TECHNICAL DEVELOPMENT MANAGEMENT - CERTIFICATE

This certificate program will provide the essential knowledge to plan and successfully manage IT projects for success.

Mays Business School offers a Graduate Certificate in Technical Development Management. This certificate, open for Flex Online MS Management Information System students, provides an opportunity for students to become more proficient in the area of technical development management by focusing on understanding the proper ways to plan for, develop, and manage projects and product life cycles. The global IT industry includes the development of products and management of services. Failures in this area prove to be quite costly. As such, proper management is imperative to business competitiveness and sustainability.

This program is also approved for delivery via asynchronous distance education technology.
