SCSC 105 World Food and Fiber Crops  
Credits 3. 3 Lecture Hours. 2 Lab Hours.  
(AGRI 1307 and AGRI 1107, AGRI 1407) World Food and Fiber Crops.  
Plant relationships, structure and development; environmental factors  
affecting plants; technological aspects of agricultural practices; food  
production for an increasing population.

SCSC 201 Great Plains Settlement and Farming  
Credits 3. 3 Lecture Hours.  
American Indian hunting and farming; transformation by Manifest  
destiny, Homestead Act, railroads, Indian Wars, U.S. Army, crops and farm  
families; effects of World Wars, Great Depression, Dust Bowl, irrigation,  
fertilization, pest controls, precision farming.

SCSC 205 Problem Solving in Plant and Soil Systems  
Credits 3. 3 Lecture Hours. 2 Lab Hours.  
Problems in management of soils, crops, and natural resources; problem  
solving skills including collecting, interpreting, using and communicating  
scientific and nonscientific data.

SCSC 206 Professional Development in Agronomy  
Credit 1. 2 Lab Hours.  
Enhancement of human relation skills related to a career in soil and  
crop sciences; field trip to Mississippi to interact with leadership from a  
global agricultural company; on-campus experiences to improve effective  
learning practices, job seeking and retention and setting and achieving  
short-term and long-term professional goals.  
Prerequisites: Junior or senior classification or approval of instructor.

SCSC 207 Crop Biology and Physiology  
Credits 4. 3 Lecture Hours. 2 Lab Hours.  
Emphasis on seed biology, germination, development of cells and  
tissues, anatomy, and growth and development of crop plants; plant  
hormones and tropisms, membranes and membrane transport, water  
absorption and transport through plants, photosynthesis, respiration and  
carbohydrate metabolism, and flowering; environmental effects on crop  
adaptation, growth, development, and productivity.  
Prerequisites: SCSC 205, junior or senior classification, or approval of  
instructor.

SCSC 208 World Water and Soils  
Credits 4. 3 Lecture Hours. 2 Lab Hours.  
Fundamentals of plant water use, and water movement and storage  
in soils; evapotranspiration, plant water requirements and irrigation  
scheduling; issues impacting irrigation and water quality; techniques for  
measuring soil and plant water relations.  
Prerequisite: Junior or senior classification, or approval of instructor.

SCSC 209 Social and Ethical Aspects of International Cropping Systems  
Credits 3. 3 Lecture Hours.  
Review of plant physiology and crop adaptation to mesoclimates; crop  
management factors of planting, pest control, plant nutrition, irrigation,  
GIS, and harvesting techniques; special units on organic farming,  
conservation agriculture, farming in low-rainfall climates, and bioenergy  
crops; influence of markets, government policies, and the global economy  
on cropping strategies.  
Prerequisites: SCSC 207, junior or senior classification, or approval of  
instructor.

SCSC 210 Soil Morphology and Interpretations  
Credits 2. 1 Lecture Hour. 3 Lab Hours.  
Field study of morphological features of soil profiles and the  
morphological characterization of important soils of Texas in relation to  
soil use and management.  
Prerequisite: SCSC 301 or registration therein.

SCSC 211 Principles of Crop Production  
Credits 3. 3 Lecture Hours.  
Review of plant physiology and crop adaptation to mesoclimates; crop  
management factors of planting, pest control, plant nutrition, irrigation,  
GIS, and harvesting techniques; special units on organic farming,  
conservation agriculture, farming in low-rainfall climates, and bioenergy  
crops; influence of markets, government policies, and the global economy  
on cropping strategies.  
Prerequisites: SCSC 207, junior or senior classification, or approval of  
instructor.

SCSC 212 Professional Development in Turfgrass  
Credit 1. 1 Lab Hour.  
Includes but not limited to fertilizer, pesticide, irrigation calculations;  
turfgrass, insect and weed identification and management, soils  
and rootzone construction; irrigation system operation and auditing;  
sprayer and spreader operation and calibration; builds upon and allows  
application of information obtained in SCSC 302; designed to better  
prepare those intending to compete in the GCSAA and STMA Collegiate  
Turf Bowl competitions.  
Prerequisite: SCSC 302 or registration therein.

SCSC 213 Social and Ethical Aspects of International Cropping Systems  
Credits 3. 3 Lecture Hours. 0 Lab Hours.  
Philosophical basis of ethical decisions; includes slavery, war, population  
growth, migration, farm workers, chemical inputs, genetically modified  
organisms, soil and water conservation and protection of wild species.  
Prerequisite: Junior or senior classification.
**SCSC 401/FIVS 401 Forensic Soil Science**  
**Credits**: 3. 2 Lecture Hours. 2 Lab Hours.  
Examination of soils biology, chemistry and physical attributes to solve crimes; soil and geologic characteristics associated with crime scene examination; physical, biological and chemical characteristics and use of trace evidence.  
**Prerequisite**: Junior or senior classification or approval of instructor.  
**Cross Listing**: FIVS 401/SCSC 401.

**SCSC 402 Crop Stress Management**  
**Credits**: 4. 3 Lecture Hours. 2 Lab Hours.  
Identification, measurement, biology, physiology and management of crop stress; limitations of specific environments to crop productivity; morphological and physiological crop stress response mechanisms.  
**Prerequisites**: SCSC 307, junior or senior classification, or approval of instructor.

**SCSC 405 Soil and Water Microbiology**  
**Credits**: 3. 3 Lecture Hours.  
Roles of soil and water microorganisms in the sustainability and productivity of various ecosystems with specific emphasis on plant-microbial interactions, nutrient cycling, degradation of pesticides and other xenobiotics, generation of trace gases, and soil and water quality; hands-on laboratory experience with current techniques in soil and water microbiology.  
**Prerequisites**: Junior or senior classification, or approval of instructor.

**SCSC 406 Soil and Water Microbiology Laboratory**  
**Credit**: 1. 2 Lab Hours.  
Hands-on experience with current techniques for examining the types, numbers, activity and roles of soil and water microorganisms with specific application to the carbon, nitrogen and sulfur cycle; plant-microbial interactions; soil and water quality.  
**Prerequisites**: SCSC 405 or concurrent enrollment; junior or senior classification or approval of instructor.

**SCSC 410 International Agricultural Systems**  
**Credits**: 3. 3 Lecture Hours.  
Contrast modern agriculture systems with those in developing countries; emphasis on natural resources and technologies interacting with economic and social development on a global scale.  
**Prerequisite**: Junior or senior classification, or approval of instructor.

**SCSC 411 Biotechnology for Crop Improvement**  
**Credits**: 3. 3 Lecture Hours.  
Use of biotechnology to improve agricultural, horticultural and forest crops; techniques and methods used and case studies where biotechnology has been used to alter traits such as pathogen resistance, protein or oil consumption, ripening, fertility and wood properties.  
**Prerequisite**: BIOL 111 or equivalent.  
**Cross Listing**: MEPS 411/GENE 411 and GENE 411/MEPS 411.

**SCSC 420 Brazilian Agriculture and Food Production Systems**  
**Credits**: 3 to 6. 3 to 6 Lecture Hours.  
Comparison and study of Brazilian and U.S. agriculture and culture related to soil, water, and forest conservation and management in Brazil; tour and learn about Amazon River, rain forest, Brasilia, farm, ranch, and floral production systems, agricultural cooperatives and research, sugar and alcohol production, phosphate mining and production; visit points of interest.  
**Prerequisite**: Junior or senior classification or approval of instructor.

**SCSC 421 International Agricultural Research Centers - Mexico**  
**Credits**: 3. 3 Lecture Hours.  
International agricultural research; CIMMYT interaction; modern and underdeveloped tropical agricultural systems; introduction to Mexican culture; critical evaluation of complex and international agricultural issues and research programs.  
**Prerequisites**: Junior or senior classification and approval of instructor.

**SCSC 422 Soil Fertility and Plant Nutrient Management**  
**Credits**: 3. 3 Lecture Hours.  
Chemical and biological reactions in soils that influence nutrient availability to plants; environmental aspects associated with nutrient availability and fertilization, especially for nitrogen (N) and phosphorus (P).  
**Prerequisites**: SCSC 301, junior or senior classification, or approval of instructor.

**SCSC 423 Natural Resources and Agricultural Sustainability in UK**  
**Credits**: 3. 3 Lecture Hours.  
Environmental impacts and sustainability of United Kingdom and U.S. agriculture compared; soil, water, crop, and environmental management; conservation of watersheds; production of hydropower; sustainable use of water resources; cultural immersion.  
**Prerequisites**: Junior or senior classification and approval of instructor.

**SCSC 427 Sports Field Construction**  
**Credits**: 4. 3 Lecture Hours. 2 Lab Hours.  
Development of knowledge, skills, and experiences for the design and construction of a turfgrass-based sports field; case studies and visits to model fields, guest lectures from sports field owners, designers, and construction company managers; hands-on construction of a small-scale sand-based sports field.  
**Prerequisites**: SCSC 309, junior or senior classification, or approval of instructor.

**SCSC 428 Advanced Turf Ecology and Physiology**  
**Credits**: 3. 3 Lecture Hours.  
Examination of how environmental stresses, genetics, and cultural management practices influence the growth, development, and physiology of turfgrasses; exploration of how turf communities function within urban landscapes; introduction to environmental, social, and political issues encountered when managing these areas.

**SCSC 429 Turf Management Systems**  
**Credits**: 4. 3 Lecture Hours. 2 Lab Hours.  
Development of turf management plans for large turfgrass sites including parks, golf courses and sports facilities; use of case studies to critically analyze turf management programs.  
**Prerequisite**: SCSC 428.

**SCSC 430 Turfgrass Maintenance**  
**Credits**: 4. 3 Lecture Hours. 2 Lab Hours.  
Activities in a day-to-day turfgrass maintenance operation; decision-making in culture, equipment, irrigation systems, budgets, records and labor management. Laboratory includes principles and actual mechanical procedures involved in maintaining turfgrass.  
**Prerequisite**: SCSC 428 or approval of instructor.

**SCSC 432 Soil Fertility and Plant Nutrient Management Laboratory**  
**Credit**: 1. 3 Lab Hours.  
Methods used in soil testing, fertilizer recommendations, chemical and physical properties of soils, and determination of specific characteristics of a collected and analyzed soil sample.  
**Prerequisites**: SCSC 301; SCSC 422 or registration therein, junior or senior classification, or approval of instructor.
SCSC 441 Crop Production Systems  
Credits 3. 3 Lecture Hours.  
Integration of crop production and management concepts through a systems approach; application of concepts using case studies and team projects.  
**Prerequisite:** Senior classification or approval of instructor.

SCSC 444 Forage Ecology and Management  
Credits 3. 3 Lecture Hours.  
Investigation of multidisciplinary approaches toward the development of integrated forage, livestock, and wildlife production systems that are economically feasible and environmentally sustainable.  
**Prerequisite:** Junior or senior classification or approval of instructor.

SCSC 446 Weed Management and Ecology  
Credits 3. 2 Lecture Hours. 2 Lab Hours.  
Practical information related to weed management and ecology for various vegetative systems to include turf and agronomic crops; calibration of applicators, herbicide labels, mode of action of herbicides, herbicide-resistant weed management.  
**Prerequisites:** BIOL 111 or 101, junior or senior classification.

SCSC 452 Chemical Weed Control Laboratory  
Credit 1. 0 Lecture Hours. 2 Lab Hours.  
Important weed problems in Texas; herbicides and equipment used for herbicidal application.  
**Prerequisite:** SCSC 450 or registration therein.

SCSC 453 Essentials for Weed Systematic Identification and Management in Agronomy  
Credits 3. 3 Lecture Hours.  
Fundamental understanding and hands-on training on the basics of plant weed identification and management; relevant to agronomy, turf, horticulture and rangeland science and vegetation identification and management.  
**Prerequisite:** Junior or senior classification.

SCSC 455 Environmental Soil and Water Science  
Credits 3. 3 Lecture Hours.  
Discussion of physical, chemical, and biological properties of soil and water and the impact on productivity and sustainability of various ecosystems; application of the knowledge of properties and soil processes to develop and evaluate strategies for protecting and/or improving soil and water quality.  
**Prerequisite:** SCSC 301 or approval of instructor.

SCSC 458 Watershed and Water Quality Management  
Credits 3. 3 Lecture Hours.  
Land use impact on surface and ground water chemistry; legislation impacting water quality; surface and groundwater impairment and restoration.  
**Prerequisite:** CHEM 101 or equivalent or approval of instructor; junior or senior classification.

SCSC 481 Senior Seminar  
Credits 2. 2 Lecture Hours.  
Capstone course bringing together student experiences, exams, and exercises necessary for completing and assessing curriculum program learning outcomes.  
**Prerequisite:** Senior classification.

SCSC 484 Internship  
Credits 0 to 4. 0 to 4 Other Hours.  
Practical on-the-job experience in the student’s area of specialization.  
**Prerequisites:** Junior or senior classification; approval of instructor; 2.0 or better GPR in major and overall.

SCSC 485 Directed Studies  
Credits 0 to 4. 0 to 4 Other Hours.  
For advanced undergraduates to permit field or laboratory investigation or study of subject matter not included in established courses.  
**Prerequisite:** 10 hours of junior and senior agronomy or approval of instructor.

SCSC 489 Special Topics in...  
Credits 1 to 4. 1 to 4 Lecture Hours. 0 to 4 Lab Hours.  
Selected topics in an identified area of agronomy. May be repeated for credit.  
**Prerequisite:** Approval of department head.

SCSC 491 Research  
Credits 0 to 4. 0 to 4 Other Hours.  
Research conducted under the direction of faculty member in agronomy. May be repeated 2 times for credit. Registration in multiple sections of this course are possible within a given semester provided that the per semester credit hour limit is not exceeded.  
**Prerequisites:** Junior or senior classification and approval of instructor.
