public Health's Academic Affairs Office will recommend that the Office of Graduate and Professional Studies block the student from further enrollment. If a student is blocked from further enrollment in the MPH program, he or she shall not be permitted to enroll in other MPH courses.

Foreign Languages
No specific language requirement exists for the Master of Public Health degree program.

Internship or Practicum
Students in the MPH are required to fulfill a practicum requirement. Specific course names and numbers by department are PHEB 684, PHEO 684, PHPM 684, and HPCH 684. Instructions on submission and successful completion of the practicum are posted on the School of Public Health practicum website as well as with the department's practicum coordinator. Students are to work specifically with their department practicum coordinator on meeting this curriculum course requirement. Students must be in good academic standing, have completed all core public health courses, or be enrolled concurrently in no more than one core course at the time they enroll in the 684 course, and have no registration or university blocks related to enrollment.

Application for Degree
For information on applying for your degree, please visit the Graduation (p. 26) section.

Health Systems Management - Certificate
The Health Systems Management Certificate includes five courses from the Department of Health Policy & Management and is intended primarily for those who already hold a bachelor's degree and are, or expect to be, in administrative or supervisory roles, but lack formal training in health management. A list of the available courses are available at the Health Systems Management Certificate requirements website (p. 1199).

Students are not currently being admitted to this certificate program at this time.

Department of Health Promotion and Community Health Sciences

http://sph.tamhsc.edu/hpchs/index.html

Department Head: John Spengler, JD, PhD

The Department of Health Promotion and Community Health Sciences promotes healthy living and prepares students to identify the role of biological, behavioral, environmental, and social forces on population health. Our students will have the opportunity to apply these elements when planning and evaluating programs, services and policies designed to improve the health of individuals and communities.

Our health promotion and community health students have opportunities to work in a broad and diverse range of organizations. Our students have worked locally, state-wide, nationally and internationally for non-profits, government agencies and corporations in jobs that promote and improve health.

The Department offers the following degree programs:

- Master of Public Health in Health Promotion and Community Health Sciences
• Doctor of Public Health in Health Promotion and Community Health Sciences

For degree curricula see Department of Health Promotion and Community Health Sciences (http://sph.tamhsc.edu/hpchs).

Faculty

Burdine, James N, Professor
Hlth Promotion & Comm Hlth Sci
DrPH, The University of North Carolina at Chapel Hill, School of Public Helath, 1979

Campos-Bowers, Monica H, Instructional Assistant Professor
Hlth Promotion & Comm Hlth Sci

Masters

• Master of Public Health in Health Promotion and Community Health Sciences (p. 1200)

Doctoral

• Doctor of Public Health in Health Promotion and Community Health Sciences (p. 1202)

Certificates

• Global Health Certificate (p. 1207)
• Health Coaching for Chronic Disease Prevention and Management Certificate (p. 1208)

Master of Public Health in Health Promotion and Community Health Sciences

The Master of Public Health (MPH) is a multi-disciplinary professional degree program designed to provide graduate level practical training in areas specializing in delivering public health practice. The degree is offered in all core disciplines of public health; epidemiology, biostatistics, environmental and occupational health, health policy and management, and health promotion and community health sciences. The Master of Public Health is a non-thesis degree program that has culminating experiences as part of the degree requirements. Students will participate in a practicum demonstrating overall public health problem solving skills and a capstone class.

An individual with a baccalaureate degree or a physician licensed to practice medicine in the United States may apply for admission to the program. No coursework prerequisites exist for making a successful application to this degree program.

For degree curriculum see Department of Health Promotion and Community Health Sciences (http://sph.tamhsc.edu/hpchs)

Program Requirements

Program Requirements

• Student’s Advisory Committee (p. 1200)
• Degree Plan (p. 1201)
• Credit Requirement (p. 1201)
• Transfer of Credit (p. 1201)
• Limitations on the Use of Transfer, Extension and Certain Other Courses (p. 1201)

Student Advisory Committee

The Student Advisory Committee for the MPH consists of an assigned faculty advisor. After receiving admission to the program and before enrolling for coursework, the student will consult with their assigned faculty advisor to receive additional information related to curriculum and processing of the degree plan. The faculty advisor must have graduate faculty membership in the academic program. If at any point of the student’s time in pursuit of the degree the assigned advisor is no
Degree Plan

The student's advisor, in consultation with the student, will develop the proposed degree plan. The degree plan must be completed and filed with the Office of Graduate and Professional Studies prior to the deadlines imposed by the student's college, and no later than the dates announced in the Office of Graduate and Professional Studies calendar of deadlines for graduation.

The proposed/final degree plan should be submitted through the online Document Processing Submission System located on the website https://ogsdpss.tamu.edu.

Additional coursework may be added to the approved degree plan by petition if it is deemed necessary by the advisor to correct deficiencies in the student's academic preparation.

Credit Requirement

A minimum of 45 hours of coursework is required for the Master of Public Health degree. To demonstrate integration and application of subject matter learned and the development of written and oral communication skills, a student will be required to take SOPH 680 as part of the culminating experience requirement to graduate. Concentration and elective courses vary among the core disciplines and will be addressed during advising and creation of the degree plan. Electives may be taken upon approval/advice from the student's assigned advisor and will be listed by rubric, section, and description in the degree plan.

Transfer of Credit

A student may transfer up to 9 hours of graduate credit to the Master of Public Health degree program on the advice and approval of the student's advisory committee, department Chair, and school Academic Affairs Dean, and with the approval of the Office of Graduate and Professional Studies. Courses taken in residence at an accredited U.S. institution or approved international institution with a final grade of B or greater may be considered for transfer credit if, at the time the courses were completed, the courses would be accepted for credit toward a similar degree for a student in degree-seeking status at the host institution. Otherwise, the limitations stated in the preceding section apply. **Coursework in which no formal grades are given or in which grades other than letter grades (A or B) are earned (for example, CR, P, S, U, H, etc.) is not accepted for transfer credit.** Courses appearing on the degree plan with grades of D, F, or U may not be absolved by transfer work. Credit for coursework submitted for transfer from any college or university must be shown in semester credit hours or equated to semester credit hours. An official transcript from the university at which the transfer coursework was taken must be sent directly to the Office of Admissions.

Courses used toward another degree at another institution may not be applied for graduate credit. If the course to be transferred was taken prior to the conferral of a degree at the transfer institution, a letter from the registrar at that institution stating that the course was not applied for credit toward the degree must be submitted to the Office of Graduate and Professional Studies.

Grades for courses completed at other institutions are not included in computing the GPR.

Limitations on the Use of Transfer, Extensions, and Certain Other Courses

If otherwise acceptable, certain courses may be used toward meeting credit-hour requirements for the master's degree with the following limitations.

1. The maximum number of credit hours allowed toward the MPH as transfer credit is 9.
2. Courses previously used for another degree are not acceptable for credit.
3. A zero credit 684 and 685 course is only allowed for non-thesis master’s students. Other courses, including 691 research hours, are not eligible for zero credit.
4. A maximum of 6 hours of 684 (Professional Internship/Practicum), and 9 hours of 685 (Directed Studies), if approved on the degree plan.
5. Undergraduate courses are not allowed to transfer to the MPH degree program.
6. Continuing education courses may not be used for graduate credit.
7. Extension courses are not acceptable for credit.

Exceptions will be permitted only in unusual cases and when petitioned by the student's advisory committee, department Chair, school Academic Affairs Office, and approved by the Office of Graduate and Professional Studies.

Additional Requirements

**Additional Requirements**

- Residence (p. 1201)
- Time Limit (p. 1201)
- Scholastic Requirements (p. 1201)
- Foreign Languages (p. 1202)
- Internship or Practicum (p. 1202)
- Application for Degree (p. 1202)

Residence

No residence requirement exists; however, attention is directed to the rules regarding Limitations on the Use of Transfer, Extension and Certain Other Courses.

Time Limit

All degree requirements for a master's degree must be completed within a period of seven consecutive years. Coursework which is over seven calendar years old may not be applied to master's degree. Time limits for coursework on the degree plan may also apply to transfer coursework.

Scholastic Requirements

To maintain good academic standing, a MPH student must maintain a minimum cumulative 3.000 GPR. If a student fails to attain a cumulative 3.000 GPR, he or she is placed on academic probation. A student on academic probation must raise his/her cumulative GPR to a 3.000 or above according to requirements to be set forth in the probation letter. Typically, this means raising the cumulative GPR to a 3.000 or higher by the end of the next long semester (fall/spring). If this requirement is not met, the School of Public Health's Academic Affairs Office will recommend that the Office of Graduate and Professional Studies block the student from further enrollment. If a student is blocked from further
enrollment in the MPH program, he or she shall not be permitted to enroll in other MPH courses.

**Foreign Languages**

No specific language requirement exists for the Master of Public Health degree program.

**Internship or Practicum**

Students in the MPH are required to fulfill a practicum requirement. Specific course names and numbers by department are PHEB 684, PHEO 684, PHPM 684, and HPCH 684. Instructions on submission and successful completion of the practicum are posted on the School of Public Health practicum website as well as with the department's practicum coordinator. Students must be to work specifically with their department practicum coordinator on meeting this curriculum course requirement. Students must be in good academic standing, have completed all core public health courses, or be enrolled concurrently in no more than one core course at the time they enroll in the 684 course, and have no registration or university blocks related to enrollment.

**Application for Degree**

For information on applying for your degree, please visit the Graduation (p. 26) section.

**Doctor of Public Health in Health Promotion and Community Health Sciences**

The Doctor of Public Health (DrPH) is an advanced professional degree for those whose career goals are in the area of professional practice in public health, including current and potential leaders in public health practice. The DrPH prepares candidates for a career in high-level administration, teaching, or practice, where advance analytical and conceptual capabilities are requisite.

Applicants may choose a major in Health Promotion and Community Health Sciences or Epidemiology and Environmental Health. Applicants choosing the Epidemiology and Environmental Health may choose to focus on either epidemiology or environmental health concentration areas.

The programs are designed for the practitioner; a graduate may be expected to fill instructional, supervisory, and administrative positions in which educational services are to be rendered.

Applicants to the DrPH will hold a master's degree. For further information regarding admission, please visit http://sph.tamhsc.edu/future.

Although substantively different from the PhD degree in education, the DrPH degree requires equivalent admission qualifications, standards of scholarship and breadth and depth of study. For additional requirements, see the department doctoral handbook.

Because graduates of the program are expected to demonstrate a high level of professional skill and educational statesmanship, only those candidates who show a consistently high level of professional performance in their academic studies, in their role-related studies, in their internship experience, and in the completion of their records of study will be recommended for the degree.

Program Requirements

Program Requirements

- Student's Advisory Committee (p. 1203)
- Degree Plan (p. 1204)
- Transfer of Credit (p. 1204)
- Research Proposal (p. 1204)
- Examinations (p. 1204)
  - Preliminary Examination (p. 1204)
  - Preliminary Examination Format (p. 1205)
  - Preliminary Examination Scheduling (p. 1205)
  - Report of Preliminary Examination (p. 1205)
  - Retake of Failed Preliminary Examination (p. 1205)
  - Final Examination (p. 1206)
  - Report of Final Examination (p. 1206)
- Dissertation (p. 1206)

Student’s Advisory Committee

After receiving admission to graduate studies and enrolling, the student will consult with the head of his or her major or administrative department (or chair of the intercollegiate faculty) concerning appointment of the chair of the advisory committee. The student’s advisory committee will consist of no fewer than four members of the graduate faculty representative of the student’s several fields of study and research, where the chair or co-chair must be from the student’s department (or intercollegiate faculty, if applicable), and at least one or more of the members must have an appointment to a department other than the student’s major department. The outside member for a student in an interdisciplinary degree program must be from a department different from the chair of the student’s committee.

The chair, in consultation with the student, will select the remainder of the advisory committee. Only graduate faculty members located on the respective Texas A&M University campuses may serve as chair of a student’s advisory committee. Other Texas A&M University graduate faculty members located off-campus may serve as a member or co-chair (but not chair), with a member as the chair.

If the chair of a student’s advisory committee voluntarily leaves the University and the student is near completion of the degree and wants the chair to continue to serve in this role, the student is responsible for securing a current member of the University Graduate Faculty from the student’s academic program and located near the Texas A&M University campus site, to serve as the co-chair of the committee. The Department Head or Chair of Intercollegiate faculty may request in writing to the Associate Provost for Graduate and Professional Studies that a faculty member who is on an approved leave of absence or has voluntarily separated from the university, be allowed to continue to serve in the role of chair of a student’s advisory committee without a co-chair for us to one year. The students should be near completion of the degree. Extensions beyond the one year period can be granted with additional approval of the Dean.

The committee members’ signatures on the degree plan indicate their willingness to accept the responsibility for guiding and directing the entire academic program of the student and for initiating all academic actions concerning the student. Although individual committee members may be replaced by petition for valid reasons, a committee cannot resign en masse. The chair of the committee, who usually has immediate
supervision of the student's research and dissertation or record of study, has the responsibility for calling all meetings of the committee. The duties of the committee include responsibility for the proposed degree plan, the research proposal, the preliminary examination, the dissertation or record of study and the final examination. In addition, the committee, as a group and as individual members, is responsible for counseling the student on academic matters, and, in the case of academic deficiency, initiating recommendations to the Office of Graduate and Professional Studies.

Degree Plan

The student's advisory committee will evaluate the student's previous education and degree objectives. The committee, in consultation with the student, will develop a proposed degree plan and outline a research problem which, when completed, as indicated by the dissertation will constitute the basic requirements for the degree. The degree plan must be filed with the Office of Graduate and Professional Studies prior to the deadline imposed by the student's college and no later than 90 days prior to the preliminary examination.

This proposed degree plan should be submitted through the online Document Processing Submission System located on the website https://ogsdpss.tamu.edu. A minimum of 64 hours is required on the degree plan for the Doctor of Public Health for a student who has completed a master's degree. A student who has completed a DDS/DMD, DVM or a MD at a U.S. institution is also required to complete a minimum of 64 hours. A student who has completed a baccalaureate degree but not a master's degree will be required to complete a 96-hour degree plan. Completion of DDS/DMD, DVM or MD degrees at a foreign institution requires completion of a minimum of 96 hours for the Doctor of Public Health. A field of study may be primarily in one department or in a combination of departments. A degree plan must carry a reasonable amount of 691 (Research).

Additional coursework may be added by petition to the approved degree plan by the student's advisory committee if it is deemed necessary to correct deficiencies in the student's academic preparation. No changes can be made to the degree plan once the student's Request for Final Examination or Request for Final Examination Exemption is approved by the Office of Graduate and Professional Studies.

Approval to enroll in any professional course (900-level) should be obtained from the head of the department (or Chair of the intercollegiate faculty, if applicable) in which the course will be offered before including such a course on a degree plan.

No credit may be obtained by correspondence study, by extension or for any course of fewer than three weeks duration.

Transfer of Credit

Courses for which transfer credits are sought must have been completed with a grade of B or greater and must be approved by the student's advisory committee and the Office of Graduate and Professional Studies. These courses must not have been used previously for another degree. Except for officially approved cooperative doctoral programs, credit for thesis or dissertation research or the equivalent is not transferable. Credit for "internship" coursework in any form is not transferable. Courses taken in residence at an accredited U.S. institution or approved international institution with a final grade of B or greater will be considered for transfer credit if, at the time the courses were completed, the courses would be accepted for credit toward a similar degree for a student in degree-seeking status at the host institution. Credit for coursework taken by extension is not transferable. Coursework in which no formal grades are given or in which grades other than letter grades (A or B) are earned (for example, CR, P, S, U, H, etc.) is not accepted for transfer credit. Credit for coursework submitted for transfer from any college or university must be shown in semester credit hours, or equated to semester credit hours.

Courses used toward a degree at another institution may not be applied for graduate credit. If the course to be transferred was taken prior to the conferral of a degree at the transfer institution, a letter from the registrar at that institution stating that the course was not applied for credit toward the degree must be submitted to the Office of Graduate and Professional Studies.

Grades for courses completed at other institutions are not included in computing the GPR. An official transcript from the university at which transfer courses are taken must be sent directly to the Office of Admissions.

Research Proposal

The general field of research to be used for the dissertation should be agreed on by the student and the advisory committee at their first meeting, as a basis for selecting the proper courses to support the proposed research.

As soon thereafter as the research project can be outlined in reasonable detail, the dissertation research proposal should be completed. The research proposal should be approved at a meeting of the student's advisory committee, at which time the feasibility of the proposed research and the adequacy of available facilities should be reviewed. The approved proposal, signed by all members of the student's advisory committee, the head of the student's major department (or chair of the intercollegiate faculty, if applicable), must be submitted to the Office of Graduate and Professional Studies at least 20 working days prior to the submission of the Request for the Final Examination.

Compliance issues must be addressed if a graduate student is performing research involving human subjects, animals, infectious biohazards or recombinant DNA. A student involved in these types of research should check with the Office of Research Compliance and Biosafety at (979) 458-1467 to address questions about all research compliance responsibilities. Additional information can also be obtained on the website http://rcb.tamu.edu.

Examinations

Preliminary Examination for Doctoral Students

The student's major department (or chair of the interdisciplinary degree program faculty, if applicable) and his or her advisory committee may require qualifying, cumulative or other types of examinations at any time deemed desirable. These examinations are entirely at the discretion of the department and the student's advisory committee.

The preliminary examination is required. The preliminary examination for a doctoral student shall be given no earlier than a date at which the student is within 6 credit hours of completion of the formal coursework on the degree plan (i.e., all coursework on the degree plan except 681, 684, 690, 691, 692, 693, 695, 697, 791, or other graduate courses specifically designated as S/U in the course catalog). The student should complete the Preliminary Examination no later than the end of the semester following the completion of the formal coursework on the degree plan.
Preliminary Examination Format

The objective of preliminary examination is to evaluate whether the student has demonstrated the following qualifications:

a. a mastery of the subject matter of all fields in the program;
b. an adequate knowledge of the literature in these fields and an ability to carry out bibliographical research;
c. an understanding of the research problem and the appropriate methodological approaches.

The format of the preliminary examination shall be determined by the student’s department (or interdisciplinary degree program, if applicable) and advisory committee, and communicated to the student in advance of the examination. The exam may consist of a written component, oral component, or combination of written and oral components.

The preliminary exam may be administered by the advisory committee or a departmental committee; herein referred to as the examination committee.

Regardless of exam format, a student will receive an overall preliminary exam result of pass or fail. The department (or interdisciplinary degree program, if applicable) will determine how the overall pass or fail result is determined based on the exam structure and internal department procedures. If the exam is administered by the advisory committee, each advisory committee member will provide a pass or fail evaluation decision.

Only one advisory committee substitution is allowed to provide an evaluation decision for a student’s preliminary exam, and it cannot be the committee chair.

If a student is required to take, as a part of the preliminary examination, a written component administered by a department or interdisciplinary degree program, the department or interdisciplinary degree program faculty must:

a. offer the examination at least once every six months. The departmental or interdisciplinary degree program examination should be announced at least 30 days prior to the scheduled examination date.
b. assume the responsibility for marking the examination satisfactory or unsatisfactory, or otherwise graded, and in the case of unsatisfactory, stating specifically the reasons for such a mark.
c. forward the marked examination to the chair of the student’s advisory committee within one week after the examination.

Preliminary Examination Scheduling

Prior to commencing any component of the preliminary examination, a departmental representative or the advisory committee chair will review the eligibility criteria with the student, using the Preliminary Examination Checklist to ensure the student is eligible for the preliminary examination. The following list of eligibility requirements applies.

• Student is registered at Texas A&M University for a minimum of one semester credit hour in the long semester or summer term during which any component of the preliminary examination is held. If the entire examination is held between semesters, then the student must be registered for the term immediately preceding the examination.
• An approved degree plan is on file with the Office of Graduate and Professional Studies prior to commencing the first component of the examination.
• Student’s cumulative GPR is at least 3.000.
• Student’s degree plan GPR is at least 3.000.
• All English language proficiency requirements are satisfied.
• At the end of the semester in which at least the first component of the exam is given, there are no more than 6 hours of coursework remaining on the degree plan (except 681, 684, 690, 691, 692, 693, 695, 697, 791, or other graduate courses specifically designated as S/U in the course catalog). The head of the student’s department (or Chair of the Interdisciplinary Degree Program, if applicable) has the authority to approve a waiver of this criterion.

Report of Preliminary Examination

Credit for the preliminary examination is not transferable in cases where a student changes degree programs after passing a preliminary exam.

If a written component precedes an oral component of the preliminary exam, the chair of the student’s examination committee is responsible for making all written examinations available to all members of the committee. A positive evaluation of the preliminary exam by all members of a student’s examination committee with at most one dissenting vote is required to pass a student on his or her preliminary exam.

The student’s department will promptly report the results of the Preliminary Examination to the Office of Graduate and Professional Studies via the Report of Doctoral Preliminary Examination form. The Preliminary Examination checklist form must also be submitted. These forms should be submitted to the Office of Graduate and Professional Studies within 10 working days of completion of the preliminary examination.

The Report of the Preliminary Examination form must be submitted with original signatures of the approved examination committee members. If an approved examination committee member substitution (one only) has been made, that signature must also be included, in place of the committee member, on the form submitted to the Office of Graduate and Professional Studies. The original signature of the department head is also required on the form.

After passing the required preliminary examination for the doctoral degree, the student must complete the final examination for the degree within four calendar years. Otherwise, the student will be required to repeat the preliminary examination.

Retake of Failed Preliminary Examination

Upon approval of the student’s examination committee, with no more than one member dissenting, and approval of the Office of Graduate and Professional Studies, a student who has failed the preliminary examination may be given one re-examination. Adequate time must be given to permit the student to address the inadequacies emerging from the first preliminary examination. The examination committee must agree upon and communicate in writing to the student, an adequate time-frame from the first examination (normally six months) to retest, as well as a detailed explanation of the inadequacies emerging from the examination. The student and the committee should jointly negotiate a mutually acceptable date for this retest. When providing feedback...
on inadequacies, the committee should clearly document expected improvements that the student must be able to exhibit in order to retake the exam. The examination committee will document and communicate the time-frame and feedback within 10 working days of the exam that was not passed.

Final Examination for Doctoral Students

The candidate for the doctoral degree must pass a final examination by deadline dates announced in the “Office of Graduate and Professional Studies Calendar” each semester. The doctoral student is allowed only one opportunity to take the final examination.

No unabsolved grades of D, F, or U for any course can be listed on the degree plan. The student must be registered for any remaining hours of 681, 684, 690, 691, 692, 791 or other graduate courses specifically designated as S/U in the course catalog during the semester of the final exam. No student may be given a final examination until they have been admitted to candidacy and their current official cumulative and degree plan GPAs are 3.00 or better.

To be admitted to candidacy for a doctoral degree, a student must have:

1. completed all formal coursework on the degree plan with the exception of any remaining 681, 684, 690 and 691, 692 (Professional Study), or 791 hours,
2. a 3.0 Graduate GPA and a Degree Plan GPA of at least 3.0 with no grade lower than C in any course on the degree plan,
3. passed the preliminary examination,
4. submitted an approved dissertation proposal,
5. met the residence requirements.

The request to hold and announce the final examination must be submitted to the Office of Graduate and Professional Studies a minimum of 10 working days in advance of the scheduled date. Any changes to the degree plan must be approved by the Office of Graduate and Professional Studies prior to the submission of the request for final examination.

The student’s advisory committee will conduct this examination. The final examination is not to be administered until the dissertation or record of study is available in substantially final form to the student’s advisory committee, and all concerned have had adequate time to review the document. Whereas the final examination may cover the broad field of the candidate’s training, it is presumed that the major portion of the time will be devoted to the dissertation and closely allied topics. Persons other than members of the graduate faculty may, with mutual consent of the candidate and the chair of the advisory committee, be invited to attend a final examination for an advanced degree. A positive vote by all members of the graduate committee with at most one dissension is required to pass a student on his or her exam. A department can have a stricter requirement provided there is consistency within all degree programs within a department. Upon completion of the questioning of the candidate, all visitors must excuse themselves from the proceedings.

Report of Final Examination

The student’s department will promptly report the results of the Final Examination to the Office of Graduate and Professional Studies via the Report of Doctoral Final Examination form. These forms should be submitted to the Office of Graduate and Professional Studies within 10 working days of completion of the final examination. The Office of Graduate and Professional Studies must be notified in writing of any cancellations.

A positive evaluation of the final exam by all members of a student’s advisory committee with at most one dissonance is required to pass a student on his or her final exam. The Report of the Final Examination Form must be submitted with original signatures of only the committee members approved by the Office of Graduate and Professional Studies. If necessary, multiple copies of the form may be submitted with different committee member original signatures. If an approved committee member substitution (1 only) has been made, his/her signature must be included on the form submitted to the Office of Graduate and Professional Studies.

Dissertation

The ability to perform independent research must be demonstrated by the dissertation, which must be the original work of the candidate. Whereas acceptance of the dissertation is based primarily on its scholarly merit, it must also exhibit creditable literary craftsmanship. The format of the dissertation must be acceptable to the Office of Graduate and Professional Studies. Guidelines for the preparation of the dissertation are available in the Thesis Manual, which is available online at http://ogaps.tamu.edu.

After successful defense and approval by the student’s advisory committee and the head of the student’s major department (or chair of the collegiate faculty, if applicable), a student must submit his/her dissertation in electronic format as a single PDF file. The PDF file must be uploaded to the website, http://ogaps.tamu.edu. Additionally, a signed paper approval form with original signatures must be received by the Office of Graduate and Professional Studies. Both the PDF file and the signed approval form are required by the deadline.

Deadline dates for submitting are announced each semester or summer term in the Office of Graduate and Professional Studies Calendar (see Time Limit statement). These dates also can be accessed via the website http://ogaps.tamu.edu.

Each student who submits a document for review is assessed a one-time thesis/dissertation processing fee paid through Student Business Services. This processing fee is for the thesis/dissertation services provided. After commencement, dissertations are digitally stored and made available through the Texas A&M Libraries.

A dissertation that is deemed unacceptable by the Office of Graduate and Professional Studies because of excessive corrections will be returned to the student’s department head or chair of the collegiate faculty. The manuscript must be resubmitted as a new document, and the entire review process must begin anew. All original submittal deadlines must be met during the resubmittal process in order to graduate.

Additional Requirements

Additional Requirements

• Residence (p. 1207)
• Time Limit (p. 1207)
• Continuous Registration (p. 1207)
• Admission to Candidacy (p. 1207)
• Foreign Languages (p. 1207)
• Internship or Practicum (p. 1207)
• 130 Hour Cap (for DrPH) (p. 1207)
• Application for Degree (p. 1207)

Residence
A student who enters the doctoral degree program with a baccalaureate degree must spend one academic year plus one semester in resident study at Texas A&M University. A student who holds master’s degree when he/she enters doctoral degree program must spend one academic year in resident study. One academic year may include two adjacent regular semesters or one regular semester and one adjacent 10-week summer semester. The third semester is not required to be adjacent to the one year. Enrollment for each semester must be a minimum of 9 credit hours each to satisfy the residence requirement.

To satisfy the residence requirement, the student must complete a minimum of 9 credit hours per semester or 10-week summer semester in resident study at Texas A&M University for the required period. A student who enters a doctoral degree program with a baccalaureate degrees may fulfill residence requirements in excess of one academic year (18 credit hours) by registration during summer sessions or by completion of a less-than-full course load (in this context a full course load is considered 9 credit hours per semester).

Students who are employed full-time while completing their degree may fulfill total residence requirements by completion of less-than-full time course loads each semester. In order to be considered for this, the student is required to submit a Petition for Waivers and Exceptions along with verification of his/her employment to the Office of Graduate and Professional Studies. An employee should submit verification of his/her employment at the time he/she submits the degree plan. See Registration. (p. 22)

See Residence Requirements (p. 22).

Time Limit
All requirements for doctoral degrees must be completed within a period of 10 consecutive calendar years for the degree to be granted. A course will be considered valid until 10 years after the end of the semester in which it is taken. Graduate credit for coursework more than 10 calendar years old at the time of the final oral examination may not be used to satisfy degree requirements.

After passing the required preliminary oral and written examinations for a doctoral degree, the student must complete the final examination within 4 calendar years. Otherwise, the student will be required to repeat the preliminary examination.

A final corrected version of the dissertation or record of study in electronic format as a single PDF file must be cleared by the Office of Graduate and Professional Studies no later than one year after the final examination or within the 10-year time limit, whichever occurs first. Failure to do so will result in the degree not being awarded.

Continuous Registration
A student in a program leading to a Doctor of Public Health who has completed all coursework on his/her degree plan other than 691 (Research) are required to be in continuous registration until all requirements for the degree have been completed. See Continuous Registration Requirements (p. 28).

Admission to Candidacy
To be admitted to candidacy for a doctoral degree, a student must have:

1. completed all formal coursework on the degree plan with the exception of any remaining 681, 684, 690, 691 and 791.
2. a 3.0 Graduate GPA and a Degree Plan GPA of at least 3.0 with no grade lower than C in any course on the degree plan,
3. passed the preliminary examination (written and oral portions),
4. submitted an approved dissertation proposal,
5. met the residence requirements.

The final examination will not be authorized for any doctoral student who has not been admitted to candidacy.

Foreign Languages
A student is required to possess a competent command of English. For English language proficiency requirements, see the Admissions section of this catalog. The doctoral (PhD) foreign language requirement at Texas A&M University is a departmental option, to be administered and monitored by the individual departments of academic instruction.

Internship or Practicum
Students in the DRPH are required to fulfill a practicum requirement. Specific course names and numbers by department are PHEB 684, PHEO 684, PHPM 684, and HPCH 684. Instructions on submission and successful completion of the practicum are posted on the School of Public Health practicum website as well as with the department’s practicum coordinator. Students are to work specifically with their department practicum coordinator on meeting this curriculum course requirement. Students must be in good academic standing, have completed all core public health courses, or be enrolled concurrently in no more than one core course at the time they enroll in the 684 course, and have no registration or university blocks related to enrollment.

130 Hour Cap (for DrPH)
There is a state mandated cap on number of hours a student can enroll in without penalty. The cap is currently 130 hours (approximately 5 and one-half years), and once students reach this cap, they are required to pay out-of-state tuition on all subsequent hours until they graduate.

Application for Degree
For information on applying for your degree, please visit the Graduation (p. 26) section.

Global Health - Certificate
This interdisciplinary certification is available to all Master’s students at Texas A&M. Its purpose is to teach those who are interested in public health about global perspectives on the topic, encourage students to consider careers in a variety of settings around the world, and to promote research and innovation in addressing the myriad public health problems seen around the world. With a cross-disciplinary perspective, students are assured of receiving a broad understanding of global health challenges and opportunities.

Total Semester Credit Hours 15

1 MPH students must complete an international or an international-serving practicum placement through their department (HPCH 684). Non-MPH students must complete SOPH 670, International Practicum.

Certificate classes will be considered for inclusion as electives on MPH degree plans. Inclusion on other degree plans will be at the discretion of the applicable school or college.

Health Coaching for Chronic Disease Prevention and Management - Certificate

Overview

The Department of Health Promotion and Community Health Sciences offers a Health Coaching for Chronic Disease Prevention and Management Certificate.

The Affordable Care Act and the increasing need to prevent and treat chronic diseases through behavioral changes are creating new employment opportunities for those who have recognizable credentials (certification) in an increasingly recognized specialty (health coaching). The Department of Health Promotion and Community Health Sciences at the Texas A&M School of Public Health has been training health professionals in health behavior change techniques for almost twenty years. And now, we have a new program designed especially to train Health Coaches.

Health coaches are a new and vital part of our evolving health care system. They work independently or with primary care providers and employers to help clients, patients and employees achieve health care goals. The benefits to using a health coach are substantial: they can tailor a health promotion program to a client; they can help primary care providers more efficiently and effectively deliver care; and they can help employers reduce health care costs and maintain a healthier workforce.

Our program is unique in several ways:

- It is focused on the prevention and management of chronic disease — it is not an athletic training program.
- It contains graduate-level training on the etiology of common chronic diseases, so you can speak with confidence to health care providers and to clients.
- It is based on a rigorous up-to-date review of diet and lifestyle research.
- It requires mastery of current clinical guidelines for the prevention and treatment of common chronic diseases.
- It provides focused training and practice in techniques of motivational interviewing and other valuable behavior change techniques.

Computational Sciences - Certificate

The Institute for Scientific Computation developed the Computational Sciences Certificate Program to meet the increased need for computational techniques that help solve complex science and engineering problems. This program targets science and engineering students enrolled in graduate studies, providing them with a broad-based multidisciplinary enhancement to their degree program and preparing them with the intellectual infrastructure necessary as a leader in computational science, engineering, and technology. By completing this certification program, a graduate will receive an official certified transcript that will add value and marketability to their advanced degree. The Computational Sciences Certificate Program provides formal documentation on a student’s transcript that they successfully completed courses focused on computational aspects that supplement their degree in science or engineering. To fulfill the certification requirements, a student must complete four total courses (one core and three electives), as described by the program curriculum, and a capstone project within their home department. For more information, visit http://isc.tamu.edu/.

1 MATH 609 will also satisfy the CSCE 653 prerequisite.
2 With approval by the director of the Institute for Scientific Computation (ISC), student may substitute a course outside those listed as elective options. In such situations, the student must justify the substitution to and seek approval from the ISC’s director prior to enrolling in the course. The director will include their support for the substitution in a memorandum to the Office of Graduate Studies (OGS) after the student files their degree plan with OGS and copies of these documents with the ISC.
3 The capstone project’s goal is to provide students with experience in the computational sciences. The capstone project may be fulfilled by:
   1. an independent study graduate course within the student’s home department, or
   2. an independent study graduate course outside the student’s home department, or
   3. as part of a MS thesis or project required by the student’s home department, or
   4. as part of a PhD dissertation.

To fulfill this requirement, the ISC’s associate director or director must approve the capstone project, certify its computational component, and document its completion.

Department of Biology

http://www.bio.tamu.edu

Head: T. McKnight

Resources for Graduate Study

The Department of Biology offers graduate programs designed to prepare students for careers in academic institutions, government agencies and industry. The Biological Sciences Complex is centrally located on the campus of Texas A&M University. Graduate research is emphasized in over 50 laboratories that contain modern and sophisticated instrumentation for cellular, molecular, organismal and ecological studies. These laboratories provide opportunities for a broad
spectrum of research specializations. The Microscopy Imaging Center, animal care facilities and a state-of-the-art DNA sequencing laboratory are among the many facilities housed in the Biological Sciences Complex.

The Department of Biology faculty has research interests that interface with those of faculty in the Colleges of Agriculture and Life Sciences, Geosciences, Medicine and Veterinary Medicine. Biology faculty participate in interdisciplinary programs in biological clocks, filamentous fungi, genetics, genomics, neuroscience and plant sciences. Cooperation is encouraged to broaden the research experience of graduate students.

Areas of Specialization in Graduate Research

PhD and MS degrees are offered in Biology and Microbiology. General areas of research interests within these degrees include:

Cellular and Developmental Biology
Plant protoplast and tissue culture, transformation and regeneration; molecular biology and genetics of development and differentiation; nuclear organization; developmental neurobiology; cell surface interactions; physiology of photosynthesis.

Evolutionary Biology
Modern and classical approaches to plant and animal systematics and evolution; genomic and biochemical evolution; cytogenetics.

Molecular Biology
DNA and RNA isolation, cloning and sequencing; gene isolation, characterization, transfer and expression; bacterial and phage genetics; molecular processes of differentiation and embryogenesis; molecular microbiology and virology; genomics and informatics.

Organismal Biology
Comparative endocrinology and physiology; neurobiology; invertebrate ecology and ethology; marine biology; biological clocks.

Entrance Requirements

Coursework taken at the baccalaureate level normally must include mathematics through calculus, statistics, chemistry including organic chemistry, biochemistry, physics, genetics and adequate preparation in a biological science. Any remedial work will be in addition to the semester hours required for the degree. Graduate admissions decisions are based on students’ academic record, research experience, letters of recommendation, GRE scores (verbal, quantitative and analytical) and suitability of students’ research interests for programs in the department. For information about admissions, contact the Graduate Advisor, Department of Biology or visit us on the website at http://www.bio.tamu.edu.

Language Requirement

The Department of Biology has no foreign language requirement for any graduate degree program.

Master of Science in Biology

The Master of Science (MS) curriculum is designed to develop new understanding through research and creativity. Students have the option to pursue a thesis or non-thesis Master of Science degree.

Steps to Fulfill Master’s Degree Requirements

1. Meet with departmental graduate advisor to plan course of study for first semester. 
   When: Before first semester registration. 
   Approved by: Graduate advisor or chair of the intercollegiate faculty.

2. Establish advisory committee. Submit a degree plan.
   When: Prior to the deadline imposed by the student’s college and no later than 90 days prior to final oral or thesis defense.
   Approved by: Advisory committee, department head or chair of the intercollegiate faculty, and Office of Graduate and Professional Studies (OGAPS).

3. If thesis is required, submit thesis research proposal and research proposal approval form to the Office of Graduate and Professional Studies.
   When: At least 20 working days prior to the submission of the Request for the Final Examination.
   Approved by: Advisory committee, department head or chair of the intercollegiate faculty, Research Compliance and Biosafety, and OGAPS.

4. Apply for degree; pay graduation fee.
   When: During the first week of the final semester, see OGAPS calendar.

5. Check to be sure degree program and advisory committee are up-to-date, and coursework is complete.
   When: Well before submitting request to schedule final examination.

6. Complete residence requirement.
   When: If applicable, before or during final semester.
   Approved by: OGAPS.

Masters
- Master of Science in Biology (p. 1212)
- Master of Science in Microbiology (p. 1222)

Doctoral
- Doctor of Philosophy in Biology (p. 1216)
- Doctor of Philosophy in Microbiology (p. 1226)
Submit request to schedule final examination. When: Must be received by OGAPS at least 10 working days before exam date. See OGAPS calendar for deadlines. Approved by: Advisory committee, department head or chair of the intercollegiate faculty, and OGAPS.

Successfully complete final examination. When: The Report of the Final Examination Form should be submitted to OGAPS within 10 days following the exam. Approved by: Advisory committee and OGAPS.

If required, upload one approved final copy of thesis as a single PDF file to etd.tamu.edu and submit the fully signed thesis approval form to the Office of Graduate and Professional Studies. When: See OGAPS calendar for deadlines. Approved by: Advisory committee, department head or chair of the intercollegiate faculty and OGAPS.

Graduation; arrange for cap and gown. For more information, visit http://graduation.tamu.edu.

1 The online Document Processing Submission System is located on the website https://ogsdpss.tamu.edu.
2 Complete the application for degree form via the student’s Howdy portal.

Program Requirements

Student’s Advisory Committee

After receiving admission to graduate studies and enrolling for coursework, the student will consult with the head of his or her major or administrative department (or intercollegiate faculty, if applicable) concerning appointment of the chair of his or her advisory committee. The student’s advisory committee for the MS degree will consist of no fewer than three members of the graduate faculty, representative of the student’s fields of study and research. The chair or the co-chair of the advisory committee must be from the student’s major department (or intercollegiate faculty, if applicable), and at least one or more of the members must have an appointment to a department other than the student’s major department. The outside member for students in an interdisciplinary program must have an appointment to a department different from the chair of the student’s committee.

The chair, in consultation with the student, will select the remainder of the advisory committee. The student will interview each prospective committee member to determine whether he or she is willing to serve. Only graduate faculty members located on Texas A&M University campuses may serve as chair of a student’s advisory committee. Other graduate faculty members located off campus may serve as a member or co-chair (but not chair) with a member as the chair. The chair of the committee, who usually has immediate supervision of the student’s research and thesis, has the responsibility for calling required meetings of the committee and for calling meetings at any other time considered desirable.

If the chair of a student’s advisory committee voluntarily leaves the University and the student is near completion of the degree and wants the chair to continue to serve in this role, the student is responsible for securing a current member of the University Graduate Faculty, from the student’s academic program and located near the Texas A&M University campus site, to serve as the co-chair of the committee. The Department Head or Chair of Intercollegiate faculty may request in writing to the Associate Provost for Graduate and Professional Studies that a faculty member who is on an approved leave of absence or has voluntarily separated from the university, be allowed to continue to serve in the role of chair of a student’s advisory committee without a co-chair for us to one year. The students should be near completion of the degree. Extensions beyond the one year period can be granted with additional approval of the Dean.

If the chair of the student’s advisory committee is unavailable for an extended time in any academic period during which the student is involved in activities relating to an internship, thesis or professional paper, and is registered for courses such as 684, 691, 692 or 693, the student may request, in writing, that the department head appoint an alternate advisory committee chair during the interim period.

The duties of the committee include responsibility for the proposed degree plan, the research proposal, the thesis and the final examination. In addition, the committee as a group and as individual members are responsible for advising the student on academic matters, and, in the case of academic deficiency, initiating recommendations to the Office of Graduate and Professional Studies.

The committee members’ approval on the degree plan indicate their willingness to accept the responsibility for guiding and directing the entire academic program of the student and for initiating all academic actions concerning the student. Although individual committee members may be replaced by petition for valid reasons, a committee cannot resign en masse.

Degree Plan

The student’s advisory committee, in consultation with the student, will develop the proposed degree plan. The degree plan must be completed and filed with the Office of Graduate and Professional Studies prior to the deadline imposed by the student’s college or interdisciplinary degree program, if applicable, and no later than 90 days prior to the date of the final oral examination or thesis defense.
A student should submit the degree plan using the online Document Processing Submission System (http://ogsdpss.tamu.edu).

A student submitting a proposed degree plan for a Master of Science degree should designate on the official degree plan the appropriate program option.

Additional coursework may be added to the approved degree plan by petition if it is deemed necessary by the advisory committee to correct deficiencies in the student's academic preparation. No changes can be made to the degree plan once the student's Request for Final Examination or Request for Final Examination Exemption is approved by the Office of Graduate and Professional Studies.

Credit Requirement

A minimum of 32 semester credit hours of approved courses and research is required for the thesis option Master of Science degree.

A minimum of 36 semester credit hours of approved coursework is required for the Non-Thesis Option.

Ordinarily the student will devote the major portion of his or her time to work in one or two closely related fields. Other work will be in supporting fields of interest.

Transfer of Credit

A student who has earned 12 hours of graduate credit in residence at Texas A&M University may be authorized to transfer courses in excess of the limits prescribed below upon the advice of the advisory committee and with the approval of the Office of Graduate and Professional Studies. Courses taken in residence at an accredited U.S. institution or approved international institution with a final grade of B or greater may be considered for transfer credit if, at the time the courses were completed, the courses would be accepted for credit toward a similar degree for a student in degree-seeking status at the host institution. Otherwise, the limitations stated in the following section apply. Courses used toward a degree at another institution may not be applied for graduate credit. If the course to be transferred was taken prior to the conferral of a degree at the transfer institution, a letter from the registrar at that institution stating that the course was not applied for credit toward the degree must be submitted to the Office of Graduate and Professional Studies.

Courses used toward a degree at another institution may not be applied for graduate credit. If the course to be transferred was taken prior to the conferral of a degree at the transfer institution, a letter from the registrar at that institution stating that the course was not applied for credit toward the degree must be submitted to the Office of Graduate and Professional Studies.

Grades for courses completed at other institutions are not included in computing the GPR.

Limitations on the Use of Transfer, Extension and Certain Other Courses

Some departments may have more restrictive requirements for transfer work. If otherwise acceptable, certain courses may be used toward meeting credit-hour requirements for the master's degree under the following limitations.

1. The maximum number of credit hours which may be considered for transfer credit is the greater of 12 hours or one-third (1/3) of the total hours of a degree plan. The following restrictions apply:
   • Graduate and/or upper-level undergraduate courses taken in residence at an accredited U.S. institution, or approved international institution with a final grade of B or greater will be considered for transfer credit if, at the time the courses were completed, the student was in degree-seeking status at Texas A&M University, or the student was in degree-seeking status at the institution at which the courses were taken; and if the courses would be accepted for credit toward a similar degree for a student in degree-seeking status at the host institution.
   • Courses previously used for another degree are not acceptable for degree plan credit.

2. The maximum number of credit hours taken in post-baccalaureate non-degree (G6) classification at Texas A&M University which may be considered for application to the degree plan is 12.

3. A zero credit 684 and 685 course is only allowed for non-thesis master's students. Other courses, including 691 research hours, are not eligible for zero credit.

4. Not more than 12 hours may be used in any combination of the following categories:
   • Not more than 8 hours in the combination of 691 (research), 684 (Professional Internship) or may be used.
   • Not more than 8 hours of 685 (Directed Studies) may be used.
   • Not more than 3 hours of 690 (Theory of Research) may be used.
   • Not more than 3 hours of 695 (Frontiers in Research) may be used.

5. A maximum of 2 hours of Seminar (681).

6. A maximum of 9 hours of advanced undergraduate courses (300- or 400-level).

7. For graduate courses of three weeks’ duration or less, taken at other institutions, up to 1 hour of credit may be obtained for each five-day week of coursework. Each week of coursework must include at least 15 contact hours.

8. Continuing education courses may not be used for graduate credit.

9. Extension courses are not acceptable for credit.

Exceptions will be permitted only in unusual cases and when petitioned by the student's advisory committee and approved by the Office of Graduate and Professional Studies.

Thesis Option

An acceptable thesis is required for the Master of Science degree for a student who selects the thesis option program. The finished work must reflect a comprehensive understanding of the pertinent literature and express in clear English, the problem(s) for study, the method, significance and results of the student's original research. Guidelines for the preparation of the thesis are available in the Thesis Manual, which is available online at the Office of Graduate and Professional Studies website.

After successful defense (or exemption) and approval by the student's advisory committee and the head of the student's major department (or chair of the intercollegiate faculty, if appropriate), the student must submit his/her thesis in electronic format as a single PDF file. The PDF file must be uploaded to the Office of Graduate and Professional Studies.
Deadline dates for submitting the thesis are announced each semester or summer term in the “Office of Graduate and Professional Studies Calendar” (see Time Limit statement). These dates also can be accessed via the Office of Graduate and Professional Studies website.

Each student who submits a document for review is assessed a one-time thesis/dissertation processing fee through Student Business Services. This processing fee is for the thesis/dissertation services provided. After commencement, theses and dissertations are digitally stored and made available through the Texas A&M Libraries.

A thesis that is deemed unacceptable by the Office of Graduate and Professional Studies because of excessive corrections will be returned to the student’s department head (or chair of the intercollegiate faculty, if applicable). The manuscript must be resubmitted as a new document, and the entire review process must begin again. All original submittal deadlines must be met during the resubmittal process to graduate that semester.

Thesis Proposal

For the thesis option Master of Science degree, the student must prepare a thesis proposal for approval by the advisory committee and the head of the major department or chair of the interdisciplinary faculty, if applicable. This proposal must be submitted to the Office of Graduate and Professional Studies at least 20 working days prior to the submission of the request for the final examination.

Compliance issues must be addressed if a graduate student is performing research involving human subjects, animals, infectious biohazards and recombinant DNA. A student involved in these types of research should check with the Office of Research Compliance and Biosafety at (979) 458-1467 to address questions about all research compliance responsibilities. Additional information can also be obtained on the Office of Research Compliance and Biosafety website.

Final Examination/Thesis Defense

A student must pass a final examination by dates announced each semester or summer term in the Office of Graduate and Professional Studies Calendar. To be eligible to take the final examination, a student’s GPR must be at least 3.000 for courses on the degree plan and for all courses completed at Texas A&M which are eligible to be applied to a graduate degree, and there must be no unabsolved grades of D, F or U for any course listed on the degree plan. To absolve a deficient grade, the student must repeat the course at Texas A&M University and achieve a grade of C or better. All coursework on the degree plan must have been completed with the exception of those hours for which the student is registered. For thesis-option students, an approved thesis proposal must be on file in the Office of Graduate and Professional Studies according to published deadlines prior to the final examination or submission of the request for exemption from the final examination.

A request to hold and announce the final examination must be submitted to the Office of Graduate and Professional Studies a minimum of 10 working days in advance of the scheduled date for the examination. The Office of Graduate and Professional Studies must be notified in writing of any cancellations. A student may be given only one opportunity to repeat the final examination for the master’s degree and that must be within a time period that does not extend beyond the end of the next regular semester (summer terms are excluded).

For thesis option students, the final examination covers the thesis and all work taken on the degree plan and at the option of the committee may be written or oral or both. The final examination may not be administered before the thesis is available to all members of the student’s advisory committee in substantially final form, and all members have had adequate time to review the document. The examination is conducted by the student’s advisory committee as finally constituted. A thesis option student must be registered in the University in the semester or summer term in which the final examination is taken. Persons other than members of the graduate faculty may, with mutual consent of the candidate and the major professor, attend final examinations for advanced degrees. Upon completion of the questioning of the candidate, all visitors must excuse themselves from the proceedings. A positive vote by all members of the graduate committee with at most one dissenision is required to pass a student on his or her exam. A department, or interdisciplinary degree program, may have a stricter requirement provided there is consistency within all degree programs within a department or interdisciplinary degree program.

The Report of the Final Examination Form must be submitted with original signatures of only the committee members approved by the Office of Graduate and Professional Studies. If an approved committee member substitution (1 only) has been made, his/her signature must also be submitted to the Office of Graduate and Professional Studies. If necessary, multiple copies of the form may be submitted with different committee member original signatures. If an approved committee member substitution (1 only) has been made, his/her signature must be included on the form submitted to the Office of Graduate and Professional Studies.

A thesis option candidate may petition to be exempt from his/her final examination provided his/her degree plan GPR is 3.500 or greater and he/she has the approval of the advisory committee, the head of the student’s major department, or intercollegiate chair, if appropriate, and the Office of Graduate and Professional Studies. It is required that the petition for exemption be submitted the same semester the student intends to submit the thesis.

Non-Thesis Option

For non-thesis option students, a final comprehensive examination may be required.

The final exam cannot be held prior to the mid point of the semester if questions on the exam are based on courses in which the student is currently enrolled. If a student has completed all required degree plan coursework, the student is not required to be registered for classes in the semester the final examination is administered (unless he/she holds an assistantship). For specific final examination requirements, a student should check the program requirements for the degree for which he/she is pursuing.

Exam results must be submitted with original signatures of only the committee members approved by the Office of Graduate and Professional Studies. If an approved committee member substitution (1 only) has been made, his/her signature must also be submitted to the Office of Graduate and Professional Studies.

A student pursuing the non-thesis option is not allowed to enroll in 691 (research) for any reason and 691 may not be used for credit toward a non-thesis option Master of Science degree. A maximum of 4 credit hours...
of 684 (Professional Internship), 8 credit hours of 685 (Directed Studies),
and up to 3 credit hours of 690 (Theory of Research) or 695 (Frontiers in
Research) may be used toward the non-thesis option Master of Science
degree. In addition, any combination of 684, 685, 690 and 695 may not
exceed 25 percent of the total credit hour requirement shown on the
individual degree plan. All requirements for the non-thesis option Master
of Science degree other than those specified above are the same as for
the thesis option degree.

Additional Requirements

**Additional Requirements**

- Residence (p. 1216)
- Continuous Registration (p. 1216)
- Time Limit (p. 1216)
- Foreign Languages (p. 1216)
- Application for Degree (p. 1216)

**Residence**

In partial fulfillment of the residence requirement for the degree of Master
of Science, the student must complete 9 resident credit hours during one
regular semester or one 10-week summer semester in resident study at
Texas A&M University. Upon recommendation of the student’s advisory
committee, department head or Chair of the Interdisciplinary Program, if
appropriate, and with approval of the Office of Graduate and Professional
Studies, a student may be granted exemption from this requirement. Such
a petition, however, must be approved prior to the student’s registration
for the final 9 credit hours of required coursework.

Students who are employed full-time while completing their degree
may fulfill total residence requirements by completion of less-than-full
time course loads each semester. In order to be considered for this, the
student is required to submit a Petition for Waivers and Exceptions along
with verification of his/her employment to the Office of Graduate and
Professional Studies.

See Residence Requirements (p. 22).

**Continuous Registration**

A student in the thesis option of the Master of Science program who
has completed all coursework on his/her degree plan other than 5V98,
5V99, and 691 (research) is required to be in continuous registration until
all requirements for the degree have been completed. See Continuous
Registration Requirements (p. 28).

**Time Limit**

All degree requirements must be completed within a period of seven
consecutive years for the degree to be granted. A course will be
considered valid until seven years after the end of the semester in which
it is taken. Graduate credit for coursework which is more than seven
calendar years old at the time of the final examination (oral or written)
may not be used to satisfy degree requirements.

A student who has chosen the thesis option must have the final corrected
version of the thesis cleared by the Office of Graduate and Professional
Studies no later than one year after the final examination, or approval of a
petition for exemption from the final exam, or within the seven-year time
limit, whichever occurs first. Failure to do so will result in the degree not
being awarded.

**Foreign Languages**

No specific language requirement exists for the Master of Science
degree.

**Application for Degree**

For information on applying for your degree, please visit the Graduation
(p. 26) section.

**Doctor of Philosophy in Biology**

The PhD degree program in Biology is designed to provide the student
with training in cellular, molecular and developmental and evolutionary
biology, and to prepare the student for a leadership position in academic
or industrial research. The Department of Biology offers a broad spectrum
of research opportunities including plant molecular biology, molecular
and cell biology of differentiation and development, gene structure and
regulation in eukaryotic and prokaryotic organisms and their viruses, and
cell structure and function. Students obtaining a degree in biology may
also work closely with faculty in biochemistry, entomology, genetics, plant
physiology, medicine and veterinary medicine.

Biology PhD students must demonstrate competence in their specific
area of research and are expected to develop proficiency in four of
the following seven areas at the time of the preliminary examination:
biochemistry, cell biology, developmental biology, genetics, microbiology,
computational/mathematical biology and molecular biology. An MS
student must demonstrate competence in at least three of the above
seven areas at the time of the final examination.

Work leading to the degree of Doctor of Philosophy (PhD) is designed
to give the candidate a thorough and comprehensive knowledge of
his or her professional field and training in methods of research. The
final basis for granting the degree shall be the candidate’s grasp of the
subject matter of a broad field of study and a demonstrated ability to
do independent research. In addition, the candidate must have acquired
the ability to express thoughts clearly and forcefully in both oral and
written languages. The degree is not granted solely for the completion
of coursework, residence and technical requirements, although these must
be met.

For a student who has completed a master’s degree, a DDS/DMD, DVM
or MD at a U.S. institution, a minimum of 64 hours is required on the
degree plan for the degree of Doctor of Philosophy. For a student who has
completed a baccalaureate degree but not a master’s degree or a U.S.
DDS/DMD, DVM or MD, a minimum of 96 hours is required on the
degree plan for the degree of Doctor of Philosophy.

**Steps to Fulfill Doctoral Degree Requirements**

1. Meet with departmental/intercollegiate graduate advisor to plan course
   of study for first semester.  
   When: Before first semester registration.  
   Approved by: Graduate advisor.
Establish advisory committee. Submit a degree plan. **When:** Prior to the deadline imposed by the student’s college or intercollegiate programs, and no later than 90 days prior to preliminary examination. **Approved by:** Advisory committee, department head or intercollegiate faculty chair, and Office of Graduate and Professional Studies (OGAPS).

Complete course work detailed on the approved degree plan. **Before preliminary exam.**

Complete the preliminary examination. **When:** See steps for completing the preliminary examination. The student should complete the Preliminary Examination no later than the end of the semester following the completion of the formal coursework on the degree plan. **Approved by:** Advisory committee, department head or chair of the intercollegiate faculty, and OGAPS.

Submit research proposal for dissertation or record of study and the research proposal approval form to the Office of Graduate and Professional Studies. **When:** At least 20 working days prior to the submission of the Request for the Final Examination. **Approved by:** Advisory committee, department head or intercollegiate faculty chair, Research Compliance and Biosafety, and OGAPS.

Complete residence requirement. **When:** Before submitting request to schedule final examination. **Approved by:** OGAPS

Apply for degree; pay graduation fee. **When:** During the first week of the final semester; see OGAPS calendar for deadlines.

Submit request for permission to hold and announce final examination. **When:** Must be received by OGAPS at least 10 working days before requested exam date. See OGAPS calendar for deadlines. **Approved by:** Advisory committee, department head or intercollegiate faculty chair, and OGAPS.

Successfully complete final examination. **When:** The Report of the Final Examination Form should be submitted to OGAPS within 10 days following the exam. **Approved by:** Advisory committee and OGAPS

Upload one approved final copy of the dissertation or record of study as a single pdf file to etd.tamu.edu and submit the fully signed dissertation/record of study approval form to the Office of Graduate and Professional Studies. **When:** See OGAPS calendar for deadlines. **Approved by:** Advisory committee, department head or intercollegiate faculty chair, and Office of Graduate and Professional Studies.

Graduate; arrange for cap and gown. For more information, visit [http://graduation.tamu.edu](http://graduation.tamu.edu).

Note: Once formal coursework is complete, you must be continuously registered until all degree requirements have been met. This includes submission and clearance of the dissertation or record of study. See Continuous Registration Requirements (p. 28).

**Program Requirements**

**Program Requirements**

- Student’s Advisory Committee (p. 1218)
- Degree Plan (p. 1218)
- Transfer of Credit (p. 1218)
- Research Proposal (p. 1219)
- Examinations (p. 1219)
  - Preliminary Examination (p. 1219)
  - Preliminary Examination Format (p. 1219)
  - Preliminary Examination Scheduling (p. 1219)
  - Report of Preliminary Examination (p. 1219)
- Retake of Failed Preliminary Examination (p. 1220)
- Final Examination (p. 1220)
- Report of Final Examination (p. 1220)
- Dissertation (p. 1220)
Student’s Advisory Committee

After receiving admission to graduate studies and enrolling, the student will consult with the head of his or her major or administrative department (or chair of the intercollegiate faculty) concerning appointment of the chair of the advisory committee. The student’s advisory committee will consist of no fewer than four members of the graduate faculty representative of the student’s several fields of study and research, where the chair or co-chair must be from the student’s department (or intercollegiate faculty, if applicable), and at least one or more of the members must have an appointment to a department other than the student’s major department. The outside member for a student in an interdisciplinary degree program must be from a department different from the chair of the student’s committee.

The chair, in consultation with the student, will select the remainder of the advisory committee. Only graduate faculty members located on Texas A&M University campuses may serve as chair of a student’s advisory committee. Other Texas A&M University graduate faculty members located off-campus may serve as a member or co-chair (but not chair), with a member as the chair.

If the chair of a student’s advisory committee voluntarily leaves the University and the student is near completion of the degree and wants the chair to continue to serve in this role, the student is responsible for securing a current member of the University Graduate Faculty, from the student’s academic program and located near the Texas A&M University campus site, to serve as the co-chair of the committee. The Department Head or Chair of Intercollegiate faculty may request in writing to the Associate Provost for Graduate and Professional Studies that a faculty member who is on an approved leave of absence or has voluntarily separated from the university, be allowed to continue to serve in the role of chair of a student’s advisory committee without a co-chair for up to one year. The students should be near completion of the degree. Extensions beyond the one year period can be granted with additional approval of the Dean.

The committee members’ signatures on the degree plan indicate their willingness to accept the responsibility for guiding and directing the entire academic program of the student and for initiating all academic actions concerning the student. Although individual committee members may be replaced by petition for valid reasons, a committee cannot resign en masse. The chair of the committee, who usually has immediate supervision of the student’s research and dissertation or record of study, has the responsibility for calling all meetings of the committee. The duties of the committee include responsibility for the proposed degree plan, the research proposal, the preliminary examination, the dissertation or record of study and the final examination. In addition, the committee, as a group and as individual members, is responsible for counseling the student on academic matters, and, in the case of academic deficiency, initiating recommendations to the Office of Graduate and Professional Studies.

Degree Plan

The student’s advisory committee will evaluate the student’s previous education and degree objectives. The committee, in consultation with the student, will develop a proposed degree plan and outline a research problem which, when completed, as indicated by the dissertation (or its equivalent for the degree of Doctor of Education or the degree of Doctor of Engineering), will constitute the basic requirements for the degree. The degree plan must be filed with the Office of Graduate and Professional Studies prior to the deadline imposed by the student’s college and no later than 90 days prior to the preliminary examination.

This proposed degree plan should be submitted through the online Document Processing Submission System located on the website http://ogdpps.tamu.edu. A minimum of 64 hours is required on the degree plan for the Doctor of Philosophy for a student who has completed a master’s degree. A student who has completed a DDS/DMD, DVM or a MD at a U.S. institution is also required to complete a minimum of 64 hours. A student who has completed a baccalaureate degree but not a master’s degree will be required to complete a 96-hour degree plan. Completion of a DDS/ DMD, DVM or MD degree at a foreign institution requires completion of a minimum of 96 hours for the Doctor of Philosophy. A field of study may be primarily in one department or in a combination of departments. A degree plan must carry a reasonable amount of 691 (research).

Additional coursework may be added by petition to the approved degree plan by the student’s advisory committee if it is deemed necessary to correct deficiencies in the student’s academic preparation. No changes can be made to the degree plan once the student’s Request for Final Examination is approved by the Office of Graduate and Professional Studies.

Approval to enroll in any professional course (900-level) should be obtained from the head of the department (or Chair of the intercollegiate faculty, if applicable) in which the course will be offered before including such a course on a degree plan.

No credit may be obtained by correspondence study, by extension or for any course of fewer than three weeks duration.

Transfer of Credit

Courses for which transfer credits are sought must have been completed with a grade of B or greater and must be approved by the student’s advisory committee and the Office of Graduate and Professional Studies. These courses must not have been used previously for another degree. Except for officially approved cooperative doctoral programs, credit for thesis or dissertation research or the equivalent is not transferable. Credit for “internship” coursework in any form is not transferable. Courses taken in residence at an accredited U.S. institution or approved international institution with a final grade of B or greater will be considered for transfer credit if, at the time the courses were completed, the courses would be accepted for credit toward a similar degree for a student in degree-seeking status at the host institution. Credit for coursework taken by extension is not transferable. Coursework in which no formal grades are given or in which grades other than letter grades (A or B) are earned (for example, CR, P, S, U, H, etc.) is not accepted for transfer credit. Credit for coursework submitted for transfer from any college or university must be shown in semester credit hours, or equated to semester credit hours.

Courses used toward a degree at another institution may not be applied for graduate credit. If the course to be transferred was taken prior to the conferral of a degree at the transfer institution, a letter from the registrar at that institution stating that the course was not applied for credit toward the degree must be submitted to the Office of Graduate and Professional Studies.

Grades for courses completed at other institutions are not included in computing the GPR. An official transcript from the university at which transfer courses are taken must be sent directly to the Office of Admissions.
Research Proposal
The general field of research to be used for the dissertation should be agreed on by the student and the advisory committee at their first meeting, as a basis for selecting the proper courses to support the proposed research.

As soon thereafter as the research project can be outlined in reasonable detail, the dissertation research proposal should be completed. The research proposal should be approved at a meeting of the student’s advisory committee, at which time the feasibility of the proposed research and the adequacy of available facilities should be reviewed.

The approved proposal, signed by all members of the student’s advisory committee, the head of the student’s major department (or chair of the intercollegiate faculty, if applicable), must be submitted to the Office of Graduate and Professional Studies at least 20 working days prior to the submission of the Request for the Final Examination.

Compliance issues must be addressed if a graduate student is performing research involving human subjects, animals, infectious biohazards and recombinant DNA. A student involved in these types of research should check with the Office of Research Compliance and Biosafety at (979) 458-1467 to address questions about all research compliance responsibilities. Additional information can also be obtained on the website http://rcb.tamu.edu.

Examinations
Preliminary Examination for Doctoral Students
The student’s major department (or chair of the interdisciplinary degree program faculty, if applicable) and his or her advisory committee may require qualifying, cumulative or other types of examinations at any time deemed desirable. These examinations are entirely at the discretion of the department and the student’s advisory committee.

The preliminary examination is required. The preliminary examination for a doctoral student shall be given no earlier than a date at which the student is within 6 credit hours of completion of the formal coursework on the degree plan (i.e., all coursework on the degree plan except 681, 684, 690, 691, 692, 693, 695, 697, 791, or other graduate courses specifically designated as S/U in the course catalog). The student should complete the Preliminary Examination no later than the end of the semester following the completion of the formal coursework on the degree plan.

Preliminary Examination Format
The objective of preliminary examination is to evaluate whether the student has demonstrated the following qualifications:

a. a mastery of the subject matter of all fields in the program;
b. an adequate knowledge of the literature in these fields and an ability to carry out bibliographical research;
c. an understanding of the research problem and the appropriate methodological approaches.

The format of the preliminary examination shall be determined by the student’s department (or interdisciplinary degree program, if applicable) and advisory committee, and communicated to the student in advance of the examination. The exam may consist of a written component, oral component, or combination of written and oral components.

The preliminary exam may be administered by the advisory committee or a departmental committee; herein referred to as the examination committee.

Regardless of exam format, a student will receive an overall preliminary exam result of pass or fail. The department (or interdisciplinary degree program, if applicable) will determine how the overall pass or fail result is determined based on the exam structure and internal department procedures. If the exam is administered by the advisory committee, each advisory committee member will provide a pass or fail evaluation decision.

Only one advisory committee substitution is allowed to provide an evaluation decision for a student’s preliminary exam, and it cannot be the committee chair.

If a student is required to take, as a part of the preliminary examination, a written component administered by a department or interdisciplinary degree program, the department or interdisciplinary degree program faculty must:

a. offer the examination at least once every six months. The departmental or interdisciplinary degree program examination should be announced at least 30 days prior to the scheduled examination date.

b. assume the responsibility for marking the examination satisfactory or unsatisfactory, or otherwise graded, and in the case of unsatisfactory, stating specifically the reasons for such a mark.

c. forward the marked examination to the chair of the student’s advisory committee within one week after the examination.

Preliminary Examination Scheduling
Prior to commencing any component of the preliminary examination, a departmental representative or the advisory committee chair will review the eligibility criteria with the student, using the Preliminary Examination Checklist to ensure the student is eligible for the preliminary examination. The following list of eligibility requirements applies.

- Student is registered at Texas A&M University for a minimum of one semester credit hour in the long semester or summer term during which any component of the preliminary examination is held. If the entire examination is held between semesters, then the student must be registered for the term immediately preceding the examination.

- An approved degree plan is on file with the Office of Graduate and Professional Studies prior to commencing the first component of the examination.

- Student’s cumulative GPR is at least 3.000.

- Student’s degree plan GPR is at least 3.000.

- All English language proficiency requirements are satisfied.

- At the end of the semester in which at least the first component of the exam is given, there are no more than 6 hours of coursework remaining on the degree plan (except 681, 684, 690, 691, 692, 693, 695, 697, 791, or other graduate courses specifically designated as S/U in the course catalog). The head of the student’s department (or Chair of the Interdisciplinary Degree Program, if applicable) has the authority to approve a waiver of this criterion.

Report of Preliminary Examination
Credit for the preliminary examination is not transferable in cases where a student changes degree programs after passing a preliminary exam.

If a written component precedes an oral component of the preliminary exam, the chair of the student’s examination committee is responsible for making all written examinations available to all members of the committee. A positive evaluation of the preliminary exam by all members of a student’s examination committee with at most one dissension is required to pass a student on his or her preliminary exam.

The student’s department will promptly report the results of the Preliminary Examination to the Office of Graduate and Professional Studies via the Report of Doctoral Preliminary Examination form. The Preliminary Examination checklist form must also be submitted. These forms should be submitted to the Office of Graduate and Professional Studies within 10 working days of completion of the preliminary examination.

The Report of the Preliminary Examination form must be submitted with original signatures of the approved examination committee members. If an approved examination committee member substitution (one only) has been made, that signature must also be included, in place of the committee member, on the form submitted to the Office of Graduate and Professional Studies. The original signature of the department head is also required on the form.

After passing the required preliminary examination for the doctoral degree, the student must complete the final examination for the degree within four calendar years. Otherwise, the student will be required to repeat the preliminary examination.

Retake of Failed Preliminary Examination

Upon approval of the student’s examination committee, with no more than one member dissenting, and approval of the Office of Graduate and Professional Studies, a student who has failed the preliminary examination may be given one re-examination. Adequate time must be given to permit the student to address the inadequacies emerging from the first preliminary examination. The examination committee must agree upon and communicate in writing to the student, an adequate time-frame from the first examination (normally six months) to retest, as well as a detailed explanation of the inadequacies emerging from the examination. The student and the committee should jointly negotiate a mutually acceptable date for this retest. When providing feedback on inadequacies, the committee should clearly document expected improvements that the student must be able to exhibit in order to retake the exam. The examination committee will document and communicate the time-frame and feedback within 10 working days of the exam that was not passed.

Final Examination for Doctoral Students

The candidate for the doctoral degree must pass a final examination by deadline dates announced in the “Office of Graduate and Professional Studies Calendar” each semester. The doctoral student is allowed only one opportunity to take the final examination.

No unabsolved grades of D, F, or U for any course can be listed on the degree plan. The student must be registered for any remaining hours of 681, 684, 690, 691, 692, 791 or other graduate courses specifically designated as S/U in the course catalog during the semester of the final exam. No student may be given a final examination until they have been admitted to candidacy and their current official cumulative and degree plan GPAs are 3.00 or better.

To be admitted to candidacy for a doctoral degree, a student must have:

1. completed all formal coursework on the degree plan with the exception of any remaining 681, 684, 690 and 691, 692 (Professional Study), or 791 hours,
2. a 3.0 Graduate GPA and a Degree Plan GPA of at least 3.0 with no grade lower than C in any course on the degree plan,
3. passed the preliminary examination,
4. submitted an approved dissertation proposal,
5. met the residence requirements.

The request to hold and announce the final examination must be submitted to the Office of Graduate and Professional Studies a minimum of 10 working days in advance of the scheduled date. Any changes to the degree plan must be approved by the Office of Graduate and Professional Studies prior to the submission of the request for final examination.

The student’s advisory committee will conduct this examination. The final examination is not to be administered until the dissertation or record of study is available in substantially final form to the student’s advisory committee, and all concerned have had adequate time to review the document. Whereas the final examination may cover the broad field of the candidate’s training, it is presumed that the major portion of the time will be devoted to the dissertation and closely allied topics. Persons other than members of the graduate faculty may, with mutual consent of the candidate and the chair of the advisory committee, be invited to attend a final examination for an advanced degree. A positive vote by all members of the graduate committee with at most one dissension is required to pass a student on his or her exam. A department can have a stricter requirement provided there is consistency within all degree programs within a department. Upon completion of the questioning of the candidate, all visitors must excuse themselves from the proceedings.

Report of Final Examination

The student’s department will promptly report the results of the Final Examination to the Office of Graduate and Professional Studies via the Report of Doctoral Final Examination form. These forms should be submitted to the Office of Graduate and Professional Studies within 10 working days of completion of the final examination. The Office of Graduate and Professional Studies must be notified in writing of any cancellations.

A positive evaluation of the final exam by all members of a student’s advisory committee with at most one dissension is required to pass a student on his or her final exam. The Report of the Final Examination Form must be submitted with original signatures of only the committee members approved by the Office of Graduate and Professional Studies. If necessary, multiple copies of the form may be submitted with different committee member original signatures. If an approved committee member substitution (1 only) has been made, his/her signature must be included on the form submitted to the Office of Graduate and Professional Studies.

Dissertation

The ability to perform independent research must be demonstrated by the dissertation, which must be the original work of the candidate. Whereas acceptance of the dissertation is based primarily on its scholarly merit, it must also exhibit creditable literary workmanship. The format of the dissertation must be acceptable to the Office of Graduate and

After successful defense and approval by the student’s advisory committee and the head of the student’s major department (or chair of the intercollegiate faculty, if applicable), a student must submit his/her dissertation in electronic format as a single PDF file. The PDF file must be uploaded to the website, http://ogaps.tamu.edu. Additionally, a signed paper approval form with original signatures must be received by the Office of Graduate and Professional Studies. Both the PDF file and the signed approval form are required by the deadline.

Deadline dates for submitting are announced each semester or summer term in the Office of Graduate and Professional Studies Calendar (see Time Limit statement). These dates also can be accessed via the website http://ogaps.tamu.edu.

Each student who submits a document for review is assessed a one-time thesis/dissertation processing fee through Student Business Services. This processing fee is for the thesis/dissertation services provided. After commencement, dissertations are digitally stored and made available through the Texas A&M Libraries.

A dissertation that is deemed unacceptable by the Office of Graduate and Professional Studies because of excessive corrections will be returned to the student’s department head or chair of the intercollegiate faculty. The manuscript must be resubmitted as a new document, and the entire review process must begin anew. All original submittal deadlines must be met during the resubmittal process in order to graduate.

**Additional Requirements**

**Additional Requirements**

- Residence (p. 1221)
- Time Limit (p. 1221)
- Continuous Registration (p. 1221)
- Admission to Candidacy (p. 1221)
- Languages (p. 1221)
- 99-Hour Cap on Doctoral Degree (p. 1222)
- Application for Degree (p. 1222)

**Residence**

A student who enters the doctoral degree program with a baccalaureate degree must spend one academic year plus one semester in resident study at Texas A&M University. A student who holds master’s degree when he/she enters doctoral degree program must spend one academic year in resident study. One academic year may include two adjacent regular semesters or one regular semester and one adjacent 10-week summer semester. The third semester is not required to be adjacent to the one year. Enrollment for each semester must be a minimum of 9 credit hours each to satisfy the residence requirement.

To satisfy the residence requirement, the student must complete a minimum of 9 credit hours per semester or 10-week summer semester in resident study at Texas A&M University for the required period. A student who enters a doctoral degree program with a baccalaureate degree may fulfill residence requirements in excess of one academic year (18 credit hours) by registration during summer sessions or by completion of a less-than-full course load (in this context a full course load is considered 9 credit hours per semester).

Students who are employed full-time while completing their degree may fulfill total residence requirements by completion of less-than-full time course loads each semester. In order to be considered for this, the student is required to submit a Petition for Waivers and Exceptions along with verification of his/her employment to the Office of Graduate and Professional Studies. An employee should submit verification of his/her employment at the time he/she submits the degree plan. See Registration. (p. 28)

See Residence Requirements (p. 22).

**Time Limit**

All requirements for doctoral degrees must be completed within a period of ten consecutive calendar years for the degree to be granted. A course will be considered valid until 10 years after the end of the semester in which it is taken. Graduate credit for coursework more than ten calendar years old at the time of the final oral examination may not be used to satisfy degree requirements.

After passing the required preliminary oral and written examinations for a doctoral degree, the student must complete the final examination within four calendar years. Otherwise, the student will be required to repeat the preliminary examination.

A final corrected version of the dissertation or record of study in electronic format as a single PDF file must be cleared by the Office of Graduate and Professional Studies no later than one year after the final examination or within the 10-year time limit, whichever occurs first. Failure to do so will result in the degree not being awarded.

**Continuous Registration**

A student in a program leading to a Doctor of Philosophy who has completed all coursework on his/her degree plan other than 691, 5V98 or 5V99 (research) are required to be in continuous registration until all requirements for the degree have been completed. See Continuous Registration Requirements (p. 28).

**Admission to Candidacy**

To be admitted to candidacy for a doctoral degree, a student must have:

1. completed all formal coursework on the degree plan with the exception of any remaining 681, 684, 690 and 691, 5V98 and 5V99, or 791.
2. a 3.0 Graduate GPA and a Degree Plan GPA of at least 3.0 with no grade lower than C in any course on the degree plan,
3. passed the preliminary examination (written and oral portions),
4. submitted an approved dissertation proposal,
5. met the residence requirements. The final examination will not be authorized for any doctoral student who has not been admitted to candidacy.

**Languages**

A student is required to possess a competent command of English. For English language proficiency requirements, see the Admissions section of this catalog. The doctoral (PhD) foreign language requirement at Texas A&M University is a departmental option, to be administered and monitored by the individual departments of academic instruction.
99-Hour Cap on Doctoral Degrees

In Texas, public colleges and universities are funded by the state according to the number of students enrolled. In accordance with legislation passed by the Texas Legislature, the number of hours for which state universities may receive subvention funding at the doctoral rate for any individual is limited to 99 hours. Texas A&M University and other universities will not receive subvention for hours in excess of the limit.

Institutions of higher education are allowed to charge the equivalent of nonresident tuition to a resident doctoral student who has enrolled in 100 or more semester credit hours of doctoral coursework.

A doctoral student at Texas A&M has seven years to complete his/her degree before being charged out-of-state tuition. A doctoral student who, after seven years of study, has accumulated 100 or more doctoral hours will be charged tuition at a rate equivalent to out-of-state tuition. Please note that the tuition increases will apply to Texas residents as well as students from other states and countries who currently are charged tuition at the resident rate. This includes those doctoral students who hold GAT, GANT, and GAR appointments of 20 or more hours and recipients of competitive fellowships who receive more than $1,000 per semester. Doctoral students who, after seven years of study, have not accumulated 100 hours are eligible to pay in-state tuition if otherwise eligible.

For count purposes, a year is counted as three semesters, normally fall, spring and summer. Using this system, a student is allowed 21 semesters as a G8 student to complete the doctoral degree before being penalized with the higher tuition rate. Any semester in which a G8 student is enrolled for a doctoral level course is counted.

The following majors are exempt from the 99-Hour Cap on Doctoral Degrees:

- Biomedical Sciences
- Biochemistry
- Microbiology
- Genetics
- Toxicology
- Nutrition Sciences
- Community Clinical Psychology
- School Psychology
- Veterinary Pathology
- Clinical Psychology
- Counseling Psychology
- Medical Sciences
- Health Services Research
- Health Promotion and Community Health Sciences
- Epidemiology and Environmental Health
- Oral Biology

The hour limit for these majors is 130 doctoral hours

Master of Science in Microbiology

The Master of Science (MS) curriculum is designed to develop new understanding through research and creativity. Students have the option to pursue a thesis or non-thesis Master of Science degree.

Steps to Fulfill Master’s Degree Requirements

Application for Degree

For information on applying for your degree, please visit the Graduation (p. 26) section.
7. Submit request to schedule final examination.

When: Must be received by OGAPS at least 10 working days before exam date. See OGAPS calendar for deadlines.

Approved by: Advisory committee, department head or chair of the intercollegiate faculty, and OGAPS.

Successful completion of final examination.

8. Successfully complete final examination.

When: The Report of the Final Examination Form should be submitted to OGAPS within 10 days following the exam.

Approved by: Advisory committee and OGAPS.

9. If required, upload one approved final copy of thesis as a single PDF file to etd.tamu.edu and submit the fully signed thesis approval form to the Office of Graduate and Professional Studies.

When: See OGAPS calendar for deadlines.

Approved by: Advisory committee, department head or chair of the intercollegiate faculty and OGAPS.

10. Graduation; arrange for cap and gown.

For more information, visit http://graduation.tamu.edu.

1. The online Document Processing Submission System is located on the website https://ogsdpss.tamu.edu.

2. Complete the application for degree form via the student’s Howdy portal.

Program Requirements

Student’s Advisory Committee

After receiving admission to graduate studies and enrolling for coursework, the student will consult with the head of his or her major or administrative department (or intercollegiate faculty, if applicable) concerning appointment of the chair of his or her advisory committee. The student’s advisory committee for the MS degree will consist of no fewer than three members of the graduate faculty, representative of the student’s fields of study and research. The chair or the co-chair of the advisory committee must be from the student’s major department (or intercollegiate faculty, if applicable), and at least one or more of the members must have an appointment to a department other than the student’s major department. The outside member for students in an interdisciplinary program must have an appointment to a department different from the chair of the student’s committee.

The chair, in consultation with the student, will select the remainder of the advisory committee. The student will interview each prospective committee member to determine whether he or she is willing to serve. Only graduate faculty members located on Texas A&M University campuses may serve as chair of a student’s advisory committee. Other graduate faculty members located off campus may serve as a member or co-chair (but not chair) with a member as the chair. The chair of the committee, who usually has immediate supervision of the student’s research and thesis, has the responsibility for calling required meetings of the committee and for calling meetings at any other time considered desirable.

If the chair of a student’s advisory committee voluntarily leaves the University and the student is near completion of the degree and wants the chair to continue to serve in this role, the student is responsible for securing a current member of the University Graduate Faculty, from the student’s academic program and located near the Texas A&M University campus site, to serve as the co-chair of the committee. The Department Head or Chair of Intercollegiate faculty may request in writing to the Associate Provost for Graduate and Professional Studies that a faculty member who is on an approved leave of absence or has voluntarily separated from the university, be allowed to continue to serve in the role of chair of a student’s advisory committee without a co-chair for us to one year. The students should be near completion of the degree. Extensions beyond the one year period can be granted with additional approval of the Dean.

If the chair of the student’s advisory committee is unavailable for an extended time in any academic period during which the student is involved in activities relating to an internship, thesis or professional paper, and is registered for courses such as 684, 691, 692 or 693, the student may request, in writing, that the department head appoint an alternate advisory committee chair during the interim period.

The duties of the committee include responsibility for the proposed degree plan, the research proposal, the thesis and the final examination. In addition, the committee as a group and as individual members are responsible for advising the student on academic matters, and, in the case of academic deficiency, initiating recommendations to the Office of Graduate and Professional Studies.

The committee members’ approval on the degree plan indicate their willingness to accept the responsibility for guiding and directing the entire academic program of the student and for initiating all academic actions concerning the student. Although individual committee members may be replaced by petition for valid reasons, a committee cannot resign en masse.

Degree Plan

The student’s advisory committee, in consultation with the student, will develop the proposed degree plan. The degree plan must be completed and filed with the Office of Graduate and Professional Studies prior to the deadline imposed by the student’s college or interdisciplinary degree program, if applicable, and no later than 90 days prior to the date of the final oral examination or thesis defense.
A student should submit the degree plan using the online Document Processing Submission System (http://ogsdpss.tamu.edu).

A student submitting a proposed degree plan for a Master of Science degree should designate on the official degree plan the appropriate program option.

Additional coursework may be added to the approved degree plan by petition if it is deemed necessary by the advisory committee to correct deficiencies in the student’s academic preparation. No changes can be made to the degree plan once the student’s Request for Final Examination or Request for Final Examination Exemption is approved by the Office of Graduate and Professional Studies.

**Credit Requirement**

A minimum of 32 semester credit hours of approved courses and research is required for the thesis option Master of Science degree. A minimum of 36 semester credit hours of approved coursework is required for the Non-Thesis Option.

Ordinarily the student will devote the major portion of his or her time to work in one or two closely related fields. Other work will be in supporting fields of interest.

**Transfer of Credit**

A student who has earned 12 hours of graduate credit in residence at Texas A&M University may be authorized to transfer courses in excess of the limits prescribed below upon the advice of the advisory committee and with the approval of the Office of Graduate and Professional Studies. Courses taken in residence at an accredited U.S. institution or approved international institution with a final grade of B or greater may be considered for transfer credit if, at the time the courses were completed, the courses would be accepted for credit toward a similar degree for a student in degree-seeking status at the host institution. Otherwise, the limitations stated in the following section apply. Coursework in which no formal grades are given or in which grades other than letter grades (A or B) are earned (for example, CR, P, S, U, H, etc.) is not accepted for transfer credit. Courses appearing on the degree plan with grades of D, F or U may not be absorbed by transfer work. Credit for thesis research or the equivalent is not transferable. Credit for coursework submitted for transfer from any college or university must be shown in semester credit hours or equated to semester credit hours. An official transcript from the university at which the transfer coursework was taken must be sent directly to the Office of Admissions.

Courses used toward a degree at another institution may not be applied for graduate credit. If the course to be transferred was taken prior to the conferral of a degree at the transfer institution, a letter from the registrar at that institution stating that the course was not applied for credit toward the degree must be submitted to the Office of Graduate and Professional Studies.

Grades for courses completed at other institutions are not included in computing the GPR.

**Limitations on the Use of Transfer, Extension and Certain Other Courses**

Some departments may have more restrictive requirements for transfer work. If otherwise acceptable, certain courses may be used toward meeting credit-hour requirements for the master’s degree under the following limitations.

1. The maximum number of credit hours which may be considered for transfer credit is the greater of 12 hours or one-third (1/3) of the total hours of a degree plan. The following restrictions apply:
   - Graduate and/or upper-level undergraduate courses taken in residence at an accredited U.S. institution, or approved international institution with a final grade of B or greater will be considered for transfer credit if, at the time the courses were completed, the student was in degree-seeking status at Texas A&M University, or the student was in degree-seeking status at the institution at which the courses were taken; and if the courses would be accepted for credit toward a similar degree for a student in degree-seeking status at the host institution.
   - Courses previously used for another degree are not acceptable for degree plan credit.

2. The maximum number of credit hours taken in post-baccalaureate non-degree (G6) classification at Texas A&M University which may be considered for application to the degree plan is 12.

3. A zero credit 684 and 685 course is only allowed for non-thesis master’s students. Other courses, including 691 research hours, are not eligible for zero credit.

4. Not more than 12 hours may be used in any combination of the following categories:
   - Not more than 8 hours in the combination of 691 (research), 684 (Professional Internship) or may be used.
   - Not more than 8 hours of 685 (Directed Studies) may be used.
   - Not more than 3 hours of 690 (Theory of Research) may be used.
   - Not more than 3 hours of 695 (Frontiers in Research) may be used.

5. A maximum of 2 hours of Seminar (681).

6. A maximum of 9 hours of advanced undergraduate courses (300- or 400-level).

7. For graduate courses of three weeks’ duration or less, taken at other institutions, up to 1 hour of credit may be obtained for each five-day week of coursework. Each week of coursework must include at least 15 contact hours.

8. Continuing education courses may not be used for graduate credit.

9. Extension courses are not acceptable for credit.

Exceptions will be permitted only in unusual cases and when petitioned by the student’s advisory committee and approved by the Office of Graduate and Professional Studies.

**Thesis Option**

An acceptable thesis is required for the Master of Science degree for a student who selects the thesis option program. The finished work must reflect a comprehensive understanding of the pertinent literature and express in clear English, the problem(s) for study, the method, significance and results of the student’s original research. Guidelines for the preparation of the thesis are available in the *Thesis Manual*, which is available online at the Office of Graduate and Professional Studies website.

After successful defense (or exemption) and approval by the student’s advisory committee and the head of the student’s major department (or chair of the intercollegiate faculty, if appropriate), the student must submit his/her thesis in electronic format as a single PDF file. The PDF file must be uploaded to the Office of Graduate and Professional
Studies website. Additionally, a signed paper approval form with original signatures must be received by the Office of Graduate and Professional Studies. The PDF file and the signed approval form are required by the deadline.

Deadline dates for submitting the thesis are announced each semester or summer term in the “Office of Graduate and Professional Studies Calendar” (see Time Limit statement). These dates also can be accessed via the Office of Graduate and Professional Studies website.

Each student who submits a document for review is assessed a one-time thesis/dissertation processing fee through Student Business Services. This processing fee is for the thesis/dissertation services provided. After commencement, theses and dissertations are digitally stored and made available through the Texas A&M Libraries.

A thesis that is deemed unacceptable by the Office of Graduate and Professional Studies because of excessive corrections will be returned to the student's department head (or chair of the intercollegiate faculty, if applicable). The manuscript must be resubmitted as a new document, and the entire review process must begin again. All original submittal deadlines must be met during the resubmittal process to graduate that semester.

**Thesis Proposal**

For the thesis option Master of Science degree, the student must prepare a thesis proposal for approval by the advisory committee and the head of the major department or chair of the interdisciplinary faculty, if applicable. This proposal must be submitted to the Office of Graduate and Professional Studies at least 20 working days prior to the submission of the request for the final examination.

Compliance issues must be addressed if a graduate student is performing research involving human subjects, animals, infectious biohazards and recombinant DNA. A student involved in these types of research should check with the Office of Research Compliance and Biosafety at (979) 458-1467 to address questions about all research compliance responsibilities. Additional information can also be obtained on the Office of Research Compliance and Biosafety website.

**Final Examination/Thesis Defense**

A student must pass a final examination by dates announced each semester or summer term in the Office of Graduate and Professional Studies Calendar. To be eligible to take the final examination, a student’s GPR must be at least 3.000 for courses on the degree plan and for all courses completed at Texas A&M which are eligible to be applied to a graduate degree, and there must be no unsabsoluted grades of D, F or U for any course listed on the degree plan. To absolve a deficient grade, the student must repeat the course at Texas A&M University and achieve a grade of C or better. All coursework on the degree plan must have been completed with the exception of those hours for which the student is registered. For thesis-option students, an approved thesis proposal must be on file in the Office of Graduate and Professional Studies according to published deadlines prior to the final examination or submission of the request for exemption from the final examination.

A request to hold and announce the final examination must be submitted to the Office of Graduate and Professional Studies a minimum of 10 working days in advance of the scheduled date for the examination. The Office of Graduate and Professional Studies must be notified in writing of any cancellations. A student may be given only one opportunity to repeat the final examination for the master’s degree and that must be within a time period that does not extend beyond the end of the next regular semester (summer terms are excluded).

For thesis option students, the final examination covers the thesis and all work taken on the degree plan and at the option of the committee may be written or oral or both. The final examination may not be administered before the thesis is available to all members of the student’s advisory committee in substantially final form, and all members have had adequate time to review the document. The examination is conducted by the student’s advisory committee as finally constituted. A thesis option student must be registered in the University in the semester or summer term in which the final examination is taken. Persons other than members of the graduate faculty may, with mutual consent of the candidate and the major professor, attend final examinations for advanced degrees. Upon completion of the questioning of the candidate, all visitors must excuse themselves from the proceedings. A positive vote by all members of the graduate committee with at most one disssision is required to pass a student on his or her exam. A department, or interdisciplinary degree program, may have a stricter requirement provided there is consistency within all degree programs within a department or interdisciplinary degree program.

The Report of the Final Examination Form must be submitted with original signatures of only the committee members approved by the Office of Graduate and Professional Studies. If an approved committee member substitution (1 only) has been made, his/her signature must also be submitted to the Office of Graduate and Professional Studies. If necessary, multiple copies of the form may be submitted with different committee member original signatures. If an approved committee member substitution (1 only) has been made, his/her signature must be included on the form submitted to the Office of Graduate and Professional Studies.

A thesis option candidate may petition to be exempt from his/her final examination provided his/her degree plan GPR is 3.500 or greater and he/she has the approval of the advisory committee, the head of the student's major department, or intercollegiate chair, if appropriate, and the Office of Graduate and Professional Studies. It is required that the petition for exemption be submitted the same semester the student intends to submit the thesis.

**Non-Thesis Option**

For non-thesis option students, a final comprehensive examination may be required.

The final exam cannot be held prior to the mid point of the semester if questions on the exam are based on courses in which the student is currently enrolled. If a student has completed all required degree plan coursework, the student is not required to be registered for classes in the semester the final examination is administered (unless he/she holds an assistantship). For specific final examination requirements, a student should check the program requirements for the degree which he/she is pursuing.

Exam results must be submitted with original signatures of only the committee members approved by the Office of Graduate and Professional Studies. If an approved committee member substitution (1 only) has been made, his/her signature must also be submitted to the Office of Graduate and Professional Studies.

A student pursuing the non-thesis option is not allowed to enroll in 691 (research) for any reason and 691 may not be used for credit toward a non-thesis option Master of Science degree. A maximum of 4 credit hours
of 684 (Professional Internship), 8 credit hours of 685 (Directed Studies), and up to 3 credit hours of 690 (Theory of Research) or 695 (Frontiers in Research) may be used toward the non-thesis option Master of Science degree. In addition, any combination of 684, 685, 690 and 695 may not exceed 25 percent of the total credit hour requirement shown on the individual degree plan. All requirements for the non-thesis option Master of Science degree other than those specified above are the same as for the thesis option degree.

**Additional Requirements**

**Additional Requirements**

- Residence (p. 1226)
- Continuous Registration (p. 1226)
- Time Limit (p. 1226)
- Foreign Languages (p. 1226)
- Application for Degree (p. 1226)

**Residence**

In partial fulfillment of the residence requirement for the degree of Master of Science, the student must complete 9 resident credit hours during one regular semester or one 10-week summer semester in resident study at Texas A&M University. Upon recommendation of the student’s advisory committee, department head or Chair of the Interdisciplinary Program, if appropriate, and with approval of the Office of Graduate and Professional Studies, a student may be granted exemption from this requirement. Such a petition, however, must be approved prior to the student’s registration for the final 9 credit hours of required coursework.

Students who are employed full-time while completing their degree may fulfill total residence requirements by completion of less-than-full time course loads each semester. In order to be considered for this, the student is required to submit a Petition for Waivers and Exceptions along with verification of his/her employment to the Office of Graduate and Professional Studies.

See Residence Requirements (p. 22).

**Continuous Registration**

A student in the thesis option of the Master of Science program who has completed all coursework on his/her degree plan other than 5V98, 5V99, and 691 (research) is required to be in continuous registration until all requirements for the degree have been completed. See Continuous Registration Requirements (p. 28).

**Time Limit**

All degree requirements must be completed within a period of seven consecutive years for the degree to be granted. A course will be considered valid until seven years after the end of the semester in which it is taken. Graduate credit for coursework which is more than seven calendar years old at the time of the final examination (oral or written) may not be used to satisfy degree requirements.

A student who has chosen the thesis option must have the final corrected version of the thesis cleared by the Office of Graduate and Professional Studies no later than one year after the final examination, or approval of a petition for exemption from the final exam, or within the seven-year time limit, whichever occurs first. Failure to do so will result in the degree not being awarded.

**Foreign Languages**

No specific language requirement exists for the Master of Science degree.

**Application for Degree**

For information on applying for your degree, please visit the Graduation (p. 26) section.

**Doctor of Philosophy in Microbiology**

Work leading to the degree of Doctor of Philosophy (PhD) is designed to give the candidate a thorough and comprehensive knowledge of his or her professional field and training in methods of research. The final basis for granting the degree shall be the candidate’s grasp of the subject matter of a broad field of study and a demonstrated ability to do independent research. In addition, the candidate must have acquired the ability to express thoughts clearly and forcefully in both oral and written languages. The degree is not granted solely for the completion of coursework, residence and technical requirements, although these must be met.

For a student who has completed a master’s degree, a DDS/DMD, DVM or MD at a U.S. institution, a minimum of 64 hours is required on the degree plan for the degree of Doctor of Philosophy. For a student who has completed a baccalaureate degree but not a master’s degree or a U.S. DDS/DMD, DVM or MD, a minimum of 96 hours is required on the degree plan for the degree of Doctor of Philosophy.

**Steps to Fulfill Doctoral Degree Requirements**

1. **Meet with departmental/intercollegiate graduate advisor to plan course of study for first semester.**  
   **When:** Before first semester registration.  
   **Approved by:** Graduate advisor.

2. **Establish advisory committee. Submit a degree plan.**  
   **When:** Prior to the deadline imposed by the student’s college or intercollegiate programs, and no later than 90 days prior to preliminary examination.  
   **Approved by:** Advisory committee, department head or intercollegiate faculty chair, and Office of Graduate and Professional Studies (OGAPS).

3. **Complete course work detailed on the approved degree plan.**  
   **Before preliminary exam.**

**Student’s Advisory Committee**

After receiving admission to graduate studies and enrolling, the student will consult with the head of his or her major or administrative department (or chair of the intercollegiate faculty) concerning appointment of the chair of the advisory committee. The student’s advisory committee will consist of no fewer than four members of the
graduate faculty representative of the student’s several fields of study and research, where the chair or co-chair must be from the student’s department (or intercollegiate faculty, if applicable), and at least one or more of the members must have an appointment to a department other than the student’s major department. The outside member for a student in an interdisciplinary degree program must be from a department different from the chair of the student’s committee.

The chair, in consultation with the student, will select the remainder of the advisory committee. Only graduate faculty members located on Texas A&M University campuses may serve as chair of a student’s advisory committee. Other Texas A&M University graduate faculty members located off-campus may serve as a member or co-chair (but not chair), with a member as the chair.

If the chair of a student’s advisory committee voluntarily leaves the University and the student is near completion of the degree and wants the chair to continue to serve in this role, the student is responsible for securing a current member of the University Graduate Faculty, from the student’s academic program and located near the Texas A&M University campus site, to serve as the co-chair of the committee. The Department Head or Chair of Intercollegiate faculty may request in writing to the Associate Provost for Graduate and Professional Studies that a faculty member who is on an approved leave of absence or has voluntarily separated from the university, be allowed to continue to serve in the role of chair of a student’s advisory committee without a co-chair for up to one year. The students should be near completion of the degree. Extensions beyond the one year period can be granted with additional approval of the Dean.

The committee members’ signatures on the degree plan indicate their willingness to accept the responsibility for guiding and directing the entire academic program of the student and for initiating all academic actions concerning the student. Although individual committee members may be replaced by petition for valid reasons, a committee cannot resign en masse. The chair of the committee, who usually has immediate supervision of the student’s research and dissertation or record of study, has the responsibility for calling all meetings of the committee. The duties of the committee include responsibility for the proposed degree plan, the research proposal, the preliminary examination, the dissertation or record of study and the final examination. In addition, the committee, as a group and as individual members, is responsible for counseling the student on academic matters, and, in the case of academic deficiency, initiating recommendations to the Office of Graduate and Professional Studies.

Degree Plan
The student’s advisory committee will evaluate the student’s previous education and degree objectives. The committee, in consultation with the student, will develop a proposed degree plan and outline a research problem which, when completed, as indicated by the dissertation (or its equivalent for the degree of Doctor of Education or the degree of Doctor of Engineering), will constitute the basic requirements for the degree. The degree plan must be filed with the Office of Graduate and Professional Studies prior to the deadline imposed by the student’s college and no later than 90 days prior to the preliminary examination.

This proposed degree plan should be submitted through the online Document Processing Submission System located on the website http://ogdsdpss.tamu.edu. A minimum of 64 hours is required on the degree plan for the Doctor of Philosophy for a student who has completed a master’s degree. A student who has completed a DDS/DMD, DVM or a MD at a U.S. institution is also required to complete a minimum of 64 hours. A student who has completed a baccalaureate degree but not a master’s degree will be required to complete a 96-hour degree plan. Completion of a DDS/DMD, DVM or MD degree at a foreign institution requires completion of a minimum of 96 hours for the Doctor of Philosophy. A field of study may be primarily in one department or in a combination of departments. A degree plan must carry a reasonable amount of 691 (research).

Additional coursework may be added by petition to the approved degree plan by the student’s advisory committee if it is deemed necessary to correct deficiencies in the student’s academic preparation. No changes can be made to the degree plan once the student’s Request for Final Examination is approved by the Office of Graduate and Professional Studies.

Approval to enroll in any professional course (900-level) should be obtained from the head of the department (or Chair of the intercollegiate faculty, if applicable) in which the course will be offered before including such a course on a degree plan.

No credit may be obtained by correspondence study, by extension or for any course of fewer than three weeks duration.

Transfer of Credit
Courses for which transfer credits are sought must have been completed with a grade of B or greater and must be approved by the student’s advisory committee and the Office of Graduate and Professional Studies. These courses must not have been used previously for another degree. Except for officially approved cooperative doctoral programs, credit for thesis or dissertation research or the equivalent is not transferable. Credit for “internship” coursework in any form is not transferable. Courses taken in residence at an accredited U.S. institution or approved international institution with a final grade of B or greater will be considered for transfer credit if, at the time the courses were completed, the courses would be accepted for credit toward a similar degree for a student in degree-seeking status at the host institution. Credit for coursework taken by extension is not transferable. Coursework in which no formal grades are given or in which grades other than letter grades (A or B) are earned (for example, CR, P, S, U, H, etc.) is not accepted for transfer credit. Credit for coursework submitted for transfer from any college or university must be shown in semester credit hours, or equated to semester credit hours.

Courses used toward a degree at another institution may not be applied for graduate credit. If the course to be transferred was taken prior to the conferral of a degree at the transfer institution, a letter from the registrar at that institution stating that the course was not applied for credit toward the degree must be submitted to the Office of Graduate and Professional Studies.

Grades for courses completed at other institutions are not included in computing the GPR. An official transcript from the university at which transfer courses are taken must be sent directly to the Office of Admissions.

Research Proposal
The general field of research to be used for the dissertation should be agreed on by the student and the advisory committee at their first meeting, as a basis for selecting the proper courses to support the proposed research.

As soon thereafter as the research project can be outlined in reasonable detail, the dissertation research proposal should be completed. The
research proposal should be approved at a meeting of the student’s advisory committee, at which time the feasibility of the proposed research and the adequacy of available facilities should be reviewed. The approved proposal, signed by all members of the student’s advisory committee, the head of the student’s major department (or chair of the intercollegiate faculty, if applicable), must be submitted to the Office of Graduate and Professional Studies at least 20 working days prior to the submission of the Request for the Final Examination.

Compliance issues must be addressed if a graduate student is performing research involving human subjects, animals, infectious biohazards and recombinant DNA. A student involved in these types of research should check with the Office of Research Compliance and Biosafety at (979) 458-1467 to address questions about all research compliance responsibilities. Additional information can also be obtained on the website http://rcb.tamu.edu.

Examinations

Preliminary Examination for Doctoral Students

The student’s major department (or chair of the interdisciplinary degree program faculty, if applicable) and his or her advisory committee may require qualifying, cumulative or other types of examinations at any time deemed desirable. These examinations are entirely at the discretion of the department and the student’s advisory committee.

The preliminary examination is required. The preliminary examination for a doctoral student shall be given no earlier than a date at which the student is within 6 credit hours of completion of the formal coursework on the degree plan (i.e., all coursework on the degree plan except 681, 684, 690, 691, 692, 693, 695, 697, 791, or other graduate courses specifically designated as S/U in the course catalog). The student should complete the Preliminary Examination no later than the end of the semester following the completion of the formal coursework on the degree plan.

Preliminary Examination Format

The objective of preliminary examination is to evaluate whether the student has demonstrated the following qualifications:

a. a mastery of the subject matter of all fields in the program;

b. an adequate knowledge of the literature in these fields and an ability to carry out bibliographical research;

c. an understanding of the research problem and the appropriate methodological approaches.

The format of the preliminary examination shall be determined by the student’s department (or interdisciplinary degree program, if applicable) and advisory committee, and communicated to the student in advance of the examination. The exam may consist of a written component, oral component, or combination of written and oral components.

The preliminary exam may be administered by the advisory committee or a departmental committee; herein referred to as the examination committee.

Regardless of exam format, a student will receive an overall preliminary exam result of pass or fail. The department (or interdisciplinary degree program, if applicable) will determine how the overall pass or fail result is determined based on the exam structure and internal department procedures. If the exam is administered by the advisory committee, each advisory committee member will provide a pass or fail evaluation decision.

Only one advisory committee substitution is allowed to provide an evaluation decision for a student’s preliminary exam, and it cannot be the committee chair.

If a student is required to take, as a part of the preliminary examination, a written component administered by a department or interdisciplinary degree program, the department or interdisciplinary degree program faculty must:

a. offer the examination at least once every six months. The departmental or interdisciplinary degree program examination should be announced at least 30 days prior to the scheduled examination date.

b. assume the responsibility for marking the examination satisfactory or unsatisfactory, or otherwise graded, and in the case of unsatisfactory, stating specifically the reasons for such a mark.

c. forward the marked examination to the chair of the student’s advisory committee within one week after the examination.

Preliminary Examination Scheduling

Prior to commencing any component of the preliminary examination, a departmental representative or the advisory committee chair will review the eligibility criteria with the student, using the Preliminary Examination Checklist to ensure the student is eligible for the preliminary examination. The following list of eligibility requirements applies.

- Student is registered at Texas A&M University for a minimum of one semester credit hour in the long semester or summer term during which any component of the preliminary examination is held. If the entire examination is held between semesters, then the student must be registered for the term immediately preceding the examination.

- An approved degree plan is on file with the Office of Graduate and Professional Studies prior to commencing the first component of the examination.

- Student’s cumulative GPR is at least 3.000.

- Student’s degree plan GPR is at least 3.000.

- All English language proficiency requirements are satisfied.

- At the end of the semester in which at least the first component of the exam is given, there are no more than 6 hours of coursework remaining on the degree plan (except 681, 684, 690, 691, 692, 693, 695, 697, 791, or other graduate courses specifically designated as S/U in the course catalog). The head of the student’s department (or Chair of the Interdisciplinary Degree Program, if applicable) has the authority to approve a waiver of this criterion.

Report of Preliminary Examination

Credit for the preliminary examination is not transferable in cases where a student changes degree programs after passing a preliminary exam.

If a written component precedes an oral component of the preliminary exam, the chair of the student’s examination committee is responsible for making all written examinations available to all members of the committee. A positive evaluation of the preliminary exam by all members
of a student's examination committee with at most one dissension is required to pass a student on his or her preliminary exam.

The student's department will promptly report the results of the Preliminary Examination to the Office of Graduate and Professional Studies via the Report of Doctoral Preliminary Examination form. The Preliminary Examination checklist form must also be submitted. These forms should be submitted to the Office of Graduate and Professional Studies within 10 working days of completion of the preliminary examination.

The Report of the Preliminary Examination form must be submitted with original signatures of the approved examination committee members. If an approved examination committee member substitution (one only) has been made, that signature must also be included, in place of the committee member, on the form submitted to the Office of Graduate and Professional Studies. The original signature of the department head is also required on the form.

After passing the required preliminary examination for the doctoral degree, the student must complete the final examination for the degree within four calendar years. Otherwise, the student will be required to repeat the preliminary examination.

Retake of Failed Preliminary Examination

Upon approval of the student's examination committee, with no more than one member dissenting, and approval of the Office of Graduate and Professional Studies, a student who has failed the preliminary examination may be given one re-examination. Adequate time must be given to permit the student to address the inadequacies emerging from the first preliminary examination. The examination committee must agree upon and communicate in writing to the student, an adequate time-frame from the first examination (normally six months) to retest, as well as a detailed explanation of the inadequacies emerging from the examination. The student and the committee should jointly negotiate a mutually acceptable date for this retest. When providing feedback on inadequacies, the committee should clearly document expected improvements that the student must be able to exhibit in order to retake the exam. The examination committee will document and communicate the time-frame and feedback within 10 working days of the exam that was not passed.

Final Examination for Doctoral Students

The candidate for the doctoral degree must pass a final examination by deadline dates announced in the "Office of Graduate and Professional Studies Calendar" each semester. The doctoral student is allowed only one opportunity to take the final examination.

No unsolved grades of D, F, or U for any course can be listed on the degree plan. The student must be registered for any remaining hours of 681, 684, 690, 691, 692, 791 or other graduate courses specifically designated as S/U in the course catalog during the semester of the final exam. No student may be given a final examination until they have been admitted to candidacy and their current official cumulative and degree plan GPAs are 3.00 or better.

To be admitted to candidacy for a doctoral degree, a student must have:

1. completed all formal coursework on the degree plan with the exception of any remaining 681, 684, 690 and 691, 692 (Professional Study), or 791 hours,
2. a 3.0 Graduate GPA and a Degree Plan GPA of at least 3.0 with no grade lower than C in any course on the degree plan,
3. passed the preliminary examination,
4. submitted an approved dissertation proposal,
5. met the residence requirements.

The request to hold and announce the final examination must be submitted to the Office of Graduate and Professional Studies a minimum of 10 working days in advance of the scheduled date. Any changes to the degree plan must be approved by the Office of Graduate and Professional Studies prior to the submission of the request for final examination.

The student's advisory committee will conduct this examination. The final examination is not to be administered until the dissertation or record of study is available in substantially final form to the student's advisory committee, and all concerned have had adequate time to review the document. Whereas the final examination may cover the broad field of the candidate's training, it is presumed that the major portion of the time will be devoted to the dissertation and closely allied topics. Persons other than members of the graduate faculty may, with mutual consent of the candidate and the chair of the advisory committee, be invited to attend a final examination for an advanced degree. A positive vote by all members of the graduate committee with at most one dissension is required to pass a student on his or her exam. A department can have a stricter requirement provided there is consistency within all degree programs within a department. Upon completion of the questioning of the candidate, all visitors must excuse themselves from the proceedings.

Report of Final Examination

The student's department will promptly report the results of the Final Examination to the Office of Graduate and Professional Studies via the Report of Doctoral Final Examination form. These forms should be submitted to the Office of Graduate and Professional Studies within 10 working days of completion of the final examination. The Office of Graduate and Professional Studies must be notified in writing of any cancellations.

A positive evaluation of the final exam by all members of a student's advisory committee with at most one dissension is required to pass a student on his or her final exam. The Report of the Final Examination Form must be submitted with original signatures of only the committee members approved by the Office of Graduate and Professional Studies. If necessary, multiple copies of the form may be submitted with different committee member original signatures. If an approved committee member substitution (1 only) has been made, his/her signature must be included on the form submitted to the Office of Graduate and Professional Studies.

Dissertation

The ability to perform independent research must be demonstrated by the dissertation, which must be the original work of the candidate. Whereas acceptance of the dissertation is based primarily on its scholarly merit, it must also exhibit creditable literary workmanship. The format of the dissertation must be acceptable to the Office of Graduate and Professional Studies. Guidelines for the preparation of the dissertation are available in the Thesis Manual, which is available online at http://ogaps.tamu.edu.

After successful defense and approval by the student's advisory committee and the head of the student's major department (or chair of
the intercollegiate faculty, if applicable), a student must submit his/her dissertation in electronic format as a single PDF file. The PDF file must be uploaded to the website, http://ogaps.tamu.edu. Additionally, a signed paper approval form with original signatures must be received by the Office of Graduate and Professional Studies. Both the PDF file and the signed approval form are required by the deadline.

Deadline dates for submitting are announced each semester or summer term in the Office of Graduate and Professional Studies Calendar (see Time Limit statement). These dates also can be accessed via the website http://ogaps.tamu.edu.

Each student who submits a document for review is assessed a one-time thesis/dissertation processing fee through Student Business Services. This processing fee is for the thesis/dissertation services provided. After commencement, dissertations are digitally stored and made available through the Texas A&M Libraries.

A dissertation that is deemed unacceptable by the Office of Graduate and Professional Studies because of excessive corrections will be returned to the student’s department head or chair of the intercollegiate faculty. The manuscript must be resubmitted as a new document, and the entire review process must begin anew. All original submittal deadlines must be met during the resubmittal process in order to graduate.

### Additional Requirements

#### Additional Requirements

- Residence (p. 1231)
- Time Limit (p. 1231)
- Continuous Registration (p. 1231)
- Admission to Candidacy (p. 1231)
- Languages (p. 1231)
- 99-Hour Cap on Doctoral Degree (p. 1231)
- Application for Degree (p. 1232)

#### Residence

A student who enters the doctoral degree program with a baccalaureate degree must spend one academic year plus one semester in resident study at Texas A&M University. A student who holds master’s degree when he/she enters doctoral degree program must spend one academic year in resident study. One academic year may include two adjacent regular semesters or one regular semester and one adjacent 10-week summer semester. The third semester is not required to be adjacent to the one year. Enrollment for each semester must be a minimum of 9 credit hours each to satisfy the residence requirement.

To satisfy the residence requirement, the student must complete a minimum of 9 credit hours per semester or 10-week summer semester in resident study at Texas A&M University for the required period. A student who enters a doctoral degree program with a baccalaureate degree may fulfill residence requirements in excess of one academic year (18 credit hours) by registration during summer sessions or by completion of a less-than-full course load (in this context a full course load is considered 9 credit hours per semester).

Students who are employed full-time while completing their degree may fulfill total residence requirements by completion of less-than-full time course loads each semester. In order to be considered for this, the student is required to submit a Petition for Waivers and Exceptions along with verification of his/her employment at the time he/she submits the degree plan.

### Time Limit

All requirements for doctoral degrees must be completed within a period of ten consecutive calendar years for the degree to be granted. A course will be considered valid until 10 years after the end of the semester in which it is taken. Graduate credit for coursework more than ten calendar years old at the time of the final oral examination may not be used to satisfy degree requirements.

After passing the required preliminary oral and written examinations for a doctoral degree, the student must complete the final examination within four calendar years. Otherwise, the student will be required to repeat the preliminary examination.

A final corrected version of the dissertation or record of study in electronic format as a single PDF file must be cleared by the Office of Graduate and Professional Studies no later than one year after the final examination or within the 10-year time limit, whichever occurs first. Failure to do so will result in the degree not being awarded.

### Continuous Registration

A student in a program leading to a Doctor of Philosophy who has completed all coursework on his/her degree plan other than 691, 5V98 or 5V99 (research) are required to be in continuous registration until all requirements for the degree have been completed. See Continuous Registration Requirements (p. 28).

### Admission to Candidacy

To be admitted to candidacy for a doctoral degree, a student must have:

1. completed all formal coursework on the degree plan with the exception of any remaining 681, 684, 690 and 691, 5V98 and 5V99, or 791.
2. a 3.0 Graduate GPA and a Degree Plan GPA of at least 3.0 with no grade lower than C in any course on the degree plan,
3. passed the preliminary examination (written and oral portions),
4. submitted an approved dissertation proposal,
5. met the residence requirements. The final examination will not be authorized for any doctoral student who has not been admitted to candidacy.

### Languages

A student is required to possess a competent command of English. For English language proficiency requirements, see the Admissions section of this catalog. The doctoral (PhD) foreign language requirement at Texas A&M University is a departmental option, to be administered and monitored by the individual departments of academic instruction.

### 99-Hour Cap on Doctoral Degrees

In Texas, public colleges and universities are funded by the state according to the number of students enrolled. In accordance with legislation passed by the Texas Legislature, the number of hours for which state universities may receive subvention funding at the doctoral rate for any individual is limited to 99 hours. Texas A&M University and
other universities will not receive subvention for hours in excess of the limit.

Institutions of higher education are allowed to charge the equivalent of nonresident tuition to a resident doctoral student who has enrolled in 100 or more semester credit hours of doctoral coursework.

A doctoral student at Texas A&M has seven years to complete his/her degree before being charged out-of-state tuition. A doctoral student who, after seven years of study, has accumulated 100 or more doctoral hours will be charged tuition at a rate equivalent to out-of-state tuition. Please note that the tuition increases will apply to Texas residents as well as students from other states and countries who currently are charged tuition at the resident rate. This includes those doctoral students who hold GAT, GANT, and GAR appointments of 20 or more hours and recipients of competitive fellowships who receive more than $1,000 per semester. Doctoral students who, after seven years of study, have not accumulated 100 hours are eligible to pay in-state tuition if otherwise eligible.

For count purposes, a year is counted as three semesters, normally fall, spring and summer. Using this system, a student is allowed 21 semesters as a G8 student to complete the doctoral degree before being penalized with the higher tuition rate. Any semester in which a G8 student is enrolled for a doctoral level course is counted.

The following majors are exempt from the 99-Hour Cap on Doctoral Degrees:

- Biomedical Sciences
- Biochemistry
- Microbiology
- Genetics
- Toxicology
- Nutrition Sciences
- Community Clinical Psychology
- School Psychology
- Veterinary Pathology
- Clinical Psychology
- Counseling Psychology
- Medical Sciences
- Health Services Research
- Health Promotion and Community Health Sciences
- Epidemiology and Environmental Health
- Oral Biology

The hour limit for these majors is 130 doctoral hours

Application for Degree

For information on applying for your degree, please visit the Graduation (p. 26) section.

Department of Chemistry

http://chem.tamu.edu

Head: S. W. North

Graduate Advisor: Christian B. Hilty

The Department of Chemistry offers a program of study leading to a PhD degree in Chemistry.

The PhD degree curriculum in chemistry is designed to 1) provide students with an understanding of chemical principles 2) train students to become independent chemical researchers, 3) teach students how to effectively communicate the results of chemical research, and 4) prepare students to become professional chemists. Upon completion of the PhD program in chemistry students are qualified to obtain jobs as senior scientists in industrial and government labs or as postdoctoral researchers or junior faculty members at academic institutions.

The PhD degree program is designed to ensure that students receive extensive research experience. Opportunities for research are available to graduate students in all areas of modern chemistry including analytical, atmospheric, biological, catalysis, computational, energy, inorganic, materials, nuclear, organic, organometallic, physical and polymer chemistry. Students are trained in state-of-the-art instrumentation facilities, laboratories and shops. In addition to research, graduate students in the Department of Chemistry are required to enroll in chemistry coursework, serve as teaching assistants for at least two semesters, present and attend seminars, and pass a series of cumulative exams.

Chemistry graduate students are generally admitted into the PhD program. However, with approval, a student may pursue a research-based MS degree with thesis.

For further details about programs, faculty, facilities and financial assistance, write to the Graduate Advisor of the Department of Chemistry, or send an email message to gradmail@chem.tamu.edu. Additional information may be found on the departmental website at http://chem.tamu.edu.

Masters

- Master of Science in Chemistry (p. 1234)

Doctoral

- Doctor of Philosophy in Chemistry (p. 1239)

**Master of Science in Chemistry**

The **Master of Science** (MS) curriculum is designed to develop new understanding through research and creativity. Students have the option to pursue a thesis or non-thesis Master of Science degree.

**Steps to Fulfill Master's Degree Requirements**

1. Meet with departmental **When:** Before first semester registration.  
   **Approved by:** Graduate advisor or chair of the intercollegiate faculty.
<table>
<thead>
<tr>
<th>Step</th>
<th>Action and Details</th>
</tr>
</thead>
</table>
| 2    | Establish advisory committee. Submit a degree plan.  
      *When:* Prior to the deadline imposed by the student’s college and no later than 90 days prior to final oral or thesis defense.  
      *Approved by:* Advisory committee, department head or chair of the intercollegiate faculty, and Office of Graduate and Professional Studies (OGAPS). |
| 3    | If thesis is required, submit thesis research proposal and research proposal approval form to the Office of Graduate and Professional Studies.  
      *When:* At least 20 working days prior to the submission of the Request for the Final Examination.  
      *Approved by:* Advisory committee, department head or chair of the intercollegiate faculty, Research Compliance and Biosafety, and OGAPS. |
| 4    | Apply for degree; pay graduation fee.  
      *When:* During the first week of the final semester, see OGAPS calendar. |
| 5    | Check to be sure degree program and advisory committee are up-to-date, and coursework is complete.  
      *When:* Well before submitting request to schedule final examination. |
| 6    | Complete residence requirement.  
      *When:* If applicable, before or during final semester.  
      *Approved by:* OGAPS. |
| 7    | Submit request to schedule final examination.  
      *When:* Must be received by OGAPS at least 10 working days before exam date. See OGAPS calendar for deadlines.  
      *Approved by:* Advisory committee, department head or chair of the intercollegiate faculty, and OGAPS. |
| 8    | Successfully complete final examination.  
      *When:* The Report of the Final Examination Form should be submitted to OGAPS within 10 days following the exam.  
      *Approved by:* Advisory committee and OGAPS. |
| 9    | If required, upload one approved final copy of thesis as a single PDF file to etd.tamu.edu and submit the fully signed thesis approval form to the Office of Graduate and Professional Studies.  
      *When:* See OGAPS calendar for deadlines.  
      *Approved by:* Advisory committee, department head or chair of the intercollegiate faculty and OGAPS. |
| 10   | Graduation; arrange for cap and gown.  
      *For more information,* visit http://graduation.tamu.edu.  
      *1* The online Document Processing Submission System is located on the website https://ogsdpss.tamu.edu.  
      *2* Complete the application for degree form via the student’s Howdy portal. |

Chemistry graduate students are generally admitted into the Ph.D. program. However, with approval, a student may pursue a research-based M.S. degree with thesis. In addition to research, these graduate students in the Department of Chemistry are required to enroll in chemistry coursework, serve as teaching assistants for at least two semesters, present seminars and attend seminars. For further details about programs, faculty, facilities and financial assistance, write to the Graduate Advisor of the Department of Chemistry, or send an email message to gradmail@chem.tamu.edu. Additional information may be found on the departmental website at http://www.chem.tamu.edu/.

### Program Requirements

#### Program Requirements

- Student’s Advisory Committee (p. 1235)
- Degree Plan (p. 1236)
- Credit Requirements (p. 1236)
- Transfer of Credit (p. 1236)
- Limitations on the Use of Transfer, Extension and Certain Other Courses (p. 1236)
- Thesis Option (p. 1237)
  - Thesis Proposal (p. 1237)
  - Final Examination/Thesis Defense (p. 1237)
- Non-Thesis Option (p. 1238)

#### Student’s Advisory Committee

After receiving admission to graduate studies and enrolling for coursework, the student will consult with the head of his or her major or administrative department (or intercollegiate faculty, if applicable) concerning appointment of the chair of his or her advisory committee. The student’s advisory committee for the MS degree will consist of no fewer than three members of the graduate faculty, representative of the student’s fields of study and research. The chair or the co-chair of the advisory committee must be from the student’s major department (or intercollegiate faculty, if applicable), and at least one or more of the members must have an appointment to a department other than the student’s major department. The outside member for students in an interdisciplinary program must have an appointment to a department different from the chair of the student’s committee.
The chair, in consultation with the student, will select the remainder of the advisory committee. The student will interview each prospective committee member to determine whether he or she is willing to serve. Only graduate faculty members located on Texas A&M University campuses may serve as chair of a student’s advisory committee. Other graduate faculty members located off campus may serve as a member or co-chair (but not chair) with a member as the chair. The chair of the committee, who usually has immediate supervision of the student’s research and thesis, has the responsibility for calling required meetings of the committee and for calling meetings at any other time considered desirable.

If the chair of a student’s advisory committee voluntarily leaves the University and the student is near completion of the degree and wants the chair to continue to serve in this role, the student is responsible for securing a current member of the University Graduate Faculty, from the student’s academic program and located near the Texas A&M University campus site, to serve as the co-chair of the committee. The Department Head or Chair of Intercollegiate faculty may request in writing to the Associate Provost for Graduate and Professional Studies that a faculty member who is on an approved leave of absence or has voluntarily separated from the university, be allowed to continue to serve in the role of chair of a student’s advisory committee without a co-chair for us to one year. The students should be near completion of the degree. Extensions beyond the one year period can be granted with additional approval of the Dean.

If the chair of the student’s advisory committee is unavailable for an extended time in any academic period during which the student is involved in activities relating to an internship, thesis or professional paper, and is registered for courses such as 684, 691, 692 or 693, the student may request, in writing, that the department head appoint an alternate advisory committee chair during the interim period.

The duties of the committee include responsibility for the proposed degree plan, the research proposal, the thesis and the final examination. In addition, the committee as a group and as individual members are responsible for advising the student on academic matters, and, in the case of academic deficiency, initiating recommendations to the Office of Graduate and Professional Studies.

The committee members’ approval on the degree plan indicate their willingness to accept the responsibility for guiding and directing the entire academic program of the student and for initiating all academic actions concerning the student. Although individual committee members may be replaced by petition for valid reasons, a committee cannot resign en masse.

**Degree Plan**

The student’s advisory committee, in consultation with the student, will develop the proposed degree plan. The degree plan must be completed and filed with the Office of Graduate and Professional Studies prior to the deadline imposed by the student’s college or interdisciplinary degree program, if applicable, and no later than 90 days prior to the date of the final oral examination or thesis defense.

A student should submit the degree plan using the online Document Processing Submission System (http://ogsdpss.tamu.edu).

A student submitting a proposed degree plan for a Master of Science degree should designate on the official degree plan the appropriate program option.

Additional coursework may be added to the approved degree plan by petition if it is deemed necessary by the advisory committee to correct deficiencies in the student’s academic preparation. No changes can be made to the degree plan once the student’s Request for Final Examination or Request for Final Examination Exemption is approved by the Office of Graduate and Professional Studies.

**Credit Requirement**

A student submitting a proposed degree plan for a Master of Science degree should designate on the official degree plan the appropriate program option. No changes can be made to the degree plan once the student’s Request for Final Examination or Request for Final Examination Exemption is approved by the Office of Graduate and Professional Studies. Credit for coursework submitted for transfer from any college or university must be shown in semester credit hours or equated to semester credit hours. An official transcript from the university at which the transfer coursework was taken must be sent directly to the Office of Admissions.

Courses used toward a degree at another institution may not be applied for graduate credit. If the course to be transferred was taken prior to the conferral of a degree at the transfer institution, a letter from the registrar at that institution stating that the course was not applied for credit toward the degree must be submitted to the Office of Graduate and Professional Studies.

Grades for courses completed at other institutions are not included in computing the GPR.

**Limitations on the Use of Transfer, Extension and Certain Other Courses**

Some departments may have more restrictive requirements for transfer work. If otherwise acceptable, certain courses may be used toward meeting credit-hour requirements for the master’s degree under the following limitations.

1. The maximum number of credit hours which may be considered for transfer credit is the greater of 12 hours or one-third (1/3) of the total hours of a degree plan. The following restrictions apply:
   - Graduate and/or upper-level undergraduate courses taken in residence at an accredited U.S. institution, or approved
international institution with a final grade of B or greater will be considered for transfer credit if, at the time the courses were completed, the student was in degree-seeking status at Texas A&M University, or the student was in degree-seeking status at the institution at which the courses were taken; and if the courses would be accepted for credit toward a similar degree for a student in degree-seeking status at the host institution.

• Courses previously used for another degree are not acceptable for degree plan credit.

2. The maximum number of credit hours taken in post-baccalaureate non-degree (G6) classification at Texas A&M University which may be considered for application to the degree plan is 12.

3. A zero credit 684 and 685 course is only allowed for non-thesis master's students. Other courses, including 691 research hours, are not eligible for zero credit.

4. Not more than 12 hours may be used in any combination of the following categories:
   • Not more than 8 hours in the combination of 691 (research), 684 (Professional Internship) or may be used.
   • Not more than 8 hours of 685 (Directed Studies) may be used.
   • Not more than 3 hours of 690 (Theory of Research) may be used.
   • Not more than 3 hours of 695 (Frontiers in Research) may be used.

5. A maximum of 2 hours of Seminar (681).

6. A maximum of 9 hours of advanced undergraduate courses (300- or 400-level).

7. For graduate courses of three weeks' duration or less, taken at other institutions, up to 1 hour of credit may be obtained for each five-day week of coursework. Each week of coursework must include at least 15 contact hours.

8. Continuing education courses may not be used for graduate credit.

9. Extension courses are not acceptable for credit.

Exceptions will be permitted only in unusual cases and when petitioned by the student's advisory committee and approved by the Office of Graduate and Professional Studies.

**Thesis Option**

An acceptable thesis is required for the Master of Science degree for a student who selects the thesis option program. The finished work must reflect a comprehensive understanding of the pertinent literature and express in clear English, the problem(s) for study, the method, significance and results of the student's original research. Guidelines for the preparation of the thesis are available in the *Thesis Manual*, which is available online at the Office of Graduate and Professional Studies website.

After successful defense (or exemption) and approval by the student's advisory committee and the head of the student's major department (or chair of the intercollegiate faculty, if applicable), the student must submit his/her thesis in electronic format as a single PDF file. The PDF file must be uploaded to the Office of Graduate and Professional Studies website. Additionally, a signed paper approval form with original signatures must be received by the Office of Graduate and Professional Studies. The PDF file and the signed approval form are required by the deadline.

Deadline dates for submitting the thesis are announced each semester or summer term in the "Office of Graduate and Professional Studies Calendar" (see Time Limit statement). These dates also can be accessed via the Office of Graduate and Professional Studies website.

Each student who submits a document for review is assessed a one-time thesis/dissertation processing fee through Student Business Services. This processing fee is for the thesis/dissertation services provided. After commencement, theses and dissertations are digitally stored and made available through the Texas A&M Libraries.

A thesis that is deemed unacceptable by the Office of Graduate and Professional Studies because of excessive corrections will be returned to the student's department head (or chair of the intercollegiate faculty, if applicable). The manuscript must be resubmitted as a new document, and the entire review process must begin again. All original submittal deadlines must be met during the resubmittal process to graduate that semester.

**Thesis Proposal**

For the thesis option Master of Science degree, the student must prepare a thesis proposal for approval by the advisory committee and the head of the major department or chair of the interdisciplinary faculty, if applicable. This proposal must be submitted to the Office of Graduate and Professional Studies at least 20 working days prior to the submission of the request for the final examination.

Compliance issues must be addressed if a graduate student is performing research involving human subjects, animals, infectious biohazards and recombinant DNA. A student involved in these types of research should check with the Office of Research Compliance and Biosafety at (979) 458-1467 to address questions about all research compliance responsibilities. Additional information can also be obtained on the Office of Research Compliance and Biosafety website.

**Final Examination/Thesis Defense**

A student must pass a final examination by dates announced each semester or summer term in the Office of Graduate and Professional Studies Calendar. To be eligible to take the final examination, a student's GPR must be at least 3.000 for courses on the degree plan and for all courses completed at Texas A&M which are eligible to be applied to a graduate degree, and there must be no unabsolved grades of D, F or U for any course listed on the degree plan. To absolve a deficient grade, the student must repeat the course at Texas A&M University and achieve a grade of C or better. All coursework on the degree plan must have been completed with the exception of those hours for which the student is registered. For thesis-option students, an approved thesis proposal must be on file in the Office of Graduate and Professional Studies according to published deadlines prior to the final examination or submission of the request for exemption from the final examination.

A request to hold and announce the final examination must be submitted to the Office of Graduate and Professional Studies a minimum of 10 working days in advance of the scheduled date for the examination. The Office of Graduate and Professional Studies must be notified in writing of any cancellations. A student may be given only one opportunity to repeat the final examination for the master's degree and that must be within a time period that does not extend beyond the end of the next regular semester (summer terms are excluded).

For thesis option students, the final examination covers the thesis and all work taken on the degree plan and at the option of the committee may be written or oral or both. The final examination may not be administered before the thesis is available to all members of the student's advisory
committee in substantially final form, and all members have had adequate time to review the document. The examination is conducted by the student’s advisory committee as finally constituted. A thesis option student must be registered in the University in the semester or summer term in which the final examination is taken. Persons other than members of the graduate faculty may, with mutual consent of the candidate and the major professor, attend final examinations for advanced degrees. Upon completion of the questioning of the candidate, all visitors must excuse themselves from the proceedings. A positive vote by all members of the graduate committee with at most one dissension is required to pass a student on his or her exam. A department, or interdisciplinary degree program, may have a stricter requirement provided there is consistency within all degree programs within a department or interdisciplinary degree program.

The Report of the Final Examination Form must be submitted with original signatures of only the committee members approved by the Office of Graduate and Professional Studies. If an approved committee member substitution (1 only) has been made, his/her signature must also be submitted to the Office of Graduate and Professional Studies. If necessary, multiple copies of the form may be submitted with different committee member original signatures. If an approved committee member substitution (1 only) has been made, his/her signature must be included on the form submitted to the Office of Graduate and Professional Studies.

A thesis option candidate may petition to be exempt from his/her final examination provided his/her degree plan GPR is 3.500 or greater and he/she has the approval of the advisory committee, the head of the student’s major department, or intercollegiate chair, if appropriate, and the Office of Graduate and Professional Studies. It is required that the petition for exemption be submitted the same semester the student intends to submit the thesis.

Non-Thesis Option

For non-thesis option students, a final comprehensive examination may be required.

The final exam cannot be held prior to the mid point of the semester if questions on the exam are based on courses in which the student is currently enrolled. If a student has completed all required degree plan coursework, the student is not required to be registered for classes in the semester the final examination is administered (unless he/she holds an assistantship). For specific final examination requirements, a student should check the program requirements for the degree which he/she is pursuing.

Exam results must be submitted with original signatures of only the committee members approved by the Office of Graduate and Professional Studies. If an approved committee member substitution (1 only) has been made, his/her signature must also be submitted to the Office of Graduate and Professional Studies.

A student pursuing the non-thesis option is not allowed to enroll in 691 (research) for any reason and 691 may not be used for credit toward a non-thesis option Master of Science degree. A maximum of 4 credit hours of 684 (Professional Internship), 8 credit hours of 685 (Directed Studies), and up to 3 credit hours of 690 (Theory of Research) or 695 (Frontiers in Research) may be used toward the non-thesis option Master of Science degree. In addition, any combination of 684, 685, 690 and 695 may not exceed 25 percent of the total credit hour requirement shown on the individual degree plan. All requirements for the non-thesis option Master of Science degree other than those specified above are the same as for the thesis option degree.

Additional Requirements

Additional Requirements

- Residence (p. 1238)
- Continuous Registration (p. 1238)
- Time Limit (p. 1238)
- Foreign Languages (p. 1238)
- Application for Degree (p. 1239)

Residence

In partial fulfillment of the residence requirement for the degree of Master of Science, the student must complete 9 resident credit hours during one regular semester or one 10-week summer semester in resident study at Texas A&M University. Upon recommendation of the student’s advisory committee, department head or Chair of the Interdisciplinary Program, if appropriate, and with approval of the Office of Graduate and Professional Studies, a student may be granted exemption from this requirement. Such a petition, however, must be approved prior to the student’s registration for the final 9 credit hours of required coursework.

Students who are employed full-time while completing their degree may fulfill total residence requirements by completion of less-than-full time course loads each semester. In order to be considered for this, the student is required to submit a Petition for Waivers and Exceptions along with verification of his/her employment to the Office of Graduate and Professional Studies.

See Residence Requirements (p. 22).

Continuous Registration

A student in the thesis option of the Master of Science program who has completed all coursework on his/her degree plan other than 5V98, 5V99, and 691 (research) is required to be in continuous registration until all requirements for the degree have been completed. See Continuous Registration Requirements (p. 28).

Time Limit

All degree requirements must be completed within a period of seven consecutive years for the degree to be granted. A course will be considered valid until seven years after the end of the semester in which it is taken. Graduate credit for coursework which is more than seven calendar years old at the time of the final examination (oral or written) may not be used to satisfy degree requirements.

A student who has chosen the thesis option must have the final corrected version of the thesis cleared by the Office of Graduate and Professional Studies no later than one year after the final examination, or approval of a petition for exemption from the final exam, or within the seven-year time limit, whichever occurs first. Failure to do so will result in the degree not being awarded.

Foreign Languages

No specific language requirement exists for the Master of Science degree.
### Application for Degree

For information on applying for your degree, please visit the Graduation (p. 26) section.

### Doctor of Philosophy in Chemistry

The Ph.D. degree program is designed to ensure that students receive extensive research experience. In addition to research, graduate students in the Department of Chemistry are required to enroll in chemistry coursework, serve as teaching assistants for at least two semesters, present seminars, attend seminars and pass a series of cumulative exams.

For further details about programs, faculty, facilities and financial assistance, write to the Graduate Advisor of the Department of Chemistry, or send an email message to gradmail@chem.tamu.edu. Additional information may be found on the departmental website at http://www.chem.tamu.edu.

Work leading to the degree of **Doctor of Philosophy (PhD)** is designed to give the candidate a thorough and comprehensive knowledge of his or her professional field and training in methods of research. The final basis for granting the degree shall be the candidate's grasp of the subject matter of a broad field of study and a demonstrated ability to do independent research. In addition, the candidate must have acquired the ability to express thoughts clearly and forcefully in both oral and written languages. The degree is not granted solely for the completion of coursework, residence and technical requirements, although these must be met.

For a student who has completed a master's degree, a DDS/DMD, DVM or MD at a U.S. institution, a minimum of 64 hours is required on the degree plan for the degree of Doctor of Philosophy. For a student who has completed a baccalaureate degree but not a master's degree or a U.S. DDS/DMD, DVM or MD, a minimum of 96 hours is required on the degree plan for the degree of Doctor of Philosophy.

### Steps to Fulfill Doctoral Degree Requirements

</tbody>
</table>
If the chair of a student's advisory committee voluntarily leaves the University and the student is near completion of the degree and wants the chair to continue to serve in this role, the student is responsible for securing a current member of the University Graduate Faculty, from the student's academic program and located near the Texas A&M University campus site, to serve as the co-chair of the committee. The Department Head or Chair of Intercollegiate faculty may request in writing to the Associate Provost for Graduate and Professional Studies that a faculty member who is on an approved leave of absence or has voluntarily separated from the university, be allowed to continue to serve in the role of chair of a student's advisory committee without a co-chair for up to one year. The students should be near completion of the degree. Extensions beyond the one year period can be granted with additional approval of the Dean.

The committee members’ signatures on the degree plan indicate their willingness to accept the responsibility for guiding and directing the entire academic program of the student and for initiating all academic actions concerning the student. Although individual committee members may be replaced by petition for valid reasons, a committee cannot resign en masse. The chair of the committee, who usually has immediate supervision of the student's research and dissertation or record of study, has the responsibility for calling all meetings of the committee. The duties of the committee include responsibility for the proposed degree plan, the research proposal, the preliminary examination, the dissertation or record of study and the final examination. In addition, the committee, as a group and as individual members, is responsible for counseling the student on academic matters, and, in the case of academic deficiency, initiating recommendations to the Office of Graduate and Professional Studies.

**Degree Plan**

The student's advisory committee will evaluate the student's previous education and degree objectives. The committee, in consultation with the student, will develop a proposed degree plan and outline a research problem which, when completed, as indicated by the dissertation (or its equivalent for the degree of Doctor of Education or the degree of Doctor of Engineering), will constitute the basic requirements for the degree. The degree plan must be filed with the Office of Graduate and Professional Studies prior to the deadline imposed by the student's college and no later than 90 days prior to the preliminary examination.

This proposed degree plan should be submitted through the online Document Processing Submission System located on the website http://ogsdpss.tamu.edu. A minimum of 64 hours is required on the degree plan for the Doctor of Philosophy for a student who has completed a master's degree. A student who has completed a DDS/DMD, DVM or a MD at a U.S. institution is also required to complete a minimum of 64 hours. A student who has completed a baccalaureate degree but not a master's degree will be required to complete a 96-hour degree plan. Completion of a DDS/DMD, DVM or MD degree at a foreign institution requires completion of a minimum of 96 hours for the Doctor of Philosophy. A field of study may be primarily in one department or in a combination of departments. A degree plan must carry a reasonable amount of 691 (research).

Additional coursework may be added by petition to the approved degree plan by the student's advisory committee if it is deemed necessary to correct deficiencies in the student’s academic preparation. No changes can be made to the degree plan once the student's Request for Final Examination is approved by the Office of Graduate and Professional Studies.
Approval to enroll in any professional course (900-level) should be obtained from the head of the department (or Chair of the intercollegiate faculty, if applicable) in which the course will be offered before including such a course on a degree plan.

No credit may be obtained by correspondence study, by extension or for any course of fewer than three weeks duration.

Transfer of Credit
Courses for which transfer credits are sought must have been completed with a grade of B or greater and must be approved by the student’s advisory committee and the Office of Graduate and Professional Studies. These courses must not have been used previously for another degree. Except for officially approved cooperative doctoral programs, credit for thesis or dissertation research or the equivalent is not transferable. Credit for “internship” coursework in any form is not transferable. Courses taken in residence at an accredited U.S. institution or approved international institution with a final grade of B or greater will be considered for transfer credit if, at the time the courses were completed, the courses would be accepted for credit toward a similar degree for a student in degree-seeking status at the host institution. Credit for coursework taken by extension is not transferable. Coursework in which no formal grades are given or in which grades other than letter grades (A or B) are earned (for example, CR, P, S, U, H, etc.) is not accepted for transfer credit. Credit for coursework submitted for transfer from any college or university must be shown in semester credit hours, or equated to semester credit hours.

Courses used toward a degree at another institution may not be applied for graduate credit. If the course to be transferred was taken prior to the conferral of a degree at the transfer institution, a letter from the registrar at that institution stating that the course was not applied for credit toward the degree must be submitted to the Office of Graduate and Professional Studies.

Grades for courses completed at other institutions are not included in computing the GPR. An official transcript from the university at which transfer courses are taken must be sent directly to the Office of Admissions.

Research Proposal
The general field of research to be used for the dissertation should be agreed on by the student and the advisory committee at their first meeting, as a basis for selecting the proper courses to support the proposed research.

As soon thereafter as the research project can be outlined in reasonable detail, the dissertation research proposal should be completed. The research proposal should be approved at a meeting of the student’s advisory committee, at which time the feasibility of the proposed research and the adequacy of available facilities should be reviewed. The approved proposal, signed by all members of the student’s advisory committee, the head of the student’s major department (or chair of the intercollegiate faculty, if applicable), must be submitted to the Office of Graduate and Professional Studies at least 20 working days prior to the submission of the Request for the Final Examination.

Compliance issues must be addressed if a graduate student is performing research involving human subjects, animals, infectious biohazards and recombinant DNA. A student involved in these types of research should check with the Office of Research Compliance and Biosafety at (979) 458-1467 to address questions about all research compliance responsibilities. Additional information can also be obtained on the website http://rcb.tamu.edu.

Examinations
Preliminary Examination for Doctoral Students
The student’s major department (or chair of the interdisciplinary degree program, if applicable) and his or her advisory committee may require qualifying, cumulative or other types of examinations at any time deemed desirable. These examinations are entirely at the discretion of the department and the student’s advisory committee.

The preliminary examination is required. The preliminary examination for a doctoral student shall be given no earlier than a date at which the student is within 6 credit hours of completion of the formal coursework on the degree plan (i.e., all coursework on the degree plan except 681, 684, 690, 691, 692, 693, 695, 697, 791, or other graduate courses specifically designated as S/U in the course catalog). The student should complete the Preliminary Examination no later than the end of the semester following the completion of the formal coursework on the degree plan.

Preliminary Examination Format
The objective of preliminary examination is to evaluate whether the student has demonstrated the following qualifications:

- a mastery of the subject matter of all fields in the program;
- an adequate knowledge of the literature in these fields and an ability to carry out bibliographical research;
- an understanding of the research problem and the appropriate methodological approaches.

The format of the preliminary examination shall be determined by the student’s department (or interdisciplinary degree program, if applicable) and advisory committee, and communicated to the student in advance of the examination. The exam may consist of a written component, oral component, or combination of written and oral components.

The preliminary exam may be administered by the advisory committee or a departmental committee; herein referred to as the examination committee.

Regardless of exam format, a student will receive an overall preliminary exam result of pass or fail. The department (or interdisciplinary degree program, if applicable) will determine how the overall pass or fail result is determined based on the exam structure and internal department procedures. If the exam is administered by the advisory committee, each advisory committee member will provide a pass or fail evaluation decision.

Only one advisory committee substitution is allowed to provide an evaluation decision for a student's preliminary exam, and it cannot be the committee chair.

If a student is required to take, as a part of the preliminary examination, a written component administered by a department or interdisciplinary degree program, the department or interdisciplinary degree program faculty must:
a. offer the examination at least once every six months. The departmental or interdisciplinary degree program examination should be announced at least 30 days prior to the scheduled examination date.

b. assume the responsibility for marking the examination satisfactory or unsatisfactory, or otherwise graded, and in the case of unsatisfactory, stating specifically the reasons for such a mark.

c. forward the marked examination to the chair of the student's advisory committee within one week after the examination.

Preliminary Examination Scheduling

Prior to commencing any component of the preliminary examination, a departmental representative or the advisory committee chair will review the eligibility criteria with the student, using the Preliminary Examination Checklist to ensure the student is eligible for the preliminary examination. The following list of eligibility requirements applies.

- Student is registered at Texas A&M University for a minimum of one semester credit hour in the long semester or summer term during which any component of the preliminary examination is held. If the entire examination is held between semesters, then the student must be registered for the term immediately preceding the examination.

- An approved degree plan is on file with the Office of Graduate and Professional Studies prior to commencing the first component of the examination.

- Student's cumulative GPR is at least 3.00.

- Student's degree plan GPR is at least 3.00.

- All English language proficiency requirements are satisfied.

- At the end of the semester in which at least the first component of the exam is given, there are no more than 6 hours of coursework remaining on the degree plan (except 681, 684, 690, 691, 692, 693, 695, 697, 791, or other graduate courses specifically designated as S/U in the course catalog). The head of the student's department (or Chair of the Interdisciplinary Degree Program, if applicable) has the authority to approve a waiver of this criterion.

Report of Preliminary Examination

Credit for the preliminary examination is not transferable in cases where a student changes degree programs after passing a preliminary exam.

If a written component precedes an oral component of the preliminary exam, the chair of the student's examination committee is responsible for making all written examinations available to all members of the committee. A positive evaluation of the preliminary exam by all members of a student's examination committee with at most one dissension is required to pass a student on his or her preliminary exam.

The student's department will promptly report the results of the Preliminary Examination to the Office of Graduate and Professional Studies via the Report of Doctoral Preliminary Examination form. The Preliminary Examination checklist form must also be submitted. These forms should be submitted to the Office of Graduate and Professional Studies within 10 working days of completion of the preliminary examination.

The Report of the Preliminary Examination form must be submitted with original signatures of the approved examination committee members.

If an approved examination committee member substitution (one only) has been made, that signature must also be included, in place of the committee member, on the form submitted to the Office of Graduate and Professional Studies. The original signature of the department head is also required on the form.

After passing the required preliminary examination for the doctoral degree, the student must complete the final examination for the degree within four calendar years. Otherwise, the student will be required to repeat the preliminary examination.

Retake of Failed Preliminary Examination

Upon approval of the student's examination committee, with no more than one member dissenting, and approval of the Office of Graduate and Professional Studies, a student who has failed the preliminary examination may be given one re-examination. Adequate time must be given to permit the student to address the inadequacies emerging from the first preliminary examination. The examination committee must agree upon and communicate to the student, an adequate time-frame from the first examination (normally six months) to retest, as well as a detailed explanation of the inadequacies emerging from the examination. The student and the committee should jointly negotiate a mutually acceptable date for this retest. When providing feedback on inadequacies, the committee should clearly document expected improvements that the student must be able to exhibit in order to retake the exam. The examination committee will document and communicate the time-frame and feedback within 10 working days of the exam that was not passed.

Final Examination for Doctoral Students

The candidate for the doctoral degree must pass a final examination by deadline dates announced in the "Office of Graduate and Professional Studies Calendar" each semester. The doctoral student is allowed only one opportunity to take the final examination.

No unsolved grades of D, F, or U for any course can be listed on the degree plan. The student must be registered for any remaining hours of 681, 684, 690, 691, 692, 791 or other graduate courses specifically designated as S/U in the course catalog during the semester of the final exam. No student may be given a final examination until they have been admitted to candidacy and their current official cumulative and degree plan GPAs are 3.00 or better.

To be admitted to candidacy for a doctoral degree, a student must have:

1. completed all formal coursework on the degree plan with the exception of any remaining 681, 684, 690 and 691, 692 (Professional Study), or 791 hours,
2. a 3.0 Graduate GPA and a Degree Plan GPA of at least 3.0 with no grade lower than C in any course on the degree plan,
3. passed the preliminary examination,
4. submitted an approved dissertation proposal,
5. met the residence requirements.

The request to hold and announce the final examination must be submitted to the Office of Graduate and Professional Studies a minimum of 10 working days in advance of the scheduled date. Any changes to the degree plan must be approved by the Office of Graduate and Professional Studies prior to the submission of the request for final examination.
The student’s advisory committee will conduct this examination. The final examination is not to be administered until the dissertation or record of study is available in substantially final form to the student’s advisory committee, and all concerned have had adequate time to review the document. Whereas the final examination may cover the broad field of the candidate’s training, it is presumed that the major portion of the time will be devoted to the dissertation and closely allied topics. Persons other than members of the graduate faculty may, with mutual consent of the candidate and the chair of the advisory committee, be invited to attend a final examination for an advanced degree. A positive vote by all members of the graduate committee with at most one dissension is required to pass a student on his or her exam. A department can have a stricter requirement provided there is consistency within all degree programs within a department. Upon completion of the questioning of the candidate, all visitors must excuse themselves from the proceedings.

**Report of Final Examination**

The student’s department will promptly report the results of the Final Examination to the Office of Graduate and Professional Studies via the Report of Doctoral Final Examination form. These forms should be submitted to the Office of Graduate and Professional Studies within 10 working days of completion of the final examination. The Office of Graduate and Professional Studies must be notified in writing of any cancellations.

A positive evaluation of the final exam by all members of a student’s advisory committee with at most one dissension is required to pass a student on his or her final exam. The Report of the Final Examination Form must be submitted with original signatures of only the committee members approved by the Office of Graduate and Professional Studies. If necessary, multiple copies of the form may be submitted with different committee member original signatures. If an approved committee member substitution (1 only) has been made, his/her signature must be included on the form submitted to the Office of Graduate and Professional Studies.

**Dissertation**

The ability to perform independent research must be demonstrated by the dissertation, which must be the original work of the candidate. Whereas acceptance of the dissertation is based primarily on its scholarly merit, it must also exhibit creditable literary workmanship. The format of the dissertation must be acceptable to the Office of Graduate and Professional Studies. Guidelines for the preparation of the dissertation are available in the Thesis Manual, which is available online at http://ogaps.tamu.edu.

After successful defense and approval by the student’s advisory committee and the head of the student’s major department (or chair of the intercollegiate faculty, if applicable), a student must submit his/her dissertation in electronic format as a single PDF file. The PDF file must be uploaded to the website, http://ogaps.tamu.edu. Additionally, a signed paper approval form with original signatures must be received by the Office of Graduate and Professional Studies. Both the PDF file and the signed approval form are required by the deadline.

Deadline dates for submitting are announced each semester or summer term in the Office of Graduate and Professional Studies Calendar (see Time Limit statement). These dates also can be accessed via the website http://ogaps.tamu.edu.

Each student who submits a document for review is assessed a one-time thesis/dissertation processing fee through Student Business Services. This processing fee is for the thesis/dissertation services provided. After commencement, dissertations are digitally stored and made available through the Texas A&M Libraries.

A dissertation that is deemed unacceptable by the Office of Graduate and Professional Studies because of excessive corrections will be returned to the student’s department head or chair of the intercollegiate faculty. The manuscript must be resubmitted as a new document, and the entire review process must begin anew. All original submittal deadlines must be met during the resubmittal process in order to graduate.

**Additional Requirements**

**Additional Requirements**

- Residence (p. 1243)
- Time Limit (p. 1243)
- Continuous Registration (p. 1244)
- Admission to Candidacy (p. 1244)
- Languages (p. 1244)
- 99-Hour Cap on Doctoral Degree (p. 1244)
- Application for Degree (p. 1244)

**Residence**

A student who enters the doctoral degree program with a baccalaureate degree must spend one academic year plus one semester in resident study at Texas A&M University. A student who holds master's degree when he/she enters doctoral degree program must spend one academic year in resident study. One academic year may include two adjacent regular semesters or one regular semester and one adjacent 10-week summer semester. The third semester is not required to be adjacent to the one year. Enrollment for each semester must be a minimum of 9 credit hours each to satisfy the residence requirement.

To satisfy the residence requirement, the student must complete a minimum of 9 credit hours per semester or 10-week summer semester in resident study at Texas A&M University for the required period. A student who enters a doctoral degree program with a baccalaureate degree may fulfill residence requirements in excess of one academic year (18 credit hours) by registration during summer sessions or by completion of a less-than-full course load (in this context a full course load is considered 9 credit hours per semester).

Students who are employed full-time while completing their degree may fulfill total residence requirements by completion of less-than-full time course loads each semester. In order to be considered for this, the student is required to submit a Petition for Waivers and Exceptions along with verification of his/her employment to the Office of Graduate and Professional Studies. An employee should submit verification of his/her employment at the time he/she submits the degree plan. See Registration. (p. 28)

See Residence Requirements (p. 22).

**Time Limit**

All requirements for doctoral degrees must be completed within a period of ten consecutive calendar years for the degree to be granted. A course will be considered valid until 10 years after the end of the semester in which it is taken. Graduate credit for coursework more than ten calendar years old at the time of the final oral examination may not be used to satisfy degree requirements.
After passing the required preliminary oral and written examinations for a doctoral degree, the student must complete the final examination within four calendar years. Otherwise, the student will be required to repeat the preliminary examination.

A final corrected version of the dissertation or record of study in electronic format as a single PDF file must be cleared by the Office of Graduate and Professional Studies no later than one year after the final examination or within the 10-year time limit, whichever occurs first. Failure to do so will result in the degree not being awarded.

### Continuous Registration

A student in a program leading to a Doctor of Philosophy who has completed all coursework on his/her degree plan other than 691, 5V98 or 5V99 (research) are required to be in continuous registration until all requirements for the degree have been completed. See Continuous Registration Requirements (p. 28).

### Admission to Candidacy

To be admitted to candidacy for a doctoral degree, a student must have:

1. completed all formal coursework on the degree plan with the exception of any remaining 681, 684, 690 and 691, 5V98 and 5V99, or 791.
2. a 3.0 Graduate GPA and a Degree Plan GPA of at least 3.0 with no grade lower than C in any course on the degree plan,
3. passed the preliminary examination (written and oral portions),
4. submitted an approved dissertation proposal,
5. met the residence requirements. The final examination will not be authorized for any doctoral student who has not been admitted to candidacy.

### Languages

A student is required to possess a competent command of English. For English language proficiency requirements, see the Admissions section of this catalog. The doctoral (PhD) foreign language requirement at Texas A&M University is a departmental option, to be administered and monitored by the individual departments of academic instruction.

### 99-Hour Cap on Doctoral Degrees

In Texas, public colleges and universities are funded by the state according to the number of students enrolled. In accordance with legislation passed by the Texas Legislature, the number of hours for which state universities may receive subvention funding at the doctoral rate for any individual is limited to 99 hours. Texas A&M University and other universities will not receive subvention for hours in excess of the limit.

Institutions of higher education are allowed to charge the equivalent of nonresident tuition to a resident doctoral student who has enrolled in 100 or more semester credit hours of doctoral coursework.

A doctoral student at Texas A&M has seven years to complete his/her degree before being charged out-of-state tuition. A doctoral student who, after seven years of study, has accumulated 100 or more doctoral hours will be charged tuition at a rate equivalent to out-of-state tuition. Please note that the tuition increases will apply to Texas residents as well as students from other states and countries who currently are charged tuition at the resident rate. This includes those doctoral students who hold GAT, GANT, and GAR appointments of 20 or more hours and recipients of competitive fellowships who receive more than $1,000 per semester. Doctoral students who, after seven years of study, have not accumulated 100 hours are eligible to pay in-state tuition if otherwise eligible.

For count purposes, a year is counted as three semesters, normally fall, spring and summer. Using this system, a student is allowed 21 semesters as a G8 student to complete the doctoral degree before being penalized with the higher tuition rate. Any semester in which a G8 student is enrolled for a doctoral level course is counted.

The following majors are exempt from the 99-Hour Cap on Doctoral Degrees:

- Biomedical Sciences
- Biochemistry
- Microbiology
- Genetics
- Toxicology
- Nutrition Sciences
- Community Clinical Psychology
- School Psychology
- Veterinary Pathology
- Clinical Psychology
- Counseling Psychology
- Medical Sciences
- Health Services Research
- Health Promotion and Community Health Sciences
- Epidemiology and Environmental Health
- Oral Biology

The hour limit for these majors is 130 doctoral hours

### Application for Degree

For information on applying for your degree, please visit the Graduation (p. 26) section.

### Department of Mathematics

www.math.tamu.edu

**Head:** E. Straube

The Department of Mathematics offers graduate studies leading to the MS and PhD degrees in mathematics. Many of the course offerings are also suitable for graduate students pursuing degrees in engineering, science, geosciences, business, economics and education.

At the MS level, a student can be enrolled either in the campus program or in the distance (or "on-line") program. For the distance MS program, three tracks are available: computational math, math teaching, and math leadership. For the campus MS program, five tracks are available: traditional (generally, preparation to continue with a PhD), math teaching, computational math, industrial math, and math biology. Students in the campus MS program can pursue either a thesis or non-thesis degree.

Satisfactory completion of the departmental qualifying exams is required of all students pursuing a PhD.

Admission to the Department's graduate programs is decided by the Graduate Programs Committee. Among the factors considered in admission decisions are: GRE General Test, undergraduate and graduate GPR, undergraduate academic background and achievement, letters of
recommendation, GRE Subject Test in Mathematics (encouraged but not required).

Detailed information concerning programs and financial assistance may be obtained by writing the Graduate Programs Office, Department of Mathematics.

### Master of Science in Mathematics

The Master of Science (MS) curriculum is designed to develop new understanding through research and creativity. Students have the option to pursue a thesis or non-thesis Master of Science degree.

### Steps to Fulfill Master's Degree Requirements

<table>
<thead>
<tr>
<th>Step</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>Meet with departmental graduate advisor to plan course of study for first semester. <strong>When:</strong> Before first semester registration. <strong>Approved by:</strong> Graduate advisor or chair of the intercollegiate faculty.</td>
</tr>
<tr>
<td>2</td>
<td>Establish advisory committee. Submit a degree plan. <strong>When:</strong> Prior to the deadline imposed by the student's college and no later than 90 days prior to final oral or thesis defense. <strong>Approved by:</strong> Advisory committee, department head or chair of the intercollegiate faculty, and Office of Graduate and Professional Studies (OGAPS).</td>
</tr>
<tr>
<td>3</td>
<td>If thesis is required, submit thesis research proposal and research proposal approval form to the Office of Graduate and Professional Studies. <strong>When:</strong> At least 20 working days prior to the submission of the Request for the Final Examination. <strong>Approved by:</strong> Advisory committee, department head or chair of the intercollegiate faculty, Research Compliance and Biosafety, and OGAPS.</td>
</tr>
<tr>
<td>4</td>
<td>Apply for degree; pay graduation fee. <strong>When:</strong> During the first week of the final semester, see OGAPS calendar.</td>
</tr>
<tr>
<td>5</td>
<td>Check to be sure degree program and advisory committee are up-to-date, and coursework is complete. <strong>When:</strong> Well before submitting request to schedule final examination.</td>

</table>

1 The online Document Processing Submission System is located on the website https://ogsdpss.tamu.edu.
2 Complete the application for degree form via the student’s Howdy portal.

Program Requirements

Program Requirements
- Student’s Advisory Committee (p. 1249)
- Degree Plan (p. 1250)
- Credit Requirements (p. 1250)
- Transfer of Credit (p. 1250)
- Limitations on the Use of Transfer, Extension and Certain Other Courses (p. 1250)
- Thesis Option (p. 1251)
  - Thesis Proposal (p. 1251)
  - Final Examination/Thesis Defense (p. 1251)
- Non-Thesis Option (p. 1252)

Student’s Advisory Committee

On-Campus and Distance Education Degree Programs

After receiving admission to graduate studies and enrolling for coursework, the student will consult with the head of his or her major or administrative department (or intercollegiate faculty, if applicable) concerning appointment of the chair of his or her advisory committee. The student’s advisory committee for the MS degree will consist of no fewer than three members of the graduate faculty, representative of the student’s fields of study and research. The chair or the co-chair of the advisory committee must be from the student’s major department (or intercollegiate faculty, if applicable), and at least one or more of the members must have an appointment to a department other than the student’s major department. The outside member for students in an interdisciplinary program must have an appointment to a department different from the chair of the student’s committee.

The chair, in consultation with the student, will select the remainder of the advisory committee. The student will interview each prospective committee member to determine whether he or she is willing to serve. Only graduate faculty members located on Texas A&M University campuses may serve as chair of a student’s advisory committee. Other graduate faculty members located off campus may serve as a member or co-chair (but not chair) with a member as the chair. The chair of the committee, who usually has immediate supervision of the student’s research and thesis, has the responsibility for calling required meetings of the committee and for calling meetings at any other time considered desirable.

If the chair of a student’s advisory committee voluntarily leaves the University and the student is near completion of the degree and wants the chair to continue to serve in this role, the student is responsible for securing a current member of the University Graduate Faculty, from the student’s academic program and located near the Texas A&M University campus site, to serve as the co-chair of the committee. The Department Head or Chair of Intercollegiate faculty may request in writing to the Associate Provost for Graduate and Professional Studies that a faculty member who is on an approved leave of absence or has voluntarily separated from the university, be allowed to continue to serve in the role of chair of a student’s advisory committee without a co-chair for us to one year. The students should be near completion of the degree. Extensions beyond the one year period can be granted with additional approval of the Dean.

If the chair of the student’s advisory committee is unavailable for an extended time in any academic period during which the student is involved in activities relating to an internship, thesis or professional paper, and is registered for courses such as 684, 691, 692 or 693, the student may request, in writing, that the department head appoint an alternate advisory committee chair during the interim period.

The duties of the committee include responsibility for the proposed degree plan, the research proposal, the thesis and the final examination. In addition, the committee as a group and as individual members are responsible for advising the student on academic matters, and, in the case of academic deficiency, initiating recommendations to the Office of Graduate and Professional Studies.

The committee members’ approval on the degree plan indicate their willingness to accept the responsibility for guiding and directing the entire academic program of the student and for initiating all academic actions concerning the student. Although individual committee members may be replaced by petition for valid reasons, a committee cannot resign en masse.
Degree Plan

On-Campus and Distance Education Degree Programs

The student's advisory committee, in consultation with the student, will develop the proposed degree plan. The degree plan must be completed and filed with the Office of Graduate and Professional Studies prior to the deadline imposed by the student's college or interdisciplinary degree program, if applicable, and no later than 90 days prior to the date of the final oral examination or thesis defense.

A student should submit the degree plan using the online Document Processing Submission System (http://ogsdpss.tamu.edu).

A student submitting a proposed degree plan for a Master of Science degree should designate on the official degree plan the appropriate program option.

Additional coursework may be added to the approved degree plan by petition if it is deemed necessary by the advisory committee to correct deficiencies in the student's academic preparation. No changes can be made to the degree plan once the student's Request for Final Examination or Request for Final Examination Exemption is approved by the Office of Graduate and Professional Studies.

Credit Requirement

On-Campus Degree Program

A minimum of 32 semester credit hours of approved courses and research is required for the thesis option Master of Science degree.

A minimum of 36 semester credit hours of approved coursework is required for the Non-Thesis Option.

Ordinarily the student will devote the major portion of his or her time to work in one or two closely related fields. Other work will be in supporting fields of interest.

Distance Education Degree Program

The thesis option is not available for the distance education modality.

Transfer of Credit

On-Campus and Distance Education Degree Programs

A student who has earned 12 hours of graduate credit in residence at Texas A&M University may be authorized to transfer courses in excess of the limits prescribed below upon the advice of the advisory committee and with the approval of the Office of Graduate and Professional Studies. Courses taken in residence at an accredited U.S. institution or approved international institution with a final grade of B or greater will be considered for transfer credit if, at the time the courses were completed, the student was in degree-seeking status at Texas A&M University, or the student was in degree-seeking status at the institution at which the courses were completed, and if the courses would be accepted for credit toward a similar degree at the institution at which the courses are to be transferred. Otherwise, the limitations stated in the following section apply.

Courses used toward a degree at another institution may not be applied for graduate credit. If the course to be transferred was taken prior to the conferral of a degree at the transfer institution, a letter from the registrar at that institution stating that the course was not applied for credit toward the degree must be submitted to the Office of Graduate and Professional Studies.

Grades for courses completed at other institutions are not included in computing the GPR.

Limitations on the Use of Transfer, Extension and Certain Other Courses

On-Campus and Distance Education Degree Programs

Some departments may have more restrictive requirements for transfer work. If otherwise acceptable, certain courses may be used toward meeting credit-hour requirements for the master's degree under the following limitations.

1. The maximum number of credit hours which may be considered for transfer credit is the greater of 12 hours or one-third (1/3) of the total hours of a degree plan. The following restrictions apply:
   • Graduate and/or upper-level undergraduate courses taken in residence at an accredited U.S. institution, or approved international institution with a final grade of B or greater will be considered for transfer credit if, at the time the courses were completed, the student was in degree-seeking status at Texas A&M University, or the student was in degree-seeking status at the institution at which the courses were taken; and if the courses would be accepted for credit toward a similar degree at a student in degree-seeking status at the host institution.
   • Courses previously used for another degree are not acceptable for degree plan credit.

2. The maximum number of credit hours taken in post-baccalaureate non-degree (G6) classification at Texas A&M University which may be considered for application to the degree plan is 12.

3. A zero credit 684 and 685 course is only allowed for non-thesis master's students. Other courses, including 691 research hours, are not eligible for zero credit.

4. Not more than 12 hours may be used in any combination of the following categories:
   • Not more than 8 hours in the combination of 691 (research), 684 (Professional Internship) or may be used.
   • Not more than 8 hours of 685 (Directed Studies) may be used.
   • Not more than 3 hours of 690 (Theory of Research) may be used.
   • Not more than 3 hours of 695 (Frontiers in Research) may be used.

5. A maximum of 2 hours of Seminar (681).

6. A maximum of 9 hours of advanced undergraduate courses (300- or 400-level).

7. For graduate courses of three weeks' duration or less, taken at other institutions, up to 1 hour of credit may be obtained for each five-day week of coursework. Each week of coursework must include at least 15 contact hours.

8. Continuing education courses may not be used for graduate credit.

9. Extension courses are not acceptable for credit.
Exceptions will be permitted only in unusual cases and when petitioned by the student's advisory committee and approved by the Office of Graduate and Professional Studies.

**Thesis Option**

**On-Campus Degree Program**

An acceptable thesis is required for the Master of Science degree for a student who selects the thesis option program. The finished work must reflect a comprehensive understanding of the pertinent literature and express in clear English, the problem(s) for study, the method, significance and results of the student's original research. Guidelines for the preparation of the thesis are available in the *Thesis Manual*, which is available online at the Office of Graduate and Professional Studies website.

After successful defense (or exemption) and approval by the student's advisory committee and the head of the student's major department (or chair of the intercollegiate faculty, if applicable), the student must submit his/her thesis in electronic format as a single PDF file. The PDF file must be uploaded to the Office of Graduate and Professional Studies website. Additionally, a signed paper approval form with original signatures must be received by the Office of Graduate and Professional Studies. The PDF file and the signed approval form are required by the deadline.

Deadline dates for submitting the thesis are announced each semester or summer term in the “Office of Graduate and Professional Studies Calendar” (see Time Limit statement). These dates also can be accessed via the Office of Graduate and Professional Studies website.

Each student who submits a document for review is assessed a one-time thesis/dissertation processing fee through Student Business Services. This processing fee is for the thesis/dissertation services provided. After commencement, theses and dissertations are digitally stored and made available through the Texas A&M Libraries.

A thesis that is deemed unacceptable by the Office of Graduate and Professional Studies because of excessive corrections will be returned to the student's department head (or chair of the intercollegiate faculty, if applicable). The manuscript must be resubmitted as a new document, and the entire review process must begin again. All original submittal deadlines must be met during the resubmittal process to graduate that semester.

**Distance Education Degree Program**

The thesis option is not available for the distance education modality.

**Thesis Proposal**

**On-Campus Degree Programs**

For the thesis option Master of Science degree, the student must prepare a thesis proposal for approval by the advisory committee and the head of the major department or chair of the interdisciplinary faculty, if applicable. This proposal must be submitted to the Office of Graduate and Professional Studies at least 20 working days prior to the submission of the request for the final examination.

Compliance issues must be addressed if a graduate student is performing research involving human subjects, animals, infectious biohazards and recombinant DNA. A student involved in these types of research should check with the Office of Research Compliance and Biosafety at (979) 458-1467 to address questions about all research compliance responsibilities. Additional information can also be obtained on the Office of Research Compliance and Biosafety website.

**Distance Education Degree Program**

The thesis option is not available for the distance education modality.

**Final Examination/Thesis Defense**

**On-Campus Degree Programs**

A student must pass a final examination by dates announced each semester or summer term in the Office of Graduate and Professional Studies Calendar. To be eligible to take the final examination, a student's GPR must be at least 3.000 for courses on the degree plan and for all courses completed at Texas A&M which are eligible to be applied to a graduate degree, and there must be no unabsolved grades of D, F or U for any course listed on the degree plan. To absolve a deficient grade, the student must repeat the course at Texas A&M University and achieve a grade of C or better. All coursework on the degree plan must have been completed with the exception of those hours for which the student is registered. For thesis-option students, an approved thesis proposal must be on file in the Office of Graduate and Professional Studies according to published deadlines prior to the final examination or submission of the request for exemption from the final examination.

A request to hold and announce the final examination must be submitted to the Office of Graduate and Professional Studies a minimum of 10 working days in advance of the scheduled date for the examination. The Office of Graduate and Professional Studies must be notified in writing of any cancellations. A student may be given only one opportunity to repeat the final examination for the master's degree and that must be within a time period that does not extend beyond the end of the next regular semester (summer terms are excluded).

For thesis option students, the final examination covers the thesis and all work taken on the degree plan and at the option of the committee may be written or oral or both. The final examination may not be administered before the thesis is available to all members of the student's advisory committee in substantially final form, and all members have had adequate time to review the document. The examination is conducted by the student's advisory committee as finally constituted. A thesis option student must be registered in the University in the semester or summer term in which the final examination is taken. Persons other than members of the graduate faculty may, with mutual consent of the candidate and the major professor, attend final examinations for advanced degrees. Upon completion of the questioning of the candidate, all visitors must excuse themselves from the proceedings. A positive vote by all members of the graduate committee with at most one dissension is required to pass a student on his or her exam. A department, or interdisciplinary degree program, may have a stricter requirement provided there is consistency within all degree programs within a department or interdisciplinary degree program.

The Report of the Final Examination Form must be submitted with original signatures of only the committee members approved by the Office of Graduate and Professional Studies. If an approved committee member substitution (1 only) has been made, his/her signature must also be submitted to the Office of Graduate and Professional Studies. If necessary, multiple copies of the form may be submitted with different committee member original signatures. If an approved committee member substitution (1 only) has been made, his/her signature must be included on the form submitted to the Office of Graduate and Professional Studies.
A thesis option candidate may petition to be exempt from his/her final examination provided his/her degree plan GPR is 3.500 or greater and he/she has the approval of the advisory committee, the head of the student's major department, or intercollegiate chair, if appropriate, and the Office of Graduate and Professional Studies. It is required that the petition for exemption be submitted the same semester the student intends to submit the thesis.

**Distance Education Degree Program**

The thesis option is not available for the distance education modality.

**Non-Thesis Option**

**On-Campus and Distance Education Degree Programs**

For non-thesis option students, a final comprehensive examination may be required.

The final exam cannot be held prior to the mid point of the semester if questions on the exam are based on courses in which the student is currently enrolled. If a student has completed all required degree plan coursework, the student is not required to be registered for classes in the semester the final examination is administered (unless he/she holds an assistantship). For specific final examination requirements, a student should check the program requirements for the degree which he/she is pursuing.

Exam results must be submitted with original signatures of only the committee members approved by the Office of Graduate and Professional Studies. If an approved committee member substitution (1 only) has been made, his/her signature must also be submitted to the Office of Graduate and Professional Studies.

A student pursuing the non-thesis option is not allowed to enroll in 691 (research) for any reason and 691 may not be used for credit toward a non-thesis option Master of Science degree. A maximum of 4 credit hours of 684 (Professional Internship), 8 credit hours of 685 (Directed Studies), and up to 3 credit hours of 690 (Theory of Research) or 695 (Frontiers in Research) may be used toward the non-thesis option Master of Science degree. In addition, any combination of 684, 685, 690 and 695 may not exceed 25 percent of the total credit hour requirement shown on the individual degree plan. All requirements for the non-thesis option Master of Science degree other than those specified above are the same as for the thesis option degree.

**Additional Requirements**

**Additional Requirements**

- Residence (p. 1252)
- Continuous Registration (p. 1252)
- Time Limit (p. 1252)
- Foreign Languages (p. 1252)
- Application for Degree (p. 1252)

**Residence**

**On-Campus Degree Program**

In partial fulfillment of the residence requirement for the degree of Master of Science, the student must complete 9 resident credit hours during one regular semester or one 10-week summer semester in resident study at Texas A&M University. Upon recommendation of the student’s advisory committee, department head or Chair of the Interdisciplinary Program, if appropriate, and with approval of the Office of Graduate and Professional Studies, a student may be granted exemption from this requirement. Such a petition, however, must be approved prior to the student’s registration for the final 9 credit hours of required coursework.

Students who are employed full-time while completing their degree may fulfill total residence requirements by completion of less-than-full time course loads each semester. In order to be considered for this, the student is required to submit a Petition for Waivers and Exceptions along with verification of his/her employment to the Office of Graduate and Professional Studies.

See Residence Requirements (p. 22).

**Distance Education Degree Program**

The distance education modality does not have any residence requirement.

**Continuous Registration**

**On-Campus and Distance Education Degree Programs**

A student in the thesis option of the Master of Science program who has completed all coursework on his/her degree plan other than 691 (research) is required to be in continuous registration until all requirements for the degree have been completed. See Continuous Registration Requirements (p. 28).

**Time Limit**

**On-Campus and Distance Education Degree Programs**

All degree requirements must be completed within a period of seven consecutive years for the degree to be granted. A course will be considered valid until seven years after the end of the semester in which it is taken. Graduate credit for coursework which is more than seven calendar years old at the time of the final examination (oral or written) may not be used to satisfy degree requirements.

A student who has chosen the thesis option must have the final corrected version of the thesis cleared by the Office of Graduate and Professional Studies no later than one year after the final examination, or approval of a petition for exemption from the final exam, or within the seven-year time limit, whichever occurs first. Failure to do so will result in the degree not being awarded.

**Foreign Languages**

**On-Campus and Distance Education Degree Programs**

No specific language requirement exists for the Master of Science degree.

**Application for Degree**

**On-Campus and Distance Education Degree Programs**

For information on applying for your degree, please visit the Graduation (p. 26) section.

**Doctor of Philosophy in Mathematics**

Work leading to the degree of Doctor of Philosophy (PhD) is designed to give the candidate a thorough and comprehensive knowledge of his or her professional field and training in methods of research. The final basis for granting the degree shall be the candidate's grasp of the subject matter of a broad field of study and a demonstrated ability to
do independent research. In addition, the candidate must have acquired the ability to express thoughts clearly and forcefully in both oral and written languages. The degree is not granted solely for the completion of coursework, residence and technical requirements, although these must be met.

For a student who has completed a master’s degree, a DDS/DMD, DVM or MD at a U.S. institution, a minimum of 64 hours is required on the degree plan for the degree of Doctor of Philosophy. For a student who has completed a baccalaureate degree but not a master’s degree or a U.S. DDS/DMD, DVM or MD, a minimum of 96 hours is required on the degree plan for the degree of Doctor of Philosophy.

### Steps to Fulfill Doctoral Degree Requirements

<table>
<thead>
<tr>

<td></td>
</tr>
</tbody>
</table>

Note: Once formal coursework is complete, you must be continuously registered until all degree requirements have been met. This includes submission and clearance of the dissertation or record of study. See Continuous Registration Requirements (p. 28).
Program Requirements

Program Requirements

- Student’s Advisory Committee (p. 1254)
- Degree Plan (p. 1254)
- Transfer of Credit (p. 1254)
- Research Proposal (p. 1255)
- Examinations (p. 1255)
  - Preliminary Examination (p. 1255)
  - Preliminary Examination Format (p. 1255)
  - Preliminary Examination Scheduling (p. 1255)
  - Report of Preliminary Examination (p. 1256)
  - Retake of Failed Preliminary Examination (p. 1256)
  - Final Examination (p. 1256)
  - Report of Final Examination (p. 1256)
- Dissertation (p. 1257)

Student’s Advisory Committee

After receiving admission to graduate studies and enrolling, the student will consult with the head of his or her major or administrative department (or chair of the intercollegiate faculty) concerning appointment of the chair of the advisory committee. The student’s advisory committee will consist of no fewer than four members of the graduate faculty representative of the student’s several fields of study and research, where the chair or co-chair must be from the student’s department (or intercollegiate faculty, if applicable), and at least one or more of the members must have an appointment to a department other than the student’s major department. The outside member for a student in an interdisciplinary degree program must be from a department different from the chair of the student’s committee.

The chair, in consultation with the student, will select the remainder of the advisory committee. Only graduate faculty members located on Texas A&M University campuses may serve as chair of a student’s advisory committee. Other Texas A&M University graduate faculty members located off-campus may serve as a member or co-chair (but not chair), with a member as the chair.

If the chair of a student’s advisory committee voluntarily leaves the University and the student is near completion of the degree and wants the chair to continue to serve in this role, the student is responsible for securing a current member of the University Graduate Faculty, from the student’s academic program and located near the Texas A&M University campus site, to serve as the co-chair of the committee. The Department Head or Chair of Intercollegiate faculty may request in writing to the Associate Provost for Graduate and Professional Studies that a faculty member who is on an approved leave of absence or has voluntarily separated from the university, be allowed to continue to serve in the role of chair of a student’s advisory committee without a co-chair for up to one year. The students should be near completion of the degree. Extensions beyond the one year period can be granted with additional approval of the Dean.

The committee members’ signatures on the degree plan indicate their willingness to accept the responsibility for guiding and directing the entire academic program of the student and for initiating all academic actions concerning the student. Although individual committee members may be replaced by petition for valid reasons, a committee cannot resign en masse. The chair of the committee, who usually has immediate supervision of the student’s research and dissertation or record of study, has the responsibility for calling all meetings of the committee. The duties of the committee include responsibility for the proposed degree plan, the research proposal, the preliminary examination, the dissertation or record of study and the final examination. In addition, the committee, as a group and as individual members, is responsible for counseling the student on academic matters, and, in the case of academic deficiency, initiating recommendations to the Office of Graduate and Professional Studies.

Degree Plan

The student’s advisory committee will evaluate the student’s previous education and degree objectives. The committee, in consultation with the student, will develop a proposed degree plan and outline a research problem which, when completed, as indicated by the dissertation (or its equivalent for the degree of Doctor of Education or the degree of Doctor of Engineering), will constitute the basic requirements for the degree. The degree plan must be filed with the Office of Graduate and Professional Studies prior to the deadline imposed by the student’s college and no later than 90 days prior to the preliminary examination.

This proposed degree plan should be submitted through the online Document Processing Submission System located on the website http://ogdpss.tamu.edu. A minimum of 64 hours is required on the degree plan for the Doctor of Philosophy for a student who has completed a master’s degree. A student who has completed a DDS/DMD, DVM or a MD at a U.S. institution is also required to complete a minimum of 64 hours. A student who has completed a baccalaureate degree but not a master’s degree will be required to complete a 96-hour degree plan. Completion of a DDS/ DMD, DVM or MD degree at a foreign institution requires completion of a minimum of 96 hours for the Doctor of Philosophy. A field of study may be primarily in one department or in a combination of departments. A degree plan must carry a reasonable amount of 691 (research).

Additional coursework may be added by petition to the approved degree plan by the student’s advisory committee if it is deemed necessary to correct deficiencies in the student’s academic preparation. No changes can be made to the degree plan once the student’s Request for Final Examination is approved by the Office of Graduate and Professional Studies.

Approval to enroll in any professional course (900-level) should be obtained from the head of the department (or Chair of the intercollegiate faculty, if applicable) in which the course will be offered before including such a course on a degree plan.

No credit may be obtained by correspondence study, by extension or for any course of fewer than three weeks duration.

Transfer of Credit

Courses for which transfer credits are sought must have been completed with a grade of B or greater and must be approved by the student’s advisory committee and the Office of Graduate and Professional Studies. These courses must not have been used previously for another degree. Except for officially approved cooperative doctoral programs, credit for thesis or dissertation research or the equivalent is not transferable. Credit for “internship” coursework in any form is not transferable. Courses taken in residence at an accredited U.S. institution or approved international institution with a final grade of B or greater will be considered for transfer credit if, at the time the courses were completed, the courses would be accepted for credit toward a similar degree for a student in degree-seeking status at the host institution. Credit for coursework taken by
extension is not transferable. Coursework in which no formal grades are
given or in which grades other than letter grades (A or B) are earned (for
example, CR, P, S, U, H, etc.) is not accepted for transfer credit. Credit for
coursework submitted for transfer from any college or university must be
shown in semester credit hours, or equated to semester credit hours.

Courses used toward a degree at another institution may not be applied
for graduate credit. If the course to be transferred was taken prior to
the conferral of a degree at the transfer institution, a letter from the
registrar at that institution stating that the course was not applied for
credit toward the degree must be submitted to the Office of Graduate and
Professional Studies.

Grades for courses completed at other institutions are not included
in computing the GPR. An official transcript from the university at
which transfer courses are taken must be sent directly to the Office of
Admissions.

Research Proposal

The general field of research to be used for the dissertation should
be agreed on by the student and the advisory committee at their first
meeting, as a basis for selecting the proper courses to support the
proposed research.

As soon thereafter as the research project can be outlined in reasonable
detail, the dissertation research proposal should be completed. The
research proposal should be approved at a meeting of the student's
advisory committee, at which time the feasibility of the proposed
research and the adequacy of available facilities should be reviewed.
The approved proposal, signed by all members of the student's advisory
committee, the head of the student's major department (or chair of the
intercollegiate faculty, if applicable), must be submitted to the Office of
Graduate and Professional Studies at least 20 working days prior to the
submission of the Request for the Final Examination.

Compliance issues must be addressed if a graduate student is
performing research involving human subjects, animals, infectious
biohazards and recombinant DNA. A student involved in these types
of research should check with the Office of Research Compliance and
Biosafety at (979) 458-1467 to address questions about all research
compliance responsibilities. Additional information can also be obtained
on the website http://rcb.tamu.edu.

Examinations

Preliminary Examination for Doctoral Students

The student’s major department (or chair of the interdisciplinary degree
program faculty, if applicable) and his or her advisory committee may
require qualifying, cumulative or other types of examinations at any
time deemed desirable. These examinations are entirely at the discretion
of the department and the student's advisory committee.

The preliminary examination is required. The preliminary examination
for a doctoral student shall be given no earlier than a date at which the
student is within 6 credit hours of completion of the formal coursework
on the degree plan (i.e., all coursework on the degree plan except
681, 684, 690, 691, 692, 693, 695, 697, 791, or other graduate courses
specifically designated as S/U in the course catalog). The student
should complete the Preliminary Examination no later than the end of
the semester following the completion of the formal coursework on the
degree plan.

Preliminary Examination Format

The objective of preliminary examination is to evaluate whether the
student has demonstrated the following qualifications:

a. a mastery of the subject matter of all fields in the program;
b. an adequate knowledge of the literature in these fields and an ability
to carry out bibliographical research;
c. an understanding of the research problem and the appropriate
methodological approaches.

The format of the preliminary examination shall be determined by the
student’s department (or interdisciplinary degree program, if applicable)
and advisory committee, and communicated to the student in advance
of the examination. The exam may consist of a written component, oral
component, or combination of written and oral components.

The preliminary exam may be administered by the advisory committee
or a departmental committee; herein referred to as the examination
committee.

Regardless of exam format, a student will receive an overall preliminary
exam result of pass or fail. The department (or interdisciplinary degree
program, if applicable) will determine how the overall pass or fail result
is determined based on the exam structure and internal department
procedures. If the exam is administered by the advisory committee,
each advisory committee member will provide a pass or fail evaluation
decision.

Only one advisory committee substitution is allowed to provide an
evaluation decision for a student's preliminary exam, and it cannot be the
committee chair.

If a student is required to take, as a part of the preliminary examination,
a written component administered by a department or interdisciplinary
degree program, the department or interdisciplinary degree program
faculty must:

a. offer the examination at least once every six months. The
departmental or interdisciplinary degree program examination should be
announced at least 30 days prior to the scheduled examination date.
b. assume the responsibility for marking the examination satisfactory
or unsatisfactory, or otherwise graded, and in the case of unsatisfactory,
stating specifically the reasons for such a mark.
c. forward the marked examination to the chair of the student's
advisory committee within one week after the examination.

Preliminary Examination Scheduling

Prior to commencing any component of the preliminary examination, a
departmental representative or the advisory committee chair will review
the eligibility criteria with the student, using the Preliminary Examination
Checklist to ensure the student is eligible for the preliminary examination.
The following list of eligibility requirements applies.

• Student is registered at Texas A&M University for a minimum of one
semester credit hour in the long semester or summer term during
which any component of the preliminary examination is held. If the
total examination is held between semesters, then the student must
be registered for the term immediately preceding the examination.
• An approved degree plan is on file with the Office of Graduate and Professional Studies prior to commencing the first component of the examination.

• Student’s cumulative GPR is at least 3.000.

• Student’s degree plan GPR is at least 3.000.

• All English language proficiency requirements are satisfied.

• At the end of the semester in which at least the first component of the exam is given, there are no more than 6 hours of coursework remaining on the degree plan (except 681, 684, 690, 691, 692, 693, 695, 697, 791, or other graduate courses specifically designated as S/U in the course catalog). The head of the student’s department (or Chair of the Interdisciplinary Degree Program, if applicable) has the authority to approve a waiver of this criterion.

Report of Preliminary Examination

Credit for the preliminary examination is not transferable in cases where a student changes degree programs after passing a preliminary exam.

If a written component precedes an oral component of the preliminary exam, the chair of the student’s examination committee is responsible for making all written examinations available to all members of the committee. A positive evaluation of the preliminary exam by all members of a student’s examination committee with at most one dissension is required to pass a student on his or her preliminary exam.

The student’s department will promptly report the results of the Preliminary Examination to the Office of Graduate and Professional Studies via the Report of Doctoral Preliminary Examination form. The Preliminary Examination checklist form must also be submitted. These forms should be submitted to the Office of Graduate and Professional Studies within 10 working days of completion of the preliminary examination.

The Report of the Preliminary Examination form must be submitted with original signatures of the approved examination committee members. If an approved examination committee member substitution (one only) has been made, that signature must also be included, in place of the committee member, on the form submitted to the Office of Graduate and Professional Studies. The original signature of the department head is also required on the form.

After passing the required preliminary examination for the doctoral degree, the student must complete the final examination for the degree within four calendar years. Otherwise, the student will be required to repeat the preliminary examination.

Retake of Failed Preliminary Examination

Upon approval of the student’s examination committee, with no more than one member dissenting, and approval of the Office of Graduate and Professional Studies, a student who has failed the preliminary examination may be given one re-examination. Adequate time must be given to permit the student to address the inadequacies emerging from the first preliminary examination. The examination committee must agree upon and communicate in writing to the student, an adequate time-frame from the first examination (normally six months) to retest, as well as a detailed explanation of the inadequacies emerging from the examination. The student and the committee should jointly negotiate a mutually acceptable date for this retest. When providing feedback on inadequacies, the committee should clearly document expected improvements that the student must be able to exhibit in order to retake the exam. The examination committee will document and communicate the time-frame and feedback within 10 working days of the exam that was not passed.

Final Examination for Doctoral Students

The candidate for the doctoral degree must pass a final examination by deadline dates announced in the “Office of Graduate and Professional Studies Calendar” each semester. The doctoral student is allowed only one opportunity to take the final examination.

No unabsolved grades of D, F, or U for any course can be listed on the degree plan. The student must be registered for any remaining hours of 681, 684, 690, 691, 692, 791 or other graduate courses specifically designated as S/U in the course catalog during the semester of the final exam. No student may be given a final examination until they have been admitted to candidacy and their current official cumulative and degree plan GPAs are 3.00 or better.

To be admitted to candidacy for a doctoral degree, a student must have:

1. completed all formal coursework on the degree plan with the exception of any remaining 681, 684, 690 and 691, 692 (Professional Study), or 791 hours,

2. a 3.0 Graduate GPA and a Degree Plan GPA of at least 3.0 with no grade lower than C in any course on the degree plan,

3. passed the preliminary examination,

4. submitted an approved dissertation proposal,

5. met the residence requirements.

The request to hold and announce the final examination must be submitted to the Office of Graduate and Professional Studies a minimum of 10 working days in advance of the scheduled date. Any changes to the degree plan must be approved by the Office of Graduate and Professional Studies prior to the submission of the request for final examination.

The student’s advisory committee will conduct this examination. The final examination is not to be administered until the dissertation or record of study is available in substantially final form to the student’s advisory committee, and all concerned have had adequate time to review the document. Whereas the final examination may cover the broad field of the candidate’s training, it is presumed that the major portion of the time will be devoted to the dissertation and closely allied topics. Persons other than members of the graduate faculty may, with mutual consent of the candidate and the chair of the advisory committee, be invited to attend a final examination for an advanced degree. A positive vote by all members of the graduate committee with at most one dissension is required to pass a student on his or her exam. A department can have a stricter requirement provided there is consistency within all degree programs within a department. Upon completion of the questioning of the candidate, all visitors must excuse themselves from the proceedings.

Report of Final Examination

The student’s department will promptly report the results of the Final Examination to the Office of Graduate and Professional Studies via the Report of Doctoral Final Examination form. These forms should be submitted to the Office of Graduate and Professional Studies within 10 working days of completion of the final examination. The Office of
Graduate and Professional Studies must be notified in writing of any cancellations.

A positive evaluation of the final exam by all members of a student's advisory committee with at most one dissension is required to pass a student on his or her final exam. The Report of the Final Examination Form must be submitted with original signatures of only the committee members approved by the Office of Graduate and Professional Studies. If necessary, multiple copies of the form may be submitted with different committee member original signatures. If an approved committee member substitution (1 only) has been made, his/her signature must be included on the form submitted to the Office of Graduate and Professional Studies.

Dissertation

The ability to perform independent research must be demonstrated by the dissertation, which must be the original work of the candidate. Whereas acceptance of the dissertation is based primarily on its scholarly merit, it must also exhibit creditable literary workmanship. The format of the dissertation must be acceptable to the Office of Graduate and Professional Studies. Guidelines for the preparation of the dissertation are available in the Thesis Manual, which is available online at http://ogaps.tamu.edu.

After successful defense and approval by the student's advisory committee and the head of the student's major department (or chair of the intercollegiate faculty, if applicable), a student must submit his/her dissertation in electronic format as a single PDF file. The PDF file must be uploaded to the website, http://ogaps.tamu.edu. Additionally, a signed paper approval form with original signatures must be received by the Office of Graduate and Professional Studies. Both the PDF file and the signed approval form are required by the deadline.

Deadline dates for submitting are announced each semester or summer term in the Office of Graduate and Professional Studies Calendar (see Time Limit statement). These dates also can be accessed via the website http://ogaps.tamu.edu.

Each student who submits a document for review is assessed a one-time thesis/dissertation processing fee through Student Business Services. This processing fee is for the thesis/dissertation services provided. After commencement, dissertations are digitally stored and made available through the Texas A&M Libraries.

A dissertation that is deemed unacceptable by the Office of Graduate and Professional Studies because of excessive corrections will be returned to the student's department head or chair of the intercollegiate faculty. The manuscript must be resubmitted as a new document, and the entire review process must begin anew. All original submittal deadlines must be met during the resubmittal process in order to graduate.

Additional Requirements

Additional Requirements

- Residence (p. 1257)
- Time Limit (p. 1257)
- Continuous Registration (p. 1257)
- Admission to Candidacy (p. 1258)
- Languages (p. 1258)
- 99-Hour Cap on Doctoral Degree (p. 1258)
- Application for Degree (p. 1258)

Residence

A student who enters the doctoral degree program with a baccalaureate degree must spend one academic year plus one semester in resident study at Texas A&M University. A student who holds master's degree when he/she enters doctoral degree program must spend one academic year in resident study. One academic year may include two adjacent regular semesters or one regular semester and one adjacent 10-week summer semester. The third semester is not required to be adjacent to the one year. Enrollment for each semester must be a minimum of 9 credit hours each to satisfy the residence requirement.

To satisfy the residence requirement, the student must complete a minimum of 9 credit hours per semester or 10-week summer semester in resident study at Texas A&M University for the required period. A student who enters a doctoral degree program with a baccalaureate degree may fulfill residence requirements in excess of one academic year (18 credit hours) by registration during summer sessions or by completion of a less-than-full course load (in this context a full course load is considered 9 credit hours per semester).

Students who are employed full-time while completing their degree may fulfill total residence requirements by completion of less-than-full time course loads each semester. In order to be considered for this, the student is required to submit a Petition for Waivers and Exceptions along with verification of his/her employment to the Office of Graduate and Professional Studies. An employee should submit verification of his/her employment at the time he/she submits the degree plan.

See Residence Requirements (p. 22).

Time Limit

All requirements for doctoral degrees must be completed within a period of ten consecutive calendar years for the degree to be granted. A course will be considered valid until 10 years after the end of the semester in which it is taken. Graduate credit for coursework more than ten calendar years old at the time of the final oral examination may not be used to satisfy degree requirements.

After passing the required preliminary oral and written examinations for a doctoral degree, the student must complete the final examination within four calendar years. Otherwise, the student will be required to repeat the preliminary examination.

A final corrected version of the dissertation or record of study in electronic format as a single PDF file must be cleared by the Office of Graduate and Professional Studies no later than one year after the final examination or within the 10-year time limit, whichever occurs first. Failure to do so will result in the degree not being awarded.

Continuous Registration

A student in a program leading to a Doctor of Philosophy who has completed all coursework on his/her degree plan other than 691, 5V98 or 5V99 (research) are required to be in continuous registration until all requirements for the degree have been completed. See Continuous Registration Requirements (p. 28).
Admission to Candidacy

To be admitted to candidacy for a doctoral degree, a student must have:

1. completed all formal coursework on the degree plan with the exception of any remaining 681, 684, 690 and 691, 5V98 and 5V99, or 791.
2. a 3.0 Graduate GPA and a Degree Plan GPA of at least 3.0 with no grade lower than C in any course on the degree plan,
3. passed the preliminary examination (written and oral portions),
4. submitted an approved dissertation proposal,
5. met the residence requirements. The final examination will not be authorized for any doctoral student who has not been admitted to candidacy.

Languages

A student is required to possess a competent command of English. For English language proficiency requirements, see the Admissions section of this catalog. The doctoral (PhD) foreign language requirement at Texas A&M University is a departmental option, to be administered and monitored by the individual departments of academic instruction.

99-Hour Cap on Doctoral Degrees

In Texas, public colleges and universities are funded by the state according to the number of students enrolled. In accordance with legislation passed by the Texas Legislature, the number of hours for which state universities may receive subvention funding at the doctoral rate for any individual is limited to 99 hours. Texas A&M University and other universities will not receive subvention for hours in excess of the limit.

Institutions of higher education are allowed to charge the equivalent of nonresident tuition to a resident doctoral student who has enrolled in 100 or more semester credit hours of doctoral coursework.

A doctoral student at Texas A&M has seven years to complete his/her degree before being charged out-of-state tuition. A doctoral student who, after seven years of study, has accumulated 100 or more doctoral hours will be charged tuition at a rate equivalent to out-of-state tuition. Please note that the tuition increases will apply to Texas residents as well.

The 99-Hour Cap on Doctoral Degrees is monitored by the individual departments of academic instruction.

The hour limit for these majors is 130 doctoral hours:

- Biomedical Sciences
- Biochemistry
- Microbiology
- Genetics
- Toxicology
- Nutrition Sciences
- Community Clinical Psychology
- School Psychology
- Veterinary Pathology
- Clinical Psychology
- Counseling Psychology
- Medical Sciences
- Health Services Research
- Health Promotion and Community Health Sciences
- Epidemiology and Environmental Health
- Oral Biology

The following majors are exempt from the 99-Hour Cap on Doctoral Degrees:

- Orals Biology
- Epidemiology and Environmental Health
- Health Services Research
- Medical Sciences
- Health Promotion and Community Health Sciences
- Epidemiology and Environmental Health
- Oral Biology

Application for Degree

For information on applying for your degree, please visit the Graduation (p. 26) section.

Master of Science in Quantitative Finance

The Department of Mathematics offers a Master of Science in Quantitative Finance.

Program Requirements

Program Requirements

- Student’s Advisory Committee (p. 1258)
- Degree Plan (p. 1259)
- Credit Requirements (p. 1259)
- Transfer of Credit (p. 1259)
- Limitations on the Use of Transfer, Extension and Certain Other Courses (p. 1259)
- Non-Thesis Option (p. 1260)

Student’s Advisory Committee

After receiving admission to graduate studies and enrolling for coursework, the student will consult with the head of his or her major or administrative department (or intercollegiate faculty, if applicable) concerning appointment of the chair of his or her advisory committee. The student’s advisory committee for the MS degree will consist of no fewer than three members of the graduate faculty, representative of the student’s fields of study and research. The chair or the co-chair of the advisory committee must be from the student’s major department (or intercollegiate faculty, if applicable), and at least one or more of the members must have an appointment to a department other than the student’s major department. The outside member for students in an interdisciplinary program must have an appointment to a department different from the chair of the student’s committee.

The chair, in consultation with the student, will select the remainder of the advisory committee. The student will interview each prospective committee member to determine whether he or she is willing to serve. Only graduate faculty members located on Texas A&M University campuses may serve as chair of a student’s advisory committee. Other graduate faculty members located off campus may serve as a member or co-chair (but not chair) with a member as the chair. The chair of the committee, who usually has immediate supervision of the student’s research and thesis, has the responsibility for calling required meetings.
of the committee and for calling meetings at any other time considered desirable.

If the chair of a student’s advisory committee voluntarily leaves the University and the student is near completion of the degree and wants the chair to continue to serve in this role, the student is responsible for securing a current member of the University Graduate Faculty, from the student’s academic program and located near the Texas A&M University campus site, to serve as the co-chair of the committee. The Department Head or Chair of Intercollegiate faculty may request in writing to the Associate Provost for Graduate and Professional Studies that a faculty member who is on an approved leave of absence or has voluntarily separated from the university, be allowed to continue to serve in the role of chair of a student’s advisory committee without a co-chair for us to one year. The students should be near completion of the degree. Extensions beyond the one year period can be granted with additional approval of the Dean.

If the chair of the student’s advisory committee is unavailable for an extended time in any academic period during which the student is involved in activities relating to an internship, thesis or professional paper, and is registered for courses such as 684, 691, 692 or 693, the student may request, in writing, that the department head appoint an alternate advisory committee chair during the interim period.

The duties of the committee include responsibility for the proposed degree plan, the research proposal, the thesis and the final examination. In addition, the committee as a group and as individual members are responsible for advising the student on academic matters, and, in the case of academic deficiency, initiating recommendations to the Office of Graduate and Professional Studies.

The committee members’ approval on the degree plan indicate their willingness to accept the responsibility for guiding and directing the entire academic program of the student and for initiating all academic actions concerning the student. Although individual committee members may be replaced by petition for valid reasons, a committee cannot resign en masse.

Degree Plan
The student’s advisory committee, in consultation with the student, will develop the proposed degree plan. The degree plan must be completed and filed with the Office of Graduate and Professional Studies prior to the deadline imposed by the student’s college or interdisciplinary degree program, if applicable, and no later than 90 days prior to the date of the final oral examination or thesis defense.

A student should submit the degree plan using the online Document Processing Submission System (http://ogsdpss.tamu.edu).

A student submitting a proposed degree plan for a Master of Science degree should designate on the official degree plan the appropriate program option.

Additional coursework may be added to the approved degree plan by petition if it is deemed necessary by the advisory committee to correct deficiencies in the student’s academic preparation. No changes can be made to the degree plan once the student’s Request for Final Examination or Request for Final Examination Exemption is approved by the Office of Graduate and Professional Studies.

Credit Requirement
A minimum of 36 semester credit hours of approved coursework is required for the Non-Thesis Option.

Ordinarily the student will devote the major portion of his or her time to work in one or two closely related fields. Other work will be in supporting fields of interest.

Transfer of Credit
A student who has earned 12 hours of graduate credit in residence at Texas A&M University may be authorized to transfer courses in excess of the limits prescribed below upon the advice of the advisory committee and with the approval of the Office of Graduate and Professional Studies. Courses taken in residence at an accredited U.S. institution or approved international institution with a final grade of B or greater may be considered for transfer credit if, at the time the courses were completed, the courses would be accepted for credit toward a similar degree for a student in degree-seeking status at the host institution. Otherwise, the limitations stated in the following section apply. Coursework in which no formal grades are given or in which grades other than letter grades (A or B) are earned (for example, CR, P, S, U, H, etc.) is not accepted for transfer credit. Courses appearing on the degree plan with grades of D, F or U may not be absolved by transfer work. Credit for thesis research or the equivalent is not transferable. Credit for coursework submitted for transfer from any college or university must be shown in semester credit hours or equated to semester credit hours. An official transcript from the university at which the transfer coursework was taken must be sent directly to the Office of Admissions.

Courses used toward a degree at another institution may not be applied for graduate credit. If the course to be transferred was taken prior to the conferral of a degree at the transfer institution, a letter from the registrar at that institution stating that the course was not applied for credit toward the degree must be submitted to the Office of Graduate and Professional Studies.

Grades for courses completed at other institutions are not included in computing the GPR.

Limitations on the Use of Transfer, Extension and Certain Other Courses
Some departments may have more restrictive requirements for transfer work. If otherwise acceptable, certain courses may be used toward meeting credit-hour requirements for the master’s degree under the following limitations.

1. The maximum number of credit hours which may be considered for transfer credit is the greater of 12 hours or one-third (1/3) of the total hours of a degree plan. The following restrictions apply:
   • Graduate and/or upper-level undergraduate courses taken in residence at an accredited U.S. institution, or approved international institution with a final grade of B or greater will be considered for transfer credit if, at the time the courses were completed, the student was in degree-seeking status at Texas A&M University, or the student was in degree-seeking status at the institution at which the courses were taken; and if the courses would be accepted for credit toward a similar degree for a student in degree-seeking status at the host institution.
   • Courses previously used for another degree are not acceptable for degree plan credit.
2. The maximum number of credit hours taken in post-baccalaureate non-degree (G6) classification at Texas A&M University which may be considered for application to the degree plan is 12.

3. A zero credit 684 and 685 course is only allowed for non-thesis master's students. Other courses, including 691 research hours, are not eligible for zero credit.

4. Not more than 12 hours may be used in any combination of the following categories:
   - Not more than 8 hours in the combination of 691 (research), 684 (Professional Internship) or SOH 680 may be used.
   - Not more than 8 hours of 685 (Directed Studies) may be used.
   - Not more than 3 hours of 690 (Theory of Research) may be used.
   - Not more than 3 hours of 695 (Frontiers in Research) may be used.

5. A maximum of 2 hours of Seminar (681).

6. A maximum of 9 hours of advanced undergraduate courses (300- or 400-level).

7. For graduate courses of three weeks' duration or less, taken at other institutions, up to 1 hour of credit may be obtained for each five-day week of coursework. Each week of coursework must include at least 15 contact hours.

8. Continuing education courses may not be used for graduate credit.

9. Extension courses are not acceptable for credit.

Exceptions will be permitted only in unusual cases and when petitioned by the student's advisory committee and approved by the Office of Graduate and Professional Studies.

### Non-Thesis Option

For non-thesis option students, a final comprehensive examination may be required.

The final exam cannot be held prior to the mid point of the semester if questions on the exam are based on courses in which the student is currently enrolled. If a student has completed all required degree plan coursework, the student is not required to be registered for classes in the semester the final examination is administered (unless he/she holds an assistantship). For specific final examination requirements, a student should check the program requirements for the degree which he/she is pursuing.

Exam results must be submitted with original signatures of only the committee members approved by the Office of Graduate and Professional Studies. If an approved committee member substitution (1 only) has been made, his/her signature must also be submitted to the Office of Graduate and Professional Studies.

A student pursuing the non-thesis option is not allowed to enroll in 691 (research) for any reason and 691 may not be used for credit toward a non-thesis option Master of Science degree. A maximum of 4 credit hours of 684 (Professional Internship), 8 credit hours of 685 (Directed Studies), and up to 3 credit hours of 690 (Theory of Research) or 695 (Frontiers in Research) may be used toward the non-thesis option Master of Science degree. In addition, any combination of 684, 685, 690 and 695 may not exceed 25 percent of the total credit hour requirement shown on the individual degree plan. All requirements for the non-thesis option Master of Science degree other than those specified above are the same as for the thesis option degree.

### Additional Requirements

#### Continuous Registration

A student in the thesis option of the Master of Science program who has completed all coursework on his/her degree plan other than 5V98, 5V99, and 691 (research) is required to be in continuous registration until all requirements for the degree have been completed. See Continuous Registration Requirements (p. 28).

#### Time Limit

All degree requirements must be completed within a period of seven consecutive years for the degree to be granted. A course will be considered valid until seven years after the end of the semester in which it is taken. Graduate credit for coursework which is more than seven calendar years old at the time of the final examination (oral or written) may not be used to satisfy degree requirements.

A student who has chosen the thesis option must have the final corrected version of the thesis cleared by the Office of Graduate and Professional Studies no later than one year after the final examination, or approval of a petition for exemption from the final exam, or within the seven-year time limit, whichever occurs first. Failure to do so will result in the degree not being awarded.

#### Foreign Languages

No specific language requirement exists for the Master of Science degree.

#### Application for Degree

For information on applying for your degree, please visit the Graduation (p. 26) section.
The physics and astronomy curriculum provides classroom and research experience that prepares a graduate student for a career of either research and teaching at a university, or research and development at an industrial or government laboratory. The courses are well suited to graduate students in chemistry, mathematics, geosciences or engineering, as well as those seeking a graduate degree in physics or astronomy.

The faculty members of the department carry out theoretical and experimental research in the following areas: astronomy, atomic and molecular, computational physics, cosmology, high-energy, low-temperature/condensed matter, materials science, nuclear physics, and quantum optics. Laboratories supporting the experimental programs are well-equipped with modern research apparatus. Special support facilities include an astronomical instrumentation laboratory, access to high-performance computing, a variable-energy cyclotron, and many shared campus facilities.

Masters
• Master of Science in Astronomy (p. 1269)
• Master of Science in Physics (p. 1279)

Doctoral
• Doctor of Philosophy in Applied Physics (p. 1263)
• Doctor of Philosophy in Astronomy (p. 1273)
• Doctor of Philosophy in Physics (p. 1283)

Doctor of Philosophy in Applied Physics
Work leading to the degree of Doctor of Philosophy (PhD) is designed to give the candidate a thorough and comprehensive knowledge of his or her professional field and training in methods of research. The final basis for granting the degree shall be the candidate’s grasp of the subject matter of a broad field of study and a demonstrated ability to do independent research. In addition, the candidate must have acquired the ability to express thoughts clearly and forcefully in both oral and written languages. The degree is not granted solely for the completion of coursework, residence and technical requirements, although these must be met.

For a student who has completed a master's degree, a DDS/DMD, DVM or MD at a U.S. institution, a minimum of 64 hours is required on the degree plan for the degree of Doctor of Philosophy. For a student who has completed a baccalaureate degree but not a master's degree or a U.S. DDS/DMD, DVM or MD, a minimum of 96 hours is required on the degree plan for the degree of Doctor of Philosophy.

Steps to Fulfill Doctoral Degree Requirements
1. Meet with departmental/intercollegiate graduate advisor to plan course of study for first semester. When: Before first semester registration. Approved by: Graduate advisor.

2. Establish advisory committee. Submit a degree plan. When: Prior to the deadline imposed by the student’s college or intercollegiate programs, and no later than 90 days prior to preliminary examination. Approved by: Advisory committee, department head or intercollegiate faculty chair, and Office of Graduate and Professional Studies (OGAPS).

3. Complete course work detailed on the approved degree plan. Before preliminary exam.

Note: Once formal coursework is complete, you must be continuously registered until all degree requirements have been met. This includes submission and clearance of the dissertation or record of study. See Continuous Registration Requirements (p. 28).

The Applied Physics program offers students the opportunity to receive a PhD while focusing on areas of research outside of those covered by the traditional fundamental physics program. The interdisciplinary curriculum for this degree includes a core of foundation physics courses plus a selection of graduate courses in associated science and engineering fields relevant to a particular student’s area of research specialization.

PHYS 601, PHYS 603, PHYS 606, PHYS 607, PHYS 615, one graduate-level course in Classical or Quantum Physics (see graduate advisor for options) and four elective courses, chosen in consultation with the student’s committee, with the exceptions of PHYS 666, undergraduate courses and PHYS 685, are required to complete the PhD in Applied Physics.

As part of the training of the graduate student pursuing the MS or PhD in Physics or Applied Physics, the Department of Physics and Astronomy recommends that all students serve as teaching assistants for at least two semesters.

**Program Requirements**

**Program Requirements**

- Student’s Advisory Committee (p. 1264)
- Degree Plan (p. 1265)
- Transfer of Credit (p. 1265)
- Research Proposal (p. 1265)
- Examinations (p. 1266)
  - Preliminary Examination (p. 1266)
  - Preliminary Examination Format (p. 1266)
  - Preliminary Examination Scheduling (p. 1266)
  - Report of Preliminary Examination (p. 1266)
  - Retake of Failed Preliminary Examination (p. 1267)
  - Final Examination (p. 1267)
  - Report of Final Examination (p. 1267)
- Dissertation (p. 1267)

**Student’s Advisory Committee**

After receiving admission to graduate studies and enrolling, the student will consult with the head of his or her major or administrative department (or chair of the intercollegiate faculty) concerning appointment of the chair of the advisory committee. The student’s advisory committee will consist of **no fewer than four members of the graduate faculty** representative of the student’s several fields of study and research, where the chair or co-chair must be from the student’s
department (or intercollegiate faculty, if applicable), and at least one or more of the members must have an appointment to a department other than the student’s major department. The outside member for a student in an interdisciplinary degree program must be from a department different from the chair of the student’s committee.

The chair, in consultation with the student, will select the remainder of the advisory committee. Only graduate faculty members located on Texas A&M University campuses may serve as chair of a student’s advisory committee. Other Texas A&M University graduate faculty members located off-campus may serve as a member or co-chair (but not chair), with a member as the chair.

If the chair of a student’s advisory committee voluntarily leaves the University and the student is near completion of the degree and wants the chair to continue to serve in this role, the student is responsible for securing a current member of the University Graduate Faculty, from the student’s academic program and located near the Texas A&M University campus site, to serve as the co-chair of the committee. The Department Head or Chair of Intercollegiate faculty may request in writing to the Associate Provost for Graduate and Professional Studies that a faculty member who is on an approved leave of absence or has voluntarily separated from the university, be allowed to continue to serve in the role of chair of a student’s advisory committee without a co-chair for up to one year. The students should be near completion of the degree. Extensions beyond the one year period can be granted with additional approval of the Dean.

The committee members’ signatures on the degree plan indicate their willingness to accept the responsibility for guiding and directing the entire academic program of the student and for initiating all academic actions concerning the student. Although individual committee members may be replaced by petition for valid reasons, a committee cannot resign en masse. The chair of the committee, who usually has immediate supervision of the student’s research and dissertation or record of study, has the responsibility for calling all meetings of the committee. The duties of the committee include responsibility for the proposed degree plan, the research proposal, the preliminary examination, the dissertation or record of study and the final examination. In addition, the committee, as a group and as individual members, is responsible for counseling the student on academic matters, and, in the case of academic deficiency, initiating recommendations to the Office of Graduate and Professional Studies.

**Degree Plan**

The student’s advisory committee will evaluate the student’s previous education and degree objectives. The committee, in consultation with the student, will develop a proposed degree plan and outline a research problem which, when completed, as indicated by the dissertation (or its equivalent for the degree of Doctor of Education or the degree of Doctor of Engineering), will constitute the basic requirements for the degree. The degree plan must be filed with the Office of Graduate and Professional Studies prior to the deadline imposed by the student’s college and no later than 90 days prior to the preliminary examination.

This proposed degree plan should be submitted through the online Document Processing Submission System located on the website http://ogsdpss.tamu.edu. A minimum of 64 hours is required on the degree plan for the Doctor of Philosophy for a student who has completed a master’s degree. A student who has completed a DDS/DMD, DVM or a MD at a U.S. institution is also required to complete a minimum of 64 hours. A student who has completed a baccalaureate degree but not a master’s degree will be required to complete a 96-hour degree plan. Completion of a DDS/DMD, DVM or MD degree at a foreign institution requires completion of a minimum of 96 hours for the Doctor of Philosophy. A field of study may be primarily in one department or in a combination of departments. A degree plan must carry a reasonable amount of 691 (research).

Additional coursework may be added by petition to the approved degree plan by the student’s advisory committee if it is deemed necessary to correct deficiencies in the student’s academic preparation. No changes can be made to the degree plan once the student’s Request for Final Examination is approved by the Office of Graduate and Professional Studies.

Approval to enroll in any professional course (900-level) should be obtained from the head of the department (or Chair of the intercollegiate faculty, if applicable) in which the course will be offered before including such a course on a degree plan.

No credit may be obtained by correspondence study, by extension or for any course of fewer than three weeks duration.

**Transfer of Credit**

Courses for which transfer credits are sought must have been completed with a grade of B or greater and must be approved by the student’s advisory committee and the Office of Graduate and Professional Studies. These courses must not have been used previously for another degree. Except for officially approved cooperative doctoral programs, credit for thesis or dissertation research or the equivalent is not transferable. Credit for “internship” coursework in any form is not transferable. Courses taken in residence at an accredited U.S. institution or approved international institution with a final grade of B or greater will be considered for transfer credit if, at the time the courses were completed, the courses would be accepted for credit toward a similar degree for a student in degree-seeking status at the host institution. Credit for coursework taken by extension is not transferable. Coursework in which no formal grades are given or in which grades other than letter grades (A or B) are earned (for example, CR, P, S, U, H, etc.) is not accepted for transfer credit. Credit for coursework submitted for transfer from any college or university must be shown in semester credit hours, or equated to semester credit hours.

Courses used toward a degree at another institution may not be applied for graduate credit. If the course to be transferred was taken prior to the conferral of a degree at the transfer institution, a letter from the registrar at that institution stating that the course was not applied for credit toward the degree must be submitted to the Office of Graduate and Professional Studies.

Grades for courses completed at other institutions are not included in computing the GPR. An official transcript from the university at which transfer courses are taken must be sent directly to the Office of Admissions.

**Research Proposal**

The general field of research to be used for the dissertation should be agreed on by the student and the advisory committee at their first meeting, as a basis for selecting the proper courses to support the proposed research.

As soon thereafter as the research project can be outlined in reasonable detail, the dissertation research proposal should be completed. The research proposal should be approved at a meeting of the student’s advisory committee, at which time the feasibility of the proposed
research and the adequacy of available facilities should be reviewed. The approved proposal, signed by all members of the student's advisory committee, the head of the student's major department (or chair of the intercollegiate faculty, if applicable), must be submitted to the Office of Graduate and Professional Studies at least 20 working days prior to the submission of the Request for the Final Examination.

Compliance issues must be addressed if a graduate student is performing research involving human subjects, animals, infectious biohazards and recombinant DNA. A student involved in these types of research should check with the Office of Research Compliance and Biosafety at (979) 458-1467 to address questions about all research compliance responsibilities. Additional information can also be obtained on the website http://rcb.tamu.edu.

Examinations

Preliminary Examination for Doctoral Students

The student's major department (or chair of the interdisciplinary degree program faculty, if applicable) and his or her advisory committee may require qualifying, cumulative or other types of examinations at any time deemed desirable. These examinations are entirely at the discretion of the department and the student's advisory committee.

The preliminary examination is required. The preliminary examination for a doctoral student shall be given no earlier than a date at which the student is within 6 credit hours of completion of the formal coursework on the degree plan (i.e., all coursework on the degree plan except 681, 684, 690, 691, 692, 693, 695, 697, 791, or other graduate courses specifically designated as S/U in the course catalog). The student should complete the Preliminary Examination no later than the end of the semester following the completion of the formal coursework on the degree plan.

Preliminary Examination Format

The objective of preliminary examination is to evaluate whether the student has demonstrated the following qualifications:

a. a mastery of the subject matter of all fields in the program;
b. an adequate knowledge of the literature in these fields and an ability to carry out bibliographical research;
c. an understanding of the research problem and the appropriate methodological approaches.

The format of the preliminary examination shall be determined by the student's department (or interdisciplinary degree program, if applicable) and advisory committee, and communicated to the student in advance of the examination. The exam may consist of a written component, oral component, or combination of written and oral components.

The preliminary exam may be administered by the advisory committee or a departmental committee; herein referred to as the examination committee.

Regardless of exam format, a student will receive an overall preliminary exam result of pass or fail. The department (or interdisciplinary degree program, if applicable) will determine how the overall pass or fail result is determined based on the exam structure and internal department procedures. If the exam is administered by the advisory committee, each advisory committee member will provide a pass or fail evaluation decision.

Only one advisory committee substitution is allowed to provide an evaluation decision for a student's preliminary exam, and it cannot be the committee chair.

If a student is required to take, as a part of the preliminary examination, a written component administered by a department or interdisciplinary degree program, the department or interdisciplinary degree program faculty must:

a. offer the examination at least once every six months. The departmental or interdisciplinary degree program examination should be announced at least 30 days prior to the scheduled examination date.
b. assume the responsibility for marking the examination satisfactory or unsatisfactory, or otherwise graded, and in the case of unsatisfactory, stating specifically the reasons for such a mark.
c. forward the marked examination to the chair of the student's advisory committee within one week after the examination.

Preliminary Examination Scheduling

Prior to commencing any component of the preliminary examination, a departmental representative or the advisory committee chair will review the eligibility criteria with the student, using the Preliminary Examination Checklist to ensure the student is eligible for the preliminary examination. The following list of eligibility requirements applies.

- Student is registered for a minimum of one semester credit hour in the long semester or summer term during which any component of the preliminary examination is held. If the entire examination is held between semesters, the student must be registered for the term immediately preceding the examination.
- An approved degree plan is on file with the Office of Graduate and Professional Studies prior to commencing the first component of the examination.
- Student's cumulative GPR is at least 3.000.
- Student's degree plan GPR is at least 3.000.
- All English language proficiency requirements are satisfied.
- At the end of the semester in which at least the first component of the exam is given, there are no more than 6 hours of coursework remaining on the degree plan (except 681, 684, 690, 691, 692, 693, 695, 697, 791, or other graduate courses specifically designated as S/U in the course catalog). The head of the student's department (or Chair of the Interdisciplinary Degree Program, if applicable) has the authority to approve a waiver of this criterion.

Report of Preliminary Examination

Credit for the preliminary examination is not transferable in cases where a student changes degree programs after passing a preliminary exam.

If a written component precedes an oral component of the preliminary exam, the chair of the student's examination committee is responsible for making all written examinations available to all members of the committee. A positive evaluation of the preliminary exam by all members
of a student's examination committee with at most one dissension is required to pass a student on his or her preliminary exam.

The student's department will promptly report the results of the Preliminary Examination to the Office of Graduate and Professional Studies via the Report of Doctoral Preliminary Examination form. The Preliminary Examination checklist form must also be submitted. These forms should be submitted to the Office of Graduate and Professional Studies within 10 working days of completion of the preliminary examination.

The Report of the Preliminary Examination form must be submitted with original signatures of the approved examination committee members. If an approved examination committee member substitution (one only) has been made, that signature must also be included, in place of the committee member, on the form submitted to the Office of Graduate and Professional Studies. The original signature of the department head is also required on the form.

After passing the required preliminary examination for the doctoral degree, the student must complete the final examination for the degree within four calendar years. Otherwise, the student will be required to repeat the preliminary examination.

Retake of Failed Preliminary Examination

Upon approval of the student's examination committee, with no more than one member dissenting, and approval of the Office of Graduate and Professional Studies, a student who has failed the preliminary examination may be given one re-examination. Adequate time must be given to permit the student to address the inadequacies emerging from the first preliminary examination. The examination committee must agree upon and communicate in writing to the student, an adequate time-frame from the first examination (normally six months) to retest, as well as a detailed explanation of the inadequacies emerging from the examination. The student and the committee should jointly negotiate a mutually acceptable date for this retest. When providing feedback on inadequacies, the committee should clearly document expected improvements that the student must be able to exhibit in order to retake the exam. The examination committee will document and communicate the time-frame and feedback within 10 working days of the exam that was not passed.

Final Examination for Doctoral Students

The candidate for the doctoral degree must pass a final examination by deadline dates announced in the "Office of Graduate and Professional Studies Calendar" each semester. The doctoral student is allowed only one opportunity to take the final examination.

No unabsolved grades of D, F, or U for any course can be listed on the degree plan. The student must be registered for any remaining hours of 681, 684, 690, 691, 692, 791 or other graduate courses specifically designated as S/U in the course catalog during the semester of the final exam. No student may be given a final examination until they have been admitted to candidacy and their current official cumulative and degree plan GPAs are 3.00 or better.

To be admitted to candidacy for a doctoral degree, a student must have:

1. completed all formal coursework on the degree plan with the exception of any remaining 681, 684, 690 and 691, 692 (Professional Study), or 791 hours,
2. a 3.0 Graduate GPA and a Degree Plan GPA of at least 3.0 with no grade lower than C in any course on the degree plan,
3. passed the preliminary examination,
4. submitted an approved dissertation proposal,
5. met the residence requirements.

The request to hold and announce the final examination must be submitted to the Office of Graduate and Professional Studies a minimum of 10 working days in advance of the scheduled date. Any changes to the degree plan must be approved by the Office of Graduate and Professional Studies prior to the submission of the request for final examination.

The student’s advisory committee will conduct this examination. The final examination is not to be administered until the dissertation or record of study is available in substantially final form to the student’s advisory committee, and all concerned have had adequate time to review the document. Whereas the final examination may cover the broad field of the candidate’s training, it is presumed that the major portion of the time will be devoted to the dissertation and closely allied topics. Persons other than members of the graduate faculty may, with mutual consent of the candidate and the chair of the advisory committee, be invited to attend a final examination for an advanced degree. A positive vote by all members of the graduate committee with at most one dissension is required to pass a student on his or her exam. A department can have a stricter requirement provided there is consistency within all degree programs within a department. Upon completion of the questioning of the candidate, all visitors must excuse themselves from the proceedings.

Report of Final Examination

The student’s department will promptly report the results of the Final Examination to the Office of Graduate and Professional Studies via the Report of Doctoral Final Examination form. These forms should be submitted to the Office of Graduate and Professional Studies within 10 working days of completion of the final examination. The Office of Graduate and Professional Studies must be notified in writing of any cancellations.

A positive evaluation of the final exam by all members of a student's advisory committee with at most one dissension is required to pass a student on his or her final exam. The Report of the Final Examination Form must be submitted with original signatures of only the committee members approved by the Office of Graduate and Professional Studies. If necessary, multiple copies of the form may be submitted with different committee member original signatures. If an approved committee member substitution (1 only) has been made, his/her signature must be included on the form submitted to the Office of Graduate and Professional Studies.

Dissertation

The ability to perform independent research must be demonstrated by the dissertation, which must be the original work of the candidate. Whereas acceptance of the dissertation is based primarily on its scholarly merit, it must also exhibit creditable literary workmanship. The format of the dissertation must be acceptable to the Office of Graduate and Professional Studies. Guidelines for the preparation of the dissertation are available in the Thesis Manual, which is available online at http://ogaps.tamu.edu.

After successful defense and approval by the student’s advisory committee and the head of the student’s major department (or chair of
the intercollegiate faculty, if applicable), a student must submit his/her dissertation in electronic format as a single PDF file. The PDF file must be uploaded to the website, http://ogaps.tamu.edu. Additionally, a signed paper approval form with original signatures must be received by the Office of Graduate and Professional Studies. Both the PDF file and the signed approval form are required by the deadline.

Deadline dates for submitting are announced each semester or summer term in the Office of Graduate and Professional Studies Calendar (see Time Limit statement). These dates also can be accessed via the website http://ogaps.tamu.edu.

Each student who submits a document for review is assessed a one-time thesis/dissertation processing fee through Student Business Services. This processing fee is for the thesis/dissertation services provided. After commencement, dissertations are digitally stored and made available through the Texas A&M Libraries.

A dissertation that is deemed unacceptable by the Office of Graduate and Professional Studies because of excessive corrections will be returned to the student’s department head or chair of the intercollegiate faculty. The manuscript must be resubmitted as a new document, and the entire review process must begin anew. All original submittal deadlines must be met during the resubmittal process in order to graduate.

### Additional Requirements

#### Additional Requirements

- Residence (p. 1268)
- Time Limit (p. 1268)
- Continuous Registration (p. 1268)
- Admission to Candidacy (p. 1268)
- Languages (p. 1268)
- 99-Hour Cap on Doctoral Degree (p. 1268)
- Application for Degree (p. 1269)

#### Residence

A student who enters the doctoral degree program with a baccalaureate degree must spend one academic year plus one semester in resident study at Texas A&M University. A student who holds master’s degree when he/she enters doctoral degree program must spend one academic year in resident study. One academic year may include two adjacent regular semesters or one regular semester and one adjacent 10-week summer semester. The third semester is not required to be adjacent to the one year. Enrollment for each semester must be a minimum of 9 credit hours each to satisfy the residence requirement.

To satisfy the residence requirement, the student must complete a minimum of 9 credit hours per semester or 10-week summer semester in resident study at Texas A&M University for the required period. A student who enters a doctoral degree program with a baccalaureate degree may fulfill residence requirements in excess of one academic year (18 credit hours) by registration during summer sessions or by completion of a less-than-full course load (in this context a full course load is considered 9 credit hours per semester).

Students who are employed full-time while completing their degree may fulfill total residence requirements by completion of less-than-full time course loads each semester. In order to be considered for this, the student is required to submit a Petition for Waivers and Exceptions along with verification of his/her employment to the Office of Graduate and Professional Studies. An employee should submit verification of his/her employment at the time he/she submits the degree plan. See Registration. (p. 28)

See Residence Requirements (p. 22).

### Time Limit

All requirements for doctoral degrees must be completed within a period of ten consecutive calendar years for the degree to be granted. A course will be considered valid until 10 years after the end of the semester in which it is taken. Graduate credit for coursework more than ten calendar years old at the time of the final oral examination may not be used to satisfy degree requirements.

After passing the required preliminary oral and written examinations for a doctoral degree, the student must complete the final examination within four calendar years. Otherwise, the student will be required to repeat the preliminary examination.

A final corrected version of the dissertation or record of study in electronic format as a single PDF file must be cleared by the Office of Graduate and Professional Studies no later than one year after the final examination or within the 10-year time limit, whichever occurs first. Failure to do so will result in the degree not being awarded.

### Continuous Registration

A student in a program leading to a Doctor of Philosophy who has completed all coursework on his/her degree plan other than 691, 5V98 or 5V99 (research) are required to be in continuous registration until all requirements for the degree have been completed. See Continuous Registration Requirements (p. 28).

### Admission to Candidacy

To be admitted to candidacy for a doctoral degree, a student must have:

1. completed all formal coursework on the degree plan with the exception of any remaining 681, 684, 690 and 691, 5V98 and 5V99, or 791.
2. a 3.0 Graduate GPA and a Degree Plan GPA of at least 3.0 with no grade lower than C in any course on the degree plan,
3. passed the preliminary examination (written and oral portions),
4. submitted an approved dissertation proposal,
5. met the residence requirements. The final examination will not be authorized for any doctoral student who has not been admitted to candidacy.

### Languages

A student is required to possess a competent command of English. For English language proficiency requirements, see the Admissions section of this catalog. The doctoral (PhD) foreign language requirement at Texas A&M University is a departmental option, to be administered and monitored by the individual departments of academic instruction.

### 99-Hour Cap on Doctoral Degrees

In Texas, public colleges and universities are funded by the state according to the number of students enrolled. In accordance with legislation passed by the Texas Legislature, the number of hours for which state universities may receive subvention funding at the doctoral rate for any individual is limited to 99 hours. Texas A&M University and
other universities will not receive subvention for hours in excess of the limit.

Institutions of higher education are allowed to charge the equivalent of nonresident tuition to a resident doctoral student who has enrolled in 100 or more semester credit hours of doctoral coursework.

A doctoral student at Texas A&M has seven years to complete his/her degree before being charged out-of-state tuition. A doctoral student who, after seven years of study, has accumulated 100 or more doctoral hours will be charged tuition at a rate equivalent to out-of-state tuition. Please note that the tuition increases will apply to Texas residents as well as students from other states and countries who currently are charged tuition at the resident rate. This includes those doctoral students who hold GAT, GANT, and GAR appointments of 20 or more hours and recipients of competitive fellowships who receive more than $1,000 per semester. Doctoral students who, after seven years of study, have not accumulated 100 hours are eligible to pay in-state tuition if otherwise eligible.

For count purposes, a year is counted as three semesters, normally fall, spring and summer. Using this system, a student is allowed 21 semesters as a G8 student to complete the doctoral degree before being penalized with the higher tuition rate. Any semester in which a G8 student is enrolled for a doctoral level course is counted.

The following majors are exempt from the 99-Hour Cap on Doctoral Degrees:

- Biomedical Sciences
- Biochemistry
- Microbiology
- Genetics
- Toxicology
- Nutrition Sciences
- Community Clinical Psychology
- School Psychology
- Veterinary Pathology
- Clinical Psychology
- Counseling Psychology
- Medical Sciences
- Health Services Research
- Health Promotion and Community Health Sciences
- Epidemiology and Environmental Health
- Oral Biology

The hour limit for these majors is 130 doctoral hours

### Application for Degree
For information on applying for your degree, please visit the Graduation (p. 26) section.

### Master of Science in Astronomy

#### Overview
The Master of Science (MS) curriculum is designed to develop new understanding through research and creativity. Students have the option to pursue a thesis or non-thesis Master of Science degree.

### Steps to Fulfill Master's Degree Requirements

program requirements

program requirements

- student's advisory committee (p. 1270)
- degree plan (p. 1270)
- credit requirements (p. 1271)
- transfer of credit (p. 1271)
- limitations on the use of transfer, extension and certain other courses (p. 1271)
- thesis option (p. 1271)
  - thesis proposal (p. 1272)
- final examination/thesis defense (p. 1272)
- non-thesis option (p. 1272)

student's advisory committee

after receiving admission to graduate studies and enrolling for coursework, the student will consult with the head of his or her major or administrative department (or intercollegiate faculty, if applicable) concerning appointment of the chair of his or her advisory committee. the student's advisory committee for the MS degree will consist of no fewer than three members of the graduate faculty, representative of the student's fields of study and research. the chair or the co-chair of the advisory committee must be from the student's major department (or intercollegiate faculty, if applicable), and at least one or more of the members must have an appointment to a department other than the student's major department. the outside member for students in an interdisciplinary program must have an appointment to a department different from the chair of the student's committee.

the chair, in consultation with the student, will select the remainder of the advisory committee. the student will interview each prospective committee member to determine whether he or she is willing to serve. only graduate faculty members located on Texas A&M University campuses may serve as chair of a student's advisory committee. other graduate faculty members located off campus may serve as a member or co-chair (but not chair) with a member as the chair. the chair of the committee, who usually has immediate supervision of the student's research and thesis, has the responsibility for calling required meetings of the committee and for calling meetings at any other time considered desirable.

If the chair of a student's advisory committee voluntarily leaves the University and the student is near completion of the degree and wants the chair to continue to serve in this role, the student is responsible for securing a current member of the University Graduate Faculty, from the student's academic program and located near the Texas A&M University campus site, to serve as the co-chair of the committee. the Department Head or Chair of Intercollegiate faculty may request in writing to the Associate Provost for Graduate and Professional Studies that a faculty member who is on an approved leave of absence or has voluntarily separated from the university, be allowed to continue to serve in the role of chair of a student's advisory committee without a co-chair for us to one year. the students should be near completion of the degree. extensions beyond the one year period can be granted with additional approval of the Dean.

If the chair of the student's advisory committee is unavailable for an extended time in any academic period during which the student is involved in activities relating to an internship, thesis or professional paper, and is registered for courses such as 684, 691, 692 or 693, the student may request, in writing, that the department head appoint an alternate advisory committee chair during the interim period.

the duties of the committee include responsibility for the proposed degree plan, the research proposal, the thesis and the final examination. in addition, the committee as a group and as individual members are responsible for advising the student on academic matters, and, in the case of academic deficiency, initiating recommendations to the Office of Graduate and Professional Studies.

the committee members' approval on the degree plan indicate their willingness to accept the responsibility for guiding and directing the entire academic program of the student and for initiating all academic actions concerning the student. although individual committee members may be replaced by petition for valid reasons, a committee cannot resign en masse.

degree plan

the student's advisory committee, in consultation with the student, will develop the proposed degree plan. the degree plan must be completed and filed with the Office of Graduate and Professional Studies prior to the deadline imposed by the student's college or interdisciplinary degree program, if applicable, and no later than 90 days prior to the date of the final oral examination or thesis defense.

A student should submit the degree plan using the online Document Processing Submission System (http://ogsdpss.tamu.edu).
A student submitting a proposed degree plan for a Master of Science degree should designate on the official degree plan the appropriate program option.

Additional coursework may be added to the approved degree plan by petition if it is deemed necessary by the advisory committee to correct deficiencies in the student’s academic preparation. No changes can be made to the degree plan once the student’s Request for Final Examination or Request for Final Examination Exemption is approved by the Office of Graduate and Professional Studies.

Credit Requirement
A minimum of 32 semester credit hours of approved courses and research is required for the thesis option Master of Science degree.

A minimum of 36 semester credit hours of approved coursework is required for the Non-Thesis Option.

Ordinarily the student will devote the major portion of his or her time to work in one or two closely related fields. Other work will be in supporting fields of interest.

Transfer of Credit
A student who has earned 12 hours of graduate credit in residence at Texas A&M University may be authorized to transfer courses in excess of the limits prescribed below upon the advice of the advisory committee and with the approval of the Office of Graduate and Professional Studies. Courses taken in residence at an accredited U.S. institution or approved international institution with a final grade of B or greater may be considered for transfer credit if, at the time the courses were completed, the courses would be accepted for credit toward a similar degree for a student in degree-seeking status at the host institution. Otherwise, the limitations stated in the following section apply. Coursework in which no formal grades are given or in which grades other than letter grades (A or B) are earned (for example, CR, P, S, U, H, etc.) is not accepted for transfer credit. Courses appearing on the degree plan with grades of D, F or U may not be absolved by transfer work. Credit for thesis research or the equivalent is not transferable. Credit for coursework submitted for transfer from any college or university must be shown in semester credit hours or equated to semester credit hours. An official transcript from the university at which the transfer coursework was taken must be sent directly to the Office of Admissions.

Courses used toward a degree at another institution may not be applied for graduate credit. If the course to be transferred was taken prior to the conferral of a degree at the transfer institution, a letter from the registrar at that institution stating that the course was not applied for credit toward the degree must be submitted to the Office of Graduate and Professional Studies.

Grades for courses completed at other institutions are not included in computing the GPR.

Limitations on the Use of Transfer, Extension and Certain Other Courses
Some departments may have more restrictive requirements for transfer work. If otherwise acceptable, certain courses may be used toward meeting credit-hour requirements for the master’s degree under the following limitations.

1. The maximum number of credit hours which may be considered for transfer credit is the greater of 12 hours or one-third (1/3) of the total hours of a degree plan. The following restrictions apply:
   • Graduate and/or upper-level undergraduate courses taken in residence at an accredited U.S. institution, or approved international institution with a final grade of B or greater will be considered for transfer credit if, at the time the courses were completed, the student was in degree-seeking status at Texas A&M University, or the student was in degree-seeking status at the institution at which the courses were taken; and if the courses would be accepted for credit toward a similar degree for a student in degree-seeking status at the host institution.
   • Courses previously used for another degree are not acceptable for degree plan credit.

2. The maximum number of credit hours taken in post-baccalaureate non-degree (G6) classification at Texas A&M University which may be considered for application to the degree plan is 12.

3. A zero credit 684 and 685 course is only allowed for non-thesis master’s students. Other courses, including 691 research hours, are not eligible for zero credit.

4. Not more than 12 hours may be used in any combination of the following categories:
   • Not more than 8 hours in the combination of 691 (research), 684 (Professional Internship) or may be used.
   • Not more than 8 hours of 685 (Directed Studies) may be used.
   • Not more than 3 hours of 690 (Theory of Research) may be used.
   • Not more than 3 hours of 695 (Frontiers in Research) may be used.

5. A maximum of 2 hours of Seminar (681).

6. A maximum of 9 hours of advanced undergraduate courses (300- or 400-level).

7. For graduate courses of three weeks’ duration or less, taken at other institutions, up to 1 hour of credit may be obtained for each five-day week of coursework. Each week of coursework must include at least 15 contact hours.

8. Continuing education courses may not be used for graduate credit.

9. Extension courses are not acceptable for credit.

Exceptions will be permitted only in unusual cases and when petitioned by the student's advisory committee and approved by the Office of Graduate and Professional Studies.

Thesis Option
An acceptable thesis is required for the Master of Science degree for a student who selects the thesis option program. The finished work must reflect a comprehensive understanding of the pertinent literature and express in clear English, the problem(s) for study, the method, significance and results of the student’s original research. Guidelines for the preparation of the thesis are available in the Thesis Manual, which is available online at the Office of Graduate and Professional Studies website.

After successful defense (or exemption) and approval by the student’s advisory committee and the head of the student’s major department (or chair of the intercollegiate faculty, if appropriate), the student must submit his/her thesis in electronic format as a single PDF file. The PDF file must be uploaded to the Office of Graduate and Professional Studies website. Additionally, a signed paper approval form with original signatures must be received by the Office of Graduate and Professional
Studies. The PDF file and the signed approval form are required by the deadline.

Deadline dates for submitting the thesis are announced each semester or summer term in the “Office of Graduate and Professional Studies Calendar” (see Time Limit statement). These dates also can be accessed via the Office of Graduate and Professional Studies website.

Each student who submits a document for review is assessed a one-time thesis/dissertation processing fee through Student Business Services. This processing fee is for the thesis/dissertation services provided. After commencement, theses and dissertations are digitally stored and made available through the Texas A&M Libraries.

A thesis that is deemed unacceptable by the Office of Graduate and Professional Studies because of excessive corrections will be returned to the student’s department head (or chair of the intercollegiate faculty, if applicable). The manuscript must be resubmitted as a new document, and the entire review process must begin again. All original submittal deadlines must be met during the resubmittal process to graduate that semester.

**Thesis Proposal**

For the thesis option Master of Science degree, the student must prepare a thesis proposal for approval by the advisory committee and the head of the major department or chair of the interdisciplinary faculty, if applicable. This proposal must be submitted to the Office of Graduate and Professional Studies at least 20 working days prior to the submission of the request for the final examination.

Compliance issues must be addressed if a graduate student is performing research involving human subjects, animals, infectious biohazards and recombinant DNA. A student involved in these types of research should check with the Office of Research Compliance and Biosafety at (979) 458-1467 to address questions about all research compliance responsibilities. Additional information can also be obtained on the Office of Research Compliance and Biosafety website.

**Final Examination/Thesis Defense**

A student must pass a final examination by dates announced each semester or summer term in the Office of Graduate and Professional Studies Calendar. To be eligible to take the final examination, a student’s GPR must be at least 3.000 for courses on the degree plan and for all courses completed at Texas A&M which are eligible to be applied to a graduate degree, and there must be no unabsolved grades of D, F or U for any course listed on the degree plan. To absolve a deficient grade, the student must repeat the course at Texas A&M University and achieve a grade of C or better. All coursework on the degree plan must have been completed with the exception of those hours for which the student is registered. For thesis-option students, an approved thesis proposal must be on file in the Office of Graduate and Professional Studies according to published deadlines prior to the final examination or submission of the request for exemption from the final examination.

A request to hold and announce the final examination must be submitted to the Office of Graduate and Professional Studies a minimum of 10 working days in advance of the scheduled date for the examination. The Office of Graduate and Professional Studies must be notified in writing of any cancellations. A student may be given only one opportunity to repeat the final examination for the master’s degree and that must be within a time period that does not extend beyond the end of the next regular semester (summer terms are excluded).

For thesis option students, the final examination covers the thesis and all work taken on the degree plan and at the option of the committee may be written or oral or both. The final examination may not be administered before the thesis is available to all members of the student’s advisory committee in substantially final form, and all members have had adequate time to review the document. The examination is conducted by the student’s advisory committee as finally constituted. A thesis option student must be registered in the University in the semester or summer term in which the final examination is taken. Persons other than members of the graduate faculty may, with mutual consent of the candidate and the major professor, attend final examinations for advanced degrees. Upon completion of the questioning of the candidate, all visitors must excuse themselves from the proceedings. A positive vote by all members of the graduate committee with at most one dissension is required to pass a student on his or her exam. A department, or interdisciplinary degree program, may have a stricter requirement provided there is consistency within all degree programs within a department or interdisciplinary degree program.

The Report of the Final Examination Form must be submitted with original signatures of only the committee members approved by the Office of Graduate and Professional Studies. If an approved committee member substitution (1 only) has been made, his/her signature must also be submitted to the Office of Graduate and Professional Studies. If necessary, multiple copies of the form may be submitted with different committee member original signatures. If an approved committee member substitution (1 only) has been made, his/her signature must be included on the form submitted to the Office of Graduate and Professional Studies.

A thesis option candidate may petition to be exempt from his/her final examination provided his/her degree plan GPR is 3.500 or greater and he/she has the approval of the advisory committee, the head of the student’s major department, or intercollegiate chair, if appropriate, and the Office of Graduate and Professional Studies. It is required that the petition for exemption be submitted the same semester the student intends to submit the thesis.

**Non-Thesis Option**

For non-thesis option students, a final comprehensive examination may be required.

The final exam cannot be held prior to the mid point of the semester if questions on the exam are based on courses in which the student is currently enrolled. If a student has completed all required degree plan coursework, the student is not required to be registered for classes in the semester the final examination is administered (unless he/she holds an assistantship). For specific final examination requirements, a student should check the program requirements for the degree which he/she is pursuing.

Exam results must be submitted with original signatures of only the committee members approved by the Office of Graduate and Professional Studies. If an approved committee member substitution (1 only) has been made, his/her signature must also be submitted to the Office of Graduate and Professional Studies.

A student pursuing the non-thesis option is not allowed to enroll in 691 (research) for any reason and 691 may not be used for credit toward a non-thesis option Master of Science degree. A maximum of 4 credit hours
of 684 (Professional Internship), 8 credit hours of 685 (Directed Studies), and up to 3 credit hours of 690 (Theory of Research) or 695 (Frontiers in Research) may be used toward the non-thesis option Master of Science degree. In addition, any combination of 684, 685, 690 and 695 may not exceed 25 percent of the total credit hour requirement shown on the individual degree plan. All requirements for the non-thesis option Master of Science degree other than those specified above are the same as for the thesis option degree.

Additional Requirements

Additional Requirements

- Residence (p. 1273)
- Continuous Registration (p. 1273)
- Time Limit (p. 1273)
- Foreign Languages (p. 1273)
- Application for Degree (p. 1273)

Residence

In partial fulfillment of the residence requirement for the degree of Master of Science, the student must complete 9 resident credit hours during one regular semester or one 10-week summer semester in resident study at Texas A&M University. Upon recommendation of the student’s advisory committee, department head or Chair of the Interdisciplinary Program, if appropriate, and with approval of the Office of Graduate and Professional Studies, a student may be granted exemption from this requirement. Such a petition, however, must be approved prior to the student’s registration for the final 9 credit hours of required coursework.

Students who are employed full-time while completing their degree may fulfill total residence requirements by completion of less-than-full time course loads each semester. In order to be considered for this, the student is required to submit a Petition for Waivers and Exceptions along with verification of his/her employment to the Office of Graduate and Professional Studies.

See Residence Requirements (p. 22).

Continuous Registration

A student in the thesis option of the Master of Science program who has completed all coursework on his/her degree plan other than 5V98, 5V99, and 691 (research) is required to be in continuous registration until all requirements for the degree have been completed. See Continuous Registration Requirements (p. 28).

Time Limit

All degree requirements must be completed within a period of seven consecutive years for the degree to be granted. A course will be considered valid until seven years after the end of the semester in which it is taken. Graduate credit for coursework which is more than seven calendar years old at the time of the final examination (oral or written) may not be used to satisfy degree requirements.

A student who has chosen the thesis option must have the final corrected version of the thesis cleared by the Office of Graduate and Professional Studies no later than one year after the final examination, or approval of a petition for exemption from the final exam, or within the seven-year time limit, whichever occurs first. Failure to do so will result in the degree not being awarded.

Foreign Languages

No specific language requirement exists for the Master of Science degree.

Application for Degree

For information on applying for your degree, please visit the Graduation section.

Doctor of Philosophy in Astronomy

Overview

Work leading to the degree of Doctor of Philosophy (PhD) is designed to give the candidate a thorough and comprehensive knowledge of his or her professional field and training in methods of research. The final basis for granting the degree shall be the candidate’s grasp of the subject matter of a broad field of study and a demonstrated ability to do independent research. In addition, the candidate must have acquired the ability to express thoughts clearly and forcefully in both oral and written languages. The degree is not granted solely for the completion of coursework, residence and technical requirements, although these must be met.

For a student who has completed a master’s degree, a DDS/DMD, DVM or MD at a U.S. institution, a minimum of 64 hours is required on the degree plan for the degree of Doctor of Philosophy. For a student who has completed a baccalaureate degree but not a master’s degree or a U.S. DDS/DMD, DVM or MD, a minimum of 96 hours is required on the degree plan for the degree of Doctor of Philosophy.

Steps to Fulfill Doctoral Degree Requirements

1. Meet with departmental/intercollegiate graduate advisor to plan course of study for first semester. 
   When: Before first semester registration. 
   Approved by: Graduate advisor.

2. Establish advisory committee. Submit a degree plan. 
   When: Prior to the deadline imposed by the student’s college or intercollegiate programs, and no later than 90 days prior to preliminary examination. 
   Approved by: Advisory committee, department head or intercollegiate faculty chair, and Office of Graduate and Professional Studies (OGAPS).

3. Complete course work detailed on the approved degree plan. 
   Before preliminary exam.

**Note:** Once formal coursework is complete, you must be continuously registered until all degree requirements have been met. This includes submission and clearance of the dissertation or record of study. See Continuous Registration Requirements (p. 28).

ASTR 601/PHYS 641, ASTR 602/PHYS 642, ASTR 603/PHYS 643, ASTR 604/PHYS 644, ASTR 605/PHYS 645 and ASTR 606/PHYS 646, as well as PHYS 615 and one of the following: PHYS 601, PHYS 603, PHYS 606 or PHYS 607 are required to complete the PhD in Astronomy.

### Program Requirements

#### Program Requirements

- **Student’s Advisory Committee (p. 1274)**
  - Degree Plan (p. 1275)
  - Transfer of Credit (p. 1275)
  - Research Proposal (p. 1275)
  - Examinations (p. 1276)
    - Preliminary Examination (p. 1276)
    - Preliminary Examination Format (p. 1276)
    - Preliminary Examination Scheduling (p. 1276)
    - Report of Preliminary Examination (p. 1276)
    - Retake of Failed Preliminary Examination (p. 1277)
    - Final Examination (p. 1277)
  - Report of Final Examination (p. 1277)
  - Dissertation (p. 1277)

#### Student’s Advisory Committee

After receiving admission to graduate studies and enrolling, the student will consult with the head of his or her major or administrative department (or chair of the intercollegiate faculty) concerning appointment of the chair of the advisory committee. The student’s advisory committee will consist of no fewer than four members of the graduate faculty representative of the student’s several fields of study and research, where the chair or co-chair must be from the student’s department (or intercollegiate faculty, if applicable), and at least one or more of the members must have an appointment to a department other than the student’s major department. The outside member for a student in an interdisciplinary degree program must be from a department different from the chair of the student’s committee.

The chair, in consultation with the student, will select the remainder of the advisory committee. Only graduate faculty members located on Texas A&M University campuses may serve as chair of a student’s advisory committee. Other Texas A&M University graduate faculty members located off-campus may serve as a member or co-chair (but not chair), with a member as the chair.

For more information, visit http://graduation.tamu.edu.
If the chair of a student’s advisory committee voluntarily leaves the University and the student is near completion of the degree and wants the chair to continue to serve in this role, the student is responsible for securing a current member of the University Graduate Faculty, from the student’s academic program and located near the Texas A&M University campus site, to serve as the co-chair of the committee. The Department Head or Chair of Intercollegiate faculty may request in writing to the Associate Provost for Graduate and Professional Studies that a faculty member who is on an approved leave of absence or has voluntarily separated from the university, be allowed to continue to serve in the role of chair of a student’s advisory committee without a co-chair for up to one year. The students should be near completion of the degree. Extensions beyond the one year period can be granted with additional approval of the Dean.

The committee members’ signatures on the degree plan indicate their willingness to accept the responsibility for guiding and directing the entire academic program of the student and for initiating all academic actions concerning the student. Although individual committee members may be replaced by petition for valid reasons, a committee cannot resign en masse. The chair of the committee, who usually has immediate supervision of the student’s research and dissertation or record of study, has the responsibility for calling all meetings of the committee. The duties of the committee include responsibility for the proposed degree plan, the research proposal, the preliminary examination, the dissertation or record of study and the final examination. In addition, the committee, as a group and as individual members, is responsible for counseling the student on academic matters, and, in the case of academic deficiency, initiating recommendations to the Office of Graduate and Professional Studies.

**Degree Plan**

The student’s advisory committee will evaluate the student’s previous education and degree objectives. The committee, in consultation with the student, will develop a proposed degree plan and outline a research problem which, when completed, as indicated by the dissertation (or its equivalent for the degree of Doctor of Education or the degree of Doctor of Engineering), will constitute the basic requirements for the degree. The degree plan must be filed with the Office of Graduate and Professional Studies prior to the deadline imposed by the student’s college and no later than 90 days prior to the preliminary examination.

This proposed degree plan should be submitted through the online Document Processing Submission System located on the website http://ogsdpss.tamu.edu. A minimum of 64 hours is required on the degree plan for the Doctor of Philosophy for a student who has completed a master’s degree. A student who has completed a DDS/DMD, DVM or a MD at a U.S. institution is also required to complete a minimum of 64 hours. A student who has completed a baccalaureate degree but not a master’s degree will be required to complete a 96-hour degree plan. Completion of a DDS/DMD, DVM or MD degree at a foreign institution requires completion of a minimum of 96 hours for the Doctor of Philosophy. A field of study may be primarily in one department or in a combination of departments. A degree plan must carry a reasonable amount of 691 (research).

Additional coursework may be added by petition to the approved degree plan by the student’s advisory committee if it is deemed necessary to correct deficiencies in the student’s academic preparation. No changes can be made to the degree plan once the student’s Request for Final Examination is approved by the Office of Graduate and Professional Studies.

Approval to enroll in any professional course (900-level) should be obtained from the head of the department (or Chair of the intercollegiate faculty, if applicable) in which the course will be offered before including such a course on a degree plan.

No credit may be obtained by correspondence study, by extension or for any course of fewer than three weeks duration.

**Transfer of Credit**

Courses for which transfer credits are sought must have been completed with a grade of B or greater and must be approved by the student’s advisory committee and the Office of Graduate and Professional Studies. These courses must not have been used previously for another degree. Except for officially approved cooperative doctoral programs, credit for thesis or dissertation research or the equivalent is not transferable. Credit for “internship” coursework in any form is not transferable. Courses taken in residence at an accredited U.S. institution or approved international institution with a final grade of B or greater will be considered for transfer credit if, at the time the courses were completed, the courses would be accepted for credit toward a similar degree for a student in degree-seeking status at the host institution. Credit for coursework taken by extension is not transferable. Coursework in which no formal grades are given or in which grades other than letter grades (A or B) are earned (for example, CR, P, S, U, H, etc.) is not accepted for transfer credit. Credit for coursework submitted for transfer from any college or university must be shown in semester credit hours, or equated to semester credit hours.

Courses used toward a degree at another institution may not be applied for graduate credit. If the course to be transferred was taken prior to the conferral of a degree at the transfer institution, a letter from the registrar at that institution stating that the course was not applied for credit toward the degree must be submitted to the Office of Graduate and Professional Studies.

Grades for courses completed at other institutions are not included in computing the GPR. An official transcript from the university at which transfer courses are taken must be sent directly to the Office of Admissions.

**Research Proposal**

The general field of research to be used for the dissertation should be agreed on by the student and the advisory committee at their first meeting, as a basis for selecting the proper courses to support the proposed research.

As soon thereafter as the research project can be outlined in reasonable detail, the dissertation research proposal should be completed. The research proposal should be approved at a meeting of the student’s advisory committee, at which time the feasibility of the proposed research and the adequacy of available facilities should be reviewed. The approved proposal, signed by all members of the student’s advisory committee, the head of the student’s major department (or chair of the intercollegiate faculty, if applicable), must be submitted to the Office of Graduate and Professional Studies at least 20 working days prior to the submission of the Request for the Final Examination.

Compliance issues must be addressed if a graduate student is performing research involving human subjects, animals, infectious biohazards and recombinant DNA. A student involved in these types of research should check with the Office of Research Compliance and Biosafety at (979) 458-1467 to address questions about all research.
compliance responsibilities. Additional information can also be obtained on the website http://rcb.tamu.edu.

Examinations

Preliminary Examination for Doctoral Students

The student’s major department (or chair of the interdisciplinary degree program faculty, if applicable) and his or her advisory committee may require qualifying, cumulative or other types of examinations at any time deemed desirable. These examinations are entirely at the discretion of the department and the student’s advisory committee.

The preliminary examination is required. The preliminary examination for a doctoral student shall be given no earlier than a date at which the student is within 6 credit hours of completion of the formal coursework on the degree plan (i.e., all coursework on the degree plan except 681, 684, 690, 691, 692, 693, 695, 697, 791, or other graduate courses specifically designated as S/U in the course catalog). The student should complete the Preliminary Examination no later than the end of the semester following the completion of the formal coursework on the degree plan.

Preliminary Examination Format

The objective of preliminary examination is to evaluate whether the student has demonstrated the following qualifications:

a. a mastery of the subject matter of all fields in the program;
b. an adequate knowledge of the literature in these fields and an ability to carry out bibliographical research;
c. an understanding of the research problem and the appropriate methodological approaches.

The format of the preliminary examination shall be determined by the student’s department (or interdisciplinary degree program, if applicable) and advisory committee, and communicated to the student in advance of the examination. The exam may consist of a written component, oral component, or combination of written and oral components.

The preliminary exam may be administered by the advisory committee or a departmental committee, herein referred to as the examination committee.

Regardless of exam format, a student will receive an overall preliminary exam result of pass or fail. The department (or interdisciplinary degree program, if applicable) will determine how the overall pass or fail result is determined based on the exam structure and internal department procedures. If the exam is administered by the advisory committee, each advisory committee member will provide a pass or fail evaluation decision.

Only one advisory committee substitution is allowed to provide an evaluation decision for a student’s preliminary exam, and it cannot be the committee chair.

If a student is required to take, as a part of the preliminary examination, a written component administered by a department or interdisciplinary degree program, the department or interdisciplinary degree program faculty must:

a. offer the examination at least once every six months. The departmental or interdisciplinary degree program examination should be announced at least 30 days prior to the scheduled examination date.
b. assume the responsibility for marking the examination satisfactory or unsatisfactory, or otherwise graded, and in the case of unsatisfactory, stating specifically the reasons for such a mark.
c. forward the marked examination to the chair of the student’s advisory committee within one week after the examination.

Preliminary Examination Scheduling

Prior to commencing any component of the preliminary examination, a departmental representative or the advisory committee chair will review the eligibility criteria with the student, using the Preliminary Examination Checklist to ensure the student is eligible for the preliminary examination. The following list of eligibility requirements applies.

- Student is registered at Texas A&M University for a minimum of one semester credit hour in the long semester or summer term during which any component of the preliminary examination is held. If the entire examination is held between semesters, then the student must be registered for the term immediately preceding the examination.
- An approved degree plan is on file with the Office of Graduate and Professional Studies prior to commencing the first component of the examination.
- Student’s cumulative GPR is at least 3.000.
- Student’s degree plan GPR is at least 3.000.
- All English language proficiency requirements are satisfied.
- At the end of the semester in which at least the first component of the exam is given, there are no more than 6 hours of coursework remaining on the degree plan (except 681, 684, 690, 691, 692, 693, 695, 697, 791, or other graduate courses specifically designated as S/U in the course catalog). The head of the student’s department (or Chair of the Interdisciplinary Degree Program, if applicable) has the authority to approve a waiver of this criterion.

Report of Preliminary Examination

Credit for the preliminary examination is not transferable in cases where a student changes degree programs after passing a preliminary exam.

If a written component precedes an oral component of the preliminary exam, the chair of the student’s examination committee is responsible for making all written examinations available to all members of the committee. A positive evaluation of the preliminary exam by all members of a student’s examination committee with at most one dissension is required to pass a student on his or her preliminary exam.

The student’s department will promptly report the results of the Preliminary Examination to the Office of Graduate and Professional Studies via the Report of Doctoral Preliminary Examination form. The Preliminary Examination checklist form must also be submitted. These forms should be submitted to the Office of Graduate and Professional Studies within 10 working days of completion of the preliminary examination.

The Report of the Preliminary Examination form must be submitted with original signatures of the approved examination committee members.
If an approved examination committee member substitution (one only) has been made, that signature must also be included, in place of the committee member, on the form submitted to the Office of Graduate and Professional Studies. The original signature of the department head is also required on the form.

After passing the required preliminary examination for the doctoral degree, the student must complete the final examination for the degree within four calendar years. Otherwise, the student will be required to repeat the preliminary examination.

Retake of Failed Preliminary Examination

Upon approval of the student's examination committee, with no more than one member dissenting, and approval of the Office of Graduate and Professional Studies, a student who has failed the preliminary examination may be given one re-examination. Adequate time must be given to permit the student to address the inadequacies emerging from the first preliminary examination. The examination committee must agree upon and communicate in writing to the student, an adequate time-frame from the first examination (normally six months) to retest, as well as a detailed explanation of the inadequacies emerging from the examination. The student and the committee should jointly negotiate a mutually acceptable date for this retest. When providing feedback on inadequacies, the committee should clearly document expected improvements that the student must be able to exhibit in order to retake the exam. The examination committee will document and communicate the time-frame and feedback within 10 working days of the exam that was not passed.

Final Examination for Doctoral Students

The candidate for the doctoral degree must pass a final examination by deadline dates announced in the "Office of Graduate and Professional Studies Calendar" each semester. The doctoral student is allowed only one opportunity to take the final examination.

No unabsoled grades of D, F, or U for any course can be listed on the degree plan. The student must be registered for any remaining hours of 681, 684, 690, 691, 692, 791 or other graduate courses specifically designated as S/U in the course catalog during the semester of the final exam. No student may be given a final examination until they have been admitted to candidacy and their current official cumulative and degree plan GPAs are 3.00 or better.

To be admitted to candidacy for a doctoral degree, a student must have:
1. completed all formal coursework on the degree plan with the exception of any remaining 681, 684, 690 and 691, 692 (Professional Study), or 791 hours,
2. a 3.0 Graduate GPA and a Degree Plan GPA of at least 3.0 with no grade lower than C in any course on the degree plan,
3. passed the preliminary examination,
4. submitted an approved dissertation proposal,
5. met the residence requirements.

The request to hold and announce the final examination must be submitted to the Office of Graduate and Professional Studies a minimum of 10 working days in advance of the scheduled date. Any changes to the degree plan must be approved by the Office of Graduate and Professional Studies prior to the submission of the request for final examination.

The student’s advisory committee will conduct this examination. The final examination is not to be administered until the dissertation or record of study is available in substantially final form to the student’s advisory committee, and all concerned have had adequate time to review the document. Whereas the final examination may cover the broad field of the candidate’s training, it is presumed that the major portion of the time will be devoted to the dissertation and closely allied topics. Persons other than members of the graduate faculty may, with mutual consent of the candidate and the chair of the advisory committee, be invited to attend a final examination for an advanced degree. A positive vote by all members of the graduate committee with at most one dissent must be required to pass a student on his or her exam. A department can have a stricter requirement provided there is consistency within all degree programs within a department. Upon completion of the questioning of the candidate, all visitors must excuse themselves from the proceedings.

Report of Final Examination

The student’s department will promptly report the results of the Final Examination to the Office of Graduate and Professional Studies via the Report of Doctoral Final Examination form. These forms should be submitted to the Office of Graduate and Professional Studies within 10 working days of completion of the final examination. The Office of Graduate and Professional Studies must be notified in writing of any cancellations.

A positive evaluation of the final exam by all members of a student’s advisory committee with at most one dissent is required to pass a student on his or her final exam. The Report of the Final Examination Form must be submitted with original signatures of only the committee members approved by the Office of Graduate and Professional Studies. If necessary, multiple copies of the form may be submitted with different committee member original signatures. If an approved committee member substitution (1 only) has been made, his/her signature must be included on the form submitted to the Office of Graduate and Professional Studies.

Dissertation

The ability to perform independent research must be demonstrated by the dissertation, which must be the original work of the candidate. Whereas acceptance of the dissertation is based primarily on its scholarly merit, it must also exhibit creditable literary workmanship. The format of the dissertation must be acceptable to the Office of Graduate and Professional Studies. Guidelines for the preparation of the dissertation are available in the Thesis Manual, which is available online at http://ogaps.tamu.edu.

After successful defense and approval by the student’s advisory committee and the head of the student’s major department (or chair of the intercollegiate faculty, if applicable), a student must submit his/her dissertation in electronic format as a single PDF file. The PDF file must be uploaded to the website, http://ogaps.tamu.edu. Additionally, a signed paper approval form with original signatures must be received by the Office of Graduate and Professional Studies. Both the PDF file and the signed approval form are required by the deadline.

Deadline dates for submitting are announced each semester or summer term in the Office of Graduate and Professional Studies Calendar (see Time Limit statement). These dates also can be accessed via the website http://ogaps.tamu.edu.

Each student who submits a document for review is assessed a one-time thesis/dissertation processing fee through Student Business Services.
This processing fee is for the thesis/dissertation services provided. After commencement, dissertations are digitally stored and made available through the Texas A&M Libraries.

A dissertation that is deemed unacceptable by the Office of Graduate and Professional Studies because of excessive corrections will be returned to the student’s department head or chair of the intercollegiate faculty. The manuscript must be resubmitted as a new document, and the entire review process must begin anew. All original submittal deadlines must be met during the resubmittal process in order to graduate.

### Additional Requirements

#### Additional Requirements

- Residence (p. 1278)
- Time Limit (p. 1278)
- Continuous Registration (p. 1278)
- Admission to Candidacy (p. 1278)
- Languages (p. 1278)
- 99-Hour Cap on Doctoral Degree (p. 1278)
- Application for Degree (p. 1279)

#### Residence

A student who enters the doctoral degree program with a baccalaureate degree must spend one academic year plus one semester in resident study at Texas A&M University. A student who holds master’s degree when he/she enters doctoral degree program must spend one academic year in resident study. One academic year may include two adjacent regular semesters or one regular semester and one adjacent 10-week summer semester. The third semester is not required to be adjacent to the one year. Enrollment for each semester must be a minimum of 9 credit hours each to satisfy the residence requirement.

To satisfy the residence requirement, the student must complete a minimum of 9 credit hours per semester or 10-week summer semester in resident study at Texas A&M University for the required period. A student who enters a doctoral degree program with a baccalaureate degree may fulfill residence requirements in excess of one academic year (18 credit hours) by registration during summer sessions or by completion of a less-than-full course load (in this context a full course load is considered 9 credit hours per semester).

Students who are employed full-time while completing their degree may fulfill total residence requirements by completion of less-than-full time course loads each semester. In order to be considered for this, the student is required to submit a Petition for Waivers and Exceptions along with verification of his/her employment to the Office of Graduate and Professional Studies. An employee should submit verification of his/her employment to the Office of Graduate and Professional Studies no later than one year after the final examination or within the 10-year time limit, whichever occurs first. Failure to do so will result in the degree not being awarded.

### Continuous Registration

A student in a program leading to a Doctor of Philosophy who has completed all coursework on his/her degree plan other than 691, 5V98 or 5V99 (research) are required to be in continuous registration until all requirements for the degree have been completed. See Continuous Registration Requirements (p. 28).

#### Admission to Candidacy

To be admitted to candidacy for a doctoral degree, a student must have:

1. completed all formal coursework on the degree plan with the exception of any remaining 681, 684, 690 and 691, 5V98 and 5V99, or 791.
2. a 3.0 Graduate GPA and a Degree Plan GPA of at least 3.0 with no grade lower than C in any course on the degree plan,
3. passed the preliminary examination (written and oral portions),
4. submitted an approved dissertation proposal,
5. met the residence requirements. The final examination will not be authorized for any doctoral student who has not been admitted to candidacy.

#### Languages

A student is required to possess a competent command of English. For English language proficiency requirements, see the Admissions section of this catalog. The doctoral (PhD) foreign language requirement at Texas A&M University is a departmental option, to be administered and monitored by the individual departments of academic instruction.

### 99-Hour Cap on Doctoral Degrees

In Texas, public colleges and universities are funded by the state according to the number of students enrolled. In accordance with legislation passed by the Texas Legislature, the number of hours for which state universities may receive subvention funding at the doctoral rate for any individual is limited to 99 hours. Texas A&M University and other universities will not receive subvention for hours in excess of this limit.

Institutions of higher education are allowed to charge the equivalent of nonresident tuition to a resident doctoral student who has enrolled in 100 or more semester credit hours of doctoral coursework.

A doctoral student at Texas A&M has seven years to complete his/her degree before being charged out-of-state tuition. A doctoral student who, after seven years of study, has accumulated 100 or more doctoral hours will be charged tuition at a rate equivalent to out-of-state tuition. Please note that the tuition increases will apply to Texas residents as well as students from other states and countries who currently are charged tuition at the resident rate. This includes those doctoral students who hold GAT, GANT, and GAR appointments of 20 or more hours and
recipients of competitive fellowships who receive more than $1,000 per semester. Doctoral students who, after seven years of study, have not accumulated 100 hours are eligible to pay in-state tuition if otherwise eligible.

For count purposes, a year is counted as three semesters, normally fall, spring and summer. Using this system, a student is allowed 21 semesters as a G8 student to complete the doctoral degree before being penalized with the higher tuition rate. Any semester in which a G8 student is enrolled for a doctoral level course is counted.

The following majors are exempt from the 99-Hour Cap on Doctoral Degrees:

- Biomedical Sciences
- Biochemistry
- Microbiology
- Genetics
- Toxicology
- Nutrition Sciences
- Community Clinical Psychology
- School Psychology
- Veterinary Pathology
- Clinical Psychology
- Counseling Psychology
- Medical Sciences
- Health Services Research
- Health Promotion and Community Health Sciences
- Epidemiology and Environmental Health
- Oral Biology

The hour limit for these majors is 130 doctoral hours

**Application for Degree**

For information on applying for your degree, please visit the Graduation (p. 26) section.

**Master of Science in Physics**

The Master of Science (MS) curriculum is designed to develop new understanding through research and creativity. Students have the option to pursue a thesis or non-thesis Master of Science degree.

**Steps to Fulfill Master’s Degree Requirements**

1. Meet with departmental graduate advisor to plan course of study for first semester. **When:** Before first semester registration. **Approved by:** Graduate advisor or chair of the intercollegiate faculty.

2. Establish advisory committee. Submit a degree plan. **When:** Prior to the deadline imposed by the student’s college and no later than 90 days prior to final oral or thesis defense. **Approved by:** Advisory committee, department head or chair of the intercollegiate faculty, and Office of Graduate and Professional Studies (OGAPS).

3. If thesis is required, submit thesis research proposal and research proposal approval form to the Office of Graduate and Professional Studies. **When:** At least 20 working days prior to the submission of the Request for the Final Examination. **Approved by:** Advisory committee, department head or chair of the intercollegiate faculty, Research Compliance and Biosafety, and OGAPS.

4. Apply for degree²; pay graduation fee. **When:** During the first week of the final semester, see OGAPS calendar.

5. Check to be sure degree program and advisory committee are up-to-date, and coursework is complete. **When:** Well before submitting request to schedule final examination.

6. Complete residence requirement. **When:** If applicable, before or during final semester. **Approved by:** OGAPS.

7. Submit request to schedule final examination. **When:** Must be received by OGAPS at least 10 working days before exam date. See OGAPS calendar for deadlines. **Approved by:** Advisory committee, department head or chair of the intercollegiate faculty, and OGAPS.

8. Successfully complete final examination. **When:** The Report of the Final Examination Form should be submitted to OGAPS within 10 days following the exam. **Approved by:** Advisory committee and OGAPS.
If required, upload one approved final copy of thesis as a single PDF file to etd.tamu.edu and submit the fully signed thesis approval form to the Office of Graduate and Professional Studies.

When: See OGAPS calendar for deadlines. Approved by: Advisory committee, department head or chair of the intercollegiate faculty and OGAPS.

Graduation; arrange for cap and gown. For more information, visit http://graduation.tamu.edu.

The online Document Processing Submission System is located on the website https://ogsdpss.tamu.edu.

Complete the application for degree form via the student’s Howdy portal.

PHYS 601, PHYS 603, PHYS 606, PHYS 607 and PHYS 615 and/or courses in mathematics and research in the field of the thesis will normally comprise the program of a candidate for the degree of Master of Science. A non-thesis option is also offered.

As part of the training of the graduate student pursuing an MS or PhD, the Department of Physics and Astronomy recommends that all students serve as teaching assistants for at least two semesters.

Program Requirements

Program Requirements

- Student’s Advisory Committee (p. 1280)
- Degree Plan (p. 1280)
- Credit Requirements (p. 1281)
- Transfer of Credit (p. 1281)
- Limitations on the Use of Transfer, Extension and Certain Other Courses (p. 1281)
- Thesis Option (p. 1281)
  - Thesis Proposal (p. 1282)
  - Final Examination/Thesis Defense (p. 1282)
- Non-Thesis Option (p. 1282)

Student’s Advisory Committee

After receiving admission to graduate studies and enrolling for coursework, the student will consult with the head of his or her major or administrative department (or intercollegiate faculty, if applicable) concerning appointment of the chair of his or her advisory committee. The student’s advisory committee for the MS degree will consist of no fewer than three members of the graduate faculty, representative of the student’s fields of study and research. The chair or the co-chair of the advisory committee must be from the student’s major department (or intercollegiate faculty, if applicable), and at least one or more of the members must have an appointment to a department other than the student’s major department. The outside member for students in an interdisciplinary program must have an appointment to a department different from the chair of the student’s committee.

The chair, in consultation with the student, will select the remainder of the advisory committee. The student will interview each prospective committee member to determine whether he or she is willing to serve. Only graduate faculty members located on Texas A&M University campuses may serve as chair of a student’s advisory committee. Other graduate faculty members located off campus may serve as a member or co-chair (but not chair) with a member as the chair. The chair of the committee, who usually has immediate supervision of the student’s research and thesis, has the responsibility for calling required meetings of the committee and for calling meetings at any other time considered desirable.

If the chair of a student’s advisory committee voluntarily leaves the University and the student is near completion of the degree and wants the chair to continue to serve in this role, the student is responsible for securing a current member of the University Graduate Faculty, from the student’s academic program and located near the Texas A&M University campus site, to serve as the co-chair of the committee. The Department Head or Chair of Intercollegiate faculty may request in writing to the Associate Provost for Graduate and Professional Studies that a faculty member who is on an approved leave of absence or has voluntarily separated from the university, be allowed to continue to serve in the role of chair of a student’s advisory committee without a co-chair for us to one year. The students should be near completion of the degree. Extensions beyond the one year period can be granted with additional approval of the Dean.

If the chair of the student’s advisory committee is unavailable for an extended time in any academic period during which the student is involved in activities relating to an internship, thesis or professional paper, and is registered for courses such as 684, 691, 692 or 693, the student may request, in writing, that the department head appoint an alternate advisory committee chair during the interim period.

The duties of the committee include responsibility for the proposed degree plan, the research proposal, the thesis and the final examination. In addition, the committee as a group and as individual members are responsible for advising the student on academic matters, and, in the case of academic deficiency, initiating recommendations to the Office of Graduate and Professional Studies.

The committee members’ approval on the degree plan indicate their willingness to accept the responsibility for guiding and directing the entire academic program of the student and for initiating all academic actions concerning the student. Although individual committee members may be replaced by petition for valid reasons, a committee cannot resign en masse.

Degree Plan

The student’s advisory committee, in consultation with the student, will develop the proposed degree plan. The degree plan must be completed and filed with the Office of Graduate and Professional Studies prior to the deadline imposed by the student’s college or interdisciplinary degree program, if applicable, and no later than 90 days prior to the date of the final oral examination or thesis defense.

A student should submit the degree plan using the online Document Processing Submission System (http://ogsdpss.tamu.edu).

A student submitting a proposed degree plan for a Master of Science degree should designate on the official degree plan the appropriate program option.

Additional coursework may be added to the approved degree plan by petition if it is deemed necessary by the advisory committee to correct deficiencies in the student’s academic preparation. No changes can be made to the degree plan once the student’s Request for Final
Examination or Request for Final Examination Exemption is approved by the Office of Graduate and Professional Studies.

Credit Requirement
A minimum of 32 semester credit hours of approved courses and research is required for the thesis option Master of Science degree.
A minimum of 36 semester credit hours of approved coursework is required for the Non-Thesis Option.
Ordinarily the student will devote the major portion of his or her time to work in one or two closely related fields. Other work will be in supporting fields of interest.

Transfer of Credit
A student who has earned 12 hours of graduate credit in residence at Texas A&M University may be authorized to transfer courses in excess of the limits prescribed below upon the advice of the advisory committee and with the approval of the Office of Graduate and Professional Studies. Courses taken in residence at an accredited U.S. institution or approved international institution with a final grade of B or greater may be considered for transfer credit if, at the time the courses were completed, the courses would be accepted for credit toward a similar degree for a student in degree-seeking status at the host institution. Otherwise, the limitations stated in the following section apply. Coursework in which no formal grades are given or in which grades other than letter grades (A or B) are earned (for example, CR, P, S, U, H, etc.) is not accepted for transfer credit. Courses appearing on the degree plan with grades of D, F or U may not be absolved by transfer work. Credit for thesis research or the equivalent is not transferable. Credit for coursework submitted for transfer from any college or university must be shown in semester credit hours or equated to semester credit hours. An official transcript from the university at which the transfer coursework was taken must be sent directly to the Office of Admissions.

Courses used toward a degree at another institution may not be applied for graduate credit. If the course to be transferred was taken prior to the conferral of a degree at the transfer institution, a letter from the registrar at that institution stating that the course was not applied for credit toward the degree must be submitted to the Office of Graduate and Professional Studies.
Grades for courses completed at other institutions are not included in computing the GPR.

Limitations on the Use of Transfer, Extension and Certain Other Courses
Some departments may have more restrictive requirements for transfer work. If otherwise acceptable, certain courses may be used toward meeting credit-hour requirements for the master’s degree under the following limitations.

1. The maximum number of credit hours which may be considered for transfer credit is the greater of 12 hours or one-third (1/3) of the total hours of a degree plan. The following restrictions apply:
   • Graduate and/or upper-level undergraduate courses taken in residence at an accredited U.S. institution, or approved international institution with a final grade of B or greater will be considered for transfer credit if, at the time the courses were completed, the student was in degree-seeking status at Texas A&M University, or the student was in degree-seeking status at the institution at which the courses were taken, and if the courses would be accepted for credit toward a similar degree for a student in degree-seeking status at the host institution.
   • Courses previously used for another degree are not acceptable for degree plan credit.
2. The maximum number of credit hours taken in post-baccalaureate non-degree (G6) classification at Texas A&M University which may be considered for application to the degree plan is 12.
3. A zero credit 684 and 685 course is only allowed for non-thesis master’s students. Other courses, including 691 research hours, are not eligible for zero credit.
4. Not more than 12 hours may be used in any combination of the following categories:
   • Not more than 8 hours in the combination of 691 (research), 684 (Professional Internship) or may be used.
   • Not more than 8 hours of 685 (Directed Studies) may be used.
   • Not more than 3 hours of 690 (Theory of Research) may be used.
   • Not more than 3 hours of 695 (Frontiers in Research) may be used.
5. A maximum of 2 hours of Seminar (681).
6. A maximum of 9 hours of advanced undergraduate courses (300- or 400-level).
7. For graduate courses of three weeks’ duration or less, taken at other institutions, up to 1 hour of credit may be obtained for each five-day week of coursework. Each week of coursework must include at least 15 contact hours.
8. Continuing education courses may not be used for graduate credit.
9. Extension courses are not acceptable for credit.

Exceptions will be permitted only in unusual cases and when petitioned by the student’s advisory committee and approved by the Office of Graduate and Professional Studies.

Thesis Option
An acceptable thesis is required for the Master of Science degree for a student who selects the thesis option program. The finished work must reflect a comprehensive understanding of the pertinent literature and express in clear English, the problem(s) for study, the method, significance and results of the student’s original research. Guidelines for the preparation of the thesis are available in the Thesis Manual, which is available online at the Office of Graduate and Professional Studies website.

After successful defense (or exemption) and approval by the student’s advisory committee and the head of the student’s major department (or chair of the intercollegiate faculty, if appropriate), the student must submit his/her thesis in electronic format as a single PDF file. The PDF file must be uploaded to the Office of Graduate and Professional Studies website. Additionally, a signed paper approval form with original signatures must be received by the Office of Graduate and Professional Studies. The PDF file and the signed approval form are required by the deadline.
Deadline dates for submitting the thesis are announced each semester or summer term in the “Office of Graduate and Professional Studies Calendar” (see Time Limit statement). These dates also can be accessed via the Office of Graduate and Professional Studies website.
Each student who submits a document for review is assessed a one-time thesis/dissertation processing fee through Student Business
A thesis that is deemed unacceptable by the Office of Graduate and Professional Studies because of excessive corrections will be returned to the student’s department head (or chair of the interdisciplinary faculty, if applicable). The manuscript must be resubmitted as a new document, and the entire review process must begin again. All original submittal deadlines must be met during the resubmittal process to graduate that semester.

**Thesis Proposal**

For the thesis option Master of Science degree, the student must prepare a thesis proposal for approval by the advisory committee and the head of the major department or chair of the interdisciplinary faculty, if applicable. This proposal must be submitted to the Office of Graduate and Professional Studies at least 20 working days prior to the submission of the request for the final examination.

Compliance issues must be addressed if a graduate student is performing research involving human subjects, animals, infectious biohazards and recombinant DNA. A student involved in these types of research should check with the Office of Research Compliance and Biosafety at (979) 458-1467 to address questions about all research compliance responsibilities. Additional information can also be obtained on the Office of Research Compliance and Biosafety website.

**Final Examination/Thesis Defense**

A student must pass a final examination by dates announced each semester or summer term in the Office of Graduate and Professional Studies Calendar. To be eligible to take the final examination, a student’s GPR must be at least 3.000 for courses on the degree plan and for all courses completed at Texas A&M which are eligible to be applied to a graduate degree, and there must be no unabsoled grades of D, F or U for any course listed on the degree plan. To absolve a deficient grade, the student must repeat the course at Texas A&M University and achieve a grade of C or better. All coursework on the degree plan must have been completed with the exception of those hours for which the student is registered. For thesis-option students, an approved thesis proposal must be on file in the Office of Graduate and Professional Studies according to published deadlines prior to the final examination or submission of the request for exemption from the final examination.

A request to hold and announce the final examination must be submitted to the Office of Graduate and Professional Studies a minimum of 10 working days in advance of the scheduled date for the examination. The Office of Graduate and Professional Studies must be notified in writing of any cancellations. A student may be given only one opportunity to repeat the final examination for the master’s degree and that must be within a time period that does not extend beyond the end of the next regular semester (summer terms are excluded).

For thesis option students, the final examination covers the thesis and all work taken on the degree plan and at the option of the committee may be written or oral or both. The final examination may not be administered before the thesis is available to all members of the student’s advisory committee in substantially final form, and all members have had adequate time to review the document. The examination is conducted by the student's advisory committee as finally constituted. A thesis option student must be registered in the University in the semester or summer term in which the final examination is taken. Persons other than members of the graduate faculty may, with mutual consent of the candidate and the major professor, attend final examinations for advanced degrees. Upon completion of the questioning of the candidate, all visitors must excuse themselves from the proceedings. A positive vote by all members of the graduate committee with at most one dissension is required to pass a student on his or her exam. A department, or interdisciplinary degree program, may have a stricter requirement provided there is consistency within all degree programs within a department or interdisciplinary degree program.

The Report of the Final Examination Form must be submitted with original signatures of only the committee members approved by the Office of Graduate and Professional Studies. If an approved committee member substitution (1 only) has been made, his/her signature must also be submitted to the Office of Graduate and Professional Studies. If necessary, multiple copies of the form may be submitted with different committee member original signatures. If an approved committee member substitution (1 only) has been made, his/her signature must be included on the form submitted to the Office of Graduate and Professional Studies.

A thesis option candidate may petition to be exempt from his/her final examination provided his/her degree plan GPR is 3.500 or greater and he/she has the approval of the advisory committee, the head of the student’s major department, or interdisciplinary chair, if appropriate, and the Office of Graduate and Professional Studies. It is required that the petition for exemption be submitted the same semester the student intends to submit the thesis.

**Non-Thesis Option**

For non-thesis option students, a final comprehensive examination may be required.

The final exam cannot be held prior to the mid point of the semester if questions on the exam are based on courses in which the student is currently enrolled. If a student has completed all required degree plan coursework, the student is not required to be registered for classes in the semester the final examination is administered (unless he/she holds an assistantship). For specific final examination requirements, a student should check the program requirements for the degree which he/she is pursuing.

Exam results must be submitted with original signatures of only the committee members approved by the Office of Graduate and Professional Studies. If an approved committee member substitution (1 only) has been made, his/her signature must also be submitted to the Office of Graduate and Professional Studies.

A student pursuing the non-thesis option is not allowed to enroll in 691 (research) for any reason and 691 may not be used for credit toward a non-thesis option Master of Science degree. A maximum of 4 credit hours of 684 (Professional Internship), 8 credit hours of 685 (Directed Studies), and up to 3 credit hours of 690 (Theory of Research) or 695 (Frontiers in Research) may be used toward the non-thesis option Master of Science degree. In addition, any combination of 684, 685, 690 and 695 may not exceed 25 percent of the total credit hour requirement shown on the individual degree plan. All requirements for the non-thesis option Master of Science degree other than those specified above are the same as for the thesis option degree.
Additional Requirements

Additional Requirements
- Residence (p. 1283)
- Continuous Registration (p. 1283)
- Time Limit (p. 1283)
- Foreign Languages (p. 1283)
- Application for Degree (p. 1283)

Residence
In partial fulfillment of the residence requirement for the degree of Master of Science, the student must complete 9 resident credit hours during one regular semester or one 10-week summer semester in resident study at Texas A&M University. Upon recommendation of the student’s advisory committee, department head or Chair of the Interdisciplinary Program, if appropriate, and with approval of the Office of Graduate and Professional Studies, a student may be granted exemption from this requirement. Such a petition, however, must be approved prior to the student’s registration for the final 9 credit hours of required coursework.

Students who are employed full-time while completing their degree may fulfill total residence requirements by completion of less-than-full time course loads each semester. In order to be considered for this, the student is required to submit a Petition for Waivers and Exceptions along with verification of his/her employment to the Office of Graduate and Professional Studies.

See Residence Requirements (p. 22).

Continuous Registration
A student in the thesis option of the Master of Science program who has completed all coursework on his/her degree plan other than 5V98, 5V99, and 691 (research) is required to be in continuous registration until all requirements for the degree have been completed. See Continuous Registration Requirements (p. 28).

Time Limit
All degree requirements must be completed within a period of seven consecutive years for the degree to be granted. A course will be considered valid until seven years after the end of the semester in which it is taken. Graduate credit for coursework which is more than seven calendar years old at the time of the final examination (oral or written) may not be used to satisfy degree requirements.

A student who has chosen the thesis option must have the final corrected version of the thesis cleared by the Office of Graduate and Professional Studies no later than one year after the final examination, or approval of a petition for exemption from the final exam, or within the seven-year time limit, whichever occurs first. Failure to do so will result in the degree not being awarded.

Foreign Languages
No specific language requirement exists for the Master of Science degree.

Application for Degree
For information on applying for your degree, please visit the Graduation (p. 26) section.

Doctor of Philosophy in Physics

Work leading to the degree of Doctor of Philosophy (PhD) is designed to give the candidate a thorough and comprehensive knowledge of his or her professional field and training in methods of research. The final basis for granting the degree shall be the candidate’s grasp of the subject matter of a broad field of study and a demonstrated ability to do independent research. In addition, the candidate must have acquired the ability to express thoughts clearly and forcefully in both oral and written languages. The degree is not granted solely for the completion of coursework, residence and technical requirements, although these must be met.

For a student who has completed a master's degree, a DDS/DMD, DVM or MD at a U.S. institution, a minimum of 64 hours is required on the degree plan for the degree of Doctor of Philosophy. For a student who has completed a baccalaureate degree but not a master's degree or a U.S. DDS/DMD, DVM or MD, a minimum of 96 hours is required on the degree plan for the degree of Doctor of Philosophy.

Steps to Fulfill Doctoral Degree Requirements

1. Meet with departmental/intercollegiate graduate advisor to plan course of study for first semester. When: Before first semester registration. Approved by: Graduate advisor.

2. Establish advisory committee. Submit a degree plan. When: Prior to the deadline imposed by the student’s college or intercollegiate programs, and no later than 90 days prior to preliminary examination. Approved by: Advisory committee, department head or intercollegiate faculty chair, and Office of Graduate and Professional Studies (OGAPS).

3. Complete course work detailed on the approved degree plan. Before preliminary exam.

Note: Once formal coursework is complete, you must be continuously registered until all degree requirements have been met. This includes submission and clearance of the dissertation or record of study. See Continuous Registration Requirements (p. 28).

PHYS 601, PHYS 603, PHYS 606, PHYS 607, PHYS 615, PHYS 611 and PHYS 624, and two graduate courses chosen from three distribution electives: high energy/nuclear, atomic and molecular optics/condensed matter and/or astronomy are required for the degree of Doctor of Philosophy. More advanced courses in a number of specialized fields are available for candidates for the PhD degree.

As part of the training of the graduate student pursuing an MS or PhD, the Department of Physics and Astronomy recommends that all students serve as teaching assistants for at least two semesters.

**Program Requirements**

**Program Requirements**

- Student's Advisory Committee (p. 1284)
- Degree Plan (p. 1285)
- Transfer of Credit (p. 1285)
- Research Proposal (p. 1285)
- Examinations (p. 1286)
  - Preliminary Examination (p. 1286)
  - Preliminary Examination Format (p. 1286)
  - Preliminary Examination Scheduling (p. 1286)
  - Report of Preliminary Examination (p. 1286)
  - Retime of Failed Preliminary Examination (p. 1287)
  - Final Examination (p. 1287)
  - Report of Final Examination (p. 1287)
- Dissertation (p. 1287)

**Student’s Advisory Committee**

After receiving admission to graduate studies and enrolling, the student will consult with the head of his or her major or administrative department (or chair of the intercollegiate faculty) concerning appointment of the chair of the advisory committee. The student’s advisory committee will consist of no fewer than four members of the graduate faculty representative of the student’s several fields of study and research, where the chair or co-chair must be from the student’s department (or intercollegiate faculty, if applicable), and at least one or more of the members must have an appointment to a department other than the student’s major department. The outside member for a student in an interdisciplinary degree program must be from a department different from the chair of the student’s committee.

The chair, in consultation with the student, will select the remainder of the advisory committee. Only graduate faculty members located on Texas
A&M University campuses may serve as chair of a student’s advisory committee. Other Texas A&M University graduate faculty members located off-campus may serve as a member or co-chair (but not chair), with a member as the chair.

If the chair of a student’s advisory committee voluntarily leaves the University and the student is near completion of the degree and wants the chair to continue to serve in this role, the student is responsible for securing a current member of the University Graduate Faculty, from the student’s academic program and located near the Texas A&M University campus site, to serve as the co-chair of the committee. The Department Head or Chair of Intercollegiate faculty may request in writing to the Associate Provost for Graduate and Professional Studies that a faculty member who is on an approved leave of absence or has voluntarily separated from the university, be allowed to continue to serve in the role of chair of a student’s advisory committee without a co-chair for up to one year. The students should be near completion of the degree. Extensions beyond the one year period can be granted with additional approval of the Dean.

The committee members’ signatures on the degree plan indicate their willingness to accept the responsibility for guiding and directing the entire academic program of the student and for initiating all academic actions concerning the student. Although individual committee members may be replaced by petition for valid reasons, a committee cannot resign en masse. The chair of the committee, who usually has immediate supervision of the student’s research and dissertation or record of study, has the responsibility for calling all meetings of the committee. The duties of the committee include responsibility for the proposed degree plan, the research proposal, the preliminary examination, the dissertation or record of study and the final examination. In addition, the committee, as a group and as individual members, is responsible for counseling the student on academic matters, and, in the case of academic deficiency, initiating recommendations to the Office of Graduate and Professional Studies.

**Degree Plan**

The student’s advisory committee will evaluate the student’s previous education and degree objectives. The committee, in consultation with the student, will develop a proposed degree plan and outline a research problem which, when completed, as indicated by the dissertation (or its equivalent for the degree of Doctor of Education or the degree of Doctor of Engineering), will constitute the basic requirements for the degree. The degree plan must be filed with the Office of Graduate and Professional Studies prior to the deadline imposed by the student’s college and no later than 90 days prior to the preliminary examination.

This proposed degree plan should be submitted through the online Document Processing Submission System located on the website http://ogdspss.tamu.edu. A minimum of 64 hours is required on the degree plan for the Doctor of Philosophy for a student who has completed a master’s degree. A student who has completed a DDS/DDM, DVM or a MD at a U.S. institution is also required to complete a minimum of 64 hours. A student who has completed a baccalaureate degree but not a master’s degree will be required to complete a 96-hour degree plan. Completion of a DDS/DDM, DVM or MD degree at a foreign institution requires completion of a minimum of 96 hours for the Doctor of Philosophy. A field of study may be primarily in one department or in a combination of departments. A degree plan must carry a reasonable amount of 691 (research).

Additional coursework may be added by petition to the approved degree plan by the student’s advisory committee if it is deemed necessary to correct deficiencies in the student’s academic preparation. No changes can be made to the degree plan once the student’s Request for Final Examination is approved by the Office of Graduate and Professional Studies.

Approval to enroll in any professional course (900-level) should be obtained from the head of the department (or Chair of the intercollegiate faculty, if applicable) in which the course will be offered before including such a course on a degree plan.

No credit may be obtained by correspondence study, by extension or for any course of fewer than three weeks duration.

**Transfer of Credit**

Courses for which transfer credits are sought must have been completed with a grade of B or greater and must be approved by the student’s advisory committee and the Office of Graduate and Professional Studies. These courses must not have been used previously for another degree. Except for officially approved cooperative doctoral programs, credit for thesis or dissertation research or the equivalent is not transferable. Credit for “internship” coursework in any form is not transferable. Courses taken in residence at an accredited U.S. institution or approved international institution with a final grade of B or greater will be considered for transfer credit if, at the time the courses were completed, the courses would be accepted for credit toward a similar degree for a student in degree-seeking status at the host institution. Credit for coursework taken by extension is not transferable. Coursework in which no formal grades are given or in which grades other than letter grades (A or B) are earned (for example, CR, P, S, U, H, etc.) is not accepted for transfer credit. Credit for coursework submitted for transfer from any college or university must be shown in semester credit hours, or equated to semester credit hours.

Courses used toward a degree at another institution may not be applied for graduate credit. If the course to be transferred was taken prior to the conferral of a degree at the transfer institution, a letter from the registrar at that institution stating that the course was not applied for credit toward the degree must be submitted to the Office of Graduate and Professional Studies.

Grades for courses completed at other institutions are not included in computing the GPR. An official transcript from the university at which transfer courses are taken must be sent directly to the Office of Admissions.

**Research Proposal**

The general field of research to be used for the dissertation should be agreed on by the student and the advisory committee at their first meeting, as a basis for selecting the proper courses to support the proposed research.

As soon thereafter as the research project can be outlined in reasonable detail, the dissertation research proposal should be completed. The research proposal should be approved at a meeting of the student’s advisory committee, at which time the feasibility of the proposed research and the adequacy of available facilities should be reviewed. The approved proposal, signed by all members of the student’s advisory committee, the head of the student’s major department (or chair of the intercollegiate faculty, if applicable), must be submitted to the Office of Graduate and Professional Studies at least 20 working days prior to the submission of the Request for the Final Examination.
Compliance issues must be addressed if a graduate student is performing research involving human subjects, animals, infectious biohazards and recombinant DNA. A student involved in these types of research should check with the Office of Research Compliance and Biosafety at (979) 458-1467 to address questions about all research compliance responsibilities. Additional information can also be obtained on the website http://rcb.tamu.edu.

Examinations

Preliminary Examination for Doctoral Students

The student's major department (or chair of the interdisciplinary degree program faculty, if applicable) and his or her advisory committee may require qualifying, cumulative or other types of examinations at any time deemed desirable. These examinations are entirely at the discretion of the department and the student's advisory committee.

The preliminary examination is required. The preliminary examination for a doctoral student shall be given no earlier than a date at which the student is within 6 credit hours of completion of the formal coursework on the degree plan (i.e., all coursework on the degree plan except 681, 684, 690, 691, 692, 693, 695, 697, 791, or other graduate courses specifically designated as S/U in the course catalog). The student should complete the Preliminary Examination no later than the end of the semester following the completion of the formal coursework on the degree plan.

Preliminary Examination Format

The objective of preliminary examination is to evaluate whether the student has demonstrated the following qualifications:

a. a mastery of the subject matter of all fields in the program;

b. an adequate knowledge of the literature in these fields and an ability to carry out bibliographical research;

c. an understanding of the research problem and the appropriate methodological approaches.

The format of the preliminary examination shall be determined by the student's department (or interdisciplinary degree program, if applicable) and advisory committee, and communicated to the student in advance of the examination. The exam may consist of a written component, oral component, or combination of written and oral components.

The preliminary exam may be administered by the advisory committee or a departmental committee; herein referred to as the examination committee.

Regardless of exam format, a student will receive an overall preliminary exam result of pass or fail. The department (or interdisciplinary degree program, if applicable) will determine how the overall pass or fail result is determined based on the exam structure and internal department procedures. If the exam is administered by the advisory committee, each advisory committee member will provide a pass or fail evaluation decision.

Only one advisory committee substitution is allowed to provide an evaluation decision for a student's preliminary exam, and it cannot be the committee chair.

If a student is required to take, as a part of the preliminary examination, a written component administered by a department or interdisciplinary degree program, the department or interdisciplinary degree program faculty must:

a. offer the examination at least once every six months. The departmental or interdisciplinary degree program examination should be announced at least 30 days prior to the scheduled examination date.

b. assume the responsibility for marking the examination satisfactory or unsatisfactory, or otherwise graded, and in the case of unsatisfactory, stating specifically the reasons for such a mark.

c. forward the marked examination to the chair of the student's advisory committee within one week after the examination.

Preliminary Examination Scheduling

Prior to commencing any component of the preliminary examination, a departmental representative or the advisory committee chair will review the eligibility criteria with the student, using the Preliminary Examination Checklist to ensure the student is eligible for the preliminary examination. The following list of eligibility requirements applies.

• Student is registered at Texas A&M University for a minimum of one semester credit hour in the long semester or summer term during which any component of the preliminary examination is held. If the entire examination is held between semesters, then the student must be registered for the term immediately preceding the examination.

• An approved degree plan is on file with the Office of Graduate and Professional Studies prior to commencing the first component of the examination.

• Student's cumulative GPR is at least 3.000.

• Student's degree plan GPR is at least 3.000.

• All English language proficiency requirements are satisfied.

• At the end of the semester in which at least the first component of the exam is given, there are no more than 6 hours of coursework remaining on the degree plan (except 681, 684, 690, 691, 692, 693, 695, 697, 791, or other graduate courses specifically designated as S/U in the course catalog). The head of the student's department (or Chair of the Interdisciplinary Degree Program, if applicable) has the authority to approve a waiver of this criterion.

Report of Preliminary Examination

Credit for the preliminary examination is not transferable in cases where a student changes degree programs after passing a preliminary exam.

If a written component precedes an oral component of the preliminary exam, the chair of the student's examination committee is responsible for making all written examinations available to all members of the committee. A positive evaluation of the preliminary exam by all members of a student's examination committee with at most one dissension is required to pass a student on his or her preliminary exam.

The student's department will promptly report the results of the Preliminary Examination to the Office of Graduate and Professional Studies via the Report of Doctoral Preliminary Examination form. The Preliminary Examination checklist form must also be submitted. These forms should be submitted to the Office of Graduate and Professional Studies within 10 working days of completion of the preliminary examination.
The Report of the Preliminary Examination form must be submitted with original signatures of the approved examination committee members. If an approved examination committee member substitution (one only) has been made, that signature must also be included, in place of the committee member, on the form submitted to the Office of Graduate and Professional Studies. The original signature of the department head is also required on the form.

After passing the required preliminary examination for the doctoral degree, the student must complete the final examination for the degree within four calendar years. Otherwise, the student will be required to repeat the preliminary examination.

Retake of Failed Preliminary Examination

Upon approval of the student's examination committee, with no more than one member dissenting, and approval of the Office of Graduate and Professional Studies, a student who has failed the preliminary examination may be given one re-examination. Adequate time must be given to permit the student to address the inadequacies emerging from the first preliminary examination. The examination committee must agree upon and communicate in writing to the student, an adequate time-frame from the first examination (normally six months) to retest, as well as a detailed explanation of the inadequacies emerging from the examination. The student and the committee should jointly negotiate a mutually acceptable date for this retest. When providing feedback on inadequacies, the committee should clearly document expected improvements that the student must be able to exhibit in order to retake the exam. The examination committee will document and communicate the time-frame and feedback within 10 working days of the exam that was not passed.

Final Examination for Doctoral Students

The candidate for the doctoral degree must pass a final examination by deadline dates announced in the "Office of Graduate and Professional Studies Calendar" each semester. The doctoral student is allowed only one opportunity to take the final examination.

No unabsolved grades of D, F, or U for any course can be listed on the degree plan. The student must be registered for any remaining hours of 681, 684, 690, 691, 692, 791 or other graduate courses specifically designated as S/U in the course catalog during the semester of the final exam. No student may be given a final exam until they have been admitted to candidacy and their current official cumulative and degree plan GPAs are 3.00 or better.

To be admitted to candidacy for a doctoral degree, a student must have:

1. completed all formal coursework on the degree plan with the exception of any remaining 681, 684, 690 and 691, 692 (Professional Study), or 791 hours,
2. a 3.0 Graduate GPA and a Degree Plan GPA of at least 3.0 with no grade lower than C in any course on the degree plan,
3. passed the preliminary examination,
4. submitted an approved dissertation proposal,
5. met the residence requirements.

The request to hold and announce the final examination must be submitted to the Office of Graduate and Professional Studies a minimum of 10 working days in advance of the scheduled date. Any changes to the degree plan must be approved by the Office of Graduate and Professional Studies prior to the submission of the request for final examination.

The student's advisory committee will conduct this examination. The final examination is not to be administered until the dissertation or record of study is available in substantially final form to the student's advisory committee, and all concerned have had adequate time to review the document. Whereas the final examination may cover the broad field of the candidate's training, it is presumed that the major portion of the time will be devoted to the dissertation and closely allied topics. Persons other than members of the graduate faculty may, with mutual consent of the candidate and the chair of the advisory committee, be invited to attend a final examination for an advanced degree. A positive vote by all members of the graduate committee with at most one dissension is required to pass a student on his or her exam. A department can have a stricter requirement provided there is consistency within all degree programs within a department. Upon completion of the questioning of the candidate, all visitors must excuse themselves from the proceedings.

Report of Final Examination

The student's department will promptly report the results of the Final Examination to the Office of Graduate and Professional Studies via the Report of Doctoral Final Examination form. These forms should be submitted to the Office of Graduate and Professional Studies within 10 working days of completion of the final examination. The Office of Graduate and Professional Studies must be notified in writing of any cancellations.

A positive evaluation of the final exam by all members of a student's advisory committee with at most one dissension is required to pass a student on his or her final exam. The Report of the Final Examination Form must be submitted with original signatures of only the committee members approved by the Office of Graduate and Professional Studies. If necessary, multiple copies of the form may be submitted with different committee member original signatures. If an approved committee member substitution (1 only) has been made, his/her signature must be included on the form submitted to the Office of Graduate and Professional Studies.

Dissertation

The ability to perform independent research must be demonstrated by the dissertation, which must be the original work of the candidate. Whereas acceptance of the dissertation is based primarily on its scholarly merit, it must also exhibit creditable literary workmanship. The format of the dissertation must be acceptable to the Office of Graduate and Professional Studies. Guidelines for the preparation of the dissertation are available in the Thesis Manual, which is available online at http://ogaps.tamu.edu.

After successful defense and approval by the student's advisory committee and the head of the student's major department (or chair of the intercollegiate faculty, if applicable), a student must submit his/her dissertation in electronic format as a single PDF file. The PDF file must be uploaded to the website, http://ogaps.tamu.edu. Additionally, a signed paper approval form with original signatures must be received by the Office of Graduate and Professional Studies. Both the PDF file and the signed approval form are required by the deadline.

Deadline dates for submitting are announced each semester or summer term in the Office of Graduate and Professional Studies Calendar (see
Time Limit statement). These dates also can be accessed via the website http://ogaps.tamu.edu.

Each student who submits a document for review is assessed a one-time thesis/dissertation processing fee through Student Business Services. This processing fee is for the thesis/dissertation services provided. After commencement, dissertations are digitally stored and made available through the Texas A&M Libraries.

A dissertation that is deemed unacceptable by the Office of Graduate and Professional Studies because of excessive corrections will be returned to the student’s department head or chair of the intercollegiate faculty. The manuscript must be resubmitted as a new document, and the entire review process must begin anew. All original submittal deadlines must be met during the resubmittal process in order to graduate.

Additional Requirements

Residence

A student who enters the doctoral degree program with a baccalaureate degree must spend one academic year plus one semester in resident study at Texas A&M University. A student who holds master’s degree when he/she enters doctoral degree program must spend one academic year in resident study. One academic year may include two adjacent regular semesters or one regular semester and one adjacent 10-week summer semester. The third semester is not required to be adjacent to the one year. Enrollment for each semester must be a minimum of 9 credit hours each to satisfy the residence requirement.

To satisfy the residence requirement, the student must complete a minimum of 9 credit hours per semester or 10-week summer semester in resident study at Texas A&M University for the required period. A student who enters a doctoral degree program with a baccalaureate degree may fulfill residence requirements in excess of one academic year (18 credit hours) by registration during summer sessions or by completion of a less-than-full course load (in this context a full course load is considered 9 credit hours per semester).

Students who are employed full-time while completing their degree may fulfill total residence requirements by completion of less-than-full time course loads each semester. In order to be considered for this, the student is required to submit a Petition for Waivers and Exceptions along with verification of his/her employment to the Office of Graduate and Professional Studies. An employee should submit verification of his/her employment at the time he/she submits the degree plan. See Registration. (p. 28)

See Residence Requirements (p. 22).

Time Limit

All requirements for doctoral degrees must be completed within a period of ten consecutive calendar years for the degree to be granted. A course will be considered valid until 10 years after the end of the semester in which it is taken. Graduate credit for coursework more than ten calendar years old at the time of the final oral examination may not be used to satisfy degree requirements.

After passing the required preliminary oral and written examinations for a doctoral degree, the student must complete the final examination within four calendar years. Otherwise, the student will be required to repeat the preliminary examination.

A final corrected version of the dissertation or record of study in electronic format as a single PDF file must be cleared by the Office of Graduate and Professional Studies no later than one year after the final examination or within the 10-year time limit, whichever occurs first. Failure to do so will result in the degree not being awarded.

Continuous Registration

A student in a program leading to a Doctor of Philosophy who has completed all coursework on his/her degree plan other than 691, 5V98 or 5V99 (research) are required to be in continuous registration until all requirements for the degree have been completed. See Continuous Registration Requirements (p. 28).

Admission to Candidacy

To be admitted to candidacy for a doctoral degree, a student must have:

1. completed all formal coursework on the degree plan with the exception of any remaining 681, 684, 690 and 691, 5V98 and 5V99, or 791.
2. a 3.0 Graduate GPA and a Degree Plan GPA of at least 3.0 with no grade lower than C in any course on the degree plan,
3. passed the preliminary examination (written and oral portions),
4. submitted an approved dissertation proposal,
5. met the residence requirements. The final examination will not be authorized for any doctoral student who has not been admitted to candidacy.

Languages

A student is required to possess a competent command of English. For English language proficiency requirements, see the Admissions section of this catalog. The doctoral (PhD) foreign language requirement at Texas A&M University is a departmental option, to be administered and monitored by the individual departments of academic instruction.

99-Hour Cap on Doctoral Degrees

In Texas, public colleges and universities are funded by the state according to the number of students enrolled. In accordance with legislation passed by the Texas Legislature, the number of hours for which state universities may receive subvention funding at the doctoral rate for any individual is limited to 99 hours. Texas A&M University and other universities will not receive subvention for hours in excess of the limit.

Institutions of higher education are allowed to charge the equivalent of nonresident tuition to a resident doctoral student who has enrolled in 100 or more semester credit hours of doctoral coursework.

A doctoral student at Texas A&M has seven years to complete his/her degree before being charged out-of-state tuition. A doctoral student who, after seven years of study, has accumulated 100 or more doctoral
hours will be charged tuition at a rate equivalent to out-of-state tuition. Please note that the tuition increases will apply to Texas residents as well as students from other states and countries who currently are charged tuition at the resident rate. This includes those doctoral students who hold GAT, GANT, and GAR appointments of 20 or more hours and recipients of competitive fellowships who receive more than $1,000 per semester. Doctoral students who, after seven years of study, have not accumulated 100 hours are eligible to pay in-state tuition if otherwise eligible.

For count purposes, a year is counted as three semesters, normally fall, spring and summer. Using this system, a student is allowed 21 semesters as a G8 student to complete the doctoral degree before being penalized with the higher tuition rate. Any semester in which a G8 student is enrolled for a doctoral level course is counted.

The following majors are exempt from the 99-Hour Cap on Doctoral Degrees:

• Biomedical Sciences
• Biochemistry
• Microbiology
• Genetics
• Toxicology
• Nutrition Sciences
• Community Clinical Psychology
• School Psychology
• Veterinary Pathology
• Clinical Psychology
• Counseling Psychology
• Medical Sciences
• Health Services Research
• Health Promotion and Community Health Sciences
• Epidemiology and Environmental Health
• Oral Biology

The hour limit for these majors is 130 doctoral hours

Application for Degree
For information on applying for your degree, please visit the Graduation (p. 26) section.

Department of Statistics
www.stat.tamu.edu

Head: V. Johnson

The Department of Statistics offers a graduate program leading to the degrees of Master of Science or Doctor of Philosophy.

The Department of Statistics has two master’s degree programs, MS in Statistics and MS in Analytics.

Faculty

Akleman, Derya G, Instructional Associate Professor
Statistics
PHD, Texas A&M University, 1996

Bhattacharya, Anirban, Assistant Professor
Statistics
PHD, Duke University, 2012

Carroll, Raymond J, Distinguished Professor

Doctoral
• Doctor of Philosophy in Statistics (p. 1298)

Certificates
• Applied Statistics Certificate (p. 1304)

Master of Science in Analytics

The Master of Science (MS) curriculum is designed to develop new understanding through research and creativity. Students in the Master of Science in Analytics will pursue a non-thesis option.

Steps to Fulfill Master’s Degree Requirements

1. Meet with departmental graduate advisor to plan course of study for first semester. When: Before first semester registration. Approved by: Graduate advisor or chair of the intercollegiate faculty.

2. Establish advisory committee. Submit a degree plan. When: Prior to the deadline imposed by the student’s college and no later than 90 days prior to final oral or thesis defense. Approved by: Advisory committee, department head or chair of the intercollegiate faculty, and Office of Graduate and Professional Studies (OGAPS).

3. If thesis is required, submit thesis proposal to the Office of Graduate and Professional Studies. When: At least 20 working days prior to the submission of the Request for the Final Examination. Approved by: Advisory committee, department head or chair of the intercollegiate faculty and OGAPS.

4. Apply for degree; pay graduation fee. When: During the first week of the final semester, see OGAPS calendar.

5. Check to be sure degree program and advisory committee are up to date and all ELP requirements (if applicable) and coursework are complete. When: Well before submitting request to schedule final examination.
**Program Requirements**

**Program Requirements**

- **Student’s Advisory Committee** (p. 1291)
- **Degree Plan** (p. 1292)
- **Credit Requirements** (p. 1292)
- **Transfer of Credit** (p. 1292)
- **Limitations on the Use of Transfer, Extension and Certain Other Courses** (p. 1292)
- **Thesis Option** (p. 1292)

**Student’s Advisory Committee**  
After receiving admission to graduate studies and enrolling for coursework, the student will consult with the head of his or her major or administrative department (or intercollegiate faculty, if applicable) concerning appointment of the chair of his or her advisory committee. The student’s advisory committee for the MS degree will consist of **no fewer than three members of the graduate faculty**, representative of the student’s fields of study and research. The chair or the co-chair of the advisory committee must be from the student’s major department (or intercollegiate faculty, if applicable), and **at least one or more of the members must have an appointment to a department other than the student’s major department**. The outside member for students in an interdisciplinary program must have an appointment to a department different from the chair of the student’s committee.

The chair, in consultation with the student, will select the remainder of the advisory committee. The student will interview each prospective committee member to determine whether he or she is willing to serve. Only graduate faculty members located on Texas A&M University campuses may serve as chair of a student’s advisory committee. Other graduate faculty members located off-campus may serve as a member or co-chair (but not chair) with a member as the chair. The chair of the committee, who usually has immediate supervision of the student’s research and thesis, has the responsibility for calling required meetings of the committee and for calling meetings at any other time considered desirable.

If the chair of a student’s advisory committee voluntarily leaves the University and the student is near completion of the degree and wants the chair to continue to serve in this role, the student is responsible for securing a current member of the University Graduate Faculty, from the student’s academic program and located near the Texas A&M University campus site, to serve as the co-chair of the committee. The Department Head or Chair of Intercollegiate faculty may request in writing to the Associate Provost for Graduate and Professional Studies that a faculty member who is on an approved leave of absence or has voluntarily separated from the university, be allowed to continue to serve in the role of chair of a student’s advisory committee without a co-chair for us to one year. The students should be near completion of the degree. Extensions beyond the one year period can be granted with additional approval of the Dean.

**Non-Thesis Option** (p. 1292)
actions concerning the student. Although individual committee members may be replaced by petition for valid reasons, a committee cannot resign en masse.

**Degree Plan**

The student’s advisory committee, in consultation with the student, will develop the proposed degree plan. The degree plan must be completed and filed with the Office of Graduate and Professional Studies prior to the deadline imposed by the student's college or interdisciplinary degree program, if applicable, and no later than 90 days prior to the date of the final oral examination or thesis defense.

A student should submit the degree plan using the online Document Processing Submission System (http://ogsdpss.tamu.edu).

A student submitting a proposed degree plan for a Master of Science degree should designate on the official degree plan the appropriate program option.

Additional coursework may be added to the approved degree plan by petition if it is deemed necessary by the advisory committee to correct deficiencies in the student's academic preparation. No changes can be made to the degree plan once the student's Request for Final Examination or Request for Final Examination Exemption is approved by the Office of Graduate and Professional Studies.

**Credit Requirement**

A minimum of 36 semester credit hours of approved coursework is required for the non-thesis option.

Ordinarily the student will devote the major portion of his or her time to work in one or two closely related fields. Other work will be in supporting fields of interest.

**Transfer of Credit**

Due to our cohort model, the MS in Analytics program does not accept transfer of credit or substitutions.

**Limitations on the Use of Transfer, Extension and Certain Other Courses**

Some departments may have more restrictive requirements for transfer work. If otherwise acceptable, certain courses may be used toward meeting credit-hour requirements for the master’s degree under the following limitations.

Courses previously used for another degree are not acceptable for degree plan credit.

Exceptions will be permitted only in unusual cases and when petitioned by the student’s advisory committee and approved by the Office of Graduate and Professional Studies.

**Thesis Option**

Please note that the thesis option does not apply to the MS in Analytics program.

**Final Examination/Thesis Defense**

A student must pass a final examination by dates announced each semester or summer term in the Office of Graduate and Professional Studies Calendar. To be eligible to take the final examination, a student's GPR must be at least 3.000 for courses on the degree plan and for all courses completed at Texas A&M which are eligible to be applied to a graduate degree, and there must be no unabsolved grades of D, F or U for any course listed on the degree plan. To absolve a deficient grade, the student must repeat the course at Texas A&M University and achieve a grade of C or better. All coursework on the degree plan must have been completed with the exception of those hours for which the student is registered. For thesis-option students, an approved thesis proposal must be on file in the Office of Graduate and Professional Studies according to published deadlines prior to the final examination or submission of the request for exemption from the final examination.

A request to hold and announce the final examination must be submitted to the Office of Graduate and Professional Studies a minimum of 10 working days in advance of the scheduled date for the examination. The Office of Graduate and Professional Studies must be notified in writing of any cancellations. A student may be given only one opportunity to repeat the final examination for the master's degree and that must be within a time period that does not extend beyond the end of the next regular semester (summer terms are excluded).

For thesis option students, the final examination covers the thesis and all work taken on the degree plan and at the option of the committee may be written or oral or both. The final examination may not be administered before the thesis is available to all members of the student’s advisory committee in substantially final form, and all members have had adequate time to review the document. The examination is conducted by the student’s advisory committee as finally constituted. A thesis option student must be registered in the University in the semester or summer term in which the final examination is taken. Persons other than members of the graduate faculty may, with mutual consent of the candidate and the major professor, attend final examinations for advanced degrees. Upon completion of the questioning of the candidate, all visitors must excuse themselves from the proceedings. A positive vote by all members of the graduate committee with at most one dissension is required to pass a student on his or her exam. A department, or interdisciplinary degree program, may have a stricter requirement provided there is consistency within all degree programs within a department or interdisciplinary degree program.

The Report of the Final Examination Form must be submitted with original signatures of only the committee members approved by the Office of Graduate and Professional Studies. If an approved committee member substitution (1 only) has been made, his/her signature must also be submitted to the Office of Graduate and Professional Studies. If necessary, multiple copies of the form may be submitted with different committee member original signatures. If an approved committee member substitution (1 only) has been made, his/her signature must be included on the form submitted to the Office of Graduate and Professional Studies.

A thesis option candidate may petition to be exempt from his/her final examination provided his/her degree plan GPR is 3.500 or greater and he/she has the approval of the advisory committee, the head of the student’s major department, or intercollegiate chair, if appropriate, and the Office of Graduate and Professional Studies. It is required that the petition for exemption be submitted the same semester the student intends to submit the thesis.

**Non-Thesis Option**

For non-thesis option students, a final comprehensive examination may be required.
The final exam cannot be held prior to the mid point of the semester if questions on the exam are based on courses in which the student is currently enrolled. If a student has completed all required degree plan coursework, the student is not required to be registered for classes in the semester the final examination is administered (unless he/she holds an assistantship). For specific final examination requirements, a student should check the program requirements for the degree for which he/she is pursuing.

Exam results must be submitted with original signatures of only the committee members approved by the Office of Graduate and Professional Studies. If an approved committee member substitution (1 only) has been made, his/her signature must also be submitted to the Office of Graduate and Professional Studies.

A student pursuing the non-thesis option is not allowed to enroll in 691 (research) for any reason and 691 may not be used for credit toward a non-thesis option Master of Science degree. A maximum of 4 credit hours of 684 (Professional Internship), 8 credit hours of 685 (Directed Studies), and up to 3 credit hours of 690 (Theory of Research) or 695 (Frontiers in Research) may be used toward the non-thesis option Master of Science degree. In addition, any combination of 684, 685, 690 and 695 may not exceed 25 percent of the total credit hour requirement shown on the individual degree plan. All requirements for the non-thesis option Master of Science degree other than those specified above are the same as for the thesis option degree.

### Additional Requirements

#### Residence

In partial fulfillment of the residence requirement for the degree of Master of Science, the student must complete 9 resident credit hours during one regular semester or one 10-week summer semester in resident study at Texas A&M University. Upon recommendation of the student’s advisory committee, department head or Chair of the Interdisciplinary Program, if appropriate, and with approval of the Office of Graduate and Professional Studies, a student may be granted exemption from this requirement. Such a petition, however, must be approved prior to the student’s registration for the final 9 credit hours of required coursework.

Students who are employed full-time while completing their degree may fulfill total residence requirements by completion of less-than-full time course loads each semester. In order to be considered for this, the student is required to submit a Petition for Waivers and Exceptions along with verification of his/her employment to the Office of Graduate and Professional Studies.

See Residence Requirements (p. 22).

### Continuous Registration

A student in the thesis option of the Master of Science program who has completed all coursework on his/her degree plan other than 5V98, 5V99, and 691 (research) is required to be in continuous registration until all requirements for the degree have been completed. See Continuous Registration Requirements (p. 28).

### Time Limit

All degree requirements must be completed within a period of seven consecutive years for the degree to be granted. A course will be considered valid until seven years after the end of the semester in which it is taken. Graduate credit for coursework which is more than seven calendar years old at the time of the final examination (oral or written) may not be used to satisfy degree requirements.

A student who has chosen the thesis option must have the final corrected version of the thesis cleared by the Office of Graduate and Professional Studies no later than one year after the final examination, or approval of a petition for exemption from the final exam, or within the seven-year time limit, whichever occurs first. Failure to do so will result in the degree not being awarded.

### Foreign Languages

No specific language requirement exists for the Master of Science degree.

### Application for Degree

For information on applying for your degree, please visit the Graduation section.

### Master of Science in Statistics

The Master of Science (MS) curriculum is designed to develop new understanding through research and creativity. Students have the option to pursue a thesis or non-thesis Master of Science degree.

### Steps to Fulfill Master's Degree Requirements

**1. Meet with departmental graduate advisor to plan course of study for first semester.**

**When:** Before first semester registration.

**Approved by:** Graduate advisor or chair of the intercollegiate faculty.

**2. Establish advisory committee. Submit a degree plan.**

**When:** Prior to the deadline imposed by the student’s college and no later than 90 days prior to final oral or thesis defense.

**Approved by:** Advisory committee, department head or chair of the intercollegiate faculty, and Office of Graduate and Professional Studies (OGAPS).
3 If thesis is required, submit thesis research proposal and research proposal approval form to the Office of Graduate and Professional Studies. When: At least 20 working days prior to the submission of the Request for the Final Examination.
Approved by: Advisory committee, department head or chair of the intercollegiate faculty, Research Compliance and Biosafety, and OGAPS.

4 Apply for degree; pay graduation fee. When: During the first week of the final semester, see OGAPS calendar.

5 Check to be sure degree program and advisory committee are up-to-date, and coursework is complete. When: Well before submitting request to schedule final examination.

6 Complete residence requirement. When: If applicable, before or during final semester.
Approved by: OGAPS.

7 Submit request to schedule final examination. When: Must be received by OGAPS at least 10 working days before exam date. See OGAPS calendar for deadlines.
Approved by: Advisory committee, department head or chair of the intercollegiate faculty, and OGAPS.

8 Successfully complete final examination. When: The Report of the Final Examination Form should be submitted to OGAPS within 10 days following the exam.
Approved by: Advisory committee and OGAPS.

9 If required, upload one approved final copy of thesis as a single PDF file to etd.tamu.edu and submit the fully signed thesis approval form to the Office of Graduate and Professional Studies. When: See OGAPS calendar for deadlines.
Approved by: Advisory committee, department head or chair of the intercollegiate faculty and OGAPS.

10 Graduation; arrange for cap and gown. For more information, visit http://graduation.tamu.edu.

The online Document Processing Submission System is located on the website https://ogsdpss.tamu.edu.

2 Complete the application for degree form via the student’s Howdy portal.

The Master of Science in Statistics offers two options in its degree programs:

1. the MS (thesis option), which requires the preparation of a thesis and,
2. the MS (non-thesis option), which requires more formal coursework in lieu of the thesis.

Both programs provide a balanced training in statistical methods and statistical theory and are intended to prepare the student to adapt statistical methodologies to practical problems.

Program Requirements

Program Requirements

- Student’s Advisory Committee (p. 1294)
- Degree Plan (p. 1295)
- Credit Requirements (p. 1295)
- Transfer of Credit (p. 1296)
- Limitations on the Use of Transfer, Extension and Certain Other Courses (p. 1295)
- Thesis Option (p. 1296)
  - Thesis Proposal (p. 1296)
  - Final Examination/Thesis Defense (p. 1296)
- Non-Thesis Option (p. 1297)

Student’s Advisory Committee

On-Campus and Distance Education

The requirements for the On-Campus and Distance Education Degree Programs are identical as described below.

After receiving admission to graduate studies and enrolling for coursework, the student will consult with the head of his or her major or administrative department (or intercollegiate faculty, if applicable) concerning appointment of the chair of his or her advisory committee. The student’s advisory committee for the MS degree will consist of no fewer than three members of the graduate faculty, representative of the student’s fields of study and research. The chair or the co-chair of the advisory committee must be from the student’s major department (or intercollegiate faculty, if applicable), and at least one or more of the members must have an appointment to a department other than the student’s major department. The outside member for students in an interdisciplinary program must have an appointment to a department different from the chair of the student’s committee.

The chair, in consultation with the student, will select the remainder of the advisory committee. The student will interview each prospective committee member to determine whether he or she is willing to serve. Only graduate faculty members located on Texas A&M University campuses may serve as chair of a student’s advisory committee. Other graduate faculty members located off campus may serve as a member or co-chair (but not chair) with a member as the chair. The chair of the committee, who usually has immediate supervision of the student’s research and thesis, has the responsibility for calling required meetings of the committee and for calling meetings at any other time considered desirable.
If the chair of a student’s advisory committee voluntarily leaves the University and the student is near completion of the degree and wants the chair to continue to serve in this role, the student is responsible for securing a current member of the University Graduate Faculty, from the student’s academic program and located near the Texas A&M University campus site, to serve as the co-chair of the committee. The Department Head or Chair of Intercollegiate faculty may request in writing to the Associate Provost for Graduate and Professional Studies that a faculty member who is on an approved leave of absence or has voluntarily separated from the university, be allowed to continue to serve in the role of chair of a student’s advisory committee without a co-chair for us to one year. The students should be near completion of the degree. Extensions beyond the one year period can be granted with additional approval of the Dean.

If the chair of the student’s advisory committee is unavailable for an extended time in any academic period during which the student is involved in activities relating to an internship, thesis or professional paper, and is registered for courses such as 684, 691, 692 or 693, the student may request, in writing, that the department head appoint an alternate advisory committee chair during the interim period.

The duties of the committee include responsibility for the proposed degree plan, the research proposal, the thesis and the final examination. In addition, the committee as a group and as individual members are responsible for advising the student on academic matters, and, in the case of academic deficiency, initiating recommendations to the Office of Graduate and Professional Studies.

The committee members’ approval on the degree plan indicate their willingness to accept the responsibility for guiding and directing the entire academic program of the student and for initiating all academic actions concerning the student. Although individual committee members may be replaced by petition for valid reasons, a committee cannot resign en masse.

The distance education modality requires an advisory committee to be comprised by the designated coordinator of the distance education in the Department of Statistics and the Department Head of the Department of Statistics.

**Degree Plan**

**On-Campus and Distance Education**

The requirements for the On-Campus and Distance Education Degree Programs are identical as described below.

The student’s advisory committee, in consultation with the student, will develop the proposed degree plan. The degree plan must be completed and filed with the Office of Graduate and Professional Studies prior to the deadline imposed by the student’s college or interdisciplinary degree program, if applicable, and no later than 90 days prior to the date of the final oral examination or thesis defense.

A student should submit the degree plan using the online Document Processing Submission System (http://ogsdpss.tamu.edu).

A student submitting a proposed degree plan for a Master of Science degree should designate on the official degree plan the appropriate program option.

Additional coursework may be added to the approved degree plan by petition if it is deemed necessary by the advisory committee to correct deficiencies in the student’s academic preparation. No changes can be made to the degree plan once the student’s Request for Final Examination or Request for Final Examination Exemption is approved by the Office of Graduate and Professional Studies.

**Credit Requirement**

**On-Campus and Distance Education**

The requirements for the On-Campus and Distance Education Degree Programs are identical as described below.

A minimum of 32 semester credit hours of approved courses and research is required for the thesis option Master of Science degree.

A minimum of 36 semester credit hours of approved coursework is required for the Non-Thesis Option.

Ordinarily the student will devote the major portion of his or her time to work in one or two closely related fields. Other work will be in supporting fields of interest.

**Transfer of Credit**

**On-Campus and Distance Education**

The requirements for the On-Campus and Distance Education Degree Programs are identical as described below.

A student who has earned 12 hours of graduate credit in residence at Texas A&M University may be authorized to transfer courses in excess of the limits prescribed below upon the advice of the advisory committee and with the approval of the Office of Graduate and Professional Studies. Courses taken in residence at an accredited U.S. institution or approved international institution with a final grade of B or greater may be considered for transfer credit if, at the time the courses were completed, the courses would be accepted for credit toward a similar degree for a student in degree-seeking status at the host institution. Otherwise, the limitations stated in the following section apply. Coursework in which no formal grades are given or in which grades other than letter grades (A or B) are earned (for example, CR, P, S, U, H, etc.) is not accepted for transfer credit. Courses appearing on the degree plan with grades of D, F or U may not be absolved by transfer work. Credit for thesis research or the equivalent is not transferable. Credit for coursework submitted for transfer from any college or university must be shown in semester credit hours or equated to semester credit hours. An official transcript from the university at which the transfer coursework was taken must be sent directly to the Office of Admissions.

Courses used toward a degree at another institution may not be applied for graduate credit. If the course to be transferred was taken prior to the conferral of a degree at the transfer institution, a letter from the registrar at that institution stating that the course was not applied for credit toward the degree must be submitted to the Office of Graduate and Professional Studies.

Grades for courses completed at other institutions are not included in computing the GPR.

**Limitations on the Use of Transfer, Extension and Certain Other Courses**

**On-Campus and Distance Education**

Courses appearing on the degree plan with grades of D, F or U may not be absolved by transfer work. Credit for thesis research or the equivalent is not transferable. Credit for coursework submitted for transfer from any college or university must be shown in semester credit hours or equated to semester credit hours. An official transcript from the university at which the transfer coursework was taken must be sent directly to the Office of Admissions.

Courses used toward a degree at another institution may not be applied for graduate credit. If the course to be transferred was taken prior to the conferral of a degree at the transfer institution, a letter from the registrar at that institution stating that the course was not applied for credit toward the degree must be submitted to the Office of Graduate and Professional Studies.
The requirements for the On-Campus and Distance Education Degree Programs are identical as described below.

Some departments may have more restrictive requirements for transfer work. If otherwise acceptable, certain courses may be used toward meeting credit-hour requirements for the master's degree under the following limitations.

1. The maximum number of credit hours which may be considered for transfer credit is the greater of 12 hours or one-third (1/3) of the total hours of a degree plan. The following restrictions apply:
   - Graduate and/or upper-level undergraduate courses taken in residence at an accredited U.S. institution, or approved international institution with a final grade of B or greater will be considered for transfer credit if, at the time the courses were completed, the student was in degree-seeking status at Texas A&M University, or the student was in degree-seeking status at the institution at which the courses were taken; and if the courses would be accepted for credit toward a similar degree for a student in degree-seeking status at the host institution.
   - Courses previously used for another degree are not acceptable for degree plan credit.

2. The maximum number of credit hours taken in post-baccalaureate non-degree (G6) classification at Texas A&M University which may be considered for application to the degree plan is 12.

3. A zero credit 684 and 685 course is only allowed for non-thesis master's students. Other courses, including 691 research hours, are not eligible for zero credit.

4. Not more than 12 hours may be used in any combination of the following categories:
   - Not more than 8 hours in the combination of 691 (research), 684 (Professional Internship) or may be used.
   - Not more than 8 hours of 685 (Directed Studies) may be used.
   - Not more than 3 hours of 690 (Theory of Research) may be used.
   - Not more than 3 hours of 695 (Frontiers in Research) may be used.

5. A maximum of 2 hours of Seminar (681).

6. A maximum of 9 hours of advanced undergraduate courses (300- or 400-level).

7. For graduate courses of three weeks' duration or less, taken at other institutions, up to 1 hour of credit may be obtained for each five-day week of coursework. Each week of coursework must include at least 15 contact hours.

8. Continuing education courses may not be used for graduate credit.

9. Extension courses are not acceptable for credit.

Exceptions will be permitted only in unusual cases and when petitioned by the student's advisory committee and approved by the Office of Graduate and Professional Studies.

**Thesis Proposal**

**On-Campus and Distance Education**

The requirements for the On-Campus and Distance Education Degree Programs are identical as described below.

For the thesis option Master of Science degree, the student must prepare a thesis proposal for approval by the advisory committee and the head of the major department or chair of the interdisciplinary faculty, if applicable. This proposal must be submitted to the Office of Graduate and Professional Studies at least 20 working days prior to the submission of the request for the final examination.

Compliance issues must be addressed if a graduate student is performing research involving human subjects, animals, infectious biohazards and recombinant DNA. A student involved in these types of research should check with the Office of Research Compliance and Biosafety at (979) 458-1467 to address questions about all research compliance responsibilities. Additional information can also be obtained on the Office of Research Compliance and Biosafety website.

**Final Examination/Thesis Defense**

**On-Campus and Distance Education**

The requirements for the On-Campus and Distance Education Degree Programs are identical as described below.

A student must pass a final examination by dates announced each semester or summer term in the Office of Graduate and Professional Studies.
On-Campus and Distance Education
Non-Thesis Option

submit the thesis. For exemption be submitted the same semester the student intends to

A maximum of 4 credit hours of 684 (Professional Internship), 8 credit hours of 685 (Directed Studies), and up to 3 credit hours of 690 (Theory of Research) or 695 (Frontiers in Research) may be used toward the non-thesis option Master of Science degree. In addition, any combination of 684, 685, 690 and 695 may not exceed 25 percent of the total credit hour requirement shown on the individual degree plan. All requirements for the non-thesis option Master of Science degree other than those specified above are the same as for the thesis option degree.

Additional Requirements

Additional Requirements

• Residence (p. 1297)
• Continuous Registration (p. 1298)
• Time Limit (p. 1298)
• Foreign Languages (p. 1298)
• Application for Degree (p. 1298)

Residence

On-Campus

In partial fulfillment of the residence requirement for the degree of Master of Science, the student must complete 9 resident credit hours during one regular semester or one 10-week summer semester in resident study at Texas A&M University. Upon recommendation of the student's advisory committee, department head or Chair of the Interdisciplinary Program, if appropriate, and with approval of the Office of Graduate and Professional Studies, a student may be granted exemption from this requirement. Such a petition, however, must be approved prior to the student's registration for the final 9 credit hours of required coursework.

Students who are employed full-time while completing their degree may fulfill total residence requirements by completion of less-than-full time course loads each semester. In order to be considered for this, the student is required to submit a Petition for Waivers and Exceptions along with verification of his/her employment to the Office of Graduate and Professional Studies.
Doctor of Philosophy in Statistics

**Distance Education**

The Distance Education modality does not have any residence requirements.

See Residence Requirements (p. 22).

**Continuous Registration**

**On-Campus and Distance Education**

A student in the thesis option of the Master of Science program who has completed all coursework on his/her degree plan other than 5V98, 5V99, and 691 (research) is required to be in continuous registration until all requirements for the degree have been completed. See Continuous Registration Requirements (p. 28).

**Time Limit**

**On-Campus and Distance Education**

All degree requirements must be completed within a period of seven consecutive years for the degree to be granted. A course will be considered valid until seven years after the end of the semester in which it is taken. Graduate credit for coursework which is more than seven calendar years old at the time of the final examination (oral or written) may not be used to satisfy degree requirements.

A student who has chosen the thesis option must have the final corrected version of the thesis cleared by the Office of Graduate and Professional Studies no later than one year after the final examination, or approval of a petition for exemption from the final exam, or within the seven-year time limit, whichever occurs first. Failure to do so will result in the degree not being awarded.

**Foreign Languages**

**On-Campus and Distance Education**

No specific language requirement exists for the Master of Science degree.

**Application for Degree**

**On-Campus and Distance Education**

For information on applying for your degree, please visit the Graduation (p. 26) section.

**Doctor of Philosophy in Statistics**

The aim of the PhD program is to provide comprehensive and balanced training in statistical methods and statistical theory. Particular emphasis will be placed on training students to independently recognize the relevance of statistical methods to the solution of specific problems and to enable them to develop new methods when they are needed. The training will also aim at conveying a sound knowledge of existing statistical theory, including the mathematical facility to develop new results in statistical methodology. At the same time, the program will be kept sufficiently flexible to permit students to develop their specific interests.

The following courses are offered on an irregular basis:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Semester Credit Hours</th>

<tr>
<td>STAT 658</td>
<td>Transportation Statistics</td>
<td>3</td>
</tr>
</tbody>
</table>

Contact the department for specific offerings for any given term.

Work leading to the degree of Doctor of Philosophy (PhD) is designed to give the candidate a thorough and comprehensive knowledge of his or her professional field and training in methods of research. The final basis for granting the degree shall be the candidate's grasp of the subject matter of a broad field of study and a demonstrated ability to do independent research. In addition, the candidate must have acquired the ability to express thoughts clearly and forcefully in both oral and written languages. The degree is not granted solely for the completion of coursework, residence and technical requirements, although these must be met.

For a student who has completed a master's degree, a DDS/DMD, DVM or MD at a U.S. institution, a minimum of 64 hours is required on the degree plan for the degree of Doctor of Philosophy. For a student who has completed a baccalaureate degree but not a master's degree or a U.S. DDS/DMD, DVM or MD, a minimum of 96 hours is required on the degree plan for the degree of Doctor of Philosophy.

**Steps to Fulfill Doctoral Degree Requirements**

1. **Meet with departmental/intercollegiate graduate advisor to plan course of study for first semester.**
   - **When:** Before first semester registration.
   - **Approved by:** Graduate advisor.

2. **Establish advisory committee. Submit a degree plan.**
   - **When:** Prior to the deadline imposed by the student's college or intercollegiate programs, and no later than 90 days prior to preliminary examination.
   - **Approved by:** Advisory committee, department head or intercollegiate faculty chair, and Office of Graduate and Professional Studies (OGAPS).

3. **Complete course work detailed on the approved degree plan.**
   - **Before preliminary exam.**
4 Complete the preliminary examination.  
**When:** See steps for completing the preliminary examination. The student should complete the Preliminary Examination no later than the end of the semester following the completion of the formal coursework on the degree plan.  
**Approved by:** Advisory committee, department head or chair of the intercollegiate faculty, and OGAPS.

5 Submit research proposal for dissertation or record of study and the research proposal approval form to the Office of Graduate and Professional Studies.  
**When:** At least 20 working days prior to the submission of the Request for the Final Examination.  
**Approved by:** Advisory committee, department head or intercollegiate faculty chair, Research Compliance and Biosafety, and OGAPS.

6 Complete residence requirement.  
**When:** Before submitting request to schedule final examination.  
**Approved by:** OGAPS

7 Apply for degree; pay graduation fee.  
**When:** During the first week of the final semester; see OGAPS calendar for deadlines.

8 Submit request for permission to hold and announce final examination.  
**When:** Must be received by OGAPS at least 10 working days before requested exam date. See OGAPS calendar for deadlines.  
**Approved by:** Advisory committee, department head or intercollegiate faculty chair, and OGAPS.

9 Successfully complete final examination.  
**When:** The Report of the Final Examination Form should be submitted to OGAPS within 10 days following the exam.  
**Approved by:** Advisory committee and OGAPS

10 Upload one approved final copy of the dissertation or record of study as a single pdf  
**When:** See OGAPS calendar for deadlines.  
**Approved by:** Advisory committee, department head or intercollegiate faculty chair, and Office of Graduate and Professional Studies.

Note: Once formal coursework is complete, you must be continuously registered until all degree requirements have been met. This includes submission and clearance of the dissertation or record of study. See Continuous Registration Requirements (p. 28).

### Program Requirements

#### Program Requirements

- Student’s Advisory Committee (p. 1299)
- Degree Plan (p. 1300)
- Transfer of Credit (p. 1300)
- Research Proposal (p. 1300)
- Examinations (p. 1301)
  - Preliminary Examination (p. 1301)
  - Preliminary Examination Format (p. 1301)
  - Preliminary Examination Scheduling (p. 1301)
  - Report of Preliminary Examination (p. 1301)
  - Retake of Failed Preliminary Examination (p. 1302)
  - Final Examination (p. 1302)
  - Report of Final Examination (p. 1302)
- Dissertation (p. 1302)

#### Student’s Advisory Committee

After receiving admission to graduate studies and enrolling, the student will consult with the head of his or her major or administrative department (or chair of the intercollegiate faculty) concerning appointment of the chair of the advisory committee. The student’s advisory committee will consist of no fewer than four members of the graduate faculty representative of the student’s several fields of study and research, where the chair or co-chair must be from the student’s department (or intercollegiate faculty, if applicable), and at least one or more of the members must have an appointment to a department other than the student’s major department. The outside member for a student in an interdisciplinary degree program must be from a department different from the chair of the student’s committee.

The chair, in consultation with the student, will select the remainder of the advisory committee. Only graduate faculty members located on Texas A&M University campuses may serve as chair of a student’s advisory committee. Other Texas A&M University graduate faculty members located off-campus may serve as a member or co-chair (but not chair), with a member as the chair.

If the chair of a student's advisory committee voluntarily leaves the University and the student is near completion of the degree and wants the chair to continue to serve in this role, the student is responsible for securing a current member of the University Graduate Faculty, from the student's academic program and located near the Texas A&M University...
campus site, to serve as the co-chair of the committee. The Department Head or Chair of Intercollegiate faculty may request in writing to the Associate Provost for Graduate and Professional Studies that a faculty member who is on an approved leave of absence or has voluntarily separated from the university, be allowed to continue to serve in the role of chair of a student’s advisory committee without a co-chair for up to one year. The students should be near completion of the degree. Extensions beyond the one year period can be granted with additional approval of the Dean.

The committee members’ signatures on the degree plan indicate their willingness to accept the responsibility for guiding and directing the entire academic program of the student and for initiating all academic actions concerning the student. Although individual committee members may be replaced by petition for valid reasons, a committee cannot resign en masse. The chair of the committee, who usually has immediate supervision of the student’s research and dissertation or record of study, has the responsibility for calling all meetings of the committee. The duties of the committee include responsibility for the proposed degree plan, the research proposal, the preliminary examination, the dissertation or record of study and the final examination. In addition, the committee, as a group and as individual members, is responsible for counseling the student on academic matters, and, in the case of academic deficiency, initiating recommendations to the Office of Graduate and Professional Studies.

Degree Plan
The student’s advisory committee will evaluate the student’s previous education and degree objectives. The committee, in consultation with the student, will develop a proposed degree plan and outline a research problem which, when completed, as indicated by the dissertation (or its equivalent for the degree of Doctor of Education or the degree of Doctor of Engineering), will constitute the basic requirements for the degree. The degree plan must be filed with the Office of Graduate and Professional Studies prior to the deadline imposed by the student’s college and no later than 90 days prior to the preliminary examination.

This proposed degree plan should be submitted through the online Document Processing Submission System located on the website http://ogsdpss.tamu.edu. A minimum of 64 hours is required on the degree plan for the Doctor of Philosophy for a student who has completed a master’s degree. A student who has completed a DDS/DMD, DVM or a MD at a U.S. institution is also required to complete a minimum of 64 hours. A student who has completed a baccalaureate degree but not a master’s degree will be required to complete a 96-hour degree plan. Completion of a DDS/DMD, DVM or MD degree at a foreign institution requires completion of a minimum of 96 hours for the Doctor of Philosophy. A field of study may be primarily in one department or in a combination of departments. A degree plan must carry a reasonable amount of 691 (research).

Additional coursework may be added by petition to the approved degree plan by the student’s advisory committee if it is deemed necessary to correct deficiencies in the student’s academic preparation. No changes can be made to the degree plan once the student’s Request for Final Examination is approved by the Office of Graduate and Professional Studies.

Approval to enroll in any professional course (900-level) should be obtained from the head of the department (or Chair of the intercollegiate faculty, if applicable) in which the course will be offered before including such a course on a degree plan.

No credit may be obtained by correspondence study, by extension or for any course of fewer than three weeks duration.

Transfer of Credit
Courses for which transfer credits are sought must have been completed with a grade of B or greater and must be approved by the student’s advisory committee and the Office of Graduate and Professional Studies. These courses must not have been used previously for another degree. Except for officially approved cooperative doctoral programs, credit for thesis or dissertation research or the equivalent is not transferable. Credit for “internship” coursework in any form is not transferable. Courses taken in residence at an accredited U.S. institution or approved international institution with a final grade of B or greater will be considered for transfer credit if, at the time the courses were completed, the courses would be accepted for credit toward a similar degree for a student in degree-seeking status at the host institution. Credit for coursework taken by extension is not transferable. Coursework in which no formal grades are given or in which grades other than letter grades (A or B) are earned (for example, CR, P, S, U, H, etc.) is not accepted for transfer credit. Credit for coursework submitted for transfer from any college or university must be shown in semester credit hours, or equated to semester credit hours.

Courses used toward a degree at another institution may not be applied for graduate credit. If the course to be transferred was taken prior to the conferral of a degree at the transfer institution, a letter from the registrar at that institution stating that the course was not applied for credit toward the degree must be submitted to the Office of Graduate and Professional Studies.

Grades for courses completed at other institutions are not included in computing the GPR. An official transcript from the university at which transfer courses are taken must be sent directly to the Office of Admissions.

Research Proposal
The general field of research to be used for the dissertation should be agreed on by the student and the advisory committee at their first meeting, as a basis for selecting the proper courses to support the proposed research.

As soon thereafter as the research project can be outlined in reasonable detail, the dissertation research proposal should be completed. The research proposal should be approved at a meeting of the student’s advisory committee, at which time the feasibility of the proposed research and the adequacy of available facilities should be reviewed. The approved proposal, signed by all members of the student’s advisory committee, the head of the student’s major department (or chair of the intercollegiate faculty, if applicable), must be submitted to the Office of Graduate and Professional Studies at least 20 working days prior to the submission of the Request for the Final Examination.

Compliance issues must be addressed if a graduate student is performing research involving human subjects, animals, infectious biohazards and recombinant DNA. A student involved in these types of research should check with the Office of Research Compliance and Biosafety at (979) 458-1467 to address questions about all research compliance responsibilities. Additional information can also be obtained on the website http://rcb.tamu.edu.
Examinations

Preliminary Examination for Doctoral Students

The student's major department (or chair of the interdisciplinary degree program faculty, if applicable) and his or her advisory committee may require qualifying, cumulative or other types of examinations at any time deemed desirable. These examinations are entirely at the discretion of the department and the student's advisory committee.

The preliminary examination is required. The preliminary examination for a doctoral student shall be given no earlier than a date at which the student is within 6 credit hours of completion of the formal coursework on the degree plan (i.e., all coursework on the degree plan except 681, 684, 690, 691, 692, 693, 695, 697, 791, or other graduate courses specifically designated as S/U in the course catalog). The student should complete the Preliminary Examination no later than the end of the semester following the completion of the formal coursework on the degree plan.

Preliminary Examination Format

The objective of preliminary examination is to evaluate whether the student has demonstrated the following qualifications:

a. a mastery of the subject matter of all fields in the program;
b. an adequate knowledge of the literature in these fields and an ability to carry out bibliographical research;
c. an understanding of the research problem and the appropriate methodological approaches.

The format of the preliminary examination shall be determined by the student's department (or interdisciplinary degree program, if applicable) and advisory committee, and communicated to the student in advance of the examination. The exam may consist of a written component, oral component, or combination of written and oral components.

The preliminary exam may be administered by the advisory committee or a departmental committee; herein referred to as the examination committee.

Regardless of exam format, a student will receive an overall preliminary exam result of pass or fail. The department (or interdisciplinary degree program, if applicable) will determine how the overall pass or fail result is determined based on the exam structure and internal department procedures. If the exam is administered by the advisory committee, each advisory committee member will provide a pass or fail evaluation decision.

Only one advisory committee substitution is allowed to provide an evaluation decision for a student's preliminary exam, and it cannot be the committee chair.

If a student is required to take, as a part of the preliminary examination, a written component administered by a department or interdisciplinary degree program, the department or interdisciplinary degree program faculty must:

a. offer the examination at least once every six months. The departmental or interdisciplinary degree program examination should be announced at least 30 days prior to the scheduled examination date.

b. assume the responsibility for marking the examination satisfactory or unsatisfactory, or otherwise graded, and in the case of unsatisfactory, stating specifically the reasons for such a mark.

c. forward the marked examination to the chair of the student's advisory committee within one week after the examination.

Preliminary Examination Scheduling

Prior to commencing any component of the preliminary examination, a departmental representative or the advisory committee chair will review the eligibility criteria with the student, using the Preliminary Examination Checklist to ensure the student is eligible for the preliminary examination. The following list of eligibility requirements applies.

- Student is registered at Texas A&M University for a minimum of one semester credit hour in the long semester or summer term during which any component of the preliminary examination is held. If the entire examination is held between semesters, then the student must be registered for the term immediately preceding the examination.
- An approved degree plan is on file with the Office of Graduate and Professional Studies prior to commencing the first component of the examination.
- Student's cumulative GPR is at least 3.000.
- Student's degree plan GPR is at least 3.000.
- All English language proficiency requirements are satisfied.
- At the end of the semester in which at least the first component of the exam is given, there are no more than 6 hours of coursework remaining on the degree plan (except 681, 684, 690, 691, 692, 693, 695, 697, 791, or other graduate courses specifically designated as S/U in the course catalog). The head of the student's department (or Chair of the Interdisciplinary Degree Program, if applicable) has the authority to approve a waiver of this criterion.

Report of Preliminary Examination

Credit for the preliminary examination is not transferable in cases where a student changes degree programs after passing a preliminary exam.

If a written component precedes an oral component of the preliminary exam, the chair of the student’s examination committee is responsible for ensuring that all written examinations are made available to all members of the committee. A positive evaluation of the preliminary exam by all members of a student's examination committee with at most one dissent is required to pass a student on his or her preliminary exam.

The student's department will promptly report the results of the Preliminary Examination to the Office of Graduate and Professional Studies via the Report of Doctoral Preliminary Examination form. The Preliminary Examination checklist form must also be submitted. These forms should be submitted to the Office of Graduate and Professional Studies within 10 working days of completion of the preliminary examination.

The Report of the Preliminary Examination form must be submitted with original signatures of the approved examination committee members. If an approved examination committee member substitution (one only) has been made, that signature must also be included, in place of the committee member, on the form submitted to the Office of Graduate and
Professional Studies. The original signature of the department head is also required on the form.

After passing the required preliminary examination for the doctoral degree, the student must complete the final examination for the degree within four calendar years. Otherwise, the student will be required to repeat the preliminary examination.

**Retake of Failed Preliminary Examination**

Upon approval of the student’s examination committee, with no more than one member dissenting, and approval of the Office of Graduate and Professional Studies, a student who has failed the preliminary examination may be given one re-examination. Adequate time must be given to permit the student to address the inadequacies emerging from the first preliminary examination. The examination committee must agree upon and communicate in writing to the student, an adequate time-frame from the first examination (normally six months) to retest, as well as a detailed explanation of the inadequacies emerging from the examination. The student and the committee should jointly negotiate a mutually acceptable date for this retest. When providing feedback on inadequacies, the committee should clearly document expected improvements that the student must be able to exhibit in order to retake the exam. The examination committee will document and communicate the time-frame and feedback within 10 working days of the exam that was not passed.

**Final Examination for Doctoral Students**

The candidate for the doctoral degree must pass a final examination by deadline dates announced in the “Office of Graduate and Professional Studies Calendar” each semester. The doctoral student is allowed only one opportunity to take the final examination.

No unabsolved grades of D, F, or U for any course can be listed on the degree plan. The student must be registered for any remaining hours of 681, 684, 690, 691, 692, 791 or other graduate courses specifically designated as S/U in the course catalog during the semester of the final exam. No student may be given a final examination until they have been admitted to candidacy and their current official cumulative and degree plan GPAs are 3.00 or better.

To be admitted to candidacy for a doctoral degree, a student must have:

1. completed all formal coursework on the degree plan with the exception of any remaining 681, 684, 690 and 691, 692 (Professional Study), or 791 hours,
2. a 3.0 Graduate GPA and a Degree Plan GPA of at least 3.0 with no grade lower than C in any course on the degree plan,
3. passed the preliminary examination,
4. submitted an approved dissertation proposal,
5. met the residence requirements.

The request to hold and announce the final examination must be submitted to the Office of Graduate and Professional Studies a minimum of 10 working days in advance of the scheduled date. Any changes to the degree plan must be approved by the Office of Graduate and Professional Studies prior to the submission of the request for final examination.

The student’s advisory committee will conduct this examination. The final examination is not to be administered until the dissertation or record of study is available in substantially final form to the student’s advisory committee, and all concerned have had adequate time to review the document. Whereas the final examination may cover the broad field of the candidate’s training, it is presumed that the major portion of the time will be devoted to the dissertation and closely allied topics. Persons other than members of the graduate faculty may, with mutual consent of the candidate and the chair of the advisory committee, be invited to attend a final examination for an advanced degree. A positive vote by all members of the graduate committee with at most one dissenion is required to pass a student on his or her exam. A department can have a stricter requirement provided there is consistency within all degree programs within a department. Upon completion of the questioning of the candidate, all visitors must excuse themselves from the proceedings.

**Report of Final Examination**

The student’s department will promptly report the results of the Final Examination to the Office of Graduate and Professional Studies via the Report of Doctoral Final Examination form. These forms should be submitted to the Office of Graduate and Professional Studies within 10 working days of completion of the final examination. The Office of Graduate and Professional Studies must be notified in writing of any cancellations.

A positive evaluation of the final exam by all members of a student’s advisory committee with at most one dissenion is required to pass a student on his or her final exam. The Report of the Final Examination Form must be submitted with original signatures of only the committee members approved by the Office of Graduate and Professional Studies. If necessary, multiple copies of the form may be submitted with different committee member original signatures. If an approved committee member substitution (1 only) has been made, his/her signature must be included on the form submitted to the Office of Graduate and Professional Studies.

**Dissertation**

The ability to perform independent research must be demonstrated by the dissertation, which must be the original work of the candidate. Whereas acceptance of the dissertation is based primarily on its scholarly merit, it must also exhibit creditable literary workmanship. The format of the dissertation must be acceptable to the Office of Graduate and Professional Studies. Guidelines for the preparation of the dissertation are available in the Thesis Manual, which is available online at http://ogaps.tamu.edu.

After successful defense and approval by the student’s advisory committee and the head of the student’s major department (or chair of the intercollegiate faculty, if applicable), a student must submit his/her dissertation in electronic format as a single PDF file. The PDF file must be uploaded to the website, http://ogaps.tamu.edu. Additionally, a signed paper approval form with original signatures must be received by the Office of Graduate and Professional Studies. Both the PDF file and the signed approval form are required by the deadline.

Deadline dates for submitting are announced each semester or summer term in the Office of Graduate and Professional Studies Calendar (see Time Limit statement). These dates also can be accessed via the website http://ogaps.tamu.edu.

Each student who submits a document for review is assessed a one-time thesis/dissertation processing fee through Student Business Services. This processing fee is for the thesis/dissertation services provided. After
Additional Requirements

Residence
A student who enters the doctoral degree program with a baccalaureate degree must spend one academic year plus one semester in resident study at Texas A&M University. A student who holds master’s degree when he/she enters doctoral degree program must spend one academic year in resident study. One academic year may include two adjacent regular semesters or one regular semester and one adjacent 10-week summer semester. The third semester is not required to be adjacent to the one year. Enrollment for each semester must be a minimum of 9 credit hours each to satisfy the residence requirement.

To satisfy the residence requirement, the student must complete a minimum of 9 credit hours per semester or 10-week summer semester in resident study at Texas A&M University for the required period. A student who enters a doctoral degree program with a baccalaureate degree may fulfill residence requirements in excess of one academic year (18 credit hours) by registration during summer sessions or by completion of a less-than-full course load (in this context a full course load is considered 9 credit hours per semester).

Students who are employed full-time while completing their degree may fulfill total residence requirements by completion of less-than-full time course loads each semester. In order to be considered for this, the student is required to submit a Petition for Waivers and Exceptions along with verification of his/her employment to the Office of Graduate and Professional Studies. An employee should submit verification of his/her employment at the time he/she submits the degree plan. See Registration. (p. 28)

See Residence Requirements (p. 22).

Time Limit
All requirements for doctoral degrees must be completed within a period of ten consecutive calendar years for the degree to be granted. A course will be considered valid until 10 years after the end of the semester in which it is taken. Graduate credit for coursework more than ten calendar years old at the time of the final oral examination may not be used to satisfy degree requirements.

After passing the required preliminary oral and written examinations for a doctoral degree, the student must complete the final examination within four calendar years. Otherwise, the student will be required to repeat the preliminary examination.

A final corrected version of the dissertation or record of study in electronic format as a single PDF file must be cleared by the Office of Graduate and Professional Studies no later than one year after the final examination or within the 10-year time limit, whichever occurs first. Failure to do so will result in the degree not being awarded.

Continuous Registration
A student in a program leading to a Doctor of Philosophy who has completed all coursework on his/her degree plan other than 691, 5V98 or 5V99 (research) are required to be in continuous registration until all requirements for the degree have been completed. See Continuous Registration Requirements (p. 28).

Admission to Candidacy
To be admitted to candidacy for a doctoral degree, a student must have:

1. completed all formal coursework on the degree plan with the exception of any remaining 681, 684, 690 and 691, 5V98 and 5V99, or 791.
2. a 3.0 Graduate GPA and a Degree Plan GPA of at least 3.0 with no grade lower than C in any course on the degree plan,
3. passed the preliminary examination (written and oral portions),
4. submitted an approved dissertation proposal,
5. met the residence requirements. The final examination will not be authorized for any doctoral student who has not been admitted to candidacy.

Languages
A student is required to possess a competent command of English. For English language proficiency requirements, see the Admissions section of this catalog. The doctoral (PhD) foreign language requirement at Texas A&M University is a departmental option, to be administered and monitored by the individual departments of academic instruction.

99-Hour Cap on Doctoral Degrees
In Texas, public colleges and universities are funded by the state according to the number of students enrolled. In accordance with legislation passed by the Texas Legislature, the number of hours for which state universities may receive subvention funding at the doctoral rate for any individual is limited to 99 hours. Texas A&M University and other universities will not receive subvention for hours in excess of the limit.

Institutions of higher education are allowed to charge the equivalent of nonresident tuition to a resident doctoral student who has enrolled in 100 or more semester credit hours of doctoral coursework.

A doctoral student at Texas A&M has seven years to complete his/her degree before being charged out-of-state tuition. A doctoral student who, after seven years of study, has accumulated 100 or more semester credit hours of doctoral coursework.

Please note that the tuition increases will apply to Texas residents as well as students from other states and countries who currently are charged tuition at the resident rate. This includes those doctoral students who hold GAT, GANT, and GAR appointments of 20 or more hours and
recipients of competitive fellowships who receive more than $1,000 per semester. Doctoral students who, after seven years of study, have not accumulated 100 hours are eligible to pay in-state tuition if otherwise eligible.

For count purposes, a year is counted as three semesters, normally fall, spring and summer. Using this system, a student is allowed 21 semesters as a G8 student to complete the doctoral degree before being penalized with the higher tuition rate. Any semester in which a G8 student is enrolled for a doctoral level course is counted.

The following majors are exempt from the 99-Hour Cap on Doctoral Degrees:

- Biomedical Sciences
- Biochemistry
- Microbiology
- Genetics
- Toxicology
- Nutrition Sciences
- Community Clinical Psychology
- School Psychology
- Veterinary Pathology
- Clinical Psychology
- Counseling Psychology
- Medical Sciences
- Health Services Research
- Health Promotion and Community Health Sciences
- Epidemiology and Environmental Health
- Oral Biology

The hour limit for these majors is 130 doctoral hours

**Application for Degree**

For information on applying for your degree, please visit the Graduation (p. 26) section.

**Applied Statistics - Certificate**

The Department of Statistics at Texas A&M University offers a certificate in Applied Statistics. This certificate can be added to your transcript and meets the requirements of the University and the Texas Higher Education Coordinating Board (Chapter 5, §5.48). This certificate is 12 semester credit hours and is designed to meet the needs of students and the workforce. This online program is an integrated extension of the renowned on-campus program in that on-campus and distance students are enrolled in the exact same classes. The students must

1) be admitted to the university, and

2) take 12 semester credit hours from the list of graduate courses.

The specific four courses will be chosen by the student, in consultation with the Director of On-Line Learning, as to best meet the student’s career goals.

Master of Science in Biomedical Sciences

The Biomedical Sciences Graduate Program is an interdepartmental program of study awarding a Master of Science (MS) and Doctor of Philosophy (PhD) through each of the five academic departments (p. 1304) within the College of Veterinary Medicine & Biomedical Sciences. Focusing on cross-disciplinary education in the biomedical sciences and the numerous associated domains of research, the faculty teach and mentor students in fields that have a critical mass of faculty, exceptional productivity, and international recognition. Examples of these areas of strength include:

Biomedical Genomics and Bioinformatics
Clinical and Translational Sciences
Infection, Immunity, and Epidemiology
Physiology and Developmental Biology

There are two MS options available from which a student may choose, the thesis concentration and the non-thesis concentration. The Master of Science in Biomedical Sciences with a Thesis concentration provides an academic and research experience that educates students within the context of cross-disciplinary knowledge and prepares students to excel in a research career in areas as diverse as academia, government, industry, and others. Additionally, a Master of Science in Biomedical Sciences with a Non-Thesis concentration has a curriculum designed for students who wish to gain academic preparation beyond the undergraduate degree before entering a professional program of study or employment in healthcare.

Additional details, including information about the admissions process, can be found at http://vetmed.tamu.edu/graduate.

http://vetmed.tamu.edu/graduate/biomedical-sciences

The Master of Science (MS) curriculum is designed to develop new understanding through research and creativity. Students have the option to pursue a thesis or non-thesis Master of Science degree.

Steps to Fulfill Master’s Degree Requirements

1. Meet with departmental graduate advisor to plan course of study for first semester.
   **When:** Before first semester registration.
   **Approved by:** Graduate advisor or chair of the intercollegiate faculty.

2. Establish advisory committee. Submit a degree plan.¹
   **When:** Prior to the deadline imposed by the student’s college and no later than 90 days prior to final oral or thesis defense.
   **Approved by:** Advisory committee, department head or chair of the intercollegiate faculty, and Office of Graduate and Professional Studies (OGAPS).

3. If thesis is required, submit thesis research proposal and research proposal approval form to the Office of Graduate and Professional Studies.
   **When:** At least 20 working days prior to the submission of the Request for the Final Examination.
   **Approved by:** Advisory committee, department head or chair of the intercollegiate faculty, Research Compliance and Biosafety, and OGAPS.

4. Apply for degree²; pay graduation fee.
   **When:** During the first week of the final semester, see OGAPS calendar.

5. Check to be sure degree program and advisory committee are up-to-date, and coursework is complete.
   **When:** Well before submitting request to schedule final examination.

6. Complete residence requirement.
   **When:** If applicable, before or during final semester.
   **Approved by:** OGAPS.

7. Submit request to schedule final examination.
   **When:** Must be received by OGAPS at least 10 working days before exam date. See OGAPS calendar for deadlines.
   **Approved by:** Advisory committee, department head or chair of the intercollegiate faculty, and OGAPS.
<table>

1. The online Document Processing Submission System is located on the website https://ogsdpss.tamu.edu.
2. Complete the application for degree form via the student’s Howdy portal.

### Program Requirements

**Program Requirements**

- Student’s Advisory Committee (p. 1306)
- Degree Plan (p. 1306)
- Credit Requirements (p. 1307)
- Transfer of Credit (p. 1307)
- Limitations on the Use of Transfer, Extension and Certain Other Courses (p. 1307)
- Thesis Option (p. 1307)
  - Thesis Proposal (p. 1308)
  - Final Examination/Thesis Defense (p. 1308)
- Non-Thesis Option (p. 1308)

### Student’s Advisory Committee

After receiving admission to graduate studies and enrolling for coursework, the student will consult with the head of his or her major or administrative department (or intercollegiate faculty, if applicable) concerning appointment of the chair of his or her advisory committee. The student’s advisory committee for the MS degree will consist of no fewer than three members of the graduate faculty, representative of the student’s fields of study and research. The chair or the co-chair of the advisory committee must be from the student’s major department (or intercollegiate faculty, if applicable), and at least one or more of the members must have an appointment to a department other than the student’s major department. The outside member for students in an interdisciplinary program must have an appointment to a department different from the chair of the student’s committee.

The chair, in consultation with the student, will select the remainder of the advisory committee. The student will interview each prospective committee member to determine whether he or she is willing to serve. Only graduate faculty members located on Texas A&M University campuses may serve as chair of a student’s advisory committee. Other graduate faculty members located off campus may serve as a member or co-chair (but not chair) with a member as the chair. The chair of the committee, who usually has immediate supervision of the student’s research and thesis, has the responsibility for calling required meetings of the committee and for calling meetings at any other time considered desirable.

If the chair of a student’s advisory committee voluntarily leaves the University and the student is near completion of the degree and wants the chair to continue to serve in this role, the student is responsible for securing a current member of the University Graduate Faculty, from the student’s academic program and located near the Texas A&M University campus site, to serve as the co-chair of the committee. The Department Head or Chair of Intercollegiate faculty may request in writing to the Associate Provost for Graduate and Professional Studies that a faculty member who is on an approved leave of absence or has voluntarily separated from the university, be allowed to continue to serve in the role of chair of a student’s advisory committee without a co-chair for us to one year. The students should be near completion of the degree. Extensions beyond the one year period can be granted with additional approval of the Dean.

If the chair of the student’s advisory committee is unavailable for an extended time in any academic period during which the student is involved in activities relating to an internship, thesis or professional paper, and is registered for courses such as 684, 691, 692 or 693, the student may request, in writing, that the department head appoint an alternate advisory committee chair during the interim period.

The duties of the committee include responsibility for the proposed degree plan, the research proposal, the thesis and the final examination. In addition, the committee as a group and as individual members are responsible for advising the student on academic matters, and, in the case of academic deficiency, initiating recommendations to the Office of Graduate and Professional Studies.

The committee members’ approval on the degree plan indicate their willingness to accept the responsibility for guiding and directing the entire academic program of the student and for initiating all academic actions concerning the student. Although individual committee members may be replaced by petition for valid reasons, a committee cannot resign en masse.

### Degree Plan

The student’s advisory committee, in consultation with the student, will develop the proposed degree plan. The degree plan must be completed and filed with the Office of Graduate and Professional Studies prior to the deadline imposed by the student’s college or interdisciplinary degree program, if applicable, and no later than 90 days prior to the date of the final oral examination or thesis defense.

A student should submit the degree plan using the online Document Processing Submission System (http://ogsdpss.tamu.edu).

A student submitting a proposed degree plan for a Master of Science degree should designate on the official degree plan the appropriate program option.

Additional coursework may be added to the approved degree plan by petition if it is deemed necessary by the advisory committee to correct deficiencies in the student’s academic preparation. No changes can be made to the degree plan once the student’s Request for Final
Credit Requirement

A minimum of 32 semester credit hours of approved courses and research is required for the thesis option Master of Science degree.

A minimum of 36 semester credit hours of approved coursework is required for the Non-Thesis Option.

Ordinarily the student will devote the major portion of his or her time to work in one or two closely related fields. Other work will be in supporting fields of interest.

Transfer of Credit

A student who has earned 12 hours of graduate credit in residence at Texas A&M University may be authorized to transfer courses in excess of the limits prescribed below upon the advice of the advisory committee and with the approval of the Office of Graduate and Professional Studies. Courses taken in residence at an accredited U.S. institution or approved international institution with a final grade of B or greater may be considered for transfer credit if, at the time the courses were completed, the courses would be accepted for credit toward a similar degree for a student in degree-seeking status at the host institution. Otherwise, the limitations stated in the following section apply. Coursework in which no formal grades are given or in which grades other than letter grades (A or B) are earned (for example, CR, P, S, U, H, etc.) is not accepted for transfer credit. Courses appearing on the degree plan with grades of D, F or U may not be absolved by transfer work. Credit for thesis research or the equivalent is not transferable. Credit for coursework submitted for transfer from any college or university must be shown in semester credit hours or equated to semester credit hours. An official transcript from the university at which the transfer coursework was taken must be sent directly to the Office of Admissions.

Courses used toward a degree at another institution may not be applied for graduate credit. If the course to be transferred was taken prior to the conferral of a degree at the transfer institution, a letter from the registrar at that institution stating that the course was not applied for credit toward the degree must be submitted to the Office of Graduate and Professional Studies.

Grades for courses completed at other institutions are not included in computing the GPR.

Limitations on the Use of Transfer, Extension and Certain Other Courses

Some departments may have more restrictive requirements for transfer work. If otherwise acceptable, certain courses may be used toward meeting credit-hour requirements for the master’s degree under the following limitations.

1. The maximum number of credit hours which may be considered for transfer credit is the greater of 12 hours or one-third (1/3) of the total hours of a degree plan. The following restrictions apply:
   · Graduate and/or upper-level undergraduate courses taken in residence at an accredited U.S. institution, or approved international institution with a final grade of B or greater will be considered for transfer credit if, at the time the courses were completed, the student was in degree-seeking status at Texas A&M University, or the student was in degree-seeking status at the institution at which the courses were taken; and if the courses would be accepted for credit toward a similar degree for a student in degree-seeking status at the host institution.
   · Courses previously used for another degree are not acceptable for degree plan credit.

2. The maximum number of credit hours taken in post-baccalaureate non-degree (G6) classification at Texas A&M University which may be considered for application to the degree plan is 12.

3. A zero credit 684 and 685 course is only allowed for non-thesis master’s students. Other courses, including 691 research hours, are not eligible for zero credit.

4. Not more than 12 hours may be used in any combination of the following categories:
   · Not more than 8 hours in the combination of 691 (research), 684 (Professional Internship) or may be used.
   · Not more than 8 hours of 685 (Directed Studies) may be used.
   · Not more than 3 hours of 690 (Theory of Research) may be used. 
   · Not more than 3 hours of 695 (Frontiers in Research) may be used.

5. A maximum of 2 hours of Seminar (681).

6. A maximum of 9 hours of advanced undergraduate courses (300- or 400-level).

7. For graduate courses of three weeks’ duration or less, taken at other institutions, up to 1 hour of credit may be obtained for each five-day week of coursework. Each week of coursework must include at least 15 contact hours.

8. Continuing education courses may not be used for graduate credit.

9. Extension courses are not acceptable for credit.

Exceptions will be permitted only in unusual cases and when petitioned by the student’s advisory committee and approved by the Office of Graduate and Professional Studies.

Thesis Option

An acceptable thesis is required for the Master of Science degree for a student who selects the thesis option program. The finished work must reflect a comprehensive understanding of the pertinent literature and express in clear English, the problem(s) for study, the method, significance and results of the student’s original research. Guidelines for the preparation of the thesis are available in the Thesis Manual, which is available online at the Office of Graduate and Professional Studies website.

After successful defense (or exemption) and approval by the student’s advisory committee and the head of the student’s major department (or chair of the intercollegiate faculty, if appropriate), the student must submit his/her thesis in electronic format as a single PDF file. The PDF file must be uploaded to the Office of Graduate and Professional Studies website. Additionally, a signed paper approval form with original signatures must be received by the Office of Graduate and Professional Studies. The PDF file and the signed approval form are required by the deadline.

Deadline dates for submitting the thesis are announced each semester or summer term in the “Office of Graduate and Professional Studies Calendar” (see Time Limit statement). These dates also can be accessed via the Office of Graduate and Professional Studies website.

Each student who submits a document for review is assessed a one-time thesis/dissertation processing fee through Student Business
Services. This processing fee is for the thesis/dissertation services provided. After commencement, theses and dissertations are digitally stored and made available through the Texas A&M Libraries.

A thesis that is deemed unacceptable by the Office of Graduate and Professional Studies because of excessive corrections will be returned to the student’s department head (or chair of the interdisciplinary faculty, if applicable). The manuscript must be resubmitted as a new document, and the entire review process must begin again. All original submittal deadlines must be met during the resubmittal process to graduate that semester.

**Thesis Proposal**

For the thesis option Master of Science degree, the student must prepare a thesis proposal for approval by the advisory committee and the head of the major department or chair of the interdisciplinary faculty, if applicable. This proposal must be submitted to the Office of Graduate and Professional Studies at least 20 working days prior to the submission of the request for the final examination.

Compliance issues must be addressed if a graduate student is performing research involving human subjects, animals, infectious biohazards and recombinant DNA. A student involved in these types of research should check with the Office of Research Compliance and Biosafety at (979) 458-1467 to address questions about all research compliance responsibilities. Additional information can also be obtained on the Office of Research Compliance and Biosafety website.

**Final Examination/Thesis Defense**

A student must pass a final examination by dates announced each semester or summer term in the Office of Graduate and Professional Studies Calendar. To be eligible to take the final examination, a student's GPR must be at least 3.000 for courses on the degree plan and for all courses completed at Texas A&M which are eligible to be applied to a graduate degree, and there must be no unabsolved grades of D, F or U for any course listed on the degree plan. To absolve a deficient grade, the student must repeat the course at Texas A&M University and achieve a grade of C or better. All coursework on the degree plan must have been completed with the exception of those hours for which the student is registered. For thesis-option students, an approved thesis proposal must be on file in the Office of Graduate and Professional Studies according to published deadlines prior to the final examination or submission of the request for exemption from the final examination.

A request to hold and announce the final examination must be submitted to the Office of Graduate and Professional Studies a minimum of 10 working days in advance of the scheduled date for the examination. The Office of Graduate and Professional Studies must be notified in writing of any cancellations. A student may be given only one opportunity to repeat the final examination for the master’s degree and that must be within a time period that does not extend beyond the end of the next regular semester (summer terms are excluded).

For thesis option students, the final examination covers the thesis and all work taken on the degree plan and at the option of the committee may be written or oral or both. The final examination may not be administered before the thesis is available to all members of the student's advisory committee in substantially final form, and all members have had adequate time to review the document. The examination is conducted by the student’s advisory committee as finally constituted. A thesis option student must be registered in the University in the semester or summer term in which the final examination is taken. Persons other than members of the graduate faculty may, with mutual consent of the candidate and the major professor, attend final examinations for advanced degrees. Upon completion of the questioning of the candidate, all visitors must excuse themselves from the proceedings. A positive vote by all members of the graduate committee with at most one dissension is required to pass a student on his or her exam. A department, or interdisciplinary degree program, may have a stricter requirement provided there is consistency within all degree programs within a department or interdisciplinary degree program.

The Report of the Final Examination Form must be submitted with original signatures of only the committee members approved by the Office of Graduate and Professional Studies. If an approved committee member substitution (1 only) has been made, his/her signature must also be submitted to the Office of Graduate and Professional Studies. If necessary, multiple copies of the form may be submitted with different committee member original signatures. If an approved committee member substitution (1 only) has been made, his/her signature must be included on the form submitted to the Office of Graduate and Professional Studies.

A thesis option candidate may petition to be exempt from his/her final examination provided his/her degree plan GPR is 3.500 or greater and he/she has the approval of the advisory committee, the head of the student’s major department, or interdisciplinary chair, if appropriate, and the Office of Graduate and Professional Studies. It is required that the petition for exemption be submitted the same semester the student intends to submit the thesis.

**Non-Thesis Option**

For non-thesis option students, a final comprehensive examination may be required.

The final exam cannot be held prior to the mid point of the semester if questions on the exam are based on courses in which the student is currently enrolled. If a student has completed all required degree plan coursework, the student is not required to be registered for classes in the semester the final examination is administered (unless he/she holds an assistantship). For specific final examination requirements, a student should check the program requirements for the degree which he/she is pursuing.

Exam results must be submitted with original signatures of only the committee members approved by the Office of Graduate and Professional Studies. If an approved committee member substitution (1 only) has been made, his/her signature must also be submitted to the Office of Graduate and Professional Studies.

A student pursuing the non-thesis option is not allowed to enroll in 691 (research) for any reason and 691 may not be used for credit toward a non-thesis option Master of Science degree. A maximum of 4 credit hours of 684 (Professional Internship), 8 credit hours of 685 (Directed Studies), and up to 3 credit hours of 690 (Theory of Research) or 695 (Frontiers in Research) may be used toward the non-thesis option Master of Science degree. In addition, any combination of 684, 685, 690 and 695 may not exceed 25 percent of the total credit hour requirement shown on the individual degree plan. All requirements for the non-thesis option Master of Science degree other than those specified above are the same as for the thesis option degree.
Additional Requirements

Additional Requirements

- Residence (p. 1309)
- Continuous Registration (p. 1309)
- Time Limit (p. 1309)
- Foreign Languages (p. 1309)
- Application for Degree (p. 1309)

Residence

In partial fulfillment of the residence requirement for the degree of Master of Science, the student must complete 9 resident credit hours during one regular semester or one 10-week summer semester in resident study at Texas A&M University. Upon recommendation of the student’s advisory committee, department head or Chair of the Interdisciplinary Program, if appropriate, and with approval of the Office of Graduate and Professional Studies, a student may be granted exemption from this requirement. Such a petition, however, must be approved prior to the student’s registration for the final 9 credit hours of required coursework.

Students who are employed full-time while completing their degree may fulfill total residence requirements by completion of less-than-full time course loads each semester. In order to be considered for this, the student is required to submit a Petition for Waivers and Exceptions along with verification of his/her employment to the Office of Graduate and Professional Studies. See Residence Requirements (p. 22).

Continuous Registration

A student in the thesis option of the Master of Science program who has completed all coursework on his/her degree plan other than 5V98, 5V99, and 691 (research) is required to be in continuous registration until all requirements for the degree have been completed. See Continuous Registration Requirements (p. 28).

Time Limit

All degree requirements must be completed within a period of seven consecutive years for the degree to be granted. A course will be considered valid until seven years after the end of the semester in which it is taken. Graduate credit for coursework which is more than seven calendar years old at the time of the final examination (oral or written) may not be used to satisfy degree requirements.

A student who has chosen the thesis option must have the final corrected version of the thesis cleared by the Office of Graduate and Professional Studies no later than one year after the final examination, or approval of a petition for exemption from the final exam, or within the seven-year time limit, whichever occurs first. Failure to do so will result in the degree not being awarded.

Foreign Languages

No specific language requirement exists for the Master of Science degree.

Application for Degree

For information on applying for your degree, please visit the Graduation (p. 26) section.

Doctor of Philosophy in Biomedical Sciences

The Biomedical Sciences Graduate Program is an interdepartmental program of study awarding a Master of Science (MS) and Doctor of Philosophy (PhD) through each of the five academic departments (p. 1304) within the College of Veterinary Medicine & Biomedical Sciences. Focusing on cross-disciplinary education in the biomedical sciences and the numerous associated domains of research, the faculty teach and mentor students in fields that have a critical mass of faculty, exceptional productivity, and international recognition. Examples of these areas of strength include:

- Biomedical Genomics and Bioinformatics
- Clinical and Translational Sciences
- Infection, Immunity, and Epidemiology
- Physiology and Developmental Biology

A PhD in Biomedical Sciences provides an academic and research experience that educates students within the context of cross-disciplinary knowledge and prepares students to excel in a research career in areas as diverse as academia, government, industry, and others. Additional details, including information about the admissions process, can be found at http://vetmed.tamu.edu/graduate. A set of general characteristics of former students of the PhD program in biomedical sciences can be accessed through the Office of Graduate and Professional Studies (http://ogaps.tamu.edu/Prospective-Students/Programs-and-Degrees/18-Characteristics-of-the-Doctoral-Programs/#0-CollegeofVeterinaryMedicine).

Work leading to the degree of Doctor of Philosophy (PhD) is designed to give the candidate a thorough and comprehensive knowledge of his or her professional field and training in methods of research. The final basis for granting the degree shall be the candidate’s grasp of the subject matter of a broad field of study and a demonstrated ability to do independent research. In addition, the candidate must have acquired the ability to express thoughts clearly and forcefully in both oral and written languages. The degree is not granted solely for the completion of coursework, residence and technical requirements, although these must be met.

For a student who has completed a master’s degree, a DDS/DMD, DVM or MD at a U.S. institution, a minimum of 64 hours is required on the degree plan for the degree of Doctor of Philosophy. For a student who has completed a baccalaureate degree but not a master’s degree or a U.S. DDS/DMD, DVM or MD, a minimum of 96 hours is required on the degree plan for the degree of Doctor of Philosophy.

Steps to Fulfill Doctoral Degree Requirements

1. Meet with departmental/intercollegiate graduate advisor to plan course of study for first semester.

When: Before first semester registration.

Approved by: Graduate advisor.

</table>

Note: Once formal coursework is complete, you must be continuously registered until all degree requirements have been met. This includes submission and clearance of the dissertation or record of study. See Continuous Registration Requirements (p. 28).

**Program Requirements**

**Program Requirements**

- Student's Advisory Committee (p. 1311)
- Degree Plan (p. 1311)
- Transfer of Credit (p. 1311)
- Research Proposal (p. 1312)
- Examinations (p. 1312)
  - Preliminary Examination (p. 1312)
  - Preliminary Examination Format (p. 1312)
  - Preliminary Examination Scheduling (p. 1312)
  - Report of Preliminary Examination (p. 1312)
  - Retake of Failed Preliminary Examination (p. 1313)
  - Final Examination (p. 1313)
  - Report of Final Examination (p. 1313)
- Dissertation (p. 1313)
Student’s Advisory Committee

After receiving admission to graduate studies and enrolling, the student will consult with the head of his or her major or administrative department (or chair of the intercollegiate faculty) concerning appointment of the chair of the advisory committee. The student’s advisory committee will consist of no fewer than four members of the graduate faculty representative of the student’s several fields of study and research, where the chair or co-chair must be from the student’s department (or intercollegiate faculty, if applicable), and at least one or more of the members must have an appointment to a department other than the student’s major department. The outside member for a student in an interdisciplinary degree program must be from a department different from the chair of the student’s committee.

The chair, in consultation with the student, will select the remainder of the advisory committee. Only graduate faculty members located on Texas A&M University campuses may serve as chair of a student’s advisory committee. Other Texas A&M University graduate faculty members located off-campus may serve as a member or co-chair (but not chair), with a member as the chair.

If the chair of a student’s advisory committee voluntarily leaves the University and the student is near completion of the degree and wants the chair to continue to serve in this role, the student is responsible for securing a current member of the University Graduate Faculty, from the student’s academic program and located near the Texas A&M University campus site, to serve as the co-chair of the committee. The Department Head or Chair of Intercollegiate faculty may request in writing to the Associate Provost for Graduate and Professional Studies that a faculty member who is on an approved leave of absence or has voluntarily separated from the university, be allowed to continue to serve in the role of chair of a student’s advisory committee without a co-chair for up to one year. The students should be near completion of the degree. Extensions beyond the one year period can be granted with additional approval of the Dean.

The committee members’ signatures on the degree plan indicate their willingness to accept the responsibility for guiding and directing the entire academic program of the student and for initiating all academic actions concerning the student. Although individual committee members may be replaced by petition for valid reasons, a committee cannot resign en masse. The chair of the committee, who usually has immediate supervision of the student’s research and dissertation or record of study, has the responsibility for calling all meetings of the committee. The duties of the committee include responsibility for the proposed degree plan, the research proposal, the preliminary examination, the dissertation or record of study and the final examination. In addition, the committee, as a group and as individual members, is responsible for counseling the student on academic matters, and, in the case of academic deficiency, initiating recommendations to the Office of Graduate and Professional Studies.

Degree Plan

The student’s advisory committee will evaluate the student’s previous education and degree objectives. The committee, in consultation with the student, will develop a proposed degree plan and outline a research problem which, when completed, as indicated by the dissertation (or its equivalent for the degree of Doctor of Education or the degree of Doctor of Engineering), will constitute the basic requirements for the degree. The degree plan must be filed with the Office of Graduate and Professional Studies prior to the deadline imposed by the student’s college and no later than 90 days prior to the preliminary examination.

This proposed degree plan should be submitted through the online Document Processing Submission System located on the website http://ogdpsss.tamu.edu. A minimum of 64 hours is required on the degree plan for the Doctor of Philosophy for a student who has completed a master’s degree. A student who has completed a DDS/MDM, DVM or a MD at a U.S. institution is also required to complete a minimum of 64 hours. A student who has completed a baccalaureate degree but not a master’s degree will be required to complete a 96-hour degree plan. Completion of a DDS/MDM, DVM or MD degree at a foreign institution requires completion of a minimum of 96 hours for the Doctor of Philosophy. A field of study may be primarily in one department or in a combination of departments. A degree plan must carry a reasonable amount of 691 (research).

Additional coursework may be added by petition to the approved degree plan by the student’s advisory committee if it is deemed necessary to correct deficiencies in the student’s academic preparation. No changes can be made to the degree plan once the student’s Request for Final Examination is approved by the Office of Graduate and Professional Studies.

Approval to enroll in any professional course (900-level) should be obtained from the head of the department (or Chair of the intercollegiate faculty, if applicable) in which the course will be offered before including such a course on a degree plan.

No credit may be obtained by correspondence study, by extension or for any course of fewer than three weeks duration.

Transfer of Credit

Courses for which transfer credits are sought must have been completed with a grade of B or greater and must be approved by the student’s advisory committee and the Office of Graduate and Professional Studies. These courses must not have been used previously for another degree. Except for officially approved cooperative doctoral programs, credit for thesis or dissertation research or the equivalent is not transferable. Credit for “internship” coursework in any form is not transferable. Courses taken in residence at an accredited U.S. institution or approved international institution with a final grade of B or greater will be considered for transfer credit if, at the time the courses were completed, the courses would be accepted for credit toward a similar degree for a student in degree-seeking status at the host institution. Credit for coursework taken by extension is not transferable. Coursework in which no formal grades are given or in which grades other than letter grades (A or B) are earned (for example, CR, P, S, U, H, etc.) is not accepted for transfer credit. Credit for coursework submitted for transfer from any college or university must be shown in semester credit hours, or equated to semester credit hours.

Courses used toward a degree at another institution may not be applied for graduate credit. If the course to be transferred was taken prior to the conferral of a degree at the transfer institution, a letter from the registrar at that institution stating that the course was not applied for credit toward the degree must be submitted to the Office of Graduate and Professional Studies.

Grades for courses completed at other institutions are not included in computing the GPR. An official transcript from the university at which transfer courses are taken must be sent directly to the Office of Admissions.
Research Proposal
The general field of research to be used for the dissertation should be agreed on by the student and the advisory committee at their first meeting, as a basis for selecting the proper courses to support the proposed research.

As soon thereafter as the research project can be outlined in reasonable detail, the dissertation research proposal should be completed. The research proposal should be approved at a meeting of the student’s advisory committee, at which time the feasibility of the proposed research and the adequacy of available facilities should be reviewed. The approved proposal, signed by all members of the student’s advisory committee, the head of the student’s major department (or chair of the intercollegiate faculty, if applicable), must be submitted to the Office of Graduate and Professional Studies at least 20 working days prior to the submission of the Request for the Final Examination.

Compliance issues must be addressed if a graduate student is performing research involving human subjects, animals, infectious biohazards and recombinant DNA. A student involved in these types of research should check with the Office of Research Compliance and Biosafety at (979) 458-1467 to address questions about all research compliance responsibilities. Additional information can also be obtained on the website http://rcb.tamu.edu.

Examinations
Preliminary Examination for Doctoral Students
The student’s major department (or chair of the interdisciplinary degree program, if applicable) and his or her advisory committee may require qualifying, cumulative or other types of examinations at any time deemed desirable. These examinations are entirely at the discretion of the department and the student’s advisory committee.

The preliminary examination is required. The preliminary examination for a doctoral student shall be given no earlier than a date at which the student is within 6 credit hours of completion of the formal coursework on the degree plan (i.e., all coursework on the degree plan except 681, 684, 690, 691, 692, 693, 695, 697, 791, or other graduate courses specifically designated as S/U in the course catalog). The student should complete the Preliminary Examination no later than the end of the semester following the completion of the formal coursework on the degree plan.

Preliminary Examination Format
The objective of preliminary examination is to evaluate whether the student has demonstrated the following qualifications:

a. a mastery of the subject matter of all fields in the program;
b. an adequate knowledge of the literature in these fields and an ability to carry out bibliographical research;
c. an understanding of the research problem and the appropriate methodological approaches.

The format of the preliminary examination shall be determined by the student’s department (or interdisciplinary degree program, if applicable) and advisory committee, and communicated to the student in advance of the examination. The exam may consist of a written component, oral component, or combination of written and oral components.

The preliminary exam may be administered by the advisory committee or a departmental committee; herein referred to as the examination committee.

Regardless of exam format, a student will receive an overall preliminary exam result of pass or fail. The department (or interdisciplinary degree program, if applicable) will determine how the overall pass or fail result is determined based on the exam structure and internal department procedures. If the exam is administered by the advisory committee, each advisory committee member will provide a pass or fail evaluation decision.

Only one advisory committee substitution is allowed to provide an evaluation decision for a student’s preliminary exam, and it cannot be the committee chair.

If a student is required to take, as a part of the preliminary examination, a written component administered by a department or interdisciplinary degree program, the department or interdisciplinary degree program faculty must:

a. offer the examination at least once every six months. The departmental or interdisciplinary degree program examination should be announced at least 30 days prior to the scheduled examination date.

b. assume the responsibility for marking the examination satisfactory or unsatisfactory, or otherwise graded, and in the case of unsatisfactory, stating specifically the reasons for such a mark.

c. forward the marked examination to the chair of the student’s advisory committee within one week after the examination.

Preliminary Examination Scheduling
Prior to commencing any component of the preliminary examination, a departmental representative or the advisory committee chair will review the eligibility criteria with the student, using the Preliminary Examination Checklist to ensure the student is eligible for the preliminary examination. The following list of eligibility requirements applies.

- Student is registered at Texas A&M University for a minimum of one semester credit hour in the long semester or summer term during which any component of the preliminary examination is held. If the entire examination is held between semesters, then the student must be registered for the term immediately preceding the examination.

- An approved degree plan is on file with the Office of Graduate and Professional Studies prior to commencing the first component of the examination.

- Student’s cumulative GPR is at least 3.000.

- Student’s degree plan GPR is at least 3.000.

- All English language proficiency requirements are satisfied.

- At the end of the semester in which at least the first component of the exam is given, there are no more than 6 hours of coursework remaining on the degree plan (except 681, 684, 690, 691, 692, 693, 695, 697, 791, or other graduate courses specifically designated as S/U in the course catalog). The head of the student’s department (or Chair of the Interdisciplinary Degree Program, if applicable) has the authority to approve a waiver of this criterion.

Report of Preliminary Examination
Credit for the preliminary examination is not transferable in cases where a student changes degree programs after passing a preliminary exam.

If a written component precedes an oral component of the preliminary exam, the chair of the student’s examination committee is responsible for making all written examinations available to all members of the committee. A positive evaluation of the preliminary exam by all members of a student’s examination committee with at most one dissension is required to pass a student on his or her preliminary exam.

The student’s department will promptly report the results of the Preliminary Examination to the Office of Graduate and Professional Studies via the Report of Doctoral Preliminary Examination form. The Preliminary Examination checklist form must also be submitted. These forms should be submitted to the Office of Graduate and Professional Studies within 10 working days of completion of the preliminary examination.

The Report of the Preliminary Examination form must be submitted with original signatures of the approved examination committee members. If an approved examination committee member substitution (one only) has been made, that signature must also be included, in place of the committee member, on the form submitted to the Office of Graduate and Professional Studies. The original signature of the department head is also required on the form.

After passing the required preliminary examination for the doctoral degree, the student must complete the final examination for the degree within four calendar years. Otherwise, the student will be required to repeat the preliminary examination.

Retake of Failed Preliminary Examination

Upon approval of the student’s examination committee, with no more than one member dissenting, and approval of the Office of Graduate and Professional Studies, a student who has failed the preliminary examination may be given one re-examination. Adequate time must be given to permit the student to address the inadequacies emerging from the first preliminary examination. The examination committee must agree upon and communicate in writing to the student, an adequate time-frame from the first examination (normally six months) to retest, as well as a detailed explanation of the inadequacies emerging from the examination. The student and the committee should jointly negotiate a mutually acceptable date for this retest. When providing feedback on inadequacies, the committee should clearly document expected improvements that the student must be able to exhibit in order to retake the exam. The examination committee will document and communicate the time-frame and feedback within 10 working days of the exam that was not passed.

Final Examination for Doctoral Students

The candidate for the doctoral degree must pass a final examination by deadline dates announced in the “Office of Graduate and Professional Studies Calendar” each semester. The doctoral student is allowed only one opportunity to take the final examination.

No unabsolved grades of D, F, or U for any course can be listed on the degree plan. The student must be registered for any remaining hours of 681, 684, 690, 691, 692, 791 or other graduate courses specifically designated as S/U in the course catalog during the semester of the final exam. No student may be given a final examination until they have been admitted to candidacy and their current official cumulative and degree plan GPAs are 3.00 or better.

To be admitted to candidacy for a doctoral degree, a student must have:

1. completed all formal coursework on the degree plan with the exception of any remaining 681, 684, 690 and 691, 692 (Professional Study), or 791 hours,
2. a 3.0 Graduate GPA and a Degree Plan GPA of at least 3.0 with no grade lower than C in any course on the degree plan,
3. passed the preliminary examination,
4. submitted an approved dissertation proposal,
5. met the residence requirements.

The request to hold and announce the final examination must be submitted to the Office of Graduate and Professional Studies a minimum of 10 working days in advance of the scheduled date. Any changes to the degree plan must be approved by the Office of Graduate and Professional Studies prior to the submission of the request for final examination.

The student’s advisory committee will conduct this examination. The final examination is not to be administered until the dissertation or record of study is available in substantially final form to the student’s advisory committee, and all concerned have had adequate time to review the document. Whereas the final examination may cover the broad field of the candidate’s training, it is presumed that the major portion of the time will be devoted to the dissertation and closely allied topics. Persons other than members of the graduate faculty may, with mutual consent of the candidate and the chair of the advisory committee, be invited to attend a final examination for an advanced degree. A positive vote by all members of the graduate committee with at most one dissension is required to pass a student on his or her exam. A department can have a stricter requirement provided there is consistency within all degree programs within a department. Upon completion of the questioning of the candidate, all visitors must excuse themselves from the proceedings.

Report of Final Examination

The student’s department will promptly report the results of the Final Examination to the Office of Graduate and Professional Studies via the Report of Doctoral Final Examination form. These forms should be submitted to the Office of Graduate and Professional Studies within 10 working days of completion of the final examination. The Office of Graduate and Professional Studies must be notified in writing of any cancellations.

A positive evaluation of the final exam by all members of a student’s advisory committee with at most one dissension is required to pass a student on his or her final exam. The Report of the Final Examination Form must be submitted with original signatures of only the committee members approved by the Office of Graduate and Professional Studies. If necessary, multiple copies of the form may be submitted with different committee member original signatures. If an approved committee member substitution (1 only) has been made, his/her signature must be included on the form submitted to the Office of Graduate and Professional Studies.

Dissertation

The ability to perform independent research must be demonstrated by the dissertation, which must be the original work of the candidate. Whereas acceptance of the dissertation is based primarily on its scholarly merit, it must also exhibit creditable literary workmanship. The format of the dissertation must be acceptable to the Office of Graduate and

After successful defense and approval by the student’s advisory committee and the head of the student’s major department (or chair of the intercollegiate faculty, if applicable), a student must submit his/her dissertation in electronic format as a single PDF file. The PDF file must be uploaded to the website, http://ogaps.tamu.edu. Additionally, a signed paper approval form with original signatures must be received by the Office of Graduate and Professional Studies. Both the PDF file and the signed approval form are required by the deadline.

Deadline dates for submitting are announced each semester or summer term in the Office of Graduate and Professional Studies Calendar (see Time Limit statement). These dates also can be accessed via the website http://ogaps.tamu.edu.

Each student who submits a document for review is assessed a one-time thesis/dissertation processing fee through Student Business Services. This processing fee is for the thesis/dissertation services provided. After commencement, dissertations are digitally stored and made available through the Texas A&M Libraries.

A dissertation that is deemed unacceptable by the Office of Graduate and Professional Studies because of excessive corrections will be returned to the student’s department head or chair of the intercollegiate faculty. The manuscript must be resubmitted as a new document, and the entire review process must begin anew. All original submittal deadlines must be met during the resubmittal process in order to graduate.

### Additional Requirements

#### Additional Requirements

- Residence (p. 1314)
- Time Limit (p. 1314)
- Continuous Registration (p. 1314)
- Admission to Candidacy (p. 1314)
- Languages (p. 1314)
- 99-Hour Cap on Doctoral Degree (p. 1315)
- Application for Degree (p. 1315)

#### Residence

A student who enters the doctoral degree program with a baccalaureate degree must spend one academic year as a full-time resident student at Texas A&M University. A student who holds master’s degree when he/she enters doctoral degree program must spend one academic year in resident study. One academic year may include two adjacent regular semesters or one regular semester and one adjacent 10-week summer semester. The third semester is not required to be adjacent to the one year. Enrollment for each semester must be a minimum of 9 credit hours to satisfy the residence requirement.

To satisfy the residence requirement, the student must complete a minimum of 9 credit hours per semester or 10-week summer semester in resident study at Texas A&M University for the required period. A student who enters a doctoral degree program with a baccalaureate degree may fulfill residence requirements in excess of one academic year (18 credit hours) by registration during summer sessions or by completion of a less-than-full course load (in this context a full course load is considered 9 credit hours per semester).

Students who are employed full-time while completing their degree may fulfill total residence requirements by completion of less-than-full time course loads each semester. In order to be considered for this, the student is required to submit a Petition for Waivers and Exceptions along with verification of his/her employment to the Office of Graduate and Professional Studies. An employee should submit verification of his/her employment at the time he/she submits the degree plan. See Registration, (p. 28)

See Residence Requirements (p. 22).

### Time Limit

All requirements for doctoral degrees must be completed within a period of ten consecutive calendar years for the degree to be granted. A course will be considered valid until 10 years after the end of the semester in which it is taken. Graduate credit for coursework more than ten calendar years old at the time of the final oral examination may not be used to satisfy degree requirements.

After passing the required preliminary oral and written examinations for a doctoral degree, the student must complete the final examination within four calendar years. Otherwise, the student will be required to repeat the preliminary examination.

A final corrected version of the dissertation or record of study in electronic format as a single PDF file must be cleared by the Office of Graduate and Professional Studies no later than one year after the final examination or within the 10-year time limit, whichever occurs first. Failure to do so will result in the degree not being awarded.

### Continuous Registration

A student in a program leading to a Doctor of Philosophy who has completed all coursework on his/her degree plan other than 691, 5V98 or 5V99 (research) are required to be in continuous registration until all requirements for the degree have been completed. See Continuous Registration Requirements (p. 28).

### Admission to Candidacy

To be admitted to candidacy for a doctoral degree, a student must have:

1. completed all formal coursework on the degree plan with the exception of any remaining 681, 684, 690 and 691, 5V98 and 5V99, or 791.
2. a 3.0 Graduate GPA and a Degree Plan GPA of at least 3.0 with no grade lower than C in any course on the degree plan,
3. passed the preliminary examination (written and oral portions),
4. submitted an approved dissertation proposal,
5. met the residence requirements. The final examination will not be authorized for any doctoral student who has not been admitted to candidacy.

### Languages

A student is required to possess a competent command of English. For English language proficiency requirements, see the Admissions section of this catalog. The doctoral (PhD) foreign language requirement at Texas A&M University is a departmental option, to be administered and monitored by the individual departments of academic instruction.
### 99-Hour Cap on Doctoral Degrees

In Texas, public colleges and universities are funded by the state according to the number of students enrolled. In accordance with legislation passed by the Texas Legislature, the number of hours for which state universities may receive subvention funding at the doctoral rate for any individual is limited to 99 hours. Texas A&M University and other universities will not receive subvention for hours in excess of the limit.

Institutions of higher education are allowed to charge the equivalent of nonresident tuition to a resident doctoral student who has enrolled in 100 or more semester credit hours of doctoral coursework.

A doctoral student at Texas A&M has seven years to complete his/her degree before being charged out-of-state tuition. A doctoral student who, after seven years of study, has accumulated 100 or more doctoral hours will be charged tuition at a rate equivalent to out-of-state tuition. Please note that the tuition increases will apply to Texas residents as well as students from other states and countries who currently are charged tuition at the resident rate. This includes those doctoral students who hold GAT, GANT, and GAR appointments of 20 or more hours and recipients of competitive fellowships who receive more than $1,000 per semester. Doctoral students who, after seven years of study, have not accumulated 100 hours are eligible to pay in-state tuition if otherwise eligible.

For count purposes, a year is counted as three semesters, normally fall, spring and summer. Using this system, a student is allowed 21 semesters as a G8 student to complete the doctoral degree before being penalized with the higher tuition rate. Any semester in which a G8 student is enrolled for a doctoral level course is counted.

The following majors are exempt from the 99-Hour Cap on Doctoral Degrees:

- Biomedical Sciences
- Biochemistry
- Microbiology
- Genetics
- Toxicology
- Nutrition Sciences
- Community Clinical Psychology
- School Psychology
- Veterinary Pathology
- Clinical Psychology
- Counseling Psychology
- Medical Sciences
- Health Services Research
- Health Promotion and Community Health Sciences
- Epidemiology and Environmental Health
- Oral Biology

The hour limit for these majors is 130 doctoral hours

### Application for Degree

For information on applying for your degree, please visit the Graduation (p. 26) section.

---

### Master of Science in Science and Technology Journalism

The Master of Science (MS) curriculum is designed to develop new understanding through research and creativity. Students have the option to pursue a thesis or non-thesis Master of Science degree.

### Steps to Fulfill Master's Degree Requirements

Program Requirements

Student’s Advisory Committee
After receiving admission to graduate studies and enrolling for coursework, the student will consult with the head of his or her major or administrative department (or intercollegiate faculty, if applicable) concerning appointment of the chair of his or her advisory committee. The student’s advisory committee for the MS degree will consist of no fewer than three members of the graduate faculty, representative of the student’s fields of study and research. The chair or the co-chair of the advisory committee must be from the student’s major department (or intercollegiate faculty, if applicable), and at least one or more of the members must have an appointment to a department other than the student’s major department. The outside member for students in an interdisciplinary program must have an appointment to a department different from the chair of the student’s committee.

The chair, in consultation with the student, will select the remainder of the advisory committee. The student will interview each prospective committee member to determine whether he or she is willing to serve. Only graduate faculty members located on Texas A&M University campuses may serve as chair of a student’s advisory committee. Other graduate faculty members located off campus may serve as a member or co-chair (but not chair) with a member as the chair. The chair of the committee, who usually has immediate supervision of the student’s research and thesis, has the responsibility for calling required meetings of the committee and for calling meetings at any other time considered desirable.

If the chair of a student’s advisory committee voluntarily leaves the University and the student is near completion of the degree and wants the chair to continue to serve in this role, the student is responsible for securing a current member of the University Graduate Faculty, from the student’s academic program and located near the Texas A&M University campus site, to serve as the co-chair of the committee. The Department Head or Chair of Intercollegiate faculty may request in writing to the Associate Provost for Graduate and Professional Studies that a faculty member who is on an approved leave of absence or has voluntarily separated from the university, be allowed to continue to serve in the role of chair of a student’s advisory committee without a co-chair for us to one year. The students should be near completion of the degree. Extensions beyond the one year period can be granted with additional approval of the Dean.

If the chair of the student’s advisory committee is unavailable for an extended time in any academic period during which the student is involved in activities relating to an internship, thesis or professional paper, and is registered for courses such as 5V98, 5V99, 684, 691, 692 or 693, the student may request, in writing, that the department head appoint an alternate advisory committee chair during the interim period.

The duties of the committee include responsibility for the proposed degree plan, the research proposal, the thesis and the final examination. In addition, the committee as a group and as individual members are responsible for advising the student on academic matters, and, in the case of academic deficiency, initiating recommendations to the Office of Graduate and Professional Studies.

The committee members’ approval on the degree plan indicate their willingness to accept the responsibility for guiding and directing the entire academic program of the student and for initiating all academic actions concerning the student. Although individual committee members may be replaced by petition for valid reasons, a committee cannot resign en masse.
Degree Plan

The student’s advisory committee, in consultation with the student, will develop the proposed degree plan. The degree plan must be completed and filed with the Office of Graduate and Professional Studies prior to the deadline imposed by the student’s college or interdisciplinary degree program, if applicable, and no later than 90 days prior to the date of the final oral examination or thesis defense.

A student should submit the degree plan using the online Document Processing Submission System (http://ogsdpss.tamu.edu).

A student submitting a proposed degree plan for a Master of Science degree should designate on the official degree plan the appropriate program option.

Additional coursework may be added to the approved degree plan by petition if it is deemed necessary by the advisory committee to correct deficiencies in the student’s academic preparation. No changes can be made to the degree plan once the student’s Request for Final Examination or Request for Final Examination Exemption is approved by the Office of Graduate and Professional Studies.

Credit Requirement

A minimum of 32 semester credit hours of approved courses and research is required for the thesis option Master of Science degree.

A minimum of 36 semester credit hours of approved coursework is required for the Non-Thesis Option.

Ordinarily the student will devote the major portion of his or her time to work in one or two closely related fields. Other work will be in supporting fields of interest.

Transfer of Credit

A student who has earned 12 hours of graduate credit in residence at Texas A&M University may be authorized to transfer courses in excess of the limits prescribed below upon the advice of the advisory committee and with the approval of the Office of Graduate and Professional Studies. Courses taken in residence at an accredited U.S. institution or approved international institution with a final grade of B or greater may be considered for transfer credit if, at the time the courses were completed, the courses would be accepted for credit toward a degree for a student in degree-seeking status at the host institution. Otherwise, the limitations stated in the following section apply. Coursework in which no formal grades are given or in which grades other than letter grades (A or B) are earned (for example, CR, P, S, U, H, etc.) is not accepted for transfer credit. Courses appearing on the degree plan with grades of D, F or U may not be absolved by transfer work. Credit for thesis research or the equivalent is not transferable. Credit for coursework submitted for transfer from any college or university must be shown in semester credit hours or equated to semester credit hours. An official transcript from the university at which the transfer coursework was taken must be sent directly to the Office of Admissions.

Courses used toward a degree at another institution may not be applied for graduate credit. If the course to be transferred was taken prior to the conferral of a degree at the transfer institution, a letter from the registrar at that institution stating that the course was not applied for credit toward the degree must be submitted to the Office of Graduate and Professional Studies.

Grades for courses completed at other institutions are not included in computing the GPR.

Limitations on the Use of Transfer, Extension and Certain Other Courses

Some departments may have more restrictive requirements for transfer work. If otherwise acceptable, certain courses may be used toward meeting credit-hour requirements for the master’s degree under the following limitations.

1. The maximum number of credit hours which may be considered for transfer credit is the greater of 12 hours or one-third (1/3) of the total hours of a degree plan. The following restrictions apply:
   - Graduate and/or upper-level undergraduate courses taken in residence at an accredited U.S. institution, or approved international institution with a final grade of B or greater will be considered for transfer credit if, at the time the courses were completed, the student was in degree-seeking status at Texas A&M University. The student was in degree-seeking status at the institution at which the courses were taken; and if the courses would be accepted for credit toward a similar degree for a student in degree-seeking status at the host institution.
   - Courses previously used for another degree are not acceptable for degree plan credit.

2. The maximum number of credit hours taken in post-baccalaureate non-degree (G6) classification at Texas A&M University which may be considered for application to the degree plan is 12.

3. Not more than 12 hours may be used in any combination of the following categories:
   - Not more than 8 hours in the combination of 5V98, 5V99, and 691 (research), 684 (Professional Internship) or SOPH 680 may be used.
   - Not more than 8 hours of 685 (Directed Studies) may be used.
   - Not more than 3 hours of 690 (Theory of Research) may be used.
   - Not more than 3 hours of 695 (Frontiers in Research) may be used.

4. A maximum of 2 hours of Seminar (681).

5. A maximum of 9 hours of advanced undergraduate courses (300- or 400-level).

6. For graduate courses of three weeks’ duration or less, taken at other institutions, up to 1 hour of credit may be obtained for each five-day week of coursework. Each week of coursework must include at least 15 contact hours.

7. Continuing education courses may not be used for graduate credit.

8. Extension courses are not acceptable for credit.

Exceptions will be permitted only in unusual cases and when petitioned by the student’s advisory committee and approved by the Office of Graduate and Professional Studies.

Thesis Option

An acceptable thesis is required for the Master of Science degree for a student who selects the thesis option program. The finished work must reflect a comprehensive understanding of the pertinent literature and express in clear English, the problem(s) for study, the method, significance and results of the student’s original research. Guidelines for the preparation of the thesis are available in the Thesis Manual.
which is available online at the Office of Graduate and Professional Studies website.

After successful defense (or exemption) and approval by the student’s advisory committee and the head of the student’s major department (or chair of the intercollegiate faculty, if applicable), the student must submit his/her thesis in electronic format as a single PDF file. The PDF file must be uploaded to the Office of Graduate and Professional Studies website. Additionally, a signed paper approval form with original signatures must be received by the Office of Graduate and Professional Studies. The PDF file and the signed approval form are required by the deadline.

Deadline dates for submitting the thesis are announced each semester or summer term in the “Office of Graduate and Professional Studies Calendar” (see Time Limit statement). These dates also can be accessed via the Office of Graduate and Professional Studies website.

Each student who submits a document for review is assessed a one-time thesis/dissertation processing fee through Student Business Services. This processing fee is for the thesis/dissertation services provided. After commencement, theses and dissertations are digitally stored and made available through the Texas A&M Libraries.

A thesis that is deemed unacceptable by the Office of Graduate and Professional Studies because of excessive corrections will be returned to the student’s department head (or chair of the intercollegiate faculty, if applicable). The manuscript must be resubmitted as a new document, and the entire review process must begin again. All original submittal deadlines must be met during the resubmittal process to graduate that semester.

Thesis Proposal

For the thesis option Master of Science degree, the student must prepare a thesis proposal for approval by the advisory committee and the head of the major department or chair of the interdisciplinary faculty, if applicable. This proposal must be submitted to the Office of Graduate and Professional Studies at least 20 working days prior to the submission of the request for the final examination.

Compliance issues must be addressed if a graduate student is performing research involving human subjects, animals, infectious biohazards and recombinant DNA. A student involved in these types of research should check with the Office of Research Compliance and Biosafety at (979) 458-1467 to address questions about all research compliance responsibilities. Additional information can also be obtained on the Office of Research Compliance and Biosafety website.

Final Examination/Thesis Defense

A student must pass a final examination by dates announced each semester or summer term in the Office of Graduate and Professional Studies Calendar. The Office of Graduate and Professional Studies must be notified in writing of any cancellation. To be eligible to take the final examination, a student’s GPR must be at least 3.000 for courses on the degree plan and for all courses completed at Texas A&M which are eligible to be applied to a graduate degree, and there must be no unabsolved grades of D, F or U for any course listed on the degree plan. To absolve a deficient grade, the student must repeat the course at Texas A&M University and achieve a grade of C or better. All coursework on the degree plan must have been completed with the exception of those hours for which the student is registered. Additionally, all English Language Proficiency requirements must be satisfied prior to scheduling the examination. If applicable, an approved thesis proposal must be on file in the Office of Graduate and Professional Studies according to published deadlines.

A request to hold and announce the final examination must be submitted to the Office of Graduate and Professional Studies a minimum of 10 working days in advance of the scheduled date for the examination. Examinations which are not completed and reported as satisfactory to the Office of Graduate and Professional Studies within 10 working days of the scheduled examination date will be recorded as failures. A student may be given only one opportunity to repeat the final examination for the master’s degree and that must be within a time period that does not extend beyond the end of the next regular semester (summer terms are excluded).

For thesis option students, the final examination covers the thesis and all work taken on the degree plan and at the option of the committee may be written or oral or both. The final examination may not be administered before the thesis is available to all members of the student’s advisory committee in substantially final form, and all members have had adequate time to review the document. The examination is conducted by the student’s advisory committee as finally constituted. A thesis option student must be registered in the University in the semester or summer term in which the final examination is taken. Persons other than members of the graduate faculty may, with mutual consent of the candidate and the major professor, attend final examinations for advanced degrees. Upon completion of the questioning of the candidate, all visitors must excuse themselves from the proceedings. A positive vote by all members of the graduate committee with at least one dissent provided his/her degree plan GPR is 3.500 or greater and he/she has the approval of the advisory committee, the head of the student’s major department, or intercollegiate chair, if appropriate, and the Office of Graduate and Professional Studies. It is required that the petition for exemption be submitted the same semester the student intends to submit the thesis.

Non-Thesis Option

For non-thesis option students, a final comprehensive examination may be required.

The final exam cannot be held prior to the mid point of the semester if questions on the exam are based on courses in which the student is currently enrolled. If a student has completed all required degree plan coursework, the student is not required to be registered for classes in the semester the final examination is administered (unless he/she holds an assistantship). For specific final examination requirements, a student should check the program requirements for the degree which he/she is pursuing.

Exam results must be submitted with original signatures of only the committee members approved by the Office of Graduate and Professional Studies. If an approved committee member substitution (1 only) has been made, his/her signature must also be submitted to the Office of Graduate and Professional Studies.

A student pursuing the non-thesis option is not allowed to enroll in 5V98, 5V99, or 691 (research) for any reason and 691 may not be used for credit
toward a non-thesis option Master of Science degree. A maximum of 4 credit hours of 684 (Professional Internship), 8 credit hours of 685 (Directed Studies), and up to 3 credit hours of 690 (Theory of Research) or 695 (Frontiers in Research) may be used toward the non-thesis option Master of Science degree. In addition, any combination of 684, 685, 690 and 695 may not exceed 25 percent of the total credit hour requirement shown on the individual degree plan. All requirements for the non-thesis option Master of Science degree other than those specified above are the same as for the thesis option degree.

Additional Requirements

Additional Requirements
- Residence (p. 1319)
- Continuous Registration (p. 1319)
- Time Limit (p. 1319)
- Foreign Languages (p. 1319)
- Application for Degree (p. 1319)

Residence
In partial fulfillment of the residence requirement for the degree of Master of Science, the student must complete 9 resident credit hours during one regular semester or one 10-week summer semester in resident study at Texas A&M University. Upon recommendation of the student’s advisory committee, department head or Chair of the Interdisciplinary Program, if appropriate, and with approval of the Office of Graduate and Professional Studies, a student may be granted exemption from this requirement. Such a petition, however, must be approved prior to the student’s registration for the final 9 credit hours of required coursework.

Students who are employed full-time while completing their degree may fulfill total residence requirements by completion of less-than-full time course loads each semester. In order to be considered for this, the student is required to submit a Petition for Waivers and Exceptions along with verification of his/her employment to the Office of Graduate and Professional Studies.

See Residence Requirements (p. 22).

Continuous Registration
A student in the thesis option of the Master of Science program who has completed all coursework on his/her degree plan other than 5V98, 5V99, and 691 (research) is required to be in continuous registration until all requirements for the degree have been completed. See Continuous Registration Requirements (p. 28).

Time Limit
All degree requirements must be completed within a period of seven consecutive years for the degree to be granted. A course will be considered valid until seven years after the end of the semester in which it is taken. Graduate credit for coursework which is more than seven calendar years old at the time of the final examination (oral or written) may not be used to satisfy degree requirements.

A student who has chosen the thesis option must have the final corrected version of the thesis cleared by the Office of Graduate and Professional Studies no later than one year after the final examination, or approval of a petition for exemption from the final exam, or within the seven-year time limit, whichever occurs first. Failure to do so will result in the degree not being awarded.

Foreign Languages
No specific language requirement exists for the Master of Science degree.

Application for Degree
For information on applying for your degree, please visit the Graduation section.

Doctor of Veterinary Medicine in Veterinary Medicine

Professional Curriculum in Veterinary Medicine

The professional curriculum seeks to deliver to the veterinary medical profession a student fully prepared to begin a medical career in the arts and sciences of animal health and disease. Emphasis on professional specialization is reserved for graduate programs.

Veterinary medicine encompasses the full scope of the technology of animal health and disease, including the arts and sciences of disease prevention, diagnosis, prognosis and therapy. The professional curriculum begins at the basic level and systematically moves to clinical application.

Graduates are qualified to formulate and implement programs for disease control and prevention in domestic farm animals, poultry, pet animals, zoo animals, fur-bearing animals, laboratory animals and wildlife. They are equipped to administer and advise in public health problems arising from intertransmission of diseases between humans and lower animals and are capable of performing animal disease regulatory duties for governmental agencies. They are also oriented for professional careers in the armed forces.

The degree of Doctor of Veterinary Medicine is awarded to the student upon successful completion of the professional curriculum in veterinary medicine. In addition to the DVM degree, the student must take and pass the NAVLE and state licensing examinations to practice clinical veterinary medicine.

Academic Regulations
Each professional student, upon registering, will receive a copy of the College of Veterinary Medicine and Biomedical Sciences Professional Student Handbook which contains the college’s policies on grading, promotion, dismissal, probation, grievance procedures, withdrawal, personal conduct and the honor code. Because matriculation in veterinary medicine is a privilege and not a right, the faculty retains the prerogative to request withdrawal of any student who does not attain adequate academic performance or who does not exhibit the personal qualifications prerequisite to the practice of veterinary medicine. These criteria shall apply at all times during the curriculum. Academic performance will not be the only factor in determining admission, promotion, graduation or request for withdrawal.

Scholastic Deficiency
An average grade of C and passing grades in all courses in the professional curriculum are the minimal scholastic achievements considered to be satisfactory. When a student’s scholastic performance
falls below the minimal satisfactory level in any term, scholastic probation may be imposed or the student may be dropped from the professional curriculum or placed on scholastic suspension from the University.

Scholastic probation is conditional permission for a student to continue in the professional curriculum under the conditions of the probation while working to remove any deficiencies. A student’s failure to meet the conditions of scholastic probation may result in dismissal from the professional curriculum or suspension from the University at the end of any term for which scholastic probation is imposed. The terms of the probation are determined by the Academic Progress Committee for the year of the curriculum in which scholastic deficiency occurs. A student who fails any course prescribed in the professional curriculum or who otherwise fails to achieve satisfactory scholastic progress may be dropped from the curriculum for cause.

Readmission
A student in the professional curriculum who voluntarily withdraws, or who is dropped from the rolls of the University or from the professional veterinary curriculum for cause, forfeits his or her standing and must apply for readmission and be approved before being re-enrolled by policies and procedures of the College of Veterinary Medicine and Biomedical Sciences.

NOTE: While every effort is made to assure accuracy and timeliness of this publication, the College of Veterinary Medicine and Biomedical Sciences is not responsible for any misrepresentation which might arise through error in the preparation of this catalog, or through failure to give notice of changes in its requirements, policies, tuition and fees, course offerings and other matters affecting students or applicants. The provisions of this catalog do not constitute an irrevocable contract between any student or applicant for admission into the professional curriculum of the College of Veterinary Medicine and Biomedical Sciences.

College of Veterinary Medicine and Biomedical Sciences

Admission Information (p. 42)

Program Requirements
The professional curriculum in veterinary medicine is a four-year program. During the first three years, classes are scheduled on a semester basis. The fourth-year curriculum consists of 24 weeks of Basic Core Rotations, 18 weeks of elective clinical rotations or career alternative electives, 4 weeks of externship and 2 weeks of vacation. The fourth-year curriculum allows students to choose a species directed career, i.e., equine, companion animal, rural/mixed animal, food animal or a career alternative track.

### Fourth Year

The fourth-year curriculum consists of 24 weeks of basic core rotations, 18 weeks of elective clinical rotations or career alternative electives, 4 weeks of externship and 2 weeks of vacation for 46 credit hours. The fourth-year curriculum allows students to choose a species directed career, i.e., large animal, small animal, mixed animal or an alternative career elective.

**Basic Core Rotations**

- **Small Animal Clinic (8 weeks)**
  - Small Animal Internal Medicine
  - Primary Care Medicine
  - General Surgery
  - Small Animal Emergency

- **Large Animal Clinic (4 weeks)**
  - Food Animal Medicine/Ambulatory or Zoo Med
  - Equine Medicine

- **Anesthesiology (4 weeks)**

- **Community Connections (2 weeks)**

- **Radiology (2 weeks)**

- **Laboratory Services (2 weeks)**
  - Diagnostics

- **Houston SPCA (2 weeks)**

- **Available Rotations**
  - Small Animal Medicine
    - Dermatology
    - Critical Care
    - Dentistry
    - Cardiology
    - Oncology
  - Internal Medicine/Canine
  - Internal Medicine/Feline
  - Primary Care Medicine
  - Neurology/Neurosurgery
  - Zoological Medicine and Surgery

- **Small Animal Surgery**
  - General
  - Orthopedic
  - Soft Tissue
  - Ophthalmology

- **Large Animal Hospital**
  - Food Animal Medicine & Surgery/Ambulatory
  - Equine Medicine/Ultrasound
  - Equine Field Services
  - Equine Community Practice
  - Equine Lameness
  - Equine Soft Tissue Surgery
  - Equine Orthopedic Surgery
  - Equine Theriogenology
  - Small Ruminant Theriogenology
  - Dairy Reproduction
  - TDCJ

- **Anesthesiology**

- **TVMDL (Texas Veterinary Medical Diagnostic Lab)**

- **Ultrasound**

- **Alternative Career Electives**

- **Externship**
Department of Veterinary Integrative Biosciences

Head: C. Jane Welsh

The Department of Veterinary Integrative Biosciences (VIBS) offers graduate degree programs aimed at educating students to advance biomedical science through original research and to disseminate that knowledge for the protection and promotion of animal and human health. The department awards the interdepartmental MS and PhD degrees in Biomedical Sciences (with specialties in Biomedical Genomics and Bioinformatics, Clinical and Translational Sciences, Epidemiology, Infection and Immunity, and Physiology and Developmental Biology). Also managed and awarded by the department are the interdepartmental MS degree in Science and Technology Journalism and the departmental MS degree in Veterinary Public Health-Epidemiology.

Many of the department faculty participate in University-wide graduate training programs in Neuroscience, Reproductive Biology, Genetics, Toxicology, Biotechnology, and Ecology and Evolutionary Biology.

In addition to developing research expertise in their specialty, students have the opportunity to learn anatomy, public health practices, and genomics in a variety of domestic species, wildlife species, and laboratory animals. Training in anatomy spans histology, histochemistry, neuroanatomy, and state-of-the-art interactive laser microscopy. Training in public health emphasizes epidemiology, food safety, food toxicology and control of zoonotic diseases. Training in genomics emphasizes genetics of health and disease, phylogeny of mammalian species, bioinformatics and comparative genomics.

The Master of Science in Science and Technology Journalism is a distinctive program to prepare students for careers as science and technology writers, reporters and editors in the public media, government, industry, academia and other sectors. It also can serve as a foundation for doctoral study.

The Master of Science in Veterinary Public Health-Epidemiology is designed to serve the needs of veterinarians and those with an interest in public health wishing to go into some aspects of government service, military veterinary personnel seeking advanced training in public health and students with a career goal of academia or research.

Students prepare degree plans that fit their area of study and professional or research goals in consultation with a committee of graduate faculty members led by a faculty mentor/chairperson. The general procedural rules are those specified in this catalog. More details on core course requirements, degree plans, and administrative matters are available in the college's "Graduate Student Handbook."

Master of Science in Veterinary Public Health Epidemiology

The Department of Veterinary Integrative Biosciences offers, through its Epidemiology and Public Health Program, a thesis and non-thesis Master of Science in Veterinary Public Health-Epidemiology that prepare students for further epidemiologic research training and career opportunities centered on public health. These M.S. degree options in Veterinary Public Health-Epidemiology are offered with approval of a program faculty advisor.

The Master of Science (MS) curriculum is designed to develop new understanding through research and creativity. Students have the option to pursue a thesis or non-thesis Master of Science degree.

Steps to Fulfill Master's Degree Requirements

1. Meet with departmental graduate advisor to plan course of study for first semester. When: Before first semester registration. Approved by: Graduate advisor or chair of the intercollegiate faculty.

2. Establish advisory committee. Submit a degree plan. When: Prior to the deadline imposed by the student’s college and no later than 90 days prior to final oral or thesis defense. Approved by: Advisory committee, department head or chair of the intercollegiate faculty, and Office of Graduate and Professional Studies (OGAPS).

3. If thesis is required, submit thesis research proposal and research proposal approval form to the Office of Graduate and Professional Studies. When: At least 20 working days prior to the submission of the Request for the Final Examination. Approved by: Advisory committee, department head or chair of the intercollegiate faculty, Research Compliance and Biosafety, and OGAPS.

4. Apply for degree, pay graduation fee. When: During the first week of the final semester, see OGAPS calendar.

5. Check to be sure degree program and advisory committee are up-to-date, and coursework is complete. When: Well before submitting request to schedule final examination.

6. Complete residence requirement. When: If applicable, before or during final semester. Approved by: OGAPS.

7. Submit request to schedule final examination. When: Must be received by OGAPS at least 10 working days before exam date. See OGAPS calendar for deadlines. Approved by: Advisory committee, department head or chair of the intercollegiate faculty, and OGAPS.
The student will interview each prospective interdisciplinary program must have an appointment to a department other than the student's major department.

The chair, in consultation with the student, will select the remainder of the student's fields of study and research. The chair or the co-chair of the advisory committee may be replaced by petition for valid reasons, a committee cannot resign en masse.

The duties of the committee include responsibility for the proposed degree plan, the research proposal, the thesis and the final examination. In addition, the committee as a group and as individual members are responsible for advising the student on academic matters, and, in the case of academic deficiency, initiating recommendations to the Office of Graduate and Professional Studies.

The committee members’ approval on the degree plan indicate their willingness to accept the responsibility for guiding and directing the entire academic program of the student and for initiating all academic actions concerning the student. Although individual committee members may be replaced by petition for valid reasons, a committee cannot resign en masse.

The student’s advisory committee, in consultation with the student, will develop the proposed degree plan. The degree plan must be completed and filed with the Office of Graduate and Professional Studies prior to the deadline imposed by the student’s college or interdisciplinary degree program, if applicable, and no later than 90 days prior to the date of the final oral examination or thesis defense.

A student should submit the degree plan using the online Document Processing Submission System (http://ogsdpss.tamu.edu).

A student submitting a proposed degree plan for a Master of Science degree should designate on the official degree plan the appropriate program option.

Additional coursework may be added to the approved degree plan by petition if it is deemed necessary by the advisory committee to correct deficiencies in the student’s academic preparation. No changes can be made to the degree plan once the student's Request for Final approval has been granted.

If the chair of a student's advisory committee voluntarily leaves the University and the student is near completion of the degree and wants to continue to serve in this role, the student is responsible for securing a current member of the University Graduate Faculty, from the student's academic program and located near the Texas A&M University campus site, to serve as the co-chair of the committee. The Department Head or Chair of Intercollegiate faculty may request in writing to the Associate Provost for Graduate and Professional Studies that a faculty member who is on an approved leave of absence or has voluntarily separated from the university, be allowed to continue to serve in the role of chair of a student's advisory committee without a co-chair for one year. The students should be near completion of the degree. Extensions beyond the one year period can be granted with additional approval of the Dean.

If the chair of the student's advisory committee is unavailable for an extended time in any academic period during which the student is involved in activities relating to an internship, thesis or professional paper, and is registered for courses such as 684, 691, 692 or 693, the student may request, in writing, that the department head appoint an alternate advisory committee chair during the interim period.

The online Document Processing Submission System is located on the website https://ogsdpss.tamu.edu.

Complete the application for degree form via the student’s Howdy portal.
Credit Requirement

A minimum of 32 semester credit hours of approved courses and research is required for the thesis option Master of Science degree.

A minimum of 36 semester credit hours of approved coursework is required for the Non-Thesis Option.

Ordinarily the student will devote the major portion of his or her time to work in one or two closely related fields. Other work will be in supporting fields of interest.

Transfer of Credit

A student who has earned 12 hours of graduate credit in residence at Texas A&M University may be authorized to transfer courses in excess of the limits prescribed below upon the advice of the advisory committee and with the approval of the Office of Graduate and Professional Studies. Courses taken in residence at an accredited U.S. institution or approved international institution with a final grade of B or greater may be considered for transfer credit if, at the time the courses were completed, the courses would be accepted for credit toward a similar degree for a student in degree-seeking status at the host institution. Otherwise, the limitations stated in the following section apply. Coursework in which no formal grades are given or in which grades other than letter grades (A or B) are earned (for example, CR, P, S, U, H, etc.) is not accepted for transfer credit. Courses appearing on the degree plan with grades of D, F or U may not be absoved by transfer work. Credit for thesis research or the equivalent is not transferable. Credit for coursework submitted for transfer from any college or university must be shown in semester credit hours or equated to semester credit hours. An official transcript from the university at which the transfer coursework was taken must be sent directly to the Office of Admissions.

Courses used toward a degree at another institution may not be applied for graduate credit. If the course to be transferred was taken prior to the conferral of a degree at the transfer institution, a letter from the registrar at that institution stating that the course was not applied for credit toward the degree must be submitted to the Office of Graduate and Professional Studies.

Grades for courses completed at other institutions are not included in computing the GPR.

Limitations on the Use of Transfer, Extension and Certain Other Courses

Some departments may have more restrictive requirements for transfer work. If otherwise acceptable, certain courses may be used toward meeting credit-hour requirements for the master’s degree under the following limitations.

1. The maximum number of credit hours which may be considered for transfer credit is the greater of 12 hours or one-third (1/3) of the total hours of a degree plan. The following restrictions apply:
   • Graduate and/or upper-level undergraduate courses taken in residence at an accredited U.S. institution, or approved international institution with a final grade of B or greater will be considered for transfer credit if, at the time the courses were completed, the student was in degree-seeking status at Texas A&M University, or the student was in degree-seeking status at the institution at which the courses were taken, and if the courses would be accepted for credit toward a similar degree for a student in degree-seeking status at the host institution.
   • Courses previously used for another degree are not acceptable for degree plan credit.

2. The maximum number of credit hours taken in post-baccalaureate non-degree (G6) classification at Texas A&M University which may be considered for application to the degree plan is 12.

3. A zero credit 684 and 685 course is only allowed for non-thesis master’s students. Other courses, including 691 research hours, are not eligible for zero credit.

4. Not more than 12 hours may be used in any combination of the following categories:
   • Not more than 8 hours in the combination of 691 (research), 684 (Professional Internship) or may be used.
   • Not more than 8 hours of 685 (Directed Studies) may be used.
   • Not more than 3 hours of 690 (Theory of Research) may be used.
   • Not more than 3 hours of 695 (Frontiers in Research) may be used.

5. A maximum of 2 hours of Seminar (681).

6. A maximum of 9 hours of advanced undergraduate courses (300- or 400-level).

7. For graduate courses of three weeks’ duration or less, taken at other institutions, up to 1 hour of credit may be obtained for each five-day week of coursework. Each week of coursework must include at least 15 contact hours.

8. Continuing education courses may not be used for graduate credit.

9. Extension courses are not acceptable for credit.

Exceptions will be permitted only in unusual cases and when petitioned by the student’s advisory committee and approved by the Office of Graduate and Professional Studies.

Thesis Option

An acceptable thesis is required for the Master of Science degree for a student who selects the thesis option program. The finished work must reflect a comprehensive understanding of the pertinent literature and express in clear English, the problem(s) for study, the method, significance and results of the student’s original research. Guidelines for the preparation of the thesis are available in the Thesis Manual, which is available online at the Office of Graduate and Professional Studies website.

After successful defense (or exemption) and approval by the student’s advisory committee and the head of the student’s major department (or chair of the intercollegiate faculty, if appropriate), the student must submit his/her thesis in electronic format as a single PDF file. The PDF file must be uploaded to the Office of Graduate and Professional Studies website. Additionally, a signed paper approval form with original signatures must be received by the Office of Graduate and Professional Studies. The PDF file and the signed approval form are required by the deadline.

Deadline dates for submitting the thesis are announced each semester or summer term in the “Office of Graduate and Professional Studies Calendar” (see Time Limit statement). These dates also can be accessed via the Office of Graduate and Professional Studies website.

Each student who submits a document for review is assessed a one-time thesis/dissertation processing fee through Student Business...
A thesis that is deemed unacceptable by the Office of Graduate and Professional Studies because of excessive corrections will be returned to the student’s department head (or chair of the interdisciplinary faculty, if applicable). The manuscript must be resubmitted as a new document, and the entire review process must begin again. All original submittal deadlines must be met during the resubmittal process to graduate that semester.

**Thesis Proposal**

For the thesis option Master of Science degree, the student must prepare a thesis proposal for approval by the advisory committee and the head of the major department or chair of the interdisciplinary faculty, if applicable. This proposal must be submitted to the Office of Graduate and Professional Studies at least 20 working days prior to the submission of the request for the final examination.

Compliance issues must be addressed if a graduate student is performing research involving human subjects, animals, infectious biohazards and recombinant DNA. A student involved in these types of research should check with the Office of Research Compliance and Biosafety at (979) 458-1467 to address questions about all research compliance responsibilities. Additional information can also be obtained on the Office of Research Compliance and Biosafety website.

**Final Examination/Thesis Defense**

A student must pass a final examination by dates announced each semester or summer term in the Office of Graduate and Professional Studies Calendar. To be eligible to take the final examination, a student’s GPR must be at least 3.000 for courses on the degree plan and for all courses completed at Texas A&M which are eligible to be applied to a graduate degree, and there must be no unabsolved grades of D, F or U for any course listed on the degree plan. To absolve a deficient grade, the student must repeat the course at Texas A&M University and achieve a grade of C or better. All coursework on the degree plan must have been completed with the exception of those hours for which the student is registered. For thesis-option students, an approved thesis proposal must be on file in the Office of Graduate and Professional Studies according to published deadlines prior to the final examination or submission of the request for exemption from the final examination.

A request to hold and announce the final examination must be submitted to the Office of Graduate and Professional Studies a minimum of 10 working days in advance of the scheduled date for the examination. The Office of Graduate and Professional Studies must be notified in writing of any cancellations. A student may be given only one opportunity to repeat the final examination for the master’s degree and that must be within a time period that does not extend beyond the end of the next regular semester (summer terms are excluded).

For thesis option students, the final examination covers the thesis and all work taken on the degree plan and at the option of the committee may be written or oral or both. The final examination may not be administered before the thesis is available to all members of the student’s advisory committee in substantially final form, and all members have had adequate time to review the document. The examination is conducted by the student’s advisory committee as finally constituted. A thesis option student must be registered in the University in the semester or summer term in which the final examination is taken. Persons other than members of the graduate faculty may, with mutual consent of the candidate and the major professor, attend final examinations for advanced degrees. Upon completion of the questioning of the candidate, all visitors must excuse themselves from the proceedings. A positive vote by all members of the graduate committee with at most one dissonance is required to pass a student on his or her exam. A department, or interdisciplinary degree program, may have a stricter requirement provided there is consistency within all degree programs within a department or interdisciplinary degree program.

The Report of the Final Examination Form must be submitted with original signatures of only the committee members approved by the Office of Graduate and Professional Studies. If an approved committee member substitution (1 only) has been made, his/her signature must also be submitted to the Office of Graduate and Professional Studies. If necessary, multiple copies of the form may be submitted with different committee member original signatures. If an approved committee member substitution (1 only) has been made, his/her signature must be included on the form submitted to the Office of Graduate and Professional Studies.

A thesis option candidate may petition to be exempt from his/her final examination provided his/her degree plan GPR is 3.500 or greater and he/she has the approval of the advisory committee, the head of the student’s major department, or interdisciplinary chair, if appropriate, and the Office of Graduate and Professional Studies. It is required that the petition for exemption be submitted the same semester the student intends to submit the thesis.

**Non-Thesis Option**

For non-thesis option students, a final comprehensive examination may be required.

The final exam cannot be held prior to the mid point of the semester if questions on the exam are based on courses in which the student is currently enrolled. If a student has completed all required degree plan coursework, the student is not required to be registered for classes in the semester the final examination is administered (unless he/she holds an assistantship). For specific final examination requirements, a student should check the program requirements for the degree which he/she is pursuing.

Exam results must be submitted with original signatures of only the committee members approved by the Office of Graduate and Professional Studies. If an approved committee member substitution (1 only) has been made, his/her signature must also be submitted to the Office of Graduate and Professional Studies.

A student pursuing the non-thesis option is not allowed to enroll in 691 (research) for any reason and 691 may not be used for credit toward a non-thesis option Master of Science degree. A maximum of 4 credit hours of 684 (Professional Internship), 8 credit hours of 685 (Directed Studies), and up to 3 credit hours of 690 (Theory of Research) or 695 (Frontiers in Research) may be used toward the non-thesis option Master of Science degree. In addition, any combination of 684, 685, 690 and 695 may not exceed 25 percent of the total credit hour requirement shown on the individual degree plan. All requirements for the non-thesis option Master of Science degree other than those specified above are the same as for the thesis option degree.
Additional Requirements

Additional Requirements

- Residence (p. 1328)
- Continuous Registration (p. 1328)
- Time Limit (p. 1328)
- Foreign Languages (p. 1328)
- Application for Degree (p. 1328)

Residence

In partial fulfillment of the residence requirement for the degree of Master of Science, the student must complete 9 resident credit hours during one regular semester or one 10-week summer semester in resident study at Texas A&M University. Upon recommendation of the student’s advisory committee, department head or Chair of the Interdisciplinary Program, if appropriate, and with approval of the Office of Graduate and Professional Studies, a student may be granted exemption from this requirement. Such a petition, however, must be approved prior to the student’s registration for the final 9 credit hours of required coursework.

Students who are employed full-time while completing their degree may fulfill total residence requirements by completion of less-than-full time course loads each semester. In order to be considered for this, the student is required to submit a Petition for Waivers and Exceptions along with verification of his/her employment to the Office of Graduate and Professional Studies.

See Residence Requirements (p. 22).

Continuous Registration

A student in the thesis option of the Master of Science program who has completed all coursework on his/her degree plan other than 5V98, 5V99, and 691 (research) is required to be in continuous registration until all requirements for the degree have been completed. See Continuous Registration Requirements (p. 28).

Time Limit

All degree requirements must be completed within a period of seven consecutive years for the degree to be granted. A course will be considered valid until seven years after the end of the semester in which it is taken. Graduate credit for coursework which is more than seven calendar years old at the time of the final examination (oral or written) may not be used to satisfy degree requirements.

A student who has chosen the thesis option must have the final corrected version of the thesis cleared by the Office of Graduate and Professional Studies no later than one year after the final examination, or approval of a petition for exemption from the final exam, or within the seven-year time limit, whichever occurs first. Failure to do so will result in the degree not being awarded.

Foreign Languages

No specific language requirement exists for the Master of Science degree.

Application for Degree

For information on applying for your degree, please visit the Graduation Application for Degree section.

DVM, Universidad del Uruguay, 1985
Faculty in the Department of Veterinary Pathobiology (VTPB) participate in training graduate students in the College of Veterinary Medicine and Biomedical Sciences, and offer instruction and research leading to the degrees of Master of Science (MS) and Doctor of Philosophy (PhD) in Biomedical Sciences. Department faculty also contribute to the academic and research training for university-wide interdisciplinary programs in Biotechnology, Genetics, and Toxicology that lead to MS and PhD degrees. Major specialty areas include infectious diseases (virology, bacteriology, parasitology), biodefense and emerging infectious diseases, metabolic diseases, genetics/genomics, neuroscience, cardiovascular science, and immunology and are options for students pursuing any graduate degree awarded by the Department.

The Department also offers post-doctoral (DVM) residency/graduate programs in anatomic pathology, clinical pathology, and laboratory animal medicine. Residents are required to enroll in graduate courses and may pursue either a Master of Science or Doctor of Philosophy degree. Minimum qualifications for residency programs include a DVM/VMD or equivalent degree. Selection of residents is made on the basis of academic achievement, letters of recommendation, and pertinent experience.

For further information regarding these programs, please contact resgrad@cvm.tamu.edu or Dr. Albert Mulenga (amulenga@cvm.tamu.edu (mcricitiello@cvm.tamu.edu). Also, the following websites may provide additional information: Comparative Medicine Program (http://cmp.tamu.edu/); Veterinary Pathobiology (http://vetmed.tamu.edu/vtpb); Texas A&M University (http://www.tamu.edu/); Office of Graduate and Professional Studies (http://ogaps.tamu.edu/); College of Veterinary Medicine and Biomedical Sciences (http://vetmed.tamu.edu/); and a guide to the Bryan-College Station area (http://vetmed.tamu.edu/area-information).

Department of Veterinary Physiology and Pharmacology

http://vetmed.tamu.edu/vtp

Head: Larry J. Suva

The Department of Veterinary Physiology and Pharmacology is the only department of its kind in the state of Texas with a rich tradition of excellence in education, research and outreach to impact both veterinary and human medicine. The department has expertise in toxicology, reproductive science, cardiovascular science, tissue regeneration and bone biology.

The primary research focus areas within the department are extramurally funded, internationally renowned and significantly contribute to improving human and veterinary health. Extensive research collaborations with the Colleges of Agriculture and Life Sciences, Science, Engineering and Education and Human Development, as well as with the Texas A&M University Health Science Center, School of Public Health, Texas A&M AgriLife Research and the Texas A&M Engineering Experiment Station provide exceptional resources that enhance all departmental research efforts.

Our faculty, many of whom are leaders in their fields and key contributors to the scientific and educational literature, are also strong mentors that form the basis for a strong graduate research and education experience. Most importantly, they are accessible, focused and student-friendly with a deep understanding of the art and science of education and research.

Faculty

Bailey, Everett M, Professor
Vet Physiology & Pharmacology
PHD, Iowa State University, 1968
DVM, Texas A&M University, 1964

Blue-Mclendon, Alice, Clinical Associate Professor
Vet Physiology & Pharmacology
DVM, Texas A&M University, 1989

Brunauer, Regina, Research Assistant Professor
Vet Physiology & Pharmacology
PHD, Medical University Innsbruck, Austria, 2011
The Department of Small Animal Clinical Sciences has three major missions: education, patient care, and scholarship. Each of these activities is intended to improve the quality of life for companion animals.
and their owners. Faculty and staff in the department participate in all four years of the professional curriculum, although most interactions with students occur in the third and fourth years. The department offers a one-year internship program for the newly graduated veterinarians, and three-year residency programs in several clinical disciplines for veterinarians seeking advanced training and board certification. Faculty and staff frequently contribute to continuing education programs and may teach and mentor students earning the interdepartmental graduate degrees in Biomedical Sciences offered by the College of Veterinary Medicine & Biomedical Sciences.

Scholarly programs of the faculty are centered mainly on the study of the spontaneously occurring diseases of the patients presented to the Small Animal Hospital. Investigative programs are active in anesthesiology, animal behavior, cardiology, clinical nutrition, dermatology, feline internal medicine, gastroenterology, general surgery, G.I. Lab, internal medicine, neurology/neurosurgery, oncology, and orthopedic and soft tissue surgery.

Approximately, 20,000 animals are presented to the Small Animal Hospital for advanced diagnostic procedures and state-of-the-art treatment methods. Faculty, staff, and fourth-year students participate as a team in the care of these patients. Many of these patients are referred from veterinarians throughout Texas and the region, so that they may receive the benefits of the unique expertise and diagnostic and therapeutic technology offered by the Small Animal Hospital.

DVM, Texas A&M University, 1997

Strelchik, Alena O, Veterinary Intern
Vet Small Animal Clinical Sc
DVM, University of Georgia, 2017

Suchodolski, Jan, Associate Professor
Vet Small Animal Clinical Sc
PHD, Texas A&M University, 2005

Thomas, Jennifer E, Veterinary Resident
Vet Small Animal Clinical Sc
DVM, Oklahoma State University, 2012

Torkildsen, Laurie, Veterinary Resident
Vet Small Animal Clinical Sc
DVM, Texas A&M University, 2014

Vallone, Lucien V, Clinical Assistant Professor
Vet Small Animal Clinical Sc
DVM, Mississippi State University, 2011

Wesselowski, Sonya R, Clinical Assistant Professor
Vet Small Animal Clinical Sc
DVM, Kansas State University, 2008

Wilson-Robles, Heather M, Associate Professor
Vet Small Animal Clinical Sc
DVM, University of Tennessee, 2003

Winkel-Blair, Andrea M, Veterinary Resident
Vet Small Animal Clinical Sc
DVM, Michigan State University, 2015

Wood, Carrissa C, Veterinary Resident
Vet Small Animal Clinical Sc
DVM, University of Missouri, 2013

Zoran, Debra L, Professor
Vet Small Animal Clinical Sc
PHD, Texas A&M University, 1997
DVM, Kansas State University, 1984
## Degrees and Programs Offered

### Degree Program Tables

**Undergraduate, Graduate and Professional Degree Programs**

*Approved by the Texas Higher Education Coordinating Board*

### Interdisciplinary Degree Programs

<table>

</table>
Department of Nutrition and Food Science
- Food Science and Technology: BS, MS, MAgr, PhD
- Nutrition: BS, MS, PhD

Department of Plant Pathology and Microbiology
- Bioenvironmental Sciences: MS, PhD
- Plant Pathology: MS, PhD

Department of Poultry Science
- Poultry Science: BS, MS, MAgr, PhD

Department of Recreation, Park and Tourism Sciences
- Natural Resources Development: MS, PhD
- Recreation, Park and Tourism Sciences: BS, MS, PhD
- Recreation and Resources Development: MNRD, MRRD

Department of Soil and Crop Sciences
- Agronomy: MS, PhD
- Plant Breeding: MS, PhD
- Plant and Environmental Soil Science: BS, MS, PhD
- Turfgrass Science: BS, MS, PhD

Department of Wildlife and Fisheries Sciences
- Natural Resources Development: MNRD
- Wildlife and Fisheries Sciences: BS, MS, PhD
- Wildlife Science: MWSC

1 Also offered as joint program with Texas Tech University when offered by Distance Education.
2 Joint Program with College of Education and Human Development.
3 Degrees conferred in College of Agriculture and Life Sciences.

Also offered as cooperative program with Texas A&M University–Kingsville.

College of Architecture

<table>

Texas A&M University currently offers the following programs by distance education.

Degree Programs Via Distance Education

Texas A&M University at Qatar

Degree Program | Baccalaureate | Masters | Doctorate | Professional
--- | --- | --- | --- | ---
College of Engineering
Chemical Engineering | BS | MS, MEngr | PhD |
Electrical Engineering | BS | |
Mechanical Engineering | BS | |
Petroleum Engineering | BS | |

Graduate Degree Programs

- Bachelor of Science in Nursing (BSN) in Nursing

- Bachelor of Philosophy (PhB) in Agriculture
- Bachelor of Education (EdD) in Curriculum and Instruction
- Bachelor of Science in Nursing (BSN) in Nursing Education
- Bachelor of Science in Nursing (BSN) in Forensic Nursing
- Bachelor of Science in Nursing (BSN) in Family Nurse Practitioner
- Bachelor of Science in Nursing (BSN) in Midwifery
- Bachelor of Science in Nursing (BSN) in Nursing Administration
- Bachelor of Science in Nursing (BSN) in Nursing Administration and Logistics
- Bachelor of Science in Nursing (BSN) in Nutrition
- Bachelor of Science in Nursing (BSN) in Public Health
- Bachelor of Science in Nursing (BSN) in Rehabilitation Nursing
- Bachelor of Science in Nursing (BSN) in Rural Nursing
- Bachelor of Science in Nursing (BSN) in School Nursing

A limited number of graduate certificate programs are available by distance education. Please review them here.

Undergraduate Degree Program

- Master of Laws (LLM) in Laws
- Master of Maritime Administration and Logistics (MMAL) in Maritime Administration and Logistics
- Master of Natural Resource Development (MNRA) in Natural Resource Development
- Master of Public Health (MPH) in Epidemiology
- Master of Public Service and Administration (MPSA) in Public Service and Administration
- Master of Recreation and Resources Development (MRRD) in Recreation and Resources Development
- Master of Science (MS) in Agricultural Systems Management
- Master of Science (MS) in Analytics
- Master of Science (MS) in Bilingual Education
- Master of Science (MS) in Education for Health Care Professionals
- Master of Science (MS) in Educational Human Resource Development
- Master of Science (MS) in Energy
- Master of Science (MS) in Engineering Systems Management
- Master of Science (MS) in Health Education
- Master of Science (MS) in Mathematics
- Master of Science (MS) in Plant Breeding
- Master of Science (MS) in Safety Engineering
- Master of Science (MS) in Special Education
- Master of Science (MS) in Sport Management
- Master of Science (MS) in Statistics
- Master of Science in Nursing (MSN) in Family Nurse Practitioner
- Master of Science in Nursing (MSN) in Forensic Nursing
- Master of Science in Nursing (MSN) in Nursing Education
- Master of Wildlife Science (MWSC) in Wildlife Science

Only a student who is admitted to Texas A&M University may enroll in these distance education programs and the associated courses. A student wishing to enroll in any of the distance education programs must be admitted as a degree-seeking graduate student or as a post-baccalaureate non-degree seeking student. Please see http://admissions.tamu.edu for graduate admissions information.

A student may take up to 12 hours in non-degree-seeking post-baccalaureate status and apply these hours to a master's program if all admission requirements to the selected master's program are fulfilled. Courses offered for extension credit may not be used on the student's degree plan. Post-baccalaureate non-degree status does not establish eligibility for admission to degree-seeking status.
Texas A&M University provides students pursuing a graduate degree by distance a wide variety of student support services, including access to library resources, advising, technology support and course materials acquisition through the online bookstore. A complete listing of services, degree program descriptions, appropriate points of contact within each program, and costs are available through the distance education website at http://distance.tamu.edu. Additional distance education programs are in development. Interested students should check the website periodically for updates. Students should contact the department offering the program for any questions.

State Authorization
State authorization allows Texas A&M University to offer educational opportunities to students among other states and nationwide.

National Council for State Authorization Reciprocity Agreements (NC-SARA)
Texas was approved as a SARA state in 2015, and is administered by the Southern (https://www.sreb.org) Regional Education Board (SREB.) (https://www.sreb.org) "The State Authorization Reciprocity Agreement (http://nc-sara.org) is a voluntary agreement among its member states and U.S. territories that establishes comparable national standards for interstate offering of postsecondary distance-education courses and programs. It is intended to make it easier for students to take online courses offered by postsecondary institutions based in another state." - NC-SARA

Graduate Certificate Programs

Graduate Certificate Programs

- Advanced International Affairs Certificate (p. 968) ¹
- Advanced Pedagogy in Agriculture Certificate (p. 188) ¹
- Africana Studies Certificate (p. 1000)
- Agriculture eLearning Development Certificate (p. 188) ¹
- Applied Behavior Analysis Certificate (p. 623) ¹
- Applied Statistics Certificate (p. 1304) ¹
- Business Data Analytics Certificate (p. 482)
- Business Intelligence and Analytics Certificate (p. 499)
- Business Management Certificate (p. 482)
- Community Development Certificate (p. 373)
- Computational Sciences Certificate (p. 1209)
- Conservation Training Certificate (p. 1016)
- Dietetic Internship Certificate (p. 333)
- Digital Humanities Certificate (p. 144)
- Education for Health Care Professionals Certificate (p. 1154) ¹
- Education and Social Sciences Advanced Research Methods (ARM) Certificate (p. 548)
- Energy Certificate (p. 145) ¹
- Engineering Therapeutics Manufacturing Certificate (p. 739)
- Entrepreneurship Certificate (p. 511)
- Environmental Hazard Management Certificate (p. 423)
- Extension Education Certificate (p. 189) ¹
- Facility Management Certificate (p. 423)
- Film and Media Studies Certificate (p. 1000)
- Finance Certificate (p. 482)
- Food Safety Certificate (p. 225)
- Forensic Healthcare Certificate (p. 1168) ¹
- Geographic Information Science (GIS) Certificate (p. 146)
- Global Health Certificate (p. 1207)
- Health Coaching for Chronic Disease Prevention and Management Certificate (p. 1208) ¹
- Health Systems and Design Certificate (p. 146)
- Health Systems Management Certificate (p. 1199)
- Hispanic Bilingual Education Certificate (p. 623) ¹
- Historic Preservation Certificate (p. 438)
- Homeland Security Certificate (p. 981) ¹
- Industrial Data Analytics Certificate (p. 827) ¹
- International Agriculture and Resource Management (IARM) Certificate (p. 150)
- International Business (Mays MBA Students Only) Certificate (p. 482)
- International Business (Mays MS Students Only) Certificate (p. 483)
- International Communication and Public Diplomacy Certificate (p. 1027)
- International Petroleum Management Certificate (p. 147)
- Latino Mental Health Certificate (p. 623)
- Latino/a and Mexican American Studies Certificate (p. 1001)
- Leadership Education, Theory and Practice Certificate (p. 189) ¹
- Marketing Certificate (p. 483)
- Materials, Informatics and Design Certificate (p. 842)
- Maternal and Child Health Certificate (p. 1196)
- Meat Science Certificate (p. 226)
- Military Land Sustainability Certificate (p. 422) ¹
- National Security Affairs Certificate (p. 963) ¹
- Nonprofit Management Certificate (p. 981) ¹
- Nuclear Security Certificate (p. 871) ¹
- Ocean Observing Systems Certificate (p. 962)
- Petroleum Geoscience Certificate (p. 948)
- Prevention Science Certificate (p. 148)
- Public Health Certificate (p. 1189) ¹
- Public Management Certificate (p. 982) ¹
- Quality Engineering for Regulated Medical Technologies Certificate (p. 725)
- Regulatory Science in Food Systems Certificate (p. 405) ¹
- Remote Sensing (RS) Certificate (p. 148)
- Safety Engineering Certificate (p. 697) ¹
- Science, Technology, Engineering and Mathematics (STEM) Education Certificate (p. 674) ¹
- Space Life Sciences (p. 148)
- Supply Chain and Operations Certificate (p. 484)
- Sustainable Urbanism Certificate (p. 461)
- Transportation Planning Certificate (p. 149)
- Vector Biology and Vector-Borne Disease Response in Human and Animal Systems Certificate (p. 286)
- Women’s and Gender Studies Certificate (p. 1002)

Graduate Clinical Certificate Programs

- Advanced Education in General Dentistry Certificate (p. 534)
- Dental Public Health Certificate (p. 543)
- Endodontics Certificate (p. 532)
• Oral and Maxillofacial Surgery Certificate (p. 536)
• Oral and Maxillofacial Pathology Certificate (p. 530)
• Oral and Maxillofacial Radiology Certificate (p. 531)
• Orthodontics Certificate (p. 537)
• Pediatric Dentistry Certificate (p. 539)
• Periodontics Certificate (p. 541)
• Prosthodontics Certificate (p. 546)

1 Offered via online Distance Education.

A graduate certificate program represents an emphasis area within a particular field or it could be interdisciplinary and involve several fields. Other certificate programs may exist in the various colleges or schools. Inquiries should be addressed to these colleges. For more information on graduate certificate programs, please visit the Office of the Registrar (http://registrar.tamu.edu/Our-Services/Curricular-Services/Curricular-Approvals/Program-Approvals/Approved-Certificate-Programs) website.
Faculty

Abanov, Artem G, Associate Professor
Physics & Astronomy
PHD, Texas A&M University, 1998

Abbey, James D, Assistant Professor
Information & Operations Mgmt
PHD, The Pennsylvania State University, 2013

Abbott Jr, Elton D, Associate Professor of the Practice
Architecture
PHD, Texas A&M University, 1983

Abbott, Louise C, Professor
Vet Integrative Biosciences
DVM, Washington State University, 1988
PHD, University of Washington, 1982

Abdalla, Ahmed A, Associate Professor
Texas A&M University at Qatar
PHD, North Carolina State University, 2001

Abdel Salam, Noha M, Clinical Assistant Professor
Public Health Sciences
DDS, Loma Linda University, 2008

Abdel-Wahab, Ahmed I, Professor
Civil Engineering
PHD, Texas A&M University, 2003

Abdel-Wahab, Ahmed I, Professor
Texas A&M University at Qatar
PHD, Texas A&M University, 2003

Abdi Mashhadimighani, Sara, Assistant Professor
Petroleum Engineering
PHD, University of Southern California, 2012

Abraham, Celeste M, Clinical Associate Professor
Periodontics
DDS, Howard University, 1988

Abu Baker, Asim, Clinical Professor
College of Pharmacy
PHARMD, Albany College of Pharmacy, 2003

Abu-Rub, Haithem A, Professor
Texas A&M University at Qatar
PHD, Gdansk University of Technology, Poland, 1995

Acero-Schertzer, Carmen E, Lecturer
Liberal Studies
PHD, University of Miami, 1996

Acierno, Michelle M, Veterinary Resident Instructor
Vet Large Animal Clinical Sc
DVM, University of Pennsylvania, 2014

Acosta, Sandra T, Assistant Professor
Educational Psychology
PHD, Texas A&M University, 2010

Acuff, Gary R, Professor
Nutrition & Food Science
PHD, Texas A&M University, 1985

Adams, Leslie G,
Veterinary Pathobiology
PHD, Texas A&M University, 1968
DVM, Texas A&M University, 1964

Adams, Marvin L, Professor
Nuclear Engineering
PHD, University of Michigan - Ann Arbor, 1986

Adams, Rae A, Clinical Assistant Professor
Primary Care Medicine
MD, Texas A&M Health Science Center College of Medicine, 2008

Adams, Terry B, Adjunct Assistant Professor
Orthodontics
DDS, DDS, 1973 U Missouri, 1973

Adelman, Zachary N, Associate Professor
Entomology
PHD, Colorado State University Fort Collins, 2000

Adesanya, Patricia M, Adjunct Assistant Professor
Restorative Sciences
DDS, Texas A&M College of Dentistry, 2010

Agarwal, Girish S, Professor
Biological & Agricultural Eng
PHD, University of Rochester, 1969

Agnolet, Glenn, Professor
Physics & Astronomy
PHD, Cornell University, 1983

Agrawal, Anupam, Associate Professor
Information & Operations Mgmt
PHD, INSEAD France, 2008

Agumbe Suresh, Mahima, Visiting Assistant Professor
Computer Science & Engineering
PHD, Texas A&M University, 2015

Ahmed, Anwer S, Professor
Accounting
PHD, University of Rochester, 1992

Ahmed, Beena, Assistant Professor
Texas A&M University at Qatar
PHD, University of New South Wales, Sydney, Australia, 2004

Ahmed, Karim E, Assistant Professor
Nuclear Engineering
PHD, Purdue University, 2015

Ahmed, Sarker T, Instructional Assistant Professor
Computer Science & Engineering
PHD, Texas A&M University, 2016

Ahmed, Shehab, Associate Professor
Texas A&M University at Qatar
PHD, Texas A&M University, 2007
Ahn, Changbum R, Associate Professor  
Construction Science  
PHD, University of Illinois at Urbana-Champaign, 2012

Aitani, Koichiro, Associate Professor  
Architecture  
PHD, Kyushu University, 2015  
MAR, Virginia Polytechnic Institute and State University, 1997

Aitkenhead, Jacqueline A, Associate Professor  
Soil & Crop Sciences  
PHD, University of New Hampshire, 2000

Akbulut, Mustafa, Associate Professor  
Chemical Engineering  
PHD, University of California, Santa Barbara, 2007

Akbulut, Mustafa, Associate Professor  
Materials Science & Engr  
PHD, University of California, Santa Barbara, 2007

Akhtar, Noorullah, Clinical Assistant Professor  
Primary Care Medicine  
MD, Sind Medical College, 1985

Akimov, Alexey, Assistant Professor  
Physics & Astronomy  
PHD, Moscow Institute of Technology, 2003

Akkutlu, Ibrahim Y, Associate Professor  
Petroleum Engineering  
PHD, University of Southern California, 2002

Akleman, Derya G, Instructional Associate Professor  
Statistics  
PHD, Texas A&M University, 1996

Akleman, Ergun, Professor  
Computer Science & Engineering  
PHD, Georgia Institute of Technology, 1992

Akleman, Ergun, Professor  
Visualization  
PHD, Georgia Institute of Technology, 1992

Al-Hashimi, Mohammed, Research Assistant Professor  
Texas A&M University at Qatar  
PHD, Queen Mary Westfield College, University of London, 2007

Alajlouni, Khaldoun F, Adjunct Professor  
Restorative Sciences  
DDS, Jordan University of Science and Technology, Irbid Jordan, 1998

Alaniz, Robert C, Research Assistant Professor  
Microbial Pathogenesis & Imm  
PHD, University of Washington, 2015

Alexander, Joyce M, Professor  
Educational Psychology  
PHD, University of Georgia, 1992

Alexander, Lisa T, Professor  
School of Law  
JD, Columbia University, 2002

Alexander, Michael B, Lab Instructor  
Biology  
PHD, Texas A&M University, 2014

Alexander, Steve K, Lecturer  
Marine Science  
PHD, Louisiana State University, 1976

Alexander-Packard, Gerianne, Professor  
Psychology  
PHD, McGill University, 1991

Alfred, Mary V, Professor  
Educ Admn & Human Resource Dev  
PHD, University of Texas, 1995

Alfiend III, Kyle T, Distinguished Professor  
Aerospace Engineering  
PHD, Virginia Polytechnic Institute and State University, 1967

Alge, Daniel L, Assistant Professor  
Biomedical Engineering  
PHD, Purdue University, 2010

Alge, Daniel L, Assistant Professor  
Materials Science & Engr  
PHD, Purdue University, 2010

Ali, Ahmed K, Assistant Professor  
Architecture  
PHD, Virginia Polytechnic Institute, 2012

Alkon, Cynthia J, Professor  
School of Law  
LLM, University of Missouri-Columbia, 2001  
JD, University of California, 1990

Allaire, Douglas L, Assistant Professor  
Mechanical Engineering  
PHD, MASSACHUSETTS INSTITUTE OF TECHNOLOGY, 2009

Allen, Gregg C, Instructional Associate Professor  
Neuroscience Experiment Theara  
PHD, Texas A&M University, 2001

Allen, Roland E, Professor  
Physics & Astronomy  
PHD, University of Texas at Austin, 1969

Allen, Sarah P, Clinical Assistant Professor  
Restorative Sciences  
DDS, Texas A&M University System Baylor College of Dentistry, 2010

Allred, Clinton D, Associate Professor  
Nutrition & Food Science  
PHD, University of Illinois at Urbana Champaign, 2002

Alnuweiri, Hussein, Professor  
Texas A&M University at Qatar  
PHD, University of Southern California, 1989

Alonzo, Armando C, Associate Professor  
History  
PHD, Indiana University, 1994
Alonzo, Joy P, Clinical Assistant Professor
College of Pharmacy
PHARMD, Howard University, 2010

Alonzo, Juan J, Associate Professor
English
PHD, University of Texas, 2003

Alpini, Gianfranco D, Professor
College of Medicine
PHD, University of Rome, 1984

Alpini, Gianfranco D, Distinguished Professor
Internal Medicine
PHD, University of Rome, 1984

Alton, Stephen R, Professor
School of Law
LLM, Columbia University School of Law, 1992
JD, The University of Texas School of Law, 1981

Alvarado, Christine Z, Professor
Poultry Science
PHD, Texas A&M University, 2001

Alvarado, Jorge L, Professor
Eng Tech & Ind Distribution
PHD, University of Illinois, 2004

Alvarado, Jorge L, Professor (courtesy appointment)
Mechanical Engineering
PHD, University of Illinois, 2004

Alvarado-Bremer, Jaime, Associate Professor
Marine Biology
PHD, University of Toronto, 1994

Alvard, Michael S, Associate Professor
Anthropology
PHD, University of New Mexico, 1993

Alvarez, Andrea, Instructional Assistant Professor
Health & Kinesiology
MFA, Case Western Reserve University, 2016

Alvarez, Martha H, Adjunct Assistant Professor
Pediatric Dentistry
DDS, Instituto de Ciencias de la Salud (CES), Medellin, Colombia, 1997

Alyafei, Nayef M, Assistant Professor
Texas A&M University at Qatar
PHD, Imperial College London, United Kingdom, 2015

Alyismail, Hamed, Assistant Professor
College of Pharmacy
PHD, Okayama University, Japan, 2007

Amano, Mahmood, Associate Professor
Texas A&M University at Qatar
PHD, Texas A&M University, 1997

Amato, Nancy M, Professor
Computer Science & Engineering
PHD, University of Illinois, 1995

Amini, Noushin, Research Assistant Professor
Ocean Engineering
PHD, Texas A&M University, 2011

Amon, Rainer, Professor
Marine Science
PHD, University of Texas at Austin, 1995

Amrein, Hubert O, Professor
Molecular & Cellular Medicine
PHD, University of Zürich, 1989

An, Yonghong, Assistant Professor
Economics
PHD, John Hopkins University, 2011

Anand, Nagamangala, Professor
Mechanical Engineering
PHD, Purdue University, 1983

Anders, Katherine C, Assistant Professor
TAMU Libraries
PHD, University of Nevada, 2014

Andersen, Flemming, Professor of the Practice
Computer Science & Engineering
PHD, Technical University of Denmark, 1995

Anderson, Brian A, Assistant Professor
Psychology
PHD, John Hopkins University, 2014

Anderson, Sammy K, Executive Associate Professor
Land Arch & Urban Planning
PHD, Texas A&M University, 1993

Anderson, Stuart, Professor
Civil Engineering
PHD, University of Texas, 1989

Anderson, Terry H, Professor
History
PHD, Indiana University, 1978

Andersson, Leif B, Professor
Vet Integrative Biosciences
PHD, Swedish University of Agricultural Sciences, Uppsala, 1984

Andrews-Polimenis, Helene, Professor
Microbial Pathogenesis & Immuno
DVM, Texas A&M University, 2001
PHD, Tufts University, 1999

Andruzzi, Melissa N, Veterinary Intern
Vet Small Animal Clinical Sc
DVM, University of Illinois, 2017

Angelus, Alexandar, Assistant Professor
Information & Operations Mgmt
PHD, Stanford University, 1997

Anis, Ayal, Associate Professor
Marine Science
PHD, Oregon State University, 1993
Annapareddy, Narasimha, Professor
Electrical & Computer Eng
PHD, University of Illinois at Urbana-Champaign, 1990

Anshelevich, Michael V, Professor
Mathematics
PHD, University of California, Berkeley, 2000

Antao, Dion S, Assistant Professor
Mechanical Engineering
PHD, Drexel University, 2013

Apostolopoulos, Yiorgos, Associate Professor
Health & Kinesiology
PHD, University of Connecticut, 1994

Appiah, Bernard, Assistant Professor
Environmental & Occptnl Hlth
DrPH, Texas A&M Health Science Center School of Public Health, 2013

Applegate, Brian E, Associate Professor
Biomedical Engineering
PHD, Ohio State University, 2000

Aramayo, Rodolfo A, Associate Professor
Biology
PHD, University of Georgia, 1992

Archer, Holli R, Assistant Professor
Ag Leadership, Educ & Comm
PHD, Texas A&M University, 2013

Ardani, Samira, Research Assistant Professor
Ocean Engineering
PHD, Texas A&M University, 2016

Arenas, Angela M, Assistant Professor
Veterinary Pathobiology
PHD, Texas A&M University, 2007
DVM, La Salle University, Colombia, 2002

Arize, Victor, Professor
Hispanic Studies
PHD, University of Michigan Ann Arbor, 1982

Armitage Chan, Anna R, Associate Professor
Marine Biology
PHD, University of California, Los Angeles, 2003

Armstrong, Carisa L, Clinical Associate Professor
Health & Kinesiology
MFA, Case Western Reserve University, 2002

Armstrong, Kristin N, Veterinary Intern
Vet Small Animal Clinical Sc
DVM, University of Missouri, 2017

Arnet, Nicholas A, Lecturer
Chemistry
PHD, Yale University, 2016

Arnold, Carolyn E, Associate Professor
Vet Large Animal Clinical Sc
DVM, Michigan State University, 1998

Arnold, Michael A, Professor
Horticultural Sciences
PHD, North Carolina State University, 1990

Arnold, Stacey R, Clinical Assistant Professor
Internal Medicine
EDD, Texas A&M University, 2007

Aronson, Meigan C, Professor
Physics & Astronomy
PHD, University of Illinois - Urbana-Champaign, 1988

Arosh, Joe A, Professor
Vet Integrative Biosciences
PHD, Universite Laval, 2004

Arosh, Sakhila B, Associate Professor
Vet Integrative Biosciences
PHD, University of Madras, 2002

Arreola-Risa, Antonio, Associate Professor
Information & Operations Mgmt
PHD, Stanford University, 1989

Arroyave, Raymundo, Professor (courtesy appointment)
Mechanical Engineering
PHD, Massachusetts Inst of Technology, 2004

Arroyave, Raymundo, Professor
Materials Science & Engr
PHD, Massachusetts Inst of Technology, 2004

Arthur Jr, Winfred E, Professor
Psychology
PHD, The University of Akron, 1988

Asadi, Amir, Assistant Professor
Eng Tech & Ind Distribution
PHD, University of Manitoba, 2013

Asadi, Amir, Assistant Professor (courtesy appointment)
Mechanical Engineering
PHD, University of Manitoba, 2013

Ashley III, Frank B, Senior Professor
George Bush School of Govern
EDD, The University of Alabama, 1986

Ashley III, Frank B, Senior Professor
Public Service & Administration
EDD, The University of Alabama, 1986

Athrey, Giridhar N, Assistant Professor
Poultry Science
PHD, University of Louisiana at Lafayette, 2009

Athreya, Sheela, Associate Professor
Anthropology
PHD, Washington University in St. Louis, 2003

Atif, Morad R, Professor of the Practice
College of Engineering
PHD, Texas A&M University, 1992
Aubeny, Charles P, Professor
Civil Engineering
PHD, Massachusetts Inst of Technology, 1992

Aufderheide, Karl J, Associate Professor
Biology
PHD, University of Minnesota, 1974

Augsburger, Robert A, Clinical Assistant Professor
Endodontics
DDS, University of California-San Francisco, 1973

August, John R, Professor
Vet Small Animal Clinical Sc
BVetMed, University of London, 1973

Autenrieth, Robin L, Professor
Civil Engineering
PHD, Clarkson University, 1986

Authement, Renae S, Clinical Assistant Professor
College of Nursing
DNP, Loyola University, 2015

Avery, Andrew N, Clinical Professor
Primary Care Medicine
MD, University of Texas Medical Branch at Galveston, 1973

Awika, Joseph M, Professor
Soil & Crop Sciences
PHD, Texas A&M University, 2003

Ayari, Salah, Instructional Associate Professor
International Studies
PHD, University of Minnesota, 1998

Ayres, Nicola M, Senior Lecturer
Biochemistry & Biophysics
PHD, University of Nebraska - Lincoln, 1987

Ayres, Pamela S, Professor
School of Law
JD, BAYLOR UNIVERSITY, 1988

Azevedo, Carolina P, Veterinary Resident
Veterinary Pathobiology
DVM, Louisiana State University, 2015

Aziz, Sahar F, Professor
School of Law
JD, The University of Texas School of Law, 2004

Babe, John C, Associate Professor of the Practice
Architecture
MS, University of Houston, 2015

Baca, David R, Instructional Assistant Professor
TAMU Libraries
PHD, Texas A&M University, 2006

Bach, Damon R, Lecturer
History
PHD, Texas A&M University, 2013

Baek, Eunkyeng, Assistant Professor
Educational Psychology
PHD, University of South Florida, 2015

Baer, Judith A, Professor
Political Science
PHD, University of Chicago, 1974

Baetge, Claire C, Clinical Assistant Professor
Health & Kinesiology
PHD, Texas A&M University, 2014

Baetge, Courtney L, Clinical Assistant Professor
Vet Small Animal Clinical Sc
DVM, Texas A&M University, 2003

Bagavathiannan, Muthukumar V, Assistant Professor
Soil & Crop Sciences
PHD, University of Manitoba, Canada, 2010

Bagher, Pooneh, Assistant Professor
College of Medicine
PHD, Cornell University, 2007

Balester, Valerie M, Professor
English
PHD, The University of Texas - Austin, 1998

Bales, Stephen E, Associate Professor
TAMU Libraries
PHD, University of Tennessee, Knoxville, 2008

Balester, Valerie M, Professor
English
PHD, The University of Texas - Austin, 1998
Baletka, Dawn M, Instructional Assistant Professor
Health & Kinesiology
PHD, Sam Houston State University, 2006

Ball III, James R, Assistant Professor
Performance Studies
PHD, New York University, 2012

Ballard, Danny J, Adjunct Professor
Health & Kinesiology
PHD, Oklahoma State University, 1982

Ballouli, Khalid W, Adjunct Assistant Professor
Health & Kinesiology
PHD, Texas A&M University, 2011

Balog Jr, Robert S, Associate Professor
Electrical & Computer Eng
PHD, University of Illinois, 2006

Balog Jr, Robert S, Associate Professor
Texas A&M University at Qatar
PHD, University of Illinois, 2006

Balsis, Stephen M, Associate Professor
Psychology
PHD, Washington University in St. Louis, 2008

Balta, Joseph B, Visiting Assistant Professor
Geology & Geophysics
PHD, California Institute of Technology, 2010

Baltazar, Juan Carlos, Associate Professor
Architecture
PHD, Texas A&M University, 2006

Baltensperger, David D, Professor
Soil & Crop Sciences
PHD, New Mexico State University, 1981

Banerjee, Amarnath P, Professor
Industrial & Systems Eng
PHD, University of Illinois at Chicago, 1999

Banerjee, Debjyoti, Professor
Mechanical Engineering
PHD, University of California, Los Angeles, 1999

Banerjee, Debjyoti, Professor
Petroleum Engineering
PHD, University of California, Los Angeles, 1999

Banerjee, Sarbjit, Professor
Chemistry
PHD, State University of New York at Stony Brook, 2004

Banerjee, Sarbjit, Professor
Materials Science & Engr
PHD, State University of New York at Stony Brook, 2004

Bankaitis, Vytas A, Professor
Molecular & Cellular Medicine
PHD, University of North Carolina, 1984

Banks, Margaret K, Distinguished Professor
Civil Engineering
PHD, Duke University, 1989

Bankston, Sarah K,
TAMU Libraries
MFA, North Carolina State University, 2007

Bapst, David W, Lecturer
Geology & Geophysics
PHD, University of Chicago, 2013

Barboza, Peregrine S, Professor
Wildlife & Fisheries Sciences
PHD, University of New England, 1991

Bardenhagen, Eric K, Assistant Professor
Land Arch & Urban Planning
PHD, Texas A&M University, 2011
MLA, Texas A&M University, 1999

Barge, James K, Professor
Communication
PHD, University of Kansas, 1985

Barnes, Wayne R, Professor
School of Law
JD, Texas Tech University School of Law, 1995

Barnett, Brandon W, Adjunct Professor
School of Law
JD, Texas Tech University School of Law, 2005

Barondeau, David P, Associate Professor
Chemistry
PHD, Texas A&M University, 1996

Barr, Andrew C, Assistant Professor
Economics
PHD, University of Virginia, 2015

Barrick, Murray R, Distinguished Professor
Management
PHD, University of Akron, 1988

Barrington, Craig M, Adjunct Assistant Professor
General Dentistry
DDS, University of Texas Health Science Center at San Antonio, 1996

Barrington, Jennifer J, Clinical Associate Professor
General Dentistry
DDS, The University of Texas Health Science Center at Houston, 1996

Barroso, Luciana R, Associate Professor
Civil Engineering
PHD, Stanford University, 1999

Barrufet, Maria A, Professor
Petroleum Engineering
PHD, Texas A&M University, 1987

Barry, Adam, Associate Professor
Health & Kinesiology
PHD, Texas A&M University, 2007
Barton, Claudia L, Professor  
Vet Small Animal Clinical Sc  
DVM, University of Missouri, 1973

Bashir, Hassan, Associate Professor  
Texas A&M University at Qatar  
PHD, Texas A&M University, 2008

Baskin, Dean R, Assistant Professor  
Mathematics  
PHD, Stanford University, 2010

Bassichis, William H, Professor  
Physics & Astronomy  
PHD, Case Western Reserve University, 1963

Bastian, Peter A, Professor of the Practice  
Petroleum Engineering  
MS, Texas A&M University, 1983

Batchelor, Bill, Senior Professor  
Civil Engineering  
PHD, Cornell University, 1976

Batista, Paul J, Associate Professor  
Health & Kinesiology  
JD, Baylor University, 1976

Batteas, James D, Professor  
Chemistry  
PHD, University of California, Berkeley, 1995

Health & Kinesiology
PHD, Texas State University, 2005

Campbell, Heidi A, Associate Professor
Communication
PHD, The University of Edinburgh, 2002

Campbell, Lisa, Professor
Oceanography
PHD, State University of New York at Stony Brook, 1985

Campbell, Mary E, Associate Professor
Sociology
PHD, University of Wisconsin - Madison, 2004

Campos-Bowers, Monica H, Instructional Assistant Professor
Hlth Promotion & Comm Hlth Sci
DrPH, University Of North Texas Health Science Center, 2008

Cannaday, Rania A, Clinical Assistant Professor
Humanities in Medicine
MD, The University of Texas Health Science Center at Houston, 2014

Cannella Jr, Albert A, Professor
Management
PHD, Columbia University, 1991

Cannon, Carolyn L, Associate Professor
Microbial Pathogenesis & Imm
PHD, The University of Texas Health Science Center at Houston, 1993

Cannon, Marvin S, Visiting Professor
Vet Integrative Biosciences
PHD, The Ohio State University, 1969

Cantey V, Samuel B, Adjunct Professor
School of Law
JD, University of Tulsa College of Law, 2002

Cantrell Jr, Pierce E, Senior Associate Professor
Electrical & Computer Eng
PHD, Georgia Institute of Technology, 1981

Cantrell, Emily S, Clinical Assistant Professor
Teaching, Learning & Culture
PHD, Texas A&M University, 2008

Capar, Ismail, Associate Professor
Eng Tech & Ind Distribution
PHD, Mississippi State University, 2007

Capareda, Sergio C, Professor
Biological & Agricultural Eng
PHD, Texas A&M University, 1990

Capper, David W, Instructional Assistant Professor
Liberal Studies
PHD, Baylor University, 2013

Capraro, Mary M, Professor
Teaching, Learning & Culture
PHD, University of Southern Mississippi, 2000

Capraro, Robert M, Professor
Teaching, Learning & Culture
PHD, University of Southern Mississippi, 2000

Cardoso De Cardoso, Leonardo, Assistant Professor
Performance Studies
PHD, University of Texas at Austin, 2013
MMU, University of Texas at Austin, 2010

Carey, John B, Professor
Poultry Science
PHD, Kansas State University, 1982

Carley, Robert F, Assistant Professor
International Studies
PHD, Texas A&M University, 2012

Carlson, David L, Professor
Anthropology
PHD, Northwestern University, 1979

Carlson, Deborah N, Associate Professor
Anthropology
PHD, University of Texas at Austin, 2004

Carlson, Kimberly A, Senior Lecturer
Construction Science
MAR, Texas A&M University, 2002

Carly-Miles, Claire I, Lecturer
English
PHD, Texas A&M University, 2008

Carney, Ginger E, Professor
Biology
PHD, University of Georgia, 1998

Carrillo, Genny, Associate Professor
Environmental & Occptnl Hlth
PHD, Tulane University, School of Public Health, 1993
MD, University of the Yucatan, 1983

Carrillo, Roberto, Adjunct Assistant Professor
Orthodontics
DDS, Universidad Autonoma de Nuevo Leon, 2002

Carrino, Gerard E, Instructional Professor
Health Policy & Management
PHD, Columbia University Mailman School of Public Health, 2005

Carroll, Matthew C, Instructional Assistant Professor
Marine Engineering Technology
PHD, University of Illinois at Urbana-Champaign, 1986

Carroll, Matthew C, Instructional Assistant Professor
Ocean Engineering
PHD, University of Illinois at Urbana-Champaign, 1986

Carroll, Raymond J, Distinguished Professor
Statistics
PHD, Purdue University, 1974
Carson, Katherine H, Instructional Assistant Professor
Soil & Crop Sciences
PHD, University of Arkansas, 1999

Carstens, Gordon E, Professor
Animal Science
PHD, Colorado State University, 1998

Carter Sowell, Adrienne R, Associate Professor
Psychology
PHD, Purdue University, 2010

Carter, Misti H, Clinical Assistant Professor
Primary Care Medicine
PHD, University of Texas, 2003

Carter, Tamara A, Instructional Assistant Professor
Mathematics
PHD, Texas A&M University, 2005

Cartwright, Chris S, Clinical Assistant Professor
Restorative Sciences
DDS, Baylor College of Dentistry, 1978

Soil & Crop Sciences
PHD, Texas A&M University, 2001

Dennie, Christian S, Adjunct Professor
School of Law
JD, University of Oklahoma, 2004

Depoy, Darren L, Professor
Physics & Astronomy
PHD, University of Hawaii at Manoa, 1987

Derr, James N, Professor
Veterinary Pathobiology
PHD, Texas A&M University, 1990

Deshong, Tery D, Executive Professor
Management
DJ, The University of Tulsa, 1991

Dessler, Andrew E, Professor
Atmospheric Sciences
PHD, Harvard University, 1994

Deutz, Nicolaas, Professor
Health & Kinesiology
MD, University of Amsterdam, 1988

Deva, Eswara-Reddy B, Associate Professor
TAMU Libraries
PHD, Karnataka University, 1984

Devarenne, Timothy P, Associate Professor
Biochemistry & Biophysics
PHD, University of Kentucky, 2000

Deveau, Michael A, Clinical Associate Professor
Vet Small Animal Clinical Sciences
DVM, Kansas State University, 2005

Devers, Cynthia E, Associate Professor
Management
PHD, Michigan State University, 2003

Devore, Ronald A, Distinguished Professor
Mathematics
PHD, Ohio State University, 1967

Dewitt, Thomas J, Associate Professor
Wildlife & Fisheries Sciences
PHD, State University of New York - Binghamton, 1996
Dewitte, Paula S, Associate Professor of the Practice
Computer Science & Engineering
JD, St. Mary’s School of Law, 2008
PHD, Texas A&M University, 1989

Dexter, Rayna M, Instructional Assistant Professor
Performance Studies
PHD, Kent State University, 2009

Deyong, Sarah J, Associate Professor
Architecture
PHD, Princeton University, 2008

Diaz, Michelle C, Clinical Assistant Professor
Accounting
PHD, Texas A&M University, 2005

Dicaglio, Joshua M, Assistant Professor
English
PHD, Pennsylvania State University, 2016

Dicaglio, Sara, Instructional Assistant Professor
English
PHD, Pennsylvania State University, 2016
MFA, University of Michigan, 2008

Dickey, Nancy J, Professor
Primary Care Medicine
MD, The University of Texas Health Science Center at Houston, 1976

Dickman, Martin B, Professor
Plant Pathology & Microbiology
PHD, University of Hawaii, 1986

Dickson, Donald R, Professor
English
PHD, University of Illinois, Urbana-Champaign, 1981

Diec, Sandy, Clinical Assistant Professor
College of Pharmacy
PHARMD, Texas Tech University, 2015

Diekwisch, Thomas G, Professor and Head, Director
Periodontics
DMD, Philipps-University of Marburg, West Germany, 1986

Dierker, Steven B, Professor
Physics & Astronomy
PHD, University of Illinois-Urbana-Champaign, 1983

Diesel, Alison B, Clinical Associate Professor
Vet Small Animal Clinical Sc
DVM, Kansas State University, 2005

Dietrich, Katheryn A, Instructional Associate Professor
Sociology
PHD, Texas A&M University, 1994

Dikec, Altay, Visiting Lecturer
Marketing
PHD, Konkuk University - Miller Graduate School of Business, 2012

Dimarco, Steven F, Professor
Oceanography
PHD, University of Texas at Dallas, 1991

Dindot, Scott V, Associate Professor
Veterinary Pathobiology
PHD, Texas A&M University, 2003

Ding, Yu, Professor
Industrial & Systems Eng
PHD, University of Michigan, 2001

Dinges, Lewis R, Clinical Assistant Professor
Vet Large Animal Clinical Sc
DVM, Texas A&M University, 1995

Dirani, Khalil M, Associate Professor
Educ Admn & Human Resource Dev
PHD, University of Illinois-Urbana Champaign, 2007

Ditty, James G, Lecturer
Marine Biology
PHD, Louisiana State University and A&M College, 2002

Dixit, Manish K, Assistant Professor
Construction Science
PHD, Texas A&M University, 2013

Dixon, Laurie Q, Associate Professor
Teaching, Learning & Culture
PHD, Harvard University Graduate School of Education, 2004

Dixon, Marlene A, Professor
Health & Kinesiology
PHD, Ohio State University, 2002

Dixon, Mary O, Clinical Assistant Professor
Health & Kinesiology
PHD, Texas A&M University, 2011

Dodd, Johnathon R, Clinical Professor
Vet Small Animal Clinical Sc
DVM, Texas A&M University, 1979

Doering, Alyssa K, Veterinary Resident
Vet Large Animal Clinical Sc
DVM, Colorado State University, 2015

Dominguez, Brandon J, Clinical Associate Professor
Vet Large Animal Clinical Sc
DVM, Texas A&M University, 2005

Domsky, Darren K, Associate Professor
Liberal Studies
PHD, York University, 2006

Dongaonkar, Ranjeet M, Assistant Professor
Vet Physiology & Pharmacology
PHD, Texas A&M University, 2008

Donkor, David A, Associate Professor
Performance Studies
PHD, Northwestern University, 2008

Donnell, Cydney C, Executive Professor
Finance
MBA, Southern Methodist University, 1982
Donovan, Arthur D, Professor of the Practice
Geology & Geophysics
PHD, Colorado School of Mines, 1985

Donovan, Lawrence J, Clinical Assistant Professor
Primary Care Medicine
MD, University of Texas Medical School at San Antonio, 1981

Donzis, Diego A, Associate Professor
Aerospace Engineering
PHD, Georgia Institute of Technology, 2007

Dooley, Kim E, Professor
Ag Leadership, Educ & Comm
PHD, Texas A&M University, 1995

Dooley, Larry M, Associate Professor
Educ Admin & Human Resource Dev
PHD, Texas A&M University, 1989

Dormire, Sharon L, Professor
College of Nursing
PHD, University of Florida, 1992

Dorsey, Leroy G, Professor
Communication
PHD, Indiana University, 1993

Dostal, David E, Professor
College of Medicine
PHD, University of Missouri, 1986

Dougherty Jr, Edward R, Distinguished Professor
Electrical & Computer Eng
PHD, Rutgers State University of New Jersey, 1974

Douglas, Ronald G, Distinguished Professor
Mathematics
PHD, Louisiana State University and A&M College, 1962

Dowdy, Diane M, Instructional Assistant Professor
Health Promotion & Comm Hlth Sci
PHD, Texas A&M University, 1990

Downing, Nancy, Associate Professor
College of Nursing
PHD, The University of Iowa, 2010

Dox, Donnalee, Professor
Performance Studies
PHD, University of Minnesota, Twin Cities, 1995

Dragolich, William E, Adjunct Assistant Professor
General Dentistry
DDS, Ohio State University, 1983

Drayer, Penelope R, Clinical Assistant Professor
General Dentistry
DDS, Texas A&M Baylor College of Dentistry, 2009

School of Law
JD, Southern Methodist University, 1977

Dronen Jr, Norman O, Professor
Wildlife & Fisheries Sciences
PHD, New Mexico State University, 1974

Dror, Olga, Associate Professor
History
PHD, Cornell University, 2003

Dryden, Joseph, Adjunct Professor
School of Law
JD, California Western School of Law, 1990

Du, Jing, Assistant Professor
Construction Science
PHD, Michigan State University, 2012

Duan, Benchun, Associate Professor
Geology & Geophysics
PHD, University of California, Riverside, 2006

Dubois, Dustin W, Research Assistant Professor
Neuroscience Experiment Theara
PHD, Texas A&M University Health Science Center, 2004

Dubriwny, Tasha N, Associate Professor
Communication
PHD, University of Georgia, 2005

Duffield, Nicholas G, Professor
Computer Science & Engineering
PHD, Queen Mary College, Univ. of London, 1987

Duffield, Nicholas G, Professor
Electrical & Computer Eng
PHD, Queen Mary College, Univ. of London, 1987

Duffy III, Thomas J, Adjunct Professor
School of Law
LLM, Columbia Law School, 1992
JD, Syracuse University, 1973

Dulin, Jennifer N, Assistant Professor
Biology
PHD, University of Texas Health Science Center, 2012

Dunaway, Johanna L, Associate Professor
Communication
PHD, Rice University, 2006

Dunbar, Bonnie Jeanne, Professor
Aerospace Engineering
PHD, University of Houston, 1983

Dunbar, Kim R, Distinguished Professor
Chemistry
PHD, Purdue University, 1984

Dunlap, Kathrin A, Assistant Professor
Animal Science
PHD, Texas A&M University, 2006

Dunsford, Deborah W, Senior Lecturer
Ag Leadership, Educ & Comm
PHD, Texas A&M University, 1993
Duong, Tri, Associate Professor
Poultry Science
PHD, North Carolina State University, 2008

Duplessis, Nicole M, Lecturer
English
PHD, Texas A&M University, 2008

Dupriest, Fred E, Professor of the Practice
Petroleum Engineering
BS, Texas A&M University, 1977

Duran Vinent, Orencio, Research Assistant Professor
Ocean Engineering
PHD, University of Stuttgart, 2007

Durko, Angela M, Lecturer
Recreation, Park & Tourism Sc
PHD, Texas A&M University, 2014

Dutta, Anandi K, Lecturer
Computer Science & Engineering
PHD, University of Louisiana at Lafayette, 2016

Dutta, Bhaskar, Professor
Physics & Astronomy
PHD, Oklahoma State University, 1995

Dvorak, Bruce D, Associate Professor
Land Arch & Urban Planning
MLA, University of Illinois at Urbana-Champaign, 1994

Dwivedi, Priyanka, Assistant Professor
Management
PHD, The Pennsylvania State University, 2017

Dworkin, Ira M, Assistant Professor
English
PHD, Texas A&M University, 2017

Dwyer, William G, Lecturer
George Bush School of Govern
JD, Rutgers Law School, 2004

Dye, Richard T, Clinical Professor
Finance
PHD, Texas A&M University, 1993

Dyer, Megan K, Lecturer
Political Science
PHD, Texas A&M University, 2017

Dykema, Kenneth J, Professor
Mathematics
PHD, University of California, Berkeley, 1993

Eades, Erma S, Professor
Vet Large Animal Clinical Sc
PHD, University of Georgia, 1988
DVM, Louisiana State University, 1982

Earhart, Amy E, Associate Professor
English
PHD, Texas A&M University, 1999

Earnest, David, Professor
Neuroscience Experiment Theara
PHD, Northwestern University, Evanston, 1984

Eason, John M, Associate Professor
Sociology
PHD, University of Chicago, 2008

Easterwood, Leslie A, Clinical Assistant Professor
Vet Large Animal Clinical Sc
DVM, Texas A&M University, 1995

Easwaran, Kenneth K, Associate Professor
Philosophy & Humanities
PHD, University of California Berkeley, 2008

Ebbole, Daniel J, Professor
Plant Pathology & Microbiology
PHD, Purdue University, 1988

Echols, Katherine E, Instructional Assistant Professor
Liberal Studies
PHD, University of Houston, 2015

Eckel, Catherine C, Professor
Economics
PHD, University of Virginia, 1983

Eckhause, Melissa, Adjunct Professor
School of Law
JD, University of Detroit, 1998

Eckman, Stacy L, Clinical Associate Professor
Vet Small Animal Clinical Sc
DVM, Texas A&M University, 2001

Eckstein, Gabriel E, Professor
School of Law
JD, American University Washington College of Law, 1995

Economou, Ioannis, Professor
Texas A&M University at Qatar
PHD, Johns Hopkins University, 1993

Eden, Lorraine A, Professor
Management
PHD, Dalhousie University, Canada, 1976

Edens, John F, Professor
Psychology
PHD, Texas A&M University, 1996

Edens, Pamela S, Lecturer
Psychology
PHD, Texas A&M University, 1997

Edney, Kirk C, Instructional Associate Professor
Ag Leadership, Educ & Comm
PHD, Texas A&M University, 2009

Edwards III, George C, Distinguished Professor
Political Science
PHD, University of Wisconsin - Madison, 1973
Edwardson, Jeffrey C, Senior Lecturer
Economics
PHD, Texas A&M University, 2000

Efendiev, Yalchin R, Professor
Mathematics
PHD, California Institute of Technology, 1999

Ege, Matthew S, Assistant Professor
Accounting

Restorative Sciences
DDS, Baylor College of Dentistry, 1981

Ganz, Jennifer, Professor
Educational Psychology
PHD, University of Kansas, 2002

Gao, Huajian, Visiting Professor
College of Engineering
PHD, Harvard University, 1988

Gao, Huajian, Visiting Professor
Mechanical Engineering
PHD, Harvard University, 1988

Gao, Huilin, Assistant Professor
Civil Engineering
PHD, Princeton University, 2005

Garay, Juan A, Professor
Computer Science & Engineering
PHD, The Pennsylvania State University, 1989

Garcia Sanchez, Guillermo J, Associate Professor
School of Law
DJS, Harvard Law School, 2017
LLM, Harvard Law School, 2012
LLM, Fletcher School of Law & Diplomacy, 2011

Garcia, Alfredo A, Professor
Industrial & Systems Eng
PHD, University of Michigan, 1997

Garcia, Deni S, Adjunct Professor
School of Law
JD, Texas Wesleyan University, 2000

Garcia, Leslie L, Instructional Assistant Professor
Animal Science
PHD, Texas A&M University, 2015

Garcia, Luis R, Professor
Biology
DDS, Texas A&M University Baylor College of Dentistry, 1999

Garcia, Luis R, Professor
Biology
PHD, University of Texas at Austin, 1996

Garcia, Luis R, Adjunct Assistant Professor
Restorative Sciences
DDS, Texas A&M University Baylor College of Dentistry, 1999

Garcia, Robert K, Associate Professor
Philosophy & Humanities
PHD, University of Notre Dame, 2009

Garcia, Tanya P, Assistant Professor
Epidemiology & Biostatistics
PHD, Texas A&M University, 2011

Gardner, Wilford D, Professor
Oceanography
PHD, Massachusetts Inst of Technology, 1978
Garey, William D, Executive Professor
Finance
MBA, University of Houston - Clear Lake, 1980

Gariazzo, Mariana S, Instructional Assistant Professor
Performance Studies
DOC, University of Texas, 2005

Garney, Whitney R, Assistant Professor
Health & Kinesiology
PHD, Texas A&M University, 2015

Garritano, Carmela J, Associate Professor
College of Liberal Arts
PHD, Michigan State University, 2001

Gary, Jodie C, Assistant Professor
College of Nursing
PHD, University of Texas at Tyler, 2012

Garza, Brent A, Assistant Professor
Accounting
PHD, University of Illinois-Urbana-Champaign, 2017

Garza, Victor M, Clinical Assistant Professor
Psychiatry & Behavioral Sc
MD, Baylor College of Medicine, 2004

Gashev, Anatoliy A, Associate Professor
College of Medicine
PHD, Pavlov Institute of Physiology, 1989

Gaspar, Julian, Clinical Professor
Finance
PHD, Georgetown University, 1981

Gastel, Barbara J, Professor
Vet Integrative Biosciences
MD, Johns Hopkins University, 1978

Gatlin III, Delbert M, Professor
Wildlife & Fisheries Sciences
PHD, Mississippi State University, 1983

Gatson, Sarah N, Associate Professor
Sociology
PHD, Northwestern University, 1999

Gause III, Francis G, Professor
International Affairs
PHD, Harvard University, 1987

Gautam, Natarajan, Professor
Industrial & Systems Eng
PHD, University of North Carolina at Chapel Hill, 1997

Gaynanova, Irina, Assistant Professor
Statistics
PHD, Cornell University, 2015

Gehar, Chadi D, Lecturer
Electrical & Computer Eng
PHD, Texas A&M University, 2015

Gehring, Kerri B, Professor
Animal Science
PHD, Texas A&M University, 1994

Geisman, Harry N, Associate Professor
Information & Operations Mgmt
PHD, University of Texas at Dallas, 2003

Geisman, Karen S, Lecturer
Nutrition & Food Science
PHD, Texas Woman's University, Denton, 1998

Geller, Mark S, Adjunct Assistant Professor
Orthodontics
DDS, Baylor College of Dentistry, 1973

Geller, Susan C, Professor
Mathematics
PHD, Cornell University, 1975

Genecov, Jeffrey S, Adjunct Assistant Professor
Orthodontics
DDS, Baylor College of Dentistry, 1985

Gentry, Terry J, Professor
Soil & Crop Sciences
PHD, University of Arizona, 2003

Geoffroy, Cedric G, Assistant Professor
Neuroscience Experiment Theara
PHD, University of Cambridge, 2008

George, James P, Professor
School of Law
LLM, Columbia University School of Law, 1983
JD, The University of Tulsa, 1978

George, Theodore D, Associate Professor
Philosophy & Humanities
PHD, Villanova University, 2000

Georgiades, Costas N, Professor
Electrical & Computer Eng
PHD, Washington University in St. Louis, 1985

Geraci, Lisa D, Professor
Psychology
PHD, State University of New York at Stony Brook, 2001

Geva, Anat M, Professor
Architecture
PHD, Texas A&M University, 1995

Geva, Nehemia, Associate Professor
Political Science
PHD, Ohio State University, 1977

Gharaibeh, Nasir G, Associate Professor
Civil Engineering
PHD, University of Illinois, 1997

Gharehgozli, Amir Hossein, Assistant Professor
Maritime Administration
PHD, Rotterdam School of Management, 2012
Ghrayeb, Ali A, Professor  
Texas A&M University at Qatar  
PHD, University of Arizona, 2000

Giardino, John R, Professor  
Geology & Geophysics  
PHD, University of Nebraska, Lincoln, 1979

Gibbs, Brian C, Visiting Lecturer  
Architecture  
MAR, Texas A&M University, 2006

Gibbs, Holly C, Lecturer  
Biomedical Engineering  
PHD, Texas A&M University, 2015

Gibson Jr, Richard L, Professor  
Geology & Geophysics  
PHD, Massachusetts Institute of Technology, 1991

Gibson, Jeremy L, Clinical Associate Professor  
Primary Care Medicine  
MD, University of Texas Medical Branch at Galveston, 1998

Gibson, Tobias T, Lecturer  
International Affairs  
PHD, Washington University in St. Louis, 2006

Giese, Benjamin S, Professor  
Oceanography  
PHD, University of Washington, 1989

Giger, Maryellen, Visiting Professor  
College of Engineering  
PHD, University of Chicago, 1985

Gildin, Eduardo, Associate Professor  
Petrology Engineering  
PHD, University of Texas, 2006

Giles, Erin D, Assistant Professor  
Nutrition & Food Science  
PHD, McMaster University, 2015

Gill, Clare A, Professor  
Animal Science  
PHD, University of Adelaide, Australia, 2000

Gill, Jason J, Assistant Professor  
Animal Science  
PhD, University of Guelph, 2006

Henderson II, Bryan N, Adjunct Assistant Professor
Oral & Maxillofacial Surgery
DDS, Baylor College of Dentistry, 1987

Henderson, Michelle, Lecturer
Biochemistry & Biophysics
PHD, Texas A&M University, 2010

Henkes, Amanda E, TEES Research Scientist
Materials Science & Engr
PHD, Texas A&M University, 2008

Hennessy, Bernard J, Clinical Associate Professor
Diagnostic Sciences
DDS, University of Illinois Urbana, 1986

Henneking, William H, Executive Professor
School of Law
LLM, University of Illinois Champaign-Urbana, 1982
JD, University of Tennessee-Knoxville, 1976

Hensley, Douglas A, Senior Professor
Mathematics
PHD, University of Minnesota, 1974

Henson, Clifford C, Adjunct Professor
School of Law
JD, University of Illinois, 2011

Hepfer, Bradford F, Assistant Professor
Accounting
DBA, The University of Iowa, 2016

Hepfer, Katie L, Clinical Assistant Professor
College of Nursing
DNP, The University of Iowa, 2016

Herbert, Bruce E, Professor
TAMU Libraries
PHD, University of California, Riverside, 1992

Herman, Cheryl L, Clinical Associate Professor
Vet Integrative Biosciences
DVM, University of Saskatchewan, 1987
Herman, James D, Clinical Professor
Vet Physiology & Pharmacology
PHD, Texas A&M University, 1995
DVM, Texas A&M University, 1989

Herman, Jennifer K, Associate Professor
Biochemistry & Biophysics
PHD, Indiana University, 2005

Hermann, Charles F, Senior Professor
International Affairs
PHD, Northwestern University, 1995

Hernandez Magallanes, Irma Del Consue, Visiting Assistant Professor
Statistics
PHD, University California Berkley, 2010

Hernandez, Alexander A, Instructional Assistant Professor
Sociology
PHD, Boston College, 2014

Hernandez, Jose J, Assistant Professor
College of Pharmacy
PHD, University of Maryland, 2007

Hernandez, Sonia, Associate Professor
History
PHD, University of Houston, 2006

Herrera, Luz E, Professor
School of Law
JD, Harvard Law School, 1999

Herring, Andy D, Professor
Animal Science
PHD, Texas A&M University, 1994

Herschbach, Dudley R, Distinguished Professor
Physics & Astronomy
PHD, Harvard University, 1958

Heseltine, Johanna C, Clinical Assistant Professor
Vet Small Animal Clinical Sc
DVM, University of Saskatchewan, 1998

Hester, Yvette C, Instructional Associate Professor
Mathematics
PHD, Texas A&M University, 2000

Hetland, Robert D, Professor
Oceanography
PHD, Florida State University, 1999

Hicks, Joshua A, Associate Professor
Psychology
PHD, University of Missouri - Columbia, 2009

Hicks, Paul B, Professor
Psychiatry & Behavioral Sc
PHD, Baylor College of Medicine, 1983

Highfield, Wesley E, Associate Professor
Marine Science
PHD, Texas A&M University, 2008

Hilaly, Ahmad K, Professor of the Practice
Chemical Engineering
PHD, Colorado State University, 1992

Hilderbrand, Mary E, Associate Professor of the Practice
Public Service & Administration
PHD, Harvard University, 1992

Hill, Alfred D, Professor
Petroleum Engineering
PHD, University of Texas, 1978

Hill, Rodney C, Professor
Architecture
MAR, University of California - Berkeley, 1969

Hill, Ronald L, Lecturer
Marine Biology
PHD, University of Puerto Rico at Mayaguez, 2001

Hill-Jackson, Valerie L, Clinical Professor
Teaching, Learning & Culture
PHD, St. Joseph’s University, 2003

Hillhouse, Andrew E, Research Assistant Professor
Veterinary Pathobiology
PHD, University of Missouri-Columbia, 2010

Hillman, Sara K, Assistant Professor
Texas A&M University at Qatar
PHD, Michigan State University, East Lansing, MI, 2011

Hilty, Christian B, Professor
Chemistry
PHD, Swiss Federal Institute of Technology Zurich, 2004

Hiney, Jill K, Research Assistant Professor
Vet Integrative Biosciences
PHD, Texas A&M University, 1996

Hinojosa, Felipe, Associate Professor
History
PHD, University of Houston, 2009

Hinrichs, Katrin, Professor
Vet Physiology & Pharmacology
PHD, University of Pennsylvania, 1988
DVM, University of California, Davis, 1978

Hinson, Whitney D, Veterinary Intern
Vet Small Animal Clinical Sc
DVM, The University of Georgia, 2015

Hinze, Erin S, Adjunct Assistant Professor
Pediatric Dentistry
DDS, Texas A&M University Baylor College of Dentistry, 2008

Hipwell, M Cynthia, Professor
Mechanical Engineering
PHD, University of California-Berkeley, 1996
Hnatek, Joyce P, Clinical Assistant Professor
Primary Care Medicine
MD, University of Texas Medical School at San Antonio, 1987

Hoagwood, Terence A, Professor
English
PHD, University of Maryland, 1979

Hodges, Amy M, Instructional Assistant Professor
Texas A&M University at Qatar
PHD, University of Arkansas, 2012

Hodges, Louis, Associate Professor
Recreation, Park & Tourism Sc
PHD, Texas A&M University, 1971

Hodgson, Lucia K, Assistant Professor
English
PHD, University of Southern California, 2009

Hoekstra, Mark L, Associate Professor
Economics
PHD, University of Florida, 2006

Hoffman, Anton G, Clinical Professor
Vet Integrative Biosciences
PHD, Texas A&M University, 1992
DVM, Texas A&M University, 1986

Hoffman, Matt F, Clinical Assistant Professor
College of Nursing
DNP, The University of Iowa, 2016

Hogan, Harry A, Associate Professor
Biomedical Engineering
PHD, Texas A&M University, 1984

Hogan, Harry A, Professor
Mechanical Engineering
PHD, Texas A&M University, 1984

Hogler, Joe Louis, Lecturer
George Bush School of Govern
PHD, University of Kent, 2011

Hogue Jr, Grady C, Clinical Assistant Professor
Primary Care Medicine
MD, University of Texas Health Science Center at San Antonio, 1984

Holder, Eugene P, Clinical Assistant Professor
College of Pharmacy
PR1, The University of Texas at Austin, 1994

Holditch, Stephen A, Professor
Petroleum Engineering
PHD, Texas A&M University, 1976

Holladay, Sherry J, Professor
Communication
PHD, Purdue University, 1992

Holland, Hubert B, Professor
School of Law
LLM, Columbia University School of Law, 2003
JD, American University Washington College of Law, 1998

Hoellenbach, Florian M, Assistant Professor
Political Science
PHD, Duke University, 2015

Holliday III, Ray W, Assistant Professor of the Practice
Architecture
MLA, Texas A&M University, 2000
MAR, Texas A&M University, 1992

Holliday, Shelley D, Associate Professor of the Practice
Architecture
MEN, Texas A&M University, 2001

Holste, James C, Senior Professor
Chemical Engineering
PHD, Iowa State University, 1973

Holt, Jeremy W, Assistant Professor
Physics & Astronomy
PHD, Stony Brook University, 2008

Holtzapple, Mark T, Professor
Chemical Engineering
PHD, University of Pennsylvania, 1981

Holyfield, Lavern P, Clinical Associate Professor
Public Health Sciences
DDS, Baylor College of Dentistry, 1977

Holzweiss, Robert F, Lecturer
History
PHD, Texas A&M University, 2001

Honeyman, Allen L, Associate Professor
Biomedical Sciences
PHD, University of Kansas, 1988

Hong, Yan, Associate Professor
Hlth Promotion & Comm Hlth Sci
PHD, Johns Hopkins University, Bloomberg School of Public Health, 2007

Hook, Axel M, Professor
Institute of Biosciences & Tec
PHD, University of Uppsala, Sweden, 1974

Hopkins, Allison L, Assistant Professor
Anthropology
PHD, University of Florida, 2009

Hoppes, Sharman M, Clinical Professor
Vet Small Animal Clinical Sc
DVM, Oklahoma State University, 1993

Horlen, Joseph P, Associate Professor
Construction Science
JD, Baylor University, 1980

Horney, Jennifer A, Associate Professor
Epidemiology & Biostatistics
PHD, University of North Carolina, 2009

Horrillo, Juan J, Associate Professor
Ocean Engineering
PHD, University of Alaska at Fairbanks, 2006
Horseman, Michael A, Clinical Associate Professor
College of Pharmacy
DOC, Medical University of South Carolina, 1983

Hou, I-Hong, Assistant Professor
Electrical & Computer Eng
PHD, University of Illinois Urbana Champaign, 2011

House Jr, Donald R, Visiting Lecturer
Economics
PHD, Texas A&M University, 2005

House, Felice L, Assistant Professor
Visualization
MFA, University of Texas at Austin, 2011

Howard, Daniel L, Professor
Sociology
PHD, Vanderbilt University, 1992

Howard, Michael D, Assistant Professor
Management
PHD, University of Washington, 2012

Howard, Peter B, Professor
Mathematics
PHD, Indiana University, 1998

Howe, Julie A, Associate Professor
Soil & Crop Sciences
PHD, University of Wisconsin - Madison, 2004

Howe, Lisa M, Professor
Vet Small Animal Clinical Sc
PHD, Texas A&M University, 1993
DVM, Texas A&M University, 1987

Howe, Roger, Professor
Teaching, Learning & Culture
PHD, University of California, Berkeley, 1969

Howell, Jessica M, Associate Professor
English
PHD, University of California, Davis, 2008

Hoyos, Sebastian, Associate Professor
Electrical & Computer Eng
PHD, University of Delaware, 2004

Hsieh, Sheng-Jen, Professor
Eng Tech & Ind Distribution
PHD, Texas Tech University, 1995

Hsieh, Sheng-Jen, Professor (courtesy appointment)
Mechanical Engineering
PHD, Texas Tech University, 1995

Hu, James C, Professor
Biochemistry & Biophysics
PHD, University of Wisconsin - madison, 1987

Hu, Jiang, Professor
Computer Science & Engineering
PHD, University of Minnesota, 2001

Hu, Jiang, Professor
Electrical & Computer Eng
PHD, University of Minnesota, 2001

Hu, Xia, Assistant Professor
Computer Science & Engineering
PHD, Arizona State University, 2015

Huang, Chang S, Associate Professor
Land Arch & Urban Planning
PHD, University of Pennsylvania, 1995
MLA, Pennsylvania State University, 1992

Huang, Gan G, Professor
Electrical & Computer Eng
PHD, Washington University in St. Louis, 1980

Huang, Gan G, Professor
Texas A&M University at Qatar
PHD, Washington University in St. Louis, 1980

Huang, Jianhua, Professor
Statistics
PHD, University of California, Berkeley, 1997

Huang, Reyko, Assistant Professor
International Affairs
PHD, Columbia University, 2012

Huang, Ruichong, Assistant Professor
Computer Science & Engineering
PHD, University of Utah, 2014

Huang, Shaoming, Assistant Professor
Computer Science & Engineering
PHD, Hong Kong University of Science and Technology, 2012

Huang, Shuning, Lecturer
Biomedical Engineering
PHD, Massachusetts Institute of Technology, 2009

Huang, Tingwen, Professor
Texas A&M University at Qatar
PHD, Texas A&M University, 2002

Huang, Yongheng, Associate Professor
Biological & Agricultural Eng
PHD, University of Nebraska - Lincoln, 2002

Huang, Yun, Assistant Professor
Institute of Biosciences & Tec
PHD, Georgia State University, 2009

Hubbard Jr, James E, Visiting Professor
College of Engineering

Hubbard, David E, Associate Professor
TAMU Libraries
PHD, Northwest Missouri State University, 2012

Hubbard, John K, Instructional Associate Professor
Neuroscience Experiment Theare
PHD, Texas A&M University, 1996
Hudson, Angela P, Professor
History
PHD, Yale University, 2007

Hudson, David R, Instructional Associate Professor
History
PHD, Texas A&M University, 1998

Hudson, Shane L, Clinical Professor
Health & Kinesiology
PHD, Texas A&M University, 2007

Hudson, Valerie M, Professor
International Affairs
PHD, The Ohio State University, 1983

Hueste, Marybeth D, Professor
Civil Engineering
PHD, University of Michigan, 1997

Huff, Gregory H, Associate Professor
Electrical & Computer Eng
PHD, University of Illinois, 2006

Hughbanks, Timothy R, Professor
Chemistry
PHD, Cornell University, 1983

Hui, Jason C, Adjunct Assistant Professor
Restorative Sciences
DDS, Texas A&M University Baylor College of Dentistry, 2011

Hull, Rachel G, Instructional Associate Professor
Psychology
PHD, Texas A&M University, 2003

Humphrey, Daniel, Associate Professor
College of Liberal Arts
PHD, University of Rochester, 2006

Hung, Nguyen P, Associate Professor
Eng Tech & Ind Distribution
PHD, University of California, Berkeley, 1987

Hung, Nguyen P, Associate Professor (courtesy appointment)
Mechanical Engineering
PHD, University of California, Berkeley, 1987

Hunsucker, Bob C, Adjunct Assistant Professor
General Dentistry
DDS, Baylor College of Dentistry, 1989

Huntley, Jerry W, Assistant Lecturer
Wildlife & Fisheries Sciences
PHD, Texas A&M University, 2017

Hur, Byul, Assistant Professor
Eng Tech & Ind Distribution
PHD, University of Florida, 2011

Hur, Pilwon, Assistant Professor
Mechanical Engineering
DEN, University of Illinois at Urbana-Champaign, 2010

Hurdle, Julian G, Associate Professor
Institute of Biosciences & Tec
PHD, University of Leeds, 2005

Hurlebaus, Stefan, Professor
Civil Engineering
PHD, University of Stuttgart, Germany, 2002

Hurst, Kenneth R, Lecturer
Land Arch & Urban Planning
PHD, Texas A&M University, 2016
MLA, University of Oklahoma, 1988

Hurtado Clavijo, Luis A, Associate Professor
Wildlife & Fisheries Sciences
PHD, Rutgers, 2002

Hurtado, John E, Professor
Aerospace Engineering
PHD, Texas A&M University, 1995

Huston, David P, Professor
Microbial Pathogenesis & Immune System
MD, Wake Forest University, 1973

Hutchison, Robert W, Clinical Associate Professor
College of Pharmacy
PR1, College of Pharmacy University of Arkansas for Medical Sciences, 1999

Hutson, Brent B, Clinical Associate Professor
Restorative Sciences
DDS, Baylor College of Dentistry, 1993

Hwang, Haeshin, Professor
Economics
PHD, University of Minnesota, Twin Cities, 1976

Hwang, Wonmuk, Associate Professor
Biomedical Engineering
PHD, Boston University, 2001

Hwang, Wonmuk, Associate Professor
Materials Science & Engineering
PHD, Boston University, 2001

Hyde, Jennifer A, Assistant Professor
Microbial Pathogenesis & Immune System
PHD, Texas A&M University Health Science Center, 2005

Hyodo, Ayumi, Research Assistant Professor
Ecosystem Science & Management
PHD, The University of Western Ontario, 2010

Iakovou, Eleftherios, Professor
Eng Tech & Ind Distribution
PHD, Cornell University, 1992

Ibrahim, Amir M, Professor
Soil & Crop Sciences
PHD, Colorado State University, 1998

Ighani, Elham E, Adjunct Assistant Professor
Restorative Sciences
DDS, Texas A&M Baylor College of Dentistry, 2008

Kamphoefner, Walter D, Professor
History
PHD, University of Missouri, 1978

Kan, Christina S, Assistant Professor
Marketing
PHD, University of Colorado-Boulder, 2015

Kane, Matthew H, Instructional Associate Professor
Marine Engineering Technology
PHD, Georgia Institute of Technology, 2007

Kane, Matthew H, Associate Professor
Materials Science & Engr
PHD, Georgia Institute of Technology, 2007

Kang, Cong X, Associate Professor
Liberal Studies
PHD, University of Texas, 1999

Kang, Heonyong, Research Assistant Professor
Ocean Engineering
PHD, Texas A&M University, 2014

Kang, Ho-Yeong, Associate Professor
Construction Science
PHD, Texas A&M University, 2001

Kanta, Lufthansa R, Instructional Assistant Professor
Civil Engineering
PHD, Texas A&M University, 2009

Kao, Katy C, Associate Professor
Chemical Engineering
PHD, University of California, Los Angeles, 2005

Kaplan, Craig D, Associate Professor
Biochemistry & Biophysics
PHD, Harvard University, 2003

Kapler, Geoffrey, Professor
Molecular & Cellular Medicine
PHD, Harvard University, 1989

Kapoor, Rishika, Adjunct Assistant Professor
Periodontics
DDS, Texas A&M University, 2014

Karaman, Ibrahim, Professor
Aerospace Engineering
PHD, University of Illinois - Urbana-Champaign, 2000

Karaman, Ibrahim, Professor (courtesy appointment)
Mechanical Engineering
PHD, University of Illinois - Urbana-Champaign, 2000

Karaman, Ibrahim, Professor
Materials Science & Engr
PHD, University of Illinois - Urbana-Champaign, 2000

Karapisahi, Sena, Instructional Assistant Professor
International Studies
PHD, Universiteit Leiden, 2006

Karbowiak, Steve W, Clinical Associate Professor
Restorative Sciences
DDS, The University of Texas Health Science Center at Houston, 1972

Karim, Muhammad N, Professor
Chemical Engineering
PHD, University of Manchester, 1977

Karkoub, Mansour, Professor
Texas A&M University at Qatar
PHD, University of Minnesota, 1994

Karns, Joel D, Adjunct Assistant Professor
Restorative Sciences
DDS, Texas A&M Baylor College of Dentistry, 2000

Karpac, Jason S, Assistant Professor
Molecular & Cellular Medicine
PHD, The University of Oklahoma Health Sciences Center, 2007
Karpetis, Adonios N, Associate Professor
Aerospace Engineering
PHD, Yale University, 1998

Karsilayan, Aydin I, Associate Professor
Electrical & Computer Eng
PHD, Portland State University, 2000

Karthikeyan, Raghupathy, Associate Professor
Biological & Agricultural Eng
PHD, Kansas State University, 2001

Kash, Bita A, Associate Professor
Health Policy & Management
PHD, Texas A&M Health Science Center - School of Rural Public Health, 2007

Keiper, Paul, Clinical Associate Professor
Health & Kinesiology
EDD, Texas A&M University, 2002

Keith, Verna M, Professor
Sociology
PHD, University of Kentucky, 1982

Keifer, Brandis K, Lecturer
Biomedical Engineering
PHD, Politecnico di Milano, 2013

Kellstedt, Paul M, Professor
Political Science
PHD, University of Minnesota, Twin Cities, 1996

Kemp, Walter M, Professor
Biology
PHD, The Tulane University of Louisiana, 1969

Kendall, Shari E, Associate Professor
English
PHD, Georgetown University, 1999

Kenerley, Charles M, Professor
Plant Pathology & Microbiology
PHD, North Carolina State University, 1983

Kenimer, Ann L, Professor
Biological & Agricultural Eng
PHD, University of Illinois at Urbana-Champaign, 1990

Kerins, Carolyn A, Associate Professor
Pediatric Dentistry
PHD, Baylor College of Dentistry, 2004
DDS, Baylor College of Dentistry, 2002

Keefe, Lisa M, Instructional Assistant Professor
Vet Integrative Biosciences
PHD, Purdue University, 2013

Keefe, Lisa M, Instructional Assistant Professor
Vet Integrative Biosciences
PHD, Purdue University, 2013
Kesterke, Matthew J, Instructional Assistant Professor  
Biomedical Sciences  
PHD, University of Pittsburgh, 2016

Ketzenberg, Michael E, Associate Professor  
Information & Operations Mgmt  
PHD, University of North Carolina at Chapel Hill, 2000

Keyser, John C, Professor  
Computer Science & Engineering  
PHD, University of North Carolina at Chapel Hill, 2000

Kezunovic, Mladen, Professor  
Electrical & Computer Eng  
PHD, University of Kansas, 1980

Khan, Mansoor A, Professor  
College of Pharmacy  
PHD, St. John's University, 1992

Khan, Rizwanur R, Assistant Professor  
Texas A&M University at Qatar  
PHD, University of Michigan, 2007

Khatri, Sunil P, Professor  
Electrical & Computer Eng  
PHD, University of California, Berkeley, 1999

Khazaal, Natalie M, Assistant Professor  
International Studies  
PHD, UCLA, 2007

Khosravianghadikolaei, Homa, Research Assistant Professor  
Chemical Engineering  
PHD, University of Illinois at Chicago, 2013

Kian, Rozita, Research Assistant Professor  
Ocean Engineering  
PHD, Middle East Technical University, 2015

Kianfar, Kiavash, Associate Professor  
Industrial & Systems Eng  
PHD, North Carolina State University, 2007

Kiehl, Whitney M, Veterinary Resident  
Veterinary Pathobiology  
DVM, Mississippi State University, 2017

Kier, Ann B, Senior Professor  
Veterinary Pathobiology  
PHD, University of Missouri - Columbia, 1979  
DVM, Texas A&M University, 1974

Killough, John E, Professor  
Petroleum Engineering  
PHD, Rice University, 1986

Kim, Bo Ah, Assistant Lecturer  
Land Arch & Urban Planning  
PHD, Texas A&M University, 2016

Kim, Dong-Ki, Research Assistant Professor  
Molecular & Cellular Medicine  
PHD, Tokyo Institute of Technology, 2003

Kim, Dongin, Assistant Professor  
College of Pharmacy  
PHD, University of Utah, 2009

Kim, Eun J, Associate Professor  
Computer Science & Engineering  
PHD, Pennsylvania State University, 2003

Kim, Haejune, Research Assistant Professor  
Mechanical Engineering  
PHD, University of Wisconsin - Milwaukee, 2014

Kim, Hoi-Eun, Associate Professor  
History  
PHD, Harvard University, 2006

Kim, Hwagyun, Associate Professor  
Finance  
PHD, University of Chicago, 2003

Kim, Jihoon, Assistant Professor  
Petroleum Engineering  
PHD, Stanford University, 2010

Kim, Joung Dong, Instructional Assistant Professor  
Mathematics  
PHD, State University of New York at Stony Brook, 2012

Kim, Moohyun, Professor  
Civil Engineering  
PHD, Massachusetts Institute of Technology, 1988

Kim, Moohyun, Professor  
Ocean Engineering  
PHD, Massachusetts Institute of Technology, 1988

Kim, Sun J, Research Assistant Professor  
Vet Integrative Biosciences  
PHD, Sogang University, 2006

Kim, Won-Jong, Associate Professor  
Mechanical Engineering  
PHD, Massachusetts Inst of Technology, 1997

Kim, Yang M, Lecturer  
Land Arch & Urban Planning  
MLA, Texas A&M University, 2010

Kim, Yong-Joe, Associate Professor  
Mechanical Engineering  
PHD, Purdue University, 2003

Kimber, Mark L, Assistant Professor  
Nuclear Engineering  
PHD, Purdue University, 2008

Kindrick, Roy D, Adjunct Assistant Professor  
Oral & Maxillofacial Surgery  
DDS, Baylor College of Dentistry, 1967

King, Andrew R, Lecturer  
Horticultural Sciences  
PHD, Texas A&M University, 2015
King, Maria D, Assistant Professor
Biological & Agricultural Eng
PHD, Institute for Biotechnology, Berlin, Germany, 1986

King, Michael J, Professor
Petroleum Engineering
PHD, Syracuse University, 1980

King, Scottow A, Adjunct Professor
School of Law
JD, New York University Law School, 1982

King, Silvia R, Adjunct Assistant Professor
Pediatric Dentistry
DDS, Catholic University of Minas Gerais-Brazil, 1981

King-Metters, Kathryn H, Executive Professor
Management
PHD, Capella University, 2007

Kingman, Douglas M, Instructional Associate Professor
Biological & Agricultural Eng
PHD, Purdue University, 2002

Kinney, Michael R, Associate Professor
Accounting
PHD, University of Arizona, 1990

Kinra, Vikram K, Professor
Aerospace Engineering
PHD, Brown University, 1975

Kirkendall, Andrew J, Professor
History
PHD, University of North Carolina at Chapel Hill, 1996

Kirkham, Ernest R Instructional Associate Professor
Health & Kinesiology
PHD, Texas A&M University, 1981

Kirkland, Karen V, Associate Professor
Nuclear Engineering
PHD, The University of Tokyo, 1999

Kiser, James S, Adjunct Professor
School of Law
JD, Texas Wesleyan University School of Law, 2009

Kish, Laszlo B, Professor
Electrical & Computer Eng
PHD, Uppsala University, Sweden, 1994

Kitajima, Hiroko, Assistant Professor
Geology & Geophysics
PHD, Texas A&M University, 2010

Kitchens, Joel D, Associate Professor
TAMU Libraries
PHD, Texas A&M University, 2016

Kitcher, Evans D, Lecturer
College of Engineering
PHD, Texas A&M University, 2016

Klappenecker, Andreas, Professor
Computer Science & Engineering
PHD, Universitat Karlsruhe, 1998

Klassen, Jessica A, Lecturer
Wildlife & Fisheries Sciences
PHD, Florida Atlantic University, 2016

Klein, Andrew G, Professor
Geography
PHD, Cornell University, 1997

Klein, Douglas J, Professor
Marine Science
PHD, University of Texas, 1969

Klein, Nancy L, Associate Professor
Architecture
PHD, Bryn Mawr College, 1991

Klein, Patricia E, Professor
Horticultural Sciences
PHD, Texas A&M University, 1989

Klemm, William R, Senior Professor
Vet Integrative Biosciences
PHD, University of Notre Dame, 1963
DVM, Auburn University, 1958

Knap, Anthony H, Professor
Oceanography
PHD, University of South Hampton, 1978

Knappett, Peter S, Assistant Professor
Geology & Geophysics
PHD, University of Tennessee at Knoxville, 2010

Kneese, Dana A, Lecturer
Vet Integrative Biosciences
DVM, Texas A&M University, 2013
PHD, Texas A&M University, 2009

Knight, Robert W, Associate Professor
Ecosystem Science & Mgmt
PHD, Texas A&M University, 1980

Knox, Kris J, Instructional Associate Professor
Maritime Administration
PHD, University of Texas HSC at Houston, 1992

Ko, Che-Ming, Professor
Physics & Astronomy
PHD, State University of New York at Stony Brook, 1973

Ko, Gladys Y, Associate Professor
Vet Integrative Biosciences
PHD, Kent State University, 1996

Ko, Michael L, Research Assistant Professor
Vet Integrative Biosciences
PHD, Kent State University, 1997

Ko, Ya Ping, Research Assistant Professor
Institute of Biosciences & Tec
PHD, University of Cologne, 2005
Kobayashi, Koichi, Research Professor
Microbial Pathogenesis & Immunity
PHD, Chiba University School of Medicine, 1998

Koch, Michael T, Associate Professor
Political Science
PHD, University of California, Davis, 2002

Kocharovskaya, Olga A, Distinguished Professor
Physics & Astronomy
PHD, Institute of Applied Physics, Russian Academy of Sciences, 1986

Kocharovsky, Vitaly V, Professor
Physics & Astronomy
PHD, Institute of Applied Physics, Russian Academy of Sciences, 1986

Koehler, Michael J, Adjunct Professor
School of Law
JD, University of Wisconsin Law School, 2000

Kofford, Kelly R, Clinical Associate Professor
Diagnostic Sciences
DDS, Creighton University, 1978

Kogut, Mark H, Adjunct Assistant Professor
Pediatric Dentistry
DDS, Baylor College of Dentistry, 1977

Koiva, Hisashi, Professor
Horticultural Sciences
PHD, Kyoto University, 1996

Kolari, James, Professor
Finance
PHD, Arizona State University, 1980

Kolasinski, Adam C, Associate Professor
Finance
PHD, MIT, 2006

Koliosi, Maria, Assistant Professor
Civil Engineering
PHD, University of Buffalo - The State University of New York, 2014

Kolodziej, Elizabeth Y, Instructional Assistant Professor
Statistics
PHD, Texas A&M University, 2010

Kolomiets, Mikhailo V, Professor
Plant Pathology & Microbiology
PHD, Iowa State University, 1998

Konrad, Christoph F, Associate Professor
International Studies
PHD, University of North Carolina at Chapel Hill, 1985

Kontogiorgos, Dimitrios I, Clinical Professor
Restorative Sciences
PHD, Texas A&M University System Health Sciences Center, 2010
DMD, National and Capodistrian University of Athens, 2003

Koola, Paul M, Professor of the Practice
Ocean Engineering
PHD, Indian Institute of Technology, Madras, 1991

Koopman, Joel E, Assistant Professor
Management
PHD, Michigan State University, 2014

Koppa, Rodger J, Senior Associate Professor
Industrial & Systems Eng

Kornegay, Joe N, Professor
Vet Integrative Biosciences
PHD, University of Georgia, 1982

Korosec, Jason A, Adjunct Professor
School of Law
JD, Case Western Reserve University School of Law, 1997

Korty, Robert L, Associate Professor
Atmospheric Sciences

Kothmann, Merwyn M, Professor
Ecosystem Science & Mgmt
PHD, Texas A&M University, 1968

Koufteros, Xenophon, Professor
Information & Operations Mgmt
PHD, University of Toledo, 1995

Kraemer, Duane C, Senior Professor
Vet Physiology & Pharmacology
DVM, Agricultural & Mechanical College, 1966
PHD, Agricultural & Mechanical College, 1966

Krajicek, John C, Executive Professor
College of Business
MA, University of North Texas, 1993

Kramer, Phillip R, Professor
Biomedical Sciences
PHD, Texas A&M University, 1996

Krasnow, Maya S, Veterinary Resident
Vet Small Animal Clinical Sc
DVM, The Ohio State University, 2016

Krasteva, Silvana S, Associate Professor
Economics
PHD, Duke University, 2009

Kravaris, Costas, Professor
Chemical Engineering
PHD, California Institute of Technology, 1984

Krecek, Rosina C, Visiting Professor
Veterinary Pathobiology
PHD, University of Pretoria, 1985

Kreider, Richard, Professor
Health & Kinesiology
PHD, University of Southern Mississippi, 1987

Kress, Lisa M, Lecturer
Liberal Studies
MFA, University of Houston, 2001
Kreuter, Urs P, Professor
Ecosystem Science & Mgmt
PHD, Utah State University, 1992

Krisciunas, Kevin L, Instructional Assistant Professor
Physics & Astronomy
PHD, University of Washington, 2000

Krishnadevarajan, Pradip K, Lecturer
Eng Tech & Ind Distribution
MS, Texas A&M University, 2003

Krolikowski, Wieslaw Z, Professor
Texas A&M University at Qatar
PHD, Institute of Physics, Polish Academy of Sciences, 1988

Kronenberg, Andreas K, Professor
Geology & Geophysics
PHD, Brown University, 1983

Krotozsynski Jr, Ronald J, Adjunct Professor
School of Law
JD, Duke University, 1991
JD, Duke University School of Law, 1991

Ku, Charlotte, Professor
School of Law
PHD, Fletcher School of Law & Diplomacy, 1984
LLM, Fletcher School of Law & Diplomacy, 1973

Kubena, Karen S, Professor
Nutrition & Food Science
PHD, Texas A&M University, 1982

Kuchment, Peter, Distinguished Professor
Mathematics
PHD, Kharkov State University, Russia, 1973

Kulatilaka, Waruna D, Associate Professor

Mir, Nordine, Professor
Texas A&M University at Qatar
PHD, University of Rouen, France, 1998

Mirabolfathi, Nader, Research Associate Professor
Physics & Astronomy
PHD, University of Paris XI, 2002
Miranda, Malathi S, Clinical Assistant Professor
Public Health Sciences
DDS, Mangalore University, India, 1995

Miranda, Rajesh C, Professor
Neuroscience Experiment Theara
PHD, University of Rochester, 1989

Miranda, Valerian, Associate Professor
Architecture
PHD, Texas A&M University, 1988
MAR, Texas A&M University, 1984

Misener, Sarah M, Associate Professor
Hispanic Studies
PHD, University of Kansas, 2001

Mishra, Jayshree, Research Assistant Professor
College of Pharmacy
PHD, Indian Institute of Technology, Kharagpur, 2005

Mitchell, Brett M, Associate Professor
College of Medicine
PHD, Georgia Health Sciences University, 2003

Mitchell, Stacey A, Clinical Associate Professor
College of Nursing
DNP, University of Tennessee Health Science Center, 2006

Mitchell, Thomas W, Professor
School of Law
LLM, University of Wisconsin - Madison, 1999
JD, Howard University School of Law, 1993

Mittal, Chiraag, Assistant Professor
Marketing
PHD, University of Minnesota, 2016

Mize, Britt A, Associate Professor
English
PHD, The University of North Carolina at Chapel Hill, 2003

Mjelde, James W, Professor
Agricultural Economics
PHD, University of Illinois at Urbana - Champaign, 1985

Moble, Benedict, Assistant Professor
Aerospace Engineering
PHD, University of Maryland, 2010

Moczygemba, Margarita M, Assistant Professor
Institute of Biosciences & Tec
PHD, State University of New York at Stony Brook, 1997

Moogilevsky, Mila, Instructional Assistant Professor
Mathematics
PHD, Rostov State University USSR, 1976

Mohanty, Binayak P, Professor
Biological & Agricultural Eng
PHD, Iowa State University, 1992

Mohiuddin, Mohammad W, Visiting Assistant Professor
Mechanical Engineering
PHD, Texas A&M University, 2008

Moeller, Robert R, Senior Lecturer
Marine Science
PHD, Texas A&M University, 1994

Mohseni, Mahdi, Assistant Professor
Finance
PHD, Boston College, 2015

Mohseni, Mahdi, Assistant Professor
Biological & Agricultural Eng
PHD, Michigan State University, 1994

Mohtat, Rabi H, Professor
Civil Engineering
PHD, Michigan State University, 1994

Montaguie, Marcia L, Visiting Assistant Professor
Educational Psychology
PHD, Texas A&M University, 2009

Montalvo-Liendo, Nora, Assistant Professor
College of Nursing
PHD, The University of Texas Health Science Center at Houston, 2009

Moore, Erica J, Veterinary Resident
Veterinary Pathobiology
PHD, University of Florida, 2016

Moore, Geannine W, Associate Professor
Ecosystem Science & Mgmt
PHD, Oregon State University, 2004

Moore, Janie M, Assistant Professor
Biological & Agricultural Eng
PHD, Purdue University, 2015

Moore, John Michael, Instructional Assistant Professor
Computer Science & Engineering
PHD, Texas A&M University, 2007

Moore, Kevin M, Executive Professor
Finance
MS, Johns Hopkins University, 2013

Moore, Lori L, Associate Professor
Ag Leadership, Educ & Comm
PHD, University of Florida, 2003

Moore, Lourie M, Clinical Associate Professor
Restorative Sciences
DDS, Baylor College of Dentistry, 1993
DDS, Texas A&M University Baylor College of Dentistry, 1993

Moore, Melinda S, Professor
Health & Kinesiology
PHD, Ball State University, 1997

Moore, Wendy A, Associate Professor
Sociology
PHD, University of Minnesota, 2005

Mora-Zacarias, Miguel A, Professor
Wildlife & Fisheries Sciences
PHD, University of California, Davis, 1990
Moreira, Rosana G, Professor
Biological & Agricultural Eng
PHD, Michigan State University, 1989

Moreira-Tamayo, Oscar, Professor of the Practice
Electrical & Computer Eng
PHD, Texas A&M University, 1996

Moreiras, Alberto, Professor
Hispanic Studies
PHD, University of Georgia, 1987

Morel, Jim E, Professor
Nuclear Engineering
PHD, The University of New Mexico, 1979

Moreno Centeno, Erick, Associate Professor
Industrial & Systems Eng
PHD, University of California, Berkeley, 2010

Moreno, Michael R, Assistant Professor
Biomedical Engineering
PHD, Texas A&M University, 2009

Moreno, Michael R, Assistant Professor
Mechanical Engineering
PHD, Texas A&M University, 2009

Morey, Anne M, Associate Professor
English
PHD, University of Texas- Austin, 1998

Morey, Leslie C, Professor
Psychology
PHD, University of Florida, 1981

Morgan, Cristine L, Professor
Soil & Crop Sciences
PHD, University of Wisconsin, 2003

Morgan, Joseph A, Senior Professor
Eng Tech & Ind Distribution
DEN, Texas A&M University, 1983

Moridis, George J, Professor
Petroleum Engineering
PHD, Texas A&M University, 1987

Morita, Nobuo, Professor
Petroleum Engineering
PHD, The University of Texas at Austin, 1974

Mormann, Felix, Associate Professor
School of Law
JD, University of Passau, 2010
LLM, University of California Berkeley School of Law, 2008

Morris, Jeffrey M, Associate Professor
Performance Studies
PHD, University of North Texas, 2007

Morris, Theresa M, Associate Professor
Sociology
PHD, Texas A&M University, 2000

Morrisey, Michael A, Professor
Health Policy & Management
PHD, University of Washington, Seattle, 1979

Morrison, Angela D, Associate Professor
School of Law
JD, University of Nevada Las Vegas, 2005

Morrison, Jenny K, Lecturer
George Bush School of Govern
PHD, New York University, 2008

Morrison, Mike L, Professor
Wildlife & Fisheries Sciences
PHD, Oregon State University, 1982

Morriss, Andrew P, Professor
School of Law
PHD, Massachusetts Institute of Technology, 1994
JD, University of Texas at Austin, 1984

Mortari, Daniele, Professor
Aerospace Engineering
PHD, University La Sapienza of Rome, 1980

Mortazavi, Jack B, Assistant Professor
Computer Science & Engineering
PHD, University of California - Los Angeles, 2014

Moscarello, Justin M, Assistant Professor
Psychology
PHD, University of California, Santa Barbara, 2010

Mosher, Melanie J, Instructional Professor
Marine Science
PHD, University of Houston, 1977

Mostafavidarani, Ali, Assistant Professor
Civil Engineering
PHD, Purdue University, 2013

Motakis, Pavlos, Visiting Assistant Professor
Mathematics
PHD, National Technical University of Athens, 2015

Mott, Andrew V, TEES Assistant Research Scientist
Materials Science & Engr
PHD, Stanford University, 2014

Moulton, Orissa M, Instructional Assistant Professor
Marine Biology
PHD, The University of Chicago, 2016

Mouneimne, Roula, Research Professor
Vet Integrative Biosciences
PHD, Lyon I University, 1984

Moyes, Rita J, Instructional Associate Professor
Biology
PHD, Texas A&M University, 1992

Moyna, Maria I, Associate Professor
Hispanic Studies
PHD, University of Florida, 2000
Mu, Ren, Associate Professor
International Affairs
PHD, Michigan State University, 2004

Mueller-Harknett, Ursula U, Professor
Statistics
PHD, Universitat Bremen, Germany, 1997

Muellerhinze, Maxine L, Assistant Professor
College of Nursing
PHD, The University of Texas - Austin, 1988

Muir, Kristopher D, Clinical Assistant Professor
College of Business
EDD, Walden University, 2010

Mukherji, Partha, Adjunct Assistant Professor
General Dentistry
DDS, Baylor College of Dentistry, 2001

Mulenga, Albert, Professor
Veterinary Pathobiology
PHD, Hokkaido University, 1999

Muliana, Hanifah, Professor
Mechanical Engineering
PHD, Georgia Institute of Technology, 2004

Mullen, Christine A, Senior Lecturer
Chemistry
PHD, University of California, San Diego, 2000

Mullet, John E, Professor
Biochemistry & Biophysics
PHD, University of Illinois - Urbana-Champaign, 1981

Mullins, Leisha H, Senior Lecturer
Biochemistry & Biophysics
PHD, Texas A&M University, 1989

Mulvaney, Timothy M, Professor
School of Law
JD, Villanova University School of Law, 2004

Mumpower, Jeryl L, Professor
Public Service & Administration
PHD, University of Colorado, 1976

Muneoka, Ken, Professor
Vet Physiology & Pharmacology
PHD, University of California - Irvine, 1983

Muns, Christine A, Clinical Assistant Professor
Restorative Sciences
DDS, Texas A&M University Baylor College of Dentistry, 2012

Munster, Clyde L, Professor
Biological & Agricultural Eng
PHD, North Carolina State University, 1992

Murano, Peter S, Senior Associate Professor
Nutrition & Food Science
PHD, Virginia Tech, 1989

Murchison, David A, Research Assistant Professor
Neuroscience Experiment Theara
PHD, The University of Texas - Austin, 1991

Murchison, David F, Adjunct Professor
Diagnostic Sciences
DDS, Baylor College of Dentistry, 1980

Murguia, Edward, Professor
Sociology
PHD, University of Texas, 1978

Murguia, Theresa P, Associate Professor
Ag Leadership, Educ & Comm
PHD, Texas A&M University, 1997

Murphy, John F, Associate Professor
School of Law
JD, The University of Texas School of Law, 1993

Murphy, Robin R, Professor
Computer Science & Engineering
PHD, Georgia Institute of Technology, 1992

Murphy, Timothy H, Professor
Ag Leadership, Educ & Comm
PHD, Texas A&M University, 1995

Murphy, William J, Professor
Vet Integrative Biosciences
PHD, The University of Tulsa, 1997

Murray, Seth C, Associate Professor
Soil & Crop Sciences
PHD, Cornell University, 2008

Musoba, Glenda D, Associate Professor
Educ Admn & Human Resource Dev
PHD, Indiana University, 2004

Musoma, Henry K, Clinical Assistant Professor
College of Business
EDD, Texas Christian University, 2012

Musser, Jeffrey M, Clinical Professor
Veterinary Pathobiology
PHD, North Carolina State University, 2000
DVM, Virginia Tech, 1989

Musser, Siegfried M, Professor
Molecular & Cellular Medicine
PHD, California Institute of Technology, 1996

Muthuchamy, Mariappan, Professor
College of Medicine
PHD, Madurai Kamaraj University, India, 1991

Muyia, Machuma A, Clinical Associate Professor
Educ Admn & Human Resource Dev
PHD, University of Arkansas, 2008

Myers, Alexandra N, Veterinary Resident
Veterinary Pathobiology
DVM, Texas A&M University, 2015
Mykoniatis, Nikolaos, Instructional Assistant Professor
Maritime Administration
PHD, The Pennsylvania State University, 2013

Myles II, Kevin M, Associate Professor
Entomology
PHD, Colorado State University, 2003

Myser, Scott A, Adjunct Assistant Professor
Orthodontics
DDS, Texas A&M University Baylor College of Dentistry, 2008

Na, Byoungjun, Research Assistant Professor
Ocean Engineering
PHD, Texas A&M University, 2010

Nabity, Mary B, Associate Professor
Veterinary Pathobiology
PHD, Texas A&M University, 2010
DVM, Cornell University, 2002

Nafukho, Fredrick M, Professor
Educ Adm & Human Resource Dev
PHD, Louisiana State University and A&M College, 1998

Nagarathnam, Bharani B, Instructional Assistant Professor
Eng Tech & Ind Distribution
MS, Texas A&M University, 2002

Nagay, Naomi, Research Assistant Professor
Psychology
PHD, University of Southern California, 1993

Nagy, William W, Professor
Restorative Sciences
DDS, Ohio State University, 1970

Naidu, Aparna G, Clinical Associate Professor
Diagnostic Sciences
DDS, Northwestern University Evanston, 2001

Nair, Madhu K, Professor & Director
Diagnostic Sciences
DMD, University of Gothenburg, 2003
DMD, University of Pittsburgh, 2000

Nair, Radhika P, Instructional Assistant Professor
Marine Science
PHD, University of Nevada, 2009

Nakamura, Eduardo F, Visiting Associate Professor
Computer Science & Engineering
PHD, Federal University of Minas Gerais, 2007

Nan, Beiyuan, Assistant Professor
Biology
PHD, Peking University, 2007

Nanopoulos, Dimitri V, Distinguished Professor
Physics & Astronomy
PHD, University of Sussex, 1973

Napper, Larry C, Professor of the Practice
International Affairs
MS, University of Virginia, 1974

Naraghi, Mohammad, Assistant Professor
Aerospace Engineering
PHD, University of Illinois at Urbana Champaign, 2009

Naraghi, Mohammad, Assistant Professor
Materials Science & Engr
PHD, University of Illinois at Urbana Champaign, 2009

Narayanan, Krishna R, Professor
Computer Science & Engineering
PHD, Georgia Institute of Technology, 1998

Narayanan, Krishna R, Professor
Electrical & Computer Eng
PHD, Georgia Institute of Technology, 1998

Narawich, Francis J, Professor
Mathematics
PHD, Princeton University, 1972

Nascentes Alves, Ibere, Professor of the Practice
Petroleum Engineering
PHD, University of Tulsa, 1991

Nasr-El-Din, Hisham A, Professor
Petroleum Engineering
PHD, University of Saskatchewan, 1984

Nasrabadi, Hadi, Assistant Professor
Petroleum Engineering
PHD, Imperial College London, United Kingdom, 2006

Natarajarathinam, Malini, Associate Professor
Eng Tech & Ind Distribution
DOC, University of Alabama, 2007

Natsios, Andrew S, Executive Professor
International Affairs
PHD, Harvard University, 1979

Naugle, Donald G, Professor
Materials Science & Engr
PHD, Texas A&M University, 1965

Naugle, Donald G, Professor
Physics & Astronomy
PHD, Texas A&M University, 1965

Navas De Solis, Cristobal, Clinical Assistant Professor
Vet Large Animal Clinical Sc
PHD, Universidad Autonoma de Barcelona, 2013
DVM, Universidad Cardenal Herrera CEU, 2001

Ndubisi, Forster O, Professor
Land Arch & Urban Planning
PHD, University of Waterloo, 1987

Neal, Gabriel A, Clinical Assistant Professor
Primary Care Medicine
MD, The University of Oklahoma, 2001

Nederman, Cary J, Professor
Political Science
PHD, York University, 1983

College of Engineering
PHD, Texas A&M University, 2009

Ozmetin, Ali E, Research Assistant Professor
Materials Science & Engr
PHD, Texas A&M University, 2009

Paal, Stephanie G, Assistant Professor
Civil Engineering
PHD, Georgia Institute of Technology, 2013

Pace, Kathleen A, Clinical Assistant Professor
Pediatric Dentistry
DDS, State University of New York, Buffalo School of Dentistry, 1977

Pacek, Alexander C, Professor
Political Science
PHD, University of Illinois at Urbana - Champaign, 1991

Packard, Mark G, Professor
Psychology
PHD, McGill University, 1991

Padron, Yolanda, Professor
Educational Psychology
EDD, University of Houston, 1985
Paetzold, Ramona L, Professor
Management
JD, Indiana University, 1990
PHD, Indiana University, 1979

Page, Robin L, Assistant Professor
College of Nursing
PHD, University of Texas at Austin, 2006

Pagilla, Prabhakar R, Professor
Mechanical Engineering
PHD, University of California, Berkeley, 1996

Pakhotina, Nataliya V, Lecturer
Economics
PHD, University of Florida, 2010

Palakurthi, Srinath, Professor
College of Pharmacy
DOC, Indian Institute of Chemical Technology, 2000

Palazzolo, Alan B, Professor
Mechanical Engineering
PHD, University of Virginia, 1981

Palermo, Samuel M, Associate Professor
Electrical & Computer Eng
PHD, Stanford University, 2007

Palmer, Clare A, Professor
Philosophy & Humanities
PHD, University of Oxford, 1993

Palmer, Douglas J, Professor
Educational Psychology
PHD, University of California - Los Angeles, 1977

Palmer, Erica O, Assistant Professor
Political Science
PHD, University of Minnesota, 2010

Palos, Edward A, Clinical Assistant Professor
Restorative Sciences
DDS, Texas A&M University Baylor College of Dentistry, 2012

Pals, Heili, Assistant Professor
Sociology
PHD, Stanford University, 2006

Panahi, Ladan M, Clinical Assistant Professor
College of Pharmacy
DOC, University of Houston College of Pharmacy, 2008

Panchang, Vijaykumar G, Regents Professor
Ocean Engineering
PHD, University of Maine, 1985

Panchang, Vijaykumar G, Professor
Texas A&M University at Qatar
PHD, University of Maine, 1985

Panetta, Richard L, Professor
Atmospheric Sciences
PHD, University of Wisconsin, 1978

Panin, Vladislav M, Professor
Biochemistry & Biophysics
PHD, Moscow State University, 1990

Panina, Daria, Clinical Associate Professor
Management
PHD, Rutgers University, 2002

Pantuso, Terri B, Lecturer
English
PHD, University of Texas, San Antonio, 2009

Paouris, Grigoris, Professor
Mathematics
PHD, University of Crete, 2004

Papanikolas, Matthew A, Professor
Mathematics
PHD, Brown University, 1998

Papovich, Casey J, Professor
Physics & Astronomy
PHD, Johns Hopkins University, 2002

Pappas, Gregory F, Professor
Philosophy & Humanities
PHD, University of Texas at Austin, 1990

Pappu, Madhav, Clinical Assistant Professor
Information & Operations Mgmt
PHD, University of Tennessee, 1999

Parish, Janet T, Clinical Professor
Marketing
PHD, University of Alabama, 2002

Parish, Nancy B, Lecturer
Communication
PHD, University of Florida, 2013

Park, Hangue, Assistant Professor
Electrical & Computer Eng
PHD, Georgia Institute of Technology, 2017

Park, Kyeong, Professor
Marine Science
PHD, College of William and Mary, 1993

Park, Sung I, Assistant Professor
Electrical & Computer Eng
PHD, Stanford University, 2014

Park, William D, Professor
Biochemistry & Biophysics
PHD, University of Florida, 1977

Parke, Frederic I, Professor
Visualization
PHD, University of Utah, 1974

Parker, Dawn R, Clinical Professor
Teaching, Learning & Culture
PHD, Texas A&M University, 1997
Parker, Jason C, Associate Professor
History
PHD, University of Florida, 2002

Parra Carrasquer, Carlos, Clinical Assistant Professor
Periodontics
DDS, Universitat Internacional de Catalunya, 2009

Parrott, Thena E, Clinical Assistant Professor
College of Nursing
PHD, Texas A&M University, 1993

Parra Carrasquer, Carlos, Clinical Assistant Professor
Periodontics
DDS, Universitat Internacional de Catalunya, 2009

Parrott, Thena E, Clinical Assistant Professor
College of Nursing
PHD, Texas A&M University, 1993

Parrott, Thena E, Clinical Assistant Professor
College of Nursing
PHD, Texas A&M University, 1993

Parrott, Thena E, Clinical Assistant Professor
College of Nursing
PHD, Texas A&M University, 1993

Patel, Simmi, Clinical Assistant Professor
Public Health Sciences
DDS, University of Texas Health Science Center-San Antonio, 2001

Pati, Debdip, Associate Professor
Statistics
PHD, Duke University, 2012

Patrick, Kristin L, Research Assistant Professor
Microbial Pathogenesis & Immune System
PHD, Yale University, 2008

Patterson, Adam P, Clinical Associate Professor
Vet Small Animal Clinical Sciences
DVM, Mississippi State University, 2001

Patterson, Carly A, Clinical Assistant Professor
Vet Physiology & Pharmacology
DVM, University of Illinois, 2011

Patterson, Carly A, Clinical Assistant Professor
Vet Physiology & Pharmacology
DVM, University of Illinois, 2011

Pattison, Kalani K, Lecturer
English
PHD, Baylor University, 2016

Patzewitsch, Wendy W, Instructional Assistant Professor
Geography
PHD, Texas A&M University, 2007

Pauli, Carol B, Associate Professor
School of Law
JD, Yeshiva University, 2007

Pavelka Jr, Miro A, Adjunct Professor
Oral & Maxillofacial Surgery
DDS, Baylor College of Dentistry, 1977

Payne, Michael B, Clinical Assistant Professor
Diagnostic Sciences
DDS, Baylor College of Dentistry, 1981

Payne, Stephanie C, Professor
Psychology
PHD, George Mason University, 2000

Payne, Susan L, Associate Professor
Veterinary Pathobiology
PHD, Louisiana State University, 1983

Peacock, Walter Gillis, Professor
Land Arch & Urban Planning
PHD, University of Georgia, 1986

Pearl, Frederic B, Associate Professor
Liberal Studies
PHD, Texas A&M University, 2001

Pearlstein, Gregory J, Associate Professor
Mathematics
PHD, UNIVERSITY OF MASSACHUSETTS AT AMHERST, 1999

Pearlstein, Rosanna, Lecturer
Mathematics
PHD, University of Massachusetts Amherst, 1998

Pearson, Chad J, Instructional Assistant Professor
TAMU Libraries
PHD, The University of Texas, 2006
MFA, Columbia College, 2002

Peddicord, Kenneth L, Professor
Nuclear Engineering
PHD, University of Illinois, 1972

Pedersen, Susan J, Associate Professor
Educational Psychology
PHD, University of Texas at Austin, 2000

Pei, Zhijian, Professor
Industrial & Systems Engineering
PHD, University of Illinois, 1995

Pekarek, Katie J, Clinical Assistant Professor
Primary Care Medicine
DO, Texas College of Osteopathic Medicine, 2011
Pellois, Jean-Philippe, Professor
Biochemistry & Biophysics
PHD, University of Houston, 2002

Pena, Lydia W, Veterinary Intern
Vet Small Animal Clinical Sc
DVM, University of Georgia, 2017

Peng, Xu, Associate Professor
College of Medicine
MD, The Medical College of Tongji University, 2015

Pennington, James D, Instructional Associate Professor
Chemistry
PHD, University of Michigan, 1998

Penrose, Mary M, Professor
School of Law
LLM, University of Notre Dame, 1999
JD, Pepperdine University School of Law, 1993

Penson Jr, John B, Professor
Agricultural Economics
PHD, University of Illinois at Urbana-Champaign, 1973

Pentecost III, Aubrey R, Professor of the Practice
Architecture
DrPH, University of Texas, School of Public Health, 1982

Pepper, Alan E, Associate Professor
Biology
PHD, University of California, Davis, 1990

Peres, S Camille, Assistant Professor
Industrial & Systems Eng
PHD, Rice University, 2005

Peres, S Camille, Assistant Professor
Environmental & Occptnl Hlth
PHD, Rice University, 2005

Perez Patron, Maria J, Research Assistant Professor
Epidemiology & Biostatistics
PHD, Johns Hopkins University, Bloomberg School of Public Health, 2012

Perez Smith, Adriana M, Lecturer
Hispanic Studies
LLM, Southern Methodist University, 2005

Perez, Nicholas D, Assistant Professor
Geology & Geophysics
PHD, University of Texas at Austin, 2015

Perez, Sebastian E, Clinical Assistant Professor
College of Pharmacy
DOC, Texas A&M Health Science Center College of Pharmacy, 2010

Perkin, Joshua S, Assistant Professor
Wildlife & Fisheries Sciences
PHD, Kansas State University, 2012

Perlin, Marc, Professor
Ocean Engineering
PHD, University of Florida Gainesville, 1989

Perrott, Lisa J, Associate Professor
Educational Psychology
PHD, University of Virginia, 2001

Perry, Brittany N, Instructional Assistant Professor
Political Science
PHD, Duke University, 2013

Perry, Nandra L, Associate Professor
English
PHD, University of North Carolina at Chapel Hill, 2003

Peterson, Eric L, Professor
Mechanical Engineering
PHD, Stanford University, 1998

Peterson, Lene H, Instructional Assistant Professor
Marine Biology
PHD, Memorial University of New Foundland, 2010

Peterson, David O, Professor
Biochemistry & Biophysics
PHD, Harvard University, 1977

Peterson, Donald, Professor
Biomedical Engineering
PHD, University of Connecticut, 1999

Peterson, John R, Clinical Assistant Professor
Finance
PHD, Texas A&M University, 2002

Peterson, Noah G, Lecturer
English
PHD, Texas A&M University, 2017

Peterson, Steven L, Professor
College of Pharmacy
PHD, University of California - Davis, 1980

Peterson, Thomas V, Instructional Professor
College of Medicine
PHD, The University of Oklahoma, 1977

Petrick, James F, Professor
Recreation, Park & Tourism Sc
PHD, Clemson University, 1999

Petrie, Ragan, Associate Professor
Economics
PHD, University of Wisconsin - Madison, 2002

Petrik, Colleen, Research Assistant Professor
Oceanography
PHD, Massachusetts Institute of Technology, 2011

Petrova, Guergana P, Professor
Mathematics
PHD, University of Southern Carolina, 1999

Pettersson, Martin B, Professor
Philosophy & Humanities
PHD, KTH Royal Institute of Technology, 2003
Peycke, Laura E, Clinical Professor
Vet Small Animal Clinical Sc
DVM, Louisiana State University, 1998

Pfuntner, Deborah L, Lecturer
English
PHD, Texas A&M University, 2016

Pham, Lehuyen T, Professor
School of Law
JD, Harvard Law School, 1996

Pharr IV, George M, Professor
Materials Science & Engr
PHD, Stanford University, 1979

Pharr, George, Assistant Professor
Mechanical Engineering
PHD, Harvard University, 2014

Phillips, David M, Adjunct Assistant Professor
Oral & Maxillofacial Surgery
DDS, The University of Texas Health Science Center at Houston, 1977

Phillips, Susan T, Professor
School of Law
JD, The Catholic University of America, 1990

Phillips, Timothy D, Professor
Vet Integrative Biosciences
PHD, University of Southern Mississippi, 1975

Pho, Victoria B, Clinical Assistant Professor
College of Pharmacy
PR1, Texas Southern University, 2008

Pickens, Adam W, Assistant Professor
Industrial & Systems Eng
PHD, Texas Tech University, 2008

Pickens, Adam W, Assistant Professor
Environmental & Occptnl Hlth
PHD, Texas Tech University, 2008

Pierce, Tanya J, Professor
School of Law
JD, The University of Texas School of Law, 1996

Pierson III, Leland S, Professor
Plant Pathology & Microbiology
PHD, Washinton State University, 1986

Pierson, Elizabeth A, Professor
Horticultural Sciences
PHD, Washington State University, 1988

Pietrantonio, Patricia, Professor
Entomology
PHD, University of California, Riverside, 1995

Pillai, Suresh D, Professor
Poultry Science
PHD, University of Arizona, 1989

Pilling, Darrell, Research Assistant Professor
Biology
PHD, University of Birmingham, 1995

Pilsch, Andrew T, Assistant Professor
English
PHD, The Pennsylvania State University, 2011

Pina Jr, Manuel, Associate Professor
Ag Leadership, Educ & Comm
PHD, Texas A&M University, 1978

Pine, Michelle D, Clinical Associate Professor
Vet Integrative Biosciences
PHD, Texas A&M University, 2002
DVM, University of Missouri-Columbia, 1991

Pishko, Elizabeth J, Lecturer
Biochemistry & Biophysics
PHD, University of Texas, 1993

Pisier, Gilles, Distinguished Professor
Mathematics
PHD, University of Paris, 1977

Pistikopoulos, Efstratios, Professor
Chemical Engineering
PHD, Carnegie Mellon University, 1988

Pittman, Alison F, Clinical Assistant Professor
College of Nursing
PHD, University of Texas at Tyler, 2017

Pittman, Andrew T, Clinical Associate Professor
Health & Kinesiology
PHD, Texas A&M University, 1991

Pitts, Jon T, Professor
Mathematics
PHD, Princeton University, 1974

Plankey Videla, Nancy B, Associate Professor
Sociology
PHD, University of Wisconsin - madison, 1998

Plavnik, Julia Y, Visiting Assistant Professor
Mathematics
PHD, National University of Cordoba, 2013

Plemons, Jacqueline M, Clinical Professor
Periodontics
DDS, Baylor University College of Dentistry, 1986

Plothe, Theodore W, Lecturer
Communication
PHD, American University, 2015

Plunk, Michael D, Adjunct Assistant Professor
Pediatric Dentistry
DDS, Baylor College of Dentistry, 1974
Poirot, Kristan A, Associate Professor
Communication
PHD, University of Georgia, 2004

Pokrovsky, Valery, Distinguished Professor
Physics & Astronomy
PHD, Tomsk State University, 1957

Pollock, Thomas C, Senior Associate Professor
Aerospace Engineering
PHD, University of Virginia, 1977

Polson, James R, Adjunct Assistant Professor
Orthodontics
DDS, The University of Texas Health Science Center at San Antonio, 1986

Polotratski, Alexei G, Professor
Mathematics
PHD, California Institute of Technology, 1995

Poludnenko, Oleksiy Y, Associate Professor
Aerospace Engineering
PHD, University of Rochester, 2004

Polycarpou, Andreas A, Professor
Mechanical Engineering
PHD, Suny University at Buffalo, 1994

Polyemenis, Michael S, Professor
Biochemistry & Biophysics
PHD, Tufts University, 1994

Pond, Amy, Assistant Professor
Political Science
PHD, University of Michigan, 2015

Ponjuan, Luis, Associate Professor
Educ Admn & Human Resource Dev
PHD, University of Michigan, 2005

Ponnalagu, Alagappan, Visiting Assistant Professor
Mechanical Engineering
PHD, Texas A&M University, 2015

Ponnampuruma, Krishan, Senior Lecturer
Chemistry
PHD, University of Cambridge, UK, 1992

Pope, Christopher N, Distinguished Professor
Physics & Astronomy
PHD, University of Cambridge, 1980

Pope, Jeffrey D, Adjunct Assistant Professor
Restorative Sciences
DDS, Texas A&M University Baylor College of Dentistry, 2009

Pope, Michael, Professor
Geology & Geophysics
PHD, Virginia Tech, 1995

Pope, Robert A, Clinical Assistant Professor
Primary Care Medicine
MD, University of Texas Southwestern Medical School, 1992

Popescu, Sorin C, Professor
Ecosystem Science & Mgmt
PHD, Virginia Tech, 2002

Popov, Bojan D, Professor
Mathematics
PHD, University of Southern Carolina, 1999

Potter, Brian F, Clinical Professor
Veterinary Pathobiology
DVM, Texas A&M University, 1992

Porter, Jay R, Professor
Eng Tech & Ind Distribution
PHD, Texas A&M University, 1993

Porter, Weston W, Professor
Vet Integrative Biosciences
PHD, Texas A&M University, 1997

Portney, Kent E, Professor
Public Service &Administration
PHD, Florida State University, 1979

Posey, Richard D, Clinical Professor
Vet Large Animal Clinical Sc
DVM, Texas A&M University, 1982

Poston Jr, Dudley L, Senior Professor
Sociology
PHD, University of Oregon, 1968

Poston, John W, Professor
Nuclear Engineering
PHD, Georgia Institute of Technology, 1971

Potier, Paul A, Professor of the Practice
Marine Engineering Technology
PHD, Prairie View A&M University, 2012

Potter, David E, Professor
College of Pharmacy
PHD, University of Kansas, 1969

Potter, Henry, Assistant Professor
Oceanography
PHD, University of Miami, 2014

Potvin, Sarah E, Associate Professor
TAMU Libraries
MLS, University of Texas, 2009

Pourahmadi, Mohsen, Professor
Statistics
PHD, Michigan State University, 1980

Powell, Michael J, Lecturer
College of Engineering
PHD, Texas A&M University, 2016

Powers, David C, Assistant Professor
Chemistry
PHD, Harvard University, 2011

Ritz, Thor M, Visiting Assistant Professor
Geography
PHD, Syracuse University, 2016

Rivera, Gonzalo M, Associate Professor
Veterinary Pathobiology
PHD, Cornell University, 2002

Rivera, Hector H, Assistant Professor
Educational Psychology
PHD, University of California-Santa Cruz, 2001

Roark, Erin B, Associate Professor
Geography
PHD, University of California, Berkeley, 2005

Roberts, Andrea R, Assistant Professor
Land Arch & Urban Planning
PHD, University of Texas - Austin, 2016

Robertson, John D, Professor
Political Science
PHD, University of Illinois at Urbana - Champaign, 1979
Robertson, Raymond E, Professor
International Affairs
PHD, University of Texas at Austin, 1997

Robinson, Elizabeth K, Instructional Professor
English
PHD, Texas A&M University, 1995

Robinson, John R, Professor
Accounting
PHD, University of Michigan, 1981
JD, University of Michigan, 1979

Robinson, Sally A, Associate Professor
English
PHD, University of Washington, 1989

Roblyer, Dwight A, Lecturer
Political Science
PHD, Texas A&M University, 2009

Roblyer, Kathleen A, Clinical Assistant Professor
College of Nursing
DNP, The University of Alabama at Birmingham, 2015

Rodgers, William S, Clinical Professor
Construction Science
JD, Texas Tech University, 1978

Rodiek, Jon, Professor
Land Arch & Urban Planning
PHD, University of Massachusetts, Amherst, 1974
MLA, University of Massachusetts, 1968

Rodiek, Susan D, Associate Professor
Architecture
PHD, Cardiff University, 2004
MAR, Texas A&M University, 1998

Rodrigues De Paula Lima, Heitor, Professor of the Practice
Petroleum Engineering
PHD, Texas A&M University, 1998

Rodrigues Hoffmann, Aline, Associate Professor
Veterinary Pathobiology
PHD, Texas A&M University, 2011

Rodriguez, Ignacio J, Distinguished Professor
Civil Engineering
PHD, Colorado State University, 1967

Rodriguez, Ignacio J, Distinguished University Professor
Ocean Engineering
PHD, Colorado State University, 1967

Roelke, Daniel L, Professor
Wildlife & Fisheries Sciences
PHD, Texas A&M University, 1997

Rogachev, Grigory V, Professor
Physics & Astronomy
PHD, National Research Centre, 1999

Rogers, George O, Professor
Land Arch & Urban Planning
PHD, University of Pittsburgh, 1983

Rogers, James R, Associate Professor
Political Science
PHD, The University of Iowa, 1994

Rogers, James R, Associate Professor
Texas A&M University at Qatar
PHD, The University of Iowa, 1994

Rogers, Julia S, Senior Lecturer
Architecture
PHD, Texas A&M University, 1996
MAR, Texas A&M University, 1991

Rogers, Kenita S, Professor
Vet Small Animal Clinical Sc
DVM, Louisiana State University, 1982

Rogers, William E, Professor
Ecosystem Science & Mgmt
PHD, Kansas State University, 1998

Rogers, William J, Lecturer
Chemical Engineering
PHD, Ohio State University, 1976

Rogovskyy, Artem S, Assistant Professor
Veterinary Pathobiology
PHD, Washington State University, 2014
DVM, National Agricultural University, 2001

Rojas, Joseph M, Professor
Computer Science & Engineering
PHD, University of California, Berkeley, 1995

Rojas, Joseph M, Professor
Mathematics
PHD, University of California, Berkeley, 1995

Rold, Michael F, Lecturer
Communication
PHD, Louisiana State University, 2014

Rollins, John W, Lecturer
George Bush School of Govern
JD, American University, 2001

Romano, Juan E, Associate Professor
Vet Large Animal Clinical Sc
PHD, Texas A&M University, 2004
DVM, Universidad del Uruguay, 1985

Rooker, Jay R, Professor
Marine Biology
PHD, The University of Texas - Austin, 1997

Rooney, William L, Professor
Soil & Crop Sciences
PHD, University of Minnesota, 1992
Roque-Sol, Marco A, Lecturer
Mathematics
PHD, Texas A&M University, 2006

Rosa Garoupa, Nuno M, Professor
School of Law
LLM, University of London, 2005
PHD, University of York, 1998

Rosenheim, James M, Professor
History
PHD, Princeton University, 1981

Rosenthal, Adam R, Assistant Professor
International Studies
PHD, Emory University, 2014

Rosenthal, Gil G, Professor
Biology
PHD, University of Texas at Austin, 2000

Ross Jr, Joseph H, Professor
Materials Science & Engr
PHD, University of Illinois at Urbana-Champaign, 1986

Ross Jr, Joseph H, Professor
Physics & Astronomy
PHD, University of Illinois at Urbana-Champaign, 1986

Ross, Andy L, Professor
International Affairs
PHD, Cornell University, 1984

Ross, Jennifer A, Instructional Assistant Professor
Epidemiology & Biostatistics
DrPH, Texas A&M University School of Public Health, 2013

Ross, Shawna M, Assistant Professor
English
PHD, The Pennsylvania State University, 2011

Ross-Wootton, Ashley D, Assistant Professor
Marine Science
PHD, Texas A&M University, 2010

Rossi, Marco, Assistant Professor
Finance
PHD, Pennsylvania State University, 2010

Rossman, Jeffrey A, Clinical Professor
Periodontics
DDS, University of Minnesota - Twin Cities, 1972

Rosynek, Michael P, Professor
Chemistry
PHD, Rice University, 1972

Rothman Stoler, Andrea, Clinical Associate Professor
Restorative Sciences
DDS, Texas A&M College of Dentistry, 1991

Rotter, Amanda B, Visiting Lecturer
Architecture
MAR, Texas A&M University, 2009

Rouleau, Brian J, Associate Professor
History
PHD, University of Pennsylvania, 2010

Roumell, Elizabeth A, Assistant Professor
Educ Admin & Human Resource Dev
PHD, University of Wyoming, 2009

Roussel, Allen J, Professor
Vet Large Animal Clinical Sc
DVM, Louisiana State University, 1977

Rowe, Gilbert T, Senior Professor
Marine Biology
PHD, Duke University, 1968

Rowell, Charles H, Professor
English
PHD, Ohio State University, 1972

Rowell, Eric C, Professor
Mathematics
PHD, University of California, San Diego, 2003

Rowlett, Kristen M, Instructional Assistant Professor
School of Law
JD, Louisiana State University Law Center, 2013

Roy Sarkar, Tapasree, Research Assistant Professor
Vet Integrative Biosciences
PHD, Purdue University, 2008

Rozier, James T, Lecturer
English
PHD, University of Mississippi, 2015

Rudd, Leann M, Instructional Assistant Professor
Texas A&M University at Qatar
PHD, Indiana State University, 2012

Ruest, Louisbruno, Associate Professor
Biomedical Sciences
PHD, McGill University, Montreal, Canada, 2002

Ruimi, Annie, Associate Professor
Texas A&M University at Qatar
PHD, University of California at Santa Barbara, 2005

Rundell, William, Professor
Mathematics
PHD, Glasgow University, 1974

Ruoff, Catherine M, Clinical Assistant Professor
Vet Large Animal Clinical Sc
DVM, Texas A&M University, 2006

Ruoff, Lynn M, Clinical Professor
Vet Integrative Biosciences
DVM, Colorado State University, 1975

Rupley, William H, Professor
Teaching, Learning & Culture
PHD, University of Illinois at Urbana-Champaign, 1975
Russell Jr, Billy D, Distinguished Professor
Electrical & Computer Eng
PHD, University of Oklahoma, 1975

Russell, Brooke H, Assistant Professor
Institute of Biosciences & Tec
PHD, Texas A&M University System Health Sciences Center, 2008

Russell, David H, Professor
Chemistry
PHD, University of Nebraska - Lincoln, 1978

Russell, Gul A, Professor
Humanities in Medicine
PHD, Indiana University, 1962

Russell, Karen E, Professor
Veterinary Pathobiology
PHD, North Carolina State University, 1997
DVM, Virginia Tech, 1990

Russell, Lauren A, Veterinary Resident Instructor
Vet Large Animal Clinical Sc
DVM, Atlantic Veterinary College, 2014

Russell, Richard L, Lecturer
International Affairs
PHD, University of Virginia, 1997

Rusyn, Ivan I, Professor
Vet Integrative Biosciences
PHD, University of North Carolina at Chapel Hill, 2000
MD, Ukrainian State Medical University, 1994

Rutherford, Tracy A, Professor
Ag Leadership, Educ & Comm
PHD, Texas A&M University, 1998

Rutkowski, Joseph M, Assistant Professor
College of Medicine
PHD, Ecole Polytechnique Federale de Lausanne, France, 2008

Rutter, Christine R, Clinical Assistant Professor
Vet Small Animal Clinical Sc
DVM, Mississippi State University, 2003

Ruyle, Leslie E, Lecturer
International Affairs
PHD, University of Georgia, 2012

Ryan, James G, Professor
Liberal Studies
PHD, University of Notre Dame, 1981

Ryan, Kathryn J, Instructional Assistant Professor
Biology
PHD, Baylor College of Medicine, 1998

Rybkowski, Zofia K, Associate Professor
Construction Science
PHD, University of California - Berkeley, 2009

Rye, Chavela M, Lecturer
Biochemistry & Biophysics
PHD, MIT, 2014

Rye, Hays S, Associate Professor
Biochemistry & Biophysics
PHD, University of California-Berkeley, 1995

Ryoo, Boong Y, Associate Professor
Construction Science
PHD, University of Wisconsin - Madison, 1995

Ryu, Seok Chang, Assistant Professor
Mechanical Engineering
PHD, Stanford University, 2013

Sabat, Isaac E, Assistant Professor
Psychology
PHD, George Mason University, 2016

Sabrulsa Jr, Irvin F, Clinical Assistant Professor
Primary Care Medicine
MD, The University of Texas Health Science Center at Houston, 1978

Sacchettini, James C, Professor
Biochemistry & Biophysics
PHD, Washington University in St. Louis, 1987

Sachs, Matthew S, Professor
Biology
PHD, Massachusetts Institute of Technology, 1986

Sadr, Reza, Associate Professor
Texas A&M University at Qatar
PHD, University of Utah, 2002

Safe, Stephen H, Distinguished Professor
Vet Physiology & Pharmacology
PHD, University of Oxford, 1966

Safonov, Alexei N, Professor
Physics & Astronomy
PHD, University of Florida, 2001

Sagapuram, Dinakar, Assistant Professor
Industrial & Systems Eng
PHD, Purdue University, 2013

Sakamoto, Arthur, Professor
Sociology
PHD, University of Wisconsin - Madison, 1988

Sakhaei Far, Maryam S, Assistant Professor
Civil Engineering
PHD, North Carolina State University, 2011

Salaga, Steven H, Assistant Professor
Health & Kinesiology
PHD, University of Michigan, 2012

Salama, Ghada H, Instructional Associate Professor
Texas A&M University at Qatar
PHD, Cairo University, 2001

Salin, Victoria S, Professor
Agricultural Economics
PHD, Purdue University, 1996
Salter, Phia S, Associate Professor
Psychology
PHD, University of Kansas, 2010

Samollow, Paul, Senior Professor
Vet Integrative Biosciences
PHD, Oregon State University, 1979

Sampson, Sarah N, Clinical Assistant Professor
Vet Large Animal Clinical Sc
PHD, Washington State University, 2008
DVM, Washington State University, 1999

Sams, Alan R, Professor
Poultry Science
PHD, University of Florida, 1987

Samuel, James E, Professor
Microbial Pathogenesis & Immunity
PHD, Washington State University, 1986

Samuel, Nephy G, Clinical Assistant Professor
College of Pharmacy
PHARMD, Texas A&M Irma Lerma Rangel College of Pharmacy, 2014

Samuelson, Charles D, Associate Professor
Psychology
PHD, University of California Santa Barbara, 1986

San Pedro, Joanna Maria N, Lecturer
Chemistry
PHD, Johns Hopkins University, 2017

Sanandres, Luis A, Professor
Mechanical Engineering
PHD, Texas A&M University, 1985

Sanchez Castilla, Marcelo Javier, Professor
Civil Engineering
PHD, Universidad Politecnica de Catalunya (UPC), Barcelona, Spain, 2004

Sanchez-Sinencio, Edgar, Distinguished Professor
Electrical & Computer Eng
PHD, University of Illinois, 1973

Sanders, James O, Professor
Animal Science
PHD, Texas A&M University, 1977

Sanders, Joan T, Senior Lecturer
Accounting
MS, Texas A&M University, 1990

Sandlin, Judy R, Clinical Associate Professor
Educ Admn & Human Resource Dev
PHD, Texas A&M University, 1993

Sandlin, Michael E, Clinical Associate Professor
Health & Kinesiology
PHD, Texas A&M University, 1992

Sang, Huiyan, Associate Professor
Statistics
PHD, Duke University, 2008

Sansom, Roger B, Associate Professor
Philosophy & Humanities
PHD, University of North Carolina at Chapel Hill, 2002

Santander, Patricio J, Senior Lecturer
Chemistry
PHD, Texas A&M University, 1987

Santschi, Peter H, Professor
Marine Science
PHD, Universitat Bern, 1975

Saravanan, Ramalingam, Professor
Atmospheric Sciences
PHD, Princeton University, 1990

Saric, William S, Distinguished Professor
Aerospace Engineering
PHD, Illinois Institute of Technology, 1968

Saripalli, Srikanth, Associate Professor
Mechanical Engineering
PHD, University of Southern California, 2007

Sasangohar, Farzan, Assistant Professor
Industrial & Systems Eng
PHD, University of Toronto, 2015

Saslow, Wayne M, Professor
Physics & Astronomy

English
PHD, Emory University, 2004

Vaught, David J, Professor
History
PHD, University of California, Davis, 1997

Vechan, Ryan J, Assistant Professor of the Practice
Maritime Transportation

Vechot, Luc N, Associate Professor
Texas A&M University at Qatar
PHD, Ecole Nationale Superieure des Mines de Saint Etienne, France, 2007

Vedenov, Dmitry, Associate Professor
Agricultural Economics
PHD, Ohio State University, 2001

Vedlitz, Arnold, Professor
Public Service & Administration
PHD, University of Houston, 1975

Veldman, Joseph W, Assistant Professor
Ecosystem Science & Mgmt
PHD, University of Florida, 2010

Veldman, Robin, Visiting Assistant Professor
College of Liberal Arts
PHD, University of Florida, 2018
Velez, Rodrigo A, Associate Professor
Economics
PHD, University of Rochester, 2009

Vemulapalli, Ramesh, Professor
Veterinary Pathobiology
PHD, University of Maryland, 1996
BVSc, Andhra Pradesh Agricultural University, India, 1986

Vemulapalli, Tracy H, Clinical Associate Professor
Veterinary Pathobiology
DVM, Virginia-Maryland Regional College of Veterinary Medicine, 1998

Venkatraj, Vijayanagaram S, Clinical Associate Professor
Vet Integrative Biosciences
PHD, New York University, 1992

Ventura, Emanuele, Visiting Assistant Professor
Mathematics
PHD, Aalto University, 2017

Verduzco Jr, Rene A, Clinical Assistant Professor
College of Pharmacy
PHARMD, The University of Texas Health Science Center at Houston, 2011

Verma, Suzanne N, Instructional Assistant Professor
Oral & Maxillofacial Surgery
MMS, University of Illinois at Chicago, 2001

Versaw, Wayne K, Associate Professor
Biology
PHD, University of Wisconsin - Madison, 1995

Vess, Matthew K, Associate Professor
Psychology
PHD, University of Missouri, 2010

Vieira-De-Castro, Luis, Professor
Anthropology
PHD, Texas A&M University, 2001

Vilaros, Teresa M, Professor
Hispanic Studies
PHD, University of Georgia, 1989

Villalobos, Jose R, Associate Professor
Hispanic Studies
PHD, University of California Irvine, 1998

Villareal, Samuel S, Senior Lecturer
Electrical & Computer Eng
PHD, Texas A&M University, 1999

Vina, Stephen R, Adjunct Professor
School of Law
JD, Texas Wesleyan University School of Law, 2001

Vinayak, Fnu, Assistant Professor
Mechanical Engineering
PHD, Purdue University, 2016

Vionnet-Brachier, Francoise M, Instructional Associate Professor
International Studies
PHD, University of Texas, 1989

Viruru, Radhika, Clinical Professor
Teaching, Learning & Culture
PHD, Texas A&M University, 1998

Viser, Victor J, Instructional Assistant Professor
Liberal Studies
PHD, Temple University, 1995

Vishnubhatk, Saurabh, Associate Professor
School of Law
JD, University of New Hampshire School of Law, 2010
LLM, University of New Hampshire School of Law, 2010

Vitale, Karla S, Clinical Assistant Professor
Primary Care Medicine
DO, Midwestern University, 2001

Voelker, Gary A, Professor
Wildlife & Fisheries Sciences
PHD, University of Washington, 1998

Vogelsang, Martha M, Senior Lecturer
Animal Science
PHD, Texas A&M University, 1986

Voges Gariepy, Andra-Kay, Clinical Associate Professor
Vet Large Animal Clinical Sc
DVM, Texas A&M University, 1991

Von Gillern, Sam R, Clinical Assistant Professor
Teaching, Learning & Culture
PHD, Iowa State University, 2017

Von Vacano, Diego A, Associate Professor
Political Science
PHD, Princeton University, 2003

Voneiff, George W, Professor of the Practice
Petroleum Engineering
MS, Texas A&M University, 1992

Vorobets, Mariya, Instructional Assistant Professor
Mathematics
PHD, Lviv National University, 2004

Vorobets, Yaroslav, Associate Professor
Mathematics
PHD, Moscow Lomonosov State University, 1998

Waas, Jack R, Lecturer
Chemistry
PHD, University of Michigan, 1997

Wachsmann, Shelley A, Professor
Anthropology
PHD, Institute of Archaeology, Hebrew University, 1991

Wade, Terry L, Research Professor
College of Geosciences
JD, University of Rhode Island, 1978

Wakefield, Karen J, Instructional Assistant Professor
Humanities in Medicine
PHD, Texas A&M University, 2014
Walewski, John A, Associate Professor of the Practice
Civil Engineering
PHD, University of Texas, 2005

Walichowski, Miranda F, Clinical Associate Professor
Educational Psychology
PHD, Texas A&M University, 2009

Walker, Cheryl L, Senior Professor
Institute of Biosciences & Tec
PHD, The University of Texas Health Science Center at Dallas, 1984

Walker, Deborah E, Lecturer
International Affairs
JD, South Texas College of Law, 1986

Walker, Dillon K, Research Assistant Professor
Health & Kinesiology
PHD, Kansas State University, 2008

Walker, Duncan M, Professor
Computer Science & Engineering
PHD, Carnegie Mellon University, 1986

Walker, Matthew B, Associate Professor
Health & Kinesiology
PHD, Florida State University, 2007

Wallace, William D, Adjunct Professor
School of Law
JD, Texas Wesleyan University School of Law, 2009

Wallis, Cara J, Associate Professor
Communication
PHD, University of Southern California, 2008

Walsh, Jonelle L, Assistant Professor
Physics & Astronomy
PHD, University of California, Irvine, 2011

Waltemyer, David S, Clinical Assistant Professor
Health & Kinesiology
PHD, Texas A&M University, 2006

Walters, Lynne M, Associate Professor
Teaching, Learning & Culture
PHD, University of Wisconsin - Madison, 1977

Walzem, Rosemary L, Professor
Poultry Science
PHD, University of California, Davis, 1987

Wan, Wei, Senior Lecturer
Biology
PHD, University of California, Davis, 2005

Wang, Dawei, Research Associate Professor
Physics & Astronomy
PHD, Chinese University of Hong Kong, 2012

Wang, Dechun, Associate Professor
Accounting
PHD, University of Missouri - Columbia, 2004

Wang, Fen, Professor
Institute of Biosciences & Tec
PHD, Clarkson University, 1994

Wang, Fengming, Clinical Assistant Professor
Endodontics
PHD, West China College of Stromatology, 2006

Wang, Hongbin, Professor
Microbial Pathogenesis & Immu
PHD, Ohio State University, 1998

Wang, Jia, Associate Professor
Educ Admn & Human Resource Dev
PHD, University of Georgia, 2004

Wang, Jun, Assistant Professor
Neuroscience Experiment Theara
PHD, Shanghai Institutes for Biological Sciences, 1999

Wang, Jyhwen, Professor
Eng Tech & Ind Distribution
PHD, Northwestern University, 1991

Wang, Jyhwen, Professor (courtesy appointment)
Mechanical Engineering
PHD, Northwestern University, 1991

Wang, Jyhwen, Professor
Materials Science & Engr
PHD, Northwestern University, 1991

Wang, Kun, Lecturer
Mathematics
PHD, University of Puerto Rico, Rio Piedras, 2014

Wang, Lifan, Professor
Physics & Astronomy
PHD, University of Science and Technology of China, 1993

Wang, Ping, Assistant Professor
Maritime Administration
PHD, The Ohio State University, 2007

Wang, Qian, Associate Professor
Biomedical Sciences
PHD, Chinese Academy of Sciences, 1998

Wang, Shiren, Associate Professor
Industrial & Systems Eng
PHD, Florida State University, 2006

Wang, Suoqin, Professor
Statistics
PHD, University of Texas at Austin, 1988

Wang, Wen-Yao, Associate Professor
Maritime Administration
PHD, Texas A&M University, 2008

Wang, Xiaofang, Assistant Professor
Biomedical Sciences
DDS, Fourth Military Medical University, China, 2003
Wang, Xiubin B, Associate Professor
Civil Engineering
PHD, University of California, Irvine, 2001

Wang, Yen J, Instructional Assistant Professor
Industrial & Systems Eng
DEN, Northwestern University, 1991

Wang, Yuhe, Assistant Professor
Texas A&M University at Qatar
PHD, Texas A&M University, 2013

Wang, Zhangyang, Assistant Professor
Computer Science & Engineering
PHD, University of Illinois at Urbana-Champaign, 2016

Ward Ober, Elizabeth S, Professor
Molecular & Cellular Medicine
PHD, University of Cambridge, 1985

Ward, Joseph D, Professor
Mathematics
PHD, Indiana University, 1973

Ward, Ronald G, Senior Lecturer
Computer Science & Engineering
PHD, Texas A&M University, 1973

Ward, Susan E, Clinical Associate Professor
Health & Kinesiology
PHD, University of Virginia, 1990

Warden, Robert R, Professor
Architecture
MAR, Texas A&M University, 1986

Ware, Michael L, Adjunct Professor
School of Law
JD, University of Houston Law Center, 1983

Waren, Warren P, Instructional Assistant Professor
Sociology
PHD, Texas A&M University, 2008

Warren, Nancy B, Professor
English
PHD, Indiana University, 1997

Washburn, David J, Assistant Professor
Health Policy & Management

Washburn, Kevin E, Professor
Vet Large Animal Clinical Sc
DVM, Oklahoma State University, 1993

Washburn, Shannon E, Clinical Associate Professor
Vet Physiology & Pharmacology
PHD, Texas A&M University, 2010
DVM, Texas A&M University, 1994

Washington, Karen R, Adjunct Professor
School of Law
JD, University of Texas at Austin, 1984

Wasserman, Jeremy S, Associate Professor
Vet Physiology & Pharmacology
PHD, Indiana University, 1985

Watanabe, Coran M, Associate Professor
Chemistry
PHD, John Hopkins University, 1999

Waters, Michael R, Professor
Anthropology
PHD, The University of Arizona, 1980

Waterworth, Leonard D, Executive Professor
Maritime Administration
MS, US Army War College, 2000

Watkins, Jeffrey P, Professor
Vet Large Animal Clinical Sc
DVM, Kansas State University, 1980

Watkins, Joshua R, Visiting Assistant Professor
Geography
PHD, University of California, Davis, 2017

Watson, Karan L, Professor
Electrical & Computer Eng
PHD, Texas Tech University, 1982

Watson, Nancy T, Clinical Professor
Educ Admin & Human Resource Dev
PHD, Texas A&M University, 1998

Watson, Patricia K, Instructional Assistant Professor
Humanities in Medicine
MD, Texas A&M Health Science Center College of Medicine, 2001

Watson, Robert O, Assistant Professor
Microbial Pathogenesis & Immu
PHD, Yale University, 2006

Watson, Wesley T, Lecturer
Ecosystem Science & Mgmt
PHD, Texas A&M University, 1999

Watt, John D, Clinical Associate Professor
Management
PHD, Kansas State University, 2002

Watts, Ashlee E, Assistant Professor
Vet Large Animal Clinical Sc
DVM, Colorado State University, 2003

Watzak, Bree C, Clinical Assistant Professor
College of Pharmacy
PHD, University of Houston College of Pharmacy, 2008

Waugh, Yuki, Instructional Assistant Professor
International Studies
PHD, University of Nebraska, 2006

Waxman, Hersholt C, Professor
Teaching, Learning & Culture
PHD, University of Illinois at Chicago, 1982

Graduate Faculty Overview

The Graduate Faculty at Texas A&M University consists of the President, the Provost and Executive Vice President, the Associate Provosts, the Deans of all subject-matter colleges, selected Directors, and properly qualified academic groups.

This document presents University policies and practices which Department Heads, Deans, and Intercollegiate faculties should follow in nominating members to the Graduate Committee Faculty of Texas A&M University for participation on graduate student advisory committees. This document also discusses the various roles of Graduate Committee Faculty and describes the credentialing requirements for the Graduate Teaching Faculty. Departments, intercollegiate faculties, and colleges may require additional prerequisites for individuals seeking an appointment to the Graduate Committee Faculty. Additional requirements are subject to review and approval by the Associate Provost for Graduate and Professional Studies.

The Graduate Committee Faculty Nomination form is accessed by logging into http://gradcom.tamu.edu. For questions regarding access to the Graduate Committee Faculty Nomination site please contact the GradCom Administrator at gradcom@tamu.edu. The form should be completed in its entirety and the appropriate documents uploaded. Once complete, the nomination will be submitted for approval through the workflow.

Only those who are authorized to sign and submit graduate documents have been given access to the Graduate Committee Faculty Nomination system.

Graduate Teaching Faculty

According to SACS guidelines, faculty teaching graduate and post-baccalaureate course work should have an earned doctorate or terminal degree in the teaching discipline or a related discipline. Other credentials...
that may be considered include possessing a master’s degree or at least 18 semester credit hours of graduate-level coursework in the same or closely related field; professional licensure or certification in a related field or profession, or significant professional, research or teaching experience in the same or closely related field. Faculty members meeting these credentialing requirements are automatically members of the Graduate Teaching Faculty.

The office of the dean of faculties assumes responsibility for verifying the teaching qualifications for faculty. Colleges and departments oversee hiring of graduate assistants who serve as instructors of record for undergraduate courses. The guidelines for all instructional faculty, including graduate teaching assistants, who are instructors of record for graduate and undergraduate courses at Texas A&M University and its two branch campuses, Texas A&M University Galveston campus and Texas A&M University Qatar campus are available at:

In addition to meeting the credentialing requirements for teaching graduate courses, faculty teaching research courses such as 691 and other designated courses must also be members of the Graduate Committee Faculty.

**Graduate Committee Faculty**

Appointees to the Graduate Committee Faculty participate in the graduate degree programs of the University by serving on graduate student advisory committees.

Members of the Graduate Committee Faculty are selected from qualified individuals of the faculty and professional staff of Texas A&M University; from employees of Texas A&M University System agencies such as Texas A&M AgriLife Research, Texas A&M Forest Service, Texas A&M AgriLife Extension, TEES, TTI; from employees of affiliated research organizations (such as USDA) located near Texas A&M campus sites, and from affiliated hospitals and clinical organizations.

Nomination for membership on the Graduate Committee Faculty is always initiated by the head of the appropriate academic department, intercollegiate faculty, or dean of college (under special circumstances) of Texas A&M University and is processed as discussed in the following sections.

Appointment to membership on the Graduate Committee Faculty, while considered an honor, serves functional purposes as well. Appointment to membership is not for the sole purpose of conferring recognition upon an individual, but is designed to assure competence in the directing and advising of graduate students. Such competence is, in part, a function of experience and knowledge of operational procedures; it is also characterized by ability and motivation.

Membership on the Graduate Committee Faculty is maintained only by participating in graduate programs by directing or administering graduate work, by doing research and publishing, or by other direct and substantial contributions to the graduate programs of the University, such as through service on a Graduate Instruction Committee or with administrative assignments in graduate education. A member of the graduate committee faculty may not serve on the graduate committee faculty of an academic program in which the member is pursuing a graduate degree or certificate. Individuals who have not been appointed to the Graduate Committee Faculty may not serve on student advisory committees unless special approval is granted by the Associate Provost for Graduate and Professional Studies.

The Graduate Council expects that all Deans, Department Heads and Chairs of Intercollegiate Faculty will regularly review the Graduate Committee Faculty under their direction and will recommend withdrawal of the appointments of any members who no longer merit membership on the Graduate Committee Faculty on the basis of their lack of contribution to graduate education. If the chair of a student’s advisory committee voluntarily leaves the University and the student is near completion of the degree and wants the chair to continue to serve in this role, the student is responsible for securing a current member of the University Graduate Committee Faculty, from the student’s academic program and located near the Texas A&M University campus site, to serve as the co-chair of the committee. The Department Head or Chair of intercollegiate faculty may request in writing to the Associate Provost for Graduate and Professional Studies that a faculty member who is on an approved leave of absence or has voluntarily separated from the university, be allowed to continue to serve in the role of chair of a student’s advisory committee without a co-chair for up to one year. The student should be near completion of the degree. Extensions beyond the one year period can be granted with additional approval of the Dean.

The Department Head or Chair of intercollegiate faculty shall notify any faculty member who is non-voluntarily removed from the roles of the Graduate Committee Faculty, and the faculty member has the right to appeal his/her removal through University Rule 12.99.99.M2 (Faculty Grievances Procedures).

The two categories of membership include: 1) Member, and 2) Special Appointment.

**Possible Roles of Graduate Committee Faculty**

**Members of Graduate Committee Faculty**

**A. Tenured and Tenure-Track TAMU Faculty**

Tenured and Tenure-track (T/TT) faculty members of Texas A&M University are eligible to participate as members of the Graduate Committee Faculty under criteria and guidelines as established by each college or department. Also academic professional track faculty members employed by Texas A&M University Qatar campus (TAMUQ) with appropriate professorial rank (assistant professor, associate professor, or professor) are eligible to participate as members of the Graduate Committee Faculty. The aforementioned faculty members may serve as chair, co-chair, or member of advisory committees of master’s and doctoral students.
Appointment of a T/TT faculty member is accomplished when a new hire is identified as graduate faculty in the Dean of Faculties hiring portal. The faculty member will be added only to the programs associated with the hiring department. Nominations of T/TT faculty members who are not adloc'd to a graduate degree-granting unit, to serve as chair or co-chair in a graduate degree-granting unit must come from the department head or chair of intercollegiate faculty for that graduate degree-granting unit. This is accomplished by submitting a Graduate Committee Faculty nomination through the Graduate Committee Faculty nomination website: http://gradcom.tamu.edu. The nominations will progress through a workflow system to receive the approval of the department head or chair of intercollegiate faculty for that graduate degree-granting unit. Appointment of an academic professional track faculty member employed by Texas A&M University Qatar campus (TAMUQ) with appropriate professorial rank (assistant professor, associate professor, or professor) is accomplished through use of the Graduate Committee Faculty nomination and letter from the TAMUQ Graduate Instruction Committee (the members of which shall be members of the Graduate Committee Faculty at TAMU) through the Dean/CAO of the TAMUQ campus and the appropriate administrative chain at TAMU.

B. Academic Professional Track Faculty and Professional Staff of TAMU, TAMUS Agencies, Affiliated research organizations, and Affiliated Hospitals and Clinical Organizations

An academic professional track faculty employed by TAMU, designated TAMUS agencies, or affiliated hospitals and clinical organizations is eligible to participate as a member of the Graduate Committee Faculty (if permitted by department or college guidelines), and may serve as chair, co-chair, or member of advisory committees of master's and doctoral students with appropriate approval. Professional staff employed by TAMU, designated TAMUS agencies, or affiliated hospitals and clinical organizations are eligible to participate as a member of the Graduate Committee Faculty (if permitted by department or college guidelines), and may serve as co-chair or member of advisory committees of master’s and doctoral students with appropriate approval.

Appointments of these academic professional track individuals and professional staff are accomplished by submitting a Graduate Committee Faculty nomination through the Graduate Committee Faculty nomination website: http://gradcom.tamu.edu. The nominations will progress through a workflow system to obtain approvals from the appropriate department head or chair of intercollegiate faculty, Chair of the Graduate Instruction Committee and the College dean. The workflow will issue a letter request, initiated by the head of the academic department, dean of college, or chair of intercollegiate faculty, through the College Graduate Instruction Committee and the College Dean. The letter must provide evidence that the nominee meets the qualifications for the desired role(s).

1. General qualifications for serving on advisory committees for master's students only

Minimum qualifications for academic professional track faculty or professional staff employed by TAMU, designated TAMUS agencies, affiliated research organizations, or affiliated hospitals and clinical organizations to serve in the various roles of the graduate committee faculty for master's students only are described below each role in the following section.

Chair role:

The following minimum qualifications must be met for eligibility to serve in the chair role on advisory committees for master's students.

(a) qualifications (a)-(d) listed below for co-chair role
(b) employment location near city of Texas A&M campus site (except for online programs).

Co-Chair role:

The following minimum qualifications must be met for eligibility to serve in the co-chair role on advisory committees for master's students.

(a) has an earned master's or terminal degree
(b) has actively served on a graduate student's advisory committee, or held/holds an administrative assignment in a graduate program at Texas A&M or another university
(c) has published a scholarly work as primary author or corresponding author, or appropriate evidence of professional accomplishments related to the discipline
(d) employed by Texas A&M University; Texas A&M University System agencies such as Texas A&M AgriLife Research, Texas A&M Forest Service, Texas A&M AgriLife Extension, TEES, TTI; affiliated research organizations, or affiliated hospitals and clinical organizations with professorial rank.

Member role:

The following minimum qualifications must be met for eligibility to serve in the member role on advisory committees for master's students.

(a) has an earned master's or terminal degree, or an earned bachelor's degree and appropriate evidence of professional accomplishments related to the discipline

Exceptions to the minimum qualifications of any of the various roles listed above may be requested as a part of the letter from heads of departments, deans of colleges, or chairs of intercollegiate faculty through the Graduate Instruction Committee and Dean of College.

2. General qualifications for serving on advisory committees for doctoral students

Minimum qualifications for academic professional track faculty or professional staff employed by TAMU, designated TAMUS agencies, affiliated research organizations, or affiliated hospitals and clinical organizations to serve in the various roles of the graduate committee faculty for doctoral students are described below each role in the following section.

Chair role:

The following minimum qualifications must be met for eligibility to serve in the chair role on advisory committees for doctoral students.

(a) qualifications (a)-(d) listed below for co-chair role
(b) employment location near city of Texas A&M campus site (except for on-line programs).

Co-Chair role:
The following minimum qualifications must be met for eligibility to serve in the co-chair role on advisory committees for doctoral students.

(a) has an earned doctoral or terminal degree

(b) has actively served on a graduate student advisory committee, or held/holds an administrative assignment in a graduate program at Texas A&M or another university

(c) has published a scholarly work as primary author or corresponding author, or appropriate evidence of professional accomplishments related to the discipline

(d) employed by Texas A&M University; Texas A&M University System agencies such as Texas A&M AgriLife Research, Texas A&M Forest Service, Texas A&M AgriLife Extension, TEES, TTI; affiliated research organizations, or affiliated hospitals and clinical organizations with professorial rank.

Exception to the minimum qualifications of any of the various roles listed above may be requested by heads of departments, deans of colleges, or chairs of intercollegiate faculty through the Graduate Instruction Committee and Dean of College.

C. Faculty and Professional Staff Employed By Other Institutions and Organizations

Faculty and professionals not employed by TAMU, TAMUS agencies listed in section B, or affiliated hospitals and clinical organizations are eligible to participate as a member of the Graduate Committee Faculty (if permitted by department or college guidelines), and may serve as co-chair or member of advisory committees of master’s and doctoral students with appropriate approval.

Appointments of the aforementioned individuals are accomplished by submitting a Graduate Committee Faculty nomination through the Graduate Committee Faculty nomination website: http://gradcom.tamu.edu. The nominations will progress through a workflow system to receive the approvals of the department head or chair of intercollegiate faculty, Chair of the Graduate Instruction Committee and College dean. The workflow will request a letter, initiated by the head of the academic department, dean of college, or chair of intercollegiate faculty, through the College Graduate Instruction Committee and the College Dean. The letter must provide evidence that the nominee meets the qualifications for the desired role(s).

1. General qualifications for serving on advisory committees for master’s students only

Minimum qualifications for individuals who are not employed by TAMU, TAMUS agencies listed in section B, or affiliated hospitals and clinical organizations are described below each role in the following section.

Co-Chair role:

The following minimum qualifications must be met for eligibility to serve in the co-chair role on advisory committees for master’s students.

(a) has an earned master’s or terminal degree

(b) has actively served on a graduate student advisory committee, or held/holds an administrative assignment in a graduate program at Texas A&M or another university

(c) has published a scholarly work as primary author or corresponding author, or appropriate evidence of professional accomplishments related to the discipline

Member role:

The following minimum qualifications must be met for eligibility to serve in the member role on advisory committees for master’s students.

(a) has an earned master’s or terminal degree, or an earned bachelor’s degree and appropriate evidence of professional accomplishments related to the discipline

Exceptions to the minimum qualifications of any of the various roles listed above may be requested as a part of the letter from heads of departments, deans of colleges, or chairs of intercollegiate faculty through the Graduate Instruction Committee and Dean of College.

2. General qualifications for serving on advisory committees for doctoral students

Minimum qualifications for individuals who are not employed by TAMU, TAMUS agencies listed in section B, affiliated research organizations, or affiliated hospitals and clinical organizations to serve in the various roles of the graduate committee faculty for doctoral students are described below each role in the following section.

Co-Chair role:

The following minimum qualifications must be met for eligibility to serve in the co-chair role on advisory committees for doctoral students.

(a) has an earned doctoral or terminal degree

(b) has actively served on a graduate student advisory committee, or held/holds an administrative assignment in a graduate program at Texas A&M or another university

(c) has published a scholarly work as primary author or corresponding author, or appropriate evidence of professional accomplishments related to the discipline

Member role:

The following minimum qualifications must be met for eligibility to serve in the member role on advisory committees for doctoral students.

(a) has an earned master’s or terminal degree, or an earned bachelor’s degree and appropriate evidence of professional accomplishments related to the discipline

Exceptions to the minimum qualifications of any of the various roles listed above may be requested by heads of departments, deans of colleges, or chairs of intercollegiate faculty through the Graduate Instruction Committee and Dean of College.
Special Appointments

Situations may exist where the head of an academic department or chair of intercollegiate faculty wishes to have qualified individuals serve [such as, from another university, government or industry] on a student’s Advisory Committee without being permanent members on the Graduate Committee Faculty. An individual serving as a Special Appointment on a student’s Advisory Committee does not count toward the minimum number of Graduate Committee Faculty necessary to form the committee. Special appointments are accomplished by submitting a Graduate Committee Faculty nomination through the Graduate Committee Faculty nomination website: http://gradcom.tamu.edu. The nominations will progress through a workflow system to obtain approvals from the department head or chair of intercollegiate faculty. The workflow will request a letter, initiated by the head of an academic department or chair of intercollegiate faculty to the Associate Provost for Graduate and Professional Studies with the individual’s resume attached. The letter should state the merits of the individual being nominated and should include a list of the specific student advisory committees on which the individual will serve.

Approved by the Faculty Senate on August 10, 2015

Intercollegiate Faculty

Texas A&M University has established the concept of an intercollegiate faculty with expressed goals of

1. fostering development and communication in disciplinary fields represented by faculty members in different departments and colleges,
2. utilizing faculty expertise in specific areas to strengthen emerging disciplinary programs and
3. overseeing the academic administration of graduate degree programs in a particular discipline.

To have access to an intercollegiate faculty’s degree programs, a graduate student must be admitted to that program and a member of that faculty must serve as chair or co-chair of the student’s advisory committee.

Intercollegiate faculties have been formed in agribusiness, biotechnology, engineering systems management, genetics, molecular and environmental plant sciences, neuroscience, toxicology, reproductive biology, and water management and hydrological science.

Texas A&M University System Graduate Faculty

The Texas A&M University System (TAMUS) has established a System Graduate Faculty which enables and facilitates collaborations among System institutions. Membership on the TAMUS Graduate Faculty provides students with access to faculty expertise throughout the System. Membership also creates an edge in recruiting top students into individual programs and helps provide recruiting opportunities with an intellectually, geographically and ethnically diverse pool of students. Members of the TAMUS Graduate Faculty are granted Associate Member status on the Texas A&M University Graduate Faculty. As a result, these faculty may serve on graduate advisory committees as a member or a co-chair (but not as chair) with a member of the Texas A&M University Graduate Faculty or they may teach a graduate course.

System Graduate Faculty Guidelines

1. Purpose. The Texas A&M University System Graduate Faculty has been developed for the following purposes:
   a. To facilitate participation in graduate education for a student in the A&M System.
   b. To provide a graduate student access to the expertise of faculty members throughout the System.
   c. To increase inter-institutional faculty collaboration throughout the A&M System.
   d. To promote the development of multi-disciplinary educational and research programs and the capacity to study complex scientific and social issues.

2. Membership Background
   a. Membership on the A&M System Graduate Faculty provides the opportunity to participate in graduate education at the A&M System universities through serving on graduate committees, advising a graduate student, and teaching graduate courses.
   b. Appointment to membership on the A&M System Graduate Faculty is designed to assure rigor in the directing, counseling, and teaching of a graduate student.
   c. All of the A&M System Graduate Faculty members can serve as members of any graduate committee.
   d. The chair, or co-chair, of a graduate committee must be from the institution that is conferring the graduate degree.

3. Membership Qualifications. Consideration for membership on the A&M System Graduate Faculty requires meeting the following qualifications:
   a. The individual must hold the terminal degree, usually an earned doctorate. Exceptions will be considered only if justified in accordance with the “Southern Association of Colleges and Schools Commission on Colleges.”
   b. The individual must be a tenured or tenure-track member of a Texas A&M University System university and hold a professorial rank.
   c. A person holding the title of instructor or lecturer may not be considered for membership on the A&M System Graduate Faculty.
   d. Individuals holding professorial rank at an agency of the A&M System are eligible for membership.
   e. The individual must be a member of the graduate faculty at his/her home institution.
   f. The individual must be an active participant in his/her graduate program through teaching, directing or administering graduate work.
   g. The individual must show evidence of active research and scholarly work within the past five years. This should include publication as primary author of scholarly works in peer-reviewed journals, publication of scholarly books, presentations at professional meetings, or creative works, such as performances, work in juried exhibitions, or other creative works appropriate to the individual’s discipline.
   h. A graduate student at any A&M System institution may not be a member of the A&M System Graduate Faculty. Membership on the A&M System Graduate Faculty is forfeited upon a faculty or staff member’s admission to a graduate program at any institution in the A&M System.

4. Nomination, Appointment and Review Process
   a. Nomination for membership to the A&M System Graduate Faculty is made by submission of an official application by a faculty
member and an accompanying letter of endorsement from the individual's department head or chair and college dean. The application and letter of endorsement are sent to the graduate dean, who certifies institutional graduate faculty appointment status, and forwards the nomination to the A&M System Council of Graduate Deans for consideration and action.

b. The application from the faculty member must identify the institutional graduate faculty of which he or she is a member, specify the graduate degree(s) that he or she is qualified to supervise under the conditions of the institutional appointment, and specify the graduate program(s) in which he or she wishes to participate as a System graduate faculty member. The application should be accompanied by a current curriculum vitae.

c. The Council of Graduate Deans will appoint faculty from member institutions as needed to a Graduate Faculty Review Advisory Committee to consider applications and reappointments and to make recommendations to the Council of Graduate Deans.

d. An A&M System Graduate Faculty member is appointed for a five-year term. At the end of the five-year term, the member will be re-evaluated for reappointment by the Council of Graduate Deans. Failure to maintain membership criteria will result in removal from the A&M System Graduate Faculty. The Council of Graduate Deans will notify by letter a faculty member who is non-voluntarily removed from membership on the A&M System Graduate Faculty. The faculty member's department head, dean, provost and graduate dean will also receive notification.

5. Graduate Faculty Membership List. A list of current membership will be maintained in the Office of the Vice Chancellor for Academic and Student Affairs, the graduate office at each System university and on the Office of Graduate and Professional Studies (http://ogaps.tamu.edu) website.
INTERNATIONAL OPPORTUNITIES FOR STUDENTS

International Opportunities for Students

Study Abroad Programs Office

http://studyabroad.tamu.edu

Texas A&M University is committed to providing access to high impact international opportunities for all students. The ability to engage successfully across cultures and the development of international leadership skills and global awareness are crucial for success and lifelong learning.

The Study Abroad Programs Office provides access for all Texas A&M students to a broad range of transformational and international experiences lasting from one week to an academic year. Last year, over 5,500 students participated in academic, intern, volunteer, and research opportunities in over 100 different countries. Our office also contributes to the development of on-campus experiences that foster cultural awareness.

Many graduate and professional students pursue careers in academic, managerial or administrative positions that benefit from conducting research, attending conferences, working, living or studying abroad. When considering an international opportunity, it is important for a student to consult with his/her committee chair early. Not all credits can be applied to a degree plan, so pre-trip planning and approval is very important.

Students are encouraged to visit the Study Abroad Programs Office, located on the 1st floor of the Pavilion, any weekday from 8 am – 5 pm for additional information.

Faculty-Led Programs

These are programs led by a Texas A&M faculty member and students receive A&M credit. To find the most recent faculty-led program offerings, visit http://studyabroad.tamu.edu/Program-Types/Faculty-led.

Exchange Programs (REEPs)

These programs give students the opportunity to enroll and pay tuition at Texas A&M but “switch places” with counterparts at foreign institutions. Students can find both university-wide exchange and college-specific exchange programs at http://studyabroad.tamu.edu/Program-Types/Exchange-(REEPs).

Intern & Volunteer

Students have a variety of options for credit or non-credit intern or volunteer abroad programs. Students can find opportunities through Texas A&M offices and students organizations as well as third-party affiliate providers at http://studyabroad.tamu.edu/Program-Types/Intern-Research-Volunteer.

Research

In some cases, graduate students are employed as part of a research project, and in others, they register for research hours at Texas A&M and go abroad independently. In all such cases, students should register their research experiences with the Study Abroad Programs Office to ensure emergency or other assistance while abroad. Learn more at http://studyabroad.tamu.edu/Program-Types/Intern-Research-Volunteer.

Transfer Credit & Supervised Direct Enrollment

Students may opt to pursue a study abroad program through one of our third-party affiliate providers. Please check with your academic advisor to determine courses that can transfer and visit our website to learn more at http://studyabroad.tamu.edu/Program-Types/Transfer-Credit.

Another option is to direct enroll at a foreign university as a non-degree seeking student to study. In some cases, your faculty advisor or academic department may have an existing collaboration with a foreign university.

Degrees from Foreign Universities

Occasionally, a student may wish to receive an advanced degree from an international university, such as a master’s degree. Students should work with their advisor to identify degree programs that will fit into your long-term academic or career plans.

University Locations Abroad

Many Texas A&M partner organizations offer international opportunities to students. Students can check the Study Abroad Programs Office search engine to locate such experiences or contact their academic departments about programs and locations they recommend. In addition, Texas A&M has a research and education center in Costa Rica.

The Soltis Center for Research and Education in Costa Rica

http://soltiscentercostarica.tamu.edu

The Soltis Center for Research and Education in north-central Costa Rica was established in January 2009 to support research, education and outreach in Costa Rica and throughout Central America. The unique physical and cultural setting of the center provides students and faculty with research and educational opportunities in tropical ecology, civil engineering, ecosystem sciences, geosciences, public and rural health and agricultural economics.

Funding to Go Abroad

Federal and other financial aid may be adjusted to accommodate for extra costs associated with credit-bearing international experiences. Students interested in exploring funding options should discuss this with your academic department, your study abroad advisor, and Scholarships & Financial Aid. Learn about scholarships and financial aid available through Texas A&M, locally and national, and from affiliate providers at http://studyabroad.tamu.edu/Funding.

On Campus Engagement in International Opportunities

Students don't have to go abroad to take advantage of international opportunities offered by Texas A&M. Students who remain on campus are encouraged to participate in many options available including the following:

• Center for International Business Studies (http://cibs.tamu.edu)
• Confucius Institute at Texas A&M University (http://confucius.tamu.edu)
• Corps Global Leadership Initiatives (http://corps.tamu.edu/global)
• Halliburton Engineering Global Programs (http://engineering.tamu.edu/global)
• MSC L.T. Jordan Institute for International Awareness (http://ltjordan.tamu.edu)
• MSC SCONA (http://scona.tamu.edu)
• Norman Borlaug Institute for International Agriculture (http://borlaug.tamu.edu)
• Public Policy Internship Program (http://ppip.tamu.edu)
• Scowcroft Institute of International Affairs (http://bush.tamu.edu/scowcroft)
• Student Organizations (http://studentactivities.tamu.edu/app/organization) – To find internationally focused student organizations, visit http://studentactivities.tamu.edu/app/search/index and search international.
• Undergraduate Research (http://ugr.tamu.edu)

Students should consult their department and college advisers for additional opportunities to engage in global education on or off campus.
OMBUDS SERVICES FOR GRADUATE EDUCATION

Ombuds Services for Graduate Education

The Ombuds Officer advocates for the fair processes of graduate education and provides equal, open access to all parties: graduate and professional students, staff, faculty, and administrators. The university is a large and complex institution and graduate and professional students often play multiple roles (e.g., student, research collaborator, teacher, technician, and peer). Misunderstandings and conflicts can arise in any one of these roles. Having a confidential conversation with an Ombuds Officer can be a first step if you do not know where to turn. The Ombuds Officer serves as an informal, independent, neutral, and confidential resource for persons to discuss questions and concerns related to graduate education.

The Graduate and Professional Student Ombuds Officer is guided and informed by the Code of Ethics and Standards of Practice of the International Ombudsman Association.

The Ombuds Officer can:

• Listen and help you achieve a greater understanding of the problem.
• Help you find information applicable to your situation and identify possible solutions to your problem.
• Explain University policies and procedures and how they apply to your specific case.
• Help you identify options for managing conflicts with colleagues, staff, faculty, and advisors.
• Help you achieve fair and equitable solutions to problems.
• Facilitate communication among people in conflict, through mediation, facilitated dialogues, and the like.
• Provide other types of assistance to help you resolve a problem informally.
• Refer you to formal grievance or appeal procedures if you wish to engage in a formal process.

Contact information for Ombuds Services:

Office of Graduate and Professional Studies
ombuds@tamu.edu
http://ogaps.tamu.edu/
TUITION, FEES AND OTHER FINANCIAL INFORMATION

General Information

Educational expenses for the months of enrollment will vary according to course of study. For details on the basic budget for a particular graduate or professional program, please visit http://financialaid.tamu.edu. Scholarships & Financial Aid considers tuition and fees, books and supplies, transportation, room and board, incidental and living expenses in the cost of attendance for programs. All tuition and fee amounts provided herein represent the most accurate figures available at the time of publication and are subject to change without notice. University Rules in place at the time of publishing are reflected here. All are subject to change. The most current information available will be maintained on the Student Business Services website http://sbs.tamu.edu.

Payment of Tuition and Fees

A student must meet all financial obligations to the University by the due dates to avoid late penalties. Failure to pay amounts owed may result in cancellation of the student’s registration and being barred from future enrollment and receiving official transcripts. A student who wishes to pay fees in installments can select the option on the website http://howdy.tamu.edu. The Emergency Tuition and Fees Loan is available to help students pay their Texas A&M University tuition and required fees. The Emergency Tuition and Fees Loans are for required tuition and fees only. The online process can be accessed at http://financialaid.tamu.edu.

Obligation to Pay Tuition, Required Fees, Other Fees and Charges for Optional Services

By registering for classes, a student agrees to pay all tuition and required fees associated with his/her registration, optional services and other fees, whether paying in full or utilizing the installment payment option. Failure to pay tuition, fees and other charges may result in penalties, late registration fees, and/or possible cancellation of classes.

Financial Obligation for Graduating Students

According to Texas A&M University Student Rules and Chapter § 54.007 (d) of the Texas Education Code, all financial obligations to the University must be paid by the end of the semester. Failure to settle all financial obligations will result in withholding a student’s diploma at graduation. Additionally, a block will be placed on the student’s account which will prohibit registration in subsequent semesters and receipt of official transcripts.

Citations:

Section 14.15 of the Texas A&M University Rules states, “The student must have settled all financial obligations to the University.”

Chapter § 54.007 (d) of the Texas Education Code states, “A student who fails to make full payment of tuition and fees, including any incidental fees, by the due date may be prohibited from registering for classes until full payment is made. A student who fails to make full payment prior to the end of the semester or term may be denied credit for the work done that semester or term.”

Scholarships, Grants and Loans

All scholarships, grants and loans are applied to any outstanding charges before installments are calculated.

Installments

Tuition, most required fees, room, board and parking are payable in full, or in two to four equal installments. A $15 per semester service charge to cover the cost of handling will be assessed to each student who chooses to use the installment plan. The service charge is not refundable once a payment is made under the installment plan or after the first installment due date.

Cancelling Your Registration

Once a student has registered for classes, he/she must select one course of action from the following to remain in good standing with the University:

- pay all amounts due by the specified due date;
- prior to the first day of classes, use the online registration system to drop all classes; or
- after the first day of classes, use the online withdrawal system to request official withdraw from the University; withdrawals must be approved through his/her college Dean's office

Following this procedure is especially important for a student who has been awarded scholarships or financial aid since the aid may automatically pay tuition and fees and cause the registration to be held even though the student has decided not to attend. Failure to drop all classes or withdraw from unwanted registration may result in grades of F or I in all courses for the semester. The student will be required to reimburse the University for scholarships and other financial aid applied to his or her account and will be held responsible for paying all fees for the semester, regardless of whether he or she attended classes.

Cancellation for Nonpayment of Tuition or Fees

The University reserves the right to cancel a registration not paid by the due date, or the official census date for a semester or summer term, to comply with state laws requiring payment of tuition and fees, to free the classroom spaces for other students, and to ensure the most efficient use of University resources.

Debit. (Please Note: Once an online payment transaction has occurred, the convenience fee is non-refundable).

**Paper**
- Checks – Students may still use paper checks for payments. The University reserves the right to utilize check conversion technology to convert paper checks into electronic format.
- Cashier checks
- Money orders

**Cash**
- Cash is not accepted.

**Flywire**
- All bank wire transfers are accepted using our partner, Flywire. Texas A&M University does not accept direct wire transfers and will not provide our banking information.

**Returned Payments**
Any payment that is rejected for payment by the paying bank, credit card company or other financial institution is subject to returned item charges of $30 or more. Rejected payments may also result in cancellation of the student’s registration and additional late registration penalties if the student is required to re-register on or after the first day of classes.

**Penalties and Late Registration Fees**

### Late Payment Penalty
Severe penalties occur for failure to pay student account balances and installments by the specified due dates. If a payment is delinquent when a semester ends, the student will be blocked and may not receive credit for academic work performed. A student will not be readmitted to the University until all past due balances, including late charges, are paid. A late fee will be assessed for each payment not received before it is due. If a student is removed from the rolls of the University or is withdrawn for failure to pay amounts owed the University, a reinstatement fee of $50 for Texas A&M students and $150 for HSC students will be assessed in addition to any other late fees or penalties already incurred and must be paid before the student will be reinstated.

### Late Registration Fees
A student who registers on or after the first day of classes is assessed a late registration fee of $200 for Texas A&M students and $250 for HSC students. A student who registers after the official census date (12th class day for fall or spring and 4th class day for summer) is assessed a late addition fee of $50 for Texas A&M students and $100 for HSC students. A student who adds classes after the official census date is assessed a late add fee of $50 for Texas A&M students and $100 for HSC students. Note: Penalties, late registration and late add fees also apply to a student who is required to re-enroll because his/her registration was canceled for nonpayment.

**Use of Collection Agencies and Credit Bureau**
If amounts become past due, the University reserves the right to report the account to the Credit Bureau. This will also initiate internal collection efforts and could cause the University to employ an outside collection
agency to recover the debt. If any collection efforts must be made, the student will be required to reimburse the University the fees of any collection agency, which may be based on a percentage at a maximum of 30% of the debt, and all costs and expenses, including reasonable attorney’s fees the University incurs in such collection efforts if the student account becomes delinquent.

**Financial Assistance**

**Assistantships**
- A graduate assistantship, teaching (GAT), research (GAR), and non-teaching (GANT), is available to a qualified student on a competitive basis. Students holding graduate assistantships work an average of 20 hours per week. Most assistantships are awarded through the applicant’s academic department. An applicant should contact the department head or graduate advisor concerning the availability of assistantships. The Student Employment Office posts assistantship opportunities via Jobs for Aggies.
- A graduate student (domestic or international) must register for the appropriate number of University semester credit hours to maintain full-time status during any semester (9 hours for spring and fall) or summer term (6 hours in any combination) in which they hold an assistantship. Program requirements may impose additional semester credit hour requirements for a student holding an assistantship which exceeds the minimum stated above.
- According to Texas Education Code, Sec. 54.212, a teaching assistant or research assistant of any institution of higher education and the spouse and children of such a teaching assistant or research assistant are entitled to register in a state institution of higher education by paying the tuition fees and other fees or charges required for Texas residents under Section 54.051 of this code, without regard to the length of time the assistant has resided in Texas, if the assistant is employed at least one-half time in a teaching or research assistant position which relates to the assistant’s degree program under rules and regulations established by the employer institution. Transferred and re-designated from Education Code, Section 54.063 by Acts 2011, 82nd Leg., R.S., Ch. 359, Sec. 1, eff. January 1, 2012.

**Fellowships**

Graduate students awarded fellowships are not required to perform any services. Therefore, a fellowship student is not considered an employee and federal employment regulations do not apply. A graduate student (domestic or international) holding a fellowship administered through the Office of Graduate and Professional Studies (except for the TAMU Dissertation Fellowship) must register for a minimum of:
- 9 semester credit hours during a fall or spring semester;
- 6 hours in any combination for summer.

Outside entities who administer fellowships, colleges and departments may adhere to the same or exceed the minimum semester credit hour requirements stated above. A course Q-dropped prior to the 12th class day does not count toward the certification of enrollment status. A graduate student concurrently holding a fellowship with a one-quarter time assistantship normally has the same registration requirements as a student holding a one-half time assistantship.

Many competitive fellowships of $1,000 or greater per academic year also allow students to pay tuition at the in-state rate. Fellowships packages vary from $1,000 to over $30,000, and some include funds for insurance, tuition, and fees.

**Changes in Status that Impact Financial Assistance**

Dropping or Q-dropping a course affects a student’s enrollment status. In turn, enrollment status may impact certain funding sources. The following document describes these impacts. **ALL international and domestic graduate students should refer to the text below for detailed information regarding this important issue.**

- **Enrollment Status** – A student’s enrollment status continues to be adjusted throughout the semester when a student drops or Q-drops a course. However, in most cases, the change in status has minimal impact, depending on timing or recent changes in laws. The impact is primarily on student loan repayment.
- **Health Insurance** – In the past, students often needed to maintain full-time enrollment to continue to be covered under their parents’ health insurance policy. With the implementation of the Affordable Care Act (ACA), that is no longer required. A dependent can now be covered under their parents’ insurance plan until the age of 26 regardless of their enrollment status as a student.
- **Financial Aid & Scholarships** – Timing matters on when a student drops a course. Financial aid checks enrollment status on two occasions – when a student’s aid is released to their billing account and on 12th class day of a Fall or Spring semester. A student’s aid amount can be adjusted if the student’s enrollment status changes between the time funds are disbursed to the billing account and the 12th class day. However, after the 12th class day, enrollment status is not a factor for aid that has already disbursed and instead any changes in enrollment status will be reviewed through financial aid’s satisfactory academic progress standards for subsequent semesters and will not impact current semester aid. If aid has not been disbursed prior to the 12th class day, then the enrollment status on the date the aid is disbursed is what matters. In the Summer semester, enrollment status is officially checked on the 5th class day of the Summer session(s) in which the student is enrolled.
- **Non-Resident Tuition Waiver Tied to Graduate Assistantship**
  - After the 20th class day, SBS will notify departments to audit graduate students who have not met all eligibility criteria. SBS will provide a deadline for departments to respond prior to removing the waiver. Departments will then audit each graduate student and provide SBS with documentation of eligibility for graduate students who are eligible for the waiver although their record in BPP and/ or Compass may not reflect eligibility. Graduate students that do not meet all eligibility criteria as of the audit deadline will have their waiver removed.

  - Employment must be for the entire semester in which the student is enrolled and actual paid work must commence on or before the official census date for the term (12th class day for fall and spring, 4th class day for summer), to be eligible for a nonresident tuition waiver.
  - Must be working 50% effort in the qualifying position.
  - Terms used to describe qualifying positions are intended to indicate an academic position, not a position title.
  - Volunteer or unpaid work does not constitute employment.
  - Student worker positions do not qualify for non-resident tuition waivers.
The mission of Scholarships & Financial Aid is to provide students with information and financial resources to attend Texas A&M University, along with support programs that promote higher education and developmental opportunities. As a part of this commitment, we strive to provide financial solutions to students at all income levels and with varying academic, merit and leadership qualifications.

- **Student Loan Repayment** – Graduate students must maintain at least half-time enrollment throughout the semester for student loans to remain in an in-school deferred status. Dropping below half-time enrollment will trigger student loans to enter any applicable grace period, with repayment required after the grace period has elapsed. Changes in enrollment status from full-time to half-time have no consequence on student loans. Half-time enrollment for a graduate student is defined as 5 hours and for a professional student it is defined at 6 hours.

- **International Graduate Assistants**

  The United States Department of Homeland Security and the Department of State require students on F-1 and J-1 visas/status to be enrolled in a full course of study. Undergraduate students are required to enroll for 12 semester hours per term. A full course of study at the graduate level is certified by the Designated School Official (DSO) in International Student Services (ISS). ISS uses the University’s definition of full course of study for graduate students.

  International students on F-1 visas have limited reasons they can drop below full-time enrollment and maintain their immigration status. There are three basic reasons the F-1 students can below hours.

  1. Medical Condition
  2. Academic difficulties
  3. Final Term

  An F-1 student must not drop below full-time enrollment without prior approval from ISS. Without ISS approval to drop below full-time enrollment, an F-1 student will be considered out of legal immigration status. Students should request a reduced course load by submitting the F-1 Reduced Course Load Form (http://iss.tamu.edu/ISS/media/ISS-Files/ISS-PDF/Current%20Students/F-1-Reduced-Course-Load.pdf). Rules for a reduced course load are further detailed on the form.

  Students on a J-1 visa/status may have a reduced course load if

  1. There is a documented medical illness
  2. There is a bona fide academic reason
  3. It is the final term.

  A J-1 student must not drop below full-time enrollment without prior approval from ISS. Without ISS approval to drop below full-time enrollment, a J-1 student will be considered out of legal immigration status. Students should request a reduced course load by submitting the J-1 Reduced Course Load Form. (http://iss.tamu.edu/ISS/media/ISS-Files/ISS-PDF/Current%20Students/J-1-Reduced-Course-Load-(Update)_new.pdf) Rules for a reduced course load are further detailed on the form.

**Scholarships & Financial Aid**

The need-based financial assistance program is designed for all students who have a demonstrated financial need, as defined by the Free Application for Federal Student Aid (FAFSA), in order to assist the student in paying college expenses. All financial aid is contingent upon student enrollment and making Satisfactory Academic Progress (SAP), as defined by Scholarships & Financial Aid or the specific aid program.

Financial aid has two forms: gift aid and self-help.

<table>
<thead>
<tr>
<th>Gift Aid</th>
<th>Self-Help</th>
</tr>
</thead>
<tbody>
<tr>
<td>Grants (Federal, State, Institutional)</td>
<td>Loans (Federal, State, Institutional Alternative)</td>
</tr>
<tr>
<td>Scholarships</td>
<td>Student Employment (Work Study, Part-time Employment, Internships, Assistantships)</td>
</tr>
</tbody>
</table>

**Non-resident Tuition Waivers**

Texas A&M University’s packaging philosophy for need-based financial aid is to provide the greatest amount of gift aid to those students with the highest demonstrated need and to keep loan liability to a minimum. Financial aid is awarded on a first-come, first-served basis based on a priority date published on financialaid.tamu.edu. To apply for financial assistance, a student must submit a Free Application for Federal Student Aid (FAFSA). Students are encouraged to submit their FAFSA at https://fafsa.gov as soon as possible. Students who do not meet the citizenship eligibility requirements for the FAFSA may complete the Texas Application for State Financial Aid (TASFA) or the International Student Financial Aid Application (ISFAA). Only those students who have been accepted for enrollment, have a FAFSA or other financial aid application on file with Scholarships & Financial Aid, and have submitted all other requested documents will be sent a financial aid offer. Financial aid offers for students beginning in the Fall semester will be sent during the preceding Spring semester. Students starting in the Spring semester will be sent financial aid offers late in the preceding Fall semester. Summer financial aid offers are made in May to students with a FAFSA on file who enroll half-time in summer coursework at Texas A&M.

Financial aid offers are made based on the assumption that students will enroll full-time in the fall and spring semesters in courses that are part of the student’s degree plan. Cost of attendance and awards will be adjusted for graduate and professional students who are enrolled less than full-time at Texas A&M University (as defined by academic program/level). Federal Aid may only be paid for eligible courses that count towards the program of study. State and Institutional Aid are not subject to the same regulatory restrictions. The cost of attendance for students will be reduced for courses that are not counting to the program of study; which can result in a lower amount of federal, state and institutional aid a student could receive. Financial aid awards may also be adjusted if a student does not begin attendance in all courses in which he or she is registered.

Student inquiries may be directed to:

Scholarships & Financial Aid
Texas A&M University
P. O. Box 30016
College Station, TX 77842-3016
(979) 845-3236
financialaid@tamu.edu
http://financialaid.tamu.edu
FAFSA School Code 003632
Please visit our website (http://financialaid.tamu.edu) for the most current information on programs and any associated deadlines.

**Loan Programs**

The Federal Direct Loan Programs are available to students who have submitted a FAFSA. Students will be notified of eligibility for the Direct Loan program(s) through a financial aid offer.

Graduate and professional students seeking the Federal Direct Graduate PLUS (Grad PLUS) Loan may obtain information from our website (http://financialaid.tamu.edu). This program also requires the FAFSA to be on file with Scholarships & Financial Aid.

Short-term loans are available to provide assistance to students who experience temporary financial difficulties with educationally related expenses. Funding for this program is provided by The Association of Former Students, the Class of 1926, and other University resources. This program is not intended to provide long-term assistance or to replace other assistance available through Scholarships & Financial Aid. Students must be degree-seeking and enrolled at least half-time in order to be eligible for short-term loans.

The Emergency Tuition and Required Fees loan program is available to help students pay their Texas A&M University tuition and required fees. The loan is applied directly to the student's tuition and fee account.

Please refer to our website (http://financialaid.tamu.edu) for detailed information on the aforementioned programs and more.

**Scholarships**

**Continuing Student Scholarships**

The University Scholarship Application is available to students with at least one semester completed at Texas A&M. Awards range in value from $500 to $1,500 and are available to undergraduate, graduate, and professional students currently enrolled at Texas A&M. Some awards are limited to certain fields of study and to individuals who have attained a necessary academic classification, while others are unrestricted. Awards are made to outstanding students based on a combination of academic achievement, campus/community involvement, campus leadership roles, and, for some scholarships, financial need. In addition to scholarships offered through the Scholarships & Financial Aid office, many colleges and departments use the University Scholarship Application for award consideration. Students are encouraged to complete the University Scholarship Application beginning in October. The deadline for submitting applications is February 1, prior to the academic year for which the student will be awarded.

For more information on Continuing Student Scholarships, visit http://sfaid.tamu.edu/uwideapp/

**Scholarship Recipients and Non-Resident Tuition Waivers**

The Non-Resident Tuition Waiver for Competitive Scholarship Recipients, authorized under the Texas Education, is an optional waiver that institutions can implement. An eligible non-resident student who holds a competitive academic scholarship of a specified minimum dollar amount for the academic year or summer for which the student is enrolled may be eligible to pay the fees and charges required of Texas residents without regard to the length of time the student has resided in Texas. The student must have competed with other students, including Texas residents, for the scholarship and the scholarship must be awarded by a Texas A&M University college or departmental scholarship committee or university representative.

More information is available at https://u.tamu.edu/NonResScholarshipWaiver

For additional information on scholarships, please visit https://scholarships.tamu.edu or email scholarships@tamu.edu.

**College/Departmental Level Scholarships**

A number of colleges and departments at the University award scholarships to students interested in particular major fields of study on the basis of academic record, service, activities, and demonstrated leadership. The value of the awards vary, and the term of scholarships range from one to four years. Awarding college and department select recipients based upon pre-determined criteria. Completed scholarship applications must be received no later than specified deadlines. Awards are typically announced mid-spring for the following academic year. For more information, please visit https://u.tamu.edu/CollegeDepartmentScholarships

For additional information, please visit scholarships.tamu.edu or email scholarships@tamu.edu.

**Student Part-Time Employment**

In addition to the assistantships and fellowships offered by academic departments and coordinated by OGAPS, the Student Employment Office in Scholarships & Financial Aid coordinates student part-time employment, both off- and on-campus in the Bryan/College Station area. Students may visit the online job database. Work Study, assistantships and other part-time positions are posted. Students secure their own employment through job leads provided by Scholarships & Financial Aid or through their own initiative.

On-campus student employees are paid minimum wage or higher and are paid bi-weekly along with regular University employees. University student employees are not eligible for paid holidays, retirement, vacation, nor sick leave.

Professional development workshops are also available for student employees and supervisors of student employees. These free workshops include topics ranging from communication skills to preventing sexual harassment in the workplace and from customer service to workplace etiquette. For more information or to register, please visit the Jobs for Aggies (http://jobsforaggies.tamu.edu) website or call (979) 845-0686.

**The Money Education (ME) Center**

The Money Education (ME) Center provides Aggie students with the education and resources they need to make smarter personal finance decisions during college so that they can lay a foundation of financial success for a lifetime. Through the following resources, the ME Center teaches Aggies about budgeting, saving and banking, building and protecting credit, investing, buying a car and home, and more.

Texas A&M Tuition and Required Fees

All rates are the most current available at the time of printing and are subject to change.

Graduate Tuition

A tuition calculator is provided on the SBS website to assist students in estimating their tuition and fee costs based on enrolled semester credit hours. Tuition and fee explanations can also be found at sbs.tamu.edu.

Nonresident Tuition Exemption

If you have any questions concerning your eligibility for exemption from non-resident tuition, you may contact the Student Business Services at (979) 847-3337 or your department.

University Advancement Fee

The University Advancement Fee is a required fee charged to all Texas A&M University students. The University Advancement fee funds services such as advising, the Career Center, Writing Center, technology and libraries as well as administrative services such as ID services, the campus bus system, billing and refunds, access for students to discounted software and many of the services provided through the Division of Student Affairs.

College Advancement Fee

The College Advancement fee is a required fee that is charged to graduate students per semester. The College Advancement Fee amount will be added to the existing college wide program fee already charged for the college for Architecture and Bush School. The College Advancement Fee replaces approximately 7200 course fees.

Distance Education Tuition & Fees

A student registering for distance education courses will be assessed Distance Education Differential Tuition per hour based on the course(s) being taken. Each course has a different Distance Education Differential Tuition based on the fees associated with that program. An administrative fee of $30 per hour and a Distance Education Teaching Fee (equal to and in place of non-resident tuition) are assessed for those non-resident students taking distance education courses outside the State of Texas.

Distance Education Differential Tuition

The rate to be charged for distance education courses will range from a minimum of $40/SCH to a maximum of $550/SCH. Each academic department will have an individual rate that will be approved annually by the President of Texas A&M University. For more information regarding Distance Education Differential Tuition, please visit http://sbs.tamu.edu/accounts-billing/tuition-fees/schedule/#DIST_ED_DIFF.

Distance Education Administration Fee

This $30 per semester credit hour administrative fee is assessed to Non-Funded Out-of-State students taking distance education courses.

Field Trip Fees

Field trip fees are assessed to cover the cost of providing trips and vary depending on the course taken and expected expenses.

Health Center Fee

There is a $75.00 per semester fee ($25 for a 5-week summer term and $75.00 for a 10-week summer term) that is included in tuition and fees for students intended to support operations of the Student Health Center. This allows the Health Center’s fee schedule to be as low as possible. Students pay a visit fee each time they access care, and there are charges for on-site medical tests, procedures, medications and ancillary services.

Identification Card (Aggie Card) Fee

Every student is required to have a student ID card. An ID card is permanent and a student is responsible for maintaining a working ID throughout his/her career at the University. The Aggie Card is used for residence hall access, registration, fee collection, financial aid disbursement, dining halls, athletic event and recreational sports admittance and library privileges. Replacement ID cards are $12.

A student who loses his/her IDs should report the loss immediately online at https://myaggiecard.tamu.edu/ and deactivate the card or contact:

Student Business Services
Aggie Card Office
General Services Complex
(979) 845-4661
24 hours a day, seven days a week

International Student Orientation Fee

This $35 fee is a one-time fee charged to cover the cost of orientation programming for international students during their first semester of enrollment.

International Student Services Fee

This $85 fee is required of all students who are not U.S. citizens or Lawful Permanent Residents to offset the cost of specialized services provided to these students from International Student Services, Center for Teaching Excellence - English Language Proficiency Program, and the Writing Center.

Laboratory Fees

The University is required to assess and collect a laboratory fee not to exceed $30 for each laboratory course to cover in general the cost of laboratory materials and supplies used by a student.
Late Penalties
A student who fails to pay fees and installments when due is assessed a $25 late payment fee for each payment or installment paid late.

Late Registration/Add Penalties
- A student who registers on or after the first day of classes, but before the 13th day of classes is assessed a $100 late registration fee.
- A student who registers after the 12th class day is assessed a $200 late registration penalty.
- A student who adds classes after the 12th class day that result in a net increase in hours enrolled is assessed a $50 late add fee.

Recreational Sports Fee
This $106 per semester fee ($53 for a 5-week summer term and $106 for a 10-week summer semester) is assessed to all students attending the University for use of the Student Recreation Center.

Reinstatement Fee
A student who fails to pay all fees by the last day of the semester will be administratively withdrawn from the University and charged a $50 reinstatement fee.

Student Center Complex Fee
This $100 fee ($50 for a 5-week summer term and $100 for a 10-week summer semester) is required of all students for operating, maintaining, improving and equipping the Student Center Complex.

HSC Tuition and Required Fees
Texas A&M University Health Science Center tuition and fees are approved by The Texas A&M University System Board of Regents within guidelines established by the Texas Legislature. Fees are subject to change by the Board of Regents.

A tuition calculator is provided on the SBS website to assist students in estimating their tuition and fee costs based on enrolled semester credit hours. Tuition and fee explanations can also be found at www.sbs.tamu.edu.

Distance Education Administration Fee
This $30.00 per semester credit hour administrative fee is assessed to Non-Funded Out-of-State students taking distance education courses.

Field Trip Fees
Field trip fees are assessed to cover the cost of providing trips and vary depending on the course taken and expected expenses.

Group Hospital Fee
The group hospital fee supports provision of medical services to students to access services at the academic locale.

Instructional Enhancement/ Equipment Fee
The Texas A&M Health Science Center charges an Instructional Enhancement Fee (IEF) at each of the colleges offering HSC academic programs. The colleges have varying fee rates based on the IEF needs of the college. This fee supports an array of educational activity enhancing academic programs at the college. A few examples of enhancement expenditures are; software to enhance education, media, web-based instruction, tracking and evaluation tools, licensure fees, and integration of technology.

Publications ASDA/ ADHA Fee
This fee provides for students to receive a monthly publication, annual membership into the ASDA, ADA, or ADHA, and many leadership opportunities depending on the student’s academic program.

ID card (1 time flat rate)
This additional ID fee covers the College of Dentistry badge, which also serves an access card to secure locations of the dental school in addition to being an identification card.

Matriculation Fee (1 time flat rate)
This is a setup fee for first year dental students related to college specific file set up with the college.

Drug Testing Fee (1 time flat rate)
All dental students pay this fee to cover drug testing for students, and this is a one-time assessment.

Lab Fee
The University is required to assess and collect a laboratory fee not less than $2 nor more than $30.00 for each laboratory course to cover in general the cost of laboratory materials and supplies used by a student.

Medical Liability
Medical Liability Insurance is required by students interacting & treating patients. This fee covers medical malpractice required for this type of activity.

Equipment Usage
This fee supports costs associated with instrument usage during the dental education.

Summer Clinic Fee (D3 and D4 only)
The Summer Clinic Fee is use to partly cover the cost of students working in the clinic, this fee is a flat fee and isn’t charged by the hour. (The students are scheduling and working on patients as part of their clinical training.)

Clinical Simulation Fee
Fee covers costs associated with Clinical Learning Resources Center to include specialized simulation technology, equipment, materials and supplies related to the operating of the simulation center.

Gross Anatomy Fee (M1 Only)
Fee covers costs associated with Gross Anatomy lab to include lab materials, supplies, furnishings, software and equipment specific to gross anatomy.

Professional Liability Fee
Professional liability insurance coverage is required of all students who will be in clinical settings providing patient care. It is a mandatory requirement of all local facilities with which we have contracts for student clinical experiences.
Clinic Simulation Fee

Fee covers costs associated with Clinical Learning Resources Center to include specialized simulation technology, equipment, materials and supplies related to the operating of the simulation center.

Professional Activity Fee

The Professional Activity Fee supports various professional activities for pharmacy students such as participation in clinical partnerships enhancing experiential education, financial resources to ensure these clinical experiences meet pharmacy education expectations, support of student travel to professional meetings/conferences, and other professional activities.

Professional Development Fee

One-third of the pharmacy curriculum is experiential education, which consists of the Introductory Pharmacy Practice Experiences (IPPE) and the Advanced Pharmacy Practice Experiences (APPE). This fee supports clinical site payments for student rotations. In addition to clinical site payments, the Professional development Fee supports service learning activities and other professional development services and programs.

Environmental Service Fee

This fee supports distribution, maintenance and pick up of recycle bins and materials from each building located on the Texas A&M University-Kingsville campus. Only pharmacy students located at Kingsville are assessed this fee.

Career Services & Professional Services Fee

This fee will support efficient and effective support services for professional career development services. Various operational costs associated with provision of professional career development services.

Advising Services Fee

This fee will provide advising support services for all graduate degree programs not provided by members of the faculty. This fee includes, but is not limited to Graduate Studies, Professional School Advising, and Admission Services related to student enrollment. Various operational costs associated with the delivery of services noted in programmatic justification.

Transportation Fee

This $70 per semester fee ($35 for a 5-week summer term and $70 for a 10-week summer semester) is assessed to provide unlimited fare-free access to all students to on-campus and off-campus services, and expanded service and revenue for a long-term bus replacement plan. In addition, revenue will pay for operating expenses and the enhancement of bus facilities on campus. Fee subject to change.

Optional Campus Services

Athletic Events

Sports Pass are available for purchase. For more information, please visit http://mysportspass.tamu.edu.

Campus Dining

Freshmen (classified as U1s with less than 30 hours of college credit when they initially apply to live on campus) will be required to have a minimum dining plan for the full academic year (or remainder of the academic year for those that apply for housing after the beginning of the fall semester).

All Corps of Cadets members are required to have a dining plan, as designated by the Office of the Commandant.

Upperclassmen and students who are not campus residents are not required to purchase a Dining Plan, but the option is available.

All Dining Plans are loaded onto the Student ID card to make access and use easy.

Fees for the selected meal plan will be added to your Texas A&M University student fee, and are separate from housing fees. Any plan purchases or additions made after the ninth week of class cannot be charged to the student's account and must be paid via credit card. Please visit our website for official date as it may vary each semester based on the academic and billing calendars.

Students have the option to select a Dining Plan that fits their individual needs. Dining Plans are designed to be flexible for an array of lifestyles and appetites. Smaller Dining Plans are available for upperclassmen and students who live off campus. Most Dining Plans include 2 parts: First, “Meals,” which can be used at the all-you-care-to-eat dining halls, or in select retail locations as a “meal trade.” The second part of the dining plan consists of “Dining Dollars.” These declining balance dollars can be spent like cash or a debit card, and are accepted at all University Dining kiosks, coffee shops, food courts and dining centers. Each purchase is automatically deducted from the account.

When paying with Dining Dollars, patrons will enjoy a discount on the door rate at Duncan, Sbisa, and The Commons, the all-you-care-to-eat dining halls on campus.

Dining Dollars roll over from fall to spring with the purchase of a spring dining plan.

Dining Dollars are only accepted on campus, assuring parents and guardians that this money is spent only on food and beverages.

Applicable sales tax will be added at checkout.

Housing

Housing in residence halls may not be available for graduate students except during summer school. Summer school housing information is normally available in early March. However, many graduate students request to live in our University apartments all year long. For more information, please visit http://reslife.tamu.edu/apartments.

For more information please contact:

University Apartments

Installment Payment Option
A student who chooses to pay using the installment plan pays a $15 installment payment service charge. This charge is non-refundable. You may add the installment plan by selecting the installment option through the online registration system at https://howdy.tamu.edu.

Parking Permit
Vehicles parked on the Texas A&M University campus are required to display a valid parking permit, except for those parked in designated visitor's spaces. Costs of permits are prorated and subject to change. For more information or to purchase a permit, visit transport.tamu.edu/permitreg.

Student Directory
The cost is $4.00 and includes sales tax.

Yearbook
The cost is $81.19 including shipping and sales tax.

Fees for Other Special Items or Services

Application Fees
Graduate: $50; Undergraduate: $75; International: $90.

Cooperative Education Fee
A fee of $75 is charged to all students participating in domestic or international Cooperative Education programs.

Diploma/Graduation Fee
A non-refundable fee per degree sought is assessed the semester a student applies for graduation. This fee is payable each time a student applies for graduation. A late fee of $50, in addition to the diploma/graduation fee, may be charged to those who apply for graduation after the published deadline.

Independent International Study Fee
The $100 fee covers services provided by Study Abroad Programs associated with students who elect to go abroad and transfer credit back to Texas A&M. Such services include advising students and departments on key issues and procedures before, during and after programs abroad; overseeing transfer credit paperwork; maintaining library and computer resources for those who want to pursue independent opportunities abroad; and overseeing issues related to affiliated programs abroad and emergency services to assist students as needed.

International Student Health Insurance
International students with F or J visa/status, and enrolled at Texas A&M University, are required to have health insurance. International students will be automatically enrolled in and charged for the System Student Health Insurance Plan (SSHIP) unless they apply for and are granted the waiver. The waiver deadline and criteria are posted at the International Student Services web page, http://iss.tamu.edu.

Please see the Texas A&M University System rule for information regarding the rules related to student health insurance. http://policies.tamus.edu/26-99-01.pdf

Bush School Graduate Program Fee
The fee structure is $1,500 per semester.

Master of Real Estate Program Fee
The fee structure is $3,000 per semester for each fall and spring semester. It will be used to further enhance the MRE program through the support of career services, student advising, curriculum development, and enrichment experiences.

Mays MBA Program Fee
The fee structure is $11,600 per semester. The fee is used to support the MBA Program office, Graduate Business Career Services, and the various activities of the Mays MBA Program.

Mays Masters’ Program Fee
The fee structure is $2,200 per semester (Fall and Spring). This fee supports all activities surrounding the Master of Science-Finance degree.

Master of Science Finance Program Fee
The fee structure is $3,000 per semester (Fall and Spring). This fee supports all activities surrounding the Master of Science Finance Program.

Master of Financial Management Program Fee
The fee structure is $500 per semester (Fall and Spring). This fee supports all activities surrounding the Master of Financial Management degree.

Master of Science Human Resource Management Program Fee
The fee structure is $3,000 per semester (Fall and Spring). This fee supports all activities surrounding the Master of Science Human Resource Management degree.
Master of Science Management Information Systems Program Fee
The fee structure is $1,500 per semester (Fall and Spring). This fee supports all activities surrounding the Master of Science-Management Information Systems degree.

Master of Science Marketing Program Fee
The fee structure is $2,500 per semester (Fall and Spring). This fee supports all activities surrounding the Master of Science-Marketing degree.

Master of Science Business (for non-business majors) Program Fee
The fee structure is $6000 per semester (Fall and Spring) and $4000 per Summer Semester. This fee supports all activities surrounding the Master of Science-Business (for non-business majors) degree.

Master of Agribusiness Program Fee
The fee structure is $1,000 for each fall and spring. This fee supports all activities surrounding the Master of Agribusiness degree.

Master of Science in Economics Program Fee
The fee structure is $3,000 per semester. This fee supports all activities surrounding the Master of Science in Economics degree.

Master of Science in Psychology with concentration in Industrial/Organization Program Fee
The fee structure is $3,500 per semester. This fee supports all activities surrounding the Master of Science in Psychology with concentration in Industrial/Organization degree.

College of Architecture Graduate Program Fee
The fee structure is $1,517.00 per semester. The fee will be charged for each of the colleges graduate degree programs.

Graduate Engineering Program Fee - Remote
The fee structure is $555.56 per hour with a cap of $5000.00 for 9 or more hours.

Graduate Engineering Program Fee
The fee structure is $145 per hour with a cap of $1305.00 for 9 or more hours.

Masters of Industrial Distribution Program Fee
The fee structure is $9,000 per semester. This fee is used to support all program materials, residency week, Global Distribution Program, Capstone Project and Graduation as well as a program specialist to support the planning and logistics of all activities.

Master of Science Analytics Program Fee
The fee structure is $10,000 per semester to support the program.

Master of Science Quantitative Finance Program Fee
The fee structure is $8,500 per semester to support the program.

Geosciences Online Petroleum Program Fee
Master Of Geology (Resident): The fee structure is $436 per semester to support the program.
Master Of Geology (Non-Resident): The fee structure is $254 per semester to support the program.
Master Of Geophysics (Resident): The fee structure is $436 per semester to support the program.
Master Of Geophysics (Non-Resident): The fee structure is $254 per semester to support the program.
Master Of Geosciences (Resident): The fee structure is $436 per semester to support the program.
Master Of Geosciences (Non-Resident): The fee structure is $254 per semester to support the program.

Law School Program Fee
The fee structure for full-time students taking 13-16 hours is $31,000.00 for residents, and $38,100.00 for non-residents. For part-time students taking 9-12 hours is $25,000.00 for residents and $28,000 for non-residents. Resident students taking 1-8 hours will be charged $1,462.00 for the first hour and $1,206.00 per additional hour. There will be an additional hourly charge for students taking more than 16 hours.

Public Health Graduate Program Fee
The fee structure is $70 per hour to support the program.

Executive Masters of Health Admin Program Fee
The fee structure is $851 per credit hour to support the program.

College of Nursing Graduate Program Fee
The fee structure is $68 per hour to support the program.

New Graduate Student Fee
A non-refundable new graduate student fee of $50 is charged to all new graduate students. This fee is assessed the first semester the student is registered.

Professional Program in Biotechnology Program Fee
This fee is $530 per semester.
Sponsored International Students
An administrative fee not to exceed $500 per semester or summer session (all or part thereof) will be required to support international sponsored students whose programs are coordinated through International Student Services, unless these fees are waived as part of negotiated contractual agreements.

Thesis/Dissertation/Record of Study Fee (Processing Fee)
This fee includes the review, processing and archiving of each thesis/dissertation/record of study, along with other services provided by Thesis and Dissertation Services. Archival formats include microfilm or digital storage. The fee does not include binding of personal copies. Information on binding personal copies is available on the OGAPS website (http://ogaps.tamu.edu) in the applicable thesis/dissertation/record of study section.

Masters fee: $110, Doctoral fee: $170

Deposits
General Deposit
Every student must make a $100 deposit to protect the University from damage to or loss of University property. Failure to pay promptly will cause the student to be barred from re-admission and receiving an official transcript from the University. This deposit, less outstanding charges, will be returned upon the student graduating or withdrawing from school. Students leaving the University without graduating or withdrawing are subject to forfeiture of their property deposit refund if a request for the refund has not been received by Student Business Services. Deposits not refunded within four years from date of last attendance will be forfeited into a student deposit scholarship account.

Room Deposit
A deposit of $300 and a nonrefundable $50 application fee are required to apply for a room in a residence hall or one of our university apartments. The deposit will be retained to offset charges for damages or late cancellation, or to keep the application on an active waiting list. A reservation may be canceled and the deposit refunded upon request prior to signing a housing contract. After a housing contract has been signed for the next academic year, deposits are not refunded. Cancellations after the student has been assigned are subject to additional penalties.

College of Business Administration Masters Enrollment Deposit
The College of Business Administration requires a Masters enrollment deposit of $500, which is applied to first semester registration charges for students who complete enrollment. Deposit is forfeited for students who fail to enroll for classes.

Mays MS Business Deposit
Mays Business School requires a deposit of $500, which is applied to first semester registration charges for students who complete enrollment. Deposit is forfeited for students who fail to enroll for classes.

Mays MS Human Resource Management Deposit
Mays Business School requires a deposit of $500, which is applied to first semester registration charges for students who complete enrollment. Deposit is forfeited for students who fail to enroll for classes.

Refund Policy
Allocating Returned Title IV (Federal Aid)
Funds that are returned to the federal government due to student withdrawal are used to reduce the outstanding balances in individual federal programs.

Financial aid returned (by the University and/or the student or parent) must be allocated in the following order:
1. Unsubsidized Federal Direct Loan
2. Subsidized Federal Direct Loan
3. Federal Perkins Loan
4. Direct Graduate Plus (Student) Loan
5. Federal Direct PLUS (Parent) Loan
6. Federal Pell Grant
7. Federal Supplemental Educational Opportunity Grant (FSEOG)
8. TEACH Grant
9. Other federal loan or grant assistance

State and institutional aid awards will be calculated using the same percentage proration used by Student Business Services to determine the amount of tuition and fees to be charged to a withdrawn student.

Additionally, students who do not successfully complete courses for the semester may be considered unofficially withdrawn and may be subject to a return calculation if attendance cannot be documented.

Unclaimed Refunds
According to federal law, the university is required to return Title IV funds that have not been claimed (i.e., refund check that has not been cashed) within 240 days of issue. These funds will be returned to the appropriate federal financial aid program.

Dining Plan Refunds and Add/Change/ Drop Policies
Texas A&M University Dining’s dining plans and options listed are based on information available at time of printing and are subject to change. University Dining follows the University’s refund schedule for Tuition and Fee Adjustments. Refunds are given on the percentage basis listed for students dropping fee options or officially withdrawing from the University.

Students may purchase a dining plan, change to a larger plan or add on to a plan during registration for classes or at any time through University Dining. Dining Plans and additions to the plans may be charged to the student account through the ninth week of school. Any purchases after that point will require a credit card payment. Changes from a higher dining plan to a smaller dining plan or requests to cancel/drop are
permitted only through the fourth week of classes. The appropriate fee is to be paid to the Office of Student Business Services.

Dining plans are valid for one semester starting with the first day of campus move-in (as designated by the Department of Residence Life) and end after the last final exam day. Check with Dining for posted dates for dining plan access. Location hours may vary during class breaks and meal availability may exclude official University holidays.

Following University policy, no one is authorized to use or borrow a student’s identification card (Aggie Card); therefore, dining plans are not transferable between students. The Aggie Card must be presented to Dining cashiers for dining plan participation. If an Aggie Card becomes lost, report it immediately by calling (979) 845-4661 or go to http://myaggiecard.tamu.edu to deactivate the card.

For questions and assistance, please email dining@tamu.edu (include name, UIN and instructions if dining plan related) or contact our office at (979) 845-0152. Additional information on University Dining and dining plans can be found on our website (https://new.dineoncampus.com/tamu) or in this catalog under Campus Dining.

Fee Adjustments for Courses Dropped
A student may drop individual courses during the first five days of a fall or spring semester (first four days of a summer term). Students also may drop individual classes with special permission of the dean between the 6th and 12th class days. Full refunds will be given for the individually dropped courses during these periods provided the student remains enrolled in at least one class and has not withdrawn from the university. Refunds will not be issued for classes dropped after the 12th class day. Any credit balance on a student account as a result of dropping courses will not be refunded until after the fifth class day. As of the first day of the semester, students may not drop all of their courses through the drop/add process, but instead must begin the official withdrawal process online through Howdy (https://howdy.tamu.edu) (see Withdrawal from the University below for additional information regarding the withdrawal process). A student may add courses during the first five days of a fall or spring semester.

Reductions in Rates for Late Entry to the University
No reduction will be made in the charge of room rent and board in case of entrance within 10 days after the opening of a semester or summer term, nor will a refund be made in case of withdrawal during the last 10 days of a semester or summer term, or the last days for which payment is made.

Refund Delivery
Texas A&M and Heartland ECSI have joined forces to deliver financial aid and other refunds to students faster through the University’s refund delivery process. You will receive information from Heartland ECSI and the University at your new student conference and in your official University email account, which will explain the process for signing up for direct deposit of refunds.

Residence Hall Rent/Deposit Refund
If a student withdraws, moves off campus or in any other way terminates the housing contract, a refund of residence hall rent may be made according to the housing contract. Any changes to the rent refund schedule will be detailed in the housing contract. If a student cancels the academic year housing contract during the contract period, the $300 deposit is subject to forfeiture and a surcharge (per the housing contract). The academic year contract period is from the time the contract is signed to the end of the fourth week of classes in the spring semester. Exceptions to this policy may be made for students who cancel their contract for the following reasons: Texas A&M University co-op or student teaching assignment, academic restriction, graduation and medical withdrawal.

University Apartment Rent
Rent at the University Apartments is paid monthly along with any applicable electricity charges. Apartment contract terms are fully enforced for the 9 1/2 or 12-month term of the contract.

Tuition and Fee Adjustments
Tuition and fee adjustments shall be made to a student officially withdrawing from the University for charges listed below according to the following refund schedule: Tuition and Required Fees, Residence Hall Rent and Meal Plans.

1. If the student withdraws during a fall or spring semester or a summer term of 10 weeks or longer:

<table>
<thead>
<tr>
<th>Period of Class Drop</th>
<th>Percentage Refunded</th>
</tr>
</thead>
<tbody>
<tr>
<td>Prior to the first day of class</td>
<td>100%</td>
</tr>
<tr>
<td>During the first five class days</td>
<td>100%</td>
</tr>
<tr>
<td>During the second five class days</td>
<td>80%</td>
</tr>
<tr>
<td>During the third five class days</td>
<td>50%</td>
</tr>
<tr>
<td>During the fourth five class days</td>
<td>25%</td>
</tr>
<tr>
<td>After the fourth five class days</td>
<td>0%</td>
</tr>
</tbody>
</table>

2. If the student withdraws during a term or session of more than five weeks but less than 10 weeks:

<table>
<thead>
<tr>
<th>Period of Class Drop</th>
<th>Percentage Refunded</th>
</tr>
</thead>
<tbody>
<tr>
<td>Prior to the first day of class</td>

</tr>
<tr>
<td>During the second class day</td>
<td>50%</td>
</tr>
<tr>
<td>During the third class day or thereafter</td>
<td>0%</td>
</tr>
</tbody>
</table>

Withdrawal from the University
Once the University has accepted payment for tuition and fees, a student is considered officially enrolled unless otherwise restricted from enrolling. Stopping payment on a check for fees or allowing the check to be returned unpaid by the bank for any reason does not constitute official withdrawal.

Before classes begin, you may go online to Howdy (http://howdy.tamu.edu) and cancel your courses and options for the semester.

After classes begin, you must go through the official withdrawal process in order to cancel your registration for the semester. In Howdy (http://howdy.tamu.edu), go to the Student Withdrawal channel on the My
Record tab to begin the online withdrawal process. Failure to complete the withdrawal process will result in forfeiture of any tuition and fee adjustments, and course work may be recorded as incomplete or failed.

Failure to follow procedures for withdrawing from the University may result in financial penalties and delays with future enrollment in the University. Once a student registers, he or she is responsible for the total fees assessed regardless of whether the installment option is used. Refund percentages are applied to total fees assessed and not the amount paid. This means that students who withdraw before paying all installments may, in the event of withdrawal, still owe the University.

**International students** must visit with an advisor in the International Student Services Office before withdrawing to determine if doing so will affect visa status.

**Student athletes** should visit with an academic advisor in the Department of Athletics before initiating the withdrawal process.

**Recipients of financial assistance** should visit with a Scholarships & Financial Aid advisor before withdrawing. Students receiving funds awarded by Scholarships & Financial Aid should be aware of policies (http://financialaid.tamu.edu/Undergraduate/Maintaining-Eligibility/#2-Withdrawals) regarding withdrawal from the University. Federal regulations require a return calculation for all students who receive Title IV student assistance at a post-secondary institution of higher education and withdraw during a payment period (semester). The length of time during which a return must be calculated is up to 60 percent of the payment period. Students withdrawing prior to 60 percent of the payment period may be required to return disbursed funds not earned. Additionally, students who do not successfully complete courses for the semester may be considered unofficially withdrawn and may be subject to a return calculation or all disbursed funds being returned if attendance cannot be documented. Eligibility for state and institutional funds may also be impacted by withdrawing from the University. Drops and withdrawals are considered unsuccessfully completed coursework when determining Satisfactory Academic Progress (http://financialaid.tamu.edu/Undergraduate/Maintaining-Eligibility) (SAP) and will impact completion rate.

**Yearbook**

Yearbook charges are refundable in full during the semester in which payment is made. Thereafter, no refunds will be made on canceled orders. Yearbooks must be picked up during the academic year in which they are published. Students who will not be on campus when the yearbooks are published must pay a mailing and handling fee. Yearbooks will not be held, nor will they be mailed, without payment of the mailing and handling fee. Refunds will not be made on books not picked up within one semester of the publication date. Refunds will not be made before 21 days from the date of payment. Refund policies contained herein reflect policies in effect at the time of publication and are subject to change.
UNIVERSITY INFORMATION

Mission Statement

Texas &M is dedicated to the discovery, development, communication and application of knowledge in a wide range of academic and professional fields. Our mission of providing the highest quality undergraduate and graduate programs emerges from our mission of developing new understandings through research and creativity.

We prepare students to assume roles of leadership, responsibility and service to the greater good. We assume as our historic trust the maintenance of freedom of inquiry and an intellectual environment that nurtures the human mind and spirit.

We welcome and seek to serve citizens of all racial, ethnic and geographic backgrounds, in keeping with our land-grant mission of educating a broad cross-section of the state's population while meeting the challenges of our increasingly diverse, global economy.

History and Development

Texas A&M is the state's first public institution of higher education. With a student body of more than 66,000 and more than 5,200 acres on the College Station campus alone, Texas A&M is also among the nation's largest universities.

Our origins, however, are much humbler. We owe our existence to the Morrill Act, approved by the U.S. Congress on July 2, 1862, which provided for donation of public land to the states. The land was to be sold at auction, with the proceeds set aside in a perpetual fund, and the interest generated supporting a college "to teach such branches of learning as are related to agriculture and mechanical arts . . . in order to promote the liberal and practical education of the industrial classes in the several pursuits and professions in life."

In November 1866, the Texas Legislature agreed to provide for the state's land-grant college. Five years later, the Agricultural and Mechanical College of Texas was established through an act that appropriated $75,000 for the construction of buildings and that bound the state to defray all expenses of the college exceeding the annual interest from the endowment. Proceeds from the sale of the 180,000 acres of land scrip received under the Land Grant College Act were invested in $174,000 of Texas gold frontier defense bonds, forming a perpetual endowment for the institution. A commission created to identify a location for the college accepted the offer of 2,416 acres of land from the citizens of Brazos County in 1871, and the College opened its doors five years later.

In 1888, the faculty initiated programs of instruction at the graduate level, and in 1890, two Master of Science degrees were conferred. Initially, the Agricultural and Mechanical College of Texas emphasized graduate programs in agriculture and engineering, which were administered by a faculty committee for graduate studies. In 1898, a single Master of Science degree in horticulture was awarded, followed by a scattering of Master of Science degrees in agriculture over the next 22 years. The acceleration in the awarding of Master of Science degrees after 1920 prompted the College to establish the Graduate School in 1924, with the dean of the college serving as graduate dean.

In 1936, the Board of Directors approved "certain programs of study and research leading to the doctorate." That same year, the Academic Council established the graduate faculty, and in 1940, the first Ph.D. was awarded. In the 1960s, the Board of Regents created programs of graduate instruction in each of the academic colleges.

In 1963, the Texas state legislature officially changed the College's name to Texas A&M University, with the "A" and "M" being a symbolic link to the school's past but no longer officially standing for "Agricultural and Mechanical."

Texas &M underwent many other significant changes in the '60s, as well. Under Gen. Earl Rudder's administration, Texas A&M also opened its doors to African American students and formally admitted women students. Participation in the Corps of Cadets was made voluntary.

Since then, Texas A&M has become an academic powerhouse. It is one of only three Tier 1 universities in the state (along with Rice University and the University of Texas at Austin). Texas A&M was designated a sea-grant institution in 1971 and a space-grant institution in 1989, making it among the first four universities to hold this triple distinction, and one of only 17 nationwide.

In 2001, Texas A&M became a member of the Association of American Universities, which is restricted to the 62 top public and private institutions of higher learning in the United States and Canada. In 2004, the Kappa of Texas Chapter of Phi Beta Kappa was installed at Texas A&M.

As the State of Texas has grown, so has the University. Today, women comprise nearly half of the student body of 68,000, and membership in the Corps of Cadets is more than 2,500, the largest it has been in decades. Historically, the Corps of Cadets has produced more officers than any other institution outside the military academies. The George Bush Presidential Library and Museum opened in 1997, making Texas A&M one of only a few universities to host a presidential library.

Texas A&M has a presence in 250 of the state's 252 counties through its extension agencies, and also has two branch campuses: a marine campus in Galveston, and an engineering campus in the Middle Eastern country of Qatar (fully funded by the Qatar Foundation). The university has research expenditures of more than $892 million, ranking it 16th nationally by the National Science Foundation.

Classified by the Carnegie Foundation as a Research Intensive University, Texas A&M embraces its mission of advancing knowledge and human achievement, helping to drive the economic engine of the state and nation, and preparing students to be life-long learners and leaders in today's knowledge-based, global society.

Texas A&M's focus on excellence and innovation in teaching, research and service has led to rankings among the nation's top universities. Texas A&M today seeks even greater preeminence among the nation's top public universities, while continuing to respect the history and traditions that set us apart.

Student Learning Outcomes

Student Learning Outcomes

Student learning outcomes summarize the knowledge and skills Texas A&M expects students to gain during their educational experience as Aggies. These learning outcomes ask students to connect their course- and degree-level learning to their overall goals as they take on leadership positions in their professions and communities, and prepare them to engage in learning for a lifetime.
First and foremost, Texas A&M expects students to have mastered the material presented in their individual courses, from entry-level general education courses required of all undergraduates, to capstone courses restricted to seniors in a major, to specialized graduate seminars.

The broader institutional student learning outcomes ask students to connect the pieces of their education into a whole that synthesizes what they have learned. Students graduate not only knowing facts and understanding basic concepts, but also demonstrating an ability to apply and explain those facts and concepts creatively in new situations. Through this process, students gain the skills and knowledge that allow them to thrive in our complex world.

**Master’s**

A student who graduates from Texas A&M with a master’s degree will:

- Master degree program requirements, including theories, concepts, principles and practice, and develop a coherent understanding of the subject matter through synthesis across courses and experiences.
- Apply subject matter knowledge in a range of contexts to solve problems and make decisions.
- Use a variety of sources and evaluate multiple points of view to analyze and integrate information and to conduct critical, reasoned arguments.
- Know how to communicate effectively.
- Use appropriate technologies to communicate, collaborate, conduct research and solve problems.
- Develop clear research plans and conduct valid (data-supported), theoretically consistent and institutionally appropriate research.
- Choose ethical courses of action in research and practice.

**Doctoral**

A student who graduates from Texas A&M with a doctoral degree will:

- Master degree program requirements, including theories, concepts, principles and practice; develop a coherent understanding of the subject matter through synthesis across courses and experiences; and apply subject matter knowledge to solve problems and make decisions.
- Apply a variety of strategies and tools, use a variety of sources and evaluate multiple points of view to analyze and integrate information and put forth critical, reasoned arguments.
- Communicate effectively.
- Develop clear research plans, conduct valid, data-supported, theoretically consistent, and institutionally appropriate research and effectively disseminate the results of the research in appropriate venues to a range of audiences.
- Use appropriate technologies to communicate, collaborate, conduct research and solve problems.
- Teach and explain the subject matter in their discipline.
- Choose ethical courses of action in research and practice.

University Statement on Harassment and Discrimination (p. 1488)
University Student Rules (p. 1489)

Academic Common Market

The purpose of the Academic Common Market (ACM) (http://www.sreb.org/academic-common-market) is to share specified academic degree programs between states located at southern public colleges and universities. This is accomplished through an exchange of students across borders at in-state rates. The motivation for this cooperation continues to be:

1. eliminating unnecessary duplication among the states, in that it is impractical for any institution or single state to develop or maintain degree programs in every field of knowledge,
2. to support existing degree programs that have the capacity to serve additional students, and
3. to provide access and encourage movement across state lines for programs not available in a student’s home state.

ACM Overview

1. Be a resident of one of 15 participating SREB states.
2. Student learns of the ACM and makes contact with SREB or state coordinator to determine eligible programs. **Please note that Texas participates in the ACM only at the graduate level (master’s, doctoral, and related degrees) for both in-state and out-of-state students.**
3. Student applies for and is accepted to an ACM-approved program.
4. Student applies for certification of residency through their home state coordinator.
5. State coordinator certifies student and notifies institution.
6. Institution grants in-state status or waiver for out-of-state fees.

Texas Residents

Texas residents (http://www.collegeforalltexans.com/index.cfm?ObjectID=6D1466D9-AEA5-DE00-C12F3F75E7367718) looking to study out of state, the first step is to confirm that a comparable program at the same degree level is not already offered at a Texas public university. Visit this site to search for degree programs in Texas: http://www.thecb.state.tx.us/apps/ProgramInventory/ProgSearch.cfm

If there are no programs at Texas public institutions that have at least 50% comparable required coursework, then graduate student can apply for the ACM by following instruction at the Texas ACM Website (http://www.thecb.state.tx.us/index.cfm?objectid=E918B4C6-CCFF-5020-1129E36D8D4E60F1).

General information about the Academic Common Market can be found at the SREB Website (http://www.sreb.org/academic-common-market). For specific questions about Texas participation, send an email to ACMrequests@thecb.state.tx.us or call Allen Michie at (512) 427-6518.

Residents of Other Participating States

Residents looking to study at Texas A&M, should contact the ACM coordinator at student’s home institution or home state. The contact information for each participating state can be found on the SREB website (http://home.sreb.org/acm/participating/institutionstates.aspx).

Once, the student is approved, the Texas State Coordinator will communicate with the Texas A&M ACM Coordinator who arranges with the appropriate institution officials.

A detailed list of approved TAMU programs, concentrations, and eligible states is available at SREB Website. (http://home.sreb.org/acm/choosestate.aspx) A summary of the approved TAMU programs is given below.

ACM list of approved Texas A&M University programs

- Master of Science in Animal Breeding
- Master of Arts in Anthropology
- Doctor of Philosophy in Anthropology
- Master of Arts Conservation Archaeology in Anthropology
- Master of Arts Nautical Archaeology in Anthropology
- Doctor of Philosophy Nautical Archaeology in Anthropology
- Master of Architecture in Architecture
- Master of Science in Architecture
- Doctor of Philosophy in Architecture
- Doctor of Philosophy in Geography
- Master of Science in Geophysics
- Doctor of Philosophy in Geophysics
- Master of Science in Land Development
- Master of Engineering in Nuclear Engineering
- Master of Science in Nuclear Engineering
- Doctor of Philosophy in Nuclear Engineering
- Master of Engineering in Ocean Engineering
- Doctor of Philosophy in Ocean Engineering
- Master of Science in Oceanography
- Doctor of Philosophy in Oceanography
- Master of Marine Resources Management in Marine Resources Management
“An Aggie does not lie, cheat, or steal or tolerate those who do.”

Upon accepting admission to Texas A&M University or one of its branch campuses, a student immediately assumes a commitment to uphold the Honor Code, to accept responsibility for learning, and to follow the philosophy and rules of the Honor System. A student will be required to state his/her commitment on examinations, research papers, and other academic work. Ignorance of the rules does not exclude any member of the Texas A&M community from the requirements or the processes of the Honor System.

The Honor System Office is charged with promotion of the honor code and administration of academic misconduct cases. The Honor Council, comprised of students and faculty from colleges and offices across the University, will investigate all such infractions of the honor code and recommend appropriate sanctions. The website, http://aggiehonor.tamu.edu, defines the types of infractions and the possible consequences. Students are urged to review this information.

In addition to adherence to the Honor Code, a student (graduate students in particular) who is completing a thesis, record of study, dissertation, and publication may fall under the additional federal requirements promulgated by the Office of Research Integrity (Scientific Misconduct Regulations — 42 CFR part 50), as well as Texas A&M System Regulations and Texas A&M University Rules (Texas A&M System Regulations — Ethics in Research, Scholarship and Creative Work — 15.99.03 (https://www.tamus.edu/legal/policy/policy-and-regulation-library), and Texas A&M University rules and standard administrative procedures — Responsible Conduct in Research and Scholarship — 15.99.03.M1, 15.99.03. M1.01-06 (http://rules-saps.tamu.edu/TAMURulesAndSAPs.aspx#15)).

Contact information for each campus can be found at the following:

- Texas A&M University website - http://aggiehonor.tamu.edu
- Texas A&M at Galveston website - http://www.tamug.edu/honorsystem
- Texas A&M at Qatar website - https://www.qatar.tamu.edu/students/academic-services/aggie-honor-system

Aggie Honor System Office
http://aggiehonor.tamu.edu

All Texas A&M students, graduate and undergraduate, part-time or full-time, in residence or in distance education, are expected to follow the guiding rule of the Aggie Honor Code: “An Aggie does not lie, cheat, or steal or tolerate those who do.”
the cooperative graduate programs are available from the graduate offices of the institutions involved.

Texas A&M University and The University of Texas System also have entered into an agreement relating to cooperative use of courses and facilities in graduate education. Visit the OGAPS web page for further information on the Cooperative/Consortium Program for Graduate Students (http://ogaps.tamu.edu/New-Current-Students/Cooperative-Consortium-Program) process.

**English Language Proficiency Requirement**

All international graduate students whose native language is not English must meet minimum English proficiency standards.

To achieve admission, international graduate students must attain English proficiency verification.

To become eligible to teach in positions such as Graduate Assistant-Teaching, Instructor, Lecturer, etc., the State of Texas Education Code (Section 51-917) requires that international graduate students attain English language proficiency certification.

Citizens of certain English-speaking countries are exempt from the verification requirement. Refer to the list on the Office of Admissions (http://admissions.tamu.edu/international/graduate) website.

Refer to the Office of Graduate and Professional Studies website for more information regarding English Language Proficiency (http://ogaps.tamu.edu/New-Current-Students/English-Language-Proficiency) requirements.

English Proficiency **Verification** can be attained using the following:

- a TOEFL score of at least 80 on TOEFL iBT (550 paper-based), or
- an IELTS score of at least 6.0, or
- a GRE Verbal Reasoning score of at least 146 (400 on the old scale), or
- a GMAT Verbal score of at least 22, or
- a PTE Academic score of at least 53, or
- Beginning with Summer/Fall 2017 enrollment, the Office of Admissions will exempt applicants of certain English-speaking countries from the English proficiency requirement for admission and will consider these students English Language Proficiency Verified. Refer to the list on the Office of Admissions (http://admissions.tamu.edu/international/graduate) website. Acquiring alternative verification (http://ogaps.tamu.edu/New-Current-Students/English-Language-Proficiency/Alternative-Verification-Guidelines) during the admission process from the Office of Graduate and Professional Studies via a departmental request. An international graduate student holding a master’s degree from an accredited institution located in the U.S. qualifies for alternative verification.

Individual colleges or departments may choose to establish test standards that exceed the University minimums listed above. Scores from TOEFL, IELTS and PTE examinations administered more than two years before submission of the admissions application are not eligible for use in attaining English proficiency verification.

**International Graduate Students Serving in Teaching Positions**

To become eligible to hold a teaching position at Texas A&M University such as Graduate Assistant-Teaching, Instructor, Lecturer, etc., the State of Texas requires that international graduate students attain English proficiency certification either before or after enrollment.

International graduate students who wish to serve in teaching positions can certify for English proficiency before enrollment by achieving requisite scores on the oral component of the following standardized tests: TOEFL, IELTS or PTE exams. [See chart below.] Also, departments may request alternative certification under certain conditions [See details below].

If international graduate students who wish to serve in teaching positions do not achieve requisite standardized test scores prior to enrollment, they can certify by passing the oral skills assessment of the English Language Proficiency Exam (ELPE) offered by Testing Services on the Texas A&M campus.

**Eligibility levels for international graduate students serving in teaching positions:**

- **Level 1**: Students eligible for teaching assignments

- **Level 2**: Students conditionally eligible for teaching assignments for one semester only, but must simultaneously participate in Texas A&M University Center for Teaching Excellence English Language Proficiency (CTE-ELP) instruction and achieve a certifying score on the oral skills assessment of the ELPE by the end of the semester.

- **Level 3**: Students not eligible for teaching assignment. Students should participate in spoken language training (such as those offered by TAMU CTE-ELP or other independent English language instruction providers) to assist them in meeting English language proficiency requirements.

**Global Standardized Tests**

**Locally Administered Exam (on Texas A&M campus)**

**Alternative Certification for international graduate students serving in teaching positions**

Departments have the option to request alternative certification from the Office of Graduate and Professional Studies on behalf of an international graduate student who wishes to serve in a teaching position.

- An international graduate student who has received a baccalaureate degree following four years of study at an accredited institution located in the U.S. qualifies for alternative certification.

- Departments can request alternative certification for an international graduate student who is a citizen of certain English-speaking countries listed under required documents on the Office of
Admissions (http://admissions.tamu.edu/international/graduate) website.

- All other requests for alternative certification require strong department justification. The Office of Graduate and Professional Studies will evaluate requests on a case-by-case basis.

**English Language Proficiency Examination**

The ELPE evaluates English skills in the areas of reading, listening, written composition and oral communication.

Visit the Testing Services website (http://dars.tamu.edu/Testing/ELPE) for more information on upcoming exam dates and how to register for the English Language Proficiency Exam.

English Proficiency Certification is required by the State of Texas before a graduate student is eligible to serve as a Graduate Assistant-Teaching or any other position considered to be a teaching position (e.g., instructor, lecturer, etc.). More information regarding the English Language Requirements may be found at http://ogaps.tamu.edu.

**Graduate Academic Appeals Process**

Graduate or professional students who believe that decisions about unauthorized absences or final grades, the outcome of evaluation of performance on examinations, or decisions about separation (e.g., probation, suspension, dismissal, or termination) from a Department, Interdisciplinary Degree Program, and/or College for scholastic deficiency were made on an arbitrary, capricious, or prejudicial basis may appeal such decisions through the appeals process specified in the Texas A&M University Rules (59. Graduate Academic Appeals Panel). In such appeals the burden of proof is upon the student to demonstrate that the decisions in question were arbitrary, capricious, or prejudiced.

For additional information see the Office of Graduate and Professional Studies webpage on Student Grievances and Appeals Procedures (http://ogaps.tamu.edu/New-Current-Students/Student-Grievances-and-Appeals-Procedures).

**Intellectual Property**

The ownership, management and commercialization of system-owned Intellectual Property and Tangible Research Property are set forth in System Policy 17.01 Intellectual Property Management and Commercialization. Intellectual Property will mean, collectively, all forms of intellectual property including, but not limited to, issued patents, patentable inventions, copyrightable works, trademarks, mask works, and trade secrets. The system recognizes and affirms the traditional academic freedom of its faculty and staff to publish pedagogical, scholarly or artistic works without restriction. In keeping with this philosophy, the system does not claim copyright to pedagogical, scholarly or artistic works, regardless of their form of expression, unless required by a funding or research contract. Such works include, but are not limited to, copyrightable works of students created in the course of their education, such as dissertations, papers and journal articles. Authors of copyrightable works that are not owned by the system, its members, or another party such as a research sponsor, own the copyright in their works and are free to publish them, register the copyright, and receive any revenues which may result.

Accordingly, copyrightable works may be owned by the student/author/creator, by multiple individuals (such as a research team or co-authors of a publication), by the System, by a System member, or by another party such as a research sponsor. Factors that require consideration in determining ownership include:

1. whether or not the intellectual property was conceived or developed as a result of activities related to an individual's employment responsibilities and/or with support from University-administered funds, facilities or personnel,
2. whether or not the intellectual property was conceived or developed in the course of, or resulting from, research supported by a grant or contract with the federal government or state government or a nonprofit or for-profit nongovernmental entity; and,
3. the individual collaborators, relative contributions of each individual, and agreements among creators of the work.

It is recommended that the student identify in the thesis, dissertation or record of study any collaborators, contributors, and sources of financial support (unless prohibited through contractual agreements) in carrying out the research or in publications presented in the thesis/dissertation/record of study. It is also recommended that the student clearly indicate what the student’s independent contributions were to the work. The advisory committee is responsible for ensuring that the student’s independent contribution is sufficient to represent a thesis, dissertation, or record of study.

**Oak Ridge Associated Universities**

Since 1950, students and faculty of Texas A&M University and its branch campuses have benefited from membership in Oak Ridge Associated Universities (ORAU). A consortium of 121 Ph.D.-granting universities across the United States, the United Kingdom, and Puerto Rico, ORAU provides research grants; promotes opportunities for collaboration among government, universities, and private industry; and creates smart partnerships for innovation and advances in scientific research and education. ORAU leverages this strong university by partnering with national laboratories, government agencies, and private industry to strengthen America’s scientific research and education enterprise to enhance global competitiveness, to build public confidence in the management of health issues and environmental cleanup initiatives, and to enhance our nation’s preparedness to respond to emergencies related to terrorist incidents and natural disasters.

ORAU operates the Oak Ridge Institute for Science and Education (ORISE), a Department of Energy facility that provides access to a multitude of opportunities for study and research for undergraduates, graduates, postgraduates, and faculty. Students can participate in programs covering a wide variety of disciplines, including business, Earth Sciences, epidemiology, engineering, physics, geological sciences, pharmacology, ocean sciences, biomedical sciences, nuclear chemistry, and mathematics. A comprehensive listing of these programs and other opportunities, their disciplines, and details on locations and benefits can be found in the ORISE Catalog of Education and Training Programs, available at http://see.orau.org or by calling the contact below.

ORAU’s Office of Partnership Development seeks opportunities for partnerships and alliances among ORAU’s members, private industry, and major federal facilities. Activities include faculty development programs, such as the Ralph E. Powe Junior Faculty Enhancement Awards, which provide seed money for research by junior faculty at ORAU member institutions and are intended to enrich the research and professional growth of young faculty and result in new funding opportunities: the ORAU Events Sponsorship Program, which provides support for events that involve participants from more than one ORAU institution; the
ORAU Travel Grants Program, which facilitates travel by a faculty or staff member from an ORAU sponsoring or associate institution; and various other support programs and services.

For more information about ORAU and its programs, visit www.orau.org or contact:

Vice President for Research
ORAU Councilor for Texas A&M University
(979) 845-8585

Pathways to the Doctorate

The Pathways to the Doctorate is a program dedicated to increasing the number, quality, and diversity of Master's and doctoral graduates across all disciplines within The Texas A&M University System. Consisting of 11 universities, the System spans the State of Texas. This enables the System to recruit top students from a variety of geographical, socio-economic, racial, ethnic, and cultural environments. The Pathways to the Doctorate is one approach to address the state's Closing the Gaps and its successor plan. The goal of the Pathways to the Doctorate Program is to attract high achieving students within The Texas A&M University System to pursue careers in higher education. This program will help produce some of the next generation of faculty. Through activities such as seminars and workshops, a mentoring program and an annual Texas A&M University System Student Research Symposium with System-wide participation, the Pathways program aims to:

- Create a pathway for talented students to pursue graduate education;
- Foster opportunities for faculty, graduate students, and undergraduate students to collaborate and to foster innovative research and interpersonal communication skills;
- Enlighten and encourage students and teachers (K-12 through college) to see that science and technology are essential to lead a life of discovery and fun;
- Help meet faculty needs as postsecondary enrollment grows and current faculty retire.

Texas A&M University offers Pathways to the Doctorate fellowships for doctoral students who completed a bachelor's degree at one of the other Texas A&M University System institutions. Pathways to the Doctorate Fellowships are awarded by the Office of Graduate and Professional Studies to qualified doctoral students mentored by faculty partners in the Program. Further details are available at http://ogaps.tamu.edu.

Requirements for Graduate Teaching Assistants

Requirements for Graduate Teaching Assistant (TA) training are in place to improve undergraduate teaching, enhance the classroom experiences of TAs, and respond to the need for systematic preparation and evaluation of Teaching Assistants. For international Teaching Assistants, training requirements will supplement programs already in place to evaluate and promote English language proficiency. New TAs’ attendance at the Center for Teaching Excellence (CTE) Teaching Assistant Institute (TAI) is mandatory. Discipline-specific training for new TAs will be provided at the college/department level. The nature of this training, while varying widely across different disciplines, will complement university-level training and will address the unique and specific needs of graduate students serving as TAs within their disciplines.

Responsible Conduct of Research

Students who will be involved in research involving human subjects (e.g., survey data; human tissue/cell lines, protected health information), animals (e.g., vertebrate animals, animal tissues/cell lines), and/or biosafety/biohazards (e.g., recombinant DNA/transgenic animals, plants; agents infectious to humans, animals or plants) should obtain approval through the appropriate university committee (or be included in existing research approvals) prior to engaging in the research. Engaging in unauthorized research can result in severe penalties for non-compliance. All students are urged to complete responsible conduct of research training early in their programs to support their efforts in conducting research responsibly and ethically.

Additional information, as well as online training, may be obtained from the office of Research Compliance and office of Biosafety at http://rcb.tamu.edu.

Student Grievances and Appeals Procedures

Specific procedures at Texas A&M University allow graduate students to pursue a grievance for any of the problems, issues, or concerns listed in the table below. First professional students can pursue disputes over due process. BEFORE initiating a grievance, students are strongly encouraged to seek clarification and advice regarding appropriate procedures. The campus Ombudsperson for Graduate Education represents a valuable resource for questions regarding grievances and appeals. The ombudsperson advocates for the processes of graduate education and provides equal, open access to all parties - students, faculty, staff, and administrators.

Texas A&M University
University Statement on Harassment and Discrimination

Texas A&M University (TAMU) provides equal opportunity to all employees, students, applicants for employment or admission, and the public regardless of race, color, sex, religion, national origin, age, disability, genetic information, veteran status, sexual orientation or gender identity. TAMU will promptly investigate complaints of discrimination, sexual harassment, and/or related retaliation in accordance with applicable federal and state laws.

Students who have questions or believe they have experienced illegal discrimination, sexual harassment, sexual violence, and/or related retaliation are encouraged to contact:

- TAMU and Texas A&M University Health Science Center contacts
  - Notice of Nondiscrimination and Abuse (http://urc.tamu.edu/media/642261/NoticeOfNonDiscrimination.pdf)
  - Texas A&M University at Galveston contacts
    - Notice of Nondiscrimination and Abuse (http://www.tamug.edu/hrd/LinksAndForms/TAMU_Notice_of_Nondiscrimination_and_Abuse.pdf)
  - TAMU at Qatar contacts – Notice of Nondiscrimination and Abuse (https://www.qatar.tamu.edu/other/notice-of-nondiscrimination-and-abuse)

Sexual Harassment and Related Retaliation.

University Student Rules

Each student enrolled at Texas A&M University is responsible for being fully acquainted with and complying with the Texas A&M University Student Rules. Specific rules, information and procedures may be found in publications pertaining to each particular service or department. Graduate students are encouraged to reference the website at http://student-rules.tamu.edu for current published rules and regulations.

For information concerning federal and state policies, please reference the appendices (p. 1921) in this catalog.
COURSE DESCRIPTIONS

All graduate and professional courses offered in the University are described on each subject page. The unit of credit is the semester hour, which involves one hour of theory or from two to four hours of practice per week for one semester of 15 weeks. Figures following the credit hours indicate the clock hours per week devoted to theory and practice, respectively. Theory includes recitations and lectures; practice includes work done in a clinical setting, laboratory, shop, drawing room, field or other. When courses are cross-listed, credit cannot be received for both courses. Any course may be withdrawn from the session offerings in case the number of registrations is too small to justify offering the course.

ACCT - Accounting

ACCT 603 Energy Accounting
Credits 3. 3 Lecture Hours.
Overview of the oil and gas industry and specialized financial accounting procedures associated with the industry; emphasis on accounting for exploration, development, production, depletion and amortization as well as joint operations, asset impairment and retirement obligation; includes reserve accounting/disclosure related to the above topics.
Prerequisites: ACCT 327 with C or better.

ACCT 607 Seminar in Auditing
Credits 3. 3 Lecture Hours.
Current issues and research in auditing, attestation and financial disclosures. Classification 6 students may not enroll in this course.
Prerequisite: ACCT 407 or equivalent.

ACCT 610 Financial Accounting
Credits 1 to 3. 1 to 3 Lecture Hours.
Develops a conceptual framework for understanding and using corporate financial statements. Oriented towards the user of financial accounting data (rather than the preparer) and emphasizes the reconstruction of economic events from published financial data. May be repeated for up to 3 hours credit. Classification 6 students may not enroll in this course.
Prerequisite: Enrollment is limited to BUAD classification 7 graduate students.

ACCT 611 Management of Taxation
Credits 3. 3 Lecture Hours.
Various income taxes on taxable entities. For business and other majors. Classification 6 students may not enroll in this course.

ACCT 612 Partnership and Real Estate Taxation
Credits 3. 3 Lecture Hours.
Concepts and principles of partnerships and real estate taxation; use of partnerships and real estate for tax planning. Classification 6 students may not enroll in this course.
Prerequisite: ACCT 405.

ACCT 615 Contemporary Tax Topics
Credits 3. 3 Lecture Hours.
Explores business tax topics that provide current/future significant professional tax service opportunities such as specialized applications of business taxation. Intended for graduate students in the Tax Track in the Professional Program in Accounting. May be taken two times for credit.
Prerequisite: ACCT 611.

ACCT 616 International Accounting
Credits 3. 3 Lecture Hours.
Introduction and examination of accounting issues unique to multinational enterprises and international business activity. Classification 6 students may not enroll in this course.
Prerequisites: ACCT 328; FINC 341.
Cross Listing: IBUS 646/ACCT 646.
ACCT 647/FINC 647 Financial Statement Analysis
Credits 3. 3 Lecture Hours.
Analytical approach to financial statements; application of finance and accounting principles relevant to the analysis of financial statements. Classification 6 students may not enroll in this course.
Prerequisites: FINC 612 or FINC 635; ACCT 610 or ACCT 640.
Cross Listing: FINC 647/ACCT 647.

ACCT 648 Accounting Information Systems
Credits 3. 3 Lecture Hours.
Design, implementation, operation, control and audit techniques of accounting information systems. Classification 6 students may not enroll in this course.
Prerequisite: ACCT 427 or equivalent.

ACCT 650 Accounting Ethics
Credits 3. 3 Lecture Hours.
Integration of ethical reasoning, objectivity, independence and other core values into the development of a professional accountant; critical analysis of the ethical lapses which have occurred in business and the accounting profession; explores ways to integrate ethical behavior into professional life.
Prerequisite: Graduate classification.

ACCT 651 Development of Accounting Thought
Credits 3. 3 Lecture Hours.
Examination of contemporary financial reporting issues in terms of institutional, ethical, and regulatory environment; framework for exercising judgment when literature provides no direct prescription about correct reporting. Tools used include unstructured cases and open-ended research assignments. Course not open to classification 6 students.
Prerequisite: ACCT 642 or approval of instructor.

ACCT 660 Accounting Information and Financial Markets
Credits 3. 3 Lecture Hours.
Financial accounting research with emphasis on financial markets; investigates major areas of financial accounting research, related statistical techniques and the progress of research in a historical perspective. Classification 6 students may not enroll in this course.
Prerequisite: ACCT 665 or approval of instructor.

ACCT 665 Research Methodology I
Credits 3. 3 Lecture Hours.
Nature and evaluation of accounting research; includes preparation and evaluation of original research papers. Classification 6 students may not enroll in this course.
Prerequisite: Doctoral classification.

ACCT 671 Contemporary Accounting Topics
Credits 1 to 3. 1 to 3 Lecture Hours.
Current issues and research in topical areas: financial data audit and control; international accounting; accounting for natural resources; tax planning, theory and structure of taxation. Classification 6 students may not enroll in this course.
Prerequisite: Approval of instructor.

ACCT 680 Tax Research and Policy
Credits 3. 3 Lecture Hours.
Methodology and sources of tax research; tax analysis research, policy implications, behavioral aspects and use of quantitative analysis. Classification 6 students may not enroll in this course.
Prerequisite: ACCT 405 or 611.

ACCT 684 Professional Internship
Credits 1 to 6. 1 to 6 Other Hours.
A directed internship in an organization to provide students with on-the-job training with professionals in organizational settings appropriate to the student's professional objectives. Classification 6 students may not enroll in this course.
Prerequisites: Approval of committee chair and department head.

ACCT 685 Directed Studies
Credits 1 to 4. 1 to 4 Other Hours.
Directed individual study of selected problems using recent developments in business research methods. Classification 6 students may not enroll in this course.
Prerequisites: Graduate classification and approval of instructor.

ACCT 688 Doctoral Seminar
Credits 3. 3 Other Hours.
Historical development of the conceptual framework of accounting theory and practices; analysis of current research and controversial issues in the field. For doctoral students only. May be repeated for credit. Classification 6 students may not enroll in this course.
Prerequisite or corequisite: ACCT 665.

ACCT 689 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours. 0 to 4 Lab Hours.
Selected topics in an identified area of accounting. May be repeated for credit. Classification 6 students may not enroll in this course.

ACCT 705 Accounting for Business Results
Credits 1 to 4. 1 to 4 Lecture Hours.
Interpretation of annual reports; financial statement creation; assessment of company financial health; identification of factors that impact company earnings quality; valuation model implementation.
Prerequisite: For Master of Science in Business students only.

ACCT 710 Accounting for Managerial Decision Making
Credits 1 to 4. 1 to 4 Lecture Hours.
Use of accounting information for managerial decision making; cost behavior and control; budgeting; performance measurement; application of accounting data in managing organizational production activities and operation processes.
Prerequisite: For Master of Science in Business students only.

ADDT - Alcohol Drug Dep Trtmnt

ADDT 800 Alcohol and Drug Dependency Treatment
Credits 1.25 to 10. 1.25 to 10 Other Hours.
The ADDT clerkship will expose students to clinical methods for detection, diagnosis, triage, and intervention in a continuum of treatment settings from specialized in-patient care to primary care to community based self-help. It will introduce students to medication strategies for substance abuse treatment while recognizing the primacy of behavioral treatment for most addiction disorders. Students will review current understanding of basic neurobiology common to all addictions along with clinical presentation and specific management of different categories of addictive drugs.
AEGD - Adv Ed Gen Dentistry

AEGD 600 Clinical Dentistry I
Credits 0. 0 Other Hours.
Clinical diagnosis and treatment of advanced comprehensive multidisciplinary cases under faculty guidance and supervision.

AEGD 601 Clinical Dentistry II
Credits 0. 0 Other Hours.
Clinical diagnosis and treatment of advanced comprehensive multidisciplinary cases under faculty guidance and supervision.

AEGD 602 Clinical Dentistry III
Credits 0. 0 Other Hours.
Clinical diagnosis and treatment of advanced comprehensive multidisciplinary cases under faculty guidance and supervision.

AEGD 603 Implant Dentistry
Credit 1.5. 1.5 Lecture Hour.
Diagnosis, management and treatment of both fixed and removable implant patients. Lecture, seminars and patient treatment.

AEGD 604 Practice Management I
Credits 0 to 1.5. 0 to 1.5 Lecture Hours.
5. All areas of practice and business management will be discussed, including office management, personnel management, professional ethics, financial planning, starting a practice, office design and legal responsibilities.

AEGD 605 Practice Management II
Credits 0 to 1.5. 0 to 1.5 Lecture Hours.
5. All areas of practice and business management will be discussed, including office management, personnel management, professional ethics, financial planning, starting a practice, office design and legal responsibilities.

AEGD 606 Advanced Removable Prosthodontics
Credit 1.5. 1.5 Other Hour.
Diagnosis, treatment planning and clinical treatment of complicated cases requiring advanced skills in removable prosthodontics.

AEGD 607 Advanced Fixed Prosthodontics
Credit 1.5. 1.5 Other Hour.
Diagnosis, treatment planning and clinical treatment of complicated cases requiring advanced skills in fixed prosthodontics, including implant restoration.

AEGD 608 Advanced Clinical Periodontics
Credit 1.5. 1.5 Other Hour.
Diagnosis, treatment planning, prognosis and instrumentation skills; basic surgical techniques.

AEGD 609 Advanced Clinical Orthodontics
Credit 1.5. 1.5 Other Hour.
Diagnosis and evaluation of a variety of malocclusions; emphasis on minor tooth movement, interceptive treatment and maintenance of arch integrity.

AEGD 610 Advanced Pediatric Dentistry
Credit 1.5. 1.5 Other Hour.
Diagnosis, treatment planning and clinical treatment of complex pediatric patients; emphasis on medically compromised and behavior management cases.

AEGD 611 Clinical Endodontics
Credits 2. 2 Other Hours.
Diagnosis, management and treatment of patients with complex endodontic problems; surgical and nonsurgical treatment and retreatment of complicated cases.

AEGD 612 Advanced Geriatric Dentistry
Credit 1.5. 1.5 Other Hour.
Diagnosis, treatment planning and treatment of geriatric patients with special needs; emphasis on medically, physically and mentally compromised patients.

AEGD 613 Advanced Maxillofacial Surgery
Credits 2. 2 Other Hours.
(0-0-2). Principles of oral surgery techniques and procedures in the outpatient clinic and operating room environments; demonstrations and clinical application.

AEGD 614 Advanced Dentistry for Special Care Patients
Credit 1.5. 1.5 Other Hour.
Clinical application and experience in the care and treatment of special care patients with medical, physical and mental handicaps.

AEGD 615 Treatment Planning Conference I
Credit 1.5. 1.5 Other Hour.
Diagnosis and treatment planning for comprehensive cases involving a multidisciplinary approach; student presentation of complex cases to a graduate faculty forum; defense of treatment plans using documented scientific or clinical evidence.

AEGD 616 Treatment Planning Conference II
Credit 1.5. 1.5 Other Hour.
Diagnosis and treatment planning for comprehensive cases involving a multidisciplinary approach; student presentation of complex cases to a graduate faculty forum; defense of treatment plans using documented scientific or clinical evidence.

AEGD 617 Treatment Planning Conference III
Credit 1.5. 1.5 Other Hour.
Diagnosis and treatment planning for comprehensive cases involving a multidisciplinary approach; student presentation of complex cases to a graduate faculty forum; defense of treatment plans using documented scientific or clinical evidence.

AEGD 618 Current Literature Review I
Credit 1.5. 1.5 Other Hour.
Detailed review of relevant literature on topics selected by the graduate faculty and presentation by graduate students; enhancement of student knowledge in selected subject areas and development of ability to critically evaluate scientific literature.

AEGD 619 Current Literature Review II
Credit 1.5. 1.5 Other Hour.
Detailed review of relevant literature on topics selected by the graduate faculty and presentation by graduate students; enhancement of student knowledge in selected subject areas and development of ability to critically evaluate scientific literature.

AEGD 620 Current Literature Review III
Credit 1.5. 1.5 Other Hour.
Detailed review of relevant literature on topics selected by the graduate faculty and presentation by graduate students; enhancement of student knowledge in selected subject areas and development of ability to critically evaluate scientific literature.
AEGD 621 Clinical Pathology I
Credits 1.50 to 2. 1.50 to 2 Other Hours.
5-2. Presentation and discussion of clinical cases representing various types of oral pathology of both hard and soft tissues; formulation of a logical differential diagnosis and appropriate treatment.

AEGD 622 Clinical Pathology II
Credits 1.50 to 2. 1.50 to 2 Other Hours.
5-2. Presentation and discussion of clinical cases representing various types of oral pathology of both hard and soft tissues; formulation of a logical differential diagnosis and appropriate treatment.

AEGD 623 Clinical Pathology III
Credits 1.50 to 2. 1.50 to 2 Other Hours.
5-2. Presentation and discussion of clinical cases representing various types of oral pathology of both hard and soft tissues; formulation of a logical differential diagnosis and appropriate treatment.

AEGD 624 Ethics in Dentistry
Credit 1.5. 1 Lecture Hour.
Ethical approach to practice promotion and professional interactions.

AEGD 625 Current Concepts in Operative Dentistry
Credit 1.5. 1 Other Hour.
Recent theories and techniques relating to restorative dental materials; emphasis on indications and contraindications for tooth-colored restorative materials; esthetic dentistry.

AEGD 689 Special Topics In...
Credits 0 to 4. 0 to 4 Other Hours.
Selected topics in an identified area of advanced education in general dentistry. May be repeated for credit.
Prerequisite: Graduate classification.

AEGD 691 Research
Credits 0 to 10. 0 to 10 Other Hours.
Research for thesis or dissertation.

AEGD - Dental Education

AERO - Aerospace Engineering

AERO 601 Advanced Aerodynamics
Credits 3. 3 Lecture Hours.
Theoretical and approximate solutions for steady and unsteady incompressible flows and steady transonic flows; applications to airfoil, wing and whole-vehicle aerodynamics; approximate methods for boundary layers; introduction to aerodynamic design concepts; design of swept wings and delta wings and control surfaces.
Prerequisite: Approval of instructor.

AERO 602 The Theory of Fluid Mechanics
Credits 3. 3 Lecture Hours.
Entry-level theory of fluid mechanics with emphasis on viscous subsonic flows; governing principles and equations, exact solutions to simple problems of the Navier-Stokes equations, similarity solutions and boundary layer theory; flow stability, transition and turbulence.
Prerequisite: Graduate classification and approval of instructor.

AERO 603/MEMA 602 Continuum Mechanics
Credits 3. 3 Lecture Hours.
Development of field equations for analysis of continua (solids as well as fluids); conservation laws; kinematics, constitutive behavior of solids and fluids; applications to aerospace engineering problems involving solids and fluids.
Prerequisite: Graduate classification.
Cross Listing: MEMA 602/AERO 603.

AERO 605/MEE 603 Theory of Elasticity
Credits 3. 3 Lecture Hours.
Analysis of stress and strain in two- and three-dimensions, equilibrium and compatibility equations, strain energy methods; torsion of noncircular sections; flexure, axially symmetric problems.
Prerequisite: graduate or senior undergraduate standing.
Cross Listing: MEE 603/AERO 605.

AERO 606 Multifunctional Materials
Credits 3. 3 Lecture Hours.
In-depth analysis of multifunctional materials and composites, and their novel applications.
Prerequisites: MEMA 602/AERO 603/MEMA 602, MSEN 601.
Cross Listing: MEMA 606 and MSEN 606.

AERO 608 Nanomechanics
Credits 3. 3 Lecture Hours.
Application of mechanics concepts to nano-scale behavior of materials. Review of continuum mechanics; Extensions to generalized continua; Nonlocal elasticity; Nano-scale plasticity. Focus on multi-scale modeling: Dislocation Dynamics; Quasi-Continuum method; Molecular dynamics with introductions to quantum mechanics and statistical mechanics.
Prerequisite: AERO 603/MEMA 602.

AERO 609 Sustainability Metrics and Life Cycle Assessment in Engineering
Credits 3. 3 Lecture Hours.
Concepts of sustainability with associated metrics; application of systems engineering tools to facilitate assessment of viable options on products and processes; assessment of impact on the entire biosphere; product life cycle analysis.
Prerequisite: Graduate classification.

AERO 615 Computational Fluid Dynamics for Aerospace Applications
Credits 3. 3 Lecture Hours.
Methods for solving internal and external flow problems; viscous and inviscid compressible flow, Euler, Navier-Stokes and Large Eddy Simulation solvers, boundary conditions.
Prerequisite: MATH 601 or approval of instructor.

AERO 616 Damage and Failure in Composite Materials
Credits 3. 3 Lecture Hours.
Mechanisms and models related to damage and failure in composite materials subjected to mechanical loads.
Prerequisite: Courses in composite materials, elasticity.
Cross Listing: MEMA 616 and MSEN 636.

AERO 617/MEMA 625 Micromechanics
Credits 3. 3 Lecture Hours.
Eigenstrains; inclusions, and inhomogeneities; Eshelby’s solution for an ellipsoidal inclusion; Eshelby’s equivalent inclusion method. Effective elastic properties of composites; composite spheres and cylinders models; bounds on effective moduli; Hashin-Shtrikman bounds; applications to fiber, whisker and particulate reinforced composites; introduction to micromechanics of inelastic composites and solids with damage.
Prerequisites: MEMA 602/AERO 603, or AERO 603/MEMA 602, AERO 605/MEE 603.
Cross Listing: MEMA 625/AERO 617.
AERO 618/MEMA 626 Mechanics of Active Materials
Credits 3. 3 Lecture Hours.
Introduction to coupled field theories: constitutive response of materials with thermal and electromagnetic coupling; microstructural changes due to phase transformations; shape memory alloys; piezoelectric and magnetostrictive materials; active polymers and solutions. Micromechanics of active composites.
Prerequisites: MEMA 602/AERO 603.
Cross Listing: MEMA 626/AERO 618.

AERO 620 Unsteady Aerodynamics
Credits 3. 3 Lecture Hours.
Theoretical formulation of unsteady airfoil theory and techniques used for determining airloads on oscillating lift surfaces; exact solutions and various approximations presented and evaluated; application to problems of unsteady incompressible, subsonic and transonic flows about airfoils and wings.
Prerequisite: Approval of instructor.

AERO 621 Aeromechanics of Wind Turbines
Credits 3. 3 Lecture Hours.
Solid and fluid mechanics concepts applied to aerodynamics and aeroelasticity of wind turbine blades; failure analysis and structural design; composites and hybrid materials.
Prerequisite: Graduate Classification.

AERO 622 Spacecraft Dynamics and Control
Credits 3. 3 Lecture Hours.
Elements of analytical dynamics; modeling different types of spacecraft and control systems, sensors, and actuators; stability; control system design; effects of flexibility; attitude and orbital coupling; environmental effects.
Prerequisites: AERO 422 or ECEN 420.

AERO 623 Optimal Spacecraft Attitude and Orbital Maneuvers
Credits 3. 3 Lecture Hours.
Application of optimization and optimal control techniques to spacecraft maneuver problems; computation of open loop and feedback controls for linear and nonlinear spacecraft dynamical systems; low-thrust and impulsive control, discretization methods, case studies.
Prerequisite: AERO 423 or equivalent.

AERO 624 Celestial Mechanics
Credits 3. 3 Lecture Hours.
Analytical and numerical methods for computing spacecraft orbits under the influence of gravitational, aerodynamic, thrust and other forces; Keplerian two-body problem, perturbation methods, orbit determination, navigation and guidance for aerospace vehicles.
Prerequisite: AERO 423 or equivalent.

AERO 625 Modern Control of Aerospace Systems
Credits 3. 3 Lecture Hours.
Linear and nonlinear controllers for aircraft and spacecraft; state and output feedback of sampled-data control systems; feedback linearization and dynamic inversion; direct sampled-data design using optimal MiMO techniques; sensing considerations, sources and modeling of uncertainties unique to aircraft and spacecraft, robustness analysis.
Prerequisite: AERO 422 or equivalent.

AERO 626 Estimation of Dynamic Systems
Credits 3. 3 Lecture Hours.
Traditional concepts and recent advances in estimation related to modern dynamic systems found in aerospace disciplines; least squares estimation, state estimation, nonlinear filtering, aircraft position and velocity tracking, attitude determination of spacecraft vehicles, gyro bias estimation and calibration.
Prerequisites: AERO 310 or equivalent; STAT 211 or equivalent.

AERO 627 Principles of Structural Dynamics
Credits 3. 3 Lecture Hours.
Examination of flexible structures through a review of single degree-of-freedom dynamical systems followed by an in-depth study of continuous and multiple degree-of-freedom systems; emphasis on discrete modeling of structures for vibration analysis and dynamic analysis, with minimal development of methods such as finite elements.
Prerequisite: Graduate classification.

AERO 628 Advanced Spacecraft Dynamics and Control
Credits 3. 3 Lecture Hours.
Review of fundamental principles; introduction to alternate and advanced methods of dynamics and control for aerospace systems; alternate methods for generating and analyzing equations of motion; techniques for complex multibody systems; variable speed control moment gyros; method of quadratic modes; focus on modeling techniques for aerospace systems.
Prerequisite: AERO 622.

AERO 629 Experimental Aerodynamics
Credits 3. 3 Lecture Hours.
Review of fundamental principles in aerodynamics; basics of instrumentation, electronics, data-acquisition, experimental techniques in aerodynamics/fluid mechanics; pressure, skin friction, force and velocity measurement techniques in wind and water-tunnel testing; conventional and novel techniques in data-processing and systems modeling; smart systems in experimental aerodynamics.
Prerequisite: AERO 601.

AERO 630 Introduction to Random Dynamical Systems
Credits 3. 3 Lecture Hours.
Building on basic probability theory, course covers theory and applications of discrete and continuous random processes. Particular attention shall be paid to the response of dynamical systems (discrete, linear and non-linear), to random input processes and their application to Engineering Systems.
Prerequisite: Graduate classification.

AERO 631 Model Predictive Control for Aerospace Systems
Credits 3. 3 Lecture Hours.
Nonlinear optimal control and optimization, optimal control theory, dynamical systems stability and control, approximation theory, convex optimization; control of engineering systems with state and control constraints with parametric uncertainty; formulate optimal control problems, solve as nonlinear programming problems using available solvers; requires background in control theory.
Prerequisites: Graduate classification and AERO 623 or comparable course.
AERO 632 Design of Advanced Flight Control Systems - Theory and Application
Credits 3.3 Lecture Hours.
Modeling, analysis, design and implementation of advanced flight control problems, specifically aerospace engineering applications; includes choice of controlled variables, reduction of controlled variables, design methodology, computational framework, implementation issues, and software environments using various toolboxes.
Prerequisites: Graduate classification and approval of instructor.

AERO 633 Advanced Aerospace Multibody Dynamics
Credits 3.3 Lecture Hours.
Techniques for modeling, simulation, and analyzing multibody dynamical systems; includes development of kinematic expressions for articulating bodies, adding and constraining degrees of freedom through mappings; familiarization with industry codes, such as DISCOS; appreciation of learned techniques on various systems, including omni-directional vehicles, Stewart platforms, and gyroscopically-stabilized walking robots.
Prerequisites: AERO 622 or graduate classification and approval of instructor.

AERO 640 Turbulence Processes
Credits 3.3 Lecture Hours.
Fundamentals of conservation, Lagrangian, transformation, variance properties; flow features: laminar, transition, turbulence regimes, characteristics, spectrum; statistical (filter/average) description: scales, Reynolds, arbitrary averaging, realizability; elementary turbulence processes: viscous, advective/inertial, role of pressure; elementary process models, viscous RDT, RDT for velocity gradients, equipartion of energy, restricted Euler equations; isotropic, homogeneous turbulence. May be taken 2 times for credit.

AERO 641 High-Speed Combustion for Propulsion
Credits 3.3 Lecture Hours.
Study topics in combustion relevant to high-speed subsonic/supersonic air-breathing propulsion; emphasis on the structure of detonations and the operation of combustors under supersonic conditions; structure of shock-waves and the mixing/chemical kinetics that take place in high speeds.
Prerequisite: Graduate classification.

AERO 642 Laser Diagnostics for Combustion and Propulsion
Credits 3.3 Lecture Hours.
Laser diagnostics topics as applied to combustion and propulsion: brief exposition of fundamental electromagnetic theory; practice of basic experimental laser techniques used to measure thermochemistry; basic implementation of Raman and Rayleigh scatterings; Laser-Induced Fluorescence (LIF); detection methods, optical systems, noise contributions, and signal enhancement techniques will be discussed.
Prerequisite: Graduate classification.

AERO 643 High-Performance Computational Fluid Dynamics
Credits 3.3 Lecture Hours.
Numerical simulations of fluid dynamics problems on massively parallel computers; focus on Direct Numerical Simulations (DNS) where all dynamically relevant scales are resolved; elements of both high-performance computing (HPC) and numerical methods to solve incompressive and compressible flows.
Prerequisite: AERO 615 or approval of instructor.

AERO 645/MSEN 645 Failure Mechanics of Engineering Materials
Credits 3.3 Lecture Hours.
Introduction and integration of key experimental, theoretical and computational aspects of failure in engineering materials, including metals, alloys and polymers; brittle fracture, ductile fracture and brittle-to-ductile transitions.
Prerequisites: Graduate classification; MSEN 601.
Cross Listing: MSEN 645/AERO 645.

AERO 649/MEMA 649 Generalized Finite Element Methods
Credits 3.3 Lecture Hours.
Systemic introduction to the theory and practice of generalized finite element (FE) methods, including GFEM, the hp-cloud method, particle methods, and various meshless methods with similar character; precise formulation of the methods are presented; known theoretical results for convergence; important issues related to implementation, issues of numerical integration.
Prerequisite: Graduate classification.
Cross Listing: MEMA 649/AERO 649.

AERO 650 Spacecraft Attitude Determination
Credits 3.3 Lecture Hours.
Spacecraft attitude determination systems; attitude and error parameterizations, attitude sensors, data processing and calibration; introduction to single- and three-axis attitude determination and to optimal attitude and error estimation: ECI motion and time definitions.
Prerequisite: AERO 423 or equivalent.

AERO 651 Human Spaceflight Operations
Credits 3.3 Lecture Hours.
Essential aspects of human spaceflight operations as performed NASA; in-depth understanding of the state-of-the-art in spacecraft operations, including spacecraft systems, ground and launch operations, mission management and on-orbit activities such as science, robotics, spacewalking, and human health maintenance; applications to future space systems.
Prerequisite: Graduate classification.

AERO 655 Helicopter Aerodynamics
Credits 3.3 Lecture Hours.
Hovering theory, hovering and vertical flight performance, factors affecting hovering and vertical flight performance, auto-rotation in vertical descent, concepts of blade motion and control, aerodynamics of forward flight, forward flight performance, operational envelope and introduction to conceptual design of helicopters.
Prerequisites: Grade of C or better in AERO 222, AERO 301, and AERO 310; graduate classification.

AERO 660 Nonlinear Flight Dynamics
Credits 3.3 Lecture Hours.
Nonlinear equations of motion for coupled aircraft motions; coupled aerodynamic phenomena; application of the direct method of Lyapunov to nonlinear aircraft motions; elastic airplane equations of motion.
Prerequisite: AERO 421 or approval of instructor.

AERO 661 Optical Methods in Aerospace Engineering
Credits 3.3 Lecture Hours.
Analysis and design of imaging and interferometric instruments for flight in and above the atmosphere and ground-based observation of orbiting objects; assessment of optical component and system performance.
Prerequisite: Graduate classification.
AERO 670 Turbulence Modeling
Credits 3. 3 Lecture Hours.
Identification of physical features that render Navier-Stokes equation difficult to compute or model; includes Reynolds-averaged and filtered Navier-Stokes equations for unresolved stresses; development of closure models for pressure-strain correlation, dissipation and turbulent transport Reynolds; algebraic Reynolds stress modeling. Large Eddy Simulations (LES) and hybrid methods; validation and prediction studies.
Prerequisites: AERO 640 and graduate classification or approval of instructor.

AERO 672 Perturbation Methods in Mechanics
Credits 3. 3 Lecture Hours.
Develop approximate solutions to algebraic, differential, and integral equations; analysis of nonlinear oscillations, nonlinear waves, and boundary-layers; emphasis on combined numerical/perturbations techniques and reducing Partial Differential Equation (PDE) to Ordinary Differential Equation (ODE).
Prerequisites: Graduate classification in aerospace, mechanical or civil engineering.

AERO 673 Boundary Layer Stability and Transition
Credits 3. 3 Lecture Hours.
Analytical, numerical, and experimental methods for the stability of bounded shear flows; includes techniques for estimating transition to turbulence and the control of transition through laminar flow control.
Prerequisites: Graduate classification and AERO 601, 602, or 603 or approval of instructor.

AERO 674 Hypersonic Flow
Credits 3. 3 Lecture Hours.
Theoretical formulation of hypersonic flow theory; techniques for hypersonic flowfield analysis; high temperature effects, including both equilibrium and nonequilibrium flows; classical and modern computational methods.
Prerequisite: AERO 303 or equivalent.

AERO 676 Aerothermochemistry
Credits 3. 3 Lecture Hours.
Fundamentals of kinetic theory, chemical thermodynamics and statistical mechanics; applications to high temperature chemically reacting equilibrium and nonequilibrium aerodynamic flows.
Prerequisite: AERO 303 or equivalent.

AERO 681 Seminar
Credit 1. 1 Lecture Hour.
Selected research topics presented by the faculty, students and outside speakers.
Prerequisite: Graduate classification.

AERO 684 Professional Internship
Credits 1 to 4. 1 to 4 Other Hours.
Engineering research and design experience at government or industry facilities away from the Texas A&M campus; design projects supervised by faculty coordinators and personnel at these locations; projects selected to match student's area of specialization.
Prerequisites: Graduate classification and approval of committee chair and department head.

AERO 685 Directed Studies
Credits 1 to 12. 1 to 12 Other Hours.
Special topics not within scope of thesis research and not covered by other formal courses.
Prerequisite: Graduate classification in aerospace engineering.

AERO 689 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Selected topics in an identified area of aerospace engineering. May be repeated for credit.
Prerequisite: Approval of instructor.

AERO 691 Research
Credits 1 to 23. 1 to 23 Other Hours.
Technical research projects approved by department head.

AFST - Africana Studies

AFST 601 Methods of Inquiry Into Africana Studies
Credits 3. 3 Lecture Hours.
Familiarization with the methodological tradition of African-centered thinking and its relationship to the more popular term Afro-centricity; representation of the thoughts of notable African centered and Afrocentric scholars throughout history as a means to center African descended people throughout history, social analysis and theoretical accounts.
Prerequisite: Graduate classification.

AFST 651/PSYC 651 Cultural Psychology
Credits 3. 3 Lecture Hours.
Surveys key readings in the field of cultural psychology; discussion and examination of relationship between psychological processes (e.g., motivation, memory, self perception, prejudice) and sociocultural contexts.
Prerequisites: Enrollment in a graduate program or approval of instructor.
Cross Listing: PSYC 651/AFST 651.

AFST 685 Directed Studies
Credits 1 to 4. 1 to 4 Other Hours.
Directed individual study of problems in the Africana Studies field of research or scholarly activity not pertaining to thesis or dissertation, or selected instruction not covered by other courses.
Prerequisites: Approval of instructor and program director; graduate classification.

AFST 689 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours. 0 to 4 Lab Hours.
Selected topics in an identified area of Africana Studies.
Prerequisite: Graduate classification.

AGEC - Agricultural Economics

AGEC 601 Commodity Futures and Options Markets
Credits 3. 3 Lecture Hours.
Price risk management using agricultural commodity futures and options markets, theories of hedging and formulation of optimal hedging strategies, applied hedging strategies evaluated with emphasis on options relative to futures.
Prerequisites: One course in calculus and one course in statistics.

AGEC 603 Land Economics
Credits 3. 3 Lecture Hours.
Application of economic, financial, legal and related concepts and tools for decision making in land management, real estate development and appraisal of land and attendant resources; public and private property rights and current land and resource management issues emphasized; real estate valuation methods and use of electronic information systems studied.
Prerequisite: AGEC 422 or equivalent.
AGEC 604/PSAA 663 Natural Resource Economics
Credits 3. 3 Lecture Hours.
Critical evaluation of policies and procedures in natural resource development and use; identification of problems in resource development, the political-economic decision-making processes and analytical tools which can contribute to economic decisions.
Prerequisite: ECON 323.
Cross Listing: PSAA 663/AGEC 604.

AGEC 605 Rural Real Estate Appraisal and Organization
Credits 3. 3 Lecture Hours.
Concepts of property rights and their valuation; factors affecting the value of these rights are related to general economic theory to explain real estate market process; specific applications of appraisal techniques in valuing urban and rural real properties.
Prerequisite: AGEC 422.

AGEC 606 Water Resource Economics
Credits 3. 3 Lecture Hours.
Examination of economic concepts and tools contributing to the solution of water scarcity problems; development of working knowledge of water resource economics; policy options established and explored; analytical tools for performing policy and project assessment introduced and applied.
Prerequisite: MATH 142.

AGEC 607 Research Methodology
Credits 3. 3 Lecture Hours.
Scientific method in economic research: problem identification and selection, hypothesis testing, assumptions, model selection, data communication; evaluation of research studies and development of thesis prospectus or equivalent.
Prerequisite: MS or PhD graduate classification.

AGEC 608 Economics of Foreign Intervention, Conflict, and Development
Credits 3. 3 Lecture Hours.
Economic models of conflict and development, socio-political models of conflict; conflict and vulnerable groups; advanced quantitative tools and methods in conflict and development research; interaction between poverty, natural resources and conflict in developing countries; role of multilateral, bilateral and strategic stakeholders in conflict resolution and economic development.

AGEC 610 Economics of Biosecurity
Credits 3. 3 Lecture Hours.
Economic and policy issues involved with decision making under risk of accidental or deliberate events of agricultural threats involved with animal diseases, food contamination, invasive species, infrastructure disruption, etc.; issues regarding assessments of damages, vulnerability and decision making regarding prevention, detection, response, and recovery.
Prerequisite: Graduate classification.

AGEC 613 International Agricultural Development Policy
Credits 3. 3 Lecture Hours.
Utilizes real-world examples depicting environments of international development institutions and programs concerning water management, gender, climate change agricultural extension, value chains, agricultural finance and many other issues in developing countries, with emphasis on smallholder agriculture; capstone for the certificate in International Agriculture and Nature Resource Management but available to other majors.
Prerequisites: AGEC 422, AGEC 430, AGEC 452, AGEC 604/PSAA 663, AGEC 606, or other equivalent macroeconomic course.

AGEC 614 Global Food and Agribusiness Policy
Credits 3. 3 Lecture Hours.
Public policies and programs affecting agriculture and agribusiness; development of policies and programs, identifying relevant issues, reviewing means to attain desired goals, and development of methods to evaluate the consequences of alternative farm policies on U.S. agriculture, agribusiness, trade and resources.
Prerequisites: AGEC 619 or ECON 607 and MATH 142.

AGEC 619 Managerial Economics in Agribusiness
Credits 3. 3 Lecture Hours.
Practical application of operational and strategic decision-making tools to agribusiness, focusing on important managerial and economic principles and understanding needed to carry out these functions.
Prerequisites: ECON 323, MATH 142 and STAT 303.

AGEC 620 Food Security, Climate and Conflict
Credits 3. 3 Lecture Hours.
Economic models of food production and consumption in conflict regimes; the micro-economics of violence; the dynamic relationships of climate and agricultural production; potential impacts of climate change on food and socio-political security; food security among insurgent groups; conflict resistant food systems; and the shifting relationships between poor and rich nations in relationship to climate, food and conflict.
Prerequisite: ECON 323 or equivalent, or approval of instructor.

AGEC 621 Econometrics for Agribusiness
Credits 3. 3 Lecture Hours.
Econometric application and practice; analysis and interpretation of economic data for decision making and microcomputer implementation.
Prerequisites: MATH 142; STAT 303; corequisite: ECON 323; ECON 311 or AGEC 430.

AGEC 622 Agribusiness Analysis and Forecasting
Credits 3. 3 Lecture Hours.
Design, construction, use and evaluation of simulation, forecasting and optimization models to solve applied problems confronting decision makers in agribusiness.
Prerequisite: AGEC 621 or approval of instructor.

AGEC 625 Environment of Agribusiness
Credits 3. 3 Lecture Hours.
Analysis of the economic, social, political, technological and legal forces that impact the way in which global agribusiness firms compete; emphasis on intensive case study analysis.
Prerequisites: AGEC 619 and AGEC 621.

AGEC 629 Strategic Agribusiness Management
Credits 3. 3 Lecture Hours.
Practical application of operational and strategic decision-making tools to agribusiness; emphasis on problem recognition and economic analysis related to production, marketing and finance decisions facing agribusiness firms.
Prerequisites: AGEC 619, AGEC 621 and AGEC 625.

AGEC 630 Financial Analysis for Agribusiness Firms
Credits 3. 3 Lecture Hours.
Application of financial planning and analysis to agribusiness firms; capital budgeting and selection of investments; the role of debt structure and liquidity in firm growth and stability; alternatives for gaining control over financial resources, managing risk and maintaining business efficiency over time.
Prerequisites: ACCT 640 and FINC 635.
AGEC 633 Sustainability in World Development
Credits 3. 3 Lecture Hours.
Economic development defined; economic structure, economic efficiency, equity, conservation and role of sustainability, characteristics of developing countries; problems facing development planners, policy makers, resource managers; role of local, regional and international institutions, policies, civil society, biodiversity, and climate change; economic foundation of project development, design, financing, and implementation issues.
Prerequisites: ECON 607 or equivalent.

AGEC 634 Rural Financial Markets and Financial Planning
Credits 3. 3 Lecture Hours.
Organization, structure, conduct, and regulation of lending institutions serving commercial agriculture and rural borrowers; financial statement analysis; cash management; investment planning; loan portfolio analysis; management of the lending function of lenders serving rural businesses.
Prerequisite: Graduate classification.

AGEC 636 Agribusiness Markets and Applied Welfare Analysis
Credits 3. 3 Lecture Hours.
Theory and practice of consumer and firm behavior in markets; the effects of various policies on markets; welfare measurement applied to problems related to the farm economy; food and resource processing; resource allocations decisions.
Prerequisites: AGEC 635 and 661; ECMT 676; ECON 629 and ECON 630.

AGEC 637 Production Economics and Dynamic Optimization in Agricultural Economics
Credits 3. 3 Lecture Hours.
Production under certainty and uncertainty with emphasis on agribusiness firm behavior; economic theory and analytical and numerical methods related to dynamic optimization problems.
Prerequisites: AGEC 661; ECMT 676; ECON 629 and ECON 630.

AGEC 638 Managerial Economics for Regulatory Science
Credits 3. 3 Lecture Hours.
Economic and business frameworks within which the regulations and standards governing the production of food operate; economic theories of the firm and fundamental calculations in finance as the foundation for cost/benefit analyses of existing and proposed regulations; applications to U.S. and global regulations and standards.

AGEC 639/SCSC 635 Comparative Global Standards in Food Systems
Credits 3. 3 Lecture Hours.
Laws, regulations and standards governing the production, distribution, processing and marketing of food across regions of the world; international standard setting bodies and risk assessment committees; regulatory equivalency and harmonization; product approval procedures; cost/benefits of global standards and trade agreements.
Cross Listing: SCSC 635/AGEC 639.

AGEC 641 Operations Research Methods in Agricultural Economics
Credits 3. 3 Lecture Hours.
Theory and practice regarding the application of operations research tools to agricultural economics problem areas. Mainly concentrates on optimization approaches.
Prerequisite: AGEC 622.

AGEC 642 Dynamic Optimization in Agricultural and Applied Economics
Credits 3. 3 Lecture Hours.
Economics of problems of dynamic optimization, focusing on numerical and analytical methods; applications in a wide range of issues related to agricultural and applied economics are considered.
Prerequisites: ECON 629 or approval of instructor.

AGEC 643 Applied Simulation in Agricultural Economics
Credits 3. 3 Lecture Hours.
Design, construction, validation and use of Monte Carlo simulation models for risk analysis of economic systems; parameter estimation and simulation of multivariate probability distributions in econometric and behavioral models used for business and policy analysis under risk.
Prerequisites: AGEC 622 and AGEC 661 or approval of instructor.

AGEC 645
Credits 3. 3 Lecture Hours.

AGEC 652 International Agribusiness Trade Analysis
Credits 3. 3 Lecture Hours.
Traditional trade theory encompassing the concepts of comparative advantage, the Hecksher-Olin-Samuelson model, the gain from specialization and trade, partial equilibrium analysis of free trade, violation of the free trade model, welfare effects of trade, trade creation and diversion, introduction to growth and development theories, the relationship between trade and development and related concepts.
Prerequisites: ECON 607 and MATH 142.

AGEC 659 Ecological Economics
Credits 3. 3 Lecture Hours.
Study of the relationships between ecosystems and economic systems; understanding the effects of human economic endeavors on ecological systems and how the ecological benefits and costs of such activities can be quantified and internalized.
Prerequisite: Graduate classification.
Cross Listing: ESSM 671 and RENR 689.

AGEC 661 Applied Econometric Methods in Agriculture and Resources I
Credits 3. 3 Lecture Hours.
Application of econometric methods in a theoretical framework for the analysis of agricultural markets and farm firm behavior; emphasis on specifying and estimating agricultural production and demand functions and agricultural sector models; selected topics according to student needs.
Prerequisite: ECMT 676.

AGEC 662 Applied Econometric Methods in Agriculture and Resources II
Credits 3. 3 Lecture Hours.
Familiarization with theory and econometric techniques frequently used in applied microeconomic research with emphasis on specification, estimation, interpretation and evaluation of these models.
Prerequisites: ECON 629 and AGEC 661.

AGEC 671 Fundamentals in Agribusiness and Managerial Economics
Credits 3. 3 Lecture Hours.
Economic theory and methods for analyzing operational and strategic problems facing managers of food, fiber and resource businesses; financial, marketing and management topics, including principal-agent, bargaining power, contract theory and business forecasting.
Prerequisites: ECON 629 and ECON 630.

AGEC 672 Fundamentals in Agricultural Markets and Information Economics
Credits 3. 3 Lecture Hours.
Application of information economics theory for analysis of vertical and horizontal relationships between firms along the supply chain.
Prerequisites: AGEC 636 and 661; ECMT 676; ECON 629 and ECON 630.
AGEC 673 Fundamentals in Resource and Environmental Economics
Credits 3.3 Lecture Hours.
Economic theories and empirical regularities related to the use and management of the environment and natural resources; valuation techniques, externalities, and intertemporal resource management. 
Prerequisites: AGEC 635, AGEC 636, AGEC 637; ECON 629 and ECON 630.

AGEC 674 Food and Agricultural Trade and Policy Analysis
Credits 3.3 Lecture Hours.
Trade policy, farm policy, macroeconomic policy, resource policy and development policy; analysis of policy impacts outside perfect competition and free trade assumptions. 
Prerequisites: AGEC 614 and AGEC 652 or approval of instructor.

AGEC 676 Frontiers in Markets and Information Economics
Credits 3.3 Lecture Hours.
Exploration of advanced topics in the field of markets and information economics. May be taken twice for credit. 
Prerequisite: Graduate classification.

AGEC 677 Frontiers in Natural Resource and Environmental Economics
Credits 3.3 Lecture Hours.
Exploration of advanced topics in the field of natural resource and environmental economics. May be taken twice for credit. 
Prerequisite: Graduate classification.

AGEC 681 Seminar
Credit 1.1 Lecture Hour.
Objectives are to define research problems, develop research problem statements with objectives and hypothesis and specify relevant models to accomplish the objectives and develop the skills in written communication.

AGEC 684 Professional Internship
Credits 1 to 3.1 to 3 Other Hours. 
Pre-professional experience within department guidelines conducted in the area of the student’s field of interest. 
Prerequisite: Graduate classification.

AGEC 685 Directed Studies
Credits 1 to 4.1 to 4 Other Hours. 
Directed individual study of a selected problem in the field of agricultural economics.

AGEC 689 Special Topics in...
Credits 1 to 4.1 to 4 Lecture Hours. 
Selected topics in an identified area of agricultural economics. May be repeated for credit.

AGEC 691 Research
Credits 1 to 23.1 to 23 Other Hours. 
Thesis or dissertation research.

AGEC 693 Professional Study
Credits 1 to 9.1 to 9 Other Hours. 
Professional paper undertaken as a requirement for the Master of Science Non-Thesis or as an elective for the Master of Agribusiness. May be taken more than once, but not to exceed 3 hours of credit towards a degree. 
Prerequisite: Approval of instructor.

AGEC 695 Frontiers in Agribusiness and Managerial Economics
Credits 3.3 Lecture Hours. 
Exploration of advanced topics in the field of agribusiness and managerial economics. May be taken two times for credit. 
Prerequisite: Graduate classification.

AGLS - Ag. & Life Sciences

AGLS 600 Agriculture and Life Sciences Graduate Study Abroad
Credits 1 to 18.1 to 18 Other Hours. 
Approved study abroad student participation; reciprocal educational exchange programs. May be taken two times for credit. 
Prerequisite: Admission to approved program.

AGLS 689 Special Topics in...
Credits 1 to 4.1 to 4 Lecture Hours. 
Selected topics in an identified area of agriculture and life science. May be repeated for credit. 
Prerequisites: Graduate classification and approval of instructor.

ALEC - Ag Leadershp, Ed. & Comm

ALEC 601 Advanced Methods in Agricultural Education
Credits 3.3 Lecture Hours. 
Learning theories; techniques and procedures to enhance the teaching-learning process; methods to evaluate learning. 
Prerequisite: Graduate Classification.

ALEC 602 Advanced Instructional Design in Agricultural Science
Credits 3.3 Lecture Hours. 
Designing instruction to meet learning outcomes, motivate students, and evaluate objectives; learning theories and their impact on the teaching and learning process; choosing appropriate teaching methods for specific content; evaluating the teaching-learning process for improvement within the context of secondary agricultural science classrooms.

ALEC 603 Experiential Learning
Credits 3.3 Lecture Hours. 
Theory and practice in facilitating learning from experiences in formal, informal, and non-formal settings; experiential learning in classroom/laboratory settings, guided inquiry, internships/externships, service learning, project-based learning, and outdoor/adventure learning. 
Prerequisite: Graduate classification.

ALEC 604 Writing for Professional Publication
Credits 3.3 Lecture Hours. 
Provides students in Agricultural and Extension Education with the skills necessary to compose research manuscripts, conference papers, and journal articles. 
Prerequisites: Graduate classification.

ALEC 605 Facilitating Complete Secondary Agricultural Science Programs
Credits 3.3 Lecture Hours. 
Theory and practice in facilitating secondary agricultural science programs that include classroom instruction, supervised experience, and youth leadership development. Designed for students preparing to teach agricultural science in Texas public schools. 
Prerequisite: Graduate classification.

ALEC 606 Foundations of Leadership Theory
Credits 3.3 Lecture Hours. 
Theory and Practice of leadership theory foundational to leadership education. Focus on analysis of leadership theories and models; synthesis of leadership theory as a philosophy; and application of leadership theories in various professional settings. 
Prerequisite: Graduate classification.
ALEC 607 Youth Leadership Programs
Credits 3.3 Lecture Hours.
Methods and procedures of organizing and conducting youth leadership programs in school and non-school settings.
Prerequisite: Graduate classification.

ALEC 608 Leadership of Volunteers
Credits 3.3 Lecture Hours.
Models of volunteerism; reasons for volunteers; assessment and evaluation techniques; task descriptions; organizational relationships.
Prerequisite: Graduate classification.

ALEC 609 Learning Organizations
Credits 3.3 Lecture Hours.
Theory of instruction to support education in social systems language and archetypes; systems thinking theory including mental models; mastery, team learning, concept models of human organizations.
Prerequisites: Graduate classification.

ALEC 610 Principles of Adult Education
Credits 3.3 Lecture Hours.
Identification of basic principles motivating adults to learn. Procedures to implement these principles in bringing about changes in adult behavior.
Prerequisite: Graduate classification.

ALEC 611 Advanced Methods in Distance Education
Credits 3.3 Lecture Hours.
Course design theory for synchronous and asynchronous instructional methodology; teaching and training models for distance education.
Prerequisite: Graduate classification.

ALEC 612 Advanced Instructional Design for Online Learning
Credits 3.3 Lecture Hours.
Emphasis on applying learning and teaching theory as the foundation for developing engaging online instruction; designed to pull together theory, concepts, and strategies for a broad understanding of the fundamentals of online learning from the conceptual stage to the development and delivery stages.
Prerequisites: Graduate classification.

ALEC 613 Techniques in eLearning Development and Delivery
Credits 3.3 Lecture Hours.
Provides the knowledge and skills necessary to develop and deliver effective online courses, training programs, and learning units; specific topics include: management of eLearning projects, needs assessment and audience analysis, creation and editing of documents, images, audio, and video.
Prerequisites: Graduate classification.

ALEC 615 Philosophy of Agricultural Education
Credits 3.3 Lecture Hours.
Historical and philosophical developments in education that brought about education in agriculture; ideas of individuals that culminated in agricultural education institutions and organizations.
Prerequisite: Graduate Classification.

ALEC 616 Facilitation of Leadership Programs
Credits 3.3 Lecture Hours.
Investigate models to design leadership education programs; incorporate strategies to enhance the leadership education process; critically analyze leadership education research and group leadership education processes.
Prerequisite: Graduate classification.

ALEC 617 Leadership in Organizational Culture and Ethics
Credits 3.3 Lecture Hours.
Integration of organizational culture and ethical theories; implications and role of leaders in organizational culture and ethical situations; critical analysis of organizational culture and ethics in agricultural organizations.
Prerequisite: Graduate classification.

ALEC 620 Instrumentation and Survey Research Methods
Credits 3.3 Lecture Hours.
Principles, theories, techniques, and applications for developing survey questionnaires and conducting survey research in agriculture; developing questions; constructing instruments; implementing surveys; and reducing coverage and sampling errors.
Prerequisite: Graduate classification.

ALEC 622 Data Collection, Analysis, and Interpretation in Research in ALEC
Credits 3.3 Lecture Hours.
Data Collection, Analysis, and Interpretation in Research in Agricultural Leadership, Education, and Communications. Principles and techniques of data collection, analysis, and interpretation in agricultural leadership, education, and communications; interpretation and implications of findings/results in relation to current research; data analysis performed using statistical package software; collection, analysis, and interpretation to conform to published research in agricultural leadership, education, and communications.
Prerequisite: Research methods and basic statistics courses; graduate classification.

ALEC 623 Survey of Evaluation Strategies for Agriculture
Credits 3.3 Lecture Hours.
Designed to pull together theory, concepts, and strategies to give a broad understanding of the fundamentals of evaluation and to provide the knowledge and skills necessary to design and administer appropriate and effective evaluations.
Prerequisite: Graduate classification.

ALEC 624 Developing Funded Research Projects
Credits 3.3 Lecture Hours.
Students team with faculty mentor to develop a proposal for external funding from a federal agency; principles discussed to produce competitive proposals; proposal steps adapted to fit interests of the students and faculty.
Prerequisite: Graduate classification.

ALEC 625 Program Evaluation and Organizational Accountability
Credits 3.3 Lecture Hours.
Examines the philosophy, methods, and issues of accountability and evaluation necessary to meet expectations of institutional mandates. Special emphasis on analytical tools and performance measures.
Prerequisite: Graduate classification.

ALEC 630 Guidance and Counseling for Rural Youth
Credits 3.3 Lecture Hours.
Problems of youth with special attention given to rural youth; theories of vocational development reviewed and techniques and procedures developed to help youth make career choices.
Prerequisite: Graduate classification.
ALEC 631 Development and Planning of Community Education Programs
Credits 3. 3 Lecture Hours.
Focuses on the principles, theories, techniques, and applications for developing and planning educational programs in a community setting; program development strategies, focusing educational programming in relation to issues identified citizens will be developed and enhanced in this course.
Prerequisite: Graduate classification.

ALEC 640 Methods of Technological Change
Credits 3. 3 Lecture Hours.
Dynamics of cultural change as theoretical framework for planned technological change; methods of planning and implementing change, its effects and how it can be predicted.
Prerequisite: Graduate classification.

ALEC 644 The Agricultural Advisor in Developing Nations
Credits 3. 3 Lecture Hours.
Trends, conditions, critical incidents, techniques, roles and preparation affecting the success of persons desiring to provide technical assistance in projects of agricultural development by serving as agricultural advisors in developing nations, especially in cross-cultural settings.
Prerequisite: Graduate classification.

ALEC 645 Initiating, Managing and Monitoring Projects of International Agricultural Development
Credits 3. 3 Lecture Hours.
Origin of projects in agricultural development involving host governments; procedures in developing contracts with sponsors; duties and responsibilities of contract administrators, project leaders and the home institution; reporting systems, project reviews and evaluation procedures; procedures effective in managing projects.
Prerequisite: Graduate classification.

ALEC 646 Institutions Serving Agriculture in Developing Nations
Credits 3. 3 Lecture Hours.
Comparisons among programs and functions, strengths and weaknesses, organization, and relationships of institutions and agencies in public sectors serving agriculture in developing nations; includes those responsible for agricultural extension, agricultural research, agrarian reform, price stabilization, agricultural credit and agricultural cooperatives.
Prerequisite: Graduate classification.

ALEC 652 Images of Agriculture: Visual Communication Research
Credits 3. 3 Lecture Hours.
Explore visual communication from theoretical, physiological, and interpretive perspectives as it applies to media images used to depict agriculture and agricultural issues; current research in visual communication and its application to agriculture; use of visual images in agricultural communication research.
Prerequisite: ALEC 695 or introductory research methods.

ALEC 684 Professional Internship
Credits 1 to 6. 1 to 6 Other Hours.
On-the-job supervised experience program conducted in the area of the student’s specialization.
Prerequisites: Graduate classification.
ANES - Clinical Anesthesiology

ANES 801 Clinical Anesthesiology
Credits 1.25 to 10.
This 2- or 4-week elective will introduce the student to the practice of anesthesiology.
Prerequisite: Satisfactory completion of year three of the medical school curriculum.

ANES 802 Clinical Anesthesiology
Credits 1.25 to 10.
This 2- or 4-week elective will: 1) Provide an introductory experience in the practice of anesthesiology. All work will be under the supervision of a senior staff anesthesiologist or a resident. 2) Familiarize the student with the pharmacology and practical utilization of common general and local anesthetic agents. 3) Introduce the student to the preoperative evaluation, anesthetic management and post-op care of patients. 4) Teach the practical essentials of airway management including endotracheal intubation. 5) Teach the practical essentials of fluid and transfusion therapy. 6) Present the management concepts of patients requiring postoperative mechanical ventilation and specialized respiratory care. 7) Provide experience in arterial blood gas sampling, analysis, and interpretation.
Prerequisite: Satisfactory completion of year three of the medical school curriculum.

ANES 803 Clinical Anesthesiology
Credits 1.25 to 10.
This 4-week elective provides an introductory experience in the practice of anesthesiology.
Prerequisite: Satisfactory completion of year three of the medical school curriculum.

ANES 804 Clinical Anesthesiology
Credits 1.25 to 10.
This 4-week elective is designed for the students receive an introductory experience in the practice of anesthesiology under the supervision of faculty. Students will become familiar with the pharmacology and practice utilization of common general and local anesthetic agents, as well as, be introduced to the preoperative evaluation, anesthetic management and post-op care of patients.
Prerequisite: Satisfactory completion of year three of the medical school curriculum.

ANES 805 Obstetric Anesthesiology
Credits 1.25 to 10. 1.25 to 10 Other Hours.
This 2- or 4-week elective will provide the student with increasing responsibility for assessing and anesthetic planning for parturients admitted to labor and delivery. Students will become familiar with anesthetic agents used in obstetrics, managing anesthetic complications in obstetrics. This elective will also allow student to perform endotracheal intubations in the main operating room and start intravenous lines in Day Surgery.
Prerequisite: Satisfactory completion of year three of the medical school curriculum.

ANES 806 Clinical Anesthesiology
Credits 1.25 to 10. 1.25 to 10 Other Hours.
This 4-week elective will provide the student with an introduction to the scope and practice of Anesthesiology with emphasis on the multiple and varied roles performed by anesthesiologists in modern healthcare. Students will become familiar with study of Anesthesiology so as to enable a practical understanding of the principles of modern anesthesia care as they relate to a variety of clinical situations.
Prerequisite: Satisfactory completion of year three of the medical school curriculum.

ANES 807 Pain Clinic
Credits 1.25 to 10. 1.25 to 10 Other Hours.
This 4-week elective is designed to teach a broad spectrum of chronic pain conditions including, but not limited to, common causes of low back pain, thoracic pain, cervical pain, hip pain, shoulder pain, and neuropathic pain. It will increase the student’s familiarity and knowledge with the use of indications for common interventional management options for the above conditions.
Prerequisite: Satisfactory completion of year three of the medical school curriculum.

ANES 808 Anesthesiology
Credits 1.25 to 10. 1.25 to 10 Other Hours.
This 2- or 4-week elective will provide the student with an introductory experience in the practice of anesthesiology under the supervision of faculty. Student will become familiar with the pharmacology and practice utilization of common general and local anesthetic agents as well as be introduced to the preoperative evaluation, anesthetic management and post-op care of patients.
Prerequisite: Satisfactory completion of year three of the medical school curriculum.

ANES 809 Anesthesiology
Credits 1.25 to 10. 1.25 to 10 Other Hours.
This 2- or 4-week elective will provide the student with an introductory experience in the practice of anesthesiology under the supervision of faculty. Students will become familiar with the pharmacology and practice utilization of common general and local anesthetic agents, used in the practice of anesthesiology. This elective will also allow students to demonstrate basic airway management techniques, including airway evaluation, mask ventilation and direct laryngoscopy.
Prerequisite: Satisfactory completion of year three of the medical school curriculum.

ANES 809 Off Campus Student Initiated Elective
Credits 1.25 to 15. 1.25 to 15 Other Hours.
Formally described elective courses at another medical school or off-campus opportunities that are not formally approved electives. The College of Medicine requires that each of these electives be approved prior to the rotation.

ANES 999 On Campus Student Initiated Elective
Credits 1.25 to 12. 1.25 to 12 Other Hours.
This is an on-campus opportunity in the department of Anesthesiology in the College of Medicine that is not defined herein. Experiences may include clinical research, basic science research, library research, other basic science activities, and other clinical activities. Students interested in developing an elective of this type should contact the head of the appropriate department for additional details.
ANSC - Animal Science

ANSC 601/NFSC 601 General Animal Nutrition
Credits 3. 3 Lecture Hours.
Comparative nutrition of animal species contrasting digestive, metabolic and physiological functions involved in processing and using nutrients. 
Prerequisite: ANSC 303/NFSC 303 or ANSC 318 or equivalent.
Cross Listing: NFSC 601/ANSC 601.

ANSC 602/NFSC 602 Energetics of Metabolism and Growth
Credits 3. 3 Lecture Hours.
Current fundamental concepts in protein and energy metabolism relating to nutrients required for maintenance, growth and development of animals.
Prerequisite: BICH 410 or approval of instructor.
Cross Listing: NFSC 602/ANSC 602.

ANSC 604 Ruminant Nutrition
Credits 3. 3 Lecture Hours.
Current concepts in anatomy, physiology of digestion and metabolism in ruminant nutrition and their relationships to nutrition practice and research with emphasis on ruminants.
Prerequisites: ANSC 601/NFSC 601 or ANSC 602/NFSC 602; BICH 411 or BICH 603 and/or approval of department head.

ANSC 605 Advancements in Beef Cattle Production
Credits 3. 3 Lecture Hours.
Current knowledge and concepts in production of lean beef; review of research in beef cattle production, breeding, nutrition, reproduction and economics.
Prerequisites: ANSC 305, ANSC 318 and ANSC 406 or approval of department head.
ANSC 607/NFSC 607 Physiology and Biochemistry of Muscle as a Food
Credits 3. 3 Lecture Hours.
Biochemical, histological, anatomical and physical characteristics of muscle cells and factors associated with transformation of muscle cells into meat.
Prerequisite: BICH 410 or approval of department head.

ANSC 611 Equine Nutrition
Credits 3. 3 Lecture Hours.
Review and evaluation of current research in equine nutrition; principles of digestive physiology and nutrition unique to equine species; comparative digestion; integration of scientific principles into feeding management systems to enhance productivity, health and longevity of the equine. 
Prerequisite: ANSC 601/NFSC 601 or approval of department head.

ANSC 612 Equine Reproduction
Credits 3. 3 Lecture Hours.
Review of current research relating to equine reproductive physiology and endocrinology; concepts from current research in equine reproduction to develop integrated reproductive management systems for horses.
Prerequisites: ANSC 433; graduate classification.

ANSC 613/NFSC 613 Protein Metabolism
Credits 3. 3 Lecture Hours.
Basic concepts and recent advances in protein metabolism in animals with emphasis on physiological and nutritional significances; discussion of protein digestion; absorption of peptides; absorption, synthesis and degradation of amino acids; hormonal and nutritional regulation of protein turnover; determination of protein quality and requirements.
Prerequisite: BICH 411 or BICH 601 or equivalent or approval of instructor.
Cross Listing: NFSC 613/ANSC 613.

ANSC 614/GENE 614 Maximum Likelihood Estimation of Genetics
Credits 3. 3 Lecture Hours.
Theoretical and analytical approaches to the application of maximum likelihood for the estimation of parameters under linear and nonlinear models; single and polygene genetic models including Hardy-Weinberg equilibrium, linkage analysis and quantitative trait loci detection.
Prerequisites: GENE 603; STAT 651 and STAT 652 or STAT 601.
Cross Listing: GENE 614/ANSC 614.

ANSC 615 Brazil: Comparative Ruminant Animal Nutrition
Credits 3. 3 Lecture Hours.
Contrast two scenarios of ruminant production in Brazil; the effects of globalization on the two different production systems.
Prerequisites: ANSC 603 or ANSC 604, or approval of instructor.

ANSC 616 Equine Exercise Science
Credits 3. 3 Lecture Hours.
Review and evaluation of current research in equine exercise science; physical, physiologic and metabolic adaptation to physical training in the horse; bioenergetics; nutritional requirements; problems in the hard-working horse; management and training approaches to delay fatigue in race/performance horses.
Prerequisites: ANSC 420; BICH 411; graduate classification.

ANSC 617/NFSC 617 Experimental Techniques in Meat Science
Credits 3. 1 Lecture Hour. 6 Lab Hours.
Methods used in separating and identifying muscle proteins and fats; techniques for determining postmortem changes of muscle tissue as a result of ante-mortem treatments.
Prerequisites: ANSC 607/NFSC 607; BICH 411.
Cross Listing: NFSC 617/ANSC 617.
ANSC 618/NFSC 618 Lipids and Lipid Metabolism
Credits 3. 3 Lecture Hours.
Chemical nature of various classes of lipids and lipid-derived hormones; absorption and metabolism of fatty-acids and lipids; regulation of lipid biosynthesis and obesity; relationship between lipid metabolism and cholesterol homeostasis; lipids as hormones.
Prerequisite: BICH 410 or approval of instructor.
Cross Listing: NFSC 618/ANSC 618.

ANSC 619 Physiological Chemistry of Livestock Species
Credits 3. 3 Lecture Hours.
Integration of biochemical concepts with physiological chemistry and intermediary metabolism of livestock species; unique aspects of absorption and cellular metabolism of carbohydrates, lipids and proteins in livestock species; regulation of cellular nutrient metabolism in livestock species.
Prerequisite: BICH 410 or approval of instructor.

ANSC 621 Issues in the Equine Industry
Credits 3. 3 Lecture Hours.
Integration of cumulative knowledge acquired in the equine science curriculum to demonstrate critical thinking and communication skills to address critical issues in the equine industry.
Prerequisite: Approval of instructor or enrollment in master of equine industry management program.

ANSC 622 Research Methods in Animal Science
Credits 2. 2 Lecture Hours.
Development of the conceptual framework of research; study of software programs for data recording, management, and analysis; evaluation of specific experimental designs historically used in animal experiments; discussion of interpretations found in peer-reviewed research publications; data presentation for scientific meetings and publication; the peer review process and publication in technical journals.
Prerequisite: STAT 651; or STAT 652.

ANSC 623/POSC 625 Precision Diet Formula
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Theoretical and applied principles associated with precision feeding and diet formulation to optimize nutrient requirements; optimization using least-cost formulation, ingredient inventory, farm and feed mill management, and nutrient management of non-ruminants (poultry, swine, horse, and fish) and ruminant animals (beef and dairy).
Prerequisite: POSC 411 or ANSC 318.
Cross Listing: POSC 625/ANSC 623.

ANSC 624 Mammalian Developmental Genetics
Credits 3. 3 Lecture Hours.
Genetic control of developmental pathways responsible for pattern formation and morphogenesis in mammals; genetic networks and genome organization; significance of genetic regulatory networks as a source of evolutionary diversity.
Prerequisites: GENE 301 or GENE 320/BIMS 320; BICH 410/411 or equivalent.

ANSC 626/GENE 626 Analyses of Gene Expression
Credits 2. 1 Lecture Hour. 3 Lab Hours.
Proficiency in handling DNA and RNA gained during exercises used routinely in analyses of gene expression; RNA preparation and analysis on Northern blots; in vitro transcription and polyacrylamide gel analysis of nucleic acids; sub-cloning and mRNA quantitation using polymerase chain reaction.
Prerequisites: GENE 450 or approval of instructor; radiation safety training.
Cross Listing: GENE 626/ANSC 626.

ANSC 627 Carcass Composition and Quality
Credits 3. 3 Lecture Hours.
Survey of scientific literature regarding carcass composition; quality and palatability of meat animals; factors that affect differences among animals of the same specie; impact on value and usefulness.
Prerequisite: Graduate classification.

ANSC 628 Animal Breeding
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Concepts from Mendelian, population and quantitative genetics; heritability, selection response, selection criteria, selection index, genetic relationship, inbreeding, mating systems, hybrid vigor and genetic-environmental interaction applied to livestock breeding and to production systems; interactions between genetics and nutrition, reproduction, production and management for both established concepts and recent trends emphasized according to special interests of students.
Prerequisite: ANSC 305 or POSC 414.

ANSC 629 Applied Animal Genomics
Credits 3. 3 Lecture Hours.
Theory and application of genomics by livestock industries; consideration of genetic markers, gene mapping methods, genome analysis and emerging technologies such as microarrays, transgenesis, cloning and marker assisted selection; exposure to bioinformatic tools for genomics.
Prerequisite: GENE 603.
Cross Listing: GENE 629 and POSC 630.

ANSC 630 Reproductive Biology I
Credits 4. 4 Lecture Hours.
Embryological, physiological, hormonal, cellular and molecular mechanisms involving the endocrine and reproductive systems of mammals; emphasis on domestic livestock, rodents and humans; current theories evaluated and discussed using information from recent scientific publications.
Prerequisites: ANSC 433; BICH 411 or equivalent.

ANSC 631 Reproductive Biology II
Credits 4. 4 Lecture Hours.
Embryological, physiological, hormonal, cellular and molecular mechanisms involving the endocrine and reproductive systems of mammals; emphasis on domestic livestock, rodents and humans; current theories evaluated and discussed using information from recent scientific publications.
Prerequisite: ANSC 630 or approval of instructor.

ANSC 633 Concepts in Reproduction
Credits 3. 3 Lecture Hours.
Concepts from current research in physiology of reproduction evaluated and applied for enhancement of livestock production efficiency; ovulation control, embryo transfer, multiple births and control of parturition.
Prerequisite: ANSC 433 or equivalent or approval of department head.

ANSC 636 Texas Panhandle Beef Production Tour
Credits 2. 2 Lecture Hours.
Covers all facets of beef production from cow/calf operation to retail product; experiential knowledge of technologies and practices to enhance efficiency; enlightens the array of career opportunities in the beef production industry.
Prerequisite: Approval of instructor.
ANSC 637 Food Safety: Policy, Regulations and Issues
Credits 3. 2 Lecture Hours. 1 Lab Hour.
Designed to explore the complexities of the regulations governing the production of foods of animal origin in the United States; requirements for countries importing products into the United States; federal, state and local requirement will be addressed.
Prerequisites: ANSC/FS TC 457/657 or approval of instructor.
ANSC 638/GENE 638 Prediction of Genetic Merit
Credits 3. 3 Lecture Hours.
Mixed linear models and best linear unbiased prediction for genetic evaluation.
Prerequisite: GENE 613.
Cross Listing: GENE 638/ANSC 638.
ANSC 647/NFSC 647 Technology of Meat Processing and Distribution
Credits 3. 3 Lecture Hours.
Quantitative and qualitative characteristics of meat and meat products as related to food technology processing operations; manufacturing, preservation, packaging and merchandising.
Cross Listing: NFSC 647/ANSC 647.
ANSC 651 Current Issues in Animal Agriculture
Credits 3. 3 Lecture Hours.
Projecting a professional image and utilizing communication skills to describe animal agriculture; strengths and weaknesses of animal agriculture.
Prerequisite: Graduate classification.
ANSC 657/NFSC 657 Hazard Analysis and Critical Control Point System
Credits 3. 3 Lecture Hours.
Examination of the Hazard Analysis and Critical Control Point (HACCP) principles specifically related to meat and poultry; microbiological and process overviews; good manufacturing practices (GMP) and standard operating procedures (SOP) development; team-building and implementation into industry operations. This class is designed for the production of food and fulfills the training requirements of USDA’s HACCP regulation for meat and poultry (9 CFR Part 417), and FDA’s HACCP regulations for fish and fishery products (21 CFR Part 123 and 1240) and for juice (21 CFR Part 120).
Cross Listing: NFSC 657/ANSC 657.
ANSC 661 Seminar
Credit 1. 1 Lecture Hour.
Important current developments in field of animal science; review of current literature and presentation of papers on selected animal science topics.
Prerequisite: Graduate classification in animal science.
ANSC 684 Professional Internship
Credits 1 to 16. 1 to 16 Other Hours.
Experience in the application of formal training to a commercial operation under supervision of the operations manager and a designated faculty member. The student will investigate a matter of mutual interest to the enterprise manager and to Texas A&M University; will collect, analyze and interpret the data and report the results in a professional paper approved by his or her graduate committee.
ANSC 685 Directed Studies
Credits 1 to 4. 1 to 4 Other Hours.
Advanced studies in animal science problems and procedures. Problems assigned according to experience, interest and needs of individual student.
Prerequisite: Approval of department head.
ANSC 687/NFSC 687 Sensory Evaluation of Foods
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Application of sensory science principles and practices to food systems including an understanding of discriminative, descriptive and consumer sensory techniques.
Prerequisite: CHEM 222 or CHEM 228.
Cross Listing: NFSC 687/ANSC 687.
ANSC 691 Research
Credits 1 to 23. 1 to 23 Other Hours.
Investigations leading to student’s thesis or dissertation in fields of animal production, meats, wool and mohair, nutrition, inheritance of farm animals and physiology of reproduction.
ANSC 697/NFSC 697 Applied Microbiology for Foods of Animal Origin: Processing, Sanitation and Sanitary Design
Credits 3. 3 Lecture Hours.
Application of basic food microbiology knowledge and principles to food production processes and products; sources of microbiological contamination and their impact on food safety and spoilage; application of sanitary design and validation; testing and auditing to monitor and trouble-shoot the process.
Prerequisites: DASC 326/NFSC 326 or NFSC 326/DASC 326, or NFSC 606/DASC 606, or equivalent.
Cross Listing: NFSC 697/ANSC 697.
ANTH - Anthropology
ANTH 601 Biological Anthropology
Credits 3. 3 Lecture Hours.
Survey of the field of biological anthropology covering the principles of evolution, human evolution, human adaptation, human variation, primate diversity and evolution, osteology and bioarchaeology.
ANTH 602 Archaeological Methods and Theory
Credits 3. 3 Lecture Hours.
Development of archaeology as a discipline; methods and theories used in archaeology for reconstructing cultural history and cultural process.

ANTH 603 Seafaring Life and Maritime Communities
Credits 3. 3 Lecture Hours.
Employs primary and scholarly sources to examine the social organization, work routines, living conditions, and material culture of mariners between 1450 and 1950; broader trends in maritime communities and global seafaring are also investigated.
Prerequisite: Approval of instructor.

ANTH 604 Cultural Method and Theory
Credits 3. 3 Lecture Hours.
Survey of the theoretical concepts used in anthropology and how to construct models used in cultural and social anthropology.

ANTH 605 Conservation of Archaeological Resources I
Credits 4. 3 Lecture Hours. 3 Lab Hours.
Fundamentals and applications of artifact conservation techniques in archaeology.
Prerequisite: Knowledge of basic chemistry and physics recommended.

ANTH 606 Conservation of Archaeological Resources II
Credits 4. 3 Lecture Hours. 3 Lab Hours.
Comprehensive study of techniques used in the identification and conservation of metal and wooden artifacts.
Prerequisite: ANTH 605.

ANTH 607 Historical Archaeology
Credits 3. 3 Lecture Hours.
Past and present theoretical positions and research strategies in historical archaeology.
Prerequisite: ANTH 313 recommended.

ANTH 608 Skills in Maritime Archaeology
Credits 3. 3 Lecture Hours.
Themes and tools of maritime archaeology; topics include remote sensing and mapping as well as interpreting, recording and storing data used in maritime archaeological surveys.
Prerequisites: Graduate classification; approval of instructor.

ANTH 609 Culture and Evolution
Credits 3. 3 Lecture Hours.
This seminar will seek to integrate the study of culture with the natural sciences. The foundation of the course is the assumption that culture is a biological adaptation and that we can examine it scientifically.

ANTH 610 Outfitting and Sailing the Wooden Ship 1400-1900
Credits 3. 3 Lecture Hours.
Archaeological and historical sources to exam the outfitting and sailing of wooden ships between 1400 and 1900, a period popularly known as the "Age of Sail", emphasis on two aspects that are of particular interest to the nautical archaeologist.
Prerequisites: Approval of instructor; graduate classification.

ANTH 611 Nautical Archaeology
Credits 3. 3 Lecture Hours.
Introduction to the history and theoretical basis of nautical archeology as a discipline; fundamental concepts in nautical science relevant to the history of seafaring; key developments in the history of seafaring.
Prerequisites: Approval of instructor and graduate classification.

ANTH 612 Preclassical Seafaring
Credits 3. 3 Lecture Hours.
Seafarers and watercraft of the ancient Near East and Mediterranean until ca. 700 B.C. Types of watercraft used, routes, cargoes, voyages of exploration and economics of maritime trade.

ANTH 613 Classical Seafaring
Credits 3. 3 Lecture Hours.
Culture history of Mediterranean seafarers between ca. 700 B.C. and end of Byzantine Empire; types of ships and boats, sea law, naval tactics, harbor-works, routes, cargoes and economics of trade.

ANTH 614 Books and Treatises on Shipbuilding
Credits 3. 3 Lecture Hours.
Examines a group of theoretical books of shipbuilding from the early 15th to the early 19th century; an overview of the theory and conceptual models with which ships were designed and built from the Renaissance to the 19th century.
Prerequisite: ANTH 616.

ANTH 615 History of Shipbuilding Technology
Credits 3. 3 Lecture Hours.
Design and construction of preserved and excavated sailing ships, the expertise of their builders and technology involved in ancient and early shipbuilding.
Prerequisite: Approval of instructor.

ANTH 616 Research and Reconstruction of Ships
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Techniques of recording and interpreting excavated ships; preservation of hulls; ship drafting, modeling, lofting, testing and other methods used in the research and/or reconstruction of ships.
Prerequisite: Approval of instructor.

ANTH 617 Conservation III--Preservation of Organic Materials
Credits 3. 3 Lecture Hours.
Advanced and experimental methods of organic artifact conservation; emphasis on composite artifacts, gamma radiation polymerization, scanning electron microscope evaluation of artifacts and preservation of traditionally difficult to conserve artifacts.
Prerequisite: ANTH 605.

ANTH 618 Medieval Seafaring in the Mediterranean
Credits 3. 3 Lecture Hours.
Cultural history of seafaring in the Mediterranean region during medieval times; ship types and their uses, naval warfare, sea law, harborworks, routes and cargoes, and maritime economic institutions and practices.
Prerequisite: Approval of instructor.

ANTH 619 Indians of Texas
Credits 3. 3 Lecture Hours.
Detailed study of diverse native/immigrant Texas Indian lifeways/cultures from late pre-European to contemporary times; exploration of historical underpinnings, traditional cultures, especially land-use patterns; detailed assessment of tribal relationships with colonial powers, U.S., Texas governments as evidenced in ethnographic, ethnohistoric, historical materials; application to anthropological, archaeological, and human ecology research.
Prerequisite(s): Graduate classification, ANTH 602, or ANTH 604, or 620, or 650.
ANTH 620 Prehistory of Texas
Credits 3. 3 Lecture Hours.
Survey of Texas prehistory from initial migration of human population 11,500 years ago to extermination or removal of Native American cultures by Europeans; processes of cultural adaptation and change to shifting environments and subsistence material correlates of world views and belief systems.

ANTH 622 Folklore Forms and Methods
Credits 3. 3 Lecture Hours.
Introduction to major genres of folklore, various theories and approaches employed by researchers, and specialized resource materials in the humanities and social sciences.
Prerequisites: Graduate classification in liberal arts and approval of instructor.

ANTH 623 Folk Narrative
Credits 3. 3 Lecture Hours.
Theories and techniques used in the study of major folk narrative genres; folktale and legend; brief survey of other narrative forms, including tall tale, epic, myth, joke, personal and family narratives.
Prerequisites: Graduate classification in liberal arts and approval of instructor.

ANTH 624/GEOG 687 Geoarchaeology
Credits 3. 3 Lecture Hours.
Application of geological concepts and methods to archaeological research; history of geoarchaeology; site formation processes; modification of archaeological sites and sediments; landscape reconstruction and change and their effects on human behavior.
Prerequisite: ANTH 602 or equivalent.
Cross Listing: GEOG 687/ANTH 624.

ANTH 625 Zooarchaeology
Credits 4. 3 Lecture Hours. 3 Lab Hours.
Analysis of animal bones from archaeological sites; inference of how prehistoric peoples hunted, domesticated and used animals.
Prerequisite: Basic knowledge of zoology and archaeology.

ANTH 626 Human Paleopathology
Credits 3. 3 Lecture Hours.
Pathological lesions exhibited in prehistoric or early historic human remains; problems in diagnosing lesions in fossil skeletal remains, and evaluating the occurrence of these lesions in past populations.
Prerequisite: ANTH 425.

ANTH 627 Human Paleonutrition
Credits 3. 3 Lecture Hours.
Evaluation of past human diets and subsistence patterns from the perspective of research in archaeology, zooarchaeology, ethnobotany, bioarchaeology and cultural anthropology.
Prerequisite: 6 hours of advanced courses in anthropology or approval of instructor.

ANTH 628 New World Seafaring
Credits 3. 3 Lecture Hours.
Cultural history of seafaring in the Western Hemisphere from the fifteenth century to the present; ship types and their uses; harbors, commerce, naval warfare, sailing routes, maritime practices.
Prerequisites: ANTH 615 and ANTH 616 or approval of instructor.

ANTH 629 Post-Medieval Seafaring
Credits 3. 3 Lecture Hours.
Cultural history of European seafaring from the fifteenth century to the early twentieth century; ship types and their uses, shipping routes and cargoes, maritime technology and economic institutions, seafaring practices, and naval warfare.
Prerequisites: ANTH 615 and ANTH 616 or approval of instructor.

ANTH 630 Human Evolutionary Ecology
Credits 3. 3 Lecture Hours.
Evolutionary ecology of human behavior and culture, including habitat choice and use of space, time allocation, resource acquisition and allocation, sex and reproduction, altruism and cooperation and the coevolution of genes and culture.
Prerequisite: Graduate classification.

ANTH 631 Primate Behavioral Ecology
Credits 3. 3 Lecture Hours.
Survey the behavioral ecology of the nonhuman primates exploring topics such as their hunting behavior; sexual coercion; language capabilities; culture; tool use; homosexuality; dominance; parental care, ethics of field study and their conservation.
Prerequisite: Graduate classification.

ANTH 632 Archaeology of Death
Credits 3. 3 Lecture Hours.
Ethnographic and archaeological literature regarding human funerary behavior; emphasis on theoretical developments in the interpretation of burials for reconstructing social organization and social change; examine how mortuary practices and archaeological excavation define the burial assemblages studied by bioarchaeologists.
Prerequisite: Graduate classification.

ANTH 633 Deep Submergence Archaeology
Credits 3. 3 Lecture Hours.
Addresses issues in the new field of deep submergence archaeology by examining the discipline's history, technologies, specific case studies of ship wrecks in deep water and related topics. Students will interact with leaders in the field via video conferencing and visiting lecturers.
Prerequisite: Approval of instructor.

ANTH 634 Palynology
Credits 4. 3 Lecture Hours. 3 Lab Hours.
Principles and techniques used in palynology, pollen morphology, ontogeny, biochemistry, dispersion and preservation; role of palynology as a research tool in plant taxonomy agriculture, medicine, paleobotany and anthropology.

ANTH 635 Violence and Warfare
Credits 3. 3 Lecture Hours.
The anthropological study of violence and warfare and the place of these phenomena in cultural evolution, religion, economics, politics and social structure; particular attention paid to the rise of industrialized warfare and its impact on the pre-industrial world.
Prerequisite: Graduate classification.

ANTH 636 Computer Graphics in Archaeology
Credits 3. 3 Lecture Hours.
Focuses on the acquisition, manipulation, and presentation of archaeological data and images; a variety of state-of-the-art technologies will be employed to develop professional desktop publications, slide and digital presentations, electronic publications and images.
Prerequisite: Graduate classification.
ANTH 637 Paleoethnobotany
Credits 4.3 Lecture Hours. 3 Lab Hours.
Interrelationship between plants and humans from prehistoric times to present, theoretical and methodological use of botany as a research tool for the understanding of cultural systems.

ANTH 638 Proposal Writing in Anthropology
Credits 3.3 Lecture Hours.
Workshop class designed to assist advanced doctoral students in writing research grant proposals to fund their dissertation projects. Students will craft their own NSF-style Dissertation Improvement proposals, should be prepared to accept constructive criticism of their work, and to offer it on the work of their classmates.
Prerequisites: Graduate classification.

ANTH 639/WGST 639 Gender, Ethnicity, and Class in Archaeological Research
Credits 3.3 Lecture Hours.
Explores theoretical and methodological issues in engendering archaeology; ideological biases in the interpretation of roles attributed to women, men and underrepresented groups in the past; the impact of cultural transformations on underrepresented groups and gender relations; and how to formulate research questions concerning these issues.
Prerequisite: Graduate classification.
Cross Listing: WGST 639/ANTH 639.

ANTH 640 Anthropological Ethics and Professionalism
Credits 3.3 Lecture Hours.
Codes of professional ethics applicable to excavation and preservation of archaeological sites; ethnographic fieldwork and professional relationships with colleagues and informants; professional protocols for publication and presentation of research results.
Prerequisites: Graduate classification in anthropology and approval of instructor.

ANTH 641 Applied Anthropology
Credits 3.3 Lecture Hours.
Theory, ethics and practical applications of anthropological methods and concepts as they relate to planned programs of socio-cultural change.

ANTH 642 Research Design in Anthropology
Credits 3.3 Lecture Hours.
Research design used by anthropologists to develop sampling strategies, test hypotheses and compile quantitative data.
Prerequisite: ANTH 602.

ANTH 643 Australopithecine Paleoecology
Credits 3.3 Lecture Hours.
Principles and techniques used in the reconstruction of paleoecology and paleoenvironments associated with the African australopithecines; including taphonomy, faunal evolution, climate forcing analysis, habitat preference and land-use patterns; detailed overview of the australopithecine fossil record from the Miocene to the Pleistocene.
Prerequisite: Graduate classification.

ANTH 644 Classical Archaeology
Credits 3.3 Lecture Hours.
History of the discipline through the individuals, organizations, excavations, theoretical models and ethical issues that have shaped it.
Prerequisite: Graduate classification.

ANTH 645 Cultural Resources Management
Credits 3.3 Lecture Hours.
History of cultural resources management (CRM): current federal and state laws and regulations; methods of determining site significance; the stages of CRM investigations; and the preparation of research designs and proposals; ethical issues such as curation and the treatment of human remains discussed.
Prerequisite: Graduate classification.

ANTH 646 Ceramic Artifact Analysis
Credits 3.2 Lecture Hours. 3 Lab Hours.
The introduction of the basic concepts, methods, and approaches used in the analysis of archaeological pottery with a focus on the techniques and theories used to bridge the gap between the recovery of ceramic artifacts and their interpretation within various anthropological contexts.
Prerequisite: Graduate classification.

ANTH 647 Lithic Artifact Analysis
Credits 3.2 Lecture Hours. 3 Lab Hours.
Laboratory-based course reviewing methods archaeologists use to analyze stone tools and debitage, including identification of tool-stone sources, reconstruction of technology, explanation of assemblage variability, and microscopic use-wear analysis.
Prerequisite: Graduate classification and approval of instructor.

ANTH 648 Issues in Human Evolutionary Theory
Credits 3.3 Lecture Hours.
Examination of core concepts and theories in evolutionary biology and paleoanthropology, including human evolution, the species concept, and the role of the human fossil record.
Prerequisite: Graduate classification.

ANTH 649 Origin and Evolution of the Genus Homo
Credits 3.3 Lecture Hours.
Survey of the human fossil record with a focus on Plio-Pleistocene specimens assigned to our own genus, Homo; provides an overarching picture of the evolutionary history of humans after the Australopithecines and reviews theoretical issues that have influenced our understanding of the evolution of Homo sapiens.
Prerequisite: Graduate classification or approval of instructor.

ANTH 650 Ethnographic Field Methods
Credits 3.3 Lecture Hours.
Methods common to anthropology for the field collection of data on cultural behavior.
Prerequisites: Graduate classification and approval of instructor.

ANTH 651 Pleistocene Prehistory of Northeast Asia and Alaska
Credits 3.3 Lecture Hours.
Survey of the Ice-Age paleoenvironments, prehistory and paleoanthropology of Siberia, China, Japan, and Bering Land Bridge area, especially in the context of human colonization of the region and origins of the first Americans.
Prerequisite: Graduate classification.

ANTH 652 First American Archaeology
Credits 3.3 Lecture Hours.
Survey of past frontiers in First American studies important to the peopling of the Americas: review of the archaeology, geology, and dating of early sites in North, Middle, and South America; human migration hypotheses; biological evidence; and late Quaternary environmental factors.
Prerequisite: Approval of instructor.
ANTH 653 Hunter-Gatherer Archaeology
Credits 3. 3 Lecture Hours.
Overview of development of hunter-gatherer archaeology; current methodological and theoretical issues, especially use of ethnohistoric and environmental data; ecologically oriented case studies of late Pleistocene and Holocene hunter-gatherers; emphasis on land-use, site-structure, and site formation analyses, especially in North America. 
Prerequisite: ANTH 602 or ANTH 604 or approval of instructor.

ANTH 654 Archaeological Photography
Credits 3. 3 Lecture Hours.
Instruction on how to better use cameras in the process of reporting archaeological sites and material culture by exploring old and new photographic technologies.
Prerequisite: Graduate classification.

ANTH 655 Empires and World-System
Credits 3. 3 Lecture Hours.
Application of the anthropological perspective to the problem of the rise of empires and the modern world-system over the last 600 years of world history; topics include ecocide, ethnicicide, ethnogenesis and warfare.

ANTH 656 Ancient Foodways and Cooking Technology
Credits 3. 3 Lecture Hours.
Study of ancient foodways and cooking technologies, particularly fire-based methods, especially in the context of human evolution, subsistence and settlement behavior; social organization, theoretical underpinnings, and archaeological manifestations thereof, with the focus on ancient hunter-gatherer populations, wild plants, terrestrial animals, and aquatic resources.
Prerequisite: ANTH 602 or ANTH 604 or approval of Instructor.

ANTH 657 Topics in Technological Organization
Credits 3. 3 Lecture Hours.
Review of current problems in the study of artifact assemblages; focus on theory explaining variability in artifact forms and technologies, especially in the contexts of subsistence and settlement behavior as well as exchange and social organization; alternating sections focus on lithic or ceramic technologies. May be taken two times for credit.
Prerequisite: Graduate classification or approval of instructor.

ANTH 658 Quantitative Ethnographic Methods
Credits 3. 3 Lecture Hours.
Quantitative data collection and analytical methods employed by anthropologists including standardized observation, structured interviews, demography and network analysis; emphasizes hands-on assignments involving data collection among local community.
Prerequisite: Graduate classification.

ANTH 659 The Paleolithic World
Credits 3. 3 Lecture Hours.
Survey of the Paleolithic archaeological record, beginning with the Oldowan and ending with the Upper Paleolithic and dispersal of modern humans to Australia and the Americas; review of major changes in technology, subsistence and land-use strategies that shaped the Paleolithic World.
Prerequisite: Graduate classification or approval of instructor.

ANTH 660 Field Archaeology
Credits 1 to 12. 1 to 12 Other Hours.
Field instruction in the methods of archaeological excavations; recovery and cataloging of cultural, floral and faunal remains; and interpretation of these data. Locations of the field course will vary according to site. Field trips required. May be taken more than once but not to exceed 8 hours of credit toward an MA degree and not to exceed 12 hours of credit toward a PhD degree.
Prerequisite: ANTH 602 or equivalent.

ANTH 661 Environmental Archaeology
Credits 3. 3 Lecture Hours.
Examination of the paleoecological context in which past humans interacted with the natural environment; review of advanced principles, method and theory, and practical applications used in paleoenvironmental reconstruction.
Prerequisite: Graduate classification or approval of instructor.

ANTH 662 Method and Theory in the Peopling of the Americas
Credits 3. 3 Lecture Hours.
Interdisciplinary review of current evidence from the fields of archaeology, genetics, biological anthropology and paleoecology for the dispersal of modern humans to the New World during the Pleistocene; understanding theory and method used to explain prehistoric human migration and colonization of empty lands.
Prerequisite: Graduate classification or approval of instructor.

ANTH 663 The Neanderthals
Credits 3. 3 Lecture Hours.
Origin and evolution of Neanderthals.
Prerequisite: Graduate classification.

ANTH 664 Human Variation
Credits 3. 3 Lecture Hours.
Biological basis of variation in the physical features of modern humans; details of anatomical and physiological differences of living populations to understand their adaptive and historical significance; history of human variation studies rooted in the historical notion of “race”.
Prerequisite: Graduate classification or approval of instructor.

ANTH 665 Bridging Theme Seminar in Anthropology
Credits 3. 3 Lecture Hours.
Examination of topics that bridge two or more subfields in anthropology, including studies of diasporas, dispersals and migration; evolution and ecology; material culture and technology; and food, nutrition, and culture. May be taken three times for credit.
Prerequisite: Graduate classification.

ANTH 666 The Neanderthals
Credits 3. 3 Lecture Hours.
Origin and evolution of Neanderthals.
Prerequisite: Graduate classification.

ANTH 667 Human Variation
Credits 3. 3 Lecture Hours.
Biological basis of variation in the physical features of modern humans; details of anatomical and physiological differences of living populations to understand their adaptive and historical significance; history of human variation studies rooted in the historical notion of “race”.
Prerequisite: Graduate classification or approval of instructor.

ANTH 668 Teaching Anthropology
Credits 0. 0 Lecture Hours.
Introduction to course planning for future instructors of anthropology; includes course design, student motivation and engagement, assessment of design and implementation and technology use in education.
Prerequisites: Graduate classification; admission to graduate program in the Department of Anthropology.
ANTH 684 Anthropology Internship  
Credits 3 to 9. 3 to 9 Other Hours.  
Opportunity to put anthropology learned in the classroom into practice; may be used to gain practical experience in a variety of settings including: local, state or federal agencies; museums; non-profit organizations; non-governmental organizations; and private firms.  
**Prerequisites:** ANTH 601, ANTH 602, ANTH 604 or ANTH 602, ANTH 615, ANTH 616; approval of committee chair.

ANTH 685 Directed Studies  
Credits 1 to 12. 1 to 12 Other Hours.  
Directed individual study of selected problems in anthropology.  
**Prerequisite:** Approval of instructor.

ANTH 689 Special Topics in...  
Credits 1 to 12. 1 to 12 Lecture Hours.  
Selected topics in an identified area of anthropology. May be repeated for credit.  
**Prerequisite:** Approval of instructor.

ANTH 691 Research  
Credits 1 to 23. 1 to 23 Other Hours.  
Research for thesis.  
**Prerequisite:** Approval of graduate advisor.

ARCH - Architecture

ARCH 600 Introduction to Architecture and Urban Design  
Credits 2. 1 Lecture Hour. 1 Lab Hour.  
Introductory seminar and studio on architecture and urban design; focus on topical readings, in-class discussions and short writing exercises; provides opportunity to learn or refine hand drawing, rendering, and model building, and to learn to be productive and creative within the studio context.  
**Prerequisite:** Graduate classification in architecture or approval of instructor.

ARCH 601 Design Fundamentals I  
Credits 6. 3 Lecture Hours. 9 Lab Hours.  
Introduction to the development of verbal (design vocabulary), graphic, research and critical thinking skills through the design of small-scale projects, and investigation of typologies and precedents as the basis for architectural design.  
**Prerequisites:** Graduate classification in architecture or approval of instructor; career change program, ARCH 600 and concurrent enrollment in ARCH 610.

ARCH 602 Design Fundamentals II  
Credits 6. 3 Lecture Hours. 9 Lab Hours.  
Further development of verbal, graphic, research and critical thinking skills through architectural design projects, with emphasis on basic understanding of major philosophical doctrines and their influence on architectural theory; studies of place-making, space, form and order; knowledge of world views, formal spatial manipulations and design vocabulary.  
**Prerequisites:** ARCH 601, ARCH 610, ARCH 612 or approval of instructor.

ARCH 603 Design Fundamentals III  
Credits 6. 3 Lecture Hours. 9 Lab Hours.  
Theory and practice of architecture; methods and techniques used in the analysis and synthesis of concepts unique to spatial enclosure; developing responses to building systems; objects in a current cultural, physical or social context; complex building programs, site development and design solutions integrating formally expressive visual ideas and functional planning.  
**Prerequisite:** ARCH 602.

ARCH 605 Architectural Design I  
Credits 6. 2 Lecture Hours. 12 Lab Hours.  
Application of verbal, graphic, research, critical thinking and fundamental design skills to architectural projects that emphasize design theory, systems of ordering in architecture and urban design, use of precedents, site and contextual issues; includes program development and concerns for public health, safety and welfare. Core design studio for professional degree candidates.  
**Prerequisite:** Graduate classification in architecture or approval of instructor.

ARCH 606 Architectural Design II  
Credits 6. 2 Lecture Hours. 12 Lab Hours.  
Application of verbal, graphic, research, critical thinking and fundamental design skills to architectural projects that emphasize the integration of structural, environmental, life safety, building envelope systems, and building service systems; includes code compliance, resource conservation, cost control and economic analysis. Core design studio for professional degree candidates.  
**Prerequisite:** ARCH 605.

ARCH 607 Architectural Design III  
Credits 6. 2 Lecture Hours. 12 Lab Hours.  
Application of verbal, graphic, research, critical thinking and comprehensive design skills to advanced architectural projects or design competitions that address cultural traditions, human behavior and diversity, the context of architecture, collaborative skills, ethics and professional judgement. Core design studio.  
**Prerequisite:** ARCH 606.

ARCH 608 Architectural Design IV  
Credits 6. 2 Lecture Hours. 12 Lab Hours.  
Individually selected design project of major architectural significance and complexity; professional documentation required; project requires approval of instructor.  
**Prerequisite:** ARCH 607 or equivalent.

ARCH 610 Visual Communications  
Credits 3. 2 Lecture Hours. 4 Lab Hours.  
Investigation and practice of various communication techniques used to explore, verify and present design decisions in architecture; freehand drawing principles; graphic theory and mechanical drawing techniques; architectural presentation and rendering methods in different media and their application.  
**Prerequisite:** Graduate classification or approval of instructor; concurrent enrollment in ARCH 601.

ARCH 612 Structural and Environmental Technology Concepts  
Credits 3. 3 Lecture Hours.  
An introductory course which is intended to quickly and broadly develop the vocabulary base, visual understanding and familiarity with technological systems that architects deal with throughout their practice.  
**Prerequisites:** Graduate classification or approval of instructor; MATH 142 and PHYS 201 or equivalents.
ARCH 614 Elements of Architectural Structures  
Credits 3. 3 Lecture Hours. 2 Lab Hours.  
Investigation of the structural factors that influence the development of architectural space and form; introduction of the physical principles that govern statics and strength of materials through design of timber and steel components of architectural structures.  
Prerequisite: ARCH 612 or approval of instructor.

ARCH 615 Elements of Environmental Control Systems  
Credits 3. 3 Lecture Hours.  
Theory and applications of building energy use, envelope design, shading analysis, heating and cooling systems, lighting design, building water supply plumbing and drainage systems, electrical, acoustical, fire and lightning protection, transportation systems and construction materials; design opportunities, calculations, equipment selection, and component sizing as they relate to design.  
Prerequisite: ARCH 612 or approval of instructor.

ARCH 619 Applied Solar Energy  
Credits 3. 3 Lecture Hours.  
The technology behind applied solar energy design, including: calculating solar radiation, heat transfer related to solar design, active systems; FCHART and economics.  
Prerequisite: Graduate classification or approval of instructor.

ARCH 620 Building Performance Measurement  
Credits 3. 3 Lecture Hours.  
Performance measurement strategies for buildings, including: instrumentation and sensors, data collection and data management, weather data requirements, regression or inverse data analysis methods, calibrated whole-building energy simulation, calibrated simplified HVAC system simulation; measurement and analysis of indoor environmental conditions and building water use; baseline strategies; state and federal standards; case studies of commercial building applications.  
Prerequisite: Graduate classification or approval of instructor.

ARCH 621 Energy Optimization in Building Design  
Credits 3. 3 Lecture Hours.  
Optimum energy use strategies for commercial buildings, hourly energy simulation methods, building envelope and HVAC system energy optimization by computer simulation techniques; life-cycle cost analysis of building energy systems; case studies in commercial building applications.  
Prerequisite: Graduate classification or approval of instructor.

ARCH 622 Sustainable Building Design Technology  
Credits 3. 3 Lecture Hours.  
Fundamentals of sustainability in building, including social, political and economic issues—focusing particularly on conservation of natural resources; design and construction of earth integrated solar buildings, including cooling, heating, lighting and habitability assessments.  
Prerequisite: Graduate classification or approval of instructor.

ARCH 623 Design Methods I  
Credits 3. 3 Lecture Hours.  
Importance of intuitive methods in design; meaning, symbolism and creativity in art and architecture; techniques to develop creative approaches to problem-solving.  
Prerequisite: Graduate classification or approval of instructor.

ARCH 624 Theory of Placemaking  
Credits 3. 3 Lecture Hours.  
An introduction to and an exploration of the sources, principles, theories, and physical expressions of the phenomenon of place creation and its relationship to sustainable urbanism; investigates the origin of place theory and its meaning as expressed in the various forms, functions and scales of places applicable to architecture and planning.  
Prerequisite: Graduate classification or approval of instructor.

ARCH 628 Tools for Green Building Design  
Credits 3. 3 Lecture Hours.  
Modeling tools and techniques to explore and support sustainable design; develop a deeper understanding of the relationship between architectural design and the environmental forces of sun, wind, and light; design-centered course; helps test the students architectural designs through the use of available modeling tools.  
Prerequisite: Graduate classification or approval of instructor.

ARCH 630 Architectural Theory—Renaissance Through 19th Century  
Credits 3. 3 Lecture Hours.  
Architectural Theory—Renaissance Through 19th Century. Review of architectural theory and practice from the 15th to 19th centuries with emphasis on the classical tradition, its transformations in France and in Great Britain and Germany; aspects of this evolution.  
Prerequisite: Graduate classification or approval of instructor.
ARCH 639 Twentieth Century Architecture: Theory and Practice
Credits 3. 3 Lecture Hours.
Background and exploration of Modern Architecture, including consideration of region, materials, structure and style, as well as the social and economic factors that influence architectural form and content; discussion of the work and writings of 20th century architects and architectural theorists.
Prerequisite: Graduate classification or approval of instructor.

ARCH 640 Morphology of Architectural Form
Credits 3. 3 Lecture Hours.
Forces influencing structure and form of architecture: climate, culture, site, economics, construction methods.
Prerequisite: Graduate classification or approval of instructor.

ARCH 643 Software Analysis for HVAC Systems in Low Energy Buildings
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Energy analysis (using Energy Plus software) with an emphasis on developing strategies for low energy use; simulation of various heating and cooling systems in low energy buildings; analysis of the mechanical equipment (including air handling systems, chiller and boilers), the building envelope, energy management control systems and indoor air quality.
Prerequisite: Graduate classification or approval of instructor.

ARCH 644 Seminar in Art and Architectural History
Credits 3. 3 Lecture Hours.
Advanced topics in art and architectural history emphasizing methods of analysis and development of theory, including case studies from both western and non-western traditions; topics vary each semester.
Prerequisite: Graduate classification or approval of instructor.

ARCH 646 Historic Preservation Theory and Practice
Credits 3. 3 Lecture Hours.
History of the preservation movement in the U.S. Architectural and regulatory techniques employed in building preservation; case study of selected examples.
Prerequisite: Graduate classification or approval of instructor.

ARCH 647 Recording Historic Buildings
Credits 5. 2 Lecture Hours. 9 Lab Hours.
Techniques for recording historic buildings; measuring and drawing to Historic American Building Survey Standards; field experience in photography, field notes and record drawing preparation.
Prerequisites: Graduate classification or approval of instructor.

ARCH 648 Building Preservation Technology
Credits 3. 3 Lecture Hours.
Preservation technology related to the diagnosis and treatment of defects in buildings; case studies of significant historic structures. Field study may be required for which departmental fees may be assessed to cover costs.
Prerequisite: ARCH 646 or approval of instructor.

ARCH 649 Advanced History of Building Technology
Credits 3. 3 Lecture Hours.
Readings and discussion of current topics in history of building technology; development of understanding the importance of materials of construction to the creation of historical forms of sacred architecture across faith and around the world.
Prerequisite: Graduate classification or approval of instructor.

ARCH 653 Building Information Modeling in Architecture
Credits 3. 3 Lecture Hours.
Building Information Modeling (BIM); principles, methods and applications in the building lifecycle with a focus on the design process; includes computer-aided design, parametric modeling, databases, web technologies, design performance simulation and visualization.
Prerequisites: Graduate classification or approval of instructor.

ARCH 655 Parametric Modeling in Design
Credits 3. 3 Lecture Hours.
Parametric modeling principles, methods and applications in environmental design and research; architectural geometry at basic and advanced levels; parametric equations and models; visual programming method; scripting method; constraints, rules and algorithms; elements and patterns of parametric design; parametric simulation; modeling tools.
Prerequisite: Graduate classification or approval of instructor.

ARCH 657 Advanced Professional Practice and Ethics
Credits 3. 3 Lecture Hours.
Issues and relationships within the business, legal and political environment; legal forms of practice; office organization, personnel practices, policies and management; expanded services; economics of practice, profit planning and accounting; client selection; standard form agreements with consultants and for specialized services, risk management.
Prerequisites: Graduate classification or approval of instructor.

ARCH 660 Design Programming
Credits 3. 3 Lecture Hours.
Study of successful programming approaches to meet user needs in design projects; history and definition of programming, programming techniques, documentation and case studies; applications to buildings, landscape projects and urban design.
Prerequisite: Graduate classification or approval of instructor.

ARCH 663 Interior Architecture
Credits 3. 3 Lecture Hours.
Theory and application of design processes incorporating programming, space planning, analysis and communication of interior requirements for various building types with emphasis on spatial organization, selection of components and materials to satisfy user needs; emphasis on design of the workplace as the synthesis of human factors, organizational theory, systems technology and communication.
Prerequisite: Graduate classification or approval of instructor.

ARCH 664 Urban Design for Architects
Credits 3. 3 Lecture Hours.
Investigation of the creative role in architectural ideas in the design process and their manifestation in successful urban design; identification and evaluation of urban design examples that are at the leading edge of architectural practice and anticipate the future; consideration of neighboring, local, regional levels, social and economic factors that influence urban form and fabric; discussion of the works and writings and the case study of livable urban design.
Prerequisite: Graduate classification or approval of instructor.

ARCH 669 Foundations of Research in Architecture
Credits 3. 3 Lecture Hours.
Introduction to the research process and its application to problems in architecture; survey of current literature on research design methods relevant to diverse architectural problems; qualitative and quantitative research strategies and techniques; communicating research results. May be taken two times for credit.
Prerequisites: Graduate classification; concurrent enrollment in ARCH 681 and ARCH 690.
ARCH 673/LAND 632 Design for Active Living
Credits 3. 3 Lecture Hours.
Understanding the forms and characteristics of the built environment and the influence on human behaviors, lifestyles and health; theoretical and empirical insights into the issues of physical activity, obesity and automobile dependency; focus on how changes in the built environment help address these issues.
Prerequisite: Graduate classification or approval of instructor.
Cross Listing: LAND 632/PLAN 632.

ARCH 674 Typologies of Contemporary Hospital Design
Credits 3. 3 Lecture Hours.
Introduction to the contemporary planning of hospitals; comparisons of hospital design by contemporary practitioners; best practice models, repetitive patterns, and innovative designs.
Prerequisite: Graduate classification or approval of instructor.

ARCH 675 Health Design and Research
Credits 3. 3 Lecture Hours.
Examination of health environments to include buildings, healthcare gardens and restorative landscapes, and urban design for home-based care and independent living; emphasis on research-informed approaches for patient-centered design that reduce stress and promote improved health outcomes.
Prerequisite: Graduate classification or approval of instructor.

ARCH 676 Survey of Human Behavior and Design
Credits 3. 3 Lecture Hours.
Examination of human behavior and attitudes that influence spatial decision making; includes sections on environment and behavior, real estate finance, urban design decision making.
Prerequisite: Graduate classification or approval of instructor.

ARCH 677 Neuroscience and Architecture
Credits 3. 3 Lecture Hours.
Advanced introduction to the field of experimental psychophysiology with applications taken primarily from the field of environmental psychology and supplementing with examples from the fields of social and cognitive neuroscience; exposure to the foundations, principles and selected applications of neuroscience.
Prerequisite: Approval of instructor.

ARCH 678 Foundations of Healthcare Design
Credits 3. 3 Lecture Hours.
Introduction to the theory of healthcare design over the course of time; exploration of the relationship of the medicine, science, art, and culture of each period with the design of buildings and environments for healthcare; emphasis on historic periods and the contemporary.
Prerequisite: Graduate classification or approval of instructor.

ARCH 681 Seminar
Credit 1. 1 Lecture Hour.
Discussion and review of current practice in architecture and environmental design.
Prerequisite: Graduate classification or approval of instructor.

ARCH 684 Professional Internship
Credits 1 to 8. 1 to 8 Other Hours.
Professional practice under approved arrangement with public or private agencies or in residence to complement academic coursework and to provide the basis for, and allow the preparation of, an appropriate report.
Prerequisite: Graduate classification or approval of instructor and department head.

ARCH 685 Directed Studies
Credits 1 to 6. 1 to 6 Other Hours.
Individual problems involving application of theory and practice in design and construction of buildings and groups of buildings.
Prerequisite: Graduate classification or approval of instructor and department head.

ARCH 689 Special Topics in...
Credits 1 to 6. 1 to 6 Lecture Hours. 0 to 4 Lab Hours.
Selected topics in an identified field of architecture. May be repeated for credit.
Prerequisite: Graduate classification or approval of instructor or department head.

ARCH 690 Research Ideologies for Architecture
Credits 3. 3 Lecture Hours.
Design of research in architecture; evaluation of research methodologies from current research literature.
Prerequisite: Graduate classification or approval of instructor and department head.

ARCH 691 Research
Credits 1 to 23. 1 to 23 Other Hours.
Research for and preparation of dissertation.
Prerequisite: Graduate classification or approval of instructor and department head.

ARCH 693 Professional Study
Credits 1 to 23. 1 to 23 Other Hours.
Application of verbal, graphic, research and critical thinking skills to an approved, individually selected architectural issue or design project that will advance the broad understanding of architecture and its impact on people. The terminal requirement for the Master of Architecture degree. May be taken more than once but not more than 6 hours used toward a degree.
Prerequisites: ARCH 605, ARCH 606, ARCH 607; proposal approval.

ASTR - Astronomy

ASTR 600 Order-of-Magnitude Astrophysics
Credit 1. 1 Lecture Hour.
Introduction to the utility of order of magnitude calculations and the ability to think intuitively; short overviews of basic physical concepts followed by interactive activities and problem solving at the board.
Prerequisite: ASTR 314 or equivalent, or approval of instructor.

ASTR 601/PHYS 641 Extragalactic Astronomy
Credits 3. 3 Lecture Hours.
Overview of observations of galaxies and large-scale structures in the Universe to understand their formation and evolution from theoretical and observational perspectives; galaxy luminosity functions; evolution of stellar populations and chemical enrichment; clusters and AGN.
Prerequisites: PHYS 601; or ASTR 314 and PHYS 302; or approval of instructor.
Cross Listing: PHYS 641/ASTR 601.
ATRO 602/PHYS 642 Astronomical Observing Techniques and Instrumentation
Credits 3. 3 Lecture Hours.
Theory and practice of obtaining and analyzing astrometric, photometric, spectroscopic, and interferometric measurements of astronomical sources across the electromagnetic spectrum; principles of design, fabrication, assembly, test, deployment, and use of astronomical instruments.
Prerequisites: PHYS 615 or equivalent; or approval of instructor.
Cross Listing: PHYS 642/ASTR 602.

ASTR 603/PHYS 643 Stellar Astrophysics
Credits 3. 3 Lecture Hours.
Theoretical and observational aspects of stellar astrophysics; thermodynamic properties of stellar interiors; energy sources; nuclear processes and burning stages; convective and radiative energy transport; evolutionary models; atmospheres; stability and pulsations; chemical enrichment processes; population synthesis.
Prerequisites: PHYS 606 and PHYS 607 or equivalents; or approval of instructor.
Cross Listing: PHYS 644/ASTR 604.

ASTR 604/PHYS 644 Cosmology
Credits 3. 3 Lecture Hours.
Basic principles of modern cosmology and particle physics; general relativity; cosmic inflation; Big Bang nucleosynthesis; expansion of the universe; cosmic microwave background; large-scale structure of the Universe; properties of particles; dark matter; dark energy.
Prerequisites: PHYS 615 or equivalent; or approval of instructor.
Cross Listing: PHYS 644/ASTR 604.

ASTR 605/PHYS 645 Galactic Astronomy
Credits 3. 3 Lecture Hours.
Basic nature and structure of constituents of Milky Way galaxy; distribution and motions of stars and gas; origin evolution and distribution of large-scale chemical abundances and kinematic patterns across populations; models of galaxy formation and implications of modern observations.
Prerequisites: PHYS 601 and PHYS 607 or equivalents; or approval of instructor.
Cross Listing: PHYS 645/ASTR 605.

ASTR 606/PHYS 646 Radiative Transfer
Credits 3. 3 Lecture Hours.
Fundamental radiative processes in stellar and planetary atmospheres; radiative fields; Stokes parameters; Mueller matrix formalism; radiation from moving charges; Compton scattering; plasma effects; atomic structure and radiative transitions; molecular structure and spectra; multiple scattering.
Prerequisites: PHYS 302, PHYS 304, PHYS 408, and PHYS 412 or equivalents; or approval of instructor.
Cross Listing: PHYS 646/ASTR 606.

ASTR 681 Seminar
Credit 1. 1 Lecture Hour.
Subjects of current importance; normally required of all graduate students in astronomy. May be repeated for credit.

ASTR 685 Directed Studies
Credits 1 to 9. 1 to 9 Other Hours.
Individual problems not related to thesis.
Prerequisite: Approval of instructor.

ASTR 689 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Selected topics in an identified area of astronomy. May be repeated for credit.
Prerequisite: Approval of instructor.

ATRO 691 Research
Credits 1 to 23. 1 to 23 Other Hours.
Research toward thesis or dissertation.
Prerequisite: Baccalaureate degree in physics or equivalent.

ATRO - Atmospheric Sciences

ATRO 601 Fundamentals of Atmospheric Dynamics
Credits 3. 3 Lecture Hours.
Basic concepts of fluid dynamics; meteorological approximations and coordinate systems; simple models and wave motion; barotropic models.
Prerequisite: Approval of instructor.

ATRO 602 Atmospheric Physics I
Credits 3. 3 Lecture Hours.
Integrated treatment of the dry and moist thermodynamics of the atmosphere, and cloud and precipitation microphysics.

ATRO 603 Quantitative Methods for the Atmospheric Sciences
Credits 3. 3 Lecture Hours.
Mathematical and numerical methods applied to ODE's, PDE's and statistical methods; methods of analysis and modeling of atmospheric phenomena.
Prerequisites: Concurrent registration in ATRO 601 and CSCE 203 or equivalents.

ATRO 604 General Circulation and Climate
Credits 3. 3 Lecture Hours.
Observed large scale circulation and climate of the earth; physical processes which maintain relevant budgets; models and theories explaining mean observations.
Prerequisite: ATRO 601.

ATRO 606 Atmospheric Chemistry I
Credits 3. 3 Lecture Hours.
Fundamentals of atmospheric chemistry; tropospheric ozone, NOx and HOx cycling, sulfur chemistry, stratospheric chemistry, and aerosol composition; analytical measurement methods; review of chemical basics as needed.

ATRO 611 Atmospheric Dynamics II
Credits 3. 3 Lecture Hours.
Continuation of ATRO 601; flow in planetary boundary layer; balanced flows; atmospheric instabilities; tropical dynamics.
Prerequisite: ATRO 601 or approval of instructor.

ATRO 612 Atmospheric Physics II
Credits 3. 3 Lecture Hours.
Continuation of ATRO 602. Radiative transfer into the atmosphere.
Prerequisite: ATRO 602.

ATRO 613 Advanced Atmospheric Chemistry
Credits 3. 3 Lecture Hours.
An advanced survey of fundamental atmospheric processes involving biogeochemical cycles, air pollution, tropospheric chemistry, atmospheric aerosols and stratospheric chemistry.
Prerequisite: ATRO 606.
ATMO 618 Numerical Methods for the Geosciences
Credits 3. 3 Lecture Hours.
Mathematical theory and numerical techniques for modeling physical systems and processes in the Geosciences; discretization of continuum equations for solids and fluids; finite difference methods convergence, consistency, and stability; finite element and spectral methods in fluid dynamics and seismology; iterative solvers; implicit and explicit methods for diffusion and advection.
Prerequisite: Graduate classification or approval of instructor.
Cross Listing: GEOP 618 and OCNG 618.

ATMO 629 Climate Change
Credits 3. 3 Lecture Hours.
Climate of the geological and recent past; methods of assessing climate and climatic change; mechanisms, models, theories, impact and prediction of climatic change.
Prerequisites: ATMO 324 or equivalent; approval of instructor.

ATMO 631 Climate Modeling
Credits 3. 3 Lecture Hours.
A study of mathematical models used in the simulation of climate. Development and structure of selected members of the hierarchy of models ranging from energy balance models to general circulation models. Applications to paleoclimate and future climate scenarios.
Prerequisite: Approval of instructor.

ATMO 632 Statistical Methods in Climate Research
Credits 3. 3 Lecture Hours.
Advanced techniques especially applicable to climatology; space-time random field analysis applied to stochastic models, parameter estimation, statistical forecasting, data interpolation and signal detection; applications to real data and climate model output.
Prerequisites: STAT 601 or equivalent; approval of instructor.

ATMO 636 Dynamic Meteorology
Credits 3. 3 Lecture Hours.
General circulation; stratospheric dynamics; tropical systems.
Prerequisite: ATMO 611.

ATMO 638 Dynamics of Convective Clouds
Credits 3. 3 Lecture Hours.
Parcel, slice and entrainment concepts; bubble and plume theories; spherical vortex; the starting plume; one-dimensional models; selected topics of current interest.
Prerequisite: ATMO 611.

ATMO 645 Cloud and Precipitation Physics
Credits 3. 3 Lecture Hours.
Physics of atmospheric condensation nuclei, ice in the atmosphere; precipitation processes; artificial modification of clouds; precipitation.
Prerequisite: ATMO 612 or approval of instructor.

ATMO 651/OCNG 651 Dynamics of Ocean-Atmosphere Interaction
Credits 3. 3 Lecture Hours.
Major features of the atmosphere and ocean; interaction between the two systems; coupled modes of variability in ocean-atmosphere system; dynamics of El Niño-Southern Oscillation and related phenomena in the tropics; extratropical ocean-atmosphere feedbacks.
Prerequisite: OCNG 608 or ATMO 601.
Cross Listing: OCNG 651/ATMO 651.

ATMO 655 Satellite Data in Meteorology
Credits 3. 3 Lecture Hours.
Meteorological satellite programs of the United States and other countries; theory of meteorological measurements from artificial satellites; applications of satellite data in determinations of atmospheric structure and in forecasting; recent and current research studies; future programs.
Prerequisite: ATMO251 or approval of instructor.

ATMO 656 Tropical Meteorology
Credits 3. 3 Lecture Hours.
Role of the tropics in global circulation; structure and dynamics of the tropical zone; local and diurnal phenomena; synoptic components; tropical cyclones; role of cumulus-scale convection; current topics.
Prerequisite: ATMO 251 or approval of instructor.

ATMO 657 Mesometeorology
Credits 3. 3 Lecture Hours.
Mechanism and energetics of general circulation. Structure of large-scale systems. Persons desiring practice in analysis techniques should enroll for 1 hour or more of ATMO 658.
Prerequisite: ATMO 251 or approval of instructor.

ATMO 658 Synoptic Meteorology
Credits 3. 3 Lecture Hours.
Classical turbulence theories and statistical approaches; closure models; effects of rotation and stratification; interpretations of atmospheric observations.
Prerequisite: ATMO 611 or suitable background in fluid dynamics.

ATMO 659 Tropical Cyclones
Credits 3. 3 Lecture Hours.
Tropical climatology; structure evolution and motion of tropical cyclones; tropical cyclone hazards; large scale tropical phenomena.
Prerequisite: ATMO 251.

ATMO 661 Atmospheric Turbulence
Credits 3. 3 Lecture Hours.
Classical turbulence theories and statistical approaches; closure models; effects of rotation and stratification; interpretations of atmospheric observations.
Prerequisite: ATMO 611 or suitable background in fluid dynamics.

ATMO 664 Laboratory Methods in Atmospheric and Environmental Sciences
Credits 3. 2 Lecture Hours. 4 Lab Hours.
Classroom and laboratory course; introduction to chemical techniques used to monitor the atmosphere and environment; instrumentation, sampling strategies; survey of current literature focusing on development of new techniques.
Prerequisite: Graduate classification.

ATMO 677/OCNG 677 Geophysical Data Assimilation
Credits 4. 3 Lecture Hours. 2 Lab Hours.
Modern data assimilation methods applied to oceanic and atmospheric circulation models, as well as in other simple models; methods to interpolate one-, two-, and three-dimensional randomly spaced data to regular grids for use in numerical models of atmospheric and oceanic circulation.
Prerequisites: OCNG 657, ATMO 632, STAT 601.
Cross Listing: OCNG 677/ATMO 677.

ATMO 681 Seminar
Credit 1. 1 Other Hour.
Presented by students and faculty based upon their research work and upon surveys of the literature.
ATMO 685 Directed Studies
Credits 1 to 16. 1 to 16 Other Hours.
Offered to enable majors in meteorology to undertake and complete, with credit, in their particular fields of specialization, limited investigations not covered by any other courses in established curriculum.

ATMO 689 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours. 0 to 4 Lab Hours.
Special topics in an identified area of meteorology. May be repeated for credit.

ATMO 691 Research
Credits 1 to 23. 1 to 23 Other Hours.
For thesis or dissertation. Topic subject to approval of department head.

**ATTR - Athletic Training**

**ATTR 651 Clinical Education I**
Credits 2. 1 Lecture Hour. 8 Lab Hours.
Integration of clinical competencies with classroom instruction and a supervised field based experience in athletic training to link theory into practice.
Prerequisite: Enrollment in MS Athletic Training program.

**ATTR 652 Clinical Education II**
Credits 3. 1 Lecture Hour. 16 Lab Hours.
Integration of clinical competencies with classroom instruction and a supervised field based experience in athletic training to link theory into practice.
Prerequisite: ATTR 651, ATTR 660, ATTR 661 with grades of C or better.

**ATTR 653 Clinical Education III**
Credits 3. 1 Lecture Hour. 16 Lab Hours.
Integration of clinical competencies with classroom instruction and a supervised field based experience in athletic training to link theory into practice.
Prerequisite: ATTR 652, ATTR 662, ATTR 663, ATTR 668, ATTR 669 with grades of C or better.

**ATTR 654 Clinical Education IV**
Credits 2. 1 Lecture Hour. 8 Lab Hours.
Integration of clinical competencies with classroom instruction and a supervised field based experience in athletic training to link theory into practice.
Prerequisite: ATTR 653 with a grade of C or better.

**ATTR 655 Clinical Education V**
Credits 3. 1 Lecture Hour. 16 Lab Hours.
Integration of clinical competencies with classroom instruction and a supervised field based experience in athletic training to link theory into practice.
Prerequisite: ATTR 654, ATTR 664, ATTR 665, ATTR 671 with grades of C or better.

**ATTR 656 Clinical Education VI**
Credits 3. 1 Lecture Hour. 16 Lab Hours.
Integration of clinical competencies with classroom instruction and a supervised field based experience in athletic training to link theory into practice.
Prerequisite: ATTR 655, ATTR 666, ATTR 667, ATTR 670 with grades of C or better.

**ATTR 660 Prevention and Care of Athletic Injuries**
Credits 3. 3 Lecture Hours.
Prevention strategies and procedures, recognition and care of common injuries and conditions; foundational concepts and principles of the athletic training profession.
Prerequisite: Enrollment in MS Athletic Training program.

**ATTR 661 Prevention and Care of Athletic Injuries Lab**
Credit 1. 2 Lab Hours.
Laboratory to accompany ATTR 660; application of theories and practice skills.
Prerequisite: Concurrent enrollment in ATTR 660.

**ATTR 662 Clinical Examination and Diagnosis-Lower Extremity**
Credits 3. 3 Lecture Hours.
Pathomechanics, clinical examination, diagnosis and appropriate medical referral of orthopedic injuries and other conditions to the lower extremity and spine.
Prerequisite: Enrollment in MS Athletic Training program.

**ATTR 663 Clinical Examination and Diagnosis-Lower Extremity Lab**
Credit 1. 2 Lab Hours.
Laboratory to accompany ATTR 662; application of theories and skill practice.
Prerequisites: Concurrent enrollment in ATTR 662; enrollment in MS Athletic Training program.

**ATTR 664 Clinical Examination and Diagnosis-Upper Extremity**
Credits 3. 3 Lecture Hours.
Pathomechanics, clinical examination, diagnosis and appropriate medical referral of orthopedic injuries and other conditions to the upper extremity, head and cervical spine.
Prerequisite: ATTR 662.

**ATTR 665 Clinical Examination and Diagnosis-Upper Extremity Lab**
Credit 1. 0 Lecture Hours. 2 Lab Hours.
Laboratory to accompany ATTR 664; application of theories and skill practice.
Prerequisites: Concurrent enrollment in ATTR 664; enrollment in MS Athletic Training program.

**ATTR 666 Physical Rehabilitation**
Credits 3. 3 Lecture Hours.
The study of physical rehabilitation theory and techniques used as a therapeutic intervention for orthopedic injuries and conditions.
Prerequisite: Enrollment in MS Athletic Training program.

**ATTR 667 Physical Rehabilitation Lab**
Credit 1. 0 Lecture Hours. 2 Lab Hours.
Laboratory to accompany ATTR 666; application of theories and skill practice.
Prerequisites: Concurrent enrollment in ATTR 666; enrollment in MS Athletic Training program.

**ATTR 668 Therapeutic Modalities**
Credits 3. 3 Lecture Hours.
A detailed study of modern therapeutic devices used in the treatment and rehabilitation of orthopedic injuries and conditions.
Prerequisite: Enrollment in MS Athletic Training program.

**ATTR 669 Therapeutic Modalities Lab**
Credit 1. 0 Lecture Hours. 2 Lab Hours.
Laboratory to accompany ATTR 668; application of theories and skill practice.
Prerequisites: Concurrent enrollment in ATTR 668; enrollment in MS Athletic Training program.
ATTR 670 General Medical Conditions and Therapeutic Medication
Credits 3. 3 Lecture Hours.
Pathophysiology, assessment, and appropriate intervention and referral for general medical conditions and disabilities; common diagnostic tests and imaging assessment tools including commonly used therapeutic medications.
Prerequisite: Enrollment in MS Athletic Training program.

ATTR 671 Organization and Administration in Athletic Training
Credits 3. 3 Lecture Hours.
Organization and administration of athletic training services including financial, human resources, facility, information technology and risk management.
Prerequisite: Enrollment in MS Athletic Training program.

ATTR 672 Professional Preparation and Issues in Athletic Training
Credits 3. 3 Lecture Hours.
Knowledge and skills for successful pursuit of athletic training credentials, employment and continuing professional competencies; emphasis on current topics and issues contributing to the professional preparation of athletic training.
Prerequisite: Enrollment in MS Athletic Training program.

ATTR 673 Manual Therapy in Athletic Training
Credits 2. 1 Lecture Hour. 2 Lab Hours.
Manual therapy theory and techniques used as a therapeutic intervention for orthopedic injuries and conditions; indications and contradictions for the use of manual therapy; skill development in soft tissue assessment; application of manual and tool assisted techniques.
Prerequisite: Enrollment in MS athletic training program.

BAEN - Biological & Ag. Engr.

BAEN 601 Advanced Agricultural Systems Analysis
Credits 3. 3 Lecture Hours.
Application of operations research tools and techniques to the analysis and management of technical systems in agriculture; optimization techniques applied to materials handling, supply chain logistics and other food and agricultural applications.
Prerequisite: Graduate classification.

BAEN 614 Renewable Energy Conversions
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Managing energy/power systems through engineering and technical aspects of quantifying and designing the suitability of several types of renewable energy resources; providing new insights of vast resources that future engineers can harness to augment diminishing supplies of non-renewable energy.
Prerequisites: BAEN 320 or approval of instructor.

BAEN 617 Fundamentals of Nanoscale Biological Engineering
Credits 3. 3 Lecture Hours.
Nanostructures, nanofabrication methods, instrumentation and applications pertinent to Biological, Food and Bioenergy systems; provides opportunity to identify and utilize key tools available for fabricating, manipulating and analysis of nanostructures used in Biological Engineering applications.
Prerequisite: Graduate classification.

BAEN 620 Food Rheology
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Principles of elasticity, viscous flow and visco-elasticity applied to solid and liquid food materials; experimental determination of rheological properties using fundamental methods and empirical textural measurements; applications to food engineering research, textural measurement and quality control.
Prerequisites: FSTC 315; PHYS 201; graduate classification.

BAEN 622 Unit Operations in Food Processing
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Design of food process engineering systems; basic concepts of rheology and physical properties of foods; fundamentals of heat and mass transfer and process control.
Prerequisites: Fluid Mechanics, Thermodynamics, Fluid Dynamics.

BAEN 623/FSTC 623 Nanotechnology in Food Processing
Credits 3. 3 Lecture Hours.
Fundamental and applied knowledge related to nanoscale systems and technologies utilized in processing of foods; includes nanoscale physico-chemical properties of foods, applications, manufacture and analysis of nanotechnologies for food processing and preservation; relevant industrial and regulatory food nanotechnology associated aspects.
Prerequisites: FSTC 312, FSTC 313, FSTC 315, or AGSM 315/NFSC 315, or equivalent coursework, or approval of instructor.

BAEN 625 Advances in Food Process Engineering
Credits 3. 3 Lecture Hours.
Application of engineering fundamentals to the design of novel/advanced food processing systems including food irradiation, advances in thermal process, food freezing, food dehydration.
Prerequisite: Graduate classification.

BAEN 627 Engineering Aspects of Packaging
Credits 3. 3 Lecture Hours.
Introduction to properties and engineering aspects of materials for use as components of a package and/or packaging system; principles of design and development of packages; evaluation of product-package-environment interaction mechanisms; testing methods; environmental concerns; regulations.
Prerequisite: Graduate classification.

BAEN 631 Bioprocesses and Separations in Biotechnology
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Application of engineering principles to recovery and purification of biological compounds derived from cell grown in bioreactors, transgenic animals, and plants. Process development, design, and scale up of downstream processes used in biotechnology and pharmaceutical industry. Emphasis on extraction, sedimentation, membrane filtration, precipitation, and liquid chromatography.
Prerequisites: Graduate classification or approval of instructor.

BAEN 642/CVEN 642 Water-Energy-Food Nexus: Toward Sustainable Resource Management
Credits 3. 3 Lecture Hours.
Principles and application of the Water-Energy-Food nexus to state, national and international Water-Energy-Food securities and the interlinkages between them; exploration of quantitative framework to develop and assess sustainable tradeoffs of resources; hands on experiences; relevant real world projects or case studies.
Prerequisites: Strong analytical background; approval of instructor.
Cross Listing: CVEN 642/BAEN 642.
BAEN 651 Geographic Information Systems for Resource Management
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Geographic Information System (GIS) approach to the integration of spatial and attribute data to study the capture, analysis, manipulation and portrayal of natural resource data; examination of data types/formats, as well as the integration of GIS with remote sensing and Global Positioning System; laboratory includes extensive use of GIS applications to conduct analyses of topics in natural resources.
Prerequisites: Graduate classification.
Cross Listing: ESSM 651 and RENR 651.

BAEN 652 Advanced Topics in Geographic Information Systems
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Advanced GIS topics with a focus on modeling actual GIS applications including relational and database theory; design and implementation and its connection to GIS; surface analysis with digital terrain models; and an introduction to spatial statistics.
Prerequisite: BAEN 651.

BAEN 653 Bioreactor Design
Credits 3. 3 Lecture Hours.
Kinetics of enzyme reactions and cell growth applied to bioreactor design, media formulation, cell culture conditions, oxygen transfer and sterilization.
Prerequisite: CHEN 651 or approval of instructor.

BAEN 661 Experimental Methods in Biological and Agricultural Engineering
Credits 3. 3 Lecture Hours.
Planning and carrying out empirical research with appropriate application of statistical methods for experimental design and analysis; experimental design, data analysis, hypothesis testing, and experimental errors.
Prerequisites: STAT 211, STAT 302, STAT 303, or STAT 651, or equivalent with approval of instructor.

BAEN 662 Statistical Methods in Biological and Agricultural Engineering
Credits 3. 3 Lecture Hours.
Statistical methods applied to problems in biological and agricultural engineering; parameter estimation; probability distribution fitting; time-series analysis; random variable generation; uncertainty analysis.
Prerequisite: Graduate classification.

BAEN 665 Design of Biological Waste Treatment Systems
Credits 3. 3 Lecture Hours.
Management and treatment of high organic content waste streams, with emphasis on agricultural; municipal, and agro-Industry wastewater; engineering design of biological waste treatment processes: resource recovery from waste streams: recycle and reuse of finished effluents.
Prerequisite: Graduate classification or approval of instructor.

BAEN 667 Entropy Theory and its Application in Water and Environmental Engineering
Credits 3. 3 Lecture Hours.
Entropy theory, probability distributions, parameter estimation, hydrologic design, rainfall-runoff, infiltration and soil moisture, frequency analyses, sediment yield, velocity distributions, flow forecasting, hydraulic geometry, geomorphic structure, water distribution reliability and water availability assessment.
Prerequisites: Graduate classification; knowledge of calculus and statistics at the undergraduate level and approval of instructor.

BAEN 669 Water Quality Engineering
Credits 3. 3 Lecture Hours.
Nonpoint source pollution processes including transport mechanisms and contaminant fate; design of best management practices for abating nonpoint source pollution.
Prerequisites: AGEN 350 or equivalent; SCSC 301; ENGR 214; graduate classification.

BAEN 670 Air Pollution Engineering
Credits 3. 3 Lecture Hours.
Current topics in air pollution engineering including design and operation of air pollution abatement systems (cyclone, bag filters and scrubbers), emission factors, dispersion modeling, permitting, odor sensing and control, EPA/State Air Pollution Regulatory Agency (SAPRA), TSP, PM10, and PM2.5.
Prerequisites: BAEN 477 or MEEN 477, or approval of instructor.

BAEN 672 Small Watershed Hydrology
Credits 3. 3 Lecture Hours.
Hydrology of small agricultural watersheds; precipitation frequency analysis; infiltration; runoff; erosion theory; sediment transport theory; evapotranspiration, and use of hydrological models.
Prerequisites: Graduate classification.

BAEN 673 Model Small Watersheds
Credits 3. 3 Lecture Hours.
Transport of water and chemicals in small agricultural watersheds; simulation using hydrologic models coupled with geographical information systems (GIS); impact of land use on the quality of surface water and groundwater evaluated.
Prerequisites: Graduate classification.

BAEN 674 Vadose Zone Hydrology
Credits 3. 3 Lecture Hours.
Fundamental concepts and advanced mathematical and experimental techniques for quantifying water, chemical, microorganism, and heat transport in the vadose zone (between soil surfaces and groundwater); provides a common platform for addressing issues related to soil and water resources, hydrology, geochemistry, microbiology, ecology, hydrogeology, and environmental engineering.
Prerequisite: Graduate classification.

BAEN 675 Hydrology Across Scale
Credits 3. 3 Lecture Hours.
Advanced concepts of surface and subsurface hydrologic processes, measurements, and modeling techniques across different spatio-temporal scales; contemporary issues related to the soil and water resources, hydrogeology, geochemistry, microbiology, ecology, hydrology, and environmental engineering.
Prerequisite: Graduate classification in any engineering, agricultural science or geoscience program with environmental focus.

BAEN 681 Seminar
Credit 1. 1 Other Hour.
Reviews, reports and discussion of ideas, recent advances and current topics.

BAEN 683 Peer-Review Process and Publication
Credit 1. 1 Lecture Hour.
Techniques for communicating results of research that are defendable in a peer review process; student and advisor will select a research topic, identifying an appropriate target refereed journal; no thesis/dissertation preparation as a writing project accepted; critique other papers; prepare paper for review by instructor.
Prerequisite: Graduate classification in Biological and Agricultural Engineering only.
BAEN 684 Professional Internship  
Credits 1 to 6. 1 to 6 Other Hours.  
An on-the-job supervised experience program, conducted on an individual basis in the area of the student’s specialization in mechanized agriculture.  
Prerequisite: Graduate classification or approval of instructor.

BAEN 685 Directed Studies  
Credits 1 to 4. 1 to 4 Other Hours.  
Advanced laboratory or field problems not related to student’s thesis.  
Prerequisite: Graduate classification.

BAEN 689 Special Topics in...  
Credits 1 to 4. 1 to 4 Lecture Hours. 0 to 4 Lab Hours.  
Selected topics in an identified area of agricultural engineering. May be repeated for credit.

BAEN 690 Theory of Research  
Credit 1. 1 Lecture Hour.  
Development of research inquiry and discussion of applicable experimental design, theoretical techniques and methodological principles of conducting original research; evaluation of current research of faculty and students and in engineering and scientific literature.  
Communication of research proposals and results. May be repeated for credit.  
Prerequisites: Graduate classification.

BAEN 691 Research  
Credits 1 to 23. 1 to 23 Other Hours.  
Research for thesis or dissertation.

BICH - Biochemistry

BICH 601 Fundamentals of Biochemistry I  
Credits 3. 3 Lecture Hours.  
Basic biochemical concepts pertaining to the structure of the major biomolecules (proteins, carbohydrates, lipids and nucleic acids); the relationship of structure to function of these molecules; structure and action of enzymes; principles of bioenergetics.  
Prerequisite: One year of organic chemistry.

BICH 602 Fundamentals of Biochemistry II  
Credits 3. 3 Lecture Hours.  
Major metabolic pathways for carbohydrates, lipids, amino acids, proteins and nucleic acids, emphasizing oxidative processes and the biosynthesis of RNA, DNA and protein; regulation of cellular metabolism.  
Prerequisite: BICH 601.

BICH 603 Principles of Biochemistry & Biophysics  
Credits 3. 3 Lecture Hours.  
Principles of Biochemistry & Biophysics. A modern quantitative, analytical and model-building-based approach to expand knowledge of the biochemical and biophysical properties of macromolecules found in living matter, including proteins, lipids, carbohydrates and nucleic acids.  
Prerequisites: BICH 410 or BICH 601; CHEM 228 and CHEM 323; or approval of the instructor.

BICH 605 Methods of Biochemical Analysis  
Credits 3. 3 Lecture Hours.  
Experimental techniques important in biochemistry including methodologies for data analysis.  
Prerequisite: Graduate classification in biochemistry or approval of instructor.

BICH 608 Critical Analysis of the Biochemical Literature  
Credits 2. 2 Lecture Hours.  
Reading and presentation of original articles in biochemistry and related fields to enhance understanding of experimental logic and scientific communication.  
Prerequisite: Graduate classification in biochemistry or approval of instructor.

BICH 609 Preparation of a Biochemical Research Proposal  
Credits 2. 2 Lecture Hours.  
Development and presentation of hypotheses, specific aims, significance and experimental approaches for a biochemical research proposal.  
Prerequisite: Graduate classification in biochemistry.

BICH 609/BIOL 650 Genomics  
Credits 3. 3 Lecture Hours.  
Modern genomics as a tool for understanding biological systems; review of gene structure and organization and the history of sequencing technologies; focus on transcriptional, translational and functional genomics.  
Prerequisite: BICH 431/GENE 431 or GENE 431/BICH 431 or approval of instructor.  
Cross Listing: BICH 603; CHEM 324.

BICH 624 Enzymes, Proteins and Nucleic Acids  
Credits 3. 3 Lecture Hours.  
Chemical and physical properties of enzymes, proteins and nucleic acids; thermodynamics, kinetics and mechanisms of enzyme-catalyzed reactions and protein-nucleic acid interactions.  
Prerequisites: BICH 603; CHEM 324.

BICH 625/MCMD 625 Nucleic Acid--Protein Interactions  
Credit 1. 1 Lecture Hour.  
Mechanisms of nucleic acid-protein interactions involved in fundamental biochemical processes such as DNA replication and rearrangement, transposition, transcription, RNA splicing and translation; original research articles presented focusing on experimental approaches, interpretation of results and overall significance. Course may be taken 8 times for credit.  
Prerequisites: BICH 431/GENE 431 or GENE 431/BICH 431 or equivalent; approval of instructor.

BICH 628/CSCE 628 Computational Biology  
Credits 3. 3 Lecture Hours.  
Introduction to computational biology; formulations of biology problems as computational problems; computational approaches to solve problems in genomics and proteomics.  
Prerequisite: Graduate classification or approval of instructor.  
Cross Listing: CSCE 628/BICH 628.

BICH 631/GENE 631 Biochemical Genetics  
Credits 3. 3 Lecture Hours.  
Genetic control of cellular metabolism; mechanism of gene action; gene-enzyme relationships; regulation of gene expression; structure and organization of genomes; biochemical manipulation and characterization of genetic molecules.  
Prerequisites: BICH 431/GENE 431 or GENE 431/BICH 431 or BICH 603.  
Cross Listing: GENE 631/BICH 631.

BICH 650/BIOL 650 Genomics  
Credits 3. 3 Lecture Hours.  
Modern genomics as a tool for understanding biological systems; review of gene structure and organization and the history of sequencing technologies; focus on transcriptional, translational and functional genomics.  
Prerequisite: Graduate classification or approval of instructor.  
Cross Listing: BIOL 650/BICH 650.

BICH 654 Structural Biochemistry  
Credits 3. 3 Lecture Hours.  
Basic physics of X-ray diffraction, crystal structure methods, introduction to structural data bases, molecular geometry and molecular modeling.  
Prerequisite: Approval of instructor.
BICH 655 Crystallography Methods
Credits 3. 2 Lecture Hours. 3 Lab Hours.
The practice of x-ray diffraction in the study of biomolecules; solving protein crystal structures.
Prerequisite: Graduate classification.

BICH 656 RNA Biology
Credits 3. 3 Lecture Hours.
Emphasis on newly discovered RNA-mediated processes and regulation; range of topics in modern RNA biology include RNA silencing; RNA-guided epigenetic regulation, CRISPR/Cas immunity and genome editing, telomerase biogenesis, riboswitches, exosome and editosome; application of RNA biology in medicine and biotechnology.
Prerequisites: BICH 301 and BICH 302.

BICH 657 Introduction to Structural Biology
Credit 1. 1 Lecture Hour.
Protein expression, purification, characterization, crystallization and structural determination by X-ray crystallography; includes an eight hour workshop on crystallography.
Prerequisite: Graduate classification.

BICH 661 Advanced Genome Annotation with Ontologies
Credit 1. 2 Lab Hours.
Advanced topics in functional annotation using ontologies; usage issues and quality control for ontologies and annotations; mentoring annotation activities from BICH 460 and evaluation of annotations. May be taken three times for credit.
Prerequisite: Graduate classification or approval of instructor.

BICH 662 Eukaryotic Transcription
Credit 1. 1 Lecture Hour.
Intensive short course in molecular mechanisms of eukaryotic transcription, and its regulation.
Prerequisite: BICH 631/GENE 631 or GENE 631/BICH 631 or approval of instructor.

BICH 664 Fluorescence Spectroscopy
Credit 1. 1 Lecture Hour.
Theory underlying fluorescence spectroscopy as well as practical considerations that must be understood when utilizing fluorescence as an analytical tool; the use of both steady-state and time-resolved fluorescence measurements to evaluate fluorescence quantum yield, quenching, anisotropy, and energy transfer.
Prerequisite: Graduate classification.

BICH 665 Biochemical Kinetics
Credit 1. 1 Lecture Hour.
Theoretical principles and practical approaches to analysis of chemical kinetics with specific examples of applications to biochemistry and biochemical investigations.
Prerequisite: Graduate classification.

BICH 667 Molecular Probes
Credit 1. 1 Lecture Hour.
Function of biomolecules in the context of living cells (in cellulo as opposed to in vitro); chemical tools and analytical techniques; application in the investigation of cellular processes; identification of biological problems and design.
Prerequisite: Graduate classification.

BICH 671/MCMD 671 Macromolecular Folding and Design
Credit 1. 1 Lecture Hour.
Oral presentations and discussions in the general area of biomolecular structure, folding, function and design. May be taken 12 times.
Prerequisite: Approval of instructor.
Cross Listing: MCMD 671/BICH 671.

BICH 672/MCMD 672 Biological Membranes
Credit 1. 1 Lecture Hour.
Seminar-based course examining recent discoveries in the structure, function and assembly of biological membranes; oral presentation by students on current literature in molecular biology and biochemistry.
Prerequisite: Approval of instructor.
Cross Listing: MCMD 672/BICH 672.

BICH 673/GENE 673 Gene Expression
Credit 1. 1 Lecture Hour.
Oral presentations and discussions related to the biochemistry and molecular biology of gene expression in animal, plant and microbial systems. May be repeated for credit up to 12 times.
Prerequisite: Graduate classification in biochemistry or genetics or approval of instructor.
Cross Listing: GENE 673/BICH 673.

BICH 674/MCMD 674 Protein Folding and Stability
Credit 1. 1 Lecture Hour.
Selected topics from recent literature in the general areas of protein folding, structure, and stability.
Prerequisite: Approval of instructor.
Cross Listing: MCMD 674/BICH 674.

BICH 675 Plant Biochemistry and Genomics
Credit 1. 1 Lecture Hour.
Overview of current literature dealing with plant biochemistry/genomics; biochemistry topics will include the function of protein-protein interactions related to plant specific processes such as plant-pathogen interactions; genomics topics will focus on current analysis of plant genomes and how the derived information is being utilized to elucidate biochemical pathways.
Prerequisite: Graduate classification.

BICH 676 Bacteriophage Biology
Credit 1. 1 Lecture Hour.
Oral presentation and discussion in the general area of the viruses of microbes and bacteria; literature review with a broad scope, from basic molecular biology of phages to practical applications of microbial virus technology. May be taken 12 times for credit.
Prerequisite: Approval of instructor.

BICH 677 Chemical Genetics and Drug Discovery
Credit 1. 1 Lecture Hour.
Review, discuss and present scientific literature studies based on the usage of small molecules to alter protein function. May be repeated for credit.
Prerequisite: Graduate classification.

BICH 678 Metal Ions
Credit 1. 1 Lecture Hour.
Understanding the roles of metals in biological systems and the methods used in biochemical and cell biological processes; reading primary research literature critically, critiquing research designs in terms of innovation, significance and logic, and uncovering both strengths and weaknesses of the discussed articles.
Prerequisites: CHEM 628 or approval of instructor.
BICH 679/ MGMT 674 Building Scientific Relationships
Credit 1. 1 Lecture Hour.
Addressing aspects of human element of scientific research; emotional and cultural intelligence, resiliency, team dynamics, leadership, effective communication with others, strategies for conflict resolution and best practices for mentoring undergraduates.
Prerequisites: Successful completion of one year of graduate study and affiliation with a research laboratory in the life sciences.
Cross Listing: MGMT 674/BICH 679.

BICH 681 Seminar
Credit 1. 1 Lecture Hour.
Original articles in biochemistry and related fields designed to broaden understanding of problems in the field and to stimulate research.

BICH 685 Directed Studies
Credits 1 to 12. 1 to 12 Other Hours.
Biochemical laboratory procedures; preparations and instrumentation; problems assigned according to experience, interests and needs of individual student.
Prerequisite: Approval of instructor.

BICH 689 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours. 0 to 4 Lab Hours.
Selected topics in an identified area of biochemistry. May be repeated for credit.
Prerequisite: Approval of instructor.

BICH 690 Theory of Biochemical Research
Credits 2. 2 Lecture Hours.
State-of-the-art examination of modern trends in various subfields of modern biochemistry concentrating on the design of experiments, evaluation of research results and discussion of the current literature. May be repeated for credit.

BICH 691 Research
Credits 1 to 23. 1 to 23 Other Hours.
Research for thesis or dissertation. Laboratory facilities available for original investigations in various phases of biochemistry.
Prerequisite: Approval of major advisor.

BICH 697 Methods in Teaching Biochemistry Laboratory
Credit 1. 1 Lecture Hour.
Theory and practical aspects of teaching Biochemistry labs, with emphasis on content, grading, instructional methods and practical aspects of biochemistry labs. May be repeated for credit.
Prerequisite: Graduate classification in biochemistry.

**BIED - Bilingual Education**

BIED 610 Hispanic Bilingual Assessment and Monitoring Students
Credits 3. 3 Lecture Hours.
Assessing language ability; language assessment; evaluating and scoring different types of assessments; guided field based experiences.
Prerequisites: Graduate classification; approval of department head.

BIED 611 Dual Language Program Methodologies
Credits 3. 3 Lecture Hours.
Use of theory and effective teaching practice in promoting students’ development of strong social and academic skills; relationship of culture to language; guided field experiences.
Prerequisites: Graduate classification; approval of department head.

BIED 612 Content Area Instruction for Hispanic Bilingual Programs
Credits 3. 3 Lecture Hours.
Theories and approaches for integrating English as second language; learning strategies on how plan, procedures and units engage language teachers, students, and learning environment; guided filed experiences.
Prerequisites: Graduate classification; approval of department head.

BIED 613 Spanish/English Biliteracy
Credits 3. 3 Lecture Hours.
Social-linguistic characteristics of second language learners acquiring literacy skills; reading and literature instruction for second language learners; reading and writing process across the curriculum for Hispanic second language learners; guided field experiences.
Prerequisites: Graduate classification; approval of department head.

BIED 614 Bilingual Education Curriculum Development
Credits 3. 3 Lecture Hours.
Analysis of past and current trends in curriculum development in bilingual education; guided field experiences.
Prerequisites: Graduate classification; approval of department head.

BIED 615 Teacher Action Research in Bilingual Education
Credits 3. 3 Lecture Hours.
Philosophy of teacher action research in bilingual education settings using qualitative methods with educational issues related to English language learners; provide guided practice in data collection, analysis, and presentation of action research.

BIED 616 Spanish for Bilingual and Dual Language Programs
Credits 3. 3 Lecture Hours.
Understanding of dual language programs; literacy instruction through Spanish; socio-linguistic perspectives on literacy competence and effective instructional practices; guided field experiences.
Prerequisite: Graduate classification; approval of department head.

BIED 617 Evaluation of Programs with Bilingual and Language Minority Students K-12
Credits 3. 3 Lecture Hours.
Evaluation and research models and methodologies in education of bilingual/language minority students from K-12.
Prerequisites: EPSY 610 or approval of instructor.

BIED 618 Early Language and Literacy
Credits 3. 3 Lecture Hours.
Investigation of current language and literacy intervention research for young Hispanic/Latino children in preschool through second grade; emphasis on current intervention research targeting children at risk for reading difficulties in Spanish and/or English.
Prerequisites: Graduate classification; approval of department head.

BIED 619 Second Language Acquisition in Pre-K-12; Advanced Theory and Practice
Credits 3. 3 Lecture Hours.
Examination of theory as a framework for explaining relationships, a research guide, and assumptions that inform practice; review how theory and practice for English only students have attempted to explain second language acquisition in second language learners.
Prerequisites: Graduate classification; approval of instructor; BIED 611; BIED 612.

BIED 620 Current Issues in Bilingual Education
Credits 3. 3 Lecture Hours.
Survey of historical, political, language and sociocultural issues and their impact on the education of language minority groups.
Prerequisites: EPSY 611 and EPSY 612; graduate classification; approval of instructor and department head.
**BIED 621 Methods for Bilingual Research**
Credits 3. 3 Lecture Hours.
Understanding educational research and research methodologies; use of research findings to appropriately inform school and classroom practices; overview of the research methodology to develop skills as future researchers and consumers of research; examination of qualitative and quantitative research methodologies and mixed methods in relation to their application to diverse populations.
**Prerequisites:** Graduate classification; approval of department head.

**BIED 632 Research in Second Language Education**
Credits 3. 3 Lecture Hours.
Studies related to the teaching/learning process in two languages and field methods for carrying out those studies.
**Prerequisites:** EPSY 611; EPSY 612 or consent of instructor.

**BIED 682 Seminar in...**
Credit 1. 1 Other Hour.
Knowledge, skills and attitudes in bilingual education. Specific topics are announced for each seminar offered. May be taken more than once but not to exceed 6 hours of credit.
**Prerequisite:** Approval of department head.

**BIED 683 Field Practicum in...**
Credits 1 to 15. 1 to 15 Other Hours.
Supervised experience in professional employment settings in bilingual education with research related to current issues; requires a self-initiated proposal, a mid-semester formative report, and an end-of-semester summative report. Repeatable to 15 hours total.
**Prerequisite:** Approval of instructor and department head.

**BIED 684 Professional Internship**
Credits 1 to 4. 1 to 4 Other Hours.
Limited to advanced doctoral students; University directed experience in a professional employment setting; full-time participation and responsibility in experiences related to bilingual education. Repeatable to 9 hours total.
**Prerequisites:** Approval of department head six weeks prior to registration; approval of department head.

**BIED 685 Directed Studies**
Credits 1 to 4. 1 to 4 Other Hours.
Directed individual study of selected problems.
**Prerequisite:** Approval of department head.

**BIED 689 Special Topics In...**
Credits 1 to 4. 1 to 4 Other Hours.
Selected topics in an identified area of educational psychology. May be repeated for credit.
**Prerequisite:** Approval of department head.

**BIED 690 Theory of Educational Psychology Research**
Credits 3. 3 Lecture Hours.
Theory and design of research problems and experiments in various subfields of educational psychology; communication of research proposals and results; evaluation of current research of faculty and students and review of current literature. May be repeated for credit.
**Prerequisite:** Approval of instructor and department head.

**BIED 691 Research**
Credits 1 to 23. 1 to 23 Other Hours.
Research for thesis or dissertation.
**Prerequisite:** Approval of department head.

---

**BIOL - Biology**

**BIOL 601/NRSC 635 Biological Clocks**
Credits 3. 3 Lecture Hours.
Introduction to the formal properties of biological rhythms; cellular and molecular bases for rhythmicity; temporal adaptations of organisms using clocks.
**Prerequisite:** Graduate classification or approval of instructor.
**Cross Listing:** NRSC 635/BIOL 601.

**BIOL 602/MSEN 612 Fundamentals of Transmission Electron Microscopy**
Credits 3. 2 Lecture Hours. 6 Lab Hours.
State-of-the-art fundamentals in transmission electron microscopy (TEM); theoretical background supporting a strong hands-on course component comprising specimen preparation and image acquisition/interpretation; practical experience to attain a proficiency level permitting independent operation of transmission electron microscopes in the Microscopy and Imaging Center.
**Prerequisite:** Students are required to write a half-page summary describing the specific problem they wish to resolve using transmission electron microscopy.
**Cross Listing:** MSEN 612/BIOL 602.

**BIOL 603/MSEN 613 Advanced TEM Methodologies in Life and Material Sciences (TEM II)**
Credits 3. 1 Lecture Hour. 6 Lab Hours.
Advanced TEM methodologies including specimen preparation and TEM imaging/analysis techniques as applicable to both biological and material samples; theory designed to support a strong hands-on component comprising specimen preparation, different imaging/diffraction/spectroscopic techniques and data interpretation.
**Prerequisites:** BIOL 602/MSEN 612; graduate classification.
**Cross Listing:** MSEN 613/BIOL 603.

**BIOL 604/MSEN 614 Fundamentals of Scanning Electron Microscopy and Environmental Scanning Electron Microscopy**
Credits 2. 1 Lecture Hour. 3 Lab Hours.
Fundamentals of Scanning Electron Microscopy (SEM) and Environmental Scanning Electron Microscopy (ESEM). Provides biologists, material scientists, and students from other disciplines with the techniques of operation of the scanning electron microscope (SEM) and the environmental SEM (ESEM) coupled with the appropriate theoretical background knowledge; individual instruction in support of their research endeavors involving SEM/ESEM.
**Prerequisite:** Graduate classification.
**Cross Listing:** MSEN 614/BIOL 604.

**BIOL 606 Microbial Genetics**
Credits 3. 3 Lecture Hours.
Basic understanding of microbial genetic systems and how genetic analyses can be used to investigate fundamental biological processes in bacteria.
**Prerequisite:** Approval of instructor.

**BIOL 608 Theory and Applications of Light Microscopy**
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Provides biologists, material scientists and students from other disciplines with the theoretical background and practical techniques of sample preparation, operation of light microscopes as well as image acquisition and processing; individual instruction which facilitates the completion of their research projects involving light microscopic techniques.
**Prerequisite:** half-page write-up describing how their graduate work will benefit.
BIOL 609 Molecular Tools in Biology
Credits 3. 3 Lecture Hours.
Interactive lecture course in molecular biology for beginning graduate students; introduction to tools and methodologies used in prokaryotic and eukaryotic molecular labs; choosing the appropriate experimental technique for a given scientific question; virtual experiments will reinforce the applications and introduce useful bioinformatics tools.
Prerequisite: Graduate classification.

BIOL 610 Evolution
Credits 3. 3 Lecture Hours. 0 Lab Hours.
Fundamentals of evolutionary biology with an emphasis on evolutionary theory.
Prerequisite: Graduate classification or approval of instructor.

BIOL 611 Developmental Genetics
Credits 3. 3 Lecture Hours.
Major paradigms of eukaryotic gene regulation in terms of the role of gene expression during ontogeny and the effect of dysfunction in these processes on the neoplastic state.

BIOL 612 Fundamental Molecular Cell Biology
Credits 3. 3 Lecture Hours.
Foundation in current molecular and cellular biology and genetics; basis for many interdisciplinary studies including biostatistics, cancer biology, and biomedical materials and devices.
Prerequisites: Graduate classification; non-biology majors.

BIOL 613 Cell Biology
Credits 3. 3 Lecture Hours.
Consideration of the eukaryotic cell as a functional, integrated unit in living organisms including structure, composition, function and biogenesis of subcellular components; dynamic processes and interactions of cells, including division, communication, and death; experimental approaches in modern cell biology and selected applications of experimental cell biology to problems in medicine.
Prerequisite: BICH 410 or BIOL 213; concurrent enrollment in BIOL 213 or BICH 410 strongly discouraged.

BIOL 615/NRSC 636 Signaling in Behavior and Development
Credits 3. 3 Lecture Hours.
Will focus on signaling pathways used in multicellular animals. In each lecture, major signaling pathways used in behavior, physiology, and development will be introduced at the molecular level, and then be discussed in the context of organismal biology.
Prerequisite: Graduate classification.
Cross Listing: NRSC 636/BIOL 615.

BIOL 622 Microbial Physiology
Credits 3. 3 Lecture Hours.
An area of microbial physiology will be explored at the molecular, cellular, and genetic levels through reading and discussion of classic and current research literature. The area of focus may change from semester to semester. May be taken three times for credit with approval of instructor.
Prerequisite: Graduate classification.

BIOL 625 Structural and Molecular Biology
Credits 3. 3 Lecture Hours.
Successfully integrate structural knowledge into areas of interest; literature examples used to integrate structural information from large macromolecular complexes to single proteins with functional information obtained through other methods.
Prerequisite: Graduate classification or approval of instructor.

BIOL 627/NRSC 601 Principles of Neuroscience I
Credits 3. 3 Lecture Hours.
Detailed introduction to the basic fundamentals of cellular and molecular neuroscience; topics include membrane potentials, action potential generation, and the mechanisms underlying synaptic transmission, as well as their molecular basis.
Prerequisites: Graduate classification or approval of instructor.
Cross Listing: NRSC 601/BIOL 627.

BIOL 628/NRSC 602 Principles of Neuroscience II
Credits 3. 3 Lecture Hours.
Fully integrated overview of nervous system organization and systems-level neurobiology; broad topics include sensory systems and sensory systems function, motor systems and neuromuscular function, central pattern generation and locomotion, homeostatic regulation, motivation, emotions, learning and memory, and circadian rhythms.
Prerequisites: Graduate classification or permission of instructor.
Cross Listing: NRSC 602/BIOL 628.

BIOL 634/NRSC 634 Comparative Neurobiology
Credits 3. 3 Lecture Hours.
Cellular, molecular and systems neurobiology, together with neuroethology. A comparative approach to subject matter is stressed. Topics such as evolution of nervous systems and their diverse structure and complex functions are dealt with.
Cross Listing: NRSC 634/BIOL 634.

BIOL 635 Plant Molecular Biology
Credits 3. 3 Lecture Hours.
Molecular aspects of plant growth, development, reproduction and evolution, emphasizing the structure, function, regulation, interaction and manipulation of plant genes; practical applications of plant molecular biology.
Prerequisite: GENE 431/BICH 431.

BIOL 644/NRSC 644 Neural Development
Credits 3. 3 Lecture Hours.
Classical and current research literature to explore the major events in the development of a nervous system, including topics ranging from neurogenesis to synapse information.
Prerequisite: Graduate classification.
Cross Listing: NRSC 644/BIOL 644.

BIOL 647 Digital Biology
Credits 4. 4 Lecture Hours.
Obtain, organize, process, and analyze genome and genome-related data; learning to ask and answer biologically relevant questions by designing and performing experiments using computers.
Prerequisite: Graduate classification or approval form instructor.

BIOL 650/BICH 650 Genomics
Credits 3. 3 Lecture Hours.
Modern genomics as a tool for understanding biological systems; review of gene structure and organization and the history of sequencing technologies; focus on transcriptional, translational and functional genomics.
Prerequisite: Graduate classification or approval of instructor.
Cross Listing: BICH 650/BIOL 650.
BIOL 651 Bioinformatics  
Credits 3. 3 Lecture Hours. 
Introduction to applications related to information processing in biological research with practical training exercises; includes internet databases, sequence alignment, motif prediction, gene and promoter prediction, phylogenetic analysis, protein structure classification, analysis and prediction, genome annotation, assembly and comparative analysis, and proteomics analysis.  
Prerequisite: Graduate classification or approval of instructor.

BIOL 652 Epigenetic Mechanisms  
Credits 3. 3 Lecture Hours. 
Lectures and discussion of current research in epigenetic inheritance and its mechanisms in a variety of organisms. Structure of the course includes paper discussion and presentation, grant-writing, and grant-review.  
Prerequisite: BICh 631/GENE 631.

BIOL 661 Antimicrobial Agents  
Credit 1. 1 Lecture Hour. 
Understanding of microbial agents, limitations of use, biosynthesis and regulation, and challenges in development as new therapeutics.  
Prerequisite: Approval of instructor.

BIOL 663 Biology of the Crustacea  
Credits 4. 3 Lecture Hours. 3 Lab Hours. 
Classification, life history, morphology, physiology, ecology, diseases, parasites and predators of crustaceans; economic aspects of crustaceans; original literature emphasized.  
Prerequisite: BIOL 335 or equivalent, or approval of instructor.

BIOL 665 Biology of Invertebrates  
Credits 4. 3 Lecture Hours. 3 Lab Hours. 
Morphology, biology and phylogeny of invertebrates. Topics may be either detailed discussions of specific organisms or comparative information on a process.  
Prerequisite: BIOL 335 or equivalent.

BIOL 680 Departmental Colloquium  
Credit 1. 1 Lecture Hour. 
Attend presentations given by renowned scientists from various fields of biology; learn about new developments in science; stay abreast of current and trending research topics.  
Prerequisite: Graduate classification in biology or microbiology.

BIOL 681 Seminar  
Credit 1. 1 Lecture Hour. 
Detailed reports on specific topics in field chosen. Students may register in up to but no more than three sections of this course in the same semester.

BIOL 682 Research Seminar  
Credit 1. 1 Other Hour. 
Seminars presented by students based upon their research projects.  
Prerequisite: Graduate classification.

BIOL 683 Experimental Design in Biology  
Credits 3. 3 Lecture Hours. 
Design of scientific research projects in the field of biology; a wide range of biological experiments designed with the appropriate statistical technique for analysis; design biological studies that are statistically tractable and perform basic statistical analyses using the statistical programming language R.  
Prerequisites: Graduate classification and STAT651 or approval of instructor.

BIOL 685 Directed Studies  
Credits 1 to 8. 1 to 8 Other Hours. 
Limited investigations in fields other than those chosen for thesis or dissertation.

BIOL 686 Biomedical Therapeutics Development  
Credit 1. 1 Lecture Hour. 
Basic aspects of the biotechnology business; includes key aspects of biotechnology patents, the main steps in preclinical drug development and company structure and funding.  
Prerequisites: Graduate classification or approval of instructor; BIOL 696 or concurrent enrollment.

BIOL 689 Special Topics in...  
Credits 1 to 4. 1 to 4 Lecture Hours. 0 to 4 Lab Hours. 
Selected topics in an identified area of biology.

BIOL 691 Research  
Credits 1 to 23. 1 to 23 Other Hours. 
Research for thesis or dissertation.

BIOL 694 Graduate Orientation  
Credit 1. 1 Lecture Hour. 
Instruction on what constitutes fraud in science, how to recognize it and avoid committing fraud; includes basis of ethics and plagiarism; negotiation techniques and conflict management; regulations and ethics covering animal and human experiments; record-keeping; data management; peer review. May be taken on a satisfactory/unsatisfactory basis.  
Prerequisite: Graduate classification.

BIOL 696 Ethics and Responsible Conduct of Research  
Credit 1. 1 Lecture Hour. 
Instruction on what constitutes fraud in science, how to recognize it and avoid committing fraud; includes basis of ethics and plagiarism; negotiation techniques and conflict management; regulations and ethics covering animal and human experiments; record-keeping; data management; peer review. May be taken four times for credit.  
Prerequisite: Graduate classification or approval of instructor.

BIOL 697 Methods in Teaching Biology Laboratory  
Credit 1. 1 Lecture Hour. 
Introduction to teaching methods associated with the teaching of undergraduate biology laboratories; emphasis on effective preparation and delivery of laboratory course content, clear instructions for procedures and laboratory safety.  
Prerequisite: Graduate classification in a biological science.

BIOL 698/NRSC 698 Special Topics Behavior, Genes and Evolution  
Credits 3. 3 Lecture Hours. 
This literature and lecture-based course will introduce an integrative approach to the study of animal behavior, complementing evolutionary and ecological perspectives with molecular and genetic approaches and methodologies.  
Prerequisite: Graduate classification.  
Cross Listing: NRSC 698/BIOL 698.

BIOT - Biotechnology

BIOT 601 Biotechnology Principles and Techniques I  
Credits 4. 0 Lecture Hours. 8 Lab Hours. 
Basic theories and techniques essential to laboratory research in agricultural, environmental or medical biotechnology such as laboratory safety and records keeping, genome informatics, DNA analysis, RNA analysis, protein analysis and analysis of biological systems.  
Prerequisite: Graduate classification and approval of instructor.
BIOT 602 Biotechnology Principles and Techniques II  
Credits 4. 0 Lecture Hours. 8 Lab Hours.  
Application of basic theories and principles of biotechnology to team and individual research problems in a laboratory setting.  
Prerequisites: BIOT 601; graduate classification.  

BIOT 603 Applied Principles of Biotechnology  
Credits 4. 1 Lecture Hour. 9 Lab Hours.  
Applied experience with biotechnology laboratory procedures and instrumentation in a research environment. May be repeated twice for credit.  
Prerequisites: BIOT 601; graduate classification.  

BIOT 635 Molecular Biotechnology  
Credits 3. 3 Lecture Hours.  
Theory and application of molecular biotechnology; consideration of the structure and function of cellular components and methods to characterize these components with reference to examples in industry.  
Prerequisite: Approval of instructor.  

BIOT 645 Biotechnology Writing  
Credits 3. 3 Lecture Hours.  
Development of biotechnology writing and editorial skills; communication of specialized information to the public and peers.  
Prerequisite: Graduate classification and approval of instructor.  

BIOT 681 Biotechnology Seminar  
Credit 1. 1 Other Hour.  
Review and discussion of current topics in biotechnology industries, with focus on skills essential to success in the corporate environment such as communication, interviewing and interpersonal skills.  
Prerequisite: Graduate classification and approval of instructor.  

BIOT 684 Directed Professional Internship  
Credits 4. 4 Other Hours.  
A directed internship in an organization that provides on-the-job training with professionals in organizational settings appropriate to the student's professional objectives. May be taken two times for credit.  
Prerequisite: Approval of the Chair of the Faculty of Biotechnology.  

BIOT 685 Directed Studies  
Credits 1 to 4. 1 to 4 Other Hours.  
Provides customized training and experience to students in the Biotechnology Program; topics can include laboratory research, scientific literature reviews, biotechnology market surveys, and training in technology commercialization.  
Prerequisite: Approval of instructor.  

BIOT 689 Special Topics in...  
Credits 1 to 4. 1 to 4 Lecture Hours.  
Selected topics in an identified area of biotechnology. May be repeated for credit.  
Prerequisite: Approval of instructor.  

**BMEN - Biomedical Engineering**

**BMEN 604 FDA Good Laboratory and Clinical Practices**  
Credits 3. 3 Lecture Hours.  
Implementation of Good Laboratory Practices (GLP) for the submission of preclinical studies and use of Good Clinical Practices (GCP) in clinical trials in accordance with Food and Drug Administration (FDA) regulations; includes similarities and differences in GLP and GCP critical for the introduction of new drugs and medical devices.  
Prerequisite: Graduate classification or approval of instructor.  

**BMEN 606 Medical Device Path to Market**  
Credits 3. 3 Lecture Hours.  
Path to market for a medical device with specific attention to the regulatory affairs to enable the development of an appropriate regulatory strategy due to the highly regulated global environment.  
Prerequisite: Graduate classification or approval of instructor.  

**BMEN 608 Biophotonics II**  
Credits 3. 3 Lecture Hours.  
Photon transport in tissue; photon scattering and absorption; Mie scattering; Monte Carlo; optical spectroscopy, including absorption, fluorescence, and Raman scattering; multiphoton processes; plasmonics.  
Prerequisite: BMEN 625 or approval of instructor.  

**BMEN 622 Bioelectromagnetism**  
Credits 3. 3 Lecture Hours.  
Electric, magnetic and electromagnetic phenomena in association with biological tissues; source modeling based on physiological current including line and volume conductor models as well as electromagnetic-based stimulation, sensing and imaging.  
Prerequisite: Graduate classification or approval of instructor.  

**BMEN 625 Biophotonics**  
Credits 3. 3 Lecture Hours.  
Theory and application of optical instrumentation, including light sources, lasers, detectors, and optical fibers; instrumentation and engineering in biomedical applications of optics in therapeutics, diagnostics, and biosensing.  
Prerequisite: Graduate classification or approval of instructor.  

**BMEN 627/ECEN 763 Magnetic Resonance Engineering**  
Credits 3. 2 Lecture Hours. 3 Lab Hours.  
Design, construction and application of instrumentation for MR imaging; fundamentals of the architecture of an MR spectrometer and the gradient subsystem used for image localization; emphasis on the radiofrequency sensors and systems used for signal generation and reception.  
Prerequisites: BMEN major; graduate classification or approval of instructor.  
Cross Listing: ECEN 763/BMEN 627.

**BMEN 628 Embedded Systems for Medical Applications**  
Credits 3. 2 Lecture Hours. 3 Lab Hours.  
Principles of embedded system architecture and programming; fundamentals and theoretical foundations of wireless communication systems; hands-on experiences of how an embedded system could be used to solve problems in biomedical engineering; projects on wireless sensors and imaging for medical devices.  
Prerequisite: Graduate classification or approval of instructor.  

**BMEN 631 Biomolecular Engineering**  
Credits 3. 3 Lecture Hours.  
Foundations for understanding the experimental approaches for measuring and manipulating biomolecules; proteins, nucleic acids, and carbohydrates; thermodynamics and kinetics of biomolecular reactions.  
Prerequisite: Graduate classification or approval of instructor.  

**BMEN 632 Molecular and Cellular Biomechanics**  
Credits 3. 3 Lecture Hours.  
Introduces biomolecules and their assemblies that play structural and dynamical roles in subcellular to cellular level mechanics, with emphasis on quantitative/theoretical descriptions, and discussions of the relevant experiment approaches to probe these nano to micro-scale phenomena; including topics in (1) self-assembly of cytoskeleton and biomembranes, (2) molecular motors, (3) cell motility, and mechanotransduction.  
Prerequisites: Graduate classification or approval of instructor.
BMEN 635 Biomaterials Compatibility
Credits 3. 3 Lecture Hours.
Relevance of mechanical and physical properties to implant selection and design; effect of the body environment on metallic, ceramic, and plastic materials; tissue engineering; rejection mechanisms used by the body to maintain homeostasis regulatory requirements.
Prerequisites: Approval of instructor.

BMEN 636 Pathophysiology of Systemic Diseases Augmented with Implantable Devices
Credits 3. 3 Lecture Hours.
Clinical presentation of patients with systemic diseases and the pathophysiologic interrelationship with therapeutic implantable devices; processes of inflammation/repair as it applies to challenges of therapeutic augmentation with implantable devices; systems covered include cardiovascular, central nervous system, eye, dental, gastrointestinal, musculoskeletal, endocrine, reproductive/urogenital, skin/soft tissue; implantable device intervention as a therapeutic adjunct in systemic diseases.
Prerequisites: Graduate classification or approval of instructor.

BMEN 637 Pathological Basis of Implantable Devices
Credits 3. 3 Lecture Hours.
Understanding the relationship that clinical presentation has for patients with primary heart disease; inflammation and repair, systematic pathology emphasis on cardiovascular disease, and the implantable device intervention as a therapeutic adjunct in the heart.
Prerequisite: Graduate classification or approval of instructor.

BMEN 641 Numerical Methods in Biomedical Engineering
Credits 3. 3 Lecture Hours.
Application of numerical analysis to analyze molecular, cellular, and physiological systems; general techniques used to analyze steady and dynamic systems; techniques will be applied in a MATLAB programming environment.
Prerequisite: Graduate classification or approval of instructor.

BMEN 642 Mass and Energy Transfer in Biosystems
Credits 3. 3 Lecture Hours.
Understanding the transport phenomena associated with physiological systems and their interaction with medical devices; exchange processes in artificial life support systems and diagnostic equipment.
Prerequisite: Graduate classification or approval of instructor.

BMEN 643 Risk Based Development and Testing of Medical Devices
Credits 3. 3 Lecture Hours.
Focus on the detailed design and development phases of the design innovation process for healthcare applications; includes medical device development projects in which teams will work on innovative medical devices that progressed through the concept phase of the development life cycle; includes detailed design and development, risk based design process, including the conduct of hazards analysis, design FMEA, application FMEA, process FMEA, device manufacturing, device testing and FDA design verification and validation.
Prerequisites: Enrolled in master of engineering in biomedical engineering; graduate classification or approval of instructor.

BMEN 650 Biomedical Optics Laboratory
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Biomedical optics technology; basic engineering principles used in developing therapeutic and diagnostic devices; a series of hands-on labs will be performed including optical monitoring, diagnostic and therapeutic experiments.
Prerequisite: Graduate classification or approval of instructor.

BMEN 651 Cell Mechanobiology
Credits 3. 3 Lecture Hours.
Focuses on how mechanical forces influence cell behavior through physical and biochemical mechanisms; objectives include integrating engineering and cell biology to solve biomedical problems, which includes developing models for applying forces to cultured cells and tissues and measuring changes in cell biochemistry, structure, and function.
Prerequisite: Graduate classification or approval of instructor.

BMEN 657 Orthopedic Biomechanics
Credits 3. 3 Lecture Hours.
Fundamental course in orthopedic biomechanics designed to develop competencies in biomechanical principles using practical examples and clinical case studies of how biomechanical knowledge is applied to the evaluation of musculoskeletal tissues and structures, and treatment options for musculoskeletal dysfunction.
Prerequisite(s): Admitted into the major degree sequence in Biomedical Engineering and graduate classification.

BMEN 658 Motion Biomechanics
Credits 3. 3 Lecture Hours.
Skeletal anatomy and mechanics; muscle anatomy and mechanics; theory and application of electromyography; motion and force measuring equipment and techniques; inverse dynamics modeling of the human body; current topics in musculoskeletal biomechanics research.
Prerequisites: Graduate classification or approval of instructor.

BMEN 661 Cardiac Mechanics
Credits 3. 3 Lecture Hours.
Application of continuum mechanics and computational solid mechanics to the study of the mammalian heart; utilization of continuum mechanics and finite element analysis in solving non-linear boundary value problems in biomechanics.
Prerequisite: Graduate classification or approval of instructor.

BMEN 663 Soft Tissue Mechanics and Finite Element Methods
Credits 3. 3 Lecture Hours.
Application of continuum mechanics and finite element methods to the study of the mechanical behavior or soft tissues and associative applications in biomedicine.
Prerequisite: Graduate classification or approval of instructor.

BMEN 669 Entrepreneurial Pathways in Medical Devices
Credits 3. 3 Lecture Hours.
Overview of fundamental elements and development steps for an effective strategy pathway including regulatory pathway for commercialization of medical product/medical device innovations; application of the basic regulations and associated requirements and enforcements for product market approval; exploration of product quality test method design requirements; understanding of the applicable regulations and standards pertaining to the design, testing, approval and marketing of medical devices.
Prerequisite: Graduate classification or approval of instructor.

BMEN 674 Communications in Biomedical Engineering
Credits 3. 3 Lecture Hours.
General concepts for communicating the results of biomedical research including written papers, conference proceedings, proposals and grants, as well as oral presentations and basic ethics.
Prerequisite: Approval of instructor.
BMEN 675 Biomedical Case Studies
Credit 1. 1 Lecture Hour.
Introduction to the engineering design process for solving biomedical problems by using the case study method in biomedical instrument design.
Prerequisite: Approval of instructor.

BMEN 676 Professional Development for Biomedical Engineering
Credits 3. 3 Lecture Hours.
Advanced concepts in professional interactions including oral and written communications; skills related to interviewing and obtaining job offers and understanding employment compensation and benefits; professional ethics.
Prerequisite: Graduate classification or approval of instructor.

BMEN 680 Biomedical Engineering of Tissues
Credits 3. 3 Lecture Hours.
Introduction to engineering strategies used to repair tissue; literature-grounded overview of current strategies using stem cells, 3D scaffolds and drug/gene delivery including ethical considerations of these therapies.
Prerequisite: Graduate classification or approval of instructor.

BMEN 681 Seminar
Credit 1. 1 Lecture Hour.
Designed to permit student to broaden capability, performance and perspective in biomedical engineering via his or her own formal presentation and by presentations from other professionals.
Prerequisite: Approval of instructor.

BMEN 682 Polymeric Biomaterials
Credits 3. 3 Lecture Hours.
Preparation, properties, and biomedical applications of polymers including polymerization; structure-property relationships; molecular weight and measurement; morphology; thermal transitions; network formation; mechanical behavior; polymeric surface modification; polymer biocompatibility and bioadhesion; polymers in medicine, dentistry, and surgery; polymers for drug delivery; polymeric hydrogels; and biodegradable polymers.
Prerequisites: Graduate classification or approval of instructor.

BMEN 683 Polymeric Biomaterial Synthesis
Credits 3. 3 Lecture Hours.
Overview of polymer synthetic routes and key structure-property relationships with emphasis on the design of polymeric systems to achieve specific properties; tissue engineering and drug delivery applications will be used as model systems to explore the process of biomaterial design from synthesis to device evaluation.
Prerequisite: Graduate classification or approval of instructor.

BMEN 684 Professional Internship
Credits 1 to 12. 1 to 12 Other Hours.
Training under the supervision of practicing engineers in settings appropriate to the student’s professional objectives.
Prerequisites: Approval of chair of student’s advisory committee and department head.

BMEN 685 Directed Studies
Credits 1 to 12. 1 to 12 Other Hours.
Allows students the opportunity to undertake and complete, for credit, limited investigations not included within thesis or dissertation research and not covered by other courses. May be repeated for credit.
Prerequisites: Approval of designated instructor and approved project proposal.

BMEN 686 Biomedical Nanotechnology
Credits 3. 3 Lecture Hours.
Introduction to nanotechnology applications in biomedicine; concepts of scale; unique properties at the nanoscale; biological interaction, transport, and biocompatibility of nanomaterials; current research and development of nanotechnology for medical applications, including sensors, diagnostic tools, drug delivery systems, therapeutic devices, and interactions of cells and biomolecules with nanostructured surfaces.
Prerequisite: Graduate classification or approval of instructor.

BMEN 687 Drug Delivery
Credits 3. 3 Lecture Hours.
Mechanisms for controlled release of pharmacologically active agents and the development of useful drug delivery systems; controlled release mechanisms including diffusive, convective and erosive driving forces by using case studies related to oral, topical and parenteral release in a frontier interdisciplinary scientific research format.
Prerequisite: Graduate classification in biomedical engineering or approval of instructor.

BMEN 689 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours. 0 to 4 Lab Hours.
Selected topics in an identified area of biomedical engineering. May be repeated for credit.
Prerequisite: Approval of instructor.

BMEN 691 Research
Credits 1 to 23. 1 to 23 Other Hours.
Research for thesis or dissertation.

BUAD - Business Administration

BUAD 620 Business Communication
Credits 1 to 3. 1 to 3 Lecture Hours.
Effective oral and written communication for corporate settings; communication theory and practice with core MBA and other courses; practice with oral presentation skills in corporate situations. Classification 6 students may not enroll in this course.
Prerequisite: Approval of instructor.

BUAD 679 Leadership Development
Credits 1 to 4. 1 to 4 Lecture Hours.
Focus on assignments and activities to develop self-awareness as a leader and encourage reflection; strategies to improve leadership and communication with emphasis on leading, influencing and team work in a business context; integration of core business knowledge and skills.
Prerequisite: Enrollment limited to BUAD Classification 7 MBA students.

BUAD 681 Seminar
Credit 1. 1 Lecture Hour.
One credit hour seminar focusing upon a variety of skills essential in a management career including communications, business and government relations and interpersonal skills. An Executive Lecture Series may form a component of this course. Classification 6 students may not enroll in this course.
Prerequisite: Enrollment is limited to BUAD classification 7 and 8 graduate students.

BUAD 684 Professional Internship
Credits 1 to 6. 1 to 6 Other Hours.
A directed internship in an organization to provide students with on-the-job training with professionals in organizational settings appropriate to the student’s professional objectives. Classification 6 students may not enroll in this course.
Prerequisite: Approval of committee chair and department head.
BUAD 685 Directed Studies
Credits 1 to 4. 1 to 4 Other Hours.
Directed study of selected problems using recent developments in business research methods. Classification 6 students may not enroll in this course.
Prerequisite: Approval of instructor and department head.

BUAD 689 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Selected topics in an identified area of business administration.
Prerequisite: Approval of instructor.

BUAD 693 Professional Study
Credits 1 to 6. 1 to 6 Lecture Hours.
Approved professional study project as part of the Mays MBA Program. Enrollment limited to Business Administration G7 students.

BUAD 700 Value Creation
Credits 1 to 4. 1 to 4 Lecture Hours.
Value creation process in business sectors; relationships among the partners in the value chain; theory and frameworks underlying successful business strategies.
Prerequisite: For Master of Science in Business students only.

BUAD 701 Business Collaboration
Credits 1 to 4. 1 to 4 Lecture Hours.
Project management collaboration tools and practices; business communication tools and practices; other commonly used business software and applications.
Prerequisite: For Master of Science in Business students only.

BUAD 702 Career Management
Credits 1 to 4. 1 to 4 Lecture Hours.
Career management tools, self-assessment, goal development, career planning development and skill building for ongoing career management.
Prerequisite: For Master of Science in Business students only.

BUAD 705 Business Communications and Professional Presence
Credits 1 to 4. 1 to 4 Lecture Hours.
Communication theory; written and oral communication skills practice; professional presence; corporation communication; and professional development. May be taken four times for credit.
Prerequisite: For Master of Science in Business students only.

BUAD 710 Ethical Decision Making and Conduct
Credits 1 to 4. 1 to 4 Lecture Hours.
Role of ethical reasoning, objectivity, independence and other core values to the development of a leader; critical analysis of ethical dilemmas; assimilation of ethical thinking and behavior into personal and professional life.
Prerequisite: For Master of Science in Business students only.

BUAD 715 International Business Environment
Credits 1 to 4. 1 to 4 Lecture Hours.
Issues, problems, challenges and opportunities facing organizations competing in a global economy; environment of international business; international finance and accounting; international strategies; forms of organization design used by multinational firms; human resources in an international context; cultural and control issues facing the international leader.
Prerequisite: For Master of Science in Business students only.

BUAD 720 Integrated Business Experience
Credits 1 to 4. 1 to 4 Lecture Hours.
Practical application of value creation process; business model development; financial projections; market validation; evaluation of business opportunities and entrepreneurial ventures.
Prerequisite: For Master of Science in Business students only.

BUSH - Geo. Bush School of Gov

BUSH 600 Bush School Graduate Study Abroad
Credits 1 to 12. 1 to 12 Other Hours.
For students in approved study abroad and reciprocal educational exchange programs.
Prerequisites: Graduate classification in the Bush School; approval of director.

BUSH 601 Leadership and Public Administration
Credits 3. 3 Lecture Hours.
Overview of the field of public administration; theory and practice of leadership.
Prerequisites: Graduate classification and approval of MPSA or MPIA director.

BUSH 602 Writing for the Medal of Excellence
Credits 0. 0 Lecture Hours.
No Credit. Preparation of the ePortfolio, requirement for the Medal of Excellence; guided reflection on learning across interdisciplinary experiences such as participation in the Leadership Program, capstone courses, internships and other high-impact experiences and on writing clear, coherent, well-developed reflective essays.
Prerequisite: Admission into Master of International Affairs or Master of Public Service and Administration.

BUSH 631 Quantitative Methods in Public Management I
Credits 3. 3 Lecture Hours.
Introduction to the common methods for social and policy analysis with a focus on application of methods such as analysis of variance and regression, to tasks including policy analysis, evaluation and survey research; emphasis on the performance of social and policy analysis, although some statistical theory is introduced.
Prerequisites: Graduate classification and approval of MPSA or MPIA director; STAT 303 or equivalent.

BUSH 632 Quantitative Methods in Public Management II
Credits 3. 3 Lecture Hours.
Numerous formal aspects and methods of decision-making useful in public management including benefit-cost analysis, program evaluation and survey sampling; emphasis on theoretical foundation and practical application; collection and analysis of information, formulation of results and presentation of conclusions.
Prerequisites: Graduate classification and approval of MPSA or MPIA director.

BUSH 635 Quantitative Methods in Public Management II: Policy Analysis Emphasis
Credits 3. 3 Lecture Hours.
Continuation of BUSH 631. Advanced instruction in making useful policy recommendations based on regression analysis, survey design, data analysis, and techniques for interpreting statistical output from multiple disciplines; application of analysis software.
Prerequisites: BUSH 631; approval of MPSA or MPIA Director.
BUSH 636 Quantitative Methods II: Game Theory Emphasis  
Credits 3. 3 Lecture Hours.  
Continuation of BUSH 631; advanced instruction in quantitative social science research methods; designed to help understand influences and constraints on decision-makers, improve the ability to characterize and predict decisions and assess the validity of information presented, and analyze situations of relevance to making decisions as a public manager.  
Prerequisites: BUSH 631; PSAA or INTA majors only.

BUSH 668  
Credits 3. 3 Lecture Hours.

BUSH 685 Directed Studies  
Credits 1 to 4. 1 to 4 Other Hours.  
Directed individual instruction in selected problems in government and public service.  
Prerequisites: Graduate classification and approval of program director.

BUSH 691 Research  
Credits 1 to 23. 1 to 23 Other Hours.  
Research for thesis or dissertation.

CARC - College of Architecture

CARC 600 College of Architecture Graduate Study Abroad  
Credits 1 to 16. 1 to 16 Other Hours.  
For students in approved study abroad programs participating in reciprocal educational exchange programs.  
Prerequisite: Admission to approved program.

CARC 601 Foundations of Research in Planning and Design  
Credits 3. 3 Lecture Hours.  
Introduction to the research process and its application to problems in planning and design; presentation of philosophy and logic underlying the scientific method; critical analysis of planning and design literature according to each step of the research process: problem definition, hypothesis development, study design, analysis and interpretation of the findings.

CARC 602 Research Methods in Planning and Design  
Credits 3. 3 Lecture Hours.  
Basic empirical research methods used in planning and design research including experimental, survey and case study designs; comparisons of the various methods; application of techniques in sample selection, data collection and analytic approaches. May be repeated for credit.  
Prerequisite: STAT 651 or equivalent.

CARC 604 Advanced Field Studies in Design Innovation  
Credits 1 to 18. 1 to 18 Other Hours.  
Advanced design innovation in international and domestic environments away from Texas A&M University campus; emphasis on the cultural, social economic, geographical, climatic and technological factors influencing design solutions for human needs.  
Prerequisite: Graduate classification.

CARC 685 Directed Studies  
Credits 1 to 6. 1-1 Other Hours.  
Individual problems involving application of theory and practice in architecture, construction science, landscape architecture and urban and regional planning in an international setting.  
Prerequisites: Approval of instructor and department head.

CARC 689 Special Topics in...  
Credits 1 to 6. 1 to 6 Lecture Hours.  
Selected topics in an identified field. May be repeated for credit.

CARC 698 Writing for Publication  
Credits 3. 3 Lecture Hours.  
Writing in academic disciplines and settings. Writing for different audiences and purposes. Style; planning and development of academic journal articles; grant proposals; correspondence; oral presentations; technical reports. Permission of departmental/college graduate advisor. Must be taken on a satisfactory/unsatisfactory basis.  
Prerequisite: Advanced standing in master’s doctoral programs.

CEHD - Coll. of Ed & Human Dev

CEHD 600 Education and Human Development Study Abroad  
Credits 1 to 18. 1 to 18 Lecture Hours.  
For students in approved programs to study abroad. May be repeated for credit.  
Prerequisite: Approval of department head.

CEHD 603 Writing for Publication in Education and Human Development Research  
Credits 3. 3 Lecture Hours.  
Assists students with writing and submitting research findings for publication, and managing contingencies for becoming productive scholars in their field.  
Prerequisite: Graduate classification.

CEHD 689 Special Topics in...  
Credits 1 to 4. 1 to 4 Lecture Hours.  
Selected topics in an identified area of education and human development. May be repeated for credit.  
Prerequisites: Graduate classification and approval of instructor.

CHEM - Chemistry

CHEM 601 Analytical Chemistry I  
Credits 3. 3 Lecture Hours.  
Fundamentals of chemical instrumentation. Modular approach to instrumental methods of chemical analysis; modules to be covered include digital electronics, modern optics, basic quantification and signal-to-noise enhancements.  
Prerequisite: Graduate classification in chemistry or approval of instructor.

CHEM 602 Analytical Chemistry II  
Credits 3. 3 Lecture Hours.  
Modern analytical techniques, spectroscopies, chromatography, and “hyphenated” methods such as GC-FTIR, GC-MS, HPLC-MS, CE-LIF, and CE-MS are examined from the perspective of surface analysis, fundamentals of separation science and structural characterization of complex molecular systems.  
Prerequisite: CHEM 601.

CHEM 603 Modern Chromatographic Separation Methods  
Credits 3. 3 Lecture Hours.  
Intended for graduate students in chemistry, chemical engineering, and the life sciences.  
Prerequisite: Graduate standing.

CHEM 610 Organic Reactions  
Credits 3. 3 Lecture Hours.  
Introduction to mechanisms and scope of the basic organic reaction types as applied to major functional groups.  
Prerequisite: CHEM 646 or approval of instructor.
CHEM 615 Organic Synthesis  
Credits 3.3 Lecture Hours.  
Application of organic reactions to synthesis of complex organic molecules. Synthesis design and methodology, scope and limitations of reactions and experimental design.  
Prerequisite: CHEM 610.

CHEM 616 Organometallic Transformations for Organic Synthesis  
Credits 3.3 Lecture Hours.  
Introduction to transition and main group metal-mediated reactions in organic synthesis; organometallic mechanisms in the context of homogeneous catalytic systems currently employed in synthetic laboratories; emphasis on the properties of transition metal complexes and their interactions with organic substrates that promote useful chemical transformations.  
Prerequisite: CHEM 615.

CHEM 618 NMR Spectroscopy  
Credits 3.3 Lecture Hours.  
Theory and practice of modern nuclear magnetic resonance spectroscopy; Bloch equations, relaxation and relaxation mechanisms, chemical exchange, pulse and Fourier-transform methods, selective excitation, 2-D methods and solid-state nuclear magnetic resonance.  
Prerequisite: Graduate classification in chemistry or approval of instructor.

CHEM 619 Analytical Spectroscopy  
Credits 3.3 Lecture Hours.  
Fundamentals of optical spectroscopy and applications; quantum mechanical description of light-matter interaction, linear and nonlinear spectroscopy, optics and spectroscopic instrumentation, optical signal detection and data acquisition/processing, applications of spectroscopic techniques in nanoscience.  
Prerequisite: CHEM 648 or approval of instructor.

CHEM 621 Chemical Kinetics  
Credits 3.3 Lecture Hours.  
Present theories about chemical reaction rates and mechanisms.  
Prerequisite: CHEM 328 or approval of instructor.

CHEM 623 Surface Chemistry  
Credits 3.3 Lecture Hours.  
Nature, structure and chemistry of surfaces; characterization of surfaces from surface energy to structure; relation to chemical processes.  
Prerequisite: Graduate classification in chemistry or approval of instructor.

CHEM 627 Principles of Biological Chemistry  
Credits 3.3 Lecture Hours.  
General principles of biological chemistry with an emphasis on the structures and mechanisms of action for proteins, nucleic acids and lipids.  
Prerequisite: Graduate classification.

CHEM 628 Coordination and Bioinorganic Chemistry  
Credits 3.3 Lecture Hours.  
Structure and reactivity of coordination compounds; reactions of metal ions with small biomolecules and the reactions of toxic metal ions; role of metal ions in biological systems including the function of metal ions in enzymes.  
Prerequisite: CHEM 633.

CHEM 629 Main Group Chemistry  
Credits 3.3 Lecture Hours.  
Chemistry of the ns and np elements of the periodic table and the noble gases including the organometallic chemistry of these elements.  
Prerequisite: CHEM 633.

CHEM 630 Bioorganic Chemistry  
Credits 3.3 Lecture Hours.  
Biorganic Chemistry. Introduction to current research areas of bioorganic chemistry and chemical genetic tools in exploring biological systems; DNA recombinant technology; histone chemical biology; protein glycosylation; protein engineering methods; gene transcription regulation; semi-synthesis of proteins with PTM analogs.  
Prerequisites: CHEM 627 or approval of instructor.

CHEM 631 Statistical Thermodynamics  
Credits 3.3 Lecture Hours.  
Methods of statistical mechanics based primarily on Boltzmann statistics; approach to thermodynamics through partition function; statistical concept of entropy.  
Prerequisite: Graduate classification in chemistry or approval of instructor.

CHEM 633 Principles of Inorganic Chemistry  
Credits 3.3 Lecture Hours.  
General principles of inorganic chemistry treated with a view to applications in other subfields of chemistry.  
Prerequisite: Graduate classification in chemistry or approval of instructor.

CHEM 634 Physical Methods in Inorganic Chemistry  
Credits 3.3 Lecture Hours.  
Determination of the molecular structure of inorganic and organometallic species; modern aspects of diffraction, magnetic resonance and vibrational methods.  
Prerequisite: CHEM 641 or CHEM 673.

CHEM 635 Introduction to X-ray Diffraction Methods  
Credits 3.3 Lecture Hours.  
Fundamentals of diffraction theory by crystals and the solution of crystal structures using this methodology.  
Prerequisite: BS in Chemistry, Physics, or Engineering.

CHEM 636 Mechanistic Inorganic Chemistry  
Credits 2.2 Lecture Hours.  
Reaction pathways in both main group and transition-metal complexes; factors which influence the reaction rate including nature of the metal, the coordination sphere, reaction conditions and catalytic intermediates.  
Prerequisite: CHEM 633.

CHEM 640 Laboratory Methods in Biological Chemistry  
Credits 3.1 Lecture Hour. 6 Lab Hours.  
Application of chemical techniques to the investigation and/or manipulation of biological systems; laboratory methods provides a hands-on opportunity to gain an understanding and appreciation for chemical biology techniques.  
Prerequisite: Graduate classification or approval of instructor.

CHEM 641 Structural Inorganic Chemistry  
Credits 3.3 Lecture Hours.  
Introduction to chemical bonding; ionic, covalent, coordinate and hydrogen bonding; relationship of molecular orbital and ligand field theories to experimental studies of the electronic structure of inorganic molecules.  
Prerequisites: CHEM 633 and CHEM 673.
CHEM 642 Organometallic Chemistry and Homogeneous Catalysis
Credits 3. 3 Lecture Hours.
Synthesis, structure and reactivity of organometallic compounds; elementary processes for general and radical reactions, mechanism of reactions at metal centers and applications to homogeneous catalysis. 
Prerequisite: CHEM 633.

CHEM 644 Natural Products Biosynthesis
Credits 3. 3 Lecture Hours.
Survey of the chemical reactions occurring in living systems, describe the experimental methods used to study these reactions and examine the biosynthesis of the major families of natural products; emphasis on the mechanistic chemistry of the biosynthetic pathway. 
Prerequisite: Graduate classification or approval of instructor.

CHEM 646 Physical Organic Chemistry
Credits 3. 3 Lecture Hours.
A detailed introduction to the theory and principles of organic chemistry; bonding and structure in organic chemistry, stereochemistry, reactive intermediates in organic chemistry and transition state theory; kinetics and thermodynamic approaches.
Prerequisite: CHEM 228 or approval of instructor.

CHEM 647 Spectra of Organic Compounds
Credits 3. 3 Lecture Hours.
Correlations of molecular structure with spectroscopic and other physical properties; applications to modern problems in organic chemistry.
Prerequisite: CHEM 646 or approval of instructor.

CHEM 648 Principles of Quantum Mechanics
Credits 3. 3 Lecture Hours.
Classical mechanics and development of wave mechanics; application of wave mechanics to special chemical problems.
Prerequisite: Approval of instructor.

CHEM 658 Molecular Modeling
Credits 2. 1 Lecture Hour. 3 Lab Hours.
An introduction to molecular modeling with an emphasis on quantum level calculations. Lectures will cover the basic theory behind the calculations and lab work will focus on the practical application of modern computational chemistry codes.
Prerequisite: Graduate classification or approval of instructor.

CHEM 660 Nuclear Chemistry
Credits 3. 3 Lecture Hours. 0 Lab Hours.
Radioactive decay, nuclear models, nuclear spectroscopy, nuclear reactions, fission and other topics of current interest in nuclear chemical research.
Prerequisite: CHEM 464 or approval of instructor.

CHEM 661 Radiochemistry
Credits 3. 3 Lecture Hours.
Fundamentals of radiochemistry, survey of the chemistry of radioelements, radiochemistry of the nuclear fuel cycle, environmental radiochemistry, and other topics of interest in current radiochemical research.
Prerequisite: CHEM 464, NUEN 302, or approval of instructor.

CHEM 670 Physical Methods in Biological Chemistry
Credits 3. 3 Lecture Hours.
Overview of current methods for the characterization of biological macromolecules, including protein structure, protein-ligand interactions, protein folding; techniques discussed include nuclear magnetic resonance, optical spectroscopy, calorimetry, electron paramagnetic resonance, Mössbauer spectroscopy, X-ray crystallography, electron microscopy, and mass spectrometry.
Prerequisite: Graduate classification or approval of instructor.

CHEM 672 Bioorganic Reaction Mechanisms
Credits 3. 3 Lecture Hours.
Proposed mechanisms of action of various enzymes and coenzymes from the "model systems" approach; new developments, theory and established mechanisms.
Prerequisites: CHEM 646; BICH 624.

CHEM 673 Symmetry and Group Theory in Chemistry
Credits 2 to 3. 2 to 3 Lecture Hours.
Applications of symmetry and group theory to various types of chemical systems; classification of molecules into symmetry point groups and use of character tables.
Prerequisite: Bachelor's degree in chemistry.

CHEM 681 Seminar
Credit 1. 1 Lecture Hour.
Oral presentations and discussions of recent advances in chemistry.

CHEM 682 Departmental Research Seminar
Credit 1. 1 Lecture Hour.
Recent and significant research results presented by prominent chemists; interaction with visiting chemists during discussion sessions at the end of each seminar. May be repeated for credit.
Prerequisites: Two semesters of CHEM 681.

CHEM 684 Professional Internship
Credits 1 to 4. 1 to 4 Other Hours.
Supervised practical experience in professional functions appropriate to career goals in chemical education. Students will be required to complete a scholarly report of these activities acceptable to graduate committee. Enrollment limited to students pursuing a non-thesis MS degree, with emphasis on chemical education. Requires approval of committee chair and department head with non-thesis MS degree plan filed.
Prerequisite: Graduate classification in chemistry.

CHEM 685 Directed Studies
Credits 1 to 6. 1 to 6 Other Hours.
Special topics to suit small group requirements; more recent problems and results in various branches of chemistry; laboratory work or conference and discussion.
Prerequisite: Graduate classification.

CHEM 686 Ethics in Chemical Research and Scholarship
Credit 1. 1 Lecture Hour.
Ethical issues in chemical research and scholarship and methods for resolution of such issues; includes Texas A&M University Policies and Procedures, ethics and scientific truth, ethics and other scientists and ethics and society; case studies.
Prerequisite: Graduate classification in chemistry or biochemistry.

CHEM 689 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours. 0 to 8 Lab Hours.
Selected topics in an identified area of chemistry. May be repeated for credit.
Prerequisites: Graduate classification and approval of instructor.
CHEN 690 Theory of Chemical Research
Credits 3. 3 Lecture Hours.
The design of research experiments in various subfields of chemistry and the evaluation of research results with the aid of examples taken from the current scientific literature. May be repeated for credit.

CHEN 691 Research
Credits 1 to 23. 1 to 23 Other Hours.
Research for thesis or dissertation.

CHEN 695 Frontiers in Chemical Research
Credit 1. 1 Lecture Hour.
Present status of research in a variety of significant chemical fields; content depends on the availability of visiting lecturers who will be selected because of distinguished international recognition in their fields of research. May be taken twice.
Prerequisite: Graduate classification.

CHEN 697 Methods in Teaching Chemistry Laboratory
Credit 1. 1 Lecture Hour. 1 Lab Hour.
An introduction to teaching methods associated with the teaching of introductory chemistry laboratories using graduate teaching assistants. Emphasis placed on effective communication, preparation, record keeping, and safe and effective management of an instructional laboratory. May be repeated for credit.
Prerequisite: Graduate classification in chemistry.

CHEN - Chemical Engineering

CHEN 601 Chemical Engineering Laboratory Safety and Health
Credit 1. 1 Lecture Hour.
Control of hazards associated with chemical engineering research laboratories and the chemical process industry; causes and prevention of accidents, emergency procedures, safety codes, health effects of toxic substances and experimental design for safety.
Prerequisite: Graduate classification.

CHEN 604 Chemical Engineering Process Analysis I
Credits 3. 3 Lecture Hours.
Development and analysis of chemical process models that involve systems of algebraic equations, ordinary differential equations and partial differential equations.
Prerequisite: MATH 308 or approval of instructor.

CHEN 605 Chemical Engineering Process Analysis II
Credits 3. 3 Lecture Hours.
Formulation of mathematical models and solution of resulting mass and energy balance equations by modern computational techniques, applications to separation processes, chemical kinetics, reaction engineering, heat and mass transfer.
Prerequisite: CHEN 320 or approval of instructor.

CHEN 614 Advanced Transport Phenomena I
Credits 4. 4 Lecture Hours.
First part of a two-semester sequence covering advanced transport phenomena; emphasis is placed on momentum transfer or fluid mechanics applied to chemical engineering problems.
Prerequisite: Approval of instructor.

CHEN 615 Advanced Transport Phenomena II
Credits 3. 3 Lecture Hours.
Advanced energy and mass transfer in chemical engineering processes.
Prerequisite: Approval of instructor.

CHEN 623 Applications of Thermodynamics to Chemical Engineering
Credits 3. 3 Lecture Hours.
Application of thermodynamics to chemical engineering operations and processes.
Prerequisite: CHEN 354 or approval of instructor.

CHEN 624 Chemical Engineering Kinetics and Reactor Design
Credits 3. 3 Lecture Hours.
Rates and mechanisms of chemical reactions. Thermal and catalytic reactions both homogeneous and heterogeneous.
Prerequisite: CHEN 464 or approval of instructor.

CHEN 629 Transport Phenomena
Credits 3. 3 Lecture Hours.
Principles of transfer of momentum, energy and mass studied by application to advanced chemical engineering problems. Theoretical analogy of these three modes of transfer.
Prerequisite: CHEN 424 or approval of instructor.

CHEN 631 Process Dynamics and Advanced Process Control
Credits 3. 3 Lecture Hours.
Modeling, analysis, and simulation of linear and nonlinear process systems; model-based control techniques for achieving desired process dynamics.
Prerequisite: CHEN 461 or approval of instructor.

CHEN 633 Thermodynamics and Kinetics of Confined Fluids
Credits 3. 3 Lecture Hours.
Emphasis on fluids, adsorption phenomena (theory and applications), phase transitions in confined fluids (capillary condensation and freezing), the behavior of confined water, reactions in confinement, and applications.
Prerequisite: CHEN 623 or approval of instructor.

CHEN 634 Catalysis and Multiphase Reactor Design
Credits 3. 3 Lecture Hours.
Introduction and overview of catalyzed reactions; topics include heterogeneous catalysis and relevant surface science concepts, mass transport, and reactor design; discussion of industrially relevant chemistries.
Prerequisite: CHEN 624 or approval of instructor.

CHEN 635 Advanced Nanostructured Materials
Credits 3. 3 Lecture Hours.
Chemical synthesis and characterization of materials with structures and properties in the nano-scale; emphasis on the fundamental science and engineering of understanding and manipulating “bottom-up” material formation.
Prerequisite: Approval of instructor.

CHEN 640 Rheology
Credits 3. 3 Lecture Hours.
Principles of stress, deformation and flow; vector and tensor equations of fluid mechanics. Behavior of Newtonian, non-Newtonian and viscoelastic fluids.
Prerequisite: MATH 601 or approval of instructor.

CHEN 641 Polymer Engineering
Credits 3. 3 Lecture Hours.
Principles and practice of polymer structure, synthesis, reaction mechanisms and kinetics; polymer characterization, chemical and physical properties degradation and recycling, melt and solid mechanical and rheological properties. Technology of production and processing operations.
Prerequisite: Graduate classification.
CHEN 642 Colloidal and Interfacial Systems  
Credits 3. 3 Lecture Hours.  
Fundamental principles related to interactions, dynamic, and structure in colloidal and interfacial systems. Concepts covered include hydrodynamics, brownian motion, diffusion sedimentation, electrophoresis, colloidal forces, surface forces, polymeric forces, aggregation, deposition, equilibrium phase behavior, rheology, and experimental methods.

CHEN 643 Applied Statistical Mechanics of Fluids  
Credits 3. 3 Lecture Hours.  
Application of molecular theories and computer simulation techniques to describe the thermodynamics and transport properties of fluids and fluid mixtures.  
Prerequisite: CHEN 623 or approval of instructor.

CHEN 644 Nanotechnology: The Physics, Chemistry, and Engineering of Nanotechnology  
Credits 3. 3 Lecture Hours.  
Introduction to the basics and tools of nanotechnology; nanotechnology approaches and algorithms to analyze, design and simulate systems; focus on developing, modifying, adapting and creating tools to solve problems in the field.  
Prerequisite: Approval of instructor.

CHEN 645 Fundamentals of Catalysis with Applications  
Credits 3. 3 Lecture Hours.  
Principles of catalyst preparation, methods of characterization, catalyst deactivation and regeneration techniques; effect of physical transport processes on the rate of catalytic heterogeneous reactions; kinetics of heterogeneous reactions; laboratory and industrial reactors; application to selected industrial processes.  
Prerequisites: CHEN 354; CHEN 464 or approval of instructor.

CHEN 646 Thermodynamics of Oil and Gas and Water Systems  
Credits 3. 3 Lecture Hours.  
Techniques to predict the thermodynamic properties of oil and gas and aqueous saline systems; characterization of petroleum fluids; effect of surface tension and confinement; gas hydrate formation, and thermodynamic models for aqueous electrolyte systems and their application to phase equilibrium calculations.  
Prerequisites: CHEN 623 or approval of instructor; Qatar campus.

CHEN 650 Introduction to Microfabrication and Microfluidics Technology  
Credits 3. 3 Lecture Hours.  
Micro Electro Mechanical Systems (MEMS Technology). To study the fundamentals of fluids, heat and mass transfer, surface chemistry, and electrochemical interactions.

CHEN 651 Biochemical Engineering  
Credits 3. 3 Lecture Hours.  
Integration of principles of engineering, biochemical engineering and microbiology; application to the design, development and improvement of industrial processes that employ biological materials. Engineering discipline directed toward creative application of interdisciplinary information to the economic processing of biological and related materials.  
Prerequisite: Approval of instructor.

CHEN 653 Chemical Engineering in Tissue Engineering and Drug and Gene Delivery  
Credits 3. 3 Lecture Hours.  
Application of chemical engineering principles to the examination of tissue engineering systems, metabolic engineering systems, drug design and delivery, and gene delivery.  
Prerequisite: Approval of instructor.

CHEN 655/SENG 655 Process Safety Engineering  
Credits 3. 3 Lecture Hours.  
Applications of engineering principles to process hazards analysis including source and dispersion modeling, emergency relief systems, fire and explosion prevention and mitigation, hazard identification, risk assessment, process safety management, etc.  
Prerequisite: Approval of instructor.  
Cross Listing: SENG 655/CHEN 655.

CHEN 656 Advanced Process Chemical Optimization I  
Credits 3. 3 Lecture Hours.  
State-of-the-art optimization based techniques for process synthesis, process design and process operability; emphasis on mathematical modeling via mixed integer and continuous optimization formulations; application to heat integration problems; use of modeling/optimization software systems.  
Prerequisites: Graduate classification; or approval of instructor.

CHEN 658 Fundamentals of Environmental Remediation Processes  
Credits 3. 3 Lecture Hours.  
Fundamental approach to various remediation technologies, topics in environmental thermodynamics and mass transfer, adsorption, desorption, ion exchange, air stripping, extraction, chemical oxidation, biodegradation.  
Prerequisite: Graduate classification.

CHEN 660 Quantitative Risk Analysis  
Credits 3. 3 Lecture Hours.  
Fundamental concepts, techniques, and applications of quantitative risk analysis and risk-informed decision making for all engineering fields; practical uses of probabilistic methods are demonstrated in exercises and case studies from diverse engineering areas.  
Prerequisites: Graduate classification.  
Cross Listing: SENG 660 and ISEN 660.

CHEN 661 Optimization of Chemical Engineering Processes  
Credits 3. 3 Lecture Hours.  
Methods of optimization applied for the design and control of chemical engineering processes.  
Prerequisite: Approval of instructor.

CHEN 662 Computational Chemistry and Molecular Modeling for Engineers  
Credits 3. 3 Lecture Hours.  
Applications of computational chemistry and molecular modeling relevant to engineers, especially predictions for thermophysical properties and reaction rates; emphasis on the creative and intelligent use of commercial software to solve practical problems; problems relevant to process safety engineer.  
Prerequisites: CHEN 623 and 624 or approval of instructor.

CHEN 663 Systems Biology  
Credits 3. 3 Lecture Hours.  
Introduction to experimental and computational techniques in systems biology; includes high throughput experiments, data analysis, modeling and simulation; discussion in the context of specific applications such as signal transduction.  
Prerequisite: Approval of instructor.

CHEN 664 Global Optimization of Chemical Engineering Problems  
Credits 3. 3 Lecture Hours.  
Advances in global optimization and applications to chemical engineering systems; modeling and formulation of optimization problems, general theories and techniques of global optimization, and applications to problems on process design and integration.  
Prerequisite: Approval of instructor.
CHEN 665 Sustainable Design of Chemical Processes
Credits 3. 3 Lecture Hours.
Sustainability in chemical engineering; includes sustainable approaches to design and development of processes, products, energy usage; issues and roles of chemical engineers, service learning.
Prerequisite: Graduate and senior classification in engineering or approval of instructor.

CHEN 670 Computational Materials Science and Engineering
Credits 3. 3 Lecture Hours.
Modern methods of computational modeling and simulation of materials properties and phenomena, including synthesis, characterization, and processing of materials, structures and devices; quantum, classical, and statistical mechanical methods, including semi-empirical atomic and molecular-scale simulations, and other modeling techniques using macroscopic input.
Prerequisites: Approval of instructor; graduate classification.
Cross Listing: MSEN 670 and MEMA 670.

CHEN 675 Microelectronics Process Engineering
Credits 3. 3 Lecture Hours.
State-of-art process engineering principles on microelectronics, especially for the fabrication of very large scale integrated circuits (VLSICs); fundamental unit processes, such as thin film deposition, thermal growth, lithography, etching and doping, material structures and properties, and basic device operation principles.
Prerequisites: CHEN 623 and CHEN 624 or approval of instructor.

CHEN 676 Sustainable Design through Process Integration
Credits 3. 3 Lecture Hours.
Systematic and state-of-the-art techniques for the sustainable design of chemical processes; emphasis on holistic and systematic approaches using process integration for the conservation of natural resources and the enhancement of process performance; includes visualization, algebraic and mathematical optimization approaches.
Prerequisites: Graduate classification or approval of instructor.

CHEN 677 Advanced Process Integration and Synthesis
Credits 3. 3 Lecture Hours.
Systematic and state-of-the-art techniques of understanding the global insights of mass and energy flows within a process; use of integrated insights to optimize process performance; includes a variety of mathematical and visualization tools.
Prerequisite: Approval of instructor.

CHEN 681 Seminar
Credit 1. 1 Lecture Hour.
Presentations and discussions covering problems of current importance in chemical engineering research.

CHEN 684 Professional Internship
Credit 1. 1 Other Hour.
Engineering research experience in industrial setting away from Texas A&M campus; projects supervised jointly by faculty and industrial representative.
Prerequisites: Approval of student's advisory committee chair and department head.

CHEN 685 Directed Studies
Credits 1 to 12. 1 to 12 Other Hours.
Limited investigations in fields other than those chosen for thesis or dissertation research and not covered by other formal courses.
Prerequisite: Approval of department head.

CHEN 689 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours. 0 to 4 Lab Hours.
Selected topics in particular areas of chemical engineering. May be repeated for credit.
Prerequisites: Approval of department head and instructor.

CHEN 691 Research
Credits 1 to 23. 1 to 23 Other Hours.
Research for thesis or dissertation.
Prerequisite: Approval of department head.

CHEN 695 Graduate Mentoring Seminar I
Credit 1. 1 Lecture Hour.
Development of skills to compliment formal research and coursework training; includes improvement of communication and interaction skills; development of technical writing and presentation skills.
Prerequisites: Four chemical engineering core graduate courses; graduate advisor approval.

CHEN 696 Graduate Mentoring Seminar II
Credit 1. 1 Lecture Hour.
Development of a variety of skills to compliment formal research and coursework training; includes improvement of communication/interaction with students in a classroom setting, and improvement and development of teaching skills. Must be taken on a satisfactory/unsatisfactory basis.
Prerequisites: 4 CHEN core graduate courses, CHEN 695; graduate advisor approval.

CLAS - Classics

CLAS 692 Readings
Credits 3. 3 Lecture Hours.
Readings in Greek or Latin literary texts in the original language.
Prerequisite: Graduate classification.

CLEN - College of Engineering

CLEN 689 Special Topics In
Credits 1 to 4. 1 to 4 Lecture Hours. 0 to 4 Lab Hours.
Selected topics in an identified area of engineering. May be repeated for credit.
Prerequisite: Graduate classification.

CLSL - School of Law

CLSL 7600 Law School Study Abroad
Credits 0 to 4. 0 to 4 Other Hours.
For law students in an approved study abroad program. May be taken 3 times.
Prerequisites: Professional law classification; approval of dean.

COMM - Communication

COMM 610 Social Science Methods in Communication Research
Credits 3. 3 Lecture Hours.
Examination of social science research methods in communication, including design, measurement and analysis for descriptive and experimental research; practice in evaluating and conducting research projects.
Prerequisite: Graduate classification or approval of instructor.
COMM 611 Advanced Quantitative Methods in Communication Research  
Credits 3. 3 Lecture Hours.  
In-depth exploration of the philosophical underpinnings of quantitative research, research design and statistical analysis of quantitative data in communication research; examination of regression-based modeling and its extensions, including ordinary least squares (OLS), analysis of categorical dependent variables, interactive effects, statistical mediation; introduction to structural equation modeling.  
Prerequisites: COMM 610; graduate classification.

COMM 615 Interpretive Methods in Communication Research  
Credits 3. 3 Lecture Hours.  
Introduction to interpretive and qualitative methods in communication research; underlying epistemologies, design issues, and explanation of knowledge claims; methods including participant observation and interviewing.  
Prerequisite: Graduate classification.

COMM 616 Topics in Communication Methods  
Credits 1 to 3. 1 to 3 Lecture Hours.  
Focused and in-depth examination on theory and practice of single method in communication research; includes surveys, interviewing, focus groups, ethnography, digital methods, rhetorical field methods, engage scholarship, historiography and experimental design. May be repeated for credit up to 12 hours.  
Prerequisite: Graduate classification.

COMM 620 Communication Theory  
Credits 3. 3 Lecture Hours.  
The nature and role of communication theory; systems of ontology and epistemology in theory development; critical review of current theories concerning communication codes, functions and processes in various contexts.  
Prerequisite: Graduate classification or approval of instructor.

COMM 625 International Communication and Public Diplomacy  
Credits 3. 3 Lecture Hours.  
Exploration of the intersections of culture, media and communication; emphasis on the role of communication in public diplomacy; examination of global media, international relations and globalization and media technologies on issues of cultural identity and geopolitics and the policy discussions emerging from that impact.  
Prerequisite: Graduate classification.

COMM 626 Communication Law and Policy  
Credits 3. 3 Lecture Hours.  
Foundations of law and policy as the context for all communication, online or off; issues such as free speech, privacy and surveillance, intellectual property rights, access to information, extreme speech, public diplomacy, cybersecurity and network neutrality; mechanisms and effects of policy-making by governments, international and global organizations and via technical standard-setting and algorithms; roles of civil society and corporations in policy-making and implementation; methods for legal research and for law and society research.  
Prerequisites: Graduate classification.

COMM 630 Interpersonal Communication  
Credits 3. 3 Lecture Hours.  
Major theories in interpersonal communication; critical examination of current research programs on communication in interpersonal influence, relational development and conflict management.  
Prerequisite: Graduate classification.

COMM 631 Group Communication  
Credits 3. 3 Lecture Hours.  
Major concepts and theories of communicative processes in task-oriented groups from a social scientific perspective; the role of group communication in (1) group decision processes, (2) decision development, (3) decision-making agendas, and (4) conflict and performance quality.  
Prerequisite: Graduate classification.

COMM 632 Communication and Conflict  
Credits 3. 3 Lecture Hours.  
Elements and central features of conflict theories and different approaches to communication in conflict management; analysis of communication research in interpersonal, family/marital, group, organizational, and public conflicts and the role of the media in social and international disputes.  
Prerequisite: Graduate classification.

COMM 634 Communication and Gender  
Credits 3. 3 Lecture Hours.  
Gender considered as a complex phenomenon constituted through communication; topics include femininities, masculinities, language, power, nonverbal behavior, gender in media, organizations, interpersonal relationships, and social movements.  
Prerequisite: Graduate classification.

COMM 636 Survey of Organizational Communication  
Credits 3. 3 Lecture Hours.  
Theoretical and empirical literature on human communication and complex organizations; the study of messages, interaction, and meaning in the process of organizing; topics include superior-subordinate communication, communication networks, and technologies, language, message flow, symbols and organizational culture, negotiation and conflict, and power and politics.  
Prerequisite: Graduate classification.

COMM 637 Organizational Communication Seminar  
Credits 3. 3 Lecture Hours.  
Investigation of a subject important to the understanding of organizational communication, such as communication and organizational decision-making, group communication within organizations, communication and organizational culture, and organizational rhetoric and issue management. May be repeated for credit with different content up to a total of four times.  
Prerequisite: Graduate classification.

COMM 638 Crisis Communication  
Credits 3. 3 Lecture Hours.  
Focuses on crisis communication theory and research as it applies to organizations; differentiation between the various crisis communication theories; application of various crisis communication theories to crisis cases; understanding the relationship between crisis and risk communication.  
Prerequisite: Graduate classification.

COMM 640 Rhetorical Theory  
Credits 3. 3 Lecture Hours.  
Close reading of classical and contemporary systems of rhetoric; survey of principal applications to communication theory and research.  
Prerequisite: Graduate classification or approval of instructor.
COMM 645 Rhetorical and Textual Methods in Communication Research
Credits 3. 3 Lecture Hours.
Comparative study of traditional and contemporary perspectives on the
description, interpretation, and evaluation of public discourse, including
textual analysis, neo-classical analysis, Burkean criticism, quantitative
and qualitative approaches to content analysis, fantasy theme analysis,
and semiotic analysis.
Prerequisite: Graduate classification or approval of instructor.

COMM 649 American Public Discourse to 1865
Credits 3. 3 Lecture Hours.
Public discourse and political rhetoric in America in colonial and pre-Civil
War years; historical, conceptual, and practical examination of political campaign
rhetoric, legislative rhetoric, judicial rhetoric, and advocacy group rhetoric.
Prerequisite: Graduate classification.

COMM 650 American Public Discourse Since 1865
Credits 3. 3 Lecture Hours.
Public discourse and political rhetoric in America in post-Civil War years;
historical, conceptual, and practical examination of political campaign
rhetoric, legislative rhetoric, judicial rhetoric, and advocacy group rhetoric.
Prerequisite: Graduate classification.

COMM 651 Presidential Communication
Credits 3. 3 Lecture Hours.
Examination of discourse of, about and from American presidents,
including principal genres of presidential communication, speechwriting
and media strategies; case studies of presidential communication
ranging from campaigns, oratory, to crisis rhetoric and ceremonial
address.
Prerequisite: Graduate classification.

COMM 652 The Rhetoric of Social Movements
Credits 3. 3 Lecture Hours.
Analysis of persuasive strategies used to build social identities and
collectively agitate for social change; exploration of the history of social
movements in the United States and abroad.

COMM 653 Rhetoric and Public Culture
Credits 3. 3 Lecture Hours.
Examination of how artifacts of public culture function rhetorically to
transform public attitudes, opinion and memory; analysis of documents,
artworks, images and histories from a humanities and social science
perspective.

COMM 654/ENGL 654 Classical Rhetoric
Credits 3. 3 Lecture Hours.
Origins of rhetoric in classical Greece and Rome; exploration of the
relationship between philosophy, rhetoric and democratic political
culture; the contemporary relevance of classical thought to contemporary
problems.
Cross Listing: ENGL 654/COMM 654.

COMM 655/ENGL 655 Contemporary Theories of Rhetoric
Credits 3. 3 Lecture Hours.
Investigation of the major figures in rhetorical theory in the 20th and
21st centuries; analysis of the relationship between rhetoric and
power; identifying new challenges for rhetoric in global, multicultural,
technological age. May be repeated for credit.
Cross Listing: ENGL 655/COMM 655.

COMM 656/WGST 652 Feminism and Rhetoric
Credits 3. 3 Lecture Hours.
Historical development of the ideology, theory and rhetorical practices
of U.S. feminism; criticism of significant artifacts of women orators and
writers from the 19th century to contemporary times.
Cross Listing: WGST 652/COMM 656.

COMM 658 Seminar in Communication and Culture
Credits 3. 3 Lecture Hours.
Investigation of the ways that culture, religion, identity, gender, popular
culture, community, history, and related ideas are shaped through
communication in order to understand the development of social norms,
political values, and the human experience. May be repeated for credit
with different content up to a total of three times.
Prerequisite: Graduate classification.

COMM 659 Communication and Citizenship in the Public Sphere
Credits 3. 3 Lecture Hours.
Theoretical examination of communication within democratic, republican,
and liberal conceptions of citizenship; consideration of the ideal of
the public sphere, and communication in global civil society; specific
attention to the practices of American citizenship within the global civil
society.
Prerequisite: Graduate classification.

COMM 662 Survey of Media Studies
Credits 3. 3 Lecture Hours.
Survey of research and theory in media studies; overview of the
historical and theoretical orientation of media studies and mediated
communication; examination of approaches to analyzing media texts,
technologies, audiences, reception processes, economics and/or
industries.
Prerequisite: Graduate classification.

COMM 663 Seminar in Media Studies
Credits 3. 3 Other Hours.
Intensive work on selected topics of research in media studies; may
address work in the areas of audience studies, media effects, industries,
policy, international issues, media and culture, media history or theory.
May be repeated for credit with different content up to a total of three
times.
Prerequisite: Graduate classification.

COMM 664 Media Processes and Effects
Credits 3. 3 Lecture Hours.
Investigation of processes through which mediated messages influence
our everyday lives; examination of social scientific approaches;
understanding how viewers select, interpret and respond to mediated
messages; includes media representations, mediated inter-group
processes, news framing, political advertising, persuasive messages,
entertainment media, popular culture, health campaigns, positive media
psychology, new media technologies, pro-social media effects and critical
media literacy.
Prerequisite: Graduate classification.

COMM 665 Communication and Technology
Credits 3. 3 Lecture Hours.
Examines the relationships between human communication and
technology, investigating the social effects of communication
technologies, the quality of messages, communicative practices, and
rhetorical norms that typify effective communication in technological
society.
Prerequisite: Graduate classification.
COMM 667 Media and Health
Credits 3. 3 Lecture Hours.
Examination of theories, methods and research that characterize the use of media in health contexts; focus on mass media influence on public health and/or strategic use of mass media to promote health behaviors; engagement of social and behavioral science approaches to media effects and/or critical perspectives on the study of media as social institutions. May be taken three times for credit.
Prerequisite: Graduate classification.

COMM 669 Survey of Health Communication
Credits 3. 3 Lecture Hours.
Theories and research in health communication considering functions and outcomes of communication processes in various health contexts, ranging from interpersonal settings to public campaigns; emphasis on providing a framework for synthesizing and critically evaluating health communication research.
Prerequisite: Graduate classification.

COMM 670 Health Communication Seminar
Credits 3. 3 Lecture Hours.
Investigation of a subject important to the understanding of health communication, such as persuasion and public health campaigns, physician-patient communication, or communication in health care organizations. May be repeated for credit with different content up to a total of three times.
Prerequisites: Graduate classification and approval of instructor.

COMM 671 Interdisciplinary Seminar in Prevention Science
Credit 1. 1 Lecture Hour.
Contemporary research programs that represent the interdisciplinary field of prevention science; strengths and limitations of diverse theoretical and conceptual bases of research in prevention science; application of research findings to issues related to the prevention of mental, emotional, and physical health problems and the promotion of well-being. May be taken 3 times for credit.
Prerequisite: Graduate standing and enrollment in the interdisciplinary graduate certificate in prevention science or approval of instructor.
Cross Listing: HLTH 671, RPTS 620 and SPSY 620.

COMM 681 Professional Seminar
Credits 0-1. 0-1 Other Hours.
Provides socialization to the profession of communication, focusing on graduate students’ roles as scholars and teachers; provides instruction on teaching communication, conducting and writing publishable research, and fulfilling responsibilities to one’s organization and profession. May be repeated up to three times.
Prerequisite: Graduate classification.

COMM 685 Directed Studies
Credits 1 to 6. 1 to 6 Other Hours.
Directed studies in specific problem areas in communication. Student may take up to two sections of directed studies in communication in the same semester, with a maximum of 6 credits.
Prerequisite: Approval of department head.

COMM 689 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Selected topics in an identified area of communication. May be repeated for credit.
Prerequisite: Approval of instructor.

COMM 691 Research
Credits 1 to 23. 1 to 23 Other Hours.
Research for thesis.

COMM 695 Thesis
Credits 0-6. 0-6 Other Hours.
Research for thesis. May be repeated up to the maximum number of credits for the degree. May be taken up to three times for credit.

COMM 697 Directed Research
Credits 0-1. 0-1 Lecture Hour.
Directed research for thesis. May be repeated for credit. Cross Listing: COSC 697, RPTS 697.
Prerequisite: Approval of department head.

COMM 699 Dissertation
Credits 0-12. 0-12 Other Hours.
Research for dissertation. May be repeated for credit. May be taken up to three times for credit.
Prerequisite: Approval of department head.

COSC - Construction Science

COSC 601 Construction Practices
Credits 3. 3 Lecture Hours.
Materials and methods of construction with emphasis on the design and construction process; includes structural steel and other metals, foundation materials, precast and tilt wall concrete, concrete reinforcement including pre-stressing, wood dimension lumber framing, and heavy timber framing.

COSC 602 Construction Cost Estimating
Credits 3. 3 Lecture Hours.
Determination of quantities for various types of construction materials and works including earthwork, foundations, structural systems, mechanical and electrical systems, and building finishes; methods used for pricing of construction works including labor, materials, equipment, sub-contractors, overhead and profit; use of various types of cost data catalogs available in the industry.

COSC 603 Construction Scheduling
Credits 3. 3 Lecture Hours.
Introduction to commonly used techniques and computer applications for the planning, scheduling, monitoring, and controlling of construction projects; includes key scheduling techniques such as Gantt Chart, CPM, PERT, LSM, and EVM; practical scheduling practices such as tracking, controlling, and forecasting trends of schedules, cost control, and reporting.
Prerequisite: COSC 602 or equivalent.

COSC 606 Mechanical and Electrical Construction
Credits 3. 3 Lecture Hours.
Building environmental systems with a major emphasis on the design and control of the heating, ventilation and cooling systems, plumbing and drainage systems, electrical, fire and lightning protection, and lighting; design opportunities, calculations, equipment selection and economics as they relate to design and construction.

COSC 608 Structural Principles and Practices
Credits 3. 3 Lecture Hours.
Investigations into practical applications of structural design including the analysis and design of structural members in steel and concrete; surveys and studies of various structural systems.

COSC 620 Construction Company Operations
Credits 3. 3 Lecture Hours.
Running a construction company; strategic planning; business planning; organizational theory; competitor analysis; risk management; financial analysis; human resources; management information systems; leadership; codes of ethics; best practices.

COSC 621 Advanced Project Management
Credits 3. 3 Lecture Hours.
Theoretical, practical, and strategic development in the management of contemporary construction projects; advanced techniques used in scheduling and evaluating progress in construction project control; exploration of state-of-the-art management principles and practices, and development of additional insights.
Prerequisite: COSC 603 or COSC 475.

COSC 622 Construction Economics
Credits 3. 3 Lecture Hours.
Foundation in Life Cycle Cost Analysis computation within the context of current issues in environmental sustainability and evidence-based thinking; lean construction as a strategy to overcome the hurdle of first cost.
COSC 624 Construction Business Development
Credits 3. 3 Lecture Hours.
Acquisition of new work in the construction industry; understanding available project delivery systems; competitor analyses; acquisition procedures including response techniques for complex requests for proposals; understanding concepts of sales and marketing, branding, backlog, and business development budgeting in construction.

COSC 628 Construction Contracts and Risk Management
Credits 3. 3 Lecture Hours.
Advanced construction law, contracts, and risk management applicable to construction management; identification of common disputes and construction risks among the owner, design professionals, and contractor; analysis of construction contracts with an emphasis on troublesome provisions and solutions; demonstration of tools of negotiation and dispute resolution; ethics in construction.

COSC 631 Advanced Productivity and Lean
Credits 3. 3 Lecture Hours.
Introduction to lean history, concepts and methods; deduction of basic training modules in lean project delivery; application of lean management in construction projects.

COSC 642 Construction Information Technology
Credits 3. 3 Lecture Hours.
Exploration of emerging technologies for the construction industry including hardware and software systems such as BIM, RFID, Wireless/Mobile, information systems, construction specific programs, and information strategy planning; using information strategy planning by owners and contractors to effectively enhance the management of business entities and projects in construction.

COSC 644 Advanced Construction Systems
Credits 3. 3 Lecture Hours.
Theoretical, practical, and strategic development in contemporary construction systems; exploration of state-of-the-art innovations in environmental control systems, structural principles and practices; integration of innovations with information technologies, and development of additional insights.

COSC 650 Advanced Construction Visualization
Credits 3. 3 Lecture Hours.
Introduction to the theory and application of 3-D computer models in the design/build construction process; creation, positioning in 3-D space, and linking of building components to a database record; creation of a wide range of construction related information useful in controlling project quality.

COSC 663 Sustainable Construction
Credits 3. 3 Lecture Hours.
Contribution of materials and methods to meeting the needs of the present without compromising the ability of future generations to meet their own needs; overview of international, national and local programs promoting sustainable construction; characteristics of the components of successful sustainable construction projects; theories and practices through case studies.

COSC 670 Facilities Asset Management
Credits 3. 3 Lecture Hours.
Fundamentals of facility asset management and property management including concepts, theories, and principles of design, construction, accounting, finance, and management of the built environment; an overview of a project throughout its entire life cycle from various perspectives including the owner, users, designers, constructors and facility management personnel.

COSC 681 Seminar
Credit 1. 1 Lecture Hour.
Discussion and review of degree requirements, career opportunities, and current research activities in construction management.
Prerequisite: Graduate classification.

COSC 684 Professional Internship
Credits 3 to 6. 3 to 3 Other Hours.
Approximately 400-600 hours with a construction or construction-related company that exposes the student to construction-related activities; an initial report, monthly progress reports, a final report, and a final completion letter are required.
Prerequisites: Graduate classification; approval of graduate coordinator; approval of internship coordinator.

COSC 685 Directed Studies
Credits 1 to 6. 1 to 6 Other Hours.
Individual problems in the area of building construction involving the application of theory and practice.
Prerequisite: Approval of instructor.

COSC 689 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Selected topics in an identified field of construction management. May be repeated for credit.
Prerequisite: Approval of instructor.

COSC 690 Theory of Research in Construction Management
Credits 3. 3 Lecture Hours.
Introduction to research, research tools, proposal writing and research reports; emphasis on research planning and design, conducting a comprehensive review of literature, quantitative and qualitative research methodologies, defining research problems in construction science, and the development of research proposals.
Prerequisite: STAT 651 or concurrent enrollment.

COSC 691 Research
Credits 1 to 23. 1 to 23 Other Hours.
Research for thesis.
Prerequisites: COSC 690 or concurrent enrollment; approval of graduate coordinator.

COSC 693 Professional Study
Credits 1 to 6. 1 to 6 Other Hours.
Approved professional study of project undertaken as terminal requirement for Master of Science, non-thesis option. Preparation of a record of study summarizing the rationale, procedure and results of the completed study. May be repeated for credit.
Prerequisite: COSC 690 or concurrent enrollment; approval of graduate coordinator.

CPSY - Counseling Psychology

CPSY 601 Multicultural Counseling in Schools
Credits 3. 3 Lecture Hours.
Intersecting role of ethnicity, cultural background, gender and sexual orientation and how they shape the psychosocial development of children and adolescents and impact their educational trajectories; development and appreciation of cultural and ethnic differences among individuals, groups and families to enhance school counseling service delivery.
Prerequisites: Graduate classification; approval of department head.
CPSY 602 School Counseling Theories and Techniques
Credits 3. 3 Lecture Hours.
Broad view of counseling theories and techniques using a microskills approach; modules include topics pertinent to the school counseling field; opportunities to observe and practice counseling techniques. 
Prerequisites: CPSY 630; graduate classification; approval of department head.

CPSY 603 School Counseling Group Interventions
Credits 3. 3 Lecture Hours.
Development of group counseling interventions for children and adolescents in school settings. 
Prerequisites: Graduate classification; approval of department head.

CPSY 612 Planning and Organizing Comprehensive Guidance Programs
Credits 3. 3 Lecture Hours.
Purposes and functions of a guidance program; components of a comprehensive guidance program; systems approach to implementing a comprehensive guidance program for elementary and secondary students and adults. 
Prerequisite: Approval of department head.

CPSY 626 Psychopathology
Credits 3. 3 Lecture Hours.
Causes, course, outcomes and treatment of abnormal and maladaptive behavior; degrees of variation possible from normal adaptive behavior; biological, developmental, social, cultural and psychological perspective on abnormal behavior. 
Prerequisite: Graduate classification.

CPSY 630 Foundations of School Counseling
Credits 3. 3 Lecture Hours.
Philosophical, psychological, and sociological concepts fundamental to counseling in schools. 
Prerequisite: Graduate classification; Approval of department head.

CPSY 631 Techniques of Counseling
Credits 3. 3 Lecture Hours.
Methods and procedures descriptive of the counseling process; dynamics of counselor-counselsee relationship; interviewing techniques; use of test results in counseling. 
Prerequisites: CPSY 630; approval of department head.

CPSY 632 Career Counseling
Credits 3. 3 Lecture Hours.
Theories of career development; sources, classification and analysis of educational, occupational and social information including occupational trends, post-secondary programs and financial planning; use of occupational-educational information, appropriate psychological measures and computerized guidance systems. 
Prerequisite: CPSY 679.

CPSY 633 Introduction to Group Process
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Principles, procedures and processes of group approaches to assisting individuals in their personal growth and development in education, public and mental health settings; participation as member of a personal growth required. 
Prerequisites: CPSY 630; approval of department head.

CPSY 634 Group Counseling and Psychotherapy
Credits 3. 3 Lecture Hours.
Major contemporary approaches to group counseling and psychotherapy in mental and public health settings; experiential learning in a simulated group process; integration of theory and practical applications. 
Prerequisites: CPSY 631; CPSY 633 or equivalent; approval of department head.

CPSY 635 Social Counseling Psychology Interface
Credits 3. 3 Lecture Hours.
Provides a foundation in theory and research at the interface of social and counseling psychology; fundamentals of social psychology theories, methodologies and perspectives; understanding the relevance to counseling psychology practice; focus on social and cognitive theories, concepts, and processes rather than specific psychological disorders. 
Prerequisite(s): Doctoral student in good standing in counseling, clinical, school or social psychology.

CPSY 636 Psychological Consultation to Organizations
Credits 3. 3 Lecture Hours.
Focuses on organizations as the target of analysis, intervention, and change; established social science concepts and principles; consideration of concepts, intervention strategies, and skills that extend beyond those used in counseling and psychotherapy; highlights consultation as a mode of change agency; considerable attention given to putting theory into practice. 
Prerequisites: Graduate classification; approval of department head; approval of instructor.

CPSY 637 Latino Psychology
Credits 3. 3 Lecture Hours.
Examination of psychological research and literature related to Latino experience in the U.S. via readings, media and class discussion; introduction to various Latino groups with the primary focus on individuals of Mexican descent. 
Prerequisites: Graduate classification; approval of department head.

CPSY 639 Counseling Practicum I
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Supervised experience in individual counseling; cases engaged in the counseling laboratory on campus; off-campus counseling in schools and various public and mental health settings also assigned at supervisor’s discretion. May be taken for credit 2 times as content varies. 
Prerequisites: CPSY 631 and CPSY 632; approval of instructor six weeks prior to registration; approval of department head.

CPSY 662 Professional Issues in Counseling Psychology
Credits 3. 3 Lecture Hours.
Legal, ethical, economic and practical issues that impact the training, credentialing, placement and marketing of counseling psychologists and their services. 
Prerequisite: Approval of department head.

CPSY 664 Counseling Practicum II
Credits 3. 6 Lab Hours. 1 Other Hour.
Supervised experience in individual and group counseling requiring advanced technical skills; continuing counseling relationships with various, selected subjects. 
Prerequisites: CPSY 639; approval of department head six weeks prior to registration.
CPSY 666 Practicum in Counselor Supervision  
Credits 3. 6 Lab Hours. 1 Other Hour.  
Supervised experience in directing counseling and guidance activities of students involved in practicum and field experiences; intended for individuals preparing to become counselor educators or supervisors.  
Prerequisites: CPSY 664; approval of department head; application six weeks prior to registration.

CPSY 671 Dying and Bereavement  
Credits 3. 3 Lecture Hours.  
Exposure to experiences of others on the topic of dying and loss both through readings and through class presentations and discussions; offers new ways to think about death in general, as well as one's own death and those of one's loved ones; provides mental health provider a foundation in concepts/process of death, loss and bereavement.  
Prerequisites: Graduate classification and approval of department head.

CPSY 672 Theories of Counseling and Psychotherapy  
Credits 3. 3 Lecture Hours.  
Comprehensive and intensive study of major theoretical positions in counseling and psychotherapy; implications for research and practice in public and mental health settings.  
Prerequisites: CPSY 631; approval of department head.

CPSY 673 Advanced Psychotherapeutic Skills  
Credits 3. 3 Lecture Hours.  
Didactic/experiential course, designed for students in professional psychology programs; variety of psychotherapeutic interventions in short and long term counseling with adults in public and mental health settings; ways to access affective process.  
Prerequisites: Practicum; approval of instructor and department head.

CPSY 676 Family Counseling and Psychotherapy  
Credits 3. 3 Lecture Hours.  
Basic concepts and techniques in marriage and family counseling in public and mental health settings; marital communication and growth relationships.  
Prerequisites: CPSY 631 and CPSY 633; approval of instructor and department head.

CPSY 677 Practicum in Clinical Geropsychology  
Credits 3. 1 Lecture Hour. 6 Other Hours.  
Practicum in theory and strategies for providing mental health services to the elderly; training and supervision of individual counseling and community mental health approaches in a variety of settings.  
Prerequisites: Human service experience; approval of instructor and department head.

CPSY 678/PSYC 678 Couples Therapy  
Credits 3. 3 Lecture Hours.  
Theory and practice of marital therapy emphasizing systems and communication approaches; effective strategies and techniques for use in public and mental health settings; therapy with specific marital problems and obstacles to effective therapy. Repeatable to 6 hours.  
Prerequisites: CPSY 631 and CPSY 639 or equivalent; approval of instructor.  
Cross Listing: PSYC 678/CPSY 678.

CPSY 679 Multicultural Counseling  
Credits 3. 3 Lecture Hours.  
Effective communication skills in cross-cultural counseling or helping relationships in public and mental health settings; integration of theoretical knowledge with experiential learning; psychosocial factors and lifestyles of cultural groups; effect on counseling relationships.  
Prerequisites: Graduate classification and approval of department head.

CPSY 683 Field Practicum  
Credits 1 to 15. 1 to 15 Other Hours.  
Supervised experience in professional public and mental health settings in counseling psychology; wide range of practical experiences and activities that are closely supervised by departmental faculty. May be taken up to 30 hours.  
Prerequisite: Graduate classification; approval of department head.

CPSY 684 Professional Internship  
Credits 1 to 4. 1 to 4 Other Hours.  
Limited to advanced doctoral students; faculty supervised experience in approved professional public and mental health employment settings; application for September assignments must be approved the previous October. May be repeated up to 9 hours.  
Prerequisites: Completion of required coursework except CPSY 684 and CPSY 691; approval of department head.

CPSY 685 Directed Studies  
Credits 1 to 4. 1 to 4 Other Hours.  
Directed individual study of selected problems.  
Prerequisite: Approval of department head.

CPSY 688/EPSY 688 Research Proposal Development  
Credits 4. 3 Lecture Hours. 2 Lab Hours.  
This seminar models the processes of developing and defending research proposals.  
Prerequisites: EPSY 640 and EPSY 641 or approval of instructor; approval of department head.  
Cross Listing: EPSY 688/CPSY 688.

CPSY 689 Special Topics in...  
Credits 1 to 4. 1 to 4 Lecture Hours. 1 to 4 Lab Hours.  
Selected topic in an identified area of counseling psychology. May be repeated for credit.  
Prerequisite: Approval of department head.

CPSY 690 Theory of Counseling Psychology Research  
Credits 3. 3 Lecture Hours.  
Theory and design of research problems and experiments in counseling psychology; communication of research proposals and results; evaluation of current research of faculty and students and review of current literature. May be repeated for credit.  
Prerequisite: Approval of instructor and department head.

CPSY 691 Research  
Credits 1 to 23. 1 to 23 Other Hours.  
Research for thesis or dissertation.  
Prerequisite: Approval of department head.

CPSY 691; approval of department head.

CPSY 691; approval of department head.

CPSY 691; approval of department head.

CPSY 691; approval of department head.

CPSY 691; approval of department head.

CPSY 691; approval of department head.

CPSY 691; approval of department head.

CPSY 691; approval of department head.

CPSY 691; approval of department head.
CSCE 603 Database Systems and Applications
Credits 3. 3 Lecture Hours.
Introduction to the concepts and design methodologies of database systems for non-computer science majors; emphasis on E. F. Codd's relational model with hands-on design application. Only one of the following will satisfy the requirements for a degree: CSCE 310 and CSCE 603.
Prerequisites: CSCE 601; graduate classification.

CSCE 604 Programming Languages
Credits 3. 3 Lecture Hours.
Study in the design space of programming languages, covering language processing, formalisms to describe semantics of programming languages, important concepts found in current programming languages, and programming paradigms.
Prerequisite: Graduate classification.

CSCE 605 Compiler Design
Credits 3. 3 Lecture Hours.
Advanced topics in compiler writing; parser generators and compiler-compilers; dynamic storage and scope resolution; data flow analysis and code optimization.
Prerequisite: CSCE 434.

CSCE 606 Software Engineering
Credits 3. 3 Lecture Hours.
Development of advanced concepts in software engineering; software development environments as a mechanism for enhancing productivity and software quality; the classification, evaluation and selection of methodologies for environments; rapid prototyping and reusability concepts; artificial intelligence techniques applied to software engineering.
Prerequisite: CSCE 431 or approval of instructor.

CSCE 608 Database Systems
Credits 3. 3 Lecture Hours.
Database modeling techniques; expressiveness in query languages including knowledge representation; manipulation languages data models; physical data organization; relational database design theory; query processing; transaction management and recovery; distributed data management.
Prerequisite: CSCE 310 or CSCE 603.

CSCE 610 Hypertext/Hypermedia Systems
Credits 3. 3 Lecture Hours.
Comprehensive coverage of Hypertext/Hypermedia; basic concepts and definitions; fundamental components, architectures and models; problems and current solutions; design and implementation issues; and research issues.
Prerequisites: CSCE 310 or CSCE 603; CSCE 313.

CSCE 611 Operating Systems and Applications
Credits 3. 3 Lecture Hours.
Review of computer architecture hardware/software evolution leading to contemporary operating systems; basic operating systems concepts; methods of operating systems design and construction; algorithms for CPU scheduling memory and general resource allocation; process coordination and management; case studies of several operating systems; quality-of-services of operating systems and their impact on applications. Only one of the following will satisfy the requirements for a degree: CSCE 410 and CSCE 611.
Prerequisites: CSCE 313; graduate classification.

CSCE 612 Applied Networks and Distributed Processing
Credits 3. 3 Lecture Hours.
Fundamentals, including network design and protocol analysis, in the context of computer communications; mixes fundamentals with both programming and pragmatic views of engineering issues; it includes network architecture as well as principles of network engineering; focus is on applying principles of layered architecture to analyzing real networks; lab exercises focus on protocol understanding and programming; knowledge of UNIX and C programming helpful, but not required. Only one of the following will satisfy the requirements for a degree: CSCE 463 and CSCE 612.
Prerequisite: Graduate classification.

CSCE 613 Operating Systems
Credits 3. 3 Lecture Hours.
Analysis of algorithms in computer operating systems; sequencing and control algorithms supporting concurrent processes; scheduling algorithms to minimize execution times and mean flow times; algorithms for allocating tasks to processors; allocation of memory (virtual and real); direct access device schedules; auxiliary and buffer storage models.
Prerequisite: CSCE 313 or CSCE 611.

CSCE 614 Computer Architecture
Credits 3. 3 Lecture Hours.
Reviews of von Neumann architecture and its limitations; parallel computer structures and concurrent computation; pipeline computers and vectorization methods; array processors, multiprocessor architectures and programming; dataflow computers.
Prerequisite: CSCE 350/ECEN 350/ECEN 350/CSCE 350.

CSCE 616 Introduction to Hardware Design Verification
Credits 3. 3 Lecture Hours.
Introduction to hardware functional verification; case studies on verification in integrated circuit design; introduction to industry best practices; introduction to logic functional verification.
Prerequisites: CSCE 312 or CSCE 350/ECEN 350, or equivalent in computer architecture; familiarity with C/C++/Verilog/VHDL programming.

CSCE 617 Co-Design of Embedded Systems (CODES)
Credits 3. 3 Lecture Hours.
Co-design methodologies of hardware-software systems; models of computation (MOC), system specification, co-simulation, synthesis, and verification; hardware-software implementation; core-based systems and interfaces, performance analysis and optimization; system on chip, power aware design.
Prerequisites: CSCE 462 or equivalent, CSCE 410 and graduate classification.

CSCE 619 Networks and Distributed Computing
Credits 3. 3 Lecture Hours.
Computer network concepts including network architecture, layering, protocols, packet switching and virtual circuits; performance evaluation and design considerations for local area networks; packet distributed networks; satellite networks.
Prerequisite: CSCE 463 or CSCE 612.

CSCE 620/VIZA 670 Computational Geometry
Credits 3. 3 Lecture Hours.
Design and analysis of algorithms for solving geometrical problems; includes convex hull problems, Voronoi diagrams, range searching and proximity problems.
Prerequisite: CSCE 311.
Cross Listing: VIZA 670/CSCE 620.
CSCE 621 Language, Library, and Program Design Using C++
Credits 3. 3 Lecture Hours.
Exploration of the interactions among language design, library design, and program design in the context of ISO standard C++ and its proposed extensions; Novel features provided by C++ and the design and programming techniques supported.
Prerequisites: Graduate classification or approval of instructor; understanding of C++ and experience with software development projects helpful; knowledge of at least one programming language in addition to C and C++.

CSCE 622 Generic Programming
Credits 3. 3 Lecture Hours.
The generic programming approach to design and systematic classification of software components, techniques for achieving correctness, efficiency, and generality of algorithms, data structures, and memory management, methods of structuring a library of generic software components for maximum usability are practiced in a significant design and implementation project.
Prerequisite: CSCE 221.

CSCE 624 Sketch Recognition
Credits 3. 3 Lecture Hours.
Analysis, implementation, and comparison of sketch recognition algorithms, including feature-based, vision-based, geometrical, timing-based, and path-based recognition algorithms. Methods for combining these recognition methods for greater accuracy, using known AI techniques, are also examined.
Prerequisite: Graduate classification.

CSCE 625 Artificial Intelligence
Credits 3. 3 Lecture Hours.
Basic concepts and methods of artificial intelligence; Heuristic search procedures for general graphs; game playing strategies; resolution and rule based deduction systems; knowledge representation; reasoning with uncertainty.
Prerequisite: CSCE 221.

CSCE 626 Parallel Algorithm Design and Analysis
Credits 3. 3 Lecture Hours.
Design of algorithms for use on highly parallel machines; area-time complexity of problems and general lower bound theory; application of these concepts to artificial intelligence, computer vision and VLSI design automation.
Prerequisite: CSCE 221.

CSCE 627 Theory of Computability
Credits 3. 3 Lecture Hours.
Formal models of computation such as pushdown autamata; Turing machines and recursive functions; unsolvability results; complexity of solvable results.
Prerequisite: CSCE 433.

CSCE 628/BICH 628 Computational Biology
Credits 3. 3 Lecture Hours.
Introduction to computational biology; formulations of biology problems as computational problems; computational approaches to solve problems in genomics and proteomics.
Prerequisite: Graduate classification or approval of instructor.
Cross Listing: BICH 628/CSCE 628.

CSCE 629 Analysis of Algorithms
Credits 3. 3 Lecture Hours.
Concrete algorithm design and analysis; abstract models to analyze the complexity of problems; NP-Completeness; approximation and probabilistic algorithms.
Prerequisite: CSCE 411.

CSCE 630 Speech Processing
Credits 3. 3 Lecture Hours.
Speech production and perception (speech apparatus, articulatory/auditory phonetics); mathematical foundations (sampling, filtering, probability, pattern recognition); speech analysis and coding (short-time Fourier analysis, linear prediction, cepstrum); speech recognition (dynamic time warping, hidden Markov models, language models); speech synthesis (front-end, back-end); speech modification (overlap-add, enhancement, voice conversion).
Prerequisites: ECEN 314 or equivalent or approval of instructor. Basic knowledge of signals and systems, linear algebra, probability and statistics. Programming experience in a high-level language is required.

CSCE 631 Intelligent Agents
Credits 3. 3 Lecture Hours.
On the design and implementation of Intelligent Agents and coordination mechanisms among multiple agents, ranging from theoretical principles to practical methods for implementation.
Prerequisite: CSCE 420 or CSCE 625.

CSCE 633 Machine Learning
Credits 3. 3 Lecture Hours.
Machine learning is the study of self-modifying computer systems that can acquire new knowledge and improve their own performance; survey machine learning techniques, which include induction from examples, conceptual clustering, explanation-based learning, exemplar learning and analogy, discovery and genetic algorithms.
Prerequisite: CSCE 420 or CSCE 625.

CSCE 634 Intelligent User Interfaces
Credits 3. 3 Lecture Hours.
Intersection of artificial intelligence and computer-human interaction; emphasis on designing and evaluating systems that learn about and adapt to their users, tasks, and environments.
Prerequisites: Graduate classification and approval of instructor.

CSCE 635 AI Robotics
Credits 3. 3 Lecture Hours. 1 Lab Hour.
Introduction and survey of artificial intelligence methods for mobile robots (ground, aerial, or marine) for science and engineering majors; theory and practice of unmanned systems, focusing on biological and cognitive principles which differ from control theory formulations.

CSCE 636 Neural Networks
Credits 3. 3 Lecture Hours.
Basic concepts in neural computing; functional equivalence and convergence properties of neural network models; associative memory models; associative, competitive and adaptive resonance models of adaptation and learning; selective applications of neural networks to vision, speech, motor control and planning; neural network modeling environments.
Prerequisites: MATH 304 and MATH 308 or approval of instructor.
CSCE 637 Complexity Theory  
Credits 3. 3 Lecture Hours.  
Deterministic, non-deterministic, alternating and probabilistic computations; reducibilities; P, NP and other complexity classes; abstract complexity; time, space and parallel complexity; and relativized computation.  
Prerequisite: CSCE 627 or approval of instructor.  

CSCE 638 Natural Language Processing: Foundations and Techniques  
Credits 3. 3 Lecture Hours.  
Focus on teaching Natural Language Processing (NLP) fundamentals including language models, automatic syntactic processing and semantic understanding; introduction to major NLP applications including information extraction, machine translation, text summarization, dialogue systems and sentiment analysis.  
Prerequisite: CSCE 221.  

CSCE 639/MEEN 676 Fuzzy Logic and Intelligent Systems  
Credits 3. 3 Lecture Hours.  
Introduces the basics of fuzzy logic and its role in developing intelligent systems; topics include fuzzy set theory, fuzzy rule inference, fuzzy logic in control, fuzzy pattern recognition, neural fuzzy systems and fuzzy model identification using genetic algorithms.  
Prerequisite: CSCE 625 or approval of instructor.  
Cross Listing: MEEN 676/CSCE 639.  

CSCE 640 Quantum Algorithms  
Credits 3. 3 Lecture Hours.  
Introduction to the design and analysis of quantum algorithms; basic principles of the quantum circuit model; gives a gentle introduction to basic quantum algorithms; reviews recent results in quantum information processing.  
Prerequisite: CSCE 629 or approval of instructor.  

CSCE 641/VIZA 672 Computer Graphics  
Credits 3. 3 Lecture Hours.  
Representations of 3-dimensional objects, including polyhedral objects, curved surfaces, volumetric representations and CSG models; techniques for hidden surface/edge removal and volume rendering; illumination and shading; anti-aliasing; ray tracing; radiosity; animation; practical experience with state-of-the-art graphics hardware and software.  
Prerequisite: CSCE 441.  
Cross Listing: VIZA 672/CSCE 641.  

CSCE 643 Seminar in Intelligent Systems and Robotics  
Credits 3. 3 Lecture Hours.  
Problems, methods and recent developments in intelligent systems and robotics. May be taken at multiple times for credit as content varies.  
Prerequisite: Approval of instructor.  

CSCE 644 Cortical Networks  
Credits 3. 3 Lecture Hours.  
The architecture of the mammalian cerebral cortex; its modular organization and its network for distributed and parallel processing; cortical networks in perception and memory; neuronal microstructure and dynamical simulation of cortical networks; the cortical network as a proven paradigm for the design of cognitive machines.  
Prerequisites: CSCE 420 or CSCE 625 and CSCE 636 and graduate classification.  

CSCE 645/VIZA 675 Geometric Modeling  
Credits 3. 3 Lecture Hours.  
Geometric and solid modeling concepts. Freeform curves and surfaces (splines and Bezier) with their relational, intersectional and global mathematical properties. Parametric representation of solids, topology of closed curved surfaces, boundary concepts and Boolean/Euler operators. Construction and display of curves and surfaces, and solid models.  
Prerequisites: CSCE 441 and CSCE 442 or equivalent.  
Cross Listing: VIZA 675/CSCE 645.  

CSCE 646/VIZA 654 The Digital Image  
Credits 4. 3 Lecture Hours. 2 Lab Hours.  
Tools and techniques for generation, handling and analysis of two dimensional digital images; image representation and storage; display, media conversion, painting and drawing; warping; color space operations, enhancement, filtering and manipulation.  
Prerequisite: Graduate classification or approval of instructor.  
Cross Listing: VIZA 654/CSCE 646.  

CSCE 647/VIZA 656 Image Synthesis  
Credits 4. 3 Lecture Hours. 2 Lab Hours.  
Principles of image synthesis from 3-D scene descriptions; includes local and global illumination, shading, shadow determination, hidden surface elimination, texturing, raster graphics algorithms, transformations and projects.  
Prerequisite: Approval of instructor.  
Cross Listing: VIZA 656/CSCE 647.  

CSCE 648/VIZA 657 Computer Aided Sculpting  
Credits 3. 2 Lecture Hours. 3 Lab Hours.  
Mathematical and artistic principles of 3-D modeling and sculpting; includes proportions, skeletal foundation, expression and posture, line of action; curves, surfaces and volumes, interpolation and approximation, parametric and rational parametric polynomials, constructive solid geometry, and implicit representations.  
Prerequisite: Approval of instructor.  
Cross Listing: VIZA 657/CSCE 648.  

CSCE 649/VIZA 659 Physically-Based Modeling  
Credits 3. 2 Lecture Hours. 2 Lab Hours.  
Physical simulation as used in choreography, geometric modeling, and the creation of special effects in computer graphics including a variety of problems and techniques explored which may include particle-methods, modeling and simulation of flexible materials, kinematics and constraint systems.  
Prerequisite: Approval of instructor.  
Cross Listing: VIZA 659/CSCE 649.  

CSCE 650/VIZA 677 Virtual Reality  
Credits 3. 3 Lecture Hours.  
Theory and practice of virtual reality (VR); interactive 3D virtual environments, immersive technology, perceptual realism, and embodied interaction experience; overview of VR with topics including input devices, output devices, 3D interaction techniques, augmented reality, the role of realism in VR, navigation techniques, design guidelines, and evaluation methods; hands-on experience designing VR experiences emphasizing application, demonstration, or research purposes.  
Cross Listing: VIZA 677/CSCE 650.
CSCE 652 Software Reverse Engineering
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Introduction to the compilation mechanism to generate executable files and raw binary codes from source codes; the executable file formats for an operation system to run the binary code; disassembly algorithms and control graph analysis; static and dynamic analyses; case studies on code obfuscation, codebreaking and malware analysis.
Prerequisites: CSCE 313 or approval of instructor.

CSCE 653 Computer Methods in Applied Sciences
Credits 3. 3 Lecture Hours.
