Curriculum in Plant and Environmental Soil Science is administered by the Department of Soil and Crop Sciences. Students following this curriculum develop and utilize basic scientific knowledge to understand the most fundamental resources—plants, soils, and water—and the interaction of these resources in different environmental settings. The required courses provide an essential foundation in several disciplines, while the elective courses can be selected to meet the interests, needs and objectives of individual students.

Based on professional goals and objectives, students will select an emphasis in crops or soil and water. The crops emphasis focuses on the principles involved in the production, management, marketing and use of fiber, forage, grain, biofuel and oilcrops. In the soil and water emphasis, students will study the nature, properties, management, conservation, and use of soils and water. The graduate in Plant and Environmental Soil and Science may choose a career in: education—consulting, extension, or public relations; production agriculture—biofuel or seed production, farming, or farm management; soil and water resource management—soil surveying, land appraisal, land use planning, conservation and pollution abatement, or watershed management; environmental—pollution control and environmental protection as affected by plant-soil-water interactions.

Flexible curricula are provided so that each student, in consultation with their academic advisor, can design a degree program that best serves the student’s career objectives.

### Program Requirements

#### Department of Soil and Crop Sciences Core Courses

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>CHEM 222</td>
<td>Elements of Organic and Biological Chemistry</td>
<td>3</td>
</tr>
<tr>
<td>SCSC 205</td>
<td>Problem Solving in Plant and Soil Systems</td>
<td>3</td>
</tr>
<tr>
<td>SCSC 301</td>
<td>Soil Science</td>
<td>4</td>
</tr>
<tr>
<td>SCSC 307</td>
<td>Crop Biology and Physiology</td>
<td>4</td>
</tr>
<tr>
<td>SCSC 309</td>
<td>Water in Soils and Plants</td>
<td>4</td>
</tr>
<tr>
<td>SCSC 481</td>
<td>Senior Seminar</td>
<td>2</td>
</tr>
</tbody>
</table>

#### Experiential requirement

Select one of the following:

- SCSC 420 Brazilian Agriculture and Food Production Systems
- SCSC 421 International Agricultural Research Centers - Mexico
- SCSC 423 Natural Resources and Agricultural Sustainability in UK
- SCSC 484 Internship
- SCSC 491 Research
- STAT 302 Statistical Methods
- or ESSM 313 or Vegetation Sampling Methods and Designs in Ecosystems

#### Pest Management

Select two of the following:

- PLPA 301 Plant Pathology
- PLPA 303 Plant Pathology Laboratory
- ENTO 201 General Entomology

<table>

Select from the following:

- BIOL 101 Botany
- BIOL 111 Introductory Biology I
- BIOL 113 Essentials in Biology
- CHEM 102 Fundamentals of Chemistry II
- GEOL 101 Principles of Geology
- PHYS 201 College Physics
- PHYS 218 Mechanics

Mathematics elective (MATH prefix required) | 6

**Total Semester Credit Hours**

120

---

1. To be selected from soils emphasis courses.
2. The Graduation requirements include a requirement for six hours of international and cultural diversity courses. A course satisfying a Core category, a college/department requirement, or a free elective can be used to satisfy this requirement. See academic advisor.
3. Credit by examination may be used to substitute for courses.
