

ADVANCED EDUCATION IN GENERAL DENTISTRY - CERTIFICATE

Advanced Education in General Dentistry (<https://dentistry.tamu.edu/departments/comprehensive-dentistry/aegd/>) (AEGD) is housed within the Department of Comprehensive Dentistry (<https://dentistry.tamu.edu/departments/comprehensive-dentistry/>). It is a 12-month program that provides advanced training in clinical dentistry and applied basic science. The objective of the program is to enhance the student's competence and confidence in the various clinical disciplines that are integral components of dentistry. AEGD graduates will have a broader base of knowledge and experience to facilitate judgments in diagnosis, treatment planning, and decision making during treatment.

Interviews of selected applicants are scheduled from September and November for the class beginning in the summer of the following year.

Program Goals

The AEGD program goals include:

- Expand the scope and depth of the dentist's clinical skills and didactic knowledge.
- Teach them the newest technologies in different disciplines - including digital workflow.
- Enable them to effectively provide comprehensive patient care to a wide range of population groups using the latest dental techniques and technologies.

Accordingly, the program is structured to allow students to exercise increasingly independent judgment beyond that expected in the pre-doctoral curriculum.

The emphasis of the program is on diagnosis and treatment planning, comprehensive restorative dentistry, esthetic and implant dentistry, and digital dentistry and its application in different disciplines of dentistry. The program emphasizes the coordination of clinical care of all patients in a multidisciplinary setting.

Predominantly clinically oriented, it includes a didactic component of approximately twenty percent of scheduled time. Graduates of the AEGD program are awarded a Certificate in Advanced Education in General Dentistry upon completion of all program requirements.

The **clinical** phase consists of experiences and instruction at a level beyond DDS training in the following areas: esthetic dentistry, endodontics, periodontics, oral surgery, operative, fixed and removable prosthodontics, implants (surgical placement and restoration), rotations in the graduate pediatric dental clinic, community dentistry, treating special needs and medically compromised patients, and limited experience in orthodontics. Educationally qualified specialists in each of these areas participate in instruction and are always available for consultations.

The **didactic** component of the AEGD program provides the student with a broad academic background from which sound clinical judgments can be made regarding diagnosis, treatment planning, and the selection of the appropriate method of treatment for each individual patient. The didactic phase is scheduled on a regular basis and includes lectures, seminars, literature reviews, treatment planning conferences, clinical oral

pathology conferences and special projects. Examples of special projects may include table clinics and preparation of a professional lecture. The following areas of interest are included in didactic sessions:

- digital dentistry;
- esthetic dentistry;
- oral implantology;
- fixed and removable prosthodontics;
- endodontics;
- oral pathology and oral medicine;
- physical evaluation and internal medicine;
- oral diagnosis and treatment planning;
- preventive, operative, and conservative dentistry;
- comprehensive control of pain and anxiety in the conscious patient;
- special care, medically compromised patients, geriatric dentistry;
- asepsis, infection and hazard control; and
- evidence-based dentistry and current literature.

Students will gain didactic knowledge in practice management, which will prepare them to deal with acquiring, managing, and coordinating different types of potential practice situations they may encounter upon graduation.

The program is open to applicants with a DDS/DMD (or equivalent). Criteria for student selection includes: academic record; extracurricular achievement, honors, and awards; class rank; professional experience and additional training; references; and the personal interview. The program uses ADEA PASS (<https://www.adea.org/PASSapp/applicants/>) (American Dental Education Association Postdoctoral Application Support Service). The deadline for application is September 1 each year for a start date late in June of the following year.

For additional information about the AEGD Certificate, visit our website (<https://dentistry.tamu.edu/departments/comprehensive-dentistry/aegd/about.html>).

All courses within this program are taught face-to-face, on campus at the College of Dentistry in Dallas. This program may require off-campus assignments at local, Dallas-Fort Worth Metroplex hospitals or dental clinics.

This program prepares students for the opportunity to pursue an occupational license. Please refer to the Notification for Students Pursuing an Occupational License (<https://catalog.tamu.edu/graduate/appendices/licensing/>) in our catalog for additional information.

Program Requirements

Code	Title	Semester Credit Hours
AEGD 600	Clinical Dentistry I	0.0
AEGD 601	Clinical Dentistry II	0.0
AEGD 602	Clinical Dentistry III	0.0
AEGD 603	Implant Dentistry	1.5
AEGD 604	Practice Management I	1.5
AEGD 606	Advanced Removable Prosthodontics	1.5
AEGD 607	Advanced Fixed Prosthodontics	1.5

AEGD 608	Advanced Clinical Periodontics	1.5
AEGD 611	Advanced Clinical Endodontics I	2.0
AEGD 611	Advanced Clinical Endodontics I	2.0
AEGD 614	Advanced Dentistry for Special Care Patients	1.5
AEGD 615	Treatment Planning Conference I	1.5
AEGD 616	Treatment Planning Conference II	1.5
AEGD 617	Treatment Planning Conference III	1.5
AEGD 618	Current Literature Review I	1.5
AEGD 619	Current Literature Review II	1.5
AEGD 620	Current Literature Review III	1.5
AEGD 625	Current Concepts in Operative Dentistry	1.5
OMFS 625	Physical Diagnosis and Internal Medicine	1.0
PROS 651	Implant Concepts and Techniques, Surgical Placement	0.0
Total Semester Credit Hours		24.5

Must complete 12 months of residency, total credit hours specified, any non-credit courses specified, and be approved by the Promotions Committee for this certificate to be awarded.

In accordance with Student Rule 10.4.1, grades of S or U may be assigned in certain officially designated certificate courses.
