6. All students are required to complete a high-impact experience in order to graduate. The list of possible high-impact experiences is available in the INEN advising office.

7. A total of 18 hours of technical electives is required, of which 12 hours must be industrial engineering courses. The choice of courses to be taken must be made in consultation with the student's advisor and/or the Industrial Engineering Advising Office.

The Bachelor of Science degree in Industrial Engineering requires a grade of C or better for required industrial engineering (ISEN) courses. If a course is repeated, only the most recent grade is used in fulfilling this requirement.

**Total Program Hours 128**

**Industrial Engineering - Minor**

The Department of Industrial and Systems Engineering offers a minor in Industrial Engineering.

**Data Center Operations Engineering - Certificate**

With the rapid acceleration of technology through innovation on a global basis, industries recognize the need for young engineers who possess base line knowledge in areas of data system management and an understanding of the system level of complex data center processing systems. In both government and industry there is a growing need for undergraduate engineering students that possess the requisite knowledge and skill sets pertaining to complex data systems management and this certificate program includes a set of courses to assure students develop this knowledge and skill set. Completion of this certificate requires completion of the following educational outcomes:

1. to know and apply principles of engineering management
2. to understand principles of systems level engineering and their application to specific data center system operations
3. to be able to go beyond understanding concepts and demonstrate appropriate usage of systems engineering principles in a design context

For additional information, contact the Data Center Operations Engineering Certificate coordinator or Engineering Academic and Student Affairs, EABB, (979) 845-7200.

**Engineering Systems Management - Certificate**

In many areas of government and industry there is a significant need for undergraduate engineering students that possess the requisite knowledge and skill sets pertaining to engineering systems management in addition to their basic engineering discipline. With the rapid acceleration of technology through innovation on a global basis, industries recognize the need for young engineers who possess base line knowledge in areas of management and an understanding of the system level of complex engineered systems. This certificate program includes a set of courses to assure students develop this knowledge and skill set.
Materials have historically been so important that different eras of civilization were named according to the materials from which tools were fabricated; for example, the Stone Age, the Bronze Age, and the Iron Age. The development of the semiconductor spawned the modern era of information technology often called the Silicon Age. Advances in materials science might make this new millennium the Biomaterials/Nanomaterials/Optical Materials Age.

What do Materials Scientists and Engineers do?

In industry, materials scientists and engineers work with natural or synthetic materials and, most often, with combinations of materials, to improve existing products or to develop novel products. For instance, at Intel, the developer of the processing chip used in most PCs, materials scientists optimize the materials used in chip packaging, balancing differing coefficients of thermal expansion, head dissipation, brittleness and compliancy, and cost for optimum performance and economic feasibility.

Other materials scientists are on the forefront of the revolution in biotechnology, developing materials for the components of artificial joints, heart valves, and other replacement body parts. Smart materials show a tremendous potential in medical and dental applications, such as compressible stents that reform to their intended shape upon contact with body heat once inserted into an artery, ceramic cement for bone repair, or shape-memory alloys to correct misplaced teeth or spine curvature. (Smart materials have one or more properties that can be dramatically altered, such as multiviscosity oil, with a viscosity that varies with temperature.)

Related research involves developing smaller and more reliable components, such as ferromagnetic activators acting as tiny machines in military and other applications. In aerospace engineering, materials scientists are developing airframe and fuselage materials with high strength-to-weight ratios, as well as developing smart materials into integrated sensors and actuators for reconfigurable wings and other adaptive structures.

For more information, visit the Department of Materials Science and Engineering (http://engineering.tamu.edu/materials) website.

PHD, University of Chicago, 1992

Yu, Choongho, Associate Professor
Materials Science & Engr
PHD, University of Texas - Austin, 2004

Zhou, Hongcai J, Professor
Materials Science & Engr
PHD, Texas A&M University, 2000

Majors
- Bachelor of Science in Materials Science and Engineering (p. 424)

Minors
- Materials Science and Engineering Minor (p. 425)

Program Requirements

The freshman year is identical for degrees in aerospace engineering, biomedical engineering, civil engineering, computer engineering, computer science, electrical engineering, electronic systems engineering technology, industrial distribution, industrial engineering, manufacturing and mechanical engineering technology, mechanical engineering, multidisciplinary engineering technology, nuclear engineering, ocean engineering, and petroleum engineering (Note: not all programs listed are offered in Qatar). The freshman year is slightly different for chemical engineering in that students take CHEM 101/CHEM 111 or CHEM 107/CHEM 117 andCHEM 102/CHEM 112. Biomedical Engineering also requires a two semester sequence of chemistry courses consisting of CHEM 101/CHEM 111 or CHEM 107/CHEM 117 and CHEM 102/CHEM 112. Students pursuing degrees in biological and agricultural engineering should refer to the specific curriculum for this major. It is recognized that many students will change the sequence and number of courses taken in any semester. Deviations from the prescribed course sequence, however, should be made with care to ensure that prerequisites for all courses are met.

Spring

| CHEM 102 & CHEM 112 Fundamentals of Chemistry II and Fundamentals of Chemistry Laboratory II 1,4 | 4                     |
| ENGR 216/PHYS 216 Experimental Physics and Engineering Lab II: Mechanics 1 | 2                     |
| MATH 152 Engineering Mathematics II 1 | 4                     |
| PHYS 206 Newtonian Mechanics for Engineering and Science 1 | 3                     |
| University Core Curriculum (p. 22) 3,5                                 | 3-6                   |
| Semester Credit Hours                                                 | 15-16                 |
| Total Semester Credit Hours                                           | 31-32                 |

1. A grade of C or better is required.
2. Entering students will be given a math placement exam. Test results will be used in selecting the appropriate starting course which may be at a higher or lower level.
Of the 18 hours shown as University Core Curriculum electives, 3 must be from creative arts, 3 from social and behavioral sciences (see IDIS curriculum for more information), 6 from American history and 6 from government/political science. The required 6 hours from international and cultural diversity may be met by courses satisfying the creative arts, social and behavioral sciences and American history requirements if they are also on the approved list of international and cultural diversity courses.

BMEN, CHEN and MSEN require 8 hours of freshman chemistry, which may be satisfied by CHEM 101/CHEM 111 or CHEM 107/CHEM 117 and CHEM 102/CHEM 112; Credit by Examination (CBE) for CHEM 101/CHEM 111 or CHEM 107/CHEM 117 plus CHEM 102/CHEM 112; or 8 hours of CBE for CHEM 101/CHEM 111 or CHEM 107/CHEM 117 and CHEM 102/CHEM 112. BMEN, CHEN and MSEN should take CHEM 102/CHEM 112 second semester freshman year. CPSC students may take CHEM 101/CHEM 111 or CHEM 107. CHEM 102/CHEM 112 will substitute for CHEM 107.

For BS-PETE, allocate 3 hours to core communications course (ENGL 210, COMM 203, COMM 205, or COMM 243) and/or 3 hours to UCC elective. For BS-MEEN, allocate 3 hours to core communications course (ENGL 203, ENGL 210, or COMM 205) and/or 3 hours to UCC elective.

6. This is a writing intensive course.

7. Select from any MSEN 300-499 (p. 1001) course not used elsewhere. Students may use up to 3 hours each of MSEN 491, MSEN 485, and MSEN 484.

8. Select in consultation with advisor from MSEN 300-499 (p. 1001); AERO 300-499 (p. 793); BAEN 300-499 (p. 832); BMEN 300-499 (p. 843); CHEN 300-499 (p. 852); CVEN 300-499 (p. 869); CSCE 300-499 (p. 865); ECEN 300-499 (p. 877); ISEN 300-499 (p. 949); MENG 300-499 (p. 987); NEN 300-499 (p. 1011); ENGR 300-499 (p. 894); BIOL 300-499 (p. 839); CHEM 300-499 (p. 849); MATH 300-499 (p. 982); PHYS 300-499 (p. 1031); STAT 300-499 (p. 1068). All non-MSEN specialty electives must be approved by the Undergraduate Advising Office, on the basis of satisfying one or more of the MSEN BSE program outcomes (e.g., integrating scientific and engineering principles across disciplines).

---

### Materials Science and Engineering - Minor

The Department of Materials Science and Engineering (http://engineering.tamu.edu/materials/academics/degrees/undergraduate/undergraduate_minor) degree program is designed to provide a strong materials science educational program for undergraduate science and engineering majors and to integrate a materials focus into their undergraduate training. It is intended for students who are interested in broadening their undergraduate major program of study to incorporate a fundamental
Student must achieve an overall GPA of 2.5 in approved minor courses. Students must make a grade of "C" or better in all courses.

Total Semester Credit Hours: 15

1 Upon consultation with the materials science faculty advisor, up to 2 upper-level technical electives in the student's major department may be accepted in place of these courses.

2 Or additional courses from first list.

For more information, visit the Department of Materials Science and Engineering website (http://engineering.tamu.edu/materials).

Department of Mechanical Engineering

Mechanical engineering is a highly diversified profession. The mechanical engineer designs machines, devices, various products and control systems, and works with the generation, conversion, transmission, and utilization of mechanical and thermal power. Assignments often include analysis and synthesis of mechanical, thermal, and fluid systems. Mechanical engineers are also responsible for characterization, specification, and analysis of materials used in design and manufacturing. Manufacturing systems, robotics, electromechanical devices, and control systems are also the purview of the mechanical engineer. Graduates in mechanical engineering are among the most versatile engineers and enjoy professional employment in industry, government, consulting, and research organizations. The undergraduate program in Mechanical Engineering at Texas A&M University is accredited by the Engineering Accreditation Commission of ABET, www.abet.org.

The work of mechanical engineers varies from general engineering to numerous, narrow specialties, as required by the wide variety of employers. A general list, though not in any way exhaustive, of the areas of professional employment opportunities available to mechanical engineers includes: design, construction, controls, materials specification and evaluation, analysis of thermal systems, fluid and solid mechanics, manufacturing, plant engineering, research and development, and technical sales. Many mechanical engineers are promoted to management and administrative positions as well.

The mission of the Department of Mechanical Engineering is to serve the students of Texas A&M University, the State of Texas, and the nation by:

- providing quality education that is well-grounded in the fundamental principles of engineering, fostering innovation and preparing students for leadership positions and successful careers in industry, government, and academia;
- advancing the knowledge base of mechanical engineering to support the competitiveness of existing industry and to spawn new economic development in Texas and the nation through active involvement in basic and applied research in a global context; and
- successfully pursue life-long learning and advanced study opportunities, and subsequently contribute to the development of advanced concepts and leading edge technologies.

The objectives of the Mechanical Engineering program are to produce graduates who will:

- have successful careers, and become leaders, in industry and the public sector;
- appropriately apply acquired knowledge, work well with other people, effectively communicate ideas and technical information, and continue to learn and improve; and
- successfully pursue advanced studies, if they so choose, opportunities, and subsequently contribute to the development of advanced concepts and leading edge technologies.

The educational outcomes for the Mechanical Engineering program are that students will attain:

- an ability to apply knowledge of mathematics, science and engineering;
• an ability to design and conduct experiments, as well as to analyze and interpret data;
• an ability to design a system, component, or process to meet desired needs within realistic constraints such as economic, environmental, social, political, ethical, health and safety, manufacturability, and sustainability;
• an ability to function on multi-disciplinary teams;
• an ability to identify, formulate and solve engineering problems;
• an understanding of professional and ethical responsibility;
• an ability to communicate effectively;
• the broad education necessary to understand the impact of engineering solutions in a global, economic, environmental, and societal context;
• a recognition of the need for, and an ability to engage in life-long learning;
• a knowledge of contemporary issues; and
• an ability to use the techniques, skills and modern engineering tools necessary for engineering practice.

Mechanical engineers should possess a thorough understanding of engineering science as well as analytical and practical skills in one of many basic mechanical engineering specialties. The mechanical engineering curriculum at Texas A&M requires students to develop and apply logical thinking, innovative approaches, and ethical standards as a prerequisite for professional competence. The curriculum consists of basic theory courses complemented by laboratory experiences in dynamic systems and controls, design, experimentation, fluid mechanics, heat transfer, manufacturing, and materials. Elective courses are offered in numerous areas including air conditioning, automotive engineering, computer-aided design, control systems, corrosion, energy conversion, internal combustion engines, manufacturing, materials, mechanical design, polymers, mechatronics, metallurgy, power generation, robotics, stress analysis, fluid mechanics, turbomachinery, and others. The selection of elective courses is dictated by the interests and goals of the student, working with departmental advisors and within the curriculum guidelines.

Many students enhance their education by participating in cooperative education and/or professional internships, which offer opportunities for employment in engineering positions while working toward a degree. Numerous study abroad programs are also available for gaining experience and perspectives in the international arena. Participation in student chapters of professional and honor societies provides leadership opportunities, collegial activities, and learning experiences outside the classroom. Many students also participate in research projects through individual directed studies courses with a professor. The mechanical engineering program culminates with a senior capstone design course sequence highlighted by real-life projects sponsored by various industries. Students benefit from the challenges and gratification that come through direct interaction with practicing engineers.

Before commencing course work in the major, students must be admitted to the major or have the approval of the department.

Faculty

Allaire, Douglas L, Assistant Professor
Mechanical Engineering
PHD, MASSACHUSETTS INSTITUTE OF TECHNOLOGY, 2009

Alvarado, Jorge L, Professor (courtesy appointment)
Mechanical Engineering
PHD, University of Illinois, 2004

Anand, Nagamangala, Professor
Mechanical Engineering
PHD, Purdue University, 1983

Antao, Dion S, Assistant Professor
Mechanical Engineering
PHD, Drexel University, 2013

Arroyave, Raymundo, Professor (courtesy appointment)
Mechanical Engineering
PHD, Massachusetts Inst of Technology, 2004

Asadi, Amir, Assistant Professor (courtesy appointment)
Mechanical Engineering
PHD, University of Manitoba, 2013

Banerjee, Debjyoti, Professor
Mechanical Engineering
PHD, University of California, Los Angeles, 1999

Benjamin, Chandler C, Research Assistant Professor
Mechanical Engineering
PHD, University of Wisconsin - Madison, 2017

Borazjani, Iman, Associate Professor
Mechanical Engineering
PHD, University of Minnesota, 2008

Bukkapatnam, Satish T, Professor (courtesy appointment)
Mechanical Engineering
PHD, Pennsylvania State University, 1997

Caton, Jerald A, Professor
Mechanical Engineering
PHD, Massachusetts Inst of Technology, 1980

Charoenphol, Phapanin, Research Assistant Professor
Mechanical Engineering
DEN, University of Michigan, 2012

Claridge, David E, Professor
Mechanical Engineering
PHD, Stanford University, 1976

Cope, Dale A, Associate Professor of the Practice
Mechanical Engineering
PHD, Wichita State University, 2002

Creasy, Terry S, Associate Professor (courtesy appointment)
Mechanical Engineering
PHD, University of Delaware, 1997

Criscone, John C, Professor (courtesy appointment)
Mechanical Engineering
PHD, The John Hopkins University School of Medicine, 2005

Culp III, Charles H, Professor (courtesy appointment)
Mechanical Engineering
PHD, Iowa State University, 1976
Darbha, Swaroop V, Professor
Mechanical Engineering
PHD, University of California, Berkeley, 1994

Delgado, Adolfo, Associate Professor
Mechanical Engineering
PHD, Texas A&M University, 2008

Demkowicz, Michal J, Associate Professor (courtesy appointment)
Mechanical Engineering
PHD, Massachusetts Institute of Technology, 2005

Donnell, James M, Professor of the Practice
Mechanical Engineering
BS, Texas A&M University, 1982

Doron, Yuval, Lecturer
Mechanical Engineering
MS, Texas A&M University, 2009

Felts, Jonathan R, Assistant Professor
Mechanical Engineering
DEN, University of Illinois Urbana Champaign, 2013

Freed, Alan D, Professor
Mechanical Engineering
DEN, University of Wisconsin - Madison, 1985

Gao, Huajian, Visiting Professor
Mechanical Engineering
PHD, Harvard University, 1988

Girimaji, Sharath S, Professor (courtesy appointment)
Mechanical Engineering
PHD, Cornell University, 1990

Gonezen, Sevan, Assistant Professor
Mechanical Engineering
PHD, Rensselaer Polytechnic Institute, 2011

Gopalswamy, Swaminathan, Professor of the Practice
Mechanical Engineering
PHD, University of California, 1991

Grunlan, Jaime C, Professor
Mechanical Engineering
PHD, University of Minnesota, 2001

Haglund, John S, Senior Lecturer
Mechanical Engineering
PHD, Texas A&M University, 2003

Hajimirza, Shima, Assistant Professor
Mechanical Engineering
PHD, Texas A&M University, 2013

Han, Je C, Distinguished Professor
Mechanical Engineering
PHD, Massachusetts Inst of Technology, 1977

Hassan, Yassin A, Professor (courtesy appointment)
Mechanical Engineering
PHD, University of Illinois, 1980

Hipwell, M Cynthia, Professor
Mechanical Engineering
PHD, University of California-Berkeley, 1996

Hogan, Harry A, Professor
Mechanical Engineering
PHD, Texas A&M University, 1984

Hsieh, Sheng-Jen, Professor (courtesy appointment)
Mechanical Engineering
PHD, Texas Tech University, 1995

Hung, Nguyen P, Associate Professor (courtesy appointment)
Mechanical Engineering
PHD, University of California, Berkeley, 1987

Hur, Pilwon, Assistant Professor
Mechanical Engineering
DEN, University of Illinois at Urbana-Champaign, 2010

Jacobs, Timothy J, Professor
Mechanical Engineering
PHD, University of Michigan, 2005

Jarrahbashi, Dorrin, Assistant Professor
Mechanical Engineering
PHD, University of California Irvine, 2014

Karaman, Ibrahim, Professor (courtesy appointment)
Mechanical Engineering
PHD, University of Illinois - Urbana-Champaign, 2000

Kim, Haejune, Research Assistant Professor
Mechanical Engineering
PHD, University of Wisconsin - Milwaukee, 2014

Kim, Won-Jong, Associate Professor
Mechanical Engineering
PHD, Massachusetts Inst of Technology, 1997

Kim, Yong-Joe, Associate Professor
Mechanical Engineering
PHD, Purdue University, 2003

Kulatilaka, Waruna D, Associate Professor
Mechanical Engineering
DEN, Purdue University, 2006

Lau, Sai C, Professor
Mechanical Engineering
PHD, University of Minnesota, 1980

Layton, Astrid C, Assistant Professor
Mechanical Engineering
PHD, Georgia Institute of Technology, 2014

Lewis, Heather S, Lecturer
Mechanical Engineering
MEN, North Carolina State University, 2000

Li, Ying, Associate Professor
Mechanical Engineering
PHD, University of Florida, 2007
Liang, Hong, Professor
Mechanical Engineering
PHD, Stevens Institute of Technology, 1992

Ma, Chao, Assistant Professor (courtesy appointment)
Mechanical Engineering
PHD, University of California, 2015

Malak Jr, Richard J, Associate Professor
Mechanical Engineering
PHD, Georgia Institute of Technology, 2008

Mannan, Mahboobul, Professor (courtesy appointment)
Mechanical Engineering
PHD, University of Oklahoma, 1986

McAdams II, Daniel A, Professor
Mechanical Engineering
PHD, University of Texas - Austin, 1999

McVay, Matilda W, Instructional Associate Professor
Mechanical Engineering
PHD, Texas A&M University, 1996

Mohiuddin, Mohammad W, Visiting Assistant Professor
Mechanical Engineering
PHD, Texas A&M University, 2008

Moreno, Michael R, Assistant Professor
Mechanical Engineering
PHD, Texas A&M University, 2009

Muliana, Hanifah, Professor
Mechanical Engineering
PHD, Georgia Institute of Technology, 2004

Needleman, Alan, Professor (courtesy appointment)
Mechanical Engineering
PHD, Harvard University, 1971

Ozkhan, Tanil, Instructional Assistant Professor
Mechanical Engineering
DEN, University of Illinois Urbana Champaign, 2014

Pagilla, Prabhakar R, Professor
Mechanical Engineering
PHD, University of California, Berkeley, 1996

Palazzolo, Alan B, Professor
Mechanical Engineering
PHD, University of Virginia, 1981

Pate, Michael B, Professor
Mechanical Engineering
PHD, Purdue University, 1982

Petersen, Eric L, Professor
Mechanical Engineering
PHD, Stanford University, 1998

Pharr, George, Assistant Professor
Mechanical Engineering
PHD, Harvard University, 2014

Polycarpou, Andreas A, Professor
Mechanical Engineering
PHD, Suny University at Buffalo, 1994

Ponnalagu, Alagappan, Visiting Assistant Professor
Mechanical Engineering
PHD, Texas A&M University, 2015

Radovic, Miladin, Associate Professor (courtesy appointment)
Mechanical Engineering
PHD, Drexel University, 2001

Rajagopal, Kumbakonam, Distinguished Professor
Mechanical Engineering
PHD, University of Minnesota, 1978

Rasmussen, Bryan P, Associate Professor
Mechanical Engineering
PHD, University of Illinois, 2005

Rathinam, Sivakumar, Associate Professor
Mechanical Engineering
PHD, University of California, Berkeley, 2007

Reddy, Junuthula N, Distinguished Professor
Mechanical Engineering
PHD, University of Alabama at Huntsville, 1974

Ryu, Seok Chang, Assistant Professor
Mechanical Engineering
PHD, Stanford University, 2013

Sanandres, Luis A, Professor
Mechanical Engineering
PHD, Texas A&M University, 1985

Saripalli, Srikanth, Associate Professor
Mechanical Engineering
PHD, University of Southern California, 2007

Schobeiri, Taher M, Professor
Mechanical Engineering
PHD, Technische Universitat Darmstadt, Germany, 1979

Scully, Marlan O, Professor (courtesy appointment)
Mechanical Engineering
PHD, Yale University, 1966

Skelton, Robert E, Professor (courtesy appointment)
Mechanical Engineering
PHD, University of California, 1976

Song, Xingyong, Assistant Professor (courtesy appointment)
Mechanical Engineering
PHD, University of Minnesota, Twin Cities, 2011

Srinivasa, Arun R, Professor
Mechanical Engineering
PHD, University of California, Berkeley, 1991

Staack, David A, Associate Professor
Mechanical Engineering
PHD, Drexel University, 2008
The work of mechanical engineers varies from general engineering to numerous, narrow specialties, as required by the wide variety of employers. A general list, though not in any way exhaustive, of the areas of professional employment opportunities available to mechanical engineers includes: design, construction, controls, materials specification and evaluation, analysis of thermal systems, fluid and solid mechanics, manufacturing, plant engineering, research and development, and technical sales. Many mechanical engineers are promoted to management and administrative positions as well.

The mission of the Department of Mechanical Engineering is to serve the students of Texas A&M University, the State of Texas, and the nation by:

- providing quality education that is well-grounded in the fundamental principles of engineering, fostering innovation and preparing students for leadership positions and successful careers in industry, government, and academia;
- advancing the knowledge base of mechanical engineering to support the competitiveness of existing industry and to spawn new economic development in Texas and the nation through active involvement in basic and applied research in a global context; and
- successfully pursue life-long learning and advanced study opportunities, and subsequently contribute to the development of advanced concepts and leading edge technologies.

The objectives of the Mechanical Engineering program are to produce graduates who will:

- have successful careers, and become leaders, in industry and the public sector;
- appropriately apply acquired knowledge, work well with other people, effectively communicate ideas and technical information, and continue to learn and improve; and
- successfully pursue advanced studies, if they so choose, opportunities, and subsequently contribute to the development of advanced concepts and leading edge technologies.

The educational outcomes for the Mechanical Engineering program are that students will attain:

- an ability to apply knowledge of mathematics, science and engineering;
- an ability to design and conduct experiments, as well as to analyze and interpret data;
- an ability to design a system, component, or process to meet desired needs within realistic constraints such as economic, environmental, social, political, ethical, health and safety, manufacturability, and sustainability;
- an ability to function on multi-disciplinary teams;
- an ability to identify, formulate and solve engineering problems;
- an understanding of professional and ethical responsibility;
- an ability to communicate effectively;
- the broad education necessary to understand the impact of engineering solutions in a global, economic, environmental, and societal context;
- a recognition of the need for, and an ability to engage in life-long learning;
- a knowledge of contemporary issues; and
- an ability to use the techniques, skills and modern engineering tools necessary for engineering practice.

Mechanical engineers should possess a thorough understanding of engineering science as well as analytical and practical skills in one of many basic mechanical engineering specialties. The mechanical engineering curriculum at Texas A&M requires students to develop and apply logical thinking, innovative approaches, and ethical standards as a prerequisite for professional competence. The curriculum consists of basic theory courses complemented by laboratory experiences in dynamic systems and controls, design, experimentation, fluid mechanics, heat transfer, manufacturing, and materials. Elective courses are offered in numerous areas including air conditioning, automotive engineering, computer-aided design, control systems, corrosion, energy conversion, internal combustion engines, manufacturing, materials, mechanical design, polymers, mechatronics, metallurgy, power generation, robotics, stress analysis, fluid mechanics, turbomachinery, and others. The selection of elective courses is dictated by the interests and goals of the student, working with departmental advisors and within the curriculum guidelines.

Many students enhance their education by participating in cooperative education and/or professional internships, which offer opportunities for employment in engineering positions while working toward a degree. Numerous study abroad programs are also available for gaining experience and perspectives in the international arena. Participation in student chapters of professional and honor societies provides leadership opportunities, collegial activities, and learning experiences outside the classroom. Many students also participate in research projects through individual directed studies courses with a professor. The mechanical engineering program culminates with a senior capstone design course sequence highlighted by real-life projects sponsored by various industries. Students benefit from the challenges and gratification that come through direct interaction with practicing engineers.

Before commencing course work in the major, students must be admitted to the major or have the approval of the department.

**Program Requirements**

The freshman year is identical for degrees in aerospace engineering, biomedical engineering, civil engineering, computer engineering, computer science, electrical engineering, electronic systems engineering technology, industrial distribution, industrial engineering, manufacturing and mechanical engineering technology, mechanical engineering, multidisciplinary engineering technology, nuclear engineering, ocean engineering, and petroleum engineering (Note: not all programs listed are offered in Qatar). The freshman year is slightly different for chemical engineering in that students take CHEM 101/111 or CHEM 107/117 and CHEM 102/112. Biomedical Engineering also requires a two semester sequence of chemistry courses consisting of CHEM 101/111 or CHEM 107/117 and CHEM 102/112. Students pursuing degrees in biological and agricultural engineering should refer to the specific curriculum for this major. It is recognized that many students will change the sequence and number of courses taken in any semester. Deviations from the prescribed course sequence, however, should be made with care to ensure that prerequisites for all courses are met.

### First Year

<td>3-6</td>
</tr>
</tbody>
</table>

| Total Semester Credit Hours | 15-16 |

1. A grade of C or better is required.
2. Entering students will be given a math placement exam. Test results will be used in selecting the appropriate starting course which may be at a higher or lower level.
3. Of the 18 hours shown as University Core Curriculum electives, 3 must be from creative arts, 3 from social and behavioral sciences (see IDIS curriculum for more information), 6 from American history and 6 from government/political science. The required 6 hours from international and cultural diversity may be met by courses satisfying the creative arts, social and behavioral sciences and American history requirements if they are also on the approved list of international and cultural diversity courses.
4. BMEN, CHEN and MSEN require 8 hours of freshman chemistry, which may be satisfied by CHEM 101/111 or CHEM 107/117 and CHEM 102/112; Credit by Examination (CBE) for CHEM 101/111 or CHEM 107/117 plus CHEM 102/112; or 8 hours of CBE for CHEM 101/111 or CHEM 107/117 and CHEM 102/112. BMEN, CHEN and MSEN should take CHEM 102/112 second semester freshman year. CPSC students may take CHEM 101/111 or CHEM 107. CHEM 102/112 will substitute for CHEM 107.
5. For BS-PETE, allocate 3 hours to core communications course (ENGL 210, COMM 203, COMM 205, or COMM 243) and/or 3 hours to UCC elective. For BS-MEEN, allocate 3 hours to core communications course (ENGL 203, ENGL 210, or COMM 205) and/or 3 hours to UCC elective.

### Total Program Hours 128

The objectives of the Mechanical Engineering minor—Analysis, Design and Management of Energy Conversion Systems—are to expand the working knowledge of mechanical engineering principles to broader engineering activities and to provide non-MEEN students with a specialized aspect of mechanical engineering to enhance their skillset and capabilities within their discipline-specific field. Candidates for a Mechanical Engineering minor must be high-achieving in their own discipline, with a minimum GPA of 3.5. Students may apply for the minor as early as their fourth semester of college but before their seventh semester of college.

Students are responsible for the satisfying course pre-requisites (C or better) which may or may not apply toward the minor or the student’s major degree.

Select two from:

- MEEN 408 Mechanics of Robotic Manipulators
- MEEN 411 Mechanical Controls
- MEEN 432 Automotive Engineering
- MEEN 433 Mechatronics
- MEEN 434 Dynamics and Modeling of Mechatronic System
- MEEN 459 Sound and Vibration Measurements

Total Semester Credit Hours 15

Minimum of 6 hours at 300- to 400-level.

3.5 minimum overall GPA.

Prerequisites of required and elective courses must have a grade of 'C' or better even if not counting toward degree or minor.

### Department of Nuclear Engineering

#### Nuclear Engineering

Nuclear engineering deals with the application and utilization of nuclear processes and radiations. The use of nuclear energy for the production of electrical power is a mature industry. Nuclear engineers work on all aspects of the nuclear fuel cycle and for many different types of employers such as government and private labs, regulatory agencies, reactor vendors, utilities, and architect engineers. In addition, nuclear energy for space applications is a rapidly expanding field. Radionuclide technology in industry and medicine requires a large number of well-trained radiological health engineers. To supply qualified engineers, the Department of Nuclear Engineering offers curricula leading to the Bachelor of Science degree in Nuclear Engineering and is accredited by the Engineering Accreditation Commission of ABET, www.abet.org.

The missions of the Department of Nuclear Engineering are:

- to produce high-quality graduates from the undergraduate through the doctoral levels to help meet the technical manpower needs of our state, region, nation, and the international community;
- to conduct research, including collaboration with research in related fields, to advance the state of knowledge in these disciplines in support of the needs of society; and
- to perform service in these disciplines for many constituencies including our College and University, industry, government and national laboratories, professional organizations, and the public.

In fulfilling these missions, the objective of the undergraduate program is to prepare students for success in their professional endeavors.
following the baccalaureate degree. These endeavors may include direct employment in the private or public sectors, graduate studies in engineering or science, professional studies in medicine, business, law or public administration, service in the military, or entrepreneurial activities. To achieve this purpose, four principal educational objectives are identified. Graduates of our Bachelor of Science program in Nuclear Engineering:

1. will work on the challenges of maintenance, improvement, innovation, education, and research in nuclear power and industrial utilization of nuclear radiation and radionuclides. In this work, they will fulfill independent assignments, engage in collaborations, and manage the work of others with effective communications characterizing all phases of their responsibilities;

2. will conduct their professional activities with full recognition of the choices and challenges implicit to their work, to its ethical dimensions, and to their implications for matters beyond their immediate tasks;

3. will take the local, global, historical, social, economic, and political settings into account in both their domestic and international endeavors; and

4. will recognize and utilize both the accumulated body of results from prior work and the continuing evolution of science and technology as essential resources for the effective conduct of their work.

The nuclear engineering baccalaureate degree programs stress engineering science fundamentals and mathematics. However, considerable numbers of elective hours are available in the curriculum to permit students to broaden their educations as desired.

Most of the facilities used in the MS and PhD programs are also used in the undergraduate degree programs. These facilities make the Department of Nuclear Engineering one of the best equipped in the United States. Texas A&M is now the only University in the United States with two nuclear reactors on its campus.

Before commencing course work in the major, students must be admitted to the major or have the approval of the department.

Faculty

Adams, Marvin L, Professor
Nuclear Engineering

## Majors
- Bachelor of Science in Nuclear Engineering (p. 435)

## Minors
- Nuclear Engineering Minor (p. 436)
- Radiological Health Engineering Minor (p. 436)

## Nuclear Engineering - BS

The Department of Nuclear Engineering offers a Bachelor of Science in Nuclear Engineering.

### Program Requirements

The freshman year is identical for degrees in aerospace engineering, biomedical engineering, civil engineering, computer engineering, computer science, electrical engineering, electronic systems engineering technology, industrial distribution, industrial engineering, manufacturing and mechanical engineering technology, mechanical engineering, multidisciplinary engineering technology, nuclear engineering, ocean engineering, and petroleum engineering (Note: not all programs listed are offered in Qatar). The freshman year is slightly different for chemical engineering in that students take CHEM 101/CHEM 111 or CHEM 107/CHEM 117 and CHEM 102/CHEM 112. Biomedical Engineering also requires a two semester sequence of chemistry courses consisting of CHEM 101/CHEM 111 or CHEM 107/CHEM 117 and CHEM 102/CHEM 112. Students pursuing degrees in biological and agricultural engineering should refer to the specific curriculum for this major. It is recognized that many students will change the sequence and number of courses taken in any semester. Deviations from the prescribed course sequence, however, should be made with care to ensure that prerequisites for all courses are met.

Radiological Health Engineering - Minor

The Department of Nuclear Engineering offers a minor in Radiological Health Engineering. Expanding and emerging nuclear applications have created a strong demand for specialists in radiological health engineering. Well-educated individuals are, and will be, required in all aspects of the nuclear power industry from mining all the way to disposal of wastes from spent fuel. There are needs for radiological health specialists in government, hospitals, educational institutions and private industry. This program at Texas A&M is designed to give students a broad background so they will be able to assume positions in any area of the nuclear industry.

Students must make a grade of "C" or better in all courses.

Department of Ocean Engineering

Ocean Engineering

Ocean engineering is the application of basic engineering principles to the analysis, design, construction, and management of systems that operate in the ocean environment or near shore. Typical ocean engineering application areas include: beach protection and nourishment, coastal structures and erosion, wave and current structure interaction, development of ocean energy resources, instrumentation for coastal and offshore measurements, marine dredging and dredged material placement, ocean mining, offshore petroleum recovery, offshore
structures and vessels, marine hydrodynamics, marine risers, moored and towed systems, numerical and physical modeling, ports and harbors, remotely operated and autonomous underwater vehicles, renewable ocean energy systems, search and salvage, suspended and dissolved constituent transport, subsea pipelines and cables, seafloor pipeline and umbilical layouts, flow assurance, submersible vehicles, sustainable and resilient ocean systems, and underwater acoustics. Employment opportunities exist with private industry, defense contractors, consulting firms, and government agencies. Ocean engineering students are encouraged to pursue summer internships and may participate in the University cooperative education program and the study abroad program. The undergraduate program in ocean engineering in the Department of Ocean Engineering at Texas A&M University is accredited by the Engineering Accreditation Commission of ABET, www.abet.org.

The mission of the Ocean Engineering Program is to conduct research, serve the public, and educate students in a broad program of instruction encompassing traditional and emerging areas of ocean engineering. Graduates are prepared for entering engineering practice, continuing onto graduate study, life-long learning and professional development. Students develop a sense of professionalism and an appreciation for the obligations of a professional engineer. The Program offers ocean engineering continuing education activities for the people and marine industry of the state, nation and international community. The Program serves the public and engineering profession in Texas and the nation through participation of faculty and students in public and professional activities. Applied and fundamental research is conducted that contributes to the better understanding of ocean engineering and supports student educational development.

The program educational objectives of the Ocean Engineering Program are;

1. Graduates contribute to the ocean engineering profession and society.
2. Graduates gain employment in ocean engineering and related engineering fields with private and government organizations.
3. Graduates advance to positions of increased responsibility and develop professionally through training, technical conferences, and continuing education activities.
4. Some graduates become professional engineers and members of ocean engineering related professional societies.
5. Some graduates pursue graduate studies in ocean engineering and related fields and receive post baccalaureate degrees.

The Department of Ocean Engineering is a two-campus department with campuses located in College Station and Galveston, Texas. The laboratory facilities accessible to the Department of Ocean Engineering are among the most comprehensive in the nation for testing offshore, dredging and coastal systems. The College Station facilities are located in the Reta and Bill Haynes ’46 Coastal Engineering Laboratory, the Offshore Technology Research Center and the Civil Engineering Laboratory Building. These facilities include a large deep water wave basin, a towing tank and model dredge, a wave channel, fluid dynamics laboratory equipment, a shallow water wave basin and data acquisition systems. The facilities in Galveston include naval architecture, fluid dynamics, and geotechnical experimental equipment, and two wave channels. The Galveston campus also provides access to the Gulf of Mexico through the use of small boats and research vessels that are available for education and research. Additional information is available on the Department of Ocean Engineering website: http://engineering.tamu.edu/ocean.

Before commencing course work in the major, students must be admitted to the major or have the approval of the department head.

Gordon, Robert B, Associate Professor of Practice
Ocean Engineering
PHD, University of Rhode Island, 1982
The basic science and mathematics include two semesters of physics and one semester of chemistry with laboratories and mathematics through differential equations and one course in statistics. Fundamental engineering courses such as foundations in engineering, engineering statics, dynamics, materials, mechanics of deformable bodies, thermodynamics or electrical engineering, geotechnical engineering develop strong understanding of engineering basics. Courses that directly apply to ocean engineering include: coastal engineering, dynamics of ocean systems, engineering design of offshore and coastal systems, fluid dynamics and fluid dynamics laboratory, marine hydrodynamics, naval architecture, numerical methods, ocean engineering laboratory, ocean engineering wave mechanics, oceanography, offshore and coastal structures, underwater acoustics, senior capstone design project, steel and concrete design, and underwater and moored system design. The technical elective program provides students ability to develop some emphasis in offshore, coastal, or underwater systems. The ocean engineering curriculum includes courses in written communication skills, language, engineering ethics, philosophy and culture, social sciences and American heritage to ensure a well-rounded education.

Program Requirements

The freshman year is identical for degrees in aerospace engineering, biomedical engineering, civil engineering, computer engineering, computer science, electrical engineering, electronic systems engineering technology, industrial distribution, industrial engineering, manufacturing
and mechanical engineering technology, mechanical engineering, multidisciplinary engineering technology, nuclear engineering, ocean engineering, and petroleum engineering (Note: not all programs listed are offered in Qatar). The freshman year is slightly different for chemical engineering in that students take CHEM 101/CHEM 111 or CHEM 107/CHEM 117 and CHEM 102/CHEM 112. Biomedical Engineering also requires a two semester sequence of chemistry courses consisting of CHEM 101/CHEM 111 or CHEM 107/CHEM 117 and CHEM 102/CHEM 112. Students pursuing degrees in biological and agricultural engineering should refer to the specific curriculum for this major. It is recognized that many students will change the sequence and number of courses taken in any semester. Deviations from the prescribed course sequence, however, should be made with care to ensure that prerequisites for all courses are met.

1. A grade of C or better is required.
2. Entering students will be given a math placement exam. Test results will be used in selecting the appropriate starting course which may be at a higher or lower level.
3. Of the 18 hours shown as University Core Curriculum electives, 3 must be from creative arts, 3 from social and behavioral sciences (see IDIS curriculum for more information), 6 from American history and 6 from government/political science. The required 6 hours from international and cultural diversity may be met by courses satisfying the creative arts, social and behavioral sciences and American history requirements if they are also on the approved list of international and cultural diversity courses.

4. BMEN, CHEN and MSEN require 8 hours of freshman chemistry, which may be satisfied by CHEM 101/CHEM 111 or CHEM 107/CHEM 117 and CHEM 102/CHEM 112; Credit by Examination (CBE) for CHEM 101/CHEM 111 or CHEM 107/CHEM 117 plus CHEM 102/CHEM 112; or 8 hours of CBE for CHEM 101/CHEM 111 or CHEM 107/CHEM 117 and CHEM 102/CHEM 112. BMEN, CHEN and MSEN should take CHEM 102/CHEM 112 second semester freshman year. CPSC students may take CHEM 101/CHEM 111 or CHEM 107. CHEM 102/CHEM 112 will substitute for CHEM 107.
5. For BS-PETE, allocate 3 hours to core communications course (ENGL 210, COMM 203, COMM 205, or COMM 243) and/or 3 hours to UCC elective. For BS-MEEN, allocate 3 hours to core communications course (ENGL 203, ENGL 210, or COMM 205) and/or 3 hours to UCC elective.
The Petroleum Engineering Department is dedicated to creating, preserving, integrating, transferring and applying petroleum engineering knowledge and enhancing the human capability of its practitioners. The Petroleum Engineering Program has two educational objectives:

- graduates will have the technical depth and breadth to be successful professionals early in their careers; and
- graduates will have the broad technical knowledge and soft skills needed to rise to positions of professional leadership.

In essence, the goal of the Petroleum Engineering curriculum is to provide a modern engineering education with proper balance between fundamentals and practice, and to graduate engineers capable of being productive contributors immediately who are also prepared for life-long learning. The curriculum includes study of:

- design and analysis of well systems and procedures for drilling and completing wells;
- characterization and evaluation of subsurface geological formations and their resources;
- design and analysis of systems for producing, injecting and handling fluids;
- application of reservoir engineering principles and practices for optimizing resource development and management; and
- use of project economics and resource valuation methods for design and decision making under conditions of risk and uncertainty.

There is a heavy emphasis on mathematics, computer applications, communication skills and interdisciplinary problem solving. As a result, Aggie petroleum engineers are in high demand in the industry, and their starting salaries are consistently among the top in the University and the nation.

The department is well known for its curriculum, facilities and faculty, and its undergraduate program was recognized as one of the top petroleum engineering programs in the United States. The faculty comprises more than 43 professors and lecturers, many of them widely known and globally involved in the petroleum industry. Three (3) of the faculty are members of the prestigious National Academy of Engineering, and 18 are Distinguished Members of the Society of Petroleum Engineers. The Bachelor of Science program is accredited by the Engineering Accreditation Commission of ABET, www.abet.org.

Students must work as interns during the summer months; a minimum of six weeks of approved experience is required for graduation. The department also participates in the Cooperative Education Program.

In addition to the Bachelor of Science degree in Petroleum Engineering, the department also offers both masters and doctoral degrees, including Master of Science, Master of Engineering, and Doctor of Philosophy (see the Texas A&M University Graduate and Professional Catalog).

Before commencing course work in the major, students must be admitted to the major or have the approval of the department.

Petroleum Engineering
PHD, University of Uppsala, 1987

Wu, Kan, Assistant Professor
Petroleum Engineering
PHD, The University of Texas at Austin, 2014

Zhu, Ding, Professor
Petroleum Engineering
PHD, University of Texas, 1992

Majors

- Bachelor of Science in Petroleum Engineering (p. 442)

Minors

- Petroleum Engineering Minor (p. 443)

Certificates

- Energy Engineering Certificate (p. 443)
- Petroleum Ventures Certificate (p. 444)

Petroleum Engineering - BS

The Department of Petroleum Engineering offers a Bachelor of Science in Petroleum Engineering.

Program Requirements

The freshman year is identical for degrees in aerospace engineering, biomedical engineering, civil engineering, computer engineering, computer science, electrical engineering, electronic systems engineering technology, industrial distribution, industrial engineering, manufacturing and mechanical engineering technology, mechanical engineering, multidisciplinary engineering technology, nuclear engineering, ocean engineering, and petroleum engineering (Note: not all programs listed are offered in Qatar). The freshman year is slightly different for chemical engineering in that students take CHEM 101/111 or CHEM 107/117 and CHEM 102/112. Biomedical Engineering also requires a two semester sequence of chemistry courses consisting of CHEM 101/111 or CHEM 107/117 and CHEM 102/112. Students pursuing degrees in biological and agricultural engineering should refer to the specific curriculum for this major. It is recognized that many students will change the sequence and number of courses taken in any semester. Deviations from the prescribed course sequence, however, should be made with care to ensure that prerequisites for all courses are met.

</tbody>
</table>

1 A grade of C or better is required.
2 Entering students will be given a math placement exam. Test results will be used in selecting the appropriate starting course which may be at a higher or lower level.
3 Of the 18 hours shown as University Core Curriculum electives, 3 must be from creative arts, 3 from social and behavioral sciences (see IDIS curriculum for more information), 6 from American history and 6 from government/political science. The required 6 hours from international and cultural diversity may be met by courses satisfying the creative arts, social and behavioral sciences and American history requirements if they are also on the approved list of international and cultural diversity courses.
For BS-PETE, allocate 3 hours to core communications course (ENGL 210, COMM 203, COMM 205, or COMM 243) and/or 3 hours to UCC elective. For BS-MEEN, allocate 3 hours to core communications course (ENGL 203, ENGL 210, or COMM 205) and/or 3 hours to UCC elective.

Students must make a grade of "C" or better in all courses.

---

### Energy Engineering - Certificate

The objective of the Energy Engineering Certificate program is to better prepare undergraduate students to face the challenges of world energy supply and demand and how to ensure a sustainable energy future. The program will educate engineering majors and suitably prepared science majors about all energy sources, their development, generation, conversion, transmission, and use; with an emphasis on the importance of improving the standard of living for all people while at the same time preserving and improving the environment. To earn the Energy Engineering Certificate, a student must complete a minimum of 13 semester credit hours which includes one required course and three additional courses to be selected from a specified list. An overall GPA of
3.0 must be achieved to be awarded the certificate. Completion of the certificate will be recorded on the student's University transcript.

For additional information, contact the Energy Engineering Certificate coordinator or Engineering Academic and Student Affairs, Engineering Activities Building B (EABB), (979) 845-7200.

Total Semester Credit Hours: 25

1 Refer to an Academic Advisor for specific topics offered.
Oceanography.

waters, and the dynamics of water masses are the major elements of marine life, the development of ocean basins, the chemistry of ocean marine environment and its inhabitants. The distribution and nature of physics, and atmospheric chemistry. Oceanography is the study of the quality through the disciplines of atmospheric dynamics, atmospheric studies of weather/meteorology, climate and climate change, and air resources through remote sensing. Atmospheric Sciences includes internal structure, physical properties, and plate motions and their effect of solid Earth. This includes the measurement and understanding of its structures, and with the history of its development and the evolution of life on this planet. The study of these realms and their interactions with the biosphere and human systems, comprises the Geosciences—Atmospheric Sciences, Geography, Geology and Geophysics, and Oceanography.

The College of Geosciences is home to four academic departments in these disciplines and interdisciplinary academic offerings in Environmental Programs and Water Management and Hydrological Sciences. The mission of the College of Geosciences is to advance new understandings of the Earth system and apply them to the needs of society, to prepare the next generation of geoscientists to conduct research, to find and develop natural resources, and to measure and respond to environmental change. In doing this, the College of Geosciences intends to lead in establishing the geosciences as the most important and impactful scientific discipline of the 21st century. To sustain human society into the future will depend more on the innovation and application of discovery in the geosciences than in other disciplines. The interdisciplinarity of our field is essential to solving today’s grand challenges—understanding global climate change, maintaining air and water quality, and producing adequate energy and food supplies for all people.

Geography studies humans and their interactions with the environment from a spatial perspective using a range of methods and geospatial technologies. As an interdisciplinary field, it synthesizes knowledge from the other geosciences as well as from the social and biological sciences. Geology deals with the processes and forces acting at the surface and within Earth: with the materials of Earth, its forms and structures, and with the history of its development and the evolution of life on its surface and in its waters. Geophysics focuses on the physics of solid Earth. This includes the measurement and understanding of its internal structure, physical properties, and plate motions and their effect on continents and ocean basins. It also includes the detection of natural resources through remote sensing. Atmospheric Sciences includes studies of weather/meteorology, climate and climate change, and air quality through the disciplines of atmospheric dynamics, atmospheric physics, and atmospheric chemistry. Oceanography is the study of the marine environment and its inhabitants. The distribution and nature of marine life, the development of ocean basins, the chemistry of ocean waters, and the dynamics of water masses are the major elements of Oceanography.
in the discipline; at least 6 hours must be upper-division courses in the discipline. Each student choosing to complete a minor must contact the department offering the minor to determine if specific courses are required.

**Change of Major and Transfer Students**

Change of Major students are welcomed in the College of Geosciences. Students seeking entry from another major must be in good academic standing, meet approval of the Associate Dean and have shown interest in their new intended major by taking at least one course in the subject. To begin the Change of Major process, students should first contact the academic advisor in the department to which they wish to change. If the student meets minimum criteria, he or she will be referred to the Associate Dean for approval and processing.

Students are welcomed to transfer into the College of Geosciences from other universities and community colleges. Overall, the College of Geosciences requires a prospective student to have completed, or be in progress of completing, a minimum of 24 hours from a list of courses specific to each major outlined on page 56 of this catalog with a cumulative minimum GPA of 2.5. The College of Geosciences is also participating in the Program for Transfer Admission as well as the Program for System Admission in cooperation with Prairie View A&M University, Tarleton State University, Texas A&M International University, Texas A&M University-Commerce, Texas A&M University—Corpus Christi, Texas A&M University—Kingsville, West Texas A&M University and Texas A&M University—Texarkana.

**Teacher Certification**

The need for highly qualified teachers is high in the state of Texas. Students in the College of Geosciences are encouraged to consider pursuing a career in teaching. A number of pathways to certification are available. Interested students should consult with their advisors early in their programs and consult options outlined on the certification website. The college collaborates with the College of Science and the College of Education and Human Development on the aggiteACH Program (http://aggiteach.tamu.edu) and in the University Studies degree program in secondary science teaching. Students in Geography may obtain composite social studies certification with a specialty in Geography through the Secondary Post-Baccalaureate Certification Program (8-12) or alternative certification options.

**University Honors Programs**

The College of Geosciences participates in the University Honors Programs, which is described in detail at Honors and Undergraduate Research (p. 110).

**International and Cultural Diversity Requirement**

Texas A&M University requires its students to meet an International and Cultural Diversity requirement as part of the Graduation requirements. Meeting this requirement will require the careful selection of courses. The student is directed to Requirements for a Baccalaureate Degree (p. 28) section of this catalog for detailed information regarding this requirement and is also encouraged to seek the advice of the student’s academic advisor.

**Curricula — College of Geosciences**

**Environmental Geosciences**

- Environmental Studies
- Geographic Information Science and Technology
- Geography
- Geology
- Geophysics
- Meteorology
- Oceanography
- University Studies-Geography
- University Studies-GIST

**Majors**

**College of Geosciences**

- Bachelor of Science in Environmental Geoscience (p. 447)
- Bachelor of Science in Environmental Geoscience and Master of Ocean Science and Technology, 5-Year Degree Program (p. 451)
- Bachelor of Science in Environmental Studies (p. 452)

**Atmospheric Sciences**

- Bachelor of Science in Meteorology (p. 458)
- Bachelor of Science in Meteorology and Master of Ocean Science and Technology, 5-Year Degree Program (p. 459)

**Geography**

- Bachelor of Science in Geographic Information Science and Technology, Computation, Design and Analysis Track (p. 462)
- Bachelor of Science in Geographic Information Science and Technology, Earth Systems and Analysis Track (p. 464)
- Bachelor of Science in Geographic Information Science and Technology, Human Systems and Society Track (p. 466)
- Bachelor of Science in Geography (p. 468)
- Bachelor of Science in University Studies, Geographic Information Science and Technology Concentration (p. 471)
- Bachelor of Science in University Studies, Geography Concentration (p. 471)

**Geology and Geophysics**

- Bachelor of Arts in Geology (p. 476)
- Bachelor of Arts in Geology and Master of Ocean Science and Technology, 5-Year Degree Program (p. 477)
- Bachelor of Science in Geology (p. 479)
- Bachelor of Science in Geology and Master of Ocean Science and Technology, 5-Year Degree Program (p. 480)
- Bachelor of Science in Geophysics (p. 481)

Environmental Geoscience - BS

The increasing demands that population growth and affluence put on the natural resources and the Earth's environment require greater numbers of trained professionals and informed citizens. The BS degree in Environmental Geosciences embraces all the disciplines of geosciences to give the student a rigorous interdisciplinary education including issues associated with environmental policy. The degree trains students for employment by industry, environmental and engineering consulting firms, non-governmental organizations, and governmental regulatory agencies, among other entities. Students focus coursework in a particular environmental theme: coastal and marine environments, water, human impact on the environment, climate change, or biosphere.

The choice is not restricted. Students transferring or changing majors into the program, who have not taken GEOS 101, are required to take GEOS 481 in their junior or senior year.

It is recommended to select a course that also fulfills an International and Cultural Diversity requirement.

Choose one introductory College of Geosciences course in the first semester and an additional one in the second semester of the sophomore year. Seek guidance from the academic advisor for Environmental Programs in Geosciences (ENVP) or your faculty mentor.

PHYS 218 is recommended for the Coastal and Marine Environment Theme.

STAT 211 is recommended for the Coastal and Marine Environment Theme.

Choose 18 hours of theme courses in your junior and senior years in consultation with your academic advisor or faculty mentor from the list below.

GEOS 484 can be taken for up to 6 credits and will normally be used as an adjustment to theme electives, but depending on the content of the internship credit, it can be applied as an adjustment to your technical electives or policy electives. Seek guidance from the ENVP academic advisor.
Other courses which match the Environmental Programs’ technical electives definition will be allowed by adjustment. Guidance about technical electives (including the definition used by the Environmental Programs in Geosciences) can be found on the programs’ website. Seek guidance about choices from the ENVP academic advisor or faculty mentor.

GEOG 390 is a required technical elective.

Seek guidance about choices from the ENVP academic advisor or faculty mentor.

Two courses in the degree plan must be writing intensive courses designated by the Environmental Programs in the schedule of classes. Also, international and cultural diversity electives (6 hours) must be incorporated into the degree.

Environmental Geoscience - 5-Year Bachelor of Science/Master of Ocean Science and Technology

The Fast Track Program offers motivated and exceptional students the opportunity to achieve aspirations in an efficient program at Texas A&M, completing the Bachelor of Science (B.S.) degree in the Environmental Geosciences program and the Master of Ocean Science and Technology degree in 5 years. There will be only two courses used for dual credit in this program. There is a total of 150 hours of coursework. The concurrent degree program will enable these motivated students to coordinate the required B.S. coursework (120 undergraduate credit hours including 6 dual credit graduate hours) and Master of Ocean Science and Technology coursework (36 credit hours including the 6 dual credit graduate hours) to complete the required credit hours for each degree without diminishing scope or quality of work and within 5 years.

**Application and Eligibility:**

- Applications to the Fast Track program will be submitted by July 1 after the completion of the student's junior year. Applications submitted after that time will be evaluated on a case by case basis.
- Applicants must have a minimum undergraduate GPR of 3.0. Applicants should also earn a C or better in all Chemistry, Calculus and Physics courses. Once admitted to the program, students must maintain a minimum 3.0 GPR.
- A faculty advisor will be assigned to each student. Students may seek additional mentors, but a formal committee is not required.
- Students admitted into the Fast Track program must finish the entire 150 credit hours to obtain both the Bachelor's and Master's degrees. These students will be conferred with two degrees once they complete the 5th year of the concurrent program.
- Students admitted to the program will change from U4 to G7 status when they are admitted having completed at least 96 hours (end of spring semester, year 3).
- Students not accepted or not allowed to continue with the Fast Track Program will complete the 120 hour Bachelor's degree under the standard 4 year curriculum. These students may still apply to the traditional graduate program.
- Students will graduate at the completion of the 5th year in the Fast Track Program coursework (150 credit hours) with both Bachelor's and Master's degrees. Students will complete the coursework in May of the 5th year.

Environmental Studies - BS

The increasing demands that population growth and affluence put on Earth's natural resources and environment require greater numbers of trained professionals and informed citizens. The Bachelor of
Science degree in Environmental Studies blends an interdisciplinary understanding of Earth's surface processes and environmental problems, along with the policy and decision-making components of human interactions with the environment. The degree is designed to educate students about the scientific, human-dimension and policy aspects of environmental issues facing our state and nation as they work in regulatory agencies, industry, and non-governmental organizations to resolve problems. Students focus upper division coursework in one of five environmental themes: 1) urban environment, 2) occupational health and safety, 3) environmental regulation and compliance, 4) Geographic Information Science and Technology (GIST), and 5) global environment.

Program Requirements

First Year

Fall
Select one of the following: 1
ATMO 201 & ATMO 202 Weather and Climate and Weather and Climate Laboratory
GEOG 203 & GEOG 213 Planet Earth and Planet Earth Lab
GEOL 101 & GEOL 102 Principles of Geology and Principles of Geology Laboratory
OCNG 251 & OCNG 252 Oceanography and Oceanography Laboratory
GEOS 105 Introduction to Environmental Geoscience
MATH 141 Finite Mathematics
POLS 206 American National Government
ECON 202 Principles of Economics

Semester Credit Hours 16

Spring
Select one of the following: 1
ATMO 201 & ATMO 202 Weather and Climate and Weather and Climate Laboratory
GEOG 203 & GEOG 213 Planet Earth and Planet Earth Lab
GEOL 101 & GEOL 102 Principles of Geology and Principles of Geology Laboratory
OCNG 251 & OCNG 252 Oceanography and Oceanography Laboratory
ENGL 104 Composition and Rhetoric
GEOG 201 Introduction to Human Geography
MATH 142 Business Calculus

American history elective (p. 26) 3

Semester Credit Hours 12

Total Semester Credit Hours 120

1 Choose one introductory College of Geosciences course in the first semester and an additional one in the second semester of the freshman year.
2 It is recommended to select a course that also fulfills an international and cultural diversity requirement.
3 Choose one Life and Physical Science Elective in the first semester and an additional one in the second semester of the sophomore year.
4 Choose 15 hours of courses in your chosen environmental theme from the list below.
5 Other courses which match the Environmental Programs’ technical electives definition will be allowed by adjustment. Seek guidance regarding potential adjustments from the ENVP academic advisor.
6 KINE 199, MATH 102, MATH 150, and lower level SOMS, NVSC, MLSC, and AERS courses cannot be used as general electives.

Total Semester Credit Hours 16

Students choosing to complete a minor in Climate Change must meet the following requirements:

- A minimum of 6 hours must be taken in residence at either Texas A&M University/College Station or Galveston.
- A minimum cumulative GPR of 2.0 must be achieved for all courses in the minor.
- Take a minimum of 16 hours of coursework, of which 3 hours of GEOS 210 Climate Change are required.
- The remaining 13 hours must include at least 3 hours of 400-level coursework and another 3 hours of upper-level (300- or 400-level) coursework from the list.
- Students with majors in the College of Geosciences must select only courses outside of their home department.
- ENGS students may not select this minor.

Earth Sciences - Minor

The purpose of the Earth Sciences minor is to study the different physical earth processes and systems.

Students choosing to complete a minor in Earth Sciences must meet the following requirements:

- A minimum of 6 hours must be taken in residence at either Texas A&M University/College Station or Galveston.
- A minimum cumulative GPR of 2.0 must be achieved for all courses in the minor.
- Take a minimum of 15 hours of coursework in the College of Geosciences.
- The 15 hours must include at least 3 hours of 400-level coursework and another 3 hours of upper-level (300- or 400-level) coursework from the list.
- Students with majors in the College of Geosciences must select only courses outside of their home department.

Environmental Geosciences - Minor

The purpose of the Environmental Geosciences minor is to study the environmental impacts on the different earth systems.

Students in the Environmental Programs are not allowed to declare Environmental Geosciences as a minor.

Students of other disciplines choosing to complete a minor in Environmental Geosciences must meet the following requirements:

- A minimum of 6 hours must be taken in residence at either Texas A&M University/College Station or Galveston.
- A minimum cumulative GPR of 2.0 must be achieved for all courses in the minor.
- Take a minimum of 15 hours of coursework in the College of Geosciences, of which 3 hours of GEOS 105 is required.

- The remaining 12 hours must include at least 3 hours of 400-level coursework and another 3 hours of upper-level (300- or 400-level) coursework from the list.
- Students with majors in the College of Geosciences must select only courses outside of their home department.

Program Requirements

Some of the courses have prerequisites so make sure to check the catalog before enrolling in the course.

Total Semester Credit Hours 15

At least 6 hours must be upper level, 3 of which must be 400 level.

ENGS and ENST majors may not select this minor.

Diversity - Certificate

The College of Geosciences, in collaboration with the Department of Multicultural Services, offers a Diversity Certificate program for Geosciences majors. The goal of the program is two-fold:

1 At least 6 hours must be upper level, 3 of which must be 400 level.

ENGS and ENST majors may not select this minor.
1. to offer Geosciences students an opportunity to synthesize and integrate academic coursework with co-curricular and service learning experiences to demonstrate their preparedness to participate successfully in contemporary, highly diverse global societies; and

2. to promote diversity, multiculturalism, and internationalism in the College of Geosciences.

Program Requirements
Certificate requirements include nine semester hours of diversity-related courses, at least one of which must be from the College of Geosciences, and completion of a special section of GEOS 484 to fulfill the co-curricular, service learning and capstone component of the certificate. Students are encouraged to build the coursework into their degree plans as much as possible through careful planning. Information on the program is available from the Associate Dean for Academic Affairs, Room 202 Eller O&M Building and departmental academic advisors.

Department of Atmospheric Sciences
Students in the Department of Atmospheric Sciences enjoy low student-to-teacher ratios and small classes. Undergraduates have opportunities for individual study and for participation in faculty research projects, including regional, national and international field programs.

Majors
• Bachelor of Science in Meteorology (p. 458)
• Bachelor of Science in Meteorology and Master of Ocean Science and Technology, 5-Year Degree Program (p. 459)

Minors
• Meteorology Minor (p. 460)

Facilities
The Department of Atmospheric Sciences occupies the upper floors of the 15-story Oceanography and Meteorology Building. The Doppler
weather radar on the roof of the building is a campus landmark and is used for both research and teaching. The department also operates a mobile Doppler radar for use in research projects. The department has four state-of-the-art chemistry labs, in which phenomena from ozone to aerosols are studied, as well as facilities for modeling the chemical environment. A continuous, comprehensive stream of meteorological data is received from ground stations, balloons, aircraft, radars, and satellites around the world. Two well-equipped computer labs are regularly upgraded to provide state-of-the-art educational equipment.

### Meteorology - BS

The Department of Atmospheric Sciences offers the Bachelor of Science degree in Meteorology. The undergraduate curriculum in meteorology emphasizes weather and weather forecasting, but also includes courses in climatology, atmospheric chemistry, cloud physics and remote sensing of the atmosphere with radar and satellites. As the curriculum makes clear, the study of these subjects relies on a foundation of physics, chemistry and mathematics. The atmospheric sciences also have close connections to oceanography and hydrology.

Students who receive BS degrees in Meteorology often obtain employment with the National Weather Service, private meteorological consulting and weather forecasting companies, air quality consulting firms, airlines, TV stations, energy trading companies, universities, state governments, agricultural firms and computer-related industries. Some students choose to enter the military services as weather officers.

Students interested in cooperative educational arrangements and internships should contact the department's academic advisor for information.

In the curriculum presented, students are advised to note carefully the prerequisites for many of the courses.

Application and Eligibility

- Applications to the Fast Track program will be submitted by July 1 after the completion of the student’s junior year. Applications submitted after that time will be evaluated on a case by case basis.

- Applicants must have a minimum undergraduate GPR of 3.0. Applicants should also earn a C or better in all Chemistry, Calculus, and Physics courses. Once admitted to the program, students must maintain a minimum 3.0 GPR.

- A faculty advisor will be assigned to each student. Students may seek additional mentors, but a formal committee is not required.

- Students admitted to the program must complete the entire 150 credit hours to obtain both the Bachelor’s and Master’s degrees. These students will be conferred with two degrees once they complete the 5th year of the concurrent program.

1. A grade of C or better is required.
2. All students enter as Lower Level Meterology (METL) until completion of ATMO 335 and ATMO 336 and the associated prerequisite courses. Once students have completed these courses, their major will be changed to Upper Level Meterology (METR), and they will be eligible to take upper-level electives. This change should occur following Fall of the junior year.
3. Select in consultation with faculty academic advisor.
4. General electives may not include CAEN 101-499; CAEX 101-499; DEVS 101-499; ENGL 103; KINE 198-199 (p. 958); MATH 102, MATH 131, MATH 141-142 (p. 982), MATH 150-152 (p. 982), MATH 171-172 (p. 982), MATH 221, MATH 251, MATH 253; PHYS 101, PHYS 201-202 (p. 1031), PHYS 208, PHYS 218-219 (p. 1031); AERS 100-499 (p. 796); MLSC 100-499 (p. 997); NVSC 100-499 (p. 1016); SOMS 100-499 (p. 1061).
5. MLSC, NVSC and AERS courses can be used as general electives if a minor is completed in Military Science. See an academic advisor for more information.

Meteorology - 5-Year Bachelor of Science/Master of Ocean Science and Technology

The Fast Track Program offers motivated and exceptional students the opportunity to achieve aspirations in an efficient program at Texas A&M, completing the Bachelor of Science degree in the Department of Atmospheric Sciences Meteorology Program and the Oceanography non-thesis M.S. degree in 5 years. There will be only two courses used for dual credit in this program. There is a total of 150 hours of coursework. The concurrent degree program will enable these motivated students to coordinate the required B.S. coursework (120 undergraduate credit hours including 6 dual credit graduate hours) and non-thesis M.S. coursework (36 credit hours including the 6 dual credit graduate hours) to complete the required credit hours for each degree without diminishing scope or quality of work and within 5 years.

Application and Eligibility

- Students admitted to the program will change from U4 to G7 status when they are admitted having completed at least 99 hours (end of spring semester, year 3).

- Students not accepted or not allowed to continue with the Fast Track Program will complete the 120 hour Bachelor’s degree under the standard 4 year curriculum. These students may still apply to the traditional graduate program.

- Students will graduate at the completion of the 5th year in the Fast Track Program coursework (150 credit hours) with both Bachelor’s and Master’s degrees. Students will complete the coursework in May of the 5th year.

Semester Credit Hours  9
Spring
OCNG 661  Advanced Oceanographic Data Analysis and Communication
Advanced specialized OCNG graduate courses  6
Semester Credit Hours  9
Total Semester Credit Hours  18

1 A grade of C or better is required.
2 General electives may not include CAEN 101-499; CAEX 101-499; DEVS 101-499; ENGL 103; KINE 198-199 (p. 958); MATH 102, MATH 131, MATH 141-142 (p. 982), MATH 150-152 (p. 982), MATH 171-172 (p. 982), MATH 221, MATH 251, MATH 253; PHYS 101, PHYS 201-202 (p. 1031), PHYS 208, PHYS 218-219 (p. 1031); AERS 100-499 (p. 796); MLSC 100-499 (p. 997); NVSC 100-499 (p. 1016); SOMS 100-499. (p. 1061)
3 GEOS 101 recommended.
4 Students must complete 6 credit hours of American history and 6 credit hours of government/political science.
5 MLSC, NVSC and AERS courses can be used as general electives if a minor is completed in Military Science. See an academic advisor for more information.
6 All students enter as Lower Level Meteorology (METL) until completion of ATMO 335 and ATMO 336 and the associated prerequisite courses. Once students have completed these courses, their major will be changed to Upper Level Meteorology (METR), and they will be eligible to take upper-level electives. This change should occur following Fall of the junior year.
7 Select in consultation with faculty academic advisor.
8 If students use nine credits of allowed OCNG courses (e.g. OCNG 251, OCNG 252, OCNG 350, OCNG 451,OCNG 485) as technical electives and general electives, they will receive an OCNG minor with their BS in METR degree.
9 Students will not be permitted to receive credit for both the 400- and 600-level versions of certain courses because the content and learning outcomes are too similar (e.g. OCNG 440/OCNG 640).
10 Two graduate courses will be taken for dual undergraduate/graduate credit and will contribute to the minor and technical electives.

Meteorology - Minor

Students of other disciplines, such as chemistry or mathematics, may complete a minor in meteorology by taking a minimum of 16 hours in Atmospheric Sciences or upper division geosciences. GEOS courses may comprise no more than 6 of these hours, with the remainder being ATMO. At least 9 of the 16 hours must be in courses 300-level or above, including
at least three 400-level hours. The selection of courses must be made in agreement with an advisor from the Atmospheric Sciences faculty.

</table>

Must maintain a minimum GPR of 2.00 in order to pursue this minor.

At least 9 hours of ATMO courses are required and a minimum of 3 hours at the 400 level.

**Department of Geography**

Geography is the study of the relationships between people and their environment, relationships that vary from place to place over the Earth. Geography students assess those factors responsible for the variable and changing character of Earth's systems, which over time have been transformed into human habitat. Geography integrates physical science, social science, and the humanities. The Department requires that students understand both the physical and human components, and develop the spatial analytical skills to study these systems.

Physical geography emphasizes a systematic and interdisciplinary approach to the study of landforms, climate, soils, and vegetation. Human geography seeks to describe and explain the spatial patterns of human activities on Earth. These range from economic activities such as the distribution of retail sales and industrial production to cultural landscapes, which often have strong historical roots. Geographic Information Science (GIS), quantitative methods, and remote sensing provide geographers with the analytical techniques to study spatial phenomena.

Geographic Information Science and Technology - BS, Computation, Design and Analysis Track

The BS in Geographic Information Science and Technology (GIST) requires semester credit hours for completion in the Computation, Design, and Analysis (CDA), Earth Systems Analysis (ESA), or the Human Systems and Society (HSS) tracks.

The Computation, Design, and Analysis (CDA) track is intended for students interested in the computational, analysis, and software development aspects of GIST. This track emphasizes the computational and information technology that underpins GIST and focuses on technical issues, algorithm development and performance, and software tool development.

Students will receive a rigorous and modern-day education and training in GIST with application knowledge in physical and human geography. Employers require problem solvers, not button pushers, to address problems in various application domains. The BS in GIST is designed to:

- Provide modern-day exposure to the rapidly changing field of GIST
- Balance education and training with a focus on competency
- Provide application and problem-solving experiences
- Support student activities and research
- Provide students with professional experience
- Produce high-quality geographers with strong GIST knowledge and skills

Geospatial technology graduates are in extremely high demand and, according to the U.S. Department of Labor, are one of the highest growth areas in the federal government, particularly in homeland security activities, as well as in energy, software and engineering firms, biomedical and biohazard research, among many others. A 35% annual rate of growth in geospatial technology-related degrees are projected by the U.S. Department of Labor. Students have employment opportunities with the following corporate and government entities:

- Government agencies (federal, state, county, and city): management and planning of urban infrastructure, inventory and assessment of natural resources including agriculture, forestry, and water resources.
- Energy industry: assessing biofuel production and identifying locations suitable for renewable energy resources and mineral exploration.
- Health science industry: determine hotspots of health events and explore causes.
- Military and intelligence community: numerous opportunities exist in military branches and agencies such as the Central Intelligence Agency, National Security Agency, and other intelligence organizations.
- Commercial industries: business analytics and marketing, as spatial information can be used to target marketing campaigns, and suitable site assessment to locate companies.
- Geospatial industries: software development, geotechnical engineering, and technology development.

Students select courses with the assistance of the academic advisor in an individualized advising system.

Semester Credit Hours 8

Total Semester Credit Hours 15

1 Department requires that you take two in the same discipline to meet this requirement.

Track electives comprise 6 hours of focused coursework. The track and specific courses within the track are to be chosen in consultation with the advisor and/or faculty mentor.

Students select courses with the assistance of the academic advisor in an individualized advising system.

Geographic Information Science and Technology - BS, Earth Systems Analysis Track

The BS in Geographic Information Science and Technology (GIST) requires semester credit hours for completion in the Computation, Design, and Analysis (CDA), Earth Systems Analysis (ESA), or the Human Systems and Society (HSS) tracks.

The Earth Systems and Analysis (ESA) track is designed to attract students interested in applying GIST to physical geography. It applies geospatial technologies to the study of the Geosciences and assessing the Earth's natural resources by providing students with a foundation in biogeography, climate, geomorphology, soil science, geology, ecosystem science, as well as a strong grounding in GIST.

Students will receive a rigorous and modern-day education and training in GIST with application knowledge in physical and human geography. Employers require problem solvers, not button pushers, to address problems in various application domains. The BS in GIST is designed to:

- Provide modern-day exposure to the rapidly changing field of GIST
- Balance education and training with a focus on competency
- Provide application and problem-solving experiences
- Support student activities and research
- Provide students with professional experience
- Produce high-quality geographers with strong GIST knowledge and skills

Geospatial technology graduates are in extremely high demand and, according to the U.S. Department of Labor, are one of the highest growth areas in the federal government, particularly in homeland security activities, as well as in energy, software and engineering firms, biomedical and biohazard research, among many others. A 35% annual rate of growth in geospatial technology-related degrees are projected by the U.S. Department of Labor. Students have employment opportunities with the following corporate and government entities:

- Government agencies (federal, state, county, and city): management and planning of urban infrastructure, inventory and assessment of natural resources including agriculture, forestry, and water resources.
- Energy industry: assessing biofuel production and identifying locations suitable for renewable energy resources and mineral exploration.
- Health science industry: determine hotspots of health events and explore causes.
- Military and intelligence community: numerous opportunities exist in military branches and agencies such as the Central Intelligence Agency, National Security Agency, and other intelligence organizations.
- Commercial industries: business analytics and marketing, as spatial information can be used to target marketing campaigns, and suitable site assessment to locate companies.
- Geospatial industries: software development, geotechnical engineering, and technology development.

Students select courses with the assistance of the academic advisor in an individualized advising system.

Geographic Information Science and Technology - BS, Human Systems and Society Track

The BS in Geographic Information Science and Technology (GIST) requires semester credit hours for completion in the Computation, Design, and Analysis (CDA), Earth Systems Analysis (ESA), or the Human Systems and Society (HSS) tracks.

The Human Systems and Society (HSS) track is designed to attract students interested in applying GIST to human geography. It emphasizes social sciences, human/environment relationships, and the planning and management of human resources and urban environments, as well as provides students a solid grounding in GIST.

Students will receive a rigorous and modern-day education and training in GIST with application knowledge in physical and human geography. Employers require problem solvers, not button pushers, to address problems in various application domains. The BS in GIST is designed to:

• Provide modern-day exposure to the rapidly changing field of GIST
• Balance education and training with a focus on competency
• Provide application and problem-solving experiences
• Support student activities and research
• Provide students with professional experience
• Produce high-quality geographers with strong GIST knowledge and skills

Geospatial technology graduates are in extremely high demand and, according to the U.S. Department of Labor, are one of the highest growth areas in the federal government, particularly in homeland security activities, as well as in energy, software and engineering firms, biomedical and biohazard research, among many others. A 35% annual rate of growth in geospatial technology-related degrees are projected by the U.S. Department of Labor. Students have employment opportunities with the following corporate and government entities:

• Government agencies (federal, state, county, and city): management and planning of urban infrastructure, inventory and assessment of natural resources including agriculture, forestry, and water resources.
• Energy industry: assessing biofuel production and identifying locations suitable for renewable energy resources and mineral exploration.
• Health science industry: determine hotspots of health events and explore causes.
• Military and intelligence community: numerous opportunities exist in military branches and agencies such as the Central Intelligence Agency, National Security Agency, and other intelligence organizations.
• Commercial industries: business analytics and marketing, as spatial information can be used to target marketing campaigns, and suitable site assessment to locate companies.
• Geospatial industries: software development, geotechnical engineering, and technology development.

Students select courses with the assistance of the academic advisor in an individualized advising system.

1 8 hours required. Department requires that you take two in the same discipline to meet this requirement.
2 Track electives comprise 6 hours of focused coursework. The track and specific courses within the track are to be chosen in consultation with the advisor and/or faculty mentor.
3 19 hours required. To be selected from the following or chosen in consultation with an advisor.

- URPN 325 Introduction to GIS in Urban and Regional Planning  
- URPN 326 Advanced GIS in Urban and Regional Planning  
- URPN 369 Transportation and Urban Form  
- URPN 440 Urban and Regional Economic Development  
- URPN 460 Sustainable Communities  

Semester Credit Hours  

**Total Semester Credit Hours**  

1. 8 hours required. Department requires that you take two in the same discipline to meet this requirement.  
2. Track electives comprise 6 hours of focused coursework. The track and specific courses within the track are to be chosen in consultation with the advisor and/or faculty mentor.  
3. 19-20 hours required. To be selected from the following or chosen in consultation with Advisor.  

Two courses in the degree plan must be Writing Intensive courses designated by the department in the schedule of classes. Also, International and Cultural Diversity Electives (6 hours) must be incorporated into the degree.  

**Geography - BS**

A student seeking a Bachelor of Science degree in Geography is expected to complete a minimum curriculum of 56 hours in geography, with 18 of those hours chosen from one of the following selected tracks of focus: Human Geography, Geography of the Natural Environment, Human-Environment Interactions, or Geography. The Department of Geography also administers the Bachelor of Science degree program in Environmental Studies for the College of Geosciences. Geography courses may include field trips outside scheduled class hours, including study abroad experiences.  

Geography graduates apply their knowledge and analytical skills for jobs applying locational and environmental analysis for rewarding careers.
in education, business, or industry, local, state, and federal agencies, as well as nonprofit organizations. Advanced degrees provide greater career opportunities.

For students interested in a career in education, the Department of Geography works closely with the Department of Teaching, Learning, and Culture. Geography is part of a Social Studies composite degree program that prepares students to teach at middle and high school levels.

1. 8 hours required. Department requires that you take two in the same discipline to meet this requirement.
2. Courses to be approved by advisor.
3. Track electives comprise 18 hours of focused coursework beyond the Geography core. The track and the specific courses within the track are to be chosen in consultation with the academic advisor from the list below.
4. At most, one of these courses may be chosen from GEOG 301, GEOG 305.

Two courses in the degree plan must be Writing Intensive courses designated by the department in the schedule of classes. Also, International and Cultural Diversity Electives (6 hours) must be incorporated into the degree.

### Track Options

**Geography Track Electives**

Choose eighteen hours of the following: 18

- GEOG 301 Geography of the United States
- GEOG 304 Economic Geography
- GEOG 305 Geography of Texas
- GEOG 306 Introduction to Urban Geography
- GEOG 309 Geography of Energy
- GEOG 311 Cultural Geography
- GEOG 312 Data Analysis in Geography
- GEOG 320 The Middle East
- GEOG 323 Geography of Latin America
- GEOG 324 Global Climatic Regions
- GEOG 325 Geography of Europe
- GEOG 327 Geography of South Asia
- GEOG 330 Resources and the Environment
- GEOG 331 Geomorphology
- GEOG 335 Pattern and Process in Biogeography
- GEOG 335 Concepts in Geographic Education
- GEOG 360 Natural Hazards
- GEOG 361 Remote Sensing in Geosciences
- GEOG 370/ Coastal Processes MARS 370
- GEOG 380 Workshop in Environmental Studies
- GEOG 398 Interpretation of Aerial Photographs
- GEOG 400 Arid Lands Geomorphology
- GEOG 401 Political Geography
- GEOG 404 Spatial Thinking, Perception and Behavior
- GEOG 405 Field Trips
- GEOG 406 Geographic Perspectives on Contemporary Urban Issues
- GEOG 420 Geography of Terrorism
- GEOG 430 Environmental Justice
- GEOG 434 Hydrology and Environment
- GEOG 435 Principles of Plant Geography
- GEOG 442/ Past Climates
- GEOG 462/ Advanced GIS Analysis for Natural Resources Management
- GEOG 467 Dynamic Modeling of Earth and Environmental Systems
- GEOG 475 Advanced Topics in GIS (Geographic Information Systems)
- GEOG 476 GIS Practicum

**Human-Environment Interactions Track Electives**

- GEOG 330 Resources and the Environment 3
- GEOG 360 Natural Hazards 3

Select four of the following: 12

- GEOG 309 Geography of Energy
- GEOG 312 Data Analysis in Geography
- GEOG 401 Political Geography
- GEOG 404 Spatial Thinking, Perception and Behavior
- GEOG 430 Environmental Justice
University Studies - BS, Geographic Information Science and Technology Concentration

The broad objective of the academic discipline of geography is to understand and improve the human environment: Earth. Understanding the Earth's surface requires a consideration of both natural and social processes, hence geography is by nature interdisciplinary. Human-environment interactions are of particular interest in geography. The area of concentration in geography offers students a broad perspective on the Earth as human habitat, while permitting them to complete two supporting minors in other disciplines. The area of concentration is flexible in that numerous courses are included to permit a student to build a course of study in geography that is tailored to his or her interests. Ideally, the minors would be in related fields to build depth and breadth around themes that the student wishes to emphasize.

American History elective (p. 26) 6
POLS 206 American National Government 3
POLS 207 State and Local Government 3
Minor 1 15-18
Minor 2 15-18

General Electives 2 18-24
Total Semester Credit Hours 120
1 GEG 301 and GEG 305 cannot be used in combination to meet this requirement.
2 Any 100-499 course not used elsewhere.

Two courses that meet the writing requirement are required.
A total of six semester credit hours must include courses that meet the International and Cultural Diversity (p. 42) requirements, except sections of BUSN 289 that meet the university writing requirement.

Geographic Information Science and Technology - Minor

Geographic Information Science and Technology (GIST) is used to solve problems associated with land administration, environment and natural resource management, planning and population studies, as well as traditional surveying and mapping applications. GIST uses GIS, remote sensing, and global positioning mapping to collect, analyze and display spatial information.

Total Semester Credit Hours 15

¹ Fall semester course
² Spring semester course

General Requirements

1. Geographic Information Science and Technology (GIST): minimum of 15 credits in the discipline at 300-400 level.
2. Minimum of 6 credits must be taken in residence at either Texas A&M University or Texas A&M at Galveston.
3. Students must meet with the department’s advisor for minor programs for approval of courses selected (any substitutions must be approved by the department head).
4. Minimum cumulative GPR of 2.0 must be achieved for all courses in the minor.
# Geography - Minor

The Department of Geography offers a minor in Geography.

The selection of courses must be made in agreement with the geography department advisor for minor programs.

Minimum GPA of 2.000 must be maintained in the minor coursework.

6 hours must be upper division courses, 3 of which must be at the 400-level.

## General Requirements

1. Geography Minor: minimum of 16 credits in the discipline with at least 6 hours in upper-division courses, 3 hours of which must be at the 400 level.
2. Minimum of 6 credits must be taken in residence at either Texas A&M University or Texas A&M at Galveston.
3. Students must meet with the department’s advisor for minor programs for approval of courses selected (any substitutions must be approved by the department head).
4. Minimum cumulative GPR of 2.0 must be achieved for all courses in the minor.

# Department of Geology and Geophysics

## Geology

The field of geology includes the scientific study of all aspects of the solid Earth and the fluids within it, including the fundamental processes that shape it and the stewardship of its resources that benefits society. The undergraduate curricula in geology foster critical thinking, and the application of scientific skills to the study of Earth materials (rocks, minerals, fossils, structures, landforms and subsurface fluids) and geologic processes. Courses provide a broad background in geology, emphasize knowledge transfer from other sciences to geologic problems and emphasize hands-on application of knowledge through laboratories and field trips and promote application to practical problems in petroleum exploration, environmental management and civil engineering.

The Department of Geology and Geophysics offers two undergraduate programs in geology, the Bachelor of Arts and the Bachelor of Science. The BS program is appropriate for students seeking careers as geologists or preparing for graduate school in geology, whereas the BA program is designed for students wishing to combine geology with other disciplines. Details of the two programs are given below.

To remain in satisfactory academic standing, students must maintain a 2.0 or better GPR in all technical courses (geology, geophysics, chemistry, math and physics).

## Geophysics

Geophysics includes all areas of scientific inquiry that deal with the physical state of Earth and other planets and the dynamic processes that act on and within planetary bodies. The Bachelor of Science in Geophysics is for students who wish to combine a proficiency in mathematics with an interest in Earth. The objective of this program is to develop a physically-motivated approach to the study of Earth phenomena, with an emphasis on collection and analysis of geophysical data for probing and imaging the Earth’s interior. Graduates will be well-prepared for careers in the energy and environmental industries, and for advanced study at top-ranked graduate programs.

## Minors in Geology and Geophysics

The Department of Geology and Geophysics offers minors in two separate programs: Geology, Geophysics. Minors provide opportunities for broadening a student’s background and tailoring the curriculum to specific career goals. For example, a minor in Geology or Geophysics may be especially beneficial to students majoring in fields that deal directly or indirectly with geological processes. These include agriculture,
anthropology, archaeology, architecture, business, education, engineering, and soil science, to name a few.

Majors

- Bachelor of Arts in Geology (p. 476)
- Bachelor of Arts in Geology and Master of Ocean Science and Technology, 5-Year Degree Program (p. 477)
- Bachelor of Science in Geology (p. 479)
- Bachelor of Science in Geology and Master of Ocean Science and Technology, 5-Year Degree Program (p. 480)
- Bachelor of Science in Geophysics (p. 481)

Minors

- Geology Minor (p. 482)
- Geophysics Minor (p. 483)

Geology - BA

The Bachelor of Arts in Geology provides a foundation in geology for students who are not planning a career as a geologist. This program provides a basis for science-related careers, such as environmental law, pre-college teaching, science journalism, and resource management and marketing. Graduates will supplement their curriculum in geology with a minor designed around their career goals. The minor requires a minimum of 15 credit hours in one discipline, to be chosen in consultation with an advisor.

Because the BA program has less rigorous mathematics and physics requirements and less comprehensive geology requirements, the BS is considered the appropriate option for students considering graduate study in geology.

1. Fifteen hours of electives must be selected in a minor. Electives must be chosen in consultation with advisor.
2. Any 300- or 400-level geology or geophysics course not already required.
3. Any science, math, engineering or social science course that augments the degree with the approval of the advisor.
4. Six hours must be selected from courses that also satisfy the international and cultural diversity requirement.
5. General electives may not include STLC 100-499 (p. 1070); SLCX 100-499; DEVS 100-499; BUSH 100; ENGL 103; GEOL 101-104 (p. 922); KINE 198, KINE 199; MATH 102, MATH 131, MATH 141, MATH 142, MATH 150, MATH 151, MATH 166, MATH 171; AERS 100-499 (p. 796); MSLC 100-499 (p. 997); NVSC 100-499 (p. 1016); SOMS 100-499 (p. 1061).

### Geology - 5-Year Bachelor of Arts/Master of Ocean Science and Technology

The Fast Track Program offers motivated and exceptional students the opportunity to achieve aspirations in an efficient 5 year program at Texas A&M, completing either the Bachelor of Science (B.S.) or Bachelor of Arts (B.A.) degree (in the Department of Geology and Geophysics) and the non-thesis Master of Ocean Science and Technology (in the Department of Oceanography). There will be only two courses used for dual credit in this program. There is a total of 150 hours of coursework. The concurrent degree program will enable these motivated students to coordinate the required B.A./B.S. coursework (120 undergraduate credit hours including 6 dual credit graduate hours) and non-thesis M.S. coursework (36 credit hours including the 6 dual credit graduate hours) to complete the required credit hours for each degree without diminishing scope or quality of work and within 5 years.

### Application and Eligibility:
- Applications to the Fast Track program will be submitted by July 1 after the completion of the student’s junior year. Applications submitted after that time will be evaluated on a case by case basis.
- Applicants must have a minimum undergraduate GPR of 3.0. Applicants should also earn a C or better in all Chemistry, Calculus and Physics courses. Once admitted to the program, students must maintain a minimum 3.0 GPR.
- A faculty advisor will be assigned to each student. Students may seek additional mentors, but a formal committee is not required.
- Students admitted into the Fast Track program must finish the entire 150 credit hours to obtain both the Bachelor's and Master's degrees. These students will be conferred with two degrees once they complete the 5th year of the concurrent program.
- Students admitted to the program will change from U4 to G7 status when they are admitted having completed at least 102 hours (end of spring semester, year 3).
- Students not accepted or not allowed to continue with the Fast Track Program will complete the 120 hour Bachelor's degree under the standard 4 year curriculum. These students may still apply to the traditional graduate program.
- Students will graduate at the completion of the 5th year in the Fast Track Program coursework (150 credit hours) with both Bachelor's and Master's degrees. Students will complete the coursework in May of the 5th year.

</table>

1. If students use allowed OCNG courses (e.g. OCNG 251, OCNG 252, OCNG 350 etc.) as minor or free electives, they will receive an OCNG minor with their BA in GEOL.
2. Select in consultation with advisor.
3. Students must complete 6 credit hours of American history and 6 credit hours of government/political science.
4. A second W course is required. GEOL 312 is offered as a W option when taught by Dr. Julie Newman, and other GEOL electives also fulfill the W requirement (including GEOL 491 when arranged with the permission of the instructor).
5. Students will not be permitted to receive credit for both the 400- and 600-level versions of certain courses because the content and learning outcomes are too similar (e.g. OCNG 410/OCNG 608, OCNG 440/OCNG 640).
6. Two graduate courses will be taken for dual undergraduate/graduate credit and may contribute to the minor.
Geology - BS

The BS in Geology is considered the preparatory degree for careers in geological science. Graduates typically go on to careers in the energy and environmental industries, and advanced study at top-ranked graduate programs. The first two years of the BS program in Geology provide students with the basics of geology and the supporting fields of chemistry, physics and mathematics. The junior and senior years involve more advanced study in the field of geology and the opportunity to concentrate study in specific disciplines through the selection of technical electives. The Geology and Geophysics Department offers summer field camp (GEOL 350) in the Western US, in which students apply their geological knowledge to collecting data and solving real problems during a four-week field season. Seniors will participate in a group research capstone course, in which they work in teams with a faculty advisor to solve a current problem and communicate their findings and experience. Students also have opportunities to become involved in individual research problems with faculty members and can receive course credit for this activity through research hours (GEOL 291 and GEOL 491).

The BS is the appropriate degree for students intending to pursue graduate study in geology. Students desiring employment in the petroleum industry are encouraged to pursue an MS degree. Students planning a research or university teaching career should pursue a PhD degree. Particular selections of elective can be used to refine the degree.

Some of society's most pressing problems, including groundwater contamination and remediation, water resources, and geologic hazards such as landslides, flooding and subsidence are addressed in the field of environmental geology. Environmental geologists typically find careers with environmental and engineering consulting companies and other industrial corporations, governmental agencies or academia. Students are well-prepared for the Association of State Boards of Geology (ASBOG) Fundamentals of Geology exam, which is required for appointment as a Professional Geologist in the State of Texas. Specific elective classes recommended include CVEN 365, GEOG 331, GEOG 390, GEOL 410, GEOL 420, GEOL 440, GEOS 410 and approved classes in other departments including Soil Science, Chemistry, Physics and Civil Engineering.

Many geologists go on to employment in the field of petroleum exploration and extraction. Some of the required geology classes prepare students for this field. Additional recommended classes including GEOL 404, PETE 311, PETE 321, PETE 324 and PETE 402. Qualified students (GPR of 3.0 or higher with dean's permission) may also take related graduate courses during the senior year. Such classes include GEOL 619, GEOL 622, GEOL 623, GEOL 624, GEOL 668, and GEOP 629. These classes prepare students for graduate study, as well as provide training for those who may be interested in service jobs in the oil and gas industry between their undergraduate and graduate education.

To remain in satisfactory academic standing, students must maintain a 2.0 or better GPR in all technical courses (geology, geophysics, chemistry, math and physics). Some courses require field trips. Students must pay expenses incurred on such trips.

Application and Eligibility

- Applications to the Fast Track program will be submitted by July 1 after the completion of the student’s junior year. Applications submitted after that time will be evaluated on a case by case basis.
- Applicants must have a minimum undergraduate GPR of 3.0.
- Applicants should also earn a C or better in all Chemistry, Calculus and Physics courses. Once admitted to the program, students must maintain a minimum 3.0 GPR.

- Select one of the following: 3
  - American history (p. 26) 1
  - Government/Political science (p. 26) 1

**Spring**
- GEOL 309 Introduction to Geological Field Methods 3
- GEOL 312 Structural Geology and Tectonics 1,2 4
- GEOL Elective 1,2,4 3
- Technical elective 4 3
- Creative arts (p. 25) 1 3

**Summer**
- GEOL 300 Field Geology 6

**Fourth Year**

**Fall**
- OCNG 604 Ocean Observing Systems 5 3
- OCNG 608 Physical Oceanography 5 3
- Select one of the following: 3
  - American history (p. 26)
  - Government/Political science (p. 26)

**Spring**
- OCNG 603 Communicating Ocean Science 3
- OCNG 657 Data Methods and Graphical Representation in Oceanography 6 3

**Fifth Year**

**Fall**
- Advanced specialized OCNG graduate courses 9

**Spring**
- OCNG 661 Advanced Oceanographic Data Analysis and Communication 3
- Advanced specialized OCNG graduate courses 6

**Total Semester Credit Hours**

1. Any of the required courses may be taken during the Summer Sessions to diminish the heavy semester loads during Years Two and Three.
2. A second W course is required. GEOL 312 is offered as a W option when taught by Dr. Julie Newman, and other GEOL electives also fulfill the W requirement (including GEOL 491 when arranged with the permission of the instructor).
3. Students must complete 6 credit hours of American history and 6 credit hours of government/political science.
4. Select in consultation with advisor.
5. Two graduate courses will be taken for dual undergraduate/graduate credit.
6. Students will not be permitted to receive credit for both the 400- and 600-level versions of certain courses because the content and learning outcomes are too similar (e.g. OCNG 410/OCNG 608, OCNG 440/OCNG 640).

---

**Geophysics - BS**

Graduates with a BS in Geophysics go on to careers in the energy and environmental industries, and advanced study at top-ranked graduate programs. The first two years are similar to the BS in Geology, providing students with the fundamentals of geology, chemistry, physics, and mathematics. Courses during the junior and senior years emphasize knowledge transfer from the fields of math and physics to techniques and problems in both theoretical and applied geophysics. Technical electives allow students to focus on specific career objectives. Students are also encouraged to become involved in research problems with faculty members and can receive course credit for this activity through research hours (GEOP 291 and GEOP 491).

While graduates from the Geophysics program will have employment opportunities in industry, the rigor of this degree is designed to prepare students for advanced study. The MS degree is generally considered to be the preferred entry degree for professionals in the petroleum industry. Students interested in teaching in a university or research in an academic, government or industrial laboratory should seek the PhD.

To remain in satisfactory academic standing, students must maintain a 2.0 or better GPR in all technical courses (geology, geophysics, chemistry, math and physics). Some courses in geophysics require field trips. Students must pay expenses incurred on such trips.

Geophysicists contribute to the field of environmental science by working on traditional and emerging methods used for hydrogeological, structural and stratigraphic characterization of the uppermost 100 meters, with applications to shallow resource and groundwater.
assessment and the solution of environmental and engineering problems. Environmental geophysicists typically work as independent environmental consultants or with industrial corporation or government agencies. Other recommended classes include GEOL 410, GEOL 420 and GEOL 440.

Many geophysicists find eventual employment in the petroleum industry, in which reflection seismology is the primary subsurface exploration tool. Students aiming for this field will supplement their background in seismic theory with electives that focus on subsurface structures and processes and industry techniques. These students will be prepared for graduate study, as well as service jobs in the oil and gas industry between their undergraduate and graduate education. Additional recommended classes include GEOL 306, GEOL 404 and PETE 311. Qualified students may also take related graduate courses during the senior year, including GEOP 629, GEOP 631 and GEOP 620. Students interested in seismic theory may take additional math classes, such as MATH 417, MATH 407 and MATH 414.

Total Semester Credit Hours | 120 |

1. Any approved 400-level geophysics course not already required.
2. Any science, math or engineering course that augments the degree with the approval of the advisor.
3. Six hours must be selected from courses that also satisfy the International and Cultural diversity requirement.

Geology - Minor

A minor in Geology requires 15 hours of Geology or Geophysics courses, and may be especially beneficial to students majoring in fields that deal directly or indirectly with geological processes. These include agriculture, anthropology, archaeology, architecture, business, education, engineering, and soil science, to name a few.

Technical electives 11

Select from the following:

- GEOL 100-499 (p. 922) ²
- GEOP 100-499 (p. 925)

Total Semester Credit Hours 15

1. May use with advisor approval.
2. Except GEOL 308.

Minimum of 6 credits must be taken in residence at either Texas A&M in College Station or Texas A&M in Galveston.

Minimum of 6 credits at the 300-400 level.

Minimum of 2.0 cumulative GPA for all courses in the minor.

Maximum of 4 credits may be from selected courses in Geography or Oceanography, with approval of advisor (any substitutions must be approved by the department head).

Geophysics - Minor

A minor in Geophysics requires 15 hours of Geology or Geophysics courses, with a minimum of 9 hours in Geophysics. The minor in geophysics may be especially useful to those in related technical fields who wish to apply their skills to problems in Earth science, such as mathematics, physics, and to those whose careers naturally intersect with the physics of earth materials, such as petroleum and civil engineering.

Program Requirements

1. Minimum of 15 credit hours in Geology or Geophysics. May not include GEOL 308.
2. Minimum of 6 credits must be taken in residence at either Texas A&M in College Station or Texas A&M in Galveston.
3. Minimum of 9 credit hours in Geophysics.
4. Maximum of 4 credits may be from selected courses in Geography or Oceanography, with approval of advisor (any substitutions must be approved by the department head).
5. Minimum of 6 credits at the 300-400 level.
6. Minimum of 2.0 cumulative GPA for all courses in the minor.

Department of Oceanography

Studies in Oceanography

Oceanography is an interdisciplinary science that focuses on the oceans, their contents and their boundaries. Degree programs include BS in Oceanography, MS (thesis option) in Oceanography, PhD in Oceanography and a Master of Ocean Science and Technology (MOST) a non-thesis professional degree. In addition, qualified undergraduate students may participate in a 15-credit minor in Oceanography.

The BS in Oceanography provides students with an interdisciplinary education and training in one of three areas of ocean science: Ocean Observing Systems and Technology (OOST), Ocean Climate (OC) and Marine Ecosystem Science and Health (MESH). All students will gain skill in handling, evaluating and analyzing large datasets.

The Department of Oceanography also has Fast Track 5 year Bachelor’s/MOST Programs in conjunction with Environmental Geosciences, Atmospheric Sciences and Geology. These Fast Track Programs offer motivated and exceptional students the opportunity to achieve aspirations in an efficient program at Texas A&M, completing a Bachelor’s degree in one of these majors: Environmental Geosciences (B.S.), Meteorology (B.S.), Geology (B.S. or B.A.) and the Master of Ocean Science and Technology degree in 5 years. There are only two courses used for dual credit in this program. There is a total of 150 hours of coursework. The concurrent degree program enables these motivated students to coordinate the required B.S coursework (114 undergraduate credit hours plus 6 dual credit graduate courses) and MOST coursework (36 credit hours including the 6 dual credit graduate courses) to complete the required credit hours for each degree without diminishing scope or quality of work within 5 years.

### Oceanography - BS

#### Overview

The Department of Oceanography offers a BS in Oceanography.

The BS in Oceanography provides students with an interdisciplinary education and training in one of three areas of ocean science: Ocean Observing Systems and Technology (OOST), Ocean Climate (OC) and Marine Ecosystem Science and Health (MESH). All students will gain skill in handling, evaluating and analyzing large datasets.

The BS in Oceanography curriculum: 1) Provides students with an interdisciplinary understanding of the oceans and the processes affecting them for use in careers in marine science or other related fields; 2) Provides students with the skills to retrieve, evaluate, and analyze large oceanographic datasets such as those generated from long term oceanographic studies and observing systems; and 3) Emphasizes critical thinking and problem solving skills.

Students planning on attending graduate school are encouraged to also complete a minor in a STEM field. Many graduates will obtain jobs in a variety of fields including marine technical support, energy and transportation industries, insurance industries, hazard mitigation, marine operations, homeland security, oil spill response, etc.

OCNG 456  MATLAB Programming for Ocean Sciences
Oceanography is an interdisciplinary science that focuses on the oceans, their contents and their boundaries. Degree programs are offered at the graduate level, leading to the Master of Science and the Doctor of Philosophy degrees in oceanography. In addition, various undergraduate courses are offered, and qualified undergraduate students may participate in a 15-credit minor in Oceanography. A minor consists of at least 15 hours from any of the undergraduate OCNG courses. However, only one of OCNG 251 or OCNG 401 can be used for the minor. At least 6 hours must be upper division courses in the minor.

### Program Requirements

</tbody>
</table>

**Total Semester Credit Hours** 15

1. Only one of OCNG 251 or OCNG 401 can be used for the minor.
2. At least 6 hours must be upper division courses.

### University Studies Programs

The College of Geosciences offers degrees in University Studies. A University Studies degree differs from a traditional “major” in that it consists of a concentration of 26 hours and two minors of 15-18 hours each. The University Studies degree format was created to provide students the flexibility to combine areas of study that are of special interest.

### Majors

- Bachelor of Science in University Studies, Geographic Information Science and Technology Concentration (p. 471)
- Bachelor of Science in University Studies, Geography Concentration (p. 471)

### University Studies - BS, Geographic Information Science and Technology Concentration

The broad objective of the academic discipline of geography is to understand and improve the human environment: Earth. Understanding the Earth’s surface requires a consideration of both natural and social processes, hence geography is by nature interdisciplinary. Human-environment interactions are of particular interest in geography. The area of concentration in geography offers students a broad perspective on the Earth as human habitat, while permitting them to complete two supporting minors in other disciplines. The area of concentration is flexible in that numerous courses are included to permit a student to build a course of study in geography that is tailored to his or her interests.

Ideally, the minors would be in related fields to build depth and breadth around themes that the student wishes to emphasize.

POLS 206  American National Government 3
POLS 207  State and Local Government 3
Minor 1 15-18
Minor 2 15-18
General Electives 2 18-24

Total Semester Credit Hours 120

1  GEOG 301 and GEOG 305 cannot be used in combination to meet this requirement.
2  Any 100-499 course not used elsewhere.

Two courses that meet the writing requirement are required.
A total of six semester credit hours must include courses that meet the International and Cultural Diversity (p. 42) requirements, except sections of BUSN 289 that meet the university writing requirement.
COLLEGE OF LIBERAL ARTS

Administrative Officers
Dean - Pamela R. Matthews, Ph.D.
Associate Dean - Violet Johnson, Ph.D.
Associate Dean - Steven M. Oberhelman, Ph.D.
Associate Dean - Gerianne Alexander, Ph.D.
Associate Dean - Leroy Dorsey, Ph.D.
Associate Dean - Paul Wellman, Ph.D.
Assistant Dean - Cheryl L. Hanks, M.A.

General Statement
The College of Liberal Arts offers students an opportunity to explore the intellectual achievements of humankind through a disciplined and responsible study of issues that have been of enduring importance to people. Thus, courses in liberal arts help students develop a sensitivity to the questions and values that confront them in their daily lives. At the same time, skills are built which can be put to use in solving complex problems. One of the program’s principal objectives is to achieve the hallmark of an educated person: a fundamental knowledge of the forces that have shaped and continue to direct our cultural identity.

The purpose of the undergraduate program in the College of Liberal Arts is to foster independent thinking by offering students a broad education. To achieve this, the college supports the aims of the University Core Curriculum, which requires all students to engage in specific studies intended to promote an awareness of their heritage, their culture, and their environment. Students who choose to major in one of the Liberal Arts disciplines will complete a curriculum designed to promote this breadth of understanding while providing a focus through concentration in one specific area of study.

The first two years of undergraduate study in the College of Liberal Arts introduce students to the full range of arts, humanities, science, mathematics and social science areas that are established in the University Core Curriculum. During the last two years, students concentrate on their major and minor fields of study and complete their program with appropriate elective hours. Throughout the program, skills in critical thinking and in communication are developed, strengthened and polished.

Many graduates with bachelor’s degrees in liberal arts continue their study at the graduate level in an academic discipline or in a profession such as medicine or law. The majority go directly into the job market. Studies have shown that liberal arts graduates are very successful in a variety of activities in commerce, business, or public service because the knowledge and skills sets in critical thinking, communication, writing, problem-solving, and analytical thinking they have developed are valuable in today’s world. Many businesses actively recruit liberal arts majors. Whether as a foundation for further study or as a broad education preparatory to positions in business, industry, and the public domain, a liberal arts degree has intrinsic worth and enduring value in providing knowledge for life.

General Degree Requirements
Degree requirements for Liberal Arts majors are organized into:

1. General Requirements, including University Core Curriculum requirements and College of Liberal Arts requirements
2. Requirements of the Major Field of Study
3. Requirements of the Minor Field of Study
4. Electives

A minimum of 120 acceptable hours of coursework is required for the baccalaureate degree. A minimum of 36 hours of 300- or 400-level coursework must be completed at Texas A&M University.

General Requirements
The areas listed below include University Core Curriculum requirements and College of Liberal Arts requirements. The completion of requisite hours in these areas will thus satisfy both University Core Curriculum and college requirements.

**Foreign Language**

Select one of the following: 8

ARAB 101 Beginning Arabic I
& ARAB 102 and Beginning Arabic II
Total Semester Credit Hours 74

1 Students must demonstrate the ability to express themselves in acceptable written English. The College requirement is satisfied if a student earns a grade of C or better in ENGL 203. Students who do not meet this standard must repeat the course to complete 60 hours and earn a grade of C or better or immediately arrange with the director of the writing laboratory to be certified as competent in writing.

2 ENGL 203 will count toward the Communication requirement or the Literature in English requirement, but will not count toward both requirements.

3 Two years of high school foreign language may be used to satisfy this requirement unless specified by major.

4 No course used to fulfill this requirement may fulfill any other college or university requirement except in the minor field of study.

5 Minimum of 3 and maximum of 6 semester credit hours in Creative Arts.

6 Courses in military, air or naval science may not be substituted for required courses.

7 The list of approved courses is available in the degree audit for each major.

Major Field of Study
Each department sets its own requirements for the major, including no fewer than 27 hours of coursework and no more than 33 hours (except for the BA in Music). At least 12 semester hours in the major must be completed in advanced courses (300- and 400-level), and at least 12 semester hours in the major field must be completed in residence at Texas A&M. A grade of C or higher is required in a course to be counted toward the major.

Minor Field of Study
Completion of a minor is not a requirement of the College of Liberal Arts; however, individual departments may require their majors to have a minor. Students should consult with an advisor in their major department to determine if a minor is required. The minor program comprises 15–18 hours with a minimum of 6 hours in residence at the 300- to 400-level. Minor programs are recognized on the transcript after graduation, but not on the diploma. A grade of C or higher is required if a course is to be counted toward the minor field. Each student who is required to complete a minor, or who chooses to do so, should contact the department that offers the minor to determine which specific courses are mandated. The student’s college and/or major department determines the number of minor programs a student may seek and shall be responsible for advising the student receives signed approval from the department, program, or college granting the minor program.

Electives
To enhance the traditionally broad background of the liberal arts graduate, undergraduate students are allowed to include in their degree program a minimum of 9 semester hours of free elective courses. These courses may be chosen from any field within the University except from a student’s major field. (See section on “Requirements for a Baccalaureate Degree” in this catalog.) All other elective hours must be selected with the approval of the student’s advisor and dean.

- STLC 101, STLC 102 and STLC 289 may only be taken on an S/U basis.
- Lower level (100 and 200 level) military science coursework (AERS, MLSC, NVSC) does not apply to degree requirements in the College of Liberal Arts.
- No more than 14 semester credit hours combined of KINE 199 and upper-level Military Science or SOMS courses may be used as electives.
- Any undergraduate student may take up to four semester credit hours of KINE 199 on an S/U basis.
- In the College of Liberal Arts, students who have less than a 2.0 GPR and who enroll in KINE 199 must enroll in the course on an S/U basis.
- Juniors and seniors in the College of Liberal Arts whose cumulative GPR is 2.50 or above may take up to 12 semester credit hour hours of “free electives” on an S/U basis.
- Transfer students must take at least 12 semester credit hours of regular coursework at Texas A&M before enrolling in a course on an S/U basis.
• Courses offered only on an S/U basis may be taken by freshmen and sophomores. These courses count toward the 12 semester credit hour limit.

Combined Degree Plan, Double Degree and Double Major
Students may pursue a program to qualify for two bachelor’s degrees, either a Bachelor of Arts and a Bachelor of Science degree from different departments, or two Bachelor of Arts or two Bachelor of Science degrees, with the second degree from another college. Alternatively, instead of a major and a minor field, students in the College of Liberal Arts may elect to have two Liberal Arts major fields of study. Both majors may be within the college, or one major may be outside the college, provided both majors lead to the same baccalaureate degree.

Students who are enrolled in a University Studies degree are not eligible for a double major or a double degree.

Students must declare the double degree no later than the semester in which they will complete 90 hours. Students must have and maintain at least a 3.0 GPR cumulative and in the majors (or the minimum departmental GPR requirement in the major, whichever is higher), with at least a 3.0 GPR in at least 9 hours in the second field of study at the time of declaration. Before declaring the double degree, students should consult with the appropriate advisors to formulate the combined degree plan. The following requirements must be met: the student must

1. satisfy all University and college requirements
2. complete all required courses in each major, if both majors are in the College of Liberal Arts (i.e., take all courses that are specifically listed in each regular degree program)
3. in cases where one major is in the College of Liberal Arts and the other major is in another college, the student shall take in his or her liberal arts major field of study the same number of credit hours required of regular majors in that field and also satisfy whatever conditions are set by the other college for its major field

Candidates for a double bachelor’s degree must have been in residence at least two academic years and must complete all essential work of the second curriculum not covered in the first. To qualify for the double degree, the student must complete a minimum of 30 semester credit hours more than the higher number of semester credit hours required for either degree.

Curricular Options
International and Intercultural Experiences
The International and Cultural Diversity requirement encourages all students to learn about attitudes and cultures different from their own. All students are required to select from a list of approved courses that foster greater awareness of our interdependent and diverse world.

Students also may select, as free electives, courses which address cultural diversity issues in the United States. Courses in this area encourage students to focus on issues of race, ethnicity and gender and to develop a broader understanding of the diverse cultures and traditions in the United States.

Further opportunity to increase international and national intercultural awareness can be accomplished through study abroad and internship programs. More information on these programs is available through the Undergraduate Programs Office in the College of Liberal Arts.

Liberal Arts Honors Program
The College of Liberal Arts encourages qualified majors to participate in its Honors Program, which is designed for academically talented high school graduates who have distinguished secondary school records (top 10%) and high scores on achievement tests (1250 SAT or 28 ACT). Students may also become Honors eligible once they establish a Texas A&M GPA of at least 3.5.

Students accepted into the program take courses that foster an interdisciplinary outlook characteristic of the Liberal Arts and that synthesize knowledge from other courses. Participants work in small classes with some of the most distinguished faculty at Texas A&M University. Students develop their own interests and have the option to write an honors thesis under the direct supervision of a professor with whom they have chosen to work. For information about Texas A&M Honors Program and Fellows Program (i.e., the senior thesis), see the Honors and Undergraduate Research (http://honors.tamu.edu) website. Individual departments may have their own Honors program for their majors.

Interdisciplinary Minors
Interdisciplinary minors are offered in Africana Studies, Asian Studies, Comparative Cultural Studies, Film Studies, Hispanic Studies for Community Engagement, Journalism Studies, Latino/a Mexican American Studies, Religious Studies, and Women’s and Gender Studies. Specific course requirements and options are available from each interdisciplinary program director.

Cooperative Education Program
Cooperative education enables students to gain practical work experience and a salary while completing academic requirements. During the four-year academic program, co-op students complete two to four periods of work away from campus, gaining experience through on-the-job training and thus improving their opportunities for future employment. An advisor in the cooperative education office provides additional information about this program.

Government Service (MPA Programs)
Most graduate programs in public administration recommend a broad background of knowledge and skills in the following areas: the political, social, economic and legal context of administration; analytical tools; individual, group and organizational dynamics; policy analysis; administrative/management processes; and arts and science foundation skills. Students are best prepared for an MPA program if their undergraduate programs are multidisciplinary in nature, drawing upon political science, economics, the behavioral sciences, the quantitative sciences, and administrative and managerial sciences.

Law
Most law school admissions committees require a student to have a baccalaureate degree, or equivalent, as well as an acceptable score on the Law School Admissions Test (LSAT). In general, law schools prefer that a student seek a diverse college education rather than one which is narrowly specialized. They favor thorough learning in some broad cultural field of a student’s choice, such as history, economics, political science, philosophy, mathematics, science, literature, or the classics. Admissions committees rarely favor concentration in specialized, technical curricula unless such study is adequately supplemented by advanced work in the social sciences and humanities. The Law School Admissions Test Council and the Council of the Section on Legal Education and Admissions of the American Bar Association both advise against the
taking of satisfactory/unsatisfactory courses by students intending to go to law school.

The college now offers a University Studies degree with a concentration in pre-law (B.A. in Society, Ethics and Law). Advising for pre-law students regardless of major, including application forms for taking the Law School Admissions Test, may be obtained from the Office of Professional School Advising.

**Medicine**

Advising for all pre-health students, including medical and dental students, may be obtained from the Office of Professional School Advising. Students are urged to stop by the office to pick up information on professional schools and talk with an advisor very early in their collegiate career.

**Teacher Certification**

Students majoring in one of the departments of the College of Liberal Arts and working toward a teaching certificate must meet the minimum requirements described in the College of Education and Human Development section under secondary teacher certification. Because many certification requirements are determined by the State of Texas and thus are subject to periodic change, students working toward certification should maintain frequent contact with advisors in the College of Education and Human Development.

**Theology**

The American Association of Theological Schools recommends that students planning to enter a theological seminary include in their undergraduate curriculum the following subjects.

- English (6 semesters)
- History (3 semesters)
- Philosophy (3 semesters)
- Natural science (2 semesters)
- Social science (6 semesters)
- Foreign language (4 semesters): Latin, German or French
- Religion (3 semesters).

Courses taught at Texas A&M in religion include:

Women's and Gender Studies - BA

Women's and Gender Studies is a flexible interdisciplinary program devoted to the critical analysis of gender and the pursuit of knowledge about women throughout history and around the world. Combining the methods and insights of traditional liberal arts disciplines with the special insights of scholarship on women's and gender studies, our courses yield fresh perspectives on the nature of gender as it intersects with race, ethnicity, class, religion, and nation, and encourage students to look beyond their own culture and era in examining gender's role in shaping society. Through interdisciplinary breadth and an emphasis on critical thinking, women's and gender studies prepares students to employ critical learning in their private lives as well as in public roles as citizens and members of a diverse and complex workforce.

Majors in women's and gender studies receive training in both humanities and social sciences approaches and are required to complete coursework that focuses on material beyond dominant U.S. culture; core courses have both theoretical and applied focuses. In addition, majors pursue a strong liberal arts education and complete a minor in another disciplinary or interdisciplinary area, enhancing career options and enabling students to complement their work in the major and further their educational objectives by gaining detailed knowledge of a second area.

Since gender has far-reaching influence on daily life, world culture, and public policy, this major equips students to enter a wide range of fields. As a liberal arts degree, women's and gender studies is attractive to employers looking for recruits trained in critical thinking, organizational skills, reading, writing, and presenting in a wide range of subject areas. Expertise in women's and gender issues is increasingly important to businesses, governmental agencies, and other organizations dealing with matters such as sexual harassment, flex-time, parental leave, and pay equity, just as specialists in women's and gender studies find opportunities in education, law, health care, social work, counseling, media, public policy, and a wide range of other fields.

Program Requirements

| Code   | Title                                             | Semester Credit Hours |

Total Semester Credit Hours: 120

1. Courses may be applied both toward the WGST international and cultural diversity requirement and toward the WGST humanities and/or social sciences requirements.
2. Only students who are double majoring do not need to complete a minor. See the Minor Requirements section below.
3. A minimum grade of C is required.
4. See Literature in English table below for college approved list of courses.
5. WGST course may not be used to fulfill this requirement.
6. Completion of four semesters of upper-level ROTC may be substituted for 3 hours of American history or political science.
7. No more than one course may be in Texas history.
8. Students are required to complete 6 hours of International and Cultural Diversity courses. These courses may also be used to satisfy other requirements.
9. Minimum of 7 hours if 18-hour minor; minimum of 10 hours if 15-hour minor.

27 hours of WGST coursework required for the BA degree.

A minimum 2.0 GPR and a minimum grade of C for a course to count in the major. Completion of a minor in another field and completion of distribution requirements in the major as outlined.

At least 12 semester hours in the major must be completed in advanced courses (300- and 400-level), and at least 12 semester hours in the major field must be completed in residence at Texas A&M.

**Minor Requirements**

All Women’s and Gender Studies majors, with the exception of those who are double-majoring, must complete a minor chosen from other departments or divisions within or outside the College of Liberal Arts. The minor will consist of 15–18 hours of coursework with a minimum of
6 hours in residence at the 300- to 400-level. A grade of C or higher is required if a course is to count in the minor. Courses taken toward the minor may also be used to satisfy University Core Curriculum requirements. Students should consult the advisor for the minor or the Undergraduate Student Services Office in the College of Liberal Arts for details about how to satisfy minor requirements.

**College and University Requirements**

Other courses may qualify. Students should consult the approved lists of courses available in the Undergraduate Student Services Office in the College of Liberal Arts. Students must complete a minimum of 36 hours of 300- or 400-level course work at Texas A&M University.

Africana Studies - Minor

The interdisciplinary minor in Africana Studies provides students with a unique opportunity to think critically about the cultural, historical, and social contributions and experiences of people from Africa and of African descent. In our program, students examine the construction of blackness across ethnic, regional, and national boundaries. Africana Studies courses are a comingling of traditional approaches to the field and cutting edge scholarship that challenges stereotypical portrayals of blacks the world over.

Because the Africana Studies minor is interdisciplinary, students can draw on courses from across the College of Liberal Arts. Students also complete core classes in the Africana Studies discipline. The interdisciplinary nature of the program provides students opportunities to understand Africana Studies through different lenses, including art, literature, history, contemporary issues, individual and interpersonal experiences, performance, and politics.

A background in Africana Studies complements any career field by providing a strong foundation in key workplace skills: critical thinking, communication, research, writing, and cultural understanding. Additionally, the Africana Studies minor prepares students to address some of the crucial societal issues today: immigration, health policy, justice and law reform, international relations, educational equality, and workplace equity.

Film Studies - Minor

The Interdisciplinary Minor in Film Studies prepares undergraduate students to think and write critically about film and media from multiple perspectives. The minor offers courses in the history, criticism, and theory of film and media, and provides opportunities to pursue analyses of the aesthetic, cultural, economic, technological, and international dimensions of film. The foundational courses, FILM 251/ENGL 251 and FILM 299, set the stage for advanced courses in Film. A major goal of the program is to connect the student's major field of study with an understanding of film's cultural and social significance. Drawing from the expertise of affiliated faculty across the College of Liberal Arts, the minor can be tailored to the student's interests. The minor culminates in a Senior Seminar involving research on a special topic in the study of film.

The minor in Film Studies supports student development for any career field because it provides opportunities for students to obtain skills that are critical to success in today's workplaces: critical thinking, problem solving, oral and visual communication, writing, research, cultural understanding, and global perspectives. The Film Studies minor builds foundational skills for student success, leadership in the workplace, future graduate studies, and becoming an informed citizen.

1 Portfolio in global culture and society may be completed either during the long semester abroad or upon return to College Station.

2 Must be taken in a single fall or spring semester at a TAMU-affiliated facility such as Santa Chiara or Soltis Center.

Students must make a grade of "C" or better in all courses.

Journalism - Minor

Journalism Studies in The College of Liberal Arts offers a minor in Journalism, as well as a major in Journalism, and provides a background in reporting, from interviewing to on-line records searches, and in writing, from deadline news stories to longer analytical and feature pieces. Video production for the web is an integral part of news writing in our program, along with the opportunity for specialized, advanced writing classes in political reporting, literary nonfiction, arts and entertainment journalism, and magazine writing. Students also can get in-depth experience in the field of new media, particularly blogging.

Total Semester Credit Hours 15

Students must make a grade of "C" or better in all courses.

Liberal Arts Honors - Minor

This minor will allow talented students the opportunity to craft a coherent and challenging program by utilizing at least four distinct Liberal Arts disciplines, as well as requiring significant investment in upper-level liberal arts coursework to include research or independent study as a capstone experience.

The minor is designed to ensure that students, in consultation with their honors advisor, will be able to create a minor that will expose them to an intelligent and well-conceived liberal arts experience, giving students a breadth and depth of experience in the liberal arts.

For the vast majority of minors the upper-level requirement is normally 9 hours. This minor requires students to complete 12 hours at the upper level from different departments. That would presuppose a superior acquisition of knowledge already acquired in different disciplines, particularly as many of our 300- and 400-level courses have required prerequisites. The capstone experience of research or independent study ensures that students will be able not only to acquire a better understanding of a cross-disciplinary liberal arts approach, but to apply it in practice as well as theory.

Program Requirements

Minimum of 18 hours of Honors Liberal Arts courses.

At least 12 hours must be at the 300- and 400-level approved by a College Honors advisor.

3 hours of a departmental capstone 485, 491, or 497 CLLA course. Must be approved by a College Honors advisor.
Religious Studies - Minor

The interdisciplinary Religious Studies minor at Texas A&M University encourages students to explore the many ways people experience and articulate the sacred. The Religious Studies minor offers students the opportunity to better understand how religion addresses core concerns about human existence across cultures.

Students who minor in Religious Studies select from a range of courses that match their interests and goals from a variety of disciplines in the College of Liberal Arts. Students have the opportunity to study specific religious traditions, to approach religion through the study or rituals, symbols, and literature, and to approach religion as a human phenomenon situated in culture and history. Topics of study include the history of religious traditions, religion in contemporary life, religion in the arts and literature, and many other topics. Students gain perspective on the complexity of religious thought and practices in world cultures.

The Religious Studies minor emphasizes a number of skills that are important to success in the workplace and as a citizen of the world: critical thinking, problem solving, cultural understanding, and written, oral, and visual communication. The ability to understand the significance of religion at individual, interpersonal, social, and cultural levels can serve students on nearly every career path, even those that do not focus on religion, because the skills that students learn through the study of religion as a human endeavor provides an intellectual foundation for any future career.

Women's and Gender Studies - Minor

Women's and Gender Studies is a flexible interdisciplinary program devoted to the critical analysis of gender and the pursuit of knowledge about women throughout history and around the world. Combining the methods and insights of traditional liberal arts disciplines with the special insights of scholarship on women's and gender studies, our courses yield fresh perspectives on the nature of gender as it intersects with race, ethnicity, class, religion, and nation, and encourage students to look beyond their own culture and era in examining gender's role in shaping society. Through interdisciplinary breadth and an emphasis on critical thinking, women's and gender studies prepares students to employ critical learning in their private lives as well as in public roles as citizens and members of a diverse and complex workforce.

Minors in women's and gender studies receive training in both humanities and social sciences approaches and are required to complete coursework that focuses on material beyond dominant U.S. culture; core courses have both theoretical and applied focuses.

Since gender has far-reaching influence on daily life, world culture, and public policy, this minor supports students in a wide range of fields. As a liberal arts degree, women's and gender studies is attractive to employers looking for recruits trained in critical thinking, organizational skills, reading, writing, and presenting in a wide range of subject areas. Expertise in women's and gender issues is increasingly important to businesses, governmental agencies, and other organizations dealing with matters such as sexual harassment, flex-time, parental leave, and pay equity, just as specialists in women's and gender studies find opportunities in education, law, health care, social work, counseling, media, public policy, and a wide range of other fields.

Courses must come from a minimum of four separate CLLA departments.

Must maintain a 3.50 or higher GPA.
Students must complete a minimum of twelve hours to include nine hours of diversity related courses from the College of Liberal Arts plus an additional three hours chosen in consultation with the certificate advisers. The additional three hours could consist of a research project, internship, directed study or other option, including a regular approved course. Students will be provided with a sample list of courses and advice about the most appropriate choices for their long term goals. Certificate advisers may approve additional courses not on the sample list to count toward the completion of this requirement. The core courses required for this certificate may also count toward other degree requirements.

**Department of Anthropology**

Anthropology is the study of what it means to be human in the broadest sense, through an examination of culture and society (sociocultural and linguistic anthropology), the biology and evolution of humans and our closest relatives (biological anthropology) and the study of past human communities and material culture (archaeology). Students develop an appreciation of the value of physical and cultural differences at the local, national and global levels, and learn critical thinking skills that support them in careers that involve working with individuals of diverse national or ethnic backgrounds.

The aim of the anthropology major is to provide a background in behavioral studies for students who desire a broad education in either the biological or the social sciences. Anthropology majors can obtain research experience in science and the humanities through ethnographic or biological research, or archaeology field schools. Most undergraduates in Anthropology at TAMU select this major because of the opportunity it affords them to acquire a sound liberal education.

The curriculum is ideal for students who want to pursue professional careers or graduate study in anthropology and archaeology. However, students will also find the curriculum fully suitable to prepare them for employment opportunities or careers in: secondary or higher education, medicine, law, museum and foundation settings, the local, state and federal government (such as the National Park Service, Bureau of Indian Affairs, National Institute of Health and others), non-governmental organizations and non-profit organizations; foreign service with government agencies (such as the Agency for International Development, United Nations organizations and others); private archaeological research institutions; and nontraditional opportunities emerging in business and management.

Department Requirement
more than one category. To promote the opportunity for anthropology University Core Curriculum requirements. No course can be counted in Department of Anthropology or in the Undergraduate Student Services approved lists of courses available through the academic advisor in the Other courses may qualify for this category. Students should consult the College and University Requirements before the student has completed 90 credit hours.

required if a course is to count in the minor. A minor should be declared 6 of which must be at the upper-division level. A grade of C or higher is required if a course is to count in the major.

Writing Courses
All students in each track are required to take two courses with the writing attribute, also known as “W-courses”, from the department. Substitutions with W-courses from other departments are not allowed. Please see the academic advisor for the most current list of Anthropology W-courses.

Minor Requirements
Anthropology majors may select a minor field of study from departments or divisions within or outside the College of Liberal Arts or in a particular area of interest (as with interdisciplinary minors or career opportunity minors). The minor will consist of 15-18 hours or coursework, at least 6 of which must be at the upper-division level. A grade of C or higher is required if a course is to count in the minor. A minor should be declared before the student has completed 90 credit hours.

College and University Requirements
Other courses may qualify for this category. Students should consult the approved lists of courses available through the academic advisor in the Department of Anthropology or in the Undergraduate Student Services Office in the College of Liberal Arts. The following list incorporates University Core Curriculum requirements. No course can be counted in more than one category. To promote the opportunity for anthropology majors to acquire a broad educational experience, anthropology students must satisfy their University requirements for language, philosophy and culture, social and behavioral sciences, and the sciences with courses other than those offered by anthropology.

Students must complete a minimum of 36 hours of 300- or 400-level coursework at Texas A&M University.

Anthropology - BA, Archaeology Track
Students who elect to pursue the archaeology track take the foundation courses but also have the opportunity to take multiple upper-level courses which focus on specific topics in archaeology. In addition, majors receive a broad yet rigorous liberal arts education.

Anthropology is the study of what it means to be human in the broadest
sense, through an examination of culture and society (sociocultural and linguistic anthropology), the biology and evolution of humans and our closest relatives (biological anthropology) and the study of past human communities and material culture (archaeology). Anthropology - BS

Anthropology is the study of what it means to be human in the broadest sense, through an examination of culture and society (sociocultural and linguistic anthropology), the biology and evolution of humans and our closest relatives (biological anthropology) and the study of past human communities and material culture (archaeology). Students develop an appreciation of the value of physical and cultural differences at the local, national and global levels, and learn critical thinking skills that support them in careers that involve working with individuals of diverse national or ethnic backgrounds.

The aim of the anthropology major is to provide a background in behavioral studies for students who desire a broad education in either the biological or the social sciences. Anthropology majors can obtain research experience in science and the humanities through ethnographic or biological research, or archaeology field schools. Most undergraduates in Anthropology at TAMU select this major because of the opportunity it affords them to acquire a sound liberal education.

The curriculum is ideal for students who want to pursue professional careers or graduate study in anthropology and archaeology. However, students will also find the curriculum fully suitable to prepare them for employment opportunities or careers in: secondary or higher education; medicine; law; museum and foundation settings; the local, state and federal government (such as the National Park Service, Bureau of Indian Affairs, National Institute of Health and others); non-governmental organizations and non-profit organizations; foreign service with government agencies (such as the Agency for International Development, United Nations organizations and others); private archaeological research institutions; and nontraditional opportunities emerging in business and management.

Minor Requirements

Anthropology majors have the option of selecting a minor field of study from departments or divisions within or outside the College of Liberal Arts or in a particular area of interest (as with interdisciplinary minors or career opportunity minors). Minors typically consist of 15-18 hours or coursework, at least 6 of which must be at the upper-division level.

Writing Courses

All students are required to take two courses with the writing attribute, also known as "W-courses", from the department. Substitutions with W-courses from other departments are not allowed. Please see the academic advisor for the most current list of Anthropology W-courses.

College and University Requirements

Other courses may qualify for this category. Students should consult the approved lists of courses available through the academic advisor in the Department of Anthropology or in the Undergraduate Student Services Office in the College of Liberal Arts. The following list incorporates University Core Curriculum requirements. No course can be counted in more than one category, with the exception of courses used for the International and Cultural Diversity requirement. To promote the opportunity for anthropology majors to acquire a broad educational experience, anthropology students must satisfy their University requirements for language, philosophy and culture, social and behavioral sciences, and the sciences with courses other than those offered by anthropology.

Students must complete a minimum of 36 hours of 300- or 400-level coursework at Texas A&M University.

Anthropology - Minor

The anthropology minor introduces students to the subfields of sociocultural, biological, and archaeological anthropology. It complements majors within all of the social sciences, humanities, and many of the natural sciences. Anthropology minors learn about issues relating to the human condition within a holistic, comparative and evolutionary context. They will develop the skills of scientific inquiry and will also learn critical thinking skills that support them in careers that involve working with individuals of diverse national or ethnic backgrounds, in fields such as education, law, medicine, government and non-government organizations, and nontraditional opportunities emerging in business and management.

The minor consists of 15 hours of coursework in anthropology, 6 of which must be at the 300 - 400 level and taken in residence.

1 31 hours required; 12 hours must be in residence; 12 hours must be in upper-division courses. A grade of C or higher is required for a course to count in the major.
2 Up to 6 hours may be selected from 200-299, 6-12 hours may be selected from 300-499
3 No anthropology course will satisfy this requirement.
4 ANTH 225 and ANTH 226 are excluded.
5 Courses may also be used to satisfy any other requirement.

Museum Studies - Minor

The minor in Museum Studies is offered in cooperation with the College of Liberal Arts, the College of Architecture, and the College of Agriculture and Life Sciences. The increase of collections, curatorial facilities and museums ensures this minor is a wise choice for any student with an interest in Anthropology or related fields. The minor will provide students with a foundational understanding of museum studies while giving them professional experience working in a museum. Coursework includes a
minimum of 15 hours, including one core course (3 hours), one internship course (3 hours), and three elective courses (9 hours).

- ARTS 330 The Arts of America
- PHIL 330 Philosophy of Art
- RPTS 307 Methods of Environmental Interpretation
- VIST 465 Art, Culture and Time Based Media

Total Semester Credit Hours 15

Minimum of six hours at the 300-400 level.

Students must make a grade of "C" or better in all courses.

**Department of Communication**

Communication is concerned with one of the most distinctly human characteristics: the use of spoken language to communicate information, maintain social contact, and influence others. Communication is an attractive major because it provides students with a broad liberal arts education, while at the same time focusing on vital communication skills, which are in high demand in the workplace as well as in political, religious and social communities. Communication skills include public speaking, argumentation, technical communication, leading teams and groups to solve problems, interviewing to gather information and to persuade, use and evaluation of communication technology, as well as a thorough array of communication research methods applications.

Degree requirements include the study of rhetorical and communication theories, the study of communication research methods, and the use of those theories and research methods in a variety of communication contexts. Such contexts include health communication, intercultural communication, interpersonal communication, mass media and new communication technologies, organizational communication, political rhetoric, religious communication, and others. Students use their communication skills to become leaders in all areas of business, social and political life.

The career interests of communication majors vary. Some students pursue advanced degrees in communication, law, business, or religion. Others take communication-related positions in strategic communication, public relations, marketing and sales, training and human resources, leadership and management, health fields related to communication, organizations and public policy, communication media, and related areas of business, industry, government, and non-profit organizations. Still others prepare for teaching careers.

**Honors Program**

The Department of Communication has a well-established Honors plan and strong linkages to the University honors program. Honors courses are available in all areas of Communication. In addition, students may graduate with honors in Communication noted on the transcript. Honor students may also choose individualized instruction through COMM 497, and through honors contracting. Students interested in the Department's Honors Program should contact the Communication Undergraduate Studies Office.

**Undergraduate Courses**

The Department of Communication offers courses in many areas of the discipline: Health Communication, Media Studies, Organizational Communication, Rhetoric and Public Affairs, Leadership and Civic Dialogue and Strategic Communication with significant focus in Intercultural and International communication across each area.

**Certificates**

The Department of Communication offers four certificates. While these certificates are optional, they permit a student to focus studies in one of four areas. The certificates in Communication and Global Media, in Communication Leadership and Conflict Management, and in Health Communication are open to students in the Department of Communication and in any major across the University. The certificate in Strategic Communication is offered to students majoring in Communication or in Telecommunication Media Studies only.

Communication - BA

Students who want to transform the world through communication choose Communication as a major. The Bachelor of Arts in Communication teaches how to influence and persuade others through the use of language, visual images and media. We pursue coursework that gives students a background in the processes and theories of communication as well as in the skills that are so valuable in the working world.

Coursework for incoming Freshmen begins with a dedicated first semester experience which introduces them to the breadth of the field of Communication and of Media. We also welcome Transfer students, meeting them where they are and integrating them into the field of Communication and of Media. We also welcome Transfer students, meeting them where they are and integrating them into the field of Communication and of Media.

1. Should be completed by the end of junior year.
2. COMM 101 and COMM 291 are required for incoming freshmen in the First Semester of freshman year.
3. Minimum grade of C required.
4. Course satisfies a writing elective.
5. ENGL 203 will count toward the Communication requirement or the Literature in English requirement, but not both.
6. COMM course may not be used to fulfill this requirement.
7. International and Cultural Diversity courses may also be used to satisfy any other requirement.
8. Sequences approved by the College of Liberal Arts, except Communication. No more than 9 semester credit hours may be at a lower-division (100 and 200) level. A minor must be declared before a student completes 75 semester credit hours.
9. Maximum of 9 semester credit hours of any combination of military science and physical activity courses.

Included in graduation requirements are the following stipulations:
1. A minimum of 2.0 GPR
2. Minimum grade of C in each course applied to the major
3. Minimum of 12 hours of upper-level COMM coursework at Texas A&M

Teaching Certification

Students desiring certification to teach communication in secondary schools of Texas may either major in communication (College of Liberal Arts) or in another field, but in either case, they must include the following courses in their degree plans:

**Telecommunication Media Studies - BA**

Telecommunication Media Studies focuses on media industries, technologies, and communication systems in current, cultural and historical contexts, their audience processes and effects, and social implications of the media.

The Telecommunication Media Studies major provides students with tools for understanding the media and their roles in social life theoretically, historically and critically. The degree allows students to choose a broadly based communication and media studies major or a more specialized study of telecommunication and information systems. Students can choose Communication courses that address media industries, law and policy, technology and society, media audiences, processes, and effects, and the theory, history, and criticism of media, culture, and communication.

A degree in Telecommunication Media Studies is useful in a broad variety of careers, including media and telecommunication industries, as well as communication-related positions in business, government, non-profit organizations, and higher education. The curriculum is designed to educate citizens for a productive future in a changing world. Our students may become broadcasters, producers, industry leaders, government regulators, spokespeople, politicians, writers, artists, activists, and informed citizens.

The BA and BS are both available. The BA is a more flexible, liberal arts media-oriented degree.

---

1. COMM 203 and COMM 243 cannot be taken as electives. Courses in the Core Requirements not selected to meet those requirements may be selected as electives.
2. ENGL 203 will count toward the Communication requirement or the Literature in English requirement, but not both.
3. COMM course may not be used to fulfill this requirement.
4. Courses may also be used to satisfy any other requirement.
5. Sequences approved by the College of Liberal Arts, except Communication. No more than 9 semester credit hours may be at a lower-division (100 and 200) level. A minor must be declared before a student completes 75 semester credit hours. Minimum grade of C is required.
6. Maximum of 9 semester credit hours of any combination of military science and physical activity courses.

Students take 24 credit hours of the required program core courses and 9-10 credit hours of telecommunication media studies elective courses for a total of 33 credit hours. At least 12 credits must be at the upper-division level. At least 12 credits must be taken in residence at Texas A&M University. Minimum grade of C in each course. No more than 3 credit hours of COMM 484; no more than 6 credit hours of COMM 485.
Teaching Certification
Students desiring certification to teach communication in secondary schools of Texas may either major in communication (College of Liberal Arts) or in another field, but in either case, they must include the following courses in their degree plans:

<table>

Additional education courses are required. More complete information on the requirements for teacher certification may be found in the College of Education and Human Development section under secondary teacher certification.

Communication - Minor
The minor in Communication is offered by the Department of Communication. Communication is central to the pursuit of any field of study and to the mastery of the future for societies, commerce, cultures, relationships and the individual. All majors are welcome as Communication minors.

Students must earn a grade of C or better in each course.

Communication and Global Media - Certificate
The Communication and Global Media Certificate (CGMC), is offered by the Department of Communication, and is designed to provide students with an understanding of a communication perspective on the impact of media in a global context. Media and communication sectors are the second largest export markets for the US, after defense and aerospace. The rise of the BRICI (Brazil, Russia, India, China, Indonesia) economies and the desire of businesses to capitalize on the growth of these markets is a prime example of the application of this certificate. The CGMC prepares students for understanding the growth and impact of communication and global media in a variety of similar contexts. Specific certificate requirements are available in the Office of Undergraduate Advising of the Department of Communication. Details are also available on the Department of Communication (http://communication.tamu.edu) website.

Program Requirements
The CGMC requires designated courses and completion of a global internship or approved experience. Students must earn a grade of "B" or better in each course used to meet the requirements. Students who pursue the CGMC must complete all requirements prior to graduation.

Communication Leadership and Conflict Management - Certificate
The Communication Leadership and Conflict Management Certificate (CLCM), offered by the Department of Communication, is designed to develop communication leadership competence in interpersonal/group collaborative spheres and social/political arenas, to facilitate communication one on one in interpersonal interactions, across private and public boundaries and to mediate conflict in such diverse groups as families, work teams, political and religious groups and those engaged in geopolitical discord. Each CLCM certificate holder will be certified in basic mediation by the State of Texas. The CLCM certificate prepares students for understanding the growth and impact of communication leadership and of conflict management, especially within the context of communication, and will serve undergraduate students well as they pursue diverse career options. Specific certificate requirements are available in the Office of Undergraduate Advising of the Department of Communication. Details are also available on the Department of Communication website (http://comm.tamu.edu).
Program Requirements

Students must earn a grade of "B" or better in each course used to meet the requirements. Students who pursue the CLCM must complete all requirements prior to graduation.

Health Communication - Certificate

Careers in Health and in Communication are growing much faster than average according to the Office of Occupational Outlook, Bureau of Labor Statistics. Health communication skills are increasingly valuable in careers related to health and medicine, as well as the media, public relations, and strategic communication. Health communication skills are applicable for a variety of health and medical career tasks including provider-patient consultations; the formative research, design, implementation, and assessment of public health communication campaigns; the development of strategic communication initiatives for health organizations and related products and services; as well as leadership in public and private sector health agendas. Health messaging reaches diverse audiences and includes the use of advocacy to influence policy, as well as mediating and shaping public conversations on health issues both face-to-face and via traditional and new media in local and global arenas. Health communication skills are important for profit, nonprofit, and governmental organizations.

The Health Communication Certificate (HCC) Health Campaign/Policy Track provides a track for students interested in health campaigns, other forms of mediated health communication, and health policy. The Health Communication Certificate (HCC) Provider-Patient/Organizational Track provides a track for students interested in communication in healthcare organizations and provider-patient relationships. Specific certificate requirements are available in the Undergraduate Studies Office of the Department of Communication. Details are also available on the Department of Communication (http://communication.tamu.edu) website.

Program Requirements

Students must earn a grade of "B" or better in each course used to meet the requirements. Students who pursue the HCC must complete all requirements prior to graduation.

Social Media - Certificate

The Department of Communication offers a Social Media Certificate.
Strategic Communication - Certificate

Strategic communication is the process that supports public relations, promotions, public information, marketing, corporate communication and advertising. Strategic communication is creation of the plan as well as the tools or tactics used to implement that plan effectively. The value of effective strategic communication is acknowledged by both profit and nonprofit corporations and by governmental agencies. The effect of strategic communication failures on the bottom line, on employee and stakeholder satisfaction, and on the efficient use of resources, is well documented. Gathering and interpreting appropriate information, audience analysis, as well as harnessing the power of accurate language in message crafting, are further noted as key strategic communication functions. Tactics available for implementing strategic communication are expanding exponentially as digital communication and new media evolve. Mastery of the integration of these tactics in strategic plans augment the effectiveness of internal and public issues management while mitigating corporate frustration, offensive messages, and overspending. Although effective strategic communication is critical to organizational success, many companies and agencies continue to need support and assistance in this arena. The U.S. Department of Labor Occupational Outlook Handbook notes that careers in various strategic communication areas are growing “faster than average” to “much faster than average.” The Certificate in Strategic Communication will prepare Communication and Telecommunication Media Studies majors to plan and execute communication strategically and to coordinate the integration of appropriate tactics to enhance commerce, government, and to further political, religious and social goals, as they lead us into the future. Specific certificate requirements are available in the Undergraduate Studies Office of the Department of Communication. Details are also available on the Department of Communication (http://communication.tamu.edu) website.

Program Requirements

Students must earn a grade of “B” or better in each course used to meet the requirements. Students who pursue the SCC must complete all requirements prior to graduation.

Department of Economics

The study of economics helps students develop a framework for understanding of how individuals, organizations and societies make choices and how those choices interact to determine the allocation of an economy’s limited resources among alternative competing uses. Economists study how these choices are made in a variety of environments and consider how the outcomes vary under alternative forms of economic organization. Economists evaluate the outcomes of an economic system on a scorecard that includes several different criteria such as efficiency, equity, and stability.

The fundamental goal of our curriculum is to introduce students to the economic way of thinking—a particular way of asking questions and analyzing problems. We offer a core set of courses that teach the fundamental theoretical tools of economics, and a set of elective courses that demonstrate how economists apply these tools to study a wide variety of real-world economic issues. A key takeaway for students is a working knowledge of a useful and coherent structural approach to examining current public policy issues and an ability to identify the inherent tradeoffs involved in developing solutions to major social problems.

The economic style of thinking, when combined with training in the required tools of quantitative and qualitative analysis, provides students with a skill set that will serve them well in a wide array of post-graduate pursuits. The banking and financial sectors regularly hire undergraduate economics majors as do management consulting firms. A number of private corporations employ economists to prepare forecasts of future movements in firm costs and profits. Government agencies—local, state, national, international—hire economics majors for positions as budget analysts or government program evaluators. The study of economics also provides sound preparation for graduate school, either a Masters or PhD degree in economics or a professional degree in business, law, or public policy.

Economics - BA

The Bachelor of Arts in Economics degree teaches students analytical thinking skills and their applications to better understand human behavior. The degree plan is designed to allow opportunities for applied exploration of economic principles and theory through research, internship, and study abroad opportunities. With classes that focus on analytical thinking and a foreign language requirement, students are prepared for a wide variety of post-graduate options including: international business, law school, government and public policy professions, and non-profit organizations.

Total of 33 credits. No more than 36 credits in economics and econometrics can be applied to this degree. A grade of C or higher is required for a course to be counted in the major field (Economics and Econometrics coursework)

Economics - 5-Year Bachelor of Arts/Master of International Affairs

The Joint-Degree Program between the Department of Economics and The Bush School of Government and Public Service allows undergraduate Economics students to enter the Master of International Affairs Program, with a focus in International Economics and Development, at the beginning of their fourth year at Texas A&M University. This program combines the teaching of analytical thinking skills and applications to better understand human behavior as it relates to international economic
development along with skills in diplomacy, research, and development of a global perspective.

Students will be required to complete the same two-year, 48-hour curriculum as other students admitted to the Bush School’s MPIA program. Students will double-count 9 hours of Bush School courses toward the undergraduate major coursework area and up to 9 hours toward general electives in the Bachelor of Arts in Economics. At the completion of the joint degree, students are prepared for a wide variety of post-graduate opportunities including: employment in global commerce, government, government contracting, national security, and transfer pricing.

Students interested in this program will apply during the fall of their junior year and, if admitted, begin taking masters-level courses in the fall of their senior year with an undergraduate classification. Students are reclassified as degree seeking master’s students upon completing 96 credit hours, typically in the following semester. These credit hours must include all specific course prerequisites for a baccalaureate degree in Economics, as well as the courses required by the College of Liberal Arts and by Texas A&M University for an undergraduate degree.

### Economics - 5-Year Bachelor of Arts/Master of Public Service Administration

The Joint-Degree Program between the Department of Economics and The Bush School of Government and Public Service allows undergraduate Economics students to enter the Master of Public Service Program, with a focus in Public Policy Analysis, at the beginning of their fourth year at Texas A&M University. This program combines the teaching of analytical thinking skills and applications to better understand human behavior as it relates to public policy and management along with skills in leadership and research methods.

Students will be required to complete the same two-year, 48-hour curriculum as other students admitted to the Bush School's MPSA program. Students will double-count 9 hours of Bush School courses toward the undergraduate major coursework area and up to 9 hours toward general electives in the Bachelor of Arts degree in Economics. At the completion of the joint degree, students are prepared for a wide variety of postgraduate opportunities including: employment in local, state or federal government, non-profit organizations, or government contracting.

Students interested in this program will apply during the fall of their junior year and, if admitted, begin taking masters-level courses in the fall of their senior year with an undergraduate classification. Students are reclassified as degree seeking master's students upon completing 96 credit hours, typically in the following semester. These credit hours must include all specific course prerequisites for a baccalaureate degree in Economics, as well as the courses required by the College of Liberal Arts and by Texas A&M University for an undergraduate degree.
The Bachelor of Science in Economics degree teaches students analytical thinking skills and their applications to better understand human behavior. The degree plan is designed to allow opportunities for applied exploration of economic principles and theory through research, internship, and study abroad while focusing on quantitative skills and the development of rational thought and critical thinking. At the completion of the degree, students are prepared for a wide variety of post-graduate opportunities including: financial and banking careers, actuarial science, graduate school in social science and law, and government, public policy and political professions.

1. ECON 322 may not be applied toward the major.
2. ECON 323 is a pre-requisite for most ECON electives.
3. Must make a grade of C or better.
4. Student must complete ECMT 461 or equivalent STAT course (Pre-approved by an advisor) prior to ECMT 463.
5. No course can be counted in more than one category.
6. ECON 322 is a pre-requisite for most ECON electives.
7. Must make a grade of C or better.
8. No course can be counted in more than one category.

---

### Economic Electives

In addition to the electives for the BA in ECON, the following courses may be selected for the ECON-MPSA program: BUSH 632, BUSH 635; PSAA 621, PSAA 622, PSAA 638, PSAA 640, PSAA 674.

See the MPSA program in the Graduate and Professional Catalog for the MPSA requirements.
ECON 100-ECON 499 (p. 882) and ECMT 100-ECMT 499 (p. 882) may not be used to fulfill this requirement.

6 required hours. These courses may also be used to satisfy any other requirement.

The student may select any courses other than economics courses and ENGL 103 as free electives. No more than 11 credits of any combination of military, air or naval science and physical activity will be allowed to count as electives. Students may also use up to 18 hours of free electives to pursue a minor.

Total of 33 credits. No more than 39 credits in economics and econometrics can be applied to this degree. A grade of C or higher is required for a course to be counted in the major field.

Economics - 5-Year Bachelor of Science/Master of International Affairs

The Joint-Degree Program between the Department of Economics and The Bush School of Government and Public Service allows undergraduate Economics students to enter the Master of International Affairs Program, with a focus in International Economics and Development, at the beginning of their fourth year at Texas A&M University. This program combines the teaching of analytical thinking skills and applications to better understand human behavior as it relates to international economic development along with skills in diplomacy, research, and development of a global perspective.

Students will be required to complete the same two-year, 48-hour curriculum as other students admitted to the Bush School’s MIPA program. Students will double-count 6 hours of Bush School courses toward the undergraduate major coursework area, 3 hours toward ECMT 463, and up to 9 hours toward general electives in the Bachelor of Science degree in Economics. At the completion of the joint degree, students are prepared for a wide variety of post-graduate opportunities including: employment in global commerce, government, government contracting, national security, and transfer pricing.

Students interested in this program will apply during the fall of their junior year and, if admitted, begin taking masters-level courses in the fall of their senior year with an undergraduate classification. Students are reclassified as degree seeking master’s students upon completing 96 credit hours, typically in the following semester. These credit hours must include all specific course prerequisites for a baccalaureate degree in Economics, as well as the courses required by the College of Liberal Arts and by Texas A&M University for an undergraduate degree.

**Economics - 5-Year Bachelor of Science/Master of Public Service Administration**

The Joint-Degree Program between the Department of Economics and The Bush School of Government and Public Service allows undergraduate Economics students to enter the Master of Public Service Program, with a focus in Public Policy Analysis, at the beginning of their fourth year at Texas A&M University. This program combines the teaching of analytical thinking skills and applications to better understand human behavior as it relates to public policy and management along with skills in leadership and research methods.

Students will be required to complete the same two-year, 48-hour curriculum as other students admitted to the Bush School’s MPSA program. Students will double-count 6 hours of Bush School courses toward the undergraduate major coursework area, 3 hours toward ECMT 463, and up to 9 hours toward general electives in Bachelor of Science degree in Economics. At the completion of the joint degree, students are prepared for a wide variety of post-graduate opportunities including: employment in local, state or federal government, non-profit organizations, or government contracting.

Students interested in this program will apply during the fall of their junior year and, if admitted, begin taking masters-level courses in the fall of their senior year with an undergraduate classification. Students are reclassified as degree seeking master’s students upon completing 96 credit hours, typically in the following semester. These credit hours must include all specific course prerequisites for a baccalaureate degree in Economics, as well as the courses required by the College of Liberal Arts and by Texas A&M University for an undergraduate degree.

### Program Requirements

**Core Requirements**

1. ECON 202 Principles of Economics
2. ECON 203 Principles of Economics
3. ECON 323 Microeconomic Theory
4. ECON 410 Macroeconomic Theory
5. ECON 301 to 499 Economic Forecasting

**Economics electives**

**Economics - 5-Year Bachelor of Science/Master of Science in Economics**

The Department of Economics offers a five-year joint degree program that provides the opportunity to earn a Bachelor of Science in Economics and a Master of Science in Economics with a focus in either Financial Economics or Financial Econometrics. The MS in Economics Program is a professional, terminal masters degree focused on analytical and quantitative skills in the field of financial economics. In this program, the undergraduate degree requirements are slightly modified to require more mathematics courses in an effort to prepare students for the more rigorous masters-level coursework. Students will double count six hours of masters-level coursework toward the undergraduate degree and complete both the undergraduate degree and the 36-hour Master's degree in five years. At the completion of the degree, students are well-prepared for careers in the financial sector such as: trading analyst, financial consultant, data analyst, distribution analyst and loan administrator.

Students interested in this program will apply during the fall of their junior year and, if admitted, begin taking masters-level courses in the fall of their senior year with an undergraduate classification. Students are reclassified as degree seeking master's students upon completing 96 credit hours, typically in the following semester. Students will double-count six hours of Bush School courses toward the undergraduate major coursework area, 3 hours toward ECMT 463, and up to 9 hours toward general electives in Bachelor of Science degree in Economics.

**Economics Electives**

In addition to the electives for the BA in ECON, the following courses may be selected for the ECON-MPSA program: BUSH 631, BUSH 632, BUSH 635, PSAA 621 PSAA 621 PSAA 621 PSAA 621 PSAA 621 PSAA 621 PSAA 621, PSAA 622, PSAA 638, PSAA 663/AGEC 604, PSAA 674.

See the MPSA program in the Graduate and Professional catalog for the MPSA requirements.

---

1. ECON 322 may not be applied toward the major.
2. ECON 323 is a prerequisite for most ECON electives.
3. Must make a grade of C or better.
4. Student must complete ECMT 461 or equivalent STAT course (Pre-approved by advisor) prior to ECMT 463.
5. No course can be counted in more than one category.
6. ECON 100-ECON 499 (p. 882) and ECMT 100-ECMT 499 (p. 882) may not be used to fulfill this requirement.
7. 6 required hours. These courses may also be used to satisfy any other requirement.
8. The student may select any courses other than economics courses and ENGL 103 as free electives. No more than 11 credits of any combination of military, air or naval science and physical activity will be allowed to count as electives. Students may also use up to 18 hours of free electives to pursue a minor.

Total of 33 credits. No more than 39 credits in economics and econometrics can be applied to this degree. A grade of C or higher is required for a course to be counted in the major field.

Students are reclassified as degree seeking master’s students upon completing 96 credit hours, typically in the following semester.

Students will double-count 6 hours of Bush School courses toward the undergraduate major coursework area, 3 hours toward ECMT 463, and up to 9 hours toward general electives in Bachelor of Science degree in Economics.
ECON 203 Principles of Economics 3
ECON 323 Microeconomic Theory 2 3
ECON 410 Macroeconomic Theory 3
ECON 460 Introduction to Mathematical Economics 3
Economics Electives 1 12
- ECMT 475 Economic Forecasting

ECON 607 Foundations of Microeconomic Theory 3
ECMT 674 Economic Forecasting 3
ACCT 209 Survey of Accounting Principles 3
ACCT 210 Survey of Managerial and Cost Accounting Principles 3
MATH 304 Linear Algebra 3
or MATH 32 or Linear Algebra

College and University Requirements 4
ENGL 104 Composition and Rhetoric 3
Select one of the following: 3
- ENGL 203 Writing about Literature
- ENGL 210 Technical and Business Writing
- COMM 203 Public Speaking
- COMM 205 Communication for Technical Professions
- COMM 243 Argumentation and Debate

Literature in English 6
MATH 151 Engineering Mathematics I 5 4
MATH 152 Engineering Mathematics II 5 4
ECMT 461 Economic Data Analysis 6 3
ECMT 463 Introduction to Econometrics 6, 7 3
Life and physical sciences (p. 23) 9
Creative arts (p. 25) 3
Language, philosophy and culture (p. 24) 3
Language, philosophy and culture or creative arts (p. 24) 3
Social and behavioral sciences (p. 27) 8 6
American history (p. 26) 6
POLS 206 American National Government 3
POLS 207 State and Local Government 3
International and cultural diversity (p. 42) 9

Free electives 5, 10 16

Total Semester Credit Hours 120

1 ECON 322 may not be applied toward the major.
2 ECON 323 is a prerequisite for most ECON electives.
3 Highly recommended taking MATH 151/MATH 152 prior to Linear Algebra (MATH 304 / MATH 323). If other MATH is taken, you must consult with the MATH Department in order to register for MATH 304/MATH 323
4 Other courses may qualify. Students should consult the approved list of courses available in the Undergraduate Student Services Office in the College of Liberal Arts. No course can be counted in more than one category.
5 MATH 151 and MATH 152 are four credit hour courses. Three hours will count toward the Mathematics requirement for each course and the remaining one hour for each course will count toward free electives.
6 Must make grade of C or better.
7 Student must complete ECMT 461 or equivalent STAT course (pre-approved by an advisor) prior to ECMT 463.
8 ECON 100-ECON 499 (p. 882) and ECMT 100-ECMT 499 (p. 882) may not be used to fulfill this requirement.
9 Six hours required. These courses may also be used to satisfy any other requirement.
10 The student may select any courses other than economics courses and ENGL 103 as free electives. No more than 11 credits of any combination of military, air, or naval science and physical activity will be allowed to count as electives.

Students are reclassified as degree seeking master’s students upon completing 96 credit hours, typically in the following semester.

Students enrolled in the BS-MS-ECON degree program may double count ECON 607 and ECMT 674 toward the undergraduate major requirements. Undergraduate students must take MATH 151 & MATH 152, and MATH 304 or MATH 323, in addition to the other University Core Curriculum, College of Liberal Arts, and Department of Economics-specific degree requirements.

Total of 33 credits. No more than 39 credits in economics and econometrics can be applied to this degree. A grade of C or higher is required for a course to be counted in the major field.

**Economics - Minor**

The study of economics provides a rigorous structure for decision-making, whether on academic topics or day-to-day activities such as how to divide roommate expenses or how to allocate time between study and recreation. Economics teaches students how to think reasonably about problems, a skill that is essential in any profession.

A minor in economics provides knowledge and information that will make a student a better-informed consumer and participant in the world economy. It also provides a basis for a better understanding of world events.

- ECMT 463 Introduction to Econometrics
- ECMT 475 Economic Forecasting

Total Semester Credit Hours 15

1 ECON 322 does not count toward minor.

Students must make a grade of "C" or better in all courses.
Business Economics - Certificate

The Business Economics Certificate (BEC) is an innovative program designed to prepare students for successful careers in a rapidly changing economic environment. The certificate combines a foundation in Economics in the College of Liberal Arts with a business minor in the Mays College of Business, integrating the practical skills taught in business courses with the analytical tools of economics.

Total Semester Credit Hours 12

¹ Student must complete ECMT 461 or equivalent STAT course (pre-approved by an advisor) prior to ECMT 463.
² ECMT 461 and ECMT 463 are prerequisites for this course.
³ ECMT 475 and the required six hours of electives may also be used to satisfy the Economics electives requirement.
⁴ ECON 323 is a prerequisite for all 400-level ECON courses.

Students pursing this certificate must also complete a minor in Business Administration (BUAD) (p. 249).

Quantitative Economic Methods - Certificate

The Quantitative Economic Methods certificate program prepares students for entry into an economics Ph.D. program or highly quantitatively-oriented occupation such as economic consulting and research. Students select from a set of courses in the Statistics and Mathematics departments to broaden their understanding of the fundamental basis of advanced economics. In addition, students are required to take several intensive economics courses focused on mathematical and statistical topics. Students interested in this certificate are also strongly encouraged to participate in undergraduate research activities in the Department of Economics.

Total Semester Credit Hours 18

¹ ECMT 461 and ECMT 463 are prerequisites for this course.
² Completion of MATH 151 and higher is suggested when enrolling in this course.
³ All MATH and STAT courses listed require a minimum of MATH 151 and MATH 152.

Department of English

The study of English language and literature is central to an understanding of our culture and our relationship to it. Mastery of the English language is essential to all of us at Texas A&M, no matter what our interests or profession. An awareness of our heritage as it is embodied in great literary works provides us with a sense of the traditions, ideas, and rhetorics that have shaped us and our world; it enables us to define ourselves and our values in relation to this valued past. The Department of English offers students an opportunity to explore our linguistic and literary inheritance. Courses are offered in British literature, American literature, rhetoric and composition, creative writing, literary criticism, linguistics, and film. Students can discover the roots of the English language or learn about the latest linguistic theories. They can immerse themselves in literature from Beowulf to Virginia Woolf, from Captain John Smith to Toni Morrison; and they can explore the extensions and challenges to tradition found in women's writing, ethnic literature, and postmodernist experimentation. Students also may explore literature in relation to the other arts and religion and culture, and investigate the global through studies in Asian, Africana, Caribbean, postcolonial, transnational and other literatures. The flexibility of the degree in English and the options available in the department enable students to pursue their own interests while acquiring important analytic and writing skills and discovering the riches of our literary heritage.

English graduates, with relevant minors or specialized courses outside English, may pursue careers in technical writing, editing and publishing, government service, public relations, personnel work, and advertising or administrative positions in business and industry. The program in English also provides excellent preparation for later professional training in law, medicine, business and the ministry, as well as for graduate work in information studies and in the humanities, including English.
Supported by work in the College of Education and Human Development, the English program also may lead to careers in teaching or educational administration.

The curriculum in English is designed to allow students to develop concentrations in such areas as composition and rhetoric, creative writing, linguistics, literature and film, or coursework relevant to teacher certification.

**Teacher Certification Programs in English**

**Teacher Certification in English Language Arts/Reading - OPTION II (Secondary)**

Students desiring certification by Option II to teach English language arts and reading in the secondary schools of Texas should consult an undergraduate English advisor as early as possible. Requirements include 27 semester hours in literature, language, reading, and rhetoric and composition (an optional 24-30 hours in a second teaching field is possible); and professional education courses.

**Degree and Certification Program for Middle School in English Language Arts/Reading**

The Department of English offers a degree and certification program in English language arts/reading for prospective middle-school teachers. This program requires 36 hours of literature, linguistics, composition and rhetoric and 15 hours of reading along with an 18-hour professional education component.

All students seeking certification should consult an undergraduate English advisor for additional information.

**Professional Writing Certificate**

The Professional Writing Certificate gives students 18 hours of intensive training in a broad range of communication skills. Students who achieve a grade of B or better in all 18 hours of coursework will receive a certificate signifying their successful completion of this training. Students should allow at least a year and a half to complete the courses, some of which are offered only once a year. Transfer courses, independent studies and credit by exam cannot be counted toward the 18 hours. Required courses include ENGL 210, ENGL 320, ENGL 241 and ENGL 355. With the help of the Professional Writing Certificate Advisor, the student must also select two additional courses in rhetoric, communication or a related field.

POLS 207  State and Local Government 3
American history (p. 26) 6
General electives (may include optional minor) 3,4 25
International and cultural diversity (p. 42) 5

Total Semester Credit Hours 120

1 Majors must complete two ENGL courses formally designated as writing intensive.
2 At least 3 hours must be in MATH. Three hours may be PHIL 240.
3 Middle School Certificate seekers should consult an undergraduate English advisor for required courses.
4 Up to 12 hours of ENGL 300-499 courses may be used.
5 International and cultural diversity (p. 42) courses may also be used to satisfy any other requirement.

Up to 51 credits in English can be applied to the degree; at least 21 credits must be in literature. A grade of C or higher is required for a course to be counted in the major. For residency, a student must have at least 12 hours in 300- or 400-level English classes from Texas A&M University.

College and University Requirements
Other courses may qualify for the following categories. All courses are to be selected with the approval of the student’s academic advisor. The courses incorporate University Core Curriculum (p. 22) requirements. No course can be counted in more than one category, except as allowed in the minor field of study and the International and Cultural Diversity (p. 42) graduation requirement. A minimum of 36 hours of 300- or 400-level coursework must be completed at Texas A&M University, with at least 12 of those hours being in the major.

Minor Field of Study
English majors are advised, but not required, to select a minor field of study. Students who elect to complete a minor should contact the department or program that offers the minor to determine the requirements for that minor. A grade of C or higher is required for a course to be counted in the minor field. A minor field must be declared before the student has completed 75 credit hours.

English - BA, Middle School Teacher Certification

The Department of English offers a degree and certification program in English language arts/reading for prospective middle-school teachers. This program requires 36 hours of literature, linguistics, composition and rhetoric and 15 hours of reading along with an 18-hour professional education component.

All students seeking certification should consult an undergraduate English advisor for additional information.

A grade of C or higher is required for a course to be counted in the minor field of study.

**Department of Hispanic Studies**

At a time when worldwide globalization includes the demographically and culturally significant Hispanization of Texas, along with other areas of the United States, the study of the Spanish language and Hispanic culture is important to achieve an understanding of the world in which we live. The mission of the Department of Hispanic Studies is to create and disseminate knowledge about the cultures and languages of the Hispanic world. Our research agenda includes Hispanic contemporary and period literature, film and performance, photography, iconography and digital humanities, cultural studies, gender and diaspora studies, and the history and presence of Spanish in the United States. We offer a Bachelor of Arts in Spanish, a Minor in Spanish, and a Minor in Hispanic Studies for Community Engagement. The development of proficiency in the Spanish language is at the core of all these programs.

With class sizes that rarely exceed 30 students, we are recognized for our excellent teaching and personalized attention to student needs. Our department offers a full range of courses for undergraduates, including language instruction and content courses in literature, culture, professional Spanish, and linguistics. An undergraduate major in Spanish can show future employers and/or graduate schools that a student has achieved a high level of linguistic ability and understanding of Hispanic cultures. The undergraduate major is designed to help students grow in their oral and written language skills as they learn more about Hispanic cultures through literature and cultural studies. This kind of study is valuable for those who plan to go into international careers or for those who plan to work with Hispanic populations in the United States. A Spanish major is useful in careers such as banking, advertising, marketing, journalism, health services, government, social welfare and public administration, and it is an excellent preparation for professional school in medicine, law, and business. Teaching certification is available to Spanish majors through the College of Education and Human Development.

The department insists on a high level of language competence as the basis for other intellectual growth in the discipline and requires a 10-week experience abroad. To help facilitate the fulfillment of this requirement, the department sponsors a summer study abroad program for credit in a variety of locations, such as Costa Rica, Chile, Ecuador, Mexico, and Spain. Semester and year-long study abroad programs, reciprocal exchanges and internships are also available and encouraged.

**Spanish Bilingual/Bicultural Enhancement Initiative**

The Hispanic Studies faculty recommends that Spanish language students, especially heritage speakers of Spanish and Advanced Placement (AP) students, take a healthy mixture of coursework related, on the one hand, to achieving University-level linguistic competence in the language; and coursework related to the Hispanic or Latino cultural experience on the other. To this end students select from courses on
language, grammar and culture in spoken and written Spanish and electives which broaden the Hispanic/Latino knowledge base taught in English. A prudent and timely selection of courses can allow the student to apply coursework taken in the pursuit of bilingual/biculturalism to satisfy some requirements on the student's degree plan. Many of the suggested courses will apply in the Core Curriculum, for example, in areas such as Humanities and Social Sciences. Discussions with a departmental advisor can help students to focus the best possible fit of coursework with their interests and degree plan.

**HISP and SPAN Courses**

Reflective of its dual mission of striving to provide students with opportunities for cultural and linguistic competence, the Department of Hispanic Studies offers courses under two different rubrics, HISP (p. 930) and SPAN (p. 1062). HISP (p. 930) courses cover a variety of topics pertinent to Hispanic culture, such as food, film, literature in translation, music and visual culture, as well as social and political issues; they are offered in English. SPAN (p. 1062) courses are conducted in Spanish, and while they also deal with cultural topics ranging from literature to visual culture, they emphasize aspects of language and linguistic development.

**Required Foreign Language Placement Test**

Students who intend to enroll for the first time in a college foreign language course, who have previous knowledge of the language, however acquired, and who have no college credit in the language MUST take a placement test to determine the appropriate course for their level of ability. The foreign language placement test also serves as a basis for the credit by examination.

Students who take the Advanced Placement (AP) test or other acceptable tests which grant college-level credit in Spanish do not have to take the required foreign language placement test, as the results of these tests may be used for placement, but they are encouraged to do so nonetheless. Heritage learners, or those who have acquired any level of Spanish outside of a formal academic setting, are also expected to take the exam to guarantee correct placement, even when AP test results are available.

The Spanish Language Placement Test is administered by the Department of Hispanic Studies on the Pre-Conference Day of the New Student Conference, along with other credit-by-examination tests. The test is also offered twice per week during the fall and spring semesters. Students who do not take the placement test on the Pre-Conference Day will not be able to register for a foreign language course during their first semester.

**International students whose native language is not English** are exempted from satisfying the University foreign language requirement. These students are not allowed to register in those courses in their native language (101, 102) which are used to fulfill that requirement.

• Spanish Minor (p. 540)

Spanish - BA

A Spanish major provides students with language skills that translate into a practical tool for use in our increasingly bilingual landscape, whether this be Texas, the American Southwest, one of the many areas in the U.S. with large Spanish-speaking populations, or beyond our borders where over 400 million Spanish speakers reside. Above the practical aspect of the major, students of Spanish acquire a rich view of the world in which we live. Focusing on analytical and critical thinking, as well as cultural awareness, our students are prepared for graduate studies in Spanish and professional schools (medicine, law, business), and for professions in fields such as education, business, human resources, research, government, social service, tourism, journalism, and translation. To enhance their career options, Spanish majors are encouraged to seek out a complementary minor or second major/degree, to create even more opportunities after graduation. Similarly, students can also complete an internship that will provide practical hands-on experience.

The Spanish major consists of 33 hours of major coursework plus 38 hours of general supporting electives. The 33 hours are divided into 6 lower division hours (Spanish 201 or 221; 202 or 203 or 222) plus 27 hours that are equally distributed among Spanish language or linguistics (9 hours), Spanish literature or culture (9 hours), and approved related electives (9 hours). At least 9 of these 27 hours must be in 400-level Spanish courses. The 38 hours of general supporting electives can come from any of the university’s offerings and may be taken as a minor or part of a second major. To underscore the focus on cultural awareness and to support the achievement of increased linguistic proficiency, our major requires a 10-week minimum experience abroad in a Spanish-speaking country. This experience abroad can be in a formal academic setting, through an internship or other comparable environment. For cases where study abroad is not possible, a student may petition that an internship or service learning project be used instead.

1 See department advisor for list of current options.
2 One course must include a corresponding laboratory.
3 Course may also be used to satisfy any other requirement.
4 Additional SPAN hours may not be used as free electives.

33 hours required. Spanish majors are required to complete a credit-bearing 10-week minimum semester-long study or experience abroad in a Spanish-speaking country. Study abroad options include University-sponsored, reciprocal, affiliated, and independent programs. Selection of location and type of experience abroad should be made in consultation with departmental advisors. For students who are unable to study abroad, an internship may be used instead. This option is available only with prior approval by the Spanish advisor.

Hispanic Studies for Community Engagement - Minor

The minor in Hispanic Studies for Community Engagement offers students the opportunity to combine advanced Spanish language skills and Hispanic cultural knowledge with a service learning experience. This minor is a perfect complement to degrees in other disciplines, since it allows for courses taught in English that address themes from throughout the Hispanic world. Coursework for this minor consists of 18 hours: 6 hours in 300- to 400-level Spanish courses; 9 hours from relevant courses in Anthropology, English, Hispanic Studies, History, Philosophy, Political Science, or Sociology; and 3 hours in the form of a service learning experience with a Hispanic-serving public or private institution. Of the total required hours, at least 9 must be taken in residence at Texas A&M.

### Spanish - Minor

The Spanish minor allows students with other majors to work on their linguistic skills while they gain Hispanic cultural competency. A great way to complement coursework in many other majors, including those in science, health, and business, this minor focuses on language-based coursework that will serve as an asset upon entering the job market after

**Capstone** | **3** |

**Total Semester Credit Hours** | **18**

---

1. No more than 6 hours from one area and at least 6 hours must be 300-400 level.
2. Any course of relevant content not listed in the electives may be substituted with the advisor’s permission.
3. To be selected in consultation with program coordinator and Academic Advisor during last 6 hours of minor.

Students must make a grade of C or better in minor courses.
graduation. The minor requires 18 hours of course work beyond 100-level Spanish courses including Spanish 201; 202 or 203. The remaining 12 hours may be selected from the many 300- and 400-level courses offered every semester. Of the total required hours, at least 9 must be taken in residence at Texas A&M.

At least 9 of these 18 hours must be taken at Texas A&M. A grade of C or higher is required for a course to be counted in the minor field. A minor must be declared before the student has completed 75 credit hours.

### Department of History

The Department of History at Texas A&M offers the B.A., M.A., and Ph.D. The faculty teach over one hundred undergraduate courses on peoples, ideas, and cultures from around the world and across the ages, and are devoted to developing students' critical thinking, reading, and writing skills. A major in history affords students both a broad education and valuable practical skills. By acquiring familiarity with people in diverse times, places and circumstances, students of history develop a sophisticated human empathy which is the key to good scholarship and good citizenship alike.

Many students rely upon a major in history as preparation for a career in teaching as well as graduate study in law, business, public administration, international relations and theology. A small number pursue graduate degrees in history itself. Other history majors seek postgraduate employment in business management, advertising and public relations, government service, museum and archival work, editorial and publishing work, park interpretation and administration, non-profit organizations, and professions requiring research and bibliographic skills.

Majors

- Bachelor of Arts in History (p. 542)

Minors

- History Minor (p. 543)

History - BA

In fulfilling the requirements for a Bachelor of Arts degree in History, students must meet the general degree requirements of the College of Liberal Arts and the special requirements listed in the college section.

Teacher Certification

Students wishing to meet certification requirements to teach history or social studies in the secondary schools of Texas should contact the College of Education and Human Development for more complete information about the certification options available at Texas A&M
University. To be eligible for these options, students must also consult with, and have approval of, their field advisor in the Department of History.

1. Writing-intensive course.
2. At least 12 hours at the 300- and 400-level. At least 3 hours of pre-modern history and at least 3 hours from three of the five lists (United States; Europe; Latin America and Caribbean; Africa, Asia and the Middle East; Thematic).
3. Course may also be used to satisfy other requirements.
4. Students may use an additional 12 hours of HIST 300-499 for this requirement.

A minimum of 33 hours in history may be applied to the degree. Students must take not less than 15 credit hours at upper level for history residency requirement. A grade of C or higher is required for a course to be counted in the major field. A student must complete not less than 18 hours of coursework in history at Texas A&M University.

**Minor Field of Study**

All history majors are encouraged to select a minor field of study from departments or divisions within or outside of the College of Liberal Arts or in a particular area of interest (as in the case of interdisciplinary minors or career opportunity minors). The minor will consist of a minimum of 15 hours of coursework, as defined by the minor department. A grade of C or higher is required for a course to be counted in the minor field. Interdisciplinary minors (p. 496) such as Women's and Gender Studies, Africana Studies, Classical Studies, Religious Studies, Film Studies, Latina/o and Mexican American Studies, and Business have specific requirements; students should consult undergraduate advisors in these areas of study. A second major may substitute for the minor. Courses used to meet the minor requirements may not be used in the major. See also the statement on "Minor Field of Study" under the general requirements (p. 489) of the College of Liberal Arts.

**History - Minor**

To apply for a history minor, a student needs to consult with one of the undergraduate advisors in the Department of History.

Students must make a grade of “C” or better in all courses.

**Department of International Studies**

The Department of International Studies offers diverse curricula that immerse students in the social, political, economic, and cultural implications of globalization. The degree combines a linguistic and cultural proficiency with a flexible set of tracks and a mandatory abroad experience. In addition to the BA in International Studies, the department offers Modern Language BA degree options in French, German, and Russian, as well as a BA in Classics. Students looking for language minors can find them in Arabic, Chinese, Classical Studies, French, German, Italian, Japanese, and Russian. We also offer minors in Asian Studies and Comparative Cultural Studies. The programs give students a combination of measurable language proficiency and a global perspective that will serve both their professional and personal ambitions.

**Required Foreign Language Placement Test.** Incoming students who intend to enroll for the first time in any language course at Texas A&M University, who have previous knowledge, however acquired, of the language in which they plan to enroll, and who have no college credit...
in the language, must take the departmental placement examination to determine the appropriate course for their level of ability. The placement test also serves as a basis for credit by examination. The placement examination will be administered by the Department of International Studies during freshman conferences along with other credit by exam tests. The test will also be offered during Fall and Spring semesters. Students who take the Advanced Placement (AP) test or other acceptable tests which grant college-level credit in their foreign language of choice do not have to take the required departmental placement test. In this case, the AP and Achievement test results may be used for placement.

International students whose native language is not English are exempted from satisfying the University foreign language requirement. These students are not allowed to register in those courses in their native language that are used to fulfill that requirement.

- German Minor (p. 564)
- Italian Minor (p. 564)
- Japanese Minor (p. 564)
- Russian Minor (p. 565)

Classics - BA, Classical Civilization Track

The B.A. in Classics is designed to give students a thorough grounding in the culture, history, literature, and intellectual accomplishments of Ancient Greece and Rome from the Bronze Age to the dawn of the Middle Ages. Studying the history and literature of these civilizations will not only help students to develop skills in close reading, writing, and critical thinking, but will also help them to see how fundamental concepts of Western Civilization such as rationalism and democracy first arose in Classical Antiquity. The Classics degree is divided into two tracks: the Literature and Language track has a traditional focus on Latin and Greek philology (students choose either Latin or Greek to specialize in, but are encouraged to take both) and is intended to enable students to read and enjoy the great texts of Classical Antiquity (Homer, Herodotus, Thucydides, Livy, Tacitus, the New Testament, etc.) in the original languages. The Classical Civilization track has no language requirement and focuses instead on the history, beliefs, and material culture of ancient Greek and Roman civilization. A major in Classics signals a commitment to serious intellectual inquiry and is an excellent basis for careers in law, business, consulting, public service, and teaching. Those intending to pursue careers in medicine or finance will also find that a major in Classics can be easily combined with undergraduate courses required for those fields.

International Studies - BA, Global Cultural Studies Track

Principle objectives
1. To guide students through the complex cultural, social, political, and economic stakes of global interdependence.
2. To assure a measurable proficiency in a foreign language.
3. To assure regional cultural competency through a structured and integrated abroad experience.
4. To provide a historical dimension to current conceptions of globalization.

Curriculum
The degree plan consists of a combination of INTS core courses (15 hours), with electives tailored for each track (18 hours); area studies courses in the region corresponding to the student’s foreign language choice (9 hours); foreign language courses (20 hours); and at least one long semester or 10-week summer study abroad or other approved international program with an emphasis on cultural and linguistic immersion.

Global Cultural Studies Track
The Global Cultural Studies track offers students both a fundamental theoretical background in cultural studies as well as a broad array of courses in international cultural production and criticism. This humanities based program provides students with a rich understanding of artistic expression in a global setting.

General Electives

Total Semester Credit Hours 120

1 Choose courses from an approved list on the INTS website in consultation with an advisor. Courses numbered 485 or 489 that contain significant international content can be taken in any department to meet part of the track or area requirement. Students must obtain International Studies advisor approval before taking the 485 or 489 course.

2 See the Foreign Language paragraph.

3 See the International Experience Requirements paragraph.

4 At least 3 hours must be in MATH. Three hours may be PHIL 240.

5 Courses may be used to satisfy other requirements.

Foreign Language

Students entering International Studies take a placement exam to determine the level of and number of required foreign language courses. Exam results may fulfill a maximum of 14 semester credit hours.

- Students placed in 101 will take 101, 102, 201 and 202 and 6 semester credit hours at the 300- or 400-level.

International Experience Requirements

The International Experience must generate at least 3 hours of Texas A&M University credit. Departmental approval is required before travel. Any international experience that does not meet these criteria will not count toward the degree.

- Must be at least one long semester or one 10-week summer approved experience.
- Must be taken after completion of 100- and 200-level language requirement and INTS 201.
- Must be completed before student is eligible to enroll in INTS 481, INTS 491 or INTS 497.
- Must be an immersion experience in the foreign culture and language, which can be satisfied by:
  - An internship at a company, government agency or non-profit operation involving significant use of the foreign language. Three hours of INTS 484 elective credit can be given.
  - Courses taken at a foreign university. Courses may count for Texas A&M University credit with approval of the advisor of the relevant department. These courses cannot apply to the International Studies core. One course must be taken in the foreign language at the 300- or 400-level.
  - Selected Texas A&M University Study Abroad programs which involve intensive cultural and language immersion.
  - A combination of the above to equal the requirement of a long semester or a 10-week summer-approved experience.
- Must be taken outside of the student’s country of origin.
- Must be taken in one foreign country that matches with the foreign language and the area study requirement unless approved by the department head before travel.

Other courses may qualify for the college, university requirements categories. Students should consult the approved list of courses available in the Undergraduate Student Services Office in the College of Liberal Arts or in the International Studies Degree Program Office. The list incorporates University Core Curriculum requirements. No course can be counted in more than one category, except as allowed in the International and Cultural Diversity Graduation requirement.

International Studies - BA, International Commerce Track

Principle objectives

1. To guide students through the complex cultural, social, political, and economic stakes of global interdependence.
2. To assure a measurable proficiency in a foreign language.
3. To assure regional cultural competency through a structured and integrated abroad experience.

Curriculum

The degree plan consists of a combination of INTS core courses (15 hours), with electives tailored for each track (18 hours); area studies courses in the region corresponding to the student's foreign language choice (9 hours); foreign language courses (20 hours); and at least one long semester or 10-week summer study abroad or other approved international program with an emphasis on cultural and linguistic immersion.

International Commerce Track

The International Commerce track combines a basic set of courses in business practice with a broader set of courses in international economic and social theory. Student choose their coursework from a list that spans at least four colleges of the university. It provides students with a well-developed understanding of the interconnectedness of global commercial systems.

Total Semester Credit Hours 120

1 Requirement for the minor in business.
2 Choose courses from an approved list on the INTS website in consultation with an advisor. Courses numbered 485 or 489 that contain significant international content can be taken in any department to meet part of the track or area requirement. Students must obtain International Studies advisor approval before taking the 485 or 489 course.
3 See the Foreign Language paragraph.
4 See the International Experience Requirements paragraph.
5 At least 3 hours must be in MATH. Three hours may be PHIL 240.
6 Courses may be used to satisfy other requirements.
Foreign Language
Students entering International Studies take a placement exam to determine the level of and number of required foreign language courses. Exam results may fulfill a maximum of 14 semester credit hours.

- Students placed in 101 will take 101, 102, 201 and 202 and 6 semester credit hours at the 300- or 400-level.
- Students placed in 102 will take 102, 201 and 202 and 6 semester credit hours at the 300- or 400-level.
- Students placed in 201 will take 201 and 202 and 6 semester credit hours at the 300- or 400-level.
- Students placed in 202 will take 202 and 6 semester credit hours at the 300- or 400-level.
- Students placing out of 101, 102, 201 and 202 will take 6 semester credit hours at the 300- or 400-level.

International Experience Requirements
The International Experience must generate at least 3 hours of Texas A&M University credit. Departmental approval is required before travel. Any international experience that does not meet these criteria will not count toward the degree.

- Must be at least one long semester or one 10-week summer approved experience.
- Must be taken after completion of 100- and 200-level language requirement and INTS 201.
- Must be completed before student is eligible to enroll in INTS 481, INTS 491 or INTS 497.
- Must be an immersion experience in the foreign culture and language, which can be satisfied by:
  - An internship at a company, government agency or non-profit operation involving significant use of the foreign language. Three hours of INTS 484 elective credit can be given.
  - Courses taken at a foreign university. Courses may count for Texas A&M University credit with approval of the advisor of the relevant department. These courses cannot apply to the International Studies core. One course must be taken in the foreign language at the 300- or 400-level.
  - Selected Texas A&M University Study Abroad programs which involve intensive cultural and language immersion.
  - A combination of the above to equal the requirement of a long semester or a 10-week summer-approved experience.
- Must be taken outside of the student’s country of origin.
- Must be taken in one foreign country that matches with the foreign language and the area study requirement unless approved by the department head before travel.

Other courses may qualify for the college, university requirements categories. Students should consult the approved list of courses available in the Undergraduate Student Services Office in the College of Liberal Arts or in the International Studies Degree Program Office. The list incorporates University Core Curriculum requirements. No course can be counted in more than one category, except as allowed in the International and Cultural Diversity Graduation requirement.

International Studies - BA, International Communication and Media Track
The BA in International Studies is a degree offered in the Department of International Studies.

Principle objectives
1. To guide students through the complex cultural, social, political, and economic stakes of global interdependence.
2. To assure a measurable proficiency in a foreign language.
3. To assure regional cultural competency through a structured and integrated abroad experience.
4. To provide a historical dimension to current conceptions of globalization.

Curriculum
The degree plan consists of a combination of INTS core courses (15 hours), with electives tailored for each track (18 hours); area studies courses in the region corresponding to the student’s foreign language choice (9 hours); foreign language courses (20 hours); and at least one long semester or 10-week summer study abroad or other approved international program with an emphasis on cultural and linguistic immersion.

International Communication and Media Track
As one of the largest sectors of the American and global economy, communication and media occupy a major role in our private and professional lives. Moreover, this sector of the economy often functions transnationally in a relatively seamless fashion. This track offers a discreet set of courses that provide students with a strong background in how media function in a global setting.

International Studies - BA, Environmental Studies Track

**Principle objectives**

1. To guide students through the complex cultural, social, political, and economic stakes of global interdependence.
2. To assure a measurable proficiency in a foreign language.
3. To assure regional cultural competency through a structured and integrated abroad experience.
4. To provide a historical dimension to current conceptions of globalization.

**Curriculum**

The degree plan consists of a combination of INTS core courses (15 hours), with electives tailored for each track (18 hours); area studies courses in the region corresponding to the student’s foreign language choice (9 hours); foreign language courses (20 hours); and at least one long semester or 10-week summer study abroad or other approved international program with an emphasis on cultural and linguistic immersion.

International Environmental Studies Track

Globalization and rapid industrialization have brought about a set of environmental concerns that defy national boundaries. Students will work through a fascinating array of coursework chosen among the Colleges of Geoscience, Science, AgriLife, and Liberal Arts. Ultimately students will have a firm grasp of the myriad environmental issues that arise from our global interconnectedness.

International Studies - BA, International Geographic Information Systems Track

Principle objectives

1. To guide students through the complex cultural, social, political, and economic stakes of global interdependence.
2. To assure a measurable proficiency in a foreign language.
3. To assure regional cultural competency through a structured and integrated abroad experience.
4. To provide a historical dimension to current conceptions of globalization.

Curriculum

The degree plan consists of a combination of INTS core courses (15 hours), with electives tailored for each track (18 hours); area studies courses in the region corresponding to the student’s foreign language choice (9 hours); foreign language courses (20 hours); and at least one long semester or 10-week summer study abroad or other approved international program with an emphasis on cultural and linguistic immersion.

International Geographic Information Systems Track

The International Geographic Information Systems track adds a tremendous skill set to the already substantial ones offered by the core INTS major. The International GIS track immerses students in the workings of spatially distributed information that is used in the environmental, transportation, defense, and many other sectors of the
economy. Students will develop skills in spatial analysis and advanced applications of GIS technologies.

The list incorporates University Core Curriculum requirements. No course can be counted in more than one category, except as allowed in the International and Cultural Diversity Graduation requirement.

International Studies - BA, International Politics and Diplomacy Track

Principle objectives
1. To guide students through the complex cultural, social, political, and economic stakes of global interdependence.
2. To assure a measurable proficiency in a foreign language.
3. To assure regional cultural competency through a structured and integrated abroad experience.
4. To provide a historical dimension to current conceptions of globalization.

Curriculum
The degree plan consists of a combination of INTS core courses (15 hours), with electives tailored for each track (18 hours); area studies courses in the region corresponding to the student’s foreign language choice (9 hours); foreign language courses (20 hours); and at least one long semester or 10-week summer study abroad or other approved international program with an emphasis on cultural and linguistic immersion.

International Politics and Diplomacy Track

This track offers students a fundamental understanding of foreign relations. Students learn about the workings of governments and civil societies in a global framework. From this program students gain a sound understanding of how governments communicate and cooperate in regional, continental, and global settings.
Students entering International Studies take a placement exam to determine the level of and number of required foreign language courses. Exam results may fulfill a maximum of 14 semester credit hours.

**International Experience Requirements**

The International Experience must generate at least 3 hours of Texas A&M University credit. Departmental approval is required before travel. **Any international experience that does not meet these criteria will not count toward the degree.**

- Must be at least one long semester or one 10-week summer approved experience.

Other courses may qualify for the college, university requirements categories. Students should consult the approved list of courses available in the Undergraduate Student Services Office in the College of Liberal Arts or in the International Studies Degree Program Office. The list incorporates University Core Curriculum requirements. No course can be counted in more than one category, except as allowed in the International and Cultural Diversity Graduation requirement.

**International Studies - 5-Year Bachelor of Arts and Master of International Affairs**

**Principle objectives**

1. To guide students through the complex cultural, social, political, and economic stakes of global interdependence.
2. To assure a measurable proficiency in a foreign language.
3. To assure regional cultural competency through a structured and integrated abroad experience.
4. To provide a historical dimension to current conceptions of globalization.

Curriculum
The degree plan consists of a combination of INTS core courses (15 hours), with electives tailored for each track (18 hours); area studies courses in the region corresponding to the student's foreign language choice (9 hours); foreign language courses (20 hours); and at least one long semester or 10-week summer study abroad or other approved international program with an emphasis on cultural and linguistic immersion.

5-Year Bachelor of Arts and Master of International Affairs
The International Studies department, in conjunction with the Bush School of Government & Public Service, offers a joint degree program that allows International Studies majors to enter the Bush School at the beginning of their fourth year at Texas A&M. This opportunity enables students to receive their International Studies undergraduate degree and a Master of International Affairs (MIA) degree in five years. The partnership between International Studies and the Bush School is especially attractive because all graduates from the Bush School’s Masters Program must have proficiency in a foreign language and are encouraged to spend a semester abroad; International Studies majors will have completed this requirement prior to entering the Bush School graduate program. Students admitted to the five-year degree program will have completed 102 hours of the 120 hours of coursework required to receive their bachelor’s degree. These courses must include all of the specific prerequisites for a Bachelor of Arts degree in International Studies (within the Politics and Diplomacy emphasis track), as well as the courses required by the College of Liberal Arts and by Texas A&M University for an undergraduate degree. Students will be required to complete the same two year, 48 hour curriculum as other students admitted to the Bush School’s MPAS program. For information about the 5-year Degree Program, contact the Bush School (http://bush.tamu.edu).

Choose courses from an approved list on the INTS website in consultation with an advisor. Courses numbered 485 or 489 that contain significant international content can be taken in any department to meet part of the track or area requirement. Students must obtain International Studies advisor approval before taking the 485 or 489 course.

See the Foreign Language paragraph.

At least 3 hours must be in MATH. Three hours may be PHIL 240.

Courses may be used to satisfy other requirements.

Up to 18 hours of the MIA course requirements may be double counted for the International Studies undergraduate degree requirements.

Additional Required Course for the International Development and Development Policy track.

Additional Required Course for the National Security and Diplomacy track.

**Foreign Language**

Students entering International Studies take a placement exam to determine the level of and number of required foreign language courses. Exam results may fulfill a maximum of 14 semester credit hours.

- Students placed in 101 will take 101, 102, 201 and 202 and 6 semester credit hours at the 300- or 400-level.
- Students placed in 102 will take 102, 201 and 202 and 6 semester credit hours at the 300- or 400-level.
- Students placed in 201 will take 201 and 202 and 6 semester credit hours at the 300- or 400-level.
- Students placed in 202 will take 202 and 6 semester credit hours at the 300- or 400-level.
- Students placing out of 101, 102, 201 and 202 will take 6 semester credit hours at the 300- or 400-level.

**International Experience Requirements**

The International Experience must generate at least 3 hours of Texas A&M University credit. Departmental approval is required before travel. Any international experience that does not meet these criteria will not count toward the degree. International Experience must be completed prior to admission into the 5-year Degree Program.

- Must be at least one long semester or one 10-week summer approved experience.
- Must be taken after completion of 100- and 200-level language requirement and INTS 201.
- Must be completed before student is eligible to enroll in INTS 481, INTS 491 or INTS 497.
- Must be an immersion experience in the foreign culture and language, which can be satisfied by:
  - An internship at a company, government agency or non-profit operation involving significant use of the foreign language. Three hours of INTS 484 elective credit can be given.
  - Courses taken at a foreign university. Courses may count for Texas A&M University credit with approval of the advisor of the relevant department. These courses cannot apply to the International Studies core. One course must be taken in the foreign language at the 300- or 400-level.
  - Selected Texas A&M University Study Abroad programs which involve intensive cultural and language immersion.

Selected Texas A&M University Study Abroad programs which involve intensive cultural and language immersion.

International Studies - 5-Year Bachelor of Arts and Master of International Affairs

International Studies core. One course must be taken in the relevant department. These courses cannot apply to the International Studies core. One course must be taken in the foreign language at the 300- or 400-level.
• A combination of the above to equal the requirement of a long semester or a 10-week summer-approved experience.
• Must be taken outside of the student’s country of origin.
• Must be taken in one foreign country that matches with the foreign language and the area study requirement unless approved by the department head before travel.

Other courses may qualify for the college and university requirements categories. Students should consult the approved list of courses available in the Undergraduate Student Services Office in the College of Liberal Arts or in the International Studies Degree Program Office. The list incorporates University Core Curriculum requirements. No course can be counted in more than one category, except as allowed in the International and Cultural Diversity graduation requirement.

Modern Languages - BA, French Option

The department offers a wide range of courses in Modern Languages at all levels of the undergraduate curriculum as part of its mission to support and advance the international and global competencies of university students. At present, students can earn a BA in Modern Languages with options in French, German or Russian. Courses are designed to offer students extended study of the language, literatures, and cultures of these language communities. The department insists on a high competence in the language, which is the basis for all other options. Students will be required to complete, by coursework or placement test, all 100- and 200-level courses in sequence (except FREN 221/FREN 222, GERM 221/GERM 222 and RUSS 221/RUSS 222, which are taken concurrently) before taking any upper-level course, unless an upper-level course permits co-registration or skipping a lower course in the sequence (see inventory of courses for prerequisites). Once a student has received credit for a higher-level language course, the student is no longer eligible to receive credit for prerequisite courses. In addition to classes at the College Station campus, the department offers summer study abroad programs for credit. Departmental faculty and advising staff also work closely with students to match their interests with semester and full-year programs abroad.

1 Minimum of 9 hours at the 400- level.
2 See the Minor Field of Study paragraph.
3 At least three hours must be in MATH. Three hours may be PHIL 240.
4 Courses may be used to satisfy other requirements.

Minor Field of Study

All Modern Language majors must select a minor field of study from departments or divisions within or outside of the College of Liberal Arts or in a particular area of interest (as in the case of interdisciplinary minors). The minor will consist of a minimum of 15 hours of coursework, as defined by the minor department. No more than 9 credit hours may be at the 100-299 level. Interdisciplinary minors such as women’s and gender studies, classical studies, religious studies, and business have specific requirements; students should consult undergraduate advisors in these areas of study. A second major may substitute for the minor. Courses used to meet the minor requirements may not be used in the major. See also the statement on “Minor Field of Study” under the general requirements of the College of Liberal Arts. In general, the careful combination of foreign language skills with other major curricula enhances preparation for careers in business, industry and government. Teaching certification is available to majors through the College of Education and Human Development. Consult the College of Education and Human Development section under secondary teacher certification for additional information.

Any departmental major must earn a "C" or better in all major and minor coursework.

Other courses may qualify for the college and university requirements categories. Students should consult the approved list of courses available in the Undergraduate Student Services Office in the College of Liberal Arts. The lists incorporate University Core Curriculum requirements. No course can be counted in more than one category.

Total Semester Credit Hours 120

1. See the Minor Field of Study paragraph.
2. At least three hours must be in MATH. Three hours may be PHIL 240.
3. Courses may be used to satisfy other requirements.

**Minor Field of Study**

All Modern Language majors must select a minor field of study from departments or divisions within or outside of the College of Liberal Arts or in a particular area of interest (as in the case of interdisciplinary minors). The minor will consist of a minimum of 15 hours of coursework, as defined by the minor department. No more than 9 credit hours may be at the 100-299 level. Interdisciplinary minors such as women's and gender studies, classical studies, religious studies, and business have specific requirements; students should consult undergraduate advisors in these areas of study. A second major may substitute for the minor. Courses used to meet the minor requirements may not be used in the major. See also the statement on "Minor Field of Study" under the general requirements of the College of Liberal Arts. In general, the careful combination of foreign language skills with other major curricula enhances preparation for careers in business, industry and government. Teaching certification is available to majors through the College of Education and Human Development. Consult the College of Education and Human Development section under secondary teacher certification for additional information.

Any departmental major must earn a "C" or better in all major and minor coursework.

Other courses may qualify for the college and university requirements categories. Students should consult the approved list of courses available in the Undergraduate Student Services Office in the College of Liberal Arts. The lists incorporate University Core Curriculum requirements. No course can be counted in more than one category.

**Arabic Studies - Minor**

The minor in Arabic Studies is an academic program open to all students in the university. The minor is interdisciplinary in nature and combines courses in Arabic language and culture with electives in Arabic studies, as well as a capstone project. The minor is a valuable complement to the academic portfolio of any student majoring in the humanities, social sciences, or natural sciences, who wishes to add an international dimension to their intellectual profile. In addition, Arabic Studies faculty offer study abroad programs in order to enrich student learning experiences and cultural knowledge while helping students attain higher proficiency in the language.

Students must complete ARAB 101 and ARAB 102 before they may declare a minor in Arabic Studies.

- ARAB 221 Introduction to Arabic Language and Society
- ARAB 400 to 489 (p. 820)
- COMM 367 Media and the Middle East
- GEOG 320 The Middle East
- HIST 221/RELS 221 History of Islam
- HIST 347/RELS 347 Rise of Islam, 600-1258
- HIST 348 Modern Middle East
- INTS 251 Contemporary Issues in the Middle East
- INTS 321/RELS 321/POLITICAL ISLAM AND JIHAD
- HUMA 321
- INTS 484 Directed Internship (in an Arabic-speaking country)

Total Semester Credit Hours 18

Students must earn a "C" or better in all minor coursework.

### Capstone Project

A capstone project that is completed in an approved upper-division Arabic Studies course is required of all students pursuing a minor in Arabic Studies during their final year of the program. It consists of a substantial research paper (15–20 pages) on an original topic and is conducted under the direction of a faculty member with the approval of the departmental advisors. Through the capstone course and project, students get a chance to integrate their classroom knowledge about the Arab world and use their study-abroad experiences and internships in an Arabic-speaking country, if any, to address an issue of interest to them. Issues that students can choose to address could be of linguistic, cultural, historical, religious, or political nature, among others. Upon its completion, and in coordination with the departmental advisors, the final project will be presented orally to Arabic classes in order to maximize its benefits.

## Asian Studies - Minor

The minor in Asian Studies is an academic program open to all students in the university. The minor is interdisciplinary in nature and includes Asian Studies courses in the humanities and the social sciences, as well as a capstone project. The minor is a valuable complement to the academic portfolio of any student majoring in the humanities, social sciences, or natural sciences, who wishes to add an international dimension to their intellectual profile.

Asian Studies Capstone 2

Asian Studies Electives 3

Total Semester Credit Hours 18

---

1 Or as approved by the director of Asian Studies.
2 Course to be determined by the director of Asian Studies.
3 Select one course from those not used in humanities or social sciences or as approved by the director of Asian Studies.

Students must earn a "C" or better in all minor coursework.

Up to six hours of upper division Asian language courses (300 level or higher) may count toward the minor. If six hours of language courses are
used for the minor, the required hours in Asian Studies humanities and social sciences courses will be reduced from 12 hours to 9 hours, and the Asian language courses will be credited as electives.

Students must complete a minimum of six hours of Asian Studies courses toward the minor at the 300 or 400 level in residence at Texas A&M University.

Please see the departmental advisors for electives and curricular offerings.

**Chinese - Minor**

The minor in Chinese is an academic program open to all students in the university. The minor is interdisciplinary in nature and combines courses in Chinese language and culture with electives in Chinese studies, as well as a capstone project. The minor is a valuable complement to the academic portfolio of any student majoring in the humanities, social sciences, or natural sciences, who wishes to add an international dimension to their intellectual profile. In addition, Chinese studies faculty offer study abroad programs in order to enrich student learning experiences and cultural knowledge while helping students attain higher proficiency in the language.

- SOCI 306/ ASIA 306 Society and Population of Modern China

Total Semester Credit Hours: 18

Students must earn a "C" or better in all minor coursework.

**Capstone Project**

The capstone project allows students to integrate knowledge and skills about topics pertaining to Chinese language, culture, history, geography, etc. that they have gained through their coursework, including any study abroad experience in China. Students will consult with the faculty in Chinese and meet regularly with a faculty advisor to complete an independent research project about a topic of their interest pertaining to China.

**Classical Studies - Minor**

The Minor in Classical Studies is an academic program open to all students in the university. The minor is interdisciplinary in nature and combines courses in Greek or Latin language with electives in multiple disciplines. The focus on the history, beliefs, and material culture of ancient Greek and Roman civilization helps students to see how fundamental concepts of Western Civilization first arose in Classical Antiquity, and is a valuable complement to the academic portfolio of any student majoring in the humanities, social sciences, or natural sciences.

Students must earn a "C" or better in all minor coursework.

Department of Performance Studies

In the Department of Performance Studies at Texas A&M University, students use performance to understand and change the world. Performance Studies is an inquiry-based humanities field that examines relationships between performance and culture. We study performance on an expanded field. Performance Studies investigates traditional art forms such as music, theatre, and dance as well as a range of cultural expressions such as ritual, festivals, games and sports, parades, storytelling, dress, social arts, and mass media. Performance studies is a research discipline in which performance is at once the object we research, a frame we use to see the world anew, and a unique method and medium with which to generate new answers to fundamental questions facing humankind.

Our programs provide flexible and interdisciplinary approaches to the study and practice of performance. The Department’s vibrant faculty works on varied performances in a wide range of cultural contexts. We bring our expertise to bear on the study of music and sound, theater, performance art, politics, dance, gender and sexuality, martial arts, technology, race, and religion.

Students in the Department study music and theatre practice, theory, and history, and use performance as a method of inquiry. Through performance, students learn to engage creatively with the world around them in an on-going process of investigation and meaning-making. In the course of their work in the Performance Studies BA, students will develop a perspective on artistic practice that crosses genres; the ability to think independently, work collaboratively, and solve problems creatively; and a commitment to the performing arts as socially engaged practice.

The BA in Performance Studies provides a foundation for careers that combine skills and knowledge gained in the study, practice, and critical analysis of performance. In the 21st century, this describes many paths a Performance Studies graduate may take. In performance studies our goal is to make scholars and artists with a keen sense of how to use performance to advance their goals and solve problems. To this end, we train our students to be creative leaders in whatever field they choose.

A background in Performance Studies provides an unparalleled foundation for those looking to make their way as artists and performers; for those seeking careers in business, public service, law, medicine, advocacy, journalism, and so on; and for those who plan to continue on to graduate study in the humanities.

**Performance Studies - BA**

Majors in Performance Studies investigate performance on an expanded field. We study traditional art forms such as music, theatre, and dance alongside a range of cultural expressions including ritual, festivals, games and sports, parades, storytelling, dress, social arts, technology, and mass media. Our courses combine scholarship and creative practice, research and performance. The BA in Performance Studies offers a flexible curriculum that allows students the opportunity to build a degree plan that supports individual interests and goals. Through performance in music and theatre, students develop a commitment to the performing arts as socially engaged practice and prepare for a wide variety of careers.

General electives 2 19

Total Semester Credit Hours 120

1 Complete six hours of International and Cultural Diversity coursework. Courses may be used to satisfy other requirements.
2 Up to 12 hours of courses from MUSC 300-499, THAR 300-499, or PERF 300-499 may be applied.

General Degree Requirements:

Minimum 2.0 GPA overall and a minimum 2.0 GPA in major coursework.
A grade of C or higher is required in all coursework within the major.
18 hours of major coursework completed at Texas A&M.
Complete 36 hours of upper division (300-400 level) hours in residence, 12 hours of which must be completed in major coursework.
Complete two PERF courses formally designated as writing or communication intensive. At least one course must be completed with the writing intensive designation.
Performance Studies - Minor

The minor in Performance Studies offers students the opportunity to engage the methods of performance studies and the practice of performance to enhance their other studies. In Performance Studies, we study performance on an expanded field: we investigate traditional art forms such as music, theatre, and dance, as well as a range of cultural expressions including ritual, festivals, games and sports, parades, storytelling, dress, social arts, technology, and mass media. Our courses combine scholarship and creative practice, research and performance. Performance Studies developed through a variety of interdisciplinary encounters: between theatre and anthropology, between music and philosophy, and so on. Minors in Performance Studies take up this same charge in their own courses of study, adding a performance perspective to their other academic inquiries, creative practices, and personal development.

Minimum of 6 hours at 300-400-level.

Minimum 2.7 GPA.

Performance Technology - Minor

The minor in Performance Technology is open to all majors and provides students research experiences through interdisciplinary technology-based performances. Required courses in the minor include an introductory survey of essential concepts and skills (PERF 202) and a capstone course in Intermedia Performance based on interdisciplinary collaboration (PERF 402). Additional courses in the minor focus on advanced applications and analysis of technology in performance including consideration of aural, visual, and human components; sensors and actuators; data and programming; construction; and composition, design, improvisation, and devised performance.

Program Requirements

Required courses in the minor include an introductory survey of essential concepts and skills (PERF 202) and a capstone course in Intermedia Performance based on interdisciplinary collaboration (PERF 402). Additional courses in the minor are drawn from the Music, Performance Studies, or Theatre Arts curricula focusing on advanced applications and analysis of technology in performance including consideration of aural, visual, and human components; sensors and actuators; data and programming; construction; and composition, design, improvisation, and devised performance. Students are encouraged to propose or apply for unique performance and research experiences (PERF 483 and PERF 491) in order to build their portfolios and better align their coursework with their professional goals.

A minimum of six semester credit hours must be at the 300-400 level.

Students must make a grade of "C" or better in all courses.

The capstone course, PERF 402, allows students to integrate and apply knowledge and skills pertaining to technology-based performance in interdisciplinary collaborative projects.

Department of Philosophy and Humanities

The Greek philosopher Socrates once said that the unexamined life is not worth living. For more than 2,000 years, philosophy has been the source of the most intensely reflective, influential and argued versions of that examination. The concerns of philosophy range from the arts, the methods and foundations of the sciences, politics, education, and religion to the complex questions relating to the meaning of reality, truth, values and the significance of human history. The study of philosophy is an essential dimension of a well-educated person.

Philosophy seeks to establish standards of evidence, provide rational methods of resolving conflicts, and create techniques for evaluating ideas and arguments. Philosophy develops the capacity to see the world from the perspectives of other individuals and other cultures; it enhances one's ability to perceive the relationships among the various fields of study, and it deepens one's sense of the meaning and variety of human experience.

Toward these ends the program in philosophy at Texas A&M is structured to provide students with the skills necessary to appreciate more fully the central concerns of human existence and develop abilities in problem-solving, communication, persuasion, writing, and critical thinking.

Students, along with parents and friends, often assume that the only undergraduates who major in philosophy are those who intend to pursue graduate degrees in philosophy, theology and law. The breadth of skills developed, however, makes the study of philosophy appropriate for students entering professional fields such as medicine, business and education, and for those preparing for graduate work in the humanities or the social sciences.

It should be stressed that the non-academic value of a field of study must not be viewed mainly in terms of its contribution to obtaining one's first job after graduation. Students are understandably preoccupied
with getting their first job, but even from a narrow vocational point of
view it would be short-sighted to concentrate on that at the expense of
developing potential for success and advancement once hired. Factors
leading to initial employment are not necessarily those that lead to
promotions or beyond a first position. This is so because the needs of
many employers alter with changes in social and economic patterns. It is
therefore crucial to see beyond the specifics of a job description.

As this suggests, there are people trained in philosophy in just about
every field. They have gone into not only such professions as teaching,
medicine, and law, but also into computer science, management,
publishing, sales, government service, criminal justice, public relations,
and other fields.

1. Any course except PHIL 334 and PHIL 484, which may be used with departmental approval only.
2. Up to six semester credit hours may be selected from PHIL 100 - PHIL 299 (p. 1026).

Students must make a grade of “C” or better in all courses.

Philosophy Pre-Law - Certificate

The Department of Philosophy offers a Pre-law Certificate that is primarily guided by the published recommendations of the American Bar Association (A.B.A.). The A.B.A. encourages prospective law students to pursue classes that cultivate a set of skills that will enhance the study of law. The study of philosophy lends itself to the development these recommended skills. To this end, Philosophy's Pre-law Certification requires that students take classes that typically cultivate the A.B.A.'s recommended skill set:

1. **Problem Solving** involves “courses and other experiences that will engage [students] in critical thinking about important issues, challenge ... beliefs and improve ... tolerance for uncertainty and criticism.”
2. **Critical Reading** involves “close reading and critical analysis of complex textual material.
3. **Writing and Editing** involves “preparing original pieces of substantial length and revising written work in response to constructive criticism.”
American politics involves the study of the institutions of national government, law, mass political behavior, elections, political communication and media, interest groups, political parties, state and local governments, urban politics, and identity in politics in the United States.

International Relations

International relations involve the study of relations between the governments of the world. Courses are offered in world politics, American foreign relations, and national security policy.

Comparative Politics

This area of political science allows students to develop an in-depth understanding of foreign governments and politics. Courses are offered in European governments, Latin American governments, Asian governments, Russia and the former Soviet states, and in the politics of inequality and globalization.

Political Theory

The study of political theory provides students with an understanding of the fundamental relationships between governments and people. Courses range from the study of Greek antiquity to contemporary political ideologies.

Public Administration and Policy

This area of political science encompasses the study of public administration and the role of public policy in American politics. Study in this area will provide the student with the opportunity to understand the fundamentals of administration within a political environment. Courses are offered in bureaucracy and administration, state and local finance, urban administration, and government and the economy.

Political Methodology

These courses introduce students to scientific research design, statistical analysis, and game theory.

Race and Ethnic Politics

These courses provide the student with an in-depth understanding of the role of diversity in politics.

5-Year Degree Programs

The Political Science Department offers a joint degree program in conjunction with the Bush School of Government and Public Service. This program enables students to receive either a B.A. or B.S. in political science and a Master of Public Service and Administration (MPSA) degree in five years.

The Political Science Department also offers a joint degree program in conjunction with the University of Essex. This program enables students to receive either a B.A. or B.S. in political science and a Master of Arts or a Master of Science in Political Science in four and a half years.

Honors Program

The Department of Political Science participates actively in the University honors program. Honors courses are available in all areas of political science. In addition, students may graduate with honors distinction in political science. Honor students also are offered individual instruction under POLS 497. Students interested in the Department’s Honors...
Program should contact the Political Science Undergraduate Programs Office.

**Teacher Certification**

Students desiring certification to teach civics or government in secondary schools in Texas must meet special additional requirements.

More complete information on requirements for teacher certification may be found in the College of Education and Human Development section under secondary certification.

Total Semester Credit Hours 120

1 Students must complete this course before taking more than six hours of 300- or 400-level courses in Political Science.
2 At least 3 hours must be in MATH except MATH 102, MATH 150, MATH 167, MATH 365, and MATH 366. Three hours may be PHIL 240.
3 POLS 100-POLS 499 (p. 1033) cannot be used to fulfill this requirement.
4 Course may be used to satisfy any other requirement.

No more than 36 credits in political science may be applied to the degree.

A grade of C or better is required for a course to be counted in the major field.

Other courses may qualify for the college and university requirements. Student should consult the approved list of courses in the Undergraduate Student Services Office in the College of Liberal Arts. No course can be counted in more than one category.

### Political Science - 5-Year Bachelor of Arts/Master of Public Service Administration

Students admitted into this program will be enrolled in Bush School graduate courses with an undergraduate classification for the fall of their fourth year and will be re-classified as degree seeking master's degree students upon completing 120 credit hours, typically in the following semester. These credit hours must include all specific course prerequisites for a baccalaureate degree in Political Science, as well as the courses required by the College of Liberal Arts and by Texas A&M University for an undergraduate degree. Students will be required to complete the same two-year, 48 hour curriculum as other students admitted to the Bush School's MPSA program.

Electives

1. Students must complete this course before taking more than six hours of 300- or 400-level courses in Political Science.

2. At least 3 hours must be in MATH except MATH 102, MATH 150, MATH 167, MATH 365, and MATH 366. Three hours may be PHIL 240.

3. POLS 100-POLS 499 (p. 1033) cannot be used to fulfill this requirement.

4. Course may be used to satisfy any other requirement.

No more than 36 credits in political science may be applied to the degree.

A grade of C or better is required for a course to be counted in the major field.

Other courses may qualify for the college and university requirements. Student should consult the approved list of courses in the Undergraduate Student Services Office in the College of Liberal Arts. No course can be counted in more than one category.

Students are reclassified as degree seeking master’s students upon completing 120 credit hours, typically in the following semester.

Up to 18 hours of the MPSA course requirements may also be counted toward the Political Science undergraduate degree requirements.

**Political Science - BS**

The Department of Political Science offers a Bachelor of Science in Political Science. The B.S. program emphasizes building skills in social science research and data analysis while gaining a better understanding of politics, developing habits of critical thinking, and enhancing students’ written, verbal, and visual communications skills.

1 Students must complete this course before taking more than six hours of 300- or 400-level courses in Political Science.
2 POLS 100-POLS 499 (p. 1033) cannot fulfill this requirement.
3 Course may be used to satisfy any other requirement.

No more than 39 credits in political science may be applied to the degree.

A grade of C or better is required for a course to be counted in the major field.

Other courses may qualify for the college and university requirements. Student should consult the approved list of courses in the Undergraduate Student Services Office in the College of Liberal Arts. No course can be counted in more than one category.

Students are reclassified as degree seeking master's students upon completing 120 credit hours, typically in the following semester.

18 hours of the MPSA course requirements can double count for the Political Science undergraduate degree requirements.
Department of Psychological and Brain Sciences

Psychology majors receive a rigorous program of undergraduate education and training that encourages critical thinking, lifelong learning, and the analysis and integration of information about individuals and groups of people. The curriculum leading to a degree in psychology provides students with an understanding of human behavior and the ability to use scientific methods to answer questions about human behavior. Students are prepared to enter a variety of graduate and professional programs in psychology and related fields (such as law, medical school), as well as to enter entry-level employment in a number of fields (such as business, human resources).

BA/BS Degrees: Students majoring in psychology may earn either the Bachelor of Arts or Bachelor of Science degree. The psychology course requirements for the two degrees are identical; they differ with respect to the requirements in other disciplines. For example, the BA degree requires courses in a foreign language and extra humanities hours, whereas the BS degree requires additional hours in the physical and biological sciences. The two degrees are offered to allow students to complete their non-psychology course of study in fields of greatest interest to them. Thus, students who have stronger interests in the natural and life sciences should pursue the BS degree, whereas those with stronger interests in foreign language and the humanities should pursue the BA degree.

Both degrees provide students with the necessary curriculum requirements to pursue graduate study in psychology in most institutions, as well as other professional fields such as law. Students planning to apply to medical school or other physical health professional programs are advised to select the BS degree program.

Honors: Students who qualify for the University Honors Program should contact the Department of Psychological and Brain Sciences about the department’s own honors program which places an emphasis on small classes and independent research experience.

Minors: A non-psychology minor is optional for psychology majors. If chosen, a minor must consist of 15–18 credit hours, no more than 9 of which may be lower division and must be declared before the student completes 90 credit hours. No more than 6 hours from the minor may be used to fulfill other Core requirements. A grade of C or higher is required if a course is to be counted in the major or minor field. For more information about Psychology undergraduate programs, please visit the Department of Psychological and Brain Sciences website.

Majors

• Bachelor of Arts in Psychology (p. 579)
• Bachelor of Science in Psychology (p. 580)

Minors

• Psychology Minor (p. 581)

Certificates

• Applied Behavioral Health Certificate (p. 581)
• Healthy Development Certificate (p. 582)
• Psychology of Diversity Certificate (p. 585)
• Work and Organizations Certificate (p. 582)

Psychology - BA

The Department of Psychological and Brain Sciences offers a Bachelor of Arts in Psychology. Students interested in studying human behavior, with a humanities-oriented supporting curriculum, would pursue a BA degree. The BA can successfully prepare students interested in graduate and professional programs that stress a humanities background (e.g., counseling, social work, management, law), as well as students interested in employment in business or applied psychology.

Total Semester Credit Hours | 120                   |

¹ Enrollment freshman year is strongly recommended.
² Enrollment sophomore year is strongly recommended.
³ No more than a combined maximum of 6 hours of PSYC 484, PSYC 485, or PSYC 485H are permitted.
Courses must have KMTH attribute. Note that MATH 167 is not an accepted KMTH course in this degree program.

Courses in psychology may not be used to satisfy this requirement.

Course may be used to satisfy any other requirement.

No more than 9 hours of any combination of military science, naval science, aerospace studies and physical activity may be counted.

A minor field of study may fulfill this requirement, but a minor is not required.

Up to 6 hours in PSYC 100-499 are permitted.

A grade of C or higher is required if a course is to be counted in the major field. A student must complete a minimum of 36 hours of 300- and 400-level courses at Texas A&M.

No course can be counted in more than one category.

A non-psychology minor is optional for psychology majors. If chosen, a minor must consist of 15–18 credit hours, no more than 9 of which may be lower division and must be declared before the student completes 90 credit hours. No more than 6 hours from the minor may be used to fulfill other Core requirements. A grade of C or higher is required if a course is to be counted in the major or minor field.

**Psychology - BS**

The Department of Psychological and Brain Sciences offers a Bachelor of Science in Psychology. Students interested in studying human behavior, with a science-oriented supporting curriculum, would pursue a BS degree. The BS can successfully prepare students interested in further study in a science-oriented psychology graduate program (such as neuroscience) or medical school, or other health-related graduate and professional programs (e.g., pharmacy, physical therapy), as well as students interested in entry-level positions in business or applied psychology.

A Psychology minor is available for non-psychology majors. A minor field of study may fulfill this requirement, but a minor is not required. No more than 6 hours in PSYC 100-499 are permitted. A grade of C or higher is required if a course is to be counted in the major or minor field.

A non-psychology minor is optional for psychology majors. If chosen, a minor must consist of 15–18 credit hours, no more than 9 of which may be lower division and must be declared before the student completes 90 credit hours. No more than 6 hours from the minor may be used to fulfill other Core requirements. A grade of C or higher is required if a course is to be counted in the major or minor field.

**Psychology - Minor**

A minor in Psychology can be a valuable supplement to education in almost any field. Students select from a variety of courses that enhance understanding of animal or human behavior, the skills to intervene to change behavior and to create environments that support healthy behavior, and critical thinking skills related to asking and answering questions about human behavior. This knowledge prepares students to pursue a variety of careers where interacting with people is a central job component.

A Psychology minor is available for non-psychology majors. The minor must be declared before the student has completed 90 credit hours.

Students must make a grade of “C” or better in all courses.

**Applied Behavioral Health - Certificate**

**Overview**

The Department of Psychological and Brain Sciences offers embedded certificates as part of the major. The certificates are considered embedded because they require no additional coursework—beyond specific courses in the major itself—to earn the certificate. All certificates require 15 credits (5 courses). The certificates are designed to (a) bring greater depth and structure to the major; (b) provide students with guidance as to courses that build on each other, and (c) ultimately increase the employability of our students.

The required courses in this certificate reflect foundational component areas of psychology that focus on (a) human growth and development, both physically and psychologically and (b) positive and negative mental health, with an emphasis on mental health and developmental disorders. The prescribed electives include courses that focus on a variety of aspects of health and well-being and five of the six courses include practical applications of psychology, including the deployment and interpretation of psychological tests, therapeutic techniques, creation and monitoring of plans for personal growth and change, and the creation and application of reward systems.

Students must earn an average grade of “B” or better across certificate courses.

**Healthy Development - Certificate**

**Overview**

The Department of Psychological and Brain Sciences offers embedded certificates as part of the major. The certificates are considered embedded because they require no additional coursework—beyond specific courses in the major itself—to earn the certificate. All certificates require 15 credits (5 courses). The certificates are designed to (a) bring greater depth and structure to the major; (b) provide students with guidance as to courses that build on each other, and (c) ultimately increase the employability of our students.
The required courses in this certificate reflect foundational component areas of psychology that focus on (a) human growth and development, both physically and psychologically and (b) interpersonal behaviors and intrapersonal processes that affect our understanding of and relationships with others. The first set focuses on healthy and atypical development at different life stages, including adolescence, old age, and childhood. The second is a skills-based set of courses through which successful students will develop skills in healthy adjustment, behavioral modification, or therapeutic techniques.

Total Semester Credit Hours 15

Students must earn an average grade of "B" or better across certificate courses.

### Work and Organizations - Certificate

#### Overview

The Department of Psychological and Brain Sciences offers embedded certificates as part of the major. The certificates are considered embedded because they require no additional coursework—beyond specific courses in the major itself—to earn the certificate. All certificates require 15 credits (5 courses). The certificates are designed to (a) bring greater depth and structure to the major, (b) provide students with guidance as to courses that build on each other, and (c) ultimately increase the employability of our students.

The required courses in this certificate reflect foundational component areas of psychology that focus on (a) individual personalities and the behavioral and skill implications of individual traits and (b) interpersonal behaviors and intrapersonal processes that affect our understanding of and relationships with others. The prescribed electives include courses that focus on a variety of aspects of work and organizations, including the psychological underpinnings of workplace practices like hiring and training, organizational behavior, sports, negotiation and conflict, and testing.

Total Semester Credit Hours 15

Students must earn an average grade of "B" or better across certificate courses.
Students must earn an average grade of "B" or better across certificate courses.

Department of Sociology

The Department of Sociology supports a diverse community of faculty, staff and students working together to research and address real world social issues and problems. Faculty offer courses in race and ethnicity, social class, gender, popular culture, social psychology, organizations, community, environment, criminology, religion, global sociology, medical sociology, demography, and gerontology, among others. Some courses include hands-on service-learning opportunities in which students connect service and/or research in the community with course material. To further complement our courses in these and other areas of sociology, students have opportunities to work one-on-one with professors engaged in sociological research. For sociology majors seeking to enter applied fields, we have a highly praised internship program that offers practical experience in community nonprofit organizations, government agencies, and businesses.

Sociological training prepares students for graduate school and/or employment in a variety of occupations. Employers increasingly look for job candidates to have the critical thinking, writing, and research skills students will develop in our program. Sociology coursework provides students with the ability to live and work effectively in a diverse and global society by better understanding social diversity, cultural trends, inequalities, organizational behavior, and community and world events. Sociology provides an excellent background for students wishing to enter into the helping professions like social services, ministry, nursing, teaching, and law enforcement, and it provides an outstanding foundation for law, marketing, human resources, journalism, government, business management, and entrepreneurialism.

Faculty

Burk, James S, Professor Emeritus
Sociology
PHD, University of Chicago, 1982

Campbell, Mary E, Associate Professor
Sociology
PHD, University of Wisconsin - Madison, 2004

Cohn, Samuel R, Professor
Sociology
PHD, University of Michigan Ann Arbor, 1981

De Lima Amaral, Ernesto F, Assistant Professor
Sociology
PHD, University of Texas at Austin, 2007

Dietrich, Katheryn A, Instructional Associate Professor
Sociology
PHD, Texas A&M University, 1994

Eason, John M, Associate Professor
Sociology
PHD, University of Chicago, 2008

Feagin, Joe R, Professor
Sociology
PHD, Harvard University, 1966

Fossett, Mark A, Professor
Sociology
PHD, The University of Texas - Austin, 1983

Foster, Holly A, Professor
Sociology
PHD, University of Toronto, 2001

Gatson, Sarah N, Associate Professor
Sociology
PHD, Northwestern University, 1999

Goldsmith, Patrick A, Associate Professor
Sociology
PHD, University Of Arizona, 1999

Hernandez, Alexander A, Instructional Assistant Professor
Sociology
PHD, Boston College, 2014

Howard, Daniel L, Professor
Sociology
PHD, Vanderbilt University, 1992

Jewell, Joseph O, Associate Professor
Sociology
PHD, UCLA, 1998

Keith, Verna M, Professor
Sociology
PHD, University of Kentucky, 1982

Lakkimsetti, Chaitanya, Assistant Professor
Sociology
PHD, University of Wisconsin, 2010

Linneman, Judith A, Instructional Associate Professor
Sociology
PHD, Iowa State University, 1985

Mackin, Robert S, Instructional Associate Professor
Sociology
PHD, University of Wisconsin - madison, 1998

May, Reuben A, Professor
Sociology
PHD, University of Chicago, 1996

McIntosh, William A, Professor
Sociology
PHD, Iowa State University, 1975

Mestrovic, Stjepan G, Professor
Sociology
PHD, Syracuse University, 1982

Moore, Wendy A, Associate Professor
Sociology
PHD, University of Minnesota, 2005

Morris, Theresa M, Associate Professor
Sociology
PHD, Texas A&M University, 2000

General electives ⁴ 19

Total Semester Credit Hours 120

¹ A grade of C or better is required for credit.
² SOCI courses do not count toward fulfilling this requirement.
³ Course may be used to satisfy any other requirement.
⁴ No more than 6 semester credit hours for SOCI 484 ¹ may be applied to the Bachelor of Arts degree in Sociology.

No more than 33 hours in sociology may be applied to the major.

Other courses may qualify. Consult the approved list of courses available in the Undergraduate Student Services Office in the College of Liberal Arts or from departmental advisors. No more than one course may be counted in more than one category.

Please note that university requirements specify that all students must take at least two courses in their major that are designated as fulfilling a writing requirement (W). See the section on general requirements for baccalaureate degrees for more information.
Minor Field of Study

Sociology majors are not required to select a minor field of study. If chosen, the minor must consist of 15-18 hours, with no more than 9 hours taken at a 100- or 200-level. No more than six hours from the minor may be used to fulfill other requirements. A grade of C or higher is required if a course is to be counted in the minor field.

Teacher Certification

Non-Sociology Majors To Teach Sociology

Students desiring certification to teach sociology in Texas secondary schools must complete a social studies composite with a sociology emphasis and required education courses:

<td>15</td>
</tr>
</tbody>
</table>

Students must make a grade of "C" or better in all courses.

At least nine hours must be at the 300- or 400-level.

**University Studies Programs**

The College of Liberal Arts offers degrees in University Studies. A University Studies degree differs from a traditional "major" in that it consists of a concentration and two minors of 15-18 hours each. At least one minor must be outside the college. The University Studies degree format was created to provide students the flexibility to combine areas of study that are of special interest.

No student in any Liberal Arts University Studies concentration may pursue a double major or a double degree.

**Majors**

- Bachelor of Arts in University Studies, Journalism Concentration (p. 589)
- Bachelor of Arts in University Studies, Race, Gender, Ethnicity Concentration (p. 590)
- Bachelor of Arts in University Studies, Religious Thought, Practices and Cultures Concentration (p. 592)
- Bachelor of Arts in University Studies, Society, Ethics and Law Concentration (p. 593)
- Bachelor of Science in University Studies, Health Humanities Concentration (p. 594)
- Bachelor of Science in University Studies, Liberal Arts Concentration (p. 595)
- Bachelor of Science in University Studies, Race, Gender, Ethnicity Concentration (p. 596)

**University Studies - BA, Journalism Studies Concentration**

University Studies - Journalism in the College of Liberal Arts represents an interdisciplinary approach to journalism education, with an emphasis on writing-intensive courses (four would be required as part of the concentration) and electives from other disciplines that complement and support the critical thinking skills required of journalists in the 21st century. In addition to the concentration in journalism through the University Studies degree, students in the program are required to have a minor within the College of Liberal Arts and another outside the college, substantially broadening the interdisciplinary aspects of journalism education.

Students with a degree in University Studies - Journalism would be prepared for a successful life and career in several ways. Their coursework would emphasize critical thinking skills—a necessary component in the changing world of journalism that relies on writing for different types of media with frequent updates and differing audiences. They would be exposed to experiential learning through classes that require students to report and write on deadline and by the requirement for an internship in the field. They would develop and enhance strong writing skills by taking up to four writing-intensive courses. The very nature of journalism—constantly reporting and evaluating new information while examining new topics—would prepare them to be thoughtful consumers of information and encourage them to engage in learning throughout their lifetimes.

A student enrolled in the University Studies concentration of Journalism may not pursue a double major or a double degree.

1 Select from given list (p. 489) or courses for which one of the listed courses is a prerequisite.
2 A two-course sequence at the intermediate level (201 and 202).
3 One course may be in Texas history.
4 Course may be used to satisfy any other requirement.
5 One minor must be from outside the College of Liberal Arts.

Other courses may qualify. Consult the approved list of courses available from the undergraduate advisor in the Journalism Studies Program and from the Undergraduate Student Services Office in the College of Liberal Arts.

University Studies - BA, Race, Gender, Ethnicity Concentration

This area of concentration is purposefully designed to require that students complete coursework that educates them in interdisciplinary knowledge. Two inquiry-rich, research-based courses, one an introduction and one a capstone senior seminar, provide students with introductory and concluding courses in the methodologies appropriate to interdisciplinary studies in the Race, Gender, Ethnicity Concentration. Two minors are required for the degree; at least one minor must be from outside the College of Liberal Arts.

A student enrolled in the University Studies concentration of Race, Gender, Ethnicity may not pursue a double major or a double degree.

University Studies - BA, Religious Thought, Practices and Cultures Concentration

The concentration in Religious Thought, Practices and Cultures allows students to study religion through a variety of lenses: philosophical, historical, literary, artistic, and social. Students gain perspective on religion in the modern world and learn to analyze the impact of religious thought on human culture. Courses are taught by faculty from a range of disciplines and departments, so students can tailor the concentration to their interests and goals.

No student enrolled in the University Studies concentration in Religious Thought, Practices and Cultures may pursue a double major or a double degree.

University Studies - BA, Society, Ethics and Law Concentration

Society, Ethics, and Law (S.E.A.L.) is a university degree that has been designed for students who are interested in pursuing law school, or developing a highly transferable skill set that is useful to non-profits and businesses alike. To this end, S.E.A.L.’s curriculum is primarily guided by the published recommendations of the American Bar Association (A.B.A.). While the A.B.A. does not recommend nor require any particular major, it does encourage prospective law students to i) pursue opportunities (courses and experiences) that cultivate a specific set of skills; ii) obtain experiences that “can help [them] hit the ground running when [they] become a lawyer; and iii) develop “a broad understanding of history, including the various factors (social, political, economic, and cultural) that have influenced the development of our society in the United State.”

The requirements for this University Studies degree reflect the A.B.A.’s recommendation. Under the broad themes of Society, Ethics and Law, the degree requires classes that contribute to a broad understanding of philosophy, politics, economics and history. Specifically, S.E.A.L. requires that students complete 24 hours of major requirements, a minor in Philosophy, and a second minor outside of the Liberal Arts. In addition to obtaining a broad understanding of society, ethics and law, the degree requires that students pursue experiences and opportunities that typically cultivate the A.B.A.’s recommended skill set:

1. **Problem Solving** involves “courses and other experiences that will engage [students] in critical thinking about important issues, challenge ... beliefs and improve ... tolerance for uncertainty and criticism.”
2. **Critical Reading** involves “close reading and critical analysis of complex textual material.”
3. **Writing and Editing** involves “preparing original pieces of substantial length and revising written work in response to constructive criticism. [...] Language is the most important tool of a lawyer, and lawyers must learn how to express themselves clearly and concisely.”
4. **Oral Communication and Listening** involves “the ability to speak clearly and persuasively... and excellent listening skills.”
5. **Research** involves “undertaking a project that requires significant library research and the analysis of large amounts of information obtained from that research.”

The study of philosophy lends itself to the development of the five recommended skills. To this end, the required minor in Philosophy provides an opportunity to cultivate these skills.

Students are strongly advised to take philosophy courses over and above the minimum requirements for a minor, including independent studies and honors research courses.

**University Studies - BS, Health Humanities Concentration**

**Overview**

Health Humanities is a growing, cross-disciplinary field that studies the lived experience of health and illness. Health Humanities is based on the idea that our experience of health and illness is never only biological or 'cultural,' but always both. This concentration is relevant for students interested in interdisciplinary scholarship, especially the interface between biosciences and the arts and humanities. Students must take an introductory course and capstone senior seminar, as well as selecting two courses each from the Humanities, Social Sciences and Sciences related to the interdisciplinary study of health.

**Program Requirements**

2. Select two courses from: PHIL 111, PHIL 205, PHIL 314, PHIL 315, PHIL 353/AFST 353, PHIL 381, PHIL 480, PHIL 485, PHIL 489, SOCI 327, and either PHIL 382 or PHIL 482/ENGR 482.

4. Students must take PHIL 484 and then choose the remainder of the required 6 hours from: ARAB 301, ARAB 302, ARAB 321, ARAB 322, CHIN 301, CHIN 302, CLAS 313, CLAS 320, CLAS 321, CLAS 322, COMM 203, COMM 240, COMM 243, COMM 301, COMM 324, COMM 325, COMM 327, COMM 420/WGST 420, ECON 210, ECON 300, FREN 301, FREN 306, FREN 311 FREN 321, FREN 322, FREN 336, FREN 375, FREN 410, FREN 418, GERM 310, GERM 311, GERM 315, GERM 316, GERM 321, GERM 322, GERM 331, GERM 332, GERM 333, GERM 336, GERM 410, GERM 411, ITAL 303, JAPN 301, JAPN 302, JPN 401, JPN 402, PHIL 300-499 (p. 1026), RUSS 301, RUSS 302, RUSS 322, RUSS 410, SPAN 301, SPAN 302, SPAN 304, SPAN 306, SPAN 307, SPAN 311, SPAN 318, SPAN 331, SPAN 332, SPAN 341, SPAN 342, SPAN 403, SPAN 445, SPAN 483, WGST 403, and any course from the other focus areas lists.

5. Take 14 hours of the same language.

6. To be chosen from the college approved list (p. 489).

7. No more than one Texas History course can be used to satisfy this requirement.

8. This second minor must be chosen from outside of the College of Liberal Arts.

9. Any 100-499 courses not used elsewhere.

1 Writing Intensive Course  
2 Two university approved minors are required for this degree program. One must be outside the College of Liberal Arts.  
3 100-499 courses not used elsewhere.

Students are required to complete six (6) semester credit hours that meet the International and Cultural Diversity (p. 42) requirements. Students are encouraged to take courses that may also meet other requirements.

**University Studies - BS, Liberal Arts Concentration**

**Overview**

The College of Liberal Arts offers a degree in University Studies with a concentration in Liberal Arts. The degree is intended to provide students the flexibility to create individualized degree plans in the college. The format also provides additional opportunities for study in the College of Liberal Arts when there is restricted admission to specific departments. The University Studies in Liberal Arts is a unique degree plan that consists of a foundational knowledge of Liberal Arts as a discipline, advanced work in social sciences and humanities, and two minors uniquely chosen by each student.
The 21-credit-hour concentration is uniquely administered by the college, rather than by a department, and includes coursework drawn from all 12 college departments and six interdisciplinary programs. The degree, although B.S., requires a year of college-level foreign language and an additional 12 hours of communication, literature, and social science.

A student enrolled in the University Studies concentration of Liberal Arts may not pursue a double major or a double degree.

Total Semester Credit Hours 120

1. Must be a Writing (W) course.
2. Must make a grade of C or better.
3. Select from 300- or 400-level courses with a prefix of AFST, ARAB, ASIA, CHIN, CLAS, ENGL, FILM, FREN, GERM, HISP, HIST, HUMA, INTS, ITAL, JAPN, JOUR, LBAR, LING, LMAS, MODL, MUSC, PERF, PHIL, RELS, RUSS, SPAN, THAR.
4. Select from 300- or 400-level courses with prefix of ANTH, COMM, ECMT, ECON, POLS, PSYC, SOCI, WGST.
5. Take six hours from college approved courses in literature.
6. One minor must be chosen from outside of the College of Liberal Arts.
7. Any 100-499 courses not used elsewhere.

University Studies - BS, Race, Gender, Ethnicity Concentration

This area of concentration is purposefully designed to require that students complete coursework that educates them in interdisciplinary knowledge. Two inquiry-rich, research-based courses, one an introduction and one a capstone senior seminar, provide students with introductory and concluding courses in the methodologies appropriate to interdisciplinary studies in the Race, Gender, Ethnicity Concentration. Two minors are required; at least one must be outside the College of Liberal Arts.

No student enrolled in the University Studies concentration of Race, Gender, Ethnicity may pursue a double major or a double degree.

Total Semester Credit Hours 120

1 Must be a capstone course meeting University Writing (W) Requirement.

2 Two American History courses or one American History course and one Texas History course will fulfill this requirement.
One course on federal government and one course on state/local government will fulfill this requirement. Completing four semesters of upper-level ROTC may be substituted for 3 semester hours of the six hours required.

100-499 courses not used elsewhere.
COLLEGE OF NURSING

Administrative Officers
Interim Dean - Regina Bentley, Ed.D., M.S.N., R.N., C.N.E.
Associate Dean for Academic Affairs - Debra Matthews, Ph.D., R.N.
Associate Dean for Student Affairs - Kathryn McCallum, M.S.N., R.N.
Associate Dean for Finance and Administration - Shirley Davidson, M.B.A.
Assistant Dean for Academic Studies – Brian Holland, Ph.D., R.N.

General Statement
Registered nurses have been called the backbone of our health care system. Working on the front lines of health care, they treat patients, monitor and record their condition, help establish a plan of care, educate patients or the public about a health condition, and provide advice and emotional support to patients’ family members. Registered nurses are highly observant and detail-oriented and are often the first to catch important and changing signs and symptoms. They are increasingly being recognized as leaders in transforming the health care system to meet the burgeoning demand for prevention, wellness and primary care services with a focus on improving quality and managing costs. In addition to their clinical expertise, nurses are being sought out to serve in a variety of leadership posts on bodies developing policy recommendations related to a wide-range of health care policy issues.

Individuals who earn a nursing degree must first complete a national licensing examination in order to obtain a nursing license for practice. Further training or education can qualify nurses to work in specialty areas, such as emergency care, pediatrics, labor and delivery, mental health, oncology, surgery or public health. Graduate education can increase advancement opportunities for nurses including administrative positions in health care, academic faculty positions, and health care delivery as advanced practice nurses.

The College of Nursing is committed to addressing the critical nursing shortage across Texas through exceptional educational programs and advanced technologies in nursing. Our students are educated with cutting-edge classroom technologies and simulated experiences, which include standardized patients and virtual clinical learning activities. As leaders, our graduates are taught to question traditional methods and continually seek the best practices based on relevant clinical research. Through community service and leadership opportunities, the College of Nursing fosters a sense of social responsibility and global citizenship.

History
Texas A&M College of Nursing received approval from the Texas Board of Nursing on July 17, 2008, and admitted its first class on July 21, 2008. The inaugural class on the Bryan Campus included 22 Traditional and 22 Second-Degree Bachelor of Science in nursing (BSN) students.

In spring of 2018, the college had grown to approximately 450 nursing students enrolled at two campuses and locations: Bryan and Round Rock. The college also has a resident recruiting presence in Lufkin and McAllen serving residents in East and South Texas, for both undergraduate and graduate nursing students.

The college's undergraduate nursing students are enrolled in one of three tracks: Traditional BSN, Second-Degree BSN or RN-to-BSN. Graduate students in the College of Nursing are pursuing master-of-science (MSN) degree programs in Nursing Education, Forensic Nursing or Family Nurse Practitioner (FNP). A Graduate Certificate in Forensic Health Care is offered for master’s-prepared health care workers, protective service investigators/case workers, social workers, law enforcement, prosecutors and other professions who wish to assist victims of violence and trauma.

Texas A&M College of Nursing graduates are among the best-prepared baccalaureate and masters nurses in the nation, and they are highly sought after by prospective employers. The first-time National Council Licensure Examination for Registered Nurses® (NCLEX-RN) pass rates for BSN graduates have ranked 10 percentage points higher than both the Texas and national average for the past ten years. And, the percent of BSN graduates employed within the first month following graduation is consistently high compared to state and national averages. Additionally, the first-time passing rates on certification board exams for graduates of the FNP degree program are significantly above the national average.

In recognition of this standard of excellence, the college received the National League of Nursing’s prestigious designation as a Center of Excellence in Nursing Education for the years 2016-2020, and in 2017 was ranked the #1 nursing program in Texas by RegisteredNursing.org (https://www.registerednursing.org).

College of Nursing Programs
Program: Baccalaureate degree in nursing
Length: 12 to 23 months
General Admissions Requirements: Prerequisite coursework varies by program
Application Deadline: Varies depending on program of study
Start Term: Varies depending on program of study
Specialization, Program of Study: BSN Traditional Track, BSN Second Degree Track, RN to BSN Track
Degree: BSN.

Baccalaureate Degree in Nursing
The College of Nursing offers three tracks that lead to a Bachelor of Science in Nursing (BSN) degree. Upon obtaining the BSN degree, the prelicensure graduates will apply to take the registered nurse (RN) licensure examination. In order to be licensed as a Registered Nurse in the State of Texas, the Texas Board of Nursing requires all applicants to have their eligibility for licensure determined before entering a nursing degree program. All new students must undergo fingerprinting to determine if there is prior criminal history. Depending on the severity of the offense(s), individuals may be ineligible for issuance of a license. Please refer to the Notification for Students Pursuing an Occupational License (http://catalog.tamu.edu/undergraduate/appendices/occupational-licensing) in our catalog for additional information.

Accreditation by the Commission on Collegiate Nursing Education (CCNE)
The Commission on Collegiate Nursing Education is an autonomous accrediting agency, contributing to the improvement of the public’s health. A specialized/professional accrediting agency, CCNE ensures the quality and integrity of baccalaureate and graduate nursing programs and of post-baccalaureate nurse residency programs. The baccalaureate and master’s degree programs in nursing at Texas A&M University College of Nursing are accredited by the Commission on Collegiate Nursing Education.
Good Academic Standing

Good academic standing is defined as having a minimum grade point average of a 2.0 (on a 4.0 scale), maintaining a minimum grade of C in all courses, and non-probationary status. Students must be in good academic standing in order to progress in the program. Grades of D, F, or U are not acceptable in nursing courses. Students who receive a grade of D, F or U in any course in any given semester will be automatically placed on probation and notified in writing of probation status. The student will remain on probation until the course is repeated with a C or better. The course can only be taken through the Texas A&M College of Nursing. A second attempt in a course cannot be "Q" dropped. The grade earned on the second attempt will stand. Students who earn a grade of D or F upon repetition of a nursing course or have two nursing course failures are ineligible to continue enrollment in the College.

Students must complete the program to which they enrolled in three (3) consecutive years or six (6) long semesters. Exceptions for extenuating circumstances (i.e. serious illness, pregnancy, etc.) will be considered. In addition to obtaining grades of C or above in all nursing courses, students must demonstrate their ability to deliver safe care to patients at all times. Failure to provide safe patient care may result in immediate withdrawal from the course and, potentially, dismissal from the College of Nursing.

Academic Dismissal

Students will not be permitted to continue in the nursing program or apply for readmission if they:

1. receive a grade of D or F in more than one course,
2. receive any combination of grades of D or F on two attempts of the same course, or
3. receive notice of dismissal from the program by the Associate Dean for Academic Affairs or the Associate Dean for Student Affairs for failure to adhere to College of Nursing policy.

Nursing Professional Code of Ethics

Students in nursing and other health professions curricula are held to standards of conduct that both differ from and exceed those usually expected of university students. Each student enrolled in the College of Nursing is expected to uphold the professional code of ethics established for and by the nursing profession. The nurse recognizes that his/her first obligation is to the patient's welfare.

Any situation that threatens patient safety, exhibits a lack of moral character, demonstrates a lack of professionalism or good judgment, and/or proves harmful to the hospital or college environment is a violation of College/Hospital policy and may result in immediate termination from the program.

Compliance Requirements for Clinical Courses

Students must provide documentation confirming completion of compliance requirements prior to participating in clinical nursing courses. Information on requirements is provided upon admission and during New Student Orientation.

Locations

The Bryan/College Station campus serves as the headquarters of the Texas A&M Health Science Center College of Nursing. The 200-acre campus is located along State Highway 47 approximately three miles west of the main campus of Texas A&M University. The College of Nursing campus in Round Rock, Texas, provides a state-of-the-art 134,000-square-foot structure with classrooms, a simulation center, library, study lounge, student services and faculty offices. Additionally, the College of Nursing has two advising locations: Lufkin and McAllen, Texas.

College of Nursing
- Bachelor of Science in Nursing, RN to BSN Track (p. 603)
- Bachelor of Science in Nursing, Second Degree BSN Track (p. 604)
- Bachelor of Science in Nursing, Traditional BSN (p. 605)

Masters

College of Nursing
- Master of Science in Nursing in Family Nurse Practitioner (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/nursing/msn-family-practitioner)
- Master of Science in Nursing in Forensic Nursing (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/nursing/msn-forensic-nursing)
- Master of Science in Nursing in Nursing Education (http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/nursing/msn)

Nursing - BSN, RN to BSN Track

The RN to BSN track is an opportunity for registered nurses who hold an associate's degree in nursing from an accredited college or will have an A.D.N. degree conferred prior to the entry date. Applicants must hold a current, unencumbered license to practice in the State of Texas. Students may complete the 30 credit hour upper division course of study as either a full-time or a part-time student. The RN to BSN plan allows working nurses to balance career, education and other responsibilities. All applicants are required to complete prerequisite credit hours as noted above along with any outstanding core curriculum courses in order to receive the bachelor's degree.

Entry to the RN to BSN (Bachelor of Science in Nursing) Program

Those who are already a registered nurse with an associate's degree may apply for the RN to BSN program to obtain a bachelor's degree. All applicants are expected to complete prerequisite coursework prior to the first class day. The course instruction is delivered online allowing students to balance career, family and other responsibilities along with advancing their education. Students may choose to complete the curriculum in 3 semesters (1-year option), in 4 semesters (1 1/2-year option) or in 5 semesters (2-year option). Applicants who completed their Associate Degree in Nursing through an LVN to RN or Paramedic to RN bridge program must have earned a minimum of 35 transferable credits in their program in order to apply.

<tr>
<td>NURS 461</td>
<td>Application of Evidence Based Practice for the RN</td>
<td>3</td>
</tr>
</tbody>
</table>
The second degree (post baccalaureate) track is for students who already hold a bachelor's degree in another field of study. Acceptance into this track requires successful completion of prerequisite coursework prior to beginning upper division courses. All students will be required to complete core curriculum requirements if these were not met in the previous degree program. Contact the Office of Student Affairs for more information.

Students with a previous bachelor's degree may apply to the traditional BSN track and must follow the same requirements as noted above. If they met a core curriculum at another Texas public institution in their previous degree, it will be accepted for entry into the College of Nursing.

Upper Level Entry to the Second Degree Bachelor of Science in Nursing

Admission decisions are based on:

1. the strength of the student's academic background;
2. HESI A2 score;
3. the personal statement;
4. the student's achievements and accomplishments, with emphasis on volunteer work and activities in health care; and
5. minimal academic history of repeats, withdraws or failures.

Nursing - BSN, Traditional BSN

The traditional track requires the successful completion of prerequisite coursework prior to beginning upper division courses. College counselors will be able to advise students regarding equivalencies to common course numbers. Information is also available regarding courses at www.tccns.org (http://www.tccns.org) and through the Texas A&M Transfer Course Equivalency (https://compass-ssb.tamu.edu/pls/PROD/bwxtkwtes.P_TransEquivMain) web page.

Upper Level Entry to the Traditional Bachelor of Science in Nursing

Admission to the College of Nursing upper-level entry program is competitive. The student must have a minimum grade of C in each prerequisite course and a recommended minimum cumulative grade point average of at least 3.2 (on a 4.0 scale). Students admitted to the program usually exceed this minimum requirement significantly, with higher grade point averages in all university courses, in core curriculum courses and in the science courses. Applicants are required to complete the HESI Admissions Assessment A2 exam. Admission requirements include the application, HESI score, personal statement, and transcript(s) from all colleges or universities attended. Admission decisions are based on:

1. the strength of the student’s academic background;
2. HESI A2 score;
3. the personal statement;
4. the student’s achievements and accomplishments, with emphasis on volunteer work and activities in health care; and
5. minimal academic history of repeats, withdraws or failures.

Internal Transfer Applicants

An Internal Transfer Applicant is a current Texas A&M University undergraduate in a non-nursing major who meets specific requirements to apply to the upper division sequence in Nursing. Meeting requirements does not guarantee admission, it only allows a student the opportunity to apply for a seat.

Students must submit the application no later than the published deadline in the term in which they are applying. Note: All academic information included on the application must be posted to and appear in a student’s official record at Texas A&M.

External Transfer Applicants

A limited number of External Transfer Applicants from colleges and universities outside of Texas A&M University will be admitted.

Students participating in Program for Transfer Admission (PTA) must follow the external transfer process found here (http://nursing.tamhsc.edu/traditional/external.html).

Total Semester Credit Hours 120

1 See advisor for acceptable courses.

**Foreign Language**

Proficiency in a foreign language is required. Can be met by taking two years of the same language in high school or college credit.

**Prerequisite Courses**

Prerequisites may be planned or in progress during the application cycle, but must be completed with a grade of "C" or better before the program start date. The courses may be completed at any regionally accredited college or university.
The school currently offers one bachelor’s degree program, three master’s degree programs, and two doctoral degree programs.

Location
The School of Public Health’s administration and faculty are located in a state-of-the-art, three-building complex in College Station, on the Texas A&M University west campus. The nearly 100,000-square-foot complex includes classrooms fully equipped with videoconferencing technology to support the school's innovative distance education programs that reach across the breadth of the state. The laboratory building provides a venue for the school’s internationally regarded toxicology group to engage in exemplary public health work and provides a vehicle for training tomorrow’s researchers. The administration building houses the administration and faculty. In addition, the school operates ongoing regional instructional and research programs at the McAllen campus.

Public Health - BS

Public Health professionals with a Bachelor of Science in Public Health (BSPH) are prepared to:

- assess factors influencing health in individuals, communities and populations
- plan effective programs and interventions
- design evaluations for those interventions
- successfully manage the implementation of those programs

The BSPH program is based on a philosophy of health promotion and disease prevention, to improve the quality of life of individuals, families and communities. The BSPH discipline focuses on four areas:

1. the multiple determinants of health, including biological, environmental, sociocultural, health service, and economic factors,
2. identification of scientific data, tools of informatics, and other information for identifying indicators of health status and health disparities and assessing the well-being of a community,
3. addressing major local, national, and global health challenges, and
4. designing public health approaches and interventions that improve health outcomes, population health and well-being.

The Bachelor of Science in Public Health degree program is more than a means to produce ready public health practitioners. It can complement or enrich a traditional biology-based pre-health degree plan for students intending professional education in medicine, nursing, allied health or other health professions. Notably the program establishes a specific entry-level baccalaureate degree in the Public Health academic pathway which, until recently, had started with a master's degree.

Select one of the following:

- Any PHLT 3 credit course (p. 1028)
- Any relevant public health course

Minimum 15 hours required.
Minimum of 6 hours at 300- to 400-level.
Minimum 2.0 TAMU GPA and a completed minor form filed in the Public Health Studies advising office.

1 Must be approved by a Public Health Studies advisor.

Approval of degree plan does not guarantee access to courses. Students must satisfy prerequisites, and some course (writing intensive classes included) are available to majors only. It is the responsibility of the student to ascertain whether there are any restrictions or prerequisites for courses in their degree plan.

Occupational Health and Safety - Minor

The School of Public Health offers a minor in Occupational Health and Safety.

1 Chosen in consultation with BSPH academic advisor.
2 BSPH Directed Electives: courses that constitute the major are those offered by the School of Public Health and those approved for public health studies electives. Additional courses may be available. Students must check with their academic advisor.
COLLEGE OF SCIENCE

Administrative Officers

Dean - Meigan Aronson, Ph.D.
Associate Dean for Research - James Batteas, Ph.D.
Assistant Dean for Student Affairs - Yvette Hester, Ph.D.
Senior Advisor to the Dean - W. Michael Kemp, Ph.D.
Associate Dean for International Programs - Paulo Lima-Filho, Ph.D.
Associate Dean for Undergraduate Programs - Lucas Macri, Ph.D.
Associate Dean for External Relations - Marlan O. Scully, Ph.D.
Associate Dean for Strategic Planning - Sherry J. Yennello, Ph.D.
Associate Dean for Faculty Affairs and Graduate Studies - Mark J. Zoran, Ph.D.

General Statement

Nature, its origins and its evolution, its strengths and its frailties, its order and its perceived disarray, constitutes the realm of study classified as science. Scientists search for interconnecting relationships and traits of order to understand the nature of our universe. Each new discovery provides additional knowledge and frequently enables the solution of previously perplexing questions. Often technology is able to transform scientific discovery into applications which are beneficial to our everyday living. Technology would be impoverished were it not for the new knowledge continually being sought by scientists. At the same time, science could not progress without the advances in instrumentation and techniques generated by technology. Thus, a symbiotic relationship exists between science and technology, a relationship which permeates and assuring they abide by Texas A&M University Student Rules in grades.

The departments of the College of Science are organized to respond to the needs of students for both general and specialized education in science in offering the Bachelor of Science and the Bachelor of Arts degrees in Biology, Chemistry, Mathematics, Physics and University Studies. The former degree permits heavy emphasis in selected subject matter and closely allied fields, whereas the latter degree is designed for the student who desires a more broadly based education while still specializing in one of the sciences. Additionally, the college offers a Bachelor of Science degree in Applied Mathematical Science.

For this reason, many students select a degree program in science to complete their prerequisite courses for professional study programs. The early admissions option to professional schools of dentistry or medicine in the zoology degree program provides the opportunity for a student to receive a degree in zoology if they are successful in gaining admission to a professional study program in medicine or dentistry prior to completion of a regular four-year degree program. To receive the degree, they must complete all requirements under this program and successfully complete their first year of medical or dental school.

In addition to the Departments of Biology, Chemistry, Mathematics, Physics and Astronomy, and Statistics, the College of Science includes the Cyclotron Institute, a research institute that emphasizes fundamental studies of nuclear science in which both undergraduate and graduate students participate. The College of Science offers MS and PhD programs in various departments.

General Degree Requirements

Degree requirements for science majors are organized into:

1. general requirements, including University Core Curriculum requirements and College of Science requirements;
2. requirements of the major field of study;
3. requirements of the minor field of study for those students completing a BA degree; and
4. electives.

With the exception of physical activity and general elective requirements, courses taken to satisfy degree requirements must be taken for letter grades.

Students are responsible for selecting the courses in their degree plan and assuring they abide by Texas A&M University Student Rules in meeting all degree requirements. Each department has advisors who should be consulted in developing degree programs.

General Requirements

General requirements include those which are required in every degree program at the University. Please refer to these requirements defined in the University Core Curriculum and graduation requirements in foreign language sections of this catalog. Special guidelines should be noted in the following categories:

American History

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Semester Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>U.S. history course 1</td>
<td>3</td>
<td></td>
</tr>
<tr>
<td>U.S. history course 1</td>
<td>3</td>
<td></td>
</tr>
<tr>
<td>Total Semester Credit Hours</td>
<td>6</td>
<td></td>
</tr>
</tbody>
</table>

Students seeking teacher certification must complete HIST 105 and HIST 106.

Three hours in history may be substituted by successfully completing the required four semesters of upper-level ROTC curriculum.

Government/Political Science

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Semester Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>POLS 206</td>
<td>American National Government</td>
<td>3</td>
</tr>
<tr>
<td>POLS 207</td>
<td>State and Local Government</td>
<td>3</td>
</tr>
<tr>
<td>Total Semester Credit Hours</td>
<td>6</td>
<td></td>
</tr>
</tbody>
</table>

Three hours in political science may be substituted by successfully completing the required four semesters of upper-level ROTC curriculum.

International and Cultural Diversity Requirements

The International and Cultural Diversity portion of the Graduation requirements may be fulfilled by 6 hours from the approved list of courses (see the International and Cultural Diversity requirements (p. 42) page). These courses may be in addition to University Core Curriculum requirements, or if a course in this category satisfies an area of the Core, it can be used to meet both requirements.
Major Field of Study
Each department sets its own requirements for the major. At least 12 semester hours in the major must be completed in advanced courses (300- or 400-level) in residence at Texas A&M.

Minor Field of Study
The BA degree requires a minor field of study or an area of emphasis for students pursuing teacher certification. A minor requires 15–18 semester hours in one discipline. Six of these hours must be advanced (300- or 400-level) courses. Students must contact the department offering the minor to determine course requirements. Students pursuing a BS degree may select an optional minor. Contact the department offering the minor to determine course requirements. Students must declare a minor no later than the date on which they apply for graduation.

Electives
Electives should be chosen to enhance the student's degree program and/or complete professional school prerequisites if not contained in required courses in the degree plan. Elective courses must be above the minimum level required in other areas of the degree program. For example, MATH 102 is not acceptable because it is below the minimum requirement of calculus. Also, introductory courses to another field of study such as BIMS 101 and AGLS 101 will not count toward degree requirements. Lower-level ROTC courses are not acceptable as electives. Please consult an advisor when selecting electives.

Curricular Options
Honors Program
The College of Science participates in the University Honors Program designed to offer the superior student special opportunities for academic work of a range and depth appropriate to his or her capabilities and greater intellectual interests. For further information, refer to the section regarding the University Honors Program (p. 110).

Cooperative Education Program
Cooperative education enables students to gain practical work experience and a salary while completing academic requirements. During the four-year academic program, co-op students complete two to four periods of work away from campus, gaining experience through on-the-job training and thus improving their opportunities for future employment. The Cooperative Education Office provides additional information about this program.

Minor Field of Study
Each department in the College of Science offers a minor. Students interested in pursuing a minor in a field in the College should contact the department offering the minor.

Summer Internships
A number of programs are available throughout the country which offer summer employment to students interested in specific fields of study and training. Each departmental advisor has information pertaining to these programs.

Integrated Fast Track Bachelor’s and Master’s Degrees
The Department of Mathematics provides the opportunity for ambitious and talented students to earn a bachelor’s and a master’s degree within a five year period. Eligible students earn graduate credit during their undergraduate study which allows them to complete this option.

Interested students should contact the Mathematics Department if interested in this program.

Preparation for Professional Studies
Students interested in gaining admission to professional study programs in the health professions may do so through any course of study. Prerequisite course requirements may be completed as part of a regular degree program or through electives. Advising for students preparing for health profession careers is available, regardless of major, through the Office of Professional School Advising, 209 Koldus, (979) 847-8938.

Medicine and Dentistry
Curricula in biology, chemistry, mathematics and physics within the College of Science readily accommodate the required courses needed for admission to professional studies in medicine and dentistry. Admission to medical and dental schools require the following prerequisites:

<table>

English course (p. 888) 6

Early Admission Program
The College of Science offers two methods of awarding a baccalaureate degree to students who gain admission to professional school prior to completion of their degree. The Baccalaureate Degree Option for Students Granted Early Admission to Medical/Professional Programs is available to all students regardless of their major.

Most students complete a four-year program prior to acceptance to professional school and thus it is advised a degree program leading to a standard baccalaureate degree be selected.
Veterinary Medicine
Please refer to the Admission Requirements—Professional Curriculum listed in the College of Veterinary Medicine and Biomedical Sciences.

Other Allied Health Programs
There are many allied health fields students may prepare for through degree programs in the College of Science. Prerequisite requirements for admission should be completed as part of a degree granting program.

Teacher Certification
The Secondary Teaching Certificate may be obtained in conjunction with a major in the College of Science. Requirements for teacher certification may be found at the aggieTEACH (http://aggieteach.tamu.edu) website.

Curricula in University Studies
The College of Science has four different University Studies degree plans. A University Studies Degree generally consists of a concentration of 21-24 hours and two minors of 15-18 hours each. Some concentrations and minors contain required courses that have additional prerequisites. One of the two minors must be completed in a college outside of the College of Science. The student’s diploma will list Bachelor of Science in University Studies. The student’s area of concentrations and the two minors will be indicated on the student’s transcript.

Interested students must complete the online application and have necessary minor field approvals. The degree plans and applications may be found at www.science.tamu.edu/academics/degrees.php.

Majors
College of Science
- Bachelor of Science in University Studies, Mathematics for Business Concentration (p. 673)
- Bachelor of Science in University Studies, Mathematics for Pre-Professionals Concentration (p. 674)
- Bachelor of Science in University Studies, Mathematics for Teaching Concentration (p. 675)
- Bachelor of Science in University Studies, Science for Secondary Teaching Concentration (p. 676)

Department of Biology
- Bachelor of Arts in Biology (p. 620)
- Bachelor of Science in Biology (p. 621)
- Bachelor of Science in Microbiology (p. 622)
- Bachelor of Science in Molecular and Cell Biology (p. 623)
- Bachelor of Science in Zoology (p. 625)

Department of Chemistry
- Bachelor of Arts in Chemistry (p. 630)
- Bachelor of Arts in Chemistry, Biological Chemistry or Medical, Dental, Pharmacy School Track (p. 632)
- Bachelor of Arts in Chemistry, Chemical Education Track (p. 633)
- Bachelor of Arts in Chemistry, Environmental Chemistry Track (p. 635)
- Bachelor of Science in Chemistry (p. 637)
- Bachelor of Science in Chemistry, Biological Chemistry Track (p. 639)
- Bachelor of Science in Chemistry, Environmental Chemistry Track (p. 640)
- Bachelor of Science in Chemistry, Materials Chemistry Track (p. 642)

Department of Mathematics
- Bachelor of Arts in Mathematics (p. 659)
- Bachelor of Arts in Mathematics and Master of Science in Mathematics, 5-Year Degree Program (p. 660)
- Bachelor of Science in Mathematics (p. 662)
- Bachelor of Science in Mathematics and Master of Science in Mathematics, 5-Year Degree Program (p. 663)
- Bachelor of Science in Applied Mathematical Sciences, Actuarial Emphasis (p. 648)
- Bachelor of Science in Applied Mathematical Sciences, Biological Science Emphasis (p. 649)
- Bachelor of Science in Applied Mathematical Sciences, Computational Emphasis (p. 651)
- Bachelor of Science in Applied Mathematical Sciences, Economics Emphasis (p. 652)
- Bachelor of Science in Applied Mathematical Sciences, Math Emphasis (p. 654)
- Bachelor of Science in Applied Mathematical Sciences, Statistics Emphasis (p. 655)
- Bachelor of Science in Applied Mathematical Sciences and Master of Science in Mathematics, 5-Year Degree Program (p. 657)

Department of Physics and Astronomy
- Bachelor of Arts in Physics (p. 668)
- Bachelor of Science in Physics (p. 669)

Department of Statistics
- Bachelor of Science in Statistics (p. 672)

Minors
Department of Biology
- Bioinformatics Minor (p. 626)
- Biology Minor (p. 627)

Department of Chemistry
- Chemistry Minor (p. 643)

Department Mathematics
- Mathematics Minor (p. 665)

Department of Physics
- Astrophysics Minor (p. 670)
- Physics Minor (p. 670)

Department of Statistics
- Statistics Minor (p. 673)
Masters

**Department of Biology**
- Master of Science in Biology ([link](http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/science/biology/ms))
- Master of Science in Microbiology ([link](http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/science/biology/microbiology/ms))

**Department of Chemistry**
- Master of Science in Chemistry ([link](http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/science/chemistry/ms))

**Department of Mathematics**
- Master of Science in Mathematics ([link](http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/science/mathematics/ms))
- Master of Science in Quantitative Finance ([link](http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/science/mathematics/quantitative-finance/ms))

**Department of Physics and Astronomy**
- Master of Science in Astronomy ([link](http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/science/physics-astronomy/physics-ms))
- Master of Science in Physics ([link](http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/science/physics-astronomy/physics-ms))

**Department of Statistics**
- Master of Science in Analytics ([link](http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/science/statistics/analytics-ms))
- Master of Science in Statistics ([link](http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/science/statistics/ms))

Doctoral

**Department of Biology**
- Doctor of Philosophy in Biology ([link](http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/science/biology/phd))
- Doctor of Philosophy in Microbiology ([link](http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/science/biology/microbiology/phd))

**Department of Chemistry**
- Doctor of Philosophy in Chemistry ([link](http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/science/chemistry/phd))

**Department of Mathematics**
- Doctor of Philosophy in Mathematics ([link](http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/science/mathematics/phd))

**Department of Physics and Astronomy**
- Doctor of Philosophy in Astronomy ([link](http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/science/physics-astronomy/astronomy-phd))
- Doctor of Philosophy in Physics ([link](http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/science/physics-astronomy/physics-phd))

**Department of Statistics**
- Doctor of Philosophy in Statistics ([link](http://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/science/statistics/phd))

**Department of Biology**

No one really knows what the world will be like 50 years from now, but it is certain that biologists will be at the forefront of science attempting to find solutions to many of the world’s problems and to find answers to intriguing questions about animals, plants and microbes at the molecular, cellular, organismal and ecosystem levels. Biologists will be concerned with pollution of the environment, cause and cure of disease, population control, recurring food shortages, preservation of species and many other aspects resulting from the impact of technological changes on life forms. Those who are astounded by the array of living things on the earth and who seek challenging, creative work should consider a career in biology or in a biology-related field. The Department of Biology offers five distinct four-year curricula which lead to the baccalaureate degree. These are the Bachelor of Arts in Biology, Bachelor of Science in Biology, Bachelor of Science in Molecular and Cell Biology, Bachelor of Science in Microbiology and Bachelor of Science in Zoology. The curricula are designed to maximize postbaccalaureate opportunities in:

1. professional schools of medicine, veterinary medicine and dentistry;
2. allied health schools of physical and occupational therapy, physician assistant programs, optometry, pharmacy, and nursing;
3. graduate education leading to teaching and research careers in universities, in industry or in state or national agencies;
4. teaching at junior high or high school levels and
5. jobs in biotechnology, research laboratories, pharmaceutical companies and field biology.

The Department of Biology degree plans will enable students to complete all entrance requirements for graduate and professional schools as well as medical technology, pharmacy, optometry, nursing, physical therapy, and other paramedical and health support fields.

**Advising**

Because some careers in biology require advanced and/or specialized training, it is essential to take advantage of advising opportunities. In the Department of Biology, there are professional advisors in the Biology Undergraduate Programs Office. The advisor may be consulted prior to each registration period and as the student needs. Questions regarding registration, degree checks, transfer of courses, advanced placements and other academic matters are handled in the Office of Undergraduate Programs. Students with special interests in graduate study should consult the graduate advisor. Information concerning entrance to professional schools of medicine, dentistry and other health related fields is available from the Office of Professional School Advising.
Requirements for all Baccalaureate Degrees in the Department of Biology

Each student seeking a baccalaureate degree in the Department of Biology is required to master a common body of knowledge in science. In addition, the student must take courses essential to a liberal education. Students will note that the first two years of all curricula offered by the Department of Biology are similar. Electives must include the 6 hours of international and cultural diversity courses required for graduation. Students must also take at least two writing-intensive courses in biology. Other requirements for graduation are listed in the Texas A&M University Student Rules and this catalog.

Students in the Department of Biology must make a grade of C or better in BIOL 111 and BIOL 112. Additionally, students may have only one D in courses within the major used to satisfy required or directed electives for a given degree plan. It is required that the freshman and sophomore level biology, chemistry and math courses be completed before the start of the 5th full semester and before enrollment in any junior or senior level science.

Common Body of Knowledge

To assure that students have sufficient prerequisite training for advanced courses, Biology majors must complete a series of courses comprising a Common Body of Knowledge (CBK) prior to their junior year (5th full semester) and enrollment in upper level BIOL courses. A Biology student will be admitted into upper level Biology classes when he or she has met the following criteria:

Completion of a set of CBK courses (38 hours) before the student’s 5th full semester to include:

Total Semester Credit Hours: 38

¹ A grade of C or better must be earned.

A student must be in good academic standing with an overall grade point average of a 2.0 or better overall and in the major.

Process

Students will be audited by the department to monitor progress of the CBK. Students failing to complete the CBK within the first four full semesters (two full semesters for Transfer Students) at Texas A&M University may be blocked and forced to change majors or be required to meet with an academic advisor to see if they can be successful in the major. Students registering for upper-level Biology classes without completing the CBK, or without approval of the Undergraduate Advising Office, will be dropped from the roster.

Transfer Students

1. Transfer from within Texas A&M University: The Biology Department will accept changes of major from other departments at Texas A&M upon completion of AT LEAST one semester of an applicable BIOL course taken at Texas A&M and AT LEAST one semester of an applicable CHEM course taken at Texas A&M, with a minimum 2.5 grade point average overall for courses taken at Texas A&M, a 2.5 or better grade point average in BIOL courses taken at Texas A&M, and a 2.5 or better grade point average in CHEM courses taken at Texas A&M. Students still must complete the CBK before being admitted to upper level BIOL courses.

2. Transfer students from other institutions to Biology must have completed the following:
   a. A minimum of 24 accredited college hours
   b. Sixteen hours of prescribed coursework:
      i. Eight hours of General Biology (TAMU BIOL 111 and BIOL 112 or Texas Common Course Numbers BIOL 1406 and 1407) with B’s or better, and
      ii. Eight hours of General Chemistry (TAMU CHEM 101/CHEM 111 and CHEM 102/CHEM 112 or Texas Common Course Numbers CHEM 1411 and CHEM 1412) with B’s or better, and
      iii. Eight hours of Calculus (TAMU MATH 147/MATH 148 or MATH 151/MATH 152 or MATH 171/MATH 172 or Texas Common Courses Numbers MATH 2413 and MATH 2414) with C’s or better
   c. A minimum cumulative grade point average of a 3.0
   d. A minimum Biology and Chemistry grade point average of a 3.0

Biology Honors Program

The Biology Department Honors Program is open to highly talented and motivated students pursuing a major in any of our degree plans. Honors students will be part of a vibrant community within the department with enriched learning experiences in both the classroom and biology research laboratories.

Honors Requirements: Students wishing to graduate with honors distinctions in either Biology (BIOL), Microbiology (MBIO), Zoology (ZOO), or Molecular and Cellular Biology (BMBC) must earn 21 credits in Honors courses and meet the following minimum honors requirements in addition to those listed in the degree plan:

- 4 credits BIOL 111H or BIOL 112H+
- 3 credits BIOL 213H or BIOL 214H
• 3 credits at 300/400 BIOL honors or honors contract; any 600 BIOL; not to include BIOL 485H, BIOL 491H, or BIOL 495H
• 6 credits BIOL 491H
• 2 credits BIOL 495H
• 3 credits any honors course outside the College of Science

* This requirement may be waived with a score of 5 on the Biology AP exam, a score of 6 on the IB exam, or by taking an additional honors biology course at the 300 or 400 level.

Grade requirements at time of graduation:
• cumulative Texas A&M University GPR of 3.5 or higher
• cumulative honors GPR of 3.25 or higher
• no grade lower than a B in courses counting toward honors. If a student earns less than a B in an honors course, they will still receive University credit. However, they will need to take a different course to fulfill the honors requirement.
• no F*, given in cases of academic dishonesty, on the transcript

Honors recognition: All honors courses will be denoted as honors on students' official transcripts. Furthermore, students completing the honors program will have the departmental honors distinction, as well as, any earned university or college distinction noted on the official transcript.

Admission to the Honors Program in Biology

Incoming Freshmen: Incoming freshmen should indicate their interest in the departmental honors program through the ApplyTexas site and choosing the "Apply to any Honors Program" after August 1. To be admitted, students should have a SAT score of 1350 or above (verbal + math) or a composite score of 30 or above on the ACT.

Students who have already completed their application and now wish to apply to the Biology Honors program can use the "Apply to any Honors Program" link at the Texas A&M Honors program site (http://honorsprograms.tamu.edu/Home).

Current or transfer students: Current or transfer students with a cumulative GPR of 3.5 or better can apply for admission to the Biology Honors Program by writing a short (less than 300 word) email to the department’s Honors Director. When applying, students should keep in mind that they will need to fulfill all honors requirements. Please send email to: biohonors@bio.tamu.edu.

Remaining in the program

In order to remain in the Biology Honors program, students must maintain a cumulative GPR at Texas A&M of 3.5 and honors GPR of 3.25. Students falling below these standards will be placed on probation for the next semester. Students unable to meet these standards for a second semester may be dismissed from the Biology Honors Program.

Please direct any questions to biohonors@bio.tamu.edu or the biology advising office.

Human Biology Track

This unofficial track is for students interested in pursuing professional schools including medical, dental and allied health programs (e.g., nursing, occupational therapy, optometry, pharmacy, physical therapy and physician assistant). The focus of the science courses on human biology will better prepare these students for their chosen fields. Suggested courses include:

Students should consult their academic advisor about the courses that best fit their career interests.

Education Track

This unofficial track is for students wishing to acquire state certification to teach at the secondary level upon graduation. Students should seek advice from the advisors within their department and from the College of Education and Human Development, as well as from the advisor in charge of their teaching option. The intention is to make the best possible use of social science, humanity, free and directed electives in the Bachelor of Arts in Biology, thereby condensing as many of the certification requirements as possible into the degree plan. Courses should include:

Total Semester Credit Hours 32

**Marine Biology Track**

This unofficial track is for students requiring a more rigorous and in-depth foundation in biological courses that apply to marine environments and ecosystems. This suggested degree plan is ideal for students who intend to pursue graduate studies in marine biology or serve as field biologists at national seashores or sanctuaries. A minimum of 20 hours is required to fulfill this requirement, to be chosen from the following:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Semester Credit Hours</th>

Total Semester Credit Hours 20

Students should consult their academic advisor about the courses that best fit their career interests.

**Ecology/Environmental Track**

This unofficial track is particularly designed for students interested in environmental consulting, environmental protection and ecosystem evaluation. This suggested degree plan can be adapted to focus on particular areas or populations within an ecosystem. A minimum of 18 hours is required to fulfill this requirement, to be chosen from the following:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Semester Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>ENGL 210</td>
<td>Technical and Business Writing</td>

</tr>
</tbody>
</table>

**Quantitative Biology Track**

This unofficial track is for students interested in applying quantitative approaches, including mathematical, statistical, and computational techniques, to fundamental problems in biology. Because courses for this track are still being developed in conjunction with the Departments of Mathematics and Statistics, students should check with their advisor for new quantitative biology courses:

<table>

Majors

- Bachelor of Arts in Biology (p. 620)
- Bachelor of Science in Biology (p. 621)
- Bachelor of Science in Microbiology (p. 622)
- Bachelor of Science in Molecular and Cell Biology (p. 623)
- Bachelor of Science in Zoology (p. 625)

Minors

- Bioinformatics Minor (p. 626)
- Biology Minor (p. 627)

Biology - BA

The BA degree in Biology, through the availability of a large number of electives, gives students maximum flexibility in earning a biology degree. The 15-18 hour minor requirement, including 6 hours of advanced courses in a discipline other than biology, provides students with the opportunity to include significant coursework in areas such as foreign language, business, education, or social sciences. The BA program is recommended for students with broad educational objectives or who intend to pursue further education in areas such as allied health professions, professional schools, or teaching certification.

### Total Program Hours 120

#### Biology - BS

The BS degree in Biology is designed for students to obtain a comprehensive, solid foundation in the major branches of Biology. The degree provides the opportunity for extensive study across the breadth of biological disciplines, ranging from molecular and cellular biology to ecology and evolution. This degree plan is recommended for students preparing for graduate programs in biological sciences or any professional programs in health and medical sciences such as medical, dental or veterinary schools.

Select one of the following: 5

Any 300-400 level BIOL course (p. 839) 4
of microbial physiology and biochemistry, microbial genetics, and developing areas like the molecular biology of microorganisms. The curriculum provides excellent training toward a career in any one of many areas of industrial microbiology and public health services. It is also an ideal preparation for advanced study or professional school in medicine, dentistry and other related fields, especially medical technology and biotechnology.

### Molecular and Cell Biology - BS

Students who select Molecular and Cell Biology as their major will receive a strong background in the cellular and molecular aspects of biology with particular emphasis on eukaryotes. The major provides an excellent foundation for a career in biotechnology, genetic engineering, MD/PhD programs or basic biological research.

- CHEM 102 Fundamentals of Chemistry II 4
- & CHEM 112 and Fundamentals of Chemistry Laboratory II 4
- MATH 148 Calculus II for Biological Sciences 4
- Communication elective (p. 23) 3

#### Semester Credit Hours 15

### Second Year

#### Fall
- BIOL 213 Molecular Cell Biology 3
- CHEM 227 Organic Chemistry I 4
- & CHEM 237 and Organic Chemistry Laboratory 4
- PHYS 201 College Physics 4
- American history elective (p. 26) 1,2 3

#### Semester Credit Hours 14

### Spring

- BIOL 214 Genes, Ecology and Evolution 3
- CHEM 228 Organic Chemistry II 4
- & CHEM 238 and Organic Chemistry Laboratory 4
- PHYS 202 College Physics 4
- American history elective (p. 26) 1,2 3

#### Semester Credit Hours 14

#### Total Semester Credit Hours 58

1. Students seeking teacher certification must take HIST 105 and HIST 106. Other students may choose HIST 105 and HIST 106 or any 6 hours of American history courses (3 hours may be in Texas history).
2. Students successfully completing the required four semesters of upper-level ROTC courses may substitute these courses for 3 hours of American history and 3 hours of government/political science.

The following are CBK courses and must be completed prior to the start of the full semester: BIOL 111, BIOL 112, BIOL 213, BIOL 214, CHEM 101 & CHEM 111, CHEM 102 & CHEM 112, CHEM 227 & CHEM 237, CHEM 228 & CHEM 238, MATH 147, MATH 148.

### Fourth Year

#### Fall
- BIOL 413 Cell Biology 3
- BIOL 414 Developmental Biology 3
- BIOL 423 Cell Biology Laboratory 5 2
- POLS 206 American National Government 6 3
- Language, philosophy and culture (p. 24) 3
- Elective 4 3

#### Semester Credit Hours 17

### Spring

- POLS 207 State and Local Government 6 3
- Select directed electives from the list below 3 6
- Creative arts (p. 25) 3
- Elective 4 3

#### Semester Credit Hours 15

#### Total Semester Credit Hours 62

3. Two courses in the major must be designated as writing intensive.
4. Select from any 100-499 course not used elsewhere. (Except AGLS 101, BIMS 101; BIOL 101, BIOL 107, BIOL 113, BIOL 206; BUSN 100; CHEM 106, CHEM 116, HORT 101; MATH 102; STLC 100-499 (p. 1070); WFSC 101.) Only one KINE 199 may be used as a general elective.
5. Can be replaced by BIOL 435 or BIOL 455.
6. Students successfully completing the required four semesters of upper-level ROTC courses may substitute these courses for 3 hours of American history and 3 hours of government/political science.

Zoology - BS

The Zoology degree program is designed to expose students to all aspects of the study of animals. Following foundation courses on the principles of vertebrate and invertebrate zoology, students may select from a broad range of classes in animal biology, ranging from cellular and developmental biology, physiology, and anatomy to ecology and evolution. Graduates enter into advanced studies in zoology, specialized zoological fields in agriculture and renewable resources, or such professional fields as medicine, veterinary medicine, dentistry and other health-related areas.

Bioinformatics - Minor

Overview

In the early 21st century we have gained the ability to decipher and manipulate the genetic information of organisms. We have also seen dramatic advances in imaging technologies from the macro to nano scales (Satellites/UAVs, hyper-spectral imaging, GPS, MRI, confocal and two photon microscopy, x-ray crystallography, etc.). Concomitant with, and underlying these advances, has been a revolution in information technology in which we have seen ever accelerating computational processing speeds and ever more massive data sets. These changes are driving a fundamental transformation of the biological sciences. In order to provide our students with the educational foundation they need to not just flourish, but to lead in this dramatically altered environment, we are offering a minor in the area of Bioinformatics to provide effective training at the interface of biological applications and computational tools. While students will be trained using the most advanced tools and applications available, the minor will focus on core concepts and approaches, to provide a durable skill set that can be applied to new tools and applications that will inevitably develop. The core curriculum of the minor will cover the essentials of effective computation, as well as the handling, exploration and utilization of large data sets.

BICH 464 Bacteriophage Genomics
discoveries almost always depend on a fundamental understanding of chemistry and the pursuit of these discoveries, as a way to improve the world in which we live, drives those who seek to be a part of the process. The Department of Chemistry offers coursework and research in all the major areas of chemistry, organized into programs leading to the degrees of Bachelor of Arts and Bachelor of Science. Both degree programs are suitable as terminal degree programs as well as for preparation for more advanced study in chemistry and related areas or as preparation for many professional programs in a variety of career fields. The BS program is more rigorous with respect to required mathematics and chemistry courses. It is particularly appropriate for those students who plan a career in the chemical industry or who intend to pursue advanced degrees in chemistry, biochemistry, chemical physics or forensics. An attractive number of free electives in this degree program allows students to take courses in interdisciplinary focus areas. The BA program offers the greatest degree of flexibility for students who see chemistry as a springboard into a related career field such as medicine, pharmacy, law, science writing, teaching or business for example. Chemistry majors are counseled by PhD chemistry faculty advisors fully familiar with the many options available in the chemistry and other departments, so as to optimize each student’s program of study to meet individual needs. The Department of Chemistry (http://chem.tamu.edu) website provides additional information about the degree plans, advising, and career opportunities for chemistry majors.

Although students may choose a variety of electives and/or minors in either the BA or BS degree programs, the following chemistry tracks have been developed to guide students in choosing electives.

**Chemistry Tracks**

In addition to the traditional BS degree (which allows for optional minors) and the traditional BA degree (minor required), the Department of Chemistry offers five tracks to guide students in their selection of electives for particular career paths in biological chemistry, environmental chemistry, chemical education, medicine, dentistry and pharmacy. A traditional minor requires that all minor courses must be taken from the same department and approved by the department granting the minor. These tracks provide the student an opportunity to replace a traditional minor with a broad spectrum of elective courses focused, not in a single department, but in an area of emphasis. A list of the recommended elective courses for each track may be obtained from the Office of the Undergraduate Advisor in Room 104 Chemistry Building or from the Department of Chemistry (http://chem.tamu.edu) website.

**Cooperative Education Program in Chemistry**

Under suitable circumstances, chemistry majors may participate in a cooperative education program in which the student alternates periods of attendance at the University with periods of employment in industry. This year-round cooperative program of college study and industrial experience is educationally enriching and meaningful, and also has the benefit of providing substantial financial assistance to the student without unduly prolonging the completion of the BS or BA degree program.

- **Biology - Minor**

A minor in Biology should represent coursework taken in the discipline beyond courses that might be used to satisfy core curriculum science requirements (8 credits). Therefore, though BIOL 111 and BIOL 112 are prerequisites to all of the listed courses, they are not considered part of the minor program. The coursework listed represents various sub-disciplines within the field of Biology and would give the student an overall knowledge base fitting a Minor in Biology.

**Program Requirements**

Students must have a C average in all courses taken for a minor in Biology. BIOL 484, BIOL 491 and BIOL 485 credits will not be allowed to count for the minor, nor used in the Biology GPA calculation.

</tbody>
</table>

Minimum of 16 hours required.
Minimum of 6 hours at the 300- to 400-level.
Students must complete at least one course in each of the five categories. If a course in statistics is not already required for a student’s major, then STAT 211, STAT 301, STAT 302 or STAT 303 is strongly recommended. Independent research experiences through 491 courses is encouraged.

- **Department of Chemistry**

An understanding of chemistry is critical to an understanding of life and its associated activities. Chemistry and chemical principles profoundly influence the way we live, communicate, and interact with one another, so it is little wonder that a strong background in chemistry provides a solid foundation for a variety of careers of major importance in the twenty-first century. Chemistry is uniquely positioned at the crossroad between the biological and physical sciences. By exploiting their understanding of both realms, chemists and other professionals with strong backgrounds in chemistry have made, and continue to make, major contributions to improve the human condition. Major technological and biological

- Bachelor of Science in Chemistry, Biological Chemistry Track (p. 639)
- Bachelor of Science in Chemistry, Environmental Chemistry Track (p. 640)
- Bachelor of Science in Chemistry, Materials Chemistry Track (p. 642)

**Minors**
- Minor in Chemistry (p. 643)

**Chemistry - BA**

The Bachelor of Arts program, through the availability of a generous number of electives, gives the student a firm and broadly based foundation in chemistry, with the option of pursuing other educational objectives involving specialization in at least one other field in depth. This objective is accomplished by means of the BA program flexibility and by the inclusion of a minor area of study in another discipline or completion of a track as outlined above. Additional elective hours allow further diversification.

The BA degree offers somewhat more flexibility than the BS program, in terms of tailoring a program of study that combines chemistry with an interest in subject areas such as biochemistry, biology, business, computer science, education, forensics, medicine or physics. Although the BA program may in any specific case turn out to be a somewhat less technical curriculum, it meets the needs of many students who plan to use chemistry as a springboard to a career in chemical sales, marketing, law, technical writing, teaching at a pre-college level, science journalism, etc., to name only a few possibilities.

A BA degree in Chemistry coupled with a minor in Biology, or completion of a biological chemistry track, is excellent preparation for a variety of careers in the health-related disciplines. In particular, a BA degree in Chemistry is excellent and proven preparation for medical and dental schools, and affords the superior student the opportunity to maintain flexibility for a broad spectrum of medical or dental careers.

Although not required for the BA program, abundant research opportunities are available to students. The BA program also permits and encourages non-technical elective courses.

**Semester Credit Hours** 14

**Total Semester Credit Hours** 120

---

1. Choose a section designated for chemistry majors.
2. Students may substitute any 6 hours of American history courses approved by the University Core Curriculum to fulfill this requirement, but no more than 3 hours may be in Texas history. Students seeking teacher certification must take HIST 105 and HIST 106.
These electives must include 12 hours which meet the language, philosophy and culture (3 hours), creative arts (3 hours), social and behavioral science (3 hours) and communication (3 hours) requirements of the University Core Curriculum. In addition, 6 hours of courses must be in the area of international and cultural diversity. These may be in addition to the previous 12 hours of University Core Curriculum courses, or if a course in this category satisfies an area of the Core, it can be used to meet both requirements. Additional elective hours must be used to complete a required minor approved by the granting department or students must satisfy the requirements of one of the approved chemistry track programs. BA chemistry majors may take CHEM 485 or CHEM 491 as elective courses. The total hours of CHEM 485 and CHEM 491 taken on a graded (A-F) basis may not exceed 9. Additional hours of these courses may be taken on an S/U basis. A maximum of 6 hours of these courses may be included on the degree plan. Electives should be chosen in consultation with the chemistry advisor, and should be selected to meet the residency requirement (36 hours at 300-400- level must be taken at TAMU). Electives recommended in the various track programs should be strongly considered.

### Chemistry - BA, Biological Chemistry or Medical, Dental, Pharmacy School Track

Many students planning to enter medical, dental, or pharmacy school prefer a bachelor of arts degree that contains a large number of elective courses that may be used to satisfy pre-professional school requirements. With that in mind, this track recommends an effective way to use some of the available free electives in the BA chemistry program to satisfy the pre-professional requirements for these programs. Courses in anatomy, biochemistry, biology, genetics, and microbiology are recommended. Additional free electives, of which there will be many, may be used to strengthen the student’s program of study in a manner decided by the student and the academic advisor.

Electives recommended in the various track programs should be strongly considered.

Chemistry - BA, Chemical Education Track

The chemical education track provides the student an opportunity to obtain secondary teacher certification in addition to completion of the requirements for a degree in chemistry. Many students who plan to become high school chemistry teachers or to pursue a master's degree in chemical education will find this track attractive. Students must complete the requirements for secondary teacher certification as defined by the College of Education and Human Development (consultation with the College of Education and Human Development is required).

Chemistry - BA, Environmental Chemistry Track

This environmental chemistry track contains a very large number of elective courses and provides even greater opportunity for students to select electives which provide for a career focus in environmental chemistry. The large number of electives makes it possible for students to combine interests in environmental issues with other interests such as business, law, and politics. Electives may be chosen from recommended courses in atmospheric sciences, bioenvironmental science, biology, geography, geology, geosciences, microbiology and oceanography.

Course for Minor

CHEM 485 Directed Studies
CHEM 491 Research

Semester Credit Hours 12

Total Semester Credit Hours 120

1 Select a section designated for chemistry majors.
2 Students may substitute any 6 hours of American history courses approved by the University Core Curriculum to fulfill this requirement, but no more than 3 hours may be in Texas history. Students seeking teacher certification must take HIST 105 and HIST 106.
3 This is a designated C- or W-course.
4 These electives must include 12 hours which meet the language, philosophy and culture (3 hours), creative arts (3 hours), social and behavioral science (3 hours) and communication (3 hours) requirements of the University Core Curriculum. (See page 17). In addition, 6 hours of courses must be in the area of international and cultural diversity. These may be in addition to the previous 12 hours of University Core Curriculum courses, or if a course in this category satisfies an area of the Core, it can be used to meet both requirements. Additional elective hours must be used to complete a required minor approved by the granting department or students must satisfy the requirements of one of the approved chemistry track programs. BA chemistry majors may take CHEM 485 or CHEM 491 as elective courses. The total hours of CHEM 485 and CHEM 491 taken on a graded (A-F) basis may not exceed 9. Additional hours of these courses may be taken on an S/U basis. A maximum of 6 hours of these courses may be included on the degree plan. Electives should be chosen in consultation with the chemistry advisor, and should be selected to meet the residency requirement (36 hours at 300-400-level must be taken at TAMU). Electives recommended in the various track programs should be strongly considered.

Chemistry - BS

The BS program in Chemistry is arranged so that a student obtains a comprehensive, solid foundation in all of the major branches of chemistry, combined with a suitable measure of individual flexibility. The latter objective is met in part by a strong emphasis on involving the undergraduate BS chemistry major in exciting, innovative, state-of-the-art research programs. Most students in the BS program become involved in research during their junior year and continue this until graduation. Students frequently receive research scholarships and fellowships, which include opportunities for summer research programs. It is not uncommon for an undergraduate chemistry major to be a coauthor of scientific publications in major research journals before graduation.

Undergraduate chemistry research activities involve substantial use of modern scientific equipment, including major instrumentation. The student involved in this activity also gains considerable insight into the profession by means of substantial individual contact with chemistry department faculty.

The BS degree in Chemistry is the appropriate program for students planning advanced degree programs in chemistry, biochemistry, forensics, chemical physics and other fields. Students planning careers in chemical industry should also choose the BS degree in Chemistry. Students may wish to choose electives suggested in the biological or environmental chemistry tracks. This degree program satisfies fully the accreditation requirements of the American Chemical Society.

- PHYS 309: Modern Physics 3

Select two of the following: 4 5
- Communication (p. 23)
- Language, philosophy and culture (p. 24)
- Creative arts (p. 25)
- Social and behavioral sciences (p. 27)
- General elective 6

**International and cultural diversity (p. 42)**

**Semester Credit Hours** 15

**Total Semester Credit Hours** 20

---

1. Select a section designated for chemistry majors.
2. Students may substitute any 6 hours of American history courses approved by the University Core Curriculum to fulfill this requirement, but no more than 3 hours may be in Texas history. Students seeking teacher certification must take HIST 105 and HIST 106. This is a designated C- or W-course.
3. These electives must include 12 hours of courses which meet the language, philosophy and culture (3 hours), creative arts (3 hours), social and behavioral science (3 hours) and communication (3 hours) requirements of the University Core Curriculum (p. 22). In addition, 6 hours of courses must be in the area of International and Cultural Diversity (p. 42). These may be in addition to the previous 12 hours of University Core Curriculum (p. 22) courses, or if a course in this category satisfies an area of the Core, it can be used to meet both requirements. Electives should be chosen in consultation with the chemistry advisor. Electives should be chosen in consultation with the chemistry advisor and should be selected to meet the residency requirement (36 hours at 300-400 level must be taken at TAMU). Electives recommended in the various track programs should be strongly considered.
4. The total hours of CHEM 485 and CHEM 491 taken by BS chemistry majors on a graded (A–F) basis may not exceed 15. Additional hours of these courses may be taken on a satisfactory/unsatisfactory basis.
Texas A&M University

6 Students wishing to complete an American Chemical Society certified degree program must take at least one semester of biochemistry (i.e., BICH 410 or BICH 440).

Chemistry - BS, Biological-Chemistry Track

The biological chemistry track has been designed for students interested in pursuing graduate study in biological chemistry, biochemistry, pharmacology or related fields or a career in the pharmaceutical industry. Students who wish to enter an MD/PhD program or medical, dental or pharmacy school will, in most cases, need to take an additional advanced biology course beyond those recommended for this track and should check the admission requirements for these programs with the Office of Professional School Advising. Courses in biology, biochemistry, genetics and statistics are recommended as electives.

Chemistry - BS, Environmental Chemistry Track

Chemistry plays a major role in most environmental issues and this track recommends electives in a broad spectrum of courses designed to prepare students to address environmental problems from a variety of perspectives. Electives may be chosen from recommended courses in atmospheric sciences, bioenvironmental science, biology, geography, geology, microbiology and oceanography.

1. Select a section designated for chemistry majors.
2. Students may substitute any 6 hours of American history courses approved by the University Core Curriculum (p. 22) to fulfill this requirement, but no more than 3 hours may be in Texas history. Students seeking teacher certification must take HIST 105 and HIST 106.
3. This is a designated C- or W-course.
Chemistry - BS, Materials Chemistry Track

Overview
The Department of Chemistry offers a Bachelor of Science in Chemistry with a Materials Chemistry Track.

Creative arts (p. 25)
Social and behavioral sciences (p. 27)
International and cultural diversity (p. 42)

Semester Credit Hours 15

Total Semester Credit Hours 120

1 Students may substitute any 6 hours of American history courses approved by the University Core Curriculum (p. 22) to fulfill this requirement, but no more than 3 hours may be in Texas history. Students seeking teacher certification must take HIST 105 and HIST 106.
2 Select a section designated for chemistry majors.
3 This is a designated C- or W-course.
4 In consultation with an advisor, choose 12 hours from among CHEM 220/MSEN 220; CHEM 462; CHEM 470; MEEN 222/MSEN 222 OR BMEN 343, MEEN 458
5 These electives must include 12 hours of courses which meet the language, philosophy and culture (3 hours), creative arts (3 hours), social and behavioral science (3 hours) and communication (3 hours) requirements of the University Core Curriculum (p. 22). (See page 17). In addition, 6 hours of courses must be in the area of International and Cultural Diversity (p. 42). These may be in addition to the previous 12 hours of University Core Curriculum (p. 22) courses, or if a course in this category satisfies an area of the Core, it can be used to meet both requirements. Electives should be chosen in consultation with the chemistry advisor. Electives should be chosen in consultation with the chemistry advisor and should be selected to meet the residency requirement (36 hours at 300-400 level must be taken at TAMU). Electives recommended in the various track programs should be strongly considered.
6 The total hours of CHEM 485 and CHEM 491 taken by BS chemistry majors on a graded (A–F) basis may not exceed 15. Additional hours of these courses may be taken on a satisfactory/unsatisfactory basis.
7 Students wishing to complete an American Chemical Society certified degree program must take at least one semester of biochemistry (i.e., BICH 410 or BICH 440).

Chemistry - Minor

Students seeking a minor in chemistry must complete the Declaration of Minor in Chemistry form and have it approved by the undergraduate advisor in chemistry (Room 104 Chemistry) and their academic advisor. A minor in Chemistry should represent course work taken in the discipline beyond courses that might be used to satisfy core curriculum science requirements (8 credits). Therefore, though CHEM 101/CHEM 111 or CHEM 107 and CHEM 102/CHEM 112 are prerequisites to all of the listed courses, they are not considered part of the minor program. The course work listed (17-20 credits) represents various sub-disciplines within the field of Chemistry and would give the student an overall knowledge base fitting a Minor in Chemistry. This is consistent with the statement on minors published by the American Chemical Society.

Program Requirements

The student will choose FIVE lecture courses (14-15 credits) and THREE laboratory courses (3-5 credits) from categories A.-E. below. The student must take at least one course from FOUR of the FIVE categories. Students must have a C average in all courses taken for a minor in Chemistry. CHEM 491 and CHEM 485 credits will not be allowed to count for the minor nor used in the Chemistry GPA calculation. Substitution of courses without the CHEM prefix will not be allowed.

Department of Mathematics

The Department of Mathematics offers curricula which lead to the following undergraduate degrees: Bachelor of Science in Applied Mathematical Sciences, Bachelor of Arts in Mathematics and Bachelor of Science in Mathematics. An Integrated Fast Track combined baccalaureate/graduate degree program is also offered.

The curriculum for the BS in Applied Mathematical Sciences includes courses in economics, industrial engineering, statistics, computer science and mathematics. A student completing this program is prepared to enter employment with analytical and quantitative tools relevant to modern technological industries and/or modern financial markets. On the other hand, with the appropriate electives chosen, the student is prepared to enter quantitatively oriented graduate programs. Advising for this degree option is done through the Undergraduate Program Office in the Department of Mathematics.

With carefully chosen electives in education, any one of the above three degree plans can lead to teacher certification. Students interested in teacher certification may find the BA degree plan the most suitable since this degree plan offers the greatest flexibility for the inclusion of teacher certification courses.

Faculty

Allen, Angela J, Instructional Assistant Professor
Mathematics
MS, Texas A&M University, 2005

Anshelevich, Michael V, Professor
Mathematics

Semester Credit Hours  14

Fourth Year

Fall
Select six hours from the following:  6
MATH 407-MATH 499 (p. 982)
STAT 404-STAT 482 (p. 1068)
CSCE 210-CSCE 470 (p. 865)  6
Select nine hours from the following:  9
ISEN 320 or ISEN 340 (p. 949)
ECON 311-ECON 489 (p. 882)
FINC 309-FINC 489 (p. 911)
ECMT 463  Introduction to Econometrics  2

Semester Credit Hours  15

Spring
MATH 409  Advanced Calculus I  3
POLS 207  State and Local Government  3
PHYS 218  Mechanics  4
Creative arts (p. 25)  3

Semester Credit Hours  13

Total Semester Credit Hours  120

2. The remaining 4 hours may be selected from: ASTR 111, ATMO 201/ATMO 202, BIOL 111, BIOL 112, CHEM 101/CHEM 111, CHEM 102/CHEM 112, CHEM 107/CHEM 117, GEOL 101/GEOL 102, OCNG 251/OCNG 252.
3. MATH 170 is highly recommended for math majors co-enrolled in MATH 150, MATH 151, MATH 152, MATH 171 or MATH 172.
4. Select 3 hours from any 200-400 level course.
5. Three elective hours must be chosen from the approved University Core Curriculum (p. 22) list for creative arts. In addition, 6 hours of courses must be in the area of International and Cultural Diversity (p. 42). These may be in addition to University Core Curriculum (p. 22) courses, or if a course in this category satisfies an area of the Core, it can be used to meet both requirements. Students desiring teacher certification should consult the requirements for certification before registering for electives.

Applied Mathematical Sciences - BS, Biological Science Emphasis

Many advances in technology and business are achieved by people applying technical knowledge from statistics, computing science, finance, economics and mathematics. The curriculum in applied mathematical sciences provides study in all of these areas, with ample electives available to allow further in-depth study of any of these areas. In fact, there are six emphases in this curriculum: Applied Mathematics, Statistics, Actuarial Science, Economics, Biological Science and Scientific Computing. The Actuarial Science emphasis includes mathematical finance.

A student completing this program is prepared to enter employment with analytical and quantitative tools relevant to technological industries and/or modern financial markets. On the other hand, with the appropriate electives chosen, the student is prepared to enter quantitatively oriented graduate schools. All advising for this degree option is done through the Undergraduate Program Office in the Department of Mathematics.
# Program Requirements

Biological Science Emphasis: Consult with departmental advisor.

| Total Semester Credit Hours | 120 |

**Notes:**
1. Select from MATH 285 or BIOL 285 (Quantative Biology Seminar.) Consult Departmental advisor for selection of proper section.
2. Select from MATH 325, MATH 407-499 (p. 982). One course must be a W or C course.
3. Select 3 hours from any 200-400 level course.
Three elective hours must be chosen from the approved University Core Curriculum (p. 22) list for creative arts. In addition, 6 hours of courses must be in the area of International and Cultural Diversity (p. 42). These may be in addition to University Core Curriculum (p. 22) courses, or if a course in this category satisfies an area of the Core, it can be used to meet both requirements. Students desiring teacher certification should consult the requirements for certification before registering for electives.

Remaining electives may be selected from any 100-499 course not used elsewhere, (except ALED 125; ASTR 109/PHYS 119; BMEN 101; BUSN 100; ISEN 101; KINE 199; LAND 101; MATH 102-148, MATH 151-166 (p. 982), MATH 304, MATH 309, MATH 311, MATH 367, MATH 375, MATH 376; PHYS 109/ASTR 109, PHYS 119/ASTR 119, PHYS 201, PHYS 202, PHYS 205, PSYC 301; STAT 201 STAT 301 - 303 (p. 1068); STLC 102; URPN 200; WFSC 101).

Maximum of 4 hours of MATH 147, MATH 151, or MATH 171 may be used in this degree program.

Maximum of 4 hours of MATH 148, MATH 152, or MATH 172 may be used in this degree program.

Maximum of 3 hours of MATH 220 or CSCE 222/ECEN 222 may be used in this degree program.

Maximum of 3 hours of MATH 411 or STAT 414 may be used in this degree program.

Maximum of 3 hours of MATH 417, MATH 437 or CSCE 442 may be used in this degree program.

If a grade of D or F is earned in any of the following courses, MATH 151/MATH 171, MATH 152/MATH 172, MATH 221/MATH 251/MATH 253, MATH 220, MATH 323 or MATH 308, this course must be immediately retaken and a grade of C or better earned. The department will allow at most two D’s in upper-level (325-499) courses. If a third D is earned, one of the three courses in which a D was earned must be retaken and a grade of C or better earned.

Applied Mathematical Sciences - BS, Computational Emphasis

Many advances in technology and business are achieved by people applying technical knowledge from statistics, computing science, finance, economics and mathematics. The curriculum in applied mathematical sciences provides study in all of these areas, with ample electives available to allow further in-depth study of any of these areas. In fact, there are six emphases in this curriculum: Applied Mathematics, Statistics, Actuarial Science, Economics, Biological Science and Scientific Computing. The Actuarial Science emphasis includes mathematical finance.

A student completing this program is prepared to enter employment with analytical and quantitative tools relevant to technological industries and/or modern financial markets. On the other hand, with the appropriate electives chosen, the student is prepared to enter quantitatively oriented graduate schools. All advising for this degree option is done through the Undergraduate Program Office in the Department of Mathematics.

<td>120</td>
</tr>
</tbody>
</table>

1. MATH 170 is highly recommended for math majors co-enrolled in MATH 150, MATH 151, MATH 152, MATH 171 or MATH 172.
3. Select 3 hours from any 200-400 level course.
Three elective hours must be chosen from the approved University Core Curriculum (p. 22) list for creative arts. In addition, 6 hours of courses must be in the area of International and Cultural Diversity (p. 42). These may be in addition to University Core Curriculum (p. 22) courses, or if a course in this category satisfies an area of the Core, it can be used to meet both requirements. Students desiring teacher certification should consult the requirements for certification before registering for electives.

Remaining electives may be selected from any 100-499 course not used elsewhere, (except ALED 125, ASTR 109/PHYS 109, ASTR 119/PHYS 119; BMEN 101; BUSN 101; ISEN 101; KINE 199; LAND 101; MATH 102-148, MATH 151-166 (p. 982), MATH 304, MATH 309, MATH 311, MATH 367, MATH 368, MATH 375, MATH 376; PHYS 109/ASTR 109, PHYS 119/ASTR 119, PHYS 201, PHYS 202, PHYS 205; PSYC 301; STAT 201; STAT 301 - 303 (p. 1068); STLC 102; URPN 200; WESC 101).

Maximum of 4 hours of MATH 147, MATH 151, or MATH 171 may be used in this degree program.

Maximum of 4 hours of MATH 148, MATH 152, or MATH 172 may be used in this degree program.

Maximum of 3 hours of MATH 220 or CSCE 222/ECEN 222 may be used in this degree program.

Maximum of 3 hours of MATH 411 or STAT 414 may be used in this degree program.

Maximum of 3 hours of MATH 417, MATH 437 or CSCE 442 may be used in this degree program.

If a grade of D or F is earned in any of the following courses, MATH 151/MATH 171, MATH 152/MATH 172, MATH 221/MATH 251/MATH 253, MATH 220, MATH 323 or MATH 308, this course must be immediately retaken and a grade of C or better earned. The department will allow at most two D’s in upper-level (325-499) courses. If a third D is earned, one of the three courses in which a D was earned must be retaken and a grade of C or better earned.

Applied Mathematical Sciences - BS, Math Emphasis

Many advances in technology and business are achieved by people applying technical knowledge from statistics, computing science, finance, economics and mathematics. The curriculum in applied mathematical sciences provides study in all of these areas, with ample electives available to allow further in-depth study of any of these areas. In fact, there are six emphases in this curriculum: Applied Mathematics, Statistics, Actuarial Science, Economics, Biological Science and Scientific Computing. The Actuarial Science emphasis includes mathematical finance.

A student completing this program is prepared to enter employment with analytical and quantitative tools relevant to technological industries and/or modern financial markets. On the other hand, with the appropriate electives chosen, the student is prepared to enter quantitatively oriented graduate schools. All advising for this degree option is done through the Undergraduate Program Office in the Department of Mathematics.

---

2. MATH 170 is highly recommended for math majors co-enrolled in MATH 150, MATH 151, MATH 152, MATH 171 or MATH 172.

3. Select 3 hours from any 200-400 level course.

Six (6) elective hours must be chosen from the area of International and Cultural Diversity (p. 42). These may be in addition to University Core Curriculum (p. 22) courses, or if a course in this category satisfies an area of the Core, it can be used to meet both requirements. Students desiring teacher certification should consult the requirements for certification before registering for electives. Remaining electives may be selected from any 100-499 course not used elsewhere, (except ALED 125; ASTR 109/PHYS 109, ASTR 119/PHYS 119; BMEN 101; BUSN 100; ISEN 101; KINE 199; LAND 101; MATH 102-148, 151-166 (p. 982), MATH 304, MATH 309, MATH 311, MATH 367, MATH 368, MATH 375, MATH 376; PHYS 109/ ASTR 109, PHYS 119/ASTR 119, PHYS 201, PHYS 202, PHYS 205; PSYC 301; STAT 201, STAT 301 - 303 (p. 1068); STLC 102; URPN 200; WESC 101).

Maximum of 4 hours of MATH 147, MATH 151, or MATH 171 may be used in this degree program.

Maximum of 4 hours of MATH 148, MATH 152, or MATH 172 may be used in this degree program.

Maximum of 3 hours of MATH 220 or CSCE 222/ECEN 222 may be used in this degree program.

Maximum of 3 hours of MATH 411 or STAT 414 may be used in this degree program.

Maximum of 3 hours of MATH 417, MATH 437 or CSCE 442 may be used in this degree program.

If a grade of D or F is earned in any of the following courses, MATH 151/MATH 171, MATH 152/MATH 172, MATH 221/MATH 251/MATH 253, MATH 220, MATH 323 or MATH 308, this course must be immediately retaken and a grade of C or better earned. The department will allow at most two D’s in upper-level (325-499) courses. If a third D is earned, one of the three courses in which a D was earned must be retaken and a grade of C or better earned.

Applied Mathematics - 5-Year Bachelor of Science/Master of Science in Mathematics

The FastTrack Degree Program enables ambitious and academically talented mathematics majors at Texas A&M University to earn both a bachelor’s degree and a master’s degree within a period of five years after entering Texas A&M.

Amongst the various advantages of the program, upon its completion a student will be in an exceptionally strong position to enter:

- The professional industrial job marketplace;
- A career in secondary education;
- A doctoral program in mathematics, or in a related discipline, at Texas A&M or another university.

The related disciplines include computer science, engineering, physics, statistics, genetics, economics, business administration, education, and biology.

Eligibility for entering a doctoral program in one of these disciplines would depend in part on the undergraduate and graduate external options and areas of emphasis that were reflected in a student’s individual degree plan.

1. MATH 170 is highly recommended for math majors co-enrolled in MATH 150, MATH 151, MATH 152, MATH 171 or MATH 172.
3. Select 3 hours from any 200-400 level course.
4. Three elective hours must be chosen from the approved University Core Curriculum (p. 22) list for creative arts. In addition, 6 hours of courses must be in the area of International and Cultural Diversity (p. 42). These may be in addition to University Core Curriculum (p. 22) courses, or if a course in this category satisfies an area of the Core, it can be used to meet both requirements. Students desiring teacher certification should consult the requirements for certification before registering for electives.

Remaining electives may be selected from any 100-499 course not used elsewhere (except ALED 125; ASTR 109/PHYS 109, ASTR 119/PHYS 119; BMEN 101; BUSN 100; ISEN 101; KINE 199; LAND 101; MATH 102-148, MATH 151-166 (p. 982), MATH 304, MATH 309, MATH 311, MATH 367, MATH 368, MATH 375, MATH 376; PHYS 109/ASTR 109, PHYS 119/ASTR 119, PHYS 202, PHYS 205, PSYC 301; STAT 201, STAT 301 - 303 (p. 1068); STLC 102; URPN 200; WFSC 101).

6. This 6 hours will be applied towards both BS and MS degrees in Mathematics.

7. The overall program hours (156 hours) includes 36 hours for a non-thesis option or 32 hours for a thesis option (up to six of which are MATH 691). Up to six hours of graduate courses may double count. MATH 601 is prohibited for all graduate degree plans. Except for the MS teaching track, no distance class may be used on the degree plan nor may MATH 147, MATH 151, MATH 152, MATH 171 or MATH 172 may be used in this degree program. For the MS teaching track, students must take four distance courses: MATH 629, MATH 645, MATH 646 and MATH 696. All five tracks require at least 24 credit hours of mathematics of which at most six may be undergraduate. Depending on the MS track, courses outside of mathematics may be required or optional. For additional information, reference https://www.math.tamu.edu/graduate/masters and select the track of interest.

Maximum of 4 hours of MATH 147, MATH 151, or MATH 171 may be used in this degree program.

Maximum of 4 hours of MATH 148, MATH 152, or MATH 172 may be used in this degree program.

Maximum of 3 hours of MATH 220 or CSCE 222/ECEN 222 may be used in this degree program.
Maximum of 3 hours of MATH 411 or STAT 414 may be used in this degree program.

Maximum of 3 hours of MATH 417, MATH 437 or CSCE 442 may be used in this degree program.

If a grade of D or F is earned in any of the following courses, MATH 151 / MATH 171, MATH 152 / MATH 172, MATH 221 / MATH 251 / MATH 253, MATH 220, MATH 323 or MATH 308, this course must be immediately retaken and a grade of C or better earned. The department will allow at most two D's in upper-level (325-499) courses. If a third D is earned, one of the three courses in which a D was earned must be retaken and a grade of C or better earned.

**Mathematics - BA**

The Bachelor of Arts degree in Mathematics is intended for students who are interested in a traditional liberal arts education in mathematics. A minor field of study must be chosen for this degree.

Select 4 hours from: ASTR 111, BIOL 111, BIOL 112, CHEM 101/CHEM 111, CHEM 102/CHEM 112, CHEM 107/CHEM 117, PHYS 208. The remaining 4 hours may be selected from: ASTR 111, ATMO 201/ATMO 202, BIOL 111, BIOL 112, CHEM 101/CHEM 111, CHEM 102/CHEM 112, CHEM 107/CHEM 117, GEOL 101/GEOL 102, OCNG 251/OCNG 252, PHYS 208.

2 MATH 170 is highly recommended for math majors co-enrolled in MATH 150, MATH 151, MATH 152, MATH 171 or MATH 172.

3 Select 3 hours from any 200-400 level Language, philosophy and culture (p. 24) course.

A 15-18-hour minor field of study should be chosen in conference with a departmental advisor.

5 Six hours of courses must be in the area of international and cultural diversity. These may be in addition to other University Core Curriculum courses, or if a course in this area satisfies an area of the Core, it can be used to meet both requirements. Students desiring teacher certification should consult the requirements for certification before registering for electives.

Remaining electives may be selected from any 100-499 course not used elsewhere, (except ALED 125, ASTR 109/PHYS 109, ASTR 119/PHYS 119; BMEN 101; BUSN 100; ISEN 101; KINE 199; LAND 101; MATH 102 - 148, MATH 151 - 166 (p. 982), MATH 304, MATH 309, MATH 311, MATH 367, MATH 368, MATH 375, MATH 376, PHYS 109/ASTR 109, PHYS 119/ASTR 119, PHYS 201, PHYS 202, PHYS 205; PSYC 301; STAT 201, STAT 301, STAT 302, STAT 303; STLC 102; URPN 200; WESC 101).

6 Nine of the 12 hours of math elective courses are to be from any 400- or 600-level MATH, excluding MATH 401 and MATH 601. The last three hours can be from any 400- or 600-level MATH (excluding MATH 401 or MATH 601), STAT 404 - STAT 482 (p. 1068), CSCE 210 - CSCE 470 (p. 868) (excluding CSCE 222/ECEN 222, CSCE 285, CSCE 289, CSCE 291), or ISEN 320 - ISEN 430, (p. 949) excluding any 485 course in any department without permission of a departmental advisor. Students wishing to be certified must take MATH 403 and MATH 467. Students who plan to attend graduate school are encouraged to take MATH 416, MATH 447 and at least one 600-level course.

Three hours must be social and behavioral sciences (p. 27) and three hours must be creative arts (p. 25).

Maximum of 4 hours of MATH 147, MATH 151, or MATH 171 may be used in this degree program.

Maximum of 4 hours of MATH 148, MATH 152, or MATH 172 may be used in this degree program.

Maximum of 3 hours of MATH 220 or CSCE 222/ECEN 222 may be used in this degree program.

Maximum of 3 hours of MATH 411 or STAT 414 may be used in this degree program.

Maximum of 3 hours of MATH 417, MATH 437, or CSCE 442 may be used in this degree program.

If a grade of D or F is earned in any of the following courses, MATH 151/MATH 171, MATH 152/MATH 172, MATH 221/MATH 251/MATH 253/MATH 220, MATH 323 or MATH 308, this course must be immediately retaken and a grade of C or better earned. The department will allow at most two Ds in upper-level (325-499) courses. If a third D is earned, one of the three courses in which a D was earned must be retaken and a grade of C or better earned.

Mathematics - 5-Year Bachelor of Arts/Master of Science in Mathematics

The FastTrack Degree Program enables ambitious and academically talented mathematics majors at Texas A&M University to earn both a bachelor’s degree and a master’s degree within a period of five years after entering A&M.

Amongst the various advantages of the program, upon its completion a student will be in an exceptionally strong position to enter:

• The professional industrial job marketplace;
• A career in secondary education;
• A doctoral program in mathematics, or in a related discipline, at Texas A&M or another university.

The related disciplines include computer science, engineering, physics, statistics, genetics, economics, business administration, education, and biology.

Eligibility for entering a doctoral program in one of these disciplines would depend in part on the undergraduate and graduate external options and areas of emphasis that were reflected in a student’s individual degree plan.

---

2. MATH 170 is highly recommended for math majors co-enrolled in MATH 150, MATH 152, MATH 171 or MATH 172.

3. Six (6) hours must be selected from BICH 401-489 (p. 836); BIOL 200-470 (p. 839); CHEM 222-474 (p. 849); GENE 301-452 (p. 917); OCNG 251-252, 401-420 (p. 1020); PHYS 221, 302-305, 307-314, 324-428 (p. 1031). Four (4) hours must be selected from ASTR 111; BICH 401-489 (p. 836); BIOL 111, BIOL 112, BIOL 200-470, 318-438 (p. 839); CHEM 119, CHEM 120, CHEM 222-474 (p. 849); GENE 301-452 (p. 917); OCNG 251, OCNG 252, OCNG 401-420 (p. 1020); PHYS 221, 302-305, 307-314, 324-428 (p. 1031).

4. Select 3 hours from any 200- to 400-level Language, philosophy and culture (p. 24) course.

5. Three hours must be creative arts (p. 25) and three hours must be social and behavioral sciences (p. 27). In addition, six hours must be in the area of international and cultural diversity. These may be in addition to other University Core Curriculum (p. 22) courses, or if a course in this category satisfies an area of the Core, it can be used to meet both requirements. Students desiring teacher certification should consult the requirements for certification before registering for electives.

6. Remaining electives may be selected from any 100-499 course not used elsewhere, (except ALED 125; ASTR 109/PHYS 109, ASTR 119/PHYS 119; BMEN 101; BUSN 100; ISEN 101; KINE 199; LAND 101; MATH 102-148, MATH 151 - 166 (p. 982), MATH 304, MATH 309, MATH 311, MATH 367, MATH 368, MATH 375, MATH 376, PHYS 109/ASTR 109, PHYS 119/ASTR 119, PHYS 201, PHYS 202, PHYS 205, PSYC 301; STAT 201, STAT 301 - 303 (p. 1068); STLC 102; URPN 200; WFSC 101).

7. Twelve hours must be chosen from MATH 407 - MATH 499 (p. 982) or any 600-level MATH (excluding MATH 601). Students are required to take at least one of the following: MATH 427, MATH 431, MATH 436, MATH 439. Students are encouraged to take MATH 412, MATH 414, MATH 442, or MATH 470. Students who plan to attend graduate school are encouraged to take MATH 447 and at least one 600-level course. Departmental permission is required to take MATH 485 or to enroll in a 600-level MATH course.

---

### Mathematics - 5-Year Bachelor of Science/Master of Science in Mathematics

The FastTrack Degree Program enables ambitious and academically talented mathematics majors at Texas A&M University to earn both a bachelor’s degree and a master’s degree within a period of five years after entering A&M.

Amongst the various advantages of the program, upon its completion a student will be in an exceptionally strong position to enter:

- The professional industrial job marketplace;
- A career in secondary education;
- A doctoral program in mathematics, or in a related discipline, at Texas A&M or another university.

The related disciplines include computer science, engineering, physics, statistics, genetics, economics, business administration, education, and biology.

Eligibility for entering a doctoral program in one of these disciplines would depend in part on the undergraduate and graduate external options and areas of emphasis that were reflected in a student’s individual degree plan.

1 MATH 170 is highly recommended for math majors co-enrolled in MATH 150, MATH 151, MATH 152, MATH 171 or MATH 172.

2 Select 4 hours from: ASTR 111, BIOL 111, BIOL 112, CHEM 101/CHM 111, CHEM 102/CHM 112, CHEM 107/CHM 117.

The remaining 4 hours may be selected from: ASTR 111, ATMO 201/ATMO 202, BIOL 111, BIOL 112, CHEM 101/CHM 111, CHEM 102/CHM 112, CHEM 107/CHM 117, GEOL 101/GEOL 102, OCNG 251/OCNG 252.
Six (6) hours must be selected from BICH 401-489 (p. 836); BIOL 200-470 (p. 839); CHEM 222-474 (p. 849); GENE 301-452 (p. 917); OCNG 251-252, 401-420 (p. 1020); PHYS 221, 302-305, 307-314, 324-428 (p. 1031). Four (4) hours must be selected from ASTR 111; BICH 401-489 (p. 836); BIOL 111, 112, 200-470, 318-438 (p. 839); CHEM 119, 120, 222-474 (p. 849); GENE 301-452 (p. 917); OCNG 251-252, 401-420 (p. 1020); PHYS 221, 302-305, 307-314, 324-428 (p. 1031).

Select 3 hours from any 200- to 400-level Language, philosophy and culture (p. 24) course.

Three hours must be creative arts (p. 25) and three hours must be social and behavioral sciences (p. 27). In addition, six hours must be in the area of international and cultural diversity. These may be in addition to other University Core Curriculum (p. 22) courses, or if a course in this category satisfies an area of the Core, it can be used to meet both requirements. Students desiring teacher certification should consult the requirements for certification before registering for electives.

Remaining electives may be selected from any 100-499 course not used elsewhere, (except ALED 125; ASTR 109/PHYS 109, ASTR 119/PHYS 119; BMEN 101; BUSH 100; ISEN 101; KINE 199; LAND 101; MATH 102-148, MATH 151-166 (http://catalog.tamu.edu/undergraduate/course-descriptions/math), MATH 304, MATH 309, MATH 311, MATH 367, MATH 368, MATH 375, MATH 376; PHYS 109/ASTR 109, PHYS 119/ASTR 119, PHYS 201, PHYS 202, PHYS 205; PSYC 301; STAT 201, STAT 301 - 303 (http://catalog.tamu.edu/undergraduate/course-descriptions/stat); STLC 102; URPN 200; WFS 101).

This 6 hours will be used towards both the BS and MS degrees in Mathematics.

The overall program hours (156 hours) includes 36 hours for a non-thesis option or 32 hours for a thesis option (up to six of which are MATH 691). Up to six hours of graduate courses may double count. MATH 601 is prohibited for all graduate degree plans. Except for the MS teaching track, no distance class may be used on the degree plan nor may MATH 691 appear. For the MS teaching track, students must take four distance courses: MATH 629, MATH 645, MATH 646 and MATH 691. All five tracks require at least 24 credit hours of mathematics of which at most six may be undergraduate. Depending on the MS track, courses outside of mathematics may be required or optional. For additional information, reference https://www.math.tamu.edu/graduate/masters and select the track of interest.

Maximum of 4 hours of MATH 147, MATH 151, or MATH 171 may be used in this degree program.

Maximum of 4 hours of MATH 148, MATH 152, or MATH 172 may be used in this degree program.

Maximum of 3 hours of MATH 220 or CSCE 222/ECEN 222 may be used in this degree program.

Maximum of 3 hours of MATH 411 or STAT 414 may be used in this degree program.

Maximum of 3 hours of MATH 417, MATH 437 or CSCE 442 may be used in this degree program.

If a grade of D or F is earned in any of the following courses, MATH 151/MATH 171, MATH 152/MATH 172, MATH 221/MATH 251/MATH 253, MATH 220, MATH 323 or MATH 308, this course must be immediately retaken and a grade of C or better earned. The department will allow at most two D's in upper-level (325-499) courses. If a third D is earned, one of the three courses in which a D was earned must be retaken and a grade of C or better earned.

Mathematics - Minor

Getting a Minor in Mathematics is Simple!

Students wishing to earn a minor in mathematics do not need to visit the Mathematics Department to do so. They should see their advisor, and inform them of their intention to earn a minor in mathematics, and to have that information entered into COMPASS.

The department also wants to point out to students who are majoring in engineering or one of the sciences that it might not take more than another 18 to 24 hours to get a double major in mathematics. If that is of interest to you, contact Mathematics Undergraduate Program Office.

Program Requirements

Non-math majors can obtain a minor in mathematics by meeting the following requirements:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Semester Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>MATH 148</td>
<td>Calculus II for Biological Sciences</td>
<td>4</td>

<td></td>
</tr>
</tbody>
</table>

400 level Mathematics course

Total Semester Credit Hours 16

1 Only one of MATH 221, MATH 251, or MATH 253 can be taken to satisfy the minor, due to the course content.
2 Only one of MATH 304, MATH 309, MATH 311 or MATH 323 can be taken to satisfy the minor, due to the course content.
3 All 300-400 level MATH courses MUST be taken at Texas A&M University. No transfer work will be accepted.

Students must make a grade of “C” or better in all courses.

MATH 131, MATH 141, MATH 142, MATH 365, MATH 366, MATH 367, MATH 368, MATH 403, and MATH 485 may not be used to satisfy the requirements. MATH 485 will receive approval only under exceptional circumstances.

Department of Physics and Astronomy

Physics seeks to understand the fundamental workings of nature, from the constituents of matter deep within the nucle of atoms, to the most distant galaxies of our expanding universe, to everyday phenomena of emergent complexity, self-organization and chaos. The resulting basic
physical knowledge provides a firm foundation for innovations and is often the driving force of advanced technology. Computers, global positioning systems (GPS), the internet, lasers, magnetic resonance imaging (MRI) and other medical diagnostic tools, and space flight, along with many others, were all made possible by key advances in physics.

Physicists have a curiosity that thrives on the challenge of solving problems. Consistent with this, the physics program at Texas A&M strives to teach analytical thinking and quantitative problem-solving skills. This enables students to work productively in physics, in areas closely related to physics, and in a wide variety of areas outside of physics proper. Physicists can be found in almost any discipline that requires complex problem-solving skills. Some engage in cutting-edge research to increase our basic knowledge of the universe. Some apply new-found knowledge to make practical advances in the fields of computer science, medical science and engineering. Still others use their knowledge to advocate, advise, inform, instruct and administrate as lawyers, consultants, journalists/writers, teachers and managers.

The Department of Physics and Astronomy offers two undergraduate degree programs, a Bachelor of Arts and a Bachelor of Science, as well as minors in Astrophysics and Physics. The Department of Physics and Astronomy also offers Master of Science degrees in Astronomy and Physics, and Doctor of Philosophy degrees in Applied Physics, Astronomy and Physics.

The faculty members of the department carry out theoretical and experimental research in the areas of astronomy and astrophysics, atomic, molecular and optical physics, computational physics, cosmology, high-energy and elementary particle physics, condensed mater physics and materials science, nuclear physics and quantum optics. During the course of their undergraduate experience at Texas A&M, Physics majors have the opportunity to work with faculty in all of these areas.

Faculty

Abanov, Artem G, Associate Professor
Physics & Astronomy
PHD, Texas A&M University, 1998

Agnolet, Glenn, Professor
Physics & Astronomy
PHD, Cornell University, 1983

Akimov, Alexey, Assistant Professor
Physics & Astronomy
PHD, Moscow Institute of Technology, 2003

Allen, Roland E, Professor
Physics & Astronomy
PHD, University of Texas at Austin, 1969

Aronson, Meigan C, Professor
Physics & Astronomy
PHD, University of Illinois - Urbana-Champaign, 1988

Bassichis, William H, Professor

Becker, Katrin, Professor
Physics & Astronomy
PHD, University of Bonn, 1994

Becker, Melanie, Professor
Physics & Astronomy
PHD, University of Bonn, Germany, 1994

Belyanin, Alexey A, Professor
Physics & Astronomy
PHD, Institute of Applied Physics Russian Academy of Sciences, 1995

Chin, Siu A, Professor
Physics & Astronomy
PHD, Massachusetts Institute of Technology, 1975

Christian, Gregory A, Assistant Professor
Physics & Astronomy
PHD, Michigan State University, 2011

Depoy, Darren L, Professor
Physics & Astronomy
PHD, University of Hawaii at Manoa, 1987

Dierker, Steven B, Professor
Physics & Astronomy
PHD, University of Illinois-Urbana-Champaign, 1983

Dutta, Bhaskar, Professor
Physics & Astronomy
PHD, Oklahoma State University, 1995

Erskhimoza, Tatiana L, Instructional Associate Professor
Physics & Astronomy
DOC, Institute of Applied Physics, Russian Academy of Sciences, 1999

Eusebi, Ricardo, Associate Professor
Physics & Astronomy
PHD, University of Rochester, 2006

Finkelstein, Alexander, Professor
Physics & Astronomy
PHD, Landau Institute for Theoretical Physics, 1972

Ford, Albert L, Professor
Physics & Astronomy
PHD, University of Texas at Austin, 1972

Fries, Rainer J, Associate Professor
Physics & Astronomy
PHD, University of Regensburg, Germany, 2001

Fry, Edward S, Distinguished Professor
Physics & Astronomy
PHD, University of Michigan, 1969

Gagliardi, Carl A, Professor
Physics & Astronomy
PHD, Princeton University, 1982

Gaglardi, Carl A, Professor
Physics & Astronomy
PHD, Princeton University, 1982

Hardy, John C, Distinguished Professor
Physics & Astronomy
PHD, McGill University, 1965

Herschbach, Dudley R, Distinguished Professor
Physics & Astronomy
PHD, Harvard University, 1958
Holt, Jeremy W, Assistant Professor  
Physics & Astronomy  
PHD, Stony Brook University, 2008

Kamon, Teruki, Professor  
Physics & Astronomy  
PHD, University of Tsukuba, 1986

Katzgraber, Helmut G, Professor  
Physics & Astronomy  
PHD, University of California-Santa Cruz, 2001

Ko, Che-Ming, Professor  
Physics & Astronomy  
PHD, State University of New York at Stony Brook, 1973

Kocharovsky, Olga A, Distinguished Professor  
Physics & Astronomy  
PHD, Institute of Applied Physics, Russian Academy of Sciences, 1986

Kocharovsky, Vitaly V, Professor  
Physics & Astronomy  
PHD, Institute of Applied Physics, Russian Academy of Sciences, 1986

Krischiunas, Kevin L, Instructional Assistant Professor  
Physics & Astronomy  
PHD, University of Washington, 2000

Lee, David M, Distinguished Professor  
Physics & Astronomy  
PHD, Yale University, 1959

Lyuksyutov, Igor F, Professor  
Physics & Astronomy  

Macri, Lucas M, Professor  
Physics & Astronomy  
PHD, Harvard University, 2001

Mahapatra, Rupak K, Professor  
Physics & Astronomy  
PHD, University of Minnesota, 2000

Marshall, Jennifer L, Assistant Professor  
Physics & Astronomy  
PHD, Ohio State University, 2006

Mason, John D, Lecturer  
Physics & Astronomy  
PHD, Texas A&M University, 2016

McIntyre, Peter M, Professor  
Physics & Astronomy  
PHD, University of Chicago, 1973

Melkonian, Daniel G, Associate Professor  
Physics & Astronomy  
PHD, Simon Fraser University, 2006

Mioduszewski, Saskia, Professor  
Physics & Astronomy  
PHD, University of Tennessee, 1999

Mirabolfathi, Nader, Research Associate Professor  
Physics & Astronomy  
PHD, University of Paris XI, 2002

Nanopoulos, Dimitri V, Distinguished Professor  
Physics & Astronomy  
PHD, University of Sussex, 1973

Naugle, Donald G, Professor  
Physics & Astronomy  
PHD, Texas A&M University, 1965

Papovich, Casey J, Professor  
Physics & Astronomy  
PHD, Johns Hopkins University, 2002

Pokrovsky, Valery, Distinguished Professor  
Physics & Astronomy  
PHD, Tomsk State University, 1957

Pope, Christopher N, Distinguished Professor  
Physics & Astronomy  
PHD, University of Cambridge, 1980

Rapp, Ralf F, Professor  
Physics & Astronomy  
PHD, Rheinische Friedrich-Wilhelma University, Bonn, 1996

Rogachev, Grigory V, Professor  
Physics & Astronomy  
PHD, National Research Centre, 1999

Ross Jr, Joseph H, Professor  
Physics & Astronomy  
PHD, University of Illinois at Urbana-Champaign, 1986

Safonov, Alexei N, Professor  
Physics & Astronomy  
PHD, University of Florida, 2001

Saslow, Wayne M, Professor  
Physics & Astronomy  
PHD, University of California - Irvine, 1968

Schuessler, Hans A, Professor  
Physics & Astronomy  
DOC, Universitat Heidelberg, 1964

Scully, Marlan O, Distinguished Professor  
Physics & Astronomy  
PHD, Yale University, 1966

Sezgin, Ergin, Professor  
Physics & Astronomy  
PHD, State University of New York at Stony Brook, 1980

Sokolov, Alexei V, Professor  
Physics & Astronomy  
PHD, Stanford University, 2001

Strigari, Louis E, Assistant Professor  
Physics & Astronomy  
PHD, Ohio State University, 2005
Minors

- Astrophysics Minor (p. 670)
- Physics Minor (p. 670)

Physics - BA

The Bachelor of Arts curriculum provides the student with a firm foundation in physics and with the flexibility to choose from a large number of elective courses, thus permitting the student to explore other interests. Except for those students pursuing teacher certification, some of these elective courses are chosen to satisfy the requirements of a minor field of study. The student can, therefore, customize his or her program of study in preparation for a career in any science-related or science-required field, from intellectual property law and science reporting to physics teaching. Although not required for the BA program, students have the opportunity to become directly involved in any of the active research programs in the Department of Physics and Astronomy.

Physics - BS

The Bachelor of Science curriculum is more rigorous in its physics and mathematics course requirements and is designed primarily for students who wish to pursue an advanced degree in physics or employment as a professional physicist in an industrial setting. Because physics forms the basis of many other sciences such as chemistry, material science, oceanography, nano-engineering and geophysics, the BS program is an excellent preparation for advanced degrees in these fields. In addition, physicists are increasingly applying their talents to molecular biology, biochemistry and medicine. An important part of the BS program is student participation in experimental or theoretical research with physics and astronomy faculty.
Astrophysics - Minor

The Department of Physics and Astronomy offers a minor in Astrophysics. Contact the department for more information.

¹ Must make a grade of "C" or better.
² Select from PHYS 300-499 or ASTR 314 in consultation with an advisor.

Department of Statistics

The science of statistics deals with the collection and summarization of data, design of experiments and surveys, measurement of the magnitude of variation in both experimental and survey data, estimation of population parameters with measures of their accuracy and precision, tests of hypotheses about populations and studies of the relationships between two or more variables. While the ideal of science is to achieve a systematic interrelationship of facts, scientific methods must be a pursuit of this ideal by experimentation, observation and logical arguments from various accepted postulates. Thus, the science of statistics is a set of scientific principles and methodologies that are useful in reaching conclusions about populations and processes when the available information is both limited and variable. Hence, statistical principles are useful in all the sciences, both physical and social. Many practical applications of statistics are found in a wide variety of fields, including biology, education, social sciences, engineering, business, government and agriculture.
The Department of Statistics offers training in statistics leading to degrees of Bachelor of Science, Master of Science and Doctor of Philosophy.

• Bachelor of Science in Statistics (p. 672)

Minors

• Minor in Statistics (p. 673)

Statistics - BS

Statistics is the science of collecting and analyzing data for the purpose of making decisions in the presence of uncertainty. Data are ubiquitous in the modern day and age, and statisticians are in high demand. Multidisciplinary application areas vary widely and include health and medicine, business, engineering, physical sciences, environmental studies, and government. The curriculum in statistics provides instruction in all necessary areas, including a foundation in mathematics and probability, strategies for designing studies and collecting data, the visualization and analysis of data using popular software such as R, SAS and Python, and the process of using sample data to draw conclusions about a population. Depending on the electives selected, a student completing this program will be prepared to enter employment as a statistical analyst or to continue to graduate school in statistics or a related field.

Program Requirements

The following is a suggested schedule that includes the required courses for the BS in Statistics. It is recognized that many students will change the sequence and number of courses taken in any semester. Deviations from the prescribed course sequence, however, should be made with care to ensure that prerequisites for all courses are met.

Two lower-level science courses are to be selected from ASTR 111; BIOL 111; BIOL 112; CHEM 101/CHEM 111; CHEM 102/CHEM 112; PHYS 208; PHYS 218. A third science course (p. 23) is to be selected from any course satisfying the life and physical sciences requirement for the University Core Curriculum.

Select 8 hours from CSCE 110, CSCE 111, CSCE 121, or CSCE 206.

Select 3 hours from COMM 203, COMM 205, or COMM 243, which fulfills the communication (p. 23) requirement for the University Core Curriculum (p. 22).

Three elective hours must be chosen from the approved University Core Curriculum list for language, philosophy and culture (p. 24). Three elective hours must be chosen from the approved University Core Curriculum list for creative arts (p. 25), and three elective hours must be chosen from the approved University Core Curriculum list for social and behavior sciences (p. 27). In addition, 6 hours of courses must be in the area of international and cultural diversity (p. 42). These may be in addition to University Core Curriculum courses, or if a course in this category satisfies an area of the Core, it can be used to meet both requirements.

Students must take at least one course from the following courses: MATH 220, MATH 308, MATH 409, MATH 410, MATH 417 or MATH 437, MATH 442, MATH 446, MATH 447, MATH 469, ISEN 320, ISEN 340, ISEN 355. The student must take a total of at least 12 hours of mathematics (p. 23) and statistics elective courses.

Students must take 12 hours in an outside specialization area upon approval by a departmental advisor. At least 6 hours must be upper level hours.

Students must take at least two courses from the following courses: STAT 407, STAT 426, STAT 436, STAT 438, STAT 445, STAT 446, STAT 459, STAT 485, STAT 489, STAT 491, ISEN 350. The student must take a total of at least 12 hours of mathematics and statistics elective courses.

If a grade of D or F is earned in any of the following courses, MATH 151/MATH 171, MATH 152/MATH 172, MATH 221/MATH 251/MATH 253, MATH 220, MATH 304/MATH 323, STAT 211, or STAT 212, this course must be immediately retaken and a grade of C or better earned. The department will allow at most two D’s in upper-level (325-499) courses. If a third D is earned, one of the three courses in which a D was earned must be retaken and a grade of C or better earned.

Statistics - Minor

The Department of Statistics offers a minor in Statistics. For additional information, see the Department of Statistics website (http://www.stat.tamu.edu).

**University Studies Programs**

The College of Science offers degrees in University Studies. A University Studies degree differs from a traditional “major” in that it consists of a concentration and two minors of 15-18 hours each. The University Studies degree format was created to provide students the flexibility to combine areas of study that are of special interest.

** Majors **

- Bachelor of Science in University Studies, Mathematics for Business Concentration (p. 673)
- Bachelor of Science in University Studies, Mathematics for Pre-Professionals Concentration (p. 674)
- Bachelor of Science in University Studies, Mathematics for Teaching Concentration (p. 675)
- Bachelor of Science in University Studies, Science for Secondary Teaching Concentration (p. 676)

**University Studies - BS, Mathematics for Business Concentration**

The Bachelor of Science in University Studies, Mathematics for Business area of concentration consists of courses that are designed to give students who are both interested in business and mathematically inclined a way to combine both interests.

Program Requirements

Must make a grade of ‘C’ or better.
2 MATH 433 will not fulfill this requirement.
3 Select 3 hours from any 200-499 level course.
4 Completion of four semesters of upper-level ROTC may be substituted for three hours of this requirement.

Electives may be selected from any 100-499 course not used elsewhere, (except ALED 125, ASTR 109/PHYS 109, ASTR 119/PHYS 119, BMEN 101, BUSN 100, ISEN 101, KINE 199, LAND 101, MATH 102-148, 151-166, MATH 171, MATH 304, MATH 309, MATH 311, MATH 367, MATH 368, MATH 375, MATH 376; PHYS 109/ASTR 109, PHYS 119/ASTR 119, PHYS 201, PHYS 202, PHYS 205, PSYC 301; STAT 201, STAT 301 - 303 (p. 1068); STLC 102; URPN 200; WFSC 101).

Maximum of 4 hours of MATH 147, MATH 151, or MATH 171 may be used in this degree program.

Maximum of 4 hours of MATH 148, MATH 152, or MATH 172 may be used in this degree program.

Maximum of 3 hours of MATH 220 or CSCE 222/ECEN 222 may be used in this degree program.

Maximum of 3 hours of MATH 411 or STAT 414 may be used in this degree program.

Maximum of 3 hours of MATH 417, MATH 437 or CSCE 442 may be used in this degree program.

University Studies - BS, Mathematics for Teaching Concentration

The BS in University Studies, Mathematics for Teaching area of concentration consists of courses that are designed to give students desiring a secondary-school teaching credential a solid foundation in mathematics. In particular, the courses chosen encompass the mathematical areas tested by the State of Texas and TExES secondary mathematics examination. These are the courses currently required for the secondary mathematics teaching field at Texas A&M University.

COLLEGE OF VETERINARY MEDICINE AND BIOMEDICAL SCIENCES

Administrative Officers
Dean - Eleanor M. Green, B.S., D.V.M.
Executive Associate Dean - Kenita S. Rogers, M.S., D.V.M.
Associate Dean for Professional Programs - Karen Cornell, D.V.M.
Associate Dean for Research and Graduate Studies - Robert Burghardt M.S., Ph.D.
Assistant Dean for Graduate Studies - Michael Criscitiello, M.S., Ph.D.
Associate Dean for Undergraduate Education - Elizabeth Crouch, Ph.D.
Assistant Dean for Finance and Administration - Belinda S. Hale, M.B.A.
Associate Dean of Global One Health - Gerald Parker, M.S., D.V.M., Ph.D.
Assistant Dean of Hospital Operations - Bo Connell, M.S., M.B.A.
Director of Student Services for Professional Programs - Glennon Mays, D.V.M.

General Statement
The College of Veterinary Medicine and Biomedical Sciences consists of five academic departments: Veterinary Integrative Biosciences, Veterinary Large Animal Clinical Sciences, Veterinary Pathobiology, Veterinary Physiology and Pharmacology, and Veterinary Small Animal Clinical Sciences. Each department is administered by a department head, who is responsible to the Dean of Veterinary Medicine and Biomedical Sciences for all programs assigned or developed in the department, including teaching, research, extension and service.

A Veterinary Medical Teaching Hospital and Field Service Clinic are operated within the College to provide clinical laboratories for the veterinary medical educational program.

An extensive research program in animal health and disease is conducted by the faculty and staff of the college, and a substantial number of the teaching faculty members are engaged in research.

A veterinary extension program carries research information to veterinarians, animal owners, and others in the state and nation with the least possible delay. The faculty makes research information available to the students in the classroom and laboratories in a timely manner.

The typical land-grant institutional mandate of teaching, research, patient care and service provides the organizational framework necessary to meet the dynamics in the ever-changing field of veterinary medicine.

Graduate programs leading to the Master of Science and Doctor of Philosophy degrees are available in the departments of the College of Veterinary Medicine and Biomedical Sciences. The programs are research-oriented but sufficiently flexible to permit intensive training in many areas of special training. Clinical specialty training programs are also available. These programs are designed to provide effective training in the areas of professional specialization.

Biomedical Sciences - BS

Admission

1. A Biomedical Sciences (BIMS) major will be admitted into the upper-level courses according to the following criteria:
   a. Completion of a set of Common Body of Knowledge (CBK) courses (35 hours to include BIOL 111, BIOL 112, CHEM 101/111, CHEM 102/112, CHEM 227/237, CHEM 228/238, PHYS 201, PHYS 202 and MATH 131) with a grade of C or better in each course taken at Texas A&M. Any CBK course transferred from a community college must have a minimum grade of a "B". Normally, for admission to BIMS upper-level courses, a student may have attempted a CBK course no more than twice.
   b. A minimum of 55 completed semester hours with a cumulative resident Grade Point Ratio (GPR) of 2.5 or better.

   Process: Each student upon completing 55–65 semester credit hours must have a degree audit to verify upper-level eligibility.

2. The Biomedical Sciences Program will continue to accept changes of major into BIMS according to current Texas A&M University policy, but restrict changes of major into the upper-level courses (BIMS) according to the criteria listed in item 1. Students in other major request a change of major to the BIMS program must also fulfill the criteria in item 1. In addition, the dean must verify availability of resources necessary to ensure the student’s full-time enrollment in required upper-level courses prior to admission to upper-level status. If such courses are not available, the student will be denied admission to Biomedical Sciences.

3. To enter BIMS upper-level courses, transfer students must have:
   a. A minimum GPR of 3.0 in CBK courses with a grade of B or better in each completed course if taken at a 2-year college. A grade of C is accepted from a 4-year college.
   b. Transfer students admittred under another major and wishing to change into BIMS must complete one semester of graded coursework at Texas A&M University with a cumulative resident GPR of 2.5 and must fulfill the criteria in item 1.
   c. Texas A&M change of majors must have at least 55 semester credit hours with a minimum cumulative GPR of 3.0.

4. Students seeking readmission will be considered on a case-by-case basis, according to current catalog policy. No quotas will be placed on readmission; however, the decision to readmit will be dependent on resource availability and University policy.

5. Any BIMS student admitted to upper-level courses who then falls below the 2.5 GPR requirement will not be considered in good academic standing in their major and will be placed on college probation. Students who achieve less than a 1.0 GPR in any semester are not eligible for college probation or grade warning status. All Biomedical Sciences majors must follow established probation rules for the Biomedical Sciences Program.

6. The Dean, Director or Department Head will reserve the right to waive CBK or GPR requirements within the criteria established in Texas A&M University Student Rules.

7. No courses other than BIMS 481, BIMS 484, VIBS 310, VIBS 311, or research/directed studies credits can be taken S/U to be used in the degree plan.

8. BIMS probation is determined at the end of the Spring semester. Students not meeting acceptable GPR requirements (2.5 BIMS majors with 55 or more hours or 2.0 area of concentration (USVM), BIMS majors with less than 55 hours) will be required to attend Texas A&M University that summer and repeat courses as needed to raise their GPR. Students who achieve less than a 1.0 GPR in any semester (BIMS or USVM) are not eligible for college probation or grade warning status.

9. Students may only attempt CVM courses a total of three (3) times.

Applied Science Option

Biomedical Sciences is a broad field of applied biology that is directed toward understanding health and disease. Our mission is to educate students who will create a healthier future for humans and animals through the medical professions, biomedical innovation and discovery, global service and outreach. The curriculum is designed to provide a strong four-year education that emphasizes versatility of the graduate in the biological and medical sciences. A highly effective counseling program assists the students with the development of an individualized approach and course package that orients and prepares the students for entry into the medical, allied health field or graduate program of their choice. Such an approach enhances their educational experiences, improves their placement in professional and graduate programs, and facilitates their entry into the biomedical science job market.

Biomedical Sciences graduates enter professional programs in human medicine, veterinary medicine, dentistry, osteopathy, podiatry, optometry, and pharmacy. Some become medical technologists, physician assistants, nurses, and laboratory and research technicians. Others pursue radiation technology, hospital administration, and a wide variety of health-related fields. Many Biomedical Sciences students continue their education in graduate schools and specialize in various biology- and medicine-related disciplines. Other graduates are employed by clinical practices, industrial companies, government agencies, private foundations, public schools, colleges and certain aspects of business. Positions are available in pharmaceutical and drug marketing, research equipment manufacture and sales, food safety, biomedical research, disease control, zoonoses and epidemiology, laboratory animal care, zoo and aquatic animal supervision, health-related inspection and regulatory work. The BS in Biomedical Sciences is also awarded to students who complete the three year Early Admission Option to Professional Schools and one year of professional school.

1. Must be chosen in consultation with BIMS academic advisor.
2. Check with your BIMS academic advisor to select the correct courses.

In satisfying the required 26 hours of BIMS directed electives and free electives, all 285/485 courses may not exceed 6 credit hours and all 289/489 courses may not exceed 9 credit hours. A 289/489 course used as a free elective may not exceed 3 hours. A 291/491 course may not exceed 3 hours credit.

International Certificate in Cultural Competency and Communications in Spanish

Students who complete this certificate will be functionally bilingual and able to perform linguistically in a culturally sensitive manner within the biomedical environment. A required study abroad will allow students to gain experiential knowledge, expanding their cultural sensitivities and functionality in a foreign environment. Because of limited resources, the program will have a cap on the number of students admitted. All courses in the program must be completed with a grade of C or better. The certificate will be awarded upon completion of a BS degree in Biomedical Sciences.

Program Requirements

To earn the certificate, students are required to complete:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Semester Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>SPAN 201</td>
<td>Intermediate Spanish I ¹</td>
<td>3</td>
</tr>
<tr>
<td>SPAN 202</td>
<td>Intermediate Spanish II ¹</td>
<td>3</td>
</tr>
<tr>
<td>SPAN 300/SPAN 400</td>
<td>level course of the student’s choice ²</td>
<td>3</td>
</tr>
<tr>
<td>3 credit hours of area studies from an approved course list ³</td>
<td></td>
<td>3</td>
</tr>
<tr>
<td>Minimum of 2 credit hours in a medical communications Area ⁴</td>
<td></td>
<td>2</td>
</tr>
<tr>
<td>BIMS 485 ⁵</td>
<td></td>
<td>2</td>
</tr>
</tbody>
</table>

An international experience approved by the Biomedical Sciences Program ⁶

Total Semester Credit Hours 16

¹ SPAN 221 and SPAN 222 are acceptable substitutions, when taken abroad, for SPAN 201 and SPAN 202.
² Prerequisites apply.
³ The certificate was designed with the student’s required Texas A&M Core Curriculum (p. 22) in mind. Many of the courses on the approved list will count as a language, philosophy and culture, creative arts, or social and behavioral sciences. It is up to the student to compare the two lists and to work with their academic advisor to choose courses appropriate to their degree plan.
⁴ It is suggested that students enroll in this course after the completion of at least SPAN 201 or equivalent. For course options, see academic advisor.
⁵ This course is a specific section of 485 that requires shadowing in the biomedical environment while using the Spanish language.
⁶ This requirement may be satisfied by an approved study abroad program.

Faculty

Andruzzi, Melissa N, Veterinary Intern
Vet Small Animal Clinical Sc
DVM, University of Illinois, 2017

Armstrong, Kristin N, Veterinary Intern
Vet Small Animal Clinical Sc
DVM, University of Missouri, 2017
August, John R, Professor
Vet Small Animal Clinical Sc
BVetMed, University of London, 1973

Baetge, Courtney L, Clinical Assistant Professor
Vet Small Animal Clinical Sc
DVM, Texas A&M University, 2003

Barton, Claudia L, Professor
Vet Small Animal Clinical Sc
DVM, University of Missouri, 1973

Beaver, Bonnie V, Professor
Vet Small Animal Clinical Sc
DVM, University of Minnesota, 1968

Bennett, Brad S, Lecturer
Vet Small Animal Clinical Sc
PHD, Texas A&M University, 2007

Boudreau, Christen E, Clinical Assistant Professor
Vet Small Animal Clinical Sc
DVM, Texas A&M University, 2010
PHD, Baylor College of Medicine, 2001

Boutet, Bruno G, Veterinary Resident
Vet Small Animal Clinical Sc
DVM, Atlantic Veterinary College at University of Prince Edward Island, 2012

Brehm, Amanda J, Veterinary Resident
Vet Small Animal Clinical Sc
DVM, University of Missouri, 2015

Ciepluch, Brittany J, Veterinary Resident
Vet Small Animal Clinical Sc
DVM, The Ohio State University, 2013

Cook, Audrey K, Associate Professor
Vet Small Animal Clinical Sc
DVM, University of Edinburgh, 1989

Cornell, Karen K, Professor
Vet Small Animal Clinical Sc
PHD, Purdue University, 1998
DVM, Purdue University, 1988

Creedy, Kate E, Associate Professor
Vet Small Animal Clinical Sc
DVM, University of Tennessee, 1998

Cusack, Katrina, Veterinary Resident
Vet Small Animal Clinical Sc
BVM, University of Dublin, 2014

Darden, Joshua E, Veterinary Intern
Vet Small Animal Clinical Sc
DVM, University of Georgia, 2016

Davidson, Jacqueline R, Clinical Professor
Vet Small Animal Clinical Sc
DVM, University of Minnesota, 1986

Deininger, Kari N, Veterinary Intern
Vet Small Animal Clinical Sc
DVM, University of Missouri, 2017

Deveau, Michael A, Clinical Associate Professor
Vet Small Animal Clinical Sc
DVM, Kansas State University, 2005

Diesel, Alison B, Clinical Associate Professor
Vet Small Animal Clinical Sc
DVM, Kansas State University, 2005

Dodd, Johnathon R, Clinical Professor
Vet Small Animal Clinical Sc
DVM, Texas A&M University, 1979

Eckman, Stacy L, Clinical Associate Professor
Vet Small Animal Clinical Sc
DVM, Texas A&M University, 2001

Fujishiro, Madeline A, Veterinary Resident
Vet Small Animal Clinical Sc
DVM, Colorado State University, 2015

Gordon, Sonya G, Professor
Vet Small Animal Clinical Sc
DVM, University of Guelph, 1994

Gray, Jennifer L, Veterinary Intern
Vet Small Animal Clinical Sc
DVM, University of Florida, 2017

Griff, Brooke C, Veterinary Intern
Vet Small Animal Clinical Sc
DVM, University of Tennessee, 2016

Griffin, Sarah C, Lecturer
Vet Small Animal Clinical Sc
DVM, Texas A&M University, 2007

Grimes, Millie A, Veterinary Resident
Vet Small Animal Clinical Sc
DVM, University of California, 2015

Heatley, Jennifer J, Associate Professor
Vet Small Animal Clinical Sc
DVM, Texas A&M University, 1995

Heinz, Justin A, Clinical Assistant Professor
Vet Small Animal Clinical Sc
DVM, Purdue University, 2012

Heseltine, Johanna C, Clinical Assistant Professor
Vet Small Animal Clinical Sc
DVM, University of Saskatchewan, 1998

Hinson, Whitney D, Veterinary Intern
Vet Small Animal Clinical Sc
DVM, The University of Georgia, 2015

Hoppes, Sharman M, Clinical Professor
Vet Small Animal Clinical Sc
DVM, Oklahoma State University, 1993
Howe, Lisa M, Professor
Vet Small Animal Clinical Sc
PHD, Texas A&M University, 1993
DVM, Texas A&M University, 1987

Jeffery, Nicholas D, Professor
Vet Small Animal Clinical Sc
PHD, The University of Cambridge, 1997

Jochems, Brian C, Veterinary Intern
Vet Small Animal Clinical Sc
DVM, University of Missouri, 2017

Johnson, Derek W, Lecturer
Vet Small Animal Clinical Sc
PHD, Texas A&M University, 2014

Joseph Cyrus, Fnu, Veterinary Resident
Vet Small Animal Clinical Sc
BVSc, Kerala Agricultural University, 2007

Kerwin, Sharon C, Professor
Vet Small Animal Clinical Sc
DVM, Texas A&M University, 1988

Krasnow, Maya S, Veterinary Resident
Vet Small Animal Clinical Sc
DVM, The Ohio State University, 2016

Leister, Katie A, Veterinary Intern
Vet Small Animal Clinical Sc
DVM, University of Illinois Urbana-Champaign, 2016

Levine, Jonathan M, Professor
Vet Small Animal Clinical Sc
DVM, Cornell University, 2001

Lidbury, Jonathan A, Assistant Professor
Vet Small Animal Clinical Sc
BVetM, University of Glasgow, 2002

Lipe, Krista L, Veterinary Intern
Vet Small Animal Clinical Sc
DVM, The University of Tennessee, 2017
MMU, Louisiana State University, 2006

Little, Adam L, Assistant Professor of the Practice
Vet Small Animal Clinical Sc
DVM, University of Guelph, 2013

Loria Lepiz, Mauricio A, Clinical Assistant Professor
Vet Small Animal Clinical Sc
DVM, Universidad Nacional de Costa Rica, 2000

Maciver, Melissa, Veterinary Resident
Vet Small Animal Clinical Sc
DVM, Ontario Veterinary College, 2013

Mankin, Joseph M, Clinical Associate Professor
Vet Small Animal Clinical Sc
DVM, University of Tennessee-Knoxville, 2007

Mankin, Kelley M, Assistant Professor
Vet Small Animal Clinical Sc
DVM, University of Missouri-Columbia, 2006

Martinez, Elizabeth A, Associate Professor
Vet Small Animal Clinical Sc
PHD, University of Tennessee-Knoxville, 1987

Matthews, Derek J, Veterinary Resident
Vet Small Animal Clinical Sc
DVM, Colorado State University, 2015

McAtee, Brigitte B, Veterinary Resident
Vet Small Animal Clinical Sc
DVM, Auburn University, 2015

Otamendi, Arturo J, Veterinary Resident
Vet Small Animal Clinical Sc
DVM, Louisiana State University of School, 2014

Patterson, Adam P, Clinical Associate Professor
Vet Small Animal Clinical Sc
DVM, Mississippi State University, 2001

Pena, Lydia W, Veterinary Intern
Vet Small Animal Clinical Sc
DVM, University of Georgia, 2017

Peycke, Laura E, Clinical Professor
Vet Small Animal Clinical Sc
DVM, Louisiana State University, 1998

Rogers, Kenita S, Professor
Vet Small Animal Clinical Sc
DVM, Louisiana State University, 1982

Rutter, Christine R, Clinical Assistant Professor
Vet Small Animal Clinical Sc
DVM, Mississippi State University, 2003

Saunders, Ashley B, Professor
Vet Small Animal Clinical Sc
DVM, Texas A&M University, 2001

Saunders, William B, Associate Professor
Vet Small Animal Clinical Sc
PHD, Texas A&M University, 2005
DVM, Texas A&M University, 2001

Scallan, Elizabeth M, Clinical Assistant Professor
Vet Small Animal Clinical Sc
DVM, Ross University School of Veterinary Medicine, 2007

Schmitz, Katrina L, Veterinary Resident
Vet Small Animal Clinical Sc
DVM, St. George’s University, 2016

Scott, Erin M, Assistant Professor
Vet Small Animal Clinical Sc
DVM, University of Pennsylvania, 2015

Simon, Bradley T, Assistant Professor
Vet Small Animal Clinical Sc
DVM, Ross University, 2007

Sowy, Stanley P, Veterinary Resident
Vet Small Animal Clinical Sc
DVM, Western University of Health Sciences, 2014

Biomedical Research and Development - Certificate

The Biomedical Research Certificate, offered by the Department of Veterinary Physiology and Pharmacology, will provide students the opportunity to gain advanced training in biomedical research. Students in the Certificate Program will gain a broader understanding of the creation, evaluation, and dissemination of new knowledge while performing publishable original biomedical research within a research-intensive community. The Biomedical Research Certificate Program requires a minimum of 18-credit hours in designated courses, each of which includes engagement in inquiry-based research. Specific certificate requirements are available in the Biomedical Sciences Office and the Department of Veterinary Physiology and Pharmacology (http://vetmed.tamu.edu/vtpp).

Minor 2  15-18

Total Semester Credit Hours  120

1 Up to 4 course hours may be selected from BIMS 484, BIMS 485; VIBS 285, VIBS 485; VIBS 489; VLCS 485; VSCS 485; VTPB 285, VTPB 485, VTPB 489; VTPP 285, VTPP 481, VTPP 485, VTPP 489.

2 Completion of four semesters of upper-level ROTC may be substituted for 3 hours of American history and 3 hours of political science.

3 Includes 30-36 hours used to satisfy the two minor requirements and 2 to 8 hours of general electives.

4 Select 2 to 8 hours of any 100-499 course not used elsewhere.
SCHOOL OF MILITARY SCIENCE

Administrative Officers
Commandant - Brigadier General Joe E. Ramirez, Jr., USA, M.S.

General Statement
The School of Military Sciences is composed of three departments: Aerospace Studies, Military Science and Naval Science. All courses offered by the School of Military Sciences are accredited by the University. However, the credit granted for degree plans varies by college and often by department. For precise information, consult the associate dean or department head.

The University’s commitment to providing highly skilled and disciplined leaders to the Armed Forces requires all students enrolled in ROTC programs at Texas A&M to be members of the Corps of Cadets. Students not enrolled in an ROTC program may be permitted to take ROTC courses as electives with the advance approval of the professor of military science, the professor of aerospace studies, or the professor of naval science, as appropriate, and the concurrence of the head of the School of Military Sciences.

State law permits the substitution of 3 hours of history and 3 hours of political science for a student in the program of an approved senior ROTC unit. With the approval of the dean of the appropriate college, students successfully completing their required four semesters of upper-level ROTC curriculum will be deemed to have completed the equivalent of POLS 206 or POLS 207 plus HIST 105 or HIST 106 (or another appropriate course) for a total of 6 hours. Students pursuing teacher certification are not allowed to substitute ROTC credits for this requirement.

Departments
Aerospace Studies (p. 697)
Military Science (p. 697)
Naval Science (p. 698)

Minors
• Military Studies Minor (p. 695)

Certificates
• Leadership Study and Development Certificate (p. 696)

Military Studies - Minor
The School of Military Sciences offers a minor in Military Studies. This minor is available to all Texas A&M students but is not required for ROTC or Corps of Cadets participation. Students should consult with an advisor in their major department to determine minor requirements. All students desiring to enroll in the Military Studies minor should contact the Assistant Commandant for Academics and International Programs in Room 211 of the Buzbee Leadership Learning Center, (979) 458-2829.

Program Requirements
The Military Studies minor requires 18 hours. Nine hours must be completed in approved upper-level Aerospace Studies, Military Science, or Naval Science courses with an additional 9 hours from approved university courses with a military-related focus. A minimum of 12 hours must be at the 300-400 level. A grade of C or higher is required if a course is to be counted towards the minor field. Minor programs are recognized on the transcripts after graduation, but not on the diploma. The student’s college and/or major department determines the number of minor programs a student may seek and shall be responsible for advising after the student receives signed approval from the Assistant Commandant for Academics and International Programs.

Total Semester Credit Hours 12

^{1} Minimum of 6 hours of School of Military Sciences courses (NVSC, AERS, and MLSC) must be at the 400 level.

Two hours in SOMS 380 and two hours in SOMS 481 are required.
Aerospace Studies

The Air Force ROTC (AFROTC) program at Texas A&M University is the largest AFROTC program in the United States and is designed to prepare selected students to be commissioned officers in the United States Air Force.

The institutional phase of AFROTC, called aerospace studies, is divided into two parts. The first two years constitute the General Military Course and the second two years constitute the Professional Officer Course. Details on courses offered are set forth in the alphabetical departmental listing. Concurrent enrollment in more than one aerospace studies course requires the approval of the department head, also known as the Professor of Aerospace Studies.

The General Military Course consists of the 100- and 200-level courses. These courses focus on the structure and missions of Air Force organizations; officerhood and professionalism; and, include an introduction to communicative skills. The General Military Course prepares the cadet, as a candidate, for the Professional Officer Course (POC). Cadets in the General Military Course attend one hour of class plus two hours of leadership lab per week.

Students apply for enrollment in the Professional Officer Course during their sophomore year. Enrollment in the Professional Officer Course at the beginning of the junior year is limited to students of high moral character who are academically qualified, physically fit, possess the necessary interest and aptitude, and have demonstrated leadership potential.

Before entry into the Professional Officer Course, cadets must attend AFROTC Field Training during the summer months typically between the sophomore and junior academic years. The major areas of study in the Field Training program include junior officer training, aircraft and aircrew orientation, career orientation, survival training, base functions, Air Force environment, physical fitness training, and a culmination field training exercise. Those who complete Field Training are enlisted in the Air Force Reserve and enter the POC.

The purpose of the Professional Officer Course is to develop skills and attitudes vital to a career as a professional Air Force officer. A degree is a prerequisite for an Air Force commission. Cadets attend class three hours a week and leadership lab two hours per week during each semester of the Professional Officer Course.

If a student is selected for and enrolled in the Professional Officer Course, he or she must sign a contract with the government in which he or she agrees to enlist in the Air Force Reserve, complete the course and, upon graduation, accept a commission as an officer in the United States Air Force. He or she also must agree to serve on active duty for not less than four years after being commissioned. Persons selected for flight training must serve ten years of active duty following completion of pilot training. During their two years in the Professional Officer Course, cadets are eligible to receive monthly subsistence pay, plus added monetary incentives.

Leadership training is continuous during the student’s life as an AFROTC cadet. One way this is accomplished is through Leadership Laboratory. Instruction is conducted within the framework of an organized cadet corps with a progression of experiences designed to develop each student’s leadership potential. Leadership Laboratory involves a study of Air Force customs and courtesies, drill and ceremonies, Air Force career opportunities, and expectations of an Air Force junior officer. Students develop their leadership in a practical, supervised laboratory, which typically includes field trips to Air Force installations.

Students enrolled in the four-year program may apply and compete for two- or three-year AFROTC College Scholarships. The AFROTC In-College Scholarship Program is a highly competitive program aimed primarily at college freshmen and sophomores in any major. If selected for an AFROTC scholarship, the student will receive tuition payment, textbook allowance and monthly subsistence allowance.

Upon completion of the Professional Officer Course and graduation from the University, students are commissioned as Second Lieutenants in the United States Air Force. All instructors are active duty officers assigned to the University by the United States Air Force. Information about the Air Force ROTC program may be obtained by contacting the Detachment, or visiting the Air Force ROTC (http://afrotc.tamu.edu) website.

Military Science

The Army ROTC (AROTC) program at Texas A&M is the oldest on campus. AROTC cadets are proud contributors to the heritage of the “Fightin’ Texas Aggies.” AROTC members are leaders in a wide variety of university activities including Student Government, campus athletics, the Fightin’ Texas Aggie Band Ross Volunteer Company, Rudder’s Rangers and Parsons Mounted Calvary. The Army ROTC Ranger Challenge Team is a perennial contender at both Regional and National levels, finishing in the top five at the Sandhurst competition hosted by the US Military Academy in consecutive years.

The Army offers a diverse career field to match a student’s education and interests, with no restrictions on the major field of study or discipline. The AROTC student may enter career fields such as aviation, engineering, law enforcement, medical services, armor, infantry, artillery, communications, finance, personnel administration, transportation, or military intelligence. Engineering students are eligible to participate in the University’s chapter of the Society of American Military Engineers. Opportunities in Airborne, Ranger and Special Operations are also available. Highly qualified applicants may compete to take part in the delayed entry program while pursuing medical or law degrees and selected cadets may attend specialty military training including Airborne, Air Assault, Northern Warfare, and Mountain Warfare Schools.

Curriculum

AROTC classes are unique in the college curriculum in offering both classroom instruction and hands-on leadership development opportunities. AROTC is divided into two parts: The Basic and Advanced Courses. The Basic Course is taken in the freshman and sophomore years. Coursework covers the areas of military courtesy, discipline, and customs as well as map reading, marksmanship and land navigation. Students develop and refine their leadership by participating in weekly tactical leadership labs and field training exercises. Uniforms and the necessary textbooks are furnished and there is NO military commitment for participation in the Basic Course. In addition, three (3) and four (4) AROTC scholarship winners attend Basic Camp training in the summer after their Freshman or Sophomore years.

The Advanced Course is taken in the final two years of college and includes participation in Advanced Camp during the summer after the junior or senior year. Advanced Course instruction emphasizes advanced leadership development, organization ethics critical thinking and problem solving, administration, and military law. Summer Advanced Camp at Fort Knox, Kentucky enables cadets to put into practice, in a field environment,
the principles and theories acquired in the classroom. Those cadets taking the Advanced Course with a commissioning contract will incur a military obligation to serve either in the Active Duty Army, Army Reserves, or Army National Guard upon graduation.

**Stipends**

All cadets in the AROTC program who have entered into a commissioning contract receive a tiered subsistence allowance up to $500 per month. AROTC cadets are encouraged to take courses in strategic languages. Through the Army’s Culture and Language Incentives Program, students can earn up to $300 per credit hour for completing classes in qualifying languages. In addition, AROTC sponsors the Cultural Understanding and Language Proficiency Program that affords students the opportunity to participate in month-long immersion programs in over 40 countries.

Qualified students who join the Army National Guard or Army Reserve may participate in the Simultaneous Membership Program (SMP) in which they earn approximately $250 per month. The total dollar amount for SMP cadets can reach $750 per month during their junior and senior years in ROTC. Tuition assistance, which pays between 75-100% of tuition costs, is available through the US Army Reserves and Texas National Guard.

Qualified veterans may enroll directly into the ROTC Advanced Course. Veterans in the Advanced Program receive a tiered subsistence allowance of up to $500 per month in addition to their veterans’ benefits.

**Scholarships**

The AROTC Scholarship program awards four-year and three-year advance designee scholarships on a competitive basis to students entering ROTC as college freshmen. Two-year and three-year scholarships also are available for college students already enrolled in ROTC. These scholarships pay the cost of tuition, required fees and a flat rate textbook allowance for the duration of the award and provide a tiered subsistence allowance of up to $500 per month. In all, a four-year scholarship can be worth over $58,000 at Texas A&M. Additional scholarship opportunities are available specifically for students participating in Science, Technology, Engineering, and Math majors that pay the same benefits as four and three-year ROTC scholarships.

The U.S. Army Health Profession Scholarship Program offers a unique opportunity for financial support to cadets who desire to continue their education beyond their undergraduate work by enrolling in a program leading to a professional degree in medicine, dentistry or veterinary medicine.

**Contact**

Texas A&M’s staff, having served multiple combat and operational deployments overseas, are dedicated to developing academically superior and physically fit commissioned officers recognized as outstanding leaders of character for the U.S. Army Officer Corps. For more information on Army ROTC programs, contact the Military Science Department at (979) 845-2814.

**Naval Science Mission**

The Naval ROTC Unit at Texas A&M University provides qualified young men and women the opportunity to learn the mission of the Naval Services and pursue a commission as an officer in the United States Navy or United States Marine Corps. The Naval ROTC Unit operates as the Department of Naval Science at Texas A&M and is one of the largest Naval ROTC Units in the United States. Graduates from our program can be found serving around the world. Officers commissioned as Ensigns in the United States Navy have the option, based on physical and aptitude qualification, to serve in the Aviation (Pilot or Naval Flight Officer), Surface Warfare (Conventional or Nuclear), Nuclear Submarine, or Special Warfare (SEAL or Explosive Ordnance Disposal) communities. Officers commissioned as Second Lieutenants in the United States Marine Corps can serve in one of more than 36 military operational specialties in three categories including Aviation (Pilot or Naval Flight Officer), Combat Arms (Infantry, Artillery, Armor, Assault Amphibians, Combat Engineers, etc.), or Combat Service Support (Logistics, Supply, Data Processing, Finance, etc.).

Naval ROTC students may participate fully in all aspects of university life. This includes serving in positions with Student Government or the Memorial Student Center, belonging to campus clubs and service organizations, or participating in religious, social, professional or personal interest organizations. The NROTC Unit also sponsors and advises special units within the Corps of Cadets; SEAL Platoon and RECON Company.

**Scholarships**

The Naval ROTC program provides numerous scholarship opportunities for qualified individuals who are seeking a commission upon graduation as an officer in either the United States Navy or United States Marine Corps. The four-year Naval ROTC scholarship program is a nationally competitive program. High school students seeking a four-year Navy or Marine Corps Option Naval ROTC scholarship may apply as early as the spring of their junior year in high school, and should apply no later than December of their senior year in high school. The Naval ROTC scholarship pays for all tuition, most university fees, some uniform fees, and provides the student with a monthly stipend and a semester book allowance. Three- and two-year scholarships with the same benefits listed above are available for qualifying students who apply while enrolled as NROTC students at Texas A&M.

**College Program**

Students without NROTC scholarships initially participate in Naval ROTC as Naval Science Students. Basic College Program students are guided by the same goals as the NROTC Scholarship students; to include meeting the physical requirements of the Corps of Cadets, maintaining a required minimum GPA, and possessing the aptitude and motivation for service above self. The Basic College Program exists to provide students the opportunity to learn about the United States Navy and United States Marine Corps and provide analternate means for a commission for those not on scholarship. Basic College Program students can apply for a two-year or three-year Navy or Marine Corps Option Naval ROTC scholarship. Students who do not qualify for a scholarship but still desire a commission can apply for acceptance into the College Program (Advanced Standing). The College Program (Advanced Standing) begins during the junior year and pays a monthly stipend, but does not pay for tuition and fees. All NROTC students are provided Naval Science textbooks, which are returned at the end of each semester, at no cost.

**Leadership**

All Scholarship and College Program (Basic and Advanced Standing) NROTC students are also members of the Texas A&M Midshipman Battalion, an organization providing distinct training and leadership
opportunities for students pursuing Navy and Marine Corps commissions. This training is accomplished through the NROTC's Leadership Laboratory. Associated with each Naval Science class and conducted every Tuesday afternoon, Leadership Laboratory is a combination of classroom study and practical hands-on application that exposes the students to many facets of the Navy and Marine Corps and provides them the opportunity to develop their leadership skills.

**Academic Requirements**

Academic requirements vary by program, but all freshmen and sophomore Naval ROTC students must take a Naval Science (NVSC) class each Fall and Spring semester. These courses provide a basic understanding of the Navy and Marine Corps organization and mission; address the concepts of leadership, ethics, and management; and provide a basic understanding of the history of American sea power and the evolution of warfare throughout the ages. All Scholarship and College Program (Advanced Standing) students continue to take Naval Science courses during their junior and senior year. These courses cover additional topics such as navigation, weapons systems, amphibious warfare and leadership and ethics for the junior officer.

**Summer Cruise**

Scholarship students receive four to six weeks of additional training every summer with operational Navy and Marine Corps units around the world. Between the freshman and sophomore years, students receive orientation training with naval aviation, surface combatant, submarine and Marine Corps units. Between the sophomore and junior years, Navy Option students experience the life of enlisted sailors aboard ships and submarines and Marine Option students experience the life of enlisted marines with Marine units in the field. For the final training session between the junior and senior years, all Scholarship and College Program (Advanced Standing) students receive service-specific training in final preparation for commissioning. Navy Option students are assigned to aviation units, surface combatants or submarines depending upon their qualifications and desires and receive hands-on training working closely with qualified junior officers. Marine Option students attend Officer Candidate School at Quantico, VA where they are screened, trained and evaluated in an intense, competitive environment alongside other Marine Option students from around the country. Students participating in summer cruises are provided government travel, medical and dental care, commissary and exchange privileges, and are paid for the duration of the training.

**Commissioning**

Upon graduation, qualified Naval ROTC Navy and Marine Option Scholarship students receive commissions as Ensigns in the United States Navy or as Second Lieutenants in the United States Marine Corps and serve a minimum of four years of active duty. Qualified Naval ROTC College Program (Advanced Standing) Navy Option students receive commissions as Ensigns in the United States Navy and serve a minimum of three years of active duty. Qualified Naval ROTC College Program (Advanced Standing) Marine Option students receive commissions as Second Lieutenants in the United States Marine Corps and serve a minimum of three and a half years of active duty. Those Navy Option graduates who are academically qualified and accepted to graduate school in certain disciplines may apply for active duty deferments to complete their post-graduate education.

**NROTC Staff**

The staff of the Naval Science Department is dedicated to producing officers of the highest quality for the United States Navy and United States Marine Corps. All instructors are active duty Navy or Marine Corps officers and senior enlisted personnel assigned to the University by the United States Navy or United States Marine Corps. In addition, they work with the Corps of Cadets and act as military advisors to the Companies/Oufits within the Naval regiments. This group of highly trained professionals places specific emphasis on the academic and professional development of every student assigned. Additional information about the Naval ROTC program at Texas A&M University can be obtained by calling the Department at (979) 845-1775, or by visiting the Texas A&M Naval ROTC (http://nrotc.tamu.edu) website.
Texas A&M University at Galveston offers ocean-oriented academic degrees, research, continuing education, and public service in marine science, engineering, business, transportation and liberal arts. Degrees are awarded from Texas A&M University. Ocean voyages, sailing in Galveston Bay, beachfront experiments and independent study complement the rigorous classroom experience at Texas A&M University at Galveston. In addition to its academic programs, the campus houses the Texas A&M Maritime Academy, which offers training programs leading to officer licensing in the U.S. Merchant Marine.

Texas A&M University at Galveston is located near the mouth of Galveston Bay with close access to the Gulf of Mexico. Most instructional programs are taught at the 130-acre Mitchell Campus on Pelican Island (with housing for 1,400+ students). The training ship serves as a floating classroom, laboratory and dormitory for the annual summer training cruise of the U.S. Maritime Service cadets. During the regular school year, the ship is berthed at Pelican Island and provides valuable dockside laboratory facilities for instruction in the practical aspects of the maritime curricula.

Courses of Study
Texas A&M University at Galveston provides undergraduate degree programs in Marine Biology (MARB), Marine Sciences (MARS), Marine Engineering Technology (MARR), Marine Transportation (MART), Marine Fisheries (MARF), Maritime Administration (MAR), Maritime Studies (MAST), Ocean and Coastal Resources (OCRE), and University Studies (USGA) (with concentrations in Oceans and One Health, Marine Environmental Law and Policy, Maritime Public Policy and Communication, and Tourism and Coastal Community Development). A 5-year program is offered to allow OCRE majors to additionally complete the Master of Marine Resources Management (MARM) degree, combining their senior year of OCRE with the first year of MARM. A similar 5-year program is offered to allow MARA majors to complete the Master of Maritime Administration and Logistics (MMAL) degree program in a total of 5 years. A new minor in Clinical Lab Sciences is offered as a partnership program with the University of Texas Medical Branch in Galveston to facilitate a bridge between the BS in University Studies with a concentration in Oceans and One Health offered by TAMUG with the Masters in Clinical Lab Sciences offered by UTMB. All students complete the University Core Curriculum requirements set by Texas A&M University to ensure a broad-based education.

Texas A&M University at Galveston offers a M.S. (thesis or non-thesis) and Ph.D. in Marine Biology, both a thesis and non-thesis Master of Marine Resource Management degree and a thesis and non-thesis Master of Maritime Administration and Logistics degree. The Texas A&M Maritime Academy is headquartered on the Galveston campus.

Texas A&M University at Galveston is fully accredited as a branch campus of Texas A&M University by the “Southern Association of Colleges and Schools Commission on Colleges.” Marine Engineering Technology is accredited by the Engineering Technology Accreditation Commission of ABET and the license option programs of the Texas A&M Maritime Academy including all STCW requirements are certified by the U.S. Coast Guard.

U.S. Maritime Service Corps of Cadets
Texas A&M University at Galveston houses the Texas A&M Maritime Academy, which is one of six state maritime academies in the U.S. preparing graduates for licensing as officers in the American Merchant Marine. This program provides an opportunity for students to learn how to operate and maintain an ocean-going vessel. In addition to classroom and field training during the regular school year, students will sail aboard a training vessel during three summer cruises to gain practical experience in seamanship, navigation and operations. At the conclusion of the program, cadets are tested to become licensed as officers in the U.S. Merchant Marine and may seek employment in the exciting field of marine transportation as a licensed Third Mate or Third Assistant Engineer. Please see the tab title Texas A&M Maritime Academy.

The NROTC Program offers men and women an opportunity to qualify for a commission in the Navy while attending Texas A&M University at Galveston. All NROTC students are required to participate in the Texas A&M Maritime Academy Corps of Cadets. Any student may join the NROTC Program either as a National Scholarship winner or as a non-subsidized college program student. Applications for National Scholarships can be obtained through a Navy recruiting office before the submission deadline of January 30 of the year for which the student is applying.

Mission Statement
Texas A&M University at Galveston is a special-purpose institution of higher education for undergraduate and graduate instruction in marine and maritime studies in science, engineering and business and for research and public service related to the general field of marine resources. The institution is under the management and control of the Board of Regents of The Texas A&M University System, with degrees offered under the name and authority of Texas A&M University at College Station.

Research Programs
Faculty, post-doctoral fellows, research staff, and students are actively involved in research throughout the world. Research is conducted under the direction of more than 50 faculty members with funding from federal, state, private and university sources including the National Science Foundation, National Oceanic and Atmospheric Administration, National Aeronautics and Space Administration, Department of the Interior, National Institutes of Health, Department of Energy, Environmental Protection Agency, Texas General Land Office, Texas Commission on Environmental Quality, Texas Parks and Wildlife Department, CONACYT, Consortium for Ocean Leadership, Texas Institute of Oceanography and Research Development Fund. Externally funded research expenditures were over $4.1 million. Total research expenditures were over $5.6 million. Research encompasses both the basic and applied aspects of fields such as marine biology, oceanography, coastal/ocean engineering, marine geology, marine policy and management, environmental studies, conservation, business, admiralty law and coastal zone management. Research is focused largely in the areas of coastal and beach processes (e.g., physical profiling of coastal regions and erosion processes and control), marine life studies (e.g., marine mammal, fish, shellfish, algae and sea turtle biology and ecology), bay and estuary ecosystems (e.g., wetlands management and toxic contaminant analysis), geochemical cycling in marine/aquatic/atmospheric systems and offshore/deep water environments. There are over 130 students participating in
these programs. Many of the faculty researchers also have graduate appointments in TAMUG and/or TAMU departments. Approximately 40 M.S. and Ph.D. graduate students from the TAMU departments of Wildlife and Fisheries Sciences, Oceanography, Ecosystem Science and Management, Ocean/Civil Engineering, Biology and Anthropology are conducting their research under a Texas A&M University at Galveston faculty member. Undergraduate students have many opportunities to participate in research, such as the Texas Institute of Oceanography Undergraduate Student Research Program, working as student workers and technicians on funded research programs, taking independent study classes or participating in the Undergraduate Research Scholars Program. Undergraduate students may work in the laboratory and at field sites throughout the world, participate in research cruises, present results at local, national and international meetings, and serve as authors on publications

Administrative Officers
Col. Michael E. Fossum, USAFR (Ret.) - Chief Operations Officer, Texas A&M University at Galveston; Vice President, Texas A&M University
Dr. Patrick Louchouarn - Executive Associate Vice President for Academic Affairs and Chief Academic Officer, Texas A&M University at Galveston; Associate Provost, Texas A&M University
RADM Michael J. Rodriguez, USMS - Superintendent, Texas A&M Maritime Academy
Dr. Donna C. Lang - Associate Vice President for Academic Operations
Ms. Susan Hernandez Lee - Associate Vice President for Finance and Compliance Officer
Mr. Grant W. Shallenberger - Associate Vice President for Administration and Auxiliary Services
Dr. Antonietta S. Quigg - Associate Vice President for Research and Graduate Studies
Dr. Todd Sutherland - Assistant Vice President for Student Affairs

• Ocean and Coastal Resources Minor (p. 754)

General Information
General Information

General Information for Texas A&M University at Galveston Students
General Academics Major (p. 702)

Academic Deficiency (p. 702)

General Academics Major
The General Academics major at Texas A&M University at Galveston is to be utilized by continuing students who are not able to immediately enter their major of choice. A student must have completed at least one semester at TAMUG prior to entering the General Academics major. Entry into the major is not guaranteed; interested students must complete the General Academics Change of Major Application by the designated deadline and undergo review. A later deadline will be set for students who are suspended from their current major, but not from the campus, after the initial deadline passes. Review criteria for entry to the major will include the student’s ability to meet the minimum requirements to enter into their intended major in one semester, as well as review of any previous academic or honor code issues. Students admitted to the General Academics major have one (1) semester to work toward entry to their major of choice; an extension of one additional semester will be considered on a case-by-case basis.

For additional information, visit tamug.edu/slc/gacd (http://www.tamug.edu/slc/gacd) or contact the Seibel Learning Center at (409) 741-4343.

Academic Deficiency
Any GPA below 2.0 at Texas A&M University at Galveston is considered academically deficient; this applies to term GPA, major GPA, and cumulative GPA. At the conclusion of each academic term, all students with a deficient GPA will be reviewed. Depending on the severity of their case, and extenuating circumstances when relevant, the student will be placed into one of the following categories:

• Probation One – Students placed on Probation One are able to fully continue within their program, but must show consistent progress towards regaining good standing. Failure to show consistent academic progress, per terms set by the academic department, could result in the student being moved to another deficiency category.
• Probation Two – Students placed on Probation Two are able to fully continue within their academic program, but must meet additional probationary terms as well as showing consistent progress towards regaining good standing. These terms include full completion of the Academic Coaching and Success program, as well as remediation as deemed appropriate by the academic department. Failure to meet the full terms of probation and/or to show consistent academic progress, per terms set by the academic department, could result in the student being moved to another deficiency category.
• Departmental Suspension – Students placed on Departmental Suspension will not be able to continue within their academic program. Any classes that student has registered for will be dropped, and they will not be able to register for additional classes until they have successfully applied and been accepted into a new major. Admission to another major is not guaranteed.
• Campus Suspension – Students placed on Campus Suspension will not be able to continue at Texas A&M University at Galveston for a minimum of one (1) full semester. During that time, the student is required to develop an action plan addressing the specific issues causing their academic difficulty. After the semester suspension concludes, the student is eligible to reapply to the campus; readmission is not guaranteed.
• University Suspension – Students placed on University Suspension will not be able to continue at Texas A&M University for a minimum of 12 months. Following the completion of the 12-month suspension, the student may apply for readmission; readmission is not guaranteed.

For additional information, contact the Seibel Learning Center at (409) 741-4343.

Academic Calendar
Texas A&M University and Texas A&M University at Galveston Calendar
All dates are subject to change.

2018 Summer Term I
May 16 Graduation application opens for all students planning to graduate in August 2018.
May 25 Last day to register for Summer I term classes, 5 p.m. Refer to http://finance.tamu.edu/sbs for tuition and fee due dates.
May 28 Memorial Day. Faculty and Staff holiday.
May 29 First day of Summer I term classes.
June 1 Last day for adding/dropping courses for the Summer I term, 5 p.m.
May 25 Summer I term official census date.
June 18 Last day for all students to drop courses with no penalty (Q-drop) for the Summer I term, 5 p.m.
Last day to change Kinesiology 198/199 grade type for the Summer I term, 5 p.m.

June 29

Last day of Summer I Term classes.

July 2

Summer I term final examinations.

No 10-week semester classes.

Last day to register for Summer II term classes. Refer to http://finance.tamu.edu/sbs for tuition and fee due dates.

July 3

First day of Summer II term classes.

July 4

Independence Day. Faculty and staff holiday.

July 6

Summer I term final grades due to the Office of the Registrar, noon.

Grades will be available for viewing in Howdy after 5 p.m.

July 9

Last day to apply for degrees to be awarded in August without a late fee.

2018 Summer Term II

May 16

Graduation application opens for all students planning to graduate in August 2018.

July 2

Last day to register for the Summer II term classes, 5 p.m.

Refer to http://finance.tamu.edu/sbs for tuition and fee due dates.

July 3

First day of Summer II term classes.

July 4

Independence Day. Faculty and staff holiday.

July 6

Summer I term final grades due to the Office of the Registrar, noon.

Grades will be available for viewing in Howdy after 5 p.m.

July 9

Last day to apply for degrees to be awarded in August without a late fee.

2018 10-Week Summer Semester

May 16

Graduation application opens for all students planning to graduate in August 2018.

May 25

Last day to register for 10-week semester classes, 5 p.m.

Refer to http://finance.tamu.edu/sbs for tuition and fee due dates.

May 28

Memorial Day. Faculty and Staff holiday.

May 29

First day of 10-week semester classes.

June 1

Last day for adding/dropping courses for the 10-week semester, 5 p.m.

10-week official census date.

July 2

No 10-week semester classes.

July 4

Independence Day. Faculty and staff holiday.

July 9

Last day to apply for degrees to be awarded in August without a late fee.

July 18

Last day for all students to drop courses with no penalty (Q-drop) for the 10-week semester, 5 p.m.

Last day to officially withdraw from the University for the 10-week semester, 5 p.m.

August 6

Last day of 10-week semester classes.

August 7-8

10-week semester final examinations for all students.

August 9

Grades for degree candidates from departments due to Office of the Registrar, noon.

Grades will be available for viewing in Howdy after 5 p.m.

August 10

Last day for August undergraduate degree candidates to apply for Tuition Rebate in Howdy, 5 p.m.

August 10-11

Commencement and Commissioning.

August 13

Final grades for 10-week semester due to Office of the Registrar, noon.

Grades will be available for viewing in Howdy after 5 p.m.

2018 Fall Semester

August 15

Graduation application opens for all students planning to graduate in December 2018.

August 24

Last day to register for Fall semester classes, 5 p.m.

Refer to http://finance.tamu.edu/sbs for tuition and fee due dates.

August 27

First day of Fall semester classes.

August 31

Last day for adding/dropping courses for the Fall semester, 5 p.m.

September 11

Fall official census date.

September 28

Last day to apply for degrees to be awarded in December without a late fee.

October 15

Mid-semester grades due to Office of the Registrar, noon.

November 8 - 28

Preregistration for 2019 Spring semester.

2019 Summer Term II

May 15
Graduation application opens for all students planning to graduate in August 2019.

July 1
Last day to register for the Summer II term classes, 5 p.m.
Refer to http://finance.tamu.edu/sbs for tuition and fee due dates.

July 2
First day of Summer II term classes.

July 4
Independence Day. Faculty and staff holiday.

July 8
Last day for adding/dropping courses for the Summer II term, 5 p.m.
Summer II term official census date.

July 23
Last day for all students to drop courses with no penalty (Q-drop) for the Summer II term, 5 p.m.
Last day to change Kinesiology 198/199 grade type for the Summer II term, 5 p.m.
Last day to officially withdraw from the University for the Summer II term, 5 p.m.

August 5
Last day of Summer II term classes.
Last day to apply for all degrees awarded in August.

August 6-7
Summer II term final examinations for all students.

August 8
Grades for degree candidates from departments due to Office of the Registrar, noon.
Grades will be available for viewing in Howdy after 5 p.m.

August 9
Last day for August undergraduate degree candidates to apply for Tuition Rebate in Howdy, 5 p.m.

August 9-10
Commencement and Commissioning.

August 12
Final grades for Summer II term due in Office of the Registrar, noon.
Grades will be available for viewing in Howdy after 5 p.m.

Admission

Admission to Texas A&M University at Galveston

Admission (p. 705)
Admission Statement and Policy on Individuals with Disabling Conditions (p. 706)
Applying for Admission (p. 706)
Admission Deadlines (p. 706)
Required Immunizations (p. 706)
Guidelines for Requesting Application Fee Waivers (p. 706)
Credit by Examination (p. 706)
Gateway Program (p. 707)
Entry to a Major – College of Engineering (p. 707)

Admission

Admission into Texas A&M University at Galveston (TAMUG) requires a separate application from Texas A&M University at College Station. Applicants may apply for admission to any program on the Galveston
Admission Deadlines

- The application for Freshman admission will be available July 1, 2018. The application deadline for domestic freshman is February 1, 2019, with all supporting documents submitted by March 1, 2019 to be considered for admission.
- The application for Transfer admission will be available July 1, 2018. The application deadline is June 30, 2019.
- The application for an International Freshman student is due:
  - To apply for Fall 2019, the application deadline is December 1, 2018.
  - To apply for Spring 2020, the application is available from April 1, 2019 to August 1, 2019.
- The application for both Texas resident and nonresident students can apply for undergraduate admission to any Texas public university for freshman, transfer, and international admission by using the ApplyTexas Application. You may access the appropriate application from the ApplyTexas application website www.applytexas.org (http://www.applytexas.org).
- Deadlines for admissions are listed below; however, for Fall admission, it is advantageous to gain acceptance before December 1 to be prioritized for many scholarships and on-campus housing. The application for Spring 2019, Summer 2019, and Fall 2019 are available online beginning July 1, 2018.
- The application for an International Transfer student is due:
  - To apply for Fall 2019, the application deadline is December 1, 2018.
  - To apply for Spring 2020, the application is available from April 1, 2019, and the deadline is August 1, 2019.
- The application for Readmission will be available July 1, 2018 for Fall 2019. The application deadline for readmission is June 30, 2019.
- The application for Post Baccalaureate admission will be available July 1, 2018. The application deadline is May 30, 2019.
- The application for Non-degree Seeking admission will be available July 1, 2018. The application deadline is June 30, 2019.

Required Immunizations

- Texas Education Code (TEC) 51.9192 requires all entering students (under the age of 22) to provide evidence of vaccination against bacterial meningitis received within the last 5 years or a signed affidavit declining the vaccine at least 10 days prior to the start of classes for any given semester. Learn more about bacterial meningitis at http://www.tamug.edu/admissions/BacterialMeningitis.html.

Guidelines for Requesting Application Fee Waivers:

Fee waivers are not available for international students.

Freshman Waivers: Applicants requesting a fee waiver must submit an SAT/ACT fee waiver request form (must have an original signature from both the applicant and the counselor issuing the waiver), or submit documentation of need via a memo on school letterhead signed by the high school counselor. Typically, need is defined by qualification for free lunch programs. We recommend the correct form or letter be uploaded through the Applicant Information System (AIS) page. Copies, email attachments, or faxes of these forms will not be accepted. The original document is required, if it is not uploaded in AIS. **Checking the fee waiver box on the application does not satisfy the fee waiver requirement.** You must provide documentation of need as noted above. The application should be submitted prior to submitting fee waiver documents. Fee waiver request documents should be mailed to the following address:

Texas A&M University at Galveston
Office of Enrollment Services
P. O. Box 1675
Galveston, TX 77553-1675

Transfer or Readmit Waivers: To request a fee waiver, please provide your Student Aid Report (SAR), which you will find within your current FAFSA or a copy of an award letter from your current institution. **Checking the fee waiver box on the application will not satisfy the fee waiver requirement.**

The documents can be uploaded through the Applicant Information System (AIS) page. Documents will also be accepted by fax at (409) 740-4731 or email at seaaggie@tamug.edu, as well as U.S. mail.

Credit by Examination

Information concerning credit by examination may be obtained from the Seibel Learning Center Staff, (409) 741-4343. For information regarding current procedures for accepting credit, please visit the Academic Enhancement (http://www.tamug.edu/acen) website.

To obtain an information packet or schedule a campus visit, call toll free at 1-87-SEAAGGIE, write Office of Admissions, Texas A&M University at Galveston, P. O. Box 1675, Galveston, TX 77553-1675, or visit www.tamug.edu (http://www.tamug.edu/admissions) admissions. Acceptance by the Office of Admissions does not constitute admission to the U.S. Maritime Service License Option Program. When admission requirements have been satisfied, the Office of Enrollment Services will send the applicant a letter of acceptance.

Application. You may access the appropriate application from the ApplyTexas application website www.applytexas.org (https://www.applytexas.org). The SAT or the ACT admission examinations are acceptable. Students should submit scores to Texas A&M University Galveston at (Code 6835 for SAT and Code 6592 for ACT). Scores will only be accepted directly from the College or ACT.

Texas A&M University at Galveston has a strong institutional commitment to the principle of diversity in all areas. In that spirit, admission to Texas A&M University and any of its sponsored programs is open to all qualified individuals. Texas A&M does not discriminate on the basis of an individual’s disability and complies with Section 504 of the Rehabilitation Act of 1973, and the Americans with Disabilities Act (ADA) as amended in its admissions, accessibility, treatment and employment of students in its programs and activities. Services and facilities are available to students with handicaps. Individuals should contact the Office of Student Affairs if they have special needs before they commit to enrollment.

Credit by Examination

Information concerning credit by examination may be obtained from the Seibel Learning Center Staff, (409) 741-4343. For information regarding current procedures for accepting credit, please visit the Academic Enhancement (http://www.tamug.edu/acen) website.
Gateway Program
The Galveston Gateway Program helps incoming students become fully prepared for their academic program. Students will be selected for the Gateway Program during initial review of their application for admission to the University; any student offered admission through the Gateway Program are required to satisfactorily complete the program in order to gain full admission to the university.

Galveston Gateway students begin at TAMUG for the Summer II term and complete preparatory coursework, some of which will apply towards their major. At the conclusion of the Summer term, students who have met the terms of the program will continue as full students in good standing for the Fall term. Students who do not meet the terms of the program will be reviewed for possible continuation on probation or full suspension.

For additional information, contact the Seibel Learning Center at (409) 741-4343.

Entry to a Major – College of Engineering
Freshmen in General Engineering, Engineering at Galveston, or Engineering Academy programs have a common first year engineering curriculum to allow time for students to learn about the 17 engineering degree granting majors. It is recognized that in most cases students are not made aware of all of our engineering majors while in high school. Students are introduced to the different engineering majors in the first year engineering courses. Students are encouraged to leverage additional resources, including the career center, faculty, as well as advisors to get career advice. Students must complete the following courses in at least two semesters before applying to an engineering major: two engineering courses, two math courses, and two science courses in the freshman year engineering curriculum. Exceptions will be made as needed for students entering with credit for the required courses. The entry-to-a-major process is designed for students to take ownership of their future to identify at least three majors that are a good match for their career goals and academic performance. The entry-to-a-major process is designed to place students in the highest rank major possible based upon capacity and student performance. Students are encouraged to be in a major as early as possible. Students in the General Engineering and Engineering at Galveston programs must be in a major by the end of the third semester in engineering. Students in the Engineering Academy program must be in a major by the end of the fourth semester in engineering.

Transfer students are admitted directly to a degree granting major through the admissions process.

Tuition and Fees
Tuition and Fees for Texas A&M University at Galveston
Payment of Tuition and Fees (p. 707)
One Time Only Fees (p. 708)
Housing and Meal Plans (p. 708)
Tuition and Fees: Texas Resident and Non-Texas Resident (Both undergraduate and graduate) (p. 708)
Tuition and Fees: Texas A&M Maritime Academy Cadets (p. 708)

Summer Cruise (p. 709)
Other Expenses (p. 709)
Students Dropped for Non-Payment: Summer Terms (p. 709)
Emergency Tuition and Fee Loans (p. 709)
Unpaid Check (p. 709)
Fees (p. 709)
Other Expenses (p. 711)
Student Fiscal Appeals (p. 711)
Scholarships (p. 711)

Payment of Tuition and Fees
Students must meet all financial obligations to the University by their due dates to avoid late penalties, regardless of timing of payment assistance (scholarships, loans, tuition assistance, etc.). Failure to pay amounts owed may result in cancellation of the student’s registration and their being barred from future enrollment and receiving official transcripts. Students who wish to pay fees in installments can select the option on the My Finances tab at their Howdy portal at https://howdy.tamu.edu/cp/home/displaylogin.

- Payments to Student Business Services may be in the form of cashier’s check, personal check, debit card or money order payable to Texas A&M University at Galveston (or TAMUG). All checks and money orders are accepted subject to final payment. Debit cards are also accepted in person. Cash is not accepted at the Cashier’s booth.
- Discover, Mastercard and American Express credit cards and E-checks are accepted for tuition and fee payments on the website at the Howdy Portal/ My Finance Tab. Convenience fees of 2.25% will be charged for online credit card transactions, with a minimum $3 charge. Visa credit cards cannot be used for payment.
- Credit card payments cannot be accepted in person by the Student Business Service Office.

No tuition and fee statements will be mailed. Notices of amounts owed should be obtained through the Howdy Portal/ My Finance Tab at https://howdy.tamu.edu/cp/home/displaylogin. An email will be sent to a student’s University email address (email.tamu.edu) when the tuition and fee statement is available to view online. Students must use their Howdy NetID and password to log into these two programs.

Students who plan to pay their bill in full by the due date will receive notification through their University email address that the fee statement is available to view online and when tuition is due and payable.

Students may choose to pay tuition and fees in installments. Students on the installment plan will receive notification through their University email account that the fee statement is available to view on line and when each installment payment is due and payable. In addition, students will be notified through this medium when any changes have occurred to their tuition and fee statement and if and when they have a refund available. All financial aid or loans must be accepted before being applied toward the student’s account.

Late Payment Penalty
There are severe penalties for failure to pay student account balances and installments by their specified due dates. If a payment is delinquent...
when a semester ends, the student will be blocked and may not receive credit for academic work performed. Students will not be readmitted to the University until all past due balances, including late charges, are paid. A late fee of $25 will be assessed for each payment not received on or before it is due. If a student is removed from the rolls of the University or is withdrawn for failure to pay amounts owed the University, a reinstatement fee of $200 will be assessed in addition to any other late fees or penalties already incurred and must be paid before the student will be reinstated. Current due dates can be found at the Student Business Services website.

Late Registration Fees

Students who register on or after the first day of classes are assessed a late registration fee of $100. Students who register after the official census date (12th class day for fall and spring, 4th day for summer) are assessed a late registration fee of $200. Students who add classes after the official census date are assessed a late fee of $50. Note: Penalties, late registration and late add fees also apply to students who are required to re-enroll because their registrations were cancelled for nonpayment. Registrations are subject to cancellation and/or financial penalties if sufficient payment is not received before 5:00 p.m. on the semester due date.

Use of Collection agencies and Credit Bureau

If amounts become past due, the University reserves the right to report the account to the Credit Bureau. This will also initiate internal collection efforts and could cause the University to employ an outside collection agency to collect the debt. If any collection efforts must be made, the student will be required to reimburse the University for the fees of any collection agency, which may be based on a percentage at a maximum of 30% of the debt, and all costs and expenses, including reasonable attorney’s fees the University incurs in such collection efforts.

Cancelling Registration

Once students have registered for classes, they must select one course of action from the following to remain in good standing with the University:

• pay all amounts due by the specified due date.
• use the online registration to drop all classes prior to the first day of classes.
• initiate the withdrawal process online in Howdy to begin the process to withdraw from the University after the first day of classes.

Following this procedure is especially important for students who have been awarded scholarships or financial aid since the aid may automatically pay tuition and fees and cause the registration to be held even though the student has decided not to attend. Failure to request cancellation of an unwanted registration may result in grades of F or I in all courses for the semester. The student will be required to reimburse the University for scholarships and other financial aid applied to his or her account and will be held responsible for paying all fees for the semester, regardless of whether he or she attended classes.

Cancellation for Nonpayment of Tuition and Fees

The University reserves the right to cancel registrations not paid by their due date, or the official census date for a semester or summer term, to comply with state laws requiring payment of tuition and fees, to free the classroom spaces for other students, and to ensure the most efficient use of university resources.

Housing and Meal Plans

With limited exception, all undergraduate students enrolled in more than nine credit hours are required to reside in campus housing (if available) and are required to purchase a meal plan. Information concerning a request to live off-campus can be obtained at http://www.tamug.edu/reslife/Housing/OffCampus.html. Any student living off campus at the beginning of the semester who adds enough hours to require living on campus must pay for room and board for the entire semester. Residence hall fees are included in the fee schedules at http://www.tamug.edu/reslife/Housing/HallSpecifics.html. In certain cases, single room housing is offered. The fee for that room is the normal rate plus 50%.

Upon admission to the University, students who will be living on campus must submit a $75 housing application fee to reserve their spot in the residence halls. A waiver for the housing application may be submitted. To do so, the student should submit a housing application with an attached letter stating reasons for the waiver request. In order to be considered, the student must have a FAFSA submitted to TAMUG. The waiver request can be emailed to reslife@tamug.edu or mailed to TAMUG Residence Life, P.O. Box 1675, Galveston, TX, 77553-1675.

Students requesting to change meal plans during the semester will have 20 days from the first class day to make any changes and the cost of those changes will adhere to the University’s refund schedule. Requests for changes to a meal plan after the 20 day period will not be permitted. All changes must be made through the Dining Services Office at (409) 740-4508.

Meal Plan Fees:

For On Campus: http://www.dineoncampus.com/tamug/for-on-campus

For Off Campus: http://www.dineoncampus.com/tamug/for-off-campus

Tuition and Fees: Texas Resident and Non-Texas Resident (Both undergraduate and graduate)

Tuition and fees can be found at http://fms-galveston.tamu.edu/sbs-galveston/tuition/ , Tuition Information. The student will need to know his/her chosen tuition plan for determination of his/her tuition and fees.

Tuition and Fees: Texas A&M Maritime Academy Cadets

Cadets enrolled in MARB-LO, MARS-LO, MART or MARR-LO curricula pay a special tuition rate regardless of their state residency status (in-state or out-of-state). License Option students who are residents of the state of Texas will pay instate tuition plus $12.50 per semester credit hour. License Option Students from states other than Texas will pay the instate
variable plan plus $12.50 per semester hour plus a Differential Tuition of $150.00 per semester hour.

Tuition and fees can be found at http://fms-galveston.tamu.edu/sbs-galveston/tuition/. The Cadet’s cohort will determination the applicable Tuition and Fees. NROTC Midshipmen, Drill and Ceremonies Cadets or International Cadets are not eligible for this special License Option tuition and must pay normal Texas Resident or Non-Resident as applicable.

Summer Cruise
Cadets may sail on the Texas A&M Maritime Academy training ship or they may sail aboard another maritime academy’s training ships, all depending on capacity and timing issues. There are additional costs associated with travel to the ports of departure and arrival.

Cadets in the License Option Program must achieve the minimum sea service aboard ships required by the U.S. Coast Guard within four (4) years. In order to obtain federal financial aid, students must enroll in a minimum of six semester credit hours during the summer term. Cadets may meet this requirement by completing two additional semester credit hours while on cruise or by completing an additional course on campus. Either of these options will result in additional tuition expenses.

The Summer Cruise expense for training aboard the TAMMA training ship includes tuition and fees plus a cruise fee. Summer cruise fees for students sailing with alternate schools will incur tuition and fees plus a cruise fee. Additional travel expenses to and from the ports plus lodging is in addition to the cost of the cruise which is estimated to be between $10,500 to $11,500. The Summer Cruise meal plan expense includes state and city tax of 8.25%.

Other Expenses
This may include uniforms with an initial outlay of $1,500, special training such as Fire Fighting School and incidents.

Students who are dismissed or withdraw from a license-option degree plan after the semester begins will have fees adjusted to the appropriate resident or nonresident rate retroactive to the beginning of the semester.

License-option Cadets who are granted a leave of absence for the summer and who enroll in the onshore summer program at the Mitchell Campus instead of the summer training cruise will pay license-option fees as appropriate for that period.

License-option Cadets must complete all required sea service within four (4) years.

Students Dropped for Non-Payment:
Students that have not paid their tuition and fees in full by the 17th class day in the Fall and Spring semester or the 13th day in the Summer Semester will be “hard” dropped from their classes. At this point in time, students may no longer attend classes in the current term. To re-enroll, all tuition and fees must be paid in full and a $200 reinstatement fee will be assessed.

Emergency Tuition and Fee Loans
Emergency tuition and fees loans are available to help students get through the crunch at fee payment time. Students can borrow up to the amount of their tuition and fees for a maximum term of 90 days in the Fall and Spring semester and 30 days in the Summer semester. The loan proceeds are applied directly to the student’s account to cover current due charges. Students that anticipate their financial aid or some other third party payment may be delayed are encouraged to pursue an emergency tuition and fees loan so they will not get dropped from their classes or incur additional fees. Students may apply for this loan at the Howdy Portal/ My Finance Tab. Short term loans are also available to pay optional fees, such as residence hall fees, meal plans, parking, etc. They can be repaid up to 12 months. To qualify you must be registered for 6 hours in the fall or spring semester and 3 hours in the summer term and be clear of all past due loans and blocks. To obtain short term loans, students should consult with Student Business Services, located in the Main Building Suite 104 or at 409-740-4434.

Unpaid Check
If a check or ACH payment accepted by Student Business Services, the bookstore or any other campus department is returned unpaid by the bank on which it is drawn, a penalty of $30 will be assessed. The returned check or ACH payment and the penalty fee must be paid with cashier’s check, money order or credit card online. If not redeemed, the customer may be dropped from the University. Student accounts will be blocked for future registration and transcripts. The student is eligible for reinstatement after payment of penalties, a $50 reinstatement fee and redemption of the check or ACH payment. If Student Business Services receives three returned checks or ACH payments from one student, the University will no longer accept this payment type for the student.

Fees
Please note that not all fees listed below are relevant to all students.

Application Fee
Students who submit an application for undergraduate studies pay a $75 fee. Students who submit an application for graduate studies pay a $50 fee. International students pay a $90 application fee.

Career Center Fee
This $35 fee is required of students in the semester they register for on-campus interviews to support full-time and internship placement services. This fee is optional if the student desires to access career services through Texas A&M University in College Station.

Commercial Cruise Fee
A fee of $800 will be charged for all license option students sailing on a commercial cruise.

Distance Education Fee
$46 per semester credit hour is assessed to students taking courses using distance education resources.

Field Trip Fees
A field trip fee ranging from $15 to $5,740 may be charged for courses that include field trips.

Graduation Fee
A non-refundable fee of $47.50 per degree sought is assessed the semester a student applies for graduation. This must be paid within the first 15 class days of the student’s final semester. Late payment of the Graduation Fee will result in a $50 late charge.
International Student Service Fee
International students who are not sponsored are assessed a $46 fee each semester to defray administrative support costs.

Independent Study Abroad Fee
In the event that a student is planning to Study Abroad, this fee of $100 is to cover services provided by the TAMU Study Abroad Office.

International Student Health Insurance
International students (students who are not U.S. Citizens or Lawful Permanent Residents of the United States) enrolled at Texas A&M are required to have health insurance. International students will be automatically enrolled in and charged for the System Student Health Insurance Plan (SSHIP) unless they apply for and are granted a waiver. Individually purchased plans from vendors other than the Texas A&M University System provider will not be eligible for a waiver of automatic enrollment in the SSHIP. This is to ensure that medical treatment will be available in the event of injury or illness during enrollment at the University. This requirement includes students enrolled in extensive English language programs. Full-time English Language Institute (ELI) students should contact ELI for information. All other international students can receive more detailed information about this requirement by visiting http://admissions.tamu.edu/international/iss. Specific questions may be directed to International Student Services by emailing ISS@tamu.edu.

General Property Deposit
Every student, unless registered in absentia, must make a $100 property deposit to protect the University from damage to or loss of university property. Charges will be billed directly to the student. Failure to pay the charges promptly will cause the student to be barred from re-admission and receiving an official transcript from the University. If a student withdraws from the University without paying the charges, the deposit will be held for 30 days after the close of the semester or a student’s withdrawal, so that all charges and fines may be totaled from the various departments. This deposit, less outstanding charges, will be returned upon request to the student graduating or withdrawing from school. Deposits not requested within four years from date of last attendance will be forfeited into a student deposit scholarship account.

Health Services Fee
This fee is required of all students enrolled in Galveston-based classes at the rate of $44.50 for each regular semester, $44.50 for the summer training cruise, and $22.25 per five-week summer term. This fee will finance health services provided by a local clinic in Galveston, and medical services on the summer training cruise.

Housing Application Fee
An application fee of $75 is required as part of a completed housing application. Exact stipulations and details regarding the use and return of that deposit are listed within the contract signed with the application. A waiver for the housing application fee may be submitted. To do so, the student should submit the housing application with an attached letter stating reasons for the waiver request. In order to be considered, the student must have a FAFSA submitted to TAMUG. The waiver request can be emailed to reslife@tamug.edu or mailed to TAMUG Residence Life, P.O. Box 1675, Galveston, TX, 77553-1675.

Identification Card Maintenance Fee
All students must have an identification card. This card is used in registration procedures, collection of fees, for dining hall privileges, etc. If the card is lost or stolen, a reissuing fee will apply.

Installment Plan Fee
If a student chooses to use the installment plan for payment of tuition and fees, there is a $15.00 nonrefundable charge for Fall and Spring Semesters. There is no no charge for the installment plan in the summer semester.

Laboratory Fees
A laboratory fee ranging from $8 to $30 is charged for each laboratory course each semester.

MMAL Program Fee
This fee is required of all graduate students enrolled in the MMAL program and assessed at $750.00 for in-state residents and $1500 for non-residential per semester. The MMAL program fee will be utilized to provide program administration and departmental operating costs in order to sustain a quality graduate program, as well as to provide for innovative growth.

Mail Service Fee
Limited availability exists for students residing in non-university owned or operated housing to rent a campus mailbox. The fee is $20 per semester and $20 per ten-week summer term. Inquiries should be directed to the Bookstore (409-740-4488). Students have mail services included as part of the University’s room charge if they are residing in university owned or operated housing.

Cadet Drug Test Fee
The Cadet Drug Test Fee is $35 per semester and is required for all License-Option Cadets.

New Student Conference Fee - Graduate
The Graduate New Student Conference fee is required of all new graduate students enrolling in the fall or spring semesters and selected summer terms at the rate of $50 per student. This fee supports the provision of advanced materials to accepted students and the activities and food during the orientation.

New Student Conference Fee - Undergraduate
The New Student Conference fee is required of all new freshmen and transfer students enrolling in fall or spring semesters and selected summer terms at the rate of $100 per student. This fee supports the provision of advanced materials to accepted students, the conduct of new student conferences (including some meals) and student activities.

Parking Permit
All students parking an automobile or motorcycle on the campus pay a fee of $200 for the academic year (Fall, Spring, Summer). By request, prorated refunds can be issued for terms not used. Parking rates are subject to change each fiscal year.

Recreational Sports Fee
This mandatory $105 fee assessed for the fall and spring terms and $52.50 for each 5-week summer term will provide building maintenance and programming support for recreational sports facilities.
Supplementary Fee for Courses Attempted More than Twice

A course that is repeated by a student more than twice at a public institution higher education in Texas may not be reported for state funding. As a result, the institution must either pass the non-funded portion to all students, or charge a supplementary fee to the student who is repeating the course. Texas A&M has chosen to assess a supplementary fee to those students repeating a course more than twice. A student attempting certain courses more than twice at Texas A&M University will be subject to a supplementary fee of $125 per semester credit hour ($375 for a 3 hour course) for the repeated course, in addition to tuition and required fees associated with the course. The general criteria for determining which courses are subject to the supplementary fee are:

- A course is subject to the fee if a student has completed it twice at Texas A&M University with a grade of A, B, C, D, F, F* (academic dishonesty), S (satisfactory), U (unsatisfactory), I (incomplete), Q (authorized drop after the add/drop period), F# (Freshmen Grade Exclusion) or X (no grade submitted).
- Courses identified by the University as repeatable for credit are not subject to the fee. A schedule of repeated courses can be found at admissions.tamu.edu/registrar/general/threepeat.aspx.
- Courses dropped with no record (NR), no grade (NG) and withdrawals (W) are not counted as repeated courses.

Students will be notified at the time they register for a course that it has been taken twice at Texas A&M University and is subject to the supplementary fee.

Testing Administrative Fee

A $50 per test fee will be used to pay for personnel to proctor credit-by-exams and TSI tests and to pay shipping costs to send tests to testing centers.

Texas A&M Maritime Academy Orientation Week Fee

The Texas A&M Maritime Academy Orientation Week (O-Week) Fee is $38 and covers equipment and supplies needed during the Corps of Cadets O-Week. Meals for O-Week are a separate charge and will be added to the semester bill following O-Week.

University Advancement Fee

The variable University Advancement Fee is a required fee charged to all Texas A&M University students. The Advancement fee funds services such as advising, technology, library and administrative services such as ID services, utilities, access to discounted software and many services provided through Student Services.

University Authorized Tuition

This variable fee is assessed to compensate for occupancy, services, use and/or availability of all or any of the property, buildings, structures, activities, operations and other facilities of the campus.

Other Expenses

Textbooks and Supplies: The cost of textbooks and supplies will vary with the quality of items purchased and with the course of study pursued. Students can expect to pay about $800 for each fall and spring semester. Expenses for the summer term should amount to approximately one-half of the above estimates.

License Option Cadet Expenses: License-option Cadets must purchase uniforms with initial outfitting estimated at $1,500. Other items such as caps, belt buckles, and name tags may be required to be purchased from the TAMUG Bookstore.

Tickets to Texas A&M University home games may also be purchased at registration. Refunds are not allowed for individual games or games missed.

The University operates a bookstore which supplies textbooks, stationery, drawing instruments, toiletries and other supplies. All merchandise is sold at retail prices prevailing in the area. Major credit cards are accepted in the bookstore.

Student Fiscal Appeals

If a student finds themselves in an issue related to the application of University Student Fiscal Policy, such as excess hours, please access the information under http://fms-galveston.tamu.edu/sbs-galveston/student-fiscal-appeal-process/ for an explanation of the Student Fiscal Appeal Process and an application for appeal.

Scholarships

For entering students, including freshman, transfers, and domestic graduate students, all scholarships are awarded based on information from the ApplyTexas application for admissions, including information collected in the Scholarship section of the application. If any awards require additional information, those students that are deemed qualified based on the ApplyTexas will be notified. The priority deadline for incoming student scholarships is December 1st. The final deadline for the Freshmen Terry Scholarship is January 6th, and the deadline for the Transfer Terry Scholarship is March 31st. The deadline for the Levy Fellowship is February 1st.

For continuing students, the University Scholarship Application (http://sfaid.tamu.edu/uwideapp) is used for awarding institutional scholarships. In order to receive a scholarship from Texas A&M University at Galveston for the upcoming school year, a student must complete the University Scholarship Application online by February 1st. Award recipients are primarily selected by a committee of faculty and staff from across the university who utilize this application and any other necessary supplemental information. In some cases, the selection is made directly by the donor of the scholarship funds.

To view scholarships available, visit http://www.tamug.edu/finaid/scholarships. For additional information, contact the Scholarship Office at scholarships@tamug.edu or 409-740-4414.

For additional information regarding financial assistance and other scholarships available to International Students, please contact:

Scholarships & Financial Aid
Texas A&M University
P. O. Box 30016
College Station, TX 77842-3016
(979) 845-3236
TAMMA requires additional steps and documentation including requirements established in Federal law by the U.S. Coast Guard (USCG) to guarantee admission into TAMMA. Due to program and professional standards established by USCG regulations, applicants must apply to the USCG for a medical certificate. The medical and physical evaluation process includes a vision test, hearing test, general medical exam, and demonstration of physical ability. License Option (LO) Cadets must demonstrate ability to meet USCG medical and physical standards within nine (9) months of enrollment. LO Cadets must continue to meet the USCG medical and physical standards throughout enrollment in an LO program. LO Cadets who fail to demonstrate ability to meet most current USCG medical and physical standards will be transferred out of the LO programs until the individual is able to meet the most current USCG medical and physical standards.

- Evidence that the Cadet or Midshipman is not a user of dangerous drugs. According to Federal regulations, TAMMA maintains a program for testing individuals for evidence of dangerous drug use. During O-Week, TAMMA will test entering freshmen and Cadets transferring into TAMMA for evidence of the use of dangerous drugs. In addition, TAMMA conducts random tests throughout the academic year. Any Cadet who tests positive for the use of dangerous drugs or refuses to be tested will be immediately suspended from the Corps and all LO courses and activities for a period of at least one (1) calendar year, depending upon the outcome of a Return-to-Duty process prescribed and monitored by the USCG. There is no guarantee that a Cadet who is suspended will be permitted to re-enroll in an LO program.
  - A criminal background check.

TAMMA staff, faculty, and the Commandant, review each application and make a recommendation for admission to the Superintendent. The final decision for admission into TAMMA rests with the Superintendent.

Prospective Cadets may download a TAMMA application through the TAMMA website.

License Option Graduation Requirements
TAMMA’s Cadets may receive diplomas from Texas A&M University only after 1) successfully completing the courses of study in their academic degree plans, 2) successfully completing required sea service and associated coursework during training cruises aboard training, commercial, or military ships, 3) passing a comprehensive professional examination administered by the USCG, and 4) demonstrating knowledge, understanding, and proficiency competencies required by the International Convention on Standards for Training, Certification and Watchkeeping (STCW).

The following degree plans offer a License Option:

- BS or MS Marine Biology
- BS Marine Sciences
- BS Marine Engineering Technology
- Masters of Marine Resources Management
- Masters in Maritime Administration and Logistics.
- BS Marine Transportation

All students enrolled in the Marine Transportation program are required to be in the LO program.

Cadets who select an LO degree plan must be motivated, honorable, and willing to experience the rigor and discipline of the regimental structure of the Corps of Cadets.

License Option Requirements
In addition to the degree requirements contained in the Texas A&M at Galveston Students Rules and the University catalog, LO Cadets must complete the requirements to achieve a Merchant Mariner Credential (MMC) issued by the USCG. The requirements for the MMC are...
determined by International conventions, Federal law and regulations, and policies established by the USCG and the Maritime Administration (MARAD). The requirements for an MMC are subject to change according to developments at the International Maritime Organization, Congressional action, the Federal rulemaking process, and consultations between the USCG, MARAD, and the Maritime Academies.

The international convention with the most direct impact on TAMMA and the requirements for an MMC is the International Convention on Standards for Training, Certification and Watchkeeping for Seafarers (STCW Convention). The main purpose of the STCW Convention is to establish international agreement on training and education standards to promote safety of life and property at sea and the protection of the marine environment.

The STCW Convention establishes endorsements that LO Cadets must achieve in order to graduate and serve aboard commercial vessels in international trade. "Deck Cadets" must achieve the STCW international endorsement as Officer In Charge of a Navigation Watch (OICNW). "Engine Cadets" must achieve the STCW international endorsement as Officer In Charge of an Engineering Watch (OICEW).

LO Cadets must also pass each course required for the desired STCW Convention international endorsement with at least a "C" AND demonstrate each of the required competencies contained in each course.

LO Cadets, regardless of age, prior experience as a mariner, or prior military service must maintain membership in the Corps and complete all of the requirements of the LO program. The minimum period of training is three (3) years or six (6) full semesters as a full-time student. However, according to policies established by the Superintendent consistent with Federal law and policies regarding maritime academies, the Superintendent has discretion in this area and may grant an LO Cadet credit for successful completion of coursework, sea service, or the demonstration of knowledge and practical skills at another State or Federal Maritime Academy. Applicants who desire to transfer into TAMMA from other State or Federal Maritime Academies are encouraged to inquire regarding current policy and provide documentation regarding prior coursework, sea service, and conduct records from other Academies.

LO Cadets are required to attend all classes in each course required for the desired STCW Convention international endorsement. These courses are identified in the Texas A&M University Catalog. Unexcused absences are not permitted and shall be adjudicated by the TAMMA staff. All sea service must be achieved according to TAMMA's USCG-approved License Option programs.

Sea Service Requirements
Under Federal law all LO Cadets are required to complete 360 days of sea service. Cadets may achieve the required sea service through a combination of TAMMA-approved assignments aboard training vessels, commercial ships, military vessels, USCG-approved courses that employ simulators, watches aboard TAMMA's training vessel, and maintenance work.

LO Cadets pursuing a Merchant Mariner Credential with Endorsement as Officer in Charge of a Navigation Watch (OICNW)
LO Cadets pursuing endorsement as OICNW, must complete 300 days aboard a combination of training vessels, commercial vessels, or government vessels. Cadets assigned to approved training vessels receive 1.5 days of sea service for each 1 day assigned. Cadets assigned to commercial or government vessels receive 1 day of sea service for each 1 day assigned. All assignments must be approved by the Superintendent.

The STCW Convention establishes endorsements that LO Cadets must achieve in order to graduate and serve aboard commercial vessels in international trade. "Deck Cadets" must achieve the STCW international endorsement as Officer In Charge of a Navigation Watch (OICNW). "Engine Cadets" must achieve the STCW international endorsement as Officer In Charge of an Engineering Watch (OICEW).

LO Cadets pursuing endorsement as OICEW, must complete at least 180 days aboard a combination of training vessels, commercial vessels, or government vessels. Cadets assigned to approved training vessels receive 1.5 days of sea service for each 1 day assigned. Cadets assigned to commercial or government vessels receive 1 day of sea service for each 1 day assigned. All assignments must be approved by the Superintendent.

These LO Cadets may also achieve sea service credit for not more than 180 days for performing work involving workshop skills. Cadets may perform this type of training on shore, subject to approval by the Head of the Marine Engineering Technology Department.

Corps of Cadets
The Corps of Cadets (Corps) focuses on leadership development and provides Cadets and Midshipmen enrolled in the Navy Reserve Officer Training Corps program (NROTC) a disciplined environment designed to prepare its members to become successful Merchant Marine or military officers.

Members of the Corps are required to attend formations, drills (including parades at College Station), stand announced and unannounced personal and room inspections, participate in physical fitness activities, and perform other duties required by the Corps Operations Manual.

TAMMA's Superintendent is responsible for TAMMA's administration and the operations of the Corps of Cadets. The Corps of Cadets includes

1) License Option Cadets (LO Cadets) who are studying and training to fulfill the professional requirements to become Merchant Marine Officers through TAMMA's USCG-approved training program. These Cadets enroll in TAMMA's License Option (LO) programs and must maintain membership in good standing in the Corps,

2) Midshipmen who meet the qualifications for acceptance into TAMUG's NROTC program. Midshipmen seek commissions in the U.S. Navy upon graduation. Midshipmen integrate fully into the Corps, and must complete all degree requirements as well as courses required by the Navy.

Students may join the NROTC program as National Four-Year Scholarship Winners or as non-subsidized college program applicants. Interested prospective Midshipmen may obtain information on the National Four-Year Scholarship program through any Navy recruiting office. The application deadline is January 15 of the year of admission. All NROTC scholarships cover the costs of tuition, fees, and uniforms. All scholarship-, junior-, and senior-level Midshipmen receive a monthly allowance and are pay for summer training periods.
3) Drill and Ceremony (D&C) Cadets who desire the structure, rigor, leadership training, and camaraderie of membership in the Corps. D&C Cadets are full members of the Corps, must purchase all required uniforms, perform drills, stand formation, and participate in personal and room inspections. They are not required to go on the summer cruise. Each D&C Cadet will receive a certificate indicating voluntarily participation and membership in the TAMUG Corps of Cadets.

Corps members are encouraged to participate in on-campus sports, clubs and educational activities and may compete for places on the Hearn Honor Guard, the Drill Team, the Sea Aggie Band, and the Flag Color Guard.

Members of the Corps are generally required to live on campus in the state-of-the-art Texas A&M Maritime Academy Hall.

Standards of Conduct
In addition to the Texas A&M University at Galveston Student Rules and the Texas A&M University Rules the Corps operates according to rules and standards contained in the Corps Operations Manual and the Cadet Instructions Manual[5]. Among other things, these publications establish mandatory uniform regulations, standards of dress, grooming, and discipline.

The Corps' conduct and discipline system, administered by the Commandant, is a method for assessing the aptitude and motivation of each corps member for becoming a mariner or military officer.

Corps members who violate the Corps' standards of conduct receive demerits and Cadets that consistently violate the Corps' standards of conduct may be suspended or dismissed from the Corps. Cadets enrolled in any of the LO programs must maintain membership in good standing in the Corps. LO Cadets who are dismissed or suspended from the Corps but who are permitted to remain at TAMUG may not enroll in LO courses and will be removed from the Corps housing. Cadets who are not Texas residents, will be required to pay to out-of-state tuition costs retroactively to the beginning of the term.

The Corps includes a special unit called "Victor Company". Victor Company is veterans of the U.S. Armed Services or individuals who are married and/or with dependents or over the age of 25 when first enrolled in TAMMA. The Victor Company Cadet Commander reports directly to the Commandant and Victor Company members follow all Corps regulations including watches and practical training aboard TAMMA's training vessel. Cadets in Victor Company are permitted to be off campus.

The Corps also includes International Cadets. International Cadets may pursue the LO education and training required to become Merchant Marine Officers and earn a degree from Texas A&M University. However, International Cadets are subject to U.S. immigration laws and may not take the USCG license exams. Instead, international Cadets receive a certificate of completion of their respective degree plans.

TAMMA will provide each Cadet accepted into the Corps a list of required uniform items along with procedures for purchasing uniforms. Entering Cadets should order uniforms as soon as they learn they have been accepted into the Corps. TAMMA will issue uniforms during Orientation Week prior to the start of the Fall Semester. The cost of uniforms ranges from $1,500 to $2,000.

Orientation Week
Prior to the beginning of the Fall semester, all freshman and transfer students entering TAMMA, NROTC, or D&C must attend Orientation Week (O-Week).

Under the guidance of the Commandant, members of the Corps of Cadets’ leadership team plan and execute O-Week to introduce each new member to the Corps’ routines and traditions. Cadets also learn military bearing and customs, basic seamanship, engineering, and nautical science skills. O-Week training includes, military formations, marching to class and meals, team-building exercises, hands-on seamanship training, and other training to enable new members to hit the decks running when the entire Corps returns from training cruises and assignments at sea.

Student Incentive Program (SIP)
LO Cadets may qualify for financial support through MARAD's Student Incentive Program (SIP).[6] LO Cadets who receive financial support through SIP participate in the Navy Reserve's Strategic Sealift Officer (SSO) program and receive a commission as Ensign, USNR upon graduation and may apply for active duty service with the Navy following graduation.

In order to qualify for the financial support under SIP, LO Cadets must

1. Pass a Navy physical examination and maintain Navy medical standards,
2. Pass semi-annual Navy Physical Readiness Tests,
3. Maintain a minimum GPA of 2.0 (4.0 system),
4. Be under the age of 27 by graduation.

Upon graduation, LO Cadets who accept financial support through SIP, must

1. Complete the course of instruction at TAMMA,
2. Within three (3) months of completion of the TAMMA course of study, achieve a merchant mariner license with appropriate national and international endorsements for service aboard vessels in domestic and international voyages with unlimited endorsements,
3. For at least six (6) years maintain a valid 1) merchant mariner license with appropriate national and international endorsements for service aboard vessels in domestic and international voyages with unlimited endorsements, 2) transportation worker identification credential, and 3) USCG medical certificate.
4. Apply for and accept, if tendered, an appointment as a commissioned officer in the Navy Reserve including the Strategic Sealift Officer Program, the USCG Reserve, or any other reserve component of the Armed Forces of the United States for at least eight (8) years.
5. Serve the foreign and domestic commerce and the national defense for at least three (3) years after graduation.

LO Cadets with interest in the SIP are encouraged to speak with TAMMA and NROTC staff about the details of applying and the obligations following graduation.

Additional LO Requirements
In addition to minimum requirements associated with courses within USCG-approved program of study and training for international
STCW Endorsements, Cadets are required to obtain several training endorsements required by the USCG. Some of these are Basic Safety Training, Basic and Advanced Firefighting, Radar and Automated Radar Plotting Aids, Global Marine Distress System (GMDSS), and Bridge Resource Management.

LO Cadets are also required to apply for and maintain a valid Transportation Workers Identification Credential (TWIC), and a current Passport. TAMMA will assist each Cadet in obtaining the required endorsements and documents. However, it is each Cadet’s responsibility to maintain a current portfolio of all required documentation. A complete list of these requirements and costs will be available during O-Week.

The following is an example of some additional cost items associated with the LO programs. The list is not intended to be exhaustive.

- Coast Guard Approved Fire Fighting School - $800-$1,500.
- TWIC - $150.
- Merchant Mariner Credential - $140.
- Training cruise - estimated about $9,000-$10,500 which does not include travel expenses to and from the Ports.

[4] 46 CFR §10.107(b) defines Merchant Mariner Credential as combining the individual merchant mariner’s document, license, and the STCW endorsement into a single mariners qualification document, certificate of identification, and certificate of service.

[6] Cadets enrolled in TAMMA’s License Option (LO) program may apply for Student Incentive Payments (SIP) provided by the Department of Transportation’s Maritime Administration. Title 46 USC 51509-51511 describes the details of the SIP. Cadets are encouraged to seek guidance from TAMMA staff regarding SIP.

Campus Dining

Students requesting to downgrade their meal plans during the semester will have 20 days from the first class day to make any changes and the cost of those changes will adhere to the University’s refund schedule. Downgrades can only be made if the student is not already on the minimum required plan. In order to add or upgrade a meal plan, please do so by 7 weeks from the start of the semester. All changes must be made through the Dining Services Office at (409) 740-4508.

Meal Plan Pricing:

On Campus: https://dineoncampus.com/tamug/for-on-campus

Off Campus: https://dineoncampus.com/tamug/for-off-campus

Career Services

Career Services can offer a variety of services for students in every stage of the career planning process, from your freshman year through graduation. These services include:

- Career Resource Room with work stations for employment research, resume writing and professional correspondence.
- Resume and cover letter assistance
- Interview preparation and mock interviews
- On-campus interviews and employer presentations
- Specialized workshops for employment research, job and graduate school searches.
- Job search and networking tips
- Email distribution list for job and internship postings.
- Career counseling
- Two annual career fairs, one in Fall and another in the Spring
Counseling Services

The Office of Student Counseling provides services to undergraduate and graduate students at Texas A&M University at Galveston. The Office is staffed by licensed counselors and the services rendered to students are free, voluntary, and confidential. The Office staff is dedicated to assisting students in their pursuit of personal and academic growth, to helping students gain a better understanding and appreciation of themselves, and to supporting students as they make important decisions about their lives.

What is counseling?

Counseling, most simply stated, is an interaction between a person who is struggling in some way and in need of help, and another person who is trained in helping people find solutions for their struggles. The reasons for coming are many, and the counseling strategies employed also vary from counselor to counselor. The one constant is that the counselor focuses all energies on trying to help the student. It doesn’t always work, but our student evaluation forms suggest that most students who seek counseling believe that it has been helpful to them. And if you feel uncertain about whether counseling is for you, we encourage you to make an initial appointment and discuss any reservations you might have with one of our counselors. There is no obligation to continue.

Disability Services

The Counseling & Career Services office provides services to students with documented disabilities. The office offers information on disabilities, campus services, and related resources. Persons with disabilities are encouraged to apply for services early and to request a meeting to discuss their individual needs prior to registration. Accommodations provided to students are based on individual need. Information regarding disabilities can be obtained through the Counseling & Career Services, P.O. Box 1675, Galveston, TX 77553-1675, call 409-740-4736.

Diversity

Consistent with the core values of Texas A&M University the mission of the Office of Student Diversity Initiatives at Texas A&M at Galveston (TAMUG) is to provide programs and services that encourages members of our community to gain a deeper understanding, awareness, and appreciation for their own culture, as well as embracing the dignity of all cultures from our global society. Goals of diversity include creating an inclusive community of respect that positively encourages and attracts diverse populations to join and contribute to the university community as a student, faculty, and/or staff member.

Our vision is to be a model of inclusion and cultural competency that empowers holistic student development, transformational learning through inter-cultural dialogue, and collaborative networks that advocates for social justice in a diverse university community. To fulfill the vision, we offer programs and services that:

- Advocates and supports students and cultural groups in their identities.
- Collaborates with campus and community entities to ensure a positive university climate that advocates for justice, access, equity, and transformative learning for all students, with special focus on underserved students.
- Provides student support by building relationships of commitment and trust.
- Provides opportunities for students to develop as leaders by fostering a community of respect and building cross-cultural relationships.
- Provides diversity education and programs that allow dialogue and intersecting discussions regarding age, citizenship, disability/ability, education, ethnicity, gender, gender identity/expression, geographical location, language, military experience, political views, race, religion, sexual orientation, socioeconomic status, and/or thought to aid with developing students’ understanding of themselves and other cultures.

It is our mission to serve ALL students, but recognize the need to be especially attentive to the needs of those identifying themselves as African American/Black, Asian/Asian American, Hispanic/Latino(a), LGBT, Native American/American Indian, Multi-Racial, and/or Student Veterans.

Financial Aid

The mission of Scholarships & Financial Aid is to provide students with information and financial resources to attend Texas A&M University at Galveston along with support programs that promote higher education and developmental opportunities. As a part of this commitment, we strive to provide financial solutions to students at all income levels and with varying academic, merit, and leadership qualifications.

The need-based financial assistance program is designed for students who have a demonstrated financial need, as defined by the Free Application for Federal Student Aid (FAFSA) or other applicable application, in order to assist students in paying college expenses. All financial aid is contingent upon student enrollment and making Satisfactory Academic Progress (SAP), as defined by Scholarships & Financial Aid or the specific aid program.

Financial aid is available in two forms: Gift Aid and Self-help.

Gift Aid

Grants (Federal, State, Institutional) Loans (Federal, State, Institutional, Alternative)
Scholarships Student Employment (Work Study, Part-time Employment, Internships, Assistantships)
Non-resident Tuition Waivers

Texas A&M University’s packaging philosophy for need-based financial aid is to provide the greatest amount of gift aid to those students with the highest demonstrated need and to keep loan liability to a minimum. Financial aid is awarded on a first-come, first-served basis with a priority date prior to the fall semester for which the student is seeking aid published on financialaid.tamu.edu.

To apply for financial assistance, a student must submit a Free Application for Federal Student Aid (FAFSA). The FAFSA becomes available on October 1st each year for the next academic year. Students are encouraged to submit their FAFSA online at https://fafsa.gov as soon as possible. Students who do not meet the citizenship eligibility requirements to complete the FAFSA may be eligible to submit the Texas Application for State Financial Aid (TASFA). Only students who have been accepted for enrollment, have a FAFSA or other financial aid application on file, and have submitted all requested documentation to Scholarships & Financial Aid will be sent a financial aid offer. Award offers for incoming students beginning in the Fall semester are made early in the preceding Spring semester. Award offers for incoming students beginning in the Spring semester are made late in the preceding Fall semester. Award offers to continuing students for the upcoming
academic year are made after Spring semester grades have been submitted. Summer financial assistance is offered to students with a FAFSA or TASFA on file who enroll at least half-time in summer coursework at Texas A&M.

Financial aid offers are made based on the assumption that students will enroll full-time in the fall and spring semesters. Cost of attendance and awards will be adjusted for students who are enrolled less than full-time at Texas A&M University. Students may only receive federal financial aid for eligible courses that count towards the program of study. State and Institutional Aid are not subject to the same regulatory restrictions. However, the cost of attendance for students will be reduced for courses that are not counting to the program of study, which can result in a lower amount of state and institutional aid a student could receive.

Student inquiries may be directed to:

Please visit our website for the most current information on financial aid applications, programs, and any associated deadlines.

Grants

The Federal Pell Grant is available to undergraduate students who have not received a baccalaureate degree and who have demonstrated financial need as determined by the FAFSA. The Federal Pell Grant provides a foundation of financial assistance to which aid from other sources may be added.

The Federal Supplemental Educational Opportunity Grant (FSEOG), and the Texas Public Education Grant (TPEG) are available to students, provided the results of their financial aid application show evidence of financial need and funds are available. These funds are awarded on a first-come, first-served basis. The Towards EXcellence, Access and Success (TEXAS) grant is available to eligible Texas residents who have requisite levels of financial need according to the FAFSA and have met the remaining program criteria; it is also subject to funds availability and eligibility guidelines as defined by the Texas Higher Education Coordinating Board. Additionally, Texas A&M University provides institutional grant aid to eligible students to assist with educational expenses. Student grants are subject to fund availability and may be single-year or multi-year awards.

The Federal/Texas College Work Study Programs

Federal and state programs provide part-time employment for U.S. citizens, permanent residents and eligible non-citizens, within fund limitations, who have an established financial need and desire on-campus employment.

To qualify for the Federal/Texas College Work Study Programs, a student must have submitted a financial aid application, have financial need, be eligible to work in the United States, be enrolled at least half-time or accepted for enrollment and be making Satisfactory Academic Progress if enrolled.

All Work Study students are paid minimum wage or higher, work an average of 20 hours per week, and are not eligible for paid holidays, retirement, vacation, nor sick leave.

Loan Programs

The Federal Direct Loan Programs are available to students who have submitted a FAFSA. Students will be notified of their eligibility for the Direct Loan program(s) through a financial aid offer.

Students and parents seeking the Parent Loan for Undergraduate Students (PLUS) may obtain information from the financial aid website. This program requires the FAFSA to be on file with Scholarships & Financial Aid.

Short-term loans are available to provide assistance to students who experience temporary financial difficulties with educationally related expenses. Funding for this program is provided by The Association of Former Students, the Class of 1926 and other University resources. This program is not intended to provide long-term assistance or to replace other assistance available through Scholarships & Financial Aid. Students must be degree-seeking and enrolled at least half-time to be eligible for short-term loans.

The Emergency Tuition and Required Fees loan program is available to help students pay their tuition and required fees. The loan is applied directly to the student’s tuition and fee account.

Please refer to our website for detailed information on all of the aforementioned programs and more.

Changes in Status that Impact Financial Assistance

Dropping or Q-dropping a course affects a student’s enrollment status. In turn, enrollment status may impact certain funding sources. The following describes these impacts.

- **Enrollment Status** – A student’s enrollment status continues to be adjusted throughout the semester when a student drops or Q-drops a course. However, in most cases, the change in status has minimal impact, depending on timing or recent changes in laws. The impact is primarily on student loan repayment.

- **Health Insurance** – In the past, students often needed to maintain full-time enrollment to continue to be covered under their parents’ health insurance policy. With the implementation of the Affordable Care Act (ACA), that is no longer required. A dependent can now be covered under their parents’ insurance plan until the age of 26 regardless of their enrollment status as a student.

- **Financial Aid & Scholarships** – Timing matters on when a student drops a course. Financial aid checks enrollment status on two occasions – when a student’s aid is released to their billing account and on 12th class day of a Fall or Spring semester. A student’s aid amount can be adjusted if the student’s enrollment status changes between the time funds are disbursed to the billing account and the 12th class day. However, after the 12th class day, enrollment status is not a factor for aid that has already disbursed and instead any changes in enrollment status will be reviewed through financial aid’s satisfactory academic progress standards for subsequent semesters and will not impact current semester aid. If aid has not been disbursed prior to the 12th class day, then the enrollment status on the date the aid is disbursed is what matters. In the Summer semester, enrollment status is officially checked on the 5th class day of the Summer session(s) in which the student is enrolled.
• **Student Loan Repayment** — Students must maintain at least half-time enrollment throughout the semester for student loans to remain in an in-school deferred status. Dropping below half-time enrollment will trigger student loans to enter any applicable grace period, with repayment required after the grace period has elapsed. Changes in enrollment status from full-time to half-time have no consequence on student loans. Half-time enrollment for a graduate student is defined as 5 hours and for an undergraduate student it is defined at 6 hours.

**Scholarships**

**Incoming Freshmen Scholarship Programs**

- **Achievement Scholarships** are available to incoming freshmen who attended and graduated from targeted high schools in the State of Texas. Awards are based on academic achievement, leadership ability, and extracurricular participation. For priority consideration, students must complete and submit the ApplyTexas (http://www.applytexas.org) freshmen scholarship application no later than December 1 of their senior year of high school.

- **Scholarships** are available to incoming freshmen who achieve a minimum 1300 Old SAT composite score (critical reading + math, with respective scores of 600 in each), 1360 New SAT composite score (evidence-based reading and writing score of at least 660 + math scores of at least 620), or 30 ACT composite (English + Math, with scores of at least 27). For priority consideration, students must complete and submit the ApplyTexas (http://www.applytexas.org) freshmen scholarship application no later than December 1 of their senior year of high school.

**Continuing Student Scholarships**

- The University Scholarship Application is available to students with at least one semester completed at Texas A&M. Awards range in value from $500 to $1,500 and are available to undergraduate, graduate, and professional students currently enrolled at Texas A&M. Some awards are limited to certain fields of study and to individuals who have attained a necessary academic classification, while others are unrestricted. Awards are made to outstanding students based on a combination of academic achievement, campus/community involvement, campus leadership roles, and, for some scholarships, financial need. Students are encouraged to complete the application beginning in October via the scholarships website (https://scholarships.tamu.edu). The deadline for submitting applications is February 1, prior to the academic year for which the student will be awarded.

**Transfer Student Scholarships**

- Aggie Transfer Student scholarships are designed to recognize outstanding students who will be transferring to Texas A&M University. Scholarships are awarded based on a combination of academic achievement, extracurricular activities, campus involvement at their current institution, leadership, major and, in some instances, financial need. These award amounts can range from $500 to $1,500 and the application is available to students through the ApplyTexas (http://www.applytexas.org) application.

**Scholarship Recipients and Non-Resident Tuition Waivers**

- The Competitive Scholarship waiver, authorized under Texas Education Code 54.213a, is an optional waiver that institutions can implement. An eligible non-resident student who holds a competitive academic scholarship of a specified minimum dollar amount for the academic year or summer for which the student is enrolled may be eligible to pay the fees and charges required of Texas residents without regard to the length of time the student has resided in Texas. The student must have competed with other students, including Texas residents, for the scholarship and the scholarship must be awarded by a Texas A&M University college or departmental scholarship committee or university representative. An outside donor may be consulted for input by the college or departmental unit, however, outside donor(s) may not make the final selection of the student recipient for a scholarship.

- Effective Fall 2017, undergraduate students must be awarded and maintain competitive scholarships of at least $4,000 per academic year in order to qualify for this waiver. All graduate students, all professional students, and current undergraduate students with existing and continuing scholarship awards, may continue to receive this waiver at the previous $1,000 threshold.

- More information is available at http://scholarships.tamu.edu/Non-Resident-Tuition-Waiver

For additional information on scholarships, please visit https://scholarships.tamu.edu/ or email scholarships@tamu.edu.

**Health Services**

Medical Clinic: Texas A&M University at Galveston contracts with the University of Texas Medical Branch (UTMB) Family Medicine clinic for health services for enrolled undergraduate students. Under the contract, office visits to the doctor are free of charge. Medications, inoculations, x-rays, physicals, and other services provided at the clinic may be covered under students’ private insurance or at the student’s expense. Hospitalization and emergency room visits are full-charge at the student’s expense.

Group Insurance: Since there are numerous health needs and costs, which are not provided or paid for by Student Health Service, students are strongly encouraged to maintain medical insurance. A group plan is available to all students in the Texas A&M University System. Information about this program will be distributed during new student orientation and are available from the student counseling office. Students and parents should give careful consideration prior to dropping any current health insurance.

Emergency Medical Transport: Please note that if an ambulance or other emergency transport is called, it is the responsibility of the student to cover any cost incurred; it is not the liability of the University.

**Texas A&M University at Galveston Campus Honors Program**

Participation in the Texas A&M University at Galveston Campus Honors Program is a challenging and enriching academic and service experience that engages students in transformative learning through undergraduate research, service learning opportunities, and capstone projects, and prepares them to apply for nationally competitive scholarships and fellowships.

Honors students may design an individualized plan of study, including a capstone experience, independent study, or a senior thesis. Credit for Honors coursework is achieved through Honors designated courses and approved course contracts. Honors coursework requirements may lead to an Honors Program designation upon graduation. The Honors
Program distinction is separate from University Honors such as cum laude, summa cum laude or magna cum laude, which are conferred by the Office of the Registrar and are based upon cumulative GPR and residency requirements.

**Honors Program Eligibility**

Application to the Texas A&M University at Galveston Campus Honors Program is open to:

- Incoming freshmen with a minimum score of 1250 on the SAT or 28 on the ACT and in the top 10 percent of their graduating high school class, as well as National Merit Finalists, National Achievement Finalists, or National Hispanic Scholars, are automatically admitted into the Texas A&M University at Galveston Honors Program.

- Transfer students will be considered for participation on a case-by-case basis. A maximum of 6 AP Honors credits or transfer credit may be used in the completion of Texas A&M University at Galveston Campus Honors.

A 3.5 cumulative GPR is required to remain eligible for participation in the Honors Program.

**Honors Program Requirements**

The following minimum requirements must be competed for students to receive an Honors designation on their official transcript:

1. A minimum of 18 Honors credits with at least 12 Honors credits taken in residence.

2. At least six Honors credits in courses or types of courses chosen by the department, these may be but are not required to be outside the department or outside the courses required for the student’s major and/or minor.

3. At least three, but not more than six Honors credits of the 18 required Honors credits in a 400-level or above course (graduate courses accepted), including research or independent study courses.

4. No more than six Honors credits of graduate courses registered for graduate credit, 600 level.

To make progress toward the Honors distinction, Texas A&M University at Galveston Campus students must:

1. Maintain a Texas A&M University GPR of 3.5 and accumulative Honors GPR of at least 3.25.

2. Complete curriculum requirements by taking at least six Honors credits per year.

3. Fulfill annual co-curricular participation requirements and participate in at least two Honors Program events each semester, with at least one designated as academic.

In the event an Honors student fails to meet any of these requirements, a probationary semester is granted. Continued failure to meet these requirements results in dismissal from the Honors Program.

**Honors Program Core Coursework**

The following three Honors Seminars are required:

- **MAST 101** (Connections): A first year experience seminar that explores the connections between academic disciplines to develop creative and critical thinking strategies which will increase abilities to implement solutions, refine information literacy skills, and identify the resources available for a successful transition into the university environment.

- **MAST 480** (Honors Seminar in Service Learning): Opportunities for community service through active community participation; includes structured time of reflection; use of skills and knowledge in real life situations; extend learning beyond the classroom; foster a sense of care for others. Junior or Senior classification, or approval from instructor.

- **MAST 481** (Seminar in Maritime Studies): This course is intended to provide students with the opportunity to conduct in-depth research on a particular issue, event, period, or people in maritime studies. Junior or Senior classification, or approval from instructor.

Consistent enrollment in at least one Honors course every semester and the completion of a minimum of 18 Honors credit hours is required. Honors courses are designated by the 200 section number and HNR prefix.

**Housing**

The Office of Residence Life coordinates on-campus housing in modern student residence halls. Rooms are double and single occupancy and furnished with beds, desks, chairs, wardrobes or closets, and dressers. Students are expected to furnish pillows, blankets, shower curtains, linens, and cleaning supplies.

Students not enrolled in the Texas A&M Maritime Academy (TAMMA) are required to live on campus until the first Fall semester that they turn the age of 21. Exceptions may be granted for special circumstances that are listed below.

Permission to live off-campus is typically granted if one of the following circumstances are met:

- The student is married and living with their spouse in the local Galveston area.
- The student is a single parent/guardian and their child resides with them at their local Galveston area residence.
- The student is a veteran of the U.S. Armed Forces (copy of DD-214; not active duty for training only).
- The student will live with a parent/guardian in the Galveston area. (A typed verification letter will be required)
- The student will enroll in 9 credit hours or less for the semester.
- The student has an approved medical accommodation through the Office of Disability Services.

On-campus housing is required for all Cadets enrolled in TAMMA who are under the age of 25 unless they have been granted Victor company status through the Corps of Cadets.

Any student who believes they qualify to live off campus must apply for permission to seek off-campus housing. Approximately 60 percent of the undergraduate students are housed on campus, and returning students are given priority in granting permission to live off campus. Campus residents accepting housing in the fall semester are required to sign a Fall and Spring Semester contract and are not permitted to move off campus for the spring semester. An on-line application for campus housing, which is separate from the application for admission
to the University, is available from the Office of Residence Life website at www.tamug.edu/reslife (http://www.tamug.edu/reslife). Rooms are assigned in accordance with the date on which the housing application and room deposit are received in Financial Management Services.

Upon admission to the University, students who will be living on campus must submit an application containing a housing agreement and one-time, non-refundable housing application fee to be eligible to receive a Residence Hall Assignment. A waiver for the $75 non-refundable application fee may be submitted. To do so, the student should submit the housing application with an attached letter stating reasons for the waiver request. In order to be considered, the student must have a FAFSA submitted to TAMUG. The waiver request can be emailed to reslife@tamug.edu or mailed to TAMUG Residence Life, P.O. Box 1675, Galveston, TX, 77553-1675.

It is recommended that housing applications be submitted early. In the event that on-campus housing is not available, information concerning off-campus housing will be provided upon request. Since TAMMA Cadets are required to live on campus, Cadets will be able to pursue a license option only if campus housing is available for them.

**Housing Costs**
The cost of housing for each semester will vary based on the residence hall and room style a student resides in. Visit http://www.tamug.edu/reslife/Housing/HallSpecifics.html for current costs.

**International Student Services**
The Office of Student Diversity Initiatives serves as the liaison with the International Student Services Office at Texas A&M University in College Station. Personal counseling, financial planning, liaison with embassies and consulates, legal referrals, academic referrals, immigration matters, orientation programs, and advisement to groups, are among the services offered in collaboration with the Office of Counseling Services, Financial Aid, and International Student Services in College Station, TX.

For more information regarding International Student Services, contact the Office of Student Diversity Initiatives, P.O. Box 1675, Galveston, TX 77553-1675 or call 409-740-4582.

**Learning Commons**
The Learning Commons is a vital part of student academic support and success. The Learning Commons provides a modern learning experience for all students, contributes to a dynamic student learning environment, delivers high impact learning opportunities and fosters lifelong learning in students. The Learning Commons impacts student success through a variety of programs and resources including the Writing Lab, Multimedia Lab, Course Tutoring and Supplemental Instruction. The Learning Commons also provides faculty with teaching and instruction tools to creatively engage students in learning. In addition, the Learning Commons supports the Honors Program and Undergraduate Research Services.

www.tamug.edu/learningcommons (http://www.tamug.edu/learningcommons)

**Library**
The Jack K. Williams Library and Learning Commons hosts student-centered services and an electronic, print, and archival collection devoted to Marine and Maritime subjects in conjunction with students’ courses; a computer lab for resource discovery, equipment checkout; and individual, small group, and large group study spaces. The Library supports learning with research instruction, technology, information discovery, and reading/writing skills. Collection Services promotes student success by connecting Sea Aggies with information resources in and beyond the Jack K. Williams Library's academic work, working hard to acquire materials locally and from libraries around the world.

www.tamug.edu/library (http://www.tamug.edu/library)

**HyperMedia Lab**
The HyperMedia Lab offers services for students, staff, and faculty exploring visual and audio communication mediums including appropriate environments for recording audio and video. The HyperMedia Lab assists in the creation and use of media for students and faculty and development of public speaking skills.

www.tamug.edu/hypermedia (http://www.tamug.edu/hypermedia)

**Supplemental Instruction (SI)**
Supplemental Instructors design fun and collaborative sessions based on course topics to reinforce challenging concepts and strengthen understanding. Regular attendance throughout the semester helps students stay on track or get ahead, build confidence through critical thinking and problem solving, and meet other students and form study groups.

http://www.tamug.edu/supplementalinstruction

**Tutoring**
Deeper understanding, extra practice at applied theory, and intellectual skill building differentiate students who attend Tutoring from those who don't. Peer Tutors guide learning while working through difficult course concepts and example problems in foundational courses such as Chemistry, Math, Physics and more.

www.tamug.edu/tutoring (http://www.tamug.edu/tutoring)

**Writing Lab**
Students can utilize the services during any stage of the writing lifecycle: research, organizing/brainstorming, first review for revision, second review for editing, grammar and formatting, citations and references, and writing presentations, and for any written or verbal project. Writing Counselors teach strategies & techniques to improve writing for academic growth, career success, and lifelong learning.

www.tamug.edu/writing (http://www.tamug.edu/writing)

Parking

Vehicles parked on the Galveston campus are required to display a valid parking permit, except for those parked in designated visitor’s spaces. The annual cost of permit ($200) is prorated and subject to change. For more information or to purchase a faculty, staff or student permit, visit http://www.tamug.edu/police/parking/.

Registration and Academic Status

The Texas A&M University at Galveston follows the same guidelines and definitions as the College Station Campus. Registration for the fall and spring semesters is accomplished at several times. During the fall and spring semesters (in November and April), a preregistration period is held for currently enrolled and readmitted students to register for the next semester. There are periods of announced open registration for students who were unable to preregister during the scheduled preregistration period. New Student Conferences serve as an opportunity for new undergraduate students to register. Further information concerning registration may be obtained from the academic calendar published in this catalog or from the Office of the Registrar. The schedule of classes is available online.

Full-Time Student

A full-time undergraduate student is defined as one who is registered for 12 semester hours during a fall or spring semester or 8 hours in a summer semester. Full-time enrollment for federal financial aid is defined as 12 semester hours, including the summer term. A Q grade or W grade does not count toward the certification of enrollment status. Only hours for which a student is currently enrolled at Texas A&M University can be used toward certification of enrollment.* A license option student registered for summer cruise (MART 200, MART 300, MART 350, MART 400, NAUT 200, NAUT 300, NAUT 400; MARR 200, MARR 300, MARR 400 or MARE 200, MARE 300, MARE 400) will be considered a full-time student for registration purposes but not as defined by federal financial aid. *Enrollment status for students in these programs is reported to the National Student Clearinghouse by Texas A&M University and includes enrolled hours from both institutions. Students can obtain enrollment verification which will reflect this enrollment status from the National Student Clearinghouse through Howdy. Students alternatively requesting enrollment verification directly from the Texas A&M University Registrar’s Office on TAMU letterhead are provided enrollment verification of Texas A&M University enrolled hours ONLY.

Undergraduates Registering for Graduate Courses

A senior undergraduate student with a cumulative grade point average of at least 3.0 or approval of his/her academic dean, is eligible to enroll in a graduate course and reserve it for graduate credit by filing a petition obtained from the student’s undergraduate college and approved by the course instructor, the student’s major department head, the dean of the college offering the course, and the dean of the student’s undergraduate college.

An academically superior undergraduate student with a cumulative grade point average of at least 3.25 or approval of his/her academic dean, is eligible to apply graduate credit hours toward his/her undergraduate degree program by filing a petition obtained from the student’s undergraduate college and approved by the course instructor, the student’s major department head, the dean of the college offering the course, and the dean of the student’s undergraduate college. Graduate credit hours used to meet the requirements for a baccalaureate degree may not be used to meet the requirements for a graduate degree.

VA Benefits

Students who are military veterans should note that to receive full VA benefits they must be registered for enough hours to be considered full-time for their degree during each term they are seeking benefits. This number may differ between degrees and during the summer semester. For hour requirements, please visit Veterans Services.

Maximum Schedule

An undergraduate student with an overall grade point average of 3.0 or better may register for a course load in excess of 19 hours in a fall or spring semester with the approval of his or her advisor. An undergraduate student with an overall grade point average of less than 3.0 must obtain approval of his or her dean before registering for a course load in excess of 19 hours in a fall or spring semester.

Classification

Each student has a classification which indicates the type of degree program in which the student is enrolled, and reflects the student’s progress within that program. The classifications at the Texas A&M University at Galveston match the College Station Campus.

Academic Status

Distinguished Student and Dean’s Honor Roll

An undergraduate student who completes a semester schedule of at least 15 graded hours or a summer session schedule of at least 12 graded hours with no grade lower than C and with a grade point average of not less than 3.5 for the semester or for a summer session shall be designated “distinguished student.” A student who, under the same circumstances, achieves a grade point average of at least 3.75 shall also be designated as a member of the “dean’s honor roll.” First semester freshmen must complete a semester schedule of at least 15 hours with no grade lower than a C, no Q-drops and with a grade point average of not less than 3.5 for “distinguished student” designation and a 3.75 for “dean’s honor roll.” Official notification of these designations will be issued to the student by the dean of the student’s college. The hours earned with a grade of S shall not be included in determining minimum hours required for the designation of “distinguished student” or “dean’s honor roll.” A grade of I or U disqualifies a student from being considered as a “distinguished student” or for the “dean’s honor roll.” Grades of Q, W, and NG may not be included in the 15 graded hours. Only undergraduate courses or graduate courses used for the undergraduate degree will be used in either calculation.
Scholastic Probation
Scholastic probation is conditional permission for an undergraduate student to continue in the University after he or she has become scholastically deficient. For university policy regarding scholastic deficiency and scholastic probation, see the Texas A&M University Student Rules (http://student-rules.tamu.edu).

Withdrawal from the University
An official withdrawal from the university will result when a student drops all in progress and courses not yet started in a particular term. A student who withdraws from the university before the completion of a semester or summer term is required to comply with the official withdrawal procedure. This process is initiated by submitting a request through the Student Withdrawal channel on the My Record tab in the Howdy portal. Students may not withdraw after the Q-drop deadline. The student’s dean will retain the authority to support a student withdrawal after the deadline.

If a student is enrolled in one or more inter/intra-session (“minimesters”) or summer terms and chooses to withdraw, all current and future in progress courses for the entire semester will be dropped. The student will be ineligible to register for courses for the remainder of that semester.

For university policy regarding withdrawal, see the Texas A&M University Student Rules (http://student-rules.tamu.edu).

Correct Addresses
It is necessary to have a correct residence address on file with the University. Students may change their address in Howdy. International students must have a correct physical and permanent address. International students must go to International Student Services to change their physical and permanent addresses.

Texas A&M may also use email for official communications. It is each student’s responsibility to claim his/her Texas A&M University email account (http://gateway.tamu.edu) and to check that account on a frequent and consistent basis.

Recreational Sports
The mission of the Department of Recreational Sports is to provide safe and inclusive activities that promote a healthy and physically active lifestyle while developing social, leadership, and other life skills which will enrich the education of our students and the campus community.

The Department of Recreational Sports features four programmatic areas: Intramural Sports (http://www.tamug.edu/recsports/intramurals), Club Sports (http://www.tamug.edu/recsports/clubsports), Outdoor Program (http://www.tamug.edu/recsports/outdoorprogram.html), and Aquatics (http://www.tamug.edu/recsports/aquatics.html).

The Intramural Sports program offers the campus community the opportunity to compete in Men’s, Women’s, and/or Co-Rec leagues or tournaments. Intramural sports are open to all currently enrolled students as well as TAMUG faculty and staff. There are no registration fees charged for participation.

The Club Sports program provides students with the chance to focus on a particular sport or recreational activity, and in many cases compete in or pursue that activity at a higher level.

The Outdoor Program grants students, faculty, and staff the opportunity to participate in outdoor pursuits such as surfing, camping, rock climbing, stand-up paddleboarding, and kayaking.

Additionally, the Department of Recreational Sports oversees aquatic facility operations at the campus outdoor pool including open swim hours, hiring of lifeguards, and facility rentals.

Seibel Learning Center
The mission of the Seibel Learning Center (formerly Academic Enhancement) is to contribute to the academic success of all undergraduate students at Texas A&M University at Galveston, by providing them the information and support needed to become skillful, self-directed learners. We aim to guide students through the integration of curricular, co-curricular, and personal choices into a purposeful academic journey. Vital aspects of this effort are educating students on how to navigate an ever-evolving learning environment, coaching students on effective learning behaviors, connecting students to high impact opportunities, and providing individualized solutions to ease student transitions.

Specific Seibel Learning Center (SLC) programs include Academic Advising (for all first year students as well as General Academics majors), the Academic Coaching and Success Program, Academic Compliance and Testing oversight, First Scholars, Galveston Gateway, and the General Academics major. For additional information, please visit tamug.edu/slc (http://www.tamug.edu/slc).

Student Activities
It is easy to get involved at Texas A&M University at Galveston, and there are many good reasons to get involved.

As would be expected, student life at TAMUG is often centered around the ocean. Many clubs and sports often involve water, but we have numerous active student organizations including many professional organizations that cover a wide variety of interests. The only question is which organization, or organizations, are right for you?

We follow Aggie traditions such as Yell Practice, Muster, Silver Taps, SALT Camp (Sea Aggies Learning Traditions), The Big Event and the famous Aggie Ring. Students may also get involved with the Student Government Association, the Nautilus (newspaper), or Sea Spray (literary magazine).

As you can see, there are numerous opportunities to enrich your college career by practicing the six core values of Texas A&M University: Excellence, Integrity, Leadership, Loyalty, Respect, and Selfless Service.

Student Affairs
The Division of Student Affairs, Suite 101 in the Seibel Student Services Center, is responsible for the social, moral, and intellectual development of Texas A&M University at Galveston students through their involvement in student organizations, leadership activities, recreational sports, and other co-curricular and extracurricular activities. Student Affairs also oversees Housing, Judicial Services, student diversity initiatives, counseling and career services, and the residence life programs as well as advises student organizations about program planning, university rules, risk management and the function of organizations to students throughout their college career. Furthermore, they allocate funding for eligible student organizations and aid in campus wide events such as Aggie Muster, Maritime Ball, Family Weekend, and Springfest. In addition to providing students an avenue to participate in several club activities,
Undergraduate Research

The Division of Student Affairs encourages all students to take advantage of the many opportunities available through "the other education" activity programs.

Undergraduate Research

Undergraduate Research Services promotes student success by providing high-impact educational experiences and challenges motivated students in all academic disciplines to pursue an enriched, intellectually-stimulating curriculum. The Undergraduate Research programs bring together outstanding students and faculty to build a community of knowledge-producers, life-long learners, nationally-recognized scholars, and world citizens. Research opportunities are open to all undergraduates and is a collaborative effort between undergraduate students, graduate students, and faculty using an inquiry-based approach to generate new knowledge.

Being involved in undergraduate research allows students to participate in a scholarly community of students with common interests, to learn more about their future professional field, and to develop a close working relationship with acclaimed faculty. Research experiences make students more competitive for scholarships, internships, jobs, international opportunities, and admission to top graduate and professional programs. Perhaps most importantly, engaging in undergraduate research allows students to experience the excitement of working collaboratively to create new knowledge, solve cutting-edge problems, work collaboratively, and communicate more effectively—life skills that are increasingly valued in our world.

Visit www.tamug.edu/undergraduateresearch (http://www.tamug.edu/undergraduateresearch) for more information or to apply.

Undergraduate Research Scholars

The Undergraduate Research Scholars (URS) program seeks to provide eligible undergraduates with a graduate student experience by allowing them to participate in research and communicate their findings as principal authors to the University’s scholarly community.

Undergraduates who participate in the Undergraduate Research Scholars (URS) program will ultimately:

- Produce a written undergraduate thesis to be published in the Undergraduate Research Scholars Capstone Collection in the Texas A&M OAKTrust Repository (http://oaktrust.library.tamu.edu/handle/1969.1/3367)
- Make a public presentation
- Gain knowledge that didn’t come from a classroom
- Improve their chances for acceptance into graduate or professional schools, fellowships, and grants
- Gain a better understanding of graduate school
- Network with students and faculty

To apply for the Undergraduate Research Scholars (URS) program, students must:

- Have completed at least 60 credit hours (junior status) of undergraduate course work
- Have at least 24 credit hours at Texas A&M University
- Have and maintain a cumulative GPR of at least 3.0
- Be expecting to graduate May 2018 or later

Aggies Commit to Excellence Scholar (ACES)

The Aggies Commit to Excellence Scholar (ACES) program will fund up to 10 undergraduates from all majors to engage in high impact learning and research experiences under the mentorship of TAMUG faculty. The purpose of ACES is to empower all students and encourage underserved student populations to engage in research, as well as offer professional and leadership skills development to foster their interest and aptitude towards pursuing a graduate degree.

ACES students will receive a stipend per semester and renewal from the Fall to Spring semester will depend on successful recommendation of the faculty sponsor and demonstration of appropriate progress. Recipients will present project results at the TAMUG Student Research Symposium and/or other profession conference. A maximum of one student application per faculty member will be considered. Selection of students will be based on meeting the eligibility criteria, the quality of the narrative, and letter of support from the Faculty Sponsor.

Louis Stokes Alliance for Minority Participation (LSAMP)

Texas A&M University System Louis Stokes Alliance for Minority Participation, funded by the National Science Foundation, is part of a national initiative to increase the number of underrepresented minority students successfully completing high quality degree programs in Science, Technology, Engineering and Mathematics (STEM) disciplines and to encourage students to matriculate into graduate programs.

Five LSAMP awardees will receive a research and personal scholarship to cover research related expenses or travel to a conference. Each student will be expected to participate a minimum of 180 research hours split between the Fall and Spring semesters to present their research results at the TAMUG Student Research Symposium and LSAMP Symposium, and/or other professional conference. A maximum of one student application per faculty member will be considered (under exceptional circumstances such as a collaborative project or a limited number of Faculty Sponsors, more than one student per professor may be considered). Selection of students will be based on meeting the eligibility criteria, the quality of the narrative, and letters of support from the Faculty Sponsor.

Texas Institute of Oceanography (TIO)

Research and Graduate Studies offers Texas Institute of Oceanography funded Undergraduate Research Fellows. The purpose of this Fellowship is to provide research experience for the undergraduate students. Recipients will be required to present project results at the TAMUS Student Pathways Symposium or at the TAMUG Student Research
Symposium. Recipients will be paid as a Student Technician ($9/hr). Additional funds for travel to present results at a scientific meeting may be requested from the Research Advisory Council.

To be eligible, a student must:

- Be a Junior or Senior classification
- GPA > 3.00 overall at TAMU/TAMUG
- Be registered full-time
- Have a Faculty Sponsor for the proposed project
- Be available to work 10 hours/week on the project

Faculty Sponsor must agree to:

- Provide instruction
- Provide laboratory space (field work is also acceptable)
- Provide equipment and supplies (TIO funds are for salary only)
- Monitor hours worked and approve regular time sheets verifying these hours

Preference will be given to students who have been accepted into the TAMU Undergraduate Research Scholar Program and/or TAMUG Honors Program.

**Undergraduate Research Ambassador**

The Undergraduate Research Ambassadors work to inspire broader engagement in undergraduate research by educating and serving the Texas A&M University at Galveston community. Ambassadors represent LAUNCH at research, recruiting, and outreach events.

To be eligible, the student must:

- Have at least one semester of faculty-mentored undergraduate research experience
- Have at least 60 credit hours (24 hours at TAMUG) and maintain a GPR of 3.0 or higher
- Possess outstanding oral communication skills and describe your undergraduate research to a general audience
- Be willing to serve as a source of information on how to get involved in research
- Provide a letter of support from a Texas A&M faculty mentor

Upon acceptance to program UGR students will be expected to:

- Participate in an all-day orientation and training
- Attend Ambassador meetings
- Participate in at least 10 hours of activities per semester
- Review, interview, and train the incoming class of Ambassadors

**University Police**

The University Police are responsible for the protection of persons and property of Texas A&M University, and for the enforcement of the laws of the State of Texas and the rules and regulations of Texas A&M University as promulgated by the Texas Education Code. University police are commissioned peace officers involved in regular foot and vehicle patrol of campus, late-night security escorts, crime prevention programs for the campus community, and criminal investigations for the recovery of property and apprehension of criminals. Officers also provide regular security checks of buildings and property on campus. All University personnel are requested to cooperate with University police officers.

**Facilities**

**Texas A&M University at Galveston Facilities**

Classrooms, laboratories and meeting spaces are housed within 24 major buildings on the Mitchell Campus on Pelican Island. The Ocean and Coastal Studies building is the largest and best-equipped marine research facility on the Gulf of Mexico. There are seven residence halls on campus, the James McClory Arena and the Mary Moody Northen Student Center with dining services. The Jack K. Williams Library and Learning Commons contains over 60,000 books, museum exhibit space, archives and special collections, group study rooms, a classroom, computer lab, collections services workspace, a media lab, writing center and tutoring spaces. The training ship provides additional classroom, meeting and training space during the school year, and an additional fleet of small boats serve as floating classrooms and research stations. Texas A&M University Galveston campus has telecommunications systems established to communicate statewide within The Texas A&M University System universities and agencies. The Galveston campus has direct access to the Texas A&M University computer network in College Station via remote job entry connect lines.

Housing applications are available from Texas A&M University Galveston campus and should be returned with the required deposit to the Office of Student Services, Texas A&M University Galveston Campus, P.O. Box 1675, Galveston, TX 77553-1675.

**Policies**

**Texas A&M University at Galveston Policies**

University Statement for Individuals with Disabilities (p. 726)

University Statement on Harassment and Discrimination (p. 726)

Aggie Honor Code (p. 725)

University Student Rules (p. 726)

Fishing Rules (p. 726)

Title IX – Sexual Discrimination, Sexual Harassment, Sexual Assault & Violence (p. 727)

Notice of Nondiscrimination and Abuse (p. 727)

Reporting Responsibilities (p. 727)

Confidential Reporting Option (p. 727)
University Statement for Individuals with Disabilities

Texas A&M University (TAMU) is committed to maintaining an accessible campus community and providing reasonable accommodations to qualified students, faculty, staff and visitors. TAMU does not discriminate on the basis of an individual’s disability and complies with Section 504 of the Rehabilitation Act of 1973, and the Americans with Disabilities Act (ADA) as amended.

Students are protected from discrimination regarding access to and participation in TAMU’s programs and activities. TAMU provides academic adjustments and auxiliary aides to accommodate needs of students with disabilities, as defined under the law, who are otherwise qualified to meet the institution’s academic requirements.

Students with disabilities who would like to request accommodations may contact the following:

- TAMU and TAMU Health Science Center’s (TAMHSC) College of Nursing and School of Public Health should contact Disability Services (http://disability.tamu.edu/services) (979) 845-1637 or disability@tamu.edu.
- TAMHSC College of Dentistry should contact the Office of Academic Affairs (214) 828-8207.
- TAMU at Galveston (TAMUG) should contact Counseling and Career Services (409) 740-4736 or studentservices@tamug.edu.
- TAMU at Qatar (TAMUQ) should contact the campus psychologist, Dr. Steve Wilson +974-4423-0047 or stephen.wilson@qatar.tamu.edu.
- Students with disabilities who believe they have experienced discrimination may contact the TAMU ADA Coordinator at ADA.Coordinator@tamu.edu (979) 845-8116 or any of the following campus contacts:
  - TAMU and TAMHSC locations should contact the ADA Coordinator (https://urc.tamu.edu/ada) at (979) 845-8116 or ADA.Coordinator@tamu.edu.
  - TAMUG should contact the ADA Coordinator at (409) 740-4503 or boyerj@tamug.edu.
  - TAMUQ should contact Miguel Trevino at +974-4423-0317 or miguel.trevino@qatar.tamu.edu.

For more information about disability accommodations, see TAMU Student Rule 46, Disability Accommodations in Academic Programs (http://student-rules.tamu.edu/rule46) or TAMUG Student Rule 46, Disability Accommodations in Academic Programs (http://www.tamug.edu/studentrules/Student_Grievance_Procedures/46_Disability_Accommodations.html).

University Statement on Harassment and Discrimination

Texas A&M University (TAMU) provides equal opportunity to all employees, students, applicants for employment or admission, and the public regardless of race, color, sex, religion, national origin, age, disability, genetic information, veteran status, sexual orientation or gender identity. TAMU will promptly investigate complaints of discrimination, sexual harassment, and/or related retaliation in accordance with applicable federal and state laws.

Students who have questions or believe they have experienced illegal discrimination, sexual harassment, sexual violence, and/or related retaliation are encouraged to contact:

- TAMU and TAMU Health Science Center contacts - Notice of Nondiscrimination and Abuse (http://urc.tamu.edu/media/642261/NoticeOfNonDiscrimination.pdf)
- TAMU at Galveston contacts - Notice of Nondiscrimination and Abuse (http://www.tamug.edu/hrd/LinksAndForms/TAMUG_Notice_of_Nondiscrimination_and_Abuse.pdf)
- TAMU at Qatar contacts – Notice of Nondiscrimination and Abuse (https://www.qatar.tamu.edu/other/notice-of-nondiscrimination-and-abuse)

Aggie Honor Code

Integrity is a fundamental core value of Texas A&M University. Academic integrity requires a commitment by all faculty, students, and administrators to:

- Remain constantly focused on the quality of the academic programs;
- Achieve and maintain academic excellence in all courses and programs to assure the value of Texas A&M University degrees;
- Demand high academic standards from all members of the Aggie community.

All Texas A&M University students, graduate and undergraduate, part-time or full-time, in residence or in distance education, are expected to follow the guiding rule of the Aggie Honor Code:

“An Aggie does not lie, cheat, or steal or tolerate those who do.”

Upon accepting admission to Texas A&M University or one of its branch campuses, a student immediately assumes a commitment to uphold the Honor Code, to accept responsibility for learning, and to follow the philosophy and rules of the Honor System. A student will be required to state his/her commitment on examinations, research papers, and other academic work. Ignorance of the rules does not exclude any member of the Texas A&M community from the requirements or the processes of the Honor System.

The Honor System Office is charged with promotion of the honor code and administration of academic misconduct cases. The Honor Council, comprised of students and faculty from colleges and offices
across the University, will investigate all such infractions of the honor code and recommend appropriate sanctions. The website, http://aggiehonor.tamu.edu, defines the types of infractions and the possible consequences. Students are urged to review this information.

In addition to adherence to the Honor Code, a student (graduate students in particular) who is completing a thesis, record of study, dissertation, and publication may fall under the additional federal requirements promulgated by the Office of Research Integrity (Scientific Misconduct Regulations — 42 CFR part 50), as well as Texas A&M System Regulations and Texas A&M University Rules (Texas A&M System Regulations — Ethics in Research, Scholarship and Creative Work — 15.99.03 [https://www.tamus.edu/legal/policy/policy-and-regulation-library], and Texas A&M University rules and standard administrative procedures — Responsible Conduct in Research and Scholarship — 15.99.03.M1, 15.99.03. M1.01-06 [http://rules-saps.tamu.edu/TAMURulesAndSAPs.aspx#15]).

Contact information for each campus can be found at the following:

- Texas A&M University website - http://aggiehonor.tamu.edu
- Texas A&M at Galveston website - http://www.tamug.edu/honorsystem
- Texas A&M at Qatar website - https://www.qatar.tamu.edu/students/academic-services/aggie-honor-system

University Student Rules

Each student enrolled at Texas A&M University at Galveston is responsible for being fully acquainted with and complying with the Texas A&M University Student Rules. Specific rules, information and procedures may be found in publications pertaining to each particular service or department. Students are encouraged to reference the website at http://www.tamug.edu/studentrules for current published rules and regulations.

Fishing Rules

Texas A&M University at Galveston (TAMUG) is an institution of higher education and does not include any public fishing facilities. Due to significant safety and security concerns TAMUG only allows current students, current TAMUG employees and approved guests to fish on property owned or controlled by TAMUG. Approved guests must be accompanied by an affiliated individual, unless otherwise authorized. Fishing is only permitted on the Mitchell Campus on Pelican Island.

1. Guests of affiliated students and employees are permitted to fish as long as the TAMUG student or employee is with them. Employees and students are responsible for the conduct, compliance, safety and actions of their guests. All fishermen are expected to be courteous and respectful at all times.
2. Students and staff may have a reasonable number of guests at any one time. (Campus Police will determine what is reasonable for the situation)
3. Fishermen may only deploy one or two fishing rods at a time, per fisherman. Fishing rods may not be left unattended.
4. All children must be in the immediate care of an adult. Children 12 years old and under must wear an approved USCG flotation device while on TAMUG docks, piers, and beaches, as well as when they are in or near the water. In addition to dangerous drop-offs and currents, equipment and vehicles in the vicinity of authorized fishing areas can pose a danger to unsupervised children.
5. Fishing is not permitted from the dock at any time. Fishing is allowed on the beach, between the dock and the Pelican Island Causeway, or on the fishing pier. The area around the small boat basin is not open for fishing during normal hours of operations or if port operations require it to close temporarily. Open mainly on weekends and holidays.
6. Fishing is allowed at night but may be limited or forbidden during certain times for, training, repairs and/or cruise preparation.
7. No wade fishing is allowed in the oil spill compound, the small boat basin, the Oceanography docks or any areas marked as “No Fishing”.
8. All fishermen must have a valid Texas fishing license with a salt water stamp and must present it upon request.
9. No alcoholic beverages, drugs or firearms are allowed on-campus at any time. Anyone found in possession of contraband will be subject to immediate removal and/or citation or arrest.
10. All vehicle operators on-campus must obey traffic signs and directions from University Police officers or University Officials. Vehicles operated on-campus without a valid campus parking hang tag must be registered with University Police and display a TAMUG parking pass.
11. Vehicles may be parked in campus parking areas with authorized parking permits, obtained from the Campus Police Department. Parking on the docks, the beach area or within fire lanes or any other space which is not a clearly marked parking space, is strictly prohibited. Vehicles in violation of these rules will be cited and subject to tow at the owner’s expense. Failure to pay parking citations (University cashiers office-SAGC) will result in revocation of fishing authorization for one year from date of violation.
12. No littering. All fishermen are responsible for any trash or debris that they may accumulate while on TAMUG property. Fish cleaning is not allowed at any time on campus property.
13. All rules will be enforced by the Campus Police Department. Anyone who fails to follow the instructions of a Campus Police Officer will be subject to revocation of fishing authorization and/or citation or arrest. All unauthorized individuals will be asked to leave. All fishermen shall be considered “notified” of the rules from posted signs.
14. Texas parks and Wildlife agents frequently check fisherman on campus and notify campus officers if University rules are violated.
15. We reserve the right to investigate all containers left tied to any structure on the TAMUG water front. (anyone that suspects a container may present a problem should immediately call the officer on duty for inspection-409-740-4545). We recommend that all who leave a container in the water make sure it has their name and phone number on it, for verification. Homeland Security rules prohibit containers of any kind to be left near the ship or between the dock and the ship. These containers will be removed and discarded without notification. No ropes, strings or lines of any kind will be fastened to water lines, gas lines, electrical conduit or any other piece of infrastructure on the water front. They will be removed and discarded without notification. Any authorized staff or researcher, who finds any unauthorized containers or fastening in the normal course of their duties may remove and discard such objects without notice. (report to Campus Police at time of removal)
16. The fishing pier, located in the sw corner of campus, is small and can only accommodate a small number of fishermen at any one time. Campus Police may relieve any overload situation by whatever reasonable means are available at the time. Safety is number one.
17. No exception to these rules may be made without the approval of the TAMUG CEO or Executive Vice President or their designee.

Title IX – Sexual Discrimination, Sexual Harassment, Sexual Assault & Violence

“No person in the United States shall, on the basis of sex, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any education program or activity receiving Federal financial assistance…” (20 U.S.C. Section 1681)

Notice of Nondiscrimination and Abuse

Texas A&M University at Galveston provides equal opportunity to all employees, students, applicants for employment or admission, and the public regardless of race, color, sex, religion, national origin, age, disability, genetic information, veteran status, sexual orientation, or gender identity. Texas A&M University at Galveston will promptly investigate all complaints of illegal discrimination, sexual harassment, and related retaliation in accordance with applicable federal and state laws.

Reporting Responsibilities

Any employee who experiences, observes, or becomes aware of illegal discrimination, sexual harassment, and/or related retaliation must promptly report the incident(s). A student and third party should also promptly report the incident(s).

Only certain employees may keep reports of violations confidential: licensed health care personnel and licensed counselors when acting in this capacity as part of their official employment. All other employees informed of possible illegal discrimination, sexual harassment, and related retaliation should advise the reporter that they cannot keep the information confidential and are required to report it. The employees should inform the reporter where confidential guidance can be obtained.

Confidential Reporting Option

For confidential reporting, a student can contact a licensed counselor in the Office of Student Counseling by visiting the Seibel Student Services Center (Building #3030), Suite #104, calling (409) 740-4736; or contacting one of the individuals listed below directly. A staff or faculty member can contact a licensed counselor in the Employee Assistance Program at (409) 772-2485. To the extent possible, the university will protect the privacy of parties to the report within the context of the university’s duty to provide a safe and nondiscriminatory work and educational environment.

Mr. Ken Bailey, MA, Director of Counseling and Career Services, (409) 740-4725, baileyk@tamug.edu

Ms. Daisey McCloud, Assistant Director of Counseling and Career Services, (409) 740-4537, mccloud@tamug.edu

Where to Report an Incident

Students, faculty, staff, third parties, and applicants for employment or admission should report incidents to the appropriate Designated Official below who handles alleged violations committed by students, faculty, staff, and third parties.

- If the alleged offender is a Student, the official contact is
  - Dr. Todd Sutherland
    Assistant VP of Student Affairs
    Texas A&M University at Galveston

- If the alleged offender is a Faculty Employee, the official contact is
  - Dr. Blanca Lupiani
    Executive Associate Dean of Faculties
    Texas A&M University
    108 YMCA Building
    College Station, TX 77843
    Dof@tamu.edu
    (979) 845-4274

- If the alleged offender is Staff or a Third Party, the official contact is
  - Mr. Jeff Boyer
    Executive Director of HR & Title IX Campus Coordinator
    Texas A&M University at Galveston
    Powell Marine Engineering Complex #123
    Galveston, TX 77553
    TitleIXCoordinator@tamug.edu
    (409) 740-4503

Texas A&M University at Galveston provides equal opportunity to all employees, students, applicants for employment or admission, and the public regardless of race, color, sex, religion, national origin, age, disability, genetic information, veteran status, sexual orientation, or gender identity. Texas A&M University at Galveston will promptly investigate all complaints of illegal discrimination, sexual harassment, and related retaliation in accordance with applicable federal and state laws.

For reporting incidents or making inquiries regarding discrimination based on sex, you may contact

- Texas A&M University (Main Campus) Title IX Coordinator:
  - (979) 845-0977 or TitleIXCoordinator@tamu.edu
  - Office Address: 750 Agronomy Road, Suite 2101, College Station, TX 77843
  - See the TAMU Title IX Website http://urc.tamu.edu/title-ix/

- Jeff Boyer: Texas A&M University at Galveston Title IX Campus Coordinator
  - (409) 740-4503 or TitleIXCoordinator@tamug.edu
  - Office Address: 200 Seawolf Parkway, Powell Marine Engineering Complex (Building #3027) Suite 123, Galveston, TX 77554.
  - See TAMUG Title IX website http://www.tamug.edu/hrd/Title%20IX.html

The Section 504 and ADA Coordinator:

For reporting incidents or making inquiries regarding discrimination based on sex, you also may contact

- Jeff Boyer, TAMUG Title IX Coordinator at
  - (409) 740-4503 or at Boyerj@tamug.edu
  - Office Address 200 Seawolf Parkway, Powell Marine Engineering Complex (Building #3027) Suite 123, Galveston, TX 77554.

- Supervisors:

Employees may also report incidents to their supervisor.

- Federal Agencies:

Inquiries or complaints about discrimination also may be directed to the U.S. Equal Employment Opportunity Commission at 1-800-669-4000 or to the U.S. Department of Education Office for Civil Rights at (214) 661-9600.

- Texas A&M System Hotline (anonymous reporting option available):

  The Risk, Fraud & Misconduct Hotline at (888) 501-3850 or https://secure.ethicspoint.com/domain/media/en/gui/19681/index.html
Reporting Abuse or Neglect

State law requires all persons having cause to believe that a child's physical or mental health or welfare has been adversely affected by abuse or neglect to immediately make a report (even if the belief is premised upon incomplete or dated information) to: any local or state law enforcement agency; the Department of Family and Protective Services (DFPS); the state agency that operates, licenses, certifies, or registers the facility in which the alleged abuse or neglect occurred; or the agency designated by the court to be responsible for the protection of children. Further, all persons having cause to believe that an individual 65 years or older or a disabled person 18 years of age or older is in the state of abuse, neglect, or exploitation are required to notify the DFPS.

To report abuse or neglect to DFPS contact:
The Texas Abuse Hotline at 1-800-252-5400 or http://www.dfps.state.tx.us/Contact_Us/report_abuse.asp

For Emergencies:

Call 9-1-1 or local law enforcement
Texas A&M University at Galveston Police Department (409) 740-4545
Galveston Police Department (409) 765-3702
Galveston County Sheriff’s Office (409) 766-2300

For additional information concerning federal and state policies, please reference the appendices (p. 1219) in this catalog.

Department of Foundational Sciences

The mission of Foundational Sciences is to be a community of engaged faculty who offer academically excellent and pedagogically innovative classes in mathematics, chemistry, physics and statistics. We hope to insure the success of all Galveston students by proactively engaging the students with faculty and support activities for their coursework.

Department of Liberal Studies

The Department of Liberal Studies at Texas A&M at Galveston offers four unique interdisciplinary undergraduate degrees:

1) Bachelor of Arts: Maritime Studies
2) Bachelor of Arts or Bachelor of Science: University Studies; concentration in Tourism and Coastal Community Development
   - Sociology, tourism
3) Bachelor of Science: University Studies; concentration in Maritime Public Policy and Communication
   - Communication, public policy, environmental concerns
4) Bachelor of Science: University Studies; concentration in Marine Environmental Law and Policy
   - Law and business

With faculty maintaining research agendas in a variety of disciplines including politics, history, mass media and communication, English, popular culture, archeology, philosophy, museum studies, anthropology, genocide studies, African-American studies, and mathematics, Liberal Studies builds within students enhanced critical thinking and strong communication skills, while emphasizing the critical nature of multicultural thinking and collaboration in a global economy.

The Department of Liberal Studies provides the skills necessary for students to:

- Lead others through critical thinking, multi-dimensional problem solving, and issue advocacy;
- Be competitive in a multicultural world increasingly interested in college graduates with interdisciplinary backgrounds;
- Inform public policy creation and decision-making from both the governmental and business perspectives;
- Earn internships in areas such as politics, law and legal affairs, communication, for-profit and non-profit organizations, artifact conservation and museum management;
- Prepare for graduate school and law school opportunities;
- Understand the inalienable connections between liberal education, freedom, and democracy

## Maritime Studies - BA

**Maritime Studies: Freedom Starts with the Liberal Arts**

Maritime Studies (MAST) offers students a unique opportunity to examine the varied ways that humans use and impact coastal and maritime environments. It is well suited for students who seek to understand the vital and synergistic relationship humans have with the sea.

With 40% of the world’s population living within 60 miles of a coastline, there are a myriad of interests and demand for jobs dependent on coastal areas, such as:

- Energy exploration and use
- Preservation and conservation of culture
- Underwater archaeology
- Commercial fisheries
- Museums and their management
- Policy changes
- The effects of rising sea levels and changing coastal climates on coastal communities

By studying the history, archaeology, literature, communication and politics of maritime peoples and cultures from ancient times to present, Maritime Studies graduates gain a comprehensive understanding of the issues at stake, while achieving an excellent broad-based interdisciplinary education with a distinctive, international emphasis.

Working closely with their advisor, students will tailor their MAST degree to suit their interests and career goals, and have many opportunities for enrichment activities contributing to a healthy graduation portfolio. These activities can include enrollment in an internship suited to their career interest, participation in field studies, concentration on a particular topic with a professor of their choice, and/or studying abroad for a semester. Additionally, MAST students are given the once-in-a-lifetime opportunity to train as a crew member on a working 19th century tall ship, while earning college credit. Students are encouraged to pursue at least one minor, usually in Anthropology, English, Diving, Museum Studies or History, and many earn two.

Employers understand that students of the liberal arts bring advanced comprehensive problem-solving capabilities to the job market. By the time they graduate, our students will have acquired valuable critical thinking, reasoning, and communication skills. They are prepared for a diverse choice of fields including, but not limited to, oil and gas...
administration, environmental management, state and federal agencies, historical and non-profit foundations, museums conservation and administration, mass and niche communication, nautical and contract archaeology, journalism, education, management, law school, and graduate studies in related fields.

Students in the BA-MAST program must maintain a portfolio of artifacts from MAST required coursework. The portfolio is developed over the course of the undergraduate career, and upon completion, will contain artifacts from each MAST required course. The Portfolio is assessed for completion during the last term of enrollment, after the student submits the graduation application. The completion of the portfolio requirement will be assessed by the Liberal Studies faculty.

University Studies - BS, Marine Environmental Law and Policy Concentration

Students who are currently enrolled at Texas A&M University Galveston campus may submit proposals to enroll as University Studies majors. The University Studies degree format was created to provide students the flexibility to combine areas of study within either or both campuses that are of special interest. This flexibility may be attractive to students who have particular career paths or post-baccalaureate degree paths in mind.

All University Studies degree plans require at least 120 hours for completion. A University Studies Degree consists of a concentration of 21-24 hours and two minors of 15-18 hours each. Specific courses may be required for the completion of the hours in the concentrations and minors. Some concentrations and minors contain required courses that have additional prerequisites. One of the two minors must be completed in a college outside of the college that provides the concentration for the student’s degree.

Students must submit a Proposed Course Form that lists the courses for the individual degree plan the student hopes to complete to the University Studies admissions committee. The application includes a required 2-3 page essay in which the student can explain how the degree will help the student meet the desired educational and personal goals. Once it is determined that the Proposed Course Form has been completed with appropriate information, it will be reviewed by the department that offers the concentration. Students must be in good academic standing, and they must have good academic standing in previous courses that count toward the area of concentration or minors.

A University Studies major will be considered a student in the department that offers the concentration; the Marine Environmental Law and Policy concentration is housed in the Liberal Studies department. The student’s diploma will list Bachelor of Arts or Bachelor of Science in the same place it is currently listed, and University Studies will be listed in the place the major is currently listed. The student’s area of concentration and the two minors will be indicated on the student’s transcript.

The concentration in Marine Environmental Law and Policy requires 21 to 24 hours in coursework such as business law, admiralty law, environmental law, environmental ethics and politics of energy and the environment. Students can choose from a wide variety of combinations to position themselves for graduate studies in environmental law, employment in environmental regulatory areas and/or industry interested in environmental protection especially in a near shore environment. The student must complete a minimum of 6 hours at the 400-level and 36 hours of 300-400 level coursework in residence at Texas A&M University Galveston campus.

### University Studies - BS, Maritime Public Policy and Communication Concentration

The TAMUG University Studies concentration in Maritime Public Policy and Communication (MPPC) links two important fields of professional opportunity – Public Policy and Communication. It uniquely synthesizes the study of maritime public policy/policymaking with the study of international and intercultural communication methods, laws and regulations, and activism. MPPC students will focus their plan of study within the Texas A&M University Galveston campus Department of Liberal Studies (LIST), taking significant LIST coursework in public policy, political science, and communication. In addition, with a course selection pool that includes relevant curricula found in Maritime Administration and Marine Sciences, MPPC students engage a synergistic and broad interdisciplinary combination of study that is non-existent in any other major.

With an interdisciplinary approach to maritime issues in public policy and contemporary institutions and methods of global communication, MPPC is a particularly attractive offering for prospective students wishing to acquire a degree from TAMUG in something other than a STEM area. It provides students of good academic standing with a host of skills important to gaining careers in such areas as government, politics, urban planning, business, NGO's, policymaking, mass media production and administration, journalism, public relations, teaching, and national security. As part and parcel of the TAMUG Department of Liberal Studies, MPPC is particularly well-suited for preparing students for graduate and law schools.
The goal of the TCCD concentration is to instill a host of skills important to gaining meaningful careers in the growing fields of tourism and community affairs. TCCD career opportunities include:

- Ecotourism
- Coastal community planning and development
- Environmental policy and legislative affairs
- Sports tourism
- Convention and tourism offices
- Hospitality industry liaison
- Tourism sociological impact researcher
- Ecological economics
- NGOs and international social justice legal centers
- Congressional and legislative assistant
- And, many others

### University Studies - BS, Tourism and Coastal Community Development Concentration

#### Overview

The Department of Liberal Studies offers a University Studies degree with a concentration in Tourism and Coastal Community Development.

The Tourism and Coastal Community Development (TCCD) concentration transforms Texas A&M University Galveston campus students into a new class of professionals with the knowledge and skills to help coastal communities progress, while maintaining sound ecological and environmental practices. Such thinking involves an interdisciplinary approach that engenders creative and critical thinking about such issues as maritime public policy, communication, marine science, sociology, and ecology.

Students selecting the TCCD concentration graduate from Texas A&M University Galveston campus with a Bachelor of Science in University Studies, with the capability to guide industry and community toward a path that is both sustainable and economically beneficial.

The goal of the TCCD concentration is to instill a host of skills important to gaining meaningful careers in the growing fields of tourism and community affairs. TCCD career opportunities include:

- Ecotourism
- Coastal community planning and development
- Environmental policy and legislative affairs
- Sports tourism
- Convention and tourism offices
- Hospitality industry liaison
- Tourism sociological impact researcher
- Ecological economics
- NGOs and international social justice legal centers
- Congressional and legislative assistant
- And, many others

#### Diving Technology and Methods - Minor

The minor in Diving Technology and Methods combines practical scuba training with advanced coursework highlighting the scientific and professional applications of diving. Students get hands-on experience conducting scientific diving research and gain certification as Dive Masters and Dive Instructors. Students in any major may establish a minor field of study in Diving Technology and Methods through completing 16 hours from the designated courses. A minimum of 8 hours must be completed at the 300- to 400- level.

#### In addition to the course requirements, students must:

- Complete a medical statement showing no contra-indications to diving or have a recreational scuba diver's physical examination.
- Maintain a GPA of 2.5.
- Maintain good health and fitness appropriate to the level of diving required. Adverse behaviors that put the diver or other participants at risk such as the use of alcohol or certain medicines may require the diver to be removed from the program.
Maritime Studies - Minor

The Maritime Studies minor offers students an exciting interdisciplinary selection of courses to compliment and enrich all majors offered at the Galveston campus of Texas A&M University. The minor requires a total of 15 hours – three hours each of Anthropology, English, and History/Political Science, and 6 hours of electives to be chosen from Maritime Studies courses. The broad range of liberal arts courses offered by this minor provides an opportunity for TAMUG students in other majors to expand their knowledge and experience of maritime topics. The courses in the minor have been carefully selected for content, class size, and instructor to give students an optimum learning experience.

Total Semester Credit Hours 15

Minimum of 6 hours at 300- to 400- level.

A minimum grade of 'C' must be made in a course for it to count toward the minor.

Department of Marine Biology

The Department of Marine Biology offers undergraduate Bachelor of Science degrees in Marine Biology, Marine Fisheries, and Marine Biology-License Option from Texas A&M University. At the graduate level, the department offers Master of Science and Doctoral degrees in Marine Biology. Teaching and research facilities are located in Galveston, Texas along the shore of Galveston Bay. The semitropical climate provides students and faculty with year-round access to a variety of estuarine, coastal and pelagic marine ecosystems, including salt marshes, oyster reefs, seagrass meadows and coastal sand dunes and beaches. A state-of-the-art Sea Life Facility is available for additional hands-on experiences with marine organisms.

Undergraduate students have extensive opportunities for laboratory and field education and research at national and international locations. International educational opportunities are frequently available in Mexico, Greece, and Italy in conjunction with the TAMU Study Abroad Program, as well as summer field courses in Alaska.

The faculty have research expertise in marine fisheries, marine invertebrate and vertebrate zoology, marine botany, marine mammalogy,
biological oceanography, wetlands ecology, marine conservation and management, biospeleology, biodiversity, seafood microbiology, genomics, toxicology, physiology, marine acoustics, and evolutionary biology.

Marine biology undergraduate students obtain employment with State and Federal agencies, private industry, environmental consulting entities, biomedical research, marine parks, aquariums and zoos, and teaching. Many undergraduates pursue postgraduate studies in marine biology, as well as in the fields of medicine, veterinary sciences and environmental law.

**Majors**

- Bachelor of Science in Marine Biology (p. 735)
- Bachelor of Science in Marine Biology, License Option (p. 737)
- Bachelor of Science in Marine Fisheries (p. 738)

**Minors**

- Marine Biology Minor (p. 739)

**Marine Biology - BS**

This program explores the biological sciences through studies in the marine environment. Students follow a strong well-balanced curriculum in general biology that utilizes examples of local marine flora and fauna to illustrate patterns and processes. Students receive hands-on field sampling experience as well as internship and research opportunities. Students may take electives to emphasize certain interests such as vertebrate zoology, coastal wetlands ecology, conservation, comprehensive biology, fisheries biology, mammalogy, and aquatic animal

Total Semester Credit Hours 15

All electives must be chosen in consultation with, and approved by, the student’s academic advisor. Unless courses are specifically listed, see University Core Curriculum at http://core.tamu.edu/ for a listing of course options for Communication; Mathematics; Life and Physical Sciences; Language, Philosophy and Culture; Creative Arts; American History; Government and Political Sciences; and Social and Behavioral Sciences. The 6-hour University Core Curriculum requirement for International and Cultural Diversity may be met with courses used to satisfy other degree requirements. Up to 4 hours of MARB 491 and/or MARB 484 may be used as marine biology elective courses in your curriculum. Please consult with your academic advisor.

1 A grade of C or better is required before advancing to upper level courses.
2 Indicates required courses in the Marine Biology major. These courses will be used to compute the major GPR.
3 The total hours may be increased if the student is required to take remedial math, remedial English, foreign language or International and Cultural Diversity courses.
4 There are two mathematics course requirements. The first is MATH 142 or MATH 151. The other math course shall be selected from MATH 140, MATH 141, MATH 150, MATH 152, or PHIL 240. Depending on the math sequence selected, the number of credit hours may vary by 1 or 2 credits.
5 19 credit hours of biology electives selected from the following: BIOL 351; MARB 300-499 (p. 967); MARS 305, MARS 325, MARS 360. Students may take a maximum of two mammals courses (selected from MARB 400, MARB 401, MARB 403, MARB 404, MARB 407) and one of the two MARB scientific diving courses (either MARB 345 or MARB 350).
6 Designated writing intensive course.
7 The Earth Science elective may be chosen from GEOL 101-499 (p. 922) or OCNG 251-499 (p. 1020).
Marine Biology - BS, License Option

The Marine Biology License Option program allows the marine biology student to prepare for a career as an officer aboard a sea going vessel by participating in the Texas A&M Maritime Academy Corps of Midshipmen. The curriculum provides the basics of marine biology as well as courses leading toward licensing as a Third Mate of any gross tonnage upon oceans, steam, or motor vessels, in the U.S. Merchant Marine.

The Marine Biology License Option curriculum is an abbreviated version of the Marine Biology curriculum and is oriented toward field activities consistent with service aboard research vessels. Students who wish to attend a biologically-oriented graduate program, or are interested in the medical professions, are advised to take additional coursework in developmental biology, genetics, biochemistry, and physiology.

Midshipmen who enroll in and apply to graduate in this curriculum must pass the license examination for Third Mate in order to graduate from Texas A&M University. Certain USCG courses require a minimum grade of C (70%).

8 MARB 408, which is offered in the Spring semester, can be substituted for MARB 430. MARB 408 is also a writing intensive course.
**Program Requirements**

### Marine Fisheries - BS

This program provides educational opportunities in the biological sciences, with emphasis on marine management. Ecology, taxonomy, zoogeography, culture, and general biology of commercial species are emphasized. Course offerings are structured to provide not only a strong basis of formal academic instruction but also considerable hands-on field and collection experience by taking advantage of the coastal location of the University. A strong preparation in the sciences is recommended. Marine Fisheries graduates are prepared to work as fisheries managers or researchers for state and federal agencies, ecological consulting firms, and educational institutions. Qualified degree recipients may undertake postgraduate studies in resource management, mariculture, systematics, seafood technology, and fisheries economics.

Note: STCW competency certifications expire 5 years after completion. If the cadet does not complete the degree within that time period, the cadet will be required to revalidate the expired competency prior to graduation.

---

1 A grade of C or better is required before advancing to upper level courses.
2 Indicates required courses in Marine Biology License Option major. These courses will be used to compute the major GPA.
3 Indicates license courses leading to a USCG/STCW license endorsement or sea time credit accrual which require a minimum grade of C (70%) or better to earn the endorsement or accrual. Students will be required to repeat the course until they earn a grade of C (70%) or better. MART 307 requires a grade of 75% or better.
4 Other calculus or logic elective may be substituted with approval.
5 Designated writing intensive course.
6 MART 498 must be taken within one year of graduation to receive USCG approval.

All electives must be chosen in consultation with, and approved by, the student’s academic advisor. Unless courses are specifically listed, see University Core Curriculum at http://core.tamu.edu/ for a listing of course options for Communication, Mathematics; Life and Physical Sciences; Language, Philosophy and Culture; Creative Arts; American History, Government and Political Sciences; and Social and Behavioral Sciences. The 6-hour University Core Curriculum requirement for International and Cultural Diversity may be met with courses used to satisfy other degree requirements.

The total hours may be increased if the student is required to take remedial math, remedial English, foreign language or International and Cultural Diversity courses, or any of the six hour cruise options. The six hour cruise options (NAUT 200, NAUT 300 and NAUT 400 or MAR 200, MAR 300 and MAR 400) do not add any required hours to the degree plan.

This degree requires full participation in the Texas A&M University Maritime Academy Corps of Cadets as a qualified License Option cadet. Refer to the University catalog section on the Texas A&M Maritime Academy for additional information. In addition to the academic requirements outlined here, the cadet must also complete the following requirements to receive the degree:

- Successfully complete required sea service and minimum training cruise requirements
- Pass a comprehensive professional examination (either the Third Mate Unlimited-Oceans or Third Assistant Engineering Unlimited) administered by the U.S. Coast Guard (USCG).
- Successfully complete all competencies required by the International Convention on Standards for Training, Certification and Watchkeeping (STCW).

**Department of Marine Engineering Technology**

Texas A&M University at Galveston is a special purpose institution for teaching, research, and public service pertaining to marine and maritime studies in science, engineering, and business. The university is also the home of the Texas A&M Maritime Academy. Within this context, the Marine Engineering Technology (MARR) program produces graduates who are prepared to perform engineering work in the marine sector or marine-related shore-based industries involving the design, production, operation, maintenance, and management of engineering systems and projects. The program is available in a License Option version for students who want to serve as an engineering officer aboard seagoing
vessels and in a Non-License Option for students who want an education in maritime-related applied engineering but do not plan to serve at sea.

Opportunities for such work abound in the vicinity of the campus, which is located just south of the fourth largest metropolis in the United States. The Houston/Galveston area has extensive port facilities, considerable commercial, recreational, and military ship traffic, and offshore and onshore infrastructure associated with the oil industry. Career opportunities of various kinds are therefore available for these graduates who are ideally suited for working on ships, at port facilities, and at shore facilities, particularly in power generation, distribution, and concomitant auxiliary support systems.

Our goal is to produce graduates with a strong background in engineering fundamentals, mathematics, and analytical methods, which is reinforced by practical machine-shop, welding, and laboratory experiences (including several on the training ship). The curriculum builds on a foundation of basic engineering topics such as fluid mechanics, thermodynamics, electricity, drafting, and materials science to develop inter-disciplinary skills required for the practice of marine engineering. In particular, the program’s educational objectives are to produce graduates who can plan, design, construct, operate, and maintain systems used in marine and facilities power systems such as propulsion, electrical power generation and distribution, refrigeration, and air conditioning. Graduates also support the maritime sector (the Navy and Coast Guard), companies operating sea-going vessels, the offshore oil and gas industry; and, are well-prepared to engage in lifelong education, professional development, and continuous improvement.

• Bachelor of Science in Marine Engineering Technology, License Option (p. 741)
• Bachelor of Science in Marine Engineering Technology (p. 740), Non-License Option
• Bachelor of Science in Marine Engineering Technology and Master of Maritime Administration and Logistics, 5-Year Degree Program (p. 743)

Marine Engineering Technology - BS

The Marine Engineering Technology (MARR) non-license option program is designed to prepare the student for a career as an engineering technologist in the maritime profession. Students receive an education in applied engineering with a maritime focus, but do not plan to serve at sea. The MARR curriculum is a thermal power-oriented specialization of a classical Mechanical Engineering Technology program. A thorough preparation in mathematics, science, and basic engineering courses is the foundation for further study in ship propulsion plants and electrical power generation and distribution equipment. Marine Engineering Technology focuses on power cycles, principles, and methods used to convert the energy in fossil fuels into useful power, and the selection and operation of the major components and support systems in the power cycle. Courses in marine engineering are supplemented with studies in naval architecture and maritime application of electrical engineering fundamentals. The students’ education is enhanced through the use of computer simulation of propulsion plants and direct operation of marine machinery aboard the University’s training ship.

All electives must be chosen in consultation with, and approved by, the student's academic advisor. Unless courses are specifically listed, see University Core Curriculum at http://core.tamu.edu/ for a listing of course options for Communication; Mathematics; Life and Physical Sciences; Language, Philosophy and Culture; Creative Arts; American History; Government and Political Sciences; and Social and Behavioral Sciences. The 6-hour University Core Curriculum requirement for International and Cultural Diversity may be met with courses used to satisfy other degree requirements.

Although they may count for university credit, grades form another institution below a C in engineering, mathematics and physics will not be accepted by the TAMUG engineering technology program toward the degree.

1 Indicates required courses in Marine Engineering major. These courses will be used to compute the major GPR.
2 MARR students are required to earn a grade of C or better in MATH 151, PHYS 218, PHYS 208, MARE 202, MARE 205, MARE 206 and MARE 207. Failure to meet this requirement will prevent the student from continuing any sequence in which the course is a prerequisite. Although they may count for credit, grades from another institution below a C in engineering, mathematics and physics will not be accepted by the TAMUG engineering programs toward the degree.
3 Technical electives may be any course with the following prefixes: MARE (p. 971), MARR (p. 973), MARS (p. 974), MASE (p. 980), OCEN (p. 1017), CVEN (p. 869), MATH (p. 982), PHYS (p. 1031), or OCNG (p. 1020) in consultation with the student's advisor. At least one elective must be at the 300 or 400 level.
4 Designated Writing intensive course.
5 Students may take any of the 400 level courses (except MARE 405) offered by the Marine Engineering Department in their senior year including standard courses such as MARE 401 which are offered to license option students.

The total hours may be increased if the student is required to take remedial math, remedial English, computer science, foreign language or if the Creative Arts, Language, Philosophy and Culture or social science requirements do not fulfill the International and Cultural Diversity requirement.

## Marine Engineering Technology - BS, License Option

The purpose of the Marine Engineering Technology License Option (MARR-LIO) program is to train students to serve as engineering officers aboard sea-going vessels. The MARR curriculum is a thermal power-oriented specialization of a classical Mechanical Engineering Technology program. A thorough preparation in mathematics, science, and basic engineering courses is the foundation for further study in ship propulsion plants and electrical power generation and distribution equipment. Marine Engineering Technology focuses on power cycles, principles, and methods used to convert the energy in fossil fuels into useful power, and the selection and operation of the major components and support systems in the power cycle. Courses in marine engineering are supplemented with studies in naval architecture and maritime application of electrical engineering fundamentals. The students’ education is enhanced through the use of computer simulation of propulsion plants and direct operation of marine machinery aboard the University’s training ship.

In addition to the degree requirements for the Marine Engineering Technology Degree, MARR-LIO Cadets must complete the requirements...
to achieve a Merchant Mariner Credential (MMC) issued by the USCG. The requirements for the MMC are determined by International conventions, Federal law and regulations, and policies established by the USCG and the Maritime Administration (MARAD). The requirements for an MMC are subject to change according to developments at the International Maritime Organization, Congressional action, the Federal rulemaking process, and consultations between the USCG, MARAD, and the Maritime Academies. The student who successfully completes the program will be qualified to sit for the U. S. Coast Guard license examination as a Third Assistant Engineer of any gross tonnage upon oceans, steam, or motor vessels and issuance of Standards of Training, Certification and Watchkeeping (STCW) international endorsement as Officer In Charge of an Engineering Watch (OICEW).

MARR-LIO students must also complete all the requirements as a cadet in the Texas A&M Maritime Academy, described previously in this catalog, in order to receive the degree. Cadets who enroll in and apply to graduate in Marine Engineering Technology must successfully complete the license examination for Third Assistant Engineer in order to graduate from Texas A&M University. Courses earning USCG or STCW qualifications, sea-time remission or STCW competency certification require a minimum grade of C (70%). In addition, all STCW proficiencies must be satisfactorily completed with a grade of 70% or better (See applicable course outlines available through the department).

POLS 207  State and Local Government  3
Technical elective 1,5  3

| Semester Credit Hours | 16 |

| Total Semester Credit Hours | 137 |

1. Indicates required courses in the Marine Engineering Technology License Option major. These courses will be used to compute the major GPR.

2. Indicates license courses leading to a USCG/STCW license endorsement or sea time credit accrual which require a minimum grade of C (70%) or better to earn the endorsement or accrual. Cadets will be required to repeat the course until they earn a grade of C (70%) or better. Failure to meet this requirement will prevent the student from continuing any sequence in which the course is a prerequisite.

3. MARR students are required to earn a grade of C or better in MATH 151, PHYS 218, PHYS 208, MARE 202, MARE 205, MARE 206, and MARE 207. Failure to meet this requirement will prevent the student from continuing any sequence in which the course is a prerequisite.

4. Designated writing intensive course.

5. Technical electives may be any course with the following prefixes: MARE (p. 971), MARR (p. 973), MASE (p. 980), OCEN (p. 1017), CVEN (p. 869), MATH (p. 982), PHYS (p. 1031), MARS (p. 974), or OCNG (p. 1020) at the 300 or 400 level in consultation with the student's advisor.

All electives must be chosen in consultation with, and approved by, the student’s academic advisor. Unless courses are specifically listed, see University Core Curriculum at http://core.tamu.edu/ for a listing of course options for Communication; Mathematics; Life and Physical Sciences; Language, Philosophy and Culture; Creative Arts; American History; Government and Political Sciences; and Social and Behavioral Sciences. The 6-hour University Core Curriculum requirement for International and Cultural Diversity may be met with courses used to satisfy other degree requirements. Although they may count for university credit, grades from an other institution be low a C in engineering, mathematics and physics will not be accepted by the TAMUG engineering programs toward the degree.

The total hours may be increased if the student is required to take remedial math, remedial English, foreign language or International and Cultural Diversity courses, or any of the six hour cruise options. The six-hour cruise options (NAUT 200, NAUT 300, and NAUT 400 or MARR 200, MARR 300 and MARR 400) do not add any required hours to the degree plan.

This degree requires full participation in the Texas A&M University Maritime Academy Corps of Cadets as a qualified License Option cadet. Refer to the University catalog section for the Texas A&M Maritime Academy for additional information. In addition to the academic requirements outlined here, the cadet must also complete the following requirements to receive the degree:

- Successfully complete required sea service and minimum training cruise requirements
- Pass a comprehensive professional examination (either the Third Mate Unlimited- Oceans or Third Assistant Engineering Unlimited) administered by the U.S. Coast Guard (USCG).

- Successfully complete all competencies required by the International Convention on Standards for Training, Certification and Watchkeeping (STCW).

Note: STCW competency certifications expire 5 years after completion. If the cadet does not complete the degree within that time period, the cadet will be required to revalidate the expired competency prior to graduation.

Marine Engineering Technology - 5-year Bachelor of Science/Master of Maritime Administration and Logistics

The Department of Marine Engineering Technology in collaboration with the Department of Maritime Administration offers a five-year program that consists of a Bachelor of Science in Marine Engineering Technology with a Master of Maritime Administration and Logistics. This program allows Marine Engineering Technology (MARR) majors to enter the graduate program for a Master of Maritime Administration and Logistics at the beginning of their senior year, enabling students to receive their MARR undergraduate degree (B.S.) and a Master of Maritime Administration and Logistics (MMAL) graduate degree in five years.

Students admitted to the 5-year degree program will have completed 92 of the 123 hours of course work required to receive a bachelor's degree. These courses must include the specific prerequisites for a Bachelor of Science degree in Marine Engineering Technology, as well as the required Texas A&M University core curriculum courses. Marine Engineering Technology majors who are expected to complete all of their prerequisite courses and 92 hours by the fall of their fourth year will be eligible to apply for the 5-year program during their junior year. Applicants to the 5-year program will submit the same materials (including GMAT scores) as other MMAL applicants, and those whose records are judged to be competitive by the mid-January deadline will be admitted. Admission criteria will be the same as for other MMAL students.

Students who choose not to finish the MMAL degree after being admitted to the 5-year program may exit the program at any time. Completed MMAL courses will be applied to their bachelor’s degree as appropriate. Failure to complete the MMAL program will in no way impede their ability to attain a bachelor’s degree in Marine Engineering Technology when the requirements for that degree are completed. Those who pursue the joint program will receive both degrees upon completion of the entire 5-year program. Students will not graduate with a bachelor’s degree in year four, but rather will earn both their Bachelor of Science and Master of Maritime Administration and Logistics at the end of year five.

Admitted students will be enrolled in Maritime Administration and Logistics graduate courses with an undergraduate classification (U4) during their fourth year and will be re-classified as degree seeking master’s students (G7) upon completing 107 credit hours. This will normally occur at the beginning of the spring semester of year four. Students will take 6 fewer undergraduate credit hours. Graduate courses taken in the fifth year program will be counted double, as credit towards their MMAL degree and as substitutes for MARR and free electives required for the bachelor’s degree. Students will be required to complete 36 graduate hours. The graduate hours will include 7 core courses (21

1 Required courses in the Marine Engineering Technology major. Courses will be used to compute the major GPR.
2 MARR students are required to earn a grade of C or better in MATH 151, PHYS 218 and PHYS 208, MARE 202, MARE 205, MARE 206 and MARE 207. Failure to meet this requirement will prevent the student from continuing any sequence in which the course is a prerequisite.
3 The total hours may be increased if the student is required to take remedial math, remedial English, foreign language, or International and Cultural Diversity courses.
4 Designated writing intensive course.
Department of Marine Sciences

The mission of the Department of Marine Sciences is to provide high quality undergraduate and graduate education and research in the physical sciences related to the coastal and marine environment as well as in management and policy decision-making for the utilization and preservation of marine resources. We recognize that today's professional careers demand strong interdisciplinary as well as interpersonal skills and have designed our educational programs to provide a core education in the physical sciences and the necessary training for applying this knowledge to the maintenance and improvement of our marine resources. Our faculty are actively involved in research areas involving coastal marine geology, physical oceanography, marine geochemistry, and coastal resources management that emphasize and support our degrees and course curricula. Our strength is the diversity of our faculty who utilize their experience from private, governmental, and academic careers to create extraordinary learning opportunities for students through "hands on" and "on the water" field and laboratory research as well as internships that give our students a competitive advantage for employment after graduation.

TAMU’s departments such as Oceanography (OCNG) and Landscape Architecture and Urban Planning (LAUP).

Minors
- Clinical Laboratory Sciences Minor (p. 754)
- Ocean and Coastal Resources Minor (p. 754)

Marine Sciences - BS
Overview
The Marine Sciences curriculum concentrates on the physical and chemical science aspects of the estuarine, coastal, and marine environment. The coastal location of the campus enables students to acquire extensive hands-on field experience in addition to a solid base of academic instruction in chemistry, geology, physics, biology, oceanography and mathematics. All marine science majors take five semesters of oceanography, a course in geographic information systems (GIS) and an integrated, field-oriented laboratory class. In the senior year students will participate in 2 semesters of research with the faculty culminating in a poster presentation of their research. The tracks allow the student to select a discipline for focusing their coursework and preparing them to enter graduate programs in Oceanography, related disciplines or to work in companies that need expertise in this area. For example, choosing the chemistry track allows the student to focus on chemical aspects of marine sciences, and it will also enable students to obtain a chemistry minor through the chemistry department at Texas A&M University in College Station with coursework completed in Galveston. Similarly, the geology track can lead to a minor in geology. An advisor in MARS can help you select courses and facilitate the minor approval process.

Semester Credit Hours 13

Total Semester Credit Hours 120

1 Course counts towards major GPR.
2 Hours vary depending on track focus electives chosen.
3 If a student is following the geology track, GEOL 106 is their focus elective and they will need to choose any additional 4 credit class for the spring semester to satisfy the curriculum 120 credit hours.
4 Writing intensive course.
5 3 hours must be International and Cultural Diversity (p. 42). This requirement can be met with courses used to satisfy other degree requirements.

Track Options

Chemical Marine Science
Focus electives
CHEM 227 Organic Chemistry I 4
& CHEM 237 and Organic Chemistry Laboratory
CHEM 228 Organic Chemistry II 4
& CHEM 238 and Organic Chemistry Laboratory

Breadth electives 12
Select four of the following:
ATMO 363 Introduction to Atmospheric Chemistry and Air Pollution
MARS 340 Geochemistry
MARS 360 Biochemistry
MARS 470 Eco-Environmental Modeling
STAT 303 Statistical Methods
CHEM 300 to 499 (p. 849)

Total Semester Credit Hours 20

Geological Marine Science
Focus electives
GEOL 106 Historical Geology 4
MARS 306 Coastal Sedimentary Geology 4

Breadth electives 12
Select four of the following:
GEOL 300 to 499 (p. 922)
GEOG 331 Geomorphology
MARS 305 Environmental Micropaleontology
MARS 340 Geochemistry
MARS 370 Coastal Processes
GEOG 370
MARS 415 Remote Sensing Technology
MARS 430 Geological Oceanography-Plate Tectonics
MARS 431 Geological Oceanography-Earth’s Climate
MARS 432 Peak Oil, Global Warming and Resource Scarcity
### Marine Sciences - BS, License Option

The license option (LO) in this curriculum leads toward a license as a deck officer in the United States Merchant Marine. This program retains the basic physical science core of the Marine Sciences curriculum, and adds coursework which prepares the student to sit for the U.S. Coast Guard examination as a Third Mate of any gross tonnage upon oceans, steam, or motor vessels. Students combine a broad base of courses in physical science and mathematics and practical instruction in seamanship and navigation with four oceanography courses.

**Semester Credit Hours**

16

---

**Physical Marine Science**

Focus electives

- MATH 251 Engineering Mathematics III
- MATH 308 Differential Equations

Breadth electives

- ATMO 363 Introduction to Atmospheric Chemistry and Air Pollution
- MARS 408 Estuarine and Coastal Hydrodynamics
- MARS 415 Remote Sensing Technology
- MARS 470 Eco-Environmental Modeling
- MARS 489 Special Topics in Marine Sciences
- STAT 303 Statistical Methods
- PHYS 300 to 499 (p. 1031)

**Total Semester Credit Hours**

20

---

**Integrated Track**

Focus electives

1. Select one of the following: 3-4
   - CHEM 227 Organic Chemistry I & CHEM 23 and Organic Chemistry Laboratory
   - MARS 306 Coastal Sedimentary Geology
   - MATH 251 Engineering Mathematics III

2. Select one of the following: 3-4
   - CHEM 228 Organic Chemistry II & CHEM 231 and Organic Chemistry Laboratory
   - GEOL 106 Historical Geology
   - MATH 308 Differential Equations

Breadth elective

- Select four of the following:
  - GEOG 331 Geomorphology
  - CHEM 300 to 499 (p. 849)
  - GEOL 300 to 499 (p. 922)
  - MARS 300 to 499 (p. 974)

**Total Semester Credit Hours**

18-20
Spring

CHEM 102 & CHEM 112 Fundamentals of Chemistry II and Fundamentals of Chemistry Laboratory II 4
MARS 281 Sophomore Seminar in Marine Sciences 2 1
MART 210 Integrated Navigation I: RADAR/ARPA/ ECDIS 2 4
MART 215 Seamanship II 1,3 3
MART 303 Celestial Navigation 1 3
MART 321 Navigation Rules, International and Inland 2

Semester Credit Hours 17

MART 498 Maritime Medical Care 1 2
POLS 206 American National Government 3
American history (p. 26) 3

Geological Oceanography Requirement: choose from

MARS 430 or MARS 431 Geological Oceanography-Plate Tectonics or Geological Oceanography-Earth’s Climate

Semester Credit Hours 14

Total Semester Credit Hours 140

1 Indicates license courses leading to a USCG license endorsement or sea time credit accrual which require a minimum grade of C (70%) or better to earn the endorsement or accrual. Midshipmen will be required to repeat the course until they earn a grade of C (70%) or better. MART 307 GMDSS requires a score of 75% or better.

2 Indicates required courses in the Marine Sciences License Option major. These courses will be used to compute the major GPR. Also, if any upper level MARS or OCNG elective courses are taken, they will be used in the major GPR.

3 Designated writing intensive course. MARS-LO majors must take two writing intensive courses. One of them is required MART 215. The other course may be chosen from MARS 280, MARS 430 or MARS 431.

All electives must be chosen in consultation with, and approved by, the student’s academic advisor. Unless courses are specifically listed, see University Core Curriculum at http://core.tamu.edu/ for a listing of course options for Communication; Mathematics; Life and Physical Sciences; Language, Philosophy and Culture; Creative Arts; American History; Government and Political Sciences; and Social and Behavioral Sciences. The 6-hour University Core Curriculum requirement for International and Cultural Diversity may be met with courses used to satisfy other degree requirements.

The total hours may be increased if the student is required to take remedial math, remedial English, foreign language or International and Cultural Diversity courses, or any of the six hour cruise options. The six hour cruise options (NAUT 200, NAUT 300 and NAUT 400 or MARR 200, MARR 300 and MARR 400) do not add any required hours to the degree plan.

This degree requires full participation in the Texas A&M University Maritime Academy Corps of Cadets as a qualified License Option cadet. Refer to the University catalog section for the Texas A&M Maritime Academy for additional information. In addition to the academic requirements outlined here, the cadet must also complete the following requirements to receive the degree:

• Successfully complete required sea service and minimum training cruise requirements

• Pass a comprehensive professional examination (either the Third Mate Unlimited- Oceans or Third Assistant Engineering Unlimited) administered by the U.S. Coast Guard (USCG).

• Successfully complete all competencies required by the International Convention on Standards for Training, Certification and Watchkeeping (STCW).
Note: STCW competency certifications expire 5 years after completion. If the cadet does not complete the degree within that time period, the cadet will be required to revalidate the expired competency prior to graduation.

Ocean and Coastal Resources - BS

Ocean and Coastal Resources (OCRE) graduates often operate at the interface between government and businesses with scientific operations. They can navigate the regulatory path from either the side of the developer or the permitting agency. This degree program prepares students with regard to the economic, environmental and social issues related to the development of marine and coastal resources, while providing them with the scientific background needed to understand these issues. These resources include fisheries, oil and gas, ocean mining, beach sand, wetlands and others. The OCRE degree provides a foundation in oceanography, geology, chemistry, biology and physics with additional coursework in geological and biological sciences, along with economics, policy and management. The OCRE curriculum is oriented toward the societal and environmental impacts of ocean science. Many of the resource development issues in today’s world center around environmental pollution, sustainable development, biological diversity, fisheries and mariculture or oil and gas development. There is good demand for trained entry-level personnel from both government and industry for individuals who understand and can use scientific information in the planning and management process, but who are not themselves bench or field scientists. A significant number of our graduates chooses to enter graduate programs in resource management or policy.

Students in OCRE may choose to establish a minor field of study, for example in Economics (TAMU) or in Maritime Administration (TAMUG) through completion of credits as outlined in the available minors curriculum pages. A minor in Ocean and Coastal Resources is available for students of other majors. Obtaining a minor from a department located at TAMU in College Station with coursework completed in Galveston is possible. An advisor in MARS can help you select courses and facilitate the minor approval process through another department.

**Semester Credit Hours**

| Total Semester Credit Hours | 120                   |

All electives must be chosen in consultation with, and approved by, the student's academic advisor. Unless courses are specifically listed, see University Core Curriculum at http://core.tamu.edu/ for a listing of course options for Communication, Mathematics, Life and Physical Sciences, Language Philosophy and Culture, Creative Arts, American History, Government and Political Sciences and Social and Behavioral Sciences. The 6-hour University Core Curriculum requirement for International and Cultural Diversity may be met with courses used to satisfy other degree requirements.

1. Either MATH 151, which is preferred for a science-oriented career path, or MATH 140 may be taken. For the second math course, either MATH 152 or MATH 142 may be selected. Only one of the following can be applied to the requirements for a degree: MATH 151 and MATH 142. Depending upon the math sequence selected, the number of credit hours will vary by 1 or 2 credits. The total number of hours for the degree must still be at least 120, so the difference can be made up with professional electives, MARS 484, MARS 491 or MARS 485.

2. Indicates required courses in the Ocean and Coastal Resources major. These courses will be used to compute the major GPR. Also, if any upper level MARS or OCNG elective courses are taken, they will be used in the major GPR.

3. The total hours may be increased if the student is required to take remedial math, remedial English, foreign language or International and Cultural Diversity courses.

4. Recommended professional electives include, but are not limited to: CHEM 316, CHEM 318, COMM 449, MATH 470, MABR 320, MARB 340, MARB 345, MARB 350, MARB 423, MARB 438, MARB 445, MARB 305, MARB 306, MARS 330, MARS 370/GEOG 370, MARS 410, MARS 412, MARS 415, MARS 423, MARS 435, MARS 440, MARS 484, MARS 491 or MARS 489.

5. Field Experience may also be met with MARB 300 plus one credit hour of a field oriented lab course.

6. Designated writing intensive course. If both MARS 430 and MARS 431 are taken, one can be used as a professional elective.

Ocean and Coastal Resources - 5-Year Bachelor of Science/Master of Marine Resources Management

5-Year Curriculum: B.S. in Ocean and Coastal Resources (OCRE) and Master of Marine Resources Management (MARM)

The OCRE + MARM Program allows Ocean and Coastal Resources majors to enter the graduate program for a Master of Marine Resources Management at the beginning of their senior year, enabling students to receive their OCRE undergraduate degree (B.S.) and a Master of Marine Resources Management (MARM) graduate degree in five years. Ocean and Coastal Resources majors who have at least a 3.25 GPA and who will have taken all of their prerequisite courses and otherwise completed 101 or 102 hours by the fall of their fourth year will be eligible to apply for the 5-year program during their junior year. Applicants to the 5-year program will submit the same materials (including GRE scores) and be subject to the same admission criteria as other MARM program applicants. Those students whose records are judged to be competitive by the mid-January dead line will be admitted.

Admitted students will be enrolled in Marine Resources Management graduate courses with an undergraduate classification (U4) during the fall of their fourth year. They will then be reclassified as degree-seeking master's students (G7) upon completing 120 credit hours, which will typically occur at the beginning of the fall semester of the fifth year. Students will be required to complete the same 2-year, 36-hour curriculum as other graduate students admitted to the MARM Professional Track (see MARM curriculum). Students who are interested in the MARM Research (Thesis) Track are afforded additional flexibility to replace required courses with up to nine hours of 691 (research) courses and electives chosen with the approval of their advisory committee. To comply with the course and work requirements of the research track, this program may extend beyond the 5 year window. For specific requirements to comply with the Research Track curriculum, students are asked to consult the MARM section of the catalog.

Students who choose not to finish the MARM degree after being admitted to the 5-year program may exit the program at any time. Completed MARM courses will be applied to their bachelor's degree in Ocean and Coastal Resources, as appropriate. Failure to complete the MARM program will in no way impede their ability to attain a bachelor's degree in Ocean and Coastal Resources when the requirements for that degree are completed. Those who pursue the 5-year program will obtain both degrees upon the completion of the 5-year program, receiving both their Bachelor of Science and the Master of Marine Resources Management degrees at the end of year five. Advising for the 5-year program is a coordinated effort by the Department of Marine Sciences undergraduate and graduate advisors and by the Office of Graduate Studies. Advising will help ensure that interested students have satisfied the prerequisite course requirements for the bachelor's degree so that they may enter the 5-year program. OCRE students should consult an undergraduate advisor and a graduate advisor for more information.

| Semester Credit Hours | 11 |

| Total Semester Credit Hours | 150 |

All electives must be chosen in consultation with, and approved by, the student's academic advisor. Unless courses are specifically listed, see University Core Curriculum at http://core.tamu.edu/ for a listing of course options for Communication; Mathematics; Life and Physical Sciences; Language, Philosophy and Culture; Creative Arts; American History, Government and Political Sciences; and Social and Behavioral Sciences. The 6-hour University Core Curriculum requirement for International and Cultural Diversity may be met with courses used to satisfy other degree requirements.

Students in the 5-year program will take 12 fewer undergraduate credit hours than the other OCRE students. Graduate courses taken in the fourth and fifth year will be counted as credit towards the OCRE degree.

The total undergraduate hours prior to entering the 5-year program is 101. After starting the 5-year program, 6 additional undergraduate hours will be taken for a total of 108 undergraduate hours. The total graduate credit hours is 36. Substituting 6 hours of MARM electives for one free and one professional elective and applying 6 hours of credit by exam results in a total of 150 hours. The total hours may be increased if the student is
required to take remedial math, remedial English, foreign language or International and Cultural Diversity courses.

Course adjustments will be allowed for 6 hours of undergraduate elective credit to use 6 hours of MARM elective credits.

1 Indicates required courses in the Ocean and Coastal Resources major. These courses will be used to compute the major GPR. Also, if any upper level MARS or OCNG elective courses are taken, they will be used in the major GPR.

2 Either MATH 140 or MATH 151, which is preferred for a science-oriented path, may be selected. For the second math either MATH 142 or MATH 152 may be selected. Only one of the following can be applied to the requirements for a degree: MATH 142 and MATH 151.

3 Designated writing intensive course.

4 Field Experience may also be met with MARB 300 plus one credit hour of a field oriented lab course.

5 Recommended professional electives include but are not limited to: CHEM 316, CHEM 318, MARA 470, MARB 320, MARB 340, MARB 345, MARB 423, MARB 438, MARB 445, MARS 305, MARS 330, MARS 370/GEOS 370, MARS 410, MARS 415, MARS 432, MARS 435, MARS 440, MARS 484, MARS 485, MARS 491 or MARS 489.

6 Credit by exam for MARS 325 and ECON 203 will be awarded after successful completion of MARS 625 and MARA 604, respectively.

7 The 36-hour professional track curriculum is structured with 24 hours of required courses and 12 hours of optional elective courses. The required courses include a 1 hour seminar to be taken in the student's first year, 8 hours of management, 3 hours of Geographic Information Systems (GIS), 6 hours of resource economics and statistical methods, and 6 hours of law/policy courses. The student in the professional track will choose electives for the remaining 12 credit hours. See MARM curriculum pages of the graduate catalog for additional requirements for the research track (thesis option) curriculum.

**University Studies - BS, Oceans and One Health Concentration**

Oceans and One Health is an interdisciplinary concentration that allows the student to explore human, animal or environmental health issues associated with the marine and coastal communities. Students may pursue this degree program as a pathway to Medical, Dental or Veterinary School or as a stand-alone degree to address any of a number of health-related issues that result from urbanization of coastal areas or increased development of marine environments. The curriculum is designed to be flexible so that students can choose their focus from the diverse list of concentration electives. It also is rigorous enough to provide students headed for professional or graduate school with a solid background in health-related disciplines and environmental sciences. As a part of the University Studies major the Oceans and One Health concentration can be a starting point for several health related graduate programs.

Through a partnership with the University of Texas Medical Branch (UTMB) in Galveston our Oceans and One Health students who apply and are admitted to UTMB during their junior year at TAMU-C have the option to obtain a minor in Clinical Laboratory Sciences, which includes the first semester of coursework for a masters of Clinical Laboratory Sciences from UTMB.

This concentration is housed in the Marine Sciences Department (p. 746).

All University Studies degree plans require at least 120 hours for completion. A University Studies Degree consists of a concentration of 21-24 hours and two minors of 15-18 hours each. Specific courses may be required for the completion of the hours in the concentrations and minors. Some concentrations and minors contain required courses that have additional prerequisites. One of the two minors must be completed.
in a college outside of the college that provides the concentration for the student's degree.

Clinical Laboratory Sciences - Minor

Overview

The Department of Marine Sciences offers a minor in Clinical Laboratory Sciences (CLBS) through a partnership with the University of Texas Medical Branch (UTMB) in Galveston. Students who wish to obtain this minor must be University Studies, Oceans and One Health majors who have been admitted to the Clinical Laboratory Sciences program at UTMB. Seven hours of coursework taken during the first semester in that program will be applied towards the CLBS minor at TAMUG. More information is available from the Oceans and One Health advisor.

This minor will be completed in 15 credit hours, 8 of which are taught at TAMUG and 7 are taught at UTMB.

Ocean and Coastal Resources - Minor

Students in other majors may establish a minor field of study in Ocean and Coastal Resources (OCRE) through the completion of at least 16 hours of coursework. The OCRE minor pairs well with majors in Marine Biology (http://catalog.tamu.edu/undergraduate/galveston/marine-biology/bs), Marine Fisheries (http://catalog.tamu.edu/undergraduate/galveston/marine-biology/marine-fisheries-bs), Maritime Studies (http://catalog.tamu.edu/undergraduate/galveston/liberal-studies/maritime-studies-bs), Maritime Administration (http://catalog.tamu.edu/undergraduate/galveston/maritime-administration/bs) or Ocean Engineering (http://catalog.tamu.edu/undergraduate/engineering/ocean/ocean-engineering-bs). It can also be completed as one of the minors for a University Studies degree with concentrations in Marine Environmental Law and Policy (http://catalog.tamu.edu/undergraduate/galveston/liberal-studies/marine-environmental-law-policy-university-studies-bs) or Maritime Public Policy and Communication (http://catalog.tamu.edu/undergraduate/galveston/liberal-studies/maritime-public-policy-communication-university-studies-bs).

Department of Maritime Administration

Our Mission

The mission of the Maritime Administration Department is to prepare graduates for positions in maritime business and related fields for progression into management and leadership roles; enhanced by top-tiered applied research and service to the maritime industry.

Majors

- Bachelor of Science in Maritime Administration (p. 755)
- Bachelor of Science in Maritime Administration and Master of Maritime Administration and Logistics, 5-Year Degree Program (p. 756)

Minors

- Maritime Administration Minor (p. 757)

Maritime Administration - BS

The Maritime Administration undergraduate curriculum provides a solid background in the key areas of accounting, finance, marketing, law, economics and mathematics that are critical for today's business professional. These courses lay the foundation for more advanced courses in international trade, inland waterways management, brokerage and charting, organizational behavior, transportation economics, port and terminal management and other areas related to the maritime industry.

International trade is expanding as a result of the general increase in world-wide economic and political stability and this trend is expected to increase, as major economies such as China and Russia participate more fully in world-wide economic growth. The great majority of this expanded trade will be carried by ship. As a result, activity in American ports is expected to more than double in the next 20 years, and some ports in the Gulf of Mexico are expected to see a tripling of port activity. Additionally, the next 40 years will see greatly expanded oil and gas production in the deep waters of the western Gulf of Mexico. Taken together, these forces are now and will continue to positively affect demand for trained maritime professionals ashore. Maritime Administration graduates are ideally poised to meet the increasing demand for well educated maritime professionals.

Additionally, qualified undergraduate students have the opportunity to earn a Bachelor of Science and a Master of Maritime Administration and Logistics (http://www.tamug.edu/mara/mmal) in five years time through the Department of Maritime Administration’s 3+2 program.

Maritime Administration - 5-Year Bachelor of Science/Master of Maritime Administration and Logistics

This program allows Maritime Administration (MARA) majors to enter the graduate program for a Master of Maritime Administration and Logistics at the beginning of their senior year, enabling students to receive their MARA undergraduate degree (B.S.) and a Master of Maritime Administration and Logistics (MMAL) graduate degree in five years.

¹ Indicates required courses in the Maritime Administration major. These courses will be used to compute the major GPR. At the time of graduation, a MARA major must have a GPR of at least 2.25 in their major. A MARA major must achieve a grade of 'C' or better in ACCT 229, ACCT 230, ECON 202, ECON 203 and SCMT 303 as a graduation requirement. These courses may be repeated as necessary to meet this requirement, and the requirement applies to courses taken at TAMUG or offered for transfer from other institutions.

² Students must register for MARA 205 their first semester at Texas A&M University Galveston Campus.

³ Designed writing intensive course.

⁴ Students should select 18 hours from the following courses: ACCT 315, ACCT 316, ECON 311, ECON 323, ECON 452, MARA 342, MARA 401, MARA 402, MARA 416, MARA 424, MARA 435, MARA 450, MARA 460, MARA 470, MARA 475, MARA 484, MARA 485, MARA 489, MARA 491, MARA 493 and SCMT 336.

⁵ Students may satisfy the 9-credit hours of Life and Physical Science requirement through any combination of one, three or four credit hour courses.

All electives must be chosen in consultation with, and approved by, the student’s academic advisor. Unless courses are specifically listed, see University Core Curriculum at http://core.tamu.edu/ for a listing of course options for Communication; Mathematics; Life and Physical Sciences; Language, Philosophy and Culture; Creative Arts; American History; Government and Political Sciences; and Social and Behavioral Sciences. The 6-hour University Core Curriculum requirement for International and Cultural Diversity may be met with courses used to satisfy other degree requirements.

The total hours may be increased if the student is required to take remedial math, remedial English, foreign language or International and Cultural Diversity courses.

To earn the economics minor, the student’s elective hours must include ECON 311, ECON 323 and ECON 452. For additional requirements of the economics minor, please see the website: http://www.tamug.edu/academics/Minors.html.

Students admitted to the 5-year degree program will have completed 92 of the 120 hours of course work required to receive a bachelor’s degree. These courses must include the specific prerequisites for a Bachelor of Science degree in Maritime Administration, as well as the required Texas A&M University core curriculum courses.

Maritime Administration majors who have at least a 3.00 GPA and who have taken all of their prerequisite courses and otherwise completed 92 hours by the fall of their fourth year will be eligible to apply for the 5-year program during their junior year. Applicants to the 5-year program will submit the same materials (including GMAT scores) as other MMAL applicants, and those whose records are judged to be competitive by the mid-January deadline will be admitted. Admission criteria will be the same as for other MMAL students.

Students who choose not to finish the MMAL degree after being admitted to the 5-year program may exit the program at any time. Completed MMAL courses will be applied to their bachelor’s degree in Maritime Administration, as appropriate. Failure to complete the MMAL program will in no way impede their ability to attain a bachelor’s degree in Maritime Administration when the requirements for that degree are completed. Those who pursue the joint program will receive both degrees upon completion of the entire 5-year program. Students will not graduate with a bachelor’s degree in year four, but rather will earn both their Bachelor of Science and Master of Maritime Administration and Logistics at the end of year five.

Admitted students will be enrolled in Maritime Administration and Logistics graduate courses with an undergraduate classification (U4) during the fall of their fourth year and will be re-classified as degree seeking master’s students (G7) upon completing 107 credit hours. This will normally occur at the beginning of the spring semester of year four. Students will take 9 fewer undergraduate credit hours. Graduate courses taken in the fifth year program will be counted double, as credit towards their MMAL degree and as substitutes for MARA and free electives required for the bachelor’s degree.

Students will be required to complete 36 graduate hours. The graduate hours will include 7 core courses (21 credits) in economics, management, operations and logistics with 15 credit hours of electives. The electives will be chosen according to the interest of the student in either the Maritime Policy and Law track or the Shipping and Port Management track. Students will also take 21 hours of undergraduate level MARA electives that must include MARA 416 in order to satisfy the TAMU intensive writing requirement.
Marine Administration - Minor

The Minor in Maritime Administration is designed to provide the student with fundamental knowledge in the business of water transportation. Students are required to complete 18 credit hours consisting of 12 hours of required coursework in general business and the maritime industry, and six credit hours from an approved list of maritime course electives.

Department of Maritime Transportation

This program combines studies in the humanities and sciences with instruction and training in maritime disciplines to provide the U.S. Maritime Service Cadet with a broad-based education. The student who successfully completes the license program will be qualified to sit for the U.S. Coast Guard license examination as a Third Mate of any gross tonnage upon oceans, steam, or motor vessels and issuance of Standards of Training, Certification and Watchkeeping (STCW) credentials. Cadets are also provided with solid fundamentals in business topics related to the maritime industry, ashore and afloat. Cadets who enroll in and apply to graduate in Marine Transportation must successfully complete the license examination for Third Mate in order to graduate from Texas A&M University.

Courses earning USCG or STCW qualifications, sea-time remission or STCW competency certification require a minimum grade of C (70%). In addition, all STCW proficiencies must be satisfactorily completed with a grade of 70% or better (See applicable course outlines available through the department).

1. Indicates required courses in the Marine Transportation major. These courses will be used to compute the major GPR, which must be at least 2.25.
2. Indicates license courses leading to a USCG/STCW license endorsement or sea time credit accrual which require a minimum grade of C (70%) or better to earn the endorsement or accrual. Students will be required to repeat the course until they earn a grade of C (70%) or better. MART 307 GMDSS requires a score of 75% or better.
3. Indicates a course that satisfies the writing intensive course requirements of the university.
4. Approved Electives in Field include but are not limited to ACCT 229; MART 205, MART 213, MART 308, MART 311, MART 485, MART 489, MARA 304, MARA 342, MARA 363, MARA 401, MARA 402, MARA 424, MARA 440, MARA 450, MARA 460.
5. MART 498 must be taken within one year of graduation to receive USCG approval.

All electives must be chosen in consultation with, and approved by, the student's academic advisor. Unless courses are specifically listed, see University Core Curriculum at http://core.tamu.edu/ for a listing of course options for Communication; Mathematics; Life and Physical Sciences; Language, Philosophy and Culture; Creative Arts; American History, Government and Political Sciences; and Social and Behavioral Sciences. The 6-hour University Core Curriculum requirement for International and Cultural Diversity may be met with courses used to satisfy other degree requirements.

MART students are required to earn a grade of C or better in all MART courses, including electives in field.

The total hours may be increased if the student is required to take remedial math, remedial English, foreign language or International and Cultural Diversity courses, or any of the six hour cruise options. The six hour cruise options (NAUT 200, NAUT 300 and NAUT 400 or MARR 200, MARR 300 and MARR 400) do not add any required hours to the degree plan.

This degree requires full participation in the Texas A&M University Maritime Academy Corps of Cadets as a qualified License Option cadet. Refer to the University catalog section for the Texas A&M Maritime Academy for additional information. In addition to the academic requirements outlined here, the cadet must also complete the following requirements to receive the degree:

- Successfully complete required sea service and minimum training cruise requirements
- Pass a comprehensive professional examination (either the Third Mate Unlimited-Oceans or Third Assistant Engineering Unlimited) administered by the U.S. Coast Guard (USCG).
• Successfully complete all competencies required by the International Convention on Standards for Training, Certification and Watchkeeping (STCW).

Note: STCW competency certifications expire 5 years after completion. If the cadet does not complete the degree within that time period, the cadet will be required to revalidate the expired competency prior to graduation.
Texas A&M University at Qatar

Texas A&M University at Qatar Joint Advisory Board

The Joint Advisory Board (JAB) of Texas A&M University at Qatar was established May 25, 2003, between Texas A&M University and Qatar Foundation for Education, Science and Community Development to provide advice regarding the management and operation of Texas A&M at Qatar to the Dean and CEO and to Qatar Foundation. The JAB is primarily responsible for ongoing review and evaluation of the success of Texas A&M at Qatar.

Joint Advisory Board Members

His Excellency, Mohammed bin Saleh Al-Sada, Ph.D. — Chairman
Minister of Energy and Industry, State of Qatar

Carol A. Fierke, Ph.D. — Vice Chair
Provost and Executive Vice President, Texas A&M University

Meigan Aronson, Ph.D.
Dean of the College of Science, Texas A&M University

M. Katherine Banks, Ph.D.
Vice Chancellor for Engineering, The Texas A&M University System
Dean, College of Engineering at Texas A&M University
Director, Texas Engineering Experiment Station

Olivier Dubrule, Ph.D.
Professor, Department of Earth Sciences and Engineering, Imperial College London

Ahmad Hasnah, Ph.D.
President, Hamad bin Khalifa University

Marc Vermeersch, Ph.D.
Executive Director, Qatar Environment and Energy Research Institute (QEERI)

Robert Gordon Moore, Ph.D.
Professor, Chemical and Petroleum Engineering Department, University of Calgary, Canada

G.P. Peterson, Ph.D.
President, Georgia Institute of Technology

Ex-officio Members

César O. Malavé, Ph.D., P.E.
Dean, Texas A&M University at Qatar

Khaled Ben Letaief, Ph.D.
Provost, Hamad bin Khalifa University (HBKU)

Ioannis G. Economou, Ph.D. — Secretariat
Associate Dean
Professor of Chemical Engineering, Texas A&M University at Qatar

Texas A&M University at Qatar Administrative Officers

The leadership of Texas A&M University at Qatar is responsible for the vision of the campus. This vision is simple: to be the premier provider of engineering education in the region, a significant contributor to knowledge internationally and an essential resource to the State of Qatar.

César O. Malavé
Dean

Ioannis G. Economou
Associate Dean for Academic Affairs

Hassan S. Bazzi
Associate Dean for Research and Executive Director of Development, Engagement, and Outreach

Hazem Nounou
Assistant Dean for Academic and Student Services

Rosalie Nickles
Assistant Dean for Finance and Administrative Services

Texas A&M University at Qatar Program Chairs

Patrick Linke
Chemical Engineering Program Chair

Haitham Abu-Rub
Electrical Engineering Program Chair

Zohreh R. Eslami
Liberal Arts Program Chair

Vijay G. Panchang
Mechanical Engineering Program Chair

Vijay G. Panchang
Interim Petroleum Engineering Program Chair

Edward N. Brothers
Science Program Chair

General Statement

Texas A&M’s branch campus in Qatar, part of the 2,500-acre multi-institutional campus known as Education City formally opened on September 7, 2003, offering undergraduate degree programs in chemical, electrical, mechanical, and petroleum engineering. Texas A&M’s engineering program is widely considered among the best in America, and the curricula offered at the Qatar campus are materially the same as those offered at the main campus located in College Station, Texas. Texas A&M University at Qatar is fully funded by the Qatar Foundation for Education, Science, and Community Development and provides a unique opportunity for the University to expand its international presence and provide educational and research opportunities for faculty and students.

Mission Statement

The mission of the Qatar campus is to develop exemplary engineers and leaders through internationally respected undergraduate and graduate degree programs. Texas A&M at Qatar generates new knowledge by conducting research and disseminating results. In all of its efforts, Texas
A&M at Qatar serves the needs of the State of Qatar and the region through broad expertise.

**Qatar Foundation and Education City**

Founded in 1995 by His Highness Sheikh Hamad bin Khalifa Al-Thani, who was then the emir and now is the father emir, the Qatar Foundation for Education, Science and Community Development’s guiding principle is that a nation’s most valuable natural resource is its people. The foundation’s symbol is the Sidra tree, whose deep, solid roots reflect the foundation’s regard for Qatari culture and whose fruits carry the seeds of hope for a better tomorrow.

Her Highness Sheikha Moza bint Nasser serves as chairperson of the Qatar Foundation and guides the nonprofit organization’s programs and philosophies. Among those philosophies is a commitment to making Qatar a world-renowned center for higher learning.

To that end, the Qatar Foundation’s most visionary undertaking, Education City, was founded in 1997. The 2,500-acre complex outside of Doha, Qatar, boasts state-of-the-art facilities and a forward-thinking agenda that has enticed some of the world’s top universities to open branch campuses. In 2003, Texas A&M at Qatar joined Virginia Commonwealth University School for the Arts and Weill Cornell Medical College in offering undergraduate degree programs at Education City. In 2003, Carnegie Mellon University came aboard, followed by Georgetown University in 2005, Northwestern University in 2008, University College of London in 2010, and HEC Paris in 2011, and negotiations with other institutions of higher learning continue. It is also the home of Hamad bin Khalifa University. In addition, the Qatar Science and Technology Park, an extensive, state-of-the-art research complex, is providing opportunities for research partnerships between business, government and academic institutions.

The missions of Education City are clearly defined: to prepare world-class graduates capable of assuming professional leadership positions in Qatar, throughout the Gulf region, and around the world, and to make Qatar a world leader in higher education and cutting-edge research. Texas A&M at Qatar is proud to take part in achieving the goals of the Qatar Foundation, which so closely resemble its own commitments to education and community service.

Vechot, Luc N, Associate Professor  
Texas A&M University at Qatar  
PHD, Ecole Nationale Superieure des Mines de Saint Etienne, France, 2007  

Wang, Yuhe, Assistant Professor  
Texas A&M University at Qatar  
PHD, Texas A&M University, 2013  

Ward, Sherry D, Instructional Assistant Professor  
Texas A&M University at Qatar  
MS, The School for International Training, 1998  

Williams, Joseph E, Instructional Associate Professor  
Texas A&M University at Qatar  
MA, Georgia State University, 2000  

**Majors**

**Chemical Engineering Program**  
- Bachelor of Science in Chemical Engineering (p. 782)

**Electrical and Computer Engineering Program**  
- Bachelor of Science in Electrical Engineering (p. 783)

**Mechanical Engineering Program**  
- Bachelor of Science in Mechanical Engineering (p. 786)

**Petroleum Engineering Program**  
- Bachelor of Science in Petroleum Engineering (p. 787)
Minors

- Analysis, Design and Management of Energy Conversion Systems Minor (p. 432)
- Chemical Engineering Minor (p. 368)
- Chemistry Minor (p. 643)
- Control of Mechanical Systems Minor (p. 433)
- Design and Simulation of Mechanical Systems Minor (p. 433)
- Electrical Engineering Minor (p. 403)
- Geology Minor (p. 482)
- Mathematics Minor (p. 665)
- Petroleum Engineering Minor (p. 443)
- Political Science Minor (p. 765)

Certificates

The College of Engineering has designed several certificate programs to offer ambitious students the opportunity to go beyond the traditional curriculum and gain specific knowledge in a concentration area. Students are required to consult with their academic advisor prior to submitting an application for a certificate. Enrolling and being accepted into a certificate program does not guarantee registration into required courses or that courses will be offered at Texas A&M University at Qatar. For specific information on each certificate available, visit the College of Engineering website.

Masters

Chemical Engineering Program

- Master of Engineering in Chemical Engineering (https://www.qatar.tamu.edu/students/office-of-records/university-catalog)
- Master of Science in Chemical Engineering (https://www.qatar.tamu.edu/students/office-of-records/university-catalog)

Political Science - Minor

Overview

Texas A&M University Qatar Campus offers a minor in political science.

Programs of Study at Texas A&M University at Qatar

Texas A&M University’s College of Engineering strives to provide its students with a high-quality education that will prepare them for a wide range of careers at the forefront of the engineering field. The curriculum is designed to accomplish this by closely integrating cutting-edge basic and applied research with innovative classroom instruction. Texas A&M University’s engineering programs are routinely ranked among the best in the U.S., and graduates are highly sought-after to provide leadership and innovative solutions to global challenges.

Our faculty members maintain active research programs in a wide range of areas. In addition, our undergraduate students participate in numerous co-op and internship programs, which give them the opportunity to apply their knowledge to real-world challenges in a variety of settings.

At Texas A&M University at Qatar, engineering students take courses in the fundamental disciplines—mathematics, sciences, and liberal arts—that will prepare them for the rigorous technical training that follows. This training is dedicated to specialized studies in one of the four engineering fields offered at Texas A&M University at Qatar. After completing intensive, demanding course work and practical experience, students are ready to step into their professional fields and make immediate, meaningful contributions.

College Prerequisite Policy

The following prerequisite policy applies to any student in a College of Engineering undergraduate degree program and to any student who seeks admission to an undergraduate degree program in the College of Engineering. This policy is in addition to prerequisite policies imposed by the University (Texas A&M University Student Rules). For complete details concerning this policy, students should contact their Undergraduate Advising Office.

Students must earn a grade of C or better in all courses identified in each College of Engineering undergraduate degree program and any prerequisites
for these courses. If a student earns a grade of D or F in any of these courses, the student is required to repeat the course before enrolling in a more advanced course that has the D/F course as a prerequisite. A student may attempt a course no more than three times, including courses graded Q or W but excluding those graded NG, unless approval has been received from their department. A student must complete all prerequisites for a course with a grade of C or better by the start of the semester in which the student plans to enroll in the course.

A student is responsible for checking the prerequisites for each course to ensure the prerequisite requirements have been satisfied. A student who registers for a course for which he/she lacks the necessary prerequisite course(s) and/or the prerequisite grade requirement will be required to drop the course. A student who is told to drop a course and is still enrolled by the deadline set each semester may be administratively dropped by their department. If a student is administratively dropped from a course, the student is responsible for all financial obligations associated with the drop. An administrative drop may adversely impact (including, but not limited to): health insurance benefits, financial aid, athletic eligibility, INS status, veterans' benefits, and eligibility to participate in extracurricular activities.

Other Requirements

All required coursework must be taken for a grade to satisfy requirements for a degree in the College of Engineering. Courses cannot be taken on a satisfactory/unsatisfactory basis to satisfy this requirement.

ENGR[X]

ENGR[X] is a college-wide, zero-credit-hour required program that is composed of approved engineering-centric activities that meet the criteria of high-impact learning experiences. Undergraduate students can use their participation in one of these activities to partially satisfy their ENGR[X] requirement. Full satisfaction of the ENGR[X] requirement includes participating in an engineering-centric activity and submitting a meaningful, self-reflection that discusses the impact and overall experience on the student’s education.

Each engineering department identifies the activities it will accept in satisfying a student’s ENGR[X] requirement. Students should consult with their academic advisor for approved activities.

Course Credit

Credit by Examination

Undergraduate students at Texas A&M University at Qatar may earn course credits by demonstrating superior achievement on tests offered through several examination programs. Credit by examination is available to freshmen who plan to enter the university and to students who are currently enrolled. Credit earned by examination does not contribute to a student’s grade point ratio. The university awards credit for scores on certain tests published by the Advanced Placement Program (AP), the College Level Examination Program Computer-Based Testing (CLEP CBT), the SAT Subject Tests, DANTES Subject Standardized Tests (DSST) and the International Baccalaureate (IB) Program. Texas A&M University at Qatar also offers qualified students opportunities to earn credits by taking departmental examinations prepared by the faculty. Information concerning credit by examination may be obtained from the Academic Services Office (https://www.qatar.tamu.edu/students/academic-services/credit-by-exam).

Please note the regulations (http://catalog.tamu.edu/undergraduate/general-information/admission/#coursecredittxt) concerning credit by examinations.

Departmental Examinations for Entering Freshmen and Currently Enrolled Students

Qualified entering freshmen may take departmental tests after being officially admitted into Texas A&M University at Qatar. Currently enrolled students can also take the exams throughout the year. Offerings vary from campus to campus and not all tests are available, contact the Academic Services Office (https://www.qatar.tamu.edu/students/academic-services) for registration information. The tests are prepared by participating Texas A&M University at Qatar departments.

Extension and Correspondence Courses

Students may apply a maximum of 30 semester hours of approved extension class work and correspondence study toward a degree. Students may apply up to 12 hours of correspondence credit earned through an accredited institution toward the requirements for an undergraduate degree, even though Texas A&M does not offer courses by correspondence.

Correspondence courses taken through the Defense Activity for Nontraditional Education Support (DANTES) may be accepted and included in the 12 hours allowed.

In order for a student in residence at Texas A&M to receive credit for correspondence work toward a bachelor’s degree, he or she should:

- obtain advance written permission from the dean of his or her college;
- present appropriate evidence of having completed the course.

Data and Research Services at Texas A&M University is authorized to act as an agent to receive correspondence courses.

Registration and Academic Status

Registration for the fall and spring semesters is accomplished at several times. During the fall and spring semesters (in November and April), a preregistration period is held for currently enrolled and readmitted students to register for the next semester. There are periods of announced open registration for students who were unable to preregister during the scheduled preregistration period. New Student Conferences serve as an opportunity for new undergraduate students to register. Further information concerning registration may be obtained from the academic calendar published in this catalog or from the Office of Records. The schedule of classes is available online.

More information may be found here (http://catalog.tamu.edu/undergraduate/general-information/registration-academic-status).

Grading System

Because students attend a college or university to extend their education, grades are usually given as an indication of the proficiency of their endeavors. The student’s semester grade in a course shall be based upon performance and/or participation in class, exercises and tests, laboratory work and final examination as applicable to the course. The proportionate weight assigned to each of the factors shall be determined by the department administering the course.
Withdrawal from Texas A&M University at Qatar

An official withdrawal from the university will result when a student drops all in progress and courses not yet started in a particular term. A student who withdraws from the university before the completion of a semester or summer term is required to comply with the official withdrawal procedure. This process is initiated by submitting a request through the Student Withdrawal channel on the My Record tab in the Howdy portal. Students may not withdraw after the Q-drop deadline. The student's dean will retain the authority to support a student withdrawal after the deadline.

If a student is enrolled in one or more inter/intra-session ("minimesters") or summer terms and chooses to withdraw, all current and future in progress courses for the entire semester will be dropped. The student will be ineligible to register for courses for the remainder of that semester.

STUDENTS RECEIVING FINANCIAL AID or SPONSORSHIPS should talk to their sponsor before withdrawing. Withdrawing from the university does not cancel all tuition and fees. Failure to comply may result in your owing a substantial sum rather than having a zero balance or refund. In addition, withdrawing may affect your immigration status. Please check this carefully before submitting the withdrawal form (https://www.qatar.tamu.edu/students/office-of-records/student-forms).

For university policy regarding withdrawal, see the Texas A&M University Student Rules (http://student-rules.tamu.edu).

Transcripts

Students applying for admission to Texas A&M are required to submit transcripts of previous academic work and in some cases, results of standardized tests. The submission of altered documents or the failure to furnish complete and accurate information on admission forms will be grounds for disciplinary action.

Students and former students may request an official transcript by completing the transcript request form (https://www.qatar.tamu.edu/students/office-of-records/student-forms) online or in person at the Office of Records located on the first floor of the Engineering Building in Education City, Doha, Qatar. Individuals who previously attended Texas A&M University at Qatar may obtain an official transcript of their completed coursework, provided they have no financial obligations to Texas A&M, Texas A&M University at Qatar, or the Qatar Foundation. A fee, which according to state law must be paid in advance, will be charged for each copy. During grading and degree posting, official transcripts may be produced for enrolled students only if all courses for that semester or term are shown as in progress (IP) or have all final grades posted.

Graduation Application, Diploma and Commencement

Formal application for degrees at Texas A&M University at Qatar is a two-step process. An application must be submitted online by the deadline stated in the academic calendar and degree application. In addition, the supplemental application must be submitted by the deadline. Under unusual circumstances, an application for a degree may be accepted after the stated deadline. The student must apply via the Howdy portal. All students must have settled all financial obligations to the university and Qatar Foundation prior to receiving a diploma.

Graduate and undergraduate students completing their degree in July or December will have the opportunity to participate in the commencement ceremony in May, following the completion of their degree. Students must participate in the commencement ceremony of their home campus.

**Application Information**

The application for undergraduate admission may be found at www.exploretamuq.com (http://www.exploretamuq.com). Additional information may be obtained by calling (+974) 4423-0043 or by visiting the Office of Admissions at the Engineering Building located in Education City, Doha, Qatar. The admission guidelines presented here are for admission to the fall 2018 or spring 2019 semesters. While they are the best available, admission criteria are subject to change. The most current information is available on the website or by calling the number listed above.

**Candidacy Requirements**

The Texas A&M College of Engineering is considered one of the world’s premier programs, with globally recognized faculty renowned for their teaching and research excellence. Admission into the program is open to freshman and transfer candidates, and is highly competitive. Therefore, Texas A&M at Qatar is seeking candidates who have a proven record of academic achievement and who merit admission into the program. Only the best-qualified candidates will be admitted, so it is important that the application reflect what you have accomplished in your college preparatory schooling.

Entry into the Texas A&M at Qatar program depends upon completion of the entire application, submission of the required supporting documents and college entrance test and placement test results, and an interview conducted by members of the Texas A&M at Qatar Admissions Board, if applicable. All of these requirements determine admittance. Texas A&M at Qatar seeks candidates who are committed to meeting the academic rigors of the program, who are global in their personal perspective, and who will thrive in a diverse and culturally rich environment.

Freshman Admission
Definition of a Freshman
A freshman is defined as a degree-seeking applicant who has not attended a university prior to entrance into the program, or an applicant who is still in high school or in a secondary school program who may have taken university courses and received college credits as an element of the secondary school curriculum or requirements. If an applicant has enrolled in a foundation program at a college or university he or she is still considered to be a freshman.

Items Necessary to Complete an Application File
An application is reviewed to make a decision about admission only after all items listed in this section have been received. The items must be received by the appropriate closing date to assure consideration.

Definition of a Complete Freshman Application
To be considered a candidate for freshman admission to Texas A&M at Qatar, the prospective student must formally apply by submitting all of the required documents and test scores and meeting all of the admission requirements. The information provided in this section of the catalog will help guide the candidate through the admission process. Candidates must submit all of the following information by the admission deadline to be considered for admission:

1. Completed online application.
2. Passport copy (resident permit if required).
4. Official college/university and/or Academic Bridge Program transcripts.
5. Official test scores.
7. Resume/curriculum vitae (CV).
8. Reference forms.
9. Application fee.

Specific Admission Requirements
1. Completed application
An application for Texas A&M at Qatar can be found at www.qatar.tamu.edu/apply.

2. Passport
Submit a legible copy of the candidate's passport and resident permit if required.

If the candidate is a non-Qatari and resides in Qatar, the candidate must submit a copy of his or her resident permit.

3. Official high school transcript or an official completion document from a secondary school program
Freshman applicants who have not graduated from high school or who have not completed a secondary school program at the time of application must submit a current official transcript listing all high school/secondary course work taken, credit earned, grades and, if calculated, by the school, respective class rank. All will be used as an indication of the candidate's academic preparation.

- Freshman applicants who apply and are admitted prior to having graduated from high school or having completed their final year of secondary school must submit an official transcript that indicates the graduation or completion date prior to the first day of class in order to remain eligible to enroll.
- Freshman and transfer applicants who have graduated at the time of application are to submit an official high school or secondary school program transcript that includes coursework, credits earned, grades and class rank, and date of graduation.
- Readmission applicants are not required to submit a high school transcript as a part of the application file.
- To be considered official, a transcript must bear an original signature of a school official or an original school seal.
- Transcripts in a language other than English must be accompanied by an official English translation. Applicants who have attended more than one high school should submit official transcripts from each school attended.
- Emailed copies are not official and will not be accepted.

4. Official college and/or Academic Bridge Program (ABP) transcripts
An official transcript is required from every post-secondary institution attended even if the applicant did not earn credit or receive a course grade, or if the course is not transferable. This includes attendance at the ABP and any colleges or universities. Course work from one college posted on the transcript of another college will not satisfy this requirement. Failure to acknowledge attendance and provide transcripts from all schools attended may be considered a fraudulent admissions application.

- Official transcripts on paper are to be sent by the sending institution in a sealed envelope. The transcript will not be considered official if the student has had access to the actual transcript.
- Transcripts in a language other than English must be accompanied by an official English translation.
- Emailed copies are not official and will not be accepted.
- Evaluation of college and university transcripts for transfer credit will be based on the transfer admission procedures outlined in this catalog.

5. Official test scores
Either the SAT or ACT examination is required for admission consideration.

- Priority consideration will be given to candidates who achieve a competitive test score in all sections of either examination. It is expected that all sections of these examinations will be given full attention.
- TOEFL scores of 550 or higher on the paper-based test, a computer-based TOEFL score of 213 or higher, an Internet-based TOEFL score of 80 or higher, and an IELTS overall band score of 6.0 or higher are
considered competitive. In lieu of TOEFL or IELTS, university officials may consider as a substitute an SAT-based reading and writing score of 560 (prior to March 2016, an SAT critical reading score of 500) or higher or an ACT English score of 21 or higher. Candidates whose native language is English do not have to submit TOEFL/IELTS scores.

- TOEFL and IELTS test scores must be from a test date within two years of the planned date of enrollment. SAT and ACT scores must be from a test date within five years of the planned date of enrollment.
- All test scores must be sent directly from the testing agency.

6. Essay
An essay is a required element of the application form. The essay is designed to give the candidate the opportunity to present his or her uniqueness, special skills, challenges faced, and other considerations that will provide insight into the candidate.

7. Resume/CV
In resume form, the candidate should document academic and non-academic accomplishments, achievements and recognitions. These areas include extracurricular activities, leadership roles, community service, awards, talents, sports and employment.

8. Reference forms
Two personal reference forms must be completed and submitted by officials from the candidate’s graduating high school. The forms (http://cdn.qatar.tamu.edu/assets/forms/admissions/reference-form.pdf) can be found online at the Texas A&M at Qatar website.

9. Application fee
The application fee is QAR 330, or $90 USD, payable to Texas A&M at Qatar.

The application fee is non-refundable. Applicants have the option to pay online.

All items necessary to complete the application become the property of Texas A&M at Qatar and should be sent to:
Office of Admissions
Texas A&M University at Qatar Education City
P.O. Box 23874
Doha, Qatar

Notification of Application Status
Check the applicant information website at www.qatar.tamu.edu/apply to verify your application has been received and to determine if any credentials are missing. Please allow two weeks to process credentials.

The Office of Admissions will make every effort to inform applicants of incomplete files through the applicant website. If incomplete applications are received within one month of the closing date, there may not be sufficient time for the Office of Admissions to notify applicants. All items necessary to complete an application must be received by the Office of Admissions by the closing date to ensure consideration for admissions.

Preferred Preparatory Coursework
The following list shows recommended minimum courses. Most candidates who are offered admission will have taken full advantage of the most challenging courses offered at their high school or secondary program.

- Four years of mathematics to include algebra, geometry, algebra II, and an advanced mathematics course, with calculus being the preferred subject.
- Four years of science which must come from biology, chemistry, and physics.
- English language preparatory courses indicating a high proficiency of understanding course content and concepts taught in the English language.

How to Be Admitted
Entry into the Texas A&M at Qatar program depends upon completion of the entire application, submission of the required supporting documents and college entrance test and placement test results, and an interview conducted by members of the Admissions Board, if applicable. All of these requirements determine admittance. Admission into the program is highly competitive. Applicants who are high achieving in all areas are most competitive for admission.

Applicants may be admitted one of three ways. Due to the limited size of the entering class, the number of students accepted from each category is limited.

1. Academic admits
Applicants qualify for academic admission if they:

- Successfully complete the required high school course work and achieve excellent grades.
- Achieve minimum college entrance tests as follows:
  - SAT math score of 670 or ACT math score of 29.
  - IELTS score of 7 or TOEFL score of 100.
- Students who do not submit TOEFL or IELTS scores must submit a minimum SAT English-based reading and writing score of 660 (prior to March 2016 an SAT critical reading score of 600) and achieve a combined SAT math and critical reading score of 1360, or the ACT English and composite score equivalents.

Students will be admitted according to availability of spots.

2. Review admits
If an applicant does not qualify for academic admission, the complete application file will be considered through an extensive holistic review. Factors considered include:

- Academic achievements — class rank, school curriculum and required course work, and college admission test scores.
- Personal achievements — involvement in extracurricular activities, community service, leadership, employment and summer activities, as well as any talents, awards and honors.
- Information shared in essays and resumes.

Students will be admitted according to availability of spots.

3. Provisional admission into the Aggie Gateway Program
The program is designed to offer high-achieving students from Qatar and the Gulf Corporation Council (GCC) (as well as other countries if space is available) who do not quite meet the minimum test scores the chance to enroll in courses at Texas A&M at Qatar for 12 months. Once students meet the criteria of the Aggie Gateway Program, they can become full-time engineering students.

Students will be admitted according to availability of spots.
Placement Tests
Texas A&M at Qatar will administer placement tests to admitted students. Each accepted student may be required to participate in English and/or Mathematics placement exams. Details regarding the exams will be provided once a student has committed to the university.

Application Calendar and Notification
Freshman application to Texas A&M at Qatar usually occurs from September 1 through March 1. Priority consideration will be given to those candidates who submit a completed application early. Failure to meet the application deadline will disqualify the applicant from admission.

Candidates will be notified of acceptance once admission decisions are made, which is usually in May. New student orientation will occur the week prior to the start of classes, with dates to be announced, and attendance is mandatory for those admitted. Classes normally start in August.

Candidates admitted to Texas A&M at Qatar will be notified by telephone or email, followed by a written admission confirmation letter mailed to the student’s home address or collected at the Office of Admissions. Candidates denied admission will be notified by email and/or postal correspondence to the permanent address specified on the application for admission.

When to Apply
Students currently enrolled in high school or secondary school program who wish to be considered for admission to Texas A&M University at Qatar should apply while in their senior or final year of their high school or secondary school program. Candidates are strongly encouraged to take the necessary college entrance examinations before the beginning of their final year in high school or secondary school.

Additional English Proficiency Requirements for Admitted Undergraduate Students Whose Native Language Is Not English
The criteria for admission into Texas A&M at Qatar differ slightly for those students whose native language is not English. These applicants must demonstrate the ability to speak, write and understand the English language. Undergraduate students may meet this requirement in one of the following ways:

1. Have an official TOEFL score of 600 on the paper-based test, or 100 on the Internet-based test.
2. Have an official IELTS score of 7.0 on the overall band.
3. Have an official SAT critical reading score of 500 or ACT English score of 21.
4. Transfer from an accredited U.S. institution of higher education with at least 30 semester credit hours, including the equivalent to Texas A&M ENGL 103 or ENGL 104 with a grade of C or better.
5. Achieve English language proficiency verification by taking an English language proficiency or placement examination prior to enrolling for the first semester at Texas A&M at Qatar. (If foundation English is required, the student will be enrolled in a pre-university English course, which will extend the time required to complete a degree.)

Transfer Admission
Transfer admission will be considered if the applicant has a successful record of proven academic rigor from a university whose accreditation is recognized by Texas A&M. Applicants wishing to transfer to Texas A&M at Qatar should have completed 24 transferable hours at the time of application and must have at least a 2.5 grade point ratio (GPR). Transfer admission decisions are very competitive; thus, admission standards are not known until the review for admission occurs. Preference is given to the applicant with the highest GPR and credit hours. Applicants who drop or withdraw from courses frequently and who do not achieve satisfactory grades routinely will be at a disadvantage in the review for admission. The entire application, including the essay, is considered in reviewing the transfer applicant for admission. Applicants with less than a 2.5 GPR will be denied admission. Only the most qualified transfer candidates will be admitted. For more transfer admission information, please visit the website at exploretamuq.com (http:// exploretamuq.com).

Definition of a Complete Transfer Application
To be considered a candidate for transfer admission to Texas A&M University at Qatar, the prospective student must formally apply by submitting all of the required documents and meeting all of the admissions requirements. Candidates must submit all of the following information by the deadline to be considered for admission:

1. Completed online application.
2. Passport copy (resident permit if required).
4. Official college/university and/or Academic Bridge Program transcripts.
5. Official test scores.
7. Resume/curriculum vitae (CV).
8. Application fee.

For additional information, see Specific Admissions Requirements (p. 770) listed above. SAT/ACT scores are recommended but not required.

Additional Information for Transfer Applicants
1. At least a 2.0 GPR on course work in progress during the semester (excluding summer terms) immediately prior to enrollment at Texas A&M is a condition of admission.
2. Grades for all transferable courses are used in the computation of the GPR. This includes:
   • Failing grades, repeated courses, Withdraw Failing (WF), Incomplete, etc.
   • Grades reported as Incomplete are computed as Fs.
   • Plus and minus grade designations are not used; C+ is computed as a C, B- as a B, etc.
3. Credit-by-examination courses that are transcripted from other colleges or universities may be transferred if sequential course work with credit is also indicated. If there is evidence that the credit-by-examination courses are part of the student’s program of study at that institution, credit will be awarded for those courses that meet the transfer guidelines.
4. Course work taken as credit-by-examination must be listed as a specific course on an official college transcript to be considered in the admissions process and for transfer of credit.
Transfer Course Credit Policy

Transfer credit on coursework completed at the time of application to Texas A&M University at Qatar is determined when an official transcript from the originating institution is presented as part of the application for admission or readmission process. An official transcript is required from every post-secondary institution attended (including dual credit earned in high school) even if the applicant did not earn credit or receive a course grade, or if the course is not transferable.

The transfer of course credit will be determined by the Office of Records on a course-by-course basis. Credit submitted for transfer must be on an official transcript received by the Office of Records from the Registrar of the institution where the credit was earned. Course content will be determined from the catalog description or the syllabus. The transferability of credit decision will be based on the criteria as specified by Texas A&M University (see Transfer Course Credit Policies (http://catalog.tamu.edu/undergraduate/general-information/admission/#transferadmissionstext) for more information). All criteria are to be considered together; for example, criterion 10 may be qualified by criterion 7.

Credit from Non-Accredited Schools

Students who transfer to Texas A&M from an institution of higher education that is not accredited by one of the regional accrediting associations may validate the work taken at the institution by one of the following methods:

1. Successful completion of a comprehensive departmental examination or nationally standardized examination that is approved by the department.
2. Successful completion of a higher level course in the same subject area when approved by the head of the department and the dean of the college.

Credit will be given to students transferring from non-accredited public colleges in Texas for work completed with grades of C or better if they earn a grade point of 2.0 (C average) on the first 30 hours of residence work at Texas A&M.

Credit from Foreign Institutions

Transfer work from institutions following methods:

- American political science (government) courses will not transfer from foreign institutions outside the United States.
- Courses taken at language training centers or institutes are generally not awarded transfer credit. A transcript from such an institution must be issued through the Office of the Registrar at a Texas A&M–recognized university, institute or language training center. Credentials of all language training centers and institutes are carefully checked.
- Credit will be given to students transferring from non-accredited public colleges in Texas for work completed with grades of C or better if they earn a grade point of 2.0 (C average) on the first 30 hours of residence work at Texas A&M.
- Courses taken at language training centers or institutes are generally not awarded transfer credit. A transcript from such an institution must be issued through the Office of the Registrar at a Texas A&M–recognized university, institute or language training center. Credentials of all language training centers and institutes are carefully checked.

No English composition courses will be transferred from institutions located in non-English-speaking countries. American history and American political science (government) courses will not transfer from foreign institutions outside the United States.

Courses taken at language training centers or institutes are generally not awarded transfer credit. A transcript from such an institution must be issued through the Office of the Registrar at a Texas A&M–recognized university, institute or language training center. Credentials of all language training centers and institutes are carefully checked.

Admission Criteria for Other Application Types

Readmission Criteria

Admission decisions for readmission are based on the following:

- GPA on Texas A&M University at Qatar coursework;
- GPA on coursework since leaving Texas A&M University at Qatar;
- Desired major; and
- Information presented in the application and essay/statement of purpose if provided.

If you were previously admitted but did not enroll and attend class through the official census date, you do not qualify as a readmit, and you must apply as either a freshman or transfer student.

If you were previously enrolled at Texas A&M University at Qatar but did not attend class through the official census date of the previous long semester, then you must apply for readmission.

Transcripts from institutions attended since the last enrollment at Texas A&M University at Qatar are required. Please contact the Office of Admissions for readmission deadlines.

Post-baccalaureate Undergraduate Criteria

Admission is limited and is intended for applicants with a degree who wish to apply for further study at the undergraduate level to pursue a second bachelor’s degree.

Additional requirements to complete a post-baccalaureate application:

- an official transcript indicating the receipt of a recognized baccalaureate degree
- a statement explaining why enrollment at Texas A&M University at Qatar is necessary
- official transcripts from all colleges attended (official high school transcript not required)

Admission decisions for post-baccalaureate undergraduates consider:

- GPA on transferable college coursework
- completion of prerequisite coursework
- information presented in the application

Priority is given to qualified applicants for their initial degree; therefore, post-baccalaureate undergraduate admission may be limited or may not be available.

Transient-Session Only Criteria

Admission is considered for applicants who wish to attend one specific session only and who present appropriate credentials for the level of specified coursework and apply within the processing period for the specific session.
Additional requirements to complete a transient-session only application include:

- A statement explaining why enrollment at Texas A&M University at Qatar is desired.
- An official college transcript showing the latest collegiate coursework attempted.

Change of Curriculum to Another Campus
Texas A&M offers certain undergraduate degrees at two branch campuses in addition to the main campus. While enrolled as a student in residence at any one of the Texas A&M locations, students may apply for a change of curriculum to another campus for a future semester. Students must comply with the established change of curriculum procedures and requirements of their desired major, department, and college, and space must be available. Final approval is granted by the academic dean or departmental advisor for that major.

Suspected Fraudulent Admissions Applications
Applicants for admission to Texas A&M University at Qatar should be aware that the information submitted will be relied upon by university officials to determine their status for admission and residency. By signing and submitting an admission application, the applicant certifies that the information in, and submitted with, the application is complete and correct and may be verified by university officials.

All students applying to Texas A&M University are expected to follow the Aggie Code of Honor which states “An Aggie does not lie, cheat or steal nor tolerate those who do.” Applicants found to have misrepresented themselves or submitted false information on the application will receive appropriate disciplinary action which may include rejection of the application, withdrawal of any offer of acceptance, cancellation of enrollment or any other appropriate disciplinary action deemed necessary. In all instances of disciplinary action, the application fee is non-refundable.

Pursuant to the 2018-2019 undergraduate catalog and Texas A&M student rule 24.4.1 (http://student-rules.tamu.edu/rule24), acts of dishonesty include but are not limited to:

- Withholding material information from the University, misrepresenting the truth during a University investigation or student conduct conference, and/or making false statements to any University official.
- Furnishing false information to and/or withholding information from any University official, faculty member, or office.
- Forgery, alteration, or misuse of any University document, record, or instrument of identification.

For prospective undergraduate students (admitted but not enrolled), the initial determination of whether an individual has submitted a fraudulent application will be made by the Assistant Director of Admissions, with a right of appeal to the Director of Admissions for undergraduate students. For prospective graduate students, initial appeals will be made to the Executive Director of Graduate Studies.

For enrolled students, the initial determination of whether a student submitted a fraudulent application will be made by the Director of Records, with final right of appeal to the Associate Dean of Academic Affairs or Assistant Dean of Academic and Student Affairs.

Any University official who suspects that a prospective or enrolled student has submitted a fraudulent admission application must notify the Director of Admissions or Director of Records.

Tuition and Fees

Tuition and Fees for Texas A&M University at Qatar
Tuition and Fees (p. 774)
Payment of Tuition and Fees (p. 774)
Financial Obligation for Graduating Students (p. 774)
Citations (p. 775)
Cancelling of Registration (p. 775)
Fees for Special Items or Services (p. 775)
Application Fees (p. 775)
Confirmation Fees (p. 775)
Diploma Fees (p. 775)
Refund Policy (p. 775)
Financial Assistance/Scholarships (p. 775)

Tuition and Fees
As a state institution, Texas A&M has held firmly to the premise that the Qatar campus should remain affordable, and therefore should follow the same tuition and fee structure as that of the main campus. All tuition and fee amounts provided herein represent the most accurate figures available at the time of this publication and are subject to change without notice.

Full details on tuition rates are available at www.qatar.tamu.edu/students/tuition-financial-aid-and-scholarships.

Educational expenses for the nine academic months will vary according to personal needs. University rules regarding tuition and fees and all related payments in place at the time of publishing are reflected here. All are subject to change.

Payment of Tuition and Fees
Students must meet all financial obligations to the university by their due dates. Officials at Texas A&M at Qatar calculate the appropriate tuition and fees of each student enrolled, and the Qatar Foundation issues to each student his or her respective tuition statement. Students are then responsible for making payment to the Qatar Foundation’s cashier office. Students will receive their invoices via their Texas A&M at Qatar email addresses. Failure to pay amounts owed may result in cancellation of the student’s registration and being barred from future enrollment and receiving official transcripts. Qatar Foundation policy requires that tuition and fees be paid as early as possible in the semester. Arrangements for paying tuition in installments should be made with the Academic Services Office.

Financial Obligation for Graduating Students

According to Texas A&M University Student Rules and Chapter § 54.007 (c) of the Texas Education Code, all financial obligations owed to the university and/or to the Qatar Foundation must be paid by the end...
of the semester. Failure to settle all financial obligations will result in withholding a student’s diploma at graduation. Additionally, a block will be placed on the student’s account, which will prohibit registration in subsequent semesters and the receipt of official transcripts.

Citations
- Section 14.15 of the Texas A&M University Student Rules states “The student must have settled all financial obligations to the University.”
- Chapter § 54.007 (c) of the Texas Education Code states “A student who fails to make payment prior to the end of the semester may be denied credit for the work done that semester.”

Cancelling of Registration
Once students have registered for classes and subsequently wish to withdraw from the university prior to the first day of classes, they must do the following to prevent being charged tuition/fees for the term:

1. Contact the Office of Records prior to the first day of classes and complete a withdrawal form indicating the intent to officially withdraw from the university.
2. Contact the Academic Services Office.
3. Contact the sponsoring agency if the student is sponsored.

Following this procedure is especially important for students in order to prevent being assessed tuition/fees for the term even if the student has decided not to attend. Failure to request cancellation of an unwanted registration may result in grades of F or I in all courses for the semester. The student will be held responsible for paying all fees for the semester, regardless of whether he or she attended classes.

Cancellation for Nonpayment of Tuition or Fees
If notified by the Qatar Foundation of nonpayment, the university reserves the right to cancel registration for any semester in which a student is enrolled.

Fees for Special Items or Services
Application Fees
The application-for-admission fee for undergraduate and graduate applicant is: QAR 330, or $90 USD, and is non-refundable.

Confirmation Fee
A non-refundable fee of QAR 330, or $90 USD, is assessed to students who confirm their acceptance into Texas A&M at Qatar at the time the letter of commitment to enroll at the university is submitted.

Diploma Fee
A non-refundable fee per degree sought is assessed the semester a student applies for graduation. This fee is payable each time a student applies for graduation. A late diploma fee is charged at the rate of QAR 185, or $50 USD, in addition to the diploma fee above, to those who apply for graduation after the set deadline.

Refund Policy
Withdrawal from Texas A&M at Qatar
Once registered for classes, a student is considered officially enrolled unless otherwise restricted from enrolling. Stopping payment to the Qatar Foundation or allowing the check or bank draft to be returned unpaid by the bank for any reason does not constitute official withdrawal. The withdrawal process is specified in the section “Cancelling of Registration.” A withdrawal form found online at www.qatar.tamu.edu/students/office-of-records/student-forms explains exactly what the student needs to do. Failure to follow procedures for withdrawing from the university may result in financial penalties and delays with future enrollment, and course work may be recorded as incomplete and failed. Once a student registers, he or she is responsible for the total cost of the tuition and fees assessed if the withdrawal process is not followed properly, and refunds will occur only within the specified refund time periods as listed in the section “Tuition and Fee Adjustments.” Recipients of Qatar Foundation financial assistance should talk to a financial aid representative at the Qatar Foundation before withdrawing. Sponsored students should talk to a representative from their respective sponsoring agency prior to withdrawing.

Tuition and Fee Adjustments
Fall and Spring Semester and Eight-Week Summer Semester
By 4 p.m. on the last business day before the first day of class
- During the first five class days: 100%
- During the second five class days: 80%
- During the third five class days: 70%
- During the fourth five class days: 50%
- After the fourth five class days: 25%

Five-Week Summer Term
By 4 p.m. on the last business day before the first day of class
- During the first, second or third class day: 100%
- During the fourth, fifth or sixth class day: 50%

Seventh day of class and thereafter: None

Financial Assistance/Scholarships
The financial assistance program is designed for all students who have a demonstrated financial need for assistance to meet college expenses and who are making satisfactory academic progress, as defined by the policies of the Qatar Foundation Financial Services Office’s financial aid agreement that students sign upon receiving financial assistance. Texas A&M at Qatar submits academic program reports to Qatar Foundation, following the guidelines of the Family Educational Rights and Privacy Act (FERPA). University scholarships, on a limited basis, are available to selected students and are also awarded based on academic excellence. Students who are on conduct probation are not eligible for university-awarded scholarships.

In determining the type and amount of financial assistance necessary to meet a student’s financial need, Qatar Foundation expects parents to make a maximum effort to assist with college expenses. The financial assistance resources of Qatar Foundation and university scholarships should be viewed only as supplementary to the financial resources of the applicant and family.

Only those students who have been accepted for enrollment into the university may apply for Qatar Foundation financial aid and/or for university scholarships. Information about Qatar Foundation financial...
aid can be found at www.qatar (http://www.qatar.tamu.edu/students/tuition-financial-aid-and-scholarships).

Academic Advising

The primary purpose of academic advising at Texas A&M at Qatar is to assist students in the development of meaningful educational plans that are compatible with their personal abilities and goals. The ultimate responsibility for making decisions about personal goals and educational plans rests with the individual student. The academic advisor assists by helping to identify and assess alternatives and the consequences of decisions. Academic advising is a continuous process of clarification and evaluation.

The objectives for academic advising for the university and its component units include facilitating the following for each student:

- Clarifying personal and career goals.
- Developing suitable educational plans.
- Selecting appropriate courses and other educational experiences.
- Interpreting institutional requirements.
- Increasing student awareness of available educational resources.
- Evaluating student progress toward established goals.
- Enhancing decision-making skills.
- Reinforcing responsible student self-direction.
- Using referrals to other institutional and community support services, where appropriate.

The advising system of Texas A&M Qatar Campus includes professional staff advisors, faculty liaisons and administrators working together to ensure the total educational development of students by meeting intellectual, academic, personal and career needs. All students are required to meet with an academic advisor each semester in order to register for classes in the subsequent semester, or they will be blocked from registration.

More information can be found at https://www.qatar.tamu.edu/students/academic-services/academic-advising

The Academic Success Collaborative

The Academic Success Collaborative (ASC) welcomes all students seeking to enhance their academic skills and to engage in deep learning. The ASC staff, which includes peer tutors and professional writing consultants, offers one-to-one tutoring and small-group collaborations that cover topics/subjects including writing, mathematics, physics, chemistry, core introductory and sophomore-level engineering courses, presentation skills, and digital composing. The ASC team also provides support for students who want to improve their overall study skills.

More information can be found at asc.qatar.tamu.edu.

Aggie Life 101 for New and Transferring Undergraduates (Orientation)

Each year, Aggie Life 101 is held for undergraduate students entering Texas A&M at Qatar. New students are required to attend Aggie Life 101 in order to accept their offer of admission and register for classes. Families are encouraged to attend Aggie Life 101 with their students and participate in sessions designed especially for them to learn more about what their student will be experiencing as a new Aggie.

Aggie Life 101 provides students with the tools they will need to get started on their careers at Texas A&M at Qatar and offers a chance to learn about the many opportunities available to members of the Aggie community. During this program, new students will meet with academic advisors, register for their first semester courses, and learn the traditions and values of being a Texas A&M Aggie student. Since their first year is important to their continued success at Texas A&M at Qatar, the program will acquaint new students with student life activities and services available at the university. In addition, Aggie Life 101 offers social programs that provide students an opportunity to interact with other students. Each year, current students volunteer as orientation leaders to help new students and their families connect with Texas A&M at Qatar.

For questions concerning Aggie Life 101, please contact the Department of Student Affairs at dsa@qatar.tamu.edu or (+974) 4423-0047.

The Association of Former Students

- Aggie Ring.
- Alumni Services, Giving and Events.
- Traveling Aggies.
Campus Safety and Security

• In an emergency situation dial 4454.0999 from within Education City or 999 from outside Education City.
• Report incidents immediately to Texas A&M University at Qatar security (333 from a Texas A&M Engineering Building phone or +974.4423.0333 from a mobile or outside phone).

Information on campus safety and security; as well as the Annual Security Report is located here (https://www.qatar.tamu.edu/other/safety-and-security).

Career Services

The Career Services Office offers advising and assistance to students seeking internships and full-time employment, while supporting the recruiting initiatives of local and international companies. Career Services assists students as they prepare for their job searches by coordinating informational sessions and workshops on topics such as resume writing, interviewing skills and career readiness. The office also hosts two annual recruiting events, the Career Networking Event at Texas A&M at Qatar and the spring career fair in collaboration with all Education City universities. A variety of guest speakers from industry are hosted each year. Students learn about opportunities in specific companies and on general issues related to the workplace. The Career Services Office provides students with other opportunities for industry engagement ranging from corporate competitions to participation in local and regional conferences.

More information can be found at https://www.qatar.tamu.edu/students/career-services

Critical Incident Response Team

The purpose of the Critical Incident Response Team (CIRT) is to respond to incidents involving Texas A&M at Qatar students and to serve as the university contact when students are involved in incidents away from the campus.

Texas A&M at Qatar is committed to providing an educational climate that is conducive to the personal and professional development of each individual. Even with a small university community, Texas A&M at Qatar and the Department of Student Affairs realize that crises, or critical incidents, will occur and that these crises can have a significant effect on the entire university, Education City and local communities. Such critical incidents require an effective and timely response. The Department of Student Affairs has developed CIRT consisting of Texas A&M at Qatar staff to best respond to these critical student incidents. CIRT can be reached at (+974) 4423-0333.

The goals of CIRT are as follows:
• To coordinate the university’s response to critical incidents involving students while paying special attention to the safety and security needs of members of the university community.
• To offer counseling, guidance and appropriate support to members of the university community, their families and university caregivers.
• To use critical incidents, when appropriate, as teachable moments that may enhance the quality of life for all those touched by critical incidents.

Disability Services

The mission of Disability Services is to ensure accessibility for all students to University programs. The Department of Student Affairs Counseling and Wellness Program administers Disability Services at Texas A&M University at Qatar. Disability Services, with the assistance of Disability Services at Texas A&M University, offers accommodations counseling, evaluation referral, disability-related information, and adaptive technology counseling and equipment for academically related purposes. Although Disability Services does not offer disability evaluation and/or testing, tutoring, personal expenses, attendants or scholarships, we will provide referral information.

More information can be found at https://www.qatar.tamu.edu/students/student-affairs/disability-services

The Engineering Enrichment Program

The Engineering Enrichment Program (EEP) is designed to drive innovation and entrepreneurship and empower students with an exceptional engineering experience. The program offers a series of short training courses throughout the year, providing more hands-on experience in different engineering fields such as: electronics, fabrication, machining, and programming. It inspires students and enriches their knowledge with new valuable skills to become experts and make a difference. Students will have the chance to complement their engineering degree with additional certifications and participate in international competitions. This program encourages all students to build competencies and share big ideas, as they work towards becoming unique engineering leaders.

More information can be found at https://www.qatar.tamu.edu/students/engineering-enrichment-program

Global Educational Opportunities

Higher education is not immune to the trend of globalization. To adapt to this phenomenon and prepare graduates for an increasingly interdependent global community, Texas A&M University at Qatar is committed to providing global learning opportunities for all students. Whether it be study abroad programs, service-learning trips, research abroad, language training, international conferences or workshops, or global leadership programs, students at Texas A&M University at Qatar can choose from a variety of experiences that can increase their cultural competence, expand their global worldview, and augment their marketability in a rapidly globalizing world. Some opportunities on offer are as follows:

Study Abroad

Texas A&M University at Qatar students are able to study in a variety of different locations and countries. The flagship program is an exchange with the Texas A&M main campus in College Station, Texas. This program is offered every semester and the summer session. The program operates as a cohort model, and students are selected through a competitive application process. Texas A&M University at Qatar assists in arranging flights, housing, transportation and university check-ins.

Texas A&M University at Qatar students are also eligible to participate in programs on offer through the Study Abroad Programs Office operated by the main campus. Students can choose from many different disciplines, programs and countries. These programs can differ in length from summer sessions, semester-long programs or intersessions.

Faculty-Led Programs

Every year, Texas A&M faculty lead a group of students on a global academic experience. Traveling with a faculty mentor, a group
of students will travel to an international location, be exposed to engineering topics in a global context, and experience a different culture. Often, students will be joined by fellow Texas A&M students from the main campus and students from the host institution. Faculty-led programs provide students a rich experience that can impact their academic and professional careers by providing them with unique networking opportunities and an enriching cultural experience that can assist with increasing cultural competence.

Research Exchange for Undergraduates
Texas A&M University is a division I research institution. Boasting some of the world’s renowned faculty, Texas A&M University is known for producing groundbreaking research. Students at Texas A&M University at Qatar are eligible to participate in the Research Exchange for Undergraduates, a program designed to partner Texas A&M at Qatar students with a faculty member on the main campus in College Station. This experience can allow students to understand engineering research in a global context and contribute to the growing field of knowledge. This program will provide students an opportunity to network with faculty members on the main campus, experience a new culture, and have the potential to publish their research.

Information Technology
The mission of the Information Technology (IT) department is to provide a robust, secure and innovative environment that supports Texas A&M University at Qatar’s goals in teaching and lifelong learning, research, and engagement. IT strives to embody and uphold Texas A&M’s tradition of organizational excellence. The department is comprised of five groups that provide over 75 services to faculty, staff and students.

Educational Technology
The Educational Technology group serves faculty and students by promoting and assisting in the use of technology for instruction. Providing systems such as eCampus and Echo360 Lecture Capture, the group also manages classroom technologies and academic software including audiovisual systems.

Enterprise Applications
The Enterprise Applications (EA) group performs business process analysis and develops, administers, and maintains automation to achieve greater efficiencies. EA oversees all electronic communication with the Texas-based administrative systems for student information, financial accounting and payroll, including troubleshooting the processes, applications, and data feeds employed and ensuring secure operation. EA also provides support for many of the university’s web resources, including Marhaba, the intranet portal.

Network and Security
The Network and Security group provides and manages the network, telecommunications and security infrastructure of the branch campus. The group ensures compliance with all laws, policies, procedures, guidelines and industry best practices for operating and securing the Texas A&M at Qatar network. The group strives to increase community awareness regarding cyber-security, prevent cyber-attacks, and remediate the effects of viruses, worms, spyware and other malware.

Service Desk
The Service Desk provides a single point of contact for all IT-related queries, service requests and communications. The team provides user orientation and training. The Service Desk proactively communicates information regarding IT services, updates and policies.

Systems Engineering
The Systems Engineering group is responsible for providing computing infrastructure and services. This team maintains and supports mission-critical systems including physical and virtual infrastructure, directory and authentication services, file and database services, e-mail services, data backups and disaster recovery, data center monitoring, desktop and server security, and print services.

Leadership Activities
The Department of Student Affairs offers a wide variety of leadership development programs that provide an excellent opportunity for students to develop personal leadership in a global and intercultural context. The Student Leadership Exchange Program takes place every spring break and allows a group of student leaders from the Doha campus to visit the College Station campus during their spring break and then a group of student leaders from College Station to visit Doha during their spring break. An emphasis is placed on these students using their Aggie connection to communicate across cultural differences and build leadership. The Department of Student Affairs offers service opportunities each year for students to give back to others. The most well known of these is the Aggie Service Learning Experience, which is an international service trip that allows Aggies to use collective strengths and talents in order to meet an expressed community need while learning about another culture and expanding personal horizons. Additional programs include LeaderShape, which is a six-day residential experience focused on introducing student leadership concepts to all students and challenges them to be a force for change within their student organizations and communities.

The Texas A&M Qatar Campus Library
The Texas A&M Qatar Campus Library supports the teaching, research and outreach missions of the university in an environment that fosters learning and inquiry. A core professional collection of over 7,000 titles is complemented by a basic collection in the arts and humanities of around 3,000 volumes. Students may also request books and journal articles from the five libraries on the main campus, where there is a print collection of around 5 million volumes.

Extensive online resources are available to students both within the library and on desktop or mobile devices via remote access. This includes more than 100,000 electronic journals and newspaper titles, over 1,000 databases, and more than 1.3 million electronic books.

Students can locate books and thousands of journals by author, title, subject and keyword using the basic online catalog, LibCat, at libcat.tamu.edu. Alternately, they can use the time-saving multi-search tool Quick Search, which allows searching of multiple databases at one time.

An experienced librarian is also available Texas hours via online chat, which is a great way to get help when starting a research project. GetItForMe is a document delivery service that supplies print books or electronic copies of journal articles and book chapters free of charge to
all students. Print books borrowed from the main campus generally arrive in five to 10 working days. Electronic copy is usually emailed within two working days. Material not available from the main campus libraries can often be obtained either from other libraries in Qatar or around the world. Professional librarians are also available on campus to teach individuals and groups how to use library tools and resources.

More information can be found at library.qatar.tamu.edu.

Department of Student Affairs
The mission of the Department of Student Affairs at Texas A&M at Qatar is to create a vibrant campus culture that:

• Embodies the Texas A&M Core Values.
• Resonates with Aggie Spirit.
• Upholds Qatar’s unique, rich culture.
• Promotes the holistic and intercultural development of students.
• Prepares students for excellence in the engineering discipline in a diverse global society.

If students experience problems or difficulties or just need advice about where to go for assistance, they are encouraged to contact the Department of Student Affairs at dsa@qatar.tamu.edu or (+974) 4423-0047.

More information can be found at https://www.qatar.tamu.edu/students/student-affairs/

Student Activities
The Department of Student Affairs empowers students to organize into recognized clubs and organizations and plan their own campus activities. Program coordinators within the department advise student organizations and assist them in managing their own events.

Involvement in one or more of the university’s 30-plus organizations can add an important dimension to one’s college experience. It is a way to balance one’s life, meet new people, and develop interpersonal and leadership skills. In addition, prospective employers often look at what students have accomplished and experienced outside of their course work. The recognized student organizations include the Institute of Electrical and Electronic Engineers, the American Society of Mechanical Engineers, the Society of Petroleum Engineers, the American Institute of Chemical Engineers, the Society of Women Engineers, the Qatar Student Association, and many others. The recognized student organizations include a variety of events such as business meetings, conferences, social events, sponsored guest speakers, workshops and field trips. For all these reasons, Student Affairs supports the belief that students can learn from experiences as well as from textbooks.

University sports teams are part of the activities offered and include basketball, soccer and cricket for men and basketball and soccer for women. Tryouts will be held for these teams each fall semester.

Student Government Association
The representative governing body for all students at Texas A&M at Qatar is the Student Government Association (SGA). This body is directly responsible for representing the interests of students to the administration and to the entire university community. SGA works with the administration on issues of concern to the general student population.

SGA consists of three representatives elected from each class, committee chairs, a vice president and the student body president. These officers are elected annually in April. SGA can be reached by email at SGA@qatar.tamu.edu.

More information can be found at https://www.qatar.tamu.edu/students/student-affairs/student-involvement-opportunities/student-government-association

Student Wellness and Counseling
The Student Wellness and Counseling Programs promote the process of developing a healthy lifestyle. By participating in awareness activities, educational programs and counseling, Aggies can enhance their personal wellness with improved physical health, emotional stability, supportive relationships, spiritual growth and academic/career satisfaction. Services for students in the Wellness Program include academic skills counseling and testing, career counseling and testing, personal counseling, stress management and biofeedback, outreach programming, crisis and consultation, and disability services.

More information can be found at https://www.qatar.tamu.edu/students/student-affairs/health-and-wellness/

Ombudsperson
Based in the Office of Student Affairs, the Undergraduate Ombuds assists students with resolving conflicts on an informal and confidential basis. The Ombuds is equally open and accessible to all parties in disputes that may arise when there are differing expectations or conflicting policies regarding academic issues. Such occurrences may happen to undergraduates in their roles as students, employees, interns, or in many of the other roles that affect their education. Students should visit the Department of Student Affairs in the Texas A&M Engineering Building for more information regarding Ombuds services.

On-Campus Housing
Student housing in Education City is available to students enrolled full time at Texas A&M at Qatar on a first-come, first-served basis. Preference is given to those students who do not live in Qatar. In order to apply for student housing, students must complete a housing request through the Department of Student Affairs. In order to consider the application complete, students must also submit a refundable damage deposit of QAR 2,000.

Applications received without the deposit will be returned. Prior to receiving access to their assigned room each semester, students are required to pay the balance of their housing fees for the upcoming semester.

There are separate residence halls for male and female students. In addition, students have access to a communal lounge with computers, printers, cable television, DVDs, and video in each residential area. Laundry facilities with washers and dryers are available. Wireless Internet is available throughout the residence halls.

A Qatar Foundation Housing and Residence Life professional (residence hall directors [RHDs]) and student staff (community development advisors [CDAs]) work closely with student residents to maintain a safe, comfortable and healthy living-learning environment.

The RHD is a full-time professional staff member available to help students with life transitions associated with living in a community residential environment and the transition to college. The RHDs are
Texas A&M University at Qatar Facilities

The Texas A&M University at Qatar engineering building is one of the most advanced facilities for engineering education in the world. Designed by the famous father-son Mexican architect team Legoretta + Legoretta, the 55,000 square meter (592,000 square feet) facility combines modernist elements with traditional Islamic architectural motifs. The building is fully wireless and features high-tech classrooms, teaching laboratories and computer laboratories. The research rotunda provides additional research laboratories that give future Aggie engineers firsthand experience.

Texas A&M Qatar campus’s home in Education City also includes a library with a core professional collection of 10,000 titles and a number of journals and DVDs relating to the liberal arts, humanities, and basic sciences. Students also have access to books and journals from the libraries on the main campus, from collections that exceed 5 million volumes. Extensive online resources are available to students in the library and remotely, including more than 2 million electronic books and thousands of subscription electronic journals and databases.

University Statement on Harassment and Discrimination (p. 780)

Aggie Honor Code (p. 781)

University Student Rules (p. 781)

University Statement for Individuals with Disabilities

Texas A&M University (TAMU) is committed to maintaining an accessible campus community and providing reasonable accommodations to qualified students, faculty, staff and visitors. TAMU does not discriminate on the basis of an individual’s disability and complies with Section 504 of the Rehabilitation Act of 1973, and the Americans with Disabilities Act (ADA) as amended.

Students are protected from discrimination regarding access to and participation in TAMU’s programs and activities. TAMU provides academic adjustments and auxiliary aides to accommodate needs of students with disabilities, as defined under the law, who are otherwise qualified to meet the institution’s academic requirements.

Students with disabilities who would like to request accommodations may contact the following:

• TAMU and Texas A&M Health Science Center’s (TAMHSC) College of Nursing and School of Public Health should contact Disability Services (http://disability.tamu.edu/services) (979) 845-1637 or disability@tamu.edu.
• TAMUQ should contact Miguel Trevino at +974-4423-0317 or miguel.trevino@qatar.tamu.edu.
• TAMUG should contact Dr. Steve Wilson +974-4423-0047 or stephen.wilson@qatar.tamu.edu.

For more information about disability accommodations, see TAMU Student Rule 46, Disability Accommodations in Academic Programs (http://student-rules.tamu.edu/rule46) or TAMUG Student Rule 46, Disability Accommodations in Academic Programs (http://www.tamug.edu/studentrules(Student_Grievance_Procedures/46_Disability_Accommodations.html)).

University Statement on Harassment and Discrimination

Texas A&M University (TAMU) provides equal opportunity to all employees, students, applicants for employment or admission, and the public regardless of race, color, sex, religion, national origin, age, disability, genetic information, veteran status, sexual orientation or gender identity. TAMU will promptly investigate complaints of discrimination, sexual harassment, and/or related retaliation in accordance with applicable federal and state laws.

Students who have questions or believe they have experienced illegal discrimination, sexual harassment, sexual violence, and/or related retaliation are encouraged to contact:

• TAMU and TAMHSC locations should contact the ADA Coordinator (https://urc.tamu.edu/ada) at (979) 845-8116 or ADA.Coordinator@tamu.edu.
• TAMUG should contact the ADA Coordinator at (409) 740-4503 or boyerj@tamug.edu.
• TAMUQ should contact Miguel Trevino at +974-4423-0317 or miguel.trevino@qatar.tamu.edu.

For more information regarding Discrimination or Sexual Harassment, see TAMU Student Rules 26. (http://student-rules.tamu.edu/rule26) and TAMUG Student Rules 45. (http://student-rules.tamu.edu/rule45) or TAMUG_Notice_of_Nondiscrimination_and_Abuse.pdf)

For more information regarding Discrimination or Sexual Harassment, see TAMU Student Rules 26. (http://student-rules.tamu.edu/rule26) and TAMUG Student Rules 45. (http://student-rules.tamu.edu/rule45) or TAMUG_Notice_of_Nondiscrimination_and_Abuse.pdf)

**Aggie Honor Code**

Integrity is a fundamental core value of Texas A&M University at Qatar. Academic integrity requires a commitment by all faculty, students, and administrators to:

- Remain constantly focused on the quality of the academic programs;
- Achieve and maintain academic excellence in all courses and programs to assure the value of Texas A&M University at Qatar degrees;
- Demand high academic standards from all members of the Aggie community.

All Texas A&M University at Qatar students, graduate and undergraduate, part-time or full-time, in residence or in distance education, are expected to follow the guiding rule of the Aggie Honor Code:

"An Aggie does not lie, cheat, or steal or tolerate those who do."

Upon accepting admission to Texas A&M University at Qatar, a student immediately assumes a commitment to uphold the Honor Code, to accept responsibility for learning, and to follow the philosophy and rules of the Honor System, which may be found at https://aggiehonor.tamu.edu/. A student will be required to state his/her commitment on examinations, research papers, and other academic work. Ignorance of the rules does not exclude any member of the Texas A&M community from the requirements or the process of the Honor System.

Academic Services at Texas A&M University at Qatar, in conjunction with the Honor System Office at Texas A&M, is charged with promotion of the honor code and administration of academic misconduct cases. Academic integrity violations are taken seriously, and are adjudicated by the Academic Services Office (ASO). ASO is responsible for educating the campus community regarding the Aggie Honor Code, responding to academic violation reports, and facilitating remediation efforts for students found to be in violation of the Aggie Honor Code. The website, https://www.qatar.tamu.edu/students/academic-services/aggie-honor-system, defines the types of infractions and the possible consequences. Students are urged to review this information.

In addition to adherence to the Honor Code, a student (graduate students in particular) who is completing a thesis, record of study, dissertation, and publication may fall under the additional federal requirements promulgated by the Office of Research Integrity (Scientific Misconduct Regulations – 42 CFR part 50), as well as Texas A&M System Regulations and Texas A&M University Rules (Texas A&M System Regulations – Ethics in Research and Scholarship – 15.99.03, and Texas A&M University rules and standard administrative procedures – Responsible Conduct in Research and Scholarship – 15.99.03.M1, 15.99.03.M1.01-06).

**University Student Rules**

Each student enrolled at Texas A&M University Qatar Campus is responsible for being fully acquainted with and complying with the Texas A&M University Student Rules. Specific rules, information and procedures may be found in publications pertaining to each particular service or department. Students are encouraged to reference the website at http://student-rules.tamu.edu for current published rules and regulations.

**For information concerning federal and state policies, please reference the appendices (p. 1219) in this catalog.**

**Chemical Engineering Program**

Chemical engineering is a broad field of engineering and thus requires a diverse preparation in science and engineering. Distinguishing chemical engineering from other engineering disciplines is its use of chemical and biochemical reactions to produce products and materials for society. Traditionally, chemical engineers have provided leadership in the petrochemical, refining, chemical, polymer and food processing industries. Because of strengths in the foundation sciences of mathematics, chemistry, physics and biology, as well as in engineering, this leadership role has now extended to the biochemical, biomedical, high-tech materials, semiconductor and microelectronics, nanotechnology, and environmental quality and safety industries, and a host of other areas. Chemical engineers have consistently commanded starting salaries among the highest of all college graduates because of the combined breadth and depth of their education.

**Program Mission**

- The mission of the Chemical Engineering Program (CHEN) at Texas A&M at Qatar is to meet the educational, research and service needs of the State of Qatar by the following:
- Chemical engineering at Texas A&M at Qatar will provide the best environment possible for students, staff and faculty to aspire to excellence and to develop to the maximum of their potential.
- Graduates will have the competencies to become leaders in the process industries, business, government and education.
- State-of-the-art facilities, equipment and tools will be provided for teaching and research. Members of the program will participate with the international community to help develop creative solutions to problems of national and international importance.

**Program Educational Objectives**

The objectives of the Chemical Engineering Program at Texas A&M at Qatar are:

1. Graduates will apply the foundation, depth and breadth of knowledge for successful chemical engineering careers in industry or government.
2. Graduates will apply effective communication, leadership and teaming skills.
3. Graduates will have a sense of responsibility, be ethical in the conduct of their profession, and have an appreciation for the impact of their profession on society.

The chemical engineering curriculum provides a balanced education in virtually all aspects of chemical engineering principles and practice, and includes education in economics, humanities and communication. Chemical engineering courses emphasize fundamentals and methods that are applicable to the analysis, development, design and operation of a wide variety of chemical engineering systems and processes, thereby providing the necessary background for entry into the wide array of activities described above. At the same time, specific example applications provide the student with insight into the ability of chemical
Chemical engineers are concerned with the application of knowledge gained from basic sciences and practical experience to the development, design, operation and management of plants and processes for economical and safe conversion of chemical raw materials to useful products. Because chemical engineering is the most broadly based of all engineering disciplines, the chemical engineer is in great demand in diverse technical and supervisory areas in a wide variety of industries and has consistently commanded one of the highest starting salaries of all college graduates.

In addition to dominating the extensive chemical, petroleum and petrochemical industries, for which Qatar and the rest of the Middle East are one of the world’s leading regions, chemical engineers are leaders in such areas as food and pharmaceutical processing, biochemical and biomedical engineering, pollution control and abatement, polymers and plastics, ceramics and other advanced materials, corrosion, automation and instrumentation, aerospace materials, computer technology and data processing, safety, environmental control, and many others.

University Core Curriculum (p. 22) 3

Semester Credit Hours 15
In support of the university mission, the mission of the Electrical and Computer Engineering Program is twofold:

- To provide quality education, well grounded in the fundamental principles of engineering, that prepares students for positions in industry, government and academia.
- To serve the industries and the governmental agencies in the State of Qatar through continuing education, outreach activities, consulting and research.

Program Educational Objectives

The program educational objectives of the Electrical and Computer Engineering Program are to:

1. Be competitive in the electrical engineering job market by holding positions of increasing responsibility in industry, business, government and/or educational institutions.
2. Demonstrate knowledge and communication skills through publication of papers, reports, patents and/or technical presentations at local, national and international meetings, or within the professional organization/company graduates are affiliated with.
3. Seek continuous improvement and professional development of technical skills, knowledge and understanding through continuing education, pursuit of advanced degrees, and/or pursuit of professional licenses in their chosen profession.
4. The extent to which the program is meeting these objectives is periodically assessed through such instruments as alumni surveys and employer/recruiter surveys. The goal is to continually improve the program’s ability to meet these educational objectives. The electrical engineering curriculum and individual course contents are periodically evaluated and adjusted in order to further support the ability to achieve the program objectives. The program welcomes comments and suggestions from any interested individuals regarding the above program objectives and/or how the program can better meet these objectives.

The undergraduate program in Electrical and Computer Engineering at Texas A&M University at Qatar is accredited by the Engineering Accreditation Commission of ABET, www.abet.org (http://www.abet.org).

Electrical and Computer Engineering Program

Almost any technology that distinguishes the 20th and 21st centuries from previous history has the imprint of electrical and computer engineering - electric power, radio, television, radar, satellite communication, global positioning system, medical diagnostic and procedure systems, sophisticated domestic appliances, cell phones, computers and sophisticated sensors and control systems used in underwater, space exploration and national security. Electrical and computer engineering has advanced national and global prosperity through research, development and application of electrical and computer technologies and sciences for the benefit of humanity, and has helped create the global village. By choosing electrical and computer engineering our graduates embark on an exciting and productive career with endless opportunities and help in shaping a better future for mankind.

Program Mission

Electrical Engineering - BS

Electrical engineering is a challenging but exciting and rewarding field of study. It is a rich and rapidly advancing field that plays a significant role in shaping all facets of modern society. This includes generating, transmitting and storing electrical energy; developing and utilizing wired and wireless technologies for broadband communications; controlling complex systems; and developing hardware and software systems that are at the core of most devices we interact with on a daily basis. The rapid industrialization and computerization of Qatar's economy are creating a need for highly skilled electrical and computer engineers who can plan, design, implement and manage this transformation. Studying electrical and computer engineering prepares students for playing key roles in shaping all facets of modern society.
roles in developing and managing the information, communication and electrical energy infrastructures of Qatar and the region.

The program curriculum is designed to prepare the graduate for work in the highly diverse electrical engineering profession. A solid foundation in physics, chemistry and mathematics is used to support courses in the fundamentals of electrical engineering.

The program leverages the integrated use of computers throughout the curriculum, while laboratory work allows students to learn and then apply basic concepts to a wide range of engineering problems. After their exposure to the most recent analytical techniques and technological developments, students will implement engineering concepts using state-of-the-art computers and laboratory equipment. Foundation studies in analog and digital circuits, signals and systems, electronics, electromagnetic fields, and computer architecture during the sophomore and junior years lead to three main elective tracks in the senior year, namely electric power systems and communication.

The electric energy systems track is designed to train students in the theory and techniques related to electromechanical energy conversion systems, electric power and power electronic systems. The communication track is designed to prepare students to address challenges in the area of digital and wireless communication systems. The computer engineering track is designed to enhance student knowledge and skills in developing and maintaining the hardware and software components of modern computer and communication systems. All tracks have similar requirements and provide a broad based and rigorous educational experience.

Visit the Electrical Engineering Program's website at www.qatar.tamu.edu/programs/ecen.

Program Requirements

The freshman year is identical for degrees in aerospace engineering, biomedical engineering, civil engineering, computer engineering, computer science, electrical engineering, electronic systems engineering technology, industrial distribution, industrial engineering, interdisciplinary engineering, manufacturing and mechanical engineering technology, mechanical engineering, multidisciplinary engineering technology, nuclear engineering, ocean engineering, and petroleum engineering. The freshman year is slightly different for chemical engineering in that students take CHEM 101/CHEM 111 or CHEM 107/CHEM 117 and CHEM 102/CHEM 112. Biomedical Engineering also requires a two semester sequence of chemistry courses consisting of CHEM 101/CHEM 111 or CHEM 107/CHEM 117 and CHEM 102/CHEM 112. Students pursuing degrees in biological and agricultural engineering should refer to the specific curriculum for this major. It is recognized that many students will change the sequence and number of courses taken in any semester. Deviations from the prescribed course sequence, however, should be made with care to ensure that prerequisites for all courses are met.

1. A grade of C or better is required.
2. Entering students will be given a math placement exam. Test results will be used in selecting the appropriate starting course which may be at a higher or lower level.
3. Of the 18 hours shown as University Core Curriculum electives, 3 must be from creative arts (for Industrial Distribution this is 3 hours from language, philosophy and culture, see IDIS curriculum for more information), 3 from social and behavioral sciences, 6 from American history, and 6 from government/political science. The required 6 hours from international and cultural diversity may be met by courses satisfying the creative arts, social and behavioral sciences (for Industrial Distribution this is language, philosophy and culture), and American history requirements if they are also on the approved list of international and cultural diversity courses.
4. BMEN and CHEN require 8 hours of freshman chemistry, which may be satisfied by CHEM 101/CHEM 111 or CHEM 107/CHEM 117 and CHEM 102/CHEM 112; Credit by Examination (CBE) for CHEM 101/CHEM 111 or CHEM 107/CHEM 117 plus CHEM 102/CHEM 112; or 8 hours of CBE for CHEM 101/CHEM 111 or CHEM 107/CHEM 117 and CHEM 102/CHEM 112.
The mission of the Mechanical Engineering Program is to serve the students of Texas A&M at Qatar and the State of Qatar by:

- Providing quality education, well grounded in the fundamental principles of engineering, to prepare students for leadership positions and successful careers in industry, government and academia.
- Extending the knowledge base of mechanical engineering to support the competitiveness of existing industry and to spawn new economic development in the State of Qatar and the region through active involvement in basic and applied research.
- Providing professional development opportunities for practicing engineers through continuing education, service and outreach activities.

**Program Educational Objectives**

The objectives of the Mechanical Engineering Program at Texas A&M at Qatar are to produce graduates who, a few years after leaving Texas A&M Qatar will:

1. Have broad engineering experience of increasing complexity to address the evolving needs of the private and public sectors in Qatar, the surrounding regions, and beyond.
2. Have leadership positions in their professional career.
3. Have met new challenges by engaging in professional development, further technical education and/or non-technical education.

The mechanical engineering curriculum at Texas A&M at Qatar requires students to develop and apply logical thinking, innovative approaches and ethical standards as a prerequisite for professional competence. The curriculum consists of basic theory courses complemented by laboratory experiences in science and mathematics, dynamic systems and controls, design, experimentation, fluid mechanics, heat transfer, manufacturing, and materials. Elective courses are offered in several specific areas of mechanical engineering including air conditioning, computer-aided design, control systems, corrosion, energy conversion, materials, mechanical design, plastics, mechatronics, failure, power generation, turbomachinery and others. The selection of elective courses is dictated by the interests and professional goals of the student, working with departmental advisors and within the curriculum guidelines.

Many students enhance their education by participating in professional internships, which offer opportunities for employment in engineering positions, while working toward a degree. Numerous study abroad programs are also available for gaining experience and perspectives in the international arena. Participation in student chapters of professional and honor societies provides leadership opportunities, collegial activities and learning experiences outside the classroom. Students may also participate in research projects through individually directed studies courses with a professor. The Mechanical Engineering Program culminates with a senior capstone design course sequence highlighted by real-life projects sponsored by various industries. Students benefit from the challenges and gratification that come through direct interaction with practicing engineers.

The undergraduate program in Mechanical Engineering at Texas A&M University at Qatar is accredited by the Engineering Accreditation Commission of ABET, www.abet.org (http://www.abet.org).

**Mechanical Engineering Program**

**Overview**

Mechanical engineering is a highly diversified profession. The mechanical engineer designs machines, devices, various products and control systems, and works with the generation, conversion, transmission and utilization of mechanical and thermal power. Assignments often include analysis and synthesis of mechanical, thermal and fluid systems. Mechanical engineers are also responsible for characterization, specification and analysis of materials used in design and manufacturing. Manufacturing systems, robotics, electromechanical devices and control systems are also the purview of the mechanical engineer. Graduates in mechanical engineering are among the most versatile engineers and enjoy professional employment in industry, government, consulting and research organizations.

The work of mechanical engineers varies from general engineering to numerous narrow specialties, as required by the wide variety of employers. A general list, though not in any way exhaustive, of the areas of professional employment opportunities available to mechanical engineers includes design, construction, controls, materials specification and evaluation, thermal systems analysis, fluid and solid mechanics, manufacturing, plant engineering, research and development, and technical sales. Many mechanical engineers are promoted to management and administrative positions as well.

**Program Mission**

The mission of the Mechanical Engineering Program is to serve the students of Texas A&M at Qatar and the State of Qatar by:

- Providing quality education, well grounded in the fundamental principles of engineering, to prepare students for leadership positions and successful careers in industry, government and academia.
- Extending the knowledge base of mechanical engineering to support the competitiveness of existing industry and to spawn new economic development in the State of Qatar and the region through active involvement in basic and applied research.
- Providing professional development opportunities for practicing engineers through continuing education, service and outreach activities.

**Program Educational Objectives**

The objectives of the Mechanical Engineering Program at Texas A&M at Qatar are to produce graduates who, a few years after leaving Texas A&M Qatar will:

1. Have broad engineering experience of increasing complexity to address the evolving needs of the private and public sectors in Qatar, the surrounding regions, and beyond.

- Analysis, Design and Management of Energy Conversion Systems Minor (p. 432)
• Control of Mechanical Systems Minor (p. 433)
• Design and Simulation of Mechanical Systems Minor (p. 433)

Mechanical Engineering - BS

Mechanical engineering (MEEN) at Texas A&M at Qatar challenges students and helps them to develop their full creative potential. Texas A&M at Qatar's program consists of three main areas: thermal-fluid sciences, systems and controls, and mechanics and materials. The courses taken in these areas enable students to develop the technical tools and skills required for enhancing design development. The education is broad and supports students being able to choose a variety of employment or further study opportunities.

Texas A&M at Qatar received ABET accreditation in the fall of 2008. According to ABET, an engineering education accreditation organization, mechanical engineers apply principles of engineering, basic science and mathematics to model, analyze, design and realize physical systems, components or processes and work professionally in both thermal and mechanical systems. Mechanical engineering is a diversified profession because all industries, including oil and gas industries, chemical industries, and built environment, need mechanical engineers for designing, maintaining, testing and managing operations. In addition to industry, mechanical engineers may work for governmental and consulting organizations, and mechanical engineers may continue their studies and earn graduate degrees in MEEN or other disciplines.

For more information, visit the Mechanical Engineering Program's website at www.qatar.tamu.edu/programs/mechanical-engineering.

study of:

Petroleum engineering is primarily concerned with the safe and economic extraction of oil, gas and other natural resources from the earth. This is accomplished through the design, drilling and operation of wells and well systems, and the integrated management of the underground reservoirs in which the resources are found.

Program Mission
The mission of the Petroleum Engineering Program at Texas A&M at Qatar is to create, preserve, integrate, transfer and apply petroleum engineering knowledge, and to produce capable future engineers and enhance the capabilities of current practitioners. The curriculum includes study of:

- Design and analysis of well systems and procedures for drilling and completing wells.
- Characterization and evaluation of subsurface geological formations and their resources.
- Design and analysis of systems for producing, injecting and handling fluids.
- Application of reservoir engineering principles and practices for optimizing resource development and management.
- Use of project economics and resource valuation methods for design and decision making under conditions of risk and uncertainty.

There is a heavy emphasis on mathematics, computer applications, communication skills and interdisciplinary problem solving. The department encourages its students to work as interns during the summer months. A minimum of six weeks of approved experience is required for graduation.

Program Educational Objectives
The program educational objectives of the Petroleum Engineering Program are to produce graduates who will:

1. Have the technical depth and breadth to enable them to be effective professionals early in their career.
2. Have the knowledge together with relevant communication and interpersonal skills to position them for successful careers as practicing engineers and prospective leaders.

The undergraduate program in Petroleum Engineering at Texas A&M University is accredited by the Engineering Accreditation Commission of ABET, www.abet.org.

Majors
- Bachelor of Science in Petroleum Engineering (p. 787)

Minors
- Petroleum Engineering Minor (p. 443)

Petroleum Engineering - BS
Petroleum engineering is primarily concerned with the economic extraction of oil, gas and other natural resources from the earth. This is accomplished through the design, drilling and operation of wells and well systems, and the integrated management of the underground reservoirs in which the resources are found.

Petroleum engineering graduates have a variety of careers in the upstream oil and gas industry open to them. They include working as geoscientist, petrophysicist, drilling, production or reservoir engineers. Their activities include quantifying oil and gas reserves, well construction, well performance evaluation, reservoir modeling, and optimized production planning.

Texas A&M at Qatar's petroleum engineering students are prepared for the workplace through participation in research on topics such as reservoir simulation and flow correlations for pipelines. Fourth-year students complete a senior design project in which they develop a detailed reservoir model and make a recommendation for optimized reservoir development. They present their findings to industry people.

Petroleum engineering faculty members contribute to the local industry and community. They develop research projects that directly improve
production and recovery from local industry reservoirs, a major source of the State of Qatar’s gross domestic product, and provide continuing education courses and expertise to local industry. Student participation in research further develops the State of Qatar’s human capital.

Visit the Petroleum Engineering Program’s website at www.qatar.tamu.edu/programs/petroleum-engineering.

Program Requirements

The freshman year is identical for degrees in aerospace engineering, biomedical engineering, civil engineering, computer engineering, computer science, electrical engineering, electronic systems engineering technology, industrial distribution, industrial engineering, interdisciplinary engineering, manufacturing and mechanical engineering technology, mechanical engineering, multidisciplinary engineering technology, nuclear engineering, ocean engineering, and petroleum engineering. The freshman year is slightly different for chemical engineering in that students take CHEM 101/CHEM 111 or CHEM 107/CHEM 117 and CHEM 102/CHEM 112. Biomedical Engineering also requires a two semester sequence of chemistry courses consisting of CHEM 101/CHEM 111 or CHEM 107/CHEM 117 and CHEM 102/CHEM 112. Students pursuing degrees in biological and agricultural engineering should refer to the specific curriculum for this major. It is recognized that many students will change the sequence and number of courses taken in any semester. Deviations from the prescribed course sequence, however, should be made with care to ensure that prerequisites for all courses are met.

Supporting Academic Programs

Overview

The Texas A&M Core Curriculum, in compliance with the Texas Core Curriculum, provides students with a foundation of knowledge of human cultures and the physical and natural world, develops principles of personal and social responsibility for living in a diverse world, and advances intellectual and practical skills that are essential for all learning. In support of the Core Curriculum, the supporting academic programs enhance the individual degree programs and university graduation requirements.

The core curriculum focuses on the development of six skills that have been shown to be effective in preparing students for the job market and their role in a diverse world and democratic society.

- Critical Thinking Skills – to include creative thinking, innovation, inquiry, and analysis, evaluation and synthesis of information.
- Communication Skills – to include effective development, interpretation and expression of ideas through written, oral and visual communication.
- Empirical and Quantitative Skills – to include the manipulation and analysis of numerical data or observable facts resulting in informed conclusions.
- Teamwork – to include the ability to consider different points of view and to work effectively with others to support a shared purpose or goal.
- Personal Responsibility – to include the ability to connect choices, actions and consequences to ethical decision-making.
- Social Responsibility – to include intercultural competence, knowledge of civic responsibility, and the ability to engage effectively in regional, national, and global communities.

For additional information, please reference http://core.tamu.edu.

Geosciences

College of Geosciences

Students at Texas A&M at Qatar will have the opportunity to take courses in two areas within the College of Geosciences. Geology, the major focus, deals with the processes and forces acting at the surface and within the earth; with the materials of the earth, its forms and structures; and with the history of its development and the evolution of life on its surface and in its waters. Geophysics may also be offered. This deals primarily with the physics of the solid earth, from the measurement and understanding of its internal structure and physical properties, to plate motions and their effect on continents and ocean basins, to detection of its natural resources through remote sensing.

Liberal Arts

College of Liberal Arts

Examples of history show us that a liberal arts education is the foundation of a strong and progressive society. The Liberal Arts Program offers students an opportunity to explore the intellectual achievements of humankind through a disciplined and responsible study of issues that have been of enduring importance to people. Thus, courses in liberal arts help students develop sensitivity to the questions and values that confront them in their daily lives. At the same time, skills are built that can be put to use in solving complex problems. One of the program's principal objectives is to achieve the hallmark of an educated person: a fundamental knowledge of the forces that have shaped and continue to direct our cultural identities.

Science

College of Science

Chemistry

An understanding of chemistry is critical to an understanding of life and its associated activities. Chemistry and chemical principles profoundly influence the way we live, communicate and interact with one another, so it is little wonder that a strong background in chemistry provides a solid foundation for a variety of careers of major importance in the 21st century. Chemistry is uniquely positioned at the crossroads between the biological and physical sciences. By exploiting their understanding of both realms, chemists and other professionals with strong backgrounds in chemistry have made, and continue to make, major contributions to improve the human condition. Major technological and biological discoveries almost always depend on a fundamental understanding of chemistry, and the pursuit of these discoveries, as a way to improve the world in which we live, drives those who seek to be a part of the process.

The Chemistry Program at Texas A&M at Qatar offers course work and research in various areas of chemistry, organized into a program leading to a minor degree in chemistry.

Mathematics

A comprehensive understanding of mathematics is a key foundation to engineering. The Texas A&M at Qatar mathematics curriculum is structured to teach mathematical concepts that enhance students' analytical abilities and to use quantitative mathematical tools and apply them to problems in engineering. Students will learn coordinate systems, vectors, analytical geometry, functions, differentiation and integration techniques, computer algebra systems (Maple and Matlab), multiple integration techniques, gradients, line and surface integrals,
Stokes’ theorems, differential equations, matrices, determinants, and topics in applied mathematics, such as Fourier series and wavelets with application to data compression and signal processing.

**Physics**

Physics is the science that investigates and tries to understand the basic laws of nature. In this pursuit, it deals with the entire range of natural phenomena, from the smallest domain of subnuclear particles to the largest domain of distant objects in the universe.

This breadth of interests is reflected in the type of work pursued by physicists. Some physicists are interested in research on problems that are at the frontiers of knowledge. Some apply this newly acquired knowledge to make practical advances. Still others use knowledge of physics as a basis for careers in teaching or administration.
All undergraduate courses offered in the University are described on each subject page. The course numbering scheme is as follows: 100–199, primarily open to freshmen; 200–299, primarily open to sophomores; 300–399, primarily open to juniors; and 400–499, primarily open to seniors.

Figures in parenthesis before the course description indicate the Texas Common Course Number(s). Those figures identified with an asterisk should reference the Texas Common Course Numbering System (p. 1225) in this catalog for additional information.

The unit of credit is the semester hour, which involves one hour of theory or from two to four hours of practice per week for one semester of 15 weeks. Figures following the credit hours indicate the clock hours per week devoted to theory and practice, respectively. Theory includes recitations and lectures; practice includes work done in the laboratory, shop, drawing room, field or other. When courses are cross-listed, credit cannot be received for both courses. Any course may be withdrawn from the session offerings in case the number of registrations is too small to justify offering the course.

Field trips may be required for which departmental fees may be assessed to cover costs.

### AALO - Arabic & Asian Language (AALO)

- **AALO 285 Directed Studies**  
  Credits 1 to 4. 1 to 4 Other Hours.  
  Individual supervision of readings or assigned projects in an Asian Language, selected for each student individually; written or oral reports.  
  **Prerequisite:** Approval of Arabic and Asian Language Office Director.

- **AALO 289 Special Topics in...**  
  Credits 1 to 4. 1 to 4 Lecture Hours. 0 to 4 Lab Hours.  
  Selected topics in an identified area of an Asian language. May be repeated for credit.  
  **Prerequisite:** Approval of Arabic and Asian Language Office Director.

- **AALO 485 Directed Studies**  
  Credits 1 to 4. 1 to 4 Other Hours.  
  Individual supervision of readings or assigned projects selected for each student individually; written or oral reports.  
  **Prerequisite:** Approval of Arabic and Asian Language Office Director.

- **AALO 489 Special Topics in...**  
  Credits 1 to 4. 1 to 4 Lecture Hours. 0 to 4 Lab Hours.  
  Selected topics in an identified area of an Asian language. May be repeated for credit.  
  **Prerequisite:** Approval of Arabic and Asian Language Office Director.

### ACCT - Accounting (ACCT)

- **ACCT 209 Survey of Accounting Principles**  
  Credits 3. 3 Lecture Hours.  
  Accounting survey for non-business majors; non-technical accounting procedures, preparation and interpretation of financial statements and internal control. May not be used to satisfy degree requirements for majors in business. Business majors who choose to take this course must do so on a satisfactory/unsatisfactory basis.

- **ACCT 210 Survey of Managerial and Cost Accounting Principles**  
  Credits 3. 3 Lecture Hours.  
  A survey of managerial and cost accounting for non-business majors; accounting responsibility of the manager, job and process cost systems, budgeting, cost-volume-profit analysis for decision-making. May not be used to satisfy degree requirements for majors in business. Business majors who choose to take this course must do so on a satisfactory/unsatisfactory basis.  
  **Prerequisite:** ACCT 209.

- **ACCT 229 Introductory Accounting**  
  Credits 3. 3 Lecture Hours.  
  (ACCT 2301, 2401) Introductory Accounting. Analysis, recording and reporting of business transactions; partnership and corporation accounting; analysis and use of financial statements.  
  **Prerequisite:** Sophomore classification.

- **ACCT 230 Introductory Accounting**  
  Credits 3. 3 Lecture Hours.  
  (ACCT 2302, 2402) Introductory Accounting. Continuation of ACCT 229. Use of budgets; introduction to cost accounting; cost control techniques and methods of measuring performance.  
  **Prerequisites:** ACCT 229 and sophomore classification.

- **ACCT 315 Intermediate Accounting for Non-Accounting Majors I**  
  Credits 3. 3 Lecture Hours.  
  Revenue recognition, principles of asset valuation, and disclosure requirements for corporations; interpretation of financial statements, rather than their preparation. May not be used as a directed or free elective for accounting majors and does not count towards the accounting requirement for the CPA exam.  
  **Prerequisite:** ACCT 230 and admission to upper division in Mays Business School.

- **ACCT 316 Intermediate Accounting for Non-Accounting Majors II**  
  Credits 3. 3 Lecture Hours.  
  Includes the measurement and disclosure requirements for liabilities and stockholders’ equity, SEC registration statements, and cash flow reporting; focus on the analysis and interpretation of financial statements rather than their preparation. Does not qualify as a directed or free elective for accounting majors and does not count towards the accounting requirement for the CPA exam.  
  **Prerequisite:** ACCT 315 or ACCT 327.

- **ACCT 320 Accounting Communications**  
  Credits 3. 3 Lecture Hours.  
  Development of oral and written communication skills necessary for successful careers in public and corporate accounting.  
  **Prerequisite:** Admission to Professional Program.

- **ACCT 321 Professional Development Seminar**  
  Credits 2. 2 Lecture Hours.  
  Exposure to professional issues of professional accounting practice using a workshop format.  
  **Prerequisite:** Admission to Professional Program.

- **ACCT 322 Professional Development Seminar – BBA**  
  Credit 1. 1 Lecture Hour.  
  Exposure to professional issues in the practice of accounting, including potential careers and employers.  
  **Prerequisite:** ACCT 327 with a grade of C or better.
ACCT 327 Financial Reporting I
Credits 3. 3 Lecture Hours.
Study of theoretical basis for financial accounting concepts and principles related to financial reporting; emphasizing income measurement and accounting for assets. BBA accounting majors must earn a minimum grade of C for graduation.
Prerequisite: ACCT 230 and admission to upper division in Mays Business School.

ACCT 328 Financial Reporting II
Credits 3. 3 Lecture Hours.
Continued study of accounting concepts and principles related to reporting long-debt and owners' equity; including reporting issues of leases, retirement benefits, income taxes and international accounting standards.
Prerequisite: ACCT 327 with a grade of C or better.

ACCT 329 Cost Management and Analysis
Credits 3. 3 Lecture Hours.
Theory, concepts and methods relating to use of information and design of systems to aid managers in planning, controlling, decision making, evaluating performance and reporting financial results.
Prerequisite: ACCT 315 or ACCT 327 with a grade of C or better.

ACCT 403 Energy Accounting
Credits 3. 3 Lecture Hours.
Overview of the oil and gas industry and specialized financial accounting procedures associated with the industry; emphasis on accounting for exploration, development, production, depletion and amortization, joint operations, asset impairment and retirement obligation; includes reserve accounting/disclosure related to the above topics.
Prerequisite: ACCT 327 with C or better.

ACCT 405 Income Tax
Credits 3. 3 Lecture Hours.
Introduction to federal income tax legislation pertaining primarily to corporations and individuals.
Prerequisite: ACCT 327 with a grade of C or better.

ACCT 407 Auditing
Credits 3. 3 Lecture Hours.
Introduction to auditing theory and procedures pertaining to financial statements, in the context of both external auditing, by certified public accountants, and internal auditing; preparation of working papers.
Prerequisite: ACCT 327 with a grade of C or better.

ACCT 408 Internal Auditing
Credits 3. 3 Lecture Hours.
Reading and evaluation of current theory and procedures used by internal auditors; selected case studies; statistical methods of forming auditing judgment.
Prerequisite: ACCT 327 with a grade of C or better.

ACCT 410 Fraud Examination
Credits 3. 3 Lecture Hours.
Principles and methodologies of detecting and deterring fraud using accounting, auditing, and investigative skills; includes skimming, larceny, misappropriations, fraudulent statements, interviewing witnesses and support for litigation.
Prerequisites: ACCT 327 with a grade of C or better; junior or senior classification.

ACCT 421 Critical Communication Skills for Accountants
Credits 2. 2 Lecture Hours.
Development of oral and written communication skills necessary for successful careers in public and corporate accounting.
Prerequisite: ACCT 327 with a grade of C or better.

ACCT 425 Corporate Tax Planning
Credits 3. 3 Lecture Hours.
Integration of tax regulations into overall corporate finance planning and decision making cycle.
Prerequisite: ACCT 405.

ACCT 426 Taxation of Low-Income Filers
Credits 3. 3 Lecture Hours.
Overview of the Federal income tax and its impact on low-income filers; includes socio-economic forces impacting low-income families and individuals; topics explored through community service and academic learning.
Prerequisites: Admission to upper division in Mays Business School and approval of instructor.

ACCT 427 Accounting and Financial Information Systems
Credits 3. 3 Lecture Hours.
Overall data flow systems emphasizing financial data and computerized systems, for accounting majors; flow and logic concepts, developing meaningful control concepts and data reporting techniques.
Prerequisite: ACCT 327 with a grade of C or better.

ACCT 430/IBUS 430 Global Immersion in Accounting
Credits 3. 3 Lecture Hours.
Combination of classroom work in the spring and a field trip to the selected country in summer; introduction to international opportunities within the public accounting firms; meet with former students to gain a local and corporate view of business in the selected country.
Prerequisites: ACCT 327 and approval of instructor.
Cross Listing: IBUS 430/ACCT 430.

ACCT 445/IBUS 445 International Accounting
Credits 3. 3 Lecture Hours.
Introduction and examination of accounting issues unique to multinational enterprises and international business activity.
Prerequisites: ACCT 315 or ACCT 327; FINC 341.

ACCT 447/FINC 447 Financial Statement Analysis
Credits 3. 3 Lecture Hours.
Development of an analytical approach to financial statements, integrating relevant finance and accounting concepts and principles; current topics in financial analysis.
Prerequisites: ACCT 315 or ACCT 327; FINC 341 with a grade of C or better.
Cross Listing: FINC 447/ACCT 447.

ACCT 450 Accounting Ethics
Credits 3. 3 Lecture Hours.
Integration of ethical reasoning, objectivity, independence and other core values into the development of a professional accountant; critical analysis of ethical lapses which have occurred in business and the accounting profession; exploring ways to integrate ethical behavior into professional life.
Prerequisites: ACCT 328; junior or senior classification.
ACCT 484 Accounting Internship
Credits 3. 6 Other Hours.
A practicum in accounting under the supervision of accounting practitioners; one semester program for each student participant. Free elective only and must be taken on a satisfactory/unsatisfactory basis.
Prerequisites: Accounting major and approval of department head.

ACCT 485 Directed Studies
Credits 1 to 3. 1 to 3 Other Hours.
Directed study of selected problems in the area of accounting not covered in other courses.
Prerequisites: Accounting major and approval of department head.

ACCT 489 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Selected topics in an identified area of accounting. May be repeated for credit.
Prerequisites: Admission to upper division in Mays Business School and approval of instructor.

ACCT 491 Research
Credits 1 to 4. 1 to 4 Lecture Hours.
Research conducted under the direction of an accounting faculty member in Mays Business School or a faculty member in the Office of Undergraduate Research. May be repeated one time for credit.
Prerequisites: Junior or senior classification and approval of instructor.

AERO - Aerospace Engineering (AERO)

AERO 101 Introduction to Aerospace Engineering
Credit 1. 1 Lecture Hour.
Overview of aerospace engineering and the aerospace industry, including requirements and assignments of an aerospace engineer, vehicle configurations and missions, aerodynamics, structures and materials, dynamics and control, simulation and testing, and aerospace engineering in the future.
Prerequisites: ENGR 111, MATH 151, PHYS 218, or registration therein.

AERO 201 Introduction to Flight
Credits 3. 3 Lecture Hours. 1 Lab Hour.
Standard atmosphere; basic aerodynamic theory; isentropic flow; airfoil and wing descriptions; distributed load systems; static equilibrium; free body diagrams; wing structures; elementary aerospace vehicle performance; aircraft stability and control; experiential introduction to aerospace engineering.
Prerequisites: Admitted to major degree sequence in aerospace engineering; grade of C or better in ENGR 102 or ENGR 111, MATH 151, MATH 152, and PHYS 206; grade of C or better in ENGR 216/PHYS 216, PHYS 216/ENGR 216, or PHYS 218; grade of C or better in MATH 251 or MATH 253 or concurrent enrollment; AERO majors only.

AERO 202 Introduction to Flight Mechanics
Credit 1. 1 Lecture Hour.
Introductory material in aerospace engineering; development of standard atmosphere; aerodynamic theory; airfoil and wing descriptions; aircraft performance.
Prerequisites: Admitted to major degree sequence in aerospace engineering; MEEN 221 or equivalent; MATH 251 or MATH 253 or concurrent enrollment.

AERO 210 Introduction to Aerospace Mechanics
Credits 3. 3 Lecture Hours. 1 Lab Hour.
Planar kinematics; fundamentals of Newtonian mechanics; system of particles and rigid bodies; the effect of friction forces on motion and static equilibrium; rectilinear and curvilinear motion of particles; translational momentum; moments of inertia; angular momentum; planar motion of rigid bodies; impact dynamics; situations involving variable mass; introduction to orbital mechanics.
Prerequisites: Grade of C or better AERO 201; grade of C or better in MATH 308 or registration therein.

AERO 212 Introduction to Aerothermodynamics
Credits 3. 3 Lecture Hours. 1 Lab Hour.
Study of thermodynamic properties and processes, heat and work, first and second laws of thermodynamics, power and refrigeration ideal cycles, psychrometrics.
Prerequisites: Grade of C or better in CHEM 107 and CHEM 117; grade of C or better in MATH 251, or concurrent enrollment; AERO majors.

AERO 214 Introduction to Aerospace Mechanics of Materials
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Fundamental concepts for deformable bodies (conservation of linear and angular momentum, kinematics and thermoelasticity); notions of stress and strain and illustrative examples for engineering applications; introduction to experimental methods and reporting, instrumentation and uncertainty analysis; measurement of elastic and thermal material properties.
Prerequisites: Grade of C or better in AERO 201; grade of C or better in MATH 308, or concurrent enrollment.

AERO 222 Introduction to Aerospace Computation
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Review of basic skills required for developing computer programs and introduction to more advanced concepts in scientific computing to solve aerospace engineering problems; numerical and analytical methods of solving engineering problems involving interpolation and extrapolation; function approximation; numerical differentiation; integration; solutions to linear and non-linear equations and systems of equations; eigenvalues and eigenvectors, numerical integration of differential equations with aerospace engineering applications.
Prerequisites: Admitted to major degree sequence in aerospace engineering; grade of C or better in ENGR 102; grade of C or better in MATH 308 or concurrent enrollment.

AERO 289 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours. 0 to 4 Lab Hours.
Selected topics in an identified area of aerospace engineering. May be repeated for credit.
Prerequisite: Approval of instructor.

AERO 291 Research
Credits 0 to 4. 0 to 4 Other Hours.
Research conducted under the direction of faculty member in aerospace engineering. May be taken three times.
Prerequisites: Freshman or sophomore classification and approval of instructor.

AERO 299 Mid-Curriculum Professional Development
Credits 0. 0 Other Hours.
Participation in an approved high-impact learning practice; reflection on professional outcomes from engineering body of knowledge; documentation and self-assessment of learning experience at mid-curriculum point.
AERO 301 Theoretical Aerodynamics
Credits 3. 3 Lecture Hours.
Fundamentals of incompressible flow, conservation principles, continuity, momentum, rotationality, circulation, lift, drag, potential flow, thin airfoil theory, panel methods, airfoil design, high lift devices, finite wing theory, vortex lattice methods, and wing design.
Prerequisites: Grade of C or better in AERO 201, AERO 212, and MATH 308; grade of C or better in AERO 222 or concurrent enrollment.

AERO 303 High Speed Aerodynamics
Credits 3. 3 Lecture Hours.
Fundamentals of compressible flow, acoustic waves, shock and expansion waves, shock-expansion theory, supersonic airfoil design, small perturbation theory, conical flow theory, supersonic wing panel methods, supersonic wing design, similarity theory, cone flow, unsteady waves, and theory of characteristics.
Prerequisite: Grade of C or better in AERO 301.

AERO 304 Aerospace Structural Analysis I
Credits 3. 3 Lecture Hours.
Structural design considerations; mechanics of structures; introduction to elasticity; constitution of materials; analysis of typical aerospace structures in bending, extension, torsion and shear.
Prerequisites: Grade of C or better in AERO 214 and MATH 308; grade of C or better in AERO 222 or concurrent enrollment.

AERO 306 Aerospace Structural Analysis II
Credits 3. 3 Lecture Hours.
Work and energy principles; analysis of indeterminate structures by classical virtual work and finite elements; introduction to elastic stability of columns; application of energy methods to determine stresses, strains and displacements in typical aerospace structures; design considerations in aerospace structures.
Prerequisite: Grade of C or better in AERO 304.

AERO 307 Aerospace Engineering Laboratory
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Intermediate and advanced topics in instrumentation, signal conditioning, data acquisition analysis for aerospace-related measurements; emphasis on technical reporting and data presentation; measurements of materials strain, deformation, pressure, velocity and aerodynamic forces; experimental investigations of static and dynamic response of structures; use of nonintrusive optical techniques; uncertainty analysis; linear regression, Fourier transform and power spectra; tests for statistical significance.
Prerequisites: Grade of C or better in ENGL 103 or ENGL 104; grade of C or better in AERO 222, AERO 301, AERO 304, AERO 310, ECEN 215, or concurrent enrollment.

AERO 310 Aerospace Dynamics
Credits 3. 3 Lecture Hours.
Spatial kinematics; general motion of particles; Euler angles; Newton-Euler methods for translation and rotation of rigid bodies; work-energy and impulse momentum principles applied to aerospace systems; Linear theory of free and forced vibrations and dynamic response of single and multi-degree of freedom systems; frequency response of first and second order systems with instrumentation applications.
Prerequisites: Grade of C or better in AERO 210 and MATH 308; grade of C or better in AERO 222 or concurrent enrollment.

AERO 321 Dynamics of Aerospace Vehicles
Credits 3. 3 Lecture Hours.
Derivation of the nonlinear flight dynamics equations; linearization; aircraft static stability and control; longitudinal and lateral dynamic stability; development of state-space models; stability derivatives; longitudinal and lateral modes and transfer functions; flying qualities; elements of configuration design; response to control inputs.
Prerequisites: Grade of C or better in AERO 301 and AERO 310.

AERO 351 Aerothermodynamics and Propulsion
Credits 3. 3 Lecture Hours.
Aerothermodynamics of gases; laws of thermodynamics; equilibrium conditions; mixtures of gases; combustion and thermochemistry; compressible internal flows with friction, heat transfer and shock; turbojet cycle analysis and performance; chemical rockets.
Prerequisite: Grade of C or better in AERO 303 or concurrent enrollment.

AERO 401 Aerospace Vehicle Design I
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Aerodynamic design, specification, arrangement, performance analysis, weight and balance, stability.
Prerequisites: Grade of C or better in AERO 303, AERO 306, AERO 321, and AERO 351; grade of C or better in AERO 307 or concurrent enrollment.

AERO 402 Aerospace Vehicle Design II
Credits 2. 6 Lab Hours.
Continuation of AERO 401. System optimization by examination and analysis of necessary trade-offs.
Prerequisite: Grade of C or better in AERO 401.

AERO 404 Mechanics of Advanced Aerospace Structures
Credits 3. 3 Lecture Hours.
Advanced analysis techniques for aerospace structures; material anisotropy, plasticity, fatigue and fracture; laminated materials; solution of plane elasticity, plate and multi-component structural configurations; buckling of beams and plates; application of finite element analysis.
Prerequisites: Grade of C or better in AERO 304 and junior or senior classification.

AERO 405 Aerospace Structural Design
Credits 3. 3 Lecture Hours.
Overall structural integrity of complete aerospace systems; structures subjected to critical loads; design considerations in aerospace structures.
Prerequisite: Grade of C or better in AERO 306.

AERO 406 Polymer Nanocomposites and their Applications
Credits 3. 3 Lecture Hours.
Recent advances and methodologies in processing and characterization of nanostructured polymers and nanocomposites, as well as their commercial applications; investigate polymers filled with nanometer-size inclusions, including nanoparticles, nanotubes, nanofibers, and nanoclays; macroscale, microscale and nanoscale characterizations investigated in relation to properties of interest.
Prerequisites: Grade of C or better in AERO 413.

AERO 411 Applications of Fracture Mechanics to Aerospace Structures
Credits 3. 3 Lecture Hours.
Foundations of linear elastic fracture mechanics of aerospace structure; calculation of stress intensity factors and energy release rates; crack growth under fatigue loading; ASTM standards for fracture testing; the role of fracture mechanics in the analysis and design of aerospace structures.
Prerequisite: AERO 304 or equivalent with a grade of C or better.
AERO 413 Aerospace Materials Science  
Credits 3. 3 Lecture Hours. 
Relationship between aerospace engineering material properties and microstructure; mechanical and thermal properties; environmental degradation; mechanical failure.  
Prerequisite: Grade of C or better in AERO 304. 

AERO 417 Aerospace Propulsion  
Credits 3. 3 Lecture Hours. 
Air breathing propulsion; design and analysis of inlets, compressors, combustors, turbines and nozzles; application to aeronautical and ground transportation.  
Prerequisite: Grade of C or better in AERO 301. 

AERO 419 Chemical Rocket Propulsion  
Credits 3. 3 Lecture Hours. 
Nozzles and heat transfer in rockets, liquid and solid propellant systems; combustion and combustion stability; flight performance including trajectories, multistaging and exchange rate curves; rocket testing.  
Prerequisite: Grade of C or better in AERO 301. 

AERO 420 Aerelasticity  
Credits 3. 3 Lecture Hours. 
Classical analysis of fundamental aeroelastic phenomena with application to aerospace vehicles; flutter, divergence, control effectiveness.  
Prerequisites: Grade of C or better in AERO 303, AERO 306, AERO 310. 

AERO 422 Active Controls for Aerospace Vehicles  
Credits 3. 3 Lecture Hours. 
Introduction to the Theory of Automatic Control specifically applied to aerospace vehicles; techniques for analysis and synthesis of linear control systems, stability criteria, systems response and performance criteria; design studies of active controls to improve aerospace vehicle performance.  
Prerequisite: Grade of C or better in AERO 312. 

AERO 423 Orbital Mechanics  
Credits 3. 3 Lecture Hours. 
Rocket fundamentals; trajectories including aerodynamics, gravity turn and trajectory optimization, orbital mechanics, orbit lifetimes, three-body problem, orbit perturbations.  
Prerequisite: Grade of C or better in AERO 310. 

AERO 424 Spacecraft Attitude Dynamics and Control  
Credits 3. 3 Lecture Hours. 
Introduces fundamental concepts of satellite attitude dynamics and control; includes derivations of environmental disturbances due to gravity gradient, aerodynamic, and solar radiation pressure; includes treatments of attitude control subsystems, such as thrusters, reaction wheels, CMGs, and magnetic torquers, and their designs.  
Prerequisites: Grade of C or better in AERO 321. 

AERO 425 Flight Test Engineering  
Credits 3. 2 Lecture Hours. 3 Lab Hours. 
Application of performance and stability and control theory to flight test measurements; standard atmosphere and airspeed equations for pilot-static system calibrations; flight test methods for evaluating performance, stability and control, and stall-spin characteristics; laboratory practice in planning and conducting small flight test project.  
Prerequisite: Grade of C or better in AERO 321. 

AERO 426 Space System Design  
Credits 3. 3 Lecture Hours. 
Introduces prevailing practices and processes used in modern space system design; applies knowledge in component engineering disciplines to a design challenge of interest to NASA or DoD; utilizes instruction in systematic methods of design and on dynamics of teamwork; when possible concludes with detailed design using an engineering design facility.  
Prerequisites: Grade of C or better in AERO 306, AERO 321, AERO 351. 

AERO 428 Electromagnetic Sensing for Space-Borne Imaging  
Credits 3. 3 Lecture Hours. 
Study IR and Visible range imaging systems to obtain high resolution imaging of objects from space; this area has numerous applications and areas of advanced development; following instruction in needed background on optics, telescopes, and interferometry, perform preliminary design of imaging system with a different imaging design offered each year.  
Prerequisites: Grade of C or better in AERO 306, AERO 321, AERO 310. 

AERO 430 Numerical Simulation  
Credits 3. 3 Lecture Hours. 
Numerical and analytical simulation of physical problems in sciences and engineering using applied methods; developing and using numerical techniques for physical problems described by nonlinear algebraic equations, ordinary and partial differential equations.  
Prerequisite: Grade of C or better in AERO 220 or MATH 417. 

AERO 435 Aerothermochemistry  
Credits 3. 3 Lecture Hours. 
Composition of chemically reacting gases (air and propellant); thermodynamic functions based on classical and quantum mechanical theories; calculation of gas temperatures; equilibrium, frozen and non-equilibrium flows through nozzles and shock waves.  
Prerequisite: Grade of C or better in AERO 303. 

AERO 440 Cockpit Systems and Displays  
Credits 3. 3 Lecture Hours. 
Design, development, and implementation of cockpit systems and multifunction displays; cockpit system requirements and specifications; human-machine interfaces, Flight Management Systems, navigation and guidance systems; 3-D real-time displays of weather, traffic, and terrain; characteristics and missions of air vehicles; project design and cost analysis.  
Prerequisite: Grade of C or better in AERO 321 or junior or senior classification in computer science. 

AERO 445 Vehicle Management Systems  
Credits 3. 3 Lecture Hours. 
Introduction to vehicle management systems for manned and unmanned air and space vehicles; system centric concepts, requirements definition, specifications, and architectures; reliability analysis, health monitoring, and mission management; SISO digital design of integrated flight control, propulsion control and structural control; introduction to vehicle autonomy; design and analysis methods, industrial examples.  
Prerequisite: Grade of C or better in AERO 422.
AERO 451 Human Spaceflight Operations  
Credits 3. 3 Lecture Hours.  
Essential aspects of human spaceflight operations as performed by NASA; in-depth understanding of the state-of-the-art in spacecraft operations, including spacecraft systems, ground and launch operations, mission management and on-orbit activities such as science, robotics, spacewalking and human health maintenance; applications to future space systems.  
Prerequisite: Grade of C or better in AERO 310 or equivalent; senior classification.

AERO 452 Heat Transfer and Viscous Flows  
Credits 3. 3 Lecture Hours.  
Navier-Stokes and boundary layer equations; exact and approximate solutions; laminar boundary layers; origin of turbulence; transition; turbulent boundary layers; viscous airfoil design; one and two dimensional heat transfer; methods for steady and transient heat conduction; thermal boundary layers; convection; and radiation.  
Prerequisite: Grade of C or better in AERO 303 and AERO 351.

AERO 455 Helicopter Aerodynamics  
Credits 3. 3 Lecture Hours.  
Hovering theory, hovering and vertical flight performance, factors affecting hovering and vertical flight performance, auto-rotation in vertical descent, concepts of blade motion and control, aerodynamics of forward flight, forward flight performance, operational envelope and introduction to conceptual design of helicopters.  
Prerequisites: Grade of C or better in AERO 222, AERO 301, and AERO 310.

AERO 472 Airfoil and Wing Design  
Credits 3. 3 Lecture Hours.  
Subsonic airfoil design and analysis, subsonic wing design and analysis, swept and delta wings, vortex lift, transonic flow methods, viscous transonic phenomena, transonic airfoil and wing design, supersonic panel methods, supersonic wing design, optimization.  
Prerequisite: Grade of C or better in AERO 303.

AERO 481 Seminar  
Credit 1. 1 Lecture Hour.  
Readings, reports, conferences and discussion. Must be taken on a satisfactory/unsatisfactory basis.  
Prerequisite: Senior classification in aerospace engineering.

AERO 485 Directed Studies  
Credits 0 to 4. 0 to 4 Other Hours.  
Special problems in aerospace engineering assigned to individual students or groups.  
Prerequisite: Junior or senior classification or approval of instructor.

AERO 489 Special Topics in...  
Credits 1 to 4. 1 to 4 Lecture Hours. 0 to 4 Lab Hours.  
Selected topics in an identified field of aerospace engineering. May be repeated for credit.  
Prerequisite: Approval of instructor.

AERO 491 Research  
Credits 0 to 4. 0 to 4 Other Hours.  
Research conducted under the direction of faculty member in aerospace engineering. May be repeated 3 times for credit.  
Prerequisites: Junior or senior classification and approval of instructor.

AERS - Aerospace Studies (AERS)

AERS 101 Foundations of the USAF  
Credit 1. 1 Lecture Hour.  
Introduction to the U.S. Air Force and the Air Force Reserve Officer Training Corps (AFROTC); includes Officerhood, professionalism, military customs and courtesies, and officer opportunities and benefits; AFROTC cadets must register for Leadership Laboratory (AERS 105) as it complements this course with followership experience.

AERS 102 Foundations of the USAF  
Credit 1. 1 Lecture Hour.  
Continuation of AERS 101; AFROTC cadets must register for Leadership Laboratory (AERS 106) as it complements this course with followership experience.

AERS 105 AFROTC Leadership Lab  
Credit 1. 2 Lab Hours.  
Designed to give insight into the Air Force and give leadership opportunities to cadets through a variety of experiences; expected to perform a multitude of tasks in both the subordinate and superior roles. Must be taken on a satisfactory/unsatisfactory basis.

AERS 106 AFROTC Leadership Lab  
Credit 1. 2 Lab Hours.  
Continuation of AERS 105; AFROTC cadets must register for Leadership Laboratory (AERS 106) as it complements this course with followership experience.

AERS 201 Evolution of Air and Space Power  
Credit 1. 1 Lecture Hour.  
Examines general aspects of air and space power through a historical perspective; covers the time period from the first use of balloons to the Persian Gulf War; AFROTC cadets must register for Leadership Laboratory (AERS 105) as it complements this course with followership experience.

AERS 202 Evolution of Air and Space Power  
Credit 1. 1 Lecture Hour.  
Continuation of AERS 201; AFROTC cadets must register for Leadership Laboratory (AERS 106) as it complements this course with followership experience.

AERS 303 Air Force Leadership Studies  
Credits 3. 3 Lecture Hours.  
Leadership, management fundamentals, professional knowledge, Air Force personnel and evaluation systems, and leadership ethics; case studies of leadership and management situations as a means of demonstrating and exercising practical application of concepts; Air Force contract individuals (or those seeking a contract) must register for Leadership Lab (AERS 105).

AERS 304 Air Force Leadership Studies  
Credits 3. 3 Lecture Hours.  
Continuation of AERS 303; Air Force contract individuals (or those seeking a contract) must register for Leadership Lab (AERS 106).

AERS 403 National Security Affairs--Preparation for Active Duty  
Credits 3. 3 Lecture Hours.  
Examines the Constitution and the national security process; focuses on civilian control of the military; the roles of the Services; and the functions of the Air Force commands; Air Force contract individuals (or those seeking a contract) must register for Leadership Lab (AERS 105).  
Prerequisite: Non-Air Force contract students must have approval of instructor and department head.
AFST - Africana Studies (AFST)

AFST 201 Introduction to Africana Studies
Credits 3. 3 Lecture Hours.
Introduction to the field of Africana Studies; interdisciplinary approach drawing from history, philosophy, sociology, political studies, literature and performance studies; explores the African foundational relationship to and connections with its diaspora populations; covers Africa, the United States, the Caribbean, Europe and South America.

AFST 204/ENGL 204 Introduction to African-American Literature
Credits 3. 3 Lecture Hours.
Introduction to the writings of African Americans from the 18th century to the present, emphasizing the major themes and traditions.
Cross Listing: ENGL 204/AFPST 204.

AFST 205/ENGL 205 Introduction to Africana Literature
Credits 3. 3 Lecture Hours.
Works, literary movements and genres of authors of African descent in the Americas, Europe and Africa.
Cross Listing: ENGL 205/AFPST 205.

AFST 206/PSYC 206 Black Psychology
Credits 3. 3 Lecture Hours.
Critical examination of psychological experience, theories, and methods from perspectives grounded in the "Black experience."
Cross Listing: PSYC 206/AFPST 206.

AFST 208/PSYC 208 Stereotypes, Prejudice, and Minority Experience
Credits 3. 3 Lecture Hours.
Overview of theory and research relating to stereotyping, prejudice, discrimination, and minority experiences from a social psychological perspective.
Prerequisite: PSYC 107.
Cross Listing: PSYC 208/AFPST 208.

AFST 209/PSYC 209 Psychology of Culture and Diversity
Credits 3. 3 Lecture Hours.
Introduction to various issues surrounding an increasingly interconnected and globalized world by critically examining the dynamic relationship between psychological processes and diverse (e.g., motivation, memory, self, prejudice) socio-cultural contexts.
Prerequisite: PSYC 107.
Cross Listing: PSYC 209/AFPST 209.

AFST 252/PHIL 252 Introduction to Hip-Hop Philosophy
Credits 3. 3 Lecture Hours.
Introduction to philosophy by way of the major themes and subjects of Hip-Hop; critical advocacy of various philosophical ideals.
Cross Listing: PHIL 252/AFPST 252.

AFST 285 Directed Studies
Credits 0 to 4. 0 to 4 Other Hours.
Directed studies in the field of Africana Studies. May be taken two times for credit.
Prerequisite: AFST 201; Freshman or sophomore classification; approval of instructor and department head.

AFST 291 Research
Credits 0 to 3. 0 to 3 Other Hours.
Research conducted under the direction of a faculty member in Africana Studies. May be taken three times for credit.
Prerequisite: AFST 201; freshman or sophomore classification; and approval of instructor.

AFST 300/HIST 300 Blacks in the United States, 1607-1877
Credits 3. 3 Lecture Hours.
Blacks in the United States from the colonial period to 1877; the slave trade, slavery, free blacks and the impact of the Civil War and Reconstruction on blacks.
Prerequisite: Junior or senior classification.
Cross Listing: HIST 300/AFPST 300.

AFST 301/HIST 301 Blacks in the United States Since 1877
Credits 3. 3 Lecture Hours.
Blacks in the United States from the end of Reconstruction to the present; ideologies of black leaders, disfranchisement, lynching and the quest for equality in the 1950s and 1960s.
Prerequisite: Junior or senior classification.
Cross Listing: HIST 301/AFPST 301.

AFST 302 Gateway Course
Credits 3. 3 Lecture Hours.
Gateway to a series of courses offered for the minor in Africana Studies; explores topics such as Afrocentrism, postcolonial studies, black cultural studies, black feminist theory for a close study of issues among African and African diaspora populations in Africa, the United States, Caribbean, Europe and South America.

AFST 303 Psychology of Women of Color
Credits 3. 3 Lecture Hours.
Interdisciplinary theories to study the unique yet intersectional experiences of women from different racial groups, ethnicities, nationalities and cultural backgrounds; scholarly research from the diversity science field; contemporary topics that have developed in a global context; examination of complex issues, which affect women of color across the lifespan.
Prerequisite: Grade of C or better in AFST 201 or PSYC 107 or WGST 200, or approval of instructor.
Cross Listing: PSYC 303 and WGST 303.

AFST 317/SOCI 317 Racial and Ethnic Relations
Credits 3. 3 Lecture Hours.
Status of racial and ethnic groups such as Native Americans, African Americans, Latino Americans, Asian Americans, European Americans, and other groups in the political, economic, legal and social systems of the United States.
Prerequisite: Junior or senior classification or approval of instructor.
Cross Listing: SOCI 317/AFPST 317.
AFST 323/SOCI 323 Sociology of African Americans
Credits 3. 3 Lecture Hours.
Major elements of the Afro-American subculture in relation to white American society and its major social institutions.
Prerequisites: SOCI 205.
Cross Listing: SOCI 323/AFST 323.

AFST 324 Africana Social Sciences
Credits 3. 3 Lecture Hours.
Exploration of a significant topic pertaining to Africa and/or its diaspora in the social sciences.
Prerequisite: Junior or senior classification.

AFST 325 Africana Humanities
Credits 3. 3 Lecture Hours.
Exploration of a significant topic pertaining to Africa and/or its Diaspora in the humanities and arts.
Prerequisite: Junior or senior classification.

AFST 326 Africana Popular Culture
Credits 3. 3 Lecture Hours.
Dynamics of popular culture and classic theories of society; popular and public cultural forms in context of globalization and the Africana Diaspora.
Prerequisite: Junior or senior classification or approval of instructor.

AFST 327 Popular Musics in the African Diaspora
Credits 3. 3 Lecture Hours.
Examination of a range of popular musics from the twentieth century that have emerged in conjunction with the historical global spread of peoples and cultures from the African continent; technical knowledge about music is not required; focus on social and cultural contexts for popular music.
Prerequisite: Junior or senior classification or approval of instructor.
Cross Listing: PERF 327 and MUSC 327.

AFST 329/ENGL 329 African-American Literature Pre-1930
Credits 3. 3 Lecture Hours.
Major works of the African-American literary tradition from the 18th century to 1930 studied within cultural and historical context.
Prerequisites: 3 credits of literature at 200-level or above.
Cross Listing: ENGL 329/AFST 329.

AFST 339/ENGL 339 African-American Literature Post-1930
Credits 3. 3 Lecture Hours.
Major works of the African-American literary tradition from the 1930s to the present studied in their cultural and historical context.
Prerequisites: 3 credits of literature at 200-level or above.
Cross Listing: ENGL 339/AFST 339.

AFST 344/HIST 344 History of Africa to 1800
Credits 3. 3 Lecture Hours.
Origins of humankind in Africa; development and spread of pastoralism, agriculture and iron-working; formation of states and empires; impact of Christianity and Islam; rise of international trade in gold, ivory and slaves; African diaspora.
Prerequisite: Junior or senior classification.
Cross Listing: HIST 344/AFST 344.

AFST 345/HIST 345 Modern Africa
Credits 3. 3 Lecture Hours.
Survey of Africa since 1800; pre-colonial African states and societies; establishment and impact of European colonial rule; rise of nationalist movements; achievement of independence; problems of political stability and economic development in contemporary Africa; South Africa’s apartheid regime and its opponents.
Prerequisite: Junior or senior classification.
Cross Listing: HIST 345/AFST 345.

AFST 346/HIST 346 History of South Africa
Credits 3. 3 Lecture Hours.
Selected themes in the history of South Africa from the African Iron Age to the Apartheid regime; history of race relations in the 19th and 20th centuries and the rise of modern industrial state.
Prerequisite: Junior or senior classification or approval of instructor.
Cross Listing: HIST 346/AFST 346.

AFST 352/PHIL 352 Africana Philosophy
Credits 3. 3 Lecture Hours.
Presentation of the seminal ideas of several influential Africana thinkers; recovery of the neglected traditions in which these thinkers locate themselves.
Prerequisite: Junior or senior classification or approval of instructor.
Cross Listing: PHIL 352/AFST 352.

AFST 353/PHIL 353 Radical Black Philosophies of Race and Racism
Credits 3. 3 Lecture Hours.
Critical evaluation of white supremacy, colonialism and the modern construction of race; examination of the historical background for contemporary theories of race.
Prerequisite: Junior or senior classification or approval of instructor.
Cross Listing: PHIL 353/AFST 353.

AFST 357/HIST 357 Out of Africa: The Black Diaspora and the Modern World
Credits 3. 3 Lecture Hours.
History and cultures of the peoples of the African Diaspora from the fourteenth through the nineteenth centuries; social, political, and economic impact on Africa, the Americas, Europe, and the Arab World; emphasis on race, gender, identity, and migration.
Prerequisite: Junior or senior classification or approval of instructor.
Cross Listing: HIST 357/AFST 357.

AFST 362/HIST 302 Women and War in the African Diaspora
Credits 3. 3 Lecture Hours.
Case studies of women and war in the African diaspora in a wide historical and comparative context; social, economic, and cultural influence of war on women’s lives; women as victims, combatants, and refugees; historical construction of race, ethnic and gender identity during times of conflict.
Prerequisite: Junior or senior classification.
Cross Listing: HIST 302.

AFST 379/ENGL 379 Postcolonial Literatures
Credits 3. 3 Lecture Hours.
Exploration of key terms, themes and debates within global literature written by colonized, occupied and diasporic peoples.
Prerequisites: 3 credits of literature at the 200-level or above.
Cross Listing: ENGL 379/AFST 379.
AFST 391 Africana Feminisms
Credits 3. 3 Lecture Hours.
Exploration of a significant topic in feminist theory by and about women from Africa and/or its Diaspora, from various disciplinary perspectives and historical periods, and with application to societal debates and controversies.
Prerequisite: Junior or senior classification.

AFST 393/ENGL 393 Studies in Africana Literature and Culture
Credits 3. 3 Lecture Hours.
Literary movements, genres, groups of authors, topics or issues in the literature and culture of people of African descent.
Prerequisites: 3 credits of literature at 200-level or above; junior or senior classification or approval of instructor.
Cross Listing: ENGL 393/AFST 393.

AFST 398/FILM 398 Africana Cinema
Credits 3. 3 Lecture Hours.
Overview of African cinema; historical survey of cinema from Africa and the African Diaspora; introducing films produced in several geographical regions and reflecting different filmmaking traditions. May be taken two times for credit.
Prerequisite: Junior or senior classification, or approval of instructor.
Cross Listing: FILM 398/AFST 398.

AFST 401 Slavery in World History
Credits 3. 3 Lecture Hours.
Comparative history of human slavery; slavery in the Ancient World, Asia, Africa; varieties of modern slavery in the New World since 1500; abolition of slavery and continuing forms of human bondage in the contemporary world.
Prerequisite: Junior or senior classification.
Cross Listing: ASIA 401 and HIST 401.

AFST 425/COMM 425 Rhetoric of the Civil Rights Movement
Credits 3. 3 Lecture Hours.
Rhetorical evaluation of theoretical literature and pragmatic episodes that shaped the U.S. Civil Rights Movement; examination of significant speeches, documents, and protest activities in their historical, political, and social contexts.
Prerequisite: Junior or senior classification.
Cross Listing: COMM 425/AFST 425.

AFST 481 Seminar
Credits 3. 3 Lecture Hours.
Comparative studies of slave societies in the modern world; history and analysis of African American feminism; comparative analyses of the social, political, and economic condition of African Americans and other African peoples of the diaspora.
Prerequisite: AFST 302; junior or senior classification.

AFST 485 Directed Studies
Credits 0 to 3. 0 to 3 Other Hours.
Selected fields of Africana Studies not covered in depth by other courses. Reports and extensive reading required. May be repeated for credit.
Prerequisite: AFST 201; junior or senior classification; and approval of instructor.

AFST 489 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Selected topics in Africana Studies. May be repeated for credit.

AFST 491 Research
Credits 0 to 3. 0 to 3 Other Hours.
Research conducted under the direction of a faculty member in Africana Studies. May be taken for a maximum of 18 hours credit.
Prerequisites: AFST 201; junior or senior classification; and approval of instructor.

AGCJ - Ag Comm & Journalism (AGCJ)

AGCJ 105 Introduction to Agricultural Communications
Credits 3. 3 Lecture Hours.
Introduction to mass communication, its history, role in society, and especially its unique role in agriculture; importance of mass communication and the communication methods used in modern society; foundation for an understanding of agricultural news and information. Only one of the following will satisfy the requirements for a degree: AGCJ 105 and JOUR 102.

AGCJ 281 Journalism Concepts for Agriculture
Credits 3. 3 Lecture Hours.
The role of the news media in covering government, the court systems, corporations, taxation, and insurance; a practical perspective on how journalists interact with public and private institutions from a legal, ethical and social standpoint.
Prerequisite: Grade of C or better in AGCJ 105 or concurrent enrollment.

AGCJ 285 Directed Studies
Credits 1 to 4. 1 to 4 Other Hours.
Directed study of selected issue in field of agricultural communications with emphasis on collection, synthesis and interpretation of information.
Prerequisite: Approval of department advisor.

AGCJ 289 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Special topics in an identified area of agricultural development. May be repeated for credit.
Prerequisite: Approval of department advisor.

AGCJ 291 Research
Credits 1 to 4. 1 to 4 Other Hours.
Research conducted under the direction of faculty member in agricultural communications and journalism. May be repeated 2 times for credit.
Prerequisites: Freshman or sophomore classification and approval of department advisor.

AGCJ 305 Theory and Practice of Agricultural Publishing
Credits 3. 3 Lecture Hours.
Audience identification, publication content, management and design; analyze existing agricultural publications, identify audiences, advertising base and content.
Prerequisites: AGCJ 105; junior or senior classification.

AGCJ 306 Theory and Practice of Agricultural Public Relations
Credits 3. 3 Lecture Hours.
Public relations between agricultural producers and their suppliers as a critical part of agricultural communication; public relations objectives, strategies, tactics, evaluation and execution theory and practice examined. Only one of the following will satisfy the requirements for a degree: AGCJ 306 and JOUR 324.
Prerequisites: Grade of C or better in AGCJ 105; junior or senior classification.
AGCJ 307 Design for Agricultural Media
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Principles and practices of agricultural media design, including design and production of printed publications and graphics; computer assisted design and production of media pieces. Required for AGCJ majors and minors.
Prerequisite: Junior or senior classification.

AGCJ 308 Agricultural Photography
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Develop knowledge of photography, editing software, and composition techniques used in the agricultural communications field; develop photography and photo editing skills to a satisfactory level as demonstrated by performance on assignments and exams.
Prerequisite: Junior or senior classification.

AGCJ 312 Editing for Agricultural Audiences
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Principles and practices of editing for agricultural and technical audiences including improving and tightening copy; writing headlines, titles, and subheads; photo editing and captions, graphics and layout; print, broadcast, interactive and other media.
Prerequisites: AGCJ 105; junior or senior classification.

AGCJ 313 Agricultural Media Writing I
Credits 3. 2 Lecture Hours. 2 Lab Hours.
News gathering, writing, editing and ethics for current and emerging mediums used in agricultural communication; includes news identification, basic news writing methods, introduction to public relations, broadcast and Internet writing, interviewing skills, proper use of direct quotes and other news style. Only one of the following will satisfy the requirements for a degree: AGCJ 312 and JOUR 203.
Prerequisite: Grade of C or better in AGCJ 105 and AGCJ 312.

AGCJ 314 Agricultural Media Writing II
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Interpretative agricultural news gathering and writing for all media types; basic media law and ethics, interviewing skills with assigned practice writing about agriculture, and science and technology, including meeting and event coverage both on and off campus; print, broadcast, interactive and other media.
Prerequisites: Grade of C or better in AGCJ 312 and AGCJ 313; junior or senior classification.

AGCJ 366 Radio Broadcasting
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Survey of American broadcasting, development, and impact; influence on society, basic principles, mass communication theory, station operating programming, advertising, rating services, regulation, and censorship; in-depth analysis of current issues and developments.
Prerequisite: Junior or senior classification.

AGCJ 380 Workshop in Agricultural Communications and Journalism
Credits 1 to 4. 1 to 4 Lecture Hours.
The study, understanding and solution of human-agricultural problems based on theory learned in the classroom, library, laboratory and fieldwork completed by individuals and teams.
Prerequisite: Junior or senior classification.

AGCJ 404 Communicating Agricultural Information to the Public
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Use of agricultural journalism principles and techniques to communicate scientific information related to agriculture, agribusiness, natural resources and life sciences to the general public; communication processes include audience identification, writing, editing and production of agricultural science-based manuscripts for popular and refereed publications.
Prerequisite: Junior or senior classification.

AGCJ 405 Agricultural Publications Production
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Study and practice of the principles and concepts of designing, writing, editing, producing and distributing the AgriLeader magazine and Web site; includes practical applications of writing feature articles, magazine and Web site design, advertising sales, layout and graphics. May be repeated one time for credit.
Prerequisites: Grade of C or better in AGCJ 312; junior or senior classification.

AGCJ 406 Agricultural Public Relations Methods
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Agricultural public relations campaign analysis; public relations case studies and methods including writing public relations plans for agricultural entities, producing public relations components and evaluating public relations objectives, strategies and tactics.
Prerequisites: Junior or senior classification.

AGCJ 407 Web Authoring in Agricultural Communication
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Study and practice of basic website design theories, principles and writing for the web; use of web authoring software (not a programming class) to create online publications tailored for agricultural audiences; emphasizes informative content and functional design.
Prerequisites: Grade of C or better in AGCJ 307; junior or senior classification.

AGCJ 408 Advertising Copy and Design
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Creative aspects of advertising strategy, copywriting, typography and design in a variety of visual media; learn to make and evaluate advertising.
Prerequisites: Grade of C or better in AGCJ 307 and AGCJ 313; junior or senior classification; approval of instructor.

AGCJ 409 Television Production for Agricultural Journalists
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Fundamental concepts required to develop a broadcast quality video production; uses the high definition facilities of KAMU-TV and TTVN, hands-on experience in video production including producing, shooting and hosting a professional program series broadcast on KAMU-TV.
Prerequisite: Junior or senior classification.

AGCJ 411 Audience and Communications Research Methods
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Evaluation and implementation of research designs and methods used in audience and communications research; data collection methods and strategies, including interviews, observations, focus groups, surveys and content analyses, use of descriptive and comparative analyses to develop data-driven personas and recommendations for engaging target audiences.
Prerequisite: Junior or senior classification.
AGCJ 413 Emerging Media in Agriculture
Credits 3. 3 Lecture Hours.
Popular emerging media in agriculture to communicate, build and market a brand online; understanding the strategy behind the posts and other communications; create emerging media communications strategies for academic or business entities that may be implemented upon completion of course.
Prerequisite: Grade of C or better in AGCJ 313.

AGCJ 466 Advanced Radio Broadcasting
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Project-based instruction; a practical guide to producing, presenting, programming and managing a radio station. May be taken four times for credit.
Prerequisites: AGCJ 366; junior or senior classification or approval of instructor.

AGCJ 481 Senior Seminar
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Identification of communication-related issues; strategic planning to meet goals; measurable communication outcomes; writing, designing, creating and distributing communications products to clients; measuring effectiveness; working in teams.
Prerequisites: Grade of C or better in AGCJ 313; senior classification.

AGCJ 485 Directed Studies
Credits 1 to 4. 1 to 4 Lecture Hours.
Directed individual study of selected problems in agricultural communications, communication methods and the communication profession with emphasis on collection, analysis and presentation of information.
Prerequisites: Junior or senior classification; approval of department advisor.

AGCJ 489 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours. 0 to 4 Lab Hours.
Special topics in an identified area of agricultural communications and journalism. May be repeated for credit.
Prerequisite: Junior or senior classification.

AGCJ 491 Research
Credits 1 to 4. 1 to 4 Other Hours.
Research conducted under the direction of faculty member in agricultural communications and journalism. May be repeated 3 times for credit.
Registration in multiple sections of this course are possible within a given semester provided that the per semester credit hour limit is not exceeded.
Prerequisites: Junior or senior classification and approval of department advisor.

AGCJ 494 Internship
Credits 1 to 6. 1 to 6 Other Hours.
Supervised internship and independent study related to the student's professional interest.
Prerequisites: Junior or senior classification; approval of department advisor.

AGEC - Agricultural Economics (AGEC)

AGEC 105 Introduction to Agricultural Economics
Credits 3. 3 Lecture Hours.
(AGRI 2317) Introduction to Agricultural Economics. Characteristics of our economic system and basic economic concepts; survey of the farm and ranch firm and its organization and management; structure and operation of the marketing system; functional and institutional aspects of agricultural finance; government farm programs.

AGEC 216 Fundamentals of the AgriFood Sales Industry
Credit 1. 1 Lecture Hour.
Fundamentals of professional business to business sales in AgriFood firms; opportunities to interact with successful salespeople in AgriFood firms; focus on career development, exploration of undergraduate internships in professional sales and identification of basic sales theories currently in use in AgriFood firms; learning to network extensively with AgriFood industry professionals and developing a mentor relationship.

AGEC 217 Fundamentals of Agricultural Economics Analysis
Credits 3. 1 Lecture Hour. 4 Lab Hours.
Relates contemporary agribusiness issues to economic and financial management, illustrating their integration toward pragmatic applications in the agricultural industry; lab focuses on the integration of mathematics and economics with computer skills directed toward spreadsheets, databases, web pages, and communications software; emphasis is on writing as a critical communication skill.
Prerequisites: AGEC 105; ENGL 103 or ENGL 104; MATH 141, MATH 140, or MATH 166; MATH 142; sophomore or junior agricultural economics or agribusiness majors; or approval of department head.

AGEC 223 Establishing Agribusiness Entrepreneurship Networks I
Credit 1. 1 Lecture Hour.
Introduction to successful entrepreneurs and other professionals, identifying suggested strategies and tactics in starting and sustaining viable rural and metropolitan business ventures; emphasis on importance of and how to develop relationships with a broad spectrum of mentors.
Prerequisite: Open to all majors.

AGEC 235 Foundations of Money Education
Credits 3. 3 Lecture Hours.
Preparation for a financially challenging world and introduction to concepts and methods of personal financial planning; financial planning process, time value of money, taxation, credit, housing, insurance, employee benefits, family economics and building a personal financial plan.

AGEC 285 Directed Studies
Credits 0 to 4. 0 to 4 Other Hours.
Directed study of selected problems in agricultural economics.
Prerequisites: AGEC 105; freshman or sophomore classification in agricultural economics, agribusiness, or approval of instructor and department head; 2.5 GPR in major, overall, and CBK courses, if applicable; see an academic advisor in Room 214 AGLS.

AGEC 289 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Selected topics in an identified area of agricultural economics. May be repeated for credit.
Prerequisites: Freshman or sophomore classification and approval of department head.
AGEC 291 Research
Credits 0 to 4. 0 to 4 Other Hours.
Research conducted under the direction of faculty member in agricultural economics. May be repeated 3 times for credit.
Prerequisites: Freshman or sophomore classification and approval of department head; see an academic advisor in Room 214 AGLS.

AGEC 314 Marketing Agricultural and Food Products
Credits 3. 3 Lecture Hours.
Operations involved in movement of agricultural commodities from farmer to consumer via several intermediaries; functions involve buying, selling, transportation, storage, financing, grading, pricing and risk bearing; agricultural supply chain or value chain is studied in detail; marketing aspects of commodities and differentiated goods.
Prerequisites: AGEC 105 or 3 hours of economics; and junior or senior classification.

AGEC 315 Food and Agricultural Sales
Credits 3. 3 Lecture Hours.
Principles of professional sales techniques used in food and agricultural firms; develop a professional sales presentation; study current agribusiness industry professional salespersons.
Prerequisite: Junior or senior classification.

AGEC 316 Building Customer Relationships in AgriFood Selling
Credits 3. 3 Lecture Hours.
Use of emotional intelligence factors in developing business-to-business customer relationships for AgriFood, real estate, finance and other industrial products and services; developing customer relationships with regard to the unique aspects of technical products and services in these industries.
Prerequisite: AGEC 315.

AGEC 317 Economic Analysis for Agribusiness Management
Credits 3. 3 Lecture Hours.
Quantitative methods used to address managerial problems, specifically calculus-based optimization, marginal analysis, elasticities, statistical and forecasting techniques, linear programming, and risk analysis; emphasis on theoretical aspects and applied analysis of managerial problems faced by agricultural firms.
Prerequisites: AGEC 217; ECON 322 or ECON 323; SCMT 303 or STAT 301 or STAT 302 or STAT 303; and junior or senior classification; agricultural economics, agribusiness majors only; or approval of department head.

AGEC 324 Agribusiness Entrepreneurship – Budgeting
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Case study approach to demonstrate a process for evaluating the economic feasibility of a single-enterprise rural or metropolitan business venture; relevant production, marketing and financing costs, in combination with capital ownership and overhead costs; computer spreadsheets including attention to deterministic sensitivity analyses; computer capabilities are essential.
Prerequisites: AGEC 105 or ECON 202; ACCT 209 or ACCT 210 or ACCT 229 or ACCT 230 or AGEC 330 or FINC 341 or FINC 409; junior or senior classification or approval of instructor.

AGEC 325 Principles of Farm and Ranch Management
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Agribusiness managerial decision making and analysis in different market environments; emphasis is on profit maximization; lab focuses on using computerized methods for evaluating management alternatives for farming and ranching problem situations.
Prerequisites: AGEC 105 or ECON 202; junior or senior non-agricultural economics, nonagribusiness majors only; and knowledge of Excel.

AGEC 330 Financial Management in Agriculture
Credits 3. 3 Lecture Hours.
Principles of financial management of farms, ranches, and other agribusiness firms; financial statements, financial statement analysis, time value of money, investment analysis, firm growth, risk management, credit analysis and best business management practices.
Prerequisites: AGEC 105 or 3 hours of economics; ACCT 209 or ACCT 229; and junior or senior classification.

AGEC 335 Financial Readiness
Credits 3. 3 Lecture Hours.
Preparation for a financially challenging world and introduction to the concepts and methods of personal financial literacy; budgeting, cash management, debt, credit, deployment finance, insurance, retirement planning, investing, estate planning, and taxation.
Prerequisites: Junior or senior classification.

AGEC 340 Agribusiness Management
Credits 3. 3 Lecture Hours.
Survey of management practices using case studies to evaluate management issues in agribusiness firms in the context of the four functions of management such as planning, organizing, leading and controlling; emphasis on best practices throughout the food marketing chain; examination of how businesses and business executives succeed; application of previously learned knowledge in making business decisions similar to those encountered in professional careers.
Prerequisites: AGEC 105 or 3 hours of economics; and junior or senior classification.

AGEC 344 Food and Agricultural Law
Credits 3. 3 Lecture Hours.
Legal principles relevant to the farm family and business; characteristics of legal decisions and rules on property rights, and fencing laws; analysis of global, national, state, and local legal issues in contracts, torts, water, pollution, and natural resources.
Prerequisite: Junior or senior classification.

AGEC 350 Environmental and Natural Resource Economics
Credits 3. 3 Lecture Hours.
Inspection of issues such as environmental degradation, population growth, recycling, water use and depletion, natural habitat protection, water and air pollution, acid deposition, fishery management, and global warming using economically derived principles and tools.
Prerequisite: Junior or senior classification.

AGEC 401 Global Agri-Industries and Markets: Study Abroad
Credits 3. 3 Lecture Hours.
Understanding agriindustries and markets; analysis of production; importing; exporting; provides classroom experience with an exposure to a variety of global cultures in an international setting. Course may be repeated 3 times for credit.
Prerequisites: AGEC 105 or 3 hours of economics; junior or senior classification or approval of department head.

AGEC 402 Survey of International Agricultural Economics: Study Abroad
Credits 3. 3 Lecture Hours.
Examine, from an international setting, the shape of international agriculture; how culture, history, politics and geography in foreign countries affect the production and management of agricultural products; agricultural policy formation; countries' natural resources and competitive strategies; may be taken 3 times for credit.
Prerequisites: AGEC 105 or 3 hours of economics; junior or senior classification or approval of department head.
AGEC 408 Economics of Foreign Intervention, Conflict and Development
Credits 3. 3 Lecture Hours.
Economic models of conflict and development; dynamic socio-political models of conflict; conflict and vulnerable groups; quantitative techniques and methods in conflict and development research; interaction between poverty, natural resources and conflict in developing countries; role of multilateral, bilateral, and strategic stakeholders in conflict resolution and promotion of economic development.
Prerequisites: AGEC 105 or ECON 202 or equivalent; ENGL 104; or approval of instructor.

AGEC 413 Agricultural Cooperatives
Credits 3. 3 Lecture Hours.
Historical development and principles of cooperative associations in our economic system; organizational and operational aspects of cooperatives; legal considerations, financing, management, and member relations; and future role of cooperatives.
Prerequisites: AGEC 105; AGEC 314; and junior or senior classification.

AGEC 414 Agribusiness and Food Market Analysis
Credits 3. 3 Lecture Hours.
Application of economic and marketing principles to contemporary food and agribusiness marketing; practical marketing management for agribusiness firms; market analysis; and marketing strategy and planning as related to the emerging trends in the global food and agribusiness sector of the economy.
Prerequisites: AGEC 317; FINC 341; MKTG 321; and junior or senior agribusiness majors only.

AGEC 415 Food and Agribusiness Strategic Market Planning
Credits 3. 3 Lecture Hours.
Development of a market plan targeting the food and agribusiness market sector; market analysis; business propositions; action plans for executing the 4 P's (Product, Price, Place, Promotion); monitoring and measurement.
Prerequisites: AGEC 314 or MKTG 321 or MKTG 409; AGEC 315; junior or senior classification or approval of instructor.

AGEC 416 Sales Management and Advanced Techniques in Professional Technical Selling for AgriFood Firms
Credits 3. 3 Lecture Hours.
Principles and practices of sales management in food and agricultural firms; focus on business-to-business selling situations, theoretical and practical information about sales management for AgriFood firms; application of principles.
Prerequisite: AGEC 315.

AGEC 420 Food Security, Climate and Conflict
Credits 3. 3 Lecture Hours.
Economic models of food production and consumption in conflict regimes; the micro-economics of violence; the dynamic relationships of climate and agricultural production; potential impacts of climate change on food and socio-political security; food security among insurgent groups; conflict resistant food systems; and the shifting relationships between poor and rich nations in relationship to climate, food and conflict.
Prerequisites: AGEC 105 or ECON 202, junior or senior classification, or approval of instructor.

AGEC 422 Land Economics
Credits 3. 3 Lecture Hours.
Economic, institutional, and physical factors involved in the use and control of natural resources; includes elements of introductory land economics as a discipline, economic foundations of land economics, institutional influences on land use, and the effects of public policy on land use.
Prerequisites: AGEC 105 or 3 hours economics; and junior or senior classification.

AGEC 423 Establishing Agribusiness Entrepreneurship Networks II
Credit 1. 1 Lecture Hour.
Engagement opportunities with successful agri/metropolitan entrepreneurs and other professionals, focusing on strategies and tactics for starting and sustaining viable rural and metropolitan business ventures; emphasis on importance of, and how to, develop relationships with a broad spectrum of mentors.
Prerequisites: AGEC 424 or concurrent enrollment; junior or senior classification or approval of instructor. May not enroll in AGEC 223 and AGEC 423 during the same semester.

AGEC 424 Agribusiness Entrepreneurship – Economic Analysis
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Strategic planning regarding economic feasibility of a single-enterprise rural or metropolitan business venture; emphasis on processes for developing a comprehensive enterprise budget and construction and evaluation of risk management alternatives; exchanges with "real-world" entrepreneurs, financial experts and other management personnel; computer capabilities essential.
Prerequisites: AGEC 105 or ECON 202; ACCT 209 or ACCT 210 or ACCT 229 or ACCT 230 or AGEC 324 or AGEC 330 or FINC 341 or FINC 409; junior or senior classification or approval of instructor.

AGEC 425 Agribusiness Entrepreneurship – Financial Analysis
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Strategic planning regarding rural and metropolitan business ventures; emphasis on processes for developing comprehensive economics and financial prospectuses, including enterprise budgets, risk management planning, cash flow budgeting, net worth statements, income budgets, reconciliation statements and shock analysis; mentoring exchanges with "real-world" entrepreneurs, financial experts and other management personnel.
Prerequisites: AGEC 424; and junior or senior classification.

AGEC 429 Agricultural Policy
Credits 3. 3 Lecture Hours.
Analysis of the causes, nature, and effects of government participation in agriculture; and interrelationship of the American agriculture and agribusiness sector with the political and economic system, public administration, and interest group representation.
Prerequisites: AGEC 105, ECON 202 or ECON 203; ENGL 103 or ENGL 104; and junior or senior classification.

AGEC 430 Macroeconomics of Agriculture
Credits 3. 3 Lecture Hours.
Basic functioning of U.S. economy and relationship to agriculture; the differential effects of macroeconomic policy on disposable income, interest rates, unemployment, inflation and exchange rates; impact on agricultural commodity prices, farm input costs, net farm income, farmland values and key financial indicators.
Prerequisites: AGEC 105 or 3 hours of economics; AGEC 317 or concurrent enrollment; AGEC 429; AGEC 330 or FINC 341 or FINC 409; and junior or senior classification.
AGEC 431 Cases in Agribusiness Finance  
**Credits 3. 3 Lecture Hours.**  
Financial management of agribusiness firms; advanced topics in financial statement analysis, liquidity management, investment analysis, and capital structure illustrated through examination of agribusiness cases.  
**Prerequisites:** AGEC 317; AGEC 340; FINC 341; and junior or senior agribusiness majors only.

AGEC 432 Rural Real Estate and Financial Analysis  
**Credits 3. 3 Lecture Hours.**  
Advanced topics in investment analysis; financial intermediation in agriculture; real estate markets and market analysis; and appraisal valuation.  
**Prerequisites:** AGEC 317 (waived for nonmajors); AGEC 330 or FINC 409 or FINC 409; AGEC 422; ACCT 210 or ACCT 230; and junior or senior classification.

AGEC 434 Rural Financial Markets and Financial Planning  
**Credits 3. 3 Lecture Hours.**  
Organization, structure, conduct and regulation of lending institutions serving commercial agriculture and rural borrowers; borrower financial statement analysis, business forecasting, investment analysis and loan application process; lender credit application underwriting standards, credit scoring and loan decision making process; agricultural loan portfolio analysis.  
**Prerequisites:** ACCT 209 or ACCT 229; ACCT 210 or ACCT 230; AGEC 330 or FINC 341 or FINC 409; junior or senior classification.

AGEC 435 Financial Planning for Professionals  
**Credits 3. 3 Lecture Hours.**  
Financial planning from a professional perspective; applying basic financial, economic and institutional concepts to advise individuals, families and small businesses in achieving their financial goals; tools and topics include financial analysis, budgeting, credit management, time value of money, investment strategies, income taxes, risk management, and retirement and estate planning.  
**Prerequisites:** AGEC 330, FINC 409 or FINC 341; junior or senior classification.

AGEC 436 Insurance and Estate Planning  
**Credits 3. 3 Lecture Hours.**  
Insurance and estate planning for individuals, families and small businesses; applies risk management principles to evaluate various insurance products, including life, disability, long-term care, health, homeowners, auto and liability; estate planning process, tools and considerations.  
**Prerequisites:** AGEC 330, AGEC 435, FINC 409 or FINC 341; junior or senior classification.

AGEC 437 Tax Planning  
**Credits 3. 3 Lecture Hours.**  
Applies the principles of income, gift and estate tax planning to enhance household income after taxes; understanding tax laws, reporting requirements and opportunities for planning; identify and implement useful tax planning strategies; focus on practical application for financial planning.  
**Prerequisites:** AGEC 330, AGEC 435, FINC 409 or FINC 341; junior or senior classification.

AGEC 438 Investment Planning  
**Credits 3. 3 Lecture Hours.**  
Applying investment principles considering families' goals, time horizons, risk tolerance and tax implications to build investment portfolios; attributes of various asset classes; asset allocation, selecting securities and portfolio management; developing successful investment programs for personal investors and financial planners.  
**Prerequisites:** AGEC 435 and junior or senior classification.

AGEC 439 Retirement Planning  
**Credits 3. 3 Lecture Hours.**  
Retirement planning basics, qualified and nonqualified retirement plans, Social Security provisions and government healthcare plans along with the basics of employee benefits; focus on both quantitative (i.e., calculating retirement needs and plan limits) and qualitative (i.e., retirement age decisions, retirement income management) aspects of retirement.  
**Prerequisite:** AGEC 435 and junior or senior classification.

AGEC 440 Agribusiness Strategic Analysis  
**Credits 3. 3 Lecture Hours.**  
Strategic management and economic principles for the agribusiness system; problem recognition and applied managerial/economic decision making with related considerations in marketing, production, or finance for agribusiness firms.  
**Prerequisites:** AGEC 317; AGEC 340; FINC 409; MGMT 363; MKTG 321; and junior or senior agribusiness majors only.

AGEC 441 Financial Planning Capstone  
**Credits 3. 3 Lecture Hours.**  
Financial planning process, data gathering, approaches to financial planning, analysis of financial statements and client presentation; case analysis, ethics and professional conduct, use of financial planning software, advanced financial calculator usage, and Microsoft Excel applications.  
**Prerequisites:** AGEC 435, AGEC 436, AGEC 437, AGEC 438 and AGEC 439; junior or senior classification.

AGEC 442 Food and Agricultural Price Analysis  
**Credits 3. 3 Lecture Hours.**  
Factors influencing the level of food and agricultural prices; price trends and seasonal variation; methods of forecasting demands and prices; and futures trading.  
**Prerequisites:** AGEC 314; AGEC 317; and junior or senior classification.

AGEC 443 Agricultural Commodity Futures  
**Credits 3. 3 Lecture Hours.**  
Activities of commodity futures exchanges; the mechanics of trading futures contracts; the use of futures trading for hedging and forward pricing; and options, basis behavior, and hedging strategies for selected commodities.  
**Prerequisites:** AGEC 105 or 3 hours of economics; AGEC 314; AGEC 317 or concurrent enrollment; and junior or senior classification; or approval of department head.

AGEC 452 International Trade and Agriculture  
**Credits 3. 3 Lecture Hours.**  
Changing role of U.S. agriculture in a dynamic world economy; national and international policies and institutions affecting agriculture; and exchange rates, tariffs, and non-tariff barriers.  
**Prerequisites:** AGEC 105 or 3 hours of economics; and junior or senior classification.
AGEC 453 International Agribusiness Marketing
Credits 3. 3 Lecture Hours.
Basic competencies in international marketing of agri-foods; and market entry, pricing, payment, finance, and promotion.
Prerequisites: AGEC 105 or 3 hours of economics; and junior or senior classification.

AGEC 460 Cross-Cutting Issues in Agricultural Economics
Credits 3. 3 Lecture Hours.
Examination of economic theory and its history; emphasis on the areas of agricultural business and finance, microeconomics, management, marketing, and microeconomics; quantitative analysis, resources, and economics policy; emphasis on the ability to properly analyze economic problems.
Prerequisites: AGEC 317; AGEC 314 or MKTG 321 or MKTG 409; AGEC 330 or FINC 341 or FINC 409; AGEC 429; agricultural economics and agribusiness majors only; junior or senior classification or approval of instructor.

AGEC 481 Ethics in Agribusiness and Agricultural Economics
Credit 1. 1 Lecture Hour.
Examination of the principals of ethical business behavior; context created through assigned readings, guest speakers from various law enforcement branches and private industry; student written reports about their own experiences relative to this context; attention given to establishing personal principles for an ethical business career.
Prerequisites: AGEC 217; junior or senior classification; and agricultural economics or agribusiness majors only.

AGEC 484 Internship
Credits 0 to 6. 0 to 6 Other Hours.
Supervised experience program conducted in the area of the student’s interest in agricultural economics and agribusiness. May be taken two times.
Prerequisite: See an advisor in Room 214 AGLS Building.

AGEC 485 Directed Studies
Credits 0 to 6. 0 to 6 Other Hours.
Special problems not covered by other courses. Content will depend upon problem studied.
Prerequisite: See an advisor in Room 214 AGLS Building.

AGEC 489 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Selected topics in an identified area of agricultural economics. May be repeated for credit.
Prerequisite: Junior or senior classification.

AGEC 491 Research
Credits 0 to 6. 0 to 6 Other Hours.
Research conducted under the direction of faculty member in agricultural economics. May be repeated 3 times for credit. Registration in multiple sections of this course are possible within a given semester provided that the per semester credit hour limit is not exceeded.
Prerequisites: Junior or senior classification and approval of department head; see an advisor in Room 214 AGLS Building.

AGLS - Ag & Life Sciences (AGLS)

AGLS 101 Modern Agricultural Systems and Renewable Natural Resources
Credit 1. 1 Lecture Hour.
(AGRI 1131, 1231) Modern Agricultural Systems and Renewable Natural Resources. An introduction to modern agriculture and the natural, human and scientific resources upon which it depends. Freshman or sophomore classification.

AGLS 105 Research in Agriculture and Life Sciences
Credit 1. 1 Lecture Hour.
An introduction to the research process as applied to agriculture, renewable natural resources and biological sciences.
Prerequisite: Freshman classification, major in College of Agriculture and Life Sciences and approval of instructor.

AGLS 125 Life Sciences Learning Community I
Credit 1. 1 Lecture Hour.
Development of personal and professional competencies in the life sciences: learning styles, leadership skills, appreciation for the arts; ethics in science, problem solving skills, experimental design, data gathering and interpretation, introduction to life sciences literature, critical analysis skills, and the connectivity between life science disciplines. May be taken two times for credit.
Prerequisites: Freshman classification and approval of instructor.

AGLS 225 Life Sciences Learning Community II
Credit 1. 1 Lecture Hour.
Continuation of the development of personal and professional competencies in the life sciences: ethics in science, problem solving skills, experimental design, data gathering and interpretation, examination of life sciences literature, critical analysis skills, and the connectivity between life science disciplines. May be taken two times for credit.
Prerequisites: Freshman classification and approval of instructor.

AGLS 289 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Selected topics in an identified area of agriculture and life science. May be repeated for credit.
Prerequisite: Freshman or sophomore.

AGLS 292 Cooperative Education in Agriculture
Credits 2. 4 Other Hours.
Educational work assignment by a student in the field of his or her career interest and course of study; supervision of the student by the cooperating employer and the instructor; a technical report, approved by the instructor, on a related subject area required.
Prerequisite: Approval of the college coordinator of cooperative education.

AGLS 301 College of Agriculture and Life Sciences Study Abroad
Credits 1 to 18. 1 to 18 Other Hours.
For students in approved programs abroad. May be repeated for credit.
Prerequisites: Admission to approved program and approval of academic dean.

AGLS 392 Cooperative Education in Agriculture
Credits 2. 4 Other Hours.
Educational work assignment by a student in the field of his or her career interest and course of study. Supervision of the student by the cooperating employer and the instructor; a technical report, approved by the instructor, on a related subject area required.
Prerequisite: AGLS 292.

AGLS 489 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Selected topics in an identified area of agricultural and life sciences.
AGLS 492 Cooperative Education in Agriculture
Credits 2. 40 Other Hours.
Educational work assignment by a student in the field of his or her career interest and course of study; supervision of the student by the cooperating employer and the instructor; a technical report, approved by the instructor, on a related subject area required.
Prerequisite: AGLS 392.

AGSC - Agricultural Science (AGSC)

AGSC 285 Directed Studies
Credits 1 to 4. 1 to 4 Lecture Hours.
Directed individual study of selected problems in agricultural science with emphasis on collection, analysis and presentation of information. May be repeated for credit.
Prerequisite: Approval of instructor.

AGSC 289 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Special topics in an identified area of agricultural science. May be repeated for credit.
Prerequisite: Approval of department head.

AGSC 291 Research
Credits 1 to 4. 1 to 4 Other Hours.
Research conducted under the direction of faculty member in agricultural science. May be repeated 2 times for credit.
Prerequisites: Freshman or sophomore classification and approval of instructor.

AGSC 301 Introduction to Agricultural Science Teaching
Credits 3. 3 Lecture Hours.
Introduction to agricultural science teaching at the secondary level; an overview of preparing teachers for a changing world including knowledge of learners, subject matter and teaching within the context of agricultural science.
Prerequisite: Junior or senior classification; AGSC 384 or concurrent enrollment.

AGSC 305 Management of Supervised Agricultural Experiences
Credits 3. 3 Lecture Hours.
Overview of supervised agricultural experiences (SAEs) and content that can be used in the secondary agricultural science program; engagement in SAE programs; management practices for SAE projects including record keeping and student reports.
Prerequisite: Junior or senior classification.

AGSC 373 Managing Safety in the Agricultural Science Program
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Safety principles and procedures, methods of teaching and motivating students in agricultural mechanics; design for those preparing to teach agricultural science in Texas public schools.
Prerequisite: Junior or senior classification.

AGSC 380 Workshop in Agricultural Science
Credits 1 to 4. 1 to 4 Other Hours.
The study, understanding and solution of human-agricultural problems based on theory learned in the classroom, library, laboratory and fieldwork completed by individuals and teams.
Prerequisite: Junior or senior classification.

AGSC 383 Teaching Agricultural Mechanics
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Methods of teaching and motivating students in agricultural mechanics; designed for students preparing to teach agricultural science in Texas public schools.
Prerequisites: Grade of C or better in AGSC 301 and AGSC 373.

AGSC 384 Clinical Professional Experience in AGSC
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Clinical field experience for students preparing to teach agricultural science in public schools of Texas; through first-hand observation, students will study learning theories, individual differences, teaching methods, classroom management, curriculum, school climate and culture, and teacher roles and responsibilities.
Prerequisite: Grade of C or better and concurrent enrollment in AGSC 301; junior or senior classification.

AGSC 402 Designing Instruction for Secondary Agricultural Science Programs
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Theory and practice in designing instruction for secondary agricultural science programs including effective planning and delivery methods; designed for students preparing to teach agricultural science in Texas public schools.
Prerequisites: Grade of C or better in AGSC 384 and concurrent enrollment in AGSC 405; grade of C or better in INST 210 or concurrent enrollment.

AGSC 405 Facilitating Complete Secondary Agricultural Science Programs
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Theory and practice in facilitating secondary agricultural science programs: includes classroom instruction, supervised experience, and youth leadership development; designed for students preparing to teach agricultural science in Texas public schools.
Prerequisites: Grade of C or better in AGSC 384 and concurrent enrollment in AGSC 402; grade of C or better in INST 210 or concurrent enrollment.

AGSC 425 Learner Centered Instruction in Agricultural Science
Credits 3. 3 Lecture Hours.
Preparing curriculum materials for secondary agricultural science programs: includes classroom instruction, supervised experience, and youth leadership development; designed for students preparing to teach agricultural science in Texas public schools.
Prerequisites: Grade of C or better in AGSC 384 and concurrent enrollment in AGSC 402; grade of C or better in INST 210 or concurrent enrollment.

AGSC 436 Professional Teaching Internship in AGSC
Credits 6. 2 Lecture Hours. 12 Lab Hours.
Planning for and teaching secondary agricultural science in selected high schools in Texas; includes 12 weeks of professional teaching experience under the guidance of a university supervisor and a cooperating teacher in the school.
Prerequisites: Grade of C or better in AGSC 402 and AGSC 405 and concurrent enrollment in AGSC 436, AGSC 481, and AGSC 484.

AGSC 436 Professional Teaching Internship in AGSC
Credits 6. 2 Lecture Hours. 12 Lab Hours.
Planning for and teaching secondary agricultural science in selected high schools in Texas; includes 12 weeks of professional teaching experience under the guidance of a university supervisor and a cooperating teacher in the school.
Prerequisites: Grade of C or better in AGSC 402 and AGSC 405 and concurrent enrollment in AGSC 436, AGSC 481, and AGSC 484.

AGSC 481 Seminar
Credit 1. 1 Lecture Hour.
Review of current literature and research as related to program development in light of legislation and policies affecting education in agriculture.
Prerequisite: Grade of C or better in AGSC 402 and AGSC 405.
AGSC 484 Field Experience
Credits 1 to 6. 1 to 6 Other Hours.
An on-the-job supervised experience program conducted in the area of the student's specialization.
Prerequisites: Grade of C or better in AGSC 402 and AGSC 405 and concurrent enrollment in AGSC 425, AGSC 436, and AGSC 481.

AGSC 485 Directed Studies
Credits 1 to 4. 1 to 4 Lecture Hours.
Directed individual study of selected problems in agricultural science with emphasis on collection, analysis and presentation of information. May be repeated for credit.
Prerequisite: Junior or senior classification; approval of instructor.

AGSC 489 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours. 0 to 4 Lab Hours.
Special topics in an identified area of agricultural science. May be repeated for credit.
Prerequisite: Approval of department head.

AGSC 491 Research
Credits 1 to 4. 1 to 4 Other Hours.
Research conducted under the direction of faculty member in agricultural science. May be repeated 3 times for credit. Registration in multiple sections of this course are possible within a given semester provided that the per semester credit hour limit is not exceeded.
Prerequisites: Junior or senior classification; approval of instructor.

AGSC 494 Internship
Credits 1 to 6. 1 to 6 Other Hours.
Supervised internship and independent study related to student's professional interest.
Prerequisites: AGSC 301; junior or senior classification; 2.0 GPR; approval of instructor.

AGSM - Agricultrl Systems Mgmt (AGSM)

AGSM 125 Introduction to Agricultural Systems Management
Credit 1. 2 Lab Hours.
Introduction to technical management of agricultural systems using management projects presented by agricultural managers from industry; problem definition, information search, idea generation and development of management solutions.
Prerequisite: Freshman or sophomore classification or approval of instructor; majors only.

AGSM 201 Agricultural Energy and Power Systems
Credits 3. 2 Lecture Hours. 2 Lab Hours.
(AGRI 2301) Agricultural Energy and Power Systems. A study of the types of power and energy sources used in agricultural equipment and systems; management considerations for selecting, operating and maintaining internal combustion engines, electric equipment and motors, and renewables as power sources.

AGSM 284 Internship
Credits 0. 0 Lecture Hours. 0 Lab Hours. 0 Other Hours.
No Credit. Practical experience working in a professional agricultural systems management setting. May be taken three times.
Prerequisite: Freshman or sophomore classification; approval of the instructor.

AGSM 285 Directed Studies
Credits 0 to 4. 0 to 4 Other Hours.
Selected problems in any phase of agricultural systems management; credit and specific content dependent upon background, interest, ability and needs of student enrolled; individual consultations and reports required.
Prerequisites: Freshman or sophomore classification; approval of department head.

AGSM 289 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Selected topics in an identified area of agricultural systems management. May be repeated for credit.
Prerequisite: Approval of instructor.

AGSM 291 Research
Credits 0 to 3. 0 to 3 Other Hours.
Research conducted under the direction of faculty member in agricultural systems management.
Prerequisites: Freshman or sophomore classification and approval of instructor.

AGSM 301 Systems Analysis in Agriculture
Credits 3. 3 Lecture Hours.
Operations research and systems theory applied to management problems in food and agricultural industries; linear programming, queuing theory, simulation and critical path method; provides the knowledge and computer skills to better manage resources for the evolving agricultural industries.
Prerequisites: Grade of C or better in MATH 140 or MATH 141 and MATH 142 or MATH 151.

AGSM 310 Agricultural Machinery Management
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Selection of a matched complement of power units and machines for farming operations; consider constraints such as crops, season, weather, personnel and capital; apply systems techniques such as linear programming, optimization, queuing theory and inventory models; utilize available software programs and learn to develop electronic spreadsheets and other customized software.
Prerequisites: AGSM 201; grade of C or better in AGSM 301 or concurrent enrollment.

AGSM 315/NFSC 315 Food Process Engineering Technology
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Elementary mechanics, physical and thermal properties of food and processing materials, heat transfer, mass and energy balances, psychrometrics (properties of air), insulation.
Prerequisites: Grade of C or better in PHYS 201 or PHYS 218, or approval of instructor.
Cross Listing: NFSC 315/AGSM 315.

AGSM 325 Agri-Industrial Applications of Electricity
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Elements of electric current generation and transmission, applications of electric heating, lighting and power, wiring, motors, energy rates, meter reading, safety rules and regulations.
Prerequisite: AGSM 201; AGSM majors or minors only.
AGSM 335 Water and Soil Management
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Elementary principles of surface and ground water supply, flood control, water distribution systems and irrigation systems; principles of drainage, soil conservation and erosion control; elementary surveying, chaining, leveling and mapping applied to agricultural and natural resource needs; illustrated by practical examples of terracing and farm pond design.
Prerequisite: Grade of C or better in MATH 140 or MATH 141; grade of C or better in CHEM 101 and CHEM 111; or approval of instructor.

AGSM 337 Technology for Environmental and Natural Resource Engineering
Credits 3. 3 Lecture Hours.
For the nonengineering student in the environmental and management sciences; concentrates on the application of technology for solving local environmental problems while considering global issues; reduction of water, air and hazardous waste pollutants; legislative issues and modeling.
Prerequisites: Grade of C or better in MATH 140 or MATH 141 and MATH 142 or AGSM 301.

AGSM 355 Energy and Conversion Systems
Credits 3. 3 Lecture Hours.
Basic physical conversion principles of energy use, including historical and future patterns; conservation measures, alternative energy sources, and the environment impact of U.S. and world energy use.
Prerequisites: Junior or senior classification; non-majors only.

AGSM 360 Occupational Safety Management
Credits 3. 3 Lecture Hours. 0 Lab Hours.
Safety considerations in the work environment, including safety mandates, safety mission, personal and business liability, fire, chemical, dust, machine noise, personal protective devices; design and implementation of safety programs.
Prerequisite: Junior or senior classification.

AGSM 403 Processing and Storage of Agricultural Products
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Factors influencing the nature of biological materials and the preservation of quality throughout the harvesting, handling and processing system; a systems approach to cereal grains includes principles of drying, quality deterioration, storage, conveying and handling, processing of fiber crops.
Prerequisites: AGSM 310 and AGSM 315/NFSC 315; or approval of instructor.

AGSM 417/NFSC 417 Food Process Engineering Technology II
Credits 3. 3 Lecture Hours.
Applications of basic engineering concepts to understand common unit operations in the food (and related) industry.
Prerequisites: AGSM 315/NFSC 315 or NFSC 315/AGSM 315.
Cross Listing: NFSC 417/AGSM 417.

AGSM 435 Irrigation Principles and Management
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Principles of irrigation and management for efficient use of water; soil-water-plant relationships; methods of application; power and labor requirements; automated systems and components.
Prerequisites: Grade of C or better in MATH 140 or MATH 141; grade of C or better in CHEM 101 and CHEM 111.

AGSM 439 Management of Agricultural Systems I
Credits 3. 3 Lecture Hours.
Application of agricultural systems management principles in solving realistic problems faced by agribusiness managers; project selection from problems posed by biological and agricultural industrial consultants; project feasibility study and outline; management and application philosophy; teamwork and communication, economics; product liability and reliability; standards and codes; goal setting and time management.
Prerequisites: Grade of C or better in AGSM 301; ENGL 210, AGSM 310, and AGSM 325; AGSM 335, AGSM 337 and AGSM 403 or concurrent enrollment; must be taken prior to AGSM 440; AGSM majors only.

AGSM 440 Management of Agricultural Systems II
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Management of agricultural systems through team solution of management problems posed by agribusiness managers, farmers, extension specialists and other industry consultants; application of management principles to give experience in solving realistic problems faced by agribusiness managers; critical evaluation of results by students, staff and consultants.
Prerequisites: COMM 203; grade of C or better in AGSM 439; should be taken last spring semester prior to graduation.

AGSM 461/SPSC 461 Geographic Information Systems for Resource Management
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Geographic Information System (GIS) approach to the integration of spatial and attribute data to study the capture, analysis, manipulation and portrayal of natural resource data; examination of data types/formats; integration of GIS with remote sensing and Global Positioning System; lab use of GIS applications to conduct analyses of topics in natural resources.
Prerequisite: Junior or senior classification or approval of instructor.
Cross Listing: SPSC 461/AGSM 461.

AGSM 470 Agricultural Electronics and Control
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Technology of electronic systems in agricultural production and processing, sensors, actuators, and controllers, controller hardware and computer bases.
Prerequisite: AGSM 325; or approval of instructor.

AGSM 473 Project Management for Agricultural Systems Technology
Credits 3. 3 Lecture Hours.
Development of fundamental skill set in project management; basic knowledge of project management methods, tools and techniques; includes organization and life cycle, management processes, integration management, time management, cost management, quality management, communications management, risk management, procurement management, stakeholder management.
Prerequisites: Grade of C or better in AGSM 301; senior classification.

AGSM 475 Applied Information Technologies for Agricultural Systems
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Definition and documentation of the value of information in agriculturally-based technology companies; methods for mapping information flow within the company and across companies; articulation value of information within a value chain for a food product by simulation; and projects using project management software and web-based interactions.
Prerequisites: ISTM 209 or equivalent; junior or senior classification.
AGSM 481 Seminar
Credit 1. 1 Lecture Hour.
Professional development; ethics; career opportunities and topics of interest related to the practice of agricultural systems management. 
Prerequisite: Senior classification.

AGSM 484 Internship
Credits 0 to 6. 0 to 6 Other Hours.
Practical experience working in a professional agricultural and/or food systems management setting. May be taken three times.
Prerequisites: Junior or senior classification; approval of the instructor.

AGSM 485 Directed Studies
Credits 0 to 4. 0 to 4 Other Hours.
Selected problems in any phase of agricultural systems management; credit and specific content depend on background and interest of student; individual consultations and reports required.
Prerequisites: Junior classification; approval of department head; 2.0 GPR.

AGSM 489 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Special topics in an identified area of agricultural systems management. May be repeated for credit.

AGSM 491 Research
Credits 0 to 3. 0 to 3 Other Hours.
Research conducted under the direction of faculty member in agricultural systems management. May be repeated 2 times for credit. Registration in multiple sections of this course are possible within a given semester provided that the per semester credit hour limit is not exceeded.
Prerequisites: Junior or senior classification and approval of instructor.

ALEC 201 Foundations of Agricultural Leadership, Education and Communications
Credits 2. 2 Lecture Hours.
Survey of historical perspectives and future career opportunities in the field of agricultural leadership, education and communications; addresses undergraduate degree planner and departmental high-impact learning experiences; explores field of study standards for communication and publication; investigates learning preferences and academic support systems.
Prerequisites: Freshman or sophomore classification; AGCJ, AGSC, ALED or USAL-LED majors.

ALEC 285 Directed Studies
Credits 1 to 4. 1 to 4 Other Hours.
Directed study of selected issue in field of agricultural leadership, education, and communications with emphasis on collection, synthesis and interpretation of information. May be taken four times for credit.
Prerequisite: Approval of department advisor.

ALEC 289 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours. 0 to 4 Lab Hours.
Special topics in an identified area of agricultural development. May be repeated for credit.
Prerequisite: Approval of department advisor.

ALEC 291 Research
Credits 1 to 4. 1 to 4 Lecture Hours.
Research conducted under the direction of faculty member in agricultural communications and journalism. May be taken two times for credit.
Prerequisites: Freshman or sophomore classification and approval of department advisor.

ALEC 350 Global Agricultural Issues
Credits 3. 3 Lecture Hours.
Review of global agricultural issues (products, environment, people, and culture) affecting international agricultural development; concepts and principles underlying the processes of teaching, research, and service opportunities in international agricultural development and education situations.
Prerequisites: Junior or senior classification or approval of instructor.

ALEC 380 Workshop in Agricultural Leadership, Education, and Communications
Credits 1 to 4. 1 to 4 Lecture Hours.
The study, understanding and solution of human-agricultural problems based on theory learned in the classroom, library, laboratory and fieldwork completed by individuals and teams. May be taken three times for credit.
Prerequisite: Junior or senior classification.

ALEC 399 High-Impact Experience
Credits 0. 0 Lecture Hours.
Participation in an approved high-impact learning practice; documentation and self-assessment of learning experience.
Prerequisites: Junior or senior classification; or approval of instructor.

ALEC 412 Technology-Enhanced Instructional Design Strategies for Agriculture
Credits 3. 3 Lecture Hours.
Techniques and applications of technology to enhance instruction of agricultural topics; instructional design principles, instructional strategies, technological tools; the design, development and delivery of technology-enhanced instruction for agriculture and the life sciences. Not intended for majors in education.
Prerequisite: Junior or senior classification.

ALEC 425 Principles of Program Evaluation
Credits 3. 3 Lecture Hours.
Evaluation principles applied to educational programs in agriculture and life science; basic understanding of skills in program evaluation processes, concepts, and theories; develop expertise needed to design and conduct evaluations of youth and adults in extension, community, and school-based programs.
Prerequisite: Junior or senior classification.

ALEC 450 Global Social Justice Issues in Agriculture
Credits 3. 3 Lecture Hours.
An in-depth evaluation of global social justice issues and leadership skills necessary to effectively solve and manage issues in agricultural development; topics include awareness, knowledge and understanding of teaching, research and service opportunities for those seeking careers in global social justice and agricultural leadership.
Prerequisite: Junior or senior classification or approval of instructor.

ALEC 460 Applying International Development Theories in Agriculture
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Practical application of agricultural development theories (geographical, communal, societal, etc.) in real-world settings; high-impact learning, research skill development, international travel or participation in a service-learning project with an international organization.
Prerequisites: Junior or senior classification or approval of instructor.
ALED 485 Directed Studies
Credits 0 to 4. 0 to 4 Other Hours.
Directed individual study of selected problems in international agriculture leadership, education and communications.
Prerequisites: Junior or senior classification; approval of department advisor.

ALED 489 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours. 0 to 4 Lab Hours.
Special topics in an identified area of international agriculture leadership, education, and communications. May be taken four times for credit.
Prerequisite: Junior or senior classification.

ALED 491 Research
Credits 1 to 4. 1 to 4 Lecture Hours.
Research conducted under the direction of faculty member in international agricultural leadership, education, and communications. May be taken three times for credit.
Prerequisites: Junior or senior classification; approval of department advisor.

ALED 494 Internship
Credits 1 to 6. 1 to 6 Other Hours.
Supervised internship and independent study related to the student’s professional interest. May be taken six times for credit.
Prerequisites: Junior or senior classification; approval of departmental advisor.

ALED - Ag Leadership & Dev (ALED)

ALED 125 Leadership Learning Community I
Credit 1. 1 Lecture Hour.
Offered to students living in the Freshmen Leadership Living Learning Community; fundamentals of developing personal leadership while participating in co-curricular activities; emphasis on the relational model of leadership and global perspective building.
Prerequisites: Freshman classification or approval of instructor; on-campus residence.

ALED 202 Introduction to Leadership
Credits 3. 3 Lecture Hours.
Introduction to the academic and scholarly development of leadership theory and leadership models; investigation of leadership theory when applied to a specific context; development of a leadership definition as an inquiry investigation.

ALED 222 Practicing Diverse Leadership and Cultural Exploration
Credits 3. 3 Lecture Hours.
Social theories and historical perspectives of leadership, particularly in terms of class, gender, race, ethnicity, and nationality; a multidisciplinary approach to the study of leadership with a special emphasis on culture through experiential learning.
Prerequisites: ALED 222 and membership in the Multicultural Services Cultural Leadership, Understanding, and Exploration for Sophomores Learning Community.

ALED 225 Leadership Learning Community II
Credit 1. 1 Lecture Hour.
Offered to students living in the Freshmen Leadership Living Learning Community; fundamentals of peer mentoring while participating in co-curricular activities; emphasis on building supportive relationships on a college campus.
Prerequisites: Freshman classification or approval of instructor; on-campus residence; ALED 125.

ALED 285 Directed Studies in Agricultural Leadership and Development
Credits 1 to 4. 1 to 4 Other Hours.
Directed study of selected issue in agricultural leadership and development with emphasis on collection, synthesis and interpretation of information.
Prerequisite: Approval of department advisor.

ALED 289 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours. 0 to 4 Lab Hours.
Special topics in an identified area of agricultural development. May be repeated for credit.
Prerequisite: Approval of department advisor.

ALED 291 Research
Credits 1 to 4. 1 to 4 Lecture Hours.
Research conducted under the direction of faculty member in agricultural development. May be repeated 2 times for credit. Please see academic advisor in department.
Prerequisites: Freshman or sophomore classification and approval of instructor.

ALED 301 Personal Leadership Education
Credits 3. 3 Lecture Hours.
Development, application and reflection of personal leadership capabilities through self-assessments and experiential learning activities; development of leadership identity through personal leadership inventories including strengths, personality type, values, vision and emotional intelligence.
Prerequisite: ALED or USAL-LED major; junior, or senior classification; grade of C or better in ALED 202.

ALED 313 Culture Theory, Orientation and Adaptation
Credits 3. 3 Lecture Hours.
Evaluation of culture theory, elements and manifestations of culture, assessing cultural norms of society or groups, adaptation to a new culture for effective leadership.
Prerequisite: Junior or senior classification.

ALED 339 Agricultural Extension Philosophy and the Land-Grant Mission
Credits 3. 3 Lecture Hours.
Philosophy of Cooperative Extension and roles within the land-grant system; history, organization, program areas and guiding principles; relationship with the teaching and research branches of the land-grant system.
Prerequisite: Junior or senior classification or approval of instructor.
ALED 340 Survey of Leadership Theory  
Credits 3. 3 Lecture Hours.  
Exploration of leadership as a scholarly discipline; critical analysis of and evolution of multiple leadership models and theories; synthesis of leadership theory through experiential learning; integration of course content with personal experiences.  
Prerequisites: ALED or USAL-LED major, junior or senior classification.

ALED 341 Team Learning  
Credits 3. 3 Lecture Hours.  
Team development theory; emphasizes research on team member behaviors, team decision making models and positive conflict in team environments.  
Prerequisites: Grade of C or better in ALED 340; junior or senior classification.

ALED 342 Learning Organizations  
Credits 3. 3 Lecture Hours.  
Social systems language and archetypes; systems thinking theory including mental models, mastery, team learning, concept models of human organizations.  
Prerequisites: ALED 340; junior or senior classification.

ALED 343 Human Resource Management in Agriculture and Life Sciences  
Credits 3. 3 Lecture Hours.  
Principles, theories, concepts, techniques and applications for managing human resources in food and agricultural organizations and in local communities; attracting, staffing, training, developing and compensating human talent. Not intended for majors in business.  
Prerequisites: ALED 340; junior or senior classification.

ALED 344 Leadership of Volunteers  
Credits 3. 3 Lecture Hours.  
Principles, theories, concepts, techniques and applications for leading volunteers in agriculture and life sciences nonprofit, governmental and community organizations.  
Prerequisites: Grade of C or better in ALED 340; junior or senior classification.

ALED 360 Workshop in Agricultural Leadership and Development  
Credits 1 to 4. 1 to 4 Lecture Hours.  
The study, understanding and solution of human-agricultural problems based on theory learned in the classroom, library, laboratory and fieldwork completed by individuals and teams.  
Prerequisite: Junior or senior classification.

ALED 400 Public Leadership Development  
Credits 3. 3 Lecture Hours.  
Major issues in the study of public leadership, development of leadership skills, and a field investigation done in conjunction with local public leaders.  
Prerequisites: Junior classification and approval of instructor.

ALED 401 Advanced Professional Leadership Development  
Credits 3. 3 Lecture Hours.  
Investigation of the best practices of successful leaders representing various organizational contexts; merging of scholarly mastery of theory with practice.  
Prerequisites: Selection for ALED Leadership Fellows Program; grade of C or better in ALED 340 or ALED 301; junior or senior classification.

ALED 422 Cultural Pluralism in Agriculture  
Credits 3. 3 Lecture Hours.  
Selected topics on the diversity of human resources in agriculture; emphasis on working in a multicultural society and developing a sensitivity toward different cultures; explores the interrelationships between the contributions of diverse individuals and the state, nation and global success of agriculture.  
Prerequisite: Junior or senior classification.

ALED 424 Applied Ethics in Leadership  
Credits 3. 3 Lecture Hours.  
Exploration of ethical and moral theories and the application to multiple leadership contexts and situations.  
Prerequisites: Junior or senior classification; grade of C or better in ALED 301.

ALED 426 Leading and Training Adult Learners  
Credits 3. 3 Lecture Hours.  
Planning educational training programs, including leadership programs, to implement with an adult audience; includes needs assessment, instructional design, lesson plan development, evaluation and other items related to leading adults.  
Prerequisites: Grade of C or better in ALED 340, junior or senior classification.

ALED 440 Leading Change  
Credits 3. 3 Lecture Hours.  
Analysis of change models and theories and the leadership application on individual, organizational and societal changes.  
Prerequisite: Junior or senior classification; grade of C or better in ALED 202.

ALED 441 Agricultural Extension Organization and Methods  
Credits 3. 3 Lecture Hours.  
Cooperative extension in agriculture and home economics; development, objectives, organization, program building and methods of teaching.  
Prerequisite: Junior or senior classification.

ALED 442 Professional Communications in Agriculture and Life Sciences  
Credits 3. 3 Lecture Hours.  
Technological communication theory; instructional and presentation models; teaching strategies; multimedia development.  
Prerequisite: Junior or senior classification.

ALED 481 Seminar  
Credits 3. 3 Lecture Hours.  
Individual and team approaches to the review of leadership concepts and their application; observation and discussion of current leadership trends and issues.  
Prerequisites: ALED or USAL-LED major; senior classification; grade of C or better in ALED 202, ALED 301, ALED 340, ALED 440, and ALED 424.

ALED 485 Directed Studies in Agricultural Leadership Development  
Credits 1 to 4. 0 to 4 Lecture Hours. 1 to 4 Other Hours.  
Directed individual study of selected problems in agricultural leadership and development with emphasis on collection, analysis and presentation of information.  
Prerequisites: Junior or senior classification and approval of instructor.

ALED 489 Special Topics in...  
Credits 1 to 4. 1 to 4 Lecture Hours.  
Special topics in an identified area of agricultural development. May be repeated for credit.  
Prerequisite: Junior or senior classification.
ANSC 108 General Animal Science
Credit 2. 2 Lecture Hours.
Information regarding the processes by which networks of cells are controlled and coordinated within the farm animal.
Prerequisites: Grade of C or better in ANSC 101, ANSC 107 and ANSC 108.

ANSC 107 General Animal Science
Credits 3. 3 Lecture Hours.
(AGRI 1319, 1419*) General Animal Science. General understanding of all aspects of the livestock industry; basic agriculture nomenclature of breeds, species and types of livestock; reproduction, nutrition, genetics, food safety, growth and development of beef cattle, sheep, horses, swine, dairy cattle and poultry; brief description of the companion animal industry.

ANSC 108 General Animal Science Laboratory
Credit 1. 2 Lab Hours.
(AGRI 1419*, AGRI 1119) General Animal Science Laboratory. General overview of the beef cattle, dairy cattle, horse, sheep, swine and poultry industries; information on major breeds, anatomy, phenotypic and genotypic selection criteria and production practices for each species; major disciplines of the animal industry including breeding and genetics, nutrition, reproductive physiology and products; utilization of live animals, models and feedstuffs/equipment to enhance experiential learning approach.
Prerequisite: Concurrent enrollment in ANSC 107.

ANSC 111 Animal Production Systems
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Transformative experiences related to beef cattle, dairy cattle, equine, sheep, swine, goats, companion animals, meats, food products and food safety; exposure to available animal science careers and potential areas of future/additional study.
Prerequisites: Grade of C or better in ANSC 107 and ANSC 108.

ANSC 113 Farm Animal Biosystems
Credits 2. 2 Lecture Hours.
Information regarding the processes by which networks of cells are controlled and coordinated within the farm animal.
Prerequisites: Grade of C or better in ANSC 101, ANSC 107 and ANSC 108.

ANSC 117 Texas Barbecue
Credit 1. 1 Lecture Hour.
Survey, demonstration and participation in preparation techniques of Texas barbecue; comparison of regional and international barbecue methods.
Prerequisite: First year students.

ANSC 201 Introductory Equine Care and Use
Credits 2. 2 Lecture Hours.
Survey of basic equine care and use; breeds of horses and their use; care and maintenance of equines including feeding, health care, housing and equipment.

ANSC 207 Art and Heritage of Livestock
Credits 3. 3 Lecture Hours.
Using art as a venue to understand the legacy and heritage of livestock production and livestock’s contribution to civilization and society; from man as hunter, agriculturalist, and finally, as industrialist; from cave paintings to Russell and Remington; history of the effects of painting, poetry, architecture and sculpture on agriculture.

ANSC 210 Companion Animal Science
Credits 3. 3 Lecture Hours.
Types, care, physiology, common diseases and common treatments of companion animals (dogs, cats, exotic pets); careers including biomedical research; solutions for problems such as behavior and overpopulation.
Prerequisite: ANSC 107.

ANSC 211 Equine Industry and Career Preparation
Credits 2. 2 Lecture Hours.
Identify opportunities and skill sets required to pursue a career in the equine industry; development of resume, communication, professional etiquette and interview skills.

ANSC 215 Introduction to Livestock Evaluation
Credits 2. 1 Lecture Hour. 3 Lab Hours.
Live market animal appraisal in relation to carcass and composition; criteria for selection of breeding livestock; techniques for preparation and delivery of oral reason.

ANSC 221 Equine Handling and Safety
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Working around horses safely and effectively; includes equine behavior, proper handling techniques, controlling movement of horses, health assessment and basic management.
Prerequisite: ANSC 201.

ANSC 230 Animal and Research Experience
Credits 2. 1 Lecture Hour. 2 Lab Hours.
Hands-on experience with farm animals; development and understanding of the scientific method; demonstration of critical thinking skills to evaluate scientific information.

ANSC 242 Growth and Development of Livestock
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Evaluation of slaughter livestock as related to growth and development, production efficiency, carcass value; selection of breeding animals based on performance, production records, visual appraisal; principles of growth biology; biotechnological tools used to manage growth and development.
Prerequisites: ANSC 107 and ANSC 108.

ANSC 289 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours. 0 to 4 Lab Hours.
Selected topics in an unidentified area of animal science. May be repeated for credit.
Prerequisite: Approval of instructor.
ANSC 291 Research
Credits 0 to 4. 0 to 4 Other Hours.
Research conducted under the direction of faculty member in animal science. May be repeated 2 times for credit.
Prerequisites: Freshman or sophomore classification and approval of instructor; 2.0 GPR in major and overall.
ANSC 302 Basic Beef Cattle Production
Credits 3. 3 Lecture Hours.
Fundamental concepts of beef management and production principles. Service course recommended for non-animal science majors.
Prerequisites: ANSC 107 and ANSC 108.
ANSC 303/NFSC 303 Principles of Animal Nutrition
Credits 3. 3 Lecture Hours.
Scientific approach to nutritional roles of water, carbohydrates, proteins, lipids, minerals, vitamins, and other dietary components; emphasis on the comparative aspects of gastrointestinal tracts and tracts on digestion, absorption, and metabolism of nutrients.
Prerequisites: Grade of C or better in ANSC 113; CHEM 101, CHEM 222 or CHEM 227; junior classification or approval of instructor.
Cross Listing: NFSC 303/ANSC 303.
ANSC 305 Animal Breeding
Credits 3. 2 Lecture Hours. 2 Lab Hours.
A systems approach to selection and mating of livestock; gene frequency, heritability, relationship, inbreeding, linebreeding, heterosis, crossbreeding, direct and correlated response to selection, and use of pedigree, family, progeny testing and indices for selection.
Prerequisites: Grade of C or better in ANSC 111 and ANSC 113; GEN 301; STAT 301, STAT 302, STAT 303, or ANSC 309; junior classification or approval of instructor.
ANSC 307/NFSC 307 Meats
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Integrated studies of the meat animal processing sequence regarding the production of meat-type animals and the science and technology of their conversion to human food.
Prerequisites: Grade of C or better in ANSC 111 and ANSC 113; junior classification or approval of instructor.
ANSC 309 Applied Animal Record Keeping
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Keeping, analyzing and interpreting records to make fully-informed decisions on a day-to-day basis for production and management scenarios; practical application unique to animal science and meat processing.
Prerequisite: Junior or senior classification.
ANSC 311 Equine Behavior and Training
Credits 3. 1 Lecture Hour. 5 Lab Hours.
Equine behavior and application of principles of psychology to training horses; systematic approaches to horse training emphasizing principles of learning; equipment and its use; stable management and preparation of horses for competition; separate laboratory sections for students with varying backgrounds.
ANSC 312 Equestrian Technology
Credits 2. 1 Lecture Hour. 3 Lab Hours.
Advanced scientific methods and techniques for execution of equine performances in hunter, dressage and stock horse events; anatomical, physiological and psychological implications; preparation of horses and riders.
ANSC 314 Wool Evaluation and Grading
Credits 2. 1 Lecture Hour. 3 Lab Hours.
Evaluation of U.S.D.A. grades for wool and mohair; steps involved in processing raw wool into finished fabric; genetic and environmental factors affecting quality characteristics of wool and mohair; grading, evaluation and selection of fleeces for economic value; oral and written defense of judgments.
ANSC 315 Livestock Judging
Credits 2. 1 Lecture Hour. 3 Lab Hours.
Selection and evaluation of beef cattle, swine, sheep and horses. Ability to present accurate, clear and concise oral and written reasons stressed.
Prerequisites: ANSC 107 and ANSC 108; junior or senior classification.
ANSC 316 Equine Selection and Judging
Credits 2. 1 Lecture Hour. 3 Lab Hours.
Detailed evaluation and comparison of horses; selection and critique of athleticism and performance in horses; industry trends addressed; oral and written defense of judgments also explained and expected; required for participation on the Horse Judging Team.
Prerequisite: Junior or senior classification or approval of instructor.
ANSC 317 Meat Selection, Evaluation and Grading
Credits 2. 1 Lecture Hour. 3 Lab Hours.
Selection and grading of carcasses and wholesale cuts of beef, pork and lamb; principles of evaluation included in carcass contests and progeny testing.
Prerequisites: ANSC 107 and ANSC 108.
ANSC 318 Animal Feeds and Feeding
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Scientific approaches associated with precision feeding and diet formulation to match nutrient availabilities of feedstuffs with requirements of various classes of livestock species; emphasis on cost-effective feeding strategies to optimize animal productivity, and end-product quality and safety, while mitigating environmental impacts and enhancing animal health and welfare.
Prerequisite: Grade of C or better in ANSC 111, ANSC 113 and ANSC 303/NFSC 303; junior classification or approval of instructor.
ANSC 320 Animal Nutrition and Feeding
Credits 3. 3 Lecture Hours.
Nutritional functions of water, protein, carbohydrates, fats, minerals and vitamins and their digestion, absorption, use and excretion; energy, protein and forage feedstuff characteristics and processing; nutritional requirements, ration formulation and feeding methods for farm animals; general course for non-animal science majors.
Prerequisite: Junior or senior classification or approval of instructor; restricted to students in the college of agriculture and life sciences.
ANSC 325 Advanced Livestock and Product Evaluation
Credits 2. 1 Lecture Hour. 3 Lab Hours.
Advanced evaluation of cattle, swine, sheep and equine; products produced or associated with each species; advanced oral or written defense of judgments associated with changing trends in these industries. May be repeated three times for credit.
Prerequisite: Junior or senior classification.
ANSC 332 Reproduction in Farm Animals
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Physiological principles of reproductive processes in cattle, sheep, swine, and horses including sperm and ova production, estrus, fertilization, gestation and parturition.
Prerequisites: Grade of C or better in ANSC 111 and ANSC 113; junior classification or approval of instructor.
ANSC 335 Purebred Beef Cattle Management  
Credits 2. 1 Lecture Hour. 2 Lab Hours.  
Information and skills needed to be successful in the production, management and merchandising of purebred beef cattle; purpose and organization of the purebred beef cattle industry; and career opportunities in the industry. 
Prerequisite: Junior or senior classification.  

ANSC 337 Meat Merchandising  
Credits 2. 1 Lecture Hour. 3 Lab Hours.  
Steps of meat processing and merchandising of retail and foodservice; merchandising practices such as selection, identification, fabrication, pricing, packaging and distribution.  
Prerequisites: ANSC 307/NFSC 307; junior or senior classification.  

ANSC 351 Current issues in Animal Agriculture  
Credits 3. 3 Lecture Hours.  
Preparation to project a professional image and the use of communication skills to describe animal agriculture; converse about the strengths and weaknesses of animal agriculture.  
Prerequisite: Junior or senior classification.  

ANSC 399 Animal Science Experience  
Credits 0. 0 Lecture Hours.  
Participation in an approved high-impact learning practice; reflection on professional outcomes from animal science body of knowledge; documentation and self-assessment of learning experience at mid and final curriculum points.  
Prerequisite: Junior or senior classification.  

ANSC 402 Exploring Animal Industries  
Credits 2. 2 Lecture Hours.  
Instruction for students nearing the end of their undergraduate studies; theoretical understanding of organizations and human resources available to students; awareness and understanding of the job application process, resume and cover letter writing; networking, professional and business attire; ethics related to job searches and retention.  
Prerequisite: Junior or senior classification.  

ANSC 404 Behavior and Management of Domestic Animals  
Credits 4. 3 Lecture Hours. 2 Lab Hours.  
Application of behavior of cattle, horses, sheep, goats and swine to their management; basic principles, physiology of behavior, perception, training, predators, use of dogs in livestock production, stress and animal welfare.  
Prerequisites: Grade of C or better in ANSC 305, ANSC 307/NFSC 307, ANSC 318 and ANSC 333; junior or senior classification or approval of instructor.  

ANSC 406 Beef Cattle Production and Management  
Credits 4. 3 Lecture Hours. 2 Lab Hours.  
Principles involved for profitable and sustainable, integrated beef cattle production as considered from the perspective of the U.S. cow-calf sector and from an overall systems-based approach.  
Prerequisites: Grade of C or better in ANSC 305, ANSC 307/NFSC 307, ANSC 318, and ANSC 333; junior or senior classification or approval of instructor.  

ANSC 408 Management of Stocker and Feedlot Cattle  
Credits 4. 3 Lecture Hours. 2 Lab Hours.  
Basic principles involved in feeding, management, marketing and disease control of stocker and feeder cattle from weaning through slaughter for economical production of beef.  
Prerequisites: Grade of C or better in ANSC 305, ANSC 307/NFSC 307, ANSC 318, and ANSC 333; STAT 301, STAT 302, STAT 303, or ANSC 309; junior or senior classification.  

ANSC 411 Equine Nutrition and Health  
Credits 3. 3 Lecture Hours.  
Designed to provide knowledge of nutrition and health in the horse; gastrointestinal anatomy, nutrient utilization, feeding management and nutritional requirements; metabolic diseases, infectious diseases, internal and external parasites, and herd health management.  
Prerequisite: Junior or senior classification.  

ANSC 412 Swine Production and Management  
Credits 4. 3 Lecture Hours. 2 Lab Hours.  
Basic principles and their practical application in efficient, economical pork production; all areas of production—breeding and selection, nutrition, housing and equipment, marketing, herd health and economic management.  
Prerequisites: Junior or senior classification or approval of instructor.  

ANSC 414 Sheep and Goat Production and Management  
Credits 4. 3 Lecture Hours. 2 Lab Hours.  
In-depth hands-on experiences related to sheep and goat production and management providing an advanced understanding of small ruminant production.  
Prerequisites: Grade of C or better in ANSC 305, ANSC 307/NFSC 307, ANSC 318, and ANSC 333; junior or senior classification or approval of instructor.  

ANSC 415 Brazil: Comparative Ruminant Production  
Credits 3. 3 Lecture Hours.  
Contrast two scenarios of ruminant production in Brazil; the effects of globalization on the two different production systems.  
Prerequisites: ANSC 303/NFSC 303 or ANSC 320 or approval of instructor.  

ANSC 418 Equine Exercise Physiology  
Credits 3. 2 Lecture Hours. 2 Lab Hours.  
Changes within the systems of the horse resulting from the physical stresses of exercise, adaptations of systems in response to a training regimen; methodology for measuring improvement in physical condition; foundation for development of training programs for horses in moderate, intense or prolonged performance activities.  
Prerequisites: Junior or senior classification and approval of instructor.  

ANSC 419 Equine Reproduction  
Credits 3. 3 Lecture Hours.  
Reproductive anatomy of the stallion and mare; industry and scientific practices; comprehensive analysis of the body of scientific research; development of critical thinking ability to assess and discuss previous research in comparison of needed research.  
Prerequisites: ANSC 201 and junior or senior classification or approval of instructor.  

ANSC 420 Equine Production and Management  
Credits 4. 3 Lecture Hours. 2 Lab Hours.  
Application of biological and biotechnological principles and concepts in areas including genetics, breeding, nutrition, reproduction, immunology, parasitology, anatomy and exercise physiology to efficient production of horses for market; management of equine enterprises.  
Prerequisites: ANSC 201 and ANSC 333; junior or senior classification.
ANSC 421 Stock Horse Advanced Training  
Credits 3. 3 Lecture Hours. 2 Lab Hours.  
Theory and practice of applying scientific principles of psychology and behavior modification to advanced training of the stock horse; exercise conditioning and humane training methods to maximize learning effectiveness; current industry trends for preparing horses and showing in stock horse events.  
Prerequisites: ANSC 311 and previous riding experience.

ANSC 423 Issues in the Equine Industry  
Credits 3. 3 Lecture Hours.  
Integration of cumulative knowledge acquired in the equine science curriculum to demonstrate critical thinking and communication skills to address critical issues in the equine industry.  
Prerequisites: Junior or senior classification; approval of instructor.

ANSC 424 Equine Sales Management  
Credits 3. 3 Lecture Hours.  
Hands-on horse sale management experience through planning and conducting the Texas A&M University Department of Animal Science Horse Sale.  
Prerequisite: Junior or senior classification and approval of instructor.

ANSC 431 Equine Marketing and Development  
Credits 3. 3 Lecture Hours.  
Scope of domestic and international equine industry; safe handling and transport of horses for export or import; career opportunities in the equine field.  
Prerequisite: Junior or senior classification or approval of instructor.

ANSC 434 Animal Reproduction Management  
Credits 4. 3 Lecture Hours. 2 Lab Hours.  
Available and emerging technologies including control of ovulation, artificial insemination, embryo manipulation and transfer, in vitro fertilization and animal cloning for managing reproduction of farm animals; hands-on sessions using available technologies including artificial insemination of cattle.  
Prerequisites: Grade of C or better in ANSC 305, ANSC 307/NFSC 307, ANSC 318 and ANSC 333; junior or senior classification or approval of instructor.

ANSC 436 Texas Panhandle Beef Production Tour  
Credits 2. 2 Lecture Hours.  
Facets of beef production from cow/calf operations to retail product; experiential knowledge of technologies and practices to enhance efficiency to enlighten students regarding the array of career opportunities in the beef production industry.  
Prerequisites: Junior or senior classification or approval of instructor.

ANSC 437 Marketing and Grading of Livestock and Meats  
Credits 3. 2 Lecture Hours. 2 Lab Hours.  
Study of USDA livestock and carcass grades; understanding current market trends for beef, pork, lamb and goat; review of branded and certified programs; principles applied in contracting, breakeven determination, hedging, and grid or formula pricing.  
Prerequisite: Junior or senior classification.

ANSC 439 Feedlot Risk Management  
Credits 2. 2 Lecture Hours.  
Advanced study of livestock marketing techniques; cash sales, video sales, futures and options markets, forward contracting; problem solving in real-time livestock marketing situations; risk of ownership of hypothetical livestock operations.  
Prerequisites: junior or senior classification or approval of instructor.

ANSC 447 Advanced Meat Science and Technology  
Credits 4. 3 Lecture Hours. 3 Lab Hours.  
Advanced basic and applied studies of meat science and/or technology utilizing the underlying physiological and structural components for conversion to human food; understanding the influence of pre- and post-harvest factors on meat quality, composition, color, packaging, sensory and preparation factors; applying scientific and business principles to manufacturing and process flow of commercial meat food products and demonstrating knowledge of these principles through development of meat products.  
Prerequisites: Grade of C or better in ANSC 305, ANSC 307/NFSC 307, ANSC 318 and ANSC 333; GENE 301; STAT 301, 302, 303, or ANSC 309; junior or senior classification or approval of instructor.

ANSC 457/NFSC 457 Hazard Analysis and Critical Control Point System  
Credits 3. 3 Lecture Hours.  
Hazard Analysis and Critical Control Point (HACCP) principles specifically related to meat and poultry; microbiological and process overviews; good manufacturing practices and standard operating procedures development.  
Prerequisite: NFSC 326/DASC 326 or approval of instructor.  
Cross Listing: NFSC 457/ANSC 457.

ANSC 470/NFSC 470 Quality Assurance for the Food Industry  
Credits 3. 3 Lecture Hours.  
Principles of food system process control including statistical process control (SPC) and the tools required to assure uniform communication and understanding of quality assurance systems.  
Prerequisite: Junior or senior classification.  
Cross Listing: NFSC 470/ANSC 470.

ANSC 481 Seminar  
Credit 1. 1 Lecture Hour.  
Review of literature and research problems related to the livestock and food industries; preparation of a technical report including an oral presentation supported by a written technical paper.  
Prerequisite: Senior classification.

ANSC 484 Livestock Practicum  
Credit 1. 2 Other Hours.  
Provides an opportunity to learn skills required in livestock production; planned for students who have had limited farm and ranch experience in one or more species.  
Prerequisite: Junior or senior classification in animal science or approval of instructor.

ANSC 485 Directed Studies  
Credits 0 to 4. 0 to 4 Other Hours.  
Directed individual study of selected problem in field of animal science.  
Prerequisites: Junior or senior classification; written approval of professor supervising the activity; 2.0 GPR in major and overall.

ANSC 487/NFSC 487 Sensory Evaluation of Foods  
Credits 3. 2 Lecture Hours. 2 Lab Hours.  
Application of sensory science principles and practices to food systems including an understanding of discriminative, descriptive and consumer sensory techniques.  
Prerequisites: CHEM 222 or CHEM 227; junior or senior classification.  
Cross Listing: NFSC 487/ANSC 487.

ANSC 489 Special Topics in...  
Credits 1 to 4. 1 to 4 Lecture Hours. 0 to 8 Lab Hours.  
Selected topics in an identified area of animal science. May be repeated for credit.  
Prerequisite: Junior or senior classification.
ANTH 491 Research
Credits 0 to 4. 0 to 4 Other Hours.
Research conducted under the direction of faculty member in animal science. May be repeated 3 times for credit. Registration in multiple sections of this course is possible within a given semester provided that the per semester credit hour limit is not exceeded.
Prerequisite: Junior or senior classification and approval of instructor; 2.0 GPR in major and overall.

ANTH 494 Animal Science Internship
Credits 0 to 5. 0 to 5 Other Hours.
Independent study and supervised field experience related to the student’s professional interest.
Prerequisites: Junior or senior classification or approval of instructor; 2.0 GPR in major and overall.

ANTH 498 Animal Science Capstone
Credits 4. 3 Lecture Hours. 2 Lab Hours.
Senior capstone project for students preparing to enter a career related to animal science or a professional school; individual projects based on a self-selected topic in animal science; includes a paper containing both translational and technical descriptions plus statements regarding the expected financial and social impacts of selected topic.
Prerequisites: Grade of C or better in ANSC 399 and one from the following: ANSC 404, ANSC 406, ANSC 408, ANSC 412, ANSC 414, ANSC 420, ANSC 434, ANSC 447 or DASC 418; junior or senior classification or approval of instructor.

ANTH - Anthropology (ANTH)

ANTH 201 Introduction to Anthropology
Credits 3. 3 Lecture Hours.
(ANTH 2346, HUMA 2323) Introduction to Anthropology. An introduction to the discipline of anthropology through the examination of its four subfields: archaeology, physical anthropology, sociocultural anthropology and linguistics.

ANTH 202 Introduction to Archaeology
Credits 3. 3 Lecture Hours.
(ANTH 2302) Introduction to Archaeology. An introduction to the study of the human past through the retrieval, analysis, and interpretation of material remains.

ANTH 204 The Prehistoric World
Credits 3. 3 Lecture Hours.
Exploration of the development of human societies and world prehistory from the beginnings of humanity more than two million years ago to emergence of complex civilizations.

ANTH 205 Peoples and Cultures of the World
Credits 3. 3 Lecture Hours.
Survey of human cultures around the world using case studies of customs and cultural organization; case studies exemplifying contrasting types of cultures and societies.

ANTH 210 Social and Cultural Anthropology
Credits 3. 3 Lecture Hours.
(ANTH 2351) Social and Cultural Anthropology. Evolution of cultures; differences, similarities and effects of material and non-material culture on economic, social and political organization.

ANTH 225 Introduction to Biological Anthropology
Credits 3. 3 Lecture Hours.
Study of human biology including an examination of evolutionary processes acting on human populations; human genetics; non-human primate anatomy, classification and ecology of primates; the primate paleontological record, and human variation and adaptation. Concurrent registration in ANTH 226 recommended.

ANTH 226 Introduction to Biological Anthropology Laboratory
Credit 1. 3 Lab Hours.
Exploration of basic evolutionary principles through population genetics; hands-on exposure to the fossils of primate and human evolution along with opportunity to measure, compare, contrast and observe trends that have occurred throughout the Cenozoic era. Concurrent registration in ANTH 225 is recommended.

ANTH 229 Introduction to Folklore
Credits 3. 3 Lecture Hours.
Study of folklore through selected examples of traditional cultures, their beliefs, customs and art forms such as: tales, folksongs, proverbs, riddles and material culture.

ANTH 270 Cultural Diversity and Ethics
Credits 3. 3 Lecture Hours.
Examination of the cultural construction of ethical values and how cultural diversity, including beliefs, values and ways of doing business, impacts human technological innovation; focuses on developing a holistic, social-science mindset and application of critical thinking skills.

ANTH 285 Directed Studies
Credits 0 to 3. 0 to 3 Other Hours.
For individual research in anthropology on subjects not included in established courses. May be taken two times for credit.
Prerequisites: Freshman or sophomore classification and approval of instructor.

ANTH 289 Special Topics In...
Credits 1 to 4. 1 to 4 Lecture Hours. 0 to 4 Lab Hours.
Selected topics in an identified area of anthropology. May be repeated for credit.

ANTH 291 Research
Credits 0 to 3. 0 to 3 Other Hours.
Research conducted under the direction of a faculty member in Anthropology. May be taken two times for credit.
Prerequisites: Freshman or sophomore classification and approval of instructor.

ANTH 300 Cultural Change and Development
Credits 3. 3 Lecture Hours.
Anthropological strategies for the study of cultural change and the implication of these strategies for the development of Western and non-Western societies.

ANTH 301 Indians of North America
Credits 3. 3 Lecture Hours.
Native North American cultures from the Arctic to Mesoamerica; their origins, cultures prior to extensive acculturation and their contemporary situations.

ANTH 302 Archaeology of North America
Credits 3. 3 Lecture Hours.
Overview of archaeology and prehistory of North America from the arrival of humankind through the development of agriculture to Euro-American contact.
Prerequisite: ANTH 201, ANTH 202, ANTH 204, ANTH 205, or ANTH 210.
ANTH 303 Archaeology of the American Southwest
Credits 3. 3 Lecture Hours.
Overview of archaeology and prehistory of the southwestern United States and northern Mexico from the earliest evidence of human occupation to the Spanish conquest.
Prerequisite: ANTH 201, ANTH 202, ANTH 204, ANTH 205, or ANTH 210.

ANTH 304 Archaeology Roadshow
Credits 3. 3 Lecture Hours.
Interdisciplinary field-trip in the archaeology and paleoecology of a specific region; high-impact learning experiences in a field setting.
Prerequisites: ANTH 201, ANTH 202, ANTH 204, ANTH 205, or ANTH 225; approval of instructor.

ANTH 305 Fundamentals of Anthropological Writing
Credit 1. 1 Lecture Hour.
Basic types of writing expected of anthropology students; emphasis on the subject matter of an upper-division anthropology course in which the student is currently enrolled.
Prerequisites: Junior or senior classification and co-enrollment in another upper-division anthropology course (the "companion course").

ANTH 308 Archaeology of Mesoamerica
Credits 3. 3 Lecture Hours.
Development of Indian civilizations in Mexico and Guatemala, including prehistory of the Olmec, Maya, Aztec and other regional cultures to the time of the Spanish conquest.

ANTH 312 Fossil Evidence of Human Evolution
Credits 3. 3 Lecture Hours.
Detailed review of fossil antecedents of humans including theoretical implications for an understanding of human evolution.
Prerequisite: ANTH 225 or approval of instructor.

ANTH 313 Historical Archaeology
Credits 3. 3 Lecture Hours.
Use and methods of historical archaeology in locating, documenting, restoring and preserving our historical resources.

ANTH 314 Agrarian Peasant Societies
Credits 3. 3 Lecture Hours.
Major adaptations among traditional agricultural peoples of the world; production and marketing organization; culture of the village; ties between peasants and the nation; contemporary changes in traditional life.

ANTH 316 Nautical Archaeology
Credits 3. 3 Lecture Hours.
Nautical Archaeology Underwater shipwrecks, sunken harbors, and other submerged evidence of human activities; relationship to cultural geography in general; problems of diving technology, surveying and preservation; relevance to modern problems.
Prerequisite: Junior or senior classification.

ANTH 317/RELS 317 Introduction to Biblical Archaeology
Credits 3. 3 Lecture Hours.
Application of archaeology in biblical research; basic overview of the material cultures that are the setting for the biblical narratives.
Cross Listing: RELS 317/ANTH 317.

ANTH 318 Nautical Archaeology of the Americas
Credits 3. 3 Lecture Hours.
Seafaring in the Americas from the 16th to the 20th centuries based on shipwreck archaeology; ship construction, exploration, commerce, naval warfare and related activity; influence of seafaring on the cultures, economics and history of the Western Hemisphere.

ANTH 323 Nautical Archaeology of the Mediterranean
Credits 3. 3 Lecture Hours.
The archaeology of ancient seafaring in the Mediterranean from the Stone Age through the Roman Empire.
Prerequisite: Junior or senior classification.

ANTH 324/MUSC 324 Music in World Cultures
Credits 3. 3 Lecture Hours.
Examination of music from an ethnomusicological perspective focusing on musical performance and the complex interrelationship of music to culture, society and daily life; examination of music from a variety of cultures through a series of case studies.
Prerequisite: Junior or senior classification or approval of instructor.
Cross Listing: MUSC 324/ANTH 324.

ANTH 330 Field Research in Anthropology
Credits 1 to 9. 1 to 9 Other Hours.
Training for students in formulating and solving anthropological problems through field research; problem oriented field research under supervision.
Prerequisites: Grade of C or better in ANTH 201, ANTH 202, ANTH 204, ANTH 205, ANTH 210, or ANTH 225; approval by instructor.

ANTH 335/ASIA 335 Cultures of Central Asia
Credits 3. 3 Lecture Hours.
Study of anthropological research in Central Asia: ecological adaptations; colonialism and post-colonialism; ethnic politics and ethnic conflict; religion and identity, gender and family, globalization and modernization.
Prerequisite: Junior or senior classification.
Cross Listing: ASIA 335/ANTH 335.

ANTH 340/RELS 340 Folklore and the Supernatural
Credits 3. 3 Lecture Hours.
Traditional expressions of the supernatural such as superstition, belief tale and divination classified as folklore genres and their relationships to the cultures in which they develop; theories drawn from anthropology, folklore and related social sciences.
Prerequisite: Junior or senior classification or approval of instructor.
Cross Listing: RELS 340/ANTH 340.

ANTH 350 European Archaeology
Credits 3. 3 Lecture Hours.
Overview of archaeology and prehistory of Europe from the evolution of the hominids to the development of agriculture and the rise of civilization.

ANTH 351 Classical Archaeology
Credits 3. 3 Lecture Hours.
Origins and spread of Western civilization through the material remains of Minoan, Mycenaen, Etruscan, and early Greek and Roman cultures.
Prerequisite: Junior or senior classification or approval of instructor.

ANTH 353/CLAS 353 Archaeology of Ancient Greece
Credits 3. 3 Lecture Hours.
Archaeology of ancient Greece from the Stone Age until the ascent of Rome in the Hellenistic Period; remains of ancient Greek art (sculpture, mosaic, painting), architecture (temples, homes, civic structures), religion (figurines, votive offerings), and social history (coins, inscriptions).
Prerequisite: Junior or senior classification.
Cross Listing: CLAS 353/ANTH 353.
ANTH 354/CLAS 354 Archaeology of Ancient Italy  
Credits 3. 3 Lecture Hours.  
Archaeology of ancient Italy from the Stone Age until the collapse of the Roman Empire in the fourth century; remains of ancient Etruscan and Roman art (sculpture, mosaic, painting), architecture (temples, homes, civic structures), religion (figurines, votive offerings), and social history (coins, inscriptions).  
Prerequisite: Junior or senior classification.  
Cross Listing: CLAS 354/ANTH 354.

ANTH 360 Ancient Civilizations of the World  
Credits 3. 3 Lecture Hours.  
Explores recent discoveries and efforts by archaeologists to understand the rise and fall of states and civilizations that emerged in the Near East, Africa, India, Europe, China, Mesoamerica, and Peru between 3500 BCE and 1500 CE.  
Prerequisite: Junior or senior classification.

ANTH 401 Ice Age Humans in North America  
Credits 3. 3 Lecture Hours.  
Archaeological, environmental and geological evidence related to the timing of human entry into the Americas and megafaunal extinctions at the end of the Pleistocene.  
Prerequisite: ANTH 202 or equivalent.

ANTH 402 Archaeological Artifact Conservation  
Credits 4. 3 Lecture Hours. 3 Lab Hours.  
Analysis of the treatments for artifacts of clay, stone, glass, wood, shell, bone, fiber and metal from archaeological excavations or ethnographic, and historic collections presented in an integrated series of lectures and hands-on laboratory experience.  
Prerequisite: Junior or senior classification or approval of instructor.

ANTH 403/RELS 403 Anthropology of Religion  
Credits 3. 3 Lecture Hours.  
Anthropological approach to religion and to the relationship between religion, economics, politics and social structure with particular reference to non-Western, preindustrial societies.  
Cross Listing: RELS 403/ANTH 403.

ANTH 404/WGST 404 Women and Culture  
Credits 3. 3 Lecture Hours.  
Examines women’s lives in evolutionary and cross-cultural perspective; women’s roles in subsistence, politics, religion and economics in traditional cultures; women’s roles in international development; the cultural and social construction of women’s biology cross-culturally including circumcision, menstruation, pregnancy, childbirth and motherhood.  
Cross Listing: WGST 404/ANTH 404.

ANTH 405 Introduction to the Primates  
Credits 3. 3 Lecture Hours.  
Survey of nonhuman primates from ecological and evolutionary perspectives covering numerous topics including: taxonomy; primate evolution; behavioral observation; reproductive strategies; diet; and conservation.  
Prerequisite: Junior or senior classification.

ANTH 409 Science, Pseudoscience and Critical Thinking in Anthropology  
Credits 3. 3 Lecture Hours.  
Close scrutiny of fantastic claims made across a broad spectrum of media regarding anthropology, biological anthropology and archaeology; distinction of science from pseudoscience; critical evaluation of scientific and pseudoscientific research; evaluation of media portrayal of science; development of critical thinking skills for skeptical investigation of extraordinary claims.  
Prerequisite: Junior or senior classification or approval of instructor.

ANTH 410 Anthropological Theory  
Credits 3. 3 Lecture Hours.  
A systematic examination of the basic principles of anthropology.  
Prerequisite: ANTH 210.

ANTH 412 Archaeological Theory  
Credits 3. 3 Lecture Hours.  
History of scientific archaeological exploration; major theoretical paradigms and movements in archaeological theory; current trends in archaeology; intellectual developments from other disciplines that influenced archaeological thought.  
Prerequisites: Junior or senior classification, ANTH 202 or approval of instructor.

ANTH 415 Anthropological Writing  
Credits 3. 3 Lecture Hours.  
Reading and discussion of the classic genres of anthropological literature; instruction in writing styles and techniques appropriate to each genre, followed by guided writing assignments.  
Prerequisite: Junior or senior classification.  
Cross Listing: CLAS 417/ANTH 417.

ANTH 417/CLAS 417 Naval Warfare and Warships in Ancient Greece and Rome  
Credits 3. 3 Lecture Hours.  
Extensive survey of Greek and Roman warships, naval warfare, naval strategy and tactics drawing upon archaeological evidence, literary documentation and iconographic material, from the Bronze Age (Ancient Egypt and the mythical Trojan War) to the Imperial Roman Navy.  
Prerequisite: Junior or senior classification.  
Cross Listing: CLAS 417/ANTH 417.

ANTH 418 Romans, Arabs, and Vikings--Seafaring in the Mediterranean during the early Christian Era  
Credits 3. 3 Lecture Hours.  
Examination of seafaring, maritime commerce, naval affairs, and shipbuilding in the Mediterranean from the late Roman Period until the fall of Constantinople in 1453.  
Prerequisite: Junior or senior classification.

ANTH 419 Indians of Texas  
Credits 3. 3 Lecture Hours.  
Study of diverse native/immigrant Texas Indian lifeways/cultures from late pre-European to contemporary times; exploration of historical underpinnings, traditional cultures, especially land-use patterns; assessment of tribal relationships with colonial powers, U.S., and Texas governments as evidenced in ethnographic, ethnohistoric, and historical materials; application toward anthropological, archaeological, and human ecology research.  
Prerequisites: Junior or senior classification; ANTH 201, ANTH 202, ANTH 205, ANTH 210, ANTH 301, HIST 258, or HIST 308, or approval of instructor.
ANTH 421 Advanced Museum Studies
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Exploration of advanced topics in museum programs; preservation, research, education, outreach; development and implementation; emphasis on historical contexts, disciplinary intersections, ethical obligations and professional responsibilities; service to community, state and national interest and advancement of sciences.
Prerequisite: Grade of C or better in MUST 221 or MAST 220; junior or senior classification.

ANTH 423 Bioarchaeology
Credits 3. 3 Lecture Hours.
Role of human skeletal studies in reconstructing the biological and cultural past of humans; evidence gleaned from human skeletal remains recovered from archaeological sites such as data regarding diet, health, genetics and migration.
Prerequisites: ANTH 225; junior or senior classification.

ANTH 424 Human Evolutionary Ecology: Culture and Cooperation
Credits 3. 3 Lecture Hours.
Examination of evolutionary perspective to explore culture, cooperation and sociality and subsistence behaviors across a wide variety of human cultures; part of the Human Evolutionary Ecology series along with ANTH 434.
Prerequisite: Junior or senior classification.

ANTH 425 Human Osteology
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Concepts and methods used by anthropologists to identify, describe and analyze human skeletal remains from forensic and archaeological contexts.
Prerequisites: ANTH 225 or VIBS 305; junior or senior classification.

ANTH 426 Anthropology of Food and Nutrition
Credits 3. 3 Lecture Hours.
Anthropological study of human foodways and their nutritional consequences; how environmental, biological and cultural factors interact to produce patterns of food intake, and the effects of such patterns on health, growth and fertility; examples drawn primarily from non-Western societies.
Prerequisite: ANTH 201 or ANTH 210 or ANTH 225 or NUTR 202 or approval of instructor.

ANTH 427 Human Biological Variation
Credits 3. 3 Lecture Hours.
Biological basis of variation in the physical features of modern humans; details of anatomical and physiological differences of living populations to understand their adaptive and historical significance; history of human variation studies rooted in the historical notion of "race."
Prerequisites: ANTH 225 and ANTH 226, or BIOL 214 or BIOL 225; junior or senior classification.

ANTH 430 Applied Anthropology
Credits 3. 3 Lecture Hours.
Theory, ethics and practical applications of anthropological methods and concepts as they relate to planned programs of sociocultural change.
Prerequisites: ANTH 210; junior or senior classification.

ANTH 434 Human Evolutionary Ecology: Reproduction and Parenting
Credits 3. 3 Lecture Hours.
Evolutionary ecology perspective on family-formation patterns, sexuality, reproduction and parenting of humans throughout the life course and across different cultures; part of a Human Evolutionary Ecology series along with ANTH 424.
Prerequisites: Junior or senior classification.

ANTH 435 Medical Anthropology
Credits 3. 3 Lecture Hours.
Overview of medical anthropology, a subfield in anthropology which examines the biological and cultural basis of health and disease in order to understand the influence of culture on the illness experience and treatment.
Prerequisite: Junior or senior classification or approval of instructor.

ANTH 436/RELS 436 Ancient Egypt
Credits 3. 3 Lecture Hours.
Archaeology and history of ancient Egypt from earliest times to the end of the New Kingdom period.
Prerequisite: Junior or senior classification or approval of instructor.
Cross Listing: RELS 436/ANTH 436.

ANTH 437 Ethnobotany
Credits 3. 3 Lecture Hours.
Interdisciplinary study of the complex and dynamic relationships that exist between people and plants.
Prerequisite: Junior or senior classification or approval of instructor.

ANTH 439/WGST 439 Gender, Ethnicity and Class in Archaeological Research
Credits 3. 3 Lecture Hours.
Exploration of theoretical and methodological issues in engendering archaeology; ideological biases in the interpretation of roles attributed to women, men, and underrepresented groups in the past; the impact of cultural transformation on underrepresented groups and gender relations; and the formulation of research questions concerning these issues.
Prerequisites: ANTH 202, ANTH 210, WGST 200, or WGST 207/SOCI 207; junior or senior classification or approval of instructor.
Cross Listing: WGST 439/ANTH 439.

ANTH 440 Studies in Globalization
Credits 3. 3 Lecture Hours.
Selected issues on the anthropology of globalization such as the impact of global communications of media, money and people on local cultures, identities and politics, migration and political economy. May be taken three times for credit.
Prerequisites: Junior or senior classification or approval of instructor.

ANTH 444/CLAS 444 Classical Archaeology
Credits 3. 3 Lecture Hours.
History of the discipline through the individuals, organizations, excavations, theoretical models and ethical issues that have shaped it.
Prerequisite: Junior or senior classification.
Cross Listing: CLAS 444/ANTH 444.

ANTH 445 Studies in African Diaspora
Credits 3. 3 Lecture Hours.
Examination of topics related to global African diaspora including African descent populations outside of Africa wherever found (the Americas, the Caribbean, Europe, Asia, etc.); construction of blackness in Latin America; diversity of past and present African descent populations in the Old World; social and political mobilization; religion; popular culture; cultural politics; politics of identity. May be taken three times for credit.
Prerequisite: Junior or senior classification.

ANTH 446 Ceramic Artifact Analysis
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Concepts, methods, and approaches used in the analysis of archaeological pottery with a focus on the techniques and theories used to bridge the gap between the recovery of ceramic artifacts and their interpretation within various anthropological contexts.
Prerequisite: ANTH 202 and approval of instructor; junior or senior classification.
ANTH 447 Lithic Artifact Analysis  
Credits 3. 2 Lecture Hours. 3 Lab Hours.  
Laboratory-based course reviewing methods archaeologists use to analyze stone tools and debitage, including identification of tool-stone sources, reconstruction of technology, explanation of assemblage variability, and microscopic use-wear analysis.  
Prerequisite: ANTH 202 and approval of instructor; junior or senior classification.

ANTH 448 Quantitative Methods in Anthropology  
Credits 3. 3 Lecture Hours.  
Quantitative analytical methods employed by anthropologists; includes statistical analyses, statistical software and sampling theory commonly used in anthropological research.  
Prerequisites: Junior or senior classification; STAT 302 or STAT 303.

ANTH 454 Archaeological Photography  
Credits 3. 2 Lecture Hours. 3 Lab Hours.  
How to better use cameras in the process of reporting archaeological sites and material culture by exploring old and new photographic technologies.  
Prerequisite: Junior or senior classification.

ANTH 458 Quantitative Ethnographic Methods  
Credits 3. 3 Lecture Hours.  
Quantitative data collection and analytical methods employed by anthropologists; includes standardized observation, structured interviews, demography and network analysis; hands-on assignments involving data collection among local community.  
Prerequisite: Junior or senior classification.

ANTH 461 Environmental Archaeology  
Credits 3. 2 Lecture Hours. 3 Lab Hours.  
Exploration of the paleoecological context in which past humans interacted with the natural environment encompassing plants, animals and landscape; advanced method, theory and applications in paleoenvironmental reconstruction.  
Prerequisites: ANTH 202 or approval of instructor; junior or senior classification.

ANTH 484 Anthropology Internship  
Credits 0 to 3. 0 to 3 Other Hours.  
Provides students with the opportunity to gain practical experience in a variety of settings, including local, state or federal agencies; museums; non-profit organizations; non-governmental organizations; private firms. May be taken four times for credit.  
Prerequisite: Junior or senior classification.

ANTH 485 Directed Studies  
Credits 0 to 9. 0 to 9 Other Hours.  
For individual research in anthropology on subjects not included in established courses.  
Prerequisite: Junior or senior classification or approval of instructor.

ANTH 489 Special Topics in...  
Credits 1 to 4. 1 to 4 Lecture Hours.  
Selected topics in an identified area of anthropology. May be repeated for credit.

ANTH 491 Research  
Credits 0 to 3. 0 to 3 Other Hours.  
Research conducted under the direction of a faculty member in Anthropology. May be taken two times for credit.  
Prerequisites: Junior or senior classification and approval of instructor.

ARAB - Arabic (ARAB)

ARAB 101 Beginning Arabic I  
Credits 4. 4 Lecture Hours.  
(ARAB 1411) Beginning Arabic I. Introduction to Modern Standard Arabic in its written and spoken forms; emphasis on conversation, rudimentary vocabulary, simple grammar, and reading.

ARAB 102 Beginning Arabic II  
Credits 4. 4 Lecture Hours.  
(ARAB 1412) Beginning Arabic II. Introduction of more complex grammatical constructions; vocabulary building; emphasis on putting acquired vocabulary and grammar to conversational use.  
Prerequisite: ARAB 101 or equivalent.

ARAB 104 Intensive Beginning Arabic  
Credits 8. 6 Lecture Hours.  
Accelerated elementary language study, with oral, listening, reading and writing practice. Equivalent to ARAB 101 and ARAB 102.

ARAB 201 Intermediate Arabic I  
Credits 3. 3 Lecture Hours.  
(ARAB 2311) Intermediate Arabic I. Practice of listening, speaking and writing skills; vocabulary building; discussion of topics related to daily life and general aspects of Arab culture.  
Prerequisite: ARAB 102 or ARAB 104, or equivalent.

ARAB 202 Intermediate Arabic II  
Credits 3. 3 Lecture Hours.  
(ARAB 2312) Intermediate Arabic II. Emphasis on comprehending printed material, perfecting pronunciation, and attending to more complex grammar; discussion of topics holding general and professional interest; knowledge of Arab culture and history.  
Prerequisite: ARAB 201 or equivalent.

ARAB 204 Intensive Intermediate Arabic  
Credits 6. 6 Lecture Hours.  
Accelerated intermediate language study, with oral, listening, reading and writing practice. Equivalent to ARAB 201 and ARAB 202.  
Prerequisite: ARAB 102 or ARAB 104.

ARAB 221 Introduction to Arabic Language and Society  
Credits 3. 3 Lecture Hours.  
Examination of critical linguistic issues in the Arab world from a sociolinguistic perspective, including language and religion; language and power; language and nationalism; and language and education.  
Prerequisite: Approval of instructor.

ARAB 222 Field Studies I: Language, Culture, and Society  
Credits 3. 3 Lecture Hours.  
Arabic language and culture taught in an Arabic-speaking country; living with a host family, supervised travel of cultural interest; participation in activities of host institution.  
Prerequisite: ARAB 102 or ARAB 104, or equivalent.

ARAB 285 Directed Studies  
Credits 1 to 4. 1 to 4 Other Hours.  
Individual supervision of readings or assigned projects in an Asian Language, selected for each student individually; written or oral reports.  
Prerequisite: Approval of Arabic and Asian Language Office Director.

ARAB 289 Special Topics in...  
Credits 1 to 4. 1 to 4 Lecture Hours. 0 to 4 Lab Hours.  
Selected topics in an identified area of Arabic studies. May be repeated for credit.  
Prerequisite: Approval of instructor.
ARAB 301 Reading and Composition
Credits 3. 3 Lecture Hours.
Advanced Arabic grammar and readings of average difficulty and of different genres, including literary and journalistic texts and other culturally-enriched materials in order to develop awareness of cultural products, perspectives, and practices found in the Arab world.
Prerequisites: ARAB 202 or ARAB 204, or equivalent; junior or senior classification or approval of instructor.

ARAB 302 Reading and Composition II
Credits 3. 3 Lecture Hours.
Readings of average difficulty and of different genres, including literary and journalistic texts and other culturally-enriched materials; development of writing skills with emphasis on grammatical constructions; expansion of vocabulary and oral expression.
Prerequisites: ARAB 301; junior or senior classification or approval of instructor.

ARAB 321 Business Arabic
Credits 3. 3 Lecture Hours.
Business and financial terminologies useful in the Arab World; cultural etiquette for effective communication in Arabic business settings; oral and written business reports from a variety of authentic sources; language skills and communication strategies for traveling, shopping, and conducting financial transactions in the Arab World.
Prerequisites: ARAB 202 or ARAB 204, or equivalent; junior or senior classification or approval of instructor.

ARAB 322 Field Studies II: Language, Culture, and Society
Credits 3. 3 Lecture Hours.
Arabic language and culture taught in an Arabic-speaking country; living with a host family; supervised travel of cultural interest; participation in activities of host institution.
Prerequisites: ARAB 202 or ARAB 204, or equivalent; junior or senior classification or approval of instructor.

ARAB 323 Media Arabic
Credits 3. 3 Lecture Hours.
Analysis of current events in the Arab World; use of print and electronic materials in Arabic from variety of media sources; discussion of different points of view in media representation/coverage; issues pertaining to business, politics, culture and entertainment in the Arab World.
Prerequisites: ARAB 202 or ARAB 204, or equivalent; junior or senior classification or approval of instructor.

ARAB 475 Media and the Middle East
Credits 3. 3 Lecture Hours.
Examination of how media (e.g., literature, news, film, television) contribute to our understanding of historical events in the Middle East; analysis of cultural, social, political and historical circumstances of media representation of events; exploration of various media genres' techniques and narrative structure. May be taken two times for credit with a focus on different medium.
Prerequisite: Junior or senior classification or approval of instructor.

ARAB 485 Directed Studies
Credits 1 to 4. 1 to 4 Other Hours.
Individual supervision of readings or assigned projects selected for each student individually; written or oral reports.
Prerequisite: Approval of instructor and Director of AAAL.

ARAB 489 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Selected topics in an identified area of Arabic studies. May be repeated for credit.
Prerequisite: Approval of instructor.

ARAB 491 Research
Credits 1 to 4. 1 to 4 Other Hours.
Research in Arabic studies conducted under the direction of faculty member approved by the Director of AAAL. May be taken 2 times for credit.
Prerequisites: Junior or senior classification and approval of instructor.

ARCH - Architecture (ARCH)

ARCH 205 Architecture Design I
Credits 4. 1 Lecture Hour. 9 Lab Hours.
Issues and methods in designing environments for human habitation and well-being; projects addressing site, functional planning, spatial ordering, form generation through a recognition of the synthesis of space, structure, use and context; reinforcement of appropriate graphic and model building techniques.
Prerequisites: ENDS 105, ENDS 108, ENDS 115.

ARCH 206 Architecture Design II
Credits 5. 2 Lecture Hours. 9 Lab Hours.
Fundamental issues of innovative design processes and creation explored through the creative use of past, present and future materials, tools, and technologies; with an emphasis upon the research of materials, methods, scale, craft and technique as instruments of design, fabrication, and production.
Prerequisites: ARCH 205; ENDS 105, ENDS 108, ENDS 115.

ARCH 207 Architecture Design II
Credits 5. 2 Lecture Hours. 9 Lab Hours.
Technology as medium for design planning and communication; impact and influence of technology on architectural design process; investigation of computing theories, systems, methods and current and future trends through creative thinking and innovation design; problem solving and creation with the use of digital media.
Prerequisites: ARCH 205 and ENDS 105, ENDS 106, ENDS 115, ENDS 116.

ARCH 212 Social and Behavioral Factors in Design
Credits 3. 3 Lecture Hours.
Social and behavioral factors in the built and natural environment; environmental perception and spatial cognition; social-environmental processes such as privacy and crowding; setting-oriented discussion on residences, education, and the workplace; the psychology of nature and natural resource management; social design and social science contribution to architectural design.

ARCH 213 Sustainable Architecture
Credits 3. 3 Lecture Hours.
A comprehensive introduction to sustainability concepts, techniques and applications at all levels of the built environment, history of contemporary development of sustainable architecture from 1960 to the present; design strategies, environmental technologies and social factors for reducing building energy needs and carbon foot prints; global applications of sustainable approaches.

ARCH 216 Computational Methods in Architecture
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Software and processes for computation design in architecture; image editing and creation, vector drawing, 3D modeling, parametric modeling, rendering techniques and simulation.

ARCH 301 Architecture I
Credits 4. 4 Lecture Hours.
Introduction to the history, theory, and practice of architecture; survey of the evolution of architecture and technology; impact of modernism on architecture and urban development.
Prerequisites: ARCH 205 and ENDS 105, ENDS 106, ENDS 115.

ARCH 304 Architecture II
Credits 3. 3 Lecture Hours.
Survey of the evolution of architecture and technology; impact of modernism on architecture and urban development.
Prerequisites: ARCH 301; junior or senior classification and approval of instructor.

ARCH 305 Architecture III
Credits 3. 3 Lecture Hours.
Survey of the evolution of architecture and technology; impact of modernism on architecture and urban development.
Prerequisites: ARCH 301; junior or senior classification and approval of instructor.

ARCH 306 Architecture IV
Credits 3. 3 Lecture Hours.
Survey of the evolution of architecture and technology; impact of modernism on architecture and urban development.
Prerequisites: ARCH 301; junior or senior classification and approval of instructor.

ARCH 310 Design Studio
Credits 3. 3 Lecture Hours.
Survey of the evolution of architecture and technology; impact of modernism on architecture and urban development.
Prerequisites: ARCH 301; junior or senior classification and approval of instructor.

ARCH 315 Survey of Architecture
Credits 3. 3 Lecture Hours.
Survey of the evolution of architecture and technology; impact of modernism on architecture and urban development.
Prerequisites: ARCH 301; junior or senior classification and approval of instructor.

ARCH 320 History of Architecture
Credits 3. 3 Lecture Hours.
Survey of the evolution of architecture and technology; impact of modernism on architecture and urban development.
Prerequisites: ARCH 301; junior or senior classification and approval of instructor.

ARCH 325 History of Architecture
Credits 3. 3 Lecture Hours.
Survey of the evolution of architecture and technology; impact of modernism on architecture and urban development.
Prerequisites: ARCH 301; junior or senior classification and approval of instructor.

ARCH 330 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Selected topics in an identified area of architectural studies. May be repeated for credit.
Prerequisite: Approval of instructor.
ARCH 246 Foundations of Historic Preservation
Credits 3. 3 Lecture Hours.
Exploration and evaluation of the cross-disciplinary work of historic preservation; emphasis on the significance of historic places to societal well-being and conservation alternatives for historic and cultural environments; review of preservation projects and treatments; guest presentations and case studies from practicing professionals and researchers in a variety of fields.

ARCH 249 Survey of World Architecture History I
Credits 3. 3 Lecture Hours.

ARCH 250 Survey of World Architecture History II
Credits 3. 3 Lecture Hours.
(ARCH 1302) Survey of World Architecture History II. A survey of world architecture and the human-designed and built environment from the 13th to the 19th century.

ARCH 260 Comparative Theory in the Built and Virtual Environments
Credits 3. 3 Lecture Hours.
Introduction of cultural theory and the environment; theories, special concepts and ideas relevant to the built and virtual environments with primary focus on the last fifty years; theory, theory building, and application to buildings and urban design; formation of ideas and critical ways of assessing the environment.

ARCH 281 Seminar in Contemporary Architecture
Credits 1. 1 Lecture Hour.
Presentations by and discussions with professionals representing specialty areas related to environmental design through the Department of Architecture Lecture Series. May be taken four times for credit. Must be taken on a satisfactory/unsatisfactory basis.

ARCH 291 Research in Architecture Innovation
Credits 1 to 4. 1 to 4 Other Hours.
Research conducted under the direction of faculty member in the College of Architecture. May be repeated 2 times for credit.
Prerequisite: Approval of instructor and department head.

ARCH 305 Architectural Design III
Credits 5. 2 Lecture Hours. 9 Lab Hours.
Integration of architectural theories and philosophy with environmental design systems; study of theoretical approaches to graphic and analytical thinking, problem identification and design dissemination through various media, case studies and problem resolution; conditions and forces associated with a variety of building types and the generation design solutions.
Prerequisites: Admission to upper level in environmental design; ARCH 249 and ARCH 250.

ARCH 317 Digital Fabrication for Architecture
Credits 3. 1 Lecture Hour. 4 Lab Hours.
Digital fabrication for architecture including software, numerically controlled tools, translation applications and management strategies for digital fabrication workflows; production of building components from three dimensional datasets of virtual architecture proposals.
Prerequisites: Junior or senior classification or approval of instructor; ARCH 216 or approval of instructor.

ARCH 327 Conceptual Structural Analysis
Credits 3. 1 Lecture Hour. 4 Lab Hours.
A non-mathematical investigation of structural systems and components with respect to behavior; selection of the most appropriate structural system for various building typologies.
Prerequisite: Junior or senior classification or approval of instructor.

ARCH 328 Architectural Envelopes
Credits 3. 3 Lecture Hours.
Study of roof, wall, glazing and screen systems of significant works in contemporary architecture and the strategies behind their making; focus on innovative materials, surface effects, and performance aspects.
Prerequisite: Junior or senior classification in environmental design.

ARCH 330 The Making of Architecture
Credits 3. 3 Lecture Hours.
Study of significant works of contemporary architecture and materials and strategies used in their making; focus on innovative materials, systems, and partnerships necessary to realize the design.
Prerequisites: Junior or senior classification in environmental design or approval of instructor or ARCH classification.

ARCH 331 Architectural Structures
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Physical principles that govern statics and strength of materials through the design of architectural structures from a holistic view, in the context of architectural ideas and examples; introduction to construction, behavior of materials, and design considerations for simple and complex structural assemblies; computer applications.
Prerequisites: Junior or senior classification in environmental design; MATH 142 or equivalent; PHYS 201.

ARCH 335 Architectural Systems
Credits 3. 3 Lecture Hours.
Theory and applications of building energy use, envelope design, shading analysis, heating and cooling systems, lighting design; building water supply, plumbing and drainage systems; electrical, acoustical, fire and lightning protection; life safety; transportation systems and construction materials; calculations, equipment selection, and component sizing as they relate to building design.
Prerequisites: Junior or senior classification in environmental design; PHYS 201.

ARCH 345 History of Building Technology
Credits 3. 3 Lecture Hours.
Chronological development of civilization and building technology from prehistoric cultures to present; classic and modern materials, structural devices past and present, machine-produced products, prefabrication, construction methodology and servicing.

ARCH 346 Architecture, Heritage and Culture
Credits 3. 3 Lecture Hours.
Global exploration of how architecture and the built environment express culture and identity; theoretical and practical approaches to cultural heritage and conservation.
Prerequisite: Junior or senior classification.

ARCH 347 Recording Historic Buildings
Credits 3. 1 Lecture Hour. 4 Lab Hours.
Techniques for recording historic buildings; measuring and drawing to Historic American Building Survey Standards; field experience in photography, laser scanning, photogrammetry, hand measuring, field notes and record drawing preparation. May be repeated for credit.
Prerequisites: Junior or senior classification or approval of instructor.
ARCH 350 History and Theory of Modern and Contemporary Architecture
Credits 3. 3 Lecture Hours.
Development of modern and contemporary architecture in the 20th and 21st centuries; materials, structure, social and economic changes as well as architectural theory.
Prerequisites: Junior or senior classification.

ARCH 353 History of Product Design
Credits 3. 3 Lecture Hours.
History of product design in Europe and America including the relationship between designer and object, the relationship of design, industry and media over time and design criticism; focus on material/technical and typological approaches, comparative method and content analysis in context of original environment and social history.
Prerequisite: Junior or senior classification or approval of instructor.

ARCH 360 Topics in Design Build Community Service
Credits 3. 1 Lecture Hour. 4 Lab Hours.
Contemporary topics in architectural design-build practices including high impact interdisciplinary learning experiences developed through a project-based learning model with a focus on the planning, design, pre-construction, construction and project delivery; team-based approach with those outside of the architecture discipline to design, plan and complete project documents, estimates and undertake the construction activities necessary to make a fully functioning community service project.
Prerequisites: Junior or senior classification or approval of instructor.

ARCH 381 Design Seminar
Credit 1. 1 Lecture Hour.
Presentations by and discussions with professionals representing specialty areas related to architectural fabrication and product design. May be taken three times for credit.
Prerequisite: Junior or senior classification or approval of instructor.

ARCH 405 Architectural Design IV
Credits 5. 2 Lecture Hours. 9 Lab Hours.
A comprehensive design studio focused on the integration of design theory with functionally sustainable environmental and structural systems; consideration of a project from site analysis and programming through design detailing.
Prerequisites: Admission to upper level in environmental design; ARCH 305, ARCH 331, ARCH 335; CARC 301 or ARCH 494; concurrent enrollment in ARCH 431 and ARCH 435.

ARCH 406 Architecture Design V
Credits 5. 2 Lecture Hours. 9 Lab Hours.
Topical approaches to design, emphasizing theory and practice of architecture or related disciplines, such as urban design, interior design, health care design, etc.
Prerequisites: Junior or senior classification; admission to upper level in environmental design; ARCH 305, ARCH 331 and ARCH 335; CARC 301 or ARCH 494; students may with approval of the department enroll in the course during the summer term prior to taking ARCH 405, ARCH 431 and ARCH 435 if they are within 20 credit hours of graduation prior to the beginning of the following fall semester.

ARCH 409 Urban Design Studio
Credits 5. 2 Lecture Hours. 9 Lab Hours.
A design studio focused on urban design as a human-centered participatory practice; consideration of a project derived through community engagement; interdisciplinary service learning combining methodologies of architecture, landscape architecture and urban design.
Prerequisites: Concurrent enrollment in ARCH 419/URPN 419; grade of C or better in ARCH 331 and ARCH 335; grade of C or better in ARCH 305, ARCH 413, and CARC 301 or ARCH 494.

ARCH 413 Elements of Urban Design
Credits 3. 3 Lecture Hours.
Investigation of design elements shaping the urban environment; emphasis placed on contemporary precedents in architecture, landscape and urbanism to evaluate design complexity on multiple levels: social, political, environmental, economic, cultural and geographic.
Prerequisite: Admission to upper level division in BED or BS-URPN.

ARCH 419/URPN 419 Community Outreach in the Public Interest
Credit 1. 1 Lecture Hour.
Service-learning through community outreach and engagement; planning and organizing community events; conducting public presentations; media dissemination.
Prerequisite: Concurrent enrollment in URPN 409 or ARCH 409.
Cross Listing: URPN 419/ARCH 419.

ARCH 421 Energy and Sustainable Architecture
Credits 3. 3 Lecture Hours.
Understanding the various design decisions impacting sustainability and energy efficiency; includes participation in an "academic" LEED-NC rating project; interdisciplinary team approach with a design studio architect to perform the LEED-NC rating on the architect's building; application of reference material, standards, and USGBC material.
Prerequisite: Junior or senior classification or approval of instructor.

ARCH 430 History of Ancient Architecture
Credits 3. 3 Lecture Hours.
Architecture of antiquity, examining stylistic, structural and theoretical advancements in building, beginning with Mesopotamian and continuing with Egyptian, Greek and Roman civilizations.
Prerequisite: ARCH 249 or ARTS 149; junior or senior classification or approval of degree coordinator or instructor.

ARCH 431 Integrated Structures
Credits 2. 1 Lecture Hour. 2 Lab Hours.
Selection and economics of structural systems in the context of integrating structural systems into a building through good design; analysis and design of wood, steel, concrete, and composite systems and members in relation to building design.
Prerequisites: Admission to upper level in environmental design; ARCH 305, ARCH 331, ARCH 335; concurrent enrollment in ARCH 405 and ARCH 435.

ARCH 433 Architectural Lighting
Credits 3. 3 Lecture Hours.
Theory and practice of lighting design as an art and science; aperture design for sunlight control; selecting and locating luminaries to enhance interior and exterior surfaces and spaces.
Prerequisite: ARCH 335 or junior or senior classification in EDAS.

ARCH 434 The Role of Sculpture and Painting in Ancient Architecture
Credits 3. 3 Lecture Hours.
Interrelationships of architecture, painting and sculpture in the ancient world including Egypt, Mesopotamia, Crete, Greece and Rome.
Prerequisite: ARCH 249 or ARTS 149; junior or senior classification or approval of degree coordinator or instructor.
ARCH 435 Integrated Systems
Credits 2. 1 Lecture Hour. 2 Lab Hours.
Understanding how to integrate sustainable environmental systems into a building through good design; lectures support studio; systems faculty participate in studio critiques throughout the project.
Prerequisite: Admission to upper level in environmental design; ARCH 305, ARCH 331, ARCH 335; concurrent enrollment in ARCH 405 and ARCH 431.

ARCH 437 Great Medieval Cathedrals
Credits 3. 3 Lecture Hours.
Interrelationships of architecture, sculpture and stained glass, technology and construction, function and form, society and patronage in the great period of medieval building.
Prerequisite: ARCH 250 or ARTS 150; junior or senior classification or approval of degree coordinator or instructor.

ARCH 438 History and Design of Sacred Architecture
Credits 3. 3 Lecture Hours.
Exploration of history and design of sacred architecture; review of historic and contemporary houses of worship; global historic trends in sacred architecture in light of the current development in liturgy and design; significance of sacred places to society and culture.
Prerequisite: Junior or senior classification or approval of instructor.

ARCH 439 Architectural History of Mexico
Credits 3. 3 Lecture Hours.
History of architecture and urban design of Mexico and the southwestern United States from pre-Hispanic to contemporary eras.
Prerequisites: ARCH 249 or ARCH 250; junior or senior classification or approval of degree coordinator or instructor.

ARCH 441 Baroque and Rococo Architecture
Credits 3. 3 Lecture Hours.
The investigation of the history of architecture, the arts and society, and major creative individuals from the late sixteenth to the early eighteenth centuries.
Prerequisite: ARCH 250 or ARTS 150; junior or senior classification or approval of degree coordinator or instructor.

ARCH 443 Aegean Art and Architecture
Credits 3. 3 Lecture Hours.
Art and architecture of the prehistoric Aegean, ca. 6000-1100-B.C.E.; focus on the built environment, material culture and visual arts of early civilization in the Aegean basin; evidence for regional and vernacular architectural traditions; expressions of power, ideology and social identity through monumental architectural and elite arts of Minoan Crete and Mycenaean Greece.
Prerequisites: Junior or senior classification; approval of instructor or degree coordinator.

ARCH 451 Strategies in Architectural Management
Credits 3. 3 Lecture Hours.
Emerging strategies in the architecture and construction industry, with an emphasis on understanding the changing structure of the industry and the management of both firms and projects.
Prerequisite: Senior classification or approval of degree coordinator.

ARCH 452 Careers in Architecture
Credits 3. 3 Lecture Hours.
Career opportunities in the profession of architecture; investigations into the composition of architectural practice today and the wide range of specialties represented in architectural firms; interviews with select representative individuals.
Prerequisite: Admission to upper level in environmental design, construction science or landscape architecture.

ARCH 457 Ethics and Professional Practice
Credits 3. 3 Lecture Hours.
Issues and relationships within the business, legal and political environment; introduction to the concepts of architectural specifications and the AIA standard conditions of the construction contract; forms of construction, bidding and contract documents. For undergraduate students pursuing a professional degree and a career in architecture.
Prerequisite: Senior classification in environmental design.

ARCH 458 Cultural and Ethical Considerations for Global Practice
Credits 3. 3 Lecture Hours.
Issues and relationships within the cultural, business, legal and political environments of global practice; differences in the construction contract, bidding and various forms of construction.
Prerequisite: Junior or senior classification.

ARCH 463 Elements of Interior Architecture
Credits 3. 3 Lecture Hours.
Analysis and design of architectural interiors; historical and professional perspectives incorporating programming, space planning and organization; specification and selection of furnishings and materials to satisfy user needs in residential, commercial and institutional settings.
Prerequisites: Admission to upper level in environmental design; concurrent enrollment in ARCH 405, ARCH 431 and ARCH 435 not allowed.

ARCH 481 Seminar
Credit 1. 1 Lecture Hour.
Presentations by and discussions with professionals representing specialty areas related to environmental design; career and academic objectives. May be repeated for up to 4 credit hours. Must be taken on a satisfactory/unsatisfactory basis.
Prerequisite: Junior or senior classification or approval of instructor.

ARCH 484 Summer Internship
Credits 6. 12 Other Hours.
Practical experience in an office of design allied professionals; 10-week internship with a minimum of 400 hours continuous employment; departmental pre-approval through the departmental internship coordinator required; post evaluation conducted following the internship. May not be repeated for credit.
Prerequisites: Junior or senior classification or approval of instructor; approval of the environmental design internship coordinator.

ARCH 485 Directed Studies
Credits 1 to 5. 1 to 5 Other Hours.
Special projects in architecture. May be repeated for credit.
Prerequisites: Admission to upper level in environmental design; approval of instructor and degree coordinator.

ARCH 489 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours. 0 to 4 Lab Hours.
Special topics in an identified area of architecture. May be repeated for credit.
Prerequisite: Junior or senior classification; approval of instructor and degree coordinator.

ARCH 491 Advanced Architecture Innovation Research
Credits 1 to 6. 1 to 6 Other Hours.
Research conducted under the direction of faculty member in the College of Architecture. May be repeated 2 times for credit.
Prerequisite: Admission to upper level in environmental design; approval of instructor and department head.
ARCH 494 Internship
Credits 9. 18 Other Hours.
Practical experience in an office of design allied professionals; fifteen week internship with a minimum of 600 hours of continuous employment; departmental pre-approval through the departmental internship coordinator required; post evaluation conducted following the internship. To be taken only as a requirement for the study away semester. May not be repeated for credit.
Prerequisites: Junior or senior classification; admission to upper level in environmental design; CARC 481; approval of the environmental design internship coordinator.

AREN - Architectural Engr (AREN)

AREN 175/COSC 175 Construction Graphics Communication
Credits 3. 3 Lecture Hours.
Visualization, interpretation and communication of graphical geometry in construction design and engineering; graphical analysis of problems; sketching applications, computer aided design and fundamentals of information modeling software; introduction to common quantitative tools in construction.
Prerequisite: AREN and COSL majors only.
Cross Listing: COSC 175/AREN 175.
AREN 200 Architectural Engineering Foundations
Credits 2. 2 Lecture Hours.
Introduction to the broad field and professional practice of architectural engineering, architectural engineering systems, and the role of the architectural engineer; emphasis on professional engineering design services, design and construction processes and documents, building envelope and materials, structural systems, mechanical systems, lighting systems, building systems integration, building codes and standards, fire safety, professional attributes of architectural engineers, and issues of human performance requirements and sustainability at relates to building system design.
Prerequisite: Sophomore classification or approval of instructor.
AREN 300 Architectural Engineering Systems
Credits 3. 3 Lecture Hours.
Analysis and application of the engineering design process to solve problems associated with the design and operation of building systems, specifically related to HVAC, electrical power and lighting, and structural integrity; communication of solutions to technical problems of building systems, through writing, presentations, and team interactions, typical of architectural engineers in the building industry; emphasis on the engineering design process in architectural engineering, structural systems for buildings, mechanical systems for heating, ventilation, and air-conditioning, electrical lighting for buildings, building fire safety, building acoustics, building codes and standards, interface issues among different building systems, and sustainability aspects of building systems.
Prerequisites: Grade of C or better in AREN 200; junior classification or approval of instructor.
AREN 302 Lighting Engineering for Buildings
Credits 3. 3 Lecture Hours.
Reinforces the fundamentals of illuminating engineering for building interiors; focuses on the design and analysis of electrical lighting systems, including the integration between the lighting design process and the technical foundations of building lighting; emphasis on the fundamentals of lighting engineering and basic engineering methods for building lighting systems, lighting design criteria, lighting calculations, and power budgets.
Prerequisites: Junior or senior classification; major in engineering or approval of instructor.
AREN 330 Mechanical Systems for Buildings
Credits 3. 3 Lecture Hours.
Introduction to qualitative and quantitative engineering concepts of mechanical systems for buildings for architectural engineers, including HVAC systems, control of indoor air pollutants and fire suppression systems; emphasis on thermal behavior of buildings and building envelopes, human comfort requirements and psychometrics, thermal load calculations, HVAC systems/equipment, design of space air-conditioning and its relationship to architectural design, mechanical systems for indoor air quality and for fire suppression.
Prerequisite: Grade of C or better in MEEN 315 or MMET 370.
AREN 399 High Impact Experience for Architectural Engineers
Credits 0. 0 Other Hours.
Participation in an approved high-impact learning experience; reflection on professional outcomes from the National Society of Professional Engineers’ Engineering Body of Knowledge; documentation and self-assessment of learning experience at mid-curriculum point.
Prerequisite: Junior or senior classification.
AREN 401 Architectural Engineering Design I
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Instruction and practice in the design process applied to an architectural engineering design project; application of establishing customer need, determining requirements in terms of function and performance, developing alternative design concepts, performing trade-off studies among performance, cost and schedule, embodiment and detail design and the iteration of the above steps; major architectural engineering design project.
Prerequisites: Grade of C or better in AREN 300, AREN 330, and CVEN 345.
AREN 402 Architectural Engineering Design II
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Application and extension of fundamentals of engineering design, product detail, and design development process, including case studies; emphasis on project management, marketing considerations, manufacturing detailed design specifications, failure modes, applications of codes and standards, selection of design margins, product (component) development guidelines, intellectual property, product liability and ethical responsibility; major architectural engineering design project.
Prerequisite: Grade of C or better in AREN 401.
AREN 440 Architectural Engineering Heating, Ventilating and Air Conditioning Design
Credits 3. 3 Lecture Hours.
Project-based design course; select and develop the mechanical system for a building, from the programming phase to the design development and working documents; emphasis on the application HVAC principles in the design and analysis of a mechanical system in a real building, including review of building thermal load calculations & energy analysis, HVAC design goals and schematic design, system selection and system design, HVAC design development, HVAC design documents, and energy, environmental, and human comfort considerations in HVAC design.
Prerequisites: Grade of C or better in AREN 300 and AREN 330.

ARTS - Art (ARTS)

ARTS 103 Design I
Credits 3. 2 Lecture Hours. 4 Lab Hours.
(ARTS 1311) Design I. Two-dimensional design; fundamentals of line, color, form, texture, shape, space and composition.
Prerequisite: Art minors only.

ARTS 104 Introduction to Graphic Design
Credit 1. 2 Lab Hours.
Introduction to the concepts and techniques utilized in graphic design; basic digital camera operations, typography, use of color, design principles; integration of type, graphic elements and images.
Prerequisite: Lower division in Visualization or minor in Art.

ARTS 111 Drawing I
Credits 3. 2 Lecture Hours. 4 Lab Hours.
(ARTS 1316) Drawing I. Introduction to composition and form, media, techniques and subjects; exploring perceptual and descriptive drawing; mark making as a developmental process in art and design practice.
Prerequisite: Art minors only.

ARTS 115 Drawing for Visualization
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Investigation of and practice with media, methods and techniques in communication of design; observational drawing; proportion, form, line and value.
Prerequisite: Lower division in Visualization.

ARTS 149 Art History Survey I
Credits 3. 3 Lecture Hours.
(ARTS 1303) Art History Survey I. Survey of architecture, painting, sculpture and the minor arts from prehistoric times to 14th century.

ARTS 150 Art History Survey II
Credits 3. 3 Lecture Hours.
(ARTS 1304) Art History Survey II. Survey of architecture, painting, sculpture and the minor arts from the 14th century to the end of the 19th century.

ARTS 210 Introduction to Digital Photography
Credits 3. 2 Lecture Hours. 3 Lab Hours.
(ARTS 2356) Introduction to Digital Photography. Introduction to photography; digital camera controls; creation, manipulation and critique of the digital image; composition and aesthetics; exposure control; digital workflow.
Prerequisite: Non-visualization majors only.

ARTS 212 Life Drawing
Credits 3. 1 Lecture Hour. 6 Lab Hours.
(ARTS 2323) Life Drawing. Study of the form, volume, structure and movement of the human figure; emphasis on proportion and anatomy.
Prerequisite: Grade of C or better in ARTS 111 or ARTS 115.

ARTS 212. Grade of C or better in ARTS 210.

ARTS 212. Grade of C or better in ARTS 210, VIST 310, or ARTS 311.

ARTS 234 Body Art of Tattoos
Credits 3. 3 Lecture Hours.
History of body art from the Stone Age to present day; aesthetics, sign, symbol, social and cultural significance.

ARTS 303 Graphic Design I
Credits 3. 2 Lecture Hours. 4 Lab Hours.
Principles and elements of graphic design; composition problem solving, conceptual thinking and application to visual communication.
Prerequisites: Grade of C or better in ARTS 104 and VIST 284; grade of C or better in VIST 105 or ARTS 103.

ARTS 304 Graphic Design II
Credits 3. 2 Lecture Hours. 4 Lab Hours.
Continuation of ARTS 303; concepts in advanced graphics as a tool for design solutions for publication and promotion; emphasis on creative thinking over technology.
Prerequisites: ARTS 303; junior or senior classification.

ARTS 305 Painting I
Credits 3. 2 Lecture Hours. 4 Lab Hours.
Traditional and contemporary painting approaches and media; emphasis on form, composition, observational representation.
Prerequisite: Grade of C or better in ARTS 111 or ARTS 115.

ARTS 308 Sculpture
Credits 3. 1 Lecture Hour. 5 Lab Hours.
Principles and processes of form making; space and materials; context and content of three-dimensional form.
Prerequisite: Grade of C or better in ARTS 111 or ARTS 115.

ARTS 311 Traditional Photography
Credits 3. 2 Lecture Hours. 4 Lab Hours.
Photographic image as a medium of visual expression; basic theory and practice of still photography; historic development and aesthetic concern for photographic imagery.
Prerequisites: Grade of C or better in ARTS 103 or VIST 205.

ARTS 312 Advanced Photography
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Advanced photographic image-making; development, control and presentation of the expressive photographic image; traditional and/or new media.
Prerequisite: Grade of C or better in ARTS 210, VIST 310, or ARTS 311.

ARTS 315 Figure Drawing For Narrative and Concept Development
Credits 3. 2 Lecture Hours. 4 Lab Hours.
Exploration of contemporary drawing practices and theory; investigation into the relationship with digital media including animation, photography and other digital technologies; development of personal approaches to media, techniques and thematic content; creation of a creative workflow and visual vocabulary.
Prerequisite: ARTS 212.

ARTS 325 Digital Painting
Credits 3. 2 Lecture Hours. 4 Lab Hours.
Theory and practice of digital painting media; exploration of traditional and new forms of art making and creativity; emphasis on color theory.
Prerequisites: Grade of C or better in ARTS 305. Field trip required.
ARTS 328 Advanced Painting
Credits 3. 3 Lecture Hours. 5 Lab Hours.
Experiments in spatial design; intermediate aspects of creative process; issues in contemporary art; modeling and construction techniques as they may facilitate the generation of new forms and compositions; formal visual analysis and critique.
Prerequisites: ARTS 305; upper division in Visualization or approval of instructor.

ARTS 329 Texas Art History
Credits 3. 3 Lecture Hours.
The development of visual arts in Texas; an examination of art movements, artists and major works exhibiting a broad range of artistic techniques.
Prerequisite: Grade of C or better in ARTS 149, ARTS 150, ARTS 349, ARCH 249, ARCH 250, or ARCH 350.

ARTS 330 The Arts of America
Credits 3. 3 Lecture Hours.
Survey of painting, sculpture, crafts and architecture of prehistoric America to the present; emphasis on art as a record of cultural, economic and social evolution.
Prerequisite: Grade of C or better in ARTS 149, ARTS 150, ARTS 349, ARCH 249, ARCH 250, or ARCH 350.

ARTS 333 Visual And Material Culture of the Mediterranean
Credits 3. 3 Lecture Hours.
Visual arts and material culture of the Mediterranean world during the Renaissance and early modern period; economic, social, cultural and political influence; field trip required.
Prerequisite: ARTS 149, ARTS 150, ARTS 349, ARCH 249, ARCH 250, or ARCH 350.

ARTS 335 The Art and Architecture of Rome
Credits 3. 3 Lecture Hours.
Rome as a microcosm of western civilization; a survey of western architectural and art history from antiquity through the Baroque; a focus on the Eternal City's buildings, paintings, mosaics and sculptures exploring criteria, methods, goals and results of major architectural and artistic movements and the people involved.
Prerequisite: Grade of C or better in ARTS 149, ARTS 150, ARTS 349, ARCH 249, ARCH 250, or ARCH 350.

ARTS 339 Contemporary Art Survey
Credits 3. 3 Lecture Hours.
Thematic survey of art since 1960; exploration of changing roles in art production, performance, presentation and criticism; art and artist in the global context; contemporary theory and criticism.
Prerequisite: ARTS 149, ARTS 150, ARTS 349, ARCH 249, ARCH 250, or ARCH 350.

ARTS 340 History of the Photographic Image
Credits 3. 3 Lecture Hours.
History of photography; social, cultural, political, scientific and artistic contexts; important photographic themes and photographers.
Prerequisite: ARTS 149, ARTS 150, ARTS 349, ARCH 249, ARCH 250, or ARCH 350.

ARTS 341 History of Animation
Credits 3. 3 Lecture Hours.
History of the animated image in the nineteenth-century through the twenty-first century; developments, theories and ideologies in computer animation.
Prerequisite: ARTS 149, ARTS 150, ARTS 349, ARCH 249, ARCH 250, or ARCH 350.

ARTS 342 History of Graphic Design
Credits 3. 3 Lecture Hours.
History of graphic design; understanding visual language, semiotic theory, technological developments associated with graphic design production, social, cultural, political and artistic influence on visual communication.
Prerequisite: ARTS 149, ARTS 150, ARTS 349, ARCH 249, ARCH 250, or ARCH 350.

ARTS 343 History of Illustration
Credits 3. 3 Lecture Hours.
History of illustration; early scrolls, codexes and manuscript illumination; print culture; commercial processes of the 19th and 20th centuries.
Prerequisite: ARTS 149, ARTS 150, ARTS 349, ARCH 249, ARCH 250, or ARCH 350.

ARTS 345 History of Gaming
Credits 3. 3 Lecture Hours.
Modern game creation and play; theory, history, and development.
Prerequisites: ARTS 149, ARTS 150, ARTS 349, ARCH 249, ARCH 250, or ARCH 350.

ARTS 349 The History of Modern Art
Credits 3. 3 Lecture Hours.
Chronological development of late 19th through 20th century art; emphasis on key artists, paintings, sculpture, photography and architecture.
Prerequisite: Junior or senior classification or approval of instructor and undergraduate program coordinator.

ARTS 350 The Arts and Civilization
Credits 3. 3 Lecture Hours.
Investigation of the image of work of selected periods in terms of criticism, aesthetic rationale, specific masters and social significance by going beyond historical chronology.
Prerequisites: Grade of C or better in ARTS 149, ARTS 150, ARTS 349, ARCH 249, ARCH 250, or ARCH 350.

ARTS 353 Color Theory
Credits 3. 2 Lecture Hours. 4 Lab Hours.
Aspects of color and color theory including optical phenomena, color theory and perception; application and principles with respect to art and design; two-dimensional and three-dimensional projects examining color theories.
Prerequisites: Upper division in Visualization or minor in Art.

ARTS 403 Graphic Design III
Credits 3. 2 Lecture Hours. 4 Lab Hours.
Advanced graphic design concepts and practices; development of unified graphic campaigns to promote a product, an organization, a publication, a service, or business; advanced problem-solving techniques based on the design process through research, analysis, and presentation; systematic approach to visual development.
Prerequisites: ARTS 303 and ARTS 304; junior or senior classification or approval of instructor and undergraduate program coordinator; knowledge of industry-standard software (Adobe Photoshop, InDesign and Illustrator) is expected.
ARTS 445 Byzantine Art and Architecture  
Credits 3. 3 Lecture Hours.  
A critical and historical investigation of Mediterranean art and architecture from the third century to the middle of the fifteenth century; emphasis on the artistic achievements from the late antique Mediterranean and the Byzantine Empire; investigation of architectural decoration, public monuments, cultural diversity and controversies over images.  
Prerequisite: Grade of C or better in ARTS 149, ARTS 150, ARTS 349, ARCH 249, ARCH 250, or ARCH 350.

ARTS 485 Directed Studies  
Credits 1 to 4. 1 to 4 Other Hours.  
Special problems in the fine and applied visual and plastic arts. May be repeated for up to 12 credit hours.  
Prerequisite: Approval of instructor and undergraduate program coordinator.

ARTS 489 Special Topics in...  
Credits 1 to 4. 1 to 4 Lecture Hours. 0 to 4 Lab Hours.  
Selected topics in an identified field of the fine or applied visual and plastic arts. May be repeated for up to 9 credit hours.  
Prerequisite: Approval of instructor and undergraduate program coordinator.

ASCC - Academic Success Center (ASCC)

ASCC 001 Basic Math Skills  
Credits 0 to 3. 0 to 3 Lecture Hours.  
Developmental instruction in mathematics; includes the integers and rational numbers and applications, exponents, polynomials, solution of equations, graphing, elementary geometry and reasoning skills. May not be used for credit toward a degree.

ASCC 002 Basic Writing Skills  
Credits 0 to 3. 0 to 3 Other Hours.  
Individualized instruction in English composition based on an analysis of the student's proofreading, revision and editing skills; a programmed sequence of study and practice designed for improvement of writing performance through mastery of basic skills at word, sentence, paragraph and multiparagraph levels. May not be used for credit toward a degree.

ASCC 003 Basic Reading Skills  
Credits 0 to 3. 0 to 3 Other Hours.  
Individualized instruction in reading based on an analysis of the student's reading comprehension skills; study and practice of reading strategies designed to increase reading comprehension skills. May not be used for credit toward a degree.

ASCC 004 Reading/Writing Connection  
Credits 0 to 3. 0 to 3 Other Hours.  
Individualized instruction designed to refine and practice the basic reading and writing skills by integrating the related concepts of the two areas. May not be used for credit toward a degree.

ASCC 005 Fundamental Academic Skills  
Credits 0 to 3. 0 to 3 Lecture Hours.  
Designed to address the fundamental reading, writing, and/or mathematical skills for students needing instruction in Adult Basic Education (ABE). May not be used for credit towards a degree.  
Prerequisites: Concurrent enrollment in ASCC 001 or ASCC 004.

ASCC 101 Application of Learning Theories to College Studies  
Credits 0 to 3. 0 to 3 Lecture Hours.  
The study of critical theories of learning with application to academic performance; designated as the university’s learning framework course, this course is designed to help students understand learning theory and develop strategies for successful completion of college level studies.

ASCC 102 Career Awareness  
Credits 0 to 3. 0 to 3 Lecture Hours.  
Encourages planning career and life goals early in academic career for timely decision-making related to academics, acquiring marketable skills, pursuing relevant experiential education, and participating in student/professional organizations; acquaints students with realities of early career; emphasizes utilization of resources on a timely basis for competitiveness in job market.

ASCC 289 Special Topics in...  
Credits 0 to 3. 0 to 3 Lecture Hours.  
Selected topics in academic development and improvement.

ASIA - Asian Studies (ASIA)

ASIA 285 Directed Studies  
Credits 0 to 4. 0 to 4 Other Hours.  
Selected fields of Asian Studies not covered in depth by other courses. Reports and extensive reading required. May be repeated for credit.  
Prerequisite: Approval of director of Asian Studies.

ASIA 289 Special Topics in...  
Credits 1 to 4. 1 to 4 Lecture Hours.  
Selected topics in Asian studies. May be repeated for credit.

ASIA 306/SOCI 306 Society and Population of Modern China  
Credits 3. 3 Lecture Hours.  
Major trends and current topics in social and demographic aspects of the society of modern China, including Taiwan.  
Prerequisite: Junior or senior classification.  
Cross Listing: SOCI 306/ASIA 306.

ASIA 325/SOCI 325 International Business Behavior  
Credits 3. 3 Lecture Hours.  
Theoretical models and practical protocols/behavior demands to conduct business and to work in France, Germany, Japan, China, Mexico and other countries; discussion of national character, managerial and negotiating styles.  
Prerequisite: Junior or senior classification.  
Cross Listing: SOCI 325/ASIA 325.

ASIA 329/SOCI 329 Pacific Rim Business Behavior  
Credits 3. 3 Lecture Hours.  
Theoretical models of Asian cultures and practical protocol/etiquette related to business and work in China, Thailand, South Korea, Japan, Australia, and other Pacific Rim nations; discussions of national character, managerial behavior and values.  
Prerequisite: Junior or senior classification.  
Cross Listing: SOCI 329/ASIA 329.

ASIA 330 Modern Mediterranean World  
Credits 3. 3 Lecture Hours.  
Critical examination of Mediterranean history; colonialism, industrialization, and other trans-national phenomena linking Africa, Asia, and Europe; social and political movements, migration, intellectual trends.  
Prerequisite: Junior or senior classification.
ASIA 335/ANTH 335 Cultures of Central Asia
Credits 3. 3 Lecture Hours.
Study of anthropological research in Central Asia: ecological adaptations; colonialism and post-colonialism; ethnic politics and ethnic conflict; religion and identity; gender and family; globalization and modernization.
Prerequisite: Junior or senior classification.
Cross Listing: ANTH 335/ASIA 335.

ASIA 349/HIST 349 The Vietnam War/The American War
Credits 3. 3 Lecture Hours.
Vietnam's relations with the West; French colonialism; origins and development of Vietnamese nationalism; Cold War and American involvement; wartime societies in North and South Vietnam; expansion of the war to Cambodia and Laos; anti-war movements in the United States; reasons for the American defeat; consequences and lessons of the war.
Prerequisites: Junior or senior classification.
Cross Listing: HIST 349/ASIA 349.

ASIA 350/HIST 350 World War II in Asia and the Pacific
Credits 3. 3 Lecture Hours.
Origins and development of Japanese imperialism; Japan's expansion into East and Southeast Asia and the Pacific; wartime societies; collaboration and resistance; effects of the war in the United States on Japanese-Americans; outcomes of the war; remembrance of the war.
Prerequisite: Junior or senior classification.
Cross Listing: HIST 350/ASIA 350.

ASIA 351/HIST 351 Traditional East Asia
Credits 3. 3 Lecture Hours.
History and culture of China and Japan from earliest times to the coming of the West; impact of Confucianism and Buddhism; development of social, political and economic systems.
Prerequisite: Junior or senior classification.
Cross Listing: HIST 351/ASIA 351.

ASIA 352/HIST 352 Modern East Asia
Credits 3. 3 Lecture Hours.
Impact of the West on traditional China and Japan; the response through modernization; rise of nationalism and formation of modern nation states.
Prerequisite: Junior or senior classification.
Cross Listing: HIST 352/ASIA 352.

ASIA 354/HIST 354 Imperial China
Credits 3. 3 Lecture Hours.
History of imperial China from the earliest dynasties through the mid19th century, including major political events; the structure of Chinese government, economic development, philosophies and religion, wars and military and culture and daily life.
Prerequisite: Junior or senior classification.
Cross Listing: HIST 354/ASIA 354.

ASIA 355/HIST 355 Modern China
Credits 3. 3 Lecture Hours.
History of China from the coming of the West to the present; social, economic and political changes which have taken place during that period.
Prerequisite: Junior or senior classification.
Cross Listing: HIST 355/ASIA 355.

ASIA 356/HIST 356 Twentieth Century Japan
Credits 3. 3 Lecture Hours.
Industrialization and modernization of Japan; its rise from an isolated nation to a major world power and economic giant.
Prerequisite: Junior or senior classification.
Cross Listing: HIST 356/ASIA 356.

ASIA 358/HIST 358 Chinese Cultural History
Credits 3. 3 Lecture Hours.
Examination of Chinese culture and its evolution over the last 4,000 years; customs, art, literature, festivals, folklore, religion, architecture, medicine, and everyday life.
Prerequisite: Junior or senior classification.
Cross Listing: HIST 358/ASIA 358.

ASIA 360 Archaeology of the Old World
Credits 3. 3 Lecture Hours.
Overview of archaeology and prehistory of Europe, Africa and Asia from the evolution of the hominids to the development of agriculture and the rise of civilization.
Prerequisite: Junior or senior classification.

ASIA 365/POLS 365 Asian Governments and Politics
Credits 3. 3 Lecture Hours.
Contemporary political systems of Asia, political institutions, actors and processes.
Prerequisite: POLS 206 or approval of department head.
Cross Listing: POLS 365/ASIA 365.

ASIA 401 Slavery in World History
Credits 3. 3 Lecture Hours.
Comparative history of human slavery; slavery in the Ancient World, Asia, Africa; varieties of modern slavery in the New World since 1500; abolition of slavery and continuing forms of human bondage in the contemporary world.
Prerequisite: Junior or senior classification.
Cross Listing: AFST 401 and HIST 401.

ASIA 463 Gender in Asia
Credits 3. 3 Lecture Hours.
Gender dynamics in Asia; changes in gender roles; women's movements; women and the economy; women and politics; men's and women's private lives.
Prerequisite: Junior or senior classification.
Cross Listing: SOCI 463 and WGST 463.

ASIA 485 Directed Studies
Credits 1 to 3. 1 to 3 Other Hours.
Selected fields of Asian Studies not covered in depth by other courses. Reports and extensive reading required. May be repeated for credit.
Prerequisite: Approval of director of Asian Studies.

ASIA 489 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Selected topics in Asian Studies. May be repeated for credit.

ASIA 491 Research
Credits 1 to 3. 1 to 3 Other Hours.
Research conducted under the direction of a faculty member in Asian Studies. May be repeated 3 times for credit.
Prerequisites: 6 credits of ASIA; junior or senior classification; approval of instructor.

ASTR - Astronomy (ASTR)

ASTR 101 Basic Astronomy
Credits 3. 3 Lecture Hours.
(ASTR 1303) Basic Astronomy. A qualitative approach to basic stellar astronomy; earth-moon-sun relationships then studies of distances to stars, stellar temperatures, and other physical properties; birth, life on the main sequence of the H-R diagram, and ultimate fates of stars; not open to students who have taken ASTR 111 or ASTR 314.
ASTR 102 Observational Astronomy  
Credit 1. 3 Lab Hours.  
(ASTR 1103 or PHYS 1103) Observational Astronomy. Observational and laboratory course which may be taken in conjunction with ASTR 101 or ASTR 314. Use of techniques and instruments of classical and modern astronomy.  
**Prerequisite:** ASTR 101 or ASTR 314, or registration therein.

ASTR 103 Introduction to Stars and Exoplanets  
Credits 3. 3 Lecture Hours.  
A qualitative study of stellar birth, stellar structure and evolution, stellar nucleosynthesis, the Hertzsprung-Russell Diagram, white dwarfs, neutron stars, supernovae, black holes, proto-planetary systems, origin of the solar system and the search for exoplanets; utilizes active learning methods that incorporate observations from the current generation of ground and space-based telescopes. Open to all majors.

ASTR 104 Introduction to Galaxies and Cosmology  
Credits 3. 3 Lecture Hours.  
A qualitative study of properties of galaxies, galaxy evolution through cosmic time, galactic archaeology, active galactic nuclei, super-massive black holes, large-scale structure, the expansion history of the universe, cosmological parameters and Big Bang nucleosynthesis; utilizes active learning methods that incorporate observations from the current generation of ground and space-based telescopes. Open to all majors.

ASTR 109/PHYS 109 Big Bang and Black Holes  
Credits 3. 3 Lecture Hours.  
Designed to give an intuitive understanding of the Big Bang and Black Holes, without mathematics, and de-mystify them for the non-scientist.  
**Cross Listing:** PHYS 109/ASTR 109.

ASTR 111 Overview of Modern Astronomy  
Credits 4. 3 Lecture Hours. 2 Lab Hours.  
(ASTR 1303 and ASTR 1103, ASTR 1403, PHYS 1303 and PHYS 1103, PHYS 1403) Overview of Modern Astronomy. Roots of modern astronomy; the scientific method; fundamental physical laws; the formation of planets, stars, and galaxies; introduction to cosmology; includes an integrated laboratory that reinforces the lecture topics, including hands-on experience with telescopes and imaging of celestial objects; not open to students who have taken ASTR 101 or ASTR 314.

ASTR 119/PHYS 119 Big Bang and Black Holes: Laboratory Methods  
Credit 1. 2 Lab Hours.  
Hands-on understanding of the concepts surrounding the Big Bang and Black Holes; emphasis on the evidence-based decision making process, methods and presentation, for non-scientists. Companion course for ASTR 109/PHYS 109/ASTR 109.  
**Prerequisite:** ASTR/PHYS 109/ASTR 109 or registration therein.  
**Cross Listing:** PHYS 119/ASTR 119.

ASTR 285 Directed Studies  
Credits 1 to 4. 1 to 4 Other Hours.  
Special work in laboratory or theory to meet individual requirements in cases not covered by regular curriculum; intended for use as lower-level credit.  
**Prerequisite:** Approval of department head.

ASTR 289 Special Topics in...  
Credits 1 to 4. 1 to 4 Lecture Hours. 0 to 4 Lab Hours.  
Selected topics in an identified area of astronomy. May be repeated for credit.  
**Prerequisite:** Approval of instructor.

ASTR 291 Research  
Credits 0 to 4. 0 to 4 Other Hours.  
Research conducted under the direction of faculty member in astronomy. May be repeated 2 times for credit.  
**Prerequisites:** Freshman or sophomore classification and approval of instructor.

ASTR 314 Survey of Astronomy  
Credits 3. 3 Lecture Hours.  
Primarily for majors in science and engineering. Kepler's laws, law of gravitation, solar system, stars, stellar evolution, nucleosynthesis, cosmology, clusters, nebulae, pulsars, quasars, black holes.  
**Prerequisite:** PHYS 208.

ASTR 320 Astrophysical Research Methods  
Credits 2. 2 Lecture Hours.  
Background and tools used by astronomical researchers in performing analyses; topics include reduction of photometric and spectroscopic data, bivariate and multivariate statistical methods and chi-squared minimization.  
**Prerequisites:** ASTR 314.

ASTR 401 Stars and Extrasolar Planets  
Credits 3. 3 Lecture Hours.  
How stars are born, how internal structure changes, nuclear fuel burned and ultimate fate; extrasolar planet detection, formation, properties and habitability.  
**Prerequisite:** ASTR 314.

ASTR 403 Extragalactic Astronomy and Cosmology  
Credits 3. 3 Lecture Hours.  
Physical makeup of individual galaxies and large scale structure in the universe; origin and eventual fate of the universe; interpretation of observational data as it relates to baryonic matter, Dark Matter and cosmological models with Dark Energy.  
**Prerequisite:** ASTR 314.

ASTR 485 Directed Studies  
Credits 1 to 12. 1 to 12 Other Hours.  
Special work in laboratory or theory to meet individual requirements in cases not covered by regular curriculum.  
**Prerequisite:** Approval of instructor.

ASTR 489 Special Topics in...  
Credits 1 to 4. 0 to 4 Lecture Hours. 0 to 4 Lab Hours.  
Selected topics in an identified topic of astronomy. May be repeated for credit.  
**Prerequisite:** Approval of instructor.

ASTR 491 Research  
Credits 0 to 4. 0 to 4 Other Hours.  
Research conducted under the direction of faculty member in astronomy. May be repeated for credit. Registration in multiple sections of this course is possible within a given semester provided that the per semester credit hour limit is not exceeded.  
**Prerequisites:** Junior or senior classification and approval of instructor.

**ATMO - Atmospheric Sciences (ATMO)**

ATMO 201 Weather and Climate  
Credits 3. 3 Lecture Hours.  
Structure, energy, and motions of the atmosphere; climate; fronts and cyclones; atmospheric stability; clouds and precipitation; severe storms.
ATMO 202 Weather and Climate Laboratory
Credit 1. 2 Lab Hours.
Practical laboratory experiments and exercises, conducted in the meteorology and computer laboratories, concerning the fundamental physical processes underlying atmospheric phenomena, and the collection, display and interpretation of meteorological information. For non-majors only.

ATMO 203 Weather Forecasting Laboratory
Credit 1. 2 Lab Hours.
Short-range weather forecasting practice; numerical guidance; weather map analysis and discussions.
Prerequisite: ATMO 201 or concurrent enrollment.

ATMO 251 Weather Observation and Analysis
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Standard and experimental weather observing techniques; subjective and objective analysis; application of conceptual models; simple kinematic and dynamic constraints.
Prerequisite: ATMO 203 or concurrent enrollment.

ATMO 285 Directed Studies
Credits 1 to 4. 1 to 4 Other Hours.
Offered to enable majors in meteorology to undertake and complete with credit in their particular fields of specialization limited investigations not covered by any other courses in established curriculum.
Prerequisite: Freshman or sophomore classification.

ATMO 289 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Selected topics in an identified area of meteorology. May be repeated for credit.
Prerequisite: Approval of instructor.

ATMO 291 Research
Credits 0 to 4. 0 to 4 Other Hours.
Research conducted under the direction of faculty member in atmospheric sciences. May be repeated 2 times for credit. Registration in multiple sections of this course is possible within a given semester provided that the per semester credit hour limit is not exceeded. 
Prerequisites: Freshman or sophomore classification.

ATMO 321 Computer Applications in the Atmospheric Sciences
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Introduction to technical computing methods in the atmospheric sciences; use of specialized software and data analysis systems for meteorological applications.

ATMO 324 Physical and Regional Climatology
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Climate causes; global and surface energy balance; hydrologic cycle; general circulation; climate change; climate data analysis.
Prerequisites: ATMO 201 and ATMO 203; MATH 308 or registration therein or approval of instructor; ATMO 321 or equivalent; junior or senior classification.

ATMO 326 Environmental Atmospheric Science
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Basic concepts of meteorology as needed in environmental sciences; patterns of meteorological and climatic elements and their relevance in terrestrial ecology and urban sciences; solar and wind energy physics; practical experience in use of instruments to measure micro-climates as they relate to meteorological conditions and analysis of data.
Prerequisites: ATMO 201 or GEOG 203, or approval of instructor.

ATMO 335 Atmospheric Thermodynamics
Credits 3. 3 Lecture Hours.
Application of thermodynamics to Earth’s atmosphere; phase changes of water; stability concepts; introduction to physical chemistry.
Prerequisites: CHEM 102; MATH 251; PHYS 218.

ATMO 336 Atmospheric Dynamics
Credits 4. 3 Lecture Hours. 2 Lab Hours.
Kinematic concepts and relationships; equations of motion; geostrophic and accelerated motions; the vorticity equation and Rossby waves.
Prerequisites: ATMO 321, ATMO 335, and MATH 308, or concurrent enrollment; junior or senior classification.

ATMO 352 Severe Weather and Mesoscale Forecasting
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Parcel theory for dry and moist convection; sounding diagrams and their application to atmospheric convection; organization of midlatitude convection and severe weather; thunderstorm forecasting.
Prerequisite: MATH 152 or MATH 172.

ATMO 363 Introduction to Atmospheric Chemistry and Air Pollution
Credits 3. 3 Lecture Hours.
Descriptive introduction of the composition and chemistry of natural and pollutant compounds in the atmosphere; transport, cycling and reactivity of atmospheric material; atmospheric measurements, data processing, air quality and human health issues; air pollution trends and climate change.
Prerequisites: CHEM 101 and CHEM 102 or approval of instructor.

ATMO 370 Student Experiences Abroad in Meteorology
Credits 1 to 4. 1 to 4 Other Hours.
Observation, study and analysis of meteorological phenomena and processes in the regional settings in which they occur; study-abroad experiences.
Prerequisite: ATMO 201 or concurrent enrollment.

ATMO 435 Synoptic-Dynamic Meteorology
Credits 3. 3 Lecture Hours.
Dynamics and diagnosis of synoptic-scale systems; perturbation theory and baroclinic instability; wave energetics, frontogenesis.
Prerequisites: ATMO 336 or equivalent; MATH 308.

ATMO 441 Satellite Meteorology and Remote Sensing
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Introduction to satellite orbit dynamics, atmospheric radiative transfer, atmospheric remote sensing methods, and analysis and application of remotelysensed meteorological data.
Prerequisites: ATMO 324, MATH 308; junior or senior classification.

ATMO 443 Radar Meteorology
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Principles of radar theory, hardware, operations and analysis using real-time radar and computer-based case studies; conventional, Doppler and polarimetric weather radar; precipitation estimation, hydrometeor identification and air motion analysis; observations and analyses of thunderstorms, mesocyclones, tornadoes and gust fronts.
Prerequisites: ATMO 352; PHYS 208 or PHYS 219.

ATMO 446 Physical Meteorology
Credits 3. 3 Lecture Hours.
Physics and meteorology of clouds and precipitation; atmospheric electricity; radiative transfer.
Prerequisite: ATMO 335.
ATMO 455 Numerical Weather Prediction  
Credits 3. 2 Lecture Hours. 2 Lab Hours.  
Basic principles of computer models of the atmosphere; parameterizations; use and critical evaluation of models and model output.  
Prerequisites: MATH 308; ATMO 336 or registration therein.

ATMO 456 Practical Weather Forecasting  
Credits 3. 1 Lecture Hour. 4 Lab Hours.  
Advanced weather forecasting techniques with application to a variety of forecasting problems, both public and private sector.  
Prerequisites: ATMO 435 or registration therein; junior or senior classification.

ATMO 459 Tropical Meteorology  
Credits 3. 3 Lecture Hours.  
Tropical climatology; structure, evolution, and motion of tropical cyclones; tropical cyclone hazards; large-scale tropical phenomena.  
Prerequisites: ATMO 336; ATMO 352 or concurrent enrollment.

ATMO 461 Broadcast Meteorology  
Credit 1. 2 Lab Hours.  
Instruction in the practice of broadcast meteorology; practice in and preparation of weather forecast products and demonstration videotapes. May be taken two times for credit with faculty advisor approval.  
Prerequisites: ATMO 335 or registration therein; MATH 308 or registration therein; junior or senior classification.

ATMO 463 Air Quality  
Credits 3. 3 Lecture Hours.  
Atmospheric pollution sources, transport, sinks, and effects; monitoring of air pollutant emissions and of ambient concentrations; use of models to simulate air pollution; regulation of emissions and ambient concentrations; greenhouse gas emissions regulations.  
Prerequisite: CHEM 101 or CHEM 107 or approval of instructor; junior or senior classification.

ATMO 464 Laboratory Methods in Atmospheric Sciences  
Credits 3. 2 Lecture Hours. 4 Lab Hours.  
Instruction in chemical techniques used to monitor the atmosphere and other earth systems; sampling strategies; survey of current literature focusing on development of new techniques.  
Prerequisites: CHEM 101 and one semester of calculus (MATH 171 or equivalent).

ATMO 484 Internship  
Credits 0 to 3. 0 to 3 Other Hours.  
Supervised internship at National Weather Service or in broadcast meteorology or elsewhere with faculty advisor approval; must complete a report and have a letter from supervisor for credit. May be taken three times for credit. Must be taken on a satisfactory/unsatisfactory basis.  
Prerequisites: ATMO 251; approval of faculty advisor.

ATMO 485 Directed Studies  
Credits 1 to 23. 1 to 23 Other Hours.  
Offered to enable majors in meteorology to undertake and complete with credit in their particular fields of specialization limited investigations not covered by any other courses in established curriculum.  
Prerequisite: Junior or senior classification.

ATMO 489 Special Topics in...  
Credits 1 to 4. 1 to 4 Lecture Hours.  
Selected topics in an identified area of meteorology. May be repeated for credit.

ATMO 491 Research  
Credits 0 to 4. 0 to 4 Other Hours.  
Research conducted under the direction of faculty member in atmospheric sciences. May be repeated 2 times for credit. Registration in multiple sections of this course is possible within a given semester provided that the per semester credit hour limit is not exceeded.  
Prerequisites: Junior or senior classification and approval of instructor.

ATTR - Athletic Training (ATTR)  
ATTR 201 Field Experience in Athletic Training I  
Credit 1. 4 Lab Hours.  
Field based experience in athletic training to provide on-the-job training designed to enhance and clarify career objectives; knowledge and skill development in professional behaviors, injury prevention and risk management.  
Prerequisite: Kinesiology majors.

ATTR 202 Field Experience in Athletic Training II  
Credit 1. 4 Lab Hours.  
Field based experience in athletic training to provide on-the-job training designed to enhance and clarify career objectives; knowledge and skill development in recognition and evaluation of common injuries and illnesses and their management.  
Prerequisite: Grade of B or better in ATTR 201.

ATTR 301 Field Experience in Athletic Training I  
Credit 1. 4 Lab Hours.  
Field based experience in athletic training to provide on-the-job training designed to enhance and clarify career objectives; knowledge and skill development in the treatment and rehabilitation of athletic injuries.  
Prerequisite: Grade of B or better in ATTR 202.

ATTR 302 Field Experience in Athletic Training II  
Credit 1. 4 Lab Hours.  
Field based experience in athletic training to provide on-the-job training designed to enhance and clarify career objectives; knowledge and skill development in athletic training administration; exploration of policy and position statements; professional development.  
Prerequisite: Grade of B or better in ATTR 301.

BAEN - Biological & Ag Engr (BAEN)  
BAEN 150 Introduction to Biological and Agricultural Engineering Design  
Credit 1. 2 Lab Hours.  
Introduction to the engineering design process using design problems presented by biological and agricultural engineers from industry; problem definition, information search, idea generation and development of design concepts.  
Prerequisite: Engineering major or approval of department head.

BAEN 201 Analysis of Biological and Agricultural Engineering Problems  
Credits 3. 2 Lecture Hours. 3 Lab Hours.  
Overview of Biological and Agricultural Engineering discipline through case studies and contemporary problems; introduction to computer programming; engineering analysis and problem solving using computer programming.  
Prerequisites: Grade of C or better in ENGR 102 or ENGR 111 and MATH 151; grade of C or better in CHEM 107 and CHEM 117, or CHEM 102 and CHEM 112.
BAEN 281 Professional Development Seminar  
Credit 1. 1 Lecture Hour.  
Familiarization with engineering design process used in professional environments where BAEN and AGSM graduates are employed; discussion of professional development topics; improvement of technical communication skills. May be taken 4 times for credit.

BAEN 284 Internship  
Credits 0. 0 Lecture Hours. 0 Lab Hours. 0 Other Hours.  
No Credit. Practical experience working in a professional biological and agricultural engineering setting. May be taken three times.  
Prerequisite: Freshman or sophomore classification; approval of the instructor.

BAEN 285 Directed Studies  
Credits 0 to 4. 0 to 4 Other Hours.  
Selected problems in any phase of agricultural engineering; credit and specific content dependent upon background, interest, ability and needs of student enrolled; individual consultations and reports required.  
Prerequisites: Freshman or sophomore classification; approval of department head.

BAEN 289 Special Topics in...   
Credits 1 to 4. 1 to 4 Lecture Hours.  
Selected topics in an identified area of agricultural engineering. May be repeated for credit.  
Prerequisite: Approval of instructor.

BAEN 291 Research  
Credits 0 to 3. 0 to 3 Other Hours.  
Research conducted under the direction of faculty member in biological and agricultural engineering.  
Prerequisites: Freshman or sophomore classification and approval of instructor.

BAEN 301 Biological and Agricultural Engineering Fundamentals I  
Credits 3. 2 Lecture Hours. 3 Lab Hours.  
Fundamental engineering concepts related to agricultural systems including the environment (soil, water, and air), plant and animal production systems and processing, and associated machines and facilities; application of techniques for data collection and analysis to problems in biological and agricultural engineering; design of experiments and communication of experimental results.  
Prerequisite: Grade of C or better in MEEN 221 or concurrent enrollment.

BAEN 302 Biological and Agricultural Engineering Fundamentals II  
Credits 3. 2 Lecture Hours. 3 Lab Hours.  
Fundamentals of microbiology and biochemistry as they apply to biological and agricultural engineering systems to produce useful products and/or benign wastes; topics include microbiology, chemistry of biomolecules, microbial metabolism, bioenergetics, kinetics, mass transfer, bioreactor design, bioprocesses, and downstream processing.  
Prerequisites: Grade of C or better in BIOL 113 or BIOL 111; Grade of C or better in CHEM 222 or CHEM 227 or concurrent enrollment.

BAEN 320 Engineering Thermodynamics  
Credits 3. 2 Lecture Hours. 2 Lab Hours.  
First and second laws of thermodynamics; properties of pure substances; analysis of closed and open systems; applications to steady-flow and non-flow processes; power and refrigeration cycles; psychrometrics.  
Prerequisites: Grade of C or better in MEEN 221 or CVEN 221; grade of C or better in MATH 251 or MATH 253 or concurrent enrollment.

BAEN 340 Fluid Mechanics  
Credits 3. 3 Lecture Hours.  
Fundamentals of fluid properties; basic conservation principles of momentum, energy and continuity; flow through closed conduits; open channel flow; principles of turbomachines and compressible flow.  
Prerequisites: Grade of C or better in MEEN 221; grade of C or better in BAEN 320 or concurrent enrollment.

BAEN 354 Engineering Properties of Biological Materials  
Credits 3. 2 Lecture Hours. 3 Lab Hours.  
Relationships between composition, structure and properties of biological materials; definition and measurement of mechanical, physical, thermal and other material properties; variability of properties; application of properties to engineering analysis and design of biological and agricultural processes and systems.  
Prerequisite: Grade of C or better in MEEN 222/MSEN 222 or MSEN 222/MEEN 222.

BAEN 365 Unit Operations for Biological and Agricultural Engineering  
Credits 3. 2 Lecture Hours. 3 Lab Hours.  
Theoretical and practical understanding of basic unit operations required to design processes and equipment in the agricultural, biological, environmental, and food industries, with unique constraints presented by biological and agricultural systems considered in design of all units.  
Prerequisites: Grade of C or better in BAEN 340; grade of C or better in CVEN 305 or concurrent enrollment; junior or senior classification.

BAEN 366 Transport Processes in Biological Systems  
Credits 3. 3 Lecture Hours.  
Basic principles governing transport of energy and mass; application of these principles to analysis and design of processes involving biological, environmental and agricultural systems.  
Prerequisites: Grade of C or better in BAEN 320, BAEN 340, and BAEN 365 or concurrent enrollment; grade of C or better in MATH 308; junior or senior classification.

BAEN 370 Measurement and Control of Biological Systems and Agricultural Processes  
Credits 3. 2 Lecture Hours. 2 Lab Hours.  
Theory and application of sensors and techniques in the design of systems for automatic control in biological systems and agricultural production and processing; sensor operation; signal processing; control techniques; automation and robotics.  
Prerequisite: Grade of C or better in ECEN 215.

BAEN 375 Design Fundamentals for Agricultural Machines and Structures  
Credits 3. 3 Lecture Hours.  
Applications of stress/strain relationships and failure theory to the design of agricultural machines and structures; structural properties of engineering materials; finite element analysis and computer aided engineering design.  
Prerequisite: Grade of C or better in CVEN 305.

BAEN 399 Professional Development  
Credits 0. 0 Other Hours.  
Participation in an approved high-impact learning practice; reflection on professional outcomes from the National Society of Professional Engineers’ Engineering Body of Knowledge; documentation and self-assessment of learning experience.  
Prerequisites: Junior or senior classification; or approval of instructor.
BAEN 412 Hydraulic Power
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Hydraulic power systems; energy and power relationships; hydraulic fluid properties; frictional losses in pipelines; hydraulic pumps, cylinders, valves and motors; servo and proportional valves; circuit design and analysis; conductors, fittings and ancillary devices; maintenance of hydraulic systems; pneumatic components and circuits; electrical controls and fluid logic; electro-hydraulic systems.
Prerequisites: Grade of C or better in BAEN 340 or equivalent, or approval of instructor.

BAEN 414 Renewable Energy Conversions
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Energy/power systems through engineering and technical aspects of quantifying and designing the suitability of several types of renewable energy resources; new insights of vast resources that future engineers can harness to augment diminishing supplies of nonrenewable energy.
Prerequisite: Grade of C or better in BAEN 320 or equivalent, or approval of instructor.

BAEN 417 Fundamentals of Nanoscale Biological Engineering
Credits 3. 3 Lecture Hours.
Nanostructures, nanofabrication methods, instrumentation and applications pertinent to Biological, Food and Bioenergy systems; identification and utilization of key tools available for fabricating, manipulating and analysis of nanostructures used in biological engineering applications.
Prerequisite: Senior classification in engineering or approval of instructor.

BAEN 422/CHEN 422 Unit Operations in Food Processing
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Design of food process engineering systems; basic concepts of rheology and physical properties of foods; fundamentals of heat and mass transfer and process control.
Prerequisites: CHEN 205 and 304, or CVEN 305.
Cross Listing: CHEN 422/BAEN 422.

BAEN 427 Engineering Aspects of Packaging
Credits 3. 3 Lecture Hours.
Introduction to properties and engineering aspects of materials for use as components of a package and/or packaging system; principles of design and development of packages; evaluation of product-package-environment interaction mechanisms; testing methods; environmental concerns; regulations.
Prerequisite: Junior or senior classification or approval of instructor.

BAEN 431/CHEN 431 Fundamentals in Bioseparations
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Design principles and application of chemical engineering unit operations to the production of therapeutic and bioactive molecules.
Prerequisite: Grade of C or better in BAEN 302, BMEN 282, CHEN 282, or CHEN 382.
Cross Listing: CHEN 431/BAEN 431.

BAEN 440 Principles of Environmental Hydrology
Credits 3. 3 Lecture Hours.
Hydrologic cycle; precipitation, evaporation, evapotranspiration, infiltration, percolation, runoff, streamflow; groundwater and surface water flow; transport of contaminants in surface water; measurement and analysis of hydrologic data for engineering design.
Prerequisites: Grade of C or better in BAEN 340.

BAEN 464 Irrigation and Drainage Engineering
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Engineering principles and design of both surface and pressurized irrigation systems; introduction to the design of surface and subsurface drainage systems including crop water requirements, soil moisture, irrigation scheduling, surface irrigation, sprinkler irrigation, trickle irrigation, pumps, pipelines, irrigation canals, irrigation wells, and surface and subsurface drainage.
Prerequisite: BAEN 340.

BAEN 465 Design of Biological Waste Treatment Systems
Credits 3. 3 Lecture Hours.
Management and treatment of high organic content wastes, with emphasis on agricultural and food processing wastes; engineering design of biological waste treatment processes; regulatory aspects affecting management of agricultural wastes.
Prerequisites: Grade of C or better in BIOL 113 and CHEM 222, or BAEN 302.

BAEN 468 Soil and Water Conservation Engineering
Credits 3. 2 Lecture Hours. 2 Lab Hours.
Engineering principles of soil and water conservation; open channel flow principles, hydraulic grade stabilization, erosion control, storm water management, design of structures for floodwater routing, culvert design, design of waterways and agricultural reservoirs, stream bank protection, water quality assessment, groundwater flow, surface water modeling.
Prerequisites: Grade of C or better in BAEN 340.

BAEN 469 Water Quality Engineering
Credits 3. 3 Lecture Hours.
Nonpoint source pollution processes including transport mechanisms and contaminant fate; design of best management practices for abating nonpoint source pollution.
Prerequisites: Grade of C or better in BAEN 340 or equivalent.

BAEN 471/CHEN 471 Bioreactor Engineering
Credits 3. 3 Lecture Hours.
Fundamentals of microbial and enzyme kinetics; basic biochemical reaction theory and reactor systems; heterogeneous reactions and transport considerations in enzyme and cell reactors, and immobilized systems; bioreactor design considerations in bioprocessing.
Prerequisite: Grade of C or better in CHEN 282, CHEN 382, or BAEN 302; junior or senior classification or approval of instructor.
Cross Listing: CHEN 471/BAEN 471.

BAEN 477 Air Pollution Engineering
Credits 3. 3 Lecture Hours.
Design of air pollution abatement equipment and systems to include cyclones, bag filters and scrubbers; air pollution regulations; permitting; dispersion modeling; National Ambient Air Quality Standards.
Prerequisite: Grade of C or better in BAEN 340, CVEN 311/EVEN 311, or MEEN 344.
Cross Listing: MEEN 477 and SENG 477.

BAEN 479 Biological and Agricultural Engineering Design I
Credits 3. 3 Lecture Hours.
Capstone design project selection from problems posed by biological and agricultural engineers in industrial practice; completion of project feasibility study and outline; design philosophy, teamwork and communication; economics; product liability and reliability; use of standards and codes; goal setting, professional development, and time management; project to be completed in BAEN 480.
Prerequisites: Grade of C or better in BAEN 340 and BAEN 365; grade of C or better in BAEN 366 or BAEN 370; Grade of C or better in BAEN 354 and BAEN 375 or concurrent enrollment.
BAEN 480 Biological and Agricultural Engineering Design II
Credits 3. 6 Lab Hours.
Continuation of engineering design experience through team solution of
design problem developed in BAEN 479; preparation of design solution
under supervision of biological and agricultural engineering staff and
clients; critical evaluation of results by students; staff and industrial
consultants.
Prerequisites: Grade of C or better in BAEN 479.

BAEN 481 Seminar
Credit 1. 1 Other Hour.
Review of current literature dealing with agricultural engineering
problems presented by staff members and students.
Prerequisite: Senior classification.

BAEN 484 Internship
Credits 0. 0 Lecture Hours. 0 Lab Hours. 0 Other Hours.
No Credit. Practical experience working in a professional biological and
agricultural engineering setting. May be taken three times.
Prerequisite: Junior or senior classification; approval of the instructor.

BAEN 485 Directed Studies
Credits 0 to 4. 0 to 4 Other Hours.
Selected problems in any phase of agricultural engineering. Credit and
specific content dependent upon background, interest, ability and needs
of student enrolled. Individual consultations and reports required.
Prerequisites: Junior or senior classification and approval of department
head.

BAEN 489 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours. 0 to 4 Lab Hours.
Special topics in an identified area of agricultural engineering. May be
repeated for credit.
Prerequisite: Approval of department head.

BAEN 491 Research
Credits 0 to 3. 0 to 3 Other Hours.
Research conducted under the direction of faculty member in biological
and agricultural engineering. May be repeated 2 times for credit.
Registration in multiple sections of this course are possible within a given
semester provided that the per semester credit hour limit is not exceeded.
Prerequisites: Junior or senior classification and approval of instructor.

BEFB-Bilingual Ed Field Based (BEFB)

BEFB 425 Student Teaching in Hispanic Bilingual Education
Credits 3. 3 Lecture Hours.
Observation and participation in Hispanic bilingual education classroom
activity; supervised student teaching in accredited school. Must be taken
on a satisfactory/unsatisfactory basis.
Prerequisites: 2.5 GPA in teaching fields and professional development;
approval of department head; senior classification. Must be taken concurrently with BEFB 426.

BEFB 426 Effective Instruction of Hispanic Students of Diverse Abilities
Credits 3. 3 Lecture Hours.
Field-based application of effective instructional strategies for teaching
Hispanic bilingual students of diverse abilities. Must be taken on a
satisfactory/unsatisfactory basis.
Prerequisites: 2.5 GPA in teaching fields and professional development;
approval of department head. Must be taken concurrently with BEFB 425.

BEFB 470 Bilingual Assessment and Monitoring
Credits 3. 3 Lecture Hours.
Assessment of language ability for second language learners;
assessment instruments in bilingual/ESL programs; scoring and
evaluation of second language assessment instruments.
Prerequisites: Junior or senior classification; BEFB 472 and BEFB 474.
Must be taken concurrently with BEFB 476.

BEFB 472 Bilingual and Dual Language Methodologies
Credits 3. 3 Lecture Hours.
Use of theory and effective teaching practice in promoting student's
development of strong social and academic skills; relationship of culture
to language.
Prerequisite: Junior or senior classification. Must be taken concurrently
with BEFB 474.

BEFB 474 Biliteracy for Bilingual and Dual Language Classrooms
Credits 3. 3 Lecture Hours.
Social and linguistic characteristics of second language learners
influencing literacy skills; reading and literature instruction for second
language learners; reading and writing process across the curriculum for
second language learners.
Prerequisite: Junior or senior classification. Must be taken concurrently
with BEFB 472.

BEFB 476 Content Area Instruction for Bilingual Programs
Credits 3. 3 Lecture Hours.
Use of theory and various approaches for integrating English as a second
language; learning strategies relating to how plans, procedures and units
engage language teachers, students and learning environments.
Prerequisite: Junior or senior classification. Must be taken concurrently
with BEFB 470.

BEFB 482 Seminar in Teachers as Effective Communicators
Credit 1. 1 Lecture Hour.
Effective communication techniques for working with learners,
colleagues, administrators and stakeholders; professional and social
linguistic protocols for bilingual education teachers.
Prerequisites: Junior or senior classification; concurrent enrollment in
BEFB 472 and BEFB 474.

BESC - Bioenvironmental Sci (BESC)

BESC 201 Introduction to Bioenvironmental Sciences
Credits 3. 3 Lecture Hours.
A broad survey of environmental science with an emphasis on scientific
literacy, current events, global and international issues and historic
context.

BESC 204 Molds and Mushrooms: The Impact of Fungi on Society and
the Environment
Credits 3. 3 Lecture Hours.
Introduction to the fungi and the impact these organisms have on society
and the environment; includes life cycles of fungi; classification schemes,
pathogens of plants, animals and humans, fungi in food production; toxic
fungi and the law, and others.

BESC 285 Directed Studies
Credits 1 to 4. 1 to 4 Other Hours.
Individually supervised research or advanced studies for lower-division
undergraduate students to independently investigate special problems
not available in existing courses.
Prerequisite: Approval of instructor in consultation with departmental
advisor.
BESC 291 Research
Credits 1 to 4. 1 to 4 Other Hours.
Research conducted under the direction of faculty member in bioenvironmental sciences. May be repeated 3 times for credit.
Prerequisites: Freshman or sophomore classification and approval of instructor.

BESC 311 International Perspectives on Environmental Issues
Credits 3. 3 Lecture Hours.
Role of the United Nations and other institutions that promote international cooperation toward sustainable development goals; influence of cultural views on critical thinking about environmental issues, including population, water and agriculture, biodiversity and energy.
Prerequisite: Junior classification or approval of instructor; must attend two mandatory pre-departure meetings.

BESC 314 Pathogens, the Environment and Society
Credits 3. 3 Lecture Hours.
The impact of microorganisms (bacteria, fungi and viruses) on the development of modern culture and society; the role pathogens played in the history of mankind and the influence of the changing environment on emerging diseases.
Prerequisite: Junior or senior classification.

BESC 320 Water and the Bioenvironmental Sciences
Credits 3. 3 Lecture Hours.
Critical understanding of salient issues relating to fresh water as a limited and important bioenvironmental resource.
Prerequisite: Junior or senior classification.

BESC 357 Biotechnology for Biofuels and Bioproducts
Credits 3. 3 Lecture Hours.
Biotechnology issues in developing bioenergy as a renewable energy source; emphasis on the three generations of bioenergy and enabling technologies; special topics include recent advances in bioenergy research, government policy, and industrial development.
Prerequisite: BESC 201 and junior or senior classification.

BESC 367 U.S. Environmental Regulations
Credits 3. 3 Lecture Hours.
Investigation of the legal infrastructure of the U.S. associated with regulating environmental impacts; examination of major U.S. environmental statutes associated with air and water quality, toxic substances, waste and hazardous substance release, energy and natural resources; review the relationship between U.S. policy and international environmental regulations.
Prerequisites: BESC 201 and junior or senior classification.

BESC 401 Bioenvironmental Microbiology
Credits 3. 3 Lecture Hours.
The interactions of microorganism in diverse environments; applied aspects of microbial interactions in the environment, their effects on the environment, and potential use to solve environmental problems.
Prerequisites: SCSC 405 and 3 hours of organic chemistry, or equivalents; or approval of instructor.

BESC 402 Microbial Processes in Bioremediation
Credits 3. 3 Lecture Hours.
Metabolic pathways of microbes involved in the biodegradation of hazardous materials will be presented; ecological requirements for biotreatability of contaminated sites will be discussed emphasizing factors affecting microbial growth; strategies for in situ bioaugmentation will be presented.
Prerequisite: One semester of organic chemistry.

BESC 403 Sampling and Environmental Monitoring
Credits 3. 2 Lecture Hours. 3 Lab Hours.
Introduction to environmental sampling and methodology; strategies and analyses of sampling data; overview of current applications of sampling and monitoring in the environmental sciences; emphasis on practical aspects of sampling from air, soil and water; detection and quantification of microbial and chemical unknowns in environmental media.
Prerequisite: Junior or senior classification or approval of instructor.

BESC 411 Environmental Health and Safety Compliance
Credits 3. 3 Lecture Hours. 1 Lab Hour.
Investigation of various Environmental Health and Safety (EHS) practices necessary for compliance with state and federal regulations; reinforcement of real-world understanding; tour several regulated facilities on campus and learn about the particular TAMU-EHS compliance management strategies for each (utilities, underground storage tanks, wastewater treatment and hazardous waste facility).
Prerequisite: BESC 367 or similar regulation intensive course and approval of instructor.

BESC 481 Seminar
Credit 1. 1 Lecture Hour.
Capstone course for topics in bioenvironmental sciences; critical analysis of environmental issues through written themes and presentations. May be taken three times for credit.
Prerequisites: BESC 201 and senior classification in BESC major.

BESC 484 Field Experience
Credits 1 to 4. 1 to 4 Other Hours.
An on-the-job supervised experience program conducted in the area of the student's specialization.
Prerequisite: Junior or senior classification or approval of department head.

BESC 485 Directed Studies
Credits 1 to 4. 1 to 4 Other Hours.
Special problems for advanced undergraduates to permit study of subject matter not available in existing courses.
Prerequisite: BESC 201 or approval of instructor.

BESC 489 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours. 1 to 4 Lab Hours.
Selected topics in an identified area of bioenvironmental sciences. May be repeated for credit.
Prerequisite: BESC 201 or approval of instructor.

BESC 491 Research
Credits 1 to 4. 1 to 4 Other Hours.
Research conducted under the direction of faculty member in bioenvironmental sciences. May be repeated 3 times for credit. Registration in multiple sections of this course are possible within a given semester provided that the per semester credit hour limit is not exceeded.
Prerequisites: Junior or senior classification and approval of instructor.

BICH - Biochemistry (BICH)

BICH 101/GENE 101 Perspectives in Biochemistry and Genetics
Credit 1. 1 Lecture Hour.
Introduction to biochemistry and genetics and their relationship to the biological, biophysical and chemical sciences.
Prerequisite: Biochemistry and genetics major or approval of instructor.
Cross Listing: GENE 101/BICH 101.
BICH 281 Seminar in Biochemical Research
Credit 1. 1 Lecture Hour.
Round table discussions with visiting seminar speakers; review current literature; topics including cutting edge research in biochemistry.
Prerequisites: BICH 107 and freshman or sophomore classification in biochemistry or approval of instructor.

BICH 285 Directed Studies
Credits 1 to 4. 1 to 4 Other Hours.
Introduction to laboratory research.
Prerequisite: Freshman or sophomore classification in biochemistry or approval of instructor.

BICH 289 Special Topics in...
Credits 1 to 4. 1 to 4 Lecture Hours.
Selected topics in an identified area of biochemistry. May be repeated for credit.
Prerequisite: Freshman or sophomore classification in biochemistry or approval of instructor.

BICH 291 Research
Credits 0 to 4. 0 to 4 Other Hours.
Research conducted under the direction of faculty member in Biochemistry. May be taken three times for credit.
Prerequisites: Freshman or sophomore classification and approval of instructor; biochemistry majors only.

BICH 303 Elements of Biological Chemistry
Credits 3. 3 Lecture Hours. 1 Lab Hour.
Survey of the biochemical sciences designed for the non-biochemistry major; overview of the chemistry and metabolism of biologically important molecules, the biochemical basis of life processes, cellular metabolism and regulation. Students requiring biochemistry in greater depth should register for BICH 410 and BICH 411.
Prerequisite: CHEM 222 or equivalent; not open to biochemistry majors.

BICH 403 Cellular Biophysics
Credits 3. 3 Lecture Hours.
Current topics in cellular biophysics and systems biology; quantitative and predictive perspectives of cellular life; basic tools of biophysics such as fluorescence imaging and data analysis.
Prerequisites: BIOL 112 and MATH 152; BICH 440 or concurrent enrollment.

BICH 404 Biochemical Calculations
Credits 2. 2 Lecture Hours.
Quantitative and computational approaches to biochemical problems.
Prerequisites: Grade of C or better in BICH 440 or concurrent enrollment; junior or senior classification.

BICH 407 Horizons in Biological Chemistry II
Credit 1. 1 Lecture Hour.
Application of formal classroom instruction; applied view of biochemical concepts; use of biochemical principles to ascertain, evaluate, and make judgments on research information. May be taken five times.
Prerequisite: BICH 411 or BICH 441.

BICH 410 Comprehensive Biochemistry I
Credits 3. 3 Lecture Hours. 1 Lab Hour.
Structure, function and chemistry of proteins and carbohydrates; kinetics, mechanisms and regulation of enzymes; metabolism of carbohydrates. Not open to biochemistry or genetics majors.
Prerequisite: CHEM 228 or approval of instructor.

BICH 411 Comprehensive Biochemistry II
Credits 3. 3 Lecture Hours. 1 Lab Hour.
A continuation of BICH 410. Structure, function, chemistry and metabolism of lipids and nucleic acids; cellular metabolism viewed from the standpoint of energetics and control mechanisms; interrelationships of metabolic pathways. Not open to biochemistry or genetics majors.
Prerequisite: BICH 410.

BICH 412 Biochemistry Laboratory I
Credit 1. 3 Lab Hours.
Selected methods used to identify, isolate, purify and characterize biomolecules. Not open to biochemistry or genetics majors.
Prerequisite: BICH 410 or registration therein.

BICH 414 Biochemical Techniques I
Credits 2. 6 Lab Hours.
Techniques currently used in biochemistry such as spectrophotometry, column chromatography (gel filtration, ion exchange) electrophoresis and immunoelectrophoresis, performed in purification of proteins, enzymes and nucleic acids. For majors in biochemistry, genetics, molecular and cell biology and microbiology.
Prerequisite: BICH 440 or BICH 410.

BICH 419/GENE 419 Computational Techniques for Evolutionary Analysis
Credits 3. 3 Lecture Hours.
Computational techniques for studying evolution; algorithms for construction and analysis of evolutionary relationships.
Prerequisite: Junior or senior classification or approval of instructor.
Cross Listing: GENE 419/BICH 419.

BICH 431/GENE 431 Molecular Genetics
Credits 3. 3 Lecture Hours.
Molecular basis for inheritance; gene structure and function, chromosomal organization, replication and repair of DNA, transcription and translation, the genetic code, regulation of gene expression, genetic differentiation and genetic manipulations.
Prerequisites: BICH 410 or BICH 440; GENE 301 or GENE 302 or GENE 320/BIMS 320.
Cross Listing: GENE 431/BICH 431.

BICH 432/GENE 432 Laboratory in Molecular Genetics
Credits 2. 6 Lab Hours.
Laboratory for molecular genetics providing technical experience with tools of molecular biology.
Prerequisite: GENE 301, GENE 302, or GENE 320/BIMS 320; BICH 431/GENE 431 or GENE 431/BICH 431.
Cross Listing: GENE 432/BICH 432.

BICH 440 Biochemistry I
Credits 3. 3 Lecture Hours.
Rigorous treatment of the structure, function and chemistry of proteins and carbohydrates; kinetics, mechanisms and regulation of enzymes; metabolism of carbohydrates. Course designed for biochemistry and genetics majors and honors students only.
Prerequisite: Grade of C or better in CHEM 228 and concurrent enrollment in BICH 404, or approval of instructor.

BICH 441 Biochemistry II
Credits 3. 3 Lecture Hours.
Continuation of BICH 440; structure, function, chemistry and metabolism of lipids and nucleic acids, cellular metabolism viewed from the standpoint of energetics and control mechanisms; interrelationships of metabolic pathways. Course designed for biochemistry and genetics majors and honors students only.
Prerequisite: Grade of C or better in BICH 440.
BICH 450/BIOL 450 Genomics
Credits 4. 3 Lecture Hours. 3 Lab Hours.
The study of genomic data includes consideration of the logic behind the most important genomic approaches, as well as their capabilities and limitations in investigating biological processes; the science of accessing and manipulating genomic data; and practical applications, including development of an hypotheses-driven datamining experiment.
Prerequisites: BIOL 213, GENE 301 or GENE 302, BICH 431/GENE 431 or GENE 431/BICH 431, or BIOL 351; junior or senior classification or approval of instructor.
Cross Listing: BIOL 450/BICH 450.

BICH 460 Genome Annotation with Ontologies
Credit 1. 2 Lab Hours.
Use of ontologies as structured controlled vocabularies for the organization of biological data; annotation based on critical reading of the scientific literature. May be taken two times for credit.
Prerequisite: Junior or senior classification or approval of instructor.

BICH 461 Advanced Genome Annotation with Ontologies
Credit 1. 2 Lab Hours.
Advanced topics in functional annotation using ontologies; usage issues and quality control for ontologies and annotations; mentoring annotation activities from BICH 460 and evaluation of annotations. May be taken three times for credit.
