DOCTOR OF NURSING PRACTICE

Additional Requirements

**Practicum III (minimum 120 practicum hours)**

Activities: IRB application submitted; project budget and timeline

Deliverables: IRB application submitted; project budget and timeline

**Practicum II (minimum 120 practicum hours)**

Activities: Project timeline; Proposed budget; IRB application

Deliverables: Project timeline; Proposed budget; IRB application

**Practicum I (minimum 120 practicum hours)**

DNP Project Overview

The student will submit verification of up to 500 practice hours from their Master’s program in NursingCAS during the application process. All practice hour requests require review and approval by the Director of the DNP Program. Students with fewer than 500 practice hours will complete necessary hours through completion of prescribed electives. These electives will be determined in a program-planning meeting between the student and the DNP program director.

**Practicum IV (minimum 120 practicum hours)**

Activities: Data collection timeline and plan; dissemination plan

Deliverables: IRB approval; data collection; timeline and dissemination plan

**99-Hour Cap on Doctoral Degrees**

In Texas, public colleges and universities are funded by the state according to the number of students enrolled. In accordance with legislation passed by the Texas Legislature, the number of hours for which state universities may receive subvention funding at the doctoral rate for any individual is limited to 99 hours. Texas A&M and other universities will not receive subvention for hours in excess of the limit.

Institutions higher education are allowed to charge the equivalent of non-resident tuition to a resident doctoral student who has enrolled in 100 or more semester credit hours of doctoral coursework.

Doctoral students at Texas A&M have seven years to complete their degree before being charged out-of-state tuition. A doctoral student who, after seven years of study, has accumulated 100 or more doctoral hours will be charged tuition at a rate equivalent to out-of-state tuition. Please note that the tuition increases will apply to Texas residents as well as students from other states and countries who are currently charged tuition at the resident rate. This includes those doctoral students who hold GAT, GANT, and GAR appointments or recipients of competitive fellowships who receive more than $1,000 per semester. Doctoral students who have not accumulated 100 hours after seven years of study are eligible to pay in-state tuition if otherwise eligible.

Doctoral students who exceed the credit limit will receive notification from the Graduate and Professional School during the semester in which they are enrolled and exceeding the limit in their current degree program. The notification will explain that the State of Texas does not provide funding for any additional hours in which a student is enrolled in excess of 99 hours. Texas A&M University will recover the lost funds by requiring funding for any additional hours in which a student is enrolled in excess of 99 hours. Texas A&M University will recover the lost funds by requiring students from other states and countries who are currently charged tuition at the non-resident rate. This non-funded, non-resident tuition status will be updated for the following semester and in all subsequent semesters until receipt of a doctoral degree. Please see the Tuition Calculator (https://tuition.tamu.edu/) at the non-resident rate for an example of potential charges.

The following majors are exempt from the 99-Hour Cap on Doctoral Degrees and have a limit of 130 doctoral hours:

- Biochemistry
- Biomedical Sciences
- Clinical Psychology
- Counseling Psychology
- Epidemiology and Environmental Health
- Genetics and Genomics
- Health Services Research
- Medical Sciences
- Microbiology
• Neurosciences (School of Medicine)
• Nutrition
• Oral and Craniofacial Biomedical Sciences
• Pharmaceutical Sciences
• Public Health Sciences
• School Psychology
• Toxicology
