DOCTOR OF PHILOSOPHY IN INTERDISCIPLINARY ENGINEERING

The Doctor of Philosophy (PhD) in Interdisciplinary Engineering (ITDE) program allows students to develop unique expertise in emerging areas that may not be covered by traditional departmental degree programs and provides a path for those whose research interests cross engineering disciplines and/or college lines. Graduates with interdisciplinary engineering skill sets are highly sought after by employers, and the PhD in ITDE poises graduates to become leaders in academic organizations, government and industry. Examples of previously awarded interdisciplinary topics include environmental engineering and public policy as well as engineering and education.

The ITDE program is administratively housed in the Department of Multidisciplinary Engineering. Doctoral candidates in ITDE are expected to excel academically with high-quality journal publications before defending their dissertations. These candidates are further expected to establish strong relationships with industry, through internships and related activities.

This program is also approved for delivery via asynchronous or synchronous distance education technology.

Program Requirements

Program Requirements

- Student’s Advisory Committee (p. 1)
- Degree Plan (p. 1)
- Transfer of Credit (p. 2)
- Research Proposal (p. 2)
- Examinations (p. 2)
  - Preliminary Examination (p. 2)
  - Preliminary Examination Format (p. 2)
  - Preliminary Examination Scheduling (p. 3)
  - Preliminary Examination Grading (p. 3)
  - Failure of the Preliminary Examination (p. 3)
  - Retake of Failed Preliminary Examination (p. 3)
  - Final Examination (p. 3)
  - Final Examination Grading (p. 4)
- Dissertation (p. 4)

Student’s Advisory Committee

On-Campus and Distance Education Degree Programs

After receiving admission to graduate studies and enrolling, the student will consult with the head of their major or administrative department (or chair of the intercollegiate faculty) concerning appointment of the chair of the advisory committee. The student’s advisory committee will consist of no fewer than four members of the graduate faculty representative of the student’s several fields of study and research, where the chair or co-chair must be from the student’s department (or intercollegiate faculty, if applicable), and at least one or more of the members must have an appointment to a department other than the student’s major department. The outside member for a student in an interdisciplinary degree program must be from a department different from the chair of the student’s committee.

The chair, in consultation with the student, will select the remainder of the advisory committee. Only graduate faculty members located on Texas A&M University campuses may serve as chair of a student’s advisory committee. Other Texas A&M University graduate faculty members located off-campus may serve as a member or co-chair (but not chair), with a member as the chair.

If the chair of a student’s advisory committee voluntarily leaves the University and the student is near completion of the degree and wants the chair to continue to serve in this role, the student is responsible for securing a current member of the University Graduate Faculty, from the student’s academic program and located near the Texas A&M University campus site, to serve as the co-chair of the committee. The Department Head or Chair of Intercollegiate faculty may request in writing to the Associate Provost and Dean of the Graduate and Professional School that a faculty member who is on an approved leave of absence or has voluntarily separated from the university, be allowed to continue to serve in the role of chair of a student’s advisory committee without a co-chair for up to one year. The students should be near completion of the degree. Extensions beyond the one year period can be granted with additional approval of the Dean.

The committee members’ signatures on the degree plan indicate their willingness to accept the responsibility for guiding and directing the entire academic program of the student and for initiating all academic actions concerning the student. Although individual committee members may be replaced by petition for valid reasons, a committee cannot resign en masse. The chair of the committee, who usually has immediate supervision of the student’s research and dissertation or record of study, has the responsibility for calling all meetings of the committee. The duties of the committee include responsibility for the proposed degree plan, the research proposal, the preliminary examination, the dissertation or record of study and the final examination. In addition, the committee, as a group and as individual members, is responsible for counseling the student on academic matters, and, in the case of academic deficiency, initiating recommendations to the Graduate and Professional School.

Degree Plan

On-Campus and Distance Education Degree Programs

The student’s advisory committee will evaluate the student’s previous education and degree objectives. The committee, in consultation with the student, will develop a proposed degree plan and outline a research problem which, when completed, as indicated by the dissertation (or its equivalent for the degree of Doctor of Education or the degree of Doctor of Engineering), will constitute the basic requirements for the degree. The degree plan must be filed with the Graduate and Professional School prior to the deadline imposed by the student’s college and no later than 90 days prior to the preliminary examination.

This proposed degree plan should be submitted through the online Document Processing Submission System located on the website http://ogsdpss.tamu.edu (http://ogsdpss.tamu.edu/). A minimum of 64 hours is required on the degree plan for the Doctor of Philosophy for a student who has completed a master’s degree. A student who has completed a DDS/DMD, DVM or a MD at a U.S. institution is also required to complete a minimum of 64 hours. A student who has completed a baccalaureate degree but not a master’s degree will be required to complete a 96-hour degree plan. Completion of a DDS/DMD, DVM or MD degree at a foreign institution requires completion of a minimum of 96 hours.
for the Doctor of Philosophy. A field of study may be primarily in one
department or in a combination of departments. A degree plan must carry
a reasonable amount of 691 (research). A maximum of 9 hours of 400-
level undergraduate courses may be used toward meeting credit-hour
requirements for the Doctor of Philosophy.

Additional coursework may be added by petition to the approved degree
plan by the student’s advisory committee if it is deemed necessary to
correct deficiencies in the student’s academic preparation. No changes
can be made to the degree plan once the student’s Request for Final
Examination is approved by the Graduate and Professional School.

Approval to enroll in any professional course (900-level) should be
obtained from the head of the department (or Chair of the intercollegiate
faculty, if applicable) in which the course will be offered before including
such a course on a degree plan.

No credit may be obtained by correspondence study, by extension or for
any course of fewer than three weeks duration.

For non-distance degree programs, no more than 50 percent of the non-
research credit hours required for the program may be completed through
distance education courses.

To receive a graduate degree from Texas A&M University, students must
earn one-third or more of the credits through the institution’s own direct
instruction. This limitation also applies to joint degree programs.

Transfer of Credit

On-Campus and Distance Education Degree Programs

Courses for which transfer credits are sought must have been completed
with a grade of B or greater and must be approved by the student’s
advisory committee and the Graduate and Professional School. These
courses must not have been used previously for another degree. Except
for officially approved cooperative doctoral programs, credit for thesis
or dissertation research or the equivalent is not transferable. Credit for
“internship” coursework in any form is not transferable. Courses taken
in residence at an accredited U.S. institution or approved international
institution with a final grade of B or greater will be considered for transfer
credit if, at the time the courses were completed, the courses would
be accepted for credit toward a similar degree for a student in degree-
seeking status at the host institution. Credit for coursework taken by
extension is not transferable. Coursework in which no formal grades are
given or in which grades other than letter grades (A or B) are earned (for
example, CR, P, S, U, H, etc.) is not accepted for transfer credit. Credit for
coursework submitted for transfer from any college or university must be
shown in semester credit hours, or equated to semester credit hours.

Courses used toward a degree at another institution may not be applied
for graduate credit. If the course to be transferred was taken prior to the
conferral of a degree at the transfer institution, a letter from the registrar
at that institution stating that the course was not applied for credit
toward the degree must be submitted to the Graduate and Professional
School.

Grades for courses completed at other institutions are not included
in computing the GPA. An official transcript from the university at
which transfer courses are taken must be sent directly to the Office of
Admissions.

Research Proposal

On-Campus and Distance Education Degree Programs

The general field of research to be used for the dissertation should
be agreed on by the student and the advisory committee at their first
meeting, as a basis for selecting the proper courses to support the
proposed research.

As soon thereafter as the research project can be outlined in reasonable
detail, the dissertation research proposal should be completed. The
research proposal should be approved at a meeting of the student’s
advisory committee, at which time the feasibility of the proposed
research and the adequacy of available facilities should be reviewed.
The approved proposal, signed by all members of the student’s advisory
committee, the head of the student’s major department (or chair of the
intercollegiate faculty, if applicable), must be submitted to the Graduate
and Professional School at least 20 working days prior to the submission
of the Request for the Final Examination.

Compliance issues must be addressed if a graduate student is
performing research involving human subjects, animals, infectious
biohazards and recombinant DNA. A student involved in these types
of research should check with the Office of Research Compliance and
Biosafety at (979) 458-1467 to address questions about all research
compliance responsibilities. Additional information can also be obtained
on the website http://rcb.tamu.edu/rcb.tamu.edu.

Examinations

On-Campus and Distance Education Degree Programs

Preliminary Examination

The student’s major department (or chair of the interdisciplinary degree
program faculty, if applicable) and their advisory committee may require
qualifying, cumulative or other types of examinations at any time deemed
desirable. These examinations are entirely at the discretion of the
department and the student’s advisory committee.

The preliminary examination is required. The preliminary examination
for a doctoral student shall be given no earlier than a date at which the
student is within 6 credit hours of completion of the formal coursework
on the degree plan (i.e., all coursework on the degree plan except
681, 684, 690, 691, 692, 693, 695, 697, 791, or other graduate courses
specifically designated as S/U in the course catalog). The student
should complete the Preliminary Examination no later than the end of
the semester following the completion of the formal coursework on the
degree plan.

Preliminary Examination Format

The objective of preliminary examination is to evaluate whether the
student has demonstrated the following qualifications:

a. a mastery of the subject matter of all fields in the program;
b. an adequate knowledge of the literature in these fields and an ability
to carry out bibliographical research;
c. an understanding of the research problem and the appropriate
methodological approaches.

The format of the preliminary examination shall be determined by the
student’s department (or interdisciplinary degree program, if applicable)
and advisory committee, and communicated to the student in advance
of the examination. The exam may consist of a written component, oral
component, or combination of written and oral components.
The preliminary exam may be administered by the advisory committee or a departmental committee; herein referred to as the examination committee.

Regardless of exam format, a student will receive an overall preliminary exam result of pass or fail. The department (or interdisciplinary degree program, if applicable) will determine how the overall pass or fail result is determined based on the exam structure and internal department procedures. If the exam is administered by the advisory committee, each advisory committee member will provide a pass or fail evaluation decision.

Only one advisory committee substitution is allowed to provide an evaluation decision for a student’s preliminary exam, and it cannot be the committee chair.

If a student is required to take, as a part of the preliminary examination, a written component administered by a department or interdisciplinary degree program, the department or interdisciplinary degree program faculty must:

a. offer the examination at least once every six months. The departmental or interdisciplinary degree program examination should be announced at least 30 days prior to the scheduled examination date.

b. assume the responsibility for marking the examination satisfactory or unsatisfactory, or otherwise graded, and in the case of unsatisfactory, stating specifically the reasons for such a mark.

c. forward the marked examination to the chair of the student’s advisory committee within one week after the examination.

Preliminary Examination Scheduling
Students are eligible for to schedule the preliminary examination in the Academic Requirements Completion System (ARCS) if they meet the following list of eligibility requirements:

- Student is registered at Texas A&M University for a minimum of one semester credit hour in the long semester or summer term during which any component of the preliminary examination is held. If the entire examination is held between semesters, then the student must be registered for the term immediately preceding the examination.

- An approved degree plan is on file with the Graduate and Professional School prior to commencing the first component of the examination.

- Student’s cumulative GPA is at least 3.000.

- Student’s degree plan GPA is at least 3.000.

- All English language proficiency requirements are satisfied.

- At the end of the semester in which at least the first component of the exam is given, there are no more than 6 hours of coursework remaining on the degree plan (except 681, 684, 690, 691, 692, 693, 695, 697, 791, or other graduate courses specifically designated as S/U in the course catalog). The head of the student’s department (or Chair of the Interdisciplinary Degree Program, if applicable) has the authority to approve a waiver of this criterion.

Preliminary Examination Grading
Credit for the preliminary examination is not transferable in cases where a student changes degree programs after passing a preliminary exam.

If a written component precedes an oral component of the preliminary exam, the chair of the student’s examination committee is responsible for making all written examinations available to all members of the committee. A positive evaluation of the preliminary exam by all members of a student’s examination committee with at most one dissension is required to pass a student on their preliminary exam.

The student’s department will promptly report the results of the Preliminary Examination to the Graduate and Professional School via the Academic Requirements Completion System (ARCS) within 10 working days of completion of the preliminary examination.

If an approved examination committee member substitution (one only) has been made, their approval must be submitted to the Graduate and Professional School via ARCS. The approval of the designated department approver is also required on the request.

After passing the required preliminary oral and written examinations for a doctoral degree, the student must complete the final examination within four years of the semester in which the preliminary exam is taken. Exams taken in between terms will expire at the end of the term that ended prior to the exam. For example, a preliminary exam taken and passed during the Fall 2023 semester will expire at the end of the Fall 2027 semester. A preliminary exam taken in the time between the Summer and Fall 2023 semesters will expire at the end of the Summer 2027 semester.

Failure of the Preliminary Examination
First Failure
Upon approval of a student’s examination committee (with no more than one member dissenting), and approval of the Department and Graduate and Professional School, a student who has failed a preliminary examination may be given one re-examination. In accordance with Student Rule 12.5, the student’s department head or designee, intercollegiate faculty, or graduate advisory committee should make a recommendation to the student regarding their scholastic deficiency.

Second Failure
Upon failing the preliminary exam twice in a doctoral program, a student is no longer eligible to continue to pursue the PhD in that program/major. In accordance with Student Rule 12.5.3 and/or 12.5.4, the student will be notified of the action being taken by the department as a result of the second failure of the preliminary examination.

Retake of Failed Preliminary Examination
Adequate time must be given to permit a student to address inadequacies emerging from the first preliminary examination. The examination committee must agree upon and communicate to the student, in writing, an adequate time-frame from the first examination (normally six months) to retest, as well as a detailed explanation of the inadequacies emerging from the examination. The student and committee should jointly negotiate a mutually acceptable date for this retest. When providing feedback on inadequacies, the committee should clearly document expected improvements that the student must be able to exhibit in order to retake the exam. The examination committee will document and communicate the time-frame and feedback within 10 working days of the exam that was not passed.

Final Examination
Candidates for the doctoral degrees must pass a final examination by deadline dates announced in the Graduate and Professional School Calendar (https://grad.tamu.edu/knowledge-center/dates-and-deadlines/dates-and-deadlines/) each semester. A doctoral student is allowed only one opportunity to take the final examination.
No unabsoludes grades of D, F, or U for any course can be listed on the
degree plan. The student must be registered for any remaining hours of
681, 684, 690, 691, 692, 791 or other graduate courses specifically
designated as S/U in the course catalog during the semester of the final
exam. No student may be given a final examination until they have been
admitted to candidacy and their current official cumulative and degree
plan GPAs are 3.00 or better.

Refer to the Admission to Candidacy (https://catalog.tamu.edu/
graduate/academic-expectations-general-degree-requirements/
degeerequirementstext) section of the graduate catalog for candidacy
requirements.

A request to schedule the final examination must be submitted to the
Graduate and Professional School via ARCS a minimum of 10 working
days in advance of the scheduled date. Any changes to the degree plan
must be approved by the Graduate and Professional School prior to the
submission of the request for final examination.

The student’s advisory committee will conduct this examination. Only
one committee member substitution is allowed with the approval of
the Graduate and Professional School. If the substitution is for the sole
external member of the advisory committee - with an appointment to
a department other than the student’s major department - then the
substitute must also be external to the student’s major department.
In extenuating circumstances, with the approval of the Graduate and
Professional School, an exception to this requirement may be granted.

The final examination is not to be administered until the dissertation or
record of study is available in substantially final form to the student’s
advisory committee, and all concerned have had adequate time to review
the document. Whereas the final examination may cover the broad field of
the candidate’s training, it is presumed that the major portion of the
time will be devoted to the dissertation and closely allied topics. Persons
other than members of the graduate faculty may, with mutual consent
of the candidate and the chair of the advisory committee, be invited to
attend a final examination for an advanced degree. A positive vote by
all members of the graduate committee with at most one dissension
is required to pass a student on their exam. A department can have
a stricter requirement provided there is consistency within all degree
programs within a department. Upon completion of the questioning of the
candidate, all visitors must excuse themselves from the proceedings.

Final Examination Grading
The student’s department will promptly report the results of the Final
Examination to the Graduate and Professional School via the Academic
Requirements Completion System (ARCS) within 10 working days of
completion of the final examination. The Graduate and Professional
School will be automatically notified via ARCS of any cancellations.

A positive evaluation of the final exam by all members of a student’s
advisory committee with at most one dissension is required to pass
a student on their final exam. If an approved committee member
substitution (1 only) has been made, their approval must be submitted to
the Graduate and Professional School via ARCS.

Dissertation
On-Campus and Distance Education Degree Programs

The dissertation, which must be a candidate’s original work demonstrates
the ability to perform independent research. Whereas acceptance of
the dissertation is based primarily on its scholarly merit, it must also
exhibit creditable literary workmanship. Dissertation formatting must be
acceptable to the Graduate and Professional School as outlined in the
Guidelines for Theses, Dissertations, and Records of Study.

After successful defense and approval by the student’s advisory
committee and the head of the student’s major department (or
chair of intercollegiate faculty, if applicable), a student must submit
the dissertation in electronic format as a single PDF file to https://
etd.tamu.edu/. Additionally, a dissertation approval form with original
signatures must be received by the Graduate and Professional School
through the Academic Requirements Completion System (ARCS). Both
the PDF file and the completed ARCS approval form must be received by
the deadline.

Deadline dates for submitting are announced each semester or summer
term in the Graduate and Professional School Calendar (see Time Limit
statement). These dates also can be accessed via the Graduate and
Professional School website (https://grad.tamu.edu/).

Each student who submits a document for review is assessed a one-time
thesis/dissertation processing fee through Student Business Services.
This processing fee is for the thesis/dissertation services provided. After
commencement, dissertations are digitally stored and made available
through the Texas A&M Libraries.

A dissertation that is deemed unacceptable by the Graduate and
Professional School because of excessive corrections will be returned to
the student’s department head or chair of the intercollegiate faculty. The
manuscript must be resubmitted as a new document, and the entire
review process must begin anew. All original submittal deadlines must be
met during the resubmittal process to graduate.

Additional Requirements

Residence

A student who enters the on-campus doctoral degree program with a
baccalaureate degree must spend one academic year plus one semester
in resident study at Texas A&M University. A student who holds master’s
degree when they enter the on-campus doctoral degree program must
spend one academic year in resident study. One academic year may
include two adjacent regular semesters or one regular semester and
one adjacent 10-week summer semester. The third semester is not
required to be adjacent to the one year. Enrollment for each semester
must be a minimum of 9 credit hours each to satisfy the residence
requirement. A minimum of 1 credit hour must be in a non-distance
degree when they enter the on-campus doctoral degree program must
education delivery mode. Semesters in which the student is enrolled in
all distance education coursework will not count toward fulfillment of the
residence requirement.

To satisfy the residence requirement, the student must complete a
minimum of 9 credit hours per semester or 10-week summer semester in
resident study at Texas A&M University for the required period. A student

Guidelines for Theses, Dissertations, and Records of Study.
who enters the on-campus doctoral degree program with a baccalaureate degree may fulfill residence requirements in excess of one academic year (18 credit hours) by registration during summer sessions or by completion of a less-than-full course load (in this context a full course load is considered 9 credit hours per semester).

Students who are employed full-time while completing their degree may fulfill total residence requirements by completion of less-than-full time course loads each semester. In order to be considered for this, the student is required to submit a Petition for Waivers and Exceptions along with verification of employment to the Graduate and Professional School. An employee should submit verification of employment at the time they submit the degree plan. See Registration (http://catalog.tamu.edu/graduate/academic-expectations-general-degree-requirements/#registrationandacademicstatutext).

Distance Education Degree Programs

Distance education doctoral degree students do not have a residence requirement.

See Residence Requirements (http://catalog.tamu.edu/graduate/academic-expectations-general-degree-requirements/#degerequirementstext).

Time Limit

On-Campus and Distance Education Degree Programs

All requirements for doctoral degrees must be completed within a period of ten consecutive calendar years for the degree to be granted. A course will be considered valid until 10 years after the end of the semester in which it is taken. Graduate credit for coursework more than ten calendar years old at the time of the final oral examination may not be used to satisfy degree requirements.

After passing the required preliminary oral and written examinations for a doctoral degree, the student must complete the final examination within four years of the semester in which the preliminary exam is taken. Exams taken in between terms will expire at the end of the term that ended prior to the exam. For example, a preliminary exam taken and passed during the fall 2019 semester will expire at the end of the fall 2023 semester. A preliminary exam taken in the time between the summer and fall 2019 semesters will expire at the end of the summer 2023 semester.

A final corrected version of the dissertation or record of study in electronic format as a single PDF file must be cleared by the Graduate and Professional School within one year of the semester in which the final exam is taken. Exams taken in between terms will expire at the end of the term that ended prior to the exam. For example, a final exam taken and passed during the fall 2022 semester will expire at the end of the fall 2023 semester. A final exam taken in the time between the summer and fall 2022 semesters will expire at the end of the summer 2023 semester. Failure to do so will result in the degree not being awarded.

Continuous Registration

On-Campus and Distance Education Degree Programs

A student in a program leading to a Doctor of Philosophy who has completed all coursework on their degree plan other than 691 (research) are required to be in continuous registration until all requirements for the degree have been completed. See Continuous Registration Requirements (http://catalog.tamu.edu/graduate/academic-expectations-general-degree-requirements/#registrationandacademicstatutext).

Admission to Candidacy

On-Campus and Distance Education Degree Programs

To be admitted to candidacy for a doctoral degree, a student must have:

1. completed all formal coursework on the degree plan with the exception of any remaining 681, 684, 690 and 691, or 791.
2. a 3.0 Graduate GPA and a Degree Plan GPA of at least 3.0 with no grade lower than C in any course on the degree plan,
3. passed the preliminary examination (written and oral portions),
4. submitted an approved dissertation proposal,
5. met the residence requirements. The final examination will not be authorized for any doctoral student who has not been admitted to candidacy.

Languages

On-Campus and Distance Education Degree Programs

A student is required to possess a competent command of English. For English language proficiency requirements, see the Admissions section of this catalog. The doctoral (PhD) foreign language requirement at Texas A&M University is a departmental option, to be administered and monitored by the individual departments of academic instruction.

99-Hour Cap on Doctoral Degrees

On-Campus and Distance Education Degree Programs

In Texas, public colleges and universities are funded by the state according to the number of students enrolled. In accordance with legislation passed by the Texas Legislature, the number of hours for which state universities may receive subvention funding at the doctoral rate for any individual is limited to 99 hours. Texas A&M and other universities will not receive subvention for hours in excess of the limit.

Institutions of higher education are allowed to charge the equivalent of non-resident tuition to a resident doctoral student who has enrolled in 100 or more semester credit hours of doctoral coursework.

Doctoral students at Texas A&M have seven years to complete their degree before being charged out-of-state tuition. A doctoral student who, after seven years of study, has accumulated 100 or more doctoral hours will be charged tuition at a rate equivalent to out-of-state tuition. Please note that the tuition increases will apply to Texas residents as well as students from other states and countries who are currently charged tuition at the resident rate. This includes those doctoral students who hold GAT, GANT, and GAR appointments or recipients of competitive fellowships who receive more than $1,000 per semester. Doctoral students who have not accumulated 100 hours after seven years of study are eligible to pay in-state tuition if otherwise eligible.

Doctoral students who exceed the credit limit will receive notification from the Graduate and Professional School during the semester in which they are enrolled and exceeding the limit in their current degree program. The notification will explain that the State of Texas does not provide funding for any additional hours in which a student is enrolled in excess of 99 hours. Texas A&M University will recover the lost funds by requiring students in excess of 99 hours to pay tuition at the non-funded, non-resident rate. This non-funded, non-resident tuition rate status will be updated for the following semester and in all subsequent semesters until receipt of a doctoral degree. Please see the Tuition Calculator (https://tuition.tamu.edu/) at the non-resident rate for an example of potential charges.
The following majors are exempt from the 99-Hour Cap on Doctoral Degrees and have a limit of 130 doctoral hours:

- Biochemistry and Molecular Biophysics
- Biomedical Sciences
- Clinical Psychology
- Counseling Psychology
- Genetics and Genomics
- Health Services Research
- Medical Sciences
- Microbiology
- Neurosciences (College of Medicine)
- Nutrition
- Oral and Craniofacial Biomedical Sciences
- Pharmaceutical Sciences
- Public Health Sciences
- School Psychology
- Toxicology
